Subject: Public Records Request - Evers, A. 33-G

EXTERNAL SENDER

Good morning,
The Governor's Office of Open Government has received your request for records, a copy of which is attached for your reference. Our office has previously released two requests that fit the search parameters of your request. They can be found on the Governor's website at the link provided below under "01-25-2021_SEXTON_06-P_Responsive_Documents" and "07-17-2020_BOUSQUET_16-P_Responsive_Documents". Please note that the records contained under "BOUSQUET_16-P" is just the first data sheet available. If you would like the entirety of the public comments submitted, we can send you a cost estimate.

https://fleog.sharepoint.com/:f:/s/Open_Gov/EvK8qxZrj-5Fr7ytOck_EcoByfN9CUqJMj9JzNg8bj9pYQ

If there are other records you are looking for, please let us know with specificity and we would be happy to assist you.

Thank you for contacting the Executive Office of the Governor.

Sincerely,

Alyson Stalnaker
Administrative Assistant
Executive Office of the Governor
Office of the General Counsel
(850) 717-9310

Please note that Florida has a broad public records law and correspondence sent to me, which is not confidential or exempt pursuant to Chapter 119 of the Florida Statutes, is a public record made available upon request.

AMERICAN OVERSIGHT

County	Area of Interest	Comments
Orange	General	I am a journalist for the Orlando Sentinel. I am submitting this comment to be included in the feedback system. Thank you.
Seminole	General	However re-opening is established please create some simple marketing graphics to help the public easily understand what the process is. I am attaching some sample documents Hawaii is using that seem to be very easy to understand.
Polk	General	Don't fucking do it. Wait until things get better. Of course you are putting profits over people like a typical Republican. You are Trump's bitch boy and will do whatever he says. Why don't you think for yourself for once? Now we are going to have to be in Quarantine for longer because of your stupid ass. When the death toll rises the blood will be on your hands. Fucking moron.
Charlotte	Healthcare	To open the economy back up when my small town alone is increasing by 20 at least a day in positive cases is purely irresponsible. I know money is a factor but who can spend money when they're dead. There should be a 10 day no positive cases at least or a serious decline in positive cases! Please make the right call.
Hernando	General	Florid needs to remain CLOSED until such time as the number of newly tested cases of COVID-19 drops significantly. We must TEST as many Floridians as possible to ascertain the true level of illness in our communities and not guess.
Orange	Healthcare	Greetings, I'm massage therapist and personal trainer. While I'd like to get back to work soonest. I'm also concerned about my safety as a massage therapist. I understand there are many variables to consider and it's a healthy balancing act between physical and economic health, but there will be egg on the faces of those in government more so than now (unemployment woes) if we open too early even with social distancing and masks. Based on a report I saw yesterday it seems like mid-June would be optimal. So following the President's guidelines would be best. Meaning the phases and if it happens to be June so be it. If it's sometime in May that's fine as well but opening early will and the backlash that would ensue would be ugly Mark's on many political careers. Thanks for your time.
Pasco	Information	Reopening Florida needs to be done in stages. Those jobs that can be done while maintaining distancing first, and then gradually jobs that have closer contracts going last. Last to open should be places that have hands on contact such as massage, skin/makeup services, barber shops and salons. Also to be taken into consideration is the availability of disinfecting agents and cleaners. Some items that are still hard to find are alcohol, disinfectants, and hand sanitizer. If the well being off the public is the first priority, then this is the approach that makes the most sense to me.
Charlotte	Food	Let's reopen the food service industry immediately at 50% occupancy for the first month we need to get these people back to work they're the hardest hit my area is Construction Services and I'm still holding my own just a little slow
Orange	Recreation	Please reopen all parks and camping areas with restrictions in place. Some people live in their vehicles/ vans/ or campers. We need more recreational places to be open. Thank you!

AMERICAN OVERSIGHT

Orange	General	Please do not open our economy to the virus. Our cases are still too high, I am very sensitive To small business owners since I was one before I retired, but our health and lives are much more important!
Orange	General	Hair, nails retail stores
Orange	Healthcare	Please instead of opening the whole state at once. Consider opening up the smaller counties first - and counties with least cases in previous months. If after one week there are no uptick in the number of cases- open more.. use layered approach. Open only the jobs. Not the recreational activities yet- sports stadiums, Places with seatings can still be opened- with guidelines- to occupy every 5-6 seat And wearing of masks in public
Palm Beach	Government	He absolutely should not reopen Florida we have not even hit the peak of covid-19!considering Florida's elderly population we have been relatively lucky thus far. reopening would be catastrophic. I am not elderly or at risk but I do care about my fellow Floridians and my fellow Americans....
Orange	Tourism	Let's re-open the state, enough is enough. Those who are at risk or want to stay home, do so and let the rest of us who are low to no risk get back to our lives and jobs.
Palm Beach	General	Please DO NOT open Florida back up. People are already not taking it seriously and still going out for leisure. There are infected people out there and we don't know who. People are careless with their PPE, licking their fingers after they touch things, not using their masks properly, or not wearing a mask at all. Social distancing is a joke to some people and they even take their young children out to restaurants and grocery stores. Once you open up the state it's going to get worse. Then you have our president suggesting that people should ingest Lysol... can you even imagine what would happen if someone went outside to a place that's reopening, accidentally exposes themselves and then goes home and takes some Lysol? More unnecessary work for our front line workers, mainly hospital staff due to stupidity. Please DO NOT open up Florida.
Osceola	General	I understand the reopening the state is a very hard decision as there are so many issues to consider. I have the main topic is the health of our state and stopping the pandanemic as all life are important. I hope we follow the recommendations of our medical doctors and state provide financial help to the people that need it (small business, unemployed/furloughed, and tourism and any other industry that was/is affected by the closing). We need to not only take care of each other by keeping us save but also help each other as this is affecting financially some more than others!
Martin	Government	Please do NOT re-open the businesses yet. It is way too soon. Studies from Dade county are showing many, many more active cases showing no symptoms than previously thought. Do not re-open!

AMERICAN OVERSIGHT

Hillsborough	Healthcare	testing needs to be made available first of all. one person at my essential business was out with severe flu symptoms. they could not get tested and eventually came back to work still untested. we may all have been positive and passing it on to customers. while still working I am aware of the difficulty of people trying to file for unemployment. full blame should be put on rick scott publicly for creating this system started by his administration based on cronyism. it is also partly the current governors fault for not fixing the system. no-one has indicated any improvements have been made. lastly these so-called freedom groups harrasing nurses should been dispersed at a minimum and possibly fined for civil disobedience or reckless endangerment of public health.
Brevard	General	No, No and No!!!!!! regarding reopening florida!!!!
Lake	General	Thank you Governor for the hard work that you've put in to everything that you've done for us so far. I know you can count on your task force and the help of the people to make decisions to reopen Florida. I stand behind you 100% in whatever decisions you make. And pray for you daily. There's a part of me that thinks we should just go back to normal because it seems like this flu is a terrible flu yes it is but is it any worse than the regular flu that has killed so many people. I would love to see the kids graduate this year at least in June not in August or September. They've worked way too hard not to get their diploma. I'd also like to see at least one hospital in every county open for surgeries only and also assign one for the COVID-19 only we are not New York we don't need every hospital to be assigned for the COVID-19. I don't have much to say because I back you whatever you decide. And thank you again
Palm Beach	General	My family and I leave in Palm Beach County and ask that you please take the reopening slow we have had so many deaths in our County and not taking this slow will increase the number of cases and deaths. Thank you for you consideration.
Collier	General	Thank you Governor Santis. I approve of how you have handled this crisis. Our hospitals were never overwhelmed, the curve has been flattened. I would like to see the state re-opened. The nursing homes are the hotspots. I would like to see resources aimed at prevention and safety for them. Jennifer Bittner

AMERICAN OVERSIGHT

Pinellas	Healthcare	I'm in a risk group. I will not go back to restaurants and movies and stadiums until we have widespread vaccinations and antibody testing. I think masks should be mandatory. I get restaurant takeout and fools without masks are loitering in the lobby while restaurant workers without masks are preparing food and handling payments. Even take out is risky. I am the only one wearing a mask. They have a dozen Covid19 patients in the Tarpon hospital. It's getting worse in my town. Please focus on clarifying and enforcing distancing guidelines. Please make masks mandatory. Please work to get N95 masks on the store shelves. Please work to get testing and tracing scaled out in Florida. Please fix the unemployment issue. My daughter is broke and getting worse. Please have smart rules like restaurants without carpet, severs with antibodies. I'm scared for my health and pushing to open businesses needs to be careful, gradual and science based.
Collier	Management	Please open Florida now! I am personally ok but the young people in the tourism industry are dying, my son is the head sales for a major company the people losing their jobs, if thie goes on we will be in a depression!!!!! Look at Sweden .....
Orange	General	Ron DeSantis has a log of Donald Trump's corny, greasy shit where his brain should be. Pretty embarrassing this idiot served in the Navy and is a lawyer but can't wipe his own ass. Probably wiped piss off the toilet seat for his CO. Thanks for the virus!
Osceola	General	Please make it mandatory for every person to wear a mask in public.
Lake	Tourism	It is too soon to invite the world into our home, Florida. Our stores are continually sold out of antibacterial cleaners. We can't buy Lysol or Purell or even rubbing alcohol. PPE is being sent to the front lines. We can not get an N95 mask. You are asking me to put myself and my grand daughter's lives on the line so tourists can feed romaine lettuce to giraffes? Risk carrying the virus into my house so some tourist kid can pet a llama??? WE CAN NOT BUY THE THINGS WE NEED TO KEEP OURSELVES AND OUR FAMILIES SAFE. It is just too soo .
Pinellas	General	Please do not reopen Florida until our testing is more prevalent and valid. People's lives are at stake. Keep beaches closed longer. We still have too many new cases and deaths each day.
Orange	Construction	I build assisted living hospitals and rehabilitation centers and remodeling also. My question is when will construction be able to resume? We are completely committed to the following safety protocols. We are in a area with no contact with residents. The area is sealed off and we provide negative air so particulates are unable to transmit to any residential areas? We need to get back to work please reach out to ACHA and set standards for us to resume work. Thank you

AMERICAN OVERSIGHT

Orange	Finance	My stimulus check was sent to the wrong bank. I've have my current bank for almost 2 years. I called social securi1ty and they couldn't beleive the IRS sent it to the wrong bank. Now I have to wait 3 weeks for a paper check. This is so wrong! I can't pay my rent or groceries. What am I supposed to do now. And FYI,I do not support opening places. It's too early. How can we slow this Covid 19 if we open too soon?
Lee	Government	Lee county should not open this week. The numbers are still on they rise. Perhaps in two weeks.
Brevard	General	We need to open Florida back up ASAP! I know the virus is horrible and it will continue to be as we continue to let others come into the state. However the homeless, hungry people that can't work will continue to rise along with the mental health. We can't stop this virus obviously we see that now but we can't continue live this life we all are living. If people don't won't to go out that their choice. Please open back up before the ones are are still working does have a job and the unemployment rises higher.
Volusia	Education	I feel that Florida schools should all go year around to get our children caught up. OR the kids should begin the first of august, only two days off for thanksgiving not the usual week plus a day, winter break be shortened and the end of the year be extended into June. This would allow extra time to be spent the first 2-3 months back to teach the prior year then move forward with the current grade curriculum I'm a nurse. Until this pandemic nurses received ZERO credit for our long hours, horrible medical benefits, hostile work environments and low pay. Yet teachers get alcaldes galore, excessive time off and affordable/free health benefits. I don't want to hear complaints from them about the upcoming year. This distances learning is not a learning tool but more keeping the kids minds fresh and present. My 4th header should not be held back. The state needs to step in and make a unified descion on prior year learning. I trust that our current Florida Lear ship is capable of seeing this through.
Sarasota	Professional Services	I provide permanent hair removal. If i can schedule time between clients to clean i would like to reopen and also i will be wearing a mask
Duval	General	Stop being a puppet of a moronic president and trying to rush to open the state. We will be seeing the increase in cases from Georgia shortly. Fix the unemployment system for those that need it and allow people to remain home and safe.
Broward	Recreation	To limit the opening of beaches, limit hours to non high sun times. ie: 7:00 AM-10:00 Am and 4:00 PM- 7:00 PM. this for 6+ weeks. This will also reduce the initial heavy impact on the beaches that happened in Jax. Local Government will complain that this is a drag on resources but it is not really. they are enforcing the beach ban now and this will in fact reduce the time spent on doing enforcment.

AMERICAN OVERSIGHT

Osceola	General	We need to wait on reopening the state there are more people testing postive and new cases . The death toll is higher and I think we need to wait on reopening. Lot of people are not following the cover your face order in Osceola county and I dont think it's a good idea not just yet. Disney has to work on something for safety for guests and cast. Do more testing be absolutely safe before opening things up.
Seminole	General	People don't listen now. Good example was my county where positive people were doing errands. Open up more things will only get worst. Especially with counties that have higher counts. At least with restrictions it was somewhat helping. The counties that have few cases are ones that should be less restricted if anything. Start easing up the younger will really be spreading it again
St. Lucie	General	It is too early to open everything up. Numbers are climbing.
Martin	Recreation	Open ALL the beaches. It's the safest place to be..and not for limited hours like Jacksonville did so people can flock to them during limited hours.. Really..use some common sense.
Hillsborough	Management	Open Fla economy now! Herd immunity works. This shutdown needs to end now!
Sarasota	General	Due to Florida's high older population and me being immunocompromised scares me terribly about re-opening the economy and Beechers without major restrictions terrifies me, all of my doctors have suggested that even throughout May I need to stay inside because of the heightened risk. If you do reopen Florida, Make sure there is extremely tight restrictions such as mandatory Face mask
Orange	Professional Services	Consider opening nail salons for pedicures only. All would have to be masked. But during a pedicure we are actually quite a distance apart from each other and we would be required to wear a mask. As WWE and golf have been considered Essential - it is time to look at some things for us ladies! I believe this is reasonable. Studies show that exposure is almost nil when EVERYONE is masked and distance maintained
Sarasota	General	Keep closed until SCIENCE gives us the go ahead to reopen. Let other states be test. Be safe, NOT SORRY.
Palm Beach	Recreation	Please open the beaches, boat ramps and marinas. Boating is part of our business and family recreation.
Collier	General	Please open the beach during the day for exercise & evening for sunset viewing. Please allow chairs at night. To keep away folks other than locals have patrols on the beach checking licenses to insure nobody from other coast coming over. Fines should be high to discourage these other people from coming over.
Columbia	Government	We need to reopen our economy. There's thousands of restaurant workers who haven't even got approved for unemployment yet and live off tips. If you don't feel safe, you can continue to stay home meanwhile, the rest of us will get on with life.

AMERICAN OVERSIGHT

Orange	General	At the very least, we should open up all businesses that put in procedures to maintain six feet social distancing. There is absolutely NO reason that we can go into a Lowe's with these restrictions but not be allowed to go into a furniture store or small business that could easily put in the same restrictions and have far less customers in the building. This should be done immediately! Next, have restaurants have these same social distancing requirements with their seating, tables six feet apart so each family unit is separated from other units. Save our economy before it's too late!!!
Palm Beach	Education	I feel that we should remain Social Distancing until it is medically safe to do so I I own a Preschool and it is temporary closed. I want to reopen in the worst way, but, I want to feel as safe as possible when I make that choice Opening up like Georgia is reckless and will only cause this disease to mass populate all over again That is my opinion
Lee	General	Do NOT open Florida yet.....many people are not taking this seriously.....the rebound effect will be catastrophic
Osceola	Government	I hope that you fix the unemployment prior to opening businesses. You cannot continue to be the leader for flattening the curve while at the same time being last in taking care of the displaced worker. There should be a very simple yet specific application, no more than one page. This will cut down on DEO processing time, call center traffic, website issues, and applicant errors. Honestly, everyone who applied should be approved since EVERYONE was affected by the COVID shutdown. I myself was not claiming UI, but was unemployed and was working and spending my savings on supporting myself and trying to open my own business. I have errors and incorrect information on my account that I didn't put there, now everyday I wake up and try to call DEO to get some sort of response, over 400 calls, not one answer. I wonder if I'll every get benefits, it sucks because until the beginning of March I was trying to avoid utilizing UI. Now that I need it, it's hard to get, doesn't make a lot of sense unless you're trying to hurt people. I've always said if you want consumers to consume or at the very least pay their bills the money should go directly to the people. Especially due to the nature of our economy. I do want you to open the State for business, just don't do it too quickly and make sure we are truly safe to due so. You know the influx of people that will travel to our state and you know as a hospitality and service based economy people are going to have to interact with each other. Thank you for collecting our thoughts, I hope you use this feedback to gauge your plan of action!
Palm Beach	Government	I would like to see small businesses be able to write checks (overdraft if necessary) for items needed to open up...i.e. masks, disinfectants, partitions in restaurants, etc. and have the government pick up the overdraft tab instead of all this rescue money. I don't think the government has any idea what to send to each business. For example, Ruth Chris and Harvard. Let the businesses write checks as they see fit. Also Pelosi and her crew can't add their nonsense to each business. That would kind of override her BS

AMERICAN OVERSIGHT

Pinellas	Retail	Open everything back up! The fear mongering and overreach has gone on long enough. Let the little people get back to work, open those small businesses and restaurants that were complying with social distancing, which is a farce. But leave the option open for those rich people who want to still work from home in their jammies to be allowed to do so in the name of health. Herd immunity is a REAL THING. You people should really be more educated on it than what you portray.
Lake	General	I am a resident of Florida. I am a healthcare worker. I continue to work. I have full knowledge of the COVID-19 pandemic. I am very much in favor of reopening Florida in a safe manner. With the climate that we live in as well as approaching our hurricane season I think it is essential that we get to business of re-opening our state. I believe they should be short phased approach. We should continue the CDC in presidential guidelines for a period of time. I have the full understanding that Covid will never be 100% gone as is the common influenza. We continue to learn more and more about the virus. We will win this battle! Our economy, our workers, our residences need to get back into some sort of normalcy. I am not fearful of contracting the disease yet I respect the disease. I will continue to follow all guidelines but I would like to have some normalcy back in my life. I advocate re-opening all social gatherings with limitations as well as our beaches, our accommodations and our extras in life. Once again I am very much in favor of opening our state and economy in a short phased approach. I have all the faith in the world in our healthcare system And our scientist that we will surpass this COVID pandemic. If you do not start this phasing I believe there will be more and more people who do not follow the guidelines and step outside the safe re-entry. We are the United States of America and need to get back to normalcy. All be it a little different. Thank you Ron DeSantis, President Trump and Vice President Pence and your casts fours you all have done a phenomenal job. I love the USA in my home state of Florida!
Palm Beach	Healthcare	Do not open till science says it is safe and then continue social distancing till a vaccine is proven to work.
Orange	General	The state is nor prepeare to open! The Pandemic is not under control!
Palm Beach	General	Don’t reopen until you have easily accessible and reliable testing.
Collier	General	I think Florida has taken reasonable and necessary precautions and now it is time to open up the country. Mental health is a huge deal and so is the economy. I think Florida needs to be reopened on May 1st to best benefit our country.
Seminole	Healthcare	In order to open the country we need a massive Covid-19 test. Parents will need to go back to work and the kids will be exposed in summer camps. Not everyone will have the benefit to be safe from this virus and hospitals might not have the capacity for everyone.
Brevard	Healthcare	To early to open beaches
Leon	Government	Continue to encourage remote working for state workers, especially those with children in school!

AMERICAN OVERSIGHT

Clay	Food	If restaurants reopen, how will we keep our employees safe from customers? What regulations will be in place regarding social distancing? How in the world do we serve food to people from 6 feet away? How do we keep people from grouping together and talking in the dining room? I would like there to be strict public requirements told to the general public to follow when out.
Clay	General	My personal opinion is that the health and well-being of our citizens is far more important than any economic loss or gain. As a mother, I am still frightened at the idea of the state opening back up. Many high-risk employees, including some of my family members will be forced to go back to work, risking their lives if the state opens back up, risking their lives and potentially exposing their family's members. I ask you to please, think of the citizens and their health before opening our state up too soon. We have already been warned of a second, more deadly wave of covid 19. The lives already lost are far too many- we don't need to lose anymore. It is my personal thought it is too soon to open our state back and I hope that Is taken into consideration. Thank you for your time. Thank you for working around the clock to make the best decisions for our citizens.
Palm Beach	General	Do the right thing, and leave the state closed until we are past this. Nearly 80% of the country believes we need to keep the country closed; do not listen to the uninformed who are disregarding CDC guidelines and denying science. As a government, you should be leaders so lead us in the right direction. Opening too early will hurt the economy longer and we all know it.
Hillsborough	Transportation	Our Transportation network has been crippled to the point that recovery is questionable. The bus, taxi and Limo industry are a lot of family owned businesses and support multiple families, employees and independent contractors. So few of these businesses have received any assistance . They are all willing to do what ever safety measures are required to get back to work. Several companies have developed screens between driver and passengers. I know the health issue is so very important but I believe the task force should look at the health risk of these of losing your 30 plus year business and everything you have worked for all your life. There is risk to our state going in either direction so a soft opening with safety requirements and most of all a date to give hope.
Clay	Government	There is still to many people testing positive for the virus. Opening everything up right now everyone is still at risk I have 3 children and I'm afraid to take them to the store because people are coughing and sneezing and not blocking there nose and mouth when they do. People aren't listening to what the governor already said to social distance no one is staying 6 feet apart. I think it's to soon to open Florida back up .
Orange	General	Everyone that goes into an establishment should be required to wear a face covering/ mask. That includes employees and customers. This is the only way to prevent the spread if we reopen
Duval	General	i think it's way too early to re-open florida or any state or any country - until the last person has died or the last effort to combat this killer has been taken we should stay as far apart as possible - STAY HOME - SAVE LIVES

AMERICAN OVERSIGHT

Orange	General	Hey I feel it's to early to open up Florida we steel have people that or coming in contact with this virus I myself already had sister that had this virus and a friend that had died from this virus if you open up more people will die i know people want to get back to work but you have to think of the bigger picture here you we will still be among this deadly virus please think about how money more lives will be lost.
Manatee	Tourism	Florida needs to restrict visitors for some time. Be more enforce social distancing Florida is not ready to open. I'm not happy with the speed Florida acted in the beginning. Many cases could have been avoided if action had been sooner.
St. Johns	General	Open it back up. People with depression and anxiety are having major mental health issues. Also if the people still shopping at Walmart, Target, home Depot, are not spreading it then why would another store change that? I personally think if you open other areas and make it mandatory to wear mask, practice social distancing, and only allowing a percentage of people into that store then FL could reopen. We have been on a downward trend for a while now, hospitals are not at capacity. Open FL upm let people go back to work. If some residents are worried about things being reopen let it be their choice to still practice safer at home nobody is telling them to go out. But let it be the residents choice if they would like to reopen or not.
Brevard	General	I feel with guidelines and suggestions people should be free to move about freely and allow commerce to commence. Understandable that these precautions were taken to avoid hospital shutdowns, but now with updated facts we should not be dangerously cautious. We are a free people with rights, we do not need a nanny state.... open up
Hillsborough	General	I think we should follow those experts in pandemics advice and those that listen to the experts advice with sound reasoning. Do not rely on nonsense created by fears of what if's!
Clay	Government	I don't think opening Florida is a good idea...the cases keep going up I agree with you on not putting a time line on it but doing it right... thanks for all your hard work.
Brevard	Education	END the school year and the distance learning at the end of this week. It's doing more harm than good and a complete waste of time for parents, students, and teachers. I'm a public school teacher and what we're requiring of students is ridiculous and NOT what "learning" should look like. It's busy work and I think just being assigned so we can say "we tried". Sadly, some kids are going to so hate school even more than they already did before this started.
St. Lucie	General	Follow the "Science to Reopen"!
Palm Beach	General	As a single mom, 1099 worker, no daycare, sick child, applied April 2nd online. Received a letter that no earnings for 2018 or 2019. Why didn't the application request copies of 1099 or taxes? Do I have to go to the back of the line now or just move to my car?

AMERICAN OVERSIGHT

Clay	General	As a Florida resident and concerned citizen I urge this task for and Governot Desantis to exercise extreme caution and prudent measures in reopening the state. Based on publically available data we have yet to "flatten the curve." New information regarding the impacts of COVID-19, including the high risk for long term respiratory damage and sudden major strokes in those in their 30s and 40s shows that we still do not fully understand this disease's potential long term impact on the lives of those infected. No amount of economic impact is worth risking thousands if not millions of live . Yes, isolation is difficult. Yes, the economy may suffer, but I beg that you please put ethics, morality, and the safety of your people above the almighty dollar. Follow the guidelines from the CDC and federal government at the minimum. Our lives literally depend on it. Thank you.
Duval	General	Please open up our state by May 1st. Let's get people of our great state working again. Don't cave to the naysayers. Please use stats and data and not emotion to make your decision. Floridians are ready to get their lives back. Thank you!
Duval	Healthcare	As a healthcare worker, I think all healthcare workers should be tested regardless of symptoms. I think that the healthcare worker may have the antibodies. I think this should be mandatory for healthcare workers. Businesses should be limited to the amount of people in the business. Possibly still limiting the hours of operation.
Sarasota	General	I do not believe we should even think of opening up Sarasota, or the whole state of Florida for that matter until at least June. And then with restrictions, guidelines, and social distancing still applying until we see what happens from there. I believe lifting all restrictions, opening up everything full force, will bring total disaster. We are far far from being free from coronavirus.
Manatee	Food	In the food service business, it’s a small cafe and people are not going to be coming in like they use to and the business is going to fail..unlike as soon as shopping opens everyone is going to go crazy and not social distance as we saw when the boat ramps opened up and we are going to be right where we were a month ago with possibly more fatalities. We should wait another month I believe until summer is here upon us and traffic and number of people decrease drastically.
Palm Beach	General	Phase it, reopen recreational areas such as parks, beaches and golf courses. Wait another 2 weeks to reopen small businesses,
Duval	Education	Summer camps are vital to the re opening of Florida and allowing parents to get back to work. Will the re opening plan outline this? Having all campers wear masks or maintain 6 foot social distancing is unrealistic. Camps are a separate entity from childcare and need guidance on reopening

AMERICAN OVERSIGHT

Orange	Retail	Good Morning. I have two issues-the first of which is the federal recommendation to open daycares in phase 2. This is especially worrisome for me as my daycare clos3d in the beginning of April due to lack of children-as so many of us were out of work. If things start ramping up but the daycare needs to remain closed I'll im worried about not being able to start back at work immediately. I'm the manager at a restaurant inside of food court at the Florida Mall in Orlando. I'm very curious to see where we will fit in to the reopening plan-given the logistics of the mall being a large enclosed building typically meant to see crowds of people. The food court in particular with its design I am very anxious to see how safety measures will be implemented. I'm also wondering the efficacy of temperature checks if someone takes tylenol or ibuprofen _it would be quite easy to fool the system. Thank you. I hope to hear something soon.
Orange	General	I would hold of longer to reopen. Make sure it's 100% safe, if not no one will come out anyway. More testing needs to be done. I agree with John Morgan legalize cannabis, it's time and could you imagine the economic boost that would give let alone the taxes from it. Think about it. Sam
Palm Beach	Healthcare	lets get back to work please
Brevard	General	As numerous health experts are warning, re-opening too early may lead to a new increase in a number of cases. There are still hundreds of new cases and deaths every day, and allowing people to return to normal activities will likely thwart all progress achieved by social distancing rules, closing beach parking, closing non-essential businesses, etc. It's extremely important to think about the potential disastrous effects of re-opening too soon. The longer the virus is circulating, the longer people especially vulnerable to it have to self-isolate, and every 5th resident in Florida is over 65!
Manatee	General	I believe that we should be very careful about opening the state back up. In my opinion we should wait another month just to be sure that it is safe to resume our daily lives.
Duval	Accommodation	To date, there is not enough evidence to support how Covid-19 affects pregnant women. I am 6 months pregnant, and am currently able to work from home. My concern is that if pregnant women are not specifically labeled under vulnerable people (which we are due to decreased immune systems and inability to take medications) that employers (especially my boss) will make us return to the field once stay at home orders are lifted. There needs to be specific guidelines to protect pregnant women and their unborn children until this passes because many workplaces don't see them as vulnerable individuals. Also, for the ones that are not able to complete their work from home once guidelines are in place, some financial assistance to those individuals would be beneficial so they can prepare and buy necessities for the arrival of new human life. Pregnant women must be protected as so many have passed because of this illness, and these women are bringing new life and hope back into America during this time!
Marion	General	Reopen the ocala national forest to Recreation and camping again

AMERICAN OVERSIGHT

Volusia	Recreation	Please open beach access ramps! We would love to get the fresh air too but we live in DeBary, and need parking access.
Palm Beach	General	Please do not open the state until New cases are zero U will Get a swarm of new positives if u open to soon Once u let up alittle people will become leas cautious ans be careless If u open beaches open just for walkig and swimming Golf no flags and one to a cart
Sarasota	Finance	I have been wondering why there are now over 22,000,000 unfilled jobs in the United States. The individuals who filled these jobs in the past did not die from #COVID-19. Most of us know that some very extreme measures were recommended by the CDC, Dr Fauci, Dr Birx and put into place by state and local governments. These measures have severely injured the livelihood of US workers, families and small businesses. Why did 'we' do this to ourselves? Why did with we let scientists with models in hand convince us that the #COVID virus was expected to kill 1,200,000 US citizens? The models were based on weak assumptions, guesses, and statistics based on negative selection (only very sick people were included) case counts which highly inflated the case fatality rate (CFR). But never mind. The projected death count has since been revised downward many times.... 250,000 expected deaths... 120,000 expected deaths... and now most recently 65,000 expected deaths. Wait a minute, in recent years, flu-related deaths have ranged from about 12,000 to (in the worst year, which was 2018) 80,000, according to the CDC. But the entire economy does not get shutdown during the flu season! Why did we let this happen? Science should only INFORM policy, not DICTATE policy. Did the media hype get the best of us? Panic Porn? #Scamdemic? The "cure" has been much worse than the #Coronavirus! We need to #ReOpenAmericaNow. We need to do it As Soon As Safe As Possible ASASAP!
Pinellas	General	I'm all for opening back up, BUT the stipulation should include that those that can work from home SHOULD continue to work from home. Putting office workers together in small 5 ft. cubicles, using the same elevator and such just doesn't need to happen if people can continue to work from home. If this is not a stipulation, employers will require people to come back into the offices. It is NOT needed and will put people in close contact together and will not help the economy any more than if they stayed at home. As someone with a pre-existing condition, this scares me to death to have to chose between working and possibly getting very, very sick.
Brevard	Retail	Please allow stores to open and limit the numbers inside stores. There are things I need and I rather support local businesses then buying online! I need my hair done too!

AMERICAN OVERSIGHT

Duval	Healthcare	Allowing father of expecting mothers back into a doctors office is needed. Beaches are open. I see fast food joints open. Allowing one person to be at an ultrasound should be allowed now. Being a first time mother at the age of 24 and just having moved to Florida with no family, this is already beyond stressful. Even more of a disappointment that we are unable to record/picture anything that happens in our appointments. Regardless, of other states being able to record. Let's start small in reopening Florida. It's the little things for a lot of people.
Volusia	General	I am in the age (+ 65) and ore-existing condition (COPD) so I have observed the stay-at-home guidelines. I like continuing distancing and masks in grocery stores. Any added retail outlets should follow these guidelines. Restaurant s and bars should have guidelines for seating and occupancy limits . Those entering and working in hair salons, gyms, fitness centers, theatres should wear masks. Servers and practcioners should also wear gloves. More testing should be available to general public. If positive, should contact county health department for more guidance. Social distancing should be practiced outside in open areas (parks, beach hiking trails, etc. All Floridians should be encouraged to maintain low paroles and limit their imprints as well as those of children and other HH members.
Pinellas	Government	1) Fix and fund Florida's unemployed First! 2) Testing, testing and testing. 2) Follow Federal guide lines for reopening.
Hillsborough	General	Florida should not reopen until credible scientists and the CDC say it's safe to do so. We have reduced the risk of overrunning our hospitals by social distancing, but if we stop now, we lose all the progress we have made. I love Florida and understand our economy is heavy tourism, and as much as I have "cabin fever" from being home all day everyday; it's still the safest bet to making sure I don't get coronavirus or spread it to someone who is higher risk, like my parents or neighbors. The economy will take time to rebuild - no question. But Florida is not ready to go down to the road of reopening. We're still not testing enough. Tests are still not accessible to all of those who want them. And in reality, without a vaccine, every person needs to be tested so that we can determine if it even makes sense to have the conversation about reopening Florida. Please don't only look at the immediate dollars at risk here. Please look at the health and well-being of all Floridians and understand that the economic impact of Coronavirus will be far worse if the amount of cases and deaths increase because we reopened too quickly. My vote is we shouldn't reopen yet. I'll admit my trust is pretty slim when it comes to the Republican Party and their overall lack of seriousness in handling this public health crisis, but I hope something happens and I hope they think about their kids, their friends and family members, and do what's best for all of us. Thank you.

AMERICAN OVERSIGHT

Orange	Recreation	Please open the state parks to Florida campers only. Many Floridians are avid campers but we rent able to use our state parks because of out of state snow birds. Campsites are far apart from each other providing for social distancing. We can enjoy our state and stay safe.
Duval	Administrative	Follow the simple processes of proper hygiene, social distancing, cover your cough and everything else you were taught as I child growing up and open everything up. Get back to business as usual. This is no worse than the other viruses we have year after year, and the deaths are no greater and far less than heart disease, cancer, diabetes and more. This craziness has to stop and the government needs stop putting more debt on the books and hurting the hardworking small and large businesses and business owners. Open it up and let's focus on growing our economy and not tearing it down.
Broward	General	Government should not be forcing small business, restaurants, bars and malls to close. Citizens know the risks and how to take precautions if they choose to go into public places at this point. It's common sense. Why is the government acting like a communist militia and taking control of businesses and Florida's citizens? More people die in auto accidents then from Covid-19 in the USA but I don't see Florida banning Automobile sales, etc! ALSO...Florida is allowing Target to sell non-essential items! I've been to 3 Targets and Walmarts and they are allowed to sell everything! Why are you shutting small businesses and illegally giving business to the conglomerates that are not suffering at all and are profiting from this lockdown? Even Detroit forced Target to rope off non-essential sections!

AMERICAN OVERSIGHT

Palm Beach	General	Open the Public Beaches Petition (& Natural areas to physically distanced use): http://chng.it/Z6xQXD2QSS Unlawful Private Property Infringement. No Executive order specifies closure of privately owned beach property. Private Beach Closures have been in effect for over 35 days in Palm Beach County, Property Owners (are due compensation, and forever protection from these current unlawful actions...ever happening again) Ch. 2019-155 LAWS OF FLORIDA Ch. 2019-155 http://laws.flrules.org/2019/155 PROPERTY OWNER BILL OF RIGHTS This Bill of Rights does not represent all of your rights under Florida law regarding your property and should not be viewed as a comprehensive guide to property rights. This document does not create a civil cause of action and neither expands nor limits any rights or remedies provided under any other law. This document does not replace the need to seek legal advice in matters relating to property law. Laws relating to your rights are found in the State Constitution, Florida Statutes, local ordinances, and court decisions. Your rights and protections include: 1. The right to acquire, possess, and protect your property. 2. The right to use and enjoy your property. 3. The right to exclude others from your property. 4. The right to dispose of your property. 5. The right to due process. 6. The right to just compensation for property taken for a public purpose. 7. The right to relief, or payment of compensation, when a new law, rule, regulation, or ordinance of the state or a political entity unfairly affects your property. Section 4. This act shall take effect July 1, 2019. Title XVII MILITARY AFFAIRS AND RELATED MATTERS Chapter 252 EMERGENCY MANAGEMENT SECTION 36 Emergency management powers of the Governor.
Lee	General	I believe that you, the Governor, took too long to close Florida. If it wasn't for the fact that the Canadians got called back earlier you would have triple the cases here in Florida. Do not open Florida pre-maturely like Georgia did. How can Georgia's hair stylists and tattoo parlor employees do their job and remain 6 ft way?
Gulf	Food	Dear Governor Desantis - A the owner of an independent restaurant I look forward to re-opening Florida in a responsible fashion as soon as possible. In Gulf County we have had only one confirmed case of Covid-19 and that person has already fully recovered. Currently doing take out only we are only able to employ 3 of our 32 employees. If we can open our dining room to 50% capacity we can bring back the majority of our employees on a part time basis while still maintain social distancing practices in our seating. We will continue to offer takeout for those who are not comfortable in public settings. Thank you for your consideration.
Seminole	General	It is too early to open Fl or lift the stay home orders. We don't need a second wave. Need to listen to all the Drs and cdc

AMERICAN OVERSIGHT

Palm Beach	General	I am a teacher and believe all public schools should remain closed for the remainder of the school year. I do believe that we should reopen our state very slowly when the curve flattens for at least two weeks. Being from Palm Beach County, where the number of corona virus patients are large, this is important for us. I believe the first things you should open are parks, and beaches, any outdoor activity areas. People should be allowed to be outside and exercise as long as they practice social distancing. If they do not, there should be police or some kind of enforcement to make them leave. Slowly we should bring back our economy with new social distancing requirements. And if people are not practicing these restrictions, they should have to leave, pay a fine etc...
Orange	Transportation	Open back up! People need to go to work.
Palm Beach	General	Please open up beaches and boat ramps . Not only to comercial fisherman but to everyone . Vitamin D is essential ! Since I'm not getting financial aide of any kind , unemployment , stimulus check and especially an SBA loan since it all went to large companies . I should be able to at least do these simple things . We should not be a police state ! It has been well over a month ! I was okay with two weeks but seriously it has gone on way to long . This is just another type of flu .
St. Johns	Retail	Is there a preliminary plan that outlines what might be open on 5/1/2020?
Manatee	General	By now everyone is very aware of the seriousness of the disease. Trust Floridians to make good decisions, and allow people to go back to work. Restaurants, Gyms, etc. will provide safe environments or people won't go.
Palm Beach	General	The tolls in deaths and positive cases are INCREASING why the FUCK are you going to open when it's not declining? There are old people down here and I for one think this has to be the stupidest thing you are doing? Governor DeSantis will not be RE-Elected if this reopening happens and more people will drop dead like flies
Manatee	General	Fix the Unemployment debacle ! You have families getting there power turned off and people getting evicted from there homes.
Monroe	Food	Let the restaurants open and follow guidelines. You can't say we don't trust the people as the reason to not let them open. If you don't let them open there will not be any left because the PPP is not working for small businesses. Everyone I talked to in the Keys around Marathon applies and no one has any money
Marion	General	To whom it may concern I think its to early to open fla we need another 30 days and more enforced stay At home orders no one in my area is staying home it needa to be better enforced And another 30 days or it will be a reapeat and start all over again and this time worsworse
Brevard	Healthcare	I really need to have elective surgery to start. Bern in pain. Surgery was suppose to take place in March until the virus hit. I cant sleep with the pain.

AMERICAN OVERSIGHT

Hillsborough	General	Where I live, it really doesn't matter if you reopen or not because social distancing is not a thing here. I go to Walmart and it's shoulder to shoulder , people not wearing protective masks and not be considerate of others. Walmart isn't doing anything about the amount of people in the store at a time. I have health problems so I limit my time out and try to do what I need to. I think stronger enforcement should be in place to knock the number down.
Osceola	Tourism	Don't think we should open if we have to wear a mask to go to the amusement parks, stores restaurant.Small (young) children would get scared if they saw hundreds or thousands of people wearing masks at a place that is suppose to be fun, or to shop or even to eat at restaurant. If it's not safe enough to go out without a mask on we should not open. Disney shouldn't open until everywhere has leveled off because you cant control who comes from where to go into Disney. Could open up Disney Springs on a limited basis, and resorts with a limited capacity, as we faze into opening theme parks eventually.
St. Lucie	Food	As a business owner . I want nothing to be open sooner then later. But on the other hand I don't as there is not enough testing going on. In slc there is very little testing. After talking with a er physician the other night he to said there needs to be more testing for both if you had covid-19 in the past or if you are actually simtamatic. People just don't have enough common sense to respect peoples personal space. My feeling is we will see a big upswing in cases and deaths if we just reopen.
Sarasota	General	I truly believe you need to follow the guidelines and not lift the restrictions until Florida's numbers truly plateau and go down. We continue to increase. Why would you open businesses and employees and clients to this risk this early. I say hold off for 2 more weeks and see if the isolation can continue to help reduce the deaths. No amount of business is worth dying for.
Lee	General	Reopen all of FL with recommendations for those at most risk to protect themselves.
Martin	Healthcare	Please do not issue a reopening at this time. There are still many unknowns about this virus and many people that are asymptomatic carriers. The population of Florida is too vulnerable and reopening could cause additional deaths and hospitalizations. If we reopened and had to shut down again, that would seem to pose more of a financial risk to the economy.
Sarasota	General	Open Sarasota County up. We are destroying small businesses with the fear mongering. Small businesses are the back bone of this county and our country.
Collier	Recreation	I would like to see the florida keys open back up to Florida residents only for now. I believe they should not be open to tourists until a later date, it should reopen for Florida soon.
Lee	Education	I think it would be a wise idea to re-open FL with some restrictions obviously, but begin the process of re-opening things that are currently shut off. Since it will be a slow process to turn everyday life back to what it once was, it is a great plan to begin that process now with the lifting of the stay-at-home order as long as residents practice certain social distancing actions if they wish.

AMERICAN OVERSIGHT

Sumter	General	Mandate face coverings in all public spaces where groups gather, including indoor and outdoor spaces. Continue to target vulnerable populations where data shows impact for fatality rates are highest. Testing among vulnerable populations is critical; with Florida seniors making up 25% of the population and those with underlying conditions even higher, that means testing including health workers and first responders likely means 3-4 million PER WEEK. How will that be achieved? We need to reopen but with implementation of some existing mitigation strategies for individuals. Businesses should be responsible for controlling customer flow at safe levels with masks required for workers dealing with groups of people. Florida has benefitted from common-sense approaches and targeting vulnerable citizens and there's no reason it can't continue with the smart reopening of businesses, but business owners and individuals remain the ultimate decision makers for their own safety.
Lake	General	I feel that hair and nail salons, as well as barber shops, and small family restaurants should reopen. Thank you for keeping our safety as a number one priority.
Palm Beach	Professional Services	Thank you for taking the time to read this. As a hairdresser who is successful and wanting nothing more than getting back "behind the chair". With that being said...I can not perform my services properly or safely with a 6 feet distance even if I'm wearing a mask. I know many see us as essential, however, no training that we received in school or online for our industry says, open, you and yours will be fine. People are selfish and even if we follow protocol, take temps, etc does not mean people won't take Tylenol, Advil to regulate their temp. Or any medicine to mask their symptoms. I'm begging you, please don't reopen mail, hair, massage, spas or anything of that nature until the 2nd or 3rd phase. We can't even get much of the PPE as it is not available at this time. Dentist and drs offices are closed, why would you open salons before them?
Palm Beach	General	Please start with opening our beaches for exercise and swimming. I believe that what North Florida and soon Indian river County are doing makes sense. The public needs sunshine and vitamin D to stay healthy and active. Social distancing can be enforced. I also believe that golf courses can enforce social distancing easily. One player per cart is easily managed.
Orange	Education	I'm currently a rising junior at FSU and would love to be able to return to campus for the fall semester. I'm a member of the marching chiefs and an honors student for the college of business. If classes were to be cancelled there would be no college football (at least in the fall) and likely many students would either take a gap year or graduating high school seniors wouldn't attend school in the fall if all classes were online. We are among the lowest risk demographics being aged 18-22. I would like for the decision to be made as late as possible and when as much information is gathered and not made in the month of May with over 3 months before the fall semester is supposed to even start. I would love to be contacted for more specific input on the gall college semester and other ideas I have regarding alternatives to strictly online classes for and entire semester of school.

AMERICAN OVERSIGHT

Broward	General	When planning on re-opening gyms, please keep in mind that many gyms offer Silver Sneakers classes for the 65+ age group. Extra pre-caution must be taken for this age group. Prior to the shutdown, I attended these classes 4 times a week. I was in a room with approx. 10-15 ladies. We use chairs, inflated balls, weights and rubber exercise bands that the previous class also used. Classes were at 10am, 11am and noon. So this equipment was not cleaned and sanitized before each class.
Volusia	Professional Services	I'm a barber and owner of a barbershop in Orange City. My business does not fall under the essential umbrella. Personally, we have been hit hard financially. We are in the process of building a home so deferring bills is NOT an option. I closed my shop before the state shut down for the safety of the community and my family. However, it is impossible to adhere to the cdc guidelines of the 6ft apart. I need my business open. We applied for loans. NOTHING! We applied for the SBA grant NOTHING! To date my family has not received the stimulus check! There can be safeguards put into place such as temperature checks, barbers wear face masks, questionnaire, one client per barber at a time with sanitizing (bleach/Lysol) between clients. I'm begging you have this industry return to work ASAP!
Palm Beach	Healthcare	It is too soon to open....if we open to early all of the lives lost and effort put in will be a waste. Why not wait a few more weeks, we will be in a better position to reopen in stages, otherwise our efforts have been futile. We have to be smart. Our elected officials need to show a leadership role, not reactive to deep pockets. It is important we take the high rode to do what is necessary to avoid a 2nd wave. I'm not fan of Scott, however I am a fan of his emergency protocols and that public health always seemed a priority.
Sarasota	Information	We have to make sure that there is adequate testing along with everyone to adhere the 6ft social distancing. If people do not follow the restrictions to the letter the spread of the virus will overwhelm the state and country.
Brevard	Food	I work in the food industry and I am curious how we can safely take care of our customers and stay socially distanced without antibody testing. If we are tested and have been found to have antibodies then perhaps we carry a card and then we won't need masks and gloves, but just good hygiene.
St. Johns	General	The Cov19 scare is completely overblown. OPEN FLORIDA 100%, IMMEDIATELY. Please. Thank you.
Hillsborough	Recreation	Please reopen the state. There are non essential small business owners with zero income because there wasn't enough to go around. Kids are missing out on their sports. They are missing out on tournaments, collage camps, showcases etc. Please let these kids get back to doing what they love

AMERICAN OVERSIGHT

Marion	Retail	I want to under stand how checking the temps of people entering the building is going to help. Asymptomatic people won't have symptoms including fever , but yet can be contagious. How is that protecting me. My 82 year old FIL lives with us and I worry bringing something home to him. We don't live in a large house where I can stay away from him. I work for a non essential retail coming that is currently closed but talking about reopening in about two weeks. Don't see a huge amount of testing going on in Ocala to feel safe.
Brevard	Education	Classes can be held on campus with temp checks before anyone enters building Max size capacity of 10 students per room. This allows students to work on labs and computers. No gathering of faculty or staff In public areas Schools are 75% online and 25% on campus so students rotate days and times on campus Suppliers of PPE are a year out on orders to non-health sector, so people need to make their own masks, but masks should be required. Continued ban on standardized tests
Duval	Healthcare	As much as will love for Florida to open back because I'm not making as much money as was before. I just don't think it's fair unemployment is making more than us that are working. Store I.e Walmart are price gauging and supplies are out! But at the end of the day can we make sure that we are completely safe. If we can't have assistance because at end of the day bills aren't stopping. I can't work full-time and I'm having to work in a position that I didn't get hired for.
Manatee	Information	Please increase testing before and during reopening of Florida. PLEASE SOLICIT AND HEED THE ADVICE OF MEDICAL EXPERTS. Please truly assess what is essential and what is not (opening beaches is NOT). If rushed, opening could cause more lives to be lost. Please increase public awareness as reopening occurs. Please increase public information regarding testing. EVERYONE MUST BE TESTED. Thank you.
Sumter	Professional Services	Hair salons and nail salons are ESSENTIAL services. They are low risk, if no one waits in the waiting room, a mask is worn, & everything is disinfected between clients, I think that is VERY low risk.
Osceola	Healthcare	Reopening right now is a slap in the face to healthcare. We are working hard to treat and stay safe. People could not even wear a mask for a couple of weeks to try to stop the spread. As soon as one thing opens they will flock there. We need atleast another month. The governor. Needs to get their unemployment under control and they will stop begging to go back to work. Bars should be the LAST thing open. There is no way for bars to social distance as most are very small and limited staff. Do not open the bars til the last phase. People will not know how to act and will start a spread. They will run from one bar to the next.
Orange	General	Everything needs to be back open with a rule that everyone that goes out in public is to wear a mask or can't go in and and reminding them that they need to wash there hands it's common sense to stay home if sick
Lee	Healthcare	Please protect my family. I am diabetic and asthmatic. My children are asthmatic also.

AMERICAN OVERSIGHT

Sarasota	Recreation	Opening state and county parks now will make people realize how important they are and appreciative users will support future state efforts to expand or enhance natural areas. I also think tennis courts have been unfairly targeted for closing as users are no less careful and social distanced than golfers. Mental health needs to be taken into consideration at this point in the quarantine episode.
Palm Beach	Finance	I'm 70 years old. I came to live with my daughters family, kids were in College. There are 6 of us. The food bill is extreme feeding six people three meals a day. We are fortunate to have pay checks coming in. My son in law has a small business. He has been working but is afraid If we do not open up soon we won't have money coming in. People are hungry and losing business. The nail techs always wore Mack and gloves. Home Depot, Walmart, Publix is crowed all the time. You touch everything in the store. Your money your purse you keys your sunglasses . We need recreation, some retail. People with mental issues are feeling trapped. . The beaches, boat ramps, we need are rights back. The nursing homes , that I looked at fir my mom at one time were very poorly run. No wonder it goes through the elderly they have no immune d system left. Open Florida. The virus will be here like the flu. We have to deal with it. We have to have our lives back before people loose everything. God Z less America. Trump 2020
Manatee	General	Just follow the guidelines already set in place by CDC. We must get our testing up to the recommended standard along with 14 days of declining numbers. Golf course and beaches should not be open, it just invites travel and commingling and is counter to a stay in place.
Hillsborough	General	Please listen to your medical and scientific experts when making decisions that will impact people's lives, literally. If Floridians just hunker down (we could easily if the unemployment debacle was solved..and get this thing under control. Clamp down now and the sooner we'll be back in business. We start loosening restrictions and the virus wil re-emerge. I'd like to be able to get back to my students and classroom in the Fall, but the logistics of doing that are a matrix of things that have to be very carefully considered. Listen to the health experts and your businesses will fare better. We don't want this prolonged any longer than is necessary. But people's lives are a stake. That should take priority.
Palm Beach	General	My take on this is to follow the phases that were given. There are a lot of businesses open here except for the service and travel/entertainment industry. We just need to be smart and safe while we reopen. There are a lot of people here that don't follow the rules and that is what concerns me. Right now if the hospitals are not full, then elective surgery should resume. As long as the dick patients are not anywhere near where these surgeries take place. Just my opinion.
Monroe	Professional Services	The marina we stay at has not received a dime of the money they were approved for. That has to be fixed.

AMERICAN OVERSIGHT

Volusia	General	I don't believe Florida is ready to be open. The numbers keep rising and it's not safe to go back to the life we once knew. We need to have a vaccine to protect us and I think it needs to be free as a lot of Floridians don't have insurance. I understand our economy is hurting but we will be a lot worse off if we open up and more and more Floridians get sick and possibly die. I think that our residents need more financial and food help until it's safe to open back up. A lot of residents are barely getting hours if they are getting any at all and are having a hard time getting unemployment to help for the lack of income that they once had. A lot of residents have children as well and the extra help for the months of March and April with the snap program has been wonderful but I believe it should be extended until the economy is back and people can afford to feed their families again.
Marion	Healthcare	As a cosmetologist who works in The Villages I am quite worried about salons opening too soon. It's not just about the guests who may or may not be honest, it's also about my personal safety and those I come home to. Please open the state slowly and give the predominantly retirement areas more time. Thank you.
Orange	Recreation	Open metered parking up for brevard county.or titusville playlinda since there is enough room to distance State parks to be outside for mental breaks Orange county has no where to go to hike, walk in nature.
Palm Beach	Recreation	Honorable Gov Ron De Santes, first and foremost , Thank you for being our governer for such a time as this, and for your concern re:florida and your task force. i truly hope people can keep practicung hygienic measure's in every place. in my opinion i think the beaches in palm bch county should open as the parks, with a law to stay 6-7 feet away from people, other then your family n children. people need to get out, and beaches as parks is very important in Florida.. its a way where people can relax from this pandemic and get fresh air. but there has to be regulations regarding groups! well thats my opinion, dont know if we will get back to normal life, but in all God should be your first divine help, and put all your plans in his hands first for wisdom and hope. God bless you , your family n all who are a part of your task force. God bless America. thank you.
Seminole	General	There are still too many cases daily to even think about opening back up . I would wait several weeks more before even thinking about reopening.
Orange	Recreation	This should be a very gradual opening throughout June. Anything that opens must have distancing plan in place. Mask should be mandatory if you are within 6' of anyone. Business should have special consideration of senior employees or those with certain conditions and give them off through June with pay. Testing for everyone to continue.
Manatee	General	Please fix the unemployment system- that will get much needed cash into people's hands. They will spend it to reopen Florida!! Our unemployment website is a national laughingstock.
Sarasota	General	why put some many lives at risk reopening so soon?people will survive.Businesses will survive.if not then they probably wouldn't anyway.Many people will die because of this thoughtless and greedy decision

AMERICAN OVERSIGHT

Volusia	Management	Regarding opening the beaches during the virus. I am one that walks the beach on a regular basis and miss it terribly. That's why I moved here. However, during this very scary virus situation, I have to swing towards keeping the beach closed for several obvious reasons. First of all, it draws extra people into our community like a magnet - tourist that have no regard for the situation or rules (especially the younger generation). Bike week and Spring Breakers should have taught us something. As for the businesses - it us a tough call - but we can not survive without stores. We need to open them but with guide lines. I love my community and pray it makes it through this HORRIBLE experience
Orange	Healthcare	Please consider what you're doing before opening the state. We are not ready. You opened some beaches and then we saw a spike of numbers. We need more time. We will see a second wave and it's going to be harder to lock down the second time. Please consider our children, our elderly and our sick.
Duval	Finance	We need to open back up very carefully so that we don't cause a rise in coronavirus cases and end up shut back down. Businesses that are currently working remotely should continue to do so. Businesses that are currently closed but can open with strict social distancing should be allowed to after a 2 week period of declining cases. This should continue for a minimum of 2-4 weeks so that enough data can be gathered to determine if the number of coronavirus cases is increasing. If the data supports that the numbers are still declining, then more businesses should be allowed to open up. The last phase of opening should be businesses that are currently working remotely being allowed to return to an office. The option to stay working remotely should be mandatory for employees who feel it is too soon to risk their health. This allows people to make the choice to work remotely without becoming unemployed if they have an underlying health issue or children at home.
Manatee	General	Before a company can reopen all employees and owners should be tested and be confirmed negative. At least you would know you were starting clean. I would also want to know what their plan is for hygienic procedures.
Sumter	General	I would like to see businesses open that can open safely. With WalMart and Home Depot open there is no reason why other retail cannot open. Social distancing and masks would be safe for salons to open. The private sector needs to open. People need their paychecks.
Broward	General	I'm looking forward to more community access and resuming more business functions, however, I would like a plan that makes scientific sense to rollout to my employees. Florida employers need to relay safety measures confidently to employees and customers in order for consumer confidence to return. Please help us to do that before making any pronouncements. Testing for the virus, antibody testing and trace testing need to have a plan that's communicated to the public. Florida's government can make this happen. Put the plan together and share it with us all so we can open up. We all want to do the right thing for our families, business and our communities.

AMERICAN OVERSIGHT

Osceola	General	The government continues to state that it relies on data for decisions during this time. The data appears to be incredibly flawed. California reports their first deaths occured in early February. Florida reports our peak occurred on 23MAR. New York reports that their serological research demonstrates nearly 22% of the population has already had Covid-19. The data clearly demonstrates that the stay-at-home orders were late, at best. The lag time in decision making based on bad data has decimated the economy and destroyed countless lives. The opening of the economy needs to be based on good data rather than flawed data rooted in assumptions. In other words, open the economy full force. Isolate the high risk individuals.
Osceola	General	I think it is way to soon to open back up the state. I have watched the numbers rise in cases and deaths every day. Opening any venues that have large amounts of people will cause a quick spread of the virus. I understand the economy needs to start up although if all the workers get sick who will run these places? I honestly think we need lockdown until mid to late July.
Palm Beach	Recreation	Please open ALL Florida beaches for exercise!! We understand the restrictions of social distancing, please allow us our beaches to exercise...surf, swim, walk!!
Collier	General	Need to reopen now. Use social distancing. Older people and those with health issues should stay home. Too many people lost income. Small businesses hurting. If Walmart and target can be open then all retail should be able to open.
Lake	Retail	We need to get our state opened back up. There are businesses hurting here in our neighborhoods across the state. I believe that in one of the task force discussions it was mentioned that 1000+ local bars, and restaurants could go out of business. This has the ability to cause more deaths than the virus. More people Will be committing suicide due to money troubles. Just because we open the state up, doesn't mean you have to go out if you don't want to. But, at least give the businesses a chance to stay in business and provide for their families.
Sarasota	General	Although I would like to see people get back to work and be able to do a few things, I think opening in May is not a good idea. It is to soon. I believe the state will relapse and be right back where we are now. Wait at least until June.
Orange	General	Please reopen the state. Limit restrictions. Groups of 10 or more business at 50%. Please open bars and restaurants. Maybe standing only no seating. Open parks beaches and all other open spaces. Make it mandatory for masks. Promote small businesses. Open more testing sites. Make those on unemployment do volunteer work per week to stay on unemployment.
Pinellas	Accommodation	It is too early to open Florida businesses. According to experts, we need to get ahead of covid by the extensive use of testing and by contact tracing. Somehow this pandemic became political, but people of all political parties are equally at risk. If businesses open, I for one, will not patronize them. I will continue to buy food and other necessities as I have been doing for the past 6 weeks. I want my local businesses to thrive, but not at the cost of human lives. I am confident that you agree with me and that you are committed to saving lives.
Sarasota	Healthcare	Opening Florida early is a sure fire way to reduce the population, and cause hardships on the entire state.

AMERICAN OVERSIGHT

Seminole	Food	Please do not re-open dining rooms in restaurants. I work for a small franchise of a larger national restaurant chain and we do not have the access to Proper PPE to be able to come into any contact with guests inside the buildings I work at. I would feel comfortable with the continued guidelines for restaurants if we also continue to work to provide access to purchase of masks, goggles, etc. I am not looking for a handout from the state. I just want to be able to have access to purchase and I don't and I feel unsafe at work every day.
Lake	Government	Good Morning, I think it should have a better way to edit our claim. I'm filled up my claim thru DEO and got no error message. Some days later I went to check the status and I noticed a "submit" button that was not there before. When I tried to submit, I got a message that my Alternate Phone Number has the wrong format. I forgot to add a space after the parenthesis. I think on this case, the website shouldn't have to allow me to go to the next page but now, there is no way to edit the number and I can't submit the claim. I tried to call DEO number for the last two weeks but nobody answers and there is no "call back" option. I called CONNECT and they told me that it takes 3 to 4 weeks to process my claim and until there they can't do anything, I can't submit a new one because I have one opened and I don't have a PIN to filled thru CONNECT website. They can just give me one, after my claim is processed. I don't know what to do right now. Hope that in 3-4 weeks, they can process my claim and I can fix the phone number to finally submit.
Lee	Healthcare	I do feel that the damage being done by shut down has more impact on the mental side than any other. I understand protecting the venerable and moving a slow pace but, the uncertainty is more devastating, by far, than the risk posed by the virus.
Duval	Food	It is time to re open now. People in the restaurant business are literally starving and our leaders do nof care. Leaders lead by acting . Everything has risks but doing nothing is even riskier. Tearing the public like 3 year olds by not giving a timeline is disgraceful. We are tired of government leaders(with guaranteed jobs), millionaires and billionaires telling us what we can and can't do. This is the United States of America. Let us go to work before it is too late!
Broward	General	Diane is 78 and John is 83. We live in a Life Care Retirement Community. We feel that Florida should not reopen until every person is Florida is tested so we know who has COVID-19 and who doesn't.
Orange	General	At the very least, we should open up all businesses that put in procedures to maintain six feet social distancing. There is absolutely NO reason that we can go into a Lowe's with these restrictions but not be allowed to go into a furniture store or small business that could easily put in the same restrictions and have far less customers in the building. This should be done immediately! Next, have restaurants have these same social distancing requirements with their seating, tables six feet apart so each family unit is separated from other units. Save our economy before it's too late!!!

AMERICAN OVERSIGHT

Brevard	Information	Please publish daily the status of Florida with respect to the President's Virus Task Force Guidelines for reopening. For example: what day are we positioned on the 14 day schedule to decrease infection, etc Also consider posting the same info in a regional way.
Pinellas	General	Science, data and FACTUAL INFORMATION need to drive when beaches, businesses, etc... reopen. Frankly, you could open everything up tomorrow and I would still shelter in place. Until reliable testing for both active COVID Disease and antibodies from exposure are readily available, it would be irresponsible and life threatening to divert from the stay at home course we are already on. Masks in public buildings...grocery stores, retail establishments, etc should be mandatory. In fresh air situations such as hiking, walking, etc...they should be optional.
Orange	General	I am concerned that cleaning supplies are not readily available. How are we supposed to clean thoroughly if we cannot find disinfectants as consumers, that is a huge risk. I do not and will not put my health and safety in the hands of someone who may not practice appropriate cleaning routines.
Polk	General	I am not convinced that the MAJORITY of the population is at great risk for a SEVERE case of the corona virus. I believe this virus is very similar to the various strains of the common flu which can be fatal to elderly persons of those with underlying medical conditions. Please open up the state and treat this as you would the flu. Establish safeguards regarding visitors at nursing homes and medical facilities but for the sake of the economy and Florida businesses both big and small, PLEASE REOPEN THE STATE. As for myself at 72 years of age and in good health, I have no fear of this virus.
Lake	General	Start with counties with the least cases / lowest infection rate. Let them open to th degree they feel comfortable. Leave counties like Dade to the end as their numbers are still high. By keeping everyone at home, yes we are being safe, but we are also lowering our immune system. Sometimes to fight a virus we have to be in the elements.
Palm Beach	Education	Please please let our seniors have a "normal" graduation ceremony!! They have had so much taken away from them that have looked forward to for so many years, even my daughters band (Dreyfoos) to NYC to perform at Carnegie Hall -gone ☹. The graduation can be outside, with only immediate family attending and everyone wears a masks. Space the graduates apart 6 feet! This is affecting these kids socially and most importantly mentally. There will be no hugs or shaking of hands-just give them a "walking across a stage" ceremony!! They deserve it.
Clay	General	I dont think we should open until at least mid June and I think it should be done in phases.
Osceola	Tourism	EITHER LET US WORK OR PAY US!!! I WAS a bartender at a resort in Central Florida. My last day of work was March 18th. I applief for unemployment on March 23rd and am STILL PENDING. I have 3 kids. My bills haven't stopped. DON'T LET MY FAMILY LOSE EVERYTHING I'VE WORKED SO HARD TO GIVE THEM! I NEED TO WORK!

AMERICAN OVERSIGHT

Marion	General	DO NOT open to soon. We have been on shut down ALMOST long enough. However it is not long enough to reopen and be safe. If we wait a little longer our chances of beating this are so much better. If we open to soon our close down will all be for NOTHING. It will have been a waste of time and opening too early will be a waste of lives lost. Let's us all be a little more patient so we don't waste the good we have done.
Duval	Food	Let stay at home expire on April 30;open retail shops then the hair and nail salons then restraunts giving each phase 2wks lastly churches
Hillsborough	General	The state should NOT reopen at all until proper testing for Coronavirus is available. WHY haven't we focused on this??? We are going to end up dealing with his for a long, long time if our so-called "leaders" do not start showing true leadership. Stop listening to "Dr. Trump", idiot-in-chief. Be tough, be strong! Perhaps you all should read (or reread) Stephen King's The Stand as a reminder of what happens when a virus gets out of control, as it is now becoming in the US. We are nowhere near "reopening". There are too many ignorant and stupid sheeples who are already not following rules. Keep the theme parks closed! Stop playing politics with human lives!
Palm Beach	Finance	. My idea is to open the economy fully for 40 year olds and younger. The fatality rate for this group is extremely small.They would create herd immunity without overwhelming the healthcare system and start to bring the economy back. After perhaps 6 weeks open it to 40-50 year olds. During this time you continue to keep the most vulnerable group(50+) sequestered and hopefully by that time a therapeutic or vaccine will be available. If you think this has merit please pass it to whomever. Thanks, Lee
Sarasota	Education	The governors task is to get every Floridian and others tested ASAP. Start with state assistance program unemployment, food stamps, hospital assistance ect. Quit pandering to your special interest big money and attack the problem forth right rid the state covid19 ASAP.
Broward	Recreation	Please consider opening up Condo Association pools for exercise. Many of us have joint and muscle issues that benefit from the water therapy.
Palm Beach	Recreation	My suggestion is to re open the beaches with social distancing guidelines. No more then 5 ppl together, 6 ft distance between you and the next group of ppl . this will at least give us something to do on the weekends
Clay	Recreation	Please allow kids to go back to their recreation sports, they need to get out and play and get excuses sitting at home all day is not good for them.
Osceola	Tourism	I believe that we need to wait a while before reopening the tourist areas to local, domestic and international travelers. You will have individuals coming from all different counties, states and countries not knowing how advanced their area is in testing for COVID-19. We could just be reintroducing the virus in our area this undoing what our social distancing has achieved. For example, our area just now has a testing site, so our county doesn't yet fully understand the impact that COVID-19 has had in our area; how many others are just like our county?
Clay	General	Keep Florida closed it's too early.

AMERICAN OVERSIGHT

Sarasota	General	Hello It seems to me that it would make sense for business to open on an appointment only schedule til things get going. Thank you
Lake	Tourism	I think we should open the economy in July because it gives us plenty of time to get ready and the cases should go down more. July would be ideal so we can implement the safety protocols such as temperature checks, screening guests before coming into the parks. (Disney and Universal) And maintaining 6 feet distance in stores and quick service food areas. Shanghai Disneyland is already doing these protocols already and they have some success with it. Orlando can't survive if Disney world and Universal studios and sea world remains closed. If we gradually reopen portions of the theme parks, according in phases, then we can still stop the spread by starting with Florida residents only then national then internationally. So i strongly feel that July would be an ideal target to reopen the theme parks slowly!
Orange	General	To the re-open task force , I believe it is time to start re-opening businesses in Central Florida. We can no longer hide from a virus in fear. This will be something we need to learn how to live our normal lives with adapting. Open Florida May 1st!! Fyi- I'm a nurse , and democrat. (This is not a political divide)
Palm Beach	General	We are a state of tourism the weather is getting warmer and people want to be on the beaches and just out enjoying our great state. But I am a born and raised west palm beach resident and as much as I want to be out enjoying our beautiful city it's to soon to reopen. It's to soon because if we reopen now its going to draw people from other states and put our state at greater risk and it could be disastrous for Florida. People want to vacation here people want to be in the Florida sun. We need to wait. I know businesses are struggling but it's better to struggle now and get it right the first time in lieu of doing this again and again. I know families are struggling I am one of them 1200 didn't go that far but if we dont do this right the first time it will only be worse later. Please Mr. Desantis dont rush this look at Georgia they are opening things up and their numbers are still going up and they are our neighbor and it will spiil back into Florida if we are not careful. Keep Florida safe show the country its not about money or business but lives and our future lives living in Florida.
Palm Beach	General	1st appt places, 2nd parks & large spaces, 3rd small and large controlled business, etc. by then you will have opened most of the commerce and the rest will have opened by themselves. Too many have shut down that should not have closed. Many may not open again. This is the short answer for a more specific answer please contact me at 561 385 9915 voice 561 963 2267 fax

AMERICAN OVERSIGHT

Duval	General	All Stores should require a Mask !! No Public Pool.!,,, No Condo or apartment pools... They can NOT be sanitary not the chairs be cleaned after people lying on them.. No club house functions. Association are thinking about their a OWN personal adgenda , not the others around. The pools are not a lap pool for exercise.. If you give them a inch they will take a mile... The parties will continue, as to some have not social distance period , but they can't have the pool party since they were locked up..now they want them unlocked for their gathering..Just give it till after Sept to see where the would is with this ..Just some kind of guide lines..
Duval	General	I don't think we should re open Florida on May 1st or any sooner because what happens if we all get reinfected. There was a Spanish flu in the 1900s and it came in three waves. China opened back up and they all got reinfected. Even though we might have hit peak we still need to make sure the numbers have gone down before reopening or it will turn out even worse than what it already is
Seminole	Healthcare	I work at a major Hospital system in Central Fl. employed over 15 yrs . And because the State closed down all elective procedures my employer is now losing business and is in the process of possibly laying off many in slow departments (including myself) I am dcared to death to be almost 50 yrs old and through no fault of ny own possibly without a job in the near future. Our hospital is not overwhelmed or at capacity, in fact we are doing less business now than before. People are afraid to come into hospitals because the narrative has been stay away for so long please open healthcare back up and help change the narrative around patienst being able to access healthcare again and save our jobs. No hospital employee should be laid off during this national pandemic.
Orange	General	It is Time to open back up! We can maintain our practices of social distancing, hygiene and make the necessary new normal adjustments. May 1 st should be the day to begin phasing in and opening up the State. Everyone has done a great job but we need to get small business and society back on track. Don't bow to fear or pressure, May 1st is the day to begin. Thank you
Sarasota	General	Good day, in my opinion...we need to take things slow, listen to the advise from the health experts! Stick with the phases, wait until this settles down a little. It hasn't slowed down a bit in Sarasota/Manatee Co. Since the announcement of the beaches opening on Monday, there are people from other states on social media asking questions. Like, do they have to quarantine if they fly, asking about rental properties, etc!!! It's just too soon. Unfortunately people can't follow the rules. I work in a hotel so I am ready to be back to work ASAP! We can't mess up and make it even worse. Mr. DeSantis I filed for unemployment March 23, I'm still pending. Let's fix this issue first!!!! Sincerely, Amber

AMERICAN OVERSIGHT

Orange	General	I am a 24 yr/old medical student. Please consider extending the stay at home orders for the safety of our citizens through May. I understand that businesses are struggling, but the impacts that this virus would have on human beings if restrictions were lifted would be fatal. The right thing to do is never easy and for the safety of our citizens the right thing to do is extend the stay at home orders. If restrictions are lifted in Florida (especially Orlando and Miami), then so many people will travel here from other states. They were doing that at the beginning of quarantine, so what makes you think they won't do it at the end. Please consider the safety of our people. Thank you.
Flagler	Real Estate	Please lift the ban on short term rentals. Allow restaurants to open. Please allow us to work and be self sufficient. Limit government intrusion in everyday activities.
Hillsborough	Professional Services	I work in a hair salon with six employees, I've been there five years and over that time there's never been more than 10 people total in our salon. The 6 of us all work part time but is the main source of our income. We haven't received any help for Independent contractors. We need to get back to work to be able to survive. I think that reopening very small businesses like ours could re-open with sanitation regulations in place. We can keep the 10 person minimum in our salon.
Polk	Food	Good morning I feel that we aren't to be safe or the number will go down if you reopen the State I work in Hospitality and the we are going to be exposed to a lot of tourist that can be contaminated , I feel is to soon , I care of my Family and my Coworkers Family as well Thank you 🙏 and God Bless you
Orange	General	There is nothing for entertainment industry we are just as important as any other and are depended on as much if not more. I think we should wait another 2-3 weeks before opening. I have a low immune system and I have been in isolating since my last job on march 6th. I haven't gotten Unemployment yet or my Stimulus check. I understand where people are coming from that they want to get back to work. I own my own company. I won't have work until the conventions start up again and that might not be until next year.. However do we want this to get worse. we can't afford that either.
Okaloosa	Recreation	We need to open up our economy. We cannot continue living in fear. If a person has pre existing medical conditions,then they should take precautions. Or if you are elderly and frail. But to remain shut down isn't doing anything but harming our economy. The number of people that have contacted this virus is not as many as predicted. And there has been to much "junk science" behind the current number of cases. We need to get out to our beaches and enjoy the sun. It has been recently discovered that the virus doesn't live long in hot humid weather! So let's get people out in the ☼ and get our immunity levels built up with absorbing vitamin D.

AMERICAN OVERSIGHT

Duval	General	Reopen ASAP, please. PLEASE. We see that this virus has proven to be much, much less harmful and dangerous than originally thought. It has an extremely high survival rate. So few are dying from it and there's only a fraction of people that are contracting it and that is WITHOUT a vaccine. Now we have a safe and effective way to treat it. Let the healthy go back to work and allow vulnerable people to self-quarantine if they choose. We cannot lose our livelihoods over an illness we now know is not nearly as dangerous as we thought it would be. People were happy to stay inside when it was projected to be killing hundreds of thousands of us. Now that we all see it isn't, we want out. It's not worth bankrupting your people.
Brevard	General	Please open as many businesses as possible, immediately. Those at risk do not need to visit businesses or go to the beach. They should self-isolate and take precautions. Our economy is dying very rapidly and something must be done now. Thank you.
Clay	General	Let Georgia be the test dummy and Keep Florida closed.
Duval	Accommodation	Any club or bar that is allowed to reopen should not be allowed to have more than 50 people. All seats should be spaced apart so customers aren't touching each other. They should also be regulated to have wipes constantly on hand to clean surfaces and chairs frequently throughout the duration of people being in the establishment.

AMERICAN OVERSIGHT

St. Lucie	Healthcare	I work in a urology office and most of our patient's are over 65. My hours are have been significantly cut.. but I am thankful to be able to work at all.. my sister who lives with me filed unemployment 5 weeks ago and has yet to hear anything.. anyways with me loosing hours it is a struggle worryingly if I will loose my rental home.. I realize no one could have seen this coming.. and I believe this illness was around much longer than anyone knows.. I was born and raised in this great state.. my concern is I work and live around the villages retirement community..we implemented telehealth which saved me.. without it I would have been jobless. The great doctors I work for agreed to take no paycheck so that they could keep some of the employees.. they are hero's in my book!! I truly believe the phases that the state of Florida came up with can work.. thier is no perfect answer.. but as you can imagine I have a true fear of a rush of office patients coming back in the office due to the behavior of a minimal amount of patients we do see in the office. But that being said we have implemented every safety measure possible.. the job force has to open up.. but with very strict rules at first until we see what this virus does.. I also realize testing takes time .. but anyone working with high risk patients should have access to testing symptoms or not.. I am 52 with high blood pressure and diabetes.. and many people show no symptoms.. we see 70 patients a day before telehealth that is a lot of possible exposure and my sister who lives with me is a severe asthmatic.. I have followed all the rules and have worked from home when possible.. I order my groceries from door dash and do not go to public places.. I have strictly followed the guidelines..and don't want to be exposed to this virus by people who don't.. I pray for normalcy whatever that is now .. but all lives matter.. and for us people that work in doctors offices we have close contact with the elderly and even with ppe we could possibly be exposed and spread to many of the villagers and our families.. we take temps constantly.. I take my own temp three times a day.. but ready to try this return to normalcy but rapid testing ability has to be available symptoms or not
Palm Beach	Healthcare	Reopen Florida Now!!!! Imagine if restaurants simply hand out hand wipes with napkins. It's crazy so many are comfortable still having food prepared for them, via takeout orders, so the risk is other diners and servers? Reduce capacity for a while. It's better than this! I'd feel comfortable if there is zero tolerance for symptomatic employees going to work. I would go to Disney. Today. I would go to a hotel if I knew the sheets are laundered with intense cleansers. All stores/restaurants/hotels/spas must have hand wash at all times for guests to wash their hands.
Duval	General	At this time, we are not ready to reopen the general population. I understand individuals would like to get back to normalcy but we are not ready at this time. We need to extend the stay at home stay until May 30th. The state of Florida must do their due diligence to efficiently and quickly process the unemployment applications and provide those with back pay. Opening up too soon will be a catastrophe which we aren't prepared. We can't cut off our nose to spite our face.

AMERICAN OVERSIGHT

Clay	Tourism	I watch the news conference on opening up the state of Florida and the tourism within the state. You asked that the Floridians take in-state vacations to be with the economy. How are the Floridian supposed to do this when they've been out of work for the most part at the greater percentage of the state for the last 4 to 8 weeks and I've had no income. So with no money coming into the household how do you expect them to have the income to take a vacation?Are they going to have magic funds up here to take a vacation when they have not had funds to pay their electric the water their mortgage their car payment and the credit card or even feed their families? But yet you want them to take a vacation. Where is the priority and the people of your state?
Brevard	Management	Florida needs to maintain the Stay Home policy at least thru May. Most people aren't comfortable leaving their homes yet because the numbers of infections/non-infections aren't accurate. We need to feel assured that everyone that needs tested are being tested and the results are accurate. Right now it's very concerning and we don't know what to believe. We have NO TRUST in how this is being handled. People are desperate for money, the problems with the Unemployment System being the cause. Fixing this should be main priority. If you open things up now people won't be out and about for fear of the virus and because they are flat broke.
Martin	General	Dear Honorable DeSantis and all involved, Please open all Florida businesses to those healthy enough to do social distancing for a short time and then access the situation and open to all at some logical point. Please change the data gathering for death certificates to only primary cause of deaths and not the Wuhan virus unless tested and proved.. no more suspected. We lost a friend to heart disease and COPD. The doctor was forced into putting suspected Wuhan against her better judgement. This is not right to have doctors lie to give hospitals more money. We know that Governor DeSantis has always gone for the truth and will do the right thing. Kindest regards, Kathy Wittmann
Clay	General	When and if our state reopens, everyone should be required to wear mask. My family and I love traveling in our state, Orlando alone we visit and stay at least 6 times a year. I feel that for us to feel safe and relaxed enough to start venturing out thats what is needed. We have been at home since March 14, to follow the guidelines of our government but we do see that there are people who still do not care enough for themselves to stay at home or even social distance. With at least with the mask we feel protected from those people.
Osceola	Accommodation	With short term rentals being closed for all of April and no aid planning to come our way.... as short term rental investors with 5 homes in Windsor hills we are struggling beyond to pay bills. Short term rentals allow social distancing and need to be opened May 1st to allow any bookings for us owners. We have now lost 52 bookings between March and June in VRBO in our 5 homes with accounts for over $153,000 to date and no loans coming our way please allow these private pool homes opened to allow guests to safely travel to florida and still support local businesses. Please please please.....

AMERICAN OVERSIGHT

Collier	Professional Services	First of all, thank you for launching this portal, which I think is a great idea. I believe that the likes of Baker Park, Cambier Park, etc in Naples, as well as the beaches, should be opened now, but with people still encouraged to maintain social distancing. Unless there is a real surge in further cases, businesses in Lee and Collier County should be allowed to re-open starting Friday May 1st, including restaurants, hairdressers, vet offices, dentists, and hospitals having the ability to perform other elective or precautionary procedures, including CT scans and MRI's, etc. The availability of widespread testing will help, but the consequences of maintaining the shelter in place order are now starting to outweigh the benefits. No solution is perfect, and I think, by and large, the State of Florida - and in particular SW Florida where I live - has managed a very difficult situation pretty well.
Lake	General	The first mistake was closing to slow, now the second one will be opening to quickly! We don't have our numbers declining and you want to send more people out to spread this virus. The state was never really closed. People were still able to go about their normal lives if they wanted to. I hope all of the county leaders have better sense than our governer who is more interested in money than in human lives, to keep the stay at home requirements going. PLEASE!
Lake	Tourism	My 20 year old daughter works for Disney and has severe asthma. She is terrified that she will be forced to go back to work before it's completely safe to do so. Please consider requiring a longer furlough for employees who have underlying health conditions. Also, please require everyone in a public place to wear a face mask. This should be mandatory and fines should be assessed for anyone not doing so.
Orange	Healthcare	The success to re-opening Florida is to open it slowly with places that will be able to maintain social distancing such as parks and beaches. Places like arenas, massage parlors, tattoo parlors and beauty shops should be last as their is no way to keep a reasonable distance between people. Restaurants could open with limited capacity so there is at least 6-8 feet between tables on all sides and gradually increase their capacity in 2 week intervals till they are able to be run at full capacity. Schools should wait till August to go back at their regular set time because their would be no way to keep kids at a social distance if they were to start to early. If we open up all these things at full capacity before we have got a good control of the virus we will land up back at square one with a worse outbreak that could last longer than the current one.

AMERICAN OVERSIGHT

Osceola	Administrative	Hi, I work for the Department of Children and Families, on the Family Safety part of it, and I think is a good idea when they decided to let us work remotely from home, I am an asthmatic person and so are a few of my co workers, I work with attorneys and they are also working from home, doing virtual hearings with the Courthouse etc, it has been working really well and I think that the Courthouse will be working like this until the end of May or beginning of June, I ask if we can do the same because not only is working good, is protecting us from getting infected, my daughter works also in the same building and they are doing the same. So I think that offices that have the option of telework from home should keep doing it at least until the beginning of June because is really working for us. We don't have 6 feet between each other in the office, is an open space with people coming in and out constantly and my daughter works in a closed file room where they have no way of distance themselves from one another and is all closed up. Thank you
Sarasota	Recreation	Sarasota has opened Siesta Key beach but not the parking lot. This appears to benefit those in the upper income beach areas that live in walking distance. We are adults and have got the message about social distancing. There has to be some trust by our politicians for their citizens. Please set some logical guidelines for cities to follow.
Hillsborough	Food	I'm in hospitality industry in a tourist area and manage our concessions booth in the local major league sports stadiums. I haven't worked since 3-13-2020. I'm want to work. Open pinellas beaches where we have restaurant, I understand having restrictions and safety policies. I have no options, people have no options. Give us a choice.. I began my re-employment insurance 3-22, it was when you opened up mobile access and allowed printable application, before I was able to get my name in. Thank you for what you've done, protecting us from this China virus . Protect us again and let us go back to work and support our selves.
Orange	General	It is incredibly important for employees to be provided with masks, both at public facing businesses and at private offices. The employers need to provide masks to those who do not have one. The only way to slow this thing down and stop the spread is for the majority of us to wear masks whenever we are outside of our homes. I also think that location capacity should be heavily reduced for businesses and restaurants and then slowly go up over time as the covid positive numbers go down. Like say start at 15-20% capacity and go up as the science dictates. We all just want to be safe and feel like the government does care about everyone's safety and well being.

AMERICAN OVERSIGHT

Palm Beach	Government	I'm a marketing professional with no formal medical training. However, this virus continues to surprise the medical community because COVID19 is unique and needs to be studied more than 4 months! Tracing-Testing-Quarantine before we open up FL and potentially create a worse and exponential larger outbreak. The unacceptable ineptitude of the unemployment system and total lack of leadership is also a factor before opening FL. Will the thousands of homeowners who are forced into forbearance be made "whole" and not be saddled with credit issues that are no fault of their own. Will the millions of hard working Floridians who are owed unemployment receive retroactive payments when they are re-hired, and un-furloughed, and return to their company payroll? Additionally, what is the answer for treating those individuals who are irresponsible, ignorant and simply dumb who don't practice social distancing, who don't protect themselves and others in public by wearing PPE? These are historical and unprecedented times for FL and the world. Before we open FL, listen to the facts of Science and the experts who have dedicated their lives to protecting human life for a healthy future, not politicians protecting their own future. I appreciate this opportunity and thank the Task Force for having public comment.
Orange	Healthcare	Please reopen all of Florida! I work in healthcare and we have laid off 3,000, with more pending since we can't do surgeries and procedures. Our 9-hospital system is the 4th largest employer in Orlando. Please reopen our businesses to keep our jobs and continue treating patients. We also need our small businesses and churches to reopen immediately! With 1.3 million residents in Orange Co. Demings is keeping our county closed for 1,300 cases -- not even .5% of the population! Residents want to live their lives and decide for themselves what level of risk is acceptable, not have government decide it for them!
Lake	General	Although opening all parts of Florida may be ill-advised at this time, I do believe all government offices both state county and local need to be open for face-to-face business transactions. I do believe all beaches should be open, with restrictions. Groups no larger than 6 people and then of course social distancing between people and or groups. I do believe restaurants should be allowed to open unlimited capacity. Tables of no more than groups of 4 end table should be at least eight to ten feet apart to allow for seating to keep your six distance. There has been a lot of talk about voting in the upcoming elections. I do believe mail-in voting would be a big big mistake! If you can stand in line to go grocery shopping or to pick up your food at a restaurant or to check out at a department store or Home Improvement center, you can stand in line to vote in person and be safe. The government officials of Florida has to do something to open the state backup if not in full at least 50%, people are without work and there without their unemployment checks. To say your unemployment check will be retroactive is great but you have to wait three four and five months to get that still leaves people living on the streets. So it is time to open up the State of Florida get people back to work and put money back into our economy!
Manatee	Real Estate	YES, PLEASE open Florida businesses! Also, PLEASE encourage condo & HomeOwner Assoc communities to open up clubhouses, pools, tennis & pickleball courts do we can get some exercise!!

AMERICAN OVERSIGHT

Palm Beach	Recreation	please open the parks and boat ramps
Osceola	Government	Don't make the mistake keep us save. I'm not working but you can't get your luce back if you die. Money, you can work harder.
Pinellas	Recreation	Please consider re-opening the state parks to day use and overnight camping for in state residents only. Users must be pledge to follow guidelines by CDC as long as those are in effect.
Lake	General	Mandatory masks in Public please. Being over 60 with both my husband and I having auto immune disorders we have been in our house for almost 6 weeks. We have to rely on others for everything. We would love to feel comfortable to get our own groceries, prescriptions or go to the post office.
Duval	General	It's not my call nor my decision to re-open Florida but I don't think that its smart to re-open Florida its way to soon to even think about it if this virus is this serious. In my opinion it really didn't feel like a lock down people were everywhere out all times a day doing as they please as normal when this should have been taken way more serious then it has i think we should wait another month or two just to re-open.
Osceola	Technology	Please have the employer who wants to open business test the employees first I work in a building with almost 300 people if we all go back to work there's a chance of them get it and the spread it right now we working from home and should continue like that until testing is available for everyone . Thanks
St. Lucie	Food	PLEASE REOPEN ALL POOLS ASAP AND RESTERANTS
Pinellas	Tourism	Please open florida asap
Seminole	General	This virus isn't going away. It's a complicated issue— I think the healthy should be able to work and function normally while being mindful of the less healthy by social distancing/wearing masks to limit possible exposure. This is one of many viruses (and will not be the last novel one) in the world we can't afford to sit and wait for a vaccine. Reopen Florida in stages and monitor for outbreaks and plan accordingly.
Palm Beach	General	May 1: Open Beaches, Gold Course, Parks, Tennis courts with social distancing regulations Small Business, Medical offices & procedures, business offices and small stores. May 15: Larger business, movies theaters, places of entertainment, small bars & restaurants with capacity of no more that 50 max with social distancing. June1: Everything with social distancing.
Brevard	General	Would like to see retail and restaurants open soon, small boutique shops are hurting for no reason. They can contol how many people are in the store at a time and can sanitize easier than the large stores. In addition restaurants are getting killed and should be allowed to open with reduced capacity and wait staff etc. wearing face coverings. We should be honest about the fact that the Corona virus was here in December but we didn't know it. We all visited restaurants and stores for Christmas shopping etc. Let's use a metered approach and start opening our state up. Thank you.

AMERICAN OVERSIGHT

Duval	Healthcare	My comments are these: Employers should require everyone to wear a mask at work, Also no one should be allowed to enter any building (i,e, grocery, etc.) without a mask on. Also, antibody testing should be mandatory for everyone over 18 but starting with the working age population.
Osceola	General	I think it will be the crazyes thing to do to open up y because there no viccin, more people will die,,that is crazy to open up
Volusia	General	DO NOT OPEN THE STATE!!!! The state needs to stay locked down for at least another month. The order that was imposed on April 1st should of met with stricter guidelines. We should of followed other states orders where hardly anything was open. There is and was too many people out and people were acting like nothing is going on. Nothing has been handled well and with hurricane season looming around the corner we need to have a better handle on the states problems before we re open. If anything we need a stricter lockdown from anywhere from 4-6 weeks. Also, many people have been effected financially beyond belief we need more money people cannot survive off of $1,200 a month even my family of 4 can't last long with that. Please I truly hope the governor and his task force sees this and does something and listens to the people!
Seminole	Healthcare	I am a Healthcare worker and the cases in Florida are on the rise and have not decreased 14 days in a row as the White House Corona task for has recommended before opening. I have a private practice and I have had to furlough employees and I personally have lost money. I however, would not be comfortable with the Governor reopening Florida without adequate testing, enough ppe for all Healthcare workers and industries. It would be political malpractice to open Florida in the same manner as Governor Kemp of Georgia has. This pandemic is affecting people of color more than any other group and as Florida is a purple state I think the Governor should take that into account as the next election he will surely loose if thousands of minorities may sucumb to this awful virus.
Duval	General	It's is too soon to open up Florida you have people that think this virus is a joke so many not keeping 6 feet and I have seen alit of gatherings people not wearing mask or gloves I was in the grocery store standing in line and I had person so close to me I could feel him breathing on my neck I ask him to back up and he laugh so I got out of line and stood aside till it was my turn I understand people are out of work but if people can't becareful and watch out for each other why open up and make us have a relapse
Palm Beach	Recreation	Golf courses especially private in palm beach county should be open. Come on let's get with the program!!!

AMERICAN OVERSIGHT

Duval	General	Open slowly, so we don't have to do this again. When it comes time: Restaurants 5% then 10% and so on Stores same thing maybe a every week increase. Allows employees who cant return to work due to illness, kids or the vulnerable to stay home a little longer because less staff is needed in the beginning. People who can work at home are the ones stacked in cubicles that go from desk to desk visiting. They need to stay home as long as possible. These environments spread it just like hospitals. Tourism, only allow Florida residents to books hotels etc when it opens. As soon as hotels open to nonresidents its over everyone will come because people out of work and kids are at home. Please look at thia carefully
Brevard	General	Please reopen the state! The coronavirus will never 100% go away just like all other viruses. I know people who are out of work who need to be able to work. I've been working freelance for a few years now while I've tried to find full time work without success. With everything shut down I'll never be able to find a full time job. Those who are deathly afraid can stay home. The rest of us should be able to shop where we want to such as go to church, go movies, theme parks, eat at a restaurant, go to sporting events, and concerts. The Bible says almost 400 times not to be afraid. The Bible also says that God knows the day and time that each of us will die before we were born. Thus no virus can change someone's time of death. They would have died anyway. Open up the Bible! Open up Florida! Brian Hopkins
Collier	General	Please prioritize the opening of nonprofits. These organizations support those in need, vital aspects of our culture, while providing jobs and opportunities to serve. Please allow nonprofits to deliver their mission and bring back life and purpose to the millions they impact each day.
Duval	General	Provide face masks and gloves to residents, especially senior citizens and those people who are more vulnerable to dying from COVID19. I see people walking around without face masks of all ages. Providing protection from uncaring and selfish people should be a priority.

AMERICAN OVERSIGHT

Duval	General	The best way to reopen is to follow medical experts advice. We currently have no definitive vaccine or treatment to prevent deaths in a healthy patient more less a patient with comorbidities. Our economy is broken. Why risks lives when the damage is done. We need education that is at a third grade level dissimenated to the public regarding how the virus actually spreads (aresol), what protection equipment is required in public to prevent spread, how to properly wear the equipment and how staying home is best. There has been NO EDUCATION for the public only recommendations or mandates to restrict behavior. We also need to help people understand that “60,000+” die from flu in 12 months but 50,000+ have died in 3 months with minimal restrictions. I believe opening will cause people to relax, doubt the seriousness of this pandemic, create greater distrust of our government and result in higher death rates, food supply disruptions and devastating economic consequences. Freeze the economy. Ask people to pay what they can, provide assistance where possible and give the medical researchers time to create vaccines or proper medical management regimen before opening non-essential business. PLEASE!!!
Hillsborough	Healthcare	As a nurse, I'm concerned that if re-opening does not include wearing masks, social distancing, limiting people in stores and restaurants we will be right back where we started or worse. We see evidence that what we have been doing works. We must slowly and paying close attention to the infection rate re-open and be prepared to put the brakes on.

AMERICAN OVERSIGHT

St. Lucie	General	I have family members who are high risk, my grandfather is in a nursing home in the villages, my immediate family has medical issues ranging from heart to breathing problems, and I have other family and friends working on the front lines in hospitals and law enforcement. We need to let science and honest evaluation guide us. The health of Floridians must be paramount to any decision. Let's stick to the list provided by the federal government. How many can we say we have? 1. Downward trend in cases for two weeks. Yesterday was the highest. Two highest in the last week. NO. 2. Robust testing for essential workers. Seeing we only had 20,000 tests yesterday and there are more than than many essential workers. NO 3. Quick contact tracing. According to state data, half of known cases haven't been traced. NO. 4. Widespread Screening for asymptomatic cases. We need 30-40k tests per day. NO 5. Screening specifically for older and disadvantaged communities. Has every resident of a nursing home get tested. NO. 6. Ability to quickly replenish PPE. We are still in bidding wars with other states and the federal stockpile is depleted. NO. 7. Ability to surge ICU capacity. Can we ramp up to prevent a NYC catastrophe? NO 8. Extra protection for senior care facilities. 20% of deaths so far I'm nursing homes. NO 9. Ability to have safe mass transit for passengers and employees. Is there an organized detailed statewide plan been published? NO. 10. Can inform public on social distancing and face covering. I've seen no statewide public info campaign. State press conferences demonstrated the governor doesn't know. NO 11. Ability to quickly change your minds and take a step back. Is the governor willing to make his own decisions? The governor said he wants to wait on presidential direction. NO We are 0/11. Reassess these every two weeks.
Pasco	Government	Open everything immediately. This is ridiculous. Thank you for all you are doing
Sarasota	General	Governor Desantis has been ignoring a virus-killing idea for about a month. #GiveUsBackRealEverclear is its hashtag on Twitter. Both Alabama & Georgia allow the sale of 190 proof grain alcohol in liquor stores, yet somehow, neither state has devolved into Mad Max Anarchy. They both collect taxes Florida's politicians stupidly-refused, because apparently all FL citizens should be treated as frat boys. Wouldn't a "small" government politician enact this common-sense DEregulation idea, instead of trying to ignore it? And why must this state's "news" media be so-indolent when it comes to deregulation ideas from large-L Libertarians? Is my snark about their bias THAT painful???

AMERICAN OVERSIGHT

Volusia	Education	As a teacher, I am concerned about returning to school without the proper precautions and procedures in place to safe guard staff and students. Many teachers are older, and are part of the group needing to stay home. If schools open, you will see a huge second wave because of not social distancing and proper hygiene, plus parents will send sick kids to school because they need a babysitter. In my opinion, Florida could maintain online learning through the next school year until proper treatment and/ or vaccine is created. This is a pandemic. This is not a joke. We need to protect our school communities. If you do not want a class action loss suit for staff and students dyeing as a result of mismanagement of this situation, you would be wise to maintain distance learning for staff and students. Volusia is already putting proper measures in pace now, and I for see it will only get better if given time over the summer to build for the next school year.
Orange	Healthcare	Require masks in public. Everybody. Everywhere. People who have the virus won't be able to breathe it out so easily and people who don't have it won't be breathing it in so easily. Add hand washing stations in public places. Educational videos on proper way to wear a mask and hand washing techniques on social media sites. These are readily available as medical assistant and nursing training videos. I'm a 30+ year RN by the way.
Polk	Recreation	State parks and campgrounds enable you to still maintain social distance while enjoying nature and wildlife.
Sarasota	General	I would open up the economy. We should let the people with their individual freedoms decide what is best for them. We have heard from the gov and expert health people give us stats an medical advice. We are not restricting people because they may get the flue or cancer or they smoke but may get cancer. They make their own decisions. Let’s get on with living.
Hillsborough	Healthcare	We need to be able to access our medical care such as Dr offices and eye clinics and eye glass stores. I have pre glocouma and can not get my test and eye surgery to relieve the pressure. Procedure would be done in the office of the eye clinic, but it is closed due to restrictions on non elective surgery and maybe limited PPE. I can't take certain meds as I do not want to go blind. I am told I need to wait until I have excruciating pain then go to an emergency room, and I have 5 hours to have the pressure reliving surgery before I would go blind in that eye.

AMERICAN OVERSIGHT

Sarasota	General	Good morning, The officials we elected in the state of Florida have failed us all. I've now been waiting along side the rest of so many Floridians for unemployment for over a month now. This is completely inexcusable!!!! I can't even believe this is happening. As all of our elected officials sit around still getting paid by the tax payers money not having to worry about how they are going to pay their rent, utilities, car payments, car insurance, health insurance or even put food on the table I hope one day you have to feel the stress, anxiety, and feeling of despair that we are all feeling right now waiting for you to get off your ass and do your job!! Don't worry when election time comes around again everyone that's in office now will be voted out!! Thanks so much for failing us all, Mary Wilson
Orange	General	I believe it is too soon to re open. I am someone who suffers from severe anxiety, depression and type 1 bipolar. This pandemic has affected my mental health immensely and i do not feel comfortable returning to work at this time. Luckily i have been able to work from home and i wish that we may continue for a while longer. Also, my partner who is type 1 diabetic is already putting herself and our family at risk by working outside the home. Even though i am grateful that we both still have jobs, i still feel it is too early to lift the stay at home order for the safety of everyone!
Duval	General	Please tell the condominium association board of directors that it is save to open POOLS!! Also add it is SAFE to open Workout Room if they are Cleaned and provide Sanitary wipes and people follow safe practices.. OPEN THE STATE!! Lets Get back to WORK!!!
Clay	General	Keep Florida closed it's too soon and we'll end up right back in this mess. I think mid June would be okay to open but in phases. Don't be a idiot like Georgia's governor.
Palm Beach	Healthcare	I strongly believe that the borders to the state should be closed to incoming and outgoing traffic for a few months. If we then continue with a stay at home order for a little while we can severely slow down the spread of the virus here. This honestly should be done in each state. The only things coming in and out should be essentials like food, water, gas, etc. tourism, people "coming home" to their "other home" when they have been in another state for months should be forbidden- regardless of whether its leaving or coming into the state. Keep the states borders closed. Keep the airports closed to consumer traffic. Keep the ports closed to consumer traffic. Enough. Let's stop this virus. Again, this needs to be on a Florida level, but all states should follow suit.

AMERICAN OVERSIGHT

Sarasota	General	The virus is easily killed outside the body. For the past 6 weeks, people are herding to a few select specific locations, food stores touching the same freezer door, touching the same package of meat, etc. So everyone has been in close contact with strangers on a regular basis, despite the 6 foot distancing. I don't see a lot of difference with any type of store or restaurant. There's no reason why other stores and restaurants can't open. It would be nice to visually see the waitress or busboy cleaning the table and chairs after each use at a restaurant. Overall, there is some personal responsibility that every person has to follow. The open businesses would be required to sanitize regularly. Even hairdressers are okay because it's one on one contact, not one with hundreds of people around you. Since we live in Florida, and have already experienced multiple over 80 degree days and lots of sunshine, the virus probably doesn't live well to spread. I think a lot can open with some good, specific guidelines. Bars should be limited to 1/2 capacity. People WANT to do the right thing. If I find a business with poor COVID practices, I just won't go there anymore. I'll be watching to see how things are handled. Incidentally, Home Depot and Lowe's get an A+, Der Dutchman gets an A+. Chic Filet is an epic fail.
Manatee	Healthcare	I believe that healthcare supplies especially PPE are of the utmost priority to conserve. Therefore elective surgeries should be held for an additional thirty days in Florida. I work in healthcare and the supply hoarding in the surgeons' office that I am employed with is out of hand already. They even removed our surplus of PPE from our office and took it to one of our provider's homes so that it could not be confiscated. Additionally they are not supplying employees with masks nor are they providing patients with masks. The office is small but the patient load is large and patients and employees are on top of one another so it seems as if they're no concerns in regard to spreading the virus.
Orange	General	I'm a small business and being left to go bust , the ppp loans are not reaching small businesses as it's going to mostly big companies. We are a essential business as we are needed to help people retrain for delivery jobs, this sector is more important now than ever as posted items is the only way most people can obtain goods . This is also essential for prior to drive as we all know Florida pretty much doesn't have a public transport system , if you can't drive you can't get around . Most of our customers tell us the reason for driving is to get to a place of work as Uber is to expensive on a daily basis . We will have face masks on and disinfect the vehicles and take students temperature. On start of lessons . Regarding the virus , we are going to have to live with this for yrs to come ! It's not going to go away anytime soon , so we are going to have to deal with it the best we can . This lock down is doing more damage than any virus . My biggest fear is social breakdown , there is no coming back from that .
Hillsborough	General	Do not open up until it's safe. If we rush it, then everyone will get the disease and we will have to quarantine all over again.

AMERICAN OVERSIGHT

Pinellas	General	Open the beaches. Floridians will practice safe distance rules. DO NOT do the following: 1. Make masks mandatory 2. Ban sitting on the beach 3. Ban fishing 4. Ban coolers Just have the officers make sure large groups do not form and safe distance is practiced. Simple as that. Let business owners figure out what is best for them also. We are adults here! God Bless and have a nice weekend. Rick
Brevard	General	DO NOT OPEN FLORIDA! It's too soon!
Brevard	Healthcare	I think florida needs to stay closed until CDC is certain that it is safe and wise to do so.
Duval	General	In my opinion it is way to soon, there is still way to many of new cases even to this day. You keep saying to still practice the social distant,, but how can you when you open everything? I still say keep everything closed until there a zero new cases.... I
Putnam	General	I see how Georgia is not a good place to implement the reopening of certain areas of employment. They're still not seeing a curve. In fact more are testing positive due to more testing available. The same goes for Florida. More testing means more positive cases. Health versus economy won't help if it adds to more problems. We're a much bigger state also. I for one am not going anywhere.
Sarasota	General	When opening beaches let people park in parking area's. If you want to open businesses why not fully open beaches. Have more space than a confined building. I am a senior with husband with dementia and going to beach and watching sunset is a pleasure for him. We have always keep our distance. Or sat in car. Do not feel should open restrictions as yet. Feel too soon to endanger lives I understand that the economy depends on reopening but should go slowly
Palm Beach	General	I feel we should open business up first starting with restaurants, salons, doctors offices, and any company that is able to abide with the CDC guidelines for sanitizing and keeping distance between employees and customers. I don't believe gyms, movie theaters, sporting events or any large gathering should be opened at all for now as its a recipe for disaster for the virus to spread. But we definitely need to get things opened slowly so that people can get back to working and help our economy too.
Manatee	Government	Florida isn't ready to open after the COVID 19 pandemic. We need to see significant drops in cases for at least 14 days!
Manatee	Administrative	Too slow to react to Covid19 and now too fast to reopen! Not happy risking lives for the dollar!

AMERICAN OVERSIGHT

Lake	General	This family believes in herd immunity. Jobs have been lost, lives disrupted. It has taken a mental toll on all of us, including our children. Florida needs to open back up. Let's go!
Pinellas	Finance	My question is you can create a comment portal that works 100% affectively but you can't fix an unemployment system, so should I use your comment portal to pay my rent?
Duval	General	We should open our city up slowly, still practicing social distancing. Retail should only allow Certain amount of people at a time, following the same process as grocery stores. Small businesses should follow the same protocol. People know what to do to stay safe. Those that don't want to go out shouldn't. We have got to start opening up our city. This virus is going to be around, but we can resume some sort of normality.
St. Johns	General	Make testing easier to access and report positives accurately. Testing is still under-available and under-reported. We have all seen the stories about the state numbers not accurately reflecting those reported in South Florida. Nobody is going to feel safe "opening the state" until both of these issues are resolved, period.
Duval	Retail	Stores have done well attempting to practice social distancing during COVID. When we reopen those practices need to continue. Sanitizing carts, wipes at the entrance, distance markers on the floor, Large stores such as Walmart need to practice one way aisles inside the store to help with people not being so close. But they have done well with one way entrance and that should continue.
Hillsborough	Healthcare	In the interest of continuing to flatten the curve, we need accurate testing to be widely available before opening the state again. It has been proven that spring break vacationers spread the virus in their travels here and back at home. We as a state cannot take on the potential liability issues involved in the possibilities of causing outbreaks in other states. Not to mention the ethical issues of prioritizing money over people. The economy exists to support us, not the other way around. Without citizens, there is no state or economy. Fix the unemployment website, get the CARES act funding available for freelancers and the self employed. Those are economic issues that you should address, not reopening prematurely.
Brevard	General	I think it's a little too soon to re open the state, because I don't think people are taking this thing serious enough. When I go to the market, very few people are wearing masks and practicing social distance, and because of that I am afraid to go out.
Pinellas	General	We are not even at the peak yet in Florida. Why would the powers that be re-open the state yet? This will prolong the economic effect longer. More people pass along the virus, another surge in cases, more strain on the healthcare workers/system, more deaths. Come on, start being smart about this crisis!!!!!!

AMERICAN OVERSIGHT

Palm Beach	Healthcare	I do not understand governor DeSantis's logic in allowing pharmacists to administer coronavirus tests. Encouraging those that suspect infection to enter essential businesses such as CVS, Walgreens, Publix, etc puts those employees and customers at greatly increased risk of infection. My employer is essential and requires that I stay away for 2 weeks if I suspect infection or contact with an infected person. This includes not visiting their own medical department. So why would it be wise for me to then go to publix where people are buying and selling groceries? Sure seems to me that more dedicated testing sites and more capacity at those sites is a far safer alternative. I hope he will revisit his decision , or if not then at least explain to the general public how pharmacies can ensure safety of employees and other customers at their facilities.
Sarasota	General	Do not reopen until Antibody and antigen testing is being done on all residents. Give the opportunity to give plasma where right now we don't without confirmed diagnosis. Since testing was nonexistent in the beginning many of us probably have already had no confirmed cases but have our hands tied to be able to donate without antibody tests. Resolve unemployment issues to apply for federal as well. Do not reopen until you have means and plan to do contact tracing Keep all non residents out of Florida that do not have proof of immunity. Please keep us safe by not overwhelming law enforcement and health care. This is our chance to do this right. We may not get another one before burning out or endangering too many.
Pinellas	General	Hello. First, thank you all for all that you do! I understand there are politicians, and there are those who are in government... I believe all of you to be the second group, as I see a genuine love and concern for our state and it's people. My response is to open things back up as soon as possible so that we can shift life back to "normal". Is there a concern for those at risk, yes, but the percentage of people actually getting the virus is so small, and the percentage of deaths in FL from the actual virus is even smaller. Let those at risk be phased back into normal life, but let everyone else get back to jobs, shopping, restaurants etc... The hospitality and tourism industry is Florida's lifeblood and needs to be infused again. Thank you.

AMERICAN OVERSIGHT

Clay	Professional Services	I believe that any company that can continue to work from home like offices that can keep the same level of working with no real impact to their daily duties and such, that doesn't affect their work should continue working from home to keep the population that must work in public at a lower risk. I work for a company that hasn't decreased in it's production because we are an advertising firm and have worked from home with no problem but if we all go back to the office too soon we risk cross contamination since it's in such close quarters, sharing bathrooms... Break room..it's so unnecessary if we continue the same level of production from a home environment. We do our shopping and local essentials on the weekends and weeknights. Even if certain departments of our company like the sales team had to continue going out to clients and getting business they can social distance and call people... But our team, the design team can remain working from home, like other members of our consent who work support roles.... Until we have a vaccine I won't feel safe because I have elderly parents and continue to support and must deliver groceries sometimes to them.
Martin	General	During this Pandemic I have observed people doing just what they want with total disregard to your orders or the counties orders. I am frightened that reopening will bring back a wave of virus. I am hoping that along with continuing to require businesses to space customers and social distance, etc. that you require everyone to wear a mask. I wish it had been a requirement once we heard about how it could help the spread by asymptomatic carriers. There are many people who will not want to chance going out if it is not a requirement. That will be money lost in restarting the economy if you want to look at it from a numbers viewpoint. I look at it from a safety viewpoint. Please consider requiring masks whenever out in public in stores. Not for while playing sports, at the beach, on your boat, or at restaurant of course. Thank you for your consideration.
Palm Beach	General	to soon to re open south fl
Duval	General	I believe the re-opening should begin as soon possible.! Businesses and beaches for relaxation not just exercise! It is time for everyone to take what they have learned in the last month and apply it in our communities. The virus is probably never truly going away just like all the other viruses and flu out there so if there is going to be a new normal way of living with Social Distancing, better hygiene, etc! . Its time for us to open up and start practicing these new things. Our economy nor our mental health cannot handle more shut down we need to get our small and large businesses re-opened and start figuring out how to grow again in a new environment ! Thank you for your hard work and your consideration! Elizabeth Affsprung

AMERICAN OVERSIGHT

Clay	General	I would like to see restaurants and retail start to open back up. This can be done with restrictions in the beginning such as limiting the number of people, the requirement of mask and gloves, proper social distancing with the store/ restaurants. Beaches should be open for sunbathing but again following the guidelines of very small groups and social distancing . It is important to start moving our economy. As we all know Florida and the unemployed. People cannot continue without revenue.
Polk	General	Please wait a few more weeks to reopen. Please give the virus more time to calm down before we start reopening. There are so many people in the state at risk that are not with in nursing homes. I have a child that is high at risk because of a lung condition he developed as he has grown and I have a husband who is high risk because of a heart condition he was born with and has had multiple open heart surgeries. We are both in the hospitality and tourism business by working for a large company in the Orlando area. Please consider keeping us closed for a few more weeks just till the second or third week of May and see how everything works out before you start phase one. We all want to open Florida and restart our lives but not at the costs of our families lives. I know so many people want to go back to work because of the issues with unemployment but since there has been progress on claims being processed and the people of Florida are starting to receive money and now the government is expanding small business loans this is the chance to say let's give a few more weeks to see what happens with the virus. By waiting it could really cut back the numbers because of minimum exposer but by reopening people may start rushing places and the virus may pick up speed. Also once businesses start opening up please give strict guidelines for health and safety of business whether it be a restaurant , theme park or convention please have all the same safe operation guidelines for everywhere so there is no grey area in protecting the people of Florida and when the time is right all the wonderful tourist that visit Florida. Thank you for giving the people this opportunity and for taking interest in our voices!
Duval	General	Please do not open anything until the doctors and scientists say it is truly safe to consider slowly reopening. Even then we should listen and watch closely as we see if cases begin to rise again. Nothing should outweigh the risk of painful contagious deaths from this virus. We also need to suspend all rent/mortgage and utilities until the virus situation is contained Whilst also providing UBI and medicare at least for the duration of this pandemic. We must be patient and make sure we quarantine off any households with infected by providing all of their essential needs to allow them the ability to stay home whilst also making sure they do not make contact and possibly spread the disease further. Until doctors/experts say otherwise.
Palm Beach	Healthcare	It is not safe to reopen Florida to tourists and outside individuals , virus needs to be taken under control there are too many people at risk with the COVID.by reopening Florida you are literally asking people to die

AMERICAN OVERSIGHT

Duval	General	Reopen the state! Keep the elder at home! This is crazy. 5 weeks now no unemployment for my wife.
Duval	General	So I believe that when we reopen the state we should take one day out of the week to self quarantine. On the day of Sunday everything should be close . I believe that we should leave the essential places open such as grocery stores and fast food . It would be nice if we could hire people to go around and clean the city while we are quarantining for that one day .
Collier	Construction	Reopen Florida!!!!
Sarasota	General	Open the economy, people are losing their jobs, homes, vehicles, ect. The prevention is worse than the virus. You are violating the Constitution you swore to defend against foreign and domestic enemies We are a free people and the constitution guarantees that. OPEN THE ECONOMY NOW!
Brevard	General	This has gone on long enough. As a State that relies heavily on Tourism we have suffered long enough. Yes the General Public is scared "Shitless" because of our Government. We the people are falling apart financially, emotionally and physically. Stop the madness. We live with Germs, Disease, Bacteria, Viruses and everything under the sun everyday. Our President has done everything he can to instill basic common sense to to the American People. Those who choose to ignore his Leadership regardless of political affiliation is well just plain ignorant. Let the Week weed themselves out. Process of elimination has worked for thousands of years and will continue to work without laying down to a few Butt hurt Fools. I am American to the Core. We need Strong People to get thru this Craziness. We need People with Good Common Sense to believe in each other.
Duval	Construction	I believe with the very low "confirmed cases" compared to the population we should open back up. We have way to many people out of work. the mental health of people is going to get worse. If people want to stay home after we re open that's fine but the majority of people I talk to want to return to normal life. I believe that this virus was here in November and many people already had it being a few people I know had symptoms and we're negative for flu and strep.
Orange	Healthcare	I work at a Hospital system in Central Fl. employed over 15 yrs . And because the State closed down all elective procedures my employer is now losing business and is in the process of possibly laying off many in slow departments (including myself) and through no fault of of my own possibly without a job in the near future. Our hospital is not overwhelmed or at capacity, in fact we are doing less business now than before. People are afraid to come into hospitals because the narrative has been stay away for so long. Please open healthcare back up and help change the narrative around patienst being able to access healthcare again and save our jobs. No hospital employee should be laid off during this national pandemic.
Pinellas	General	I would recommend u reopen the beaches and all the restaurants and fishing charters that have been shut down because of covt 19 my friend owns Hubbards marina and they are shut down because of covt 19 . I would love to see the beaches and fishing industry reopened first so people can get fresh air

AMERICAN OVERSIGHT

Lee	General	This decision to reopen is more than just making money we have families out here who can't recover who won't recover due to not working I agree that the virus is still out there and will always be out there but what will come with the aftermath all these people who are telling us to stay he have the financial means to do so they maybe losing money however they will recover unlike alot of familes. The online schooling is not the same some students have not done a thing since we closed the schools are we going to take away basic pleasure in life from students that we all enjoyed it's time to open back up! We are doing more harm than good long term mental health financial means business who won't be able to open it's it's we need to come together and understand the risk. For those who don't want us to open up that's respected and I understand but maybe this is a new normal for you to find a new reality of working from home and staying home we have always been social animals and we need that interaction
Hillsborough	General	The economy needs to reopen immediately. Hospitals are empty. Emergency rooms are empty. ICUs are empty. People are getting sick and dying of REAL treatable diseases because they can't get the procedures or treatment needed. That is the real health crisis. I cannot believe the hysteria surrounding this virus and the flat out wrong models that are STILL being peddled. I voted for our governor but if he doesn't stop giving in to pressure by the media and others, he will lose my vote next time. OPEN THE STATE!
Pasco	General	Do NOT reopen the state yet!!! Wait until the virus is contained and no longer affecting hundreds per day. Think about the PEOPLE, not the money smh
Sarasota	Food	I am a restaurant owner for 35 years and have been working 15 hours a day 6 sometimes 7 days a week. I have a family of 6 with 2 of my older sons and my wife work in the restaurant as well , my 2 younger children are 13 and 8 years old. We have. It received any government assistance as of yet, we closed our doors on March 16th in fear of any of our family, friends or loyal customers getting sick. Needless to say we are struggling to get back to work , we need income ASAP , BUT I do not feel it is the correct decision to open our business up at this time. The safety of our community and family is priority number one and the fear of someone getting this disease is not with the reward at this time. We should be 100 % certain that we will all be safe or else we are doomed. We have sacrificed so much up to this point and to go backwards would make it all useless. Thank you , Michael Calore
Manatee	Healthcare	Please keep the state closed until our numbers look better. Please access all available resources for data and statistics before making any decisions. Many of us are afraid of a surge in cases if things open too quickly. Please be transparent with all data and stop placating to the elite. Everyone deserves to know the truth about this virus and how it's affecting their neighbors.
Sumter	Healthcare	Open back up elective procedures. Still use same precautions as emergent procedures now. Everyone must be screened and temp taken. Only one person can come with patient. Everyone must wear mask entering the hospital.
Polk	General	How can you open up the state when some people have not even received an unemployment check to be able to buy groceries and gas? I'm a self employed contractor that's getting denied!!!!

AMERICAN OVERSIGHT

Duval	General	It is time to re-open small businesses and the schools. Both are creating unnecessary hardships on small businesses and the state's economy!!! Of course with appropriate precautions.
Hillsborough	General	Truthfully the state brings to much attention if it should open, people from all over find Florida and an escape goat and these are trying times, we have to much to risk and to much to loose. Florida should be one of the last states to open since it's such a big and lovable state being where so many come to gather
Hillsborough	General	more people will die from malnutrition cardio vascular disease suicides etc. than covid-19 will ever kill there are surgeries put on hold that people need,loss of jobs means no insurance to go to the doctor,no money for medicine.people die every day no one is promised tomorrow.GIVE ME LIBERTY OR GIVE ME DEATH
Polk	General	Try to enforce wearing masks in Public,stores,etc. But open up everything,ppl.are gonna still be sick,and might pass away. But I believe it's gonna happen wheathw or not the state is open or closed. My opinion.
Sarasota	Healthcare	WE ARE NO WHERE NEAR READY TO OPEN UP. THINK MEMORIAL DAY WEEKEND TO START SLOWLYYYYYYYY REOPENING. AND ONLY REOPEN THINGS THAT CAN BE CONTROLLED. TAKE CONTROL OF THIS STATE MAN. that's your job. You can't make everyone happy but you can protect us , especially those who do not make choices to protect themselves. Okay good luck dude.
Polk	General	Please announce EARLY NEXT WEEK that Florida is officially in phase one. This will give businesses time to apply state guidance in time to open May 1st. Thank you for your leadership Governor.
Osceola	Government	In my opinion it is too early to relax social distancing. We have to increase testing facilities and must test even asymmetric individuals and wait until positive cases number starting to go down for at least a week before starting to relax lockdown in phases the WH recommended.
Palm Beach	Healthcare	My massage therapist had been dealing with my stenosis and radiculopathy, and I was improving. Now, since she hasn't been able to see clients, my pain has increased and I've seen vast reduction in my ability to move without a walker. I understand the risk and am in favor of keeping social distancing for the long haul; however, I feel that in my case, massage is essential to my physical improvement. If my massage therapist can incorporate safe practices - which I believe she can, I would love the opportunity to continue my treatments with her.
Orange	General	I continue to work in healthcare during the pandemic to say it's been challenging is an understatement! However I am grateful to be working. My children continue to do distance learning. We must continue to have stay at home orders until we have more of the community tested for Covid and for antibodies. Please extend stay at home orders until we can get a bigger percent tested. Thank you.
Sarasota	General	Open the economy to all residents and tourists that are not part of high risk groups. Those at higher risk and their families should self quarantine. The rest of us should social distance and wear appropriate PPE. Quarantining everybody is extremely harmful and unfair. I care for and about those at high risk, but treating us all as though we are high risk is doing FAR more harm than good.

AMERICAN OVERSIGHT

Brevard	General	Now is not the time for a wholesale re-opening of the state. Florida has not yet peaked due to a shamefully late and toothless shutdown order from the governor. There is very little testing and zero tracking. Look to countries like South Korea and New Zealand for successful examples of how to deal with this crisis. Under no circumstances should we be following the President's guidance for anything.
Palm Beach	General	Prolonging the stay at home order will affect our economy and negatively impact our lives for years. The harm caused by loss of income, bankruptcy, unemployment, etc OUTWEIGHS the harm to the population by exposing more people to the virus. People will suffer from divorces, child abuse, depression, suicides, misery and unhappiness that will impact the population greater than a larger number of virus deaths. The cure cannot be allowed to harm us more than the disease! Let us out. Open beaches, parks, stores and restaurants!
Seminole	General	We need to reopen the state to locals and allow our economy to start moving. Once we've had some time to see how the state does and then gradually allow others to enter the state.
Lee	General	Ok, time to stop with the task forces, listen to the people, make a decision and move on, adjust as we go but make a decision, that is the make up of a leader.....
Pinellas	General	Hi. I work with businesses small and large, and my small business has been impacted along with my family. The phased approach is going to be very important to how we navigate through the coming months. I believe that in mid May we can reopen to the 10 max per shop, restaurants at 50% capacity and beaches/vacation rentals remain closed. If there is no increase then go to the next phase, increase groups to 50, etc. It will be critical to not waiver if there is an increase to step back and put back the restrictions that were in place previously. The financial impact is great, however the loss of lives is what needs to be the primary concern. We all can work on added programs, funding, resources. Once someone dies, it's permanent. By minimizing the focus on lives, many feel that those lives must not matter to the decision makers. If we have to go back to closures if there is another peak, know that it is the right decision. This is not something in our control, and in this case going backwards in policies by out back the controls/restrictions is not a failure. It's going to save lives.
Palm Beach	Healthcare	We can educate ourselves, in some cases with help regarding the covid19 spread. Opening obviously adaptable public venues such as beach access and golf courses for limited use could help the public to more easily cope and comply with our safety regulations.
Orange	General	Please start easing the stay at home restrictions when they expire at the end of the month.

AMERICAN OVERSIGHT

Pinellas	Healthcare	As we are being told that we will be opening up as a society but required to wear mask , what is the state doing to help supply mask as they can't be found in CVS , Walgreens , Target , Walmart , Publix etc ... Tried online and they are upwards to $10-20 a mask and seeing reviews that make ordered 2 months ago still not being shipped. How can we open and be required to wear something that isn't accessible to us. On another note I believe the state ans Gov Desantis are doing a FANTASTIC job. Thank you
Pinellas	Finance	Let's get back to work! Open the state.
Orange	Healthcare	Please do not extend the May 8 closure for dentists. Social distancing will still be practiced for the patients not at the chair.
Clay	Healthcare	What about the dental field? I haven't heard about if the dental Field is still opening up on May 8th. That's when it's due to open. Is that still a good date to open back up? I think it's personally to soon to open. I work in the dental field and I am just curious.
Pasco	General	As a Florida resident and owner of a time / share condo I should be able to go to my condo on the beach in ft Myers. This is unfair that I can't move around my State an go to my own place because a mayor says he is keeping ft Myers Beach closed. I work for a retail supermarket that has been working everyday through this apidemic to have food on the table for all Floridians. Thank you for letting me voice my opinion.
Pasco	Healthcare	I am a dentist and we need to be considered essential business. We have been shutdown for emergencies only but we need to be able tot aje care of our patients, they need us too. Please allow us to open if we have the proper PPE to protect our team members and patients. We can reopen with a modified schedule and smaller team members. We need to be able to take care of our community.
Orange	Education	Open the state immediately, please. I voted for you, but I do not support you at this moment. You will NOT get my vote next time if you continue to take away my constitutional rights and freedoms. We need to go back to work!!
Osceola	General	I think Florida should open back up. WithOUT masks being required. Florida summer is too hot for that. My husband has been working through this whole thing and is only wearing a mask because his work just started forcing them to. And they're only making him wear them because of social media aspects. If people want to wear a mask then great otherwise don't force it. I also think cruises and Disney should open up as well.
Hillsborough	Agriculture	It would be nice if the Parks were reopened. It would help everyone be more positive from being able to walk through the parks and relax. But everyone should also make sure they continue with the Social Distancing!

AMERICAN OVERSIGHT

Seminole	General	I don't think we should re open the true numbers aren't being realsed to us. I already lost a close family Member in NJ. My daughter is a type 1 diabetic with a weak immune system she could due if this state opens to soon we already had people walking around in Seminole and Oviedo area who tested positive from my readings. Why danger millions? Slowly I mean slowly open. My daughter can't go to Nj to see her father who is in the United States Military because of the high numbers she's truly heart broken because she has a new baby brother but she doesn't want to dye we don't want to dye. She's also having a querintne birthday to. Please think of the ones who have weak immune systems I beg you as a mom I don't want to loose her because you opened up too early
Pinellas	Recreation	Please consider reopening the Florida State Parks to camping and other activities to Florida residents only until it's safe to open them backup for everyone.
Orange	General	Please re-open our state parks to Florida residents. We can safely enjoy the outdoors and still follow the CDC recommended guidelines sir social distancing. Thank you for your consideration.
Manatee	Healthcare	Open gradually as was the shutdown. Continue focus to manage long term care settings. Focus should be separate task force and on going for these facilities. Why not empty and clean facility by facility. Then admit virus free patients to the clean facility until all settings are virus free. Continue strict oversight. Test test test. Other test test . Continue precautions and social distancing all businesses and public areas. Develop testing and follow up tracking procedure for short and long term period. Enforce compliance.
Volusia	Healthcare	I work in a major hotel on the beach. We are not allowed to wear mask and gloves because they dont want to make guest feel uncomfortable. I fought to wear gloves before the shut down. There is no way to keep is safe while checking in guest or cleaning hotel rooms along with a long list of other things that are required of a resort. My husband has multiple sclerosis and I can bring home Covid 19 it would kill him. It is not worth my job. I have money in savings along with the stimulus check as well as recieving employment each week we are fine waiting until it is truly safe. Once the Florida beach is open it will be like spring break all over again and that is my major concern. Please keep is safe. I understand some companies are ready to open but please list think about all the times you have vacationed at a resort and how many people you see and come in contact with.

AMERICAN OVERSIGHT

Pasco	Healthcare	I work in the main lab for LabCorp in Tampa. We need to open all healthcare back up essential nonessential surgeries, routine bloodwork etc. I can't see an OBGYN until June and I am having to suffer with the issues. I have a professor in need of hip surgery that has been postponed. My company is talking of cutting hours and furlough if things don't change. This is a medical laboratory we are needed but because elective surgeries are cancelled, Dr. offices going to telehealth visits and lab orders not being completed like normal we are suffering. Please open all healthcare because it may not seem essential for you but to us having to suffer daily with our issues until things open back up, it is essential for us.
Palm Beach	Recreation	Open the beaches with this rules - NO COOLERS - GATHERING NO MORE THAN 2 - KITERS, SAILERS, SURFERS, ALLOWED THEY STAY IN THE WATER AND THEY ALWAYS KEEP DISTANCE
Marion	Retail	Hello! I am writing to urge you to please take care in reopening the economy for retail business. We are still seeing increases in cases. Reopening too soon would go against government suggestions for a plan to reopen safely. I have worked from home for a month now with reduced hours, and I don't want this to be in vain. Please help protect my family and loved ones!
Brevard	Professional Services	I'm a single mother of two children. I manage a salon. I do not think it's a good idea to open back up this soon and be in such close contact with other people. As well as most schools and childcare are closed. How are parents about to go back to work? If we can not find childcare we lose are jobs permanently.
Lake	General	Open up! This has been ridiculous. All viruses can kill people. The flu kills more than any other. Yet we don't close everything and ruin the economy for flu statistics. We need to get back to work.
Orange	Healthcare	Good morning: As a Health Care Provider, I recommend to wear face masks as a law in every public place. Getting alcohol, sanitizer, and disinfectant wipes accessible at stores. Medical Insurances should be make TeleHealth approved to the services, including psychology services, such as psychological testing, until phase 2 is over. Testing for immunity should be released to the public as soon as possible, When we have scientists evidence based.
Palm Beach	Recreation	Closing the boat ramps effectively closed recreational fishing. Fisherman do not spread the Coronavirus. If they did, you would have restricted commercial fishing as well. How long is this going to go on for?
Hillsborough	Government	I don't think we are ready to open the state up. I feel this will cause an upswing in virus cases, causing unnecessary death and strain on resources. Please listen to our Doctors and Scientists regarding virus protocols.

AMERICAN OVERSIGHT

Orange	General	I strongly believe the stay at home order should be extended by 2 weeks to help further see the downturn of the cases. My mother is immunocompromised and opening the state on May 1 is going to put her and so many others at risk.
Pasco	General	I do not think you should re-open Florida yet. There are still to many new cases and to many deaths.
Clay	General	Keep Florida closed to at least mid June. If you go about this too fast we will be right back where we started.
Pasco	General	I do not agree with fully opening the state. Essential activities should remain until we get a better handle. Honestly can if the state opens I will not feel comfortable taking my family out to experience anything. The threat is still out there and is very scary. I value my family's lives.
Orange	Healthcare	We need to start testing everyone before we can start back to work. Where I work we have several elderly people, if I have antibodies I can go back to work without fear of carrying the virus and making the elderly people I work wit sick. We also need a task force that weighs the science and data then clearly communicates it to us without political bias. Thank you
Hillsborough	General	I am a hairstylist in brandon Fl and have my own suite and would like to re -open May 1 st and I will do everything possible to stay sanitized, 1 client at a time, wear a mask for me and client, also take their temperature, use disposable capes. I really would like to get back to work and also keep everyone and everything clean , safe, and sanitized. Thank you Stephanie Patterson
Hillsborough	Healthcare	Please respect the needs of Floridians and keep the state closed. I miss the parks. But for the greater good, a decent long term Florida, please do not reopen the state yet. Respectfully, Robin Morrow
St. Lucie	Food	I work in the restaurant industry and my jobs were flosed down to to go only. I have been working a retail job part time to help but it is not nearly enough to survive on alone. I need my jobs to ooen back up because. I'm going further into debt by being out of work. I having been working in all this since it started. I am convinced media blew it up and made it worse than what it is.
Orange	General	I really think it's not a good time to reopen right now. It's hard for us to cope with this virus and not being able to work and not having a pay check. More people are testing postive for COVID-19, some people show no sign of this virus opening open these states the spread of this virus is going to get worse. It's just putting more flame to a fire in my opinion
Hillsborough	Healthcare	I think there is not enough known about the COVID-19 virus. There is too much here and there. I have 4 children that I do not want exposed in any way to this horrible disease. There are still high number of people dying in nursing homes. What is the path of this disease and how long can it live on people's clothes and shoes and be tracked back home? For instance nursing home workers brining this back home and then it goes from there. It's too risky yet to te open the state.

AMERICAN OVERSIGHT

Hillsborough	Real Estate	Please give us until the end of May before reopening. Most small businesses operate in tight quarters and Florida is definitely not there yet with testing and numbers are still high. Productivity has increased tremendously by working from home. It's too early to reopen. Maybe beaches and parks but the risks outweigh the economy at this time. Begging for 4 more weeks before you consider small businesses opening. Majority are fearful for their lives at this point. Thank you.
Palm Beach	General	Please reopen palm beach county! Businesses must reopen
Pasco	General	Unfortunately due to backlash from the Republican Party as a life long Democrat I can not add my name. ! Yes I'm fear of what could happen to my family. ! Desantis I know and understand that you are UNDER Donnys thumb I respect that it's YOUR CHOICE to be a PUPPET This state needs to be COMPLETELY SHUT DOWN. I know people need to work. My kids lost their lawn business because of all this. So as someone who has always lived far BELOW POVERTY LEVEL I understand how desperate people need money. However if we are ALL DEAD not ONLY will there be NO ECONOMY but there WILL BE NO NEED FOR MONEY. ! Get your head out of your butt. DO WHAT IS RIGHT ! DO YOUR JOB !!! Or Ron YOU WILL BE A 1TERM GOVERNOR !
Citrus	General	Please do not rush to open. This has been difficult on all of us - but if we have to go back into lockdown because we rushed to open - well it will be even harder on all of us! Please listen to science and health experts . If you have a healthy population then your economy will come back strong! Thank you for listening
Pasco	General	Please do not re-open the state. Floridians are not practicing social distancing as it is, and too many people have contracted the virus as a result.
Orange	Tourism	Please can we stop being political about this - how are hotels still allowed to operate freely and yet short term rentals remain closed and when the Governors own legal team know that short term rentals are safer, enable isolation, enable pool families current stuck between homes to live somewhere, away from dense accommodation in hotels and resorts.
Pinellas	Food	May 1st is what we all agreed to, so I won't gripe Too much. I'll say this though, I truly believe that the entire state's businesses could be opened NOW. No restrictions, but continue following guidelines. Get it done.

AMERICAN OVERSIGHT

Palm Beach	Education	my son is immunocompromised, he has type 1 diabetes, it is extremely common now in schools and those students have to be very very careful. Please make it mandatory for masks in schools, hand sanitizers at every door in schools and the schools supply the hand sanitizer since parents won't be able to get it. Make hand washing before entering the cafeteria and meals. But especially allow virtual learning to continue if there is an outbreak in a school or if those students just don't feel comfortable going back to school just yet. This will allow them to be part of it but not be exposed. Thank you
Duval	Healthcare	Here in Jacksonville The Mayo Clinic is opening to appointments for advanced Parkinson's patience such as my wife. PT, Nuerology, opthamology are areas that appointments are available. Problem is facility she resides at has no process to get her to these appointments and back to the facility She resides at Beach House Senior Living 3015 2nd Ave North Jacksinville Beach FL 32250 I'm her husband and POA Sebastian Turso 904-509-3280
Pinellas	General	I'm not in favor of opening up the county just yet. We don't know that much about this virus and I feel so much safer just being at home I'm not in favor of opening up the county just yet. We don't know that much about this virus and I feel so much safer just being at home. I am retired on Social Security so it's easier for me than some people that have children and need to put food on the table go to work. So I'm very sorry, I guess I haven't really been much help I have mixed feelings about it maybe we opening with a curfew might help
Orange	General	All I have to say is don't listen to any Democrat's and open Florida
Hillsborough	General	Everything needs to open .use sense of health like was hands and use 6 feet rules !!! The roads are packed with people out there so open it up ..people are losing there homes because they are not working and the unemployment in not coming through !!!
Pinellas	General	I truly believe the only way to open our area is to test everybody for antibodies test ,everybody for COVID-19 until then I don't feel that we will be able to be safely accommodate in any tourist attractions any beaches or parks, any restaurants. We definitely have to accommodate our citizens with the fact that they would be able to be treated at a hospital facility in case of a second wave of this virus, at this point I do not feel that we are totally up to handling the amount of numbers in cases that could possibly happen if we open to soon. For me it has been challenging since I am a new resident to the area, so I am definitely challenged in meeting new friends since this untimely virus. I have called my physician to please have me screened for antibodies as soon as I can, I feel when I came back from New York after the Christmas holidays I had the virus. Please don't give into pressure from a few, I believe testing is the only way to reopen!!! Thank you for your time, Debbie Strong

AMERICAN OVERSIGHT

Orange	Healthcare	I work in a local hospital and we have made plans for the worst while praying for the best. We have seen many cases of COVID-19 but thanks to God not as many as was predicted. People in our communities have been very responsible. But we cannot carry on with so many not working. We must allow our citizens to go back to work. It must be done sooner than later or our problems will be much worse than the disease we are trying to prevent. Please allow people to return to work ASAP. Life and restrictions will be new and different but I have faith we will be responsible. COVID-19 will not just go away but we must find a way to move forward. Testing is increasing but I will take time. Research is occurring but it takes time to be done right. We must reopen FL and allow our citizens to be responsible. Continuing education is needed but I do believe most have got it and will react with caution as we go back to work, school, and enjoy the entertainment in our state. Praying for your wisdom.
Brevard	Management	I am a 1099 contractor worker who has been put out of a job due to the Coronovirus. I even added that piece of information on my unemployment application and it STILL got denied. Ive been waiting patiently while the website and phone lines do not work Please approve the 1099 contractor applications via the federal CARES act
Manatee	General	I'am an older member of my community, & all though I agree that the state can't remain closed forever, I do believe we have not given this virus enough time to stop It's deadly rampage. I look at Europe who have been under attack longer then us & they are just starting to try to get back to normal, whatever normal is today. They are still compelled to use mask & to obey all the rules that are in place. As of today from what I've read & watched on the news some in some areas it is returning. Do we want that here? I strongly feel we need to keep things the way they are at the moment & when we do slowly try to bring back our so called normal , that we keep many of the guideline in place & slowly relax them when we see the virus has not returned. People are scared, especially your older citizens. I realize people need to get back to work, but is it worth doing all this if we need to shut down again in a few weeks. Thank you. Please remember that Fl. Is made up of older people that have come here to enjoy the rest of their lives, & don't need to have it taken from us to soon. Thank you again.
Duval	Professional Services	I believe if you are thinkng to open hair salons, barbershops, nail salons, waxing establishments, tattoo parlors, and spas you may want to add someone from state board on your task force (head of cosmetology). All the above places have to most personal and unavoidable contact with people. I personally work at a waxing place and want to make sure the staff and our clients know the proper sanitation as well as safety precautions are put in place prior to open up.
Collier	General	Do not reopen until there is a cure. People have shown themselves to be irresponsible when it comes to protecting themselves and others. I see this every day as a grocery store employee.

AMERICAN OVERSIGHT

Seminole	Recreation	I believe the beaches need to be opened up but limited on number of people in each gathering. . A couple should be allowed to go sit on the beach and enjoy their day not have to stand walk bike or jog. I do not think movie theaters, bowling alleys, or gyms need to be open quite yet as they are breeding grounds for disease even on a good day
Sarasota	Healthcare	1.Please continue massive testing of as many people as possible for antibodies. 2. Also, protect your elderly, a large tax base, and immune compromised individuals as much as you can with public service television announcements. 3. Each day share public acts that model positive and helpful behaviors.
Miami-Dade	General	Opening the marinas and state parks including RV parks is likely the safest places to open up first. People who have boats or RVs can continue to practice social distancing within their own spaces/equipment. It helps get children out of the house to play while maintaining quality time with their family. A lot or children in miami do not have backyards or open spaces to go outside safely. An RV park is not the same as a hotel. Families can remain in their living spaces but have the opportunity to still be in an outside setting. Please re-open but under strict guidelines to social distance and not co-mingle with others within these locations. This gives us as parents a way to provide our children something to do besides watch tv and play on the iPad. Thank you.
Palm Beach	General	Please open parks, outdoor activities, beaches. Distancing, hours specific, for 2 weeks then losen up restrictions if things go well. We need to have more opportunity to release stress Open up outside dinning, open air retail and farmers markets. Inform people more of hospitalizations vs people getting virus. If there are few hospitalizations then we should loosen up restrictions. People that are at high risk need to be the most careful but we need to trust more that Floridians have more information now and we can make better choices.
Highlands	Healthcare	I know a lot of businesses are eager to start up again. But with the stimulus checks available to small businesses they should be able to wait until it is safe. What will they do if by opening right away they contract the COVID-19 virus? I believe it is too early to open the state back up. Better to be safe than sorry. We don't need another spike in deaths in our state.
Volusia	General	How about even and odd days for shopping/ restaurant/ boat ramps / maybe even schools businesses/ maybe by home address ? The should cut everything in half! Can't use license plats 2 cars in household could have even odd plate numbers. But drivers license would same address !
Charlotte	General	Time to fully reopen Florida. The infection rate is less than the flu; the death rate is far below other causes of natural death,including the flu. Just because NYC is a hot spot is no reason to shut down the economy. Quit being afraid and open up Florida. We will survive. It is not worth destroying people's lives and businesses because some government flunky is scared. Get on with real life.

AMERICAN OVERSIGHT

Hillsborough	General	Only when all citizens are properly tested and hospitals have all the PPE they truly need, then you can re-open. Right now we do not know the extent of who has the virus, who are carriers, who are asymptomatic. You are playing a numbers game. Our lives should not be so easily played with. Our hospitals are not properly equipped with the supplies they need. There are not enough test kits, not enough masks, not enough PPE. TGH is using MANICURE AUTOCLAVES to try to sanitize used N95 masks!!!!!! It is not working. It is premature to even think of opening up at this time. You put our lives in DANGER.
Duval	General	Though I want the state to reopen, because I am a small business owner, I fear that reopening prematurely will cause another wave of Covid-19. If we weren't prepared for the first one, we most certainly won't be prepared for the second wave because we've utilized a lot of our resources. I think is important that this turn around, we be very proactive. Florida wasn't tested as many people as northern states like NY and NJ, so I think the numbers bring reported are inaccurate. In order to save lives and prevent the spread, there needs to be mandatory testing on-site for businesses that reopen, in the first phase. Secondly, there has to be a log of people that go to businesses, so that if their test come back you automatically know who needs to be quarinteened and/or tested.
Palm Beach	General	Open beaches and parks. Golf courses and private clubs by their discretion. Restaurants - outside dining or take out Shops by limited capacity and/or appointment No to malls and movie theaters
Pinellas	Education	I'm in favor of reopening. I think we are capable of being smart about it.
Palm Beach	Education	Schools should either start in August by splitting the kids and doing odd and even days or half days. Some kids go in the morning some go later, maybe with an option of online learning as well for the first 3 months for any parents that don't feel comfortable.
Volusia	General	Based on a plethora of information available, this pandemic was overblown and wreaked havoc on our livelihoods, economy, well-being. It has been proven that it is in line with the yearly death toll and infections as the flu. Most citizens adhere to common sense practices of frequent hand washing, cleaning surfaces, covering our mouth when coughing/sneezing, not going to work or out on the town sick and staying home. We don't go near our elderly or immune deficient family members to keep them safe. We don't shut down our economy and force house arrest based on false models and 2 doctors. Dr Fauci is a proven fraud. Covid-19 has a less than 1% mortality rate in this country and we should open our state/country by adhering to safe practices. I have an autoimmune disease and do not take chances that threaten my health. I also take hydroxychloriquine with no known side effects. I am for the use of that drug to treat Covid-19 patients. Please open Florida so we can get on with our lives.
Martin	General	I think 🤔 they should open beaches and state parks with social distanting in mind. Boat ramps. See how that goes. Then, places of business with social distanting in mind. Find vaccine and cure as soon as possible.

AMERICAN OVERSIGHT

Palm Beach	Education	My opinion as a teacher in Palm Beach County for over 20 years: Do not re-open schools until December or January of 2021. My suggestion: Begin in January with re-opening all K-12 schools as "year round" and extending the school day by one hour each day. This model has been previously used in multiple school districts.It would take approximately 1.5 years to get back on our regular schedule for 180 days, with summers off. The upside is that students as well as faculty could be safe from a recurring bout from COVID-19, which is highly likely in the fall. I miss my students so very much and I know they and their parents may be struggling to keep up with the technology. However, the health and welfare of my students comes before their education. Since technology is available for online learning, we should not risk even one student, or faculty , for the sake of opening schools in the fall. Thank you for allowing this open comment portal.
Palm Beach	General	If the use of facial masks, gloves, and social spacing continues, i believe more business should re-open. If you go to home depot or lowes, the stores are full of people. Everybody is wearing masks. Is the virus spreading at home depot or lowes? I think not. The elderly or people with weak immune systems should still avoid people. Other people should be allowed to return to work because the economy needs to move forward. Another big problem is that many people I know have not received any unemployment benefits and have been out of work for over a month. These people are not screaming yet, but that is around the corner. I have heard, high temperatures and high humidity shorten the amount of time dramatically that the virus can survive outside the body. Is this true? I think it is time to ease restrictions in Florida!! Keep masks and social distancing as a strong message moving forward. Sincerely, Herb Beck
Palm Beach	Manufacturing	Thank you for allowing your residents to speak . We all are eager to get back to work and back to some normal life . We are stuck in our homes with our children for weeks already. California opened their beaches this weekend and we don't have anythubg open yet . This is taking to long , the virus will not disappear , you asked Floridians to flatten the curve not wait for the end . Curve is flattened , hospitals are fine and we all know majority of people need to get this virus and I'm sure a large percentage did during Super Bowl this year . We are ready for normal activity and life .
Pinellas	General	Hello Governor DeSantis,can you possibly find a safe way to open the gyms?I don't see how liquor stores are considered essential and gyms aren't?.Dont get me wrong,I am glad they are open but exercise is essential to the well being of some people.I am not a runner and my job requires a lot of heavy lifting and the gym is essential so I can continue to do my job.Thank you,Deena Collamore
Duval	General	I would suggest to please push quick & easy antibody testing. As you know, those tests in some of these large metro areas are showing millions have already had it with little to no symptoms. If you extrapolate that to the entire country, its likely tens of millions. And if so, it sounds like we reacted to the tail end of this thing only once regular covid testing ramped up. Without that antibody testing, we can't fully understand what we're dealing with & the continued shutdowns in general could very well all be for nothing.

AMERICAN OVERSIGHT

Hillsborough	Healthcare	Do NOT reopen the state too soon. In the 1918 flu pandemic the first wave killed 3 million... the government was pressured to reopen too soon and the second wave killed 30 million... those who ignore history are doomed to repeat it.. another 4 weeks may save countless lives and not overburden our healthcare system. Carole Pettijohn, Ph.D
Indian River	General	Quarantine the sick and elderly and fully reopen everything else. This 'cure' is far worse then the problem.
Osceola	Food	I feel that when the stAte does reopen the DBPR needs to look at buffets, self service drink stations, self service condiment stations and make it mandatory that all places have a hand sanitizer dispenser at the front doors. Being that I work in the foodservice industry/sports and entertainment industry I thank Florida will be looked at closely to see how we handle foodservice at the theme parks to protect the guests.
Hillsborough	General	Thank you for being honest and careful! Praying as you move forward, that it will be With much prayer and wisdom as how to go back to normal. Normal should look Different and we are depending on those of you who know the facts to make decisions based off of what the educated advisors recommend. Again thank you for leading us SO well. We trust your recommendations and know that you will move with caution to protect the people in the state of Florida.
Orange	Healthcare	Please don't reopen Florida right now. The essential stores are trying their best to keep people 6 ft apart, however I've seen areas where it does not work. Florida has a large population of vulnerable elderly people, that need to be protected. I have asthma, I think a rush to open hair, nail salons and the theme parks will be a devastating mistake.
Seminole	General	I think Florida should open with caution. Take temperature for workers and people entering the stores.
Wakulla	Government	Premature opening of business as usual has too high risk of a second, serious wave of infections that will result in repeat shutdowns, so in the end, we have more people harmed and greater damage to our economy and tax base for local governments.
Pinellas	General	I feel that we should open up in stages, as is being planned. But we need to figure out how to get the proper supplies available, like: Lysol spray, Clorox wipes, paper supplies, etc. These items are so essential in killing germs, yet they are no where to be found in stores or online anywhere. If we are going to be open, we need to have these available. Also, all public venues should have requirements in place to be sanitized properly on a daily basis, And should be required to protect their employees better.

AMERICAN OVERSIGHT

St. Johns	General	Governor, I am sure this has been a nightmare for all of us. But at some point we have to start opening up our State. Start with the smaller business that attracts smaller crowds, like small retail, bakeries, ect. Proceed to bigger retailers, hair salons, nail salons, but put in place social distancing, mask, and sanitizers. Then proceed to reopening of restaurants. Making sure there is space beteen customers of social distances. I want to commend you, that you are doing an excellent job for all Floridians . I pray that the right decisions will.be make by you and your task force. God Bless you for your service and dedication. Mrs. Bobbie Jean Spangler
Columbia	General	Open everything back up. Covid-19 doesn't appear to be any worse than the Flu. This is stupid. Get our state back open!
Pinellas	Professional Services	I am a licensed hairdresser of 49 years who has spent a couple hundred dollars on sanitation items. Our salon will make it MANDATORY to wear face masks and use hand sanitizer. We will keep number of people in salon to a minimum. I am ready to go back to work. But then on the other hand let's watch Georgia and see what their numbers do. I trust what ever decision you make Governor.
Sarasota	Government	I think they ought to wait a week or two and see how things are going and if the virus is dropping. Make sure people wear masks for a couple more weeks and see how that goes.
Palm Beach	Education	I am a preschool teacher..at risk due to age/asthma. Social distancing and hand washing are important to me. Opening up the state of Florida I believe should be "slow as you go"...businesses need to continue to sanitize, appropriate distance for customers,...open beaches should be for exercise only with common sense..so want the State to open Thank you and be safe.
Pinellas	Construction	Open public venues last!Movie theaters malls restaurants parks and beachs ect and ENFORCE public distancing. Grooming and beauty, appt only and strict mask and glove for provider and clients. All others strictly enforced social distancing discourage shopping as entertainment,

AMERICAN OVERSIGHT

Orange	General	I am a nurse--a nurse educator. I understand the concept of social distancing but there has to be a happy medium. Nursing schools must be allowed to have nursing students in the pipeline so that we have nurses in the future. We can't be on lockdown indefinitely. I suggest the following... -mandate masks in public for a time so we can move on with our lives. -Continue social distancing but NOT closures. -Encourage business to have workers work from home but allow business to open. I can shut the door of my office and wear a mask. Social distancing would be in place. The entire building does not have to be closed. -Allow laboratory skill experiences in nursing schools and other healthcare programs to continue with social distancing in place. -Allow student nurses to return to hospitals or we won't have nurses in the future--then what??? No nurses, no doctors, no healthcare providers then you really have a problem in a year when they should be graduating. -Mandate that people who have pre-existing conditions/risk factors to stay home--not everyone. -Save the economy. My theme park friends are in fear reading that the parks may not open until 2021 because of the opinion of an "analyst." Allow the "imagineers" to reinvent the experience at least temporarily. That's what they do. Open the parks with limited attendance to start. -This is like a pressure cooker, the longer everything is closed the more people will explode on the scene when restrictions are relaxed. --This is unsustainable-if south Florida is problematic then restrict south Florida--not the entire state. Target problem areas, not the entire state. We can't continue to be imprisoned in our homes. If someone is afraid or at risk, they do not have to leave the house. Allow the rest of us to leave with social distancing guidelines in place. We have curfew in Orange County? Really? This is over the top. Thank you for your time and interest in my comments. Thank you for trying to find a way for us to get on with our lives.
Miami-Dade	Education	Good morning, I think it would be selfish to reopen Florida. The misleading information that we are flattening the curve is absurd. You stopped test and that is being negligent to the people that elected you. The people arguing for the state to reopen are selfish because it will not affect them. They are arguing for others to go back work and for selfish reason and putting these people in danger. If you want to reopen then set a mandated curfew and go follow other countries leads and sanitize street. Put in requirements of procedures for business to reopen. Care about the essential workers!
Polk	General	Even though it is an inconvenience with everything closed, and having to stay at home, I believe that in the best interests of ALL Floridians, it is prudent to make sure that it is safe before opening up the state. If it is opened too soon, more people will get sick, more people will die, and we will have to stay at home that much longer.
Polk	General	Florida must not open until the Federal guidelines for reopening are met. These guidelines have been set by Dr. Fauci, Dr. Birx and the CDC in order to keep people safe and need to be followed especially because of the older population in the state.

AMERICAN OVERSIGHT

Pinellas	Recreation	gyms, fitness centers, and places of physical activity NEED to be reopened under guidelines as they do more good and are necessary for peoples mental health and well being under times of stress. We have family members who are recovered substance users who rely on their ability to workout strenuously as a key ingredient to their daily sobriety structure. Isolation without physical activity and release is a long term major problem for a subset of Florida's vulnerable community. Please consider this in your evaluation.
Hillsborough	General	Please do not reopen the state. Until proper testing can be.done.
Clay	General	Everyone should be mandated to wear mask in every facility. Hand sanitizer stations through out store or building. Continue 6ft social distancing and limited number of people in building at a time. Restaurants have to have one empty table in between guest or follow the 6ft guideline. Any medical facility (not including hospitals) should adhere to the social distancing, limited amount of people in waiting/lobby area, and have hand sanitizer available to patients.
Osceola	General	Too soon to open. Needs more testing. Wait for few more weeks to see cases go down and open in phases as recommended by WH. Must close beaches also till then.
Palm Beach	Recreation	I am in country club member services . I just have one suggestion and that is open slowly and cautiously. In the manner we closed one step at a time . My members are older and many have underlying health conditions. Start with golf course Thanks Cathy
Palm Beach	General	I would encourage you to re-open Florida as soon as possible. There is absolutely no evidence that lockdowns are beneficial, and the economy is being destroyed.
Hernando	General	You should open anything outdoors first. They say the virus doesn't do well in sun and heat. So why not open park's, beach's anything outdoors and then move forward from there.
Palm Beach	General	It is waaaayyyyyyy too soon to open the state.
Duval	General	Florida needs to reopen May 1st. Some businesses will not survive if they stay closed. People need to take responsibility for themselves if they don’t want to get sick and keep social distance and wash hands. The virus is here to stay, we have to learn to protect ourselves on our own. Open back up please!!!! We can’t do this much longer!
Martin	General	Open up with social distancing now. The numbers do not justify destroying our economy.
Pinellas	General	The governor is obviously working extremely hard. First he is in charge and he needs to get this unemployment situation resolved. Then people need to understand if we have a slow startup program and they think it’s wrong that’s ok. They don’t need to go there. This is not hard to understand. I’m just concerned the possibility of a revolt against this whole situation could happen anywhere and anytime and we don’t need that

AMERICAN OVERSIGHT

Orange	General	I believe that the communication has been repeated enough. It's time to get back to work and open this economy back up. Yes we need to wear face masks, keep sanitizing, and practice social distancing until June 1 but we also need to be aware of our surroundings at all times. We cannot continue down this path or our suicidal rates will increase, more crimes will happen as people need to take care of their family, pay their bills and eat. If the government can continue to hold us on lock down then maybe they should reach into their pockets and pay us all what we average income weekly. Open up Florida please.
Palm Beach	General	Florida needs to follow the guidance of public health organizations when it comes to establishing a timetable for safely reopening. We cannot sacrifice our family and friends (or lay down our own lives) for the sake of industry. Many people will not adhere to social distancing guidelines and prematurely reopening will cause another devastating wave of infections. Please exercise caution and use the most conservative schedule in order to protect our elderly and vulnerable citizens.
Palm Beach	Education	Keeping kids well when we all go back to school is key. Too many kids are sent to school sick already on a daily basis, many kids have no options to go home as parents are working so they are sent back to class and the germs continue to spread. It is not the teachers fault and the schools nurse job to babysit sick kids. There needs to be a firm sick policy in place that is abided by. Secondly the emotional support and well being of kids and staff returning to school one day is the goal. Kids are so receptive to everything around them, if the staff isn't equipped and ready for their return they will feel it. Kids will have experienced something unprecedented in their lives, we can not pretend to let them back in the building and immediately return to standardized data mining. I'm hoping we can give time to process what the last months have meant.
Palm Beach	Recreation	Good morning I would open up marinas for boating first – and then second open boat ramps. But I would keep the sandbars closed Thank you
Sumter	General	My husband and I are in the immune compromised category. We have been Floridians since 2004. It is our suggestion that children return to school and businesses reopen immediately while advising immune-compromised people to practice all of the safety requirements including masks, restricted travel, restricted interaction with others, and common sense cleaning habits. The majority should not suffer loss of jobs, school, and livelihood for the elderly or immune-compromised. It is like the "tail wagging the dog". Thanks

AMERICAN OVERSIGHT

Pinellas	Tourism	I am 6th generation Floridian...I'm sure you can tell by my last name!! I live, eat, sleep and breathe FLORIDA as I have my entire life!! As my ancestors have as well! We are restauranteurs in Tarpon Springs, FL. Please let us open back up soon, our employees are literally starving...take out does not pay the bills. We are so proud of how you're handling this. However, we've already missed the end of tourist and snowbird season...our busiest month of the year... we were forced to close ....ENOUGH has been taken from us!! RE OPEN FLORIDA NOW LET US HANDLE AND APPLY THE RECOMMENDATIONS SAFELY OURSELVES!!!!! We can do that!! Most citizens can be trusted to safely continue living!! Don't let less than 6% of the population continue killing the ones who were thriving. Thank you!
Manatee	Information	Open the state of Florida. But keep the beaches closed and limit all tourist activities. We must limit the spread from other states.
Pasco	Food	As a restaurant owner, I do see the need to open up .However, considering the number of cases has not declined I feel people would still opt for takeout. I am a fifth generation Floridian and teacher but I fear Floridians will not adhere to guidelines. We need to get the economy up and running but we do not want to go backwards. If people were able to receive unemployment checks and proper funding it would lessen the stress. I believe Georgia was extremely irresponsible. Many businesses will not be able to staff up due to the fair of the virus. I have personally known, four people who have passed from this virus and we do not want to continue to see deaths. In other words, it needs to be done slowly. Shutting the schools was the right move but what are the parents going to do with their children when they report back to work? I voted for you, but am disappointed on how you have handled this situation.
Duval	General	Regarding reopening the state of Florida: Business need to strictly limit numbers and proximity. We know that AC spreads the virus in a contained space, so we need to be massively cautious with restaurants. Stage one -Outside seating is an option in FL. Outside seating only - distances of 6 feet between tables. Enclosed places of business need to limit numbers like the recommended 10 people maximum. This includes staff, so businesses need to consider how to reopen their closed spaces maintaining the 10 person max and maintain distance of two arms length between people. MASKS for everyone. Every establishment must require their customers and employees to wear a mask at all times. This is essential. Employers need to encourage work from home if possible. It will be massively unfair to force unemployment on workers who 1) are immunocompromised 2) live with or care for compromised family members 3) have children out of school.

AMERICAN OVERSIGHT

Pasco	General	The entire state needs to be reopened with the emphasis on protecting the elderly and folks with preexisting conditions. Hospitals, beaches and parks need to be opened immediately and safe distancing rules need to be advocated and enforced. Restaurants, bars, movie theaters and the like should reopen with a 50% capacity with spacing emphasis. The 50% rule should be lifted after 30 days as we see our cases continue to decrease. We can do this, we need to get back to work! Just give the people the rules they need to adhere to and we will do the rest.
Palm Beach	General	We need to open the beaches and parks up soon. The beaches on a limited time basis 6/10 am and 4/7 pm would work just fine. People use the beach to find there sanity by walking, running, fishing or surfing. No gatherings and practice public distancing and it would be just fine. The same goes for the parks, not being able to play tennis is ridiculous. How much farther apart do two people need to be? Again the stress relief this sport provides is very important during this time. Thanks for listening, Mike
Palm Beach	General	The numbers are still on the rise. I do not believe the governor nor the news reports, I've heard from several health care workers. I do not believe anything should be open until we have a decline, which we do not at the moment. Does Florida even have enough testing? I know they do.n't because I was one of those who was at high risk but could not get tested. Two weeks later, I am finally well
Hillsborough	Healthcare	Please consider carefully the lives if those caring for the public. I am a nurse and work in a hospital with sick pregnant and newly delivered mothers and babies. Please protect this vulnerable population - their health impacts our whole community. I believe we can protect them - and ourselves- by continuing social distancing, mask wearing, and staying home as much as possible until there is sufficient testing to show who has the disease, who doesn't, and who is possibly immune. Thank you for your consideration.
Highlands	General	Please consider opening up Florida's economy with keeping in mind those counties with high numbers remaining on stay at home. Nursing home and ALF's must remain on lockdown and limited visiting to hospitals. I am fortunate to be in an essential field of work and still able to work everyday. But there are many that aren't, my daughter for one works in a dental office and has just started collecting her $92 a week unemployment which doesn't pay the bills. I have many friends who own restaurants and are losing their livelihood. I understand covid is a dangerous virus but so is the seasonal flu. Our Country never shut down during any wars, Spanish flu pandemic, measles or any other disease or dangerous world event. Those that want to remain "stay at home" can, their choice. We all should have a choices. We have to get back to some form of normalcy to save the Florida we know and love.
Manatee	General	I think it is too soon to open Florida. I think we need to wait until at least the end of May and see where we stand at that time as far as new cases. Once we have leveled off some, we can possibly do a partial opening and require masks when in public.

AMERICAN OVERSIGHT

Manatee	Professional Services	My wife and I currently own and operate 10 hair salons in Manatee, Sarasota, Pinellas, Charlotte and Desoto county. We are Franchisees of Regis Corporation the largest operator of Hair Salons and Barbershops in North America. Regis has nearly 400 locations in Florida, has been doing business for over 25 years here and wishes to continue for many more years and they have asked me to be their advocate with the government on reopening salons. Regis has worked in cooperation with Epidemiologists at the University of Minnesota to develop a complete reopening plan and customer journey. We would like to share this with Governor DeSantis' reopening committee but are not sure how to do this. Can you put us in contact with the correct person. We want to be proactive and not reactive in this process. Thank you in advance.
Duval	General	Please continue to be one of the lead states in opening .... with the proper precautions every thing will be fine ..... the problems of a shut down economy will be much greater than COVID 19. Artificially manufactured fear by our media has been our real problem ... time to show real leadership.... thanks
Sarasota	General	Please be patient in opening Florida. The largest demographic in Florida are those over 65,, and they represent a very vulnerable Covid 19 population. However, our younger residents are at risk also. Hospitals are seeing young people in their 30's, 40's and early 50's gravely ill with Covid 19. Devastating strokes are occurring in the younger population with Covid 19. Wait as long as possible, before opening, at least until after the summer vacation season, where an influx of visitors will bring more cases of Covid 19, and tax our hospital system. It's good common sense to wait!
Duval	General	Hello yes I'm very concerned about the reopening of Florida. At this time I don't think it such a good idea. I feel if we start to reopen the virus will come back fierce because nobody will follow any rules put in place . I think we should at least wait till the middle of May.
Duval	General	I would say for places like Duval and Clay counties it is time to open up childcare facilities, church programming, and ability to operate summer camps. Jacksonville's case percentage is one of the best in the country, and I think we can both safely social distance and practice these things. Restaurants can open up with a capacity number and other activities should be able to resume with some sort of social distancing as well. The virus is always going to linger around and this should not make us fearful. Just like the flu and the common cold it is not going anywhere. We can get back to a new normal while keeping those at risk safe, and I trust Governor DeSantis to make this decision to benefit both those that want to get back to normal life and protect the most vulnerable.

AMERICAN OVERSIGHT

Palm Beach	General	Until we have a proven vaccine that a high majority of our population has taken, I do not feel like we our safe to open Florida to many of the things we are used to. We have an elderly population that is vulnerable. While we are dependent on tourism, that is one of the reasons why we had more cases. I will not be comfortable eating in restaurants, going to bars or entertainment venues, getting my hair cut, etc. for a very long time. This might not happen until 2021. I see myself wearing a mask in public until this time. I'm currently working from home. I am in my early 30s with asthma. I do order takeout from local restaurants. The more open Florida gets the less I will be able to order takeout and go to the grocery store out of fear that I am around too many people.
Sarasota	Food	Hello, I've been planning a baby shower for my daughter at a country club, which was suppose to have been last week, and we now rescheduled it for May 3rd. The country club has been very patient with me trying to give me an update if they can open up on May 3rd. I know this isn't the most important matter, but I need to start planning a drive by shower if need be. Thank you Governor DeSantis for doing such a great job.
Pinellas	Recreation	When r they going to open Honeymoon Island? We have yearly passes. I have never seen any large groups of partying going on. Being outdoors in the humidity is the best thing for people and the virus doesn't last long outside. Please open it up,
Indian River	General	If we reopen too soon, we will get hit with another wave of sickness.. we need to be the turtle in this race not the hare. We have broken the stigma of us being the next epicenter, lets not prove them right. The government acted slowly in fl, but due to local municipalities reacting we have possibly flattened our curb. We need to enjoy that victory and not put our population at risk..
Sarasota	Government	I am ambivalent about opening the beaches, however if doing so it is blatant discrimination to keep parking lots closed. It feels like the opening is to accommodate only those who have the ability to live on the properties adjacent to the ocean. I am outraged at Georgia's governor for his short sightedness in opening the most at risk businesses. I strongly urge my state government from making the same asinine decision. My hope is that when we start reopening, we will do so in a thoughtful well planned way as so to not lose the gains we have made and the lives that were saved by all our sacrifices. Thank you, Julie Weiss

AMERICAN OVERSIGHT

Brevard	General	Florida is not ready to reopen. Widespread testing, as identified in the federal gating criteria, has not occurred. Barely 1% of the residents in Brevard County have been tested, and the vast majority of those who have been tested are those with the transportation, health insurance, financial ability, and information access to do so. Those who work(ed) in the hospitality and service industries may have none of those yet will be in high contact with the remainder of the population. There is also still a huge shortage of PPE which will affect the ability of medical and dental procedures. I'm a three-time cancer survivor with kidney disease and would like to have the confidence that if I need serious medical attention, the limited PPE will be available and not have been used by those wanting face lifts, tooth whitening, or breast augmentation. I also know that due to the stay-at-home order, fewer cars are on the road, which results in fewer car accidents. When normal activity resumes, more crashes will require the use of that PPE. Please keep your elderly at-risk population in mind -- we vote, and we don't like the idea of this "death panel."
Pinellas	Government	I'm getting really tired of this whole unemployment bullshit. Over 1 month without an income, Still pending and we have no income coming in. Are you going to pay my bills, Rent, and feed my kids!? I highly doubt it.... Either fix the damn system or open the state back up so my husband and I can get back to work to provide for our family!
Polk	General	Florida should not reopen until at least mid June and everyone should still practice social distancing and wear face masks and only go out if necessary and please fix the unemployment so people can pay their bills and rent. Thank you.
Clay	General	Don’t ReOpen. Period
Lee	Healthcare	Please follow the science during this pandemic. Our Florida cases are spiking so we need to stay home and keep trying to flatten the curve. This is not the time to open up yet.
Clay	General	It's too soon to open. I understand that the economy needs to function but what happens when everyone is infected and businesses have to close due to no employee's. This is big. Please continue to stay home precautions for a while longer. It will benefit everyone. Thank you.

AMERICAN OVERSIGHT

Hillsborough	General	Please consider these issues when re-opening. First that it's way too soon! I used to work for Amazon in Tampa. And because I have underlying health issues that put me at risk? My last day with them was early March. I made a choice. My life or my job. Because Amazon does NOT adhere to cdc guidelines in those warehouses. At all! They don't care. It's looking like us little people in poor household communities also aren't going to be cared about either. I'm not a tourist. I'm also a full time college student at age 55. I'll be damn if a dangerous virus kills me. I haven't left my home in over a month because of this virus. I feel like a target with everyone saying that us older people will die anyway. I'm frightened that society thinks that way. I'm frightened that tourists are more important than residents. I have no health care. Thanks to Scott who didn't expand Medicaid. I lost my health insurance and cannot afford it on my own. I can't get tested because of it. So I am at home and too frightened to go anywhere and be normal now. If you open because of tourists? Without caring about the older population like myself the virus wins. Tourists and theme parks can stay closed for all I care. I'm worried about the huge poor population like myself and others that have no access to health care and can't afford to catch this virus. Because stores aren't abiding by cdc rules. Work places and theme parks will become Petri dishes. I can't go back to my job because it's a close quarters warehouse at Amazon. A petri dish. Please don't let desperate corporations drive the decisions of reopening. Take care of us residents first please! I want to start my bachelors program in school. I don't want to die alone in the hospital because I was forced into the public again. Because the public doesn't care about the vulnerable and senior citizens now!
Palm Beach	Tourism	I would like to see Disney open back up, perhaps with a much lower limit on capacity. Possibly even rotating the parks that are open instead of all open daily. Maybe start with resort guests or Florida residents. Virtual line for the rides that routinely get a long line. Disney could also permit face covering and masks.
Seminole	Professional Services	I think most businesses bars, restaurants, hair salons can open with appropriate social distance and sanitary conditions in place. For example our church holds 1200 people. I'm sure the parishioners would rather stager the amount of people at each service rather than not attend at all. My daughters wedding was cancelled. I would have agreed to a smaller amount of attendees rather than cancel. Most hotels etc in their ballrooms can accommodate smaller numbers in a larger space rather than cancel and close. Personally I have 2 children who are front line health care workers and one child in retail who has lost her job. Neither situation is a good one. Thank you for tour efforts.

AMERICAN OVERSIGHT

Palm Beach	General	RE-OPEN THE STATE! People who are losing their jobs, houses, apartments, etc. will be and already are unable to afford food, medication and other necessary items to survive which would clearly be worse than this virus. A virus in which no one actually knows the true prevalence. The prevalence is likely much higher according to multiple studies which would make the mortality rate similar to or less than the seasonal flu. Not to mention, who are you or anyone else to tell one person their business is essential while telling someone else their business is not essential. If you depend on your business for a paycheck, IT IS ESSENTIAL! If people can go into a grocery store with a mask on then they can go to the gym or any other business with a mask on for that matter. As far as kids go, they need to be IN SCHOOL. It is well documented that students do not learn as well when they are not in a classroom with peers. At home, they have multiple distractions that inhibit their ability to learn. While this last bit is more of an opinion than anything, I find it interesting that most people who are complaining that places should remain closed are people who's paychecks are guaranteed regardless of whether business re-open or not.
Pasco	General	I'd start with opening the parks. Let the people get out for some fresh air. Next I allow all charitable orgs to continue normal operations. This includes charity thrift stores such as the Salvation Army. The closing of their stores not only hurts them, it hurts the people in need which they help every day through their programs. The elderly and those considered "at risk" should continue to stay home at their own discretion.
Palm Beach	Real Estate	OPEN THE STATE!!!
Hardee	General	I know this is an extremely tough time for everyone. I am an elementary school teacher here in Florida. While transitioning to distance learning has been trying, it was the best decision to protect our children, which is a teacher's main focus. That being said, I understand this pandemic has impacted us all in a different way. However, even though each demographic of FL is different I think it would be detrimental if we open different counties at different times. Why you may ask, if one area is open and others are not we are going to see an increase of people into those areas. These people may still be asymptomatic which will only continue the spreading of the virus. As many of us have personal experienced this virus comes on fast and it takes the lives of our loved ones extremely fast! Please continue to protect Floridians even if this it isn't the popular opinion. Lives are more precious than economic growth at this point in time.
Pinellas	General	We need to start opening up ! People need to work ! Unemployment isn't working to help anyone . Can open up with some restrictions but give people a chance to act responsibly.
Seminole	Tourism	I live in Seminole county but work in Orange in the tourism industry. I am also what you would consider a vulnerable person. I think we need to go by the guideline that were put out by Dr. Birx from the task force. I know our numbers fluctuate alot due to testing but I would like to see that 14 day decline before we go into phase one and so on.

AMERICAN OVERSIGHT

Duval	General	We can not safely open until citizens can obtain items such as disposable masks, HAND SANITIZER, rubbing alcohol, and portable disinfectants such as Clorox wipes. How can we clean off without hand sanitizers?? I work as a traveling therapist, and I rely on using public restrooms throughout the day. I am VERY uncomfortable going back to work without these items to help keep me safe. I want to open our economy ASAP, but please bring back the essential items to keep me safe!!
Duval	General	I want the state of Florida to open next week. Please just open the state of Florida to all non essential business on May 1st . Please open the economy.
Orange	Government	The issuances of new IDs needs to happen again ASAP. I feel this could be achieved with offices reopening solely for things that are unable to be accomplished by internet and only by appointment.
Clay	General	Please provide government support for helping businesses get the PPE and safety supplies they need to open including masks for employees and for patrons that do not have them. They will need hand sanitizer for everyone and it is out of stock everywhere. The health department needs to require surfaces like tables and chairs are sanitized with bleach between customers and unfortunately bleach is no longer available and needs government action to support businesses. I encourage keeping senior hours for vunerable population who need to remain separated thru most of the phases Tourists need screening as they enter the state. Cruise ships need more regulation to prevent infection spread on their ships
Hillsborough	General	I ask you to reopen beaches and public parks immediately. As long as people keep distancing there is a minimal chance of transmission. Compared to the constitutional temporary violation of depriving citizens of the opportunity to move about this is more than adequate now. The virus will be diluted in open air air sunshine will destroy it so activities in open air need to be enabled again. Don’t delay this!
Polk	General	I am appalled to hear that every time someone who tested positive was retested it could Ed as another case. So our numbers are incorrect. Add to that if you die of any cause but had COVID it’s a COVID death it’s time to get back to work. This state needs to open up.
Manatee	General	What talking points can you provide for business owners to ensure that the general public is complying with established, protective guidelines such as safe distancing and wearing masks? And,I’ll food establishments should have hand sanitizers to clean their hands upon entry and exit. Due to the shortage, work and obtain these products?
Citrus	General	Please open only with cdc full approval and restrict your tendency to open beaches as you did for spring break. That mistake probably cost lives. A second spread could cost the state two or three years of recovery and life won’t look anything like we have been used to. Resist the urge to open for the sake of lost profits, lives matter more.

AMERICAN OVERSIGHT

Manatee	Food	My husband is 66 years old and has SEVERE COPD/emphysema. I am a 46 year old woman who doesn't have a spleen due to a car accident years ago. We're both high risk so we're staying home and having groceries delivered. My hours were cut at work and after 3 weeks of less than half of what I would normally make in a week my husband and I decided it was not worth the risk of me bringing the virus home to him bc it would be a DEATH SENTENCE no doubt about it. I have ONLY left this house for absolutely essential business. Otherwise we stay home and have since mid March. We do NOT think Florida should be re opened right now. With 30,000+ cases n our state and rising everyday and with such a huge elderly population here n our state of Florida we need to stay home for now and until we have at LEAST 14 days of consecutive decline in cases we shouldn't even consider opening this state back up. Thank u for allowing me an opportunity to give u my input.
Sarasota	Healthcare	Hello sir, Where are the statistics for the number of deaths diagnosed with the secondary code, U07.2, "for clinical or epidemiological diagnosis of COVID-19 where a laboratory confirmation is inconclusive or not available"? Also, please advise how to receive unemployment benefits and how we are supposed to complete work search during a lock down, where most places are closed and not hiring. Also while being temporality laid off, people do not want to hire me because i will be going back to my regular job soon. Please advise Thank you, Josh
Orange	Information	I think it's not safe to open up when Poeple still dieing n get sick.n some are not following rules that already in place . i understand poeple want to go back to work because of the unemployment issue but if we open to early we be ready back where we started but in a worst place please gave it 2 or 3 more weeks with the stay at house n hard curfews
Escambia	Tourism	Bring back our booming economy. Let people work again. Let people live again. Perspective matters. There are other far worse death statistics that we should be doong something about, too. Thank you!
Manatee	Recreation	I do not think we should reopen the state too soon. I believe we should close until May 15th at least and then reevaluate opening.
Hillsborough	General	It's time to have a meeting with all county executives to assess the ability to implement re-opening based on White House Task Force guidelines. In counties under control, allow hospitals to start doing elective but medically necessary surgeries (e.g. cardiac stents, etc.). Allow beauty and barber shops to re-open with strict guidelines and by appointment only - this will boost citizen morale. Open up all food, grocery and medical supply chain businesses to restock shelves in accordance to guidelines. For the remainder of businesses, assess each county based on the phases (Phase 1, Phase 2, etc.). Publish map of each county based on phase ranking - publish and share to social, print and digital media.
Duval	Management	it Is too soon to reopen

AMERICAN OVERSIGHT

Seminole	General	You have to give businesses the opportunity to open with public distancing. People are free to stay away if they feel they are endanger, but destroying the economy isn't fair and unamerican. People that need extra protection can take additional measures and avoid certain places. Everyone else is suffering financially and emotionally because of an over reaction. Kids are out of school for no reason, it is totally ridiculous to make everyone suffer because if a few. These new antibody test prove that there has been a massive overreaction. The death rate doesn't justify the actions.
Palm Beach	Recreation	Open up parks for walking ,running and biking. Open up beaches for walking ,swimming and sitting 9 feet away for families. No play ground play. People need an outlet!! Boating with no tie ups or sand bar
Lee	Recreation	Please open the BEACHES. Just OPEN them .... but, make announcements on our news stations, run commercials, put signs up EVERYWHERE along the Beaches "urging n advising" Everyone to be caut8n try and maintain safe distances from ea other and that " IF" Lee County sees a abnormal spike in Covid19 New cases n or deaths ... the Beaches WILL be closed again for 1 month ! For 'many' of us, the Beaches are our escape our stress relief (till someone puts their towel right next to yours n lights up a rotten smelling, cancer causing cigar or cigarette) N open the Movie Theaters, just have them LIMIT the # of guests n restrict (blackout, if you will) the seats that are available. N if you read this, I'll eat my dirty ol' hat
Manatee	Healthcare	My mother is a resident of an assisted living facility. I appreciate and understand the measures in place to protect these vulnerable people. But after 6 weeks of lockdown and no cases at her residence, can there be a plan for these citizens to interact and see others? Even if it was with masks & a 6ft distance, she would benefit from being able to associate with others. I was seeing her 3 times per week before the lockdown, taking her to church each week, and even at a distance, with masks, staying at her facility, would be an improvement over no interaction. Allowing some type of interaction should benefit these residents that have been so isolated since March 13. My mother's residence is on the 4th floor of her facility and she hasn't left that floor since lockdown. Even an opportunity to sit outside in fresh air would be a welcome change for individuals where she lives. Not all facilities have the same successes/challenges so there probably isn't a one size fits all solution, but please consider some options for those of us who miss our seniors. Thank you

AMERICAN OVERSIGHT

Osceola	General	I personally think it's to soon. We still have people passing away. the numbers are still going up. I want to see a decline first. If the unemployment issues are fixed. People would get their money so they could pay their bills and buy groceries. Alot of undue stress. Meanwhile schools are shut down but people want Disney open. Education is more important. If we open back up up to soon. I think it would be worse. If we open restaurants you will be putting more people at risk. It just takes that one nasty, uncaring person to cough, sneeze, with no mask on due to eating and spread the virus to unsuspecting people. They don't feel sick but maybe a carrier. Than the whole place is contaminated. We need to know more before putting peoples lives at risk. Plus if it spreads via droplets can that be spread more by air conditioners?
Palm Beach	General	Don’t let your guard down,we are almost there.Give at least one more month to see where we are at.You should also think about people that need their drivers licenses renewed.
Sarasota	General	I strongly suggest the state take a conservative, cautious position towards reinstating life /work activities. Erroring on the side of caution is the prudent course of action as knowledge of the virus, it’s sources, remedies and connectivity to others still is largely inaccurate and evolving. Whether it is distancing between people, supposed drug solutions and other “expert” guidance we simply do not know the true inter workings of this virus. Although I empathize with those whose financial challenges are real and increasing another 30 days of social distancing and separation will provide far more societal benefits than premature returning to normal or even semi-normal life. We need to stay the course in valuing life.
Palm Beach	Recreation	At least open pools and beaches where we can social distance ourselves

AMERICAN OVERSIGHT

Orange	Tourism	Hello, I wanted to bring to your attention that many people want to see Disney World and Universal Studios re-open. Yes, this virus is deadly to particular demographics (the elderly and those with pre-existing conditions). But, for many others we are either asymptomatic or have likely already been exposed given the coinciding results of several recent exposure studies conducted across the country. As a result, I think that given particular safety guidelines these parks can be opened safely. First, waivers are a must, given that attendees could be in the groups aforementioned, and thus would be higher risk. Second, it occurred to me that temperature testing or similar would help weed out obviously visual and severe cases. Third, virtual lines could be considered. I understand the difficulty in perfecting the technology to administer this method, but maybe consider it for the most popular attractions as is already done for some (ex. Star Wars at Disney). Fourth, definitely do not cancel shows or parades or indoor attractions. Seating can be spread out assuming capacity is capped and graduates back to normalcy over a period of time. People want to see the shows, the fireworks, and everything beyond just the rides. Separation is key for a time. Fifth, require masks for a short time, at least until guests start to feel safe without. I'm sure you have all heard these particular suggestions and have already been weighing them, but I want to tell you that for those who want to go out and experience their lives and help rebuild the country, amusement parks and other tourism is a must. Many people are wise enough to be smart adults and continue practicing common sense social distancing. We need good news now more than ever, thank you and please feel free to reach out via email to discuss more should you wish. I have many ideas.
Sarasota	General	DO NOT REOPEN! I want this to be over just like everyone else. I want to leave my house and go back to work and for my son to have a great/normal senior year BUT going back too soon will have disastrous effects. Unless we KNOW who is a carrier, who may be walking around as an asymptomatic carrier then we are shooting ourselves in the foot. Unless we can test everyone whether for the virus or for the antibodies we are just asking for another surge in outbreaks. This is not about me. This is about everyone. My ability to get a haircut, go out to eat or go to the beach CANNOT be more important than someone else's life. FL needs to stay closed until we actually see a continuous drop in cases and have implemented high volume testing for ALL residents-sick or not. In the meantime FL needs to improve its ability to get unemployment payments & small biz loans out to everyone who needs them.
Palm Beach	General	We need to follow guidelines established by cdc and health experts. Any premature reopening puts us at the greatest risk health wise and ultimately economically. We should not reopen anything before the health experts indicate it is safe to do so and we should follow the protocol laid out by the research and science that supports it.

AMERICAN OVERSIGHT

Citrus	General	According to the news, Florida cases seem to be still increasing but people need to get back to work. I think that could be done with rules like capacity, face masks, and washing hands/using hand sanitizer, however it must be enforced. We have seen so many not following those things just in going to the grocery stores. Also, how much longer are we not allowed to visit family? My daughter lives in Ocoee and I have not seen her since early Feb. None of us are sick and none of us have been anywhere in almost 2 months to catch anything. I need to get some items to her, can we visit each other? Being away from family greatly affects ones mental health and mood.
Sarasota	General	For retail stores to open up, require all patrons to wear a mask. Open up all beaches and public parking. For now, only Florida state license plates are permitted. That will prohibit tourists overfilling the beaches. And, it will allow the locals to enjoy what they have moved here to be able to enjoy. Open restaurants and bars, but outside seating only for now.
Marion	General	I hope you're looking at recommendations by county or region.not statewide. Let the northern counties open. People need to work We also need a date when decisions will be out. It's not fair to residents to wonder everyday if we'll hear today. Seeing other states open and we are kept in the dark. I don't need to hear everyday there's a task force.
Okaloosa	General	Please start reopening Florida now. We are causing more harm to people by killing the economy and developing severe mental health issues with people out of work and stuck at home. We stayed at home to help flatten the curve and to give our medical community time to prepare for it. We have done that. Continuing to sit at home while waiting for this to disappear is ludicrous. Make people wear masks in public but it is past time to begin reopening and learning how to coexist with COVID19. You cannot continue to force people to sit at home. This is a complete misuse of power. Open Florida NOW, please!
Polk	General	I think the state should be very cautious in opening the state too early it could cause a rise in risk for everyone All people don't practice the. CDC guidelines even though we hear it on the news and public Information They we need to be sure to protect all . Opening to soon could cause a rise in cases and death.
Hernando	General	Please go very slow with this. As a retired nurse/respiratory therapist I have high level of concern about the 2 phase of this virus. We still don't all we need to know about how this virus acts.
Sarasota	General	Please open up the state

AMERICAN OVERSIGHT

Clay	General	Regarding reopening Florida I highly disagree with the idea of re-opening at this point. If the state was to reopen I feel things must be mandatory like masks being worn by everybody in public settings. I also feel no restaurants should open for inside eating and businesses should be limited to how many people per office due to social distancing guidelines I also feel the importance of more testing before anybody returns to work meaning testing at offices daily by temperature. This is a very uneasy time and I feel like too many people will die if we release the state too early. My daughter-in-law has a friend who just lost the wife and husband with 6 more in immediate family sick leaving behind 3 young children. Please re consider. Thank you
Palm Beach	Retail	We are self employed small retail business owners . We rent space in a vendors market that is indoors but all open booths. The building has been closed since March 20. We sell reading glasses so our products are touched and tried in the face and returned to display. We have thousands of pieces and see no way to control the sanitation of these products. And f limited to having only several customers a day we could not even meet our expenses . Sharing common area with hundreds of other businesses under one roof , how could the amount of vendors and customers be safely controlled for social distancing.? Please do not rush the reopening of retail. We had to close in the height of season and can not make up for this financially but are more concerned about our health. We applied for PPP on April 5 but just received notice today April 25 that our application will be submitted when more funds are available. Very frustrating and difficult but we can't rush into reopening what is not essential for the health and safety of all .
Pasco	Professional Services	I work in salons and I personally think it is just to soon to reopen. I feel like with most people having not even been tested. The virus will spread even faster than before our lockdown.
Hillsborough	Education	I've emailed both the Lieutenant Governor and the Governor on this - have you addressed the college off campus housing crisis? The schools asked the students not to return from spring break, they refunded housing expenses and put everything on line till the fall, but the off campus housing will not let us out of our lease or offer a reduced payment. Causing us to pay the lease in full through the end of the summer. They say it's on a case by case, but declined any assistance to my family and everyone else I've talked to. Please help?

AMERICAN OVERSIGHT

Hillsborough	Government	Why did the Governor appoint everyone but Nikki Fried, elected Commissioner of Agriculture and Commerce to the Reopen Florida Task Force. She is the only Elected Cabinet member not allowed to be instrumental in this monumental task of reopening Florida with the Covid-19 pandemic. Her position alone should be Qualification and a voice for the consumer and our States Agriculture business. DeSantis should stop immediately his Politicizing Covid-19 decisions. This is life and death decisions! All Floridians deserve better from our Government and our Governor. This is about the safety and welfare of each and every life in our State of Florida. Nikki Fried is the only Democrat's voice on this cabinet. I am a Republican and find it appalling! How many members are on this task force, 22? I have called the Governors office, Attorney Generals Office and Department of Agriculture Office addressing this issue. All hands on deck to address Covid-19 reopen Florida Task Force Florida deserves better!
Palm Beach	Transportation	Please allow businesses to reopen statewide. This shut down has been unconstitutional and needs to stop now. People are starving while their place of work remains closed over fear of a virus that has been hyped up by the media. Please end the war on Americans freedoms and open the state now.
Orange	Government	I strongly urge you NOT to reopen Florida yet. I am not alone in feeling this way. Over 73% of voters feel that Florida should NOT open right now. You have everyone on your task force EXCEPT for medical/health care staff and disease experts. If you don't listen to the EXPERTS, more citizens will suffer and die. I have 4 underlying health conditions and I don't want to die! If you open now, we will be right back where we started! PLEASE DON'T DO THIS!
Hillsborough	Food	It would be foolish to open too soon and see a spike in cases. We rely heavily in the state on tourism. We have to make sure the world and country trust that we did everything we can to keep our cases down so that they have the confidence to come back here once this is over. If we open too soon and risk lives before we should peo0le will be reluctnat to visit us again
Flagler	General	I am tired of watching and listening to this being dissected Federally, state and locally. Through specific county officials in Flagler County, there is this pressure and urgency being placed on opening the county when we keep even though positive cases keep rising. If the lockdown was based on the decisions coming on the Federal level, then why isn't any re-opening being based on the same. If we are going to look at this on state by state basis ... then let there be only one voice that will make any decisions on openings, closings, criteria, mandates, etc..... The biggest problem is the many officials that all want to make decisions. That causes confusion and anger while you have some that believe in opening and others that do not. All those, "voluntary Stay at Home Orders" by mayors meant nothing. It was the executive order by the Governor that had to be followed. So, please, put a stop to these local officials making claims of re-opening, especially when re-opening needs to be done very methodically and slowly

AMERICAN OVERSIGHT

Orange	General	https://youtu.be/xfLVxx_IBLU This video attached is from a press conference held in California by two physicians. Please take the time to watch the video. I am a registered nurse who believes this whole situation is worse than it actually is. I (we) have basically been put on house arrest. If people who are fearful of this virus let them stay home and not expose themselves. But for people like me who are healthy, let us go on with our lives.
Polk	Recreation	Please open use of our beaches. Not being able to sit in the sun and read a book? ??? Seriously. I can understand parties and large crowds gathering but not allowing parents to sit and watch their kids swim in the ocean and enjoy being outside in the summer here in FL is too much and too cautious. Especially if you own property on the beach or have beach rentals. Public access points maybe limit number of people that are permitted at public point at one time? Or for beaches like Daytona were driving is still allowed, why not limit the number of cars and people in a car onto the beach? Shutting it all down with no ability to sit in a chair or let your kids swim is crazy. FL is too hot for this in the summer. There needs to be some outlet for sanity.
Orange	Food	I do not feel safe yet returning to the food service industry. I feel as those we need to extend the stay at home order until we have better access to PPE, testing, etc.
Charlotte	Education	I am concerned about reopening my county because I run a childcare center and I am expected to go back to work on May 4th. I need to go back to work because I am out of money and my stimulus check isn't here. The only problem is that I will NOT be able to do the social distancing when I return. I have a school that has 50 child ranging from 6weeks to 12 years and 9 staff members. I am not worried about getting it but my 88 year old mother in law lives with us.
Pasco	General	I understand that everyone wants to get back to work. But I think we should stay shut down for at least another month. Just so we can be on the safe side. It is naive to think that people will adhere to the social distancing practices. People don't adhere to it now at the stores I have been to and we are on shutdown. I want everything open as well so I can get my hair done, nails done, go to the mall etc. but not at the expense of getting others sick or them infecting me. I think Florida is being very naive in how they have been handling this from the get go. We could very well spike in the next couple weeks. We don't know. And Desantis doesn't go by facts or what the experts say. He is soo far up Trumps butt that its insane. Like he waits for his approval. Like I said before I think we should wait another month, as I am afraid if we don't, we could have a worse situation than what we have now. It terrifies me.
Volusia	Food	The “one way” aisle concept is great; it keeps people moving and they don’t get jammed up. Where possible, I wish stores would do this on a permanent basis.

AMERICAN OVERSIGHT

Lee	General	It is time to re-open everything now. Open the libraries, the beaches, the Courthouses, the restaurants and all stores. Florida can impose reasonable public health restrictions. No large indoor concerts, reasonable limits on indoor capacity, and social distancing. The pandemic panic has to stop. The statistical models of doom and gloom were wrong. Allow all the businesses to reopen now. If you want, make business make their first hour opening for seniors only, but allow ALL businesses to reopen now. Severely restrict visiting nursing homes and assisted living facilities. COVID-19 is only a severe threat to the very old or the already sick, but it is really not a major threat to the rest of us. Reopen Florida and stop the shutdown.
Volusia	Recreation	Gyms are a critical piece of the exercise portion of essential services to a persons health and welfare. What is largely overlooked is the mental health aspect. As annowener of a small gym with membership at 100 many of our members are veterans suffering from PTSD. They label the gym as the only place they feel safe. To date we have had no members with infected by the virus. However we have had one murder/suicide. I understand the concerns of gyms and germs, but with capacity limits you would be assessing this largely. Small gyms memberships view into as their home and even in normal times keep it clean which is untrue in larger commercial gyms. I hope that the governor will follow the federal guidelines and include gyms in first phase. Thank you for all you are doing I know it is not and easy task.
Palm Beach	General	Please don't open anything until the medical field gives the all clear. this is too much like the 1918 Spanish flu pandemic that had a 2nd wave when people were bored had a parade and killed thousands later. Please please please dont let history repeat itself.
Palm Beach	Education	Smaller classes, desks spread apart, temperature checks at the doors, staggered attendance in person. Ex. 6 th grade only m, t, 7th, w, the... Etc rotating schedule on calendar and the rest is remote Thank you
Hillsborough	Food	Please open restaurants, even if at 50% capacity to start. I want to support my local restaurants. I do not believe there to be much harm in sitting on a restaurant patio, several feet away from other tables, having a meal. My family is ready to go out and support our local businesses. Thank you.
Collier	General	Opening Jacksonville beach demonstrated the lack of concern by many..they violated all guidelines and place everyone in danger. I believe that everyone should wear a mask. .it protects others from you & you from others and is said to 90% effective in combination. All public place & business need hand sanitizer stations & sanitization wipes everywhere.. touch businesses like salons, barbers etc need n95 masks etc. As they cannot social distance. Temperatures need to be taken for entry to grocery stores, businesses etc. Violationd need to carry weight..fines etc. We need to let people know that they are responsible for everyone's safety. Testing needs to be for everyone & tracking on cell phones so we can keep ahead of the spread. Thank you.

AMERICAN OVERSIGHT

Palm Beach	General	RE-OPEN THE STATE. This ridiculousness of telling one business they are essential and telling another they are not, has to STOP. If you depend on a paycheck from your business or place of work, that business is essential! How many people are going to die from heart disease, strokes or diabetes from living an increasingly sedentary lifestyle thanks to the stay at home order? The "cure" at this time is obviously worse than the disease.
Clay	Healthcare	We need to reopen the economy and people are smart enough to take precautions. I own a massage therapy practice and have not been given any guidance by our board whether we are allowed to operate or not. What does not make sense is chiropractors have been allowed to practice and massage therapist within chiropractor offices have been allowed to continue to practice but it has been stated by some massage therapist cant practice in a stand alone business. Both professions perform manual therapy. I am a paramedic as well has considered a health care provider as a massage therapist and see clients with real issues that are essential to their well being. People seek us for pain relief that dont want to take pain medicine and seek a holistic approach as an alternative treatment. I have been open for about a year and was in our best months with plans to open multiple practices but may never come back if I am not able to continue As a health care provider I feel we should be allowed to make decisions based of being a professional in a field to help others. Anxiety and depression are also helped with massage and has become a real issue for those during this shutdown and those issues are a real problem for society and can help people with these real issues.
Pinellas	Retail	Governor-Thanks for asking for input. I would like to see more resources put to restaurants and grocery stores. Those are the things everyone HAS to use. I think helping grocery stores with disinfecting and protecting their employees will go a long way toward stunting the growth of the Covid. Restaurants-help them set up ways of doing take out and delivery that have standards set up by professionals in the field of disease transmission. They may need financial help or equipment delivered to them to achieve that goal.
Hillsborough	Food	Dear Gov. Desantis, When you were elected I had high hopes for you & your administration. You may not have gotten everything right but I was impressed with your thoughtful & moderate stance. However at this time you seem to be following the President's lead or at least one of his confusing leads. I believe in science not Trump's "gut or his ideas". I have had friends contract the Covid19 - fortunately they survived. How ever I have family members on the front line. I am concerned if we open up society too soon we will have a resurgence of the virus. Please keep the economy closed till new cases go down. And testing is in place to confirm there are no new cases. I have a small business that has been closed since March 12th & would I like to reopen- yes but I prefer to live to see my family again. Thank you

AMERICAN OVERSIGHT

Nassau	General	I strongly encourage your team to work closely with the healthcare professionals to understand if we are ready to reopen. I can tell you that most people do not realize that people with no symptoms can be carriers. Even with the stay at home mandate people still do not understand social distancing. Our grocery stores as an example are still not set up to ensure the safety of their employees or customers. We have a lot of work to do if we are going to ensure that reopening doesn't result in an increase in positive cases. We also need more testing. Please do. It be hasty to reopen. And please get the governor to stop acting like he knows best. When he can allow churches to be open it's clearly a statement that he doesn't get this. More precautions and training and education are desperately needed so everyone understands what they need to do to be safe and keep others safe. We are not there yet.
Hillsborough	General	Do not open the state yet! It is far too soon and we aren't ready. It's going to cost too many lives which will in turn be a bigger threat to the economy. Please listen to the people of your state!
Pasco	General	With all due respect and appreciation for our states dedication so far, I believe the current shelter in place and social distancing guidelines should continue through the end of May at the very earliest. It is better to be safe than sorry especially when people's lives are at stake. This has been a huge sacrifice for everyone, including my family, but it is an American's duty to band together for the good of all. I believe this is necessary because sadly there are many people not taking this pandemic serious, especially while the strict guidelines are in effect. Imagine what will happen if the rules become less stringent. This will be a recipe for disaster and Cause much unneeded deaths. Thank you for this forum. I know you all will make the right decision for us all. God bless Floridians and God bless America
Taylor	General	It has taken this long to get where we are with this Pandemic. What is two more months to save human lives? I understand essential businesses, but beaches, tattoo parlors, beauty shops and many more. Those are luxuries we as American citizen can't afford to have open, if we are trying to control the spread. It's almost as if the government wants us to die.
Orange	Accommodation	Support the opening of Florida, I am sure already stated, but be smart and have most open by Mid-June. 1. All employees in establishments wear masks 2. Staggered seating in restaurateurs or more outside seating still in staggered in outside areas. 3. Hotels, run at 50% occupancy till fall then increase. 4. Public advised and/or required to wear masks when in public area 5. Attractions: 50% or less capacity until Fall. 6. Increased cleaning by cities and private business 7. Employees (food servers) have gloves available - not sure on this as disposal and multiple use is an issue. 8. STRICT policy with employers and employees. If one is sick stay home. 9. Where possible, keep the 6 ft distance 10. Install plexi glass at hotel and other contact areas.

AMERICAN OVERSIGHT

Highlands	General	Florida is not ready to be opened at all. I believe that if Florida opens this early it can become even a bigger problem. we still have a long road ahead of us. ti ll everyone understands that its not a joke we need to keep these people under lockdown.
Pasco	Healthcare	Because many people do no practice social distancing, or wear mask, it should be mandatory to wear some type of covering of the nose and mouth to go into any place of business or store to shop. People are probably walking around with COVID-19 without symptoms, thus putting the rest of us at risk. This is the least you could do to keep us safer if reopening the state.
Pinellas	General	Open the state.
Citrus	General	Everyone should have access to N95 Face Masks. At some point in time the age group of 60+ years old will probably have the desire to participate in the State's reopening. But since Phases One & Two basically ask us to be homebodies but then to suddenly be brave-ol'-scouts in Phase Three, the ability to purchase a quality N95 Mask(s) should be a priority.
Duval	Government	I think it's time to stop the police state. We are a free nation. This is a terrible overreach of power on all fronts. We aren't even seeing the numbers of flu related deaths, and we're destroying people's businesses and livelihoods? Enough of the hysteria pushing media. Let's get back to business!
Manatee	General	Please open Florida! Us small business owners are dying! PPP is a joke! We need to get back to work asap! There is NO help for us. No unemployment, no ppp funding. If you dont open we have to close forever.
Charlotte	General	I think it is very irresponsible to start opening the state up now. The numbers are still rising, we are not at a plateau. And when the numbers come in from the nursing home testing, well see a jump in those numbers. My husband and I will continue to stay home until we think it's safe, which is sad that we can't rely on experts to help us make this decision. I believe we will continue to see a rise in the numbers now that beaches, dog parks, etc will be open. It seems that some people are not responsible enough to do what is safe for themself and others, and must be told, or ordered to do so. The governor has taken the stance to let people decide for themselves which is not good enough. More people will be infected and more will die because of this attitude.
Lee	Recreation	Hello to All, Thank You all for all you are doing for the best interest of Floridians. I only had to select one so I picked Recreation. Lee County can open the beaches. As other Beaches are Opening Lee County is waiting. In meantime Residents of Lee County will drive to the other counties to go to the Beaches. Honestly I will be one of them. Please open Lee County Beaches. Also please Open Restaurants. I have been supporting local restaurants by ordering Take-Out. I feel it's time to start Opening the Economy back up. I feel the public will continue to be safe and social Distance as I think most Floridians have followed the Social Distance and safer at Home.I also Feel if the ones that have underlined Conditions and the elderly fear this Virus I bet they will stay home until further accessing the Track of this virus. With the confidence in the Public to continue to follow Social Distance We can Open the Economy Again Thank You all for Everything you are doing. Cyndi Elser Cape Coral FL.

AMERICAN OVERSIGHT

Martin	Food	I think all the businesses need to open ASAP ! The damage to our economy is going to worse then the virus . You can mandate face coverings for all people out in public and continue with social distancing. Each business can regulate themselves accordingly . There are so many areas in Florida where the cases are so low . Why continue to keep businesses closed ? Open the state please! There are people going hungry and the state cannot feed everyone nor pay $$ for the loss of wages . I think caution is needed , but the state must reopen .
Sumter	Retail	If stores such as Walmart and Home Depot can stay open while practicing social distancing then why can't smaller businesses do the same.
Pinellas	General	Do not open things up until testing is truly available, we are at an infection level of less than 1 per million population and our transmission rates are less than 1.
Polk	Tourism	I am all for opening the state of Florida, especially tourism as that is my line off work. But my biggest fear is that we may be looking at making profits over the safety of the workers. I believe, especially when it comes to flooding our state once again with tourists that we listen extremely close to what health officials have to say and open this great state very slowly even if it means not working a little longer. Better safe then sorry.
Bradford	General	Things are going to fast to reopen have called about the boat ramps being used and people not staying there distance at the ramp but no response from your office also you don't seem to care about the older people I understand you can't stay closed forever. If people can't stay home and not have something to do something is wrong. I know I'm only one person to vote but I know what I will do at a later date. My family has been here since the 1700 So I pray you are not going to fast.
Lake	Government	For the safety of the people I suggest you do not open Florida back up. We will be doomed. I work in retail at the Orlando outlets and I fear for my life. I am high risk and have 2 young boys and can't risk getting sick because people want to buy materialistic things. Our numbers for COVID are increasing, we do not have control of the virus yet the government seems to think so. Everyone needs a reality check.
Polk	General	It is to soon. We need wait to the number of cases goes down. I am currently fighting cancer and if we keep spreading this virus people like me will never be able to leave our homes. It is easy for healthy people to say let's open up but then it will jeopardize people with compromised immune systems. We need to wait a little longer so every Florida citizen and leave home.
Hernando	General	Although the state wants to open and businesses are in very dire straights due to the pandemic, we need to do things smartly. Opening up before the peak does NOT seem to be a smart way. I realize that some counties have fewer cases than others, but are you going to try to keep people from crossing into those counties? Listen to the health experts, not the economists in this medical crisis. It won't be pretty if the virus comes on a lot stronger in the coming months.

AMERICAN OVERSIGHT

Citrus	Administrative	Please don't reopen too soon. This state along with all the other states can not stand a relapse, and that can happen very easily. Be sure everyone is healthy and will abide by the restrictions that will be inplace.
Pasco	General	Do not open Florida! Please continue social distancing for at least 30 more days ! Please people are still dying !
Hillsborough	Healthcare	Opening the state at this point in time is to early- we will have a spike in virus cases. Life is more important than money. You can survive without money you can't do anything when your dead. Start testing, stop excuses and get job done
Miami-Dade	Healthcare	I work in healthcare, and my company has been totally laid off . We have been stuck home for weeks , we can't go to parks , beaches , shops . This has lasted to long 90% people get the virus and move on with their lives like other illness . People under 60 should be able to work and go back to normal life . Please end this
Putnam	Food	I would like to see restaurant workers wearing face coverings so that they aren't breathing on the food as they are prepping it. I'd also like for them to be handling either food or money but not both. Or at least washing their hands or changing their gloves after handling money.
Broward	Healthcare	Facial coverings, preferably N95 Mask or similar, should be worn by all persons interacting with the public in any fashion for at least the next 90 days to 6 months. Cloth facial coverings such as bandanas or t-shirts are not an acceptable form of protection. It should remain mandatory that all businesses and public areas mandate this and any person not wearing a facial covering will not be served. Small businesses and sole proprietors such as medspas, massage therapists, personal trainers, hairdressers etc should be allowed to re-open and see a limited number of clients per day. Anyone who is experiencing ill symptoms and knowingly goes into public without regard for human lives shall be fined. Social distancing practices shall remain in effect for at least 12 months.

AMERICAN OVERSIGHT

Clay	Manufacturing	Dear Governor Desantis, I can only imagine how difficult it is for you and your team to make such a hard decision amid not only the pandemic, but also the scrutiny and misinformation from the media outlet. My wife and I are being very blessed in not being affected financially during these times doing to the essential nature of our careers, but we are sympathetic with those surrounding us that are being directly impacted by the virus, and change the lives of millions of Floridians in such a short period of time. I understand that you are in a position that no decision you make will please everyone, and this decision, regardless of what you and your advisers come up with, will be exploited by the media and your adversaries in a negative way. I ask you and your team to keep it a strong posture as we move forward in the next few, turbulent, months. Both sides have strong feelings and reasonable arguments regarding their particular situation. There are some that cannot afford getting sick, so opening up the state might be perceived as a death sentence. On the other hand, you also have those that are living paycheck-to-paycheck, or cannot get adequate child care due to school closure, and so on. For those, extending unnecessary closure might leave some on the edge of poverty, and that's just as scary, specially when you have small children depending on it. All that can also lead to additional stress to a whole family, potentially causing other psychological illness that can lead to acute pathological symptoms that will be just as detrimental to our society as the COVID-19 pandemic. At this point, April 25th, I believe we have enough data to make a responsible decision and take a comprehensive approach to reopen the state. Although I personally disagree with the approach used by Sweden in keeping the majority of business open, we could use their model as a baseline for us, where we isolate the high risk population, while getting the healthy ones back to the workforce. To cite our household as an example, I'm a supervisor for an aircraft maintenance facility and we utilized this approach and we have not gotten any cases. Our high risk personnel were given the option to take leave during the period while the rest proceeded to work. We
Hillsborough	General	NO! Its way too soon going to open a new can of worms and prolong and cause more deaths! It’s a no brainer!!! Dont do it!!! If you do there will be a lot of regrets and wont be able to turn back time and consequences will be paid!!!!
St. Johns	General	Please fully reopen Florida. Current findings show that the death rate is on par with a seasonal flu death rate, a poverty death rate will far exceed that. Fresh air, sunshine and a return to normalcy is the healthiest course of action.
Palm Beach	Recreation	Please open the beaches even if just to walk with parents.I have a teen it is hard for teens mentally with nothing to do. Most teens don’t golf or boating even though it is wide open so are the beaches. Most parents are doing the right thing keeping them safe at home their life has been turned upside down with school closing and not being able to do anything. At least open the beaches so they can get some sunshine a teen only can do so much biking and walking around the neighborhood..
Orange	Government	Open Florida Nowwwwww
Hillsborough	General	We should not open up the state until we meet the criteria set forth by the government with the cases falling consistently for 14 days. Then we need much better testing and tracing and masks for indoor activities. Must be able to keep the 6ft distancing in all venues. Also limit capacities in restaurants etc

AMERICAN OVERSIGHT

Lake	General	I understand keeping a lockdown in counties where there have been higher cases of Civid, however small businesses are hurting and employees of those business are taking desperate measures to feed their families. Let's go! Open FL for business!
Orange	General	I believe that with the very small percentage of testing done that the county should not reopen. Currently people are not following guidance re masking, distancing and simple requests to keep themselves and others.safe. If you reopen there must be more enforcement of masking, distancing and safety procedures, especially at grocery and drug. Stores and other retail outlets. The management must keep the public safe by having the courage to confront those who do not comply with new regulations. Post the rules and hold customers accountable. Thank you.
Martin	Finance	Please do not reopen Florida. Our population is to high a risk. People do not know they are sick amd the will travel, shop, and spread this virus. They are still to many unknowns about this virus. Governor Desantis please do not risk lives for money.
St. Johns	General	I believe reopening Florida is a good idea, but areas that have dense populations such as Miami, there should be extra caution in that area. For other areas that have a lower density of people, I believe as long as people do the right thing and keep their distance like we have been everything will be fine. I work in healthcare and I'm a physical therapist and I have not worked in 6 weeks. I work in an outpatient clinic located within a hospital setting. I am looking forward to resuming work and caring for my patience.
Hernando	General	Open the state now. Rescind all state and local restrictions. If people are scared to go out, business will close or reduce hours due to lack of customers. Businesses dont have to open. Open beaches. Outside fresh air and sunshine are healthy. Please let the free market and freedom work. SD and Sweeden did, and they are better than NY and FL. Hernando had been great. Was better before state order. Let us go back to being great. Sincerely Richard Weeks
Clay	General	We definitely need to reopen businesses. If a business wants to stay closed or a person wants to stay at home they can but business should not be FORCED to stay closed when the threat is nowhere near what the models predicted. Just like during flu season, people should use caution and sanitary practices when around each other.
Santa Rosa	Government	Fuck the reopen task force, fucknyour business bailouts, pay your people what they're owed before they lose their utilities, their homes and they starve! Were suffering out here while you live in your cushy mansion without having to worry about these things! Release our money!

AMERICAN OVERSIGHT

Charlotte	Food	I am in the service industry and I have been a bartender for 25 years. I have never seen this before in my life. No on has. I am for opening back up the economy. I have not received my 120p stimulus money nor any unemployment!! I am tapped out. I cannot make it if the economy doesn't open back up. I am concerned for my family's health. I live with my parents who are in a high risk age group. They even understand the ramifications of not opening back up the economy again. It is imperative!!! Please I need money. I have none and I have no light at the end of the tunnel. If you dont open back up, there will be evn more deaths...suicides and murders. I can see it now. No on can survive not working and getting no money or help from anyone!!! Please please help!!!!
Pinellas	Government	How are we protecting First Responders
Clay	General	We need to reopen this state to all businesses. We are headed for bad times as it is now and the longer we delay the worst it will be on all industries. We are a service and tourist state. We need the money tourism generates to keep us going. And because we are service oriented; a great number of people are out of work. This is the worst disaster we have ever had and I truly doubt it the virus is as bad as the media portrays. They hate Trump and are throwing every road block they can in his way. He is doing good because he is a businessman and knows how to get this state and country back to GREATness. Btw....I have a compromised immune system and I know how to protect myself from potential harm I don't need the government stepping on my rights. Thank you for reading this.
Marion	Recreation	Please consider opening up the Florida State Parks and all campgrounds ASAP. I believe that this could be done and still use the safe "social distancing" procedures! Thank you so much for this consideration! Sincerely, Ms. Tammy Little
Pinellas	General	Please re-open. Workers of non-essential businesses, especially hair dressers and nail techs live paycheck to paycheck. Residents can follow social distancing guidelines and be responsible. If residents choose not to resume going out in public, it should be just that, their choice. For those who are healthy and have no underlying medical conditions who choose to support small business, let them! People are responsible to make their own decisions. If face masks are required then so be it but let people get back to work!
St. Johns	Retail	I believe it is too soon to open a number of public places, mainly retail and entertainment venues where people gather and touch products. In my opinion, we should open outdoor parks and beaches for 14 days. If the beaches are open all day, even with large crowds, people tend to spread out and find their own spot. Obviously reports indicate UV light will do this some good. Let's reevaluate after that. I do not see the need in reopening the economy too soon in order to have to close again for not doing it right the first time. June 1st sounds like a safer time frame and will ensure we are well beyond the curve.

AMERICAN OVERSIGHT

Pinellas	Accommodation	Please re-open Florida beaches and pools. My 11 year old daughter has a debilitating connective tissue disease. She is to have daily water therapy. We live in an apartment community with a heated pool that we have been unable to use for almost 2 months. With the beaches closed we can not even take her to the ocean to swim. Her joint pain has more then doubled and I am fearful she will regress to the point that what was lost can't be gained. The numbers of cases go up with the number of tests and the numbers , though higher Bc of increased testing DO NOT support the closures. So many people have no income and are losing everything they own. My husband and I are blessed to still be able to work from home but so many are not. If Florida doesn't re-open we may however lose our last chance tin purchase our own home a sots in limbo due to the virus and the lender fearing that you will not re-open the state and we will lose our jobs. Please listen to the voice of reason and not the many voices of fear. Thank you!
Pasco	General	I am a member of our home owners hoa board of directors. Your order states that swimming is essential, yet our pools remain closed. Many are ok with this, yet some truly miss the opportunity to swim and exercise. Guidance on this area would be greatly appreciated. Also, hopefully some arrangement can be made for beauticians and barber shops. Pasco is impacted in a moderate way. Perhaps the county can be opened up more quickly than Pinellas and Hillsbouough
Palm Beach	Recreation	I have a beachfront condo on Singer Island. Even though it has a private beach with private access, I have been unable to set foot on it. This stretch of beach is never crowded even in the peak of season. It is beyond logical reasoning why I am unable to use this private, desolate stretch of beach without fear of getting a fine. I understand the need to close public beaches because of the crowds of people that congregate, but not the backyards of private condo owners. The Riviera police patrol this stretch of private access beach all day long as if we are criminals. The idea of spreading corona virus has everything to do with congregating masses of people NOT individuals getting exercise and fresh air on our beautiful, sandy, sunny beaches. We all understand the idea of social distancing by now and there is no reason to deny us access to our own backyards. If the police still feel the need to patrol, I do not have a problem with that. They should be more concerned about crowds than individual people just trying to stay mentally and physically healthy during these trying times. Instead of forcing us onto the sidewalks and streets for exercise, where it is getting congested, PLEASE be reasonable and open the beaches!!!!!!!!!!!!!! It just common sense.
Palm Beach	Retail	Let Washington, D.C. re-open first. Once the consequences are seen, then lets decide if it is too soon.

AMERICAN OVERSIGHT

Lake	Healthcare	As a healthcare worker (current pharmacist, former nurse), we should open Florida back up. Let businesses open up at lower capacity at first to allow space between people, then after a few weeks, open back up fully. Suggest those who are susceptible stay home and wear a mask when in public. Ask anyone with symptoms to stay home. Healthcare workers are getting hours cut, hospitals are hemorrhaging money, ERs are empty, hospital beds are empty. Florida either did an amazing job at social distancing or the virus was never going to be prolific down here in the first place. I have a nurse friend in NJ that tells me about the horrors up there. Florida is not NY or NJ. I realize that by letting people travel, the virus will eventually affect other states, but in all probability it won't be nearly as bad as it is in the northeast. Herd immunity will eventually take over. Thank you for all you and your team have done.
Pinellas	General	I have 5 hair salons that have been closed since March 22nd. I have applied for any funding that has been available to me and have received nothing! All my employees are in the same situation. My landlords are all requiring that I pay rent regardless if I am open or not as well as utilities. If I cannot reopen my 5 salons soon I will lose everything I worked for so hard all of my life and be unemployed with the rest of my employees. My employees as well as myself need to work to survive.
Clay	General	I believe opening the state prematurely could end gravely. Please re-think this, as many of the Floridians are of retirement age. Instead of re-opening Florida, lets look at ways to restrict movements, and to prioritize living. Living and being healthy is more important than trying to open up to early. China opened up and they had to re-close things due to the outbreak happening again. Honestly there should me a mandatory stay at home except for the super-essential workers. I put my life and my families life in danger everyday to come to some lame ass job for windshields on vehicles. Healthcare, law enforcement, firefighters, EMTS, and grocery stores really should be the only ones out. That's the essential team right there. People need to slow down and really think what is more important.
Hillsborough	General	We will limit gatherings to 50 until hopefully September? No large venues like concerts. Limit restaurant capacity for safety. Also can we use portables again at schools yo limit class overcrowding for safety. We have many students and stsff with conditions that make them highly susceptible To the Coronavirus and complications. Thank you. Large businesses that can function, filter their areas and provide distancing For safe return should be allowed to function. Farmers should also be allowed to Have workers back as they can safely distance.
Pinellas	General	Extend stay at home orders through May and re evaluate. It is too soon to go by "numbers" was o determine trends of transmission.as we are only testing the sickest people. Sincerely a registered nurse in Pinellas County.

AMERICAN OVERSIGHT

Hillsborough	Education	I work for a school district in the Administrative offices. I believe we should open but not all at once and only 10-20% of employees at first. I also believe we should keep the distancing rule of 6ft, and the employer should have the buildings disinfected. Before employees are allowed to go back to work, they should be tested for COVID-19 and if the employer does not want test than masks should be mandatory. This is the only way to be safe, especially for older employees like me.
Pinellas	General	We need to just ride this out. I understand the economy is taking a hit, but the hit will be even worse if we open to soon. I am caring for my 2 year old granddaughter and she has been home for over a month now and we are all feeling the pressure of being inside, but to wait to reopen the state would make it easier to not have a bad second wave. We also need statewide testing. If only certain people get tested who is to say that some of the people not being tested is asystematic and opening to soon those peiple are out there respreading this disease.
Citrus	Recreation	The Withalacocce multi use trail has been closed because it is considered a state park. This trail is primarily operated by volunteers, and is a significant part of daily exercise for retirees in Citrus County. This is a mostly rural area, thus social distancing does not present itself as an issue for the vast majority of users. Regular riders had been left to ride roads resulting in at least one death. Only potential congregate areas are in Inverness where a city park exists parallel to the trail, as well as Floral City. In these area riders normally are not a congregate issue, but park users in Inverness. For senior health issues, noting all gyms are closed, is necessary for the health of seniors.
Polk	General	Open florida! We can’t stay in our houses forever! Many people are suffering not because of the cornoavirus but from not working. My husband and I are blessed to still be working but i’m seeing how it’s affecting friends and family. We want to be able to enjoy the beaches, parks, even theme parks! This is affecting my mental health and i’m sure it affecting others with mental health issues. Do what you need to do to safely open florida back up! Please i miss universal studios and my walks through nature!
Orange	General	Open Florida. We are a free country. This is a socialist test being led by Big Pharma. Keep the elderly and medically challenged home. Open everything and leave us alone. We are broke, hungry and getting desperate. Yet all of you politicians are just fine, still eating collecting paychecks and living the norm. Stop controlling us. People get sick, people die, people get well and build immunity. It's BIOLOGY! Stop this nonsense already!
Pinellas	General	I can't thank the Governor and his Task Force enough, as well as all who contributed to the discussions! I have listened to the conference calls and am proud to be a resident if this state! My main concern would be our unemployment system and its inability to get the unemployed the help they desperately need. Although as a Real Estate professional I have experienced loss of income due to COVID, I have not even attempted to file for unemployment. But my heart goes out to those who have. We desperately need to fix this problem!

AMERICAN OVERSIGHT

Pinellas	Accommodation	Most of my doctors have limited hours and of course, don't want you to be seen in their office. If you declare "open" . . . because I have underlying health conditions, I still will not visit my doctor for routine visits because of the residents/snow birds/tourists in this area. They have continued to gather together; are determined to be on the beach and the visitors are still renting. I realize that the County Commission is responsible for some of the responsibility for opening up this area to tourists and seasonals from out of state but there MUST BE RESTRICTIONS ... i.e. quarantines, checking motels and resorts for arrivals, registrants, and new rentals. 25 nursing homes in this county have become infected. I live in a house, shop for myself with a mask, but it's not safe to go anywhere including my own doctor's office. What in the world are your intentions when your neighbors don't respect the "vulnerable" --- they say ..... "the vulnerable will have to take care of themselves so that we can go to work and do normal things." WOW... that's their attitude. What do you think should be done. Maybe some PSA regarding how to respect the "vulnerable?"
Duval	Professional Services	Please reopen small businesses related to hair salon, nails. Also optometrist by appointment only type services as well as elective surgery for hospitals. All of these would present minimal social distancing issues and could get part of our economy moving again. Thanks for considering my suggestion. B/R Clint
Duval	General	Good Morning, I am a director of a child care center, having worked with children for a lifetime. When I think of this pandemic in terms of where we began, where we are, and where we will be, I think of the education of a child. We were stopped in our tracks, we have been told repeatedly what is right and what is wrong with our behavior, we were shown that we are loved and protected, and we were taught how to defend ourselves. As with children, it is now time to open the door and let us go forward. We know the risks, and it now up to US to show how mature we have become. Thank you!
Sarasota	Professional Services	I understand the concerns on re opening the state however we own a barbershop and haven't been able to work since March 20th and because the unemployment system is so flawed we have yet to summit hours to receive unemployment pay without the website crashing. Our frustration is growing more and more everyday. That is why o believe you should reopen the state under certain CDC guidelines yes but hair salons and barbershops should be deemed essential and allowed to work under proper sanitation and health guidelines. Because we can't work and can't receive unemployment we our un able to feed and pay our bills as a family of six please Governor if we are allowed to go to the grocery stores and other businesses we should reopen certain things slowly. Masks for every client and barbers one on one clientele by appointments only proper disinfectant after each person these are all things that can be practiced to slow the spread.

AMERICAN OVERSIGHT

Pinellas	Healthcare	I do not feel at this time there has been enough testing to prove it warrants the state for re-openin. I feel let's give it another 2 months and see where we are at the end of 6-7 weeks as to the decline. I have nurses in my family also doctors and it just seems there are a lot of people who really do not think this is that serious. I have friends leaving to go to other states where they own property but are not residents but yet they think they are entitled to roam the states. I just hope this is thought through because the outcome could be crippling. If iwas governor I would do what's right and not what the people think they need. Money can be replaced peoples lives cannot..????
Pasco	Administrative	With the world in such terrible turmoil now is not the time to jump so quickly into trying to reopen our wonderful state. We have no idea if we have peeked or if we are still climbing up the graft. No one can predict when we have or have not made it to the top. Officials are more about counting numbers and not thinking about what those numbers represent. They represent humans, very young and old. The government and media have made this virus sending our friends neighbors into panic mode. STOP the RUSH to REOPEN. It's a day by day situation, make our world and our lives wonderful and beautiful again.
Broward	Transportation	I understand why some people when you the state reopened. Our current shutdown was never a real shutdown. People we're still out and about and doing unessestional traveling. I understand as the government you want to do right but not lose the trust of the people. Just as a parent you have to lead first. Look at Monroe County for example drastic but in time very efficient! I VOTE TO KEEP IT CLOSE FOR MID MAY. LETS FINISH WHAT WE STARTED!
Pinellas	Healthcare	We need to listen to medical experts about when it is right to reopen businessed. More testing is clearly needed so tracing can take place. Until we reopen you the government needs to do its primary job and take care of its citizens. Get the unemployment site working ASAP. Pay the unemployed back wages for the delay. Take out one of the many very cheap loans available right now since interest rates are almost zero to complete all of this. Test everyone, especially the essential workers regularly. This can all be done if you put politics aside and put lives first. Any other excuse to not put lives first shows how corrupt and soulless you are. It's sad that I feel I need to point that out.
Seminole	General	Florida should not open until June 1. We need to be safe and let the curve be in the downward direction for a couple of weeks before reopening. UCF is not making a decision until June. I think that is a good barometer for the rest of the state.
Polk	Healthcare	When will elective/non-emergency surgeries be reinstated at Tampa General Hospital?
Palm Beach	Recreation	Please reopen parks and beaches to recreational and exercise activities such as biking, surfing, swimming, fishing, running, etc. Exercise is vital for staying healthy and having a strong immune system and exercising outdoors in the sunshine is even more beneficial for physical and mental health! Thank you all for working through these unprecedented times.
Brevard	Healthcare	I believe it is too early to reopen Florida. Opening up too soon will be counterproductive to the progress made. Health and safety first.

AMERICAN OVERSIGHT

Pasco	Healthcare	Hell Governor DeSantis, please follow the 14 days of decline rule before making any changes. Read the history of the Spanish Flu and see that the 2nd and 3rd waves were catastrophic. This is no fun for anyone right now but this is about lives and not money. Money comes and goes but death means your loved ones are gone forever.
Sarasota	General	it seems there is two sides,people still getting paid an those that are not. i have not really been effected. please open back up everything with masks and distance. restaurants for example could just use 1/2 there tables.or the max that would work. to close parks and beaches has always been short sighted at best. PLEASE OPEN FLORIDA SO PEOPLE CAN FEED THERE KIDS!!!!!!!!! people will get what they need, lets hope are supposed betters don't make people turn the wrong way.
Pasco	Government	Please listen to health professionals when deciding when and how to reopen FL. Everyone has an agenda, but at least their agenda focuses on the health of the residents,. PLEASE don't be like Donald Trump!
Hillsborough	Government	I agree that we need to reopen Fl and our economy; however, this needs to be done in phases . I do not think we are there yet. We cannot risk a larger spread of this virus. Ensure the citizens know that they still need to take protective measures. Put in place rules for employers to protect their employees and customers. Please do not take things lightly. The mitigation strategy worked and we did not overwhelmed our hospitals.
Osceola	General	I am a hairstylist. I live in Osceola county and work in Orange County. While I'm anxious to return to work, I don't want to return before it is safe for myself and my clients. Ours is an industry where we are constantly hands on with our customers and never capable of performing services and maintaining social distancing. I think to include cosmetology in the first phase of businesses to open would be unsafe until we can see the ramifications that may come from reinstating business. Please consider the environment and close proximity that beauty professionals operate in when decided what to do with us. Thank you for your time and consideration.
Marion	General	Want to have all business open back up, have each company stiil keep the 6ft rule if appliable. Need personal care, hair and barber shops, gives a person chance to take care of self. Working in food can not always wear hair nets, shaving - bear trims is a must. Remember we are adults and want to be safe. There is no quantee for not getting coroa virus, but appreciate everyone tryingno top. Get back to Work.
Duval	General	Stores should reopen now that essential stores have realized ways they can protect us and themselves with the plexiglas and marking the floors showing 6 ft apart and in busy stores, arrows representing safe travel through the store.
Orange	General	Hi!! I think it's ridiculous if you chose for us to reopen the economy as early as May. I believe if we rush opening up the world in global pandemic in return it's going to screw us over. This has just begun and I'm sorry but my health is what matters the most!!!!!!

AMERICAN OVERSIGHT

Palm Beach	Healthcare	Why are there only 4 physicians on your task force to re-open Florida, only 2 of whom probably practice full-time?? Are you stupid? Putting in politicians (from one party no less) and CEOs as if they know anything at all about pandemics, public health, or biology? The overwhelming majority should be doctors, scientists, and public health officials, not a tiny minority! You are a disgrace and clearly you put money ahead of lives. The economy and opening businesses must wait. It makes ZERO sense if people get re-infected, there's a worse second wave of infection, or people die. You think tourism is hurt now? Wait until the second wave and see how long FL suffers for years to come. Stop listening to that criminal and idiot Trump. You have NO duty to him or his psychopathic ideas. Your responsibility is to the people of FL first and then the businesses, not vice versa.
Palm Beach	Healthcare	Testing of entire state population is a priority to identify extent of epidemic and act accordingly. Social distancing and face masks in publicly active areas should be enforced. No business should allow public entry unless these rules are complied with. I do not feel safe opening up the state until these testing measure have been done on at least 50% of the population. The ban on selective surgeries should be lifted at this time provided icu bed capacity is plentiful, which I believe it is based on resent public reports. Sincerely, James
Collier	Construction	Florida is doing so much better than New York. With the exception of the three counties in the southeast, Florida should slowly get back to work. Stop the stay at home order; those who are vulnerable will still stay at home anyway. A measured get back to work is what most of Florida is ready for. I agree with the article in the New York Times this morning, "America shouldn't have to play by New York Rules"
Collier	Education	For those employees over 65 with health conditions, is it advisable for them to continue to work from home when their work activities allow them to do so? My concern is that the University will re-open for all students, faculty and staff and those of us who are at greater risk will be hit, creating a new wave of infections. There are a large number of employees who have a safe and peaceful home environment, which allows them to be even more productive working remotely. I'm hoping that the direction and guidance that will be issued from the Florida re-open task force will continue to protect us "old" folks. Thank you, Karen (and George, my husband).
Hillsborough	Healthcare	Please re-open dental offices. I am a dental assistant that cant work until after the 8th of may. The unemployment benefits are not working for me knowing I applied over a month ago. I would love to go back to work. We can limit the amount of patients we see and still comply with social distancing by wearing PPE when we are in direct contact with a patient.
Duval	General	Here’s an idea: DON’T... unless you want thousands more to die.

AMERICAN OVERSIGHT

Sarasota	General	Thank you for the great protective job of those most vulnerable. Keep those sequestered, release everyone else. Herd immunity does work. Those afraid stay home. Take the masks off as recommended as as all medical know it does not protect against viruses.
Hillsborough	Government	As a Florida resident and retired business executive I fully support getting our state's economy restarted. However, I condition my support on the State of Florida resolving it's dysfunctional unemployment system. We have far too many residents who cannot pay their obligations (including taxes) and provide basic support for their families. It's time for Florida state government to accept responsibility, quit talking, and take the actions necessary to fully resolve the problem. No more excuses!
Seminole	General	Re-open the state! The economy and state can't continue like this. People are losing their homes, jobs and livelihoods due to a stay at home order for a disease that is likely no more deadly than the seasonal flu for the majority of people. Several studies and multiple infectious disease experts have stated publicly that it is likely that many people are already infected with COVID-19 and are asymptomatic. Given this information, it is obvious that the estimated mortality rate currently given is grossly overestimating the true mortality rate which is likely no worse than that of the flu.
Nassau	General	One of the requirements prior to entering Phase one of opening the state is that we must have 14 consecutive days of declining cases of CoVid 19, which we have not yet met. In fact, just 2 days ago we tied the all time high for number of new cases. Additionally, the numbers we currently have are due to the stay at home order. If this order is lifted, our numbers will likely go much, much higher. It would be irresponsible to even begin to open the state so soon.
Palm Beach	Tourism	I work in 2 industries I work at a domestic violence shelter and I also work for hotel I'm asking you that you reopen Florida I have been working at my essential job I have been furloughed from my hotel job but the majority the people that are working are over worked they have willingly taken a pay cut just to survive this pandemic and to come out with a job at the end of it. Some of us may not qualify for unemployment benefits and therefore what is the point of applying but we'd like to keep the lives in that we had before this pandemic started and we need money to do that. And if we can pack Walmart we can open a park
Duval	General	Dear Gov. Desantis, Please allow our employees to get back to work. As long as there are safety rules to follow. As far as the restaurant industry, they should have been disinfecting back then as they do now. That goes for the fast food industry as well. Just goes to show, we have nasty unhealthy places to be eating. Please don't open the food industry up till after the state of emergency has been lifted on May 17th. 2020. We can eat at home as long as our economy gets its boost. Thank you Governor for your consideration of your state's people.

AMERICAN OVERSIGHT

Pinellas	Wholesale	I work(ed) for a distributor of surveillance equipment. Although we have some walk-in customers, we are NOT a retail shop. I don't feel there is any necessity for this company (or any like it) to be closed as long as we follow all the CDC suggestions. Additionally, our business had been hurt almost irreparably by lack of business. Sales dropped from ~$20K daily to about ~$5K daily. We can't sustain that. We had to let several people go (including me). The CURRENT - DEO SYSTEM HAS DONE NOTING TO HELP SUSTAIN OUR EMPLOYEES! It needs to be fixed ... in a hurry!! This is not fair to our employees who have put in years of honorable and dependable work for our company.
Palm Beach	General	Get unemployment funds out correctly! Applied MRch 15th, got one random payment yesterday. Still hAvent gotten the 600 from the government. Get antibody tests done before opening. Open slowly, starting with outdoor activities. Things like gyms should be last! Be cautious so we don't go backwards
Duval	General	DO NOT require masks to be worn as a condition for reopening. Masks have not been required up till now and the infection rate has been low anyway. Masks should be a choice not compulsory. And a dirty reused mask will not protect anyone! Obviously the models used to shut everything down were all wrong and the antibody testing is proving the mortality rate is much lower than was predicted. Isolate and quarantine the infected not the healthy. I think that opening should be done as soon as possible but if it gives people comfort then reasonably limit crowds temporarily. I find it ironic that people have been flying on planes or crowded in subways or shopping in grocery stores with very little adverse effects but now that we are reopening everything has to be spaced out and separated. We the people were told to shut down to prevent hospitals from being overrun not until the virus was gone. Viruses never go away so populations must develop herd immunity. Open our economy before it is completely destroyed!

AMERICAN OVERSIGHT

Osceola	Healthcare	I am a nurse living in Osceola county. In the beginning of April I took a crisis assignment in NYC. Since then I've been working in a hospital in south Bronx. There are no words that adequately describe the devastation Covid19 has caused to the people of NYC. There also no words, for me as a nurse, to adequately describe how much I will be haunted by what I've seen here. Perhaps if we opened back up, the results would not be comparable to NYC. On the flip side of that thought, perhaps they could be even worse. I understand that people want freedom, and protection of their rights. I understand this this shut down has been traumatic to the economy. But I promise you our healthcare, no matter how much we've prepared in Florida, is not ready for an impact even comparable to what I'm seeing here and the reality I'm living every day that I work. Everyone has Covid19. Everyone I'm seeing is critical, struggling to breathe. The fear in their eyes is something no one can ever forget. The cries of grown men because they're struggling for air. The tears of elderly because they know there is no chance for them. The devastation and terror that you visibly see well up in the eyes of loved ones when you tell them they must leave now, and they already comprehend that this is the last time they'll see this person alive. I understand that unless you've witnessed what I'm seeing every single day, the average American will never understand the risks that opening too soon have a chance of impacting Florida. I'm pleading with our state leaders. Please consider this decision long and hard, and consider your own loved ones as you make this decision. Americans are strong. Americans are resilient. We CAN come back economically. We can rebuild. But we cannot bring back countless lives that are taken because we acted too soon.
Manatee	Construction	Keep up the good work!! We need to open by May 1st.
Polk	General	Governor DeSantis, It is time to reopen our state. Our citizens and economy have suffered enough at the hands of this crisis. A phased "soft opening" would be understandable if that's the best route. That being said, the citizens of this great state and our great nation are smart. We understand the risks of everyday life and are capable of adapting to new risks. When it rains here in Florida, the people change the way in which they drive, the same is true with an outbreak of a virus, the people will change (on their own accord) the way they go about their every day life. It's time to reopen and let the people take responsibility for our actions. The level of risk that we are willing to take should be left to the judgement of the people, not mandated by the government. Thank you for your time and consideration. Regards, Keelan Haworth
Duval	Recreation	Let's reopen the Restaurants, Salons and State Parks and trails. Enough of the stay at home! We can all take care of ourselves. Stop the insanity!

AMERICAN OVERSIGHT

Hillsborough	General	Reopen but keep capacity levels for places like restaurants etc. at 50% There has to be outlets for business to continue but at the same time we don't want further outbreak. I feel that opening businesses but keeping the max capacity at 50% or even less would be a good starting place to get back to normal operation.
Lee	General	I believe it is the safest Choice to leave things as they are at least for next 30 days to monitor our numbers and not rush and put everything and everyone at risk I understand as well as anyone being out of work (and I'm small business owner not collecting anything) but feel its safest choice overall.
Lee	Accommodation	Hello, My question is; Do you see a possibility that the entry for German citizens who are owner of a house in Florida can re-enter for vacation as soon as flights are available and provided that the entry ban from Germany has been lifted ? Maybe this could be underlined by a medical attest stating that we are Corona free and wearing masks. With kind regards and stay save Angelika
Clay	General	Reopen Florida ASAP.
Pasco	General	I feel it is time to at least start the process. Give the citizens a chance to decide for themselves... Open up restaurants on a limited basis for a few weeks and then keep adding to it.... Let the hair and nail salons open with the owners making sure the salons are set up to keep people six feet apart - have both the patron and the stylist wear masks to help prevent exposure....It is time to get these people back to work and start to open up our state. You can feel the unrest really starting... more cars on the roads etc. Open it up slowly but open it up.
St. Johns	Healthcare	I think Florida should be very slow to open, I think the openings should be coordinated with the number of covid cases in each county and go county by county.
Sarasota	Government	In my opinion I don't think opening the public beaches is the right thing to do-its too soon & it is going to create more problems. It doesn't help the economy in any way! If you want to help the economy let the businesses open (ie, restaurants, hair salons, barbershops, etc) with limited occupation. Being able to walk, run, or ride a bike on the beach is not detrimental to our economy or our wellbeing!! PLEASE RECONSIDER, ALL SURVEYS SHOW THE MAJORITY OF THE PUBLIC ARE AGAINST THE REOPENING OF THE PUBLIC BEACHES!!
Collier	Recreation	Please open all of Florida's beaches. In a time where peace is hard to find, the beach is a natural anti worry zone. If heat, sunlight, and fresh air are deterrents for this virus...the. The beach had all three.

AMERICAN OVERSIGHT

Polk	Education	I fear that as we loosen restrictions we will see a spike in cases once again which will have defeated our efforts to date of flattening the curve. I also fear that Governor DeSantis is more focused on the economy than the well-being of the citizens he serves. I also am interested in the implications and changes that will be instituted to mitigate a future outbreak or reoccurring spike in cases if/when school resumes in the fall. How will we practice social distancing in classes of 25-33 at a time? How can we provide a safe and clean environment when we don't commonly have hand soap in bathrooms, sanitizer is purchased with teacher's own money, and tissues too. Please urge Governor DeSantis to please consider the workers (all educators and school providers) and their families when looking toward the future of schools —- not just whether being out of a school building inconveniences other areas of the economy. Thank you!
Palm Beach	Healthcare	It's time start living. Our new normal is now. Begin the structure of re-opening. Open the parks, not playgrounds or barbecue areas. Begin now. We must go on living and with life. It is time. Gina.
St. Johns	Retail	Please consider requiring masks at the onset. As you know, masks don't necessarily protect you, they protect others. I'm an other that has vulnerabilities. (Diabetes and possibly Covid-19 acute kidney failure). I would love to rely on human kindness that others would wear masks to protect the vulnerable but there are many that are defiant on any restrictions of their own personal rights. That means I must stay in. If we can require seat belts and outlaw texting and driving I think it's ok to temporarily require masks. Also, my husband is a store manager of a popular retail chain and he fears mask less customers will expose him and he could bring it home to me. Will he have to wear a mask in our home to protect me? Thank you for your consideration
Duval	Education	Until we have a vaccine or treatment, I am concerned about sending my kids back to school. I understand that some families need to, however, we should consider allowing those who can to continue virtual learning. By not overloading the schools, it will make it safer for those who do need to attend in person. If some kids stay at home, the schools will be better able to ensure some safe social distancing in classrooms which is needed for kids and teachers to safely return to school. We should also require kids and staff to walk through thermal temperature taking devices and anyone with a fever should be required to return home. Hand sanitizer should be provided throughout school and more frequent hand washing breaks must be instituted.

AMERICAN OVERSIGHT

Pinellas	Food	I work in a mom and pop breakfast place . We are prepared to open with 50% capacity. My bosses are very responsive to having sanitizer for both front house and back house. We took this time to deep clean restaurant and do some remodeling and now we are ready to open ! Although we understand what you did was a right move then. We have progressed in medical staff and treatments it's time to let the American people survive and get back to work. People all around are getting depressed with no income coming in. We get calls on a daily if we are open. Please let all of us survive. Thank you for listening
Polk	General	While all the areas are of interest to me, but I can only choose one. I can't even comprehend how we're discussing reopening while the numbers are still rising everyday?? Manatee and Sarasota, for instance, are still opening test sites. I with all the push back from people urging you to reopen the state, just goes to show that people are not wise enough to make their own decisions to stay home. I still people at the grocery store not wearing masks! Now meat processing plants are shutting down because of the spread. Opening gyms, salons, and bowling alleys (for example) will still great opportunity for spread, just not in large numbers due to their capacity. I know people are suffering not being able to afford the roof over their head or food, they need another stimulus check. But we are far from ready to open the state. I appreciate being able to voice my opinion. Thank you.
Pinellas	Food	I recently read an article that says the hospitality industry makes up 38.5 % of the GDP of Florida. I myself am in this industry. My concern about reopening the restaurants before everyone feels comfortable going will hurt tipped employees more then it will help. I was furloughed like all my other coworkers so when we re open with all these restrictions our hours will be cut in half along with the clientele. We will have less then half the amount of guests which means less money but just enough where we will not qualify for state or federal unemployment. I personally have been waiting since 3/15 to be approved for unemployment but it's still pending. So if we re open then how are we supposed to make ends meet? I want to go back to work. I've been a server for 18 years. You give us $5 an hour and now take away our only source of income with these restrictions. I now have to look into another career
Pinellas	Tourism	I would like beaches and pools and church and restaurants to open ASAP! We need to have some thing to do !! It's been 6 months now enough is enough! PLEASE LET DISNEY OPEN SOON! I miss Mickey Thanks

AMERICAN OVERSIGHT

Palm Beach	Government	It's time to re open the tennis courts, parks and beaches.The hospitals from Broward to PBC EMPTY as are cov tents. This is a political nightmare. You have seen the real numbers, perhaps not. How about the furlough of 1400 plus doc and nrs from Jup Hospital All elective surgeries and appts. canceled. How about Doc's having to lie about dx on death certif. , all for fed funding? This is a sham and we must OPEN back up now. People are depressed, lonely and angry. Do the job you were hired for, please. I had confidence in your, when we voted. Now, Gov De Santis, we question this. Please, open us now.....WE know how to avoid people, disease practice, etc. Thanks for listening. Be brave, be strong, listen to your citizens. Taking civil liberties is against the law. The time is now, thanks!!!
Palm Beach	General	Go ahead and reopen the state so long as you're willing to accept responsibility for the consequences of the spike in covid19 related deaths. Way premature.
Palm Beach	Food	I think we should go slow opening anything cases are still rising and so are death tolls , in live oak Florida they are out of control , beaches and restaurant and bars have a lot of people out of work but I don't believe they should open for a little while longer
Orange	Recreation	I believe gyms should be in phase 1... more specifically small business gyms. Owners are suffering but those who frequent the smaller places definitely do so not only for health but for mental health. I agree with still requiring social distancing and cleaning, absolutely. But being allowed to open to where people sign up in 2 hour increments to ensure no more than capacity would be great.
Seminole	General	I would like to see the stay at home order modified but extended and a slow phased re-opening that looks at things over 3 weeks versus 2. So, opening up a small portion of the economy once we meet the criteria stated by the healthcare experts, then wait and evaluate after 3 weeks, then open up a little bit more, wait 3 weeks and evaluate, etc. If we don't take a slow and phased approach, I think we will see a huge spike in the number of infections and hospitalizations and death in the state. I know people are suffering from not being able to work and unemployment needs to quickly be approved and paid to lessen that panic and urgency to get back to normal. Please don't just open up things and throw caution to the wind and think that we can go right back to how things were in February on May 1. That would be a HUGE mistake. I also think we need to limit travel in to the state for at least another two months to make sure that people don't flock here that could be infected and spread it more in our community. I know that is extremely hard when we depend on tourism dollars here, but life is more precious than the economy in my opinion. I know that we are all sick of staying at home, but this will pass in time. The federal government needs to do more with payments to citizens and small businesses to help them survive this time.

AMERICAN OVERSIGHT

Pinellas	Recreation	Good morning, I personally do not think that opening the state right now is a good idea . We are one of the highest states . People are still getting it. I think once you open it then the people who have it that may not know yet that they have it, they will just be affecting other people again. Then we will be back where we started. On the other hand I beg you to please open the pools. I live in Teakwook village west and all of the Canadian are gone there is only a few of us left that live all year round. I go to the pool every morning for exercise and there is only 3 of us at the pool and I stay till 1 no more people have come. Most of our park here are older and do not come to the pool.All day long there is no more than 7-8 people . Or at least open the beaches. Listening to the President he did say the virus does not like heat. There is another reason why you should think about opening the pools and the beaches. It sounds like a safe thing for people. Thank you for giving me the time to voice my opinion. Thank You Dianne Potenti
Hillsborough	Government	This is something that we definitely should not rush into. If we were to open everything up before we really get past this, people that have not had the virus will be exposed to someone who has it and the contraction rate will begin to rise again. If done correctly and given the correct amount of time to get past this, we will not have to start from the beginning again in the next couple of weeks.
Pinellas	Healthcare	I suggest a 14 day of consistent drop in positive cases. By 10% daily minimum. Imminent enforcement of distancing and gathering. Allow citizens photos as prosecutable evidence. Mandate employers take employee temps and keep logs. Mandate sanitation. Cleanliness. Employers restaurants in particular keep logs. Mandate fines if not met. I can tell you the first restaurant server will grab a dirty finished plate. Stick it in the dish bin and immediately grab a fresh plate and take to the next table. Without washing hands!! Happened in every restaurant before and it will again. This must be stopped
Lake	Construction	Stay yall ass home untill at least may 5 !!!!!! Fuck everything else worry about yall lives wtf!
Brevard	Recreation	Recreation Centers should be last in the plans to reopen! If they open everyone will flock to go lift weights and play basketball, which is NOT social distancing. It is putting all the workers at risk for exposure to Covid-19. When Florida is legitimately ready to reopen, all theme parks should reopen to Florida residents only at 50%-75% capacity. We do not need to flood Florida with tourists to increase travelers bringing in the virus.
Orange	Government	It is well known that the state's unemployment system was destroyed by Senator Rick Scott while he was Governor. The appalling actions have left millions of Floridians in dire situations, unable to pay for housing or food. There is no excuse for not holding him accountable. He proved himself a reckless, self-serving, incompetent elected leader. We need to call for him to step down from public office now. Let him make restitution with his own assets he acquired while in office as well as those ill-gotten from his Medicare-defrauding company. Floridians deserve justice!
Alachua	General	face-masks please

AMERICAN OVERSIGHT

Volusia	General	My personal opinion is that please use your heads I would to open up totally but I don't think that's a really good idea as you have seen people want follow the rules so for that reason I say wait till this mess has completed it's run and yes I'm older 69 to be exact but that doesn't matter I just would love to see my family and not worry that they or myself possibly to catch this virus so please as you are look at Opening the State please think about our risk Thank you Regards David J. Rarley
Polk	General	First of all, you are doing a very good job! It is not an easy decision. We all need to get back to work. We all need to pray about this decision as it's not an easy one to make. I say do this in baby steps. If we have another out break then we need to stop. My Son can't wait to get back to work. I am sure a lot of other people feel the same way. If everyone says to do this. We all still need to go by your guidelines until we are all free of this deadly virus. Thank you for letting the public in making this decision.
Volusia	Healthcare	Massage THERAPY. It is ridiculous that I can go to the grocery store and be around 100people in 20minutes but I cant be around 5people an entire day at my massage THERAPY clinic.
Osceola	Food	I work in a restaurant and a bar and I'm pregnant I don't feel safe going in there collecting everybody's forks plates and glasses with this virus having no cure, it's to soon to open them up.
Palm Beach	Management	As an operator- manager of local restaurants, I believe if we open slowly it would be best for everyone. We will have to adhere to the initial action of 50% occupancy maximums we were practicing before going to take out only. Also the staff will have to have their temperatures taken daily before starting work. The guests will have their temperatures taken before being seated. Both the front of the house staff and back of the house (kitchen) staff will need to use masks and gloves at all times. The gloves will have to be changed frequently with hand washing made a priority at all times. It will be unusual to say the least as the mask hides our smiles which is the greeting card of our profession. Safety is paramount, and if executed properly I believe South Florida restaurants can open under these strict conditions. I look forward to serving our guests now more than ever as the need is great to get out and enjoy quality food and service again. Be safe, take all the necessary precautions, and lets open all of our struggling small businesses as soon as possible before they shutter for good.
Walton	General	If we open the beach they will come. If we lift the rental ban they will come. If they come, we will go backwards. We have worked hard. We have been patient and vigilant. Don't punish us for doing our part to contain this beast. We must suffer a little longer so we can be free of this mess. If we directly or indirectly bring tourist back too soon we will suffer a devastating set back. Here in Walton County we are lucky to have had minimal infections. Help us keep it that way.
Manatee	Real Estate	We must OPEN.

AMERICAN OVERSIGHT

Polk	Administrative	I feel Hair stylist such as myself will never see a dime from unemployment! It's a botched system ! I've been waiting since 3/21 when I applied. Now in my 5th week. Still no money and no approval to help me. I'm a registered voter and trust my eyes are open to know who not to vote for again
Orange	General	I'm a nurse for two group homes. Things can reopen like hair salons, barbers, dentists, healthcare offices. Restaurants should reopen like normal, shopping goes back to normal. Movie theaters just need to sanitize in between. I'm all for things going back to normal!! Schools need to reopen in the fall! Thank you for doing this.
Volusia	General	With the exception of a few counties, our state (in comparison to the northeastern states especially) has faired well throughout this pandemic. While quarantine and social distancing MAY have helped "flatten the curve", there is absolutely no way to prove that it actually did. It IS possible that our numbers would be only slightly worse if we went about our daily lives. Floridians have suffered this financial devastation long enough! It is time to reopen Florida. Having said that, I realize there may be some risks we want to avoid. Our first stage should be for Floridians first. We should sustain from opening hotels, theme parks and other tourist attractions, and especially assisted living centers. We do not need to open ourselves up to outsiders coming in just yet and we need to protect our elderly and vulnerable. Speaking to so many people in our community, I know that our small businesses are itching to get back to their normal. They are all finding ways to adjust their businesses to try and keep everyone safe and I think it is time we let Floridians do just that.
Brevard	Tourism	Start opening the theme parks. This will in turn open restaurants, hotels , small stores, hair salons, nail salons, etc. Open them in 3 stages. 1- Florida residents 2- National residents 3- International residents If they want to give lower capacities for cleaning that's good. But don't "require" masks. Florida is too hot to be wandering around with face masks on. And if folks are too worried about going to theme parks without a mask, they probably shouldn't be out going to theme parks. Once the international travel is open, then open the cruise lines. But every ship needs to be COMPLETELY cleaned and disinfected before allowing passengers. Tourism is Florida's lifeblood. We need it to get our lives back to normal. And not this "new normal" everyone keeps saying. We need our lives back to normal. Period.
Orange	Healthcare	Test everyone for antibodies. I'm sure a vast majority have had it or have been exposed. Then open the entire state back up.
Hillsborough	Government	Please reopen our state we cannot live like this any longer nothing is normal anymore we need your help to bring us back as soon as possible from this living hell not being able to socialize with friends and family is destroying us, grocery shopping is a nightmare. You are killing us faster than any virus. Please i beg you from my knees. Bring us back now!!!!we cant go on being held hostage.

AMERICAN OVERSIGHT

Marion	Food	I believe a Soft Re-Open would be best. Restaurant and Sports Bars with food do half occupancy. Salons minimum occupancy just so some can feel normal again by appointment only. Open boat ramps so family can get out a little more. I can use some clothing stores open basically my clothes now don't fit so good. Theme Parks probably not to open as if yet may be good. I do have annual passes that are going to expire soon. Zoo's would be okay to open. They could really used money for the animals including Busch Gardens & SeaWorld even though they are considered Theme Parks. Open for pass holders only. Movie theaters are not a necessity. Fast Food can stay drive through only. Thank You for doing all one can. Sincerely, Scott Lash
Pinellas	General	I want to commend the Governor and the actions he has taken during this crisis. It is now time to re-open the state and allow residents to get back to work and get our state economy going strong once again. The state and even national numbers reflex that the worst appears to be behind us. We as a society have done all we could to do our part in stopping the spread. I feel that if we keep measures in place to protect our most vulnerable residents success can be achieved in returning the state back to “normal”. While I personally was against the “lock downs” to the level they were levied I understand why they were done. We have to open and get back to a normal way of life for many reasons. We cannot let fear of this Virus who many experts say has a less than 1% chance of taking your life continue to rule our lives. I hope the Governor will make the right decision and start a robust opening process. God Bless and Stay Safe
Brevard	General	It’s important to have Doctors and science rule on when and how Florida opens. This is not a popularity contest. Get this wrong and many will die. It’s time to lead and stop looking to POTUS he gets his cues from Fox News pundits. My daughter is starving been out of a job for over a month used all her saving to pay mortgage and taxes like a good citizen. She has been forced to get food assistance. Where is the Federal money if you can’t fix your state unemployment. There are no safety nets in Florida, expand Medicaid now . You are failing.
Manatee	Tourism	We need to get everybody back to work now. No masks , just use common sense , PERIOD !!! We need our beaches back open and even more important , Disney , Universal , etc. etc. !!!!
St. Johns	General	Please reopen Florida! Restaurants, 1/2 capacity. Hair salons, per GA guidelines. Beaches, all day opening (exercise only for two more weeks then open for anything). Movie theatres, 3 seats bw ppl (must prepurchase and choose designated seat online). This is a start to get people back to normal. There is going to be a resurgence regardless. Let’s bring our economy back ASAP!! BUY AMERICAN! Thanks

AMERICAN OVERSIGHT

Lee	Healthcare	I am a massage therapist. While I want to go back to work, I am very concerned about contracting COVID-19 and passing it on to my clients especially my older clients. There are times that my face is 18 inches from my clients face. I have thought about this over the last month and do not see how I could safely go back to work without transmitting it to clients. My room is the average size of a massage room which is 6‘ x 10’. If LMT could get the antibody testing and then go back to work accordingly I think this would be a safer standard.
Pasco	General	Please do not open Florida or its beaches until WIDESPREAD TESTING for everyone has been done, not just people with symptoms. We also need contact tracing and more protection for people on the front lines. PLEASE SHOW LEADERSHIP AND STOP LISTENING TO TRUMP.
Sumter	General	Governor, how can Fl have “peaked” weeks ago, with new cases in the 100’s coming in daily, and deaths rising?? Why would we re-open our state to massive travelers from other states hard hit, i.e., NY,NJ, etc...to come here. If 90+% of our population is in the 65+ &up..that’s like signing death certificates. NO ONE, knows what this thing will do next; why would we take the chance. Keep the mandate in place: NO MORE THAN 10 OR LESS in a group; You have done a great job during this crisis; DON’T SCREW IT UP NOW! If Disney stays closed, so should we. Keep our state borders CLOSED! Yes, we will take a hit, but you will save lives! Holding firm thru 6/30, can’t hurt us that bad; and gives more time to evaluate stats (which we all know can be adjusted to suit the need).
Sarasota	General	First yes start to open !!! our lives matter our economy matters those who choose to stay in fan. Those who choose to go out can. BUT MOST IMPORTANT....GET A GRIP ON YOUR UNEMLOYMENT ISSUES IN YOUR STATE. AS YOU KEEP US OUT OF WORK WE ARE GOING BROKE, HUNGRY & SOME HOMELESS DUE. TO YOUR LACK OF HANDLING THE UNEMLOYMENT CRISIS PROPERLY...PHONE LINES SHOULD BE OPEN AT THIS POINT 24 HOURS A DAY TILL THIS IS SOLVED.... THIS IS NO JOKE I ALONE HAVE BEEN IN PENDING going on 6 weeks as self employeef. CANT WORK...CANT GET UNEMPLOYMENT. FLORIDA IS A JOKE
Manatee	Finance	Please reopen the businesses. I have not lost my job and neither has by husband. Financially, we have lost little during this pandemic, thankfully. However, it is time to get Florida back to business. There are always risks associated with large groups of people however I have to believe that getting people back to work does more for the health of our citizens than protecting a few (and generally those with medical problems already).
Palm Beach	General	A phased opening is essential to dispel fear and to get the community back in action. Excercise for kids and adults is key, including group workouts at gyms. Lets start getting back to our routines. Businesses need detailed plans that will help them open safely.... guidance from the state is key. Once that is set the community will gladly start to resume activities nwithin guidelines. Fear alone cannot leasd the us out of this. Let's do it swiftly with guidance. Palm Beach is ready to start reopening.

AMERICAN OVERSIGHT

Sarasota	General	If there is any doubt/hesitation.. it's too soon. As a healthcare industry worker with family as Nurses and Doctors, this virus is unlike anything we have seen before and we really have no idea what to expect and do. I think we should continue to play the safe hand with this situation.
Sarasota	Healthcare	What are the plans for the virus to return with a vengeance when you drop all the precautions set in place. You know this state has a huge population over age 65.
Palm Beach	Healthcare	I believe some things can open where you can do social distancing and some one supervise that. We don't have anything in place to help us from this virus. Opening things other than for some outside excercise would be putting lives at risk. It's scary just going to the stores to get food now. We don't have medical help for the virus yet no vaccine. Opening up the state will bring more harm than good. The economy is not more important than people's lives. Opening will help the virus grow and the economy will get worse. That's the price you will pay.
Palm Beach	General	Open Florida now this is destroying my business and life! The hospitals are empty and the death rate is less than 1%. Quarantine the elderly and sick but let the rest of us get back to work!
Duval	General	I feel just like hurricane season here in Florida, the doom and gloom media has blown it way out of proportion, causing widespread panic, hysteria, and uncertainty.. focus more on finding a cure, or a vaccine. Focus more on the positive, and less on the negative. We need to start opening up the economy. We don't want to become another 3rd world, poverty stricken country.
Lake	Government	Do NOT open Florida YET. Its too early for that. We need to control this virus first.
Palm Beach	Recreation	Please consider reopening not only beaches but community pools. We need our exercise. You could do restrictions for pools if needed. Like less than 3 in a pool. Or suggest sign up sheet for using pool at different hours. We need some way for communities to utilize their recreational areas safely. Thx. Denise
Alachua	Healthcare	There have been millions of people staying at home so to not increase the negative effects of overloading our healthcare system. Some people had no choice but to go into this invisible danger. Plz don't open up without using scientific knowledge. I understand that people have bills to pay but they act more like they don't believe this is as serious as it truly is and less because they are afraid of not paying their bills. And what's up with not having any medical/ MD/public health people on your reopening committee? Are you saying their voices are less important than those you choose to represent on the committee? Also, I personally will not even consider going into a business that doesn't require masks and provide for social distancing. Thank you and stay save. Help everyone stay safe. You ran for this job and it is your responsibility and burden now.
Pinellas	General	I believe it is too soon to open the state. I am in Pinellas County and our numbers are still growing. I have a son with asthma and can not take the chance of him getting sick. Please consider this in your decision.

AMERICAN OVERSIGHT

Osceola	General	Keep Florida closed, my children's lives are to important. I'm a single mom, and yes I am struggling, we stay home everyday, we homeschool, if anything should happen to me my children would be orphans. That is not a risk I can take. I'm a single income household. It's not worth the risk. If you open Florida up, I will have to go back to work, even though I have diabetes and asthma. I'm a server at a restaurant and would not be able to do social distancing. This covid-19 would spread faster than any other virus or plaque we have dealt with. PLEASE KEEP FLORIDA CLOSED.
Pinellas	General	There is no retail on the list above. My suggestion is to start reopening of non-essential stores by allowing orders to be placed online for curbside pickup.
Orange	Tourism	Please wait to open theme parks as opposed to opening to early which might result in more cases. I would prefer a latter than needed open date as opposed to opening early and then having to close again in the fall.
Duval	General	We should allow for an opening in the retail and personal service markets. The area we need to continue to ask to stay home are the large corporations, call centers, and collection agencies. These companies pack employees into confined spaces and employees feel obligated to work in the office regardless of their health. They can work from home. These jobs are being done from home. This also allows working parents to stay home and keep their children safe at home for the summer as many camps and youth groups have closed.
St. Lucie	Tourism	Please open state parks for camping Florida residents only during covid 19 pandemic
Pasco	General	I am in vote against reopening Florida for as long is the virus is here. Obviously there's two aspects to it. It's either going to be open for financial or closed for safety. I've been home since the beginning of March and have gone nowhere. I have not even been to a grocery store. There's so much information out there and everyone's making decisions and information we don't even know if it's correct. But there's one thing for sure everyone has done pretty well staying home for the most part. If you look at the other states the state that's outside protesting they're on top of each other they want what they want this is exactly what would look like if it's re-open. People will not know how to function differently so they will go back to exactly the way they were and this illness will spread and you will have far more cases then you've had an a big mess on your hands. So when you're looking at this I would look at which disaster is going to be easy to clean up a financial one or a deadly one.

AMERICAN OVERSIGHT

Hillsborough	Food	I think things need to open up as soon as possible. I have much respect for the governor of Georgia who is providing guidance based on data but also trusting Georgians to use common sense when opening up their businesses including restaurants. I honestly thought that governor DeSantis would be more like that and I'm a little disappointed that he is being more slow about the opening. There are places in Georgia that have been given the opportunity to open back up but have decided not to because they know they aren't quite ready and need a little more time to prepare their space etc. That shows that they are using common sense and not just rushing into opening back up. We need to trust that people want to open their businesses but they want to do it safely and responsibly. My son works for a company that distributes beef and seafood to restaurants and hotels so obviously he is unable to make a living right now. The longer we stay shut down the harder it is going to be. I foresee a very bleak future for the state of Florida because of our dependence on tourism, hotels, restaurants, and theme parks. If we have any hope of ever recovering we need to open up now and trust businesses to use their creativity and ingenuity to open their business as back up in a responsible manner. Please don't be wishy-washy governor DeSantis! Trust us! Help us! Thank you.
Palm Beach	Recreation	At this time i think we should open the parks, beaches (maintain distance), golf courses, tennis court/pickleball courts, golf courses - start gradually. Must keep hands washed constantly and stay home if not feeling 100% healthy. Start gradually nothing with large crowds.
Duval	Professional Services	I am a beauty shop owner with no income since the stay at home order. I have new precautions I am going to implement when I open. I plan on keep social distancing and have mask for my employees and hair dressers. Please open ASAP. We are ready to fight this together.
Sarasota	General	I do not feel that it is wise to completely re open the economy in the state of Florida. Our numbers are not going down and still continue to rise. With all of the people who are already ignoring the governor's stay at home order, releasing these people completely in to the public will only be detrimental to our state's health and our numbers will only continue to rise. Had we had a real stay at home order that was enforced maybe 30 days would have been enough, but it wasn't enforced and people have been out and about in Sarasota and Manatee counties from day one. Governor desantis needs to put a real lock down in place for 30 days, enforced, then may be we can re open.

AMERICAN OVERSIGHT

Sarasota	General	1. Masks to be mandatory in retail or closed settings (extremely important) 2. Limit the amount of customers at restaurants and retailers and flying. 3. Beaches will be a problem area. We should have learned from spring breakers 4. Businesses should still practice safety with their employees. I think if employees are dealing with the public should wear masks and possibly gloves. 5. Continue Monitoring flights from the heavily hit areas. 6. Cruise ships are a mini city and should be equipped and follow strict safeguards. ** Just keep in mind there are still 1,000's of people that don't believe they should have to comply or think this is a conspiracy. If everyone could get tested it would certainly solve a lot of the mystery and aid our government in dealing with this virus.
Palm Beach	General	Have a curfew
Sumter	General	We as a state and a nation need to reopen asap. We may never recover if this goes on much longer. Small businesses are hurting bad and many people are out of work and their families are suffering. I beg the state, the governor to please reopen Florida. Let's try to get back to normal. Kids not being at school as hurt them sociable as they aren't seeing their friends.thanks
Polk	General	It's not a good idea right now. We haven't even reached are peek yet! I know families are in need of money and other things but your life means more. Please give it another month or so and see how we can move forward then. Thanks for reading this. Stay safe
Duval	Recreation	As the owners of a summer camp and public school teachers, the economical impacts of this virus is effecting both mine and my wife's careers. We want our children to be safe, we have two, but we also know that we can't live in fear forever. As citizens, we feel we have done our part in reducing the spread and preventing our hospitals from being flooded with cases. With each passing day, we feel that we are slipping further and further in to a financial situation that is going to be hard for our state to recover from. For us, the question is how long can we hide from a virus and at what cost? We lost a relative in England to this virus so we're not ignorant to it and how devastating it can be. We're just left asking, when will life return to normal? Even then, how can we guarantee that the virus will not spread? We could lose everything due to being closed as a state.
Pinellas	General	If in fact ones temperature is an initial symptom Of Covid19. Why not have an non contact thermometer at the door of every business for employees and patrons. No fever business as usual 6ft 6ft apart.
Palm Beach	General	Have a dedicated hospital only for Covid19 patients as this is likely to continue in waves for sometime. This will enable elective surgery to resume, and a specialty Covid hospital will be able to focus on methods that have better outcomes. Reopen all the beaches for everything but lounging/tanning/socializing. Allow pools to reopen but limit capacity.

AMERICAN OVERSIGHT

Duval	Government	Governor DeSantis and his team have done an outstanding job thus far and recognize that small steps to reopening Florida should be followed, regardless of outside pressures. The citizens of Florida need to be protected in spite of themselves or outside forces. Thank you Governor. Re-open Municipal Offices after 5/15 (preferably 6/1) to appointments only, no walk-in traffic. A system for appointments that is easily accessible like some of the colleges use would be worth looking at. And strict guidelines for employees as well as the customer base which is face coverings a must, not an option. Limit lobby access & wait outside until your appointment time. As for the businesses, small or large, they should have access to the same appointment system or limit the entry of customers according to their retail, store, lobby or service size. Most restaurants have been following a policy of place the order and step outside and the server will bring it to you. They should continue this avenue for awhile along with limiting seating for inside dining. Reservations will be needed. Regardless of which industry the employee is working or the citizen is doing business at, it should be mandated and adhered to "Face covering required" until Florida is deemed safe. Unfortunately the new normal is going to effect us all for quite a while.
Pasco	General	Do not open yet. The guidelines from the CDC and WHO have not been met yet. Flatten the curve then wait 2 weeks. Florida numbers have not even flattened yet. Fix the unemployment system
Duval	General	I as a Florida resident am absolutely floored that you people think Florida is ready to re-open. It clearly is not. Do you not realize the danger of not waiting for this to fully pass? We will see numbers start to rise and more people will be infected. Why you people are doing trying to reopen our state right now is dangerous. I along with many other people I talk to believe you don't care about us you just want money from opening the state back up. I think this is foolish greed and does not need to happen at this time because you will have a lot more lives on your hands. Sad to say I voted for this governor now and I had such high hopes for him. Not anymore.
Sarasota	General	Open Florida please! Most of our fellow Floridians are smart, reasonable and respectful. Let us make our own choice to move about, go into or not stores, etc. Thank you
Sarasota	General	We welcome beach opening to nearby neighbors, but not to travelers. To do so, just keep the parking lot closed please.
Pasco	General	Opening the state of Florida is absurd at this point. No one has been tested except for the few in Broward/DADE counties. There will be a surge of cases and we are not prepared for this. Our medical care is poor at its best and in no way can they handle the onslaught that opening up will bring.

AMERICAN OVERSIGHT

Martin	Healthcare	Under no circumstances should Florida open up without following carefully the guidelines which include CLEAR reduction of new cases for a total of 14 Days. This really matters and put us all at risk and ultimately actual worse economic impact when increases are seen with premature opening. Also WHAT to open is also key and again the guidelines for PHASE 1 when we reach eligibility should not be expanded.
Pinellas	General	Please keep the stay at home orders in place. Florida has a toxic combination of being a top tourist destination with an aging population. Not to mention the number of cases is still high with stay at home orders in place. Florida is not ready. It's been proven that people given the freedom cannot act in a responsible manner for the greater good.
Sarasota	General	Please wait and Slowly open our state! Healthy People= Successful Economy. We do not need to do this again!!!
Sarasota	Retail	Please let small retail businesses reopen asap!! Small retail businesses should be able to reopen asap if they continue to practice social distancing guidelines!
Hillsborough	Recreation	Please reopen State parks in Florida for people who have an RV, and, we have had a hard time finding a place to stay and we are in our RV full time right now. Also for exercising too.
Lee	Recreation	I firmly believe that it is too soon to open any recreational areas even for certain activities. There are way too many people who have not abided by the current stay at home order, due to not believing they will get sick or that this sickness is just a hoax. I personally do not want to get sick, I personally know people who have gotten sick and who have died from this virus and they are not the older population. The new number of positive cases and deaths have not shown any decline in the spread of this virus. So again opening for recreational activities would bring us right back to the beginning and possibly even worse.
Brevard	General	No. It shouldn't open. We know this is not over yet and opening now would be taking a huge step backward away from our goal. I know it's not easy or ideal but it is safe.
Palm Beach	Recreation	We need to get moving again. The outbreak has stabilized, our health care system is not near being over run. Those with higher risks can take precautions. We have been a month into this, no money coming from the state as they can't get their act together and fix the unemployment. Open beaches and overrule the little dictator wannabe in palm beach county before he causes riots and protests. WE ARE ADULTS, quit treating us as children, we are more than capable of taking care of ourselves and our families.

AMERICAN OVERSIGHT

Polk	General	Me. DeSantis, I say keep the state closed until we can safely reopen. I work for Publix. I'm currently on leave only due to the fact that wearing a mask is now required. I've been working in the thick of it from the beginning, without a mask. All of a sudden it was required last week. Not everyone can wear a mask. Thankfully I will still have my job when this is over but until then , I have no income. I don't think that aspect was thought out throughly. So my hope is if the state is to reopen soon, you and your task force will also come up with an idea to keep everyone safe with an alternative to this "voluntary " mask requirement. I'm not alone with this issue. Not to mention all the precautions Publix has taken during the pandemic minus the limitations on the number of people in the building at one time. Lena Tanner
Highlands	General	Lockdown should be extended in all areas in order to stop the spread of the virus.
Duval	Education	I get it! I get that People are bored and are ready to get back to work! But! We've got to look at the ELEPHANT in the room!! COVID 19! We should hold off for another 30 days, and see if number of the coronavirus will drop by many. The are People who are carrying this virus showing no symptoms at all! I may go to work at my Preschool and just taking care of the Babies, or the Teachers and will be at great risk of catching the virus. I say Governor/ Mayor please extend another 30 days. Many lives would be saved🙏
Sarasota	General	It will take a long time to get our economy back. It will take even longer if we put people in harms way so that are so sick they end up in the hospital with bills they can not possibly pay. We need to put our citizens first and the economy second. Please keep this in mind as you ponder our future here in this beautiful state of Florida.
Pinellas	General	Do not open ANYTHING until testing and tracing in place. Better to be safe than sorry.
Hillsborough	General	Claimed Unemployment starting 22nd of March and have yet to received anything. I'm an independent real estate agent and the NAR told us we would qualify for the first time due to the Pandemic. Then I heard Florida will probably deny the state portion of the payments yet I would qualify for the federal weekly stimulus and that it would be paid through the state site. I'm like everyone else running out of funds to pay my mortgage, car, food, etc. when can I expect a payment?
Lake	General	I think we should definitely re-open and follow the guidelines provided by the White House. People need to get back to work. This State and this Country are not meant to be shut down. People just need to use common sense and decide what is right for them personally

AMERICAN OVERSIGHT

Pasco	Agriculture	A serious investigation of the mortality rates given by Fl DOH (3.65%) and The CDC (5.3%) needs to take place. Both are reporting deaths that are either suspected to be CV related or in the DOH's case, reporting deaths that at one time were tested positive for CV., not necessarily caused by CV. Relative to other empirical data from cruise ships , the numbers driving policies are artificially inflated. The Roosevelt death rate is .11% and the Princess Cruise was 1.1%. Highly transmittable environments, where the entire population was tested are showing exponentially lower mortality rates. DOH and CDC need to be held accountable . Also, now is the time to consider shoring up Fl Agriculture with meaningful incentives for the private and public sector to purchase Florida agricultural product's exclusively.
St. Lucie	Healthcare	As a healthcare provider working in surgical services department, I feel it is safe to reopen outpatient surgeries. With that being said, surgeries where patients are expected to go home the same day. Orthopedic surgeries, knees, hips and spines are usually at higher risk to begin with and spend a minimum of 2-4 days in the hospital. I do not think it is safe to open for those types of outpatient surgery. I would like to keep the stay at home in effect for a minimum of 3-4 weeks. Our numbers are not going down, with more testing available they are going up. We need to be prepared to be ready for increased hospitalizations. My county does not encourage wearing masks. I went to the post office yesterday and 2 out of 9 had masks. The employees had a sheet of plastic hanging from the ceiling with zero protection for those employees. The employees had no masks or gloves. Sometimes employers need to be told by governors what to do to ensure safety for their employees. This is a perfect example. I feel dentists need to stay closed except for emergencies due to aerosols. I feel orthodontist could reopen because they do not use aerosols.
Hillsborough	General	Please use some common sense. We have bought into a lie regarding this virus caused the fear to hold us hostage and exchange precious freedom. Are there dangers? YES, but what price are we willing to pay? There are many I know right now needing medical services that are no longer available to them. There are many wondering if their jobs will return and where are the rent and utilities payments coming from? There are many unable to properly mourn the deaths of loved ones, or visit those that are infirmed....depression is a killer also. Please stop this insanity! Reopen NOW,
Hillsborough	General	Please be slow to reopen the places where large crowds may gather. Reopen only where social distancing is easily practiced while we remain in the midst of this pandemic. Thank you for listening to the people.
Brevard	General	Keep it closed a little bit longer

AMERICAN OVERSIGHT

Duval	Transportation	We (my family) has a small trucking company in Jacksonville. We have been working through the pandemic and although most of our businesses we work with are essential the trucking industry is horrible. When we broker a load throughout the state of Florida it's horrible. Brokers are raking us through the coals. They are heartless and relentless to the fact that we are maintaining drivers pay, insurance, truck payments, and fuel yet they are continuing to give us horrible prices. Loads that use to go for $500-$600 back from Miami to Jacksonville are now going for $100. It's disgusting how brokers are treating our hard working drivers and there is no repercussion for making us take loads for .25 a mile. Truck drivers are being praised across America right now but no one is looking into how brokers are cheating us out of money. All the loads we broker we get off truckersedge.net please look and see how low brokers are making us take loads for. We have no choice either. Another example would be Jacksonville to Miami. These loads use to go for $900.00 -1200.00 they are now for for $500.00. That's not enough to feed our families, pay our drivers and exorbitant insurance costs, fuel, and , truck payments. We need to get back to work in Florida! We have to start this economy!!! We can't live in our homes afraid forever! Let's open up Florida!
Osceola	Finance	I have been out of work for a month! Your stupid unemployment website says that it looks like I went back to work. Who is doing these and why not check my paystubs abs call my job and make sure to see if I'm not really working instead of assuming. I also haven't received anything and I am entitled. I have worked, pay my taxes and am entitled to this if I need it and I do need it. Also do NOT open back up. There are new cases and people haven't stayed home. Especially in our area they are still out. It is not safe. DO NOT OPEN!
Pasco	Government	DO NOT REOPEN FLORIDA, it is not safe

AMERICAN OVERSIGHT

Duval	General	Extend the stay at home order until May 31st. If businesses can allow employees to work remotely, make it mandatory that they do. With the reopening of certain locations for recreational use, it gives individuals who want to go out in public the opportunity to do so, while also accommodating those who are not comfortable risking outdoor exposure yet. No one should be forced to reintegrate so soon, with so much unknown, just for the sake of getting back to "normal". Apart from minor tweaks to essential businesses, nothing's really changed since March. To truly re-open Florida, processes need to be in place first. Doing things the same way as before, but in smaller groups and 6 ft away from others, will not be enough. Also, considering virtual learning is in place through the end of the school year, families may not have access to the childcare resources necessary to return to work. Such determinations should not be left with the employer. Instructing those who can work remotely to continue doing so, in combination with school closures, will keep a large portion of Floridians at home, making the essential workers and those ready to dabble with public recreational activities lead the reopening one step at a time. Please be mindful that it could take two weeks for the virus to show, which means with every new step towards reopening, there is an expected delay in measuring how well the reopening is going. Playing it safe shows integrity and a conscientiousness for Floridian lives. Until tests are so readily available that if I have I fever, I can walk into the grocery store or a pharmacy and buy a test that gives me results within minutes, full reopening of the state should be off the table.
Hillsborough	General	Please show real leadership during this pandemic and include all voices, democrats and Republicans, instead of just Republicans and your donors. We are suffering more because programs designed to help in real emergencies, like the unemployment system, are ineffective and weeks later people are still not compensated yet. Make all decisions based mostly on the science, so that we dont enter into returning to normal life only to be hit with a second wave of Covid-19.
St. Johns	Transportation	DMV needs to re-open in some aspect so private vehicle sales can properly complete tag transfer and title transactions. My son bought a replacement car to get to work but can transfer the tag so he can legally drive. This is ridiculous. He should be able to do this online by scanning the documents or set up individual appointments but doing nothing is harming hard working Floridians.
Seminole	Food	Restaurant dinning rooms opened at 50% capacity, supply lines need to be rebuilt.

AMERICAN OVERSIGHT

Alachua	General	I don't believe we should be reopening businesses or public spaces until we have wide-spread, near instant response COVID-19 testing available at no or little cost to the general public. Doing so will lead to a cost greater than that to our wallets. I have seven friends who have all had difficulty getting unemployment compensation and this is their first time ever applying in Florida. We need to be concentrating on the greater good versus the immediate good or the typical political response. It's time for Florida to take care of her citizens and not put them in danger simply to feed their families. Make unemployment applications completely online and expedite the process for all, include contract labor and the self-employed. Rent subsidies and mortgage relief need to be legislated now or we're going to see millions of Floridians homeless and starving by summer. We may not like this new reality but it is the hand we've been dealt, regardless of political party or ideology. As Governor, you have been charged with protecting and serving your entire populace, now is not the time to be careless or appear less than empathetic. Believe science, please. What happens now will define your legacy. Thank you for listening. God bless. I hope you and your family are safe and healthy.
Orange	Recreation	I definitely think the beaches should be reopened because there is plenty of space to keep 6 ft away from each other and enjoy some relaxing time do to all the stress the Covid-19 has put on us .Thank You
Pasco	General	open the state but keep beaches closed.
Volusia	General	Don't open until a least June 1, 2020. To be safe if then. Florida's population is made up of a lot of Senior Citizens who are great risk
St. Johns	Retail	I own a brewery and the shutdown has drastically impacted my business since I have not been able to make sales via my taproom. We were grouped into bars and night clubs when they were all closed in mid-March. Our business is more like a restaurant than a traditional bar and certainly not a nightclub. I want to begin selling beer for on-premise consumption on May 1. Even though you may open up businesses for retail sales, it is going to be awhile before people come back in the same numbers. Also, by closing the bars and restaurants, you took away 70% of my distribution business. ALLOW ME TO OPEN UP MY TAPROOM BUSINESS FOR ON-CONSUMPTION SALES AND OPEN UP THE BARS AND RESTAURANTS SOON OR YOU WILL HAVE A BIGGER CRISIS ON YOUR HANDS COME MONTHS FROM NOW!!!
Brevard	Healthcare	Florida should not reopen until we have a real 2 week, no travel lockdown. The only way to stop the spread of the virus is to stop the spread of people. The only way to do that is a mandatory lockdown with no one moving. We have the worlds largest military and we aren't fighting a war. Use the military to bring supplies around like ice cream trucks. Put that $2 trillion to actual use and help the people instead of worrying about your wallet for 2 weeks.
Pinellas	Food	We need to re open restaurants. so many people with no job. Absolutely no hope of getting money from the unemployment system. Bill's may be postponed but are not cancelled. things are going to pile up on everyone. Make unemployment payments retroactive.

AMERICAN OVERSIGHT

Duval	Healthcare	Absolutely NOT. Too early all results are not in from testing. Many havent been tested yet. I belueve we have a wnd roynd and naybe a third. J kniw ppm need their jobs and its devastating. Many dknt think this is reak and not following the y ft distance or masks. My neighborhoid alone ppl hanging ouf visitjing having dinners and bbq's. I'm amazed. I'm 68 yrs old totally stuck inside and not one of my neighbors has checked on me for any reaskn. Thank God I'm self sufficient. Georgua opening hair salons and nails big mistake. They will not follow rules. Its down to money as always and working for a Nationwide Medical billing company with 1100 hospitals'Urgent care our dics and nurses are putting themsekves in danger and gave lost 70% of revenue. Life vs Money whats more important. You be the judge. I know it cant last forever but my gut says to wait a little longer. What we're doing now is great except we need ppl to follow and police should be checking neighborhoods because if i must follow so should everyone else as they are endangering me and I'm the one you're protecting.
Jackson	General	Do NOT begin to "open up" the state yet. Florida has yet to reach its peak, and you already have crowds of people at the beaches you opened. I am an "essential" healthcare worker with loved ones in the high risk category. Opening up too soon will see a spike in cases, which will amount to an increased risk of exposure to me, and therefore my loved ones. Also, please stop with all the "essential workers are heroes" talk and do something to back those words up. Mandate hazard pay for all essential workers immediately.
Citrus	General	Asking the public's opinion about re-opening the State of FL is a great political move. Unfortunately the people of FL are not scientists. Listen to CDC and other scientific agencies. Embrace data, not opinion. Strive to test the general population for the anitibody. Open up FL when Ab (antibody) testing shows a prevalence of the Ab in society.
Broward	Recreation	Beaches and public parks should be open to Florida residents, provided social distancing requirements are adhered to. Our state is much less crowded now that most tourism has been halted and social distancing is much more attainable.
Orange	General	I am an Orange Country resident and live in Winter Garden Florida. I also work as a surgical and anesthesia coder. I have watched our little town shut down and people lose their jobs and businesses close not knowing if they will be able to reopen. The shutting down of our state has devastated more lives than any virus has touched. I think for the good of the masses the state should definitely reopen with everyone being responsible for themselves. If someone is uncomfortable being around others in public they should take the precautions of wearing a mask or staying home. I feel like those at risk (the elderly and immunocompromised) should quarantine and limit social interaction but the remainder of the public at large should be allowed to continue on with their daily lives.

AMERICAN OVERSIGHT

Lee	Recreation	quickly closed beaches, parks, sports grounds, simply because one person as the governor gave the command, although fresh air and sports never did anyone any harm. Stop PR and say that the governor first of all thinks about people if he thought about them wouldn't close beaches, parks and sports facilities
Orange	General	This move serves only to further the Republican agenda, specifically the reelection of Captain Clorox Donald Trump. There's absolutely no consideration for the health and welfare of the citizens of the state of Florida. If Vince McMahon would've offered $20 million to keep the beaches closed #DumbDeSantis would've done that instead. The answer to all of your questions is money!
Seminole	Tourism	I'll be honest. I have no "ideas" on how to re-open Florida. All I do know is that it NEEDS to happen. So many people are out of work, it's imperative that we get to work again. Tourism is, of course, our states primary source of income. We have to get the theme parks and the cruise ports open. Yes, I said cruise ports. I'm sick of the bad press the cruise ships always get. We are frequent cruisers (83 of them since 2004 to be exact) and there is no where on earth I feel safer. Even before this virus, the cruise ships have always been diligent about cleaning. You see them cleaning everywhere, all the time. Handrails, elevator buttons, even the slot machines. There are hand washing stations as you enter the buffets and hand sanitizers outside of all restaurants, the shops and even when we embark and disembark the ship. We are very anxious to get back to our cruising. I find it ironic how our government won't bail out the cruise lines because they're not American companies yet expect them to follow our rules with no sail orders and port closures. So, the government is ok with killing their business. Apparently they overlook how much money the cruise lines bring into the state with flights, hotel stays, extending their vacations at theme parks etc. Not to mention Royal Caribbean and Carnival's headquarters are in Miami. So, as you see, the cruise lines are vital and necessary to our state's economy. Please let them begin to sail again. We are happy to take safety precautions (as we always do) but do not punish them for the spread of this virus. Thank you.
Orange	General	I'm 68. Not sick. But I don't feel enough people have been tested to determine we are safe enough to open without the possibility of reinfecting relapse. I don't have a computer so I had to apply for reemployment via papers so I can't trace my forms or status. I know people are getting stir crazy but we must think if their greater good and stay safe for a few more weeks until we can get a handle on this.
Hillsborough	General	Please reopen Florida ASAP. It's becoming clearer that the death rate is much lower than what they were saying. Let's get back to normal.
Volusia	Finance	I feel that we need to start opening back up the state. I do believe it needs to be gradual. Start maybe with restaurants and maybe beaches with social distancing. Then after a week or two add some of the other businesses. Until all of Florida is back opened again. The reason I say this is I am concerned that if people don't get back to work making money that the depression and maybe even suicides might be the next big thing to happen. Please open Florida back up!

AMERICAN OVERSIGHT

Pinellas	General	I am concerned about the reopening of the state. I feel that it is too soon and extremely unsafe for Florida to reopen. I know that we want to protect the economy in Florida but most people are not going to travel here anyway if they think it's unsafe because we have not shut down for long enough. Based on what I have read I believe the safest choice for the people of Florida is to remain shut down until June 1. As a parent of two young children I can say that I also feel that parents were struggling to get the schoolwork done and can't do this if they are asked to return to work. We are putting their education in danger if we can't support them properly. As someone who works in the field of early childhood education I feel it would be incredibly unsafe to bring these kids back together too soon. We need to make sure that our state is safe, that our kids are protected and that parents can be available to help their children maintain their education until the end of the school year. June 1 it's a good day that will show the state that we care about families.
Palm Beach	General	Please do NOT reopen the state until there's a clear downward trend. If schools are closed so should the rest of the state. Who will watch people's kids while they have to work?? I cannot homeschool and work at the same time Please consider our elderly!
Pinellas	General	Just be smart on this. My philosophy on many things I do in my personal life and professional life is "GO SLOW TO GO FAST". If you do it right the first time, even if it takes longer to do, you will have saved time, energy, and in this case LIVES. WE WILL GET THROUGH THIS. THE WORLD WILL NOT END AND WE HAVE A FUTURE AND MOST IMPORTANTLY, we are responsible for our CHILDREN'S FUTURE/LIVES.
Broward	General	Thank you for seeking public input. Our family has been staying at home except for grocery trips (contactless pick up) and a few visits to our places of work. We are fortunate that we can both work from home. We have one USF student and one MSD HS student doing well with their online classes. We have followed the guidelines and believe it is now time to begin re-opening the state. Open the parks, golf courses and beaches so that people have more places to go where they can maintain social distancing. Allow businesses to open with guides for how many people can be allowed in or offer curbside pick up. Common sense is needed and personal responsibility. If sick, stay home. There are areas less impacted than SE FL, let them open sooner/faster, but we need to start leaving our houses. Thank you.
Sarasota	Retail	30 Sales Tax suspension. This would drive spending and get people off unemployment.
Seminole	Healthcare	We need widespread antibody testing that is free and open to the public.
Miami-Dade	Recreation	Our condos pools and amenities are closed this is ridiculous we pay for these services . We have been home for weeks . It's time to open other states are doing it including California beaches what are we waiting for ?
Brevard	Healthcare	Being in the frontline daily i can tell you it is not a good idea to open everything! Wait until second week of May and slowly open things back up 1/2 services at a time with mandatory mask wearing and regulations!!!!

AMERICAN OVERSIGHT

Pasco	General	As you start this process to reopen Florida, please consider this, as businesses open employees will need and want to return to work. The schools are closed, daycares are closed and Y's that offer child care camps for the older children are closed. I know social distancing will still need to be in place for sometime, but without the schools what will kids do? Small businesses should be considered for opening quick. It will be easier for them to implement limited number of shoppers than the larger stores. Strong suggestion KEEP social distancing in place. Aisles one way 6 ft apart at doors and registers are helping to keep our COVID19 numbers down. Thank you for hearing from us the citizens.
Pinellas	Education	Wait a couple more weeks. Don't open up too soon. I know people need to get back to work but isn't human life more important? Give it until mid May.
Manatee	Recreation	Please reopen our beaches and parks! We need the sunshine and fresh air. It's not healthy sitting inside every day all day.
Brevard	General	We can only base decisions on facts and simply put we do not have enough facts to make an educated decision to "re-open" doing so at this juncture would be irresponsible and deadly!
Osceola	General	It is time for the government/state to stop acting as surrogate parents to the citizens of Florida. As an adult I for one am fed up with others making decisions for me as if I am a child. The sad fact is, as contaigious as this disease is, it is inevitable that at some point we will all be exposed to this disease. As with influenza, a percentage will recover with no ill effects, others will require hospitalization and some will not survive. There are resources available if the need arises. Hiding like rats in their holes is not the answer. Leave us be to make our own decisions based on the most current data available. This is not a communist country or run by dictators. WE the people are tired of the efforts to denie our inalienable rights. Allow us to peacefully reopen our businesses as we see fit.
Sumter	Recreation	We are Florida residents who are also Full-time RV'ers. We have been basically displaced by the cancellation of State Park campgrounds. We plan and pay in advance for our campsites from October to June each year. All of our campsites (planned 11 months out) were cancelled without warning up to May 15, 2020. We feel the opening of campgrounds would benefit everyone as we are self contained and require no services when we stay except the dumping station.
Brevard	General	I am an essential worker and have not lost my job. But I am at high rist with heart disease and auto immune disease. And my weekends consist of spending it with grandkids shopping and eating out. I do this every weekend. But in no way shape or form am I ready to go out nto the public. I know Brevard is not as bad as many places but I do not want this virus. And daily our count keeps going up. If you open up everything I myself will continue to stay at home. I work in a office with me and the owner so my risk is low there. Good luck with you decision. I know it will be a hard one.

AMERICAN OVERSIGHT

Polk	Management	Open Florida up people need to work, if sick stay home, we are intelligent human beings that know how to take care of ourselves and everyone around us people are going hungry
DeSoto	Government	I feel Florida was late in "stay at home" and now I'm afraid we will be told to open back up and people will not practice safe distancing or wear masks because alot aren't doing it now. Some are, but half think this is not necessary. I say we need to remain as we are for at least a few more weeks till we really see a difference.
Palm Beach	General	As a resident and US Citizen in PBC FL me my family and friends have all adhered to your social distancing, isolation and restrictions for the last 6 plus weeks and have had ENOUGH. It's time to practice herd immunity and take into account ALL that has been learned about the virus in these 6+weeks. Restrictions need to be lifted NOW. The economy in Florida cannot wait any longer. Sincerely Isolated
Hillsborough	General	I feel that we have all sacrificed so much already and of course we all want normality in our lives but are we all ready to take a chance of loosing all we have gained by reopening our state too soon? I truly beautiful we have to wait a little longer and do it right, baby steps. Thank you for allowing us to voice our opinion.
Flagler	General	Please do not reopen yet. If you do we will have a big spike in people getting sick due to them thinking it must be safe. It is not safe people are still dying from this.
Hillsborough	General	Hello everyone, I just wanted to say that I think we need to be very careful about opening and keep an eye on the whole state which numbers are still rising daily. Their may be cities who have better numbers but not all of Florida. We have too many people thinking that this is taking out of proportion, which it is not. I have many friends who are nurses and doctors and they all are saying this is bad. If we start reopening we know people will not adhere to social distancing because they already have trouble doing so. Masks can protect us all, I am talking about Fabric no one should wear the ones needed for our front line workers. Please think careful. Again as soon as we relax more of the guidelines we will have people completely dropping them. I am open for peaceful discussion of this as I see it first hand how people are and I know enough people in the medical field nor am I one of those conspiracy people. Just an educated concerned citizen. Thank you for listening.
Duval	Professional Services	For the safety of our children, please be sure and reopen childcare facilities simultaneously. We cannot expect people to go back to work without also having a safe place for our kids to go while parents are working. Children will be left unattended or in unsafe environments if childcare facilities are not made available.
Manatee	Professional Services	Please have a detailed protocol for us to follow in hair salons.
Polk	General	We need to stay put another 2-3 weeks. We need learn from history off the Spanish Flu. Let's flatten the curve!!!! Then over the summer gradually open the state back up.

AMERICAN OVERSIGHT

Marion	General	The COVID19 ruse never produced the number of infections which we all were threatened with by the CDC. The real issue behind this National Travesty is that POTUS TRUMP has produced an economy which George SOROS, and other Leftist leaders, including our Leftist Democrats found unacceptable because it scuttled their plans for the demise of The United States Of America! POTUS has had to deal with Fifth Column Media and their collective disrespect for him, and The Domestic ENEMIES who have taken control of The House Of so-called Representatives. AMERICANS KNOW and we are ready to send the Democrats straight to Hell! OPEN FLORIDA NOW AND LET'S GET BACK TO WORK!
Volusia	General	I believe that close contact businesses such as hair salons are too dangerous of exposure. If people could adhere to social distance some places such as restaurants could open on a limited basis however people dont seem to be able to do it. On the news i see so many people crow ding especially the selfish protestors..
Lake	General	I am a nurse practitioner in Lake county, Fl. The social distancing has not shown to be effective as people who have been isolated still spread it to the rest of their family. This is just one example. This closure has created mass chaos & economic failure. Our children's education has come to a halt. People in general are more angry and rude when in public. The state should reopen on May 1st and encourage people to wash their hands frequently and stay home when sick. We need to get our state open so the economy can start to recover.
Palm Beach	Professional Services	I am a hairdresser and suite owner. We work in suites one on one. I have not received any unemployment and have not been paid in 5 weeks. Please I need to work and make money for my 2 children. Thank you!!
Clay	Healthcare	In clay county I work for a dentist. 80% or more if our patients are over 55 years old. We need to ensure all safety protocol is outlined for there safety and staff. We need to be able to purchase proper PPE in order to see these patients. Also have to keep in mind most of these patients may not want to come in and get cleanings and elective dental treatment. Also feel that all staff needs to be tested as well as the antibody test. Keep in mind most dental offices dont provide medical insurance and the cost of those tests are expensive. Thanks

AMERICAN OVERSIGHT

Leon	General	Gov DeSantis' public stance on re-opening our state for business is at best negligent and at worst actively malicious. As COVID-19 continues to ravage not only our state, but our country and the world, we face an unexcuseable lack of testing and PPE supplies for our medical community and first responders. The Trump administration, supported by our Governor, is stealing PPE from local counties, as was reported today in the Orlando Sentinel (Headline: Feds confiscate 1 million masks meant for Miami-Dade firefighters, rescue official say). This is tantamount to murder, and worse yet it is being done so that private enterprise can profit from the re-sale of PPE to states desperate to protect their citizens. Gov DeSantis has shown a willingness to place the needs of business and the economy over the lives of the citizens of this state. Re-opening any non-essential business before epidemiologists say it is safe, or promoting the needs of private enterprise over the lives of citizens is appalling and should carry with it strict legal consequences up to and including jail time. Gov DeSantis should be held personally responsible for the deaths of every single Floridian due to Coronavirus. The lives of our citizens are worth more than the economy or DeSantis' political aspirations.
Manatee	General	Please do not open back up, our covid cases are still rising. We own a small business and financially it hurts, but it will hurt more if we lose family or friends.
Pasco	General	I feel reopening the economy is very importan but not as important as safety I feel small private businesses that can open safely should be allowed. They need to be able to maintain CDC guidelines. Masks need to be worn. I know the owner of the hair salon I go to used to be an ER nurse and know all precautions would be taken. I would not open big shopping malls, theme parks, etc. Restaurants should remain take out. I would start there and wait 3 weeks and see what the data shows.
St. Johns	General	I understand we need to get the economy moving. As an older person that may be at a higher risk, re-opening makes me very nervous. Please do this gradually. I think constant communication with the hospitals is mandatory. If they start filling up, shut back down. I would like a little more detail about where positive cases are located. There are 42 cases in my zip code. Did any of them go to my Publix? We need to be informed. Regulate occupancy of any enclosed area. Maybe give forehead thermometers to all businesses so they can check temperatures of people prior to allowing them to enter. For people that are able to work from home, they should continue. Make that mandatory.

AMERICAN OVERSIGHT

Suwannee	General	Hello, I am an independent contractor with no employees. I have not received any help except the stimulus check on the 24th. My landlord wants his rent money, so my stimulus check will go to him. No what do I do?!? I cant get Unemployment or the PPP Loan. Unless we get another stimulus check, I can't pay my personal bills. Mortgage, electricity, phone, insurance, food etc... Please open Florida back up! We can't take no more of this lockdown!
Sarasota	General	Where to begin? I won't begin with unemployment because everyone has that problem. I will beg of you not to open us up yet. Not only do I feel it to soon but it being done for the wrong reasons. People want to return to work because of the lack of money they have not received; however; if families would have saved their stimulus instead of spending it on TV's at Walmart, they would not be so eager to put themselves in danger and other residents of Florida. I work for a dental office; very high risk; we don't want to be there yet! Our schools were closed, for a good reason but what are families to do with their children now? Who will teach them and care for them? We can't send them to grandma's; not able to. For these reasons, I beg of you as a permanent resident of our great state; to wait. Our jobs will be there and our people will respect you much more for putting us first.
Brevard	General	I believe we need to ply it safe when we return-open Florida. We don't want to jump in just to have a second wave that would be worse then what is going on right now. A soft open would be best and of course with keeping social distancing at a premium. Open up restaurants and bars and things like that but they could only be no more than 50% capacity. Give that a week or so and if no surge in cases go from there.
Marion	Agriculture	You are completely out of your minds if you open anything that can house more then 10 people at a time. You MUST keep anywhere children gather closed. There are to many parents who did not listen to the stay at home order. If you open anything for kids it will turn everything upside-down. The general public may want things open but they don't grasp norbcare about social distance. If this viruse did not effect them directly they don't listen in the most part. You have business operations open now letting in more people then allowed, direction of flow not marked, carts not cleaned. You MUST put very detailed rules in place nothing in a gray area. I work directly for and with the public and I am amazed how they don't care about my health. If opening open the way you closed start very small outdoors.. walking trails, hiking etc. If you allow events, Disney (I'm a annual pass holder too) to open things will get out of control form possible restart of virus to folks stressed when someone gets to close to them. Think wisely opening needs to go slow. I'm a household of one income of a family of four along with taking care of two sick elderly parents...we all canake things work when we really need to.

AMERICAN OVERSIGHT

Pasco	General	Please Governor , reopen the state . The only way things will start to feel normal is to get back to normal . We never shut down after swine flu , avian flu and any other flu. We all have the freedom to still social distance or not go out if we choose not to . But for the rest of us , who are okay with going back to our lives before March , reopen Florida . Businesses are struggling , unemployment is high , and people are going stir crazy . This has set a precedent beyond imaginable . Everytime there is a new flu , it will be an expectation that the state shuts down . I urge and beg you to please consider reopening this state and allow the many thousands of us who want to get back to normal , the opportunity to do so . Thank you for your time .
Pasco	Healthcare	As a nurse I'm very concerned that reopening of the state needs to be done in a very responsible way. There are too many people who are not taking social distancing seriously as it is! Older people are not wearing masks in stores, young mothers are letting their kids run around stores, and no doubt hand washing is not being taken seriously! As cases increase we're still in danger.
Flagler	General	I believe we need to take our time before things go back to “normal” and reopen it will be worth the sacrifice. Please value MORTALITY over money. Also value our Healthcare workers we do not want to cause a second wave by reopening which generally tend to proved worse than the first wave.
Hillsborough	Construction	As a Plumbing Contractor we should start thinking about touchless faucets and toilets at all public and business restrooms. That way it minimizes any contact with any virus. Thank you
Volusia	Healthcare	Please reopen gyms. In a small capacity. 10 people at a time with. 2 hour time cap?!
Alachua	General	It’s NOT safe to reopen a state the remains outside mainly.. its gonna hurt us in the end..
Orange	Healthcare	I think elective surgery should be allowed
Seminole	Recreation	Club swimming has been crippled by school closures and the risk of permanent closure of these small businesses is very high. There risk of Coronavirus to children is nearly nonexistent. Swimming can be done safely and teams should be allowed to conduct practice on school grounds (where most of these club teams “rent” their pool). Allow these businesses to reopen even if schools remain closed. Exercise, chlorine, and fresh air are not harmful, and these businesses should not have to close because schools have decided not to reopen. This should also apply to outdoor practices, clubs, and sports that utilize school property to conduct business.
Pinellas	Tourism	Please take into consideration the health of the employees of the hotels that will be immediately overrun when the beaches reopen. We are going to be thrown into the front lines very quickly. Please allow things to be taken slow.. don't let these massive hotels allow to fill to capacity right away. We are scared and worried for our health and the amount of exposure we are going to be forced to work in. The health and safety of people has no value. Please tread lightly and remember that you cannot under estimate the lack of common sense by the general public.
Manatee	Professional Services	Do not open up Florida. There are so many sick people, if you open up too soon it will be so dangerous for all of us. Let us continue to practice social distance and face covering. Thank you

AMERICAN OVERSIGHT

Lee	General	When determining how to reopen the state, please consider the compromised immune systems of the younger citizens, not just the elderly. I am 37 years old with Type 1 Diabetes. The stay-at-home order has kept me and my family protected from the virus. Once the order has been lifted, my employer will require me to return to work, putting me at risk. I DO NOT FEEL SAFE!! Please keep this order in place for the people with compromised immune systems until we have more testing or a vaccine available. In addition, retail businesses should be required to install plexiglass barriers to protect their workers from the public. If food stores, restaurants, and banks have them...retail businesses should also have them.
Palm Beach	Education	My area is actually arts and entertainment. Probably low on the government agenda however hugely important to many. Children are suffering. We need to contain this for their stress and anxiety levels to not soar. Dance studios should be allowed to reopen with restrictions being- no more than 10 in a room and distancing themselves at least 6 foot apart. Thank you for your consideration
Collier	Government	It would be a huge mistake to reopen Florida - we have not seen the peak of this here and with many in the healthcare industry it's only getting worse - only essential business should be allowed open - to follow Georgia would be disastrous- you are only looking for more death and YOU must be held accountable if you allow reopening!!!! Protect your people first and foremost- anything other than that is criminal
Pinellas	Healthcare	Florida should continue the "stay at home" directive until the number of coronavirus cases drastically decreases. I live in one of the most populated counties. and the number of infected cases is on the rise. I have sheltered for 5 weeks with two trips out to grocery store. My 90 year old mother is in an ALF. I miss hugging her and checking on her daily, but know with restrictions, she has a better chance of staying safe. Too many people are carelesss with their behavior. The disease will spread faster without restrictions. Tourists and bored citizens will flood the beaches. We cannot go backward. Have patience. Wait!!!
Hillsborough	General	Open the state now!!!
Brevard	Tourism	No need to bring back tourist so soon, let's wait and see how other states do with these accelerated opening.

AMERICAN OVERSIGHT

Marion	General	hi. I am a very small business owner..i have had to close my salon due to this virus...I am glued to the tv to find out when we can reopen...before this happened closing the hair salons...I was all ready working a lone, cleaning after each customer, one customer at a time..not allowing any walkins...it worked! NO one is my shop had been infected with this virus... I am begging you to reopen the hair salons and nails salons...we can do this! our industry is dieing because of this clossure. please please I am begging you... just because we are closed doesn't mean our landlords are waiting for their rent, we still have to pay our other bills during this time...we can't keep these business's going with out money to pay these things.... this is how I feed my family...also...how I pay my taxes on my home...if we don't go back to work we all will be living on the streets...no money to pay our taxes..then what? so please open our state...or county by county marion county only has 148 positive and 4 death we are ok here don't allow other hot spots to destroy our county... thank u for listening if any one even reads this... begging to open up my salon Connie Moser
Brevard	General	I think we need to expand testing and see a drop in positive numbers for 14 days before we start reopening Florida. Because Florida is a tourist destination we have so many more people coming in from out of the country and just allowing people to come in and live their lives normally will put our entire state at risk. We should also be rapid testing people flying in. More focus has to be put in paying out reemployment than opening the economy back up.
Pinellas	Healthcare	Don’t re open to soon . What if we reopen to soon it spreads more then ever ? Concerned about my kids health please just wait a little longer I understand people have to get back to work but it’s better to be safe then sorry
Orange	Information	I have experienced citizen & business LOCKDOWN of the entire country, carefully listened to Government predictions that turned out to be grossly inaccurate & ISOLATION advice? The astronomical economic damage of jobs/businesses is UNSUSTAINABLE & businesses should all be REOPENED now or we cannot recover! WE NEED TO BE TALKING ABOUT IMMUNITY? I believe science shows a virus can only be finally contained by IMMUNITY from vaccine /population exposure. ISOLATION only delays ending of CV, natural population HERD IMMUNITY can only develop through population exposure that protects 60-75% of people, finally allowing the immunity cycle to irradicate the virus!
Polk	Government	I’m responding to reopen Florida. I feel as if with the proper placements we should be allowed for reopening. My job as a business owner Is suffering. The banking institutions and financial institutions need people back to work as does the public. I feel we should reopen and let Florida begin living again.

AMERICAN OVERSIGHT

Palm Beach	Healthcare	It you open to soon there might be a second wave, unfortunately in this state there's a lot of immigrants and low income household and while testing is free, those people won't come get tested because they are afraid and for that reason we don't know actual numbers. I know the economy is important and re opening Florida is important, but lives are important too and if we loose more people that's more devastating. I think we should wait a little longer. Thank you for the opportunity to participate.
Brevard	General	Please do not reopen until the end of May. We have not tested enough people and coastal communities are not social distancing. All of us who have been following the rules beg you to require more testing in the coastal areas. We have tons of older Americans and they will be the hardest hit. Brevard should not open all businesses as these people have not known anyone to have the virus and die . I beg you do not open next week!!!! Major companies nationally are waiting until May 15 to make any decisions we should follow that lead.
Indian River	General	It is too soon to start opening Florida. My County has only tested .01% of the population. I am trying my best to avoid contracting Coronavirus and am aware that people may be shedding the virus while asymptomatic. Testing for the virus and antibodies and tracking positives are the only way we can begin to open the state. I am a small business owner of which I am the sole employee. I do not want to subject myself nor my customers to the virus. I will remain closed until our safety is more assured.
Nassau	General	I think that all businesses can reopen with restrictions.I think the state is not giving the people enough credit to follow the guidelines.There are people out there that are hurting from the financial hardships this has caused.Do you ruin there lives by killing them financially or give them the choice.Just because you get the virus isn't necessarily a death sentence.The media portrays it like it is.Let life return to some normality.Enough is enough!!!
Sarasota	General	Thus far Covid-19 has killed .004% of the population of the State of Florida. Meanwhile the unemployment rate continues to climb, leaving at minimum 4% of the population without the means to put food on the table due to either their the overwhelmed technology of the UI system that was never designed to handle such a massive influx at once or because they cannot qualify for Unemployment at all. It has long been accepted that the duty of good government is to server the greater good, even if that good causes increased risk to some. The current situation is seeking to protect a small segment of the population from illness by sacrificing a larger one to starvation. Any nation with of any civil liberties at all should possess citizens capable of making their own choices as to their own safety, hit is not the place of government to control its citizenry, nor to condemn them without due cause.
Palm Beach	Retail	I think lifting stay at home is ridiculous without testing, where I work it is impossible to follow 6 ft distance. We don't need more people dead. Unemployment is beyond crazy in Florida it truly embarrassing.

AMERICAN OVERSIGHT

Osceola	General	It's time to open up our state. Herd immunity and providing paychecks are more important at this point than isolation. Many in my community were sick in December before any of the media had even heard of covid. Keeping people who are already immune from earning a paycheck is not helpful for anyone. Businesses need to open. Hospitals and doctors' offices need to open for everyone, not just covid cases. Telehealth can only help you so far. Sometimes you need to be seen in person to be properly diagnosed. Labs need to be open for tests other than covid and emergencies. There is risk in everything in life. You could be in a car accident, lose your home to a hurricane, have an unexpected stroke, etc. That doesn't mean you spend your own life inside your safe bubble. Let large crowds gather. People know there is always a risk of getting sick by going to a theme park. They also know they will make memories that they can share with their families for a lifetime. It's a calculated risk. Let the people decide. If you are healthy, go to a park. If you are not, stay home. If you don't want to risk it, stay home. We have lost the freedom to make our own choices. There's a time for being overprotective and there's a time to let go. The state was being responsible and protective. Now, it is time to let go.
Seminole	Healthcare	I am a retired Nurse Practitioner. We should quarantine the sick and the vulnerable, NOT the healthy. We could continue with masks and social distancing while businesses reopen. If people don't want to go out, they are not being forced to go out. But my rights should not be taken away because of someone else's fear.
Pinellas	Retail	I own my own Antique shop and we have been closed for two months. My husband had openheart surgery and didn't get home until the 15th of March. Then the pandemic came along and you closed all non essential stores. We do not have a lot of money and it is now running out. The little guy can't get loans because we don't have enough clout. We have had a shop down here for 24 years and now we are probably going to have to close it. all because you think we are non essential. What I want to know is why gun shops are essential. Do you think this is the Wild West???? Why is Best Buy open??? I sell furniture and people still are buying it from Rooms To Go, but not me because you consider me non essential. Why is Rooms To Go essential and I am not??? It is time to let us open up. Unless you want to pay our bills.
Orange	General	We should start te opening little by little, with control entering in stores, stands of hand sanitizer and a desinfecting team on every location like malls, stores etc
Brevard	General	I would like to see atleast restaurants open at 50% capacity and also hair salons and nail salons. People need to start working again and just taking caution. You would have less people gathered together at rivers and lakes etc if you re-opened some stuff for people to do.
Palm Beach	Recreation	Please open the community pools, than beaches and than the parks - children need to go outside and activities.

AMERICAN OVERSIGHT

Pinellas	Food	Dear Governors Desantis , I am a mother of two one child with asthma. I also have a autoimmune disease. We all appreciate what your doing for our state and what to get back to work just as bad as the rest. However we ask you to please WAIT till it is safe for us all to go to work and school. I am a waitress at a local breakfast restaurant and was laid off 3/16 . I to am struggling but I would rather struggle and deal with all this then to rush into opening and risking lives of our people. I have only received one federal unemployment check in these last 6weeks but again I would rather keep us home and safe. You start opening stuff with restrictions everyone is going to flock to these places and our poor sheriffs and local police have already so much on their plates. They don't need to add trying to control restrictions for those that don't want to follow the rules for others safety and lives. So we all again beg of you to please wait to open up when these numbers are FLATTENED not still rising. Even without my sons asthma or my autoimmune disease, I still would not want us to rush into opening for all those others that we will be putting at risk. Thank you for your time and concern and hope we can get our stated back up and running when it's safe for us all!
Manatee	Education	Why open the up early? Is money more important than lives? I say we wait until this is over before opening up the state.
Hillsborough	General	Everybody wants to go back to normal. We have clearly seen the benefits of your actions, but don't react to pressure, see this through and use the phased approach. 2 weeks of downward trends to enter the next phase. That will put us at June. If we react to quickly it will have minimal positive impact to the economy, we see the results now in Georgia. People are not flocking to businesses. However, if we follow this approach you will build trust and the people will feel safe by June due to data to support the result. With this approach people are more likely to venture out and we will return to normal in socializing and the economy faster with better results. If you guess wrong it could be a disaster to our health, the economy and your ability to hold office. If you guess correctly and that is a phased approach it is a win for everybody. Focus now on getting the money to the people that need it. beingkevin.com
Hillsborough	Healthcare	Do not open Florida up under any circumstances until there is widespread testing for the virus. Due to the "unseen" nature of the virus and no available vaccine the public is in grave danger of getting sick and spreading it further.
Palm Beach	General	I believe a set number of maximum positive cases should be considered. If the number of positive cases is below that maximum number for more then a couple days then that county can start slowly opening. As the county starts to slowly open and the numbers do not increase then that county can open up a little bit more and so on.

AMERICAN OVERSIGHT

Manatee	Retail	Hello ~ We are a small Business (4 apparel stores) located in SW Florida, Butterfly 🦋 Beach. Our business has been closed since March 26th due to the virus. Financially we are very stressed however the thought of opening our business with the rate of infection and deaths continuing to climb in Florida is terrifying. We do not feel there is enough concern for the health and well being for our workers, customers and children. Who will pay for the lawsuits if I re-open and am sued. We do not know enough about the virus at this point to keep our citizens safe.. we need a little more time. Would you or your children work in my store today?
Pinellas	General	I agree with a tiered methodical re-opening where restrictions are enforced and monitored. Either way, I will continue to social distance and stay at home for another 30 days to allow more testing and just as a buffer to keep myself safe.
Duval	General	We are absolutely not ready to reopen anything. You have florida lives on your hands already. Why take the chance and continue to see the virus cases and deaths go up. We need leadership. Florida needs to feel as if they're lives and health matter more than the financial drop. Where are the leaders people desperately need in this time of crisis. We are scared. Of course we want to go back to work and back to living our lives as normal., but work is not worth lives. We are all struggling right now in some way. Please do not sacrifice our citizens for the economy. In the end it will back fire. Hospitals will become overwhelmed, people will point the finger with blame where it would rightfully be deserved. Please out people's life first.
Marion	General	Please open up slowly with guide lines. People need to wear there face coverings. Stay 6ft apart. No more large numbers of people together. Limit to 10 like you said. Places that can be open. Limit the amount of people in ther places. People just have to get used to it. It will be hard at first. But it can work. Thank you.
Hillsborough	General	Is not safe tu open,no yet,many people can die and we will have a new wave making everything worst
Pinellas	Government	It’s to early to reopen, just look at the numbers. They are still climbing. Also I work in the restaurant business. What happens if I catch the virus and bring it hone to my wife who has a underlying issue. Please be smart and let scientists make the call . Thank you.
Duval	Retail	Although I appreciate the company I work for, I still dont feel safe or comfortable working retail. The closeness to the public, fingers on tablets, credit cards, pens, paperwork etc not to mention the virus living on fabrics leather and mattresses is unsafe. The company can and does sell online so all is not lost. We all need more time to defeat the covid19 at this time in my opinion.
Hillsborough	Professional Services	I am a licensed massage therapist who works for a major massage chain in Tampa. I am concerned that if Florida reopens too soon I will be put in a tough situation where I would have to make a choice between Keeping myself and family safe or being employed. My employer is targeting a May 6th opening and I fear that given the current trajectory of the cases, that day is way too soon. I hope the State of Florida makes the right decision and maintains strict social distancing requirements even if some businesses are allowed to open.

AMERICAN OVERSIGHT

Seminole	Education	I'm concerned about social distancing in a VPK classroom. Is it possible to change the ratio to 1 adult to 10 children for next year?
Orange	General	I agree with reopening Florida Orlando but there needs to be something in place to control the crowds. Opening restaurants would be a great idea but control the people sitting inside the restaurant like minimize the tables and chairs cuz that's part of my business which I've been out of work they only call me in one or two days a week and I have to pay rent and I don't have April friends and I'm having issues trying to get help with it opening theme parks that's an easy way of controlling a guess as well so that would be another way of opening up but as for beaches I really don't think we should open as of yet. It's hard to control crowds on beaches especially in open public place like that. I have diabetes and I am terrified of getting the Coronavirus and I do wear masks and I think it should be mandatory that everybody in Orlando needs to wear a mask. I do know somebody that passed away recently from the coronavirus and it broke my heart and I'm really serious on trying to get shoulders so if we can pass the law to have everybody wear masks that would be amazing and also keep the curfew at night because it also helps the crime go down and keeps people inside that should be indoors this is just my opinion
Lee	General	TOO SOON!!!
Volusia	General	I believe that we should not open until the end of May at the earliest. I would also recommend the use of mask but all residents went out in public.
Palm Beach	Recreation	Boat ramp closure is no longer necessary. With continued restrictions on a anchoring and rafting up In place, families who have boats would benefit from recreational fishing.
Hillsborough	General	I don’t think opening the state just yet should take place . We still are having daily number of cases of this virus .As someone who works in healthcare I fear that opening any Business would cause the virus to spread I don’t think people will follow guide lines at all we have seen that now . I understand that many want to get back to normal and people want to work but I think it’s just to soon .As many other country’s have done as soon as opening the had a second wave come through . We already have but appears to be a spread within the ALFs and other senior living areas . Until we have better testing and can test more effectively I don’t think we should reopen anything .
Miami-Dade	General	Masks..everyone MUST wear in situations where unable to maintain safe distance. TESTING....testing for all...need to know who is sick or who has been exposed CONTACT TRACING.... occupancy limits...gyms, restaurants, churches...need to enforce new lower limits on number of people in the establishment

AMERICAN OVERSIGHT

Duval	General	I do not think that there is any real choice in starting to open up Florida. This virus is not going away any time soon and the closures will have a longer lasting impact on more lives than the virus based on the current exposure to illness rate. I think that the way the restaurants and other businesses were being run before the mandatory stay at home was working and should be brought back ASAP. Those employees that have a legitimate reason (health issues, live with someone with health issues, etc) should be given a legitimate time that their jobs can be held before they come back to work, but as I stated that is really a moot point since the virus is not going away and a vaccine will not be available for at least a year. Social distancing will be honored by most people and masks will probably become more of a norm for a while. I have not lost my job at this point but I am a realist and know the economy cannot survive any longer shut down. I truly believe that the only people who truly have a voice in this reopening are those that have and need to get back to work. All others can do what they must and if that includes staying in home detention, that is there choice.
Brevard	Government	With so few tests administered and schools closed, I believe it's too soon to reopen at this time.
Brevard	General	I feel everything should stay in place until at least the end of May when the students were going to get out of school. The majority of the people are not following the suggestion of staying at home and wearing a mask. I feel that as this becomes our normal that people feel that they are safe and don't have to follow any guidelines.
Sarasota	Information	My opinion on reopening the state is one of great caution. I think the stay at home order should remain in effect until at least the end of May for the entire state. Then providing our numbers are still going down a county by county opening, with a lot of restrictions could be implemented. Most of us are at the mindset that we do not want to have to start over with the stay at home after we have come so far. Another month wont kill any of us but opening too early could. I would also like to see a mandatory order for people to wear masks when in public. Providing people don't abuse the rules at the beaches, leave them open so some have something to do. It's probably the safest place providing the rules are observed. Also although it doesn't affect me, the people need their unemployment and quickly. That is why they are screaming to go back to work, they have bills and need to feed their families. Please get them their benefits and they will be a lot more comfortable obeying stay at home orders. Thank you for your consideration.

AMERICAN OVERSIGHT

Palm Beach	General	We have a daughter who attends FSU in Tallahassee. She s in an off campus apartment with a lease ending in August . The rent is $900 a month. She is there through April to complete finals and then will be returning home to Boca Raton for the unforseeable future. The apartment complex is not offering any discount on the monthly rent during this tine of crisis . All amenities are closed and most tenants are not there since spring break when the stay home orders began. Please consider making these off campus complexes reduce the monthly rents as it is a burden on students and their families who don't have income at this time. Thank you
Hillsborough	Healthcare	I believe the threat is this virus is still high. If any reopening, start very small...such as the recreational excercise at the beaches. Too much too fast and it's going to put us all right back to the beginning. No opening of theme parks ,sports of any kind is going to be Beth hard to control crowd control or 6 feet distancing. I think we still need to wait until mid summer . I am an essential worker do I see first hand the carelessness aa of right now.
Hillsborough	General	What an incredible decision to make. As the beaches open, I do think people should be able to sit & watch the water & be out in the fresh air. But understand it is hard to monitor large crowds & knowing not everyone will do the right thing. I do think opening restaurants & bars could open if they have outdoor seating. Whereas I would love to get my haircut & nails done - that is a dilemma for sure. Maybe forcing masks could be a solution. I have faith that whatever decisions are made, will be done with what is best for the State, Counties, and individual communities. Good luck!
Volusia	Tourism	Open the state slowly in June. Start with retail stores who would follow social distancing guidelines of course. Floridians can get out and about and shop while slowly stimulating the economy. Then , slowly begin opening restaurants with limited capacity. Do NOT open hotels and beaches, it just brings more and more people from other locations that puts Floridians at risk. Opening Hotels and Beaches will cause overcrowding at convenience and grocery stores. We need a good solid month of a decline in cases before we begin inviting people here. Opening up our state too early could be catastrophic to our citizens. Start slow and continue from there.
Palm Beach	Recreation	Public parks, beaches, golf courses could be opened but keep social distancing requirements in place (mask 6foot rule). Suspend permits for parties on public parks. Keep the schools closed for the remainder of the year. Taxpayer dollars could be better spent on PSAs to continue to inform at risk population of proper hygiene and how they can protect themselves. At risk population could be provided pick up locations for free or discounted masks and hand sanitizer. The immune system will stay stronger with regular exercise and outdoor activities, being quarantined and idle for long periods will only bring morale down as well as put more people at risk for participating in self harming activities. Mike Aliff BSN, RN

AMERICAN OVERSIGHT

Hillsborough	General	Even in the earliest phase, I would encourage the Task Force to allow all businesses to resume operation if appropriate social distancing or other targeted measures can be observed. For example, barbers and hair salons could reopen if (a) the barber and client both wear masks or other facial coverings, (b) the barber/stylist wears gloves, and (c) the shop or salon is otherwise arranged to achieve customary social distancing. You could also require that services be provided by appointment, with no walk-ins. We need to let Floridians get back to work while applying reasonably tailored measures to protect health.
Volusia	Construction	Please do not put our citizens at further risk. We need more time and precautions put into place before reopening. We have not only endangered our own residents but we slap the states who are doing the right thing in the face when we let their fools come here on vacation and galavant all over becoming infected, just to go home and spread the virus to areas who did quarantine. Do the right thing for lives and not money.
Palm Beach	General	I do not think we should reopen the state until the end of May. Our numbers have not gone down significantly yet. If we just wait a little bit longer we will not have a second wave and have to shut down again. Keep us safe. Give us just a little more time.
Lake	General	I would like to see as we start re-opening in phase 1 and two that when people go into retail stores people are required to wear a facial mask also when people are in large crowds that Fishel mask should be on .. Also I think it would be a good idea when people are standing in lines at Disney or universal studios have mask on .also in the retail stores at the parks as it can get very crowded in these places. I myself have a special needs son that's a heart transplant patient and also take care of two elderly family members . . I am the main person that Goes out and takes care of all the stuff that needs to be taken care of for the family and this will give people like me extra reassurance and safety. Thank you for allowing me to share my input and Thank you for all your hard work . Mrs, Grant
Palm Beach	Healthcare	I think businesses should reopen gradually, starting May 15 with masks and social distancing. Everything- other than crowded movie theaters, sporting venues and convention centers- and unfortunately Disney and Universal should not open.
Broward	General	Reopen everything and require everyone to wear masks in public. Obviously, if you go to a restaurant to eat, you will take it off. But it will need to be put back on once you get up from the table. All employees should have masks on at all time. The same thing would apply to schools, especially 6-12 grade. Children in this age group are responsible enough to wear masks daily. Taking online classes for this group is difficult especially when they are taking advanced classes such as AP, Dual Enrollment, IB, etc.

AMERICAN OVERSIGHT

Putnam	Healthcare	I don't think it's the time to open fl up. I don't agree with the mayor of Jacksonville to reopen the beaches up. I don't think he is a very smart man. I work with apd Adults they have been confined to their group homes. Ofcourse I have no money coming in, because of our governor Ron and his junkie unemployment system. I applied march 23. The governor has money so it's Not a issue to him. He was voted In and will be voted out. I hope he has more brains than the mayor of ga. We are not ready to open up fl. We are morons to have opened the beaches up. Shame on you. Stop counting your money and give me my unemployment money !!!!!!!!!
Miami-Dade	Education	Being a daycare owner. I feel it's too soon to open because of the neec of testing here. I'm afraid of opening and kids bring in the virus to the daycare by being a carrier is going to wipe out the daycare staff and kids and create a liability for us in possible of a lawsuit. 30 more days wont hurt
Palm Beach	General	I am fine with my son learning from home. I am fine with the social distancing. We could let up on some restrictions on parks. Hairdressing and nail salons need better social distancing but should reopen. Holiday big gatherings like Memorial Day and Fourth of July should be cancelled. I do not want anyone in my family to get sick or die. Better restrictions on when people have to be in the same place masks are fine.
Sarasota	Healthcare	I believe it is time to open our business. Our small businesses is what keeps this country going. The loan's were taken by large companies. I am over 65 with a compromised immune system so I wear a mask if I go out and I stay home. Let the young families get back to work. Our food supply is going away being dumped into the fields.

AMERICAN OVERSIGHT

Lake	General	With schools being out and no summer school or camps. Kids need social interaction with other children. My son is tired of being cooped up with two grown adults and craving play with friends, open up the playground or allow parents to get together for play dates. We need a form of entertainment outside of house for escapism be it movie theaters or theme parks or just ability to go out to a hotel for a swim in the pool. Maybe open like Disney Springs to Florida residents it's spread out and many of the food places is already order and go so they can get out and walk. Disney already had increased A frames with what to do, hand wash signs in bathrooms and sanitizing stations through out. I feel more so than just stay away from each other we need to get people to have basic hygiene of washing, covering mouth to sneeze,cough had we of had that it wouldn't have been this bad to start. We went to Citywalk for Minigolf and stayed at Disneys French Quarter before the stay in place orders went into effect and never felt in danger of catching the virus and the guests even from other countries all respected each other more and being a native central Floridian and pass holder for all central Florida theme parks for over 30 years before we went stay at home and just pushed smaller groups and hygiene i never saw as many other guests at parks acknowledging others and making eye contact to say I know your physically there. I appreciate your allowing the general public to voice ideas of reopening, I am a retail supervisor and have been furloughed since April 2, I can't wait to get back to work but first priority is my sons well being and mental status. The message when we open too needs to be if you don't feel safe going out you don't have to, General public needs to take some responsibility on themselves. Theme park rides have a list of warning outside saying if you have these symptoms or ailments do not ride, they don't say oh this ride may injury someone with heart conditions and close the ride from everyone else to protect those with heart conditions, they open the ride and warn those not to ride that maybe susceptible. Open the stores, parks, theaters, resorts and warn everyone what may aggravate COVID and tell them stay home if they feel they may be more susceptible.
Lake	Food	I recommend that we open Florida back up! Ive been laid off for over a month now and have yet to recieve unemployment benefits (of course it still pending) or my stimulus check, even my tax return is in limbo! People need to be able to help provide for their families and since the state has dropped the ball,TREMENDOUSLY, on paying people unemployment benefits, most people dont have a choice. I personally will be looking for retropay from unemployment and will begin to seek council from an attorney after May 1st. This is ludicrous.
Hillsborough	Education	Please keep closed a little longer. We are still getting positive cases and we have a lot of elderly in our state.
Hillsborough	General	Please open up Florida, while the mitigation has surely helped this virus has been here longer than we have known about. There are so many people I know, including myself who had these same symptoms back in December and January. I have never felt that bad before!! In fact, more antibody testing would be great!! Those who are vulnerable can be careful and take precautions themselves, now it should become a personal choice if someone wants to go out. Also, please don't decide about Fall semester for colleges until as far out as possible for students and the colleges.
Volusia	General	Please reopen the state. We are facing an economic crisis equally as devastating as the pandemic if we do not. Thank you.

AMERICAN OVERSIGHT

Hillsborough	Education	I am a teacher so of course education is of interest to me. But I am also interested in childcare opportunities and availability for families. My daughter-in-law is forced to take a leave of absence when she cannot financially afford to do so because she has no childcare available for her daughter who is entering kindergarten in the fall. Her daughter's little school shut down when all the other schools were ordered to shut down This is an extreme hardship on her and her little family. I find that this Is a topic that is not addressed enough. It seems that most people think that there are always opportunities for people to work from home but that is not always the case. There are people who still need to go to work and then they do not have childcare opportunities or availability. Some day cares have stayed open but only for Frontline workers and their families. There needs to be consideration for families who are struggling to make ends meet because their child has to stay home because schools are shut down. Please provide guidance and opportunities for daycare's and a little preschools to open back up as soon as possible. Certainly for the summer months. People cannot afford to just stay home with her children indefinitely. Thank you.
Polk	General	As many Americans and global citizens, I am overly concerned with non-strategic, unthought out, not orchestrated open of the state. Being in healthcare I have seen the affects of this virus and am aware of implications if not contained and or widely spread. I understand the need to be careful of the economy and the affects of prolonged closure because I run a small healthcare business. I'd like to see a careful design of the next level/categorization of businesses that could be semi/quasi essential with a development of limited contact in order to satisfy economy and personal needs/wants. Then a slowly phased approach. I live close to the parks and hope they are lower in priority (as in the last phases post containment or vaccination proven to work). Florida can not suffer death rates as New York has.
Hillsborough	General	I unfortunately believe it is too early to open up the state. Trust me my heart goes out to all that are not working and families struggling. Unemployment needs fixed. But I have concerns for my health and my kids and we cannot isolate why the world goes on as people suggest we should stay home. Also working in education, people do not care as they should - kids go to school all the time sick and with active fevers. And the parents do the same. Also school is closed to only virtual teaching, what are families to do that have young kids and have no family to watch them. The kids schooling will suffer more then it already is, parents may still not be able to work and permanently loose their jobs. What happens if we do have this second wave like the Spanish flu, education, economically will suffer even more. I do not have the answers I wish I did but if we truly have so many active positive cases as we do, we are not ready to open for all. One more month please.

AMERICAN OVERSIGHT

Palm Beach	Government	I'm fortunate my job allowed me to work remotely during this time. With schools closed for the remainder of the year, what are we suppose to do with our children? The office I work is going to want us to come back to the office, but summer camp doesn't start till June. It's not safe to open schools, so are you all saying it's safe to open camps in May? The schools should have opened, even if part tine. One month of school would have kept the students up to grade level and helped ease EVERYONE back to life. I was able to work from home during the pandemic, and now when business starts to open up, I'll loose my job because of lack of childcare? The schools take attendance through zoom. I am homeschooling them. My children rely on me for everything including their school work.
Seminole	Government	We need to get DMV opened again. I just graduated college and have chosen to stay here I. Central Florida, but I still have a California license. So my job options are limited during the lockdown because I can not drive a company vehicle until I can get a Florida license.
Hillsborough	Professional Services	We should not reopen at this time.
Brevard	General	I think most counties are doing a great job staying home and observing the social distant rules. We as a nation and state; need to do this right thing and not get back to normal too soon. I think, more testing is needed in our country and in Florida. Require at minimum one person per household be tested. I know, I do all the shopping for my household. It probably would give people a sense of peace knowing, that they were fine; after being tested. They may even be positive and not know it. I would hate to go back to work and not know, that I'm contagious. We need to know, if others have been tested, when we go back to work and track it. I have asthma and this virus, really scares me. Some people I know, think we should open everything now. There's no way, I would go out to dinner or be in a crowd now. It's just not over yet.
Volusia	General	I believe our economy needs to reopen. If only slowly at first. I think starting with smaller places such as local stores and smaller large company stores. I do believe big tourism things still need to wait having a rush at theme parks probably wouldn't work well. But I believe national parks should reopen, the springs. There's so much we can do to still distance ourselves while beginning to start life again.
Orange	Government	You are making a grave mistake! Over 76% of Floridians DO NOT want Florida to reopen yet. Over 73% of voters also DON'T want this. If you reopen now, there will be even MORE suffering and death! I am 51 with 4 underlying health conditions and I could DIE if I get this virus! You need to listen to the CDC, WHO, and disease experts. DONT DO THIS! You will have even more blood on your hands!!!
Hillsborough	Healthcare	In regard to re-opening the state during the COVID-19 pandemic, as of this date: Apr 25, 2020, my view is that we should not do so until we can insure the health and well-being of hospital staff. They need PPE and time to rest. Florida has not hit the peak of this virus and it is likely to return in the Fall along with the flu which will cause an insurmountable workload for our hospitals and have a ripple effect throughout the population. It is better to err on the side of caution.

AMERICAN OVERSIGHT

Hillsborough	General	Dear Mr. DeSantis: I am a single mom with a child that has level 1 autism. I have not worked a full time job until this week.4/20/20) I was fortunate enough to have someone willing to re-train me in Title processing. Due to my (Now) ex-husband's military move in 2007, I didn't work again until 2012 when we separated. If it were not for child support, I'd be homeless now. The adult education program is supposed to start having classes on "Microsoft Office" soon as no one has had any that were more than 1 day long without going to a University. The Unemployment Career Center only offers it for people on welfare. I have do have a little money set aside for my retirement (I got it when my mom passed away and it is under $50K) While I could run through that money in a year to 18 months, It still would not solve the issues of me be homeless in the near future. I am grateful because I still have much more than most and I want to get more comfortable with computers so I can get ahead, but almost no one wants to take the time to train. I have not used anything other than "Word" My current boss said she is giving me a month to learn the software so I am doing my best. I had been out of work since Sept.2019 and while I have a Real estate license, I only do family & friends, it is not a steady income for me. I had to mail a letter to unemployment , which was received on 4/17/2020, but I have not heard back. So except for money from my ex, I had no income coming in, were it not for child support I'd be homeless. More needs to be done as I fall in the gap as far as finances go . I should not have to deplete all me money just to live on welfare in my old age. I have worked since I was 16 yrs. old. am educated & and have skills.This is not meant as a "Poor me" letter; however, I think more needs to be done for single parents with children that have autism and would very much like to meet with you in person in the future. I spoke to Cathy Castor a few years ago on this matter, & while I never knew her in school, I met her at my class reunion. Respectfully, KIm
Orange	General	Please open lottery ticket redemption place which says Orlando
Polk	General	I think a slow opening is correct way. Resturants is a must open but with rules. Time limit for inside seating with proper distance. This is like a really bad bug so cleaning is a must. Small business is a top priority or they won't be able to reopen. Just remember you can't always please everyone and there will always someone that's going to disagree. And let's not forget the round 2 that everyone is talking about think ahead and don't get caught with your pants down. Thank you for all you do
Palm Beach	Recreation	Open boat ramps. People can safely put their boat in the water with social distancing. No tie up or sandbar. But people should be able to use their boat without obtaining a commercial Fishing license
Manatee	General	I would like to see the Governor make it mandatory that mask are worn in public. Especially the grocery store. Also wait till Florida Covid cases are on the decline for at least a week.

AMERICAN OVERSIGHT

Miami-Dade	Healthcare	I understand that we need to open up Florida due to the economy situation that we are facing but I believe that keeping Florida close until June 1st at least would help the spread to be reduce before we can safely start opening locations. The healthcare system will get overwhelmed due to the amount of more infections if we let Floridians go out and start getting infected. If the number of cases are going up by 500-800+ a day and people are “Home” imagine when we let everyone out
Leon	Recreation	I believe we need to start reopening as soon as possible. Standards of safety can still be applied. High risk or overly concerned people can stay quarantined longer voluntarily. I’m a 60 year old diabetic heart attack survivor. I used to go to the gym daily. This quarantine is damaging my mental and physical health. Not to mention the financial and economic devastation it is causing. Open gyms and fitness facilities back up. The virus will always be here in some capacity. We need to be mentally and physically healthy to defeat it.
Brevard	General	The fact is many businesses are already open from Publix, box stores, pharmacies, roofers, contractors etc... Until recently employees weren't wearing masks, and gradual steps to implement social distancing. Lessons learned for best practices for COVID19. If these practices were made Best Practice Guidelines for businesses (masks, social distance marks on floor, one way aisles, limited customers) - then why not allow any business that can implement social distancing and other guidelines to do so? Obviously, there are people who are more susceptible to COVID19 and they should also have the choice to not work. Research shows that people with 0 type blood have fewer symptoms and less contraction of disease statistically, as well many healthy and/or young people want to get back to work. America is the land of the free, so choice is important so long as responsible implementation so not to impact innocent people. Obviously, certain industries such as salons, tourism etc must not yet open We also need clinical studies on immunity testing as some are junk. Please work with our medical university departments to evaluate as this could also be an important tool for getting people back to work. (As an aside this was called the "pneumonia pandemic" before it was named COVID19 - yet we do not prioritize pneumonia cases for testing (symptoms are priority 3 CDC testing but not enough tests for this). Having been diagnosed for pneumonia and not being able to get testing makes it very clear that our numbers are far underrepresented in Florida. For insight on when this started and how many people impacted - please compare the late 2019 and 2020 data on pneumonia cases to prior years - nationally this shows that COVID19 was here in November. A lot of people have been through it - and ready to get back to work.
Duval	General	Don’t re-open too soon
Manatee	Information	Please do not rush to open Florida. We want to be safe.
Polk	Tourism	Either unemployment claims need to be paid to 90-100% of Floridians by May 1st, or we need to all be able to go back to work. People are dying, and not of Coronavirus!

AMERICAN OVERSIGHT

Brevard	Healthcare	My husband is an essential worker. During this shutdown the only source of consolation we have with him going to work each day is that he's not exposed to as many people as he normally would be exposed to if restrictions were lifted. My husband is in his 40s. He has high blood pressure and is pre diabetic. If he gets sick he could die. He works for a defense contractor, helping to keep our country safe. I ask that you use caution when considering easing restrictions. Please keep people like my husband in mind. I think a prudent course of action would be to watch what happens in places like GA in a couple of weeks and move forward from there.
Orange	General	Please do not open until late May. Not enough testing done. Almost 22 million in Florida barely 300 k tests. Way too soon to determine true exposure of virus.
Pasco	Tourism	Hello Governor DeSantis, My husband and I own a neighborhood bar with 5 employees in Pasco County (The King's Seat). We have been open for 4 years, and I am a Veteran. Our bar does serve food, but we are not considered a restaurant because we don't derive 51% of our sales from food. Due to this, we have been shut down since March 17th with no options to try to keep our doors open. With no PPP or EIDL assistance, it has been very difficult to say the least. We understand the need and desire to open Florida safely (and we definitely need it for the economy and our small business). We are on the brink of having to keep our doors shut permanently and loosing our lifetime dream that we have worked so hard to get open and keep. There are a couple of items/comments that we would like you to consider: 1. If restaurants are open for 'dine-in" only during phase 1 (which most of these have bars in them as well), we believe that bars should be able to open in phase 1 also - as long as there are safety/sanitization/and CDC recommendations being followed. We believe all of these are best accomplished by business owners (not just bar owners) by going to 50% capacity. 2. If bars are not allowed to open during phase 1, there will be MANY TRUE SMALL BUSINESS OWNERS (businesses with less than 20 employees) that will never re-cooperate financially and neither will the communities that support them. BARS are a VERY LARGE PART OF TOURISM DOLLARS IN FL, and should be recognized and assisted as much as other small businesses (restaurants, salons, barbershops, ect). Thank you for all of your heard work during this pandemic and dealing with all of the States concerns. Respectfully, Kristal Sedlak & Matthew Coheley Owners of The King's Seat Bar and Grille 3434 Grand Blvd Holiday FL 34690 www.thekingsseat.com
Seminole	Professional Services	Please do not open the state until we are able to fully access the items needed to perform as nornal of daily life as possible. As a hairstylist and salon manager, the protocols for opening the state while still not understanding the virus in a salon environment could create disastrous situations for both stylists and clients alike.

AMERICAN OVERSIGHT

Lake	Professional Services	Hair Salon, Barbershop, Restaurants. Even before the lock-down my salon followed more then protocol in cleaning, 6ft apart, gloves, and cleaning after each customer. The same with my husbands barber. Restaurants spreading out tables, cleaning, waiters wearing a mask, they will not risk losing a business - they will follow the guidelines. You say golf and WWE was essential yet an elderly gentlemen that relies on grooming is NOT. An elderly female that can't wash her own hair relies on her stylist to wash her hair once a week is NOT essential. You didn't think about these people. You say you did because of their age - but these salons would not risk the health of these clients/they would not risk their businesses in that way. They care about them, too. They would follow the guidelines. You need to open them as soon as possible.
Osceola	General	I say open it slowly don't rush to open everything at once. Make sure that the businesses practice social distancing and that people continue to use mask when out in public. If you see that cases have increased after opening then we go back to a stay at home order but open things one at a time. Do it in phases.. phase 1 then wait 3 weeks and then phase 2 then wait 3 weeks and so on. If you rush it then I think we will start having cases again.
Orange	General	PLEASE do not rush in reopening - nothing would be worse than reopening and then having a resurgence of cases in Florida. I know everyone is anxious to reopen, but we need to reopen SLOWLY, METHODICALLY and CAREFULLY.
Palm Beach	General	I am sure some counties would be fine but I am not sure about Palm Beach. The sense of entitlement is such people are not concerned about their effect on others. But I know it needs to start. Open the beaches for a few hours a day for exercise and walking. If you open the golf courses you are going to have a problem. I have been in the club business for 17 years. Most club members are only concerned about themselves and not the safety of others. This will get out of hand. If you open and the number covid19 cases increase dramatically ..... how do you put the genie back in the bottle?
Palm Beach	Tourism	I think in about 2 - 4 weeks (after memorial day) that the beaches can be reopen only if they have a temporary rule to mandate face mask coverings on all people if they can get the amount of patrol officers out and of course also 6 ft distance apart. . summer begins rainy season so we dont get a lot of people there as much! Thank you and God bless your best and wisest decisions. Maurice
Seminole	General	If Florida has to reopen in order to survive mandate everyone to wear a face mask covering their nose and mouth at least a minimum for the next three months when they're out in the public.
Hillsborough	Recreation	Please open all walking trails at parks. You can close the playgrounds and pavilions but please give us a chance to be out in a beautiful natural setting. It is good for the body and for the mind. Thank you!

AMERICAN OVERSIGHT

Highlands	Professional Services	I am a cosmetologist I work in a salon of 8 hair stylist .our stations are 3 and 1/2 foot apart. With the way things are going having trouble finding masks in Highlands county or sanitizing wipes or sanitizer or gloves. It will be really hard to continue services when we can't find supplies to keep us safe. As much as I would love to get back to my professional career I have found an essential job to tide me over to support my family. A lot of hair salons have elderly people and it will be very hard to keep sanitation the way it should be. With places opening up and not having the masks and gloves On the shelves, it will be hard for all salons to follow instructions. And some salons unfortunately don't care once you let that okay to work happen. making sure that the salons follow instructions will be difficult and if all 8 stylist have a client in their chair even just one at a time that will be 16 people on our salon floor. Our salon has invested and an ozone machine but only can be turned on at night. Please do not reopen hair salons until the numbers stop going up.
Clay	General	This is very frustrating! I do not understand why 'nonessential' businesses are not allowed to open here in Northeast Florida. The murder rate is higher than the so called COVID deaths. This media generated hysteria has gone overboard. Open up the economy...more death and suffering will occur from the shutdown than actual death from the virus. Let the people That are not afraid to live LIVE. and the people that are elderly, sick, with underlying issues shelter in place. ... that's their prerogative. However, it is also the right of the people that Want to get on with Life to go about Life... there are dangers everywhere....that's Life! You take safe precautions and go on.. As the saying goes...You don't burn down a village in order to save the village The government needs to quit burning Down the village!
Brevard	Tourism	It is ESSENTIAL to open up vacation rentals and hotels to get tourism back. Our entire state is dependent on tourism to fuel our economy. When we don't allow tourists to come we kill Our entire state's economy. Even if theme parks are not open, the beautiful Beaches are and we need those tourists to enjoy our beaches and purchase food.
Pinellas	Finance	Open the state back up please! Every one is struggling and it is not fair, let us get back to our normal lives!
Sumter	General	Until we have an active and comprehensive testing program in place, and vigorous plans to quickly identify and quarantine newly infected individuals and their contacts, this is not a plan to "re-open" the State. It is a plan to crest a disaster of biblical proportions. Listen to qualified medical experts, not economists.
Brevard	General	I would love to see places open as they use caution. Yes, social distancing needs to stay in place but stores, restaurants, beaches and beach parking need to open. No one should be forced to work but people should not be denied that either. Although school building closed to students teachers should be allowed back in. We need to be thinking how we can have hybrid classes next year. We can do this safely but we have to open before the economy completely crashes.

AMERICAN OVERSIGHT

Orange	Healthcare	I don't feel we can safely reopen most businesses until we can deploy proven antibodies testing en masse. If we can identify those who are likely immune, those folks can start up our economy both in the capacity of worker and consumer.
Broward	General	I feel that it would be a great error and harmful to our citizens to open the state up. We have been lucky to start things sooner in the process than New York did. However, we still are having new cases and deaths every day. Even opening counties to the North of us will be detrimental. People are willing to drive an hour or 3 to spend time at a beach or a park. That is not only risking them but others in safe areas. By allowing people to travel to our state you are risking our safety. Do you really think someone on vacation is going to self quarantine?
Hillsborough	Finance	As much as I am depressed and ready for this to be over I believe it is way too early to open everything back up. We must wait until we are certain there is an effective form of treatment that will work for most people and until we have enough tests to test anyone not just people with severe symptoms.
Lee	Accommodation	I am not a full-time resident of Florida, but I do have partial ownership in Ft. Myers Beach. Please keep in mind that there are many people like me who have a vested interest in the area and would like to see my building reopen since it was lumped in with "rentals & hotels" in the 90 day closing. I am in agreement with social distancing guidelines and have no problem with screening procedures or limiting restaurants, bars, beaches, etc. I would simply like to enjoy my residence and soak up some sunshine on the privacy of my own patio. Thank you for your consideration in this matter!
Charlotte	Recreation	Please reopen state parks and pickle ball courts...with social distancing criteria.
Clay	General	Please reopen the local gYMSand open the beach fully!!! This is outlandish that you can shop at all these retailers but can't go the beach drive away from the crowd. Please get Florida reopened and let the ADULTS POLICE THEM SELFS. again do your own research but you can see that every retailer is being absolutely run thin because no American is staying home with a stay-at-home order they're deciding the shop Non-Stop. I am absolutely okay with this as this is great for economy but if we're going to allow this open up other retailers so weit will drop the unemployment rate and let's get people outside and take some of the burden off these other stores. OPEN GYMS AND THE BEACH AT MINIMUM.
Okaloosa	General	As we learn more about the covid 19 virus , we are coming to understand that heat and humidity play a role in the decrease of the virus. As we get into the warmer months that means we will be seeing less and less. With that being said our economy can't take much more being completely closed down. We need to get back up and running as soon as we can. A short trial period for businesses to open up and keeping a close tab on increased cases of the virus should tell us if it's safe to keep them open without restrictions. We must think about the small business owners and how this is crippling the economy to the point of no return. And no I do not own a small business.

AMERICAN OVERSIGHT

Orange	Tourism	Governor DeSantis & task force, As you know having our economy re-open is vastly important to our state however our health is also at the upmost importance at this time of uncertainty. As our curve has been flattening it is encouraging however not a sign that we are in essence home free and escaped from potential risk. I believe our tourism in central Florida is very important to our economy especially here in Orange and Osceola County. However during this uncertainty, I believe it is way down on the bottom of the scale of importance especially when opening back up our theme parks. So much is a risk and having spacing in que lines, wiping down every attraction after every guest, etc. although great ideas; is only going to make lines longer and increase wait times thus increasing wait times on transportation only making guests who stay at resorts angry and making it a frustrating time. Most attractions go into in door close tight spaces where a simple cough or sneeze can spread a virus extremely quick amongst several hundred people. We must be smart and be able to open these places with extreme care and the latest as possible. An infection can spread very rapidly at these places and not only for guests attending but employees at risk also. My concern is opening up tourism too quick will cause people to rush into these places and pose risk to spreading the virus especially after being at stay at home orders. This is not a priority for our economy at this time and needs to be later than sooner. Until we know most of the US is somewhat under control we can't allow people to travel from all over into our great state and flood the tourist areas spreading this virus into our local communities causing potential massive outbreaks. We must wait and be vigilant in this area of business for the mean time and act appropriately to protect our health and well being. We need to make sure we don't have a huge outbreak that is it of control forcing multiple shut downs again, which will only hurt our economy worse having to do this all over again. Please take this into heavy consideration as a taxpayer of Orange County and wanting to keep everyone safe and healthy. We will one day flourish and prosper again but we must take the time and steps to ensure we can reach that prosperity once again. In the future our tourism driven state will flourish again but please once again, let's make this one of our final steps to re opening our economy keeping our HEALTH first and
St. Johns	Healthcare	Be courageous. Reopen everything with social distancing, handwashing, masks. Our country is being voluntarily destroyed by our leaders. Yes it's a bad virus, especially to the fragile elderly. But so is the flu. I am a retired healthcare worker and this shutdown lacks solid epidemiological science. I am extremely concerned about the shutdown of so many of our healthcare facilities and the lay-off of personnel. Very dangerous and short sighted. A total destruction of our way of life
Duval	General	I feel until the virse is over we need to continue to be safe at home
Orange	General	I believe that once we reopen , it would be smart to change business hours and keep social distancing as a requirement in stores.
Polk	Government	Florida should open slowly ,and monitor the increases or decreases in covi19 cases.
Hillsborough	Government	Do not reopen. Numbers are still increasing. There is still no solution in place. Terrible idea.
Collier	Tourism	We are ready for a smart, responsible reopen of our state and country. The Governor did a great job and had shown great leadership when we didn't not have all the facts. After weeks of data and knowledge, we know how to be safe and cautious. People suffering with no income and worry will soon overtake this virus.

AMERICAN OVERSIGHT

Brevard	Retail	My current workplace was deemed essential during the pandemic. My area has, for the time being, only been lightly affected by infections and deaths. Unfortunately there is very little effort to follow the CDC guidelines. The employees do not feel safe and completely helpless regarding their own safety. What, if anything, is going to be fine to ensure employees safety of the owners of a business refuse to do anything to protect their employees?
Escambia	General	If science governed our decisions to close up our state, then let the science showing this virus isn't as bad as we thought govern our decisions to open the state ASAP. We appreciate the governor's moderate stance with regard to restrictions but they are ruining the lives of many Floridians.
Nassau	Healthcare	I am the Administrator of two assisted living facilities. We have tested all staff and residents on March 34th (all negative) and again April 21 (results pending) - the Dept of Health broken testing strategy for our residents has cost lives.!further the Dept of Health has no idea of our limitations under our license which in my view in dangerous . We need a testing protocol that is focus on asymptotic detection inside our facilities. The Dept of Health will only test when residents show symptoms which is a formula for disaster. The CDC investigation at Kirkland made it clear our focus should be on identification and detection of asymptotic carriers. I believe many deaths can be tied to this broken policy and we need Ahca to take over this critical mission to endure residents get testing. We will also need FLORIDA housing to make available grants for building modifications to help create safe places for families and residents to come together. We also need to ensure third party providers like home health are tested prior to entry to a facility
Seminole	Tourism	We need to wait to open the state for a little while longer. Maybe phased opening starting 5/15 but we are not ready yet.
Orange	General	Open our state NOW! Before it's too late!! People can still practice good hygiene and wear masks but we MUST GO BACK TO WORK! Printing fake money is not the solution. And our constitutional rights are being trampled. We have the right to life, LIBERTY and the pursuit of happiness. We need to be liberated and allowed to pursue our happiness, which is providing for our families.
Brevard	General	Please consider extending the stay at home order. We are getting a ton of cases everyday. And by reopening Florida you are putting everyone at risk. You also need to do a better job in enforcing this
Seminole	General	I believe closed business all other areas (parks, recreation, churches) should open at 30% capacity week 1 using masks /social distancing, then increase increase capacity by 10% a week until 100%. If they start finding any COVID 19 cases along the way they should close down fix the problems that allowed the spread of the virus and restart over again.
Osceola	General	It's way to soon to reopen Florida
Volusia	General	Open the dang state & quit treating us like lab rats! This shut down has been a complete democratic farce and you are forcing us to join! OPEN our economy up! This is a disgrace

AMERICAN OVERSIGHT

Palm Beach	General	florida is not ready to open yet. our cases seem to be going up. we need to do further testing in palm beach county. we need to wait to end of may to re-evaluate and do it smart. to open prematurely will send it to a backward spiral. a little patience now will pay off later. DO NOT OPEN YET!!
Indian River	Education	Follow the national guidelines: 14 day decline for gating to a phase Re-open Responsibly; 6 / 20 / 100 Rule Communicate clear guidelines from the Dept of Education AND the Office of Early Learning on how to proceed when schools re-open in Phase 2 Present phased opening information to the public based on evidence and data driven decision making.
Manatee	General	Face mask or coverings for everyone
Orange	Healthcare	I am a front line worker. All the tests in the world won't help except the antibody test. You could be exposed and positive before you even get your results back. The virus is here to stay. Offer suggestions of distancing, hygiene and keeping sick people out of businesses. If you are hesitant to go out stay home. It is the height of selfishness to think you can stay home and have sanitation workers, transit workers, grocery store workers care for your needs. Open us up, make everyone accountable for their lifestyle. Save our economy and country. As a front line healthcare worker, I see both sides, but the way this has been handled, the cure will be worse than the disease.
Brevard	Healthcare	Please push back the open day of dental offices for non emergency visits. Offices are not prepared with the proper PPE for opening as dental staff are at a very high risk for infection due to the aerosols.
Sarasota	General	Please do not reopen for another 3 weeks wait for the curve to flatten
Brevard	Recreation	I am 66 and in that risky group. Fortunately I am healthy. I think beginning in May start opening under restrictions. I don't have all the answers but I figure put my mask on and go. This thing is going to be around for a while and I am not going to stay isolated.

AMERICAN OVERSIGHT

Polk	Healthcare	What must be considered 1st is the safety of the citizens of this state. I understand that people want to open the city up but I have to be honest if they were getting their an employee met they would not be so eager. Opening Florida for business to soon will in deed damage our tourism because though people are at to work, if infections are rampage who would want to common visit if those that are working are dying at higher rates. I am a graduate from the University of South Florida and my degree is in public health, the 1st thing you need to do is hire people who are trained in this area of Preventative measures Because I do not see any currently. The problem is that no one saw the value in public health officials and having professionals holding the reins because outbreak and infection is inevitable. This will not be the last pandemic that we do with and how you deal with this and if you allow people to bully you into opening the state to soon will set the tone of the next pandemic that will or may require us to shelter in place. People need to be confident in their officials if they are uncertain or do not have faith in you then they think that they have to go out and get it themselves which is the reason why so many people are just saying open it up. With so much misinformation that has been presented to us In the beginning it has caused confusion. I am an independent and a vote independently so a person who is elected does not influence my decision to open or close it is my education and research that influences my decision.I have a three-year-old son and I am married to a Barber so these people along with myself IA higher risk.
Hillsborough	Healthcare	Open Florida entirely. Citizens will distance, stay home, or work as needed. Don't treat people like they are stupid. Ruining the state's economy and future for young adults with this control over citizens. Routine surgery must return immediately. Most ASC surgery patients have procedures that don't utilize the N95 masks or items that the hospitals failed to have in their inventory. Please, get people back to work. This is ruining the State of Florida. Fear driven.

AMERICAN OVERSIGHT

Pinellas	General	I am retired Pinellas county schools emergency management, and have a son about to enter high school this fall. In general, I agree we should allow small businesses to start opening up with plans to continue social distancing, monitor the numbers of patrons inside, require masks, hand sanitizer. For restaurants it is going to be harder as air circulation in an enclosed area will need to be altered to help dissipate the virus particles. Beaches, parks, playgrounds, should be open again, but people must use some common sense and stay separated. On the matter of schools, I understand we are 4 months away from fall semester, however, a vaccine will not be available by then. So, unless we can increase testing, there is zero chance of social distancing with kids. It does not matter that children are less susceptible, they can be carriers and all it will take is for one child or multiple children to bring home the virus to parents or grandparents to have this explode again and we are back to the open/shut scenario. Any parent, teacher or student that gets sick will have parents pulling kids out of school. The online schooling is working. Yes, kids miss the social interaction, sports, theatre, etc. but this is not a cold, or the flu. No one has immunity to Covid-19 except those that were already sick. In addition, the data is still not showing that the antibodies protect you from getting sick again. Keep schools closed. No parent is going to chance their child or family member getting ill from this.
Manatee	General	Mandatory covid testing for everyone

AMERICAN OVERSIGHT

Pinellas	General	First of all, I want to thank Governor DeSantis for allowing a public comment portal to be set up so we as citizens are able to communicate our interests and concerns. The first concern I have is that Pinellas county in general has not had a large increase in cases except in the nursing homes and assisted living facilities. I hope these will not keep Saint Pete and lockdown . Obvious businesses that can reopened would include the beaches and parks with strict social distancing guidelines. Open-air restaurants and bars with masks and reduced clientele. I think businesses should continue to encourage employees to work from home oh, especially when they cannot assure proper distance between employees. I think many of the boutiques and stores in St Pete could be opened as well if people wear masks and reduce the occupancy. I do not think we are to the point that we can open up businesses that with very closely with the public, such as, nail salons, hair salons, massage therapists, etc. I think we need to see a consistent 14 days decline in cases, death, and hospital admissions. I am concerned about children who have been at home alone and have had very little supervision with their school work. I think those kids who have not participated in the online school this quarter, should have to attend summer school so we can make sure that the students as a whole are not so far behind in September. I think the lockdown is worked in Florida and there are many places that should be able to open, especially that rural areas. Even a city like Saint Pete has not had a huge increase in cases. It is time to start opening up, but make people wear masks and reduce the occupancy and let's get our people back to work!
Seminole	General	It is too early to open. There is not enough testing. There is not enough PPE. The only thing driving the decision is $$$
St. Johns	Management	Stop!! Do not reopen. Look at the numbers and do the math. The numbers are going up.
Brevard	General	I think that it’s too early to re open before the middle or end of May. Our numbers have not stopped increasing. We have not yet started to flatten the curve. I understand people are hurting financially and that is a tough decision but it’s one that needs to be made cautiously. Too early could have terrible consequences.

AMERICAN OVERSIGHT

Marion	Government	To whom it may concern: Good morning to all and I hope this message finds you and your family in good health. I will start off by saying our state has done a wonderful job on dealing with this pandemic, but as we move forward the biggest challenge will be the re opening stage. Our small businesses and hard working citizens who have been told to stay home during this time cannot wait to get back to normal but as we all know we want to contain this virus as much as possible and keep the people safe. My idea for the re opening stage would be in levels, but this will need the public's understanding and commitment. The first level would be a soft opening of five or less in small businesses such as salons, small restaurants, gyms, and etc. The first level would stay in effect for three weeks. The second level would be the same with the number being 10 or less, for another three weeks. At this point we find ourselves at the six week mark and we can re evaluate these levels and adjust as needed. I recommend this with my experience in dealing with the public working as a law enforcement officer and a park ranger for the last 10 years. I understand the public very well and I understand this will not be an easy task, both for our public safety departments as well as our anxious citizens. Thank you for allowing me to communicate with you on this topic. Sincerely, Andrew J Curbelo
Brevard	Professional Services	Doesn't the federal guideline require 14 days of no increase in deaths or positives for 14 days. Percentage of positives should be secondary since testing is conditional, not general population. Please don't follow a fool (Trump)! Be smart, safe, and healthy for all. Economic come back will naturally follow. Thank you.
Lee	General	Open up everything ASAP, let everybody go back to work! Don't pay attention to the news media, they will never approve so open up Florida now!
Duval	Healthcare	Task Force: Thank you for participating on this valuable committee. The path that seems viable to the safety of the Florida residents is to take a wait and see position. Delay the opening for 2 more weeks and evaluate Georgia and Tennessee's results. As citizens we don't want the virus to start roaring through the population. You are in a "Catch 22". You cannot make the citizens 100% happy. Evaluate other states' results, pray about the best path to take, and then just go for it. I do not envy your position. Thank you for the opportunity to express my thoughts. God Bless. Mary McGinnis

AMERICAN OVERSIGHT

Osceola	Recreation	I think we need to have a detailed plan for each kind of business. I think it's too soon since even next week would not give business's adequate time to do this correctly. 1. Have specific requirements such as workers wear face mask. How many customers allowed If it's a restaurant is it every other table Have consequences for buisiness that doesn't follow such as if they got a loan they have to repay, gave possible closure or fine Let fla residents be the first to go to beach, hotels and theme parks until a larger opening is done
Hillsborough	Healthcare	More testing and tracing of Virus spread before work places that can't guarantee sanitizing and distancing; venues that attract groups. Our present lockdown is working. Fix the State employment Dept that former Gov. Scott sabotaged. Work on supply of necessities and hoarding.
Orange	Education	My student loan was in default ,they took my tax refund ,and put it in offset. Did to the Carina virus that was supposed to be refunded back to me but it hasn't . please help as I need the 1622 for medical thankyou.
Bay	General	Please continue to enforce stay at home rules for a few more weeks. If you do not, we will have a second wave, and it will be more deadly than the first outbreak. Be Patient.
Duval	General	I think you should have business that have employees working from home successfully to continue. I think food trucks could open w/social dist. Including retail if able to social dist. Maybe a partial opening for bars & rest business A-L Mon '& Wed M-Z. Outdoor events like Jumbo Shrimp etc should open prior to non essential biz but they have to figure max capacity first, maybe 50 then next game 100 etc only have 1 or 2 concessions open at games. I think everyone esp 40-80 have physicals now to determine underlying conditions
Orange	General	First of all, thank you for you service to this state Mr. DeSantis. You are doing an amazing job and both my wife and I keep you in our daily prayers for the work you are continuously and tirelessly doing. Secondly, we think that it's time to safely open the State allowing businesses to open and get our economy back on track. While there are no arguments either way that you haven't already heard, we simply wanted to share a "re-open" the State comment on this site. Again, thank you for being such a dedicated Governer and we absolutely know you will make the right decision based on the information you are receiving. Dave and Jean Shawgo Orlando, Florida
Highlands	Government	Open businesses back up. Open beaches even for sun bathing. People that choose to stay home can. School resumes in August like normal. We are not stopping the virus. We are just slowing it. Opening up now will determine if we need to close again before August. I have a reservation in the Keys in June. I would really love to go!!

AMERICAN OVERSIGHT

Lake	General	Until we have a vaccine the public is subject to getting the virus. When you open up, it will be a test case for all those people that chose to go out to businesses. there is a decrease of cases at this time because we are all staying inside. Good Luck.
St. Lucie	Construction	I got laid off from my construction job due to the covid virus. I still have not been approved for unemployment after 1 month of filing. Need money to survive or I will be homeless soon. Need to get back to work really soon
Brevard	General	While I like most would love to get out of the house and be able to go shopping or to the beach or anywhere else other than Home at this point I think it's still too soon to be reopening everything back up
Seminole	General	I think we need to make sure.
Miami-Dade	General	Would like more infection tracing and mandatory testing before opening back up. That way we know who has it and where it came from so decontaminations and quarentines can be started. Another thing to address in all of this is that no one seems to want to talk about how you can get re infected with this virus over and over again. Stray animals need to dealt with as well as it has been proven that Corona virus can be transmitted directly from animals to humans. Enforce the quarentines better before opening. And please for the love of God fix this unemployment fiasco! I've been out of work since march 22 without the stimulus I would've lost my car.
Seminole	General	I understand the need to maintain social distancing but feel the degree we currently are living under can lifted in a measured approach. We're headed towards complete society breakdown where not only the general population of Florida is going to be broken but the state that relies on their tax dollars to operate along with the businesses will all be in ruins. We need people working again, let's get them back into the work place with safety features provided (masks, gloves, hazmat suits if wanted), let's get our farmers working, construction crews building, hotels and restaurants going as well but at a percentage of normal business. Jumping back to normal would be insane but slowly reopening and rebuilding our lives back should give all of us a chance to ease into this and (I'm not sure if this is a thing or not, conflicting reviews) build up our immunities to this virus. I, along with a lot of people I know, feel useless which leads to depression and could lead to suicide. Thank you.
Osceola	Food	Unless you want thousands more to be infected a worsen the situation, the state should not reopen
Pinellas	General	I feel it's too soon to open up Florida, I'm afraid we could have a relapse, and even more, people wood get COVID 19 Thank you
Orange	General	I feel that the state should stay closed until we have see everything plateau and the amount of infected people starts to decline.

AMERICAN OVERSIGHT

Hernando	General	I don't believe you made the right decision not to open schools. Did you think about how kids are going to be after 5 months of no structure. They get board during summer break. School is a 7 hour day. This online stuff my two kids are done in about 4 to 6 hours for the whole week. Have a middle and high schooler. What about the parents who cant go back to work because they can't afford daycare. I dont think mentally it will go for our kids.
Marion	Healthcare	No we should NOT OPEN till cases decline not while they are going up but in the meantime fix unemployment so we can get paid.
Lee	Government	As a 46 year old college graduate with ALS, I am vehemently opposed to the government of the state of Florida as the Scientific FACTS are PROOF of the COVID-19 virus being highly contagious and hence, the state of Florida will be the direct result of my fellow Floridians deaths in lieu of MONEY? I hope that this state takes the responsibility for representing the people that they took an oath to do so and not decide to kill others like my elderly parents that will have been married for 60 years, IF they are not put at risk from this horrific virus and others that are my age and unable to fight the virus if I get it from the government officials I voted for allow this complete irresponsible and dangerous early opening. Thank you for taking the time to read this and I hope you have a wonderful day. Jill
Marion	Utilities	Yes open back up, people need to get back to work!!
Hillsborough	General	Please don't reopen Florida yet until the number of new cases drop.
Brevard	Construction	Open Shilohs. Now. Thanks.
Miami-Dade	Healthcare	As a person who uses corrective lenses like I need to get my glasses fixed and my optometrist is closed .. I didn't ask to be blind.
Volusia	General	Florida's infection and deaths numbers are going up with (ridiculously lax) restrictions already in place. We have no widespread testing in place. Opening things up will only increase those numbers. But go ahead and put greed ahead of our health and safety. The consequences will be evident come election time.
Orange	Tourism	I believe the state needs to see 14 days of declining numbers of positive tests and then we should start to open businesses with social distance rules still in effect
Volusia	Recreation	Open all beaches
Orange	General	Keep it closed or cull the herd.
Duval	General	All ideas are for public spaces *Masks for everyone. *Shoe cleaner floor mats. *Anti-viral coatings for high touch areas. *UV light technology for HVAC systems. All are readily available and are relatively inexpensive.
Brevard	General	No, Florida does not need to reopen right now!
Marion	General	I feel the State should re-open, so everyone here can get back to some kind of normal, an everyone can make their money, an support their families.
Palm Beach	Recreation	Open boat ramps, beaches,restaurant, parks, and small businesses

AMERICAN OVERSIGHT

Seminole	Retail	I do not think we should reopen until we see how the numbers track with expanded testing which we are just starting to see. I would wait until memorial day or June 1.
Collier	General	To soon to open beaches
Pasco	General	New time-released cure; two TIDE PODS, swallow light bulb, call Dr. in the morning.... this is the new GOP mantra ...
Palm Beach	General	Very Slow opening. Mandate masks in all stores, offices, etc. Continue work at home for non-essential. Reduce office occupancy levels. Open parks and beaches but don't allow gatherings. No permits for gatherings. Reduce max occupancy in all retail, restaurants, offices, etc. Mandate throw away menus. Servers and store clerks must wear masks and gloves. Allow elective surgeries and medical treatments, doctor appointments but put limits on time between appointments, number of people in waiting rooms, etc. continue push for teledoc. Assess remote learning and staggered classes for schools. Consider having 50% of students physically in school on two days while others are remote. Teachers would be teaching live and remote at the same time. Students would alternate days. This allows for labs, etc. assess technology in the classroom to allow for this. Need staggered lunch hours to avoid large crowds. Masks required for all on campus. We need to look at the positive impact to the earth as the positive of the many negatives and promote this new way of living. We need to look at this as an opportunity to reduce the negative impact to the earth. Reducing our emissions, reducing our dependency on oil, etc. More work at home and limited travel improves family time, parents helping with education at home, reduced costs for family and businesses, positive impact to the earth within just a few weeks.
Orange	General	Open up the state! With any medical condition, look out for yourself. Take precautions, but don't shut down the state! Deploy UV-C solutions, practice reasonable distancing and continue to educate.
Pasco	Professional Services	Pet Groomers , Car washes ,Restaurants, Dentists etc. Thank you for allowing us to voice our opinion. My heart is heavy but no one should starve so, I believe we can open all services that can limit inside contact. Pet Grooming is essential to my dog. My groomer before shutting down only allowed one person at a time to drop off and pick up your pet. It was perfectly done! Dentist rooms are already set up for one person. I have never seen any large crowds at a car wash so let them open too. I believe restaurants can open with a very very limited amount of people and if very very well ventilated. Outside areas to eat at would be preferable. Restaurants can mark floors and areas just like Publix has done. But I suggest 12 ft between tables. Hair salons should open as long as masks are mandatory for both the stylists and patron. Make masks mandatory for everyone when going in public near crowds and anyone not feeling well. Thank you!

AMERICAN OVERSIGHT

Pinellas	Healthcare	I want to make sure that we are not too quick to open out of concern of increase in a raise of numbers. Staying at home has helped lessen the numbers and would not like to see history repeat itself a second it didn't with the Spanish flu.
Palm Beach	Healthcare	Make one hospital in the county for covid and covid like illnesses while all other hospitals continue as normal. Retro this hospital to negative pressure for its entirety. This ensures most healthcare workers can go back to normal. Triage patients outside in mobile conditioned unit with negative pressure. Most of all get ppe supplies do that nurses do not have to reuse!
Brevard	General	Open as you feel. Yes I want to work but I kno this is serious so I'll follow your decision for Florida
St. Johns	Healthcare	The shut down was to be able to provide hospital beds for Covid and to ensure we have enough respirators. We have that now so the state should be open in full with concerns to elderly and medical comprised people should be responsible and self quarantine. I feel the closer is worse then the cure. I work in the dental field which is about as high risk and I am in my 50's. We are about the worst field for this but an essential field as well and I still feel the is more harm with keeping the state closed. I have been out of work since March 19th, still no unemployment. People need to live and pay their bills. Again this was supposed to be for hospital and respirators issues. Let's open all, including Disney and Universal
Lake	Recreation	Opening up the state now would be like taking off your parachute before reaching the ground.
St. Johns	Real Estate	The country needs to open back up May 1st. Everything.
Baker	Information	I think we need to wait a little longer. I'm going to wait a two weeks after you all open to go out. I'm going to wait to see happens to y'all. Cases continue to climb and deaths continue to climb. I just think it is too early.
Orange	Recreation	Please allow gyms to open asap.
Volusia	Government	This used to be the land of the free. There is absolutely no way the government should have the power to shut down small businesses with signing an executive order. The Tierney that has been displayed by our government is unforgivable. It will reverberate throughout the country for years and hopefully never happen again but I fear that you set a precedent over a Virus. That was completely blown out of proportion by the media
Orange	General	Please make this decision based on science and medical data, NOT politics. The Unemployment problem is going to be bad enough for you with everything that's not working right with that system. Don't kill people on top of that.
Brevard	General	Please use science and data to determine when and how to open the economy and removing restrictions. Nobody wants to do this again. Now is not a time for politics.
Pinellas	General	I feel we should lift restrictions very little at a time as the numbers are going up still, yes some county's are different and the governors decision should be based on just that! Making mantory wearing of face masks should be done in order to open Florida at all. Baby steps one at a time please. We don't need to hurry protect those of us who have sense reguarding this virus!!
Marion	General	We are a healthcare family and our point of view is that it is too soon to reopen without a 14 day downward trend and increased testing north of Orlando. Unemployment needs to be fixed and people would be more likely to stay at home until mid May before we think about reopening

AMERICAN OVERSIGHT

Hamilton	General	It would be crazy re-opening life is more important so what if the state declares bankruptcy. We have a president who doesn't have the knowledge or education to lead our nation . It's up to you the governor to make a right decision. Whenbit comes to the lives of kids ,parents, grandparents, all those who have been putting their lives on the line. Many of us would rather stay at home with our kids due to school closures then risk the live of the innocent people and continue the spread . Openings would be a catastrophic and will lead to more death's 😟😟 You have a family make the right choice and wait a bit longer. Dont be Trump and keep making the wrong choices it will just make it worse be a leader and make the right choice not only for us but your family's as well . God bless
Sarasota	General	As an out-of-work employee in the service industry, I am a victim of Florida's failed Reemployment Assistance program and stuck in what is widely referred to as the "March Black Hole". Like many abandoned Florida families, we are desperate to get back to work in what is now, undeniably, a failed state. A restaurant operating at 50% capacity with only a small fraction of customers willing to risk exposure, especially in a senior driven economy like Sarasota, the income will be extremely limited but much better than receiving nothing at all. While the Governor approaches his responsibility to his constituents with his "donors before voters" rationality, widespread testing, mitigation and containment are key as many experts have pointed out, to safely re-open Florida. It's really the least he can do since the economy being able to "snap back" is now going to be a recession driven fallacy due the enormous amount of debt being forced upon Florida families caused by the malicious malfeasance from the Governor and the FLDEO.

AMERICAN OVERSIGHT

Hillsborough	General	Open May 1st using a phased approach with specific instructions and restrictions for each segment opened for next month : keep nursing home/alf /hospital restrictions in place until all staff/resudents/visitors are tested in future issue “passed” covid testing cards to individuals so they can visit these medical facilities mandatory face masks for any facility where over 10 people gather and then relax limit to 50 in june recommend continued working from home whenever possible for may open in may restaurants retail stores business operation centers zoos aquariums movie theaters car washes beaches parks sports w limited attendance provide detailed instruction on required behaviors / protocols for people at each of the above continue to set up ease of access for testing great idea having it available at pharmacies set plan in place NOW for reopening schools and colleges in August
Orange	General	It is way to soon to start trying to open things up. Start by fixing the unemployment website. Theres the first issue. If you try to open things to soon were going to have another wave of cases of covid.
Escambia	Professional Services	Please re open hair salons.I work in a small salon, we can use all precautions, 1 client at a time,wear a mask and gloves,etc. I am single,I'm going to lose my home if I don't get back to work.
Clay	Healthcare	So called “ elective” medical and dental procedures need to restart. I have patients that are missing all or many teeth that have now been waiting for their prosthetic fabrication to continue for almost 2 months. Others are having progression of dental disease. As I can’t perform routine exams, oral cancer screening is not being performed. As far as medical, I am acquainted with multiple people that are waiting on joint replacement, sinus surgery and cataract removal. Please don’t deny the citizens of Florida these necessary services any longer

AMERICAN OVERSIGHT

St. Johns	Professional Services	I own a children's salon in Clay County (one of the highest death rates) my concern is that parents have multiple children who can't wait in the car. Also the kids will not wear a cape much less a face mask. While I am ready to get back to work. I fear opening hairsalons way too soon. We have no way of maintaining 6ft. Also if other hairsalons open I will need to open to prevent my clients from going to other salons. Please take trumps advice when he said he felt that Kemp opened salons to soon.
Hillsborough	General	Do not open Florida until we know it is safe to open it to soon would bring more people sick and dying I myself work at Tampa Airport I am scared to go back to work a lot of people do not care nor understand the issue everyone has to work but if you are dead how are you going to do this MAKE SUCH Before Another Misstake Is Made
Duval	General	I understand the difficult situation the Coronavirus has put Florida in, trying to balance economic interests and people's lives. I'd be a lot more supportive of re-opening if, and only if, there was more testing. Testing every hospital worker, every nursing home resident and employee, every person confined to or working in a jail, every teacher and student, etc. And people need to be tested regularly. The question of reopening Florida would be different if this virus was only spread when infected individuals were symptomatic. I'm praying for Governor DeSantis and appreciate the work he's doing. He's doing a good job handling this once in a century crisis.
Orange	Professional Services	Open the state for business!!!
St. Lucie	General	Most of everything is already open already what I see closed in my area is Beaches Hair salons Nail salons Mall Restaurant sit down Barber shops So if we can go to a grocery store and use safe distance and wear a mask I don't see why we can not open safely we should all use common sense
Sumter	Recreation	I think it is way too early to start opening recreational areas in Florida for elderly people. There's no way you can do social distancing in a pool with people exercising with the capacity of 75 people. It took quite a while for people to start distancing in the first place, if you open it up now everybody's going to get sicker.
Orange	Tourism	Open please! Disney Springs
Orange	Retail	Have a curfew. For example retail stores only open till 6pm. This will cause less people out shopping all hours. Allows retail to control traffic
Seminole	General	Its too early to re-open. We need to get a firm grip on testing and get the number of cases down much more.
Sarasota	General	It is to soon to open the state. Numbers are still going up and people are still dying. Until the numbers too off and stop increasing we should stay closed. The second the state opens people will be traveling her so fast and then we will all be doomed. Protect the Florida residents please
Volusia	General	Keep stay at home order. It's too soon to re-open.

AMERICAN OVERSIGHT

Martin	General	Continue with CDC recommendations and include wearing masks/face covering in public Places inside and outside. also Include services such as salons for example; the hairdresser to wear a face covering when the client may not be able to during a chemical process.
Broward	General	We should reopen slowly but especially outdoor activities. The beach and pools with social distancing. Golf with sin glp e riders and precautions. Keep masks for grocery pharmacy visits. Wait on restaurants and when they open only at 50% for first month.
Hillsborough	Management	I am very concerned that Florida is reopening too soon. I have been staying at home since spring break. I work at a child care center which has been closed since spring break . When going to the store as needed, I have not seen people social distancing properly. I am worried that if florida reopens, my job will reopen. When caring for children it would be impossible to keep them 6 ft. apart. They are kids and naturally are impulsive and want to be together. Quite frankly from age 2 to 4 alot of them pick their nose, then touch something. I don't see how there would be enough supplies to keep everything sanitized, since I myself can't find these supplies at the grocery store. Certain places should remain closed. It's too soon to reopen. Please consider things seriously before you reopen. People are not properly following guidelines now, they are not going to follow them after reopening.
Palm Beach	Technology	Please open beaches for non gather activities. Walk, swim, surf and sit in groups of three or less only
Martin	General	Please reopen Florida. The small businesses need to be allowed to reopen. The businesses and the consumers can take the steps needed to reopen successfully. Also please reopen all beaches and parks. It is time to go back to work and play. Let those who want to go back do so and those who do not have the option of staying home. Right now we do not have a choice in many businesses and activities. Please reopen Florida ASAP.
Seminole	Recreation	I'd like to reopen hair salons, gyms but keep sanitary requirements with social distancing. Use of face covering. I'd like to start at the beginning of May.
Lee	Accommodation	Hello, I have fractional ownership on Ft.Myers beach which is forced closed until the Government “opens “ up . It’s not a hotel or rental, but was “thrown” in with them. - open beaches to walk, fish, just not sitting 1st 2 weeks in May. - fishing allowed on beaches , keep social distance. Bottom line, individuals need to take responsibility for their own health. If folks are unhealthy, have underlying conditions, they shouldn’t be out! Let the other 95% get back to some normalcy. Thank you, and God bless.
Marion	Information	It was mentioned that people 55 and older you had a plan for us, also I have heart and COPD. What is this information.

AMERICAN OVERSIGHT

Manatee	Healthcare	I feel, as a nursing home worker with a compromised immune system , before we open the state up ,we need to do more testing and not limit testing to the big 3 symptoms. I know our testing is no where near ten percent of the population. I live in manatee county and you cannot get tested without the big 3. My daughter also has co morbidities , CP and Neuro impairment, and had headache,low grade fever and fatigue, she couldn't get tested. She then had 10 seizures within 40 minutes waiting for ems. The next day her neurologist on zoom said she believes she had /was exposed please quarantine. I might add my daughter works for amazon and they had her taking temperatures w/o ppe the last 2 days she worked prior to her seizures. She was incoherent when brought to ER and they wouldn't let me in or talk to me . They just released her . Both my children were poopooed about COVID-19 when they went to 2 different ER 's. I believe there is too much confusion and misinformation around to safely just open the state w/o substantial improvement in testing and antibody screening.
Volusia	Food	New smyrna is doing Realy well in relation to cov19.my Resturaunt needs to be open more soon to survive
Marion	Healthcare	Florida should not open yet, it is to soon. I am scared to go to work and bring the virus home to my family. Please keep Florida closed a little longer
Palm Beach	General	It is time to start opening the county to get people back to work. I believe if we have guidelines to wear mask have sanitation sites when entering buildings we could get things moving again.
Polk	General	We need calm, nuanced and evidence based decision-making that realizes things like Queens and American Samoa are not the same. That take account of whether people are complying with guide rails. We need to be unified the best we can even if not physically. I am concerned I may die, that my mother may die, that I might never see my children again, that many more Floridians and Americans may die or suffer permanent bad health consequences.
Sumter	General	Make available antibody testing for vulnerable populations so we can see if we have had it
Marion	General	Our economy is in a devastating period. The health of the citizens is important but I would like to see the state start opening back up. We as humans and citizens need to take responsibility for our part in social distancing and personal hygiene and be held accountable for this. We have no choice but to start opening back up, unemployment benefits are taking way to long to get approved and people are suffering getting back to work would alleviate some of this by going back to work with social distancing. Businesses need to make sure strict policy's are in place for this to happen and follow through with it.
Brevard	Healthcare	As a senior citizen, I think the shelter in place rules should continue, at least, until mid May and then be re evaluated. 14 days of reduced numbers of infections before any loosening of restrictions.

AMERICAN OVERSIGHT

Volusia	General	I believe the parks are essential to health, studies have shown the viruses does not live as long outside, and maybe only seconds. So open the beaches and parks so we can all air out. I think incremental opening of small business including barber shops and small retail should be starter as well. I am a nurse and have had family affected. But as a nurse we are taught fresh air is always best, Florence Nightengale knee what she was talking about. Thanks
Orange	General	I believe it is dangerous to open the state before their is an adequate supply chain of necessary protective gear for citizens. Until we have access to hand sanitizer, face masks, disinfectant spray/wipes it is going to be difficult for citizens to go into public and not rush increase exposure and transmission. Places like courthouses and other places that have a regular high volume of foot traffic need to have these protective items available to the public before you open them back up. If you have 400 jurors coming in for jury duty that will create a huge risk of increase exposure if the government cannot provide protective gear for those who do not have the ability to purchase it themselves. It should be mandatory to wear face masks in public places such as courthouses, grocery stores, theme parks, sports events, and so forth. If we don't put in place mandatory protective measure we will see a resurgence because the section of the population that does not take this seriously will infect those that do.
Marion	Tourism	Please open everything. Theme parks as well. Please give us back our freedom to chose.
Orange	General	Until we can widely test across the entire state and there is a glimmer of a hope for a treatment, we cannot risk the lives of our neighbors. We need to get the unemployment site fixed ASAP!! People are going to die from poverty if we don't fix this state.
Orange	General	Please reopen Florida! Let us start getting back o some sense of normal and save our economy!
Osceola	Professional Services	Please reopen theme parks, restaurants and salons.
St. Johns	General	We need to open the state back up, people have lost jobs, incomes, as President Trump stated, America was not meant to shut down,. The shutdown has gone on far too long, it will be very hard for business's to pick up where they left off. Nail shops.. the employees can wear a mask, i have had my nails done for 30 years.. i have never so much as caught a cold. these people are very clean, wash their hands, wear mask any ways. Hair salons.. the same. Resturants.. open them back up.. We shut it all down.. OPEN back up! I personally feel its a bunch of bogus BS any way.. Heck the crazy people are already trying to botch up the election as they talk about how bad things will be in the fall.. BOGUS!! Everything will be fine! thank you!
Duval	General	I feel that if the proper amount of testing is in place, all business practices social distancing, and large crowd venues are not permitted, then it is time to re-emerge.
Sumter	Healthcare	I work in the dental industry in The Villages. I have not heard any suggestions supporting dental practices seeing they are one of the higher risk industries. My request would be to have a few dental professionals to weigh in with guidance on reopening and how it should be done.

AMERICAN OVERSIGHT

Marion	General	I work at Walmart, and I am very disappointed that the people that come to our store do not practice the 6 ft rule, not do they wear masks. I worry if we open too soon, the virus will spread like crazy because the same people will not respect how serious this situation really is.
Seminole	General	I don't think it's ready to re open yet. If it does, we need to do so gradually and can't return to business as usual. Sick people are still going out and running errands even though they've tested positive. We can't shut down the state a second time and hope everyone survives it. Look to NYC - they suffer as much from no tourism as we do, and they are hesitant to re open.
Duval	Education	Good morning, I am writing regarding the reopening of Florida my concern is I have a 5 year old who is in Kindergarten and with school being virtual through the remainder of the year and her having to log in for attendance between the hours of 8:30 and 2:30. My concern is if the work from home order is lifted and i have to go back into the office how do you expect her to get her schooling done it's not the grandparents responsibility to do that..... and we are still putting elderly at risk if i go back to work but have them watch my child. Honestly it's too many different websites and log ins to even ask. I would never even ask so i guess she would be marked absent everyday if i had to go back into the office. So I am asking for the children's sake please keep the work from home order through May to help these kids finish off the year strong.
Hillsborough	Government	Working in school district office , I'm taking care of my elderly parents that have copd , I will like this to not back open until June when the curve is flat flat , to limit my risk of getting copd and infecting my parents
Orange	General	We need either a rest in place or measures set when reopening, that will determine the asymptomatic population. These are the people I fear coming into contact with since they are not aware they have the virus, and more than likely don't feel the need to wear proper protection nor use safe healthy practices.
Sarasota	Healthcare	I think it's absolutely ridiculous that we even consider opening up Florida. Way too early! Let's be sure and wait! If you do open I will still stay home until I see some really good results. Probably won't see that until many many people are tested! Federal response has been a fight. How ridiculous. No to opening.
Orange	General	Please do not open the state until the Doctors and Scientists say it is safe. Doing so too early will be so much worse for us, our businesses and our economy. Adults don't listen to impatient children and I am begging you to be the adults in the room.
Polk	General	Do not open anything non-essential until numbers have continuously gone down to a very low number. Like when it very first started. As long as we have thousands of cases, we should not open.

AMERICAN OVERSIGHT

Hillsborough	General	Keep health workers and other critical workers safe.. top priority. All workers who comein contact with public should wear masks.. Especially in food establishments.. many do not wear them in grocery stores and take out restaurants. All who shop should also wear masks and limit amount of people allowed. However, there needs to be some way to get outside for mental health. Be smart about this so perhaps open beaches:parks to certain groups at certain times.. with fines for The wrong group going at incorrect times. Enforce masks and distances. Use volunteers if necessary. For example, households from certain zip codes or people of certain ages go to Beaches from 8am to 12 PM... limit the number allowed and fine if they don't comply.. Just tell public you will randomly check to deter cheating.. and enforce it. With less crime/traffic around should be some available police for some Monitoring..
Polk	General	We do not have enough testing capability to even know who has this. The data is grossly off and being used to make important decisions. We are not paying attention to what it's like for the people who do have this. Weeks of a high fever and exhaustion. It's debilitating. Please look at the models that say we should not open until the first week of June. That will protect Floridians and the economy. Problem can't work when they are running a 102+ fever for a month. None of us will feel comfortable spending money until we feel safe from the virus.
Marion	General	Open the state. Let's get back to business
St. Lucie	Professional Services	I am a barber and have been out of work since March 23 I'm not getting unemployment I haven't got my SBA I still haven't gotten my stimulus and I need money to live.I am ready to get back to work but will do it safely wearing a mask and only one person in the shop at a time but I'm ready to re-open Florida as long as it is done safely
Seminole	General	I am in the medical field myself and out of work right now. I would like to see the state reopening, even if it means in stages.
Orange	General	KEEP FLORIDA CLOSED. WE DONT NEED A SECOND WAVE OF DEATHS. KEEP EVERYTHING SHUT DOWN TO PREVENT THE SPREAD.
Orange	Finance	Open when a statistics shiw a decline in new cases for 14 days per CDC guidance. And of course, with increase testing.
Orange	General	For the health of our citizens we need to open asap. We are at the point where basic things like a rise in unemployment will raise the suicide numbers. The mental health or our citizens are being challenged and soon to snap. We also have evidence we didn't have a month ago, such as UV light destroying the virus. The virus has a very low effects on young and healthy people; we also need to isolate seniors and at risk.This would allow the virus burn thru the rest. Its time to reopen Open the state in phases laid out by the CDC this will raise employment to help combat suicides rates. People being outside will help cleanse us the of and lastly allowing it to burn thru naturally. Lets get to work.

AMERICAN OVERSIGHT

Lee	Recreation	Please re-open State parks and allow camping. People already social distance when camping. I'm a family of 8 and we need to get out and enjoy nature. No desire for the beach as they become too crowded but people with tents and campers keep their distance. Re-opening state parks allows so much for people to do. Everyone in my house is an essential worker and we come into close contact everyday in our jobs. We need a break from everyday and going to the State parks allows us to still enjoy life a little without being near anyone. We all live together anyway so camping would allow us to breathe a little. I know we a just a tiny part in all of this but essential works need to rest up and enjoy life a little to. Please and thank you from the Flaugher/Walsh Family
Orange	General	Open hair salons, restaurants and coffee shops, bakeries. Car dealers
Volusia	General	I think the state should open slowly. Asking people to continue safe distancing and masks. Maybe even doing it by county
Orange	Government	We need a better crime hot line we need more access to programs that help you get a car we need more ways to get a job ... We need more ways to weed out the bad people in or at the jobs so the market dont crash again
Volusia	General	I know people are hurting for money with the stay at home order. But please keep in mind that there would be more deaths without the order. Please do not open things up too quickly! It could be devastating. Folks have worked very hard to keep the number of people getting sick and dying to a minimum. If things are opened quickly, I fear it will signal an "All Clear" and it will be much more dangerous to be out in the community. I want it to be as safe as possible for everyone. Please don't rush things Sincerely, Diane Chatham
Sarasota	General	I would like to see restaurants open with 50% seating capacity to start. Allow people to sit on the beach while maintaining social distancing. Allow condominiums to open their pools. Thank you for your consideration.
Brevard	Food	Please reopen our state to all businesses! Not just restaurants but all small businesses!
Pinellas	General	Gov DeSantis, You are doing a great job, please open tge State ASAP. WE NEED TO GO TO WORK BEFORE NOTHING IS LEFT TO GO BACK TO!! God Bless, LM
Palm Beach	Recreation	We need to start opening South Florida soon! Boca Raton has been at stay home order for longer than a lot of other parts of the state. We should start with reopening parks. Beaches on a limited bases. Social distancing must stay in effect. Let;'s see how this works.

AMERICAN OVERSIGHT

Sarasota	General	Reopening non essential businesses when our numbers are still growing is a mistake. We need to get the numbers under control and mass testing as a standard before we open it up to new infections. We still don't have enough information to know how quickly it transmits to others so fewer people interacting is key.
Palm Beach	General	In the end the responsibility for socal distancing falls on the individual!! I firmly believe that golf courses, beaches and pools should be reopened with the stongest recommendations of social distancing with potential fines for blatant disregard. If public safety officials can monitor the beaches in Duval County to ensure people are not sitting on the beach they can patrol those same beaches reminding people and enforcing the proper distancing. Boat ramps should also be reopened.
Orange	Tourism	I work for the Walt Disney Company, based out of Celebration. My office is a shared space and our desks are an open concept, not even 2 feet apart. When the rest of the company began shutting down, my bosses tried to find ways to keep us open. The majority of us have compromised immune systems, myself included. Social distancing will not be accommodated and will put us at risk. We know we can easily take our work computers home and do our jobs there- we simply view photos for a living, nothing harsh. Our bosses won't relinquish the control. My health and safety is too important during this. At this point, it is time for Disney to create more work from home opportunities for office work like mine, and that will eliminate fear about returning to work early for certain cast members.
Seminole	General	I believe that we need another 30 days of stay at home. After that start to evaluate every 2 weeks. This will be a regional reopening and I think that any of the major metropolitan areas must stay closed for at least another 30 days. No way May 1 should anything change other than 100% wearing masks when in public.
Orange	Government	DO NOT OPEN STATE YET! TOO SOON
Seminole	Recreation	Allow small boutique gyms to reopen along with big box gyms. Small boutique gyms have ability to cap attendance and control timing of patrons better than big box gyms. Limit capacity to 5 ppl per 1,000 sq ft
Collier	Healthcare	I think opening the parks and beaches should come first. It is important to be outside and receive natural Vit D as we are all lacking right now. My son has asthma and he does well every year with flu and cold season but we do a lot of outdoor activities to keep our immune system strong and to get as much vit d as possible. It is a known scientific fact that summer months are healthier because of the high levels of Vit d we are exposed to. They literally put Spanish Flu victims outside of tents to get Vit d. If we all continue to stay indoors our immune systems will weaken and we will all be more susceptible to cold and flus and covid I think anything outdoors should be priority. Then if that goes well throughout a two week period then perhaps restaurants as well. I think that any job that feels safe to open should be able to as well. Maybe salons etc Can see half of what they normally would for a set amount of weeks then add to that on a week to week basis. If you don’t start now during the summer when we can all be healthier then you are setting us up for failure once fall hits again.

AMERICAN OVERSIGHT

Orange	Tourism	Please extend lock down until Mid May and then re-evaluate. I'm unemployed and would love to get back to work but too risky now! Any unemployment help is appreciated as well! Thanks, Carolyn
Seminole	Food	I don't think we need to reopen until people are positive the virus and all conditions are safe. Nobody is going to go out as long as they fear for their life or that of their children. I would think June at the earliest.
Polk	General	To the Governor, You have a plan to open us up safely once you have valid data. I'm beside you. We need to get things moving in an intelligent manner. Please don't let the media induced paranoia drive your decision. Depend on your experts as any good manager/leader would. I think you are doing a great job. I am a 71 year old Florida native. I love my state, perhaps not the over development, but the state. 👍👍👍👍
Volusia	General	Should open when it is safe to do so and we can be around people.
Duval	General	Fidelity Monitor, an investment newsletter, yesterday downgraded all Municipal Bond funds from "Okay to Buy" to "Okay to sell." Expect a large sell off on Monday and expect cities to default on their bond obligations. Florida could lobby Congress to amend the Bankruptcy Act to permit municipalities to file for bankruptcy.
Palm Beach	General	Hair salons
Orange	Government	I think Florida should wait a little longer to reopen Florida until this corona virus takes a seriously deep i know some businesses may be hurting but there's precaution that need to be taken.
Brevard	General	Fully understand the need to get things back up and running, with sales tax being the main income source for the state. But we need to follow the science, not the money. Unless we're requiring masks by all parties, most close contact locations such as gyms, nail salons, hair salons, should remain closed until either A) we are on the bottom end of the bell curve, and are seeing minimal new cases, or B) the vast majority of the state has been tested, Symptomatic or not, where we can identify and isolate the sick, utilize contact tracing to identify and potential cases, and cut things off for the spread early
Orange	Government	When will those who filed for unemployment on 03/22/2020 receive payments? It has been over a month and the status still says pending. People who filed in April are already receiving payments plus the $600 from the federal government. This is an insult to hard-working Floridians. Rectify this immediately. We are the laughingstock of the country.
Marion	Government	To soon
Volusia	General	Keep Florida closed as long as necessary to keep us safe! You are doing a great job so far, please continue as long as you feel it is necessary, to ensure our safety.

AMERICAN OVERSIGHT

Seminole	Tourism	I am a furloughed Disney cast member While I really want to get back to work , I do believe that it needs to be done safely There are days I come into contact with over 1000 people and you cannot control how careful they are I trust Disney completely when it comes to safeguarding their employees But I do know that we do need to reopen and get all the great cast members back to work
Volusia	Retail	Open the state back up immediately
Brevard	General	You couldn't get the shutdown right, although that should have been a no-brained. I have ZERO faith in your ability to safely re-open. As for that unemployment portal, you should be ashamed. People are suffering needlessly thanks to the GOP and your willingness to put yourselves first. You disgust me.
Volusia	General	I do not think we should be opening our state back up. The virus is still ongoing and will be but until we get ahold of the virus with a proven track record of having less tremendously less cases I believe we should be holding off. It defeats the purpose of everything we've been doing. I have a 4yr old son who has severe asthma. If we open up this state too soon and act as if nothing has happened our cases will only spike up again. Now is not the time to open up the state. It's like being told to take antibiotics and just because were feeling better we stop taking them instead of competing the full course of treatment.
Brevard	General	Some people need very basic directions. My father and his friends golf and are over 75. They said if the governor says it's ok to golf, it must be. They drive their own carts and social distances at home. But at the flag, I see groups standing together. I live on the course too. They say, my friends are old and don't go hardly anywhere. They're safe. I try to explain the one person sees one person sees one person... but I get blank stares.
Pasco	General	Please for the health and safety of all Floridians DO NOT open the state. We need at least another few weeks
Orange	General	FL SHOULD NOT re open unless cleared by health officials. Central Florida especially due to the our tourism industry. Re opening prematurely will just cause a second wave of an outbreak. The government needs to cover at least 80% of payroll so not to over burden the unemployment system and people won't have to worry about wanting to reopen prematurely and risking their lives.
Osceola	General	my feeling is to wait a little longer. Be careful about jumping into soon
Orange	Tourism	I think we are ready to phase into reopening everything now! I do like the idea of only allowing FL residents into theme parks, etc, for the near future. I also think it's important for summer camps to proceed for kids.
Lake	General	I would be cautious especially in gyms and places where multiple people go and use the same equipment. Restaurants are also something you would have to be very careful at.
Orange	General	I am very interested in how we can help our small businesses get going again. However, I am very concerned about putting a group of people back together before we have antibody testing for Covid 19. I don't think there has to be a rush. Provide antibody testing for all citizens and then we can see how much social distancing we actually have to do.

AMERICAN OVERSIGHT

Orange	General	Please don't open quite yet. Lives are at stake. Please don't. Also don't falsify data.
Osceola	General	I think it's to early to open the state more testing and if it is reopened every one must wear a masks it must be mandatory
Hillsborough	General	Re-open the state. We live in the USA and we have rights that are being taken away. As you can see many people already have the antibodies. The death rate if you calculate the direct result of civil-19 is much lower than they said at the beginning. Many famies are suffering as a result of losing their jobs due to this and jobs will be fewer when this is over. The unemployment system is so bad that people haven't received any money even though they lost jobs in March! Keep the nursing home restrictions in place to help the most at risk. One of the biggest issues is that the most at risk are the main people out shopping right now. People need sun, they need to be outside or this will never go away. Bring back the state so people can have their rights back.
Brevard	Healthcare	I am writing to you today because I am concerned for my personal safety at work, and for the safety of the patient's that I care for. I am a licensed Dental Hygienist in the State of Florida. As you know, dental office are planning to open soon. I understand that dentists, as business owners, are eager to reopen as they are concerned about finances. However, resuming elective dental services at this time puts the health of their staff and patient's at risk. Personal Protective Equipment (PPE) is still in short supply, and some dentists are expecting their hygienists to work without proper PPE and new infection control training. Dental Hygienists have the highest risk of contracting the coronavirus of any occupation due to the unique nature of our work. We work in very close proximity to the patient, and utilize dental instruments which create aerosols. These aerosols can suspend the virus in the air for hours, potentially infecting us, the rest of the dental team and our patients. It is virtually impossible to have your teeth cleaned without generating aerosols. The aerosols created by Patient A at 8:00 are still lingering in the air and dropping down on surfaces on Patient B at 9:00 and Patient C at 10:00. It is estimated that 50% of people actively shedding the coronavirus are asymptotic. Without the ability to test, we must assume that everyone is infectious (Universal Precautions). The Center for Disease Control, CDC, recommends that dental facilities postpone elective procedures, surgeries and non-urgent dental treatment until further notice. I urge you to enforce the CDC recommendations to postpone dental hygiene services at this time, and mandate resuming elective dental services As you consider next steps in reopening businesses, I hope you understand the unique risks to dental hygiene professionals. I ask you to make decisions that will ensure the safety of dental hygienists, their families and the patients they serve. Thank you for your consideration.

AMERICAN OVERSIGHT

Orange	General	We need to wait until the national task force guidelines have been met - a fall in cases for 14 days and the ability to test and contact trace to stop a new outbreak quickly. We also need to make sure healthcare providers have all the PPE they need before businesses open up needing PPE. We also need to fix the unemployment system so people can get their claims processed and get paid. Vulnerable people need to be able to stay on unemployment when the economy reopens.
Pasco	Recreation	Please reopen our Private beaches so that those that live at the beach can go out and enjoy the fresh air and sunlight that is needed for optimal health. Please reopen our Parks and recreation for the same reasons. There is so much space that Social Distancing is not a problem. Get people out of the house.
Pasco	Education	To the members of the Task Force: I am writing to say that the public school education system needs monetary support more than any other time. The dedication of employees to work and keep children safe is astounding. The stunning deficits of funding to this system is obvious at this time. Schools take on the social needs of the community without blinking an eye, it's what we do. The public voted and said class size needs to be small. Now in this pandemic we see this is paramount. Teacher accountability measures, again, are obviously overdone and crafted to pit one category over another. This needs change. Testing during trauma of students is just wrong. My recommendation as a 19 year teacher in Fl is a reboot of the mandates that restrict the good work that could be happening in our schools. Not everything can be a business model and our schools are more than a business producing a product. We cannot be used by the business community solely to be a training ground for workers. We need to be recognized for the work we do; educating the future.
Brevard	Accommodation	too early to open up due to areas hat the numbers are still going up. it is just not count of beds look at some o the other counties not just the big ones
Volusia	Retail	We are nowhere near ready to open. I work in wholesale wine distribution & its a bad move. Many more will be infected & many more will die. Social distancing WORKS. People are more important than an economy.
Hillsborough	General	Please do not open until more testing is done. Please stop taking the lead from Trump. It's too early to return to business as usual. Ask yourself if you'd feel safe having a crowd of people next to your wife and kids for a long period of time, at this moment. Really do that . Then ask yourself in good conscience how the people of FL are less than the importance of your own family.

AMERICAN OVERSIGHT

Volusia	General	I do not think our state is ready to re open, no one has been taking proper safety measures. No one has been listening to the guidelines we should be following. Honestly nothing has changed, everything is still open, there more people out and about now than ever! It's ridiculous! I work in fast food and my mother has an autoimmune disorder, so for me to have to go to work everyday while these people are just out goofing off infecting people. It's just unbelievable! Please tell me how fast food establishments are essential!!??????? You can use food stamps at these restaurants, they don't provide essential items. If you ask me I think they should shut everything down that REALLY is non essential, like Dunkin' Donuts coffee every day
Volusia	General	Please open all beaches, parks, nature areas for all.
Lake	General	It is time to reopen the state. Everything in my residential community has been closed for more than 40 days now. Let us get back to living instead of existing.
Marion	General	Marion #s continue to rise. More testing, then re-open things that have safe protocols. Nail salons as long as limit on customers and masks, hair salons as long as limit on customers and masks, restaurants continue curbside and pickup, retail use curbside pickup. Safe but slow. And encourage vulnerable to continue to stay home.
Pinellas	General	Iceland study found 50% tested positive for COVID 19 did not know they had it because asympotlmatic. Even 25% CDC indicates asymptomatic significant. Testing only way to know and certainly not only those with symptom. Open up slowly and with masks and social distancing.
Orange	Recreation	Open state park campgrounds to Florida residents only.

AMERICAN OVERSIGHT

Orange	Tourism	Getting people back to work as soon as possible must be the first priority. As one who lived through the SARS epidemic in Toronto in 2003, I reject the premise that the shutdown, lockdown and crackdown was necessary in the first place. In 2003, the CDC assisted the city of Toronto, the province of Ontario and the Canadian federal government. Sick people were quarantined. Precautions were taken (screening, extra cleaning, masks, etc), but everybody went about their business. Restaurants, hotels and other public places remained open. This contrived crisis was nothing more than an excuse for public health totalitarians and some overly-enthusiastic "law enforcement" to run amok. In contrast, the CDC has been wrong about everything up to this point. Their models and their predictions haven't even been close. Dr. Fauci and Mrs. Birx have taken the mantra, "If it just saves ONE life, it's worth it!" To beyond the extreme. Trillions of dollars in economic productivity have been destroyed and are never coming back. I would assume that, in the past month, the parks, hotels, bars, restaurants and other places of businesses have had ample opportunity to perform a deep cleaning of their facilities. Nothing is left to do other than "turn the switch back on" and hope people come back to Florida. The corporations who own Florida's four biggest parks, the Walt Disney Company, Comcast and Anheuser-Busch need to take the lead on this. For the next six months (at a minimum), they will need to cut their admission rates dramatically. Hotels and resorts will need to reduce rates accordingly. The big resorts will have to get used to Las Vegas-style $30-per-night rates for the foreseeable future. They can call these "Welcome Back!" promotions. The Canada-U.S. border has been closed since this contrived "crisis" began. Given the punishing exchange rate between the Canadian and U.S. dollars, I recommend the various local tourism
Orange	Government	Do Not open For at least another 3 weeks. Do more testing.
Hillsborough	Professional Services	My name is Hope Springs, I am a small business owner in the Tampa Bay area. Thank you for ALL your hard work! I really do appreciate everything you have done. Our company has been in business since 1972 and my husband and I took over the business in 2011. Since then we have made our business and incredible give back. You see we own a small dog training company that offers service dogs that are specifically task trained to an individual WITH A DR NOTE. We also work with many non-profits and we are a part of all local chambers. We were set to make the most income our business had EVER made this year, UNTIL COVID19. We are close to going out of business. If we do not have the opportunity to open soon we will go out of business. We have not gotten any loans, or PPP. We have applied since day 1 and are in que, whatever that may mean..... but to lose everything because we are considered non-essential is unfair. We are able to work per the CDC guidelines however our clients won't allow us to come out because the state is shutdown. If it opens we can work again! Please open the state so we can resume our business!!!!!!! I am not looking for a hand out I am looking to open my business so we can work!

AMERICAN OVERSIGHT

Orange	Technology	You need to talk to us in the entertainment industry. Technicians, actors, musicians, hospitality workers. It is a huge part of Florida and we need to get back to work. There are things we would recommend and we would like to be included in the discussions. I submitted my CV to the governors office but didn't hear back. I would be happy to talk with you and consult if you need someone from this world.
Volusia	General	Please don't open right away! Give the virus some time to disapate. The economy isn't completely shut down. People are buying. The numbers are higher now then when the state was shut down. Ask this would have been for nothing!! Wait until the numbers are below what they were at the start of the state shutdown. Please follow the numbers and the science. Those people protesting are not the majority. Thanks and stay safe.
St. Lucie	Retail	I think you should open fitness centers but limit them to 10 people at a time so social distancing can still be maintained and the company is required to disinfect the equipment after every use.
Marion	Professional Services	I definitely don't want to see Florida open too soon. In our county 35% of the residents are 63 yrs or older vs approx 18% nationally. Florida residents are especially vulnerable.
Polk	General	I am a government Worker and I think it's a bad idea to reopen the state this early. Reopening the state this early would have a negative effect on the economy. My reason for saying this is, if we reopen and more people who are infected with the virus are out among everyone else then you would have just tripled the cases in a more confined area. I personally know someone who is at day number 40 trying to recover from this virus. To see what him, his wife and 3 daughters have gone through being infected, this is not what we need society to have to go through. I completely understand small businesses and everything else that are having issues but they are going to have more issues if we reopen and their staff gets infected then they're gonna have to shut back down again. As a public worker, you would be putting me at a higher risk of contracting the COVID-19 and I personally do not want this virus. Thank you!!
Marion	General	I don't think we should reopen until there is more testing and the numbers have gone down considerably and who has contact with with with the COVID-19
Seminole	Recreation	I own a Scuba shop, supply oxygen etc so have remained open for essential stuff whilst the shutdown was on. Business is almost non-existent but hoping to bounce back. Floridians love to be outside and active please let us start to use the Springs and parks again so we can dive and teach. We will have to implement social distancing in the classes but that is easy. I totally understand and appreciate the reason for the shutdown but hope we can get back to a limited for of work before we lose all our season.
Lake	General	TOO SOON TO REOPEN FLORIDA!!! YOU PEOPLE CRAZY??? ALL THESE DEATHS AND YOU WANT TO REOPEN???

AMERICAN OVERSIGHT

Seminole	Government	I have a compromised immune system and I have been laid off due to all of this. I am not receiving any unemployment, or CARE money. I am far from rich and live in THE HOOD. You open everything back up people like me are at risk. We don't return to work once they open back up we are considered quiting and now are not eligible for unemployment. So I find it hard to believe that I have to sell my life for a paycheck. I am a nobody to you and well my boss too but to my grands and kids I am someone. I can't afford to get this crap. I'm bored as hell at home and wish I was at work but here's the thing WHEN IT IS SAFE... Stop putting me in a position to decide between my job and my life. We have not gone down in case for 1 day let alone 14 days. I just think people are worried about their hair and nails i mean really so you feel if a hair stylist dies from this it's OK cause she was working. Come on guys get it together. Yes I am worried about my bills, food, keeping aloof over my head and even more than that I'm worried about dieing alone in a hospital or causing someone else to die all alone.
Orange	General	Please reopen the economy for the love of God. At this rate, all of our local businesses that we love won't make it through this time and we'll be forced to eat at Red Lobsters and Longhorn Steakhouses when this ends.
Brevard	Tourism	I have heard some good ideas and some bad. In my humble opinion, a limited opening beginning May 1 should be considered. Allow vacation rentals to resume, hotels to open in limited numbers based upon occupancy and restaurants to reopen based upon occupancy. People are hurting. They need work and income. We all know the risks now. If we choose to stay home then stay home. If one chooses to go to a bar or restaurant and recognize the distancing requirements, it is our choice to do so. We need tourist dollars in the state.
Orange	General	Social distancing should be practiced.. like wear face masks and restrictions of people allowed at a time in a business, grocery store or other place being reopened. Also, feel hours should remain on curfew until things decrease and not increase while reopening the businesses again. Caution should be the key and communication to not have a widespread of the virus !!
Collier	General	Please reopen our beaches for the mental health of our communities. For many of us, exercise and the beach go hand in hand. I am a 70 year old woman. I walk 5 miles daily (normally down the beach in Naples, zip code 34102.) Because of social distancing, I normally ver off the sidewalk when I am approaching others and walk in the streets. This to me is way more dangerous (especially with the number of landscape vehicles/trailers that drive very close to me while I am socially distancing. All it would take would be a distracted driver on his cell phone and I would be a casualty for sure. I believe we would all be safer if we could social distance on the beach where there is plenty of space to spread out. Thank you.
Volusia	General	I understand that the government needs to keep social distancing but after all this time I'm afraid our economy cannot take much more time.
Duval	Education	Cancel state testing, specifically FSA which is dependant on built-upon knowledge from previous years, for the 20-21 school year so teachers have a FULL YEAR to catch students up from their time during distance learning.

AMERICAN OVERSIGHT

Marion	General	I'm so torn. I feel we should wait another couple weeks. But I have been out of work 5 weeks and unemployment has yet to come. Have no money in my account and can't feed my kid. Bills staking up. Feel let down and forgotten by our state.
Marion	General	I have a daughter with asthma, the thought of re-opening quickly is terrifying. I'm thankful you closed schools but I am concerned that so many people (based on comments I have seen on the press conferences) are only worried about themselves and have a "if I get it I get it" attitude Unfortunately, that could kill my child, or my parents, etc I know people want to get back to work, I get it. I just think we are rushing things and if we reopen, people will be required to go back to work or face not being eligible for unemployment. That puts so many families at risk, if their only option is to feed their families or not. We need to consider those that choose to stay home and how that will impact them. I don't envy the position our Governor is in one bit, there is not easy solution. However, we are still seeing large jumps in this virus, I don't think we are in a place to re-open.
Brevard	General	Everyone just needs to practice good hygiene wash your hands carry hand sanitizer if you can't wash your hands. People need to get back to work and children need to get back to school...just be safe if you feel sick have a fever follow the guidelines.
Seminole	Professional Services	Prefer everyone stay home but make masks mandatory. I'm a caregivers and it's very annoying those who don't take others into consideration. Open everything slow. If not for hair and nail salons require masks and gloves for those performing service and attendees.
Pinellas	Education	I am a preschool teacher. I am very scared about going back to work at this point. I would rather wait a while before School start opening back up.
Polk	Recreation	Please open State Parks for hiking and camping. Please open County and City parks as well. Please open beaches. We are interested in being outside and being active. We agree with Social distancing and masks when we are around people. Please let us enjoy our beautiful state, safely, of course. Thank you for your consideration.
Seminole	General	The State of Florida should not be opened. Opening the state will cause so much damage that the past month of quarantine will have been for nothing. People are already not following the rules and not staying home. Opening the state will cause people to believe that coronavirus is going away and does not need to be taken seriously. Opening the state will cause an extreme increase in cases. Please do not open the state. It is too soon and too dangerous. We need at least another month of quarantine.
Brevard	Healthcare	My daughter and I both have underlying health problems.

AMERICAN OVERSIGHT

Hillsborough	General	We aren't ready here in the state of Florida. We have too many overlooked confirmed cases that need to be handled. Schools should remain closed. What about the preparedness measures that president Obama discussed years ago? We would have been ahead of the curve. Everyone doesn't live in the same working class as you Mr. DeSantis, nor like president Trump. Stop being worried about your pockets and making decisions because you and your family are healthy. We the people elected you, so what about us? Aren't we priorities? Without the people, we have nothing. Our government could easily be overtaken during a pandemic like this. History repeats itself and the probability of human exhaustion is possible. Please don't make it worse for us.
Volusia	General	Florida is not ready to open. I believe that that East Coast of Florida has just started to do more testing and that we have not reached the peak.
Orange	Education	I do not think Florida should be reopened. This stay at home order needs to continue unless testing increases significantly. Schools definitely should not be opened, as these could become hotspots of infection. Even if kids aren't getting very sick, they could spread it to teachers and loved ones.
Hillsborough	Healthcare	We need to reopen the economy immediately. Our dental office has been closed and cannot afford to survive any longer. We have applied for every loan and assistance ad possible. no unemployment has been paid to anyone and this virus has no overwhelmed our hospitals. We have the capacity and the the damage that is being done to the economy and our lives is far worse than this virus. We need to re-open immediately! This has gone on far too long. We appreciate Governor Desantis for his leadership, please do not give in to the unions and the liberal media. Thank you!
Brevard	Recreation	Utilize a system of odd/even dates correspondent to respective street address number or end of license plate number. This would be a great way to get people out in the recreation areas and limit the amount of people to potentially half of what it could be each day. Remember the gas crisis in 1970s? That's how they allowed long lines to be controlled at the filling stations. Go for the odd even days to allow parking at beach areas please it's pretty simple.
Seminole	Administrative	It is very important to open the state of florida so People can go back to work. Since unemployment has not happened as Of yet . It' is also important in order for the economy not collapse even more:
St. Lucie	Healthcare	To soon to reopen. Cases and deaths are still rising and from what I've seen Floridians don't like to follow the rules. Example. Winn Dixie in Fort Pierce very few customers where masks or follow social distancing rules.
Suwannee	General	With the numbers going up still and for the safety of everyone I suggest we wait to reopen.There will be people who behave as they should but there are also people who will not and that will be the issue.I live in a small town but there are numerous sick here.The life of my family and friends is more than important than any economy.

AMERICAN OVERSIGHT

Orange	General	Please re-open Florida. Citizens are smart and can keep social distance and wear masks etc. But open up workout places, restaurants with maybe 50% capacity or distance etc. The economy needs to open up! We are already going into grocery stores with social distance and masks. Well the same can be for other merchants. Let's be smart and open up the economy
Flagler	General	I think it's just way too early to open back up The numbers are still not going down enough
Palm Beach	Healthcare	Absolutely not ready to open Florida. I think it would be a mistake & cause another wave of infection
St. Johns	Tourism	I just want to be sure it is safe to go back out. The numbers are on the rise along with deaths. Please consider everyone when you open up. It's dangerous for the older generation.
Miami-Dade	General	I thought long about what i would say here but theres not enough space to speak my mind. So im just going to say this. Stop being cowards, none of you want to be held responsible for the decisions you need to make. On the one hand you dont want to be blamed for reopening too soon. And on the other, if you dont reopen soon your going to have a massive problem on your hands. My advise, we are Americans and most of us will choose to safely go back into society. But we need the chance before its too late.
Sarasota	Transportation	I am a small business owner in Sarasota County working as part of the paratransit program. My funds are down to bare bones after applying for every funding program available and receiving nothing. I have take 9 of my 14 wheelchair equipped vans of the road and furloughed 17 employees. If you open up the state at this time I have no money to insure the vehicles to put them back on the road our people to drive them. Funds have to come in before I can make that happen. Nancy Head/owner and president of South County Transport Ventures Inc.
Orange	Food	Please understand, opening restaurant dining rooms will not make restaurant operators whole. Reduced capacity and public concern about dining in will impact restaurant sales for a very, very long time. Please consider extending the temporary off-premise alcohol sales permissions for the duration of the emergency & until restaurants are back to 100% capacity.
Volusia	General	Start with opening restaurants, retail stores, and hotels first.

AMERICAN OVERSIGHT

Manatee	General	As a caregiver to my 85-year-old mother and a 60-year-old husband that resides at the Riviera Palms Rehabilitation facility in Palmetto, FL, where there have been a high number of cases resulting in deaths, hospitalization, and quarantine within the building, I am totally against the reopening of the state. At this time, especially with the cases on the rise. Allowing more individuals to spread the virus is completely irresponsible, knowing that unfortunately a large number of people don't get the need for social distancing, nor do they practice it. I'm terrified that my husband is going to contract the virus given the conditions surrounding him. Opening the state would increase chances of the current medical staff to carry the virus into the facility; currently with a large percent of staff testing positive vs. an almost equal percent of residents. How does that happen anyway? I don't allow my mother out of the house except to ride along with me if I need to go out for supplies. I'm not at all happy about the transparency of conditions at the facility even though they now say that they're releasing the numbers of cases; they don't line up with the numbers the state is reporting. Please, please don't open the state until the numbers go down and more testing and retesting has been done.
Osceola	Finance	Per county evaluate and slowly re open. Financially people will lose more if they dont return to work. Reopen with new guidelines to make things safer. If they fall behind on payment it will also hurt their credit etc. One or two months can impact their future drastically. .
Volusia	Retail	As we reopen the state and let "non-essential" retailers get back to work, they should be encouraged to continue "social distancing" and cap capacity at 50% of the store's stated capacity. Maybe the state should also partner with POS companies that manufacture self-checkout systems, so as to educate some of these companies and give smaller businesses a tax break on installing these systems, since that would decrease the amount of human physical contact.
Orange	Education	I don't think we are ready to reopen yet. Maybe reassess around May15.
Brevard	General	I think we could open up most place besides restaurants and large venue places. We just need to require all stores, Dr. Office, nail salons, to wear masks. The employees and the customers. If you want in to those establishments you must wear a mask. Walmart has been open as well as other stores and I think there is no difference between them being open then other stores, like Ross, home goods etc. Require masks & limit amounts of customers in stores.
Lake	General	Do not open the state at this time. Keep stay at home order in place for another month or two. Rely on medical professionals & science, not Trump or politics! Now is not the time for politics & appeasing Trump. Opening now will set us back & cause more deaths.

AMERICAN OVERSIGHT

Orange	General	It is far too early to consider opening the state. We have not seen enough of a decline in cases and there are no guidelines in place to prevent a resurgence of the virus. History has shown a second wave in pandemics that has been worse than the first wave. If this virus has an incubation period of 2 weeks, we should be waiting to attempt to open businesses at least 2 weeks after a sufficient decrease in cases. You must understand that as soon as Florida is open, tourists will come flocking back and without proper protocols for testing, tracking, and containment of the virus, we will be welcoming further disaster.
Marion	Healthcare	Marion county has not been tested in fact there is no test site to my knowledge. I think we need some testing before you open this county. Thank you. I am 82 and I'm really worried about this.
Indian River	General	Do whatever it takes to get this state up and running. People are out of work. People can't pay their bills. People are about to lose their homes because they don't qualify for any assistance, yet, can't make any money to sustain themselves. I'm one of them. I live alone. No income now from my job, because my employer is taking advantage of this pandemic and won't allow the employees to work when we are an essential business. My store is crazy busy, yet my employer says they're losing money. I need some help. There are no jobs in my area now because of this mess. You need to get this state going again. I really don't want to lose everything I have worked all of my life for, just so I can live our of my truck. Please help!
Sarasota	General	Please don't open spas and aesthetic departments yet. We can not do a facial or botox and filler on patient since they can not wear a mask during any of these procedures so that puts the employees and the patient at risk for the virus.
Lake	Education	I believe it IS time to start reopening our state. In the interest of the long term mental well being (which ultimately controls healthy living), we need human interaction, students need their safe school environments, and businesses who have spent their lives creating their business (in many cases) NEED stability!!!
Osceola	General	To soon to take away the restrictions in Florida, we do not want another virus.
St. Lucie	Administrative	As a Covid 19 gig worker employment casualty, I can't help but wonder when our fearless, but clueless , leaders will stop blame shifting and get this DEO mess fixed. Thankfully, both Scott and Decantis will be one and done-one term casualties themselves.
Volusia	General	Beaches can be reopened with safe distancing. Stores as long as they limit number of people inside and keep safe distance with masks and gloves. All employees must be masked and gloved. Dining facilities keeping ten foot spacing of tables. Using disposable utensils.
Lake	Government	Asking for feedback about reopening the state? To do that right now would be certain failure, in an economic sense. No one has money to spend because unemployment claims arent being paid. You're talking about reopening a state full of people on a negative budget. Get unemployment fixed, get people paid, then reopen. Without those funds in people's hands, those businesses that reopen will tank fast because they'll be coming out of pocket with overhead expenses and no revenue to support that business.

AMERICAN OVERSIGHT

Polk	Professional Services	I am a Hair stylist and salon manager. As much as I love working and love my job I feel like it's too soon for us to open. There is so much risk involved, many people talk about 'oh the stylist can wear a mask and gloves" yes but is that really going to stop anything ? What if the stylist contracted the virus a symptomatic? Then takes 10 clients a day as well as working alongside 10 people. Also where is the salon supposed to get all the supplies of ppe they would need to be able to change after each client. Many clients only take 30min, that's a lot of supplies and salons have been closed for weeks and can't afford it let alone find the stuff. It is also extremely hard to do a haircut wearing gloves. When I think of the salon and my clients I do want to get back to work as the salon has no money to pay bills and we haven't gotten any help, and I know my clients need services but morally I know it's wrong.
Orange	General	I am a single mother of four children who are now out of school for the rest of the year. It has been extremely difficult as I kind of hours from my appointment as well. Financially we are all on the struggle. In my opinion all of the struggles are very difficult the government and president must assist us with more financial assistance. However in regards to the task force reopening Florida, I believe this is NOT the time to reopen Orange County specifically since we have the highest cases. People have yet to cover themselves with masks while outside in Publix stores. The severity of the issue it's not being taken properly. I am afraid to go back to work at this moment. I am working telling remotely due to me being an ESSENTIAL worker as a medical biller. My employer has over a hundred people in an office and we are not able to social distance because of the space that we have.we must remain close until we have a HUGE decrease in numbers. TOO SOON TO REOPEN! KEEP OUR FAMILIES SAFE!
Marion	General	We should not reopen at this time 30 more days is needed
Martin	Healthcare	Please do not use Georgia as an example. Please go slowly and ramp up testing In Martin county barely 1% have been tested. All business must supply masks and must take patrons temperature. Everyone MUST wear a mask
Brevard	General	Honestly feel like no matter what happens people are going to be angry. Open the state, people are gonna be upset, don't open it, people are gonna be upset. I feel like if we do open the state it should be only places where social distancing can take part. Places like restaurants, bowling alleys, retail stores. Other places such as salons where people are in direct contact regardless of gloves or face masks should stay closed for a little longer. In my opinion, a person can be as safe as possible wearing their mask, washing their own hands, staying home if they feel sick etc. HOWEVER, it's scary having to trust the person in your store washed their hands after sneezing, hoping they keep their mask on, praying they don't feel sick is scary. Places like salons and nail/ lash places where you HAVE to touch a person is very risky to open right now.
Sarasota	Retail	OPEN, but use caution. The fear and panic caused by the media constant reporting only negative opinions , not facts, has caused more injury than the virus. We lose moe people in cars accidents than from the virus, so should we ban cars?

AMERICAN OVERSIGHT

St. Lucie	General	If the peak is on May 6th at least keep everything closed till then and see what happens from there. I am lucky enough I will be staying home anyway but some people aren't that lucky and will have to go out once more things are open. We had many more things open to begin with than many other states! Keep it closed save lives! That simple!!
Hillsborough	Education	The FHSAA should be allowed to organize a limited number of "regular" season events for spring sports beginning in mid to late May, followed by post-season tournaments that should be concluded by June 30. 9/11 demonstrated that, although athletics are not the most important thing in life, resuming them is good for morale and instills a sense of return to normalcy. Spectators could be limited to specified family members of the athletes, and the spectators could be required to observe customary social distancing requirements.
Brevard	General	Open the state now. This whole thing has been a huge scam from the beginning.
Leon	General	Follow the guidelines that are in President Trumps recommendations on re-opening and the 3 phases.
Lake	General	Please don’t open the state until our numbers go down. Opening beaches is ok, however, I think the rest rooms are locked. Gross if all those people are peeing in the ocean. Unemployment MUST get fixed. We are retired and 2 grown children are married, have children, and have been furloughed since the end of March. We cannot help them monetarily and their mortgage companies will not help them. These are the issues that need to be addressed first. Let’s get these kids funding so that they can feed their children and pay their bills. Opening too soon will push everything back further. Be smart and listen to the docs that are educated.
Orange	General	I believe like other states they do not re open yet. For 5 weeks it has been a stay at home that has benefited the counts of the virus. Opening now could undo all that has been done that seems to be somewhat helping. More time makes the counts possibly go down more. Orange county has a very high count and testing has not given a actuate number. Having a criteria to follow made it so thousand could not be tested only now they seem to be more reasonable about test which with more time would give better information plus that the test just recently can come back faster then originally. People lives are at risk to open now alot do not follow the guidelines which then can cause a worse out break and then all over again we are stay at home trying to get unemployment etc. We should just buckle up for another month to be safe knowing the testing information is better. And people feel more safe to go back to work and back to a somewhat normal life. Alot of business that want to open the owner's and higher ups dont deal with the public like the workers do so they need to understand peoples lives are more important than money.
Volusia	Management	I feel it's not time yet to open thinking should give at least till June. Once people start going out more things will start the virus to go up with more hospital ICU. I run a business and my customers don't feel safe to go out!!
Hillsborough	Accommodation	It is unfair to require small Airbnb type of operations to close shop while hotels and motels are permitted to continue. A single family home is way more isolated than a hotel lobby, elevator, or common areas...

AMERICAN OVERSIGHT

Okeechobee	General	If the State gets reopened and everyone starts running around like there is no Corona Virus and I get sick with it even though I am practicing as safe as I can I'm not going to be Happy with our Governor.
Osceola	Transportation	Yes I want it's open we all do I want to work but I want to reapply my job but insane clown publix and I want to go home to see my family I miss my family
Palm Beach	Food	Open restaurant in Wellington. Please. We are with out pay. No unemployment money. We are drowning here.
Palm Beach	General	Wish to open parks-Restaurants-hair salons. Thanks
Volusia	Food	I am a bartender in a small family-owned restaurants. I have been out of work for 5 weeks now and yes I need to go back to work! At the same time my boyfriend has terminal bone cancer and cannot get sick whatsoever! So I do worry about opening everything too soon because of what we do not know about covid-19! So if we have to extend the stay-at-home order for a little while longer than I would be okay with that.
Orange	General	We should reopen when the hospitals can handle the strain. We should limit the incoming travel to actually necessary for longer.
Brevard	Education	Opening jobs will put an undue burden on parents unless there is an option for childcare. Parents may not be able to return to work if the schools are not open. Many would pay more in childcare than they make.
Orange	Real Estate	I am in favor of opening the state and continue to stress good social distance and smart practices.
Marion	General	Open up the state to its residents. We want to go to the beaches. Not to just walk but to relax. We need to let people get back to work. Open
Lake	General	I think opening all retail stores should be fine if social distancing is used. Also barber shops should fall under essential business seeing as we all need hair cuts. I think we should open restaurants to the 50% capacity limit as well. I am a firefighter/paramedic and have seen violence and suicide attempts skyrocket. People need more outlets most understand social distancing at this time. This will also get some folks back to work
Sarasota	Recreation	Please make opening gyms as soon as possible a high priority. As a fitness enthusiast for over 30 years, I'm not alone in saying the ability to go to a gym outside of one's home is critical for physical as well as mental health. Especially with the summer months approaching, we Floridian's need safe, air conditioned spaces in which to exercise. Thank you for your time and consideration, Pete Dach
Marion	Healthcare	every one should be tested before opening the state
Marion	General	Would like to see Florida open on may 1st

AMERICAN OVERSIGHT

Polk	General	I'm a homeschool mother of 4 kids with a husband who works for the City of Kissimmee. I personally think it's to early to open up the state. For one our positive cases of Covid-19 HAVE NOT DECLINED! What happens to the rule of 14days of declines cases before phase 1?? I personally know someone who was tested incorrectly by a hospital and had to co get retested at another hospital. How many has this happened to that have COVID-19 and think they okay, but they aren't. Also, people aren't following the rules now so what makes you think that if you open the state with more rules that they will follow those rules, they aren't. Those that have lost a job or still have a job aren't going to need them if they are dead or sick because they get COVID-19. I know people whose have no job because of this and still think it's to early. Please think about the health of the citizens of Florida's health! There has been so many people not tested!! Why opens the state early for this to all happen again because people are being infected again. June 1st is the EARLIEST the state should open. July 1st is probably a safer choice.
Volusia	General	Please DO NOT OPEN everything up. Although I could use a haircut, I don't think it's worth getting sick or dying over it. The consumer may have a choice as to use services or stay put at home but the professional will jump at the opportunity to make some money again. Some might have to cut corners to make ends meet. Open medical massage, dentists, chiropractors, etc. on 05/01 and wait another week or two for the next round of shops, like hair salons, barber shops, nail care, etc. restaurants and bars will have to wait until it's safe, maybe another month?
Volusia	Management	We should start slowly reopening our state. People still going to groceries so I think if businesses can follow same protocols and people continue their distancing measures we shouldn't see spikes on virus. Production businesses are able to isolate departments and monitor their workers. We can't continue sinking our economy. Older population and risk groups should continue their isolation but rest of population is able to operate to go back to work.
Brevard	General	When the State of Fl. feels it is safe to reopen all government building/offices then I would think it would be safe for all businesses/citizens. Until then, I'm not venturing into places other than the grocery store because of necessity. Hopefully, my company will continue having employees WAH (Work At Home). Governor DeSantis is doing an outstanding job with his ability to LISTEN to Florida citizens, and President Trump. He keeps us informed, makes great decisions, and is trying hard to keep up with all of this "stuff". He looks tired! May God bless him and keep him safe and well!
Orange	General	No, please do not reopen Florida yet. There will be more deaths and more sickness if we open too soon.

AMERICAN OVERSIGHT

Marion	General	I think it is time for us to shift the focus on high risk individuals taking steps to protect themselves while lower risk individuals begin to resume activities of normal life. Let stores open. Let people work. Provide guidance for people to have to wear masks while working and to frequently clean surfaces. So many people are not following the stay at home orders that it can't have the desired outcome. Instead of having to pay for more unemployment, the state could spend a fraction of that amount to provide masks to people so they can begin to live again. I am a healthcare worker. I understand fully what this means. I also see people every single day who don't understand or follow the recommendations.
Orange	General	I do not think we should risk reopening. We need 1 more month to continue to flatten the curve. Opening to prematurely because things are getting better would reverse all the hard work everyone put in to slow the spread and we would have to do this all over again.
Brevard	Healthcare	Hello: I think it is okay to open malls, gyms, small businesses as long as the six foot rule, gloves, and masks are used. There has to be a fine line between preventing more Coronavirus cases and putting people back to work safely. I think it is too early to open movie theaters and sit-down restaurants unless tables can be kept 6 feet apart. The servers would have to wear gloves and masks. They must change their gloves in between tables just like doctors change their gloves in between patients. I vote to open the above businesses May 1 and movie theaters and sit-down restaurants when we have two weeks of declining Coronavirus cases as recommended in the federal guidelines.
Brevard	General	No tourists clogging our beaches and grocery stores that still don't have adaquate stock on the shelves. Mandatory masks in public If Disney is saying they won't reopen until 2021 that should speak volumes Allow businesses to open with curbside pickup no matter the product The Airforce is working under pandemic conditions for 1 year. Mandatory masks to be on base. Florida should follow this lead.
Lee	Government	Can we open the libraries to get books? This can be done easily with social distancing!
Brevard	General	If you reopen things, things will get worse. Don't do it. If you do, y'all are a bunch of morons. Safety first. Hell, you can't even get the unemployment website to work. Criminal. Don't let anyone except for essential businesses to remain open. Period! Don't be like GA. Their governor is a moron. I'd hope our governor has more brains even though he's an idiot and Trump stooge.
Orange	General	DO NOT OPEN Florida. No state in the United States is ready to open until we have a testing plan with testing capacity, procedures, and guidelines in place.

AMERICAN OVERSIGHT

Lee	General	- Require everyone to wear Masks - All shopping stores have a maximum limit in store at a time. IE: only 20 in at a time, this does depend on size of store. Walmart is an exception, maybe 50 at a time. As everyone knows Walmart is a germ invested store due to lack of respect of certain shoppers. - One way aisles All stores - 6' apart everywhere - Bars. Restaurants- limited seating. 50% occupancy this will be difficult for gross profit margin, but till vaccine cannot fill restaurant to capacity. Has to be 50% or less with seating 10 ft. Apart so customers can take masks off to eat OR if booths every other one used. - Hostess, Servers, Cooks and support staff all Must wear Masks - Menus printed on paper to be disposed of OR on plastic to be cleaned after each use - Office staff - 50% can work in office 50% home. Rotate each week. Accommodate employees with children. If have child who cannot go to school, employee work from home. Office has to be configured to 6' apart OR more. - Voting - instead of voting on 1 day, to help with social distancing - vote over a few days IE: last name A-E vote Monday, F-J vote Tuesday, K-O Wednesday, P-T Thursday and U-Z Friday. ABSOLUTELY NO RESULTS TILL FRIDAY HIVEN OUT NO LEAKS NOTHING TILL FRIDAY. No media leaks!!! - Schools - class size smaller and longer school day - 8-4 or 5!!! 25 MAX. to accommodate 6' apart in classroom. If enrollment too high. Split shift classes or rotate kids every other day. IE: A-M Mon/Wed. N-Z Tues/Thurs. Friday left for teachers to discuss students who need more help. Accommodate those students. Masks have to be worn by ALL. Parents need to work with children NOW to teach them about social distancing. It'll be difficult for elementary age, but needs to be practiced. Have to HIRE more teachers for this. - Give credit to population that is already following guidelines - Theme Parks - this will be tough. Need to find out what it cost to open up park on daily basis and find out how many can attend to support that cost. Park sttendance has to be 50% OR less. Lines on rides - 6' distancing. Seating on rides need to be apart, unless family member, they can sit together. Most parks have open area
Brevard	Healthcare	I am raising my 3 grandchildren and I say DO NOT OPEN. We have been staying at home like many others. I think it is to soon.
Seminole	Agriculture	It would be fantastic if we can apply for licenses, fingerprinting using CDC distancing guidlines.
Marion	General	I think as a state we need to move cautiously. If you start to open the state back up, you will give citizens a false sense of security and you may see a rise in cases and deaths again. I think all counties need to be treated the same with the same guidelines and not limited to counties with more cases. I think if you want to reopen some businesses that you will need to require those of the retirement age and those with health issues to still stay at home. Any that do not abide by those rules take their own health into their own hands. We have to be cautious.
Lake	Food	I am a restaurant manger and would like to see the food industry open asap With the proper precautions

AMERICAN OVERSIGHT

Brevard	General	Let's get the economy back on the road to recovery.I believe it can be done safely with a few common sense regulations. Maintain social distancing, wear mask where necessary, WASH YOUR HANDS OFTEN! Begin by keeping numbers small. Gather in small groups , In places where larger numbers usually congregate, set limits as to the numbers that can gather while maintaining distance from each other. TRUST people to be responsible for their actions. We do not need to be lead around by the nose by government! Let's get moving on the road to recovery.
Marion	General	I think you should open up Florida!! If not everybody will be in such a financial deficit they're not gonna be able to get out of!! There will starving family's hungry kids!! And I think they will be corruption in the streets I'm pretty sure a father would go as far as stealing and robbing to feed the family!!! So in my opinion you should have certain guidelines to follow but still open the state back up!!!!
Brevard	Tourism	I know everyone is rushing to re-open the state for economic reasons however I am pleading with you to keep things closed until our counts start to flatten and decline. The sacrifices we make now will only ensure our safety in the future. Thank you for taking this into consideration!
Marion	General	I am a bartender at Kats Krazy 8s. We all have filed unemployment. We all have had no money in a month. I think its a toss up between providing for our family and health concerns. I know we all want to go back to work. I don't believe people will stay on unemployment once we can go back to work. I know I won't. I'm ready to get back to work. I don't think its worth getting sick. So I have mixed feelings about this topic. But I'm ready to get back to work. Taking precautions, washing hands along, sanitizing bar and anywhere people sit. I'm a worker. Always have been. Still have not heard from unemployment and now I have no way to feed my family or pay bills.
St. Lucie	General	I have a feeling it's too soon to open, we should wait another month.
Volusia	General	Florida should be testing all employees of every business which is going to reopen to see if they have the virus. Those that have and are not showing symptoms can go back to work. Also there must be a strict set of guidelines that must be adhered to or else there will be a penalty of some sort, financial or business will have to close to make sure it is a safe envrionment. This holds true especially for business such as hair salon, small stores, tatoo shops etc. Without major testing for all workers I don't see how this can be done safely.

AMERICAN OVERSIGHT

Polk	Tourism	First off thank you all for what you are doing! I am so glad to see a talented group of men and women together in charge of reopening the state and the economy. I know this idea has been thrown around, but I think if we give our economy till the second week of May to reopen we will see somewhat normalcy, especially since 60% of cases currently are localized in three counties in south Florida where we know we can isolate the issues. What if we see businesses return, however allowing ALL patrons to wear face masks adding that extra level of security. Especially retail can begin reopening too. Perhaps Disney Springs and Citywalk can reopen too. Restaurants deserve to reopen, but enforce 50% capacity and focus on quick turnover to allow more people and more revenue. I foresee theme parks maybe in June, with strict social distancing like Shanghai Disney is supposedly prepping for. Bottom line is too that we need to see increase testing facilities. Encourage people that even think they might have come in contact with the virus to go get tested IMMEDIATELY! Again thank you all for what you are doing and I look forward to the future we will all create together!
Lake	Food	I Would appreciate the continuation of an early morning special senior/auto immune disorder shopping hour at Publix, Winn Dixie, Walmart etc.
Lee	Recreation	Please open outdoor areas including FWC controlled WMA's !! These areas are important to me for fishing, and social distancing is easily accomplished.
Lake	Recreation	Thank you for asking the citizens of Florida. This is the American way. Begin reopening the economy by first allowing for recreational areas such as state park camping, beaches, and golf courses and gyms to reopen. This benefits two fold. First, it allows people breathing room after being indoors for so long. This will also release feel good endorphins that will give people a positive frame of mind which is hard to find right now. After a couple of weeks, begin to reopen restaurant dining and retail stores. This will be important as social distancing will still need to take place so new guidelines will need to be followed. The last to reopen should be amusement parks. There is potential for more transmission in these areas. A recap: 1- reopen state parks and camping, beaches, golf courses, and gyms. 2- Wait for 14 days to see if any spikes in Covid-19 cases. If not, open theatres and retail stores with social distancing rules and guidelines. 3- Reopen theme parks last with a strong sanitizing routine in place.
Palm Beach	General	I think it’s time to reopen and mask are a must to be worn in public with sanitation stations
Hillsborough	General	We need to get the state open for business. The infection rate is less than 10 percent and the majority of them show no signs of infection. Protect the vulnerable and let the rest of us go back to work, this government over reaction is killing us.

AMERICAN OVERSIGHT

Sumter	Healthcare	Pharmacists testing: Bad idea IMO because you would have potentially contagious people in the stores The pharmacist would need to implement more safety measures to avoid contamination. They have enough on their plate. I don't like the idea of the pharmacies being used as doctor offices. If doctor offices are going to have people wait in their cars for safety reasons, why risk them using pharmacy's for testing sick/exposed people.
Orange	General	The economy is not doing well, and theirs people who haven't received unemployment. The bills are still coming and the money is running low. We need to open up but put strict rules out, especially in restaurants. Employees where mask and gloves and customers are seated 6 ft away from each other no more than 25 people in a restaurant
Brevard	General	It is too soon to open things back up. The number of cases in brevard are rising every day. If you open things back up now people are going to do stupid things and rush to go out and do things again. Then we will experience an outbreak and many more people will fall ill.
Volusia	General	Open the state up, this is insane, history will show us how stupid we were. How can you go to Publix and work but can't go to parks or the beach. Also how can we be 6 feet apart but boats have to be 50 feet. Open the waters up this is insane you told us we can got fishing but FWC is closing waterway's. We have done this social distancing for long enough.
Volusia	Food	I think we will be pushing our luck if we open too early. You still see at present folks out running around when they should be home and many not taking the proper precaution. I'm an essential worker in food/milk production so I have to be out here. If I had choice. I would not. You will have folks taking it as a "green" light to do things that they should not be doing.
Seminole	General	Personal opinion keep stay at home should continue. I myself don't want to have to stay at home being that I personally made this year to travel, however this is a global issue. This should over power anyone feeling their rights are being violated. When someone has the common flu and they come to work people are pissed that the person didn't stay home. We have a global issue that is killing people and people are mad they cannot go outside. However if the government should decide to open everything again then so be it. It is what it is.
Volusia	General	I believe it is to soon to reopen... I agree with experts that more comprehensive testing should take place as well as contact tracing before we begin any type of large scale mixing of people.

AMERICAN OVERSIGHT

Citrus	Recreation	Dear Governor Desantis, Thank you for your hard work. I understand that difficult decisions are being made daily to protect both the constitution of the United States as well as the Public Safety of the citizens. I would like to talk about organized sports for children. I am a coach and parent of a organized group in Citrus County. While I understand the children miss their teammates I am also very concerned for their health and safety if these organized tournaments and activities reopen too soon. Trying to have children following social distancing standards would be nearly impossible. Keeping equipment clean and attempting to also have children not share would also be impossible. I understand that most of your traveling sports leagues do operate as businesses, thus finically straining them during this time, but more importantly is to not prematurely opening large events where this virus could be spread rapidly through the children, parents, and other family members who participate. I hope this is a safe and gradual reopening as everyone will be excited to get back into some sort of normalcy. However, more important than a recreational game, is the wellness and safety of my children. Thank you for your time and consideration. Sarah Miller.
Manatee	General	Re open but very slowly. Also encourage wearing masks and social distancing. In my job experience, especially when working with food, employers demand workers to come in even when sick, so in my opinion that kind of mentality will return if "things go back to normal" too soon. Anyone who is sick should not be in public or the quarantine would have been pointless.
Clay	Healthcare	Allow everyone to open with "social distancing" and potential PPE restrictions. We need to get back to work and stop the MEDIA from running this crap-show. We are out of work, cant get unemployment because of a crappy system and that $1200 from the govt doesnt cover anything other than a single rent/mortgage check for most people. Time for us to get back to making a living again!!
Palm Beach	General	Open up businesses as soon as possible. These measures are going to prove worse then the virus. So much damage has already been done that delaying a reopen will exacerbate the situation. People that are afraid to be in public can continue to stay home. The hospitals are empty. We need to move on with our lives. Five thousand people a year die from choking. There are risks in life, the government isn't in a position to protect people from everything.
Pasco	Food	Open carefully and let people return to work if the state cannot pay us to live.
Orange	General	I will be very concerned. A lot of people are not taking the precautions seriously now, let alone if the restrictions are lifted. If we take the example of other countries that put measures in place about a month earlier than Florida did, their numbers of new cases is still going up, which leads me to believe that we, unfortunately, are not ready yet.

AMERICAN OVERSIGHT

St. Johns	Education	Absolutely open the economy - the number of cases and deaths is much lower than the scientific models "guessed". We Americans are not afraid of the unknown and can safely manage to protect the vulnerable population and still be able to feed, clothe, and provide a home for our families. Hiding in our homes is not the answer, as the latest research is showing, sunlight/ ultraviolet lights and humidity will destroy the virus. So let's get out in the Sunshine State. And Governor Ron DeSantis is doing a Great job managing this health crisis! Dr. Joyce Errico, RN, DNP, MSN, MPA Den of Nursing Fortis College Orange Park
Osceola	Tourism	Please wait a little longer... We can't afford other crisis like the one we are living.
Orange	General	Yes, it's important to be as conscious of the economy as safely possible. Safe, is the key word. My fear is that we'll be so eager to "return to normal", and invigorate the economy, that we'll be inviting a second wave of infection. If that were to happen, we'd be in a more dire economic downturn than had we simply been patient. We did not go from business as usual to economic lockdown in one step, nor should we raise restrictions In giant leaps. We make incremental moves, with an understanding of a new reality: we lift the shelter in place, but require masks, minimum proximities, and smaller groups. We open restaurants, but limit eat in to ensure distance minimums and require masks and gloves of employees, etc
Collier	General	As of today, 4/25 Florida is flattening the curve. All these measures we are taking are working. I think it's time to open up our beaches, parks, tennis courts, golf courses. Open up the outdoor spaces for people's mental health. Let us decide then if we wish to return. We will be wearing masks and social distancing for awhile. Let the businesses open in accordance to CDC guidelines. People need to get back to work! !
Brevard	General	I don't think Florida is ready for a Phase I opening. Cases are still escalating, and testing is inadequate. I sympathize with Floridians who have not been able to get their unemployment benefits, and if the State can't figure out how to get them those benefits, the State should find another way to get them paid. There must be reserve line items in the budget that could be used. The money could be repaid from the unemployment line item once the unemployment system is working for people. If people in Florida weren't out of jobs and insurance and money, with no unemployment help in sight, I'm sure they would prefer to stay at home, rather than put themselves and families at risk.

AMERICAN OVERSIGHT

Palm Beach	General	This is a very complex issue due to the fact that there is an enormous amount of negative citizens that selfishly do not value the health and wellness of people's lives around them and are only concerned for themselves. This VIRUS has become politically fueled rather than taking the seriousness for what it really is. I am very concerned about the reopening of anything at this point because of the reckless citizens that feel this is a hoax that will be placing the rest of us that care in severe danger. We have to think of the safety of our children's future and be mindful of one another and how it effects each and every individual. I am terrified if we open too soon we will have to go back to the beginning and at this lockdown stay at home all over again. We need to remain where we are for at least another 30 days. The states daily cases are rising in large numbers and so are deaths. Please be smart and protect our lives. Thank you.
Marion	Healthcare	Bad idea to reopen. I cannot get tested and both my husband and I have coronavirus.. Your numbers of infection s and deaths are wrong.
Brevard	General	Personally I think social distancing is working I'm an essential worker but my office is locked to the public except for appointments only and we can't have more than two or three people in there at one time (no walk-ins ANYWHERE) that being said I think the same should be for the occupancy levels of all restaurants and bars and stores to be changed. When the tourist or snowbirds arrive here in the winter the restaurants on Merritt Island are standing room only, that's ridiculous make a reservation ,take out extra tables, space people out. Anyone who coughs should be asked to leave a business immediately. Bank lobbies should be closed unless you have an appointment, drive thru service only. I don't have the answers I think being able to wear a mask all the time is necessary and should be allowed this might come back around in the fall and it could be more devastating, let's be proactive.
Marion	Government	As much as it pains me to say, I believe opening too soon will be a disaster. I'm a school resource officer and I'm seeing daily the effects of this virus. We should be cautious, not like Georgia. Anxiously waiting for a vaccine.
Lake	General	I would love to see Florida reopen. However I'm not sure it is ready to. I know economically it probably should be. However safety-wise I don't think so.
Sarasota	Education	Can you ask the schools to end the school year sooner? Even two weeks sooner would be helpful. I am currently on furlough at home helping my 3 kids with their distance learning. It takes 7 hours a day to get it all done. So if my job (gym) does open after May 7, I can't go back to work. No parent can work while helping their kids accomplish their school work. It's a full days work teaching our children, submitting assignments, scheduling zoom calls, sharing computers, printing off work sheets, learning how to play and teach the recorder etc ..... Sincerely, A tired Mom to Christopher -11th grade Harrison - 8th grade Lauren -4th grade

AMERICAN OVERSIGHT

St. Lucie	Healthcare	Being a nurse and working the frontline I don't think Florida is safe to reopen despite the economic impact we are facing. Opening the state back up you will be bound to see increased positive cases along with deaths. Until we can get the appropriate treatment and testing in place it's not a good idea. We need to get to the bottom of why people who had the virus before and recovered are now testing positive again after being cleared. It makes no sense and to put our children, elders, and immuno compromised population at risk is just not smart.
Volusia	Tourism	With neighboring states being so irresponsible and opening their states too early (while their cases continue to increase), it is imperative that Florida continue to restrict tourism and vacation rentals that will expose Florida residents to COVID. Opening some businesses that can continue with social distancing guidelines should be considered, to serve residents before we even consider bringing in visitors from irresponsible states
Sarasota	Information	We are not safe until we can flatten the curve. Or no death's in two weeks or more. Everyday people are dying opening up the State will add more death's
Orange	General	I disagree with opening up business overall. Wait until June, and slowly roll out openings, that show "social distancing" renovations, as the drive-thrus have. Allow for schools to have graduation ceremonies on their football fields, 6ft apart and have families attending, be immediate family members only. Also, redefine "essential businesses" and then roll our slowly in accordance with the "revised" definition of "essential business". Lastly, folks who have been tested need access to a 2nd testing.
Orange	Tourism	We should not be allowing our theme parks to open until the threat is no longer imminent. People come from all over including hot spots. By opening our doors again to travelers we will be the next hot spot.
Orange	General	It is time to open the state back up. If we keep hiding ourselves we won't build any immunities. As with the unemployment fiasco, we need to earn an income. At the rate we are going most of the states people will be bankrupt, homeless, depressed, suicidal and excessive alcohol and drug consumption.
Broward	General	Slow reopen will prevent more casualties. There are more values for human lives than anything
Orange	Recreation	Please open fitness facilities up ASAP.
Volusia	General	We need to slowly open the state up. Ask people to wear masks when in public, except at the beach or while out exercising or on the water. Too many people are losing their jobs, including me after working at US Foods for 20 years. Restaurants need to open at 50% occupancy. Hair salons one client at a time. Movie theaters social distance. The people can not survive another week with the state being closed down the way it is. This is too devastating to the small businesses and the million unemployed people.
Lake	General	I live in Clermont (Lake County), and am looking forward to the reopening of Florida. If people continue responsibly practicing social distancing, washing hands, wearing masks, staying home while sick and keeping children home when sick, I believe we can open businesses, churches, and offices. The vulnerable population should continue staying at home until it is safer to mix with others. Social gatherings should follow the guidelines. We need to be able to safely open and support our local businesses, or they will not be around when this is over.

AMERICAN OVERSIGHT

Volusia	General	I believe it is too early to open businesses in the state of Florida. The coronavirus is still rampant and spread by person to person. I also do not see the majority of Floridians practicing social distancing in public. The beaches in Volusia county are crowded despite the restrictions placed by the county on reasons to go to the beach.
Seminole	Education	I am a special needs teacher and to meet the requirements for distant learning I am working 8 to 8 daily at home. 5 + hours of that is on phone non stop with students. My contract is 7hrs not 12hrs. We're is our hazard pay?! Also my college student who was on his own now moved back home because even though he filed his own taxes we claimed him in previous years in taxes he got no stimulus check! No financial help at all. Still has not recieved unemployment! He needs something!
Orange	General	We should NOT reopen our community in any sizable way until we can guarantee free, widespread, accessible coronavirus testing for as close to 100% of us as possible. Most models point to us having flattened our curve of infection, but if we reopen everything, we will have an outbreak. All the work we've done staying at home to save lives will be for nothing. We must proceed with overwhelming caution.
Marion	Accommodation	Open you all stores and be proper
Nassau	General	Open hair salons require employees to wear mask limit 2 people in waiting room 6 ft appart most salons chairs are 6 ft apart Open sit down restaurants limit 4 to a table 6 feet from table to table limit ow many comes in no waiting inside unless 6 ft apart ALL EMPLOYEES WEAR MASK don't allow anyone to sit at a bar you could also limit hours and days open but we must open now at some point we have to weight the difference of economy COLLAPSE ALL BUSINESS EMPLOYEES MUST WEAR MASK NONE ARE WEARING MASKS NOT MCDONALDS SUBWAY DOMINIOW PIZA HUT ARE NOT WEARING MASKS!
Lake	General	Open stores and restaurants as long as everyone wears a mask except when eating. Restaurant booths every other one. Lines separated by 6 feet.
Hillsborough	General	Based on the spike in cases last Friday, I do not feel Florida should open. I fully support following Trumps plan to reopen in a phased approach which calls for a 14 day downward trend before reopening.

AMERICAN OVERSIGHT

Sarasota	General	When making your decisions please think of all the citizens and not just the ones that want everything opened right away. Many are saying that they should let the weak die for the people to get their freedoms back. We are all a part of the United States and are all equal. Everyone should be taken into consideration. I believe all restaurants should be allowed to be open but for take out only until the summer months. This allows all workers to still be employed. Allow all dentist, doctors offices to open up slowly by making sure that they do not have many people at once in the offices and that sit 6 feet apart. Beaches should not be opened because everyone will just go there and be on top of one another and then the same thing will happen when the spring breakers were here. Many believe here in Florida that this is no big deal and some believe it is a hoax. This is what will be causing the issues of numbers to raise again. Please take guidance from the CDC on how to open the economy safely. Another option is if employers have the capability to keep their employees working from home with no impact to their businesses they should stay that way until late summer. Others that can't should put safe measures in place like hand sanitizer, wiping things down regularly and this will keep some home and some going out. It will prevent so many from being out. We do not want to open up and the number start to go up. Everyone's life is valuable, it does not matter if they are old, young, immune compromised or healthy.
Polk	General	I beg of you please do not reopen Florida to soon. Our elderly population along with those with underlying conditions, of which category I fall into, are at great risk. I am an essential worker who deals directly with customers, cash, paper work etc and does not have the opportunity to stay home or I lose not only my income but the insurance that covers all of the medications that keep me alive. Currently our Clerks office is closed to non essential customers however If things are opened to soon I along with many others like myself put at risk so either way those like me lose. Florida is a state of many. There have not been enough declining numbers in our area to warrant even a soft opening . If you should decide to open I think It will put far too many at risk. Thank you for your time..
Volusia	Healthcare	Absolutely not
Sumter	Healthcare	Easy does it. I want a haircut, I would like to go to the beach and eat out or see a movie. Not one of these things is a need. Yes, people need to get back to work but they can only return to work when public health safety precautions are in place. Again, easy does it!
Volusia	Healthcare	I believe it is too soon to reopen state. Until national numbers have tapered off and so many people stop dying of the virus I feel it'd be best to keep state closed. Re-opening seems rushed and for no other reason than money but health is more important than money and keeping families safe and alive. May seems too hasty as it appears we are not yet out of the thick of it. Mid - summer seems more reasonable. No need to put people in unecessary danger

AMERICAN OVERSIGHT

Sumter	General	The Presidents Task Force says states should see a 14 day drop on the number of cases before allow opening. Florida is still on the rise. Why would you open if the directives from the medical experts on that task force aren't being seen. Opening too early will certainly cause another spike in cases and deaths.
Palm Beach	General	I'd like the following this to be addressed: Barbershops Boat ramps and marinas
Brevard	Food	There are non-essential businesses already open nor following the Governor's Executuve Order. I am against opening businesses until we have tested more of our population. Thank you for considering. Cathy
Pasco	Finance	The virus is serious but so is our economy. the fact that our unemployment system isnt working we have alot of families in Florida out of money and starving. We also have many counties with few infections. You have to trust the public in doing whats right. We have 40% open capacity hospital beds if needed. We need to go back to work.
Miami-Dade	Construction	There is no possible way or form we at the construction job sites can possibly keep a safe distance on a jobsite. And yet, still construction jobsites throughout Miami have not shut down since day one!
Marion	Real Estate	As a small business owner for over 40 years, I see re-opening Florida as a joint effort between counties and residents. We must take personal responsibility for our health and safety. If you are sick, or are compromised, you should be smart enough to stay home. Otherwise we should be allowed to go about our normal business, with social distancing, and good hygiene practices. I believe that until we gain herd immunity, we will have to just move on with our lives. Destroying our economy is already going to have far-reaching repercussions. We have lost harvest season here in Florida and GA, our Northern neighbors won't have the proper help to plant. Canning, packing and other processing plants are shut down. Our food supply is going to be greatly impacted for a long time to come. Please work on ways to get Florida back open, and it's people back to work. Thank you for your hard work on this unprecedented problem.
Seminole	General	While I am nervous about what the disease can mean for me, I am ready to start living again. Since when do we live in fear? A lot of businesses have been able to deem themselves essential without the bat of an eye, so why not leave it up to each person? I say open back up, heed warnings but let people do what they feel comfortable with.

AMERICAN OVERSIGHT

Brevard	Healthcare	I have been staying at home since March 11. I do pickup groceries. I do not do takeout. I can walk to the beach, and I walk the beach daily. I follow the IMHE site. The data reflects a good outcome in Florida if and only if we maintain social distancing thru mid June. You can put all the experts on your task force you want. I am not engaging in the economy until after I see what happens thru mid June. I also think that any references to the president's ideas is the kiss of death. Pence's task force is the only reference you should be making. Trump overexposure has made him irrelevant.
Orange	General	We should open all businesses before there are no businesses to re open when the time comes. The only way this virus won't spread at all is if literally everything closed including what's open right now, and of course we can't shut down hosptilas and grocery stores. So if we are going to have some things open where alot of people pass through on a daily basis we might as well have everything open. The people that are more susceptible such as the elderly and people with conditions can continue to stay home.
Martin	Healthcare	It is way too soon to consider reopening Florida for business. We need much more testing . There are some scientific projections that say we shouldn't relax social distancing in our state until at least June 8. Fix the unemployment website. Process submissions. Help people to survive. Our numbers are not subsiding. We need to flatten the curve. Not allow it to continue to rise.
Marion	General	I think you should slowly start opening when the cases start dropping. Only then start back slowly but still have social distancing and mask required. Watch closely and if the numbers start increasing lock everything down again.
Osceola	General	Hello. I seriously think it may be too soon to open Florida back up, I know we all want our lives back to normal again, and we all want to go back to work, but I think if we opened Florida back up too soon, I think the virus would spread and kill more people. I think it needs to be done very very very slowly with restrictions and precautions, cause some people don't know how to keep distant from others and I think if we continue to practice social distancing and keep practicing Washing our hands and stay healthy, we will all be okay. Thanks for all you do for our state to keep us safe. We appreciate you Governor DeSantis!!
Duval	General	Parents with school age kids still have to homeschool their kids for the next 5+ weeks. How can you expect us to head back to work and still be able to teach our kids? Reopening before school is over will give an unfair advantage to workers without children. Cancel the remainder of school and open daycare/summer camp facilities.
Miami-Dade	Recreation	RE open the parks BUT do NOT open the parking spaces. This allows for locals to use their neighborhood green space. Otherwise you have forced us all onto narrow sidewalks.
Volusia	General	It is crazy to even think it is time to open any facility up. We are still getting more cases reported. And for people to blame the prisons for the spike is unbelievable. The prisoners are not going anywhere. It is the staff going in and out and who knows who all they been in contact with. NO NO NO IS MY OPINION!!

AMERICAN OVERSIGHT

Indian River	Professional Services	I am a dog groomer and own my shop. I have a plan in place to limit persons from entering. I will go out to get the dogs. I am a very small shop with just 2 people. I need income to support myself and my mother. Please open small businesses!
Volusia	General	There is a section of essential workers that you government officials never address. The plumbers, electricians, appliance technicians and every other field service technician that must work inside the home. You need to mention that when people call for these services they should wear masks and stay away from the workers completely. I shouldn't have to tell each and every person this before entering their home but it seems they need instruction and that can only come from the governor and mayors. Please help keep me and my colleagues safe. Also please start making an effort to help out employers get masks and other safety gear. The hospitalizations are coming down so maybe some of that gear can come our way. People will start crowding again and then call for someone like me to entertain their home.
Lake	General	Limit number of people in any venue ie barber,restaurant,retail, theme park at any given time.Keep person separation for extended period maybe thru to next spring.Open state to tourists slowly.Require stores to enforce one way rules in.In Walmart and half of people ignore there one way signs.Resupply for possible return of corona 19 or other pandemic.Schools may need to go to half students at a time in classroom.
Orange	Tourism	Need to open beaches which are out in the open and you can social distance. Restaurants open with tables empty in between. Theme parks have everyone wear masks,hotels are large enough for people to social distance. Have to get back to some normal day to day activities
Seminole	Government	Don't rush to open up during the first wave. There will be another one. If you open to soon there will be even more deaths. We have already lost so many people. So many lives so many people are effected by the loss. If we don't know what to do history has laid a map out for us on how we should respond moving forward. We all want to get back to work but at what cost? Do we have a plan in place to determine who is infected? With or without symptoms this virus can destroy lives undetected until it is too late. Restaurant workers cook our food serve our food. Hair Salons style our hair beauty supply stores provide our products delivery people deliver our items. They have not all been tested. If you work with the public you should be tested. If you enter a public place you should be tested and temperatures should be checked in public places prior to entering buildings regardless if you are an employee or customer. Proof of testing should be given for that day so if people go to multiple places they don't get tested multiple times. Social distancing should continue as well until there are no deaths. People travel here should be tested at the airport and if they test positive should be quarantined or made to return back to their state or home. People who are in the state of Florida should be required to test prior to traveling. Hotel Airbnb guest should require testing negative prior to arrival. We need to test more. If we can't because we don't have enough test then we need to wait until we do. Vaccine is also very important but until we have one that is approved and shatter proof we need to minimize the exposure.

AMERICAN OVERSIGHT

Orange	Construction	In my opinion, Floridians are well aware of the dangers of Covid-19, and equally aware of the common sense steps it takes to decrease our exposure to it. I believe it is time in Central Florida to slowly open businesses, albeit with some restrictions. A phased-in approach with proper evaluation before moving on to the next phase, is the best path forward. And this may mean a different timeline in Central Florida from South Florida. I, for one, I'm ready to resume more normal activity, but I will definitely continue to wear a mask and distance myself in crowded locations. I would expect large gatherings such as sporting events, concerts, theme parks, etc would be last to resume normal activity and probably well into the future. But visiting the majority of shops and businesses shouldn't be a problem, we've got to have faith that our fellow citizens will continue to protect themselves properly without the government forcing them to. And if that means there's the occasional knuckleheads that abuse this freedom and make poor decisions, then let them catch it, it serves them right!
Brevard	General	While FL is in the middle of this pandemic we need to reopen slowly. Allowing a mass reopening is going to increase our numbers. We need to start slowly with retail and limited outdoor recreation. Restaurants with social distancing guidelines should be allowed. Gyms and movie theaters should be last. Businesses such as law firms and those who can allow telecommuting should open. Theme parks should be in the later phases and only with limited capacity to start with. Doctors should be able to perform non emergency procedures in a limited capacity. Hotels will need to step up their cleaning and sanitizing procedures and they should be monitored be the DoH
Seminole	General	It is well past time to reopen the economy and let the citizens resume normal lives. The "experts" have been wrong in their predictions on a massive scale. The media and government have created a narrative and policies that are a case of the cure being worse than the disease. If people feel the need to quarantine, let them, but let the rest of the citizenry and the businesses reopen.
Palm Beach	General	We have already been quarantined for over a month and the numbers keep going up— why would we open back up?? What's another month for everybody's safety- that is if our small businesses can get money to help them And unemployment actually gets to the people out of work. You open up to soon and it will never go away!! I don't see an issue with people out boating/fishing as long as they don't go to sand bars and congregate.
Lake	General	Open the state, the media it making this worse than it really it. Its impossible for the numbers to keep rising like they say when sp many people have recovered for the coronavirus. You are putting fear in Americans for some sick reason.

AMERICAN OVERSIGHT

Polk	General	First of all I will say it is not the right moment to re open the state . With stay at home orders there are still too many contagions and deaths being reported daily . If the restrictions are loosened too soon it will be like wildfire because if those who are asymptomatic and will not get tested ever because of the actual testing guidelines start roaming the streets many more will get infected and die. If over 1000 dead and 30,000 infected is not enough proof that it is too soon then I don't think this is being approached with Florida's people wellbeing in mind. Please remember that nobody is inmune and there is no cure and if any of you get infected for opening too soon your family and loved ones will probably get it also and it will be very hard. Another wave is bound too happen if people start going out like before too and then we will have to stay home even longer. Just an example , one day before the stay at home order in Florida was official both parks around my house were packed with people. No social distance at all. We open too soon , the economy will suffer longer when we have to shutdown again because it will backfire.
Marion	Recreation	Marion county is one of the largest county's in the state with maybe 125 confirmed cases! There's no need in anything being shut down for this anymore. I agree some areas like Miami still is a ways off but let's be real! Ocala, the villages, leesburg. It's slittle over board don't ya think
Volusia	Recreation	Please open Gyms
Osceola	General	I believe the reopening of businesses should start on may 1st:. Those who are not comfortable with this can remain quarantined. Eventually, life must go on. People need to adjust to the new normal. If they are that worried, they can continue to wear masks and gloves in public. If they have a health condition that makes them more vulnerable they should quarantine longer.
Palm Beach	Recreation	I would recommend opening golf courses as social distancing protocols are easy to maintain. I would also feel like you could open beaches with same restrictions as Jacksonville has done.
Orange	General	I know alot of us are concerned over this virus and we should be but at the same time we can't live in fear. There must be a balance somewhere where we can go back to how things were and take care of ourselves from this virus. If mask and gloves help reduce the spread then maybe for sometime employees should use them to keep the costumers safe and themselves and alot of sanitizing will help also.
Orange	Retail	Please open using fire codes for the amount of guests in each establishment. I would like to see everything open with reduced traffic of customers to test the waters so to speak and make sure we don't have an increase in virus.The use of fire codes will allow law enforcement the ability to hold each business accountable .

AMERICAN OVERSIGHT

Flagler	General	1. STOP PUBLISHING CASE TOTALS! This makes the public think the threat is greater than it is. 2. START PUBLISHING HOSPITALIZATION TOTALS (AND RATIOS). This will let people know what the risk of serious illness is. 3. STRESS THE PERCENTAGE OF DEATHS WITH PRE-EXISTING CONDITIONS. Healthy people shouldn't fear COVID-19 any more than the flu. 4. PUBLISH OTHER DEATH CASUES WITH COVID-19. The numbers out of context seem much worse and spread fear among the public. Most people won't look at the total population to assess their real risk. 5. RETURN TO WORK ORDER NEEDS TO BE ALL OR NONE. A decision made by an employer that puts an employee in "danger" will be subject to countless lawsuits. If it's left up to the employer, there needs to be some immunity from legal action. A fragmented approach to restarting the economy will cause chaos between those who fear COVID-19 and those who don't. 6. GIVE EMPLOYERS ACHIEVABLE GUIDELINES FOR SANITATION AND SOCIAL DISTANCING. Businesses won't survive with 25-50% of their required business, especially after being shut down for 30-45 days. 7. PROTECT THE MOST AT-RISK PART OF THE POPULATION AND LET THE REST OF US GET BACK TO WORK! If this would have been done from the beginning we could have avoided the financial calamity that's going to crush our economy. Using NYC as the poster child for the rest of the U.S. paints an unrealistic picture of the probable outcome. Regards, Paul Fallman
Palm Beach	General	It is important to reopen Florida in general. Many families cannot survive without work and unemployment does not cut it for most. Not only is it important to reopen businesses but it is highly important to open parks and beache . Sunlight and fresh air are natural disinfectants which many people are not getting now. Quarantining people for long periods of time actually weeken the immune system so when they get out they get more sick as compared to being exposed to these other ailments. I am not saying we force everyone to reopen and go to these things as well. Everyone should have the option to do and they please. They should also be instructed and provided information on how to maintain safe distances and keep themselves and others from being sick. In many ways this will be like preventative treatment and a primary response. We teach not mandate. Let people be responsible for themselves and others. Being locked down for any longer will only have negative impacts. Loss of jobs will create a horrible amount of homeless, suicide rates will climb, hunger will become more prevalent, and crime will soar. Not to mention the impact of the tourist industry that Florida relies on so heavily. I ask you please consider the impacts of mandating people to stay at home. I believe we will see much success if we follow the way Sweden has and open up things while relying on individual responsibility.

AMERICAN OVERSIGHT

Lake	General	People need to get out and get hair cuts. They need to visit restaurants. We need to get the economy up and going again. Set standards for salons and outside eating. Sanitize and make appointments. Get the theater open why not have seats set for those that are able to go out and see a movie. If a person feels we should not be open then they should stay home. Open the state parks. We need to visit the outdoors of our beautiful parks. Our Governor has done an excellent job. Now we need to slowly open with restrictions. It can be done.
Polk	Healthcare	I feel it is to soon to open the state. The cases continue to rise and honesty no one has taken this pandemic seriously since the stay at home order was put into place. The order was way to lineament and basically had no restrictions because to many business were considered “essential” and we all know half of the business didn’t need to be on that list. The cases in Polk county and around the date continue to rise daily as well as deaths. I feel that we need a stay at home order for at least another 30 days or u til we see a decrease in cases on a daily basis instead of rising!
Orange	Tourism	I believe it is too early to open up Florida to tourism. Having visitors from around the country and around the world visit the Orlando Metro area will open the doors to a second wave of infections. Opening up business that serve the community can be done safely, but those that serve tourist should stay closed for the time being. We would not be able to secure that individuals with no to mild symptoms travel to Central Florida and bring the infection back. I believe tourism based organizations can do a great job to mitigate the virus, but not while the country and the world is still facing the virus at the current rate. To support these organizations, Central Florida can focus on staycations until it is safe to open up for people of any part of the country.
Volusia	General	Re-opening businesses in Florida is way too early. We don’t even have a handle on this coronavirus and spreading to other people. Where I live in Ormond Beach, people are not practicing social distancing. The beaches are crowded with out-of-towners and out-of-state people. They are not all doing recreational sports. They are sunbathing. Along A1 a in Ormond Beach there are open tattoo parlors and A couple of bars. Why is that?
St. Johns	General	I think it is too early to open the economy. We still have thousands of cases of covid. I personally think we should stay home another week, and when we do re open masks should be mandatory. It doesn’t do me much good if I wear a mask and no one else does. We are only protected if everyone does.
Seminole	Education	I feel it is in ther best interest of all people and their health, that we remain closed regardless of the financial impact. This is going to cause a collapse of economy we have certainly never seen, but we haven't been through a pandemic such as this before. If we continue to be independent of other states and don't stand united as a country and shut down completely, it will to take longer to recover and rebuild. I understand we can not control corporations, that's what being in America is about, but the corporations shouldn't be controlling us.

AMERICAN OVERSIGHT

Miami-Dade	General	The state needs to ensure that at least 90% of the unemployed in the state has received their unemployment checks. Without it, the majority wouldn't be able to stimulate the economy anyways. Our safety and health is more important. I don't see a 14 day downward spiral of cases and deaths and until we do, we shouldn't even be considering reopening nonessential businesses. Communicate daily how many consecutive days we are trending up or down. Communicate the timeline that our unemployed should be receiving their unemployment checks! Because they don't have a timeline, some want to go back to work when it's UNSAFE. I have to leave my home weekly for doctors appointments and if I become infected because the state decided to reopen too early, we'll all be in a deeper hole than we're in now. Seems like common sense.
Seminole	Healthcare	Being an older resident, my greatest fear is that we don't do our due diligence and move to quickly. If we reopen and another surge of this virus occurs, will there be sufficient healthcare to support it. I would definitely support reopening but at a county by county plan. Obviously there are some counties that require a slower pace for reopening. Those counties where there are a less amount occurence should be able to reopen at a quicker pace. I would hope the social distancing and mask rules would be carried throughout the summer or until we get the vaccines developed.
Okaloosa	Healthcare	If you're going to re-open, which I don't agree with, please allow PA's to function without a medical doctor. They are currently better trained than nurse practitioners, and can help in the event this pandemic gets really out of control. Other states have lifted this requirement and abortion has been sent to you from FAPA, with the correct signatures but has been unanswered. Why are these qualified medical personnel laid off right now or sitting on the sideline, that is ridiculous with their help is needed. If we open, there is even a morning for physician assistance to be able to jump in and help if needed.
Sumter	General	PLEASE, PLEASE, PLEASE offer intensive and extensive education to the public about the proper use of masks and gloves and WHY masks are necessary (and gloves aren't). As A Respiratory therapist of 40 years there is SO much confusion and misinformation floating around.... People need to wear masks to be conduits of each other!!!!!
Marion	General	We need to open things up. Slowly. If you feel you don't want to open your business yet don't, but if you do you should have the option to open. Business should adhere to safety practicing. Our state and Country cannot survive much longer like this, open up Florida.

AMERICAN OVERSIGHT

Lake	Accommodation	you seem to forget that there are many kids and adults who are special needs. These kids much like my own who is 19 need regimen. Any change in regimen can cause a severe spiral out of control. Not being able to go swim In a community pool, not being able to go get replaced his favorite pair of pants that have to be sensory friendly can cause extreme meltdown. His computer laptop and iPad with anything getting changed and not having somewhere to go get them fixed has caused him to have a huge meltdown. So the cost was I had to purchase a brand new one instead of having Somewhere to have it repaired quickly. Now let's talk haircuts, people with severe sensory and anxiety follow their strict rules every day. Not having the ability to have his hair stylist cut his hair has been A huge burden. After quarantining for 14 days why could we not have worked out having hairstylist being able to make house calls. Those stylist have also quarantined for 14 days. This would've helped deal with all the stress put on us that was unnecessary. The reason the stylist could not make home calls is because they were threatened with losing their license. So now I'm stuck with having to have my child in more therapy That is quite expensive to fix what this has caused. Now on to schools, I understand the need to close them due to so many children being in the school. However all children with special needs 504 and IEP's should have been able to continue at the school with one on one teachers even if it was only for two hours. The social distancing could've remained and the children could learn. This includes college in which my child only learns by being taught by a teacher. It is also part of his regimen because after graduating high school change was difficult. So no I do not believe everything should be opened and a free-for-all. However you seem to be more worried about getting our theme parks reopened and not worried enough about who this really affected and how we can fix it. If round two is going to come as noted by many, then there's no reason To focus that far out. We need to focus on those most vulnerable and what you have caused households to have to deal with in these uncertain times. Round two needs to be handled at a much better pace as well in a much better manner.These kids are not all immune and compromised they are just kids who need to follow their daily routine and not have it interrupted. A change of going through the drive-through is a lot easier than a change of not being able to get their haircut the same
Broward	Recreation	I believe that outside activities such as boating, golfing, walking, running, biking and the parks should be reopened. We currently let citizens go to take out Resturant's, pharmacies, grocery stores, doctors offices. As long as you follow the distancing guidelines all is good. This can be accomplished and allow movement amongst all. Respectfully submitted We. Washa.
Brevard	Healthcare	In regard to Florida opening up in the midst of the coronavirus my husband and I are in our 70's and we would like to see everyone wearing a mask - No. 1! We need to keep an eye on the percentage of those tested and those who are dying of the virus. We need to make sure when we do open our entire State to business it will be done with scientific and health experts input. It should not be done just to do it for monetary issues but we know there are MANY people who need our State and Federal Government to step up and get those who need help what they need to survive through this! It won't be easy but we all have to work together. We pray this will happen in the best manner it can and everyone will take this seriously! My Grandmother and Grandfather both died of the Spanish Flu in 1918 and everyone needs to know they have a stack in keeping this controlled.
Palm Beach	General	Let's begin slowly

AMERICAN OVERSIGHT

Broward	General	We must open the state and the country now to save what is left of the economy and people's lives. Look at the comparison being made between Sweden and Michigan. Sweden; no lock down. Michigan; almost total lockdown yet Sweden has 1000 fewer deaths than Michigan. (last week). Open up! The sooner the better. Thank you governor.
Polk	General	PLEASE Open Florida! 0.001 percent of the Florida population has tested positive while the 99.009 percent are stock at home or out of work. We weren't closed in December, January, or February when tons of people were sick but tested negative for flu. We don't close down during Flu season. People in Florida need normal and jobs back please. Keep people who are sick, older in age, and with compromised immune systems home, not the majority who are fine.
Seminole	General	I don't think Florida should be re-opened yet. Until we have more widespread testing, we're not ready. Just because South Florida may have the most cases and other parts of the state don't, if people move around from one place to another it will spread more. I live in Central Florida and Orange County has one of the highest numbers of positive cases in the state. Also, we can't allow tourists from all over the country/world to visit at this time. Re-opening needs to be thoughtful and methodical. It needs to be based on science and medical/clinical reasons, not based on politics and/or pressure from certain industries or businesses.
Volusia	Education	going back to early could be very risky and we still have cases coming up positive. we need to extend the order . It is dangerous for us to put a lot of people back into one place. we need to be safe and not go back so quickly. We need to extend 30 more days and be sure that numbers are going down . We can do things from home and be successful at it .
Osceola	Education	This is a virus , it will spread regardless. Let’s take care of our health system, making sure we have enough personnel , beds and equipment for the people who that gets really sick . Let’s open little by little . Keeping the social distance , not more than ten people with protective face mask, continuing with constant cleaning, open spaces. Vulnerable and older people stay home with some kind of help from the government,

AMERICAN OVERSIGHT

Pasco	General	As much as I want the state to reopen,as I am going broke sitting here, I do not want everything to be opened to pre Coronvirus status all at once. That would be disastrous. We would undo what we did. On May 1st, if the numbers of infected people is down and has gone down for at least 2 weeks prior, open restaurants limiting capacity and distancing between patrons. Open banks, have them mark the floor so there is a 6 ft distance in all directions. Open beauty salons by appt, only and masks for customers and stylists. Open gyms, either limit the number of people for group classes or no group classes for phase one but using the weights with distancing would be fine. If all goes well and very few new cases after 30 days, open movie theatres and all business's where social distancing can be controlled. Phase 3 Aug-Sept., Disney, Bush Gardens, Universal etc could open with a limit on guests. Temp. scans before patrons enter the parks. By Jan, if all is well open to full capacity. In all 3 phases, make it mandatory for everyone to wear a mask. Until, we get back to some sort of normal way of life, where unemployment and underemployment are down, there needs to be some kind of stimulus to help Floridians. At some point, banks will start foreclosing on people. 3 months of non payment then having to pay 4 months at once is not doable for most. The other option of destroying your credit until a bank may decide to lower your payment is another long term effect that will take years to turn around. The state needs monetary help.
Volusia	General	Im very concerned that FL will reopen too early. I fear for my daughter who is an essential worker. I fear for my six year old grandson having to return to school even in August unless very great measures are in place to Protect him. I am sick of sitting at home and not seeing family and friends but feel it is still imperative we do this until at least into June to maintain safety. Numbers in FL continue to rise as well as my county. While I realize there are more tests given, this also reveals how widespread and dangerous this virus is. This country has not and does not appear to be prepared yet as far as protecting citizens with widespread testing which is ongoing for months and we can't even still provide proper protection to health care workers and citizens. I do not believe wearing a homage mask is our answer.
Orange	Tourism	We need to get Tourism going as soon as possible. This entire central Florida area is in dire need to get back to work. More hardship is being caused by leaving everything shuttered. The well known establishments will do what it takes to keep everyone safe as they always have.

AMERICAN OVERSIGHT

Osceola	Recreation	The economy is hurting very bad and a lot of family's are suffering because of the virus the only other way to help the people that are suffering is to stop the payment of rent ,stop the payments of utilities,stop the car payment,stop the car insurance payment and that can help but it needs to happen like immediately otherwise than that I feel that the state should open up and let these people go back to their jobs the big industries and the government are concerned about a lot of things but they really need to look at the big picture of the situation how the economy has crashed how the ones that are suffering are the families not being able to help themselves they're not giving the right tools and then I being listened to so I'm glad that this was created so you can get a feedback on how we are stressing and feeling.
Orange	General	HR department for each employer should be in charge of their employees testing and PPE. Facial coverings should be mandatory. All venues should be allowed to operate as long as facial coverings are mandatory.
Brevard	General	I do not think opening Florida would be in the best overall for its citizens. Florida is known as a hub for travelers and if we reopen people from other states will flood in causing more spread of Covid-19. As we saw with spring breakers. Better to be safe. I would prefer some time sheltering in place than risking it all and causing another wave to come in and take the lives of so many.
Palm Beach	General	I urge you to open Florida with precautions in place. We need to look at the science and stats. How many died of the flu last year. Keeping us quarantined, but allowing people to go to places like Home Depot or Publix makes no sense. Let the healthy go about their lives and quarantine the sick. This shutdown will have lasting effects. Child molestation, spousal abuse, depression,.suicide are all on the rise.
Volusia	General	I do not think we should open the state so soon after this hit. We still have no vaccine and really no clear idea on how to stop or prevent this Virus from spreading. I honestly believe if we open this state we are only asking for thousands if not millions more people to get sick and possibly die. We are just not ready yet. Is it more important to make and have money or to be healthy and have our life?!
Seminole	Information	I am mistrustful of the information provided by our governor and his office because of his close relationship with a known liar Donald Trump. I do not believe the data being shared by Florida health regarding testing numbers and their results. I do not believe state government about the availability of testing. Another reason I do not trust or believe the things out governor says is because of the propaganda videos he sends in mass via our local emergency notification avenues. His interest is obviously in his self (re-election) and not our community or the government groups and structures he leads. Because of his lack of leadership our unemployment is a total disaster. Rather than correct this he sends propoganda videos like his mentor. We need to reopen our state under the leadership of senator Stephanie Murphy. I trust her. Thank you Ms Murphy. If you need me, I've got your back.

AMERICAN OVERSIGHT

Orange	General	I believe that we should stay put for another month because 1. The kids will not have anywhere to go if the parents went back to work and there is one more month of home schooling!! 2. We are still rising on the cases and also deaths! 3. People will feel safer and we can work on distance more cause right now people are not doing it!! 4. Everyone can stock up on all the right kind of equipment to keep everyone safe!!! Please work on the unemployment cause everyone needs it!!! Thank you for listening
Hillsborough	Professional Services	Even at the earliest phase of the reopening, providers of professional services, such accounting firms and law firms, such be allowed to reopen their offices as long as social distancing or other reasonably tailored measures are applied to protect health.
Seminole	Food	Encourage restaurants with outside seating to begin regular dining. Help small operations to do curbside service especially ice cream shops. Open beaches and pools within social distancing guidelines. Let food trucks set up at various parks to encourage hiking and walking. Our restaurants need us and we need our restaurants. Hopefully people will practice good hygiene and respect each other so as to keep everyone healthy. I know I threw in the beaches and pools which are not related to food. Thank you
Volusia	Education	The reopening of our state needs to be safe. We need to be prepared to deal with small outbreaks throughout the state. Scientists and medical professionals need to be heard and agree with the timeline of the reopening of Florida. I believe we also need to be on the right side of the curve and we need to see decreases in new cases for 14 days before we enter phase 1. Hopefully the summer heat will play a part in slowing down the virus and this will be the time to eradicate the virus so it doesn't come back for a second wave.
Palm Beach	Recreation	I'm a combat vet and I spend most of my days at the beach avoiding people helps with my ptsd and it is a violation of of right being locked down like this
Hillsborough	Transportation	Truckers are reporting problems getting food and accommodations at truck stops, especially if the truck stop restaurant closed due to quarantine. Relax these restrictions early, and/or make better use of the Rest Stops along the Interstates. Food trucks, portable shower facilities and bathrooms plus the ability to sleep in truck cabs could help keep the logistics train working more effortlessly. Since family and individual travel is way down all the parking spaces for private cares could be utilized as well. I support efforts to preserve the economy especially if risk could be minimized to the general public.

AMERICAN OVERSIGHT

Broward	Information	As a small business owner working almost exclusively with other small businesses, and having served with Task Force member Dev Motwani on Fort Lauderdale's Economic Development Advisory Board in past years, I would urge the Task Force and the Governor's staff advisors, to consider the recommendations of the Edmond. J. Safra Center for Ethics at Harvard University as outlined in it's recently released 'ROADMAP TO PANDEMIC RESILIENCE'...advocating for massive scale testing, tracing and supported isolation as the path to pandemic resilience for a free society. The two-page Executive Summary (with author sources identification and institutional affiliations) is attached and I urge all of you on the Task Force to read this compelling and practical guide as you deliberate how and when to open up Florida again. Thank you for your service to all of us!
Marion	General	I think it is a bad idea to reopen the state when you don't have the virus under control yet. I think if we reopen to soon that we will lose more people and that is not worth it to me. I think we should wait a little longer and maybe slowly reopen in late May or early June. Also make sure that people get their stimulus money. I didn't get any cause I owed back child support which I think is unfair cause I pay weekly and my ex husband gets my taxes every year and I have two daughters at home for whom I don't get child support for. Also we should get extra food stamps a month while all this is going on because food is going up and it is hard to afford food with little funds and figuring out how to pay bills when you have low funds. I am currently at home on isolation and waiting on my test results.
Osceola	General	Do not reopen until we have adequate testing, contact mapping and falling positive numbers and deaths. To reopen outside of these parameters is insane. We have a large population of at risk citizens. Stay home and social distancing are working in areas that take these measures seriously. My complex has NO cases, my town has had 5 cases.
Flagler	Recreation	Opening the state now would not be a good idea. I think we need to continue as we are now for a minimum of three more weeks or until we have 14 days of decline or a steep decline in the number of new covid-19 cases. I understand that prolonging the self isolation puts a burden on many, but the safety of the population as a whole is most important.
Seminole	Technology	Thank you for this portal first and foremost. We need to reopen with enforceable rules. Do the same things we've all been doing but fine those that don't. An example is if we see large groups break them up. They actually should be fined. Without consequences people do whatever they want. I moved here 10 years ago. People speed because nobody gets pulled over. Disney should reopen but only to Florida residents. It should not be a show up at 6am thing to get in either. Each ticket/pass should have to schedule a day they can enter the park. Limit it to a couple of times a month for passholder in the beginning. Maybe once a week so people don't hoard access.

AMERICAN OVERSIGHT

Flagler	Tourism	Keep the ban on short-term rentals, and mandate morning and evening times for beach openings. These have both been effective for limiting those who may be looking to "shelter" in a big house with others. We have both staggered times and your STR ban (in Flagler County), and it's working out great. Keep up the good work. Please do not lift the short-term rental ban!
Sarasota	Healthcare	There is absolutely no science or medical evidence to permit a reopening of Florida commerce or social gatherings! Be smart and follow scientifically based data not politically inspired desires.
Lake	General	The state should re-open in phases. Locations which can continue social distancing guidelines and operate effectively should re-open first. Examples would be parks, all beaches, workplaces where some can continue to work from home and some can work on site, restaurant dining rooms where people can sit 6 feet apart, etc. The second phase should be non-essential business where you can minimize the amount for people in a store but cannot enforce people staying far enough apart while shopping, third phase would be anything else.
Volusia	Healthcare	I feel it would be safer to keep people at home but unemployment HAS to be corrected and more assistance for people to be able to stay home. Our citizens should be our first concern. We certainly don't need to send supplies and assistance to other countries.
Palm Beach	Healthcare	As understandable the urge to re-open everything is, we cannot until we know the extent of this pandemic in our area. There are insufficient numbers of test kits. Most of us have not been tested altho we have passed through flu symptoms in the past. I do not feel confident to go back to normal without knowing the numbers of infected in our county. If you re-open, for the most part people will not venture out.
Palm Beach	General	Please start opening up businesses and other areas that make sense. Small businesses that only have a few people coming in at a time, outside dining, and the beaches and recreation areas, parks, trails. Studies have shown that the sun shine, humidity and heat kill the virus quickly. It does not make sense to keep these areas closed!
Orange	General	I do not believe that we should be in any hurry to open things up. I would want to see how other states fare who decide to do this. I would hate to see a reoccurrence of cases because we didn't wait long enough. There are too many people who disregard recommendations that keep themselves & others safe. I would "vote" to wait at least another month before opening anything.

AMERICAN OVERSIGHT

Clay	General	I struggle with my logical response versus my emotional response. My emotional side wants to see my friends. I have friends that own bars, and restaurants in the area. I am a member of fraternal clubs as well. All of these businesses and many others are in deed hurting. My emotional side wants so very badly for them to resume even a more lenient operational mode. My emotional side yearns for the social aspect of our lives. My logical side tells me it is too soon. Our DEATH rate continues to climb. The cold hard fact is that if you contract this you can die. I am not willing to take that risk and if I have to be the one to make that call and force my friends to stay home and live so that I can eventually see them again; I will do that. I don't like making this call. I'd love to see each and every one of them. Given the option of a higher degree of potential death, I choose life for them and for me. Someone once said, the right choice is not always the easy choice. Sometimes there is no clear choice, so you must choose the lesser of two evils. I choose life for my friends and my family and me. It is painful but I choose their presence over their absence. It's just too soon and I don't feel like the numbers are in our favor.
Pinellas	Recreation	In my humble opinion, Florida should open gradually, one at a time, by different sectors. The hospitals can now do elective surgeries. This is good. If there are no adverse effects, move to opening beaches, pools, gyms. If there are still no adverse effects, move to barber shops, beauty parlors, etc. Start with the sectors that would have less chance of contagion and move up to restaurants, events and so forth. Please do not be like Georgia and undo all we worked hard for up until now. Thank you.
Polk	General	Please for all of our children and elderly DO NOT open yet. We are not ready and people as it is still acting as if everything was fine and are infecfing others. What will happen if you re open? Definitely another NY and that was and is horrific.
Palm Beach	Healthcare	I do personal training at a country club I also do pilates training. Our clients are senior citizens and they need the gym to be open cause it helps them from deteriorating. When they dont move their life can decline rapidly. Gyms need to reopen. Some so it for fun. Some have to do it to stay alive! Thank you
Orange	Professional Services	Please mandate wearing masks when outside of your home. Mandate social distancing and reduced groups. This is going to be vital. Fine violators ... don't arrest them. Mandate that employers must not allow sick people to work. Have a whistle blower phone line. Get access to more testing, more Lysol agents and more masks for employers. Provide a guide to help employers truly clean their offices to help reduce contagion. Thanks for all you are doing. God Bless us as we move forward to a most vital next step ... restarting our economy. Kristin Shutler
Lake	General	I'd love to reopen but only if it can be done safely and only with accurate numbers when we are all tested it would be awful to have to reclose. Maybe if people actually took this seriously. I still see people in cluster and not masked

AMERICAN OVERSIGHT

Hillsborough	Education	As an educator I am saddened by the closure, but in order to understand this sacrifice we need to stay closed. I have been home for four weeks and will stay four more to make sure my family and County is safe. KEEP IT CLOSED. GET THE UNEMPLOYMENT PAID OUT. KEEP US SAFE!
Brevard	Manufacturing	It is time to re-open. Small businesses are hurting people need jobs we need the government to get out of mommy mode. There's increasing evidence that the shutdown has minimal impact. Sweden etc. demonstrates that. The cure is worse than the sickness at this point for sure. It's debatable if the shut down accomplished anything. It's certainly low enough particularly in Brevard county to open things back up.
Osceola	General	The concern that we have is that we will be reopening too soon. My wife is a cosmetologist and I am a Chef Assistant at Disney. We both come in very close vicinity of others as is required for our jobs. Primary concern is we will be taking valuable PPE away from essential workers (Dr.'s, nurses and the like) to do things that are not essential. Getting a hair cut and eating at a restaurant are privilages that can be brought back once we have a better hold on how to diagnose, treat & cure this virus. Another concern is that we could bring this home to our children and older parents who we take care of and are high risk.
Sarasota	Healthcare	Please re-open Florida. I am a healthcare worker that has been furloughed from my part-time job and sustained severe reduction of salary at my main job-I've scoured every job site for part-time work to no avail. I have applied for reemployment benefits-it takes forever to get a response! I have not received a stimulus check yet and probably wont until the summer. I'm a Nurse Practitioner-our "once thriving clinic" is failing and may shut down-(then I'll have NO income). I've worked on the frontline as a Nurse for 22 years and seen many pandemics-never a "shutting down of the economy". It will cause more harm than COVID19, FLU, etc. to suicides, poverty, crime if the "stay home or else" continues. Most of us are healthy and willing to work. The elderly, those with compromised immune systems and the scared should be protected and stay home". Americans are smart, we know what to do to stay clean and social distance. Let us get back to work please-unemployment and isolation are severely harming Americans! Attached is my CV-at least help me find work while I'm waiting-I have free time since my hours are reduced severely! Most of us live paycheck to paycheck regardless of making 20k or 90k. We need help-it's depressing what is happening to our freedoms, civil rights and economy. Please help.
Lake	General	No we should NOT re-open yet, this virus is too unpredictable and we don't know much about it still. Our numbers are still increasing, it doesn't take a rocket scientist to figure out that we have a long way to go before we can get back to our normal lives. People are still dying and becoming infected. We will be putting more lives at risk if we open too soon.

AMERICAN OVERSIGHT

Orange	General	I understand economic impact on the state, however, I Feel reopening the state too soon will have a negative impact. I believe we will end up having another wave and as a result more people will die.
Pasco	Healthcare	Why are we not doing testing in all the 55+ mobile home communities?? Won't know where we all are in this pandemic until all testing is done. Thank you
Lake	Construction	I just think we need to rush and end up undoing everything we've done by locking down. We would then have to start all over and more lives will be lost. I know most people don't realize the risk until its one of their relatives
Brevard	Tourism	I think we should have the theme parks all go to a virtual cue and boarding groups to control the lines at the rides. They should put hand sanitizer machines at every entrance to the rides and portable hand washing stations around the park. They should be required to do this like the cruise industry does. Take temperatures before getting into the security line. PSA 'S reminding us to wash our hands frequently and signs up where we can find the stations. Do a soft opening to a Florida residents and pass holders until October and then gradually let the tourist back in. We should feel comfortable going back into it again. It's going to take a lot of education to get back to the new normal.
Suwannee	General	HELLO, I'M A LICENSED NAIL TECHNICIAN, I RENT SPACE AT A SHOP.. I STILL OWE THE MONEY TO THE LANDLORD. SO MY ONLY INCOME IS THE STIMULUS CHECK and THAT WILL GO TO HIM! I I DID NOT GET UNEMPLOYMENT OR QUALIFY FOR THE PPP LOAN , DUE TO NOT HAVING ANY EMPLOYEES!! If you don't open, I will lose not only my business, I will lose my HOME,!! We can't stay locked up anymore! WE ARE LOSING OUR MINDS!!!! PLEASE OPEN FLORIDA!!! I KNOW YOU ARE STILL GETTING PAID!!!!
Seminole	Information	I believe that you can't treat the entire state as a whole. When looking at the map on Floridadiasater.org there are harder high areas like Miami and other areas that have barely been effected. Do what is best for each area as one decision isn't right for everyone. I would hate to have another spike in cases and deaths if we roll this out to quickly. I like the Phrases that the President has set up with the chance that we might have to go back to a stay at home order if things start to increase. Personally I would like to stay at home until there is a decrease in cases in the state. April 23 rd was the second highest day in the last 30 days. There are still sick people out there that don't know it. Thank you for the opportunity to express my feelings. You all have a tough decision to make and I pray for you. Thank you, Denise Church
Collier	Recreation	Please open our beaches to those with beach permits. This will protect us from those coming from other counties. We also ask that you allow private clubs and associations to open to their residents/members.

AMERICAN OVERSIGHT

Brevard	General	Our belief is that we would rather be working than sitting home collecting unemployment. So, that being said, if you refuse to fix the unemployment system, than you have to open up and let us go back to work. I'm 100 percent positive that was the plan the whole time. And, I hope your pockets are properly lined while the rest of us risk losing everything.
Orange	Healthcare	As a nurse, to quickly return to business as usual would be a slap in the face of all the hard work and stress we have put in to protect this country. Not to mention, overwhelming for staff and resources that are already stretched thin and barely hanging on. I believe a widespread reopening is simply going to cause a resurgence of cases, perhaps even worse than before (ie the Spanish flu 2nd surge). But I understand that some livelihoods are suffering. Any plans to reopen should be sparse and staggered. Parks, gyms, and the like should remain closed. Stores should continue their current practices. Businesses that are open should be held accountable to real limits on occupants and safety precautions. For example, if someplace like a salon were opened, only 2 patrons max at a time. However, I feel none of this should happen until end of May. Let's get past the peak first. Going stir crazy and being bored shouldn't outlay people's lives.
Palm Beach	Professional Services	Our company is not customer facing, private sales office more than large enough to do social distancing. If we go back with masks and hand sanitizer there is no reason not to be working. Currently we are working from home but it is not ideal. I am over 60. My husband is still working at his company on staggered shifts with masks and hand sanitizers and they have had 0 cases. At least half of them are over 60 as well. I do not want to see the economy continue to collapse. The people making the decisions unfortunately have no skin in the game as they are wealthy and have good healthcare and no idea what it is to live paycheck to paycheck. Too many people out there need to work to ensure they have a home to live in and food to eat. We luckily are not one of those people but I know many who are. The over estimation of cases has caused serious hardship that could be avoided by good practices
Seminole	General	The state needs to stay as-is until we are 2 weeks past the peak of new infections. If we don't, all this isolation has been for nothing. Cases will surge again, more people will die and many others will be sick when they didn't have to be. Exposing employees to the entire public is dangerous right now.

AMERICAN OVERSIGHT

Volusia	General	My suggestion would be to keep the stay at home order in place. My reasoning is that you give people an inch and they take a mile. You open the beaches for sunbathing and than there packed same with non essential stores. Even though I've seen some nonessential businesses still open. Ie: a rug shop in Port Orange. Businesses will reason with themselves that they are essential even though they are not. I work in health care and yes our clinic has slowed down And we are taking all the precautions but people lie they tell you that they're not sick and then yet you find out that their tests are pending and they still think it's safe to go out and infect others and we are taking all the precautions but people lie they tell you that they're not sick and then yet you find out that their tests are pending and they still think it's safe to go out and infect others. I think the stay at home order should still be in effect for at least a while until the positive test dramatically decline I think the stay at home order should still be in effect for at least a while until the positive test dramatically decline.
Volusia	General	It is too early to go back to normal - lack of testing doesn't give us a true picture of what is really happening in our backyards - it would be reckless to open on May 1st
Sumter	General	I believe we need to move slowly. We are doing better than most states but we should not push it. Open only places we can safely social distance first then move to others when we see that our numbers do not skyrocket
Pinellas	General	Please open. Please,
Hillsborough	General	Keep us safe and keep us home if you do have to open the state PLEASE make face coverings MANDATORY it's not fair that someone can choose to go out in large groups then come to work the next day and expose people who chose to stay home.. there is pressure on you all but it needs to wait I miss shopping, I miss the beach and the park but there are lives at risk! Sure my comment won't matter but please consider it.
Palm Beach	Recreation	Open the beaches for everything including chairs
Palm Beach	Finance	In my humble opinion I feel it's too soon to reopen the economy. I want to go back to work like everyone one else, but I think Florida hasn't even hits its peak yet. And this state is going to be flooded with tourists once we open and it that should be a concern. I for one think that unemployment system should be a MAYJOR priority at the moment and you should pay your civilians, we are all very upset with the system and way Florida is running! Thank you
Osceola	General	How can people be out and about and businesses open when there is no cure or vaccine yet. The curve is only going down because we stay in. To help businesses there must be more government relief AND make it possible for those on EBT to purchase from local restaurants to help until it is safe to open.
Marion	General	I personally feel the state as a whole should stay shutdown with shelter in place orders until the state as a whole has no new cases of the virus for 2 weeks straight. I haven't worked since 3/15 and have received NO unemployment to date, but it's worth the hardship not to risk getting sick. I fear if you open back up too soon and ease restrictions we are going to have a mass resurgence like in 1918. DONT let history repeat itself
Lake	General	To soon!

AMERICAN OVERSIGHT

Broward	Real Estate	I don't think we are ready to open businesses
Lake	Healthcare	Please keep restrictions in place. Don't get me wrong .... I hate not being able to do anything, but we have way too many high risk people in this state to gamble with their lives for our selfish desires. Focus on keeping grocery stores stocked, restaurants providing delivery/take-out, and providing temporary at home work for people laid off. Do these three things and FL will be stronger than ever, not the butt of U.S. jokes.
Pasco	Retail	My wife works as a hairdresser and I'm a cop. She needs to go back to work, where she can protect herself by wearing a mask and washing her hands. Also, restaurants need to re-open ASAP. It's stressful siting at home as we go out and enjoy drinks and a meal. Open Florida, phase #1!!!
Brevard	General	I believe we should open everything up without restriction. Let the people make the choice on whether they individually should take the risk. According to recent studies millions of people have had it making the virus death rate extremely low. Take out the deaths that were attributed to Covid that were never tested positive and the story gets better. If you don't have underlying risk factors you should go about your life and if you do have risk factors then you can take precautions you deem appropriate.
Brevard	Retail	Allow small businesses (mom and pop stores) to open first before larger retailers. Give the small shops a chance to regain financial security first as they need it most. Perhaps people who don't normally shop these stores will start and this will create new, long term customers for these small shops that they normally wouldn't have gotten. Large retailers will always have their following, even if they remain closed longer. Also easier for small stores to control crowds and social distancing.
Miami-Dade	General	Hello, thank you for taking these comments. I am all for reopening Florida as I believe that businesses will take the precautions required to be able to open their doors. I am a small business owner myself and I see so many colleagues suffering right now. We don't want government assistance, we want to be able to work again. I also hope that the governor does not leave this matter up the county mayors as ours is against opening. On another very important note personally, I hope a plan will be put in place for our children in the summer. Many people will need somewhere safe for the kids to go, such as a camp etc. also, recreational activities for kids should also be considered. They are spending unhealthy amounts of time on the iPad and in front of the tv, in addition they are forced to do school online, it's just too much. And parents who still have to work have no choice but to allow them their electronics. My girls do gymnastics and they are missing very much their activities that are beneficial for them in so many ways. This can also be done safely by limiting the amount of kids and asking coaches and staff to wear masks. Our gym in general has always been very clean and under the circumstances I am confident they will take even more precautions to clean. Please think about our kids!! They are suffering immensely. Thank you!

AMERICAN OVERSIGHT

Sarasota	General	It is way too soon to reopen the state at this point we have yet to reach our peak. At this point many are still not abiding by social distancing, stores do not have adequate supplies of gloves, hand sanitizers and cleaning supplies. I am sickened to be a Floridian as Mr. DeSantis has made a fool of himself as well as those of us he governs concerning COVID..his ignorance to basic facts is not acceptable behavior for a man in his position. Please take a step back, give this virus a chance to run it's course before we reopen
Seminole	Retail	Hello, I think consideration should be made about opening hair salons by appointment only and hairstylist and customer both wear masks and one customer in Salon at a time. Thank you, Douglas Turton
Broward	General	Balancing health and the economy is critical to getting our world back. It must be guided by accurate and reliable data which means much more testing. Activities and businesses must be opened incrementally, based on their necessity (professional wrestling is not a necessity) and their ability to provide services while maintaining distance of customers and workers.
Orange	Education	Schools should be able to reopen in summer with small class size and sitting students every other seat starting June 1. Students and staff could wear protective face covering or masks.
Sumter	Healthcare	I am hoping that the governor will consider going very slow in opening up Florida. We live in the villages and I honestly don't think they have done enough testing. I worry that the squares will be mobbed along with the restaurants. There are people here that just aren't that worried about the virus. They want to get back to eating out ,drinking, playing golf and swimming. Our normal way of life is never returning and until a vaccine is found the virus is here to stay. I understand businesses need and want to open. Please take it slow, or we will be back to square 1 !!!
Walton	Tourism	As a lifelong resident of Florida with a job in tourism I very aware of our dependance on tourism. However living in the panhandle where many drive from Georgia, Louisiana and all over I'm not in the least comfortable with lifting restrictions on tourism and short term rentals. Out community has one small hospital to serve both the residents and tourists. Our beaches are opening therefore they will come. Please, please, consider len

AMERICAN OVERSIGHT

Manatee	Tourism	There was no choice given for COVID-19, so I chose tourism. It is imposible to have a normal functioning profitable economy under a pandemic crisis. It will be self defeating only to have to possibly close again due to increase in cases and deaths. A state must contain the virus first, you tackle the enemy first before you can move forward. Both Manatee and Sarasota has done very little in testing, everyone should be tested to isolate the asymptomatics that are infecting. You are setting us up to fail only to have to start all over again. Does one really think that tourism will return in a still COVID-19 infected state? How many at this time of job loses due to COVID-19 will have time and money to now go on a vacation? Who are you kidding. Please do the smart thing. Tests, tests, tests and stay the course with all guidelines. Lives over money. No one can profit in a pandemic. It is not just us, suffering loss it's all over. Fight the battle don't succumb to it . EU, UK and Asia will not be visiting FL this year , they too have their battle. Our economy could not have been all that great if it took only 30 days to put a business out of business, operating on no reserves is not smart. One must consider everything because in the end what you decide will reflect on you all . Never allow bullies to dictate Good luck and remember testing all ei get us back to normal by isolating asymptomatics .
Lake	General	It would be useful to know what to expect if a hotspot occurs. Knowing in advance how that would be handled and what we will have to do in advance would save time and and lessen confusion if such an event were to happen. Thanks for the opportunity to comment. Steve Burt
Brevard	Government	As a born and raised Floridian, I'm very proud to live in the state. What I think is key during this pandemic is that we continue to pull together. That we follow the science and the facts they bring. While it is truly important to restart the economy not only for the state but for the country, it is imperative that the health and well-being of the citizens in this state and country be on the forefront. Having lost a love one to this virus I don't willy-nilly make the suggestion to delay the re-opening. What I do ask is that because we continue to have doubts and positive reported cases, that until we have widespread testing to everyone that do not make a knee-jerk decision that would likely put more citizens in jeopardy. Be a leader not a follower. Ensure the safety of the citizens of the state in this country by doing the right thing. Do not be pressured by other politicians to make reopening the first priority. Make the health and well-being of the citizens of the state and country first and foremost in everyone's mind. Reopening to soon will put everyone in jeopardy. Please please I implore you to think and make rational decisionsFor the citizens of the state and country imagine that everyone else is making decisions that impact your family your family not just my family but your family. I implore you to do the right thing for everybody. Even when things do begin to open, it does not mean that I will run out and just be careless with my own safety and that of my family, and that of your family. Please make the right decision

AMERICAN OVERSIGHT

Lake	General	I don't understand how testing is actually doing any good. I could be free of the virus today, test negative, and come down with it tomorrow. Antibody testing should be in full force at the facilities. Actually you should be doing both. Testing those who have symptoms and antibody testing for everybody else. Until you do that we will never get this State up and running.
Pinellas	Healthcare	I work in a dental office as a dental assistant. In the dental field we are one of the highest risk groups for covid-19 being between 93%-99% risk for exposure. The dental equipment we use create high volume airborne particles and even with high volume suctions we and other patients will be exposed and there is nothing in place for patients to be tested before entering the dental office for covid-19, putting everyone at risk for covid-19. Please postpone non emergency dental procedures until we can safely perform without a high risk of covid-19 because even if we could obtain proper ppe gear the risk is still too high putting dental professionals and patients at risk for contracting covid-19. I have a small child and older person in my household and I would fear to come home and bring something like covid-19 into my household possibly spreading ther virus to them. We should not take unnecessary risk doing non emergency dental care at this time. Please consider postponing the risk is too high and unnecessary for non emergency dental care and could spread at a rapid rate. Elective dental can wait until the risk level is lower to keep everyone safe.
Brevard	Education	For my health and safety and the safety of my family, where 3 people have auto immune diseases, it is too soon to reopen everything. I believe masks should be mandatory for everyone going out and for staff of "essential personal" in stores that are currently open. The more people that freely travel around, the more likely I am to come in can't act we oth the virus and bring it home to my family. It would probably kill one if not all of my household.
Lake	General	OPen slowly and cautiously. I dobt want to have to go back to isolation because it was rushed.
Hillsborough	General	Hello Gov DeSantis, thank you for how you have been handling this situation and how you are willing to here from the people about how we can reopen Florida. I was listening to The Glenn Beck Radio show and they where talking about this website, https://restartnow.io/ that allows you to see how counties are doing and the possible outcomes as per $ lost, jobs lost and suicides commited if we continue in a shutdown and if the shutdown end in 30 days. The good thing is that you can see how each county rates and make a decision if you should end the shutdown for that county instead of ending it statewide. I have attached a copy of the info for Florida from the website. Again thank you for all that you are doing for your people! I tried uploading a file but would not load so I sent an image of one page

AMERICAN OVERSIGHT

Hillsborough	General	Plz do NOT reopen our state at this point. This illness is still spreading,we now have well over 20,000 cases and no telling how many sick and carrying it around spreading it. I work for the public, I am a Server, I do not want to risk my health nor the health of my family just so you can boost our economy. If you reopen now, there will be many more get sick and many more die! We've lost too many already.
Osceola	General	More testing mandatory masks please do not open people are not following the rules know they will not follow if you open been in many stores to get essentials they do not follow and the stores are not making it mandatory to wear maska
Hillsborough	General	My family and I would like you to lift the stay- at-home order on April 30th. We're also in favor of opening all businesses as long as they adhere to health and safety measures. My husband sells seafood and he needs restaurants to open to keep his job. My college age kids need to get back to school....real school, not online school. Covid is not going anywhere. We've self isolated for over a month so we know who has it and who doesn't. We need to start getting used to a new way of life. There's never going to be a perfect time. Each person/family is going to have to decide for themselves when and where it's safe for them to go. If you're worried, stay home. If not, go support business. Businesses will have to adjust there practices so people feel safe to come there. If they don't, people won't come. Our big concern is people coming to our state for tourism. How to we keep the sick people out but let Orlando open up? Hopefully you can impose safe guards and restrictions to keep Covid from coming into our state. I think if you don't open everything soon, people are just going to go out and gather anyway. There going to create their own places to eat and drink and shop. So you might as well let the businesses open so they can make some money.
Palm Beach	Retail	Please start reopening retail by May 1, at the latest. Please stop passing the buck, Governor DeSantis (e.g. Re-Open Florida Task Force). Most of us behave sensibly, especially with all the Coronavirus awareness. We are fed up with the patchwork of rules, and all the misinformation about masks, etc. Social distancing works. Everyone agrees. So let retailers and their customers work it out without Florida or County "Orders" (laws) In public places like beaches, be vigilant and remind patrons about social distancing. Re-open schools ASAP and extend the school year for the sake of parents. If some parents want to opt out, or use distance learning, then let them. Consult disease experts daily for updates. Consult other Governors daily. Thank you.

AMERICAN OVERSIGHT

Martin	Real Estate	To Whom it may concern, It is in my opinion, that governor DeSantis has been doing an exceptional job keeping Floridians informed on Re-opening our beautiful State. I've been a Realtor for 16 years and am confident that moving forward, the Real Estate profession will remain strong, although it will take some time... I am totally in favor of reopening the beaches, restaurants and small businesses, so that we can all start to feel some sense of relief that there is a light at the end of the tunnel which there is. Thank you for the opportunity to voice my opinion. Be well. Shari Sullivan, Illustrated Properties Hobe Sound
Volusia	General	I understand the importance of getting the economy back up and running after Covid, but it cannot be at the expense of people's lives. There needs to be a graduated opening based on cases, testing, and vaccine. Not only do we have locals, but our area generates a large influx of tourists and if we open the state wide we will have flocks of people come and putting us in danger of a surge in cases again. We need more solid information before we open completely. On a side note, it would be nice to have one central location for all info pertaining to covid in Florida, to include a simple, bullet point display of all the current updates. There are too many rumors spreading around and you have to go to several places to find information. Thank you for all the effort the state is doing.
Sarasota	Tourism	Keep the beaches closed to slow down the Visitors from bringing in the virus.
Orange	General	The situation is hard right now, but our lifes and health is more important than money. In my opinion we need to wait a little bit more because the state is not ready for re open yet. Cases are up every day and the people around dosen't respect the rules and law. Our lifes is more important than any money in this life. Please governor think with your heart not your pocket.
Seminole	General	I think reopening the State needs to be done softly, and certainly not until at least June. Hair Salons, barbers, Massage Salons, bowling, and all contact jobs should not be the first businesses to open, there is no way you can practice 6 feet social distancing. The Theme Parks shouldn't be open, as this will bring people from all over the world, and there is no way to social distance at any of these parks. Taking Temps at the gates is stupid, anyone can eat ice or take Tylenol before doing this, and get in. I have no idea how to get businesses up and running, this is your task force, and I noticed that DeSantis didn't pick any medical doctors for this Task force.....
Pinellas	Government	It is too soon to open back up! It is not safe. Please get gig workers their unemployment as promised. I applied on March 29 and still haven't heard one word. I have already lost my only vehicle, my phone has been disconnected, and soon will be homeless. Please help us

AMERICAN OVERSIGHT

Dixie	Retail	People should have the common sense to avoid large groups. Social distancing has become the new norm. For the unforeseeable future. A pro active testing policy should be established before the inadequate stay at home order is lifted. Listen to what the medical experts are saying not some talking heads with no medical schooling whatsoever. Common sense can't be taught. Trust your instincts and stay alive.
Lake	Education	Please do not reopen Florida for another few weeks. Let's let the downward trend of cases get lower. I also feel we need to watch states like Georgia who are reopening too early in my opinion. Their cases may skyrocket after opening. Let's be the example.
Hillsborough	General	It is not safe for the health and safety of Floridians to reopen Florida until at least the end of May!
Orange	Education	Florida should NOT open until it is safe to do so and we are cleared by infectious disease experts to open. I work as a teacher and I know my students are safer at home than they would in the school building. Having so many children exposed to something that could harm them, even if it is minor, is irresponsible. We will keep striving as educators to ensure their needs are met academically--at a distance. We can assure you we will do all in our power to keep the learning going. We can't teach to an empty room because of an illness. Keep Florida closed until safe.
Brevard	Healthcare	I feel we still need time to recover. There are way too many possibilities of people being infected. I know Health Care is one place we need to get back to normal. I think we need another month of social distancing and isolation. I am a senior citizen and have concerns for myself and others in my age group.
Brevard	General	Restaurants take temp prior to seating. Distant seating. Have hand sanitizer at entry to mandate either use or go to bathroom to wash hands prior to seating. Don't put condiments on tables. Still use face mask at shopping areas such as grocery stores or Walmart. Or Lowe's/Home Depot. Have sanitizers our at entries. Cruise ships- temp check and questioned prior to boarding if cold/flu symptoms not permitted to board. Hand washing areas at dining areas and buffet areas. Extra staff to sanitizer high touched areas frequently. Ex:elevators/handrails etc.
Orange	Healthcare	The reopening needs to be strategic and safe. If healthcare officials are expecting a fall flare up, why bother totally reopening the state? Find a long term plan that can put people to work while maintaining safety precautions.
Polk	General	I think it is to soon to be opening up all these businesses. It just is not safe.

AMERICAN OVERSIGHT

Pinellas	Healthcare	We need to focus on lives vs economy, ensuring safety is the highest priority. Our economy will eventually recover. Lives lost can never be brought back. We have already seen a large increase in cases with our essential workers. Public employees being exposed by customers coming into the stores. What is going to happen when you open up more businesses, where people who are Not wearing masks will come shop, congregate, and spread the virus all over again. The virus is active, cases are still rising and that is with a stay at home order. In Pinellas county you can see that people are indeed staying home, traffic is light and the beaches look empty. Another issue: Schools are closed, digital learning is in place and until the last day of school May 29, what are parents supposed to do with their kids if they are forced to return to work? A child cannot do their digital learning in a daycare or YMCA camp. You place thousands of kids back into a daycare setting and again we will see major rise in virus cases, as kids spread and share with friends, family, daycare workers, parents. We need to consider keeping a stay at home order until it is truly safe to return. We need to stop saying this only effects the old population as that is not true, deaths can happen at any age. As for our older population, this is Florida, we have high counties with more 65+ aged residents than anywhere. We are home of Moffitt Cancer center, thousands of immunocompromised patients, who need US to protect them! The economy will recover, we will soon enough have millions of tourists coming back to see our lush tropical beaches and visit our theme park capital Orlando. Life will return to normal. But unless we choose the best path ahead, things could only get worse for our state. Let's not be a Georgia or a Vegas Mayor. All lives matter, lets do everything we can to help keep the spread low and the hospital front line workers safe.
Lake	General	It's imperative that our economy is reopened for the demographic that keeps it going. These people my sons included need their lives and income back. It's also imperative that folks in my age group and others of course are again able to have their dental checkups, eye checkups, massage therapy for chronic pain, etc. Just as important are our regular salon appointments. It's vital to our mental health. And speaking of mental health the amount of folks being affected in this way is not even being counted by anyone. PLEASE governor open the state for EVERYONES sake. THANK YOU.
Orange	Retail	We need to continue staying in to prevent the most vulnerable Floridians from needlessly getting ill. It is sad to see that people are not taking this seriously. In retail stores it is very clear that people are not socially distancing. People going to stores should be limited to 1 person. We d a re seeing groups of teens, entire families, parents and children, and older couples in the store. We need to limit groups and continue to stay closed so we can beat this.

AMERICAN OVERSIGHT

Sarasota	General	Medical professionals should be included on the task force. It's hard to feel that the safety of the community is a priority when the task force includes many who are focused on economics. Those that want to open the state affect those of us that want to stay safe. Their increase in exposure puts all of us at higher risk, even those that only leave the house for necessary purchases. If more people are sick the economy will continue to decline regardless of a hair salon or a beach that is open. Please dont set us back further by opening up too soon, and dont make people decide between their jobs to support a family or the health of their family.
Palm Beach	General	We are not ready to open our state yet we need to wait until we have two weeks of study down hill signs we can wait another two weeks or longer ifNecessary let’s not risk the lives of our people because were in patient
Marion	Education	At this time with more questions than answers it wouldnt be a good time to reopen the state. We dont know if people are immuned from getting it a seccond time and we dont know if there are people out there who have it but are not going to the doctors and potentially spreading it to the elederly or the people with underlying health issues. As much as every Floridiana and American that would love to reopen the economy we CANNOT take the risk and of a second wave happening and shutting down things again because I believe that will be FATAL to the economy as if it aint bad enough now that will cause way more problems then. Think smarter and done do something soon just because the majority wants it because i know y'all people reading this want things to go back to normal but we just gotta contain this beast and end it all at once!!
Osceola	General	In order to preserve our way of life, both for current and future generations, we must immediately begin to reopen our State. At the same time, we must protect those most vulnerable to the virus.
Citrus	General	People need to get back to work. The longer everything is shut down , the worse for our country. I feel President Trump is doing a terrific job....
Brevard	General	Open up strategically.
Seminole	General	It seems that people are still getting the virus and will . If we are to reopen businesses there has to be mandatory testing of everyone mno matter if you think you have i or not. Masks to be worn ,enough sanitizers supplied. Gyms are difficult to open because everyone is using equipment. Therefore gloves and masks to be worn ,constant sanitizing of equipment, classes limited in size. Beauty salons masks to be worn and gloves by the personal and customer the same with barbers
Volusia	General	It's too soon to open up non essential business such as jewelry stores and malls. These employees end up with no way to control who walks into their environment.

AMERICAN OVERSIGHT

Clay	Healthcare	Good Morning, I am the business manager at a local dental office and I (along with the rest of the employees) are worried about how we are going to effectively reopen. In the dental field we deal with aerosols all day, every day and if we have an asymptomatic patient we are working on, we deal with the possibility of infecting everyone in the office. Including other patients. It would be a nightmare. The ADA has not set forth straight forward guidelines on how to properly reopen. OSHA says we have to have N95 masks to operate, yet none are available. Also, how are we to contain the droplets coming out of a patients mouth while work is being done? We can't make a patient wear a mask and be able to do a cleaning or any treatment that involves a drill. We need an actual date on when it is safe to reopen and guidelines for how to do it safely! Dental offices are the highest field next to respiratory therapists that will contract or spread COVID 19. Please help
Marion	Healthcare	I think that the health of the people should come first. I also think that social distancing by staying in is working, but if we are to begin to open it up I think that everyone in every city should wear some form of mask or face covering. Let's put the people of this state before Politics and the economy Please and Thank You. More testing.
Volusia	General	Selective opening utilizing less vulnerable and those who have antibodies. Strong safety measures for businesses who will reopen are needed to help build confidence for consumers. Restaurants should accept take out may become a way of life so should cultivate this process, at least until a fully vetted vacine is available.
Pasco	General	Please do not re open until we have seen a 14 day decline. I would like to avoid a round two. Also, we need to keep our state closed to all international travel. If possible domestic travel should also be limited and not allowed from states with a high virus count. Please be smart about this and do not listen to a president who is an embarrassment to your party. This is about human lives. We can have money again but can’t bring back a loved one if the wrong decision is made.
Brevard	General	The health and welfare of Floridians, specifically the vulnerable need to take precedent over opening tourism and the economy. By opening too soon we will surely spike our cases of covid. We are no where near our peak, if re-election is on the top of our governors mind he should take his cues from governors that are putting their citizens welfare above all else.
Brevard	Tourism	Our state relies heavily on tourism. I believe taking this opening process too slow will hurt more than help. Let theme parks and resorts operate at normal capacity. What I feel would be best is launching a consumer campaign ultimately “train” society when in large gatherings to be respectful of space and good hygiene also encouraging those to stay home when sick. Encourage society to get back out there and enjoy life but be responsible. Of course encouraging parks and resorts to use heightened disinfecting measures.
St. Johns	Healthcare	Time to re-open slowly

AMERICAN OVERSIGHT

Volusia	Professional Services	I ask that you PLEASE consider the nature of our industry when reooening ! I am a hairstylist of almost 20 yrs, and yhere is NO WAY we can do our job with social distancing ! Our industty requires contant touch and extremly close proximty to our clients ! I wish i could say that clients and salon owners will follow guidelines, however after almost 20 yrs, i have found that VANITY teumps all. Clients, and coworkers will come in sick and not care about those around them ! Please consider, i beg of you, to a lonher reopen for salons and other industries that are in such close contact!
Brevard	General	I believe it's a good idea to reopen all aspects of the economy here in Florida but I think people should still social distance and wear masks at the same time
Pinellas	Government	1) Keep the state closed for at least the first week of May. Better safe than sorry. 2) Why no specific list for Coronavirus repercussions? Is it to intentionally scatter the responses so it appears there are fewer concerned people than there actually are?
Pinellas	Government	I am very concerned about opening Florida to soon. I'm an independent worker in a salon . It is impossible to stay 6 feet away from someone in a small enclosed area. I am a diabetic over 60 very concerned. My husband works in the restaurant business in close contact with people and can be infected and also bring hone. He still hasn't received anything from unemployment. after applying 5 weeks ago. We hope you will consider the health and welfare of the people in this state and take the jobs that are most dangerous into consideration .
Hillsborough	Food	I just don't see stores selling gloves or paper mask anywhere that's a concern I had and I think thats real important first step.cause I work at stadium around s s l of people shouldn't open all at once little by little
Okeechobee	Education	I am a teacher and I am 5 months pregnant. When school starts back up in August, I will not feel safe returning to school if there are even a few cases left in the state of Florida. I need to know my baby, family, myself, my students, and in some cases their elderly guardians will be safe if we all start having large gathering again. I would like a vaccine for Covid-19 to be created or wide scale week lip y testing to take place before we reopen the state entirely so eliminate a resurgence during our winter Flu season. If he have another bout of this virus ravaging the nation we may never have the chance to recover.
Manatee	Healthcare	Hospitals need to have ability to protect health care workers and patients. Do we have enough healthy staff? Is there enough needed equipment? Is staff educated in the latest findings about possible signs of covid 19? Have the ability to test everyone who needs a test in Florida.

AMERICAN OVERSIGHT

Polk	Real Estate	Are you listening to experts? I have a premature newborn that is high risk for COVID-19 so please do what is right and listen to experts!!! The reading that I have done, from reputable sources, all people that have studied infectious diseases are telling us to lock it down tighter and for longer. In short don't reopen until it makes medical sense. I appreciate you asking the people of Florida, but please talk to someone that is knowledgeable about the subject. Whatever the case, if you're reading this, I wish you good health. Thank you
Miami-Dade	Tourism	Remaining close restaurants, malls, and all business or commercial center. Reopen the health care, like dentist for necessary need.
Brevard	Healthcare	Carefully and controlled with mass testing.
Volusia	General	Not reopen as of yet...we are still trying to get a grip on the extent of the pandemic seriousness and viral exposure overall. We are making headway to that end; but I am not comfortable with current results - too early, too soon, and there aren't enough people out in the public taking it serious enough to wear a simple mask (Home Depot this past weekend a good example - I was the one odd man among probably 50 wearing a mask and pair of gloves, and that includes the employees!). So, let's just keep on the current path of "tests", allow the sick some time to cure, create a better, truer picture of the statewide infected status, FIRST. Give it a couple more weeks.
Collier	Recreation	Please open parks, playgrounds and beaches! And encourage HOAs to open pools. These are outdoor activities that should be encouraged! We live in a beautiful part of the country and our kids are being cooped up inside now for over a month! It's not good for anyone's mental health or physical health. We need fresh air and vitamin D! Please reopen all outdoor activities!!!!
Lake	Management	Stay at home order should stay in place till at least mid May. Do our best to eliminate rather than vaccinate.
Duval	General	Open Back up please! This is destroying the mental health of millions and hurting more people than the "virus" ever thought of. Oh and by the way, THE VIRUS PEAKED IN JANUARY!!!!!! WHEN EVERYONE HAD IT!!!!!!
Orange	General	I have a medically suppressed immune system as I am a transplant recipient. I do not want Florida re-opened until there is robust testing and contact procedures in place. I probably will not feel safe until we have a vaccine. Many of the people where I live, which is a retirement apartment building, feel the same way. Please take us into considering when making your decisions. Our lives and health are now in your hands. Thank you this opportunity.
Pinellas	General	WHEN we open ... all must wear masks. Social distancing to continue. That said, I don't think our numbers warrant re-opening til at least June!

AMERICAN OVERSIGHT

Brevard	Education	Good Morning. Thank you for what you are doing given the circumstances. I am currently employed which I am grateful for. I work in banking. My company has been great in offering paid time or days at work when required however my main concern is children and daycare. With schools being closed, what are parents to do with their children? I am a single mother and widow and my parents are not here. My children 10 and 7 have been staying home alone with my camera as a sitter while i work partially. Whatvhappens when it goes business as usual. For summer I normally pay camp but thia would seem unsafe due to the virus... what options do we have. Can we pay more counselors in the city to limit childrne per classroom... are daycares with better cleaning guidelines. The last time I used a daycare decade ago, it was gross and kids come home sick with pink eye etc. Again. We need the economy running but single parents with lower than the average income and no help will have an impact on them going back to work, staying unemployed and most importantly the safety of the children. Thank you for your time.
Lake	General	Keep social distancing Target. Walmart seem to have an acceptable system going on. Mask wearing. Hand sanitation. Open up restaurants. They can cut back on capacity seating. Maybe every other booth, table. Open up other retail. Use system like the bigger box stores. Personal beauty care? Appointments only. Masks a must. Certainly open state parks. Beaches. Strict rules on more then 10 gathering. I personally don't hang out with alot of people but to be able to go for a walk on the beach or a state park & sit & have a sandwich with my husband is what we miss. Keep social distance. Mask up. Start generating revenue again.
Seminole	General	I don't think Florida is ready to reopen we haven't tested enough to do that I believe we is going to be chaos because lots of people are going to be exposed to the virus.
Seminole	Healthcare	I am not a business professional but am a nurse practitioner that works in the largest hospital in Florida. I think we should allow re-opening of theme parks every other day to Florida residents only . For instance , all Disney Springs to be open daily with Magic Kingdom and Animal kingdom one day and then Epcot and Hollywood Studios the next with no park to park travel. Universal to open all City Walk then one park per day every other day for two weeks. This will allow for line control and food delivery/service with lessons learned to allow for interstate domestic travel and then travel international visitors when allowed..

AMERICAN OVERSIGHT

Indian River	General	I am a self employed hair stylist who has a private studio inside Sola Salon in Vero Beach. My biggest concern on reopening salons/spas, etc. is that there is no safe way for us to maintain proper social distancing. After speaking with several of my clients, they are more concerned about getting a haircut or color done than they are about my wellness. I do understand that many in my industry feel they need to go back to work asap because of the major issue with unemployment, loans, etc. I just do not feel it is safe yet.
Seminole	Healthcare	Close the beaches and keep the shelter home orders through end of May. The spread will happen to everyone, we need to keep the hospital volume down as much as possible to increase the greatest expectancy of life. I have spent my entire career in healthcare staring in rescue to now in the hospital. The physician shortage and our nursing ratios will not allow the greatest life expectancy as is. Please do not make it worse.
Pasco	General	To whom this may concern i am a resident in pasco County im a electrician by trade and granted my career has not been affected by this pandemic but so many has and it seems like less than 1percent of people have the virus I would really live the state to open up May 1st slowly we are so ready maybe those people that are high risk need to continue to be under quarantine but this is killing the economy
Orange	General	I am a massage therapist and I would love to see maybe by early May Midvale things to slowly start reopening up as long as we have mast check people's temperatures take precautions. Keep the social distancing. I would love to get back to doing what I love to do. I think that people are sometimes paying attention to Too Much media. We really need to get this thing back to normal because this is not normal living. We just need to do precautions in Disney. What they could do is cap off. How many people are in they are in the park just be mindful like Max off at 300 people social distancing and like all these does when someone comes out people can go back in up there Security check temperatures where I'm at.
Volusia	General	I think its time to let businesses open back up. Everyone is aware of our situation and I believe if they personally are still concerned or nervous, they can make their own choices whether to go out to any particular place or event
Palm Beach	Education	People are going to flock to the stores and restaurants the minute we open back up and then the virus will back in full force. We don't want to have to repeat this shut down again in a few months. Anything that can stay closed should stay closed and anyone who can work remotely should work from home. I'm a teacher and the smartest decision was closing the schools for the rest of the school year and continuing digital learning.

AMERICAN OVERSIGHT

Broward	Education	I am an 8th grade Langauge Arts teacher and Speech and Debate Coach who teaches at Forest Glen Middle School in Broward County. I know the transition back to school is going to be a tough one, especially in middle and high schools due to the large number of students our schools in South Florida have. I would like to suggest that a panel of classroom teachers is included in hashing out the plan for re-opening schools. While school administrators and district employees are great representatives for teachers and students, many of them are far-removed from having been in the classroom and they tend to forget what it was like. Having current teachers on a panel would give you the perspective of people who are “on the front lines” of education and who will be able to offer their insight on the pros and cons of the plans you are developing. I know many teachers, including myself, would value the opportunity to be a part of the conversation and in the plan building for our schools. We miss our students more than we can say and can’t wait to help figure out the Best and safest ways to be able to interact with them again. Thank you SO much for taking the time to read this.
Orange	Healthcare	Science does not support opening. This virus is analogous to a raging fire. It may smolder for a minute but it will flare up again.. In reality if we were committed to a true lock down for a brief time we could affect the spread . Don’t create temptation. Truly help all Floridians financially so they can survive and design a plan for returning to work when they are not stepping in front of a speeding train.
Osceola	Transportation	To make reopening less impactful to public health and get people back to work it has be systematic, with precautions. Most of all people need to be held accountable for their actions. By this I mean if a person is susceptible they need to take extra precaution and employers need to accommodate that. This virus is not going anywhere anytime soon, this means we have learn to live around it. Social distancing needs to a way of life. Wearing masks will be a new fashion trend. If businesses place accommodations in place, such as limiting the number of people in a confined area at one time, providing distancing spaces in lines, restaurants, and bars, we can transition to a social distancing life style much easier. Understand that there will be those who do not abide by these new social behaviors, and they must be aware they will pay the consequence by getting sick or making a loved one sick. That being said, we must start to open our economy to preserve our life, liberty and freedoms.
Volusia	Education	As a retired teacher of Volusia County Schools and a grandparent. I feel it’s to soon to reopen schools, nonessential businesses and most definitely the beaches. I do feel that our children need structured environments for learning but most parents are doing their best. There should be some forums addressing the lack of technological of our students guardians. When this is over let’s address that deficiencies.

AMERICAN OVERSIGHT

Orange	General	Good morning, No doubt about it everyone is working hard to do the right thing. In terms of opening up our economy what about more opportunities to work remotely from home so at least we can still work just in a safer place. Tell businesses that don't want us to work remotely to lighten up and make it happen. Thank you
Palm Beach	General	I hope care is taken to re-open The southeast counties as we have many more cases in the Dade, Broward, and Palm Beach Counties. I appreciate the need and applaud having a task force. However, opening the state will be of little consequence to those who lost their jobs and are now going into week 6 of pending status for unemployment benefits. My brother-in-law is one of many in that situation. It seems that should be your priority. Get thst fixed as opening the state with people having zero income will not matter if they cannot participate in the economy. He spend hours trying to work on the benefit site. He spends hours looking for work and sending his resume' to countless people. Please focus on your citizens who are in dire straights. I know you say you have added people etc. but nothing has changed. It is just words at a press conference. Thank you for your time Deborah
Sumter	General	I'm a high risk with COPD,lung and heart issues.Flordia is far from being ready to being open.We are in a hot spot to dangerous to open.It would be great if swab testing could be mailed to people in my situation and mailed back.I have been in my house since March 14 and will continue to do do . Please don't let anymore needless deaths happen.Thank you for your time. Patricia Beveridge.
Orange	General	Drive-in theaters should be open, pay with your app, bring your own snacks. It gives families a chance to get out of the house and still stay together to see a movie. Give parents a chance for date night. Nail salon should be open, they've been using masks since before it became a thing. Hair salons, barber shop should be open. Very rarely are you face to face with someone doing your hair or shaving you. Wear your mask.
Leon	General	I feel very strongly that reopening is happening way too quickly, without regard for the medical data, which is still unclear. Our numbers here in Florida are still growing so to invite tourism back to the state, by opening beaches, etc, will only cause this to go on longer. Our family is very displeased with Gov Desantis's response, as his motives are transparent & definitely not in the interest of public health.
Volusia	General	Too soon to open. Florida has not hit its peak. Still too many cases. Schools should remain closed for the rest of the school year.

AMERICAN OVERSIGHT

Manatee	General	Hello everyone! I would be very happy if, once things reopen, we could require people (for a while, not forever) to wear face coverings while in a public venue...grocery stores, retail stores, beauty salons, banks, post offices, buses, offices, movies, sports, gyms, etc. There are still way too many teens-40 year olds, and a few older folks that are not doing this. It either damages their "image" or they just don't care...I don't know. As it would significantly reduce transmission, I feel this is a necessary step for everyone to remain safe. If you don't have a face covering, you can't come in...point blank. If we asked businesses to implement and enforce this, maybe the civil rights people would swallow it better, and it would also help protect the employees at these businesses. People may fuss, but they would do it if they needed something, so loss of business would be minimal. Also, one other thing...what if we ask restaurants to require reservations? There is an Amish restaurant here in town that can literally have 50 + people in line, in cramped quarters, nose to nose. What if, for say 2 months or until we see how things are, we have people call in, make a reservation, and not allow people to wait in line? This would be in addition to reduced seating capacity. Just a thought. God Bless, and please keep us safe by not following Georgia's lead. The second wave of the 1917 Spanish flu, when distancing measures were relaxed, was when it hit the worst. Kindest Regards, Denise Womble
Leon	General	Open the gyms up now. How can we keep healthy if we are isolated from the very things that can make us healthier. Also, the economy is in a tailspin. We all need our jobs. Open Florida now. The elderly and people with medical conditions should self isolate. Don't hurt the rest of us that want to live life.
Palm Beach	Healthcare	We have not reached our peak. It is way too soon to open up. We can’t afford to have more spread and more deaths
Brevard	Recreation	Please reopen the gyms. Some of our health conditions require it.
Indian River	General	Hello. My name is Cameron George and I am a resident in Vero Beach Florida. Fortunately my family works for 'essential' businesses so we have not lost jobs. I do have sympathy for the millions of people who have and the small businesses where they worked. Every day this shut down is in place irreversible damage is being done to the citizens of Florida. At this point THE CURE IS GOING TO BE MUCH WORSE THAN THE PROBLEM. Anyone who cant acknowledge that is not being honest with themselves. We must loosen restrictions IMMEDIATLY! No matter the situation with the virus we can not continue down this path. It simple is not sustainable. WE MUST smartly start opening things up. I say to the people who don't think we should open up yet that no one is forcing them to do anything. If they don't think its safe then stay home. I ask you, the government to honestly put yourself in the place of the person who has lost their job or their business is closed, cant buy food, cant pay bills what would you want done. BE HONEST!!!!
Miami-Dade	Government	Why is Florida considering reopening if the White House guidelines requiere 14 consecutive days of declining COVID cases, which we have not yet seen in Florida?? As a Miami resident, how will Miami-Dade be different in the Governer’s eyes in terms of reopening??

AMERICAN OVERSIGHT

Osceola	General	My decisions moving forward will be made by the scientists and medical professionals not on the recommendations of business people with an agenda. I will not patronize a non essential business or event if the medical experts say it's too soon or not safe.
Palm Beach	General	Please don't open Florida too soon. Keep us safe. Not dead.
Seminole	General	DO NOT REOPEN.
Lee	General	I suggest that Florida creates a bold colored bracelet with a person's name & driver's license # on it, that indicates that a person has tested positive for the covid-19 anti-bodies and is safe to be around. I'm also okay with being charged a fee for the bracelet. This would compel more people to get tested and add insight into who should continue being quarantined.
Volusia	General	OPEN it all up just like georiga did! People are going to lose everything! My work has shut down and paying a very small percentage of what I actually made, therefore I don't even qualify for unemployment, I wouldn't want it even if I did qualify. I work for money! We don't need phases, it won't work, and will take months even into next year to get back to normal. These people calling for closing aren't even voting in elections, if that's what you are concerned about. if they want to stay home, they can stay home! If you don't open it up, kids can't play sports this summer, kids can't play together, friends can't dine together, this is the most absurd thing I've ever seen! Open Florida!! People's lives depend on it!!! The sooner we open, the sooner normal returns and people sense of fear will Deminish!! If they don't want to go to their jobs, they don't have too, that's great, more jobs for all the people on unemployment. Let's get this going ASAP! How long till people grow tired of this lockdown and just go to Georgia and start stimulating their state rather than ours!
Sumter	Finance	I am an accountant and I see my clients and friends suffering. We need to get back to work and daily life. We are all reasonable people, and can do so cautiously and with concern for others. If grocery stores, gas stations and accountants - such as myself that are deemed essential - can continue to do business, why can't others? Using appropriate personal protection equipment and good sanitation measures, we can continue to lessen and prevent the spread of ***all*** viruses and communicable diseases!
Alachua	Professional Services	We as nail salon workers already take steps to protect ourselves and clients. Believe us, we don't want to get the virus ourselves less giving it to clients that we think of as our families. We closed down before the stay at home order. However life must go on. We have to work to feed our families and pay our bills. If the state keeps close up, where do you think the revenue for taxes will come from? As I said we already taking steps to protect ourselves and our clients by doing appointments only so there will not be people sitting around to wait for service. We will have more than enough time to clean up and disinfect in between clients. We also put up glass barrier between clients and us as well as in between clients. You have to trust people in doing what right for them and not stepping on their civil liberties. Right now closing businesses you are preventing us from pursuing what we are free to do.
Bay	Accommodation	Just don't open

AMERICAN OVERSIGHT

Brevard	General	We need to get back to work. Testing available at pharmacy's is brilliant! If everyone needs to be tested you need to publicly request them to do so. Any business that can open and incorporate good sanitary practices should be allowed to open. Citizens who want to stay home should stay home. We've got to get going again before there is nothing to go back to.
Clay	Healthcare	It's to early to open the state of Florida, here in clay county we are still getting new cases of COVID-19, two more people passed away from this terrible virus. Florida should start re-opening as of June 1st.
Volusia	General	As someone who works in retail I don't believe it is a good idea to start reopening the state just yet. Most people aren't listening/following social distancing guidelines as is and I believe that they will not follow them if we open up the state too early. I understand that everyone is facing financial hardships but if we open up the state too soon we may just have to shut down again which will just cause more issues and financial stress.
Volusia	General	I would ask for additional weeks that daycares and a like continue to stay closed to prevent the spreading of Covid-19 in our preschool and younger children as well as their care givers; sometimes out of desperation we don't make the wise decisions. I do need the income but also I can't afford to get sick as my three year old would have no one to care for him. My healthcare system makes me wait entirely too long and I am fearful of going to hospitals. Please consider businesses like such to remain closed a while longer and when we reopen that our group numbers are decreased. As a VPK instructor at any given time, I am able to be around 20 children myself. It made me more comfortable when we were limited to no more then 10 in a group. Thank you for your time and consideration.
Brevard	Education	General shopping plazas: limiting capacity, checking temperature before entering and/or posting warning and issuing fines to individuals who enter with underlying symptoms (fever, cough, etc) Continuing extreme sanitation efforts Schools: monitoring student and teacher health (taking daily temperature) wearing protective gear. Hiring outside cleaning and sanitation specialist. Most public schools have 2-3 custodial staff that enter classrooms at the end of day to sweep and remove trash. Classrooms must be sanitized regularly. No backpacks, lunch bags and water bottles only (small purse for older girls for feminine products). Spacing of students, outdoor eating (cafeterias are overcrowded). Sanitation is not the responsibility of teachers, it needs to be outsourced by professionals to make sure its done consistently and accurately.

AMERICAN OVERSIGHT

Orange	Professional Services	I vote to stay closed, I am a massage therapist and have concerns with how that will work with social distancing in place. There is no way to stay 6 feet away and do a massage. Plus how can we protect from asymptomatic people? We do exactly what the CDC says not to do. We touch people for an hour at least, we are in confined spaces for up to 90 minutes. Clients lie about their health as is before this virus, there is no way they wouldn't lie about this. And seeing as there are asymptomatic people out there is rather not risk my life or my husband's life. I vote to stay closed.
Marion	General	No way!!! Until this is under control and have a successful treatment available. Not ok for ppl to be out in the street w/o a mask contracting and passing virus to others trying to stay well.
Pasco	General	Reopen please reopen
Seminole	General	Do not re open Florida. We need two weeks of everything closed. Stop putting money before the lives of the people.
Miami-Dade	General	I think if a company or establishment wants to be opened they should come up with a new plan of order. This order will show how they plan on keeping the distance as well as keeping the organization clean. Example: if it's an establishment with appointment like clients. Have them answer a screening/ contract saying that what they answer is correct, once they are in the establishment they have their temperature taken, and they will need to wear a mask. Another example of a much more populated establishment; they will need to have someone' enforce' their rules to make sure careless activities don't shut the place down. So having one way access, keeping distances, and wearing a mask. I believe if companies come up with a plan to enforce social distancing to make sure it is happening, that things could open up and bring back some sort or normalcy.
St. Lucie	Recreation	Beaches should be opened. It's an outdoor space. People should still follow the 6 feet social distancing. Because the beach is in the open air chances of catching the virus here are severely minimal given the fact that people bring their own beach gear. Having them closed makes no sense. This will always make the people of Florida feel better knowing they can go somewhere and not be confined to their homes and grocery stores. Grocery stores is most likely the leading cause of the spread of the virus. Please re open all beaches right away.
Pasco	General	May I suggest that campgrounds be open only to complete self contained RVs (RVs that have complete sanitation facilities, toilet, shower, laundry, black and gray holding tanks) Keep the park rest room, showers, laundry facilities closed. This way many of us can still enjoy the state parks while isolating in place. Thank you Joe Lynn

AMERICAN OVERSIGHT

Pinellas	Healthcare	Many states are considering how to reopen the economy, including dental practices. As your constituent and a licensed dental hygienist, I am writing to encourage you to reinforce the importance of continuing to follow the Centers for Disease Control and Prevention (CDC) recommendation that dental facilities postpone elective procedures, surgeries, and non-urgent dental visits, and prioritize urgent and emergency visits and procedures now and for the coming several weeks. The dental team works in close proximity to the patient and utilizes handpieces that can generate aerosols or tiny particles and droplets from the patient's mouth that remain suspended in the air and pose a risk of infection to the dental team and other patients. I write to alert you to the need for and availability of appropriate personal protective equipment (PPE) so dental hygienists and the entire dental team may safely and effectively provide care to patients. Dental offices should be limited to emergency, urgent procedures in accordance with CDC guidance.
St. Lucie	General	Florida should continue with a stay at home rule and keep all nonessential businesses closed until the number of new Covid19 cases shows a significant decline for several weeks.
Orange	Tourism	I work on International drive and I foresee when things open that that becomes a hotspot because people will be going over there to find things to do along with people coming from other areas of the state especially South Florida and New York to escape there.... I feel that us employees will be in extra danger then take it back to our suburbs... I already have underlying issues and I am very scared to go back to my job. The governor has totally dropped the ball with unemployment I have gotten one week in the 5 weeks I have been out of work but even that doesn't overshadow the fact that I'm afraid of what is out there we have not hit our peak. While I understand we have to re open the economy, it needs to be done carefully... and while Florida is a long way from New York we are very close...
Brevard	General	Open economy quickly. This is ridiculous. Brevard has 24.5k people and less than 10 deaths. Up until last week, the grocery stores, Lowes and Home Depot had no social distancing rules and they were crowded and did not become "hot spots". Why is that? Like always, Those who are vulnerable need to stay home. The media has fed the panic. If those who feel strongly that the state shouldn't reopen want to continue locking themselves down, let them. If they remain isolated, it shouldn't matter if I don't. There are 172 miles of beach here...I can't imagine that I can't park and sit on the beach without getting within 6 feet of others. In a free society, we should be free to think for ourselves, not ruled by a nanny state. Personal responsibility seems to be totally gone. The point of all this was to not overwhelm the hospitals..that is obviously not an issue as many hospitals are now in financial trouble because of lack of patients!

AMERICAN OVERSIGHT

Sarasota	General	Start slow. Follow the government recommendation of a decline in cases for 14 days before Phase 1 and each Phase. The gym doesn't need to be open. That's silly and that can wait. They are already dirty without a virus. Businesses should only allow a couple of people at a time and no crowding on the street. That would allow some smaller shops and businesses to open up. Some of us would like to regain normal life but also have things like asthma or prior cancer even at a younger age and are concerned that it won't be safe to leave the house if the inpatient people have too many places to go. Find a way to help parents through the summer with no daycare or summer camps so they can work too. Encourage remote work for as long as possible. Some companies can do it but are too old fashioned to try. Even essential business can work remotely. I'm doing it now and it's possible without losing money. Please think about people and not politics. It doesn't matter who we vote for if we're dead.
Collier	General	The task force has a difficult charge to plan the reopening of Florida's economy while reducing farther spread of covid-19 virus. The task force should not give into pressure from other states, from the federal government, or from businesses that all have a biased opinion of opening up the economy for their own benefit. The choice should be made from utilizing the best science and recommendations from the medical experts. Covid-19 is a very sticky virus with the potential of killing individuals from a young age to an older age. Those with pre-existing conditions have died but also those that are perfectly healthy have died. Choosing to open the economy too soon by encouraging citizens to visit parks, visit beaches, or visit shopping stores makes YOU responsible for their health. There is no doubt if your decision leads to additional deaths, you will be responsible for those deaths. There may be ways of opening some sectors of the economy but anything done to early will be a mistake and jeopardize lives. I know there is much talk about economic impact, but seriously we are a developed nation where much of these complaints are about things developing nations are too poor to consider. Americans are spoiled and need to recognize the value of patience and altruism.
Orange	General	I believe maybe certain county's could start opening up mid may/ June 1 if that county has a low infection rating. Counties like Miami, Broward, Palm Beach, Orange, Tampa St Pete and Osceola or any other county where infections or deaths are overwhelming then those county's need to consider staying closed even longer. For counties that do open restrict travel from outside that county from high infection cities People with immune compromised conditions should be allowed to medically stay quarantine for even longer and be granted that time still and maintain their jobs they had when companies start bringing furloughed people back to work for example all the different theme parks and high tourist areas

AMERICAN OVERSIGHT

Orange	Finance	State should not open until we have a working vaccine or cure for this virus. If state is open before then, number of cases will rapidly increase, more lives will be lost and our healthcare system could colapse. We will loose progress made so far controlling the number of people infected with the virus. Keeping it closed also protects the essential services personnel who are the ones taking more risk. We should also keep schools closed. In order to protect the economy, resources should be focused on protecting the workers that do have to work and on making it possible to most other people to work from home.
Orange	Healthcare	As a Healthcare provider I am very concerned about re-opening too soon. In my experience there have been many very sick people with all the signs of Covid 19 that are testing negative. I do not believe that the results are accurate. This could be due to improper techniques in nasal swabbing or in the processing portion. The state needs to get better instructions to those doing testing. We have not seen a significant drop in cases nor increase in properly done testing. Please solve these problems before creating more patients.
Orange	General	I'm concerned because I work at the Amway Center which holds thousands of people for sporting events and concerts. My roommate works at Universal. How can we be protected from getting Covid 19? Especially since there is no vaccine yet. We are both in our 60's. And you have some people that don't follow guidelines and put other people in danger of contracting the disease. It's very scary.
Leon	Accommodation	Open the gyms up now. How can we keep healthy if we are isolated from the very things that can make us healthier. Also, the economy is in a tailspin. We all need our jobs. Open Florida now. The elderly and people with medical conditions should self isolate. Don't hurt the rest of us that want to live life.
Lee	General	My concern is that if we open the state to early, our community will want to be out as not everyone will take precaution, and the covid 19 will come back worse. We need to still keep in place the rile of masks and gloves at any public place that is open. As we have a rule not to enter stores if you have no shirt, or shoes. Same concept for now, until we get thru the peak of it all. Just a thought. Thank you
Brevard	General	I as a parent and healthcare worker have concerns about opening up our state we are still having cases even though you say we have flattened the curve I don't feel comfortable with out a vaccine yes social distincing is working but you opening up the state I don't think would be a good idea not until we don't see any cases I know it's hard for everybody but like the saying goes what doesn't kill you makes you stronger.
Brevard	General	Reopen ONLY after testing will support 10000 per day and full contact tracing is in place!

AMERICAN OVERSIGHT

Marion	Government	I believe it is safe enough to open the state of Florida from Covid-19 slowly . Safe testing for the virus available to ALL state residents is essential . The Florida counties with the least confirmed cases should be opened first . That includes lifting the stay-at-home order . Social distancing should remain in place , probably forever . (at least until a vaccine is created) The wearing of PPE equipment should remain optional . Marion county has a HUGE population of Senior citizen communities and Covid-19 testing should be made available to these Seniors right in the club houses of their community . I commend The Governor , Ron DeSantis , for his handling of this state problem . Regards , David J. Baker Registered voter
Volusia	General	I don't feel we are ready to fully open, especially not to the tourists from other states and countries. We need to get things under control with the residents who live here and have more testing sites available throughout my area, only open beach to the residents who live here and make sure they social distance and not gather in large groups, get covid in control and find all there is to know about it as th err re seems to constantly be something new, if we open up now we will get a second round , and get all our states programs get their act together, fix those issues first!
Broward	General	My family and I live in a condo on the beach. We've been policed since March 18th and told we'll be fined $500/arrested for enjoying our very own beach. You closed our pool, all our common areas yet there's miles of empty beach outside we could be enjoying. Keeping people inside, out of the sun, frustrated and stressed in a condo petri dish is the absolute worst thing you could continue to do.
Duval	General	Being a healthcare worker, I think that FL should cautiously reopen. I would hate to see the number of COVID-19 cases surge because people think it's okay to go back to normal behavior.
Marion	Professional Services	I would love to see the state of Florida reopen soon. I am an esthetician and work in a medical spa. I have been out of work for over a month. I am blessed to say I am not in a more worse circumstance than others. Florida has salons, medical spa, day spa, tons of independent esthetician’s, cosmetologist etc. It’s been a time of struggle for all of us. As everyone knows we can’t stay in quarantine forever. We Seemed like we have hit our peak. Marion and alachua county have very few cases compared to other counties and I believe should be soon on the list to open. A lot of places might need to take extra precautions working in close contact jobs. But also, close contact jobs like the ones I named are a huge income for Florida overall. I hope you consider all options and take the time to look into what will be needed. Thank You.

AMERICAN OVERSIGHT

Lake	General	Its too early to open based on our numbers. This will give us the opportunity to see what happens in states like Georgia. While more testing centers are opening i would hope we figure out how to take testing to those that have no transportation. Continue to have senior shopping times for all businesses that are open.
Wakulla	Food	I think anyone who goes to a restuarant should be checked at door for temperature and required to wear a mask. The employees of food and Beverage should be checked everyday before shift or have everyone who is going back to work in food and Beverage should be tested so that eliminate the employee from having virus and no need to wear mask if customers are screened with temperature checked at door and require mask except when eating .Restuarant shouldn't have any condiments on table for peolpe to touch.Should have one person at all times cleaning and sanitizing surfaces etc.apply the ever other table or 6 feet apart and go with only 50% occupancy. Any employee who has health issue should not work since they are easy prey for virus. Limit how many many in a party when going out.No big groups I would say no more then 5 in a party when dining out or going out..With my 18 years in F&B got to keep big parties down to min nothing on tables like condiments and salt pepper anything peolpe can touch.Even maybe using disposable cups and silver ware to start out could be good ideal.Ive got so many other ideals that can be usefull
Polk	Education	I understand the importance of getting Floridians back to work however I don't feel we have tested enough people to get a true understanding of how widespread the viruses. My concern is we are trying to open up the state before we are ready. I am afraid that if we open too soon, then we could have another wave of infections. As a teacher, I am concerned about returning in the fall without substantial testing. Student safety are extremely important, but if this virus is still around in the fall, how can you ensure the teachers and staff are safe? What precautions will be in place until there is a vaccine, but we are still providing Florida students with the best education they can get. When we do return, I think teachers should be considered as receiving the antibody tests and vaccine before the general public. I feel this way because if the teachers are vaccinated or prove to have antibodies, then schools could remain open taking stress and strain off of the parents. I also think that state testing with the purpose of school grading should be waived. Without results from the 19-20 school year, there will be no valid way to measure schools in the 20-21 school year. It's important that we try and return to sense of normalcy, however the safety of all Floridians must be the number 1 priority. The political pettiness needs no part in this process.
Collier	Education	Dining and education should continue to be closed. Too many risks especially if things are not properly sanitized.

AMERICAN OVERSIGHT

St. Lucie	General	I can't believe reopening our state is even being considered . Florida cases are still on the rise , our death to recovered rate is astronomical. So if our state is reopened what do you think is going to happen with the spread of covid-19 seeing how with our stay at home order our cases are still rising . If our so called governor would stop worrying about pleasing his idle Trump and start worrying about the people in his state this would not even be up for debate . He should focus on fixing unemployment & getting Floridians stimulus payments .
Brevard	Professional Services	Barbers are in a tough position. Its hard to get unemployment but passing the virus and contracting it is very scary and and id rather wait a little longer and keep my life. We are hands on with clients. If the state reopens at this point i would feel like no cares about our lives. This is a scary situation. Please wait a little longer.
Orange	General	I have a child with an autoimmune disease and another child with a neurological disorder. I'm a single parent and a first responder without any help at all. I had to cut back on my hours because of the school and daycare closings. This is put my job at risk although I have my safety net with FMLA. I struggle doing distance learning with my oldest and finding the time to keep up with my own mental health. I still believe though, it is extremely too early to start opening up Florida but in particular Orange County. I have lost a family member due to covid-19. They died alone! I risk working and bringing this illness to my children who are both compromised. I have no choice because my mortgage must be paid and I have to put food on the table. I find that we as American citizens have a sense of entitlement and forget about the next person and how they are affected. I stay home and keep my children home for everyone else as well. I don't step out my door unless it's to get some fresh air with the kids as we bike ride around the neighborhood or if I have to go grocery shopping. This only happens when I have no children at home while they are at their father's house. Please do not open up just yet. I do fear for our economy but life is so much more precious than the mighty dollar. Also, the financial help that we should have seen never reached me. My daycare that had to close as it was a small business and could not survive could not obtain the SBA loan. I cannot get through to unemployment to save my life. This is a travesty! I never had to depend on anyone in all my life to financially support me. The moment that I need it the most, our government has failed us.
Miami-Dade	General	Governor Desantis, please don't open up Florida until it's deemed safe to do so from medical professionals. Florida's Coronavirus numbers are continuing to increase and it's a sure sign that we're not ready.
Pinellas	General	My husband and I (both seniors) been on lock down since the beginning ..although we would love to see everything open we think it should be on a gradual basis. Starting with the essential businesses ..than hospitality, still keeping your distance and most important everyone who patronize any business or small social gathering has to wear a mask. We've come so far and done so well..let's not spoil it! All the medical,first responders and everyone placing themselves in harms way certainly need break ..let's not overwhelm them once again .. Thank you governor for doing the best job one can in a situation we have never seen before!

AMERICAN OVERSIGHT

Pinellas	General	I am a salon owner here in St. Petersburg in the Tyrone area of 22nd Ave N. at Salon Lofts. Salon Lofts is my landlord and within the building I work with about 22 or 23 other stylists and a Smile Direct club which has three Lofts. We share ventilation and none of the lofts has a ceiling. Imagine an antique mart or a farmers market. It's a lot like a co op for Beauty Professionals doing hair, skin , and nails and in some locations across the state of which there are many, massage. The waiting room has 4 chairs and have two communal bathrooms. Even though we have sliding doors to the lofts we are only 6-8 feet apart when in our lofts and clients will pass within three or four feel in front of each loft as they pass by going down the hall to get to their designated loft owner. There isn't a way to line up 6 feet apart to go the the restroom to wash hands before entering a loft. I'm sure Governor you have received a haircut, a massage, your wife has her her hair colored or her eyebrows waxed or had a facial. There is no safe protocol to perform these services without full PPE. If we perform these services without proper PPE, if we could get it, we will be the epicenter of an outbreak. Stylists will be putting themselves at risk and risk infecting many people a day. What are the legal ramifications if we infect someone and they or a loved one dies? Should we get insurance? Plague insurance? Anti biological weapon insurance? I don't mean to be flippant but I still haven't gotten my unemployment payment, how do I afford enough PPE to change 10 times a day five days a week? What would that even cost? I'm lucky because Salon Loft Corp. has abated my rent as long as there is a shut down. I beg you to seek input from salon owners across the state and come up with a plan and sanitary protocol for us somewhere in phase three at the soonest. Maybe then we will be able to get some cleaning solutions and PPE. Or maybe there will be some kind of treatment protocol before a vaccine is developed in 18 mos. I'm available for consult with 34 years in the business and a business owner her in Florida for 10 years. Thank you for giving us this forum to be heard.
Brevard	General	I completely understand the need to “shutdown” the state to allow the medical system to catch up to the initial rush of infected patients. It appears to me the medical system is better prepared and has enough resources available to treat those that need it. We are at a point that we can now reopen the state, while giving the people the option to go out or not. I feel the Governor and his administration handled this great and looking forward to getting back out there! Thank you.

AMERICAN OVERSIGHT

Orange	Government	I'm a USMC disabled veteran. Stay at home. Live off disability. Financially I've not been affected. I have one school age child. 7 yrs old. 2nd grade. Underlying conditions asthma, severe allergies, and prior history of pneumonia. Its stressful having him home bc lets be real kids can be annoying but the alternative is putting him at risk to a virus that would love to get attached to my son. School closure is great. My mom lives with me, she has high blood pressure and over 35 years of smoking cigarettes, she is still working, she works at Alsco. They work close to each other. They are glad to work but they need PPE. Her and her friends want to work and arent afraid to go outside they just wanna do it safely bc they understand the risks. A calculated stage by stage approach like president and governor suggest is the smart way to do this. The people just want PPE so they can protect themselves while continuing to move forward in this great country. Trump and Desantis were the right ppl to have during a time like this. We dont need politics right now we need to do what ever it takes, we need to be savages in a good way. So we can destroy this enemy. No red tape no politics. Just pure american savegtry lol.
Pasco	Healthcare	I would like to see dentistry be one of the first to open. They have been seeing patients on an emergency basis during these times. In my eyes they are first responders because if they can't see a patient with an emergency issue , that patient will go to the emergency ward. At the hospital. I work for s dental supply company and cannot get them quality masks, gowns , face shields etc. when they open up 100% they will not have what they need. We need to redirect some of the PPE supply Chain to dentistry. With the proper PPE equipment the dentist is one of the safest places to go. To thank them for unselfishly doing what they're been doing the first months supply of PPEs should be on the federal government. Let Florida get back to work. Thankyou to the Governor and the Tssk force for everything they've been doing.
Brevard	General	Please let people go back to work. People are capable of making their own decisions on their health. All they need are the fact. To may people are suffer due to being out of work. People will be homeless with their kids. All because they weren't allowed to work. That is NOT the American way!
Orange	Retail	Open the economy up the first part of May! If the ones who want to venture out give them the opportunity to do so!
Sumter	General	It is time to start opening. We're adults - if you're reluctant to go out, then don't! Stay home. I want to see restaurants and stores open.
Lake	General	Of utmost importance is health and safety of every age group, that has to take precedence. There are basic items everyone in the population needs to ensure health (masks, alcohol wipes, disinfectant wipes, hand sanitizer, etc.) and those items cannot be found anywhere on store shelves in my area. Social distancing needs to be observed for people to feel safe and comfortable going back into public places. Testing should be made more available. People that can work from home should continue to do so to help keep outbreaks at a minimum. Thank you for working so tirelessly to help come up with a plan to reopen our state safely.

AMERICAN OVERSIGHT

Seminole	General	Florida should reopen gradually and according to the President's three phase approach—with one exception: gyms should not reopen until phase two. I am a fiscal conservative, but my number one concern is that we protect those who are most vulnerable to coronavirus.. We have to be responsible for each other.
Gulf	General	It is to soon and dangerous to open Florida however Hurricane Michael grants are being put to the side and because the Florida Dept of Economic Opportunity has not not been corresponding with the USDOL, Florida is about to have hundreds more of people on unemployment. I realize this virus is the main concern now, but please don't forget other priorities that were here first. If these next phase of funding is not approved ASAP these displaced workers will not be able to work passed Wednesday as Career Source Gulf Coast does not have money to pay them. Please help keep these people working ! Don't create a bigger issue for families.
Volusia	General	It's too soon to open the state back up. We should atleast extend another couple of weeks. If my job is making us wear masks to open back up may 1st it still isn't safe to open...
Sumter	General	i'm all for some small businesses to open mid-may but ALL employees and ALL customers should have to have masks on till end of may atleast. The employees need to have them on to protect their customers and the customers need to have them on to protect the workers. no good if only one side wears them. businesses need a sign that says 'while in store' you must have a mask on. i am over 70 and have lung issues so i won't be shopping for a while but want our businesses to reopen so we can start getting back to a normal. i would feel a lot more secure in going out to these places only IF both parties had masks on. my he hair and nail places obviously can't be 6' apart and do their job but as long as they wear masks i guess it's the best we can do in that instance.
Sumter	General	The economy is JUST AS IMPORTANT as the virus. In your briefings, please address the economy, as well as all the depression, abuse etc linked to this. The economy has to open now. TIME IS OF THE ESSENCE. People need a date soon for when they can go back to work. ALSO business owners need a date soon, so they can start preparing. On a side note, salons in my opinion are LOW risk. No one waits in the waiting room, mask is worn, everything is disinfected between clients. That is low risk.
Seminole	General	I think you are opening a hornets nest asking for feedback. The task force has much more information than I and most Floridians do as far as the safety of reopening. All you are going to get are responses fueled by emotion. Using myself as an example, my desire is for everything to go back to normal today. Is that practical, absolutely not and I'm intelligent enough to realize that. A lot of people aren't. I don't think this is a useful tool.
Osceola	Recreation	Im interested on opening the state. If bussiness are shutted down then there is not money flowing so what will happen to people paying rent for example. I feel people can follow the guidelines no matter where they go.
Orange	General	Time to reopen some of the small business. Number of new cases are decreasing. People need to get back to work.

AMERICAN OVERSIGHT

Brevard	Government	Open up the whole state Advertising common sense is.still necessary for the inept and know that viruses exist and will continue to. Stop trying to infringe on our lives. It’s unconstitutional and you know it! Have a nice day
Lake	General	Florida still need to be cautious about reopening too fast. Areas where large Gatherings will be held should be limited. Do you stay at home advisory has slowed the spread in Florida tremendously especially since we have such a large outbreak in the Miami-Dade area and our Orlando International Airport contributed to Orlando's outbreak. But in my opinion the orders have worked and Orlando was on a week or two lag of the spread that came into the Miami and Fort Lauderdale International Airport. I was one of those that flew into Miami from Ecuador on March 20th and there was no screening taking place for anybody coming off this aircraft. That in my opinion was a far oversight. But I do agree let's get back to work but mandate a facial covering in areas were people and Associates did not have more than 13 ft of separation and especially in high-traffic areas like the grocery stores. And even more dire is the area I work in, Sumter County The Villages employees who are interacting with elderly homeowners or doing work inside of their house should be required to have a disinfectant sprayed over them before entering and if this is impossible at least carry hand soap where they wash their hands and exposed arms thoroughly from an outside faucet prior to entering into each separate home.
Osceola	Finance	Please do not reopen yet; please take direction from health officials/doctors/expects. Please do not make this political and take direction from political officials/leaders.
Hillsborough	Food	I’ll start by saying I think as a collective, the Governor is doing a solid job during this time. The economy simply needs to open up. You can give people all the money you want, but none of that matters if businesses stay closed. It is unsustainable, period. The fatality rate is dismal. We need antibody testing in abundance more than anything else right now to calm the public. When they can truly see those numbers, it will out the weary at ease. Shelter the elderly and those prone to catch the bad end of this virus. I own a small restaurant and none of my staff or myself have received any unemployment (that system is the true disaster in all of this). The money we generate from take out is simply affording me to pay some of my staff for the few hours I can give them and a few small bills. I’ve yet to receive PPP or the EDIL funding as well to afford my rent and other larger costs. We can do this safely and efficient. I am against the staff wearing masks when we reopen, but will do what is required. Let’s open this sucker up. Thanks for reading
Orange	General	Better not be in a rush to open everything up. It will end up with widespread sickness. Florida needs to give it some more time as far as shutdown. Is it worth risking lives and ultimately having to shut down everything again. If we open back up and it spreads even more then what was the last month of lock down for??? Don't risk peoples health Please! Thank yoy

AMERICAN OVERSIGHT

Sumter	General	We feel that it is time to open beauty and barber shops, nail and pedicure salons, doctor and dentist offices, furniture stores, department stores, jewelry stores, restaurants (when they figure out the 6 ft. distance) We understand the health risks, but people need to get back to work. The government should not and cannot pay for people to be out of work forever. Just wear a mask and observe the 6 ft. distance and pray for safety and good health.
Orange	Accommodation	With schools closed for the remaining school year, my concern is where would my child go if my job reopens. I typically use the YMCA or Karate camp during the summer break. If they were to open prior to then, there are many children who attend camp. Running, sweating, swimming.. I don't see how the counselors could implement distancing at the Y, also how would my child complete his virtual school 9 to 2? In addition, I struggle as it is to pay for child care during the summer as it takes HALF of my paycheck. I just don't see how I can make it work. I'm a single mom, my work is dependent on retail stores opening. My son and I have underlying health concerns as well.
Miami-Dade	General	Hi, it is very simple. Just say to everyone, anyone can reopen there business at there own risk, anyone can go where they want, however they want whenever they want but at there own risk. Very simply put, give people the freedom of choice to choose if they want to risk their life, if people want to stay in that is fine but that shouldn't take away from people who are not paranoid and living in fear. I have endless ideas and strategies about how to fix this issue. Call me anytime on 786-316-5619 Or email me at lovelife01@live.co.uk
Brevard	General	In general, I think the state should still be closed. The majority of people in Florida (from my observation when absolutely having to go out) are still not wearing masks ad they should be and definitely not staying 6 feet apart. Florida should look as almost as empty as it is when a hurricane is approaching, but unfortunately it does not. People are still at risk of spreading the virus by already not following these safety measures and opening the state will only make things worse. More cases will continue to increase and the death toll would continue to rise, possibly even at a more rapid rate.
Brevard	Government	Fix & pay unemployment...DISGRACEFUL! FOLLOW guidelines...2 week downturn before SLOWLY reopening Make masks required in stores and restaurants until vaccine
St. Lucie	Tourism	Thank you for pressing forward in reopening our state while cautiously protecting the most vulnerable and our healthcare workers. We need our economy to work to make sure our health system does!
Leon	Administrative	Open the gyms up now. How can we keep healthy if we are isolated from the very things that can make us healthier. Also, the economy is in a tailspin. We all need our jobs. Open Florida now. The elderly and people with medical conditions should self isolate. Don't hurt the rest of us that want to live life.

AMERICAN OVERSIGHT

Brevard	Recreation	Please make Brevard county cities open up parking at the beaches. Please hurry and get things opened.
Sumter	Retail	Only businesses without walk in customers...such as construction and manufacturing. Before we allow customers, we need to trend down and have more testing. I am a small business in Florida and yes the economic impact is difficult. We open too early and the virus is traced back to our businesses....from one of our employees or customers giving it to another customer or multiple customers and they end up hospitalized or worse there is no recovery from that. Virus tracing. The media will inevitably share what companies infected people or killed them. Florida tourism and retail could suffer for years and years if customers are infected.
Nassau	General	I believe that people need to go back to work. Our economy needs to be rebuilt. I have a son and daughter in law who don't have jobs and during this time can't get one. Neither are eligible for unemployment due to being out of the work place due to health and other issues for too long to draw unemployment . Both are now able to work. Another son is able to work from home, but his wife owns a beauty salon. She has 4 or 5 who rent stations from her so neither she nor the ladies who work in her building are getting any income. For peace of mind and mental health people need to work. These places can take precautions, open up and help themselves and the economy.
Lee	Tourism	Please open the beaches and associated parking. Residents should be allowed to sit on the beaches as before. There is plenty of room to spread out. Anything in life has a level of personal risk and that should be up to the individual not the State. Restaurants and businesses should also be open and if at half capacity fine. Put people back to work immediately! We the People
Seminole	General	Open up gradually, starting in mid-May approximately or when the coronavirus figures are definitely decreasing. Maintain social distancing in public places. Testing for EVERYONE must be made available so that those who test negative could go back to work or school.
Polk	General	Please re open asap 😁
Orange	Information	To who it May concern: It's a lot of people walking around with the virus and hasn't been tested.. When Florida re-opens, just watch how everything goes but you'll never know how things are going to go if we don't try.. If the virus breaks out again, we'll have to deal with it.. It is what it is.. I love my Govener and I know he'll do the right thing...👆
Orange	Government	Lets open back up, with caution, perhaps in phases. This is according to what I'm seeing, hearing when I go for food shoping, and what I hear from family and friends we are looking at this pandemic as a 'let's slow down, but continue'.
Marion	Healthcare	Please let florida open

AMERICAN OVERSIGHT

Indian River	General	I would be all in for reopening if I felt that the needed testing was definitely going to be available and reliable. The governor was talking about a new partnership with a new company and product has not had significant testing results. I would rather we wait till we are sure and not do a false start and be back to where we are now. Stay the course until we are fully prepared
Volusia	Agriculture	We need to have supply of food, medicines ,so those should be as soon as possible .I'm old, I'll gladly stay out of the way to make it easier for the young to get things up and running for us all. If because of opening things I should catch the virus and it not turn out well it just means my time came and I went belly up . There will be no free country left for the future generations if we don't start as soon as we can with common sense.
Orange	General	My family and I own and operate a CrossFit gym in Winter Garden. Due to the shut down, we are not able to offer necessary care to our members. CrossFit gyms are not run like a typical gym...we know our clients and their families. We work to provide them with tailored workouts that will help prevent injury and often repair long term injuries from which they have suffered for years. We are a mental and physical release from the stress that is affecting our society. Because our classes are generally small we have the ability to control cleaning protocols and are very stringent in what we do—from wiping down all equipment and keyboards, to cleaning the floors between classes, and so on. We are an essential service. But so are many more areas of our country. Why not monitor county by county the overall practicality of opening. We need to get the economy up and running...loss of life is crushing, but how many will lose their lives due to the external forces of the shutdown.
Marion	General	Make everyone wear mask in all public places which will slow the sread make sure all public places enforce this. Went to Walmart and at least half the people had no mask. No wonder it keeps spreading
Manatee	Healthcare	As a 73 yr old citizen with a 76 yr old husband, I would like to see more testing available for seniors even though we may be asymptomatic. I believe we should be tested monthly until a positive result is found. In addition to the scarcity of testing supplies, there continues to be a scarcity of disinfection wipes, sanitizers, toilet paper, and face masks. We cannot begin to reopen if these necessities continue to be scarce. Thank you for allowing us to submit comments. That's a nice thing to do and the right thing to do.
St. Johns	General	Yes- open the economy in Florida. It is far worse not to be able to feed our families than the risk from the virus. I heard 98% of those who contract the virus recover and only 2% who usually have one or more under lying conditions may not survive. I believe opening our stores, schools, tourist sites, and the entire economy of Florida far out-weighs this small risk. Governor DeSantis is managing this crisis very well and I commend him, and hope he gets our economy back on track within the next few days. Thank you and good luck, as there are many pun-dents who would prefer our economy fail!

AMERICAN OVERSIGHT

Polk	General	My opinion is that Florida is not ready to open up as a whole. I think we should open up little by little. Starting off with small business first to see how it goes. But for tourism we are not ready to handle a big crowd yet. We don't know if someone comes in with the coronavirus and there goes Florida again. So we got to be very careful on how we're going to open. That's my opinion.
Pinellas	General	To soon to open state and beaches back up.better to wait get it over with and move past this.time to use common sense.tired of our ugly orange ass president and our ugly government
Volusia	General	I flew to Maine on April 12th as my 94 yr old Mother was not well, she passed on April 16th. I am 1 of 8 kids and we was with her at home when she passed. On the 18rh my sister became sick, was tested and has Covid, I have 2 brothers in intensive care at Millinocket Maine Hospital, with Covid. Sister in law, my niece and nephew also but are at home. My cousin on Monday the 20th was tested positive. This virus in a matter of days had all but 3 family members sick. This Virus spreads rapidly more than I ever thought and I believe until we have stricter distancing in place then we should not open to soon. I am suppose to return to work May1st at a resort in Daytona Beach and I am stressed over all this. Never thought to much about it till I saw it take down my famy.
St. Lucie	General	Reopening Florida should be medically sound decision. Social distancing guidelines should be followed with limiting people in businesses. I suggest if you reopen, mandatory masks should be worn in public spaces. I understand the need to reopen for businesses and the economy, but life is more important for the long term economy. The projected peak in Florida hasnt been reached yet, and opening too soon will only lead to an eventual shutdown again and will only damage the economy further. Tourism should definately not be reopened as contact tracing will be too challenging.
Martin	General	Open beaches, parks and restaurants, with social distancing. Encourage those with underlying conditions or the elderly, to refrain from engaging in activities until covid numbers are reduced significantly. This has to end, enough already, never going to completely reduce cases to zero, must get people back to work.
Brevard	General	Reopen FL!!!
Hillsborough	Healthcare	Here’s what I would love for you to finally do. Listen to medical experts and epidemiologists about how to reopen. Not business people, not your partisan board you put up there. I left the Republican Party for the first time in my life when it went to the party of absurdity. I was pleasantly surprised with you initially and obviously your opponent was a dumpster fire and we dodged a bullet. But for the love of God - stop the misinformation; learn how to properly put on and remove an n95 before you do it in public, and start listening to science. Listen to experts.

AMERICAN OVERSIGHT

Orange	Retail	Personally, being a Disney worker currently on furlough, I would like to see the tourism sector opened as soon as possible. This would probably have to be done in stages and if at any time a spike in the virus occurs, then we may have to pull back some. I believe that we won't know what may work and what may not work until we try. But it appears that new cases are declining especially in Orange County. I also think that the health benefits of trying to get back to normal, as normal as can be, would be good for everyone.
Martin	Agriculture	I think we should open or keep closed each county one at a time as care given as we go.
Orange	General	I think we need to open the state and have businesses back again. Do not have other people from other states come in until we have solid proof they are virus free. We must have a test at airports, bus terminals and boarders. Make sure all our residents are virus free. Everyone must be tested. Allow people to socialize in restaurants, movie theaters, parks, etc only if they are tested negative and all people MUST wear masks. Make reservations for restaurants to only have a limited amount of people at one time. Put time restraints on the amount of time to be in that restaurant so others may be able to go, also. It will generate revenue for servers and business owners. All hotels can open as long as the guests are tested and virus free. Be very strict on social distancing. Hair, nail and massage salons are to have all patrons and employees masked and gloved and limit the amount of people in the salon at a time. Everything should be by appointment only and strictly enforced. . As far as bars go, it's not going to be easy but limits can be set on the amount of people, also. It's just difficult to wear masks if you're drinking! The people who are working from home, should still continue to do so as long as the business is not suffering. The less we have a lot of people in one place, the better we are. Still keep the supermarkets doing what they are doing. It's working. We can have some type of normalcy until we have a vaccine or antidote for this virus and we can start living without limitations. We need a test to give results immediately, just like they have for the regular flu. The results of that test must be submitted to a lab/dr/hospital, whatever to show proof you're virus free. A test should be given more than once to each person within a duration of time to make sure they did not contract the virus. We are not certain that if you did have the virus, that you are immune to getting it again. The regular flu has no immunity. You can get it more than once. Difference with this virus is you can't fight it with the drugs we have for the regular flu. I am over 60 and I am concerned with the future. I have no health issues, but that does not mean anything. I do not want to contract this virus, ever. I have had the flu 1 time in my entire life and never had a flu shot. I am sure there are others like me out there. I really hope you give some of the ideas thought. I would love to know that you actually read this!
Volusia	Retail	I understand the need to open stores, but allowing people to flood into restaurants and stores is a bad idea. I think the to go orders is still allowing restaurants to stay open. But at a point where we think we need to start reopening things, it needs to be at small capacities. For example, if restuarnats are allowed to seat people again, it would need to be at 50% capacity and every other table as it was before we shut down. And it needs to be enforced. I know of a ton of restaurants that didn't do it an nothing happen. Any rules need to be actually enforced with fines or what not. People do not take this seriously because no one is enforcing things. Same goes for stores. Limit the amount of people in places at the point you decide to open. But I don't think now is the time.

AMERICAN OVERSIGHT

Orange	General	I think you should start small. You can open the restaurants and salons . Limit customers depending on the size of the establishment. Restaurants, gyms, salons, etc. By appointment only. A few people at a time. Restaurants by reservations so you can keep it to a small capacity. Small stores, such as Five Below, only x amount of customers at a time. Masks inside are a must, it should NOT be optional.no mask, no entry. If the establishments do not go by the rules, you have the right to shut them down. Should have the task force use undercovers to go around and make sure people are following the rules. Good luck and tthank you all.
Leon	Healthcare	Open the gyms up now. How can we keep healthy if we are isolated from the very things that can make us healthier. Also, the economy is in a tailspin. We all need our jobs. Open Florida now. The elderly and people with medical conditions should self isolate. Don't hurt the rest of us that want to live life.
Osceola	Professional Services	Please open theme parks, hair salons, restaurants right away.
Volusia	General	Open up small business, social distance when possible. Open up hospitals for elective surgery.
Orange	General	If this is real pandemic then the state needs to stay closed. But if this was just a governmental test of control then open the world back so we can see the sham. Either you work for the public and keep us safe or you kill us. So to do your job either lift the order and let us die.
Brevard	General	I am a hairstylist, booth rent. I still have to pay rent even though I not there. Other wise there will not be a place to go back to. Yes I want to go back to work.but only with face mask for every one. Plus gloves for all hairstylist. One client at a time. This needs to be mandated so everyone follows the rules. If salon don't follow rules. I say fine the hell out of them. Thank you Joan
Clay	Finance	Get the unemployment system up and run smooth.
Sarasota	General	We need to move forward in reopening Florida. It makes no sense to kill our economy. Whenever we open up, there will be more cases. That's just a fact of life. Government needs to trust citizens to act like adults, take responsibility, and stick to whatever opening guidelines allow for reopening our economy and returning to a semblance of a normal life. If there are some citizens who are still overly fearful, then they can continue to stay at home, but those of us who are NOT afraid should not be held hostage. Reopen ALL beaches, including Lido Beach. Per NYT article on 18 April, it is VERY unlikely that the virus will spread while out in the open air unless one is in a huge crowd situation, which can be controlled if necessary.
Broward	General	I m absolutely against opening Broward county non-essential business. The public is not adhering to social distances. Walking outside in groups not wearing masks. As soon as you open up tourist areas and Fort Lauderdale beach the public will flock outside without a care. I think we need to wait until June1st before this decision is made.
Brevard	Healthcare	I'm a Certified Assistant I work in a Center that serves the Brevard Public Schools Employee's. Just want to make sure that myself and the staff as well as the patients are virus free and take any and all precautions to avoid anyone getting sick !!!!

Medical

AMERICAN OVERSIGHT

Palm Beach	General	I don't want to slow all the progress we made in slowing the spread. If we open too soon why we could be right back to where we started with an even longer road ahead to recovery. We need mass antibody testing in place first. Why aren't we focusing on that? We haven't even reached our peak and our numbers are still growing no matter how you skew the statistics to try and accommodate your agenda. Keep the closer in place for another month. Get unemployment system fixed. Longer we wait longer we learn more about the disease and how to care for people and promises of new drugs such as remdesovier. Stop listening to the loonies outside. Majority want to keep the hold on place. My husband is a first responder, I know first hand about sacrifice. You don't need to go to restaurants and shops, you need air, water and food (as my 1st graders test listed yesterday). Funny how we teach our kids this in school and do the exact opposite.
Orange	General	The safety of people should be put before corporate profits. Until there are significant declines in our state rushing to reopen does not appear to be in the best interest of people's individual health.
Volusia	Healthcare	I work in Medical, and it is too early to open the State. I feel like if we don't get a handle on this virus now, we are looking at it to keep coming around,,, flu on steroids type thing. Believe me, I cant pay my bills right now, but I would rather keep people alive. Florida needs to mandate the use of PPE for the public NOW.. masks at the very least. And essential workers should get some sort of Hazard pay... it just nuts. Please think of the long term impact on our health. And I can tell you, front line medical personel are going to have a high PTSD occurance going forward. This virus has impacted us in ways that can't be seen at this time. So you wanna shop or die and kill your family and friends? Be smart. its too soon.
Brevard	Healthcare	In order to protect the dental team and patients, the American Dental Hygienists' Association (ADHA) continues to support the recommendations from the Centers for Disease Control and Prevention (CDC) in recommending dental facilities postpone elective procedures, surgeries, and non-urgent dental visits, and prioritize urgent and emergency visits and procedures now and for the coming several weeks. Extend the May 8 return date, to protect us and our patients! Dental aerosols remain in the air for 30 minutes and longer,. Placing patients and providers in great risk!
Orange	Healthcare	Please do not do what the Governor of Georgia is doing. In retail settings, if you can't have 6 feet of separation, then it doesn't need to be open. This would include salons, tattoo parlors, bars, concerts, wrestling matches. You get the idea. The citizens of Florida deserve to be safe.
Collier	General	Open hair salons.
Brevard	General	Reopen FL!!!
Orange	General	As bad as I would like to set the state get back to some kind of normal, open everything too soon could be catastrophic....
Orange	General	I strongly feel it is too soon to re-open restaurants, beauty salons, spas (hair, nails, etc.) and fitness centers. If we do so and more people are infected, we will start back at square one. Beaches, parks (not Disney) and marinas should be allowed to re-open.
Orange	General	We should have sufficient test's available for everyone in the state and the curve is showing a downward trend.

AMERICAN OVERSIGHT

Volusia	General	Open the state of Florida slow we don't need another out brake Just saying.
Brevard	Accommodation	Please open up in stages with closures as needed. Keep distancing in place. Follow through on repercussions when violated. We are not free to infect others. State masks are necessary. Or at least preferred. We are a state with many elderly and need to take more care to ensure there safety too.
Manatee	Healthcare	I believe Florida need to wait on reopened until We pass the projected date at the end of May. We have a high risk population. That Being said, I think elective surgeries with proper pre Cautions should be allowed. Proper precautions Must include face masks, temperature checks and screening questions. This would increase employment hours for the medical profession from Receptionists, technicians, therapists, janitors, nurses and surgeons
Volusia	Government	I think it's pretty clear from the way other states are handling this very unfortunate pandemic, Governor DeSantis, and his team, have been in front of the curve the whole time, so I feel my comments are already on the planning table. The re-opening of state, should be done county-by-county, considering population, and ratio of Covid-19 cases per 1000, and certainly NOT a one-size fits all approach. God Bless all of you front-line fighters. THANK YOU
Volusia	General	I'm for FL following the President's team for directions. There should be 14 days of decreasing coronavirus cases before implementing phase 1. We need to do things logically and scientifically, unlike what GA and SC are doing. I know how many people are out of work, me included. That's why we have unemployment! That's why we got a stimulus check! That's why we've got PPP! These people with their salons and tattoo parlors are probably not eligible for some of that since they put cash in their pockets all these years. Too bad. Don't open now to further line your pockets at the risk of infecting your clients.
Brevard	General	I think everything should open at once. Everyone in Florida should wear a mask when out of the house. Those who don't comply should be isolated from the general population. When they are released after they must comply or they will be isolated again and fined $500. It's up to business to have a plan to enforce the 6 ft distancing between customers. People need to get back to work. People need to shop. If this plan is strongly presented and strongly enforced I think it would work.
Duval	General	Yes I think Florida needs to start with soft openings and provide businesses that will be reopening with guidelines to ease back in safely, such as Wal-Mart and Publix have been doing, Conduct business while maintaining safe distances for guests /customers/visitors.

AMERICAN OVERSIGHT

Clay	General	All for it to open businesses and tourism however everyone must take individual responsibility and accountability about public health issues. Those practices that were in place to mitigate the spread of this scourge must continue until it becomes 2nd nature and or normal.. The balance of international, local economy and where people need to work must as well as those vulnerable, be considered to move forward. The process should be measured and calculated to support public health, individuals freedom as well as security of the State and Nation.
Broward	General	The goal should be to manage the capacity of healthcare facilities to 80%. There is no making this virus go away until we've all been exposed to it. If the curve "flattens" its time to relax closures. Given the current capacity of FL healthcare facilities stated by the Governor, its time to reopen; beaches and parks. Golf courses, country clubs (with the possible exception of dining in), playgrounds, outdoor recreational facilities, IE gun ranges, bicycle and motorcycle tracks, skateparks should all be reopened immediately. Soccer, football and baseball should remain closed due to the nature of the sport being close contact. We WILL see an uptick in COVID cases but that is not a bad thing, everyone will get this virus at some point. Being direct and explaining this to the public is important so that when cases do rise, panic does not ensue causing a call to shut down again. After the rise in cases is realized, maybe 14-21 days, its time to relax more closures. Lowe's, Home Depot, Publix and Whole Foods have done a great job at limiting store capacity and maintaining social distancing. All retail shops and businesses should open with capacity restrictions. After another 14-21 day period, restaurants should open at reduced seating capacity. Group sizes should be increased incrementally as well, starting with 20, then 50 then 100 etc. Large events will have to be evaluated after all regular activities have been resumed and the healthcare facilities are seeing largely reduced capacity. Taking a step by step measured approach while monitoring healthcare facility capacity is the right plan. Acting on predictions from scientists and doctors is no longer relevant. We now have enough data and information to create a manageable plan to get people back to work and life. Testing to see who has had the virus, or who has the virus is also a waste of time and money. Waiting for treatments and vaccines could take years. Government aid should go to helping the high risk population rather than a much larger blanket of aid for everyone. Making sure those who get sick enough from the virus to need in-patient care have the resources available to them is the most important and effective way to manage this public health crisis.

AMERICAN OVERSIGHT

Orange	Tourism	I work for a manufacturer (small business). One of our sources of revenue is from tourism construction projects. Due to he country being shut down, we are also feeling the effects financially. How could we not? And to make it worse, we have not received one dime of support from any program that is out there. In my opinion, we need to re-open our economy and stop the bleeding that is occurring. If this continues, the mental health toll could be as serious as what has occurred with this horrible disease. People cannot feed their families. Unemployment is slow to arrive. Not one of my friends in FL has recv'd anything. This just cannot continue. Folks will be rioting in the streets for basic needs. Have everyone wear a mask. Take temperatures - for what purpose, I am not sure since people do have COVID w/o fever. Be socially distant. Space the tables apart. Whatever needs t/b done to at least get some people working again. Those who feel safe will come. Others will sit at home. But we have to have that opportunity again that Florida (at least a part of Florida) is back in business. And whatever you do - LIFT THE STAY AT HOME ORDER AND CURFEW NOW! Thank you. PS: I saw the beaches in Southern California yesterday that were packed with people since it's 90 something plus in Los Angeles. I didn't see any hashtag California morons. What is it with people insulting Florida? That should also stop too.
Polk	Food	I am in the food business. I believe the state is not ready to reopen just yet.
Orange	General	I think the phased approach is smart but make sure you include malls and retail. No gloves since those are worthless unless you're a healthcare worker. But masks should be mandatory for any and all locations. Restaurants at 50% capacity, Beach's and parks open with distancing mandatory... Employee some of those out of work Floridians you watch this. Theme parks should work at a 50% capacity as well... Maybe locals only at first then phase in other states.
Orange	General	I believe its important to reopen the state when it is appropriate and safe. I believe we are getting there, but we aren't there yet. My concern is that when you do open up parts of FL, other parts will come to the areas not in lockdown (ie people from Miami coming to Orlando). It defeats the purpose to open FL business if no one comes. I read a survey that over 80% of Floridians do not feel that it is safe to reopen at this time. I certainly won't go anywhere except the grocery store until I feel safe. I think it is unacceptable to open the state before May 18th. We need at least two more weeks for areas like south Florida to improve. I think June 1st is the ideal date, but no less than May 18th which gives us another two weeks. A lot of good can come from waiting another two weeks as a state. If you don't wait, the state will see the implications.
Sarasota	Technology	Need to explain in simple terms how testing is used! Only testing those with symptoms .How is that analyzed to determine the total number of people with the virus?

AMERICAN OVERSIGHT

Pinellas	Tourism	I am a Florida resident and live at the beach. PLEASE do not open the beaches and pools until we have flattened this virus. People are already violating the rules, and still gathering on the beaches. Once you open up the parking, it's going to be a free for all again, just like spring break. I LIVE HERE. I do not want all those germs over here!! I have stayed home for over 6 weeks to be diligent in the fight against this virus and will continue to do whatever it takes. If you open the beaches, please do not open the parking lots and open them only for exercise at certain hours of the day. Phase it in slowly. PLEASE!! Thank you for your consideration, and for all your hard work. Sue
Volusia	Tourism	I ask those making these decisions are being smart when allowing any non domestic tourist in this State...remember this virus came to us from outside the USA...lets not start them mess all over again...secondly we also need to use caution allowing those from States with HOT Areas of this virus coming into FLA... Thank you.
Seminole	Recreation	I think opening the beaches would be a good idea. Still doing social distancing. Also no groups of more then ten allowed.
Marion	Professional Services	Beauty Salons and barbershops should be able to be some of the first to reopen. Shops Can Provide clean chairs and single customer in shop at the time. The hairdresser can wear mask and apron - since it's typically appointment based customers anyway, it should be an easy transition to open very soon!!
Polk	General	Get this economy opened as soon as possible the cure cannot be worse then the problem. People are suffering out of work and the unemployment system is unusable my wife and two sons have zero income know can't pay car loans and no money coming in. The stimulus checks they have not received yet either. You will lose more people to suicide and mental health issues then the virus. The lockdown was meant to not overrun the health care system and it hasn't so do not move the goal posts. The models Fauci put out were garbage and remain so. Make masks voluntary and do not take away our rights as Americans with any kind of tracking systems. People just want to start living their lives again as soon as possible. Thank you
Osceola	General	As much as I wish we were ready to open, I will have to say NOT YET. The opening in phases are a good plan but I would go a couple more weeks just to make sure the counties have all there ducks in a row.
Seminole	General	It's time to slow roll this out. Small businesses are suffering too many unemployed. The result is worse than the virus. Limit capacity, open beaches salons groomers restaurants. Anywhere the capacity can be limited and spacing requirements. I started stay at home a week before orders. Sometimes I think we went overboard. We have to start now.
Leon	Government	Open the gyms up now. How can we keep healthy if we are isolated from the very things that can make us healthier. Also, the economy is in a tailspin. We all need our jobs. Open Florida now. The elderly and people with medical conditions should self isolate. Don't hurt the rest of us that want to live life.

AMERICAN OVERSIGHT

Polk	Education	I know the economy and people's jobs are very important, but I hope you will not open things back up too quickly because I would rather spend more time doing this ONCE than have to do it all over again in a few weeks or months. I also hope you include teachers and principals in any discussions about what reopening schools in the fall will look like. Thank you for the opportunity to voice my opinion.
Volusia	General	Testing and contact tracing in place before reopening. Must go slow and require masks and social distancing .No large groups until not seeing continued outbreaks with opening businesses. Forget theme parks until virus is controlled over the world . Be wise and be careful!
Orange	General	I am so disheartened by the push to re-open any time soon. The task force has zero medical professional input and the Secretary of Agriculture is not included. Our state cannot be safe without a consensus based in scientific fact. I don't want partisan politics. I want a well thought out plan, one that protects human life and values people. The economic disaster playing out before us is a tragedy. However that tragedy will only be compounded by the loss of additional lives. Please re-evaluate the task force, make it one of inclusion, to protect all Floridians.
Volusia	General	No...it should NOT open.up at least for 1 more month. Cases STILL going up, not enough tests..no way. And schools SHOULD NOT OPEN in Aug at all, until we have a vaccine or cure. PERIOD. To many grand parents looking after their grand children while the parents work and they are the ones these kids come home to after school.
Miami-Dade	General	I think it would be unwise to reopen Florida. Yes it is hurting us economically but imagine how much more detrimental it would be if we reopen Florida prematurely and get a second wave of COVID-19 and are forced to close again. We should follow what the medical experts are saying and the surgeon general of Florida. We have to be logical in these tough times and not make bad decisions based on desperation to get things back to normal. Solve the root problem and then you can focus on getting things back to normal.
Pasco	General	Reopen for small business and public parks for sports and child care we have no child care because schools child care programs are closed and recreational centers are closed and personally know barbers who need to get back to work before they lose there entire business please reopen
Marion	Healthcare	As a nurse working in the hospital with small children I do not think it is safe to reopen Florida until data shows a decrease in new infections to prevent furthered spread. This will assure less fatalities & overwhelming of our healthcare system. Thank you

AMERICAN OVERSIGHT

Seminole	General	Please open Florida May 1st. As a business owner of a spa, this has had a tremendous impact on us. Our clients are emailing ready to come back for massage and acupuncture. Most of our clients take a holistic approach to their health and by us closing per the Governor order, essentially you are denying them healthcare. It is contraindicated to work on sick people anyway. You have to think of mental health too. This has now become a stressful situation for most people. The shutdown worked, we flattened the curve and did not overwhelm the hospitals. The shutdown was never meant to completely rid of the virus. Individuals need to be responsible for their own health and stay home if they are sick, whether it is covid-19 or just a common cold. Do the right thing, open Florida. We had a thriving economy, now we millions out of work, most haven't received unemployment, small businesses have not received help either due to corporate greed from PPP loans. Domestic and child abuse, suicide, depression, alcoholism and mental health cases will just continue to rise. Open Florida! Thank you
Lake	Healthcare	It is too soon to open everything back up. If we do this there is going to be a spike of outbreaks. Give it atleast 2 weeks without a rise in cases.
Miami-Dade	General	Thanks for your service. It was easier to close Florida than it will be to reopen it. Please be careful. Social distancing and facial coverings should remain in place through 2021. - DO open restaurants - perhaps only outside seating or with tables 6-feet apart and ask establishments to invest in sanitizing equipment, like steam. - Medical elective procedures should be open but in non-hospital centers - Open nail salons but mandate facial covering and a Plexiglas protector between operator and customer - Beaches should be open only between 6 a.m. and 9 a.m. for exercise (walking, running. etc) but no other activity should be allowed
Polk	General	I believe it is too early to open many areas, resturants and theme parks is my area of 8nc9me,soni am directly impacted and at this time I would not feel anywhere near safe being in large groups of being forced to serve thousands of people a day. I believe opening so soon will cause a large increase in cases and will cause a second round worse then the first. I believe if we do start opening maybe mid june and ensure their are several precautions in place. One big thing is tempature checks for EVERYONE not just front of house employees at theme parks. It should be temp checks for all employees and guests . I believe it is way too soon to relax too many regulations and when we do it should be very slowly limited hours and extra cleaning.
Polk	Tourism	I would love to get back to work but I also understand the risks that will cause for me and my family (my wife is diabetic) We both work at theme parks and are chomping at the bit to get back to work. What needs to get working is the unemployment system. Through glitches and waiting I am going to be without pay for probably two months minimum and my wife lost her insurance so we are spending all of our money on Insulin to keep her alive. HELP

AMERICAN OVERSIGHT

Seminole	Education	School in FL will soon be over at the end of May, a month from now. We have adapted to the school learning. I do not believe the last month of school after what we have been dealing with will be productive. Continue the home learning until the end of this school year. Scrub Deep Clean ALL of the schools so they are ready for the next school year. Keep our children safe.
Alachua	General	I think Alachua County can start to reopen businesses that had not been deemed as essential. Our County has done a great job with following the Safer at Home order and with social distancing and that is shown in our low number of cases. Local businesses are hurting and a few have found it necessary to shut down for good. Most laid off workers have not received their first bit of unemployment or the stimulus payment. We need to get back to work!! Not all Counties should be treated the same and the ones who have not met the criteria in the gating part of President Trump's plan, should not move on to Phase 1. According to the Director of our County Health Department, we have met all criteria to move on to Phase 1.
Lee	General	For all intensive purposes, all precautions were put out by the CDC regarding the proper way to protect oneself from Contracting covid-19. For those who feel sub ceptable to the virus they can still maintain self quarantine on their own end wear gloves or masks. This will prevent those concerned from possibly catching the virus. There's no real way to offset this without a vaccine and you can't stop the world from going forward. I for one most likely had it back in early February as well as the rest of my family. If the state really needs to they need to start testing for antibodies and not testing for covid-19 which is more important. I think you should reopen and those who feel comfortable enough to go forward should have that right while those concerns can still follow certain guidelines.
Suwannee	General	It would be good to reopen slowly BUT ALL people have still got to wear face masks and wash hands constantly. I still see people standing in groups with NO masks on. We are still spreading the virus and will continue unless people just assume that anyone that they come in contact with has it and they can get it. They're forgetting you can have it for 14 days and not know it. Or that it lives for 4 to 9 days on things. We just have to be careful and smart. Open important things first with mandated precautions. Not just "if you want to". Hope my imput helps. I wouldn't want your job but i thank you for doing it. Thx for listening, Gigi
Marion	General	It is not safe to open the state as the numbers are going up every day. Guidelines say they must be going down for 2 weeks. They are not. As it is people aren't practicing social distancing in many areas. They think it's funny to walk right up to you in a store then get annoyed if you ask them to please move away., Many businesses that are staying open, especially manufacturing plants, such as where my husband works, are considered essential. They are not practicing social distancing at all, or providing PPE. Now the beaches are open and they are not staying 6 feet apart by any stretch of the imagination. It is just not safe to open until our numbers are going down for two weeks. You can covet is yo follow the guidelines. You need to Follow the cdc guidelines, period.

AMERICAN OVERSIGHT

Hernando	Food	I am a server and I am concerned about being safe. We have no way of staying 6 feet apart while serving customers. We have to bus tables, picking up glasses, plates, silverware and not to mention giving out our pens for them to sign credit card slips. I have high blood pressure and asthma and I feel like we need more testing. In the service industry there are no way to stay a safe distance from customers or co workers for that matter. I not only have to worry about coming into contact with one of my customers but also have to worry if my coworkers come into contact with covid 19 with one of there customers. We need to know if someone is a carrier or not, just because someone doesn’t have a fever does not mean that can infect someone. Pleas do more testing so we feel safe.
Lake	General	I am beyond ready to go back to normal, however I feel like reopening right now is a bad idea. I think that there needs to be more testing, especially in The Villages area. I think the borders needs to be closed to everyone but trucks delivering goods. All out of state people should be turned away at the boarder. Let other states, like Georgia, reopen if they want and be the test subjects. This is a state of tourism. Opening it up now only brings in more people who don't live here to contaminate the people who actually live here and kill us off and overrun the healthcare system. Let's not be Las Vegas right now.
Pinellas	Recreation	I am a travel softball coach and co owner of a non profit organization which trains the youth in basketball and softball. We also mentor the youth in education, community service, college prep, etc. Although I am eager to reunite with my athletes, I feel it needs to take a backseat to this pandemic. Tournaments entail close interaction between players, coaches and fans. Money should not be the motivator to open up sports- or anything else for that matter. My husband is an umpire and has lost quite a bit of earnings due to the shutdown. Still, that does not compel me to say "open up". I feel we are at least a month away from opening up the economy in FL. Testing must be readily available, deaths must subside to none and masks need to be readily available to the public. I ordered masks on February 26th and I still don't have them in my hands. Be safe, be slow to act for the sake of everyone.

AMERICAN OVERSIGHT

Brevard	General	Reopen Florida but with certain restrictions. Don't open theme parks or certain businesses/attractions that generate tourists and allow businesses that do open to practice safe social distancing. Why does Florida need to be reopen? I was furloughed from my waitressing job on 3/22/2020 and I still have NOT received unemployment! Over a month later with no money. There are thousands if not a million people in the same boat as myself. No one should be denied unemployment or the federal $600 during this COVID-19 pandemic. But it is going to be the reality for alot of us. We CANNOT live! We cant pay our bills or support our families without any money. I didnt ask to be furloughed I was forced! We, the Florida people, need money!!! Bills are piling up and food is getting lower for LOTS of Floridians. I would rather go back to work with social distancing/hand washing/mask and gloves than sit at home not making any money. We need Florida to reopen! If not than give us all our unemployment and the federal $600 so we can survive until Flordia reopens.
Hillsborough	Retail	It is time to open restaurants shops, gyms, and other small businesses that are essential to a local economy. Small business is the foundation of a city. We can not withstand 100 percent unemployment. With all the large box retailers remaining open (and many of them reporting record sales) its obvious that everyone is out in public anyway. OPEN FLORIDA BACK UP FOR BUSINESS
Orange	Tourism	We need to open ASAP with precautions.... too much damage being done to local economy and businesses which may make it impossible for many of them to reopen. The longer the shutdown drags on the worse it will be for everyone. I believe that the infection rate - when antibody testing is more available - will be much higher than what is being reported. We need to open as much as possible in a safe manner.
Orange	General	My stimulus went to wrong account and my daughter's stimulus, due to be sent on April 24th, her account number was one number off. This is insane. The IRS should be the FIRST to REOPEN along the court house PLEASE!!!!!
Polk	Management	It's really a shame when Executive Order 20-104 hurts the unemployment existing claimants...It's been over 2 weeks now and not a payment for the weeks needed. People rely on these meager wages Florida has for the unemployed. How is delaying the payments going to help?? How can you re-open when no-one hasn't even gotten any payments?? WE ARE BROKE!! Why doesn't Senator Scott take some of that "Stolen" money and give it back to the Floridians who NEED and DESERVE it!!!! STOP REPUBLICAN BREAKING OF OUR STATES AND GOVERNMENT
Brevard	General	We should wait till June as projected. Because my business will be at limited capacity which means I won't be making what I need to pay my bills and feed my family. Unless the state will supplement income some way some how.

AMERICAN OVERSIGHT

Hillsborough	General	Way too early to open places where people get too close from each other. We cant repeat the spanish flu mistakes, reopening too early.
Duval	Healthcare	I am a Registered Dental Hygienist and it seems that there are unclear guidelines regarding when we will safely return to work and what changes there will be in our PPE and daily protocol. I work in a periodontal office where many of the patients are older in age and have underlying health conditions. Will the protocol be the same for this type of office versus a general dentist office? I hope that there will be consistency and very SPECIFIC guidelines to ensure the safety of ourselves and our patients as we are working in a high-risk environment with person-to-person contact and aerosols involved. Thank you.
Sumter	General	Bars and restaurants should be opened, but limited to 50% of fire code capacity. Movie houses should be limited to 30% of capacity. Personal services should be opened and provide mask to employees and customers. The stay at home order should be rescinded, adults can maintain spacing without government restrictions. All retail business should be reopened but capacity' limited to 50% of fire code capacity. The above restriction should last no more than 30 days.
Pasco	Finance	I filed for unemployment 3/24 and have been pending ever since. This is completely unacceptable and a crime on your behalf. Release our state ui and federal immediately.
Volusia	General	My biggest fear is if everything is opened too soon, we will have another equal level of infection and deaths.. a resurgence. My thoughts are as difficult as it is, let's not stop the forward momentum until health experts at the local level are comfortable that we can begin re-opening. Set up a questionnaire for top medical doctors involved in the pandemic and with certain group responses, agree to start the step by step opening.
Volusia	General	I am very aware of the distress this is causing,but re-opening needs to be carefully thought out. The thouggt of allowing people to invade small tourust towns is not right. We live here with our children, grandchildren older relatives. Non-residents can be extremely disrespectful to areas not in their own backyard. They will suck all our resources etc. I am not for re-opening this soon. Thankyou.
Orange	Healthcare	I have been out of work since March 22nd with zero news on my unemployment claim that was filed March 24th. Im a nurse practitioner at a medical spa in Seminole county and yes even though this includes elective procedures, we have the right to open these businesses. People do not have to leave their homes, but those of us that can't pay our bills should have the right to earn a living! Home Depot, Walmart, Publix, etc have all remained open and we haven't had any spikes or complications! Unemployment assistance has not processed my claim and it's been 4 weeks and I have no idea how I'm going to pay my bills in May. Please let us start opening so we can earn a living! Opening can be done safely and we already have safety protocols in place! Please let us work!

AMERICAN OVERSIGHT

Brevard	General	Certain counties have had no significant increase in cases over a long enough time that they should be able to start the process, but some have such a high count of cases that they will have to be watched carefully. Our counties low numbers are partly from the quarantin , and partly from low population. That must also be taken into consideration. We will never reach a consensus on when will be a good time to open, but fear should not cause us to not act.
Volusia	Transportation	I think the economy should open back up because this is not a pandemic, it is like the seasonal flu. As with any precautions you take when people are sick, people should be cautious. Personally this is effecting millions of Florida people who can not receive unemployment benefits and they will lose way more than if they were working. It has been going on long enough and it was a folly. People die every year from flu and they don't shut down the economy. Let's go back to work and help keep American business going. Unfortunately a lot of business's will go bankrupt because of this and shame on the medical community for destroying people's lives. This has been going on long enough. I had my dose of socialism and I think my rights and liberties are being infringed upon.
Hernando	Food	Florida has a lot of restaurants that have large outdoor seating, and could support the 6 feet of space needed. why can't we allow those places to reopen with guidelines to support this. With the weather getting warmer the may help the outdoor places lower the risk.
Pinellas	General	Please Do Not reopen our county. Many havent been tested and the cases continue to go up everyday. I worry about not only my family's health but also the elderly as most of our area is older. We have only been technically in quarantine for a month and I worry if we open too soon all we have worked for will be pointless The safety of people isnmore important then beaches etc wesring masks and gloves will not effectively make this virus go away. Id like to have a vaccine that protects everyone firs . I dont want to effect anyones safety for things we dont truly need at this point. I understand money and people suffering but maybe focus more on the systems working then reopening beaches and pools that do nothing for the economy and continue to only keep what is truly essential open for now thank you
Palm Beach	General	Please follow federal guidelines for COVID-19 restart. Otherwise any subsequent deaths will be on your watch!
Osceola	Tourism	I don't think we are ready due to the fact there is no way to currently treat this virus correctly. My son who's an honor student and part of NJHS has had two heart surgeries. He's at risk and I'm sure I am one of many with concerns.
Marion	General	Follow the Federal Three Phase Guidelines
Hillsborough	General	Why are self employed people getting turned down for unemployment and can't get any help try to get something done right for once in your political career or you will not have the people on your side come election time

AMERICAN OVERSIGHT

Hillsborough	Healthcare	DO NOT RE-OPEN THE STATE!!! We're not even at our peak yet and so many people have died. Re-opening the state will result in more lost lives, plus we will have to quarantine all over again for a much longer period. It is ridiculous that we're even being asked on our opinions for re-opening. Any individual who agrees with re-opening the state thinks Coronavirus is a hoax, therefore, their opinion is irrelevant. I beg of you to not re-open and make this horrendous mistake. We must wait at least another month before even considering to re-open.
Polk	Recreation	Open state parks for RV camping for Floridians only. Self contained units only No tents. No need for bathhouses. Limited to 6 people to RV. Thanks
Orange	General	Absolutely open the state and country! World wars didn't shut the country down & neither should this super flu outbreak.We never shut the country down over the "regular " flu which kills thousands every year. Why now? Makes absolutely no sense imo. Too many small businesses will be closed forever because of this. Instead of helping the country this shutdown is crippling it. Open the state and country. We all have to adjust and be smart in everything we do, greet differently, gather differently, go out in public differently but to shut the state and country down indefinitely? Not the answer. More people die from drunk driving each year yet the bars & booze is still legal. Country still chugging away nothing shut down. More people killed in crosswalks each year yet we still have them open. No shutdown. Smoking kills millions yet still legal. No shutdown on sales. Hundreds of other things kill us more than this flu will ever kill. OPEN THE STATE & COUNTRY!
Marion	General	I can't afford to go places, but my kids are grown and I am thankful that I still can work and get an income. Opening safely and making people compliant may be a very hard task, but it must be implemented. I can't imagine folks with young ones, and especially those that still have a job trying to contain everything. I pray that we will have cooperation and kindness and a lot of love will be displayed, so people can enjoy respect. Yes, opening up soon, but safely is a good idea.
Brevard	General	Please open Florida up. We are killing our local small businesses. My daughter is disabled (autism). She lost a job that took her 7 YEARS to get. No one would give her a chance. I volunteer with an independant living facility that houses people with Downs syndrome and autism - among the residents is my daughter. Most of them got laid off during the shut down. I cannot tell you how much that has hurt them beyond income. For most of the 126 young adults, their first jobs were the ones they lost when the Pandemic hit. Their self-worth, pride and motivation was boosted immensely in winning those jobs and suffered a huge setback when they lost those jobs.
Union	General	Baby steps. Open non_essential businesses a little at a time in clusters. People need to work and earn a living, but this MUST be done without causing more COVID-19 CASES! I believe we still need the 6' distane rule to stay in place. If a business can accommodate that rule then consider them opening. Restaurants could do that!! Also, as a common courtesy to customers and stàff, don't serve anyone who's coughing uncontrollably. They can get their meal to-go!

AMERICAN OVERSIGHT

Sarasota	Healthcare	We can not reopen until we have the APPROPRIATE PPE. N95 masks MUST be obtained and used properly. Testing and contact tracing are the only way we can minimize the risk. It's a small price to pay to preserve human life. I wont even comment on our broken Unemployment system. It's been horrific. 4 weeks and I've heard ZERO.
Brevard	Healthcare	We should follow the Phase 1 recommendations that have been laid out and cautiously open businesses that can accommodate social distancing recommendations. For businesses that can continue with a remote workforce and maintain productivity, that should be maintained to ensure we are not risking exposing individuals to higher risk by rushing our recovery. The isolation is difficult, but if we can be patient a while longer while we assess the impact of the phased reopening, all of our residents will benefit.
Leon	Education	Open the gyms up now. How can we keep healthy if we are isolated from the very things that can make us healthier. Also, the economy is in a tailspin. We all need our jobs. Open Florida now. The elderly and people with medical conditions should self isolate. Don't hurt the rest of us that want to live life.
Duval	General	I think it is to early to reopen but I would say to require employees to wear mask I believe that those who can work at home should keep working at home. I think you have to take in consideration that people who go back to work might be care takers of people who are most vulnerable I care for my parents my mom has stage 4 cancer and my father has pulmonary fibrosis also my son has underlying health condition also kids in school maybe they have a elder as a guardian or someone who has medical conditions by opening schools those kids could be a risk to them so there has to be careful consideration in reopening. I think employers should provide PPE to employees if you have a business that has 10 employees and one area and one employee gets sick all of them would have to be quarantined so what good would it be for that business. Duval is a huge city and if we make mistakes in reopening too quickly or not responsibly there will be a great devastation to our city thank you
Orange	General	As an “essential” worker in the food industry, I think reopening the state is a terrible idea at this time. I HAVE to be on the frontline every single day, compromising my immune system and family by coming in contact with the general public every day. We have finally started to have a decrease because we closed the state and immediately you want to reopen it?! If you reopen the state this soon, we will 100% see an increase in cases yet again. We already messed it up by not closing soon enough, let’s not make the same mistake twice. Take it from someone who drives an hour and fifteen minutes to work every day... NO ONE is staying home. There’s just as many cars on the highway now than ever. Reopening will just give them a place to go to spread germs. Think about those of us who don’t have the option to stay home because we’re “essential” and not the ones who get to entertain themselves at home.

AMERICAN OVERSIGHT

Osceola	General	Good morning, Gov. My name is Daniel Jones, a Florida resident here in Osceola county. I would encourage you to open up the state, while keeping strict social distancing guidelines. Allow restaurants, small businesses, and many more to reopen under strict social distancing. You described Florida as being on the flattening curve at this point, because of that, we should be enabled to safely work while still under social distancing. Thank you, Gov!
Brevard	General	Our health care system is not and was never overwhelmed, which was the stated reason for locking down and "flattening the curve". Let's get our economy turned on ASAP before it goes beyond the point of no return using face masks and social distancing. The media and some elected officials went out of their way inciting fear.
Pasco	General	Put the best interest of the people of this state first, instead of being the typical corrupt politician. We elected you to represent us and keep us safe. Keep the state closed!
Pasco	General	Open FL up. Tired of waiting around
Okaloosa	General	We never here about the panhandle of Florida in the governor updates. I do understand there are more cases in south Florida, however though nothing has really change in the panhandle of Florida, when the stay at home order was declared are police depts said they were not gonna enforced anything so when you tell people that they are gonna not stay home. Stores are always packed people are just hanging out in front of stores. Yes restaurant are closed and so are the beaches and most fun places are closed but groom shops didn't close thought they were supposed too. Now they are talking about opening up beaches with limited hours in the morning and evening so everyone is gonna flock to the beaches during those hours how is that social distancing? I don't know how much the stay at gone order was actually enforced in South Florida but in the panhandle it was not. We were behind in the shutting down Florida when other states in March where placing stay at home order and enforcing it we still had spring breakers here especially here in the panhandle. I think Florida need at least one more month of stay at home but this time enforced it . Limit the amount of people in stores cause you go to a store here lines are long and packed and people don't care. I know a lot of people are ready to get back to work cause they need money for there households but if they were getting there unemployment they won't be so demanding to open the state back up cause they would have money unemployment need to be fixed!!!
Pinellas	General	Hello Mr. Governor DeSantis I'm a 73 year old fellow in great shape. I walk 2 miles a day, swim 1 hour at the YMAC, walk animal shelter dogs as a volunteer. My request is when you reopen the state please don't put an age restriction in force, we are all different, so please let us decide. Florida is a retirement state and many of us are not fragile and are living the dream. Please please please let us decide when the time comes to reopen. Thanks, you got my vote :)
Seminole	Healthcare	No do not reopen early

AMERICAN OVERSIGHT

Brevard	Healthcare	As a licensed midwife, small business (birth center) owner, and parent of an immune compromised child, I ask that the stay at home order continues for at least another two weeks. We are just starting to see peak numbers, and a lifting of the order too soon would surely end in a drastic increase in cases rendering our previous effort futile.
Sarasota	General	Hello, I was not even sure what category this subject would fall under- which is part of the issue! I work for a ballroom dance studio, which technically falls under “gyms” in the state mandates. This business obviously operates on very close contact with students: hand holding, faces inches away from each other, and multiple partners... if one COVID-positive person were to come in for a lesson, they could infect their teacher, who could then infect every other student that comes in for a lesson with them, as well as practicing with the other instructors, their professional dance partner, etc. My question is, how dangerous would this be if we were to reopen at the same time as all of the other Fitness Centers- and if we are to reopen, what guidelines will be in place so that employees and students are safe?? I don’t want Dance Studios and other close-contact businesses to be lumped in and forgotten. Please consider businesses and employees like us when you are making your decisions!! Thank you so much for your consideration.
Calhoun	General	I personally don't think the State should be open not right now more an more people is getting this virus everyday an more people is dieing I think it would be to soon people lives are more important
Marion	General	I work in the local government and I’m face to face every day with the public. I believe that the state needs to reopen but I also believe that it is to soon. There’s been a few days that the number of infected drop but in general the number are still high. Just because the number drop for one day don’t mean we are leveling out we need to have at least 14 days if not 21 days of study downward number of cases thru out the state. Not one or two days of downward numbers . Please make the right decision and keep the state safe and not open to soon. I mean if Disney is willing to make sure there customer are safe and sty shutdown and loss so much. The state should think about that.
Broward	Food	you have done a great job and thank you, I think opening beaches and parks is a great way to distance ourselfs and get more people spread out they all at the supermarket and sidewalks now , plus is emotionally and mentally healtly, salons and spas should wait to close of contact, restaurants shouuld wait to close of contact restrooms to crowaded , movie theathers should wait, we as a famly wont visit this places anyway even if they open due to safety, but a nice walk on beach and taking kids to park will be a great thing thank you again for a great work
Orange	General	The country needs to reopen immediately and stop the fear mongering. People are frustrated and getting angry about being on lockdown. Stop this nonsense and get us back to normal and a free country!!

AMERICAN OVERSIGHT

Marion	Government	Open our economy now. Everything needs to open for the sake of all in the state. For me personally I need a hip replacement. All surgeries are cancelled until further notice. This is not non essential. It's not a boob job or liposuction!! If I do not have surgery in time I will spend my life in a wheelchair. I am very active doing volunteer work with horses, special needs people and volunteeri vacations. I am in sometimes excruciating pain with no relief in site. This is not fair.
Volusia	General	Please reopen FL as soon as it it safe. Soon. Many people have no job or money to pay bills. They need to work. The virus is serious, but is 98% survivable. We need our economy back on track. Please reopen soon.
Pasco	General	Please consider following the president's guidelines of reopening our state. It is too soon! With the amount of retirees and elderly people that make up our state, we can not put anyone at risk. I realize businesses are having a difficult time, please put efforts into helping them without penalizing the health and safety of the people. I feel it is better to protect lives rather than waiting to see what will happen if we are opened too early. Thank you for keeping your people safe!
Sumter	General	I want to get back to as normal as possible as soon as possible. But we need to have great patience. I would suggest not doing anything until middle of May. And then only if the numbers reflect a slowdown on virus cases. Then proceed in a slow manner easing restrictions on a week by week basis.
Duval	General	I think a wise start would to open business that can open by appointments only. example hair salons that take appointments only that would still keep customers 6 feet apart and all employees wear mask. Walk-ins not permitted to prevent waiting room issues. This could included many type of service business that can operated by appointments and keep customers or clients 6 feet apart. Then slowly open other businesses implementing restriction on how many people allowed in say a 1000 sq.feet. might start with dining, gyms, churches etc....Getting people back in routines and into shape.again.All will be required to maintain 6 feet apart rule, mask and ,restricted 50 in one place. Any lines must keep people 6 feet apart.Nightlife, bars and lounges restrict by limited customers per square footage and that can maintain 6 foot apart between customers. Restricting dancing or activities that put customers in close contact. No Group activities. Possibly limit nightlife hours to close by 9 or 10 pm on weekends and earlier weekdays Virus threat to determine when restrictions can be lifted. Hotels that have dining, bar, spa services can start open those services first under above restrictions.Once virus is at lowest threat hotel open accommodations with restriction on number of guest per size of hotel Restricting groups, conventions,conferences sizes until threat is over .
Volusia	General	Slowly with many percuations

AMERICAN OVERSIGHT

Lake	Healthcare	As a registered dental hygienist in FL, having the most likely occupation to catch a virus in the work setting, we are not ready to re-open. The dental field PPE & universal precaution needs to dramatically change before the dental field can go back to work. If we are unable to have the proper PPE, I do NOT want to put my family at risk. My 10 year old daughter is a type 1 diabetic & is considered high risk. Start putting together NEW standards of care & proper PPE for dental hygienists, it will need to be implicated before going back to normal.
Polk	General	I ratter be broke than sick, I love my family and don't want to expose them to danger. As a former military I know we have a commitment to protect our people, so please protect us. No openings yet. Is no cure and no vaccine for it.
Sarasota	General	Reopen Florida as of May 1. Most small business can not survive much past that point and protests will begin in earnest. Maintain social distancing guidelines and keep restaurants to 50% capacity if need be. Open parks. Quarantine is when you restrict the movement of sick people, tyranny is when you restrict the movement of healthy people.
Seminole	Administrative	With suggested social distancing and proper hygiene we should have opened yesterday. Tipped employees are suffering and will never make up for lost revenue. Families are depending on $ just to get by on the basics. The choice of whether to go about your daily lives or stay locked up should boil down to the citizens of Florida. Open NOW! This has been an experiment that will have the same ending no matter what direction we go.
Seminole	General	I believe we should hold back until May 30th to build and extensive detailed plan on how we open under strict guidelines and how we interact with tourists. The plan would allow soft openings and keep strict guidelines in place to at least July 1st. There is so much unknown yet starting with who has the virus and now who is immune. Do what's right for the states population. A resurge would be devastating
Seminole	Tourism	I believe that Florida has continued on a good path towards flattening the curve. However, slow and steady in this fight. Open more essential businesses like courts and city services, banks, etc that people need. Then if all goes will restaurants bars and other recreational items with social distancing and occupancy limits. Keep Disney universal and beaches closed as they are a prime breeding ground for infection and entice out of state tourists domestic and international to come to Florida and potentially carry the disease into our communities.

AMERICAN OVERSIGHT

Lake	Retail	I own three Great Clips Hair Salons and have been closed since March 29th. I was one of the very last Great Clips in the Central Florida area to close. The loss of income from this has been daunting at best. And since I'm dealing with the goliath Bank of America, I missed out on Round 1 of PPP. As much as I want to get back to business, and as much as I think the whole CoronaVirus is a bit overblown, I have skittish employees to worry about, and don't want to be given the green light to open too soon. Personally, I am thinking that Friday, May 15th would be a good date to reopen. Thank you.
Broward	General	I do not want to drag this longer than necessary and would listen to the health experts on how to proceed. Re-opening a a different pace than other states may attract non residents just as it did in the early weeks of the pandemic. A restriction in travel in conjunction with re-opening would definitely help.
Leon	Recreation	Open the gyms up now. How can we keep healthy if we are isolated from the very things that can make us healthier. Also, the economy is in a tailspin. We all need our jobs. Open Florida now. The elderly and people with medical conditions should self isolate. Don't hurt the rest of us that want to live life.
Orange	Education	Please don't make the decision to reopen too quickly. There is too much at stake. Let's make sure that Florida can show a 14-day period of declining cases and that we have adequate testing and contact-tracing abilities. Thank you for your leadership during this time.
Lee	Recreation	Please open Florida and Lee county now!!! People need to get back to work and a somewhat normal life. Open the beaches!!
Highlands	General	I believe the ideal return the work date should be 06/01/2020. No sooner than 05/15/2020. All businesses must have PPC for employees or remain closed or shut down. Limited hours would also be good for first 2 weeks of opening and imit the amount of clients or customers. Safety first! Business owners typically are not at the front line and don't seem to have compassion for there employees health.
Martin	Recreation	Please consider opening state and possibly COE parks back up as another way to stay distant but get outside to fresh air . I also believe that we should open our resteraunts and such with distance seating likely every other table . If people feel uncomfortable with the next step in reopening they could possibly delay their personal return to normal until such time that they feel appropriate for their specific situation..with good monitoring of the cases that are developing that effect the health care system the state could adjust the regulations more tight or more relaxed if something changes
Sarasota	Recreation	I believe the beaches and parks should be open with strict adherence to social distance. Parking at the beaches is a must. Basically only those folks living near the beaches can use them, and that’s not fair.
Hillsborough	General	I urge you not to open the state until it is safe! Please follow the advice of the CDC and medical community. If the state is opened too early, more lives will be needlessly lost and we will be back to square one. No amount of commerce or money is worth a human life. Please do not reopen the state until there is a sustained downward trend of cases of Covid-19.

AMERICAN OVERSIGHT

Pinellas	General	Have the elderly and those who have underlying conditions take precautions. Never heard of quarantining healthy people. It was supposed to be for flattening the curve so the hospitals wouldn't be overwhelmed. They weren't, in fact they are taking cuts in pay and hours. Envision is filing for bankruptcy. All for a virus that has a 98% survival rate.
Volusia	General	I feel as though it is too soon to consider reopening the state. We have not instituted the Safer at Home order long enough. Florida's numbers continue to be on the rise and have not hit their peak yet. Even with the safer at home order in place there are far too many people out in public who are not taking special precautions. I feel as though we need to wait until we start seeing a decline in our numbers prior to beginning to open the state. I also believe the state might want to consider requiring people to wear masks when out in public with the exception of people who can not wear them due to medical or mental health reasons. I say mental health as wearing masks for some people can trigger PTSD from past trauma. Thank you for taking the time to read this.
Martin	General	NO
Polk	Tourism	We live in a high tourist state. Disney World is my back yaed. I want to continue to be safe and healthy. I am doing my part to protect myself from this nasty virus and want others to do the same. Opening the economy is too early will jeopardize all Floridians. We are the go to vacation state. Let's take care of us first. As a substitute teacher it is crucial for the well being of our students to stay safe. We all know young children are touchy feely and love yo give hugs. Keep us Floridians safe. Florida isn't going anywhere and there will be plenty of time in the future for vacations.
Hillsborough	Government	Until the curve has flattened and more testing becomes available, I do not feel confident about the Safer at Home Order being lifted for Florida. The latest numbers show cases are continuing to rise and one can only conclude that reopening to "business as usual" will prove to be a deadly decision for Florida.
Orange	General	Please do not rush to reopen the state. The current flattening of the curve we are seeing is directly related to the preventative measures we have taken. If we rush to reopen we will see a flood of new Covid19 cases and people will die. I know the economy is of concern but we can not let people die simply to raise tourism dollars. I can't imagine we will have "normal" numbers of visitors for quite a while anyways. If we rush this we will end up with the worst of both worlds, more Covid19 cases and deaths as well as a faltering economy. Please be sensible and listen to medical professionals and not just those with business interests. Please protect the people of the state of Florida.

AMERICAN OVERSIGHT

Volusia	General	I feel opening up the state would be a mistake at this time unfortunately most people cannot abide by simple social distancing guidelines. I feel there should be Strick and reinforced guidelines for individuals and businesses if they are going to reopen or quarantine is lifted. The health of all individuals should come before money. I understand our economy is being effected but it will continue to be affected permanently instead of just temporarily if we don't work to slow the spread of this virus or contain it. Florida has a lot of elderly people especially those in Daytona beach and they are the most vulnerable. But really this virus has shown is can take the life of even a health younger individual. We have not seen a decline in our numbers or maintaining our current numbers and that is with many staying home so to open up non essential business and really the state mathematically that would mean a potential increase of numbers and potential deaths. Our Health care workers and health care system can barely handle what we have now if this number of infections was to continue to rise our health care system would crumble and those people most in need of health care who not be able to get the care they need and deserve. Not to mention the lives of our health care workers are on the line everyday expoing themselves to try to help or save others. They deserve to be saved by the state doing there best to help and support them. Our government needs to step up and take care of this country as they have promised to do, to protect their health and well being of all citizens, to provide financial aid and funds, proper ppe for health care workers, etc. we pay our taxes and dues to them and our governor needs to uphold his own oath to do what is best for the majority and safety of the people of the state of Florida. To not act now when it's the most critical time to act could result in the deaths of many. I appreciate all the hard work of all of our essential workers, health care works and the governor and his office. Please continue to support each other in these hard times and stay healthy!
Brevard	General	I work for an afterschool program....although the owner is eager to.reopen our doors for camp I highly advise against it. This isn't even over yet....Florida iant reporting all cases, some are asymptomatic, others are positive but aren't quarantined, and then there's those whom think it's all a lie or a simple flu. I say extend the stay at home order, limit grocery store and restaurant hours even more...there was never a complete lock down like other countries and states are doing...plus I have yet to see Florida try and prevent this even more, as in the state hasnt ordered cleaning/sanitization of the streets, major and small buildings....I have yet to see anyone do a deep deep sanitization. Never fully closing the beaches was a mistake in itself, but reopening was and will be detrimental because this haant gone away. Thia state has made many many mistakes throughout this whole pandemic and reopening the state will cause more harm than good.

AMERICAN OVERSIGHT

Orange	General	I believe we need to start reopening Florida. Our economy needs to start working it's way back to success. Due to the nature of the economy in Orange County, largely attributed to tourism, we need to implement a way that theme parks, restaurants, and hotels can reopen safely. Require masks, limit capacity levels, limit the size of individual groups allowed to gather at these places, implement spacing requirements etc, but get people back to work.
Volusia	General	I think we could be taking a big risk by opening too soon. Cases are still rising in FL. The theme parks need to be careful, too soon can equal deaths no matter how careful they are.
Volusia	Healthcare	I am a dentist currently only open for emergency/urgent care. Dental offices should be open as frontline healthcare professionals to provide a wider range of procedures. This will continue to keep patients from seeking emergency department care at the hospitals. We wear all the required PPE equipment and provide enhanced protocols to keep our patients and staff safe. Also, dentists should be allowed to provide non-serological COVID-19 testing of our patients and staff. Our Florida Dental Association has been working with the governor's task force to advise and assist with Re-Open Florida.
Lee	Accommodation	I'm not sure without a proven therapeutic drug, comprehensive testing or a vaccine it matters when you open. I am over 65 and in pretty good health and we are making decisions based on an abundance of caution. I do feel trapped because we are constantly told we are so vulnerable but my husband and I don't feel that way. We worked a lot of years and chose to enjoy our retirement in Florida. I don't know how many years we have left but don't want to be in confinement forever. I think we should be allowed to have cleaning services in our home since even though we are in good health, it's tough to be doing a lot of cleaning as we get older with aches and pains. I think our condo association is being a little too strict in not allowing us to have any contractors even to maintenance items like A/C which is so important in Florida. I do admit I would like to go back to my salon. Not sure I would go to a restaurant or theater for a very long time. But, we need to hold these businesses accountable for safety measures and as clients we have a right to demand that. We always wear masks and gloves and would want salon workers and anyone we have in our home to do the same. At the end of the day you eventually need to start the economy and hope that everyone makes good decisions. You don't have to worry about us old people. It's been drummed into us daily.

AMERICAN OVERSIGHT

Duval	General	I think it is to early to reopen but I would say to require employees to wear mask I believe that those who can work at home should keep working at home. I think you have to take in consideration that people who go back to work might be care takers of people who are most vulnerable I care for my parents my mom has stage 4 cancer and my father has pulmonary fibrosis also my son has underlying health condition also kids in school maybe they have a elder as a guardian or someone who has medical conditions by opening schools those kids could be a risk to them so there has to be careful consideration in reopening. I think employers should provide PPE to employees if you have a business that has 10 employees and one area and one employee gets sick all of them would have to be quarantined so what good would it be for that business. Duval is a huge city and if we make mistakes in reopening too quickly or not responsibly there will be a great devastation to our city thank you
Volusia	Food	I can't get no help with unemployment so Yes,open the restaurants so the people including myself can pay their bills.The people of Florida are hurting and no one seems to care.This has went on long enough.The unemployment system is a joke.The employers pay it in but the employees can't collect.I am very unhappy with the system and the governor.
Lake	Healthcare	I would like to see the state wait until the number of Covid19 cases show a downward shift across every County before lifting the stay in place orders. I'm concerned that there will be a upswing in coronavirus if restrictions are lifted without restrictions. Restrictions such as limiting number of people in meetings, businesses, restaurants and wearing of masks mandatory, etc. and make rules enforceable. I'm in the high risk group and my husband and I will not support picking a date and returning to business as usual. This virus must be observed and decisions should be based on numbers/cases and not fear but consideration of the health/safety of the population.
Marion	General	Open it up!
Duval	Healthcare	I am a dental hygienist and have been furloughed for the last four weeks. My main concern is not having the proper PPE available when we return. I work in patient's mouths all day long with aerosols and droplets all around. Although cleanings are considered elective, my patients and I are at a greater risk to exposure to CoVid 19. Since aerosols are known to circulate in the air up to 3hrs. After dismissing my patient I disinfect and clean every surface, but there is still aerosols which are exposed to the next patient I see. I'm just advocating for strike guidelines and available PPE to be enforced before I return to work. I have a husband and children to be concerned for too. I don't want to bring this virus home to my family because I didn't have the proper protection that I needed. Thank you, Alef Lossen, RDH

AMERICAN OVERSIGHT

Volusia	Healthcare	Immunity testing needed to determine who is positive, we need to know who we need to protect & who we don't. Open business up if they wish but employee's who do not wish to return should not be forced to. I've had to provide letters to employers to protect workers due to their immune comprised health issues. Employers need to protect their employees better!
Orange	General	Open everything back up and quarantine the elderly and people with underlying health conditions .
Brevard	Healthcare	Personal Opinion - there are still so many people disregarding the 6' instructions and not wearing a mask, nor using sanitizer I believe it is is asking for more health problems. Let's lower the risk before we go out and raise it by opening all.
St. Johns	General	COVID-19 is still widespread in Florida. We have not flattened the curve here and are not ready to reopen the state. Until we have this virus completely under control, do not put our citizens at risk. The economy will never recover if people keep getting sick and die. And don't listen to anything President Trump says about reopening.
Orange	Accommodation	I don't feel we should open for another month. China was closed for 4 months. How are we going to open after a month n half?
Palm Beach	General	-Reports now show that as many as 13.7% (2.7 million) of New York citizens have or had Covid19 > https://www.nbcnewyork.com/news/local/new-york-virus-deaths-top-15k-cuomo-expected-to-detail-plan-to-fight-nursing-home-outbreaks/2386556/ -Flight tracker image below shows real time flights from NY and NJ inbound (in blue) this morning (and all day/everyday). you can click here to watch live inbound (PBI) flights: https://flightaware.com/live/airport/KPBI. These people are ALL free to move around the county unscreened, untested and/or unquarantined, or even wearing masks from most reports) https://flightaware.com/live/airport/KPBI Here's an example: Passenger describes packed flight full of people not wearing masks from Miami to NYC https://www.foxnews.com/travel/passenger-packed-flight-no-masks-nyc-miami -Public transportation (buses/trains) is open and being offered for free throughout palm beach county...moving people very closely together, all over our county
Lee	General	You people must live in a bubble I work at Home Depot where it's business as usual every day keeping everyone locked down and destroying the economy is not going to stop a virus using common sense,washing your hands,don't touch your eyes,if you are sick stay away from people who aren't. It's a new virus until there's a vaccine or you build your own immunity to it there's really nothing else you can do about it,so stop trying to live everyone else's life and quit destroying the economy.Look at the real numbers unless you test absolutely everyone your numbers don't mean anything but promote fear.use some common sense and let everyone get on with there lives instead of living out your fears

AMERICAN OVERSIGHT

Palm Beach	General	To soon.need to wait till end of may for rest/bars and retail store. Better to be safe than sorry.we were too slow to close and now desantis wants us to open too soon
Volusia	General	Opening too soon ensure a 2and wave of infection. A significant number of people are not going to go out anyway a d this will only cause more lower income people to risk their lives to keep their jobs.
Volusia	General	Open beaches except sunbathing and limit groups to less than 10. Open parks but limit groups to 10. Open businesses where distancing can be accommodated. Open churches where distancing and limited numbers can work and wear masks. We seniors and comprised individuals need to be responsible for guidelines, especially masks, sanitizing and hand washing.
Leon	Tourism	Open the gyms up now. How can we keep healthy if we are isolated from the very things that can make us healthier. Also, the economy is in a tailspin. We all need our jobs. Open Florida now. The elderly and people with medical conditions should self isolate. Don't hurt the rest of us that want to live life.
Pinellas	Government	It is way too early to 'reopen' Florida. The number of infected has not even peaked yet. You reopen Florida now (too early) and we will NEVER get past this pandemic!
Hillsborough	Professional Services	Please re open small business such as hair salons.. these folks depend on clients to make money... also beaches... even though it would be nice to get some sun, we do need social distance. Also.. need sports back in tampa.. the bucs and the rays and lightening will lift everyone spirits
Brevard	Government	I work for a City as their finance director. I find all of this to be very scary and hard to navigate. How long with this continue? We will be able to survive? What will we do when the money is gone? My personal take on this is Florida has done amazing well through all of this. I think opening things back up a little at a time is the right thing to do. Open restaurants back to 50% of their capacity see how that goes and then 75% and so forth. Hotels should be able to accommodate the same. The bigger challenges are Disney, universal, sea world etc. these theme parks are the root of Florida economy. We have to find a way to maybe just start with Florida residents and gradually allow states who have been able to open themselves, there is no easy solution, but I truly think Floridians are willing to be respectful to the rules, a little flexibility to show that, just like what Brevard did with the beaches is what is needed. I know you all will make the right decisions.
Escambia	General	Re open Escambia County
Osceola	General	I truly understand the hardship everyone is going though BUT they are also forgetting about the elderly, our parents, our grandparents, or even myself being 65 and diagnosed last year with cancer, my Mother is in a Rehab center and so far, no one has had the virus. Which doesn't tell me that the virus is getting better, No, its saying the nurses and staff there is working very hard to protect them. So why doesn't the rest of the state and do the same. You have theme parks willing to remain close until all looks better, I personally feel we are jumping back too soon. Please think about the elderly (which this state has many) I dont want to see us (Florida) become New York.
Lee	General	Do not call me I hate these surveys and I get no money for my time

AMERICAN OVERSIGHT

Seminole	General	I think that businesses should be smart about reopening for example restaurant should limit their seating a retail stores should require customers to use face masks and that would also apply to supermarkets and any other businesses that supply customers with goods and services.
Broward	General	I do not think our state should re-open until the medical officials agree it is safe to do so. I work in the legal field and am required to go to work. Please do not expose us.
Indian River	General	Regarding opening Florida back up: Need more tests: until everyone is tested who wants to be tested and those results are accurately reported to the public will we feel safe to return to normal activities. We have self-isolated since March 14th and we will continue to do so until we have an accurate picture of what Floridian health looks like. Your job is to keep us safe. Not to keep us wealthy. Do your job. Thank you!
Palm Beach	General	We need to start letting more people go back to work in a way that allows vulnerable to stay home, but rest of people work in responsible ways. We need to build up herd immunity as well. If this comes back before a vaccine and we don't have herd immunity, what are we going to do, shut down again? Also, please let FL residents use beaches again, could even do on a rotating basis based on last name to avoid too many crowds. We also need to have a way to get churches open again. Thanks I think the governor is doing a good job and didn't go overboard with closures. One other thing would be to not hold business liabile if someone gets infected there as long as business is following ID guidelines.
Brevard	Food	I really think this whole thing has been grossly mishandled from the beginning. Let's open everything up and get it over with, you can't hide from it and make it go away. People need to deal with it. If folks want to stay in their house, walk around with a mask on and live in constant fear of catching an illness that if you contract may be no worse than a bad cold then so be it. I want to get on with my life. The suffering that is going on is worse than the illness. I'm 65 and not afraid. The government has done a terrible disservice to its citizens by destroying the economy, and denying so many of so much that for a lot of people they will never recover from. Let's end this sooner than later and stop debating it so much. As a famous American once said, "Let's Roll", thank you.

AMERICAN OVERSIGHT

Miami-Dade	Finance	Mr. DeSantis: Congrats on doing a fine job. The " Stay home/Stay inside" campaign is still needed. Closing the schools and districts for the remainder of the school year was well done. I believe the state should consider waiting until June 1 to ' re-open'. I do agree with the curfew, the limited hours for shopping and other essential locations for shopping. However, I do not see the need for beaches, park and golf courses to open for now. Please lets wait and ride it out through May for the reopening. This will flatten the curve even more and eliminate any more infections or deaths in the state. Thank you, Renato Rivadeneira
Orange	Retail	Please open all businesses Immediately, with restrictions of course!
Polk	General	We should not be in a hurry to open up Florida or the US for the economy and just ignore the heightened danger it puts everyone in. Even with the stay at home orders the virus is thriving, so without them we will do worse. It's easy to talk when it's not you or your loved one dying. Sure, my immune system might be strong enough to avoid or fight off the virus, but my sister's isn't as strong and I don't need impatient and ignorant people putting her at higher risk. We need to look out for each other! The results to our economy & strength as a nation are going to be catastrophically worse when more people get sick and die. The economy won't help us survive the virus when we get infected and spread it to other's faster just because Karen over there wants to go and get her hair done and eat out at a restaurant. Yes, the country is crumbling right now, but let's not make it worse with impatience and lack of sense!
Orange	Tourism	As a former employee in Florida's hospitality market I believe it is important we begin to phase open Florida. I hope that the state will not continue the stay at home order so that things my begin to return to normal. I understand that it is imperative to maintain public health and trust, but how much longer can we punish our service industry employees. I do believe mainstream media has began to poll a small targeted group of Floridians to create a poll showing 70% would prefer the order stay in place. I have found this to be bias and not truly based on the truth. Our neighboring states have began what is sure to be a long and exhausting process to our new normal and I only pray Florida will start to work towards its new normal in May. As a tourism hub with a broken unemployment system we can no longer make our middle class pay the toll of an economic shut down. I am asking you all to please look beyond your political parties and start to phase open the great state of Florida. God Bless.

AMERICAN OVERSIGHT

Orange	General	Please don't let Florida be on the wrong side of history (again) because of pride or personal gain. Politicians and elected officials #1 job is to serve the public not their own personal interests or aspirations. Afraid of being unpopular? You're elected to do the right thing and sometimes that's not popular. Do you think kids like being grounded by their parents when they mess up? Do you think parents like punishing their kids? Fuck popularity. I urge the state government officials to look at the data and research from actual economists. It all supports the idea that a longer quarantine to minimize deaths will ultimately benefit the economy long term. Some notable quotes in case no one reads them: "Importantly, a new study of the 1918 influenza pandemic finds that in the 43 US cities studied, those that imposed restrictions on social interactions earlier and retained them longer experienced a stronger subsequent recovery18. Hence, the authors reject the idea of a trade-off between strict public-health measures and economic damage." "His initial modeling efforts showed that even a yearlong lockdown makes economic sense, to allow time for a vaccine to be developed. The pause would shrink the economy by approximately 22%—a cost of $4.2 trillion. By comparison, the model shows that without containment measures, the economy would contract by about 7% over that year—but as many as 500,000 additional lives would be lost, which translates into a loss of roughly $6.1 trillion." Also deaths are only a part of the issue with COVID-19. What about the side effects for people who survive? How it will affect childhood development? NO ONE KNOWS. That should scare you. https://www.sciencemag.org/news/2020/03/modelers-weigh-value-lives-and-lockdown-costs-put-price-covid-19 https://www.nature.com/articles/s41591-020-0863-y
Duval	General	Reopen retail stores. Limit the amount of customers in stores by how much square footage there is, if that's what needs to be done. The problem with making people wait outside is they are standing closer together than if they were shopping. How about quarantining the sick and let the healthy go back to work. Open the beaches all day instead of having people crowd them for a few hours. Stop the mayor's from threatening to close down again, we are a republic a free country we should should not be threatened with closures.
Miami-Dade	General	We are living in troubled waters. I'm live in miami this is an or was an international spot and national. Anybody around you can be infected. This has to be very very slow. Open outdoors some? Wait a couple weeks maybe restaurant with new procedures some salons barber new procedures. Stores like Ross Marshall that have entrance from parking lot and monitored. Ikea. NO INDOOR MALLS. and maybe to see family. People will still be hesitant but could be a start. And these flights coming in from Cuba. Not good.

AMERICAN OVERSIGHT

Duval	General	I believe it is important to wait, don't rush, to open Florida. Once it is open people will flock here from other States that will carry the virus to the citizens in Florida. I am 69 years old with heart disease, diabetes and high blood pressure and don't want to have contact with virus carriers. Just because they want a hot and a beer at a restaurant isn't worth me getting sick. Please don't rush give it to the end of June to quite down some.
Volusia	Recreation	I do not want you to re-open Florida until it's clear that more lives will not be lost by doing so. And this is from someone who's company business is teaching ballroom dance classes, so we will not make any money until we're allowed to reopen. But I stand by the decision to stay closed for a while longer until it looks safer. Even President Trump is saying he thinks states should stay closed a while longer based on Fauci, Birx and the CDC recommendations. Please don't open for the sake of the economy. We will rally and recover. We're Americans. It's what we do.
Alachua	Government	If there are certain professions who have adapted to a work from home method such as case workers or others in the healthcare field the smartest thing would be to let them continue until a cure has been found or numbers drop drastically, recreational and tourist sites could be opened slowly and with restriction. To open Disney add onto the website a Covid-19 agreement. For restaurant, have a max capacity and adhere to the CDC guidelines until this is over. Lower the maximum capacity for bars and nightclubs that will make the nightclubs altogether more “exclusive” and will drive up the economy for other people’s FOMO. Since a second wave is likely it does not make sense to pull the professionals that have adapted to working from home back into an environment that they will most likely be placed back in.
Polk	General	It is too early to re-open the state of Florida! The virus is still spreading and will spread like wildfire if we re-open too soon. At this point the end of May looks much better than now. It could always be re-evaluated on 5/15 if appropriate. Please think about the health of the people of Florida. If many people lose their lives as a result of acting too soon, that will also not be good for the economy or people’s thoughts on your leadership.
Duval	Recreation	Gyms and Fitness Centers are important to many, more importantly to senior citizens. Stretching and walking is good, but to many, the equipment are essential for rehabilitation and to maintain health.
Volusia	Administrative	In small towns I do not see a reason you could not open back up. The town did not listen to stay safe at home order anyway. Walmart and target and other stores stayed the same people wise and not many have mask or gloves. So I say open the small towns. They never really closed down anyway.
Brevard	General	Please get the Floridans their unemployment and maybe they will stay home and stay safe . Please don’t regret opening Florida and killing more and more people . The only reason numbers may seem low to you is because the stay at home but in my option it’s high for being home .
Osceola	General	The usual political suspects on this task force will not decide what's right for me and my well being. I will base my decision to frequent a beach, patronize a restaurant, or any other non essential establishment on what the medical professionals have to say.

AMERICAN OVERSIGHT

Palm Beach	General	Please begin reopening Florida and returning people to work. Our residents are able to understand and implement social distancing at home, at work and at play. Encourage restaurants to open outside facilities for eating. Immediately open parks and beaches. Encourage relevant businesses to open and allow as many workers to work remotely as possible. Open restaurants with the requirement to manage social distancing. Make sure that the citizens know that we have flattened the curve and now it is time to get on with our lives. Life has risk. Each citizen is responsible for their behavior and for taking care around others. (Look at the way Sweden has respected Covid and still allowed life.) The impact of destroying society and careers is so much larger than risk management of Covid. Be strong and aware. Florida should be leading the way back to risk management and the pursuit of happiness!
Lake	General	Opening Florida and risking more tourists with the covid19 virus and a second wave to hit Florida, a lot of high risk and elderly people retire to Florida and they don't deserve to be put at risk. My mother is also elderly and high risk. Reopening Florida will not make us feel as safe as we all do right now.
Leon	Finance	Open the gyms up now. How can we keep healthy if we are isolated from the very things that can make us healthier. Also, the economy is in a tailspin. We all need our jobs. Open Florida now. The elderly and people with medical conditions should self isolate. Don't hurt the rest of us that want to live life.
Broward	Recreation	I think that South Florida should consider reopening all outdoor areas where social distancing can still continue for example beachs and parks. We should still make sure there are no gatherings of more than 10 people and good hygiene is adhered to.
Orange	Utilities	There is a need for people to get back to work, but there is significant risk due to the existing # of cases due to cases known and unknown since there is a shortage in testing. The approach should be highly communicated guidelines for citizens to follow where the government provides guidance and leadership for best practices. lowest risk businesses where contact can be avoided could be opened first. It should be a concerted push to have people continue to work from home where possible. Additionally, the government should do everything it can to provide PPE to residents to reduce the spread. Masks and gloves should be mandatory in public and that is not being taken seriously in the community. There is still significant concern and fear that re-opening will cause a jump in cases since the case # is still high and testing is limited To 250 test/day at most testing locations.
St. Lucie	General	Reopening without testing is like moving forward blind. You will just keep endangering all of us with your policies that favor business. Deaths and illness will definitely increase and you will be responsible. Democrats and Republicans alike will remember you in November. You need to test for antibodies and let those people return to work.
Volusia	Government	Please DO NOT reopen the state yet!! I wouldn't feel safe. We need more testing capabilities and more days of lower number of cases. I'm 64 years old and I'm not ready to die!

AMERICAN OVERSIGHT

Marion	Construction	Would like the state to open. My son who is a jr. partner in a construction company applied for, but never received, payroll protection money, nor unemployment money. People that owe for previous jobs they completed are not paying them. He has been working for free for weeks and has to pay child care on top of that. That is not sustainable, obviously.
Brevard	General	Listen to the virologists. They should head every single re-opening committee. Fix the unemployment system and get people back-pay immediately. Ensure people will get sick pay, especially hourly service workers! When they are forced to some to work sick because they need $, they spread germs to all of us. This should be a permanent thing. State budgets will become tight. Remember, schools are a primary vector and they will need more, not less, funding to keep us all safe. WWE and horse racing are not essential and should have been some of the last things to open. WTF is wrong with our state? It's so obvious we've been sold to the highest bidder.
Seminole	General	Due to the pandemic I will keep the same hours of operation of the businesses that are opened for 60 more days and re open certain health care like dentist and optometrists in a limited hours a day with no more than ten people at a time in offices. For restaurants to keep enforcing drive thru and enforce help to the restaurant to facilitate delivery options partnering with door dash and Uber eats without elevating prices on service. If restaurants and other businesses can keep a six feet separation between tables and have a slow check in and use have the capacity of the building at all times that could be useful and could re open like this for 60 days. Malls and amusement parks closed for next 45 days and then slowly re open with limited hours and enforcing face mask and having hand sanitizer at counters and dressing rooms etc. Send easy testing kits home so everyone could be tested free of charge and prolong unemployment time for those who even called to work can only work with very reduced hours. Revise in 45 days after 4/30 the plan and how it has helped in the fight of the pandemic and adjust. Scrutinize flights , no full capacity on flights for 60 days and face masks at flight. Temp check and clients must have a hot beverage while in the aircraft when they take masks of to eat. Airlines can send a mandatory disclosure for clients to have a test done within a week of getting in the flight. Promote telehealth and help healthcare providers to pass bill for optometrist and dentist etc to allow to do certain test with a tech and the se remotely is able to access different patients without them being at the office. Hope this help to enlighten you with some ideas. Thanks for including the people to get ideas to help us all. God bless.

AMERICAN OVERSIGHT

Palm Beach	General	First and foremost I feel unless you're planning on opening the theme parks that help boost the tourism in the state to help recover from this then they should do a very slow opening of Fl. The numbers are still rising and I feel that they are more worried about testing and seeing which states have the most testing etc. I think they need to open the theme parks and beaches for Fl residents for now and not allowed anyone to come into Fl from another state until the numbers come down from the curve. I would say another month and allow non essential workers to start back at work within Fl even if it's PT so that people can start working again. Do a slow opening please, for the sake of Floridians. Thank you.
Lake	General	Please allow everything to reopen on their own terms. We need to get business running again and please order all beaches to open.
Hillsborough	General	Thank you for all you are doing for the citizens of Florida! We appreciate you! Since scientific studies are now coming out to say the original data for the lock downs were wrong and that this virus is on par for a normal flu season I am asking that we open everything back up. Let's follow Sweden's approach where if you are vulnerable stay inside but the rest of the population continue life as normal. Sweden will now have herd immunity. Let's have our constitutional freedoms restored and get back to work and life!
Hillsborough	Education	I understand that the cost of attendance is an SUS performance metric, but the student health fee has not been raised in close to a decade. Enrollment has grown and need for services has surged since the last increase was approved for any school. Given this pandemic has only antagonized students' stressors and need for health education, please consider allowing SUS schools to increase the student health fee next year.
Seminole	General	We should open up as soon as possible. I understand the dangers to physical safety but I don't think we're considering the dangers to psychological safety. Even if it is in a graduated process we need to open the economy and let people get back out as soon as we can.

AMERICAN OVERSIGHT

Palm Beach	Government	Stop The Panic & End The Lock-downs Fact 1: The overwhelming majority of people do not have any significant risk of dying from COVID-19 The recent Stanford University antibody study now estimates that the fatality rate if infected is likely 0.1 to 0.2 percent, a risk far lower than previous World Health Organization estimates that were 20 to 30 times higher and that motivated isolation policies. In New York City, an epicenter of the pandemic with more than one-third of all U.S. deaths, the rate of death for people 18 to 45 years old is 0.01 percent, or 11 per 100,000 in the population. On the other hand, people aged 75 and over have a death rate 80 times that. For people under 18 years old, the rate of death is zero per 100,000. Of all fatal cases in New York state, two-thirds were in patients over 70 years of age; more than 95 percent were over 50 years of age; and about 90 percent of all fatal cases had an underlying illness. Of 6,570 confirmed COVID-19 deaths fully investigated for underlying conditions to date, 6,520, or 99.2 percent, had an underlying illness. Fact 2: Protecting older, at-risk people eliminates hospital overcrowding We can learn about hospital utilization from data from New York City, the hotbed of COVID-19 with more than 34,600 hospitalizations to date. For those under 18 years of age, hospitalization from the virus is 0.01 percent per 100,000 people; for those 18 to 44 years old, hospitalization is 0.1 percent per 100,000. Even for people ages 65 to 74, only 1.7 percent were hospitalized. Of 4,103 confirmed COVID-19 patients with symptoms bad enough to seek medical care. Fact 3: Vital population immunity is prevented by total isolation policies, prolonging the problem We know from decades of medical science that infection itself
Volusia	General	Time to get this economy up and running. Many of our businesses will never recover if we don't open up now. Those citizens at risk should continue to quarantine. Essential businesses should continue to have "at risk" shopping times.
Martin	Recreation	I would like to see Jonathan Dickinson State Park re-opened.
Brevard	General	Think it is too early to start reopening businesses. It is because of the few, who could be contagious, who will go about like it was business as usual. I can envision fights breaking out because someone is not being civil-19 safe and is called out on it. I know it is a shame but that few will make the headlines and called out the politicians, who are doing their best.
Seminole	General	Please do not reopen Fl yet! The only reason we have low numbers in Seminole County is because we are staying at home. Opening will cause peopl to get sick and spread this. If you do open require everyone to wear masks and continue social distancing. Only open things that need to be open!! Make business do delivery, curbside business only!!!!!! Don't make this an worse for people. They should not have to choice a paycheck over their health!!!

AMERICAN OVERSIGHT

Duval	General	Hello I know at some point we have to start living again, and the economy need to improve. Honestly trying to open up in May or June in my opinion is not a good idea. Before we even consider opening up again. We need to focus more on lowering the number of case. It very sad to know if we open up, and get sick there is no cure. Rushing is not a good idea... let's shift I focus to decreasing the # and continue social distance. Maybe after 3 consecutive months, if the # has drastically reduced then we should consider. But opening up in May with the current # is not a great idea. Thanks
Brevard	General	The health and welfare of Floridians, especially the vulnerableNeed to take precedence over tourism and opening our economy back up.By opening too soon we will surely see a dramatic spike in our Covid cases which will only push us back further. If reelection is what is driving our governor's decisions he should take his cues from governors around our country that are putting their citizens welfare first.
Hillsborough	Administrative	The number of cases is still rising in Florida. State should not reopen until this changes.
Flagler	Retail	We need to reopen our economy, start sending the workforce back out in sections, 20% then 30% etc....bring our country back to profits and away from this mess.
Hernando	General	You started your term doing wonders for Florida.this virus debacle shows me you were not prepared to handle the job. You will be a one term governor
Volusia	General	I personally believe we should not open back up to the general public. In fact, i believe we should become a bit more strict on us the residents. The reason is because we do not know enough information on the virus Covid-19 and we are just putting the general public in harms way. We do not need a repeat of New York or even the country Italy. We do not have enough hospital beds in the state to deal with a mass breakout again. Our hospital staff does not have enough resources to take care of themselves let alone patients. If you open the state back up, are you going to give the thousands of laid off workers their jobs back with match pay? If you open the state back up for the rest of the year any visit to the doctors or the hospital in regards to becoming sick the cost should be waved because future deaths and illnesses are on you.
Brevard	General	I believe we should try to open the small business, but do it in a smart way. I believe President Trump is doing good and the right thing. We could continue to wear face mask, and as a previous nurse before my back surgery, keep our hands washed and cleaned. The standard is for proper handwashing is You can use hand sanitizer 3 times and then wash your hands with warm water and soap. Do not touch the faucet with clean hands use a paper towel to dry and turn off the faucet. And pray to God for our health and well being.

AMERICAN OVERSIGHT

Brevard	Education	I think we should stay closed longer. I understand business are hurting and ppl need money but if the state fixed the unemployment issue ppl would be more willing to stay home a bit longer. Let's keep our ppl safe. I am a high risk person and my mom is 70 yrs old and is being required to go back to work and I think we need to stay closed longer.
Orange	Information	I do not think it is a good idea to reopen the state at this time. It's too dangerous and there are people who are still walking around who have symptoms and aren't saying anything or are asymptomatic and don't know they have it. If the schools are remaining closed, I think the rest of the state should too. There hasn't been enough research or timing to effectively treat the virus and plenty more people will die if they get sick. Be Smart Florida! Don't open.
Duval	General	Hello I know at some point we have to start living again, and the economy need to improve. Honestly trying to open up in May or June in my opinion is not a good idea. Before we even consider opening up again. We need to focus more on lowering the number of case. It very sad to know if we open up, and get sick there is no cure. Rushing is not a good idea... let's shift I focus to decreasing the # and continue social distance. Maybe after 3 consecutive months, if the # has drastically reduced then we should consider. But opening up in May with the current # is not a great idea. Thanks
Orange	General	Our cases continue to rise in Orange County and Florida hasn't hit their peak. There is so much unknown about this virus and we should wait until more is known. More testing is needed so we have data to base decisions on. Thank you keeping schools closed. We all need to patient and save lives! Thanks, Lisa
Martin	General	Open Gyms and Restaurants in a phased approach. 50 % capacity as an example. We are already visiting Target, Home Depot, CVS, Publix and they are quite busy. Open Beaches for walking and running Open retail. Keep masks optional
Leon	Professional Services	Open the gyms up now. How can we keep healthy if we are isolated from the very things that can make us healthier. Also, the economy is in a tailspin. We all need our jobs. Open Florida now. The elderly and people with medical conditions should self isolate. Don't hurt the rest of us that want to live life.

AMERICAN OVERSIGHT

Leon	General	Thank you for allowing the general public to make comments on Re-Opening FL. 1. Is there any way to make wearing masks mandatory when going out in public. I made a brief trip to Publix two days ago and was amazed at the people that were just going about their business...no mask or face covering of any kind. 2. Specific and consistent rules on opening beauty salons, nail shops and barbershops. 3. Consideration of opening hospitals to elective surgeries and procedures. 4. Last but not least, PLEASE do not lift the stay a home order until it has been determined 100% that 14 days have passed without ANY new cases identified in every county...not just the hot spots. Thank you and kudos to all of for what you are doing to help get Florida back up and running during these unprecedented times. Susan Spencer Powers
Hernando	General	The increasing evidence of larger numbers of positive serology tests suggests that our population is likely to have a broader immunity than previously thought. Waiting indefinitely for a low mortality, high recovery rate pathogen to decline even further while destroying our economy is irresponsible at this point. Floridians must be given the green light to reopen our economy and prevent an assured collapse of our socioeconomic structure. The virus is not as big a threat as was first hypothesized, its time to adjust our plan accordingly as soon as possible. Let's get back to WORK!
Brevard	Healthcare	I am concerned about opening to soon without strict conditions such as wearing maks and gloves. I would suggest that we extend stay at home orders until May 15th. It seems that we are making progress and i am concered that opening too early may undermine that progress. Sally Ball
Marion	Transportation	Do not open non essential international travel until the end of June or when we are on phase 4. Anyone who travels international should stay 14days in quarantine. At least till we are sure everything is under control international. We should not only look were the plane is coming from since a lot of people in South America, and Europe use connecting planes and it is important to see where they have been staying prior to come to the USA This also apply to Legal residents
Brevard	General	No, I don't want to die with Coronavirus
Clay	Government	We have not even tested enough. My county just got test areas and doctors are not giving anyone script to get the test .nothing is really closed except inside of restaurants. , hair and nail salon. Every thing else is open. Has Florida met its testing to open? On Monday there is a restaurant saying they are open .how is that I thought They had to go through all the steps to hold them and now they can just open my town has just started with this virus and it's a shame that all these places that are going to have gatherings will open

AMERICAN OVERSIGHT

Brevard	Healthcare	I am writing to you today because I am concerned for my personal safety at work, and for the safety of the patient's that I care for. I am a licensed Dental Hygienist in the State of Florida. As you know, dental office are planning to open soon. I understand that dentists, as business owners, are eager to reopen as they are concerned about finances. However, resuming elective dental services at this time puts the health of their staff and patient's at risk. Personal Protective Equipment (PPE) is still in short supply, and some dentists are expecting their hygienists to work without proper PPE and new infection control training. Dental Hygienists have the highest risk of contracting the coronavirus of any occupation due to the unique nature of our work. We work in very close proximity to the patient, and utilize dental instruments which create aerosols. These aerosols can suspend the virus in the air for hours, potentially infecting us, the rest of the dental team and our patients. It is virtually impossible to have your teeth cleaned without generating aerosols. The aerosols created by Patient A at 8:00 are still lingering in the air and dropping down on surfaces on Patient B at 9:00 and Patient C at 10:00. It is estimated that 50% of people actively shedding the coronavirus are asymptotic. Without the ability to test, we must assume that everyone is infectious (Universal Precautions). The Center for Disease Control, CDC, recommends that dental facilities postpone elective procedures, surgeries and non-urgent dental treatment until further notice. I urge you to enforce the CDC recommendations to postpone dental hygiene services at this time, and mandate resuming elective dental services As you consider next steps in reopening businesses, I hope you understand the unique risks to dental hygiene professionals. I ask you to make decisions that will ensure the safety of dental hygienists, their families and the patients they serve.
Sumter	General	Offer suggestions and outline how to stay safe ie hand washing, masks and social distancing but open everything . As an elder I know that I must still be cautious. Let others know that it is at there own risk. Schools assure parents that schools will be cleansed nightly. as well as school buses. Push sentiment that everyone is responsible. .
Hernando	Food	We need more testing. Open up restaurants for dine in is going to be disastrous if we don’t know if someone is a carrier or not. You can’t keep a safe distance I. The restaurant business with staff. It’s impossible.
Pinellas	General	Florida is not ready to reopen. If you open up to soon you will cause a set back that will cause more deaths. As Bill Gates mentioned in an article you need at least 10 more weeks before considering opening back up. There is no vaccine in place to help patients out if they get sick, so therefore, there is no solution to the problem. You will be putting everyone in harm's way and only thinking about yourself & not the people who will have to go out into this pandemic. Totally unfair and uncalled for. You need to wait until a medical staffer tell you otherwise to do so, but don't just do it on your own just because you want businesses to open back up and make money. You can't make money if you are dead.

AMERICAN OVERSIGHT

Pasco	General	Do NOT “re open” the state until Florida has the necessary testing to make sure all Floridians get tested, and enough resources for hospitals, free clinics etc... for when people do get sick. Make sure the unemployment website is FUNCTIONAL Hold those responsible accountable for the unemployment shit show, we look horrible compared to other states, time to stop being the state that the whole country expects to always mess up
Brevard	Healthcare	I work in the healthcare field in FL. I have not lost my job but my hours were decrease due to the pandemic. I have a compromised immune system so for me I am ok with staying home to help slow the spread. Even if it means I have to struggle to pay bills, I’d rather be asked to stay home and not open our practice to full working order. I feel that especially in FL we have many i high risk people. I understand that if you want to stay home you can. But if we RE OPEN FL staying home is not an option my employer will give me or anyone else who falls in the high risk category. I’d rather be asked to stay home a few more weeks or months.
Pinellas	Healthcare	I am concerned that insufficient testing capabilities may lead to more spread of COVID19. Additional how can we enforce quarantine of travelers from national & international hot zones? We need a well thought out plan based on good public health policy not just to reopen the economy, but for long term sustainability.

AMERICAN OVERSIGHT

Lake	Government	In my opinion, I believe Florida's economy could be opened effectively. Since a majority of Florida's economy is based off tourism it is very important to try and open these types of industries. But, I also believe that people will not travel unless they feel safe. For this I believe it is imperative for Disney and Universal, the two main tourist attractions, to open and have people feel safe. Perhaps for this masks would be a requirement for people to enter and rides that would be hindered by people wearing masks would just not operate for the time being. But, at least certain aspects of the parks can reopen and stimulate the economy. I know temperature checking is also a big thing but if people are asymptomatic then the temperatures are irrelevant. But, perhaps implementing a temperature checking station would make people feel more safe. I think for beaches we could practice social distancing and be able to open them up. For the most part people do usually give each other space at the beach and are usually at least 6 feet apart. The other huge thing would be for international flights to begin flying into Florida again for tourism reasons. This would be a coordinated effort between the federal government and other countries. But, another part of that is people feeling safe in order to travel and perhaps the mask requirement would be beneficial here also. Perhaps airlines could give out masks, if people don't have one, and make it a requirement while being on a flight to have it on. Temperature checks prior to boarding aircraft may also be beneficial. Overall, I believe that Florida can begin to reopen safely and effectively. The key point is to make people feel safe in order for these people want to travel and boost our tourism and bring our economy back up. Perhaps Florida will have to be an exception to the rule and make masks a requirement and make people feel safe. I do believe we will have a good rebound as people have been quarantining for weeks and will want to go out on a vacation with their families, especially when kids get out of school. It will just take people to feel "safe" to want to go to these places for vacations.
Palm Beach	General	Please open the beaches and outdoor activities, people need to be responsible to stay in smaller groups but also need fresh air and piece of mind, it makes no sense to keep tennis courts, golf courses closed, these or 1-4 people and encourage exercise and fresh air. We have had a major increase in domestic violence and people need to get out of the house and feel like they can breath. I honestly do not see how restaurants can survive at 30% capacity. They will loose their businesses which will have detrimental long term affects. season is over and they already lost that.

AMERICAN OVERSIGHT

Osceola	Accommodation	Please keep Florida closed for 30 more days! As we are slowly seeing that staying at home is in fact working, we should be kept on a stay-at-home order for another 30 days to insure success in flattening the curve. As of now, if people are told they may resume even just some normal activities, you will have a large number of residents not following precautions and the number of cases will begin to rise again. This could land us back in the same position in 3/4 weeks and the stay-at-home could need to be implemented again. For the sake of everyone who is at-risk, who is pregnant and would like for some of their pregnancies later this summer to seem somewhat normal, and everyone's general health and safety, please keep the state locked down for longer!
Lake	Technology	What do you think about S. Korea's tracking methods? We have the amber alert system, can that be used in a similar fashion OR a smart phone application.
Palm Beach	Food	In regards to testing... if we are not testing the same number of people each day then there is no true way to say that we are still having an increase. We should not be using case numbers but percentage of positive cases. If we test 10,000 people one day and 1,000 or 10% are positive and then the next day we test 20,000 and 1,500 are positive we had an increase of 500 cases but the percentage of positive cases actually went down to 7.5%. Why are we counting individual cases? As long as we continue to ramp up testing we will never have 14 days of downward numbers any time soon. We should have ALWAYS from the beginning been using a percentage
Orange	Healthcare	Mandatory face masks in public please. Dr Stefan
Duval	General	Please Open up the State and let us get back to work. It's contained as much as possible and can be monitored as needed. Most of the citizens of the state NEED to get back to work. Thank you, you're doing a great job.
Pasco	General	Reopen with good sanitary practices. Sick stay home. Open places with restrictions for May and then reopen fully in June. Gives places a month to practice good sanitary practices that will help in the long run especially when this comes back around.
Sumter	Recreation	Outdoor activities...Pickleball, Tennis, Shuffleboard are essential for our health. Our Pools need to be opened for Exercise purposes. The Villages knows how to handle Flu Seasons & Viruses like this one. We're basically untouched and want our Community Opened.

AMERICAN OVERSIGHT

Hillsborough	General	I think opening things like salons, bowling alleys, etc with close contact should be left till final phase. I think starting with some restaurants which are large enough for tables to be 6 feet apart . Parks for hiking and biking, canoes but not the playgrounds yet should be part of phase one. Beaches are a maybe because I know people will flock to Clearwater and Anna Maria . I also manage AirBnB as a part time gig. Our AirBnB are disinfected after each stay. We even was offering extra cleaner , Lysol, even changed the AC filters. I know there's some bad apples out there but I think an AirBnB ran properly is more safe then a hotel right now. I think they should be able to open with possible restrictions on where the travelers come from. I manage a school cafeteria on a daily bases.. I went through the norovirus 2 years ago. It only takes 1 or 2 students to infect over half the school. So be very careful on opening schools in August. I think unfortunately theme parks may need to stay closed longer. Our borders to the state still need to be monitored longer.from hard hit states. Florida has allot of senior citizens and we need to consider that fact. My mom has an auto immune disease. I have visited her the last 2 months from outside her home. I have a new grandson I haven't seen since he left the hospital because I still work outside the home feeding kids. I know it's bad for the state and the people but please consider how large we are and that the wrong move can damage us more.with a relapse. We also need the special dr's to try and reopen with distancing regulations. Dentist, optical etc. I know I need new glasses badly and some people have been dealing with tooth pain and things because the offices are closed or only open for extreme emergencies. Make it easier for Floridians to get the updated flu shot when it's available. The ones that don't have insurance . Allot of people have not only lost jobs but benefits so if a vaccine comes available for the civid 19 they can get that also.
Palm Beach	Recreation	The golf courses are closed in palm beach this has a very impact on both my kids who play gold they are 9 and 13. My girls live for golf but can not and even been told we can be fined if they even practice this is big issue because my oldest daughter Emma can't take lesson or get. She has a lot potential. If the shutdowns doesn't continue she will most likely not practice enough and get left behind by other girls in other states and counties who can and are practicing. This will have a direct effect on here ability to earn a scholarship in the future as she is at the age where if she doesn't play she will not reach her potential. There is no need to shut down private golf facilities where she could be walking and playing. As it stands now older residents are having large groups walk and even block parties. All of this more risk then swinging a club.

AMERICAN OVERSIGHT

Palm Beach	General	I have lived in Palm Beach County most of all my life and been in business most of my life too. First lived in the 70"s in Belle Glade, Florida than moved to Palm Beach in the 80"s. I see the Coronavirus has been affecting more south Florida the Tricounty areas Dade, Broward and Palm Beach more than any other cities in Florida. I see more New Cases and Deaths each day on the rise for the Tricounty areas in south Florida. I see Palm Beach County was one of the last to began Testing compare to the other cities in Florida that started immediately. Than Belle Glade recently open a Testing site and Belle Glade is 60% African American and they are saying that African American is affected more for the Coronavirus (Why was Palm Beach County left for last) plus we have a real high amount of elderly living in Palm Beach County. If the Governor plans to Reopen after the Peak reaches May 07 he should consider the Northern parts and Western parts of Florida first that does not have that many cases and deaths. But the Tricounty areas Dade, Broward and Palm Beach should be LAST to Reopen when the Cases and Death are down for 14 days. Thanks for my opinion and stay safe!
Brevard	General	I self isolated in mid January. Why? Nobody else did. This virus will never end. Open things back up.
Marion	Recreation	I believe that we should start opening back up, using safe guards of course. If the beaches can open back up then I think businesses should be allowed to open also.
Hillsborough	Information	Please do not open until we get a 14 day no new cases
Volusia	Retail	Being in the retail environment for over 23 years i would suggest not opening on the 1st i believe we need a few more weeks to get thru some obstacles as a state to ensure the proper measures to make sure safety is the #1 priority.
Duval	General	Open everything back up and let people decide if they want to go out or stay in. You know, a a little concept called freedom.
Indian River	Tourism	Open up the beaches (for sunbathing), pools and theme parks. America needs this; Florida's heat & humidity will stunt the spread of the virus. Keep up the sanitizing efforts and hand sanitizer stations. Theme parks, airports and cruise ships should look into adding UV-C lighting to inside areas.
Pinellas	Healthcare	Mr. DeSantis- be smart. We have a very delicate population here. Do not rush to open theme parks, restaurants and hotels, when we don't know how it will effect our vulnerable seniors. This could overwhelm our healthcare system and move is backwards. Please require everyone to wear masks in public. At least that will help. Make sure they are following social distancing guidelines. Be strict. If you want keep your job- help keep voters alive. Prove to us you have the health and safety of Floridians FIRST! Go slow. We will survive the economic shortfall- we will not survive death.
Hernando	Recreation	Please consider reopening the beaches, with appropriate social distancing, for residents to also sit and enjoy the sun & sand. Given the research indicating sunlight * humidity help kill the virus thise of us who can't jog or walk very far would enjoy getting our toes wet too. Thanks!

AMERICAN OVERSIGHT

Brevard	Tourism	I believe that we should start the process, within reason. My concern being tourism and too many people flooding the state once they are free to travel. My husband is an essential worker and I have been home with my 2 children for the entirety of the stay at home order aside from grocery runs. We have managed and struggled at times but I know it is for the betterment of our community and state to wait until we have leveled off more or dropped more significantly. Thank you for seeking the opinions of the public.
Leon	Technology	Open the gyms up now. How can we keep healthy if we are isolated from the very things that can make us healthier. Also, the economy is in a tailspin. We all need our jobs. Open Florida now. The elderly and people with medical conditions should self isolate. Don't hurt the rest of us that want to live life.
Charlotte	General	Please, please do not open businesses, public venues too soon. Charlotte county has had much larger increases in the number of COVID 19 cases in the last few days, which tells us we are not near the end. Everyone has to make sacrifices for the welfare of the people, regardless of hardship, wanting to go places, wanting to be with friends. Please don’t be swayed by the complainers who are “bored” with social distancing or don’t believe the seriousness of the pandemic.
Lee	General	Open up the state and Beaches and gyms. Let people social distance if they want. It’s our choice.
Pasco	General	Have businesses with a personal standing in front of the door handing out disposable gloves to be put on before they inter. That even includes all places of business. If people refuse. They do not go in.
Orange	General	Please don’t re open Florida yet. More people need to be tested before going back to work. Please take health over money. Money is replaceable not lives.
Sarasota	Recreation	Florida has flattened the curve, and we have complete faith that hospitals are not and will not be overcrowded now! We are excited for our apartment to be given the ok to open our gym and pool. I am a substitute teacher, so with schools closings, I obviously have no work now until august. So I need things to open up, so I can apply for a new job! We are confident that it is a safe point to open things up and hospitals are now prepared and will not be overwhelmed!

AMERICAN OVERSIGHT

Sarasota	General	Governor if we stay closed we can pass this thing faster. Money is not more import than the health of humans at risk. If we reopen Florida now with cases still on the rise you will be risking the virus to spread faster than a California wild fire forcing us to shut back down or just let people die. I dont know about you but I wouldn't be able to live knowing that I made the choice to put people at a higher risk of dying. I guarantee you the only reason our case and death numbers are as low as they are is because of the "stay at home" order. All I have been hearing you talk about on your conference calls is we have x amount of hospital beds open which is a very poor way to look at this pandemic. Just remember if it was your kids and family that got sick and didn't have the high intensive care and lack of insurance. How would you feel if one of them died from your decision? I understand people can't pay their bills. However this is why we need a forgiveness bill out there for mortgages, rents etc. and get the people the money that need the money. Who have made an effort to work and pay into the system rather than the people that play the system. Just do the right thing for human health. Thank you Chris Schwartz
Martin	Food	First & foremost thank you Gov DeSantis for taking action against Covid-19 for all Florida Residents!! Also thank you to ALL the local Mayors and City Council members who keep this great State running by making tough decisions that may not please everyone... My personal opinion from what I have seen being out at grocery stores, pharmacy and even the home improvement stores, the residents in my county (Martin) get it.. The majority of folks (I'd say 98%) I have seen give each other space in the stores, wear masks and pretty much playing by the rules. There are of course, some that do not wear masks..I guess that is their choice.. I think it would be a good idea to slow roll out opening of restaurants. If you all remember when all this started the Gov went to 50% capacity of the tables indoor and keep outdoor dining option available. I have no problem with that. Heck even if the server wears a mask that's ok too.. The establishments should have all their employees tested prior to returning to work. I cannot imagine a mother or father have to be home and tell their children...sorry no dinner tonight because they have been out of work and have no $$ for food. Let's give some folks a break and get back to work responsibly & safely. Beauty Salons and barber shops also not just for the regular residents but for our 1st responders. I recently read a post on a local nail & massage salon Facebook page from a ICU Nurse said after working 12 to 14 hour shifts daily and dealing with covid-19, that it would be nice to maybe get a manicure or even a massage to get a little break.. Just my thoughts..again thank you all we love our Great State of Florida!

AMERICAN OVERSIGHT

Sarasota	General	We need to get Florida open and Floridians back to work. Unemployment is a mess and people aren't getting the help they need to stay afloat. The shut down was only meant to slow the spread not stay at home until it's gone. The media has been flooding us with fear and It needs to stop. If you are considered high risk then stay home and protect yourself however you feel comfortable. Wear a mask and gloves when you go out. But don't send the rest of us into a irreversible depression over the fear one group is projecting. Our Dentists, and hospitals need to get back to working normally. It's ridiculous that we can only see a dentist for emergencies. We need normal dental treatments to stay healthy and hindering them from doing their jobs will cause more problems long term. Closing all our public parks, and limiting people's access to the outdoors wasnt a very good move. Not everyone has large back yards to get outside. Open the public parks, people can safely use them. A park has less germs then a grocery store! Treating us like children and stepping on our rights needs to stop. If your uncomfortable with going Away , than be a adult and stay home! A big message thats being sent right now is that certain jobs don't matter. The person who was working two retail jobs to be laid off and called nonessential is heartbreaking. To them their "nonessential" job is essential to paying their rent, buying food, providing for their families. If grocery stores can do extra sanitation to remain open why can't other stores do the same? Not everyone is fortunate enough to have a "essential" job. It's easy to call for longer shut downs, to issue more stay at home orders and close businesses that you don't believe are important if your still bringing in a pay check or if you have lots of money in the bank. But that is not the case for Everyone. Not everyone wants to depend on government money to survive. Let the people who want to work get back to Work! If this goes on for much longer I'm not sure what will be left of our great state.
Hillsborough	Real Estate	Its time to start opening our state! Let people who are afraid, stay home, but stop punishing people who want to work! It has already been shown that the death rate is very low and the media continues to scare people! Open the state!!!
Marion	Retail	Mid May open
Orange	General	To whom it may concern, We should wait out the storm lives are far more precious than our economy.We need to start making everyone pay their fair share of taxes stop giving so many tax breaks to those that dont deserve it. Millionaires an billionaires are my main concern if i had that kind of money i would want to share it with those in need. I am low class pay my taxes and still manage to share what i have why cant the upper class. We need to take care of all our citizens who pay taxes. We need to put more money into medicaid and education. We need to wait for the storm to pass just like with a hurricane.
Broward	Construction	No way we can open
Duval	General	I am concerned about a lot of things. If we are supposed to practice distancing I don't see how massage parlors, tattoo parlors nail and hair parlors can open. Even though it would be nice to get a hair cut. I do hope that Florida doesn't jump in as quick as Georgia in reopening.

AMERICAN OVERSIGHT

Orange	General	We should not open back up due to there could be another spike. For myself i have a health condition that could get effected by the virus. Its only putting more people at risk if we reopen. There is new cases everyday we should go two weeks without any new cases before opening up.
Lee	Recreation	Open the beaches and tourism. Let business open with guidelines.
Alachua	General	I think it is necessary to reopen the state but we need to go about it carefully and gradually. Start with areas that have low case rates but adequate testing, and keep social distancing measures at facilities that are allowed to reopen. And prioritize what facilities should be opened first, for instance, I think restaurants and dining room seating are more important than clubs.
Leon	Agriculture	Open the gyms up now. How can we keep healthy if we are isolated from the very things that can make us healthier. Also, the economy is in a tailspin. We all need our jobs. Open Florida now. The elderly and people with medical conditions should self isolate. Don't hurt the rest of us that want to live life.
Lake	Healthcare	Do not open our state before you have done extensive testing. Area like The Villages, which is a strong republican base, received extensive testing. Lake County, as far as I know, has received no testing site opportunities, unless you have to go to the ER!
Hillsborough	General	I think easing up on the stay at home rule and slowly opening up nonessential businesses starting in May will be wants best. You're starting to have people who are going crazy and will eventually take things into their own hands not caring about if they're arrested or whatever. Giving people hope that stuff will start to reopen, will help with sanity but also with businesses/people who are struggling to make money
Volusia	General	Florida should be very slow to reopen. Since virus is toughest on the older population, and Florida is home to many in that group, it should open slower than most states. The possibility of increased cases due to an early reopening outweighs the benefits of opening.
Lake	Food	I being a bartender don't think it's a good idea to open bars etc. Back up for the fact everyone has been cooped up and the moment its open people are gonna pile in places and its gonna be a virus spreading thing all over again.
Brevard	General	This situation has anxious people more anxious and depressed people more depressed. I do not struggle with mental health problems and I've found myself hopeless on some days. As much as we can start to normalize life again and stop behaving as if we can actually control this virus, will go a long way towards calming nerves and preventing further social and emotional damages. The fact is that people are going to get this virus and , sadly, some won't survive (I'm including myself and my family in these possibilities), but we can't cower from every unknown risk. Yes, we have to move forward with caution and wisdom with what we DO know, but we do have to continue moving. But with re-opening obviously there needs to be a lot of grace with allowing for those who are more susceptible or immunocompromised. Employers will have to still allow for work-from-home and a new "normal" will take some time, but it's beyond time to get that ball rolling!

AMERICAN OVERSIGHT

Orange	Tourism	Please don't open the state until case numbers go down and hit a low plateau! We WILL experience a second wave if this happens, and the government was not even prepared for this first one. You need to protect your citizens!! Keep Stay-at-Home orders until it is actually safe, do not lift them. More people will suffer and die. Then their deaths will be on the government's hands.
Brevard	General	Dear Task Force Members, I want a haircut. I want my teeth cleaned. I want to go out to eat and socialize with my friends. But, I want the health and wellbeing of my fellow Floridians to be prioritized over my individual wants. Florida is not ready for a safe re-opening of non essential businesses and activities. Our population is one of the oldest in the country. Many of our elderly have no close family to assist them during this time. There are also the disabled, the immune-compromised, and homeless populations who are all at much greater risk. It is our responsibility as a community to consider their health and well-being as much as, if not more than, the economic bottom line of our state. We haven't met the criteria outlined in the federal response to safe re-openings. We don't have enough testing and data in place to know where in this outbreak we are. In my opinion, re-opening the state at this time will simply cause an even larger spread of a virus for which we currently have no vaccine and no cure. I urge you to take the difficult and unpopular position of keeping the shelter in place order in effect. In the long-term, it will be the wiser move. Sincerely, Lisa Zelnick
Orange	Healthcare	I think we should remain closed at least until June, and I think that we should be stricter with our curfew that we already have in place and should have police stops to make sure people are only out for work. As well as closing down everything that is not a grocery store or medical facility because almost 70% of the workforce is deemed “essential” and having all of these places open almost defeats the purpose of us being in a “stay at home” order. I feel the more serious we take this now the better off we will be when we do open everything back up as far as tests available and hospitals able to deal with the level of covid patients
St. Johns	General	I want my free country back. You know the statistics. The cure is worse then the problem. Reopen Florida now!
Marion	General	Although tragic opening up the state at this time is a big mistake. The numbers are still going up and with the backlog cases of untested we are looking at possible large numbers when they are tested. I believe we should wait till the middle of next month do you consider opening up restaurants and buys a business.
Seminole	Government	Do not re open Florida yet.

AMERICAN OVERSIGHT

Gulf	Tourism	Worried about vacation rental I'm a cleaner & out of state coming in we have to clean them back to back with no time for virus to die off before I clean it. So worried vacationers having it stay whole week leaving virus on everything .I heard sometimes up to days thank you
St. Johns	General	I have been a proponent of keeping beaches open since day 1 due to the positive health benefits associated with being outside in heat and humidity, but logically speaking, a general reopening this soon will fuel the belief that this was not an actual emergency, causing people to disregard any safety protocols in place. This will ultimately cause a significant increase infections and widen the spread causing a "second wave", as the CDC has warned. Keep in mind, we've only flattened the curve, not completely rid ourselves of the virus. However, if a reopening is to happen, I believe that if anyone should be allowed to do so, it specifically should be local businesses only, as they need this more than larger businesses. They are also better able to implement cleaning procedures and keep a more sanitary environment.
Orange	General	I feel that even though the spread of the virus seems to have reached its peak we are still not safe to go moving around business as usual. I believe the "Stay at home Order" should be extended thru the end of June. Gradually as business open up within the CDC guidelines then the order should be modified to accommodate the open businesses. If we open up the state and have people out in about we are facing another outbreak and it could be much more lethal. Please protect Floridians its better to be a little uncomfortable now then to have another outbreak and more deaths.
Volusia	General	The of cases are still going up not down almost 400 they gone up slowly bit only cause people are listening until. More people are tested it would ne a tragedy to reopen because I guarantee the ampunt pf cases will quadruple. A bogostake
Leon	Construction	Open the gyms up now. How can we keep healthy if we are isolated from the very things that can make us healthier. Also, the economy is in a tailspin. We all need our jobs. Open Florida now. The elderly and people with medical conditions should self isolate. Don't hurt the rest of us that want to live life.
Nassau	Management	Good morning. First, thank you for all of the steps taken thus far to keep the state of florida safe. I'm not sure what the re-emergence should look like. It is a fine line of keeping the economy from slipping further and small businesses ceasing to exist and keeping the general public safe. There will need to be strict protocols put into place that continues through the remainder of the calendar year. Although the summer heat will have a positive impact on the virus surviving on surfaces, we will be into the fall sooner than you know it. Reversering whatever all the protocols to normal and having to go back to what we are currently doing will compound the impact should a 2nd wave of the virus surface that is worse than the initial phase. Thank you for your time and effort.

AMERICAN OVERSIGHT

Osceola	General	Would wait until June 1 to start first phase at the earliest. Small businesses including restaurants, hair, nail, etc. start mid to late June with special hygiene steps in place. Masks used by customer and workers to start. Outdoor theme parks leave to company to decide but limited guests to start, social distancing, masks, etc. Indoor venues later with empty seats between people, masks, etc. as more risks. Residents will decide for themselves to when they feel safe enough to attend social services and events.
Pasco	Healthcare	I am an office manager in a Dental office. To successfully reopen to full services, we need to have the correct PPE. Unfortunately that is hard to get right now. Please figure out a way to helps us get the protection we need. Thank You
Orange	General	I fear backfire on the progress made against this virus by reopening too much, too soon. I also fear the economic impact will overpower the decision that would be in the public's best health interest. Proceed slowly and steadily. Maybe release restrictions based on the least affected zip codes first and proceed from there. Cross-county/ state contamination is going to occur when restrictions are lifted. How we proceed will be crucial in how the continuation or the mitigation of this virus will follow after re-opening. We may be bored at home, but we are safe. We may not have all we want, but we have what we need.
Palm Beach	General	Please keep most non essential businesses closed until June 1st.
Pinellas	Professional Services	First issue/manipulatin I realized, the dealing with curves, you can make a relatively small number look big. Example: I'm playing basket ball and I make 500 baskets in 1 hour. Sounds like a big number, right? Wrong. What if I added that during that hour I threw the ball 2500 times? Same with the virus. Telling us how many positives looks huge but when you compare that number to population, not so big anymore. Second: They keep adding to the number without removing those who have gotten better. They keep making it seem there are all these hundreds and thousands out there with the virus but if the virus is a two week illness, how many are cured? Most everyone that fell ill with this in March are more than likely better now so they need to drop those numbers off the total. Third realization: Just last night on the news they said it takes 5-10 days to get the results back because of how backed up the labs are. So when they come out with their "daily new positive" most if not half of those numbers are also cured if not close to cured because of how long it takes to get the result back.
Miami-Dade	General	Let's start opening outdoor recreation immediately! Sun is healthy for body, mind, and killing the covid virus, including beaches. Open restaurants but limit capacity.. Masks need to be worn in retatail operations and offices with sanitation and distancing rules like in essential businesses ((super markets). Gyms, bowling alley and casinos need to be looked at more closely and sanitation orders must be strict. let's start!

AMERICAN OVERSIGHT

Sumter	General	I am an educator in Sumter County. I live right outside of The Villages. While I understand that Florida needs to reopen, I believe that we have a false sense of reality when it comes to the number of people who have the virus. Our local newspaper has reported that there have been no new cases in The Villages for 5 days, but this because there hasn't been testing occurring here. So, this makes people who are not as informed believe that everything is getting better when it's not. When Florida is open, it needs to be done strategically, so we do not a reoccurrence or worse yet, more people getting infected. I truly believe that if we open everything back up, people are going to flock to public places, and this pandemic will get become even more deadly than what it is now. I am terrified that on May 1st, the state is going to open, and people like my husband who has the lung condition, COPD, who works at Wawa, and diabetic mother who works at Advent Health in Tampa are going to be the ones who pay. Baby steps, little by little is was Florida needs to keep this state safe.
Hillsborough	Utilities	I think those who can and have the resources to continue to work from home should stay working from home. I think the benefits of people teleworking are undeniable and can aid in getting everyone back to work. With less people on the roads the traffic improves which means less pollution/better air quality which helps in the fight against climate change. For me personally it's 4 hours a day I don't have to be stuck in traffic and can spend that time with my family eating home cooked meals instead of McDonald's because there's no time for anything else. Also with less people out it reduces the chances of something like this ever happening again. Teleworking also has huge cost saving benefits for my employer because they don't have to pay for the building we work in along with the costs of utilities for said workplace. It's been proven time and time again. Dell has done a study (https://money.cnn.com/2016/06/09/pf/dell-work-from-home/index.html) that proves the huge benefits of teleworking and it's not just happier employees. What better time than now to make this change permanent. I truly believe it will aid in getting the economy up and running again because we wouldn't have to send every person back to the office, those that can should stay teleworking.
Hernando	General	Reopen now we will be careful we are adults
Polk	Recreation	Please open FL beaches and state parks to all Floridians. Those of us who live inland cannot walk to the beaches. Parking needs to be opened. It's safer to open our outdoor recreation areas than it is to open the theme parks, movie theaters, museums, and indoor attractions.

AMERICAN OVERSIGHT

Osceola	Education	To do anything other than reopening our state, our business, parks and beaches would be absolute stupidity on your part. We the people of Florida have complied with your stay at home measures for long enough. There are no numbers of sick, infected or dead that line up with the pandemonium and absolute trashing of our economy that is happening right now in Florida and across our country. How long do you think the people of this state will sit by and watch everything they've ever worked for go down the drain? How long before people start rioting in the streets? You look like idiots for forcing us into poverty and homelessness over the extremely low level of sick we're caring for. Our hospitals are empty and fully prepared for any surge we may or may not get. None of that is certain. What is certain is economic destruction if you don't turn this around NOW. Stop playing into the fear being perpetuated everywhere in the media. Use common sense, send people back to work, outside into the fresh air and sunshine and let us live. Enough is enough.
Volusia	Information	Get the amount of civil 19 down very low first
Leon	Food	Open the gyms up now. How can we keep healthy if we are isolated from the very things that can make us healthier. Also, the economy is in a tailspin. We all need our jobs. Open Florida now. The elderly and people with medical conditions should self isolate. Don't hurt the rest of us that want to live life.
Broward	Healthcare	Open the state .!! Except large venues and movie theatre.!! 85% of the state is open already .!!
Orange	General	No i don't believe we shod be opening back up yet. I feel that we'd be asking for a 2nd wave to hit us much harder than what it already has done. I'm mor willing to put my health or anyones health at risk like that.
Lake	General	My husband and I are 65 & 78 with health issues. Even when Florida opens up the economy We will continue to stay at home as much as possible. Only going out to pickup prescriptions using the drive through and to forage for food and needed supplies. I will probably start using a delivery service. We will use telemedicine as much as possible. Last week we did go to the grocery and were frustrated by the lack of people wearing masks or following social distancing protocols. We are very concerned people will become even more lax in following the protocols when the economy opens up. And fear this will result in a second wave of Covid-19 cases. I am extremely upset with the problems true small businesses are having getting loans and the problems the unemployed are having getting benefits in Florida. If these payments had been made timely, I believe we could have continue stay-at-home until it's truly safe to re-open. Our government has let us down.
Hillsborough	Healthcare	As a dental hygienist I am considered by CDC standards to be extremely vulnerable in my functions as a dental professional. I ask that you to consider the dental community as "essential " so that we may get the appropriate PPE, to include disposable gowns, N95 masks and full face shields. Dental professionals, especially the hygienist, produce huge amounts of aerosols 3-6 INCHES not feet, from potentially infectious people! If PPE can not be provided to us by the 5/8 deadline I beg you to consider dental to continue as emergencies only until the proper PPE may be afforded to us! Thank you for hearing my opinion/ concerns.

AMERICAN OVERSIGHT

Palm Beach	Recreation	Limit use of boat ramps by cutting parking in half but letting recreational boaters access launches. Have a ranger or park patrol limit one boat per ramp per time, most parks have at least 2 ramps.
St. Lucie	General	As much as I'd love to get back to my every day normal life I think opening Florida should be done slowly and carefully there should be a rush to go back to the things that we used to enjoy only because we don't want to second surge of the virus spread through. If we open too soon and too fast it can cause more havoc in the first round I can kill the economy even worse
Brevard	General	I think when the state starts to open up, stricter guidelines need to be put into place. Any one entering an inclosed space must still practice safe distancing and required to ware a face cover or mask. Example, food stores, box stores and any other business that are allowed to open. We have not seen the end of this Covert 19 versus in Florida especially when you have a county like Brevard where the test is showing only 1% of people have had the versus. We all want to get back to normal but we need to do it with caution.
Sumter	Healthcare	Too soon wait until June 1st
St. Johns	Retail	I think that opening more businesses shouldn't be considered until many more people are tested. And when opening does occur, everyone should be required to wear a mask when in public.
Alachua	Healthcare	Among other identifiers, I am a mother, a mental health business/practice owner and all of a sudden a 1st and 4th grade teacher. I encourage our leadership to consider setting politics aside in discussions and decisions for this virus and those in the future (novel or known). In particular the language and decision impacts on human behavior is of specific concern. From all evidence available, continuing language and decisions based first out of fear will continue to have damaging effects on human behaviors that are counterproductive for moving forward with: life in general, business, education, healthcare, our economy. The general public needs to know viruses do not take away the rights we celebrate in the USA. In the mental health field we are seeing clients who were doing well getting sicker due to conflicting information and perpetuation of fear. Reopening Florida does not need to be any further delayed. Hospitals have additional capacity, supplies and funding. The curve has been and continues to be flattened and the hospitals are well equipped. People need to now use their own judgment on making decisions to re-engage with daily life with the influx of precautions everyone has been saturated with (hand washing, staying home when sick; considering vulnerable populations). The longer our leadership panders to politics for the sake of trying to get as many votes as possible- the greater the long-term risk of perpetuated fear in the general population and the prolonging of a situation that never needed to result in economic demise and a virus hanging around for months on end. Stop spending resources on a marketing effort for "stay- cations" and instead perhaps consider encouraging our states citizens to use their own decision-making abilities with the knowledge we ALL now have on this illness to move forward with life. Social isolation and financial demise have MUCH greater negative consequences than I see our leadership considering. Stop politicizing life and end the stay home order NO LATER than its' expiration date.

AMERICAN OVERSIGHT

Osceola	Healthcare	Please take time to re-open. Wait until the number of cases are going down. We do not want to see the numbers spike up because we re-open too soon.
Seminole	Government	PLEASE do not reopen the state until we meet the standards set by the Federal Government. 14 DAYS of reduced cases. I am at a high risk because of age and other conditions. I stay home. My wife is changing careers too keep me healthy. She still has to go out to get groceries. If she interacts with someone who is back at work, she could catch it and I'll be dead. Even with us staying safe. It is wrong in every way to put us at such risk.
Seminole	General	Personally, I would love the idea of our state opening back up but I honestly don't think it is time. I would hate for our state to open up prematurely and then we are in an even worse state than before. I am tired of being in the house just as the next person but I think we need to think long term rather than short and I believe that the "Stay at Home" order should stay in effect.
Orange	General	I would like to make a comment about how opening gyms could work. I think "open gyms" could be opened with strict monitoring of cleanliness and a strict capacity. On the other hand, many people like myself go to workout studios (orange theory, Rukus cycling studio, yoga etc) which can EASILY monitor the capacity and cleanliness. The user is typically using one piece or set of equipment which can be easily cleaned and is safe to use. I would feel extremely good opening those workout studios that can lessen class size for social distancing and use extreme cleaning techniques in between users. Additionally, I think places like Disney could open if they implemented their own social distancing procedures locally. We are dying to get back to life as we knew it, but want to be safe too. These procedures could help. Mass unemployment for an elongated period of time could lead to worse issues.
Miami-Dade	General	Nothing has changed! Death toll keeps rising why would you open now? Im an essential worker we dont need more people out there complicating things
Palm Beach	General	Good morning I don't know if my message will be read. We are a family with 3 kids. One is a 6 months baby. My husband owns a small repair business. We live on that income. We don't have any family here so that business is what puts food on the table every week. We have been shut down like many others for several weeks. The virus is going nowhere and we need to learn to live with it around it and protect us. We need to reopen. How many suicides, bankruptcies, family dramas, are we waiting to reopen?? We are the real people. We suffer. Please May 1st is the date we need to start to LIVE again A desperate mommy
Leon	Information	Open the gyms up now. How can we keep healthy if we are isolated from the very things that can make us healthier. Also, the economy is in a tailspin. We all need our jobs. Open Florida now. The elderly and people with medical conditions should self isolate. Don't hurt the rest of us that want to live life.

AMERICAN OVERSIGHT

Miami-Dade	General	Reopen the following with restrictions: *Hair Salons is an ESSENTIAL job that needs to occur to maintain personal hygiene. Most salons are small and can easily sustain the 6 foot rule or minimize their clients with varied times so we can get hair cuts and necessary hair treatments. *Dentists offices (I began dental implants in August and have yet to have them completed; this could have caused medical implications due to shutdown). *Beaches, Parks, Recreation areas (If people can jam into a grocery store, the beaches outdoor areas should be open). *Gyms should remain closed due to the amount of confined spaces and need to disinfect equipment constantly and body fluids being dispersed during a workout. This is could be potential place for disastrous results and become an incubation chamber for the virus. *Stay at Home Orders lifted completely or modified with curfew hours to reduce 'house arrest' confinement situation. *Restaurants with limited seating and all employees should be tested and wear masks for serving, preparing and cooking food. (THIS SHOULD HAVE BEEN DONE BEFORE ON ALL OPEN FACILITIES WHO DEAL WITH PUBLIC INCLUDING GROCERY STORES, HARDWARE STORES ETC). *Businesses with public access should only be allowed to OPEN if their employees are being tested regularly or remain 'unopen' to public access for safety of everyone. *Private or public mass parties of 10 or more should NOT be allowed with fines provided to those who violate the order. If it is a business, close them down for a 7 day period and increase fines and shutdown if they do not comply.
Osceola	Healthcare	I'm not sure how cancer surgeries got classified as "elective" but it's time to allow the medical professionals to do these life saving surgeries. I had been waiting Over four months for my prostrate surgery when it was cancelled 6 days before my appointment. I'm really concerned that additional delays could result in the cancer spreading and shortening my life. This is not unnecessary surgery. I want this done now.
Miami-Dade	General	Please do not reopen businesses until you have a rigorous testing program in place. If you're worried about the economy, you need to provide stimulus money to people to cover their basic living needs, in accordance to the cost of living in the community. I have a high paying job and am fairly secure in my employment, but I will not be going to ANY local businesses if they are reopened without proper testing set up. This includes no contact delivery. I am not willing to add to the chain of transmission fueled by desperate people in need of a paycheck. I will not be risking my life or my family's lives. We need to come together as a community and realize that our safety is most important. We need to make sure all of our basic needs are met. Fix the unemployment system, start taxing the wealthy to get revenue for stimulus checks. You can reopen the economy, but half of Florida can't afford to visit stores and another quarter will not be willing to put their community at further risk of spread. These businesses will fail with the lack of customers. Also get some doctors on your task force.

AMERICAN OVERSIGHT

Brevard	General	I think that "re opening" the state at this time would NOT be in the best interest of our state. This pandemic has so many variables that we the people do not know. You as our elected officials truly need to weigh the risks to your constuates. Our state has a large portion of our population over the age of 65. We do not need to put their lives in danger by acting rashly. We need to consider the entire population of our state before looking at economic consequences of this lockdown. {Space} we need to make sure that we the people are truly the number one priority of our elected officials.
Brevard	General	As a physician I've come to understand how important it is for the public health that during times of viral epidemic the public be strongly encouraged to wear masks or face coverings indoors or outdoors when social distancing is not feasible. Surgeons wear masks to protect the patient. We must wear masks to protect each other. So get back in your Disney or Universal it TSA line but be a good neighbor and a good citizen and wear a mask. Public health and the economy both win.
Brevard	General	Please open our state, NOW! Everyone knows what we need to do now, we can take it from here!
Palm Beach	General	We need to get back to normal as much as possible. If people want to go out, let them. Requirements should be wearing a mask. For those that don't want to get back out there, let them stay home. Businesses should be allowed to reopen and people need to go back to work. People are starting to lose it....
Osceola	General	I think you should open up slowly. For tourism- You should not let in any travel till in August and if so make people quarantined and fill out paperwork and get profs from doctors showing they are cured before entering and leaving Florida. You can open up small business but to a limited capacity and then gradually increase by July. You should open up sports, construction, retail, and recreation including healthcare and agriculture. For eduction you should probably open in August but make sure it is safe and have people clean.
Leon	General	This is strictly for the economy not for the consumers because who wants to go anywhere if we and the employees still has to wear masks. What's going to happen when people that supposed to be on quarantined comes into an establishment? With that being said the Governor's being very selfish and is gambling with the Floridians livelihood.
Marion	General	First...thanks for doing this. Second...it's not rocket science! Third...follow the doctors... scientist..and Federal Government 3 Phase guidelines. That's your roadmap.
Pasco	General	Just cause the cool kids are doing it, it doesn't mean it's the smart thing to do. I'd rather keep us closed for a little longer, vs. having to repeat this nightmare because we jumped the gun. I when we do start to reopen, I'd like to see masks continuing to be used by all in public for a while.
Indian River	Education	Schools should not allow in-person programs over the summer to allow the virus decline to fully take place and so the impact of any partial openings can be seen.

AMERICAN OVERSIGHT

St. Johns	Retail	I need to have an oil change. Instead of waiting for my car while being serviced, I would appreciate the car dealership or stand alone oil change store to have a tent outside with folding chairs spaced 6 ft or more apart while waiting. This is an option besides sitting inside. Chairs in waiting area should be taped off or some removed and spaced. Otherwise, I have to stand outside, possibly in heat for the return of my car.
Volusia	General	With no scientists or actual medical doctors on the task force, the decision you make will be based totally on your economic interests. Add some people who know something about the virus to the committee and listen to them. We have not in any way flattened the curve. We should be able to see a downward movement for at least two weeks before we even consider reopening. Doing it now will make everything worse - including the economy.
Seminole	Information	Simply put, it is not safe yet, reopening at this moment possibly will risk any containment of COVID-19 and will put an unhealthy pathway for this country, what we achieved at this moment will be lost and families will be put in danger in a resurgence of this disease.
Leon	Manufacturing	Open the gyms up now. How can we keep healthy if we are isolated from the very things that can make us healthier. Also, the economy is in a tailspin. We all need our jobs. Open Florida now. The elderly and people with medical conditions should self isolate. Don't hurt the rest of us that want to live life.
Lake	General	I firmly believe some of these businesses should have never closed. The media has hyped our residents up so much it is unlawful! Re-open now, slowly and carefully. Any restaurant with outdoor seating should open now, and conform to the 6' seating Hair and nail salons open now. These people are under strict guidelines from the Dept. of health for sanitation and sterilization, open them now. These small business people may not recover, but give them a chance. Open them now!! Slowly and safely, rules of thumb for all business people!!
Brevard	Healthcare	Every employee should be tested before going back to work and the customers should practise social distancing untill there is not an increase in cases state wise with continuous testing untill the majority of citizens are tested espically the A symptomatic
St. Johns	Healthcare	Medical care needs to be reopened immediately. For example I just learned that the cataract surgery I need to explore has backed up and I will not be able to get an appointment for a while. I have read that some cancer surgeries and heart procedures have been declared not emergencies. I have had both problems in the past and cannot imagine the stress of having to wait. Many of these surgeries are outpatient and postponing treatment was not necessary. And who ever decided dentist should close , to my mind , was insane. We already had to have dental appointments scheduled months in the future do to shortage of dentists.
Orange	Tourism	I don’t mind reopening with precautions but we need to reopen. If we don’t the economic impact on everyone could be detrimental to everyone’s future. Let’s get back to work. I believe the numbers of people who have had it is actually higher which makes the death rate lower. I will say it again - let’s get back to work. I am in my 50’s and this is the first time I have ever filed for unemployment.

AMERICAN OVERSIGHT

Polk	General	I think those mom and pops business should be allowed to do take out like Charlie on Lakeland Hills Reese Cliff on South Florida also the parks need to be open back up and if you open Resturant's like long horn apple bees chills outback Smokey bones red lobster not to the full capacity barbershop hair salons by appointments only
Palm Beach	General	I feel we still need to he in quarantine until probably after the summer! Please take no chances with our lives! But, I would put Officers out on the highway's into Florida & only let Floridians in. We have our Roads & Highways open to anyone from different States with higher numbers then us.
Pinellas	General	elderly and anyone who has medical problems should be quarantined for at least the next 45 days. Everyone else should completely reopen and be tested.
Orange	General	Please, it early for reopen... We need stay in home until of june. in case open now the a lots people run craizy outside and Florida make in the new New York.
Seminole	Education	First, thank you to you and your office for the excellent work to serve the people of Florida. It is much appreciated. As a private school leader in Maitland, any steps we can take over the next 3 months to gives the State the very best chance of having students return to their campuses in August would be welcomed. A slow move into Phase I and II would likely prepare us well. Thanks.
Palm Beach	General	People need to get back to work.
Hillsborough	Finance	Although we are all awaiting return to normal life, or what will be our new normal, re-opening florida too soon will mean we've done all of this for nothing. Make no mistake, my family has been hit hard by this, my husband is a restaurant employee. We have sat here with no income for over a month, hoping that the broken unemployment system will finally work itself out and my husband will be paid the money he is entitled to after working hard since he was 16, he is now 42. Restaurant workers work in hospitality not for the money, because they believe in it, they believe in an industry that helps people celebrate, helps people grieve, helps people get together, gives people a family that have none. We are suffering as we watch our bank account slowly dwindle. Florida needs to be there for us, fix unemployment so people can stay safe at home. It is too early to open up, it will have grave consequences.
Seminole	General	Open Florida!! This has gone on long enough! Quarantine is for sick people not healthy!
Volusia	General	I do NOT think things should reopen until everyone, regardless of WHO they are can be tested. My 25 year old son is a department manager at Walmart and has tried to get tested after having difficulty breathing and was told no. I feel that as a person dealing with the public who has underlying asthma and a high risk pregnant wife at home should be able to be tested! Not just do you have a fever?? We waited too long and allowed spring breakers and beaches to be open before we had Stay at Home orders put into place. Lets not have our FL govenor make yet another mistake. I personally DO NOT want to start all over again with the Stay at Home order because we jumped the gun.

AMERICAN OVERSIGHT

Volusia	General	To early to reopen... in my opinion we should be on a significant decline for 2 weeks before considering reopening. I am a business owner (Construction) and have not had any income for the last 45 days, but have keep my 4 employees on the payroll. And paying their health insurance. We need to stand firm until we are sure this will not flare back up. Listen to the health experts!
Sarasota	General	In my opinion there is no Safeway to open Florida right now this is ridiculous, people are going to die, Florida is still exploding with new infections do the right thing give it some more time.. I'm sorry about these people and their jobs but it's no excuse for loss of life. Thank you for your time.. PS,,I'am in the food hospitality industry and have been out of work since this started a but again my lively hood is not worth somebody else's life..
Bay	General	If DeSantis is smart, he' won't reopen Florida because it's too early.
Orange	Retail	Hello. I work retai . I understand the importance of stores opening back up. But, I am struggling with understanding how this can be done safely right now. I have read that employee temperatures may be taken, but what good is that if we come in constant contact with strangers (the customers). The way society is nowadays, I don't see being able to accurately enforce customer temp taking. Plus a person can be infected and not have a temp. Again, I get stores need to eventually open. I just want it to be done safely. Is selling a nick-nack worth me getting sick over? Thank you for listening.
Manatee	General	Hello Thank you for your time. I believe we should open up, not in steps but in the whole for a couple reasons. 1. We isolated in order to flatten the curve, not eradicate a virus. That would be impossible. We have accomplished the flattening so as to not put strain on the health care system. 2. The health care system is NOT strained. I am a CT Technologist. Hospitals have furloughed or reduced staffing dramatically. If we don't boost our hospitals with business soon the impact on hospitals and their stability may be due to decreased old rather than increased load. 3. I believe the strong encouragement with some preset guidelines THAT CAN BE ADOPTED (not forced) by the private sector should happen. The public frequents facilities based on preferences already. We have no shirt no shoe policies in most. Let the private sector make a no mask policy and if they don't, those who do not wish to frequent their establishment can give their money/business to someone else. If they want to do temperature checks prior to entry, and if high they can ship for them, let them. It's not discrimination. It's private sector and public health coming together in a free, fair, indiscriminate, liberating and not over reaching manor. But overall give instruction and education to the private sector and the public common and give practical guidelines for cleanliness and cautions and reopen.

AMERICAN OVERSIGHT

Palm Beach	General	To boost the economy, People need to come spend money, my suggestion is: 1-Give an incentive on taxes for the rest of the year for new real estate transactions so houses are sold. For example: houses listed in May won't close until June/July. From closing date to the end of December, the new owner will be exempt of 50 % tax. Also at closing, void tax charges that can be voided. When a house is sold, tax is usually re-assessed and most of the times it is raised a lot. This makes sense for the cities, still getting paid taxes, while keeping transactions going without homeowners needing to foreclose after the quarantine. 2- Give Florida people a half month of rent and mortgage free In May without having to re-pay. 3- All banks and credit card company's should not charge interest for a few of months. Monthly amount due still need to be paid, but interest (let's say 3 -6 months) should be waived without penalties or having to pay back. 4- Resume court hearings. If need be, have outside hearings like a judge did it in Tennessee. 5- Open the malls and retail stores. Ask all stores to keep the number of people to a minimum according to the size of the store. Also ask them to have one way isles. For leisure: 1- Open all beaches but have a designated entrance so the crowds are limited. Also keep everyone to a limit of 2 hours. When parking meter is done they need to leave so there is an opportunity for someone else to enter,. Open parks with the same guidelines for beaches 2- Keep restaurants to take out and delivery with a closing time to 8 pm so ppl go home rather than linger around
Broward	Healthcare	We need to get number of cases and daily deaths down to near null before fully reopening. Please consult with health experts and revisit history. We as a state and country need to be equipt to handle a second wave. The second wave is what killed most people during The Spanish Flu after numbers were at zero. We can not care for a second wave of patients if we are still trying to cure the first wave. The economy will suffer greater if we have to shut down a second time because we opened too early. I am a Broward county health worker. I am highly concerned with the number of deaths, cases, and exposure we are constantly exposed to as essential workers. People are hanging around Home Depot, Sam's club, Walmart, Target, and Costco by the masses and are refusing to stay home. Maybe open outside recreation for exercise first. At least people won't be as exposed outside as they are in confined stores.
Leon	Real Estate	Open the gyms up now. How can we keep healthy if we are isolated from the very things that can make us healthier. Also, the economy is in a tailspin. We all need our jobs. Open Florida now. The elderly and people with medical conditions should self isolate. Don't hurt the rest of us that want to live life.
Volusia	Accommodation	As long as the medical facilities have enough equipment and beds, let's reopen. Nature will have to find it's own balance at one point.

AMERICAN OVERSIGHT

Lee	Recreation	I think fitness studios Can open but limited to 10 Per class and 6 feet apart. Big box gyms should not open yet it would be too hard to control
Lee	Tourism	I would encourage an extension of the vacation rental restriction. Florida seems to be doing ok with regard to new cases while many states in the Midwest and east, where many of our visitors come from, are continuing to see an increase in the number of daily cases
Palm Beach	General	I want to see the state open up. I am 68 and in good health. I will be cautious. We need to have the nursing homes monitored. Schools need to remain closed for the school year. Retailers need to be opened up. Restaurants open up. Hospital staff back to surgeries, the beach and recreation open. With guidelines. No large crowds. Masks worn. Testing to continued. Disney and large recreational parks closed for now.
Flagler	General	Keep Florida closedown until it's completely safe to open. Listen to the doctors, CDC and scientists not hot heads screaming about their rights.
Seminole	Professional Services	While I am eager to go back to work at the salon business I just opened, I find it extremely difficult and burdensome to fathom that I would be responsible for the health of my clients beyond normal sanitation expectations. To think that I could be at risk, from a legal standpoint, should one of my clients contract Covid-19 even though I followed all recommendations and guidelines. Since there are still many questions surrounding transmission of this virus, I feel as though it is in the best interest of community that our businesses open in phases that are spread apart far enough that adequate data could be gathered to ensure our number do not continue to grow because our reopening. Most salon businesses are unable to practice social distancing guidelines because of the nature of our business, hence why we were not considered essential. At this time, I do not wish to have professional services be considered for phase one of reopening.
Hillsborough	Education	I own a small business that teaches kids STEM using legos. A big part of my business is summer camps. Please re-open small businesses in Florida. Loans and government handouts do not help a lot of us. And if I miss summer income, it is crippling to my business. Many of us seasonal small businesses make the majority of our money in a few months of the year. When we miss that money, crippled us. Please at least increase the number of people that can be in the same room. Many parents who work need child care, and once the school year and e-learning are done there will be nothing for these kids to do.
Alachua	Retail	Reopen the economy focus on protecting the elderly and those with preexisting conditions. Let everyone else live their life normally! This should have already been done.

AMERICAN OVERSIGHT

Polk	General	From what I'm seeing the virus is now moving state to state and I don't believe it has fully reached FL. This has got to be a hard decision for you . I think it is to soon to reopen . Are numbers in FL have been increasing. We will soon see how opening in GA . works out. The numbers will tell you and listening to the scientists . Prays for you while you are figuring out this decision that will effect life's. We all want things to open and regain some normal . This is not something that should be a political decision. So please don't let that happen. We all love are family and friends and want them to stay healthy and safe . We have not done enough testing and I know you know that needs to happen.
Orange	Tourism	In terms of FL's tourism industry, I think that the tourism industry especially the theme parks like Disney and Universal should and can open up with limited regulations and social distancing guidelines. I am willing to have them open with strict guidelines in place such as only FL residents at first, then national residents, and then international. For me personally, I would love it if Disney would open up, but I would like there to be certain things in place to make sure the safety of guests and workers is at hand. I think that with the right precautions/restrictions, theme parks can open up even to some limited capacity. There has to be a good balance between adhering to social distancing/health sanitation/procedures and opening up the economy. It can be done and may not be what everyone wants or would like right now, but there is a way to have both the economy/tourism industry open all the while adhering to health guidelines.
Palm Beach	General	I am worried about my wife and I being forced to go back to work and contracting COVID-19. We have three children and have been working from home just fine. My wife has an underlying condition and I am worried about getting her sick. Can we enforce an order that allows people like us to continue working from home until a vaccine is available?
Orange	General	Open it up in stages. People will suffer more from the economy. Those who are at risk should stay home and the others should help those in need.
Palm Beach	General	Like other viruses and all their mutations, there may never be a vaccine. We surely can't shut down and quarantine hoping for cure. Like all of life we need to face and live with the hands we're dealt. Open up allowing each individual to mingle or shelter as he/she sees fit for their own safety. If there's no cure covid19 will stay with us into the future. We can't wait it out.1
Orange	Education	People first. There is no life that can be traded for profit. This is awful and I know it. You are in a terrible spot that holds more responsibility than you ever thought you'd have to shoulder. I teach Elementary School and appreciate the choice to continue distance learning through the end of the year. I pray that we can open in regular fashion this August. Try not to follow Georgia's lunacy. We need our parents and children more than we need to bowl a few frames or memorialize the situation in ink on our bodies. Let. Us. Be. Safe.

AMERICAN OVERSIGHT

Orange	General	Open smartly these are until until a vaccine comes.- Mandatory masks for everyone when in public . Keep up social distancing. Random thoughts- Can anyone in Florida manufacture rapid antibody tests or COVID tests? Who is doing contact tracing? I'm sure many people can help with tracking this. With rapid testing available in mass quantities, we can open large gatherings if tested before people enter, of course while wearing masks.
Lake	General	I believe the economy in its entirety should reopen and never should have shut down. High risk people or anyone in general should be allowed to stay home if it makes them feel safer.
Duval	General	Please allow us to mask on, move on. Given the data coming out of the antibody tests in NY and CA, indicating the the death rate may be much smaller than what is being reported now, we need to open everything back up, with wise instructions. Wise instructions should be: wear a mask when in places where it's hard to stay 6ft apart, keep 6ft apart when in public, wash hands often, and if your are feeling sick, stay home.
St. Johns	General	Do not reopen FL businesses and beaches until a vaccine is available. Increase testing availability. No symptoms required for testing . Many carriers are asymptotic. Provide safe housing for the homeless.
Lake	Construction	I think this task force should actually get some truths about this virus first. Is it actually airborne or just the spit. Does I've rays actually kill virus as that changes from day to day. We have to actually know if you contract once if you will truly be unable to contract virus. We have only tested 1% of population so how can we actually know if virus is receding. I think we are trying to rush to go back to work to soon all other countries worked harder with more restrictions and were shutdown for 12 weeks. I see it causing way more problems with all the things we Do Not know about this virus, even US Surgeon general agrees
Leon	Retail	Open the gyms up now. How can we keep healthy if we are isolated from the very things that can make us healthier. Also, the economy is in a tailspin. We all need our jobs. Open Florida now. The elderly and people with medical conditions should self isolate. Don't hurt the rest of us that want to live life.
Brevard	General	Please don't do it. US didn't reach peak and even after peak we need to wait more time. Any other decision would be a show of irresponsible, ignorant administration, only interested in satisfying the lobbies of tourism and it's own self interest, surely not safeguarding its own people.
Clay	Recreation	Please allow gyms to open immediately. I'm retired and I lift weights daily. It helps me physically as well as mentally. Since gyms closed down nearly 2 months ago, I have gained weight (body fat) and my strength has decreased. I cannot exercise outside and get the same results without equipment. I've been a gym rat for nearly 20 years and during this time is the longest I have ever gone without lifting. Gyms can be reopened safely and is included in our Presidents phase 1 guidelines.

AMERICAN OVERSIGHT

Martin	Healthcare	Healthcare & Government go hand in hand, now lets start with common sense which should over ride government & Health Care. You cannot shut the economy down & save people's lives because people need the economy. I believe in Sweden's approach. this was an over reach by the health officials. the elderly & people with other health issues should stay home & or wear a mask of some sort when going out in public. You cannot wreck the economy to protect an age group. If you want some one with common sense, I am willing to help.
Volusia	General	Hi, I just want to share my feelings on the re-opening of businesses. We go to the grocery store, the gas station, Wal-Mart, any number of places where we come in contact with others. We can all make decisions related to our family health and we'll being. I think guidelines can be just as effective for people to follow without the stringent lockdown parameters that are in place now. I think everyone realizes the importance of social distancing and keeping activities to those that are necessary. Let us open and take precautions, while starting to get back to some normalcy. Most will realize the gravity of the situation, it will not be the robust economy it was before anyway. Less people will be out whether it's because of concern from the virus or lack of disposable income. We can do whatever is necessary to help at least start action of re-opening. Masks and distancing coupled with hygiene can go a long way to keeping people safe. Please help us get back to earning some income. Thank You
Brevard	General	Reopening non essential businesses will increase the risk for essential employees going to work. My husband is fully capable of working from home 80% of the time but his employer refuses to allow this which puts him at risk unnecessarily. He has risk factors that put him at a higher risk of severe complications from contracting the virus. If he has to go to work, the stay at home order is minimally comforting as it reduces his risk of contracting the virus from those around him. I do not think it is fair for people to have to choose between a paycheck and their health. Measures to reopen need to be strict about limiting people allowed in businesses. Also employers need to make contingencies for sick employees. If someone doesn't have paid sick leave, they won't call in sick. You can make all the social distancing rules you want but if people go to work sick they will still spread it.
Palm Beach	General	First phase Reopen beaches, parks, gulf with social distancing guide lines slowly. Following by trace testing. Restaurants need to follow social distancing allowing outdoor sitting,. All staff wearing mask and gloves. Follow first phase 2 weeks. Mall's and retail stores second phase 2 weeks. Hotels, casinos, theaters, hair salons, tattoo, gyms, and malls all high risk businesses not ready to open tell June that would be third phase. Before moving to next phase make sure there is no substantial increase on cases. And that we continually monitor everyone who test positive. Capability of testing is the only condition to open. And the availability of protective gear.ppe
Volusia	General	Do not reopen Florida.

AMERICAN OVERSIGHT

Pasco	General	Please don't reopen things until medical experts say it is safe to do so. The economy will recover in time. We must value life over business right now. Lives lost cannot be brought back. Please use open slowly with guidance from medical experts not business people who just want to make more money. Please work on the unemployment website so people can feel they can survive while not working. It gov supports it people better through this there will be less public unrest.
Broward	General	Once health officials say it's okay to re open..barber shops and Salons should set rules how many costumers can occupy the the faculty at once...if we can work from home we should until school is over..Most parents can't leave their kids Unattended especially with a time like this..Don't open up restaurants gyms or theaters there no way to keep all that space disinfected...to many risk can happen.. I don't feel safe going out for another month but health officials have to see a huge decrease is number of cases I mean zero
Hillsborough	General	Many things have gone well- and I believe the safer at home order was the right call. But now, 6 weeks later we need some small steps to ensure our economy does not completely crumble. 1- unemployment has been non-existent. My family has been waiting since March 19th for my husband's unemployment to process and the system does not allow for any updates or steps or notice about where you are in the process. We will be unable to pay our bills come the middle of May as the stimulus money will run out and my husband's unemployment is currently non-existent. 2- HCPS has done a great job! I'm in Gaither/Claywell/Ben Hill area. Food has been delivered to families. Teachers are working and communicating regularly. Communication from district has been excellent. 3- reopening the state I think must start with our doctor's offices, dentists, medical surgeries, Etc. Floridians need to be able to access not only emergency care but also preventative care. I know a handful of people that are waiting on cataract surgery, tooth extraction and breast cancer screenings. As much as I would love the beaches to reopen- I don't think this should be a first priority. The citizens of Florida need our own access back to health care, parks and limited businesses before we open for tourism. I would love schools to return in fall. I do understand that means the schedules may look different. The sooner we can plan for this the better. Thank you for your service. May God continue to bless and keep us close.
Brevard	Education	Please try to consider daycares to reopen as soon as possible so that way the workforce can put their children in the safe hands so they may get back to work instead of trying to find somebody to watch their children
Volusia	General	The numbers in my area continue to rise, even under the current order. My concern is that if businesses are permitted to open before the spread begins to slow down, then it will get worse in my area.

AMERICAN OVERSIGHT

Levy	Retail	I don’t agree with reopening. It is too soon. A month of stay at hone being mandated is defiantly not long enough in all seriousness. Our numbers in the state of Florida continue to climb with no evidence of declining anytime soon. We are a tourists state and as soon as you open our governor needs to realize people from other states will flood ours bringing more contagious people to the Florida residents. Many many of my family and friends agree and I will be sharing this on my page and a few others to get this out there so you can see 85% plus are asking for our governor to think of the residents of this state beige money he thinks reopening would bring, we voted him in to serve and protect its residents and we all have not seen very much of that at all. What he needs to do is extend the stay at hone order so we do not end up like New York and what he should focus on more than any other issue at the moment is unemployment we are the state that’s so far behind getting payments out to who desperately need it and have depleted their savings etc to buy simple Food let alone pay bills. We would not be suffering so much if that was addressed and fixed. And as far as opening the government and trump set guidelines on that for a reason and we have not had two weeks of straight numbers declining in increasing so his answer is simple there on what is best for the state of Florida we need our stay at home extended for another month then we’ll be live our governor cards for his residents of his state, because as much as Florida is a tourists state it is more a retirement state and people with underlying conditions like myself come to live safely According to the White House’s guidance, states can begin reopening businesses (phase one) after the number of coronavirus cases in the state has declined for 14 consecutive days. In this initial phase, people still would be cautioned against gathering in groups of more than ten people, but places like restaurants and churches could reopen if they adhere to strict social-distancing protocols. Assuming that cases continue to decline for two more weeks, states can then enter phase two, reopening schools and allowing people to gather in groups up to 50. If states can show they have no resurgence of cases, they can eventually enter the third phase, which would allow life to return to some semblance of normality.
Manatee	Construction	I own a small business as a construction consultant. The shutdown is costing me my ability to provide for my kids. I didn't qualify for PPP. I don't qualify for unemployment. There are no other options for me to receive any government assistance. I am baffled why the Florida government is doubling down on the shutdown when the models and predictions were all wrong and the death toll is .02% in Florida? It has been no worse than an average flu season. That information alone should qualify for the shutdown to be OVER. How can anyone in government ignore the reality of the numbers?
Seminole	Finance	No I work at a daycare and it’s scary because me parents are doctor and nurse and I have children at home and I have to work now starting May 4 and I’m freaking out because I don’t have childcare for my kids and I’m not taking them with me to work because that’s an opinion. My job wants me to take me kids with me That’s all three of us around children who have parents that work at hospitals it’s scary Please wait just a little longer to open

AMERICAN OVERSIGHT

Seminole	Management	Please reopen the state and businesses. Most, if not all businesses want to find a way to coexist in the era of COVID. We want to operate our businesses wisely and safely for our staff and for our customers. Please give us the chance to do that. I fully understand the risks, the challenges and what a loaded situation this is. I think most people do. But that doesn't change the fact that we want to get back to our ways of life. We can't hide in fear for the next 12-18 months waiting on some hypothetical vaccine. Reopen the state according the the whites house guidelines. Put us on a 6-8 week path to phased reopening.
Lake	General	Rescind the Stay At Home order and allow businesses to re-open. Those who are at risk can decide for themselves if they wish to limit contact with the public. Public funds should be used for essential services (food/medication delivery, etc.) for those who wish to self quarantine, not wholesale stimulus checks to every worker, many of whom want to go back to work.
Duval	General	Ready to reopen. I work at a salon and read Georgia's plan. Those requirements are a great place to start. If someone isnt ready to leave home then dont. We are ready and will follow any guidelines set. I think most people feel the same way. We cant stay at home and be scared. Be smart if you dont feel good stay home. If you are out and about wash your hands and be mindful of we just went through.
Highlands	Education	The restrictions on childcare centers, especially the number of people per room, needs to be increased. As people need to return to work, large centers are turning enrolled families away because of the limited number of people per room. Also, expecting the children to remain with the same staff is impossible. Teachers need breaks or a spilt shift and then there is always the bathroom breaks. Please increase the people per room and don't count staff in that number. In order to meet staff required ratios, staff are taking up slots which could be used for children.
Seminole	Professional Services	I work in the salon services and I have major concerns about going back to work as we can wear a mask and gloves and take the steps to protect our clients but whose protecting us? Once someone comes in that may have it without symptoms it spreads like wild fire and I do not want to be subjected to that. I Do not want to lose a family member let alone potentially losing my life because people are bored at home. This is a serious matter and we need to save lives by being smart and patient. I myself am stir crazy but I also value my life and those around me. Please don't reopen until we have consistent signs of change and improvement.
Hillsborough	Tourism	Open the casino. Some slots can be shut down so distance is maintained. The bottom line is people who feel comfortable coming out will and those who don't will not so open for those that do.
Marion	General	I just am writing in support of reopening the state up safely. There are some polls that say Floridians want the the stay at home order extended, but I am not one of them. We must get our economy opened back up safely.

AMERICAN OVERSIGHT

Martin	Retail	Encourage all to wear mask in public, Require store to sanitize carts between customer use, 1 way aisle to prevent face to face exposure, close fitting rooms to prevent contaminated merchandise, Hand wash stations at business entrances, Limit number of customers in a business at 1 time to maintain social distancing. Consider extending these actions in to Flu season to prevent Multiple virus. If businesses take these actions until more concrete evidence is know, we can open safely and stop the spread. Prevent more deaths from Covis 19 and the flu
Leon	Tourism	Open the gyms up now. How can we keep healthy if we are isolated from the very things that can make us healthier. Also, the economy is in a tailspin. We all need our jobs. Open Florida now. The elderly and people with medical conditions should self isolate. Don't hurt the rest of us that want to live life.
Hernando	General	Too soon to open. Evaluate the numbers and wait until they are lower. Opening too soon will be detrimental to businesses that will have to reclose if/ when their is a spike. It will pose a threat to controlling the spread before fall when we are already expected to possibly have another wave. August is also the time when students could potentially physically go back to school. If we open to soon we may be causing a delay in the return to classrooms. Many students are being negatively affected by the lack of structure from homeschooling particularly if parents are working. Fortunately the school closures happened close to the end of the year but do we really want to delay them at the start of the year? If we open too soon everyone will flock to the open areas, caution may be put to the wayside, numbers will spike and we could end up worse then projected. If we have done better than previous projections let's continue that trend by continuing to exercise caution and evaluation of hard numbers and professional feedback not be blinded by people's impatience.
Volusia	General	Please open in stages but people need to work and also not always stay in and watch the news all day. Haha Thank you!!
Pinellas	Technology	I'm sure you get a lot Of comments but if you read this PlLEASE open the beach and restaurants safely Of course thanks
Sumter	General	With unemployment not being distributed as necessary, i feel that the sooner the state reopens the more beneficial it will be for all Florida's residents and businesses. I also feel that the COVID-19 Antibodies Test should be considered for all residents free of charge (or minimal cost) as soon as possible to determine who is still vulnerable to the virus. I know a lot of people who were very sick in January of this year who tested negative to the flu strands. Lift the stay at home orders, people (especially in Sumter County) are not following them. Keeping the businesses closed are only hurting Florida's economy.

AMERICAN OVERSIGHT

St. Lucie	Government	Given the data we have and death toll and positive numbers of covid-19 climbing daily, I feel we are not ready as a state to re-open yet. The state hasnt hit its peak yet and loosening restrictions will only make numbers and death toll worse. Once we have adequate testing for all, not just those that meet guidelines, that is accurate and faster results than what was given and sufficient treatment than we can begin to get back to normal. We need to listen to the advice of medical professionals. If we leave it up to residents they will not care and even if sick will go out into public and infect others as to not take away their freedoms. Also let's not forget those that show no symptoms! I am a healthcare professional and I can tell you I'm advising at least another 30 day shutdown. If you want to open beaches while maintaining social distancing that's fine, but not indoor facilities where we stand a higher risk of contracting the virus. The beaches would be a good test run. Thank you!
Hillsborough	General	Please ensure that the decisions made are in full consideration, without deadly compromises, for the health and welfare of all the people of Florida, old and young. Those decisions must be based on sound, best available, medical scientific knowledge. Safe procedures guarding our health must be the primary focus. Economic conditions are critically important but must be subordinate to the health of our people.

AMERICAN OVERSIGHT

Volusia	Education	I live in New Smyrna Beach, I own a in-home preschool, I have remained open to support essential workers, and I have limited my exposure to stay healthy for my family and the families I care for. I am at the beach twice a day for exercise, fishing, and swimming. Something I have been doing the 6 years I have lived beachside NSB. We are already seeing many people start to flock back to beaches, numbers increasing. The town is increasingly busier and people are parking anywhere they can find and hanging outside of closed businesses, waiting for to-go food, and being served to-go drinks by restaurants. Social distancing is not happening. Our numbers have luckily remained low, and everyone has relaxed. I fear that letting more places open and more people into our small town will increase our numbers. I don't think we have seen enough of a consistent decrease to start to go back to normal yet. We need to wait until our numbers are steadily moving down. I have many friends in town, who have not been social distancing. Who have been having gatherings in neighborhoods, and who have been gathering on boats/islands to hang out. Less ping restrictions is just going to increase the number of people doing this. Please give us more time to fight this!!! Please protect our Florida locals by not full out opening beach parking and beach driving. My mother and my grandmother, who also live in town, would love to be able to leave their houses eventually. Slacking on restrictions now are only going to increase our numbers. Though our numbers have been low, surrounding towns are still increasing. Letting things return to normal, even a little is going to bring more cases here. If you think the locals or anyone in NSB is going to maintain social distancing inside of restaurants that are allowed to open, you're crazy. Most people are worried about social distancing getting to go food, or walking on the beach. I have to dodge people daily while working out, who seem oblivious to staying 6 ft apart. Going to Publix has been horrible as no one seems to care how close they are to you, especially employees. I feel confident in saying that summer time plus a let up on stay at home/social distancing restrictions, is going to lead to many more cases, as people put their social lives and fun before their health. I got invited on a group paddle board trip just last night
Lake	Education	Smaller classes or bigger classrooms. Socially distant settings.
Hillsborough	General	Please think long and hard about the choices to open certain things - some are still skeptical about what is or isn't good to open - Please pay The unemployed
Volusia	Retail	Work in Seminole county. Live in Volusia county. I'm going to keep this simple do not re open the state. Keep the stay at home order in place for another 30 days. You are going to kill people. Do not choose business and their livelihood over lives. It just that simple.

AMERICAN OVERSIGHT

Putnam	General	In my County we started off slow with this virus , now it seems we're going up by double digits on a daily basis. Florida continues to increase in cases and in deaths. Opening the economy now would be foolhardy and it would jeopardize thousands of Florida residents and their families. That being said there are still thousands of Floridians who have yet to receive any kind of stimulus to help us. we cannot use the unemployment website because it's always down. I have lived in Florida all my life. I was born here, I went to school here , my family is all here. I love Florida I think it's one of the best places to live but I am very disappointed in the way this has been handled. Even now you rarely see anyone in Putnam County with a mask on everybody jokes like this is a hoax. The leaders in Florida should assure Floridians that everything possible is being done to protect them ...by actions not words. With all the money that Florida makes of Tourism and off of us taxpayers , more should be being done to ensure that Americans don't go without power or water or necessities. The leaders of Florida need to remember one thing... We all have family we love and want to protect . We all want to prosper in life , while not having to worry that we could potentially kill our elderly family. In all honesty this pandemic has showed me , that in a crisis , all of our leaders will leave the people behind and that's very disheartening. Our leaders need to remember, that without the people of this state, there is no state. I have always had faith in our leaders in Florida but these days my faith in our leaders has become less and less. I hope to be proven otherwise. I want to say thank you for taking the time to listen.

AMERICAN OVERSIGHT

Brevard	Healthcare	I am writing to you today because I am concerned for my personal safety at work, and for the safety of the patient's that I care for. I am a licensed Dental Hygienist in the State of Florida. As you know, dental office are planning to open soon. I understand that dentists, as business owners, are eager to reopen as they are concerned about finances. However, resuming elective dental services at this time puts the health of their staff and patient's at risk. Personal Protective Equipment (PPE) is still in short supply, and some dentists are expecting their hygienists to work without proper PPE and new infection control training. Dental Hygienists have the highest risk of contracting the coronavirus of any occupation due to the unique nature of our work. We work in very close proximity to the patient, and utilize dental instruments which create aerosols. These aerosols can suspend the virus in the air for hours, potentially infecting us, the rest of the dental team and our patients. It is virtually impossible to have your teeth cleaned without generating aerosols. The aerosols created by Patient A at 8:00 are still lingering in the air and dropping down on surfaces on Patient B at 9:00 and Patient C at 10:00. It is estimated that 50% of people actively shedding the coronavirus are asymptotic. Without the ability to test, we must assume that everyone is infectious (Universal Precautions). The Center for Disease Control, CDC, recommends that dental facilities postpone elective procedures, surgeries and non-urgent dental treatment until further notice. I urge you to enforce the CDC recommendations to postpone dental hygiene services at this time, and mandate resuming elective dental services As you consider next steps in reopening businesses, I hope you understand the unique risks to dental hygiene professionals. I ask you to make decisions that will ensure the safety of dental hygienists, their families and the patients they serve.
Miami-Dade	Accommodation	I personally do not want the state to be reopened until medical experts say it is safe to do so. Especially the schools if the situation is the same as now comes August. I currently have 2 daughters (pre-k and junior in HS) using virtual school and all 3 of us are completely satisfied with the wonderful way the classes are being taught through zoom. My concern is the health and well being over the wealth of the economy. Of course we all want to go out and “live life” and the economy will bounce back, once it is safe for us to go back to our “new normal” but right now just isn’t the time. Please consider health over wealth. Blessings, Marisssa
Osceola	General	Open the state! I know many people in Osceola and revard county and not one of them leaves we should have closed down the entire Dang economy. We should have simply had those that were vulnerable stay home. Not close every business in the world.
Collier	General	Florida is NOT ready!!! You cannot open a state after one week of thinking about it....that would be the most irresponsible action at this time.
Collier	General	I like the state recommend wearing a mask when in public places as much as possible. In stores, beauty salons and other services where social distancing is difficult to maintain. Thank you.

AMERICAN OVERSIGHT

Indian River	Accommodation	THE DATA IS IN ,WAS NOT AS BAD AS IT AS HYPED UP TO BE. THE NUMBERS LINE UP WITH EVERY OTHER FLU WE HAVE HAD IN YEARS. THE HEALTHY NEED NOT BE QUARANTINED, THE SICK SHOULD BE ISOLATED, OUR(the healthy) IMMUNE SYSTEM IS BEING DEPLETED AS WE LOCKDOWN, OPEN UP
Hillsborough	General	My 18 year old daughter has multiple health problems due to Williams Syndrome, Klippel Feil Syndrome, Renal Artery Stenosis, Asthma and more. She and I both have Sleep Apnea. My husband has diabetes, my sister is immune-compromised. If you reopen too early we won't be here to enjoy any kind of an economy. Money is a necessity but it is useless if you are dead. I don't want to bury my daughter because you listen to the President who is doing all he can to pressure State leaders to reopen too soon. Money is not as important as people. People's income and the economy will recover. Dead doesn't have a cure. -Dori Jones, Tampa
Leon	Wholesale	Open the gyms up now. How can we keep healthy if we are isolated from the very things that can make us healthier. Also, the economy is in a tailspin. We all need our jobs. Open Florida now. The elderly and people with medical conditions should self isolate. Don't hurt the rest of us that want to live life.
Hillsborough	General	Being someone who has seen how devastating this virus can be personally, I beg of you: PLEASE, DO NOT REOPEN FLORIDA! We amount of testing needs to be exponentially larger & more widespread. Let's please continue to keep this as our main focus... Thank you.
Broward	General	I don't want us to open because of politics. The Healthcare/Medical experts are the ones we should be listening to. When a party makes statements 'that living isnt the most important thing but the economy is', that frightens people and makes everyone unsure of trusting their leaders. We also need to know we can vote by mail this fall. We also need to address the basic supply shortages. Its like the hurricane season where we are told to stock up and then we go and there is no supplies. Tiolet paper, paper towels, hand socap, disinfectant, wipes and items needed to get through the crisis are still in short supply or not available at all. Unemployment is a disgrace. We were the worst state in unemployment in the country in 2008 and we seem to be following that same pattern. Low cost housing has still not been addressed.
Brevard	General	I agree with our governor in keeping the state safe. I think that he is doing an amazing job! I don't think that it is fair that he is getting blamed for the problems of the unemployment website. That was a problem way before he even became elected. I am very impressed and i applaud his making the unpopular choice in needing to close the state. I believe that it was his wisdom that kept our state safe during this pandemic. Keep on being awesome Governor DeSantis!!

AMERICAN OVERSIGHT

Palm Beach	General	Please wait. By accounts of science professionals and organizations, we have not even hit our highest point of infections. If we open up too soon, we will delay recovery. I understand that folks are desperate and I know everyone wants to get back to work, but if we all start getting sick, work will be delayed anyway and lives will be in jeopardy. Lives are more important. We will get through this.
Seminole	General	I believe you are on the right track to start opening up business starting early May. Perhaps start with small business and continue to have restrictions such as face masks and distancing. Apply that consent to restaurants barbershops as well as retail and movies. Limit number of people. We cannot be in lockdown forever since it will completely kill the economy and that will lead to other issues. Keep testing as many people as possible and isolate the sick. I also believe schools should open up in August k-12 and colleges including sports. This is taking a huge toll on the normalcy and the support of your school aged kids who rely in the schools for not just education but food., counseling and outlet and support by being involved in schools .
Hillsborough	Government	Social distancing works. Massive shut downs have not proven any better. They are also government over reach. Use distancing. Limit crowd size. Ask high risk to stay at home, if needed. Allow folks who feel the need to wear masks, and gloves, to do do. Do not force it. Open local businesses, and put people back to work. Use something like the Swedish model.
St. Johns	Healthcare	Physicians and Dentists doing "elective" procedures need to have these restrictions lifted immediately. Not only are their businesses and employees needlessly suffering the economic damage, this shutdown is impacting the health and well-being of their patients. Healthcare businesses are certainly equipped due their medical knowledge to adjust protocols appropriately.
Osceola	General	Please reopen now!!! Our economy or state of mind can't handle another 30 days. The numbers are not correct because of counting every death is virus related. Please open for the sake of all the small businesses.
Palm Beach	General	I think it is premature to open at this time or anytime before July 1. The numbers have been going up. Only one percent of the population has been tested and know one really knows who has it. Opening up with people that do not have symptoms but are positive will lead to disaster. We don't even have enough tests to do a real numbers check. I am also concerned as a parent that the AAU vollleyball has decided to have nationals in June in Orlando which if we open will become a hot spot with the athletes.
Manatee	General	We need to open everything and do it now!
St. Johns	General	I think you should reopen at end of summer. In time for schools to start.

AMERICAN OVERSIGHT

Seminole	General	I'm a hairstylist and would like to suggest the same guide lines as hair salons now have in Germany, stylists and customers hav to wear a mask, clients need to wash their hands as son as entering the salon, haircuts only on hair freshly washed at the salon, liners sign a disclaimer to not being sick or around a person that's sick or tested positive and leave a list of where they had been the last two weeks. Stylists and clients have to practice social distancing and only one client at the time, no family members in the salon as well. For restaurants, let them open with 50% capacity, practicing social distancing , no dancing , but allowing of live music as entertainment. Everyone has to wear masks, a bathroom attendant has to clean after each person and only the numbers of people are allowed in as there are stalls. Encourage restaurants to have outdoor seating on sidewalks and allow for 50% more than they normally would be allowed to have. Let people make their own decisions, face masks need to be mandatory and everyone has to carry a list of places and people they engaged with the last 14 days.
Putnam	Recreation	Could the Gym be reopened? As we sit home doing this time as a lot of people are not working or there job is not considered essential. They are eating and sitting around not being active. This is where the gym comes into play. It is a healthy alternative for a lot of Floridians. Most gyms are open 24 hours so it shouldn't have a problem with social distance. If the beach is open why not the gym. It will do Florida a great service if the gyms would open up. Thank you for your time with this matter
Orange	General	Please do reopen Florida now! We are on the downward slope of the virus, and our hospitals have the capacity to treat those who are ill. A majority of the citizens in Fl, especially in the Orlando area, are now out of work. The unemployment system has failed them at the worst possible time. They have no ability to earn money to feed their families and pay their rent. Have you seen the lines at food pantries? Those are Floridians who WANT to work...and we need to let them do so!!! Its ok for people to stay home awhile longer if they are afraid to go out. But please let each of us make that choice! Please reopen our businesses, beaches, parks, theaters, and theme parks! Trust their management to make wise decisions that keep people safe. Thank you.
Orange	Food	Please reopen our state immediately. The devastation to our economy, small businesses, families, and mental health is untold. The small business that I have dedicated 15 of years of my life to building needs to be reopened. I need to work and to feed my family. Additionally, it is unconscionable that state parks and beaches are closed. Please reopen our state immediately.
Polk	General	Do not reopen Florida May 1st, more people will die unnecessarily if you do! PEOPLE OVER PROFITS!

AMERICAN OVERSIGHT

Leon	Wholesale	Open the gyms up now. How can we keep healthy if we are isolated from the very things that can make us healthier. Also, the economy is in a tailspin. We all need our jobs. Open Florida now. The elderly and people with medical conditions should self isolate. Don't hurt the rest of us that want to live life.
Volusia	Retail	Restaurants, Theaters, Libraries, Hairdressers and Barbers, and last but not least the Lottery state offices...
Brevard	Education	I realize we need to get the economy going again. When opening Florida back treat each county different. The counties with no or little case should be treated differently than Miami, etc. Open outdoor things up first such as zoos. Then allow restaurants with outdoor seating to open. Any inside area or activity should be considered last for opening. Also, reopen areas to residents first. Do not allow non residents in to participate in our reopening until ready, a couple of weeks. Thank you.
Hillsborough	Food	Reopen the state! It's been long enough. I would suggest at first only opening the theme parks to FL residents to have more control over the crowd size. BUT it you take away from the experience with requirements of no parades, fireworks, mandatory masks I for one will not attend. There have been germs forever and if someone is that fearful of getting sick they need to.stay home from the theme parks. Also consider how many people would collapse on the heat of a FL summer of masks are required. People need to get back to normal life. We complied with the stay at home order but that doesn't mean we will just fall in line with all of these requirements to open back up.
Hillsborough	General	Please don’t open the state too soon. We don’t want a surge in infections from people ignoring social distancing too soon. It’s not worth it! I know there are people needing to get back to work so they can survived monetarily. I get that. PLEASE fix the unemployment system so these people can receive the funds needed for food & meds & rent. I don’t think that’s too much to expect from out state government - a functioning support system. Thank you
St. Johns	General	Please consider working in line with Georgia. As a resident of north Florida, we have the potential for individuals to travel a short distance for services. This is money that is needed and could be well spent in Florida. The option to open does not indicate a requirement. But, allows the businesses to earn money to support their families and allows individuals ready to utilize these services to do so. Considering Coronavirus is not new and will continue to be around, we must consider the element of herd immunity. Thank you for the consideration and work everyone has done through this time.

AMERICAN OVERSIGHT

Palm Beach	General	I strongly believe that we shouldnt reopen florida. Many believe that Covid-19 has already reached its peak and that with precaution we will be okay but sadly we are living in a society with people who cant respect the rules and regulations put down to keep us safe. Many people are ignoring the social distancing rule, the curfew put down for us and the basic recommendations to have a mask when entering essential areas. Many people i know personally are displaying symptoms but dont want to get tested due to fear or common ignorance and i know that as long as there are people out there like this more people are going to get sick. As more and more people get sick the more chaos we will be put into. People may not appreciate the quarantine we are in but it could save the lives of so many people who may not have an immune system strong enough to fight this virus. This is comming from a girl who is the oldest of 6 kids and currently studying to become a nurse. No one wants florida to open and even if you ignore these pleas, people wont be so willing to send their kids back to school and parents will file for unemployment because they dont want to risk coming home and getting their families sick. Please take this requests seriously and understand that economically Florida will recover when everyone is in prestine health. As of now it will only make things worse to open things up. Thank you for everything that you guys have been doing up until now and i hope things get better.
Brevard	Retail	Thank you for all of your hard work! I cannot imagine how taxing it is weighing each and every element you receive daily in order to help the people of our state. I am a native a Floridan. 2 years ago I came in to help a dying local store that was upside down financially. After 2 years of hard work and putting our local people first our little thrift store not only has a wonderful reputation for helping our community but is also exceeding our expectations financially. Then came COVID. We stayed open until the last minute we were allowed. We applied for the PPP and have not received any funds yet. I applied for Unemployment, but bc I am an independent contractor the system isn't set up to take the new regulations into account. If we don't open, we will not be able to pay the rent. We don't want gov.money, we just want to be open and work! Our local community needs us, we bring light to their days, give them hope and provide free or inexpensive things for them. Walmart should not be making a killing while small inexpensive businesses suffer. Please help those of us who want to help and be part of the financial solution. I don't want unemployment . I want to work!
Miami-Dade	General	Open restaurants and stores and have people wear masks and keep distance until vaccine is ready Open beach and have the people guarding the entrances now patrol to insure proper spacing This is American trust the people especially in Florida
Hendry	General	Too soon to open. When there's no cure or treatment. .due to my job i with people everyday. Some people look sick and are not wearing mask or gloves and are out like nothing is happening. Not enough testing . Make it mandatory to use mask if they're out of the house.

AMERICAN OVERSIGHT

Flagler	General	With less than 2% of the state's population having been tested, opening things back up to "normal" is an asinine idea unless there is a state mandate that all people mush wear a mask of some sort in public. Also, if all these masks have have been sent to the state veterans nursing homes, why are the staff only issued new masks at the Emory L. Bennett nursing home on Tueaday and Friday? Say resident x is infected, sneezes one cna y and she becomes infected. Then she goes about wearing the same infected mask and possibly infecting other residents. Something needs to change in regards to the issuance of masks at this facility. I realize people want to get back to work and back to living their lives, but we have a new normal and while "only" a few over 1000 people have died, opening things back up has the possibility of even more deaths. And one more death is one too many.
Miami-Dade	Recreation	Please consider reopening public boat ramps and marinas. There is a huge inequality and divide in classes between those using the water currently who have access to private marinas or live on the water and your honest tax paying citizen. As a tax payer, a Marine Corps Veteran, a professional firefighter who can follow the rules by not going to the sandbars and keeping social distancing, I shouldn't have to be punished and prohibited from using ramps that we the people pay for. Again, please reopen the ramps and marinas in the best interest of the majority.
Pasco	Professional Services	I am a hair dresser wanting to work again. I will take one client at a time and will wear a mask. I will also encourage my clients to wear a mask. I would love the state to reopen and encourage all citizens to wear masks if they go out in public.
Flagler	General	As our numbers rise, Florida CANNOT re-open. Everyone is still vulnerable to this disease since it is highly contagious. We must stay hunkered down away from people. Flagler increased 30% this week. People are itchy to get back to where we were; BUT if this happens to soon, it is going to backfire and we will have to start all over again. The Governor should declare for the state that anyone who is out in public around other people, social distancing, MUST WEAR MASKS. Government De Santis needs to look at the figures on a weekly basis to make a decision but Florida cases Must decrease sharply to re-open.
Duval	Retail	Consider the supply chain of cleaning products and protective equipment (masks) available. For business to reopen they need to have a way to be able to purchase those things for their employees. Currently the supply chains for them are dry and new supplies tend to be diverted to healthcare rather than retail orders. In short small business owners will have problems acquiring disinfectant and ppe and will likely not be able to provide a safe environment. A lot of small business owner probably won't care and will expect their employees to work without those things because they are impossible to acquire. Even if they are acquired they will be diverting them from much needed hot spots in other parts of the country. Causing more issues in those places.

AMERICAN OVERSIGHT

Orange	General	While stay at home orders has undeniably helped us slow the initial spread and prevent our hospitals from becoming overwhelmed, we've reached a stage where it's no longer acceptable to continue our current course indefinitely. Every day we continue to learn more about this virus, and currently as I type we are being warned that there is no evidence to support long term (or any) immunity after contracting the virus, so holding out for herd immunity seems like a poor option. Additionally, there is no guarantee an effective vaccine will ever be developed, and will not be available for some time. Many of our neighbors will be starving and/or homeless before then. Finally, if an effective treatment were close to being found we could continue to shelter in place if that timeline were a matter of a few months, but alas this is not the case either. Given all of this, I think it's time we move to a phase where we allow businesses to open as they please, but require people to socially distance as much as possible, wear masks, and require hand sanitization or washing stations that are easily accessible at entrances. Personal responsibility at some point has to take over. Finally, we need to allow those who are currently furloughed that don't feel safe returning to work, as well as those who are elderly or immunocompromised, to be able to stay home and be eligible for unemployment regardless if their employer chooses to reopen or not. There will be the argument that people will just stay home and collect free money, but this is a poor argument that assumes the worst of our fellow man and presumes that people would rather receive much less of their regular pay.
Polk	Tourism	OPEN the State. Maintain social distancing Emphasizing frequent hand washing But We Must get back to a sense of normalcy
Volusia	General	I think we need to take it VERY slow...But NOTHING should be reopened until we are seeing a steady decrease in numbers all across the state. This crap about “don’t punish the areas not impacted” has to stop! If the Governor has done his due diligence sooner, we might be having a different conversation. But he is asking the masses to accept the risk to accommodate the idiots who don’t care! My life...my 73 year old mother’s life is worth more! We MUST go slow...look at the plan laid out by Tennessee! Split each phase into part a and part b...and the MINUTE we see even the slightest increase in numbers, we roll back to the beginning. Before ANY of this can begin, we need to see more people being tested and no increases in positive tests for 14 days...no excuses, no exceptions! Because if one county is closed, whose to say that infected people won’t cross county lines to take advantage of what’s open...use you head people...not your pockets!!!
Hillsborough	Recreation	I think summer camps should be canceled this summer or atleast have the numbers really low. Children can be carriers of the virus and not know and then give it to the counselors. There either needs to be strict number guidelines or no camp at all. People also come out of state for camps which is going to be a big problem.

AMERICAN OVERSIGHT

Orange	Technology	Questions need to be answered first..... If you've never had it, how at risk are you to catching it? If you've had it, how at risk are you to getting it again? The president is telling the country to inject themselves with household cleaning supplies, how can we possibly open a state with that kind of advice? This state can't do elections correctly, how on earth can we trust them to handle this? I understand people are really struggling right now, but is it worth it to re-open the state and possibly lose even more lives to make some money? If theme parks aren't in a rush to re-open why is the rest of the state in such a rush?
Leon	Transportation	Open the gyms up now. How can we keep healthy if we are isolated from the very things that can make us healthier. Also, the economy is in a tailspin. We all need our jobs. Open Florida now. The elderly and people with medical conditions should self isolate. Don't hurt the rest of us that want to live life.
Orange	General	I personally feel like opening up the state will definitely give people a sense of relief where they can go to work and still stay safe at work. Being confined to a house can make one go insane if they aren't use to it so i believe we should open back up but be safe as well
Seminole	General	Please do not open the state yet, it's nowhere close to time yet. The economy will not recover without way more assistance now and later from our government. Opening now will kill people and more than likely will not help businesses as most people will still not go out. We need to remain closed together and pause everything from mortgages and rent to utilities. Anybody for opening now will have blood on their hands and will be remembered that way.
Lee	General	I think that it is CRAZY for Florida to consider opening up yet. Between March 15 and this past week I have left the house 3 times. We are staying home because my husband is an essential worker. This past week I have become very sick and have had to go out 3 times for medical testing. The first was for COVID test (which we believe was done incorrectly), one for X-rays to look for fluid in my lungs (the Lee health made me sit outside in 90+ degree weather which made my breathing and cough MUCH worse and was almost hospitalized because of it) and last to go to be finally seen in person by a doctor (who believes I have a false negative on COVID test) So as someone who stayed home for over a month - I still have become extremely sick and I am sure there are 1000's more like me. It took me 2 Telehealth calls and 1 to my doctor before I was even tested. 5 days of getting worse before anyone did anything to help PLEASE do not risk more lives until a LARGE percent of people re tested. I would like to recommend that you have pharmacists and other health care go to communities to do testing. This way people don't have to leave their homes and spread.

AMERICAN OVERSIGHT

Hernando	General	Please do NOT allow gyms to reopen. They are a hotbed of germs. The amount of body fluids expelled there make it virtually impossible to disinfect every surface possible. Every gym would have to assign one person to every person working out to ensure that they clean every surface touched. You know the gym is NOT going to see that this happens. This environment makes it impossible to provide a safe place... Even.if they allowed only a certain amount of people in at one time, the wait times would be so frustrating that it's not fair to everyone. The gym.would start to relax it's rules to accommodate everyone. Please, please, please do NOT allow gyms to open at this time!
Orange	General	Please get our economy back open. Business is suffering and we need to open back up before it is too late and business can not recover.
Orange	Tourism	I feel like June 1 is around a good time to open simply because right now things still can get bad and we don't want that . I work at the airport so I'm susceptible of getting it and I have a heart condition so i wouldn't know if I'll survive from it and let alone my mother who has different health concerns . Please don't open sooner than June or July
Escambia	Professional Services	I think we need a safe approach for reopening slowly. I think social distancing should remain in affect. All high risk people need to take extra measures. We need to get our economy back but be safe. As long as businesses are taking measures like taking temperatures and anyone sick does not come to work
Orange	General	I would like to see the state open for normal business. I feel it is the individuals right to manage their health and well being. I feel the media and politicians have over exaggerated the situation.
Pasco	General	We need to reopen Florida immediately and work on getting back to our lives. In this time period my employer has eliminated my position (sales manager of 16 employees) unexpectedly the day after I signed the papers on my new house. For me to move forward I need Florida to reopen so I can go back to work. Employers don't know what to do which is putting off a normal hiring period. Everything is essential. I also have to kids with special needs. Not enough is said about how hard it is on them with no therapies or doctor visits allowed for them. Hopefully not but putting off therapies and elective surgeries could cost people lives down the road as it will cause issues. Moving into a new house it's hard just to get furniture or a washer and dryer installed. Currently the world feels like we lost basic human rights and freedom. We really need our freedom back so we can move forward. To the people who don't think we should reopen due to fear. That fear is going to be there even if we come out 3 years from now. We gotta open up to show them it's ok to come out. Opening up will also make the unemployment numbers drop. That can only help the state move forward. Let's move forward and start reopening this state.
Flagler	General	I'm old and know how to protect myself. We have to open so young Americans can survive financially.
Palm Beach	General	Like everyone else, I'm anxious for life to get back to normal. However, I don't wish to open things up just because people are anxious. If we open too early, then the past 1.5 months would have been for naught. Do not capitulate to peer pressure. Open when it is safe.

AMERICAN OVERSIGHT

Citrus	Finance	you can't even begin to think that we can open our economy without money in our pockets. Fix the unemployment problem allowing us to also qualify for the additional funds for unemployment so we have money to spend. If you can't fix the unemployment I wouldn't even bother opening Florida for much business.
Broward	Education	Essential workers can’t continue to work or even get back to normal if there are NO places to put our children. I am a single mom and bring my child to work and do the virtual learning and it’s so overwhelming .. I won’t have a job soon if I have no where to put her for the summer.. please allow camp so working parents can still keep their jobs and not be unemployed.. thank you for your time!
Clay	General	There is enough statistical data available to suggest ending the stay at home orders except for hotspot areas and nursing facilities. Individuals with underlying health conditions of high blood pressure, obesity, and diabetes should stay quarantined until such time as the individual is comfortable going out in public. The curve is flattened, hospitals have capacity, and healthy individuals are clearly not in danger. Please open up Florida and allow citizens to make their own choices.
Volusia	General	I think we shouldn't open the state completely until the scientists say it's safe! If we open too soon and the virus runs rampant again, we will end up shut down once again!
Orange	Professional Services	Please open everything up immediately, with restrictions of course.
St. Lucie	General	I don't believe that the best interest of everyone's health is to reopen the state at this time while this virus still exists and is effecting people daily. I understand people need to work to survive but what good wl'll it be if everyone just keeps getting the virus and spreading it. I say please wait on reopening the state and keep the social distance order in place at least another month so we can get this virus under control and over with. Thank you
Duval	Healthcare	My husband has been in Baptist hospital since February 28th. Intensive care. Not COVID related. I have not been able to see him since March 15th. Due to extensive hospitalization and compounded with not being able to have one visit , even for a limited time, is detrimental to his overall recover. He is not eating and becoming withdrawn. This total isolation on patients and their family members is more of a hardship than the pandemic. I understand infection control since I have been a RN for over 23 years. But some form of limited visitation needs to be allowed with proper PPE and hand hygiene. If a patient is in Intensive care it’s a know fact that the presence of a loved one can make all the difference in a patients state of mind and overall recovery. Please consider even minimal scheduled visit for. these patients and their family members.
Pinellas	General	Please hold off on re opening a bit longer. I am very concerned about the rampant spread in nursing homes and alfs. We need to ser our numbers decrease significantly before we open Florida back up. Tourism is our savior but also our destruction

AMERICAN OVERSIGHT

Palm Beach	General	I think we as Americans can think for ourselves and do what needs to be done in a common sense way to open our County and State in a safe proper manner. I have a 10 yr. old grandson who wants to go back to school and play baseball and basketball. Now maybe those sports can't be done right away but at least give these kids a sense of normalcy coming soon. Also, think about the people who before all this started we're having some personal problems such as depression, suicide and just being in a far away place who need to get out of their houses. Whether it is to take a walk on the beach (which are closed) or just take a bicycle ride. We can't continue to hold these people in their houses...just inhuman!! Please open beaches, baseball fields, gyms, hair salons, nail salons etc., etc., and know we as Americans will do what's right! Thank you!
Lake	Government	By reopening you put 1000s of high risk people who have been sheltering at home at risk because they'll be forced to return to work. My sister has half a lung missing, my friend an immune deficiency they come in simple contact with a carrier they could die. You're penalizing and killing people who have done the right thing. I hate to say it but as a Native Floridian it feels like the Governor doesn't care one bit about the citizens. It's been about money since this started. If it was safe advent health wouldn't be making whole floors for covid patients. Elderly released from hospitals would not be getting turned away from their assisted living homes. If it was safe the theme parks would be open. If you fixed unemployment give the people what their owed which should be TOP priority they don't want everything business as usual. Many of us feel lied to by those we chose to lead the state. Personally I pay no mind to press conferences since they're about money NOT THE PEOPLE. I don't feel the press conferences tell us anything. I listen to the RNs I know on the frontlines because the people and health is more important to them than money. Lake county is not safe. Nothing has been enforced except restaurant closures. Testing just started and they're charging for it. To reopen May 1st is suicide. Would people be that expendable if it was someone you loved? Someone should pay attention to how New Orleans is running things. A city and state that truly cares for its people and the tourist industry that keeps it going. The people not the money come first. All festivals cancelled thru 2021. That's how you take care of your citizens. I was born and raised in Florida right now I am ashamed to call it home. Money over people's lives is not how it should be but has been since the start. Everything should've shut down when the

AMERICAN OVERSIGHT

Hillsborough	Recreation	I strongly feel that gyms/all fitness studio/pilates need to remain closed. I'm a pilates instructor and my studio owner wants to open back up his small group fitness studio without any modifications or extra protocols. He didn't close when the stay at home order was issued because. We are classified as a Private Pilates Instruction Studio , NOT a gym. Our members are in a sense, students mastering the discipline of Pilates. That is supported by the fact we have class levels that can't be accessed without teacher, or General manager approval. All use of our apparatus and/equipment only occurs under trained instruction by certified teachers. If you do decide to open gyms/fitness studios can you please be very specific on what you mean. Thank you!
Polk	Professional Services	Here in Polk county our covid cases are still increasing. I do not support the reopening of hair salons, barbers or nail salons in the first round of reopenings. The services provided at these business cannot be done safely. It is completely impossible to provide these services and maintain social distancing. Additionally, wearing a mask, especially at hair salons and barbers, would be difficult to enforce due to the elastic going around the ears. Hair color would most definitely get on the elastic and the elastic would get wet during shampoos. Clients would be inclined to remove the masks when this occurs. Also in these types of businesses you don't know where the clients or staff have been or who've they've been around. Lastly, in regards to hair salons, there are hair dryers being used constantly. These could potentially blow the virus around exposing other clients as well as staff. Please reconsider any thoughts of opening such establishments in the first round of openings. It's very clear the potential to spread the virus as well as not maintain social distancing and mask protection would be extremely difficult if not impossible. Thank you!
Seminole	Finance	I work in finance and am financially taking a hit so I'd love the state open ASAP. But opening at a responsible time is most important. Too early wil cost a lot of lives and will put us 2 steps back. Smart play is wait until June and review again. I'd like a haircut as much as the next guy but not going to risk my life and my kids lives over a haircut. Don't be as ignorant as this governor of Georgia.
Sarasota	Professional Services	I am a cosmetologist and I am scared to go back to work. I can't stay out of peoples faces. When I am doing nails I am less than 1-2ft from their face. And hair is a little further away but not when I'm cutting around their faces or their bangs. I have already decided we will all wear masks along with our clients. I miss working but not sure the state is ready to open up. We have an older population. Especially in Sarasota County where I live. 75% of my clientele is over the age of 65. And we have 3 employees that are very close to that age. Please take into consideration the age of our state and go by the what the medical professionals are asking and telling us to do. I think that would make us feel much better if we follow their guidelines.
Polk	General	We do not want state to be opened until Drs say safe and a couple weeks past peak Stay at home guidelines must continue for our safety of everyone

AMERICAN OVERSIGHT

Sarasota	General	I think a gradual reopening with recommended safety measures is fine. If a business can open and still adhere to the CDC guidelines then it should be allowed to do so. I am at high risk so it is my responsibility to stay at home and let the low risk people get back to work. Keeping our businesses closed is not sustainable.
Hillsborough	Government	This state does not need to open up until significantly greater numbers of people have been tested. This is a travesty of a state. I am so sad to live here. I am so sad my children luve and work here and have received nothing, not even a confirmation email, that their unemployment application was received. Do better. Do the right thing. You will have blood on your hands that the blood of Jesus will not wash clean. Bloody capitalist.
Orange	Administrative	Please DO NOT open the state/county. People are not being careful and there will be more cases.
Pinellas	General	My concern with opening Florida back up at this time is the people who are not taking this pandemic seriously. I've seen people sick, working. I've seen someone off smoking behind a restaurant, coughing, and then going right back into a restaurant to work. I've been to multiple fast food restaurants and the person at the window handles people's cards/cash and then walk over to the food and handle the food without washing or sanitizing their hands. The restaurants are not regulating themselves. If more people beging to catch this virus, it is going to spread exponentially thru food employees alone. I've also watched people coughing wildly in a grocery store, recording themselves. On top of it all, some people just aren't educated enough or just don't get how to keep themselves and others safe. Not everyone is on the higher end of the IQ scale. So, we do everything we can to keep our children safe as parents. Shouldn't we work to keep the people who can't keep themselves safe due to their inability to comprehend how to keep themselves and others safe? Like my mom for example... She delivers food from a food bank to tons of people of lower income... She isn't able to comprehend how to keep herself and others safe... I watch her touch all over her eyes and mouth. She has a mask that she wears yet touches all over it without cleaning her hands. So, if she catches it, tons of people will catch it and she can easily catch it if someone else has it. I believe it should tgin out a bit more before Pinellas opens back up. There's already unsanitary people doing essential jobs that are not doing what needed either because they don't care or are just unaware.
Hillsborough	Government	Open this economy!!! This was not needed and should never ever happen again.
Manatee	Healthcare	Do not reopen until there is adequate COVID-19 testing available and hospitals have capacity. Prepare for the second wave this fall. The first wave of the 1918 pandemic killed 2-3 million, the second killed 20-50 million when the world population was less than 1.5 billion.

AMERICAN OVERSIGHT

Seminole	General	Please consider the harm reopening Florida will do. Things are hard for everyone at the moment but reopening nonessential businesses and allowing social distancing will just cause another spike and another lock down later in the year. As a State we need to think about us as a group rather than individual needs. Sacrificing a few weeks of non essential actions like hair cuts, going to restaurants, and theme parks is what we should be doing to preserve the lives of fellow americans. We cannot be selfish. The economy will recover but we cannot bring back those who will die. Please ask yourself, how many men, women, and children are you willing sacrifice for the sake or the economy. If you can produce a number, then by all means, tell the people and reopen Florida.
Lake	General	No. It is not time to reopen most businesses. We need to be able to test universally and these tests need to be FREE. In addition, once re-opened, social distancing AND wearing masks should be mandatory once reopened and non-compliance should incur a fine; these measures should be in place until a vaccine is approved, tested, and universally available.
Seminole	General	If you're going to keep the state closed make sure you stop the bills make sure you send me a check every week like that i could feed my kids and my family all right think about that shit!
Osceola	Government	I don't think Florida is ready for a re-open yet. While Covid-19 cases are still on the rise, there's no safety net for the public yet. I'm 39 and my daughter is 9 years old. We're both with underlying health conditions (asthma) while there's no safety net for us if Florida re-opens we will be both forced to go out to our normal lives while putting our lives at risk. I'm blessed to be working remotely and be able to care for the both by staying at home (only go out once a week for groceries shopping) I'm a single mother doing my best to protect her and myself. Just like me there's a lot of single parents in my same position. While I also have close family members (father & mother)who got either furlough or their business are closed (non-essential) however they do understand the meaning of health over wealth. Is too soon to re-open. I would sacrifice a bit longer in order for all Floridians to possibly enjoy a safe summer. Please extend and reinforce a stay at home order until June 1st please 🙏 opening FL now would mean opening the door to the tourist and make things worse. Please health over wealth!
Orange	General	My name is China. My stimulus was due yesterday April 24th to go to direct deposit, but when I checked the account number was one number off. OMG. So what do I do now?? I suggest the IRS be reopened first.
Orange	Government	For the safety of the people we should not reopen this soon. We're trying to flatten the curve not put the lives of everyone at risk. Everyone should wear a mask when going out in public to reduce exposure along with socially distancing. More grocery stores should enforce one way traffic throughout their stores and plastic barriers should be in place for cashiers. The USPS is also very important and necessary and should be receiving aid.
Orange	Government	Keep Florida closed. Its too early! Remember the Spanish flu epidemic?! Round two is around the corner. Also we should have the option for virtual school at all times

AMERICAN OVERSIGHT

Brevard	Real Estate	Let's talk about salons, I do nails and am curious as to what precautions should be mandatory since we sit directly across from a client face to face and are touching their hands.. I feel as though we are being overlooked with talks of reopening . I have a "sneeze shield" and a mask. Is there anyone from the cosmetology state board on this committee looking out for the industry?
Marion	Retail	I am opposed to opening everything up just yet. We may be on a plateau, but it hasn't been long enough to even determine that. Quarantine needs to continue and then a gradual reopening in stages. Social distancing needs to be maintained, enforced during these stages.
Polk	Tourism	For the theme park my idea is to have people tested no more than 3 days prior then they can get a card with their picture and connect with a fingerprint. That card expires 14 days after the date the tested negative. That will get them into the hotel and theme parks. Hopefully soon they will have more rapid testing. They can get a certificate and then have a place to go to get the card
Volusia	General	I do not feel we should open the state until this pandemic is under control. Too many people are nonchalant about this. While sitting in a doctors office yesterday, an elderly man without a mask sneezed into the entire room. I was mortified. I have almost all the underlying conditions, heart disease, asthma, allergies, auto-immune disease, and I am 65 years old. I understand the need for people to make a living, but at whose expense. I agree that some businesses should be allowed to open, especially the ones who rely on tips to make ends meet. I think everyone should have to wear a mask in public. Please weigh all factors before opening the state completely.
Volusia	Professional Services	Sorry if this submityed twice. Please i ask you to consider a longer reopening of salons and like industries! Having almost 20 years as a haorstylist, i have learned that VANITY TRUMPS ALL!!! People will come in sick as can be and still want their hair done not to mention salon owners will not turn down the income, puting the stylist at the upmost risk !! There is NO WAY you can apply social distancing in our industry there is constant touch, and less than 1 foot between client and stylist. Not to mention most stylist station cant be moved and are less than 2 foot away from each other. You can not cut hair with gloves on, let alone dry with tem on !!! PLEASE, I BEG OF YOU to consider a longer reopening of salons amd like indusyries ! Thank you

AMERICAN OVERSIGHT

Brevard	General	I agree that Florida is ready to reopen. I do agree there are segments such as elderly and homebound, shut-ins and ability challenged who do need oversight as to whom they are brought into contact with as far as health care professionals. Conversely Florida is a tourism state and the transient workforce relies upon the service industry for livelihood as well as the hotel/accommodations industry, they Need business. We can still practice spacial distancing and other guidelines while going about again in our daily affairs and we Do Not need to be society's nanny. Adults take care of children and give care for their elderly parents, please stop using some imaginary lower mentality level to degrade all of society to a non-intelligent, low level educated population that cannot fend for themselves and needs perimeters and boundary lines on the floor this is both demeaning and degrading. We in Florida are among some of the most highly intelligent, highly educated with the space industry and gov. electronic contract work of any population in the country I believe showing confidence and a positive attitude in support of people does much more for the confidence and emotional support of people and leave the worry-wort talk of lawyers in the background. Open us up!
Volusia	Healthcare	This shutdown is not sustainable. Being in the higher risk category due to age I still feel we need to reopen for the sake of younger generations and get life back to normal. Whomever is uncomfortable with this has the option to stay in. Our immune systems are being compromised with all of us shut in and not intermixing. Also many people with other health conditions are not being treated. Need to set up covid only hospitals and monitor closely nursing homes. Based on my readings I do feel HydroxiChloroquine should be used on all new cases until proven otherwise. There is enough anecdotal evidence to support this. Waiting till patient is hospitalized is too late and viral loads are too high for it to overcome in most cases at that point.
Brevard	Healthcare	I work on Cocoa Beach for an Optometrist. I have seen how very few have taken social distancing seriously. I am very concerned when I am in someone’s face adjusting their glasses or taking their pupillary distance or putting contact lenses in their eyes that I will be extremely vulnerable to whatever virus they have. I get the fu shot every year but still end up with the flu half of the time because people won’t stay home when they are sick, COVID-19 scares me 100 times more. I am 54 with controlled hypertension and have been obeying the “stay at home” suggestion. That is all it has been is a suggestion. A lot of people do not understand how this virus works or believes it is some kind of government conspiracy.. it is to soon to open the state back up. Unfortunately people think they are invincible and will spread this virus even more.
Broward	Accommodation	I live in a condo on ocean. Open Condo andvApartment pools and beaches simultaneously. This will take the burden off beach volumes. By not allowing people to use their pool, they will go to beach. Secondly, open retail stores. Not fair that Walmart and Target get all the traffic. Third, Restaurants, indoor and outdoor reduced capacity. Forth, let ARNP in Pharmacy clinic to perform testing of Covid antibodies and virus.

AMERICAN OVERSIGHT

Orange	Education	The state should be open in May 1st on Friday to have our state back and we all could live our lives and back two normal also have our business back and stores so we can have everything normal also so we can see our family and land friends and loved ones so we can be happy to see them and we all could be happy once again.....
Marion	General	I think we should not open our state of Florida until July. People are not taking the situation seriously and are too careless. I see there will be an explosion of cases. Online school for 2020-2021. No sports, concerts, beaches...
Orange	Retail	I work at a financial institutionn. We are constantly exposed as essential workers. People in the area are not social distancing or wearing masks on a consistent basis. Essential workers are not compensated properly for the level of risk they take. I personally make less than $15 hr but sit across a desk & handle currency for those opening accounts both small businesses & personal. I see more people out than ever even though I live in a zip code in Orange county considered a hot spot. More testing needs to be done. None have come to our zip code. So many restrictions on those being tested & limited availability. I fear a second even worse outbreak.
Clay	General	I work in healthcare and I feel like opening the State up now would cause major repercussions. I think we will have a major setback and more sickness and death. I know we all need to work and the economy is losing out but lives are far more important at this point. Please consider waiting a few weeks and see how this plays out for the States that are opening back up.
Palm Beach	General	It is too early to open businesses and public areas. FOLLOW THE SCIENCE
Lake	Information	As a close friend and family member of many small business owners I am asking that you use the information for why you put the stay at home order in place which was to prevent our hospitals from being overwhelmed. We now know this will not be an issue in our state. Please do what is right and all everyone to reopen.
Lee	Recreation	Please open the beaches. All of the beaches. If everyone opens at the same time, no one beach will be inundated with folks from other parts of the state. We are already learning that sunshine and warmth are effective against this virus, not to mention for the better mental and physical health of all of us. Promote social distancing on the beach. Here in Fort Myers we have patrols on the beach. I assume other beaches do too. Since hotels and vacation rentals are not booking, this would be more of a “local” beach opening on both coasts. If restricting us to walking and swimming at first is one way to gradually open beaches, so be it. But honestly, I see no reason we can’t just open beaches with no restrictions except social distancing and limiting groups to 6 people. Those are my thoughts. Thanks for considering them.

AMERICAN OVERSIGHT

Collier	Accommodation	My interest and therefore concern is for residents of assisted living/memory care facilities. My dad is 96, in memory care and has not had a visitor in over 2 months. I see him outside his closed window but he has trouble recognizing me that way. These facilities are private, for profit businesses. So they are well incented to take in new residents, but I believe need guidance on how and why they should reopen to visitors. Visitors are not always welcome on best of days. Someone needs to speak for these residents on the task force. Dying of isolation and loneliness is just as painful as dying of a virus. So...some recommendations on when, how to reopen them will help protect our most vulnerable folks. As well as allow families to again become overseers in their loved ones care. While delivery people, staff, visiting nurses, pet walkers etc go in and out..I as a daughter cannot visit, even tho the entry criteria for the others is a temp check. Thank you for the oppty to contribute.
Marion	Government	We definitely need to open the state. However, it must be done slowly and carefully. Hot spots should be the last areas to open. Masks should be worn. We can't just have a cold open. Please listen to the people and don't rush into it. Thank you.
Volusia	General	While I understand that the economy is very fragile and extremely important to our way of life, it is meaningless if we do not control or stop.the spread of this virus. My suggestion is the same as any other intelligent medical person, open 2 weeks after you have no new cases added, with a caveat that during that 2 week.period, there be no new cases added. That way you know for certain that you are in fact on the downward side of this virus curve. Florida can not afford to become the hotspot for a resurgence with this virus simply because we need to generate monies. Otherwise, you must answer loudly, exactly how much is a life worth.
Orange	Accommodation	Slowly reopen small hotels an small business over3 week period then reopen regular business over 3 week period finally reopen parks movie threatens sports arenas
Broward	Healthcare	I am writing this email to express my concern that our State may move too fast to reopen. Broward is far from being at a good turning point from Covid 19. I hope you listen to the medical community and your residents most if whom would shudder at the thought of going back into the community and exposing themselves to the virus. We have sacrificed going outdoors in the hopes social distancing and stay at home help and it has. What a waste if we do not continue these methods for at least until June. Thank you.

AMERICAN OVERSIGHT

Brevard	General	The economy must get going we have been locked in our homes based on the lack of or inaccurate data, you cant build an immunity to the virus by quarantining the healthy let's protect the sickly and vonurable and get the healthy back to work now, we cant allow what's been going on as the new norm we need to get our churches open again and we need to remember that you cant restrict America in the name of safety and not become like Nazi Germany we must always remember what are freedoms are and limit our elected officials power and know where to draw the line. Thank you for your service and guidance
Lake	General	The reopening should happen in phases. The sooner we can complete phase one the better it will be for the state economy. Several people, though will qualify for unemployment, have not gotten their checks yet and people need money to survive. We need to be very careful, however, and there need to be strict policies in place to ensure everyone's safety. Restaurants when they open should be at limited capacity and guests should sit apart by at least 1 table or booth. Plans should be in place in case numbers go up in caseshqt require a phased shut down as well.
Osceola	General	Think its too soon to open up. Its a virus that spreads and anyone can get it again
Pasco	Recreation	Please reopen the parks and/or beaches to Florida residents. Those of us with mental health need some kind of outlet. I also work on the beach selling my handmade artwork, so with beaches closed I have completely lost my source of income as well. I have been struggling financially and mentally. Do not keep healthy people locked inside! Give us all some hope and start a slow, gradual reopen of the great state of Florida. I believe, if nothing else, that opening some of the recreation would at least give people a small indication that there is some light at the end of this dark, winding tunnel while providing an outlet for adults and children alike.
Sarasota	General	Florida is not adequately testing/screening/tracing in any kind of serious epidemiological way, so we truly have no accurate idea how far the virus has spread, how many cases there are, or even how many deaths we've got. Plus 🤡rump is a babbling, psychotic disgrace. Please keep our economy CLOSED until there is some semblance of control. Please fix your broken digital systems. The current unemployment website in Florida is a crime against humanity.
St. Lucie	General	I think that we should re-open, and leave it as the decision of each individual as to whether or not they want to take the risk of leaving their house. It is not fair to those of us with non-essential jobs to have to struggle for money because people are losing their minds over something that is only half as deadly as the flu. It is also not fair to the people unaffected by this virus to have to be quarantined and kept away from friends and family, cancelling bacations, etc. I realize people can not be evicted or anything during this time, however, all of that money will be owed in the future, and everybody will have to work 2x as hard just to play catch-up. All in all, my opinion is that it is in the best interest of the community, as well as the economy, for Florida to begin Re-opening.
Duval	Government	When the Governor’s safer-at-home order expires, the Governor should reopen the state!

AMERICAN OVERSIGHT

Palm Beach	Healthcare	It is absolutely too soon to do any type of soft opening or slow introduction back to non essential businesses, beaches, parks and recreational activities. Besides the fact that this virus is still new and more data is being uncovered, the amount of people who have been noncompliant under our current stay at home order is dangerous. If any type of soft opening occurs, this is going to give those people more fuel to continue to act recklessly. This virus doesn't always present with symptoms and that is extremely dangerous. An individual does not know they are carriers and at the rate of ease with which this virus is transmitted we will certainly be looking at a spike in infections and probable deaths. Stop feeling pressured to open and do what's best for the people by keeping them safe and healthy.
Volusia	General	1. Follow the guidelines created by the science oriented members of the President's task force. 2. Fix the unemployment pay system so there aren't so many desperate Floridians and then fire the idiots that created the system that has done so much harm and let them experience what unemployment really means. 3. Give local leadership responsibility (mayors, county councils, etc) authority to phase in the re-opening as the situation requires so long as it does not exceed what the guidelines propose.
Orange	General	1. Follow the science. At a minimum, please adhere to the White House / CDC phasing guidelines. As a minimum. Without access to the aggressive testing needed to find and contain outbreaks, these White House guidelines seem like our best chance for successfuly getting back to business. 2. PLEASE show leadership in discussing and explaining the phasing guidelines. Talk about them as the White House guidelines. Talk about them as if you believe they are the right thing to do. Most people want to do the right thing, and most people want to get back to business safely. If the White House guidelines are broadly promoted I think most people will want to adhere to them. And they allow businesses that are able to safely reopen using social distance to do so.
Citrus	General	Reopen Florida. Leave it up to individual whether or not to wear mask. If you do not wear a mask, keep your distance from others.
Polk	General	I think it's too early to open right now. We need to follow the lead of scientists and those in the Healthcare. We need to stay inside until testing is more available and our numbers of cases start to decline. Even if you open the state May 1st, I will not be going out.
Martin	Recreation	The media has sensationalized this pandemic to serve a broader agenda and crashed our economy in the process. Local governments have enacted a chainsaw approach to crisis management when a scalpel was needed. All things are not the same for all people in all places. Population density matters. Eliminate profit incentive for medical facilities to code COVID-19 which inflates the numbers. Reopen the state w some common sense social distancing measures

AMERICAN OVERSIGHT

Duval	General	I feel the state should mandate that businesses who are able to have employees work from home should continue to do so for the next 6-9 months to help avoid a second wave of infection. I know many local businesses such as financial, call center and office based jobs in the area are anxious to have employees back on campus since they are paying overhead expense for empty buildings. Employees who are able to do their jobs remotely should continue to do so and employers should be required to comply rather than forcing workers back into office buildings unnecessarily. The state should mandate this, and offer financial incentives to help defer overhead expense on empty buildings.
Escambia	Professional Services	There is not a "Virus Clause" or "The governor is scared" clause to the Federal or State constitution. Is there a virus? Yes. Will it make people sick? Yes. Will some of those people die? Yes. Is that a valid reason to sentence innocent people to house arrest or order their businesses closed? No! Is my business essential? It is to me. Has the standard become collective? Where does that philosophical axiom lead? If I am not able to weigh out my risk versus reward, and some collective weight is calculated by thebstate, can I be called a free man? You can't look at the costs of the virus and not look at the other side of the ledger. What is the cost of destroying people's life work? Things don't end how they start. If we recognize the state has legitimate interests in shutting down enterprise and suspending freedom to act because of this virus, is it far fetched to imagine a future communist governor giving the same order to achieve his ends. This is unAmerican. This is evil.
Volusia	General	Governor DeSantis should heed the CDCs guidelines on reopening the state and not cave to economic pressures. Opening before the curve has completely flattened threatens the economy much worse than extending the stay at home order until we can safely venture out without further spreading this virus throughout the state. Further, issuing more rigid guidelines for allowing people into our state from hotspots are needed for airports and the Florida border. The 'voluntary' 14 day self quarantine order is not working! Condos are filling up with New Yorkers coming to escape the pandemic who are flooding grocery stores, etc. without quarantine! This is endangering our local residents.
Orange	Healthcare	Hello! My opinion is we need to stay home until May 10th, but with restrictions rules... I've seen a lot people on streets, driving and Corona Virus doesn't stop to spread! If seriously all stop more 10 days, we'll get best results against this enemy! I'm healthy professional and I believe that everybody need to give more 10 days of sacrifice!
Brevard	General	KEEP THE STATE LOCKED DOWN
Marion	General	We do not need to open Florida
Polk	General	I think they should open slowly without compromising people health. Make sure they are enough testing done to reach phase one so nobody get to the point of too many people in one place and they numbers going up again.

AMERICAN OVERSIGHT

Clay	Healthcare	Social distance in my county ends May 1 .that is not right . What about the old .and the people that are sick they have to stay in because adults can social distance. Something needs to be town for my county.we don't even have a mayor. And every one goes up to duval to work . Duval cases are getting out of control. My daughter works in duval in a phone room that is packed and people are sick she had to leave . Nothing is really closed
Pinellas	Healthcare	Please suspend opening beaches until we have more testing. If not it can cause another explosive rise in a problem that we know is subsiding by social distancing. Are you gonna block borders of state n stop people from travel?
Broward	Professional Services	I think it is time to reopen hair salons/nail salons and have them comply with social distancing rules and limit the amount of customers for awhile.
Marion	General	Good Morning, As a recently retired critical care nurse with over 43 years of caring for patients with infectious diseases I would strongly urge the use of face masks by EVERYONE once we reopen Florida. I believe that the use of masks along with frequent hand washing are the most essential ingredients in controlling the spread of this airborne virus. A face cover, while perhaps not 100% effective, will still greatly diminish the viral mist from exhalation thus minimizing droplets on surfaces and in the air. If EVERYONE wore a mask there would be less need to sanitize everything else. In my opinion, it was a grave mistake by the CDC not to encourage the use of masks from the onset. Though I understand why they did this it resulted in the public not believing in the need to cover their face. As a nurse we would wear a mask upon entering an isolation room not to protect the patient but to protect ourselves. So if EVERYONE wears a mask we are protected 2 ways; from transmitting and from receiving the virus. I applaud The Fresh Market who not only make their employees wear masks but will not allow any customer to enter the store without a mask. God bless Gov. Desantis and this task force! Thank you, Lucy Campaniello
Leon	Healthcare	Open Leon today. Open Florida today. The mental health of the public outweighs any potential benefits of keeping Florida shut down.

AMERICAN OVERSIGHT

Orange	General	Hello! First off I absolutely love this type of forum. It's great to get citizens input. I want to also mention I'm a surgical nurse and a former ICU nurse. I have a dual perspective on safety and economic efficiency as far as re opening goes. I think we seem to have adequate testing, considering our positive rate between 3 and 7%. With the addition of the new sites in areas where citizens may have a hard time accessing healthcare, I think we should be good in that front. I would like to see those sites also offering antibody testing as well. We will soon come to learn that the overall infection rate of this virus is prob around 6-7% of our population which means the mortality rate and hospitalization rate are even lower than what we see today. We need to open slowly but also protect the at risk population. We don't have time to be politically correct about this and our health officials need to tell it like it is. Over 65, diabetes, smoker, copd, high blood pressure, heart disease and actually the 2nd leading cause of hospitalization and death is OBESITY with a BMI over 35. These people Who fall into those categories need to be extra cautious, no matter what our plans are. Period. As far as Orange County is concerned, Tennessee released their state wide guidelines and I think they are spectacular. It is a 4 tiered program instead of 3 and it gives, in my opinion, adequate time to make sure they aren't moving too fast. Those are my recommendations. Let's follow the lead of Tennessee. Last I will say, closing down like we are now for much longer will cause more harm in the end. Let's open slow and smart and let's protect the vulnerable. We can do it! (I know see I can attach a photo so I posted TN guidelines)
Manatee	Healthcare	I think it is too soon to open the economy I think the first thing to consider is elective surgeries.
Seminole	General	I am the Exalted Ruler or CEO of the Winter Park Elk's Lodge We need to open our doors soon or we may not ever open again. There are NO forgivable loans available for "Not for Profit businesses (501 (c) (8)" We are the ones that stock all the local school food pantries, donate cloths and food to Veterans at Lake Nona and Lake Baldwin, to the homeless and provide free camps for kids and disabled child services for well over 500 sick children, free. Last year we donated over $60,000.00 locally. We only have enough savings to last another two months and then we close for good and the entire community will suffer a tremendous loss. NOW we need HELP! But, we need to open safely! Presently there is not any disinfectant available! Business opening too early will mean sacrificing additional senior's lives. Presently 50+ seniors are dying every day! Is another 100 or 200 deaths each day worth it! William Belcher ER Winter Park Elk's Lodge Winter Park, FL

AMERICAN OVERSIGHT

Orange	General	Re-open Florida! People need to get back to work. If people have a fear of going out then they can stay home. Everyone needs to respects the space of others and practice social distancing. We all grocery shop and practice safe distancing. Don't see why we can't do that at restaurants and other places of business. Have sanitizer available everywhere you go. People just need to be smart and business need to have a plan in place for there customers.
Sarasota	Healthcare	This state has no business opening until our numbers show significant decrease in new cases. The nursing home situation is dangerous here in Sarasota and Manatee County. Im a RN. I will gladly keep workingat publix so that Non essential colonoscopies can NOT RESUME because of DR greed. We have seen steady increase in new cases hereand the state is not ready. I will not go out to eat,get my hair done or go to malls until this us under control. Everyone needs to he tested before this occurs. As a health care worker I can not get tested. Old people are NOT FOLLOWING GUIDELINES. I see people using PPE so incorrectly it scares me. People using gloves and touching everything with the same pair. Wiping their nose under a face shield that a lay person should not have. Its disgusting and scary. More will die. Keep the state closed until june 1st. Work on unemployment. Slowly start back with essential surgery. Cancer surgery, heart surgery in hospital NOT OUTPATIENT... GET PPE TO EVERY HOSPITAL, NURSING HOME AND THEN OUTPATIENT...You will KILL MANY if you open before these numbers go down and until EVERYONE IS TESTED. 72 percent of state do not want open. LISTEN TO US.... restaurants can stay take out and increase hours. Work on actual small businesses getting these loans and not greedy chain restaurants.. day care centers need to stay closed and schools. Unemployment should be first priority. Get it to us that filed weeks ago. Follow the guidelines the feds set. 14 day decrease to start with. DO NOT BE GEORGIA.Come june 1st if we are down numbers and have been tested then open outpatient surgeries with strict rules. Then restaurants can try outside seating or make them remove tables and close off booths. Make it a misdemeanor thats enforced so they do it. TAKE THIS SLOW OR THE GOVERNOR WILL BE A ONE TERMER.
Brevard	General	Please just open the state back up! We can no longer sustain this state being shut down. Many of us still have not received the stimulus checks and or unemployment! At some point in time we have to stop living in fear and get back to living our lives! We want to get back to work.
Seminole	General	Please consider the harm reopening Florida will do. Things are hard for everyone at the moment but reopening nonessential businesses and allowing social distancing will just cause another spike and another lock down later in the year. As a State we need to think about us as a group rather than individual needs. Sacrificing a few weeks of non essential actions like hair cuts, going to restaurants, and theme parks is what we should be doing to preserve the lives of fellow americans. We cannot be selfish. The economy will recover but we cannot bring back those who will die. Please ask yourself, how many men, women, and children are you willing sacrifice for the sake or the economy. If you can produce a number, then by all means, tell the people and reopen Florida.

AMERICAN OVERSIGHT

Hillsborough	General	Please re-open FL. There comes a point when the cure is worse than the problem. Those that are afraid or vulnerable don't have to go out, but please let the rest of us go back to living our lives!
Seminole	Government	I work for the third largest safety company in the United States and was the CEO prior to stepping down and now on the Executive Board. Educate people, train them and put all the policies and procedures in place. This is manageable but please open up Florida! This has gone on long enough. Put all the protective measures in place like you have so far and let the people go back to work! There will be more cases and there will be more deaths which are tragic but compare this to the world diseases and viruses which have broken out over the years and people keep working. So many people have lost their jobs and need to work. The people who are scared of catching the virus should stay at home. The ones that want to work and put money back in the economy should be allowed to work now!
Orange	Healthcare	I have a 3 year old son diagnosed with ASD, he is receiving teletherapy now but he needs more ABA which is better through a hands on approach. He and his brother also have severe asthma. I want to restart his therapy but for me to feel safe in doing so, I need to know that his therapist was already took an antibody test and is being regularly tested by her employer. He also receives 5 more therapies weekly, his other therapist come to the house under normal circumstances but we switched to teletherapy because we are obviously concerned about his health but on the other hand this is a set back for his development. I hope that wide spread testing, masks and gloves become available for employers and the general public because that would be the only way we would feel somewhat safe to get back to something closer to our pre-COVID 19 life. Thanks for taking the time to read my concerns
Brevard	General	It does not make sense to "reopen" until we have a plan for widescale testing and case tracking. Prove those things are in place, and then we will know you actually care about the safety of the citizens of Florida.
Broward	Professional Services	As a hairstylist it's not safe for us to open back up. We cannot do our job safely and social distance. We have to have our hands on clients and we're standing very close to clients. Without adequate testing for stylists we have no way of knowing how many of us are infected with COVID 19 and may be a symptomatic . Opening salons without testing stylists for the virus puts the public at risk of us transmitting the virus unknowingly to our salon guests. The results could be catastrophic for stylist's health, the health of our clients and community. Salons would be a Petri dish for the spread of the virus and put too many at risk. Is Florida going to provide health insurance for us in the event that we become infected and require hospitalization?
Polk	General	Too early to open up Florida need more testing our numbers are going up not staying down please wait until our numbers stay down for the 2 weeks straight

AMERICAN OVERSIGHT

Miami-Dade	General	I too feel that Florida should not relax restrictions until health officials declare it is under control. If this is done too early it would be a huge setback and burden to go through this all over again from scratch. There is really no way to know how many people are walking around with the virus who have not been tested and are asymptomatic. I think if we just hold off a little while longer on re-opening Florida, we will find the relief we need. Thank you.
Orange	Food	As someone who works in the food/hospitality industry I am greatly concerned with reopening the state prematurely and being forced to go back to work in an area where people consistently travel to from all over the world. We were one of the last states to shut down and somehow are going to be one of the first to reopen? That is asinine! This is a real life pandemic, this is not a joke, there are people's lives at stake. I would rather be stuck at home dealing with this pathetic excuse for unemployment never rolling in and knowing my health isn't at risk than to go back to work in a field where I have to interact with a ton of people and put myself in harms way. There are states that have fewer cases than we do that are staying shut down longer. Why risk having yet another outbreak and have to be quarantined even LONGER the second time around? We should continue to keep Florida in a safer at home state until we see a steady decline in the daily cases and know that it is again safe to open a state known largely for tourism. The more risks we take now the longer we are going to feel the pain of this pandemic on these industries. Please. Refrain from prematurely opening the state next month!!
Volusia	General	I agree that some things need to open slowly, however I am not seeing where Florida has met the peak or even close to the ability to reopen for fear of a second wave of covid-19 that will result in it taking even longer to get back to Normal. The whole reason florida got as bad as it did was because of delay in response from our higher powers of Florida. In retrospect if we reopen too soon without having confirmation On proper testing accuracy we will have a even more drastic challenge and disaster from covid-19 with even more death than we have already. Unfortunately unless there is accountability, people will not follow restrictions and rules, currently this stay at home order just here in volusia County as our cases confirmed and more death continues to be documented from Covid-19 ... EVERYONE is still out doing what they want because there is no consequence or accountability if they dont follow the regulations and rules of the state. Please dont make a mistake to open everything too soon resulting in a more damaging and considerably a more deadly wave of Covid-19. Sincerely, a concerned mother of a 3 year old.
Sarasota	General	I think the governor is doing a good job time to open gym small shops if Walmart can do it small business can barbershop restaurant shop by beach open beach with parking people need to work we are smart enough to social distance let's get people out in open air sunshine I give governor a good mark people who say stay home stay most are getting a check the rest are broke we live Florida open her up Jim and Sherry yoder
Flagler	Healthcare	I feel that as of today 4/25 it is still too risky to open Florida back to normal. I feel it should be at least another 2-3 weeks before this is considered.

AMERICAN OVERSIGHT

Brevard	General	It is too EARLY to reopen Florida. We need to continue to flatten the curve by having non-essential people stay home and discourage non-essential services. Please continue the stay-at-home order as long as possible to keep people healthy and safe.
Leon	Accommodation	Open Leon today. Open Florida today. The mental health of the public outweighs any potential benefits of keeping Florida shut down.
Marion	Education	All schools should be sanatized and kept closed. All school employees should work from home. Distance Learning should continue next school year if the numbers of deaths due to COVID19, as well as the number of people with the virus keep going up. Unfortunately, many individuals don't follow the CDC guidelines of social distancing, or wearing masks and gloves. Elementary age students, as well as our ESE/Special needs children will not keep the recommended Social Distance, some share toys that they have licked or drooled on. Children cough and sneeze and don't cover their mouths or noses. Headlice/ scabies, viruses, etc. for our students has been a very serious problem for many years. Imagine how the rapid spread of COVID19 is going to be in our schools. The medically fragile students, asthmatics, diabetics, cancer, high blood pressure, overweight, immune deficient or any other serious medical condition will be High Risk to die of COVID19. Please wait till this virus is under control and there is a vaccine before bring the children and employees back to school. Employees also have these medical conditions, others are pregnant, some with high risk pregnancies and a big number of employees are high risk due to their 60 plus age. Thank you for taking into account my concern. Stay safe and God Bless you all.
Pinellas	Healthcare	I am a dental hygienist. While I miss my job and patients terribly, returning to work now, I do not think is a smart idea. I have a wonderful boss who has done everything in her power to get us all the PPE we need to practice safe. Unfortunately, everything is unavailable or on backorder. We are due back at work the week of May11th and most of the things ordered won't even be available until June. Please keep us in the dental field safe by pushing out non emergency services like dental cleanings until we have a solution on PPE and a way for us to practice safe. Us hygienists are the most at risk. We work in aeresols everyday and this is not something we can protected from right now. Thank you
Volusia	General	Florida should extend the stay at home order for another 2 weeks. We have just started to get testing and just recently learned that the antibody test be in Volusia County next week. I would like to see where we actually stand before allowing social gatherings of any sort. Then if things seem stable enough, start out very small,. I think each phase should be in 2 week increments. Meaning opening some of phase 1, wait two weeks and open the rest of phase 1. These phases should be done in small increments, by prioritizing what needs to ope first. Example: retail stores, restaurants at 50 percent capacity for 2 weeks then full capacity the second 2 weeks. I agree we need to go slow, but that businesses need to open. However, our state has not had full testing capacity. The focus has been in South Florida and North Florida as well as Orlando. As a Volusia County resident, I am not comfortable our numbers are accurate when testing here only started 2 weeks ago.

AMERICAN OVERSIGHT

Pasco	General	Dear Governor Desantis, First I would like to say thank you and your staff for the excellent job you are doing handling this corona virus epidemic. As it turns out the models have way overstated the deaths. Yes one death is too many but the total destruction of our economy and health care sector far outweighs our current reaction to the media fueled excitement by this pandemic. Our hospitals have laid off nurses, doctors, health care workers, and closed wings because of the prohibition on elective medical procedures. Many people requiring this service don't have the luxury to put this needed care off indefinitely. This in itself is doing more damage than this virus. Our business community will not be able to survive much longer and I'm sure many will not be able to open again. Our tourist economy is devastated. We cannot afford to lose the life blood of the people of Florida to flawed models and the desire of the fake press to destroy our State and country. Yes, I agree very high risk individuals need to continue with caution but the 99% should get on with life; beaches, hotels, hospitals, restaurants, bars & lounges, theme parks, zoos, and all other public venues need to open immediately. Thank you for your time, Sincerely Vince Chrisman
Orange	General	To soon to reopen I think that we will wait until June My personal opinion is we are not ready yet
Palm Beach	Education	Please put K-5 kids back in school. Modify class sizes by lengthening school days or have kids attend 4 days a week. But they need to go. The social emotional impact is hurting my 3 children, and they yearn to learn.
Pasco	Retail	As a small business owner who has applied for the EIDL funding, the PPP funding, and local Pasco County assistance funding, and received nothing, I am ready to begin the process of re-opening my local store to begin building up my business before I lose it completely. I am wearing a mask and sanitizing surfaces. My store is smaller and I generally don't have more than 5 or 6 people in my store at a time, if that. I don't think my small business presents much of a threat to the health of my local community.
Lake	General	Keeping all non essential businesses closed to stop the spread, because people don't understand how to use good hygiene as is in my town.
Pasco	General	As a cosmetologist, I am begging you to please leave salons and barber shops closed. It is impossible to social distance while doing hair. Regardless of all the precautions, it is selfish and thoughtless to ask hairstylists and barbers to put their lives on the line so that someone can get their hair cut or colored. I am asking you to please make us one of the last professions to reopen. Please take what I've said to heart and consider that a haircut is not worth someone getting sick, spreading this disease, and possibly dying.

AMERICAN OVERSIGHT

Orange	General	It is still not safe to open Florida as our numbers are still rising and we have alot of retirees and people like me who have Autoimmune disorders, diabetes and everything else. I take a risk as it is cause my husband works for one of our Health Department's. We all need to know that we are safe. I realize places need to open so people can work, and I feel for them.
Orange	General	Do not let Trump or media shame Fl into staying closed! Put out reasonable guidelines but personal responsibility should be used. Governor needs to not use Trump schedule....we should open Now!
Orange	General	Florida is not ready for tourism.
Volusia	General	Please do not reopen non-essential businesses yet.
Volusia	Education	I am an elementary school teacher and while I miss my students, I have serious concerns about returning to work prior to a vaccine. I know that data shows children fair much better than adults but we must consider that many teachers are in the high risk group. It's not only age but health issues. There doesnt seem to be a realistic way for teachers to observe social distancing and wear protective face masks in a classroom. We don't know how many children are A-symptomatic. Schools seem like a perfect storm of community spread. I know distance learning is not the most ideal circumstance but the risk to teachers and students is too high. I personally have 2 autoimmune diseases and kidney disease. Not to mention that like many families we have 3 generations in our home. My 3 year old granddaughter has respiratory distress syndrome. If I came in contact with covid19 at school and brought it home to her it would be devastating. The health of all must be the main priority. We can make up loss of learning not loss of life.
Lake	General	Phased (selected business and venues) and Incremental (graduated percentages for each phased business/venue) Follow CDC guidelines Spend extra time to explain specifics, (using diagrams, PowerPoint info that can be downloaded) with objective of building public confidence to visit opening establishments. This needs to include what patrons should do to protect themselves and what to expect from business. Also explain the best and worst case expectations of virus outbreak to give public honest input on the risk they must decide to take during these reopening phases. Explain how monitoring works and how public can track access such info

AMERICAN OVERSIGHT

Lake	General	As a Registered Respiratory Therapist, my standpoint comes from an infection control and health safety perspective. I believe for the most part, the precautions we are taking now, are slowing the spread. That is why Florida's numbers are not spiking quickly as we thought it would in the beginning. If we reopen and back off of the current measures we are taking. We will end up in a total shutdown. I think we need to keep the beaches closed to crowds, gyms should remain closed (people can exercise at home and outside safely), keep the social distancing guidelines and stay at home orders in place until the death rates and positive cases show an impressive steady rate of deceleration. Then from there, begin to think about normal reopening. Backing off too soon from current restrictions and guidelines by gradually reopening the state I believe isn't being proactive or preventive at all, I believe it's being a little careless and will result in the numbers spiking again. It is just common sense. I understand the economy is suffering but we must come together find creative ways and create guidelines around that for business to remain productive. People are not going to be happy and people are going to suffer financially. But it's better than people suffering and dying at home or in the streets because our healthcare system becomes overloaded with a he sick. Let's sit tight and hold onto what we are doing now and continue to push for people to remain safe at home, avoid group gatherings altogether, so we can minimize the spread of this virus. Until we can potentially rid of it completely with a vaccine. Thank you for taking the time to consider my opinion.
Manatee	Technology	I am a 25 year old that works for a big technology company in retail. Speaking for my store that i work in, i can say that this has all been hard on us but we are all a bit uneasy and a little scared to go back to work soon because of how many cases there are every day in Florida.. i know we are strongly urged to wear face masks but truthfully, anything can happen. Personally, i am terrified to get this virus.. and this is just from articles I've read online. It seems very serious and i don't want to compromise my health. Please make sure that re-opening Florida is going to be the best for everyone, not just the economy. Please think about everyone's mental health during your consideration. Please... be cautious on your decision.. this is very serious and could affect more people if we re-open Florida now.
Brevard	Healthcare	We are in the healthcare sector and would like to request elective surgeries be allowed quickly. Also we would like to see beach parking open again. We live in Brevard county and there is plenty of room for people to social distance. We would like to see our economy start to open as quickly and safely as possible. Thanks for all your time Gov Desantis we think you are doing a great job!
Leon	General	Open Leon today. Open Florida today. The mental health of the public outweighs any potential benefits of keeping Florida shut down.

AMERICAN OVERSIGHT

Orange	Professional Services	I am a hair stylist. I understand the need for reopening the state and the economy, however where salons and barbershops are concerned I do think it's appropriate to take a slower approach. Unlike retail stores and supermarkets, we have a lot of physical contact with our clients. We may wear masks but that doesn't change the fact that we are touching their scalp and head and it's incredibly difficult to cut hair in gloves safely. If you consider that many children will be getting haircuts, it's highly unlikely that they'll keep a mask on throughout the service. I think that salons and barbershops need to be held off until the second phase, with all the above points being taken into consideration.
Manatee	Finance	Dear Governor DeSantis, While I live in the same state as you I feel a world away. You asked us to help you, we did. You asked us to close our business, we did. You asked us to stay home, we did. You asked us to continue to stay at home, we are. So here I am, at home, waiting. You told us don't worry unemployment will come, it hasn't. You told us don't worry grants are coming, they haven't. You told us don't worry forgivable loans are coming, they haven't. So here I am, at home waiting. I wait alongside my coworkers, family and friends, small business owners, the self-employed and the independent contractors. A massive number of Florida residents who are waiting for the Unemployment portal to open for us, waiting for loan approvals, waiting for stimulus checks. All of these programs, we are at the back of the line for. So here we wait. While bills come daily, savings continuously dwindling and still doing our part. It is time you do yours. It is an inconceivable expectation to close unessential business halting all income and expect us to survive. We need to pay our bills and put food on the table. Without immediate action, you are leaving us no options. How are we to survive? We deserve an answer. Coming soon is no longer acceptable!!!
Broward	General	Protecting our lives!!! Follow what Coumo does...WE ARE NOWHERE NEAR READY TO OPEN!!!!!! Cases are NOT declining for 2 weeks....we are far behind washington state and ny!!!! Havent peaked yet!!! Reopening is murder to floridians!!!! REopening will kill alot of people....How could you NOT see this!!!!!! Trump has destroyed Anerica and you will destroy Florida if we reopen before ready!!!!! There should be fines for anyone not doing social distancing...life more important than $$$$$$$!!!!!
Seminole	Healthcare	Covid-19 reopen must be very careful and take into consideration all consequences if opened to soon (another outbreak). The knowledge of where the people contracted it from must be public, so others know to use extreme caution when visiting these places and or people. It is not logical to just say stay home and wear masks and gloves, research must be done on the Covid-19 victims as to where they have been since November 2019. The truth of this virus is available and should be shared with the public.. The truth always comes out! As for the shortage of toilet paper? Can it stop the virus? The medical sanitizers and equipment I understand because we have more patients to treat, but why do the stores not have hand sanitizer for the public? The medical industry has a different grade I sure! Thank you for listening

AMERICAN OVERSIGHT

St. Lucie	Professional Services	The beauty industry is very rarely discussed we also have been hit just as hard if not harder than the food industry yet we know nothing. Hear in Saint Lucie County I watch the numbers slowly rise yet all the focus is from west palm and south. From what I understand our county is larger than New York and all its burrows. So what about us we are never discussed and have most of our population 60 and over. I'd like some information on what is supposed to be done here. Thank you for reading my frustration please stay safe.
Volusia	General	I do not feel it is safe to re-open the state as of this time. The virus is not contained and there currently is no cure for it. The health and well-being of the people should be number one, even if it means businesses lose money. Life is more important. We've had more than 30,000 known cases and over 1,000 deaths in this state. It is not safe and would have been a waste of the last month to go back to open. More people will get sick, fast, and more people will die. And for what? Businesses to collect money? I say No! Do not re-open the state yet.
Orange	Finance	Please get the unemployment system in this state to work for those that have lost their jobs. If it worked than people would not be so frantic to put themselves and others in harms way - Because the number of Covid19 cases in this state is still climbing!
Marion	General	Please check the statistics of those who have really died from this Flu and not stats inclusive of people whom have passed during this flu season. Padding stats makes an irrelevant count of anything. Please stop holding this state hostage, truth people catch things and sometimes die each year we see this and who's fault it is will never be fully known. And changes even less. We are humans my heart is sad at the passing of a soul, however stop the hype and stop the sensationalism of all of this. People need to know that flu season is going to happen again in 2020 so learn from this whole thing. Please don't go back to normal be better. How many babies have died from mother's choice during this same amount of time? They are just as dead. Protect all life or stop playing god and choosing who's lives matter and who's do not. Open our state. We are a republic not a communist country. Sending a Facebook not fact checked attached file just as reliable as the stuff we get from Americans Entertainment so-called news.
Volusia	General	I say aside from listening to the experts!!! (which the public is not) go with your gut(common sense mgt). Are the #'s down? Do you have a backup plan (in place) if there's a negative impact? Who's liable when jumping science (who warned you to wait) for the business who create opportunity for spread? The whole we're gonna go to salons, restaurants, beaches, back to work, etc.. and social distance is unrealistic in my opinion. It also needs to be decided masks or not it appears choice creates opportunity to harm another even if not affecting yourself. Just saying, quit testing the waters just make a choice then stand behind it because uncertainty and your lack to "pay the people" is much worse for the overall outcome on all fronts. We will recover what we loose financially taking caution may be consider the people's welfare first who will make that money for you 😉

AMERICAN OVERSIGHT

Palm Beach	General	It's time to reopen - I think we're all well practiced in social distancing by now, you've been trusting us to do so with grocery stores, gas stations, pharmacies, and take out and delivery food… Why can't you let other stores and businesses open with the same practices? Reopen salons and spas and gyms with enhanced hygiene standards. And if what the scientists are saying with sunlight is true, open the beaches, parks and boat launches. If you don't feel safe, stay home, no judgment, but let the rest of us get back to living life and making a living! The longer we prolong the shut down, the harder it will be to cut recover financially and mentally. It's most definitely TIME TO REOPEN
Palm Beach	General	Open everything up already. Those that are scared can stay home. We need to get our lives back and work not only for our families but for the economy.
Seminole	General	I believe we SHOULD NOT re-open our State till June 1st like the Doctors and Modelers have suggested. Thank you. Mollie Pallotta
Lee	Recreation	Very unfair that my neighbors can play golf but I cannot play tennis. Open up tennis now.
Sarasota	General	Please keep us safe until cases subside, wait 14 days and test again. Also please redo the unemployment help for this Covid 19 thank you
Hillsborough	Government	Open all businesses and churches now. Give us credit for having brains and common sense. We know to keep good hygiene and to stay out of crowds. Closures are ruining our country. Mayors and governors are turning USA into police states. Why don't you report number of deaths due to flu, HIV.drug overdoses and heart attacks and just plain old age???? No need to close down everyone. this is just plain STUPID.
Collier	General	2 more weeks. It is better to be safe than sorry and better to continue a lockdown than to deal with the consequences of those who will treat partial reopening as if it is a full reopening .
Orange	Professional Services	Please keep barbershops closed! I work for a local barbershop/hair salon chain, and as eager as myself and my coworkers are to get back to work, we are also extremely concerned with how the beauty industry and other similar industries are being worked into reopening plans in other states. Any industry that involves extended physical contact with another human, especially multiple humans, per day should not be part of the phase one, potentially not even phase two depending on the volume of the business. We know everyone wants haircuts, their nails filled, tattoos, etc., but the MINIMUM 30 minutes of consistent physical contact needed per client not only puts the staff at risk, but puts every client at risk for rapid spreading. Staff members already get sick with other illnesses frequently due to this extended contact and lack of consideration from clients who are sick and still get haircuts, but risking their lives, client lives, or either parties families should not be an option until we are closer to finding a manageable way to treat the symptoms.
Orange	Tourism	Let those who are susceptible stay home and allow those who can work and those who choose to work knowing all we know work. Allow businesses to operate based on their own needs and beliefs. Initiate safe Guards for those that are opening

AMERICAN OVERSIGHT

St. Lucie	General	Dear Governor DeSantis, Congratulations on your new baby! Thank you for leading the 3rd largest state in the country in an impossible (self inflicted) situation. I think you are doing a FANTASTIC job with little to no positive media. I watch your press conferences and say BRAVO everyday. Short, concise with facts / data and no pandering emotion. Finally, just yesterday POTUS shortened his Rona Rally and I don't think Dr Doom and Dr Scarf were there. Thank God for that! The numbers are showing this whole shamdemic shut down was entirely not needed. Please let counties start opening up next week. Should have been 3 weeks ago but I digress. To the 'OMG it's too early, people are going to die' crowd - No business is being FORCED to open and no one is being FORCED to go out of your home. Don't want to open your business, fine. Don't want to go out and resume normal life, fine. But give residents a CHOICE! Please at every press conference note and name the number of companies hiring now! I've been watching all these people complain about unemployment for 3,4,5 and 6 weeks. They could have found a job and maybe missed one paycheck. Ziprecruiter and Indeed have been posting jobs and lot's of them everyday since mid March! You must be exhausted! Please take care of yourself the best you can. Keep doing what you are doing and don't cave to the mob. Scarf Lady did praise the Florida website tracker by county / zip etc at 2 Rona Rallies! Go with that! Pull up some slides on screen at a presser as evidence to let counties open up - and open NEXT FRIDAY MAY 1!!!!!!!!!!!! Thank you for all your hard work, Governor! Literally can't wait to vote for you as POTUS in the future!!
Leon	Accommodation	Open Leon today. Open Florida today. The mental health of the public outweighs any potential benefits of keeping Florida shut down.
Pinellas	Administrative	Election 2020. For those who don’t want to do mail-in ballots, perhaps a drive up at the poll sites could be arranged. Covered tables with enough volunteers to check ID’s, which is critical .
St. Lucie	General	We need to instate a shelter in place that actually has places that close!!!! Everyone here is essential and is going to catch this is no one takes it serious.
Broward	Professional Services	I feel to reopen Florida in a safe matter is to start with all outdoor activities sooner rather then later. Barber shops and nail salons should also be allowed to open . Myself and Fiance who are still working should be able to have those essential services.. Disney World should be allowed to open in a low capacity level for Florida residents only to see how to practice social distancing. We need to get the people who are not working back to working. My 2 daughters are in restaurant business and would be nice to get them back to work. THANK YOU for the opportunity

AMERICAN OVERSIGHT

Lee	Healthcare	Retired nurse..I have great admiration for my healthcare workers to be on the front lines, helping others & having to worry about themselves and family. To open things up TOO soon would be unconsciousable for the government, hold fast, it's better to be safe than sorry. People overall are good well meaning souls BUT there are others that can destroy what the good ones do. PLEASE keep the stay at home order till REAL data comes in. Thank you,Eleanor Dean
Collier	General	Our economy never should have been shut down. You don't quarantine healthy people! Re-open Florida!!!
Lake	Healthcare	Dear Governor DeSantis I am writing to you today because I am concerned for my personal safety at work, and for the safety of the patient's that I care for. I am a licensed Dental Hygienist in the State of Florida. As you know, dental office are planning to open soon. I understand that dentists, as business owners, are eager to reopen as they are concerned about finances. However, resuming elective dental services at this time puts the health of their staff and patient's at risk. Personal Protective Equipment (PPE) is still in short supply, and some dentists are expecting their hygienists to work without proper PPE and new infection control training. Dental Hygienists have the highest risk of contracting the coronavirus of any occupation due to the unique nature of our work. We work in very close proximity to the patient, and utilize dental instruments which create aerosols. These aerosols can suspend the virus in the air for hours, potentially infecting us, the rest of the dental team and our patients. It is virtually impossible to have your teeth cleaned without generating aerosols. The aerosols created by Patient A at 8:00 are still lingering in the air and dropping down on surfaces on Patient B at 9:00 and Patient C at 10:00. It is estimated that 50% of people actively shedding the coronavirus are asymptotic. Without the ability to test, we must assume that everyone is infectious (Universal Precautions). The Center for Disease Control, CDC, recommends that dental facilities postpone elective procedures, surgeries and non-urgent dental treatment until further notice. I urge you to enforce the CDC recommendations to postpone dental hygiene services at this time, and mandate resuming elective dental services As you consider next steps in reopening businesses, I hope you understand the unique risks to dental hygiene professionals. I ask you to make decisions that will ensure the safety of dental hygienists, their families and the patients they serve.
Suwannee	General	No... We will survive...
Orange	General	I think we're ready to go. We need to open in phases with safety measures in place. We need our people to return to work. I'm working from home and getting paid. Many are not so lucky. People will lose their business. Our numbers are low. Do it slowly now before the summer so, hopefully, by mid to late summer we have some kind of normal. If we don't the state will be in dire straits. Our family will support any open businesses . And thank you for your work on this.

AMERICAN OVERSIGHT

Volusia	General	I think we should slowly start with reopening hair cutting salons, nails, small businesses. Then maybe retails. Then restaurants. I think alot of people will continue safety precautions. But we do eventually have to open up and hope for the best. We cant wait until we have 0 cases, just won't happen. Our state won't survive if we don't try. Yes, we're scared, but I think most people will think of safety and be very cautious. My husband and 3 kids are all essential workers, one is actually a healthcare worker, they've been out there. They're cautious. Don't open everything at once, but please start.
Brevard	General	EDUCATION. There should be an effort to educate people about how the virus is spread beyond the very basics. Face masks should be mandatory to protect everyone. Masks only provide that protection of everyone is wearing them. Some sort of real enforcement of the CDC guidelines to protect employees when workplaces refuse to protect their employees. MORE TESTING open to anyone. Tracing contacts. STRESSING the importance and meaning of limiting exposure to reduce spread. Yes things need to be opened up but unless people are responsible there will be many more illnesses and death, needlessly. A real sense of community and caring for each other should be stressed.
Orange	General	No one can get any unemployment. So if you can't help us live and thrive with money from that then we need to be able to make money. So re open immediately before our lives and everything we have worked for is lost. Obviously with health precautions for Public safety put in place. What would be better is if the state would just pay out the unemployment and stay closed a little longer just to be sure it's safe. People need money and need to be able to pay their bills.
Palm Beach	Professional Services	I'm a single mother that was laid off due to COVID-19. As much as I need to get back to work, I don't feel it's safe at this current time.
Manatee	General	We all want to get back to what is "normal" We all want our economy to be booming again. But we cannot risk our fellow Floridians health in a rush to do so. If it is not safe enough for kids to go back to school then it is not safe enough for our state to reopen again at this time. I would personally much rather get this over with in one shot and flatten the curve to the best of our ability then have to do this again, which would make things much worse for everyone.
Volusia	Retail	I dont believe we are ready! I am at high risk with diabetes and I am scared to return to work!

AMERICAN OVERSIGHT

Seminole	Professional Services	I work in a kids hair salon and don't feel reopening on the 1st is a very smart idea. Maybe mid to end of May would be a safer choice. In my professional opinion (22 years) there is no possible way to keep 6 ft of distance while doing hair. And when it is a child with autism it is impossible. Half of the time they don't wear a cape so how can we expect them to keep a mask on. Putting myself and everyone else at risk. As much as I miss my coworkers and the families we work with it is not a risk I would like to take. I have children at home who I would be bring stuff home to that did not ask for it. If I was a carrier of the virus and didn't know I was sick and got a child sick or their family I just could handle that. Some people will be in a rush to get out into the world and not be as careful as they should be. The safest place is at home right now. Opening Florida to soon could be even deadlier than it already has been and I just don't want to be a part of that.
Orange	Healthcare	Remove the 5G towers and reopen. We were late to lockdown and anyone who was going to be infected probably already was and then it became a waiting game during lockdown to see who would suffer and sadly pass. Either way, we are st a loss...open or closed.
Marion	General	I do NOT feel it is safe to reopen the state. I have several health issues that compromises my immune system. I have children whom have health issues! I know you say they don't usually get sick but it can happen. If my husband is made to go back to work, and he comes in contact with someone whom is infected even if asymptomatic, he will bring it home to me and my sone. That puts our lives at risk and I am not 45 years old yet. I'm asking you to think carefully before making this decision. If it were your wife , mother or children would want to risk the already unknown virus. Just today we learned of 6 new symptoms. Our cases are still climbing and our deaths are still rising. Please just think hard before opening too quickly. Thank you for listening.
Lee	Recreation	I am a nurse in SW Florida and this lock down goes against any evidenced based practices we ever learned . This virus is no different than every other virus of this type. Hand hygiene and education is what we need not lock down. Your not going to get sick from going to beach or park or outside.
Seminole	General	Open businesses to allow the economy to begin to function as soon as possible observing all social distancing rules. Continue intense testing to monitor virus in general population.

AMERICAN OVERSIGHT

Pasco	Professional Services	While I live in the same state as you I feel a world away. You asked us to help you, we did. You asked us to close our businesses, we did. You asked us to stay home, we did. You asked us to continue to stay at home, we are- so far. So here I am, at home, waiting. You told us don't worry unemployment will come, it hasn't and at $275 per week, it won't even cover my mortgage if it did show up. You told us don't worry grants are coming, they haven't. You told us don't worry forgivable loans are coming, they haven't. You told us don't worry stimulus money is coming, it hasn't. I wait alongside most of my fellow small business owners, those self-employed and independent contractors. A massive number of Florida residents who are waiting for the Unemployment portal to open for us, waiting for loan approvals, waiting for stimulus checks. All of these programs, meant for people just like me who truly own small businesses are still waiting. We wait while you and all the other politicians continue to collect a pay check...a pay check earned by me and my fellow Americans and paid to you in good faith that you would represent us. We wait while big business are allowed to stay open and monopolize a sector of the economy. We wait while bills come daily, savings continuously dwindle, and retirement drifts further out of reach. It is an inconceivable expectation to close all unessential business halting all income streams and expect us to survive. We need to pay our bills, put food on the table, and keep our homes. Without immediate action, you are leaving us no options, except perhaps civil disobedience. How else are we to survive? We have done our part. How about you do yours. Coming soon is no longer acceptable! I do not want to hear one more time that staying home is for the greater good. Covid-19 has a mortality rate (according to reported statistics) similar to flu, and we certainly do not stop the country for the flu. And...I, sir, am part of the greater good...along with 20+ million other Floridians.
Pinellas	Professional Services	I have a small pet grooming shop and a mobile unit. I service animal's that the client is unable to care for in that way. I deal with a lot of dogs that are scared, fight, and bite. Some vets will not even touch them. Grooming is essential for animals. The order stated that we are non essential cause the vets office can do what we do if in dire need. How is that going to happen if the vets offices are not grooming? I have had clients that have been told by the vet to call a groomer! Florida needs to open back up. We can not stay in business if we are closed much longer. Also some of us are unable to get the help from ppp or stimulus due to not having 2018 taxes done. Please grant groomers as essential so we can go back to work and dogs can stop being neglected.
Seminole	Healthcare	As a healthcare worker I am concerned people will be complacent. We do not have enough testing to know how safe we are. Opening this soon is only going to have this virus resurge

AMERICAN OVERSIGHT

Duval	General	I feel like it is too early to reopen everything because the virus is not gone. Ex specially the border of Florida. The virus is controlled right now because everyone was force to stay home. Open up business that hep keep the economy to keep everyone alive and going. Let farmers and etc. go back to work and whoever to help produce the supplies we need. But whenever everyone comes out it's going to give the virus a chance to grow again. I work in amazon we are close in that building even with the safety guidelines and the case in them building continues to grow everyday.
Lake	Tourism	We are not ready to reopen Florida until June for now.
Orange	General	In the interest of all Floridians open the state after following the complete advice (all the steps) of medical professionals NOT politicians. Opening beaches was folly enough. Test and trace, social distance. Rinse and repeat.
Orange	Tourism	The cruise line industry is suffering many shoreside US loss of jobs. The State should provide the Ports with guidelines to open by July 1. Same for the theme parks. The State. should not restrict theme parks from opening but rather should require a plan for a gradual reopening by a certain date. They should be able to reopen by Mid June in my opinion but on a limited capacity basis to start. The State guidelines I'm mentioning are not anything new- it's the common sense guidelines already released by the Presidents Coronavirus Task Force. One of the big issues is we need public education and reassurance because a lot of people are simply too afraid to leave their house anymore.
Palm Beach	General	I live in South Florida and I care very much about the small businesses and want to see them open. But this area has also been pretty irresponsible about safety. You can walk down Atlantic Avenue anytime and see groups not practicing social distancing, people without masks and very crowded stores. Some people as soon as they get into a store pull their mask down. This is the MINORITY but enough to spread it. All I'm asking is please help the economy but put our health first. You didn't in the beginning when you wouldn't close the beaches right a way. You've done a great job since then. Just please put our health first and the economy a half step lower. Thank you.

AMERICAN OVERSIGHT

Orange	General	I would like to preface this by noting that I hold a Masters Degree in Public Health and am a practicing occupational safety professional. Please see the attachments for my credentials.... Now, that being said, we should not rush in reopening the state. Although this has been tough on us economically, it will be much worse if we open prematurely and cause a spike in cases. We should be waiting until we start seeing a steady drop in cases daily and have a large number of the population tested or at least able to be tested. Even so, opening should be in stages and there should still be some form of social distancing in place. It should be understood that this world will be living in a new normal once this is all said and done. We simply cannot go back to exactly the way things were before, especially when we do not have a vaccine or effective cure. I've been furloughed and would love to go back to work, but we need to be smart about this. People's lives are more important than the economy. Please listen to public health experts and take their insight seriously. Thank you for your time.
Lee	General	I would like to see the small businesses open with extreme care. All business employees should wear masks. Salons- by apt. only- no walk-ins. I would wait on tattoo parlors.The restaurants would be with spacing- once you get into a restaurant- you are usually seated, and you don't get back up again until you are done. Servers should wear masks- and reservations only to begin with. Wait with the opening of bars. Open hotels again, but restrict use of pools. Beaches could be used. Please wait on opening movie theaters and entertainment centers. i would not open those counties that have a problem still. We feel you have done a great job with this crisis.
Brevard	General	My suggestion would be rather than opening county by county open community by community. We live in the northern part of Brevard County which is a very long county. As of a couple days ago, Titusville only had 9 confirmed cases. Most of the confirmed cases are in the southern part of our county in the Melbourne area. It would make sense to begin to allow business in our community to reopen as the risk is very low here. In addition, please consider allowing businesses to reopen throughout the state implementing the same guidelines that we see in grocery stores. We own a small business in Titusville. We have no employees and no rent expense so we did not qualify for help but our business has suffered greatly by this shutdown. Please reopen Florida as soon as possible.

AMERICAN OVERSIGHT

Volusia	Retail	I work as a delivery and merchandising person for retail locations. Most of my accounts are open with restrictions on open hours and number of customers per square foot. Many have instituted one way aisles and remind customers of social distancing. Employees are provided masks, gloves and temperature checks. However, We have a huge compliance issue in some locations. Many people are choosing not to wear masks or follow the rules. Keep that in mind as you open up businesses. A huge group of people either don't believe in the danger or don't care about others at all. Whatever you do, make sure instructions are clearly communicated to businesses and the public. Most of us in these occupations are putting our life in the hands of the general public. Not comforting at all. Please consider us as you make plans. Personal note, I am 60 with hypertension and my husband has asthma. Having seen the public response to our peril, I can tell you I won't be shopping, getting hair done, going to restaurants or other events without better public compliance.
Orange	General	The state and country need to get people back to work. This virus is serious but so is the economy. We need to get people back to work within the next two weeks in reverse phase of the way they were closed.
Manatee	Professional Services	Hair Salons and Nails salons should be last phase of opening as our contact is so close. We also need hospital grade face masks available to us to purchase for us and our clients as cotton homemade ones will not be safe. Other supplies will be needed as well, proper client disposable capes and employee coverings for their clothes which all need to be hospital grade as well. Temperature checks upon client arrival along with a questionnaire on previous travel, any contact with anyone sick in previous two weeks etc. should all be mandatory. Another words same expectations as any essential front line worker has as far as protection for the stylist and clients. Thank you, Lynne Gallagher
Flagler	Healthcare	As a geriatric nurse practitioner, I believe that nursing homes need to remain closed to visitors and continue close monitoring as being done currently. With regard to the community at large, I believe opening non essential businesses with the the caveats of masks, 6 ft social distancing etc. and everyone coming into any of these establishments should be required to give their name and address, phone numbers along with temperature taken. If increased temp, denied admission and needs testing. . It should be the obligation of businesses to check in with their clientele 1-3 weeks after visit and make sure no illness. If illness, the business needs to notify the Public Health Service to do contact tracing and all those customers in the past 2-3 weeks need to be tested for covid. The role of contact tracing is huge and I would need reassurance that our state has the system to do this. If you have any questions, please feel free to call- 9042525265.
Leon	Government	Open Leon today. Open Florida today. The mental health of the public outweighs any potential benefits of keeping Florida shut down.

AMERICAN OVERSIGHT

Lee	Tourism	Please open our beaches & boating here in Lee & Collier counties. Those who violate the safe distancing guidelines should be thrown in jail & fined. Those of us who are responsible enough should be able to enjoy these amenities as one of the best benefits for living in Florida! Also, please waive the $8 fee to enter Barefoot Beach and make available an annual beach pass of $50 like in the past. Thank you & hoping everything is open by Nay 1st!
Collier	General	To whom it may concern, I am in very much in favor of re-opening the state. The damage being done to the US economy is staggering. Regards, Gregg Shaw
Charlotte	General	My public comment on reopening Florida: I think the public would like to be treated as responsible adults. Most people are intelligent and some are even college graduates and are able to make good decisions about their lives and health. Most people realize the importance of good higiene all the time and the need to self quarantine during illness. It would be even better if all employees had access to sick days so they can stay home when sick and not infect others. Thank you, Ewa Bandura
Polk	General	I feel that Governor DeSantis can begin opening up Florida. The distancing and increased disinfecting practices by businesses must be followed as much as possible. I appreciate the Governor asking the public for their thoughts.
Volusia	General	I believe we should open by May or mid May. It is effecting the economy, people are not able to provide due to no income. Mental health is a major problem due to going out was there therapy wether it be at the park, theme parks, restaurants, coffee shop...or helped. Child abuse is another so please be open before school starts again so children can get away from the hone they might be scared of being. Plus there are deaths and there is not a vaccine yet, but those who have a compromised immune system or afraid should be the ones to stay home. We were risking ourselves before with so many things out there that we came in contact with. It is our responsibility to take care of ourselves and we should have the choice to do it. I choose to go out and I have always known the risk as a healthcare worker I am exposed to things on a daily, but I chose to do that as well as others should have their choice to either isolate it go because to life again.

AMERICAN OVERSIGHT

Seminole	Education	I am a life coach,, who has worked as an university administrator for many years before starting my business. I've been underemployed for the last 4 years and know what economic struggle is, especially with no longer the capacity to afford healthcare. I also know what it means to have chronic illness afternoon suffering with asthma since birth. Florida should not re-open without the testing, medicine, and appropriate medical systems in place. We should not put our elders, children, or those who are vulnerable at risk. People first, economics seconds.
Palm Beach	General	Me and my family want businesses and the economy to reopen but have serious concerns about future waves of the virus. I would like to see gradual and measured reopening with adequate assessment to detect new outbreaks before they get to severe levels. Reopening should include new regulations and guidelines for social distancing including crowd size. Teleworking for all sectors should continue to the maximum extent possible. Schools must use a new model and focus on hygiene and minimize exposure through smaller class sizes and shorter days. Plans should also be in place for actions to take when new outbreaks are detected.
Marion	General	It's too early to open the state
Seminole	General	Please start reopening the state, even if in phases. The numbers never reached the levels "they" said they would in most areas and hospitals are now well equipped with plenty of beds (in most areas). The economic toll has been and will continue to be devastating. Suicides, homeless people, increased child abuse and domestic violence. Those lives matter too.
Volusia	General	Based on the current statistics it is too early to reopen the State. We should wait, as suggested by medical professionals, until deaths become lower before reopening. Opening too early would potentially cause a secondary outbreak, which would be disastrous to our economy.
Volusia	General	The decision to reopen any business needs to be data driven. We need to have a solid testing strategy. Until we have a vaccine we are assuming risk by opening the economy. It's a very difficult call to make to say we will choose life/health over the economy. There are some businesses that will be very difficult to open without introducing risk (eg hair salons, restaurants, amusement parks). In an ideal world we test every worker and individual entering those venues to ensure they are not exposing the workers or others while going there.. I don't think we have the scale for testing to do that so I question how we can open those businesses without introducing risk.

AMERICAN OVERSIGHT

Brevard	Healthcare	I do not support re-open Florida without very strict guidelines and concessions for health and hygiene. Currently we have no access to masks that actually help prevent illness we have people with no health care experience putting T-shirt style masks over their face which do absolutely nothing to prevent transmission. You can't find hand sanitizer anywhere or even the supplies to make your own. Without these things sending people out into the world is just asking for a surge of cases which will overwhelm our hospitals. It is my opinion that the governor is more concerned with money and tourism and not fixing the unemployment issue that has happened rather than human lives. Re open very slowly to select areas and provide our community with the right resources to be out and about safely.
Orange	Professional Services	Hello, I own a small business in Orlando and I'm ready to open right now. The CDC has been tracking a flu like illness with upper respiratory disease since November and my family had a fever with a very bad cough in January...as did 300 other children in my children's soccer club...but we all tested negative for the flu. I think we had this and have the antibodies. I wouldn't be surprised if a large percentage of Floridians already had this virus before March. Plus, the only way to defeat a virus is to face it and allow the general population of healthy people to develop natural immunity via antibodies, that's actually the best way to develop heard immunity and protect our elderly. My family is not scared to go about our lives. We're ready to go back to work and play and visit theme parks. We don't think people need to wear masks around us and we'd go back to Universal with pre-coronavirus ways of doing business in full swing. I am, however, very scared of this unemployment system we have in Florida that looks like it doesn't have enough money to pay the people who have been able to file for unemployment (I still haven't been able to get through and it looks like I'm going to make at least a quarter less than usual this year all because of this hysteria to a virus that you have less than a percent of a chance of dying from.). I am hearing of friends of friends committing suicide or over dosing on opioids. I'm hearing from friends who are doctors that they're being furloughed and/or seeing a huge rise in domestic violence coming into their ERs. I am scared that small business owners will lose their business, become homeless, and won't be able to feed their families. This cure has proven to be worse than this disease and it's time to reopen right now before I wake up tomorrow hearing about more suicides.
Pasco	Retail	If you'd like to hear from doctors who are on the front lines of this I personally don't think we should reopen the economy at this time. I believe we should wait another month.

AMERICAN OVERSIGHT

Osceola	Professional Services	Following suit with Georgia is a good place to start. If gyms are going to be allowed to be open, then massage therapists should be as well. We see clients on a one to one basis and use strict cleaning protocols plus new ppe protocols. Gyms have multiple people sweating and breathing heavy which is going to cause the virus to spread more than if a person was receiving a massage. I'm on week number 5 of not working and not receiving unemployment. I have two children and I am the main provider in my household. If I can't reopen my business soon, I will have to close for good, ending up possibly homeless and in huge debt from lack of income. The businesses that are allowed to be open, but I'm not is just ridiculous and lacks common sense on the part of the lawmakers.
Lee	Finance	I am disgusted with the unemployment process for FL. Our 19 year old son Is a full time college student with a part time job. He was furloughed from his part time job and the state unemployment website says he doesn't qualify for unemployment. Additionally, since FL didn't pick up the Cares Act he doesn't qualify for the $600 from the fed. Gov. To make matters worse - he also doesn't qualify for the stimulus check even though he filed for 2018 and 2019 taxes In speaking with his college friends - they all are in the same boat. Why is this age group being left out?? They all have bills to pay (insurance, car payments, rent, food, college loans, etc) and need this just as much as anyone under the age of 17 or over the age of 21
Brevard	General	Pick types of businesses to reopen and stagger the openings. We cant keep giving out money or the united states will be broke and will never come back from this. Might think about hiring some of the unemployed for the DEO to help get money to those that cant go back to work
Polk	General	The reopening of Florida should be done slowly. The data on the coronavirus should be used as a guide as to when it will be the safest to open things up. To open everything at once with no restrictions or guidelines would be a huge mistake.
Orange	General	I do believe we can begin to open the state in a calculated manner. I am concerned if we stay completely closed for too much longer, certain businesses will not be able to turn themselves around. I believe we can do things safely and in a manner that will not cause panic for those who are still worried about opening.
Orange	General	We need to be extremely careful,Its too soon, I don't want to be back at the same situation down the road. Enforce the people that are not taken this serious. If you're out. You have to wear a mask
Leon	Healthcare	Open Leon today. Open Florida today. The mental health of the public outweighs any potential benefits of keeping Florida shut down.

AMERICAN OVERSIGHT

Volusia	General	NO I do not feel safe in returning to work yet! I work at a restaurant, I am a single mom of a disabled child, as well as home schooling him because schools are still closed. I fear in returning at this time because doing so would not only put me at risk but my son as well. This virus could be deadly for him if he were to contract it. The place I work for would not be understanding of this and would expect me to return full time the second our doors open. I do not feel we are yet in a position to reopen. We would be putting more people at risk with the flood of tourism coming in. If you are able to get unemployment up and running properly, and allow extra food stamps to help those with children. I think you will find more people feel the same way. I don't want to lose my job because I am to scared to return right now. I think we should stay shut down for at least another month.
Collier	Retail	Masks should be required if going in public when reopening. That's a no-brainer. Also - When people walk into an establishment they should be required to wash their hands with anti-bacterial soap. This should be monitored by that business. It's up to the shopper if they wash them once they leave (at least, hopefully, they will not be infecting anyone else they come in contact with throughout the store). Restaurants should continue carryout. There is no need to gather like that yet. That is a luxury. Too many people are eating and drinking off of plates and glassware that may or may not be properly sanitized. However, If they do reopen, it should be throw away dishware that is required.
Polk	Government	I would like to inquire why I'm not eligible for reemployment from my second job as they closed up on march 20, 2020. I am working my primary job as its essential. Also I have tried to see about inquiring on my updated banking information for my stimulus check but again unable to put in banking info. I need these funds to survive. Thank you Barbara Basso barb62933@gmail.com 214-900-2820
Seminole	Recreation	In my opinion the way people in florida group together. I don't think its a good idea. The people ages 15- 40 will carry on like there ain't no virus. So as far as my opinion goes i wouldn't open the beaches to the public as well as the amusement parks.
Broward	Professional Services	Open all
Palm Beach	Recreation	As the golf capital of the world golf courses should be open. What better place for social distancing. Beaches. Parks. Boat ramps. Marinas. Smart people getting punished for idiot's. This virus is not going anywhere. We need to learn to live with it. Also small business like hair dresser, barber shops, dry cleaners any small business with a controlled environment. Everyone should be able to make their own decisions. Follow the guidelines.

AMERICAN OVERSIGHT

Seminole	General	I do think the Florida economy needs to open up sooner, rather than later. There will be far more hardships if people don't get back to work. We need some sort of normalcy! Even if there is a new normal, just like after 9-11. Once things begin to open, Floridians can make the decision either to go out, with a mask on or not, if they choose, or they can stay home! Doctors need to start performing surgeries again, well visits, MRI's, physical therapy etc. The longer things are put on the back burner, the more issues that will arise from lack of basic medical care. I do think Floridians will be more cognizant of social distancing, touching their face and this will help stop the spread of the virus, along with the flu, common cold, etc.
Flagler	General	The Safer at Home order should be suspended! We have practiced this since March 1t and are growing very tired of it. Mayor Melissa Holland suggests that Senior Citizens should plan on the order being in place until winter, this is unacceptable!!! Our economy and lives will crash if we continue with this time line mentality!!! Open up Florida with some common sense guide lines! Last I checked we still live in the land of the free, however it doesn't feel like it at this time! Respectfully yours!
Broward	Recreation	Hi. I certainly don't want to cause any trouble, nor do I want COVID-19 to spread. That being said....is there one reason not to reopen Everglades National Park? At least for auto traffic? I am not one to jam 60 people on a bus. I have a hobby that would not harm anyone. I like to travel, with radio (and sometimes TV) and outdoor antennas, to see what stations I can receive from far away. Flamingo, at the southern end of the Park, is an excellent quiet place to set things up. The other part of the Park, at Everglades City on FL's west coast, would be great too. If there is a risk, of course DO NOT reopen the park. But I don't see a reason, as long as people are spread out, why this cannot be done. I doubt that masks would be needed either. sincerely, cd

AMERICAN OVERSIGHT

Manatee	Government	you're asking people to give their opinion about when things should start opening in Florida. I think that there has to be a downward trend for corona for at least two weeks. the economy starts to open very slowly, if to fast we will just a be back to where we started. anything that has human contact, hair nails message, need to to have new way to keep everything sanitary. me personally I will not have any of that done for a long time. I am an older person and I am not usually scared about anything, but this pandemic scared me to death. I know you are a proponent of Trump, but I personally don't listen or believe anything he says. He has changed this country for the worstWe have no leadership from DC at all, we area country divided. I think you are an empathetic person and you have an instincts for bettering the state. Don't listen to him, you will fail if you do. You can be a good governor if you follow your heart not that idiot in office.
Seminole	General	Open Florida 1. Use electronic temperature checks for patrons on entrance to any business.Anyone with a 99 degree or above temp is denied access. 2. Mandatory mask until virus controlled
Orange	General	I live down the street from magic Kingdom. I think that opening the state too soon would be detrimental to everyone's health. I think people are suffering from not receiving their unemployment and crime will soon be on the rise. They need their unemployment benefits. I don't support the beaches and parks reopening, as most people lack common sense. I think the stress during this time would be helped if the unemployment system could get more support and push through for benefits.
Orange	Healthcare	REOPENING THE STATE IS A PREMATURE DECISION. EXTEND THE STAY AT HOME ORDER. FLORIDIANS SHOULD NOT DRIVE THE STATISTICS THROUGH THE ROOF WITH CONFIRMED POSITIVE CASES OF COVID-19.
St. Lucie	Tourism	we feel beaches can be opened on the entire treasure coast Friday may1..using chairs,collers,swimming.Just have the sheriff's on there rvs make sure we're 10 feet apart not 6 ft.this way you don't have people from West Palm driving up here.i would open west palm may 1 beaches only to walk swim and no chairs till may 15th or May 22 which is almost memorial day on May 25th

AMERICAN OVERSIGHT

Santa Rosa	General	I feel we should reopen most businesses. Given the study on the half-life of the virus in the open air and surfaces under heat, humidity, and direct sunlight, I say open outdoor restaurants, theme parks, water parks, etc immediately; if necessary at 50% capacity and gradually increase. With respect to retail, I see no difference in shopping for clothing, furniture, books, etc and shopping at Lowes, Walmart, or Publix. If limited capacity at first makes people feel better, then open with limited numbers of customers. I realize that Florida has a large elder (immo-compromised) population. Those folks should stay in if it makes them feel safer and continue with home delivery of supplies. Also every retail shop could offer safe hours for those folks, like now with Publix offering early morning shopping to the elderly. Keep up telehealth, it's easier for all; but please reopen elective procedures and dentists offices. We live off of tourism and I saw you had been thinking stay-cations for Floridians in Florida, but seriously most of us are broke from the lack of tourism. Maybe we could target tourism from the surrounding states and states with low numbers of cases who have more work from home (less unemployment claims).
Polk	General	I believe we should approach re-opening with caution. It should be done in phases with strong warnings. April 30th is not a magic number we need more time to curve the outbreak rushing into opening could be devastating to some people. I believe parks, beaches, restaurants and other public places should limit the amount of people per day. If we allow large companies to reopen to capacity too early this could put their employees at risk. If the work at home has been successful why not continue. PLEASE DO NOT REOPEN ON MAY 1st, be responsible and give it more time. Encourage the public to continue social distancing.
Pinellas	General	We must start opening Florida. The economy will not survive this much longer. Why are wellness clinics closed? These are some peoples Doctors. Holistic medicine is used to treat all types of ailments, both physical and mental. Please open businesses so people can get back to work and care for there families.
Palm Beach	General	Parks/Recs May 1st All others May 15th

AMERICAN OVERSIGHT

Indian River	Healthcare	As a dentist, it is my duty to care for patients who experience dental pain, trauma, infection or pathology. Presently we are only treating emergencies and are forced to tell our patients that their oral health issues must be delayed until government restrictions are lifted. Every day the number of patients in need for oral care escalates. Without treatment, patients' oral issues will progress into dental emergencies which will then lead to detrimental oral health outcomes, or even death in some cases. Many patients will end up requiring hospitalization, leading to the unnecessary use of our hospitals limited resources and increasing the likelihood that a patient will be exposed to COVID-19. Patients in high risk categories who require regular care as part of their oral and overall health treatment plans have missed critical hygiene appointments. Halting regular care and limiting dental services to emergency care will result in increased costs since many patients who were in mid treatment will require their procedures to be redone due to tooth movement. As a result of the guidelines for treating patients during the COVID-19 crisis, patients are making multiple visits to complete dental procedures due to their classification as emergency or non-emergency procedures. This is resulting in the use of additional PPE for each subsequent visit. This is waste that can and must be avoided. We are health care providers and we are ready to get back to work. Infection control has always been a key part of the practice of dentistry. Dentists have received extensive training in infection control and are held to very high standards (through OSHA and CDC) with every patient, every day, seen in a dental office. With the use of PPE (N-95 masks or equivalent, face shields, gowns and gloves), appropriate patient management involving an extensive prescreening protocol, social distancing within waiting rooms and cars, limitations on the number of patients/family members allowed in an office and our stringent infection control policies, I believe we can safely return to serving the public. In fact, we are already doing this. While dentists across the nation have provided emergency dental care to tens of thousands of Americans during this crisis there is no scientific or anecdotal
Broward	Government	Open all areas with the enforcement of face masks and distancing kept in place. Open it now!
Duval	General	In my opinion, the best way to regain normalcy and stay healthy would be to re-open in stages to regain normalcy and stay healthy. Re-opening of the beaches seems to be working, so far, here in Duval, but it is yet to be seen if people will continue social distancing. Having the parks re-open was also, I think, a good idea. As COVID-19 is still with us , I feel it would be irresponsible to open everything as Georgia has done. I believe opening all non-essential businesses and indoor dining on a large scale could be unsafe unless social distancing could be practiced . Also, the owners of these businesses should be held accountable to ensure they and their customers adhere to these conditions. I do not feel we are ready to lift the Stay At Home order. On my opinion, I would not consider doing this until the end of May at the earliest, and that depends on how much farther we have flattened the curve on COVID-19 positive tests and deaths. I would also like to take the opportunity to thank Governor De Santis for leading Florida through the difficult time. You are doing an outstanding job. Also, a thank you to Mayor Curry for his leadership and decision making for Duval County. He is continuing to do an great job for the city. Florida is in good hands!

AMERICAN OVERSIGHT

Volusia	General	Follow White House guidelines
Sumter	Recreation	Open state parks to Florida residents only.
Hillsborough	Education	Please DO NOT open Florida until the infection rate has decreased for at least two consecutive weeks. I don't ever again have to be isolated in my home for this long. But I want to feel safe when Florida is once again open for business and recreation. Thank you.
Pasco	General	Please do not open the state too soon. We can't afford to have another wave of infections. Please have the courage to do the right thing.
Palm Beach	General	Personal responsibility is key. Testing is key. Initial reopening should be gradual. Parks and beaches should be open limiting size of groups. Access to nursing homes by relative should be allowed after that relative was tested, more people are going to die from loneliness than the virus. Limit large numbers of people of congregating wether in stadium, fairs, big restaurants..etc.until the infections subside, or treatments are found. Personal responsibility and that most uncommon of senses , common sense, are essential. Older people should take extra precautions for the time being. The state should enforce the guidelines when people do not adhere to them.
Broward	General	It is too soon to reopen. Let's not ruin the progress we have made by staying home.
Seminole	Healthcare	I am a surgical RN and as much as I would like to get back to a normal work schedule, I feel the benefit does not outweigh the risk for myself and my peers.
Orange	General	I do not understand what is so hard to figure out. It should be mandatory across the board EVERYONE must wear a mask to enter a business. Each business should have antiseptic put in everyone's hands upon entering and the people must rub hands together. Stay 6 feet away from everyone unless your being seen by a Doctor who obviously needs to be closer. Open everything back up so we can all get back to work and make some money to pay our bills. The media is over exaggerating the numbers. I don't believe anything the media is putting out there. These are very sad times to see the world act the way they are acting. Get rid of the people in congress and our Government that has done nothing but try to get rid of Trump and fight for what they want, not what we the people want. Did they forget we elected them In and hope to God they get elected OUT.

AMERICAN OVERSIGHT

Hillsborough	General	I understand the importance of wanting to reopen Florida , to avoid any further economic damage. But as a citizen I feel like it would be completely irresponsible at this time. We haven't had a steady decline of coronavirus cases yet, and I worry about the health of myself and my family. I own a small business (hair salon), and I would be devastated if we received the green light to open, too soon. Like myself and other small business I spent years growing it into what it is. I know myself and other small businesses in the area (Tampa) are not comfortable with opening our doors just yet, and I know there are other businesses who are eager . I feel like this will create unfair competition and set a lot of small businesses back who make the conscious decision to put their health first. I understand you have a heavy decision to make , but it would be even heavier guilt if you were to reopen too soon and cause a flood of infections that our healthcare system can not support. Please take every factor into consideration before making any major decisions that will effect the health of your citizens .
Palm Beach	General	The sooner things open the better as long as the correct measures are in place. If you will be closer than 6 feet from another person, wear a mask, otherwise the mask isn't necessary. High risk people should be encouraged to be extra careful and possibly shelter in place until the 15th of May. If people feel unsafe, they can stay home, but at some point it's unfair for businesses to stay closed and healthy people stay home because others are against lifting the restrictions. If anyone is against it , they can keep following the restrictions, but they shouldn't speak for everyone. Small businesses can responsibly and safely reopen if following the guidelines, don't make them wait
Leon	Tourism	Open Leon today. Open Florida today. The mental health of the public outweighs any potential benefits of keeping Florida shut down.
Palm Beach	Healthcare	Hello Governor DeSantis , I am really hoping that outpatient elective surgery and dental office open up very soon if not immediately because I am unable to have my outpatient elective procedure that has been postponed for over a month and I cannot receive my dental work that I need during this time. Even though it is elective I still need to have it done and can not postpone for much longer . Since we are luckily in the position where we have enough hospital beds and PPE , I think it is imperative we open up medical offices and dental offices to perform outpatient procedures until hospitals are ready to perform inpatient procedures . Thank you , Mr.Governor P.S I am a medical Resident that begins training July 1st and need to have these procedures well before I start to give me the chance to recover and be healthy to treat patients in the hospital !

AMERICAN OVERSIGHT

Hillsborough	Government	I work in the field for the Florida State Lottery, and do not feel we have had enough of a continuous stay at home for its residents. The only businesses that have really felt any we inimical impact is the private ones. Because all the grocery stores, gas stations, convenience stores are fully open. Most restaurants are still open even if just for take out, they are still open. If we don't hold strong and have a Complete stay at home for a good period of time, it's just going to flair up again. As a state, we did not all go into a complete stay at home, and we all did not do this at the same time. The whole state as a whole needs to be completely shut down including stores and restaurants for a small period of absolutely no movement and then we can open back up, but so long as we are still out and about, whether it be as groups or as individuals we will not have give enough time to stop the virus from spreading.
Brevard	Transportation	The shutdown should be extended till at least May 15 with a re-evaluation for posible May 31 extension. if the reinfection rate is below 1.0. Allowing institutions to open which are tourism dependent (parks, cruise lines etc.) should not be considered till June 30.
Lee	Education	I would like to see a summer school session for children to make up. Distance learning is a band aid, it is not a substitute for in class education and progress. If school is not an option I would hope there would be summer camps opened. It is very hard for parents to work if there are no places for there children to be.
Seminole	Utilities	I'm concerned because we don't know the extent of this disease The majority of the population in Florida have not been tested. The trend may show an improvement but I believe certain industries should be opened cautiously. The danger is opening and an increase in the spread. I think being more cautious is the safest approach
Hillsborough	General	It's too soon to open the state. Florida hasn't even reached its peak yet. For public safety we need to stay at home and flatten the curve. We can't open until we have a lot more testing and tracking.
Osceola	General	This is in regards to reopening the state of Florida. I do not believe it is time to reopen the state. I do not believe it's time to allow travel for vacationers into the state either. This virus is still continuing to spread. Until numbers start to drop then and only then is when consideration should be made. I believe an extension to the 30 days stay at home order should be applied until we see a significant decrease in infected people. I definitely understand about getting people back to work, income back for families in need, however people are honestly not taking this serious enough. People still are not wearing a mask when they need to be, people are still continuing to be out & spreading the virus as it is Moving in the numbers. Between Orange and Osceola county the two highest in the state. Do not Re-open the state of Florida until numbers begin to drop. A lot of states have extended their orders until May 16-30th. Read the uploaded photo carefully, thank you.

AMERICAN OVERSIGHT

Miami-Dade	General	Miami/Broward/WPB should not open now, our death rate and infection rate is rising everyday. Our SOCIAL DISTANCING and STAY-AT-HOME needs to be enforced more seriously if we want to slow the infection down. The most the should be open if necessary: Parks (allow people to get some air, exercise, walk dogs) Surgery (surgery that is necessary) Grocery stores Walmart Home depot Restaurants (take out ONLY)
Leon	Recreation	I think by summer there should be some procedures in place to re open gyms and perhaps take precautionary measures such as taking temperatures at the gym or require people to be tested before they re enter gyms. Many people I know have gotten out of shape from the gyms being closed.
Seminole	General	Opening Florida before the death and infection rate are SIGNIFICANTLY lower than previous weeks, and lower for at least three weeks, is a recipe for disaster. If Governors DeSantis and Rick Scott hadn't worked to gut the unemployment system and make our state the WORST for benefits, I don't think you'd be so anxious to put citizens in danger. And make no mistake, we WILL be endangered. ALL citizens need to be tested for COVID-19. ALL OF US. This governor has consistently failed to govern and left action up to the local leadership. THIS IS UNACCEPTABLE. We in Florida deserve and demand sensible leadership decisions based on the PUBLIC GOOD and not the state's bottom line. CITIZENS FIRST. Dead people can't pay taxes or buy goods, travel, or visit parks. Protect the people and be smart. Karen's manicure and Bubba's haircut can wait until it's safe for those service workers to be in contact with their clients.
Pinellas	Healthcare	Governor DeSantis I believe that you have done a great job keeping Floridians safe. My father is in Angel's Senior Living LTC facility in Dunedin, FL. It's mainly for dementia patients such as my father. We greatly miss seeing each other all these weeks, and talk on the phone daily. But I know that the steps you took saved many lives! Thank you. I would like to see his LTC be tested, and more in Pinellas. I'm fortunate that I have been able to work from home. I'm comfortable with a reopen when the numbers are trending down. I think it would be good to keep social distancing & the use of masks for a while after reopen.
Brevard	General	I believe that we should gradually open the retail and personal locations such as beauty salons and barbershops I think tattoo parlors are not that essential or to need to have it done at this point in time where they're using a technique that would actually be invasive into the bodies and have the ability to have contact through the blood. I do believe that everyone should be required if they're out of their primary residence to be in a mask and that's to protect everybody.

AMERICAN OVERSIGHT

Hillsborough	General	PLEASE OPEN FLORIDA! All previous models have been wrong concerning how bad covid19 would become. New models are also wrong because they project everyone going about their daily lives ascwe did before. No one will do that. Everyone will take necessary precautions & proper hygiene in account in a much greater manner now!!! Many will nit even venture out because they are still scared even though data shows many, many recover without hospitalization. Business owners will be unique & creative providing their services in safe ways. Nails can be done through plexi glass with just a small opening, restaurants can block iff sections of their parking lot, dental patients can wait in their cars until their appt times, etc. Please let small businesses reopen before they go out of business. It's not just people wanting to put food on the table, we need smart, unfearful, cautious people spending money. How can FL keep paying unemployment if we don't. Please don't let these businesses & people's lives be ruined under your leadership. Sick & worried stay home. Delivery services still available to you. I have been a 3rd generation live long resident of FL. We can recover slowly if we open up now. If we don't open up now, ramifications could last decades. Please reopen FL. We all know good & well not everything will go back to how it was quickly. It will take years & years to recover. Very few will start to leaves their homes. Let those with confidence, strong work ethics & strong immune systems help our great state NOW. Please!
Pinellas	General	extra caution is better than the alternative. Stay closed longer. I think people will be less annoyed if the unemployment situation is resolved.
Polk	Food	I am a Manager at a fast food chain .We are doing our best to keep everyone safe. But reopening right now would be a tragic mistake. We have people coming through our drive-thru sick .Now we have to let them come inside and infect our employees? We have to keep the stay at home Oder in place and we need a curfew our numbers are steady rising and nothing is being done.
Polk	General	Great idea to reopen.
Orange	Retail	Too many people knowingly have the COVID19 virus are going out. I've gotten scared to even go to the grocery stores. It's a bad idea to reopen right now.
Orange	Professional Services	I am a Professional Licensed Cosmetologist and I for one do not feel safe starting back. There are still too many people testing positive right now. I don't have any protections for myself and my guests because I have to actually physically touch the person I am performing a service for. To me, it's more about the health and safety of my family that I would come home to.
Palm Beach	General	C'mon guys....do you really need the public's' input??? We've been locked down for 6 weeks....no stimulus checks, no unemployment checks....no money coming in. The Gov has been flaunting how great our numbers look and how they have been going down for weeks Open the dam state up....and lets get back to work You guys have been working on this for weeks.....it's not magic Everything that is done outside....open up. Restaurants open with outside dining....this week, then in two week....inside dining that is spaced out Open slowly.....and safely Lets go.....stop screwing around JB Gurn

AMERICAN OVERSIGHT

Seminole	General	We need to open our state gradually and safely according to the guidelines issued by President Trump. We are not a socialist society and people want to go back to work
Orange	Education	I don't feel that school should open in August. Orange County Schools open for pre-planning on August 3rd. The students start on August 10th. Is there any way the governor could have all counties hold off till September just to be safe. Children especially little ones are germ carriers when things are normal. They do not wash their hands and they touch everything. If we start back school too soon the 2nd wave could come from schools. Schools have students and staff with people who have or had cancer, asthma, diabetes, and other serious health conditions. Please take this matter seriously. We should not start the year remotely. It is hard enough at the end of the year for K-3rd graders. They need reading groups and interaction. They can't learn to read remotely. Thank you for listening to my concerns.
Leon	Retail	Open Leon today. Open Florida today. The mental health of the public outweighs any potential benefits of keeping Florida shut down.
Duval	General	My suggestion is based off of the employment needs of the people in the state of Florida that have lost jobs, needs jobs or in transition with employment. I would suggest placing provisions for people to start returning to work week by week (or bi-weekly), removing hiring freezes, organize job fairs and flooding the state with employment for 30 days. The economy will not be able to flourish, if the the people of this great state are not employed or received a few paychecks when the state opens. Thank you and God bless.
Lee	General	Please open small businesses. They can implement the same safety precautions the box stores with groceries do. Also open all beaches and allow 50% occupancy.
Lake	Professional Services	I'm a hair stylist. And I think we should stay home a little longer to be safer. You can't really social distance in a salon. I'd rather play it safe thru May. Responsible caring people don't want to risk infecting others and being behind the chair would make me a potential carrier. I work in the villages astound retirees.
Palm Beach	Recreation	We should be able to open public and private golf courses with mitigation. Golf is the easiest recreational activity to practice social distancing in. Walk the course or one player per cart. Pay online and don’t go into clubhouse. As for employees, many are there anyway keeping up the courses. But even for employees social distancing should be feasible since they would not need to come in contact with golfers or other employees.
Brevard	Retail	First of all I would like to thank the Governor for closing school for the remaining of the school year because as a mom with only one child I was in a scary mood to send my child back to school. I think retail (clothing) especially the big ones should be the last one to be open because it is an open area where it will be difficult to manage customers and when they do open, employers should screen every customer that walk in, and wearing face mask should be mandatory to decrease the spread of this virus.

AMERICAN OVERSIGHT

Hernando	Government	Reopening Florida at this time is a death sentence! There weren't enough closures and people are STILL gathering like it's any other day. Has the governor actually gone out among the masses? I doubt it. If he reopens it's anytime before June he's a Nazi murderer, like his cohort in Washington. Stop and think before you act!!
Seminole	Healthcare	Central Florida is not ready to open up. I am a health care provider at a birth center there are still a large percentage of asytomatic people who are spreading the virus. My husband is a school teacher and we have school aged children. We will not send our children back to school in the fall unless there is concrete evidence that this virus is in deed under control. Keep us safe. Put lives before money.
Pinellas	Healthcare	Many states are considering how to reopen the economy, including dental practices. As your constituent and a licensed dental hygienist, I am writing to encourage you to reinforce the importance of continuing to follow the Centers for Disease Control and Prevention (CDC) recommendation that dental facilities postpone elective procedures, surgeries, and non-urgent dental visits, and prioritize urgent and emergency visits and procedures now and for the coming several weeks. The dental team works in close proximity to the patient and utilizes handpieces that can generate aerosols or tiny particles and droplets from the patient's mouth that remain suspended in the air and pose a risk of infection to the dental team and other patients. I write to alert you to the need for and availability of appropriate personal protective equipment (PPE) so dental hygienists and the entire dental team may safely and effectively provide care to patients. Dental offices should be limited to emergency, urgent procedures in accordance with CDC guidance. As you consider next steps in responding to the COVID-19 pandemic, please ensure dental hygienists, the entire dental team, their families, and the patients they serve are as safe as can be.
Broward	Education	A watch need to be place on child care centers when reopening. Understandably parents are going to need childcare, however many are going to send sick children to childcare centers to keep their jobs. This will not only place other children in danger but the teachers and their families as well. Many childcare centers will be over populated and understaffed with the children soon to be out of school and parents looking for summer camps to send them to. Some kind of job protection needs to be in place that parents can stay home with their sick children without the fear of losing their jobs. This will keep the small people and staff protected as well.
Palm Beach	Education	Schools should be the absolute last area to reopen. It’s putting 700-800+ students, plus staff into a confined space. Not to mention 20+into one classroom with their teacher. Then sending them all back to their homes at the end of each the day.
Hillsborough	Tourism	My local residents have already shown that they are not taking this serious. Most only wear masks at grocery stores or to jobs that require them. People are booking vacations and scheduling gatherings at local tourist spots. As a family with 4 “at risk” members and 2 disabled veterans, one that works at the local A.F.B. Any contact with others could be deadly to our family. I BEG. You to reconsider!

AMERICAN OVERSIGHT

Orange	General	My primary concern is the situation facing all of the Floridians who are out of work. The Governor's office should do nothing at all until DEO is fixed, functioning accurately and the money owed to people has been given to them. Every single resource should be directed to getting that system fixed, or completely replaced, whichever will result in Floridians getting the money their employers paid for them to have. I believe every Floridian who is going to be in public for any reason, should be tested for C-19 prior to being allowed in the workplace, or in public areas such as restaurants, shops, other businesses. I believe Florida should proceed with caution in reopening businesses. Open those businesses that are now closed, but do so with restrictions. Require masks and limits on persons allowed in the buildings of the businesses. I believe that some open air public places are fine to reopen, but again with limitations, including oversight of security to ensure that people abide by those limitations. Additionally, Florida government needs to look into the CARES and other stimulus based loan programs, ensuring that those monies are going to the small businesses for which they were intended. Some counties, Orange for example, have mismanaged their rental assistance programs so those in most need are not getting the help that is intended for persons who are at risk of eviction. Florida government needs to take immediate action to protect all renters, and mortgage holders from evictions and foreclosures, and not for a short period, but permanently. Deferring payment doesn't help anyone when those who owe are out of work and have lost money they will never recoup, especially in the face of the unemployment mess. Thank you for the opportunity to share my thoughts on these serious matters.
Clay	General	Ignoring the advice & protocols of the healthcare community is going to have disastrous results.
Orange	General	Yes I think we should open Florida back up. I work for Universal and I am ready to get back to work. I am not scared, I think that if the community as a whole just stays home when they are sick, that we could still keep this under control. When you think about it, right now even, people that aren't sick are still leaving their house and the curve has flattened. Maybe allow businesses to open back up with restricted rules okay cool. But we are ready to have our lives back!
Levy	Professional Services	Please get Florida's economy open and rolling again. Many small businesses and families are suffering. My business is basically gone since I depend on the travel and tourist industries in order to have clients need my services. We were initially not supposed to be closed until the virus was gone, but rather to be sure our hospitals were able to handle the very sick. If our hospitals are doing well, we need to open, even if it is slowly, but actions need to begin! People need to be able to go to the doctor for other things and have elective surgeries and annual exams. There is potential for people to get seriously sick from other diseases if they cannot go for annual checkups. We can't keep freezing our lives while we wait on this virus, the numbers do not warrent that!

AMERICAN OVERSIGHT

Sumter	Professional Services	Carefully. I believe in safety first. Social distances for a while. Not everyone wears gloves and masks in public but I see a lot more cautious people. There are people that are non-believers and defy the government restrictions for purely selfish reasons. How do we protect ourselves against them? I want to keep my family as safe as possible but if we open too soon it will be detrimental to our well-being.
Indian River	General	Regarding opening Florida back up: Need more tests: until everyone is tested who wants to be tested and those results are accurately reported to the public will we feel safe to return to normal activities. We have self-isolated since March 14th and we will continue to do so until we have an accurate picture of what Floridian health looks like. Your job is to keep us safe. Not to keep us wealthy. Do your job.
Leon	Government	Open Leon today. Open Florida today. The mental health of the public outweighs any potential benefits of keeping Florida shut down.
Duval	General	Please open Florida up again. So many people are financially stressed right now and don't know when their next meal will be. I'm worried about our state economically—it could potentially lead to a 'mini Great Depression.' Not to mention the affects of nearly complete isolation on an individual's mental health. Those who are worried can and will stay inside. But many of us want to go back to work, back to sports, back to life. It's risky to send out the elderly and those with compromised immune systems, but ultimately they know the risk. Maybe it's selfish of me to say this, but I want my life back. What I'm doing right now isn't living, it's just not dying.
Sarasota	General	Until there is a proven treatment or vaccine for all., do not force people to go back to work if they have someone at home that has underlying issues. Make it optional,there are a lot of us who are very scared!
Hillsborough	Healthcare	The virus is not going anywhere anytime soon. A true vaccine will not be ready for months and the virus has already been around since at least January. It's time to start slow but let's get businesses opening back up.

AMERICAN OVERSIGHT

Hillsborough	General	As of May 1st: Allow people to use common-sense to wash hands, wear masks if they decide they want to. Open up businesses, beaches, and service providers to get jobs and our economy going. Kids need to be back in school as 50% of Students we are observing in Elem, Middle, & HS are not being successful with "Distance learning", despite the false information being reported by schools. Disband the "Emergency Policy Groups" and get back to elected officials to do the jobs they were elected to do with accountability. Hospitals need to get back to providing surgeries and treatments (cancer, etc.) that people had scheduled. Churches need to open up without fear of retribution to meet the spiritual needs of people. Promote healthy preventive, immune-boosting treatments - zinc, vit, C, D, E Get people outside to get sunlight and exercise. Open Restaurants with social distancing and basic sanitation precautions Stop mis-reporting deaths as Covid-19, and use proper "determination of cause of death", not just because they had covid-19 or were even suspected that they "might" have had it. We need "real, accurate" health data to understand what happened and NEVER AGAIN fall to FEAR and PANIC as we did this time! If we so VALUE Life to shut-down our economy and lives, then focus on where people are "Really" dying of Drug Overdose, Vehicle Accidents, Suicide, Abortion, etc. The CDC needs to be over-hauled starting with the firing of Dr. Fauci , Dr. Birx and all the "Gates Foundation-driven" supporters pushing for vaccines as the "only solution" and very inaccurate, Doomsday "Mathematica Models". I'm a math major and have great respect for mathematical models when they are used, properly based on the CORRECT assumptions. Allow already approved Virus-fighting drugs and treatments to be utilized to save lives and not attacking them with "false studies" like the joke of the "Veterans Study" that was not a clinical study at all, shameful for those that presented it and for all of those that "fell for the lies" .
Lee	General	Florida needs to be open for business as soon as possible. It needs to be communicated clearly that people who are scared are welcome to hide, but the numbers do not justify that fear.

AMERICAN OVERSIGHT

Marion	General	We need to get this state up and running as a majority of people work in the service, tourism and agriculture industries which all go hand-in-hand. Our economy will never recover if we continue to live in fear. As for those who are self employed and own small companies, we are taking a tremendous hit, especially since we are not afforded to luxury of unemployment benefits. I would like to see masks, spacing protocols, temperature taking, sanitation increased, personal hygiene information in a multitude of languages, soap, hand-san and disinfecting wipes readily available and a 50% reduction to start for all businesses. As far as entertainment venues and parks go, initially, this state should only reopen to Florida residents. I feel that too many people entering nationally and internationally is what caused this virus to spread in our country. I agree with the phasing of businesses reopening. We need state wide testing for everyone to see who is positive and who has the antibodies. Those who are positive, stay at home until you are not positive. (If you are double counting retests in Florida, stop doing this. It's misleading). This will lead to much needed peace of mind. We cannot remain isolated and living in fear. The psychological impact of adults and children who are going through this is going to create and creating a vast amount of mental health issues. At this time, we need to be producing our own sources of food and materials within the state. A discussion on PPE supplies needs to be address whereas we are not relying on supplies from foreign countries. We also need to have our research facilities at our prestigious universities develop testing and possibly medicines that assist in the treatment of this illness. Go Florida!
Sumter	General	Mandating masks in public places where social distancing is unlikely would allow all businesses to reopen. Progressive fines for multiple offenses of non-compliance should also be put in place. Punishing those with no regard for the health of others would be a deterrent. IMHO.
Pasco	General	I believe you have done a good job but I do not think it is time to re-open all parts of Florida. I do think places like beaches may be ok but I worry about movie theaters, bowling alleys and the like. Thank you for keeping the schools closed. I think some hospitals could return to elective procedures safely. I just think to have to open parts of the state that have low infection rates and do it it phases. It is not appropriate to open the entire state that same way.

AMERICAN OVERSIGHT

Pasco	General	Keep Florida closed for another 2-3 weeks. There was a spike in cases on the 23rd of April. Open to soon you will see the public gathering in amounts greater then 10. You will see a resurgence in bigger numbers then before if you open to soon. Think of the people, the economy will recover it always does. Lives will be taken from this. Right now people feel a false sense of security. It has been stated a second wave of this is coming. Do the right thing keep us closed. It's not simple for those who want to stay home stay home. Working remotely should be encouraged to work from home until fall time. Let's get out of this mess with lower numbers then any other state. Business can open if they can work remotely. The beginning actions of closing the state were delayed. It's not just older folks that get this virus it's a virus that doesn't discriminate. What it does discriminate on is the ability for people to recover. Yes the older generation has a harder time. But if you look at the fact the actual facts not listening to trump you will see people of all ages are dying. From babies to losers people. I hope you listen to the people of the state and actual look at what the polls of the Florida citizens show. We want to stay closed.
Palm Beach	Government	I vehemently oppose reopening the state at this time. What do you plan on doing to protect us? There isn't nearly enough testing or tracing which every expert agrees we need. Work on getting those items in place first. I understand people need to work but if we have a relapse the economy will be in worse shape and make no mistake that will show in the next election since that's all you care about. Maybe you should be encouraging people in a positive way to stay in place. I expect my leaders to find ways to move forward with 'out of the box' thinking. So far epic fail.
Indian River	General	It's necessary to reopen our state and our country with safety measures put in place. This virus is not going to go away and even if a vaccine were available next week, many of us won't take it. We have to find a new normal and begin to move forward and live again. Staying locked up is only existing and humans were not designed for that, economy put aside. We'll only get sicker by being sedentary and crazier! The biggest problem I see is with the idiots who won't observe precautions and finding a way to deal with them. The same idiots who caused a lockdown of beaches and parks which are beneficial and essential. I think it's important for Florida to open all beaches at the same time, for locals only. That would prevent an influx of people from other counties whose beaches are still closed. In my humble opinion ☺

AMERICAN OVERSIGHT

Volusia	General	I think our governor has done a great job keeping our state informed and taking steps to keep us as safe as possible. I would like to see the beaches reopen to more than exercising. Enjoying the beach while social distancing didn't seem to be a problem, however, Volusia county decided to do away with just lounging on the beach altogether. I don't think we should be allowed to drive on the beach but lounging (no more than 5-10) should be allowed. I would also like to see hair salons/nail salons open with guidelines. No more than 5 people allowed in at one time, everyone should be wearing masks and taking the appropriate precautions. Small businesses are really hurting and maybe with guidelines for how many people are allowed in the store/restaurant at one time, they can reopen. I don't think their is any across the board answer for all the counties in the state. I do think that some counties are able to open sooner than others. I am one of the blessed people who works for an awesome church and am able to work from home and receive a paycheck. I do not think we can go too long without people getting back to work in some capacity. My fear is if things are shut down for too long some people will do whatever it takes to survive. When people get desperate so does their thinking about safety and common sense. I pray that everyone stays safe and healthy and whatever decisions are made help us get closer to whatever our new "normal" will be. Thank you.
Sumter	Retail	Let the businesses decide when they want to open, and let people decide when they want to leave home. Government can't be everyone's parents. I think everyone understands this virus now, and let them proceed with caution. From what I am hearing, most people in the village wants to stay home. But, Give them a choice. This is different than with the pandemic started, everyone wanted to be free to roam. It's different now. People are respecting this virus.
Palm Beach	General	Nothing should be open for at least another month. We have not hit our peak and seen enough decline. I don't want to end up in a situation worse then we are in already. Be smart now. This took one person to start this mess. With this many cases still lingering and no vaccine we need to stay indoors, make masks MANDATORY in ALL public places like stores and keep unnecessary businesses closed. Stop being pressured by people that are looking to harm others and think of the long run. Do we want this again or do we want to put an end to this once and for all. Close the state off to everyone and lets take care of our people here and when things are safe welcome the world back!! Be smart not a follower or someone who gives into peer pressure!!! Think!! Long run!!
Orange	Management	We should re-open once the numbers of contagious doesn't increase at all. Once the virus has stopped spreading.
Hillsborough	Healthcare	To early to open..i say consider maybe June 1st
Seminole	Education	Open up the state with social distancing practices in place.

AMERICAN OVERSIGHT

Pinellas	General	My suggestion is open whatever you personally are willing to attend. If you open beaches show us video of you strolling down the beach with others. If you open restaurants, have a nice lunch with some of your Cabinet. Open hair Salons and barber shops, show us and your wife getting your hair done. My point is, open only what you expect would be safe enough for you or you parents to attend or visit. If all you do is make a statement about opening business and never show up and make daily or weekly visits to multiple different ones, then you're not being honest about the safety of your decision to open them. I am 70 years old and I will not be going to any business other then grocery or pharmacy. We are nowhere close to getting beyond this virus to call it safe to be around in relative close proximity to anyone. Our Federal Government has failed us with preparation and you are beginning to be following the same path for FL. Remember, peoples live are going to be a big part of your eventual decision.Choose with that clearly on your mind.
Palm Beach	Recreation	Please allow 1 on 1 outdoor racquetball!
Palm Beach	General	I believe that we need to reopen the state slowly. I think that we need to see a steady prolonged decline in new cases. I am concerned about the asymptomatic population infecting other. Also, it is pretty clear that a certain percentage of the population will ignore the "new" rules putting others at risk. I wonder how we will police that problem. We need a plan to proceed slowly, cautiously and a plan to include how we will police people who violate the new protocol all while protecting the vulnerable population - seniors.
Hillsborough	Education	Reopen . It is time to open up give We the People credit for being able to make our own choices only a small minority will continue to be less smart than the Vast majority m we were smart enough to elect each of you .now allow us that same capability to make our own choices .without a nanny government like. Most Democrat ruled and controled local and state government that think We the People are not as capable as they are .until it is time to support them at the ballot box .reopen . PLEASE THANK GOV.DESANTIS for remembering the USA and Florida are not Authoritarian government sthanks
Orange	Transportation	The convention industry and subsequently the transportation industry have been severely impacted by ther closure of the state and by the social distancing guidelines. We all need to get back to work before our entire industry goes belly up. Let's test, test, test and shoot for a full and complete open on June 1st. We can start opening up certain businesses gradually weekly as of Friday, May 1st.
Marion	Healthcare	Please keep the state closed and do not force people with Asthma and other work conditions to report in person to work as long as they have been working remotely. I'm sure I would be very sick if I were to get COVID as I have trouble breathing as is. You have to make laws so we are not fired.
Hillsborough	General	DO NOT OPEN yet! If you do cases and deaths will increase!! Lives are more important! Fix unemployment access NOW!
Pinellas	Food	DO NOT REOPEN FLORIDA UNTIL VIRUS SUBSIDES MORE. LISTEN TO THE DOCTORS; NOT YOUR REPUBLICAN CRONIES OR BUSINESS INFLUENCES.

AMERICAN OVERSIGHT

Citrus	General	This really is a no brainer! open up so we don't slide into a deep recession. If people are afraid to catch this let them stay at home, order groceries to be delivered for as LONG AS THEY want. The germs will not invade their homes. But it is our RIGHT as an American Citizen to do business as usual... OPEN FLORIDA!!!! it is our right!
Broward	General	I feel it's so soon to open up..there are still people dying from this virus I feel 30 more days would be a better way to do things.And if that's not possible for the state of Florida at least 30 more days for stay at home for South florida..I hope my opinion counts cause our lifes matter or money..We will manage
Hillsborough	Healthcare	1) Add an area of interest = COVID-19 IGNORE TRUMP - HE CLEARLY IS LOSING HIS GRIP ON REALITY! DO NOT DO WHAT GEORGIA IS DOING - PEOPLE WILL DIE UNNECESSARILY. QUIT DESIGNATING RIDICULOUS THINGS LIKE THE WWE ESSENTIAL - IT WAS CRAVEN TO DO SO. DO NOT OPEN UP THE STATE FOR BUSINESS UNTIL THE SCIENTISTS SAY IT IS SAFE!!!

AMERICAN OVERSIGHT

Brevard	General	Recommend Every individual making a reservation / traveling into the state should be required to produce a certificate of test for covid-19 showing they have tested negative withing the last 10 days (from the date they arrived in Florida). Is that too stringent? I don't think so if you really want to control the virus. Exception may be for children 1 year old or younger?? Fine for forged documents $5000 or 1 month in jail, repeat offense $50,000 or 1 year in jail no parole. --- ou understand that you have only tested 10% approx of our citizens. You also understand that PPE is not available to protect the workers that want to go back to work, and unless there is we are likely to have a increase in infections. Employees should be required to use PPE to protect them as much as their customers. They should also be tested before they return to work. No PPE from China should be used. Why. Do you trust China? I don't. Why support an economy that caused, intentionally or by accident, this virus? ------ How does Walmart etc track and control the number of customers in their stores? When they stop entry, which they must do at some point, how do they control social distancing in the que? ------ Sanitation supplies at the consumer end are non-existent. How do you plan on getting the small business owner the materials he/she needs to keep their business clean. The requirement for such products is going to increase exponentially as businesses are opened. Again products from China should not be used. The quality is suspect and again why support the economy that is the cause of the problem. Or are we now in the business of rewarding criminals (other than
Osceola	General	What was the whole point on closing down when obviously we opening back up in one month cases haven't dropped now I got risk my life out there when people are very nasty don't give a fuck clearly people not wearing mask gloves . Like noooo definitely not you should not open I got family I can get infected at work I maybe won't die but I obviously brought it in the house and everyone else got it I could be lucky and live but not my loved ones it's ridiculous and I swear when elections come for the governor and ain't getting a vote from me not from a lot of people so he better think this shit thru ofcourse some people want it open the fucking system don't fucking work they need money from somewhere so instead of focusing on opening up and shit work on fixing the unemployment for people can get ther money in Florida is obviously not prepared for nothing just hurricane season that's all they good for everything people we can't count on the government for shit.
Sarasota	Professional Services	As a small business owner (hair salon) the time has been very difficult. Home for almost a month and have lost a large chunk of income. To prevent further hardship in this industry I believe we could safely reopen by booking appointments further apart and sanitize between each client. Also require both stylist and client to wear masks, and to require each client to wash hands upon enter salons, and of course for stylist to wash hands between each client.

AMERICAN OVERSIGHT

Palm Beach	Healthcare	1st Thank You for allowing the citizens of Florida to voice our opinions about re-opening the State of Florida during this major global crisis. With South Florida, including Palm Beach County, has the highest numbers of infected which means that there are in fact more asymptomatic individuals here and we have one of the largest elderly population (Century Village). We do not want our families, friends, loved ones or ANYONE to continue getting ill or spreading the virus unkowingly. It will be a massively detrimental decision to open anything with out proper PPE for everyone and that is NOT happening. This crisis is effecting 100% of the population in some way, we get that, but to me and my family which includes front line workers say our very existence and being alive is priceless above and beyond any economy or economic value. You can not have an economy without people, its economics 101!! You simply can not put a value on a human life ever!! Human kind has lived and seen many hardships and if they made it, so can we. We must stop worshipping money over health. The DEAD DONT VOTE!! DONT WORK, DONT PAY BILLS AND THEY SURE DONT HELP ANY ECONOMY!!!! How many deaths must we see before its too late??? How many more innocent lives must end before people realize they maybe next? To hear an elderly lady curse at a man not wearing a mask as required that it will be his fault and anyone else who exposes others to the possibility of death will be the reason she dies??? Sad, just speechless and sad.
Polk	Healthcare	Go ahead and open Florida and when another 4000 people die or you start losing loved ones maybe then you will realize how you contributed to this horrible pandemic. According to the experts Florida has not even peaked yet. Please don't put the lives of our children and other family members in jeopardy. Remember, voters are already angry, don't give them something else to be angry about. Let's keep Florida red. God Bless.
Brevard	General	Follow strict scientific based options for a safe opening. Do not give in to pressure. The testing situation has been poor in our County. Many tests inconclusive and more non-existent. So our low numbers are fake numbers. Do not open just based on inconclusive testing results. Too many emergency approvals for tests without authenticity.
Palm Beach	Healthcare	I think it would be dangerous to open before we have adequate testing capability for both Covid 19 as well as the antibodies and when they do open it is completed in phases instead all at once. As an RN I would be concerned that there would be a surge of cases which would strain the resources . I would hope science would drive the decision making process .
Leon	Finance	Open Leon today. Open Florida today. The mental health of the public outweighs any potential benefits of keeping Florida shut down.
Charlotte	General	My wife and I support Florida reopening but would be more comfortable with a June 1st as opposed to May 1st. We are also concerned about travelers from lockdown northern states coming to Florida once we reopen. I would suggest only allowing FL residents admittance to recreational, beaches, parks, and amusement facilities. Use photo I.D. Or drivers license as proof of residence
Duval	General	Please do not open things like restaurants, bowling alleys, bars, hair cutters, nail salons, etc until it’s safe to do so according to public officials! Don’t be like Georgia!

AMERICAN OVERSIGHT

Seminole	Tourism	Reopen everything as quickly as possible, we need to return to normal
Duval	General	Perhaps opening area by area, maybe trying specifically zip code by zip code, since we could see the numbers and see the downtrends, which would make it easier to see which areas COVID 19 has affected. The higher number areas would be last and the lessor number areas could start sooner, or try gradually opening a different type of business each day. For instance all zip codes could open a different type of business each week or on certain days , for example on M,W,F gyms open up, to a limited capacity, then up ticking each week until things get to be 100 per cent. I would hope that the availability of testing and follow up is widely available, and that there are some guidelines continuing social distancing and the wearing of masks in public areas.
Pinellas	General	Although I am not in the service industry or an industry that has been hurt (I'm still fully employed and will not be furloughed, I do not think we should rush into opening the economy and state. My family lives in Germany and Austria and they have extreme physical distancing rules put in place and people actually followed it, now not do they have a low death rate but are able to slowly get back to their lives. Just going to the grocery store and the occasional walk around the neighborhood or park, people are not following physical distancing guidelines. We can only safely reopen if we have people following the guidelines in the first place. Do not rush this process.
Osceola	Education	As a teacher/dean, former EMT and someone who treats my students/stakeholders Like family, I feel that we need to keep them and their families safe. I know online learning is hard and frustrating for many people but I couldn't live with myself if something happened to them because we opened too early. We need to continue to support those that are struggling finically and medically but also ensure that Florida is safe. I love my state and love my county and want it to be prosperous but sacrificing human life/health for the economy is not the answer. The most precious thing we have is life, money is just a tool that comes and goes along the way. Thank you for the time and consideration in asking the public their thoughts, our life is quite literally, in your hands.
Pasco	General	What seismic event happened that we are talking about reopening Florida? We just had some of the highest numbered days of new infections since day one. Is it all over? Was there an expiration date and no one told us? The Coronavirus is just as prevalent now as the day it started, the virus itself. We have just been avoiding it. I want to see this state follow the national guidelines, every phase. It starts with a 14 day decline in new cases - not a percentage. Every day for fourteen days, each day has fewer cases than the day before. Then, and only then, do you start phase one reopening. By the way, this is also the opinion of the majority of the people my area. Thank you.

AMERICAN OVERSIGHT

Volusia	Retail	I don't feel Florida is ready just yet to reopen safely. My husband works in retail and I have witnessed many retail locations and they are just not practicing social distancing. I'm worried about him going back into the public and getting sick. As much as I want life back to normal I want to do this right and feel safe and I don't yet. Volusia county numbers are going up a lot this week. I'm a swim coach and swim instructor and both my kids are lifeguards. My job actually requires me to hold small children to teach to swim. I know we aren't ready for that yet and I worry my job will jump back in to quickly. I think we need to find a way to make people understand how important it is to follow guidelines before we reopen. In Volusia county people seem to not care or understand how important this is and until we can have some strict guidelines they have to follow I don't see how we can go to phase 1.
Lake	General	If we haven't been able to find/buy our FIRST bottle of hand sanitizer, disinfecting spray, disinfecting/sanitizing wipes or a thermometer SINCE THIS STARTED then we ARE NOT READY to open. FIX THAT FIRST.
Orange	General	We are not ready to open up yet. We need to wait until at least mid May before we start thinking about opening up some things. If businesses can work from home we need to continue working from home. If we open up too soon we're going to take steps backward and be back to where we are now. I think that all meetings and conventions through August should be postponed because you're inviting large groups of people together. You can't have a meeting or convention with under 10 people. Please think of the safety of people. And while it not be that person who is attending that may get sick they can easily give it to somebody else and their family or a neighbor or friend. I know some peopleMay think this is being overly cautious but if we take further time now at the front end we will not have to take a step back once we are giving some freedom to do things.
Orange	General	I do not believe it is safe enough for us to reopen. Cases are still coming in everyday. I have also noticed people have not been taking the necessary precautionary measures to decrease the chances of getting COVID-19. I believe we should slowly reopen in phases and limit travel. I think the appropriate and safest time to do this would be June. It should be mandatory for anyone in public to wear a mask/face covering and/or gloves/hand protection for at least two weeks until we see a very modest drop in cases. I know people are worried in regards to getting the economy back to the norm and paying their bills, but I think it is fueled more by cabin fever and natural fear, rather than common sense. Public safety, health, and lives over money.

AMERICAN OVERSIGHT

Orange	General	Im all for reopening Florida but when it is safe and we must open things slowly. I am also very concerned if we reopen tourism we are just welcoming people from around the country and world to come here from hard hit areas and possibly spread the virus 10 fold. My wife is very concern if we reopen Disney she may come into contact with someone who has the virus and bring it home and that wont be good for our family due to health issues. My oldest daughter is immunocompromised, my other daughter has asthma, my son and I have severe asthma. For restaurants and other small businesses we must have a standard of how many people can be in any one buisness at a time and social DISTANCING should be enforced. We cant have everyone rushing out at once. Also for big tourism to reopen we must have a sure sign of steady decreases in cases for at least 2 to 3 months
Lake	General	Reopening plans should be county specific. It is too early to open South Florida. There should also be strict guidelines for the tourism industry.
Volusia	Tourism	Good morning, Thank You for all the hard work to balance how to keep the public safe and the much needed opening of the Florida Economy. I believe that the now that we understand and continue to understand how this virus works, how to treat it etc. I believe that the tourism industry specifically the theme parks are ready to open safely and gradually and are better equipped to manage guests. (i.e. crowd size, cue lines, cleaning procedures.) better than any industry outside of healthcare and the Aerospace industries. By opening the theme parks, even at 1/2 Capacity of their respective parks, this will in turn greatly assist the return and recovery of the small businesses that not only support the theme parks but serve the guests who visit them. I believe also that allowing local and Florida residents 1st before even out of state visitors is a wise course of action. In addition I believe attacking the “Hot Spots” of this virus is the absolute best way to manage this instead of a shotgun approach to the entire state or any state. I believe this time to prepare has been used very wisely and we as a STATE should always have our State stockpile of PPE, Medical equipment and supplies remain high and up to date so our reliance on the Federal Government is low. Thank You again for all you do.
Orange	General	The state cannot reopen at this time. We are not ready or prepared, and we have not reached our peak with this virus. To open bck the state right now will be foolish and putting innocent lives at risk. Need I remind you that this virus is air Bourne, thus making it very easy to catch this virus. We need to get the numbers way lower, and from there have soft openings and more aggressive rules. Mandatory face mask in public, keeping distance in grocery stores, banks, etc. We need to be smart about this and approach this wisely and aggressively. We just cannot open right now. It’s not time.
Marion	Professional Services	Please reopen the state of Florida or at least certain counties that have fewer numbers of deaths. Thank you, Joanna

AMERICAN OVERSIGHT

Hillsborough	Professional Services	I'm open to a phased opening of the economy in line with federal guidelines. Many workers, including myself, will need summer camps/ daycares and school to open before a full return to productive work in an office setting is possible. Continued work from home while watching children is not feasible long term for a productive workforce. Thank you for the opportunity to provide feedback.
Brevard	Information	Being retired, the COVID-19 quarantine & shut down has had no financial affect on me. However, my concerns are over the financial hardship & disaster it will have on many, many restaurants & small businesses. They of course, are not getting enough money, and not getting it soon enough to prevent closing their business probably forever. But I also have one additional question and concern. That is: "Why is everything closed? Why the Stay at Home & shelter in place orders for everyone? Never in the history of the World. . . Has anyone but the sick - been ordered quarantined. From the Black Plague to Ebola, to the 2009 H1N1 - No one but the sick were quarantined. I understand the safety issue, but I also understand the financial issues for everyone - people, businesses, and Government.
Orange	General	In order for us to feel comfortable with reopening, we must have test kits available. Infections will remain unless you know who has it. Get those kits to us. Use your government power to produce all we need. That's why we elected this Governor to lead. All he is being is a puppet for Trump. Have some b... an act to help us in need.
Orange	General	I believe that florida should not open untill we are 100 percent no cases in florida. If we open up again whom is to say that it spreads again but only worse. I work for publix supermarket and I feel that everyday I am risking my chance of catching the virus and bring it home to my husband and 3 children which is a scary situation.I also believe that people will go crazy that the state is opened back up and the virus will spread worse than it has already done so.
Orange	Professional Services	Should wait for the curve to lower significantly, open to soon and people will travel through areas that are more affected and we're back to square one. Opening the country up too soon will cause another outbreak in my opinion.
Hillsborough	General	Time to open Florida. Restaurants, pools. Golf corses and any other outdoor activities so seniors can get sun and exercise and some socializing with social distancing and face masks' There are 25000 people living in Sun City and only 13 confirmed cases which shows we have been following the guidelines and can continue even with many restrictions lifted The Tampa Bay Times that there is an increase in domestic violence due to this "Locked in place". I can believe it as people are not used to 24/7 with their partner. This stay at home order has to be lifted soon as it is causing a lot of problems in our society- drug and alcohol abuse is very high, there is an increase in suicides and people dying from illnesses associated with isolation. Please help all of the Florida residents.

AMERICAN OVERSIGHT

Lake	Tourism	I am 100% ready to return to work. However, I will not be rushed into doing so if it causes me to be placed at risk of contagion. If you want everyone back to work and help the economy, then every Floridian and non-Floridian currently in this state has to be tested (with a reliable test) and then those who are positive must be contact traced. That is the only way to do it as safely as possible. Is it full bbn proof? No, but it is the best way to the open Florida as safe and responsible as you can.
Miami-Dade	Retail	I would be lying if I said I feel comfortable about retail stores being opened. I work in a retail store and my entire staff myself included we've suffered loss of wages and I highly doubt they all will be returning back to work because it's a small company and they can't afford it. Just to be safe May 1st would be too soon , an additional 15 days to see how many more are infected in Miami Dade county area and to have that number go down. This area has been a hotbed for the virus, most of the cases in FL are concentrated in the Miami Dade Area and if we open too soon then we risk going into another shutdown and that'll cause more damage to all of us . May 15 would be a better date to reopen and it'll allow more testing and to see the number of infected people go down. At this point we have been shutdown a month, an additional 15 days after the order expires won't kill us but the Covid19 might. Thank you, Ana
Citrus	General	Too soon, and I say that as a true small business owner. I have closed my small gym in a rural community that serves youth activities. We have had little guidance, no $ from SBA
Volusia	Tourism	I work for a golf travel agency, Tee Times USA. Everyone in the country, Ireland and Scotland have been furloughed and I can't even make new bookings for late 2020 for those clients that are brave enough to reschedule. If we don't reopen florida at least just a little bit.... I'm going to be jobless very soon.... I'm already reduced from 40 to now 20 hours a week. Applied for unemployment 2 weeks ago but still no email confirmation or any pin #. I am a single mother of a 6th grader.... we can't keep doing this with or without unemployment.
Dixie	General	Hi I'm Robert I have lost my food stamps and I just had to re alpy and I have got denined.
Union	General	Please reopen the state!!! As a health care provider, I think it is safe for us to start opening little by little. Let the restaurants have 1/2 capacity, let dentists go back to work. Take away some of the fear, help people understand that this isn't as bad as we thought it would be and we will be OK. The purpose of the lockdown was to slow the spread, not prevent infections. We have done that, so now let's get back to work!!!
Orange	Administrative	For the past 45 days many of us that work in an office have been able to work remotely, offices are Petri dishes of germs. I think that offices should continue to work remotely.
Duval	General	Dear Gov. DeSantis, As a senior citizen and Republican, who has heart ailments, I am hunkering down until Dr. Birx and Dr. Fauci says the virus is over. My wife does the shopping, which she will continue to do. We haven't been able to go to church, but we do watch it on television. You are doing a good job and keep up the good work!

AMERICAN OVERSIGHT

Broward	General	Eventually Florida will have to reopen, they key is ensuring that everyone is taking proper precautions when it does. I suggest requiring that everyone in an environment where social distancing can not be adhered to should be required to wear at a minimum a cloth face mask. Buffs should not be allowed as an acceptable form of mask as they do little to slow the spread. This requirement should be enforced through the issuance of fines and citations by law enforcement personnel and should include boat ramps, for-hire fishing vessels, parks, shopping and amusement... anywhere that social distancing could be compromised. Thank you.
Lake	General	Good morning. I love that you are assign our opinion. Thank you for that. My opinion is we open. If you're concerned about your safety then stay home. We have the FMLA for those people who are afraid for themselves or their families. But we need to move on. The economy needs to move on. Restrict us to face masks when we are in public. Put more hand washing stations in public places such as parks. What's the point in surviving the COVID 19 if our mental health is beyond helping. Please open but be safe about it.
Leon	General	Stop protecting your ass and open now. Public is hurting and you need to zct
Hillsborough	Food	Thank you for taking the time to give us a voice. I knew I voted for you for a reason. Nobody wants to see anybody get sick or worse from the coronavirus. However, it's pretty evident to me that we can work to reduce the spread of the virus and simultaneously reopen the state and let people get back to work based on what we've learned so far. Many people take precautions during flu season and this is no different when it comes to preventative care. The idea of having phases to open the state is commendable and I truly believe there should be a strong focus on personal responsibility. People know deep in their heart if they are sick. They know their body better than anybody else. With that being said it's simple, if you're sick and/or have a compromised immune system, do the right thing and stay home. This is an unprecedented time in everyone's lives but we can't stay inside forever. Thank you again and I appreciate what you do Governor DeSantis. 👌
Polk	General	Good morning, I feel as Florida should reopen and let us people get back to work especially because the unemployment system is broken. I have waited 6 weeks for a paycheck and for someone that never did ask for help this is ridiculous. If you don't want to pay us let us go back to work. We have kids to feed and bills to pay. I know the numbers are starting to go down and the mortality rate is specially down. I watch these everyday and I do believe Florida has done everything medical very well it's the help with working people that needs some work. Just at this time just reopen for us servers and bartenders to get back to work and make some money for our families.
Leon	Real Estate	Please start opening up retail and restaurants. These workers have not got jobs which pay enough to have savings to weather the pandemic. Encourage masks, washing hands, hand sanitizer at all public establishments and parks. Please don't let this destroy everyone's life and dreams. Open up Forida and America!!!!!
Seminole	General	No we shouldn't reopen in Florida we are still very active with coronavirus it's only gonna hurt us more

AMERICAN OVERSIGHT

Orange	Healthcare	As a healthcare worker I am concerned about opening to soon because we could see another surge even if we have strict social distancing measures in place. People by nature will become complacent and not follow these restrictions. I feel waiting another month will give us time to do additional testing and give the state more time to make a better evaluation. I am writing this on April 25 if we opened the State on Memorial Day May,25th I think it would give Florida Citizens something to look forward to and Make that day extra special.
Palm Beach	General	As someone who works in an ALF I am concerned about opening some businesses too soon and have this come back and continue to spread. Our residents as you know haven't been able to see family or friends for a month and I know there's still away to go before that changes but do not want to prolong their lockdown any longer than necessary. Many of them do not understand whats really happening and its starting to affect their mental health.. Thank you
Pinellas	Tourism	Reopen Florida! I support the full reopening in the state of Florida. As a registered voter, tax paying citizen of Florida who has been furloughed for 6 weeks from the hotel industry; the numbers do not support a continued shut down! The fear mongering of the media, the draconian measures of government control- it has to stop! Elderly, medically compromised or those wanting to continue living in fear and being controlled can stay home. But healthy individuals who want to work should be able to! I am not required to descend into poverty for anyone. I refuse to participate in "quarantine life" until there's an unsafe, untested vaccine released in eighteen months. I refuse to receive said vaccine to make others feel more safe. I won't set myself--or my children--on fire to keep you warm. We are Allowing fear and policies devoid of scientifically accurate data to destroy Florida and America! We have a constitutional right to take risks! Life is full of bacteria and viruses--many of which spread before symptoms manifest and after they subside. We have a right to receive OR refuse vaccines. Stop allowing the government to destroy: The Food Supply Small Businesses Medical Autonomy Access to Healthcare Religious Gatherings Privacy Rights Fellowship Tourism When the "new normal" is filled with starvation, depression, suicide, child abuse, domestic violence, imprisonment, and pure DESPERATION, the virus is going to look preferable to the world you helped facilitate. Reopen Florida Now! Tonva Bouvette
Polk	General	Please post the facts on the flu for the last 4 years the amount that had it the amount that was deceased put them facts out in the social media

AMERICAN OVERSIGHT

Pinellas	Tourism	Please let people who still have jobs go back to work but do Not reopen the beaches. I realize the tourism industry has suffered greatly as a result of Covid-19, however we cannot risk the lives of those who will safely attempt to return to work in the coming weeks. There are already many out of work. It will take months, maybe even years to restore employment in the state of Florida but opening the beaches will entice too many others from high volume infected states like New Jersey and New York. You mayors, governors and officials do little to nothing to close our boarders to these states and you certainly do nothing to keep people (including clueless locals) from staying 6 feet apart. Letting people govern themselves is a mistake because they won't do it. If you won't enforce guidelines and we know the citizens cannot be trusted to adhere to them without enforcement, then the best alternative is to refrain from opening the beaches, bars and maybe even restaurants. Thank you for all your support during this trying time. It's much appreciated!
Sarasota	General	make ever one ware a mask
Pasco	Professional Services	Re: Beauty/Nail Salon Hello, we run a salon and have a total of 8 people out of work. Like many of us, some will not have a job once the economy open up. When it is does and we are hoping for May 1st. Because we are in close contact with our clients, we are sanitizing their hands at the door. We are requiring all clients and worker to have mask on inside the salon. We also limit the total number of person inside the salon to 10 total at any given time. We believe that the beauty industry can operate safely for both clients and workers alike if the above procedures are follow. Thank you and God Bless America
Brevard	General	Regardless of the specific timing of reopening, the message from doctors and government officials must be one in the same. If citizens are not comfortable with our leaders' decisions then they will lose confidence and do what they think is best for themselves and their families, friends, employees, and coworkers. If citizens hear a consistent message supported by the medical experts then there is a much better chance of the entire State being on the same page resulting in a successful reopening process. Thank you for your time.
Escambia	Recreation	I request that the beaches of Escambia County reopen. They are rarely crowded at Perdido key and it is very easy to social distance. No one has proven Covid 19 is transmitted by the sand or saltwater. Residents that live here need to be able to get our sun, Vitamin D.
Broward	Retail	Please have a measured and science based process to opening. Large malls and stores with high traffic will have to open later and have traffic restrictions. I don't want Florida to be a testing ground for reopening. Lives over money.

AMERICAN OVERSIGHT

Volusia	General	I do not think we are ready we need more wide spread testing. The numbers keep going up. I believe that u will see we have. It yet peaked as more testing is done . I am a server and single mom this has hit me very hard . Not only financially but physically and emotionally as well. I now am trying to home school and keep everyone fed and with a roof over their heads . I do not need to get called back to work and bring this home to my children or worry about my elderly father who was here visiting and is scared to go back because where he lives is a hot spot. I also have to now worry about who will watch my children when I do do get called back to work.
Lake	General	Beyond popular belief we have still not even hit the peak of what we will see. Let's not make this a repeat of the Spanish Flu. We need to be smart and keep things shut down. I mean we really aren't shut down anyway. To many "essential" businesses are still open. We will not flatten the curve till we smarten up.
Seminole	General	Yes. I agree with reopening our state of Florida.
Duval	Government	This virus is here to stay, it will not magically disappear, hopefully in time folks will begin to build up an immunity to it, but we cannot do that staying locked inside our homes. Therefore let's begin to open Whatever's the safest way, using caution and baby steps!, wearing mask if we choose to, taking temps when entering places, limit numbers entering, and spacing people further apart if,when necessary . WE NEED TO GET FLORIDIANS BACK TO WORK!! Our Children need to get back to School beginning in fall, even if they attend on split shifts or alternate days. ONE DAY AT A TIME! OPEN FLORIDA!
Seminole	Finance	First, I'm very disappointed in how Florida has responded to the millions of unemployment requests. I understand there are sometimes mistakes, faults, and errors however, a month without government assistance is unacceptable! There are families unable to feed and provide for their own, pay rent, utilities and pay for basic necessities. Although I'm not sure if Florida is ready to open businesses back up safely, I know we need to do better to enforce curfews. People who are non-essential are still out roaming parks, and streets without reason possibly doing more harm than good. I hope that Florida can be in the news in the near future because we did something better, faster to help our own community. God bless.
Orange	Food	Food service should have disposable paper items for all guests which include cups, plastic silverware plates etc. Menus should be disposable. If there are condiments needed they should be in packets. Distancing should be done from the door to the tables. Servers should wear gloves and change each time. Masks need to worn by all restaurant Personel. Hours for restaurants should be cut back until the economy gets back on its feet. Employees should have their temperature checked when they come into work. This is just the start. Thank you.

AMERICAN OVERSIGHT

Seminole	Finance	I am part of a group of 7,411 people who want you to stop catering to the people who are afraid. Each day you keep us from working you are putting more nails into the coffin of our economy. We have "flattened the curve" despite "false predictions"". You have absolutely no way to prove we flattened anything. The fact you even admit the predictions were false just shows we have no way of knowing what would have happened had we kept businesses open and just implemented the social distancing recommended. This is killing small businesses. You have no hope of getting any votes from the Democrats no matter what you do. If you want any kind of vote from the rest of the state I suggest you stop buying into the fear mongering and get us back in business. More and more studies are coming out that this has been going around a lot longer than we were told. Also that the mortality rate is more on par with the influenza. So this whole shut down was a bad experiment and akin to closing the barn door after the animals escaped. We needed to have only kept the vulnerable "safe at home" and allowed the healthy to get out there and build herd immunity. The states that did not impose draconian measures (and yes yes pat on the back for you that you were "less draconian") are seeing a smaller mortality rate. The fact you want to use a task force to reopen is about as Big Government as you can get. You did not need a task force to cripple us, you do not need a task force to get us back open. Phase 3 now!
Marion	Information	Replace/install new infrared thermal imaging cameras where feasible to monitor the movement of individuals that may be having fevers. This will cover potential adverse effects not only from COVID-19 but cover all illness from other health problems in the early stages (fever)
Okaloosa	General	Open Florida NOW!!! You are killing the economy and every small business in the state. Your cure is worse than the cause!
Osceola	General	May 1st with the same restrictions that are in place with essential businesses. Most places here are requiring employees and customers to wear masks, maintain social distancing, disinfectants readily available. Start slow with half capacity and limited hours if necessary.
Hillsborough	General	It is time to start re-opening the state, but in a smart and targeted way. Our economy isn't designed to run like it has been, and the people cant continue this way for long. It is irresponsible to continue massive amounts of deficit spending in order to prop up a limping economy that can repair itself if we start to allow targeted openings of commerce. We can still promote safe health practices and express a concern for human life, while at the same time respecting everyone's given rights to not live in poverty, or being dictated to as though we are not a free people living in a free society.

AMERICAN OVERSIGHT

Manatee	General	First, local governments (city and county) must have some degree of autonomy in deciding what's best for their communities. Second, all State Parks should be re-opened but with restrictions such as no campers, campgrounds closed, event spaces closed, large gatherings closed, and social distancing guidelines strictly enforced. Third, restaurants need to be opened but in tiers based on capacity. For example, restaurants with max capacity of 100 should only be allowed to operate at 50%, those with max of 100 only 40%, those with max of 300 only operating at 25%, etc. Outdoor seating preferred. Hand sanitizers need to be required before to dining (like on a cruise ship), disposable or washable menus, and face masks for servers. Also, all restaurants need to be required to be a log of ALL diners on a given day and maintain those records for 2 weeks. That way if a server or diner tests positive, folks can be notified. Hotels should be done in a similar fashion regarding capacity. Fourth. No large sporting events, concerts, or mass gatherings until deemed safe. Fifth, all beaches should be opened BUT local governments deciding if they should be remain closed or open and with applicable restrictions. Sixth, all re-opening decisions MUST be made with input from local officials including DOCTORS, head of the county health department, and the Sheriff. Finally, there has got to be testing and contract tracing. There should also a 14-day downward trend or decrease in % of positive cases.
Seminole	Retail	We are a small retailer of pianos. NEVER over 1 customer at a time. It is insane to make us close and lose our business. Go back to where we were before governors last order.
Broward	General	I want Florida to start opening up its economy and workforce. All Florida residents are still grocery shopping, going to CVS, or Lowes for weeks now. There are many shoppers close to each other in these stores ! More businesses should be allowed to open so that residents can work, make money, and feed their families. The weather is warmer, almost summer like. Sweden had no lockdown. You need to measure the worry, the anxiety, and the mental depression (all which affect physical health) that residents are experiencing into the equation. Take baby steps, measure the effect, and then take more steps as Florida monitors other states like Georgia. There is so much politics countrywide involved in this, and it's most unfortunate. The real truth just doesn't become apparent thru it all. MDs are not gods.

AMERICAN OVERSIGHT

Pinellas	Government	Hello Mr. Governor, I am hoping the people of Florida are very careful when we begin open the state. I am hoping things will improve and the state gov't will get it's act together catching up on unemployment payments. It is extremely stressful having no money coming in for now 6 weeks, and what it sounds it will be much longer for all of us. I see Mr. Scott is making even harder for all of us by over-scrutinizing the procedure to get the payments expedited. We all will be voting blue in the fall and for a long time. I know it has been a backlog that has never been seen. But that 49 states except yours(ours)are catching up rapidly with state and federal unemployment payments begs an investigation. I hope for Florida's re-opening to be a safe one and back to the way we love living in florida. Thank you for your time.
Palm Beach	Education	All Public K-12 schools need to remain closed/not used until the curve has flattened, in a 2-3 week period. Schools are beyond essential, but students, teachers, school personnel, and workers are at risk. We need to keep our children safe, as they are our future. we can not teach wearing a mask. Students can not learn wearing a mask. We have to reassure them this is their safe space, and the only way to do that is for sanitation constantly, and a significant downward drop in cases.
Hillsborough	General	Please do not reopen Florida for now we haven't tested enough ppl yet and expects are saying we haven't hit our peak yet. I have Cancer and have been in quarantine way before the Stay at Home was issued. But I fear you are making a mistake by opening Florida up too soon. Which could mean more deaths to the State of Florida. May we all maje the right decision it's better to be safe then sorry. Thanks Ileana Rivero
Volusia	Food	I am a small restaurant owner struggling but surviving w/o PPP. Or stimulus!! Is FL curve flattening? We can't reopen til this happens for 2-3 weeks. One that occurs, keep social distancing and encourage stay at home as much as possible, for additional 2-4 weeks. Allow businesses to re open if they have a soc dist. Plan. Salons, nails, banks, restaurants, stores etc 25-40% capacities. (Wells Fargo Bank, I think has done a great job w this.) This should be true of all businesses til we see major decrease in new cases. Places that ppl "gather" , church, bar Disney etc these should be the last to open. And when they do must limit access and strictly enforce soc.dist. it is my understanding that the virus doesn't survive well outdoors in the humidity it that is true theme parks and beaches could have special policies to slightly increase attendees. Though have to have strict policy for patrons inside stores, shops and attractions indoors. reopening should be by county as cases and population vary. But need to be certain each county has man power to enforce rules. Need strict penalties for non compliance and logically enforceable.

AMERICAN OVERSIGHT

Pinellas	General	Please please please open up the businesses. I am a small business Dance Studio. I am having to pay 6200 a month in rent, utilities, licensing, taxes, payroll etc. I am a service business, I can not offer curbside pick up. We offer dance classes and summer camps. I am loosing revenue bc I can't have my recital... this pays for my summer rent! I have 8 employees I've been paying. The eidl helps a little and I bank with chase and who knows if I will get the ppp I'm in line though. Please help Me not to lose my business, I put everything I have into it. My families need normalcy. We have offered virtual classes but this can't serve my little children. Please allow us to open back up. I have worked so hard my entire life to get to this point of my business and am in the middle of buying a building...please open us back up. I can do it with distancing, cleaning profusely, and setting up plans to address each situation. Another month of stay at home will drown my business and many other service businesses.
Hillsborough	General	If people want to go back to work they need to test. Also beaches and parks are not even close to a necessity.they are a problem to police..leave them til last
Osceola	General	I know that the state needs to open but we have no vaccine we have no mask ,hand sanitizer, gloves, disinfectant sprays and stuff so we can protect ourself how can we open when we dont have those basic thing to be safe I feel you guys need to find a solution opening the state with out ways we can protect or self since everything that we can try to protect our self have been given to first responders we no mask no vaccine no ways of disinfectant or gloves hand sanitizer how can we move forward . Testing is also a must I feel everyone should be tested stores that have no contact with customers with the right protection gear it might be ok but those that have to come in contact I think is not a good idea
Orange	General	It's too early. I'm 73 and can't leave the house because of fear. I need to know that people are well because if I catch it I won't survive because of my heart condition. Being cooped up is very difficult. If people would have followed the guidelines in the first place, we would be over this by now.
Orange	Technology	If we open the state before we have testing and/or a vaccine, more people will be infected, more people will die, and those who are responsibly sheltering in place will have to remain so for longer. I know people are frightened and frustrated and want to restart our economy, get back to work and a “normal” life. But you’re not just risking your own health by going back out into the world too early - you’re risking the health if everyone you encounter thereafter.
Seminole	General	DO NOT RE OPEN FLORIDA UNTIL THERE HAS BEEN 2 STRAIGHT WEEKS OF DECLINING CASES. FLORIDA GOVERNMENT IS PATHETIC IN TERMS OF TAKING CARE OF THEIR CITIZENS. THERE ARE SO MANY AT RISK HERE AND YOU ARE STILL INSISTING ON FINDING A WAY TO MAKE THIS PANDEMIC LAST LONGER! Fix your website, stop being cheap, pay unemployment, keep Floridians home and safe. And yes, I did lose me job to the virus and yes, I am still waiting to receive my unemployment. Other states have it completely together and are actually protecting their citizens. How about Florida does the same?
Orange	Government	The state and country are not ready to reopen, until accurate testing can be performed on every citizen.

AMERICAN OVERSIGHT

Charlotte	General	I feel that is time to reopen Florida. With the exception of Miami Dade and Palm Beach virus numbers are relatively low. A simple, easy to follow plan would be best. Step 1: Effective May 1, 2020 Open businesses, libraries, county offices and restaurants at 30% capacity. Mask suggested but nor required. Open hospitals and clinics up for same day surgeries. Open parks and beaches, not public restrooms. Bars, theaters and amusement parks remain closed. Step 2: Effective no later than June 1, 2020 as case numbers allow. expand openings to 50%. Expand hospital surgeries to short stay procedures. Open theaters and bars at 30% capacity. Amusement parks open to Florida residents only at 30% capacity. Step 3: Effective no later than 1 July, 2020 as case numbers allow, open completely. People die, it is a fact. The close was to flatten the curve not to cure the illness. We bought the time we needed to not overrun the hospitals now let's get back to work and life.
Osceola	Healthcare	From a frontline worker to the task force: how is it that wuhan took over 100 days to open up but were considering opening after just a few weeks of shelter in place? Seems like maybe FL needs to work on their internal processes such as unemployment to appease the individuals haphazardly holding protests to open the state. Also, our county is not enforcing its restrictions so how is it going to enforce opening "slowly"? It's better off being all or nothing since members of the community can't seem to follow the rules as it is now. I'm also concerned the saliva test is not as accurate and there are a lot of false negative people in town
Volusia	Wholesale	We are working, providing air conditioning products to the best of our ability but would really like to see other business be able to open too. It's amazing how interconnected we all are and we need everyone working again
Osceola	Real Estate	I support the reopening of the state as soon as possible. Our business can not survive in the current situation even with help from the government. It will take a long time for people to ease their minds and go back to normal so the earlier the process starts, the Better!
Sarasota	General	I think we need to take it slow n get it right, if we go to fast n get it wrong... it makes it worse than it already is! this is a TERRIBLE situation as it is n we have to make sure things r as safe and confident for the ppl n population as humanly possible !!! anything less is unexactable !...
Sumter	Education	There is no way to keep children on school sites and keep a safe social distancing. Please carefully consider the multiplicative spread of this disease before opening schools again.

AMERICAN OVERSIGHT

Brevard	General	Please do not open back up. Too many people have not been respectful of social distancing or limiting shopping or outings to essential needs. Far too many people have been going out too often. The risk is not worth the reward. I truly wish instead of taking baby steps, we had done a complete shutdown and mandatory quarantine for 3 weeks. Please, I implore you do not open back up just yet. Again, the risk is not worth the reward. Respectfully yours, A concerned and compassionate Brevard county resident
Hillsborough	Healthcare	Recently my husband died from cancer in February.Married 49 years.I need to go to eye doctor am 72 years old.Also have a heart doctor for coronary stent.Finally I don't think having a gym or tattoo business should open for necessary health care.
Miami-Dade	General	Florida should re-open with safety guidelines. Mask in Public places should be mandatory.
Palm Beach	Recreation	Hello, I would like to see, if nothing else, Mother Nature opened back up. All parks, beaches, and boat ramps are closed here in PBC. My family can no longer be expected to be contained to our house. I work 50-70hrs a week as an essential employee. It's ok for me to travel all over the county for work but I must sit in my house for my one or two days off. I can't take my boat out and go fishing with my kids because I'm not wealthy enough to live on the water. I can't surf or swim because the beach is closed. I can't hike the miles and miles of trails close to my house because there are sheriffs officers patrolling the area threatening arrest. We at least need some of outdoor freedom. I have a family of 5. Myself, my wife, and three kids. We have never been more sick then since the lockdown started. I came down with a sinus infection. My wife has had a stomach virus. Lastly, my youngest is just getting over an ear infection. We never get sick like this. I attribute it to making an active outdoors family sit in their house 7 days a week. Please I beg you to at least give us back some of our freedoms Sincerely and wishing best of health , Jason Huettner
Citrus	General	It's absolutely ridiculous that schools were closed down for the remainder of the year. Do you know how many kids aren't being "taught" because their parents don't care. Not to mention the seniors who have now missed out on one of the biggest chapters of their lives. Oh and let's talk about the unemployment issue that is keeping the majority of us being able to put food on the table or a roof over our heads.
Manatee	General	I feel that it's too soon to reopen the state. We should wait until we are cleared by medical professionals. I fear we are going to see a steep climb in cases if we reopen now. Atleast give it a few more weeks while all the tests you have ordered are delivered and available so that they can be administered and we can get a better idea on what is truly going on as it relates to cases of Covid.

AMERICAN OVERSIGHT

Brevard	General	I think the stay home order should still remain for at least till may 31 we are all still at high risk our numbers keep climbing here in florida until we see a decline in numbers for that 2 week period. why do you think our numbers are lower than expected because most Floridians are staying in and listening to the experts that's the key to listen to the EXPERTS here we have only been a stay home order for 3 weeks that's not long enough to help try to overcome this I know people need money and the economy thats what unemployment and the stimulus check is for to help 1 more month we can do it fir the safety of all here in florida just think we do not want anymore people than we have already to get hit by this virus remember as ll our family's and the children thank you
Manatee	Government	Re: reopening Florida --The point has been made sufficiently to impress on people the need to be careful. --The economy has been deeply affected. --Freedoms have been curtailed without legislation, simply on the say-so of government officials. --Open up completely. Continue to stress "Wash your hands. Don't touch your face." --Leave it up to the people whether they want to "social distance." Each person should take care of herself or himself.
Duval	General	May 1- allow restaurants that have outdoor seating to reopen. With only 30-40% capacity allowed. Allow summer camps to begin registration, at least those that are outdoors, such as golf clinics, swim clinics, tennis, etc. allow country clubs to open on a limited capacity, golf, tennis, outdoor fitness, outdoor dining, swimming pools- during limited hours with limited amount of guests-50-75 depending on the size of the pool area. To limit this, remove chairs and loungers, bring back staff (so they can work) and they can manage the capacity. No children allowed in stores. If you have a mask- be required to wear it when in public retail spaces. Hair salons can open, on a limited basis, only a couple customers at a time. No nail salons, no movie theaters or main event, adventure landing type places until at least June. Install hand sanitizer stations at all public parks and playgrounds. When movie theaters do reopen- cap capacity and require distance in purchasing seats. Gloves! Sanitizer, masks! Available EVERYWHERE that is open!

AMERICAN OVERSIGHT

Palm Beach	General	It's way too soon to be considering "re-opening" the entire state. Without comprehensive, widespread testing, we have no idea how many people in Florida are infected. Reopening the state means thousands of people WILL DIE. Is that less important than being able to go out to a bar or get a haircut? Go to a hospital, talk to actual medical professionals (if you can find any that haven't been muzzled by the hospital administration). SEE THE ACTUAL TOLL that your decisions have. Reopening the state will mean millions of peole will be forced to go back to work, putting their lives & the lives of their families in grave danger. Our lives are more important than your desire to suck up to the president.
Orange	Professional Services	I would feel safer if the State temporarily added to it's health codes a mandated mask for the service provider and for the customers. For salons and any business built on personal relationships so that the service provider can put the responsibility of requesting their clients wear a mask or answer a list of questions on the state
Lake	Tourism	I think that to safely reopen the state, we need to have more testing and it needs to be made available on an ongoing basis. Residents need to be encouraged to get tested. I think there is still a stigma that there are not enough tests available, or you will be turned away at testing sites. I think there is also a fear with finding out you are positive and what repercussions that has on daily life. Such a small percentage of residents have been tested, it's hard to know when or where any of us could be exposed unless you have been around someone with overt symptoms. I know there have been talks of fever testing as part of the reopening strategies specifically for theme parks, but since not everyone runs a fever with this virus, I don't know if that makes me feel any safer. I work in the hospitality industry, and while I know we need to get things open to have our economy bounce back, we definitely need more safety protocols in place before we allow people from all over the state, country, and eventually world come back to visit our hotels and parks, or we will continue to see this spread and have more outbreaks that we have all worked to hard to curb. I think there also needs to be strong considerations that any employees that can continue to work from home be allowed to if possible to minimize the number of people out and about and possibly being exposed. Encourage companies to allow more remote working options rather than forcing the idea that all employees mist flood the workplace immediately unless they are needed in a physical capacity.
Lake	General	I don't believe Florida should reopen. I'm afraid the jump in cases will start all over the again.

AMERICAN OVERSIGHT

Broward	General	I personally don't think that we opening Florida is a good thing. They've made no advancement to prevent the spread of Covid19, nothing has been accomplished so all you're gonna do is re-open everything and people are gonna start to die. The economy is not worth our children's lives our own lives. It's unfortunate but truly everything is in the hands of the scientist. I refuse to send my daughter back to college until I know she can be safe. And sitting 6 feet apart from another student sharing the same air conditioner and touching everything that each others touching with no more protection than there was two months ago won't be happening. As much as I miss going to the beach, and seeing my friends, it's not going to be at the expense of our lives
Manatee	Accommodation	Thesis: Until there is a vaccine for coronavirus, efforts should be made, over time, to test all Florida residents for antibodies to the virus. Testing should remain free. Priority: Seniors, those at-risk per CDC, health-care workers (incl. dentists, chiropractors, etc.), first-responders, crisis managers, those who believe they've been exposed, service workers, etc. RE-OPENING: THOSE PERSONS TESTING WITH ANTIBODIES WOULD WEAR A GOVN'T CREATED WRISTBAND WHILE IN PUBLIC. OTHERS SOCIAL DISTANCE UNTIL TESTED. Other: Areas where space is available should be open, subject to social distancing, including outdoor dining, parks, beaches, stores, etc.
Alachua	General	The state of Florida should re open businesses in spurts and with certain precautions. For example, retail stores should re open, but continue to implement being 6 feet apart and also limiting customers into stores. I work for Publix here in Alachua county. We have put tape on the floor that tells customers to remain 6 feet apart at checkout. We also keep track of how many people go into our store. We've also allowed only one entrance/exit. The state should start off with whatever they deemed are essential. The last thing that should be opened are theme parks, as this is a huge attraction for massive groups of people. Florida could start off slowly, I'd say the next thing that Florida should re open are doctors offices, dentists and other health businesses that are non emergency. After that, If all goes well for about 1-2 weeks, I'd reopen recreation centers and state parks. Same process then the rest of retail stores such as Best Buy, JCPenny, etc. Schools and theme parks should be on the end of the list, as it would be hard to regulate how many people can be there. Thank you for everything you all do, - Reagan Knight
Brevard	General	I think we should start opening May 1 like you told us. Do a slow opening sstore and restaurants at 30-50% capacity. Social Distancing and mask required for workers. People are losing their livelihood which may be worse than the cure. Please reopen

AMERICAN OVERSIGHT

Volusia	General	Please do not rush. I understand that Floridians need to return to work for the well-being of their families. Restarting too soon will backfire if cases escalate causing more harm in the long run. Overworked, stressed health care workers/ first responders cannot keep up the pace if we spike. It is wrong to ask citizens to return to workplaces that don't offer protection from Covid transmission. Modifications can be simple and still have a large impact on safety for workers and clients/customers. Thank you for asking for input and for a thoughtful, methodical opening of Florida.
Orange	General	The state should not open up yet. The virus is still in full force.
Osceola	Tourism	Please do not reopen the state yet. Let this virus cease to exist. If you open too early we will get more spikes in the virus and we will be back to where we started. Please do not let it be in vain that we have all sheltered in place during this time. I ask that you think about more of the long term plan than lots of businesses wanting to reopen.
Brevard	General	My husband and I are retired so other than travel this hasn't affected us. Our children living in. Florida, Ohio, and Texas are all working. With regard to Florida, I suggest letting restaurants opening with social distancing. If stores like Walmart are open and serving the public, why not Bed, Bath and Beyond and other large stores. Social distancing is key and I say let these young people get back to work. Let them decide what's reasonable for themselves and their families if it doesn't affect others. Parks and playgrounds should remain closed. Churches should be allowed to conduct services with social distancing. It all depends on how far businesses are willing to go to protect the public. We the people should decide what we think is safe for us. Not Government.
Duval	General	Requiring EVERYONE to wear a mask would help slow the spread of the deadly virus. Also would limit people's excuse that they were not told so when they get sick. It's like the non smoking policy in a restaurant, everyone must wear a mask to enter. Seating needs to spread out and all employees must wear a mask. This should be indefinite or until a cure is provided or an instant test for antibodies or virus is available to everyone. Without immediate testing results this will continue to kill people and the economy. Keep out out of staters for another 2 months. Wonder what Florida would have looked like if Disney didn't shut its doors early on? Florida is doing this right, keep up the good work.
Orange	General	Opening the state up now would be putting many more at risk. Until the curve starts heading down significantly due to a vaccine and or readily available antibody testing opening up would be an irrational and reckless decision. Stronger enforcement of self quarantine needs to be made. Travel should be banned domestically for a set amount of time so this deadly virus stops spreading at such a rapid rate. If the state would do a string 2 week lockdown of everyone aside from medical and emergency responders I.e. police, firefighters, EMT, animal shelters and barns then maybe the state could see a downward trend. Right now people are not taking this global pandemic seriously. People who have no regard for the crisis we are in are putting other people at risk.

AMERICAN OVERSIGHT

Seminole	General	As a bar owner in our great state with 2 children I'm struggling financially and mentally. I believe we can open our economy and be smart with necessary health guidelines provided by our state health department. The people of Florida have shown they can comply. Please help those of us like me that despite trying to apply for everything available haven't been successful
Clay	Food	Let the data decide when it comes to opening up restaurants. You can't do this Statewide all at once but I think you can do it county-by-county and for those that can open keep social distancing in place and limit the number of customers that can be inside at the same time
Brevard	General	Every day the stay at home orders continues from this point another business closes & will never reopen. It's not just about the virus, it's about hunger, affording life sustaining medications, homelessness and hopelessness. The suicide rate is climbing & the crime rate will not be far behind. Please reopen Florida on May 1.
Hillsborough	Healthcare	Protect the most vulnerable with guidelines and open everything back up. If you count asymptomatic people even though more contagious healthy people can fight this like the flu. Less control by government and protect my civil liberties
Pinellas	General	I urge you to begin opening the state. Those who can work from home stay working from home. Open up business'. Have reasonable guidelines that don't fringe on our fundamental rights. We can prophecy those that are vulnerable without out destroying our economy and livelihoods of the healthy.
Osceola	Healthcare	Please do not open up anytime soon. I work in a medical office who is FORCING me to go back to work and I am pregnant. I don't want to be at risk. People are not taking this seriously. They think this is all a joke please keep quarantine for the month of May!! We've only been doing it for a round a month. NYC is still under quarantine and it's slowly declining. Opening it up would be a bad mistake.
St. Lucie	Healthcare	Please make sure all hospitals and healthcare workers have proper PPE! Let elective procedures be allowed to be performed. Em Encourage people to continue going to dr appts for their overall health care. Test all employers hospital or elsewhere before opening a business. Limit number of par Trans to be allowed in the establishments so people can social distance. Reopen churches. Or allow drive up service or for people to obtain sacraments Thank you. I'm praying you make all the right decisions

AMERICAN OVERSIGHT

Lake	General	When to open the economy, how to open the economy. This requires balance and thought. Without an economy the rise is sickness will increase. Opening the economy too quickly will also increase the problem of the current virus. We have a "catch 22" and that is where common sense/balance needs to come into play. When you have been ill for some time and have lost substantial weight, you do NOT binge eat as more problems arise. However if you don't eat, your current problem becomes more serious. Look at what businesses the community needs and how those concerns helps people physically, mentally and economically. FOR EXAMPLE: A beauty parlor/barber shop can mentally improve an individual in their personal self worth. They may seem non-essential but they have a very real effect. People leave feeling positive and that transfers to other areas. Naturally we don't drop simple precautionary measures. Let's all use common sense and continue to practice good hygiene and slowly open local businesses that compliment one another.
Osceola	General	Can we have a general PUBLICIZED press conference breaking down the trends - number of cases/day, number of deaths and hospitalizations/day, number of tests administered vs. positives/day, much like what's displayed on the dashboard? It's important for us to understand that we're meeting the guidelines (or if we're not yet), and not acting hastily in reopening like Georgia has.
Orange	General	Benchmarks for reopening: - Wide availability of masks for everyday non healthcare workers - Wide availability of free testing for all to ensure that those out and about are not infecting others; at home testingnwould be ideal - Availability of handsanitzer and other alcohol based products needs to increase - This should be slow and phased, only allowing a certain number if employees in space based on square footage Please do not reopen hastily. We need to go slow. We need a campaign to encourage people. Not leaving their homes if coughing/sneezing/not feeling well. Even if it could be allergies. We need a campaign that educates about the paid Federal leave options related to COVID-19.

AMERICAN OVERSIGHT

Palm Beach	General	It would be a significant mistake to reopen the economy at this time until testing for the virus can be implemented. Opening the economy without a comprehensive testing program in place will lead to a substantial surge in the number of cases of COVID-19 and a surge in the number of deaths. With the number of cases and deaths still increasing in the United Sates the reopening of the economy would be medically irresponsible and result in a surge of cases of COVID-19 and deaths. To further this argument, Iran has begun to reopen their economy and this has resulted in a surge in the number of cases and deaths. When the virus first appeared in the United States the cases were isolated to a few locations within a few states and number of cases and deaths increased very quickly. However, now the virus has spread and is dispersed throughout the country to nearly every city and town, reopening the economy would result in a rapid spreading of the virus due to the higher potential for contact due to the dispersion of the virus throughout the country. This dispersion effect would result in a massive surge in the number of cases of COVID-19 and a massive surge in the number of deaths. Until the number of cases starts to decline and a comprehensive testing program is in place, reopening the economy is medically irresponsible.
Sarasota	General	We have to get Florida back to work. The medicine is going to be worse than the disease. Small businesses can not and will not survive staying closed. As it is I would speculate that over 15% of the closed businesses will not reopen. We were wrong about the mortality of the virus. We can't afford to be wrong about keeping the state closed. Time to get back to work. NOW

AMERICAN OVERSIGHT

Palm Beach	General	Facts over fear. We flattened the curve. We need now need to get back to work! Unemployment: For the love of God, please turn this failure into your legacy. Please ensure that everyone gets their money they deserve. I am a self employed massage therapist. I was ordered not to work for 60 days. It took me weeks to just get the website to load, then I was able to file. I have NOT received any funds as of today. DeSantis, I voted for you, I believe in you, You can make this right! Businesses: OPEN THEM! Small businesses are hurting! Please do not extend any of your Stay at Home orders or the cease order you have on medical licenses. We need to get back to work! Vaccine: I do NOT support any kind of mandatory vaccine to get us "Back to Normal". Please do NOT have this on any agenda. Beaches: OPEN THEM! We need fresh air and vitamin D. Disney: Please slowly reopen this year! If people want to wear masks on their own, then so be it, but I will not part take in any large group where I have to wear a mask or have my temp checked. Not when the death rate is under 1%. Thank you for everything you have done during this pandemic. Florida needs to come back stronger than ever. Tourism is our life. "Experts" are predicting another wave of this next winter. I hope there is a plan in place NOW. We can not afford to shut down again. You have my support to open Florida tomorrow!
Duval	General	People at risk should stay completely shuttered and maybe until there is a vaccine.. Healthy people should be allowed to live their life. enough is enough. Schools should have been back in session two weeks ago.

AMERICAN OVERSIGHT

Volusia	Government	This entire thing is a complete and unconsttutional behavior against this free country, and AGAINST every free American. You can't control us. Warn people, and we are free to make choices. Government doesn't need to tell me or anyone what is essential and is not. Every business you say us not essential is essential to that very person to work and survive. Quit controlling us. This virus is no different than any flu any year. If it started amongst China and the filth of the Orient, make them pay a price. WE ARE FREE TO MAKE CHOICES AND WORK IN THIS AMERICAN DREAM. STOP the control, OPEN, AND GIVE ME MY FREEDOM BACK ANF GIVE IT BACK TO ALL AMERICANS. DON'T WAIT FOR MORE PROTESTS AND POSSIBLE VIOLENCE AND MORE MENTAL ILLNESS AND/OR EXACERBATED MENTAL ILLNESS. You have taken enough from us. STOP IT, NOW. I HURT SO BAD FOR SMALL BUSINESSES, TRAVEL INDUSTRY HERE, SMALL HOTELS, BED AND BREAKFASTS PRIVATELY OWNED, STORES, SALONS, YOU HAVE TAKEN SO MUCH FROM SO MANY. OPEN!!! QUIT PUTTING UNNECESSARY FEAR INTO US.
Polk	General	Do not reopen. Do not risk our families, our children and elderly. This is something serious. Thousands of people have died in the US. I will not risk my family.
Flagler	General	Hello. I think that limited re-openings of all businesses needs to happen ASAP. Those that are at high risk will stay home until them feel 100% safe so I do not think that everyone will swamp the businesses at once. People can be told to wear masks when inside and think that people would do so in order to have restrictions lifted. 50% max of normal occupancy can be permitted at the start and that can ramp up based on how many test positive, hospital capacity, etc. The economy can only take so much harm before permanent damage is done. I am a US Navy Vet on disability but I also have a business degree so I know what it takes to sustain a successful business! I wish you, your staff and all citizens the very best and I know we can get through this.
Palm Beach	Government	We are not ready to reopen the State of Florida. Currently we have too many cases on the rise. Also we have not done enough testing or isolation.
Miami-Dade	Recreation	Re-open boat ramps first, Monday to Friday only.
Brevard	Healthcare	Please do not open the state yet. We should definitely support the businesses that are truly essential but it is not time to open up recreational activities. The beaches and parks should be closed but they are not we are still seeing an abundance of new cases each day. Do not make the risks that essential workers are taking in vain. We do not need a repeat of the Spanish flu, when you have a resurgence of cases is soon as everything re opens. Our population consists of I high number of at risk and elderly individuals, this will be madness if you reopen now.

AMERICAN OVERSIGHT

Hillsborough	Healthcare	I think the best way to go about this is the way it has been, Staying at home safe until we can eliminate the virus. To just reopen would be irresponsible, if we where to open to soon we would have a second wave. Let's do thing right the 1st time.
Brevard	Education	As a daycare owner, we need financial and logistic support to reopen. With smaller class sizes, expensive PPE, and inflated prices for supplies. Please give us what we need to provide an essential service for our community. We need grants, fast.
Broward	General	Good day, It seems as it is time to allow non-essential businesses open with the same rules as essential businesses. People need to get back to work and the Florida economy depends on it. Beaches should open as well. People usually stay further than 6 feet from each other anyway. Schools should open as children don't seem to be affected by the virus. Older relatives can still social distance. Best regards, Jason
Sarasota	General	We need to open up and use appropriate safety measures that are currently in place. Follow the phases set from the White House and use common sense. Allow outdoor access to parks, beaches, and other areas while practicing social distancing from others and groups less than ten. For those who are unconformable with opening , stay at home. There needs to be a balance for the health and safety of others while allowing business to open.
Volusia	Food	We should wait to reopen Florida for as long as possible. What's the point of reopening the state early, if in a few months we need to close once again. I haven't worked in over a month, and do not want to experience this again this year.
Pinellas	General	It's time to open up the he economy. The numbers don't justify destroy people's lives
Brevard	Food	I believe the state should be opened up by county, determining which are least at risk and have shown much fewer cases. We need to open restaurant dining to 50%, we cant survive off takeout in fact my restaurant wont even open again until we can utilize the dining room. Who knows if we can make it that long. If we can open soon maybe turn the health inspectors in the area to do check ups on restaurants to make sure they are following new protocols (disposable menus, masks, reduced seating,etc.). We need to open or we will all fail.
Lake	Education	I am all for safely reopening the state in phases. south Florida is our hotspot so they should be under more restrictions than those of us in smaller areas with less cases. Please please please! Plan on reopening schools in the fall for the new school year! As long as the numbers have come down.... These kids need school! We need to look to Sweden and how they refused lockdown and are achieving herd immunity. We need herd immunity! Staying locked up and killing the economy is not the answer.
Brevard	General	We will not be visiting any public areas until medical advisors deem it to be safe. Early reopening is a bad idea.

AMERICAN OVERSIGHT

St. Lucie	General	We are in no position to reopen people are still sick and still getting sick and dying. Opening at this time is a TERRIBLE IDEA!!!
Duval	Information	Why would anyone do something as moronic as opening up a state without first conducting statewide testing, why not send in-home test kits to all residents, whom can return to either a local pharmacist/pharmacy or mail off. At least then will know who's the carriers and who is not. But opening because they are trying to appease an imbecile that suggested drinking or injecting bleach or Lysol to show loyalty in private phone calls is just plain dumb. Don't kill Floridians.
Lee	General	I feel I'm not safe to go back to work as hairstylist until I'm sure it's safe for me I demand more testing for all of our safety before returning back to work and a more normal life
Brevard	Management	Allow FL businesses and residents to return to normal operation. Safer at home needs to be recorded immediately. The devestating economic and personal toll this have leveled on our citizens in order to protect but a handful of theost vulnerable has been unwarranted. Especially given all of the false, inaccurate reporting of actual cases of the Covid-19 infection, overinflated death counts, and tainted tests and false positive results, it's clear that the number of people infected is significantly liw compared to our state's population, and the majority of deaths gave been elderly and a few immunocompromised. Floridians cannot be held hostage in our homes and ruin our livelihoods and collapse our business communities over this any longer. Open Florida and let citizens determine for ourselves how to manage our lives going forward as we recover from this mess.
Volusia	Food	It's too soon.
Pinellas	Recreation	Open it back up... it isn't quarantine making healthy people stay home ... it's called Tyranny and what started the revolution
Polk	Tourism	I work for Disney, and although I am very eager to get back to work, I don't think it's a good idea to rush this. If history ends up repeating itself (spanish flu), there will be a second wave, which will be worse than the first. I am all for a soft opening of the theme parks later in the year (maybe mid August??) as long as there are definitive measures put in place to keep employees, as well as guests, safe. Just please, don't rush it!!

AMERICAN OVERSIGHT

Broward	General	Open Florida. We did the 15 days to slow the spread and then 30. We continued to stay home to flatten the curve. The purpose was to monitor the virus and not overwhelm hospitals. Hospitals are prepared with beds and PPE. The vacancy has been reported in the 40% range. We observed the virus and found it can be treated with vitamin c and/or hydroxychloroquine. Mandatory masks unfairly discriminate against people with medical conditions that affect breathing. Cloth masks are effective at blocking dust and pollen - coronavirus is neither. Viruses have existed and will continue to exist. We do not have a right to a germ-free environment- but, we do have the right to life, liberty and the pursuit of happiness. Unemployment benefits in FL have been a disaster. Soon, people will run out of money and then run out of food. What do you think will happen next? We will see riots in the streets and spikes in violent crime as people become more desperate to feed their families. Open the state. Allow people to work. There is no good reason not to do so.
Seminole	Tourism	Please start to reopen the state. Unemployment and stimulus checks won't pay our mortgage. My husband is a very hard worker but there's not much we can do when his entire industry is shut down. It's hard to replace his income by delivering pizzas 20 hours a week.
Lee	General	It's time to get the economy started. The cure is worse than the disease. The people most vulnerable should continue to stay inside. If you are worried. Stay inside. If you must go outside, take precautions. But those of us that are health and not high risk should be allowed to get on with our lives, enjoy our beautiful beaches, go to restaurants, participate in athletic activities outdoors. Florida is built on tourism. Allow people from non-hot spot areas to start coming here and spending their money. Don't treat every state and every county the same. Be smart, strategic. Ramp up testing to allow everyone that wants one to get tested.
Broward	General	I feel its way to soon to open up Florida especially south Florida
Pinellas	General	Please fix the online unemployment system! The notifications on the portal are helpful, but more information could be posted, instead of finding out from the nightly news. This needs to be a priority. Thank you.
Miami-Dade	Wholesale	Let's not be the State that opened up too early and because of that decision, caused more precious lives to be lost Let's not become that headline.. We can't put business over the lives and we'll being of human. All it took was a few people to get infected and look where that left the world, because the way this virus easily spreads is insane. I have not lost a family member to COVID-19 but I have lost them to other sicknesses. And the death of a family member can tear a family apart. Not everyone knows that pain. Let's not inflict that pain to families because of an obsession to be one of the first states and cities to reopen. We beat this thing by staying in place until this thing dies down. It's slowly working but we are just simply not there yet. Miami-Dade and Broward county are Florida's hotspots. We should stay closed until the end of May, and then look into phase 1 of reopening. But only businesses and warehouses that are in a way essential to life.

AMERICAN OVERSIGHT

Brevard	General	We haven't had a new virus of this magnitude in a decade. New information about it comes out all the time. We are in the midst of a storm and won't know all there is to know for years probably. These are unknown times and we have to proceed with caution. This can not still continue to be compared to the flu.... Our nation has surpassed the death rate of the 18-19 flu season and almost hit the death rate of the 17-18 flu season... and its ONLY been THREE MONTHS! But people do need to still survive. I do not believe that means we need to reopen everything back to the way it was though for a while, as we're not prepared for more people to get sick. Slowly though allows for people to make money, if we do get sick then have the means to get effective treatment, and build herd immunity. If we open all at once then what we've been through has been all for nothing and we'll get overwhelmed. Limit capacities at public spaces, limit gatherings, have stores limit the amount of people inside, if people can continue to work from home, continue to do so. Make wearing masks in close public spaces mandatory to prevent spread. We need to have way more disinfectant available to citizens and businesses to continue those measures, those companies should be mandated to be in mass production to help citizens and businesses alike to continue cleaning measures. We have a chance now to be in control and not the virus be in control.
Seminole	Healthcare	Please allow Flordia to re-open to do elective cases. Also allow business such as all restaurants, stores,nail and Hair salons to open back up. If all flordia residents still continue to wear a mask when in a larger crowded areas then we should be able to get this economy back up and running. Yes there is alot of cases in Flordia but over all for the amount of people here in this state the numbers are not that bad. Hospitals are not overran so open us up PLEASE!!!!
Duval	General	Yes, I would like to re-open Florida. Too many people are out of work and I don't believe this virus is any worse than the flu, which we have every year. Thank you.
Brevard	Healthcare	I'm torn. I want everyone to be safe but I also understand that small business are struggling to keep from bankruptcy. I guess the CDC recommendations should be consulted and followed.
Broward	General	Until there is more complete testing and data I do not believe that businesses should reopen. I am very concerned about the lack of knowledge and complete understanding of this virus and that premature action will further jeopardize the health and safety of my family. I do not believe that beaches should be open as we have already seen that residents cannot conduct themselves in a manner that is safe for others.
St. Johns	General	Please open the star. We need to get back to normal as soon as possible. People need to go back to work. This shut down is not needed when there is a 98% survival rate.
Orange	General	How many more dead is acceptable? Opening now is closing the front door on social distancing before all the people have made it home, leaves those outside to die. How many dead is acceptable? Opening too soon leaves too many outside to die. Save lives, stay home!

AMERICAN OVERSIGHT

Orange	Tourism	A phased reopening needs to happen starting May 1st. Start with retail, and dining for Florida residents only. A week later, open parks for residents only. Week 3, open parks for all residents and passholders. Week 4, open hotels for residents and passholders. Week 5, open hotels and limit capacity in parks to 1/3 of normal capacity. Require social distancing, with face masks in enclosed areas.
Seminole	Education	El Gobernador de la Florida ha actuado pesimamente durante esta emergencia del Coronavirus. Nunca quizo cerrar completamente y los numeros de contagios son de los top 5 de toda la nacion. Todo por ser leal al Presidente Trump. No estoy de acuerdo que abran todo todavia. Es un error y provocaria una nueva ooleada de contagios. Lo que deben hacer es cerrar completamente por 2 semanas.
Pinellas	General	When medical experts say it's ok and maybe start with retail stores
Orange	General	I do not think it is totally safe at this time to reopen the state. I think there might be some businesses that could be safe to open, with the 6 ft. safe distance rule in effect. But so far as re opening restaurants, and other places where there would be a lot of people I think it is safer to wait for at least another couple of weeks to see where the numbers are.
Hillsborough	Government	Stop the madness and fear mongering. Forced quarantine is government overreach and will do far more harm than any of its stated goals.
Duval	Healthcare	Until there is a better understanding of this virus, and all it entails, I dont think we should be opening up as easily as we are about to. Consider that we are expecting another wave of this in the fal . If we open before we have a good handle on this, this is just going to continue until we actually have vaccines in hand. There is so much false information flowing, some which is dangerous, and throughout all of this, we still had groups that refused to listen to government directiv . Just think what this is going to mean when opening back up. Those groups will go right back to the same behaviors with no care for others including healthcare workers. We are looking at another disaster.
Nassau	General	Open the state slowly, but start in the beginning of May. Most important is to resume elective medical and dental treatments. Places where social distancing is easily accomplished should be next, especially outdoors, ie parks, beaches, etc. As indoor nonessential locations open...hair salons, shops, message therapy, etc. (where there is close contact) BOTH the staff and the client should wear masks. This should be required in grocery stores, hardware stores, and all medical facilities etc., in addition to all the CDC cleaning protocols. Tough decisions!
Duval	General	Please open now! No more delays! We can be responsible for our own health. And we know this virus is not as deadly as first thought. Love the work you have donr with the nursing homes to keep our most vulnerable safe, but let the rest of us go back to living life.

AMERICAN OVERSIGHT

Seminole	General	I think that local experts in each section of our economy and from each county that has been impacted the most by Covid-19 need to meet, analysis their situation and set priorities on which section/s should open first and a timeline set for all until everything is open like before. I think that no county should begin to be opened until the number of active Covid-19 cases levels off for "x" period of time. It goes without much discussion that we all want everything opened as soon as possible to get back to normal. However, when I go to stores in the Lake Mary/Longwood area, not many people are wearing masks any more and even fewer are wearing gloves. This complacent behavior will just prolongate our problem I think. We reap what we sow. May God Bless all those who are working to control this mess and planning for solutions to open up our great state again. Hank Mitchell, Longwood, FL
Palm Beach	General	Reopening must be slow, cautious and well monitored, unfortunately to this point there has been little enforcement. . EVERYONE should be wearing masks. Restaurants should only serve outdoors. No bars should be opened. No bars that serve minimal food should open. Hair and nail salons should only allow half their normal capacity. Public hotlines should be set up to report business infractions. Beaches should open but limited access. People need to understand the new normal is NOT what we are used to.
Hillsborough	Government	I think we should stay closed I work for the school system I don't believe it's safe yet for people to be free going around while this is still not under control if some parents do back to women who till take care of there kids while there home schooling for the rest of the year. And it's also not safe for the kids.
Pinellas	General	Florida needs massive testing and contact tracing. Only then, when the numbers allow, the state should be open. I, and my family will not be visiting any public places (other than grocery stores) until the above measures are undertaken.
Broward	General	I think we should reopen the state in place like suggested. I also think citizens should be required to wear mask at all times and continue with social sustaining of 6 ft apart.
Broward	Food	I am e restaurant owner. Open Florida only when it is safe to do it. Follow federal guidelines and provide us with a system that will allow us to be sure that our Employees and customers DO NOT BRING THE VIRUS in our establishment. Health first, money second.
Pasco	Professional Services	Restore life as it was before March 11 without delay. The economy has been ruined, peoples jobs and livelyhood had been put in peril because of faulty modeling and analysis.
Volusia	Professional Services	Curbside grooming salons ..please let be part of soft opening. I feel high traffic businesses such as bars and restaurants should continue take out for a bit longer.
Alachua	General	Please do not reopen prematurely. I strongly feel that it is too soon. I'm afraid many more people will die unnecessarily if we open back up now... just ask anyone in healthcare.

AMERICAN OVERSIGHT

Brevard	General	Florida must allow all businesses to reopen within the next 2 - 3 weeks or sooner. To continue the draconian stay at home order (violating constitutional rights or coming dangerously close to doing so as time goes on) and to force small businesses to shutter forever is unconscionable. The current state of lockdown is NOT sustainable and will have secondary and tertiary economic and social effects which no one is considering right now because the plague of fear which is being perpetuated by the media and individuals and groups who have no medical training whatsoever are purporting to give advice on matters they have no credibility to and are merely repeating whatever social media feeds them. How are families going to feed children if this goes on? How are businessowners going to survive? Are we going to be falsely imprisoned in our homes for a year? Forever? This goes against all that built this country and even against human social nature. The imagined "Outbreak" style massive death rate is clearly not showing to be true in any data, across the world. Yet we are punishing entire populations instead of quarantining those who need to be: the ill and the high risk. Quarantining healthy people is preposterous, even with the slight chance of asymptomatic carriers or pre-symptomatic infected. Re-open Florida before the cure becomes far worse than the disease...it is already well on its way there. Signed, an active duty military Registered Nurse
Orange	Healthcare	I would like to express my sincere concern that if we open up too early that we will just have to shit down all over again. I have two under two and this transition has been difficult. I anticipate going back “to normal” is also going to be difficult. Having to do a second wave of closures would be too much to handle. I understand people are hurting, everyone is hurting, but our health safety should not be rushed. I sincerely hope that you will consult with doctors and scientists and not just people with business and financial interests in mind. From a very concerned voter, lawyer, mother, and citizen.
Polk	General	Am self employed. FINALLY got someone on the phone that let know that I was immediately ineligible as Florida does not cover unemployed self employed. ??? If that's the case, why hasn't 1 of my THREE applications kicked to federal program?
Duval	Professional Services	Allow hair solons to reopen with customers waiting in cars till called in and with appointments. 6-8 feet spacing and both wearing masks

AMERICAN OVERSIGHT

Broward	General	The entire over reaction the Wuhan virus has financially crippled the country. NYC and LA are NOT Florida, although Mayor Giminez would have you think so. The Draconian unconstitutional restrictions imposed on Floridians first by executive orders, then worse, local county and city orders, has bankrupted many. Hiding indoors is not the answer, nor is keeping beaches, boat ramps and businesses closed. I am stage 3 cancer survivor with limited immune system, yet I go out EVERY DAY, and get sun and fresh air, ride my bike, etc. I don't fear the virus or death, I fear government wonks such as Mayor Giminez, who have no regard for Floridians rights, while he pays himself lavishly every week. Either declare martial law or remove all restrictions. Those that want to stay and hide in their homes can choose to. You took MY RIGHT to choose to go to the beach, a bar, a restaurant, all out of fear, not fact. OPEN FLORIDA TODAY!
Hillsborough	General	I am a cosmetologist that had to stop working because my business was closed because of Covid-19. No more income coming in. Filed for unemployment and have not heard anything. No income for these past weeks. I hear word of re-opening and I have no choice but to go back as I need an income. I speak for all hairdressers, that our business is essential! I saw Micheals, craft store ,open during this shutdown. I guess that was essential?? We need to protect our business as we stay in close contact with our clients and risk our lives to provide our customers with professional grooming and services that is neccessary. Try and go with out these services and see how you feel! We need to be taken more seriously!! More protection for our industry.
Duval	General	My concern is from the point of view of seniors and those with serious underlying health conditions. It is related to the re-opening of restaurants, hair cutting/styling shops, other personal hygiene businesses, and the later loosening of restrictions on grocery stores and other retail stores. The main worry that I have, is that when the restrictions are lifted, young people will rush back, with little concern for both their own safety and the safety of others (certainly not all, but many). That could immediately lead to an environment where the spread of covid19 will spike, and cause many more casualties among seniors and the sick, in particular. And it would certainly affect some young people as well. Please keep this carefully in mind, as you work to roll back restrictions.

AMERICAN OVERSIGHT

Orange	Education	I am concerned about schools going back in the fall. I am a teacher that is considered very high risk. If there is any chance that coronavirus might still be circulating in the fall, I will be unable to return. I am worried about how this will effect my job. Also, even though children are less likely to die from the virus, they can still become very ill or they can be carrying it and be asymptomatic. If they are asymptomatic, they could be spreading it to students, teachers, and other faculty without knowing. Those people then take it home to their families. Parents also send students to school sick all the time even though they are instructed not too. How will this be handled? How will we determine who must stay home? I have heard that temperatures could be taken as kids enter, but how does that keep asymptomatic kids out of the classroom? They can still spread the virus without a fever. Also, some can go days to weeks before symptoms begin to show. How will outbreaks in schools be handled? How are you going to manage having enough teachers when those that are high risk are still encouraged to stay home? There is already a teacher and sub shortage. Will options be given to do school online? Will teachers be given the option to teach virtually? I know the importance of being in school, however, at what point is our health and safety more important? What precautions will be put in place if another surge occurs in the fall? I know many parents that are still concerned about sending their children next year. Also, we keep hearing how many negative test results there are. How many of those people still have symptoms and been tested again? We know the test only shows that moment in time. How many of those people hav now contracted the virus? We also know that some people receive multiple negative results and that testing is not accurate. How can we be sure that it is truly safe?
Lee	Retail	Open up bowling alleys and gyms
Brevard	Food	Please consider waiting another month to reopen restaurants to eat in status. You will be putting more people at risk. And most of those employees don't have savings or insurance to cover expensive hospital treatment if they get sick. If they are back to work (not on unemployment) and get sick then they have no $ coming in again for an additional 2 week or more while they recover

AMERICAN OVERSIGHT

Hillsborough	General	I don't think we should even consider opening any non essential or tourism jobs until we have seen a significant decrease of cases back down to what it was before we began shutting down those nonessential businesses. Opening up "fun" hot spots is only going to make people more eager to go out and ignore social distancing, creating the second wave experts are predicting. If it was unsafe enough to close the state then we should not reopen until those numbers are lower than they were when the orders were issued. It's also going to draw other people from other areas and states that are still on lock down orders. They will come here in large amounts, flocking to beaches and other tourist places and then possibly infect our areas. I think opening to soon is going to cause our economy to suffer in the long run because we will have to shut back down and possibly shut down longer. As a mom of three ages three, two, and not even a week old, I do not feel safe thinking that this virus hasn't even been fully understood and the people "in charge" are considering opening the state for nothing more than greed and money. My husband works in a tourism job and there's no way we would feel safe or comfortable with him going back to work in the next few weeks knowing there is still a great amount of risk involved with interacting with strangers in a close environment
Lee	General	I feel we need to take it slow social distance is still needed. I understand we need to open up the economy but please make wise decisions. Maybe a few more weeks , I do feel strong about special need places opening up we have so many young people and others with special needs, they do need a place to go but with better supervision.we can't have them hugging and kissing each other. So if we open these places someone better be teaching the supervisors how to keep them apart or we could have a lot of the special needs sick and unable to recover.
Indian River	Finance	Ha! Fix Florida?? That's a joke! You cant even fix unemployment problems. Put food on the table! Unemployment treasury seems to be 2B$ ---I think the Gov. and the legislature and the new head of UI need to take no salary until this problem is fixed! Trump takes no $ and donates his salary--leads by example and you should too.you lost my vote in the next election. Being prepared----> you get an F
Brevard	General	NO, NO, NO. It's too soon & too dangerous. It's bad enough that the WWE (!) was considered essential, seriously. This virus is too new, no one, especially those NOT in the medical fields, know how it's supposed to act in the general population. I for one, do not want to die for someone else's greed. Most of my contemporaries, fellow workers, friends, & family are of the same opinion. Please truly protect your constituents by keeping the state closed.
St. Lucie	General	I feel like we need to wait or implement restrictions or we will back go square one. From the start everyone said we will open when cases reduce for 2 weeks and unless I am wrong, that has not happened yet so why are we jumping the gun, we have come this far. Thank you.
Orange	General	Please do not open too early. Fix the problems with the unemployment distribution which can help the people currently hoping to open the state and keep the stay at home orders going through at least June 1st.

AMERICAN OVERSIGHT

Orange	General	The unemployment system is broken Took me two days to file . Waited 3 weeks to be verified because I understand there is a lot of people that were furloughed I have been employed with the same company for ten years never asked the state for anything !!! Until now and was disappointed! Called after 3 weeks to follow up on hold for 3 hours to be told I should have called before to verify my identity but website I have to take no action !!!! Very disappointed in the system that is to help and sadder with the govt that thinks this is ok !
Lee	Finance	Florida needs to reopen ASSP!!! THIS IS RIDICULOUS. We won't be able to pay any bills starting May 2nd because of this nonsense. The flu kills more people a year, come on ! We need money! Suspend rent payments or something and fix unemployment!!!!!! One of the most unprepared states I've ever seen.
Duval	General	Just ready for this city to be back open where we all can actually go shopping at mall go back to the zoo ho back to St Augustine. Please consider this . Enough is enough
Duval	General	I think DeSantis is rushing re-opening the state, considering the cases are rising. If he re-opens the state right now, there will be a lot more deaths. In order to avoid it, we need to keep the stay at home order at least through August. Considering CDC predicting there will be another wave in the fall, we might need to stay home for much longer. I personally not ready to be back to normal life, I don't want to risk my and my family lives because our governor is worried FL will lose its businesses.

AMERICAN OVERSIGHT

Manatee	General	First, local governments (city and county) must have some degree of autonomy in deciding what's best for their communities. Second, all State Parks should be re-opened but with restrictions such as no campers, campgrounds closed, event spaces closed, large gatherings closed, and social distancing guidelines strictly enforced. Third, restaurants need to be opened but in tiers based on capacity. For example, restaurants with max capacity of 100 should only be allowed to operate at 50%, those with max of 100 only 40%, those with max of 300 only operating at 25%, etc. Outdoor seating preferred. Hand sanitizers need to be required prior to dining (like on a cruise ship), disposable or washable menus, and face masks for servers. Also, all restaurants need to be required to keep a log of ALL diners on a given day and maintain those records for 2 weeks. That way if a server or diner tests positive, folks can be notified. Hotels should be done in a similar fashion regarding capacity and logs. Fourth. No large sporting events, concerts, or mass gatherings until deemed safe. Fifth, all beaches should be opened BUT local governments deciding if they should be remain closed or open and with applicable restrictions. Sixth, all re-opening decisions MUST be made with input from local officials including DOCTORS, head of the county health department, and the Sheriff. Finally, there has got to be testing and contact tracing. There should also a 14-day downward trend or decrease in % of positive cases.
Leon	Real Estate	Please find enclosed letters sent on behalf of the Florida Brownfields Association (FBA). FBA commends and appreciates the work of the Task Force to Reopen Florida. These letters address and highlight the role that Brownfield environmental cleanup and redevelopment in Florida and Florida's Brownfield program can play in spurring Florida's economy, driving and advancing real estate development, investment, and transactions, and maintaining and creating jobs -- including keeping environmental professionals and staff employed and working in the early stages of responding to and in recovery from coronavirus and its effects. Thank you for the Task Force's time and consideration. If you have any questions or would like to discuss these letters or these issues, please do not hesitate to let us know. Thank you. Jason Lichtstein President, Florida Brownfields Association (850) 841-9025

AMERICAN OVERSIGHT

Pinellas	Finance	It would be very dangerous and irresponsible for Florida to "reopen" without more broad/widespread testing being done. It would also be keen to measure peoples temps before being allowed in any closed air space. We also need masks to be mandatory, cloth or surgica . These are the best ways to allow us to reopen with the least amount of backfire.
Manatee	General	As much as I want the economy to reopen and to be allowed to go out and about, I think that rushing things will only make matters worse. I believe we are not in a state to reopen just yet, and while we are beginning to see a “flattening” to the curve as you call it, the chances of making matters worse are far too great. Remaining closed for a few more weeks will hurt pockets, but it will save lives.
Polk	General	Governor DeSantis, you should implement a widespread testing infrastructure and guidelines before you allow businesses to reopen. You should also consult public health officials, medical experts and epidemiologists to assist on your task force and come up with strategies to safely re-open businesses and public areas. Until every Floridian can be tested and strategies are implemented for monitoring the spread of the virus, it would be morally reprehensible to ease restrictions on public gatherings. It is your responsibility to the public health of our state and our country to make sure our healthcare professionals have adequate PPE and that the general public knows the best practices for when they must leave their homes. If you rush to "re-open Florida," before you make the adequate steps to set up more testing including rapid testing, many more lives will be lost and our economy will suffer a far worse fate.
Pinellas	Recreation	Florida need to start getting people and businesses back so we don’t compound issues that are already happening. This virus is not going to be eliminated any time soon,so we must learn to live and function as a state in a new normal.and adjust . The toll of keeping gyms closed is starting to mount in a new public health risk. Many seniors depend on cardio machines to keep their hearts strong and not having that for over 1 month now is debilitating to say the least. To add is a psychological and mental toll of not exercising in a controlled environment such as a gym. I have been depending on this for 20 years and it is a shock to my system in a bad way. Please let’s move ahead Florida and we have to means to deal with what may or may not come from this. Thank you Michael Hynes
Charlotte	General	Start small in areas that can be open to small groups of 3-5 people like small business, salons, tattoos and other applicable.
Osceola	Tourism	Reopen Disney and Universal in stages but not to wait too long since both of them are suffering badly and will take a awhile to recover economically
Broward	General	Enough is enough. Government overreach needs to stop. People should be back to work because all jobs are essentials. Families are drowning. Open Florida.

AMERICAN OVERSIGHT

Hillsborough	Finance	As a retired Florida resident having lived here for 22 years, I want to thank Governor DeSantis for his outstanding leadership during this health and economic crisis. My concern is that the data being provided about the statistical elements is skewed. We need to have 'per 100,000' added to the reported data so we are comparing apples to apples for our state, counties, cities and other states in our country. I have a sense the covid-19 medical impact to Florida is not as severe as advertised by our medical professionals and the mainstream media. Please open our state quickly. I am missing face to face interaction and the freedom that the constitution guarantees to us.
Hernando	Healthcare	We need to slowly open our state , I am a dental hygienist and I feel that strict guidelines for changes in dental offices to protect the patients and the staff... Proper protective equipment needs to be outlined. I realize that we need to start opening but hopefully from a safe standpoint.
Orange	General	Consult a panel of non-partisan medical doctors and scientists with knowledge of infectious diseases, viruses, and pandemics. Do not base the decision on money, the economy, politics, or Governor Desantis' political agenda. Base the entire plan on protecting the most lives for the longest amount of time. Then Implement the plan the doctors and scientist come up with that will save, protect, and preserve the life of the most people for the longest time.
Broward	General	I've been working from home for weeks. My company has the technology to do so. However, there are limitations with company tasks. I believe that if we're going to open offices to allow workers, they should enforce in-office shifts where you are encouraged to only show up on your designated days. It will keep us distanced from each other, while allowing workers to resume some sort of schedule.
Brevard	Healthcare	Our numbers have not been down for 2 weeks; therefore, we should not re-open the state. Let's be smart especially considering our high number of senior citizens.
Volusia	Construction	I am a handyman , and this is going to put me on the street soon . My customers are scared to death , all they hear everyday is everyone Is sick and dieing. They need to know that they can allow someone to do home repairs as long as the handyman is using safety guidelines , like gloves ,mask ,and safe distancing . If we dont giving people some hope and start moving forward again. The economist damage wont be able to be repaired. Please open business back up. Just enforce e the guidelines .. thank you for your consideration .
Lee	Healthcare	I am a Dental Hygienist. I am very concerned with going back to work on May 11th which is the plan unless the governor does something. When we do a procedure we create aerosols and they can stay in the air for 5 hours. So even if I wear a mask all day and never take it off we are putting patients at risk and they don't even know it. So this means if I work on a patient at 8 that has the virus but is asymptomatic then the next 5 patients are exposed to the aerosols and probably 5 in the room right next to me too. We can't go back until we have some form of rapid test and we can test pt before they come in. Or at least until we aren't getting new cases in Lee. We are not essential. No one will die if they can't get their teeth cleaned. But they may die if they do.

AMERICAN OVERSIGHT

Orange	Government	My feelings about Florida reopening are as follows: 1. Are we sure that we should open Florida so soon, I for one would rather be broke and alive than to catch this virus and die from it. I am 68 years old and know my health is declining from my younger years. 2. While the new case numbers seem to be gradually lowering over the past seven days we have averaged 895 new cases with two spikes of 1.1 and 1.3 thousand per day. I do not think this "Novel New Virus" is through with us yet. 3. I feel that the people that might be the most susceptible senior citizens 65+ should remain in quarantine by a State order. And essential businesses should not require their senior citizen employees to work as well by a state order. 4. When we do start reopening the state it should be in a conservative manner. Open the most essential businesses first and work down to the less essential. 5. Many people have never followed the States guidelines for the "Stay at Home Order " already, if they hade done so the numbers would be lower by now. If we open back up we may see another rise in numbers. I hope that you choose our lives over the lost money aspect of this. 6. I know that the decisions you will be making are difficult ones. Please use the utmost caution when making these decisions, many lives are at stake. I personally think that it could be a little to soon ease the restrictions right now, Most of us would probably
Orange	General	I think we should wait until we have better tests and protective measures. Throughout our lockdown the cases in Florida continued to increase. Now that we've slowed down I don't think it's time we rush to open back up. Once we resume normal operations completely our cases will jump back up. Now with that being said I believe malls and other retails stores should be the very last thing to open back up. As you know during any given day the malls are busy and full of people walking around. Malls are also closed air spaces which means transmissions of this virus will be much easier and wide spread. Sure we could all wear masks everywhere but it's unfair to have that requirement when getting masks are already hard then on top of that people don't properly dispose of them. I can't tell you how many times I've gone grocery shopping and have found a used mask and gloves on the ground. I understand we are trying to preserve the economy but rushing back into this too soon will have the opposite effect. We are rushing to open back the economy but at what cost? A lot of people are out of work and do not have the money to spend to drive the economy whatever result you are looking for with this reopening will not come fast. In addition to malls and other retail stores being the last to open include nail salons as well.

AMERICAN OVERSIGHT

Orange	General	Start opening up! Get people back to work! We can wear masks, sit at every other table, sit in small groups, etc, but get things open.
Lake	Healthcare	I work in Healthcare part time and my husband is retired but disabled. We believe that the state should allow, a slow reopening of the state with mandatory precautions. Service industries should be first with salons, physicians services, pet services, restaurants with reduced capacities. Physicians should be able to test individuals at their visit on a routine basis. Anyway that the crowds can be controlled should've investigated. Families should be able to visit each other. . Nursing Homes and Assisted living should have a room to be reserve for family visits That be throughly cleaned before and after visits, Masks intact. The more folks that can return to work or continue to work at home should be allowed . Schools should return with reduced class sizes and precautions.
Marion	General	I don't feel the state as a whole ever shut down efficiently. I think many citizens have done the most possible in terms of staying at home. However the overall leadership and public view has been that it's ok for many other citizens to find loopholes to avoid changing their lives. The issue is that those that did isolate can't reopen for fear of being infected by the rising cases- and the people that haven't stayed home could have been exposed but have not yet shown symptoms. Until there are fewer new cases each day and until the hospitals and medical professionals have had a chance to regroup and find resources to treat those few new cases, opening the state would cause us to back step to the start of this whole thing. The people that haven't stayed home need assistance to find a way to stay home. The people that have stayed home deserve to remain healthy and to have that mean something. You can't change science with reasoning or logic. It feels like it's time to go back to normal. But nothing can be normal until the illness is manageable and the sick can be treated effectively. Business owners finding ways to stay open means that citizens have to go to work or risk losing the opportunity for employment. Government leaders not being definitive in their mandates means too much room for interpretation and thus the situation we are in now. The rising new cases since just the openings of the beaches proves the theory. Please stop being driven by politics and financial gain. Please help the citizens to remain safe and close public spaces and wait to reopen until science and logic can meet. This is terrible for everyone, but you are in a position of power and can either show humanity and good reason, or pretend playing the same old games won't kill or devastate millions of individuals. Be different. Be better. Play it safe. For all of us.
Brevard	Recreation	Recreational facilities including beaches, state parks and trails should be opened. These can be opened and users can still maintain social distancing. Playgrounds should remained closed until after secondary peak is over to protect our children and those who care for them. Opening beaches and state parks will give the resident of Florida an opportunity to safely exercise and be outdoors without a large risk to the general public health.

AMERICAN OVERSIGHT

Hernando	General	I think it is too soon to open up the State. People are going to disregard the precautions. They didn't even keep the 6ft rule when everything was in place and the beaches were open. I don't think cases are being reported correctly. For example I was sick for 2 weeks with unbelievable fatigue, aches, cough, low-grade fever, this was in early March I called the VA and they told me just to self quarantine. I did but my family were still around me, then they went out and they saw others even though they tried to maintain the six foot precautions. So I believe it is too early to open the state people will disregard the policies. Then when it hits is going to hit again with a Vengeance and it will hit the State financially harder than what it is now. I would definitely make sure that the counties are reporting each and every case. And everyone should have the right to get tested, whether they are showing symptoms or not.
Miami-Dade	General	Two concerns: Please devise a plan to allow hair cutting to resume. With professionals working in virtual meetings, appearance and even hygiene is an issue. Perhaps salons can offer in home services, with stylist and customer wearing gloves and masks. All payment could be made online before/after service. Hey lease reach out to salons/barbershops to brainstorm. Also, artists would like to get access to shared studio spaces. Please consider allowance for that work to resume, in limited hours, capacity or with proper cleaning protocol.
Seminole	Retail	I feel if we can have more tests available to use now. Also we need to have better availability of masks for people to use. It is taking 1-2 months to get and they only come from China, too slow. Make it a law (temporary) that businesses CAN send employees home that try to come to work sick. I work for a retailer who says they can not and will not ask or send a sick employee home, because they say it is discrimination and also the employee won't get paid. Also we need to first open the state for Florida residents, before allowing all national and international tourists back in. We were really lucky, we easily could have been like New York. I know we need the tourism, but we also need to protect our citizens. Look at all the people who drove and flew in from NY and NJ. We also need to begin preparing for a possible return of Covid this fall which some say could be worse. HOLD ALL BUSINESSES TO FOLLOW THE RULES. IF THEY DON'T SHUT THEM DOWN. Then I think we could open.
Seminole	General	It's a terrible idea to open Florida right now. We have not had a decline in positive tests. Why rush to open Florida and expose people who have been self isolating. I understand the economy is hurting but if Florida opens and more people get exposed, there won't be eno h people to fill jobs once this is all gone. Everyone will be dead!!!!
Orange	Retail	I have 5 store in Orlando area, complex told us to come back to work. How will be safe if we need to have access to alcohol, hand sanitizer, masks and gloves and can't find anywhere.
Palm Beach	General	Please open recreation(Beaches, Parks, Golf) and medical and dental offices as soon as possible

AMERICAN OVERSIGHT

Palm Beach	Healthcare	We are nowhere close to being safe with thousands infected and dying. It's hard for everyone not just the business men but you're sacrificing lives for dollars and that's just not right. Listen to people who are doctors and nurseS and health care workers and you'll know that we have to wait hoWeber long it is. No sane parent will send their children out and no older person will go out Use common sense - YOU CANT MAKE IT INTO SOMETHING IT ISNT. W HING IT ISNT BY SAYING THE CURVE IS FLATTENED. People w I'll die that's the bottom line. Your parents and grandparents will die for your dollars. DONT DO IT
Hillsborough	General	It is time to open things up. The damage to business is far worse than that of covid 19. I am an essential worker we have 150 techs plus about 20 installers working in 14 counties in Florida. We have all been working daily. No Covid cases at all. That's right commercial/industrial hvac guys who have contracts with almost every hospital in central Florida. As well as other building have no cases. It's time to open up and allow jobs to come back.
Leon	General	Any and all business that have employees that can work from home, should work from home. The messaging around the re-open must be clear that this is in no way, shape, or form a return to "normal." This will not be possible without a vaccine, antiviral, or herd immunity.

AMERICAN OVERSIGHT

Palm Beach	Retail	The divide in conversations regarding how to reopen businesses is currently, and unfortunately, between "Open it all" and "Everyone stay home". Obviously the Stay home group cannot stay home 100% of the time. Food, medicines, and other essentials require movement outside. The Open it all group is nonsensical - it is suicidal to deny the science of disaster this would cause. In-between are things that must be mandatory to allow these 2 groups to share in a solution. 1. Masks must be worn. Vendors and customers. If that is not a state-wide, mandatory starting point, we will never get the Stay at home group to accept that there are safety measures being taken. 2. Testing and Tracing must remain at the forefront of all current and future state policies. Funding for a massive, continuous operation in these areas has to be prioritized above all other considerations. 3. Testing must be restricted to designated, safe and regulated testing areas. No mingling of this procedure with other medical or non-medical facilities should be allowed - the possibility of cross-contamination is too great. 4. Every retail operation must post public, easily accessible detailed virus safety procedures that they have implemented, so that any customers are made fully aware BEFORE they enter. 5. Penalties for non-adherence to state-mandated safety measures must be severe enough to make enforcement straightforward - shut businesses immediately upon non-compliance, and remove and heavily fine and/or arrest citizens who openly violate those regulations in sgared public areas.
Polk	General	Pleased allow us to wear mask use common sense and return to our lives. I work every day and have not seen in sign of the virus.....
Manatee	General	My husband and I are healthy 70 and 72 year old full time residents of Bradenton. We are “active seniors”.. travel extensively around the country and world...better off than most in retirement financially...better off than most in health...we want the task force to know that we will not be going to restaurants, hair salons, LA Fitness Gym, movies, plays, air travel until we feel confident that: the number of new C19 cases fall significantly, strict rules are in place and enforced at businesses we frequent such as social distancing and everyone wearing face masks; accurate testing is widely available for all a therapeutic is available. We will stay home and healthy.

AMERICAN OVERSIGHT

Volusia	General	Quite simply... the reopening needs to be transitional, systematic & data driven.... but it must happen & soon. The Ecomonic, emotional & practical aspects of a continued shelter in place must be weighed in appropriate measure versus the health affects of the virus. As we slowly open the door to begin the journey back to " normal" everyday living - our plans must be flexible & reactive enough to adjust our response to a potential bounce back of cases. This will be a marathon not a sprint .....but I believe the month of May should begin reopening the business, nonprofit, faith based , recreational , medical and all other aspects of what makes our communities. God Bless all of you for your efforts during this uncertain time in our history.
Seminole	Management	The future of government responses to health crises can not continue to be "the blind leading the blind"! Local mayor says, "..sometimes government must protect people from themselves.." As if, that mayor (or city) has the capacity to protect anyone with mandates. Closing private property, taking baskets down from courts, flying drones to mandate "separation"! That would be funny, if it was not so pathetic! Better is to admit that you do NOT know WTF you are doing and warn people to take care of themselves. Then, stay out of the way. The government is way too political and made up of self-interested politicians who mostly have the critical thinking skills of a cat (not to overly slander cats)
Lake	General	WHEN businesses are allowed to begin opening NO employee should feel that their job is in jeopardy should they feel it is still unsafe for them or their families to return to work. Employers would be required to hold jobs open for non-returning employees and hire temporary help from among those wishing to work. Unemployment should remain available to none returning employees. A time frame for these things should be established to promote stability in the process but remain flexible in the event of another out break once businesses have started opening.
Broward	General	Reopen businesses
Hillsborough	General	Please reopen businesses in Florida, so many people are suffering from poor economic conditions compared to the number of people with coronavirus or those that died. Pretty soon people will riot because they have no money to feed their children. So many people die from so many things every day and we don't shut the economy down. Why now? Why sacrifice the many to protect the few? Why make it worse by cutting people's livelihood. I agree with social distancing but it is imperative to open Florida back up as soon as possible to avoid a mental health and an economic crisis.
Orange	Manufacturing	I think we should lift the stay at home mandate. Everybody is already out and about, why not engage in commerce? WE CAN'T SURVIVE AT HOME.
Hernando	Healthcare	Because we our governor needs your medical team, to explain to him and Floridian's opening to soon will spread this virus's and just like other countries will die and not recovery but set us back

AMERICAN OVERSIGHT

Washington	General	People here in Chipley, Washington county Florida, do not understand distancing or wearing your mask. Our numbers are still growing here as far as people continuing to contract the covid virus. Until our law enforcement here stands behind these rules and enforces them I fear that it is going to continue to grow. Also, a non-essential nail salon was open here in Chipley. I hate people being out of work but, if they would start wearing their mask and understanding what distancing means then we might could open back up. But they're not going to do that and the law enforcement here is not going to reinforce it.
Miami-Dade	General	Dear Members of the Task Force: I would like to stress the importance of reopening Florida as soon as possible to maintain its financial solvency. If the Super Bowl did not result in a surge demand for hospital resources, it's hard for me to imagine it ever becoming a problem for our region. My logic runs as follows: The first confirmed death of coronavirus in Santa Clara County occurred on February 6th, as confirmed by autopsy analysis: https://www.axios.com/first-us-coronavirus-death-earlier-autopsy-dbc72f86-30ed-47e5-b5d8-6811643f9853.html. As such, this means the Bay Area was seeded with the virus at least sometime in mid-January. The novel coronavirus was first noticed in China sometime in November 2019. Bear in mind - this is when China first noticed that something was happening with respect to a viral infection. The Chinese hospitals continued to see activity into December 2019 and January 2020, with WHO posting a tweet that the Chinese authorities noted little evidence of human-to-human transmission as of January 14th. Now, consider the following - we and every other country had zero travel restrictions between November 2019 and January 2020, but let's work with the scenario that the US was first exposed in mid-January 2020. Southeast Florida hosted the Super Bowl in early February 2020. Arguably, San Francisco and the surrounding Bay Area would be one of the first major cities seeded in a major way with the novel coronavirus due to its level of traffic with China, meaning we had thousands of potential carriers over the course of that weekend. Hotels were packed. Bars were packed. Clubs were packed. Traffic was insane. The virus timeline holds that it has an average two week incubation period, and for those with the most severe symptoms, Day 10 after symptom onset will be when they need an ICU visit. So, for Florida in general and southeast Florida in particular, I think we should consider the following: 1. Hundreds, if not thousands, of our hospitality workers were exposed to people from all over the world, including San Francisco,
Osceola	General	I do not believe we should reopen now we risk a resurgence on cases .
Pasco	Accommodation	I clean houses for a living for many people that can not clean for themselves. I am a single mom. I have lost 2 accts due to this and cant obtain more. Due to new facts in the "virus" research, it would be best for our community to get back to work asap with NO restrictions. Herd Immunity is the best way to go. Please consider the lives of many over the few. We do have rights too!
Miami-Dade	General	Please do not Open too soon!!!!

AMERICAN OVERSIGHT

Brevard	General	Plz reopen businesses . If people deem the place is unsafe they don't have to go there. So if a business wants customers to be back they will put the effort to make it more appealing. Government should keep reminding people of basic hygiene they should follow for the rest of their life and make sure to instill in their kids. Schools can help too.
Osceola	Professional Services	I own a small business. I have missed out on a disaster loan, the PPP. I think that small business Hair salons/Barbershops etc should be reopened. Gathering of no more than 10 people in the salon. We have taken tests regarding sanitation via websites like Barbicide. Before my salon was closed on March 26th, we always practiced sanitation between clients anyway. A restricted waiting area, time slots between customers to allow staff to sanitise. This closure is slowly killing off small businesses. I am here on an E2 visa due to having my business. Keeping that business alive will keep people with jobs and create more as I have a 5 year business plan.
St. Lucie	General	Open the state back up. Gyms, restaurants, breweries are going bankrupt.
Volusia	General	Open bars and restaurants with outdoor seating- There are many bars and restaurants that have outdoor seating areas which can accommodate for social distancing. Open State Parks and campgrounds- People need the fresh air and there is plenty of room for social distancing. Open beauty salons / barber shops- limit how many can be inside. People need their hair done! Theme Parks- open to Florida residents only for 1st month with reduced capacity. This will prevent the influx of tourists as we move through the stages but allows the theme parks to get up and running. This follows the plan suggested of focusing on instate tourism at first.
Manatee	General	The economy and peoples spirit is being slowly crushed by these stay at home orders. Florida must reopen, in waves, with testing . It can be done in a sensible manner. Look at what other areas are doing that is successful and adopt those measures. The sooner the better.
Osceola	Education	My major concerns are having schools and afterschool programs open with hundreds of children attending. Will there be guidelines set up to control this. Children attending school certain days and times? Weekend classes available. Additional funding to help support operations.
Broward	Healthcare	Although I would like most everything to remain closed for two more weeks. I would like outpatient and elective procedures to begin again. I have a specific reason. My daughter was awaiting a tonsillectomy when this started. She is at higher risk until this procedure is done. I dont know if this is a unique situation and I dont expect all state policies to revolve around me and my family but I am sure you can see my concern. Thanks John Potter

AMERICAN OVERSIGHT

St. Johns	General	It is time to open up Florida. We were misled, lied to and have been ignored. Our civil liberties and ability to provide for basic needs has been taken from us. The overreach has gone on long enough. My cancer surgery was canceled as driving to the hospital on March 17. We pray it has not spread!! It is time to be back in America, not some semi communistic utopia for Dems or those anti Americans trying to destroy us. People need to work! People have a right to be free! OPEN UP FLORIDA NOW! K Boen 32092
Duval	Recreation	My husband coaches travel basketball and my boys play. They play in associations such as Florida YBOA - Youth Basketball of America and Elite Basketball in Georgia for example. They play in various cities in FL, GA and sometimes other states. How will teams, crowds, spectators, etc be kept safe especially since you have people from different areas of the country coming together? Also, will summer camps be opened in Duval through Parks and Recreation? If so, how will we keep our kids, staff, etc. Safe? .
Duval	General	Please do not reopen Florida - especially the counties that are hard hit - until positive test numbers drop to a lower - maybe 5% range to reopen and possibly have to close woul dbe far worse than waiting a month Thank you Brian
Orange	Professional Services	I feel like the businesses who come in close contact with clients should not open just yet. That would be hair stylists, barber shops, massage therapists (unless medically needed), nail techs, and so forth. Considering the incubation period of the virus and the chance of people being asymptomatic pose a risk to not only the workers but also other clients. My wife is a hair stylist and works with children as the main clientele. Her health , her coworkers health, and the health of those children and parents/grandparents would be put at risk. Haircuts are not essential or necessary given the circumstances of the world right now.
Clay	General	1) how can anyone be safe without a vaccine or treatment? 2) how can partial opening be controlled to not spread, kill- it can't be done. 3) why be first in anything in this, why not learn from other states? 4) when Dr Fauci says it's good to open.
Brevard	Professional Services	We should not reopen yet—it's too soon! My family and I were sick for almost an entire month. Many citizens aren't taking COVID serious or obeying the current order as it is. If you reopen now, we'll see it all over again. We should not reopen until we know more about this virus. At least July—likely much longer.
Indian River	General	Please open our businesses back up. We all need to pay our bills. Our kids depend on us to survive and we can't even get proper unemployment. I have been waiting since March 29 for unemployment money. It is ridiculous. I just want to get back to work.

AMERICAN OVERSIGHT

Polk	Recreation	I am a Disney Employee. Luckily I am still working through this pandemic, but I would say it is time to reopen. The statistics of this virus are no different then the Hong Kong Flu in 1968 or H1N1 is 2009. It is time to reopen. Also, even if some businesses are not re opened I believe state park's and recreational activities like that should be reopened. Thanks for letting me input!
Baker	General	PLEASE open up FLORIDA. This is ridiculous. People need to work before they lose everything. I know several small business owners who are struggling. They can't get through To speak with anyone at unemployment, they have no income and have bills to pay and kids to feed. People are suffering, Do the right thing and open the state.
Palm Beach	General	Please re-open the state. People who are jeopardizing people of high-risk can still remain indoors and take the maximum amount of caution. All other ship a car should proceed with caution as well but we should be able to move around and go outside and go to a bitches
Polk	Education	Many educators and staff fall into the older and compromised category. While I am a seemingly health 37 year old, I have an autoimmune disorder. I am terrified to go back to work early when my campus has over 1300 people. I am risking myself to be around all those as well as those that come into contact with the 1300 everyday at home. I have a very small classroom with 26 students on average and there is no way to distance I. Desks have to be grouped together so that we can walk around, it is that tight.
Okeechobee	General	I don't feel like Florida is ready to reopen at this time the reason behind my thoughts are we are not testing as much as we should be there for we will have a huge overflow of people with the virus within a month of becoming opening and we may become like a New York situation right now I think we should prolong the stay at home order another month or so until we lower our our numbers in the meantime we should be testing to see what we are working with in the state the economy can go another month with things shut down and we can rebuild I think public safety is of upmost importance and we should put that before money and businessThank you for your consideration
Palm Beach	Recreation	Don't open Florida up . Not enough testing. For Covid -19 . Please do not open up Florida . I know peolpe are out of food in palm beach county fl 1 of the wealthiest zip codes in America

AMERICAN OVERSIGHT

Collier	Education	Decisions on how to “reopen Florida” must be based solely on scientific data provided by top medical experts in the fields of public health, infectious disease, and immunology. Business interests’ participation in this decision-making process has to come later. Florida needs: universal testing, including more tests, available on demand at numerous drive-through locations for anyone who wants them without a prescription; serology testing; temperature checks at the front door of every establishment; continuation of social distancing for the foreseeable future; and more. Florida does NOT need to give companies immunity from liability prosecution. Companies must take strict measures to keep their employees safe and should be held accountable in the courts and wallets if they fail to do so. Opening too soon is exponentially more dangerous than waiting. Decisions that are based solely on economic considerations are criminal and should be regarded as such. Those of us who are in risk groups but still spend money here in Florida will remember which businesses were good global citizens and which put their stockholders and profits over humans’ lives.
Duval	Education	As a teacher I have seen many of my students decline mentally over the past 6 weeks. In Duval they left on spring never to return to for the school year. I have also seen this in my own personal child who has major learning disabilities. Ou students need to get back to socializing with others besides their parents. It is very difficult to teach science over a computer. I have to say my students have rised to the occasion however I service 492 students during a normal week and only about 55 at this point. WE need to find a way to get the kids back in school even if on a modified day. K-2 in the am and 3-5 in the pm and likewise with middle and high school. There are enough teachers in schools to be able to teach these grade levels. Use of masks will also be important. All should be required to wear a mask. Cleaning and bleaching is not an issue at my school however it needs to mandatory at all schools come August. Please consider a way for our students to return to school in August not virtually. Mental health is going to become a REAL issue if our students are mandated to stay at home and not socialize except via the internet. It would not be as bad doing virtual if parents and students were able to break up the day by going to the zoo, park, museums or on filed trips but staying home all day is not conducive for anyone's health including mine as a teacher and parent of a student.

AMERICAN OVERSIGHT

Hillsborough	Healthcare	I do not think our State of Florida is ready to open back up. The service sector employees are the poorest in our state. It feels like they are being asked to sacrifice their safety for a few who want service at their beck and call. It also feels like a way for the state to get out of paying these people their deserved un-employment compensation. Please protect these citizens. Asking them to sacrifice their health and lives to provide services for the wealthy is beyond the pale. These service workers have not joined the military. They have not signed onto this level of danger. Please stop the greed from going farther. We need governments that work for the people who are not corporations. Stop the greed. Stop abusing the poorest among us.
Orange	General	I feel like opening Florida completely right now would cause more problems. My opinion would be to start slow with city and state parks and beaches. Give it a few weeks to see how things are going and if more people are getting sick. Then open some stores back up to the public. Wait a couple weeks and open up the rest by the end of May as long as the number of people getting sick does not get rise significantly.
Hillsborough	General	Florida needs to be reopen or we will continue to dig a hole deeper than we can get out of. I think initially I agreed with this but I think it's been long enough. Life needs to go on and people can continue to be safe.
Seminole	Food	I vote to reopen the state ..... I am a small business owner who has a restaurant in Orange county and will make every effort to follow safe practices if you will just let us open.... none of my staff has been able to collect unemployment, and the PPP money ran out to big businesses before we were able to get any of it..... We are willing to open in stages if that is what we need to do..... Please reopen the State
Marion	General	Why can't we open everything up and require everyone to wear face masks? It will give businesses the opportunity to save their business. It's sad for so many businesses being closed and so many people out of work. The longer businesses stay closed the harder it will be for a come back. You can still maintain 6 feet of distance and everyone would wear masks.
Sumter	General	To soon, let's get it right the first time and be done with it.
Duval	General	My wife owns a nail shop. Hoping they will allow us to reopen soon if we follow the guidelines. For example our pedicure chairs we will place customers one chair apart and limit the waiting area to half capacity compared to what it was before. Our workers will also use protective shields at every nail station. This will prevent close customer interaction. We will also check our employee temperature each day they come in for work until COVID 19 clears out. Please let us know. 904 434 7349
Volusia	Education	Stay closed for another month and have a great summer or re-open early and lose millions because of second wave of virus hits in June and closes Beaches until September/October. Then the mutations hit in November and the whole state is closed until the summer, if it opens at all.

AMERICAN OVERSIGHT

Hillsborough	General	Gov. DeSantis- Thank you for your leadership during this difficult time. I support the decision to start opening Florida back up. The statistics tell the truth on this virus. The negative impacts this shutdown has caused far outweigh the positives. I am a Registered Nurse and am seriously concerned about the lack of healthcare being given to those without Coronavirus and the furloughed medical staff due to low admission rates. Please, let's stop this shut down now while continuing to protect the vulnerable as we should with any seasonal illness. Thank you for allowing input.
Sarasota	General	We must reopen carefully.....lives matter.....if we do this too soon or too aggressively we will cancel all what we have done these past weeks. dont be follower Governor and dont listen to trump... he does not care about the welfare of human beings...only what stats look like during his Presidency. .do what is right.....and you might want to think about spacing yourself from him.....he will NOT help you politically...people are done with him.
Indian River	Healthcare	Don't open state until it has been medically cleo
Charlotte	General	I live in Charlotte... downtown punta Gorda. However I work in lee county It is very stressful to think about being forced to go to work in lee county knowing I will be exposed to approx 700+ daily. NUMBERS ARE RISING with limited testing. YES regardless of what is expressed on tv and in conferences it is difficult to get tested. We have not had 2 weeks of decline cases (which makes sense) ... instead we are CLIMBING so opening is ridiculous. Opening BEACHES is ridiculous. Regardless of what your views are...., PEOPLE ARE more important. I don't understand went this concept is overlooked.
St. Johns	Healthcare	SPECIFICALLY DENTISTRY: Unless and ONLY IF proper PPE is guaranteed for DENTAL HYGIENISTS who are #1 at risk for C-19, should DOSs be open for elective/preventative services!
Charlotte	Retail	You are killing this economy and country over what?? You all have don't nothing but lie to us about the supposed deaths and why this had to be done. The numbers are all lies just so the states can get money from the feds. You did this to scare everyone into submission. Ok fun over, give us our rights and country back!!
Duval	General	Please open larger retail stores that have space, with few employees and customers. I own two large furniture stores, which have plenty of space. We would easily be able to keep our distance, and sanitize our space constantly. Please. Thank you, Phoebe Howard
Broward	General	We CANNOT reopen this state until there is adequate & accessible supplies in the stores for the people of this state to be able to purchase common everyday items that are currently not on the shelves like disinfectants, lysol spray, clorox wipes, alcohol, peroxide, bleach etc. How can you even consider reopening the state if we do not have access to these items? I can go to work or shopping or the hairdresser but I will not be able to disinfect my car or home after going out and doing these necessary chores. Until there is adequate rapid testing & temperature checking we should not reopen anyplace where people will gather or come in contact.

AMERICAN OVERSIGHT

Duval	Healthcare	We need to test more people before considering opening back up our state
Pinellas	General	I am against opening up too soon. I believe what we are doing is working and that's the reason the numbers, are much lower than expected, even though we are still seeing more infections. I am concerned that we still are not testing enough people. And, would be premature to open early, when enough testing and tracking aren't being done. I am not confident that enough work is being done in this area. Therefore, my belief in the accuracy of the numbers being reported are not factual/concrete, because we are limited by the resources we are given by our Federal Government. Luckily, I have a lot of Faith in the Mayor of St. Petersburg, where I reside, and believe that he is doing the right things for our city and trust that he will take a more conservative approach at opening to opening our city. I am glad that the Governor is open to letting our local municipalities make the final decisions with your guidance on reopening. Furthermore , when the time comes to reopen, it's important to open up slowly allowing some service industries to open up at lower capacity, and after a couple of weeks to re-assess and go from there. Over a 1,000 people have died. We are so desensitized because it's just a number and we ignore the impact it has caused their families. With that being said. Reopening everything too early we would risk many more l lives.
Marion	Retail	Though I dont see an issue with opening up things outdoors like beaches, retail stores are still breeding grounds for the virus and I feel that the limits for them should remain, if not be more strict. Some arent distancing, or it cant be enforced by the workers alone. Some stores like Dollar general dont even have sneeze guards yet. Places like malls, stores, and restrooms at beaches need a lot of cleaning and enforcement of social distancing. Masks shiuld be worn by all who can in indoor public spaces.

AMERICAN OVERSIGHT

Brevard	General	It is too soon to open the state. Their are clearly defined guidelines set by the medical experts on the federal task force. These guidelines were not arbitrarily set and are focused on a common sense path back to normal in a way that will best reduce the chance of undoing all the progress that has been made by the personal sacrifice we have all made the past 6 weeks. Let's not throw that away by reopening too fast. The last thing anyone wants is for all of this to have been for nothing and to have to return to this again... likely for a longer period next time. Until we have widespread available testing. Not only to those showing symptoms but for those who dont that plan to be in close contact with others, then we need to still proceed with extreme caution as there us still so much we dont know about the spread, the presense of antibodies, immunity. Reopening the state now also puts businesses, particularly the struggling small businesses, in the difficult situation of deciding if they can afford to reopen at a limited scale, knowing that much of their customer base will not be comfortable/willing to come back yet... how do they staff for that, how do they plan inventory? Can they meet their financial obligations at 30-40% of normal operation? If they reopen are they still eligible for the state and federal assistance? Are they butting their employees at undo risk. Will employees want to come back. What liability could they face if someone claims to contract the virus at their business? What is the cost impact of all the additional cleaning and precautions? So far this state has seen a lower impact than first anticipated, but we are far from out of the woods. We are still seeing increases in percent positives and as testing becomes more available to could get worse. It is too soon to tell... let's not be foolish! Everyone is hurting nd wants to get back to normal but not at the risk of increasing loss of life and worsening the spread later. Until we have the health issue under control there is not back to normal economy. Keep focusing on more testing. Listen to the medical professionals. Let's move slowly and not fall due to political pressures.
Brevard Walton	Healthcare Recreation	It’s too early, still too many people not tested and OPEN STATE PARKS TO FLORIDA RESIDENTS ONLY FOR THE FIRST FEW MONTHS. LETS SEE HOW THIS WORKS FIRST. THEN FOLKS PLEASE DON'T ABUSE THE PRIVILEGE. STAY SAFE.

AMERICAN OVERSIGHT

Citrus	Retail	I'm sorry to say this but I do not agree with the state opening back up just yet. The numbers are climbing and we didn't flatten the curve to the pandemic at all. My county keeps going up in numbers, and many other counties are doing the same. People are not staying home and taking precautions against the virus. Not everybody is extremely healthy and even if you are healthy, there's still a chance you're asymptomatic. I work at a salon as a hairstylist and I'm afraid to go in there with people, to take a chance and risk getting the virus. Barbers are by men's faces and heads. I get close to people while shampooing and doing their color. Nail techs get super close to them and even come in contact with their hands. Of course our economy is terrible right now, but we have to focus on the security and health of the people in the state first. Our state is full of older people. I don't want to risk it, and give my grandmother or grandfather the virus. If we open now, I believe history will repeat itself by what happened with the Spanish flu. UnEmployment needs to be updated and taken care of to provide money. There will be more havoc than anything. Keep Florida closed a little longer.
Miami-Dade	General	General mask usage should not be part of the reopening plan. Masks are meant to one time short term use. Reuse of cloth masks, prolonged use of medical masks or masks worn by children can increase risk of infection of many diseases. Adjusting masks for example increase touching of faces, heat humidity and bacteria growth increase risk of other respiratory conditions. Masks also provide a false sense of security however 40% of particles can travel through a medical mask and 97% through cloth. People with breathing problems or other health conditions which make oxygenation difficult also should not wear them. However here in Miami people are harassed and turned away from essential services for not wearing a mask. I watched a Publix has repeatedly turned people away and police are enforcing. I also have assisted a pregnant women who was incorrectly wearing an N95 mask get dizzy walking no more than 100 feet to her car. She said she just can't breathe and when removed her mask quickly recovered. I stayed in touch and she went into pre term labor at 34 weeks and is currently hospitalized. Did 4 weeks of decreased breathing contribute? Her OBGYN said it is possible. I highly discouraged mandates and only support voluntary use of masks for the general public.
Marion	General	Good Morning, I think Florida should reopen slowly. Although there is a decline in cases, too many people gathering could cause increased spreading. We have plenty of access to essentials online and curbside pick ups. Continuing social distance guidelines with slow openings of business establishments would be a good idea.
Volusia	Food	Please reopen our state! As a restaurant that has had my salary cut in half, furloughed all 68 employees and worked 60 hours a week doing 500$ a day in carryout... We need our economy back. My husband and I can't ride can't support our local businesses I can't even try on clothes because they've locked dressing rooms... We've gone too far.

AMERICAN OVERSIGHT

Volusia	Tourism	Please take a cautious approach to reopening to mitigate subsequent waves of the virus. We have to consider not just our residents, but the influx of visitors that could bring the virus here if we open too soon. FL also has a large elderly population to consider. I am a small business owner and this pandemic is ruining me and my family but we're alive and that is what should be our top priority. We won't need the business if we die from the virus.
Seminole	Government	My husband and I are ready for the state of Florida to open up. The people who want to stay home, that is their choice. We can do it safely and effectively. 98% of cases have recovered from this virus. Keeping people locked down in their homes is against our rights of free people of the United States of America. Peoples lives are at stake here beyond this virus. Open up Florida!
Charlotte	Management	its time to reopen the state get back to work
Escambia	General	It's time to reopen the state. The whole point of this to start with was to not overwhelm the hospitals. We've done the exact opposite. They are all empty. In the meantime we can't get medical or dental care, and sending this state into a financial tail spin. I applauded our governor for putting off stay home orders as long as he did. Now it's time to reopen the state, lift those orders and get back to business. Please!
Pinellas	Tourism	This is what I sent: Reopen Florida! I support the full reopening in the state of Florida. As a registered voter, tax paying citizen of Florida who has been furloughed for 6 weeks from the hotel industry; the numbers do not support a continued shut down! The fear mongering of the media, the draconian measures of government control- it has to stop! Elderly, medically compromised or those wanting to continue living in fear and being controlled can stay home. But healthy individuals who want to work should be able to! I am not required to descend into poverty for anyone. I refuse to participate in "quarantine life" until there's an unsafe, untested vaccine released in eighteen months. I refuse to receive said vaccine to make others feel more safe. I won't set myself--or my children--on fire to keep you warm. We are Allowing fear and policies devoid of scientifically accurate data to destroy Florida and America! We have a constitutional right to take risks! Life is full of bacteria and viruses--many of which spread before symptoms manifest and after they subside. We have a right to receive OR refuse vaccines. Stop allowing the government to destroy: The Food Supply Small Businesses Medical Autonomy Access to Healthcare Religious Gatherings Privacy Rights Fellowship Tourism When the "new normal" is filled with starvation, depression, suicide, child abuse, domestic violence, imprisonment, and pure DESPERATION, the virus is going to look preferable to the world you helped facilitate.

AMERICAN OVERSIGHT

Clay	General	PLEASE DO NOT REOPEN FLORIDA UNTIL # OF NEW CASES DECREASES FOR 14 DAYS! Follow the plan put out by the CDC and White House Task Force! FOLLOW THE MEDICAL PROFESSIONAL'S ADVICE!
Hillsborough	General	I think this article sums it up better than anything else... https://thehill.com/opinion/healthcare/494034-the-data-are-in-stop-the-panic-and-end-the-total-isolation
Lake	Healthcare	Would appreciate the continuation of telehealth option in particular for seniors ans those with auto immune challenges.
Seminole	Food	My Business is Ellens Wine Room and we serve food about 3 times a week... My plan to open : I bought a Dyson Hepa Air Purifier for large room... a UV light wand for door handles , toilet area, all surfaces including key boards and The WINE GLASSES Hand Sanitizer on counters... Social distancing 4- 6 feet apart... inside and the outside seating area... limiting my capacity....probably not serving anything but "pre-packaged food... allowing patrons to bring in Take Out from other restaurants. Encouraging patrons to wash Hands on upon entry
Duval	General	We should not open until AFTER we have sufficient amounts of testing and we have scientifically proven that we have gotten past the peak number of cases.
Hillsborough	Government	Please reopen! Possibly a soft reopening with those wanting to return to work can and those who don't can stay home longer? Please !!!!!
Miami-Dade	Education	My daughter is a student at UF in Gainesville. I'm hoping even if classes stay online that the university opens. Many students like mine have off campus Apts and we cannot get them out if leases. So if at minimum libraries and parts of the universities are open the kids can go back to their apts
Citrus	Healthcare	The state of Florida should remain in its stay at home order. To be completely honest and realistic, putting Florida on a serious lockdown with enforced laws would be the best thing to do. Especially because so many people are taking this pandemic LIGHTLY. EVENTUALLY these people will begin to drop and nothing will be able to be done at that point. We don't even have scientific evidence of a cure or antibody and this government is seriously endangering its own people just to get back to business and make money. When in fact NOONE WILL BE BUYING ANYTHING IF WE ARE SCARED OR SICK. And a lot more people are scared than wanting to go outside and get back to "Normal" when the fact is there will be nothing normal about this economy when this is over. Use data and more evidence to lockdown certain areas and add more restrictions. This COVID-19 pandemic has been a complete joke to the American citizens and we will pay for it.
Polk	Tourism	I think we should reopen everything but require wearing a mask. We need to do mass testing and identify who has or is a carrier of the virus and quarantine them.

AMERICAN OVERSIGHT

Duval	Recreation	The gyms in the state of Florida should be an essential business to reopen again. Whether it's by limiting the amount of people at a time per gym or wearing masks, i don't care. People should be able to continue to exercise and take care themselves during these times. I currently train 6x a week and now down to 0. You can only do so much at home...the way Georgia is handling their fitness facilities and gyms should be how we can do here in Florida. Also, the gym where i go to Baileys Gym has 16 facilities in the state of Florida and i know the owner. He had to lay off 300+ employees just to keep a float and has 0 income coming in.
Leon	General	Florida needs to open now, many businesses are suffering, everyone needs to go back to work to pay rent, groceries, utility Bill's, food etc. Floridians need our livelihood back.
Seminole	General	Open up Florida! Restaurants, bars, theme parks, parks, beaches... everything!
Hillsborough	General	I am a resident of Hillsborough county. It is time for Floridians to get back to work. Throughout the past weeks of COVID restrictions businesses deemed “essential” remained open. Floridians who patronized those businesses voluntarily engaged in social distancing, voluntarily followed CDC guidelines. With these businesses open, sometimes serving hundreds of people at a time, twelve hours a day, seven days a week, we have witnessed COVID numbers falling. The State of South Dakota never mandated a single business closed and are also seeing COVID numbers falling. Every business is essential when families are dependent upon that income for healthy and happy lives. I believe these facts prove that Floridians are responsible people, who love their neighbors, and will CHOOSE to do the right thing. But we need our elected representatives to do the right thing; we need our businesses open. We don’t want government handouts. We want to get back to work. We want our businesses open now, not later. Sincerely, Richard obrien
Sarasota	General	As a Nurse Practitioner in our state it is my belief that it is too soon to consider re-opening our state. We are still experiencing plenty of active cases and with the high rate of asymptomatic individuals this virus will continue to spread once things are re-opened. I believe another month of stay at home (at least) is needed to allow for continued curve flattening. Another month also gives some time for more widespread testing to be instituted to detect asymptomatic carriers and quarantine them before re-opening and exposing individuals to them. Re-opening will need to be a very gradual process. Social distancing will need to continue to be necessary most likely through the end of this year.
Seminole	General	I’m concerned that the virus will spread more and will have to remain home again. I would rather wait. The CDC said May 19 let’s listen to them. People seem to be doing a good job of distancing. I know this is hard for business and people out of work. Maybe the businesses could come up with a plan of how they could open and share their plan.

AMERICAN OVERSIGHT

Palm Beach	General	Re-opening the state too early would be a big mistake! It creates a chance for another wave of infection to the point that we would be dealing with COVID 19 for longer than our economy can handle. I understand that a lot of people are struggling now, but re-opening too early could extend all our problems. Especially with the Healthcare system. This needs to be taken very seriously. And the government needs to listen to the experts, not a bunch of people that are just bored at home.
Osceola	Food	Open up our state!
Volusia	Professional Services	As a cosmetologist, I don't believe opening salons in PHASE 1 is safe. Yes I and all the other cosmetologists/ barbers would wear a mask (but where are we to get n95 masks to wear?). But you can't cut, color or blow dry hair with having the customer wear a mask. You can't do a facial or waxing services with the customer wearing a mask. Each of these services puts the operator and the customer within inches of each other. These are all touching /hands on services. Please this is way too soon to reopen salons I am not making any money now but I'd rather her be in the red than be dead! Let's stay 6 feet away than 6 feet under
Indian River	General	I own a bar. I was forced to close and per my liquor license was able to sell cocktails to go. You then made it ok for restaurants to do the same taking my sales to $0. Time to reopen Florida!
Volusia	Government	Let me begin by stating that this country has a major dilemma. On one hand we have a genuine concern for the people who reside here and their overall health. On the other hand we have a society that thrives because of their ability make and spend money. The problem is, that politics is playing a major role in this entire debacle and no matter how the dice is rolled, there's going to be finger pointing on both sides but that's a complex problem that should be addressed at a later date. Here's the Facts: The original belief that shutting down the society has now proved to be a disastrous proposition, in that we know now that the Virus has spread to every corner of the globe and can infect pets and wildlife. This continued belief that "Testing" is the magic cure-all for this pandemic is laughable, in that it is like placing a band-aid on a arterial laceration, it's not going to work and is a fake talking point that's been buffed up by the media and politicians. Testing isn't a cure. A vaccine isn't a cure. This Virus is going to be around for a very long time and will fester in remote regions at which point it will ultimately spread to another traveler or business person and will end up restarting the entire cycle all over again. The original reports that I read in early February, is that the virus mutates every 15 days, which ultimately will spawn numerous other variations that will end up affecting humanity as well (sooner or later), it's just a matter of time. Collapsing the economy in hopes of eradicating a virus is NOT going to work and what America needs now is to accept this fact regardless of how upsetting it is to some. Continuing to keep people at home will ultimately Bankrupt, States, The Federal Government and the World. We are only prolonging the inevitable. End the Quarantine.

AMERICAN OVERSIGHT

Orange	General	While I understand the desire to reopen as quickly as possible so people can go back to work, the reality of the situation is that we have only been doing the stay at home order for a few weeks and our numbers continue to rise and our deaths continue to increase. This will happen because in previous weeks there was no stay at home order. We will see a decrease in numbers in the coming weeks but we have to continue to keep the order in place. Testing needs to continue but antibody testing needs to become more prevalent. This could have a positive impact on gaining more information and insight into this virus. More unemployment applications need to be sorted and hopefully approved to help those who aren't working. Store capacities and mandatory masks in public should be in effect as well.
Volusia	Food	As someone who has lost 2 jobs due to the Covid -19 virus, keep the restrictions in place until June. I would rather be working but not at the risk of so many people.
Citrus	General	Select Counties based on the effect of Covid-19 and reopen in position of ranking....then, all businesses must be allowed to open with current guidelines of sanitation and distance in place where possible....our economy need this...our people need this.
Clay	Healthcare	Open up all of Florida immediately! There is no longer any reason to continue this lockdown. We've seen that hospitals are not overrun and will not be overrun. That was the only rationale for the lockdown. In the meantime the economy of Florida and the United States are being destroyed. In some cases, irreparablely. Enough of this destruction!
Bradford	General	Open state parks for camping. Keep 6 ft. Distancing rule. Campsites are large enough to allow for soci distancing..
Lake	General	Open the state! Let's get back to work and put this behind us.

AMERICAN OVERSIGHT

Pinellas	General	Sir,, I immigrated to Florida in 1974, at the age of 4. I am a registered Dem, but voted for you because I was concerned with your opponents potential of govt overreach. I've witnessed many state challenges through the years, but nothing compares to what we're currently dealing with. We have a situation where we've thrown millions of Floridians into peril, in an effort to so called, "protect" the more vulnerable. A move that I do not agree with. I do believe that we are dealing with something serious, and we should all take extra precautions, but I don't believe that state and local governments should have the authority to force people out of work while indirectly decimating the economy. Although I am one of the fortunate ones who is able to work remote, I have many friends and family members who cannot and who are struggling immensely with day to day life. Coronavirus is serious, but it can be treated but the effects of families losing their livelihoods and everything they've worked for their entire lives, cannot. PLEASE, albeit it in an organized way, take the necessary steps to re-open our state. I understand that there are many who are currently voicing decent, but I'm quite certain that the vast majority of those, like me, are able to continue working remotely. PLEASE, PLEASE OPEN FLORIDA and push our counties to fall in line. If we do not begin this process soon, we will quickly find ourselves at the point of no return. Sincerely,
Seminole	General	It's time to re open America and let the American people get back to living. Those that don't feel safe can continue to stay home or wear a mask. It is the responsibility of each individual to keep themselves safe. It is not the governments job to take away our right to life, liberty and the pursuit of happiness.
Sarasota	Recreation	Protect the elderly, immune deficient and high risk. Let the rest of us get back to work w common sense safety measures (social distancing)
Jackson	General	Please make your decisions based on medical experts. The economy can and will recover. Many residents will not. Death of a loved one is much more painful than a bad economy. ALL healthcare workers deserve high-risk pay. The unemployment pay system must be corrected immediately!!! Finally, opening the state too soon will be a disaster in the making....and will prolong this pandemic.
Duval	Healthcare	Healthcare workers should get their student loans wiped clean or hazard back pay. Secondly, we should not re open unless the CDC, dept of health & physicians across the State say we should.
Clay	General	I definitely do not think they should open Florida back up. My children's safety is my number one priority. It's not the time. The people of Duval or Clay aren't listening now. Imagine how it'll be when certain things are back open. A disaster, and more people getting sick!

AMERICAN OVERSIGHT

Hillsborough	General	Please do not reopen the state. We are an extremely high risk population, over 1,000 people have already died and reopening will simply cause a larger second wave of infection and overwhelm hospitals. We have not flattened the curve the curve is still rising. Everyone is at risk and the sooner things are opened the more danger we are in and the longer they will need to be closed in the near future.
Pinellas	Government	Open Florida back up! Save our economy!
Volusia	General	I want to start by saying by being in the emergency services field i completely understand the concern and impacts of the virus. I also believe that people need to self police themselves and we need to get people back to work and living or we will have bigger issues and impacts than we have now. Starting May 1st, we need to start to get people back to work allowing restaurants, bars, stores, doctors offices, beauty salons etc to reopen.Asking some food venues or stores to do less than half capacity would be a killer to their business. Making these business to mandatory wear masks, gloves, and handing sanitizer out would be hard for most business due to financial concerns since being closed and how do you get them? I cant even get them for my wife and I let alone a business getting them. Wearing a mask and gloves in public being mandatory is crazy with the heat and humidity. let alone taking away from medical professionals that need it. We need to start this opening and have everything including our hotels and theme parks back in business by June 1st. People are getting antsy, more people coming out in public and people are getting disgusted with closures, out of work, etc. All business's should have the option to opening, making their own plans for self policing social distancing and cleaning procedures to keep people safe. People should be tasked with self policing themselves by wearing masks, not going out in public, in they dont want too and keeping themselves safe. If they don't want to go to a park, restaurant, movie, bar or anywhere else that is a public venue that is their choice but we should not ruin peoples lives because people are scared. It is time to start to open and most importantly get people back to work. Keep restirctions on our nursing homes and care facilities if needed but lets get our state open! Thank you for the opportunity to voice our opinions
Hillsborough	General	Open it up, safely. Limit how many people can be in restaurants. Open OUTDOOR spaces: parks, beaches, etc. Keep to go alcohol going!! Listen, people are going to get her virus. It is what it is. Herd immunity needs to become a thing. It’s WAY more dangerous to limit rights than it is for people to be exposed to a virus. We’re talking about liberty now and personal responsibility. If people are scared, they can stay home.
Orange	Retail	Being deemed an essential worker I have not had to personally quarantine. However, working at a business that has seen an INCREASE in foot traffic for absolutely non-essential items shows that we should not be lifting this lockdown as people are not staying home as it is. Opening up the state further that what is already open will just make people gather in larger groups and therefore doing the opposite of slowing the spread. What we need is a better stay at home order. Make essential businesses go to curb side or delivery only. Theres no reason a business should have 100+ people inside. Its not helping. Mandatory all businesses close and go to curbside/delivery for 2 weeks. Stop the spread. Then reopen.

AMERICAN OVERSIGHT

Duval	Accommodation	Please apply the same regulations to hotels that you are applying to vacation rentals. And consider relaxed regulations for vacation rentals that don't have common areas. Hotels are far more likely to spread coronavirus due to close quarters, shared corridors, elevators, etc. The executive order that banned vacation rentals through April 30 unfairly burdened Babson rentals and gave hotels a huge advantage in the short term accommodation space.
Indian River	Healthcare	I'm an RN at Lawnwood Regional. I was scheduled to have surgery on my right knee March 27th. Please allow elective surgeries to resume. I really wasn't to get back on my feet. Thank you.
Hillsborough	General	Florida is not ready to open back up. A second and more intense wave of COVID19 mist be prevented as it would be far more detrimental to the economy than extending the current stay at home order.
Hillsborough	Government	Mitigation methods for the corona virus pandemic have done all that they can do to minimize the chances of overwhelming local hospital resources. On May first 2020, all businesses should be allowed to open for business with continued social distancing guidelines, such as utilized in Sweden, and extra precautions targeted for persons with risk factors for severe disease.
Orange	General	Open now!
Broward	Recreation	Please allow town/city pools to open for lap swimmers and deep water aerobics. All of these sports are for responsible adults and are conducted 6 feet away from each other. The chlorine in the pools is an excellent source of killing bacteria, germs etc. The park administrators can easily control the number of people at any given pool. Senior citizen in particular benefit from water exercise. Also, remove any tables and chairs from the pool decks. This will ensure that no one is hanging around the pool for pleasure or conversation.
Palm Beach	General	My husband and I are lifelong residents of South Florida. We love supporting our local businesses and especially restaurants but unfortunately we are seeing too many people not following social distancing or wearing facial protection. I personally have lung disease and immune deficiency so I am very concerned. Luckily I work for the school district and we are working remotely. My hope is that we don’t send people back to work too soon. Thanks to Governor DeSantis for your guidance and work in dealing with this horrific situation.
Lake	General	What are the considerations for immune compromised children as we re-open the state. Should they continue to isolate at home till we know more?

AMERICAN OVERSIGHT

Brevard	General	We have only been on stay at home order maybe 6 weeks. What was the minimum in China and other countries? 3 months? We open things up too soon we will be right back to where we started but worse. Americans are not used to being told what to do by the government but most of the general population do not think about the long term consequences, only instant gratification. You wanted opinions, my opinion is keep the order until the 12 week mark and then reassess. The virus is not going away, but we need to be sure we are ready when we do reopen. Thanks
Palm Beach	Recreation	Recreation areas should be reopened . Golf courses, parks, beaches can be safely reopened with social distancing measures in place. It is important to start economic recovery. Failure to consider economic failures will lead to long term issues which will be extremely difficult to overcome.
Brevard	Food	need to open restaurants with 50% requirement to start may 1. and start with counties that have covid19 cases below .005
Orange	Government	Open the state! My husbands gym needs to be open for income!
Polk	Construction	My husband works in the commercial air conditioning business that does all the McDonald's and the Starbucks, racetrac, wendy's etc. They need to open all the construction back up this is a very big part of Florida business he works for United Sheet Metal and air conditioning LLC out of Lakeland Florida
Polk	Government	I Do Not think opening up the economy right now is the best interest for us nor other states until more research is completed. One of the faults is that people are desperate right now and Small businesses are hurting that is striving to keep their business alive who didn't get a chance for funding. The working people especially in Florida to want to open their businesses back up because they need the money now and what they've been building for over the years. Our unemployment system is broken and we're all on standby waiting for assisted funds from the government so we can feed our families that really does not leave us choice!! Now there's been a lawsuit filed against our government here in Florida that has put a fire under someone's ass to try to get something done. So now the unemployment site is down over the weekend till Monday while Universal Studios is going to have $30'000 plus Cast Members going to file for furlough coming next week. Another hardship for the system to be overloaded!! There has been inconclusive reports of the vaccine not working? How about reports of people that have been tested showing not being positive the previous weeks and the same people that are being positive now showing to be positive or showing signs of the virus? We do not here anything about that? The state of Georgia opened the economy, barber shops, salons, bowling alleys and Monday going to open restaurants. I seen on the news today that their infection rate was forcasted to be coming down but reports the Covid 19 cases for Georgia are on the increase?? Is this true and if it is why in the world what they do such a thing?

AMERICAN OVERSIGHT

Orange	Food	Time to relax the stay at home as of May 1 (people are going to anyway - they have nowhere to go) and allow restaurants to start indoor dining provided distancing between tables. And to open hair stylists and nail salons allowing the service provider to wear a mask if they want. Also time to ease mask restrictions in places like Osceola - there is nothing that shows they help or don't - physical distancing helps. That means there is no reason retailers can't open their doors (provided their national chains allow it) and let people maintain their own physical distance without further state interference. This was all to help the hospitals manage caseloads which seems to be happening. Ports should remain closed to cruise ships. The airport should continue to be monitored. Quite frankly, with physical distancing there is no reason Florida can't resume some increased normalcy - almost nobody is "sheltering in place" anymore anyway. There are traffic jams in Winter Garden with meal pickups. Without options you'll see ongoing protest and people increasingly doing whatever they want.
Lee	Real Estate	I think it is well past time to start reopening the state. Keep the necessary places (ie nursing homes, elderly, sick and vulnerable) on a self isolation if they choose. The numbers are better and not nearly as bad as was expected. The financial impact is going the roof. TIME TO REOPEN. thank you
Manatee	General	My family would just like to give some input. We would really like to see businesses open very soon and want the stay at home order lifted. Our county has imposed curfews and we keep hearing Manatee county has a large number of COVID19 deaths per capita. What is not being said is that 23 out of 33 of these deaths come from only 2 nursing homes. It's not fair to impose stay at home orders and curfews when it is locked down nursing homes having the majority of the deaths. Herd immunity is being diminished with everyone at home and when everything is reopened you are going to see a huge resurgence of any and every disease not just COVID19. We are not allowed to build our immune systems by just being exposed. I work in the schooi system and we see this every year in August. Kids get really sick the first 2 months of the school year, because they haven't been exposed. If people use common sense strategies then we should be okay. Nobody wants to talk about how the US had roughly 55 million cases of the flu this year and around 60 thousand deaths due to the flu. We did none of these precautions with the flu. We can't wait around for a vaccine. As you can see with the flu we still had this much death. People are hurting financially, physically, mentally, and spiritually. We need to open. You have to realize with the stay at home orders everyone just goes to what is open in huge numbers. Instead of going to the businesses that shut down, everyone is at Target, Walmart, Home Depot ect. No one is staying home with the stay at home order. They are merely crowding every other store. We need to use common sense and open.
Hernando	Professional Services	You have no right to keep my small business closed indefinitely. Open salon up governor, not one of my employees have been able to claim weeks on your poor excuse of a website. Salon can open using PPE or we are going to sue your ass!
Broward	General	Open retail/beaches/parks!!

AMERICAN OVERSIGHT

Pasco	Professional Services	I do not agree with opening up any salons at this time. I am a nail tech and I do not think it's a good idea to come in hand to hand contact no matter the cleanliness of the atmosphere we are still subject to catching something as horrible as covid19. There will be a bigger problem trying to open up earlier than later. I hate not making money or receiving unemployment but I have a horrible immune system and my grandmother I live with has a lung disease. If I pick something up and bring that home SHE CAN DIE. This IS NOT a JOKE to ME. PLEASE DO NOT LET HAIR AND NAIL SALONS OPEN UP YET IN MY AREA. THE VIRUS WILL SPREAD EVEN WORSE THEN BEFORE!!!
Polk	Healthcare	I think it is too early without more testing. My wife is 65 and I just turned 59 today and I do not want to take a chance of bringing it home to wife, or suffering from it myself. I am an UBER and LYFT driver and I have people in my car breathing the same air. Short of wearing a snorkel mask I can't think of a good way to prevent it from spreading to my wife and me.
Pinellas	Healthcare	Needing surgery. When are you going to open elective surgery in stand alone facilities
Seminole	General	I think it would work out better if we waited until June or July just to make sure that everything was safe instead of opening up too early and then having severe consequences and having to re shut everything down. It's just going to be such a hassle to restart everything and it might also get to the point of no return and I'd just rather play it safe than sorry.
Miami-Dade	General	Wait until it is safe to open Florida again.
Orange	General	Please do not open the state until we are 100% able to. Safety comes first before profit.
Hernando	General	Whole tourism is a key part of the economy, in order to limit outside exposure it would be reassuring to see if gradually opened up. If key amusement parks open it should be only for Florida residents with strict standards in place to avoid any further risk for infection spread. Social distancing should still be followed with business allowed to require masks or temperature checks for the safety of employees and customers. Testing should be made available to everyone, anti-body testing should be made available as well. Positive individuals should be made to quarantine and efforts made to trace the source. While the curve is going down precautions should be made to gradually lift restrictions. While the economy is suffering it will not repair if the population is harder a second go around. I commend the Governor for doing all he can during these difficult times.
Orange	Recreation	My kids own 2 bars (JOYSTICKS) and (COCKTAILS and SCREAMS) in downtown Orlando that have been closed x 6 weeks. They have applied for every available loan to help them through this and not lose everything they have worked for. They have heard nothing back. They have NO income. I am 74 and this is killing me, watching the economic downfall, the food pantries and the impact on the mental health of my kids. Please re-open the downtown area bars. People are not stupid. They will follow the guidelines that most apply to them. I was a nurse for 40 years and we practiced Universal Precautions and protected ourselves. Please. I pray every day.

AMERICAN OVERSIGHT

Duval	Professional Services	Hello, I planned my dream wedding for 520 days to be on March 28, 2020. I had to deal with the heartbreak of having to postpone that wedding to July 12th, 2020. I would love to not have to deal with that heartbreak all over again and have the wedding that me and my fiancé so truly deserve. I understand that COVID-19 is real and it's hurt a lot of people. But we are hurting more people by taking them out of their school, their jobs, and their normal lives. We've flattened the curve and it's time to get back to our normal lives. We can all take precautions, but we can't live in fear anymore. We are Americans and we deserve to have our freedom back. I say leave it up to the people and let them decide what they feel is best for them.
Brevard	General	I understand that the economy needs to be open but as long as there are still cases being reported it would be foolish to open up. I think more testing needs to be done. If we open to soon I'm afraid it will start all over again. My husband has a severe heart condition and I don't want something to happen to him due to somebody else's foolishness. If the unemployment system was fixed I think it would be helpful to all involved. There is no reason anybody should be denied benefits.
Broward	General	To whom it may concern: The purpose of these closures was originally to not overwhelm our healthcare system with sick people. We are way below the projected numbers of sick and hospitalized, so it only makes sense to reopen out economy. It is causing much more harm on the people of Florida to be out of work and going bankrupt than the good of staying closed which isn't proven to be effective, Sweden is a good example. We need to reopen all areas of our state and set a precedent for the rest of the country. Thank you. Paul Tripodi
Seminole	Wholesale	I own a wholesale bakery and it has shut my business down. I employ 23 families and I had to furlough all of them. With no bites or Disney open, it has hurt my business tremendously. My company was in good standing prior to this shut down, I have not received an economic disaster loan, this would have helped. I can not mer the business afloat without business. My family has worked all their life to create this bakery, and if we don't reopen soon. We won't have a family business anymore and would lose everything we have. I say please reopen slowly, but reopen soon.
Brevard	Government	I believe this highly contagious virus should be kept under quarantine until 6-1-2020. This gives anyone who has been exposed to run through the disease while at home or possibly the hospital without further infecting others. This is the only way to prevent a second reoccurrence of the disease.

AMERICAN OVERSIGHT

Pinellas	General	I support FL opening back up as long as is done safely. It's doesn't make any sense to allow people to pack into Walmart but not allow a car wash to be open. The importance of social distancing & following the CDC guidelines needs to be pushed. From my experience just going to Publix yesterday, many people are not following the guidelines at all. 1/2 the people had no face covering,& were NOT social distancing. Seems there is a increasing amount of people who just don't believe this is serious & refuse to take part in preventing the spread. So many people have pre-existing conditions or are elderly in FL. This needs to be done so we can prevent the spread & prevent any future closings.
Broward	Construction	Open everything except mass gatherings. Let those that want to continue to "stay home" do so. Let those that want to go back to normal operations do do. While continuing to use social distancing. This is America. us
Seminole	General	My family, friends, and extended family are ready to have our freedom returned to us. Restaurants can safely reopen by filling every other table. Retail stores can open with limited shoppers allowed inside. Nail salons can open with safety barriers in between the nail tech and client. Hair salons can reopen with the stylist wearing a mask. Our central and northern state beaches need to fully reopen! I am a Florida native and have lived here my entire life. I have never been within 10 feet of anyone on the beach ever! I'm closer to people at the grocery store than I'd ever be at the beach. And they all need to open at the same time so that everyone doesn't go to the one beach that is open because of overcrowding and bad news media for our state. Residence should be allowed to drive an hour or less to be able to go to the beach and park in their car. It shouldn't be open only for local city residents. Schools reopen in the Fall. Theme parks and sporting events will require spacing in between seats. Use of scanners to check bags instead of human hands spreading germs from one bag to the next that they check. Refuse travelers from New York and other northeast states hard hit. Reopen the state parks! Having outside activities is not going to spread the virus, especially in Florida heat and humidity. There is no reason for state parks to be closed. People should be allowed to go on and live their lives! If someone is elderly or has a compromised immune system, or they are just afraid, they have the choice to stay home. But the rest of us should be able to go on with our lives and not being prisoners at home. Thank you!!

AMERICAN OVERSIGHT

Manatee	Government	Dear Governor, Let me start by saying, I do understand the thought about the economy and how the businesses may be hurting during this time. My thoughts are though, how much more does it hurt to wait a few more weeks to make sure we have a handle on this thing before we pour gas onto the fire? Also, more time to make sure we have a smart plan that allows businesses to open up smartly. Also, it is important that medical is ready for this...testing is in place fully as well as supplies to support the medical staff if this thing takes a bad turn once we decide to do that. I wince when I see people saying their rights are being taken away. I don't understand this because from my point of view, no one's rights have been taking away. The rights they feel are suspended are just that, on hold for the protection of the whole. It is sad to me that people feel money, and their own comforts are more important than society as a whole. This is where America is sad in my book compared to some other countries. People say they don't want to live in fear and they want to live their lives...but the key word in this sentence is LIVE. It is already tough living in such a beautiful state that already has a reputation for anything crazy must come from Florida. I don't want to be known for the dumbasses that kickstarted the movement to kill off America. Let other, lesser affected states open up and show us what works first. I was also disappointed that your task force seemed to only have government officials and big CEOs mostly...I only saw one hospital representative listed and it wasn't even from the larger effected areas. Maybe a few more health officials on your task force not just CEOs counting that almighty dollar they are missing.
Lee	General	Open up and let people decide for themselves whether to go out.
St. Johns	General	Please Open the state for tourism our area depends on tourism revenue.

AMERICAN OVERSIGHT

Broward	Education	It is clearly too early to reopen the state of Florida and especially in counties such as Broward, Miami Dade and Palm Beach county. It is clear that there are many loopholes in the stay at home order when you see the amount of people on the roads at rush hour. Florida's daily amount of new covid cases has barely declined. I honestly can't even believe we are considering reopening the state. If we reopen or lessen restrictions we are going to end up right where we were before. You can't trust people to make the right decision on their own. If anything we should be shutting it down further like other states (including ones with less cases) have done previously. I understand that a lot of people are struggling financially right now but our lives are more important than that. Finances don't matter if you are dead. I work for FAU and I have been very concerned throughout this whole pandemic. Although I am just an admissions counselor (not essential personnel) they have been having us continue to come into the office throughout this whole pandemic. We were the last Florida state schools to stop offering tours to large groups of people. Our Director is already talking about having events on campus as soon as the state opens and has already stated that they will not provide us any PPE when this happens. For the most part we are the only office at FAU that is still open with all staff coming in on a regular bases. Not to mention I have yet to do a single thing that couldn't have been done from home. It is an unnecessary risk to have us keep coming into the office when either way (home or in office) I am reaching out to my applicants by phone, email and virtual appointments. We should only have the bare minimum of people coming in to process the things that can't be done from home such as mail etc. You should look into how Florida Atlantic University is running their undergraduate admissions office. We shouldn't fear for our lives by being forced to come to work when we really can do everything from home. Our president keeps sending emails saying everyone who can work from home should work from home but we are not being given that option. Once again, you can't trust people to make the right decision.
Polk	General	Please don't reopen Florida or at least not the southeast. I absolutely would love to go back to normal but now is not the time. Continue the quarantine for at least another two weeks. There are too many citizens who fall into the high risk categories.
Miami-Dade	General	I think it's too soon to open up. There are still too many people with the virus that can be easily passed on to others.
Brevard	Healthcare	Slow reopening with businesses adhering to social distancing techniques. Mandatory face mask in public would be helpful. This is just my opinion I'm sure there are qualified professionals whose educated opinions should be taken more seriously.
Hillsborough	General	I got to say I think it is to soon to open Hillsborough county back up we are growing in cases everyday
Volusia	General	PLEASE CONTINUE SOCIAL DISTANCING REQUIREMENTS AT LEAST THRU SUMMER MONTHS.
Volusia	Retail	To re-open retail stores, social distancing should be adhered to. Only a certain number of people should be allowed in at any one time. If possible, one-way aisles should be implemented and enforced. For their own safety, employees and shoppers should wear masks. Stores need to be re-opened to get people back to work. Not only for financial reasons, but for their mental health. When people are unemployed, suicide rates rise, as well as domestic violence and sex crimes.

AMERICAN OVERSIGHT

Seminole	General	Order 20-72 Closure of Dental offices and reopening of Dental offices May 8th There is no way to currently mitigate aerosols in Dental offices without testing patients immediately prior to dental appointments. Rooms are wide open sprays are every where. What has changed since the order was placed on March 18th other than a recommendation from a Dentist who represents a group who would personally financially benefit from reopening? Would you feel comfortable sitting in a 2 walled operatory with your mouth open with aerosols from the next room entering the area where you are having elective. preventive treatment? Can you imagine being the dental hygienist or assistant sitting less than 12 inches from the spray and walking into it all day? How would you feel if you knew that the same x-ray sensor placed in your mouth was the same one which had been in everybody's mouth immediately prior to yours? The sensor is barely covered, but the cord attached to it and hanging out of your mouth and draped across your face with no sheath covering the exposed cord might have been swiped? So the dental assistant might have wiped it down, but it was hung on the wall in the hall or the room next door a room filled with aerosols. So in other words, it is not clean and I wouldn't want it in my mouth. How would you feel if you knew that your clothes, your hair and your face walked into an aerosol fog from the 15 other patients and staff who occupied the same space? How can a $15.00 dollar an hour dental assistant stand up to a dentist and refuse to work in a dangerous work environment? That employee would be intimidated and black balled within the dental community. With $600 and $275 a week, she or he can afford to wait this out until tests are available. May 21, there were 763 cases in Florida and Dental offices were ordered to close. On April 24th, there were 30,174 cases reported in Florida. The situation looks even more tenuous now than it did when the original 60 day order was signed.
Volusia	Recreation	Out door recreation and sporting events should be open with common sense.
Orange	General	Opening should not happen until there is testing available to all people including those with no symptoms, as well as having availability of masks and gloves for all. Protective wear should be mandatory for the next 3 months.
Broward	Tourism	Although I am a furloughed employee in the tourism industry, I think it would be too great of a risk to reopen Florida before we've flattened the curve. Our people are most important and we need to prioritize safety over economics.
Duval	General	I feel that testing of the staff and patrons should conducted before reopening of that business is allowed. There should be a test sample of each industry drawn from a lottery of business that request to be opened. Allow this for 14-30 days with follow up testing and then select the next group and test accordingly. Then go from there.

AMERICAN OVERSIGHT

Broward	Recreation	Reopening Beaches Suggestions When it comes time to reopen beaches, please take note that from what I've seen in the Jacksonville Beach reopening, the limited hours and exercise only mandate seems to have made them more dangerous than they would normally be. Limiting hours just means everyone that wants to go to the beach has to be there at the exact same time, if they were open as normal it would be staggered. Making them for exercise means people are constantly moving and passing each other in close proximity. If you think about all the models we were shown when shelter in place was first being promoted, you'll remember that if most people are staying in one place and only a few are moving around then the transmission of the virus is slowed. The same principal applies to the beaches. If most people are on blankets 6-10 ft apart, then there's very little interaction. NYC has left Central Park open and if you look at videos of Sheep's Meadow from last weekend you'll see groups of 1-3 people laying out, about 10-15ft apart. It seems to be working in parks with much less space than our hundreds of miles of beaches . I would, however limit groups on the beach to be 4 or less, or something like that. I understand that the optics of reopening the beaches for recreation aren't the best but it's honestly safer as normal with group limitations than with the rules Duval County has put in place.
Duval	General	I don't think Florida should open up until the stats go down on the COVID-19 Because I don't think people is going to be doing the social distancing I know people need money I know they want the business to open back up but right now I don't think it's safe to open back up it is too soon people are still dying from left to right
Okeechobee	General	I do not feel that Florida should be reopened at this time the reason why I feel this way is because in my county of Okeechobee there is no testing the department of health here refuses to contact trace any type of cases they refused to test anybody and we are in elderly population in Okeechobee County I also feel that they are numerous asymptomatic people out there that are not being identified and they can spread it to people and make this outbreak even worse we could become the nextNew York or New Jersey or any other bad epicenters of this virus. It may look at our numbers of new cases are declining but every day we are gaining new cases. I feel until we start seeing zero new cases a day with adequate testing then should we put in plans to reopen the state and get our lives back to normal. I myself have a long condition and I don't want to be around people who could be asymptomatic catch it bring it home to my family and then we're all sickAnd possibly die from this virus the economy will come back strong but we have to ensure that COVID-19 is gone from public places around the state before we reopen.
Pasco	Healthcare	Not a good idea at this time. In super markets I see too many people not wearing masks and not practicing mitigation. With that in mind opening stores at this time will just increase dangerous human interaction.

AMERICAN OVERSIGHT

Hernando	General	As a local truck driver my limited time when I'm off is very difficult to go to the stores because parking lots are completely full I'll go to Home Depot Lowe's Walmart Publix all of these places are packed full of people and to think you're closing the little businesses that's drive and do great on a regular environment you're killing literally all the small business and staff. The flu vaccine does not eliminate the flu this is a type of enhanced flu there's no antibiotic that magically kills if so reopen the state get it over with people that do not want to go out do not have to go out
Broward	Retail	Open the state!
Sumter	General	I believe it is time, next week to start opening businesses, restaurants, barber and hair shops, etc. We have done very well with the social distancing aspect, and. That can surely continue, limited amount of customers in stores etc. If the business sees fit, or determines that their employees and customers should wear masks, so be it, then that is what we do ! At least it will give the small business owners a feeling that all is not lost, and they can slowly and eventually get their business back up to where it was a month or two ago. PS - I REALLY need a Haircut !
Hillsborough	General	People aren't getting unemployment and people can't work and people are starting to run out of savings pretty soon there will be riots because people need to go back to work!! The people that are to scared to leave there house can stay home still while the rest of us return to work!! Should've never have shut everything down to begin with you have killed our economy and have set everyone back years thanks to you shutting down everything and delaying opening things back up! People are gonna be forced to open up the businesses May 1st regardless if they are given the ok or not because they have no other choice!!!
Osceola	Professional Services	I am a hairdresser. Our industry doesn't offer working with a distance of 6 feet. So we need to have a different approach to this particular area of our economy. Although this is not on the topic, having the unemployment paid would be helpful. Because with that we can pay the bills that now are accumulated for 2 month. So right there we would have a relief and be able to work on a low scale of income clients. I have a studio, so for me and all others in studios it is easier to have a one to one client service. But the bigger salons should work in a rotation of stylists. That way they could keep "some distance". Beside the client being serviced nobody else should accompany them. Disinfecting after each client should be mandatory In order to reopen. There are ways, we just need to be able to do so without the fear of loosing our license or being fined. And AGAIN, please pay the unemployment because otherwise we cannot pay the bills that are accumulated. Thank you

AMERICAN OVERSIGHT

Pasco	Healthcare	I think we should start opening things back up with a few guidelines and urge people to be cautious. Dentist offices should be able to see patients other than just emergencies. It's very hard to establish what an emergency is right now. Dentist office's are always clean and sterilized. If we hold off any longer it will be a night mare to get people back in conveniently if the practice can even still afford to open its doors. Please strongly consider letting us get back to work. Obviously places like movies theaters and such big amounts of people in one room probably should be something to be opened with extreme caution. Restaurants same thing. Bars same thing. I feel all medical practices should be open. Thank you for your time.
Sarasota	Recreation	All the state beaches should be open at the same time to avoid everyone crowding at one. There is enough room to just walk a little ways down to keep safe distances especially in light of recent study showing the sun and humidity defeat the virus in a relatively short period of time. Right now Sarasota county still has parking lots blocked which means only those that can walk to the beach can go. Should be able to sit on the beach at a safe distance too. Everyone is now very aware of the precautions they must take
Sarasota	General	Pleas do not rush! There are really too many unknowns. If people go back to work here are my concerns: 1. People will probably not social distance 2. If families are home schooling due to schools being closed what are they to do 3. Listening to the nurses on the front line they are not ready to open 4. Our elder community can not be kept in lock down forever however if you open too soon it would be worse for them 5. There will be a new norm however people will still be fun shy 6. Need tests for the people to see if they have had it and if they can get it again 7. Get people money I applied for SBA help and to date have Not received anything those on unemployment need help Now I appreciate all you are doing however do not want to go through this again Please think twice about opening too soon
Lee	General	Reopen the state. Do it in phases with certain regulations in place for a short period of time, if you have to, because I know people will throw a fit if everything goes back to normal for them all at once. I can guarantee that almost everybody who is opposed to reopening is either already well off and not impacted financially by the shutdown, they're happy receiving unemployment and sitting at home, they are brainwashed by the media/other groups (or are an actual higher risk group) and are genuinely scared, but don't realize that they have the power to stay at home without being forced to, or they don't own a business/have any skin in the game. This insanity has been going on long enough and most of the people that are pro reopening, will not be getting a vaccine if one ever comes out. Things aren't going to change unless you guys act now and don't give in to those that want this to be the new normal.

AMERICAN OVERSIGHT

Palm Beach	Healthcare	I am a FAU Healthcare Administration alumni, former healthcare employee, now Attorney. I think it's a bad idea to open up the state without a proper plan of action. If you decide to reopen consider starting with a few days a week only (Tuesdays & Thursdays) in a few cities to observe the effects so that changes can be implemented immediately. If all goes well, then reopen the state. Thank you
Miami-Dade	General	I believe the state is not ready yet but if we are gonna reopen the state the law with the mask should stay in place!! And everything doesn't need to reopen at once the pandemic is not under control so guidelines need to be put in place n yes a curfew needs to stay in place
Miami-Dade	General	We need a test kit for everyone, I don't trust anyone out my cicle, is very danger to work with different people every day.
Broward	Transportation	I think it's crazy to reopen Florida all together. We have not reached e peak of the virus. Opening Florida back up would be a death sentence
Lake	Retail	I can't pick just one area of interest, but I was forced to. Florida needs to completely reopen. Enough is enough. Herd immunity is the best way. Sweden has shown up everyone with how they've handled this. Being cooped up inside just lowers the immune system, making it difficult to fight off ANY infection, not just the Wuhan Virus. Imagine that the virus is the tip of the iceberg, but the tip of the iceberg isn't the deadly part, it's what you can't see under the surface that's the most deadly. What's under the surface is all the deaths that will come from illnesses from other things that aren't able to be treated because hospitals are tunnel-visioned on Covid, suicides brought on by depression, deaths from domestic violence brought on by captors that are too easy to overlook right now, and a whole slew of other reasons that no one seems to think about or, even worse, care about! Open up the state, let what happens, happen. We're talking about a 3% infection rate in Florida, with a less than 1% death rate, and a more than 99% recovery rate, tanking our economy, and ruining livelihoods.
Palm Beach	General	I'm 29 years old. I have an immune deficiency disorder and only 70% lunch function after I had hundreds of blood clots in both of my lungs and ended up in the ICU last July. I am terrified. I'm terrified to go the store, the beach, even to my doctors office. If we open up too early, I will be even less safe than I am now. I know people need to work to feed their families but this is truly a matter of life and death. Our way of life has put money before human life for a long time. It's time we take a look in the mirror and decide what really matters. Please do not put me and people like me at further risk. I love our state, and I want it to go back to normal, but it needs to be Ike's by SCIENCE, not politics. Thank you.
Duval	Tourism	Open up Florida! Our state relies heavily on tourism and agriculture, the latter was not really affected by Covid 19 as much as the tourism industry has been. We Floridians rely on our visitors in order to keep our taxes low and the state budget balanced. We need to end this and open this great sunshine state back up! At the very least the state parks that have outdoor points of interest this virus doesn't survive the heat or outdoors!

AMERICAN OVERSIGHT

St. Johns	General	Please reopen slowly and not movie theaters, bowling alleys, salons, spas and tattoo parlors first! Low risk businesses first is the way to go. I have a son who is a nurse and is petrified about cases spiking if we open too fast. So am I.
Broward	Healthcare	This is specifically addressing dental facilities (general, endo, ortho, pros, os) - Daily temperature checks employee & patients. - A state mandated questionnaire to be filled by patient to be kept on file, offices can add to questionnaire but every patient should be screened base set of questions. - If office has an open concept layout meaning there are not separate operatories or division between dental chairs. Patients need to be seen one at a time. Until division are put in place. - ALL staff members should be required to wear level 3 mask or greater as well as face shield or eye protection. Most offices have employees walking all over office & some have open office layouts there is no way to reduce aerosol risk so all employees should be required. - Patient should rinse with peroxly chairside to minimize aerosols. - Guidelines on sanitation. Suggest offices allow additional 15 mins per patient to sanitize area throughly. - Guidelines on how to safely reuse ppe and safely store used ppe. - Mandate patient can only come with parent/guardian or in cases of sedation a driver. We need clear defined instructions to providers to explain to patients that there are mandates in place for safety. Consider mandates as recommendations are often too loosely followed & we need to reduce the risk of outbreak of covid-19 to the people of Florida.

AMERICAN OVERSIGHT

Seminole	General	The state needs to be reopened in a controlled manner. That means that we should provide testing to most if not all our residents and protect the most vulnerable of our population. People in high risk categories need to stay home and let people outside of those categories go back to work and school. We can't just open the flood gates and resume the way things were because if we do we don't flatten the curve we just delay it. I believe that while tourism is the life blood of this state we can't risk opening up beaches and theme parks because again it would invite an outbreak of more cases to reinfect the population. The fact is nothing short of a vaccine will protect us and until then the only thing to do is let the healthiest among us return to some semblance of normalcy so our economy isn't totally crippled and protect those most at risk from this from potentially succumbing to it. As for how soon to reopen that's a decisions that a team of doctors, economists and government officials need to decide. Politics need to be checked at the door. Partisanship will only hurt us more. That's part of how we got into this mess. Our country has been so divided for so long that we've taken our eyes off the thing that truly matters, the people and our planet. This has been brought about by our own actions. We're killing ourselves and this is the way our planet is letting us know that it's fed up with our behavior. This is about our farming a food production practices, our pharmaceutical practices, healthcare practices, educational opportunities, everything. This should be a wake up call to change our attitude to our role on this planet. We believe we are the top tier of life on this planet and we're wrong. Just like there are good and bad live bacteria in and on our bodies that make us who we are we are like those same live bacteria to our planet. We have remedies for the things that ail us and things to promote those that help us. The planet does this as well. We may not like to think that it's a living breathing thing but it is. Our planet is just as strong and delicate as we are. I'm not a tree hugger or anything, but i do know a living thing when I see it and I know what a virus looks like. When we do reopen this state we need to rethink how we go about ensuring the survival of our species and prevent this from happening again. Next time we may not have the opportunity to change things.
Brevard	Healthcare	Florida is not yet ready to open! The virus is still spreading, and will spike if people begin congregating in public places again. Social distancing measures need the be taken further, as many Floridians are not abiding by the stay-at-home order. People are still dying, and new cases are still rapidly rising. This is not the time to reopen florida. Premature reopening could prolong the virus. Let’s get it right the first time around to eradicate it sooner.
Hillsborough	General	I have Cancer and have been in quarantine since before the Stay at Home Act. But I hope you make the right decision to keep Florida closed for now. Expert's are saying we haven't hit our peak yet. So I truly hope you gather all the information and make the right decision. I know it's not an easy one but it's better to be safe then sorry. I have lived in Florida all my life and I love this state please make a decision you won't regret later. May God lead you to the right decision. Thanks Mrs. Ileana Rivero

AMERICAN OVERSIGHT

Polk	General	My companion is 83 and I am 69. We love our State and we love our country. The state and country have been closed too long. With the essential businesses open the citizens proved we can still work and protect people like us, among the most vulnerable. We need to open all businesses and trust the people to make good decisions. A business will not be successful if they don't provide a safe environment. Trust people. Absolutely open all beaches, state parks, golf, playgrounds without any restrictions. The virus do not like sunshine and humidity. Florida is the most perfect state in the USA to open fully. Other states need to begin to open up after Florida. TRUST YOUR CITIZENS to make the right decisions. The vulnerable group have learned self protection and will be guarded until there is a vaccine
Brevard	Technology	It's time to open up our state before we cause anymore unnecessary harm to our residents. We are not New York City, our hospitals are empty and people are suffering undue economic hardships. While it made sense for a short time to get a handle on the situation, it defies all logic at this point. Open it up.
Volusia	Government	I don't think Florida is ready to reopen non-essential businesses. I think Florida waited way too long to close the state down. If we had reacted more in the lines with the governor of California and shut down earlier we could've prevented hundreds of deaths and probably thousands of new cases of the virus. I think we should pay more attention to what Dr. Fauci and Dr Brix says and let them decide when the states are ready to be open. Their priority is the health and welfare of the public and that too should be your main priority. I am glad to see that Florida is doing more to help senior living facilities. I hope Florida continues to try to do more for the prisoners in state and local facilities. And of course our veterans deserve the best care we have to offer.
Duval	General	I just want to say, I truly hope the states or Federal governments put something into place for working parents who have children at home and have been deemed essential and with no school for May and probably no summer camps or limited ones and parents not having extra funds at this time for a daycare setting or babysitter to offer us something so that when all is a go we don't loose our jobs too because there is nowhere for our children to go. Thank you!
Indian River	General	Please, please do not open Florida until the numbers of Covid cases decrease. There are a lot of retired people and seniors living in Florida and I believe opening it up before the medical professionals deem it safe would be a terrible mistake. Also, if you prematurely open up Florida, who's going to stop the many snowbirds from leaving the Northeast and flocking to Florida? We will have thousands of people leaving the epicenters like NYC and the Tri-State for the warm sunshine in Florida. It's not worth it to put so many lives in jeopardy. Thank you, Luz Redstone
Pinellas	General	We need to reopen the State of Florida. We have too many people that are suffering financially, emotionally and psychologically. For those that wish to continue to self quarantine that is fine but the rest of us should be allowed our rights to pursue our livelihoods and general lives.

AMERICAN OVERSIGHT

Manatee	Professional Services	Personally I feel non essential business should remain closed for another two week. I work at a salon and although I am itching to return to work, I feel we haven't seen a steady drop in numbers. And because we are a state that sees so many out of state visitors, I would feel safer staying closed a couple more weeks since a lot of states that come here are seeing their closures go at least until the first week of May. I do think beaches should be open to in state residents only with enforcement of social distancing. It's an open air environment and it's far much less dangerous than going grocery shopping at this point.
Palm Beach	General	Opening restaurants could work I ate at restaurants practicing social distancing before the full state stay at home order. At least open outside dining. Most people are going to proceed with care before going out. Opening the beaches is necessary people need to get out in the air and sunlight it helps physically and mentally. Social distancing rules should be posted at each beach with the county suppling persons to enforce it. Set a max occupancy per restaurant,salon,or retail establishment. I stayed at hotels that were handling the situation very well with staff and occupant safety maintained. Thanks for your time!
Lee	Retail	As a Partner of s Retail store on Sanibel, I adhere you to please let us reopen, most of snowbirds have all gone home, the Island is desolute and we need to generate any type of business we can. As y'all know the virus is a devedtstion and for it to hit during our busiest 6 weeks is unthinkable. I believe people will practice safe distancing and take care of their staffs and customers. People want some type of living again.
Pinellas	General	Please don't reopen. We do not have the contact tracing or testing ability need to test everyone. We also risk having Northern states flood here.
Palm Beach	General	Please don't allow South Florida to reopen until you have enough medical evidence showing that we hit peak and curve is flattering. Please wait at least until 05/15/20. I'm affected with working reduced hours 80% of my salary gone, I'm a single mom, widow, living from one income but I rather be home safe that bring that virus to my child or disable mom and end up having major consequences. Please don't allow pressure from reckless people searching for their own financial benefits and not for all Floridians. Thank you!!!
DeSoto	Professional Services	I am a hair stylist, we have been out of work for 5 weeks. I have a baby & need to be able to support my child & myself.
Sumter	General	Limited opening of most services: healthcare, parks and recreation, retail, barbers, etc. is possible with proper precautions (masks, store people limits, social distancing, curbside pickup). Start small with 1/2 day operating hours then in time increase to 3/4 day hours to allow staff and cleaners to sanitize accordingly. The point is some degree of limited services are better than no services. Thanks for all your hard work in doing what's right and gathering feedback from and for the great state of Florida!

AMERICAN OVERSIGHT

Broward	Government	I work for the Guardian ad Litem Program and am concerned about the ongoing shutdown, but I am more concerned right now with a reopen that has no path for parents or caregivers to go back to work when they children at home they do not have a place for them to go. Please make a plan for summer programs to open earlier, or schools to become a place that children can safely go so those that provide for them can return to those jobs being offered. Parents or caregivers stressing over this only means more children are at risk!
Brevard	General	Please do not reopen until a testing and tracing program is in place. Our numbers are still climbing and we don't even meet the requirements for the first phase of the President's reopening program. To open now would mean sacrificing many more lives.
Brevard	General	This virus , in all appearances, is going to be with us for a long time. Yes, it will kill people, but the impact of the economic crisis it is creating will far surpass the virus's death toll. Therefore, we must open ALL business, but doing our best to support continued social distancing and PPE requirements. People must be made to understand they are responsible for themselves and have the right to stay at home if they so choose and to that point some sort of government benefit should be available to them to assist with basic needs (not encourage unemployment), This means we need to allow the vulnerable to stay at home and that does include children. This may mean a hybrid of schooling options going forward. Also, put protections in place for and positive campaigns to protect the our senior living and health industry. Let's get back to LIVING!
Seminole	Government	Input for phased reopening of FL State non essential businesses and public spaces: Phase 1: Reopening of public spaces such as parks, play grounds, and other publicly funded recreational areas; Voluntary reopening of non-essential businesses at 25% occupancy load with the caveat that there be social distancing measures in place: markings on floors for queues, seating no more than four per group, group seating no closer than six feet, mandatory masking for hospitality staff. This phase should start May 1 with a four week rolling evaluation. If, after four weeks there has been shown no statistically significant rise in case numbers, move to 50% occupancy restrictions with the same social distancing requirements. Again, another four week rolling evaluation. Repeat at 25% intervals until fully reopened.
Bay	General	Good morning, First of all , we would like to thank the Governor and his task force for their services. We feel the state has done a great job flattening the curve with covid 19. But now we feel its time to get the economy rolling. People want to go to work and get busy. Keeping in mind as we reopen business, we need to continue to be even more diligent about continued cleanliness . At some point we need to take a leap of Faith. We can not continue to live in fear. Respectfully, Martin and Cynthia Murdock
Pinellas	General	Implement phase 2 last week.

AMERICAN OVERSIGHT

Lake	Wholesale	I am absolutely for opening the state effective immediately. This virus has not proven to be the problem it was individuals will continue to. If the need to close of counties where it is rapidly spreading...ie...Miami....then so be it. But to shut down counties where .06% of the population has become infected is absolutely ridiculous. Further, how is it logical to think that on May 1 everything is horrible, everyone must be in gloves and masks, keep 6 feet away from each other, and then the very next day (for mere example) everyone is safe to resume all activity?! If Govt. had chosen to lock EVERYTHING down...with exception of hospitals and emergency...for 2 weeks, then we wouldn't have to be in the situation we are in where we are half in, half out, growing weary and broke. Let's use some sense and move on. Nothing is keeping people from staying in their homes and taking their own precautions if that is what they need to do for themselves.
Marion	Healthcare	I work in the dental field and I'm extremely concerned not only for myself, my team but also for my family, friends, and our patients. I don't feel there has been enough discussion of proper PPE I feel instead of recommending there needs to be a plan in place that is required before opening back up to full capacity. I am extremely concerned when it comes to the aerosols created while working on patients that can affect anyone walking through our office as well as myself and our team. How can we bring the next patient back if these aerosols linger in the air for hours? I want to work, I want nothing more than for our office to bounce back from this and succeed however I am concerned not only for myself but anyone stepping foot into our building and anyone they come into contact with.
Hillsborough	Information	Opening Florida right now would be a big mistake it's too soon. More people will get sick and die. Opening Florida at this point and time will only set us back more in the future and directly effect the lives of Floridians and tourist. Please don't open Florida yet wait a few more months until the numbers have gone down drastically. My family's health is more important then money.
Lee	Food	Reopen outside dining restaurants
Miami-Dade	Professional Services	i think you should worry about getting the unemployment issue fixed first and let another 3 weeks pass before even considering reopening anything. people in georgia are still testing positive and didnt take this quaranting seriously and you are reopening parts of north florida. people from nyc will flock down if they know we are open for business.
Pinellas	Finance	Open the state with restrictions of course. We know social distancing and proper hygiene. People are suffering economically. Domestic violence up, no money for essentials. Issues worse than getting the virus. Those that feel like it is too soon can stay home. People have choices
Hillsborough	General	Governor it is time to re-open our state.. People need to go back to work.. I am retired So i am not out of work.. But we have too many friends that have lost jobs and have NOT been able to get unemployment... they need to work to support families

AMERICAN OVERSIGHT

Hernando	General	This shit down is literally killing our economy as well as people and small businesses! It's affecting people's health, more homeless will happen etc. I live in a small town and it will never recover regardless when Florida re-opens, my eye doctor who's been established for over 20 plus years already closed down his practice and merged with another physician. Most people are not ignorant and have good hygiene, this shut down should have never honestly happened but... let's focus on opening back up, jobs back to normal as much as possible and let's all use common sense! Stop letting the far left democrats dictate what should be done and letting them continue to crash our economy
Sarasota	Technology	Safe Zones You can open up businesses incrementally if you can establish areas where there is no infection present - i.e. Safe Zones. A store, an office, a factory, etc. would be a safe zone if it is thoroughly disinfected and the people in the zone are virus free. Two technologies are needed to make this happen: Covid-19 tests (home test kits would be best) and a phone app. The app would store the results of the test: Green (no virus), Yellow (unknown), Red (virus present). Your phone showing a Green Status would be an access pass to the Safe Zones. If your home is a Safe Zone, your car is clean, and your destination is a Safe Zone your probability of being infected on the trip would be minimal. As time goes on and the number of safe zones increases, more of the state could be opened up. This approach would also reduce the need for armies of contact tracers. Eventually, infection would be limited to a few Red Zones and aggressive action could be taken to clean these up. Note that when antibody tests are available, and it is understood how effectively antibodies provide immunity, people might be able to enter Yellow Zones or Red Zones without getting sick. The same technology to characterize the zones could be used, but how effectively antibodies confer immunity to Covid-19 needs to be understood before people could re-enter the Red Zones with impunity. Finally, geofencing technology could be used to establish Safe Zones in open areas like farms. Someone who is not green entering a geofenced open area would trigger an alarm, and action could be taken. The idea behind this approach is to turn Covid-19 test results into actionable information to drive the incremental reopening of Florida businesses while minimizing the risk to business owners and the people of Florida.
Broward	Food	We need to reopen the Florida economy and through uniform requirements in restaurants, retail, education, finance, agriculture, etc. can aid the efforts. Even large public businesses who received aid did so to maintain or exceed current staffing. Restaurant workers and customers alike need masks, limited dining, and sanitizing stations. I want to see just where these polls were conducted because I'm a register voter and I saw nothing of the sort and don't know anyone who would support leaving the state shutdown to this extent for another week, much less a month.

AMERICAN OVERSIGHT

Pinellas	Food	Hello, I would just like to ask that the opening in Pinellas is very systematic. I work as a server, my restaurant (Waffle house) is closed, and as much as I miss my job, I have a 69 yr. Mom with COPD, lung disease, and kidney disease. I have her quarantined in a motel, it is safer I have 3 children at home. I am the one who shops for her. Please just take your time, business by business and watch the numbers. Thank you for your time. Stay well. J.REAMS
Collier	General	After the stores, restaurants, businesses etc start to reopen, I think it would be wise for State government to require people to continue to social distance & wear masks everywhere! If businesses could have the ability to provide their customers who do not have a mask/face covering that would be very helpful.
Miami-Dade	General	I feel like the reopening of the Miami dade county area is too soon. This county is one of the most densely populated in the state. If we open now there will be a spike in cases according to various medical professionals. This alarms me as I live with an at risk person. I feel June 1 would be a more appropriate time because the amount of infectious people would go down more. Also along with this there would be more time for testing allowed. This would allow us to better understand hot spots and other problems that arise with the virus. This is a decision that will be remembered in history as either a great one or one of the biggest fails of the state. Please all I am asking is that it is properly planned out before opening thank you
Brevard	Professional Services	My wife is a hairdresser and I'm recovering from cancer, is it safe to open businesses that can't avoid social distances, tattoo parlors, hairdressers ,massage therapists etc?
Sumter	General	Opening of any nonessential business that cannot guarantee limited number of people at a time is foolish in any state until a vaccine is available. EXAMPLE...prior to mandatory stay in place my hair salon was limiting the # of stylist (3-4 stylist w/in 1500 square ft). All clients were checked in outside, waited in car til notified their stylist was ready. FACE MASK AND GLOVES MUST BE REQUIRED AND WORN DURING ENTIRE VISIT!
Broward	Food	i'm worried that we won't have a clear implementation on reopening . We need to have a surgical approach to reopening our business. Floridians need to have a level of confidence of safety. That when we revisit our restaurants , bars ,movie theaters that their are new norms to follow. Please do not open like Georgia , the Governor seemed in a rush to OPEN. Not using Science DATA is a mistake.
Volusia	Professional Services	I own and operate a Personal Fitness Studio and we provide a very important aspect of individuals lives by keeping them fit and healthy, while providing them the time to concentrate on their cardiovascular wellness as well. Being shut down has caused a great financial loss but even more so a physical, mental and a wellness deficit in our clients lives. I can only imagine the number of people this has effected. We can keep distancing and still provide our Personal training clients a safe and very productive experience. Thank you for your time.. Yours in Health Michael Matassa NRPM, MCPT

AMERICAN OVERSIGHT

Orange	General	Open churches for prayer, to Catholic being in front of the blessed sacrament is so essential. Please please
Lake	General	We are all for reopening FL. We need hair salons, restaurants, outdoor activities like mini golf opened up. Places cannot survive much longer. Financially or mentally. All for opening the theme parks back up after we show proof that the smaller openings can be controlled. Let's get DL opened again!!
Hillsborough	Healthcare	I think it it to early right now we are doing what needs to be done to weather the storm better then other states. In the long run staying closed longer will help all Floridians. Those states that open to early are going to see new out breaks . Florida can better this virus by waiting it out a little longer. As a nurse I'm proud to say we have no cases at my job it sucks to stand online to be checked and to have to wear a mask all the time but as other states relax they will be set back to starting over I would rather hold fast then when we do reopen we wont have the set backs others will. Also I think all health care workers need checked to maintain good health care services. Then when we do open should be very slow and starting with the important things like doctor's offices ,eye doctors. .parks things that we can still distances with . Gym schools thing like that should be last they are already a breeding ground for diseases and are generally dirty places.
Orange	General	We feel that retail and small businesses should reopen keeping social distancing and utilizing PPE and proper hygiene precautions. Large attractions should wait longer to reopen as they bring in outsiders that could bring in covid19. Also international travelers should wait another 60 days to come in and be tested as they enter Florida.
Manatee	Healthcare	Reopening Florida in the middle of a pandemic is probably one of the most short sighted things you can do as our governor. Please listen to the advice of healthcare professionals and YOUR CONSTITUENTS, the majority of whom do not wish for a full reopening due to the constantly changing and aggressive nature of the virus. To open before the end of the 2nd wave of virus cases especially with a flu season coming up is not smart. Come on. Stop listening to people signing checks and listen to people casting ballots. Please do not make republicans look worse than we already do with trump in office. Have some common sense and be a bold leader.
Palm Beach	General	As beaches are starting to open please allow swimming and allow us to lie on a blanket, distancing from others. The sun is an important factor for health. I await beaches to open from the inlet in Boynton down to Gulfstream beach.
Lake	Tourism	Florida needs to reopen with social distance and safety measures in place. Masks, public sanitizer stations, social distancing markings and touch less ways to pay for things are just some ideas. There has to be some way to calculate risk. People at higher risk have to stay home, others should be able to live. Also, people need to be able to work. Our economy is going to collapse.

AMERICAN OVERSIGHT

Indian River	Healthcare	Testing must be available for ALL. Also, antibody testing should be available for those who believe they have had the virus so they can make their blood available for those who need the antibodies. That would make people feel they are REALLY helping and give them peace of mind that they have already been infected and made it through, especially vulnerable seniors. By all means, do not open large scale venues like Disney World!
Palm Beach	General	I believe in Florida we should have to right to work. Not only has my salon suite been closed for over a month but I haven't had a paycheck in over a month. In a salon suite there is only one person in there at a time and hairdressers are atleast 2 feet away from their clients. If we require our clients to wear masks before they walk through the door and we wear masks we are still doing our part in not spreading the virus. Please let us re open our doors. We will follow any guidelines you need us to but we need to make a living.
Pinellas	Recreation	I think we should open the parks, outside courts and swimming pools as per the experts exposing the virus to heat and sunlight can kill it faster than people staying inside their homes!
Orange	Retail	Please get this state opened up again as we are all suffering financially. Lets use good common sense measures to do so.
Orange	General	It is imperative that we protect ourselves and others by continuing to shelter in place and keep non-vital businesses and schools closed until the threat has passed or we find a cure or effective vaccine, whichever comes first. I do not want my children to go back to school in the fall if the threat is still present. I do not want to choose between my children's grades or their health, both of which greatly impact their lives. Keeping schools closed means I won't have to choose.

AMERICAN OVERSIGHT

Seminole	Tourism	I believe that the state should move to reopen our tourism industry and to promote the Florida is Safe message by doing the following: 1. Set minimum standards for daily cleaning of theme parks and hotels and rental cars. 2. Promote the idea of tourism masks...fun ones to wear in crowds. 3. Promote Safe beach guidelines - social distance of your groups on the beach, including installation and mantainance of sanitizer and hand washing stations at enterances. 4. Promote airport sanitation. 5. Promote visits to Florida's natural parks. I would like to see a two week period of travel in state before opening up to out of state travelors. This would help iron out the links and also get locals feeling safe out of their houses. My suggestion would be to allow in state businesses open up May 1st. Entertainment venues open May 15th for on state travel and June 1st for out of state travelors to come in and enjoy the states tourism venues. Our state tax structure is based on tourism and we have to re-start this as soon as possible. If we miss the summer this is going to have a major impact on the state's finances.
Orange	General	I realize the point of the stay at home orders was to flatten the curve and help the hospitals from excessive numbers flooding in. Surprisingly, Florida's numbers didn't explode as I thought they would. Kudos. But, as a single parent with an auto-immune disease, I'm not ready to open our state up. I understand many people were living paycheck to paycheck and people are struggling financially. But, I'm not ready to be forced back to work and around people who may be contagious. I'd like to see another two weeks of the numbers going down before we start opening everything up and exposing the public to the germs again. I think another two weeks would give us all a more solid foundation to reopen on versus seeing a max influx of new cases.
Seminole	General	Please do not cave to economic pressure. Lives are more important than money. Don't reopen Florida just to welcome in waves and waves of the virus. I'm immunodeficient with a 9 year old. If I die from this because we opened too soon, my son will be without a mother.
Martin	General	Open up Florida! If people are hesitant to go out then they can stay home! People have to get back to work. Let people be responsible for their choices on going out. Wear a mask and gloves. Open up.
Orange	General	Maybe they could open parks n restaurants with limited amount of people, maybe half or less from normal. Also test temperatures at the gate or something like that. Do this for about 15 to 20 days and see if it has any effect or not.

AMERICAN OVERSIGHT

Wakulla	Education	Reopening schools and educational sporting events must be considered from all angles. Given the initial feedback on the consideration to open schools the only priority was the student. Nearly 18% of teachers nationally are 60+. You have 4.1M+ children in this state with a chronic condition. You must prioritize life. Florida has neglected teachers for over a decade in pay, and now is willing to allow them to be vulnerable to disease and joblessness.
Miami-Dade	General	I think we should be strict with stay at home orders especially Hispanic families. Everyone doesn't care and since we are family going to everyone's house and doing parties. Just this week my husband who works at urgent care mentioned families including children coming to get checked because they were at parties where people had covid. Quarantine should be in place and strict lockdown
Sumter	Food	Please please please do not rush this process. I have been greatly affected financially as a waiter who has already lost the end of my busy snow bird season going from 5 busy serving shifts a week to 2 slow delivery shifts. You would think I'd be chomping at the bit to reopen May 1 and get back to work. But I'm a part time care taker for my father and step mother and I am terrified of going back to clearing plates and silverware from possibly asymptomatic customers and bringing the virus home to my family. Georgia has given us an incredible chance to wait a few more weeks and see what happens there before we rush our opening. I would love to be wrong and see that on May 8, may 25th things have gotten no worse in Georgia and that we could have opened May 1st and then go back to work with no fears whenever we open. As it is now, I am terrified of us moving forward too soon. Thank you for your time and attention. I do not envy the weight that is on your shoulders with this decision.
Broward	General	I feel very strongly that we need to carefully reopen ALL of Florida ASAP. Even in my county, Broward, a very small percentage of people are infected compared to our large population. The effect this shutdown has had on our economy is starting to far outweigh the virus' impact on health. Opening beaches & parks will do very little to help people who are unemployed and struggling financially. We need to begin opening actual small businesses like restaurants, hair salons, clothing stores, etc in phase one. I feel requiring businesses to maintain some form of social distancing and to take the temperature of employees will keep us sufficiently protected. Suggest those who are "high risk" stay home, but allow the rest of us to live our lives. It is time for this to begin immediately!

AMERICAN OVERSIGHT

Palm Beach	General	Yeah, I know this is bullshit & just to make it appear like our feedback matters. Reopening the state is a great idea because it'll allow COVID to start spreading again & sadly, but also fortunately, it'll most likely cause the death of more supporters of DeSantis & Trump. The loss of human life is always tragic, but it'll end up helping Florida in the long run. So, go ahead & open, like we all know is going to happen regardless of anything we have to say.
Brevard	Education	This is a very difficult balance between the economy and public health. A lot of people are focused on the mortality rate, because it isn't as high as many other diseases. However, what many fail to consider, and which we know very little about at this time, are potential long term effects for those "recovered" and the potential impact that may have on health care. We also don't know the extent to which prior exposure confers immunity. It would be nice to know those things before making any major decisions. With that said, remaining shut down is not economically sustainable. Ideally, we could open up while allowing those who wish (or need) to work remotely. The problem with that is many would lose their jobs for doing this once we're back to business as usual and be forced to either unwillingly put themselves (or family) at risk or lose their source of income. Is there a way to protect them from job loss without just giving them free money? I am not against opening up, but we need to be smart about it. Speaking of being smart about it, I also feel that this should be a data driven decision interpreted by people that understand data analysis - not by public opinion, which is driven mostly by the media. It's basically damned if you do, damned if you don't. Good luck with that. Meanwhile, I'll continue (by choice) to stay home and work remotely until either my job forces me back or we learn more about long term effects.
Orange	Retail	I, as a nurse, feel that restaurants and retail along with salons and any other business I haven't mentioned should be allowed to open. I have been to the grocery stores and Lowe's since this pandemic started and I have noticed that no one follows you around cleaning any items that were touch at any of the above mentioned stores and I haven't heard anyone complaining about distancing or wearing mask. You guys need to go to the grocery stores and to Lowe's and see what I am talking about. I feel this is just a way of being mean to businesses that you and the government want to so call non-essential business. These businesses should open because it isn't fair to allow grocery stores, Lowe's, pet stores, pharmacy's, gas stations, etc where people touch items with no one cleaning those items then I come and touch them. That is mean and being a bully to these businesses. Please stop being a bully.
Duval	Healthcare	Elective Surgery
Broward	General	Due to new reports out of California & NY showing many more people contracted COVID-19 then has been reported and their bodies cured itself by generating anti-bodies. We should open the economy while urging high risk individuals (most who are already retired) to stay home. Giving those who are at an extreme low risk the ability to go back to work and earn a living.

AMERICAN OVERSIGHT

Duval	Finance	It is too soon to reopen. Until there is a 14 day sustained time frame in which cases of infection are decreasing, it's unsafe to reopen. Reopening before then forces and openly invites even more Floridians to become infected, to suffer, and to die.
Highlands	General	I would like to see non-essential businesses opened back up to the public. It would be great to have generalized guidelines and expectations for sanitizing in place to ensure the safety of all. I feel like there are risks in everything we do but at some point we need to live. I believe individuals need to minimize risks and not the government. On a separate note, I am a teacher in Highlands County and I supplement my pay by teaching drivers education to teenagers during the summer. This summer it has been cancelled because of DOE and CDC guidelines. This is concerning to me because I believe this program effectively teaches young people how to be safe behind the wheel and how to minimize risks while driving. I know some parts of the state are hit extremely hard and those places need to stay locked down but areas not hit hard need to be opened. Thank you for hearing my concerns.
Hillsborough	General	Open everything up ASAP!!!! We the people will riot and band together if you do not allow us to go back to work by May 1st!!!! The people that are scared can continue to stay home if they want!!!!
Palm Beach	General	Although I can see how the economy is suffering; I think it would suffer a lot more if we re-opened too quickly. Maybe re-open for people of certain ages like 25-35 to see how it goes for a couple of weeks. Then do 36-46 and so on.
Lake	Healthcare	Antibody treating. I think I had covid 19 the 1st week of January. The antibody test should be made available to all to give a better community health metric. Thus allowing confidence in reopening the state. I think more peorple have had this virus and this would prove that the frenzied media is creating pandemonium from a less than threatening pandemic.
Okeechobee	Manufacturing	Open everything now! Put us all back to work! We'll never be able to stay at home until this virus is completely gone. Rip the bandaid off now. Those that choose to can stay at home.
Sumter	General	As an RVer who lives full time in my RV and domiciled in Florida I (and a million of my friends) need RV parks to be deemed essential services. We live in these RV parks full time. Recently these parks decided to close because of the shelter in place order - right or wrong. More guidance is needed. For this simple fact we need the state to open. Some will die. That is something that is part of the life cycle. People will also die from the flu. We cannot do on like this. We MUST reopen.
Brevard	Healthcare	It is not yet time to reopen. Liaten to the experts from CDC and not politicians.. CDC will be able to dictate when it is safe. Why would you want to risk more lives?
Brevard	General	Follow the Sweden model. Protect the highest vulnerable people. New studies are showing humidity and heat kills the virus in minutes. Let people go out. Studies are showing that mortality rate is close to the flu. In summary based decisions on latest studies. Keep pursuing trials on Hydroxychloroquine with Zinc on the initial onset of the disease. Thanks.

AMERICAN OVERSIGHT

Sarasota	Healthcare	My comments on “reopening” Florida, date Adpril 25, 2020. Don’t do it. Our cases numbers are rising, multiplying, on a daily basis! Follow WHO guidelines. They are spelled out for you. Lock down. Isolate. Test. Quarantine. Contain. Flatten the curve! Our homes, businesses, beaches and tourist attractions will be worth less than nothing while Florida ruminates, uncontrollably & untested, in a stew of deadly virus. We went from 5 COVID19 deaths in Florida to 1046 — in less than a month and a half! The curve is going straight up. I won’t leave my house to patronize any business in Florida until its government starts following science, i.e. WHO guidelines. Flatten the curve. Use science. Use your power. Use discipline. Lock us down until our population is tested, isolated. Listen to our Surgeon General. Don’t escort him out of press briefings because he tells the truth about the deadly seriousness of what Florida is facing. Let Miami Herald And Tampa Bay Times attend press briefings and ask questions at press briefings, instead of barring them because you don’t want them to tell us the truth. STOP PRETENDING THIS ISN’T HAPPENING OR THAT IT WILL JUST GO AWAY! Start listening to science,. Use their guidelines and get out of their way in telling us the truth. Flatten the curve. Dianne Davis Venice, Florida
Sarasota	General	I think reopening should start with younger people.Senior people and those with underlying conditions should be brought back later. And they need to get this unemployment problem straightened out and just pay these people so they can buy food and pay their bills.
Orange	General	We cannot re-open safely without proper testing in place. Without it, you are missing entire populations that can contain and vector the virus. You do not know what you do not know (or care to know). If you want Florida to thrive, then be smart about not putting population at risk. When you do not test (and that means EVERYONE even without a symptom) you cannot know (1) where they are, (2) if they are negative/positive, (3) how to track where they are going and where they are potentially spreading what they might have. Don't kill people unnecessarily and be blind like Georgia. REMEMBER: the virus DOESN'T MOVE. WE DO.

AMERICAN OVERSIGHT

Highlands	General	Hello, I just wanted to give my input to reopening the state. I live in a county that was effected very little by the virus but people here are struggling due to the shut down. I have friends who are hair dressers and tattoo artists that cant make their rent and haven't been able to receive unemployment benefits or a stimulus check yet. They dont want a hand out they want to go back to work. My husband works as a restaurant manager and these servers desperately want to work. I am at a high risk group 8 months pregnant and a severe asthmatic I think the at risk people should do what they need to do to stay safe while letting healthy individuals get the economy going again. Thank you for your time.
Palm Beach	Healthcare	I have a question for Florida task force and Governor DeSantis. If the Governor of Florida opens the state at a more accelerated pace than , PALM BEACH, BROWARD , MIAMI, MONROE, HILLSBORO , and ORANGE counties. (75% of entire state COVID cases} How are you going to screen all those people that are flying into the state,to the above listed counties, being that every plane coming into those counties come from other "hot spots"? Follow up question What mechanisms are in place to keep people from freely traveling into and out of hot spots?
Martin	General	Hello, Please do not put economic interests above public health interests. We can not have an economy if we do not have our health first. Florida is such an amazing place and we need to take care of our people. That means heading the advice of our health experts who are fighting on the front lines of this. I will be very disappointed if Florida chooses to ignore the health experts. It is short-sighted, thinking only of immediate profit pleasing instead of long term resilience. I trust our leaders to lead with dignity and to put the advice of health experts first when it comes to making public health decisions. Businesses will need to function in a new way moving forward. Working from home when possible, keeping people safe and at home with their families until a cure is provided for this virus. Pay unemployment to our workforce in the meantime and provide grants to our small businesses to help them stay afloat. We will be better off in the long run this way. Thank you, stay safe and stay well! -Sarah
Pinellas	Recreation	Please open FL state park campgrounds to Florida residents only. Social distancing is easy when camping in the parks with your own RV. Most of us don't even need the public restrooms.
Hillsborough	General	Open everything up but only limit a certain amount of people inside places. Require hand sanitizers at all places & mark spots on flooring for 6 ft distance.

AMERICAN OVERSIGHT

Lee	General	I do not believe we should re-open Florida to soon. We can regain our economy but we can not bring our love ones back if covid-19 takes them away from us! My father and I have COPD and my husband and mother is a type 2 diabetic . We want to be able to see our grandkids grow up. And also I would love to keep our loved ones safe. I believe if we let our guard down to soon we will loose a lot more of our loved ones. Please really think about it really hard, I look at the news everyday and more lives are taken by covid-19. I know everyone is wanting to get back to what we knew as normal, but we should take it slow! Thank you
Lee	General	Florida has performed so much better than predicted by the models .I believe this is as a result of strictly following the guidelines set down by the President and his task force.Equally as important are the steps taken by our governor and his advisers.The main reason we've done so well is because ,for the most part,you've been able to trust Floridians to do the right thing.As we prepare to reopen Florida I simply ask you to please trust us to do the right thing as we open retail stores,dine in restaurants,salons,theaters etc.I ask you to reward what Floridians have done by opening businesses and allowing people to return to work.As the President has said "the cure cannot be worse than the disease".I believe you can open businesses and still social distance and slow the spread. I also hope you will allow elective surgeries again as this affects the quality of life for thousands of Floridians . Thank you Allen Neitz
Hillsborough	General	Please do not reopen the state too soon. Get the valid information from medical professionals before making any rash decisions. What Georgia and other states are doing now is not necessary. The shelter at home process is doing what it is meant to do, lim8t the spread of covid. One thing that does need to be handled much better. The lack of payout compared to applications is upsetting and you as our government need to do more to help those in need.
Seminole	Retail	Lets use some good common sense measures to open things up....people are starving!

AMERICAN OVERSIGHT

Seminole	General	Hello Re-Open Florida Task Force, How we should open Florida? That is the question we are all asking and fortunately there is a way to do so without harming or destroying citizens trust in the government. Here are the things we should do: - Innovate our agricultural system. Use technology and e-commerce to export produce around Florida and other states. Why? It would significantly reduce produce waste and maximize profits for farmers, as well as keeping families healthy. - Advance our implementation of indoor farming in local communities with an income of $40,000 or less. Why? To further practice preventative healthcare and reduce the use of unwanted surgeries and complications Americans are suffering, specially communities of color. - Not open Florida until we focus on preventative healthcare. Why? By practicing it, we drastically reduce body, mental, emotional diseases that are killing Americans. The reason for this is because if we do not take care of our people, we risk losing thousands of lives to PREVENTABLE diseases and not the pandemic. - Fixing our unemployment system. People are suffering and possibly dying because of this negligence. - Innovate our economy. We currently rely heavily on tourism and without it, we are practically nothing. Hence, in order to reopen, we need to think about the future and how we can make Florida economically strong for the future generations. How can we possibly do this? By restructuring our economic drive from tourism to the state of sustainable solutions, we can guarantee a bright future. Also, by doing this, we can attract younger flocks of people to invest, work, and generate ideas to further strengthen Florida. Main areas we need to focus: agriculture, sustainable energy, preventative healthcare, new pathways to genes revenue. Feel free to email or call me Best regards.
Palm Beach	Construction	As an essential business we have continued to operate with reduced staff. However, we cannot continue to stay in business much longer. We are a plumbing and air conditioning company that celebrates our 58 year in business We practice safe distancing, take temperatures, submit questions to our service customers, where masks and proper PPE. We are operating safely within the guidelines set by the CDC. Please it is time to reopen all businesses. The majority of business owners are responsible people who will take the necessary measures to protect our staff and our customers. If you do not open our businesses soon there will not be any left to reopen. The treatment is now becoming worse than the disease. Thank you !

AMERICAN OVERSIGHT

Broward	Education	High School Traditional Graduation ceremonies need to be allowed and encouraged throughout the state in either June or July. Hillsborough County, the 3rd largest school district, has a plan in place for their 36 high schools. Miami-Dade has a plan. However, Superintendent Runcie in Broward County is digging his heals in, planning for Virtual Graduations. He is "monitoring" the situation for when it is safe. As we appreciate the concern for keeping everyone safe, as Gov DeSantis begins to reopen the state, schools across all of Florida should be encouraged to hold traditional graduation ceremonies for the class of 2020. These kids have put their heart and soul into school for 12 years, many while dealing with hardships. Many of these kids will be the first to graduate in their family and will not be attending college. They should not be denied. Gov. DeSantis needs to make this a priority during the plan to re-open. I am attaching Hillsborough County's schedule as an example of their plan.
Volusia	Healthcare	Given the impact of COVID 19 on the health care system and health care workers, it is unrealistic to think that the reopening of the state will not add to this burden. People will begin to congregate in large groups without enough enforcement to mitigate this. Giving the state another month of social distancing and staying home will give us the opportunity to further stop the spread of this virus thereby keeping our citizens safe.
Palm Beach	General	Mr Governor, I am very pleased with your handling of this crisis. I voted for you and will do so again because I believe that you have the interests of Floridian's at the forefront of your decision making. I am a first responder in Palm Beach Co. I have seen many people who believe that the entire state should be shut down but I have met more who believe, as I do, that we can open up using common sense. I get the impression that the federal government and many other governors thinks that the average American is incapable of making good decisions for themselves and their families. Quarantine has always meant keeping the sick and most vulnerable away from the healthy, not the entire population being locked in their house and having their government enacting orders that strips away their civil liberties. I truly believe that we can open up our state and Floridians will make good decisions that will keep us safe. Now that we know that many more have been infected and recovered without so much as a visit to an ER or their doctor this lock down seems to have done little good. The cure was not supposed to be worse than the disease but it seems so many decisions have been based on fear instead of science. Please open our state and allow us to make good decisions for ourselves and each other. Too many Americans and Floridians have been negatively impacted by this crisis, not the virus. Thank you Mr Governor.
Palm Beach	Real Estate	Private beaches and clubs should be opened up wher there are controls in place

AMERICAN OVERSIGHT

Lake	Professional Services	I recently created a petition to postpone reopening hairsalons or any indoor close contact small businesses during the first phase. I am a hairstylist and single mother. No I have not received unemployment or my stimulus as of yet. But feel strongly it would be a risk to the whole state of Florida to do so at this time. Salons no matter how creative can not insure a safe distance between stylists and clients. Which is not with in the guidlines of opening during the first phase. It also puts clients and stylists at greater risk and could increase the spread in the long run.Working as a hair stylist for years I know first hand. I ask that you please consider the safety of those working in these businesses as well as the clients who will flood them when they reopen. Its worth the extra time to wait and evaluate.Thank you...
Pinellas	General	Work from home should still be mandated if it can be done. People who have underlying conditions should still have the option to work from home for the next 2 months. Afterwards, there should be another review. Both essential and non essential businesses should be working to put up protective barriers so they can reopen with caution. The state should not allow opening until this is put in place and confirmed. Non essential businesses should only allow workers who have to go into the office for the next 2 months, like mailroom. This will also ensure social distancing.
Lake	Healthcare	I feel if a business has had a majority of their office staff working from home successfully, having those workers, especially ones with the at risk underlying conditions, be qllowed to continue working from home. At least until there is unrestricted activities, no mask recommendations and no need to social distance. These workers should be protected by the ADA as far as workplace accommodations. We need to err on the side of caution because once the slightest loosening of restrictions happens, people will forget about being careful and their selfish, greedy way of living will reappear
Lee	General	It is time to start opening things like restaurants, beaches, playgrounds, retail and daycares. People need to work. Social distance guidelines can be provided to most of theae areas. Let people feed their familes by earning a paycheck!
Osceola	General	The economy needs a serious boost. Businesses reopening will help those who are furloughed or laid off to resume earning a living. Social distancing and other precautions should continue until the transmission of COVID-19 is no longer a threat.
Polk	Professional Services	Please open salons. I've yet to receive unemployment and need to work.
Broward	Professional Services	I work in the cosmetology industry and believe that we DO NOT need to open just yet. The contact is too high and we will be risking infection or spreading the virus. We can not safely guard ourselves even with gloves and masks. There is too high impact contact. Also, please get our unemployment paid. Stress effects the immune system too and this isn't helping our well-being either. There needs to be more testing, more social distancing, and people need to STAY HOME. I vote until May 15th at least!

AMERICAN OVERSIGHT

Polk	Tourism	We need to listen to Dr Fauci. We need to listen to the head of Bank of America. Once we have a better hold on this virus, then open back up. Did we not learn anything from China or Italy? Did we not learn anything from 1918 Spanish Flu? Keep things closed. Florida hasnt even peaked yet. Polk County isnt even enforcing the stay home order, and hasnt from the start! I have Lupus and Asthma. This virus could KILL ME, and others like me. What about US!!!!???? Ok so we stay home. But what about our loved ones who have to go back to work? In positions where masking up isnt an option!! Then they come home with this virus...asymptomatic and pass it on to us. Then what. Is our lives so less important than the God Almighty Dollar. What needs to happen is this country and this state need to quit making issues political and make money readily available to the people. This country was founded by two main parties, often opposing, yet working for the better good of their people and their country. FIX unemployment. Get loans to ALL small businesses, so they can continue to operate. Pass a larger stimulus for Americans. Keep it at just essential workers and make counties adhere to it or county officials face fines. Take fines made and reinvest back into the State. Make wearing a mask out in public punishable by a week in jail AND a fine. And keep everyone home. The longer ppl dont adhere, the longer this virus is going to linger. Dont reopen. Not yet. Consider the lives that are going to be lost if you do. Please!!!! I am 44. How does my husband explain to our kids why I passed away from this virus because he was forced back to work by a country and a government that cared so little for me and people like me???? If, as a tax paying citizen of this State and this Country, than please hear my voice. Do not silence it and allow me, or someone like me with weakened immune systems...or aging, be silenced forever. You can rebuild a business. You can rebuild a fortune. You can rebuild finances. But once you are dead, you are dead.
St. Johns	Healthcare	Keep social distancing and non essential BIz CLOSED until week before July 4th Also prohibited visitors for that length as well ! I know a lot of northerners sneezing their way into Fla to escape the mayhem of illness up north ! There is a second wave already in China so no international flights also check the hubs like flights coming in from Atlanta as well !
Seminole	Healthcare	Open up completely! Once we see the devastation that very well may cause, we can shut up these "open up the economy" idiots. Science means nothing to them. So, please, OPEN UP EVERYTHING!
Lee	Administrative	I support keeping non essential businesses closed for at least a few more weeks if that is the medical advice. Please also clarify what to do if automobile tags expire before they can be renewed. We have been trying to renew online but the portal isn't working, and we are trying to go to Michigan at least by mid May to care for elderly relatives. Thank you.

AMERICAN OVERSIGHT

Brevard	Government	Reopening Florida does not make sense right now, unless the point is to stick it to the working class...again. Based on what is being considered, it appears the state thinks the lowest paid workers should be at the greatest risk to contract and spread the disease. If you are making your decision in order to save money on unemployment payments or improve your unemployment numbers to boost reelection chances, your priorities are completely out of whack and are morally questionable. Not to mention un-Christian. This is coming from a couple who both work on government contracts, thus are able to work at home fully paid at good salaries for the duration. Yes, I'd like to get a haircut, but protecting the life of my hairstylist is more important. I know my opinions won't sway Republicans in power, I just wanted you to know our thoughts and why we will never vote for a Republican ever again as long as we live.
Broward	General	Open up and let the citizens decide if they want to get back to normal. In reality, it will be the business who starts the process since they have to open.
Palm Beach	General	It's WAY too early to open. We need at least two more weeks. There are so many cars on the road still. People are not taking this serious. We need our law enforcement to enforce a strict lockdown!!! Too many people will get sick if we open now. Give us at least until May 15-20! Save us Floridians and think of our health over the economy!!
Broward	Recreation	Golf - hopefully the golf courses in South, Florida can be opened again with proper restrictions in place such as one person per cart, etc. Such will give outdoor recreational liberty with the accompanying financial gain for the courses and hence state.
Volusia	General	MANDATORY face masks OUTSIDE. Punishment for not complying, first offense $200 fines, second offense $500, third offense 14 day jail time. If someone gets that many offenses, they belong in jail! This includes those walking pets their neighborhoods, bike riding, beach walking, Stores/shops/offices/restaurants (ANY BUSINESS) make MANDATORY employees wear masks AND no one allowed in their buildings/stores/shops without mask on. Police to be called and tickets begin happening.

AMERICAN OVERSIGHT

St. Lucie	Government	The other day someone made a comment on a post I had put up. The comment read something like this, "I choose life over freedom and the pursuit of happiness" or something to that effect. At the time I did not respond because the enviorment was toxic and to some extent still is. However, after further reflection and deep thought and looking at that statement from all sides and from a logical place, this is my response. While some may "choose life over freedom" they decided to exist rather than live. The difference in living and "life" is this. Living is embracing things that go on in life, the good the bad and the ugly yes,even death. Living is not existing in fear. Fear of illness, fear of getting hit by a bus, fear of walking out your front door. Existing is hiding behind fear. Now think about that for a moment. If you don't believe me just ask someone who has Agoraphobia, "Agoraphobia is often a progressive phobia, and may eventually lead to a fear of leaving the house. However, it is the panic attack, rather than the act of being in public, that is the cause of the fear." When we are crippled by fear and by the mind control of others we lose our life and our freedom. Ask people who live in countries aka North Korea who live in fear - they don't live they exist. They exist at the behest of a dictator who directs their every move and thought. They exist at the behest of a dictator's mood of the day. They have been conditioned to understand that as long as they think - act and behave like he directs and dictates then their lives will be spared. This is an illusion. The same illusion we as Americans are currently living under. We have been conditioned to believe that if we hunker down in our homes, wear masks, stay six feet apart, stop socializing and listen to the mindless media and even more mindless politicans we are going to be fine. That is existing and it is an illusion. It has come to the point that people who have illnesses other than the "covid" are refusing to seek treatment. The reason, they do not want to be separated from the advocates or their loved ones and they do not want it to be assumed that they have "covid." Again this is not living this is existing. How many are we going to lose because those who have other health issues die because they live in fear and do not seek treatment of their true illnesses. I am so thankful that my beautiful man is no longer here to be put through this insanity, I do not rock an orange jumpsuit and I do not do well in confined space
Brevard	Education	Schools need to focus on class sizes...desk placement and sanitizer... please take the teachers into consideration when re opening the schools. I am worried about those old filthy buses being hot spots for spreading the disease.All FL schools need a registered nurse at all times and an isolation area!!
Seminole	Technology	As much as normalcy is a goal for all Floridians, as much of a hardship this has caused so many out of work, and as much as it pains me to say the obvious, but here it is. It started with one case in Florida. You can flatten the curve down to zero, but it is untenable to think that we will ever get to zero. So the conundrum; do we sacrifice for the grater good and wait or reopen our economy and face more dire health problems when there is no national system in place. Do we shut our borders as Trump has done? How far must we go? Common sense predicates a wait and see approach, no matter how disastrous economically it may be. if not, God help us all. Please leave the state alone to heal Governor.

AMERICAN OVERSIGHT

Alachua	General	Dear Governor and Task force, It is imperative that you begin opening up Florida for business. Every day you keep businesses closed is another day of reduced wages, income and tax revenue for the municipalities, counties and state! Neither people nor the government will have any money to provide basic services. The domino effect will be worse as folks stop making payments to for their homes, credit cards and workers that will then lead to bank collapse. You can already see the sky HIGH numbers coming in for unemployment, forbearance and this is just the beginning. The Death rates of COVID19 do not warrant the destruction of our society including the higher Suicide rates, domestic violence, drug addition and the List is LONG. The unintended consequences are worse than the virus. Let each county decide on the course of action that is best for them and step in if numbers get out of hand. Thank you and God Bless, Kimberly Clawson
Broward	Recreation	On behalf of me and MANY golfers alike, let's open the golf courses already! Can you stop with a uniform approach? Let the businesses follow the standards outlined and open. If a person feels it's safe, he/she will go, if not stay home. It's time for people to take responsibility for their own actions and stop the babysitting. Guidelines for a sport that takes place outside, in the sun, in the fresh air, offering exercise and well being, where there is no necessary interaction with another person is really easy to do and offers very little risk. The time is now, the guidelines are easy to understand and follow: Once again Golf is unique where its the player against the course. There NO necessary interaction or need to be within 6' of another player, EVER.
Osceola	General	I feel that April 30th is too soon to open up the state. I feel more comfortable with the idea of opening businesses with less person to person contact first. I work at a spa in a retirement community in Kissimmee and am concerned that opening early May is too soon.
Miami-Dade	Tourism	What are you doing to insure that those who have been waiting over a month for unemployment receive it more swiftly? I've seen that April claimants have been receiving their payouts before March claimants.

AMERICAN OVERSIGHT

Broward	General	I would like to see area such as hair /nails salons opened. If you opened Costco and Publix Home Depot understandably , you need to allow people to cut their hair etc. as far as beaches etc you need to instill the distance rules. If you keep everyone home and you have no idea who or how many people already had it you will never open. Plus how would be developed herd immunity? My thought are to open up as planned
Palm Beach	Healthcare	I work two jobs in the healthcare field and the restrictions in place has had a negative effect on both! I am a radiologist and have seen a 50% reduction in cases per day because people are afraid to go see their doctor. My second job is a small business where I perform laser tattoo removal. We have been closed the entire month of April. We see clients on a by-appointment basis, one at a time. At this point we feel it is totally unreasonable for us to be closed. We are able to do additional cleaning between clients and wear face masks. We never have more than a couple people in the shop at once and there are just two workers. The restrictions are hurting small businesses like mine where our normal operations do not create a huge risk for either us or our customers. Not to mention the number of people who are being potentially hurt by putting off seeing their doctors and getting CT Scans, x-rays, mammograms, and other radiology studies.
Brevard	General	While I do understand that small business and people are suffering, I feel the bigger suffering would be if we opened all back up. We have yet to have one day that cases are not rising, The longer we keep the shelter in place the safer it will be when we gradually open back up. The less chance of having another huge outbreak on our hands.
Broward	Information	Please do not re-open to soon. We have been in lock down to long to blow it to soon.
Brevard	General	I STRONGLY DO NOT feel that we should reopen just yet. The virus is not gone and reopening will only add to more individuals dying. The spread will become much worse than it already is.
St. Johns	Technology	You need to require everyone to wear some form of mask in public spaces. The US military requires this. You also should engage feedback control engineers to design tools to judge when and how to hunker down or roam free and various levels in between. I would not shop anywhere unless customers and employees wore masks.
Orange	General	Please don't open right now it's too soon! I know everyone is eager to get out and party and make money etc. but I think we'll wind up back where we were or worse. Thank you.

AMERICAN OVERSIGHT

Seminole	Professional Services	To whom it may concern, I am writing with great concerns in regards to the possible reopening of spas at this time. As an aesthetician (facial specialist) I do not feel that it is safe to resume services that require direct person to person contact so soon. I would like to share some information on what our services entail so that it may be considered when discussing the reopening of businesses in our industry. Lumping services such as facials, massages, and eyelash extensions with hair services would be a HUGE mistake that will undoubtedly contribute to a spike of new cases. Some things to consider that you may or may not be aware of: - During a facial treatment, the FACE to FACE distance between the client and the aesthetician is only about 12-15 inches. That's it! Add steam and the germs we breath out between each other further spreads in the treatment room. - While the aesthetician can and should be wearing a mask, it is impossible for a client to wear a mask while receiving a facial service, which is performed with the aestheticians hands. - Facial and massage services typically consist of 60 minutes of direct person to person, skin to skin contact. - Medical aestheticians who work in medical spas and doctors offices usually wear gloves for the duration of the service, however MOST aestheticians who work in salon spas and chain spas do not. I have worked in this industry for 15 years. Colds, stomach flus, and viruses spread through these spa settings unbelievably fast. A client comes in, the aesthetician or massage therapist provides a service to them, the service provider gets sick, the other coworkers get sick, and we take it home to our children and families. Even with the best sanitation practices in place, this is a very common occurrence in our industry. From November 2019 to February 2020, for example, the spa I worked for was hit with three waves of sickness. It would be a huge mistake to overlook spa services as hotbeds for spreading COVID19 throughout our community.

AMERICAN OVERSIGHT

Hillsborough	General	Masks in public for any shopping or recreational experience not in an open air setting and able to maintain greater than 6ft distance (so if outside, could forgo mask if about to maintain an excessive distance from others, unless showing symptoms or may have known exposure). If in a 'closed' environment, masks and 6fr rule unless contradicts with activity (ie, dental work or activity requiring mask). Sanitary measures - as areas open, bathrooms will need monitoring and continuous wipe downs (small area, common fixtures, etc). If multi person area, should monitor # in area and have employee available to be continuously wipe down contact points (door knobs, fixtures, etc) and open doors/monitor flow to reduce contact. Post signs with proper hand washing techniques to reduce contamination (use paper towel to turn water off). Stations available for sanitizer gel, use hospital idea of 'foam in, foam out'. at all entrances. Have available at any area with decreased movement (waiting in line, at the purchase counter). Monitor traffic in areas like fitting rooms, wipe down room after use. IF/WHEN restaurants allowed to reopen for dine in - reduce capacity with appropriate spacing, increase sanitary measures, ideally masked if not at table (in/out of place or going to bathroom). Adhere to social distancing guidelines. Could do reservation only at first, small party sizes only. Retail - reduced capacity allowed and maintain a 6ft spacing. Rollout store types based on essential need. Allow for online sale. Clothing - online sales with pick up could allow customer access to fitting room at time of pickup to allow for exchanges as needed. Masks required. Services - hair/nails/massage/chiropractic/stylist/tattoo/etc: Capacity reduced and scheduled clients only, no walk ins. Client/provider pair must wear masks and adhere to increased sanitary measures during encounter. Pair must maintain 6ft social distancing between other client/provider pairs. May only single book.
Lake	General	I do not want the state to reopen because according to the health officials and scientists it's not safe. I will not participate in going out to support any businesses that open, I think it's irresponsible to do so right now until we can get it under control

AMERICAN OVERSIGHT

Levy	General	Dear Governor, I believe the state of Florida should NOT be reopening yet. Unfortunately many people have not been following the stay at home guidelines, and as such Florida is still seeing a significant increase in cases EVERYDAY. We need to continue the shut down in order to slow down the spread. We have a very sense population of seniors and immunosuppressed people. We already have too many people traveling in and out of the state, which needs to end. If we don't stay diligent about this issue, there will be no end in sight. Opening the state will only prolong the life of the disease eventually causing us to shut down further and longer than we already have. KEEP THE STATE CLOSED! Please! Thank you, Levy county resident - Margarett Hendel
Orange	General	I am a massage therapist. I get alot of us have our own practice. But we are to close to comfort. I have asthma... my children are chronic. I want to work. Unemployment isn't enough to even pay my rent less adding utilities and my wifi connection so my daughter can study. These Bill's are my basic needs. Doesn't include other payment like Fedloans, credit cards, insurances, car notes and so forth. My concern is if we return RO soon it can come back stronger and more dangerous. We will have to shut down AGAIN and longer. Killing more people then it has. All we need is to wait one more month. It'll be way safer. If not at least 2 to 3 more weeks. Just to be way safer. Cause I can almost 98% of people are not gonna go out to eat at a restaurant or get hair done and less hang out in areas like malls, parks etc. We will lose even more money in the economy unnecessarily. People need Patients something nobody has anymore these days.
Escambia	General	Our state needs to go back to work immediately! We have millions of people out of work because of government policy. This is horrible. We need to make sure this does not ever happen again! People in a free society need to be free to make their own decisions. The government should NEVER order healthy people to close their businesses or forcibly lay off millions of hard working citizens! Throughout all the viruses in the past society made adjustments but never did the government hit the stop button on society. Who thought this was a good idea? The virus is still here and millions of people are suffering because of government decisions, NOT directly because of the virus! Words we should never use again: social distancing, shelter in place, contact tracing, and all other terms that have been forced on people. We want our freedom back NOW!

AMERICAN OVERSIGHT

Clay	General	Good morning everyone. While we need to get everyone back to work, social gathering places should not be opened yet. Industry should be open so most everyone can get back to work. While at work forced social distancing should happen and break rooms should only be accessed to retrieve ones lunch or beverages. No tables should be present for people to sit close to each other until this passes. Let's get America rolling again safely. Thank you
Broward	Healthcare	I work in healthcare and believe we should start allowing elective medical procedures. This of course being done with CDC guidelines, but getting patients back in for procedures and treatments.
St. Lucie	Education	Dear Governor: I have owned and operated True Crew Arts & Ed, LLC for the past 14 years. We have represented Florida and the United States at World Dance Championships for over 5 years. We provide, fitness, dance, personal and health counseling and also incorporate education into our programs. I was previously a Florida Elementary educator before opening my studio and also received a Jefferson Award from Channel 25 News. I am pleading with you to allow us to RE-OPEN beginning May with specific guidelines---as my studio will not be able to survive if it does not happen soon and our studio family and community need guided activities to open for their children as well as themselves. Under your present guidelines, I am trying to offer virtual classes, to try and help keep students active and engaged and give parents a bit of a break as often as possible. This entails working 3 times the hours I normally work on my part, without personal reimbursement, but I am doing everything possible to help my studio families. Due to COVID-19 I have lost approximately, 1/3 of my families as, due to not working, they are not able to use their limited funds to pay even the 25% reduced tuition. As I still have to pay my instructors for preparing zoom classes, still pay the rent, utilities and all other monthly expense on my studio, I cannot offer these services any lower. I already charge the lowest in our County, offer multiple types of scholarships and do not require Contracts for our families. Therefore, my business is hurting even more from this pandemic, as the other studio is this area are protected by their required Contracts. I am seeing how families are beginning to feel and suffer from the stresses of virtual schooling and children are suffering as well. Parents are continually complaining about being ready to give up and stop the classes. It worries me not only for my studio, but for the safety, health and wellbeing of everyone affected, but mostly our children who are our future. I too have elderly family that I take care of on a daily basis with

AMERICAN OVERSIGHT

Clay	General	I feel as if all residents of Florida should be testes. Clay County only has one place to be tested. I wish they would set up more areas. This is a major concern with the residents of clay county. Why can't the farmers allow either food banks or residents come to there farms and pick the vegetables instead of tilling them over. This would be a great tax write off for their donations When we do open back up how will we know for example nail salons have sanitized there equipment in between customers. Will there be hand sanitizer to use before they start. I think you should make appointments so they can follow with the 6 feet distance. Restaurants will they have a wipe to clean the menus. I would rather stay closed till we have a 2 week period where there is no more cases or deaths. I am really concerned with people from the north coming in to stay at there summer homes. Maybe you should have the post office notify you of what we call snow birds. Here six months and then back home for six months.so they can be tested
Palm Beach	Tourism	Open Disney up may1. Mandatory blood and temperature check before entering.
Miami-Dade	General	I am a 74 year old male with underlying medical conditions. My opinion is that at least South Florida is not ready to be opened as of yet. People in this area do not respect social distancing and the virus will keep spreading killing Floridians. Please keep the rules on until residents are properly educated in enforcing the CDC rules. Thank you
Pinellas	Retail	I believe if a store can provide masks, gloves and take Temperatures of employees and customers and we are able to maintain the social distancing requirement I feel that retail should be able to open up in a controlled setting. Currently the virus can be picked up in a grocery store, gas station and any other essential business that is currently open and none of the listed above items are required during this critical time. So why wouldn't a retail store be able to open if they can provide masks, gloves and take temperatures of employees and customers? Keeping nonessential businesses closed is definitely going to be worse than the actual virus killing off people!! Most of the small businesses in the area did not get the PPP program which is absolutely ridiculous. Thank you Nadalie Brattlof
Broward	Finance	We need to address the $600 stimulus payment to unemployed self-employed Floridians. This issue needs to be address. We are hurting and suffering and the Governor is still not addressing this issue. Six weeks without a paycheck.

AMERICAN OVERSIGHT

Duval	General	Gov DeSantis, In the name of common sense, please open up Florida for business &b individuals. The current Government action is doing more harm than good. Thx Brian Kelly
Sarasota	General	At this time I believe only essential business should be open. Until we all can be tested we have no clue who is sick or not sick or a carrier. My father is in a senior care facility and I have not been able to visit with him for almost 2 months and I miss him very much, but we are both alive. There has to be another way to solve the problems besides taking life living risks.
Seminole	General	Before we open the state, I would like to see 50% of the population tested for corona virus 19 and 50% of the population tested for antibodies. I would like to see face coverings required in public for everyone except when exercising.
Volusia	General	We must get the economic wheels turning again while keeping everyone one as safe as possible, so social distancing, personal hygiene, and masks in public should be continued.
Duval	Recreation	Open Florida State Parks now to Florida residents.
Volusia	Healthcare	I think Florida should enter Phase 1 for reopening when daily positive cases have gone down by about 10 % daily for 1 to 2 weeks. Individuals will decide on their own anyway, how much outside exposure they want to have by going to then open places like restaurants, department stores, hair saloons, etc. We all are in this together and we will get to the other side healthy, happy and strong if we all do this right way, together. We salute all doctors, nurses, healthcare personnel and all essential service providers who are putting their lives at risk and doing a phenomenal job to protect us, so to protect them also, we all citizens have to do our part. God Bless United States of America. ususus
Broward	Retail	I think we should like Key West keep still May 31
Broward	Education	School and universities has for some time used on lines tools to teach and educate, but it needs more resources and “know how” to continue. Maybe we as a state should consider opening schools over north Florida and improving on line tools for the south, but either way the outdoors should be open now!!!

AMERICAN OVERSIGHT

Hillsborough	General	A good economy saves lives. Encourage safe social distancing without having businesses shut down. Any facility that has the ability to social distance should be allowed open. All small businesses, parks and recreational facilities, and bigger businesses that can limit the amount of people at once should open back up. All non-essential activities that can be done while social distancing and with a maintained cleanliness should be allowed. Examples of what should either be opened completely with social distancing or in the small phases of testing: Hair salons Zoos Retail stores Theme parks Small/family businesses Museums
Seminole	General	1.Education should continue with distance learning. 2.Retail should limit the amount of people in the stores. Everyone should wear a mask or scarf. Payments should be made with cards. 3.Manufacturing should limit amount of employees and alternate shifts. Everyone wear masks and gloves. 4. Transportation should limit the amount of people and seal off every other seating to encourage social distancing seating. 5.Real Estate should have virtual showings and meetings with clients. If a client insist on personally seeing the property, then they can get a code to have access to the property key in the a box on the property door like currently happens. If a family still lives at the property, it will be up to that family to decide if they will allow or not a showing in the case that they are the current owners of the property. 6. Hotels should not serve buffet breakfast and guests should not be allowed to use common areas. Everyone should wear masks and gloves.
Duval	General	Everyday we hear of new symptoms, everyday we still have positive tests and deaths, everyday we hear we still don't know this still is under control, we have no treatments. By shutting things down you already compromised heard immunity so we're all at risk, if this hits again which it's predicted too then what, I understand economics plays a bigger factor in this then human health, but what is another 15-30 days of lockdown, what will it matter to the economy if your citizens are ill or dead from The next go around. Governor be proactive not reactive stand apart from those the fall to the pressure of the Left. A few more weeks won't destroy the economy,but it could destroy our health and families.
Lake	Retail	Time to start opening up gradually. Not as wide open as Georgia but retail outlets must open since Florida unemployment will never pay any of us. Every republican is 100% against paying out claims so it's time to get back to work. My company is in Orange County. We need to open back up. I have 17 employees that haven't received a check from me or Florida unemployment since March.

AMERICAN OVERSIGHT

Citrus	General	My husband and I have been out of work for over a month and still have not received unemployment which is a disgrace. Waiting a month. Went through all our savings. So o do support opening the state as long as it is done slowly and with common sense. It's obvious we can't rely on help from state so we need to get back to work.
Manatee	Healthcare	It is important to open FL!
Pasco	General	I honestly think they are trying to open up to quickly I understand the economy is important but peoples lives are more important the money can wait i have a mom with cancer a daughter autoimmune compromised and my son is also no one where we live or around most counties take this seriously and more people are dying and being sick every day we are not ready as a team to open up this state we all should be tested first and make sure who is sick stays home and who isn't canine a little more comfortably i think everyone should be tested first you are putting peoples lives on the line for money thats pretty sad and I was hoping our government was different then that pretty sad
Miami-Dade	Food	Restaurants should open and limit indoor tables and expand onto the outdoor walkways and store front spaces to keep 50% of clients outdoors and 50% indoor with proper separation. Takeout and delivery should be encouraged utilizing waiters instead of delivery services to keeping their staff employed.
Duval	Retail	1. Tell vulnerable people to stay home. 2. Reopen businesses and require employees and customers to wear masks and practice social distancing. Restrict number of customers in a building based on square footing. 3. Reopen hotels and motels with enhanced cleaning practices. 4. Monitor rate of new virus cases and deaths for 4 weeks. If the trends are downward, lift restrictions. We must start generating tax revenue thru businesses or state and local governments will go broke and then we'll have worse issues. Let us take responsibility for our own lives. Don't insist on taking no risks.
Santa Rosa	General	Slowly reopen the economy with social distancing in place. First elective medical procedures. By remaining shut, the medical clinics and hospitals are getting crushed. Where are we in this if the hospitals shut down? The cure for this virus which affects the vulnerable is far worse than the disease. Protect the vulnerable and let the other 97% of people reopen and attempt to avoid another Great Depression.
Lake	Retail	Businesses should be able to reopen if they follow safety protocols. The entire beauty industry should be allowed to reopen. They are far more sanitary than any grocery store, gas station, or restaurant

AMERICAN OVERSIGHT

Palm Beach	General	There is no way Florida (especially Palm Beach, Broward, Martin, Miami-Dade) should be opening any time soon. We need more testing and we need to continue social distancing. I am appalled at the lack of scientists (epidemiologists) and medical doctors on the panel to re-open the state. This is not a partisan issue this is a health issue. We need leaders who will listen to professionals who understand the virus, not leaders who are being pushed by partisan agendas. Until there is widespread testing, of people with and without symptoms, tracing of those who were in contact with people who test positive, a solid plan for better hygiene opportunities and less crowding on school campuses and workplaces, we cannot reopen. Until there is accurate reporting of tests, accurate reporting of deaths and hospital patients, we cannot re-open.
Baker	General	not a good idea at the moment, way to soon
Pinellas	Healthcare	Dear Governor Desantis, I definitely feel that it is too soon to reopen Florida because of the continual risk of Covid19 infecting citizens. We need widespread testing and a much more definite drop in cases. If we reopen now, we will have a huge resurgence of new cases! I know that this will happen in Georgia. They have reopened too soon !Thank you so much for your concern. Best, Fred & Caroline Bennett
Broward	Tourism	Before reopening hotels to guests internationally and from other states, I believe our main focus should be to end the spread so we don't bring in people who are possibly asymptomatic and make our situation worse then it is.
Polk	General	Please follow medical advise and do not open everything up without very specific guidelines. I understand that businesses want to open but people like my husband and I who have medical conditions that this virus seems to hit hardest will not be rushing out to use these businesses. Take into consideration the great number of people with the medical conditions like us will not be able to be out until there is adequate testing which shows that we are over this. There has to be consideration for us who will be left out. There should not be a rush to open everything.
Duval	Healthcare	I first want to thank all first reponders and health care worker for doing an outstanding job. Second want to comment on the reopening of jacksonville, i think it is a mistake to reopen jacksonville so soon as we donot know if there will be another wave of this virus. You cannot predict whaypt will happen if we reopen to soon. I know everyone wants to get back to work so they can feed the family. But happens if we get hit by a second wave of this terrible virus.. then we have to start all over again, i would rather be safe than sorry in the end if we get a second wave. The old saying bad things come in threes. Sorry about the negative suggestion but lets just wait and see. Thank you and get well jacksonville

AMERICAN OVERSIGHT

Hillsborough	Technology	I own a small business that provides professional tax services over the internet. Myself and all of my contractors have always worked from home. In mid April, I saw demand drop off dramatically due to nobody being allowed to go to work. In turn, I have cut the hours of my web developers and other contractors. This cycle of business owners cutting hours due to low demand results in even less demand and more hours cut. It is a cycle that continues indefinitely until myself and every single Floridian is receiving unemployment. There will be no tax revenue to pay for this, because no one is allowed to work. I urge the Task Force to quickly reopen the state and restore our right to work and make a living. There are many like me that are safe at home from the virus, but are not safe from the closed state. It is time to get back to work.
Palm Beach	General	Dear Govenor, This message is to give my feedback regarding opening the Florida economy. There is enough evidence that hydroxychloroquine is effective in the treatment of this virus. And also with the other knowledge we have regarding the threat to individuals with compromised immune systems. Knowing these facts, it is time to open up the Florida economy. I am supportive of everyone wearing masks in public situations to protectThose who have secondary illnesses.. It is time to open up the economy and get people back to work. Thank you for being our esteemed and outstanding governor. I think G-d every day that you are at the helm in our state. And thank G-d that Donald Trump is our President.Trump 2020. Thank you! Anna Cohen
Gilchrist	General	You need to make everyone wear masks in Fl. To prevent the spread and protect everyone.
Palm Beach	General	We should not “reopen” Florida until health experts agree that it is safe. Lives are worth more than a momentary dip in the economy. Put people first!
Hernando	General	Thank for the chance to voice my comments. First I would like to start with I think we need to wait to open start to open Florida until at least June 8th based on the Washington university model. We have kept the numbers of sick and deaths low because we have filled recommendations. Let wait a few more weeks to ensure we don't create a second wave. People's lives are worth more then a few hotel rooms or a night out at dinner.

AMERICAN OVERSIGHT

Lee	General	Re-opening Florida too soon will create a set back and diminish all the sacrificing its residents endured these past weeks. In reality, re-opening should be measured by "needs" and "wants". We have to be vigilant in keeping the health and safety of evveryone before all other considerations. Florida is blessed with clean air and plenty of sunshine. A benefit that allows us to enjoy basking in the sun in our backyard and a walk around the block. We can make sacrifices to save lives. We can make sacrifices to reduce demands on hospitals. We can give rest to over worked healthcare workers. We can do a lot without feeling hungry, or lonesone, or unhappy. We can give time so our state and country can heal. We can all benefit mentally and emotionally knowing we are contributing to a higher cause. Teachers are still teaching. Food is still abundant. Doctors are accessible through tele-medical venues. Parks are open to walk and excercise people and pets. We are guided daily with information and facts to guide us. We can do this! We must do this! We need to tighten our belts and stop whining. Instead, let's appreciate what we have and live another day to enjoy it. The virus wants to stop us. Let's not let it!
Orange	General	REGARDING REOPENING FLORIDA. PLEASE, PLEASE, PLEASE LISTEN TO THE DOCTORS AND SCIENTISTS. PLEASE OPEN SLOWLY. REQUIRE EVERYONE INSIDE THE BUSINESSES, PLACES OF WORSHIP TO WEAR MASK-CHECKING TEMPS DO NOT CATCH NON SYMPTOMATIC SPREAD. CREATE AN EASY HOTLINE OR SOMETHING SO THAT NON COMPLIANT BUSINESSES CAN BE EASILY REPORTED. MAYBE IF POSSBLE CONVERT PUBLIC DRINKING WATER FOUNTAINS INTO HAND WASHING STATIONS. LAST RAPID TESTING IN MULTIPLE LOCATIONS IN EVERY COUNTY.
Sarasota	General	Gov. Desantis, REAL DATA and FACTS from frontline doctors in California. Florida's numbers are very similar. People, especially elderly and uninformed. are understandably scared. They have been fed data that has been wrong and is changing constantly. Please, I beg you take 20 minutes and watch this. Educated, calm and loaded with verifiable data. You are an intelligent and measured man. If you see this, I know you will respond appropriately. Open up as soon as possible and you will be validated. I am a 61 year old sales consultant in an essential business that hasn't been adversely affected by this. But I know many people who have, and hardly anyone who has gotten very sick from the virus. PLEASE, PLEASE read this and don't let the fearful, who do not have these facts rule the day. Fear almost always leads to the wrong choices. Good Luck! We are praying for you.Doctors real test data on covid19. https://www.kget.com/health/coronavirus/doctors-provide-differing-opinion-on-shelter-in-place-order/ This message was sent by wcour66@yahoo.com via http://addthis.com . Please note that AddThis does not verify email addresses. To stop receiving any emails from…
Orange	General	The curve is starting to flatten, we should give it another month to be safe

AMERICAN OVERSIGHT

St. Lucie	Healthcare	I'm writing to ask that Florida not be reopened too soon. I know everyone is hurting now with not being able to go to work or open their businesses. But, we'll All be hurting A Lot more if this virus is spread even more because restrictions were lifted too soon. I'm not asking for this to be the "new normal", I'm only asking for a month or two. Hopefully there will be a vaccine in that time or at least the virus will have run its course. We're not going to help our economy by getting more people sick, very sick, and more people dying. I know it's impossible but having EVERY loan or bills/payments of any kind deferred or attached to the end of the loan for two months would mean no one is worried about not being able to pay their bills and they would not stress about the state being shut down. Again, I know it's not possible, but it would answer the problem of people not having money coming in.
Suwannee	General	I am for re-opening Florida. I looked at the country of Sweden, they are doing good and they never closed down anything. I also believe, from some research, that this social distancing is NOT going to prevent anyone from getting the virus, just slow it down. After researching the CDC website I found the flu causes 30,000 to 60,000 deaths per year in America alone. PER YEAR - and no one raises a fuss about that...hospitals are not overrun by that, apparently. I suspect those that would like to see America fall may NOT want the economy to re-open. This virus is a tragedy, but truly, is the cure becoming worse than the disease? What quality of life will we have if we come out of this with so many lives ruined by economic hardship when we were doing so good before all this began?
Polk	General	It is not wise to reopen Florida until there has been enough substantial testing throughout the state. It is impossible to determine proper accuracy of the virus and whether we are "out of the woods", so to speak. Without becoming aggressive with the testing. I understand the need for a reopening of the economy, however if we do this without proper and concrete statistics we could end up being in a much worse situation with this deadly virus, that does NOT at this time have a vaccine.
Marion	Retail	When you open up dmv,'s and tax collector office will they provide shields for workers and make it mandatory that only a certain amount of people may enter the building at a time
Pinellas	General	Open knowing we all have common sense. Freedom to choose freedom to choose freedom to choose. Open with all the safety guidelines in place
Hillsborough	General	Everyone going out in public should wear a mask.

AMERICAN OVERSIGHT

Hernando	Professional Services	Before opening Barber shops and salons please consider the lack of PPE available to us to be able to follow disinfectant and sanitation guidelines as well as social distancing requirements. With hospitals still lacking in PPE supplies I'm not sure how we can safely open. When Access to basic supplies is still proven to be near impossible to obtain . I personally need toilet paper, pump hand soap and paper towels in order to operate at just the health departments requirements. Asking me to provide masks, sanitizer and disinfecting solutions is a great start, but first I need to be able to find them!
St. Lucie	General	My fiancé and I are essential workers who come in contact with people that should be staying at home. My children, fiancé, and I take every precaution to stay safe, healthy and at a distance from others. In our county alone there isn't testing for us unless showing symptoms and yet cases and deaths are still on the rise. Please don't open the state until more testing can be done for everyone not only those with severe symptoms. Thank you Charlene Blake
Polk	General	I would like to see you open Florida up again for business with the following guidelines: 1. If you are a high-risk individual take every precaution to protect yourself. 2. If you are feeling sick or think you may have been exposed to the virus, STAY HOME. 3.Whenever possible, maintain a 6 ft. personal distance. 4.Use common sense when shopping, going to appointments and visiting with friends and family. I believe that leaving the state closed will cause far more deaths (suicide, domestic abuse, leaving medical conditions untreated, etc) than dying from this virus. I also believe that our economy and small business owners will suffer losses much greater than anything this virus can do. Please let the people go about returning to a normal life. The sooner we get people exposed the sooner we can build up our immunity to this disease. Sadly some people will die, but if we do everything we can to protect ourselves and others, we can lessen that risk.
Hillsborough	General	In order to reopen and reduce public health risk, I believe that airports need to be closed so that community infection risk is mitigated until the pandemic has resolved. Secondly, all counties should require antibody testing and for those that have test results reflective of antibodies with no active infection, a license should be provided that allows for attendance to restaurants, malls, and other businesses in closed or populated business environments that follow CDC guidelines. Each business would be required to comply with ensuring all individuals in their establishment have this license. Those who do not have a license need to follow the restrictions currently in place with facemask requirement. This allows businesses to open with consumer confidence in exposure risk and protect vulnerable populations. Additionally, vulnerable populations should not be allowed to qualify for license until vaccination is administered or pandemic has resolved.

AMERICAN OVERSIGHT

Hillsborough	Retail	I think the state needs to re open slowly, but needs to start to help the economy. Hold off on places that would have a harder time controlling contact with people like; gyms. But smaller retail shops that's aren't considered essential should be allowed to open because this is how people keep their families fed. As long as they can keep the social distance rule in place and keep everything clean.
Orange	Professional Services	Florida is not ready yet to reopen. I believe we should follow the same route as the schools and just remain closed until we can really see this through. This is unfortunate but I'd rather be safe and broke than sorrowful. Flu season will be upon us very soon so let's just take our time to keep people healthy.
Palm Beach	General	Working ppl of fl gave up their incomes to protect the older ppl and our health care system Ho Now it is time for the retired elders to take responsibility for their health so ppl can earn a living
Miami-Dade	General	Forida is not ready to reopen.
Sarasota	Finance	I think we should wait ti open until mid-May and should be selective in what we open. Disney and Universal should nit open until June at a minimum and parks should be only 25%capacity. Do not bow to protesters because they are a minority of the population. I hope the Governor does what is right for all of Florida.
Orange	General	The state of Florida is not ready or prepared for this type of situation.
Polk	General	STAY THE COURSE DO NOT GET CRAZY AND MORE TESTS.
Miami-Dade	Education	Make a long term plan to make class sizes smaller so kids can have more social distance when learning. Open parks and playgrounds! Staying at home stunts social development of young children. Don't make them be responsible for saving the elders. Elders can take care of themselves!!
Brevard	General	If you reopen- it will be irresponsible. Is it that you don't want to pay unemployment? This administration has handled this pandemic very poorly.
Hillsborough	Education	We have daycare centers and we need to open if possible
Pinellas	General	Do not reopen the state. Are people's lives worthless to you? Get you unemployment system working and help people. You should also be working on universal healthcare. This pandemic has shown what a mess our for profit system really is. We have an older population in this state that needs to be protected. Don't let greed guide your decision.
Orange	Professional Services	Allows gyms and martial arts academies to open! We WILL practice safer distancing and standards than any other business or should be fined or shut down! Our fitness industry is dying and we NEED to open to help others and feed our families. The time to open is NOW!

AMERICAN OVERSIGHT

Lake	Recreation	I think at the very least, there should be a discussion on a gradual timeline for re-opening. This would be helpful for many service workers, especially those in the wedding industry, for example. So at some point, maybe in August, maybe we open gatherings up to 50 people or less. People could make decisions about paring down events rather than cancelling completely. However, I do not think it is responsible to issue any shelter-in-place orders without a blanket of compensation for the people. It is wrong to tell them to stay home without proper compensation. Many people just can't work during this time, myself included. If people can't work, they can't pay their bills. There should be some kind of freeze on rent payments until such time that people can regularly resume earning income.
Collier	General	There is no reason for panic and fear in my opinion when Flu numbers are much higher every year and we don't shut down our economy. We should be allowed to reopen Florida and for the people who don't want it open then stay home. I am 64 years old and have not been in fear or panic mode from the very onslaught of the Covid-19 pandemic. I am hardly ever even remotely sick at all and have been out every day riding my bike and walking. It's time we are allowed freedom to choose. I appreciate that Ron DeSantis didn't shut down our state until later but now let's re-open. At the very minimum let's be in stage 1 and open. PLEASE!
Seminole	Education	I will only go to public places such as restaurants, schools, churches, the theme parks, hair salons, etc. when I am able to easily access a COVID-19 Antibody test. Until there is a vaccine or a definitive cure I will not feel safe venturing out to these public places. We need to feel safe and comfortable that we are not being exposed to this virus. It spreads when people are asymptomatic, it’s not acceptable to put people at risk!
Duval	Retail	I’m an employer at a retail store and the government still hasn’t given us unemployment and if they are not going to pay us for unemployment then let us go back to because what are we supposed to do?
Palm Beach	General	I am very concerned that there are no Drs. or other experts on Pandemics named to this task force. With the number of Universities, Medical Schools, and infectious disease experts located in Florida, surely there were candidates that could fill this void? Everything I have read says re-opening only will happen when people feel safe and confident. This task force is a complete waste of time. Why would anybody feel confident in decisions made entirely by people perceived as benefiting from their own decisions? With the only representation being from the business side, there is no way I will consider any of their decisions as being made in my best interest. If inspiring confidence was the objective they have completely failed. If the task force is sincere about wanting to safely reopen and want us to take their recommendations as sincere, then I suggest they completely reorganize and put Drs. And medical experts on the Task Force.. until then, nobody is feeling confident about anything and definitely will not be following any of their recommendations. The task force should have been completely nonpartisan and it should have been packed with medical professionals. I don’t go to my local business for medical advice, I go to my Dr. Thats the bottom line.

AMERICAN OVERSIGHT

Pinellas	Finance	To reopen Florida you need to resolve the FL DEO crisis. The very workers you are depending on are being denied relief due to gross mismanagement. Now, we are featured on the national news. Your actions tells Floridians and the nation whether workers are truly valued in Florida. Please intercede with the Governor to speed relief to good, faithful, and loyal Floridians. Thank-You, Daniel
Pasco	Education	Please do not open schools until we have the ability to keep people safe without any doubts in our minds. Please wait until we have a vaccine or something is developed that will keep students, faculty, and staff safe. There is no way to keep children far enough apart at all times, especially between periods when passing in the hallways. I am a teacher and have 30 or more students in a class at a time and I have no way to distance them. We do not have constant access to soap and water and will not have an adequate supply of hand sanitizer. There is no way to keep surfaces clean enough to be sure there is no transmission of the virus. There are adults and students with underlying conditions, not to mention family members we would all bring the virus home to I want so much to be back in school. I want it for my son who will be in his senior year next year. But not at the expense of lives. Please be responsible with your decision. Remember you are taking the responsibility for human lives. Think of what you would want to send your family members into and what you would want them to bring home.
Pinellas	General	Please consider a full re-opening of the State, yet provide strong guidelines pertaining to those over 65 and physically vulnerable. The facts over the past 6 weeks support the following; (1). Our most vulnerable are in the categories stated in the 1st sentence (2). Our economic support systems (unemployment, State and Federal grants - loans - etc.) have failed the overwhelming majority of Florida citizens and businesses resulting in serious financial problems for most. Our unemployed must be given a chance to earn an income and our closed businesses must be given the choice to re-open (3). Anti-virials, therapeutics and other virus cures are now available for anyone seeking that assistance. Please remove all possibilities of the civil dis-obedience we have seen in other State Capitols. Follow Georgia's lead and allow the citizens to determine what is best for their individual circumstances. Thank you for your consideration
Broward Collier	General Recreation	Way too soon to open up Florida especially South Florida As a part time Florida resident, we travel back and Forth frequently. Please allow us to observe the stay at home order the way the rest of the permanent residents do. Go to the grocery store with masks, go for a walk, purchase carry out food from local restaurants, utilize the beach with social distance, fish, go to parks, use our kayaks. As long as social distancing measures are in force. The two week quarantine should be removed as long as we are fever free with no symptoms for part time residents. We respect all the work you are doing and stay safe. Don McNair Marco Island, Fl

AMERICAN OVERSIGHT

Hillsborough	General	Please!! Re-open ASAP. We need income. The state of FL needs tax revenue. We are ruining our economy over a very small % of our population. I'm compassionate and don't want to see people die - but we will devastate entire future generations. Companies are going to fail and it will effect future population. Please!! Re-open FL.
Palm Beach	Government	I do not feel that Florida should reopen for business because it will put more people at risk. I am 19 and not willing to have the elderly or my best friend with type 1 diabetes or my friends mom with asthma die because we can't wait another few weeks to reopen.....
Marion	General	Let people go back to work. Businesses need to open. there just needs to be always has needed to be a bigger push for if you're sick stay home. All jobs need to open!
Duval	Healthcare	It might be a good idea to maybe have a medical expert on the panel so someone looks at the situation from something other than just a monetary point of view.
Sarasota	Education	Go slow to avoid new peak. Follow presidential guidelines!
Polk	Healthcare	I am a Healthcare professional and I am asking you to please be very careful in this process. I know the general public wants to open up but they have not seen how gravely ill these patients get in a short amount of time. I understand keeping things closed is bad for the economy but we have tested so little of our population to truly see how bad the threat is. We need to test more people and have more numbers before we proceed with anything.
Pinellas	Professional Services	Do not open the State, lets focus on keeping people safe. At very minimum follow thr guidelines set by Dr. Fauci!
St. Lucie	General	I think we can be responsible about re opening the businesses. Tell restaurants to use every other table and keep people apart. Let stores open up and people can wear facecoverings and stay 6 feet apart. Beaches and parks can open. With the understanding people must social distance and not crowd together. The elderly and immunocompromised can be cautioned to stay inside and avoid unnecessary travel until there is a vaccine or an area has established herd immunity. Schools can open but less children per class so they aren't crowded together. Good hand washing and cough etiquette can be taught. If sick stay home. We as a state can't stay closed till a vaccine. Yes there will be risks but there are risks everyday normally. Just be causious and sensible.

AMERICAN OVERSIGHT

Seminole	General	As a Manager in the Hospitality Industry, working on International Drive in Orlando, Florida, there is probably no area that has been hit harder. I would not recommend opening up the state at this tune. I know how much of a service industry our beautiful state is, I've lived my entire life here, born and raised. Graduated fruition UCF, and have been in the hospitality industry for over 25 years, over 18 managing. I just don't believe putting our elder population, which our others mothers, fathers, grandmothers, and grandfathers at risk. We open up the state allow people to get back doing what they do while this virus is still spreading at the pace that it is we are putting many at risk. Trust me,I am an ancient gym goer, I want the gyms open as soon as possible. But I can't help but think about the others being put at risk until the spread of the virus really drops. It will be a much worse situation if we reopen then have to shut it down again. We have people that have it and spread it, not even knowing they have it, because they have a strong immune system. This is putting those less fortunate in terms of their current health condition at risk. Sincerely, Michael Shearin
Orange	Tourism	Our state has been greatly impacted by the crippling of the hospitality industry. I am part of that industry and have been so for over 20 plus years. I would like to see Orlando lead by example as we have done many times over in the face of adversity and crisis. We need to send a message to our citizens, our state, our country, and the world that there is life beyond this pandemic. This is a perfect opportunity for all our travel partners to join together to roll back pricing so that families can afford our hotels and theme parks. We need to develop practices if sanitizing the attractions, the food venues, and our resorts. We need to put in place a monitoring system for those coming into the theme parks and provide our guests with knowledge, as well as our team members to assure each every measure for safety is taken. Please open our state and our tourism industry by leading a campaign for a safer and secure future for our families and our friends across our beautiful state from our ports of call where our cruise line partners call home, to our sandy beaches, to our fantastic dining, and our recreation facilities including our theme parks. We cannot be afraid to face tomorrow. We must be bold and brave... we must bask in the sunshine and let it renew our souls.
Volusia	Healthcare	I think it is too soon quite yet to reopen the state. I think we need a few more weeks of seclusion.

AMERICAN OVERSIGHT

Brevard	General	The people of Florida seem to be in disagreement like many things. I think something that people can agree on is that they wish to resume their normal lives as such. Small businesses are doing just fine with people ordering take out in Brevard county. So it seems to always be packed with car lines. Small businesses have received government funding so to reopen because small business is hurting is not so accurate. In my opinion I think the state of Florida should slowly re-open. But with the reopening comes restrictions. Tourists should still not be allowed to enter the state of Florida and it should be residents only and strictly enforced. Florida is a destination to MANY and especially during the summer months. Even if my opinion gets over looked please diligently think about all options and pros and cons. It could be your family member that gets sick or does from this virus. Things aren't even obtainable to keep ourself safe like hand sanitizer and lysol. Heck even toilet paper. So please make sure everything is well stocked first and obtainable before decided to re-open the state of Florida. Thanks for listening.
Hillsborough	Government	Please reopen Florida. The death rates of this virus are inflated 1. Because not everyone has been tested, 2) People who may have died from heart attacks or other who then tested positive for the virus are being classified as coronavirus. The long term impacts of keeping the economy closed, schools closed and sheltered in place are far worse. Prisoners are being released and committing more crimes, our 401k and retirement plans, bankruptcies, increase in child and spousal abuse, increase in drinking and related diseases, obesity. I could go on....
Brevard	General	OPEN quickly for people to have the opportunity to earn money for food and bills. OPEN for businesses to employ people, keep all economies going. ALLOW those who wish to stay home if high risk or in fear.
Palm Beach	General	My opinion is that each county has to be treated differently. Masks should be mandatory in all areas to protect one another. Not wearing one is exposing germs to others. Also temperatures should be taken before entering businesses. I don't feel Palm Beach county is ready to open. If the beaches open , distancing will not be followed ! Maybe golf courses could open sooner . Really not sure how to keep pre schoool age children away from each other at a summer camp setting. Many have grandparents at their homes which can be detrimental to them. There are so many factors to consider , however our positive numbers keep rising in this county . Until there is a definite downturn is numbers , I feel we may set ourselves back if things open too soon. Thank you for letting me voice my thoughts.

AMERICAN OVERSIGHT

Polk	Finance	We need to open back up!!! The people who got lost in the system that are still waiting for unemployment and anything and everything else like myself have fallen so far in debt it's going to take a miracle to get out of!!!! I was laid off on 3/20/20 and I have not received any info on my unemployment and bc I do owe a debt with child support I didn't even get a stimulus. I'm scared! I'm broke and I worked so hard to be where I was! And everything is down the drain! I'm mentally tired and I just want to go back to normal..:
Orange	Tourism	Have Disney stop security from putting their bare or gloved hands in every persons bag, purse, etc. and touching all the items. They are safer with gloves on but their hands digging into bag after bag puts the public at risk. They touch everything inside and then move onto the next bag spreading germs along the way. Maybe they should join this century and install x-ray screening machines like their biggest competitor has been doing for quit some time. Just a thought.
Bay	Tourism	We own a beachfront vacation rental and lost all of our May rentals. Bay County has very few cases of Covid. Please consider opening up vacation rentals in Bay County. The area is so dependent on tourism. Give people a chance to make up their own minds about whether they want to risk travel. Let our area be one of your test areas. See if people will follow social distancing guidelines. No matter when we reopen, the virus will be among us. We can't stay locked down forever.
Broward	Government	Please consider ending this shutdown as I fear we have reached the tipping point where the shutdown is now causing more harm then the virus . Our hospital infrastructure is good. I would also like to see more public education about why there was a shutdown as people seem to think it was about them not every coming into contact with virus! We have PPe we have beds and we have nurses! I am one of them and I my job has been negatively impacted Warmly Katelyn
Jackson	Education	Greetings, Please base all decisions on what is best for the taxpayers and not corporations. Please do not take a meat axe to Public Education Funding. This incidence has proven what school mean to a community. The JCSB has provided tens of thousands of meals to our communities. Teachers have worked tirelessly to keep our student tethered to their education. Stop sending money to shady charter and voucher schools. Save another billion or two by abstaining from testing for the next two school years. Also, y'all need to do a whole lot better by our state workers.

AMERICAN OVERSIGHT

Hillsborough	General	Hi, I think that the governor and task force should not begin the reopen until at least mid may. I am not a dr or scientist, just an average citizen who is a data nerd and works with data in my job. It just concerns me based on the data we have and more so the data that we DO NOT have that we are going to start reopening without a more extensive and robust testing program. Right now you can only get tested if you have symptoms but we know that there are a large amount of people who test positive and don't have symptoms. Once we have a robust testing program in place I understand slowly reopening but feel that we are just not there yet statewide. I know your jobs are not easy, thank you for your work for Floridians.
Baker	Food	Florida's economy needs to get started sooner than later. At least on a limited basis.
Broward	General	Open Broward up, already. We've been lied to from everyone at WHO, the CDC, the FDA etc. What happened to "only 14 days so hospitals aren't overwhelmed?" Sure just keep moving the goal posts and they'll be no small businesses left in this county. This was ass-backwards from the start, you quarantine the sick NOT the healthy. Until March 2020 I thought I lived in a free republic, not Cuba.
Duval	General	Nail salons and dog groomers should be open on a limited basis.
Lee	Government	No, not yet. I feel it is to soon. Let's see exactly what the virus is doing, as in still spreading or not. If not still spreading, than in June 1st. would be a very good time to concider. An increase in people getting the virus would be bad, if we open up the state too soon. Be safe not sorry not sorry. Safety first, for all.
Lake	Tourism	It is vitally important that our government come up with a throughly thought out plan! Working at Walt Disney World, I miss making magic for our guest and can't wait till the day I can start doing it again, however I feel if we reopen too soon, people from areas in our country and around the world that are still deal with large out breaks will come and our second wave will be even worse than our first. This is definitely a time to error on the sude of caution even if it is to an extreme!
Sarasota	General	The current open beach policy is only good if you already live on the beach. As a 70+ disabled veteran who lives 3 miles from the beach, not being able to park my car or sit on the beach 10+ feet from other beach goers is discouraging. What's the harm when Venice is not known as a young person destination. Its demographic is mostly gray hairs like me. Let us sit and enjoy the waves and sunsets from a comfortable beach chair, distanced from others.
Broward	Administrative	The go enter needs to fix unemlyment. People are begging for food as you are refusing to address the problems. Stop worrying about maki g the president happy and give the people their money so they can live with respect
Pasco	Education	If we closed schools with MUCH LOWER Coronavirus numbers then it makes no sense to open schools (now or in August) with MUCH HIGHER Coronavirus numbers. There are too many lives at stake.

AMERICAN OVERSIGHT

Polk	Government	If you can guarantee or promise people that it's actually safe to reopen then yes I support it. I know people need a stable income and have bills to pay, but I know you can't say those words to us Floridians so I don't agree with rushing back to open the possibilities that it's not over or has it slowed down enough to open stores. A shark can still sense blood in the water just because you don't see it doesn't mean we are safe to just jump on in.
Pinellas	General	Generally feel it's to soon to open up beaches for full activity as well as bars/restaurants. It would put an unnecessary strain on police to try to enforce social distancing guidelines
Orange	General	I believe It is too early to open up the state and by doing so would jeopardize the lives of Floridians. We are a tourist state and people from all over the world come here. FL might be flattening the curve but many other places are not. We see on the news everyday people protesting, not following the rules, risking the lives of others. It's sad to be living near people who don't care about their neighbors The governor needs to fix the unemployment payment situation and get people their money and that will help calm people down.
Flagler	General	Reopening the State of Florida to 100% operations would be negligence. As of today there is no vaccinations for COVID-19 and prematurely opening Florida would increase the spread of this deadly virus resulting in more deaths. Economics should not be more important than humanity.
Duval	Transportation	It is too soon to open up Florida, especially daycares and schools. Florida has an elevated population of individuals deemed High Risk for severe complications of COVID-19. Is the Florida government ready to have thousands of deaths on their hands, by making knee jerk reactions? The safety of Florida residence should be the priority over finances. Additionally, make the unemployment website a priority. I am a manager of a major airline and my team is suffering by the lack of unemployment assistance. Our company has reduced employees hours by 25%, and the individuals that voted you into office are suffering. Our counterparts in all other 49 states are receiving UI benefits, while those that live/work in Florida continue to suffer. Please follow suit with your counterparts in other states and pay those in financial need. Do the Right Thing, no the popular thing.

AMERICAN OVERSIGHT

St. Johns	General	We need to get things open now. People are suffering not solely due to the virus. There will always be virus or something that can kill. We can not continue to hide under our beds. People are losing their lively hoods. We are getting to a point where we may not be able to return. I am very concerned about peoples mental health. We already know abuse and suicides are increases. This is not acceptable. We are trading off how one person may die for another. Death is death but if we make the situation worst then what. I dont want anyone to die but it is a part of life unfortunately. The media has scared people way too much. Sure this is scary but now will people go out even if you do open up businesses. Our numbers in Florida have been low this whole time. We are testing so many people. just because the number of positive goes up does not mean it is getting worse. We are just confirming who has it. I guarantee if we tested like this during flu season our numbers would be off the charts. Just because you get it does not mean it is a death sentence. We all know that the majority of people who get it are just fine. I strongly believe 2 things , we will find out it is not as deadly as we thought as we eventually test every one and our warm weather is what helped to not make us a new York. The first thing i looked at when this started was our temps compared to NY. They were in the 30s and 40s while we were in the 70s and 80s. As the leader you have done an excellent job at keeping us safe now you need to ensure people it is safe to go back out. I think those who we know are at risk need to stay home but the rest of us do not. The data has shown we are fine and we will be fine. Will it come back it the fall, yes. It is never going to go away but now like the flu we understand it. Time to move on. I am ready and not worried. Please open florida back up now.
Brevard	General	Being a person with many underlying health issues I do not think we are ready to reopen I think we need to wait until we are on the downward side of the curve. Social distancing has saved many Floridian lives. Let us NOT risk more by opening too early
Lee	Government	Do not open now wait till June 1st
Lee	General	Do not reopen yet! My two biggest concerns are if you reopen it requires a lot of people to return to work but what do we do with our kids? How is the kids being unsupervised going to impact our already tired emergency response and medical persons? Their exhaustion is my other concern. The numbers are far from under control. Listen to scientist and medical persons, not people only interested in making more money! Treat people with more kindness and compassion!
Citrus	Recreation	My thoughts are just try to start opening the parks & bike trails.. schools stay closed, restaurants & bars stay closed.. we are still in danger of some people not even knowing if they have the virus , this is more so too early open everything in our county, reopen very slowly as again not sure who really has the virus & not complying with the Stay at Home order that's already been in effect.. I know people want to work but get back to work & be safe & secure.
Pasco	Tourism	I think that floridians should be able to travel within the state and be able to secure vacation rentals within the state.

AMERICAN OVERSIGHT

Brevard	Food	I'm very sure that you won't read this. I'm not going to rip into you for the FL DEO UI debacle, but please understand that when you won that election, that meant from that point forward that the buck stops with YOU. You have let your state down and you has better do everything in your power to make it right. You, as the Governor of Florida, are responsible for its citizens. Act like it. I will no longer claim to be proud to live in this state. My husband and I are both "essential" workers, he in automotive and myself, I work in a local Melbourne restaurant. I'm not a Mathmetician. BUT I do pay attention. I'm concerned our numbers in Brevard County are not right. I am concerned we have not tested enough considering the issue of asymptomatic carriers. I'm out in public...I see people not being careful! I have to stay at my job part time and potentially expose myself to keep my job. We have a teen daughter at home. Her health and safety are our #1 priority. She's depressed. She misses her friends but we, as a state, are not ready. The majority of the people I know do not have the leave of confidence needed for us to properly reopen our businesses and state. It has to be done RIGHT. It can't be done "half-assed." MY family and YOUR family DEPEND ON IT. I'm not against reopening, but PLEASE listen to the health professionals too? PLEASE.
Brevard	General	Do not reopen Florida, until we have a sufficient reduction in covid 19 cases over time. (around June 15.). Provide access to covid 19 testing to about 25% of the Florida population to determine real extent of covid in Florida's population. Take care of the most vulnerable Floridians. Take immediate action on the prison populations to keep the covid in check. Do something about Tomoka prison, where there is an extremely high covid outbreak.
Seminole	General	Please reopen the economy. There are over a dozen anti-body academic studies and journals that confirm this virus has a very low mortality rate. The public health policies based in one size fits all approaches and fear of the unknown, are not only illogical, they are having a real negative impact in our lives, mental and physical health. The cure should not be worse than the disease. What's more, the data confirms that this trampling of our civil rights is unjustified. Come May 1st, my family and many we know will no longer comply. We'll do our part to avoid contact with the most vulnerable populations who would be severely impacted by the disease, but it is they who should isolate themselves. How many have to lose their livelihoods, starve and or lose hope before we snap out of this?

AMERICAN OVERSIGHT

Palm Beach	General	We need to reopen, essential workers are not getting or dying from covid19 by the handful my self personally have been out of work 37 days no unemployment filled a claim and its not even been processed because it says the year 2014. Social security wages are slowly deleting another month that will be non existent and the people at risk now will not have that. We need to reopen to the people that are healthy and able to work this is America if I want to go to work men died for us to have the right. If you want to stay at home you can if not during this time the grocery stores have been full wal mart is the most dangerous place to visit one see all the people their workers are not dying by the handfuls or the people their. Reopen us for business it's a crime at this point and the people in that state are suffering.
Hillsborough	Tourism	At this time has there been any input from executives at Disney regarding reopening the parks, and what sort of timeframe may we be looking at for a phased reopening of the theme parks?
Brevard	General	Do not reopen until their is proof of higher immunity within our county. Do not open state again until June. Do not take a chance with a second worse way of covid.
Sarasota	General	I do not feel that Florida should re open right now. We are still seeing an increase in COVID cases. There are people that are still not taking social distancing very seriously or take COVID very seriously. I am a mother with 2 young kids and I am severely immunocompromised to a point 2 doctors told me if I contract COVID I will die. If the state reopens my husband goes back to working with the general public on a daily basis. Though we have been very smart and taken every pre caution there is still a chance of him getting COVID and even bringing it home. What about households with chronically sick children? Why should they have to jeopardize thier Children's lives? Everything that is essential is open. People have what they need. For the unemployed, they need to be getting thier unemployment hassle free, sounds like that hasnt been the case. Please take into consideration that COVID has no limit. It doesn't care if you are 35 or 65, healthy or sick. Please I am asking you to leave the stay at home order. Some of our lives are dependent on it.
Broward	General	Listen to the people not the politicians. We aren't ready, we are scared. You open you things up too quickly people will get sick. You open up things when people don't feel say, those places will sit empty. For the first time ever, can we get this right.
Hillsborough	Construction	Re-open Florida. It should never have been closed in the first place. The governments' reaction at all levels (local, state, federal) went too far, ruined the economy, and probably did not have any greater effect in containing the spread of the virus. Monitor and mitigate where there are greater areas of virus infections and let the rest of the State get back to work.
Palm Beach	Healthcare	Not yet,
Duval	Government	Please open a DMV for titles. It could be by appointment only. I've purchased a mobile home for my mother from a non dealership. I have the title in hand just need to have it transfer to my name. Thanks Kathy Walker

AMERICAN OVERSIGHT

Pasco	Healthcare	Open hospitals to elective surgery. Most people do not have any idea what "elective" means. Healthcare industry is having serious financial problems, broad layoffs, furloughs and closings. Something must be done to keep the healthcare industry viable. It is dying from the inside out. Open restaurants and recreation facilities like bowling centers with occupancy limits, outdoor use, and some common sense. I am 65 years old, work full time and refuse to live in fear.
St. Lucie	General	I do not support a general "re-opening" of the Florida businesses without appropriate testing regimes in place as well as the first requirement of the federal guidelines which call for a 14 day decline in new covid-19 cases. No state in the union has met this criteria and certainly not Florida. The state has to 1) fix the disastrous unemployment process and/or 2) start to provide grants/loans to businesses similar to the federal SBA paycheck protection loans. Selective openings of beaches in Jacksonville for example could be ok as long as the public coperates but certainly you would not want to re-open beaches in Miami while the virus is still raging down there. This pandemic is far from over despite assertions to the contrary from some Florida politicians. Don't be stupid. Find the funds to help those most affected and protect the rest of us by staying under the coronavirus restrictions that have shown to be effective worldwide until we see the "flattening of the curve" as in California, Washington State and countries such as New Zealand. Dollars can be replaced. Lives cannot. The statement that the "cure cannot be worse than the disease' is a specious argument. Please don't listen. FYI I am a retired nurse practitioner with 20 years history working in public health in Florida.
Sumter	Finance	We need to get back to some normalcy that we can. If we continue to be out of work the economy is going to be to far gone to fix. People are worried about losing houses and cars and 401ks. People that I have talked to are getting depressed. It's time to open Florida
Brevard	General	Please open the State back up. There are thousands of businesses that need to re-open. This is no different than the flu. It was blown way out of proportion. If people want to continue to quarantine then they can do so on their own. Thanks
Palm Beach	Recreation	Open all outdoor activities now. Use evidence of reduced transmission risk outdoors in warm temp & high humidity to justify. Means S. Fl beachs, parks, golf courses open. Do it by next weekend. Open outdoor diners, restaurants now. Restrict indoor capacity for restaurants if evidence actually supports this. No nazi police enforcement of anything. Inform the public of actual risks (not NY numbers) and let them make informed decisions for themselves. Explain results of Miami antibody test (mortality actually 0.17) to reduce fear. Explain this widely and publicly.

AMERICAN OVERSIGHT

Duval	Recreation	I would like to thank the governor and the task force for all of the week they have done during this crisis. I believe the crisis has been handled well, however it is time to start opening back up. In terms of recreation, I believe that gyms and small businesses (hair and nail salons, tattoo parlors, etc.) should be able to open now. I do believe we should still practice social distancing in these areas and limit the number of people inside (similar to how we were before the lockdown was initiated). My, as well as many others, mental and physical health has deteriorated a large amount and we are ready to get back to normal. Suicide and domestic abuse rates have skyrocketed and they will only get worse if businesses and beaches do not open soon. I hope you do read my message and truly consider what I, and so many others are requesting. Thank you again for your time. Please open up the state.
Palm Beach	General	US HIGH SCHOOL STUDENTS WANTS TO GRADUATE AND AT LEAST HAVE A PROM. A lot of kids spent over $800 for that we won't be having. It's our last couple of weeks in school at least let us have it and a TRADITIONAL GRADUATION.
Manatee	General	I feel it is to soon to open florida. With other states opening others are going to flock to Florida. Our numbers are going to continue to grow and florida residents are subject to greater risks. Please hold off a little while longer. It's not about money, it's about lives.
Pasco	Healthcare	I believe a gradual opening of the state two weeks following a decline in Covid-19 would be acceptable.. I could see opening Restaurants, gyms and nail salons, because the owners could control placement. However I would also anticipate a pike in Covid following the opening of these facilities. I would then open barber shops and beauty salons., theaters. Mandate that people wear masks when out in public.. Thank you for asking for input from the public. You're doing a great job in a difficult situation.
Pinellas	Professional Services	I would like to return to work but or until healthcare experts say it is safe to do so. It is not as important for me to work as it is to keep myself and my family healthy. Additionally, the decisions has been made for children to not return to school for the remainder of the year. Therefor, we should be encoring the stay at home prefer until May 29th when the school year ends to allow parents to finish the curriculum.
Columbia	Education	I work in the Baker County School district and have been allowed to work from home. I am 55, have diabetes and high blood pressure. I am concerned about going back to soon but understand that we need to get the economy back working. Is it possible to test all the essential employees first and then see how many are infected with no symptoms or had a mild strain and have recovered? I pray for safety and wisdom for everyone tasked with making such important decisions. Thank you for all that you are doing.
Osceola	Tourism	Osceola and Orange County should not open up.

AMERICAN OVERSIGHT

Brevard	Manufacturing	I am in aerospace and will be returning to work later rather than sooner. It is not safe. Maybe people would listen if there was a medically minded person or scientist on the "Re-Open Task Force". People who own mega resorts, Walmart, drugstores, and money makers do not speak for the working class who are to "re-open Florida" at the risk of their own life. FIX THE UNEMPLOYMENT SITE. Pay people from Day 1. Furloughed aerospace employees are NOT ABLE to get benefits now because we have to provide employment that we aren't looking for.
Hillsborough	General	My thoughts are coming from so many with compromised immune systems being that I jand family with MS. I feel strongly that opening up any business where you cannot serve your client further than 6ft. apart isn't safe at this time. I also feel opening places for large gatherings is not safe. If we start altering large gatherings in business then people will feel even more empowered to have home gatherings. I realize we need people to have jobs back but if it's just going to cause s possible spike in The Virus again we have gotten no where.
Alachua	Education	I believe public health and safety should be the number one concern as Florida reopens. Businesses should be opened in order of risk. It is impossible to maintain social distance during a haircut, but easier in a bookstore or yarn shop. I do think that medical services are needed. My daughter had a seizure and cannot have an MRI right now. I'm a teacher and I miss my students. Online teaching is just not the same as being in the classroom together. As much as I would love to be back in school, please remember that many teachers and support personnel are at high risk for several complications from COVID-19. Additionally many children live with grandparents, another high risk group. Please remember that public health is more important than money. Thank you for your work in getting Florida open again.
Miami-Dade	Healthcare	I am a 68 year old women living with my 69 year old husband in Kendall. We have lived here since 1978. I am not comfortable with the idea of opening up our state. It is too soon. There are still many new cases in my area. I do not know anyone that has been tested including myself and my husband and the majority of our friends are in our age group.
Polk	Recreation	My suggestion to fully reopen the beaches. We go to Clearwater Beach often and always rent a 2 person cabana. For anybody that wants to just set on the beach they must rent a cabana. You are not allowed to bring your own chair to the beach. The cabana’s could be spaced out for social distancing. This would limit the amount of people on the beach and also add a little bit of revenue to the city.
Palm Beach	General	Please strat open the economy with control and safety asap.

AMERICAN OVERSIGHT

Orange	General	Opening places before June is asking for a second wave of people getting sick and potential deaths. We need to focus on getting people tested for the antibodies and go from there. Nobody needs a haircut or to go have mimosas at brunch with the girlfriends that badly. Also, with school now online for the remainder of the school year, many parents may find themselves scrambling for child care if they have to go back to work. It's not the most important aspect but something to still think about.
Lee	Agriculture	I work for a popular landscape company here in fort myers and I think it's ridiculous to start opening things up again. I haven't seen people wearing masks or social distancing. The gas stations the grocery stores, here in the Iona area we have 3 Publix's that cater to our area and all have had reported cases of covid19. People tie there boats up on the beach and are laying out and hanging in groups on the Sanibel causeway islands, people just aren't that concerned. It worries me to open everything g back up again
Polk	Recreation	I am in favor of opening up parks with proper social distancing. Not everyone has nice areas to run and enjoy the great outdoors at home. Also, has elective surgeries started again?
Broward	Education	For schools reopening in the fall, classsize, carline, cafeteria, and PPE has to be a major factor. Classes with 20+ students and a teacher would by a virus breathing ground. Not everyone will have access to PPE or even home made versions to get them through the normal school day. Even the carlines have to be reconsider because staff open doors for students , shake parents hands, etc. The cafeteria has to have 2 grade levels at a time that's approx. 300 students in our school. Too many individuals will be gathered together at one time. Everyone would need to wear gloves and mask everyday.
Hillsborough	General	The infection rate is continuing to grow in Florida and even considering reopening the State borders on criminal.
Palm Beach	Retail	I am a small retail business owner in Boca Raton. I have 9 employees that depend on their jobs to support their families. I've been forced to close because of the virus. I applied for the PPP program the same day it opened, but we weren't one of the lucky ones. I am paying my staff out of our reserves so they can pay their bills, but the money is running out. I don't know what to do, I love my staff like family. But we need our business to open so we can try to catch up. I want them to have jobs to return to, but if we keep depleting our savings, I'm not sure what it'll mean for us going into the slow summer months when I usually count on those reserves to get us through. Please, please reopen the state. Have the old and the vulnerable quarantine, let the rest of us out. We need to work and resume life.
Collier	Healthcare	Nothing should open til there's two weeks of no new cases

AMERICAN OVERSIGHT

Clay	Finance	I am an essential employee and am very lucky to go to work to provide care for the injured and being home my paycheck to continue to provided for my household. The economy has to open back up I watch these people struggle. Even though we are working on unemployment , tax checks food banks, none of this happening fast enough. I understand it's complicated but businesses are essential. Leave the bars closed the big grandstands empty but open up with restrictions for safety to all of these other businesses. One person in a place getting a tattoo won't be the spreader. Floridians know the risk and for the most part I do believe they will take precautions Open May 1st . and if needed keep those hard hit areas closed like broward Miami dade. ... a car dealer is essential? but getting an actual hair cut is not? Fyi your doing the best job in a very difficult situation
Pinellas	General	Do not reopen this state, you must be stupid, listening to donald trump will get the people of this state killed, close the beaches you morons. Fl has not peaked yet from this disease and will resurge if you open to soon. do you want more american lives ended because you reacted poorly. Even listening to the public is stupid, listen to doctors, and scientists .
Brevard	General	The science tells us there is much unknown about this virus but a likely second round. The Governor's job is to make the best decisions for the safety of the citizens whom a majority are elderly. The right decision is to stay closed as long as possible. I live with my elderly father and my 5 year old son who is immunocompromised. If things reopen I will remain sheltering in place. If nothing else I hope their are options to protect our loved ones should we choose.
Palm Beach	General	Please re-open beaches in Palm Beach county. Please also allow businesses to reopen. Social distancing should be maintained, so eat in restaurants and bars will need to adjust accordingly. Same with golf and tennis. Please continue to encourage -- and encourage businesses to encourage / require -- use of masks. But, finally, don't FORCE people to wear masks. You can't fix stupid, and stupid people will continue to be stupid.
Hillsborough	General	Reopen economy. Shelter in place is a hazard it weakens immune systems. Far more people/businesses are suffering from the closure than ever will from covid19. Closure is killing Florida. Two words Herd Immunity. I'm 48 with heart disease, cancer survivor, and border line diabetic. I'm an essential worker been in it since day one. Working 55hrs a week delivering essential supplies to families across Florida. I frequent grocery stores 4 times a week for my family's food I frequent gas stations for fuel for work and personal vehicles. I also order takeout from restaurants. This closure is doing more harm than good. If I with all my under lying conditions can do it so can others.

AMERICAN OVERSIGHT

Sumter	Recreation	Hello, Please open all of the Florida state parks ASAP! My hope is that the park rangers have taken this down time to perform ALL of the deferred maintenance and the restocking of cabin amenities. Thank you. Rodger "Skip" Breese
Brevard	Retail	From my point of view here in Brevard County I feel opening the retail stores with caution meaning wearing masks, social distancing would work. Grocery stores have more people than the retail stores have shopping. The retail stores need to unload their seasonal merchandise now & create sales tax for the state. Holding back & not opening serves no reasoning. People are being very cautious when in stores so opening up the retail is what the people & state need now. Thank you for your consideration Debby Keating
Pinellas	General	i am a mother to 3 children , a mainline worker for a mcfonalds inside a walmart and have been in pinellas county my entire life . everywhere i look i see we are flattening the curve we at one point were close to 10/11 percent of posetive tests ... as of 4/25/2020 we are at 9.2 percent . we are doing something right . do i think we need to open everything up immediatly NO , however i do believe we need to open up those that can safely open up ... maybe more retail stores , malls , elective surgeries , pools , parks .... maybe not the playgrounds yet but the parks , pools , this is killing us more then Covid is , my ablitiy to provide for my children has been cut in half unemployment is no help as you cant even get through , millons of us havent gotten our stimulus yet as the portal for it is severally broken . we need your help we are willing and want to go back to work , i think we are ready for phase 1 of the presidents plan .... maybe phase 2 in june .

AMERICAN OVERSIGHT

Brevard	Government	I am an attorney in the Florida criminal court system. Our court system is important and I think the current decision to run most courts on minimal operations for essential proceedings only has been working pretty well. I am worried that we will rush right back into crowded courtrooms in the beginning of June when courts are scheduled to reopen. I think it would be helpful to put significant limits on the number of people allowed to be in the courtroom at the time. Currently, on days with busy dockets like arraignments, my courtroom can be very full. Many strangers have to sit right next to each other to wait for their case to be called. It would be impossible to keep six feet apart on days like this unless not everyone is allowed to be in the same room at once. Another big day in criminal court is docket sounding, also known as pretrial conference (a status date to see which cases are ready for trial where there are routinely over a hundred cases on the docket). I have heard of some judges long before this crisis conducting a virtual version of this court proceeding. Attorneys ask for a continuance or to set it for trial or plea via efiled motion, and State and defense are to communicate with each other through email/phone before this happens. This would not only be efficient, but also safer! Finally, in my circuit we have been addressing inmates with videoconferencing tools instead of transporting them from the county jail to the courthouses. I believe this should continue for at least a few months to eliminate the possibility that an inmate could contract the virus from court personnel and introduce it back into the jail.
Broward	Tourism	With all due respect it would be foolish to reopen South Florida at this time. All the hard work of staying at home will be for nothing if we open businesses especially businesses such as massage places, nail and hair salons, tattoo places, malls these are businesses where the CDC guidelines cannot be applied. This virus will flare up again and we will have more DEATH'S. Yes it's hard not having a paycheck but you won't need one when you are dead, so let's use some common sense and do this right. This is not about the popular vote this is about doing the right thing for the Florida Community.
Pasco	Healthcare	We still need to be cautious. I am working with social distancing measures put in place. I don't see why everyone shouldn't be able to work with social distancing measures. My workplace has put people on shifts, so we aren't all in the building at the same time. Those who can are working from home. There is lots of cleaning going on, and we must stay 6 feet away from each other. If people can follow those rules, they should be allowed to work, if they can't follow those rules, send them home! Honestly, going grocery shopping scares me more than going to work.

AMERICAN OVERSIGHT

Pasco	Food	I think waiting to much longer to open is gonna do more harm than good. I'm a registered Republican and small business owner for a mobile DJ service specializing in weddings and corporate events. Not only am I out of work but I also didn't see a dime to help my business stay afloat. I take care of my elderly mother as well. Although I have money put aside, I'm exhausting my savings and honestly cannot survive e much longer. Many more ppl are in the hospitality business that are hurting worse than I am. Our Florida economy leans a lot on bars and restaurants and I feel we need to take action to return to normalcy soon or face an even bigger problem than this virus. Elderly and high risk ppl should remain inside but us healthy, hardworking American need to return to the dignity of work. I have faith that you will make the right decision for us.
Hillsborough	General	Thank you for providing a portal for comments. First and most it has been a trying time with the Covid 19 and unemployment challenges, but needless to say it was to be handle as it has. My two concerns as follow, when Tampa reopens and the virus is still in our area, how can we maintain a distance and mask covering when it has not really worked since the stay at home order? When I go out to shop for food, I see people gathering to close and no protection wear. I went to take a walk for the first time in the Riverwalk and people were too close for comfort. When the restaurants opens, what assurance do we have that the distance will be monitored? I am for opening, but there needs to be order in place for our protection, I am a senior and with health issues. The other matter is unemployment, how can one person that filed in March has not received payments and another person who filed April 10 has already received the $600 and the $275? I filed two weeks ago and know it will take a bit, but the scenario mentioned makes no sense. Please help the people who put you in office, we need assurance on these matters. Thank you. Gloria
Broward	General	As an RN, I strongly feel no decisions should be made without the input & recommendations of medical professionals. They are the ones who are qualified to know best practices to control infection spread.
Columbia	Government	I have been a citizen of Florida for 35 years I do NOT want our state to open right now. We need to do this slowly and with science backing our decisions. My elderly mother, aunt, grandmother, etc. live here and I don't want the chance of infection to rise and they pay the price, just like the third of the elderly that make up this state's population. I myself have a compromised immune system that puts me at higher risk as well as two small children. I implore you to move slowly. Keep the beaches and parks, state and otherwise closed. Also, Governor Desantis, raise the unemployment rate. It's an embarrassment that we don't help our Floridians properly during this time. In conclusion, please do what is right and safe.
St. Lucie	General	I think we do need to work on opening back up, however I believe it needs to start slowly. I believe south county, Palm Beach, Broward and Miami/Dade is not there yet. Meaning start in the areas where the counts are low but for now hold off on south county. The last thing that us needed is resurgence.

AMERICAN OVERSIGHT

Pinellas	General	I think it's important to start allowing business that can safely reopen and follow social distance practice. For restaurants and bars, I think you could lower occupancy and have patrons be spaced apart. I also think that hours of operations should be shortened to allow ample time for Cleaning. With so many people that haven't received any types of payment in almost two months the ability to go back to some sort of work or have the ability to find temporary work is very important. Parks and beaches should also reopen with distancing measures in place as it's important for individuals to be able to have places to exercise. If you look at Sweden they didn't have a total economic shutdown and are in the same place , Florida is. I believe if you tell people to stay home if they are at risk, let those that aren't start going out with mask and protocols in place.
Marion	General	We need everything to open back up. It is not fair to anyone. So many want to go back to work. Local businesses are failing. It should be a choice to stay home or not. This should never have been enforced even loosely like this. So many that say they are taking precautions, are doing so in the worst way. With miss use of all protective equipment. So they mine as well not even use it. Please it's been long enough. Basically since March 17th. That was the 5pm start. Then quickly by the 20th you closed it down. April 30th will have been more than long enough. I'm a responsible adult. Let me make my choices on my own. And have options to my disposal.
Seminole	Agriculture	Not only agriculture,but, small businesses as well. Agriculture should be given high priority & then small businesses such as family owned shops. Not necessarily just restaurants, , nail, salons, hair salons, etc. IF it can be done with common sense approach. Limiting the number of people in the shop, mask are to be worn. The trouble is there are idiots out there that won't follow precautionary measures. If that be the case, then close down that particular place of business. we need to get some of these unemployed people back to work. Thank you. Oh, one more thing, if someone does not like the idea up slowly but surely opening our state, stay at home!. And, what's with the hoarding of toilet paper any way?!
Lee	Recreation	I THINK IT WOULD BE NICE TO OPEN STATE PARKS AND BEACHES FOR EXERCISE IF NOTHING ELSE. KEEP A 6FT DISTANCE JUST LIKE WE IN THE GROCERY STORE. PEOPLE NEED TO GET OUT AND START TO ENJOY LIFE AGAIN.
Sarasota	General	To early to open back up..Not enough low numbers..people will swarm the areas and not listen..just like spring breakers did before the lockdown. Not enough cleaning being done, no mandatory masks being worn!!! If u cant safely say 100% that I can go back to work and not get infected then I'm not putting my health or LIFE at risk!!! Stop thinking of u only and money..think of all the other people!!!!

AMERICAN OVERSIGHT

Seminole	Healthcare	Do not reopen state until it is safe to do so and do it slowly with proper testing and safeguards in place. Now is not the time to reopen state . Slow and cautious with medical testing as guide for all of our safety. We need to be patient and wait for now. We need to put emphasis on people's lives first, not money..
Broward	Recreation	Though I understand and agree that precautions must be maintained the fact remains that the following image is a great indication of how ridiculous some of the stay-at-home orders are. Broward county not allowing golf ,parks and recreation areas open but overcrowded grocery stores considered safe is the biggest overreach of authority in history. We need fresh air and exercise OPEN UP before you kill more people from isolation than the virus
Clay	General	Keep Florida closed. Keep the people safe. It's too early! Just wait until mid June and do a phased reopening. Florida is tourist hotspot wel will recover just wait because the economy will not get better if you still have the majority staying home.
Brevard	Food	Please don't open the state yet, I am both a Florida citizen and a restaurant owner, while this is killing my business, if you open us up you are forcing us to choose between our lives and our livelihoods. We are running takeout now which just covers the bills.
Volusia	Information	While the economic health of our state and our country is important it is not more important than peoples lives. After being on lockdown for this amount of time it would be foolish to reopen prematurely and have to go through this whole process again. Even with social distancing we still have new cases being diagnosed daily so one can only imagine what could happen if we start loosening guidelines too early. Maybe instead you should fix the unemployment application process and increase testing to get a better idea of the total number of cases we have in Florida. The stimulus money should have gone directly to the people who would have spent that money back into the economy and ultimately into the pockets of the corporations but the feds thought it was better to just give it directly to the corps. Do not be reckless with peoples lives and stand up and do what is right. This too will pass but it does not need to be expedited .
Orange	Finance	It is far too early to reopen as reported cases & deaths related to Covid-19 continue to occur in increasing numbers. If you're serious about reopening, what you will need is fast, reliable, widespread testing for the virus for everybody, whether they are showing symptoms or not. Additionally, a method of contact tracing will be needed to identify potential outbreaks before they can dangerously flare up. Ideally, the R0 will trend down with these measures and others in place to the point that the number of new cases reduces each day for 14 consecutive days. That is what I think we will need for Floridians can confidently return to some semblance of normal life.
Hillsborough	General	Time to get back to work. Elderly and compromised should stay home but others need to open up with caution. Wash hands, use mask if needed. Businesses should have hand wipes available for everyone. If we have no large increase in cases then the state should be open. Sweden took a chance and it worked.

AMERICAN OVERSIGHT

Pinellas	Healthcare	Do not reopen the state anytime soon without public health officials saying with certainty that it is permissible to do so. Please consult with medical experts before reopening the state. Ensure that medical professionals have what they need to take care of those affected and PLEASE IMPLEMENT STATE TESTING FOR EVERY RESIDENT IN THE STATE
Palm Beach	Government	If you want advice, contact Benjamin Netanyahu from Israel. The way he handled it was truly a job well done. They know what to do. Plus, if they have a vaccine, Florida will be the first to have it.
Orange	General	We need much more widespread Covid-19 testing and also antibody testing before any decisions are made to re-open businesses. We should not be pushed into this simply to please Trump. Without additional testing, we would simply be flying blind and trusting that everything will work itself out. Remember, if you are willing to re-open the economy quickly and risk an untold number of additional deaths, you can no longer proudly proclaim that you are "Pro-Life" as you can't protect some lives for personal, religious reasons and then risk others for financial reasons.
Brevard	Healthcare	Unless we get the testing capabilities up I won't feel comfortable with the state opened and will not go out and utilize businesses. With asymptomatic spread a reality we'd be opening businesses in the blind. I worry that opening without the testing numbers to back it up will lead to a second wave worse than the first. I'd much rather do this right the first time than have to go through this whole thing again in a couple months.
Broward	Recreation	OPEN UP! It is ridiculous that empty beaches are closed to tax-paying citizens who want to get some fresh air and walk! Opening them with parking lots closed means what? They're open but closed unless you actually live on the beach? From the beginning of this pandemic it was reported that the virus does not do well in heat, humidity and sunshine! This has gone WAY too far. Citizens can be trusted to use common sense!!! In the senior community where I live you cannot even walk on a closed golf course pathway. An absurd restriction. As is a curfew of 12 - 6 AM For what reason?? Or, are the restrictions only a symptom in themselves of a more hidden agenda? A reminder that we have a Bill of Rights which is being castrated. This is killing our economy!

AMERICAN OVERSIGHT

Pinellas	Retail	I am considered an essential employee because I work for a company that sells food and cleaning supplies. My commment is. If we just “go back to before Covid” and every one is able to go back to “business as usual, your gonna have a surge of new cases. I know we need to boost the economy, I would highly suggest slowly going forward to let some stores reopen but at limited hours and people. I think salons need to be reopened for limited capacity (make appointments and 1 person per stylist at a time. Gyms limited people and strict cleanings Beaches yes but again very limited. Not fully open because of social distancing. We have to be smart about it or things will have to be shut down again to stop the spread. I know personally at work we have to remind people to stay a certain distance away. And I also would like to say I applaud you for taking this task seriously and with due diligence. It’s not an easy task and for that I thank you.
Miami-Dade	Transportation	A lot more tests must be done before opening Miami Dade due to its population density. We don’t want for there to be a second wave and have to shut down a second time. - deaths might be down but it’s due to the distancing and rules we currently have in place. Please think this through and perhaps by mid to end of May with sped up testing Miami Dade can reopen partially and little by little. That my view and I hope it is taken into consideration. Take Care and thank you all for everything you do for a great state. John T
Duval	General	I believe it is extremely important to move the economy of Jacksonville in the right direction, but most importantly we should never place economic gain before human life. I do believe that the phased approach to reopening Jacksonville can be positive, but it can also have negative impacts if the proper controls are not in placed and followed. Social distancing is what have given reprieve to the spread. Jacksonville also serves as a hub for many warehouses and office buildings that consist of cubical environments that could potential raise concern as people slowly move back into those situations. Places like call centers, mortgage operation facilities, and places with high volumes of foot traffic can be huge challenges in the coming months. I ask that these type of actions be closely considered, as most of these business models have already converted to work from home. I believe these commercial building should be required to conduct frequent deep cleanings by the landlords of these facilities. The air quality is key in some of these buildings as herms circulate throughout the day, because the majority of these building are unable to open windows to air out. I hope we are able to find a happy medium and a fully thought out plan and if you need anyone extra on the Jacksonville Task Force, please don’t hesitate to reach out. Thank you.

AMERICAN OVERSIGHT

Hernando	General	I think it's time to really start opening up business's once again. The curve has been flattened. We've got to get back to work and our economy back on track ASAP. Infections and deaths have been MUCH lower then predicted. Wash hands, wear face masks and practice social distancing and we'll be rockin' in no time.
St. Johns	General	My opinion consist on opening Florida, but everyone must use face masks when go to groceries store or other public or closed areas with lots of people. Let's all keep practicing social distance to keep ourself safe, but the businesses must start opening.
Duval	Finance	As a resident in Jacksonville Fl, I'm a self employed business and since the stay at home order my finances have been hit tremendously. The unemployment website is so outdated and I know you guys are working hard to get it fixed, but I pay my taxes and I have yet to receive any form of payment for help. With everything going on there should be a little more preparation for instances like this. The funds that you have to get things done, where are they going? As a nail tech booth renter we don't have much help as it is so during this time it is even more frustrating that you cant get financial help from the government to assist you with your finances . So moving forward to the re-open as long as we have masks to provide for our clients and ourselves, the plexi-shield to place in between clients, and the proper sanitation guidelines can we please open our shop for appointment only. thank you Ninanails
Polk	Healthcare	I don't believe the stay at home should be lifted until the number of deaths decline.
Escambia	General	Gov DeSantis Please re-open Florida - now. It is one thing to quarantine the ill, it is tyranny to lock-down the rest of the population. As citizens of the United States - a constitutional republic - the government has no constitutional right to take away our freedoms. The repercussions of the economy being shut down will be worse than the toll of the virus. Staying at home is absolutely NOT for the greater good. It is a difficult decision, but take a deep breath and do what is right. Find the back-bone I thought you had and the reason I voted for you.
Sarasota	General	please don't open florida yet...it's far too early
Pinellas	Recreation	Please let the individual condos decide whether or not to open their private pools. Yes -- enforce the 6 ft rule, but think I private condo pool's opening or closing should be the decision of the community. Thank you!
Duval	Healthcare	We want to go back to work!!!

AMERICAN OVERSIGHT

Marion	General	I don't believe Florida is ready to be opened up. The numbers of cases are still going up on a daily. So let's say we open Florida back up, while cases are still climbing daily, we run into it getting even worst then it has been and numbers skyrocketing. So all we have done by staying in the house will be erased, and the virus is going to spread at a faster rate. We are not talking about the people that are sick spreading, we are more talking about the asymptomatic people, who have the virus and do not know they are spreading it. It will be a wild fire. They say the virus doesn't like heat supposedly, but here we are in Florida with the numbers climbing daily still, along with the deaths. I'm not sure you will really take into consideration what we think k, but I have children and elderly parents that both have cancer, and opening Florida where there is majority elderly is not a good move yet. Please reconsider until the numbers are dropping continuously. Thank you.
Palm Beach	General	Florida isntvready to open. I believe we would be ready after May if the data states there in a 14 day decline in cases.
Volusia	Utilities	I'm a utility worker working in telecommunications. I've worked as an essential employee through this process, working inside people's homes. In my experience, we're not ready to reopen yet. I don't think we can trust our fellow citizens to take the proper precautions to prevent further spread. Based on the levels of illness in our state so far, I believe that there's still too high of a risk of having a larger outbreak if we reopen too soon. I would encouraged increased randomized testing to discover what the approximate penetration rate is, and then reassess reopening.

AMERICAN OVERSIGHT

Palm Beach	General	Nikki Fried needs to be on the task force. Responsible medical personnel need to be on the task force and leading it. We need far more testing prior to considering opening up. Perhaps the task force can look at securing that and providing accurate testing in far greater numbers. Testing needs to be free. The shameful unemployment application process must be corrected immediately. Prematurely reopening businesses and forcing those who do not feel safe to go to work is not in FL's best interest. If those people do not feel safe to return to work will they be disqualified from receiving unemployment benefits? They should not be excluded. Many Floridians have yet to receive the paltry $1200 disaster relief from the federal government. What is FL doing to address this? $1200 doesn't cover rent in Palm Beach County. Medical coverage must be given to those who are unemployed. Medical coverage for those who are considered "essential" such as those working in Publix, etc so they do not have huge copays when they become sick from serving the public who largely are not practicing social distancing nor wearing masks. Masks need to be required, not suggested. Front line medical workers need the appropriate PPE and the federal government should not be intercepting it as the federal government refused to create an orderly and efficient system for distribution throughout the country. How are the counties bordering GA or SC going to handle the uptick in cases when Floridians cross into GA or SC and then come home spreading the virus? Where are the accurate statistics on the numbers of cases in rehab centers and ALFs? What preparations are being made to care for those when the resurgence of Covid-19 occurs with the openings of beaches and businesses? Schools - how willing is the task force to allow potentially thousands of children and youth to become ill? Teachers? Even thinking of opening school in August without adequate testing for the disease is irresponsible. Will their be masks for all students and teachers and staff? Has the task force looked at the examples of Rhode Island and CA? FL was slow to react to Covid-19 and it must not be too quick to
Volusia	General	As much as i would like things to go back to normal i really am not sure if it is time to open totally yet because too many people don't follow the rules. I wear a mask and only go the grocery store when needed but so many people don't and also don't follow the lines in the grocery stores. I just think listening to the experts like you have done is fine you are doing a great job
Sarasota	General	I think we need to wait until the medical professionals believe it is time to open Florida. We don't want to overburden the healthcare system. And its selfish to not consider how hard the nurses and doctors and everyone in the hospitals has to work if we open too soon. Nothing is as important as saving lives.

AMERICAN OVERSIGHT

Duval	General	At the end of the day. I really care about proper sanitizing, distancing, everyone wearing a mask in public and antibody testing available in doctor's offices. Phase 1——1st 2 weeks May—essential businesses/ workers back to work with masks and distancing unless able to work from home. No more than 10. Only essential doctors office as in primary care, heart, pulmonary, kidneys with very strict appointments to accommodate distancing. ALL DOCTORS OFFICE ABLE TO TEST FOR ANTIBODIES. Shelter in place still in effect. All persons must wear a mask when entering any business. All vulnerable remain vigilant. Phase 2——last 2 weeks May—— non essential services/businesses/ workers back to work with serious must have guidelines including mask worn by employees and customers at all times. Appointments only, no more than 5 customers at a time with distancing. 10 customers if a restaurant. No mall, movie theatres, bowling, retail, etc. Shelter in place relaxed only if data and numbers coincide. Essential businesses increase to 25. All persons still wearing mask when entering any building or business. All guidelines in grocery stores and other stores remain. Doctors offices continue to adjust to more accordingly. Masks still a requirement for everyone. All vulnerable remain vigilant. Phase3——1st week June—if data and numbers permit. Essential businesses continue to increase employees return to worK with distancing. Non essentials may increase intake to 7 customers. All retail opens with distancing. All grocery stores maintain distancing. Stay at home lifted. All vulnerable remain vigilant. Phase 4—-2nd week of June—-if data numbers permit all businesses can open and continue as normal with conscience distancing and awareness. All vulnerable remain vigilant. If covid19 should subside according to health and science experts will return. All sanitizing efforts everywhere should remain throughout the summer and for ever more. All vulnerable remain vigilant.
Hillsborough	Government	Even if you give the go-ahead to open various businesses, I will not expose myself (nor will my partner). I have a gym membership and normally workout 5 days a week. No longer. I also get a massage ever two weeks. Further, I use the services of a chiropractor every month. I will use NONE of these services until I feel safe and I DO NOT FEEL SAFE now -- not until widespread testing is done and infection tracking is put into effect. Only when that is done will I feel like the state and nation knows what it's dealing with. If you want me to contribute to the economy, you must assure me that everything is safe (I'm over 70). I will not stand for any guesswork on your part and I will remember your failings when it comes time to vote again.
Sarasota	Healthcare	As a nurse, married to a Publix store manager, with a toddler at home - please consider holding off on reopening the state. If you reopen too soon more people will be infected; more people will die. We can appreciate that business are suffering and people are bored at home, however it is too soon to take this risk.
Pinellas	General	I don't believe the state of Florida should re-open until HEALTH OFFICIALS say it is safe. Not Politicians.

AMERICAN OVERSIGHT

Manatee	Professional Services	I want to add that it was mentioned nail salons could probably open if they had the proper shields to protect themselves and clients, but that hair salons would probably have to wait longer due to the closet contact. I have to disagree here...nail salons are typically sitting face to face with their clients for an hour and a half on average. I work in a hair salon and most services are done with the client 95% of the time facing away from the stylist. Most hair cuts average 45 minutes. Also, nail stylists are touching their clients bare hands and would need to be careful about contaminating all their equipment with their gloves when the switch an instrument or touch the top of polish etc. I do feel like both can open because personally I feel if we are willing to do this activities it's on each individual person to just be responsible for washing hands before starting a service and also after ending a service. We can't live relying on others to sanitize every inch or their business in between each person. But, if we all just remember to wash our hands after swiping our cards through a machine, after touching a keypad, after opening a door, and you get the idea.
Duval	General	There are several ways to reopen FL safely...we can start with in dining at restaurants...maybe at first just have every other table with seating then gradually build up to every table. Waiters and waitresses can wear face masks if they want, but it shouldn't be mandatory as the media has instilled a lot of fear into people. Secondly, hairdressers and nail salons...every other booth can be used in the same form as a restaurant...nail salon workers already normally wear face masks and hair dressers can have that option as well. Then gradually build up to be back to full capacity. However, if the public doesn't mind then start at full capacity the amount of fear the media has played into the public is ridiculous and is over the top. The beaches should be reopened completely. The zoo should also be opened maybe at a minimal occupancy to start but it is outside and large and widespread. We need our small businesses back up and running before they close for good. Gyms need to reopen. Extracurricular activities for kids should reopen...cheer, dance, gymnastics....we need to get back to normalcy before the cure is worse than the solution....suicides, drugs etc.
Manatee	Food	Reopen restaurants by May 1 at the latest at least with 50% and social disteneceing.
Pasco	General	I believe the state needs to reopen. The economic ramifications of this shut down are going to be extremely dire if we don't open up very soon. We can do it safely and smartly. If this country does not open up very very soon, the economic collapse that we will experience will make the great depression of the 30's look like a walk in the park. We need to end this ridiculous suffering of the people immediately.
Volusia	Management	There are new cases in Florida, and people are still dying from COVID19. Why take a chance on having more people get sick, and dye, why? This is like playing "Russian Roulette!" No Do Not Open The Great State of Florida! Pray and do how you believe you're led to do.

AMERICAN OVERSIGHT

Pinellas	General	There are those wanting to reopen States yet they're being classified as selfish. There are those that rely on all kinds of people to supply them while they cower in fear at home. Isn't that being selfish too? You expect your garbage to be picked up, you expect the grocery store to be open so you can get milk, you expect truck drivers to supply the stores, you expect farmers, meat packers, fruit and vegetable pickers all to keep food in that grocery store. You expect Amazon to still ship all the things you're ordering while you sit at home shopping. You expect the delivery driver to leave it on your doorstep. You expect your phone to work, your power to stay on, and your mail to show up rain, sleet, or shine. And most important, you expect the doctors and nurses to be there if you need them. The whole premise of shelter in place is based on the arrogant idea that others must risk their health so you can protect yours. There is nothing virtuous about ignoring the largely invisible army required to allow people to shelter in place. I know there are some of you that are screaming mad about what I just said but stop and really think about what is allowing you to stay safe in your home. I truly believe that with some common sense on my part, I could easily go back to life as it was. I want to go to restaurants, I want to shop at the little store just up the road. And yes, I could catch COVID-19. I could also catch the flu or a cold, I could get run over by a bus, I could get struck by lightning. We take risks everyday. If you choose to stay home, that is absolutely your choice. And please don't start screaming at me about how I'll just spread it. Why are you worried? You won't get it because you're staying in your home. Are you going to shelter in place every time a new strand of the flu happens?
Collier	Tourism	I don't think it's safe for the population to open the quarantine right now
Lake	Healthcare	I'm writing in regards to the Governor's request for community feedback via the portal concerning reopening the state amid the covid-19 virus. I have had covid since I was hospitalized w/it on 3/22, spent over a week in the hospital, am 43 yrs old, and it was the sickest I've ever been. More than 6 weeks later, I'm still testing positive and still sick. I'm having my third test this week. My husband is positive and has been out of work, but thankfully getting short-term disability for now. If you are going to reopen, you must do it slowly and safely. Restaurants and stores; small amounts of ppl in, tables and ppl kept 6 feet apart min, strictly enforced (restaurants maybe reservation only?), set up outside seating, etc. Hair salons and nail salons, must wear masks and gloves at all times, etc. No mass or group gatherings, no amusement parks, etc. This disease is dangerous. Please understand! Florida is still too high in infection rates and death stats. Plse be smart and plse fix the unemployment system & pay the ppl whom have been desperately waiting and who need it. We must help one another. Thank you!

AMERICAN OVERSIGHT

Polk	Retail	It's time to let citizens take responsibilities for themselves. We do not need government to continue to protect us from life. If we go forward as if in a flu season, people that are susceptible will do what they normally do during flu season, they protect themselves and stay home. There are many of us that are strong and healthy, sitting at home is not mentally stimulating enough to keep us happy! Let us go to work and those that are afraid or unhealthy can stay home, by choice!
Orange	Government	Even though it has been rough for us with no income in 6 weeks and no stimulus check and no unemployment yet. We stand up to say we should be staying home for 30 days more. As a Floridian and watching these numbers of contaminated persons and not even half of the citizens have been tested yet. We shouldn't be risking our selves to be exposed. Just because some businesses want to reopen. Small restaurants and shops that can't make it should also close and stay home. If we people stayed with no work no income these small businesses should also be able to stand by us and stay closed and at home. Believe me it's been hard but we are managing with what we have have in our fridge and we haven't gone out to collect no free food (there are others that really need it)and we may be using whats left of of our savings to get our essentials and medications. I strongly believe we should stay home a bit longer until the numbers look better and until we have more changes of making it. DONT GIVE IN RON DE SANTIS WE SHOULD ALL BE STRONG. I do hope soon we some some financial relief to hold ya over for the next couple of months or to replace what we have used up. But I'm hopeful we will be better.
Palm Beach	General	My concern with opening up the State right now is people are not taking this seriously. They are not wearing masks in public or gloves. they are not social distancing by staying 6ft apart when out in public. If we open up it should be on a limited basis with strict guidelines for wearing masks, gloves and staying 6ft apart and companies that can work remotely should continue to do so at least till June1st.
Broward	General	I do not believe that our state should be opened. It is careless and selfish. Don't let any people that are pressuring you politically to make the wrong decision for human lives. PI feel as if you open the state to early that it will open up opportunity for more people to become infected with the disease because people are walking around with the disease and not even knowing it. As of yesterday high new numbers of cases and 58 deaths since Thursday. I totally understand that you want to open because of the economy. Honestly lives are more important than businesses not losing any more money. Our economy will bounce back when this is over. You cannot pen up some parts of state and not others. Leave the state closed!!!

AMERICAN OVERSIGHT

Orange	General	I am a teacher in the Central Florida area and feel that it is extremely important for our state to get our economy running again, but not at the expense of people's lives and health. We should remain in a "shelter at home" mandate until such time as our number of positive cases declines for a period of 14 days in a row and our number of hospitalized and the number of deaths begins to stabilize. Once this occurs, we can and should begin reopening only those businesses that are capable of demonstrating that they are able to abide by the CDC guidelines for health safety (6 ft distance, limited capacity, and strict enforcement of hygiene). We should open slowly and scale back at the first sign of rising cases....in other words, two steps forward with a clear eye watching behind us to ensure our safety and willingness to take a step backward if necessary. I also work as a seasonal worker for Universal, and feel that no waterparks should open this summer, however it may be possible to slowly open the theme parks to locals only if they institute strict guidelines and monitor employees health as well as the health of their guests.
Brevard	Professional Services	I am a licensed dental hygienist; have been working in the state for 20 years. I have concern that the dental field will not be able to get the proper ppe and will start opening with new protocols set in motion. Dental office do not have access to approved n95 masks at this point, government has priority over all ppe needed for front line; as it should but this needs to be acknowledged befor opening dental field back up to general procedures. As a licensed professional working 12 inches from patients with aerosols and saliva. I want an n95 mask and a face shield. Have been trying myself to get these so I am prepared to see patients and it's not out there to get. I do not feel as if this is a phase 1 opening task. Please evaluate the dental field and make a well informed decision. Thank you for your efforts. Karen Bakey
Sarasota	Government	DeSantis Don't open up until you have fulfilled the cdc guidelines. How you handle this will be how you are judged forever. You've done enough damage because of your allegiance to the moron who is president. Seniors are most at risk, and will hold you accountable.
Volusia	Food	I don't think we should open back up yet because we still don't know how big the threat of the virus is. And according to medical staff the second wave Could be worse than the first and let me tell ya, if my brother or mother gets sick i am gonna blame the government 100 percent for opening again too early. Think of the people that can't help themselves. I know it's hard staying inside but we gotta keep going until our numbers go down and they haven't yet.
Duval	General	I am a Respiratory Therapist and have been for 22 years. The state needs to open! This has been blown so out of proportion and I'm still dumbfounded by it all. The media has managed to cause so much fear in people. It's a virus that's new to people. People fear the unknown but it's not even close to being as bad as it's been made to be. I've seen the flu do the same to people this year with no pre-existing conditions and be in hospital for 2 months on ECMO and it has never been treated like this. Enough is enough. This is hurting families, businesses , the economy, and hospitals. It needs to stop and the state needs to open.

AMERICAN OVERSIGHT

Clay	General	As someone who lives with a respiratory therapist who works directly with covid patients, I urge the governor or to give in to pressure from people who are in educated or in aware of the danger that STILL exists. We need to take our time re opening. We can not put individual desires ahead of public we'll being.
Hernando	General	Please make sure that we follow the federal government guidelines, such as declining Covid cases for 14 days Require masks to be worn in public Opening parks and beaches so long as social distancing and wearing masks
Bay	Healthcare	My pain management (Neuro) was closed down while I was in the hospital in Feb. New pain management facilities won't take me because my Calif driver's license has expired. Offices not open so I can get an ID card for FL. I am 72 years old and have significant pain in my back and hardly can walk at this point without meds. What can I do. Please open up county offices in PCB. Thank you.
Brevard	Retail	Please open the economy back up. Small businesses can't last forever not making money and we need to economy to bounce back. We can't stay closed forever and people can't live off unemployment and government money forever. Then when they're ready to go back to work who knows if jobs will be available if businesses have to close.
Volusia	Healthcare	It would be irresponsible to open Florida businesses without more testing to determine how many residents are infected and symptom free. A second wave of the Corona Virus would put many more people at risk, and would result in more deaths. I do commend the Governor for collaborating with the Cleveland Clinic. Listen to the Medical experts exclusively.
Palm Beach	General	Please do not re-open Florida until this virus is under control. We need more testing, tracing, and we need to see who has antibodies. We need at LEAST 2 weeks of lowered numbers. Dead people can not restart the economy. It would also help of there were medical personnel and scientists on your task force.
Marion	General	We need to start opening businesses, restaurants, and tourist attractions/theme parks while implementing a form of social distancing for 30 days and then relax the distancing thereafter. Also, Miami-Dade and Broward counties need to stay isolated until their case amounts are half of what they are now. We can't keep hiding from the virus and will have to learn to live with it for now.
Brevard	General	Maintain the "safer at home" policy for another two weeks and then re-evauluate, using the fed guidelines. In the meantime to help the economy and hundreds of thousands of unemployed make fixing the unemployment benefits a number one priority!
Seminole	Government	How is the State Government aligning it's re-open Florida plan with the Federal Government's plan? I am a Federal Army employee who physically works in a State University building. There seems to be no coordination between the State and Federal Government on re-opening these joint facilities. In joint facilities, who's re-opening plan will be the master plan?

AMERICAN OVERSIGHT

Pasco	General	I think it would be a huge mistake to reopen anything right now. Sacrificing the health and safety of the public to save the economy is a poor decision. Without healthy people there is no healthy economy.
Sarasota	Healthcare	Time to start opening up....Ppl cannot hide in their homes comstantly....Wonder hiw Sweden did it without closing.
Charlotte	Healthcare	I am concerned about Florida's ability or capacity to do adequate testing and contact tracking. A family member was exposed at the doctor's office, and wasn't notified until day 13 after the exposure. They told her that she need to quarantine for 1 day (to complete the 14 day cycle). It was too little too late. I don't believe we can "reopen" Florida without concrete evidence that our testing supplies and personnel are adequate. Thank you
Seminole	Professional Services	Keeping the state shut down much longer is going to kill families. We're running low on food, money and the government has failed at every level. The disease was not as bad as we were told. Stop ruining our lives and get out of the way. Let those who want to work do so and get options to those who want to remain home to do so also.
Hillsborough	General	Please reopen Florida! I live in Tampa and feel that many people are eager to work. I am an essential worker and have not been affected but am supposed to be getting married in June and would truly like to have that happen. I have lost deposits and much more money having to rearrange things due to the coronavirus. Keeping things closed will affect many, psychologically, if they are unable to provide and make money for their families. From my experience going to Target, Publix, etc. people are still being safe and cautious and I find that this supports the theory that if we open up small shops and businesses, people would continue to be safe and cautious with the proper regulations set in place. It would be nice if the economy could open so that the rest of the public could begin their lives again. Please reopen Tampa Bay May 1st!
Hillsborough	General	Most other states are opening up too early. The guidelines set forth by the federal government indicate that the number of new cases should be declining for two weeks before re-opening. While painful, this is a necessary step to avoid a second wave of cases. Many of the states that are opening now are doing so very prematurely...some five to seven weeks before it would be appropriate under the guidelines. By opening too early, we are taking unnecessary risks. While my life has drastically changed over the past six weeks and I am getting quite antsy to get out and do things, I recognize that I need to be patient and wait until the trajectories change. I can wait to resume my normal activities until it is safe to do so without risking another resurgence in the number of cases here in Florida.

AMERICAN OVERSIGHT

Collier	Healthcare	I am a nurse practitioner in a busy internal medicine practice. We have seen and tested many sick patients with very few positive. I believe that we should open the state beginning with outdoor areas such as beaches and parks to allow people to be active and improve their mental wellbeing. Follow this with restaurants and small businesses with restrictions on occupancy. The last thing I would open are businesses which encourage large groups of people such as movie theaters, casinos, and concert venues. I really feel for discussion with my patients that there is enough fear among people that most will take precautions and maintain social distancing.
Volusia	Professional Services	I don't believe it's wise to reopen Florida right away. Obviously we'd all love to go back to work, But it's not safe. I'm a hairstylist usually in constant with 5-10 clients a day. God forbid one of my clients isn't showing symptoms and contaminates me and now I have contaminated all of the rest of my clients and staff. This would continue on for a long time if we open up so soon..... I don't mind staying home and social distancing, however this time has ran my savings DRY! everything i have saved for my wedding is now gone..... due to the broken unemployment system. I might lose my house over this..... no stimulus check, no unemployment no cares payment. We cannot afford to stay at home any longer without pay. My fiancé is almost out of insulin, he is type one diabetic. We need money.
Orange	Retail	I think the governor should make it mandatory to wear some sort of a mask in any retail shop in florida if you dont wear one your not allowed in any store, just until this goes make to normal.
Flagler	Government	I think we need to sit back and wait for Ga. To spike . Do not put Fl. in further danger. Also, get. People some money from unemployment.
Hillsborough	Government	I am currently unemployed and my savings is slowly getting very thin, that being said I still don't believe we should be opening our economy back up yet. I would rather stick to the stay at home order until we are safe do do so then jump the gun and see a spike in number and prolong this whole situation. I get it and under stand people's concerns but in the long run if we can hold out just a few more weeks until we are truly in the clear we won't have a second wave to start all of this all over. Thank you Jenna
Duval	Tourism	I feel that we can open theme park with about 50% capacity if we wait until after memorial day. Maybe the Tuesday or Wednesday after to offset possible larger crowd issues. I feel that after that holiday we can open and start a new learning of how to limit the attendance. U feel that if we start in the last if may that we will have s good handle on things by july.

AMERICAN OVERSIGHT

Flagler	Accommodation	Please do not open short term rentals for those of us living in condominiums. Impossible to social distance in elevators and in hallways. We have worked very hard at protecting our senior citizens to be undermined by an owner who rents by the night with no regard to the health of our residents. He is a flagler county commissioner who rents without a rental license which requires minimum of 1 week rentals. Rented to 4 spring breakers just as orders came out to stop rentals. Rents using both airbnb and vrbo. https://www.vrbo.com/653739?noDates=true https://www.airbnb.com/rooms/41057102?location=Florida A1A, Flagler Beach, FL, USA&adults=4&children=1&checkin=&checkout=&source_impression_id=p3_1585194361_Xcp0IKIJ42fmckic
Pasco	General	Please open the state back up so more of us don't lose our jobs and inflation doesn't spike.
Pasco	General	I don't think the state should open soon. It has been proven that most people don't exercise common sense as to keep distance whenever in public, they are reckless and selfish. We have to learn from the Spanish Flu of 1918, too soon to reopen more deaths on the 2 nd wave. In terms that politicians understand less money will be generated and more and bigger losses companies will have when they open have all this operational expenses and not many sales. For example, tourism, that is an industry that is so hard to keep safe social distance that who will risk having an outbreak on their property. Also so many people will fly in making it impossible to keep the virus under control. There is this feeling of uncertainty and hopelessness because the government seems to prefer people die than to preserve life. It is unbelievable. Selfishness is the ultimate cause of this. It is on you the governor to hold this folks accountable for their selfish behavior and think as a society that needs to be United, is on you to provide wellness, food, debt protection and money to survive this as a society that cares for one another. The government needs to stop the political game and step up!! Wake up, stop the nonsense, be a real man that takes care of the people. Billionaires can take care of themselves in fact they should donate to help the economy not to hoard more money. Make them pay to support us in this difficult time! We are the joke of the world right now. Help save lives. Keep us alive and well with money for food and expenses to give back to the economy.
Sarasota	General	We should reopen the state under new leadership who cares enough about their constituents that they would put in place a system that is capable of supporting them in a time of crisis. Most Floridians haven't seen a dime from the shoddy unemployment system, so yeah at this point I'd rather go back to work and get sick, because WERE LITERALLY DYING OUT HERE WITH NO INCOME.
Volusia	Professional Services	Absolutely too early to open our economy at this time! We need much more testing before we open up our Restaurants and Theme Parks!! We have never reversed a Viral quarantine in any lifetime so we must remain indoors and not stop social distancing!! We must take care of each other and not take care of each other by staying home and wearing masks and social distancing!!

AMERICAN OVERSIGHT

Brevard	Retail	I own a small antique store 8000 ft.² I believe I could open by just offering hand sanitizer face mask and gloves we never have more than 10 people in the store at any given time and with four separate rooms totaling 8000 ft.² I think were very safe. If we don't open by May 1 I'm just one more small business that will close the doors for good
Brevard	General	According to medical and scientific experts, loosening stay at home orders in Florida would be one of the last measures we should take at this time. Until our state is prepared to invest in reliably testing for the virus and antibodies, reopening some businesses, especially those where social distancing is practically impossible, is sheer lunacy. Considering loosening restrictions at this point in time indicates our Republican controlled state government is comfortable with risking working class lives to reduce unemployment benefits. Our state's response to the pandemic thus far has been highly unethical and decidedly immoral. Heed the epidemiological experts rather than greedy corporate executives, and you can perhaps find a morally correct path forward to craft public policy that will save lives rather than destroy them.
Brevard	Real Estate	Pleas re open the state effective May 1. There can certainly be a recommendation for elderly and immuno compromised people to stay inside but the remaining healthy poplulation should be able to go back to work. Both my husband and myself have lost our jobs and God knows how long before we receive unemployment checks. But the bigger picture is that our jobs will not be there to go back to if this lasts beyond May 1. The needs of the many OUTWEIGH the needs of the few. Open up!!
Polk	General	I strongly urge you to immediately begin to open our state. In my opinion, it should never have been closed. There is never, ever going to be a day when there are no viruses or flu germs around. I am 77 years old. I am capable of deciding for myself what it is safe for me to do. Families are losing everything, children are hungry and learning very little if anything. Not sure we will ever recover from this decision to close based on models which gave been proven to be totally false.
Duval	General	Once we see a decline in actual Covid 19 deaths over a two week period we should consider reopening Florida. Reopening should be done in stages. Business should be ranked on an essential scale from 1 being the most essential such as supermarkets (going back to normal operating hours) 2 would be reopening restaurants for sit down service (not buffet style restaurants), boutique stores and salons followed by stage 3 being movie theaters, amusement parks and malls and schools.
Broward	Healthcare	I am opposed to removing the shelter in place/stay at home restrictions put in place to slow the spread of COVID-19 at this time. Until more data is collected from widespread testing to identify those of us who are asymptomatic, it would be careless and deadly to reopen Florida. Testing, and tracing, should be done immediately. Sooner more data is collected, the sooner the whole country can get back to normal. Sound judgement and exceptional leadership sorely needed right know. Be the leader Floridians can count on to make decisions based on science and facts. Thank you.
Collier	General	A lot of places should NOT open. It is not safe out

AMERICAN OVERSIGHT

Orange	Government	One of my greatest concerns is the fact that so many people are out and not wearing masks, and not always keeping the 6-foot distance. Still some people don't understand the purpose of everyone wearing masks when they're out in public. And unfortunately, many government officials aren't setting a good example wearing masks, leading by example. My work and business is highly dependent on travel, so I lost my income due covid-19; and I don't see that changing in the near future. There needs to be enforcement of guidelines and regulations for safe, measured reopening. But the bottom line is that if Florida government cannot get the promised unemployment benefits to those that can't work, there's going to be a large percentage of Floridians that can't put money back into the economy, through no fault of their own.
Baker	General	Slowly!!! No need to rush anything. Need safety first on all levels of reopening. Schools stay closed. Essentials only. I wouldn't want anymore deaths. Testing needed in smaller counties for broader ranges. No testing in baker county happening unless tied to nursing homes. Wait to reopen. Continue to monitor inbound from hot zones. Thank you for asking
Polk	General	Please open up all businesses in Polk county, Florida. We rely on tourist trade, with legoland located in our city (Winter Haven). The governor shut down businesses during "season," when our city doubles its population, when our snow birds arrive, and businesses receive their best revenue, which helps get them thru the "slow times." Our town, and specifically our small businesses, may not be able to open again, because you took their mainstay away from them. You will have our business open up during the "slow time," which will not help our businesses. I am disappointed in Governor DeSantis shutting down the entire state, instead of just the "hot spots." When restaurants stayed open, and social distancing was practiced, you closed them down anyway. I went bowling, to Daytona Beach, and eagle ridge mall, to support local business, until you forced them to close. You took away all commerce, and have hurt Florida, for the sales tax you lost during season. Then, to add insult to injury, no one has been able to receive unemployment. Only 9% have been processed, in over a months time. Because of obamacare, most businesses hire parttime, and then you deny those psrttime employees as ineligible for unemployment. I lost my house, and have everything in storage, which i am behind on the warehouse payments, as my work hours were dropped from 30+ hours, to 10 hours a week. I have to make $400 rent payment, $30 dollar phone bill, earning less than $125/week. Cant buy food, or pay anything on my warehouses. If you EVER do this again, i will not support either political party again! Open immediately, before i lose everything! Kay Mijou

AMERICAN OVERSIGHT

Lake	General	More and better testing in needs to be readily available ! Once you open up to tourists, you will lose control for the residents health. Start slow, mandate masks, be clear about social distancing and enforce it, and send only one message to the public instead of the many we now see. After doing this for a month, we do not need a second wave and some people still feel entitled to do as they want and risk others.
Lee	Recreation	Please reopen the tennis courts. We need this activity for physical and mental well-being. It is a sport where it is easy to social distance. Recent news reports say being outside in the heat and humidity helps kill the virus. It doesn't cost money to play. We need an activity to do to keep from going crazy. Open businesses slowly and carefully, with social distancing and masks required. We're dying out here with no income. Large numbers have not yet received the stimulus check or unemployment benefits checks. Landlords are not being understanding.
Manatee	Recreation	On 04/23/2020 it was announced that heat and humidity quickly kills the Coronavirus thus making it very hard to transmit in places like open-air parks, beaches and on boats. Our daily temperatures have been over 80 degrees and Florida is for the most part extremely humid all year round. With this in mind are you going to open up the beaches boat ramps parks Exedra sometime soon? Personally I think the closure of the boat ramps was over the edge extreme. Most have reopened yet Sarasota County boat ramps are still closed. Question why. Really closing 24hr stores at 8:30, oneway isles and closing entrance/exits! The very idea of a 24hr store is so people could shop al there leisure. Instead you close at night and cram people together threw one entrance. Its like Walmart is doing there best to spread this virus. If im in a oneway isle and someone coughs or sneezes in front of me, i will violate your rule and not continue threw there sickness Do you know people live at night too? People must think this virus only comes out at night like the Boogeyman. Well i got news for you. Before you started closing customers could go shopping at 3am and not encounter even one person! And now in order to shop i have to RISK MY LIFE. Please stop overthinking this and return to the safer normal?
Broward	Healthcare	Just as the joint commission/AHCA used to do checks on healthcare facilities, there has to be a regulation of business that are reopening in order to ensure that they are following guidelines set by the CDC/DOH. You CANNOT TRUST EVERYONE to do the right things. There has to be REAL consequences for those organizations that don't follow the rules. Hire more inspectors, and make it so that patrons can report organizations that are not in compliance.

AMERICAN OVERSIGHT

Hillsborough	General	People are ready for the re-opening of Florida. I fully support making appointments for haircuts, restaurant dining, etc. I think it is time we start getting back to life as usual. As far as education I would suggest opening schools at an earlier date than August. Kids are ready to get back to classroom learning, seeing friends and being kids again. The impact the shut down has had on everyday life, our economy and mostly mental health has been utterly debilitating. If people truly aren't ready then they can stay home, otherwise let those of us who are ready make their own decisions. As adults it's our own personal responsibility to use proper hygiene and maintain social distancing. If you cannot be trusted to do so then you need to stay home. Thank you for keeping Florida safe and most importantly involved and informed!
Brevard	General	DO NOT OPEN UP THE STATE OF FLORIDA YET... IT IS NOT SAFE YET!
St. Johns	Healthcare	As an essential worker I follow CDC guidelines. I feel for my neighbors who are out of work but I'm sure they would rather have these struggles vs a horrible death by covid19. Please be mindful that there are many vulnerable people in our midst, not just elderly. Little children with health complications are among the very vulnerable. Grand children of my friends. Please tread carefully. TY, phoebe dodds
Clay	General	Keep Florida closed until mid June and let Georgia be the rest dummies.
Volusia	General	No, we are not ready to open up. Follow the MEDICAL advice of the real professionals. Wait a little longer for the numbers to go down. Already airlines are flying with full planes so we could very possibly be looking at an increase in Covid 19 cases based on that alone. Opening up a lot of businesses that are frequented by older people with disposable income such as restaurants that we WILL NOT be going to is going to hurt their business. We have no plans to go out., We are waiting until the numbers go way way down, Do you know we ate out about 3 or 4 times a week and have not eaten out at all and Not Done Take Out. Majority of our friends won't do take out either. We have to feel safe to go out, hearing like 60% of our hospitals are full is not reassuring.
Hillsborough	Healthcare	https://apple.news/Av5dQiMQ0T1KYKKNAo5zSGw We must adopt these five strategies...follow the plan in Massachusetts to attack the virus! So comforting to hear of a state with a plan that makes sense! WE NEED A PLAN FOR FLORIDA! It's not too late if we start NOW!!! It is not time to re-open!!!
Pasco	General	55+ community. I have not left here since March 16th. I do NOT plan to leave here for at least another few weeks, except for a medical test rescheduled in May. Please do not rush reopening too fast...certainly, there will be more cases in the Fall. Let Florida be more prepared before lifting restrictions. Thank you.

AMERICAN OVERSIGHT

Marion	Professional Services	I'm a cosmetologist in central Florida and I don't feel as if the state should re open so soon seeing Georgia already opened there salons made me cringe seeing as if you can't social distance in a salon let alone when there's more then one persons working in that said salon. This isn't only about salons but other non essentials businesses also. Yes we need pay but for those non essential jobs that can work while social distancing by all means do it but for those non essentials who are at risk and is hard to social distance pay them this is something yes that was out of control but we were supposed to be protected and now we are falling because of this . Unemployment website doesn't work worth a shit and barley anyone is getting paid. Was that relief check supposed to keep us in fucking line no that was nothing compared to what we are owed since we weren't protected from this deadly virus. Shame shame shame I say do NOT reopen Florida or any state for that matter
Palm Beach	General	I appreciate you asking for peoples feedback, but I feel that could also backfire. We do need to slowly start opening up the economy ask the President has stated. If people feel they are not comfortable with that, I respect that. No one is forcing anyone to go out of there house,. I get very upset with seeing some of the media reports, and hearing from certain Professionals, a few in PBC. It's very depressing and you feel like , well I guess we are never going to leave our houses again. I also feel it's very unprofessional of the professional s to keep saying the what if's . So far many of these studies and professionals have been wrong! It's up to you Governor DeSantis, it's very kind to ask opinions , but I feel on the other hand you are opening a whole can of worms.
Duval	Healthcare	Thanks for this opportunity and for caring about our feedback. I would like to see a gradual reopening , beginning in the next week. Hospitals should be able to do inpatient procedures if they are testing their providers in house. Patients are missing critical services. Restaurants and bars should be able to open asap if they have outdoor seating- with social distancing and sanitation emphasized. Hair salons, realty offices, outpatient clinics should. E able to open, with masks in place for close contact with people. For the Governor: the public needs to be better educated on the following: the amount of people in FL that have possible already had this , based on Univ of Miami study ; the fact that the majority of people with CoVid 19 do not get admitted to a hospital and recover. Older people and those with comorbidities should self isolate/ social distance based on their own situations.. It may be helpful to give people things that they can do to boast their immunity: sunlight/vitamin D, fresh veggies, daily walks- may be good to have an MD present some of these ideas- gives folks more of a sense of control. I would love to be a part of advising on how this is impacting mental health (am a therapist)- thanks for your hard work. So many people do appreciate you all!

AMERICAN OVERSIGHT

Seminole	Professional Services	I am a self employed nail tech in Seminole county. I feel very strongly that the nail salon business should NOT OPEN TIL JUNE 1st. We are in very close proximity to each other. Face to face. Hairdressers are not as in your face jobs. I need to work but my health is more important. Please consider this. June 1st. Thank you
Orange	General	Hind sight is 20/20, but with a possibility of this or another virus/pandemic returning either this fall or in the future - now is the time to take the initiative....Hospitals need to be better stocked period...Florida agency that covers unemployment has been a total failure...Yes, I know they've been slammed but numerous articles said the system was antiquated, needing an update for a few years..We have known for years, a very high percentage of our workforce is never more than a few paychecks away from being homeless...We add insult to injury by not processing their claims efficiently so they can at least have food to feed their families..I thank God for Second Harvest, churches and numerous other organizations - large and small, that have stepped up..Last but not least - DON'T OPEN NOW...I don't care which party is in office..Next time (whether it's this fall or in the future)..clear the beaches sooner..folks don't need the building to worship..and don't be naive enough to think folks will come to Florida and self quarantine for 14 days..
Osceola	Healthcare	Do not open up,. People are not taking the precautions at ALL!!! People think this is a joke. Many people are still out gathering. Please enforce quarantine or a lockdown. If we open we're going to start from 0 again. Please consider prolonging the quarantine. Thank you
Palm Beach	Recreation	Please open parks and beaches! Recent findings by the Federal Government show the virus dies quickly in heat, humidity, and sunshine.
Brevard	General	Please only lift the stay-at-home order and restrictions for businesses when we have hard DATA (not opinion) to prove that it is safe to do so. Please do not make this a political issue. Lives are more important than political leanings. Please be thoughtful about what truly is, and what is not, an essential service. The WWE is not essential. Please show the world that Floridians aren't this dumb. Please. Please do not reopen at this time. We're still in the midst of an unprecedented pandemic. Lives are at stake, including the life of my 12 month old daughter with special needs. Let's not be cavalier. Let's respect this virus for what it is-- deadly, aggressive, and still very much alive and well within our Florida communities. We must do more (and with a sense of urgency-- more testing, more collaboration, more adherence to the restrictions that are designed to save lives), not less.
Palm Beach	General	Reopen Florida now. Shutdown orders are unconstitutional and lawsuits are in the works.
Hillsborough	General	Worry about protecting our citizens we are one of the worst effected states in the union your economy wont be ok if most of your constituents are dead keep the state closed until this pandemic is over use your head and stop thinking with your wallets

AMERICAN OVERSIGHT

Pasco	General	Open everything (including schools). No restrictions. Except for: Have all stores close by 9pm. All stores must sanitize overnight. Seniors only the first hour of being open. OR Open nothing.... people cannot return to work and leave their children home alone. People cannot go back to working from the office and be able to homeschool their children.
Seminole	Retail	Hello, my name is Amber. I work in retail in Seminole county. I have noticed a lot of people really have not taken the stay at home order serious enough in my sense. So I am not feeling to safe if we open by stage 1. People come in large groups to shop. If there's too many people in the building.... how can we control who comes and who goes? I want to make sure our employees are safe and taking precautions coming into contact with each person on a day to day basis. Being safe is my number 1 priority. For someone as myself, I have asthma. I can't take any chances. I get that we need to get rolling with opening. Just want it as safe as possible. Thanks
Broward	Finance	Our citizens , businesses and and economy have suffered long enough. There are many small businesses that may never reopen. The longer we wait will only magnify this economic impact from our actions.I pray for those that needlessly died from a virus that invaded our country from foreign lands however further loss and human suffering may well be worse than the medical impact of the virus itself. Social gathering whether at work or at play Is the essence and fabric of humanity and perhaps greater so for Florida and our great country. We face risks every day when departing our home through auto accidents , drownings , criminal activities and countless other variables. We have lived with those risks since the dawn of our civilization but it hasn't caused us to cower in our homes and avoid contact with other humans. Continued restrictions are an antidote that is more harmful than the risk. Let us begin a return to normalcy with reasonable precautions and a phased in process that maintains our ability to mandate a shelter in place should it become necessary . Our choices are limited and we simply must decide whether it is better to face fear once than to allow fear it to permeate our thoughts and our lives any longer.
Osceola	General	as quickly and safely as possible
Duval	General	Please lift all local and state executive orders and state of emergency orders to reopen the State of Florida immediately. Citizens don't want government hand outs, they want to work.
Orange	General	Let restraunts open with social distancing to the best they can. Need to remind people the best way to stop tthe spread is by washing your hands often. I see people wearing mask and they still touch the mask with bare hands after touching other surfaces so that defeats the purpose of mask. Also still let places sell closed alcohol togo. People just need to use common sense!

AMERICAN OVERSIGHT

Pasco	General	Open the beaches. Gulf Coast beaches can be easily controlled. Everyone must rent the lounge chairs. Have companies set them up 6 feet apart. When someone leaves for the day, chairs are disinfected. It's a win win. People get to enjoy the beach and chair rentals companies are making money. Open the theme parks. ALL of them. Have them reduce capacity and open for the month of June to Florida residents only. There are tons of Florida residents that would go that don't normally go because of the crowds. Get these people working again. Stagger seating on rides or at shows. Employees wear mask and gloves. Patrons wear mask. It can work! Open restaurants. Reduce capacity seating. Leave an empty table between tables. People need to work, want to work, want to play, want to go out to eat. Open hair salons. Only allow 10 at a time in salons. Clean chairs between customers. These professionals are washing their hands constantly anyway. Please, let people work. It'll take a huge burden off your unemployment website that already does NOT work. And save the State of Florida tons of money in unemployment payments. Please partially open Florida for the people that call this state home.
Pinellas	General	Hi Mr. Governor! Based on the data from studies in NYC, Boston, Stanford/Santa Clara County & LA County it now seems quite clear that the virus is far more common & far less deadly than most have modeled & believed. This means we need a more targeted & sophisticated approach when reopening this May. General rule should be if you're under 50 and healthy go back to your life. The danger to you from the virus is small, but should avoid interacting with seniors. If you are over 50, unhealthy, or have a compromised immune system you should continue, as a general rule, to quarantine. This would allow the virus to circulate primarily among the younger, healthier citizens.. those who are least likely to have severe health outcomes. It would allow America to attain herd immunity with the infected being primarily young and healthy, thereby limiting health care strain. Instead of a one size fits all blanket policy, we should be adjusting our health and economic policy to reflect what the data is telling us: most infected people will be fine, but the elderly and those with suppressed immune systems are in danger. The rest of us need to work. A policy that 100% makes zero sense, both for health and the economy, is the idea everyone should continue to quarantine until a vaccine is found. We also learned recently that UV light, heat & humidity are detrimental to the health of the virus. Weather does have an impact, and spending time outside is more beneficial than being crammed into your house all day. You have done a fantastic job so far not imposing draconian orders upon us & I thank you for not giving in to the pressure from political opposition. You know what is best for Florida! Keep up the great work!
Brevard	General	Please re-open Brevard county. People can still wear masks and gloves, and social distance in large communities. I can’t work due to all the lay-offs and I can’t get paid from a unemployment since it’s been down. I’ve put a claim in over a month ago, and it’s still pending.

AMERICAN OVERSIGHT

Brevard	General	DO NOT REOPEN THE STATE. Keep the state closed until there are no new cases for like a week to rove the virus went away!
Pinellas	General	Please start opening Florida! For any small business to survive this, we must start taking steps to open! This is effecting the lives of all people! And We need to start taking steps so people can get there lives back! Please start opening Florida!
Pinellas	General	It's time to reopen Fla for businesses, recreation, all the things. It's time to allow Floridians to make their own choices as far as the amount of risk(s) they want to entertain. The economy is going to collapse if you don't lift the order. More people are suffering from the supposed "cure" than from the "disease". For the record: I am in the high risk population being over 60 and having an autoimmune condition. I intend to be out in society and take my chances. I am not afraid. I'm more afraid of what will become of those living paycheck to paycheck. My paycheck has not been affected but I see the suffering and it sickens me. I see people hopeless, I see the tears, I see those birthing alone and being ill in hospitals alone and dying alone and it's just wrong. OPEN UP FLA. Open up. It's past time. #floridayunited #openflorida
Pinellas	General	Good morning. Please continue with the current protections and do not open non essential businesses at this time. The health of citizens is of supreme importance. We need to see a continued decrease in cases, which we have not. Regards, Dr Matt Stewart
Brevard	Government	Until we test at least 2 million people in the state we should not open things up. Right now we have tested 300,000 people and have 30,000 confirmed cases if covid-19. That is a 10% rate of infection. In my county we lapsed 20 days before we took the virus seriously. That is why our numbers were down. The reason the curve has flattened is because we have not tested enough people. The people that were sick and elderly were tested first and that is why the spike. There are many carriers walking around with the virus and don't know they have it.
Manatee	General	Please follow the lead of reputable public health officials, not politicians on making life and death decisions during this time.
Duval	General	Before opening Florida up, we need a lot more testing so that it is safe for Floridians to get back to work. The curve may be flat, but that's because we are all still inside. If you tell everyone we are back open, the morons that live in this state will go back to their normal lifestyle and cause another surge in cases. Again, we need testing and a SLOW reopening of the state. Because this needs to be slow and safe, please tell the governor to actually fix the DEO system. We are at the point where Floridians need their money and trying to get them back to work too quickly will just make things worse. Yesterday Ron boasted about all that money in the unemployment reserve. How about he actually gives it to the people that need it??? Florida is the only state where this reserve INCREASED in the last month. This is fucking absurd.
Collier	General	Collier county beach open for exercise

AMERICAN OVERSIGHT

Orange	Construction	Government assistance only lasts as long as taxpayers are paying taxes. No jobs, no taxes, no government assistance.
Hillsborough	General	The Stay at Home order should continue until medical professionals deem it safe and appropriate to start a reopen process. Further measures need to be taken to help protect those that have filed for and are eligible to file for unemployment along with extending the order allowing evictions and foreclosures to be halted at the Writ of Possession stage (at the bare minimum). Landlords additionally need to be protected from losing their home should a tenant fall into this category. When appropriate to start opening it needs to be gradual and in several stages. Some of the “protections” currently in place regarding evictions and foreclosures are going to need to stay to overlap people getting back to work and having money to either pay their current bills or move on to another home.
Palm Beach	General	PLEASE begin the process of reopening in all sectors. I am a teacher, a server in a restaurant and a real estate agent. While I am fortunate enought to continue to receive one of my paychecks, many people are suffering. My 7th grade students are stuggling with the emotional blowback of quarantine, coupled with stress over the new norms in education. I agree with the decision to continue distance learning for SY20, but SY21 needs to begin in the classroom. Their parents, like many of my colleagues in my other two fields, are financially hit and very stressed. There is no light at the end of the tunnel, and that may be the most difficult feeling of all. I urge you to lay out a detailed plan and timeline that safely outlines FL's reopening. If you open many sectors at once, people that do venture out will be spread between them (not congregated in a single place). Give us the choice - go out or continue to stay in - because many will be hesitant at first. Encourage those at high risk to stay home while highlighting the fact that for most, this disease is not deadly. This is like standing at the top of a cliff, finding the nreve to dive in to the water. The longer you wait, the more difficult it is to jump. Let's dive in and reopen. If given the chance, Floridians will prove that we can behave responsibly. We will follow the protocols and continue to mitigate the disease while pumping life back into our economy. We can pave the way towards opening our state to visitors and eventually getting tourism back on track. Let's lead the nation and prove that we can do this. Possible suggestions: •elective surgeries reopen; all routine medical and dental resumes •restaurants accomodate dine in at 50% capacity, tables 6 ft apart, no bar seating, staff wears masks (maybe reservations only, no walk ins?) •retailers can operate at 30%-50% capacity •gyms are at 30% capacity as social distancing allows (reservations may help here as well) •some salon services may reopen, masks are required for staff and patrons •employees currently working from home can continue to do so of they prefer to •theaters can reopen with assigned seating that keeps patrons 6 ft apart
Lee	General	I think you should ope up everything with a requirement for social distancing. People 60 plus and those with serious pre-existing conditions should wait until results from the initial go back to work is evaluated. things like sports venues and restaurants should stage the setting etc. to meet distancing guidelines. ie. 50 to 40 percent capacity and build out from there. people and businesses have to make their own decisions about their activity and respect the health and safety of others.

AMERICAN OVERSIGHT

Duval	Government	The government has literally failed the poorer people, I'm on the verge of losing everything if I dont get my unemplument I haven't been paid since march 15th, and I'm completely broke now. I applied for unemployment on the 17th of March and haven't heard nothing, instead of making a comment section we should take care of our people asap.
Pasco	Recreation	Please consider reopening state parks for camping. They offer people the opportunity to travel locally and continue to self isolate with their family. Campsites around the state are almost always at least 20 feet from each other. This could be a way to open parks with limited crowds and it allows for responsible social distancing. Then as numbers continue to get better the parks can be opened further in a responsible manner.
Duval	General	We think it's way too soon once we open up the state people aren't going to observe the limitations an im afraid we're gonna see the number of cases go higher than they are now
Hillsborough	General	This nanny-state needs to stop— the economy is crushed, folks can't afford to feed their children, and bills are going unpaid. Many small businesses will never recover. The death rate of this virus does NOT justify crashing this country worse than it has been already, and those most vulnerable to it are those already susceptible to other illnesses such as the flu. Let people take individual responsibility and accountability for themselves and determine whether or not they feel safe venturing out. Let them decide if they want to go back to work or attempt to re-open their businesses. People assume risk and weigh consequences on a daily basis— this is just one of those instances. This was mass-induced hysteria courtesy of the media, and the politicians calling the shots are still getting paid while the rest of America goes without. If you have noticed, the people in this nation are already starting to ignore the "rules"— this indicates the government is losing its credibility due to the gross miscalculations, exaggeration, and non-sensical rules enacted over this mess. If this continues longer, the government will be ignored completely even when truly attempting to serve in the country's best interest.
Flagler	General	We can open in phases. I don't think we want to open and have more people infected to sit us back to square one. Testing is the key so the ones that test positive for COVID19 can isolate and quarantine, others that test donate plasma if they had the virus and the once that are vulnerable can and will protect themself appropriately. Thank you.

AMERICAN OVERSIGHT

Pinellas	General	As an employee in the service industry I am concerned about returning to work in the midst of covid. It is impossible for us to social distance from our coworkers and guests even operating at half capacity. Operating at half capacity many of us still won't be needed and the amount of money we will make will not be worth the risk. With us not showing symptoms for up to two weeks, how are we supposed to feel comfortable working so closely with others? I miss working but the anxiety that was felt before the restaurant closures was intense and I can imagine it will even be worse upon returning if done too soon. Even going in grocery stores is terrifying. You can see the cashiers are fearful and don't offer the same enthusiasm that they did prior to covid. People are afraid and rightfully so. Please give us more time to get covid under control and if you are insistent on reopening early, please make it mandatory that we wear masks.
Pinellas	Recreation	Please address HOA, condo associations common area opening. If following social distancing there is no reason I can't enjoy my waterfront community area. Especially since on the other side of fence the Public is using public area.
Brevard	Healthcare	Thanks for opening this up to the public! I am a dialysis social worker and a lot of patients are not able to get very important procedures, medical tests necessary for transplant, and other medical appointments. I think it's important to start allowing these appointments and tests to happen again. I am not a doctor, but I do know that It's important that dialysis patients have working fistulas and often times need appointments and procedures to keep them working properly. Medicare strongly urges us to work toward fistulas instead of catheter use because there are higher rates of sepsis with catheters. Again I'm not a doctor, but it seems to me that the odds of getting sepsis are greater than getting covid, therefore making the lack of medical care a greater risk to patients than covid. I could be wrong, but it's worth considering. In terms of opening up the community, I wonder if there is a way to safely begin opening parking to the beaches and encouraging social distancing at the beach, perhaps with a strong recommendation that people not come and vacation on the beach yet so social distancing can be possible. Thanks!
Broward	General	Do not open quickly! BE CAUTIOUS!! I am primary caregiver to 92 year old mother and daughter with special needs. In addition I am auto immune compromised. Your knee jerk reaction can kill me entire family. PLEASE THINK ABOUT US!

AMERICAN OVERSIGHT

Orange	General	Central Florida, where I live, has had 4 steady weeks of declines in numbers of cases. We need to begin reopening businesses so that people may return to work. Keep the most vulnerable in quarantine. Keep hospitals and nursing homes closed to the public, but allow people to practice safe measures and reopen more businesses. Florida's unemployment is among the lowest in the country and has been nearly impossible for so many to even get approved for due to the process. The unemployment and financial insecurity are terrifying. If we can slowly open businesses that make sense, more people can return to work, we can measure what happens with the virus, then slowly open more. It's been 6 weeks. We cannot remain in quarantine indefinitely. The government cannot afford to support this many people long term. And many who need support aren't able to get it now. I support reopening some businesses on May 1st with safety measures in place. Reevaluate after 2-4 weeks and open more. There will still be people who won't patron, who will stay home. That's okay too. It helps with social distancing. But perhaps we need some data that shows it IS okay to leave your home to feel comfortable with the bigger businesses returning.
Pinellas	General	Please re-open Florida!
Walton	Retail	Good Morning. I own 2 boutiques in Northwesr Florida (30A) area. We moved here 10 years to follow our dream. We have worked hard. For 3 years, my husband, my son and myself worked 353 days a year growing our business. Since this area is seasonal and expensive commercially, we have mid March til the end of August to make the money it cost to operate the other months. There isn't profit on the other months but we break even a few months, the others we tap into our spring/summer sales. Like other seasonal boutiques the timing of this has given restaurants and boutiques a gut punch. Had this happened in Jan. It would have been better because in February we max all our credit lines to stock our stores. This left us financially in a position that we aren't sure we can recover. Landlords are not willing to work with most businesses. Again giving the small businesses another punch. We are not quitters but we need help and we need it fast. For the first time in my husband and my life we had to sign up for unemployment but we haven't gotten a cent. We also applied on the first day for EIDL and PPP. We received either. Our stores have been closed for almost 40 days. No income coming in. We are prideful tax paying people and this is horrible. We have never asked our government for anything but yet if we don't get help very soon....like a couple weeks we will have to go apply for food stamps. We did everything the government has asked we continued to pay our employees, while we could not afford it but we were told to do so and we would get the PPP loan to assist. Last week we had to tell our employees that we could no longer get paid. We do over 1 million a year but our overhead is massive for our retail boutiques. Between our stores and our home (which is modest) our expenses are over 30,000 per month. Again, with no income for the month of April. I also believe and know I can control my business as well as Lowe's and Walmart. Our boutique probably during peak time (July) might do 40 transactions. In May, we might have 30 people come through our doors in a day. I am asking for the small boutique owners that you would allow us to open and have a fighting chance to recover from this. Every day is one day closer to our family having to file bankruptcy. We can control the number of customers that enter our store. We can make sure it is safe and sanitized. Also please consider addressing the commercial lease/rent problems. If nothing else allow businesses like our the ability to get out of our lease

AMERICAN OVERSIGHT

Miami-Dade	Recreation	Disney and Universal are integral parts of the Florida Economy and the lungs of orlando's retail and tourism. The parks should consider reopening when it is safe to do so, by cutting the allowance of guests, setting slot times for entry and exit similar to all their special events. This way long lines are avoided, crowding is avoided and food should be set outdoors in stations to avoid more people inside closed doors. Food truck style. Thermo scanners upon entry to the parks Gatherings such as fireworks and parades should be separated by areas of the park based on "bracelet or tag colors" given upon entry. Masks should be worn inside rides. Hand sanitizers and mask availability around the park and rapid testing available for purchase inside nurse stations around disney and universal park properties.
Pinellas	Recreation	Open the beaches. Being inside all the time is not good for a person's wellbeing. The people that dont to go dont have to.
Hillsborough	Recreation	I would like to see our parks reopened. Not everyone in FL lives in a community with parks and/or sidewalks or bike trails. Those of us who do not, our children are having to ride their bicycles just in the driveway or road because there are no side walks. You don't have to open the playground areas but at least open the parks for bike and nature trails access. I respect that we have to safely reopen our state, but closing our state and county parks were wrong! I'm more susceptible to catching COVOD-19 in a grocery store or any other store that I have to go into for necessities than I am outdoors at a park. PLEASE reopen our parks immediately. Thank you
Bay	Tourism	I am a property owner in Florida. Please lift the ban on vacation rentals effective May 1st. The existing ban has been interpreted by some online travel agents (VRBO for one) to mean that they will not take ANY future vacation rental bookings in the state of Florida while the ban remains in effect. Most owners have already lost all bookings in the month May (and some beyond that), so even if the ban is lifted on May 1st, it will take some time before visitors are actually coming to Florida. I rely on the bookings from May - August to carry my unit for the remainder of the year. God forbid we have any significant hurricane storms on top of what has already happened this spring. Let travelers and owners decide what they are comfortable with. Recognize that even extending the ban another 2 weeks in May has an extremely detrimental effect on the summer bookings if OTAs won't take summer reservations during that time. I appreciate that you included representatives from the theme parks on the panel, but recognize that they represent the interests of hotels and resorts. They likely see independent people running vacation rentals as competition. Individuals running vacation rentals have been largely ignored, and completely excluded from government financial support during this time. Please listen to us now!
Orange	Healthcare	We should push back the opening date for dental offices and many other health care offices that involve aerosols. Sometimes at work you get sprayed with the patients saliva and can't do anything about it until after the procedure.

AMERICAN OVERSIGHT

Clay	Management	We need to have a testing system set up for antibodies and covid testing that specific for bars and restaurants. We need to make sure we are keeping staff and patrons safe. Bars and restaurants should be the last to re open followed by schools. We should an antibody test similar to what NY did to see how the virus penetrates Florida's society.
Pinellas	General	Please open the State of Florida ASAP! There are so many reasons this needs to happen. Extremely important is to have our hospitals open again for those who NEED medical attention whatever it may be. They have suffered way too long. Citizens need to eat, need to work, need to LIVE! I disagree with our children not returning to school. The senior class is devastated. The list is long and this is just a few. I was born in this state and will never leave. But this is not the way to live, shuttered in place. It is very disturbing to see what is happening. Thank you for providing this opportunity to voice an opinion. Until this opportunity there was no way to be heard. And even now you may never see this. Again OPEN THE STATE OF FLORIDA.
Manatee	Healthcare	DeSantis are you crazy or just as stupid as Trump? Do not reopen Florida. We're nowhere near getting this virus under control.
Polk	General	I dont think will be prudent to open the state very soon,we haven't test everybody to make sure who has the virus and who doesn't, plus we still receiving planes from around the country what means that we havent been in an actual quarentine, completed isolated from others,plus we dont have acces right now to ,alcohol,hand sanitizers,masks..ect AN EARLY REOPEN OF THE STATE WILL JUST PUT AS BACK TO THE BEGINING OF THIS ,in my humble opinion
Citrus	Recreation	The biking trails need to be re-opened. Absurd that 300 people can pack the registers at Walmart, Lowes, Public, etc and 10 people can go out on a boat. My son is 13 and on the Santos Biking team in Ocala Fl. He has to ride appx. 100 miles per week to maintain his level. He was 1st in his class in the state prior to this closure. The Santos trail system in Ocala is his home!!!! He can't even ride on the Withlacoochee Trail . I reluctantly have resorted to him riding public roads. I take him to a nice neighborhood with long roads as a last resort. He has 1000x risk of contracting Covid from a grocery trip than he does being outdoors riding his bike!!!! Trails must open ASAP!!!!! So many riders are unsafely riding public roads. Its scary. Let my son and his team mates back into the Ocala National Forest! 10 bike riders is the same as 10 sweaty people on a boat!!! Please!!!!!
Orange	General	I believe Florida is in a position to open with some guidelines, especially in the three most affected counties. It is imperative that people are able to go back to work and try to salvage some of what they had before. In addition, there are so many Constitutional freedom issues. ~ Thank you, Ellen Keyes

AMERICAN OVERSIGHT

Orange	Education	It would be irresponsible to open the state at this time. We still see newly reported cases and deaths daily, the curve has not been flattened yet. If business are allowed to open too quickly, we will just be back where we are for a longer duration. The last thing we would want is to force our children back into distance learning in the fall because we jumped the gun! Please consider what the continuation short term pause would mean vs having to shut down again for months!
Broward	General	My job that was temporarily ordered shut by the City Of Hollywood is 5,000 square feet and only 15 employees that are more than 6 ft spaced out and does not deal with the public.Ridiculious I can't return and the flu is by far worse than this.Millions facing being put in the street will cause far more illness than letting us return to our jobs.Being that returning to work and entering any place of business will require a mask be mandatory until the virus is dead.Far more millions of people will die for many other reasons not to do this immediately!!!Unemployment isn't paying I filed 5 weeks ago.
Brevard	Professional Services	Numbers are still rising in Brevard. As a hairstylist I don't feel it's safe to open yet. I love my job and realize I need to work, but there is no way we can social distance. Even with all the necessary precautions, sure it makes safer for the client but we would still be coming into contact with numerous people everyday. Before the pandemic people had no care for others and would come in sick to get a hair cut, what makes you think people will be honest when asked if they have a fever or if they've been in contact with anyone who has been sick? The fact that we're in such close proximity with others is not safe right now. Anything that's outdoors, like parks and beaches, where people have the room to social distance is ok. People need to realize that haircuts, colors, nails or any other beauty service is NOT a necessity. Sure it may be an inconvenience but no one NEEDS those things.
Pasco	General	End the shutdown, people need to work
Manatee	Healthcare	It is TOO SOON to reopen Florida!! Please wait!!! Keep bars, beaches, parks, pools, and other places that people gather at closed for a bit longer!! Please have park sanitation workers deep clean all playground equipment and tables before reopening!!
Lee	General	Don't reopen the state! It will just make the number of cases go up.
Volusia	General	Way too soon to be opening up. All opening back up will do is spike the numbers again. We do not have proper testing and the numbers will not reflect a proper decline. We need more stimulus checks to support families through this and a stricter lock down with enforcement. Otherwise we will be fighting this battle for years to come.
Pinellas	Professional Services	I think hair salons should be opened IF the owner/workers want it opened and IF they practice social distancing and safe disinfecting measures before/after each client. Thank you!

AMERICAN OVERSIGHT

Pinellas	General	Dear Task Force. No matter what decision is made, you will always have those who don't agree. As a consumer, it has been difficult to get products needed to keep the virus at bay. There have been days of frequenting stores only to find shelves empty. However, what was noticeable was at least 80% percent of fellow shoppers were unprotected, not wearing masks or gloves and this is with safe at home in effect! Imagine how much worse it will get if the order is lifted, the virus will spread like wildfire. I am one of the fortunate people that has an essential business and my heart breaks for those who don't. There must be some other way of boosting the economy until this virus has a cure. May you all be blessed with the wisdom needed to make your decision. Respectfully, Michele Holzworth
Miami-Dade	General	Please re-open the state with some measures in place when people go out that they have to do and abide to.
Volusia	General	I think it is too soon to reopen. We just started to ramp up testing and I think we need to give it another 30 days to see where we are. We're finally starting to see the true numbers in Volusia County because we had such limited testing for so long.
Volusia	General	Gov DeSantis, Great call shutting down the nursing homes. Now that we know most of the fatalities from the virus are over 60 years old with co-morbidties why do we not open the entire economy and let the elderly and vulnerable self-isolate. In the long run if the population under 50 get the virus and acquire immunity when the elderly do come out the younger population will not be shedding the virus any longer.. come out, they will not be contracting the virus from
Polk	General	Open the state back up. At this point we are doing more harm then good. Any with high risk should stay home. Flu has more death tolls annually.
Lee	Professional Services	Please let hairdressers open. I don't want anyone to know I'm not a blond.
Pasco	Management	Ron you got just over 30 days to slow this down before hurricane season. Do your dam job
Lee	Recreation	Please reopen Florida state parks to annual pass holders ..... especially Delnor-Wiggins and Lovers Key. Limiting admission to annual pass holders would help reduce crowds plus allow those of us with annual passes be able to use the facilities that we have already paid for and have not been allowed to use. Thanks!
Polk	Retail	I work in retail and have a heart condition. I do not feel comfortable having retail stores that are not essential open until health officials have said it is safe to do so. I personally think another month of shut down is needed or we will have another serve in cases
Hillsborough	General	I think people should be allowed to make a choice . We dont need a nanny watching over us. Most people are aware of the risks. I have been an "essential " worker at a convenience store through out this pandemic. I see people every day at work , they are aware of all the safety precautions. Give people the option to shop,exercise,and get out in the sunshine

AMERICAN OVERSIGHT

Orange	General	I would be very happy if the areas that are less impacted,open slowly and then you open other areas little by little.On the other hand people who are high risk need to stay home,until the infection rate minimize. The most important masks must be mandatory and social gathering must be maintained. Thank you.
Brevard	Recreation	Open Melbourne beaches and parking. I can go into a crowded store but cant sit on a beach in fresh air and sunshine. Away from people. The beach is the main reason I moved to Florida. I work from home. I brought my job to Florida. I might as well have stayed in MD and helped their economy.
Broward	General	While we are all eager to go out, work, and get involved with our communities it is hard to re-open Florida with the schools closed. Schools should remain closed through the end of the school year, this is the correct action when considering the health of our kids and the future of Florida. As a result, Florida should remain closed with only essential workers being able to work. While this might hurt our economy short-term the consequences could be more if we open too soon. Consideration should be given to implementing additional practices to keeping us safe such as additional measures for out--of -state travel (monitoring who comes in and out), adopting volunteer mobile check-ins so that the State can responsibly track individuals and sanitize businesses/offices where concentrations of people carrying the virus are identified, require businesses to actually adopt curb-side food pickup (while restaurants have adopted carry out many still allow customers to walk in), having pharmacies and grocery stores implement curbside as the only option. We need to keep everyone safe!
Hillsborough	Government	I think it's way too soon to open up the economy yet we still have many cases that are still coming up and all they can think about is not the safety of everyone I work in the healthcare system and yes I do miss the patients but I'm also thinking about their health and my health he needs to re-think about this whole re-opening Florida back up
Sarasota	Professional Services	Open hair salons but require masks to be worn by clients and stylist and clients keep distance from each other. Mandatory disinfect after each client.
Lake	General	I do not feel it's safe to reopen as of yet..we need to get this Virus under control and better understand it
Orange	Finance	Fix unemployment!
Osceola	Healthcare	The hospital I work for in St Cloud Florida has seen the effects on volume but we remain steady helping all those patient's that are still coming in ill thru the emergency room. No elective surgeries for now. I consider we should remain the way it is to prevent the spread in our facility. Many patients are still having complaints and testing is getting done in house to rule out possible cases. I suggest to reopen back in June since temperature and humidity seems to have an effect on this lethal virus.

AMERICAN OVERSIGHT

Orange	General	We should categorize companies/businesses as low, medium or high contact. Let low contact open immediately.. Set guidelines and phases for medium contact. Then high contact should wait 2 weeks to see how the other groups fair. React to how the other groups did. If there is a flare up in those 2 weeks high contacts hold on opening. If no real issue with the first 2 groups then high can open with STRICT guidelines like capacity reduced.
Duval	General	Please re-open the city. I understand that some people will need to stay in but I also understand there are many of us that need to get out and need to go back to work so I'm asking that you re-open the city at this time
Brevard	Education	PLEASE!!! DON'T OPEN the STATE YET!!!
Seminole	Food	With adherence to social distancing and other recommended actions and behavior by the public I think that businesses should be allowed to reopen.
St. Lucie	General	I am afraid that if we don't keep the state closed for at least two more weeks to definitively make sure we've helped "flatten our curve", the non-essential businesses reopening will cause another wave within the month that will double the positive cases and extend this several months. Especially industries that have issues social distancing, even with PPE. It's best to stay closed for a couple of weeks and reopen for summer time season, versus potentially close down again in a couple of months because it happens again.
Sarasota	General	Absolutely ridiculous to be talking about opening our state, when our cases are still going up, we've not flattened nor trended down in COVID cases. We need ROBUST testing and we need to understand the immunity held before any of these decisions are made. Politicians and those demanding we open up our state would have gone to the WTC site and thrown rubble BACK onto bodies as first responders were trying to rescue them? That's exactly what you're doing to frontline workers. Also, would be nice if DeSantis would BOTHER to expand Medicaid in the state. I've been an RN for 30 years and would go back to the front lines to help during the pandemic, but I have no healthcare and therefore will not risk my life. It's time politicians trusted SCIENCE and valued it over MONEY.
Polk	Retail	If I can go into a crowded retailer like WalMart, Lowes or Publix then why shouldn't I be allowed to get my hair cut...why shouldn't I be allowed to go to Bealls...Why can't we do outside dining or even inside for that matter...we need to drop this social engineering experiment and open the state back up...we need to fully open the beaches and parks so people can be out in the fresh air without worry....

AMERICAN OVERSIGHT

Orange	Healthcare	I have been following the progress made on testing and other things the CDC recommends as benchmarks for beginning a phased approach to reopening, both for the state of Florida and in Orange County. Florida has made some improvement in the levels of testing but still ranks 19th in #tests/1M in pop. I have heard absolutely nothing about plans for contact tracing. As I look at graphs of new cases, I can see that Florida may have reached the apex, but there are still too many new cases each day and there has not been a steady decline over 14 consecutive days, as the CDC recommends. PPE and disinfectants are still in short supply, another obstacle to opening up the economy safely. I am fortunate to not have been financially impacted by the actions that have been taken to protect the population from infection. But I refuse to change my stay at home habits until I am confident that decisions are being made based on the data and full adherence to CDC guidelines -- not DeSantis's wish to please Trump. Once those requirements are met, I believe the first things that should open are health care facilities for non-emergency procedures that people have been putting off, probably often to the detriment of their long-term health. There may also be small businesses with minimal direct contact with customers or who can do business through individual appointments. Although I have generally spent much of my discretionary income on hair and nail salons and dining out, my habits are likely permanently changed now until a vaccine is available. I'm certainly not going to visit hair and nail salons just because the Governor tell them they can open for business. And I want to know that restaurants and other public spaces have changed their AC systems so that there's no possibility that contaminated air is being recirculated and spreading infection. High traffic, high touch businesses should be the LAST to open, not the first. They were singled for closure for a reason.
Manatee	General	It seems to me the State of Florida is jumping the gun to get reopened just to save money, and you are taking advantage of the financial desperation of people who wouldn't be so desperate to I understood the need to shut things down until we acquired enough knowledge about the virus to move forward safely for the bulk of our population. What we have determined is that the virus is very contagious, but only harmful to a small percentage of the population. This virus won't be contained until we have developed a vaccination or herd immunity. The only thing we are doing by keeping things locked down is prolonging this process. We can't keep things locked down for a year or two until a vaccination is developed and produced. While all deaths and illnesses are unfortunate, it is not right to "punish" the entire population to save a very few. It's time to let our state and country get back to normal. The state and federal governments have done a good job of educating the population on how to avoid getting the virus. If someone personally decides to go into public and contracts the illness, that is their right to do so and they will suffer the consequences good or bad. If we have confirmed cases, those people should be quarantined, but the responsibility for one's health resides with the individual and not the government. We should not be quarantining healthy citizens any longer. It's time to get things back to normal so we can proceed with our lives.

AMERICAN OVERSIGHT

Brevard	Healthcare	Proper PPE and high volume evacuation system or assistant to suction. More time scheduled between patients for proper sterilization. Longer appointment times. Disposable uniforms or be able to wash your uniforms at work so we aren't taking germs home.
Miami-Dade	Professional Services	Open up! I can't continue to remain without an income. Have not received a dime from unemployment yet. Also, I live in a small apartment with a 9 year old child who is craving to be outdoors going to a pool or beach. No one is wondering about our mental health being locked up. Those who want to stay indoors or are concerned should be allowed to do so. Our freedoms are being taken from us.
Hillsborough	General	I understand that this virus has affected peoples income in a huge capacity. Of course NO ONE wants to be locked up or have their life styles and freedom infringed upon but THIS goes beyond comfort. Yes.....living in a nice house / apartment that you must make payments on is comfort Yes ...driving a nice car that you must make payments on is comfort Yes....paying credit cards bills from purchases that you have made and make is comfort. LIVING A LIFE is a necessity. Life IS life. Dead is FOREVER!!!!!! There is SO MUCH about this virus that we do not know. What we DO KNOW is it does NOT only kill the old , ill and immune compromised. It will kill WHO EVER AND WHEN EVER IT CHOOSES AND HAS. Yes....it has been said that the above are MORE at risk, however, when you use that as a "rational " it states and screams.....THEY are WORTH the risk if we open the state. It has now come to light that it may be causing blood clots in the 30 to 55 yr range. I PERSONALLY know someone in their 30s , perfectly healthy suffered a brain clot and had to undergo surgery..... WE DO NOT KNOW ENOUGH ABOUT THIS VIRUS to put the American people at risk YET. IT IS TO SOON.....TO SOON , TO SOON..... It is careless, selfish, thoughtless and negligent.!!!! FACT..... DISINFECTANTS ARE NOT READILY AVAILABLE WITH AMPLE QUANTITIES. FACT.....GLOVES AND MASKS ARE NOT READILY AVAILABLE WITH AMPLE QUANTITIES. FACT.....TESTING TESTING TESTING IS NOT READILY AVAILABLE TO ALL THAT NEED OR WANT THEM
Osceola	General	How the hell are people suppose to return to work with out being able to keep THEIR WORK PLACE sanitized and free of contact Individual responsibility. Let business owners who want to open, and let me decide the level of risk I'm willing to accept. Like cigarettes, alcohol, HIV. If people are scared or high risk, let them stay home. Rather than worrying about over running hospitals they are empty and our health care workers are losing their jobs too. You think you had a health care crisis, just wait.

AMERICAN OVERSIGHT

Pasco	General	It is too soon to re-open. If we open now it will all be for nothing. When the recovered individuals surpasses those that are sick, then we need to have this discussion. On top of the fact there are no protections for employees who are even more at risk to have a choice to quarentine. It might create further job loss. Even in my case, I have two kids. Schools are closed and if we reopen Florida my employer may say I need to figure it out. I could be forced to quit or eventually be fired. My job also requires travel, meaning flying weekly to different parts of the country. What is there to protect me from having to fly since its a part of my job. While I am not at risk, I don't want to feel like I am being forced to potentially get sick.
Manatee	General	County commissioners and other local officials should be listen too and have some part in all decisions relating to opening businesses and other establishments. ONE SIZE Is it going to work. More testing needs to be done. Maybe opening up a business should be tied to testing of employees. And possible checking up temperatures at the door like they do it certain clinics and other health establishments.
Volusia	General	Open our state now!! The numbers don't justify the lockdown. Depression economy right around the corner and I don't want my children nor future grandchildren dealing with that. We can make a change to this direction by opening up our state now. I am attaching an article that was written by a medical doctor - truths about the coronavirus. Long but informative with medical facts!! I would also like to say that it seems the democratic governors and democratic elected officials (Jerry Demings as an example) seem to want to keep everyone locked down as long as possible - but the republican governors and elected officials want to open things up- seems political to me. Time to open it up!! Here's the article for your research. https://coronavirustruths.godaddysites.com/
Manatee	General	more & more cases are adding to the daily totals, I can't see why you would even consider opening the state. I dont think anyone would social distance if they opened things..we went to Lowe's Thur and even the employees weren't wearing masks.if companies aren't making their workers be safe, why would anyone think the public would either. There is no way to social distance at the beach safely.
Osceola	Education	I am an older teacher with an older spouse. We need to be very careful about reopening schools because (in my experience) many parents send obviously ill children with fevers and rashes to school. They are sent to the nurse. The parents can't come to pick them up, and the nurse then sends them back to class. Schools should have a dedicated "sick room" where these children are sent till their parents pick them up or the school day ends staffed by a nurse separate from the nurse's office. Attendance requirements should also tske our new normal into consideration.

AMERICAN OVERSIGHT

Pinellas	General	I do not believe the state should open up yet until the covid 19 crisis slows. Yes the number of cases in Florida has slowed and the curve has flattened but the number of cases each day are the same as a few weeks into the start of the pandemic. My concern is a secondary spike and with there more cases than ever in the state that will inevitable. Now with school out for the rest of the year and appears no summer camps for children. Parents like myself and my wife with no family help will jeopardize our jobs because we will need to split time at home to help virtual school our children and will not have child care for an unknown time. We have children ages 3, 8, 14. My child is also a type 1 diabetic so even if camps open I would be scare to send my child because other families my not be taking this as serious as they need to. Him getting sick with covid 19 will be a certain hospital visit. The thought of my child going to ER and be quarantined away from his family and parents not understanding why is a huge fear. You can ease those fears by continuing the safer at home order. Thank you A concerned citizen
St. Johns	General	It's time to re-open the economy! The numbers just aren't playing out and we will already struggle with tourism because of the rest of the countries fears. Let people get back to work with guidelines around crowds, etc. Also institute antibody testing state wide so that people understand how far this virus has already spread and get to a real death rate. More people will die because of the consequences of lost jobs and inability to access healthcare then this virus.
Seminole	Healthcare	we need more places in Seminole County to test for antibodies. I would also wait another month before letting businesses open up. We are a smaller dense community so this must be taken into consideration especially with hair salons, barbers and department stores. I would wait another 30 days for sure.
Duval	General	I'd like to see business to start opening back up with strict guidelines especially social distancing. I feel our economy needs to start getting back to some kind of normal, whatever that is, not sure myself what "normal" is any more. People need to return to work for many reasons.
Collier	General	We cannot reopen the state to business until such time that we truly believe COVID-19 is under control. This includes but is not limited to the opening of beaches, personal luxuries such as hair salons and nail salons, gyms and activities centers.
Osceola	Retail	I am a store manager. I think we need to limit the amount of people allowed in the stores. Also make everyone still wear masks. Limit the hours of operation. To give the stores time to clean and disinfect them. We need to keep everyone safe.
Duval	General	How about to get things opening up practice social distancing as a must and also make it mandatory to enter places with face mask .

AMERICAN OVERSIGHT

St. Johns	General	It’s to soon to open things back up if so we will be taking two steps backwards! But our government from DC to local Florida do not care about the American people and don’t listen period ! The system is so broken for so long does not matter what your opinion is anymore , first off let’s get rid of this joke of a president out of office before he does anymore damage
Lake	General	DONT OPEN . people like me with pre existing conditions will be screwed . im also a hairstylist and there is really no safe way to open that industry yet . i havent received any unemployment either . but i rather be broke then dead . please wait til june !!! there will be another wave if we dont . theres already 50000 dead .
Osceola	General	If you open the state, I'd like employers to still offer remote working options for those of us not wanting to be out in public yet. I support minimum options opening first but if it gets bad again, then we close down again.
St. Lucie	General	As much as I don’t want to be cooped up any longer I feel it is best we stayed closed to protect each other.
Charlotte	Tourism	Open up the state parks. Ramp up testing kits.
Sarasota	General	I do not think we should ease restrictions until we actually have the testing in place. There is no way you can social distance from personal services such as hair, nails. Many people do not wear masks or practice social distance. The people who do need to be protected from these people. We need an enforceable plan in place with testing for all before restrictions are eased.
Volusia	Accommodation	I would have restaurants have customers go to the restrooms and use the potty then wash hands before being served.
Duval	Professional Services	To soon to reopen. You will cause a lot more people to get sick. I’m waiting now on my results from the test
Sarasota	Tourism	Please open up restaurants and hotels using safe distancing. Keep safe measures In place and space tables apart to insure a healthy space for each patron. Or country Has done well and openings should begin next week, in my opinion. Thank you for letting me be part of this most urgent decision.
Broward	Recreation	I would like to see our beach opened to at least walking along the water. I've been doing this for 16 years and normally at sunrise there are only a few people out anyway. I realize the issue with partial anything and would rather play it safe. Requiring face masks and no sunbathing? I honestly don't know if it would work but that is my personal desire. Not sure i would go to a restaurant in person now even if open with restricted seating, I'd rather just get take out.

AMERICAN OVERSIGHT

Palm Beach	Food	I feel that restaurants should be able to open with proper health and distancing guidelines including opening at first at 50% capacity and then graduating to full capacity 4 weeks later. The key will be proper policing of restaurants making sure that they are adhering to the policies set forth and if they do not then they should be penalized or closed. During this quarantine it has amazed me that businesses such as Grocery stores and home improvement stores have been permitted to stay open while other businesses were not. Furthermore until recently no capacity limits were placed on the essential businesses and they were extremely crowded with no guidelines in place, only of recent have guidelines been put in place. Florida can open up safely by making guidelines for all businesses and consequences for those that do not follow them and then let people make their own decision if they want to go out. Best, Rocco Scarfone
Lake	Healthcare	Considering the challenges we have faced related to appropriate materials for our healthcare providers such as PPE , ventilators, etc., we should have a very detailed plan in place. Our first responders should have a well stocked stock pile of necessary equipment and PPE ready at hand to address a possible reoccurrence of covid 19 or any other virus or natural disaster. It is apparent to me that we cannot rely on Washinhton to do their part in case of disasters, we must take care of ourselves. Once our plan to reopen is in place and the necessary supplies are stockpiled, phased opening will be safer and likely be more successful.
Miami-Dade	General	Open up this state. Quit living in fear. The models and numbers have been wrong. Let us who want to to go back to leaving do so, those who want to be fearful or health at risk stay home. Please Govenor Desantas u have been an excellent job but in this you are not leading the way.
Broward	General	Florida should not re-open businesses until medical professionals say that it is safe to do so. The number of corona virus cases in Florida keep increasing. If the economy does open up, I honestly would not feel safe. The lockdown should stay intact throughout the summer also just to be safe. I hope you consider my message. I may be 17 but I've been through so much in my life, I just want my friends and family to be safe.
Lake	Finance	There should be more support for state universities, teachers, and recreation.
Okaloosa	Government	Time to open up Florida. Mortality and morbidity numbers for COVID-19 have proven to be no worse than for flu. There is no reason to prevent healthy people from getting on with their lives. Take reasonable precautions with at-risk portions of the population. Quarantine sick people. But use actual data, not early alarmist projections and models, which were ALL WRONG.

AMERICAN OVERSIGHT

Manatee	Retail	Really closing 24hr stores at 8:30, oneway isles and closing entrance/exits! The very idea of a 24hr store is so people could shop al there leisure. Instead you close at night and cram people together threw one entrance. Its like Walmart is doing there best to spread this virus. If im in a oneway isle and someone coughs or sneezes in front of me, i will violate your rule and not continue threw there sickness Do you know people live at night too? People must think this virus only comes out at night like the Boogeyman. Well i got news for you. Before you started closing customers could go shopping at 3am and not encounter even one person! And now in order to shop i have to RISK MY LIFE. Please stop overthinking this and return to the safer normal? Your customers will thank you and maybe live longer to shop another day.
Broward	Professional Services	Professional service providers have to ensure their facilities are cleaned prior to customers returning. They have to ensure hourly wipe down as each customer exits etc. No more than 10 should gather including staff. No waiting area should be open. Gloves and mask required for all staff and customers. Staff should be change gloves and mask after every customer or services is provided. Hours of operation remain limited nothing pass 9pm...Barber shops, salon etc. No tatoo parlors or bars unless they gather with lessbthan 10.
Escambia	Recreation	.
Volusia	General	Open up in Phases. Phase I: All retail stores should be able to open up with curbside service, no more than 15-20 in the store (depending on the size) that count should include employee's too. People should be required to wear mask and gloves inside. (Employees and Customers) No one can't try on clothes. Restaurant should stay the same as right now delivery and curbside (till we can get the % of positive cases down.) Salons should be able to open also, the same rules no more than 5 at time (number should include employee and customers) depending on size of the place. Warehouses and Smaller offices should be able to open up wearing gloves, mask with 6 ft distant. (depending on the size). Any outside jobs - should be working Large Office buildings - people should work from home for now (till % goes down). Keep the stay at home order and curfews (10 pm to 5 am) Phase II: Depends on % of positive cases. Disney Springs, Outlets, Malls and middle size office buildings. Phases III : Depends on % of positive cases. Hotels, Theme parks, Cruises and Large office buildings.

AMERICAN OVERSIGHT

Pasco	General	We need to open everything, beaches, amusement parks, restaurants, malls and so forth. People need to use mask, wash hands etc. using the beach for exercise only without sun bathing makes no sense. I work in the health field and have been exposed to many cold, viruses and flu's. At work we must wear mask anyways and wash hands constantly. I feel our economy needs immediate attention, if we don't get our people working again it could be more devastating. We will continue to fight diseases as we always have in the past and will be in the future. It's all about educating people and making sure that our businesses offer employees, customers and patients to provide mask, hand sanitizer even checking temperatures and whatever else is needed. We need to continue cleaning and wiping down everything and not letting our guard down. This is my personal opinion let's be smart, pray and learn from our past and move forward.
Volusia	Tourism	I think we need to be very careful when opening our state back up to tourism. There are many states that are still have more issues than us. I believe if we do not set strict boundaries we will have people attempt to "escape" to Florida again causing us to have another spike in cases. While we need tourism for economy. I think that needs to be one of the last things we reopen.
Manatee	General	We think opening up gradually over May is the appropriate decision. The governor has done a great job monitoring open hospital beds. The very workers we were trying to protect are getting furloughed around the country due to lack of patients in the hospitals. Open up slowly having businesses keep social distances. Restaurants should be able to open at half capacity gradually over May opening fully by end of month or by mid June. Businesses can check temperatures of customers and employees.
Marion	General	I believe we can reopen after more testing is done. As of now I haven't been tested and no one I know has been tested. I am 55, and a ll year cancer survivor, and I also have high blood pressure.So until that is done I feel we should remain closed
Martin	General	My husband and I feel that opening restaurants and other food eatery's should be delayed until at least June. There's just too much uncertainty right now. How would owners protect themselves should one of their employees or even a customer come down with COVID19. I see lawsuits - lots of lawsuits. It's just not worth the risk. Do owners even know whether or not they can get supplies?
Lee	Recreation	Open. People be smart. Business need to open. Schools too in the fall. This has been around a long time before all closed. Take precautions yes. But open.
Brevard	General	DO NOT OPEN FLORIDA YET! We have to get thru this the right way. Please listen to the experts and not the politically driven protesters. PLEASE USE COMMON SENSE and not what's coming from the bankrupt administration. Dr. Fauci is what we need right now. Experts will get us thru this, not politicians. If you attended college you must have an educated brain telling you whats right and whats wrong. If you're only interested in YOUR JOB then we don't need you.
Pasco	General	We should keep non essential businesses such as bars, dine in restraunts, stylists shops closed for at least a few more weeks. Elective surgeries should resume.
Lake	General	Do not open state.

AMERICAN OVERSIGHT

Seminole	Information	I think it so stupid to open the state at this time. By opening it up your taking chances of infected people to infect us that have stayed home like ordered. Yes we need to get our state back up and running but not so fast to infect and kill more people. Granted I'm going Bonkers staying at home but I'm a high risk person. 72 yrs old, diabetic, heart attack and immune system is not up to par. Please governor Desantis dont be a flunky for a present who talks out his ass on all things pertaining to the virus. Ya right inject yourself with bleach.this way he will have less voters to vote against his dictatorship. Again governor Desantis. Listen to the doctors, scientists and reopen the state when we are much safer. Thank you
Lee	General	I vote to re open florida in a safe way . We all need to get our lives back and jobs. Our economy is suffering and the longer we prolong this process the worst it will get in the long run . I hope that we can have things back to normal asap . Thank you
Pinellas	General	I feel we need another 2 weeks minimum like May 15th stay at home. Schools maybe in the fall. Small business as long as they practice cdc guidelines with social distancing. Parks & beaches limited for a couple more months. Areas counties where things are still growing like our state is still multiplying very limited again must follow guidelines. Large business with very strict guidelines. Work from home as much as possible. Restaurants follow limited occupany and follow guidelines. Bars distancing I doubt will happen. Otherwise, our state needs to be very careful with our elderly, very careful.
Pasco	Recreation	Please open Our resorts and Campgrounds. We know how to Social distance. We need to be outside getting vitamin d and exercise and interacting with our camping friends. It's our bodies and we want our rights back. Thanks
Seminole	Food	I feel that many restaurants should be aloud to reopen. Especially when there is outside seating along with inside, give guidelines to allow reopening. Restaurants give people excitement with friends and families, something much needed. People's spirits need to be lifted. Small businesses are hurting so bad. Let people then decide if they want to get out. I hope this is not a joke and people are reading this.
Flagler	General	I think we're jumping the gun by trying to reopen things way too soon. There are people out there who are not cooperating with the social distance or wearing a face mask while in public oh, this is putting us at risk already. The numbers are still high and I think we need to wait a couple of more weeks before you try to reopen things. They should be opened slowly and I feel only businesses that are essential such as Banks etc should be opened first.
Escambia	General	I support CDC's guidelines concerning not reopening sectors of the economy until Fl has experienced 14 days of decreasing coronavirus cases, deaths, coved hospital admissions, etc.
Osceola	Recreation	Please open all beaches. If we can't open the parks, we should at least have the beaches open. Thank you
Lee	Recreation	No face masks should be required!
St. Lucie	General	Please don't open Florida yet, our numbers of corona virus is still climbing,please think of people.i have asthma I don't want to die, no one wants to. Our economy will pick bac up.if you open up the state it will just get worse! Thank you

AMERICAN OVERSIGHT

Brevard	General	I do not believe the state should reopen until there is adequate testing. My husband is a smoker and my mother has diabetes, I do not want to bring anything home to them if I am told to return to work. I understand that we do not want to devastate the economy, but it is also not worth someone's life if it is preventable. At least follow the guidelines provided by the White House with a consistent downward trend, if not we will have visitors from other states and community spread will continue to happen.
Pinellas	General	Please do not open nonessential business in the state until the rate of Covid-19 infection has decreased for a number of consecutive days. Now is too soon.
Pinellas	General	Do not open the state prematurely. Extend safer at home order into May (maybe until June) Cases are continuing to increase. If you open up some beaches, pools, some businesses people will violate safe distancing requirements. I see this now! The fitness club I belong to will charge me for personal training at $500 a month and my contract won't let me out without a months notice by certified letter. I had open heart surgery one year ago and can't risk getting Covid 19?at the fitness club. I have been exercising at home. I can wait another month until it's safe to go to the fitness club. Do not open up fitness clubs where people are sweating, breathing heavy as they work out and personal trainers are in close quarters. We do not need to ignite a second wave of Covid 19
Brevard	General	I think the reopening should be gradual and measured. For instance, I think any retail setting should be for 50 percent of capacity. It is time to start bringing the economy back on line.
Hillsborough	Government	Open up Florida! I am 69 and I know how to take care of myself. By now people in the high-risk groups should know the risks. Please give those of us over the age of 60 Credit for being able to take care of ourselves and take personal responsibility for our own PPE and social distancing. It is our group that is getting sick and we don't need government help to stay healthy. Intervening with patients at nursing homes is important and I encourage the government to continue with its work in that area as well as public service announcements. I don't want my generation to hold up the young people of the world from getting on with their lives. Government cannot prevent all deaths There are risks in every day life and government cannot remove all of those risks. Those in the liberal media would probably have the government shut down all of the highways all over the country because there's a bunch of people dying and getting hurt there. This lockdown needs to stop. Open up Florida. Melvin Moore Age 69 Tampa Florida
Pasco	General	Just an opinion I think it's too soon to open up but that's out of fear ,I only pray you will do this slowly and under guidelines so we dont have to go through this again but even worse Thank you to all of you and Gov Desantis also !

AMERICAN OVERSIGHT

Seminole	General	While I want the state of Florida to reopen its businesses, I think at this point that it's just too early! We're still seeing new COVID-19 cases every day, and sadly so many deaths, and I think it's just too risky right now. Once we have a leveling off of new cases diagnosed, I think we could revisit this issue. We need to make sure that our hospitals can handle the number of patients and don't get overwhelmed. Thanks for allowing my input!
Broward	Retail	Given how little is known about this virus and our ability to treat or recover from it, any reopening at this time without extensive testing that is accessible to all Floridians is foolish at best and possibly downright malicious. We have a high senior population, as well as a high poverty rate. The majority of people are not convinced that it is safe to live life as “normal”. Face masks and sanitizer are not yet readily available. Focus instead in getting out the unemployment funds people are still waiting on and not letting large corporations syphon off stimulus funds meant for small businesses. It’s not a good look and we have a record of who they are and will be sure to avoid doing any business with them in the future. Also, businesses who pull employees back in without an abundance of caution, strict enforcement of social distancing and an abundance of PPE, the state and federal government must do their job in keeping citizens safe. Scientist will figure this out, but they need time and the state and federal governments are choosing to make this time more painful than it needs to be.
Osceola	General	Please open the economy! Being homeless is more deadly than the virus.
Hillsborough	Education	Please do not reopen schools, k-12 any time soon, at least til August to reconsider again depends on situation. State may supplements other online bases /website, laptop, internet for students to use from now until schools reopening, continue helping with weekly meals. For families that need kids to go somewhere if no one to watch their kids, support some day are if they want to or they have to look after their own kids, like everybody else that sacrifice their jobs to stay home with kids, those stay at home moms/dads do not get paid but they take it, because they choose kids before money. State and Governor and whoever responsible should consider seriously about health sickness/illness that will hit children and family if school rush to open too soon. Somebody are going to complain no matter choice might be, but students/ children have to come first, not liberty in the wrong time, disease time. And please push forward to be the state that see children’s life important to protect, not politics or money, or to favor some lawmakers. Thanks in advance.

AMERICAN OVERSIGHT

Orange	Professional Services	Hello Governor DeSantis. My wife owns a small hair salon in Altamonte Springs. She as well as the other hair stylists need to get back to work NOW. They already have a plan in place for a safe opening if you can just give the OK to do so. Lives are at stake here, and I'm talking our financial lives. The plan is for the hair stylists to coordinate their schedules so only a couple of stylists are there on a particular day. The clients are advised to only show up on time and not early so there are not people congregating in the lobby. They stylists are going to wear masks and each station will be sanitized, as well as the shampoo bowls, after each client. We also feel that the clients, as well as the staff, are smart enough to know not to come in if they are not feeling well. We feel these measures will allow for safe operations of the business as well as the safety of everyone.
Putnam	Recreation	Please consider opening parks in rural counties such as Putnam County.There are many senior citizens who use the parks for exercise and to be outside . Social distancing should still remain in effect .
Orange	General	DO NOT OPEN !!! DO NOT OPEN!!! DO NOT OPEN !!! Nothing has changed for the better, we do not have a vaccine. We do not have a treatment. My mother is extremely high risk. In the last year she has survived a triple heart bypass, and a stroke. She has diabetes and asthma and her life is utterly precious and vital. She deserves to live. Ignorant Republicans that refuse to believe in proven science and doctors and professionals who all say “we are NOT READY” to remove restrictions cannot be allowed to dictate policy against every measure of public safety and reason. Do not give in to the ignorant. If they want to infect and kill their mothers and fathers, they are welcome to, but they do NOT HAVE THE RIGHT to kill mine! Not for the sake of greed . If you reopen this state full of elderly every death will be on your soul. Think of someone else and weigh the worth of that life.
Martin	General	Please reopen the state. We can no longer continue down this path. I am married to a health care provider who works in a operating room at a local hospital. Her hours her hours are have been cut back to one day a week due to cancellation of elective surgeries . This is impacting us financially and emotionally. Let’s use common sense when attacking this problem by protecting the population who are most vulnerable. Thank you for your time and god bless
Sarasota	General	REOPEN THE ECONOMY NOW!
Pinellas	Professional Services	I don't really care about any other area except dog grooming. All other business's can remain closed until the state determines that they are safe to frequent. I just shelled out $160.00 to get my dog to the vet for skin and ear issues due to him not getting groomed. A lot of our fur babies need regular grooming to maintain their coats//skin allergies. Please consider re-opening dog grooming so we can get our babies back on track. I just spent money that could otherwise have been used to buy food and pay bills. This can be done, via curbside drop off and pick up. Thank you for your consideration.

AMERICAN OVERSIGHT

Pinellas	General	Please follow the recommendations of healthcare professionals, not business leaders, about when to allow beaches and businesses to open. If we open too soon, not only do we put people at risk, we also invite a second wave of infections. And, I believe a second wave of infections would be extremely demoralizing and have a very, very bad effect on the economy.
Brevard	General	Open the state now. We're the Sunshine State, Hot and humid, all these things destroy the virus. It is time.
Pasco	General	Reopen Florida. But, with social distancing guidelines that business are required to follow for safety.
Osceola	General	I really feel that socia distancingl should remain for an extended time. Retail. entertainment venues, restaurants. churches but no sports or Disney related activities at this time should slowly be opened. Beaches could be opened with some restraints. Overall, if the cases continue to decline gradually opening by mid May would be suggestion.
Miami-Dade	Healthcare	Strongly recommend re-opening and allowing elective procedures. The number of Covid-19 cases and hospital admissions are starting to decrease. The argument for preserving PPE and ventilators was valid at that time, but is no longer the case as fortunately our hospital systems have not been overwhelmed. There are hospitals, healthcare workers, and private practitioners that are suffering great financial losses at this time, adding to unemployment and dire economic circumstances. Allowing for elective procedures is part of phase 1 as per the re-opening guidelines by the White House. Please allow elective procedures to be performed as soon as possible.
Orange	Government	Please do not open Florida until we can prove to Floridians and tourist that workers in Florida have tested at a rate of 70% positive for antibodies to the Coronavirus. I did not see antibodies testing as a requirement to be met before Florida to re-open. I think it should, testing will help to build confidence that Florida is READY.
Orange	General	It’s too son to be thinking about opening. I fear another surge of the virus.
Putnam	General	I believe that the Safe-At-Home order was an overstep of power. I believe that shutting down restaurants and small businesses was a colossal mistake for Florida's economy and has thrown countless thousands into poverty and hunger. Bankruptcies are already starting and many business will be unable to open up again. Each day of delay adds to that number. The projections and models for the impact of Covid-19 have proven unreliable and detrimental to the physical, spiritual and mental welfare of Florida citizens. A quarantine is for those who are ill and a lock up is for those who are healthy. I do not believe that the Florida governor or anyone has the right to deny a means of support to its citizens. End the lock down NOT, do not wait another day. The curve, if there ever was one, is well and truly flattened and hospitals, clinics and other medical facilities are furloughing their staff for LACK of patients. Stock the insanity immediately.

AMERICAN OVERSIGHT

Collier	General	Reopening beaches - control the number of people allowed onto the beach and allow entry onto the beach for exercise only. Enforce social distancing. Grocery stores - make masks mandatory and control the number of people allowed into the stores. Enforce social distancing. Gyms/massage businesses/hairdressers/nail salons - stay closed until further discussion. All businesses - stay closed until further discussion.
Osceola	General	Open Stores that can maintain social distance. Not fair to have Walmart thriving but other clothing and household stores remain closed. No close in your face places like barber nails and restaurants yet. Opening strip mall stores would put a lot back safely to work. We've learned distancing, masks and washing. Ironic that Walmart who ruined small town businesses years ago is doing it once again.
Hillsborough	General	Please, please follow the advice of health experts on this.
Lee	Recreation	Live in a small new development with only 40 homes at present. Reopening the pool and beaches at this point is critical even with restrictions . The extreme heat we are experiencing combined with age and condition of most retirees... makes walking or biking impossible. But if we had an opportunity to get in a pool to exercise would be valuable for us. Please consider to reopen since there is much inconsistency throughout Lee Co many pools, facilities are open. Thank you
Pasco	Management	I do not believe that it is time to reopen Florida. I am a Pilates Instructor and have had my job put on hold which means I'm not making any income. I would love to have my job back, but I also am very afraid of contracting or spreading the virus, so I am glad that the state shut things down. It was a very wise decision. My children are in 1st and 3rd grade. I have become their education administrator 5 days a week to make up for the closing of the schools. I feel that closing the schools the remainder of the school year was a great idea to prevent the spread of the virus through our children. So with that same logic in mind, I cannot understand why Florida would allow adults to congregate together and spread the virus. I don't want to see Florida have a spike in sick people and deaths because we were impatient. We need to be smart.
Marion	Government	Open, but with social distancing.
Palm Beach	General	I believe we should do a reopen with restrictions. Open beaches without allowing people to sit on the beach, open boat ramps with no anchoring, open businesses with guidelines. We do not need to have families fall into total financial ruins! As for schools have daycares that can take the kids that have two parents working to do school virtually. Do not open the schools until the fall as kids are finally getting adjusted.
Sumter	Tourism	We really need to get Florida open for business. Our small business are suffering drastically with a virus that may not have a death rate higher than the flu! It's not fair that unemployment is broke and these people cannot access needed funds to be able to live!! Please open Florida now!!!

AMERICAN OVERSIGHT

Manatee	Tourism	Short Term Rentals and people arriving from hot spot states. There is NO enforcement of quarantine, no follow up of community spread from renters, need to keep short term rentals closed, no one knows who is coming and going at short term rentals, nor enforcement by Sheriff, Code Enforcement, residents are told to contact DBPR which have no authority over short term rentals but to to enforce licensing, no authority to enforce people coming from hot spots to short term rentals. All the test and mask and whatever will not be of any significance unless Florida stops checkins at short term rentals, and again there is no one enforcing De Santis Mandate. Authorities pass the buck and point finger to another agency to enforce, BIG JOKE!!!
Pasco	Healthcare	The state should open full force. The recovery numbers are well about the death rate.
Duval	General	I just came from shopping at a Walmart near me, which has markings on their floors for each isle to designate the direction of traffic flow to try to help keep their shoppers safe. I observed only about 1/2 of those people shopping obeying their requirements for traffic flow. if this is an indication of our people being able to follow common sense and the rules laid out to be safe, then we are in a world of hurt for the upcoming weeks and months with this getting more out of control.
Pinellas	General	" LISTEN TO & OBEY / FOLLOW ORDERS & ADVICE FROM MEDICAL / HEALTH EXPERTS FIRST BEFORE THE MONEY PEOPLE SO AS THAT YOU DON'T SPREAD THIS CHINESE WOHAN CORONAVIRUS ANY FURTHER OR WORSE YET "KILL" ANYBODY !"
Palm Beach	Healthcare	I am an RN and my husband a fireman. We feel strongly that the state should open as soon as possible. Beaches, playgrounds, and parks must all open at the same time to prevent congestion at any one location which wouldn't allow for enough room for social distancing. Masks should be allowed but NOT required for the general public who use tend to use them incorrectly, and masks make people touch their faces way more frequently. Wearing a mask for long periods of time can result in fainting and injury from reduced oxygenation. Cloth Allface coverings have been PROVEN to actually increase infection (https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4420971/?fbclid=IwAR1Uk62bLDmEIkBmLFRA0qNG5mGRlnTbnpOD8Vhv77Ppr6MqtgZsTbk7CDI). Businesses must be allowed to open as long as they can allow social distancing FOR NOW but there MUST be a time when they can operate as USUAL. The sooner the better. DO NOT extend the state of emergency. Let's stop being so terrified of an illness that we stop living.

AMERICAN OVERSIGHT

Hillsborough	General	Lets take this slow and lets start with making the public wear masks!!!!!!!! South Florida should be on a separate time line then the rest of the state- they have 60% of the cases. I am concerned, but this virus will to disappear overnight. If you are not ready to go out or if you are at risk- it is best stay inside and not go out. We all can do our part- social distance and only go out if needed. If you are sick, stay home. Employers need to offer sick time if you or a family might have been exposed and not be penalized – this will limit people going to work sick in fear of not meeting their work demands or using time they just do not have. Elective surgeries MUST start now. It is sad that employees work for a hospital or the back office support are losing jobs because are all focused on one virus. There are other medical conditions that people need to have addressed. Teledoc will be the key to having patients see their primary care physicians. In terms of school- online learning can not continue. Parents cannot be teachers and meet the demands of their jobs. This has caused more of a mental stress on people than anything- there will be a rise in divorce and substance abuse if this continues. When school resumes- smaller class sizes will be a must!!! Salons on gyms should open in the next few weeks. Salons should only have 1 client at a time per hair person. Gyms should limit people and only offer classes if everyone can keep their distance. Sign ups will be a must for stuff or block of times and only have X amount of people in at a time and then disinfect everything after every use! If users do not disinfect- they should not be allowed to return. Long term care facilities and nursing homes my goodness get the employees tested daily and give them incentives!!!!!! Daycares should start opening by mid May if they have closed and implement new guidelines. Little toddlers need to constantly watched at all times. They should have access to ALL supplies to disinfect supplies. Disney- what a disgrace- you are making all that money from streaming and you are laying off people??? For sporting events- they should consider letting fans go to outside football games- start seating super early and do not allow tailgating at first. It should be card only while in the stadium.

AMERICAN OVERSIGHT

Martin	General	The American people and residents of FL agreed to "Shelter in Place", in order to slow the spread, and not overwhelm our hospitals. Now that is achieved nothing else needs be said, government must release the orders given or be an oppressor. You have acted with a singular focus! Corona Virus, when and how will you measure, the physical, emotional, mental, and finical damages caused by this fear? All the brightest minds, scientists around the globe, and government agencies have acted in on this for months. And still they did not have the ability to control a nature or viral spread. What makes you think your state task force is going to do better? They can't! Americans are fed up with experts, panels, science teachers, etc... dictating to them. Dictating to them with inaccurate models, inflated models, absurd assumptions, enough of this already. Americans were born free, and understand Liberty. We are willing to fight for it! Even against our own government! Continue to suppress us and find out! This is not a threat, it is just true. Governor Desantis you don't need to feel responsible for the health of residents in florida, your not better or worse than all those experts who couldn't stop this virus either. Take a breath, and release us from these unconstitutional burdens! It is the right thing to do, what a real leader would do. Make yourself a small player, and make the people a big player! We are going to figure this out not you or your F&%$#*@ TASK FORCE! Just what we need another unelected committee to decide for us? I don't think so, send your task force HOME! Release FLORIDA NOW!
Brevard	General	As much as I'd like everyone to get back to work and start making money , I feel like it is still way to early to end the stay at home order. Yes our cases may be slowing down but as soon as everyone goes back to work and the quarantine gets lifted I'm certain we will have a spike in cases larger than ever.
Seminole	Professional Services	I am a Hair stylist . I understand the need for reopening the state and the economy ,however where salons and babershops are concerened I do think it's appropriate to take a slower approach. Unlike retail store and supermarkets , we have a lot of physical contact with our clients. We may wear masks but that doesn't change the fact that we are touching their scalps and its's incredibly difficult to cut hair in gloves safely. Also childeren will be getting haircuts, it's highly unlikely that they will keep a mask on throughout the service . Aslo keeping everything sanitized after every client - how will we get cleaning supplies , sanitization products, gloves etc IF hospitals can't keep up on their supplies and local stores can keep them stocked ? I think Salons and Barbershops need to be held off until the second phase , with all above points being taken consideration .

AMERICAN OVERSIGHT

Volusia	Food	I am the general manager of a restaurant in Port Orange. As much as this entire thing has been hard for my family and Me, I am scared of the restaurant being open too soon. I have a small immune compromised child at home, as well as a mother with kidney disease on dialysis. The responsibility of having to reopen my restaurant when there is still so many sick people out there is very scary for me. I just want to be sure that I will be safe and my family, as well as all of the employees I have to look after and also the guests that will be coming into my restaurant to eat. I want to be working so badly, and I want to give people a chance to come and sit down and eat our food and relax, but I just want to be sure that there is a clear and concise plan on how to do this. I need the guidelines to be clear, and us to be sure that we will not be in danger of simultaneous exposure to covid-19. Thank you for allowing me to give my opinion on this matter. I appreciate your time. Thank you, Alexis
Marion	Healthcare	Free testing for every single resident, firr and foremost. Essential employees and stores only need to be the primary focus. After essential, should come restaurants dor take out only. Then daycare, children's activity hubs such as the libraries. I do not consider tatoo parlors as important right now. Beauty salons, barbers with limited capacity only may be considered. Construction crews, landscapers, pool installers, home repair, with distancing. Farmers markets are important but with limited capacity at all times. Wal-Mart's and grocery stores need to be enforcing capacity. Way way way too many people at one rime, still. Social distancing has to be enforced somehow. Gatherings need to be controlled. Parks should be open with limited capacity. Boat ramps should be open- period. Trails for hiking, ATVs and Off road vehicles should be open now. Campgrounds with an empty spot between each site and control the capacity. Florida has not done enough yet.. Too many people on the roads and in stores.
Broward	Healthcare	Governor DeSantis, PLEASE do not reopen Florida until all medical opinions agree that it is safe to do so. I understand the effect on the economy but lives are so much more important. Thank you for giving us residents the opportunity to give you our opinions!

AMERICAN OVERSIGHT

Lee	General	Please ease into opening up restaurants and bars, beaches, parks, libraries and any place where more than 50 people can congregate. Set up rules, have people wear masks, no parties of 5 or more at a restaurant or bar. Even have the restaurants take our temperatures before allowing us to enter. Just for now until there is a vaccine for this virus. The state should let everyone get tested to see if we have the virus, antibodies, or if we are a carrier. Relax on the rule to get a doctors note or permission. Not everyone in this state has a doctor.
Volusia	Education	Please reopen the state.
Hillsborough	General	I would like to re-open the state of Florida with service providers such as restaurant workers hair salon employees, nail technicians etc. by wearing masks and gloves if applicable. Sanitizing their hands in front of clients before each client ,sanitizing their equipment in front of each client before each client and restricting the number of people in their respective business.
Hillsborough	Healthcare	Please re-open Tampa, Florida. I am a Licensed Hearing Aid Specialist and unfortunately all my clinics had to close. I would really love to get back to helping the community, especially the elderly with their hearing health so that they may be able to hear well especially in times like today, when needed most.
Lake	General	please open the state. No matter what the state does, everyone, that doesn't live here, will criticize anyway. Pay no attention to those that don't live here and believe everything that is posted on social media. We all know, that the heat and sunshine, will help kill the virus. Get us outside and enjoying it. Open the beaches. Open the state parks. Open the boat ramps. Let small business open This will give all the bored people places to go, besides walmart and publix. Open the theme parks!! Open the other attractions. Bring business back to the sunshine state
Pinellas	Government	Since the Feds have granted $600 a month to the unemployed in addition to theState are-Employment benefits, would suggest we wait until July 31st to re-evaluate. This is assuming healthcare experts don’t give states the green light sooner. In addition, get those checks out to the people. The inability of the Department of Economic Opportunity to do so makes me embarrassed to be a Floridian. Get it together guys. Matt Jones 661.645.598 Mattjones@mail.usf.edu
Pinellas	General	you will do what u want.I pray to God it will not come back to bit us all in the ++s.being 85 yrs of age.
Palm Beach	Recreation	I'm not only a resident, I am also a physician. I believe it is imperative that parks and beaches be open for recreation and health purposes. Just as swimming at a beach without a lifeguard carries its own level of personal responsibility, so should the reopening of our precious outdoor spaces. Social distancing can still be practiced responsibly while allowing our residents to get the much-needed exercise and enjoyment out of life that makes all the sacrifices we have made worthwhile.

AMERICAN OVERSIGHT

Palm Beach	Food	I believe restaurants should be opened again with the guidelines that we were following before the state being shut down until the virus has been contained. Closing restaurants is destroying many lives. A majority of the people who are struggling are those in the restaurants. If we can allow to go orders we should be able to open with the same social distancing that we did before. I myself work in a restaurant that has numerous sanitation steps prior to the corona virus and yet we were closed down. Open restaurants and lets start to get back to normal.
Palm Beach	General	Florida should not be opened, we are still adding to the Covid19 Positive numbers every single day, people are still dying everyday! Opening Florida right now will result in an even worse deadly wave of the virus. This is absolutely ridiculous to even debate about.
Manatee	General	I understand that states are wanting to get things back up and running as soon as possible due to the economy, loss of jobs, and businesses that are closed. But I am concerned about opening things back up too soon and having a bigger crisis on our hands than we did in the beginning of all this. Is the death of thousands of more people worth trying to push the economy back open? Is the state really going to suffer that bad if we stay closed a little longer? In my county people are not listening, people do not stay home, they are not wearing masks in the stores, our numbers are continuing to rise everyday with people getting sick and dying. People may not like it, but right now, they have to be told what to do. I am an "Essential Worker" at my job, I have not stopped working all this time, but I am scared. Please look at everything before you re-open the state, not just the money aspect.
Polk	General	Dear Governor Spring Break....on when to 'open the state'....this is really easy.....easier than putting on a mask. Ask the scientists and the doctors. Stop pretending you know more. Genius is not HAVING all the answers.....genius is KNOWING WHERE TO FIND THEM. Simple. See..? Easier than putting on a mask.
Glades	General	Reopen business ASAP. We all need to work to survive. The longer we stay closed will multiply the impact it has on our economy exponentially. Keep social distancing in place until we feel comfortable enough to remove it. Please allow us to get back to work before there are no jobs to go back to.
Pinellas	Information	It’s too soon to open Florida! Our cases and deaths keep climbing! We need to test our citizens I am High risk diabetes and I am terrified of this virus! Why rush when our nursing homes are testing for COVID? Plz plz do the right thing! You did with the children
Lee	General	I think services like hair, nail and waxing can be reopened with limited one on one and no one allowed to wait can be accomplished. Same with pet grooming. I think bars and restaurants are going to be more tricky. It will be difficult to effectively limit. You will get people who will sit at a bar for hours and won't afford others to come in. I sincerely think bars and restaurants are going to have to ride the storm out until we are not experiencing spikes but experiencing measurable declines.
Hernando	General	Florida should not reopen until its safe to do so.

AMERICAN OVERSIGHT

Orange	Tourism	We can not re-open the state. It would be disastrous to our economy to have people coming here and getting sick, and potentially dying. Our hospitals would become overwhelmed and we then we would need to lockdown for longer. Our economy is already hurting. The useless Unemployment website is already broken. Our state can not handle this round of the shut down, let alone if it needs to go on longer over the winter. I work in entertainment, but I refuse to let people die to come and see my work.
Polk	General	In regards to nail salons opening. I am a nail tech i feel like its to early. We are in close contact with people. Touching their hands. Regardless of washing hand and wearing mask. Even the plastic sheild is not proper protection. I feel like 1 more month of closure is in the best intrest of myself, my family, as well as my coworker's and client's. Its just to close for comfort at this point.
Broward	General	Begin Phase 1 on May 1st. Begin Phase 2 on May 15th. Begin Phase 3 on June 1st. That's fair and prudent.
Duval	General	I don't agree with opening the state back up. I read that when we opened up the beaches the cases went up a little bit. I feel if we open the state back up the cases will probably rise more.
Pinellas	Technology	Nothing has been developed to prevent or treat the virus and there are warnings of possibly being infected multiple times. This tells me we shouldn't open the state for tourism etc. If you can't see past your wallet, and feel compelled to put people at unnecessary risk, I implore you to REQUIRE businesses with the ability to have their employees work from home, to continue working from home. If a business doesn't have a reason to put people at risk, please don't give the option to do so. REQUIRE work from home for all businesses that have the ability to do so.
Okaloosa	Recreation	Please release specific guidelines for indoor youth sports activities. The gymnastics community is full of questions regarding the safe opening of our facilities. When can we open? Will we be limited in the number of athletes that can be in our facility at a time? Does the size of the facility or separate training areas that allow social distance affect the numbers? Regarding preventing the spread of covid-19, what would be the best practice for if an athlete or staff member in our facility contracted coronavirus? Would a facility closure be required and for how long? We are also in need of a timeline for our spring competition season. When will competitions be allowed to take place in our state? Will there be a spectator limit? Thank you for your time and consideration. Jamai Duncan
Hillsborough	Recreation	Please consider opening parks and MTB trails. Other states (including NY) have parks, hiking & biking trails open. These types of recreational activities are important for building healthy immune systems and are activities that make it easy to practice social distancing.

AMERICAN OVERSIGHT

Broward	General	Would like to see less fear mongering and have some positive news. We need to see an option for businesses as well as workers of If you want to open, you must meet the Federal Task force guidelines let them open. Employees if they do not feel safe returning to work then the ones who can work from home, let them-no repercussions. The workers who cannot work from home, we give them unemployment benefits for 4 weeks-without risk of them losing their jobs. Plus we need to put the try to get work requirement back on there are many many companies hiring-my rear is people like to get paid for not working. Real Estate-we need to get in to the current year Virtual tours will be the new normal....vacant homes, REO's if someone chooses to look at it in person, let them. We can not just take temps and ask questions about health-some of which could violate HIPPA. Restricted Beach hours, Start at Deerfield Beach here in Broward, have 3 hours on the beach, no sun bathing etc have to walk...and every 2-3 hours one closes one opens.... ALl beaches from 5:30 a.m.-6:30 a.m. all beached open for the sun rise...mental health is important. Gov. you are doing a great job, keep us safe and running our state. I know you never saw this coming but the leadership you have shown is amazing. We need more information facts coming out and more telling people quit getting their info from social media. We need to get Florida working again. We need to have our phases and we need to open the intercoastal for boating. We need to get our parks open again. We need to emcourage people to get out of the house and get sunshine. We need to calm peoples fears and get Florida back to work. One final point.....lets open the churches again. People need God more than ever, they need fellowship. This has to be an executive order overriding whatever the county or city says.....Greeters can do temp checks and we can all worship God together.
Seminole	Manufacturing	We need to reopen as quickly and safely as possible.
Flagler	General	I am a single mother of three children, 7 year old and 18 month old twins. I just My job is essential and can be completed via telehealth. I feel that as the state re-opens we need to give workers job security for continuing to work via telehealth to avoid employers forcing employees into risky situations. My current employer is pushing for employees to continue coming to the office to work rather than completing jobs safely at home via telehealth. As a mother of three and a full time employee I should not have to choose between keeping my family safe/healthy and working. If jobs can be completed via telehealth, employers should be encouraging employees to work from home, unlike my situation. However, I don't have any protection to ensure I can continue working via telehealth. Only time will tell before my employer requires us to work in the office again.

AMERICAN OVERSIGHT

St. Johns	General	Reopen the state for business. The cost of being closed is too great. Businesses are in trouble and may never return. Many of us have not been able to get unemployment. The cost of deferred medical procedures is astronomical. Each day of hesitation is costing lives. The cure IS worse than the disease. My family has had no income for a month. Could you do that? My business is closed forever. I can't believe that we the people have to ask permission to work from the government. The measures sure feel "draconian. " I watch the numbers, press briefings and this virus is now a way of life and we have to get good at living and keeping the virus in check on a personal and statewide basis.
Lake	General	I do NOT believe Florida is ready to open up yet at ALL. I don't believe there has been enough testing done to see where our numbers REALLY are as many counties were not afforded testing equally. You have created a task force without medical professionals to input data or their recommendations, so you are putting people at risk for the sake of the economy. I realize the economy IS important, but not at the risk of people's lives. I sincerely hope you WILL do this in a way to ensure that we don't fall on our faces again in a few short months with more people dead for nothing.
Hillsborough	Education	The State should not reopen until testing is available for all citizens. This will allow us to identify the sick who can then be isolated until better.
Brevard	Professional Services	I think it's too soon to open up salons, spas, and retail stores. I feel we should follow the president's guidelines by having 14 days of declining numbers. Also Brevard county has a high volume of inconclusive test numbers because of omni-testing. Please do something to fix this because I don't think our numbers are accurate. Please also enforce the rule that everyone has to wear masks when out. Also please open the beach parking. We deserve to be able to have ocean air. It will do a lot for everyone's mental well-being. Please open it so that disabled people can go and sit on a chair. We are unable to walk the beach or swim which are the current requirements. Thank you for asking our opinions and keeping us safe.
Orange	General	I know that our state is in dire straits, but if we open everything up to soon we are going to be right back where we started. Until the numbers really start going down and people stay protected by this virus, I personally we need to stay in a guarded state.
Polk	Professional Services	I realize that a lot of people don't think about nails and hair as being a necessity. However there are a lot of people out there that feel that when your hair and everything feels good you feel better. Its mental health. If we open up, smaller salons not chains, to where people can take 1 person at a time, have social distancing, disinfect the area between each person. I feel that it should be considered. A lot of my clients have medical issues that if they don't get certain things done like pedicures especially for diabetics it can cause a lot of problems. Thank you for your time and consideration.

AMERICAN OVERSIGHT

St. Lucie	Healthcare	I have family members who are high risk, my stepmom is in a nursing home in the Pt. St. Lucie, FL,, my immediate family has medical issues ranging from heart to breathing problems, and I have other family and friends working on the front lines in hospitals and law enforcement. We need to let science and honest evaluation guide us. The health of Floridians must be paramount to any decision. Let's stick to the list provided by the federal government. How many can we say we have? 1. Downward trend in cases for two weeks. Yesterday was the highest. Two highest in the last week. NO. 2. Robust testing for essential workers. Seeing we only had 20,000 tests yesterday and there are more than that many essential workers. NO 3. Quick contact tracing. According to state data, half of known cases haven't been traced. NO. 4. Widespread Screening for asymptomatic cases. We need 30-40k tests per day. NO 5. Screening specifically for older and disadvantaged communities. Has every resident of a nursing home get tested. NO. 6. Ability to quickly replenish PPE. We are still in bidding wars with other states and the federal stockpile is depleted. NO. 7. Ability to surge ICU capacity. Can we ramp up to prevent a NYC catastrophe? NO 8. Extra protection for senior care facilities. 20% of deaths so far I'm nursing homes. NO 9. Ability to have safe mass transit for passengers and employees. Is there an organized detailed statewide plan been published? NO. 10. Can inform public on social distancing and face covering. I've seen no statewide public info campaign. State press conferences demonstrated the governor doesn't know. NO 11. Ability to quickly change your minds and take a step back. Is the governor willing to make his own decisions? The governor said he wants to wait on presidential direction. NO
Pinellas	General	We are 0/11. Reassess these every two weeks. Please take every Do not open the state back up. our numbers are still growing and we have a huge populace of people who are high risk of developing complications. Do all the infrastructure projects you have planned now. Fix unemployment and make plans for options for kids to do the 20/21 school year virtually. Put a freeze on evictions and foreclosures on housing and business. Figure out a way to introduce a universal income so people can pay bills and eat. Work with farmers to save their crops. Make hazzard pay for all essential workers and frontline workers. Now is not the time to scrimp and dither. Listen to science and not Trump. If you dont you have a responsibility to in person apologize to everyone who loses some one from the illness if you open the state back up.
Lee	Professional Services	Reopen beauty industry by appointment only with masks required for both client and industry professional, while maintaining distancing from other work stations.

AMERICAN OVERSIGHT

Palm Beach	Recreation	Much of the efforts of government have focused on home Quarantine and essential businesses.. However the translational implementation of these guidelines often do not make sense. As you can well appreciate, golf is a sport that lends itself to social distancing and very simple criteria to prevent the spread at this dreaded disease. Simple guidelines for golf courses that include use of hand carts, social distancing and routine cleaning of objects likely to be touched while at the golf course (such as carts at Publix) Can assure a safe execution of a round of golf. Why not let the golf industry assist you in establishing clear guidelines that are easily enforceable. General health through being outdoors and exercising is equally as important as the transmission of COVID-19. Please support us in this endeavor. Rest assured that I support you! Sincerely, Edward R. Stapleton Associate Professor of Clinical Emergency Medicine Stony Brook University Medical Center
Miami-Dade	Real Estate	We need to re-open the state immediately. People have families and they need to work!
Volusia	General	I am concerned over our economic situation. I have noticed even with the stay at home there are almost as many people out as usual. We are a state relying on tourism, construction and food industry. We do not have a vaccine for the flu and many die from this.. In fact more.. The media has been a contributing to the fear. If we open the parks, limit occupancy to not overwhelm, check temperatures upon entrance and mask. Continued cleaning and wash stations.
Lake	General	I would take the counties with minimal virus cases and open them first with phase one. I would allow restaurants in these areas to reopen with maximum 40 capacity and tables 6 feet apart. Stores, beaches, parks and malls in these areas could open with social distancing and masks at indoor stores and malls. I would keep the heavy virus areas closed ie. Southeast Florida. There needs to be checkpoints to prevent people from the heavy virus areas from getting in their cars and traveling up to the rural open areas.
Palm Beach	General	Please do not open up Florida at this time. Please take the safety of our population in mind. We need to flattery the curve and have more testing. We need a viable system to care for those who are susceptible. Thank yo Lucille Passaretti

AMERICAN OVERSIGHT

Pinellas	Utilities	Do not reopen the state biggest mistake that you can make is that there are still too many cases happening overnight
Hillsborough	Government	We all want the state of Florida to reopen. However, We need to wait until the Peak is over. A lot of elderly. I'm a flight attendant and all of my flights out of Tampa aren't operating. Give it one more month. Because if this backfires it's not going to be pretty for anyone. Thank you!
St. Lucie	General	Masks should be required for any activity outside of residence Limited hours of business operations and recreational activity PUBLIC SAFETY!! Must be prioritized in any relaxation of rules Spell out what businesses must do for sanitary conditions and operations COMMON SENSE AND EVERYTHING MUST NOT BE ABOUT $$$$$ BUT HEALTH AND SAFTEY OF EVERYONE
Monroe	General	Think everyone should be let out through zipcodes. We have so many beaches in Florida the beaches can be divided by zipcodes as well have points of entry and at random beach entry valid driver's license needed. This is also for parks and restaurants as well.. This system can be rotated every week. So that everyone can have a chance to enjoy the amenities. We know how many people we have in a zipcode more or less because of the census. That can help you guys decide how many people you could have put at once.. also a curfew should be unforced. This should probably help businesses to start opening again and it helps for us to minimize the people out dinning all at once.. after a few weeks we should see what our numbers look like at take the next step from there..
Seminole	Government	The govt must open Florida back up immediately! You have tanked small businesses in a way that most will never recover. You've not even paid out on unemployment to the people you put out of work. Yet you've been collecting payment. Unconstitutional violations, unconstitutional closures. As a vet I am sickened by you poor judgement. OPEN FLORIDA

AMERICAN OVERSIGHT

Pasco	Government	The last time in Florida's history where the closure of some beaches and where Florida's tourism businesses was impacted was the BP "Event Horizon" oil spill in the Gulf of Mexico where tar balls washed up on some of Florida's Northwest beaches forcing them to close. The Florida Department of Financial Services made available a portal through which businesses who were impacted by the oil spill could file claims against BP for their loss of income. In a similar way, with the government's response to COVID19, Federal small business loans should be awarded on a compliance basis with Phase I reopenings of our beaches and small businesses. For those Florida counties, cities and municipalities who have not yet met the Federal guidelines for Phase I reopenings and reopen, they "may be" forced to forgo any Federal assistance recently passed by Congress. However, should there be a disagreement with these Federal guidelines, there should be a portal via the fldfs website as to why these local jurisdictions disagree using verifiable data for their justification (for example,testing in the area) where the State of Florida may in Federal Court contest any said denial of Federal aid to these communities who have demonstrated compliance with COVID19 protocol which may have not yet been officially mandated by the Federal government.
Palm Beach	Government	I think it’s pretty obvious that our governor is simply following whatever the president is saying down to the way he handles his “press conferences” by patting himself on the back and comparing FL to other states. Reopening Florida right now would be like going off your anti-biotics before they’re complete because you’re starting to feel better. All of the people who actually know what they are talking about, i.e. the doctors and scientists, are saying we are not close to our of them woods. We need to not place people at risk because people want to get out of their homes. Please consider keeping a stay at home order in place before we make things worse.

AMERICAN OVERSIGHT

Miami-Dade	Tourism	Florida depends mostly on its tourism, not only within U.S, but also visitors coming from other continents, such as Europe. South East Florida, (Broward and Miami-Dade, Palm Beach) has suffered tremendously due to the restriction of opening business and public area. I am aware of effect of the virus, but I believe the government should allow visitor from other country to come back to our state, and put the responsibility on the people. Putting in place guidelines and enforcing business to follow them is a better way to control the spread and also helping business to survive. Inviting tourists back, I believe is a must do. Florida should open to tourism and take out the travel bans
Broward	Professional Services	I have been a business owner of an establishment in South Florida for 19 years. We understand the magnitude of this pandemic, however, I think its time for us (citizens) to evaluate our own risks. We have been FULLY educated on how to proceed to minimize our risk of acquiring the virus. As a business owner, monitored by the Florida Department of Health, we will continue to practice, with a focus on health and public safety ,as we have been required since licensing. We are routinely monitored by the Health department to ensure proper procedures are in place for the health and well-being of our clients and staff. As a result of Covid-19 we are intensifying all procedures for sterilization and disinfection put forth by the CDC and EPA. Please allow us to reopen and take responsibility for our clients and staff's safety.
Hillsborough	General	I support and agree with the measures being taken to open Florida back up For businesses, families, the economy, income, and getting back to "normal" We crave freedom and for health, wealth it is imperative we look towards our future and REOPEN
Lake	Healthcare	Dental hygienists are the #1 most dangerous job due to the aerosols created during routine dental cleanings. We can not obtain the proper PPE in order to do our job SAFELY. Disposable gowns, n95 masks, visors, etc have been in short supply and sent to hospitals, we are in danger of spreading the virus to our families and other patients. High volume evacuation equipment designed to help reduce aerosols are sold out and back ordered. Please delay elective dental treatment until proper PPE can be acquired. Don't put us at risk.
Orange	General	Keep us closed.
Indian River	Recreation	Please open playgrounds so that the kids can exercise, too. If picnic tables, ball courts & exercise equipment is in use, it seems logical to open the swings, slides & monkey bars so that the kids can get some physical activity in. Thank you for getting on with it, I support a safely managed reopening of the state.

AMERICAN OVERSIGHT

Pinellas	Professional Services	Florida should NOT open back up until it is absolutely safe to do so! I work in the beauty industry and there is no way we can ensure that we can protect ourselves and our guests with current availability and prices of disinfectant products that are miraculously available. This puts everyone at risks! Also, if you work for a a chain like myself you have no control over providing additional time to make sure things are sanitary or ensuring things are in stock. People are not following the 6 FT apart guide line let alone if they are all crammed into a small lobby waiting for their appointment times. Also can not follow that guideline when you are physically touching them to provide services that are not life saving! am scared to go back to work and not have enough supplies to keep myself and others safe. This is why we should not reopen businesses that provide beauty services until absolutely necessary! We have nurses and doctors that do not have enough PPE as is! We should not reopen these businesses until it is safe to do so and we have enough supplies to ensure EVERYONES SAFETY NOT JUST THE CONSUMERS. Reopening Florida and reopening these businesses because this state and this country believes the dollar is more important than innocent lives is absolutely DISGUSTING and utterly SHAMEFUL!
Hillsborough	Healthcare	The most prudent decision when re-opening the state would be to require wearing facial covering (masks) mandatory until a proven treatment or vaccine is found. The number of cases remain elevated in the state, so I do not believe lifting restrictions at this time would be wise.
Palm Beach	Government	I live in the city of West Palm Beach, and I know people wanna get back to work. But it's way tto early in some places like mine where case numbers are still going up and there's no testing In place in the mass, I work in the restaurant business and I've had a collapsed lung in my pass and this covid19 is very dangerous for me. opening us up to sit down dining is a horrible idea. I understand opening up places where there isn't much of a impact. But palm beach, Broward, and Miami, should not be opened up yet. If you do you will see a major second wave of cases and risk to many peoples lives. Thank you for your time.
Duval	General	Incentivize employers (tax breaks) that can allow their work force to work from home to continue to do so for the foreseeable future. For factories or plants that require workers on site, encourage rotating or offsetting shifts, if that is possible. Maybe retail stores can be encouraged to actually extend hours so people can shop at later at night in less busy store environments. Bottom line, we need to get people working before rampant unemployment turns into despair which inevitably leads to crime and much worse.
Miami-Dade	Recreation	Campsites , parks and boating should be open for groups less than 10, some people have been tested and small social circles can be formed to ease the stress of social distancing. Boats should not be able to tie up together unless they equal less than 10 people total. Water access is important if beaches are closed so families can paddle board, kayak and swim. Parks alike, less than 10 people and 10 feet apart from next group of people. No pets off leashes anywhere.

AMERICAN OVERSIGHT

Brevard	General	The shutdown of the government was based upon fraudulent information and statistics. The shutdown is causing more damage than sars 2?covid 19. OPEN everything back up NOW!
Duval	General	My husband and I are in our 70s with underlying conditions.I only wanted to say we are willing to stay at home for a while longer if that would mean younger people could go back to work. We are very active people and miss not being out and about, but we think it is much more important for working people to get back to work.
Flagler	Real Estate	I currently live in Flagler county but I also am a resident of Monroe county where I have my property for sale in order to move my parents up here. Since March I have not gotten a single showing although I have received some interest in the property. Due to the closure at the Monroe county line nobody is being able to cross over and move the real estate market in the Keys. I understand the reason for the closure because Monroe is primarily for tourism and we don't want to sicken our Island chain. There has to be some kind of waiver for those that are ONLY looking to buy, that they be let in. Maybe a one day pass with confirmation with an active Realtor and confirmation of showing appointments. They won't be able to stay in a hotel since they are closed and if they stay past the 24hr limit they would be subject to a fine or something of the sort. The Realtor would have to be responsible for getting the pass via an online system where they can sign up their client with the County. The property addresses which they will be looking at and the tag# of the vehicle they will be driving. This would get our real estate market moving without causing disruption or risking the health of our citizens. I am a licensed real estate broker and would be willing to give more ideas and help. Thank you.
Palm Beach	Recreation	Re open public beaches with restrictions I personally have never seen so many people crowding sidewalks because they are just trying to exercise and we as surfers can easily go out and enjoy the water safely while social distancing
Volusia	Retail	Bars have been closed since March 17th. We don’t force people to come they choose to come. We need our freedom of choice back first and foremost. Second we need to try and save ourselves we haven’t gotten any PPP loans and my staff hasn’t received any unemployment assistance. We can operate standing room only (no bar stools) a lot of bars have outdoor space that can be utilized and tables can be kept to 4tops and separated. We can install touch free hand sanitizing stations, use only single use disposable cups, test employees for health issues. Whatever restrictions are imposed we can work with but we have to be allowed to open. Please we are begging you.
Orange	General	We need to back work.
Manatee	Government	Follow Federal guidelines. Ensure each business is required to have proof of it being disinfected before opening and requirements of maintaining a sanitary facility or face fines. Each business must know if their individual liabilities of not complying. Law suits for wrongful death are inevitable unless the business can show full compliance.
Brevard	General	Don’t open

AMERICAN OVERSIGHT

Pasco	Tourism	Please open. With precautions in place.... 6 foot social distancing. Restaurants like every other table. We are an independent rental car company at Tampa airport. We need people to come to beaches in order to survive.
Orange	Accommodation	HOW ABOUT FIX UNEMPLOYMENT AND PAY THE CLAIMS FOR MARCH 22ND!!! WE ARE WAITING !!! BILLS ARE DUE, RENT ARE DUE AND NOTHING!!!
Orange	Finance	I know the unemployment site is not the current governor's fault but it does play a major role in reopening the state. If people have no money no one is going to go out and shop considering how this coming week rent is due that two months people have not been able to rent. The average price of rent in Orlando our biggest hub for tourism is $1,435 (rentcafe) that's 2,870 of debt accumulated and that not counting utilities. The average pay for an hospitality team member is 10.69 an hour (indeed) and even after working a full 80 hour we still fall short $583 to make rent. Yes the economy will bounce back but it shouldn't be at the cost of low income citizens trying to make due. Before we open up strong regulations need to be in place for workers, we need guaranteed healthcare for all levels of employment meaning even seasonal workers and part time workers get benefits, guaranteed w minimum hours for part-time workers 25-30 is best anything below is an insult and can we please do something about companies giving pay raises and then cutting hours after because that make no sense just don't give the raise if that's going to be the case. Rent is ridiculous and so is trying to find housing and it doesn't need to be this way HUD need a serious jumpstart back to life because a lot of people are going to be missed place this issue has to be a top priority going forward and so does unemployment $275 is below minimum wage and no one can survive off that, the total amount fall short of what is needed to pay rent, utilities and food. I work in retail at an outlet mall and I don't think I'll feel comfortable at level of going back to work unless face mask are mandatory and strict repercussions were set in place for violation's, in my personal opinion I think a small amount of people should be allowed in stores while the rest can line up outside, theme parks should have a limit of five to 10 thousand in the parks at time because they are a Petri dish and if we have a second wave it'll come from them. For travel anyone who flies should have to quarantine themselves for two weeks to be on the safe side no matter where the came from but I do think we can open airports and be safe about it even if we limit flights coming in and out. My grandmother is here till June and would love to go back home overseas it's where she wants to be. For school I can only speak on college level but I think we would all appreciate a tuition freeze I work to pay for my classes I don't get
Osceola	Management	Over 1000 deaths in FL and cases multiplying every day, and the inept governor and his cronies want businesses to open? How stupid can the committee be? Be sure you follow the lobbyists instead of protecting the citizens of FL. Do not open until cases and deaths are eliminated. Use common sense.
Seminole	General	The State is not ready for an opening yet there are to many people still infected with the virus and people are not listening to the guidelines and some don't care casselberry is one of the places that i see doing what they want not caring for distance or anything the drug addicts and the homeless governor's are talking to doctors and so forth but nobody is asking the people the fears and concern they only care about money this is a money world please the president saying for us to be injection of cleaning products some people are pushing the issue nobody knows what is happening and that is scary to me.

AMERICAN OVERSIGHT

Orange	Professional Services	I am a director at a Spa in Orlando Florida. I think before reopening any business we should have a MINIMUM of 2 weeks of decline cases. I think a 3 tier plan is a good idea, but with specific industries in mind. It should be 10 or less people, with still practicing social distancing. It should be businesses where there is no human physical contact. After following a minimum of 2 weeks, at least a full week or more to determine if there will be any spikes in cases before the next tier starts. As much as I want to get back to work, I feel that spas, massage therapists, nail salons should be in tier 3. There is NO way to socially distant from others. We are told to not touch our faces, and in a spa, other people are touching clients faces, bodies, hands and feet. There is no way to stay 6 feet apart in any service. I just want to be sure as we open, we are as safe as possible. My uncle who was only 58 years old in good health passed away last week. PLEASE do not open too soon. Loss of lives is not worth it. If we open to soon, and we see a spike again in cases, we will just have to close down again.,
Duval	Finance	Open UNEMPLOYMENT!!!!!! Florida has never wanted to give even a nickel to the unemployed.
Duval	Government	Places like the DMV for example can begin to be re-opened on a mostly appointment driven basis for services that cannot be done online.
Osceola	General	Facial covering should be mandatory for everyone until vaccinations and proper testing is available for all and until this crisis is over. Businesses such as hair and nail solons, gyms, bars. Some restaurants should remain closed unless providing takeout. pickup and delivery options. All other business and places of worship can open ONLY if distance between patrons is mandatory and seriously observed.

AMERICAN OVERSIGHT

St. Johns	Education	The steps taken so far by Gov. DeSantis have proven to be on point and effective. Nationally, Florida's response has been recognized as being cutting edge without the drama and histrionics we have seen in other states. The members of this commission are thankfully proven career politicians like Miami Dades' Major, Carlos Gimenez and business leaders of Florida's core businesses. The health crisis is managed and will continue to improve. It's time to take care of our economic crisis. The current financial crisis is unsustainable at any level, family, business state or national. We cannot continue to print money and increase the state and national debt with the misguided hope that federal subsidies and loans will sustain our livelihood. A welfare state for all, is no state at all, and certainly not an economy. Florida's core businesses are tourism, farming and the small business operators that support them as consumers and providers. Thankfully, the farming industry has not been seriously damaged, farmers are farming! The tourism industry will be slow to recover, a minimum of six months and years until national and international confidence in safe travel for pleasure and business are restored. It falls to reason then that the third leg of the stool, small business infrastructure, must be allowed to open and stands the best chance of a speedy recovery. That recovery must begin sooner rather than later, May 1! Normalcy cannot return until people can return to work. Families cannot return to work until school and child care facilities reopen. The field of education is in shambles in spite of heroic actions by school teachers and administrators to deliver digital distance learning. It is not enough. Children need social interaction and professional delivery of instruction as every parent has come to learn and appreciate. I urge you to consider a statewide return to school date of August 1, if not mid July, not only to minimize what teachers call, the "summer slide," which has been taken place since
Hillsborough	General	I think small businesses such as hair, nail and wax salons should be allowed to open with the requirement that everyone wears a mask as its hard to social distance for those businesses but they need to be able to work and start make money and earning a living. If everyone does there part an wears a mask when unable to social distance then we all will be safe.

AMERICAN OVERSIGHT

Leon	Healthcare	Governor DeSantis, I would like to see the state open back up fully. I understand the potential risk of a spike in the numbers, but I believe it is necessary to the overall physical and economic health of our state and country. As a Firefighter/Paramedic in Florida, it is my belief that this virus has been here for the better part of a year. We did not know it at the time because we did not know to test for it. Last fall we were overwhelmed with viral “flu like” symptoms in patients, we did not shut down and survived. The term “herd immunity” has merit. Just because we have these stay at orders, not everyone does. Because of this the virus will continue to hang around. On the other hand we reopen let everyone get exposed then the antibodies will build keeping the population safe. Yes there will be people who die, but these are the same people who will die when the next time they get the flu and develop pneumonia. If we keep the research going, we will also develop better testing, a possible vaccine, and a better understanding in treatments. The evidence has shown the antivirals do work. Keeping everything shut down violates everyone’s civil liberties and constitutional rights. Allowing our citizens to return to life as we knew it, allows people to life, liberty, and the pursuit of happiness. It will allow people to provide for themselves and not be dependent on government handouts. If individuals wish to stay home, let them make the choice to self isolate, not an order from a government official. If individuals want to get back to life as they knew it, we should allow it to happen. Also, first responders and healthcare workers do not need to be called essential and get special privileges. We made the choice to get into the profession knowing that we would be exposed to infectious diseases. Everyone’s job is essential to their survival and survival of there families. Keeping businesses such as barbers, optometrist, dentists shutdown or restricted puts people at harm. As a firefighter we have grooming standards. These standards are not only a sign of professionalism, it is to keep us safe. Long hair will not be covered by our protective clothing, this will cause our hair to catch fire, not safe. I am required to wear corrective lenses in order to see and
Palm Beach	Recreation	The beaches and boat ramps should be reopened immediately. The outdoor lifestyle that we all enjoy is healthy and will combat the corona virus. When I’m on my boat with my wife & kids, we ARE social distancing. Closing the boat ramps and beaches is punishing the rule breakers at the expense of the law abiding citizens. The various law enforcement agencies operating within the State could adequately dissipate any groups of people not adhering to the social distancing guidelines. Outdoor dining establishments should be reopened as well as indoor dining establishments opening with reduced seating capacities (requiring restaurants to reduce their number of tables by 50%). This would allow restaurants to bring in some revenue while still allowing for social distancing.
Brevard	General	Open up the state! We need to get back to living life and generating money.

AMERICAN OVERSIGHT

Hillsborough	General	I do not think we should re-open Florida beyond "essential" businesses until AT LEAST August. I do not want to see my parents or friends or other loved ones die. When we re-open, we should re-open select industries a few at a time with three week stretches in between to allow us to measure the impact of that industry on virus infection and death numbers. Opening the state sooner as opposed to later would only increase the number of people who contract covid-19. Though I have been immeasurably failed by the state unemployment claims system, I and my coworkers would rather not lose our lives (or bring the life-taking to loved ones) than have tables to serve. The select industries to re-open first should be those with none or minimal contact between customers/service consumers and employees. Restaurant dining rooms should not open any time soon. Please. I beg you, do not re-open the state any time soon. I don't want to die and I don't want more people to die. If you re-open the state, the blood of people killed by covid-19 will rest on your unwashable hands, DeSantis.
Pasco	General	People need to get back to work! The affect this has had on our economy is ridiculous, closing everything down has done nothing but hurt working class families. It should be the choice of the individual whether or not they feel safe to work. The damage to the economy outweighs the number of cases, the percentage of people dying is way too low to warrant this shutdown.
Clay	General	Look at the real facts, not some fictional model, and open our state NOW. The real mortality rate is barely worse than the flu and does not warrant shutting down the state. You are destroying lives of hard-working citizens with this shutdown. OPEN IT NOW!!!
Duval	Education	I will say my children are doing better with the virtual learning than when they were in school. I am very concerned for my kids to go back to school. I have a child in 2nd and 8th grade. Both had spent the entire year they were at school complaining that there was no soap or paper towels in the bathroom. I had to buy them Hand sanitizer so they could clean their hands. My 8th grader is line up with her class mates and marched everywhere and this is in a public school. How are the kids going to practice social distancing when they are pack 25+ in classrooms? My 8th grader is considered high risk so I am extra worried about her. She has had instances where she has almost passed out at school and I did not receive a call from the school and they wouldn't her call. Neither one of my child's school are good with communicating with parents. I don't feel I can trust them.

AMERICAN OVERSIGHT

Hillsborough	Healthcare	COVID-19 is not only crippling the Florida economy, but also the US economy. For this purpose, I will only reference numbers based on Florida. Unemployment claims in Florida are up 3951% due to the COVID-19 issue and will continue to rise without reopening the economy. Even once reopened the increase will continue as many businesses have so much lost revenue. How about we flatten this curve? Facts about why FL should reopen from this ongoing COVID-19 pandemic: •As of this writing there are 30,533 confirmed cases in FL. That is .0014% of the FL population •As of this writing there are 1046 deaths in FL. That is .000049% of the population •There is more and more evidence that many of the COVID-19 fatalities are related to preexisting conditions What kills more than COVID-19: •45k people died in 2018 of cancer which is more without using age adjusted information •29k people died in Cardiovascular disease which is more without using age adjusted information When in history do we completely shut down economies due to such a small percentage of people? This is not meant to minimize human lives, but the scare was we would over run the hospitals. Currently hospitals are at an extreme low capacity and losing millions every day; these losses will take months or even a year for facilities to regain their financial security to be back to normal. We are likely a year or more away from a vaccine. Unless we stay completely closed until there is a vaccine, we will have another wave of this pandemic; more lives will be lost. That's just a fact. However, with more and more information being discovered that many of the COVID-19 fatalities also involve a preexisting condition; can we afford to stay closed for another year? The US is trending towards a 20%+ unemployment rate; without reopening much of this will hit our Florida economy simply based on the percent of the US
Clay	Government	We are writing to express our concern for the Corona Virus and opening Florida up to quickly. I know that everyone is miserable and that is understood. BUT! If you have people working with those that are without a job then they shouldn't be going anywhere to spend money on anything anyway. Most everyone was given a stimulus package portion or share and that should sustain many for food for a while if spent responsibly. What I am concerned about is giving an inch and people taking a mile. The entitlement to do what people want is what is hurting us all. Or the opinion that it will not happen to them is what will hurt those of us who are trying to do what we need to. I feel that our leaders have our best interest at heart and we have been completely reliant on that. I do not feel like my rights are being infringed upon, I feel protected. I happen to have two immune compromised children and we are frankly scared of the irresponsible behavior of many for them. We are doing what we should be doing and are scared that when the orders are lifted if lifted to quickly that people will be irresponsible and hurt those of us who are trying to be responsible and protect our children. We have no choice but to depend on the government to aid us in this protection by keeping the order in effect until we can all be safe. Or until there is a vaccine which at least gives us a fighting chance. Thank you for valuing our opinion as citizens in our community family. Your doing a great job hang in there.

AMERICAN OVERSIGHT

Collier	Professional Services	I am a nail salon owner for 16 years in a private community. I am self employed ,I am the only nail tech in the salon so it is a one on one service. I believe with all the precautions I am taking it should be a safe healthy environment to reopen my salon. I am installing a plexiglass partition on my nail table requiring every client to wear a mask and gloves with just their finger tips exposed I will be taking temperature of everyone before entering the door will remained locked so people will need to knock for access. I will be wearing a mask and gloves after every client door handles and surfaces will be dissected. I believe we are an essential business to reopen, as I am concerned with the issues of some artificial nail clients developing infections due to there nails growing out to far causing possible fungus or a nail to be torn off because of nail thinning I also have several elderly clients who depend on me to trim there toe nails and remove ingrown toe nails. . This will be come a hazard for their feet if not taken care of. Please consider allowing us to reopen with smaller amounts of people and safety measures in place. Sincerely Melissa Sudano
Lee	Administrative	Do not reopen!!!
Hernando	General	I do not think opening things up too soon will be productive. We MUST wait until there are little no cases to protect the health and well-being of ALL. When we do open, we must still put many safety practices as a mandate. If Florida DOES open before it should, I will stay at home and not use any of the businesses that are open until I feel it safe to do so. What is the sense of opening and then having a mass outbreak just to have to shut it down again?
Volusia	General	There is 7000 infected people, this people soon going to start diying and we will be like New York. It is too soon to reopen the country. We need to wait and see if the healthcare force has the capacity to deal we the infectec people because if we reopen and they dont have the capacity to handle the situation alot more people will die and we will live New York's nightmare.
Duval	General	Please issue guidelines for offices employing more than 20 people. Do cubicles work? Florida has a lot of corporate offices with shared spaces of cubicles, large kitchens, meetings areas, etc. Or issue a mandate to continue to work from home where possible.
Hillsborough	General	OPEN FLORIDA!!!!! Lets get back on track. Tim Ewin
Hillsborough	General	I believe that the state needs to be re-opened ASAP. My husband's job relies on it. You need entrust your people of the state to use common sense and make their own choices about social distancing. Beaches should be opened for use not just excercise, it is an outlet for families to enjoy together.
Polk	General	Please re-open our state. We have a small business and this is hurting us. All small business are hurting. Individuals are hurting. Families are hurting. We can't go on like this. Open business up. We will stand by your decision in what ever it is. Thank you.
Orange	General	Please don't open too fast! I know people want to get back to work and make money and party etc. but I think its too soon.

AMERICAN OVERSIGHT

Volusia	General	Thank you for reaching out to the public! While I understand we need to get the economy and the people working again, I think social distancing measures need to remain in place. Outdoor seating vs. indoor with reduced capacity inside and 6 to 10 feet of spacing between tables. Groups of no more than 6? Waitstaff should be wearing masks while going from table to table as spacing people out does no good if one staff member is moving in close proximity to each table. Tourist attractions/museums/zoos should all limit capacity and maintain distancing between guests, just like at stores now. Beaches are doing a good job, and should just keep doing what they are doing! The general population should be required to wear masks in public places. This will need to continue for a long while, until vaccines and Titers are in place. This bug is so new!! We have no idea about immunity and long term recurrence of this virus. Pay attention to what virologists and entomologists are trying to tell us. Their voice should be a huge part of your weigh in. Lastly, our state is full of elderly residents, snowbirds, and we are a tourist attraction to not only the US but many out of country visitors as well. It is crucial we protect our visitors and even more so that we protect our resident population. Please continue safety measures and think ahead to what my be needed in the fall. Thank you again.
Orange	General	Things should open we all know that! BUT caution is needed. It should be mandatory that people in stores and in areas where there is no way to stay apart 6 feet must wear masks. People are not careful and some plain just don't care and this is a real issue when it comes to health and being cautious. Also we must observe and redirect companies that are rushing to restart and go back to "normal" as things will never be normal and that is a hard reality to face. And lastly this state needs to assist in getting disinfectant supplies for the local people, we understand that hospitals and government agencies have priorities but the local people need it to. They need to be able to keep things clean and disinfected.
Miami-Dade	General	Reopen the hair salon and barbershop nail salon, where everyone has to wear gloves and masked and temperature must be taken upon entering. All school cafeterias must be equipped with hand sanitizer located at each the entrance of the serving lines for students and upon entering inside the kitchen area for employees. Temperature should be taken and log daily. Mask should be worn daily while performing work duties. Parents must be checked upon entering the schools, all students should have enough time to wash there hands before breakfast and lunch daily. And MASK GLOVES for students and staff should be MANDATORY. And every essential worker should get Hazardous Pay.
Broward	General	Although I want the state to reopen, to avoid more losses of jobs and loss to businesses. I am in fear of what the virus can do. There are so many variables, so many symptoms. I hear terrible stories of what nurses and doctors see on a daily basis at the hospitals and although we have kept our curve down, our shutting down and social distancing has definitely been a contributing factor for that. I would also prefer to hear it is safe from the medical experts to reopen. They are the ones dealing with this on a daily basis and putting their own lives at risk. It should come from the experts.

AMERICAN OVERSIGHT

Bay	Accommodation	Please reopen Short Term Vacation Rentals on May 1. STR impact not only that sector, but restaurants, retail, cleaners etc. The Bay County/Panama City Beach is literally seeing our economy slaughtered. We depend on tourism in this area. It's pretty much the only industry in this area. As the beaches reopen, short term vacation rentals must reopen as well. A short term rental on the beach is not a hazard to social distancing. The Bay County/Panama City Beach area is still reeling from Hurricane Michael, many are just now getting back on their feet. Restaurants, waitstaff, tourist attractions, retail are all dependent on the families Short Term Rentals bring in. Most families do not stay in hotels or motels, they stay in self-contained condos, townhomes or stand alone homes. Self-contained condos, stand alone homes and townhomes are much , much more in tune with social distancing than hotels or motels. Short Term Vacation Rentals have their own separate heating and air systems, while hotels and motels generally do not. Hotels and motels are typically much more densely crowded than any Short Term Vacation Rental. It is discrimination to allow hotels and motels to continue to operation and disallow Short Term Vacation Rentals. Please rest assured that if this continues , most Short Term Vacation Rental owners along with many supporting businesses like restaurants, tourist attractions, cleaning services and retail will be out of business, and the tax base that Panama City Beach and Bay county depend on will disappear. Thank you for your consideration in this matter.
Orange	Healthcare	I think the state needs to look into the dental field and how dangerous it is for our profession to be working on patients without the proper PPEs (N95 mask, gowns) available to us. Better guidelines on how many patients and within a certain distance can be in one office. This needs to be mandated so it is straight across the board for the state. Too many doctors still doing non emergency work without the proper PPEs for staff. How are we supposed to know if our patients are carriers??
Broward	General	Please re-open Florida as soon as possible. This lockdown is wrecking our economy and depriving people of their basic liberty and freedom. If the goal was to avoid the spread of the virus, then it is not effective. The virus will spread regardless of the lockdown as is obvious from every global statistic. If the goal was to avoid overwhelming the medical system (like in parts of Italy), then this is misguided. The only part of the US that saw a rapid increase in cases was New York City, but that is not a blueprint for Florida since New York City has a unique degree of population density combined with a dependence on mass transit systems. As a further example, the entire country of Sweden avoided a lockdown and are now they are in the enviable position of reaching herd immunity. Remaining containment efforts and government recommendations should focus instead on the most vulnerable among us, including those in nursing homes and those with significant underlying medical conditions. The rest of the country needs to return to normal ASAP.

AMERICAN OVERSIGHT

Hillsborough	General	Unfortunately, this isn't an easy decision but this shutdown ca not continue our economy will not be able to bounce back from this if we keep it shutdown much longer. It all boils down to people using common sense. Wash hands, don't you h your face, 6 ft away etc. The elderly should stay at home as well as those that can become compromised because of underlying issues. Thank you
Broward	General	Hello Governor. Just wanted to say you are doing a fantastic job! I think you should reopen the state slowly And just have people wear face masks and limit the amount of people in restaurants and gyms and beaches. We need to start revamping our economy. We need to follow in Georgia's steps! Thank you and we appreciate everything you do! Deeb family
Palm Beach	Manufacturing	Open up the beaches all at once. Open up state parks only to Florida residents at first, so people can get out and camp.
St. Johns	General	I am definitely for opening with a plan of action. If we have effective medical care for those who contacted covid19 and these methods significantly reduce the % of deaths, please do reopen. Personally, I believe we need to reopen in stages vs fully opening as viruses can mutate and obviously this event has been unpredictable on a medical scale. We went from stay home or die to let's reopen without establishing confidence or what exactly changed or what data was collected and utilized to determine opening as a viable solution? Show me how this is the best possible solution with explanation of why vs dictating a solution without due diligence and proper communication.
Collier	General	Please reopen Florida. In Collier County, the number of cases hasn't warranted the response. If there are hotspots that you feel need to remain restrained, please find a way to do that so that the rest of the state can begin to get back to normal. For instance, if Miami -Dade needs some restrictions, you can control traffic flow to the west coast by monitoring traffic on I75 or US41, the same goes the for north/south corridor. I truly appreciate the work you all are doing. I know it's not easy, and I don't assume it to be. Thank you.
Lake	Healthcare	Please consider fully reopening dental care as soon as possible. Many of our patients have toothaches and fractured teeth that are causing them to go into the ER. This doesn't make sense, as the ER cannot help them. So this ties up resources that the ER should be using for more serious issues like COVID19. And it also exposes these patients to risk while sitting in the ER. Treating these patients safely in a Dental office that abides by OSHA standards is the safest choice in these situations. Thank you for understanding, Dr Kasem

AMERICAN OVERSIGHT

Orange	Education	I think school buildings should remain closed at least another month. It should remain as it is in Orange County where people are mostly working from home. I think we need to keep as many people out as possible. And when it does open, children should not be allowed inside, and adults should have to make appointments with only administrators allowed to be on the premises. That should be the cases in counties with more 1,000 cases. Thank you for listening. Take care.
Volusia	General	There so many confusing and mismatched pieces in the closing statewide that makes no sense. I can't play Pickelball or tennis, but I can go to Walmart,, Lowe's, etc. i cannot go to our community fitness center that is equipped with all kinds of antibacterial sprays, but I can get stuff from our local craft store. if we begin to open salons, Barbershops, restaurants and retail shops, people will go or not. The confidence level will grow as you have success. Just opening won't cause things to go back to where it was, but it is a start. Please begin opening before we go mad from having nothing to do. I. can only rearrange my garage shelves so many times.
Marion	Professional Services	I am a hair stylist in Ocala Florida and I am concerned about salons opening so soon due to our close contact with others and we also have no way of stocking up on the sanitizing supplies needed to maintain a safe environment at this time
Orange	General	The economy cannot thrive unless people are alive and healthy. And people will not be alive and healthy if you reopen the state early to try to protect the economy.
Hillsborough	Real Estate	My personal opinion as a US citizen and Floridian: Crashing the economy is doing MUCH MORE HARM THAN GOOD Simple Plan Everyone over 50 or at risk stays home Everyone else WHO WANTS TO goes back to work If you get the virus you get a week or so off MAYBE WITH PAID SICK LEAVE PLUS your body BUILDS UP IMMUNITY to this virus What are we all going to do next fall and winter if we have no immunity? Close down the country (planet) AGAIN? I also noticed that MORE PEOPLE DIED OF FLU AND PNEUMONIA than from corona virus, which means to me that any new vaccine is not guaranteed to save us My vote is to look at the ACTUAL FACTS and do what is the overall, greatest good for the most number of citizens. James

AMERICAN OVERSIGHT

Palm Beach	General	It's time to open up. We are not meant to hide and shut down. Secure the at risk, everyone else practice good habits and build immunity. A second wave will come but it is necessary. Only way to beat a virus is to go through it (earliest vaccine may be outdated anyways) Our hospitals will not be overrun. The curve is flattened, what we are doing will not get rid of the virus.. Spot testing is good , antibody tests are better . We are adults not children , let us go out and face it. Peoples lives and finances are becoming in ruin, and they cannot just rely on the government , that is not us, and that is not the purpose of government. If I am meant to get it then I am meant to get it.At this point the cure is worse than the disease. It is time to open up, we flattened the curve, it is time reignite Florida, our economy , and our lives.
Marion	General	Open camp grounds state and federal to state residents only at this time. Mandatory face mask when in general public. Reduce restaurant capacities by 50% with empty booth/ table on each side of occupant.
St. Johns	Education	Reopen Florida, but with major restrictions. Masks should be required for everyone when going out in public. Retail stores need to restrict the number of customers at one time and hand sanitizing stations should be set up through out stores. Elementary schools need to reopen in the fall because remote learning is difficult for the younger children. It's hard for young children to sit still and do online work. However, consider keeping middle school and high schools closed through the end of the year, or at least an option for the families that are able to make this happen. This way class sizes will be smaller. Even if some families choose remote learning this will help. Classrooms can have live video feed that streams to the students home. Universities should encourage distance/ online learning and reduce, not eliminate, the number of in person classes. The exception should be made for college students entering a medical related degree such as nursing or PA school since hands on learning is important and we need more nurses. Those that are able to work from home should continue to do so, but those that can't should be free to return to the office.
Hillsborough	General	I think all state and county parks should open back up and just rope off playgrounds and pavillions if deemed necessary. People should be able to walk bike and hike trails on foot and on horses with their family. It's cheap or free activity and allows you to be safe outside. Please open the parks back and only close necessary sections where people may gather leaving trails open.
Orange	General	OPEN UP MONDAY APRIL 27, 2020.
Santa Rosa	General	As the cases of the virus continue to rise, No antiviral available, no vaccine for the virus and the likelihood that the virus would dramatically increase I believe it would be a bad choice to open up the state. We have a large number of senior citizens who may be exposed to the virus who are the most vulnerable people, which would likely cause a greater danger to their health and possibly their deaths. My family will not return to any activities other than for essential things until the virus has gone or there is an antiviral or vaccine to combat it.

AMERICAN OVERSIGHT

Pasco	General	Open restaurants back up at 50% capacity, respecting 6ft social distancing, servers required to wear masks. Beaches open only for exercising for another month, no social gatherings. Elementary schools should close for the remainder of the year. The stress on teachers and parents is exhausting. Leave promotion/retention up to parents.
Manatee	General	Please open the state soon! The point of the stay-at-home order was to flatten the curve, which has been done. We need to get back to work! We can't let fear ruin our lives and the economy. Keep the elderly and immune compromised at home and let the rest of us get back to work. Also, to close outdoor activities, such as the beach and parks, is not helpful for our immune system. Fresh air, sunshine and exercise are good for us.
Lee	Accommodation	As a Professional Organizer I know exactly what you should have done and what you should do now. Unfortunately, it cannot be spoken in 400 characters or less. First of all you should never have given money to people who are steady working and have not lost any income and are not on the front line. Also, you need to duplicate what you did at Fisher Island. Florida. As for the rest, you know how to reach me. The first thing you need to do is remove all the incompetent people in charge. That would be a huge help.
Hillsborough	Technology	With the new data coming from USC, New York, Gestaldt, Germany, Scotland and others, it appears about 15% of the population has already had the virus. This significantly changes the model and almost fully explains the why the early models had to be corrected down so drastically. Had we originally know the virus death rate would be below 1% the shutdown measures may not have been necessary. Hillsborough infection rate is now down to single digits per day. The health care care system will not be overwhelmed at this rate which is why we started the shutdown initially. Remember the total number of people exposed to the virus is the same with or without a shutdown. It just happens more quickly without a shutdown. We seem to have forgotten this fact over the past two weeks. Let's get people back to work.
Lake	Healthcare	I am an RN and I'm completely and totally against opening back up until we are 100% confident that we have a handle on this virus and we won't be in imminent danger of having a second outbreak right now.
Hillsborough	General	I feel that we need to have a decline of new cases for a period of greater than one week prior to stage one of the reopening phase one.
Duval	General	Dear Reopen Task Force: Opening the state should follow the CHC guidelines promoted by the president.
Pinellas	General	It is my belief that if Florida re opens during this current Pandemic that people that have not been infected WILL somehow be infected and possibly die. I know that some people have no money and are getting desperate however unnecessary deaths will occur if the state is re opened at this time. I feel that 3 to 4 more weeks should pass before our state is reopened. So I say NO do not reopen Florida at this point in time !

AMERICAN OVERSIGHT

Orange	General	Florida should not reopen until adequate testing is available. Additionally, the current guidelines should be more strictly enforced.
Orange	General	I understand how badly Florida is being hit by the shut down. My husband works in the theme parks. However, I don't think we are ready to reopen. Social distancing is the only thing that is slowing the spread of virus. In order to open even very slowly, we need a plan of testing, contact tracing, enforced temperature checks upon entering establishments, and monitored quarantine for those infected. We don't want to open too soon only to see a spike in deaths. Dying citizens won't help the economy either and irresponsible opening will only scare people away from our tourism in the long run. Let's be smart and loving like the governor up North.
St. Johns	General	Please do not re-open Florida in May. We need to watch the trend lines truly decline for a few weeks or we risk in-doing all the social distancing work from the last 6-7 weeks. June 1 seems more reasonable (for now) and please do a staggered approach. Thank you,
Polk	Tourism	To facilitate much needed tourists from overseas returning to Florida airlines should instigate some form of screening/questionnaire at point of departure before they arrive in Florida.
Sarasota	General	Please wait to open up our state!!!! Too many people have died alread . Why do we want to jeopardize more lives???
Volusia	General	We should reopen as soon as possible, there are people and businesses that rely on us opening as soon as possible
Hernando	Healthcare	I understand that the pandemic has been an economic nightmare. But, I don't think that there are pandemics that are not. I believe it is too early to open the state up. The number of positive cases continues to grow daily, as do the number of deaths. There is not enough testing available, nor is it easily obtainable to know how many more residents are infected and carriers. Tourists will come here, bring more infected people, increasing the likelihood that Florida could have more sick people than the hospitals can handle. Not all stores that are currently open follow rules of social distancing, and although I wear a mask, most people do not, even people working in stores. When the government offices are safe to open to the public, then it will be safe for the public to come out.
Polk	General	Please do not rush into reopening the state of Florida while we are all anxious to get back to normal our primary concern is to remain healthy. As a member of the over 65 years of age group I don't want to take 1 step forward then 2 back so please.put our well being first.

AMERICAN OVERSIGHT

St. Johns	General	I know Florida is a large state with some rural areas so it is hard to make a blanket decision for everyone. I like what the Keys are doing, keeping visitors out. I wish we could do that for the whole state. Again not practical. What we can do is prevent the virus from spreading more and from coming back. To do that I think that we can't jump the gun to get the economy open too fast. I think businesses should screen for temperatures, they should require face mask, they should keep doing zoom meetings. As soon as you open it they are going to throw the whole office in a small conference room for a nonessential meeting. That worries me. I think working from home should still be encouraged. Mostly I think that nothing should change until the virus is going away. New positives down to single daily digits, how about publishing recovered numbers, that would help a ton with confidence. Opening up before the data suggests that this is almost gone is a bad move, we are a tourist state so I understand we need the revenue, but once you open it all up, we are going to be flooded with people from other states and they could potentially bring the virus with them.
St. Lucie	General	Reopening needs to happen as it is SAFE to do. Every county is different and has different needs. We need to see weeks of dropping numbers and fewer cases to begin reopening. If we reopen too fast, the virus will increase, and more people will get sick and possibly die. Safety needs to come first! Unemployment needs to be distributed more quickly, so people can survive, but opening too soon for money equals an unsafe state for all of us.
Manatee	Technology	Short Term Rentals, need to stay closed, people still coming from hot spot states with no containment enforcement. Can substantiate if you call me.
Volusia	General	Governor DeSantis, This virus is MASSIVELY overhyped and doesn't spread very well in warm weather, that the death rate was much lower than reported was apparent from the South Korean data. Also despite what fake news says its very little threat if you get Hydroxycloroquine early. Require masks and gloves in public transportation settings such as they exist here but otherwise reopen the state. The lockdowns are just a leftist plot to destroy Trump's economy. Trump seems to have gone senile and seems to have no backbone to stand up to his experts You need to adopt the more courageous stance of Brian Kemp.. Also not being able to go anywhere is intolerable are we free men or prisoners? Ignore the panicmongering Karens and reopen everything now.

AMERICAN OVERSIGHT

Hillsborough	Education	Please re-open Florida now. Trust the people to decide whether or not they will stay at home or go back to work. The numbers indicate we are past the worst of this illness. Here in Hillsborough county we shut the entire county down for less than25 deaths. We shut our county down for 25 deaths! Does that make sense?? Even if the death rate doubled, it still wouldn't be worth it. Remember the shutdown was because we wanted to flatten the curve, not stop all deaths. Open Florida back up, ASAP.
Hillsborough	General	All high traffic areas such as grocery stores big box stores etc. should have handwashing stations outside the facility and all people entering Facility should have to wash their hands and put on a mask before entering. This should help reduce toxicity issues from using chemicals including hand sanitizers.
Volusia	Tourism	As we open the state, keep the number of tourist coming into Florida down, do not open and let everyone flood into the state. If we open the beach restrictions should be in place for only county residents. Keep the hotels and AirBNB closed. If you let the tourist enter without any restriction we will have a major outbreak!!
Alachua	General	I understand the reasoning behind the current stay-at-home order and feel it served its purpose for people with underlying health conditions. I think now is the time to allow a heard immunity type situation to allow people to begin to build an immunity to this virus. We need to immediately re-open Florida. This is beginning to destroy the lives of so many people that have worked for so long to build a life for themselves, families and causing so much more damage than the virus has or will cause. This is becoming to political. If people are worried and have underlying health conditions than they should be allowed to stay home, but stop punishing and destroying everyone else's lives.
Polk	Tourism	Dear Mr DeSantis, Please open up vacation homes in Florida. Property management companies and owners are not getting any financial help. Each owner is a small business, they pay sales and use tax and tourist tax so the state is loosing millions of dollars also. Many owners will go into foreclosure causing a crash in the market and property managers go out of business. In addition the insurance companies are refusing to pay owners out for loss of use ! We understand that visitors should self isolate for 14 days, so why cant they book a vacation home for three or four weeks??? Children could still do school work as homes have internet. Should guests drive to Florida they could bring enough provisions for two weeks. Many people would welcome a break from their current homes, especially if they are currently living in an apartment I would welcome a reply and feed back Thank you Susan Ward For and on behalf of Flamingo Properties Inc
Pasco	Government	Please re-open the economy as soon as possible!!

AMERICAN OVERSIGHT

St. Johns	Recreation	I feel that beaches should be reopened to Florida residents. The extra police and wildlife officers that are not being utilized since overall crime and activity is down can be used to ensure social distancing is being observed. If sun bathers are in gross violation of the 6 feet rule then write them a citation with a fine. Also open hotels and restaurants at 50 percent capacity and require a Florida ID to check into the hotels. This will encourage Floridians to take “stay-cations” and get some economic activity restarted.
Union	General	I am a gym owner in Union co. We have been open for just over a year. We only have 4 cases in our county and yet remained closed. This is devastating to small businesses like mine when there truly is no reason we could not be open for business in a safe manner. If nothing please make it possible for businesses in situations like mine to open whether it’s in a phase 1 capacity or on a county by county basis
Polk	General	Thank you for giving me this opportunity. My ideas for reopening will be for breweys. I work for a brewery and with all that has happened we have taken a big hit but the curb side to go orders have helped. I would like for Florida to hopefully open the breweries back real soon and I believe the options we have to keep people safe is huge. Since we live in Florida we have a lot of beautiful days to be outside so the breweries could always set up seating outside for our customers. We also can leave our doors open so there is always a continuous air flow through the brewery that doesn't solely rely on the ventilation system. We can always take away a number of chairs away from the tables and we can always split the tables up. We can also take the bar stoles away from the bar so it would be a stand and go order so people are not on stop of each other. These are just some of my ideas and their are plenty more that we all can possibly do. Thank you!
St. Lucie	Transportation	No we shouldn't reopen yet and I'm someone who has been furloughed from his job in transportation. We need to get this right now before sending people back into harms way.
Miami-Dade	Information	How can you possibly be thinking to reopen everything when the spread of coronavirus is still in place and people are practically dying everyday. I believe it’s going to increase death rate even more. Till a vaccine is found, you must reconsider in reopening. The proper provision needs to be executed.
Broward	Recreation	I believe pools at large clubhouses should be open. For medical reasons, I need to do my pool aerobics 5 times a week or more. That is the only form of exercise I can do that helps me, I cant jog. The pool is my salvation, Governor DeSantis. Please help
Clay	General	Concerned about the ability for people to find adequate food and support for rent, job hunting
Sarasota	General	Please reopen Florida’s economy. Set guidelines, Socal distancing, wear masks. Was hands. We need to get back to work. Thank you.
Volusia	Recreation	Please include gyms in phase 1
Lee	General	I am almost 60 years old. I work in a restaurant. I live with my daughter and grandchildren. Two of my grandchildren have asthma. I will have to go back to work if you reopen and I could possibly be putting them and myself at risk if we open too soon. I love the people I work for but I love my family more

AMERICAN OVERSIGHT

Miami-Dade	Recreation	As a US Marine veteran that ended his service Honorably 1 year ago, who's purpose in life was becoming a Police Officer in the state of Florida, All I wanted to do was go to the gym workout and was in the hiring process for Miami Beach Police. Ever since Covid 19 hit, It has hindered everything I looked forward to. Please re open gyms and get things back to normal so I can achieve my goal of becoming a Police Officer.
Lee	General	Opening Florida back up already is dangerous and it's putting money over health, over our wellbeing. All it will do is prolong the situation, causing a second, third, maybe even fourth wave of Covid-19 positive tests and more deaths.
Lake	General	We need to open asap. If people want to stay home then that's their choice. I have a brand new salon that opened and closed on the same day. Our life savings is sitting there and I need to open.
Polk	General	Please do not rush to reopen "the economy". History shows that trying to rush back to "normal" too soon can cause a second wave to be much deadlier. It's sickening that our well-being rests almost completely on the capitalism machine. We should be able to ratchet down as we have so far done AND still provide for the basic needs of the people whether they are working or not. In truth, we could do this in times of good health too, if not for greed and lack of empathy and compassion. Do what's right. Fix the unemployment system Rick Scott ruined, provide regular payments to Floridians that need the assistance, keep only essential services open (churches are NOT essential, by the way) and work to keep us safe, not just to get us back to the work machine as soon as possible.
Marion	Healthcare	1) Testing most important 2) Vaccine Until these are in place, no one will be comfortable even mildly opening up the markets. I will not be okay sending my kids back to school without the above, nor businesses open to the public. If businesses can take care of daily transactions without public interactions than that should be the new norm for everyone which will be safer for everyone in the future as I am sure this will not be our last threat of pandemic's.
St. Johns	General	Please OPEN Florida today!!!
Lake	Finance	The Florida state is not ready to reopen until June 1. Reopening would be high risk for covid-19. Too many people from out of state would come here and bring virus. Look universal studio and Disney not open until june 1.
Palm Beach	Healthcare	Elective surgeries and procedures should now be permitted

AMERICAN OVERSIGHT

Hillsborough	Professional Services	The Re-Opening of Florida should absolutely commence with a slower roll-out for areas such as Miami and Orlando where there has been a lot of international travel and cases spread because of it. With Florida DEO not paying out over a month later of submitting unemployment, they owe it to the citizens they have failed in the State of Florida to be able to start getting their jobs back. People can't pay their bills, pay for food, pay for anything and thousands (myself included) haven't, and will not be seeing the stimulus check for allegedly another 20+ weeks, with no date to even know for the unemployment compensation. These financial stressors on top of mental health declining with the inability to work, find work, do anything, is a recipe for disaster especially the longer it goes on. If businesses and people want to work, let them work. If citizens alone aren't receiving payout, I can only imagine all of the small businesses that had to shut their doors, perhaps permanently at this point. The Florida DEO website hasn't even been acknowledged as 'designed for failure' until now, that is another decision that is too little, too late.
Miami-Dade	General	Wearing a mask outside of our home should be mandatory . It's the only way for people who understand the seriousness of this virus , To feel safe . If not a lot of people like me will continue to stay home until it's safer , That means no shopping , no spending money ... I really believe that wearing a mask would slow to reopen faster ! Thank you for the opportunity
Seminole	General	We can't consider reopening until the hospitals are ready (sufficient PPE, ventilators, etc) for the spike that will come. Reopen slowly once they're ready! We can't let the hospitals get overwhelmed or our healthcare workers go without PPE. We need programs to help the financial burden of individuals and businesses during the closure to reduce the pressure to reopen.
Brevard	Agriculture	One of the most affected and perishable areas within our state is the agriculture sector. Yet the tasfce is absent the state's elected Secretary of Agriculture. this vital sector MUST be fully represented and given priority when determining a re-opening strategy. Listen to the experts in this field, NOT politicians orfriends of the Governor.
Hernando	Food	The government is giving all this money to businesses. Without more stimulus to citizens how are we going to spend money in those businesses? Unemployment is a joke in Florida. We are starving and the government does not care. 1200 might pay one months rent or mortgage. What about electric water car payments insurance and more. Our state government has failed us
Osceola	Tourism	As someone who has worked in the front line of hospitality for over five years, I believe it is safer for the interest of all of our valued Frontline workers and locals that Florida remains closed at least until there is a more steady control of the virus. The bigger focus should be helping the unemployed and figuring out a way to control the virus, because if Florida reopens now, history might only repeat itself.
Sarasota	General	Reopen the State use ppe and keep the vulnerable at home

AMERICAN OVERSIGHT

Palm Beach	Recreation	I don't see the need to close boat raft friends or family go on boats and golf courses open up golf courses even a walk only it's not a contact sport it cost a lot of money to run golf courses they need to be open and get revenue
Pinellas	Retail	Please do not open the state back up yet. As someone who works retail I can assure you that people have not followed the safer at home order. My concern is that not enough essential employees have been tested. As someone on the front line dealing with thousands of people daily, our risk is higher than the average person and I don't know one person that has been tested. I recommend testing grocery store employees as if one of us were asymptomatic we could be spreading it like wild fire and not even know it. Yes we wear mask but how certain are we if how well they are preventing the spread. With currently only 1 out of every 100 people being tested that's still not great odds for being certain it's under control.
Osceola	Recreation	I would like to see Florida's campgrounds open back up! I don't believe they should have been closed in the first place. Most people are self contained, and there is plenty of distance between campsites for the most part. They are even saying sunshine kills the virus. Old home remedies always included fresh air and sunshine! Please open them back up!
Orange	Retail	I think stores need to open. Grocery stores have remained open therefore they should be able to also. I think if the proper rules with staying proper feet away from people are enforced we could all start getting back to the new normal. Barbershops salons all those other small business that rely on our business need to be opened. They need our support. Central Florida can do this and make it right so we can all get back to our old ways. Restaurants need to be opened even if it's with limited people but so many workers need to get back to work. Florida needs to start opening. Slowly but surely. It can be done. It has to be done.
Orange	General	I just want to make sure we follow the medical field experts for when we should reopen public areas. There is no sense in rushing into opening everything up if we explode in the amount of cases, it would put the public in danger and possibly force us to shut down once again.

AMERICAN OVERSIGHT

Seminole	General	We need to keep the Stay at Home order in place for an additional 21 days after April, 30th. There are too many unknowns and not enough testing performed to deduce accurate numbers/percentages. Then continue to re-evaluate thereafter every 14 days until we see a dramatic decrease in deaths and new positive cases. When we begin to see the bell curve flatten out, continue with the stay at home order until the figures are well down towards the bottom of the bell curve chart. This virus could easily start to mass produce again if we are not careful. Perhaps open up the beaches and parks but with distance restrictions and masks in place and enforced by police. Keep all of the drive up food services in place but employees wearing masks/gloves. Any drive up service to remain open, essential services remain open but with proper safety equipment in place. People can continue to order online from retail stores. The slow processing of unemployment claims needs to be taken care of immediately. Small businesses can take advantage of the Bill that was just passed for loans. Bottom line: Saving lives is more important than financial distress. We can recover from a financial disaster, however, money has no value if your dead. Business should concentrate of just surviving, maybe breaking even financially or a slight loss and NOT seeking a profit during this pandemic. Thank you
Broward	General	In my and my family opinion (we are 4 people) the state should start reopening immediately, but using steps with a definitive goal to be fully back to normal by the end of May. 1. Reopen beaches for walking and doing sports. (The sun and a fresh air actually helps to fight the virus). 2. In a week reopen parks and some businesses that does not attend too many people. 3. Continue reopening businesses gradually. Remember that all this measure is for single purpose only - flatten the curve, reopen, monitor, if the curve is affected hold on. This is a matter of maintaining the balance. Overall everyone will get sick and the virus will dissipate, faster we go through it without overwhelming the hospitals - better. Right now the hospitals is practically empty. Please do perform a study on how many people actually got the virus and recovered, that will also give a clue regarding when can we reopen. I myself, my family and several coworkers already had the virus and recovered, none of us have been able to get tested, our symptoms was too mild for an ICU.

AMERICAN OVERSIGHT

Hillsborough	General	If we do not open the state of Florida back up we will not have much of a state left. I understand the importance of keeping everyone safe but this is now the time get back to some kind of a normal life. We have all done what the President and the doctor's have asked us to do with social distancing and we now know that we can do so and stay safe doing so. All the small business need to be up and running with in the next week life has to move on. This is no different than a death in the family you have to pull yourself together and move forward and take life one day at a time. Now is the time to get moving forward and put this great state and nation of ours back to work. We all know the danger that is out there we take that chance every day when we leave our homes to go to work to the store's. This is what life is all about the chances we take in life we are not guaranteed tomorrow so we must live life to the fullest each day as if it's our last. Now is the time to get back to work.
Orange	Tourism	With tourism being such a large part of the Florida economy I feel that the vacation rental ban should be lifted as part of the plan to reopen our state. It's estimated that the rental home business accounted for $27.4 billion in sales in 2018 alone and there are many families that depend on their rental properties as a source of income. With skyrocketing unemployment numbers across the country, the rental ban cuts off another source of income for many families and small business owners, which just exacerbates these difficult times. Taking into consideration the health and safety aspects of lifting the rental ban, I believe that some rental properties can be a much safer alternative for quarantining families as opposed to hotels and resorts. Some rental properties are far more isolated than the close quarters conditions in the majority of hotels and resorts. Hotels and resorts also have shared gyms, cafeterias, pools, etc. which are a breeding ground for viral transmission. For the above reasons, please consider lifting the vacation rental ban as soon as possible for the sake of our state economy. Even if the ban is partially lifted with some kind of stipulation on the vicinity or type of rental property I feel it would be beneficial to our state and livelihood. Thank you, Mark Rizzo

AMERICAN OVERSIGHT

Sarasota	Government	I feel that reopening Florida right now would be a complete mistake. You have so many people refuse to participating. If you go into the stores and see the number of people wearing mask it's crazy. You have very few that actually wear them. Kids and infants in the store with no protection.You have a lot that refuse to follow the CDC suggestion and the one that do, don't wear them properly. People don't respect the 6 foot distancing rule. You have store that do not wiping carts, I have seen things that just shouldn't be happening. The worst of it all is that they don't care enough and then they become ill and expect our Heroes in the health care system to risk themselves to save them from the virus after they have refuse to follow the guidelines that would of protected them and our medical heroes and their families. It's not fair that they are allowed to continue to spread the virus because of their negligence and others have to pay for it. People should be held accountable for their negligence the same way when they break the laws for other things. It's a matter of life or death. I have seen kids in the store with no protection whatsoever. These kids can come around my kids at school and expose them and then suppose me I have Lupus. Then what? Why are people not taking this COVID 19 virus seriously. No one cares until it affects them directly. Please don't open it's still too soon. The numbers will just continue to grow. You will see. You have a huge group of civilians that refuse to follow guidelines and just want to reopen Florida to continue to break the rules. They really do get how serious this really is. I am scared. If I would of seen people actually doing the right thing then I would be concerned, but it is just not happening you need to go or have someone show you what it really looks like out there. Sincerely Its too so to Reopen Florida, Concerned Citizen
Orange	Finance	While you pander to business with your task force Florida starves. Go fix unemployment. We are out of money. It doesn't matter when businesses reopen if no one can afford to pay their bills. I'm hiking up a mountain of debt built by the state and my lifeline has been stolen. You are going to have a class action lawsuit. You are going to lose reelection. You are going to be responsible for the economic ruin of millions. Worry about the voters. We will support our local businesses. We need you to fix unemployment so we can handle the economy.
Marion	General	Florida should not be reopening until their is a clear and tangible halt in new Covid-19 cases. While the virus heavily affects within a certain demographic, viruses are known to adapt and mutate quickly. If Florida is reopened too early this demographic of affect will become much larger and any economic "benefit" that seems to be had by reopening will quickly become counter-beneficial.
St. Lucie	General	Let's stop the foolishness of shutting down a whole state!! Get everything open! If you are vulnerable to the virus then stay hope and let the other 99% of us get back to life!!!!

AMERICAN OVERSIGHT

Hillsborough	General	Governor, As a Florida native, I would like to thank you for your administration's efficient and wholesome handling of the Coronavirus epidemic. You all are truly the right people for the job! In a nutshell, my opinion is simple, it is time to open Florida up again. Thanks to your administration's steady hand, and the efforts put forward by the federal government, we have accomplished our mission in "flattening the curve" and bolstering our healthcare industry across the nation but especially here in Florida. Now it is time to help Florida's small business and more than 400,000 unemployed Floridians get back to work so that they may begin providing for their families. Of course, I trust the experts and give my opinion in agreement with their recommendations regarding masks, social distancing protocols, and testing to prevent spikes of infection. However, I firmly believe that we can "walk and chew gum at the same time;" especially since the victims are among the most vulnerable of our society. Keep up the good work, and I hope to see the state of Florida reopen in the next few weeks. With Complete Support, Emmanuel Vazquez
Pinellas	Healthcare	I think we should wait at least 2 more weeks before we open up businesses. May be gradually open up some of the parks now with warnings and restrictions. Just to make sure we are well down on number of cases of covid-19.
Miami-Dade	Healthcare	Please do not open Florida up at this point . Perhaps parks but no nonessential business. It’s scary that this virus has many symptoms and healthy young people are getting blood cots and strokes . We need more time to figure out treatments . Safety of citizens is most important Thank you
Seminole	General	I would support reopening Florida. However we need to be prepare for an aggressive return of the virus this fall. Testing for immunity is a critical need to get out in front of this virus.
St. Johns	Recreation	Dear Governor DeSantis, Please reopen beaches more than just the few hours currently open, including driving on & parking on the beach. We so miss our beautiful beaches here & being outdoors is actually healthy. Also like our neighbors in GA, NC & TN, please begin to reopen hair & nail salons shops & restaurants. Our beautiful city depends on those shops & restaurants and they are really struggling. Thank you for your strong leadership.

AMERICAN OVERSIGHT

Palm Beach	Education	With a shortage of hand sanitizer, disinfecting wipes, bleach cleaners, masks, gloves, hand soap, paper towels, and toilet paper, to name a few essentials, schools need to have support to open. Many of our staff, faculty, and students are high risk due to age and/or health, myself being one with lung disease. Though I understand we are important to getting parents back to work, many students are sent to school sick because of workplace PTO policies or lack thereof. A LOT of thought needs to be done as many classrooms cannot practice physical distancing due to room size and number of students. Please think and plan hard over the summer how to be sure we are all safe and keep the spread down.
Seminole	General	Re-open the state! Let those that want to work, work. Let those that want to stay home, stay home.
Broward	General	I think it may be too soon to open, although I would love to take a walk on the beach. S. Floridians are known for being rule breakers, so I am concerned a few will ruin it for the many. Haircuts and grooming should be allowed with very strict guidelines and penalties for violating. Antibody and regular testing should be a requirement for anyone dealing with the public. I think any openings has to be considered county by county, city by city. Good luck Governor...our lives are in your hands.
Broward	General	I believe as we have heard from many that politicians should move aside re; Covina 19.The scientists are unsure of how to stop the pandemic,opening businesses too early could be a huge mistake.social distancing seems to be helpful. The politicians should focus on getting the people's checks from unemployment benefits, and taking care of our most vulnerable!
Orange	General	I think it's still too soon to mass reopen. Especially when we haven't hit our predicted peak yet and we don't have enough testing kits.
Duval	General	Jobs should be open with restrictions School with more classrooms for kids and teachers so its not crowded. Open with half days. Hospitals too need more room and money More pay $$ for essential workers continued Medical field Grocery stores Gas stations Special hours for us to shop. Help daycares too. They help care for essential workers children. I work in the medical field and i have two small children. I always thought their should be a curfew after 11pm. Everything shut down by 10. 11pm-4am no one on the street. Easier to manage.

AMERICAN OVERSIGHT

Palm Beach	Recreation	I believe opening to early is a mistake. Businesses before recreational. People need to get back to work and jump start the economy. If you open up recreational then open gyms and pray everyone listens. I would hate to open up beaches and boat ramps so everyone can party and spread the virus.
Volusia	Management	It is too soon to open back the state of Florida. We are still receiving a thousand plus cases a day of covid-19 with the stay-at-home order in place. If we open back up that number is going to quadruple and this virus is going to become so out of hand people who lose everything and everyone. Until we have weeks of a steady decline, nothing should be reopened yet. Unemployment needs to get it together to get all of these people their money to live during this crisis situation. Safety is number one priority to our our country.
Palm Beach	General	As we make plans to reopen, it seems the public is paralyzed by fear due to the constant bombardment in the media and otherwise regarding Covid 19. Accordingly, clear messaging and reiterating the following concepts would be greatly beneficial: 1) Covid 19 will likely be with us for a long time and staying in lockdown is not sustainable; 2) Because a vaccine will likely not be available until at least next year, we must put in place sustainable long term measures to address it; 3) the negative economic impact may well result in increased depression, anxiety and suicide, as well as poverty and even starvation (meaning staying in lockdown has public health and life/death ramifications, and is not just about economics); 4) whether we open tomorrow or in two months, a second wave is likely and expected to occur due to the nature of the virus (knowing that this is expected and/or inevitable may actually lessen fear); 5) Flattening the curve was primarily intended - not to reduce the number of those infected - but to spread out the timeline of those infections to avoid overwhelming the hospitals (I see this misunderstanding often); 6) Florida hospitals are nowhere close to being overwhelmed but have significant capacity to handle any potential outbreak; and 7) given the very low risk to those who are young and healthy, allowing them to get back to work and build up immunity, while sheltering the elderly and those with underlying conditions, is likely our best option to protect the vulnerable. It might also behoove the public to be made aware of how other counties like Sweden are addressing this and have avoided lockdown altogether and seem to be approaching her immunity in the next few weeks. Thanks for the opportunity to comment. Best of luck.
Palm Beach	Healthcare	Follow experts' guidelines to open Florida. We haven't tested enough. We haven't done any contact tracking. We haven't fully and accurately reported Covid-19 sicknesses and deaths. When we open, we need strict rules to avoid a second peak.
Palm Beach	Recreation	Open summer camps and sports for kids. No large events or parent spectators. Have kids tested to participate. The children need to start getting out of the house.

AMERICAN OVERSIGHT

Indian River	Healthcare	I am hoping that the dentistry field to include labs would be able to open ASAP so many people are in need of this area , myself included having a recent Dentistry emergency Which has a temporary fix but without labs & regular dentist appointments in a holding pattern. Also would like to see a safe opening of hair salons & also gyms as long as safety guidelines are followed. Thank you Governor DeSantis I feel you are doing an snacking job in a difficult situation
Pinellas	General	I do not at all believe that reopening just to get the economy started quickly is the proper decision. I dont believe that it should be done until public health officials say it is safe and smart. Why have we all "stayed home" for a month, just to rush back and undo all the progress that has been made? I believe thats a disaster waiting to happen...maybe we have 2 more weeks of this, Im fine with that if thats what should be done for everyone's safety!
Orange	General	Good Afternoon! We are very thankful for everything you all have done for the community so far. Our suggestion is to keep business closed at least until June 1st. If small business were to open now and get confirmed covid cases no one would go back to their business and it would be worse then if they had waited until its safe.
Osceola	Food	As a Server in a restaurant near Disney I feel its too soon to open restaurant dining. I would not feel safe working. I am one that was tested and am clear. But until there's no daily deaths or everyone in Osceola and Orange county get tested. Not sure how I will feel them but probably alot ssfer.. Walmart is the worst place to go especially E. Osceola parkway Kissimmee fl. Sure they have signs and cones but there still allowing way to many people which makes social distancing hard. They are always out of sanitizer wipes for the shopping cart too.
Palm Beach	Healthcare	I work per diem as a RN in OP surgery. I have been told we plan to resume work May 4. I would hope by Monday or Tuesday we can get clarification on resuming elective surgery in PBC Secondly I live in a small HOA community in PGA National Many of my neighbors are older and get there exercise by going in our small community pools. It is 90 degrees many days. Before the end of March everyone was taking turns using pool, following social distancing and wiping down chairs. Please allow private pools to reopen to help keep the elderly active and healthy while following the guidelines I believe it is time to reopen slowly and safely

AMERICAN OVERSIGHT

Hillsborough	Government	I was affected by the pandemic. I am in the rental car transportation industry and some are on furlough and others were permanently paged off. The unemployment site is a disgrace. I have not receivedmy a check since March 23rd. The questions still have to be answered to be able to claim your weeks. It took all day Thursday, 4/23/2020 to claim the weeks of 4/4 to r/11 and 4/12 to 4/18 and now I cannot claim again until May 7th, this is ridiculous. I have family members in north Carolina that have already received 2 cares act checks and 3 unemployment checks....why is Florida's system that inadequacies to the rest of the nation, we are a disgrace...our mortgages will forebare your payment now, but in 3 months they want all of it, what good is that.
Orange	Education	The reason is people are still dieing around us. I'm a diabetic and plus have High BLOOD PRESSURE so we don't know who is carrying COVID 19 around so being said until everyone is tested no please don't open the economy back .
Pasco	General	Open it all up. Numbers don't lie but people do. This is not much worse than the flu. Curve is flattened and economy is ruined . Open it up
Hillsborough	Recreation	As a small-business man and a leader in my industry of tennis I manage multiple tennis facilities much mostly communities and Tennis Club I also managed a junior team tennis League across Three Counties with close to 50 clubs and communities for the reasons recently outline regarding the fatality rate much lower in the .1% to .2% range similar to flu + heat humidity and sunlight killing the virus plus Hydroxy Chloraquin and other treatments This is an immune issue and all who have immune issues and older people with morbidity issues should take more caution Plus all the projected initial models scaring people to death we never should have shut down but we certainly should be reopening especially Florida businesses and people are smart they will do it the right way let's be the leading State Not Just Tennis although tennis governing body is the USTA and uspta gave the go-ahead on the 23rd four states in phase one which I think Florida is to reopen and start playing recreate and for tennis coaches to start teaching I will know most of the clubs in this area about half or little more have never stopped they were playing and they were teaching very safely handling the balls not letting people touch it things like that and Hillsborough County has one of the lower counties across the state but all in all I feel like we the people and the businesses will open up in the right way let's reopen May 1st
Broward	General	Don’t be so stupid. Keep this shit closed so we all don’t die
Broward	General	We should follow the recommendations of the medical professionals on when it’s safe

AMERICAN OVERSIGHT

Palm Beach	General	I understand that those without income are hurting & need to work. There needs to be a compromise to open slowly & safely, while distancing. Keeping things local, don't let all the tourists come in and spread the virus because they traveled/exposed themselves. I work for Scripps Research and they are only letting some lab members come back mid May? and administrative much longer than that (with strict restrictions!). They are scientists, working on COVID-19, they know. Luckily, I am able to work from home for now and I realize I am lucky. We have been closed since 3/16 except those working on COVID-19. Don't follow all the advice of those whose interest are political and money, listen to some Drs & scientists. Find a doable compromise that allows distancing and being safe. That includes enough PPE for everyone to do their jobs appropriately/safely. I do think there will be a resurgence this summer if too much is open to travelers and then again this fall. My husband works for the County and they just got masks? That is wrong and not safe. Thank you.
Seminole	General	I think the state should let business open with social distance rules / guidelines in place until more information is gathered. That information is anti-body testing. We need to better understand how many people get sick once infected and die once infected from COVID-19. We cannot ruin lives by taking away their jobs because we are scared and if the antibody tests show the same results as we have recently seen in New York, then we need to treat this like we do the flu and get life back to normal. Once reopened, we can control outbreaks by Testing, Isolating, and if positive test result Quarantine (TIQ). Then tracing who the infected came into contact with. Notifying and testing those people, and TIQ again. We should be stockpiling ventilators and PPE equipment as well as training additional healthcare workers and makeshifts hospitals with beds to prepare for an outbreak once we reopen. While we wait for the antibody testing results here are some ideas for reopening: -all residents of Florida should be encouraged to wear a mask when going on with their daily lives. We should be required to wear them when inside places were social distance is impossible like them parks, grocery stores, movie theaters, concerts, hospitals, colleges, entertainment venues, offices, and maybe other places I am not thinking of. -However, there will have to be exceptions: if a client is getting a haircut they will not be able to wear one, or people eating inside the restaurant will not be able to either. If a person is not comfortable with this, then they can choose to not enter that premises. -Hospitals must let at least 2 family members in to be with those who are dying or giving birth. They must were a face mask. -Outside parks, beaches, playgrounds, springs, should all reopen. If an outbreaks happens and we trace it back to one of these outdoor recreational facilities, then we reconsider. -more attention should be paid to cleaning and disinfecting bars, restaurants, theme parks, other tourists/entertainment venues

AMERICAN OVERSIGHT

Polk	General	I have concerns about reopening the state too soon. Might be okay in cities or counties with very low numbers, but not our larger cities. When it is reopened, I think it can only be with a MANDATORY face cover. Yes, there will still be some who get sick, but will help be less. Stronger enforcement in large retail stores, face cover, less crowd, essential goods only. Too many people stroll around for something to do. Get it, but quickly, get out. There needs to be much stricter policies in place. Allow each Mayor to propose their city plan, and be approved by local citizens. Shouldn't be a single persons decision. Thank you.
Volusia	Healthcare	as a therapist doing telehealth I want a measured approach to opening that follows the advise of the scientists and medical community people are scared and that's understandable opening too fast too soon will set us back I no longer see patients in an office that I still pay for but there is no way to keep pts safe if they have to take an elevator. please don't let florida morons be trending when these decisions are made short term pain for long term gain is the goal safety first and please fix the unemployment system well known it was designed to fail and citizens in florida are hurting and the failure to expand medicaid is hurting them further open it all up put people at risk and make it even more difficult to claim unemployment
Brevard	General	I think the state should be in the stay at home order for 2 more weeks we just finally got some type of testing in brevard county and it's still not enough. The numbers are going up every day I think there should be stricter rules for people being out I am a concerned mother and grandmother please please do not open things up yet more and more people will get sick.
Palm Beach	General	You only get one chance to fully follow expert medical advice on this virus, and the almost certain consequences for not doing so will follow you for not just the rest of your political careers but your lives. Don't fuck it up.
Volusia	General	I think that relaxing mitigation and the stay at home order at this point is a mistake. I understand that the economy is suffering but it would be worse to relax orders and then reinstate. As Americans our patience and memories are very short-please don’t let impatience make decisions. I could understand starting with opening small retail businesses with continued mitigation rules in place and from that guage the confidence level of the public. I do not think that restaurants, nail salons, movie theaters, hair salons or tattoo parlors need to reopen yet. We live in a tourist driven economy in FL. Keep the stay at home order in place for one more month-hopefully start to see our covid numbers start to significantly drop-then start seriously looking at phasing opening the state. Perhaps salvage some of the summer tourist dollars.
St. Lucie	Healthcare	Please do not open to soon. People will die. Hospitals do not tell all. Get unemployment going.

AMERICAN OVERSIGHT

Broward	Administrative	ALL NON ESSENTIAL WORKERS SHOULD BE ABLE TO COME BACK IN A VOLUNTEERING BASIS DEPENDING ON THEIR NEED. FOR EXAMPLE MY WIFE WORKS IN A OFFICE OF A FURNITURE STORE. WHO IS THINKING OF BUYING FURNITURE RIGHT NOW? WITH THE ECONOMY GOING TO AN UNCERTAIN FUTURE TO BEGIN WITH I AM IN THE GROUP RISK WITH DIABETES, HIGH CHOLESTEROL AND TRIGLYCERIDES AND HIGH BLOOD PRESSURE. IF MY WIFE IS FORCED TO GO BACK TO WORK LIKE (IF YOU DON'T COME TO WORK YOU FIRED) SHE POTENTIALLY CAN GET INFECTED AND BRING THE VIRUS HOME AND GET ME INFECTED AND POTENTIALLY KILL ME. I KNOW SOME PEOPLE NEED THE MONEY TO PAY THEIR BILLS AND ARE WILLING TO TAKE THE RISK, I TOTALLY UNDERSTAND.BUT NOBODY SHOULDN'T BE FORCED TO GO BACK TO WORK. AT LEAST UNTIL THE NUMBER OF CASES COMES TO BELOW 100 CASES PER DAY IN THE STATE.
Brevard	Tourism	Open theme parks to Florida resident pass holders as test. Ask people to maintain 6' separation between families. Open restaurants at limited capacity. Open hotels. Do not require masks as people want to walk around and eat and drink. Possibly wear masks while waiting in lines for rides.
Marion	General	All businesses need to open as quickly as possible so we can get our economy up and running. Social distancing, limits of patrons in a facility, testing, masks, cleaning, etc. standards will need to be applied for a while. As things improve, some or all of the limitations can be relaxed. As a 72 year old retired CPA, I feel we need our Florida businesses operating & people employed to restart our economy, The business losses coupled with the enormous governmental deficits harm not only the businesses and their employees, but also all consumers of their products & services. The longer we wait to get people back to work , those employees may not have the resources to provide the basic necessities to their families. Without the products and services they provide, basic supplies may become even more scarce. The lack of sales revenues & tax collections will take years to recoup. I am concerned about the effect of this on my children & grandchildren. Savings & retirements plans are not being funded. Payroll taxes are not funding Social Security programs. Sales and entertainment taxes are not being collected. Another concern is the effect on the education of our youth. The loss of contact with their teachers & peers in the classroom may set back their development. Some type of remedial program needs to be developed to help our students stay on track to advance to the next level of their education without a gap in their learning. Schools need to be opened with possibly some additional instruction or testing to make sure our students are able to advance their education track. Sports & Recreation need to be restarted not only for the athletes, but also for the fans. Training & exercise is necessary for all levels of sports & recreation. Summer camps & training need to be open. Sports facilities need to open to prepare for team competition. Guidelines need to be developed for the safety of all athletes & fans. Tourism is important for the financial health of Florida. the large

AMERICAN OVERSIGHT

Palm Beach	Recreation	Unfortunately the Mayor of PB County has overriden your(Governor) order and he and his fellow commissioners have pretty much closed everything with or without offering their reasons. We Floridians appreciate that you explain and discuss and reason but we are unable to recieve any explanations from the Commissioners. Why a walk down a fairway...ALONE....or down a beach....ALONE....exposes anyone to Covid-19 is beyond comprehension and yet, they offer nothing for us, their consitutents. I have asked them if they have looked at the county north of us to see if their cases have ballooned or not....as their courses are open! We've been told if we ignore the Mayor's order, the sheriff's dept will step in....these are not the words of leaders but of bullies. We thank you, Governor deSantis for using common sense, science and for understanding your responsiblities for the good of the citizens of Florida.
Osceola	General	Please re-open the state without restrictions
Brevard	Tourism	- I'd suggest that IF AND WHEN the theme parks are reopened, consider limiting attendance to the theme parks to Florida residents only. This would prevent people traveling from out of state, and potentially from hot-spots, into Florida. This could help control to potential spread of the virus throughout Florida. - Please do not be rushed into opening the state. Testing is not equally available throughout all areas. Just 3 weeks ago, an urgent care in our county told us they had ONE test for COVID-19, but they literally told us they did not want us to come in and get tested because a positive result would mean they'd have to shut down. We could not find testing in our county at all. I know that has since been changed, but it takes two weeks to see where the State stands today in terms of cases. Don't assume we are doing good just yet.
Volusia	General	Open up the state for all that is good in the world. People have nothing to do and that will eventually result in higher crime rates and riots/protests. The virus is inevitable. Are we just going to stay inside for the next year or two? I don't think that would be a wise decision. More people still pass away from the flu and there are plenty of people that recover from the corona virus. Open up the state PLEASE so that small businesses and the country don't suffer.
Orange	General	If Florida re opens we are in danger of spreading way more than it is thisbis a highly visoted state.Please do not re open until it is completely safe to do so money its not more important than lives.Mi life matters just as my loved ones and all yoir loved ones lets think about that please please do not re open yet.
Duval	Government	It is not safe yet to reopen the state. You are taking a chance with people lives over money. Even if you open state how is anyone going to buy anything to help buisnesses stay open and bring their workers back when most in florida our broke cause of the unemployment system has failed Floridians. You are causing so much up roar over not paying people after you told them to stay home. Now you want to open because you dont wanna pay people whats owed to them. Opening up our state is not going to help the economy since people are broke and also scared to leave their houses. Everyone in florida knows why yall trying open an its not cause you care about the people but because yall losing money being closed
Duval	Government	Wait 30 more days! Be safe not sorry

AMERICAN OVERSIGHT

Orange	Education	I believe we need to listen to the expert health professionals prior to rushing to opening everything back up. I realize many businesses, including education which I am in, are being heavily impacted. However, there needs to be a well thought out phased approach. Also are there enough ppe to go around to protect employees. What about testing, antibody. If we don't do this right the first time...look at other countries etc...see how seriously some of them took this early on. There rates are lower. We will have a major resurgence which could have even more lasting impacts on humans and the economy.
Manatee	General	I suggest open up Florida and let the business owners use social distance guide lines. Businesses that people do not feel comfortable at will loose business of there own accord. People will only go to the businesses that put forth an effort to make their customers feel safe. Open Florida, and let common sense take they reign. Thank you for allowing public comments.
Lee	Education	Are we able to open the technical colleges and give grants to those interested in joining the health care work force, for example, as a medical assistant so that we can go help out at the hospitals or doctor's offices that need support for front line medical workers? I am currently in healthcare administration and unemployed - I'd love to take this time to switch gears to learn more to be able to help my community!
Orange	General	The more data we have the easier it is to make informed decisions. Data shows the models were woefully off base. The current data would indicate C19 is very similar if not less than deadly as influenza A. The public is aware of the risk. The government needs to step back and allow the public and the businesses make the best choices to open. We need to open to Florida residents only for the month of May. No out of state visitors until we acquire more data. Open all businesses to Florida residents. Open all beaches and parks. Allow businesses to be creative on how they service customers. Employers should double the amount of allowable sick days an employee can take each year. Continue PSAs on washing hands, cleaning hard surfaces. The shutdown has lasted long enough to allow the healthcare system to prepare. Healthy people is the best defense, herd immunity. Staying at home weakens the immune system. We need to allow the healthy to live normal lives while protecting the compromised and isolating the sick. Open Florida to Floridians first. Then reassess as more data is received. If people want to wear masks they should. Eliminate all touch screen ordering at businesses. Eliminate lines with virtual queuing. Allow crowds as long as the venue performs temp screening. Allow innovation. People are smart, they will figure it out. Thankfully the virus isn't as deadly as it was once thought to be folks.
Orange	General	We shouldnt reopen until all of the country has peaked and then shows 0 new cases. As a tourist area, we are too vulnerable. Especially as many states have unprotected protesters who have clearly stated in their written signs and agendas that they do not care about our health. Some have even said If you are sick, come anyway. They are treating other people's lives like a game and gullible people are falling in line.

AMERICAN OVERSIGHT

Sarasota	Healthcare	Let's open elective surgeries. In public-masks and hand washing important. Those at high risk can continue to self quarantine.
Broward	Administrative	I am writing this email to express my concern that our State may move too fast I hope you listen to the medical community and your residents about going back into the community and exposing themselves to the virus. We have sacrificed going outdoors in the hopes social distancing and stay at home help and it has. I am furloughed and still can see opening up too fast will result in a few weeks seeing set-backs. Please do the right thing. continue social distancing, wearing a mask and stay home for at least until June providing medical experts feel we are in a good place. Thank you.
Lee	General	Time to open with appropriate social distancing. Beaches, pools, Restaurants, etc. all need to reopen.
Lee	General	I believe that Phase 1 should begin, to include hospital surgeries, restaurants (with continued social distancing), hairdressers and all others. The disparity of what is/was an essential business is, in my opinion, not well thought out. Many small businesses may never recover. I believe that the residents of Florida can follow continued social distancing and can make the choice to remain home if they are insecure. Cancer patients As well as others need to receive the surgeries that were put on hold. They have been put at risk through no fault of their own. People want and need to get back to work. Please consider moving forward. Thank you.
Brevard	Healthcare	I would like to have the antibody testing done for everyone going back to work, so if they have had the virus, they are free and clear. That way we would know who is safe from the virus, at this point. If you have not had the virus then you know you need to be careful. Have the antibody test available for anyone who thinks they have had the virus. Very important.
Hillsborough	Healthcare	Please don't open the state until medical professionals give the go ahead. I work for healthi providers, and we are seeing this tragedy unfold up close and very personal. People are dying. Too many.
Miami-Dade	General	OPEN COURT HOUSES LET US GET MARRIED ALLOW RETROACTIVE DATES FOR MONTH OF APRIL SINCE COURT WAS CLOSED SO OUR MARRIAGE DATE CAN BE OUR WEDDING DATE SINCE THAT WAS ALREADY CANCELLED PLEASE

AMERICAN OVERSIGHT

Marion	General	I write this as I think about the long term impact this will have on my children. Open up Marion County with preventative measures. I feel that we will have equal amount of people, adults and children, die from mental health illnesses due to isolation, lack of wages and food, as the virus in the end. Students are struggling with online learning, isolation, and not having their normal routine. Schools can offer a combination of online and in person curriculum to offer some sort of normalcy for kids. Parents can get back to work to take care of their family. In a matter of two months high school seniors lost all the fun and memorable things they were waiting and working soo hard for. Open Marion County up with preventative measures.. please we beg you!
Lee	Recreation	Tennis is perfectly safe to play with built-in social distancing already there. Parks should reopen with an insistence on social distancing. Even baseball, people could play catch, practice hitting.
Marion	General	I would definitely not reopen the state. Money should not be more important than people's lives. Keep Florida closed
Hillsborough	Recreation	All business. All. 50% fire code capacity 5/1 - 5/14. 75% capacity 5/15 - 5/30. 100% after Simple solutions for all Floridians to get back to work
Escambia	Retail	Hi Governor DeSantis & the Florida Task Force, The people of Florida are depending on you. You have locked us down, taken away our means of providing for ourselves, all in the name of “safer at home.” It’s time to put an end to this giant blow to our personal financial situations, not even to mention the economy as a whole. I am a young professional just getting started in my career. My fiancé is finishing up his degree right now, set to graduate in one of the saddest times for a young person. Not because he doesn’t get a ceremony but because there are no jobs and businesses are shutting down. He’s an essential worker at Target, who raised his hourly pay and then cut his hours in his down to barely anything (8-12 hours a week). I have not seen a dime of my unemployment and I have been furloughed for over a month. We also did not qualify for the stimulus checks since we were claimed “dependent” in 2018. I ask you, sir, do we sound ‘dependent’ to you? Our lease is coming to an end and we can no longer stay there. We cannot afford our housing anymore and are forced to move in with my family. Let us go back to work, sir. We are suffering. More people are suffering from this economy that was caused by the overreaction of the media and the political games you’ve played more than this virus. *The virus is here to stay but this economy doesn’t have to be.* Please let us go back to work. Victoria
Marion	General	My husband David and I would like to re-open retail and salons with social distancing and masks. The same for work places but add temperatures taken daily. Thank you for asking.

AMERICAN OVERSIGHT

Hernando	Tourism	Thank you for the opportunity to voice my opinion. As an RN who has been working through this challenging time, like others I miss going to theme parks, movie theatres, etc. Not only is our economy challenged with these employees out of work and no tourism tax etc but there is no where for anyone to "let off steam" and forget some of the worries of the week. My suggestion is to please CAUTIOUSLY open venues such as restaurants, theme parks, movie theatres, bowling alleys, etc with STRONG guidelines to maintain social distancing. Theme parks should only be allowed 40% capacity (this would hopefully allow for 40% return of theme park jobs), restaurants must have 50% capacity with strict guidelines on 6 foot distances between tables. Bowling alleys, every other alley, movie theatres, every other row and 3 seats between families. Strict cleaning guidelines should be adhered to between patrons and ALL employees (and patrons who are not eating/drinking) should wear masks. Once point of care testing is widely available, this could also be utilized for entry to airports, theme parks and larger venues. Just my thoughts. Thank you. Amy Plunkett, RN
Lee	General	I think that in order for any one business to open . They have to have a 30 days supply of ppe for each employee and make sure that 6 foot distance is adhered to and roatig workers days off and time in and out .
Lee	General	With regarding to opening Florida, I would ask that we take a region by region approach. In Southwest Florida, we have flattened the curve and have much lower infections. With maintaining social distancing, wearing face coverings and appropriate business precautions, we should open businesses as soon as possible. The only exceptions would be those businesses that can not maintain social distancing like theaters, concerts and large sporting events.
Levy	General	Until testing is widely available for everyone, the state should remain closed. I am an essential worker and it's terrifying with the limited number of people who are out and who do not utilize masks and gloves and do not maintain social distancing. Imagine if the state opens how many more will be out there? In some states, corporations paid for testing regardless of whether symptoms are present. Why can't that be done here? Save lives. Keep Florida closed.

AMERICAN OVERSIGHT

Broward	General	I am writing to express my extreme concern that we be especially careful in opening our businesses up too soon. There has been a lot of clamoring from the business community and our Governor to get Florida up and running. While I understand that this is a hardship for us all, now is the time to demonstrate leadership like the Governor's of New York, Massachusetts, Maryland, Wisconsin, Illinois and California who as a mix of Democrats and Republicans are doing the right thing and putting the safety of residents above the dangerous rush to have things open up "because it's been too long". Out of respect for our first responders, healthcare workers and the vulnerable population I implore you to act prudently based on science and safety. What we don't need now is the reckless abandoning of common sense like the state of Georgia and South Carolina are doing. By no means are we ready to open person to person businesses like barbershops and salons and gyms. You can't social distance cutting someone's hair or doing nails! If he weren't the governor, I would say Mr. Kemp should be charged with reckless endangerment of his resident's lives. I am greatly concerned that there is a lack of national policy on handling this. Allowing piecemeal reopening's is a recipe for disaster. Last time I checked, we can get in our cars and drive anywhere. What is to stop residents near the border from going to Georgia, or those of us here in South Florida flying to Atlanta? The entire thing is very upsetting and impossible to control with the lack of national or at least regional coordination. Believe me, I am as weary as everyone of the shutdown; I miss my barber, my gym and favorite restaurants. Let's concentrate on things to make their lives easier by getting them the loans and unemployment payments that they need. That's where the focus should be, while looking slowly and carefully at how to open when the time is right, which of course should be gradual and at least 3 to 4 weeks away. We don't have a steady 14 day decline yet and we should not even consider anything until that happens. Also, we need more antibody testing. I have the strong suspicion that I have already corana some 2 months ago, but I have no way to
Brevard	General	I do believe that social distancing and proper distancing should be maintained - however businesses should be allowed to open. My field is fitness center- I belive staggered or limited access to begin with is a smart move. For example, open with distancing in place (ie: 30% capacity, every other machine not in use), no group classes or playrooms open. If all goes well, then add group classes with limited participation (ie: 9 people with one instructor with a total of 10 people in a class, personal trai ing one on one, however still no playrooms). Again, if that goes well then open with limited capacity (ie: limited capacity 50%, group classes with a limit of 20 people, limited playroom usage). Time limits for people would have to be put in place to allow fair usage for all. Maintain the cleaning of equipment (which our facility does on a regular basis even before the pandemic) and those who want to wear PPE would be able to (for both members and staffing). Having a nurse at our location or trained staffing to take temperatures when people come in since we are associated with a hospital (Parrish Medical Center and our fitness center is Parrish Health and Fitness) would also be helpful. If they have temperatures then they can't come in. Exercise is so vital not only for physical health, but for mental health as well and I would like to see our industry be able to open.

AMERICAN OVERSIGHT

Miami-Dade	Healthcare	Dear Governor De Santis I am a Professor of Medicine , MD PhD, and Director of University of Miami Hospital Diabetes Service, University of Miami. I am leading research on COVID-19. From my perspective, as physician and researcher, I feel that Miami-Dade should start reopening outdoor activities, parks and condo swimming pools upon the appropriate social distancing precautions. The percentage of positive is daily declining , the mortality rate, to be proven yet if from or with COVID-19 , is consistently below 1%, and ICU beds in the major Miami hospitals, including University of Miami, are totally available and filled by only their 40% of capacity. We are doing telehealth with good response from the patients, but the numbers suggest that the we should restart our normal life as soon as possible, with proper safety measures for both physicians and patients. Florida heat and humidity, based on valid research , can help to further reduce the virus spread. Current virus is genetically very similar to SARS and MERS that significantly decreased with the summer. Preventive medical action for those more vulnerable populations such as residents of nursing homes, poorly controlled diabetics and people with obesity should be implemented, as several studies including those from our group, are suggesting. Thanks for your consideration and nice work amid COVID-19 Sincerely Dr Gianluca Iacobellis
Duval	Food	Many people are out of jobs due to resteraunt dining rooms being closed. Also since the gyms are closed everyone is having a hard time staying in shape and maintaining your mental health. I say reopen florida but servers in restaurants should wear mask and gloves just to be cautious. We need to get money moving again because the government nor corporations are paying anyone enough to survive on their income during this time. Some people will still stay home but we will see a spike in money moving through businesses and we can get Florida back.
Duval	General	I am an Infection Preventionist. While this pandemic has been far reaching, Duval county and Florida has shown a tremendous response. Coronavirus is here to stay for now, at least until treatments and vaccines are developed. However, we need to restart our economy ASAP. People are losing their livelihoods, savings and hope for the future. We will need to move forward differently, but move forward. We will have a new normal. I hope helping people understand this will be part of any restart plan that hopefully is initiated soon.
Brevard	General	We should NOT rwopen FL yet! To do so qould be putting millions at risk of contracting covid. Yes, people would go bacl to work. But what happens if we spread the virus at a much more rapid rate?

AMERICAN OVERSIGHT

Pinellas	Healthcare	We need to desperately restart the elective surgery—like today, It should be before May 8. Even though that is when the mandate expires, even waiting an extra week could be disastrous. At verylatest , we should make the date May 1st. Also, please open the doctors offices for procedures. In many ways, is essential versus nonessential designation does not apply to healthcare. To have a gas station open, but not the doctors office removing skin cancers, is insane. Most doctors offices buy their own personal protective equipment and even if there were a surge it would not interfere with the hospital. And as the governor stated, there is already an oversupply of hospital beds. Thank you for your consideration.
Palm Beach	General	Attached are some recommendations I have regarding 6 integral parts of Re-Opening the state in a safe, practical and fair approach that would benefit all Floridians. Included are some of the recommendations that may have been heard in the subcommittee groups during the week.
Palm Beach	General	I think it is wreckless and irresponsible to consider opening back florida. Obviously the higher density areas are going tk be worst affected... but what happens when all is opened back and now those high density people start mixing with small low density towns? You can not prevent people from mixing and you can not trust them to follow guidelines.. refer to pictures of the sandbars, beaches, restaurants, bsrs judt days before the official shutdown. There is a reason we had to shut it all down people do not listen to rules and regulations. What needs to happen is unemployment. People pay into the system, they should not be shamed or made to wait to access their own funds. Government needs to stop seizing PPE that municipalities order for their hospitals. The more easier access to PPE the hospitals and public have, then the sooner you can responsibly open.
Brevard	General	Please do NOT open the state too soon! Our reported cases have not yet reduced sufficiently - indeed, in some counties, they are still rising. The amount of testing in the state is woefully inadequate to be able to assess the true extent of spread, and opening up too soon puts us all in jeopardy of a second wave of infection and the inevitable deaths that will ensue. Florida is especially attractive to tourists, and we need to continue to restrict movement around the country, and the world. Please be cautious, and wait a few more weeks or as long as it takes to get to a strong downward trend. The economy will recover, but death is forever. Let's not put money before people's lives.
Polk	General	Florida should follow the guidelines from the cdc and the health specialists on how and when to open the economy, nothing should be rushed. As the experts are saying and advising, if we open up and people start going out filling places too soon what little achievements and the sacrifices our health providers have made will be for nothing if this virus spreads even more.

AMERICAN OVERSIGHT

Broward	General	I am concerned about the closure impact on our small business. So many people are unemployed and losing their business. There must be a way to reopen safely for those who wish to do so, without penalizing people who still wish to quarantine. Individual freedoms must be retained in order for people to prosper. Government backed Unemployment benefits should not be removed from anyone who wishes to remain quarantined, and students uncomfortable with returning to school should not be punished for missing. People need to be able to work and support their families through this. Our parks, beaches and natural areas should definitely be reopened so people can exercise in sunshine and nature.
Hillsborough	General	It is time to open our state. The economic pain, stress and suffering caused by this flu is far greater than the amount of people who are sick. On a percentage of population basis there is no comparison. Those that are obese/ elderly / immune compromised etc can stay home and shelter in place. Everyone else get back to work! We are acting like a bunch of wimps by being afraid of a flu. What a soft generation. Let's save our state and country. Open! Stop being myopic about health by focusing on a virus. Focus on long term health (exercise and proper diet) the real killer is our own lack of care for long term health.
Pinellas	Management	Hi Governor Desantis. Opening up the state is a very important step but there needs to be more testing before taking that step. Also why are you more focused on opening up the state than you are actually helping us floridians who have been out of work since mid March and have been waiting on unemployment since then? You are more focused on opening up too early. If we open too early then cases and deaths will rise and the blood will be on your hands as well as Mr. Trump because it seems you are just following your mentally ill leader.
Charlotte	General	I do not believe enough testing has been done to safely re-open many aspects of Florida. We know that many people are a systematic, yet testing has only been allowed for those with specific symptoms, the elderly and healthcare. I work at a car wash. We are currently furloughed but owner plans to re-open on 4/30. Being inside of cars, touching interiors and breathing someone else's potential germs does not feel safe to me. Gloves my be provided but we are expected to wear the same pair all day. This is not safe either. I am concerned for my health, my co-workers health and my customers health. Many of these people are high risk. It is to soon to open Florida. Far more testing needs to be done and not only on those who have obvious symptoms. I realize the urgency to get people back to work and getting paid, but going forward without enough data would be foolhardy and result in more unnecessary infection/deaths. I ask that the government really listen to health advisors on this subject and do the right thing.
Hillsborough	General	Still at 1000 new cases per day. I don’t think one more month of restrictions would hurt as much as help. I’m not very concerned about the virus but I definitely don’t like hearing phrases like Second Wave, Third wave. No...people would lose their minds. I am a republican and believe in a strong economy and less government but like I said I don’t believe one more month would be any more detrimental than second or third waves.

AMERICAN OVERSIGHT

Collier	General	Re-open Florida with some social distancing still encouraged. Public needs to use common sense and consideration for fellow citizens(I know this is expecting a lot). Ex. Retail do what they have been doing, restaurants, limit seating. Open beaches with social distancing and beach patrols to discourage large groups with violators warned then fined if don't comply. Hair salons/barber shops open with staggered appointments and PPE. I personally don't have a problem wearing a mask and waiting in car until stylist ready. I would even wear a body suit if I could get my hair cut. I also have been lucky enough to have been partially working during this and my bosses have been good to us, feel bad for those who haven't been as lucky and need to get back to work. Thank you.
Miami-Dade	General	We should not be opening Florida until at least mid June. We need time to make sure the virus is minimized. Opening early to make money will kill people. Human life should be more important than money
Pinellas	Recreation	We can not open yet . There r so many people that haven't been tested that we could start this all over again. We need another month to get control no one will follow beach rules. Still have cases everyday and. Not enough PPE for our health care workers and food stores.
Duval	Government	Do not open FL to soon How many more people do u want to die?
Hillsborough	General	I am very concerned about the beaches opening only because that is going to Bring a lot of people & I understand it's hot I wish our pool was open, also Restaurants I don't Think it's a good idea keep it as pickup or delivery unless they have seating outside. I also feel once things open people will forget about masks and doing the right thing. People need to understand that it is very very serious problem in the world in our towns this has killed so many families mom,dad,brother,sister,aunt & uncle maybe a friend's small child. Thank you Kimberly Phillips
Bradford	General	I think it should be mandated that if you are able to still work from home you should be allowed to for at least another 30 days. This will help slow the spread and still allow people to finish the school year off with their children from home. It's a lot to expect someone to work full time and home school their children.
Clay	General	I am ALL FOR. the re opening of Florida!!!
Leon	Healthcare	With all due respect to the local businesses, opening now is a terrible idea. We don't know enough about this virus, we don't know when it will peak in Florida, new cases are being announced every day. I am already terrified to go to Publix or CVS for food and other needs. If people were wearing masks, I would feel more comfortable, but they're not. I think Step One should be to make everyone WEAR MASKS in public. Do that for two weeks at least. Please do not start opening the state yet.

AMERICAN OVERSIGHT

Martin	Healthcare	Please consider that there are a bunch of us old people out here that have some form of a FOOT problem There are speciality foot ware stores that help us 80 year olds Frankly, in some case, it can make a difference in our ability to walk Believe or not. the opening of shoe stores is a hell of a lot more important than being able to buy licquor Thank you for your consideration
Palm Beach	Food	Enough is enough I own a small business and I am completely closed. I have received no help from unemployment or sba. We cannot continue to survive like this for the more sensitive people stay home for the rest of us we need to get back to work before we lose more than what we have already. Hurricane season is coming and florida will have no chance to recover if we continue to close into hurricane season. Let's remember we have people working in essential business and they aren't dying at an alarming rate!! So why arent we looking at that a small percentage is sick for essential workers no one has died of the essential workers out there so let's open up with restrictions like they have and we will be fine!! Just like they are please people are losing more than they can imagine majority of people saying stay home are working from home and collecting paychecks they dont know what the rest of us is going thru out here. Most of us will rather take the chance out there then have nothing. Majority of us have no help financially. I saw a lot of questioners and people said they would rather take the chance with corona than have a vaccine come on then what's the point here and those are people that are getting paid to stay home! And who are anti vaccines well they can stay home and watch us thru there windows opening up this economy again.
Hillsborough	General	People will NOT travel to Florida if they don't feel it's safe here. Listen to the Science and Medical experts, follow their advice. The public health crisis has to be the most important thing, once people have confidence we are on top of that the Economy will. follow!
Duval	Information	I think that if a business want to reopen they should be responsible for all necessary steps and operations to take for preventing the spread of Covd19. First they should ware masks and gloves and all of the people that enter should do the same. They should take the temperature of all employees daily and do the same for anyone who wants to dine inside the business. They should make sure dining tables are six feet apart and make sure someone is disinfecting the areas of the business at all time. Reservations would also keep track of who visit the business on a day to day log when some one is entering into the business .Because of the severity of this virus we the people and the business should be held accountable for doing the right things for our lives.
Palm Beach	General	There is no need to open the state up too soon. Our fabulous governor who "takes direction" from the moron at the white house waited too long to shut the state down and now we all pay for it. DO NOT LISTEN TO ANYONE IS WASHINGTON. It's time to redeem yourself and listen to what the scientists and doctors say and not politicians or anti-vaxers holding ridiculous and dangerous protests. BE SMART. Our lives depend on you.

AMERICAN OVERSIGHT

Miami-Dade	General	OPEN COURT HOUSES FOR MARRIAGES
Orange	General	Reopen the economy! The entire Coronavirus “panic” has been an absolute disaster for the entire country. It is now very apparent this virus is no more deadly than the seasonal flu. Yet more peoples lives have been destroyed in an attempt to prevent exposure. The elderly and others with Medicaid conditions making them more susceptible to the virus should take necessary precautions, otherwise it’s past time to allow society to return to normalcy!
Palm Beach	General	Just wanted to add my input to the re-opening of the state. I live in Palm Beach County, have comorbidities that put. me at risk of dying of the coronavirus, and I do not feel safe going back into any store or business in my area, regardless if it opens or not. If the choice is between the economy and my life, I need to choose my life. There is not nearly enough testing to prove to me that asymptomatic people aren't spreading this disease, especially with the antibody tests coming out of Miami, New York City, and Santa Clara, California. Without sufficient testing, I will just stay home. I imagine there are many more like myself in this state. I'm not elderly, but you don't have to be elderly to be in the vulnerable category. Thank you for allowing the community to have a voice in this decision.
Palm Beach	General	I'm afraid that we have not had enough people tested and tracked to be opening. Too soon
Polk	General	As the Dr said at the news conference on Sat Apr 25, we don’t want don’t reopen Florida until the numbers warrant it and follow the 14 day phase in guideline. We have have been smart so far.. flatten the curve first. I want things to open but NOT at the risk of another flare up. Is there a way people who have lost jobs, be funneled into contract tracing or other areas of jobs that we now need.
Palm Beach	Food	I believe business can safely open while continuing a form of social distancing and implementing additional safety procedure. Restaurants operate at 50% to start, staff wear gloves & face covering, temp checks, sanitize each table/seat or booth after use. There are plenty of outdoor seating in florida as well that can help. Recommend reservations Barber shop salons can be appointment only so there is no waiting. Staff wear gloves & masks. Change gloves after each guest and disinfect each chair after each use Vulnerable should be encouraged to continue to shelter in place If business stays closed for any longer it’s going to be devastating!

AMERICAN OVERSIGHT

Palm Beach	General	OPEN everything up. With A symptomatic folks along with people that we know have the virus, the death rate is VERY LOW. We do not close business for the Flu. Open up or we will not have any business to go back to. The Democrats want to keep us closed until we have a vaccine, that is bullshit. Open up now or we will become a socialist country with government supporting us and we lose our country. OPEN NOW!!
Seminole	General	I think this is going on too long and over exaggerating. This is insane. It's hot and can't do anything. if it wasn't for election year this wouldn't be talked on. I'm pregnant and can't even have anyone in the doctor with me it's WRONG!!! Please end this!
Palm Beach	Recreation	I believe Golf Courses are the PERFECT place to start. One cart per person. One person on tee box and 6 feet on greens. Very easy. NO publuc water..bring your own. Beaches...need to be for walking..running..movement. police will need a presence to monitor roups of sun bathers. Boaters are tough...the party people herd up. Coast Guard will have to monitor this Restaurants..Curbside is working good for those who bought into it. Some restaurants have to turn people away tgey are so busy. Grocery...noone should be allowed in without a mask AND gloves as they touch priduce snd shelf items. 6 feet should remain the norm...same with retail.
Lake	General	1. Listen to recommendations of epidemiologists and related experts based on testing results . Do not end the lockdown until they say. One recent report estimated mid June at earliest, but I defer to ongoing expert opinion. 2. Urgently increase testing and make it much more easily available, at drugstores without prescriptions for example. Both nasal swab and antibody testing should be employed. Confidential results should be available to local public health for contact tracing. 3. Institute epidemiological contact tracing after state opens up. Increase public health funds and personnel for it massively. 4. If flares occur immediately lock down appropriate areas. Do it fast and don't dither. 5. Base all analyses and actions on SCIENCE. If the Florida epidemic worsens after lifting restrictions, the economic impact will be much worse than present.
Leon	General	Please don't make the "cure" worse than the virus. My husband is trying to keep his employees, he brokers liquor licenses and does private lending for bars and mom and pop liquor stores. My family is young and healthy and covid is not a major threat to us. Please continue to remind the public that we must protect those at risk (elderly, Obese, and those with comorbidities) but that the rest of us need to get back to LIFE. We would LOVE for Disney to be open to just FL residents for a while!

AMERICAN OVERSIGHT

Hernando	General	Dear sir ,I think that we should not be reopening our great state of Florida until we get a hold on this terrible virus that is devastating our great state ,I realize that the economic effects of this is horrible, but if you die from this horrible virus you will not be worring about ,money ,or the economy ,we need to continue on the path that we know is at least working and saving lives ,Sir I just want you to know that me and my entire family are very proud of you for the job that you have been doing and we pray that god keeps you and your beautiful family safe and healthy I am 57 years old and a small business owner for over 25 years until health issues caused me to have to close my buisness 5 years ago ,I have 4 sons 3 of witch serve this great NATION in our military and a 14 year old still at home and I asked god to please let me live long enough to get him raised a,since I have a compromised immune system due to my health issues I am very scared that this may not happen if we throw all the progress we have made fighting the spread of this disease, I wish people would understand the important things in life are not money and Bars, strip clubs ,tattoo parlors ,ect life isn't a big party some time you have to take a step back and be thankful for just being alive and healthy, in closing I would like to say we Floridians are tough and we will overcome this but its going to take so.e time and alot of hard work but I know with your leadership sir we all can make it thru this ,thank you agian sir for being my Governor and my god wrap his powerful hands around you and your family sir and keep you all safe because we need you the REDMANS BROOKSVILLE FLORIDA
Orange	Professional Services	Professional offices should only be allowed to reopen once they have implemented and enforced social distancing guidelines. I work in a large office with many people in open cubicle spaces. I don't know how they can keep all of us from feeling unsafe and exposed. Workers should be encouraged to work from home as much as possible, rather than being required to report to work the day the county opens.
Hillsborough	Healthcare	I would like you to consider delaying the opening of dental practices (Dental Hygiene departments - non essential medical treatments) until June. We are listed as the number one occupation at risk for spreading COVID19. I am a dental hygienist and my practice is having difficulty obtaining enough PPE equipment to get us up and running following the required OSHA standards. Our staff member that orders our products has stated much of what she has ordered is on backorder. One of her suppliers is not even returning her call. This is extremely important to keep the Dental Hygienist in FL, as well as, staff and patients safe. We use ultrasonic scalers on most, if not all, of our patients which produces aerosols. I feel this additional time is needed to make sure practices are able to obtain the necessary PPE equipment to do our job safely. I feel the number of cases will rise rapidly, if these departments are opened without being prepared with proper the PPE. Thank you in advance for your time and consideration.
Duval	General	Y'all just keep talking bout opening up but all it is is talk numbers are down people need mony to pay bills they need to work get back yo gym get back to some kind of normally so open the fuck up tired of hearing bout stats data yall just talk shit are y'all going to pay my fucking bills tired of y'all talking open the fuck up

AMERICAN OVERSIGHT

Miami-Dade	Finance	Miami Dade county sucks as a whole. The economy is down due to the government. And the governor of Florida let the unemployment system crash on purpose. If it wasn't for the state closing everything down to this hoax of a virus. All of us would still be working and making money. But instead you shut down the economy and call your people lazy. Wtf is wrong with you guys. I wish I can say all this in person and more. The people in office are the most arrogant and selfish humans I've ever seen. The economy needs to be reopened and THE UNEMPLOYMENT CHECKS NEED TO BE SENT TO THE CITIZENS WHO PAY THEIR MUTHAFUCKING TAXES. WHICH TAXES IS STEALING FROM PEOPLE ANYWAYS. PAY THE MONEY YOU OWE TO THE PEOPLE YOU OWE IT TOO !!! Y'ALL SUCK !!
Broward	General	Word is you want to hear from Floridians about reopening the state. Open it up. Enough is enough. Make allowances for the vulnerable, allow those who WANT to wear a mask that right. Otherwise, no one is mandated to wear a mask, no one is mandated to stay home and ALL work is essential. Period.
Orange	General	Florida should NOT be reopened until it is safe. It should NOT be guided by political associations our governor has with Trump but guided with the utmost safety of life. My fiancé is a deputy in Orange County (and tourist area of county) and he has risk factors with coronavirus. Yes; he signed up for this job but his life shouldn't be recklessly endangered anymore than it already is right now by opening up Florida when it isn't safe to do so. He shouldn't risk his life further just so someone can go to Disney or tourists can drink. Save our first responders and healthcare workers. Do what is right for us and not what's right for political gain!!! I don't have much faith in this right now.
Seminole	Healthcare	I feel that is important to open businesses little at the time. The businesses that open should have mandatory testing and regular temperature controls for all employees. We have family in Europe and saw what a catastrophe it was in Italy. We need to reopen for our economy and the sanity of our citizens while taking caution with the health of everyone. For the past 3 1/2 years our economy has grown tremendously. We need to continue this growth and not let all this hard work that the GOP and the Trump administration have done for our great country!! My mother was an immigrant from Greece who married an American soldier and my husband is a French immigrant, now a permanent resident working on getting citizenship. They have both immigrated here legally and work very hard to be where they are now. Let's not crumble our economy and society with this virus but at the same time take caution when needed. Thank you and God bless America!USGRFR
Lee	Professional Services	Retail stores and other businesses should be allowed to reopen immediately while practicing social distancing and wearing masks. Elective surgeries need to restart. Allow restaurants and other businesses to move some activity outside over the summer if space is available.

AMERICAN OVERSIGHT

Manatee	Retail	Retail needs to be opened. Florida has been totally a joke with their unemployment and regardless of what the governor says the improvement is not there and too many people are waiting for unemployment checks and or reopening neither which is happening. We in this sector are under paid , earning minimum wage or a little more, and most work pay check to pay check. All the promises about fixing unemployment are not working. Let us go back to work! Plus Disney and Universal get to put their employees in the unemployment system ahead of all those who have been desperate get trying to access this system. Stop playing games with peoples lives and let us get back to work!! Ps this system also is a joke because you can't get thru
Hillsborough	General	I dont think place should open until health officials have declared it is some what safer to open. Not everyone shows symptoms and that is dangerouse for the public. I understand that the economy and the country has to run.. I am in the working class. I still go to work with my nerves on check. School are still closed and daycares.. What are we going to do to help working class for babysitting? How do jobs operate regularly if we cant have our kids taken care off.
Broward	Healthcare	Whatever you decide PLEASE include the absolute wearing of a real face mask for EVERYONE who are outside, including the beaches, riding of bikes. JUST WEAR THE MASK. ANYTHING LESS IS JUST STUPID.
Broward	General	Thank you for taking my comments. With social distancing measures in place, I am very hopeful that we begin to reopen the state. I believe we have accomplished the goal of flattening the curve and our health care system is functioning properly. With that in mind, I am very concerned that keeping businesses shut down will have devastating economic consequences for years to come. Please begin lifting the stay at home restrictions and let Floridians begin to move about Florida and get out to the beaches! We live here for the sunshine and fresh air. I have been teaching from home since March 16, the consequences of isolation is affecting my mental health. Sincerely, Janie Orstad
Marion	General	Please do not lift the shelter in place order, it needs to be extended for the bigger picture. I fear if we reopen now we will have a second wave of infections. My husband commutes to the Orlando area for work, of shelter in place is lifted he will have to return and potentially be exposed to an area with higher cases. We have two small children and also have two elderly people living with us who we care for, they have no immune system and if my husband were to bring the virus home it could very well kill them. Please extend it for everyone's protection.
Seminole	General	I live with 3 people who have compromised immune systems. I don't want to risk them getting sick with this! I think it's way too soon to reopen and it's going to backfire and be worse than it is now!!!
Clay	General	It's time. Re-open for the general public. Vulnerable individuals should self-quarantine. Protect the employed workers with paid time off if needed to care for kids or other family members. Child care subsidies for working parents will ease the financial burden.

AMERICAN OVERSIGHT

Polk	Education	I have a compromised immune system due to chemotherapy. I feel that health officials should be the ones making the decisions on when we should reopen.
Brevard	Retail	I as well as others think it is still too early to open up florida as a result I think we should stay stay by staying home til at least june 1st 2020 ..as covid 19.is still out and if u were to open up people will NOT ABIDE by wearing masks or staying 6 ft apart...therefore it could be led to being a 2nd pandemic being much worse
Clay	Information	I think it is too soon to open back up. Duval and Clay numbers are still growing
Palm Beach	Professional Services	I am a personal trainer, and i, very strongly, do not believe gyms should be part of the phase one opening. Imagine this, someone picks up some dumbbells, lays their sweaty body on a bench, does their exercise, and puts the dumbbells back. The next person is right behind them to grab those dumbbells that no one ever thinks about cleaning. Gyms are gross and filled with germs on the best day. All things considered, a gym sounds like the perfect place for a virus to spread. Please consider postponing the opening of gyms.
Orange	Education	My name is Morgan Koski-Ruggiero and I attend the a University of Central Florida. As I go into my sophomore year, I ask that you reconsider opening universities back up for the fall semester. College has been one of the best experiences of my life and continues to help me develop and grow. However, I can't do this when I am stuck at home and have to learn through a completely online environment. As a nursing major, it's critical I receive the knowledge I need to succeed in my future career in person from a professor; lab classes that are in person that would be moved online for the fall are so much harder to learn through. Although I understand the importance of education and want to get back to my routine at UCF, I understand the importance of social distancing so that this virus doesn't come back again. I understand the more fun opportunities, such as tailgates for football games, are probably not possible and not safe for the environment. However, I do think opening up the university for the fall semester is critical not only for myself, but for every student. Students are not only missing out on educational opportunities, but the ability to be on campus for the four short years we have there. No matter what university a student attends, I think each one would benefit from college reopening in the fall, with precautions of course. Distractions at home make it harder to learn for every student of every grade level. I think opening schools and universities for the fall, with precautions, would be a great idea and help students overall mental state. I know from personal experience that moving back home can be hard and although I love my family, growing to be an independent person and striving for my future career is also important. Thank you for your time!

AMERICAN OVERSIGHT

Broward	General	I am a physician and feel that our process for testing and isolating is not yet robust enough to “open the floodgates” for surgeries or business as usual. There are still healthcare workers who are not being allowed to access n95s (which by the way require proper fit and sizes). I work at a major medical center and we are “sanitizing and reusing our ppe”. This is not ideal for patients or staff. I believe that parts of the state can be reopened much more than others. In South Florida, we stand to have a major public health issue. I believe we can start doing more time sensitive, urgent surgeries. I believe we should open public spaces. Malls, gyms, and other indoor areas of congregation will be a breeding ground for the virus. There must be a way to enforce limitations of customers inside any business reopened. Thank you.
Marion	General	To greatly reduce COVID19 cases if people with even number addresses shopped on Mon-Wed-Fri, and those with odd number addresses shopped Tues-Thurs-Sat, and on Sunday anyone or special senior hours, first responders etc, up to a per limit at a time entering at stores could shop, this would greatly reduce amount of people out and about, thus reducing cases of virus.in the population. It may be a faster way of eliminating covid19 period.
Hillsborough	General	I am really worried about reopening Florida, I hope that you do it very slowly and carefully. I live in the University area and I'm afraid that as soon as Florida reopens there will be a lot of parties and this area will get hit hard by coronavirus. Could you please leave the restrictions on social distancing in place and try to convince people to stay at home as often as possible. I don't want to be afraid to go to the store. If everyone was wearing masks I'd feel comfortable going to different businesses. I don't think there's any way for gyms to safely reopen.

AMERICAN OVERSIGHT

Flagler	Recreation	Hello, Here's the thing with my opinion. I literally do not care if stores reopen or whatever. I don't mind this new luxury of relaxing all day and sleeping in. I don't mind pretending like this is a deadly virus to all of humanity and we are all going to die to keep people grounded. This stay at home order is actually doing amazing things for the environment and helping with smog in different parts of the country and world and air pollution ratings have dropped significantly. I think it's amazing that people are riding bikes instead of driving, I hear birds more then I have in the past and friends are actually gardening and making vegetable gardens. We are going back to the basics and I think that's a positive from the fear mongering the media is portraying. People feel they are going to die if they leave their house, but the air is cleaner. So it's whatever in my book. Here's where my issues lie. The parks, beaches and trails need to reopen. It's public and our Tax dollars for maintaining these public places are forced out of our pay. Will we get a tax break for not being allowed to step foot on the beach? You have them open only in the morning so only some people are ever able to use them. I think it's ridiculous that people have to keep walking like robots in order to feel the sand under their feet or enjoy an ounce of freedom. Everyone knows, including your own doctor, that viruses neutralize in UV light and heat. We all know that naturally no one sits less then 20 feet from other families on the beach even with no pandemic. Why would anyone plant a beach chair less then 6 feet from strangers??? The beach is therapy for people who live in abusive or violent homes. It's therapy for people who are steps away from committing suicide. Why don't you just open the beaches with no limits at "go at your own risk". When the water is rough or there is no lifeguard, it's "swim at your own risk". People know that by going in the water they are risking their lives. Right? If you open public spaces, it gives people the OPTION to go to the beach or a park or a playground. No one is forced to leave their house. Let this be a "risk" for who wants to go. You can't spread a virus on the beach anymore likely then spreading the same virus at Publix where People are touching all the items, walking by people in the isles and trying on shoes or clothes at Target or picking up food from a restaurant or fast food joint where there are people in the kitchen
Broward	Food	Areas that should open first should be Outdoor public areas such as beaches, city parks, community recreation pools, and marinas. Kids playgrounds should remain closed. By only opening beaches like in Jax their is only one thing to do so everyone does the only thing you allow them to do. By expanding you won't have as many people gathering in one area the first day of opening. Social distancing should still be in effect of 6 ft. The people should be able to ride bikes, run, take their dogs for walks, play in the pools, throw the ball around while maintaining safe distancing from one another. Restaurants and Food places should do soft openings with only outside seating to start for two weeks then gradually open inside with half capacity. Barber shops and Salons should be by appointment only with limiting social distancing and amount of people allowed in at one time. Workers should be required to wear masks during work performed and follow CDC guidelines for disinfecting. Making everyone test before going back to work is an invasion of privacy. Government should not be allowed to gather data on its people that are not showing symptoms.

AMERICAN OVERSIGHT

Broward	General	My suggestion Proceed slowly reversing all statewide & county wide. In particular beaches & boating and flying. Actual rules released could be much clearer regarding what residents may and may not do. Also lists of testing facilities and what stages of testing. Stay safe to all . Paula Bazzone.
Palm Beach	General	I am a psychiatrist in Palm Beach and I have 2 school age kids. From a professional standpoint, my practice has taken all recommend precautions, as we provide TMS treatments which is a treatment for depression that can only be performed in a clinic. Patients are still coming in for treatment, and we are seeing, if anything, an increase in patients wanting to start treatment. They see we are following guidelines, and they are willing to take a little risk to get this treatment. From a resident and parent standpoint, I want nothing more than to see restaurants, salons, and retail stores start to open and camps open for the summer. Let residents and businesses make the decision for themselves. I am willing to take the minimal risk in order to see our economy get back on track. We are smart people. Let the healthy patrons and smart business owners have the choice. There will be patrons like me. We are more prepared in the hospitals than ever if there is a peak. Dental offices inherently take precautions. Nails salons already use gloves and masks. Restaurants can too. My kids have been cooped up for weeks. Let kids get some fresh air at camps. The camp counselors can take proper precautions too in order for these kids to have a place to go. Staying in is going to do more damage to these kids than the minimal risk of the virus causing harm to them as evidence demonstrates. I was busy enough as a psychiatrist before this shut down. I don't want to be any more busy because of the aftermath this will cause if we don't re-emerge. Give us a chance like Georgia is doing. I predict the Georgia experiment will prove everyone wrong. Let us out please! The polls are wrong, as always! We want the option to come out safely.
Lake	General	Our cases here in Central Florida are very minimal compared to the southern part of the state. As a result, I do believe our area should begin to slowly open up on April 30th, but keeping social distancing, starting, naturally, with the removal of the shelter at home order. However, my fear is that we'd see an influx of people from the south trying to come up here. This would have to be somehow discouraged. Theme parks and other tourist attractions should stay closed for the duration, at least until June. But I would like to see the opening of some nonessential businesses here to get things moving, then measure how that is going. Thank you for this opportunity to express this.
Orange	General	Keep mandatory the work from home for businesses that have the capacity and that have already implemented the work for home for their employees
Broward	Recreation	The state is releasing prisoners but I can't go surfing? It's unreasonable.

AMERICAN OVERSIGHT

Marion	General	To Whom it May Concern, The curve has been flattened. The latest study states that the COVID-19 virus dies quickly in heat, sunlight, and humidity. This is Florida, we have nothing but sun, heat and moist air. Ultimate you must trust the citizens of Florida that they know what is best for them. Those at risk must of course be cautious, but the rest of us can and should be be allowed to get back to work and go on with our lives.
Escambia	General	Until the state is on the downside of the pandemic curve. The administration should be extremely cautious on reopening. Also be more prepared for next season because covid 19 will return.
Duval	General	Reopen everything NOW.
Orange	Retail	I do not support reopening soon. As long as there is no vaccine and 1 active covid person living then there is a chance for it to reignite. China was on lock down for 76 days and lifted the lockdown and look where they are now. Please do not lift the lockdown until it is completely safe
Hernando	General	Thank you for your time... please consider opening very slowly. I work as a front line worker in a hospital, I fear we havent seen the worst yet. Could this opening plan include mandating mask or face covering at all times. MY OPINION IS STAY CLOSED FOR ANOTHER MONTH., but make sure you close businesses... I drove past walmart and lowes..parking lot was full and people walking out with nonessential items... so they arent listening, so we will never flatten the curve if we dont shit dont for real. Thank you Donna Lambert
Broward	General	Dear Governor Can you please listen to the scientists? Because when it comes to what is going on right now, They all know much more than you.Stop being a politician for a minute and use some common sense. When the scientists say something every year about HURRICANES, you pay attention to them like a little and curious child, now your only is the economy ,you don't care when it comes to the health of Floridians ...Please governor, go do some research about the 1918 virus and the city of Denver in Colorado then you might take a chill pill and please DO NOT TAKE LYSOL (as prescribed by Dr Donald J Trump..... Be sage governor. Sincerely PJB

AMERICAN OVERSIGHT

Palm Beach	General	Priority must be given to the health and safety of all Florida residents. Until widespread testing can identify who has the virus, who had it, recovered yet didn't know they had it, or who is an asymptomatic carrier, Florida should be in no hurry to return to business-as-usual. Testing is still at just a fraction of what is needed to provide usable data. Please support and encourage widespread testing at all pharmacies. Most importantly, until researchers know more precise details about this disease, and a vaccine becomes widely available, no state should rush the process of reopening. The long-term plan should be looking at years, not weeks or months. Any reopening should be in careful phases based on credible and clear data, and any reopening should be carefully monitored to ensure that the virus is not re-emerging, immediately rescinding the openings if that is the case. Also, reopening without adequate enforcement and penalties for those not following guidelines for physical distancing is critical. Too many people are still out and about not wearing any type of mask. An order to wear masks until further notice should be statewide. We have no way of knowing who is contagious. Even a negative test result is only valid for that moment in time. Not only our large elderly population is at risk, but more deaths of younger people and children are occurring. A special concern is the doctors, nurses and hospital personnel who are at grave risk each day. When, not if, a second wave of infection happens as predicted, we are at risk of not having enough medical staff to treat those affected. Finally, in a state whose robust tourism economy relies on low-paid service workers, the fact that our unemployment benefit is among the very lowest in the nation is disgraceful. Even before the pandemic the benefit paid is woefully inadequate. And the system to apply for benefits seems deliberately designed to discourage people from applying. And the system's total failure at people's time of greatest need is deplorable. That human beings should be treated in this way is unconscionable. And I would hate to see Florida emulate Georgia's rush to reopen primarily to salvage their own underfunded unemployment system, saying that since businesses could reopen people would be ineligible for applying for benefits. To place dollars over people's health is immoral, does not uphold the values our country was founded upon. Please leave politics out of these decisions. Please focus on credible data. Please look at the long view - people are

AMERICAN OVERSIGHT

Seminole	General	Dear Gov. DeSantis, I am very worried about my parents that are in a nursing home at Altamonte Springs. Before the pandemic, I went to the nursing home to see them, assist with their personal hygiene, wheeled them outside to take fresh air and sunlight, and now because of the pandemic I cannot go to the nursing home anymore. Not only that, but the nursing home is not taking good care of my parents because I see them on video chat and see that they have new health problems that the nurses are not taking priority in handling their health. Even if I speak to the supervisor about it, they won't listen. Gov. DeSantis, I ask that you make an announcement soon regarding when the nursing homes will start reopening to the public because even if I miss my parents from seeing them everyday, something is not right with what's going on in that nursing home and I am afraid. Please reopen every Floridian nursing facilities as soon as possible! Please, think about me and my parents, Gov. DeSantis! We need your help! Sincerely, Magda.
Palm Beach	General	Most of the people who died from the virus were already sick, from years of over eating, not exercising, drinking and smoking! So forcing all the people to stay home is the answer? Take care of the truly helpless people, like the ones in nursing homes, the rest of us can make our own decisions! I will be voting to get rid of the Palm Beach Commissioners who destroyed our economy. FREEDOM is job one.
Brevard	General	It is not time to reopen Florida. There are things experts say we need to have in place such as higher testing rates, contact tracing, and not only a flattening or the curve but a dropping of the curve. Florida doesn’t have this. Nowhere in the US has all of these yet. Please do not open yet. Please wait to see the effects of this disease over the coming weeks. Consider late May or early June.
Orange	Tourism	I think everything should open to Florida residents first. We will be more then glad to get out of the house a little and enjoy stay at home vacations. I think social distancing will have to be implemented at the theme parks for a little bit at least until international tourists are welcomed back. I think we can welcome them back sometime in the new year once everything has had the chance to calm down and we can really get an idea of if there is going to be some sort of a second wave. This way we will be able to relax some of the social distancing measures in place and the theme parks will still be enjoyable with the larger crowds that will be welcomed in.

AMERICAN OVERSIGHT

Broward	Education	As a mother of 2 children, I would like each school who has children sharing desks the opportunity to wipe down their chair and seat before sitting in them. Make this mandatory. My daughter is going into high school. I know that she would get extra credit in middle school just for sweeping the floor. The cleaning people need to do a Better job!
Polk	Retail	Now is not the time to reopen retail - I work in retail management and there are not enough people being diligent with their social distancing or general hygiene to put a clothing retailer or home goods store open again. It's going to create a horrible cycle and spike reinfections again. As much as I would like my employer to reopen I value my family's safety more.
Palm Beach	Professional Services	Very concerned about hair salons, barber shops, tattoo and massage parlors. Impossible to keep a safe healthy distance. No matter how cautious you are it's impossible. Plus many places do not have proper ventilation. What is the recommendation for health and safety?
Volusia	General	This is getting out of hand. Reopen everything without any restrictions. As a first responder and nurse household we don't want things closed, we don't want this social distance stuff going on. Are we going to do this everytime someone gets sick? The virus will be around for the rest of our lives and we are a non vaccine family. Open Florida back up!
Manatee	General	With the increasing numbers every day of infected persons, WE can't understand why anyone would even think about opening the state. Not everyone is willing to distance themselves, and then there are those that think no one can tell them what to do. We went to Lowe's Thurs. and NO employee was wearing a mask, and very few customers. Then you have the young that cough all over the place & think it's funny. If anyone thinks any of these people will be safe, let's say, at the beach, they are sadly mistaken. The mentality of humanity is, IT WON'T HAPPEN TO ME AND I"M NOT IN THAT AGE GROUP. LET THE OLD PEOPLE STAY HOME IF THEY DON'T WANT TO GET SICK.
Seminole	General	Please consider the harm reopening Florida will do. Things are hard for everyone at the moment but reopening nonessential businesses and allowing social distancing will just cause another spike and another lock down later in the year. As a State we need to think about us as a group rather than individual needs. Sacrificing a few weeks of non essential actions like hair cuts, going to restaurants, and theme parks is what we should be doing to preserve the lives of fellow americans. We cannot be selfish. The economy will recover but we cannot bring back those who will die. Please ask yourself, how many men, women, and children are you willing sacrifice for the sake or the economy. If you can produce a number, then by all means, tell the people and reopen Florida.

AMERICAN OVERSIGHT

Alachua	Tourism	I think once we have achieved the standards for Phase 1 we should open up venues for people to have an outlet. Personally, I would like to see Hard Rock Casino in Tampa open up soon, but with the same standards in place that required social distancing before they closed. I visited them on that Friday March 20th and felt very safe and confident in what they had in place. If other businesses could do that (limit space between customers, disinfect, even check temperatures thermally) I think people would venture out. We need to venture out. Not only for the economy, but for our sanity. I think 90% of the population will act responsibly, The other 10% should be fined if not following procedures. I have the utmost confidence in our Governor and our President to make these decisions and will adhere to whatever they decide, but being able to eat out or play slots is much needed.
Hernando	General	This is ridiculous. Open it all back up before this gets worse. Whoever wants to stay home can, but let us out and let us live. Our immune system is getting worse from all this. It has to stop. Open it all.
Manatee	General	Yes open up, slowly and with intelligence. I know death is scary but we have to become immune we can't keep hiding. It's not going away so we h e to learn how to live with it.
Seminole	Government	Florida should not be reopened unti at Least 20% or more have been tested. Tests should be available to everyone and all over the state. The task force should include medical experts and should have been bipartisan. Why is the secretary of Agriculture not on this task force, yet the CEO of FPL. How are they going to advise on reopening. The utilities are open and running, business as usual . Fix Unemployment NOW. It is obvious you don't want to pay out so you rather open Florida and risk people's lives. Limit the amount of international flights and test the tourists at the airport. Don' Pull the same crap you did when you let all of those flights in from NY. What a joke. Companies should be mandated to let people work from home. Not safe to share an office with 150 employees and share common areas . Governor, DO THE RIGHT THING FOR FLORIDA, NOT FOR YOUR PARTY. GET IN TOUCH WITH FLORIDIANS. Your numbers are very low and you are another governor that makes me So Florida an embarrassment. Spoken from a true Floridian who is ashamed of you. Reach out to Cuomo, maybe he could coach you on communication skills. Standing by POTUS won't help come next election. Add some medical experts to this Task Force. We don't need medical advice from CEOs and your cronies. BTW thanks for not having a dog breeder on the task force!!

AMERICAN OVERSIGHT

Manatee	Healthcare	We should indefinitely suggest safe distancing. Washing hands, cleaning shopping carts, having hand sanitizer available upon entering/leaving stores - should also be indefinite. Masks if you are at risk (old age, immune compromised) again - indefinitely. Big posters everywhere that say "DO NOT TOUCH YOUR EYES, NOSE, or MOUTH UNLESS YOU CAN WASH OR SANITIZE YOUR HANDS AFTER". Public service commercials on TV and radio reinforcing the above and also remind people to stay home if sick or coughing. Do all of the above and OPEN UP TO NORMAL OPERATIONS. This virus is not going to be miraculously gone anytime soon and it will recur. We can be responsible and get back to business. We have to accept that people may get it and perhaps die. Ruining the economy will eventually kill as many people as does this virus!
Miami-Dade	Healthcare	Florida should not reopen businesses at this time. There is already a shortage of PPE in the hospital and the cases should be lowered before reopening businesses. It's best for the public to stay closed until more testing is administered so that we don't have an uprise or cases and the healthcare workers such as nurses and doctors don't risk their lives trying to take care of patients because of a surge predicted to come in. People might wear masks for a couple of days until eventually they run out of supplies themselves. The public doesn't fully understand proper hygiene and people are going to get sick.
Clay	General	All business should re open without restrictions. Every job is essential. Allow the citizens to choose if they want to stay at home, wear ppe, etc.
Palm Beach	Healthcare	You have a very difficult task and decision on when and how to open Fl up. I would love the beaches to be reopened for activity such as walking, swimming and active individual sports such as surfing. However, who is going to police this. Our police have enough to do . Open gyms, swim clubs with restrictions and have the business police the rules. Wait on beaches. Open areas of business to get economy going. That should be priority and wellness of our community. Best Ann

AMERICAN OVERSIGHT

Miami-Dade	General	I am a type 1 diabetic that has been under stay at home orders for over a month. I have been extremely cautious due to Covid-19 and my compromised immune system. How can I be guaranteed that when we reopen I will not be exposed to this virus. I know the precautions I take but not the ones others do. I am also a mom to an 8 year old who is currently at home doing virtual school, I do not have support from family to care for my son. What do I do when we reopen and I have no one to leave him with? There are a lot of unanswered questions. As much as we need to reopen we also need to be safe and careful for those that are compromised. My father is a heart attack survivor and my husband and son have severe allergies. How can I be sure we will be safe if we reopen? What facts do we have? We do not have a vaccine or a cure, we do not have any viable facts.
Flagler	Retail	The current aid that is Provided for small businesses doesn't touch on salons and other cosmetology businesses. This makes it be on difficult for us to continue to be closed and survive. The PPP is not something salons qualify for because our employees or our workers are 1099 independent contractors. While we may not have to pay their income which is unfair to them we also still have to pay our rent and other expenses. We get no aid with that. If salons are able to install the plexi glass shield and where the proper protection use gloves and sanitary measures I feel that we should be able to re-open ASAP. We are in Volusia county where there aren't as many cases.
Orange	Education	End the school year now and use this time to prepare for school in August assuming it will still be distance learning.
Leon	General	Please place the state in lockdown. If we open the state it will put everyone at risk. We need more time to figure out how to stop the spread of this virus. People only listen if they are forced to do so. My family lives in Miami, and they say no one actually stays home nd this is just spreading the virus everywhere. PLEASE CLOSE FLORIDA.
Polk	Retail	I work for a small craft brewery in Lakeland. The PPP did not come through for us. Current rules do not allow us to do delivery because we are not also serving food. We would like to be allowed to do delivery. That will boost our sales potential enough to keep us in business. We don't think the taproom should be open yet; we still need to keep social distances and that isn't possible in our bar. But if rules about delivery were eased, it might save our 2 year old business. Www.swanbrewing.com
Miami-Dade	General	I do not want the state to be reopened until medical experts say it is safe to do so. The social distancing will not stay effective if the state is reopened. IF hospitals are running low on PPE so will the citizens. The citizens will be out 10x as much. There needs to be consequences for being out when there is a stay at home order in place. Reinforcement is needed.

AMERICAN OVERSIGHT

Pinellas	General	Gov. DeSantis you have truly done an outstanding job and so have the people of Florida but it is TIME TO REOPEN THE STATE! So many are suffering and their outcomes will be far worse than the virus in the long term. Perhaps ease into it through May and June in steps, with full access by July 4th? WE MUST MOVE FORWARD. My daughter's wedding was canceled and it is my sincere hope that we will be allowed to gather at the end of July without too many restrictions and hold the wedding. Again...please, please, please get this economy moving before it is too late.
Pinellas	General	As tough as this is, staying closer is safest.
Orange	General	We're not ready to open. It's far too soon. The numbers of new infections in the state are not low enough. If we try to reopen before we're ready, it will lead to more death and drag this out even longer. I get that some people are feeling cooped up, and I know that businesses want to open to remain profitable. It's not worth people loosing their lives over though. We're making progress. Opening now would undo that. It's worth noting that a surge in cases now, would do more to hurt the economy. Right now, we can be seen as a state that has acted responsibly. If the visuals of that change, it could deter future tourists. It's better for our health and our wallets to wait till it's safe to reopen. Rushing this would do more harm than good.
Orange	Healthcare	Me and my family's first concern is for the health and safety of all. Before opening everything up like before, we would feel more comfortable knowing that the spread has substantially decreased and we have already developed a vaccine or credible treatment.
Seminole	Healthcare	I am a dentist. And probably in the top 3 riskiest professions out there. If I have given two options to pick between the painful unemployment situation Plus patients in pain who cannot get their treatments done and option two of risk of death to my team members and possibility of spreading of covid-19 to other people I will always go with option one because if we are alive we can resolve the unemployment and treat the patients.
Volusia	General	I understand the pressure to reopen, almost at any cost. My father runs a restaurant, and he's hurting. But nothing will compare to the hurt of losing more of our people than absolutely necessary. We simply have to minimize death. The economy will be bad, for awhile, and it will hurt a lot of people -- but we can do something about that. We can't get lives back. I'm begging you all to take this seriously, and to put off reopening for another several months.
Pinellas	Retail	If Walmart, Home Depot, Lowe’s, Costco, Sams, CVS, Walgreens, Publix, etc can figure out “Social Distancing” so can the backbone “local mom & pop” businesses. The hospitals are not overrun with Covid19 nor do I believe they will be. Please OPEN this great state of ours. Time to end this nonsense and get back to work. NOW Thank you
Clay	General	Juat open things back up. Im an essential worker i do construction and i nor anyone else i work with have been infected. Let us be adults and go back to normal life if someone still wants to isolate let em be but for the rest of us we feel like we have had our rights taken from us. If rhings dont open soon there will be protests and civil unrest due to this lockdown. People are starving because they cant work and they have not received unemployment. This has gone on long enough and its time to end it.

AMERICAN OVERSIGHT

Orange	General	The numbers are all inflated, especially the deaths. If someone who had stage 4 of any kind of cancer, COPD, CF, emphysema, etc etc etc and had any kind Of breathing issue and sadly passed away it's being wrongfully labeled as covid19. Please PLEASE open up all of the economy. People need to continue to practice good hygiene and those who wish to venture out will and those who don't won't! I'm tired of hearing how everyone wants to stay home and live off of the state and federal governments "money printed out of thin air" with stimulus after stimulus , free rent and mrtg payments and no clue as to how damaging it is to our economy as a local, state, nation and world. Go to work people, earn a living, spend your money as you see fit and stop thinking the government owes you anything. I'm ready to head back to normal while still practicing the same good hygiene practices I always have but apparently most of the nation doesn't/didn't. Thank you!
Brevard	Healthcare	Please consider allowing businesses and adults to make their own informed decisions regarding how to reduce their risk of contracting the virus. The gym I own is less than 50 members with less than 10 people at the gym at a time. There are always more than 10 feet between members due to equipment used and disinfectant at all times. This occurred before there was any pandemic. Because we are a gym we were included with Massive gyms that have tens of thousands of members with hundreds at the gym at a time, we were closed with them. Please consider allowing ALL businesses to open if they are able to meet the current CDC recommendations on social distancing. The services we provide help keep people healthy and fight stress that this situation has already created for everyone. This needs to occur ASAP before small businesses like mine are shut down forever with no assistance from the SBA or any other government funding. Thank you.
Duval	General	Please please give us 2 more weeks before making it mandatory for us to go back to work. I dont want to risk my family and friends. I would rather deal with the economic situation than get the virus. Couldn't it be optional?
Manatee	Agriculture	I am a commercial fisherman and once a month I go to the Keys to get product. The Keys should not be allowed to close to non-residents. At least allow people who do business there to go in.
Palm Beach	Management	All business is essential to the owner and employees of that business. Reopen Florida NOW.
Alachua	Government	Please DO NOT open high-contact businesses! (such as gyms, salons, etc) Please DO NO open beaches or pools! Please DO NOT open malls! It is far too early in this crisis to let people breathe all over each other. Please make the right, moral, ethical decision. Protect people over profits! Thank you for your attention.

AMERICAN OVERSIGHT

Seminole	General	i am a esthetician and i do lash extensions. i have to be a 1ft away from people's faces all day. And I am touching peoples faces all day. if we are not supposed to touch our own faces then how come it's OK for me to go back to work and touch other people's faces???? I personally do not feel comfortable going back to work yet. We are not even able to find the correct masks to protect you against the virus. Without the N 95 mask how can I be protected being that close to a client. I feel like those in the beauty industry should be one of the last people to open. It is impossible for us to maintain social distancing with the jobs we have in the beauty industry. I am attaching a photo of an example of how close a lash artist has to be to a client to put on lash extensions so you can get an idea of why I'm so worried. Also on this form under AREAS OF INTEREST you do not have anything related to the beauty industry. There is basically 1-3 Beauty business on every major corner in Florida. There are tons of us and the fact that we're not represented at all I find baffling.
Brevard	General	The medical system has caught up to the initial rush and is better prepared to handle cases (the reason for the initial shutdown). Time to safely allow Floridians to go out and move on if they chose to. For the higher risk people they can also choose to stay in.
Leon	General	Please do not reopen the state until we have passed the infection peak and medical professionals confirm that it is safe to lift restrictions.
Clay	Education	As a teacher, I would like to see an expedited antibody test made available statewide for educators prior to the start up of the next school year.
Pinellas	General	I believe we need a uniform set of guidelines that can be administered regionally but with direction. Too many counties abut each other which would allow for stricter enforced counties to flea to less enforced such as Hillsborough to pinellas. I believe we need to mandate MASKS IS PUBLIC SPACES! I believe anyone interacting with the public such a retail operations and grocery stores mandate employees wear gloves and masks and change gloves or disinfect after each interaction. We need to limit out of state entry until we enter phase 3 of guidelines mandated by federal govt. With uniform guidelines mandates and managed at the state level we can get back to consumer confidence, active living and an ease in restrictions. All food and beverage must be made to wear masks and gloves and 10 - 12 feet between tables for safety with no cash transactions. As a business owner i am confident in my suggestions
Lake	General	From what I see in the Media and the web updates for the state of Florida, the pandemic is still escalating and should not open until we see cases going down not up. I realize it is hard on the economy and everyone, but lets stay safe a little longer.
Palm Beach	Government	We here in Palm Beach are not ready to open our numbers are crazy I would say from Palm Beach south to Miami or maybe even the keys and it's hard to reopen just a portion because then people who could possibly be infected by ppl gravitating to what is open I say stay closed instead of sacrificing the weak for the demands of the strong

AMERICAN OVERSIGHT

St. Lucie	Professional Services	I have been doing hair and nails for over 5 years...This worries me. I understand we will all have to open up, I just dont want it to be too soon..at this point until we have a solution, we'll worry over the taxes and all after. We are under enough stress right now. Im a single mother- my daughters father passed away and i have no one else to help watch her for starters, schools are closed and usually sge'd go to work with me but in no way do I feel safe doing that right now- what happens to those of us who relied on school to work during those hours? I also have an immune compromised roommate, we are going to be so busy when we start again..everyone wants their nails and hair done but there is no way to be under 6 ft apart- maybe leave it to those who want to open do so but dont mandate it because we still dont know what will happen until we have numbers..the last thing we need is to have the numbers going down just to go back up and back to square one. I miss my clients, going to work- most of us in this industry LOVE what we do so it affects us in many ways but my health, my daughter come 1st and i believe it is too soon to chance it...i think we need at least another month, start with beaches. Parks..see how the numbers go for those that wish to go out..then those who believe it is safe to open up a few weeks later, gather those numbers and then decide to open up completely or take a step back. Thank you for having a site to go over our input.
Hillsborough	Government	Please do not consider opening Florida until we can go at least 2 weeks without anyone dying. I have lost 2 people in I feel because of this because they both underlying health problems and they both died alone...one in Georgia the other in Florida,.
Palm Beach	General	Palm Beach should simply be one of the last counties along with Miami-Dade. If we could get testing set up at Walgreens, CVS... that would go along way in getting more people tested.
Lee	General	I think requiring facemasks in public and a curfew would be a great way to safely start slowly opening businesses. Of course continued social distancing as well. The curfew would allow our first responders to have a little down time. If not many people are on the road then less chances of emergency calls or crime.
Sarasota	Tourism	Open everything with social distancing guideline. It's killing tourism and the state finances. Herd immunity will drove this away in a few months and you'll cut unemployment in half from the very high number coming to FL. That will save more than 1,000 lives.
Santa Rosa	General	I truly believe that some counties can open, we would love to get back to normal soon as possible.
Volusia	Healthcare	It's too soon to open the state again. We already see so many people not following quarantine, which has shown an increase in my hospitals census. To reopen now would be premature and cause a strain I don't think the state or its people are ready for. Please weigh all options before opening the state. The economy we can fix, but all the loved ones we lose we can never get back. Mark Hoffman, RN

AMERICAN OVERSIGHT

Brevard	Real Estate	We have now managed the virus with testing and controlling the flow through our hospitals. It is time to slowly open. Maybe one type or two types of businesses at a time and see what happens. High risk people should have the choice to stay inside and self quarantine. We need to be testing our healthcare and eldery care facilities weekly to contain any out breaks. We have to get back to work.
Osceola	Tourism	As a themepark worker, I dont think there is a 100% way yet to ensure our safty as of right now. We have to work with many guests and if we're in the control operations rooth, it's a tight, closed area that we cannot leave. If we have a downtime, the control room gets filled with supervisors and technicians, so social distancing is almost impossible. For the safty of the staff at themeparks, I think it will be safer to delay opening untill we have more information about those alreay infected and how safe they are, and for the numbers in Florida in general to stay on the downfall
Orange	General	Since Floridian are aware what they need to do try to be safe. You should be able to open up all the services In this state. Factory workers should be able get back to work if the proper precautions are taken. We need to get Florida open for business as soon as possible. Too many people are getting cabin fever and this locked down will cause more problem mentally then the virus can do them physically. Remember that many businesses that were considered essential or still functioning. The rest of the state, City and private businesses should be allow to be open. Providing they practices safety for themselves and customers. businesses be giving same opportunity. the rest of the state do the same
Palm Beach	Recreation	I would love to see the beaches, golf courses, and parks reopened as soon as possible. It is healthier, both physically and mentally, for Floridians to be able to get outside. It also will help those who are fearful ease back into the idea of citizens being out of their homes. All of these activities can be done with safe social distancing. I would also love for children to be able to attend summer camp. It is unfair and unhealthy for kids to be stuck inside their homes for an extended period of time and it encourages an exceeding amount of screen time, which had been shown to be unhealthy for children. Children do not seem to be affected by this illness like adults and we need to stop quarantining them as if they are sick or likely to be harmed by this illness.

AMERICAN OVERSIGHT

Pasco	General	With covid 19 cases continuing to rise in floruda we should not re open. We should at least take another month to see if the cases start to decline over a period of time before we re open. We should not put people at risk by re opening at this time. We need to see a decline in cases just like the president advised before we re open at all.
Osceola	Professional Services	I would like to see the state reopen businesses that provide professional personal care such as hair salons, barber shops, and nail salons with specific guidelines in place for protection, including the use of masks and gloves. Most of these small businesses cannot last many months without clientele and revenue.
St. Johns	General	-OPEN STATE PARKS -RESUME COURT PROCEEDINGS
Pinellas	Recreation	I am CFO at Belleair Country Club in Belleair, Florida. In anticipation of reopening the Clubhouse and Sport Center in early May, I started working on a plan of protocol for members, guests and employees. Without inundating the governor's office, places of business should be required to prove their sanitizing and social distance protocol. For smaller companies with inadequate resources, samples from industry should be provided. I'm attaching our plan - which is still a work in progress. Thermal temperature at entry points is something we need to research and assess feasibility. Thanks for asking for input.
Orange	Education	We are not ready to open FL again. We need to ride our covid-19 before it gets worse!
Hillsborough	General	Dear Governor, I am a proud American who has lived in Florida for over 23 years and I love the Sunshine State. However, I have concerns about medical experts who say that we should not open up Florida until it is safe to do so. Does this mean we have to wait for a vaccine because that would take too long, out entire country cannot last much longer in this situation. As Rush Limbaugh has said many times on the radio, "This is not sustainable." As an Uber Driver, I continue to help my community through this difficult time, I sanitize my car every day before I accept passengers. Passengers have done a great job of protecting themselves as well as me as I do take the risk everyday but I love to help my community so I consider this an acceptable risk. Anyway my question is will April 30th be the final day of the stay at home order you issued back in March? Will we begin to get back to normal? Finally will social distancing be enforced for the rest of the year? Because I feel that is going to be very difficult to do in a state with a population of 22 million people. Thank you Governor for the great job you are doing so far and if you get a chance to read this, please know that I will continue to support your decisions on what you feel is best for our Sunshine State of Florida. Sincerely, Joey Bell Uber Driver Of Three Years

AMERICAN OVERSIGHT

Palm Beach	Healthcare	I am a doctor at my local VA hospital here in South Florida. I'm very concerned for my patients if south florida opens fully at this time. Our citizens are in a more risky demographic and I'm concerned that if we open our hospital won't be able to properly care for them. Please err on the side of caution and maintain the stay at home order at this time.
Flagler	General	Re-open the state! People can make their own decisions about where they would like to go and what activities they would like to participate in. Re-opening does not force people to go out if they don't want to but let us go back to work!!
Volusia	General	Please reopen the beaches with parking. People know to social distance especially up here in Ormond by the Sea. Please open salons and restaurants with outdoor seating and limited occupancy. We want our lives back. The press conference yesterday said sunshine and humidity kill the virus almost instantly. If people can stand in line at grocery stores and shop we should be able to do these things responsibly as well. Thank you.
Seminole	General	Hello, Re-open Florida when cases are down to 0, and there have been no new cases for about a month/when a vaccine has been invented and proven to work. Ban travel to and from places with active COVID-19 cases. Open travel to these places when cases are down to 0, and there have been no new cases for about a month/when a vaccine has been invented an proven to work. If you reopen Florida while there are still active cases, test every single person residing or visiting the state of Florida for COVID-19, regardless if they show symptoms or not. Require regular weekly tests. If that is impossible or too expensive, don't re-open Florida until there are 0 active cases, and there have been no new cases for about a month/when a vaccine has been invented and proven to work. Unless you forcibly keep infected individuals inside their house and closely monitor them until they recover or no longer have the virus, you cannot control what people do. With all the restrictions that are in place now, Florida is getting new cases by the hundreds every day. People spreading the virus are people with symptoms who ignore the protocols, have mild symptoms and think it's fine to go out, or people who are carrying the virus and do not show any symptoms. You cannot "advise" sick people to stay home and expect all of them to adhere to this advice. You cannot expect establishments to check the temperature of each customer and rely on that as a method to keep infected individuals out (people can have COVID-19 without any symptoms), especially if these establishments are short-staffed due to the social distancing restrictions. Do not rely on the belief that people will listen to advice. With all the
Orange	General	Partner with a job site to somehow get people who have lost jobs working again.
Seminole	General	Let's be careful on reopening our state! I work in the restaurant industry. We can wait a few more weeks before we change from take out only!! We need to keep everyone safe!!

AMERICAN OVERSIGHT

Lake	General	My thoughts, I feel that the whole country should shut down totally for 20 days. That means not leaving your home to go anywhere. Not even to the grocery store. The stores could have essential delivery personal. The government can just put everything on hold, everything. Payments, taxes, and no recourse from anyone. You could have an office set up with volunteers for each county at home for emergency contact. It's only 20 days, we all can survive if it is enforced. This will be much better than trying to reopen and have to shut us down again. This should give us a chance to eliminate the virus.
Orange	General	Floridians need to start the process of reopening using protective measures while controlling the occupancy. I feel we can start to gradually get people back to work wearing mask when in public. I feel all business should be made to create a wash station prior to entering establishments to ease people fears. If not I feel government is bound to halt all payments of rent mortgage electric until further notice.
Orange	Tourism	I work at the theme parks and my biggest concern is getting back to work but doing it safely. Employees definitely need to provided with the necessary PPE for their job. Also what I've noticed is that people don't listen. The hardest thing will be getting citizens to comply with the new normal once things are in place. Even now, its "suggested" that people where masks I'd they go out in public but there are a lot the still don't. For the theme parks it will be impossible to maintain social distancing while just walking through the park. So I think guests being required to wear a face mask should be a thing. Since masks will be apart of our new normal, theme parks could turn a profit on them buy making them decorative and themed like other merchandise. So if they dont bring their own then they have to purchase one. Upon entry every guest should have their temperature taken. Now I saw in japan they have a temp scanner where they just walk up to it and it reads out the temp immediately. If they have a high temperature then no entry. There also has to be consequences for those that don't comply with the rules of the new normal or else people won't follow the rules and it will keep spreading. For air travel, when people are coming I'm they should be checked because people will travel even knowing they are sick. For example I've seen a mother bring her child to the theme park sick riddled with chicken pox and her reason for it was because she didnt want to lose out on any money. So companies and airlines will have to continue being flexible with their cancelation guidelines. Most people dont want to cancel their trips unless the have to so if people are canceling then it's for something serious. This will avoid people traveling with the virus just to not lose out on their money.
Collier	Government	Reopen Florida! It is time and those that want to isolate can do so and those that want to go to work can do so. I am retired 62 yrs old and I can make my own decisions.of if and when to go out. But too many businesses need to be opened. Don’t cripple our economy any more for those who want to shut everything down for the sake of a few.

AMERICAN OVERSIGHT

Volusia	General	Leave it up to the customers to decide whether they want to be outside and support our economy. For those that feel unsafe they can choose to not go out. Our economy is our future. Sadly lives have been lost to this virus but lives have also been lost to the flu. When considering reopening please also take into account that people will make the choice whether they feel safe leaving their homes. Don't follow Georgia and make wearing masks a requirement for restaurant workers! No one wants someone to wait on them in a medical mask!!
Brevard	General	Please open back up Florida in phases. We need to open back up not just for the economy but for us the people peace of mind in this free world
Jackson	Professional Services	As a Florida resident, a mom, grandmother, care taker of my parents, and a self employed stylist I have great concerns over all those I love, and that includes my client's if we reopen Florida. As much as I love my job, my profession, and miss it and those I get to spend time and my heart on, and the money I make and NEED I feel its senseless and rediculous to reopen at this time. Not to mention selfish to put all at risk with the numbers of increased cases and deaths even with all the restrictions and closures we have had , I feel all we have been thru would just be for nothing and only mean we just prolonged the outcome making it happen anyway. I can live with being broke and living modest, because in the end those I love get to LIVE because of my choices! I myself would have a hard time living the rest of my life knowing I hurt others because I could not say NO, or could not do without things I wanted verses things I need to live. Common sense! And also i want to give a Thank you and praise for our Florida Governor and President Trump for all they are going thru for US, i feel proud we have them on our side in these trying times!
Broward	Real Estate	Businesses should be allowed to reopen immediately as long as they comply with basic safety rules (ie masks, distance, etc). The selection should be based on the ability of the business/industry to comply with safety rules, not based on the business focuses on. The government is stopping us from being able to make money but is not offering any real solution. Government is saying that tenant can stay in privately owned properties without paying rent and landlords can't do anything about it.....how is this fair, or legal, or constitutional? Is the government going to pay for the rent to the landlords? If not this is a huge abuse of power that must stop immediately and offer compensation to landlords for the rent lost.
Clay	Real Estate	Open the state up to young and healthy people to go back to work and allow the elderly and immune compromised people to stay in. Our economy is suffering and we need people working. We're going to get to a point of no return where our economy is destroyed and we will have a huge recession.
Osceola	Healthcare	I work with foster children. I would love to go back to normal but to jeopardize so many would be a major mistake until we are completely sure. Many foster children have low immune systems because of drug usage done by their parents. Many are taken care of by grandparents that are elderly. The risk is just too high still.

AMERICAN OVERSIGHT

Volusia	General	I absolutely believe the state needs to get re-opened. We are committing economic suicide by keeping things closed. The virus may kill directly, but what is happening here with this shutdown is going to kill people indirectly. People have put their lives into their business, only for the government to take it away? It's ridiculous. And the death toll numbers are not accurate. They are labeling everything as a COVID-19 death to inflate the numbers. We cannot continue to live in fear and make the state poor. There is a lot of harmful fallout, including depression, anxiety, suicide, stress (which leads to health problems), poverty, and more. Look at the bigger picture. The state must get re-opened and stop committing economic suicide.
Brevard	General	I am against re-opening Florida but I am supporting the opening of small businesses such as pet grooming and hair and nail salons. There should be a rule on spacing them out or only a few people at a time. These businesses are struggling. I am against opening Disney and other attractions. You can't control the population with big groups
Brevard	General	As a hairstylist I am not comfortable with re-opening at this time. I have no medical training but a license to touch people, I do not think it's safe for people in my position or other related positions to resume business. Even with sanitation guidelines and personal protective equipment, most of us do not have the ability to purchase all that is needed due to our current financial status from being out of work and because those items are very hard to find right now and should be reserved for the medical field.
Orange	General	Create a strategic plan that focuses on staggering the days and times that each industry and workplace is open. This could assist in creating a more controlled environment. In addition, implement daily point-of-care testing for the staff and patients of all medical facilities. Place a hold on the tourist industry and do not reopen until a vaccination is acquired.
Orange	Retail	Encourage any retail establishment that will be reopening to have early hours each day they are open for the at risk population to shop. The first hour of each day would be most convenient. Discourage retail establishments from offering early hours on 2 or 3 days a week because, in the case of Publix, they offered early hours two days a week and the store was slammed on these days making social distancing impossible. Dollar General offered early shopping 7 days a week and there were no crowds.
Leon	General	In order for the wellness and safety of ALL FLORIDIANS. The state must shut completely down for at least 2-3 weeks in order for the Coronavirus to STOP SPREADING. You cannot talk about reopening until you shut down. How do you reopen something that you NEVER CLOSED? If you reopen as you say now, we will definitely experience another DEADLY OUTBREAK!!!! ALL LIVES MATTER!!! SHUT DOWN COMPLETELY!!! SAVE LIVES!!!!

AMERICAN OVERSIGHT

Miami-Dade	Healthcare	As a physician I recommend: 1. FOCUS ON RESTARTING HELTH CARE (PEOPLE NEED SURGERIES) AND AGRICULTURE FOR NOW 2. KEEP ENTERTAINMENT CLOSED OVER THE SUMMER - THERE ARE FEW TOURISTS NOW ANYWAY 3. START STERILIZING CROWDED SPACES (BUSES/STORES) REGULARLY TO DECREASE INFECTION NOW AND TO ENCOURAGE TOURISTS TO RETURN IN THE FUTURE 4. DON'T REOPEN TOO FAST - UNDERSTAND THAT THE VIRUS GROWS EXPONENTIALLY IN JUST SEVERAL DAYS. 5. GOVERNOR, BRING MORE MASKS AND PPE TO OUR HOSPITALS, PLEASE! BE MORE PROACTIVE. WE ARE TALKING ABOUT DECREASING INFECTION BUT NURSES HAVE RECENTLY DIED FROM NOT HAVING A MASK AT WORK. DOCTORS HAVE ONLY ONE MASK FOR THE ENTIRE DAY. THIS IS A LONG TERM PROBLEM UNTIL 2021-2022
Lake	Healthcare	As a speech pathologist working with children, I am voting that we do NOT re-open the state for at least the month of May. So many lives are at stake and the numbers are still not decreasing significantly enough to warrant putting people at risk of transmission. Your influence as governor will encourage people to listen to you and follow state guidelines.
Marion	General	My husband and I think it is too soon to open everything up to the public. We are frightened that we may catch Covid 19. We are both in our 70's, with underlying problems. Thanks for asking.
Volusia	General	To safely reopen the Economy , people should Where are mandatory facemask And in for social distancing , And advise the public of anybody’s catch without a mess that would be fined
Martin	General	Re-opening the economy right now will only increase the number of cases statewide! In my opinion, the beaches should have remained closed pending testing of all Florida State residents! This is not safe and will lead to more deaths! I'd rather stay at home with my 11 year old son and 11 year old grandson dealing with cabin fever, than to have those restrictions lifted and be exposed to the virus! I take a risk just by going to the market or going to pick up medications from the pharmacy!
Broward	Education	In the case of children in EHS it is a risk to go to school, it is recommended that infants and y toddlers stay at home with their parents, most of them do not work therefore they can assume their responsibility. Therefore it is a good decision to end the school year, graduations, home visit, online. Taking into consideration the health of teachers and caregivers. It is good to wait for medical studies.
Seminole	Food	Please for the Love of God and all things Holy, wait and be cautious in order to protect our seniors. I work as a Chef in Assisted living and I have 5 serious health conditions and I go to work every day and provide healthy foods for our residents.

AMERICAN OVERSIGHT

Hillsborough	Healthcare	Don’t open! It’s too early and cases will spike again! If anything does start to open people need to be required to wear masks to help prevent the spread.
Duval	Education	Without a treatment nor vaccine the virus is deadly. If you do not know who has it or is a carrier you have to keep the social distancing strictly enforced. There lies the problem how to strictly enforced distance and mask. (Do we have enough mask for all school populations in FL) (just enforcing the dress code and PDA at a High School is a losing battle). You would have to re-engineer school hallways and classrooms. Even if you had two shifts of students the populations would be Impossible to manage. Mostly considering the average age group of Teachers (I dont know - but probably high 50's) along with different medical conditions would put this group at a high risk. Bottom-line this is not rocket science every detail needs to addressed and if implemented strictly enforced with consequences. Remember this not just a numbers game but a life and death game.
Collier	General	Stop the tyranny immediately. Even artificially inflating the numbers, this "outbreak" is not as bad as the seasonal flu. Even if it was a lot worst, sick and at risk people are quarantined, not healthy people. Open everything everywhere immediately and never try to cage healthy people in their homes (or anywhere else) again. We the people get it. The currency is collapsing and there is going to be a currency reset and civil unrest understandably so. This fake pandemic is a false contributor and cover up for this. We the people are awake and prepared to do what is necessary to refresh the tree of liberty. Those responsible will be dealt with. The people will rise up against this tyranny. For your sake and those you claim to represent, stand on the side of the people. Have a wonderful day, and we the people look forward to you doing the right thing for the people.
Orange	General	Florida must remain closed until adequate testing is available. Any reopening effort must be done incramentally and with many guidelines in place. Additionally, ther current stay-at-home order is not being adequately enforced.
Orange	General	DO NOT RE-OPEN UNTIL MEDICAL EXPERTS AGREE IT IS SAFE TO DO SO. YOU ARE JEOPARDIZING LIVES.
Palm Beach	General	pam beach county should not be reopened any time soon. Absolutely despicable and disgusted if you reopen even when numbers are continuously climbing every day.

AMERICAN OVERSIGHT

Wakulla	Healthcare	Science and fact should drive reopening the state, not politics. We should reopen the state when it is safe to do so. When everyone is wearing masks. When your temperature is checked before entering a store or public place. When testing is ready available for ALL citizens, not just those with a certain health plan or that have a doctors orders. We need testing. We need practical measures in place (temperature checkpoints, masks, social distancing, physical barriers in place around cashiers or other close contact locations, etc) and being followed before we can safely reopen. History will record how people and politicians reacted to this disease. Trying to reopen to store political points and ignoring the realities of the situation will result in people dying. We have all sacrificed during this stay at home order, don't lessen that sacrifice by reopening early and causing unnecessary deaths.
Pasco	Healthcare	I work with mostly elderly patients in the healthcare field of hearing and am in very close contact with my patients faces. We currently are having a hard time getting protective equipment as I know it needs to go to front line people but any healthcare worker who has to be in close contact or touch a patient should have availability to the equipment to protect themselves as well as patients. I also feel that all healthcare providers that would like to be tested prior to returning to work should be able to do so to make sure that we are not an asymptomatic carrier and that way if we were to get it we know we didn't have it when we did return to work. Please follow the guidelines and make sure that each county is going down daily for the 14 to 30 days before opening. I am a high risk provider and I don't want to be made to go back in an unsafe environment. I am not opposed to re-opening but safety for myself as well as childcare needs to be thought of too since school is closed too! Many parents work but also now need childcare and helping homeschool their kids criteria or has got to be loosened for this. Thank you for your help and time, a concerned healthcare provider.

AMERICAN OVERSIGHT

Volusia	Healthcare	As your constituent and a licensed dental hygienist, I am writing to encourage you to reinforce the importance of continuing to follow the Centers for Disease Control and Prevention (CDC) recommendation that dental facilities postpone elective dental procedures and non-urgent dental visits (such as dental cleanings), and prioritize urgent and emergency visits and procedures now and for the coming several weeks. Dental hygienist work within inches of a patients face and utilizes handpieces that generate aerosols or tiny particles and droplets from the patient's mouth that remain suspended in the air and pose a risk of infection to the dental team and other patients. I write to alert you that Dental offices should be limited to emergency, urgent procedures in accordance with CDC guidance at this time. As you consider next steps in responding to the COVID-19 pandemic, please ensure dental hygienists, the entire dental team, their families, and the patients they serve are as safe as can be, and are not spreading Covid-19 by the HIGH aerosol production produced during a simple and elective dental cleaning. Studies have shown that dental hygienist posses the highest occupation hazard of contracting and spreading the disease, above even nurses and respiratory therapist, due to the the aerosols created of the patient’s saliva and the nature of this disease. Thank you for your consideration, A concerned Florida Dental Hygienist
Miami-Dade	Retail	I would like to see retail follow the same protocol that is happening in Texas. Retail to go which includes curbside pick up, virtual showings and delivery for two weeks before allowing limited traffic back into stores in a very controlled way. Restaurants should be allowed to open with tables 6 feet apart inside and outside should be back to normal. Open residential pools, it's 90 degrees and as long as social distancing is practiced we should be able to go to the pool Open the beaches, the virus dies in UV light, and can't survive in heat and humidity. This is Miami it's hot and humid with lots of sun. Open hotels with strict guidelines on hygiene.
Hillsborough	General	PLEASE listen to the medical professionals and not the politicians and do not reopen Florida until the medical professionals say it is safe to do so
Volusia	Food	Florida needs or stay shut till this is over, if we open back up it'll get so much worse and so many more people will die. Our lives are more important than bringing money to the state , we can replace everything and come back up in time, bit if we open and way more people die then it will be harder for anyone to get or lives back to normal

AMERICAN OVERSIGHT

Polk	Education	Brick and mortar public schools are a foundation of our society, and have stepped up during this most difficult time to provide stability to families throughout the state. When facts and deemedscience shows it is appreciate and safe for people to gather again, I hope the state will provide the needed funding to keep schools open at their pre-closure rates. Save money by eliminating high-stakes testing and punitive measures, or by changing how money is given to charter and private schools, but do not cut local school budgets. I recognize that this is a joint state and federal issue, so I hope the state will use its power to put pressure on the federal government to provide funding to public schools, as it has done for small businesses and individuals. Without public schools being properly funded the entire society will collapse.
Manatee	General	We must not open the state up until there is testing for ALL and contact tracing. Then there must be donors available for plasma to help those that are being currently treated for COVID-19. We do not have a minimum of 14 days without rising numbers no proper testing numbers! Unemployment site is a disgrace for this state and MUST get up and running. People are now into their 5th week without being able to get on the site or collect benefits from the state or federal additional $600 per week. Governor Desantis you should be ashamed of yourself for following in Trumps footsteps! He is a disgrace to this county! Do NOT open Florida up as we will only see more numbers of people sick!
Marion	General	Before FL reopens, we need lots more testing. We also need required testing once we open back up. For example, anyone who works with the public or coworkers should be tested periodically as well as screened for fever, cough, etc. on a daily basis before entering the workplace. Plans for the general public and public places like stores, restaurants, airports, parks, etc need to be in place and enforced as well prior to reopening. There needs to be a plan for people who live in institutions and it needs to be an enforceable plan, too. Lastly, there needs to be a plan on how to re-close parts or all of the state if certain metrics warrant it - so metrics need to be in place to track if/when any re-closing needs to happen.
Orange	Tourism	As much as I would love to go somewhere I think that if we were to open we would be risking a second wave. Majority of the jobs in Central Florida are in hospitality industry which requires for many employees to be confinded to small places. I think if we want the economy to grow fast at the end of the is to wait until people feel safe. Tourist aren't going to come unless it is safe. Companies are still going to cancel their events. I would focus on looking at what is said through those who are the health officials, the theme parks and those in destination marketing.

AMERICAN OVERSIGHT

Santa Rosa	General	Good afternoon. I want to begin by stating my respect for the governor during this time. The tasks and responsibilities that lay before him are not one that I envy. And all while trying to be a husband and a father to his newborn child. I want to give my input and say that I do not think Florida should reopen at this point in time. Our beaches down the street will be open next week and in 2 weeks time this should provide us with more information. As much as I want things to go back to normal (I am a teacher who doesn't get to say goodbye to her students as I am a military wife who is suppose to be moving but the travel ban has changed our timeline) I do not think we have enough information. Let us pay attention to Georgia and see how their state handles the virus over the next few weeks as they opened up this past Friday. But please, do not put us in the path of the virus until we know more.
Palm Beach	General	I believe we should re open the beaches. They are not major contributors to the spread of Covid-19, but what they are is essential to the lives of many floridians. If we reopen them, this will help people maintain their sanity by getting to leave their house and visit their place to clear their heads. Thank you for your time
Miami-Dade	Government	I do not think it is safe to re-open this quickly. We should remain shut down for an additional few weeks to not continue the spread. I believe opening so soon will back track all the progress we have already made. Lives are more important than the economy.
Lee	Healthcare	What consideration is being given to reopening nonessential surgical centers? It seems that at this point in time although the cases of COVID-19 are still on the rise in Lee and Collier counties, the media reports that the hospitals have sufficient staffing and medical supplies. I was scheduled to have my second cataract replaced one day after the eye center in Naples, FL, which would do my surgery was closed. I am having trouble seeing to drive at night. Although I don't have a need to drive after dark while I remain in Florida I need to head north in the near future to take care of a rental property in North Carolina. The lens for my second eye has been ground and paid for. I will not able to leave until the second cataract is replaced with the new lens which will enable my night vision to improve. Thank you for your consideration.
Citrus	General	When analyzing data for reopening use a graph of active cases rather than the graphs that are showing up in the media. The other graphs are not true pictures of what is happening.
Miami-Dade	Healthcare	It is too early to be opening Florida again. So many unreported test results. This will only leaf to the spread of the virus again and a longer season.
Broward	Healthcare	Testing for the virus is high priority, antibody after illness if can help. Recurrence is a dire threat to everyone. Testing for everyone as many folks are asymptomatic. Repeated as needed. Social distancing has helped the state residents keep the infection curve lower. Keep in place for months to come, along with masks. Openings must enlist advice of infectious disease experts & healthcare professionals. Openings should be slow & measured in case of spiking. Potential hotbeds as schools opened last.

AMERICAN OVERSIGHT

Orange	General	DO NOT RE-OPEN. You are making a mistake opening too soon and not following the CDC guidelines. YOU are putting my family at risk of catching and dieing from this disease. We have worked so hard to stay clear of getting sick and by opening the state back up you are throwing all of that hard work down the drain. DON'T DO IT. My husbands life is not worth less just so someone else can get their nails done or walk on the beach. #FloridaMorons should be arrested for violating the stay at home order and putting peoples lives at risk. Please consider your family and friends. Are their lives worth not opening stores for the enjoyment of others? Please do not re open too soon too fast. Be cautious, save lives!
Duval	General	Looking at South Dakota and Sweden. No lock down and developing herd immunity. Looking at unemployment benefits NOT THERE. Been waiting since March 3rd. Denied..... I feel it is in the best interest of all persons that are NOT at high risk for the state to reopen. We need to save our State and its economy. Those that are considered High risk SHOULD stay at home and protect their heath until this virus has subsided. I for one need to do something.. Thank you Laurence R. Vickery
Orange	General	We are not ready to reopen. Too many cases daily with no show if improvement. We do NOT feel safe with the state reopening.
Palm Beach	Retail	I do not believe retail locations should be reopen once the stay home order is lifted for May 1st. I believe most retail stores can continue to survive with online orders through their website. As a manager at a retail location I find it very unfair that I need to risk my life and my family just so people can shop for tee shirts and jeans in person. I believe this will not flatten the curve but it will make it so much worse.
Miami-Dade	General	Hialeah is a big problem in general. Businesses secretly opening up. Grocery stores full of people. There is crazy traffic! If Hialeah can't get it together, surrounding areas are still at risk.

AMERICAN OVERSIGHT

Hillsborough	Healthcare	It is past time to get our economy going. Let businesses open...now. If people feel that they are at risk, then they can stay home. They and their primary care practitioner (PCP) know far better than government bureaucrats their risk (if any) from COVID-19. Meanwhile the economic consequences of this shutdown will be more far reaching than any fatalities from the pandemic. Most of the people dying already have co-morbid conditions (one or more) that is the true cause of their demise. I own a medical clinic with office sin Hillsborough, Pasco and Pinellas Counties. All but the Hillsborough Office are closed. Our type of practice is what might be considered elective, at least mostly. My business revenue is down at least 90% since March. If it were not for the PPP funding I would have had to lay off all of my staff and stop paying myself. Even still, we cannot spend our way out of this with government hand outs. Gov. has nothing that it does not first take from someone else so where is all the funding going to come from for these programs if businesses and citizens are not paying taxes? This is case of the cure being worse than the disease. As Gov. Scott was fond of saying: "Let's Get Back To Work!' Perhaps you can modify it a bit and say "Let's Get Back To Work!'
Jefferson	Healthcare	Please have some public health scientists/physicians on your task force or at least run your plan by them for feedback and then consider the feedback. The reopening has to be as safe as possible so not to have a significant increase in cases. We have to remember that many of the cases, even though they lived, have serious health consequences for the rest of their lives. This is not the ordinary influenza. Thanks, Lynn Elliott
Orange	Healthcare	Maybe early June. We have to watch for surge after each phase of reopening.
Duval	Government	My wife father just tested positive as of 04/24/2020. I think we need more time to wait this out. Protesters are really putting theirselves and others at risk. So I f he dies he dies I guess . Just so you can get back to normal. Hell I dont think anybody can go back to normal this is the new normal..
St. Lucie	General	I have a disabled son at home, currently the center he goes to is also closed. And schools are not open until the fall. I also work a fulltime job. And having to go back to work, help with his schooling is even more hard if the state opens back. up. I cannot get my son sick, he will die.
Orange	General	If a business has already implanted work from home protocols, then that needs to continue. Other businesses need individual assessments. Unfortunately, businesses are treating this as an economic problem with a inconvenient health element. The reality, whether we like it or not, is that this is a massive health problem with an unfortunate economic element. I encourage the panel to look at Hokkaido, Japan. This is a POSSIBILITY here. Is Florida prepared to deal with that possibility? Or do we do the difficult and correct thing and stay closed longer?

AMERICAN OVERSIGHT

St. Johns	Healthcare	Please consider those of us who are waiting for surgery as you make decisions of what to open when. I was diagnosed with breast cancer in March, right before everything shut down. Imagine knowing that you have cancer and no line of sight to when you can have surgery to remove it. It is beyond frustrating. I ask that you prioritize healthcare needs before opening up anything else. My fear is that everything opens up at once, Covid cases increase, and we have to wait even longer for much needed healthcare.
Palm Beach	General	I want Florida to be re-opened IF its in a safe way. I think recreational activities should be allowed such as parks and beaches with rules, such as no party setups, sunbathing, groups. Allow boating but no one on sandbars or tie ups. Allow golf, with 1 per cart. There is a safe way to do this. Business should be allowed to open, but masks and gloves are required for both patrons and employees. Max occupancy in stores. I want to hear from medical experts...not politicians, on what is safe. The worst thing in the world will be to have to re-quarantine if the cases get out of control...so DO IT RIGHT! Dont be like Georgia or for Godsake that lady from Las Vegas and tell business owners to figure it out themselves. Give us guidelines!!! Also, considering the disaster unemployment system. There are going to be people who for family reason can not return to an open business OR are in the high risk category. I personally have employees who are in the high risk that I would honestly be afraid to have work because I cant be sure I could protect them. If people are in this category, they should be allowed to remain on unemployment (if they were even lucky enough to start receiving checks to begin with). And last...FIX THE UNEMPLOYMENT SYSTEM!! I have people who have been furloughed for a MONTH that have not received a DIME.
Lake	General	PLEASE REOPEN AT LEAST PHASE 1 ON MAY 1ST. Everyone can and should practice social distancing but people need to get back to some sort of normalcy and people need to get back to work and support their families.
Volusia	General	Dont.
Polk	General	As of 4-23 We spiked again and now we need to wait 2 weeks from that date before opened up
Wakulla	General	My thoughts are that the rural portions of the state should be allowed to reopen with CDC guidelines. The majority of these cases are in Southeast FL and heavily populated areas. I believe travel to and from the heavily infected areas should be restricted. And stay home orders there to continue until we see a drop in infections. People need money, unemployment response has been dismal at best. Open up slow and smart.

AMERICAN OVERSIGHT

Marion	General	I think reopening the economy is critical. People are starving and will be homeless. But when reopening the state put safety procedures in place. Such as face coverings in salons hair and nail, use social distancing in all public places and maybe allow restaurants to open at a 25% capacity for eat in dining. There is no reason why we can't open back up. Leave it up to businesses to make their own call on when to reopen and their hours of operations. Do not extend the stay at home order. People are not going to adhere to it again.
Manatee	Healthcare	My mother has an autoimmune disease and a very serious infection at the moment requiring emergency surgery yet her surgeon just telling her he cannot get her in to do the surgery until after the 25th of next month due to this covid-19. I fear she might die beforehand I am sure there or an extreme amount those people in similar situations. Question are you just going to let these people suffer and die? Because it seems the hospitals are way below capacity and I am sure there are surgical centers out there that can do Emergency Operations.
Hillsborough	Recreation	Opening braces with social distancing would be beneficial on a psychological basis and physical level. I'm 73 years old, a former nurse. I believe in some herd immunity for the recovery rate is 97 percent
Polk	General	Open Florida Now
Polk	Healthcare	My 95 yr. old mother has been steadily declining since you shut us out of her ALF. She was accustomed to daily visits and now we have a ten minute window visit ince a week. Her dementia is causing undue confusion and depression. It breaks my heart that she is spending the last days of her life alone and feeling abandoned. I would be willing to take any tests or precautions necessary to be able to improve her quality of life. Please do not continue to shut these poor souls in and reunite them with their families. It may not be the easy thing to do, but it is the right thing yo do.
Hillsborough	Healthcare	Why are we not looking at the wave of sickness that went through our communities in schools late February early March. There were people with flu like symptoms that did not test for influenza a or B. If you look at school attendance I'm sure it was way down. My eighth grader reported half of his classes empty one day. Many teachers were sick. Our high school orchestra teacher was out for over two weeks. Please compile these anti-body reports and make our state aware that maybe this has already been here which puts our death rate way down. We need to remove the fear that the media has put into everyone. Please put our people back to work soon. Thank you for al that you do, Jena LeBlanc Lutz FL PS please give us the freedom to wear mask or not. Try this, take a thick cotton towel, water and soap, put it against your mouth and blow.. My whole family had fun with this experiment. If someone coughs in a mask it doesn't stay in the mask. The mask just collects more germs as the cough is going out. If people are sick they need to stay home!
Brevard	General	Open the state back up

AMERICAN OVERSIGHT

Hillsborough	General	I believe Florida needs to reopen completely. There are people struggling because they are not back at work. People have kids, and elderly parents to care for. Those who are not on government assistance like food stamps and are not working can't put for meals for their families. It's beyond time for Florida to reopen. Those who're scared or sickly can remain home but it's time for the state to open. Kids can't even be kids anymore. Parents can't make money for the kids. Sooner or later waiting this long to reopen will cause the public to erupt and tensions will be so high it'll be chaos.
Pinellas	Government	Please seriously consider followOmg Sweden's lead and methodology with respect to this current public health crisis. Moving quicker to heard immunity is worthwhile and improves the majority's health and prosperity. Thank you for considering our voices.
Broward	General	Please open the beaches, parks, and marinas ASAP. This virus how a very low death rate, probably .1 to .2%. We should still have some civil liberties. If someone wants to lock themselves in isolation that is their right, but please don't force me to stay inside.
Pinellas	Healthcare	My concern as a healthcare provider is difficulty finding PPE for staff, therapeutic for infected patients and testing, both antibody and live virus. I understand the need and Governor's desire to re-open the state and agree on a personal level I am concerned for my patients.
Seminole	Construction	There are far too many new and total cases in Florida to consider reopening Florida at this time. Things should remain closed through May and at that time be re-evaluated. With no vaccine or cure for the virus the only way to eradicate it is to starve it out.
Duval	General	It's becoming increasingly clear that this virus is not as dangerous as we were led to believe. There are antibody studies done in New York as well as Stanford University that show that many more have been infected that we know. This thing has been here for much longer than March or February. It's time to reopen the state and the country now.
Manatee	General	I think it should re open. If people want to stay quarantined then they can stay home.

AMERICAN OVERSIGHT

Hillsborough	General	We own a floral wholesale company that supplies to florists and wedding/event planners so as you can imagine with so many weddings and events being cancelled our business and the floral industry in general has taken a huge loss. I (along with all the flower shop owners) have not understood why they were supposed to close. Many have had to lay off employees due to lack of business but tried to stay open with just the owner's operating. This is a business that receives most of it's business through online or phone orders anyway and then they deliver the flowers to people's doorsteps. They have kept their front doors locked so no foot traffic would come in, and practiced all the social distancing guidelines. In most of the counties we supply to, the officials have left these businesses alone. However, the Pinellas County Sheriff's office has really harassed these shops and threatened them with jail time if they did not lock up and leave the shops. This is just over the top and no common sense was shown with some of these business shut downs. If a business can practice the recommendations by the CDC then why shouldn't they be allowed to be open? I am very concerned about some of the government overreach that has been shown by local officials not just in Florida but throughout the country. Also, I do not understand the logic behind closing all the trails throughout Florida. I can understand making playgrounds, pavilions, etc off limits so that people don't gather there, but people need to be able to have safe places to bike, run, and walk in order to get the exercise needed to keep their immune systems healthy. Not everyone lives where there are sidewalks and we are really taking our lives in to our own hands to bike or walk on the roads. Everyone in this state knows it's a VERY dangerous place for pedestrians. I would urge you to consider opening all the trails back up. I understand some people are fearful to open things back up, but if people can go about their business with common sense the risks can be minimized. People just need accurate information and education, education, education....not the heavy hand of government. People that are elderly or have the risk factors possibly need to continue staying at home as much as possible and let the rest of us get back to work and get this economy rolling again.
Marion	General	Requiring mask/face shield and gloves for everyone would help in the opening of the economy.
Sarasota	General	We have endured this stay at home idea for long enough. My wife has been out of work for over 4 weeks, applied for Florida unemployment immediately on 3/24 and is still pending! Not sure what how you expect people to pay their Bill's if the faulty system is not working and yet you still won't allow people to earn the money. Common sense is all that is needed to combat this virus that has been over hyped and the consequences are already dismal. If you continue to let this continue there will be more deaths for the outcome than the virus itself. Enough is enough, let's go!!
Orange	General	Please wait until 14 days without infections before opening the state. If you do hair appointments one person at a time (no more than 10 in a shop) Same with nail salons Do not rush back before we are sure we won’t have a second outbreak. Listen to dr. Fauci!! I want everything to reopen just not before it’s time. Please be smart and cautious.
St. Johns	Tourism	We are a tourist driven city. Our businesses have suffered enough. We need to open. We know we need to be smart about that. It is time.

AMERICAN OVERSIGHT

Osceola	Tourism	Hello, one thing I have not seen much coverage on trade shows and conventions. In March when all this started HIMSS 2020 canceled it cost Orange County roughly $120 million. Dozen more events have cancelled since March. Costing the county hundreds of millions of dollars. There needs to be a safe reassures way to get the face to face marketing industry back on track and show the world Florida's resiliency and dedication that will bring people together and billions back into the economy. This single industry has direct impact on several areas including but not limited to airlines, hotels, restaurants, transportation, tax revenue and dozens of small and large businesses per event.
Palm Beach	Healthcare	If the state remains closed the economic impact will be disastrous. Businesses will fail, close down and it will take years if ever to re build. I believe there is a degree of Mis information given to the public. There will always be disease and death, but people need to make the choice to handle their health themselves. Also The results of this shut in will last years in terms of mental health. This is a free country and should not be rules with government that wants to completely control us. Outside is the best healer. Sunshine exercise, gives a strengthen immune system. Let the people live to the best of their lives not the Government s rule
Seminole	General	Shopping centers need to close in door shopping and promote more delivery and car side pickup. In the process create more jobs to help with the demand on people wanting delivery and the already increased amount of people using pick up. Hair salons, barbershop, nail shops, phone stores, bars, etc could reopen with very few inside. Max 3 employees and 3 customers spaced 6ft apart. More work at home jobs need to be created for business that are in Healthcare, real estate, teachers, tutors, fitness trainers, etc to help keep people separated but still able to bring in a income.
Miami-Dade	Government	This pandemic is very worrisome and many residents are not careful about social distancing. Stricter steps should be enforced to keep people from leaving their homes. Children should stay home and not be forced to return to school at this time. Emergency orders should be extended to allow for Virtual meetings.

AMERICAN OVERSIGHT

Pinellas	General	I am writing to you today to implore to reopen the State of Florida. I am speaking from a healthcare worker's point-of-view. Many patients are missing out on critical care because they are afraid to leave their homes because they have been told to stay at home to prevent spreading a disease that they most likely will never come in contact with. In fact, the exploitation of this disease and every death being classified as a COVID-19 death whether it is related or not is actually perpetuating more deaths that could be avoided if people were not scared to seek help. This stay at home order also is not doing anyone any favors from a mental health standpoint. The longer this order stays in place the more cases of depression and suicide will arise. Also for those who have lost their jobs due to the closing of the state are having a difficult time keeping food on their tables and roofs over their heads. While the government stimulus check is a good faith effort to help the afflicted it can not go on indefinitely. I recommend reopening the state as soon as possible and allow the people to choose whether they continue to shelter in place or rejoin society.
Clay	General	I think state parks should open but limit to a certain occupancy. People can be spread out all over the park to support social distancing. Malls should be closed because people tend to gather in large groups there. Financial support should be offered to everyone in all counties that are affected. I recently lost my job due to the coronavirus. I have applied for unemployment but it took me almost 2 weeks to successfully submit an application but I currently am not able to access the site to claim my weeks. This virus has shown us that our country was not ready for a pandemic and the affects that it would cause. I do not think everything should be open but places like restaurants should continue to do carry out orders or if they have outdoor seating they can allow people to dine there. As long as these places can provide social distancing support and are capable of supporting the precautions I see no issue.

AMERICAN OVERSIGHT

Pasco	General	As a business owner and veterinarian the whole state needs to be re-opened. 1. Primary reason is the economy. 2. Is for the general population to develop herd health immunity. (Sweden is the prime example of the effectiveness) 3. For the mental health of human and animal kind. As a result of the stay at home orders there will be a mental health crisis that is already brewing. There will be an increase in pets given up to animal shelters due to behavior problems due to changes in schedules, as well as income loss of people who can not afford the basic for their pets. This will be very taxing financially for the private and pubic (government run) shelters. On the human side an increase in people being instituitionalized, homicide and suicide increase due to stay at home order, social distancing an financial strain. While I am fortunate to own an essential business, and continue to conduct patient care. There is a major financial, physical and emotional strain on myself, my family, employees, clients and pets. I will continue to experience difficulties in regards to keeping my business open and providing patient care for quite some time after the country/globe gets "back to normal" Linda Register DVM,CVA, CVFT
Brevard	Education	I am a Brevard Public Schools employee, essential business. I am so happy you closed school until August. I do not work in a school, I am working from home which is a blessing. I believe we should follow the President's guideline's to reopen in phases. I watch the numbers daily, they are better with the exception of yesterday. I want to see Florida follow a steady decline in numbers for 14 days, then phase I. We should open very gradually, essential NON-CONTACT jobs should open first. Our numbers would be what was projected had we not practiced mitigation. Should we go back too fast with too many people out at once we will sky rocket, Fl has too many elderly folks to risk. I definately think TESTING is crucial, if we can get the FDA antibody test that will help tremendously. I for one think I had it. We won't be ready to re-open until at least the middle of May or we will be in trouble.
Orange	Retail	I think that we are doing so well now, reopening prematurely would be a mistake. We need to continue to stay home until we are able to test more people. I think May 31st.
Volusia	Healthcare	Hi . First thank you for all your help. I think when we open hairsn nail salons should have partions between sstationd. Everything should be wiped down between customers an everyone should be required to wear masks. An social distance between tables in nail salons. Everyone must wear a mask thanks

AMERICAN OVERSIGHT

Pinellas	General	We've all done our part to slow the spread. During that time we have given hospitals and government opportunity to catch up on supplies and prepare. It's now time to reopen business and get Florida back to work. The longer we wait them more we delay the inevitable spike in cases. We are now better prepared to deal with them. Life must go on. We are better equipped as a society to deal with them.
Orange	General	I would like to see things start to open in May. I like the idea of theme parks opening first for residents before opening nationally and internationally. This will also help hotels slowly reopen since travel will be limited.
Broward	General	Please do not rush to open the state of Florida. While I sympathize with those who are struggling with unemployment, most are struggling due to issues with the state's unemployment agency. Fix that first! Opening the state too early, and a corresponding rebound of the disease, will have a much worse impact on the state's economy than staying closed a few more weeks until we are sure the downward trends in hospitalizations, deaths and new infections can be maintained. Focus on widespread testing for the next 2-3 weeks. At this point, we have only tested 1.5% of the population. That is much too low to have a real handle on the extent of disease in our communities. Until a few days ago, we were only testing sick people. But it's the non-symptomatic cases that are the silent killers in this pandemic. We need to test widely, identify the positive cases and trace their contacts. It's the only way to really stop this disease. I am especially concerned to see that some areas, especially here in hard-hit South Florida are considering re-opening parks and beaches. While I appreciate that people are sick of being in their homes and would like a place to go out and recreate and get some fresh air, that is an unnecessary luxury at this time and we just can't afford it. We tried it at the beginning of the quarantine. People were NOT social distancing, they were not following the rules and it put others including police officers, park workers and each other at risk. I saw large groups of people congregating at parks, crowding on trails, playing soccer and football and even allowing their children to play on playground equipment that had been roped off. The state became a laughingstock when photos of our beaches, full of spring breakers, were broadcast on national and international news. And later, once the spring breakers went home, more photos emerged of local residents and tourists crowding beaches around the state. How will social distancing rules be enforced and who will do that? Will we be forcing our park rangers to risk their health to address violators who are clearly more likely to be carriers since they seem to engage in risky behavior? Will we have to rely on the police to do it? I hear a lot of talk about antibody testing. We should not rely too heavily on these tests as some magic bullet to help us know when to open the economy. Until the scientists have had a chance to determine how much immunity these antibodies actually supply to
Sarasota	General	I feel it is a wrong move to re-open Fl this soon. With cases climbing every day and not enough testing available, the move to open too quickly will jepordize too many people's lives. That is foolish!!! Health before wealth!! There are so many elderly in Englewood/Venice & Sarasota. YOU will be held responsible if these people start dying because of a rush for tourism and profit. I am Totally Against opening Florida at this time!!!

AMERICAN OVERSIGHT

Miami-Dade	Retail	Although many businesses will take a toll on the possibility of closure, in the long run, more lives will be saved. Not everyone in this county fully understands the severity of the virus, people are still out without masks and not confirmed on their status of covid testing. It is not fair that we have healthcare workers risking their lives for us and when we reopen the economy we will bring more sick people their direction. Are we not suppose to also help them? Are we not suppose to actually flatten the curve before considering opening businesses? Its clear to me we need more time to have everyone indoors.
Polk	General	Follow Governor Kemp's lead and reopen our state for business.
Lee	Recreation	Please reopen pools, beaches, & restaurants with appropriate social distancing requirements. Thanks for all you do!
Palm Beach	General	2 categories of citizens... First = Florida citizens who have had no symptoms... Allow these people to be screened via a 1-800 number (have a medical person ask general questions)… based on answers, advise them if they should stay home or can resume normal activities. Second = citizens that have had suspected or confirmed COVID-19 case. Have them retested... if it comes back negative, advise them to resume normal daily activities. If they then develop symptoms, seek medical assistance and stay home. Open parks / boat ramps, social distancing practices in place. Open businesses at discretion of owners. If owners do not follow good social distancing practices (i.e. disregarding them), and clients are impacted, businesses can be held liable. Good luck... tough times and a tough time to be in politics!
Broward	Real Estate	Please allow in person real estate showings which can be conducted with a limited number of individuals present and with practicing social distancing. If not for all properties at least for those currently vacated. If not impossible, it's extremely implausible that we will be able sell without the ability for buyers to view the property in person and on-site. There are many ways that lives can be ruined and making it impossible for us to sell our property at this time is an extreme hardship. Individuals should have the freedom to make their own decisions on minimal/ low risk activities. Especially as we consider opening boat ramps and other activities, Private real estate showings should be allowed. Thank you for consideration. Shaare

AMERICAN OVERSIGHT

Hillsborough	General	I'll make this short. If school can't be opened back up how can parents go back to work? People who have been laid off won't have anyone to watch their kids. How does a parent choose a job, or care for their child? Not all activities and business can open right now and go back to normal. Maybe open certain things, but at a very limited capacity. Floridians are still dying daily! Please keep health and safety as priorities for all of us.
Palm Beach	General	*Parks should open. People need fresh air and open space to walk - sunshine is important *Hair salons should open on appointment basis with guidelines *Retail stores should open *People need to get back to work! Isolation is causing depression and other health issues *I oppose Disney being opened to international travelers until we're assured a rebound virus isn't on the horizon
Pinellas	General	Please let the Stay-at-Home order expire. Allow County authorities deem what restrictions are appropriate based on their demographics / data.
Bay	Tourism	I live in Panama City Beach and work in Vacation property management and I need the state to open. I was effected by Hurricane Mcheal so please open up the state, give people there God given right to choose to stay home or not
Brevard	General	Reopen! Check Brevard county. Not bad! Reopen NASA daycare!! It's been 5 weeks without any childcare for my family. Thank you.
Orange	General	How can you know how many citizens have this virus when you have tested so few? How can you open small businesses until you have a standard protocol for cleaning, monitoring employees health status and monitoring clients/customers health status. How will I know that an employee of some random store has not maintained social distance within the recent past? How will you deal with the coming surge? Are you preparing by warehousing PPE and stockpiling supplies? Do you support the federal administration's decision to not participate in the international efforts for testing and vaccine trials, and do you realize that by supporting the administration's position you are risking countless lives. I question the state's concern for ALL of its citizens and residents. The virus does not discriminate, why should you? What plans do you have to ensure the safety of the voting process from the health and safety of voters and poll workers to the security of the voting booth and providing accurate counts? How can you allow farmers to plow under crops when there are hungry people? Florida is a unique state, it requires unique solutions and a bipartisan approach that puts the people first. Protect the health and welfare of the citizens and residents and you protect the state's economic recovery potential.
Duval	Retail	The State of Florida should remain on restrictive lockdown. My personal opinion is that the federal government should not determine whether when Florida should open up for business. THE RISK IS NOT WORTH THE SACRIFICE.
Leon	Healthcare	Florida should remain closed until there is testing and treatment available. We have too many vulnerable people in our state to make opening a wise move at this time. We should continue/expand the ability for remote work and education and support truly essential workers with safety equipment and medical care/supplies.

AMERICAN OVERSIGHT

Volusia	General	Open slow with social distances every one should have face covering for now and at least till July
Hillsborough	General	Please do not open the state anytime soon – we are not ready! Life is worth more than any dollar in the economy. No rush to do this. Listen to the doctors advice and follow suit!
Seminole	General	I recognize there is pressure to reopen from an economic standpoint. But getting this right is going to be better for Florida in the long run. Reopening should be done gradually and with fact based, scientific guidance. And far more testing needs to be available. We also need to have plans that may differ by county as South Florida and the panhandle have different concerns. And what happens if there is a spike after reopening. What is the plan to manage that? And how will we manage tourists from other states and hot spot areas? I believe there is a smart way to reopen, in a measured manner, with strict guidance for social distancing and sanitization. Providing a clearly defined plan that outlines triggers for moving to the next stage offers Floridians a way to see that there is a light at the end of the tunnel. And providing clear guidance to the elderly or socially compromised as we reopen is essential. They listen to their government officials and look to them for protection. These are trying times, with no perfect answer and I simply ask that you take a balanced, well thought out approach.
Palm Beach	Food	I work in the restaurant industry. I firmly disagree with opening up restaurants for in-dining purposes. I dont feel safe working and then coming home and potentially infecting my family. I live with high risk people. Many people are still contracting this virus and spreading it around. We cant just open up the state because things seemed to get better. You should wait until we have a sharp decline in the curve before opening the state. We don't need a second massive wave of this to happen again because you prematurely opened the state. I am struggling not making money right now and unemployment hasn't sent me anything but I'd rather be safe then go back to work and get infected and then bringing it home to my family and potentially killing them. HEALTH OVER MONEY!
Orange	General	It is far too soon to reopen the state. The peak d plateau of reported cases is not a true reflection of actual cases because of limited wide-scale testing. Reopening the state now would undo all the progress we've made. It is too soon!
Osceola	General	I feel that it is to soon for business with the virus going around. Its too risky for my team and I to com in contact with this virus. We want to flatten the curve and if we are to open businesses at the beginning of this peak we could put lots of people in danger
Seminole	General	Re-Open June 1 with social distancing guidelines. Local govt allowed to open based upon their local safety.

AMERICAN OVERSIGHT

Broward	General	I feel we should start to reopen things. While the virus is serious, people should have the option to make their own decisions. My suggestion would be to concentrate on protecting the elderly and people with underlaying health conditions. Set up grocery / food deliveries Medication delivery Get them things to their house, safely, so they can stay indoors if they chose to. Maybe mandate businesses that are opening to implement an hour exclusively for those people. Maybe even the beaches. 1h in the morning, 1h in the evening, only for those groups. But other than that - reopen the state. For the vast majority of citizens, this virus is not deadly.
Glades	General	I lived here for 10 years (and continuing), I've seen Florida at its worst , also at its best. I am going to school to learn real estate, willing to travel different county in Florida to continue to education myself. Me and my spouse just bought our first home last year in October , plan to live here for a while then spread our wings further. My question to you is., Would you want us stay in our home avoiding the virus? Or would you want millions of homeless Americans without our home, business, etc? Picture yourself in our shoes for once
Collier	Recreation	As a FL resident, I'd love to weigh in on this discussion. I feel it's certainly important to reopen businesses for the sake of business owners and the economy. But if we only reopen certain things at a slow rate, I feel we would be at risk of having a high volume of people flocking to one area potentially causing another outbreak. I feel we need to have a "hard reopen date". This will spread out the volume of people flooding the businesses and prevent every group of people all hitting their favorite activity or business all at once. I'm sure this has already been thought of and mentioned. But just in case, there's my thoughts. You guys are doing a great job and I appreciate all your hard work.
Orange	Healthcare	I am a medical massage practitioner and licensed massage therapist, i have middle aged and a lot of elderly clients needing my help. Until stay at home is lifted i wont be able to help these people. They call me every week or so. I myself am 67 on SSI, its not just about income for me, its mostly about helping these people have a better more comfortable life. Massage therapy can be done safely as its in our control, we always have sanitized doors and arms/hands etc.

AMERICAN OVERSIGHT

Miami-Dade	Healthcare	Please try your best to give options to take antibody tests from Labs to pharmacies on SELF Pay with a cap rate it will be less you have to do for free. Fisher island paid $17 per test after buying them bulk. Some jabs are advertising self tests in the $100 range but once you long in and go through all the options it tells you at the end “Sorry these are only for health care providers”. When you need to provide support care to elderly family members that are NOT in homes, this test is crucial. No idea why salons can’t be open on phase 1 with dbpr guidelines, it’s an essential service for those who can’t reach their toe nails or cut their hair like elective surgeries and same for condo s amenities paid for that should just follow dbpr additional guidelines with gyms and pools that serve as physical therapy excluding barbecues. Parks, are essential more than professional gyms. Golf, Marinas and water activities provide social distancing. Keep up the energy!
Hernando	Professional Services	I would say easing up now may be a temporary fix to people wanting to get out and about but it will be flushing all this time down the toilet. I have been watching and reading alot of local national and global news that when compared point to the need to stay as we are.Alot of activity is going on like walmart and lowes is like black friday.alot of people are disreguarding stay at home order in our state.I hate to say it but alot of people are like kids they don't want to follow orders to the tee, If you let up a little they will take it as everything is back to normal. Compare the comments in stories and people who see the significance between gambling on death versus having a chance to rebuild our lives in just a little bit longer understand we can fix this just not this second. I beleive as well though that folks have to eat and folks need to not to worry about losing homes,cars,etc... So if we could somehow just give it some more time. It would be a bad thing to start all over with everything thats been done so far. Stay safe AMERICA
Polk	Professional Services	Please consider allowing salon professionals to return to work with strict guidelines in place. Opening up salons with strict sanitation and safety guidelines will create a controlled, safe and sanitary work environment for all stylists and their guests. Also, please consider, the longer we stayed closed, the less likely that these salons will be able to re-open. Thank you for your time and for all that you are doing !

AMERICAN OVERSIGHT

Hillsborough	Professional Services	Reopen Florida/hillsborough county. Facts should be taken into consideration. The fact that death numbers of covid are being fabricated is enough to see we are being shut down for no good reason. Pennsylvania and many other states are retracting their death numbers. Further updated studies are proving this virus is being exaggerated and survival is higher than 98%. Doctors all over the country are exposing the inconsistencies of MSM reporting All who wish to stay home should. Those who wish to work should. This is an overreaching request and has proven to be completely unreasonable for those who do not have income coming in. Facts over feelings. Facts over Fear. Facts over self interest and gain. You were elected to uphold the constitution and serve your constituents. WIll you each and all suspend your pay out of solidarity with those who elected you
Brevard	Healthcare	We need to extend the stay at home order as Florida is ranked 7th of the10 State Populations Most at Risk for Severe COVID-19: West Virginia, 49.3 percent Kentucky, 43.6 percent Arkansas, 43.5 percent Alabama, 43.1 percent Maine, 42.5 percent Mississippi, 42.5 percent Florida, 42.1 percent Louisiana, 42.1 percent Tennessee, 41.6 percent South Carolina, 41.4 percent Percentage of residents 65 and older, or with underlying conditions.
Broward	Recreation	Our Beaches and parks need to be reopened for the physical and mental wellbeing. Our youth need the parks for physical activity. If masks must be worn, that is fine. But we can not continue this way!! Open up the beaches and parks!
Pinellas	Government	It's too early - men still spit on the ground around here. Health clubs should stay closed - the virus circulates on small droplets, through the AC, from talking, and not everyone who works out will wear a mask or gloves. Gym environments are are like hospitals, but with more heavy breathing - it will spread the virus to everyone. Schools should stay closed for the exact same reason. If you can't play volleyball on the beaches, you can't allow schools or gyms to open.
Orange	Real Estate	I own a small real estate company with 7 locations in the area. We need to get this economy open again quickly my company is struggling and we haven't received any payroll protection money yet and it looks like we might never see it due to how many people have applied. I don't want a hand out. I just want the world to open up again and give people the confidence to buy and sell houses. We have remained open as an essential business but we need everything open to get the jobs back and the confidence. Let's be real for a minute. Half of the economy is still out there working and half isn't. I need your help for my business to make it please help me.

AMERICAN OVERSIGHT

Volusia	General	I am very much in favor of a gradual, phased reopening starting in May. Even though I'm over 65 I feel that getting people back to work is just as important as maintaining social distance & masks in public. I think that when weighing the possibility of contracting the virus versus not having food or basic essentials, that the latter poses much more serious consequences. Florida is fortunate to have so many outdoor venues as well as such beautiful weather that getting back to the "new" normal can't come soon enough.
Hernando	General	Florida is not ready to reopen, there are still too many new cases of COVID-19. The curve has not flattened. Also, people are not following the guidelines of staying at home. It needs to be a stronger order. Extend it another two weeks, and watch the level of new cases. Masks in public should be ordered with the extension of the order.
Citrus	General	I am totally opposed to any further delay in opening businesses have been completely destroyed because of a disease that has less than a .05 death rate frankly I'm really disappointed in Ron DeSantis and his lack of leader ship . we need to open now I'm tired of Joe Biden I'm tired of Trump I'm tired Ron DeSantis i'm tired of Nancy Pelosi and the fake PPP business bail out that only went to major corporations you all make me sick you have a unemployment system that is completely collapsed no one has any money you're going to crater this economy and if all you care about your selfish interest you Trump and the Democrats are going to catch blame for this I'm sick of it
