Seminole	Healthcare	Stifling voluntary commerce is by nature authoritarian. We know based on anti-body testing that death rates for those with COVID-19 under 44 y/o are well under 0.1% or less. At minimum, people under 44 should be able to make these decisions for themselves. We all hope older people will express great caution, but they can make up their own minds in the face of data.
Sarasota	Healthcare	ABSOLUTELY NOT! We are NOT on the downward slope yet. I've been unemployed since 3/14 with no income. Can't get unemployment because I'm self employed, didn't get the PPP. However, I'd rather not work and be broke than endanger myself, my family and other because we jumped back in too soon. Listen to the health care workers. They are the ones that should be making this decision. Not politicians.
Miami-Dade	General	Good afternoon, I am a 68 yo woman who WIIL NOT go to anything that you might open UNTIL I feel it is safe for me to go. Except for what's absolutely necessary, food and emergency or urgent care medical services. Business owners care for what they can make if I use their services. My health is not a priority and wouldn't be because if I get sick many other sources can be blamed aside from their business. No one to blame for my illness. Safe for them. Too risky for me. Do not count me among those that will make them richer. First and foremost priority, I want healthcare workers, first responders, and everyone who has made personal sacrifices while following all safety requeriments, regardless of how "inconvenient" they might feel, SAFE. I rather be safe than sorry. I beg you to consider that the health and safety of the many should be prioritzed over either personal/businesses gains or political pressure. FOLLOW SCIENCE, NOT POLITICS when opening the state, PLEASE!!
Miami-Dade	Professional Services	Concern about reopening too soon. People not practicing safe distancing. That being said , we have to open at some point and get back to bss as usual. How do you propose immigration attorneys carry on in light of the President's proclamation.
Lee	General	Yes! Open back up. Enough is enough. Enough fear mongering. Enough drama. Enough scary news and main stream media bullshit. We should never have closed down. This needs to be a surgical strike, not carpet bombing. In more seriously hit areas, things need to be more strict, but those less affected should not also have to suffer. We can still practice social distancing and intelligent precautions. OPEN BACK UP!!!
Collier	Healthcare	I believe we should only reopen absolutely essential services and slowly. Barbers, salons, beaches, restaurants all included, but with limited populations. Elective surgeries should be allowed to resume.

AMERICAN OVERSIGHT

Seminole	Healthcare	While we do need to get our economy up and running, I think it's too soon. I fear a spike, or at least a steady increase, if we open the state too soon. Doctors and dentists can not get any PPE. We need to wait until the end of May.
Pasco	General	Would like the ability to gather in group of 10 or greater using our judgement to connect with friends and family. Would continue with masks in public shopping places. Would like for our restaurants to be able to open outdoor seating. Small steps but necessary Thank you for asking for input
Brevard	Healthcare	Open elective surgeries
Hillsborough	Healthcare	Working in the dental field, there is not enough adequate access to PPE at this time. Lack of PPE coupled with the lack of informed and clear recommendations on safe practices leads me to question a safe reopening at this time, or even in the coming weeks. The WHO just announced today that antibodies do not equate to protection from reinfection so at this time is just seems premature to reopen everything and undue the progress we have made. If history has taught us anything, the second wave will come and it will be worse than the first. Becoming overzealous now with the small gains we have now and reopening will lead to insurmountable loss in the future. As the old adage goes, it's better to be safe than sorry.
Lake	General	Please reopen Florida by the federal guidelines of the "phases." Small businesses did not get government funding as they needed and are my main concern. I think we need to lower unemployment numbers and businesses and employees can also implement their own phases and cleaning procedures as they see fit. I am super concerned with the after effect of so many people staying on unemployment and the government continuing to develop financial assistance programs to people- how will we pay it all back? Overall it should be each individual's decision to be able to shop, eat out, open their business, go back to work and those who don't feel comfortable can stay home. For the most the fear has died down. Businesses like Home Depot, Walmart and Target are packed with people each day who are there just to be out and I will admit we have made a few non essential trips to the store ourselves. If anything, opening back up non essential places will spread these shoppers out more. People can continue to wear masks and sanitize as they see fit. Testing is more available now. Just continue to remind and ask people to stay home and/or get tested if they don't feel well. There will be some selfish people that still go out when they are sick but places can do their own screening for them.
Lee	General	It is absolutely positively insane for there to be any talk whatsoever of opening anything back up at this time. People are dying! And no amount of money is worth that.The virus has not even peaked yet. I am sick of leadership in this state putting big dollar donors and business interests before the welfare of the people. Do your jobs and protect the population!

AMERICAN OVERSIGHT

Orange	General	Please see attached:
Jackson	General	Allow us to fully open. We should be allowed to hang out with friends from work since we are with them every day. We should allow are children to play with there friends. Mentally this isn't helping. Coming from a person with depression, I feel that if this continues sone people may act on there depression. Being with family and friends is what we all want. We don't live in a dictatorship or a fascist country. If people are worried they can stay gone. But we live in the counties in the panhandle that are barley effected by the virus. Several months have passed and only 11 cases here. If not open all of Florida, open county by county
Polk	Education	I'd like to begin by saying the Gov. DeSantis is doing a fantastic job of regulating everything with this pandemic. None of us have ever lived through anything like this and he's doing quite well. As far as opening the state back up, I feel that the Safer at Home order should remain in effect until the end of May; however, restaurants and stores should begin opening little by little. Retailers aren't going to survive otherwise. People should go to those places as we do grocery stores now. I like the idea of the phases and entering into reopening safely. Please, don't rush the opening. COVID-19 is not joke and I prefer not to get it and want my family and friends safe. Please take it slow and put the safety and welfare of the citizens of Florida as number one in all of your decision making. I will be praying for this team that you'll have the guidance and wisdom of God as you go forth and make decisions. Just PLEASE take it slow, be wise!
Brevard	General	My husband and I feel the economy should be reopened the last week of April as first recommended. The projections for deaths are far below once thought. The real threat is now the jobless numbers. Crime will increase, suicides will increase and irreparable damage will be done to the Florida tourism industry. Seniors or those with compromised immunity may feel the need to continue their quarantine, however healthy people should be allowed to live. Children are being affected greatly. Do not discount the voices of the kids who want normalcy. Heat, sun & humidity Kill the virus.... This is FLORIDA. We are known for those 3 things! Open it up, let the herd immunity happen and get PEOPLE BACK TO WORK! THANK YOU FOR ALL YOUR HARD WORK! KEEP FLORIDA GREAT GOVERNOR DESANTIS!! We support you and all our Great leaders of Florida! Thank you kindly for listening to your constituents. God Bless America and God Bless Florida.

AMERICAN OVERSIGHT

Orange	General	I am for re-opening of businesses in Central Florida as soon as possible and general healthcare with the use of masks. Also keeping all venerable to remain at home and likewise those who are sick. My aunt's Martial Arts and Fitness center had to close down permanently due to the financial strain. And many others likewise need to work to live. My mother and brother also have had a financial set back with no unemployment benefits yet. We all need healthcare as well that shouldn't be postponed. Conditions not well treated for causes harm likewise not getting preventative care can be harmful for not detecting health concerns that may be starting. Please consider catefully reopening as soon as possible. These times can also lead to depression, anxiety and suicide or violence in homes.
Hillsborough	Education	Dear Gov. DeSantis, Good afternoon, sir. Thank you for allowing me to express myself and to provide you with feedback relative to re-opening our great state. I believe we need to be careful and listen to our expert health professionals and look at the scientific data to make informed decisions. I believe we need to continue on our current course and wait until we seen a downward trend in COVID cases and deaths, then reconvene for further discussion to review processes and procedures for a strategic and safe reopening. I thoroughly believe that when it comes to the Economy versus Life decision, Life wins everytime. We can not take risks with humankind. I am a high school principal overseeing eLearning and although not the most equitable program right now for our students, it is a safe one which provides flexibility and a continuous education. I'm thankful you have closed schools for the remainder of the year. In closing, we must do what is safe for all. Let's continue to be patient and stay the course under your current orders. Again, thank you for soliciting feedback before making decisions. Stay healthy and safe, Thomas D. Morrill
Columbia	General	Re-open the state already
Palm Beach	General	Please open up the hair and nails services. Home Isolation is tough. My wife and most other woman in my country club community would feel much better emotionally if they looked better. Also golf is a big part of our lives. We live on a golf course. We are in our 70's and are retired. I feel sorry for all those who are suffering. It's time they can back to work. Thank you.

AMERICAN OVERSIGHT

St. Lucie	General	The following should be opened 1st Phase following social distancing in counties with less than 500 active cases: Small businesses with less than 10 employees, especially Stand alone Pet Groomers as many pets require monthly grooming for their health. Bars, Restaurants and Indoor Movie theaters should be opened with limited attendees and social distancing. Phase 2:Large entertainment centers like Disney should be allowed to opened July 1 to Americans with social distancing. International attendees should not be allowed until far in the future. Airlines should be opened to American's with rapid testing and Temp. checks. International travelers need to be restricted until far in the future.
Pinellas	Food	Dear Governor, Step 1 - Extend the stay at home by 15 days until there actually is a decline in our numbers (as of right now we are still climbing). Asses after the extension based on our numbers not pressure from people. Step 2 - If the numbers start to decline open with strict guidelines on the amount of people that are allowed at venues i.e. restaurants, beaches, hair salons, and other facilities. Come up with an amount of people allowed in these facilities at one time...across the board. Step 3 - When these places open require rules that masks are mandatory period. Places will open without that being a guideline and we'll be right back where we started. Step 4 - Be clear that there will be strict consequences if business owners choose to not follow the guidelines. Employees count on their owners in regards to protection and they should be held accountable if they put their employees lives at risk. Create a hotline for employees to make anonymous tips if they feel they are in danger. I am temporarily on unemployment (which I still haven't received). I was a manager at a restaurant and I do plan on going back but they haven't received their PPP so they couldn't keep me on the payroll. With all that being said, I am a hard worker and actually enjoy working but I don't want to return until I feel it is safe. It infuriates me to see people saying if people are on unemployment they will take advantage of it. That statement can be true but there are people like me who are truly afraid of being infected. I can't wait to return to work once I'm sure I am protected. Please consider creating a compliance task force. Creating a task force could be a great way to employ people. A platform for people who aren't working to generate an income at a wage that is livable. Sincerely, Jessica Lea O'Neill

AMERICAN OVERSIGHT

Hillsborough	Healthcare	Please be deliberate and cautious about re-opening the state. Before anything re-opens healthcare workers must have enough PPE at all healthcare facilities and EMS! Testing for COVID and COVID antibodies must be readily available and the population should be surveillance tested to quickly identify increases in transmission so action can be taken. Social distancing should continue to be enforced as well as focus on facial coverings and hand hygiene- hand sanitizer should be widely available everywhere that opens for customers and employees. Businesses must make accommodations for vulnerable populations such as those with chronic health issues or advanced age to work from home or in a safe, distanced environment. Groups should stay limited in size- no concerts, sports, dance clubs, churches etc. Technology should be leveraged to conduct business virtually whenever possible.
Seminole	General	Since the science expert has declared that the virus dies quickly when exposed to the sun, why not open all the beaches (at a proper distance) without any hour restrictions?
Pinellas	Healthcare	Working in the dental field, there is not enough adequate access to PPE at this time. Lack of PPE coupled with the lack of informed and clear recommendations on safe practices leads me to question a safe reopening at this time, or even in the coming weeks. The WHO just announced today that antibodies do not equate to protection from reinfection so at this time is just seems premature to reopen everything and undue the progress we have made. If history has taught us anything, the second wave will come and it will be worse than the first. Becoming overzealous now with the small gains we have now and reopening will lead to insurmountable loss in the future. As the old adage goes, it's better to be safe than sorry.
Broward	General	Florida should NOT be reopened until at a minimum we have over three weeks of flattened curve or no earlier than Mid May. Opening now puts many in danger and will hurt the economy further if we are forced into another quarantine.
Miami-Dade	Government	I live in one of the biggest hotspots in the county of coronavirus numbers and I believe non-essential businesses should not open at this time when number seem to only be spiking up. Opening up nonessential shops will only hurt us more and bring our number even higher to a point that we have to be lockdown all summer long. I believe we should take May to be in quarantine and isolated from others. We might be hurting the government and we might have many of our citizens not getting any income but that's why you guys are here to help us at times of need. TIMES OF EMERGENCY. Many of the fellow citizens in the county that work didn't get stimulus checks because of BS reasons. Something has to change. It's better to be lockdown for a small amount of time instead of risking more infections and risking more time isolated. For the selfish people who are rioting and standing up for THE DUMBEST CAUSE EVER are blatantly wrong and don't have a selfless bone in their body. How could you ignore our healthcare workers who work non stop hours for US. We need help from the government to stay afloat. We need to stay home. We need to lower our numbers. China opened up and it didn't do them any good. Let's not make the same mistake. We already looked dumb as a country when our President didn't take early precautions.

AMERICAN OVERSIGHT

Volusia	Healthcare	Please do not open the state too quickly. Please do it responsibly following the advice of healthcare professionals. More people will be put in danger if the state opens too quickly. Thank you Governor your leadership through this has been good. Please continue the good work for the residents of Florida.
Seminole	General	Please keep us safe! Do not open the sate of Florida! This is not over no where near, if we open up too early it could become a very very bad situation for all Floridians! Please do right by us and keep us closed until we are in the safest zone possible! Heath and life of all Floridians is more important than the economy! Let's not kill us off keep us safe! Thank you
Collier	Healthcare	Dear Governor Desantis, I am a physician and small business owner employing 16 employees in Naples, Florida. Executive order 20-72 prohibiting elective procedures shut us down on March 20. Now that we are over the surge in cases in Florida, I feel it is imperative that we be able to resume operations and bring back all of our employees. I beseech you to please allow us to resume elective procedures as soon as possible, either on May 9th or sooner if possible. We will use all available testing, and all available and recommended protocols and precautions in resuming care of our patients. Thank you for your consideration, Anurag Agarwal, MD
Lake	General	Reopen Lake County. We only have 221 positive cases as of today. Hardly any deaths - thankfully.
Alachua	Healthcare	Let the hospitals and elective surgeries get back to work people need these
Pasco	General	Please proceed with caution and care! I understand the need for people to get back to work, but this can largely be addressed by fixing the unemployment system, and allowing low interest loans to small business owners that couldn't get federal funding. It will be so much worse if we do this too quickly and end up back stuck at home again. The current safer at home ordinance is working, but we're not out of the woods yet. Please continue to encourage people to stay at home. And please, be smarter than Georgia - bowling alleys and barber shops? Places for germs to spread rapidly are not the places to open first! We need to ensure safety, not just make people feel like it's safe through PSAs.

AMERICAN OVERSIGHT

Hillsborough	General	It is far too soon to reopen Florida. Mid may at the earliest is when we should even be considering such a measure. Exemptions should also be made in unemployment laws so that those people who do not feel safe working during a pandemic\have health concerns are allowed to stay home without having to worry about loosing their job\unemployment benefits. Forcing people back to work in an effort to make Florida's employment rate look better to stroke the governors ego is simply unacceptable. There are 330 million Americans and 2 trillion dollars plus another triliion for the stock market was pulled from thin air, and somehow the average American is only getting 1200? We know our elected leaders are in bed with big business, now they arent even trying to hide the massive handout they give the wealthy. Meanwhile those of us who actually make up the vast majority get so little or nothing, and are going to be sent back out to die from a preventable disease just to keep supporting the governors lobbyists bank accounts. This is unacceptable. No to reopening Florida, we will remember your names when we have to bury our friends and family, and if you don't do your part to protect us, we will make sure your names live on in infamy eternally. Think carefully on what you want your legacy to be.
Broward	General	I don’t think it’s a good idea to reopen Florida not for another two three weeks , we have 30thousand people infected and doing it to fast might cause more damage that rewards , this is not a game and you have been playing the game since this pandemic happen not reacting fast enough to close it all down we would Probably be open by now , so not you want to rush everything to open to play with our life’s like you did before closing ! I will not vote for you and people won’t vote for you your don’t care about us people only money on your mind!!
Clay	General	Reopen Florida! It’s essential that we do! Our economy needs it. People that want to stay home can, but give us our rights and life back now!
Okaloosa	General	Please wait a while to open the short term rentals in the panhandle area. Waiting till May 25th for Memorial weekend makes more sense. Our population doubles with the vacation influx. Giving us time to get ourselves organized and start opening our area in an organized manner. We are ready to go just it controlled.
Duval	General	Florida ahould not be reopened until everyone can be tested and provided mssks to be eorn in public. This is the only way to keep people like me a cancer survivor and immune compromised people safe .
Hillsborough	General	Open the states in a waves and when the curve is going down. Close Florida board for another 2 months - NO TURISTS OR VISITORS Pay the unemployment that we applied since March 20.

AMERICAN OVERSIGHT

Duval	General	Thank you for this opportunity. I have prioritized my comments 1. Get more medical and epidemiologist on the task force. Look at the state of Massachusetts and their 5-part response for what appears to be the most scientifically sound approach to stopping the spread of the virus. 2, Start with support and restoration of Agriculture in this state. Far more important that amusement parks and cruise lines. 3. Clearly and specifically define what the New Normal with will look like for office, restaurants, schools, retails, etc. 4. Do not reopen schools in the fall unless there is a highly structured plan that does not put an entire generation at risk because 30 children are in a room side by side, head to head coughing and breathing on each other. 5. The states need to speak loudly to the Federal government about working on a more coordinated plan for this pandemic and those in the future.
Volusia	General	I'm from the forgotten group. I live in volusia county. I've been unemployed for years, I'm disabled, rheumatoid arthritis and cancer - my cancer has returned with 2 new growths in under 6 months since previous surgery. I'm still navigating the nightmare which is social security disability and I don't receive anything yet. I don't file taxes, no income. So as of now I still have not received a stimulus check. I'm fortunate my elderly mother allows me a place to stay. On top of my issues, my mentally disabled adult son was refused access to his home last month in Broward county and he had to walk 80miles until he found a way to contact me and I sent a friend to pick him up and bring him to me. So now I am responsible for feeding him also. He also will not receive a stimulus check because his father wrongfully claimed him as a defendant for 2019 even though my son made too much money. So see, we are the forgotten group yet we are the group who needs the help more than anyone else. I beg of you, please do not reopen the state yet. If you do people will surely NOT follow the distancing guidelines and we will have a worse outbreak. I am the person who does everything in my house, I do all the cooking, shopping, etc. I'm the one with cancer and a compromised immune system. I have to go out, no one and let me repeat, no one, has offered to help me. We are on our own. I fear for my own well being out in public. I'd choose to stay home but I can't, we need essential supplies and food just like everyone else. So why are working folks more important than me? Please please do not reopen the state, countless deaths will surely happen if you do and I fear I will end up one of them. Respectfully, Pamela Davis

AMERICAN OVERSIGHT

Duval	General	In whatever plan is implemented, please make working from home a requirement for companies that do not require on-site workers (such as retail and hospitality). Too many offices are planning to open with minimal or ineffective safeguards in place. Most office jobs can be done remotely and there is no reason to allow employers to unnecessarily jeopardize the well-being of workers who can be just as productive working remotely.
Palm Beach	General	Stay at home orders need to end!!!! These orders are ridiculous and a violation of our constitutional rights! Plus, they make zero sense! I've been in Cybersecurity for over 20 years. We don't just disconnect all systems from the internet for fear of them getting a virus! If we did that, the business could not survive. We segment older machines that cannot be patched, limit their communication to the rest of the internet, monitor them closely and limit who has access to those devices. Humans and human viruses should be treated in that same manner.
Pasco	Professional Services	We feel that professional services like barbers, hair and nail salons should be allowed to open under restrictions official distancing, masks and temperature monitoring. The citizens need some kind of normalcy. Restaurants with outdoor seating available should be allowed to serve. Churches and areas where there are large number of folks should wait until we see what happens with first step. Large beaches should be closely monitored as all the college kids who are not working or in classes will flock back to FL. They don't seem to follow guidelines. Thank you
Escambia	Finance	Please DO NOT open the state up yet. My wife and I both work in mortgage lending. That's all income in home. So, as you can imagine, our household income has taken a hit. But, opening things back up, will lead to another outbreak and will affect things more! I want things open as much as anyone, but want it when it makes sense.
Madison	Tourism	Im live in Daytona Beach Florida and the beach and the events goes on on the beach side like early morning u have joggers walking runners or people who just to enjoy the ocean breeze to get a peace of mind business like pizza Kings the arcade that sell breakfast Hannah tattoos shop that how they make money I miss the scenery my self so please reopen Florida
St. Johns	Government	Government should not reopen businesses until we can all get tested for Covid-19, otherwise we won't really know what we are dealing with and there will undoubtedly be a surge of new cases. SICK PEOPLE CANNOT SHOP!! Thank you. Noreen Davis P.S. By the way, people who claim to be pro-life yet say old people are going to die anyway so it's ok for them to die so our economy can survive, are hypocrites of the highest order and should be ashamed of themselves.

AMERICAN OVERSIGHT

Orange	General	In regards to re-opening Florida. I would strongly suggest a continuation of our current stay at home orders until many more weeks of lower positive cases. April 23 saw just as many new cases as April 3rd across our state - https://fdoh.maps.arcgis.com/apps/opsdashboard/index.html#/8d0de33f260d444c852a615dc7837c86 Until a sustained downward trend of new cases is proven we should not begin considering re-opening. The mere suggestion of relaxing social distancing will cause this number to increase. Perhaps looking at how South Korea has been slowing re-opening (after months) is a better way to propose moving forward.
Flagler	Education	The purpose of sheltering in place was to “flatten the curve”, not to completely prevent the spread. I think the number show that we have more than accomplished that objective. Therefore, it is time to reopen our state and get it’s people back to work and back to life. More lives will be ruined by staying closed than will contract covid19 if we reopen. The people of Florida need our state reopened before we end up in a depression to rival the mortgage crash of 2007/2008. In addition, our children deserve to receive a quality education, not the “education by goggle” that they are receiving now, and will, unfortunately, be receiving the rest if this school year. We must get back to living or it will be the death of us all. Please reopen our state! Thank you, Tammy Sanner
Collier	General	Hello, Thank you for allowing FL citizens to have a voice. Short and sweet, - please allow the voices of the healthcare professionals be heard and heeded - please open beaches and parks - I believe the 3 step process directed by Pres. Trump is a model to follow thank you Cris Buzzanca
Martin	General	Thank you for this platform. I am 70 years old, healthy thank God, and have been sheltering in place. I am concerned not for myself but for the young families where the kids need to go to school, where the parents need to work to pay the bills, etc. I am also concerned for the small family owned restaurants and mom and pop family owned stores. Honestly I could care less about the corporations. Let the healthy go back to doing what they do, using social distancing, etc. and have the ill and/or elderly stay at home. Please give this some consideration. MOST, not all, of the people who have died either had underlying health issues or were overweight. I do agree with the Governor that the counties north and south of Martin need to work together to coordinate a smooth opening. .
Miami-Dade	Recreation	I feel the parks should be opened, so people can still walk and get some outdoor exercise.

AMERICAN OVERSIGHT

Duval	General	Please don’t open anymore of Florida! The Vitus cases WERE decreasing UNTIL the beaches were opened. Now we have to wait until the Beach goers go through the Virus process — recovery or death — which will continue as long as the beaches are open—delaying economic recovery.
Hillsborough	General	To whom it may concern, We need to open the economy now. We still can't manage to pay people unemployment who have over a month ago. If we can't get the people the money that they and their employers paid into the system for these events then let them work. We have at least 50 percent of residents going out in public on a daily basis without any appreciable increase in cases or deaths. All we are doing is destroying businesses and careers people have spent their whole life creating. PLEASE STOP THE MADNESS OF DESTROYING OUR RIGHTS. At some point we will have crossed a line for which we can't come back from and Congress will not be able to print our way out of it.
Duval	Retail	Working retail I can tell you that we are all scared. People are using this shutdown as a free vacation, taking their whole families out to stores to window shop. I know we need to get the economy up and running again, but there is still so much we don't know about this virus. People are walking around who were exposed and don't know it. People are walking around showing little to know symptoms and are exposing others. Every person they expose resets that 14 day clock. I want things back to normal, but we need to do it safely. I say extend it though May and re-evaluate midway though. As people are still not wanting to obey the rules... lighting those rules will only make it worse. And we are still being infected.
Brevard	Government	On April 6th, you were sent a Proposal Titled: Prophylactic Measures and Prevention of COVID-19 by Local Government Action
Hillsborough	General	I work in a hospital and have many ER friends. I feel the hospitals are prepared. People are congregating already.They’re not staying home any longer. People are going to die if its from covid or something else regardless. We need to open back up and allow people to work. I would say all people should wear masks going out and this would be a better policy and clothes and everything for good. It’s time to open back up and let people live their lives
Miami-Dade	Recreation	Please allow local governments to open there beaches for residence only
Broward	Finance	How can you open the stat up when people haven't gotten any of their unemployment benefits? They dont have any money to spend. Please fix the system.
Alachua	General	Gov. Desantis, please open up the economy!! We can do so safely. Gloves masks and distancing can continue. Please. The economy needs to begin again before it's too late. Enough fear! Its more terrifying to think of what an economic crash can cause. People will die then, not from a virus but out of despair. That's worse. Please don't listen to democrats about remaining closed. Listen only to those of us that need our jobs back and for normalcy to have a chance. The virus is not as scary as a total economy collapse. Please. Begin to open!! Thank you sir.

AMERICAN OVERSIGHT

Bay	Food	We need to get back to work!! I work in a sit down restaurant!!!
Duval	General	I think all grocery stores which are deemed essential services, should only allow a specific number of people in the store at once. They should clean all carts after use and have 6ft markers through the store. Use trader Joe's model. The only store I now feel safe shopping in.
Hillsborough	General	Things are hard now, but I fear if things open too quickly thing's May get harder down the road. Loosing a loved one is the hardest thing in the world, but to loose one when it can be prevented would be far worse. Please think about this as you look at the plans for opening FL back up. The Governor is doing a good job.
Miami-Dade	Accommodation	The further we keep the economy closed, the more permanent the economic damage becomes. We exceeded expectations regarding amount of deaths and cases. It is time to open the economy. The longer you keep the economy closed, the more votes the governor and his staff will lose from his base, many of which are business owners and employees. By keeping the economy closed, you are pandering to the wrong base, and are just ruining more lives. We need to save our industries, we cannot just turn off the economy, when the survival rate of this virus is 96%. This is not the Black Plague. Over 200,000+ people lost their jobs in Florida, we cannot keep lying to ourselves that further ruining the economy is a good idea.
Miami-Dade	General	DO NOT REOPEN UNTIL THE STATE IS IN COMPLIANCE WITH GUIDELINES, WHICH IT IS NOT STATEWIDE!!!!0
Duval	General	In whatever plan is implemented, please make working from home a requirement for companies that do not require on-site workers (such as retail and hospitality). Too many offices are planning to open with minimal or ineffective safeguards in place. Most office jobs can be done remotely and there is no reason to allow employers to unnecessarily jeopardize the well-being of workers who can be just as productive working remotely.
Orange	General	Do not open theme parks to full capacity until the end of the year or when Florida sees a significant drop in cases and deaths (we need more testing), open schools in the fall by keeping half the classes online and half the classes in person for college students, open small businesses and recreational activities that can commit to social distancing long term within the next few weeks.
Brevard	Government	At the moment we do not have a cure for this. And the mortality rate is being calculated wrong. The total death's divided by the total infections does give the mortality rate when looking from a historical perspective, but using the same formula while the pandemic is still going on is only accurate if everyone that is currently infected survives with zero additional deaths. When you look at resolved cases two out of three recovered, one out of three died. I say this as a libertarian but Tighten the shutdown restrictions, do not open up until this virus is under control. The citizens of Florida have not taken this seriously because the reports have been of one to three percent mortality rate when in actuality it is closer to 35%.

AMERICAN OVERSIGHT

Clay	General	Please stay the course! Rely on data and science rather than pressure. We all want to stay safe and not get sick. I would rather wait and be safe. Opening up the economy too soon could be disastrous. Maybe consider an additional stimulus or other fiscal or financial measures for those who need it. Please continue to listen to Dr. Birx and Dr. Fauci and other state and federal health professionals and heed their advice. Thank you for not reopening the schools for the rest of the school year. Thank you for assembling a task force of experts in their fields and for listening to them. You are doing a great job in a difficult situation. Keep it up and stay the course.
Pasco	Healthcare	I don't want you reopen till the specialists say we are safe, don't allow in people from other states, still all United have a vaccine or cure
Volusia	Government	Reopen Florida! I support the full reopening in the state of Florida. As a registered voter, tax paying citizen of Florida the numbers do not support a continued shut down! The fear mongering of the media, the draconian measures of government control- it has to stop! Elderly, medically compromised or those wanting to continue living in fear and being controlled can stay home. But healthy individuals who want to work should be able to! I am not required to descend into poverty for anyone. I refuse to participate in "quarantine life" until there's an unsafe, untested vaccine released in eighteen months. I refuse to receive said vaccine to make others feel more safe. I won't set myself--or my children--on fire to keep you warm. We are Allowing fear and policies devoid of scientifically accurate data to destroy Florida and America! We have a constitutional right to take risks! Life is full of bacteria and viruses--many of which spread before symptoms manifest and after they subside. We have a right to receive OR refuse vaccines. Stop allowing the government to destroy: The Food Supply Small Businesses Medical Autonomy Access to Healthcare Religious Gatherings Privacy Rights Fellowship Tourism When the "new normal" is filled with starvation, depression, suicide, child abuse, domestic violence, imprisonment, and pure DESPERATION, the virus is going to look preferable to the world you helped facilitate. Reopen Florida Now!
Leon	General	I live in a rural area at the north end of Tallahassee. Here I believe local restaurants could open with limited customers and with social distancing. Also this should go for hair salons and gyms. Reserving social distancing for these type businesses I believe would keep us afloat here.

AMERICAN OVERSIGHT

Bay	General	I live here in Bay County for over 45 years. Our cases are going up here in the Panhandle yet the beaches open for certain hours and this weekend we have traffic from Alabama Georgia Lousiana Mississippi etc. I am high risk so is my daughter and grandson neither of us is working right now she was laid off and no unemployment coming in I am on workers comp but supposed to go back in May and I am scaried to be out there. There are so many walking around no mask in public places, sneezing, coughing not washing hands acting like its ok. I understand people have to work by anybody in public needs to wear mask. People need to travel within their own state not to other states. Social distancing should be 10 and under unless on beach should be 5 and under. Yesterday their were people out on beach all day we dont3 have manpower to keep them off. Please hear the Panhandles voice. Thank You
Clay	General	We need to open the city /state back up so we can get back to life.
Broward	General	Too early to re-open Florid, especially South Florida. There will be a resurgence if we rush this.
Orange	Healthcare	As of today, Florida's cases are still increasing with 30,839 for the state and 1,304 in Orange County. 76% of Florida voters want PUBLIC HEALTH OFFICIALS, not business leaders, to determine when it is safe to reopen Florida economy. Before officials start reopening the economy in GRADUAL STAGES, we need several more weeks of significantly increasing amounts of testing, testing sites, and to start contact tracing like in other countries. THE CURVE MUST FLATTEN BEFORE ANY MAJOR REOPENINGS. REOPENING TOO SOON WOULD LEAD TO A MAJOR INCREASE IN CASES, LOSSES OF LIFE, AND WOULD HURT THE ECONOMY EVEN MORE.
Hardee	General	The state should not re open until there is testing available for everyone and there has been a substantial decrease in cases. The social distancing should be enforced.
Pinellas	General	This lockdown is causing significant societal and financial damage. It is clear the curve has been very flattened in most areas of Florida. Suggest that by county (except for Miami area) have Phase 1 reopen on May 1st. Get restaurants and gyms open May 8th. It is bad public policy to continue a lockdown where the mortality rate is now know to be approximately 0.4%. Have high risk individuals continue to shelter. However, more long term problems will come from the poverty that is being created including suicide, significant depression and long term financial damage to small business owners and those in hospitality if this shutdown continues without valid medical reasons. Use Georgia as an example and let's get Florida open ASAP!

AMERICAN OVERSIGHT

Lee	Government	I support the full reopening in the state of Florida. As a small business owner, a registered voter, and a tax paying citizen of Florida I do not support a continued shut down! The fear mongering of the media and the draconian measures of government control has to stop! My constitutional right to pursue liberty, freedom and the pursuit of happiness is being unjustly infringed upon! Those wanting to continue living in fear and being controlled can stay home but healthy individuals who want to work should be able to! Your fear should not control my liberty and freedom! I refuse to descend into poverty and allow my business I have spent over a decade building disappear. I refuse to participate in the unconstitutional oppression of my freedom by state and local government. I refuse to wait for or receive an unsafe, untested vaccine for a virus that has already mutated over 30 times and has a 0.0001% mortality rate. We are allowing fear and politics devoid of scientifically accurate data to destroy Florida and America! I believe in liberty NOT tyranny! I will not allow my constitutional rights to be infringed upon. I know there are many others that share my beliefs and we will STAND UP and FIGHT FOR OUR RIGHTS if you force us! Stop allowing the government to destroy: The Food Supply Small Businesses Medical Autonomy Access to Healthcare Religious Gatherings Privacy Rights Fellowship Tourism Reopen Florida Now!!
Hillsborough	Healthcare	Governor DeSantis, please follow the advice of scientists and doctors when considering when to open back up the Florida economy. If you open too soon and cases spike, you will ruin the very economy we are all concerned about. We need accurate testing so you can make an educated decision based on real DATA. Only 1% of the population has been tested. Uncertainty will surely kill the economy if people don't feel safe whether things are reopened or not. We also need contact tracing to catch any outbreaks before they go wild in any specific community. The virus doesn't care if you are a Democrat or a Republican. It doesn't have a political preference. Please follow the science.
Hillsborough	General	Every one of us in anxious to reopen our state, restore our economy and get back to our lives. It is imperative that this decision be made with medical experts leading the way. Obviously, the business community will have a huge role to play in getting Florida back on its feet, but if we get the medical science wrong, we could be doomed to fight this virus for a long time to come, costing lives and prolonging economic devastation. Please let the medical science community lead the way as we cautiously consider reopening the state.
Pinellas	Government	CLOSED till scientific backings support residents will be reasonably safe to resume life with face masks n keep 6 ft distance from eavh other

AMERICAN OVERSIGHT

Martin	General	Use this opportunity to educate and validate Florida as a Constitutional State. Rollout a re Commitment to Individual Rights and Liberty and individual responsibility of each of its citizens Freedoms to go about their lives and business without approval and subsidies from Government. Open all business's with suggestions of responsibilities of customers and their business's as Enter and do business at your own risk. Post signage (voluntarily) and suggest those over 50 and or immune Compromised self isolate or take on the risk themselves, NO MORE Spreading individual risk and responsibility onto the Whole of our Society! Open schools with the same suggested guidelines, lift compulsory attendance and leave in place online as an option. Id rather you open up society with the promise to NEVER overstep again rather than extend this compounding Unemployment and unavailable payments then have to continue NOT delivering as UI has promised. We Must Get the size and scope of all levels of Government back into our Founding documents Dec of Independence and the US Constitution and stop pretending its a Concierge service to All! Since I have been furloughed with No Promise of rehire, I have plenty of time and experience if you need any help further! Please reach out for any input or help. Thank you RJ P
Hillsborough	Professional Services	Thank you!! I feel you should allow hairdressers and salons to open. I also feel that condominium pools should open. I think stores could open, we need to bring back making people feel good. We live in paradise but we aren't allowed to go to beaches allow FL residents access to beaches, we could show a drivers license. Thank you for all your doing!!
Lee	General	As an essential worker who has to go to work everyday, it infuriates me to see all of the people out and about throughout the day instead of staying home. Please remove the politics and shut us down so this will clear up. Committing halfway is only mildly effective. Will we get through this and recover a lot faster if we just commit to staying home for now. I am asking that we continue with the safer at home order at least through the Summer. And please enforce the guidelines. Thank you.
Sarasota	Healthcare	Our hospitals are not overcrowded due to Cvirus, but as a result of the shutdown and elimination of elective surgeries, ARE severely damaged economically. Likewise, patients such as myself are adversely affected by having to postpone needed surgeries. It is time to reopen hospitals for elective surgeries, especially in cities with minimum C19 cases such as Sarasota. It can and will be done safely.

AMERICAN OVERSIGHT

Orange	General	In answer to your inquiry, WAIT FOR A VACCINE. OUR PRESIDENT DOESN'T ACT LIKE ONE AND IS DANGEROUS. Gov DeSantis is reasonable can talk without a script and I have to defend him on Facebook where I without profanity, use humor and sometimes scripture to resist the present admin; specifically, our president and McConnell who are very NOT For the People, By the People at all. Simply in it for themselves and a very "smug" attitude which is unspiritual and condescending. You asked, and I have humbly answered. I hope this helps Frank Patterson Democrat, reluctantly. I am a citizen of the Earth. Unity Consciousness
Marion	Education	Please consider keeping Florida learning virtual/remote until there is Scientific data that supports the safety of return. Going back to a large high school campus with 1,200 students (25 to a class) there is no social distancing going on. As a teacher, I very much miss my students and I know being on campus is ideal. But not if it's not safe. Please, please do not open schools before there is a turning point in this pandemic and we can go back safely. It's not worth lives. Thank you for your consideration of my input.
Broward	General	Do not re open the state unless it is an essential business until we have a better handle on the corona virus. Every day more and more people are dying and if we reopen people will become complacent and soon distancing we'll be relaxed and the number of positive cases and death will rise again. Let's get the antibodies testing done across the board so that people who are more susceptible can be identified, stay home and get government assistance to those people. Keep the state closed until the number of cases and deaths really decline!!!
Manatee	Real Estate	I think the State should be opened very slowly starting May 1. 1. retail / all retail, malls and small business Continue with social distance rules, masks and gloves optional 2. Hospitals, Doctor's offices, vet clinics, etc. with guidelines 3. Car washes 4. Restaurants with Seating, use guidelines, half capacitor a while 5. Hair Salons with guidelines 6. Real Estate still optional, people do not want strangers in their homes for showings. 7. Nail salons and Massage, wait 60 days to see how virus reacts , I feel those business Entities are too close for safe distance. Please pay everyone their unemployment, we are desperate. Thank You.

AMERICAN OVERSIGHT

Sumter	General	To whom it may concern, I am a senior citizen aged 74 and have lived in Florida since 1989. I understand you are considering re-opening Florida with regards to the Coronavirus. I respectfully ask that you please follow the recommendations of qualified health care and infectious disease professionals. To re-open the state prematurely would cause a resurgence of this deadly virus. I can only be responsible for my husband and myself. I cannot be responsible for those that do not follow the rules and regulations. I believe reopening too soon will spread this deadly disease. I understand the need to start the economy back up, but I also understand that it would be better to put lives before state revenues. Economies will recover, dead citizens will not. I hope Florida, its politicians, and the Reopen Florida Task-Force will take the actions that are best for its citizens and not what is best for the self interest of those involved. I implore you to err on the side of caution and not reopen Florida until the health professionals advise to. Thank you, Andrea Lawson
Sarasota	General	I am 35 and by nature a very social person who needs to keep moving and be out and about in life. On the flip side, as a DC resident living in quarantine with my 70-year-old parents in Sarasota, I am very cognizant of the fact that it isn't just my health I have to worry about. Therein lies the problem -- and ultimately the solution: COMPROMISE. This is unprecedented time in our lives. Clearly, this is a very serious situation and a highly contagious disease that we don't know much about. But the flip side of that is ensuring that the cure is not worse than the disease. We need to figure out things that can be managed safety -- and fast, because I can't imagine I'm the only one going through the usual emotions of anxiety, frustration, fear, and depression (to name a few). It's exhausting hearing all of these people ripping on Floridians for hitting the beaches. The truth is, beaches are exponentially safer than, say, grocery stores. With heat and sunshine (hopefully) providing some sort of protection, if we can monitor large groups on the beach, this is absolutely worth having open. (Side note: my hunch is a lot of the Florida beach-goer hatred comes from jealousy.) The same goes for tennis courts. Two players standing 20 feet apart hitting a ball does not seem the least bit dangerous, provided you're careful not to touch your face too much during the match. Obviously, Florida felt that way about golf, so why not tennis? And of course, gyms. I understand there is a risk with gyms, certainly. But what is the one thing people always tell you to do when feeling frustrated or anxious or upset? "Go to the gym." Instead of just taking a walk or watching an online workout, we need somewhere familiar and comfortable to release our frustrations, and again, if gyms can be as health-conscious as possible, they need to open ASAP. Its obvious life will not truly go back to the way it was until 2021, but I believe we can salvage some of 2020 by taking small steps. Some states need to step up and be willing to be the first to reopen and take the risks that others are afraid to. Ultimately, those that go back to patronizing businesses will do so at their own risk, and that
Pasco	General	Barber shops, beauty salons, pet grooming, condo/mobile home park pools Restaurants with limited seating,

AMERICAN OVERSIGHT

Manatee	General	Ladies and Gentlemen, I submit the following suggestions for the reopening of Florida. 1. Participation by citizens in reopening is voluntary. If you are uncomfortable returning to a 'normal' way of life, by all means continue to quarantine YOURSELF, not the rest of the citizenry. 2. Reopen retail, gyms, salons, dentists with sanitary requirements in place. Again, if a citizen chooses not to go to a salon or a dentist, they are free to remain in place. 3. Restaurants should open at 50% capacity initially. These are businesses that people have invested their life savings to achieve, PLEASE allow them to function. It will undoubtably take some time for 100% of the population to resume restaurant dining, which is probably a benefit. 4. Hotels should reopen asap with sanitation requirements in place. This will encourage Floridians to travel within Florida. 5. It is not necessary to carpet bomb the state when a strategic strike is more effective and results in less collateral damage. Therefore I suggest an initial period of observation on the effectiveness of the above followed by STRATEGIC REACTION, i.e. further loosening where safely indicated. Respectfully, Janice Falk
Brevard	General	Allow businesses to re-open! Businesses should operate in a manner that allows for "social distancing." For example, limit the number of customers inside the establishment. Encourage everyone to take reasonable/appropriate precautions when in public. Encourage, but do not require, high-risk individuals to minimize/limit interactions with the general population. Again, let businesses open!
Orange	General	Re-open our state fully. Open the stores, the restaurants, the attractions, the theme parks, the parks and beaches. Open them all and open them NOW. Closing them was unconstitutional from the get-go. If people want to wear masks, let them. If they don't, that's fine too. Make provisions for families who have vulnerable family members in their homes but get the rest of the state up and running again.
Brevard	General	Do not open the state of Florida. Please pay the people that have submitted for unemployment, we need it. And cancel school. We are going through a lot right now.

AMERICAN OVERSIGHT

Lake	Recreation	Beaches should be 100% open! People should be able to lay out as they choose with their own family. I understand it's not spring break conditions but sitting in a beach chair watching your child build Sandcastle's should not be a problem for anyone! Your killing Airbnb and a host of other rental avenues for people that depend on rental income. I think Disney should open in June and restaurants should be open now. Maybe 50% capacity in May before capacity by June 1. This cannot continue to cripple the residents of Florida. The people screaming to stay closed are those getting welfare, government money and extra unemployment. Those people should not be allowed to continue to stay home, collect checks and complain. We are a capitalist society and need businesses in order to have a tax base. Government needs to stop and look at how bad your hurting the taxpayer. The entire state should be fully functioning by 6/1
Clay	General	I think the state should only be reopened once there are ZERO new cases, ZERO deaths for a straight 14 days from COVID 19. Otherwise, being tucked away in my house for over a month quill have been for nothing. Not to mention, you want to open all businesses, but my kids can't go to school? That's crap.
St. Johns	General	I believe we should not re open non essential businesses or schools until there are more than enough available masks and COVID test kits that are easily accessible for everyone. There should also be guidelines for each sect of business that can be enforced strictly.
Sarasota	Healthcare	Of course people want to re-open the state, but it isn't time yet. The decision needs to be based on public health data and information a not on public opinion. We don't even have good data yet because so many have not been tested so we don't know how prevalent it is. Our cases may be less than anticipated because people are staying home - so it means that's working, The danger of re-opening too soon is that cases could spike and be much worse.
Charlotte	Government	Please reopen business as soon as possible. Everyone is beginning to understand what's been pretty obvious all along, most people have already been exposed the the virus. As testing increasingly confirms that, it's also becoming increasingly obvious most infected will either be asymptomatic or will experience only mild symptoms. Unless the virus suddenly becomes more dangerous we need to get life back to normal.
Lee	General	In order to safely reopen Florida, people need to be required to wear masks when out in public. Many people already too but too many do not. Publix and other chains are requiring employees to wear masks. Why shouldn't everyone else? There are so many elderly people in this state- we have to do everything we can to keep the number of infections and deaths down. Asking people to do something will only ensure a portion of people all comply. Making it mandatory is the only was to ensure everyone will follow. People will not return to normal habits that will bolster the economy if they feel unsafe. Wearing masks is a small thing everyone can do to make everyone feel safer. The last thing we want is for this virus to flare up again putting us all back under stay at home orders. Masks are a must.
Hillsborough	Real Estate	We have 2 rental properties that are vacant and need tenants to have cash flow. Please open back open.

AMERICAN OVERSIGHT

Lake	General	I have been staying home for a month and a half. I have just about had it. Plus I already lost my job. Now I have to deal with an Unemployment that like all gov"t places doesn't work either!!!! You people need not to listen to all these so call scientists. Next when congress gets money that doesn't pertain to the virus, that's enough!!! All this is going to kill Florida's economy. So open up all fo Florida.
Pinellas	General	I think it's too soon to reopen businesses or anything in Florida. I think things should stay just like they are especially since the virus cases are not declining and today CDC released new symptoms meaning people may have the virus but didn't know it cause they were going by the previous symptoms and that means we are still learning about this virus so definitely I do not agree with reopening or changing anything and no matter what I still plan to stay home as much as possible and not jeopardize my families health which is what you are doing by reopening things. Several of my coworkers agree with it's to soon. Do not call me but you can email me.
Orange	Tourism	I do walking tours all around central Florida. I am happy to adjust what I offer to meet whatever guidelines are going to come out of this - I just want to be sure that there are going to be guidelines to follow. I take groups of people (usually between 2-20) to various locations, both indoors and outdoors. I want to know specifics for nonessential businesses, such as when we can resume operations, the max group size allowable, etc - so that when it is allowed I am able to resume operations.
Collier	Food	I'm a hard worker young adult with 2 jobs I serve. I didn't save my money up to sit at home and not wrk and be ambitious and hustle and grow. You all are trapping the younger generations that want to work and grow and become better for the future
Volusia	General	The state needs to be re opened. We can't wait for the threat of COVID 19 to be gone before we re open. If we wait much longer there won't be anything to return to! Our economy won't survive. The nation needs to re open! Florida needs to re open.
Orange	Healthcare	As of today, Florida's cases are still increasing with 30,839 for the state and 1,304 in Orange County. 76% of Florida voters want PUBLIC HEALTH OFFICIALS, not business leaders, to determine when it is safe to reopen Florida economy. Before officials start reopening the economy in GRADUAL STAGES, we need several more weeks of significantly increasing amounts of testing, testing sites, and to start contact tracing like in other countries. THE CURVE MUST FLATTEN BEFORE ANY MAJOR REOPENINGS. REOPENING TOO SOON WOULD LEAD TO A MAJOR INCREASE IN CASES, LOSSES OF LIFE, AND WOULD HURT THE ECONOMY EVEN MORE.
Collier	Food	I don't believe we are ready to open Florida just yet.

AMERICAN OVERSIGHT

Lee	General	We are not ready to safely reopen the state for business as usual, and reopening prematurely will cause a second spike in infections. I give private music lessons to students in small enclosed rooms in which it is impossible to keep a six foot distance from the student, using the same piano keyboard that many other people have touched with bare hands that day. We have successfully transitioned to all online video lessons, yet despite the dangers of in person lessons and the success and ease with which we can conduct online lessons, I still got an email today from our studio manager talking about resuming in person lessons on May 1st. We need a continued stay at home order so that small nonessential businesses can't force their employees to come back to work before it is safe to do so.
Hillsborough	General	I think this city, Tampa, this county Hillsborough, and the state Florida has done an excellent job in starting to flattened this curve of the COVID-19 virus. However I feel very strongly that if we hurry the reopening of any part of the state of Florida. It will only intensify the virus more and all this hard work and distancing will have been for nothing. I feel we need to get our economy back up and running yes absolutely. However right this minute isn't the time. 30 more days is not going to be that detrimental. Get folks back to work where we can, help businesses that need employees advertise temporary positions to help those that can work. Most of all spend some state money and get a computer program that's not so antiquated to run the unemployment system and help those that need it. Let farmers sell their products directly to the public in open areas like fair grounds so folks can get fresh produce or even eggs, milk and maybe meats. There are ways to help everyone if we work together Thank you for the opportunity to share my thoughts.
Seminole	General	Please consider the harm reopening Florida will do. Things are hard for everyone at the moment but reopening nonessential businesses and allowing social distancing will just cause another spike and another lock down later in the year. As a State we need to think about us as a group rather than individual needs. Sacrificing a few weeks of non essential actions like hair cuts, going to restaurants, and theme parks is what we should be doing to preserve the lives of fellow americans. We cannot be selfish. The economy will recover but we cannot bring back those who will die. Please ask yourself, how many men, women, and children are you willing sacrifice for the sake or the economy. If you can produce a number, then by all means, tell the people and reopen Florida.

AMERICAN OVERSIGHT

Brevard	Real Estate	I'm a real estate agent, but I'm also a wife and mom. Our family's income has been disrupted by this, as many have. I've also worked in the medical field in the past and have read many scientific papers from a broad array of sources and have seen that the death rate is much lower than previously indicated and continuing to go down as we test more and more. Pandora is out of the box. There's no way to stop this thing now and we need herd immunity. I expect there will be a resurgence when we leave our homes and that's to be expected. But we can't go on living like this, we will surely all go bankrupt. It's unsustainable for not only my family but so many others. I suspect the people asking you to stay closed are either making more on unemployment than they did working, or their checks have not been affected so far. It's easy to stay home when you get to do less and make more... PLEASE... reopen Florida before we lose more lives to suicide than COVID ever thought of taking.
Miami-Dade	Healthcare	Buenas tardes, no creo que sea una buena idea abrir cuando todavia cuando en realidad no ha parado el contagio y son miles los que estan infectados dia a dia, creo que si hemos hecho bien la Cuarentena pero todavia no hemos podido reducir el porcentaje lo unico que vamos hacer es tener que volver para atras y ahi si que vamos a segue demorando el arranque del pais
Seminole	General	Please do not re-open the economy yet. Florida has a significant elderly population that must be protected. Maintain restrictions until testing is widespread and easily obtainable by all so that areas of concern can be identified and isolated.
Okaloosa	Tourism	Please open up and let the smart people show how we can practice social distancing. I manage/own single family homes and have family's asking to come and practice social distancing here. They are repeat guests who will help the local economy and help save me from bankruptcy bringing in some rent money. They won't be around others like a condo building! No lobby. No elevator. Very safe! I have excellent housekeepers to clean these homes between guests. Please allow short term rentals please!

AMERICAN OVERSIGHT

Volusia	Finance	OPEN OUR STATE AND COUNTRY.. We have better understanding virus and can contain and control local outbreaks Worth risk to reopen Safeguard, monitor and contain nursing home outbreaks..move corona virus patients to a separated section or central area facility. Isolate and monitor and test new admissions. Theatres, sporting arenas concerts..For now have elderly and immunosuppressed refrain for going..online/tv option..temporary.. .masks hand washing for everyone Movie theatres and restaurants open select hours elderly and immune suppressed..not everyone can eat out everyday or see movie...stagger..temporary Salons...appointments..disposable/washable capes, gloves, masks both workers and patrons, plexiglass partition manicures...business creativity Allow elective surgeries now..hospitals across state and country holding beds empty just in case. We have back up facilitates in place. Hospitals losing millions revenue and furloughing nurses and . Medical personnel around the country...NYC did not thankfully need all jackets cry and comfort ship Relate our reps and Sen NOT TO DO BILL bail out states already having existing retirement plans with prior shortfalls..current corona related cost only. One fire dept shown on tv today agreed as a unit to take 10% cut pay avoid some being furloughs. States need review budgets. Fed govt CANNOT keep passing anymore bills til see how money so being utilized and businesses open up. Save our state and our country. Bless president trump for his leadership..no one else could have pulled it all together as fast as he did. OPEN UP..MONITOR..CONTAIN AS NEEDED.
Orange	General	Just open up florida already!!' We are grown adults we are not owned by ANYONE. People that are afraid because of all this fear mongering you all have done to the people well they can just stay home and keep collecting all the free money..... oh wait ..... they haven't gotten that either..... oh well that's their problem and yours. Others need to get to work we don't get free handouts

AMERICAN OVERSIGHT

Brevard	Government	I can't believe that Rick Scott called the people of Floridawho are suffering greatly from this pandemic a bunch of slackers that would refuse to go back to work so they could mooch off the government. What a total loser he is. You as our governor should call him out on this issue. We Floridians need the assistance given to us by the federal government to get through this pandemic. For Rick Scott to call the hard working citizens of Florida slackers and moochers is unforgivable. He will not receive many of our votes when he is up for re-elction. It is one thing to be mindful of the taxpayers dollar but it is something entirely different to withhold aid that is so desperately needed by your constituents so they can survive. Stand up to these misguided morons and get us the help we need. DO NOT reopen Florida until we are ready. Our state is unique and can not just start letting people roam freely until the testing and contact tracking are in place and we meet the required 14 days of declining new confirmed caes. Please keep us safe.
Palm Beach	Recreation	Please don't open yet. Work on helping us with freezing rent and mortgages so people can stay home and be safe. No life is expendable. No age group is safe. We all have families and loved ones and we don't want to loose them, or have them loose us. If we know we have a roof over our heads secured and that we can get food we will be still. See what is happening to places that didn't shut down. FL (much less US) has not even reached the peak of infections. No it's not same as dying of other causes, bcs science and laws have (and keep doing) everything possible to save lives in every way. Don't throw your hands up in the air on this.
Brevard	General	I believe we should have a plan to open the entire state by no later than June 1 It is important to not lose our small businesses we rely on and also for the mental well being of the population Divide the state into Four sections Apply social distancing and mask requirements to continue good infection control practices . Open one section every week and travel of Floridians can only be to those opened Restrict any travel to state from out if state until July 1 so the openings each week can be assessed with data Let Florida show the rest of the country how it is done
Hillsborough	Healthcare	"Re-opening of the state should not even be considered until we have sufficient testing completed and tracing procedures in place. As an RN, I find the testing levels to date in the state reprehensible and evidence of a total dereliction of duty on the part of the Governor. You, sir have utterly failed the citizens of Florida (if you had any ethics you would resign immediately).
Escambia	General	Would like to see the economy reopened as soon as possible . . . restaurants, beaches, hair salons, barbers, nail salons, small shops, etc.

AMERICAN OVERSIGHT

Lake	General	I've lived in this county for most of my life and it's scary how much change has taken over. Considering that this is a county that practices traditions and are scared of change, several people have been forced to chance their daily lives. For me personally, I'm a student and a teenager who has been stripped of teenage opportunities. Not being able to see anyone or even go to the stores. I suggest we open more businesses up so we can at least decrease the unemployment rate in Florida. We can practice social distancing still and I strongly encourage it. But I think May 1st everything should try to get back to its normal state. For the sake of everyone's sanity.
Lake	Recreation	Reopen Lake County.
Pinellas	General	I have seen very little health impact in Dunedin, and Pinellas County. I have witnessed more business and employee hardship. I had to let go of half of my staff (14 people out of work, some who have been with the company for 7 years). And when we see only a handful of COVID cases and zero deaths in Dunedin... we all wonder why we're on lock down. Businesses pay the taxes that fund local, state and federal government. We got hit first (financially) but State level will get hit next, if we can't get back to work. OPEN UP FLORIDA!
Polk	General	I do not think we should open up yet. I feel it would be a disaster and people would be over confident. I think they should open gradually or our numbers will skyrocket as people will be over confident and not take precautions.
Orange	Healthcare	As of today, Florida's cases are still increasing with 30,839 for the state and 1,304 in Orange County. 76% of Florida voters want PUBLIC HEALTH OFFICIALS, not business leaders, to determine when it is safe to reopen Florida economy. Before officials start reopening the economy in GRADUAL STAGES, we need several more weeks of significantly increasing amounts of testing, testing sites, and to start contact tracing like in other countries. THE CURVE MUST FLATTEN BEFORE ANY MAJOR REOPENINGS. REOPENING TOO SOON WOULD LEAD TO A MAJOR INCREASE IN CASES, LOSSES OF LIFE, AND WOULD HURT THE ECONOMY EVEN MORE.
Osceola	General	Don't reopen so soon! More people are going to die than need be.

AMERICAN OVERSIGHT

Manatee	Healthcare	I am concerned about the reopening of our state. As a high risk healthcare professional working in Anesthesia, I feel that our state and health care facilities need more testing and tracing to figure out how to contain the spread before entering Phase 1. There should be input from medical professionals on this task force. Front line providers as well as epidemiologists who can speak to the what is actually happening each day should be consulted. All of our patients & one family member should be tested at our facility prior to having surgery. This would help keep the staff safe as well as the community. Especially in my facility, children can be asymptomatic carriers and spreading the virus to others. I am also a concerned parent and am thankful that my children can continue distance learning. Lastly, I am also a business owner. I understand that I am losing money each day. However, I understand the need for safety above all. It is imperative that we are smart, cautious and methodical in the approach of how to reopen.
Manatee	Education	As a higher education professional, with elderly family members and children going to college, I request that the Safer at Home order be extended, to be reevaluated at a later date. Not only we are not passed the peak, but allowing non-essential activities to take place will counter all the good we were able to do by staying at home until now. Most of us are supporting our local economy as much as possible from home, and we will make sure to provide more support once we reopen, along with whatever assistance the government can provide, but lives are more important than business. Thank you.
Manatee	Healthcare	Probably better open at end of April with controls (everyone cover mouth & nose, physical separation, etc.) , or else a large percentage of people will start doing it themselves - will-nilly, etc.). (retired MD)

AMERICAN OVERSIGHT

Lee	Recreation	Greetings, thank you for the portal! I own and operate a martial arts school and just had a meeting with my instructors regarding the reopening of the school pending on future State guidelines and restrictions. At this time we are basing our entire concept of sanitation, planning and operation on the German Guidelines for open businesses currently in effect. We concluded that the low number of CV occurrences in Germany are directly related to the guidelines in place. We are confident, that we can adjust the guidelines to fit the operation of our school in a safe and reliable way. Awaiting any Florida guidelines and regulations, we recommend considering the German recommendations and requirements for the business opening phase, as well as legal ramifications in connection with the Covid-19. The websites are in German language: Topics: https://www.dihk.de/de/aktuelles-und-presse/coronavirus/faq-19594 Hygiene guidelines for operating businesses: https://www.ihk-muenchen.de/corona-unternehmen-hygiene/ Kindest regards, Dorothy Schmitz, Eagle Martial Arts of Bonita Springs
Manatee	General	I dont think Florida should re open till the CDC and helth dept says. Schools are closed for the rest of the year. And the state should stay closed. We cant protect families and friends if you allow people to go to parks and all that.. my mom is on oxygen and my grandma is 76 years old. If you re open i fear it will just spike and we will lose more people then we need to. I know people and businesses are hurting from not working and being open, but isnt life more important? It is to me and my family. Thank you
Lake	General	Reopen May 1st.
Duval	Professional Services	Florida needs to be open for business. I can’t pay my bills or feed my family. This is killing my livelihood. We need to get back to work. This whole thing is a ploy by the Democrats to ensure Trump doesn’t get voted back in.
Pinellas	General	I know businesses are hurting. My son and I are hurting, but we're alive. I'm extremely compromised. I believe I'm still here, untouched by this virus, is because of stay at home. Please, open slowly, still maintain social distancing. I will wear my mask in public and do everything I need to do to stay safe. Open outdoor activities, people need some of their freedoms back.

AMERICAN OVERSIGHT

Seminole	Education	I am a private tutor because our education system is awful and needs a complete overhaul. This state is NOT ready to be reopen, we cannot and should not reopen until there are more tests available, those that have lost their health insurance have access to healthcare, and there is a vaccine. I have several friends that had symptoms of COVID 19, were not allowed to get tested, and were forced to work, even with symptoms. We are now finding ESSENTIAL EMPLOYEES who are JUST NOW being diagnosed with the virus and they have been working and around the public for WEEKS. This is UNSAFE and reopening any state at this point in time is a death sentence to thousands of YOUR citizens. IT IS NOT SAFE. DO NOT OPEN THE STATE. GIVE THOSE WHO ARE UNEMPLOYED THEIR MONEY. GIVE US HEALTHCARE. GIVE US OUR CONSTITUTIONAL RIGHTS. SAVE US. ALLOW US THE CHANCE TO HAVE A HEALTHY LIFE, A PURSUIT OF HAPPINESS. DO!!! NOT!!! REOPEN!!! FLORIDA!!!!!!!!!!!!
Lake	Healthcare	Gyms and fitness places should be reopened. America is obese. Motivation to workout from home jsnt there for everyone. Reopen gyms!!
Brevard	General	Florida should be reopened immediately and without any restrictions on businesses or individuals. Our hospital system is not overwhelmed and we have the capacity to care for our citizens. Individual citizens and individual business owners should be given the responsibility to make decisions for themselves and their own care and well being. With the state fully open for business, every individual will still have the right to stay home and isolate themselves indefinitely. The current situation of having the state shutdown and tourists shunned is unsustainable. A limited reopening will be just as bad with thousands of businesses failing. Tremendous damage has already been done to the citizens of Florida... both economically and psychologically. The only approach that will stop the bleeding and minimize further damage is a full reopening of the state and restoration of people's rights and allow each individual to choose for themselves what precautions they do or do not need to take.
Manatee	General	I have been aware of COVID-19 and its affects going back to when the crisis first came to light in China. I am very concerned for my health as well as that of my family including elderly relatives. That being said, though, I think that given what we know about COVID-19 and that our community awareness regarding hygiene and precautionary measures has increased along with hospital preparedness it is time to permit people to get back to work while practicing common sense measures. Thank you.
Orange	General	The virus has shown that it is not as bad as the media hype. The people of Florida are able to take care of. Themselves without the Government babysitting them! It is long past time to relax all unconstitutional restrictions and let us be responsible for Ourselves!!

AMERICAN OVERSIGHT

Volusia	General	I think we should be slow to open and keep an eye on everything. I especially don't want the theme parks to rush to open and have an influx of people. I think elective surgeries should be slowly reopened with a select number per day per place. I think restaurants should remain take out for a time as the same server serves many different tables. I think when salons and massage therapists reopen there should be select number of people allowed with staggered times and waits for proper cleaning. Same with occupational, physical, speech, talk therapies. I think as much as possible should remain online and that bosses should not be able to release or fire workers who wish to remain on telework for a time. I think stores should remain at limited opening and spaced checkouts.
Collier	Real Estate	Numbers of cases and deaths are low! People are at Walmart Sams Target Publix in droves. Open industry, business, beaches travel with a strong hygiene and strong distancing directives. If people want to stay in quarantine more power to them - if they do so it's their own at risk. We are not high density! County government will not act without the state taking action! The economic damage is unfathomable! Free sunny air will be more protective to our community than indoor a/c in a depressed state!
Clay	General	My family and I have done our share and have stayed at home. I am now concerned of my son's mental health if this goes on any longer. It's time to open everything. It should be a personal CHOICE if someone wants to go out or stay inside. OPEN FLORIDA.
Lee	Healthcare	I would encourage the re-start of elective surgery. Many waiting patients are in great pain and need surgery for relief. Hospitals should know better than anyplace how to protect patients and the certainly need the revenue to continue in business. I, for one, would not be concerned about the safety of elective surgery at this time (4-25-20).
Polk	General	Keep us closed and keep us safe we can't get rid of the virus if people are allowed to go out and spread it people have no regard for others and don't give a shit about no one else but themselves until they get it or someone they love then thay want to cray that nothing has been done so please for all the old people kids and people with weak immune systems keep Florida closed until we see this virus decreasing and less report's of sickness and deaths it's hard and scary enough to even go to the store to get food now and if u reopen the state it will be even worse idk about you but I don't wanna die of this virus Because some people are just assholes and have no regard for others
Marion	General	Opening up is fine,as long as people wear mask and maintain 6ft social distancing, wash hands dont touch your face,but the public doesn't need gloves,just wash hands often
Walton	General	Please do everything you can to open us up, and the beaches. Look at the hospital /death rate and and long as that is under control we should be good to go. The ones screaming not to open are the ones that don't have to work. We need to and will have to get back to work soon. Please don't abandon those that need their right to make a living.

AMERICAN OVERSIGHT

Lee	Management	"I am HORRIFIED about reopening FL at this time without adequate testing in place! We have NO idea how extensive this virus is in Florida. There are MANY Floridians who've isolated themselves who have NO idea whether their symptoms were from Covid, whether they've been exposed or not, or are potential hosts. Testing criteria were SO LIMITED, tests were being rationed & availability to those without health care was tragically unnavigable for many! We have NO idea who's contagious, who's a potential carrier & who's safe. I absolutely understand & support the need to rescue the economy, BUT IF not done under the strict guidelines of educated, informed medical professionals, our death rate will climb. Even at this time, our numbers are hitting new highs. We need to learn from areas where testing was key. IF this is ignored, officials who open Florida prematurely will be viewed as responsible. DO MORE TO TEST & TRACK! THEN open up prudently & under guidelines of those who have the expertise. Lastly, MANY are NOT educated enough to take proper precautions. I see that constantly on my own area beaches, restaurants, country club golf courses, in parks that are now open & more. People are NOT properly distancing or protecting others! This is DANGEROUS without TESTING! Annie Wenz RN
Seminole	Recreation	Hi, I would like to see youth rec sports reopened. It would be good for the kids to have some enjoyment and interact with other kids. I would also like restaurants open and the economy worked upon. There is a lot of negative stuff in the media and wanted to voice my appreciation for the work you all are doing and show my support to reopening the state.
Orange	General	As you all are planning our re-opening, Please, Please make sure all angles are spelled out for each area of the re-opening. Social distancing, any PPE to be worn along with appropiate penalties for not following guidelines. Frankly no Warnings should need to be issued, if a Restuarant or Bar cannot keep the Social Distancing in place for whatever reason then they are shut down for a week or so to get the message across that you are serious about what they have been asked to do.
Lake	General	Open up our economy.

AMERICAN OVERSIGHT

Lake	General	On behalf of my family of 6, and as a local deposition videographer, we kindly request the reopening of Florida for business. We have frequently attended the world's favorite theme parks even up until the last days before they closed. We have been to public stores daily. We have worked moonlighting as DoorDashers delivering food all over from restaurants. I even had an ER visit and hospital stay in which I was in so much chest pain I was writhing around the filthy hospital floor (it was just GERD ☺ too much coffee and salsa). Never a mask nor gloves has been used. We have kept our immune systems strong with lots of outdoor time in the sunlight, and extra strategic nutrition. We are all well. We are ready for action. I support your swift reopening. Remember pausing the movie doesn't change the ending. We can't hide forever from a virus that will never go away fully. Like other viruses it will just mutate and spread, mutate and spread. Perhaps protecting the fragile population would make more sense than sinking the whole ship. Praying and hoping we can move forward and overcome the damage caused by closing everything down. Best wishes to you.
Miami-Dade	Healthcare	Governor Ron, I'm a healthcare worker in South Florida we absolutely cannot reopen the state yet. Miami Dade County has 11 THOUSAND cases of COVID. It would be EXTREMELY foolish of you to allow that number to sky rocket. We need to stay closed for one more month and reassess. Healthcare workers are over worked & underpaid. We physically cannot handle the catastrophic number of cases that would materialize if the number were to climb any higher in Miami Dade County.
Lee	Education	I agree with the decision to close schools through the remainder of the school year. Considerations need to be made though for parents who have now had to assume day-time responsibility for their children for the remainder of the school year and into the summer, when camps, programs, etc... for their children are cancelled or severely reduced & limited. Parents should not have to choose between being forced back into work (which they desperately want to return to) and caring for their children. If you allow business to open w/out restrictions, some parents WILL be forced to choose. Mandate that any business that opens cannot involuntarily terminate a worker solely on the basis of their need for childcare.

AMERICAN OVERSIGHT

Broward	General	As a Licensed Massage Therapist of 12 years, I can not afford to risk my life going back to work with cases of infections and deaths being reported everyday. I have applied for jobs at Call Centers since the pandemic hit Florida. However, it's very difficult to get into other areas of work with my Massage Therapy background. My employer, The Ritz Carlton estimates we will reopen the spa by July 25th, but we know business will be slow- as many guests will be hesitant to be in an intimate environment as a spa. As I mentioned, I am open to any other work at this time. The government needs to work with companies to encourage more stay at home jobs- such as call center work. This way, the greedy companies, corrupt politicians and the 1% will continue to make money of our cheap labor; and workers can make a descent living while we get this virus under control. It's a win/win! I also believe that EVERYTHING should be shut down for a week at least, so scientists can truly study the virus and get it under control. Give every Floridian a week to buy groceries, travel and meet with elderly family members etc. That being said, I realize there are many people who do not have money for food. Trying to navigate the Food Stamp website yesterday, I grew frustrated. So stores should have a government subsidy for $200 worth of groceries for the week of the ENTIRE state shutdown. Residents should bring an ID to the store for the $200 voucher. I believe the longer we keep ANY stores open, the longer it will take to combat the virus. I hope the Governor doesn't bow to the few crazy right wing conspiracy TERRORIST walking around with guns protesting the shut down. The majority of America are rational people that would back a TOTAL shut down of 1 week to truly flatten the curb.
Broward	Recreation	I am the owner of 2 martial arts schools in Davie and Cooper City. We have been in business since 1988. We have been closed since March 19th. This is the only income for my family.We value all lives.We love our community. I value the lives of my family members ,our students and their families as well as those within our community. We are all essential and important to the community.We had safety precautions in place prior to our closing. We will have safety precautions in place upon opening. We must reopen South Florida before it is too late to recover. We The People must have the choice in our future. This is what makes our country so great. Protect the vulnerable. Disease and illness is something generations have battled. We are informed and must continue life. WE must have the choice.
Bradford	Professional Services	Even if you open the state up again, where do the kids go?? There is no school, people are going to have to find child care, it is too soon to re open, lets all the hair and nail , tattoo shops be cannon fodder. Lawsuits are gonna be running wild!!

AMERICAN OVERSIGHT

Bay	General	The number of Americans who have died from this illness will soon exceed than the number of Americans who died in the Vietnam war. It is greater than fifteen 9.11s. You will hear from many people who will encourage you to open the state as soon as possible. It falls now upon you to do what is right for them, even if they do not know what is right for them. Even if it was they who demanded you open the cities, if it was they who asked for crowds on the beaches and in the malls--it is your hands that will bear the stains of their blood.
Volusia	Government	As an older resident, I know I am at additional risk of contracting COVID-19 and I take this situation very seriously. Initially, I had great concerns that the State of Florida would follow in lockstep with the president who minimized this situation for his own political gain stating early on that he was going to 'open up the country' at what would be far too early, according to his own experts. In my opinion, the president has been making some serious errors in judgment that may cause long-term repercussions for this great country, all the while not accepting any responsibility for things he deems negative. However, I am pleased to see that Governor DeSantis appears to be taking a somewhat more prudent approach and hopefully will sufficiently slow Florida's re-opening process after consulting with medical experts, economists, and businesses alike to help mitigate any repercussions. Rushing through any complicated process is never a good idea, and this situation is far more complicated than most involving everyone's health, the economy, and potentially putting our futures and very lives in jeopardy. Good planning is always key. I believe this process should be data driven, measured, and consistently monitored to effectively maintain the safety and security of all citizens so we can eventually return our state to a thriving economy. Measures taken need to be thoughtful and in the best interest of all Floridians, and not politically motivated. While most Floridians are social distancing and wearing masks during essential outings, I have concerns that some may overreach during the re-opening process putting us back in harms way. Rules of engagement set forth for the process of returning to our 'normal' should be clear at the onset with reminders throughout the process helping us stay on track to a safe and solid recovery. While no one including medical experts can predict the future with certainty, the past is very often an extremely good predictor of things to come. Based on the experts' testimony, it is likely that there will be another COVID-19 wave, so we need to stay vigilant, not become complacent, listen to the experts, and act swiftly to keep this virus in check, if needed. According to statistics, the swift action taken by San Francisco Bay Area public health professionals is a great example of how to control COVID-19 as well as other such viruses.
Hillsborough	General	With NO sustained evidence that the virus is under control, reopening should be a firm NO!! Business survival is not the same as human life. Sucks but true. Floridians are not smart nor obedient, our population fragile. We will have vacationers to further spread disease. Have GUTS, stay closed 30 more days. Provide financial aide but put a big dent in the virus. Make it clear- follow the Science!! Virus don't disappear in 30 days for convenience. Follow NY!! There must be sustained evidence of improvement, we don't have that! Maybe if you were stronger at the beginning.

AMERICAN OVERSIGHT

Polk	Retail	Given the recent studies in reference to the Corona Virus by University of Miami, Stanford, USC and Oxford it is clear the fatality rate is low and recovery rate is approximately 98%, similar stats to the flu. The original models were very very wrong. We are losing money daily. Please OPEN Florida ASAP! Thank You. .
Lee	General	I think it is time to get things going again with precautions. Grocery stores have been doing it all along. We can still practice social distancing without staying home.
Hernando	General	I would say stay closed until the numbers actually come down below 100 new cases a day. Also Florida is a big tourism state, and opening back up could be catastrophic and make Florida a bigger hotspot for covid-19 then NY. I would love to go back to work but wisdom says opening is a bad idea at this time.
Duval	Recreation	Would really like to have camp grounds open. This is something that families already in the same house can enjoy while also keeping distance from others. Would also like to see bars and retail stores open. We are already out and around others in grocery stores and hardware. We need to be out.
Miami-Dade	Finance	As far as reopening, no full opening until we have a vaccine.
Palm Beach	General	I believe we need to open up Florida. Each day that goes by more and more people are in need of a walk on the beach. We have a democratic governor who will keep us locked down to service his party. They will do anything to appose opening till the economy goes broke to blame it on trump.
Broward	General	I think that the stay home orders should stay in place until at least May 15th. It is working and it is still not safe to go back to a normal way of living.
Clay	General	I think itsnto soon to reopen. Clay county is still steadily growing and testing has not been done here as much as in duval county. Reopenning in june with strict rules to follow might be ok if we start slowing in numbers.
Duval	Finance	Open the state and no masks
Escambia	General	Please keep the state closed for now, the health and well being of so many depend on this important decision. I understand that people miss interacting with family and friends and being social; however, it's too soon. Our number of cases are steadily increasing with no vaccine. For the sake of the healthcare professionals that have risked their lives and the lives of their family, please keep us closed for now.
St. Johns	Education	Re-opening should happen slowly. There is not enough known about the virus for people to be out and about, back to normal. Just this week they discovered that the virus can cause strokes in young adults who otherwise show no symptoms. Beaches should remain open but only for limited hours. Not until we know more about the virus should things start to resume normalcy. SCIENCE should be what leads decisions. And right now, it is still too early to put people at risk. Guaranteed you will see infection numbers rise if you reopen too soon.

AMERICAN OVERSIGHT

Miami-Dade	Accommodation	We need to go to Phase One within two weeks. We cannot continue to destroy our industries, allow hundreds of thousands of Floridians to lose their jobs, and to destroy small businesses. After we enter Phase One, you should wait a couple weeks, before entering Phase 2, and the same going to Phase 3. I think people who are not vulnerable have a right to work, right to associate, and right to practice religion. Only vulnerable people should be asked to stay home. USE THESE GUIDELINES for Phase One. (i) ALL VULNERABLE INDIVIDUALS should continue to shelter in place. Members of households with vulnerable residents should be aware that by returning to work or other environments where distancing is not practical, they could carry the virus back home. Precautions should be taken to isolate from vulnerable residents. (ii) All individuals, WHEN IN PUBLIC (e.g., parks, outdoor recreation areas, shopping areas), should maximize physical distance from others. Social settings of more than 10 people, where appropriate distancing may not be practical, should be avoided unless precautionary measures are observed. (iii) Avoid SOCIALIZING in groups of more than 10 people in circumstances that do not readily allow for appropriate physical distancing (e.g., receptions, trade shows) (iv) MINIMIZE NON-ESSENTIAL TRAVEL and adhere to CDC guidelines regarding isolation following travel. (v) SCHOOLS AND ORGANIZED YOUTH ACTIVITIES (e.g., daycare, camp) that are currently closed should remain closed. (vi) VISITS TO SENIOR LIVING FACILITIES AND HOSPITALS should be prohibited. Those who do interact with residents and patients must adhere to strict protocols regarding hygiene. (vii) LARGE VENUES (e.g., sit-down dining, movie theaters, sporting venues, places of worship) CAN OPERATE under strict
Duval	General	Please do not open until you can assure the public that they will be safe. Yes everyone wants to go back to work me included but I want to know I will be safe as well as my family when it's time to do so. You have a family yourself make sure the decision you make has their health and well being in mind.
Pinellas	General	With preventative measures such as masks and social distancing we could open restaurants and small business. Nail salons could have plexiglass partition with a cut out at the bottom So the customer could put there hand through and the nail tech could work. I think we need to reopen beaches not just for exercise, also to sit and enjoy the waves maximum 4 people and no longer than 2 hours reset parking meters, and monitored by the sheriff office and Pinellas county employee. Hair salons could have there employees wear face mask and face shields to keep them safe and there customers safe as well. Thank you for opening this up and letting us voice our thoughts and suggestions.

AMERICAN OVERSIGHT

Pinellas	General	More antibody testing is needed to be available (assuming that's tells us immunity) in order to safely reopen businesses and send people back to work. If that is not readily available to ANYONE in the state, then employers should continue to allow people to work from home with no penalties. Opening businesses in phases is ideal, with limitations in place to capacity and temp checks, etc.
Osceola	Healthcare	O m dental hygienist the top risk of get contaminat . We are not stable with the covid number yet. And I fell if ee come back to work, we will spread the virus ao bad. I m not be the one that spread that. It is too early to open dental offices
Polk	General	The thought of opening Florida is of great concern for me. There aren't enough testing kits available now, how do you expect to test people going forward? Do we have enough hospital beds available now. Do we have enough kits to test everyone in nursing homes! Do we have enough safety gear for our hospital and nursing home staff ? Would you be willing to go into a nursing home or hospital without knowing who has been tested within the facility? Would you take a family member into a hospital or nursing facility? I'm not impressed with the thought of re-opening Florida.
Pinellas	General	Follow Georgia's lead! These insane statists NEVER want to return to normal. Half of them are collecting more on unemployment than theyve ever made in their life, and the other half are drunk with perceived power over the livelihoods of other people. You have a choice: side with the leftist scum media hellbent on destroying every aspect of our society, or side with the great Americans who elected you. As evidenced by Sweden, and by Northern Europe now following Sweden's lead, our social experiment is a failure. The sooner and more rapidly we return to normalcy and freedom, the less damaging this entire insanity will be. Lead the way Governor DeSantis. You have the chance to lead the entire nation on this. Re-open Florida.
Hillsborough	General	I hope re-openings are not done too quickly. I'd rather be cautious then open things too early. I hope restaurants are one of the last to open and do not open in the near future because I think that is an easy way for a resurgence to happen.
Osceola	Healthcare	Please do not reopen the state until health and safety officials confirm it is safe to do so. This is not a political issue and we need to leave this decision up to the true experts for the safety of our population. I understand this is a very scary time considering the possible incoming effects to the economy, but we must keep in mind that nothing is more important than protecting the lives of our citizens.

AMERICAN OVERSIGHT

Miami-Dade	Tourism	My belief is that businesses that by their nature allow for social distancing should be allowed to open immediately (I.E. charter boats such as myself, golf courses, parks with the exception of basketball courts, boat ramps at least for commercially charter licensed fishermen such as my self not just for salt water products fishermen). Also, areas, counties and cities that have very few confirmed cases and low population densities should be opened as part of the first phase. My business (charter boat operator) has been decimated by Covid 19 and ramp closures although the nature of my work allows for social distancing as a matter of practice. My industry has been hit hard as we have lost our tourist season, can't access boat ramps, are not eligible for unemployment and the PPP has dried up in the initial bill. Areas of high population densities and high infection rates should open when testing results have an obvious and sustained decrease while allowing business such as the ones mentioned above to reopen but not businesses that allow for large concentrations of people such as movie theaters and other high density indoor activities.
Hillsborough	General	Employers that have employees that are able to work from home should be prohibited from requiring them to come into the office for the time being. If an employee can work from home, they should continue to. This will help to reduce the amount of people in our restaurants and stores during the weekday hours.
Putnam	General	I have recently become aware of a poll that shows the majority of the people in Florida do not think we should end the lockdown. I am not part of that group. I am a 60 year old male that has had heart issues and has unidentified allergies, however; I believe that I am responsible enough to protect myself from this Virus. The people of Florida have been under lockdown for so long that they are starting to run out of money, food,paper towels and toilet paper as well as patients. I believe we can open the businesses if we use common sense to keep ourselves safe. Please give us the opportunity to save ourselves.
Hillsborough	General	I'm the owner of a small mom & pop and I'm begging you NOT to reopen the state! There is still so much we do not know about this virus and as a parent of a young child with two aging parents in the home, I am worried for their lives.
Clay	General	Very ready for Florida to start to reopen. Many people in my family, including myself, have lost their job due to this and we are ready to get to work.
Hernando	General	Make more masks available and reopen Florida
Lee	Recreation	I’ve got plenty of areas of interest but I think it’s long past time to open the state back up. All the shut down did was strip us of our freedom as Americans. Those that are afraid of the virus are more than welcome to stay home, but those of us not afraid of it should be able to exercise our right to freedom.

AMERICAN OVERSIGHT

Broward	Professional Services	I AM ENRIQUE , I HAVE PET CARE CENTERS IN SUNRISE FL AND CORAL SPRINGS FL . I WAS ORDERED TO CLOSE MY FACILITIES , AND HAD A HARD TIME CONVINCING THE CITIES THAT PET GROOMING BELONG ON THE HEALTH AND HYGIENE , DEPT. WE PROVIDE ALLERGY TREATMENTS DENTAL HYGIENE, FLEA TREATMENTS ETC,, PEOPLE HAVE BEEN ON STAY HOME ORDER WITH DIRTY DOGS IN THE HOUSE, CONTRIBUTING TO KIDS ALLERGIES , AND ALL KIND OF PET HYGIENE ISSUES SPECIALLY AFTER RAIN, WHEN DAMP PET PAWS AND COATS CONTRIBUTE TO ALLERGIES AND SMELL TO THE RESIDENT AND RESIDENTS. WE WERE PROVIDING PICK UP AND DELIVERY TO MINIMIZE CONTACT , AND ONLY ONE CUSTOMER AT A TIME ON LOBBY , ALL EMPLOYEES ARE SCREENED FOR ANY SYMPTOMS AND PRACTICE 6 FEET DISTANCE , WE BELIEVE THIS ORDER TO PET GROOMING COMES FROM BIG COMPANIES LIKE PET SMART AND PET-CO LOBBYING WITH CITY OFFICIALS , IN BOTH CORAL SPRINGS AND FLORIDA . THERE IS NO IDEA TO IMPROVE MEASURES TO OPEN AS WE ARE A LIMITED CONTACT TYPE OF BUSINESS. THAT YOU HOPE YOU FIND IT IN YOUR HEART TO ENCOURAGE THE OPENING OF PET GROOMING SERVICES ON SMALL BUSINESS ASAP.
Bradford	General	I am a disabled, divorced mother and grandmother. I have one son, age 11, still in school and 6 grandchildren between the ages of 2 and 12, 5 of whom are in school (all in Florida). I work only part time as I am able. I am happy that distance learning is continuing through the rest of the 2019-2020 school year. I know that this is difficult for some parents, mainly those who still have to work full time on the front lines and those with multiple children in multiple grades all distance learning at the same time. I am very much looking forward to going back to work... and I know my son and grandchildren will be happy to go back to school. Despite this, however, I do not feel that the state should reopen too quickly. I feel that a premature opening will only make things worse (as did the flu epidemic of 1918). I think that reopening slowly beginning in June or July is the way to go. I also believe it would be in everyone's best interest if it has been at least 30 to 60 days AFTER reopening the state BEFORE schools resume in person. If the children go straight back to school too quickly, we will end up exposing children to one another when some may be asymptomatic, which would only exacerbate the problem. I also believe that unemployment needs to be corrected immediately... and that extra food stamps to those who qualify should continue through the end of the year, even if only given every other month rather than every month. Finally, I am in favor of stimulus funds being given regularly until at least 30 days AFTER things have returned to "business as usual" to help families stay in their homes and keep their utilities paid.

AMERICAN OVERSIGHT

Broward	Transportation	I would suggest that Driver License and ID renewals for all that expire in 2020 be allowed to renew ONLINE even if they had used the once in a lifetime online renewal. Keep as many people out of the over crowded DL offices. I think this is especially important for those who are in the vulnerable population that need renewals. If they renewed in person last renewal they already have the "new ID"
Orange	Government	Do NOT open Florida back up until face coverings are mandatory, testing, testing, testing, and contact tracing. As well as airport checkpoints for temperature checks, and mandatory quarantine.
Sarasota	Recreation	Regarding beaches...please allow citizens to bring beach chairs to sit and relax after working out along with coolers AS LONG AS they are social distancing themselves. Any one that's not using social distancing whether it's when they are walking, jogging, fishing, swimming, or lounging ...SHOULD be fined. It should be enforced at all times.
Orange	General	Way to soon to re-open maybe by June but now it is still to dangerous
Miami-Dade	General	Every one should be Mandatory tested for covid-19 before going back to work
Brevard	Recreation	Please open the playgrounds and beach parking. Kids have had nothing to do for the past 6 weeks but nature walks. Also think about camps and outdoor swim activities. Parent's cant even look for work because they have to watch their children.If others feels its not safe then stay home. Thanks for giving us an opportunity to voice our opinions.
Orange	General	This morning I went to a Publix, Winn Dixie and a Walmart super center. I could not find even one roll of toilet paper. Maybe we should solve this problem first.
Miami-Dade	General	Right now the US has the most COVID-19 cases per capita on the world. This is shameful. And we are still not doing enough tracking and/or testing. Too many people have died unnecessarily because of Trump's insanity. Don't add to the count. Bad idea to relax the rules – too soon/. Listen to the expert leaders in the field -- none of whom are named Donald Trump – who caution against this. If you open now you will create an even greater crisis in the long run, as asymptomatic people carrying the virus move freely into busy areas. Economically and medically the repercussions will be huge down the line. You may think it is the right move to play to the militia chorus, but they won't be there to vote for you on elections day because they will either be dead, be sick, or be mourning loved ones. Instead of reading Fox News, why not pay attention to some of the more respected conservative media such as the Wall Street Journal and the Economist.
Duval	General	Florida should be opened in steps as recommended. I feel like masks should be a requirement of all retail and food service workers. Making restaurants only seat every other table would be an absolute requirement. Movie theaters and amusement parks should open last because social distancing would be almost impossible. As much as I hate to say it, nothing should open till late May.

AMERICAN OVERSIGHT

Lee	Construction	Construction jobs should be allowed to resume if contractors can guarantee social distancing at the job site and adequate sanitation for equipment and workers being available. With reduced traffic, now is the time to perform road maintenance, and outdoor jobs would appear to be less likely to spread infection vs closed-in-offices.
Volusia	Government	Dear Governor Desantis, please reopen the state as soon as possible. People that are older with health issues and chronic illnesses should stay home. Should be no reason for healthy individuals to not be out and about and working! People should not be put in a bubble or else they will not build an immunity Please don't cave under pressure if your gut tells you to open. I have family and many friends who feel as I do. . Be anxiously awaiting your decision. Respectfully submitted, Kathleen Cardell
Hillsborough	Recreation	I would like for HOA pools and gyms to be able to open for exercise purposes with limited number of people allowed at a time to accommodate the six feet apart rule. I would also like for beaches to reopen but the number of people allowed on it be limited as well. I think this could be accomplished by limiting the entrances that are open and by the open entrances someone can be the gate keeper and only allowing more people in when others have left once the number of people allowed is reached
Indian River	General	I wish the public were given more data on the number of deaths from annual flu and the fatal rates of annual flu. I sincerely hope that Florida reopens AS SOON AS POSSIBLE, while staying within the Federal government guidelines. Quarantine the vulnerable, let the healthy figure out how to work safely. They will. Let's not kid ourselves that 'testing is the answer' either: 1). You may test negative in the morning but pick up the virus in the evening. 2). People testing positive today, may test negative in two weeks, then positive again in another two weeks. Everyone should stop pretending Science knows. If we use widely accepted scientific norms, you cannot hide from a virus, herd immunity is the answer. We understand that herd immunity takes time, and we do NOT want to overwhelm our healthcare system or workers, BUT two months seems plenty of time for a country like the USA to get their act together. Fill our stockpiles, plan for rapid deployment of pop-up hospitals for future epidemics, have a better more flexible system in place to scale up therapeutic drugs & vaccine creation. While I understand this virus is highly contagious & it's not over yet - I'd like see more numbers on the fatality rate Covid-19. Is it .5% of those who contact may die? Is it less? What is the fatality rate of annual flu or common cold? Give us these stats, so we can understand why we are taking these drastic measures.

AMERICAN OVERSIGHT

Okaloosa	Professional Services	I'm an independent contractor/ cosmetologist (30 years) in Fort Walton Beach. Since the closure, I've been out of work and unable to get a grant or other assistance. I have become Barbicide certified and we're planning on taking extra measures to insure the clients and our safety and well being. Please allow us to at least soft open. I am unable to survive on next to nothing for much longer. Please allow us to offer controlled services asap. Thank you
Clay	General	I think we should reopen the state with reasonable regulations
Seminole	General	Please open everything. Give us back America! Provide real, total information to the public and let each individual make his/her own decision.
Escambia	Recreation	Too early. People not social distancing enough. Medical people and hospitals need a break . Numbers not going down enough fast enough.
Lee	Retail	To whom it may concern, I believe retail should open back up. Malls, specially stores. We allowed big box retailers to stay open during this stay at home order, only because they sell items deamed essential. There is no reason why other retail stores can't operate like big box stores. Most specialty retail doesn't even see the amount of customers as Walmart, Publix, Home Depot, and Lowes see on a daily basis. I do believe we have to follow rules, as we all know retail, malls are already on their last leg.
Manatee	General	Do not open more businesses until we meet the 14-day threshold of declining COVID cases as suggested by CDC. Even if you allow more businesses to open, who is going to risk his/her health to get a haircut, manicure or attend a wrestling match?!
Martin	Recreation	Please open all of Florida's beaches from 6-9am and 5-8pm so we can enjoy the outdoors! Please also open all Florida state parks. Encourage people to practice social distancing while engaging in these activities. I want to walk, swim and kayak /paddle board. The mental stress far outweighs the small danger associated with these activities.
Palm Beach	General	Do not open florida up yet. There are people still testing positive and dying.
Broward	General	On the subject of when to reopen our state. Why can't we open by city? Keep the face mask requirement while in public and start opening up the cities with low numbers of cases starting May 1st. Plus if you wait another month to reopen there won't be any businesses left to open. Remember the regular flu killed 20,000 people the first three months of 2020.
Brevard	Management	Dear Governor, It's time. Open Florida completely. We can't devastate local businesses slowing only the Walmart's and Home Depot's to survive. This is just a "flu" turned into a MASSIVE coup by the Democrats and the unwitting and gullible. People will die as they will with any other flu. I'm 60, prediabetic and on blood pressure meds. BRING IT ON. Thank you.

AMERICAN OVERSIGHT

Duval	Recreation	I'm ready to vacation. Open Disney world and let me go. My daughter is a nurse and she will be going with us with her kids for whom it will be their first visit. My daughter needs the break. Her husband is a farmer who also needs the break. And give restrictions to the mayors of what they can do with the federal funds they are receiving. Our mayor is making huge errors in judgement for the long run.
Broward	General	For the sake of the health of American nation stay at home should end rather sooner. Parks and beaches must open immediately. Those vulnerable or otherwise concerned should avoid any public place to their own discretion. This time of lockdown will go to the history as time of alcohol and drug abuse, since those who were on the border line will become alcoholics and drug addicts (statistic shows that alcohol and marijuana consumption grew exponentially), lack of physical activity will give birth to obesity while boredom and depression will result in suicidal activity as well as home violence. The North Florida beaches initiative was smart, intelligent decision. Swedish model proved that by educating population in hygiene and social distancing adequate results could be reached without jeopardizing people mental and physical health and crashing economy.
Duval	General	Reopen retail, beauty/health services and restaurants ASAP. (Right now) Slowly reopen large venues like concert halls, theme parks, stadiums. (6-12 weeks)
Columbia	General	Open require masks when out, advise the elderly and others who shouldn't be out the risks and let them decide what's best for them. Open the government offices limited to so many workers so many people inside at one time.
Hillsborough	General	During this time and the safety of others. We should not rush to open the state unless it's essentials as we have not peaked. We just had additional sites added. Economy is important but so is the safety and health of individuals. Florida should still have a "safer at home" order until June 1.
Pasco	General	The Governor should move forward with easing restrictions in a phased approach immediately. Personally, I believe the lockdowns across the entire country other than for a very few hotspots prolongs the amount of time that this virus will cause problems.
Hillsborough	General	I think re-opening Florida is a dangerous idea. We're still trying to understand this virus, and how to accurately test for it. Opening everything up will lead to more infection and death. As elected representatives you have a duty to look out for the public and its safety. There has to be another way.
Pinellas	General	If we reopened all the parks, theme parks, restaurants, retailers and so, what would happen? Since everyone has been stuck at home with nothing to do EVERYONE will be out. Everything will be packed. You cannot keep 6 feet away at a theme park, or a retailer. Shopping is hard enough. Even with the flu you stay home. You don't go out shopping or theme parks! I say keep it closed for another month!
Hillsborough	General	It's time to reopen, we are responsible adults. Be a leader, not a follower. The virus isn't as bad as those starving, needing surgery, suicide, let's get on with it.

AMERICAN OVERSIGHT

Pasco	Healthcare	Governor DeSantis, the state and country still have a long way to go before this virus is under control. Get the supplies to properly test everyone whether or not they are showing signs of the virus and then track the virus in our state. This appears to be the only way to contain the virus. CAUTION is needed!
Pasco	Food	I do not think we should be opening our restaurants yet. A lot of our bosses are not giving us the option to stay home. Many of us live with people who have weak immune systems and we risk their lives. We should not be allowed to re open yet. It is not time, and if we re open now there will be another huge spike in sickness and death. Not a good idea.
Seminole	Finance	I believe that state should start reopening. I work in financial services..I am out in the field daily speaking with people. It so sad to see them with out money and things they need. Some have not received stimulus checks or unemployment..but are still just trying to survive. I mainly deal with people 50 and over. I had a 60 year old woman cry because she only has 30 bucks left to her name. She wants to go back to work so bad. Shes worked at the same restaurant for 29 years. I have small business friends that if this goes on any longer it will make them unable to reopen. I understand the virus is bad..but i think if we can get mass antibody testing we will find that many of us already have the antibody.
Leon	General	5/1 Reopen all businesses that are not movie theatres, bowling alleys, bars, or restaurants - any business that can control social distancing. No large gatherings still. Social distancing requirements still in place. The rest to be open 5/30 as pleminary date.
Charlotte	Healthcare	Supplies needed for healthcare offices to continue to provide quality services When I cannot get supplies for my staff this is a concern
Marion	Management	Florida is not ready to re-open! As long as we continue to endure more cases of Covid19 and as long as people are still dying from it with no sure way to test every man, woman and child for it, we are not ready. Florida is unique in that people come here from all over, then leave and scatter all over. Until there is a cure/vaccine, we must be able to test everyone coming here as well as all residents. Otherwise there will be a deadly second wave as there was with the so-called Spanish Flu in the early 20th Century.
Brevard	General	Please mandate face masks in public until the end of the year. They are proven to stop the spread.
Orange	General	Reopen all beaches, dining, and drinking establishments no later than May 1. Everything else should be reopened by May 8th. The virus is not particularly virulent and those in danger of succumbing to the virus are over 65. People older than 65 know enough to proceed with extreme caution. Exposure will lead to herd immunity, the only real solution. The policies that have been in place are a response to flawed models and either missing or flawed data (e.g., see papers by John Ioannides). I'm counting on Governor DeSantis to be among those leading the way out of this debacle.

AMERICAN OVERSIGHT

Broward	General	Florida should reopen with a plan that is in phases. Restaurants with every other table used, hair salons where all wear a mask. Bowling Alleys and Gyms; not yet until the curve flattens all the way. Bars; 3 chair separation till we have a flatten of the virus. Banks should have all wear mask until we have a flattening of the virus. Basically we need all to wear a mask in all public areas. If eating or drinking, then you can take it off.
Orange	General	I think FL should follow the guidelines set by the federal government, opening phase 1 only once we've seen a 14 day decline in cases and the proceed from there. Doing so earlier bit only puts the state at risk of the numbers going up again but may delay the whole process further
Highlands	Information	Listen to the health care professionals for their advice.
St. Johns	General	Dear Governor DeSantis, I believe we have acted responsibly and we found that any non-compliance was from visitors in our state. Please support our constitutional right in our free USA to allow open of our smaller businesses . We can continue to apply what we have learned around social distancing. Maybe a first solution would be outdoor places that provide services like restaurants. I manage a large group at BOA and can tell you the mental stress is starting to get to Floridians. Options would help us manage better.
Hillsborough	Professional Services	Barbershops , Salons should be phased in. One customer at a time. Barbers and salon workers wear gloves and Masks. Customers shielded as much as possible.
Marion	General	I'm a 59 y/o white male with C.O.P.D. and i believe now is not the time to reopen the state lockdown. Until the numbers of infected people are going down the spread will only get worse. I work with a mobile pet groomer and if we were to become infected there is a chance we could spread it to a lot of older people before we knew we had it. I think the lockdown has helped the area of Dunnellon while numbers continue to grow in Ocala. My girlfriend and i will continue to obey the law to help keep others safe and depend on your guidance, but i do not think this is the time to reopen the state of Florida. Thank you, John Claytor.
St. Johns	General	Too soon
Lee	General	I think that a 14 day period Of time where new cases are lower each day is a good guideline as to when places around the state should open… Every community is different, and has been affected by this virus in a different way… If you're in an area that has been heavily hit for it, it's probably going to take longer For you to open then someone in an area that has been hardly impacted at all like many of our counties… I believe in keeping all of our citizens to see if we possibly can, while understanding that we cannot let our economy collapse, it is every single one of our livelihoods, and the only way we survive
Lake	Food	REOPEN

AMERICAN OVERSIGHT

Lee	Food	People are avoiding restaurants due to trust issues related to food safety. Restoring safe food services should be the top priority to address significant supply chain issues which is impacting every sector of our economy including grocery supply. Restaurants need to be up and running with more stringent safety guidelines. Guidelines include takeout and home delivery only, all staff “must” wear masks, wash hands between customers, no cash, only cooked food, no customers inside restaurant, clean all surfaces daily. Provide contact for customers to police the rules. Any restaurant with 3 safety violations must close for a minimum of 30 days. Groceries should have similar rules (except cooked food), no customers should be allowed in the store.
Pinellas	Accommodation	Thank you for reading this. I believe it is absolutely ridiculous that Floridians cannot go to the beaches! Majority of the vacationers have left! Theres so much beach out there! We can SURELY all spread out! Please! For our sanity. Open the beaches. That includes parking! Thank you. As far as salons go.. because that is my profession, I DO believe those need a bit more time. People will surely come in sick and or infected.
Polk	Government	I personally don't believe it's time to lift the stay at home law yet as it will start a second round of covid 19 death's and cases. In my belief may will end ip being devastating if its opened at this time. I do understand the strains on the economy but still think it's too soon. Thank you
St. Lucie	General	The numbers in Florida continue to rise with more hospitalizations and more deaths I think now would be a really inappropriate time to open the state

AMERICAN OVERSIGHT

Brevard	General	Greetings, Team, I would advise we follow the federally outlined phase in plan as per white house instruction. However, we must ensure adequate testing is offered to all those with symptoms and those that have been in contact with symptomatic individuals. Based on my verified contact with front line medical workers, we HAVE NOT offered proper testing to many symptomatic Brevard County residents to this point. Unfortunately, I believe our data is compromised and puts our state at risk for a steep increase in confirmed Covid - 19 cases, and potential death to our local and distant public. However, if we push the phased return forward with the information we have, we should ensure any further reopening actions are support by a clear decrease in Flu and Covid - 19 like symptoms as per the federal plan, after proper testing of BOTH symptomatic and asymptomatic individuals in both centralized locations, and also satellite locations within lower income areas within our state and county. Once our properly tested results show a decrease for greater than 14 days, this would then put us into Phase 1 - then 14 more days, assuming we reach the required conditions, then Phase 2, etc. - Once again, we would follow the guidelines of the current administration's reopening plan. We thank you and your team for your efforts to ensure the most adequate and avaliable testing for all citizens of our state. -Our plans, and ultimately, the safety of our citizens, and the well being of our economy, depend on the most accurate, unbiased data we can gather.
Miami-Dade	General	I do not think that places such as bars, night clubs, certain restaurants, and other places consisting of many people collected in one place should open for at least another two months. I do not think the beaches should open for at least another month. The reason being is because is May cause another, and more serious, outbreak and we would have to implement another shut down.
Seminole	Retail	1) FIX THE DAMN UNEMPLOYMENT COMPENSATION PROBLEM!!!!! 2) The state should remain closed until significant numbers can be tested before they go back to work. 3) Per federal govt. establish tracking program. 4) - for the govenor - STOP ACTING LIKE A POLITICAL SUPPLICANT TO THE PRESIDENT!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!! - Just be a good govenor who does the right thing for your citizens - the right thing is what you believe, not what someone else tells you it is.

AMERICAN OVERSIGHT

Polk	General	Need to reopen all beaches as normally hours where effective 5-1. Excepting Broward and Dade beaches. Open parking areas. Reopen bars and restaurants. Need free testing sites all over where people want to get tested can. Social distancing still a good idea but optional at discretion of people depending on who and wherever not to be enforced by police or government. Hardest to manage will be public transportation, sporting events, concerts. I won't be attending these myself for awhile. But owners should be able to reopen as they deem. We will need a universal healthcare system moving ahead as we now know our private for profit system does not help all.
Palm Beach	General	Governor DeSantis, Please pay careful attention to the population in Palm Beach, Broward and Orange Counties and a densely populated Miami-Dade County. Florida is not homogeneous as you know and we should be under guidelines that are the are more protective then the less populated parts of the state. Yes I am a Democrat and we should be represented as well! We are half the population at the least. Thank you.
Orange	General	I am NOT for reopening my county or state at the present time. Part of the reason is that a lot of people DO NOT abide by the CDC recommendations. I think we should get very strict and require adherence to the CDC guidelines and only consider opening in August to coincide with the new school year. We need to take this time to prepare for that and the new reality of social distancing. DO NOT open the state until August. Thank you
Walton	Retail	It would be wise if those on the "front lines" (medical personal, first responders such as police and fire, postal employees, those working for FedEx, UPS, along with those at high risk be top priority for testing with retail opening based on first priority being to getting goods moving accordingly. Also, opening of counties should be focused on those that are lesser hit getting priority opening and making sure attention remains on hand washing and vulnerable individuals continuing to use protective measures accordingly.
Nassau	Information	I am against opening Florida back up at this time.
Alachua	Healthcare	I think it is too soon especially after listening to the CDC, WHO, DR Fauci. Our state shows mid June as a safe date. I am immune compromised with a rare illness, my family is already careful. I want life to get back to normal too but I see opening too soon as one step forward 6 months back.
Pinellas	General	DO NOT re-open Florida! Are you trying to kill hundreds of people? Opening things back up right now will do exactly that! Keep Florida closed until there are no new cases for weeks at a time - maybe a month or two even. You have the power to stop the spread. Will you?

AMERICAN OVERSIGHT

Lee	General	Please let the beauty salon reopen. We are not just an industry or vanity but one of hygiene. I have several clients who have not been able to wash their hair since the shutdown. My nail tech has clients who have not been able to take care of their feet, some of them diabetic. And their insurance does not cover a podiatrist. In our industry, we must update our education on the current infection control procedures every 2 years and are required to use hospital grade disinfectant. We can not completely social distance but have the ability to control it more than the grocery stores. Our industry has received little to know government help. We have not had access to grants, loans, unemployment, etc. Let us at least fend for ourselves so we don't loose everything we've worked so hard for.
Duval	Government	please do not loosen covid-19 stay at home orders until massive testing and vaccination is available at little or no cost.
Hillsborough	General	The estimates were wrong from the beginning. Social distancing further improved the numbers. People are more aware of washing hands, avoiding handshakes, cleaning surfaces and avoiding touching their faces. COVID-19 is likely here to stay like the flu. Americans are smart and they adapt. People will continue to get COVID-19 and the flu and die from both as well. The mortality rate for the population is about 1%, but much higher when it hits assisted living facilities, etc. And there are several treatments that are working. Let's open more businesses and beaches. Maybe hair salons are appointment only (and maybe open 24x7 for a week or two to handle the backlog). Allow MLB to begin workouts with isolation procedures to see if they can start with the FL/AZ season plan before all areas are open again. They need a few weeks to get ready. Local govts may have stricter rules, as is their right. Allow doctors and hospitals to begin normal business again, some of which are preventative and save lives.
Miami-Dade	General	re-open beaches and State Parks for walk and swimming.
Duval	General	Florida needs to be reopened NOW! People are losing their businesses, finances, and faith that Gov DeSantis is for the people. If people want to stay quarantined, let them. If people want to continue to wear PPE and social distance, let them. If people want to go back to work and reopen the "non essential" businesses, LET THEM!!
Broward	Recreation	Open Campgrounds. Camping is the definition of social distancing. Open state parks to Florida residents only for the first 60 days.

AMERICAN OVERSIGHT

Lake	Professional Services	Hi there! My name is Kasey and I am a dance instructor in the Orlando area. I travel to various dance studios and offer dance classes to all ages. Needless to say, I have been out of work for weeks and some dance studio owners are struggling to pay their expenses and stay in business even for next season. My apartment complex does not offer grace for the situation and yes, I applied for unemployment weeks ago, but I cannot get through to the unemployment office much like everyone else. Many people are applying for work at grocery stores, but we cannot all work at Publix. Even though a few of my bills may be deferred, they still must be paid at some point and in order to do that people need to return to work. It's unreasonable to expect that everyone has enough money saved to be told we're not allowed to go to work for a month or more. This is a free country and I believe people should be given the choice whether or not to return to work. If people don't want to take their chances they don't have to and they can stay home, but those who are healthy and willing to work should be free to do so. I have never missed a rent payment and if this goes on I could be facing eviction. Spring is the busiest season for dance instructors and spring was taken from us. I am not trying to be disrespectful, but I feel that if we are being forced to stay home by the government then the government should pay the tab.
Clay	General	As much as I would love to go to my gym, I think that is possibly the worst thing to open in the first phase. As a runner, I am well aware of how important it is to get excerise. Gyms are a germ factory on a good day. I have witnessed too many ladies walk out of the restroom without washing their hands, people not wiping down equipment and had men feel the need to crowd me at the gym to either comment on how I look or try to make conversation. I see how crowded sidewalks have become just trying to go for a run and cannot imagine the gyms will not be over run. I have had to deal with people not moving over when they are walking two and three across on a sidewalk forcing me to hop off the sidewalk and into the street. I will not be returning to a gym until there is at least a real, tested and successful treatment plan for Covid-19. Fortunately, most gyms have frozen memberships, however they will start charging people again the second they can open, regardless of whether clients feel safe returning to the gym. Please reconsider allowing them to open. This is a business that can wait.
Orange	General	I would like to see Florida reopen in a responsible manner. I feel that Florida has to reopen given that people are unable to receive unemployment. Let's keep the distancing and request everyone wear masks. Let's ask our elderly and those with underlying conditions to voluntarily self quarantine.
Manatee	General	It is way to soon please do not put everyone at risk. Thank you sincerely

AMERICAN OVERSIGHT

Orange	General	I think trying to re-open is a good idea however as you all know restrictions will still need to be in place for sure. I think the curfew should stay in place. I know in my neighborhood people that hang out in our downtown area would stay up all night drinking if they were allowed. I would like to see our restaurants open with limited capacity and I would close them at 10:00 PM. I would only allow for indoor seating and ban outdoor for "gathering reasons". As far as the bars limit their capacity and hours of operating for sure. Nighclubs should remain closed for a few months more. Hair Salons should open with limits on their capacity for sure and in all cases above a standardization method of cleaning should be in place. Also they should wear masks and gloves when handling food. Movie theaters should remain closed until everyone sees how things are working out. No one like limits on anything but in a time like this we need to have restrictions in place. If you live in a community like I do with an ROA they should be taking more interest in their community then they are doing. It's unbelievable what is going on. I talk a walk in the neighborhood three times a day and its a shame what is happening and the ROA does not care....they say.....report it to the local police which I have done and they are doing nothing. It's a shame what we are all trying to handle. Hats off to all of you on this committee.
Hillsborough	Recreation	We are gym owners and have literally 0$ income since Mar 20th. Both my husband and I run the gym and have no other source of income. We need to reopen ASAP before we loose everything We have received nothing from the federal government (stimulus check / PPP/ SBA) we have over $25,000 of bills (rent mortgage utilities) how are we ever going to financially recover?? Even if we reopened with 10 per. Capacity with social distancing measures in place would greatly help us Keeping Americans healthy again is a huge way to combat this virus
Osceola	General	Please do not open early. I work in Hospitality but opening early could kill people. Please fix the unemployment system so people are able to stay home and not be forced to return to work.
Lee	Food	Restaurants should be allowed to reopen at 1/4 or 1/3 capacity for dine-in, but it needs to be mandated (otherwise entitled customers will make a scene if forced to wait or denied entry). DEO needs to allow restaurant workers who are working reduced shifts or receiving reduced tips to claim partial RA benefits. A program needs to be put in place for restaurants who are unable to make full rent payments until we reach "phase 3" of reopening, or we risk many small-business failures and increased unemployment.
Hillsborough	Healthcare	Re-open Florida with precautions. People are committing suicide because they can't provide for their families
Collier	General	I think we need to start reopening Florida. People need to get back to work, especially the blue collar, and hair and nail salons. No one will be making at risk people come out if they chose not to. But my house hold is in real financial trouble. We still haven't seen penny one from unemployment. I need to work, I want to work. PLEASE!!!

AMERICAN OVERSIGHT

Miami-Dade	Professional Services	Hello, There is a short paragraph under attachments. Thank You!
Hillsborough	Recreation	Please, please, please open up the parks and beaches. It is safe to play tennis, go to the beach, and walk on park trails. In addition, PLEASE allow our children to resume little league. Baseball has little contact and these kids need/want to play. Finally, and most important, allow MLB to start. My husband works in the industry and until it starts, we have no income and are one of the thousands yet to receive unemployment. Thank you!!
Pinellas	General	We need to open everything and have people decide for themselves what protects them. This is too much economic damage for the risk. Let the elderly and ill make arrangements for themselves and everyone else can work and live and kids can go to school and camp. This is very emotionally damaging for children. Especially only children. And WAY too much screen time.
Manatee	Tourism	As soon as we open back up rentals our beaches are going to be flooded with tourists again. I have a small cleaning and maintenance business. This is concerning to me. As much as I am concerned about getting back to work I am very very scared for my immunocompromised child to get this virus. If you at least restrict the travel for a little while longer we won't be forced to make the decision to keep our family safe or keep our business from failing.
Charlotte	General	We think the Governor is doing a great job with handling the pandemic.
Collier	Education	Please open up Collier county businesses. This is a beautiful and vibrant county and I fear many of our potential customers will go elsewhere!
Orange	General	Please follow all CDC guidelines. Re-opening prematurely could do harm to our community, and harm many communities whose people come to visit us.
Monroe	General	I believe it is too early to open. Epecially considering things like the Reemployment system are not even working. I like what the keys are doing, they are not letting anyone in till June 1st I think that is smart. Thank you for letting me give you my opinion.
Volusia	Recreation	I have been a weight lifter for 57 years and over 60 national champion bodybuilder in 2010. I miss the gym and many of my friends do as well but with the ease of the virus spreading the last business I would let open is a gym. Gyms are crowded and dirty. Everybody uses all the equipment and it rarely gets cleaned well. I have never seen a dumbbell handle get washed anywhere. People wipe down seats on machines but never the handles. None of the plates that go on bars get cleaned either. I love fitness but I love my friends and the best way to protect them is to keep gyms closed longer. One person can infect an entire gym full of people which is scary to think about. Thank You, Dwight Webb
Orange	General	Open up all of Florida. Herd immunity is working in Sweden. Let's do it here too!!!!!

AMERICAN OVERSIGHT

Pinellas	Education	Thank you for allowing schools to remain closed for the remainder of the year. As a teacher, 60 years old and extremely ill for a month even before we knew there was a problem, I am relieved to be able to continue to work safely. Sanitation regulations which include soap and hot water available at school to wash our hands, sanitary wipes available for daily use, class room supplies like pencils that are no longer shared are just a few germ controlling ideas. We also need a place where sick children sent to school can stay out of the classroom. That means more nurses. The safety of the staff is just as important as the safety of the students. Testing for antibodies is critical for all staff to give us some idea of our risk factor. More sick days without loss of pay for those of us who had no choice but to work when we were not feeling well is also important. I want to add my voice to all of the teachers in Florida. I am a Republican, believe in freedom and free markets. Skipping the "useless" FSA assessments this year could give teachers more authority to input whether or not a child is forced to take intensive reading would be really nice. I am a teacher of students with special needs and the torture of the mandatory test is too much.
Miami-Dade	General	Please listen to the medical experts on when to open up the state of Florida thank you
Sarasota	General	Please reopen all business in the state. Or at least gyms and restaurants. I go to the gym as a means of escape and stress relief from these bad times. And that would be better for everyone if they had some kind of healthy escape from this terrible time.
Hillsborough	General	My concern is that the state will be opened prematurely. The president gave a specific guideline 14 days of no rise in cases etc. We here in Florida are not where we need to be in the numbers. I fear if we open up too soon there will be more cases and loss of life. I would appreciate if you would take this into consideration as you make your decision. Thank you for letting the residents of Florida be considered in your decision.
Pinellas	General	Focus should be on people with compromised immune systems or over a certain age, such as 65-70. The vast majority of people who are not in any way in danger from serious illness due to coronavirus/ COVID-19 should be able to live and work and learn as normal. The economy has to open back up, there is way too much at stake. Thanks
Okaloosa	General	The Families First Coronavirus Response Act and the CARES Act were put into law to protect and provide at least until July 31st. Please adhere to that timeline: with so many of us that have lost jobs, “opening up the state” doesn’t bring all of those jobs back!!! PLEASE listen to actual medical experts, like Surgeon General Scott Rivkees, and our Commissioner of Agriculture and Consumer Services, Nikki Fried. LIFE OVER LIFESTYLE!!!!
Hillsborough	Technology	We should allow businesses to get back to work.
Palm Beach	Recreation	Why cant golf be reopened. Limit golf to a 2 golfers and if not together make them take there own cart, rake for sand trap. Its more then NY Has done and they opened golf. Tennis, open up for single play atleast and make them use their own tennis balls. Need to let people get back to exercising and sports in a safe and responsible way.

AMERICAN OVERSIGHT

Escambia	General	Stop listening to MSM. I would say we still have from 70% to 90% still working. We are going through all this turmoil to return 10% to 15% of our work force doesn't make sense. MSM and "experts" say if they go back most older people will die. My view on this (I'm 73 is we know how to avoid crowds and we don't eat Tide pods. We want our children to continue to live free. Read story about small businesses being held responsible if someone catches the virus. If this should come about I believe all your big chains would close to protect themselves from lawsuits. Walmart Publix Win Dixie. Think about it. In our current position for all the indispensable Truckers. You closed all their restaurants and most rest areas and still expect them to bring us what me need. Back to your point of stay at home safety ALL workers should be able to stay at home.. We know the answer. Take care of these workers they need the bonuses way more than the unemployed.
Duval	Education	I just recently got affected by the coronavirus pandemic, by being laid off. Starting 04/27/20 I'll be applying for unemployment,from the school system as an custodian. I believe you are doing a terrific job, as keeping social distance down. The virus has not flatten enough to open up Jacksonville FL
Hillsborough	General	Florida should start phase one of reopening the state as soon as possible. Parks and Beaches should open immediately. Anyone who can open and employ 6' safe distancing practices should be alllowed to open. Safety is of course paramount, but people need to go back to work. Schools of course rightfully should be online for the rest of the year. I have lost my job due to the state and national shutdown. It makes me sad that other people will struggle and their jobs will not be coming back. We must save what we can. It is easy to give shut down orders when you pay is secure. The florida unemployement agency and policies are worst in the nation and no help. Luckily I do not have to rely on the awful state support to survive and will be fine.
Pinellas	General	Area of Interest ... how about Public Health and Welfare. Senior citizens don't want to die from this virus. We don't know enough yet to open up the state to a normal mode of socializing. We haven't had access to testing broadly enough to really know how many people could be contagious and should self quarantine Why is this committee all business people and business interests are driving this decision? Shouldn't the committee be made up of scientists and health professionals? Be smart. Be conservative. Profits over people will be a sad legacy for Florida.

AMERICAN OVERSIGHT

Duval	General	I am a nurse, I feel like it's time to open everything back up, restaurants, stores, beaches, baseball parks etc. I feel like people have been vigilant with social distancing and could continue to take safety measures and those who choose to still stay home could. Our economy needs to begin to thrive again, Floridians need to be able to go back to work. I thankfully have not been affected by furlough's but my 24 year old daughter has been. She filed for unemployment in mid-March and we have had to help support her while she completed nursing school because she has yet to get anything from unemployment benefits. She will not get to have her nursing school graduation on May 6th as previously planned, that breaks my heart. I feel like we are trending in the right direction and it's time for Florida to open up!
Hillsborough	Government	Dear Gov DeSantis, As an active constituent of Hillsborough County and the state of Florida, I implore you to put forth and enact a plan to reopen Florida AS SOON AS POSSIBLE beginning no later than May 1 upon 30 day lockdown order expiration. We will have at that time been on lockdown in Tampa for FIVE WEEKS. That is more than ample time to satisfy the "14 day incubation period". Out of a population of 21,670,000 in the state of Florida, we have had only 1,055 deaths, many of which are being incorrectly reported as COVID deaths, when they are not. Even so, that is a mere 0.005% of our population. Florida's cases are at 30,000, which is 0.14%. LESS THAN A QUARTER OF A PERCENT. Most of those are mild cases with a 98% recovery rate! This number is not a pandemic by definition. A pandemic is an outbreak "which has affected a significant portion of the population". 0.14% is NOT A SIGNIFICANT PORTION. Knowing new facts that have come out which include the terribly flawed "models" by which all decisions were made, the death rate of this virus being 55% less than previously thought, the survival rate being close to 98%, most cases mild to asymptomatic, Dr Fauci now stating in the New England Journal of Medicine that this virus is actually much more like a "seasonal flu", and considering the main reason we were told we were forced to stay at home in the first place: to keep our hospitals from being overrun which has not happened at all. In fact, NONE of our hospitals are even close to capacity and many are furloughing nurses, physician assists, and physicians. Being that that was the reason for the lockdown, it is neither reasonable NOR CONSTITUTIONAL to do anything other than allow all businesses to open, parks to open, beaches to open as they see fit. The citizens in my community have behaved appropriately and we have been in forced proximity to only our immediate families for over 40+ days. Parents need to work, people need to live, children need to play. Please stop forcing an agenda of fear upon our city. We are no longer afraid of the virus, the concern now is for the

AMERICAN OVERSIGHT

Hillsborough	Healthcare	Working in the dental field, there is not enough adequate access to PPE at this time. Lack of PPE coupled with the lack of informed and clear recommendations on safe practices leads me to question a safe reopening at this time, or even in the coming weeks. The WHO just announced today that antibodies do not equate to protection from reinfection so at this time is just seems premature to reopen everything and undue the progress we have made. If history has taught us anything, the second wave will come and it will be worse than the first. Becoming overzealous now with the small gains we have now and reopening will lead to insurmountable loss in the future. As the old adage goes, it's better to be safe than sorry.
Duval	General	I understand that we have to could the economy going and I'm all for it. I think it should be a requirement to wear a mask in any indoor facility. School should remain virtual until a vaccine is available. It should be mandated that any company that workers can work from home, have to. Kids are going to be home, in most cases parents work. We have to remember kids are the silent carrier so we need to keep them home. Social distancing should now be the norm and not a temporary situation when it comes to retail, entertainment and work. If ones patrons can abide by social distancing and companies enforce it, then they can open.
Clay	Government	Amazing how Florida can get this site up and running g, but cant get the unemployment web site up and running. Cant wait to see the outcome of the lawsuit against Florida pans out. All government agencies are Corrupt. Its all good until something bad happens. Government officials shouldnt get paid to hold office. Until all government is shut down, everybody will be held back by the government. Hope Florida releases the rest of the Florida inmates like they did with Corrine Brown. That shows how corrupt the government is, money will buy your freedom. I bet Florida doesnt release anymore inmates. Many instances where Florida law is unfair to the Normal People. But if you got money, a little slap on the wrist and off you go. Normal person would get locked up for life for same crime that a rich person does.
Orange	General	Please open Florida immediately with restrictions of course
Duval	General	We need FLORIDA back OPEN! There's people that can't do their jobs, seeing family, locked inside their homes, vanlifers are having problems parking because the campsites are all closed, can't go and sit down and have dinner or movie together. This is crazy. People are taking precautions every day. But that doesn't mean FLORIDA has to be shut down. If anything, OPEN FLORIDA AND PUT A SIMULATION THAT EVERYONE WEARS PROTECTION AT ALL TIMES OUT IN PUBLIC.

AMERICAN OVERSIGHT

Bay	Accommodation	Dear Governor, Your executive order 20-87 affected many Vacation Home Rentals all over Florida. Unlike our counterpart, hotels, motels and so on, Vacation Home Rentals do not qualify for any financial help as many are using contract workers versus payroll employees . Vacation Rentals do not have the backup that large hotels do, so sadly were left without any financial means and/or recourse . The impact is detrimental to the many small Floridian businesses that we hire such as cleaners, handymen and so on . Even more, in Panama City Beach, a community that was still trying to reemerge from Hurricane Michael, this is catastrophic as many were just starting to get back into business prior to your orders. If the shutdown of Vacation Rentals was due to concerns about health issues, I disagree with such facts. Vacation Rentals home are self-contained units unlike hotel and other public lodgings. They DON'T share air system; guests are not forced to leave their room for food as they can cook as they would at home and don't have the public and common areas that hotel do which can bear germs. Before your shut down, my properties were hosting families that were looking for a safe harbor to take their families during such a devastating and scary time. They came to me because they felt safe and could self-contained like they would at home doing school and working while helping their kids ease their stress and fear by playing on the beach. I am a nurse and do work with positive Covid19 patients, so I look at the situation under and health care eyes. We learned a lot about Covid19 since your orders were given. I believe that the population is more knowledgeable and understanding of the steps required to stay safe as it was then. Many of us Vacation Home Rentals have made changes to our homes making them safer. The small businesses we employed also are ready to accommodate this issue. I even when further and contacted researcher and doctors that I know and ask their opinion about the safety in lodging and the response was that if they had to choose…Vacation Home Rentals would be their pick due to self-containment.
Hillsborough	General	Please, please, please open up the parks and beaches. It is safe to play tennis, go to the beach, and walk on park trails. In addition, PLEASE allow our children to resume little league. Baseball has little contact and these kids need/want to play. Finally, and most important, allow MLB to start. My husband works in the industry and until it starts, we have no income and are one of the thousands yet to receive unemployment. Thank you!!
Collier	Government	Please do not open Florida before coronavirus testing is available. A vaccine may be a year or more away. Social distancing is working. Opening too soon will only create more deaths. Do what is right for our State. Thank you
Polk	Education	I think it is still too early for Florida to start opening. The stay at order should be extended. I realize many Floridians are out of jobs but one if you lift the stay at orders too soon Florida will see a spike in cases. We need to get the virus under control first.
Pinellas	Professional Services	Dog grooming. Our dog groomer was practicing safety before having to stop. Lobby closed, pick up dog from car, used their own harness, groomer was wearing a mask and returned dog to car when finished. Our bichon frise needs a hair cut once a month to keep skin healthy. It now has been five weeks. Thanks for listening.

AMERICAN OVERSIGHT

Palm Beach	Recreation	Parks, Camping, Golf, Boat Ramps, all can be done safely with social distancing.
Lake	Education	To help keep safe-distancing a possibility once schools go back, I think schools should go on two sessions a day. That would allow class size to be cut in half and it would allow desks to actually be moved apart. I teach in a building which when built planned on 22 students per room. Unfortunately, once ways around that maximum were found, our numbers were increased, in many cases, up to 30 something in a room. We are like sardines packed in with very little room to walk around. Another idea might be to add one hour per day (paid) to each teacher. Every teacher takes on one more period a day. That would reduce the numbers of students in each period allowing for more distancing. I do expect more students to be moving to virtual school. Maybe teachers could teach one of the sessions at school and also take care of a few classes online in a platform like Edgenuity from home. A wider selection of classes could be offered if each student took a couple of online classes each semester. My main concern is that it will be physically impossible to keep enough distance between students with our current classroom sizes. I love my students dearly and I do not want to watch them die because of Covid-19. If there is any way we can reduce the possibility of students and teachers dying, we really need to explore it.
Pinellas	General	I do not think we should rush to open up Florida anytime soon. We don't need to be inundated with people traveling and potentially increasing our risk of contracting a virus we fought so hard to avoid over the last couple months.
Broward	General	I would like to express my anger with the entire system. I can't log on to unemployment. I can't go food shopping because I am laid off. My landlord wants his rent and is not letting up and my FPL bill is going to be around 3 grand by the time this is done. WHAT ARE YOU DOING TO FIX ANY OF THIS!!!!!????????
Hillsborough	General	DO NOT FORCE THE OPENING OF OUR ECONOMY. Please follow the guidance of health care professionals when determining when to reopen our state and economy. The WHO just stated that previous infections show no indication of immunity, meaning we need to sit tight until community spread is near zero or we have a readily available vaccine to ensure this virus doesn't rebound in our population. I understand the economic toll this pandemic is taking on so many sectors, but history and the voting public will hold those accountable that enabled the catastrophic loss of life.
Broward	General	I think it's to soon to reopen!!!!!!!! Not yet!!!!!!
Hillsborough	General	No one should fool themselves into thinking we are out of the woods! Extreme caution should be followed and I implore a VERY SLOW and phased reopening of the economy!! No one wants to go through this again! Be smart DeSantis, your response to this was an epic FAIL, don't screw up more by making rash and bad decisions about opening the economy too fast and too soon!

AMERICAN OVERSIGHT

Manatee	General	Please don't open the State of Florida until it's safe. Right now is too soon and will simply cause a resurgence. I don't want to start from the beginning again, I don't think the state would recuperate financially or mentally. We are just now seeing the curve start to flatten, I think it's a huge mistake to open at this point. I have risk factors, my son and elderly parents do too. COVID-19 is a death sentence for any of us. Please make an informed and educated decision.
Brevard	General	I think it's still too early to open. Cases are still going up and so is deaths. I am still afraid to go out in public unless I must. We have several at risk here in the home and others here that must go out and work yet, during this pandemic. Every day there is uncertainty is my son or his fiance going to bring home the virus to us, give it to me or my grandson. This is scarier than the flu. Please dont open till things get better.
Polk	General	We should not be opening the stars again. The only people that are rallying to open are the same people who DO NOT work at locations where they could be infected due to this disease. They are rallying to reopen for their own inconvenience and not for the sake of the economy. We NEED to stay closed in order to not cause a second wave that will be much worse due to our negligence. As an individual that works at a theme park, my safety is not being considered with my company not willing to let us set borders and wear masks due to how the guest may react. I have a pre-existing condition that makes me nervous for me to get contaminated and die. I don't want to die.
Hillsborough	General	Dear government, While I understand the need for our economy to open again, we should not. Not only did our numbers have a strong increase again on Thursday, it continued to rise. We don't have enough test kits, testing are getting several false negatives and we have people who haven't even been tested yet. We are not healthy enough as a city, state or even country to open at this time. We need to continue to rest until we have enough to test EVERYONE.
Lee	Tourism	Allow some places i.e Bars without food. To be optional on social disatnceing. There is no way my billiard room of 24 years can operate in a manner like home depot does. I have full liquor and pay huge taxes to allow smoking. Set it up as you do a smoking licences. Where its noted and people have the option to enter or not.

AMERICAN OVERSIGHT

Palm Beach	Recreation	I strongly believe that the reopening of public boat ramps in palm beach county would have multiple benefits to both the economy and the residents of palm beach county. As a sixth generation Floridian my family grew up living off the waters of south Florida. We rely on fishing as a main source of food for my family which includes my parents and 3 siblings. Without access to fishing on the reefs we are having to spend more time in crowded grocery stores, which is increasing our exposure to people. The parks would not need to open the public use facilities in order for us to launch our boats. Therefore less people using the same bathrooms and sinks, and no unnecessary exposure to park rangers. With more people recreationally fishing , local bait stores that rely on fishermen would get more business as well as gas stations, which would help our economy to recover. I also believe that the sandbars should remain closed as they attract large groups of people that are just there to party and not going to profit off of the natural resource. Therefore , it would be important to maintain social distancing throughout the waterways, and this can easily be enforced with 1 patrol boat for each popular sandbar destination. There is only approximately 3-4 in all of palm beach county. Thank you for the time and consideration.
Volusia	General	Please keep the state closed as long as necessary to beat this virus. Listen to the people of Florida. Reopening the state early will certainly lead to the death more Floridians.
Pinellas	General	I am in favor of reopening the economy with social distance practices in place. We understand there is a risk,. But many office places have already put many social distance measures in place, and honestly those with concerns should be allowed and encouraged to continue to stay home, while others return to every day life.
Brevard	General	OPEN ALL BUSINESS'S!!!
Palm Beach	Retail	Until there is sufficient testing, I don't want the State of Florida to reopen. We're retail business owners who are deemed non essential so times are hard but let's not make them harder. Open when we have a real handle on the number of people infected and have a good plan to quarantine those people. A vaccine would help, too. Or even a therapeutic remedy. If we open and there are more deaths and then we have to close again- well, just not worth it.
Lee	General	I see no reason not to start opening back up. People will only put up with so much till things boil over and there is more of and issue than just covid-19. We cannot wait till a vaccine is created if there ever is one. The world has to go on and I'm sorry but social distancing is not going to continue once everything is open, so the truth is nothing we do is going stop the virus, people will die, but most will live. Unless the government plans on paying people weekly not to work, then you best open up so the economy can get going before it's to late and chaos falls on this country.

AMERICAN OVERSIGHT

Pinellas	General	In opening up the state we need to make sure there are testing for everyone and the ability to informed people who have come in contact with someone who is infected. Since testing is not available at this time we need to limit what is opened and still provide for social distancing. I understand people want to get out but if the number of cases start to increase it will be harder to recover from this. I think we need to listen to our medical people on how best we can open up again. Thanks John Dedell
Manatee	Tourism	Keep the tourists out as long as possible. This way there will be some control and some way to make decisions based on testing. We can't test tourists... eliminate the unknown. Km
Escambia	Retail	Let us open before we aren't able to. We can go to Publix. We can go to Sam's Club. Where there are hundreds of people. However people are social distancing. Why can't we do that at our business where we may have 2 to 3 customers in an 8000 square foot store? We have been doing our part but many bushiness will not be able to reopen if they are driven out of business.
Lee	General	The main focus now should be how to safely reopen Florida, or there won't be many businesses left to reopen. Start with lifting the stay at home, while still encouraging social distancing. Allow small businesses and non-essential health/dental care to reopen at their discretion. Allow people to patronize them safely if they so choose. I know so many people who need dental work, orthodontics work (including my son), pain management appointments and elective surgeries. Allowing these places to open will bring so many people back to work and allow people access to basic services. By lifting the stay at home, we can allow people to start interacting again with others (again at their own discretion). Allow office buildings the choice to bring some employees back in while others can work from home. We can not maintain social distancing to this extreme forever. Please start allowing businesses to start opening, it can be done smartly and people can opt to patronize safely if they so choose. For all the people who oppose, make sure they are aware it is their option still to stay home. Thank you all for your hard work!!
Pinellas	General	Please do not reopen Florida until more testing has been performed. Also, people do not always have the criteria for tests which doesn't mean they do not have the virus. Please allow testing for people who have most of the symptoms. Thank you,
Bay	General	I think you could open restaurants inside, and have the table 6 feet apart, many have booths so have a open on and close the next, open the next one, same with tables. see how people do with that. Many places have outside seating. . Since the beach is open, slowly let condos and rentals start renting. Get business up and running. . so many people out of work.

AMERICAN OVERSIGHT

Orange	Healthcare	Social distancing has been proven to flatten the curve. Any business that requires touching makes it IMPOSSIBLE to enforce social distancing: Massage Spa Tattoo (blood products present as well) Hair salon generating airborne human hair and dandruff products Nail Spa Also these touching trades do not have PPE, proper sterile facilities, or proper training. Clients as well as services providers are exposed to risk through physical contact and breath exposure between clients and service providers. The corona virus can live on surfaces for hours to days Restaurants silverware, dishes, condiments, tables, chairs Retail stores products picked up and put down by customers Bars six foot spacing may only allow 2-3 people to be at the bar. Mass transit people like sardines in a can all breathing the same air. Look at Wuhan, China now, 1/10 of the shops are open after 30 of the end of lock down and you must remain at the front door to get service. The hysteresis for exposure to symptoms is about two weeks. I would wait to examine the petri dish experiment started in Georgia and see what the graphs look like in three weeks if you want a crystal ball for actions taken in Florida.. Disney may stay closed for the rest of the year awaiting a treatment for the virus....obviously they do not want the liability. Trade shows are another impossible venue. Meetings, samples, eating, restrooms, transportation. Hotels/motels, how are the rooms and everything in them disinfected after each use
Charlotte	Real Estate	I truly believe we are better off keeping Florida shut down at least 4 more weeks. Our kids are out of school for a reason, the public should still be taking precautions. This will give us just a little more time to heal. We are strong in Florida we will make a great come back.
Pinellas	General	Although I understand the economic impact Covid - 19 has had on our State, I believe it would be premature to open the State. Businesses , Restaurants, Beaches and Parks should remain closed until we see the numbers not increasing in cases, which as I track them happens every day and not by 1 or 2 but by at least double digits. We have already done weeks of STAY AT HOME and what would a few more weeks hurt to ensure that we are safer and more prepared with decreased to no cases. Premature actions could come back to bite us and put us back to square one . I choose Life over the Economy , the Economy will recover. Please choose LIFE. TEST TEST TEST.. Thank you.
St. Lucie	Healthcare	In order to open up the state for business I believe mandatory masks in public should be instituted and enforced.

AMERICAN OVERSIGHT

Orange	Government	I do not think it is wise to open up Florida wholesale or to go against guidelines set by the CDC. Saving business at the expense of citizens health is not an acceptable exchange. Also i believe pin pointed openings of places that have low risk of spreading the virus like the beaches, hiking trails, and open air venues with distancing restrictions makes more sense then opening gyms which are breeding grounds for germs on a good day prior to COVID19. My 13-year-old son, can't believe they are considering opening places that are known to be harbingers of germs, knowing what's at risk and how high the stakes are, and I agree with him. Do we really want history to views Florida as the state that helped keep the corona virus going by opening too much too quickly?
Hillsborough	General	Please reopen. Those who are not living in fear would like to enjoy all our state has to offer. The numbers do not warrant all of us being confined to our home. Thank you!
Polk	General	Tired of all the panic. Open back up no one is doing what they were told anyways.
Hillsborough	General	I dont think we should open Florida until we have 14 consecutive days with zero positive covid19 tests.
Brevard	Healthcare	I am a healthcare worker in Palm Bay Florida & am very concerned with Covid 19 & feel that it is yet to soon to open Florida for people as the people in this county have not done anything to stay home from day 1, if anything they have come out more than before, what this county needs is a 14 day curfew set in place & then look into the reopening of the state but right now I don't not agree with it, also the people that are essential should be the only ones out in the streets & our police should enforce that but that is also not happening, the ball has been dropped since day one & the spread on this virus will get worse before it improves if none of these things get implemented. My opinion only.
Orange	Retail	Non-grocery stores need to require masks; limit occupancy to 50% with one out/one in entry after initial group; no shopping posses; maximum 2 in a group not counting young children who must be under strict parental control. Grocery stores need to continue senior hours as they generally are right now to limit their exposure to possible asymptomatic persons. We old people will get up early and do well waiting in line. Younger people not so much. This also lessens store occupancy, thus allowing non-elderly shoppers to get in and out more quickly. Restaurants AND bars should open in the same time period with masks required until waiter has their order. NO counter or bar service unless masked and for take-out. On premises service at table only with tables respecting distancing. Credit or debit card transactions STRONGLY encouraged. Masks back on when patrons leave the table to use the bathroom. Barber and beauty shops should be appointment only with limited capacity. Very brief waiting with distancing in waiting areas. Most have stations are fairly far apart so distancing by alternating stations should be easy. Masks required. If a customer comes too early, they wait outside or reschedule. As much available PPE for all workers, regardless of their employment but really mandatory for anyone who has works with the public. A lot of these suggestions re applicable to other venues. Concerts and sports events require special considerations due to volume of attendance and refreshment stands versus sit-down restaurants.

AMERICAN OVERSIGHT

Hillsborough	General	Re-open Florida!! Let people choose if they want to leave their homes. Closing the state parks and other recreational areas, particularly outdoor areas, is absurd. Crippling the economy and all residents is unacceptable -AF veteran
Pinellas	General	There should be no further opening up until scientific data indicates it is safe and the virus is contained....
Polk	General	Due to the magnitude and severity of this virus the state should be closed till further notice. Children should not return to school in the fall, businesses should not reopen and the theme parks are out of the question. One school opens and the virus gets passed to each child. There is no such thing as social distancing for children. How would the deaths look on the state.
Brevard	Tourism	I am a republican. I am an assistant front office manager at a hotel on the space coast. I was furloughed 32 days ago. In the hotel industry, we deal with guests from all over the world. I also live with an elderly person. I do not want to get sick. I do not want to get my room mates sick. Working the front line, aka front desk, at a hotel, will expose me and my coworkers to the virus. It's not a matter of IF, but when. I don't wanna die from this. You need to keep Florida closed. The 50,000 deaths America has had so far, have died DURING lock down. Once the lock down is lifted, the death rate will rapidly spike and a lot more people will be exposed and most likely die. I am scared. Opening too early will be devastating.
Broward	General	Please consider opening Florida up again. All us heathy people have been locked up for two months now and we need to go out and get back to regular life. I respect the immune compromised, elderly or people who are scared and I think they should do whatever suits them; i.e. they could take a leave of absence and be excused from working. But it is not fair for the healthy people to be locked inside their homes with no income and no job. Let everyone decide what their comfort level is but do not force things upon us.
Hillsborough	Healthcare	I work in the dental field, and I personally do not feel comfortable or ethical returning to work on patients at this time with the large gaps in testing as well as inadequate access to PPE. Jumping into reopening the state blindly (without knowledge of who has the virus or whether or not antibodies even matter as far as re-infection/transmission) would be absolutely asinine and would erase all of the work we have already done to flatten the curve. We need to be patient so that we don't create a spike in cases that would overwhelm the healthcare system and ultimately destroy the economy.
Duval	Real Estate	Let's go for the healthy and able. Ready to return to the office. Would like antibody testing available to anyone that wants it. We think our son and my brother-in-law had covid 19 in January and were exposed at that time.

AMERICAN OVERSIGHT

Brevard	General	I believe it's best to allow all aspects of society to return to normal while continuing a short daily update concerning the progression of COVID-19. Make sure to say it's still very much here and all those compromised should remain careful. Give us information and allow us to choose our behavior, unless and until the situation truly starts to overwhelm the healthcare system. I believe when it's all said and done the numbers will show this to have been far less deadly, percentage-wise, than previously thought.
Duval	Healthcare	Slow open mid May
Broward	Finance	Please fix unemployment it's so so slow and people are running out of money with no help. The city is not ready to open up.
Brevard	General	I think everything needs to re open immediately except for the theme parks. Every business that opens should have to practice social distancing including restaurants. In public everyone should have to wear a mask and always practice distance. Theme parks will need to implement a lot of new policies before opening. People need to work and support their families. I know too many that have not seen a cent from anywhere! If we don't want a great depression we need to open now or there will be so many homeless and hungry families that it will be very hard to recover from.
Polk	General	Re-open the State!! Most of this is a political JOKE! Tell the Gov of NY to shove it, and worry about his own State! Get our people back to work!!
Miami-Dade	General	I think the governor should wait to open Florida. We have been isolating for weeks to save life's and should continue till this epidemic is controlled . We are all in the comforts of our homes with family do people need to value life and not fun activities or entertainment or shopping for now. We need to have our society safe and not dwell if we open up too soon. That's my opinion. My son suffers from. This mi th he will graduate from fiu in nursing and yes , we are saddened there's no ceremony but we understand the reason why it's cancelled. People need to accept the situation and value we are all here . Chron's so we really need to be cautious . Thank you , Sylvia Galvis
Broward	General	I do not support the immediate re-opening of Florida until there is the 14 days decline in infection rates, which has not been reached to my understanding. Even then, I support a phase reopening as outlined in the federal guidelines. Moreover, I have two elementary age children. I would like the task force to specifically consider and address summer camps. I work as does my husband but we are willing to "figure it out" if our children (and all children) cannot attend summer camp in a way that supports their health as well as their elderly grandparents. I would add extracurriculars like Girl Scouts and Boy Scouts should be considered as well and given clear direction on whether their activities are safe for the children and the families they go home to. At the end of the day, if there is not a significant amount of covid testing open to asymptomatic people and a plan to isolate those who are asymptomatic, my husband and I will continue our limited participation in the economy --e.g., purchase of essential items like food. We will not make travel plans, go to the movies, work out at the gym, dine out or other similar activities.

AMERICAN OVERSIGHT

Collier	Education	While it's extremely optimistic to think that we can continue the school year virtually, I ask you to please take the mental health of our children to heart. Children across the state, across the country are struggling. Really struggling. Parents are having the stress of not working, planning for their family's future while also having to try and decipher virtual work for their children. Teachers are over loaded and juggling being teachers while also having to find time to help their own children. Our children have been out of school now for six weeks. They packed up their backpacks and excitedly exited their school doors for Spring Break to never return. Through not returning, they've ridden the roller coaster of unanswered questions about their future...."will we go back to school" etc. That is a lot of instability on a child. Now that they have the answer to that question, they face another six weeks of this state mandated purgatory. Children need routine, yes. Virtual school is not giving them routine. Part of routine is also ebb and flow. Closure. Moving forward. Right now what they need is that closure. They need to be able to put something to rest in all of this. They need to feel as though something has been "settled" or "achieved" in all of this. By calling an end to the school year now, gives them that closure. It allows them to focus on their next chapter which is summer break, even if it's come a little early. It's allowing in limbo students to now have a focus for the future, when they realize their year is over and they are now one grade level older. Please consider putting an end to the virtual learning for the 2020 school year, and giving our students, parents and teachers the ability to put something to rest amidst all of this chaos. Having something to close the book on, and Fall semester to look forward to will create a world of good in the mental health of everyone involved. Thank You for your time.
Miami-Dade	Healthcare	How are you guys going to reopen Florida?! Do you guys not see the amount of cases we have and we aren't even at the peak yet? Have some respect and sympathy for all our healthcare workers and first responders who are in the front line of this 24/7. Think about all the work they've done. Opening now will just make us start all over. Just do a damn LOCKDOWN WHERE EVERYONE HAS TO STAY HOME! It's that plain and simple but no all you people care about it the economy. How are you going to have an economy with no citizens?? Think a little.
Lee	Recreation	restaurants and bars with outdoor seating at least
Duval	Transportation	Please reopen the DMV, at least by appointment!
Hillsborough	General	As someone who is immunocompromised and also involved in the science community, I feel it is much too early to start reopening the state. With our large population and tourism, the virus can spread VERY easily here. I am tired of being stuck inside as much as the next person, however I'd rather stay healthy than have to risk my health and safety by being forced to go in to work or having to go grocery shopping in a store that's no longer practicing social distancing. We do not have a proven cure or prevention yet. Wait for that.
Hillsborough	General	DO NOT OPEN UP YET. It is too soon to open up the state. It is very scary out there. Wait a little longer

AMERICAN OVERSIGHT

Charlotte	Education	Please take into consideration that a very conservative reopening plan, encouraged by doctors, scientists, and experts, will save lives—there is no doubt about this. The economy will suffer more long-term if we do more damage in the short term. We have high counts of vulnerable populations to consider, my parents among them. We are counting on your decisions to save our lives and give us the best hope for our future. Until it is extremely safe, order us to be at home and keep unnecessary gathering places off limits. Please listen to the experts now so we can thrive when the time is right. Please save us.
Volusia	Recreation	Theme parks should allow pass holders to have 1st shot at social distancing in ride ques, As well as on the rides themselves. Space seating 1 per row or 2 in a row of 4 and so on. Sanitizer at entrances of rides and shows. As well at exits. Various wash stations throughout the parks. Attendants continue sanitizing randomly. Take Temps as person enters parks. By allowing pasdholders (those that are dedicated persons that support the park), these parks can test these precautions in turn more people can enter the parks after trying it out.
Martin	General	Let's be smart ... at least follow President's phased guidance ... much too early to open now. Save lives ... stay closed until the science supports opening.
Hillsborough	Healthcare	I work in the dental field, and I personally do not feel comfortable or ethical returning to work on patients at this time with the large gaps in testing as well as inadequate access to PPE. Jumping into reopening the state blindly (without knowledge of who has the virus or whether or not antibodies even matter as far as re-infection/transmission) would be absolutely asinine and would erase all of the work we have already done to flatten the curve. We need to be patient so that we don't create a spike in cases that would overwhelm the healthcare system and ultimately destroy the economy.
Broward	Retail	Easy Open all businesses Mandatory face mask for everyone on public Barbers, hair salons , nails etc open with appointment only Same for restaurants Restaurant one empty table between each other Maximum 4 people per table No bar seat Business have to well clean between costumers City can enforce this with mystery shoppers Very severe fines for not compliance!
Polk	Manufacturing	I say keep it as it is til may30 th til the numbers are in single digits and mask be worn. At any buisness or stores

AMERICAN OVERSIGHT

Orange	General	It is way too soon to re-open FL. The number of COVID-19 cases are still rising, and are getting worse as you have already opened up some beaches. Please do the responsible thing and maintain the stay-at-home orders. I do not feel safe going outside, and I do not want my parents, who are over 65, to get the virus from irresponsible Floridians not wearing masks and not keeping a distance. Please use science and common sense in making your decisions, as this is about life and death. Please do not use Trump as your source of truth, lest we all inject ourselves with bleach and die. I'm already appalled at the way DeSantis has handled the response to the coronavirus. It is unbelievable that DeSantis waited until 4/1 to shut down the state, but still allowed religious nuts to congregate. People are dying due to these terrible decisions.
Pinellas	General	I don't believe the state should open yet. It's way too soon. By opening soon it's going to cause a spike in cases and deaths. The state would be putting more people in harms way. I understand it hard economic right now but I would rather be struggling with bills and have my family and son healthy rather then sick or dead. If the government just pushed back opening till June or July we would see the number of cases and deaths slow down. Right now the numbers are still increasing each day. As of current we have more than one thousand new cases a day in Florida. Shut the state down!!!
Hardee	General	I am in favor of keeping the State on lock down until the new case, total case and death rate numbers are on a clearly identifiable down turn.

AMERICAN OVERSIGHT

Miami-Dade	General	MR GOVERNOR I'AM VERONICA GONZALEZ BORN AND RAISED MIAMI LIVED HER MY WHOLE LIFE SO FAR. i VOTED AND SUPPORTED YOU TO PUT IN OFFICE BUT RECENTLY TO BE HONEST IAM VERYUPSET AND DISSPOIANTED WITH YOUR HANDLING ALL THIS IN MY HOME STATE HERE IN MIAMI -DADE WE ARE NOT READY AT ALL TO REOPEN WE HAVE 11000 PLUS MOR CASES DAILY CASES RISING DISPITE WHAT YOU SAY I KNOW IT AND SEE IT HERE WE ARE NOT SAFE AND READY HERE SIR MOSTAMERICANS ARE SCARED TO LEAVE THER EHOMES OR BACK TO WORK HEALTH IS FIRST SIR NOT MONEY OR ECONOMY WITHOUT HEALTH YOU HAVE NOTHING I FEEL LIKE YOU ARE PUTTING THE STATES MONEY FIRST AND NOT US LOOK WHAT THE N.C GOVERNOR DID HE HAS BARELY CASES COMPARED TO US HES NOT REOPENING TILL MAY 8TH THAT IS A GOVERNOR THAT CARES FOR HIS PEOPLE AS A VOTER THAT HEPLED YOU IN OFFCIE EVERY VOTE MATTERS AS YOU KNOW I EXPECT YOU TO DO WHAT THEIS GREAT GOVERNOR DID PUT HIS PEOPLE WELL BEING FIRST LOOKS LIKE YOU ARE NOT ALL YOURE DOING IS CARING WHAT CEO AND DISNEY WANT OF COURSE THEY WANT TO REOPEN ALL THEY CARE ABOUT IS BUISNESS NOT OUR HEALTH SIR FOR YOU IF YOU WANT AND EXPECT TO CONTINUE BEING GOVERNOR HERE YOUR DECISION WILLMAKE OR BREAK YOU YOUR SUPPORTERS AND ME INCULDED WILL NOT VOTE FOR YOU IF YOU DONT PUT OUR HEALTH AND WEEL BEINF FIRST PLEASE DONT FOLLOW THAT HORRIBLE GEORGIA GOVERNOR THAT IS IGNORANT AND HEARLTLESSTHANK YOU FOR READING THIS FEEDBACK IF YOU DO ALSO MR MAYOR GIMENEZ HOPE YOU DO THE SAME YOU NEED OUR VOTES FOR CONGRESS PEOPLE ARE WATCHING WHAT YOU ARE DOING GOR US PLEASE ALSO FIX THIS PEOPLE ARE TIRED WAITING FOR THER MONEY WHILE ALL POLITICIANS HAVE THERE MONEY AND GETTING PAID SEEMS UNFAIR TO ME. THANK YOU BE WELL AND BE SAFE..
Lee	Recreation	I am an avid outdoor person and used to spend most of my morning walking the beaches near me in Bonita Springs as there are no close parks nearby. Just being outside and exercising is great for the mind and body. I understand the difficulty of monitoring the beaches for social distancing, but the rangers and sheriffs officers presence should be enough but if people can't follow the rules we can close down again. The state parks can limit the number of visitors allowed into the beach parks. We deserve a chance to at least try.
Brevard	General	Please don’t. I am caretaker to my 84 year old grandmother and my father who has stage 4 lymphoma. My household is very high risk. Reopening right now just isn’t worth it. Please don’t open yet. If you do, my whole house is in extreme danger. Please don’t.
St. Johns	Retail	You need to open Florida up on May 1st. Time to get back to work so we can bring the economy back. At risk peopple need to stay quarentined if they dont feel safe. Staying locked down will destoy more lives than the virus.

AMERICAN OVERSIGHT

Hillsborough	Healthcare	Please increase testing availability in the state!!! Please provide a program for ALL licensed health care professionals in the state to have COVID-19 tests and/or antibody tests performed. From CNAs to Massage Therapists to Pharmacists, Dentists and EMTS, we all need to have fast track access or the ability to get immediate testing performed if we become sick to protect ourselves and our clients and patients! Thank you!
Duval	Information	Concern regarding fear mongering- Please address the deaths, hospitalizations, etc. for the flu season of 2018-2019. This will help put things in perspective. I cannot understand the cry for more testing. The test is only as good as the moment in time. The results only satisfy the scientists who are tracking the disease. So getting in line to confirm that you are feeling poorly does nothing. There is no additional treatment or information on how to care for yourself if you have the flu aside from advice from your doctore. Tamaflu can be given for the Type A and B, but not for Corona. It would be ludicrous to require testing or use the results to determine the opening the economy. Consider civil unrest, suicides, domestic violence, child abuse and crime that the quarantine is having on our society. Fear is rampant. Use of gloves and masks are not done properly.Use common sense. Let's not further isolate our young generation who are already closing themselves away from their peers by using social media. Risk versus Ruin! Publix & Walmart parking lots are full, while our strip malls are grave yards!! So sad!
Hillsborough	Professional Services	I own a dog kennel and grooming business. My business has alsmost been closed by this shutdown. People need to get back work. My groomer needs to get back to work. We usually have 30 to 80 dogs over the weekend to board. Now i have 4 if im lucky. Please we can do distancing and disinfect our business. Please help us. This is like being in jail.
Hernando	General	I think as I am a Healthcare worker that it is stressful enough worrying about bringing this home to my family but re opening the state I think is too early considering that some people still are not taking it seriously. Going in to Walmart people are still not wearing mask it needs to be mandatory... And give it some time to settle after its over with
Palm Beach	Recreation	Open the casinos
Pinellas	General	i believe we need to start opening business back up. I think retail stores can open with limiting the number of shoppers and one way aisles. Restaurants can open at reduced capacity. Most other businesses could also open in some limited form. Looking at the number of people infected it is a small fraction of the total FL population (>1%) but we have paralyzed everything for this small percentage. I realize it is very contagious and I think we must keep to the guidelines of social distancing and face masks. Using the guidelines and some common sense we can start to move forward in getting back to some form of normal. Thank You
Hillsborough	Government	Do not re-open businesses or beaches unless they are essential. You are going to cause a resurgence of CoVid-19 cases and prolong social distancing.

AMERICAN OVERSIGHT

Escambia	Tourism	It is imperative that local business interests do not outweigh the safety of the general community. The hotels and condominiums should not be allowed to rent their units at this time. Reopening should be based on medical information and should probably not occur until at least June at the earliest date.
Palm Beach	General	There needs to be more relief for small businesses who are not deemed essential. Other states like California have protected their small businesses by furloughing commercial rent payments and protecting them from being evicted. I think this is essential in maintaining our local economy. Otherwise, many businesses will not survive and our economy will collapse. I think if we re-open a lot of precautions and rules must be set in place like requiring every person who enters a business to wear a mask and if a store opens they must do everything to protect their customers otherwise they can't open. People should be fined heavily for not adhering to precautions to stop the spread of covid-19. People should still not gather in groups and beaches, bars, movie theaters and venues that encourage to gather in crowds should remain closed. The businesses that open should restrict the number of flow into their business and maintain distance between customers and employees as much as possible. People in who are vulnerable should remain indoors.
Sarasota	Healthcare	Let the doctors and epidemiologists help decide. There's no other way. Broaden the task force to include epidemiologists.
Polk	Management	We all need to be responsible and taking our own precautions. We need our state to get back up and running, not only for our economy, but also for our mental health status
Clay	General	Let's get Florida open. People need to get back to normal. This is effecting families mental health. Many people I have spoken to have been denied food stamps and small business assistance. My daughter is going to lose her business. This is not the Florida we know. This is not America.
Hillsborough	Real Estate	I would like to voice my support in completely re-opening all aspects of Florida's economy without restriction or delay. Thank you
Duval	Technology	Do not re open early. This virus will overwhelm the metropolitan areas quickly. Give science a chance to develop effective treatment options. Stay closed. Close more. Add severe consequences to violating orders. Save your constituents and tax payers.

AMERICAN OVERSIGHT

Sarasota	Healthcare	I think there should be more education on the effects that asymptomatic people have on the spread of the disease. I think many people of all ages think that because they are not sick, that they are okay. The public should realize that it is not a matter of personal choice (or infringement of rights), it's a public health issue and everybody needs to do their part. We have a very high elderly population in Florida. I'm not elderly, but my parents are, and their health, as well as so many other elderly are of great concern to me. I feel like great measures have been taken in our state, but it is crucial that we watch to see what the spread of the disease does, as well as take measures to ensure that there is proper and easily accessible testing for all before we even begin to re-open businesses. I am a Manager and Buyer for a small women's clothing boutique. I have been strongly affected, and miss working and income, but public health is number one. Upon eventual re-opening of businesses, hopefully at least a month away, It would be great if the state made it law for all to wear masks, as well as maintain social distancing measures until a vaccination has become available to all. I think that there should be a limit to the amount of people allowed in businesses at a time when businesses re-open, and that it is done extremely slowly and carefully. Thank you for all that you are doing!
St. Johns	Healthcare	Its time to get Floridians back to work, school and play with reasonable precautions.
Duval	Food	Business must reopen. Quarantine and financially support as much as the state is willing to do for those vulnerable people. Over 62, health related, sick etc and allow all others to resume life as they feel it is necessary. I feel that it is unconstitutional to force people to stay in their homes when so few people have actually gotten sick they may test positive but they're not actually sick enough to seek medical treatment. Allow businesses bars movie theaters and Life to function as normal. No restrictions should be mandated suggestions should be made and I believe social distancing would be something individuals would do either way at this point.
Lee	Retail	Re Open Retail and Restaurant Establishments. Continue to recommend safe distances and clean hygiene. Additionally the State may consider recommending Bars and Restaurants seat patrons every other table or seat until safe for full capacity. Thank You for Re Opening Our State!!!!!
Escambia	General	I do not believe the state should be reopened right now. Everyday our cases rise even here in Escambia county fl. People do not listen to facts or opinions from healthcare or scientists in regards to rules to keep everyone safe. They will pack the beaches and any other place that is open. I love our beach, but want to be safe. I am out of work too, but it's for the best for my parents and grandparents for me to not contract covid19 and pass it to them. My children are out of school and that was a great decision. If unemployment would catch up and get people paid they would have no need to go out and work at the moment and this storm can pass. This will spread to everyone. It will be on the government if this gets worse because you break under pressure. Not everyone agrees with the ones that say to reopen!

AMERICAN OVERSIGHT

Volusia	Retail	I feel we should keep the state of Florida closed for at least another Month, people are just now getting tested, and until we see more negative results over all we need to open the state in stages. I want an economy and not to have a recession, however, human lives are more important.
Pasco	Healthcare	I am for Florida opening up. But I think it's too soon, especially being a front line worker.
Orange	Government	Reopen all businesses by the end of the month with the guidance to follow social distancing for the next 30 days, with an extension in that guideline as needed. Let businesses decide how they can stay open while following social distancing for their customers
Polk	General	CrossFit gyms and small businesses
Okaloosa	Professional Services	I believe the opening of every thing leads to not only physical health but mental health as well. People need to take care of themselves by way of gyms, salons, movie theaters, and Restaurants. There are ways to open such as a theaters to allow half of occupants and as you buy seats on line theaters can determine separation. Restraints can do the same by taking only reservations. Fast food could open up and block off some tables completing separation. On the other hand, you could open up theaters one day or week then restaurants, then gyms. But the focus has to be to open up. We need this please, to open up.
Seminole	General	I believe that the strict social distancing for private individuals needs to be adjusted for those of us low risk of contracting the virus in single households to be able to make the choice to selectively socialize with other low-risk individuals. Being completely isolated without physical touch has been emotionally and physically devastating to me. Being able to meet a low risk friend at a park or invite one friend to my home for a private visit (the so called "bubble socializing") needs to be allowed if the distancing measures are sustained past April 30. Patio dining with spaced tables and virtual waiting lines with takeout containers should be allowed for counties with low cases if business owners and employees are able to stay safe and get sanitizer and gloves. If you are a high risk individual or do not feel safe, then stay completely at home and have everything delivered to you. But let me hug my best friend for some comfort. To deny that for months is inhumane.
Miami-Dade	Tourism	All tourism and public spots should open with following and enforcing safe distance and higher sanitation services. Florida keys : Open with exception to only monthly tourist and/or weekly tourist with social distancing kept to keep better track of honesty check point can remain and upon entering temperature can be taken of passengers in the vehicle limited to first 2 rows. Miami Beach : Open with limits on beach hours and occupancy limit to 50 per 2 beach side entrance. Certain entrances remain closed and only have limited entrances to keep control. Restaurants & Bars : Open but only to outdoor seating or bars with a limit of occupancy to keep social distancing enforced. All places should have a thermometer at the entrance and check temperature for extra safety measures. I am a first responder and I understand the sources are limited and hard on us but together we can all return to normal as usual slowly but surely.

AMERICAN OVERSIGHT

Broward	Healthcare	Please reopen all specialty Dr. Offices and surgery centers. Some of us need treatment and surgeries that are critical for good health and we are unable to see our physicians unless we are critically ill. Telehealth is great but it can't replace in person visits for some issues. Please open our healthcare offices and centers first.
Miami-Dade	General	I think we should WAIT LONGER. I have friends in the area of Westchester in Miami That work in hospitals and they are saying there are still a lot of cases being brought in With the virus. Better to be SAFE and Wise then to have to put everyone on another Lockdown. Thanks for hearing me. GOD BLESS YOU! DAISY VAZQUEZ
Martin	Government	i feel to open florida first you need to test poeple that have been working. I know I am pissed that I have to put my self and my family as risk every day. You should test every one that is out working now and see if they are ok then start open county that have over 100 cases. I know in my county all the people from miami, west palm are coming here so i know are numbers are going up.
Broward	Professional Services	Hello my name is Courtney Pryor. I am a coconut creek resident and I feel that we should open up hair salons nails salons and gyms. But the gyms you should only allow a few people allowed in at a time and also all the nails salons should have plexiglass up we're you can stick your hands in and the hair salons everyone needs to wear masks and gloves. I feel that I go to a small hair salon so I am not around a lot of people so i would be keeping myself protected plus I haven't been around anyone except my husband and I have been out of work for a month thanks for all your support and hard work
Hillsborough Escambia	General Healthcare	Reopen Florida immediately we need to get back to work I do not think Florida is ready to reopen. The number of cases of Covid 19 is still climbing. We don't need people from hot spot states coming to Florida and bringing more Covid 19 with them. Health should be before economy. If Florida reopens there will be more lives lost. Florida should follow the guidelines. I honestly do not think that any states are ready to reopen. I am a Covid 19 survivor!! I don't want anyone to go through or worse what I went through!!! In my opinion, if you have not been directly involved with Covid-19 you don't understand. You do not realize what the victim, family, and friends go through. My body is still recovering. Florida should want to fight Covid 19 with all our state has. If not it is going to keep spreading and spiking. Florida does not need to open anytime soon!! I beg you, please listen to me!! Don't be peer pressured into making a huge mistake! Keep Florida closed!! Please be respectful to everyone who has had the virus and all those on the front line! This would be a total slap in the face to them after they have their lives on the line fighting this virus!!! Do not close Florida!!!
Orange	General	Follow the CDC guidelines. Wait for a stable downturn of the figures. Keep following social distancing guidelines and ensure protective gear is worn, especially masks.
Bay	General	I would recommend each county to stay closed until you have gone 14 days in a row without 1 reported case. Then open businesses with limited compacity like 50 people to a restaurant that normally holds 200. Then 14 more days with NO reported cases open a little more u til we have gone per County 100 days no reported cases and face masked required for all over the age of 2.

AMERICAN OVERSIGHT

Volusia	General	PLEASE let me go to my hairdresser!! Please open some restaurants with appropriate distancing!
Pinellas	General	Open Florida back up with restrictions. The proof is in the numbers. 21 million live here. 30k cases. But you need to minus the nursing homes cases. Those were already higher probable cases and other health issues more than likely. 1000 deaths. In 21 million people. Do that math. Our economy needs to get back and our people to work. Make us wear masks when in public place. Keep social distance. Fine us if we don't listen. But dont punish the ones who are following the law and need to get on with life. Many of us have already had this. We aren't even in your recovery numbers. Stay at home HAS NOT worked in the northeast area. I'm from there. I have family and friends. It's not working. You're killing us mentally emotionally and physically and crippling our economy. Open Florida!!!! The heat is killing it here!!
Lee	Government	Government needs to lead by example. Agencies should not reopen to the public until there is reliable testing, prevention, or vaccines. Government workers, who are already underpaid, should be put in a position to risk their health and the health of their families until there are reasonable safety measures in place. Government agencies have done a good job of responding to citizen needs online and by phone (finally bringing some agencies into the reality of the 21st century!). Telework should be actively encouraged. Agencies who have resisted telework in the past should fully commit and invest in technology (VoIP communication, remote printing/mailing, etc...) needed to perform critical functions rather than rely on workers putting themselves at risk because they have to go into an office to make a phone call.
Lee	Food	I work at a local mom and pop restaurant and have since it's opened it's doors on May 1st, 2014. I love this business as if it were my own. The owner is like my mother and I call this restaurant my home away from home. Now with that being said, I do not think we should jump right into opening. As far as I've seen and heard, and I could be wrong, the numbers just aren't right and as safe as they should be. Waiting to reopen is better than opening then having to shut down again. I know for our business that would be devastating and the final nail in the coffin for us as a restaurant. Florida is especially at a higher risk due to the amount of elderly, especially here in South West Florida. I do believe we should wait and push back our lockdown until evidence proves that we can reopen safely and permanently without risking the lives and health of our customers and coworkers. Thank you.

AMERICAN OVERSIGHT

Duval	General	If people can work remotely, they should. I am terrified to go back into an office with groups of coworkers and potentially bring the virus back to my family. It should be required to keep people who can work from home, at home. This will increase social distancing, even if other businesses open back up. There will no doubt be a rise in cases when the state reopens. Let's lessen that by keeping as many people at home as possible by requiring remote work if their type of work allows it.
Pinellas	Professional Services	If professionals can still work from home they should. Opening up large corporate offices are petri dishes for the corona virus. We all work in such close proximity. Opening May 1 is too soon and our state should wait on more month to reopen corporate/professional offices. Everyone is pulling together and will continue to work together. I am a paralegal and can work from home as are all the staff at our firm. I am sure it is the same for any professional that works via internet connection. Thank you for hearing me. Christine Paralegal
Broward	Recreation	Re-open outdoor areas for walking, jogging, biking, and swimming. Maintain physical distancing and don't allow people to congregate in groups at all. No groups must be strictly enforced.
Pinellas	General	Please open pools/ beaches. Virus dies in heat/humidity and cant live on the hot surfaces of pool furniture. Pools have chlorine in them. Open retail/restaurants with 50% capacity. suggest people wearing masks while retail shopping. Extend hours so that more people can visit with the 50%less capacity expectations.
Lake	Retail	I work in healthcare and as much as I want to be able to move about freely and see businesses open again, I am tremendously concerned about things reopening too quickly. Quite honestly, I personally know a lot of people who are not staying home and are going into stores "just because." If people aren't following the orders and/or curfew now, it will be complete chaos if restrictions are lifted too quickly.
Citrus	General	I'm a server and have been effected deeply by the shut down of dine in restaurants. With that being said, I haven't fell ill during this pandemic and for that I am incredibly grateful. As much as I want to go back to work and resume some level of normalcy to my routine, I think may 1st May be too soon. I rather be safe than sorry. I think resuming normal operations by May 15th is reasonable. Give things an extra two weeks just to be sure like many other states have already decided. I would hate to see a second wave because of reopening too early.
Indian River	Finance	How about getting unemployment checks out to desperate people. My staff applied for benefits on April 2nd and they have received zero benefits. We have been loaning them money out of our personal bank account so they can feed their families and put gas in their cars. Tired of hearing that the system is antiquated and unable to handle the overwhelming loads. People are starving. No stimulus checks. No unemployment payments. Food banks running out of food. DO SOMETHING NOW or people will die from starvation before they ever contract the virus!!!

AMERICAN OVERSIGHT

Hillsborough	General	Studies are showing that the infection mortality rate is probably much lower than previously thought, between .1% and .2%. I've attached a Stanford study for reference. It's time to isolate the most vulnerable and let the rest of us live our lives as we did with with every other possible infection before.
Duval	Professional Services	Open the state of Florida up please . THE SOLUTION IS WORSE THAN THE. PROBLEM.
Martin	Recreation	Martin County is doing a great job of virus containment and getting information out to us. I do wish that we were able to open our beaches but understand we can't because of a potential influx from Palm Beach County residents. Martin County golf courses were inundated with Palm Beach County residents when Palm Beach County closed their courses. My hope is that Palm Beach County will once again open their golf courses and open their beaches now that spring break is over so that Martin County can once again re-open their beaches. Thank you for listening and thank you for all your hard work.
Hillsborough	General	Keep businesses closed. This virus is deadly and reopening businesses will do nothing but increase the amount of people affected.
Orange	Healthcare	Re-Open Now
Pinellas	General	I'd like to see Florida Open County by County per the CDC Guidelines as soon as possible. I have a suggestion for those parents that have kids at home due to school closures. Have their Businesses set up an at work day care where possible space can be set up. Provide supervision by scheduling 1 hour intervals where each parent is charged to supervise the kids. Open Outside Restaurants that have space to meet the CDC guidelines.
Lee	General	Subject: Reopening Let Americans have the freedom to pursue happiness and prosperity. Neither right is granted in a society that refuses commerce, a beach outing, a stay at a hotel, a dinner in a restaurant or the ability to work. This shutdown was to keep hospitals from being overwhelmed. Okay, it worked, hospitals are now asking for us to use the emergency rooms. We did what was required now let us get back to life. We accept the risk, those of us afraid can stay home and hide, let me LIVE. I only have so many years left, I'm not planning on hiding from life and having the government pay my way! Humanity is here to experience life..not live in a bubble. You cannot guarantee my health, I accept full responsibility. STOP being a big brother. VAnd don't even think of monitoring me,

AMERICAN OVERSIGHT

Hillsborough	General	Dear Governor DeSantis, I am a resident of Hillsborough County. Florida was built upon hard work and self-sufficiency. We are a resourceful and responsible people. It is time to let Floridians do what they do best; get back to work. Every business is essential when a family's provisions are dependent upon that income. Current statistics show us that divorce, child abuse, alcohol abuse and depression are on the rise as a result of our inability to work without penalties and provide for our needs. It is time to repeal the restrictions upon our businesses so Floridians can get back to healthy and productive lives. Floridians love their neighbors and know how to use common sense to live and work safely. Please lift the penalties on our businesses while maintaining the recommendations of the CDC so that Floridians can provide for their families. Floridians are good people; we are fully capable of operating our businesses while voluntarily engaging in the practices that will help keep our neighbors healthy. It is time to put Florida BACK TO WORK. It is time to lift COVID restrictions upon our businesses. Thank you. Sincerely, Sadi M Pekerol III spekerol@me.com 1-813-401-9985
Manatee	General	https://m.youtube.com/watch?v=xfLVxx_lBLU It is time to reopen the state. The models have been discounted by actual data. We cannot continue to destroy the country for what we now know is no worse than flu.
Palm Beach	Recreation	Please beaches open s palm
Pinellas	General	Please open slowly and wit strict safety precautions in place. Social distancing a must along with facemask in public. For everyone's safety please go slow. See how other states do as they open. Florida in general is still testing positives. Need MORE TESTING first. Please be careful when opening our state.

AMERICAN OVERSIGHT

Pasco	Government	I believe we should open the economy full steam ahead. I think the momentum before the crash is still there. All my friends want to get back to work. They are aware of the risks and still want to charge head first into this. I was an essential IT Business owner during the crisis. Small companies of mine took on a large IT expenditure to facilitate working from home. They were expecting 30-60 days of shelter. At his point they have exhausted all of their available reserves and some are mortgaging personal property to pay the bills. The PPP plan was a complete & utter failure. NONE of my 92 Tampa Area companies I support (all under 100 users) got approved for ANY money. As usual, with the government, only the big corps got paid. My son-in-law is still waiting for his unemployment from Best Buy to be approved because the unemployment system is flooded. The only way for Government to fix this is to get the hell out of the way. The Trump train still has steam in the engine. Let the citizens stoke it with hard work and optimism. Poverty has killed more people than any virus we've had. Offer a safety net for the ones truly in need, some people should stay home for medical &/or age reasons. Give THEM the tax funded support. Not people who want to get back to work. Thanks, Matt G
Hillsborough	Technology	Open smaller populated counties and still enforce safe distancing/masks. Test after 2 weeks or so to see if there is transmission increases taking place. Then open larger and larger counties following this same process. If the first set of counties open and transmission rates are going up then we will have to lock those counties down again. This would be considered our test population as loss of life would be less than just opening all counties at one time. We need virus test kits for those smaller counties and a test population for each county that opens and is tested. Also, Start opening services with safe distancing and masks such as buses, courts, construction, etc. Test those individuals as well to ensure transmission rates are low or not at all. Schools stay closed till we reopen most of the stat with required distance learning.

AMERICAN OVERSIGHT

Manatee	General	Reopen Florida! I support the full reopening in the state of Florida. As a registered voter, tax paying citizen of Florida who's husband has lost about half his hours due to the Covid virus; the numbers do not support a continued shut down! The fear mongering of the media, the draconian measures of government control- it has to stop! Elderly, medically compromised or those wanting to continue living in fear and being controlled can stay home. But healthy individuals who want to work should be able to! I am not required to descend into poverty for anyone. I refuse to participate in "quarantine life" until there's an unsafe, untested vaccine released in eighteen months. I refuse to receive said vaccine to make others feel more safe. I won't set myself--or my children--on fire to keep you warm. We are Allowing fear and policies devoid of scientifically accurate data to destroy Florida and America! Hurricane season is coming and it will be devistating to everyone here in Florida if you don't open up the state. We'll also be out of a home because we won't be able to pay rent. Maybe I'll have to send the bill to you and everyone else still making a good paycheck. We moved here to better our lives and was on the way towards that until this whole joke of a virus hit. Honestly my children's school shouldn't not have closed down. It's a private school, almost 100% positive that the whole school had this virus before you shut down the state. It's a very small school. Only 54 students between all classrooms.
Lake	Recreation	Sweden, South Dakota and others never shutdown and are doing better than here. Also there's plenty of evidence that more people had this before the lockdown ever happened and that the peak was also before the shutdown. Also there's evidence that it really didn't do much to shut everything down. If you want to keep it shutdown, just know that you will face Many lawsuits due to the We should be allowed to return to normal and sign a release that if we get sick we hold no one responsible except ourselves. People need to work, business needs to open. Wearing a mask is not something everyone can do for trauma related reasons or medical/emotional reasons. If you dont feel safe working or going out then stay home. If you do feel safe then let them do what they can. Government cannot force a mask, or keep people home for a long time. We need to be self responsible. Should restrict theme parks to residents only. Do not invite tourism in quite yet. Keep foreign travelers out of tourism areas. Must dhow ID to prove resident. True florida residents should be allowed to use beaches, parks, state parks. Its our state. Let us restart the economy here.
Pinellas	Retail	I feel that this state needs to open safely today. We need to let most businesses open safely who want to work. We have to let those who want to work or need to work have the opportunity. I believe retail, small businesses, barbers, and restaurants with outside seating or limited inside seating can do this with no issues. We as a people will never recover from this if we don’t try to save our freedoms and businesses, if we don’t try to get back to some what normal lives by opening stores.

AMERICAN OVERSIGHT

Pasco	Government	Do not reopen the state until the medical professionals and CDC and WHO say it is safe. Opening based on political agendas is reckless and puts our lives in jeopardy. Expand unemployment to reverse the butchering that Scott did to the system and ride out the pandemic safely and cautiously. Closing schools was right and keeping the stay at home orders in place is the right thing also. We no longer can trust that trump is telling the truth so do not make bad decisions that will cause us to doubt you as well. Do the right thing and stay closed. Thank you.
Seminole	General	Please open our state. We have acted in a judicious manner, given the prediction s that thankfully have not come to be. At this point, the cost is greater than the cure. People need to get back to work. The longer we wait the greater the chance they don't have jobs to go back to. The media has created so much fear and I feel our country has been further divided. Who thought that was possible?
Pinellas	Management	We are not ready to open. Too many new cases. This is only being done because of the economy. Granted this is a huge problem but opening up at what expense. If more people die what good will opening be. Extremely short sighted. We don ' t need to go to the beach. And if we spike again and we will who do you think will be coming here to enjoy our beaches from out of the country. We did not get good Mark's from elsewhere when pictures of Clearwater beach went viral. And you sir, when Governors of states being proactive had their ratings spikes yours spiral downward. Do not follow Trumps lead. We are your constituents and we do not think that injecting ourselves with disinfectants are a good idea. We need leadership and someone listening g to the scientific community and then making the right decision for us all. We want to be alive and able to use our economy.
Pinellas	Professional Services	Please wait to reopen the state.
Hillsborough	General	Reopening Florida is much needed all my friends are losing their jobs or sanity. We need start living the hospital system can handle it .

AMERICAN OVERSIGHT

Seminole	Tourism	I believe that businesses should be able to open back up with limitations. The restaurants should continue their curbside deliveries as well as open the dining room at half capacity with tables spread apart from each other. Also checking temperatures and requiring hand sanitizing upon arrival. The theme parks should be able to open up with restrictions as well.The theme parks should have restrictions as far as checking temperatures and Disney World should install bag checks like Universal where the security guards do not have to touch anyone's things (faster too.) The guests should be required to wear a face mask while inside the park. Shows and parades should not perform due to crowding of people. I recommend more family style meals @ the theme parks rather than buffets. Also limit capacities inside the restaurants there. Disney Springs and Citiwalk also open up with half capacity. Capacities should be reduced to control crowds. Lines should be virtual so the guests return @ a certain time for the rides instead of waiting in line. Increased sanitation stations throughout the park. Suggest increased staff to demand individuals to sanitize their hands frequently. I suggest the rides have the seats staggered and also increased sanitation. I suggest businesses that have a buffet style food to remain closed or change their procedures. There is too much risk of cross contamination. A family style would be more ideal for people that want an unlimited food option.
Pinellas	General	Reopening of business in Florida. I think its to soon for a complete reopen. But Reopening with strict guidelines yes. I own an auction hall that brings in crowds so how would I be able to control my crowd? Not sure so with guidance yes I think in the near future when we get the go ahead with guidelines yes we will open but please make it clear maybe by square feet how many people a business can have? Or no more than 10,50,100 per phase of opening. Thanks small business owner
Seminole	General	Do not reopen until the cases begin to ddecrease significantly. It makes no sense to choose politics over Flroidians health and safety. If you open too early we will be right back here because the virus HAS NOT been contained, there is no vaccine and its too easily spread! Protect Floridians and keep us home. Put politics aside and do what's right for your citizens of ALL ages, races, and religious affiliations. I voted for you, now we need YOU to stand up for us. Lead our state and make educated decisions that follow recommendations from professionals in the medical industry who understand the potential impact this disease can cause. We do not want or need a second wave here in Florida, especially with hurricane season right around the corner.
Pinellas	Healthcare	I believe hospitals should be able to restart elective surgeries at their discretion

AMERICAN OVERSIGHT

Lee	Healthcare	"I am HORRIFIED about reopening FL at this time without adequate testing in place! We have NO idea how extensive this virus is in Florida. There are MANY Floridians who've isolated themselves who have NO idea whether their symptoms were from Covid, whether they've been exposed or not, or are potential hosts. Testing criteria were SO LIMITED, tests were being rationed & availability to those without health care was tragically unnavigable for many! We have NO idea who's contagious, who's a potential carrier & who's safe. I absolutely understand & support the need to rescue the economy, BUT IF not done under the strict guidelines of educated, informed medical professionals, our death rate will climb. Even at this time, our numbers are hitting new highs. We need to learn from areas where testing was key. IF this is ignored, officials who open Florida prematurely will be viewed as responsible. DO MORE TO TEST & TRACK! THEN open up prudently & under guidelines of those who have the expertise. Lastly, MANY are NOT educated enough to take proper precautions. I see that constantly on my own area beaches, restaurants, country club golf courses, in parks that are now open & more. People are NOT properly distancing or protecting others! This is DANGEROUS without TESTING! Sincerely, Donna Fisher
Collier	General	Please keep stay in for all for at least two more weeks as well as the closing of nonessential businesses, etc. . Yes, like everyone I am going stir crazy but feel the self isolation will benefit all. If you choose to open up, please stress that people should still wear face masks and keep 6 feet apart. Thank you.
Charlotte	Healthcare	Please do not rush to reopen. The affected numbers and deaths will increase greatly. I do not believe we have reached our peak yet as our numbers are not declining yet.
Pinellas	Professional Services	Need to open state but with limits like Sweden has done. Practice safe measures for people and get things back.
Bay	General	Please reopen the stores and beaches (unrestricted hours). I is not fair to mom and pop stores when target, Walmart , Walgreens and home centers are open. This has been blown way out of proportion and the area is already hurting from the Hurricane.The short term rental ban needs to be lifted as well. This is hurting everybody very badly.

AMERICAN OVERSIGHT

Duval	General	I don't think we should be too hasty re-opening the state, especially in south and central Florida. I do think re-opening parks, state parks, anything that will allow people to get outside is nice. I just hope these places are somehow monitored for social distancing. I think barbershops and salons need to re-open. People really need haircuts. There could be a safety outline for these businesses. People need to be sat in every other chair, stylists need to thoroughly sanitize their station after each customer. On the flip side, I think grocery stores should start closing to the public. No one follows social distancing in grocery stores. I've watched parents let their kids touch fresh fruits and veggies that the parents did not buy. I've seen the same things happen in the meat section as well. They should move to pick up or delivery only.
Broward	General	I think that it should be in phases, whereas, the state can more easily monitor whether or not citizens are being responsible by following certain restrictions. Maybe open areas like beaches, parks, golf courses, etc. Would still need to exercise social distancing, group limits, continual cleaning guidelines, etc. And then same with small businesses - distancing patrons by for example half the tables in a restaurant so more space in between. Also, this should go by area. Like Dade, Broward, and WPB should have to maybe continue to have to (not a should like WPB is doing) wear facial coverings. People are anxious but if we go too fast, we may regret that later. Slowly and surely I say.
Hillsborough	General	I believe it is time to gradually reopen Florida. It seems like we are putting off the inevitable and I honestly cannot be confined to my house any longer due to mental health. I know people will disagree because they are scared, but the longer we put off reopening, the more the economy is crumbling. I can't blame those who are high risk for wanting us to stay home, but the mortality rate for COVID-19 isn't nearly as high as they thought it was going to be. I am a democrat through and through and yet I still want us to stop hiding as if I am playing the Fallout video game series. We can safely reopen as long as people understand social distancing.
Pasco	General	Too early. Don't do it. Find other ways to k get people employed. CA governor is working with a restaurant to make meals for elderly.
Manatee	Healthcare	See attachment

AMERICAN OVERSIGHT

Okaloosa	Professional Services	I am a hairdresser in Fort Walton Beach Florida for 20 years. I have been unemployed since March 13 and have not received any unemployment or my stimulus check because the IRS said my bank information was incorrect when in fact it was not. So I am on the edge of my seat to get back to work but I am also realistic about getting back to work. Pertaining to the reopening of Florida specifically cosmetology, I have some very strong feelings on this because I care deeply about this industry, deeply about my clients, deeply about my coworkers, and deeply about my family. I truly think that there needs to be phases to the re-opening. In the beginning I still think we Should be practicing social distancing, While salons, tattoo parlors, barbers etc. devise a plan and our leaders devise a proper guideline to ensure the safety of everybody involved. In many of these businesses we are not unlike doctors nurses and medical staff. We must hold our health standards at this point in our salons to the highest level. If we do not have the proper guidelines, spreading this through our families, clients, each other and into the public will be inevitable. My salon owner has done an amazing job so far preparing her amazing salon by separating each stylist stations and giving them their own shampoo bowls, dryer chairs, and stations. She is also set up some requirements for when we go back as far as how many people can be in one room at the same time. No waiting areas. Clients must wait in their vehicles. No food or eating. Simple services no lengthy services. with nine of us we are going to have to work around each others schedules and only be able to work about 2 to 3 days a week. Which is half of what we are used to doing. I am confident in our salon being able to fully abide by guidelines however I do not see an entire state doing what our salon owner and stylist have and are prepared to do. we already have state board coming in making sure we're doing proper sanitation on a normal basis we would request them to come as often as possible to hold people accountable to the new pandemic guidelines in salons. I do see some struggles happening with our salon and many others not having access to enough PPE, sanitation supplies, etc. this is something that is going to have to be tended to similar to the hospitals. Without this equipment we cannot work properly and safely. This pandemic has changed everything about our industry. I will have to change my clothing after my shift before entering my home in the garage or front yard & wipe down
Pinellas	General	TOO SOON
Polk	Recreation	Florida's privately run motocross parks/tracks provide essential recreational activities and should be allowed to open statewide without delay as long as patrons follow reasonable social distancing guidelines. As an outdoor activity where the participants are generally far separated from one another, there is no need for the government to restrict the number of active participants or curtail the operations of these parks in any way. The public wants and needs these facilities to reopen now and it would help if Governer DeSantis would explicitly give motocross track owners the green light to do so.
Hillsborough	General	Please open up! My family will wear masks if it means we can go to restaurants, shopping, museums, hotels, DISNEY. This economic depression we're digging ourselves deeper into will cost lives... hunger, suicide, overdoses, postponed surgeries and procedures. Our high risk population needs access to healthcare again. Please allow our immunocompetent citizens to circulate, get back to work to combat this shrinking economy.
Escambia	General	Please be one of the last states to open, as those will likely be the ones who get the best end results. Slow and steady wins the race. Exercise patience and diligence.

AMERICAN OVERSIGHT

Polk	General	As a single mother of a 7 year old son who is both immunocompromised and has a lung disease (surfactant deficiencies) I am asking the government and task force to please be very careful in reopening too quickly, too soon. I am happy to hear schools cancelled through end of May but I would urge you to require all businesses and employees who have a job that has remote from home capabilities, should continue or begin working remotely through at minimum the end of May (maybe June). As a single parent it is difficult enough to work from home while being teacher to my child and protecting him from exposure of this virus, if I had to go back to work in my office setting with high client interactions I would risk bringing home the virus to my child and increasing the stress of juggling work, school and safety. I would also be put in a place where I would have to take my child to work with me since my form of childcare is school and daycare which will further expose him to contracting this virus. Please be overly cautious with these decisions. I feel it is better to be safe than sorry and overreacting in these times is much safer than under reacting. Thank you for your time and all you are doing. Sincerely, Ashley Adkinson
Pinellas	General	The hospitality industry has been nearly wiped out. We feel that The USA is unique and unlike any other country on the planet. We are built strongly on a constitutional foundation that places ultimate power in the hands of the people, thereby maintaining true liberty. We are the only constitutional republic in the world. This situation therefore requires a unique response, one that realizes risk and response are the two sides of a coin. There must be a response, and with that a risk. Americans have always been proud of the fact that we are innovative responders, not reacting emotionally in fear of anything, and believing that to avoid responding out of fear of the risk, is to be defeated. We do not fear. We forge ahead with innovation, industry and idealism, in any crisis. The greater the crisis, the more firm, bold and resolute is the American response. We must of course respond with cautious optimism, understanding that to fail to respond (and remain shuttered in fear) is more detrimental than to move forward. There is no more time to continue political gamesmanship or restrictive governing. The populace must be trusted to act wisely. Thank you for acting quickly and for the people of the great state of Florida.
Orange	Healthcare	OPEN UP THE STATE IMMEDIATELY! Question: current measures..are they to prevent disease or death? We KNOW, with current data (not malfunctioning models) that 99% of those who die with Covid 19 are elderly with comorbid conditions such as hypertension, diabetes, cardiovascular disease, etc. THIS population should be advised to stay home, seek out medical care early, etc. The rest of the population can now be expected to be either symptomatic or have mild symptoms - not worthy of economic devastation. Let's put Florida back to work and let the disease component run its course. I included a photo of Javitz Center in New York, taken Friday. The picture speaks for itself. Let's put FLORIDA back to work!

AMERICAN OVERSIGHT

Volusia	Technology	It is necessary for us to not have a second waive of this virus, I believe if we keep the state of Florida closed in a shelter in place state for at least another month. It is necessary for us to see more people tested as we just have began testing people here and we need to give our state some time to see those results before submitting everyone to the virus all over again.
Pinellas	Healthcare	Let the medical experts say it say first. I want to see the curve declining Naches flattening out. If it's open right now, I don't think I'd go to a restaurant or go to a movie.
Duval	General	I understand the importance and desire to reopen the economy, as Myself and family members are out of work. With this being said, schools have been closed for the rest of the year as well as many summer camps. If conditions are not safe for our children until what looks to be August, why rush the process? The health of the community is what is most important.
Pasco	General	The longer we wait to re-open Florida's economy, the more hurt we bring to small businesses and their employees. I am of the opinion that many of Florida's municipalities and counties overstepped their authorities by imposing draconian lockdowns and unenforceable curfews against their citizens, with Hillsborough County and Tampa's Mayor Jane Castor being two of the most egregious offenders. I believe that both Hillsborough County's Emergency Policy Group and Mayor Castor in particular need to be thoroughly investigated by a state appointed independent commission for their discriminatory policy making during a crisis.
Pinellas	General	Please wait until the numbers start going down to consider safely, with restrictions, and guidelines opening up Florida. We are already seeing a disregard for social distancing within the stay at home and social distancing order and I am extremely fearful that lifting restrictions too soon will only increase our states numbers, deaths and overwhelm on our hospitals. This is hard on the economy however, large numbers of sick people and potentially dead people will also be hard on the economy and on the mental health of our people. We are already facing a mental health crisis as our next epidemic. If we reopen Florida too soon we will still be in this pandemic, but also facing further increase on the anxiety, depression, PTSD and grief we will see in our people. We are seeing social distancing and stay in place working, please let's keep it that way and reevaluate in another month.
Duval	General	I feel like it is time to open everything by May 1st, Restaurants, stores, Beaches. People need to go back to work. I feel like businesses can take measures to still promote social distancing and safety measures. People can choose to go out or to stay home. Those who are adamant about staying home can. I am a nurse, I understand the magnitude of this virus but I also understand we can not stay in forever. People need to be able to live and pay their bills. I still can't understand not allowing sunbathing at the beach, I like to go alone sit by myself and read,. I feel safer at the beach than the grocery store but we all still go. Open Florida, it's time' n
Clay	Professional Services	Open Florida!!! Florida has so many barbers, stylists, tattoo artists, and more whose jobs are going under. Businesses can open and still maintain social distancing and extra sanitation.

AMERICAN OVERSIGHT

Hernando	General	Please do not reopen the state yet. We are still seeing positive cases,and ,with the elderly population in the state,opening too soon would be devastating. The medical experts are all saying to wait,or else we could see a second wave of Coronavirus.
Miami-Dade	General	My opinion on this matter is that I don't see nothing wrong with open up Florida the weather is hot and nice and people need to get back to work
Lee	Healthcare	Until COVID-19 tests can be obtained on demand (without having a "prescreening" criteria to meet), only very limited social interaction should occur. Without the ability to get a vaccine, testing is the only method to ensure that society can function. If get a cough, why should I, my family, my employer, my coworkers, and my customers all have to live in a 2-week window of fear because we have no way of knowing if we should be concerned. I cannot send my child to any childcare w/out testing available, because I can't reasonably ensure that they don't have a disease which will kill my elderly parents. Until the government can guarantee testing is available ON DEMAND, there should be no large-scale increase in social interaction.
Polk	Retail	I believe it's too soon to open every area up. I dont consider it necessary to open up retail stores. I know first hand that people wont want to follow the social distancing guidelines and this can cause alot of problems for people. Including people's safety! Parents have kids home that they have to help and attend to and I'm not sure how they'll manage to work and help students succeed. In these details stores people will be trying on clothes in fitting rooms which some people decide to pee in, leave bloody pads in, spit etc.. not healthy. Trust me I've worked retail for over 10 years people dont respect. Which makes it harder for the employees to establish rules and procedures. Headache waiting to happen. But we need to do better about unemployment benefits people are hurting!!
Palm Beach	Tourism	I believe that we should start opening up the state upon the expiration of the stay at home order April 30th. People who have underlying conditions or who are elderly should continue to stay at home. Healthy individuals need to get back to work. Parks and sports should be allowed with certain conditions such as hand washing stations, smaller groups and social distancing on the sidelines. If we do not get back to work soon I believe we would see a potential collapse of the entire state economy and potential bankruptcy. The government can not simply keep printing money. Not to mention payments of $1,200 or $2,400 stimulus checks will only last so long. I've heard that there are about 400 active cases in Palm Beach County which equates to .0002% of the population. I'm willing to take my chances as a healthy individual to get back to work and move safely towards normalcy.

AMERICAN OVERSIGHT

Broward	Government	The Governor should open the different categories of businesses when there have been no new cases of the virus for at least 45 days. Coffee shops can open one week, 2 weeks later restaurants can be opened. Two weeks later all shopping malls can open, etc. It has to be gradual to ensure that no new positive results for the virus are found in the State. Who gets to decide what type of businesses open 1st, 2nd, and so on, that would be the governor's office. Governor De Santis should consult with other states and discuss the do's and don'ts of gradually opening up the businesses. He should definitely speak with Andrew Cuomo, Governor of NY, as Cuomo REALLY seems to put his citizens' best interest at heart. Listen to your citizens of Florida, and do what is right for your people. Sincerely, Dawn
Hillsborough	General	Please consider keeping Florida closed. Imagine if your loved one got sick because of a money thing. Jeep ut closed for the sake of your own family, healthcare workers and science.
Okaloosa	General	I say open it all up...I have a pending new job but it being held up bc fdle background appeal needs fingerprints and they wont accept anything outside of law enforcement handled...and that my friend wont be til whenever the hell that is bc you guys in tallahassee are screwing it up badly...noone knows what the hell is going on...too many crisscross on information...I am about to tell my hopefully new boss i will go to al or ga for the fingerprints and appeal...i am ashamed fdle in tallahassee has no backup plans for such events like this...
Hernando	General	Do not reopen our state. It is way too early. People will die and that is not worth it.
Pinellas	Professional Services	To soon!! Numbers are still going up. For the safety of the public and all that we serve I believe it is to soon. If we open to soon this will all just come back two fold.
Miami-Dade	Education	I appreciate the opportunity to comment on this decision and hope that these comments are taking into consideration. Given the current availability of care, language barriers, and high rate of deaths in the black community, opening the state will put more vulnerable populations at risks for infections and death. All of which will stress a health care system that is already weak in serving the undeserved. I ask that we refrain from opening the state until we have more Heath data from our scientists. Let's not make this political. Let humanity prevails!
Osceola	Manufacturing	We need to get Florida back to work. This virus has never amounted to the doom and gloom we were told it was going to be. Florida and the whole country are suffering more from this supposed cure that we ever would have from the virus. This was a huge scam to destroy the greatest economy any of us have seen in our lifetimes. Please Governor De Santis OPEN Florida.
Palm Beach	General	It's too soon to open the state. If you wanted to open up this quickly you should have been testing more.
Pinellas	Administrative	I absolutely do not agree with totally opening I've posed this question with no answers yet. What happens if we open everything back up as is and this thing explodes the number of cases again?! How do we force people to lock down again? I've been out of work since March 17th I want to go back to work and be able to provide for my 8 year old who is grasping for Connection with her friends and school mates past a screen but not at the risk of thousands of lives.

AMERICAN OVERSIGHT

Seminole	General	There needs to be standard protocols in place so that we can start return to near normal as soon as possible. Be that requiring face masks, limit crowd sizes and of course testing. The majority of residents practice the guidelines and we have to live this. I am fearful of a total rebellion of a prolonged lock down, some folks ar egging to give and ignore advice if there is not an attempt to show some progress. That with the added stress of financial hardship is going to be hard to manage. People were effectively blindsided and are paying the price through no fault of their own. The denial and refusal not to prepare as best we could have at federal level especially at the executive (President) level has made a bad situation worse than it needed to be. We have to actively start to engage in normal activities, within reason of course. We will come out of this in spite of incompetent presidential leadership and we need start stepping outside bit by bit as soon as reasonably possible.
Lake	General	Reopen
Duval	General	Not too much to say here. We still do not have a handle on this virus and opening up our state will mean far more people will die. So I submit - DO NOT RE-OPEN THE STATE
Duval	Retail	I think that Florida should reopen because I feel like the people that can go to work and aren't sick should be able to work but the ones that are sick should stay quarantined until they're not sick with pay so floridians don't become homeless and are still able to pay an individual's bills.
Hillsborough	General	I do not think that the state should be open anytime soon. I understand that people need to work to support their families but this virus is serious. People may be walking around with it and not know. For the sake of the elderly and children please do not open the state for at least a few more months. Thanks and God Bless you.
Sarasota	General	I don't understand how you can reopen our state when there hasn't been enough testing to show how many people are infected. It's only been 3 weeks since the stay in place was put in & I haven't seen any testing being done for asymptomatic people. I feel like Florida is trying to keep the numbers low, of new cases, by not testing. Therefore the only number that will go up are deaths, and I wonder if those will even be counted as covid 19 related. It seems to be more about what trump and DeSantis want instead of what's good for the people who live here.

AMERICAN OVERSIGHT

Duval	General	I strongly feel that safer at home social distancing should continue through the month of May before any of the phases of re-opening the city of Jacksonville begin. I think a lot of us have a great fear that the second round of this is going to be even worse so if sheltering in place for another month could possibly lower the chances of a really bad resurgence I think it's worth it. I also do not feel comfortable with my kids starting the next school year on campus. I feel the parents should have a choice if they want their kids to go back to the school physically or continue virtual classes. I think with fall coming it poses too much risk to the children and the teachers and the other staff at school and then bringing possibly something home.
Pinellas St. Johns	General Government	DeSantis resignation. Dear Gov DeSantis, Please open up the state of FL. The citizens are deeply concerned that their livelihoods are forever gone. Check the contradictions that are coming out of CDC, Fauci, Birx and, unfortunately, our wonderful President Trump and it makes one wonder if they ever should have closed our country. It is looking more and more politically motivated. President Trump has left the decision up to the governors in each state regarding the decision to open up their state or not. What are you waiting for? . Please view this youtube video regarding Sweden and 5 U.S. states and herd immunity-Covid 19 https://www.youtube.com/watch?v=n-ehXXE4xI0&feature=youtu.be Note: Our household thinks that you are doing a great job otherwise. Thank you. Sincerely, Anna Wheaton
Duval	Professional Services	Lost my job, can't get through to unemployment, haven't gotten my stimulus check and denied for food stamps. This solution is way worse than the problem. Please get Florida back open.
Pinellas	Professional Services	NO to reopening. It's to soon. The numbers of infected keep going up in Pinellas County and the rest of the state. People would be better off inside their homes and able to collect the unemployment that is ode to all of us.

AMERICAN OVERSIGHT

Broward	General	I would like to see the stay at home lifted on April 30th, but social distancing and face coverings should remain until further notice. I could see beauty salons and barbershops opening with the proper distancing maybe at half capacity. I don't think it's time to open restaurants yet. I can see retail stores opening again with social distancing and face coverings following the examples set by stores that have been open during this pandemic. I think it's important for families to see each other they support of each other in these trying times and with the stay at home order that has become very difficult. They are on many condo buildings in South Florida that have restricted any kind of visitors whether family members or not that has to end. I think it may even be illegal and the governor should address it. With the latest development of the virus not liking sun and humidity with that thought in mind I think the beaches should be open but it would require signage about social distancing and more patrols to keep social distancing in place. The Governor should think about penalizing those who do not take the social distancing seriously with possibly causing death to others the fine should be severe possible a large monetary fine and jail time. Beaches could be opened slowly in the beginning at perhaps 50% occupancy or shorten the hours from 10 to 4. But none of this will work unless it could be monitored and enforced. Restaurants could remain open for takeout, and outdoor dining with 6 ft. Between tables.
Manatee	Healthcare	The thoughtful efforts by Governor Desantis and his team is very much appreciated in emphasizing safety our our citizens balanced with reopening Florida for business in a responsible manner. I have 3 comments 1. We feel we will be ready to practice and open slowly and safely with the American Dental Association guidelines by May 9th! As practicing dentist with over 20 staff members, I feel that by May 9th we will be prepared to practice more than just elective dentistry with a high degree of safety to our patients and to our team of providers. 2. We would like to be able to test in our office of there is any question regarding amy patient or staff member the could have been exposed to COVID-19. We can screen and be a strong source of helping to identify possible early cases or even carriers of COVID-19 to help make our offices and community safer. 3. As an office that has followed your order carefully, we have seen patients with dental emergencies to help relieve and additional burden on our emergency rooms. We wpuld like to be classified as essential medical personal so we can have access to order additional PPE as need for our safety of our team, of providers. Thank you very much for your consideration. Douglas Jungman DDS
Orange	General	As an individual who is in the high risk category, I strongly feel the state should not reopen until public health experts say it is safe to do so and that social distancing measures should remain in place. When health experts agree that reopening is safe, it should be slowly in multiple controlled phases. Even as the state reopens those able to telecommute should continue doing so as this is an easy way to minimize situations where social distancing is not possible and/or is difficult.

AMERICAN OVERSIGHT

Lee	General	Please open the beaches
Duval	General	It's time to reopen, to allow pastors to make decisions on whether their churches should gather or not, and give freedom back to the American people!
Santa Rosa	Healthcare	Too soon..tourists will head down in droves, not obey restrictions and the increase in Covid-19 will soar!! Who will be patrolling and enforcing the restrictions on the beaches? Restaurants, bars, etc.? Too many selfish, entitled, ignorant people will not follow safe socialization, and I personally do not want an increase in sick people here in Santa Rosa county!!! We need to see a decrease in cases and hospitalizations..please consider that our state has a higher number of elderly, with more underlying problems and susceptible to more virulent Covid-19 issues. We need to give our 1st responders a break!!! Better testing and hopefully a vaccine!!!
Orange	General	If you would get money out to the damn people no one would be concerned about getting things open. You will regret opening things up too soon. Pandora's box
Okeechobee	Healthcare	Until we can say 100% absolutely without a doubt that the worst is behind us, the lock down should remain in effect period.
Miami-Dade	Retail	Please reopen retail with same procedures that Publix, Target, Home Depot, Whole Foods are using. A lot of people are inside of these places with masks and tape on the floor for social distancing. We are seriously hurting and see no economic relief coming. We have rent, bills to pay, families to feed and this also leads to serious consequences.
Orange	General	Hello. I completely understand the DEO is backed up with un employment claims, however - I applied on March 22nd and to date I have submitted 4 weeks of lost work. Now, I have a colleague who applied for un employment on April 4th, and come this Tuesday, 4/28 he will have received his 3rd payment along with the $600 per week. I don't understand how I have to wait almost 5 weeks (still pending) when others are getting paid before me, when they applied weeks after I did. It is a major pain during uncertain times. With us being one of the hospitality capitals of the world, how are we the worst with un-employment claims? Would be nice to get even a letter stating the status since the website does not work and calling takes 40 calls of dropped phone calls. Thanks..
Hillsborough	Food	Construction , restaurants people need to go back to work. . They need to pay there bills.
Pinellas	Real Estate	Open the State. The beautiful thing about Democracy is if you do not want to go out you don't have to. You have the freedom to stay home. We need to get back on our feet and get things up and running

AMERICAN OVERSIGHT

Palm Beach	Recreation	While re-opening beaches is a touchy subject for most people to understand, it is in fact possible. With restrictions such as opening parking lots to half capacity, limited hours of operation AND enforcement of social distancing, no large groups, and no lounging! Exercise only activities such as walking, running, swimming, surfing, snorkeling, etc. are vital activities for mental AND physical health, we need fresh air and vitamin D! Please take into consideration the fact that due to beaches being closed the sidewalks and streets along beach ways are 2 to 4 times more crowded with people walking, running and bicycling, while not wearing face coverings or social distancing (many bicycle groups are 10+ and less than a foot away from one another!) Even in the most limited form of beach opening the people should be allowed to swim and SURF! Please feel free to contact me about this and how many other people agree that we should be allowed to safely enjoy our oceans.
Bay	Professional Services	I do not feel like it is safe to open the state back up. I work at a barber shop and I am terrified to go back to work. At the same time I have no income coming in because I have not received a stimulus check nor have I received any unemployment even though I applied at the beginning on the month. I have not received a stimulus check because I am self employed and usually owe at the end of the year and have been unsuccessful with the get my payment option which is a huge problem and it is wrong that it is so difficult to enter in your bank info. As for unemployment, shame on everyone who is responsible for this. I feel like a lot of the panic for paying bills would be down if everyone was getting the unemployment check they are entitled to. Instead people feel they have to go to work even though they feel very unsafe and know they should stay home for the safety of themselves and their families but how else are they going to feed their families or pay bills? It's not right.

AMERICAN OVERSIGHT

Seminole	General	First and foremost, as a Floridian and American it saddens me deeply that we have jumped right over the solemnity and gravity of this moment as state and nation right to the profit of business. This national trauma is now 50,000+ lives lost which is 25 times worse than a Katrina and 20 times worse than a 9/11, and by next week will surpass lives lost in Vietnam. They are there no flags at half staff, why are we having so many conversations about things that don't matter, sending memes and gifs about this whole thing like it's still funny, when none of it is. People are dead. People are hurt. And our mental health crisis will be exacerbated for decades. Second, the leadership at the national level has been woefully absent, tardy, or simply ignorant of reality and science in guiding Americans. There is no political credibility there when the president is prescribing medicine and disinfectant from the White House. Period. That is not a political statement. It is a fact. Sadly, this reflects upon state leadership credibility and trust as well when any indications to reopen are given that the governor is more concerned about the president's feelings, who simply needs Florida to win an election, over Florida residents' needs. Third, as to reopening, this must be done in a safe, smart, staggered, specific, and strategic process that all residents understand and at the guidance and direction of public health officials, not politicians. We need no garbage in or out from R or D in the state. Anyone who can work remote should continue to do so for some time, especially for those in education, those in downtown office high rises, or other locations, plants, companies, etc. where social distancing is impossible. Churches and large gatherings should not be fully operational but innovative and focused on not just reopening and socially connecting again, but respecting and honoring the dead, and harmed, and how to raise humanity awareness after this event in an effective economic way where we can get business going not reopen and then have businesses kill their brand by killing people if they reopen to soon or too haphazardly. Very small percentage are going to feel comfortable working in high density areas this summer. As a former higher education professional, I can honestly say I would not send my child to live in a college dorm in the fall and would expect them to be in
Palm Beach	Management	Open ASAP
Manatee	General	Our family feels that the best course of action would be to open most public places with social distancing still in place. For instance, opening restaurants and other businesses but at reduced capacity would allow for a slow start back to normal. We can test the waters, so to speak without abandoning caution. We are never going to know when is a safe time to try, until we try. And we are never going to be completely safe until a vaccine is ready, which is just too far away. Even then, we may have a vaccine and a whole new strain or virus breaks out again and then what? What did we wait for? We can't just hide under a rock and wait for safety to come, it may never arrive. The people who don't feel comfortable can continue the "safer at home" lifestyle, but others need to have the option to return to our lives if we want to. That's why we live in a free country to begin with.
Lee	General	keep social distancing, Everyone wear masks for 60 days, restuarants only have paper menus, every other table empty. Beach for walking only for 30 days, businesses only 10 customers in store at a time.

AMERICAN OVERSIGHT

Pinellas	General	First let me say thank you for doing all you can to insure the safety of Pinellas County residents during this Covid-19 Pandemic. I feel we have been well-informed every step of the way. I agree with our Sheriff that it is now time to re-open the beaches and pools for recreation. It is past 'spring break' time and with warmer weather up north I feel we won't have a new influx of beach goers. There is something so very healing about just being on the beach and in the water. I feel there is very little risk there. My partner and I are among the very fortunate to have kayaks. We have been paddling from various boat launches the entire time, but it would be much more convenient to have the Dunedin Causeway back open for parking and easy launch. Thank you. Keep up the great work and I hope you remain healthy. Warmly, Cynthia Caponi
Escambia	General	I think it is still too soon to open Florida. The virus is still out there and if you open up to places where people gather, it will start all over again. Staying in doesn't kill you but going out to these place just might. STAY IN.
Pinellas	General	I'd rather see Florida reopen around mid May. Far to many death and cases to invite trouble.
Pasco	Tourism	It's time to open. Enough is enough. This has gone way past where it should have and has been completely blown out of control. Family as struggling to get by with no hope the media or the governments will stop this game. Or maybe we just stay closed forever and completely collapse florida and the USA.
Orange	Recreation	Please reopen Florida
Hillsborough	General	Please open the state immediately. Residents have waited long enough to move on with their lives. This shutdown was completely unnecessary. Our local officials have acted unconstitutionally and some have revealed themselves to be socialist tyrants. This needs to happen now. The predictions and models make no sense whatsoever. Please sir do what is right and end this shutdown.
Pinellas	Administrative	Do not reopen. To much health risk. It is not fair to all the employees that will be required to report for duty when the office is not able to maintain clean working conditions to minimize contamination. If people can still work from home, they should be allowed and not required to enter unclean office.
Orange	Education	I feel that Florida should be generous with providing for those who are unemployed and get small businesses on their feet, and then focus on reopening. There cannot be a working economy without local people who have been displaced from jobs being taken care of. After that phase is done, I would then focus all energy on deciding how to safely open schools, theme parks, restaurants, etc. Multitasking is not efficient or productive. Tackle and conquer one thing at a time.

AMERICAN OVERSIGHT

Palm Beach	Government	Surfers under stand the beach is closed. The water however should never be off limits accept for shark sightings and rip currents or pollution in water. We do not want to sit on the beach during these times anyway. We are similar to cyclists, golfers and runners/walkers. I get into closer contact with people at the grocery store then I do when I'm surfing. The idea is to limit interaction with people and the surf community understands this and will abide by social distancing rules. No knuckle bumping or handshakes. Always bring packed lunch and hydrating liquids to limit going to a fast food joint or the store for a second time. Park at the beach. Walk in a definitive line to the wave that you want to surf. No sitting on the beach or watching the waves from the beach unless you are clearly keeping your distance from others. All congregators (groups chilling close together) should be written $30 citations and asked to leave the beach for the day. With the fine set at an outrageous $5000.00 with people not working will drive anyone stir crazy to sneak around anyway and find some beach access. The rules for surfers/beachgoers. Enter the water. Surf for as many hours as we please. No knuckle bumping or handshakes. When leaving the beach go straight to your car do what you need to do , hydrate, change clothing. Etc then leave.
Broward	General	We need to reopen the private beaches 24 hours a day. Public beaches daytime only. condo's pools and decks and most Busness
Collier	Healthcare	Opening up Florida in the midst of a global pandemic is quite frankly one of the most ridiculous ideas I have ever heard. The health, safety and well-being of the people should be your biggest concern, and remaining closed is one of the most important factors in ensuring that this priority is upheld.
Hillsborough	Real Estate	All businesses should be opened with resonable directives regarding capacity, cleaning regimines, and masks requirementsif they are in close proximity to their customers.
Duval	Management	OPEN OUR STATE! I truly feel this whole covid-19 situation has been totally blown out of proportion. We are over a month into this there have been less than 2,100 hospitalizations (over 400,000 predicted) and 1,046 deaths thus far in Florida. Where I live, in Duval County, there have been 18 deaths and people are scared to death to go to the empty hospitals when having other health issues. Of course none of us want to see anyone die but we cannot continue to ruin the lives of so many people who have lost their jobs and are circling the toilet due to these inflated and preposterous numbers that just are not nor have ever been there. Floridians want to get back to work, we don't want loans, this is all ridiculous! OPEN OUR STATE!! Herd immunity is how it's been done since the dawn of time. The history books will not be kind looking back on OUR public servants and this absolute economic mess unless they get the people back to work and the economy going ASAP!

AMERICAN OVERSIGHT

Lake	General	I feel it is too soon to open. Better to be safe than to lose more lives when we could prevent it. If it must happen then nail salons, barbershops and hair salons should be the last to open due to the proximity of the profession. There is no way that they can safely do business and not adapt to social distancing. As to restaurants, they must be able to sanitize menus, seating and tables with a very limited capacity. Masks should be worn at all times with daily checks of employees to avoid the spread. The beaches should be limited as well with constant patrols and opened for exercise only. Parks should also follow limited capacity to avoid contact with others. Obviously our biggest theme parks are not able to function with any kind of limits and should remain closed until further notice. Bars should operate under the same conditions as restaurants but I really don't see this happening. This is not an easy task and I wish you luck.
Seminole	Professional Services	This virus is going to be around for the long haul however our economic capabilities and stability will not. It's time for freedom of movement and choice for all as to how to deal with the virus. People should have the ability to decide for themselves if they want to go to restaurant, gym or any other public place. Proper social distancing guidelines should be used and when necessary enforced but aside from that, it's time we all get back to our new "normal". May 1st should be go time!
Hillsborough	Government	This is an incredibly difficult, and dangerous time for all Floridians. The implications of government imposed sanctions, and the rampant spread of the Covid-19 virus leave us with no easy solutions. Unfortunately anything the government does will be met with ridicule by the opposition and there is no one right answer. The current restrictions have saved lives, and continue to do so. They also destroy livelihoods and continue to do so, often to those who are least able to recover from such effects. I believe that reopening Florida, and the lifting of current restrictions may be a political requirement in the near future. But I would ask that the government take a VERY strong stance about the belief and best practice recommendations be that people stay home, and continue to practice social distancing. Some measures need to be in place to protect workers who want to follow recommended quarantine guidelines, but who's employment requires them to attend public employment activities. Let those that want to expose themselves do so, and provide measures to allow those who want to follow recommendations do so in a way that allows them to survive economically through until the experts agree it is 100% safe to resume normal behavior. I plan to stay at home as much as possible, as long as possible, until respected authorities let us know it is safe.
Charlotte	Food	It is my belief that it is way too early to open things up. I think it will backfire.

AMERICAN OVERSIGHT

Hillsborough	General	Gyms - Personal trainers - boot camps should be allowed to operate with clients either inside or outside while practicing social distancing Restaurants - should be allowed to open and have a “rolling” system for patrons. Maybe begin with allowing 20 patrons to dine inside at a time and sit provide carry out. Those with outside dining should be operating while practicing social distancing Parks - should reopen with social distancing protocols in place Salons and barbershops - reopens with social distancing in place All businesses should reopen with social distancing protocols in place
Alachua	Education	I am hoping things are in a good place with testing and vaccines by the time school starts. I teach Kindergarten and am 64 years old. Having 18 little bodies together in one room is a little worrisome for me because of my age. But I sure do miss being with my students. Just make sure you consider the health of everyone, (teachers, custodians, cafeteria workers, bus drivers, other support staff) when making decisions. To date, I think Governor DiSantis has done a good job of trying to find a healthy balance. Keep up the good work.
Pasco	General	Please take into consideration holding off opening the state of Florida. Being in healthcare opening up right now is going to undo all the hard work we have done. There are still so many sick people that are being treated and were asking for more problems if we open up. In my opinion keep the state closed and let’s get a better handle on the virus. Visitors from other stars should not be allowed in out state considering the situation at hand , beaches should not be open , keep the bars closed etc.
Pinellas	General	Please do not reopen Florida. I do not feel the numbers have gone down enough that we are ready. Please consider holding off on reopening until we have seen more of a decrease in the numbers.
Polk	General	In my opinion. With opening Florida back up. Is a bad idea. The reason why I say this is. We as the people are still not out of the woods with this corona virus. And if ppl would sit back and think it over on to why I'm say this. You open Florida there is going to be a domino's effect. I can understand certain business opening and beaches. But again it's a bad idea. What happens if someone slipped by sneezing or contact. All it takes is just 1 time. And we will be back to square 1. So that's why I'm saying plz rethink . It over. Thank you. Susan.

AMERICAN OVERSIGHT

Pinellas	General	The Honorable Ron Desantis, Governor of Florida, I am grateful, you Sir, have taken the lead on how to approach this disastrous virus that have left many people unemployed and some others sick. With your task force behind you, our state can look up to the future without regrets. Floridians are living in unprecedented times at the moment and are anxious to hear how our beautiful state will open sooner than later. As you may have seen before, our state has the capacity to overcome anything and this virus will not be different from anything else. Floridians are resilient people and with your help and leadership, we can safely re-open Florida and head towards a better economy. Sir, you have mentioned in interviews that you support people exercising and getting fresh air while this virus passes. I absolutely concur with you on this matter. Outdoor activities will take the pressure off people, while your government implement decisions to help Florida move forward. I feel, like many other Floridians, this virus is no more dangerous than any other virus, but I also understand how people can get anxious about it and sometimes misbehave in ways, we cannot fathom. Therefore, the need of outdoor activities is necessary. I have some ideas that you Sir, may be able to look at and come up with your own informed decisions. Beaches, recreational parks, and Pools: Should be fully open for swimming, sunbathing, walking, jogging, etc... At this point, not everyone will feel confident to go to the beach, so they may not be as crowded as people may think and people are aware of keeping social distance from others. Hotels and Coastal businesses: Florida is a prefer destination for many people around the world. Now, immigration is halted, but Floridians can take advantage of vacationing around the state. This will help businesses to move the economy in the right direction. Small Businesses: These are the small "veins" that pump the economy and help big companies to thrive. Opening small businesses is an intellectual decision that can help boost our economy.
Pasco	General	It is way to early to open the state back up. This will continue to kill and infect others like me that are extremely vulnerable to this.
Citrus	General	Just keep watching the numbers and watch for hot spot, you have way more information that I do, thanks so far.
Orange	Tourism	I think the state needs to open up ASAP including theme parks. Most of my family is affected by losing their jobs work in a park and with the lack of unemployment benefits (yes we are still waiting from 3/22 to get funds from my husbands job) the people of Florida NEED to open up for out well being. Do it safely of course but open it up!! I think if theme parks started with just Florida residents then go from there.
Lee	General	Yes, begin opening business now. However, we need to ask everyone to comply: wash your hands regularly, stay home if you don't feel good, maintain safe personal distance and wear some form of face covering until further notice. And require business owners to maintain an anti-viral environment, daily temp checks for all employee's and adherents to all recommended operating procedures. We need to get the economy up and running, safely.....we can do it.

AMERICAN OVERSIGHT

Hillsborough	Education	Online/E-learning education needs to stop. It would be better to close school early and send them back earlier for the next school year. I work 50 plus hours a week in an essential postion and some days it is very difficult for me to do all of the school work that my children are being assigned. It adds additional stress to the situation. My daughter is not learning anything at this point so it is really a waste of everyone's time. The internet is slow, the zoom calls don't work all of the time, the education websites crash all of the time. Also, how are you going to handle re-opening the schools?? There is no way they can social distance at school. The schools are over crowded as it is now. And if parents choose to hold their children back there is going to be even more crowding. When the schools open they need to be cleaned by a professional service. During the regular school year the schools are not cleaned properly. Often times the teachers stay after and bring in their own supplies to clean the classrooms. How are we going to address the beginning of the next school year? As many of us know, the beginning of the school year often brings on a lot of new colds with everyone going back to school. As far as opening the state, I do not think it is time. The people who are saying to open up the state, let people work are not thinking this through. Even if businesses open who is going to visit them? The majority of Floridians do not feel safe right now.
Alachua	General	Opening of more essential areas such as elective surgery is a good start. But providing adequate testing is fundamental. Strict guidelines need to be implemented and adhered. Testing for virus would need to happen the day of procedure not any earlier. Testing staff would need to be done daily as well. Without these actions enforced lawsuits would supersede the reasoning and businesses would fail just for that reason.
Miami-Dade	Healthcare	Please keep Florida closed until there is a vaccine and cure in place. Covid-19 affects healthy people of all ages, including babies and children. Everyday on the news, I see healthy young people dying from Covid. Now healthy young people are also suffering from strokes due to Covid. Please stop gambling with our lives and the lives of our precious children. Covid is airborne and is very dangerous. Please fix the unemployment system and expand benefits, $275 a week is horrendous. Please make sure all essential workers have the proper PPE or their employers get fined. Including making sure that all police officers, grocery store workers and delivery drivers are provided with masks, gloves and disenfecting wipes. The only people that should be deciding when to open FL are scientists, doctors and disease infection specialists. Right now we need to focus on protecting essential workers and expanding unemployment benefits. After there is a vaccine and a cure, then open up FL with guidance from doctors. Thank you for allowing us to submit our opinions.

AMERICAN OVERSIGHT

Sarasota	General	It is time to start re-opening Our state. Less than 1% of the population has died from this more people die on the interstate. From suicide heroin addiction's cancer but we can't shut all that down can we. I am a small business I have outdoor dining why can't I Seat guests outdoors. Open the beaches up fully open the parks up. The media has blown is so far out of proportion but it's time we take action against them. More people die of the flu we can't shut the world down it's time to reopen. My small business won't survive.
Palm Beach	General	Hi! I just wanted to express my opinion that please do not rush opening everything until we know for certain the effects and how to better control Coronavirus spread. I lost my job, I'm in college, and I know none of this is easy for anyone! I thank you for your hard work and consideration. Please don't rush for the sake of the economy. We will rebuild, but it's not like opening May 1 is going to be a magic bullet in terms of not spreading the virus. There is no rush when it comes to saving people's lives, so please don't rush!!!
Miami-Dade	General	I think that we should open Florida at the Floridians discretion and with social distancing protocols in place. Floridians have shown that we can follow rules and regulations and we are disciplined. However, we should keep the boarders closed for tourists for now. We need to first get our collective immune system before we let people from other states and countries here. We need to get the economy going, open businesses, parks, beaches, water but keep hotels and boarders closed until the 3rd stage per federal government recommendations.
Broward	Healthcare	Do not re open until it is absolutely 100% safe to do so. Untill the Governor tours all hospitals and nursing homes and can safely shake hands with nurses and Doctors and carectakers as he tours those facilities. Do not ask Floridians to go out and put themselves their families and neighbors in harms way or in any situation you Governor wouldn't put yourself and family through if you choose to re open.
St. Johns	Government	Open up, before you kill the economy!
Manatee	General	As a 70 year old asthmatic who had pneumonia last year I am very nervous about opening up Florida too early. I won't feel comfortable going to the grocery store or restaurant to or the theatre if we open up before we know the Covid virus is well under control. Right now that means reduction of Covid cases for at least two weeks, and I would prefer longer. Clearly Florida is NOT ready!
Palm Beach	Recreation	Please open beaches /water, however leave the parking lots closed and do not allow congregations. A lot of states are doing this including California and Hawaii. Florida, like CA HI, is an ocean-centric state and the residents value the beaches.
Okaloosa	Recreation	The beaches in Okaloosa county both public & private should be reopened on May 1, 2020 with no restrictions. Due to the proven scientific evidence of sunlight & UV rays killing the coronavirus within seconds, it is more helpful for people to be out on the beaches instead of cooped up in their homes!

AMERICAN OVERSIGHT

Collier	General	As a small business owner of two fitness centers in south Florida it is imperative that we follow the Presidents guidelines and start opening up businesses. Fitness is a way of life for many citizens, it provides them a way of relief from their daily struggles. What may not be essential to someone who does not participate in fitness, it most definitely is an essential part of life for fitness enthusiasts. Our company has already adopted new operating procedures to help combat the spread of the virus, and those changes have been communicated to our members. Of course we could also talk about the devastating economic burden this has caused to our business. We were forced close, but still required to pay out $120k in rent and utilities in April. We did receive money from the PPP, that is much appreciated but only helps with our payroll. We are a family business that has invested everything we have ever worked for to open up these facilities. We will not stand idly as those making decisions ruin our lives. Please make the right decision, with or without you we are resuming business on May 1 with our new guidelines in place. I'd rather go to jail and stand for Freedom then be ruined financially because of you ineptitude.
Hernando	General	I am proud of how Fla leadership has handled the virus. The media loves to breed fear yet you just rolled up your sleeves and did what needed to be done. And you created a model of success for our nation. The covid tracker app is awesome. It allowed me to personally see the data and compare that to the recommended guidelines. We appreciate all you have done and that you want our opinion. 1. We are ready for re-opening because we have the situation contained, we are smarter and better prepared. Despite what the media says, we are ADULTS and the vast majority will make the right choices. 2. The cost of not reopening is far too large than the benefits of sitting home in fear. 3. In reality, there is a lot open and yet nothing has spiraled because people are doing the right things. 4. The biggest concern is obviously SE florida. with Miami averaging 169 cases per 100,000 over the last 14 days, 3+ times the recommended 50. The rest of florida is at 41, almost 20% under the target and that falls significantly more if you take out palm county and broward. The re-open plan needs to be phased for regions of our state. And SE residents are going to have to step up and not spill into other areas. There needs to be a clear call to them to have pride and do their part...we've been doing our part in the rest of florida. 5. It is un-American to ask all residents to lose their livelihood, and stay in their homes because of regional challenges. I feel for Miami but what does staying at home in central florida do to help them. 6. The reason for the shut down was to save as many lives as possible and not overwhelm the hospitals. The hospitals are not overwhelmed and many are financially challenged and workers laid off. We can never prevent any lose of life as much as we try.

AMERICAN OVERSIGHT

Pinellas	General	It is clear that Florida has only two or three counties that have not passed the peak of COVID-19 cases. Those few should remain locked down, the rest should re-open to normal operations as quickly as possible, especially to allow citizens to have access to public parks and beaches. If there are concerns about large gatherings, just don't open the bars or permit alcohol. Also if Target and liquor stores can operate safely, so can small businesses. At-risk groups should continue to shelter in place and nursing homes must be protected strongly with restrictions on visitors, temperature scans of staff, and other vigilant screening. But there does not appear to be any need to require the entire population to cower at home with their eyes glued to media. Go outside, get some sun and some exercise, eat on an outdoor patio, don't shake hands, don't hug strangers, GO TO CHURCH, and practice normal sensible measures for good health and manners like your mama taught you.
Hillsborough	General	Please do not reopen Florida task force. Reopening will only be a temporary solution to our economy, we will more than likely see more virus cases along with death tolls rise in a matter of weeks from opening and making our economy worse in the long run. Not to mention it would defeat the purpose of the so far social distancing and staying order has accomplished. We need to contained the virus not have further outbreaks, it’s a matter of safety.
Bay	General	So far the science hasn't been that indicative of reality, so reopen everything but maintain the ban on vacation rentals until at least after Memorial Day so we can slowly return to normal without an influx of tourists to cope with. By now, most of us know the current level of risk in our specific area and I think most would be willing to take prudent precautions to resume their lives. Each of us can make their own decision about the amount of risk each we are willing to take at any given time and for any particular activity. The State should continue to monitor and be ready to surge resources as needed to any areas of outbreak. You've done great so far....glad I don't live in Michigan!
Broward	General	Beaches and open spaces like parks must be open ASAP. Beaches could be open with some time limits and in order to avoid crowds with parking lots closed. Streets are overcrowded by so many who want to walk, run and exercise due to parks and beaches closure. It’s ridiculous when crowds are walking, standing on the narrow strip of concrete along the beach being watched closely by police and lifeguards for not to step on the sand. Does it really work and serves the purpose if we are overcrowding everywhere and elsewhere but can’t have an access to bigger and wider areas like beaches and parks? It almost seems like beach and park bears threat for our lives. In fact it’s the opposite. Fresh ocean air makes people healthier, sun gives us vitamin D, all this with physical activity, swimming, exercising and happy mood contributes to stronger immune system and less susceptibility to viruses. Please, promote BEACHES-PARKS-EXERSIZE-SUN-HAPPINESS-HEALTH in our SUNSHINE STATE.

AMERICAN OVERSIGHT

Brevard	Healthcare	Please lift the stay at home order. It is not good for our mental health. We can still wear masks and practice social distancing.Then open things incrementally. We need to be able to visit our family and friends and have that human connection.
Citrus	Government	Do NOT open up Florida please ! It's way too soon. They'll be more cases and way more deaths from the virus if you open up. Opening up now is just asking for cases to raise even more. We haven't even reached the peak of it yet. Please please PLEASE do not do it !
Escambia	General	Please reopen Florida businesses & beaches with as little restrictions as possible. Most people have common sense and will continue practicing social distancing & extra sterilization on their own. Breaking up large parties on the beach is one thing but restricting hours & disallowing sunbathing is nonsensical. Also please consider easing current prison like restrictions at ALF's. Please allow residents to have meals together in shifts with proper social distancing. Also allow family members to visit residents in outdoor areas, even a parking lot, again with adherence to social distancing. I understand this is an at risk population, but the current procedures that are in place are similar to those of solitary confinement and it is a de facto sentence of a slow cruel death. It's time to start managing to living instead of dying. Thank you, Janel Mack,
Indian River	Healthcare	Like the fact that we are starting to see a decline. I've heard people say June and others saying August and then others say 2021. Personally I think it would be amazing to have a real 4th of July celebration. That could take on a whole new meaning to our future generations. Thank you for doing this.

AMERICAN OVERSIGHT

Brevard	General	Good Afternoon, As a college student, the personal sacrifices that this stay-at-home order have imposed (aside from the mental challenges) are small. However, the sacrifices that have become imposed (thus no longer a sacrifice but punishment) on many Floridians is protracted and immense. Though there is no specific wording in either the amendments or the articles of the U.S. Constitution, the stay-at-home order certainly violates the heart of the U.S. Constitution. Is an order that shuts down businesses really in peoples best interest? Some say yes, but some say no! There is not unanimous consensus that this even works, let alone is a morally right action. Just as with every single hurricane, this reaction is far overblown. I cannot ascertain how this reaction is better than letting people make their own decisions. It is my advice, that Florida do what the heart of the Founding Father's actions were in creating the United States...keeping a restrained government from interfering (without specific legislative authority) with the People who give it the power it has. There should be absolutely no mandatory closings whatsoever, however, advice and guidance how the safest way possible is certainly advisable! The free market is a powerful thing, if people feel unsafe going shopping or out to a restaurant, they will not. If they do feel it is safe, they will go out. Let the local businesses and the free market decide if it is safe. Ultimately, nobody is forced into an interaction that is unsafe if they are unwilling to do it. Our modern technology has made that distance possible. Encourage the people of the State of Florida to go out and spend their money as they feel fit to do. It is their right, it is their freedom, and it is their choice.
Hillsborough	General	I absolutely believe we should continue our shut down. As a mom of three, including an infant and one with asthma, I'm terrified. I'm scared for my 70 year old dad with asthma and a heart condition. I would rather continue our shut down for a few months and BE 100% positive we're all safe, than open up too soon and have this virus hit worse than before. Just with the talk of opening the state, I have seen people relax on all the rules and regulations regarding face masks and leaving the house. Keep us closed, keep us safe.
Hillsborough	General	All businesses should reopen with social distancing protocols in place
St. Johns	General	I would like every business to open up. Business owners should decide if employees can option to continue to work from home or not. Business owners should decide if employees should be required to wear a mask or not. Individuals should choose for themselves where they should go and if they need to wear a mask or not. The antibody test is the most important as many, many people have had it already without knowing it. This shut down cannot go on like this forever. Also, the recovery rate needs to at the forefront because people are afraid but nit be afraid if they knew the recovery rate is so high.

AMERICAN OVERSIGHT

Volusia	General	Feel all business that open must require employees to wear masks. Need more testing sites with no requirements to be met so anyone can get tested. Hope pharmacy testing will soon be available in our area. Feel restaurants will definitely need to space out tables, use disposable menus, staff wear masks. As a senior adult, there must be a way to be sure businesses are going to adhere to strict rules and regulations. There are already too many businesses in our area where I notice staff are not taking precautions and wearing masks. Their not wearing a face covering makes it unsafe for their customers. Everything I read pretty much says seniors and those with preexisting conditions will only be safe if they shelter in place until a vaccine is developed. Seniors do make up a great percentage of Florida's population, and have discretionary money as they have not been hit with losing their jobs, etc. So special precautions must be made to accommodate us so we will feel safe enough to venture out.
Hillsborough	General	Please do not reopen all that is closed. Keep essential open only. It wont hurt to keep closed for a little longer. All the hard work will be for nothing if the virus takes over as it could because there is no vaccine. Our numbers are still rising. We are not ready.
Pinellas	General	I really know science needs to guide this. Stay at home needs to be for another Month. Just to see how many people die in the other states. Every business and person must abide 6 ft apart. Face mask anytime your outside your house. Testing Testing Testing isolate and contact tracing an absolute must. You need to shut down convince stores for a couple weeks so can abide by what's going off today!!! And most of all unlawful to lock senior population down. You can not segragate seniors. What's good for one is good enough for all. Thank you and please make the Right Decision. As we all have found out Money isn't everything?? Richard Johnson
Collier	General	We need to open Florida completely on May 1. The numbers are not there for another day of this complete over reach of government. The secondary effect of this virus will be much worst in the end! Open All immediately we do not need steps to get back to work we need to get to work now all of us!
Hillsborough	Education	I believe schools should not open back up in august until a vaccine has been made. E learning should continue through the next school year or be an option for parents who don't feel comfortable sending their children back to school so soon.
Marion	General	Yes open it up. We can’t hide the rest of our lives. This was supposed to flatten the curb. Not hide until there isn’t anything outside that could harm us.

AMERICAN OVERSIGHT

Seminole	Education	I'm a mathematics teacher at Seminole High School. Reopening the state too early will guarantee a much more aggressive wave of Covid-19 and that will affect public education. If the virus isn't completely under control, it has its chance to resurge in a public goods setting. If even one person, who's asymptomatic, that goes to a public school, thousands of students and hundreds of staff are at risk and that's just one school. We'll either have to migrate towards a completely online platform, again, or suspend public services for a while until it calms down. You have the capability to restart Florida when it's completely safe for us. Do not let us down.
Pinellas	Recreation	Hoping that gyms will be able to open May 8th like originally communicated By the department of agriculture. I own a small business which is a Boot Camp. We are ready to open our doors with limited capacity for camps to help ensure social distancing. We have procedures in place and have trained her team and are ready to go we have also Jenna survey for our clients to see who is ready to come back in the gym the majority is ready and we are ready to open our doors. Please allow us to do so on May 8th.
Hillsborough	Government	I think the stay home orders should stay in effect until the cases are nearly gone especially considering Florida is a tourism state with lots of people visiting from all over the world.
Pasco	General	I think we should hold off another bitty days to make sure we don't get a second wave. I'm the mother of a compromised immune five year old and we have been self isolated for 2 months now and I still will plan on staying home until there are no new cases
Lake	General	Open Lake County.
Osceola	General	It's to early to open. I'm scare to come back to work. Don't put us in risk after dead what ?
Brevard	General	Time to open things up, county by county if necessary.
Orange	General	On the first of May, I would like to see: Open air activities resumed, such as parks, pools, trails, beaches, and even outdoor dining with CDC guidelines in place. One on one appointments at places such as beauty salons, tattoo shops, etc. should be available but by appointment and half capacity as to properly disinfect between guests. Stores should be able to open with limited capacities depending on how many people can they fit comfortably if everyone is six feet—or maybe allow all stores to have curb side pickups. I believe that people that are immunosuppressed and/or have comorbidities should stay home. Anyone over a certain age and have high risk factors should continue to practice extreme social distancing. The healthy should be limiting social interaction, however, the extreme practices for the stay at home order are only weakening our immune systems and increasing other issues (depression, suicide, child abuse, addiction etc). Let people gather in groups less than 5 (not including immediate family members), see if we have any changes and then increase or decrease numbers as more data comes in.

AMERICAN OVERSIGHT

Polk	General	Thank you for the opportunity to give input into reopening Florida. I'm not a fan of reopening everything right away. I'm not really in favor of opening beaches. But if people are desirous of getting out of their homes and having somewhere to go, I guess the beaches, being outdoors and sprawling, may be the best venue in terms of the ability to practice social distancing. Still, I don't think they're safe. I am absolutely opposed to following the Georgia model. Beauty salons, bars, restaurants (indoor dining), bowling alleys. None of these types of businesses should be opened yet. I feel like we've made progress to flatten the curve. I am concerned that opening these kinds of businesses will just erase all of that progress. I would hope none of these kinds of places would open until AT LEAST June. Thank you, again.
Hillsborough	General	I'm all for working toward reopening FL, HOWEVER, before we can rely on individuals not to be at work when they are sick, we have to have easily accessible testing for those that aren't yet showing severe symptoms AND the unemployment system needs fixed. People are not getting paid, they have no choice but to return to work, regardless of health risks to themselves, or others. I'm a restaurant manager. I'd go back to work tomorrow, with some adjustments, but I'm not to the point of desperation that I'd risk myself or others if I get sick. I imagine majority of my staff feels different. No one has received unemployment on our claims filed in MARCH! People filing after us are getting paid. Retro pay is great, but doesn't help the current situation. Before decisions on whether or not to reopen are made, we need to make sure everyone is in the right place to make health conscience decisions. Just try calling unemployment to speak to someone as though you were a normal Joe. You won't get anywhere. 10+ hours on hold only to be disconnected because it's closing time. Or told to call back because it's break time. People need money. Without it, sick people will return to public places because they have no other option.
Orange	General	REOPENING SHOULD NOT BE BASED ON A POLL OF VOTERS! THIS IS LIFE OR DEATH! DON'T LISTEN TO UNIFORMED IDIOTS! LISTEN TO THE SCIENTISTS AND MEDICAL EXPERTS, AND CARE ABOUT YOUR CITIZENS! THE ECONOMY WILL COME BACK BUT DEAD PEOPLE WON'T! LISTEN TO THE SCIENTISTS, NOT THE POLITICIANS! THE MAJORITY OF US WANT TO WAIT UNTIL IT IS SAFE.

AMERICAN OVERSIGHT

Hillsborough	Healthcare	The goal of mitigation was not to overwhelm the hospitals. The hospitals were never overwhelmed. They are operating at half capacity, putting employees on furlough. The economy needs desperately to be reopened. Unemployment is skyrocketing. The PPP hasnt helped as the loans were all given to big companies. Let us all get back to work safely, before there is no work to get back to. I would leave Miami/Ft Lauderdale closed but let the rest of Florida where numbers are much lower and the death rate is extremely low reopen. Governor DeSantis is doing an excellent job I'm very thankful for a republican Governor and President during this crisis.
Orange	Government	I have to renew my tags,and pay$20 extra per tag. No choice, no where is open. Talk about price gouging taxpayers. They should be ashamed of themselves. That's how the gov. treats us peons.When chips our down, guess who pays.
Collier	General	I think we need to start to reopen, maybe May 4th, maybe May 11th, by strictly following the President's Task Force guidelines. I don't think we should just consider those as suggestions. They were well thought out by the experts. Let's just do those to the T.
Broward	Construction	Please do not re-open the state until we have more testing. Please provide more testing. It is irresponsible to open too soon. The time on lock down will have been wasted if there is an increase in infections or deaths. Keep your greedy political motives out of this decision. There is no way at this point to even have real numbers on cases of infections, recovies, or even deaths without adequate testing.
Palm Beach	General	I support opening the beaches. The truth is there's close contact in stores anyway. Those minding the social distancing will continue to do so on the beach and those not: being on the beach isn't going to make any difference
Sarasota	General	Yes, re open the state!! Let restaurant owners and employees need to work
Polk	Healthcare	Physician Assistants employed in "non-essential" medical care, such as Aesthetic Medicine, should be allowed to return to work with restrictions ASAP. Restrictions to include masks, gloves, using aseptic technique for patient care, temperatures taken, and one to one treatments. Even though you deem us non-essential, I am a single mother of 3, with no child support, I no longer have income coming in, I do not qualify for the stimulus checks, and have received no unemployment!! Please allow us to safely return to work in the professional environment we already know to work in with these restrictions!!
Orange	Retail	Recently, Brit Hume, the sober and understated Fox News commentator, voiced the thoughts of millions when he said, "I think its time to consider the possibility… that this lockdown, as opposed to the more moderate mitigation efforts… is a colossal public policy calamity." In addition prolonging the lockdown may also prolong the time necessary to reach herd immunity. In the end the lockdown may prove to have not only been a disaster economically but healthwise as well. I hope the experts are called to account for their mistakes.

AMERICAN OVERSIGHT

Broward	General	I don't think you should rush to open Florida . We elected you not a puppet for trump who is suggesting we drink disinfectants , he's an idiot and if you follow his lead you will also be categorized as an idiot , people will get sick and you will most definitely be voted out next election . We need public leaders that truly care what's best for the people and not they're pockets . Don't be stupid and open Florida to hastily. This is an unprecedented situation handle this with care !
Bay	General	Start paying unemployment and do not reopen restaurants and public places until a major 2 week decline in new cases as well as a way to rest for antibodies so my kids going back to work doesn't bring the disease home to me after weeks of suffering thru this stay at home order. People are starting to struggle with fear with no income due to this ridiculous unemployment application process. 4 weeks in an no closer to getting the first check for anyone here
Lee	Healthcare	We are HORRIFIED about reopening FL at this time without adequate testing in place! We have no idea how extensive this virus is in Florida. There are many Floridians who've isolated themselves who have no idea whether their symptoms were from Covid-19. whether they've been exposed or not, or are potential hosts. Testing criteria were so limited, tests were being rationed & availability to those without health care was tragically unnavigable for many! We have NO idea who's contagious, who's a potential carrier & who's safe. We absolutely understand & support the need to rescue the economy, but if this isn't done under the strict guidelines of educated, informed medical professionals, our death rate will climb. Even at this time, our numbers are hitting new highs. We need to learn from areas where testing was key. IF this is ignored, officials who open Florida prematurely will be viewed as responsible. DO MORE TO TEST & TRACK! THEN open up prudently & under guidelines of those who have the expertise. Lastly, MANY are NOT educated enough to take proper precautions. I see that constantly on my own area beaches, restaurants, country club golf courses, in parks that are now open & more. People are NOT properly distancing or protecting others! This is DANGEROUS without TESTING!

AMERICAN OVERSIGHT

Citrus	Retail	I work in retail and have not seen the effects of the stay at home order. We have had additional traffic, many for non-essential items/browsing. Also, New York/New Jersey residents who have just come down. The drive through test site near my store has people leaving from being tested and driving into our parking lot to shop at Publix and other open locations. We are being overly exposed to the virus in retail. Florida is NOT ready to reopen until people stay home, we have more testing and a faster turnaround on tests. People are waiting 2 weeks or more for results... and not staying home till they get them. I am VERY scared working in retail right now, but I need the paycheck to feed my family. It simply isn't fair for all of us who are essential to be so unnecessarily over exposed. I've excluded as much personal information as possible for fear of potential retaliation.
Orange	Professional Services	It is time for the governor to open the state effective May 1. Our hospitals have plenty of capacity if there is any uptick in Covid – 19 cases. We need to give people the opportunity to go back to work.
St. Johns	Healthcare	I manage and a pediatric dental and orthodontics practice with three locations and 50+ employees. Having been mandated closed for the last 6 weeks, the viability of our practice is certainly in question. Our practice is poised to continue regular operations on May 8th if allowed. Our practice and team are prepared to follow a strict operating protocol that involves temperature checks for staff and patients, health questions, and a variety of additional PPE to maintain the health of our staff and patients. We are health professionals and well versed in maintaining infection control protocols. We strongly urge Governor DeSantis to allow us to return to work no later than May 8
Orange	General	Please do not open Florida back up. To open Florida back up would be putting all of your people that you swore to listen to, protect, and fight for in harms way again. We are one of the top tourist destinations which means people from ALL OVER will be able to visit and spread new strands and therefore have a resurgence of cases again. Do you really want Florida to become the next hot spot having to put thousands of body bags in freezer trucks to hold onto until this is all over? Please do not open the state back up until we are more clear than not!
Hillsborough	General	Reopen. Make masks mandatory. If a mask can't be worn at all times it doesn't reopen. Allow the vulnerable to collect unemployment through the end of the year.
Hillsborough	Retail	Please open retail businesses. Social distancing can be maintained like is being practiced at grocery stores and pharmacies currently. Let's open the malls, Dicks sporting goods, tjmaxx, Ross, etc and remind people to be mindful of social distancing .Please open retail businesses as soon as possible .

AMERICAN OVERSIGHT

Brevard	General	In the interest of the economy, I find no true issues with reopening as a whole, with one exception. There is a group of people, myself included that are labeled as high risk. Fortunately, I happen to work for a company who allows me to work from home. However, if the reopen is to be commenced, I fear they may ask me to return to the facility. At this time, I do not feel comfortable being in public as the rate of cases continue to rise. Those with certain conditions, mine being diabetes, are at further risk of higher complications if contracted. I believe that the lock down should be continued for those at higher risk at this time. I also believe until the cases are lowered in the state as a whole, that people continue to obey a six feet apart distance. Thank you.
Broward	Recreation	Please reopen the State. With traffic flow management, class size adjustments and proper cleaning practices we can do it safely. Personally, I need to get back to work for both financial reasons and emotional reasons. I fear without opening our economy soon, my place of work will not reopen or when it does it will severely struggle due to clients ability to afford it for their children. Please allow businesses to reopen and then for people to choose whether or not to reenter society.
St. Johns	General	No stimulus check yet, denied other assistance- FL is going to have a MAJOR homeless problem very soon if we can't get back to work.
Polk	Government	It's not time yet to reopen any thing. I'm a senior citizen and haven't gone out to a store because I don't want to catch this deadly virus,just not worth the risk. STAY AT HOME PEOPLE !
Brevard	Professional Services	If Home Depot, Walmart and Lowes can be open, then churches, restaurants and small business should open. Being in a small business is much safer than the big box stores. There are fewer people and they are able to control it better. Churches could block off every other pew and ask people to spread out. They would comply. Beauty shops could limit the number of appointments. WE have already seen that this isn't as bad as the media presented it. Quit catering to the big box stores and open small business!!
Miami-Dade	General	MR GOVERNOR I HAVE LIVED IN MIAMI ALMOST MY WHOLE LIFE CLOSE TO BEING 70 YEARS OLD I THINK ITS APPUALING THAT YOU ARE CONSIDERING TO REOPEN WE ARE NOT READY WE HAVE TOMANY PEOPLE LIVING HERE FOR OUR FAMOUS HOT SPOTS TO BE HONEST I VOTED FOR YOU BUTNOW IM DOUBTING MY DECISION I NEVER THOUGHT YOU WOULD WANT TO THINK OF RE OPENING MIAMI DADE WE HAVE OVER 11000 CASES AND GROWING THIS WILLMAKE THINGS WORSE FOR US YOU WILL BE RISKING OUR LIVES PERIOD . WE FEELLIKE YOU ARE NOT AND YOUR FELLOW TASK MEMBERS AND POLITICAINS DONT CARE ABOUT OUR HEALTH AND PUTTING MONEY AND ECONOMY FIRST THAT IS SHAMEFUL IM QUITE DISPPAOINTED SIR . PLEASE ACT LIKE THE NORTH CARO,INA GOVERNOR HE SHOWS HE CARES FOR HIS STATE AND PEOPLE NOT TILL MAY 8TH HES OPEN FOLLOW HIM NOT THE DISGRACE OG GEORGIA ..MIAMI NEEDS MORE TIME..

AMERICAN OVERSIGHT

Orange	General	I believe in order to safely reopen the state everyone should be tested to see if there test positive or been infected with the virus..This way we can properly do contact tracking to keep people who's a symptom matic or infected to stay home ..It's not safe just to reopen and put people life at risk knowing they can dye without a cure. Everything shouldn't rely on money because we out here with no jobs struggling and haven't recieved help this is why people are panicking and will to risk their life because they still have bills to pay and no relief...I hope this help before we loose more lives.
Manatee	Healthcare	As a dentist, universal precautions that have already been in place with additional recommends PPE we are able to keep our patients, staff, and ourselves safe. We need to take care of peoples' basic dental needs. Right now, my business is jeopardy as well. Please re-open Florida!
Nassau	Professional Services	I am 68 years old, I have stayed home as asked except for essential need to go out. Very tired of the lectures fr5 all the smart people who think they know what's best for me and everyone else. Open the state up for business so we can go to church, get a haircut or go to the beach for a stroll. I am beginning to think someone must be making a lot of money over this or else it would stop. Actually none of you government folks who by the way are elected not appointed for life have no control, only God who Is we owns it all is.
Pinellas	General	First, I wish that small, family owned gyms that have personal training sessions not get lumped in together with large gyms. I think that a smaller gym could easily abide by the CDC guidelines. Hopefully, there will be a way to open larger gyms as well but I just wish they wouldn't get lumped together. They are not the same!! I would also like to see the beaches in Pinellas County open including the state parks in our county. Once a week, I go to the city park for a walk and I am truly grateful that it remained open. I see people abiding by the rules. I think now that the tourists and spring breakers are gone that the residents can go to the beach responsibly. Walking is fine but please don't limit the hours too much so that everyone isn't there at the same time!
Collier	General	No, no, no. Not mixing with you all until I see what it does to you. Please don't drink Chlorox.
Duval	General	REOPEN. CURE IS WORSE THAN DISEASE. GIVE PEOPLE CHOICES THEY CAN ALWAYS STAY HOME. KILLING THE ECONOMY. PEOPLE ARE HUNGRY.
Palm Beach	Recreation	Please reopen the beaches! The sidewalks are crowded on A1A. Opening the beach would alleviate some of the congestion. If the leaders in Boca Raton are worried about Broward residents crowding our beaches then just allow residents with beach permits. In Boca Raton it would be very simple to limit the amount of cars allowed into the beach parking lots. There is no beach parking aside from the city parks, so very easily controlled. At the very least please open the private beaches. My apartment is on the beach and I am not allowed to go into the beach. In my area we mostly live in high rise apartments and condos and have no outside space other than the beach. The Governor has said more than once that being outside is good for us. Thank you!

AMERICAN OVERSIGHT

Hillsborough	Healthcare	There is to much unknown about this virus at this time to suggest the reopening of Florida. To many variables on how its carried, spread, or even how the symptoms present themselves. How about our Governor actually listen to the healthcare professions that are directly having to blindly treat this virus and see how they feel about reopening Florida. Maybe instead of being so concerned about money rolling into the theme parks he should focus more on funding the research for a cure or buying ppes for the health professional's risking their own lives daily.
Hillsborough	General	I understand the economy is a very important matter; however, that can always be recovered. Lives cannot. Lives and the citizens' well being is more important at the moment. Please enforce staying at home in a strict matter, so that we can beat this pandemic faster and then recover our economy. In the meantime, please provide successful financial relief for those who need it most. Thank you.
Martin	General	As a task force please consider what this is doing to peoples financial lives. Some businesses will not be able to afford to open. This means those employees will not have a job to go back to either. We definitely need grooming businesses to open up with social distancing and wearing masks. There is no reason guys cannot get a haircut, ladies cannot het their hair or nails done. This lengthy confinement is leading to depression and anxiety, short tempers, etc. Please work on making our lives more livable.
Hillsborough	General	Do not reopen. Keep essential open only thank you
Palm Beach	Recreation	Open up beaches to recreation, surfing, running, swimming. I think this should be done to all florida beaches so people dont end up crowding spots if only specific beaches open up to recreation.
Collier	Tourism	My family would like for the governor to be aggressive in opening our state. We believe the economic ramifications far outweigh the risks of the virus. We now know that the virus is only deadly to those with underlying conditions and we believe those of us without underlying conditions MUST get out and start the economy back up again. While this virus IS more deadly to a select group of individuals and it DOES bring very terrible symptoms to even the healthy who contract it, it is no less contagious than the flu, which also has up to a 75% asymptomatic population. We must start seeing COVID 19 has a new flu strain and allow Floridians to deal with it as such. Thank you for listening and taking our opinions into consideration!! Brooke
Polk	General	It's not a good idea to re open right now people are still dropping like flies. The virus is still greatly in the country it didn't die down or anything. We are not doing any better really

AMERICAN OVERSIGHT

Collier	General	Don't you dare try to open up right now! It's way too early, my husband and I are scared about this and we are worried about my mother. Why doesn't the governor get his shit together on the unemployment situation! That is far more important than opening up businesses that none of us will be going to. I can't for the life of me understand why he has put together the group of people he has for this task force. I will not ever support any of the businesses that these members are working for. It's a joke about being able to safely open up right now. Why isn't the Niki Freid on the board and a couple of doctors instead of people who do not care about anything else except for making money while people who are desperately in need of help become potential Essential Workers for their own agenda!
Pinellas	General	The state should NOT are-open until every last at risk person, every food and personal service person has been tested and PE is readily available to ALL health care workers. What good does a premature re-opening do for tourism ? Come to the virus infested swamp, kill grandma and your youngest child at the same time ?
Hillsborough	Healthcare	2 items are of significant concern. 1) Florida must begin allowing all medical, vision, and dental care. People are suffering and the downstream impact will be terrible of the government deciding what is essential vs non-essential. People are not able to get cancer screenings and cancers that could had been caught early won't be. 2) Prohibiting swimming in pools and beaches is limiting healthy exercise. For people with arthritis, swimming is vital in keeping us active and free of pain. In addition, exercise increases immunity. All of the above can be done per the CDC guidelines. Stay at Home is extremely important for the vulnerable population and people not feeling well, but allow the healthy population our constitutional rights. In addition, a sick economy can cause further illness, mental illness, homelessness, starvation, and increase in domestic violence and child abuse. Thank you for the opportunity for the public to provide feedback.
Broward	Tourism	My first concern is the theme parks. They should NOT be open until this virus is contained. Even having just Florida residents admitted is too much. There are too many residents and there would be another spike. Also non essential business should remain closed for another few weeks. Bad enough the essential businesses are in harms way. Another Publix employee was diagnosed today at Royal Palm and University Dr in Coral Springs. Happens to be the store I shop in and I'm over 75. Opening beaches should be done with short hours and police patrolled. The younger generation will go in bunches even with social distancing in place. Florida still has a high rate of new cases. My opinion is Florida should stay closed until end of May and Disneyworld and Universal and other parks remain closed until further notice. Better be safe now than sorry later. Thank you Gov DeSantis.

AMERICAN OVERSIGHT

Martin	General	The state should not rush reopening! We have not even peaked yet. The testing has been unavailable to residents on large scale, and test results are taking weeks to get back. Perhaps if there was wide scale testing, people could go back to work if they are healthy and they continue to not show symptoms and take preventative measures. Rushing back to work to avoid paying unemployment is reckless. Instead of bailing large corporations out (ones who make political contributions), focus on the people that need help the most!
Pasco	General	I think it would be irresponsible to open Florida back up. If you look at history, the pandemics usually have a second wave. If we open now, we will be risking more people's lives than before. I urge you to use history as a map and let it guide you into a safer future! Look at the second wave of the Spanish flu, h1n1... An economy can be rebuilt.
Palm Beach	General	Do not open the state until healthcare professionals says it's safe to do so. your panel of experts does not contain a single professional from the field that matters the most right now. Do not open the state, prematurely. Those of us staying home, and following the rules, will be the ones who will suffer, with another prolonged stay at home order. Take care of your people, fix the unemployment system, which Rick Scott broke, and get your people paid.
Citrus	Recreation	Allow state parks to open to campers with reservations. This will limit the numbers in a state park but allow people to still maintain social distancing by going back to their own campsite.
Palm Beach	Recreation	Thank you for allowing public comment. I am writing o appeal to the Palm Beach County & State Officials to allow organized Equestrian Events to commence as soon as possible state wide and specifically in Wellington. Not only do they provide a source of great recreation for the avid horse owner, all events provide income to the self-employed who manage and run the events. The niche community in Wellington is seeking to re-start events to not only assist in providing income to the numerous staff and officials who have been grounded but to also provide a training ground for the horses who are all of a sudden out of competition. The USEF (National Governing Body) for Equestrian Sport is seeking guidance from the States and Local officials as to when to re-start, but in the meanwhile it would be advantageous to so many for events at the local level to start back up while we wait for the "Green Light" nationally & internationally. Horseback Riding is an outdoor sport and management teams nationwide have already thought out numerous mitigation protocols to limit the number of people on the competition grounds and how best to protect their staff and all competitors. The industry in Wellington is eager to "get back to work" so as such please consider allowing the Equestrian Sports Production Team in Wellington, under the guidance of Michael Stone & David Burton, JR to activate Equestrian Sport as soon as possible.
Seminole	Professional Services	I think it's too early to open up nail salons.

AMERICAN OVERSIGHT

Hillsborough	Professional Services	To whom it may concern, We would like to see community pools open back up for residents. Families stay in their own group at the pool, so social distancing would still be followed. The pools are treated with all kinds of chemicals so I doubt very seriously that anything could survive in pool water. With enhanced cleaning services I feel that this could work. Thanks for taking the time to consider this. Thanks, Paulette wagner
Palm Beach	Real Estate	I personally feel that we would only be encouraging a second peek if we open everything up too soon.We need to look closely at the 1918 flu pandemic which killed more people when they lifted social distance restrictions. Every business that is able to work remotely should keep doing that. Real N95 masks should be provided to ALL essential workers. Anyone caught walking in to a business and not wearing a mask should be given one. Regular businesses should NOT open until the number new cases has dropped steadily for at least two weeks as recommended. With a family member on a ventilator and my business reduced to almost nothing, I can't imagine risking more lives for a few $.
Lee	General	I don't think Florida should reopen until June. Opening next week will only ruin all the work we've already put into keeping our state safe. And having missed out on work and money will have been in vain.
Volusia	General	We should not be opening up ANYTHING within our state!!! I am concerned, especially that I work within the Judicial system. We should have to show a 30 day DECLINE in any new cases or deaths within the entire state. It also did not help us, that the New York, New Jersey people came to OUR STATE after they were put into a lock down by the Governors.. AND WE LET THEM IN!!! Based on that alone, we should not even begin to consider opening anything until at the very least, mid to late June. I am concerned that there are people who think this is all a JOKE! This is no joke. I lost a friend to COVID-19! People are not heeding the warnings given. They are out in the stores WITHOUT any kind of face covering, taking the whole family like it is just another outing. We should not be in any hurry to open anything. So some think it is an inconvenience...they would not think that if it was one of them who lost a loved one! PLEASE, DO NOT RUSH THIS AT ALL!
Collier	General	Open up salon services with clients and operators wearing masks during service. Many people out of work,. Need to get things moving. No one wants to get Clovid-19 so people will be careful.
Miami-Dade	General	We don't we don't have a cure this is not the time please don't
Pasco	Recreation	I think that the beaches and community pools should Re-open ASAP. People don't usually purposely try to get close to people that they don't know at these places. I think for the most part, people would respect the social distancing. Of course you'd have the idiots here and there, but you're going to have that no matter what. Thank you for listening.
Bay	General	I would like to see restaurants open with limited capacity and the beach open for locals and their guests with unlimited access and all hours.

AMERICAN OVERSIGHT

Hillsborough	Retail	I'm a Retail worker, I work for a wonderful company that has been taking care of us.I also have family in Spain, and they still lockdown ...going on almost 7 weeks....we here, in Florida still see people not respecting the simple guidelines. Cases are raising everyday. We should wait a couple more weeks to see if we are flat curve, right now we still raising everyday. Wait, we need to healthy to rebuild.
Citrus	Recreation	PLEASE REOPEN THE WITHACOOCHEE STATE BIKE TRAIL IT IS 46 MILES OF PAVED TRAIL IN CITRUS COUNTY . SO WE SENIOR CITIZENS CAN STOP RIDING IN THE STREETS THANK YOU
Pinellas	General	Do not cave to the alarmist liberal media. This is bankrupting more people than it is making sick. People can choose to stay home if they desire. Closing down businesses is tyranny. Open the damned state.
Miami-Dade	Retail	I am contracted with the city of Miami Beach to run outdoor street markets in which over 200 vendors and their families make their living. We would like consideration in reopening in the earlier phases as we are outdoors and can better accommodate social distancing.
Pinellas	General	Please be a decisive leader and listen to the health care professionals. DO NOT OPEN ANYTHING UNTIL THEY SAY ITS SAFE! A little bit of Financial pain now is better than a bunch of dead people later
Lee	Healthcare	It will be a tragic mistake to re open Florida just yet. According to the epidemiologist and physicians the full contagion is not yet even known. In the hospitals younger persons with lesser symptoms in their 20' to 50's are suddenly dying of Blood Clots in the heart and brain while testing positive for Covid - 19. Our physical makeups can not adapt to the illness in an already over taxed medical environment. If you re open now, it will likely result in more deaths than estimated and the financial ramifications will be worse from additional outbreaks and shut downs. Give us all a chance to survive this and make a wise decision not to resume life as it was until some answers to science are available. Require everyone to wear masks when outside their abode or be penalized. Even four more weeks will reveal data needed to decide when to re open responsibly.

AMERICAN OVERSIGHT

Polk	General	I have zero medical training but don't believe any is necessary to see things that appear to be obvious. If the Wuhan virus is the biggest threat to the health of those of us living right now.....at least for our area, Publix and Walmart checkout lines would be the place to get exposed. Like many others, I strongly suspect this virus has been around a lot longer than we were initially being told. No medical training/background is needed to understand that our vulnerable population —- those with underlying conditions —- are most at risk if they are exposed. That is why they should do what is possible or practical to avoid close contact with others for the time being. The high ranking health officials have continually down played the reality and benefit of herd immunity which makes no sense to me and a lot of others, to include a number of people who have spent a lot of their time working on issues like this. I am in the group who believes not only are we doing long term damage to peoples lives by the economic shutdown, I also believe we could be doing harm to the physical health of society as a whole by forcing the delay of the "herd immunity" that comes out of an outbreak. I copied and pasted this because the Big Picture matters... "I was reading some posts for and against reopening the country. One was talking about being selfish and it got me to thinking. There are those wanting to reopen yet they're being classified as selfish. There are those that rely on all kinds of people to supply them while they cower in fear at home. Isn't that being selfish too? You expect your garbage to be picked up, you expect the grocery store to be open so you can get milk, you expect truck drivers to supply the stores, you expect farmers, meatpackers, fruit and vegetable pickers all to keep food in that grocery store. You expect Amazon to still ship all the things you're ordering while you sit at home shopping. You expect the delivery driver to leave it on your doorstep. You expect your phone to work, your power to stay on, and your mail to show up rain, sleet, or shine. And most important, you expect the doctors and nurses to be there if you need them although many of them across the country have been furloughed because their units and services have been shut down while the entire system focuses only on COVID19. The whole premise of shelter in place is based on the arrogant idea that others must risk their health so you can protect yours. There is
Lee	General	I fully support the phased approach of reopening the state. As long as the number of new cases continue declining then I would advocate moving to the next phase. However I don't understand why masks are not required at grocery and other retail stores now. I think as part of the reopening that we should make wearing a mask mandatory. Obviously if you are in a restaurant or bar you would have to remove your mask to eat or drink but otherwise I think we should be masked up.
Pinellas	General	Tests from around the country are proving lockdown is not working, a large portion of the population already had corona and it continues to spread unchecked. You did not 'flatten the curve' and will not. Even with the heights of the spread, your justification of sparing our medical resources and protecting those at-risk are unfounded. By continuing this poorly-thought out overreaction, you are only bringing harm to our people and destroying what remains of our economy. Delaying only makes you look foolish and brings greater harm to our great state. Not all of us are so gullible as to buy the regularly repeated lies, we know how ineffective these measures are. We will remember when it comes time for elections and use our votes to hold those accountable for this and future harms.

AMERICAN OVERSIGHT

Pasco	General	Open up everything. Suggest those at risk limit their activities. Let the rest of us develop herd immunity so that the rest have a better chance of survival once they reenter daily activity. This will also help limit overwhelming hospital systems as those most vulnerable will hopefully not end up there in such numbers all at once. We are just prolonging the inevitable at this rate- it needs to spread more to protect those most at risk.
Sarasota	Education	Florida has terrible support for unemployment benefits so lots of people need to work. However, if it's not safe to work for the employees or the general population what can be done? We have so many nursing homes and retirement facilities that need protection for the residents and employees that the state should track the spread of virus carefully. Tourism may be the state's big moneymaker, but many won't travel this year and those who do may be carrying and/or spreading the virus. Tourism income should not trump the well-being our Florida citizens.
Orange	General	At some point the residents safety becomes more important than keeping Trump happy. Statewide testing has been so limited that their could be thousands of asymptomatic carriers that could be unleashed to spread this virus and the second wave could be worse. With the large number of elderly people you could create a powder keg of exposure. But you don't even seem to understand that thousands of residents can't pay their bills or even afford food due to the broken unemployment system, not to mention it is one lowest paying amounts in the country and only for 12 weeks because you want extend to 26. The federal funds have not been distributed.. What a joke, no you have to pay 119 million additional tax payer dollars to fix the system you already knew was broken. You can't even fix the systems that are broken in this state, how do we trust you make the best decisions in re-opening the state economy. You have to have state wide mass testing as well as anti-body testing in order to create additional treatment. (drinking lysol want work.) Next, you will need to test all tourists into the extended future or the social distancing efforts will be for nothing. I am a father with two daughters, why don't you hire me to assist, maybe some regular people on this task force may bring some insight. Not a room full of poloticians.
Pinellas	Tourism	If you buy a quart of strawberries at the supermarket and when you get home you find there are several bad strawberries in the quart. Do you throw out the entire quart of strawberries? No of course not, you get rid of the bad ones and enjoy the rest of the quart. Contain the elderly and immune compromised. Enforce the use of social distancing as well as mandate the use of face masks. I believe the Florida economy can be opened if done carefully. Will it be easy? No. Will there be issues ? Of course. We need to move forward. The longer this is allowed to go on we will reach a point of no return.

AMERICAN OVERSIGHT

Hillsborough	General	Do not open Florida until we have at least a 2 week down curve in new cases. And then with strict social distancing restrictions and testing.
Miami-Dade	General	Strip mall can open on same PPE as grocery stores. Masks gloves and 50 percent occupancy .Restaurants same with seating apart. Problem is disinfectinh after customer use hair salon anf nsil by appointmeny only. One to two customers in at a timr. Same for barber shops. Target and Walmart are food and other stores have been openso there is proof others can follow same. Problem to be resolved is children. Parents are now home schooling. Normally would be in school when adults working. In summer would be summer schools and camps. No social distancing at this time. How can parents work? Workforce needs children protected while at work.
Seminole	General	I am writing to provide my feedback on reopening Florida, which is that we cannot reopen anything until there is a daily decline in the number of cases. The current piecemeal attempt of keeping some things open and some not along with opening beaches will only further encourage less responsible individuals who do not follow social distancing and hygiene guidelines to gather and spread the virus further. Everything non-essential needs to be fully closed down for several weeks for this virus to stop spreading and in our current state, we'll just be locked like this indefinitely as individuals continue to ignore the guidelines set forth by officials.
Pasco	General	I believe reopening now before doctors advise is dangerous for families that have members that are at risk. My family is one that is at risk and we are also one that my husbands job isn't operating right now so we don't have an income coming in but I would rather keep my daughter safe from catching this virus because she is one of the many that have health issues that if she catches the virus can be serious . I believe that Florida needs to come up with a plan to allow ALL companies work from home some how and allow only essential stores open on a time frame. The longer we continue the stay at home order the better chance we have for us to flatten the curve and our kids to go back to school without fear of catching the virus. Opening up to early could cause us to be back at square one too soon and probably worse than the first time. Can we please learn from the past and not make same mistakes example the Spanish Flu.
St. Johns	General	As a Licensed child care provider I put my self at risk everyday being opened to serve those in need of child care. I believe opening the State of Florida should be a well thought out plan. A VERY slow plan. We shouldn't rush to open. I honestly believe we shouldn't start to open until we are completely over the curve and all the way down the hill plus an additional 2 weeks added on. There should be very few cases @ the minimum everyday before the State starts to open. I know theres alot of pressure from businesses and the people but let's get this right the first time!
Brevard	General	I say no to opening Florida unless and until it's safe with adequate testing and contact tracking and it's approved by scientists and medical personnel..... not business people. Also only if proper social distancing can be observed. How can you be 6 feet apart when getting hair or nails done? How can you serve meals and stay 6 feet from the customer?

AMERICAN OVERSIGHT

Clay	Recreation	I do believe the re-opening of gyms and physical fitness centers in the state of Florida is crucial to the mental and physical wellbeing of our state. Many people, such as myself, heavily rely on gyms to relieve stress and enhance mental clarity. I do understand the possible risks that may come with this decision, but I assure you in every gym I have been in, social distancing is always practiced as well as strict sanitation procedures. Please consider the reopening of gyms and fitness centers as soon as possible. Thank you so much!
Collier	Recreation	Please open the Marco Island beaches for recreational use....social distancing guidelines and common sense....Also RESTART ELECTIVE SURGERIES FOR PATIENTS AND HOSPITALS
Escambia	General	My employer is already not taking this very seriously! The people that come in to my business are very nieve and have very little concern for their health or the health of others. If we open Florida up to soon the stupidity will in crease and my health will be at greater risk! Please dont ease up to soon. No one is looking after the people still working. There are not enough rules in place to protect our health.
Charlotte	General	Open Florida back up
Escambia	General	I tested positive for Covid it has been a nightmare. I have 4 children my 4 year has an extremely rare genetic disorder that causes heart damage and makes her severely compromised. She's been quarantined away from me for over a month. I too am concerned about making ends meet but to re-open now would be blatant negligence. Medical professionals don't even know what they are dealing with and I know this from experience but they are doing the best they can. There are so many people yet to be tested and more and more positive results are coming in daily. People are already not abiding by the guidelines. To re-open now will cause a much bigger health crisis. While I also fear for the economy ask yourself how well off will the economy be if the majority of our population is sick or dead. Please consider what you would do or how you would feel if it was you or your loved ones sick and suffering. I assure you this is nothing like the seasonal flu. Not to mention what will not taking serious measures do for DeSantis political career? I for one will not be giving him my vote after the mismanagement of this ordeal.
Duval	General	I do not want to see business reopen in Florida for at least another 3 to 4 weeks. We are not prepared for the second wave of virus infection. Too many people are already out and about without taking precautions. No masks, no social distancing. I have an adult child who lives with me and has an immune deficiency. I almost lost her once to a virus when she was younger. She would not survive this virus. Therefore I cannot bring it home either. My spouse has to work, he is in the transportation industry. We cannot have him near this child. We live in a bubble where we sanitize constantly. My child does not leave the house. Fortunately she is able to work from home. Please do not open the state yet. Please extend our stay at home order. I know you are getting pressure from many, but please listen to those of us who are at high risk.

AMERICAN OVERSIGHT

Lee	Administrative	We need to keep the state closed, there are not enough people being tested to allow them to roam freely without precaution, I still see people walking around with no protective gear. I know the need to open the state is important. We need to do so with caution and restrictions. Too many people can be carrying this virus and if you open it wide more people will die
Pasco	General	STAY CLOSED , MY MOTHER WORKS IN A DENTAL OFFICE , MY CHILDREN ARE AFRAID TO GO TO SCHOOL IN AUGUST. PLEASE STAY CLOSED DO THE RIGHT THING!!!!! THIS VIRUS WILL PICK UP HEAVY IF THE GATES ARE OPENED AGAIN THIS SOON.....WHAT WAS IT ALL FOR IF YOUR GONNA OPEN NOW
Miami-Dade	General	The shut down has allowed our healthcare system to brace for the COVID related medical surge. It's time to reopen the state and let people get back to work and their regular lives. Not doing so will cause far more damage that good. Those at risk, such as elderly or immunocompromised, should continue taking extreme precautions. The rest of us should be careful and accept responsibility for our actions or lack thereof. It's time for a complete reopening.
Pinellas	Healthcare	Working in the dental field, there is not enough adequate access to PPE at this time. Lack of PPE coupled with the lack of informed and clear recommendations on safe practices leads me to question a safe reopening at this time, or even in the coming weeks. The WHO just announced today that antibodies do not equate to protection from reinfection so at this time is just seems premature to reopen everything and undue the progress we have made. If history has taught us anything, the second wave will come and it will be worse than the first. Becoming overzealous now with the small gains we have now and reopening will lead to insurmountable loss in the future. As the old adage goes, it’s better to be safe than sorry.
Brevard	General	It is time to allow all businesses to reopen (except bars, strip clubs) and to end the self-isolation provisions in Florida and the USA. This can safely be accomplished by requiring everyone who leaves their homes to wear a face mask that covers their nose and mouth at all times except while eating. Restaurants should serve at every other table or have 6 foot distances between patrons, while restricting tables to family groups. Servers should be required to wear masks. This would allow the state to reopen with minimal risk.
Osceola	Information	I strongly discourage opening Florida before 6/01 . I work in the service industry and am worried about all the possibilities before me to contract the corona virus. Such as germs on the seats, tables, menus , money everything. We are also responsible for cleaning the table when the customer leaves . We are the cashiers as well we do it all as well as serve the guest . The aisles are narrow to walk past the customers and the other staff members so how am I supposed to stay 6 feet apart . The window to pick up our food is about 5 feet and there are usually 3 of us picking up the food at the same time . How is this going to work . I know that there is going to be to much of a risk for servers . I am scared as well as most of the people in the service industry of contracting this virus.
Martin	General	Time to reopen

AMERICAN OVERSIGHT

Duval	Recreation	Please open the State Parks.
Pasco	Information	We need to keep everything shut down until we can get everyone tested! Otherwise you're going to have an apocalyptic mess here. I have to work, I'm medically essential, and we do not plan on going out until long after the next flu season is over. We're waiting for the second wave to hit.
Hillsborough	Finance	Open this state back up. Hospitals have the capacity for any surge that these BS models continue to incorrectly predict. We have destroyed so many lives and businesses over what has amounted to a bad seasonal flu. The more data that comes out the more we find out how ridiculously over the top some of the decisions were to completely shut down. Screw the media talking heads and armchair doctors. Look at the data. It's time to open. We have flattened whatever curve. Let's go back to work. My employees and clients need to be open and not a super restrictive open. Trust the people and the market to make smart decisions. I voted for you because you are a pretty level headed leader. I'm impressed that you held strong in spite of all the media pressure and pressure from hysterical busy bodies. Now is another time to ignore the noise and crank this economy back open.
Manatee	Retail	I work in retail (non-essential). And I think the state should not re-open until health experts say that it is safe to do so. I especially think that non-essential retail should not re-open until the beaches have also re-opened. If retail opens before the beaches, people are going to swarm the malls and shopping centers because there is nothing else to do. Therefore, if retail opens when beaches re-open, there is more than just shopping to do. I think also it's important to wait and open when the health experts say it's okay because if we move to quickly to re-open, we could end up back in square one and have to shut back down. It makes more sense to have patience and do this properly. The economy will be booming once everything is back open and everyone is back to work. But for now, we need to listen to the experts and follow their guidelines.
Polk	Healthcare	I feel that reopening the state too soon will put a burden on our healthcare system that we are not yet prepared for. We stayed at home and it is working. We need to CONTINUE to STAY AT HOME for a longer period of time to allow this virus to completely run its course so we doesn't have a second outbreak. Additionally, we need to not allow people from other states to come into Florida as we did earlier in March and April. Better rules need to be in place. Opening up to gatherings and places were people clump up is a mistake. Thank you for listening.
Polk	General	We are not ready to open this state. Please err on the side of caution. By opening parks, beaches, restaurants too early is taking a risk of a second wave in numbers.
Clay	General	Just open the damn state already quit spreading the fear mongering the media is spreading
Orange	General	To early give it till at least May15th why open and Go backwards. I understand people need to work But maybe our government should help the people Of the United States and not the Foreign countries. To many people have died let's do the right thing. Don't rush like The president wants look where he has gotten us now. LETS BE SMART!!!!!!!!!

AMERICAN OVERSIGHT

Hillsborough	General	Open this state up! The models have been wrong from the beginning! This virus has-been here since November. The economic fallout will be worse that this pandemic.
Hernando	Healthcare	Presently I work for a clinical psychologist in my area and we have a large senior clientele. I do not want to re-open our office. All of contact is to close to be safe. I feel like small businesses will get the largest voice in this poll which is understandable. I would rather be safe and wait another few weeks before opening. Children being out of school and parents having no where to put their children because a daycare is a cesspool of germs. It just does not make any sense. Let's not have a incident like they had in China where they had to go back on lock down. We are not close to vaccine. I believe the next waive will be larger than the second with people asymptomatic walking around. People will get lax with social distancing. PLEASE I ASK DO NOT OPEN FLORIDA IT'S TO SOON.
Marion	General	I think that most places should not reopen and if you do reopen even some limit staff and people allowed in and 6foot rule. If it can't be followed then it can't be open. It's better to hold off and come through this better then go back and more get sick and hospitals get overwhelmed. I am waiting for unemployment as most and still think we should wait to go back. I have two children and I think people's safety is what's important. We have plenty of movie stars, professional athletes and more that could all chip in to help people or the economy. It's time people step up and help each other.
Miami-Dade	Government	DO NOT REOPEN UNTIL DATA SHOWS THAT CASES IN FLORIDA ARE SLOWING DOWN SIGNIFICANTLY! YOU ARE PUTTING OUR HEALTH AND ECONOMY AT FURTHUR RISK! BEACHES AND PARKS CURRENTLY NEED TO REMAIN CLOSED! YOU NEED TO TAKE RETURNING SPRING BREAKERS AND TOURISTS INTO FACTOR IF YOU REOPEN THEN TOO SOON! YOU WILL NOT BE ABLE TO CONTROL WHAT THE PUBLIC DOES AND ALL OF THE SOCIAL DISTANCING EFFORTS WILL HAVE GONE TO WASTE. DO NOT BE RESPONSIBLE FOR THE RISE IN CASES! DO NOT BE THE REASON OUR HOSPITALS BECOME OVERWHELMED! DO NOT BE THE REASON WE ARE LOCKED DOWN FOR A SECOND TIME! BE A RESPONSIBLE LEADER WHO CARES ABOUT HIS COMMUNITY, EVEN IF IT MEANS PEOPLE NEED TO WAIT A LITTLE LONGER.

AMERICAN OVERSIGHT

Pinellas	Finance	I was born in Clearwater, Florida in 1976, graduates from Florida State and have raised my family in our great state. The Covid crisis has been especially hard on us as small business owners, we are struggling to keep our business afloat and working hard to keep our employees and not add to an already exorbitant unemployment rate in the state. Needless to say, the state shutdown has been very hard on us financially. However, another side to the shut down, other than economic, is with mental health. My mother who is 70 and my in laws who are 75, even though considered at high risk are also struggling with the shut down. They tried very hard to stay healthy and active but this has severely hampered there ability to do so. They cannot see their friends, cannot take a walk on the beach, cannot even see their grandchildren without fear that they will be disobeying they law. This is heartbreaking. For every covid patient that is saved, how many lives will be ruined? It is time to re-open our state economy, including our beaches, retail stores and small businesses. The longer we wait the harder it will be to for our state to recover economically. But in the interest of public health, the harder it will be for our elderly to come back from months of isolation.
Duval	General	Please reopen Florida. Please reopen small businesses and schools for summer camp. Please open up our beaches for all activity. We have all seen the numbers and it's totally worth the risk. Anyone who is elderly, has a compromised immune system, or doesn't want to go out then stay home. Let the majority get back to our normal everyday life's. Let the healthy population get out and build up a herd immunity. Please reopen our great state.
Brevard	General	Do not rush to re-open Florida. Broader measures must be taken to ensure widespread evictions do not occur moving forward. The unemployment system must be addressed. Bending to the will of Big Tourism is not the best method to ensuring the safety of all Floridians.
Hillsborough	Healthcare	I am concerned with the low amount of testing that has been completed to date. I feel the numbers being reported are a fraction of the actual infection rate. We need more testing and more antibody testing to make an educated decision to open. I have a 78 year old bedridden father I'm caring for at home, so far he's not gotten this and I'd like to keep it that way for as long as possible. I really need to see that the medical community is ready and approve to feel confident you are making the right decision. Many thanks!

AMERICAN OVERSIGHT

Flagler	General	Governor DeSantis. Thank you for your work on behalf of Florida. Please do not reopen our state until the health experts and scientists deem it is time. Please do not listen to those touting injectable disinfectants. We know better. Please be strong and have courage. Stand up to bullies and believe in the power of Florida. Look what we did?! It could have and might still be worse if we do something stupid. Like reopen too soon. The experts tout June. People want to be cautious. Fix the problems in stages going by data not by intimidation. Be strong. We are Florida. We ar3 strong. Please liisten. Thanks for the opportunity to share. Good idea.
Osceola	General	Keep small business closed at least until June. Opening within the next 2 weeks could be dangerous. If small business open and get confirmed covid cases it could possibly put them out of business. Its best if we all wait.
Hillsborough	General	Please open carefully. Consider extending the eviction/foreclosure ban until at least June 30th. It will take those of use looking for work to catch up on rent/mortgage payments. I have two medically fragile family members and we are facing eviction once the ban is over. Thank you.
Pinellas	General	Florida has not done enough testing to safely reopen. Any steps should be taken very slowly and with extreme caution. More testing should be made available. We live in St Pete and the area is hurting very much. However, an early opening would not do it any good. Please extend the stay at home order for at least one more month and make more testing available.
Collier	General	I don't want to open yet because it is too soon I have 4 kids and one of them has type 1 diabetes. And I can not let any of my kids get sick. And also I have a daycare but I am close because I don't know if the child has it or not because the virus spreads when you don't have symptoms. And I can't get sick with it because I am pregnant and because of my kids. It only take one contact with someone
Nassau	General	Please reopen FL
Pinellas	General	I would opt for waiting a few weeks until Florida cases are going down...we don't seem to be there and none of us want to reopen too soon and then draw this out or make it worse. We're here, we're in. In a week or two I could see opening condo pools for exercise to owners only not renters. I could see opening things like dog grooming where you can drop off and pick up. I don't see opening beauty salons or nail salons or spas where there is use no way to keep 6 ft apart even though I need to go there badly!! PLEASE LISTEN TO DOCTORS AND EXPERTS ONLY.
Duval	General	I understand the desire or need to reopen for the economy. My largest concern is how will we mandate companies/employers to protect employees considered high risk.who have been told not to go back to work until phase 3 by national guidelines? A lot of people have been saying it people want to stay home to protect themselves, then let them. But the truth is, they won't be allowed to make that choice and keep their jobs if companies aren't mandated to protect those vulnerable employees.

AMERICAN OVERSIGHT

St. Johns	General	I know a lot of people are in dire need of financial support but I feel people's lives are very important! More important that money. They will value that. Please do not rush to open everything back up. I help run a spa downtown. We can not socially distance and is 6 feet really even enough? We can't turn the AC off it will be sweltering in there as well. I am also pregnant which there is not enough evidence on this virus' effects and my son has asthma. There's so many elderly here opening back up to soon I feel would be devestating. Even I am on unemployment at the time. I was fortunate enough to receive even one weeks pay and I've been out of work for 4/5 weeks. I received my last regular week of unemployment 2 Weeks ago. Financially it's rough but I value my life and everyone else's more than I do money.
Sarasota	Recreation	Please open up full access to beaches in the state. Exposure to sun and fresh air is good for Floridians' physical and mental health. My husband and I moved to Florida for the beaches. Enough of lock downs. Let people enjoy the beaches. We are responsible adults. We'll take measures like social distancing and using protective gear, but allow us to decide what is best for us.
Miami-Dade	General	I think that it is time to start reopening Florida in a safe way. But I also think that we need to do it in a way that does not infringe on or rights. I don't think places should be testing for coronavirus to allow you to shop, eat, or play there. I do not think we should be quarantined until a vaccine comes out as many people do not want the vaccine and it is our right as citizens to be able to choose what we put into our bodies. The last thing is I don't think we should be mandated to wear masks in public places. Many studies have shown that homemade masks are ineffective and that regular masks that are not N95 masks are only 10-20% effective. As a mom that is claustrophobic I cannot go in public now because it is unbearable to wear a mask. I also do not want my children to be afraid of going places because they have to wear a mask. I thank you for taking the time to take submissions and listen to the people on this very critical issue.
St. Johns	General	The state needs to be reopened. Small businesses are suffering. People want to get back to work and kids want to go to school. Working from home while teaching your kids schooling and being in isolation is not sustainable. It will cause more harm.
Palm Beach	General	Please open all beaches and state parks for recreational activities. As long as common sense rules are in place (no groups/gatherings, standard distances, keep moving, etc.), there should be no issue with people walking, running, hiking, swimming, etc. I have no problem with the enforcement any rules necessary to keep people from using beaches and state parks for reasons other than active recreation, and it might also make sense to keep non-residents away for a while as well. We have been trying to teach our kids a love of nature (something that generally comes naturally anyway), but we really would like to be able to get our kids back to these natural areas for hikes and walks and swims, etc.

AMERICAN OVERSIGHT

Duval	Healthcare	I am a board-certified orthopedic surgeon who has practiced here in Florida for about 50 years for about half of the past 15 years I have spent volunteering in Africa with the group doctors without Borders I have become quite the infectious disease expert and epidemiologist having gone through Ebola and all the other epidemics as well as polio and cholera and of course Malaria every year I will make just one overriding comment the only thing that is necessary right now is social distancing this lockdown rule is ridiculous and businesses that can function with proper social distancing should be open you can write specific rules for places like hair salon gyms but This country is going to do well in terms of deaths from the virus but the other side effects such as suicide and drug addiction have gone up to unacceptable levels
Pasco	General	I am an essential employee. I run an apartment complex and have to go to work whether we open or not. With that being said I do not think Florida should reopen yet. Salons, barbers,gyms and public pools are not regulated enough and they are not educated enough to act safely and follow the proper precautions. We do not have the proper man power to enforce the regulations in all of these places to ensure they follow them correctly. An example of this was the beaches, people where told to practice social distancing and they did not and look what happened. I lost two family members in Mass to this awful virus and I do not want to lose any one else. Lives matter not money. I think 2 more weeks of astringent stay at home will be for the best! Thank you for allowing me to put in my two cents!
Hillsborough	Food	We own a small breakfast lunch restaurant- ANDERSON Road Cafe. We are not paying ourselves., just employees. Only 25% business with take out.
Collier	Recreation	People need to get outdoors. Open the beach!! People should be allowed to walk and swim. To limit gathering, you could say no more than groups of four should be allowed to congregate, take chairs, watch sunset, etc. The collier county beaches are never crowded and will have less people than Jacksonville. Open the parks! Again, limit it to parties of 2-4 with walking and running only. Mental and physical health depends on sunshine, fresh air, the serenity of nature such as parks and beaches. With condos closing pools and the beach closed, people who rely on swimming for exercise have no where to go. The immune system can only stay strong if people continue to exercise and practice their spiritual routines which often means beach and park!
Osceola	Recreation	I work in hospitality. I work for Marriott, My resort is currently closed. As much as I would love to get back to work especially since our unemployment is such a disaster I do not think we are ready. People had to be forced to respect social distancing guidelines. I do not want to rush back to work only to be back in this position again in a month. I am also immune compromised so sending me out Could kill me.
Pasco	General	I'm aware of how paying bill's and making money I'm a single mother that struggles too...my concern is the state never shut down like many other started did. We did a 1/2 ass job it should of been all ot nothing, it completely defeated the purpose! I believe we should of completely shut everything down for a solid month..I believe reopening is still gonna have the same effects or worse. It's not going to get any better! We have to welcome the new normal because I believe this is the way it will stay..and it will get worse!!

AMERICAN OVERSIGHT

Clay	Education	We HAVE to get our kids back to school in August . For those who Are not comfortable sending their kids they can elect flvs. Trump stated the cure cannot be worse then the disease and I believe we are officially there. So many unemployed , students who have to have parents try to teach them , no socialization, huge increase in depression and loss of jobs will make this hard to recover. Is the goal to try to flatten the curve and not overwhelm the health system or to try to avoid having people get the virus ? We have achieved the first and now see many hospitals even cutting staff. It is unrealistic to live sheltered until a vaccine comes because some people won't want that either . Gyms can have an online system where you schedule workout to keep numbers down and restaurants limited seating . If you are to scared to go out , stay home !
Polk	General	Reopening the state right now would be foolish. The restrictions are working. Reopening now will cause a second wave worse than the first.
Pasco	General	Please do not open prematurely. Nothing is more valuable than human life.
Duval	General	I would like the task force to consider re-opening of the state of Florida by county, region or a combination of both. I am a resident of Duval County and more specifically in a zip code that has a low number of fatalities. The northeast part of Florida is not as densely populated as opposed to south Florida and feel that as a citizen we could handle guidelines upon opening that would give us all a " boost" emotionally and economically. This could include car washes, book stores, salons, and small restaurants. I also would like for the media to report the following in their statistics: Positives Negatives(not furnished) Hospitalizations FatalIties Many thanks , Patricia Freeman
Pinellas	General	Please re-open the entire state immediately. The task force can advise people to stay apart, watch their diets, wear masks, etc. But, let's get the state re-opened - businesses, bars, restaurants, beaches, parks - everything. People have to get back to work and go about their business. We can't continue this way any longer - unemployment is killing us. We need our state to bring back tourists, cruise ships and all the money that brings in and jobs these industries create. Thank you, Terry Mundon
St. Johns	General	Let's open May 1st when this order expires. By staying closed, you asking people to give up their livelihoods and their ability to support their families. Eventually people will start going against these orders. People are just wanting to work. It can be done safely. We can put safety measures in place.

AMERICAN OVERSIGHT

Okaloosa	Food	I work as a server in a restaurant. I personally think it's too soon to open, I'm not comfortable serving people who could potentially be infected with COVID-19. Until there is more testing, I'm comfortable and happy to continue social distancing. Thank you!
Miami-Dade	General	I believe that in order to protect life we should begin opening the state in phases. The first phase of business that may open are parks, marinas and outdoor facilities for amusement. No groups or gatherings of ten or more people. Then restaurants, spas, nail salons, and barber shops should be opened, by appointment only, No waiting allowed. Restaurants should have limited seating with 10 foot spacing between tables, with no large parties allowed. People should be tested for temperature before they enter the place of business. Churches should be allowed to open with limited seating and temperature testing. Movie theaters should be opened with 20% capacity per auditorium, with sufficient time to sanitize the auditorium between movies. Sanitizing the auditorium should include wiping down the arm rest. There should also be limited showings of movies with social distancing enforced at the concession stand. Bowling alleys should follow social distancing guidelines and have limited capacity of 25%. Sports should resume without fans for the time being. Schools and Malls should be kept closed until the Fall.
Hillsborough	General	I believe that if we all stay as clean as possible and wear face masks when we would be near someone else, it would be possible to get everyone back to work, including hair and nail salons, legitimate massage clinics, etc.
Manatee	General	As I have been home for going on a month now, I am extremely eager to go back to work. I would like to see more than just my house and the grocery store. I feel that it should be required with a penalty if not followed, ALL persons MUST wear a face mask in public until further notice. Its hard when there are people wearing them and when you go past someone who isn't. I feel that at some point herd immunity is our answer. A vaccine is too far away. Therefore in the meantime, masks must be worn no matter what someone thinks they look like in it. This isn't a vanity competition.
Miami-Dade	General	Keep mask required in public spaces through the end of year. Make antibody testing available for everyone. Those at risk should be allowed to work at home or with accommodations from their employers without fear of losing their jobs. Plexiglass should be used at restaurants on the backs of booths and limit table dining available, or require to wear masks at tables etc. mask will need to be used in offices spaces and plexiglass used to heighten desks and Prevent droplets. Gloves may also need to be used and maybe even use UV lighting in office spaces intermittently with current lighting. We should start to reopen mid May while still preparing both for our hurricane season and the possibility of an influx of cases.
Collier	Professional Services	There will starvation, chaos, and far more death in the future if this shutdown continues.

AMERICAN OVERSIGHT

Lee	Education	Absolutely not. We're so not know how insidious this sickness is. Thr doctors are baffled. There is no rhyme or reason why some die and some don't. There is no cure there is no vaccine. toleration through exposure is a risk I will not take with my family. Buck up we are being asked to stay home! The economy will return, it always does. People love to spend money, and they wel continue to do so. As a teacher, if schools hadn't closed, my daughter would not have returned.
Sarasota	Professional Services	This warm climate. Barbershop customers would be willing to wait outside. But allow them to open with 1 barber and 1 customer per 300 sq ft of space. Waiting outside if possible. HELP! I look like a sheep!
Pasco	Recreation	I would like to advocate for a reopening of parks, pools, and recreation with the expectations that some form of social distancing can be maintained. I also think that opening restaurants and retail at partial capacity should be considered. It seems we have been able to maintain social distancing effectively while all still going to grocery stores and drug stores without any precautions in place. Would it be possible to have the task force consider stricter cleaning and antibacterial measures for these services as they open slowly? It's probably a good idea to have these anyway. I think tourism should still be kept on hold since consistent movement across states does not seem advisable. Continuation and support for telemedicine and online school should continue through May.
Sarasota	General	Dear Governor DeSantis and the rest of the Re-Open Florida task force. First, thank you for all you are doing. I understand that this is not an easy decision. You will, unfortunately, be wrong no matter what you do as this disease will continue to take lives. We need to get business open right away. The country is plunging into a depression. We are accumulating debt at an unprecedented pace. Lives will be lost due to the economic hardship that may exceed what we are seeing with the COVID-19. If you ask me to wear a mask, I will do it. If you ask me to continue social distancing I will do so. We need to be opened no later than May 1st. I will standby you no matter what the outcome of a May 1st opening. Thank you for allowing me to provide input.
St. Johns	General	I think we should definitely open up beaches all day with no more than 10 people gathering. I also believe that the hospitals should be able to open up for all procedures at full capacity. I also believe we should let all businesses open up. If people are against this, they can stay home.
Hernando	General	I do not envy being in your position and holding so many lives in you hand. I think we need to take things slow and steady but we do need to move forward. I want to thank you for what you are doing and please know I am praying for all of us.

AMERICAN OVERSIGHT

Hillsborough	General	I feel from the beginning our state government has done very little in response to the epidemic and now considering opening the state back up is dangerous. It's obvious when one goes outside that the safer at home order isn't working. When you leave the house people are out and about shopping not practicing social distancing. In my own neighborhood people are gathering throwing parties and drinking. Then experts say the numbers are not going down because stay home orders don't work. They are not working because citizens are not listening and they know no one is enforcing it. We need stricter orders! From the start we needed to shut everything down. if you open up more busineeses I promise you it will get exponentially worse. Then our governor will be forced to do more. I don't want our state to turn into New York and have dead bodies lined up to bury and opening up the state will do so.
Seminole	Professional Services	I am a hairdresser and I'm not wanting to put myself and family at risk by going back to work and having to stand over people while there is still a high risk of getting the virus. There is no way to do hair while keeping a safe 6feet distance. If we follow the government recommendations to slowly reopen we should not be one of the first to be asked to reopen. Asking us to wear masks and plastic shields is just proving how dangerous it is for us to be so close to everyone right now. Please let us continue to remain closed until it is safer for us and the social distancing is not needed. Hair is not worth the risk right now. People should not be going out anyways that it matters who sees their hair. I will not go back to work until I feel safe but if you open the salons our bosses of our building will expect us to pay them. As long as we remain closed we are not being charged. Opening to soon will force some people to work just to pay the landlords. Please keep us as one of the last to open.
Sarasota	Tourism	Hello, Thank you for hearing our voices . Please open Florida business back up . The people of Florida need to get back to work . This pandemic has been blown way out of proportion by the Democratic Government. Put restrictions on the counties most affected . It’s in humane to keep the whole state of Florida locked down . I am an Airbnb host and this has all but wiped out any income from this .
Lee	Administrative	I think that everything should remain on lockdown until July-Also i think that all front line workers should get hazard pay-like some of the other states have done

AMERICAN OVERSIGHT

St. Johns	General	I'm going to try a common sense approach here: 1. Individuals at high risk should continue to stay home. 2. If you feel sick, stay home. 3. Don't open places where large groups congregate for now. (Ex. Churches, concerts, night clubs, sporting events...) 4. Open service businesses and government offices with "by appointment only" time slots maintaining social distancing and appropriate sanitation measures. 5. Open all retail stores limiting the number of customers allowed inside at a time. (I suggest calculating a reasonable amount per square foot keeping social distancing in mind.) Implement extreme sanitation measures. 6. Open restaurants limiting the number of customers allowed at a time placing tables and chairs an appropriate distance from each other. No groups over 8 people. Keep bar seating spread out appropriately or perhaps no bar seating for now. Encourage take-out and delivery. Implement extreme sanitation measures. 9. In situations where working from home is successful, continue to do so. 8. Reassess the school situation in late summer for the fall session. 7. Those who do not believe places should reopen can continue to stay home. Keep in mind families and individuals who have no income or savings who need to go back to work. 8. If COVID-19 cases increase substantially as the state carefully reopens, shut the problem areas back down and reassess. I'm happy to join the task force if asked. 🙋
Hillsborough	General	Please open Florida up now !
Miami-Dade	Wholesale	hello I agree we should open Florida already our economy is suffering and many people have lost their jobs. You should also open our beaches and parks. Weve endured enough! thank you! Gus Baldor
Sarasota	Professional Services	As a healthcare provider w a background in hemaimmunology, data confirms vast majority of population if exposed to Covid 19 will be asymptotic or gave mild case. Recombinant virus is sensitive to UV and hear. Therefore, with temperatures increasing with the exception of high risk individuals all should return to work and normal activities continuing to social distance and use good hygiene - wash hands often. Fear associated w SARS COV2 has caused overreaction and it is imperative people return to their routines to prevent further harm to society.

AMERICAN OVERSIGHT

Hillsborough	General	Dear Gov DeSantis, As an active constituent of Hillsborough County and the state of Florida, I implore you to put forth and enact a plan to reopen Florida AS SOON AS POSSIBLE beginning no later than May 1 upon 30 day lockdown order expiration. We will have at that time been on lockdown in Tampa for FIVE WEEKS. That is more than ample time to satisfy the "14 day incubation period". Out of a population of 21,670,000 in the state of Florida, we have had only 1,055 deaths, many of which are being incorrectly reported as COVID deaths, when they are not. Even so, that is a mere 0.005% of our population. Florida's cases are at 30,000, which is 0.14%. LESS THAN A QUARTER OF A PERCENT. Most of those are mild cases with a 98% recovery rate! This number is not a pandemic by definition. A pandemic is an outbreak "which has affected a significant portion of the population". 0.14% is NOT A SIGNIFICANT PORTION. Knowing new facts that have come out which include the terribly flawed "models" by which all decisions were made, the death rate of this virus being 55% less than previously thought, the survival rate being close to 98%, most cases mild to asymptomatic, Dr Fauci now stating in the New England Journal of Medicine that this virus is actually much more like a "seasonal flu", and considering the main reason we were told we were forced to stay at home in the first place: to keep our hospitals from being overrun which has not happened at all. In fact, NONE of our hospitals are even close to capacity and many are furloughing nurses, physician assistants, and physicians. Being that that was the reason for the lockdown, it is neither reasonable NOR CONSTITUTIONAL to do anything other than allow all businesses to open, parks to open, beaches to open as they see fit. The citizens in my community have behaved appropriately and we have been in forced proximity to only our immediate families for over 40+ days. Parents need to work, people need to live, children need to play. Please stop forcing an agenda of fear upon our city. We are no longer afraid of the virus, the concern now is for the mental well being and financial well being of our city and state.

AMERICAN OVERSIGHT

Alachua	General	Governor deSantis,

It is imperative that you begin opening up Florida for business. Every day you keep businesses closed is another day of reduced wages, income and tax revenue for the municipalities, counties and state! Neither people nor the government will have any money to provide basic services. The domino effect will be worse as folks stop making payments to for their homes, credit cards and workers that will then lead to bank collapse. You can already see the sky HIGH numbers coming in for unemployment, forbearance and this is just the beginning.

The Death rates of COVID19 do not warrant the destruction of our society including the higher Suicide rates, domestic violence, drug addition and the List is LONG. The unintended consequences are worse than the virus. You know this to be true, you stated the numbers yesterday. Those with underlying conditions are by far more at risk.

Alacha county is already seeing an increase in abuse, suicide and other mental issues. Why are we quarantinning the healthy? The people becoming infected now have become infected after the stay at home order. The half quarantinning will not stop the spread. Additionally we need to let it burn out. We need to build immunity. Open the state and let those who want to participate go out. If folks decide they don't want to that's their prerogative. Why lock everyone up for the small percentage of those who will perrish. I don't wish that on anyone however how is this any different from the flu, heart disease, obesity and other illnesses. We don't close the restaurants because we don't want people to become obese. We don't stop people fromdriving because someone .might hit them.

Let each county decide on the course of action that is best for them and step in if numbers get out of hand. We must open the state and stop the hemorrhaging.

Don't let the few screaming folks wanting to save all lives put you in a position that kills more lives and the livelihood of so many.

AMERICAN OVERSIGHT

Brevard	Education	Our child care center is facing the threat of permanent closure. 83% of child care centers in Brevard County are currently closed, not because we want to be, but because there is no demand. Public school closures and forcing people out of work in Florida will have a severe impact on child care in our state. I am all for sensible precautions in slowing the spread of COVID-19, but creating an economic crisis to try to resolve a public health crisis does not seem to be the answer. PPP has been a disaster. Unemployment has been a disaster. It is entirely possible to take sensible precautions to help prevent the spread AND reopen the economy. Individual citizens have the right to go or not to go to a business as they see fit. Why should business owners be forced to stay closed? Let individuals decide if they want to stay home or eat at a local restaurant. Of course, local restaurants can take sensible precautions. The keyword being sensible. I still don't understand how not being allowed to sit at a beach and read a book (especially in Brevard county where many parts of our beach are especially remote) is helping to stop spread the virus. Yet, people congregate at Publix. And Home Depot? This is ok, but a child can't use a slide at the county park, even if they are the only child at the park and even though there is evidence that the virus doesn't survive the heat of the sun and parents could easily wipe down equipment with a Clorox wipe. Lots of the measures put into place in the last month make no sense. Some do, but not allowing people to return to work will create more social/economic problems than the health problems it will curtail. Thank you for giving me the opportunity to express my views. Governor DeSantis, I think you are doing a great job and showing fortitude under pressure.
Lee	General	As an essential worker who has to go to work everyday, it infuriates me to see all of the people out and about throughout the day instead of staying home. Please remove the politics and shut us down so this will clear up. Committing halfway is only mildly effective. Will we get through this and recover a lot faster if we just commit to staying home for now. I am asking that we continue with the safer at home order at least through the Summer. And please enforce the guidelines. Thank you.
Hillsborough	General	Its time to reopen our state and let "we the people" get back To work, open businesses that were formerly closed, open Beaches and parks. Florida can recover as long as the citizens can begin To resume their lives again. No more extensions of stay at home past April 30th.. We the people have spoken. God Bless America and our state-FLORIDA
Polk	Professional Services	Open salons so I can get back to work and keep afloat a small business

AMERICAN OVERSIGHT

Orange	General	Maintain the Stay at Home Order for 2-4 additional weeks, until middle to end of May - or until wide spread antibody testing has been completed across at least 75% of our state's population. Do not allow restaurants to open for in-room dining until it is confirmed each restaurant understands and will actively follow guidelines for partial seating capacity, daily checks of staff, screening of patrons, and the state has the ability to monitor compliance. Suggest starting at 25% capacity for a trial period of 1 month, then if FL does not have a spike in virus cases, go up to 50% capacity for 2 months before considering full capacity. Provide exacting rules for reopening gyms, hair salons, doctors offices, and all businesses - and have the ability to enforce those guidelines in place for at least the first 3 months. Get everyone used to a new way of doing business so we can remain healthy. Reinforce proper hygiene practices. Find new industries to help manage the situation long term - and create training programs to retrain people who may have lost their jobs so they can find gainful employment. Be extra cautious of how to increase international and domestic travel to our state and figure out how to help people working in the tourism industry to find work without that being our main source of industry.
Miami-Dade	Recreation	Marinas and boat ramps should be reopened. However, don't allow boats to raft together and enforce at least 75 feet separation when anchored
Broward	Recreation	Would like open air space back open, but will be hard because the tourist ,but since it's summer it's not a big spike in tourism during summer
Manatee	Government	Can we please get back to some sort of normalcy please? This Plandemic is not even as bad as a regular influenza outbreak (thank goodness), and the outcome of keeping us shut down is much worse, and will continue to be much worse, than the true people being effected in sickness and deaths. The social distancing and masks are much more detrimental to our health, than not wearing them. Please reference Sweden, and Dr Judy Miskovits, for true and factual information. Sunlight and fresh air are our friends! Please, please open us up, for the sanity of everyone living here. Those that feel a need to harbor in place, can continue to do just that! After a week or two of seeing the people out and about, not dying on the streets, they will slowly start experiencing the beautiful world again! Thank you!!
Pasco	General	I and everybody I know agrees it would be horribly irresponsible to reopen Florida with all of the unknown variables that would include. Among my circles it is the general consensus that your administration should be focused ONLY on public health and safety in your approach. We've all already accepted that there will be economic fallout. So the only game you're really playing right now, is w\ yourself and if you go down in history as the administration who chose money over human life . When we're all basically giving you a free pass for the economy. Just trying to be real.

AMERICAN OVERSIGHT

Sarasota	Healthcare	Hi My comments on reopening the State: I will go to businesses and restaurants when employers can ensure my safety by: employee blood tests once a week, employees wear masks and surfaces are cleaned often. I am not confident this is the right time. We need a lot more testing of asymptomatic people be$ore we really know where we are. Many thanks
Duval	Education	why open up so soon. you will be risking everyone's lives.
Broward	Government	DO IT! JUST DO IT ALREADY! MORE People Around The WORLD DIE EACH and EVERY DAY From FALLING COCONUTS and TREE LIMBS and BRANCHES Than ANY MAN Made Laboratory Manufactured DISEASE! SOCIAL DISTANCING IS The NEW WORLD ORDER'$ Lame ATTEMPT At SOCIETY DISMANTLING! PEOPLE Who are ISOLATED INDOORS AGAINST THEIR Own GOD GIVEN FREE WILL will Eventually Become WEAK Confused DISORIENTED Depressed and Give UP Their FAITH IN GOD and Their HOPE for LIVING! QUARENTEINED People BECOME EASIER to TOTALLY CONTROL and EVENTUALLY TOTAL EXTINGUISH! Just Like The GLOBALISTS NWO DEMACRATS of USA and SOCIALIST COMMUNIST COUNTRIES and The PARASITICAL ELITE GATES CLINTON OBAMA SOROS and MANY MANY OTHER Foundation'$ ABSOLUTELY WANT to ACCOMPLISH! MOST Sincerely and Respectfully Yours, Paul Colombo IN Pompano Beach FL USA BLESS GOD FOREVERMORE IN ALL That YOU DO and GOD SHALL BLESS YOU and YOURS Continuesly!
St. Johns	General	Too soon!! The virus is still here and is still very contagious with no symptoms. Opening too early will just destroy what we've been trying to do!

AMERICAN OVERSIGHT

Hillsborough	General	When the state of Florida reopens, the permitted activities and businesses allowed to open should be carefully evaluated. We need to make sure that a new exponential growth of Covid cases does Not occur. I am very concerned about opening of tourist attractions that my draw people from outside of the state and bring people into the state who have the Covid. The state of Florida needs to protect our residents from being potentially contaminated by visitors from outside the state. I also believe that restaurants will be a high risk regardless of what restrictions are in place. Sanitizers and disinfectants are generally not available at this time. Please do not be in too big of a hurry to open back up Florida and cause a reoccurrence of.the Self isolating and quarantine like living conditions that we are currently experiencing. Thanks
Pinellas	Healthcare	Do not be as stupid as Georgia. Do not change rules, add masks in public, and test, test, test.
Broward	General	Please reopen all business May 1!!! Keep protocols in place - masks, distance, hand sanitizers. Have something in place for vulnerable populations that would provide job a accommodations etc. Have elderly limit exposure by staying in. See what happens with our numbers. We must get back to work!
Sarasota	General	I am in pro to reopen Florida it is affecting our community economically and mental health

AMERICAN OVERSIGHT

St. Johns	Healthcare	I am licensed massage therapist and owner of Mindy's Massage and Wellness, LLC. I employ 7 therapists an esthitician and 3 front desk personnel. I also rent a room to a permanent make up artist. 11 people, not including myself, were laid off the day we closed. Let me walk you through our disease prevention protocols taken prior to the COVID-19 crisis. A client walks in and is immediately taken to the back. (No congregating at the front desk). The therapist greets the client in the secluded waiting area and takes her into a freshly sanitized treatment room. After assessing the clients needs, the therapist leaves the client to undress and washes her hands to her elbows. Sanatizes the furniture and any touch services in the waiting area with Cavicide, then enters the treatment and treats the client. After treatment she exits the room and walks directly to bthe sink to wash hands to her elbows. When the client exits the treatment room she strips the sheets and bankets. They are tossed in the laundry. She santizes the table, and all touch surfaces including door knobs and jambs. Then, prior to grabbing clean sheets she once again washes her hands to avoid any cross contamination. Once the table is made and the room put in order she greets her next client and it starts all over again. My average therapist works 3 or 4 days a week and has contact with 5 or fewer clients per day. The risk here is minimal. What we chaged since COVID. Prior to closing we staggered appointments so that only 1 person is checking out and 1 person is in the waiting area at a time. We removed blankets and unnecessary linens from the table. Why massage should be part of essential healthcare...On a daily basis I treat clients for severe anxiety, depression, trauma, pain, limited range of motion, chronic migraines, high blood pressure. These are just a few of the ailments that are aided by massage therapy. I work with docotrs, chiropractirs, physical and occupational therapists in my area. Even your stereotypical relaxing spa treatmet has signigant medical benefit. It is used to raise dopamine, seretonin and endorphins in the brain. All feel good hormones, thus lowering bloodpressure, lessening anxiety, and elevating mood. In a time when human contact has been restricted
Manatee	Recreation	We cannot effectively re-open Florida without having first effectively closed our public accommodations. Half measures with every organization and corporation under the sun being exempt is not a closure. Business and commerce are important. Dragging our feet to appease them only prolongs our risk of exposure.
Broward	Government	Desantis and his Florida's public health orders favor national chains and big box stores and is decimating Maintainability Street and small business. Differentiated restrictions allowing small businesses to reopen should be his priority instead of playing god! This a free country and I am in shock that I have no right to regulate my actions accordingly.
Pinellas	Recreation	I work at a gym and feel that it would be ridiculous to open gyms right now. I have worked in fitness for over 3 years - there is no way to keep people separated and items sanitized adequately right now. I feel that it would be a mistake to reopen this soon.
St. Johns	Food	As state continues to re-open, please retain senior hours at grocery stores (Costco, Publix, etc.) until virus is eradicated.

AMERICAN OVERSIGHT

Marion	General	When making reopening decisions, please rely on empirical data only the health care practitioners and scientists can provide. Please ignore political input. This is a public safety and public health issue. Public safety interests must outweigh individual liberty interests. I understand that these are highly emotional times. However, protesters harassing health care workers is unacceptable. Protesters carrying signs based on bigotry and bias are inflammatory and unreliable with respect to the reopening process. Reopening decisions should at the bare minimum include mandatory well-marked distancing, masks, and group size to include limited numbers of patrons in businesses of all types and at outdoor facilities, including recreational. We as a state should consider the implementation of a health-based domestic 'passport," i.e., people should be required to be tested and provide proof of the date and results of testing. Again, public safety must outweigh individual privacy rights. This begs the question as to enforcement. The legislature must be part of the decision making process; law enforcement must be given the opportunity to effectively enforce new procedures while the prosecutorial and judicial offices must also be given appropriate penalties to seek and impose upon those who fail to abide by the new procedures. This process must be undertaken slowly and with extreme caution.
Manatee	Real Estate	Yes re open!!! OPEN FLORIDA NIW!
Hillsborough	General	My biggest thing whatever you decide to do is. If you are able to effectively work from.home that should be strongly encouraged and still recommended for a few more months while this is all going on. That should be common sense but unfortunately some business owners still need to hear/see that recommendation.
Hillsborough	General	Please exercise extreme caution concerning the re-opening of Florida. Our numbers are still increasing. We need to wait until they are decreasing for at least two weeks, as recommended.
Hillsborough	Food	Restaurants should be open as long as they fallowing the six feet rules if waltmart and target is open why not open restaurant we can open up little by little most important things first and things that are not important can be left for last like beaches should open up as long as there’s six feet rule as well people are going crazy in there homes already we need to breath ,walk let the kids play for a bit. And be kids
Hillsborough	General	I agree with opening Florida, however the state should provide individuals who cannot go back to work due to underlying health conditions or caring for someone with an underlying condition. My son is five and has viral-induced asthma, he's been hospitalized a few times for just getting the common cold. I never wanted to homeschool my children, but it looks like I'll have to as I'm not comfortable with the possibility of him getting COVID-19.

AMERICAN OVERSIGHT

Miami-Dade	General	First and foremost I would like to thank everyone that has done everything in their power to make the best of of this situation. This is something no one knows how to deal with and everyone has a different opinion that does not always work but the state government has done what they believe has been best for the state; with that said. PLEASE DONT OPEN FLORIDA YET. I haven't been able to see family and friends for about a month and have been practicing all the measures to ensure my safety and the safety of other but not everyone is doing the same. I work with the general public. It is statistically known that the general public is the dumbest group of people. People are selfish and everyone believes that their needs are essential therefore they must go out. Yes our economy is suffering but if Florida were to shut down completely for two weeks I know everything will definitely slow down and the curve would be flattened. I don't know how these things work this is just my opinion and that of the essential workers that see costumers coming in to their jobs for non essential activities. I work at a bank and constantly see people come in to do things that they know how to do over the phone, simply because we are open. I have family that is high risk and they have taken a leave of absence from their jobs but with everything remaining open, cases are only going up, and they need to go back to work. PLEASE SHUT DOWN FLORIDA. Two weeks will make a difference. I miss my family terribly and I'm terrified for those that are at high risk but opening Florida will only make things worse. The economy will recover and I do believe it won't hurt that much.
Hillsborough	General	If you reopen .. make it mandatory for any business with public buildings (employees and customers)to have to wear mask till July 4th . Beaches , parks Etc should have a system of scheduled system depending on the sq ft per person occupied max X amount of people on the pre scheduled list per day selected .. max entries per week . Businesses like Disney locations require limited access .. mask restrictions. If you put in orders and give a date like a holiday .. makes people look "forward " to an event and adds a positive spin on the objective . But also add the disclaimer if cases rise "X" within a 5 day period and people are not taking the precautions.. then let them know we have to go back to stay at home . Kate Kangas
Pasco	General	I do not believe we are ready to reopen, being that the curve hasn't began to flatten out. The risk is still high and I rather be safe than sorry. Also- reopening with kids having to do eschool and parents at work outside the home would be a nightmare for the children. If we reopen - there has to be something for the children.
Pinellas	General	open everything back up or fix the unemployment. I filled back in March and NOTHING. I did receive a letter stating all they needed was a copy of my social security card so I faxed that with a copy of my license. That was over a week ago and still NOTHING. What are we supposed to do, this has been a total failure. So much for Government Assistance when you REALLY need it

AMERICAN OVERSIGHT

Broward	General	There needs do be a balance between peoples mental and physical health and for some that means the slow return to normalcy, even if that is a new normal. I believe the state should begin opening on May 1 with phase 1, parks, beaches, boat ramps and golf courses. According to an aerodynamics study by Virginia Tech, in outdoor, circulating air, the virus is more like to land in the ground than on another person even if someone coughs or sneezes in your direction. Let's start by outdoor openings. However, I think the borders of Florida should be closed or closely monitored so people from hit spots like NY do not start flocking down here. The opened arenas should be for Florida residents only. Please consider everyone's mental well being when making your decision - not just their physical. If someone is strongly opposed to this, they can continue to self isolate and stay on lock down.
Collier	Food	I don't think we should reopen certain parts of the state without more testing. We have not tested enough people in the county or our state as a whole. I'm young and healthy and I'm very concerned about going back to work to have people come in close contact with me. I'm fine with more outdoor areas but restaurants, retail, etc is a major concern. I'd rather be broke and keep my family and friends healthy than return too quickly just to make money.
Orange	General	Beaches restaurants need to start opening this is way too long that the state has been closed people are suffering we need to get back to some kind of normalcy8
Hillsborough	Healthcare	Do not open. Redo unemployment system
Hillsborough	General	Re-opening the business and schools in FL should not happen until the virus is more contained and protective gear and cleaning supplies are readily available to the average consumer. Doing otherwise will be a mistake and a danger to public health.
Seminole	Healthcare	Stifling voluntary commerce is by nature authoritarian. We know based on anti-body testing that death rates for those with COVID-19 under 44 y/o are well under 0.1% or less. At minimum, people under 44 should be able to make these decisions for themselves. We all hope older people will express great caution, but they can make up their own minds in the face of data.
Seminole	Tourism	Open the theme parks please.
Orange	Healthcare	I personally think that you should never have closed anything. This is the last hurrah for the left to take Pres Trump and our economy down. We have had thousands of deaths every flu season and right now I am not sure if I have any respect for any of the politicians except for Trump and a few real conservatives. We the people have been scammed by Bill Gates, Fauci, Birk, Obamas, Clintons and all these people who want to destroy our freedom. Wait and see what you get from us when you come with forced vaccines. Get some real doctors and scientific research doctors in the White House who have made attempts to get the right info to Pres Trump. Poisoning our children with mercury and so many toxic chemicals and telling parents it is safe. Does your child have autism? ADHD? And so many more health issues? So sad to where we are today. it is CRIMINAL. And what about the drones? What are you guys doing. We are on to all of you.

AMERICAN OVERSIGHT

Volusia	Tourism	It is far too early to reopen the state to tourism. Keeping the virus contained will be difficult enough with only Florida residents to worry about - once you invite tourists from other states and abroad you are just inviting the inevitable disaster that will befall this state. I am still working as an essential employee and am terrified everyday I go into work that I will contract this thing. Some of my coworkers have and a number of our customers were most likely infected weather they know it or not. Even taking every pro caution possible we still have the possibility of becoming infected or spreading it to others. I beg of you do not reopen this state to tourist until there is a clear downward curve of infections and deaths. Do not put profit over people. Listen to the medical professionals and public health experts. The economy will recover in time, don't give in to greed!
Duval	Government	The relevant information here is I am a server in Jacksonville and I am at risk, because I have asthma. Going over our mistakes thus far w COVID has no place here except to learn from them enough to the extent not to repeat them. The struggle here comes down to economy vs lives, and somehow they are using statistics to determine when that balances. I have not worked since 3/16, have not seen one dollar of money from the government yet, no stimulus, FL unemployment is a joke, lagging benefit help such as SNAP. I have used all my savings, applied for grants and gone to the BEAM food bank for food. So I am broke, scared and uncertain if I will make rent and bills. and despite that I STILL do not want FL to reopen nonessential businesses yet. Even if customers can stay 6 feet apart at restaurants, we as workers CAN NOT. i have self isolated for 5 weeks, picked groceries up curbside, worn a mask. Yet I watched as people flocked to the beach acting as if they'd never heard the words social distancing. The selfish arrogant idiots don't care about the old and at risk, the health care workers. So they refuse to take precautions and be careful, and if the government reopens those of us who have followed all the rules to stop the spread will be forced to interact and be at risk once again. This shutdown will have been in vain.
Broward	General	Reopen for those ready to go back to work. For those that don't. Let them no that there will be no more free money. It's time for Florida to get back to business.. Let the government reopen. No more crime.
Pinellas	General	Its to soon to re-open Florida right now maybe try for Mid to late may and SLOWLY re-open it
Broward	General	It's too early. They should wait 1 more month longer and then see if it is better. Everyone in the US should be tested. God Bless America.
Okaloosa	General	It is too soon to open back up. Our county and the county next to us saw our cases begin due to travel and out of state residents flocking here. Our grocery stores are finally able to keep things in stock and tourists will just deplete our resources again. As a mom of immune compromised children I'm begging our governor to do the right thing and wait!

AMERICAN OVERSIGHT

Brevard	General	FL Re-Open Task Force: I am a lifetime resident of Brevard County. I have been keeping up with all briefings (County, state, and national) that pertain to COVID-19. I understand the need for the stay at home. At this time, I think it was successful in flattening the curve to make sure our hospitals do not get overwhelmed. Since that was the purpose of the order, it is now time to start to re-open. Individuals need to get back to work. Domestic Violence rates are up, pediatric drownings are up, depression is up. It is sad what this virus has done to our community members, even to those that never contracted it. I read an article at the beginning of all of this that had said it's not a matter of if you get COVID-19, but when. I'm sure this is still the case because of how contagious it is. We have all learned so much already this year. More people are now washing their hands! Who knew that hand washing correctly was something that needed to be taught to so many adults. And we have all learned that personal space should be much larger (6' to be exact) and is actually called social distance. My recommendation to re-open would be to take it slow and keep pushing the guidelines. As regards to salons/spas, since this seems to be a hot topic, I'd like to point out that most customers personally know their stylist or masseuse. I know mine very well, she's a friend. I know that she wouldn't put me in danger and she feels the same way about me. I would trust walking into her salon more than a grocery store. Granted, she can't stay 6' away while doing my hair, I guarantee she can easily have less than 10 people in her shop at one time, and each set of stylist/customer can be 6' apart from the next. Each party can wear masks and the area can be thoroughly cleaned before the next use. Those that are declaring that salons need to be closed are also the same ones that have probably not been to one in quite awhile and are also the ones contemplating drinking Lysol because they think that's what Trump said. I think a common sense approach would be to start re-opening in the reverse order of closures. Take it a step at a time while watching the numbers. I know Sheriff Ivey is on the Task Force for Brevard and I am confident he will serve us proudly. Thank you all for your time and effort. I'm praying for all of you.

AMERICAN OVERSIGHT

Hillsborough	General	Thank you for taking the time to listen to public comments. It is appreciated. Please see my comments below: (1) Please offer guidance to encourage schools and summer camps to open. As I'm sure you know, this is absolutely critical. My child is an only child and has not seen other children in many weeks. This shutdown has had a very negative impact on him and if he cannot socialize with other children at summer camp this summer, I think the problem is only going to get worse. Please allow summer camps. (2) I believe masks and face coverings should *not* be mandatory when in public, especially for young children. It is getting very hot. Also, part of the idea is to "relieve pressure" and anxiety from the public. Masks are not mandatory now, making them mandatory going forward would be taking a step backwards. There was significant pushback regarding masks in Hillsborough County when it was proposed. (3) Restaurants will need to be at full capacity as soon as possible. I can't imagine any restaurant being able to operate at 50% capacity (for social distancing purposes) for very long without going out of business permanently. It is simply not possible to maintain a half-empty restaurant in the long term. Please allow people to take the risks they are comfortable with, while of course monitoring the data regarding number of infections. (4) Please open beaches to *all* activities, including "relaxing" as soon as possible. I have a small child that loves the beach. We will not be able to go to the beach to just "exercise". He likes to build sandcastles and splash around. (5) Please allow malls to open, even if the individual retail stores inside need further protection. In hot summer heat, we need somewhere to go that is indoors. We like to stroll around the malls to get exercise and look at the fountains. I'm hoping the malls open soon.
Pasco	Government	Absolutely disagree with reopening. Yes I'm very concerned for our economy however I continue to see people not abiding by social distancing or wearing masks. As someone with a compromised immune system, I feel at risk and believe this virus will rise in numbers if we reopen too early, especially since we have vulnerable populations and many tourists IF certain businesses can guarantee social distancing measures I would be open to this idea but I fear people will take advantage of this.
Palm Beach	Recreation	Please open the churches and beaches. People need God. God will protect His flock. Virus dies in sunlight and humidity. People need vitamin D from sun. Helps their mood to be more positive. Bars and adult entertainment should be the last to open. People really need to return to work. If people are afraid for the state to open, they can continue to stay home. They can make their own choice. Tell people to pray.
Bay	General	Please don't open Florida yet. Wait until everyone can get tested. No worth risking people's lives.Its hard to stay home but better then be dead
Orange	Healthcare	I think only healthcare should open. Many people need it and that's important. Everything we should remain as is. For the benefit of us all. To maintain our social distancingis for the best.

AMERICAN OVERSIGHT

Pasco	Healthcare	I have a son with several medical conditions. He requires therapy and lots of doctors appointments. As Florida reopens he will be one of the many who will have to remain at home. People like him need telehealth. I was told by his doctors office it was only approved until April 30th. That date needs to get extended. Please help protect people like my son. Do not rush this reopening. Do it safely.
Hillsborough	Government	We should get this virus under control before we even consider opening anything up. The state should keep the stay at home and social distancing rule in effect until we truly have this virus under control. Otherwise, I feel the number of cases will increase again and we will be right back where we started with this. The risk is too great. Err on the side of caution. Be safe now not sorry later.
Collier	General	I would like more testing done quickly and efficiently and regularly so we can open up ASAP. More people are suffering with the shut down than the ones suffering from coronavirus. Keep high risks groups on lockdown but healthy people need to open economy now!! I have seen first hand the struggle people are going through by kids being home, families out of work and struggling financially. I have asl i seen my refi with Suncoast Lending denied due to my small business not having income. I have yet to receive PPP or EDIL and did not even apply for unemployment since that has been an utter failure for our state and country. I do not blame anyone for all of this, it is completely unknown territories for everyone. But numbers are showing us that the cases are going to be much higher than expected which will drop fatality rates drastically. It's time to adjust and get our state and country open and let us get back to work and financially independent again. Thank you for opening up to public opinion.
Pinellas	General	Thanks for taking comments. I hope this helps. I think people and businesses should have the OPTION to reopen if they (1) want to; and (2) can adhere to some sort of social distancing/cleanliness accountability standard. The option element is important. Because I do not think it's fair that we are in a forced shut down state for this long and people are unable to make a living at no fault of their own. I understand that some people/businesses may not be ready to open and- that's fine, but to those that are, they should be able to. There should not be a blanket restriction on everyone/every business. With that said, if you are a person or business that does want to re open- you need to comply with the social distancing/cleanliness accountability element above. This virus is not going away anytime soon (apparently) and the sooner we learn to live with it, the better we all will be. Our unemployment system is horrible- and is another reason why we need to get people back to work. There probably isn't a great answer here, but when you weigh the pros and cons, this option seems best. People are gonna get sick even if the economy isn't reopened. People want to go the grocery store; but yet, Grocery store employees (Publix) have the virus. Essential workers may get the virus and bring it home to their nonessential worker relatives?! This is a very bad health issue that will torment other aspects of our lives if we do not get proactive and re open the economy. Lastly, I think we should follow in the State of Missouri's footsteps and file a similar lawsuit against China. God Bless America.

AMERICAN OVERSIGHT

Orange	General	This is on behalf of my elderly mom who lives in a senior HUD housing in Winter Park, FL. She has already been dealing with back-to-back sinus infections and arthritis flare-ups. She's in her 70s. She's been a social smoker most of her life. She cannot risk her life just because some people want to reopen the state prematurely. She relies on the general population keeping indoors and being as hygienic as possible. She used to be a nurse back in her day, and she already does what she can to keep herself safe. But EVERYONE needs to KEEP doing it until the pandemic crisis is no longer a crisis. Keep our senior citizens safe.
Duval	Tourism	I would feel more comfortable with Phase 1 starting more towards May 15-May 30th instead of May 1st. I want to see how Georgia does with opening early and how their cases go. I know that the main testing site here in Duval was shut down quite a bit due to weather so I am concerned we don't have a good picture as to what is going on. I want to get back to work but I also don't want to see a big surge to where we have to shut down again. I am worried about the large elderly population in this state. I also know how important the tourism industry is in this state and if this isn't handled properly I feel like people will be afraid to come here and spend there dollars. The Florida Unemployment system needs to be fixed. There are people that filed in March that still haven't received payments. I am furloughed and my husband's pay has been reduced 20%. We are going to be in dire straights soon. I have autoimmune issues so I am unable to go out and do gig work or get a temp job at a grocery store because the virus. I do appreciate that Disney is being made part of the re opening task force and I am very thankful that Disney was allowed to autoenroll into the unemployment system.
Lee	General	As an essential worker who has to go to work everyday, it infuriates me to see all of the people out and about throughout the day instead of staying home. Please remove the politics and shut us down so this will clear up. Committing halfway is only mildly effective. Will we get through this and recover a lot faster if we just commit to staying home for now. I am asking that we continue with the safer at home order at least through the Summer. And please enforce the guidelines. Thank you.

AMERICAN OVERSIGHT

Miami-Dade	General	Open activities & business that can be done outdoors. (allow services i.e. Hair salon, manicure, etc to provide services outdoors as well) Beach, boating, parks, etc..... Now that we all know how to protect ourselves from catching Covid-19....we need the ability to act accordingly with minimal governmental interference. If these shut downs continue, few will have the money to survive. FYI....EXTREMELY disappointed that only a 2 week extension on Property Taxes, while being shut down and unable to make money or collect rents for a much longer period of time. More thought, for the "Floridian" needs to be applied, when making these life altering decisions.
Bay	General	I am a small business owner. I have not received any PPP funds although I have applied. I cannot afford to stay closed any longer or I will face having to close my business and default on my bills and mortgage. The “shutdown” was based off of incorrect models. The panhandle is not a hotspot like Miami....it is not fair that the “one size fits all model” is imposed on my area. Open things back up and tell the sick to stay home just as they would during the flu season.
Broward	General	Respectfully, focus should be economic growth. Thus, I would keep recreational spaces that draw large numbers that do not drive the economy, for example, beaches/parks, closed for the time being. We should re-educate Floridians on good health practices to protect our neighbors, not ourselves, for now and the future. This would include continued hand washing, mandatory masks inside business locations (outdoor exercise remains as is with social distancing [six feet]), and business temperature checks at the door. The temperature checks will re-enforce keeping other patrons safe. All businesses should open, if the owners want, with social distancing and limited capacity (for example, with restaurants, every other dining table). All of this is subject to adjustment on the fly so as not to overwhelm our hospitals/medical first responders. This should be the only measure, hospital capacity, and not raw numbers of increase. Compromised citizens (aged/co-morbidities) should be advised to remain safe at home throughout this first phase.
Palm Beach	General	How about opening the Unemployment Fund. My wife and daughter has been waiting over 4 weeks now to get their do compensation. People need the money to eat!!! What is going on with this Unemployment Fund. GET IT OPEN AND PAYING NOW!!!!!!
Miami-Dade	General	Please remind the Miami Beach commissioners that the rules during this silly shutdown have to be reasonable. There is no reason why the few customers willing to brave Lincoln Road have to go to the back doors of the restaurants to pick up their take-out orders! It would be nice if we could go for a simple haircut without running afoul of the regulations, too.

AMERICAN OVERSIGHT

Seminole	General	The 98%+ of Floridians who are not at any greater risk than the seasonal flu, need to be free to go back to work, and reopen their businesses. The 2% or less who are at higher risk can and should continue to exercise caution and or continue to isolate. It's time to factor in the incredible damage we are self inflicting to the states residents. Economic calamity has very measurable costs in terms of deaths as well. Increased substance abuse, domestic abuse, suicides, and so forth. Sincerely David Rosen
Lee	General	As an essential worker who has to go to work everyday, it infuriates me to see all of the people out and about throughout the day instead of staying home. Please remove the politics and shut us down so this will clear up. Committing halfway is only mildly effective. Will we get through this and recover a lot faster if we just commit to staying home for now. I am asking that we continue with the safer at home order at least through the Summer. And please enforce the guidelines. Thank you.
Holmes	General	Go with your gut instinct Don't be pressured in reopening to early Set a new target date of May 30 and then evaluate it weekly It would be easier to open ahead of schedule as opposed to closing up again because of a spike in the outbreak
Polk	General	The data does not support this lockdown. Quit listening to "experts" and look at the data. End this lockdown now. Unemployment and the famine to come will kill far more. Above anything else, it's a violation of the constitution, which you swore to uphold. Get a backbone and open this economy.
Brevard	General	For the love of all things human, please do not re-open Florida until this has subsided and it's legitimately safe. Re-opening the state will put not only myself but my loved ones at risk, potentially getting them/myself killed. Stricter measures should already be taken to provide safety for the state. Instances such as closing boat ramps and beaches should have been a mandatory and punishable offense at the beginning of this outbreak. All measures performed by Florida should have started at the beginning of March, like Kentucky. Things such as wearing masks in public should be mandatory state wide. This should not be negotiable. What's the point of "saving the economy" when everyone is dead. KEEP FLORIDA CLOSED.
Hillsborough	Government	County Tax Collector employees have a large interaction with hundreds of customers daily of all types performing Motor Vehicle and Driver Licenses transactions. Keeping a distance is difficult and should not reopen without limitations to the number of people inside the office and access to the testing and the potential vaccine months away.
Hillsborough	General	Because Florida'a coronavirus numbers are still increasing, I believe the shutdown needs to remain. Just 2 days ago, Florida experienced a jump of 1072 positive coronacases in 24 hours. As per President Trump's guidelines, we should wait the 14 days to discuss reopening after the curve has gone down.

AMERICAN OVERSIGHT

Palm Beach	Professional Services	I'm a hairdresser for many years. I haven't worked for 4 weeks. And have not received any unemployment or stimulus money yet. Having said that, I'm anxious to get back to work BUT I think we need to wait out to flatten the curve ..2-4 weeks?? I'm ok at that point working with masks, I've already made myself some . We have a plan in place to work two teams so we can still practice distance. I do think that state should mandate amount of people / clients/diners / shoppers per square footage of business space. I believe we will need to practice the "new" way of doing business for 2 months or more while experts watch the path of virus ,
Brevard	General	Right now the we are low in the numbers of people with Covid 19 and in the number of deaths compared to the numbers that were predicted because we shut down. I realise we are facing financial ruin in this neighborhood, this town, this county, this state, this nation and need to open up and get back to as normal as we can. Do it slowly. Keep us alive.
Broward	General	especially golf should be easy. mind and body exercise is important and seems all store with proper occupanc . no one is dying in the supermarkets fyi
Broward	Healthcare	I have an interest in having the state of Florida State of Florida reopened in a responsible manner.
St. Lucie	General	Hello, Until we have broad testing available reopening Florida will be a major public health disaster. We were able to significantly flatten the curve with our efforts to stay home these last 30 days. All of that will disappear and we will see a second wave that could be even worse than the first. This is coming from someone who has been unemployed for the last 3 weeks. I have not received any unemployment or even had my application processed. I am struggling to survive financially and I know it's too soon to reopen. We need our unemployment system to move faster and more help to those that need it. Opening up Florida too soon will only put millions in danger and drag out this entire debacle longer. I beg of you all, delaying opening anything for another solid two weeks and then decide if a slow phased in process may be possible. Thank you,
Duval	General	Just open it up... what r u waiting for
Pinellas	General	open the state. no restrictions. pools, beaches, bars, restaurants, gyms, everything. right away
Brevard	Education	First, thank you for taking comments. I know this is a huge undertaking. I would like to speak about childcare centers, as I am a director for one that is closed but we are working on reopening. Guidelines MUST be in place to ease us back. With everything this must be a slow and steady pace. This will help ease people who are worried and allow any business to get use to their " new normal" Remember, slow and steady wins the race! Thank you

AMERICAN OVERSIGHT

Escambia	Recreation	With relatively few cases in the Pensacola area, I believe it's too soon to reopen public beaches. Several out-of-state vehicles were found in the past few days parked at Perdido Key. I know most of the local residents are taking the thread of COVID19 seriously, and I know some people have been turned away at the state line...apparently not enough of them. It doesn't appear that beach visitors are following safety guidelines. It's too soon for Escambia County to reopen.
Sarasota	General	Please open! More people will die from this if we stay closed.
Collier	General	Watch the news conference of the 2 doctors from CA that give the facts. Death rate .01%. Shut down is ridiculous. Side effectives other than financial - increase is suicide, child molestation, domestic abuse, drugs and alcohol. OPEN THE STATE!!!!!!!!!!!!!!
Hillsborough	General	I personally do not know anyone that is sick but I know several people unemployed. The beginning of this pandemic required drastic intervention, although the “essential” “nonessential” distinctions seemed to be very arbitrary. Business should have had the chance to prove they could operate safely and within guidelines. A florist with 3 employees is probably safer than 20 people in a small area working a chik fil a drive thru. I think people understand Utilizing common sense, distancing, sanitation practices and are ready to get back to normal. Those who aren’t, are elderly or compromised can rejoin society when they feel ready. The rest of us want what they have; a choice. Government has reached in to the private sector and caused serious economic damage. Businesses and individuals need to be made whole. I am hoping for serious tax credits next year to all who missed out on grants.
Hillsborough	Healthcare	We should get this virus under control before we even consider opening anything up. The state should keep the stay at home and social distancing rule in effect until we truly have this virus under control. Otherwise, I feel the number of cases will increase again and we will be right back where we started with this. The risk is too great. Err on the side of caution. Be safe now not sorry later.
Pasco	Healthcare	Routine dental cleanings need to be one of the last things aloud to restart. phase 2 or 3. I am a dental hygienist and during a dental cleaning my face is literally in the patient's open mouth. Their saliva, blood, plaque and breath are all over my face. The face masks we have are not adequate. We don't have n95 and can't get them. Until we have the proper masks and enough of them we should not perform this procedure.
Escambia	General	Florida should reopen immediately. The economic damage is going to far outweigh the amount of deaths. A good economy = lives saved. People are hungry and jobless and have to hear celebrities preaching “just stay home.” Maybe not everyone can afford such a luxury! We can not afford to stay closed any longer.
Hillsborough	Healthcare	I don’t think that it is a smart idea to reopen the state this early. The low number of infections and deaths compared to the national statistics is because the stay at home orders are working. When everything reopens people will start to get infected and re-exposed to the virus causing an uptick in infections and deaths. I think it’s smart to say that no politician wants to be known for implementing a policy that results in higher rates of death.

AMERICAN OVERSIGHT

Pinellas	Education	Reopen all businesses as soon as possible before our economy is completely destroyed!!! Quarantine sick people, not those who are well!
Palm Beach	Technology	Unfortunately our Boca Raton Mayor has no clue how and when to reopen stores, beaches and recreational areas. This tells you how smart this mayor or his staff of Boca are even if I voted for him “NO MORE” total loser, with no business or understanding logical background. I trust that our great Governor will not make us wait any longer or have our public officials infringe on our constitutional rights like so many other Governors. You want to take the helm here and not delegate any more decisions to these minor public local officials that think they are smarter than us. As a business owner I want to see us getting back to some kind of normal, even if this will be a far accomplishing event. I want Florida to lead the nation in posturing our great citizens as responsible hard working people. The virus is not making any more inroads into our society, we have survived many other calamities without destroying our economy we must take it back TODAY Thanks Joeg Trump2020 without him all of us would be lining up in the soup kitchen today!
Broward	Healthcare	Hello, thank you for asking our opinion. I hope you will listen to educated scientists and doctors and follow their instructions. That being said, i think until we have an accurate and full-proof way to test and treat Covid-19 as many people should stay home as possible. Opening up the economy is what we all want, but not at the expense of the essential workers’ lives and those of their loved ones they come into contact with. There should be statewide restrictions on shopping as well: one adult per cart. Please keep us safe
Hillsborough	General	I understand the desire to open up the beaches, after all tourism is Florida's biggest industry, but it would be extremely harmful to open up beaches right now. In fact, beaches should be one of the last things to re-open. Some non-essential businesses and restaurants can possibly re-open so long as they keep the business capacity low enough that customers stay 6 feet away from each other and for restaurants, health inspectors should be stopping by frequently to make sure the restaurants are sanitizing the things that customers come into frequent contact with like seats and tables. More importantly, before we can even think of re-opening Florida we need more testing done. Only 335,000 people have been tested even though we have a population of 21.5 million. Until more testing is done on the population, it is downright dangerous to try to re-open anything non-essential right now.

AMERICAN OVERSIGHT

Broward	General	Dear Governor DeSantis and Task Force Members, It's time to reopen the state of Florida. The people of Florida need and can return to work. Please don't cite models. The models of the President's task force have been wrong about everything: hospitalizations, fatality rates, disease peaks, where the disease will hit hardest and when. There's increasing evidence this virus has been here since December. It's almost May, and we're still confined to our homes. It's time to let the actual numbers inform decisions. My territory covers Broward and Palm Beach, the 2nd & 3rd hardest hit counties. According to Florida Department of Health data there have been 317 deaths so far in these counties. That's .009% of a combined 3,450,000 population. 1,220 residents in these counties are currently hospitalized. That's .03% of the population. These numbers are nowhere near what was projected, but they have kept me and millions of my fellow Floridians at home, have ruined businesses, and are still the reason why thousands are facing poverty and despair. Quarantine is for the ill/vulnerable, not the healthy. We can figure out a way, like Georgia, to get people back to work safely and soon. If some Floridians don't feel safe to go to the stores, shops, or restaurants they are free to stay home. But the rest of us can safely and intelligently begin to regain some degree of normalcy. There are no studies of outdoor transmission. We're told we should be outside, but all the parks & beaches remain closed in southeast Florida. Please, with a sense of urgency, give us a plan with dates so we know what to expect instead of being in this limbo. You said Florida will be driven by the data. The data says what we're doing now is madness. Thank you for all your efforts.
Pinellas	General	>KEEP IT SIMPLE. > Every company has to have a safety plan >Break it down by county's. >Every school system must show safety plan >Break it down by city. In 30 days >Take big map of Florida break. > max open Florida is up to 50 percent some It down to percentage. Some can only do 20 percent >How many countys can be open by >doing this you have control in case?? 50 percent same with city. > after September open another 25 percent >Your max opening state would be. this would be at 75 percent by 50 percent. >By January 1st the next 25 percent this would be 100 percent (good luck)
Manatee	General	I am in favor of being very careful and thoughtful about relaxing stay at home restrictions. I believe that without a testing/contact tracing scheme in place, we will be inviting an increase in transmissions and deaths, particularly since we still know very little about the disease. Use science as the guide to planning for reopening businesses. We can fix the economy later. We can't fix dead people. Thanks, Ted Gordon

AMERICAN OVERSIGHT

Hillsborough	General	I would like to see Florida re-opened. There is much less chance of catching anything at the beach than at your local grocery store. Let all businesses set their own protective guidelines like the essential stories have done.
Miami-Dade	General	Hi, I want to let you know my opinion about the reopening during Coronavirus crisis, I am Dentist, I am super worried about this because give the people freedom to be normal in the streets doing their normal life is an error, a lot of people will die if the government do this without a vaccine, the government needs to wait until a vaccine is created to save the people will be a caos in the hospitals, in the city like Italy because people will not have the enough careful and protection for themselves. Please think well before reopen our life.
Hillsborough	General	Please do not re open Florida too soon! And when you do, please do so very slowly in stages, still encouraging social distancing! OPENING TOO SOON WILL PUT US ALL AT RISK and we will be right back in shut down mode again!! We need more testing and a vaccination! Please do your research on middle age people who are suffering strokes and blood clots from this disease! It's not just our elderly population who are at risk here! THE WORKING CLASS CITIZENS ARE AT RISK!! If I return to my job too soon, I work in a salon where social distancing is not possible and I'm in tremendous fear of getting sick! PLEASE PROTECT THE RESIDENTS OF FLORIDA!!
Manatee	General	Dear Governor DeSantis, I am a resident of Manatee County. Florida was built upon hard work and self-sufficiency. We are a resourceful and responsible people. It is time to let Floridians do what they do best; get back to work. Every business is essential when a family's provisions are dependent upon that income. Current statistics show us that divorce, child abuse, alcohol abuse and depression are on the rise as a result of our inability to work without penalties and provide for our needs. It is time to repeal the restrictions upon our businesses so Floridians can get back to healthy and productive lives. Floridians love their neighbors and know how to use common sense to live and work safely. Please lift the penalties on our businesses while maintaining the recommendations of the CDC so that Floridians can provide for their families. Floridians are good people; we are fully capable of operating our businesses while voluntarily engaging in the practices that will help keep our neighbors healthy. It is time to put Florida BACK TO WORK. It is time to lift COVID restrictions upon our businesses. Thank you. Sincerely, Nancy Lewis 813-767-4941
Hillsborough	General	I am a hairdresser. I consider our profession to be one of the last businesses to have to reopen in our state due to the up close and personal nature of our profession. I want to protect my customers as much as I want to protect myself and my family. There should be a definite flattening of the curve and way more testing before it would feel safe to get back into a salon.

AMERICAN OVERSIGHT

Clay	General	I am concerned about public pools at HOAs and summer camps. I find both of these very difficult to control with social distancing and with the large crowds in Florida. I seriously worry of a second wave. After talking to local business owners it seems like everyone is interpreting guidelines their own way and I hear a lot of ... when we open.... and they are very inconsistent. I would like to see industries like gyms, hair salons, etc have approved industry plans when it comes to masks, people, cleaning, etc. so there is a standard that must be followed NOT a guideline to be interpreted. While I would like the state to open, I am willing to stay home all summer if it ensures that school will reopen in August.
St. Johns	General	It's time to reopen...I am a property manager and every day I see people in grocery stores, around others and feel that we're seeing good success with recovery. Risk has to be on us not the state...reopen all aspects of society
Hernando	Recreation	I feel that small businesses should be able to open if they choose to. People will then go out and see them if they choose to. Masks should be strongly encouraged. Elective surgeries should be allowed. Theaters and bowling alleys should be closed. Summer camps should not be allowed, but I understand that we might need them. You could limit the number of kids in classes. Kids are not necessarily at high risk, but they spread germs. Gyms should be closed. They should not be in phase one. I am not sure why they are. If they do open gyms, the machines should be spaced or people allowed to use every other one. I read about a gym in Georgia doing this. Public pools should be closed for now unless they are used for lane swimming. Group exercise classes should be canceled for now. Lobbies or gyms and other public spaces should not have coffee. This would promote gathering. Nail salons could open with masks and changing of gloves and sanitizing in between clients. That's risky though. Special shopping hours for seniors should continue. I know my mother needs that. Beaches, nature preserves and trails being open for exercise only is a great idea. Let's get moving! Retail could open with masks. I doubt they will be very busy at first. Community club houses should be open for spaced dining only. Encourage restaurants to have cool outside areas to sit with fans. Let's continue to be smart and not loosen our cautious ways around other people. I miss going to Disney. I don't think it's smart for them to open yet, but I'm confident that they will come up with a plan to keep everyone safe. We can do this. We just have to move slowly and approach things differently. I knew two people that died from this. That's too many.
Brevard	Education	My wife is in hair school. This shut down is affecting lives severely. If people want to stay home, they can. The government should not be allowed to shut businesses down and cause unemployment. This is outrageous and I feel like my rights have been violated. Not even 300 cases in my county, yet we can't do anything. It's not fair, and it's not helping anything. My wife needs to finish school and take her state test. Pushing back her date is hurting us financially and there's no help we can get for that.

AMERICAN OVERSIGHT

Manatee	Administrative	Please keep Florida in a shelter-in- place order!! I have immediate family members who have medical conditions that make Covid-19 even more dangerous for them. Please error on the side of caution and keep Florida closed! Keep my family safe! The economy is important but not as important as people's lives!
Hillsborough	General	Please keep Florida safe and wait to reopen. Make sure we see the decline in numbers before we reopen.
Lee	General	DO NOT RE OPEN FLORIDA
Lake	General	Please reopen.
Pasco	Recreation	Open parks and beaches. People know by now what they are supposed to do !! If they don't do it the right way then it is their fault and they have to suffer the consequences themselves!! You can't protect "STUPID" anyway ! It's time for people to get back to work also !! They know how work smart and use common sense .....
Broward	Healthcare	Please listen to the Healthcare professionals & don't reopen Florida till it's safe
Palm Beach	Government	I am appalled at the state of Florida ! We are the SLOWEST IN THE USA to get unemployment I have been waiting over 4 weeks. FIX THE PROBLEM! We reopen and are going to have bigger issues!
St. Johns	General	Please, please do not rush to open the state for business, travel, etc. While we are all anxious to get "back to normal," we are not there yet. Covid-19 cases are still going up in parts of the state and there is still inadequate testing throughout the state. We REALLY don't know at this point how many FL residents really have Covid-19 as a result. We need to follow Pres.Trump's recommendation of 14 days of reduced cases. We are not there yet. FL is unique also in the number of senior citizens as compared to most other states. We need to protect them!!....esp. when it comes to senior centers and nursing homes. I would hate for us to "open up the state" and then have to lock it down again due to an increase of infections. It will be interesting to see what happens in Georgia over the next couple of weeks and months. I think we can learn from their experience. Also, I know there are no scientific or medical experts on the task force which really surprises me and many residents. These are the EXPERTS who can provide accurate information on when and how to open the state. Please...be very cautious and don't be influenced by others or pressure from small radical groups. Thank you.
Pasco	General	I do not feel facemasks should be required anywhere. Studies show masks do not work unless they are an N95, and the availability of them to the general public is not feasible at this time. All beaches, outdoor recreational facilities, and parks should be re-opened. Require all businesses to use hand sanitizers when customers enter their businesses. I believe it is against our rights to be mandatory temperature checked unless we are entering a medical establishment, medical office, hospital, nursing home where others are at a higher risk. Conferences should be allowed to resume and sporting events allowed to resume WITH fans present. Gymnasiums should be able to reopen.
Orange	Healthcare	Open up all elective surgeries

AMERICAN OVERSIGHT

Hillsborough	Finance	The state of Florida should not re-open. I believe that we are taking this crisis way too lightly. Not only we are allowed to leave out for “essential” needs but people are taking advantage of this freedom as if it’s not easy to contract the virus. If the state legislators truly care “for the people’, then they should really reconsider the well being the individuals residing in this tourist state and their families as well. Please take this comment to consideration because everything will get worse if we just brush this crisis under the rug to please those in a higher power. Trust your heart, not your head! Do what is best for everyone and not for your personal gain.
Broward	General	I feel that this state in no way, shape or form should be opened until medical experts say it’s safe to do so. This is more important than the economy, it’s about human life. We are people not just a number and we should not be forced to chose between going back to work or potentially having a breath the next day.
Palm Beach	General	All people entering stores should have masks something covering their. Have to Winn Dixie and seen people coming with face cover. Stores could create one way traffic patterns. Maybe young children with one adult be permitted to get outside Other parks opening slowly and lastly beaches. Germany is paying people ‘s salaries. Maybe us should do this for 6 months. Opening slowly is important so we don’t go backwards
Lee	Retail	Retail establishments are a vital part of reopening. It should be done swiftly. People need to be able to get back to work. Unemployment is not doing the job nor is the federal government. Stimulus money was nice to get, but it had to be used to pay monthly bills and buy food. No way is it going to do anything above and beyond.
Broward	General	We are especially vulnerable here in South Florida and I believe that, if we remove restrictions, we will wind up exactly in the same situation as NYC. Please don’t!!!
Orange	Healthcare	Absolutely do NOT open! You are putting all your residents at risk! I don’t understand how you don’t see it; how about you work on helping those with NO income being threatened to loose their houses! Figure that out! Reopening you’ll have. A mass effect of dying. Stop the spread and be vigilant! Make harsher rules to staying home.

AMERICAN OVERSIGHT

Lee	General	At this point, the majority of our cooped up population has developed a new “germaphobia-19”. It shows up everywhere you look, people are afraid of each other, they frown upon anyone infringing on their 6’ personal space. By opening up our economy, those traits are not just going to disappear overnight. Those are going to be part of our DNA for a while. Floridians are ready to return to their choice of establishment, and each establishment owner is ready to go above and beyond to provide a safe “social distance” friendly atmosphere. Few restrictions to keep in place: 1. ALL international/domestic inbound travel for the next 60 days to be funneled through 2 airports (Orlando, Miami). This includes full disclosure of travel/whereabouts over the last 14 days and a test kit administered at customs checkpoint. 2. Those who are most vulnerable (65+ age group) who are already retired, ie not tied to a job, should continue partial safer at home order with limited hours spent in public places. We simply cannot wait any longer. As an independent contractor, I have had ANY work since March 16th, basically 6 weeks of no paychecks. NO economic stimulus payment (even thought the government has my bank info. NO unemployment insurance payments (even though filed March 28). NO IEDL loan (even though filed March 27). NO PPP loan (even though filed April 10th). Basically shut out of all 4 support payments, with no one available who can give me an ETA on any of them. Running out of money, mortgage not paid, really upsetting to say the least. Another 1-2 weeks of this and my years of developing my life savings plan will go back to square one...
Orange	General	The general public does not have access to face masks, disinfectant wipes, disinfectant. Until they have the products to try and protect themselves reopening the economy is hazardous. I have looked everywhere for masks , gloves disinfectant and nowhere in my area has them. It has only been recently that toilet psperbhas been back in stock.
Hillsborough	General	I was born and raised in Florida. I stayed in Florida for college and continue to work in Florida. I have family members here who are vulnerable to CV19, and I can’t stand the idea of losing them for the sake of very few people. Please do not reopen until most health experts agree that it is safe to do so. It would be irresponsible to reopen before there is a consensus by respected and trusted experts in the field.
Duval	General	Fully open the state. Also, fix unemployment.
Orange	General	I believe the state should be closed for at least 2 more weeks. We're on the right path so far and by opening everything up officially will make our numbers sky rocket. To be honest not a lot of people are following rules as it is , imagine with everything reopened?

AMERICAN OVERSIGHT

Martin	General	The state of Florida should not open until the number of COVID 19 cases goes steadily down for several weeks. Also, let this whole experience be a lesson in what we are doing to our state to rely entirely on the service industry. If folks can't be out and about, they cannot generate revenue by being served. The service industry keeps the poor living paycheck to paycheck. We need manufacturing to make a come back. Never mind niche industries like biotechnology that require higher education to be able to function in the jobs created. Bring back manufacturing and bring back goods made in America!!!
Duval	General	Thank you for all the work you're doing. I'm writing to urge you not to give into the temptation of "reopening" too soon. Right now, we are able to keep COVID-19 levels to manageable stages because the measures we're taking, such as social distancing and closure of high-contact areas like restaurants, are working. The fact that they're working does not mean it's time to end them. By reopening too early, we risk a resurgence of the disease that could overwhelm our healthcare systems and kill a lot of Floridians. Let's stay the course.
Pinellas	Healthcare	Open Florida!! This virus will be here for many years. We will need immunity. More damage creates with abused kids at home, domestic violence, anxiety, depresion.
Hillsborough	Retail	Please allow a gradual reopening with max. capacity guidelines like grocery stores, etc have followed . Classrooms continue to be closed- good, not worth the risk. Curfews are still good and bars serving outside tables only and no inside. OPEN THE BEACHES and PARKS!
Hillsborough	General	I believe Floridians should be given the chance to demonstrate what we have learned from this pandemic. I feel limited business should be able to open with proper precautions in place. Let us show the rest of the country how it’s suppose to be done!
Flagler	General	Restaurants to seat every other table or keep tables spaced 4 ft apart. Retail stores to limit # of people to avoid crowding. Consumers need to be directed to continue social distancing of 6 ft apart and recommend continued wearing masks. Seniors and those medically at risk recommended they continue to limit their exposure. Employees to wear masks in order to return to work.
Pinellas	General	How can you reopen the state when we cant get toliet paper or sanitizers of any kind? We need to at least be able to take care if our own hygien. We have poor and homeless people unable to provide for themselves as well. Listen to the bipartisan scientist and use your brain. We all need to be tested and aggressive tracking needs to be in place. Look at the countries who have been fairly successful and learn from their failures as well. Follow the science and those who have nothing to gain from their statements. Oh, great...this isnt working either..how suprising! Submitting and resubmitting. How difficult is it to create a website that works in 2020?

AMERICAN OVERSIGHT

Hillsborough	Food	How can restaurants truly safely reopen? I manage in a restaurant, the cooks cannot social distance, the servers have to work closely together, it's just how the industry works. Temp checks? Seriously? So if there is a dinner rush (as there will be when stores open), we are responsible for checking staff temps? Who checks the guest temps? They will not be wearing mask because they have to eat. They won't be wearing gloves they have to eat. This virus is air born. So in a closed environment where people are not wearing gloves are mask seating every other booth is supposed to keep us safe? What about all The surfaces that have to constantly be wiped? Are we to follow guest and watch what they touch. I know there is a desire to reopen. But please consider not opening restaurants for awhile it's unsafe for ppl and guest. No matter how many guidelines you put out, they cannot be properly enforced do to the amount of guest that will come in.
Osceola	Healthcare	I am a healthcare employee, a RN to be specific. We are holding things together in Florida, but I watch my nurse friends in Connecticut as their hospital remains above capacity. They are tired, they can't see their families. Opening the economy too early will put people at risk. It will give a false sense of security. Having out of state tourism increases the chance that all this work we've done to keep Floridians safe was a waste of time.
Hillsborough	General	Please please WAIT! There are so many people in this county and many do not want to even obey the stay at home order. I don't believe the spread is contained here. We have high numbers here and I think it's not done goin up. You don't see the streets here. Quite busy as are stores n many areas are full of people congregating like Hyde park village and Davis islands every weekend! No masks. Sitting at patio tables outside or edging walls. This is one county that has not gotten the message. I can't speak for all places but I don't think any of us want to go back to " normal " life at the cost of it having a resurgence. I know many need assistance but your going to have many more if we don't go slooooow! Thank you
Seminole	Government	Please don't reopen the state of Florida yet! It's only going to get worse. Please think about the safety of us Floridians.

AMERICAN OVERSIGHT

Polk	General	We MUST reopen ASAP. We cannot live in fear. This is affecting more people than just those infected. Me, for example, I suffer from severe panic disorder. The past few weeks have been hell! I can barely function. I feel life is not worth it to live like this. I feel trapped. I have gone to bed some nights hoping not to wake up. I am fighting depression. I think people should be FREE to make their own choices. This is America. This is the Land of the Free. I am a proud American citizen who immigrated here 27 years ago. This is not feeling like America lately. People are living in fear, not fear of the virus but fear of the government. We don't know what is true anymore. Conspiracy theories are all over. This has been politicized. Many people fear this is a huge conspiracy against President Trump to sink the economy. We, the people, cannot live like this anymore. If we choose to go out and get the virus and die let us do it. I rather die in freedom than live in oppression and fear. MAKE AMERICA GREAT AGAIN.
Manatee	General	I DO NOT think we should reopen Florida on May 1st. I think that would be a huge mistake. And don't believe we have reached the peak of this pandemic. I believe we would see a lot more deaths or cases in general of coronavirus if we were to reopen. Restaurants should stay doing to go only. Beaches should remain closed. But I hear that the beaches are up to the city or county. Either way, these procedures that we are currently putting into place should continue AT THE LEAST through mid May. We should stick to the guidelines of the CDC. But we should also listen to the reports of the scientists saying it's not a good idea to reopen the country. I do agree with reports stating that we as the state of Florida, should continue with the "safer at home" order until it is recommended by the CDC and the scientists that we are okay to open back up.
Sarasota	Recreation	Hello. Not sure how much of this it applies to, but I feel people are aware and respectful enough to adhere to a limited reopening of recreation activities. Some examples would be maintaining 6 ft distance between patron in a dining seating(no more than 10 patrons at any one time), similar scenario for a haircut place, nail/salon place, etc. Regards Mr. Nikki Scafa
Hillsborough	Finance	Mr. Governor please reopen this state and return our freedom as sovereign citizens. If anyone has concerns or fears about the reopen they have the freedom to stay home, but please don't take our freedoms away and cause unimaginable economic depression to the rest of us to make the media and certain fearful citizens more comfortable. As a small business owner myself, I can tell you that for the good of my family, my employees, and our great State, we need to reopen right away.

AMERICAN OVERSIGHT

Lee	Recreation	Open all golf courses and driving ranges. Limit golf carts to one person if over 40. Ok for two if both under 40. Put sanitizer and face masks in cart. Have rangers and maintenance sanitize green poles, carts, drinking stations. Clubhouses require face masks and limited guests at a given time. Number of guests depend on size of clubhouse. All should social distance for period of time.
St. Lucie	Recreation	After hearing the White House task force advising that sunlight and heat kill this virus, I think it should be urgent that we allow beach facilities to reopen. It would be greatly appreciated if the local governments of this state and our own State government allow us to be adults! Offer firm guidelines about social-distancing and allow people to be responsible. Local governments are in a power trip, nanny state mode.
Manatee	General	I am Commander of a small Veterans of Foreign Wars post (500 Veteran and Auxiliary members) located in Ellenton Florida and we need help. We have been closed for a month and we are still paying our bartenders and other employees as well as rent, utilities ect. Our Quartermaster has applied for payroll protection but was denied(reason unknown). We are proud to serve our Veterans and our community but if we can't open soon we will have to close permanently due to lack of funds. What is available to us as a 501 business as BB&T is not working with us.
Polk	General	Open the state back up! People who want to self quarantine can continue to stay home. Open the state Back up! Open the state Back up! Open the state Back up! Open the state Back up! Open the state Back up! Open the state Back up! Open the state Back up! Open the state Back up! If I wanted a coward as a Governor I would have elected a democrat!
Broward	Healthcare	I am a senior citizen. My husband has Parkinson's and I am 75. I know this is a hardship fir young people and business owners, I was once a small business owner, so believe me I do understand. I think the health of the population is more important. We just have to get together and help all in anyway we can. We have a few selfish individuals who are only looking out for themselves. Please do not open up the state just yet we have a long way to go. Please wait until we see what is going to happen in the next couple of weeks please do not open the state too quickly

AMERICAN OVERSIGHT

Lee	General	Dear Gov. DeSantis, I think all states should be reopened to healthy young people,, so they can work and get the country going, especially with increased testing. The older residents as they are able. My husband and I are mid 60's and we didn't get to that age by being stupid. We know how and when to be careful to best protect ourselves. I think if the beaches are opened, then maybe only allow a certain number per day if necessary, issue permits to that number of people for a particular beach. We enjoy Barefoot beach and during the high season, it is packed to full capacity and every group still stays 6 feet away from each other ! Our golf course is sensibly allowing couples to ride together and other players individually. Our club pros' email this week reflected that everyday this past week, the allowed players were 50% of the requests, but everyone understands the need for this and waits their turn! Good luck with handling all the controversy that will certainly come your way, as a conservative republican!
Seminole	Healthcare	Even though my fiancee has been furloughed for the last 4 weeks, I still do not think Florida is ready to come out of "Stay at Home". The daily count has not really decreased state-wide. Some counties are doing better than others at "flattening the curve", but overall, the numbers aren't there yet. Need at least 14 days of steady decline to justify opening things back up.
Duval	General	Time to reopen everything and get our lives back.
Hillsborough	Retail	Reopen
Manatee	General	I'm in automotive sales and was laid off due to COVID-19. I need to pay rent, electric, internet, phone, and insurance for my car. I need to work. Please reopen the state! I need a roof over my head! Cancel rent, something!
Marion	General	I'm a self employed business owner and there is nothing more I would enjoy than to be busy w work but I also know that we have achieved very little in containment of covid19 and I'm sure the fear will not help us reopen so we must create confidence in safety or no business owner will succeed it will cost more than it will be productive so we must painfully stay closed for longer after all I wouldn't got to a theater restuarant etc...to risky so what does opening up achieve high risk health wise low profit business wise....thanks
Lee	Healthcare	As part of the dentistry workforce I ask that the State not be open in haste.There's still a lot of uncertainty as to how we will be able to provide services to our patients without putting our hygienists at high risk of contracting covid-19. We need more PPE in order to begin properly seeing our patients.
Polk	General	It is a mistake to begin opening the state. There have been too many deaths already and keeping the state closed will help mitigate the spread of the virus. There is still very little known about it and with no clear treatment that works across the board, it is dangerous and irresponsible to open back up. Florida should focus on getting the unemployment website running efficiently, ensuring people's housing, and getting frontline workers hazard pay. Even one more death is too many. Keep our citizens safe please,
Pasco	General	We do not need to open Florida yet. I get people need to get back to work, but working in healthcare I know the cases will skyrocket if we open.

AMERICAN OVERSIGHT

Brevard	General	The time has come to open our State. We locked down to alleviate strain on hospitals and get past the curve. We have complied and and lived up to our obligations now do your part and honor your words. BTW I need dental work, broke a tooth, but it's considered cosmetic REALLY ?
Lee	Food	Open it all back up. People need to go back to work.
Broward	General	Do not open the state until health officials say it is safe. It is not safe for our kids to go back to school or day care. So why will we take the chance. Do not reopen until it is safe. Yes we are all suffering. I rather be broke than dead.
Palm Beach	General	Please reopen florida Gyms are essential for mental health and fitness Parks are wide open spaces Use social distancing at every place but allow the people to freely do that, why do the people have more freedom than USA?
Seminole	Professional Services	I am a hairdresser and there is no safe way to stand the 6feet of safe distance and do hair. It is not safe for us to reopen so soon. Please do not reopen us to soon. It is not safe!!
Columbia	Finance	I have no money in my pocket to even go back to work or fuel money I barely make it on food I believe we should wait till sometime middle of May Business owners received a free loan To keep their employees I am not jeopardizing my life for their benefit
Broward	General	Yes definitely reopen , cautiously but soon
St. Johns	General	It is time to re-open Florida. Once the initial scare of the novel virus was dealt with by informing the public of the risks associated with it, and changing a few things by social distancing to help with any associated healthcare burden, life should have gone on. Unfortunately, by taking the personal responsibility away from individuals, we have decimated our economy. We should continue to be careful and protect the most vulnerable while opening the state to business as usual with slight restrictions. This whole thing was overblown.
Broward	Professional Services	need statewide testing for everyone, symptoms or no symptoms, before opening.
St. Lucie	General	Let’s reopen!!!!!
Pinellas	General	As I am of the older group my needs to go out and mingle are very low. No matter what is decided I will continue to wear a mask and go out when necessary. That being said, I believe we still have to be very cautious eg continue to observe the recommendations as before. I can see us loosening up the the restrictions on businesses. These people need to save their livelihood. I am sure the committee you have set up will be wise in their recommendations and do what is safe for all of us. We all need to be aware and stay safe.

AMERICAN OVERSIGHT

Volusia	General	Do NOT reopen now - People are still dying every day and new virus cases are being reported. I have zero confidence the numbers are accurate. We have not flattened the curve. We have not done nearly enough testing. It is said that 2% of the population has been tested as of a couple days ago. Are you kidding me?! It is a known fact that people can carry the virus without symptoms. This is a dangerous and idiotic idea to put peoples lives on the line. We are the USA- it's disgraceful that we are still behind on testing everyone! Yeah, it's going to take a long time to test everyone but putting it off isn't helping at all. I refuse to be a guinea pig and if the state opens too soon, it will be obvious that our government doesn't value children's lives or anyone else.
Brevard	General	As much as I would love to visit our local restaurants, I would urge the Governor and Committee, to actually observe those foolish enough who congregate in protests, on the beaches, and even their own driveways with their, and other children along with them, placing these children in harm's way, as well as teaching them how NOT to follow rules! PLEASE, take the path slowly and safely, for ALL of us FULL TIME residents. PROTECT US! Thank You For Your Work, Mark Rosenbauer
Broward	General	Please keep the state non essentials closed as long as possible. Beaches should not be open as well. Our numbers are scary high especially in big counties like Dade and Broward. Put more effort into testing and healthcare. It is absolutely ridiculous that the reopening committee does not consist of heathcare workers and scientist. Our governor has proven he is more about the dollar than people. Put people's lives first not GREED.
Miami-Dade	Tourism	I dont think we have a choice but to open. There is no stopping this virus but to face it and we have to take that risk. I am really afraid for my children and this is not a world i want to leave my children in. We need to get the wheels going and get us back to work. We Adults need to be Adults and follow safe protocols. For instance mask should stay open inside closed places like busses and grocery stores. Aslo let us get these blood test that yoyu prick your finger and see if you are immune to the virus. And this is coming from a person of high risk having high blood pressure
Orange	General	Please DON'T OPEN NOW!! We have worked so hard and gained so much by staying inside. i'm afraid we will lose it all and have to begin again under even worse conditions. It's extremely difficult to be quarantined but it's been worth it. I will hate it but even just a few more weeks will be better than doing it too soon!! We haven't seen the 1st 14 day decline yet so please don't open now!!
Orange	Government	As someone who is immuno compromised,and with the growing number of deaths in Florida, I think it is not safe to reopen yet.
Pinellas	General	I don't feel we should open the state just yet. I don't feel we are ready at this time to open anything. I feel that we need more time to let this pass.

AMERICAN OVERSIGHT

Pinellas	Healthcare	I currently work in a hospital and have seen many families having to face the loss of a loved one. Even in healthy times, this is difficult, but now during this pandemic it's even more difficult due to the added stressors we all are facing. I do not feel that we have seen a sustained downward trend to this virus, and think it would be foolish to open up all areas of commerce just to give our economy a boost. If it truly is too early, it could cause a deadly resurgence which I do not think is worth the risk. A few more weeks, to allow this pandemic a chance to run itself out, would be the better choice in my opinion as a Florida voter. Who knows how many asymptomatic people are still walking around, and when told that they no longer have to take precautions, will infect another population of innocent people.
Manatee	General	I believe it is too soon to reopen-. I live in Manatee co and our numbers are all over the place. Another 15-30 days. People are already out of work and have our lives on hold. Let s just keep going. We don't want to open up too soon and have to close again because of a second wave.
Sarasota	General	Quote from Steve Deace....More and more serology/antibody tests continue to come in -- Santa Clara, Los Angeles, New York City, Colorado, Boston area, Italy, France, Sweden, and now Miami -- which all continue to show the same thing. Coronavirus is FAR MORE wide spread than we knew, but much less lethal than we feared. How many more of these do we need to see before this stops? The answer is, this stops now. The latest numbers out of Italy: people under 65 with no underlying conditions are 0.7% of deaths there. The latest numbers out of New York City: people under 65 with no underlying conditions are only 1.8% of deaths there. But we are looking at 40% drop in GDP, which is straight out of the third world. Not to mention all the other health concerns that have not been addressed and now endanger people's lives, the depression, the stress on families, the rising domestic violence rates, stress on our food supply, etc. This. Is. Madness. Utter. Madness. Staggered reopening -- NOW. We are out of patience. Here is my proposal, to go into effect May 1st. -Those 55 and under with healthy immune systems return to real life immediately. --We launch a national effort to encourage/administer antibody testing throughout the country. -Focus our SARS-2 Coronavirus testing/social distancing measures on those with weakened immune systems and over 55 before sending them back to reality. -Keep those 65 and older social distanced 42 more days to allow for the other demos to get reintegrated, and allow for any further

AMERICAN OVERSIGHT

Miami-Dade	Healthcare	The infection risk is still to high for people to return to work as normal. For example the dental field is a high infection risk for the workers since 80% of the work is aerosol. No social distancing can be practiced in this setting. People are stopping social distancing practices now in public and in stores so how much more so will people be careless when restrictions are lifted.
Volusia	General	Look at the state in sections (Panhandle/Jacksonville, Central Florida, and South Florida). Phase designation would depend on the numbers for the area. 1: Open all businesses (essential and non essential) under the guise that social distancing remain in place until we hit phase 3 2: Open all restaurants restricting to half capacity seating 3: Open all parks restricting to social distancing until phase 3 4: Fully open all beaches keeping social distancing in place until phase 3 5: Request all businesses allocate an hour for vulnerable elderly to shop alone **Elderly and those with high risk should remain sheltered in place until phase 3
Lee	General	Open all the golf courses! Our course has been open this whole time and no sickness reported. precautions include 1 to a cart, no touch flagpoles (helped by a foam insert) and social distance. the UV rays and heat clearly help. Our couse is overwhelmed now with outside play with young golfers driving from miami and lauderdale to play. this makes no sense! we are a gated community of mostly seniors.
Collier	Management	It is too early right now to be opening the state back up. We have made great progress and exceeded expectations so far but in order to sustain that we need to see the numbers flatten out more and the testing ramp up. Yes the economy will struggle for a little bit longer but by being cautious and not getting everything going too soon it will be to Florida's benefit as this will likely substantially lower any second outbreak. When the medical community is in firm agreement that it is safe to open then we she proceed forward with a slow opening but I think we are at least 2 weeks away from that. If you put lives at risk by opening too soon that will be far worse than keeping things the way they are for a little while longer.
Broward	Tourism	Not to open Florida until the medical experts say so
Orange	Government	Re-open the state ASAP! We need to get back to normal life, the minority with health issues cannot dictate the lives of those unaffected.

AMERICAN OVERSIGHT

Citrus	General	i am a licensed hairstylist and have been for 25 yrs.. The governor stated that salons were a low risk business and that is 100% false!! Please do not reopen salons there is no way to cut hair with gloves on and there is no way to social distance nor can you perform services on a client that is wearing a mask!! We have been forgotten and overlooked here in the nature coast on testing we have had very little testing here not enough to reopen anything only 1% of our county and surrounding counties have been tested..I am a single mother and help my elderly mother and feel i have to make a choice of my health and clients health and my job its not fair this industry is not low risk in fact the opposite!! Clients come in sick all the time i have had clients come in after leaving the hospital they do not respect us!! we need so much testing here and i fear that if iam thrown back to work i will have to send my daughter to live with my mom to keep them safe its not fair we have the right and should feel safe to be able to go back to work!! we are humans not experiments to help save the economy human life is more important!! we have no testing here how can we be safe and safely open!! our mayor has not been seen or heard of at all through out this we have no help or protection!! the county commissoners vote and have been left in charge and the headlines of our paper yesterday said they want to put our kids back in school after 2 days ago our headlines were that there were 6 kids infected with covid 19..i repeat please this is not a low risk industry and do not treat it like one we have families that depend on us to come home too and when you do reopen our industry please have it monitored because i know my boss will not comply she is in there working illegally now and nobody does anything about it i do not even have a sanitized salon to go to and you see on tv in georgia that barbers are not complying with regulations put in place and again nobody is doing anything about it!! i repeat this is not a low risk industry nor can it be!!!!!!!!!!!!!!!! please give us more testing and free testing it is absurd to charge us foe testing in the middle of a global epidemic!! we should not need to tell you to do your job and follow the guidelines they are there for a reason to save human lives!! we are humans and americans do your job and protect us and our families!!!!
Orange	General	Dear. Mr. DeSantis, I hope this message finds you well. My wife works for the St. Johns River Water Management District. Please, do not send her back to work at the office yet. It is still very unsafe. She and her co-workers are working very effectively from home. She has been even more productive working from home than at her office. She has all the resources (computers, phones, internet, etc.) necessary to continue working SAFE from home. Nevertheless, if you decide to reopen Florida, please at least consider giving the the state workers the option to stay working from home if the conditions are suitable for it. Please. Respectfully, Oscar Vera Moronta.

AMERICAN OVERSIGHT

Hillsborough	General	I believe that we should not re-open until cleared by public health officials. We are supposed to trust in the people we put in power to advise us of public health problems so let's just do that until we can see a definitive declining in cases. Then when that happens let's talk re-opening. First you can work on the restaurants- let them be at 40% capacity but everyone handling any food/plates/cups must wear gloves at all times. People must still be staggered. Clubs and bars are rough because let's be real people go there to be with people so maybe wait on that one. Concerts and Sporting Events could be possible. Fits and most important you must set up some sort of temperature check mechanism at the entrances, anyone with fever or any sign of symptoms is not allowed in...no exceptions! Then from there have seats staggered, perhaps people or groups have to be two seats apart and every other row can remain empty. It's not perfect but I think people will be happy just to be able to be out. I think for Teleworking if it's been working let it stay in place. No harm no foul. Beaches will need to stay closed unless you have officials in place at all times keeping the minimum of 10 people and 6 ft rule in order. Also hotels can open back up but at 40% occupancy and same rules apply to their restaurants. Pools can be a bit of a pain but if people can stay respectful and do the right thing and stay apart it can be done. Amusement parks will also need to have a Temperature checking mechanism at the entrance and any displaying any symptoms of COVID-19 or fever will not be allowed entry..no exceptions! They can reopen at 40% occupancy and people will need to be staggered for rides and all rides will need to be wiped down after every use...again no exceptions! Once test keep coming back in a declining direction at that point every two to three weeks you can increase occupancy of these places by 20% until cases are gone and we can return to 100% occupancy. At anytime cases spike we may need to reevaluate and scale back on things but hopefully if everyone does their part and does what's right this can be beaten. But I think maybe we need to go hard the next two weeks and I wouldn't even care if we have a curfew if it means keeping my community safe. I say if any business if not keeping their employees or customers safe and following they recommended CDC guidelines they need to be fined. People's health should not be at the price of corporate greed. So let's work on tightening up now so we can go back to the America that we love
Lake	Food	I think we should Open all businesses 5/1 with social distancing in mind
Osceola	General	This covid19 has been tough, but we don't have a medical treatment for it, and we don't have a vaccine. Even if we have reached a peak. Which I am not sure about, how can we think about reopening Fla? I really feel for the people out of work. But my main concern is our front line workers. Are we going to increase their burden?

AMERICAN OVERSIGHT

Orange	General	If you allow non-essential business to open back up before PROPER PPE including N95 MASKS/RESPIRATORS for ALL who work outside their homes (not just healthcare) is secured, that will leave employees of such business in a terrible predicament: Go to work UNPROTECTED and risk not only their own health, but also risk spreading the virus further, or take the smart choice but go without unemployment benefits because now they have refused to work when asked. I'm a furloughed server with a healthcare background who is steadfast in the fact that it is NOT safe for me to return to work anytime soon, regardless of the consequences. That may make me among Florida's rising homeless population if you continue down the re-open Florida path, as I would be forced to live without benefits from unemployment (which I have still yet to see a penny from after applying March 20th.) It is inhumane for you to re-open Florida so soon. If there are others like me (and I know there are,) time is limited before actual full-fledged panic and riots begin.
Orange	Retail	As the owner of a tourist attraction on International Drive in Orlando, I think it's important to create a checklist/guidance on what procedures need to be done before, during and after customers enter and leave our premises. The guidance has to be precise so that all retail/entertainment establishments follow them so that tourist and guests are not getting different messages as they visit different attractions. Also, we would like to know in general how the virus is transmitted and how long does it stay alive and on which types of surfaces and for how long. Also, what type of products get rid of the virus so we know what 5o purchase. All we hear in the news is statistics on people affected but not how and why. More detailed information would be helpful so that everyone combats it the same way. Thank you and we look forward to opening up again soon.
Leon	Healthcare	Dear Governor DeSantis, Please do not reopen businesses prematurely. The health and safety of our citizens is of primary importance, and we should not risk increasing the infection rate with no vaccine or treatments available. Opening too soon will also be counterproductive for small businesses and their employees, since customers are not ready to return. Some citizens may be getting restless, but we can all be patient in order to keep our frontline workers safe. Our economy will rebound more quickly and more fully if we wait until we all feel safe. Thanks for your attention.
Polk	Education	Open the state back up! I also didn't think it was necessary to close schools for the year.
Pinellas	Healthcare	Open up! We need our jobs, especially since we can't get any unemployment.

AMERICAN OVERSIGHT

Hillsborough	Education	It is time to give each county opportunity to determine when commerce can return. ALL business is essential if it is essential to supporting a family. Educators need to know that businesses are open so their students' parents can work and provide. Outdoor recreation needs to be open and people need to show respect to the guidelines. Children need parks!! They need socialization at this point. They need to know that school will return in August as planned. We must take our world back! Inherent risk is everywhere and we can't remain in lockdown or other dangers will result. Thank you, Gov DeSantis for all you and your team have to support our state. Our frontlines are to be commended as well. Blessings and prayers for health... Laurie Daigle
Pasco	General	Open the parks and beaches with limitations. Let the hospitals and surgery centers open for elective surgeries and treatments. Open small mom and pop gyms less than 6 per session. Open salons with one or two patrons at a time with gloves and masks. You need to have gloves and masks available. No nail salons, that's crazy. Open stores with precautions in a week like Mavys or Belk. Only a few people working or shopping. Open stores like outlet stores malls. Two or three people in the store at a time.
Seminole	Professional Services	I am a hairdresser. It is to soon to open us. It is unsafe. No way to stand a safe 6feet distance and do hair. It's to soon to open us.
Volusia	Transportation	I do NOT think florida should reopen this early. There will be a second wave if we do reopen, which will be much worse. As a pilot and a transportation professional, I do not condone the opening of the states infrastructure yet.
Escambia	Tourism	we have a small home based business and can not make ends meet without tourism . We do not qualify for any of the programs because it a home base business
Broward	Healthcare	Make sure anyone allowed to go back has antibodies. Get tests out fast.
Pasco	General	I THINK BINGOS IN PINELLAS COUNTY SHOULD OPEN WE ARE 6 FEET APART AND SOCIAL DISTANCING. BINGO HALLS ARE CLEAN AND SANITIZED DAILY ITS GOOD ENTERTAINMENT ITS PAPER BINGO CARDS AND EVERYTHING IS DISPOSABLE. VERY CLEAN ATMOSPHERE I ALSO THINK CROSSFIT CENTERS SHOULD OPEN UP TOO PEOPLE NEED TO EXERCISE AND ITS SOCIAL DISTANCING TOO

AMERICAN OVERSIGHT

Orange	Tourism	Being a working member in the tourism industry, I feel very strongly that we should not be reopening yet. We see thousands of travelers per day, from all around the world. Seeing as some countries, like the US, are not taking this virus seriously it puts the employees at a greater danger if we were to reopen prematurely. We need to listen to professionals and experts, stay home and continue to isolate ourselves until they deem it is appropriate and SAFE to go about “normal” business. I say “normal” because what we previously knew as normal was not working and will not work if we go back to those ways. We all need to be vigilant in keeping ourselves healthy so we can keep each other healthy.
Miami-Dade	Real Estate	PLEASE OPEN BEACH - with restrictions to sit on chairs or blankets and congregate. Walking, running, working out and swimming should be allowed. This is the best place for large amount of people to spread, being in the air is healthy, and people should feel safe. Our beach should be the first place to open. We have children going crazy inside the house, they have to study with no real live support and beach is the only open space where it’s actually possible to stay outside in summer heat and unwind. I leave on a beach, there’s literally nothing else around except tiny sidewalk walking on which is thousand times more dangerous in terms of heavy traffic and interacting with other people. I wonder that health officials forget how important exercising is for immune system and mental health. Opening golf courses is great in terms of supporting this business, but opening beach is crucial. Open dog parks, open parks, farms, botanical gardens and zoo’s. Tennis courts are closed - WHY? Schools must be reopened by September in full, there’s no way for both parents to continue their work if it’s handled the way it’s handled now. Governor DeSantis, you should be more confident in exercising your power - we vote for you and support you. Please have political will and courage to do the right thing, don’t fall under press pressure, they will not be happy anyway, keep this lockdown longer and you’ll be responsible for poverty and marauders on the streets. Look at the countries that never were locked down. Please be adequate, not engaged in any business interests other than hard working people of Florida.
Sarasota	Professional Services	I don’t feel it’s safe to open salons after the April 30th lockdown. I believe we need more time to get this virus under control before we do so. I believe it will make matters worse for the long run of service type businesses. I’m a independent hairstylist and I fear for my health and my families health working in direct contact with clients

AMERICAN OVERSIGHT

Collier	Food	As a bartender I am terrified of reopening restaurants and subjecting myself to possibly catching the virus. The numbers are still way too high to chance anything. Ppl are extremely ignorant in this state and have zero regard for others. Knowing what I've dealt with before this virus took over, doesn't make me feel safe to reopen. I would like to know what precautionary steps will take place to keep us protected? Is it worth completely reopening restaurants? Will there be money to be made? I applied for unemployment as of 3/16 and have yet to see a dime. My application is still pending! No idea why. Yet, I'm still terrified to go back to work. No money but too scared to work, that speaks volumes.
Hillsborough	General	Dear Governor DeSantis, I am a resident of Hillsborough County. I want to thank you for recognizing in your Executive Order 2020-91 that "Attending religious services in churches, synagogues and house of worship" is an "Essential Activity" and lifting the restrictions on the Church's Right to assemble statewide. I am requesting that you also recognize that the First Amendment includes the Right of all People to Peaceably Assemble. In consideration of the essential right it is important to note its connection to the Right to Petition the Government for a Redress of Grievances. Without the Right to Peaceably Assemble the Right to Petition is strangled into non-existence. Historically, the power of the people to petition their elected representatives has been recognized to be most powerful in the exercise of assembly. This is why our founders enumerated both of these Rights in the First Amendment. The Supreme Court has held many times over the history of America that the Right to Peaceably Assemble, especially in the aspect of protest and petition, is a "Bedrock Principle" of America. You have repeated publicly that the government has no authority to regulate the meeting of the church, neither does the government have an authority to prevent the people from peacefully assembling in petition or protest. As you did for the church, please lift all penalties imposed upon Right to Assemble and trust the people to follow the guidelines set forth by the CDC.
Sarasota	General	I would definitly support the reopening of the state with the regards of the CDC recommendations. I would further like to see all businesses to reopen immediately. It will take each business owner more than long enough to get back on their feet, so reopen immediately is better than too late.We are in a beautiful state where the heat is on our side already to fight the Covis19 virus to begin with.Reopen immediately please.We are Americans, we can deal with this!

AMERICAN OVERSIGHT

Leon	Healthcare	Hello, I am a RN who works in a surgical recovery unit at a Leon county hospital. Currently, I am getting about half of my 40 hours a week. While the hospital has done a great job trying work us in other departments, there are just not enough patients in the hospital to provide us with enough working hours. I would like to see outpatient elective procedures begin to open, because this would allow me to work full time and not take up inpatient beds in the hospital. This would also provide the hospital with some much needed income. My other request it that there are some options available for summer childcare for essential workers. My husband is in law enforcement and still has to work, so that leaves my parents who are in their 70s to watch and home school my 7 year old on the days we both work. I am thankful that my 4 year old son has still been able to attend daycare, and was hoping something could be implemented for summer camp for school age children. It is not appropraite for my parents to have to watch her all summer because we are working. We typically use Leon County Schools summer camp. I think it can be opened and manged in small groups to keep the children and staff safe. I know you all have a very difficult task ahead and I appreciate your time.
Hillsborough	Healthcare	Reopen based on the federal guidelines and follow the data. Don't be like GA and just open it all up. Follow the data and move in and out of each phase based on the data. If data shows decreases in cases and deaths for the appropriate amount of time indicated in the guidelines then move to next phase. If it turns and the data starts showing increases then move back a stage. Be deliberate and reasonable. Don't cave to private interest groups like evangelical churches and the like. Take the lead from the health experts and protect the health community. If the people who take care of the sick all get sick we are all in big trouble.
Hillsborough	General	As of now we would only be able to have 10 people total pay there respects at our loved ones Funeral Service. This includes the staff and minister. As you consider essential services to lighten restrictions on please consider this. We are pushing the service as far back as they will allow which is May 11 hoping something will change. As it stands we wouldn't even be able to allow all of the intimidate family to attend. The use of PPE and or allowing 10 people to rotate in and out of the facility would be acceptable.
Lee	Healthcare	I am a dentist practicing in Florida for 30 years. I think all dentist, hygienist and dental assistants should be tested for Covid 19 prior to returning to work. Patients need to feel safe with there providers. Also we need the state to help us secure PPE at prices there were available prior to the virus. Our overhead is going to be unsustainable. The government claims to have millions of masks, gloves and gowns yet I can't get enough to practice for more then a couple of weeks. What I can get is so expensive. You can say increase your prices or charge a sterilization fee but we have people that have lost there jobs and discount insurance plans that say we can't charge. This is a recipe for bankruptcy! Please help because I want to. Thank you, Dr Toniann Conte

AMERICAN OVERSIGHT

Hillsborough	Healthcare	I believe the gym should be opened only if the person comes in with a mask! I strongly believe our health is extremely important and if we are over weight and not active then we are exposed to different risk besides COVID -19!! I am begging you Florida to please open the gyms not only for peoples psychical health but mental as well. The gym releases stress for some people and find it a happy place
Hendry	Professional Services	Do not reopen gyms, hair and nail salons and massage places for ay least another month
Martin	Recreation	Dear Governor please reconsider allowing one on one lessons to begin when golf courses open. It's very easy for an instructor to keep social distancing guidelines and we're in a favorable environment to avoid spreading the virus. As an instructor my window of marking a living is seasonal and the sooner you allow me to work the better for my family. Thank you for consideration.
Palm Beach	Management	First, you're an ignorant fucking coward for not shutting down earlier. Second, stop following Trump down the path to hell. Third, put some parents and epidemiologists on the committee. Fourth, do us all a favor and resign you goddamn failure.
Brevard	General	I would like to see stay at home orders extended until there are several days of steady decline in the amount of new cases of COVID. I would like to see testing of both current and antibodies be widely and easily available before reopening. My husband and I own a small optometry practice and have not seen patients in five weeks. As much as we need his income, we also need to stay safe. I am 39 and have aggressive coronary artery disease (already had a double bypass), have had three cancers in as many years, and am being treating for chronic Lyme disease. One of our three children is also being treated for Lyme disease. With these pre existing conditions we are willing to incur more financial hardship in order to stay alive. I do not envy the decisions that must be made by officials. However, I hope that the governor will heed the warnings of health and science professionals.
Pinellas	Information	Good afternoon I believe Florida should be closed completely keep people in their homes for at least 30 days and only certain people get a pass to come out of their home if an emergency or if anything Florida should be closed at least 14 days no grocery stores or if a grocery stores have to be open one person from the home have a pass to go to the grocery store and the grocery store should only be open two to three hours every other day with no cure or vaccination insight at least for another year or longer I think something drastic has to be done and no we may not like it but it is what needs to be done to save lives and if Florida is reopened I think the governor should be responsible because precautions could have been made I understand that people have to go back to work but God forbid they get sick or lose their lives they won't have to worry about a job my family and I all agree Florida should be shut down give people time to buy food groceries or certain things that they need before Florida does close but something definitely drastic has to be done

AMERICAN OVERSIGHT

Hillsborough	Government	Thank you Governor for lifting the restrictions on the Church's Right to Assemble. I would like the Governor to also recognize the Right of the People to peacefully assemble. The Supreme Court has held many times over the history of America that the Right to Peaceably Assemble, especially in the aspect of protest and petition, is a "Bedrock Principle" of America. The Governor has repeated publicly that the government has no authority to regulate the meeting of the church, neither does the government have an authority to prevent the people from peacefully assembling in petition or protest. As he did for the church, please lift all penalties imposed upon Right to Peacefully Assemble and trust the people to follow the guidelines set forth by the CDC.
Brevard	Healthcare	Please open the gyms again.People depend on the gym for health and it helps with stress
Lake	General	Continuing to keep the state closed after we've seen first hand that they booties isn't nearly as dealt as initially thought would be ludicrous. People are going to lose their jobs, and then their houses and cars making for a major economic disaster.
Lee	Food	First and foremost thank you for doing this, hopefully there will be a lot of well thought out dialogue that comes through. I work in the restaurant industry at a Private Country Club. My clientele are all in the high risk category of catching the virus i.e. 65 and over. We have been able to provide them with a service of pick up and delivery cooked food as well as grocery items for the last month and it has gone really well! I believe that by keeping the State shut down we have been able to save a lot of lives and keep people from getting out and senselessly spreading this terrible virus. With that being said I would personally like to see us follow a gradual re-opening of businesses beginning in June, into a full opening in July. I do not believe that opening everything full slate right now would be the best course of action, it very well might undo what we have worked so hard to isolate and contain over the last month. Although it will be nice to get restaurants to open their doors again for indoor dining, I do not see an overwhelming amount of people ready to go out to eat. Let's keep our residents safe and healthy with a clear and concise plan laid out for when we will re-open everything. Thank you for your time and effort!
Martin	Food	Let's get Florida back open and Floridians to work!
Pinellas	General	It's too early to re-open, and totally pointless with kids out of school. If my work re-open, without childcare I still cannot go. And furthermore, while she's doing virtual school she needs access to her computer, zoom meetings, and support. So childcare wouldn't work anyway. Wait until summer. Fix unemployed first. I Promise that hurrying people back to save the state money won't work. Most of us won't go back yet, even if you starve us of income. My life and everyone's health and life are worth more.
Pasco	General	Open the state with precautions.

AMERICAN OVERSIGHT

Orange	Professional Services	We need to bring back outdoor activities. Cancelling all activities as if they are the same is not the correct strategy. The sooner the better. If we resume outdoor activities 1st it will be safer starting point for the economy. Outdoor activities being cancelled is just government over reach. There is no science behind the spread of COVID-19 and being outside. So start there and see how it goes. Outdoor Concerts MLS MLB outdoor stadiums only. I understand holding off on NBA and NHL but treating them all the same is just bad science.
Alachua	Transportation	I was Uber/Lyft driver and really enjoyed the work in Gainesville. At first I was hoping this would be over with and we could just get back to normal. But as things have continued to unfold I find myself rethinking everything. I'm in position where I can just take off a year and wait for a vaccine. The fairly quick horrible deaths get to you after a while. I know life goes on and we have to move forward, but I feel we should do it carefully. Thank you .
Manatee	General	I think Florida should cautiously re-open and quarantine the sick, not those who are well. We've never closed the world down before and this has gone beyond a pandemic issue. Too many if, ands, or buts leading the closures and we are going to have horrible social issues that will undermine families and individuals for years to come. Isolating and sanitizing everything actually leads to a WEAKened immune system, not a stronger one! Simple science! Thank you Gov. DeSantis, for all you are doing for our state.
Collier	General	Open up May 1!! Test everywhere and everyone. The infection rate in Collier is 592 out of 390000. That's .15%. But you are harming so many due to the restrictions!!! A majority of our population is struggling to eat!! This is crazy and we need to get back to work and stable economy. Thank you
Volusia	General	1. Everyone must be required to wear a mask and gloves in public. 2. For Parks (Disney, Universal, etc...) remove the safety check points lines to increase social distancing. 3. Increase disinfecting levels in all public and private areas, add HEPA filters to A/C units. 4. For (Restaurant, Movie Theaters, Parks, Etc...) use a group/party system for social distancing still keeping required mask and gloves. Thank you for your time and hard work. Stay Safe.

AMERICAN OVERSIGHT

Orange	General	Please move slowly when opening up our state. I like the idea of a tiered plan for the state as we hit certain milestones. Also, please build in options for those who are immunosuppressed (for example children) for when schools resume etc. My thoughts for my son, was to pick him up before dismissal so he didn't need to be in the bigger groups of kids for carline/or on the bus, but without the penalty of taking him out early. Or allowing parents to take their kids out during lunch, so they don't have to sit in the cafeteria with so many kids at once. I also live in one of the main tourist areas of Florida. Please build in protocols for when we begin to accept people from other areas slowly as our area is very susceptible to a spike.
Brevard	General	Please open the State of Florida. Small businesses are dying and many will not recover. The PPP stimulus money has not been any help as we have not received it. A week before this crisis I purchased a small business and I am struggling to stay afloat and to pay my employees. Many of my friends and neighbors are in the same position. Many are unemployed and not receiving unemployment. The state of our economy is now becoming the crisis. There are many ways to protect our most vulnerable population while still opening up the state for business. Please we are begging you. Do not let this ruin our economy. Thank you for your consideration David Lombardi
Hillsborough	Construction	The roads now fit the population. This has exposed the clear ignorance of local, state and government infrastructure. Build homes then leave the roads the same, this seems to be the status quo. If the state deemed stay at home a preventive measure , please see it through until a case does not exist. This pandemic is bs, however the state should stick to their rhetoric and "stay at home"! I'll still be working. No government handouts this way.
Seminole	Healthcare	I have been waiting since March for knee surgery. I am in a lot of pain. My surgery is scheduled for an outpatient surgical center, not a hospital, so it wouldn't be taking beds away. Please consider moving forward with outpatient surgeries. I need to be able to take care of my family and I just don't feel mobile enough to do so. Thanks for your consideration.
Charlotte	Recreation	Wayyyy too soon to be opening up..charlotte county numbers increasing everyday...
Hillsborough	Healthcare	Do NOT open it back up yet!!!
Duval	General	I say open everything thing back up get back to business as usual. Just remind the citizens to use good common sense. If sick stay home. If they feel safer continue to their mask. People need to return to work. Business needs need to allowed to open back up. The shut down is hurting and city.
Polk	General	It is too soon to open. This will be a huge mistake. People will die.
Seminole	Tourism	It is much too early to open the state. There are still too many unknowns about who's infected, who's not, when treatments will be 100% effective, how to prevent transmission from people entering the state and more.

AMERICAN OVERSIGHT

Broward	Healthcare	If we open too soon we will have lost all we have accomplished by staying home these past weeks. I, like many many need to work but I don't feel safe to do so. The reason being that people in states and cities that have re opened aren't practicing social distancing as they should. I believe that if you do by parts, like beaches in one county are allowed but not in others people will swarm to those beaches. We need to feel safe. We need testing, for all whether they're symptomatic or not. I don't want anybody less than 6 feet distance from me. How are you going to control the people that don't listen and frankly don't care?
Seminole	Retail	I agree with a slow to open phased approach. Being a small mom and pop business owner as much as I would like to throw the doors open back to business as usual; these are not usual times. I would like to see leases renegotiated as this economic disaster is one that cannot be immediately remedied. Phase 1 needs to allow essential services to remain open - allow restaurants to have limited seating; salons reduced clients, workers should have their temperatures checked prior to entry, movie theaters could do the same but significant sanitation would be needed daily.
Hillsborough	General	Regarding Small Businesses and State Leadership: I think businesses that are currently able to work online need to be instructed by the State of Florida to continue telework until the data suggest that reopening all sectors of the economy is safe for the general public. I am in support of reopening the economy so that people can pay rent and feed themselves and their children, but those of us who are already successfully able to work online need to continue doing so until the risk is mitigated. This way we can open industries that have slowed or stopped (within reasonable risk) while also continuing to minimize public exposure, especially since we will likely see new cases upon opening. Although we need economic revival, businesses that are still operating under the current stay-at-home orders - especially those that did not lay off workers - need clear direction from officials to continue their new “business-as-now-usual” online. DeSantis has been very moderate in his leadership, and I hope he and the Reopen Florida Task Force can weigh the risks and benefits rationally and agree that the best way to maintain the social distancing and lower the demand for masks recommended by Dr. Carla McWilliams just today during the press conference (4/25/2020) is to continue telecommuting if possible.
Pinellas	General	I feel it's to soon to re-open the state. We have to keep the virus from spreading more. There are people that have it and dont even know it and if they are working say at a restaurant then that puts everyone there in danger of getting infected. I understand the need for people getting back to work to survive but it would be safer to stay at home for awhile longer, get them their unemployment and get the people of Florida and actually the US monthly financial help like the stimulus until this calms down. I read there's talk of giving Americans $2000 a month until the economy is better. That idea along with getting them their unemployment and the small business loans is a better and much safer idea than reopening the state to soon. Thank you.

AMERICAN OVERSIGHT

Miami-Dade	General	I urge you to do everything possible to re-open the economy and public life in this state. The economic consequences of this shut-down are devastating and many people are suffering due to the isolation and social-distancing rules. We need to find ways to assist those who are more at risk of becoming ill from this virus or any other health threat - this cannot be done by eliminating jobs, closing schools, and cutting-off access to public resources. This cannot be done by cutting us off from each other. These drastic measures will only make at-risk people more vulnerable. How can we take care of each other under these circumstances? Permanent damage has already been done to individuals and families - please end this before more harm is done.
Pinellas	General	Open the state for business. Protect the most vulnerable. Old people in nursing homes. There is more to life than just existing; just surviving while the economy falls apart and so many other aspects of life are disregarded because of a virus we don't even know how bad it really is. Why is there not readily and widely available testing for the virus and to see if you have had the virus? Those with the antibodies, let them resume normal life. The state is totally failing in unemployment benefits and local government authoritarians slap on ridiculous and irrational restrictions. Put an end to this, focus on testing and get opened for business to the largest extent possible.
Hillsborough	General	I vote not to re-open Florida.
Orange	Recreation	Open the state. Our tourism is led and managed by intelligent talented people. We can return our economy with prudent steps to ensure a measured opening of our restaurants and entertainment venues, but we cannot wait another 30 to 60 days to days
Orange	Government	This reopening is way too premature, especially considering that a lot of Floridians like myself haven't even received assistance
Hillsborough	Healthcare	Please open us up. Real statistics say we are good to go back to life.
Pinellas	General	It is not safe to reopen yet. Lives are more important than money.
Volusia	General	Don't hold up opening the state because certain districts aren't there yet. They can be more restrictive if they want. Antibody testing is important , I believe it will show the virus is not as deadly as it has been made out to be by limited media coverage. Our mental health and financial health are as important as our physical health. And...Every job is essential to the person who does it.
Pasco	Professional Services	There is no reason to close salons if everyone is careful.
Hernando	Food	Unsafe to resume dining in at restaurants or opening them to the public other than for take out. I think about the amount of particle contact servers working are subjected to from their guests menu, utensils, and napkins used during their dining experience. How do you enforce social distancing if your restaurant is on a thirty minute or more wait? The risk is too high, these workers or "essential employees" are not just corporate numbers there to ensure profit continues, but people who come home to their families each night, worried they may have gotten sick or will pass it to a loved one. It is unsafe to resume dining until mass testing is available and cases decline.

AMERICAN OVERSIGHT

Okaloosa	Healthcare	I am a healthcare worker in a outpatient radiology center. Patients come in to have a exam such as a Mri, Mammogram or a simple chest X-ray. Problem is not all patients are wearing mask. We as healthcare workers wear ours to protect the patient however we are not protected nor is the other patients that are sitting in the waiting room if some of the patient aren't masked up. Please please please make mask wearing mandatory. Also for all the healthcare professionals that are not on the front line please let them continue to work at home. Most offices are having the non-essential employees come back to work once the stay at home order is lifted.I would really like to see a mandate rather than a recommendation from the governor and or the task force to have nonessential workers work from home if they are able to do so. In my personal opinion have a nonessential workers show up to a medical facility and risk their life and their families life is criminal thing at home and social distancing has proven its point. Thank you so much for giving me the opportunity to voice my opinion have a blessed day!
Clay	Retail	With the statistics of Covid19 deaths being so incredibly per low our population it makes no sense to continue to keep Florida locked down. Our economy is crashing. Small businesses are greatly suffering. Families are unable to adequately provide for theirselves and their children. We must enter Phase 1, which Florida more than qualifies for, immediately! Unfortunately, due to the media over blowing the numbers of Covid19 we have many people terrified to open Florida, but we should not allow this fear to cripple our country. We need to highlight the incredibly low percentages that have been affected and point out we cannot continue in fear. Those who want to continue to stay home should be permitted, but those who are ready to return to live normally, like we do with the flu each year, should be able to open businesses. Without any requirements such as masks being worn. We should be able to rise again as Americans eating in restaurants and frequenting establishments to regain our economies strength. We also must remember the orginal purpose of the lockdown. It was not to permitly avoid or eradicate the virus, Covid19. It was to flatten the curve and give our healthcare system the chance to handle cases as to not because overwhelmed. Well the expectations were far less than our best projections. Hospitals never were overwhelmed. However, many nurses and healthcare workers have lost hours, been furlonged or have completely lost their jobs. Meanwhile, those who desperately have needed surgery have been denied. We cannot afford to put these people off any longer who are in actually medical need for surgery. The cost of a continued lockdown will be detrimental to these people. We must reopen Florida courageously and not allow fear to rule over us any longer.

AMERICAN OVERSIGHT

Pinellas	General	I believe it is too soon to open most businesses. Many would have a great deal of difficulty maintaining social distancing. I see no reason, however, to not open beaches for exercise only but then that would have to be policed. I also see no issue opening dog grooming establishments since there is little to no contact - human to human.
Manatee	General	Yes, please reopen!!! This needs to be done gradually. Elective medical procedures must be reinstated. This will return vast majority of revenue to clinics and hospitals so they don't have to furlough medical professionals. At risk populations should continue to isolate. The NY health dept showing 89-94% of all covid19 deaths contained preexisting conditions.
Leon	General	It is too early to reopen
Miami-Dade	Recreation	As a proponent of most social distance measures, I am greatly concerned by one that makes absolutely no sense - the closure of pools for swimming only. Dear Mr. Mayor. It is really infuriating that the one safe corona free place is still closed...properly chlorinated pools. This really makes no sense. I am not talking about sunbathers or congregation around pool. Take the chairs away and enforce relevant social distancing measures. But swimming is a lifeline for some of us! To prioritize boat owners and rich golfers when so many families live in multi unti buildings with pools that are proven scientifically safe?! I am at a loss. Some of us need our pools for physical therapy. It's also 200 degrees lately in Miami. Please don't condemn us to go outside among sweaty huffing joggers but give us our one safe space back - our pools!!
Hillsborough	Tourism	I am a meeting and events producer. My industry was wiped out by COVID. Our business relies on face to face meetings and events. I would rather be cautious now so we can be back up to speed by the end of the year. I do not want to have to do this this again because of a second wave. Meetings, events and conventions are a huge part of the Florida economy and this industry needs a seat at the Task Force table. www.golivetogether.com Thank you for your consideration.
Lake	Recreation	Reopen May 1.
St. Johns	Manufacturing	I do not see any reason that we cannot return to our businesses. Using our heads... follow the cdc guidelines and common sense. Although common sense is tough to teach. But we must return To our workplaces. Many small businesses are 1 or 2 owner, hands on. Watching, supervising, managing the day to day affairs. I am sure we can monitor behavior on our premises.

AMERICAN OVERSIGHT

Manatee	General	*We are intelligent and prepared to reopen safely May 1, just like the other 11 states doing so. *Please open restaurants May 1 (to serve via outdoor seating). Then 2 weeks later allow indoor with distanced tables. (Mothers Day is very important, Sun 5/10) *Please allow salons/spas to reopen May 1 with mask requirements for all and no waiting rooms allowed (call when room is ready). *Please allow schools/daycares to reopen May 1 ONLY IF they are capable of 10 or less classrooms. *Please allow beaches and pools fully reopen May 1 with small group requirements and distancing requirements (sun kills COVID; People use pools/beaches in sun). *Please allow amusement parks to reopen May 15 with mask requirements, 50% capacity, and 15 min queue to line texting and distancing in lines. Thanks for considering. Let's get our great state up and running again!
Pinellas	General	I don’t think we should be re-opening yet. Please follow the medical experts advice. Let’s not undo all we have done so far and have to start all over again!

AMERICAN OVERSIGHT

Broward	Government	If you don't have a vaccine, what do you have? You have a haphazard way of protecting residents and visitors of the state of Florida. Our state's income is based on retail sales tax. Pretty regressive. If and when this issue is resolved you may have to consider a state income tax and If you can't convince the federal government in approving a sustainability bill for all state governments, I cant recommend you any further. What good is a program to assist persons in need if you can only get less than 1% of the unemployed and underemployed resolved with a broken system? Your Senate partner Rick Scott made this state uninhabitable. This absolutely needs to be resolved ASAP! You need you change the medicare/medicaid system so that you can be the author of the first state that enables medical services for all. You have more than enough dollars in the toll road system to get started. If you can't control this health and safety as well as the welfare of this state, you need to reconsider what you are doing. Don't you want to be more of a leader and band together with other stronger and fully informed governors in forming a coalition? Don't you want to provide testing for corona virus anti-body and whatever else is out there? Don't you want to include working with FIU, UM, USF and UF and any other research college or university willing to come forward? Don't you want to prevent spread the virus as well as hiring and training as many contact tracers as needed to assist in identifying the disease? Don't you want what is needed in order to provide a safety net for all of our residents? . What you can't do is continue to rely upon the federal government as a lone ally. We residents here in South Florida (as well as the rest of our resident population)won't have it. If you have any future aspirations don't you need to follow sound reasoning from medical professionals? Or do you want to go down with all the other so called leaders that helped implode this country?
Volusia	Healthcare	I am a dental hygienist and I am supposed to be back to work as soon as the state reopens and I think it is very irresponsible to have me go back to work exposing myself to working in patients mouths where I am only inches away from them and aerosols are produced. No matter how much PPE is used it is very close contact and then I have to go to my elderly parents home after work to pick up my two young boys and risk exposing them all to this virus. I think our state is no where near ready to reopen. I honestly think we need to reasses the situation in June. I've only seen the number of cases go up and those are only the ones we know about. Once there is a decline we need to monitor that for a while and then make a safe attempt to resume to normal but now is definitely not the time. We are not waiting long enough. Allow people the warm summer months to get this virus to pass through our state and then we will all be ready to get back to work. Believe me I have been furloughed for almost 6 weeks now with no unemployment assistance yet so I know what it is like to go unpaid but it is for the future of our state succeeding that we all need to wait longer before we go back. Thank you for your consideration.

AMERICAN OVERSIGHT

Okaloosa	General	We have to go back to work. Unfortunately that is the reality we have to face. Unemployment isn't enough and neither is 1200 dollars. The longer we wait the worst this gets and not on a medical level. I would still like to see a band on vacation rentals till June. I think that's the crucial element that should stay in force.
Sarasota	Healthcare	Like everyone else I am desperate to see the return to normal life in Sarasota. This is not only for my personal enjoyment of the wonderful cultural and dining opportunities that abound here but also the livelihoods of the thousands of workers and their families. If there is a well organized plan to test and trace ,as in South Korea ,the most susceptible of the population as well as the already infected, then there is an obligation to open commercial life to the general population. Those at risk have an obligation to take extra care of themselves, without holding everyone else to ransom. In addition we should maintain good hygiene practices like the six feet rule and mask wearing. Maybe all over 65 should be quarantined but this will be deemed too discriminatory in a society that places individual freedom above the common good.
St. Lucie	Food	I work in the restaurant business and think we should wait until our numbers have slowed for at least week. It would be horrible to lift the restrictions to early to only have to implement them again because of a more serious outbreak.
Santa Rosa	General	I believe we should open business back using social distancing and mandatory use of mask in stores and public buildings. Restaurants opened with limited seating to 1/2 capacity. State parks and campground open with social distancing in common areas. My reasoning for use of mask is due to those with compromised health need to be able to do daily things. At this time in our county the stores are making employees wear mask but just asking public to in which many are not many will not follow the social guidelines set by business such as directional shopping in stores to try to prevent being right on each other. These are good ideas and would work if enforced by law. Please remember Florida has many retirees and elderly who live in our wonderful state and should feel somewhat safe while in public during this time. Thank you for allowing my input.
Broward	General	Honorable Governor De Santos Request the beaches and gyms to be opened immediately. I believe we should follow Sweden's lead and open the economy immediately. Tell people to maintain social distancing and tell at risk to stay inside and avoid contact. Very Respectfully, Mark W. Morgan
Hillsborough	General	Governor DeSantis, thank you for putting Florida families first in everything you do. I could go on and on about the importance of reopening the Florida economy for business immediately, but I am certain you are well aware of the need. Your constituents respectfully request you open the economy immediately, to help spare the additional loss of life and hardship that is compounding daily.
Okaloosa	Accommodation	Please reopen short term rentals. Our expenses continue, but without revenue, it is getting very difficult on property owners. I don't mind wearing a mask In public spaces and stores and will probably continue to do so until a vaccine is developed.

AMERICAN OVERSIGHT

Hillsborough	Information	Do not re-open Florida.
Sarasota	General	I support fully opening Florida. The data shows, in increasing numbers, that the coronavirus is not as deadly as initially thought. It does not warrant the closing of our state, economy, etc. Let us get back to work. Those who are vulnerable or at risk can continue to shelter in place.
Polk	Healthcare	Healthy individuals should be allowed to continue with common sense daily rituals and routine like going to the gym- walking the beach or park. Outdoor dining should be an option with limited seating. Elective preventive medical procedures for high risk condition should be available for peace of mind. My family is ready to help small local business in the City of Lakeland. It breaks our heart that our town was seeing a new revitalization and it came to a complete stop. As a Cuban American- I have lived through tough times and I know that we will come back stronger than ever.
Sarasota	General	It is my belief as a Registered Nurse, that it is not only essential to open beaches for walking and running, but for simply sitting at the beach and in the sun, for many reasons. There are elderly and disabled who can't walk or run but go to the beach and sit to take in the fresh air and sun. The sun increases Vitamin D in the body which is needed against fighting the virus and the heat and humidity are now know to kill the virus. These two groups very much need to be out by the beach. Lastly for their peace of mind and mental health. Thank you
Miami-Dade	Tourism	Follow medical advice All openings adjusted for social distancing Begin with outdoor recreation Parks, golf, tennis and marinas Open hotels only when amenities such as pools, fitness spas and beaches can be opened
Miami-Dade	Healthcare	To Re open Florida we would have to continue testing many residents and see a more robust decline from the virus. People in the front lines need support, supplies and additional help to maintain a solid balance during this pandemic. Until a vaccine is available we must take precaution and follow CDC guidelines. The seriousness of this disease makes everyone of us vulnerable. At this point the future is unknown, we should navigate with caution and be prepare for a second surge as best as we can. I am convinced this is not the time to re open but prepare for what's to come. Let's be safe now and not sorry later.
Lee	General	Corporations should be able to open up immediately if financially able. Companies should opt for conference calls instead of in person meetings. They should allow and foster an environment of remote work-especially for those vulnerable or unsure (afraid) or due to kids being home. I think all companies are creative enough to protect their workers even without government guidance. My fear is really those who are sick going to work. This is something companies really have to drive home.

AMERICAN OVERSIGHT

Pinellas	General	PLEASE LIFT THE STAY AT HOME ORDER! People don't need to be locked down at home they need to be wearing proper protection in public. We don't need to destroy an economy because we have to lock down. Look at China their people have been wearing masks way before the virus outbreak. All this news behind masks don't work is total bs, why do doctors use them if they don't work. I think the American people would agree that we need to get back to work and start spending money again. Make it mandatory that a mask must be worn in public, not only have the Chinese people done this for years they have the worlds largest mask stockpile for a good reason and promote the use of N95 masks especially. Instead of giving people $1200, give them a weekly supply of masks to their door for free. If the mask thing didn't work in China then why aren't more people coming out from their country saying millions of people died. Because they didn't. They may have more deaths than 4000 but it is probably less than us because we are ignorant to PPE. Promote Vitamin D and sunlight as it is shown in the numbers that the states and countries with the lowest deaths get a large amount of sunlight. Promote Vitamin C as well, most people should be on a low dose of daily Vitamin C to boost their immunity during this time. Have mandatory wash stations setup in areas that can handle it. Require people to wash their hands before entering restaurants and businesses. In addition to taking their temperature. Instead of keep a minimum distance of 6 feet and "practice social distancing" Just make it mandatory that everyone should stay 10ft or more away from each other as we know viral droplets can be carried far in wind. exclusions should be three individuals or less in a group. When it comes to stores that is where the masks and eye protection

AMERICAN OVERSIGHT

Pasco	General	I feel that we need to be cautious about opening businesses. (I work in a grocery store and speak to the members of my community often. Opinion is split, for sure.) I think services that provide health care such as elective surgeries should reopen to the general public for non-trivial cases. For example, cosmetic surgery for breast enhancement is not urgent, though reconstructive surgery for a breast removal may move the bar more towards urgent. Folks waiting on knee replacements and similar quality of life procedures should certainly be permitted to proceed. Grooming services should be on an appointment only basis, in order to eliminate waiting at salons, with a strict set of capacity restrictions. I feel that any place that opens to the general public needs to enforce capacity and strongly promote distancing guidelines, with frequent verbal reminders on PA systems and visual reminders on signage. My grocery store is doing all these things. Please raise the state minimum wage and part of any reopening strategy. Essential workers deserve a living wage. As businesses reopen, new pay requirements can be taken into consideration, especially at first, as the PPP is available to small business owners. A business that only causes its owner to prosper is failing the social contract of also granting prosperity to the personnel who make it possible. The closed economy has demonstrated that no one benefits when the engines of the country, the workers, are missing. Please make mask wearing mandatory in public spaces, especially if businesses reopen. We need to protect each other from each other. Masks work best when everyone is doing it. A piecemeal effort is allowing the part of the public that does not take the crisis seriously to burden the part that does with the heavy lifting. This, along with hand washing, is seriously two of the most important individual mandates we can have. It doesn't restrict any freedoms and is easy for most people to do. I also strongly feel that our leaders should do that: lead. When the senior leadership of our state is comfortable resuming work in their offices and conducting live town halls (with appropriate space for
Volusia	Retail	Florida should NOT rush to reopen without adequate testing, including antibody testing, and treatment for this disease. Opening must be gradual and science based. Most importantly, Florida should not open just to dodge unemployment payments or to bow to protests from a tiny number of paid extremists. The vast number of Floridians want support and common sense from their leaders. Please continue to protect our vulnerable seniors and remember that the economy serves people, not the other way around. What price is a human life?
Broward	General	In my perspective most businesss should start opening up while still following social distance guidelines. Also, beaches as open spaces should also open up even if with restricted times to start with. Thank you

AMERICAN OVERSIGHT

Miami-Dade	Administrative	Thank you for everything you're doing on behalf of the State of Florida. And....I appreciate your interest in allowing the people of the State of Florida in having some input in how we should be reopening the state of Florida. Unfortunately, I Loss my 90 year old mother on last night. With everything going on with the Pandemic, she begun having weakness. The family called 911, who took her into Jackson (South) on 04/22/2020 and on 04/24/2020 the hospital was already making plans to put her in hospice. As per the hospital clinical social worker, her COVID19 test (both) returned negative and she died due to heart and kidney failure. My recommendation for reopening the State of Florida is by zones (zip codes). If you have a particular zone where as the COVID19 numbers are low, I believe you should start reopening those zones first. However, if you have an individual who travels for work from a hot zone to a low effected area, then that employer would be responsible for monitoring the symptoms of that employee. Therefore, the zones with the highest COVID19 case should be the last to reopen, or at least until there numbers are under control.
Seminole	Finance	We need to reopen - this is ridiculous. This is the USA. Let's go
Leon	Retail	Please do not open non-essential businesses too soon. As a small business owner, I am taking substantial losses in retail sales, but I'd rather not endanger the life of my family or my customers and their families. One of the biggest issues with this pandemic is that so many people believe they're not at risk for a serious infection, when they simply do not know how it will affect them. I think most of us believe we're healthy, but belief is separate from fact. (For instance, I got a secondary bacterial infection of pneumonia after having the flu in 2013. I didn't think the flu could be that serious or that I'd develop severe pneumonia when I was only 28 years old!) As more information comes in, we're learning this virus affects more than just the respiratory system. We simply do not have enough information, from how many people are asymptomatic/presymptomatic carriers or how the infection will affect individuals. It's too soon to call and we will be in a whole different kind of disaster if we overwhelm our hospitals and lose a large chunk of our population. As the saying goes, better safe than sorry!
Santa Rosa	General	I'm active duty military stationed in (and permanent resident of) Florida. Opening the state is an unnecessary risk-listen to the science. It may be good for businesses right now but in the long term it could be costly in more than money. Don't risk your people.

AMERICAN OVERSIGHT

Seminole	Education	I request not to open any educational institutions or anything related to children activitieslike scout camps, summer camps, theme parks etc., and also not to open any religious gatherings till end of June. This is because it is hard to maintain distancing and set rules on number of people. Day care facilities may open but limit to few children. But in order for the economy to run and to have jobs for people, business, restaurants for take outs , agriculture, construction can open where is it possible to maintain some sort of distancing can be easily maintained. Prayers for all the beings on this earth 🙏
Pinellas	General	Do not open until health officials agree it is safe and make sure if opened all steps have been achieved. If there is a point in time that can be said the virus is gone and health officials agree that might be a good time to reopen. do it in steps. slowly. Personally i think a vaccine is needed before the state can be opened with harm to the citizens. Push for that.
Miami-Dade	Recreation	I think parks should open up for the kids only certain places should open up
Hillsborough	Finance	I am ready for Florida to re-open and think a lot of this has been taken too far.
Lee	Healthcare	Reopening Florida would be a mistake at this time. At this time only essential businesses are open, and the virus is still speading because the general public is not obeying the stay at home order. There are currently whole families at grocery stores and gas stations. There are neighborhood barbecues and birthday parties taking place outside with large groups of people in attendance. To open our state would only further encourage recklessness. Our essential employees are alredy at great risk. Allowing more people to congregate in public places will only increase the risk of this disease killing more people.
Duval	General	I think this needs to be done slowly and initially those that can work at home need to
Lee	Education	I am worried, how the distancing will be achieved in the daycare that already like me, for example I was reopened on May 4
Hillsborough	Transportation	I am a UPS driver. PLEASE DO NOT OPEN FLORIDA and put us at a higher risk than we already are! When you do open things, please do it slowly, wait a few weeks, see if the cases of Covid go up before opening more areas of our state! We are counting on our governor to do the right thing!
Indian River	Retail	I was furloughed from my job in early April. As my unemployment application has been processing for weeks and money is dwindling, I'd like to return to work in order to pay bills because unemployment help isn't coming. However, I work in a chain clothing store in St. Lucie County where customers ignore rules all the time. They have such a ME-FIRST attitude. With children out of school for the year, parents will inevitably bring them to the store and let them run free. Customers will barge into fitting rooms right next to each other. They will ignore hygiene suggestions and will refuse to wear masks. Paying with cash will be an entirely different issue. But I am willing to take the chance financially as I ask you to please extend the stay at home order. People will come to our store just to hang out, as always. It is a hot bed, and reopening would be inviting the virus back into our homes. Please. Please. Please extend the stay at home order until it is safe. Because Floridians have trouble following rules. Thank you.

AMERICAN OVERSIGHT

Manatee	Recreation	Please encourage counties to reopen beach parking lots. The beaches provide access to cooling gulf breezes even in high humidity, allowing us to walk outside in the fresh warm humid air that is not conducive to the spread of Covid-19. The vitamin D from the sun and many other benefits from walking on sand have been essential to my husband and me, whom are both in our mid 60s. Opening the beaches without opening the parking lots, does not help 99% of county residents who live too far to walk to the beach. We agree with social distancing, but believe that continuing with oppressive regulations such as this are adding undue misery to many of us. We appreciate you allowing us to give feedback. We are very proud of Governor DeSantis and the task force who are working so hard on behalf of all of us.
Brevard	General	It's too soon to reopen. While I understand there is an economic impact to keeping things shut down, it is outweighed by the health risk of opening too quickly. If businesses open too quickly and there is a spike in COVID-19 cases, having to shut everything down again will be more detrimental than keeping things closed a little longer now.
Volusia	Government	Open it up. People are starving from being out of work. Those who want to stay home can. Time to go back to work and quit stacking debt on taxpayers.
Miami-Dade	General	Mr. Governor, thank you so much for taking our opinions in to consideration. Personally, I choose life above all else and wish the government would have shut down everything for 30 days and possibly nipped this virus dormant. However, that did not happen and people are becoming restless. I do not planning leaving my house with exception to walks until I feel confident it is under control. Having said this, I would like to see Golf Courses, Boating and outdoor recreation open with strict guidelines for safety of everyone. I think the public is in need of self care like hair and nail salons and possibly full spas with limited services and customers I would like to see testing available for everyone so areas of higher concentration can be assisted Money can always be made for those who are willing to work when the time comes but lives cannot be replaced
Pinellas	Recreation	It is time me to begin returning Tampa Bay to normal. Let businesses open, open the beaches and parks. We all now know what Covid-19 is and how to avoid it.
Hernando	Information	I believe we should err on the side of caution when it comes to saving lives. The Institute for Health Metrics and Evaluation is recommending June 1st for Florida, and I agree. http://www.healthdata.org/covid/updates
Leon	General	Florida should not reopen until medical specialists say it is safe to do so. Do not play politics when the health and well-being of Florida residents.

AMERICAN OVERSIGHT

Lee	Government	Make telework for state AND federal employees mandatory. These people are citizens as well as tax paying people who are important to keeping Florida running. Face to face interactions with public should be minimized as most services by the government can be done online or by phone now days. Protect your employees from possible infected public and workmates by keeping them safe at home as much as possible. Invest more in internet infrastructure to prevent any hiccups from telework and in the long run it will pay off as more and more businesses will be able to run more efficiently due to great infrastructure and stable internet. Can't keep the economy going if people are too sick or dead to spend money.
Sarasota	Healthcare	As a Licensed Massage Therapist, I can not practice safely until we have more rigorous testing. I work in a closed room for an hour or more in physical contact with my client. If either myself or my client is asymptomatic or presymptomatic transmission is nearly inevitable.as the virus also remains airborne for some time, surface disinfection between clients is insufficient to prevent client to client transmission, even if there were enough ppe to use to protect myself.
Sarasota	Professional Services	I am a massage therapist that works at a small business in Siesta Key.I am asking that professional services such as massage therapy establishments, not be part of the initial phase of reopening! Like many, I too miss my paychecks...but I DO NOT think that giving massages, where you can obviously not social distance is something that should be reopened yet. Personally, I feel apprehensive about being that close to a complete stranger that might have traveled down to Florida, from who knows where because their stare is still closed! Please keep businesses like ours closed for at least another couple weeks... Make it part of phase 2 or 3!!
Lee	General	I would like to see the stay at home rules extended for at least two more weeks or until a sizable and noticeable drop in infections from coronavirus is achieved. continue special shoping hours for seniors at food stores. Restaurants should continue to be closed. It is just too early to start opening up everything. The government is now very busy with the virus. Do not forget the preparations for hurricane season. The storms will come in spite of the virus. 4/25/20 Markus Albrecht

AMERICAN OVERSIGHT

Hillsborough	General	Dear Governor DeSantis, I truly appreciate you standing up for our first amendment regarding our religious freedom. I also hope that you will stand for the first amendment once again regarding our right to peaceably assemble! There are more aspects to this pandemic aside from physical health concerns. It has caused many economic and mental health issues also. Many people are concerned about their ability to work and pay bills; therefore, depression is a major concern. I feel that we should be allowed to decide if we want to work or not. Those who feel unsafe or do not want to leave their home have the ability to self-quarantine. As for the rest of us, we would like to get back to work! Thank you for your concern! Let's open Florida!
Pasco	Tourism	I fully support an opening to the Florida Economy as soon as possible. Staged openings make sense from a public confidence point of view. As a "C" level staff member of a science center, I feel that analyzing the data shows that best practices and recommendations are more than adequate for a reopening. Most places that could / would accommodate crowds already have capacity percentages in place. Also, allowing businesses to be open doesn't mean its a "leave the house order". People can still choose to stay home while allowing those a choice who feel it is time to make steps back to normal.
Palm Beach	Retail	We need to open. There is no science to support this crazy shutdown. People will now need to be smart and do the right thing. You can't nor should you test 100% of the entire state. If we fail to open we are playing into the socialist ideas of the government taking care of us. No thank you. Please open back up.
Miami-Dade	Transportation	I think transit should stop due to homeless people riding bus n spreading virus why are they still running n for free that's not smart at all i want to go outside enjoy life im getting sick n tired of being in the house in the stay home order do not work at all shut the state down dont reopen
Hernando	Tourism	Do not open until case of covid19 are down and not before there is good testing methods. Keep social distancing in place through the end of may.
Broward	Recreation	Easier to social distance if some actual recreation is open,, such as our marinas, boat ramps, and golf courses, which should have never closed in the first place!!
Hillsborough	General	Please reopen the parks and trails. We live in Tampa and Bayshore Blvd is packed with people walking, running and biking. We recently had another fatal accident killing a bicyclist. It would better and safer to be able to bike on a wide open trail as people need fresh air and exercise for mental and physical health. Thank you!
Palm Beach	Recreation	Phase1: Reopen parks and beaches - keep the parking closed or very minimum parking spaces. If the goal is exercise then people can walk to the beach or park. this will help keep the parks and beaches from over crowding. Easier for police to control population.

AMERICAN OVERSIGHT

Manatee	Healthcare	Please re-open. Secondary effects of shutdown including child abuse, spousal abuse, and suicide are worse than the virus now that we are learning more about true prevalence. I ask that you please allow us to be creative with our own businesses in order to continue to ensure safety for those who are vulnerable. The lockdown started in order to not overwhelm the hospital system. Well, hospitals are at 40% capacity and many of us are now furloughed. With more data showing the asymptomatic rate, it is time to get back to work. Thank you
Broward	General	My vote is to re-open the state. We all Understand how serious this is and how to keep safe, now. in my business as a facialist we have always been taught to wear face shields and gloves. This should be a part of our daily work lives always. I believe those at highest risk will stay sheltered, longer.
Escambia	General	This state has not hit it's peak. Florida is not ready to open, if anything, it needs to be more enforced lockdown. Think of people's lives instead of the almighty dollar. If the beaches would have been closed down earlier, we probably wouldn't be as bad as we are now.
Miami-Dade	Healthcare	Greetings, I keep noticing very pale people at my grocery stores here in Kendall. At the CVS a saw two old, very pale individuals backing their new truck so that the tag couldn't be seen. The truck had a N.Y. plate. While waiting in line with my mask on and standing at a safe distance from the person in front of me, one of them without a mask approached me and asked me the date. They were not from S. Fla. My point is that if we live at the end of a peninsula, why are we getting so many new cases? They must come from the north. Cruise ships are not working ,so they must come by air, bus, train, or car. The question is, where are they staying if hotels are closed? I think that an order should prohibit the rental of ARBNB, etc. Anyone from outside S. Fla should have to be tested. Maybe everyone should be tested that comes by air, train, car, bus upon arrival, because this will never end if infected people keep coming.

AMERICAN OVERSIGHT

Pinellas	General	Dear Gov. Desantis, While I understand the looming economic fallout that has been transpiring is becoming more critical than our current situation with this virus, I'm afraid that will not be the case for long. As a furloughed worker, I understand the need for myself and many other Floridians to get back to work to support not only our families, but the great economy of the sunshine state. Social distancing and the shutdowns have slowed the spread however I fear we can't wait much longer before opening back up. The thing that worries me the most is as time goes on there is a much larger uprising of those who aren't taking the severity of this virus seriously.. they not only want to open back up, but the disposition they are eluding is one of misunderstanding and a sheer ignorance to what this virus is capable of without severe government intervention. I beg of you, Governor Desantis, as we begin this terribly early reopening of our economy, we need to make it extremely clear to those who may be taking this as a hoax or "over hyped media outcry" very seriously and that they be educated. I'm not scared of re opening, I am scared of the ignorance of those who will believe because of this, they no longer need to take precautions or comply with social distancing. The sheer volume of people who truely believe this is a hoax scares me much more than our current dilemma at hand. The people must understand if we decide to open back up this soon, we must double down on all social distancing orders and precautions or we will be staring in the face of an outbreak that eclipses our current situation. Please lead our people not only to economic prosperity and physical health, but to a place of education and understanding.
Duval	General	I sorry about Florida re-opening soon. I know people are struggling and need to pay bills, especially since the utility bills more than doubled this month. However, less than 2% of the people in Florida have been tested. Some haven't tested because they don't know if they can afford it. Some haven't been tested because they don't show all the signs. Some are simply afraid to be tested. But I'm afraid that rushing in to re-opening before testing more people is going to cause a surge in sicknesses. I'm in no hurry to get around others for fear of getting my mom or grandchildren sick.
Leon	General	The only thing you need to do is look at the numbers. Leon county 207 cases!!!!! Originally the media showed 169 of those were from assisted living facilities. They have now lowered it to 91. Other thing which no one answers is why does DOH show their confirmed cases which is about 4 times the lower than other testing sites? Why not just combine the numbers or do they not trust their numbers. Also sick of all the test sites opening. Last I saw over 4,000 people have tested negative in Leon county. If number of test kits are an issue then why are we testing so many. I can understand opening things slowly, but just look at traffic in town and in the stores. People are not really following the Stay at Home orders.

AMERICAN OVERSIGHT

Pinellas	General	State parks and camping for state residents only should be reopened. If beaches are opened there should be a maximum occupancy. Every other parking space should be blocked and any openings should be for residents only. Jobs classified as nonessential but have limited public contact should be opened when the numbers safely allow it. If numbers increase then a walk back should occur. Medical personnel should make the decision when this can be safely done. No business or religious center that cannot social distance should be open. There must be enforcement of violations. Community pools should not reopen. Too many still believe this is a hoax for safe distancing of public places unless numbers using a facility can be controlled.
Orange	Tourism	- reopen playgrounds, beaches and state parks. Fine people who are not following guidelines set out instead of keeping them closed. -reopen movie theatres. Sell less seats so they are appropriately distanced. - reopen theme parks slowly. Reopen Disney springs and restaurants. Maybe only open one parking garage for a slow process back. -reopen Disney hotels and theme parks with lower admittance. Just bring back things please 😭😭😭 my kids are so ready. My son misses school so much 😭😭😭
Duval	Education	The state SHOULD NOT open up! We need to listen to scientists and health care officials, not business people. My husband has been laid off and I am a teacher, so I know the economic hardship. However, I have asthma and I have a daughter. I do not want to put my family or myself at risk. We must take proper precautions!!!
Pasco	General	I think we should re-open almost every place where people can be moving. Places that require sitting like a movie or stadium should probably wait. But retail and shopping need to be opened. People need to be told to wear a mask and gloves if possible out of consideration of other people. Especially people who may fear they will get infected should wear a mask and wear gloves or carry clorox wipes with them. But we need to get people moving again. Playgrounds at the park should be opened again. It is said that heat, sunlight, and humidity tend to shorten the amount of time the virus particles are virulent. Parents should be encouraged to take wipes with them and continually just wipe down their children's hands at the playground. But jobs must be resumed and outdoor activities should be encouraged. Gyms could open if the members wear masks and gloves and do not touch their faces while at the gym; then discard gloves and wash hands once outside the gym upon arriving home. Strongly suggest that people wear masks and gloves, but please let people get going again. My husband and I both believe this is a good course of action. Thank you and God bless and guide you.

AMERICAN OVERSIGHT

Manatee	Professional Services	I own a small business. I am a licensed massage therapist. Our practice offers massage therapy and skin care. My massage clients have been in pain and need deep tissue massage. I would like nonessential businesses to be able to open back up. My understanding is that the executive order expires on April 30th. I have been planning to go back to work on May 1st. Before being forced to close we were using precautions. We plan to have a form clients fill out to make sure they are well and not high risk. We are a small practice of 3 massage therapists with one of those therapists dual licensed in skin care. We only see clients 1 on 1. We only have 2 treatment rooms located in a quiet professional corporate center. Please let us go back to work. We were not able to secure a loan and haven't received unemployment as of yet. Please do not put us out of business. Thank-you.
Palm Beach	Healthcare	Please don't make our State a joke AGAIN. Test more people. Many people aren't social distancing now. Some believe the whole thing is a conspiracy. You have a lot of older people in this state that you're already endangering.
Brevard	General	Open our state now. We are ready to get back to work.
Walton	Tourism	I am a full time resident in an area of extremely heavy tourism. I am 74 years old and in the high risk age group, as are many other local residents. I, along with many other locals, also have other significant health issues which increase my vulnerability to the COVID 19. South Walton County becomes truly over run with tourists during season, which continues to seem to expand yearly. Our grocery stores are just beginning to have adequate supplies, though not always or with some essential items, for the first time since short term rentals were no longer allowed in the state. We have a small hospital with a 76 bed capacity. Our county has had a very low testing rate for COVID 19 and, according to area doctors, because of our low, full time population numbers, we are not likely to see that availability of testing to increase much. I am asking that you give strong consideration to the facts I have stated and to the fact that the entire state has high numbers of high risk individuals, in your decisions concerning the re-opening of our state, particularly the reopening of short term rentals. Walton County has a very high percentage of rentals every year from the state of Georgia. Their numbers of COVID 19 cases have continued to rise, which could pose a serious risk of raising the rate of infection here significantly. I think this state, certainly Walton County, has seen excellent results from the quick and decisive actions taken to contain/prevent an overwhelming spread of this virus. I feel that it is far to soon to open back up to a steady influx of travelers from everywhere. Sincerely, Gale A. Culling

AMERICAN OVERSIGHT

Manatee	Healthcare	I think that with proper direction and standards most counties can begin reopening. Places of gathering with more than 50 people should remain closed. I also think there needs to be protection for higher risk individuals like those with asthma. If florida reopens employers will expect everyone to get back to work. High risk people should be under some protection not to loose their jobs amd continue to be able to stay home. We need to focus on camps in the summer ELC should partner with parks and figure out a way to keep the kids in groups of 10 and not just be in a large room with 100s of kids. Also every classroom needs a sink and each kid needs seperate desks not all at one table.
Broward	General	Honorable Gov DeSantis, Open the economy and recommend social distancing. To die of hunger because of food shortages would be worse than the virus itself. Very Respectfully, Albalira Morgan
Osceola	Healthcare	In most of Florida, despite ignoring experts, we've been lucky regarding Covid-19. Keeping the beaches open primarily affected other states as beach-goers returned home. However Miami-Dade and Broward counties were particularly affected. Look at the data coming from South Florida and recall: this is the outbreak with mitigation efforts. Further, look at the median age of Florida residents. Floridians are skewed demographically towards the more affected population. Epidemiologists can show data and give concrete recommendations. As a healthcare worker it's my job to listen to them. As a leader and decision maker in a time of crisis, it's your job to listen to the relevant expertise, in this case epidemiologists and virologists. Do the right thing, even if it's hard, and please keep the state shut down until these experts say it's safe, and open slowly with their continued advice. Everything else can be dealt with in it's on way. Economies recover, dead bodies don't.
St. Johns	Healthcare	Regarding the coronavirus pandemic: While I look forward to getting back to normal functioning in our community; I don't want to reopen public places & allow tourists back into St. Augustine, until sufficient testing is in place. My husband & I are both retired & at higher risk for viral respiratory infections, & I fear out-of-state visitors will bring the Coronavirus back to our area. Our first confirmed case was a visitor from New York State, so I am hoping we will wait a few more weeks before opening our area to new visitors. (mid-May or later) Georgia is now allowing more businesses to open & it would be prudent for us to watch what kind of results they get, before opening our area up to possible new infections. I am also afraid of their infected population coming into Florida! Please use science & facts & caution before making a decision to open our economy! Thank you!

AMERICAN OVERSIGHT

Polk	General	Reopen Florida with restrictions. Reopen, barber shops, salons, spas where appointments can be made and social distancing maintained. The governor needs a hair cut. Open beaches Continue take out for restaurants another few weeks. For state agencies and tax collector offices dealing with the public, make testing for Covid 19 mandatory before opening services to public. Mandate wearing face covering in grocery stores. Thank you.
Marion	General	I feel it would be a grave mistake to open businesses, schools, churches, beauty salons or any place where crowds would gather or it would not be reasonable to be able to keep good social distancing. We will never stop this virus if people gather and therefore spread this virus I think teachers should be closed as well. Please consider keeping nonessential businesses, churches, theaters, schools closed. I realize you are trying to please people, but please do the right thing to keep the people of Florida safe. Thank you Deborah L Pratt
Lee	General	The massive failure of Governor Ron DeSantis in fixing the unemployment website, lack of testing and the all around failures of this government leave us residents with NO FAITH that our local government can safely reopen the state. Governor Ron DeSantis has failed the people of Florida and should be ashamed. How many cases are there? Don't know because we haven't tested enough people. How are you going to enforce the rules that are not currently being enforced. HOW MANY MORE NEED TO DIE! Get some experts to help. Prove to us that the task force isn't politically motivated, is diverse and is ONLY INTERESTED IN THE BEST FOR US, NOT COMPANIES OR POLITICS. Governor Ron DeSantis- BIG FAIL Donald Cheeto Trump- HUGE FAIL Republican Party- MASSIVE FAIL/DISGRACE
Lee	General	I am high school teacher in Fort Myers, FL. First I want to thank you for volunteering your time to work in this task force. Florida's economy heavily relies on tourism. Opening the state too early and having tourists get infected would brand us as an unsafe place to travel. It would also increase the infection risk for the workers and people in close proximity to tourists. We obviously can't keep things shut down forever. Many states are waiting until May 15th. That seems reasonable followed by a staged reopening. Thank you for your consideration.

AMERICAN OVERSIGHT

Lee	Healthcare	I believe that the decision to reopen should be based solely on what the experts in the science of this disease tell us! No human life is worth risking and I do not believe there has been enough testing in Florida for these health and safety experts to make an informed decision. The goals of the national plan for widespread testing has not been met in Florida. I will not risk my life to patronize businesses until I feel safe based on what science tells me...not the local, state or federal government. We can build back businesses...NOT a human life!!!
Volusia	Utilities	Waaaay to early in the game to open up. With Florida's tourism based economy we don't need people from all over coming to our state when we don't know where they've been or what they've been doing.
Polk	General	A very slow opening would be ideal. No matter what our numbers are right now we have to be careful not to get them back to peak numbers or anywhere near them. God forbid this actually starts spreading like wildfire and if we have any indication that it starts shut it back down immediately or we will be in worse shape that we are in right now. I completely understand that we need to get our economy back up and running but also the good Lord gave us the common sense to do whats right when it comes to our safety. All I can do is pray for each and everyone and especially our leaders to guide us and the Lord give you the knowledge and understanding on how we should do this. God be with us.
Lee	General	I really believe we should follow the 3 phase federal guidelines! They seem well thought out, and as Governor Desantis wants is truly data driven! We really need to do this in absence of a successful vaccine. This is one of the few times during this crisis, I actually agree with President Trump with these guidelines! Hope our state follows them to the letter!
Broward	General	Please understand I want no one to lose there life, but we need to start going in the direction of a open state. I guess the arks would be great, but speaking as a male who has not been able to get a haircut in awhile, would give double the cost to get that done. I think if both parties wear a mask, and the salon worker wears gloves I would take a chance to get it done. Also, I have a knee problem, the sports dr has informed me since not a emergency has to wait, it becomes elective, tell my knee that, anyway sir I am proud to say as one we can make America Great Again, but we need a place to start, thank you for your time.
Collier	General	Please do not rush to reopen. We are not safe yet.
Alachua	Retail	I've been a licensed hairstylist for over 30 years. There is absolutely no way to do my job properly without exposing both me and my patron to unnecessary risk. I also work at a beauty supply store. I don't want to take a risk of either catching or spreading this virus because some dumbass just has to buy shampoo or makeup. Pay us our unemployment. Pay it now. And let's try and listen to the MEDICAL HEALTH PROFESSIONALS, rather than relying on what Daddy Trump has to say. I'm not willing to be y'all's sacrifice because it's cheaper to throw us to the wolves than to pay us our unemployment money.
Seminole	General	Please open up Florida. There families starving, bills. It getting paid and depression is setting. We don't need a huge suicide rate. This dies in the sun!! That's all we have is sun!! Let's open Monday!! PLEASE!! Let people work!!

AMERICAN OVERSIGHT

Pinellas	General	Do not reopen the state yet! Covid-19 cases are still going up and thousands more will die if you reopen too soon! Please extend the stay at home order for at least another month!
Pasco	General	Thank you Governor for lifting the restrictions on the Church's Right to Assemble. I would like the Governor to also recognize the Right of the People to peacefully assemble. The Supreme Court has held many times over the history of America that the Right to Peaceably Assemble, especially in the aspect of protest and petition, is a "Bedrock Principle" of America. The Governor has repeated publicly that the government has no authority to regulate the meeting of the church, neither does the government have an authority to prevent the people from peacefully assembling in petition or protest. As he did for the church, please lift all penalties imposed upon Right to Peacefully Assemble and trust the people to follow the guidelines set forth by the CDC. Looking forward, Elizabeth Dolson
Seminole	Professional Services	I have been forced to not work for a month due to the Stay at Home order. In that month I have not been able to access unemployment, have not received a stimulus check (and the irs website can't track it), and was denied an sba loan. To date I have seen $0 of relief funds and have no information on when I will be ALLOWED to work again. I work in a salon with only 4 other women. Dairy Queen is open and I can't go to work? How is this worth millions of livelihoods? If you don't safely reopen soon the people will take it upon themselves to open.
Hillsborough	Recreation	In favor of re-opening restaurants on a limited basis. Resume team sports. Any way to arrange infection control training for restaurants and coaches, and teachers for 2020-2021 school year. PLEASE ELIMINATE PERFECT ATTENDANCE AWARDS in school. I volunteer at an elementary school and parents send their sick kids to school so they can keep this ridiculous "award". Also stricter guidelines for sending sick children home from school please.

AMERICAN OVERSIGHT

Hillsborough	General	Dear Governor, I'm a supporter, and I've always appreciated your non-partisan decision making. I urge you to ease the "stay at home" executive orders to combat this real virus. We now know without a doubt that the estimates of the severity of this were greatly over estimated. The point in "locking down" was to flatten the curve so as to not overwhelm our hospitals. We know that our hospitals are far from overwhelmed, they are less busy than normal. The curve has been flattened. We know that the media and left have filled our country with unwarranted fear. We know now that Florida's hot spring and summer temps are ideal in killing this virus. We have data from Sweden now that shows isolation reduces the rate at which we can attain antibodies against the virus. Finally, you certainly know we cannot sustain this shut down of our economy. Every day we stay shut down is the death of another small business, the death of another job, and quite possibly the literal death of another poor soul suffering from depression, or starvation. We are not taking this or any virus lightly. However, We the people will not stand for draconian mandates by our government that shuts down our livelihoods, and kills our pursuit of happiness. We know that not only are they unnecessary, but they make the cure worse than the disease. I implore you to stand up to these university elitists, and medial likes that are feeding you these fear mongering lies about this virus, and send the message to get our state back to work. Follow the Georgia Governor's lead! Please restore our freedom. We the people can be trusted, it's the government and our media that needs to be scrutinized. Sincerely, Joshua Payne Riverview, FL
Pasco	General	As much as I want and need to go back to work, I am scared of doing so to soon. I think Florida should wait to test more people and for less positive test results.
Hillsborough	General	Please! I pray to God that you reopen Florida! I can not take staying locked inside for much longer! We have been inside for a month now. The curve has flattened. The hospitals are not overwhelmed with Covid-19 cases. Please, open Florida!
Hernando	Healthcare	Too early to reopen Florida. New cases still on the rise. Florida is a retirement state with a lot of older Floridians. Shame on whoever opened the beaches knowing full well no one would follow the rules and continue to spread Covid 19. Need more testing done.
Orange	General	I live on the edge of two hotspots in orange county what few times I have gone out of the house I have noticed people not following the guidelines Such as mask and social distancing I believe it's too soon to open up the stay at home order I am leery of going out in public and to work I wish you all good luck in your decisions

AMERICAN OVERSIGHT

Orange	Government	Thank you for allowing Florida residents to voice their concerns about re-opening the public. I know you are receiving plenty of these so I'll try and keep it brief. I believe that reopening the state too soon will have a negative Impact. Given the current number of cases with no vaccine, opening the state too soon will cause an exponential increase in Covid-19 cases. If those numbers increase, what's going to happen? Are we going to continue living our lives and allowing more people to die? Or try to decrease the number of cases going on lock down again? I understand that we need that businesses need to open to get the economy back up and running, but what good is that we go to a second lockdown and cause more jobs to be lost and more businesses to close? If this is the scenario and when business open back up, we're still going to have hard time with the economy because more people will have lost their jobs, more businesses will have closed so there's no money to spend on anything. On top that, there will be more deaths and cases due to Covid-19. Below are some reasonable solutions that I think will be beneficial to Florida residents that will help everyone out in return 1. Either pausing utility payments, rent and mortgages or fighting to give every American citizen a $2,000 a month stimulus check during the time of quarantine to help with those bills. 2. Get more testing kits to get more accurate numbers regarding Covid-19. 3. Keep Florida in lockdown till the end of May like originally planned and revisit as it gets lose to determine whether or not it's safe to open up Florida again. If we can maintain lockdown I strongly believe that we will be able to help flatten the curve and slow down the spread of the virus to open up Florida and America soon and maintain it open. If we open too soon, the number of cases will increase and with no vaccine yet and much too learn about the virus we will be forced to go into lockdown again.
Hernando	General	Florida should remain closed at least another 30 days. We are a large state with a lot of elderly. Personally I have a 90 year old grandfather and I'm pregnant and have a 2 year old. I do not want to fear being out in public. We have no problem staying home a bit longer for the health and safety of not only our family but others. I fear opening now will Only cause Florida to shut down again and next time It will be longer. Follow the examples of China and Italy. We have been warned by these countries
Orange	General	Our economy is crumbling. People are out of work in record numbers. The state needs to reopen. People need to pay their mortgage, rent, car payments, electric bills, water bills, HOA dues, etc., etc., etc. The virus is dangerous, sure, it's not a joke. There is no going "back to normal". But we have to go back to something. Keeping everyone home is not making things better, it's making everything worse. Open, please.

AMERICAN OVERSIGHT

Pinellas	General	The national guidelines don't end until April 30th. After that, look for 14 days of decreasing numbers. That was the plan, right????????? Pinellas is still going up in every category, infections, hospitalizations, and deaths. What can you do to help that? People are out and about in Seminole/Pinellas like everything is fine. If we can open while numbers are rising, why did we even close? All of my loved ones are high risk. Every single one. I think we can wait another 15 days to a month to be safer. Regardless, I will still be practicing the stay-at-home order to lower my chances of infection so I can see my loved ones. Get the unemployment working for people, please. It doesn't affect me rather hundreds of people I know. Medical and dental offices shouldn't open until they have proper PPE and aerosol ventilation systems anyway. If you open fully now, my gut is that Tampa/St Pete and Orlando will have spikes like Miami. We don't even have good supplies of hand sanitizer, soap or alcohol for the necessary hygiene care to be safe and enter the public again. How about we open when supplies are on the shelves?
Hernando	Retail	I voted for this governor, but refuse to do so in the future. He is kissing the Presidents ass, and doing whatever Trump wants. It's all about the Money with Mr. Desantis. open the beaches, let everyone be in contact with one another, great move , if this turns into a epidemic of great numbers, they should lock him up for ever. YOU LOST MY VOTE.
Polk	General	There are numerous counties with low or no illnesses and those should be opened. Masks to protect oneself and others. Being between Lakeland and Winter Haven, Auburndale has no idea where any tests are offered, antibody tests. We, my husband and I have not had any symptoms of covid19 . We are retired live at the Hamptons Golf Community on 92 W. Everything has been closed. We have been social distancing, making masks for our community members, ride bikes, golf carts. That's about it. Groceries for those who can't go. Yes, open us up. Thank you!
Seminole	Government	Since Florida's plan seems to be not completing and paying unemployment claims, these workers need some relief and answers. The answer should not be get a job at Walmart or as an essential worker. These people had jobs and me don't through no fault of their own. Restaurants and bars have been suffering the most and strict guidelines should be imposed to get these businesses open as soon as possible. Next should be hair and nail salons. These businesses add to our quality of life and are missed the most. Large venues and shopping malls should be last on the list. Lastly face masks should be mandatory and businesses should hand them out to customers who don't have one. If you don't have a mask you can't enter.

AMERICAN OVERSIGHT

Lee	General	Re Open -- My constitutional rights are violated and I'm sick! Sick of being told I can't do this, I can't do that. I'm 80 years old, I've taken good care of my health all my life and now I'm being put on a time out -- how much time do you think I have left? It was asked of us to abide by the restrictions so the hospitals did not get overwhelmed, it was not so that people would be guaranteed they would not be infected. Hospitals are not overwhelmed -- they are actually asking people to use the Emergency Rooms in Lee County! Lots of people are infected with the Virus but are not in the hospital nor even in bed. Lots of people get sick, lots of people get really sick, really sick people end up in the hospital. It's life! Government cannot stop people from getting sick - so don't pretend you can. My friends, neighbors and relatives will all take care of themselves. Some will stay home and I will continue to shop for them, some will not go to crowded spots and some will resume life with accomodations like wearing a face mask voluntarily! But this is America and we have certain unalienable rights, such as the right to pursue happiness and prosperity for ourselves. How can we do that if we can't go out???? Be pro-American, re-open safely. Obviously, schools should not re-open until next semister. Disney, Universal, Seaworld and other such businesses should be allowed to submit re-opening plans for approval to your taskforce. If they feel they can afford to open, restaurants can open with restrictions on placement of tables with outside dining a good option. Fast food restaurants, opened with space restrictions. Let people get back to work, let people open their business. Really, we can decide if we want to go to the beach, get a haircut, shop for new clothes, buy a pair of shoes other than Walmarts', go to dinner at our favorite small business places, purchase fabric at the fabric store, stay at a hotel, take a road trip. We all had Mothers and Fathers that told us what to do healthwise, do we need you to be our new mothers and fathers? It appears that fresh air and sunshine are good to fight the virus -- (just like mother always said), and yet public parks and beaches were some of the first
Leon	General	I support begging to open up as many of the public venues as possible. The worst is over, we need to take some risk to salvage our economy. We can still take precautions while getting back to normal.
St. Lucie	General	Facial coverings or masks should be mandatory to go out in public and to enter essential businesses, or denied access. Some people don't care that they are putting others at risk. The Treasure Coast has been fortunate to have so few cases compared to areas south of us. It would be nice to keep it that way. If the number of new cases continue to go down, reassess in two weeks. You need an assessment period with a definite start date. Continue to do testing, testing, testing. Don't do what Georgia is doing. We all want to have some kind of normalcy in our lives. Stress social distancing.
Seminole	General	REOPEN FLORIDA with no mask restrictions for those of us who are healthy. Allow ALL businesses to open without restriction. If those who feel they are vulnerable or those caring for them wish to stay isolated, that is fine, but the rest of us demand our right to earn a living!

AMERICAN OVERSIGHT

Polk	Tourism	I strongly think that Florida should reopen immediately for many reasons including economic, physical and mental health. The corona virus is a new virus that the medical community is still learning to treat but one main fact they learned is fresh air and heat only help with prevention and healing of the condition faster. After going to Southern California the first week of February, I know now I contracted the COVID and I did stay quarantined just in case and recovered quickly with the fresh air in my back yard. Many people do have lowered immune systems and either die or recover longer which is why in my opinion is why New York had so many cases and deaths since they were locked up in their dark apartments with no sun or fresh air to recover. They also understand now it's a respiratory illness which the medical community was not treating it for at first which didn't make matters better. I could also state statistics on other illnesses killing people every year for which the United States does not shut down for but that would be controversial. The state of Florida has a majority of tourism companies and they are all suffering now so if we could reopen in time to save them in time, there won't be such a devastation effect in the long run. The reality we are putting a band aid on a huge problem and small things we implement such as plastic covers on debit card buttons which is illogical because everyone touches them and it won't stop the spread. Instead of covering everyone with plastic and masks, keep the sick and old at home and allow healthy people who already know they had it, start fixing this economic situation before it's too late. The longer you wait to open, the more hysteria will happen and people will never want to leave their homes out of fear. Rip off this COVID bandaid and open up Florida!

AMERICAN OVERSIGHT

Sarasota	General	Please reopen the state. The statistics that continue to be updated show that the original projections were way off (it is not near as harmful). The entire country responded to a worst case scenario "what if" threat, which is reacting to fear, rather than real data and risk. We now have data that shows the risk is not nearly as great as originally believed, even with the CDC encouraging hospitals to report essentially everything as COVID (which is unacceptable). The government should not be making the choice for its people regarding this virus. As long as the hospitals are not overwhelmed (which they are absolutely not here), then this should be a matter of personal decision and not government interference. The argument that these orders are unconstitutional becomes increasingly stronger the longer this goes on. The "legitimate threat" is much less legitimate than originally believed, given the continued research/data we have available, and the response is absolutely not the "least restrictive means." People in "at risk" groups have the ability to choose to stay home if they are fearful of the virus. As long as hospitals are not overwhelmed, the virus needs to run its course. We cannot even reach herd immunity with everyone staying in isolation. Those of us that want to get back to work and want to continue living (not in fear) must be allowed to do so. Please reopen Florida. To ensure hospitals do not get overwhelmed once reopened, the government can request businesses implement stricter cleaning procedures and distancing guidelines for a period following reopen. We must get back to life. There are more than enough conflicting expert opinions on this virus in our country and only those affiliated with the government are being heard by our government. Unacceptable. Our government must listen to the other expert opinions to make such extreme decisions and recommendations, rather than the opinion of select few. If this is a matter of expert opinion, and the experts disagree (when considering these independent experts beyond those within the gov), then the government CANNOT infringe on our rights and shut us down.
Martin	General	Additionally, health care mandates by the government are Governor Do you have any normal people on this task force or are they all experts and politicians Sanford studies and others have established the death and recovery rate of covid 19 are no different than a really bad flu season! This shutdown has already cost people their lives work. I know personally of two business people that have lost everything and committed suicide! Do you think perhaps they, their family and friends would have risked the virus? Your citizens are suffering, domestic violence is going up, kids are not learning, people are going hunger, yet the politicians in the ivory tower are paid, safe and feed! Stop this and trust in the adults of this state to take care of themselves and their love ones, I would welcome an opportunity to speak before the righteous taskforce attempting to dictate my life and freedom! Free on my feet, better than safe on my knees!

AMERICAN OVERSIGHT

Alachua	General	It is time to get the economy heading back in a positive direction. People are hurting and need to start working again. As a state we cannot shelter in place much longer before it becomes a problem we may never recover. I have been able to work from home, but my heart breaks for those who cannot. The numbers on death rate has remained readily stable for the last three weeks. We should begin with caution but it is time to begin letting Floridians begin to work again. I implore the Governor and his staff to re-open fFlorida at the end of April. I appreciate all he has done to keep Floridians safe however the time has come to get back to work.
Seminole	General	It's way too soon to reopen Florida, the number of cases is going up, the number of deaths is going up. There shouldn't even be talk of reopening till those numbers start going down, not up everyday. On another note there are still plenty of people who haven't even been tested, yet you want to re-open as if to invite the virus right back in. As soon as you do so it's a sure thing the cases are going to continue going up even more than what they already are at this point. It would be dangerous and incredibly ignorant to put us right back in harm's way.
Palm Beach	General	We must have adequate and available testing of the Florida population so as to determine how widespread the virus is prior to opening the economy . We must have a phased opening according to how essential the service is as defined by need for proper survival and not political considerations or connections. Social distancing must be maintained and masks should be worn where social distancing may be difficult to maintain. Enough testing should be done to achieve the1 in 1000000 infected to non- infected persons as recommended by the experts, prior to full opening of the economy. Notwithstanding, we must have policies in place to react properly if another outbreak appears to be happening.
Osceola	Tourism	I believe we should allow small gatherings of 10 or less people. Beaches re-open while practicing social distancing of 6ft and parties of 10 or less. Masks to be worn when inside public areas such as stores, doctor offices, etc. Possibly open restaurants with 50% of the capacity with the 6 ft rule between tables. We need to ease in and watch how it affects the COVID-19 numbers. If they continue to go down or only have a slight increase, we would go to the next phase. Large gatherings at events, theme parks, etc should be the last thing to be implemented. Unless there is a way for these venues to monitor such as Temp readings, distancing between guests, etc. We do need to get the economy back up and going. I work in hospitality and have been negatively impacted by COVID-19. But there must be a balance between opening up safely while starting back up the economy. Thank you.
St. Johns	General	Please keep gyms closed. For the safety and sake of our elders and children. Hi

AMERICAN OVERSIGHT

Orange	General	The state should open back up for Florida residents. I don't think it would be a great idea for flocks of people to travel to Florida for summer vacations. Extra precautions and other guidelines could stay for more heavily hit areas, like South Florida. That being said, it would be important for theme parks to soft open with only Florida residents allowed in the park for the time being - perhaps with limitations on how many people can be inside. Also, higher risk people should still use caution and still stay at home when possible. It would be a good idea for essential stores to keep special shopping times in place for the at risk population.
Miami-Dade	General	Open up the state Governor my mom is suffering with business it's scary to think we don't know how much longer she will have a job. She has had to take a 20% cut is having to furlough her workers. This is people's livelihoods open the state governor. We can't last past May 1st like this. Your fellow Floridians are struggling open the state this is literally natural selection with business and the people. We don't work no money, no money no home no food. Thank you very much and stay safe during these times.
Miami-Dade	General	In regards to the beaches in Florida. I would like to suggest a phased approach to reopen all state beaches. I will use Miami Beach as an example. Reopen the beach to Miami Beach residents at first to establish a program on long term use by county residents. The phased approach would permit Miami Beach to establish a controlled access program, limit the number of people in a group and establish social distancing policy.
Pinellas	General	Opening condo pools. Hotels should stay closed but condos people own them and pay fees for the pool. Should be opened with a limit on people there
Columbia	Education	I believe Florida should open! All counties should not be treated the same. Give mayors control. State Parks and beaches should all be open. If elderly or health compromised people want to stay home they can stay home. People need to get back to work. Let people be responsible for themselves and quit taking our freedoms away due to fear. This is causing far more problems than the virus is.
Brevard	General	Florida needs to reopen everything in phases with tourism first such as universal or Disney. The economic issues this has caused on our economy are going to take a long time to recover. The virus is not as bad as everyone is saying by death toll. When you factor in how many people have it and did not get checked it reduces it to under 1%. New York for example, put its death rate at 0.5%. In addition, this virus has been around since December and potentially November and we were all fine and the health care system was fine as well.
Pinellas	General	Experts state that Florida should not open up before June 14th. Florida should not open until COVID-19 infections fall below one case per 1 million people and extensive testing is done with adequate provisions for contact tracing whenever an infection is found.

AMERICAN OVERSIGHT

Miami-Dade	Government	I don't agree with reopening the city without a strategic plan for more testing . I believe there also needs to be a plan in the event the situation with the pandemic we're to worsens.
Duval	Technology	The unemployment website, has turned out to be a absolute total disgrace. The political bodies of FL should be ashamed for having such a HORRIBLE and ill powered website online. If platforms like FB and YouTube can handle millions of clicks at a time, the state could too. I'm sure you voted to pay a small fortune to have what we have right now. I originally signed up in March, waited and guess what?... NO RECORD found. I signed up again in April, and the site kept crashing. Guess what? it continues to tell me my application isn't complete, and to click apply again. guess what? When I click it takes me nowhere new and still shows me the same info,... Incomplete. I check it every other day, guess what? No indication that ANYTHING is being done. I'm late on bills and ready to get thrown out of where I live. Why? because the unemployment benefits that are now avail to me (I'm self employed) are "Not Avail". It's still broken. I will vote a straight republican ticket, but I hope and pray that more than 2 (R) are running, because I will NOT be voting for an incumbent. THEY HAVE FAILED US. SHAME ON YOU ALL. P.S. while submitting this feedback IT WILL NOT EVEN TAKE THE submission, the website is overloaded. SHAME, SHAME, SHAME.
Brevard	Finance	I don't feel safe going back to work or sending my kids to daycare. We need to stay home
Broward	Recreation	Please open the beaches. You can keep the public parking closed so large crowds aren't an issue. There really is no reason people can't social distance at the beach, it's wide enough to accommodate local residents. Thank you.
Alachua	General	Governor DeSantis, Please open our state!! You have done and excellent job leading us through this crisis!!! This virus is much more widespread and uneventfuland not every person is vulnerable and many of us have antibodies. Many have been exposed with little or no symptoms and many of us are willing to take the chance with something that may be as common as a flu for most of us. However, too many businesses, livelihoods, careers, lifestyles etc are being destroyed and that is to speak nothing of the fact of the social impacts from drug and alcohol abuse, depression as well as weeks of no AA or Al-Anon meetings and the impact of that alone is a consequence that wasn't well thought out. Many of us are shopping in grocery and drugstores, hardware stores, drive thru's etc. Let us be adults and adhere to the guidelines and let us have our lives back and our businesses back.....and our families and friends back!!!! Let the vulnerable shelter themselves but let the rest of us get back to work and back to taking care of our futures!! Thank you!!!! Thank you for being a man of character, intelligence, and level headedness!!! Release us please!!
Lee	Tourism	We need people working . The deaths from the soon to be recession , will out way the disease . Not many cases in SWF . So open Florida for Floridians . Keep tourists away for awhile longer

AMERICAN OVERSIGHT

Collier	General	I feel it would be better to slowly and more deliberately reopen, so we'll perhaps not have to shut down again. We should use science and advice from health officials rather than politics to choose when to reopen the economy. Opening beaches could be a good thing for our health as long as there are restrictions in place. More importantly beaches should only be open to the residents of that county to avoid people from other counties and states invading.
Orange	Tourism	OPEN THE STATE. People are losing their homes, jobs, businesses, etc. The economy cannot handle this closure. All the prediction models you used to close the state were wrong but you are still using the same fear to keep the state closed. It's time to open the state and get people back to work. Open the restaurants, hair salon, open Disney, etc. This virus has become political and the democrats are using it to destroy the economy and hurt Trump in November. Do not let the democrats control this and destroy the great state of Florida. Please open the state now. Thank you.
Polk	Food	Obviously, I'm like most other people, I have cabin fever something fierce so I would like nothing more than to open the restaurants back up BUT I have no idea how you'd do that while keeping the distancing option. I wear my mask and put on gloves every time I go to buy groceries etc which I haven't found to be a problem to avoid getting the virus. The first time I west grocery shopping, I wore long pants, long sleeve shirt, fask mask and gloves. Of course, I was seating like heck when I got home but that's how I felt. My sister wanted to take a taxi or uber to Watson clinic but I would let her. I don't know how you're going to do it, but I would like to see some restaurants reopen. Steve Hoffman
St. Johns	General	It is important not to attempt a re-opening until Florida and the separate counties have had the 2 weeks of decrease in cases and hospitalizations. We do not want a second surge that would require another shutdown. People (tourists) need to be able to trust Florida is using good judgment to keep everyone safe.
Orange	Healthcare	In addition to social distancing, maybe recommend the following behaviors: When not wearing mask and about to sneeze or cough, pul up shirt or blouse over nose instead of using hand cover. 2nd best, sneeze/cough into bicep of arm because it makes you look downward and your hands touch other things but biceps don't touch other things. For elevator buttons, kiosk keyboards (like airport check in), and doorknobs, use opposite hand (like left hand if right-handed, and the pinky knuckle to press with, and the last two fingers (pinky and ring finger) and partial end of palm to grab with. Turns out when touch face, you usually use the hand that you write and eat with, and it is hard to touch your face with the pinky knuckle.
Pinellas	General	Please reopen Florida and release the burdens you have placed on our communities when you made the irrational decision to shutter business and shelter in place which was based on premature data and fear. However, continuing to quarantine high risk groups such as nursing homes makes sense.

AMERICAN OVERSIGHT

Palm Beach	Recreation	PLEASE REOPEN THE BEACHES TO FLORIDA RESIDENTS. I don't care if we have to bring our FL Driver's licenses with us to the beach, as long as they can be reopened. I understand not wanting to encourage out of state vacationers, for now, but since "UV light" and vitamin D are deemed helpful in fighting the Coronavirus, opening the beaches seems like a logical decision. Honestly, it would be nice if more things were allowed to slowly open with the requirement to wear a mask or facial covering when indoors and follow social distancing guidelines. Outdoors, parks and recreational areas should be allowed open, provided social distancing guidelines are adhered to. Also, everyone should be made very aware of the need to adhere to guidelines in effort to not increase the incidents of infection as closures would have to resume if there was an increase in infections.
Pinellas	Healthcare	Our medical practice has complied with urgent medical care in order to preserve PPE. This was of grave concern in the beginning of this pandemic but the shortage of PPE is no longer so dire. We have made our own medical masks using the UF protocol and invested thousands of dollars to get our offices outfitted with plexiglass, signage, contactless pay systems, etc. There is absolutely no reason to continue to keep our medical practice closed. I guarantee we are safer than WalMart and we are contributing to community by testing for coronavirus antibodies in all of our staff and some patients. Let us do our important work!
Orange	Administrative	PLEASE reopen everything. Local businesses are suffering. I am fortunate enough to work in an “essential” business but many people I am close with are not. Businesses will be shutting down and never able to recover. If people are afraid for their safety, they should not go out. They should not be able to make the decision for everyone.
Pasco	Healthcare	Allow families to visit loved ones in Assisted Living Facilities. Families visiting must wear face masks and have their temperature taken. All workers at the facilities should continue to wear face masks when they are working in the ALF"s. Residents and families are struggling because they cannot visit their loved ones.
Santa Rosa	Government	PLEASE open the State back up!! I may be old and want to be safe, but I do NOT want to keep people from working!! Let the old and sick stay home and the healthy GET BACK TO WORK!!!!
Marion	Healthcare	Florida is an embarrassment to me. The governor is an embarrassment and a trump boot-licker. covid-19 is serious. you should not be asking the public about what they want to do. you should be consulting with science / disease / contagion experts about what to do. or did that not cross any of your addled minds? plus your damn submit form doesn't even work...overloaded. this state is truly a piece of messed up work.
Broward	Education	Please open up school for 2020-2021 school year. We also need other areas opened up sooner: hair, nails, parks, beaches. People need to start going back to work and being able to resume some type of normalcy.

AMERICAN OVERSIGHT

Collier	Tourism	I don't think Florida should open its doors yet. It will get people sick again. The beaches should remain open,, though.
Brevard	General	Hello, Thank you for letting the residents of Florida voice their thoughts! Generally speaking I think it's too soon to open up on a broad scale. Now within certain counties where there are a low amount of cases within certain zip codes, that might be a starting point to Re-Open Florida. Keep in mind though some areas really haven't had enough access to drive-thru testing either, so we really don't know how much more is out there, even in a low case county like Brevard. It could still be on the rise any day or week now. I think we need to wait a while longer,and when we do Open, the businesses have to be completely ready with their new strategies to keep employees and the public safe. We should all know by now that social distancing and face masks are here to stay in our New Normal existence. Thank you everyone on the Task Force. Stay Safe!
St. Lucie	Healthcare	Do not reopen anything until a concensus among health professionals say it is safe to do so. Donald Trump is not a health professional and should have no baring on reopening. Governor Desantis, we elected you to lead us and do the right things in easy times and in hard times. Now is the time to step up and make the right decision. Health before wealth. I was always taught that without health you have nothing.
Lee	Food	Please reopen all restaurants even at 50%. It will be good for people in hospitality to get back to work. Especially since we aren't getting any unemployment! We haven't seen a dime from the unemployment that my husband applied for 6 weeks ago. Please, he just wants to work. I'm grateful to be working in healthcare and to be essential. Thank you!

AMERICAN OVERSIGHT

Miami-Dade	General	The task at hand of opening Florida back up is one that requires very incremental steps to reopen. There would need to be a base criteria to even think about reopening which would be having a fully up to date testing system whether it's antibody testing or regular testing to get a clear understanding of where the virus is in terms of numbers and location. Once all that information is at our disposal the most logical thing to do is ease some restrictions in areas with little to no infected but still limit the amount of contact people may encounter. For example open some more very selected small business that can adapt to a social distance business style which could be smoke shops, small Botanicas or boutique. Restaurants, fast food chains, clubs, beaches, and social gathering pertaining to events should be held restricted until a viable cure is available to the open market. Although many people would like these services, these are places that may cause the highest rate of infection spread. Restaurants may be able to have takeout to able to have some business but cannot have capacity inside. There is something that has to be understood and that is the tourism industry will suffer until there is a cure to this. You cannot morally open these high density places to the public for it will be a Petri dish for the virus. The opening of Florida will still have a good portion of businesses operational but there's a large portion of the economy that will be hindered and that must be understood. Assuming you have created social guidelines for select businesses that are able to open there will be a surge of demand for jobs. A crucial stage of reopening is assisting the people of Florida back into the work force. This must be a state wide effort to organize with businesses and the people to connect them back into the labor force. Now each county is unique to its own so these measures must be fine tuned for each one. Statistics will be our friend and we cannot allow emotions to judge this reopening. We must constantly think about the huge unemployment surge we have and the loss of a multi billion dollar industry which is tourism. A big thing we need to keep in mind is moral. People feel at a loss because they lost a job, can't pay rent, or can't pay enough for food. Social nets will be needed for people to raise moral. We need to give people hope. If we work together have state wide televised time for new information to be released (like New York) the people will feel secured. I appreciate the time you have taken to read this the work the task force is doing is
Polk	Retail	I think we need to reopen as soon as possible.
Pinellas	Healthcare	It would be unwise to open any aspect of the economy until we had a sufficient amount of testing ability to test anyone with symptoms and at least 10 potential contacts. With the expectation that all test results were available the same day the test was performed. In addition, there must be sufficient human resources to track all potential contacts. Finally, the state needs to be prepared to provide all positive individuals a place to isolate along with food etc. if positive individual chooses not to isolate in their own home. Otherwise, without this capability, within 3 weeks of re-opening beaches or other aspects of the economy there will likely be a resurgence of the virus leading to additional deaths.

AMERICAN OVERSIGHT

Collier	Professional Services	My concern is for the safety of people working in businesses that are front facing, contact jobs, that are not medical, such as hair salons, nails salons, barbershops etc. I am a hairstylist and co owner of a salon and I want our business to be able to remain open, however it's impossible to practice social distancing of 6 feet,. Not to mention, cleaning supplies are not super accessible currently, so being able to have enough is also a concern going forward. I think that perhaps reopening business such as these, in order to keep people safe, maybe a later date, such as may 15th would be a safer option. I understand needing to go back to work and have an income (I also depend on this and have not received unemployment at all) and keep things in business, I just want to keep it safe and not rush it for my family, team members and their families as well as our guests and their families.
Bay	Tourism	Small business has caught the worst disease possible....."GOVERNMENT". If this continues much longer small business will be dead and so will our country. Mumps and Measles didn't shut this country down. We must get back to work NOW or we will all fail. The cure is clearly proving to be much more fatal than the disease.
Broward	General	Why cant you open the parks to just walkers, bikers and joggers and of course any one driving with a handicapped sticker. No parties, coolers, picnic table use or playgrounds. Maybe open from 630 am until 10 am and then again from 4 Pm until 7 pm or something like that. Thanks for listening.

AMERICAN OVERSIGHT

Collier	General	Hi Governor DeSantis, I am a resident of Collier County. It is time for Floridians to get back to work. Throughout the past weeks of COVID restrictions businesses deemed “essential” remained open. Floridians who patronized those businesses voluntarily engaged in social distancing, voluntarily followed CDC guidelines. With these businesses open, sometimes serving hundreds of people at a time, twelve hours a day, seven days a week, we have witnessed COVID numbers falling. The State of South Dakota never mandated a single business closed and are also seeing COVID numbers falling. Every business is essential when families are dependent upon that income for healthy and happy lives. I believe these facts prove that Floridians are responsible people, who love their neighbors, and will CHOOSE to do the right thing. But we need our elected representatives to do the right thing; we need our businesses open. We don’t want government handouts. We want to get back to work. We want our businesses open now, not later. Please allow our restaurants and other businesses as well as beaches and parks to open now. I tune into your press conference daily waiting for you to say that our economy is open and to just be responsible. However, I have yet to hear that. I feel we are in agreement on what needs to happen soon. Please just make the right decision and announce that we are opening now as many other businesses have been open and doing just fine. Beaches can be open as they are expansive and a much better option than I encounter running on the now crowded sidewalks each morning. Walkers go out into the busy road to avoid being within 10 feet of me as I run by. It's just mind boggling how fearful people are. Yet it's safer to be in a walmart or grocery store? Restaurants can be opened even at 50% capacity to begin with. There is also no need to require a mask. The effort it requires to
Pinellas	General	Call Centers with over 50 employees should remain work from home. Also if someone has been cleared to work from home should be able to remain so if the are a risk of catching CoVid WITHOUT retribution from their employers.
Sarasota	Professional Services	I’m a hairstylist in Sarasota and we have 3 employees over 65 and our clients are 60 plus Some 80 and 90 . We can’t cut hair with gloves on or shampoo color off at ears also when we shampoo clients they cough in your face as soon as you lay them back . Blow drying germs all over is scary . Our stations aren’t but 2 ft apart it’s just very scary and we feel unprotected. Before we closed on March 28 I was trembling at work because I have 1 kidney And asthma. Unless we could get M 95 mask . Being vain or greedy over safety is not fair . The salon owners want to open so they can make us make them money. They should have done the PPP loan

AMERICAN OVERSIGHT

Broward	General	PLEASE DO NOT REOPEN ALL BUSINESSES AND BEACHES WHILE WE HAVE OVER 30000 CASES AND SO MANY DEATHS. SOUTH FLORIDA IS FULL OF ELDERLY PEOPLE, DISABLED ADULTS AND YOUNG IMMUNE COMPROMISED CHILDREN. THE NUMBERS ARE MUCH HIGHER AS SO MANY REMAIN UNDIAGNOSED DUE AT FIRST THE LACK OF TESTING CENTERS AND NOW RESTRICTED ACCESS CANCELLING THE RESTRICTIONS AND ALLOWING THE PUBLIC TO CONGREGATE IN GROUPS CAN LEAD TO DEVASTATING CONSEQUENCES AND LOSS OF LIFE. INDIVIDUALS AND BUSINESSES ARE RECEIVING HELP. BOREDOM SHOULD NOT BE A REASON TO UNDUE ALL THAT HAS BEEN BENEFICIAL DONT MAKE FLORIDA A LAUGHNING STOCK ONCE AGAIN RECONSIDER YOUR POSITION AFTER SEEKING COUNSEL WITH AMA, CDC, FAUCI, INFECTIOUS DISEASE SPECIALISTS, WHO .....ETC
Brevard	Healthcare	All Florida public parks should be open, especially beachside plus parking, with social distancing in place. Cutting off residents' access to nature is creating observable negative consequences in compensatory behaviors, such as excessive alcohol consumption and overeating. We have reached a tipping point where the cure is worse than the virus, in my opinion.
Osceola	General	I know that we are all struggling right now but Florida is not ready to re open. People will still be too careless and think everything is ok . We need a little more time. DO NOT OPEN FLORIDA , we need more time
Miami-Dade	General	Plssssss, don't open the state back to normal. Thats gonna be a completely disaster for everyone. So many people are contagious right now, the numbers growing up if u do that.
Pasco	General	It is nonsense that we can go to Walmart , Publix, gas stations , Lowes, Home Depot, air planes, but all of these other businesses are being targeted by the government to close. This is in no way a fair process. Let people open up and get back to work before these places close forever. What an unfounded decision to close these places was made. All of you should be ashamed. LET US GET BACK TO WORK. If we don't open up immediate, the Governor should pack his bags, he won't be reelected. If he opens up, his odds increased 10 fold.
Broward	Tourism	I agree that we need to get back to normal and start building up our economy but I think that we have to reduce travel within the US and between states, even between counties. By reducing the amount of people we let come in from other states I believe we can control the spread of Covid-19. Our governor, mayors, healthcare professionals have worked too hard to have people from other states that haven't done their due diligence come here and bring their issues with them. Let's control public events, movie theaters, schools, bars, etc. and open a little at a time with people doing social distancing, keeping masks on and continue to follow guidelines. We will get through this together by being smart and patient. Thank you.
Columbia	General	We need another month.. it's too soon

AMERICAN OVERSIGHT

Miami-Dade	Healthcare	We need to have the economy and all activities open now.
Broward	General	Open all businesses that are able to provide a plan for safety. Routine cleanups throughout the day, maintaining social distancing and providing sanitizer to patrons. . People have to be responsible for their own health and well being. Schools need to reopen in the fall.
Pasco	Retail	I work in retail. Although we are open curbside I am concerned about a full open because I live in a multi generational home. My father is in the high risk category and I have a 9 month old daughter. I can't send her to daycare, and wouldn't if we do open back up May 1st because of the risk to my father. I also have the fear of returning to work myself and bringing something home to him but if I don't I will lose my job and health insurance. The state should not open until we see a huge influx in testing and a 14 day solid decline. Minimum we should wait it out to see if the cases spike in the states that have already opened. I shouldn't have to choose my father's life or my job. Please do the right thing.
Orange	Professional Services	We need to open this state. Closing it for a certain, high risk, people is really insane. Nobody is getting unemployment, many having problems with stimulus. Let us work! I don't know anyone or any or my friends know anyone that have gotten this. But, I do see mental health in friends deteriorating due to not being able to pay bills.
Orange	Government	I disagree with the Stay at Home order being lifted. It shoStay at Home should be extended end no earlier than May 15, 2020. The numbers have been controlled because of it. Social distancing with the use of face masks should not be lifted in any business until months to come..
St. Johns	General	My wife and I are ADULTS (71 and 72 years old, respectively). We moved to Florida to enjoy the attractions, the weather and our remaining years together. As adults, we are fully capable of following the required social distancing and other preventive protocols in order to protect ourselves and others, just as we are capable of deciding whether we want to "risk" certain activities. However, we can't exercise these judgments until the economy is opened. Please do so ASAP!
Pinellas	General	Science and medicine should govern such a momentous decision as to relax safety measures, not ethe demands of bankers and stock brokers.
Brevard	Finance	I support re-opening of Florida because I would like to see everyone back to work. Many people in 'non-essential' businesses actually have essential jobs because they are providing for their families. We need to allow them to earn income again so they do not end up in a worse financial crisis than they probably are already in. The government stimulus check is not even enough to cover the time off already. We need to get these people back to work as soon as possible. Please support Florida families and re-open Florida.

AMERICAN OVERSIGHT

Collier	Government	Dear Governor DeSantis, I am a resident of COLLIER County. It is time for Floridians to get back to work. Throughout the past weeks of COVID restrictions businesses deemed “essential” remained open. Floridians who patronized those businesses voluntarily engaged in social distancing, voluntarily followed CDC guidelines. With these businesses open, sometimes serving hundreds of people at a time, twelve hours a day, seven days a week, we have witnessed COVID numbers falling. The State of South Dakota never mandated a single business closed and are also seeing COVID numbers falling. Every business is essential when families are dependent upon that income for healthy and happy lives. I believe these facts prove that Floridians are responsible people, who love their neighbors, and will CHOOSE to do the right thing. But we need our elected representatives to do the right thing; we need our businesses open. We don’t want government handouts. We want to get back to work. We want our businesses open now, not later.
Pinellas	General	Follow the lead of scientists. Do not endanger people simply because businesses want to get back to making profits. We really need widespread testing so that we can trace infections; without that you're somewhat shooting in the dark. Make sure there is a sustained downturn in infections before taking risks.
Collier	Recreation	Re open the beaches and retail stores hair salons with distancing and masks
Duval	General	Please keep the state closed until Coronavirus numbers have significantly dwindled. Anything else is reckless.
Escambia	General	I live in northwest Florida. I do not believe that we meet the national government's criteria to enter phase 1 of reopening the state. I feel that we need to wait another 2-4 weeks to evaluate if the curve is truly flattening.
Polk	General	Do not open until it’s safe. Follow Disney’s lead. When they open I will believe it is safe.
Miami-Dade	Healthcare	When we re-open please keep order for public masks in public areas. Make public distancing mandatory in public spaces and limit restaurants and bars to 50 % for now. Please re open doctors offices and help them get PPEs also get test for antibodies to all dental and medical offices.

AMERICAN OVERSIGHT

Alachua	Education	I think we should stay at home until June 14. This is the assumption of the IHME model, which is the most optimistic models of the six major models that I have reviewed. The IHME states "After June 14, 2020, relaxing social distancing may be possible with containment strategies that include testing, contact tracing, isolation, and limiting gathering size." But most importantly of all, I think that everyone should wear masks when we re-open. Why are masks so important? Because we don't want to risk a reversion to exponential community spread. We know that this virus spreads very effectively in the air and on surfaces. But we also know that even poor masks cut transmission by 50% and stop you from touching your face so you won't get infected by touching surfaces. This is huge. By wearing masks after we re-open, we can knock the Rt down to a very low level so that the community spread dies out and the virus goes away! That is what happened to SARS and MERS, and it could happen with this virus, too. The thing that will stop the financial crisis is getting the virus under control. We may get a vaccine against COVID one day, but we cannot stay in lockdown until that happens. We should be doing everything to stop community spread, and we can do it. The Rt in Florida is already less than 1. The virus spread is already slowing. Wearing masks will help it to stop cold! So in conclusion, I support re-opening the state in June if we wear masks. I think this will let the state of Florida get safely back to business.
Walton	General	We have learned a lot in the last several weeks and will continue to learn more each week. We have stopped an over satuation of our hospitals. We must diligently begin to get our communities functional again, protect the elderly and clinically ill, our society has got to begin to operate again for the sake of the American people.
Bay	Tourism	I am ready for Florida to reopen and the economy to come back! I am ready for our theme parks and all park attractions to open. I am not for the employees and cast members of Disney, Universal, etc. to wear masks and gloves; we are not a third world country and do not need to start looking like one and that defeats the whole purpose of the theme parks. However am for more sanitation and cleaner parks. Possible hand sanitizer stations at each attraction in the parks, every other seats in the attractions, less attendance in the parks. I have always thought they should be having limited capacity in all parks it would be less wait times in lines. Please do not let the owners make the cast members of Disney or employees of Universal, Busch Garden, Sea World, etc wear masks and gloves. Also please have these parks open sooner rather than later.

AMERICAN OVERSIGHT

Bay	Tourism	Hello, my name is Tate Gaines and I own a rental property here in FL. I'm quite frustrated with the ban on vacation rental while hotels are still available. It is hurting many small businesses that rent, and it is hurting the local economy. The beaches are quite literally the best place to stay away from others. People naturally find their own space on the beach. Laying out not being allowed is a bit counter-intuitive as well. The sunlight strengthens your immune system, people typically are spaced out, and there's practically unlimited acreage on the beaches. The numbers are not justifying the shutdown. The mortality rate is far too low to justify costing millions of people their jobs, homes, sanity, and vacations. Unfortunately, people in our country fall ill and pass away every day. This sickness is another flu and fact of life. More people are dying every year from car wrecks, alcoholism, and diabetes, but I have not seen bans on cars, beer, or spoons. We have to be cautious, but I have a right to use my property the way I see fit. The federal, state, and local governments are directly responsible for targeting my business for shutdown. It is unjust. If I cannot rent my condo, neither should Holiday Inn. It's ridiculous. Please reopen the state of Florida. The government has taken my income, my ability to go to church, and my ability to do as I please. Those are rights that shall not be infringed. The longer this goes on, the more unrest will be on the government's shoulders. Unless I start receiving loss of rents directly from the State, a reopen is the only Constitutional path (of course you'd tax for that too I'm sure)...
Duval	General	Hello, Please do not reopen the state until its truly safe. I'm very concerned about the economy, but more worried about getting the virus. I'm 42 and have two autoimmune diseases. My spouse is 34 and has one too. We both are employees of the state in Education. If forced to go back too soon it will negatively impact my already fragile mental health. Thank you, Dr. Elizabeth Gregg
Sarasota	General	I really understand the need for people to make a living, I have been affected just like most. I have stayed working and being a manager of an auto service center I can tell you first thing there are way too many people coming and going from our cities. First hand interactions with people from New York who do not care about who or what is happening.. our laws and boundaries are not being respected
Polk	General	Yes reopen Florida thevones that want to stay home can lets get back to somewhat normal these kids cant be trapped for ever no parks no school no sports activities these kids have already lost so much not to mention brithdays that have past they can't celebrate with family and friends so yes reopen Florida please enough is enough
Hernando	General	I think we should wait a little longer to re-open Florida because I think more people will get infected if we open up to soon. I think we have to be patient and not rush things. It is possible that the number of infected people can go down if we keep practising social distancing. I think its really important to keep social distancing so that we can go back to normal as soon as possible.

AMERICAN OVERSIGHT

Alachua	Healthcare	I am an ICU nurse working on the front lines. All I ask is that you allow gyms to reopen. It is my personal best outlet for stress relief and have not been the same since the stay at home order.
Indian River	Education	It is much too early to open any establishments. Please maintain that you ate to travel only for essentials. There are too many people who have not been tested and we do not have adequate information in regard to who does and who does not have this virus. Thank you for inquiring about my opinion.
Orange	General	Restrictions on businesses must be lifted immediately. People who are in higher risk categories can continue to self isolate for their protection, but the death rate is small and NOT worth the widespread pain caused by economic shut down. People need to have the freedom to earn a living and support their families. Bankruptcies of businesses, individuals, and municipalities are going to be catastrophic if we do not reopen very soon. The government tax revenue will plummet. The death rate is proving to be much lower than originally reported. Do what is right, not what is politically popular. Open NOW.
Broward	General	You must open up our county for the 1st step back to normalcy! We require freedom of movement especially in outdoor spaces. Parks, golf courses and beaches. People have become claustrophobic while being closed in their homes, my only time out is for food/ supplies and meds. Yes we must all wear masks and maintain social distance but we must regain our freedom of choice to live our lives. I feel like I am on house arrest without the ankle monitor. We must be able to return to work in order to keep our mental health and keep our families strong. Stores must reopen and people to feel like they have begun to live again and our economy to start back on our feet again. If course I will always have some anxiety being out of the house but not enough to keep me from living life again. People can choose whatever they feel is right for them!
Collier	Recreation	Open up the state of Florida everywhere!!! This is insane
Broward	General	In order to safely re-open Florida, we need free mass testing (for COVID) for all Floridians. This should be done at multiple sites, in every city, and needs to be done ASAP. Also, we will need to be able to re-test all Floridians 2-3 weeks after their initial tests. Also another option would be mass testing of Floridians for antibodies. Mass testing is our best way out of this. Florida also needs to make/obtain/buy more PPE for our first responders, and FL must also protect these items from theft by the Fed. Government. Lastly, FL needs to make/obtain/buy more ventilators, and to also make additional beds, so that the Healthcare system can handle the influx of patients that could arise once we re-open the state. While open, businesses and locations will still have to follow social-distancing policies for people, while they are indoors.
Okaloosa	General	I think small businesses should be allowed to open. The business owners are capable of following the social distancing, use of masks for employees and gloves. This on-going shut down will cause these same businesses to permanently close their doors. I already know of one business in Crestview that won't be able to reopen.

AMERICAN OVERSIGHT

Lee	General	I believe we need mass testing in order to safely reopen the state. In Lee county I have not been informed of public testing areas. Drive thru testing, at home testing, and other forms of mass testing should be implemented to be able to reopen safely. I do understand the hardships people are going through at the moment from not being able to work or their businesses being shut down. I value lives of individuals equally regardless of race, color, religion, ect. Many of the "essential" workers have been of minority demographic and has put them in the frontline unfairly without any support. We cannot forget about the men and women that keep the state functional. It will be a slap in their face to have been put in risk just for everyone to be put in risk without the necessary data to reopen safely.I believe the reopening at the moment is not in the best interest of the general public.
Brevard	General	Please do not open state in this stage. We have spent almost 2 months to flatten the curve and we should not take risk to open the state! Life is more important than everything else!
Orange	Tourism	I would like Florida to be Reopened as soon as possible because I would to get back to work. And reopen Universal.
Broward	Healthcare	I recommend healthcare for all our citizens
Duval	General	I dont thing is save to re-open florida yet. It is a risk to the community. People are not aware of how bad this covid 19 is. I have lost 3 family members and I wish I could do something different to have them back. Please, please..dont do this yet...
Bay	Professional Services	I am a cosmetologist and deal with people all day long. Alot of times they are not honest in if they are sick.i do have to be cautious as my husband is in the high risk category as well. I do hair and am not a nurse to where I should have to take Temps and wear PPE to do a haircut. I do not mind a face mask and of course extra sanitation, which of course I am very familiar with. I feel that re-opening our industry too soon will create confusion and lack of customer confidence, if we are in PPE, which should be saved for nurses and doctors. I am ready to return to work and especially my bank account is ready for me to return to work. Please just do it in a timely manner. Thank you for your time, Laurie Vowell
Collier	Recreation	For the upcoming phase: Collier County beaches should re-open to Collier County residents only vía beach parking pass or showing Collier county license. During the te-open phase Beaches should be opened for walking/ jogging only checkpoints are met. Observing social distance during this time until everything else is lifted.

AMERICAN OVERSIGHT

Orange	Recreation	This shutdown is putting too many small businesses in jeopardy of loosing their livelihood. My company has been in business since 1986 leasing amusement machines to bars and restaurants. You closed all bars on March 17th, shutting them down with no income, no way to make a living. In turn, you shut down my business and in turn affected the industry that supplies us with equipment. Many of these bars and restaurants applied for the assistance package and have not received any help. These business will not be able to reopen if this continues. With the number of cases per population this is no longer about making sure the hospitals don't get overwhelmed - that has not been the case. Let these people open back up and let the citizens - we are functioning adults - decide whether to go out or not. The data is now showing that this is no longer about the dire threat it was immediately thought to be.
Hillsborough	Healthcare	It would be insane to reopen this state right now. The numbers are slowing because social distancing is working. Opening now would kill us all.
Sarasota	Administrative	There is something fundamentally wrong with a state that is unable or unwilling to pay unemployment benefits in a timely fashion to eligible applicants-especially during a pandemic. Shame on all of you!
St. Johns	General	Please open Florida! There is a lot of anxiety about resuming business, and so much anger about continued regulations. I believe people have forgotten that social distancing was to slow the spread while we put medical infrastructure in place. It has worked. We aren't in a position where we are choosing who is living and who is dying. Our testing procedures have gotten better. We've increased our ventilator count. We are getting a better handle on PPE supplies. A vaccine is a long way off. At some point, people have to be systematically exposed to begin the building of (hopeful) herd immunity. We will likely begin to experience a real increase in cases after reopening. If we open in a controlled and calculated way, we can allow the medical community to continue to respond appropriately. WE WERE NEVER GOING TO SOCIAL DISTANCE THIS THING INTO NONEXISTENCE. People need to proceed as their health, wallet, and conscience allows. I'm ready to see restaurants open up on a social distancing basis. I'm ready to see hair salons open up as these people aren't making an income right now. One thing I'd like you and your committee to address are kids and gradual release to a "normalcy." This is something that hasn't been discussed and is an oversight on our community. I'm not really talking about preschoolers or elementary age children. I'm speaking more on middle and high school aged children. This group is used to independently playing with friends (as opposed to play dates at younger ages coordinated by parents) as well as organized sports. They haven't had these opportunities over the last 6 weeks. I'm seeing teenagers slip into gaining weight as well as depression for lack of being with their friends and "moving." I'd love to see you add a pediatrician to your advisory team. And give some guidelines such as exercising together. I realize the beaches were opened and people were told to go and exercise but social distance. What about kids ages 11 to 18? Can they go to a basketball court and shot hoops with friends — they could social distance but they all would be touching the same ball. What about going to the beach and throwing a football back and forth — they would be more than 6

AMERICAN OVERSIGHT

Miami-Dade	Retail	Retail stores should have a limited amount of shoppers with a line outside spaces out and controlled by employees. Shoppers and employees would wear masks. Personal services salons and barbers should be appointment only no customers in the waiting area. This way the salon can wipe and sanitize between customers. Also everyone wearing masks and employees gloves.
Duval	Professional Services	Sooner than later please!
Broward	Government	RE: COVID19 in Palm Beach, Broward and Dade Counties Please extend the shelter in place order for South Florida until two weeks after the curve flattened and more widespread testing, including antibody testing is available. . The dense population makes opening too soon a danger in terms of the disease rapidly spreading. The high number of those experiencing homelessness in urban areas is a problem in that they have no where to isolate if they get sick and the places where they congregate could become disease vectors. The risk to and from this population needs to be addressed. Thank you for the opportunity to comment.
Pinellas	Healthcare	As a healthcare provider in Pinellas County I believe it is too soon to open up the city. The testing in this area has been limited and working in skilled Nursing homes and assisted living facilities I believe there are many more positive cases then we are aware of. It would be tragic to have quarantined for this long to you have a surge and our numbers and have to go back to where wee are now. Sadly there are many people not taking this virus seriously in our community and I believe by opening the city at this time would put us back to square one
Hillsborough	General	As a medical social worker, I ask that you strongly consider NOT lifting restrictions until at least June 1, and do it gradually once you do. I understand the need to maintain social distancing, as does my 5 yr old; however, rushing to lift all restrictions will place great strain on our healthcare system, mental health, and the community as a whole. This has been the most anxiety provoking time during my career, and I hope consideration is given to those of us in the medical field, working inside of a hospital.
Palm Beach	General	Seriously? Do not open! Test, test ,test!
Miami-Dade	Recreation	Can we please get some outdoor space open here in Miami Beach? Parks , golf courses and other areas where it is relatively simple to maintain social distancing? Hold off on beaches where it would be difficult to enforce. Our local politicians just keep presenting “plans”, but no action. Let’s open up a little and see what happens! If it goes bad, shut it back down. They can’t keep “planning” for every single hypothetical reaction to opening a golf course or a park. Open up, monitor and react appropriately. They’re making it more complicated then needs be. Parks and golf courses are open all over the country except here in Southeast Florida, it’s ridiculous.

AMERICAN OVERSIGHT

Alachua	General	First - Schools need to be reopened ASAP. They should never have been closed to begin with. Second - Face masks are not necessary for the general public and should not be mandatory. Third - Businesses should be allowed to reopen. Business owners are smart enough to realize they need to provide clean sanitary conditions for their customers. Restaurants should be allowed to open at full capacity. Their business model was not designed to operate at half capacity! Individuals have the right, responsibility, to make decisions about what they feel comfortable with. If an individual does not feel comfortable about going out in public without a face mask, they should wear one. If an individual feels they need to stay inside longer, they are able to. Bottom line - We are the United States of America. We are a Constitutional Republic NOT a Police State!!!!! IGNORE THE PANIC AND RELY ON FACTS. Dr. Scott Atlas
Leon	Government	Please do not reopen Florida until it is safe to do so. I understand that businesses are suffering but saving lives should be first and foremost. There are companies that have the ability to allow workers to work from home. I feel that workers who can do so should be allowed to continue to work from home at least to the end of the year to slow the spread. If Florida opens back up I personally will not be patronizing businesses that aren't essential until I see that the numbers have significantly dropped. As of right now, they aren't testing properly. They are turning people away. Please to do what's right in order to save lives.
Sarasota	Information	I am highly against the state opening up to fast
Palm Beach	Healthcare	Please allow elective surgeries to resume. The healthcare industry knows how to protect others well enough to allow people who need the care Reimer the services. Hospitals are facing financial ruin if not allowed to resume by May. Thank you Gale McNeill
Duval	General	Please just open the whole state. Everything. No masks, because obviously they don't work. Just tell everybody to be as cautionary as they would during flu season. That's it. And if people feel like staying home they can. Don't punish everyone else for those that are scared or high risk
Santa Rosa	General	We are nowhere near ready to re-open. Doing so only asks for a resurgence of this horrible virus. It was stupid to close beaches to local people meaning those of us who actually live in the town where the beach is located , as we do not go to the beach in large groups and should have been getting sunshine. The reopening of our beaches now have made it where locals who live near the beach probably won't be able to enjoy it because the limited hours and limited areas to park. Everyone from our county will come to our beaches when traffic without restrictions to the beach is already a nightmare. Whoever came up with this brilliant plan is obviously not a local who uses the public beach. Escambia County barely closed for anything and as you can see their numbers are much higher in comparison to Santa Rosa, Okaloosa, or Walton Counties. If I wanted to shop , I could just venture over to Pensacola taking my chances . Opening things up only encourages everyone to go all over. I sure as heck do not wish to return to work if I have to wear a mask! It's way too hot and hard to breathe. Open things up when it's no longer needed!

AMERICAN OVERSIGHT

Polk	General	Constitutional Rights - Life, Liberty, and the Pursuit of Happiness (not to mention all the rights conferred in the Bill of Rights) I am ASHAMED to see how many government leaders and citizens who have fallen so easily into socialist practices rather than preserving individual freedom and personal responsibility. “Why do I have to stay home just because you are scared? How about you stay home.... you stay in your house indefinitely, you wear a mask, you socially distance yourself from me, you avoid restaurants, you avoid baseball games, you stay off the roads, you avoid malls and beaches and parks, you believe the made-up death numbers, you believe the media hype, you Get your toxic vaccine while avoiding vitamin C, sunshine and the things God gave us to actually heal. I'm no longer willing to stay locked in my house just to cater to you because you are scared. I'm not afraid of you or others. You are not my enemy and if I get sick, it's not because of you, it's because of me and my system, which not only have I been addressing for quite some time, but if I get sick and die, I'd rather you die living my life than die cowering in fear missing out on life. This virus (or whatever it is) is already circulating. Millions of people have already encountered it, as it's been circulating around the world probably since last September. You WILL have to confront this thing, if you haven't already. There is no way around it, unless you lock yourself up in your house and it somehow doesn't manage to hop on some mail or some groceries that you ordered online. YOUR fear is not an excuse to destroy America. YOUR fear is not my fear and your fear does not have the right to interfere with my life, my job, my income or my future as a free American citizen. AMERICAN OVERSIGHT

Duval	Tourism	Just open up the state. Enough is enough. We do not close down for Flu, we did not close down for the swine flu, and should never have destroyed the economy for this. The president is taking bad advice from 2 deep state hacks. And I truely believe bankrupting the state of Florida before the next election is what they are hoping for. People have the right to make decisions for themselves. Let business open - including the theme parks. The number of people who have died from this do not warrant this lockdown. And even after the lockdown back not one death was traced back to the beaches or our theme parks. The only death was a man who went to the theme parks after getting it somewhere prior to coming to FL. This was never about our health and saftey. This was about control and seeing how much people will take. And have you given any thought to Hurricane season? If we don't open back up just where are people to go when you order evacuations? And how much longer do you think people can survive being out of work? - When the State shuts down millions of private businesses but doesn't lay off a single government employee, it's not about your health. -When the State tells you it's safe to go to Home Depot to buy a sponge but dangerous to go and buy a flower, it's not about your health. - When the State bans dentists because its unsafe, but deems an abortion visit is safe, it's not about your health. - When the State decides WWE is allowed to film, playing golf in groups is allowed but you cannot sit on the beach because it's dangerous, it's not about your health. - When the State tells you it's dangerous to go et your hair or nails done, but the Governor or congress mambers can get their stage make-up done, and hair done for 5 TV appearances a week, it's not about your health. - When the state puts you IN a jail cell for walking in a park with your child because it's too dangerous but lets criminals OUT of jail cells for their health- It's not about YOUR health!
Pinellas	General	The Covid-19 got here by plane. Tests have to be available to check all tourists I do not know if I am infected by virus, no symptoms , but maybe a carrier. We need to find out who is and who's not affected. Only takes one to start a blaze.
Lee	Healthcare	I think it is time to allow non-essential surgeries, appointments and medical tests. Each hospital or medical office should be able to decide what is allowed. Non-essential surgeries , etc van be very essential to the patient his or her self.
Brevard	Professional Services	Opening now Nesecito trabajar ya soy barbero
Osceola	General	I have COPD and feel that the state should not reopen until health officials say that it's safe to do so. I also feel that you should make wearing a face mask mandatory across the state with some sort of fine for those who don't. This will help keep me and others who suffer from immune disease's safe.

AMERICAN OVERSIGHT

Sarasota	General	Dear Governor De Santis, I'm a concerned citizen from Sarasota. I deeply appreciate your efforts to protect our state during this time of crisis decision making. Attached please find an article written by a physician who was a professor of global health at Harvard Medical School and the Harvard School of Public Health. His life work has been to fight pandemics. Dr. Kim presents a clear 5-point plan which may be of help and support as you go forward. How could this model be adapted for Florida? With gratitude and well wishes, Rachel Schaeffer
Lee	General	When the Jacksonville beaches were opened, we saw on the news everyone swarming the beach. no protection at all. I was wondering , which one of these people are infected?,weather they know it or not. how many people did they come in contact with? now how many people are going home infected and not know it? how many people will they com in contact with. All for a day at the beach. now they are opening more beaches and dog parks. are we really that immune to this? yes we can use the disclaimer of social distancing. They couldnt even control the stay at home order. now lets turn everyone loose. Lets watch destroy more lives. thank you No Response Needed
Hernando	Healthcare	Dental hygienists work less than 2 feet from their patients, not enough to provide the 6 feet required for social distancing. Our ultrasonic instruments and polishers generate aerosols. Saliva can be carried out of their mouth and linger in the air for up to 17 hours, according to some scientific studies. This means that if a patient has COVID 19 and is asymptomatic, their saliva droplets could infect the staff and patients walking through the office. Additionally, we do not have the proper PPE to provide our services. My office has only 20 N95 masks left and we cannot get them. OSHA recommends the N95 masks for treatment. I uderstand the need for dental professionals to get back to work and we have been providing emergency servies at this time, but our health, and the health of our families and patients should take precedence over the profits. Until we have solid scientific evidence about proper PPE, we demand that elective procedures be postponed. We have the greatest risk of any profession due to the close proximity in which we work and aerosol generation. Thank you for your time.
Pinellas	General	The state should not reopen u til we have gone a minimum of three weeks with no new cases of the corona virus, And the cdc have given their approval. I would not feel safe with anything less .

AMERICAN OVERSIGHT

Broward	General	While I am one that is so ready to get back to a normal life, I have kids and cannot risk theirs or mine or my husbands life. The experts are saying we need to not open up until mid June and I am with that. I have high risk parents and in-laws and would not want something bad to happen to any of them because our state is being careless with opening because all they see is dollar signs. While I get people need to get back to work to help our economy, it would not be good if we open things to early and this thing returns in August. That means this whole nightmare of being laid off and unemployment issues starting all over again. PLEASE, PLEASE, PLEASE think about the people and their well being first!!
Miami-Dade	General	It is my personal opinion, Miami-Dade County is NOT ready to open. We should open when the daily number of new cases is ZERO "0". Though many executive orders have been implented one being "Shelter-at-home",at first many people were complying. But now, people have gotten antsy and since there are no penalties enforced they are NOW going out on the streets. Some do abide of wearing masks, but many others do not. I have been out to the doctors and to the vets, and seen the great number of cars on our streets, especially in Hialeah. As I told a gentleman in the parking lot, that he should cover his nose, his response in a nasty tome "I can't cover my nose, I can't breath"! My opinion is, he then should not be out of his house! Maybe the National Guards need to be sent to Miami-Dade County to assist the police with implementing the "Shelter at home",, "Mask must be worn", only "Essential business to be opened", etc. There are TOO many people not complying and putting those that are at risk. Most important, our first responders and all medical staff need sufficient PPE to protect themselves and their families.. Attached is a picture I took on Thursday, April 23, 2020 at around 6:20 PM, I was returning from taking my housekeeper to her house. PLEASE DO NOT OPEN Miami-Dade County, it's not ready! Visit Miami-Dade County, unannouced and without the entourage and see for yourself. Thank you for your hard work. Congratulations of your new family member and Stay safe!
Escambia	Professional Services	Please, Please, Please re-open HAIR SALONS AND BARBER SHOPS. My wife and I feel these should have been classified as essential businesses to begin with. I really need a haircut and my wife, who usually has her hair washed and styled each week, has now gone over a month without having her hair washed of styled. Because of problems with her rotator cuffs, she cannot do anything with her hair by herself. PLEASE RE-OPEN HAIR SALONS AND BARBER SHOPS.
Broward	Food	We should start phase 1 no later than May 1st. All these huge retail boxes are letting customers in with ppe and social distancing and the spread has slowed down: my family and myself have owned and operated a small business in Coral Springs since 1993. (El mariachi restaurant). We should be open like every other essential retail box. With proper guide lines. We can seat a lower % occupancy and build our way up. But we need to get back on our feet and walking again. Thank you for your time. Marko Molano
Lake	Accommodation	Please reopen our state May 1.

AMERICAN OVERSIGHT

Hillsborough	Education	Please reopen in small phases Consult with the scientific community Keep social distancing guidelines Ensure testing is fast and get results in minutes Enforce facemask when in public Have a plan if the spread increases again
Leon	General	Do not force people with chronic underlying conditions to return to the workplace and potentially expose themselves. Please continue to give everyone the option to telework and attend school virtually until there is a successful vaccine that is available to EVERYONE. People should be allowed to make their own choice instead of being forced into an unsafe situation.
Walton	Government	Do not reopen Florida now. The number of COVID 19 cases is too high and still growing. If a surge follows a premature opening, it will be a horrible situation that will push the timeline even further into the future. I know you are under trememdous political and economic pressure to reopen. I strongly urge you to do the right thing and delay reopening until the case is clear for a safe reentry. Thanks.
Duval	Professional Services	OPEN FLORIDA
Orange	Government	I cannot see a reason to re-open the Florida economy without scientific backing for it. So far there has not been any statement by the CDC that groups of people are able to congregate together. I do not think it is wose to reopen Florida for business.
St. Lucie	Real Estate	The Morbidity and Mortality of Covid-19 is less than Influenza a and b. Destroying the economy was said to be to accomplish "flattening the curve". Closing beaches and state parks is no danger to healthcare capacity. Many studies show ultraviolet light and fresh air/sunlight (natural vitamin D) Have a detrimental effct on coroniaviruses. Further Executive Orders demanding people stay home is far more disastrous to most people than exposure to a virus. The virus likely will not disappear next week, but we need to get back to work. Further, when serology testing for antibodies can be performed on a large scale, it will show that massive numbers in the population have been exposed and have antibodies thus providing immunity. Now is not the time for political pandering! Please open up Florida and let our economy get back to business. Finally, orders to disallow vacation rentals in Florida serve no useful purpose other then to segregate and discriminate against small independent business people while allowing hotels to proceed business as usual. None of the nationwide shut downs make any sense. Our hospital have plenty of capacity. Open up our state!!! Thank you.
Manatee	Professional Services	Please consider opening hair salons and hair salon suites . I have been denied unemployment,PPP and SBA. You can’t expect people to lose their homes and businesses, and also not help them . It’s not right . We should be allowed to work .

AMERICAN OVERSIGHT

Palm Beach	General	I have a Dog day care and grooming salon. We plan to re-open on 5-1. We have limited contact with humans and most of the time we spend with animals. My girls would love to be paid and the only way I can do that is putting them back to work. Unless we can return to work, then the business can not continue. Please, tell everyone that grooming salon's are able to work again. Thank you. (5 less people on unemployment)
Pinellas	General	There is no possible safe way to reopen Florida until there is wide spread testing and tracking of the coronavirus. Any opening of Florida prior to this will result in more cases and more deaths. Do NOT open the state until wide spread testing is available.
Hillsborough	General	Time to re-open the economy. Safeties should be put in place to protect our Senior population, as they are the one's most at risk. Aside from that the rest of us will be able to endure whatever comes our way. Best way to beat this is through herd immunity. Remember when you were a kid and one of your friend's had chickenpox or the measles? What did you parents do -- they threw a party to get the other kids exposed - that was the best and fastest way to build up one's immune system. Same principle here - most have probably already been exposed and survived - although that to continue so that we can get back to a normal way of life. Thank you.
Okaloosa	General	I believe that we need to get the state opened back up. However, I am not comfortable with opening until more testing sites are opened up around our state and there is antibody testing taking place. Right now, I believe the risk is too great. I live in the panhandle and every day there are more cases confirmed, as it is the case with the majority of our state. I am leaving nging for some normalcy again. However, I am pregnant right now and I also take care of my elderly parents. We should open up in a slow and methodical way to ensure that we continue to flatten the curve.
Hillsborough	General	Only open the state when the people making the decision to reopen everything are ready to stand in the masses and feel safe enough to trust they are not at risk of exposure to the virus.
Collier	Real Estate	Please reopen the state with proper precautions. The sooner the better for all Floridians 👍
Nassau	General	I understand that there is great suffering due to the shutdown. However, I cannot be convinced that opening the state for commerce will make things better. We are nowhere near where we need to be in testing for Covid 19, so we do not know where and how many cases we have in Florida. Until we know, I do not want the state opened. Then we need to do contact tracing and follow up on people who are sick with the virus, to be sure they do not infect their whole family and that they get the medical care they need. That is the absolute requirement for me to be ready to open the state again.
Orange	Food	As a restaurant server working at Topgolf, a huge destination for both tourists and locals, it would be incredibly irresponsible to reopen the state as of now. While I cannot wait to get back to work this virus is still not under enough control to reopen the public. Peoples lives are worth more than the economy. I shouldn't have to choose between my health and money living in the United States of America. We need more time!!

AMERICAN OVERSIGHT

Miami-Dade	General	Follow the Law and not a recommendation or guidelines. Even the U.S. President doesn't follow the recommendation to wear a mask or follow social distancing guidelines sometimes. None of them are exposed, so they don't need to follow the recommendation or guidelines. You cannot deprive someone who is not contagious of their rights and liberty under the U.S. and Florida Constitution. Florida Statutes 381.00315 gives the State Health Officer the authority to declare a public health emergency. The State Health Officer, upon declaration of a public health emergency, may take actions that are necessary to protect the public health. The U.S. President is ready to blame everything on the state governors if something bad happens with the reopening like he did with the Georgia Governor. The Florida governor needs to hand over the public health emergency to the State Health Officer. The State Health Officer is the escape goat. The State Health Officer should be the one issuing the orders. The declaration of public health emergency expires in 60 days and not 30 days. Ordering an individual to be examined, tested, vaccinated, treated, isolated, or quarantined for communicable diseases that have significant morbidity or mortality and present a severe danger to public health. Individuals who are unable or unwilling to be examined, tested, vaccinated, or treated for reasons of health, religion, or conscience may be subjected to isolation or quarantine. See Florida Statutes 381.00315(1)(c)4 The State of Florida, Counties, and local municipalities has not order mandatory testing of all individuals to subject them to isolation or quarantine under Florida Statutes 381.00315(1)(c)4. Social Distancing is part of the isolation separating the infected from the non-infected. You can only restrict the movement of theose who are believed to be exposed. Non-infected individuals who are not believed to be exposed have Constitution Rights to Liberty under
Sarasota	General	Our economy is suffering. The people are suffering. We will lose more lives during a shut down. Please think about EVERYONE. Those that need to should stay home and take necessary precautions but the rest of us should be able to return to life as normal.
Orange	Healthcare	As the wife of an immunologist and bone marrow transplant physician for AdventHealth, my concern is more for large shopping areas (malls), movie theaters, and restaurants. I feel like these businesses should be the last to open, along with the theme parks and should not occur until we really do see a 14-30 day consecutive decline of new cases. These are the areas where social distancing will be the most difficult and where I think there might be public anxiety over going into these establishments. I feel for Disney but realistically there is no way to social distance properly in that environment and with how many surfaces will be continually contaminated. I think limiting the capacity of restaurants will be problematic and who will be " policing" how many people are in each restaurant? The takeout and delivery option have been working well and should continue to be utilized until the threat of infection is very low. I think the best and most cost effective option for the restaurants is to hold off on opening until there are no limitations on capacity.

AMERICAN OVERSIGHT

Orange	Professional Services	Yes I do think florida should open back up, with precautions, slowly, and still it social distancing. But we need to start back, slowly get our lives back, people need to get back to work, our lifes are turning upside down from not having income.
Hillsborough	General	Please review the Florida model for re-opening found at https://restartnow.io/us/florida. It shows the economic cost of not re-opening, and also shows the covid-19 risk for each county. While I do believe we need to protect the State's most vulnerable, not opening the state has negative health consequences, too. Continued thanks goes to the Task Force and to Governor DeSantis for your intelligent work. Sincerely, Denise Cook
Palm Beach	Recreation	I read you are opening parks but not beaches. This is crazy. The sun's heat on the sand kills the virus. The beaches are not only safe, they are healthy as the virus is killed there. Please reconsider your plan and open the beaches first.
Hillsborough	General	Reopen florida asap! Enough of this socialism. The private sector will make the right decisions without govt interference. This unemployment and economic downturn is 100% govt created. Its absolutely disgusting the overreach and im sure there will be zero accountability.
Monroe	General	Please do your best to open the state as fast and safely as possible. Please take a look at spend some time focussing on the Keys. If we have to stay shut over another month the Keys will never be that same. So many of our loved local businesses will not be able to reopen. Our homeless population will become much higher. Suicide rate will increase. It will be really bad.
Hillsborough	General	people are not going to take the precautions needed to reopen just look around wherever you go then it speads even more and we are told to stay at home for an even longer period of time i see this everyday just look around we still do not know everything about this virus people are very selfish i always have to back away from people no matter where i go.
Hillsborough	General	I think Florida should give it a few more weeks maybe even a month. . Don’t hurry to open the state the lives are at stake. Better to be safe than sorry. The governor doesn’t have to stay in step with Trump. After all he wants to inject Lysol or bleach into the human body.
St. Lucie	General	Please re-open. We need to feed our family

AMERICAN OVERSIGHT

Orange	General	I believe people should be in charge of their own health and decisions. I do not agree with all of the restrictions. If people do not want to be around someone who might give them a germ of any sort then they should take their own precautions. The government does not provide everyone their healthcare, so why is government trying to control our health. This is a virus, new, yes, but it isn't going away. We will always have to deal with it. Are we going to continue to restrict human behavior for years to come? It is sad that people are dying. But people die every day, from all sorts of things; viruses included. I want to be able to work again. I want kids to learn properly. I want people to be able to work. I want to go to the beach. The entire population should not have to be quarantined because people don't want to get a virus. What are we going to do when the pennies we received from a stimulus check run out and we can no longer afford housing or food? Give people back their own personal responsibility. What about the people who have already had this? What about the people who likely had it before anyone was testing for it? I shouldn't have to wear a mask and be restricted as to where I can go.
Charlotte	General	I believe here in Charlotte county we have not hit our peak I don't think it has even started We are just starting to see an up tick. People here that Have been furloughed Who's employers were waiting for the SBA loan have now been called back to work when absolutely nothing has changed they're still sitting 2 feet away from each other with customers coming in the door it just seems way too soon Commercial job sites I believe also should be allowed to work but they need to enforce less people on a job site Going in any grocery store or wholesale store people waiting in line to get in to check out all right on top of each other they're letting less people in at a time but they don't have enough people at the register so you're lined up waiting to check out I really think we should open very slow with stronger rules Going Out on your boat with 10 people is definitely not social distancing unless you have a really large boat I do think you should be able to go out on the boat but with less people
Collier	Recreation	By allowing the beaches to reopen you are letting people that either do not understand the consequences of Covid 19 or do not care about them to spread the disease to the very high risk population of older people in the state. Not only is this irresponsible but it is highly inappropriate for something to be approved by the state. As a college student who had to see my peers go and ignore the states sanctions, things would only get worse if the beaches were to reopen.
Hillsborough	General	I am in favor of re-opening. I think high risk people should have the right to refuse to go back to work for their personal health concerns. I think hand sanitizer stations should be installed near any outdoor workout stations and parks with touch surface.

AMERICAN OVERSIGHT

Miami-Dade	Recreation	First of all. I would like to thank you for the work you have done during this crisis. To many of us in Florida the beach, surfing and boating is a way of life. I usually go surfing before and after work which is sometimes before the park technically opens. Many of us have been doing so for years and it never was a problem. I think beach access should be opened in South Florida for recreational activity. I believe we can follow the same social distancing guide lines that are in place up north.
Pinellas	Healthcare	When the pandemic was announced Florida's known COVID-19 cases were in the double digits. Despite all the closures and social distancing, we now have over 300,000 cases, over 1000 deaths, and only about 1 and a 1/2 percent of the population has even been tested. To reopen businesses now would be to recklessly endanger the lives of millions of residents, and the lives of our healthcare workers and first responders. If our federal government can find trillions for Wall Street they should be able to support the people in this time of unprecedented crisis, which has been exacerbated by an appalling lack of leadership, delay, inaction, finger-pointing, mixed messages and a refusal to adhere to experts' recommendations in an effort to placate a particularly dangerous group of voters. Don't open Death's Door in Florida! We have not flattened the curve! Not even close!
Orange	Government	I disagree with lifting the Stay at Home or Social distancing so soon. The spread is somewhat under control because of it. Isn't it possible, the state or Trump wants to remove it, so they don't have to pay Unemployment or aid?
Brevard	General	DISNEY RE-OPENING: 1) When they re-open Disney World, perhaps they could FIRST invite ONLY FLORIDA PASSHOLDERS? That way you know you have only Florida residents! 2) And perhaps they could INVITE PASSHOLDERS BY COUNTY ONLY? That way you could limit park occupancy each day. 3) Everyone should do the rides via FAST PASS ONLY - that way Disney can control how many show up for rides at one time.
Pasco	Food	OPEN FLORIDA! Let the businesses open and let people go to work!!!!
Brevard	General	It only makes sense for the state to establish rules for businesses like availability of sanitizer, social distancing, masks, and other PPE as needed. Businesses should be required to post bond, and police should respond to complaints. Businesses found guilty of violating the rules should be fined, made ineligible for federal or other supports and made liable for damages if customers later contract the virus regardless of other evidence.
Sumter	Healthcare	I strongly believe the stay at home should be extended to 5/31. No indoor entertainment, gyms or restaurants should open prior to 5/31

AMERICAN OVERSIGHT

Broward	Food	There is so much mis-information out there and conflicting. Get all the facts correct on a bullet point list. For example, does heat and humidity kill the virus, one outlet said so. Do we need to wipe all food pkgs, ice cream to corn, fda says no but Sanka Gupta gave a demonstration, what about rx bottles seen that too. Getting all the facts together would help with understanding and fear factor. I am a chef at very busy restaurant-independently owned, hoping week get our ppp soon to reopen, we have not heard of anyone receiving unemployment benefits so getting approved for the ppp will be huge for us. I would gladly demonstrate how we plan on starting up again and our plans laid out for business model. Whatever I can do to help, we have already laid out a rough draft of sanitation and planning. You need to lay out on tv as well make it very understood, all questions should be answered on tv, the "how to" open up and "how to" handle guests etc, it has to be laid out not a guessing game for restaurant/bar/club owners, again willing to help. Thank you for creating this, shows great leadership.
Seminole	Recreation	We must reopen the attractions ASAP. My family of six will attend opening day! The state treasury and the entire Florida economy depends on it. If Disney doesn't open until 2021 (like some rumors suggest) we will be looking at a depression. Further, we need an antibody test for the state of Florida with a large enough sample size to extrapolate the results to the entire population of the state. I believe that an antibody test will prove this virus to be much less lethal than originally thought.
Sarasota	General	My daughter is 17 with several autoimmune diseases and on immunosuppressants. I myself have diabetes and high blood pressure. Both my husband and son are essential workers. My daughter and I are staying at home but are still at risk due to my husband and son working. We have no other choice though. We are a low income family and need the money. People are packing grocery stores even with restrictions. If restrictions were lifted our risk would be even higher. People are also having parties in the woods out here near us. Many aren't taking it seriously enough now. If you open things too soon it will be even worse! My daughter sees many medical professionals. They all agree that things are moving too fast and they are afraid we will see a big surge that will hurt the economy and health care even more if we aren't a little more patient. Why aren't we listening to health experts more about reopening? Has anyone thought about hurricane season in FL? Even now it would be too dangerous to pack a bunch of people in a shelter. What will happen if there is a surge of infections and we happen to get a big hurricane? Many lives will be lost. Please do not open our state until it is safe enough. Please do not be the reason many die. My daughter could be one of your victims. Please think about human life above money and politics. I realize people need their jobs but human life should come first. In fact if the state opens and there is a surge my husband and son will have to leave their jobs to protect us. Please think about this.

AMERICAN OVERSIGHT

Pinellas	General	My wife and I are essential workers ; we both feel very strong about our State and the re-opening. We believe opening up the state could result in an increase of COVID-19 cases without proper testing , people with or without signs of COVID-19 should be tested at a higher rate in Larger / Hot Spot counties before the state decides to open. We understand the importance of getting the economy jump started but the health and safety of humans are also a high priority.
Miami-Dade	General	It's real simple. Make sure there's enough tests for everyone and that they are free to get.
Orange	General	Please, please wait until it's safe to reopen the businesses in this state. It will not help to take the lid off too early and unleash this virus, forcing the state to close down even tighter than now and even longer. We are not there yet. We need to have the number of cases and deaths to be diminishing over an extended period of time. We do not need more people to die. Opening too early will lead to more deaths.
Hillsborough	General	Until we can open, without fine print, don't bother. No one will listen. People think they're above the rules, above the law. Fix the unemployment system so people aren't stressed about having to stay home.
Pinellas	Healthcare	Please encourage people to go to their doctors and keep their office visits or arrange for those in need to have better access to telehealth. Patients are scared to go to hosptials and have heart attacks and other problems at home that will have long lasting health and financial consequences for our state. I would make a request that phase 1 reopen includes and encouragement for patients to keep their appointment with their doctors.
Miami-Dade	General	As much as I'd want to reopen everything, especially school being a senior this year, we can't.. it's not safe. There's going to be a second wave of corona virus and if we open up we're going to kill more people... we should just stay home until at least summer.
Orange	Government	I do not believe that we would be helping keep the spread down if we re-open the state too soon. I work for city of orlando government and think that what our mayor has done to keep us safe is working. The curfew and the stay at home order is making all of the difference. I honestly wish the curfew started earlier and that the grocery stores were only open for delivery services and curb side pick up.

AMERICAN OVERSIGHT

Alachua	Healthcare	I am a LMT living in Gainesville, Fl. I have been out of work for over a month now due to COVID-19. I imagine, like many other Massage Therapists, I have not received any unemployment benefits even though I applied as soon as I stopped working. I have been sent through countless loops that get me no where between dealing with an out of date, slow website and an automatic telephone message that has me put all of my information in and at the end just asks me to refer to the website (that is currently down) and ends the call. I understand that the idea of re-opening the state is a complex issue that involves many layers. Because of that I will direct my comments to what I feel is best for those in my line of work. With the cases continuing to rise in our state I find it unethical and morally wrong to ask Massage Therapists to go back to work. In our line of work it is impossible to maintain social distancing. During a session we spend 60-90 minutes in a room with the client, with direct contact with them, and breathing the same air. This goes totally against the safety guidelines of the CDC. As therapists we are taught to do no harm and that maintaining a safe space for our clients should be our number one priority. That is simply impossible during this time due to the pandemic. I WILL NOT continue providing massage therapy until I feel it is safe for my clients and myself. This would include a situation where, more rapid and frequent testing becomes available to everyone, the number of new cases starts to go down and continues to go down for a good amount of time, and/or more treatments become available so that the disease becomes less of a risk. Then, and only then, do I feel that it is safe for Massage Therapists to continue working. The State of Florida, to insure the safety of it's people, should 100% support therapists, and anyone else who feels that is is NOT SAFE for them to work, by providing them with unemployment benefits, plus the $600 a week that was promised in the Federal CARES ACT until their is SCIENTIFIC evidence that we are getting and handle on this virus and that it has become less of a threat. If the State of Florida decides to re-open AND cuts funding for unemployment benefits for Massage Therapists they will be backing us into a corner and asking us to choose between our financial stability (having a safe place to quarantine and food on the table) and the safety of ourselves and our clients. At the VERY least
Martin	General	Please open up the state by May 4th with social distancing measures In place. Then on May 15th fully open it. Let people know they can wear a mask, stay home if they feel the need to, etc, but for the rest of us healthy people who need to work and need our economy to survive we need Florida to open back up as soon as possible. I really have love the work you've done so far. Please don't buckle to the fear mongering. We k ow the numbers. We never should have shit down to begin with but we need to open back up. Parks and beaches all over the state should open immediately. We need to go outside as that is healthy and enjoy the sunshine. Please, peoples lives are being ruined over a Christmas that is typically in benign in the majority of the population.

AMERICAN OVERSIGHT

Miami-Dade	Education	I would highly suggest that you fix what your Republican predecessor spent over $70 million on to "fix" (yeah right) the unemployment website! This is a travesty to those that are in desperate need. This was fixed so that people could not apply. Stop kissing Trumps butt and do something for our State of Florida! You are a walking incompetent, ignorant disaster like all republicans! Miami-Dade, my county, has numbers rising! Start testing larger numbers and stop thinking about opening our state when it's not ready. DO YOUR DAMN JOB! Come election time, WE ARE VOTING YOU OUT! You left our beaches open and now you have opened them again. You want to open the state so that people will not be able to apply for unemployment! I am lucky enough not to need it, but there are people out there that are desperate not knowing how they are going to pay their bills! FIX THE SYSTEM!
Alachua	General	It is not yet time to do this, especially as cases continue to increase. I understand that this is hard for people, but putting lives at risk by opening restaurants, hair salons, theatre's as GA has done is foolhardy.
Hernando	Construction	I feel like we need to reopen. Businesses can't survive and the PPP funds aren't easy to get. Businesses should be allowed to reopen following guidelines. If people aren't comfortable going out, they they don't need to. They can stay home. Or make it mandatory for everyone in the state to wear masks when out. There are ways to do this while keeping public safety in mind. If we don't, one day the disease will be gone and so will most businesses.
Hillsborough	General	Reopen barbershops and salons. They are more diligent in keeping there businesses disinfected then grocery stores and big box businesses. If wrestling can be essential I would think the barbershops and salons are just as essential, if not more so.
Pinellas	Government	Liberty requires responsibility. I am responsible for myself and my own safety. I do not need or want your help in protecting my own safety. i am tired of your violations of the 1st and 14th amendents, along with article 2 of the Constitution and the right to travel. Leave the free citizens of this state alone.
Seminole	General	Please reopen the state. Families are struggling. The economic impact is going to be far greater than lives lost.
Miami-Dade	General	I am pro opening the cities in Florida . However restrictions & safety measures needs to be applied . The cities officials should monitor and take action immediately if Covid 19 cases spikes or the curve goes the wrong direction . Also they should advice the public on consequences for bad behavior and for not following any new guidelines impose by officials due to this pandemic. Hopefully the public will understand safety is for everyone . We do need good media coverage without the politics and both parties working together . Cause at the end we are all in this together .

AMERICAN OVERSIGHT

Sumter	Government	How to open Florida 100% today First disregard any input from CDC or DR Fauci, modeling does not prevent virus spread Next: 1- Mandate everyone going outside to have a face covering or get a $200 fine 2.- Allow any business to open providing - all employees have temperature taken when then clock in - Were a face covering - Facility is sanitized once around midday 3. Mandate all food service facilities wear masks and gloves in addition to 1 & 2 4. Reduce distance from 6 to 3 feet
Okaloosa	General	Not enough testing to reopen.
Bay	General	Annexation of the beach and denial of property rights without compensation by the counties is a violation of the 5th Amendment. The actions are unlawful and unenforceable. County commissioners and law enforcement need to be punished for the violation of civil and property rights.
Highlands	General	I think we need to re open , only if we play it smart. Once we open up people are going to flock like birds to every thing.... if we can't do this reopen safely then we need to keep it the way it is. Yes there are some people that won't to get back to work and have some short of normal life, but with out a cure or drug to help use then no mater what we do isn't going to help. We need to set guidelines in tact or more people are going to get this and we will just be back to where we are now. I say we need to limits stores Restaurants and businesses to Curfew etc. we don't have a plan yet for Restaurant in plays plus we don't know if once we open people are going to follow what's already in play.... so I say reopen only if you have a plan... if not stay closed until we get one that brings safety to Florida, businesses and schools.
Escambia	General	Hi, Please begin reopening all businesses. No reason to stay closed as we have flattened the curve.
Bay	Real Estate	Please open back up Vacation Rentals as soon as possible. Hotels have remained open the whole time but not vacation rentals. There are millions of vacation rentals in Florida who depend on rentals to pay mortgages and expenses as well as generate cash flow for the owners. I understand the original purpose to keep people from hot spots coming to Florida but we are in another phase now. Vacation Rentals are great places to social distance safely. These are condos or houses just like where people live and are already practicing safe social distancing. There is probably nothing that can be done to help start Florida returning to semi normal than opening up vacation rentals. Thank you.

AMERICAN OVERSIGHT

Pinellas	General	I beg of you to please reopen "non" essential businesses! All our stores (Salvation Army Family Stores) have been shut down due to the stay at home order. We are a non profit organization. All money made at the stores go directly to either the Adult Rehabilitation Service Centers,Shelters for the homeless,etc.. We need to get back to work not only for that but to make a living for ourselves. Living paycheck to paycheck most of us do not have any savings at all. We are struggling to make rent/mortgage, other bills,food,etc.. We just want to go back to our jobs. Thank-you.
Lee	Recreation	On recreation, I would like to see small condo association swimming pools open now. I feel it is too soon for beaches, restaurants, bars, salons, etc to open. Perhaps wait until the end of May. On healthcare, I would like to see elective surgeries resume now with guidelines.
Polk	General	Florida should remain on shut down with that strongly enforced. Reopening the state, which hasn't even been fully on lockdown, would increase the spread of the virus, making it difficult to control and increasing the demand out on healthcare professionals and facilities. The course of this virus is too unknown to put thousands and thousands of people at risk without a solid plan in place to manage it.
Broward	Healthcare	As much as the economy is hurting...DEAD PEOPLE do not complain...or vote for that matter Keep everthing closed until virus is under control...and we can test those with no symptoms, as well as know the tests are accurate...
Osceola	General	I believe the State should fully open, however continue constrictions for those who can and want to work from home can. Also, those who have vulnerability should not be punished at work.
Duval	Food	Please open the dining rooms in restaurants. I'm a mother of 4 been out of work since March 16th. I have not received any unemployment,stimulus or my tax return. I can't Return back to work until dining restrictions are lifted. I've gone through my savings I'm now broke with no money from government. The day I return to work I get money to bring home. This is drowning me for everyday that passes. Please allow me to choose to work Let people who want to stay home do so. Please help me from drowning financially
Pasco	Food	OPEN Florida! Let the businesses reopen and let people go back to work NOW!
Indian River	Healthcare	Being a licensed Optician in the state of Florida reopening to soon will be a disaster. Opticians work very close to our patients. Face to face about 12 inches for measurements and person to person touch for adjustments. I have a feeling seeing a spike in Civid 19 cases the last few days that we are looking at a few more weeks just to be safe. 6 feet apart is much easier then 6 feet under.....Thanks
Lee	General	I don't believe Florida should reopen until June. We've already sacrificed so much for the communities safety and if we make a preemptive return all that sacrifice will have been in vain.

AMERICAN OVERSIGHT

Polk	General	I think places where a lot of people gather (Disney, concerts, etc) should stay closed. Small businesses can open if they can accommodate the cdc guidelines. I think groups of more than 25 shouldn't gather. Masks and hand washing. Continued testing. Open testing to more people. All in all you are the governor and I respect and trust your leadership. What ever you decide I will respect. I am, as a teacher , glad you decided to keep schools closed even though it adds more work for online learning. I think it needs to be a slow reopening that takes the months of May, June, and July. Use these three months to slowly reopen places. If and o lot if it is safe we should reopen schools.
Seminole	General	It's too soon to reopen anything -- no one has a real handle on this disease, there's no treatment, and people are dying. Reopening too soon means that more people will die. The ONLY way to prevent that is to stay closed and stay home.
Pinellas	General	Being a retired resident of Tarpon Springs I would like to consider we totally understand the impact of this virus in respect to its reinfection rate , the fear of many is we haven't seen great reductions in numbers at a steady rate of decline . The unknown is are we going to test the workers who will have contact with the general public ? So we know we are safe? I know we all have our part in this but in my limited time out of the house I see too many young and old not taking the simple suggestions of the CDC such as wear mask serious or even maintaining 6 ft separation , I had to go to drug store to get a refill and the person refused to stay his distance or even have a mask on and at one point when I mention the importance of this his reply was if you don't like it leave ? This raises great concerns with me knowing that there are people who don't care Thank you for all your doing as I am sure we will prevail if everyone helps.
Pinellas	Food	Been out of work now 42 days, filed for unemployment over 5 weeks ago. Worst experience ever, from the nonworking website to not being able to get to talk to anyone. I have called the 1-800 number well over a thousand times during this and it never allows me to even be put on hold to talk to someone. Still waiting, as with most people I know from work. I did talk to someone who filed 2 weeks ago, and they are already getting checks???? I have never filed for unemployment in my life and have been putting into the system for over 30 years. Me and my family are in great need, as are other people. Who is being held accountable for this 77 million dollar website that does not work? When am I going to get the money owed to me? Once again, Florida is a complete embarrassment.
Brevard	General	Let's RE-open ASAP, while maintaining special measures to protect the elderly and infirm, and in our dense metropolitan areas. As we step into the summer months, let's not miss our opportunity to develop herd immunity. People will likely curtail their activities in large measure voluntarily out of fear. I say this as someone in his 50s with "co-morbidities": I am willing to risk my death from exposure to this virus rather than see millions of my fellow citizens lose their livelihoods and be consigned to poverty. God only knows if it's not already too late to undo the economic damage this rash and overly broad shutdown has caused.

AMERICAN OVERSIGHT

Orange	General	I'm against opening up Florida. We should wait until the rate of infected people show a very steady decline to low single digits and deaths should have stopped. Although on one hand I understand the overload problems w/CONNECT, it should have been fixed by now.
Duval	Healthcare	Although I understand the economic devastation that public health measures cause, quick relaxation of the present rules would lead to increased cases and deaths which actually would be more damaging. I am especially worried because of the lack of prudent measures individuals are taking when in essential establishments such as markets and drug stores. Although my family and I wear masks in public and keep apart, only about 50 percent of others seem to do so. Thus, it is imperative that education or policies address individual behaviors. We hear alot about testing as the major issue but testing without a much strengthened local public health structure for contact tracing and ways of enforcing quarantine and isolation is not preventative. Unfortunately the gains in florida PH made in the early 2000s has waned. Individuals need to be rapidly screened with valid and reliable testing and follow up so all no matter insurance status are helped to get proper treatment. Seropositive surveillance is important but am concerned re sensitivity and specificity. It is troubling that WHO cannot ensure that individuals can become immune after infection. Thus, am concerned that those who have had disease may not take protections. It goes without saying that certain facilities need extra help and surveillance. Until such time that PH infrastructure is in place, openings should be limited to somewhat essential businesses, many businesses have come up with great solutions and I hope those practices will continue. For example pets are dropped off for vet spots, telemedicine, curb side delivery, plexiglass sheet protectors, one way isles. WHY NOT MAKE A HANDBOOK OF BEST PRACTICES FOR EACH TYPE OF FACILITY. I am a believer in the use of masks but all must use them. How can the state ensure all have masks especially in the workplace.
Seminole	General	At this point even if state is opened up, we will still avoid most Dear Mr. Governor I understand your decision to close the state and I understand your apprehension to reopen. Over the last several weeks I have seen many people suffering from the effects of this shut down and the economic toll on our state. As we stand now I believe we can start to roll out a process of reopening. To start I think we should open Beaches and state parks to help with the mental stress of this crisis. I also think that there are businesses That have been closed that can be reopened while maintaining social distancing. This includes retail outlets and shopping centers. Thanks for you leadership, David Larrabee
St. Lucie	Food	Slow! There are still a lot of people out there that just don't get it

AMERICAN OVERSIGHT

Alachua	General	Dear Governor and Task Force, As a retired resident of Alachua County since 1966, I am begging you to begin opening up Florida and Alachua County for business. Every business is essential to the people who own that particular business. It is their livelihood. It is the livelihood of their employees. It is food on the table and a roof over their heads. I am shocked daily by the number of people who are devastated by the results of the lockdown. It is time to open up. Install proper safeguards. It is my choice to enter a business or not enter a business. I personally will wear a mask and if I walk in and there are too many people or people not staying the proper distance apart, I will walk out and not give my business to them. Please do not continue to destroy the lives of so many people who need to work. Thank you for allowing us to contact you. I have every confidence you will do the right thing for our State of Florida. Sincerely, Doreen Blake, resident of Florida since 1948
Hillsborough	General	Fix the unemployment first you dumb shit
Miami-Dade	Healthcare	We can not reopen the state until there is a vaccine. We can not reopen the state until there is herd immunity. We can not reopen the state until there is an effective treatment. Please do not reopen and put people at risk.
Broward	Finance	Even the President said that before we considered opening the state, we should have 14 days of declining cases. I do not want my health nor my family's health, nor my friend's health be made vulnerable because we choose not to listen to the medical community. Additionally, it is disrespectful to those overworked frontline workers by potentially increasing the spread of the virus because we end the stay-at-home early.

AMERICAN OVERSIGHT

Pasco	General	The mitigation strategy was effective to flatten the curve. This is what was asked of the citizens across the country, and Florida specifically. Time is up and we need to get back to business. Citizens' rights are being trampled on for the sake of safety, and yet we are still awaiting "approval" to resume life which is completely un-American. We don't need government to allow us to do anything. We are free people. With that said, thoae who CHOOSE to stay at home can do so as no one is forcing them to re-enter society. That is a CHOICE for individuals to make. Re-establish commerce, tourism, access to public places, etc. Those who want to resume life can do so safely under general guidelines, but no mandates apply, as again, we are free people. The media and hype around this virus has been catered to more than anything. Scientifically, we can do better in reporting ACTUAL deaths and cases. Increase testing as it becomes available, treat those affected appropriately, all while allowing the vast majority of Floridians to resume life. Data doesn't support any closures and never actually did in the big picture. I am happy to discuss this openly with anyone in the DeSantis administration or DOH. I am more than willing. Let's get going again. Enough of this insanity. Sincerely, Chris Minaca RN
Lee	General	The country should never have been closed down. The numbers do not warrant. The survival rate is 98%. I think Florida should set an example and yes they should continue stay at home for 70 years and older and people with compromised immune systems. But it should be their choice. Just like it should be peoples voice to reopen their businesses and peoples choice if they want to patron that business, because last time I checked we had freedom of choice in this country! This virus did not turn out to be as bad as first thought which is good news so it's time to open up the economy and put people back to work. There is more danger and more threats to keeping people unemployed it will ruin families, ruin the economy it will be killing people faster than this virous did. Treat it like the flu

AMERICAN OVERSIGHT

Seminole	Healthcare	I cannot stand the stay at home order. Like many, it seems surreal, I have been on healthcare over 25 years and although I can't stand it, it's so very necessary. I do understand the economy and the importance on opening it, I am a Christian and I also understand what Is written. It is written; the "yellow blood will prevail", I researched this and the New Testament states that China and Russia will control the world; but that leads to Christ coming back to earth. Then, as people disappear, the leaders will tell lies and never see the truth. To say that, human life is more precious than economy. You can do whatever you like, if you look yo scripture, everything Jesus said would take place, it has, in my opinion, put peoples life's first. This must be so very hard because we could experience famine and unthinkable conditions. I am someone that looks at both sides and I truly believe there is no wrong or right answer to this equation. I believe, you can't lose either way! Most respectfully, Pam Mathews
Pinellas	General	First, thank you for soliciting feedback from FL residents. I was pleasantly surprised to see our comments might be considered. I feel very strongly that we need to get moving on re-opening now. Social distancing has taken hold, folks get it about washing hands/not touching face and staying home when sick. We also now have a much better handle on protocols if you get sick, testing has been rampant and I think we all are much more informed now on what to do. The bottom line is, those who are immune compromised and/or just plain traumatized from the whole "stay away from everybody" movement will not be out in public anyway. PLEASE open the beaches. People will stay 6 feet apart and not congregate in groups. It really seems absurd to me the beaches, where we get fresh air, sun and exercise, is off limits. Also, please open all small businesses. It seems very unfair that big box stores have remained open and the only place to shop while the small business suffers. We really can't bear to watch them suffer any longer. These are our neighbors and friends and family who have been bearing the brunt of this epidemic. Thank you again for listening and considering everyone's opinion. Thank you to our Governor and staff for what has been done to help us thus far. May you all be well!
Miami-Dade	General	The reality is that as long as there is no Covid-19 vaccine we will have to learn to live with it and that represents how to sleep with the enemy, that is, we will always have to keep our eyes open until it disappears.

AMERICAN OVERSIGHT

Broward	General	i believe opening for lauderdale's and Broward's waterways to boaters would be very beneficial for the local economy AND sanity of the locals. allowing marinas and boat ramps to open with social distancing doesnt seem like a dangerous idea. movie theatres, bowling alleys etc where folks congregate inside, a bad idea. forcing workers back to work also a bad idea, especially indoors.
Okaloosa	Healthcare	We NEED to open up Florida NOW! How many residents have died from other causes than COVID19 during the shutdown because of life saving treatments being shut down and forbidden? How many health care workers have lost their jobs because the patient flow has been shut down? I personally began developing irregular heart beats, including episodes of fibrillation in December, and was being evaluated for cardiac ablation and possible pacemaker. During the shutdown my condition has worsened and my doctor wants to implant a loop monitor to be sure he does the right treatment. But this urgently needed procedure is categorized as "elective" rather than essential, so the cardiologist just had to add my name to his growing list of patients needing this and other urgent procedures. I guess I can get treatment if I live through a heart attack long enough to get to a hospital. I highly recommend the Dr Erickson COVID19 briefing on You Tube. As a former nurse and current cardiac patient I TOTALLY AGREE with everything he & his associate report. https://youtu.be/xfLVxx_IBLU
Orange	Government	I'm order to get back to a healthy economy faster, we need to continue to be safe and vigilant at present. It seems counterproductive, but we have historical proof that being safer now will bring more benefits sooner.
Volusia	Construction	Open our state back up. It's starting to effect our economy so bad in ways people have no idea how bad it's going to get. We are working right now. But the jobs are running out of money because the banks aren't lending any more money to the places we are building.
Sarasota	Professional Services	Open up the state! We stayed home for 30 days with no income. We need to get the economy started again. I am a hairstylist and do not qualify for unemployment because I rent a chair. That rent is still due even though I'm not working. You can instruct anyone who is at a higher risk to continue to stay home. We can all continue to wear masks and wash hands. Please open salons. Families cannot continue to stay home and not work! Thank you for giving us the chance to speak out.
Broward	Education	We need to get the kids back to school and the parents back to work ASAP. Please stop allowing the media to keep bullying you into keeping our state closed. Let us citizens decide if we want to take the risk and go eat in a restaurant or send out kids back to school. Open the state.
Miami-Dade	General	Please open businesses and the beach with understanding of social distancing and face covering where appropriate. Safer at home order for the elderly and the most vulnerable for several more weeks. Then re-evaluate and modify the orders according to the situation. Thank you for your hard work and consideration.

AMERICAN OVERSIGHT

Hillsborough	General	We need to reopen Florida ASAP. Small business owners are suffering, people are out of work and in jeopardy of losing their homes. I don't feel citizens are being told the truth about what is really going on. There is no reason the beaches can't reopen, people need fresh air and sunshine. Trust that citizens can act responsible and bring our ecomony back.
Palm Beach	Government	It is too early to reopen. Based on recommendations I have heard from both the CDC and WHO, it should be safe to reopen once there is no cases or deaths after a 14 day period. Even then. the possibility of the virus returning in the Fall should be of some concern even if it becomes safe to open up again.
Hillsborough	Education	Very concerned about how school will function this fall both as a parent and as a teacher. Teachers and students do not have PPE, cleaning supplies, or parental support. The schools are filthy unless they are cleaned by the teachers and students. It is impossible to social distance with the amount of students in classrooms and parents always send their kids to school sick. If we just open up schools as is, we will have massive outbreaks and even more closures in the long run. If we stagger days or implement a morning/evening schedule than many teachers will not be able to work because they will need child care. School needs to stay in a virtual platform. Teachers will work from home as well as at least 60% or more of students that can learn from home. The remaining students that need child care can go to school and virtually learn in a social distance set up with proctors or limited staff. Please consider this option.
Lake	General	Weddings should be allowed during this as long as everyone is careful that they are not having anyone attending that is sick. In my case I have 50 people who are family members only. Nobody would be attending if they were sick. My wedding got cancelled for May 2'nd and is now still up in the air for May 16'th. We have been together 12 years and this is beyond frustrating. Vendors are getting irritated because I have no answers. Marriage is important especially in times like this. I think that there should be ways to work around this in certain situations.
Seminole	General	I feel it is time to open the state back up because we have successfully flattened the curve and what are we actually waiting for? Pathogens do not just disappear because we hide from them. Staying closed for a forced medical procedure is not an option. Homelessness, spousal and child abuse are not options. Higher suicide rates are not options. Ruining our food supply is not an option. People will not sit idly by when they start to lose homes and starve. It will be a war. People will not succumb to a vaccine if the goal is to wait for that. This is a dangerous precedent to set. OPEN UP! Do not make fear based decisions.

AMERICAN OVERSIGHT

Bay	General	I believe it is important to reopen businesses. The economy is an important part of keeping a healthy community. Without income for those that are out of work right now, their health may be in more jeopardy than if they had been working. No income could mean no food, no health care, etc. Yes, immune compromised should take precautions. But at the same time immune stimulus helps build a stronger immune system to help battle disease. The communities need to be able to go back to daily activities. There is no way to protect oneself from every single possible fomite that could potentially spread disease, and that is where a person's immune system comes into play.
Sarasota	Food	Open restaurants
Hillsborough	General	I believe we need to get the economy back on track as soon as possible. We have been indoors for over a month now and the statistics have shown that has helped flatten the curve. The Healthcare system is ready and there are too many unemployed people in Florida right now. Especially with hurricane season coming, we can not afford to NOT get people back to work. People will start protesting. The economy and the health of our people has a careful balance. Also, the percentage of our population across the USA that is infected with COVID-19 is around 2%. Cancer and heart disease take out more people per year. This was blown out of proportion and it seriously hurt our economy. We should slowly integrate a reopening in stages. People can still wear face masks and take precaution. Companies that can thrive in a remote setting should stay remote. We can open the restaurants at half capacity.
Volusia	General	Open small businesses! Too many will go under if action doesn't come now. Open preschools and daycare centers so people can return to work. Open the places of worship so we can exercise our right to religious freedom. Open the parks and beaches so we can exercise our right to assemble. Open schools for those who can't or won't teach their children at home. Government is turning people into paupers who must beg for gov't handouts. Covid-19 hasn't been the disaster we feared but the economic disaster that will come must be prevented now.
Charlotte	Healthcare	I think you owe it to the citizens of Florida to have at least one physician on this committee. This task force is no more than a Marketing Group. Also as a dental professional, we need access to all of the necessary PPE and to have a safe plan of opening and reintroducing our services to the public. Right now the numbers in Florida are not conducive to us working in such an invasive environment. What are you prepared to do about it? Also it has been 5 weeks and no response from unemployment. Any time frame when we can expect any degree of efficiency?

AMERICAN OVERSIGHT

Miami-Dade	General	Thank you for layout leadership during this tough time along with City Mayors. My suggestion is simply to ensure no restaurants/cafeterias open and that when in public “All” must wear a mask as FL is still seeing COVID-19 cases increase. If opening is needed , Recomended to learn from China’s mistake of reopening too soon. On another note, the school systems are closed and if parents need to go back to work with no support systems (child care, no parents to assist) it’s going to create a burden. Lastly, have a back up plan in case cases start to increase again. Thank you.
Marion	General	Please do not reopen business we do not want to have a round 2 or a spike in this virus right now keep it shut down for a few more month because if we reopen now prob in 2 or 3 months we will be shutting down again and have to stay closed a lot longer than this time Please do not reopen thank you for the great job well Done you have done in this hard times
Pinellas	Professional Services	I hope you reopen small business ASAP! Of course with some modifications to help with social distancing? I know several people who are in desperate situations because of not being able to work / be open. One more comment, I think we should limit out of state vacationers for a while longer
Okaloosa	Healthcare	It is time to reopen Florida. The stay at home policy was meant to flatten the curve, not to prevent disease and death. It does not need to stay in place until a vaccine is developed, or testing is expanded. A Flu vaccine must be recreated every year based on the prevailing type, mutation. There is no cure for the flu, and there will not be a cure for Covid-19. The massive destruction to our lives due to the dead economy will cause far more damage than this virus has, or will. Let those who are high risk continue extreme precautions. Those who are afraid can continue to shelter, but unemployment benefits should not be paid for fear. Life has consequences. For every decision, there is a consequence. I go back to work understanding I have a low risk or contracting the virus. Others will chose to stay home, but it should be with the understanding that the government will not sustain them until a cure/vaccine is created. Small steps, but back to work.
St. Johns	Recreation	Lift restrictions on pool use in private 55+ gated communities.
Pinellas	Retail	Small retail shops are getting killed, the crisis is obviously over since the Mercy Ship left NYC GET US OPEN ASAP!

AMERICAN OVERSIGHT

Orange	General	For places like nail salons, barber/beauty shops. Let staff work as much or little as they like. I have no problem being front line, just no one hiring for that. Allow the establishment to use a instant read thermomentor to check for customers temp. Face masks for all when practical. Bars and restaurants, no way to do this in stages really. They are social places, so distancing won't be happening. Dining, you can space tables. Staff can use face protection, but patrons can't. I put it out there that people wanting to go to bars and restaurants, have made their peace. Perhaps put in place some protections for these places, to include movie theaters, live theater, and similar that you enter at your own risk, the proprietor cannot be held liable. Most other places, auto repair, oil change, dealership, smaller type stores, let the owners dictate their own policy. If they want X number of patrons in their store at a time, they monitor. Big stores (Walmart, Publix, etc), they are monitoring pursuant to corporate rules which are probably tighter than state's laws. Mostly because of legal reasons. Theme parks. That's the real problem, huh? Doing a triage/prescreen won't work. Me. spouse and 2.5 kids show up. I have a 99.1 temp. I run that day in day out. But it's a temp. Can my family go in, just not me? If I'm staying on property, am I removed? Or my party? I say that people showing up for the parks, why else come to central inland FL, are willing to take the risk. Again, relieve the parks/corp from liability. You enter at your own risk. I'd go. 2.5 years ago with my 81yo mom with bad asthma with today's conditions? No!
Pinellas	General	I'd love to see everything go back to normal. But this isn't going to happen. I understand the economy and such is in the toilet but if we open all up too soon. Guess what? We end up back where we started. The best comment I heard was from our Sheriff, he stated it's like taking antibiotics. You take for a couple days and you feel better so you stop....guess what you get sick again Let's be careful what we choose and take our time
Miami-Dade	General	I'm a medic I transport from 2 to 4 positive cases every time I work from that number only 2 of my patients survive. The number that the government provide are very low but if you guys open the state without a vaccination in place the numbers of dead people are going to sky rocket. Wait for vaccination before open the state.I know the owners of the business who support with money you guys politic career are putting pressure on you guys. But you guys are going to have more pressure from the amount of dead people if you open now. Thank you
Orange	Tourism	Please listen to doctors and experts on the matter. Do not open up the state if the situations means we could see a new boom to infected numbers which will lead to more deaths. Yes the economy is in bad shape, but it can recover. We can't recover the loss of life. Lives should be the focus of the state not monetary value .
Pinellas	General	I think we need to see a major decline before we pull back on social distancing.

AMERICAN OVERSIGHT

Sumter	General	I believe you need to completely reopen Florida, as soon as possible. The virus is here, we have to learn to live with it, we cannot remain sequestered, forever. Remaining closed will cause worse problems than the virus, itself. People are going to start losing homes and the ability to feed themselves, their families and their pets. Please reopen Florida, completely
Orange	General	We agreed to stay at home to flatten the curve, not until it 'feels' safe according to the politicized media and politicians. The Florida government is trespassing on individual freedom in the name of safety and that is for individuals to decide. If anyone is fearful of getting sick, let those highest at risk stay home. If you dont want to go back to work, stay home. We dont close the roadways because we are fearful of the number of traffic deaths each year. We dont close down the economy when flu season starts - yes, this is different, but enough. We didnt agree to what is happening now. People are losing their businesses and livelihoods. This will cause loss of live that will never make the frenzied media news. Who are you (Gov.) to think you know whats best for all of us. Stop the 'one size fits all policies' and let people make their own choices. Governor, stop the nanny state now.
Indian River	Government	Please open the economy before we complete destroy everything. My family wants to work! We do not want to rely on government checks. Please open our businesses before we do more damage than good.
Polk	Healthcare	If ASC's are able to start performing elective surgeries, will their be enough testing available to test pt's prior to surgery? If not each patient must be treated as COVID positive thereby increasing risk to everyone in the centers, decreasing productivity due to terminal cleaning processes and more use of PPE. Would appreciate any feedback on availability of testing. Thank you.
Pinellas	Professional Services	I would like to see pet grooming services be allowed to re-open as long as they are responsible. Last month, when my groomer, Gulf Beaches Grooming, was still open, they had a tether "drop-off" system. You tethered your dog in front of their shop while they watched from a safe distance outside (or from inside their shop). After grooming, you picked up your dog the same way. (Dog on tether maybe a minute.) Payment was either made online via credit card or left in a little container (checks, cash). Thank you.
Volusia	General	I believe we need to reopen businesses. Remind people how low the death rate is. Ask people at high risk to stay home. Businesses need to reopen. We need to get back to work. We need a paycheck. We need our benefits. Schools can shut down early. Open daycares that care for summer kids. Open them now. Wash hands, sanitize, wear masks if necessary. But you are killing the economy. Killing small businesses. Front line staff are not receiving unemployment. We lost our benefits. The majority of people are not at high risk. How will cities survive without taxes from tourists? People are working. Delivery personnel, restaurant offering takeouts, grocers, car repairs, etc. people are working and not contracting virus. People are working and not dying. Open up the state before it's too late for many. You government officials get to work. Get a paycheck. You have no idea what it's like for most of us.

AMERICAN OVERSIGHT

Miami-Dade	General	Everyone wants to return to normality. My biggest fear is that in a rush to do so, without following the guidelines and protocol of medical.community, we will see ourselves in a bigger mess. With hurricane season and flu season around the corner, we must do what we have to do now, to make things better for all of us in the future. With Florida being an entryway to international travel, I hope that not only on a Federal level, but at a state level, serious consideration is given to start up a department that deals with issues such as a pandemic. There are tests not being figured into our daily numbers. With the study done by the University of Miami on how many potential.cases are out there, it is indicative of the work we need to do to be better prepared for this in the future. We need to do what is best for Florida and not follow political allegiances or pressures. Because as we hear every year during hurricane season, "Its not a matter of if, it's a matter of when". And unfortunately, this will happen again. ANd on a side note, tried submitting the form and keep getting to try later. Sounds just like the issues people are facing with unemployment. You know people are going to respond. Be prepared. Will we ever learn???
Lee	General	Until testing is made a priority and done in our state do not open or ease stay at home regulations. Retirees are a large portion of the population of Florida and should be more important than tourist dollars. Our numbers of Coronavirus victims are rising along with the number of deaths. If you are so compromised and need to please trump, may I suggest entering his trial treatment plan. Ingesting /injecting disinfectant was not sarcasm it was a dangerous, ignorant suggestion. How many will take it as a directive made by the president..are you willing to be a volunteer in a trial to check it's efficacy? Choosing to open the doors to our state is just as dangerous as that! Please follow the real experts advice.. social distancing..test..open when safe .
Hillsborough	Professional Services	Dear Governor DeSantis, I am a resident of (Hillsborough County). Florida was built upon hard work and self-sufficiency. We are a resourceful and responsible people. It is time to let Floridians do what they do best; get back to work. Every business is essential when a family's provisions are dependent upon that income. Current statistics show us that divorce, child abuse, alcohol abuse and depression are on the rise as a result of our inability to work without penalties and provide for our needs. It is time to repeal the restrictions upon our businesses so Floridians can get back to healthy and productive lives. Floridians love their neighbors and know how to use common sense to live and work safely. Please lift the penalties on our businesses while maintaining the recommendations of the CDC so that Floridians can provide for their families. Floridians are good people; we are fully capable of operating our businesses while voluntarily engaging in the practices that will help keep our neighbors healthy. It is time to put Florida BACK TO WORK. It is time to lift COVID restrictions upon our businesses. Thank you. Sincerely, Julia Pelon

AMERICAN OVERSIGHT

Miami-Dade	Healthcare	I'm with Kendall Regional Medical Center and want to provide the following input. Thank you! The latest COVID-19 data shows that actions taken by federal, state, and local governments have been working and total cases will be far fewer than projected without such measures. Hospitals have built up stockpiles of PPE, ensured bed capacity (especially ICU beds), and implemented ventilator strategies to handle surge demand. Testing is key, and testing capabilities have dramatically improved in Florida. Models based on real-world data show much more mild growth than initially expected. As mitigation measures remain in place, hospitals are at record-low capacity, roughly 50% on average across the state. Deferral of urgent/non-elective surgery has occurred on a substantial level, even for urgent surgery categories. Patients need to regain access to this level of care for their well-being, along with the well-being of hospital systems and the healthcare workforce. Hospitals, physicians, and staff are struggling financially as a result of COVID-19. Major health systems across the state and country have announced layoffs or furloughs of employees due to the record-low patient volumes, further exacerbating the economic downturn. Getting back to caring for all patients is essential as many conditions worsen due to delays in scheduled surgeries, while others avoid seeking care for life-threatening, yet treatable conditions, due to fears of face-to-face medical interactions. Hospitals should be allowed to resume treating all patients provided they can demonstrate: Adequate PPE to manage COVID-19 and non-COVID-19 cases Adequate ICU and ventilator capacity and staffing Protections and processes in place to prevent the spread of COVID-19 for patients and caregivers in the healthcare setting Continued reporting of relevant data to state officials to ensure capacity is maintained as surgeries restart
Pasco	Manufacturing	ITS TIME TO OPEN FLORIDA AND MOVE FORWARD!
Okaloosa	General	I do not think the public should open up may 1st. I think we should stay closed atleast till may 15. Or only open up some businesses. I work at a salon and do not think we should open up just yet
Brevard	General	Please reopen the economy soon.
Seminole	General	I do not want to state re-opened until cases have significantly decreased. I'm scared to step foot in a grocery store. No one is wearing a mask or staying 6 feet away from me. Positive cases with no symptoms are incredibly dangerous.
Lee	General	Just wait maybe two more weeks and then see what happen. I am very afraid that after opening starts growing again the numbers of sick people. Thank you for everything you and our great president are doing for us but please wait. Thank you

AMERICAN OVERSIGHT

Lee	Food	I am a server and a single mother to two kids; so nobody wants the state to reopen as much as I do! HOWEVER, we were the LAST ones to close and now we're going to be among the first ones to open? I think we need to NOT push the issue and slowly reopen with easy to understand guidelines. I'd love to get back to work, but let's be real. The tips are where I make the money. But if people are still concerned about going out they aren't going to be so quick to sit down and eat again. So even if we do open, how much good is it really doing for us? We aren't going to be making the money we would have! I think it's too soon to open everything back up. We need to be smart and cautious about this. Let's have the beaches with the rules guidelines, some parks, and maybe hair salons; see if we get an increase in cases. If not, YAY and go from there.
Volusia	General	Open more in stages two stages only people watch news on both political sides too much and get freaked irrationally out and they need to be able to go places even if next stage masks then last no masks. Thanks!!
Broward	General	The old saying slow and steady wins the race is what we should expect from our Florida government. I feel if we open too fast we will be seeing worse conditions. I am a local dental hygienist and I would hate to be exposed and bring it home to my family and start the process all over what's a good throw. That's far I do have confidence in our governor that he will not do anything to harm the people of Florida again slow and steady wins the race
Gadsden	General	My main concern is opening everything too soon. We do not hear about North Florida. Leon and Gadsden County continue to have increase in cases every day. Short term vacation rentals should not open now with the influx of travelers from other states the risk is too much. In this area we have a lot of out of state travel. Vacation rentals are not helping people who have spent thousands of dollar reschedule. Why can't we see what happens in our border states that have opened full force. People do not listen to social distant recommendations. I am appalled with comments about sacrifice the weak. Old people are going to die anyway and so many others. Seems like bars and drinking are more important than
Osceola	Food	I think it's about time they reopen our state with some restrictions, people have been out of work for too long and it's only a matter of time before people get desperate. I am a restaurant manager and it's heartbreaking to watch my entire staff suffer.
Pasco	Recreation	I'm involved with youth soccer but we have not received any guidance on how youth contact sports may return in a safe manner (guidelines). I don't think youth sports should return without any safety guidelines from experts.
Polk	Tourism	I am looking for a job since moving here and my son works for Disney. This is destroying us financially. Please open as soon as it is reasonably safe and just require extra safeguards so he can go back to work and I can find a job.
Miami-Dade	General	Miami-Dade new Coronavirus cases are exceedingly by 1,000 a day we should be more restricted to stay home.
Pinellas	General	It's way to early to open things up. There is not yet enough data to make an informed decision to open the economy. Take a breath and take a step back.

AMERICAN OVERSIGHT

Duval	Education	I own two tutoring centers and we are completely closed. We rebuilt online, but were are just servicing our current families and have no sales. Please give us a time line ASAP to open and requirements. The hardest part is no direction and no milestones. We have enough to last a short period, but not enough to last for several months.
Pinellas	General	How can you responsibly open the state while cases of COVID19 are still rising and not yet declining?! Why do you refuse to bring up unemployment while many Floridians have been over a month without any income such as myself?! YOU ARE ABUSING AND FAILING THE PEOPLE OF FLORIDA! I REGRET VOTING FOR YOU DESANTIS!
St. Johns	Recreation	Please reopen parks and swimming pools for swim teams. Kids need recreational activities.
Seminole	Retail	Reopen everything
Hillsborough	Healthcare	Extend the safer at home order through the end of May. Require people going out to wear masks. It is way too soon to re-open the state. We don't have the testing capabilities and know too little about this virus to make a truly informed decision. As of last week only 1% of residence in Hillsborough county had been tested. That is far too few. Hastily opening the state up will only exacerbate the problem and lead to more sustained and worse economic and health related hardships for all of Florida. P.S. Tried to submit the form and it didn't work. Just like our unemployment benefits and our entire for profit healthcare system. Certainly does not instill confidence in the state. For that reason as well, keep it closed!
Palm Beach	General	Under any circumstances, the state, mainly south counties from West Palm Beach down should open up completely. Right now, not everyone can get tested. Also the data is telling you that cases are going up. Look at the data, and leave politics aside. We need to wait until the curve is really low to open up, honestly I think June or July. By them please work hard on getting testing done. What is the state doing with all the unemployment crisis this estate is going through. Get to work and fix the government system, it is time to do this the right way. This is definitely the worst estate to be unemployed in the US, and this is not new news. I am also concern with the transparency of nursery homes, be transparent and stop hiding information to the public. We all are leaving very stressful times to not received the truth of the matter here.

AMERICAN OVERSIGHT

Lee	General	My name is Joel Stewart and I drive locally for Cheney Brothers Foodservice. I have continued working throughout the pandemic, but my hours have been cut and I've been trying to make the best of all the changes. I have a lot of respect for this virus and understand the purpose of social distancing and stay-at-home orders. I believe the governor has done a fantastic job keeping everyone informed as well as making decisions that are extremely difficult. However, I deliver food and supplies and am absolutely heartbroken to see what this is doing to our small businesses and local economy. I am in no way shouting from the rooftop to open up Florida, as that would obviously be a mistake, but I don't believe a lot of businesses will survive much longer. I understand peoples lives are of the utmost importance as well, and measures must be taken to prevent outbreaks. With that being said, there is no cure or completely being rid of this virus. Keeping hospitals from being overrun and supplies in stock has been a priority from go. With the way things are going, my suggestion would be to open restaurants on a "reservation only" basis to prevent the public from gathering and standing in lines. Opening retail shops with precautions for the employees in my opinion is no different from what is in place at grocery stores. To the best of my knowledge, we have not had an influx of positive cases from going to the grocery store but that's just based of what I've read. It seems precautions from the general public are being made. In my opinion, social distancing guidelines combined with personal responsibility is what is needed at this point. With that being said, I also believe a great amount of attention should be focused on nursing homes and retirement communities as these are the main area of concern. Thank you for allowing me to give thoughts.
St. Johns	Food	Retain senior hours at grocery stores (Publix, Costco, etc.) until virus is eradicated/vaccine available.
Brevard	Professional Services	Please open dog grooming salons ASAP. Salon owner can wear mask and gloves and retrieve dog from vehicle as it drives up, return dog in same manner. Driver would also be masked. Virtually no transmission exposure.
Hillsborough	Healthcare	I am an Occupational Therapist currently working in an outpatient clinic. Each of use therapist and patients) have abided by the rules set by the state. I feel that things should return in a systematic way. The physicians and their patients are on a waiting list for surgeries. It seems that these kind of activities at free standing out patient surgical facilities should be allowed to open. I am also an owner of property up in the panhandle and the restriction of not being able to rent our house which is located off of 30a has really affected my family financially.. I believe that the beaches and home rentals should be opened no later then 5/1/2020.
Sarasota	General	Opening back up would be very dangerous for everyone. I suggest forcing everyone to use masks in public and provideing hand sanitizer. Also taking temperatures before entering businesses.
Miami-Dade	Real Estate	Make prospective buyers be qualified first as to their ability to purchase the property they want to see, thus avoiding the empty tours to entertain bored people who in the end are not qualified buyers.

AMERICAN OVERSIGHT

Osceola	General	I am a very concecitizen. I hope that our health is looked at as more important than money. You need to make everyone wear masks or face coverings. So many residents do not follow safety measures putting others at risk. If some businesses do open you must require that the public and employees wear face coverings and keep at. Minimum of 6 feet apart. I know so many people will be asking for everyone to open up because they are bored or scared of money issues. People do not think correctly when they are scared. Please be a voice of reason for these people. Please think of our health first. Opening up too early or without strict rules can cost lives. Please put our health as first priority.
Palm Beach	Construction	Please consider a complete reopening of Florida. The cure has become worse than the disease. If essential businesses can operate safely so can everyone else. I urge you to consider those less fortunate that need to work. Those who are at risk can opt to shelter in place. Actually, it will be easier for them to get supplies and help they need when more things and assistance are available to them. This is wrecking our economy and the price to pay is so steep. I am 54 years old and don't remember this this response to the swine flu in 2009. Please open Florida for business. Thank you Denise Wandell
Broward	Recreation	THE BEACHES NEED TO BE OPEN PEOPLE ARE ALWAYS SEPERATED THE SUN AND FRESH AIR IS GOOD FOR YOU THE SALT WATER IS GOOD FOR YOU AND IT IS A CALMING PLACE FOR SO MANY PEOPLE THERE IS NO REASON FOR THEM TO BE CLOSED. THIS IS SUPPOSE TO BE A FREE COUNTRY BUT BETWEEN THE GOVERNMENT AND THE MEDIA SCARING EVERYONE WE ARE LOSING MORE OF OUR RIGHTS WHICH IS IN FACT ANOTHER ISSUE. YOU CAN NOT JUST TAKE RIGHTS AWAY FROM AMERICAN PEOPLE THAT ISN'T HOW IT IS SUPPOSE TO WORK WE NEED TO GET BACK TO THE CONSTITUTION AND LIVE LIKE THE GREAT PEOPLE WHO BUILT THIS COUNTRY AND WROTE THE LAWS INTENDED ON US TO LIVE.
Pasco	Recreation	I believe we are at the point now that we can open up all or most(metered) beach parking lots on both sides of the state, especialy the brevard beach parking lots. spring break is over now so now is the time to re-open parking lots back to Florida to enjoy our beaches. however if needed the lots could be easy monitored by parking meter officials. This is a easy plan to do and will help get some of the county employees (meter guy) back to work. you are thinking of a plan which Ive read to reopen Disney which I'm sure will cost some money, new spaced out lines, ride apps, etc.. our beaches is a no brainer. PLEASE open our beaches and parking ASAP. Thank you.

AMERICAN OVERSIGHT

Brevard	Retail	With the elderly population in Florida we should be very mindful this virus spreads quickly, and has deadly consequences for the elderly. I think the lack of concern coming from the top, meaning the president and our govenor, leads our state into a false sense of security. I am a healthy 53 year old who works in health care, and feel we are releasing the reins too soon and too fast. My gut tells me we are going to see a rapid spike in cases once people feel they are "safe" since the leaders said it was. This virus is here, and not going anywhere. We need testing, contact tracing and antibody testing to be in full capacity before we can be sure it's safe for not only our elderly, but all citizens of Florida
Hillsborough	General	Dear Governor DeSantis, My wife and I are residents of Hillsborough County. Florida was built upon hard work and self-sufficiency. We are a resourceful and responsible people. It is time to let Floridians do what they do best; get back to work. Every business is essential when a family's provisions are dependent upon that income. My wife was forced to shut down her business as a cosmetologist and she has been hurt from COVID 19 since the fake news started reporting it at the end of January. We have been trying to get the unemployment insurance benefits & the CARES ACT signed into Law 3/27/20 (https://connect.myflorida.com) since we knew it was available for her with troubling efforts. The site was almost impossible to file a claim on the starting date of eligibility. Its always down and still NO relief. We have spent HOURS & days just to file and finally got through and every time we check back on it, the site goes back down and still no deposits in our account or indication of help from Florida. This has affected our finances and we have continued fall deeper in debt. We are a sophisticated nation and this is simply ridiculous that the effort of someone in your administration has not resolved modern technology to simply get the relief money to us and our economy back up in a timely manor. You'd think we were still on dial up on the internet! This is proof you can depend on government and socialism will never work. Current statistics show us that divorce, child abuse, alcohol abuse and depression are on the rise as a result of our inability to work without penalties and provide for our needs. It is time to repeal the restrictions upon our businesses so Floridians can get back to healthy and productive lives. Why hasn't all he elected officials suspended their income like all Americans were forced to do so? This shutdown is unconstitutional and violation of our rights. We the people will meet you and other tyrannical elected officials in the court room and at the voting polls! Our elected sheriff Chad Chronister & mayor Jane Castor violated the Constitution of the United States on so many levels and even arrested my pastor for having a church service. Because of what the sheriff did, we have had severe criminal acts against member of our congregation.
Escambia	General	I understand how small business owners feel because my husband and I are self employed and haven't worked since mid March. I need work and money. But, if the state opens to soon, we might end up back where we started. I really don't think beaches should open. I know I don't have to go to the beach, but I could come in contact with someone who did. Let's just be conservative and not listen to the vocal minority.

AMERICAN OVERSIGHT

Pinellas	General	Why do I hope that we will not re-open Florida until the number of active cases of COVID-19 is down to a minimum and all of them are under control? It's simple! My family! My household consists of a 76-year old mother with underlying health issues, my 3-year old son and me - I have a chronic decease that effects my immune system. I know we need to re-open because of the economy. Currently, I am lucky enough to be able to work from home. We order our groceries to be delivered to our house in hopes to minimize a potential exposure. I am the one who wipes them all down and puts them away. My fear is if we re-open while there are still many active confirmed and potentially unconfirmed cases, I will be ordered to go to work. That means I would have to fill up my car every week or so as I commute 30 minutes each way to go to work. I work in a highrise office building in Downtown St. Petersburg which means I will be at a high risk of exposure there. Given my health risks and an advanced age of my mom, re-opening Florida early will put my family at a high risk for COVID-19 and just a thought of it scares me to death.
St. Johns	Recreation	Please consider CV19 testing of viable statistical samples in smaller beach communities and then basing decisions on empirical data. Applying blanket policy measures on populations based on fear is more damaging than the CV19 itself. I implore you to use critical thinking and lead our communities in a more pragmatic manner. Open beaches dawn to dusk. It makes no difference if I walk on A1A passing others just the same as I would on the beach.
Collier	Professional Services	also, in reopening all businesses and especially hair salons, nail salons and barbershops puts us as business owners in the position of choosing to keep our business open or protect our employees, families and clients. Is some salons choose to open bc they can and others aren't comfortable doing so yet, they will lose their clients thus losing their business. So it backs owners into a corner of not really having any options. May 15th just seems a bit of a safer date in my opinion to do so and be fair among everyone.
Broward	Management	My opinion begins with Chapter 3:1 of the book of Ecclesiates which says: Everything has its own time, and there is time for the whole purpose under heaven. I think that our Nation is generated by the economy, but the human being is the most important heart within the economy , because without it the economy does not walk, does not breathe! We have to follow the guidelines of Science and professional health authorities requested. The return has to be cautious and gradually. Imagine; if the social distance is loosened in a non-gradual way because of the economy and 2 weeks after reopen , it starts to increase the hospital beds alarmingly because of infected by Covid-19, for sure the scenario will be worse and possibly walk through Lockdown that'll be an economic colapso.

AMERICAN OVERSIGHT

Sarasota	General	Please open Florida. Open the beaches. Open business. With the most recent info about the virus, it doesn't survive in UV light, leaving the beaches closed (or open with restrictions) proves unnecessary as the chances of contamination at the beaches are slim to none. Overall, I think we need to look at the situation and reevaluate our actions. The original reason for the lockdown was so we did not overwhelm our medical system. This was understandable and probably wise, however, now the only thing detrimental to our medical system is the shutdown itself. Sarasota's largest hospital furloughed many employers, because they couldn't afford to pay them. Tanking our medical system is just as bad or worse than overwhelming them. Please open Florida!
Broward	Recreation	Please re-open the parks and beaches. My family members in St John's County say that the public has been very respectful of the hours and uses with the limited re-opening of beaches there. Being able to move about and exercise in outdoor spaces and be in nature is important to physical and mental health. I am an essential worker (nurse) who lives in a small apartment with a concrete yard with no trees. As soon as beaches and/or parks can be opened with guidelines for use to ensure they are as safe as possible it would be a tremendous boon for the well-being of my household. Thank you.
Duval	General	If grocery store clerks, Walmart cashiers and hone depot or ace employees are not dropping like flies, I think we are good to go.
Escambia	Healthcare	I think you should find a way to let people be with there love ones when they are dieing.
St. Lucie	Recreation	We need to get gyms and restaurants open quickly, with social distancing and disinfecting, in order to help the mental health of citizens. People need an outlet and being able to get out of the house to exercise and grab a bit to eat is a huge part of that.
Hernando	Professional Services	I'm a small business owner in Pasco county. Myself and husband been out of work for 6 wks. I have not received a dime not even an email in regards to our applications. (ppp, economic relief, unemployment , Pasco Grant) We have not even received our stimulus check. I still have my home bills and salon bills to pay with no forgiveness. I have done my part by staying home. Plz reopen Fl May 1st. Make the 76% stay home!
Broward	General	We need to reopen and go back to work and our life. We can be safe and go back

AMERICAN OVERSIGHT

Flagler	General	I am writing to express my full support for re-opening our state as quickly as possible. It is imperative that businesses get up and running to prevent further damage to our way of life. My conclusions are based on the following facts: (1) Our testing continues to improve and demonstrates that 90% of those tested, test negative (per Johns Hopkins on April 24) (2) Further evidence suggests that as we expand testing the mortality rate further decreases as a percentage of the population (evidence the recent antibody testing in NY) (3) The vast majority of those that have died (over 80%?) had some pre-existing condition which leads to a focused strategy against that population to make sure they are safe vs something so broad as we have now impacting virtually everyone. (4) We have adequate capacity in our healthcare system to handle any further outbreak as evidenced the number of open beds, With this information it is difficult in my opinion to make the case to keep the state locked down. There is really so much to say on this topic. But my net message is that the data just doesn't support remaining closed for any longer. A measured approach to re-opening is warranted, but re-opening MUST happen and it must happen quickly. The Stay At Home order should expire on April 30. Florida and for that matter the whole country is not sustainable without viable businesses providing the necessary revenue for both workers and our state. Thank you Governor DeSantis for your leadership in this difficult time. Please make the right decision and re-open Florida quickly.
Pinellas	General	open up! yesterday!
Palm Beach	General	The entire state needs to stay closed until Florida has a better grip on the number of cases actually in the state. We need more testing. Anything less is dangerous and is putting the economy over people's lives.
St. Johns	Information	We are happy with what Florida has done so far. We need to have a very cautious approach towards reopening. We are doing good because we are social distancing but we should do it gradually. We are teleworking and would not prefer to go back in office until there is medicine or vaccine available. We feel being home is safer than being outside but I understand the concern of people who don't have the opportunity of teleworking. I would request to see if we can enforce or mandate people to wear mask outside to avoid or reduce the spread. We can always get the economy back anytime but if we loose our health that will not be something I would trade for.
Pinellas	Retail	Small, Florida retail businesses are being utterly squashed by the capabilities of the big box stores and online giants. The crisis numbers just aren't there. Get small businesses open and get those who can and want to work back to their jobs. EVERY job is now essential, given the economic crisis facing Americans and, especially, Floridians. Get small business back to work.
Broward	General	Dont reopen until medical professionals give the all clear to do so.

AMERICAN OVERSIGHT

Palm Beach	General	I am a Palm Beach County native. A former firefighter and paramedic with the city of Boynton Beach. My wife and I are the owners of a small hair salon in Lake Worth. We have been in business for the last 16 years and have been licensed cosmetologist for 22 years and 13 years. The forced closure has left our business, or lives , and our financial outlook in a state that keeps us from sleeping and eating normally. We have serviced many of our clients for 5 years or more. Since the closure we have seen an overwhelming show of support not from our family or friends but our own customers. Many of them realize the impact this has on us, they sincerely seem to value the relationship we have with them. We have tried to stay in contact by way of phone, text, and social media, but it is not the same. The economic loss for us is devastating, the isolation for us and many of them is severe. Mayor David Kerner seems content at leaving so much shut down with what seems to be little regard for the long lasting effects of these decisions. The lack of even acknowledging any serious timeline shows the mayor has little to no regard for the urgency of well being of the businesses he is burying. We understand there is a medical crisis, we understand this will last for what may be years. Please understand this is also a financial crisis that will undoubtedly last longer and have far reaching consequences that will extend long after the virus has been contained. As Floridans, we are accustomed to dealing with hurricanes that upend or lives for weeks, even months. To say the economic loss could last a decade may not be an understatement. Dozens of our clients are nurses and members of law enforcement, as well as a few Doctors. Prior to the lock down we began extreme cleaning practices between clients. Limiting only one client per stylist in the salon at a time (6 people total in 1400 square feet). Temperature checks prior to entry. Servicing only those who we know, showing no symptoms, or recent travel. We have learned so much from them. They have equipped us to succeed safely. We realize many fear illness and certainly death. We do too.! Please realize being on lock down and locked out of our careers and way of life is time and life no one will get back.
Sarasota	General	I think it is to early to reopen Florida. I work retail and can not believe how people will NOT LISTEN and did not shelter in place. If we reopen even with restrictions , I can see mass chaos and more cases appear. Please think about our health before our pocket book.
Palm Beach	Education	It is to early in the cycle to open up our State. The people who are in need of employment understandably are frightened about the continued closure. If we open too soon, people will contract the disease, and put those workers, already stressed to the breaking point, in dire jeopardy. The system will collapse and be out of control is the second wave hits before we con recover d=from the first wave. People will forget about social distancing, and wearing masks. I see this already, by just going to Publix for a short shop.

AMERICAN OVERSIGHT

Hillsborough	General	I am a hairstylist and cosmetology instructor. There is no way we can social distance.I am also a carrier of a rare lung condition.I also have a mother who had a double lung transplant just last year. I feel it in no way it is safe to reopen the state as of yet. Besides not having proper PPE to deliver guest services and having to be face to face with our guests/clients, its just not safe yet. I realize this isnt going away any time soon but our job is a luxury not a necessity. I do not feel safe being face to face with another person. Clients arent 100% truthful what they've done to their hair so why would they be truthful if they've been sick, feeling sick, or around someone who's been sick. I realize that peoples roots are showing or their hair is getting long but it's our safety and health at risk. So no I dont feel it's time as of yet. I want to be able to be comfortable going to work as we as my guests do. Not have to live in fear. People cant be replaced. Until there is a decline in cases for at least 2 weeks, it's not time. If its opened too soon there will be more cases and overloaded hospital workers.
Duval	Tourism	Open up state park campgrounds to all Florida seniors. Experienced campers are well versed in social distancing and responsible stewards of our state resources.
Hillsborough	General	Listen to the scientists and medical professionals about when it is safe to begin opening up.
Hillsborough	Food	I think most Florida residents would agree that maybe now isn't the best time to reopen the state. However, I think most of the very same residents would be back to work tomorrow if given the option and the opportunity. The reason is simple. Because our state unemployment system has failed us. And that lies squarely on the shoulders of our elected officials. You are, day bay day, actively failing the very people who put you in office. But this isn't a political issue. This isn't about voters, or taxpayer dollars. This is about people. Human beings. Human beings who can't pay rent, and who can't feed their families. And if something doesn't happen soon, thousands of your citizens are going to be socially distancing, together, under a bridge somewhere. It's pretty hard to self-quarantine when you don't have a roof over your head. The line between self-preservation and species preservation is rapidly approaching. I for one don't want to have to make that decision, but I think I speak for most of us when I say that I will do so if I must. We can't do whats best for this state, until you do whats best for its citizens. The options are pretty clear for you. If you wan't to extend the stay-at-home order, and want to continue to close businesses, you have to get the unemployment system in line. That is your timeline. The order is lifted at the end of month. Six days. You have six days to fix your unemployment system. If you cannot do so within that time frame, I would begin to reopen your state per Phase 1 guidelines. Any extension of the current situation without economic relief will result in civil unrest.
Okaloosa	General	Open Florida now. My Purple Heart 💜 recipient army veteran husband fights off suicide daily. The shut down is depressing him further and the closed beaches is preventing his daily mental therapy. He fought for our freedom yet he is being denied his own freedom to find mental relief at the beach.

AMERICAN OVERSIGHT

Hernando	General	Re: the re-opening of FL amid the covid virus pandemic. I believe the scientists and physicians and healthcare workers who say it's too early to open the state. Even if hairdressers/restaurants/bars etc. open, I won't be visiting any of them until the numbers of infected people in FL reduces dramatically. Not just for me, I have elderly parents that I would be putting at risk. I think it is foolish to think our infection rate won't spike if we open this state for business too soon. People will be at risk. I understand business and this is painful. However, dying people are much more painful. It's very risky.
Manatee	Tourism	We must not allow what happened in the Spanish flu epidemic to re-occur here in Florida because we are so focused on revenue that we ignore the danger of reopening our state to tourism too soon. There is far too much pressure being placed on our state government to risk the lives of our older population for the sake of making money. Even if there are requirements for smaller groups of people and sanitary habits, those already in place are being ignored by far too many. There aren't enough people to enforce those existing requirements as it is, and an influx of people who have no vested interest in the welfare of Floridians will only make the problem worse. Just go to any big-box store or grocery to see how people are ignoring the rules, then multiply that one-hundredfold to get a glimpse of what it would be like should the crowds come in too soon.
Brevard	General	I'd like to see the state opened with general guidelines from your task force, but let individual counties open earlier or later depending on their situations. Here in Brevard we have a lower number of positives and could possibly open sooner. On hair salons I would like to see the worker wearing a personal protective gear (PPG)and cleaning and sanitizing after each customer. Each stylist needs to have their temperature taken daily, and the customer should when they arrive. Also, by appointment only and not letting customers gather waiting their turn. Start with 25%, then move to 50% when standards are met. On restaurants I think it's possible to open with very limited capacity for the first two weeks. Maybe 25% initially, them move to 50% after standards are met. Again PPG needs to be worn, along with daily temperature checks for both workers and customers. Concerning Point of Sale businesses very limited numbers in the store at a time, with emphasis placed on delivery to the vehicle. Maybe inside all locations a cashless system. I think a daily log of temperatures should be maintained and be available on request by the County Health Department. Spot checks for records and temperature checks initially by health officials to all open businesses should happen until the county is backed to 100%. Thank you for the work you're doing.

AMERICAN OVERSIGHT

Broward	General	There are far too many people living in this state over the age of 60 to not be very careful in the reopening of the state's economy. As someone who works in three different locales, I want to see testing be more readily available. No one I work with feels safe returning to any office environment without first knowing that prior to re-entry all of us are tested and are NEGATIVE. Then we will continue to take temperatures daily, observe social distancing by reorganizing our work areas, and will double our cleaning of common areas. BUT, without the testing, there will be no re-entry. We have families. We live with or are near to elderly relatives, those with pre-existing conditions and those with other health issues. Our first priority is to our families and their health. That should be the State's priority too. There can be no reopening without us. And there can be no reopening without customers. We need to safeguard all. We need testing for Coronavirus and Anti-body testing NOW for ALL. Make it available 8 hrs a day, 7 days a week in multiple locations throughout each county. Have mobile units dispensed to condo and homeowners associations to test anyone who wants testing. AND along with testing, make printed test results available to ALL. And, please stop trying to twist the numbers to get you a good result. It's not some convoluted percentage, its the number of positive results, the number of hospitalizations and the number of deaths we are tracking. The more tests you run, the lower the ratio of positives to tested will be, the more tests you run, the lower the percentage of deaths will be. But if the number of positives is rising, if the number of hospitalizations is rising, then we have not yet peaked. Use, do not confuse the science, and the math.
Palm Beach	Recreation	Please allow golf courses to open under safe guidelines, including driving ranges, so I can return to work as a teaching professional. I am an independent contractor and my only source of income is giving golf lessons. I applied for unemployment but haven't heard back. I would just to be able to return to work, even for only a few days a week, a few hours a day. Thank you Sincerely David Pesacov, PGA
Hillsborough	General	We should not be opening anything. Why waste the effort that we've done for the past month? Each life matters, no one should be allowed to stop the stay at home in any county because those individuals can go to another county and infect citizens. All of Florida should have the stay at home extended. Keep Florida safe, our lives matter. Economics after our lives are safe!
Palm Beach	Tourism	We are mandatory to wear masks in grocery stores, Loews, Home Depot- make masks mandatory for EVERY BUSINESS at least for the next 60 days and reopen small businesses i.e. beauty supply, pool store, dog park etc. Refer to this article about Hong Kong in US News - they made masks mandatory in January - https://www.usnews.com/news/cities/articles/2020-04-22/how-hong-kong-flattened-the-curve-without-total-lockdown

AMERICAN OVERSIGHT

Volusia	General	Please reopen FL. It's been 3 weeks, not including the prior weeks when it was a "suggestion" to stay home. People are out of work and the death toll numbers are still very low. People are going to lose their minds if the lockdown continues. And please do NOT make it mandatory that we wear masks out in public. Thank you
Alachua	Education	We can not afford to stay closed for much longer. I believe as per democrat influence, the number of Covid 19 infections have been inflated. They want to keep our economy closed to try and hurt our great President in the nov. election. Please get us back to work post hast. Thank you Gov. Desantis for your great leadership.
Osceola	Utilities	My suggestion is about the Gym, fitness center . It is health it must be open ASAP for our healthy physical and emotional ! The only thing we need it is a procedure like this for example - sanitizer available - mask use all the time - control the number of people for example 50% of the capacity - work out zone with equipments no problem at all I would suggest to have this protocol ASAP to reopen our business . Classes limited for 50% of people And the the good sense of keep away 6 feet from each other ! Thanks a lot ! We need dates e procedures to provide and all the gym to be ready for it ! Cleaning was normal once we do clean every time we use the equipment !
Volusia	Healthcare	I do not think the sate is ready to open. I am a retired registered nurse . I feel like our numbers are still too high to open. Closing things down has been so great keeping people isolated and free of Covid- virus. I'm afraid people will not social distance once the state opens. It will be harder to control people. I am mostly afraid of resorts and hotels being open and allowing people from other states to bounce on Florida and endanger our people. I would love to see people from other states to be not allowed in Florida for a few months.
Collier	Information	I'm writing to express my deep concern that the motivations undergirding the decision to re-open the state are being fueled by economic concerns more than by concerns re the health and well-being of the citizens of Florida. I am 73 and in relatively good health and have been isolating since mid March. I have friends who are dealing with more serious health issues and who, I fear, will take any decisions to open the state as license to resume their lives pre COVID. I do appreciate the concerns about the economic health of our state. But given that we are mainly dependent on tourism and that season is almost over, might it not make more sense to have a soft opening, get a handle on testing, gather more information about the spread and potential trajectory of this virus in anticipation of a more (hopefully) robust tourist season in 2021? Obviously if we make a mistake and it results in a surge of cases, it might take much longer than 2021 for us to recover.
Hillsborough	Healthcare	Virus and antibody testing should be in place before re-opening. Without this data, we do not know how to mitigate the risks appropriately and re-open in a responsible and sustainable manner.

AMERICAN OVERSIGHT

Pinellas	General	Florida shouldn't lift restrictions until widespread testing is available and we have contact tracing measures in place. Lifting safer-at-home orders and especially opening beaches, state parks, etc would only increase the chances of another wave of infection. Opening to tourism would result in increased cases of infection and a higher likelihood of death. People can't safely attend gatherings or safely be at work until the number of COVID-19 cases significantly decreases. Florida's overall response rate to this pandemic has been poor and the state was slow to act, don't rush the decision to open Florida because you put profits over people - there will be no tourism if we end up like Denver during the Spanish Flu - learn from history. "There is currently no evidence that people who have recovered from COVID-19 and have antibodies are protected from a second infection." (WHO) - we can't open completely until there is a vaccine.
Orange	General	We need to begin reopening to protect our citizens from losing everything. Most people have already been scared enough by media to fear death but that should not be our mindset. We have people who are going to lose their life's work, building their businesses. Since so much of our economy is built on tourism, hundreds of thousands are being impacted by no work and by not being able to have guests come. It is also time to let our children see that even in crisis we stay alert but work and live normal lives. My heart aches for students who will not have that big graduation they worked for, or of little ones graduating into kindergarten and first grade. We should not become dependent on federal government and should be a strong economy while at same time following practical guidelines. The time to let people have freedom to choose is now.
Brevard	Retail	Hello, My family and I work for Publix and feel like we are putting ourselves at risk every day so others may be able to get groceries. We hope you won't open Florida yet. My family and I feel it will put us at an even greater risk with tourism and people not social distancing. When we are not at work, we don't go anywhere other than walking the dog or riding our bikes. We want things to go back to normal soon as well, however we don't want to do it too soon and risk even more. Please make decisions very, very carefully. Thank you, The Norton Family
Orange	Recreation	Hello, we would like gyms to open at a certain capacity and let clients in by appointment. It's really bad for our health not to be able to work out and use the machines, it's not the same working out at home. Most gyms are really big with a high capacity and I think reopening them with a limited number would make everyone happy. Hope this can be taken into consideration. Thank you, Charie A
Manatee	General	The time is now to reopen our State Governor. Please help all of our businesses come back to life by allowing all including bars to reopen no later than 4-30.

AMERICAN OVERSIGHT

Lee	Healthcare	Our state is considering how to reopen the economy, including dental practices. As your constituent and a licensed dental hygienist, I am writing to encourage you to reinforce the importance of continuing to follow the Centers for Disease Control and Prevention (CDC) recommendation that dental facilities postpone elective procedures, surgeries, and non-urgent dental visits, and prioritize urgent and emergency visits and procedures now and for the coming several weeks. It is unwise and dangerous both for the health of dental professionals, our patients, and the public. The dental team works in close proximity to the patient and utilizes handpieces that generate aerosols, tiny particles, and droplets from the patient's mouth that remain suspended in the air for hours and pose a risk of infection to the dental team and other patients. In order to practice safely we would need the appropriate PPE so dental hygienists and the entire dental team may safely and effectively provide care to patients. To simply say offices should rely on their own judgment for safety is ineffective as that judgment can vary greatly. There are many dental offices that are taking this seriously. But as evidenced by the public response to this and in social media dental networking groups there are outlier dentists and office owners who are not taking this seriously and are ready to re-open, as is, with little or no changes. For some they are worried about their financial livelihood especially as federal aid money dries up, and for others they do not think this virus poses any increased risk and that their rights are being infringed upon. There is a high level of anxiety and fear among dental staff feeling pressured to return to work before it is safe for us to do so. I understand the financial stress dental office owners feel, and I also want my office to succeed and myself go back to work. Although, without strict guidelines in place about required PPE for treating dental patients, at this time I do not feel the dental office is prepared to treat patients to the standard of care without endangering the patient themselves, the dental staff, and their families. According to the Bureau of Labor Statistics, of all professions clinical dental staff are three of the top four jobs at the highest risk of contracting
Citrus	Accommodation	We should get rid of the stay-at-home order. What we should do is: (a) open dine-in restaurants, hair salons, gyms, tattoo parlors, and retail stores with limited capacity and strict rules; and (b) keep movie theaters, hotels, and sports venues closed until Phase Two. By allowing stores to be open with limited capacity and sanitation rules, it allows those business owners and employees to make money and survive.
Broward	Healthcare	I am an Optician and have to get very close & touch patients to property take care of them. I think it is too early to reopen businesses & risk losing all the time we have put in. We need to stay closed until at least June, better to be cautious
Pinellas	General	Please consider at least phase one of reopening the state. People are hurting and families need to spend time together. We have to think of quality of life and mental health as well as physical health

AMERICAN OVERSIGHT

Volusia	General	All preventative healthcare routines, procedures, and exams should be allowed to resume immediately. Regards, Alexis Henley Volusia County Resident
Broward	Government	Do not rush to open the state! We are weeks behind New York and the NE. The infection rate is still rising and deaths are still happening; not just in Florida but around the country. People are not going to run back to Florida for a vacation unless they are beyond stupid. Meantime you will have all FL citizens not practicing social distancing. Stop listening to the chamber of commerce. If you want to guarantee that you will not be re-elected, then open the state.
Palm Beach	Healthcare	Hi, I live in Palm Beach County in Delray Beach. We are part of the epi-center of the Covid 19 breakout in South Florida. Palm Beach County has a disproportionate number of Covid deaths and was late to shutdown and has been short on testing until very recently. We are not ready to reopen until the number of new cases diminishes and the death rate improves. Any reopening must be coordinated with Broward and Miami Dade County so we don't get flooded with party people and beach goers from Broward and Miami Dade.
Miami-Dade	Recreation	Hello everyone who is involved in the decision making, Please consider opening outdoor recreational activities like tennis courts, pools and playgrounds as soon as possible. It is known that the virus is less contagious under the sun and in humid conditions therefore we should not slow down or impair the development of our children by keeping them away from the play. We know very well the importance of outdoor activities for mental and physical health. The vulnerable and immune compromised people can maintain precautions indoors while our healthy children get back to active and healthy lifestyles. Regards, Maria Schneider
Pinellas	General	Clearly we have learned now that many, many people can carry this virus without any symptoms at all, If there are no symptoms and it never causes health issues, perhaps the least vulnerable should be allowed to go about their normal business. I think the governor has called it right in saying that we need to protect the most vulnerable, high risk individuals. I would envision strictly locking down nursing homes, ALFs, and hospitals so that no one can enter or exit without being tested. These are really the most vulnerable individuals and the ones we don't want to get the virus as I understand it. At this point, I would think we know where the real problem areas are in our state, and could focus efforts there while allowing more freedom for the rest of the population. Very large crowds will still be a problem I am sure but could similar measures be put in place at those types of events and facilities. I don't know the answer to that and I'm sure it would be a logistical challenge.. But can we really shut down those types of gatherings long term? Thanks for allowing this forum.

AMERICAN OVERSIGHT

Broward	General	Take reopening south Florida a slow process. No beaches or businesses reopening in a crazy manner. Make testing available for all before even thinking of going down a full re-opening lifestyle.
Palm Beach	Education	Closing the state or country is unconstitutional, a breach of fundamental rights, regardless of circumstance. A national emergency based on a virus that lacks substantial empirical evidence and testing does not justify closure of anything. You might be pressured by the President to keep closed or even to open, but please consider human rights and that government overreach in this circumstance is opening the door for repeated breaches of this sort. The country is being financially raped, and small businesses, minority populations, and low income families are suffering, along with those with existing mental health issues, while the more economically advantaged groups are championing the state and country remaining closed. If you want to stay at home, then stay at home. Other peoples' non-evidence based fears of the virus do not justify you infringing on my personal rights. Is a great recession and/or depression worth sparing a few lives? No. And it extremely selfish to drowned peoples' livelihoods based on other peoples' fears.
Miami-Dade	Administrative	Do not reopen until fall or Until cases are as low as they were in Early March. Masks should be required by law for any and all persons in public and inside any business even at parks or walking their dog.. employees should continue working from home wherever possible. If parks, golf courses reopen close any areas that hold groups of five or more (basketball courts, volleyball, playgrounds) limit number of people allowed in parks, it is easy to block parking spaces to limit number of vehicles and promote six or more feet of social distancing guidelines including inside businesses at all times. Employees at high risk or living with family member at high risk should receive protection by law and continue to work from home if previously able to.
Hillsborough	Healthcare	I don't think we're ready to open in a responsible way. We need more testing without the requirements that you need to show symptoms. In order to know who's safe to go outside without harming anybody else, testing is a priority. Most of the small businesses can't follow the six feet rule as much as they will like to, is just not doable!!! I know the economy is extremely important, but we can't just send people out there and start seeing the number of cases start rising and then be in a worse situation than we're now. Why is it sooo difficult to follow the advise of the healthcare experts. They should be the ones advising us when and how is safe. This is about Biology not Politics!! Thanks! Marie DeVita
Miami-Dade	General	Open the State
Miami-Dade	General	I believe all beaches and bars should remain closed. Restaurants and stores should open with mandatory masks required for stores. Restaurants should create more spacing (every other booth/table). Parks unfortunately is a haven for germs with kids. All monkey bars/slides should be closed. Parks should only be open to walk. Movie theaters can also create distance, every other seat blocked after every 2, social distance markings on floor for concession. Restaurants should also work by reservations to control volume. Stores should only allow a certain amount of people at a time and NO MASK NO ENTRY.

AMERICAN OVERSIGHT

St. Johns	Recreation	Florida is filled with healthy people. Retirees move to Florida not only to enjoy the beaches and recreation areas but to live a healthier lifestyle. It's not right to quarantine healthy people. It's unhealthy to force someone to stay indoors; isn't that what your Mom has told you since you were a little child? Strolling on the beaches, running on a trail and swimming in the ocean are things healthy individuals do every day. No one is catching Covid 19 from walking on the beach. The virus is not lurking on our trails nor is it floating in the ocean. Let's follow Mom's advice: Go outside and play! Don't restrict our hours and don't let counties make their residents where muzzles. If you're sick or sickly, go ahead and wear a face mask if you wish but to mandate it has not proven to be beneficial and is also creepy and dehumanizing.
Broward	General	The state should not reopen until there is widespread testing available and doctors and scientists (not politicians) say that it is safe to do so.
Palm Beach	Recreation	The beaches should have never closed due to the fact that sunlight has a negative affect on the virus. Please open fully our beaches and outside recreational activities. I have personally never been in favor of any of the shut downs and would be in favor of a complete open now. I'd love restaurants and small businesses to be operational now, inside dining and shopping. Enough is enough. Our economy has been devastated as has the lives of those that own businesses here in palm beach. The shutdown has caused more damage than the virus itself. Our hospitals are empty..,time to resume life!
Brevard	General	See attached file. Thanks.
Pasco	General	Please do not open Florida until the CDC Criteria announced by Trump have been met. People will die. We need TESTING TESTING TESTING.
Bay	General	Make sure people have on mask stay more then 6 feet away at all times

AMERICAN OVERSIGHT

Broward	Transportation	Hello Everyone, Crazy times we are going through.. My name is Roger Linde and have information to help get our economy back ASAP with one more 'tool in the toolbox' helping rebuild our Infrastructure. Here in Florida we are using FORTA-FI Fiber to reinforce Asphalt that is getting our roadways to last up to 50% Longer. Assistant Secretary of the FDOT, Courtney Drummond, who reports to Kevin Thibault and Gov. Ron DeSantis, has already assigned 2 highway sections (Hwy 15 N. of Jacksonville and Hwy. 200 by Lake Okeechobee) using this 'Technology'. We are currently working with Sue Zheng, PhD, PE, (Turnpike Materials and Research Engineer) and have attached the Power Point showing a 22+ Million Dollars in savings on 300 miles of turnpike while getting a 14% Increase in ESALs (Longer Life of the roadway). This can be Scaled across the country! President Trump stated last week about 'contractor's' tearing the entire roadways out and redoing the whole thing, he is right, they Don't need to do that! The states, with this technology, just go in and mill off 1 1/2" to 3" of the roadways and then resurface it using this technology. Saves Time, Saves Money, Roads last Much Longer and now you can do Many more miles in the same time period with a lot less money! MORE Jobs NOW! As a construction guy, for me, seeing is believing. I'm a natural skeptic until the concept comes to life and shows its true colors. Boeing was our first project twelve years ago at a military base in Arizona. They had a water main break under our fiber reinforced asphalt two years later. They then cut a 4'x10' section out and put a 'single' anchor bolt to pick the slab up – it came out in one piece! They said, "Asphalt does not do this....." Here is the video: https://www.youtube.com/watch?v=ck0_6lGeyPk This is the Best technology for anyone who drives on our roads and pays taxes to fix them! There is a second phase of this that is personal. I am a DeSantis/Trump/Republican supporter. My cousin, Clarice Henderson, State Committeewoman (Republican Party of Hillsborough) and Jim Waurishuk, Chairman (Republican Party of Hillsborough) want to see our party 'Endorse' this technology first and foremost for our constituents But, Also to help our party locally, regionally and nationally. Crappy roads are an issue for Republicans, Democrats and Independents. Everyone wants these
Sarasota	General	Enough is enough open the economy. People are going to die it is a part of life. We must live and not live afraid to die. Those at risk will have to manage their surroundings.
Lee	Healthcare	Need to restart economy now, especially in areas with low infection rates/deaths. In particular, need to resume "elective" procedures/surgery andd medical office visits as soon as possible for those patients who have been putting off medically necessary procedures or for those patients who have been unable to actually physically see their physicians.
Lee	General	I am an RN. I believe we need to open places that can have large gatherings last. Like clubs, churches, beaches. Opening restaurants and stores with perhaps 25% occupancy would be a good test run to open first. People age 65 and older should be encouraged to remain at home for the first 21 days after the soft openings. Then expand. All persons should be able to get an antibody test before venturing out in public if they so desire. It does no good to offer mass testing because people are contagious before any symptoms, unless they have a known exposure.

AMERICAN OVERSIGHT

Duval	Recreation	Life, liberty and the pursuit of happiness. These three things are so vital to the survival of our state of Florida and all of them are in jeopardy under the current regulations. I selected "recreation" as the area of interest because live music venues and bars were not an option. My husband's business has been closed since March 13th with absolutely zero hope to re-open any time soon. Live music venues bring beauty and creativity to our community but the entire experience centers around lots of people gathering. How, under the current regulations or future restrictions will these businesses survive with an audience of 10 people? They just can't. Our suggestion is that people should be allowed to attend, at full capacity, with the idea that at the purchase of a ticket and entrance to a show each person affirms that they are not sick currently and that they absolve the business of any legal action if they get sick at the event. They can sign a waiver either electronically or in person. Let people who WANT to attend decide if it is ok to go. If folks feel uncomfortable about it, they can stay home. The government cannot and should not be in charge of protecting every person from every possible hazard or risk in life. That was NEVER the role of the government to begin with. Thank you for considering this request.
Hillsborough	General	It's too soon to open stores/businesses up...not enough ppl hv been tested. Here in Hillsborough Cty as of last week only 1% of the population has been tested with the majority being Healthcare workers..there's too many ppl walking around with this virus unknowingly. The numbers of deaths and positive is growing.
Okaloosa	General	I am 100% for opening things back up. Other than our dining out routine being disrupted nothing has changed for us. Enough people have been scared by the doomsday scenarios and stories from the fearmongering media that they will not be rushing out with a reopening. They will be the loud voices of opposition, no one is going to force them to rejoin society. We have a small trucking g company (7 employees) and come Into contact with dozens of people daily making deliveries. We have yet to find anyone who has had or knows of anyone who has had Covid-19 and we cover the territory from Tallahassee to Baton Rouge daily. I know the pressure to follow suit and shut down the state was insurmountable. I think you have done an excellent job given the circumstances. I voted for you for governor and will do so again.
Jackson	General	I am a 44 year old paralegal with Lupus and RA. While I am ready for things to get back to normal, I would feel better about taking another 2 weeks to keep the stay-at-home order in place before opening everything back up. Let things even out or even lessen before we are slammed with snowbirds. I think it is better to stay on lockdown a little longer now, and have a better fall and winter financial season, when our state generates most of its revenue. If we push things too soon, it could prolong, or reignite the entire process. Just a thought from a concerned Floridian. Thank you for all you are doing. Kindest regards, Brittany Garza.
Pinellas	General	Don’t be stupid. Follow the science and keep the citizens safe. If we could just shut everything down for 3 weeks we could get past this. Allowing things like opening the Jacksonville beaches just extends this nightmare. For now, stay closed!

AMERICAN OVERSIGHT

Santa Rosa	General	Please open the beaches and open small businesses!
Franklin	Tourism	The ban on vacation rentals must continue at least through the end of May, Our county's tax revenue generator, St. George Island, is the major visitor draw into our county,. Currently, we only have 2 positive cases and this is because of the vacation rental ban that the governor so wisely has put into place in our state. With county's limited and questionable medical capabilities, we can not begin to welcome visitors from all over the United States who will certainly bring new virus to our area. We want visitors to return but not at the cost of bringing more virus, sickness and death to our island and county,. Currently our county is helping our state keep the numbers of cases and deaths low. We do not want to become a state vacation HOT SPOT. If that is to happen, our economy will certainly never recover! Let Franklin county continue to help keep our state's virus numbers low, At least until, the number of cases significantly slow down and people begin to comply with daily mask usage in our county, state and in the rest of the US, Vacation visitors now or too soon could become a disease as bad as the coronavirus.
Volusia	Healthcare	Its too early to reopen State! We need to wait-people Are still dying
Polk	General	Dear Governor DeSantis, I am a resident of Polk County. Florida was built upon hard work and self-sufficiency. We are a resourceful and responsible people. It is time to let Floridians do what they do best; get back to work. Every business is essential when a family's provisions are dependent upon that income. Current statistics show us that divorce, child abuse, alcohol abuse and depression are on the rise as a result of our inability to work without penalties and provide for our needs. It is time to repeal the restrictions upon our businesses so Floridians can get back to healthy and productive lives. Floridians love their neighbors and know how to use common sense to live and work safely. Please lift the penalties on our businesses while maintaining the recommendations of the CDC so that Floridians can provide for their families. Floridians are good people; we are fully capable of operating our businesses while voluntarily engaging in the practices that will help keep our neighbors healthy. It is time to put Florida BACK TO WORK. It is time to lift COVID restrictions upon our businesses. Thank you.
Citrus	General	Please do NOT open Florida yet. It's too soon! Sir, I cannot do this quarantine again AT ALL!! I cannot risk it. It's only been a few days since the "peak" but that's because we're all home! Please just keep closed a little while longer, because I cannot do another isolation stint, but it sounds like that may happen if we open early. My advice: wait at least an additional two weeks to level off so we never have to do this horrific act again!!

AMERICAN OVERSIGHT

Palm Beach	General	REOPEN FLORIDA NOW! DeSantis' comments today (4-25-20) about sporting events and bars not being open for "a long time" is unacceptable. The hospitality industry has been the hardest hit for unemployment that you cant even process for most. Unacceptable. We have hospitals UNDER CAPACITY and COVID is not deadly to 97% of the population. It is LESS deadly than the flu! Please STOP following the liberal media and liberal local leaders in South FLorida. They have no care for the economy. Fauci is using this to inflate his numbers by having ANY death declared COVID related. There is a hidden agenda with CDC, WHO, NIH that no one wants to investigate or acknowledge. None of the citizens in South Florida are worried about this. There is starting to be a trickle down effect on employment in other sectors due to lack of income overall. If we dont end this NOW we are going to have FAR MORE unemployed people needing unemployment funds that Florida cant even manage to pay. We cant continue to print more money. That is a great way to have another DEPRESSION worse than 1929-1930s.
Seminole	General	I think the state is running how it should run for the next several weeks-to-months. Restaurants can continue selling food via delivery or pick-up. Essential businesses should remain open. We need time to implement permanent safety procedures for entertainment based businesses, such as the movie theater I am a salaried manager for, and all of the theme-park based businesses we have. Human lives are more important than profit. We only need air, water, food, and safety to survive. It isn't necessary to prematurely open all of Florida, especially when there is no vaccine for COVID-19.
Alachua	General	Can we open a small percentage of all business? Ask those who can stay home and distance as much as possible. Also keeping things sanitary.. Yes I think we need to open things up again, only slowly and cautiously. I commend our state officials and our President, Donald Trump for their actions during this unprecedented event.
Palm Beach	Construction	Open those areas other then Dade, Broward and Palm Beach fully with some exceptions.. All over 65 and those with compromised health should stay at home . Restaurants, theaters , stadiums, and areas of large gatherings where 6 feet apart is impossible must remain closed for first phase. At the discretion of the local mayor salons, gyms and other personal businesses must operate with a set maximum of clients at one time based on space. Plastic shields should be worn by employees who come closer then 6 feet. Areas must be sanitized after each client. Golf courses statewide should be open with same rules at Villagers. Workers should be given protective masks and use of hand held thermo thermometers is recommended.

AMERICAN OVERSIGHT

Hillsborough	General	Please allow Florida to re-open in early May (or sooner). I am extremely sad and sorry for anyone impacted by the health issues from COVID-19; particularly anyone who has lost a loved one. I am also thankful for the medical professionals and mindful of the toll this has put on them. With that said, I am also saddened and concerned about the extreme hardship, stress and anxiety placed on business owners and individuals who have lost their job, taken significant pay reductions and are living with constant worry and stress surrounding the the long term viability of their business and their ability to meet their families' financial commitments . It is important that we manage and deal with all aspects of this crisis - not just the immediate health issues directly related to COVID-19 - but also the many long term impacts (economic and health) from the devastation to our economy. We need a balanced approach that considers all impacts and individuals. Reopening the economy is the first step in taking that balanced approach. Those individuals who are at risk should certainly continue to quarantine or "stay at home", but others should be allowed to return to work and be allowed to support other businesses trying to survive. The CDC has provided extensive guidelines on safety including wearing face coverings in public, staying home if you have any symptoms of illness, hand washing, etc. Business owners and individuals should have the opportunity to return to work, while following these safe guidelines which at least gives them the chance to save their companies and their jobs. The government has done a great deal to help business and individuals which is wonderful, however nothing is enough to replace a full time, permanent job/career and the government cannot sustain these levels of support to businesses and individuals indefinitely. I believe we need a long term strategy that balances both health and economic impacts to include: protecting the vulnerable; ensuring hospitals and medical professionals have resources and protective gear; and allowing most businesses to resume while utilizing the CDC recommended safe practices. Thank you for your consideration.
Broward	General	I think you should not lift any bans until u see a steady 2 week decline and more testing is implemented. Both for active and people to be tested for antibodies.

AMERICAN OVERSIGHT

Seminole	Government	Governor DeSantis and members of the Re-open Florida task force - PLEASE let's get this going. Our numbers are stable, and honestly minimal, for a 21 million people state that sees so much influx of tourists from around the world. We have done our part; we flattened the curve and we did not overwhelm our hospitals. We are not going to stop this virus (and yes we probably will see a spike) when we lift lockdown. We have essentially delayed the inevitable spread by being in lockdown. The virus (the numbers) is moving towards being not much worse than the flu. We have to assure people that we will be okay and safe and we need to get back to living. We cannot continue to "live" in fear of dying! I am a pediatric physical therapist. I need to get back to work (in person) and help my kids and their families. I have 4 kids who are struggling (and they are straight A students) with this distance learning. We CANNOT continue this into a new school year. I have a senior who wants to have graduation. Dr. Walt Griffin of SCPS has worked out a back up plan and these kids DESERVE to have that plan happen in June. We need to start moving forward and making strides with gradual lifts so that we can be out of strict social distancing guidelines for gatherings to allow graduations, summer parties, work, sports, beaches, LIFE by June/summer. Florida NEEDS summer! We need you to make the best decision for all. If people are unhealthy they can stay home. We can still help them. But let the rest of us get back out there so that we can help them and ourselves. Let us live our lives normally, with work and play. We are safe. Just as safe as if we had the flu (or the other thousands of germs out there) spiraling around, swimming in our oceans or boating, or driving all over the state. We, the people, who are workers and active participants in society, want you to RE-OPEN FLORIDA NOW!
Pasco	General	I am in support of re-opening the state and relaxing social distancing guidelines as soon as possible.
Palm Beach	Recreation	I would like to see recreational activities open to the public including RV camping at State Parks and RV resorts.
Pinellas	General	The coronavirus is still circulating. Cases could spiral up to catastrophic levels all over again unless proper measures are taken. The state shouldn't open up unless they have a robust system to detect and quash new flare-ups by testing to see who is infected, tracing their contacts, and isolating and quarantining as needed.
St. Johns	Government	why would you not reopen Florida when it should never have been closed at all. the number of deaths is tiny compared to the population of Fl. since when is the well being of our state and country not worth such a small percentage of deaths? the veterans of WWI and WWII would be nauseated at the lack of patriotism in this state and in some parts of the country.reopen fully now.
Lee	General	I believe it is time to open things up. The sooner the better. Do I think we'll have a mass exodus from our homes? Likely. However those that are worried will stay at home and that is their prerogative as is mine to venture out. It is the same during flu season. I am taking a risk going out to dinner, flying etc. however to keep everyone locked up and keep the economy in a downward spiral is irresponsible and costly at this point.

AMERICAN OVERSIGHT

Seminole	General	Please open the state back up! We need to get back to work. With unemployment not getting approved, we have no way to make money. Trying to do small jobs for money for food but bills can't get paid. Please Open!!
Manatee	Recreation	Please open the beaches. Social distancing guidelines could be put in place to make this safe. I believe that people would be responsible enough and grateful to have this opportunity back in their lives. I also believe that you could open a high percentage of small businesses. Again, keeping social distancing and sanitizing regulations in place. I can't imagine being a small business owner and driving by a packed Home Depot. If Home Depot can make guidelines work, so could a place a tenth of the size. Even better.
Hillsborough	Professional Services	Dear Governor DeSantis, I am a resident of (Hillsborough County). Florida was built upon hard work and self-sufficiency. We are a resourceful and responsible people. It is time to let Floridians do what they do best; get back to work. Every business is essential when a family's provisions are dependent upon that income. Current statistics show us that divorce, child abuse, alcohol abuse and depression are on the rise as a result of our inability to work without penalties and provide for our needs. It is time to repeal the restrictions upon our businesses so Floridians can get back to healthy and productive lives. Floridians love their neighbors and know how to use common sense to live and work safely. Please lift the penalties on our businesses while maintaining the recommendations of the CDC so that Floridians can provide for their families. Floridians are good people; we are fully capable of operating our businesses while voluntarily engaging in the practices that will help keep our neighbors healthy. It is time to put Florida BACK TO WORK. It is time to lift COVID restrictions upon our businesses. Thank you. Sincerely, Stephen Pelon
Bay	General	The numbers don't justify shutting down the Florida economy and putting Floridians at great financial and mental risk. Government does not have the right to determine what is essential enterprise or activity as Floridians see that as God-given and not something dispensed by government. If quarantine would be required, it should be applied demographically and not wholesale to all areas of the state. Quarantine the sick and elderly, not healthy individuals. This decision to shut down enterprise will prove to have been a futile effort to fight a virus that is well below the definition of a a pandemic. We will pay dearly for the poor decision.
Pinellas	General	Please be smart and don't reopen Florida. The cases are rises even when we are isolated at home can you imagine the catastrophe it will bring if we reopen the state. We need to test more people before we make a decision to reopen the state. I want to get back into my normal routine as well but we need to think before we make a stupid decision.

AMERICAN OVERSIGHT

Miami-Dade	General	I don’t think MIAMI Dade is ready to reopen . I think the state is worst today then it was you guys decided to shut it down . I’m dying to be able to open my business and go back to work but we new to start bring down the numbers of infected people in the state first . I think you should start opening the counties of the state that doesn’t have many cases
Palm Beach	Recreation	Open beaches just like Jax beach opened. No blankets, no coolers, etc. Morning hours, evening hours, social distancing & no groups of more than immediate family
Broward	General	1. Need longer hours for doctor's offices. Right now they are only opened for 4 hours. 2. Open parks from 8:00 a.m. to 1:00 p.m., 3. Let banks open inside for normal hours. 4. Most of these cases are in assisted living areas. Have the elderly stay with family members and clean the facilities. This way they are given the right care. Most don't have doctors or RN's on staff to help. My mom died in 2009 at the Court of Palm Aire have surgery. She was never watched. 5. Have yet to receive my unemployment or updates. 6. Have yet to receive my stimulus direct deposit. Please research these areas. I'm 61 years old and need these funds as I'm not working. Thank you.
Miami-Dade	General	Healthy nurses, doctors, employees, leaders enable our recovery. They keep productivity up, cost of replacement down. Covid 19 has no cure yet. It has hit close to home for too many of us. A new economy will rise to respond to this deadly virus. For now, starve it out. Have trucks with detergent spray our streets in zones during temporary curfew. Social distancing pays! Live to fight another day. Robots to do chores. Re-tooling to make masks. American creativity, initiative shall enable survival. This virus does not discriminate, but we can prioritize our actions to enhance our longevity. Embrace the new normal, not rush to old, deadly habits. Time to reopen parks, restaurants is when this virus is down to single digits, proof that we are doing what it takes and shall keep up that practice. Meantime, let's give the drive thrus more business.
Marion	General	Recent statistics indicate that around 70% of the population of The Villages is over age 60. It would, thus, appear that The Villages has the largest population of elderly, at risk for Coronavirus, anywhere in the State of Florida. For all I know, it could be the most concentrated area in the US. My question is: Why are there no Coronavirus testing facilities located in The Villages? UF did testing for about seven days, in total. One group practice in the area does testing but requires a doctor's tele-health call with their practice before testing. It seems to me that with the simple volume of at risk population, there should be at least one testing site in The Villages, if not several. Please tell why we are being excluded.
Palm Beach	Recreation	Please open anything outdoors. Most people social distance outdoors anyway. Please. Pretty please.
Volusia	General	Open the state with social distancing and must wear mask. Allow restaurants to open with social distancing in mind. It should be the responsibility of the people with pre-existing conditions to stay isolated until situations allows otherwise. I’m retired and have pre-existing conditions and I feel it’s my job to protect myself and family. If we don’t start to get the economy open we will all suffer beyond belief!!!!!

AMERICAN OVERSIGHT

Broward	Recreation	Tennis courts should be reopened. Why? I'll explain. Tennis is a game that only can be played by 2 people on each side in doubles, 1 on each side in singles. Practicing self distancing is quite easy. As responsible adults, we were playing that way right up until everything was shut down. Especially courts inside developments, where people don't congregate like at a tennis club perhaps.
St. Lucie	Education	Decide the protocol to opening Florida. Inform everyone. Let employers decide when they are able to follow the protocol and safely open their business. Open the beaches and parks.
Marion	Healthcare	We should not re-open businesses before there has been widespread testing. Asymptomatic people have been found to have the new coronavirus, and they can spread the virus to others without being aware of it. Everyone who goes back to work must be tested. Taking every employee's temperature at the beginning of the work day is not good enough. It is true that the economy is important, and many people are desperate. Unemployed people in this state have not been able to get their unemployment benefits, but the "broken" system was designed to fail. Some stimulus checks won't reach folks until September, and if the USPS goes under, the checks won't be delivered then. These are problems to be fixed later, but right now we need to keep from spreading the virus even more broadly. Test everyone! Maintain the use of masks and gloves for all those who go back to work, even after being tested and getting a negative result. Maintain six-foot distances in restaurants. Places of businesses that operate only to keep people from being bored should be last on the list of opening. Exercise is important for good health, but gyms should maintain distance. Test everyone first! Our state can do this, even if the U.S. can't. Thank you for your attention.
Bay	General	Hello my name is jenna I'm a hairstylist in the Panama City beach Florida community. This pandemic had affected me from not working but I knew this was for my safety and the safety of others. And I abided by all of it. What I'm getting to is I don't think salons spas and nail salons should be open. It is too soon and we are still in the middle of this fight. We need to listen to healthcare officials and their opinion on when it will be safe to reopen and when to do so. This needs to come from licensed professionals who are physically on the frontlines and know what is going on. We live in a state where tourists are our biggest revenue. Once we open they will all flock at once and it will cause a second wave of a pandemic that bay county is not able to handle. I also saw about using face shields and face Masks without having the resource to be able to stock up on. These resources belong more to our first responders than our salons because they are still in need of them. State board is not prepared on what to do when salons open and what sanitary precautions we should take. I've read their suggestions and it is way overwhelming. I would rather stay home until mid or end of may knowing I'm making a difference by doing so. I do miss my job and I miss my customers. But their safety and health matters as well. Please make the right decision and do not let salons open soon. This will take time but we will get through this!!
Broward	General	Open it. $1200 (+$500 per child) is not enough for 10 weeks!

AMERICAN OVERSIGHT

Manatee	General	Please consider reopening the state so the thousands of workers can get back to work to feed and support their families. Also, reopening the beaches and pools. People have enough sense to social distance. Families are struggling, fighting and losing their patience. Please reopen. Thank you
Duval	General	We need to open up the state. It's time to get back to work and live our lives as our founding fathers envisioned. There is nothing to fear but fear itself and this virus is nothing at all. This is just media hype! It's more dangerous to drive these days as We kill more people on the highway than any flu or virus ever. Those who live in fear can stay home and hide under their beds. The rest of us need to get back to work and take this country back again to its prior glory.
St. Johns	General	Please open the state gradually or the state will be ruined forever. We cannot let the cute be worse than the virus. Look at the antibody studies around the country. The virus is more prevalent and less deadly than we know. We need to open up again.
Orange	General	Regardless of whether or not a business is deemed 'essential' or 'non-essential' the guidelines for any business to be 'open' should be universal and compliance to those guidelines should be the key to whether or not a business can 'open'. I would require all businesses to produce a plan outlining how it will maintain compliance. That plan should be submitted to/approved by the county/city/township/municipality/etc. The plan should also be made available to the general public. I would create a mechanism by which individuals (either employees or patrons of a business) can report non-compliance to the county/city/township/municipality/etc. All reports should be investigated timely and if that business is deemed non-compliant it should either be penalized with fines or closed depending on the severity of the infraction. I would defer to healthcare experts to outline the guidelines.
Hillsborough	Food	IT'S TIME TO OPEN FLORIDA! Let the people go back to business as usual, it is overdue! Thank
Polk	General	If people want Florida to reopen then reopen, but for those of us who choose stay home an protect ourselves should have the option to do that as well. For me and my family we only go out for grocery shopping and work (company with over 100 ppl, only 5 ppl or less in the office). I think it's sad that people, government and business think money is more important then people lives. My family and I will not be going out there and my child will not return to school until we feel it's safe. There is still a hand full of people who have not gotten tested (aka my family and I) who are still walking around and also there is no vaccination. Reopen fine but people who want to stay home an protect ourselves should have that right too.
Seminole	General	Open the State!,
Broward	General	Please do not make any plans to reopen the state until there is evidence that cases have declined. At that point, then I think a phased reopening approach would be appropriate with weeks in between before additional reopenings are made. I know people are anxious for things to get back to normal but we cannot do so until the medical community and scientists confirm that it's the right time.

AMERICAN OVERSIGHT

Broward	Retail	Home Depot and Target are managing the number of customers ... and I feel safe there. I think beauty salons, retail shops and restaurants could learn to manage the number of people and the community can be proactive in protecting themselves.... We have to move forward! We can always go back and put in more restrictions again....but it's time to go forward. It will never be perfect, ie with no infections... but there is no guarantee in life as you know.
Miami-Dade	Healthcare	Don't open the state yet. Close the beaches again. Don't listen to trump or anyone in the administration. Put your Surgeon General back in charge of the entire incident. Do what he says. We need tests - lots of them - and lots of masks sent to everyone. And you should pay people lots of money for unemployment. Do what Gavin Newsome is doing in California. If you think something is right, DeSantis, don't do that.
Seminole	General	For the health of our residents, Florida should remain closed. Too risky at this point to reopen. People do not abide by social distancing rules & reopening will cause more deaths & make it even harder to get rid of the virus.
Hillsborough	Finance	Thank you for opening this up for Floridians to be heard. It is completely heartbreaking that anyone has lost their life to this vicious virus and my heart aches for the families of lost loved ones. This being said, I believe the greater harm has been done by a continued closing of businesses. There are at this moment just about 50,000 that have passed away and 900,000 that have tested positive for Covid-19 within the US, at the same time there are OVER 28million Americans out of work, kids as well as adults committing suicide, the mental health of the country is in dire danger, emotional as well as physical abuse is up and the moral of the people of our great state and country is rapidly dropping. We are in need of a restart FAST! I understand the need to be safe and would still encourage people to stay home that are older or sick, those that choose to go back to life can do so with masks and other safety measures, they need to go back though! America has always been a democracy, what is best for the good of the people as a whole is what is done. When you put the facts on a scale the balance is WAY off! 50,000 does not even compare to 28 million! Masks, gloves and sanitizers will help us get through this until a vaccine is available. We can not continue to lock our world up we need to let people live, work and play and bring life back to Florida. Signed- an OCD clean freak😬
Marion	General	As a resident if a 55+ community it is my concern that the reopening process will be done too quickly and broadly. Yes, we need businesses to open and I believe those to be truly essential. It has been 2 months since my last haircut. Unless the salon can guarantee the 6-foot social distancing for anyone but my stylist, I will continue to wait. This process must be done in small increments. That will allow the medical experts the ability to rein things in if there should be any spike. My husband and I are being cautious. We have a great deal more living to do. It should be life over revenues. Thank you for reading this.

AMERICAN OVERSIGHT

Broward	General	I'm not interested in opening up Broward or Miami-Dade counties. Would just make the hotspot worse!
Duval	Healthcare	Until we are able to test the majority of Floridians and start contact tracing, no plans should be made to open our businesses, parks, beaches and entertainment establishments period.
Pasco	Management	Why would we reopen Florida at all. We have no cure for this disease no vaccine social distancing really hasn't worked the cases in Pasco County keep going up and up and up and up. As of this past Friday I felt symptoms in par with covid and I just recently got tested this past Wednesday and I'm awaiting results with an upper respiratory issue. I work in an automotive shop as an essential worker and no one ever stopped coming. The social distancing guidelines were never followed people were out and about no matter what so what do you think is going to happen when you guys decide to open with social distancing 6 feet apart I had to close my doors because people just didn't care to follow the 6ft distance. we were basically taking care of people's car outside of my garage with a chain that was six feet from them just so they can understand that there are guidelines that aren't being followed people were just walking into my showroom straight to the counter like nothing was happening in the world. If the economy cannot take another hit for another month so be it open but make sure that you make it mandatory for people to have masks on at all times if people don't like it oh well and make sure that our police force reinforces that rule of wearing masks all the time and if people don't follow that rule make them go to jail because they are putting people's lives at risk.
Bay	General	There should be a phased reopening starting May 1st so that things can get back to normal or closer to normal. People can get their jobs back, seniors can have graduations, people can go to the beach and other things. It would be beneficial for the economy and the mental health of everyone who cannot leave their homes.

AMERICAN OVERSIGHT

Palm Beach	Recreation	I am a member of USA Swimming, as well as the parent of two USA Swimmers age 13 and 18. My children have been training at the North County Aquatic Complex in Jupiter under Coach Kiril Zavariev and the Jupiter Dragons for the last 8 years. We love our coaches, we love the facility and the staff, and we miss our pool! We understand and agree that you had to close the County pools on March 17th due to the COVID-19 restrictions as set forth by the Florida government. It is my hope and prayer that once the government begins to consider lifting restrictions, you would give special attention and consideration to the USA Swimming members who partner with PBC for daily use of the pools, and who have been unable to train for over 6 weeks due to the pool closures. Swimming is different than many other sports, in that it is individualized and there is no physical contact with the swimmers. There is no community equipment (each person has their own), and there's plenty of lane space (in a pool with chlorine and disinfecting chemicals), so it is much easier to practice social distancing. That said, swimming is also unique in that it involves building up a type of endurance that can only be maintained in the water through hours and hours of repetitive swim. By May 1st these club swimmers will have been out of the water for over 6 weeks, which is extremely detrimental to their unique training. These kids have worked for years and years to build up the endurance it takes to swim competitively (of special consideration one of our own swimmers made the Olympic Time Trials and has no water to train in until the N County Aquatic Center reopens). Not to mention they are the LEAST vulnerable to the COVID-19 virus due to age. Our team coaches (as well as the other coaches of teams who train in other PBC pools) and many of your lifeguards have lost their entire source of income due to the pool closures. We also recognize the County has lost significant income from our clubs. We love our coaches and the lifeguards and are greatly concerned for their financial well-being if the pool closures continue much longer. I'm extremely grateful for your commitment to the safety of the community from this virus, and I am sure you are just as eager to get the pools open when it is safe to do so as we are. I understand our coach has presented the County with a plan to operate practices safely under strict social distancing and sanitizing measures. I just ask that you please, please consider the
Broward	General	Since the number of cases and fatalities are still increasing I think it would be prudent for the stay at home to be in effect until May 15. I believe that parks and golf courses can reopen since they have little direct contact, but that beaches shouldn't since they seem to have difficulty with keeping social distancing. I also feel that nail and hair salons should have very strict guidelines since they are in small quarters and will find it difficult to maintain social distancing. Gyms definately not for definitely not for at least a month. Restaurants are really difficult because that can affect many if they don't adjust proper social distancing according to the map shown on TV. I know that Governor DeSantis is trying to do the best job possible during difficult times so lets keep it safe and do the right thing.. Better safe than sorry. Thank you for listening to my opinion. .

AMERICAN OVERSIGHT

Leon	Recreation	Would love to see sports and Rec reopened with social distancing in place. Let the swimmers swim, the runners run, the bikers bike, the golfers golf, beaches opened, for folks and kids to have outlets to train, de-stress, be healthy to avoid a second pandemic of anxiety, obesity, depression, etc. Two swimmers in a lane that push off from opposing walls seems plausible. Track teams with workouts 6' apart seems possible. Releasing those restrictions and the apparent liability fears on not relying on stage guidance would go a long way.
Sumter	General	Can we spray the streets with disinfectant like China is doing?
Seminole	General	Open the state TODAY!!
Pinellas	Healthcare	Please get plan to reopen on May 1. Lockdown was to get medical industry ready - NOT to stop the virus from spreading. Furloughs are turning into permanent firings. Many patients aren't getting medical treatment. Time for plan to be ready for May 1! Thanks & my prayers are with you! Thora Cook
Hillsborough	General	I only ask that you please take into consideration the findings of the antibidy tests being completed. They are a much greater indicator of the widespread infection rate associated to this virus. They also show us the death rate is significantly lower than what was predicted. Though some accommodations may be needed, its time to progress toward reopening. A detriment has occurred to a higher number of people than this virus will kill and if the current restrictions continue the virus will have a greater indirect impact than what has occurred with those infected. We must think of the greater loss and the larger picture.
Volusia	General	Open it up- people need to be personally accountable for themselves
Brevard	Education	I don't agree with thw area of interest question is appropriate. Making us pick is not right. My concern is for everyone. I think that the state of Florida has not tested enough percentage of the population to determine it is okay to reopen. My county has not even had a decrease in cases for the requisite 2 week period as states by guidelines. I have lived here for 4 years and have been disappointed consistently by the state government.
Lake	Food	Yes we need to open soon... follow the other states that are opening
Orange	General	I am asking you to please open back up the economy. I am someone who works in Education and has seen sickness. Those people who are sick can stay home along with those people are who are thinking it is too early. My husband works in the tourist industry and we are feeling the financial burden of being furloughed. If you slowly open back the economy there can be precautions taken to ensure everyone's safety (I see it being done at places like Publix and restaurants that haven't had to close). I also believe this will solve many issues including the unemployment system website problems. Please consider Florida and how much we depend on places like Disney. For the amount of people our cases are good especially when you consider the younger population. Life is full of risks and I am willing to risk it for a better life. We can't live in fear forever.

AMERICAN OVERSIGHT

Seminole	General	Please leave the State of Florida closed for a few more weeks. I understand the need and reasons to jumpstart the economy but please not at the expense of human lives. There is still too much not known about the coronavirus and it's long term effects. I live in a neighborhood with 3 newborn babies, 2 school age children who are type 1 diabetics, 1 chemo patient, 4 cancer survivors, and many elderly people. We are all practicing safe distance procedures and still looking out for one another. Thank you for asking our opinion. It matters greatly. Pamela Rudl
Orange	General	put Measures in place to protect those vulnerable to severe cases of vivid-19 and let the rest of the population go back to life. For most everyone, this is no worse than a cold or flou. It's ridiculous that everything is closed. It's just mass hysteria at this point.
Seminole	General	Subject: coronavirus I would say that the at risk people & general public should take measures they feel comfortable with. There should be no mandates only recommendations we can't keep kicking this issue down the road. It going to be with us probably like the flu so we are going to have to get used to it. The only thing to fear is fear itself and I say this as a person who is old and at risk. Stop the fear mongering ! Stop f.. things up ! Thanks !
Hillsborough	General	Dear Governor DeSantis, I want to thank you for recognizing in your Executive Order 2020-91 that "Attending religious services in churches, synagogues and house of worship" is an "Essential Activity" and lifting the restrictions on the Church's Right to assemble statewide. I am requesting that you also recognize that the First Amendment includes the Right of all People to Peaceably Assemble. In consideration of the essential right it is important to note its connection to the Right to Petition the Government for a Redress of Grievances. Without the Right to Peaceably Assemble the Right to Petition is strangled into non-existence. Historically, the power of the people to petition their elected representatives has been recognized to be most powerful in the exercise of assembly. This is why our founders enumerated both of these Rights in the First Amendment. The Supreme Court has held many times over the history of America that the Right to Peaceably Assemble, especially in the aspect of protest and petition, is a "Bedrock Principle" of America. You have repeated publicly that the government has no authority to regulate the meeting of the church, neither does the government have an authority to prevent the people from peacefully assembling in petition or protest. As you did for the church, please lift all penalties imposed upon Right to Assemble and trust the people to follow the guidelines set forth by the CDC.

AMERICAN OVERSIGHT

Broward	General	I think the Florida should re-open (relax statewide restrictions on) small business operations throughout the entire state as soon as the new Federal guidelines permit. As it stands today, we already have many "essential" businesses, including grocery stores, pharmacies, banks, etc, carefully in full operation mode; and there is absolutely no evidence to suggest that any of these daily operations have led to any further transmission of Covid-19. Therefore, it's time to elevate that same sort of operations to other businesses, perhaps all of them, as quickly as possible in order to prevent further detriment to our economy and way of life. As it has been pointed out by many other Governors and state policy-makers, the mitigation of the Covid-19 outbreak should never be deployed to the extent that it actually causes more harm than the virus itself. This could actually occur should these mitigation restrictions continue much longer than what we have already experienced. Now is the time to re-open the state!
Lee	General	As a new FL resident, I telecommute and have for about 20 years. I have very minimally been impacted by the lockdown. I go to a smaller PO once a week and the grocery store once every 2-3 weeks. I've observed that people are respecting the masks and social distancing. Grocery store was just as crowded as normally as was Ace Hardware on 4/25/20. I see no reason that park trails can't be open or the beaches since it's shown that more people are catching this in tightly enclosed areas. The best resources should be directed at only the vulnerable, as determined by the patient's records and practitioner signing a document if they need assistance. The rest of us should be working like usual as able. Would be cheaper to identify those just like we do with SSI. Set a criteria based on the data of who has passed away and why the virus attacked them like it did. It should be revisited each month. I feel FL has done very well being the 3rd most populous state in the US. Bring back some limited salons/barber's with contact tracing and measure it's success. None of this fair to anyone. Open in small clusters and measure. Find a system that works, share it with other states. Time for some normalcy.
Palm Beach	General	I am in favor of opening public parks and beaches at first as long as caution and social distancing are being used. It makes sense at first to to follow the access and guidelines established in Jacksonville, but eventually, If there are no spikes in Covid-19 cases, I would like to be able to bring a chair, cooler, other items to these locations. I would not be in favor of opening businesses until there is wide spread testing for all, and at least a 14 day decline in new Covid-19 cases.

AMERICAN OVERSIGHT

Martin	General	Its too soon to reopen wait till end of May. But especially our beaches need to stay closed to avoid people traveling here to use them from hot spots in southern Florida and NY/NJ . Thats just common sense? Listen to the Drs Also Im tired of ridiculous border check - we have people here from NY laughing they will never do 14 days. They used the Round Beach , stayed 2 weeks on vacation and left. Home Depot snd Lowes are packed .. people are not taking it seriously? Step up your game governor?
Orange	General	Please start with limited opening of the state on May 15. Curbside and take out pickup should be allowed with no one in the stores.
Clay	Healthcare	Allow dental offices to reopen for routine treatment
Duval	General	DON'T REOPEN!!! My significant other and I are both "essential" employees (medical and financial fields) and have felt exponentially safer since the state lockdown. We are exposed to the ignorant masses on a daily basis and the stress of the situation has taken its toll on both of us. Businesses/The economy can learn new ways to operate. A reopening would only cause a further spike down the road, numbers have proven this. Please consider those of us who haven't had the luxury of self-quarrentine. We are exhausted.
Orange	General	I don’t think we should open up the economy until the Doctors say it’s safe. If we get a resurgence of the Virus after prematurely opening, it will do more damage. If people don’t feel comfortable even after you reopen then many businesses will fail & completely close. Maybe do very selective companies but not a complete reopening.
Broward	Administrative	Please re open florida
Miami-Dade	Retail	All retail is essential. All normal life activities are essential. We can protect those at risk better if we focus ONLY on protecting those. Continuing this shut down will create more famine than covid 19... to Floridians, their families, as well as to Florida's well-being as a whole. Please allow Floridians to return to normal life immediately. GA, SC, TN, TX are very close. PLEASE Thank you
Miami-Dade	General	The trolls who say not to open the state are fake, I know that for sure. Everybody in Florida wants to be able to go to the beaches, pools and restaurants now. Corona virus hoax revealed by Dr. Shiva https://www.youtube.com/watch?reload=9&v=9Z1QJI-BJvA&lc=Ugx07UdqdeZEy_znnrl4AaABAg

AMERICAN OVERSIGHT

Palm Beach	Professional Services	Develop guidelines so small businesses (barbers, hair salons, nail salons) can open. Trust that owners of these types of businesses are going to do the right thing...their business depends on ot. No walk-ins, appts only. Stagger employee hours so distance can be maintained. No food. All must wear masks. No reading material left around. Sanitizer available. Thank you
Miami-Dade	General	The idea of opening some outdoor restaurants and other activities is likely good. For indoor, I do not think we are there yet. The large number of cases in South FL indicates that longer stay at home rules will be necessary to control spread. This virus is just too contagious and a rush to open up is likely to create a surge and bigger problems than we have seen already. As long as hospitals and medical facilities are not stressed, non-Covid related procedures should be allowed to continue.
Bay	General	Hello my name is jenna I'm a hairstylist in the Panama City beach Florida community. This pandemic had affected me from not working but I knew this was for my safety and the safety of others. And I abided by all of it. What I'm getting to is I don't think salons spas and nail salons should be closed. It is too soon and we are still in the middle of this fight. We need to listen to healthcare officials and their opinion on when it will be safe to reopen and when to do so. This needs to come from licensed professionals who are physically on the frontlines and know what is going on. We live in a state where tourists are our biggest revenue. Once we open they will all flock at once and it will cause a second wave of a pandemic that bay county is not able to handle. I also saw about using face shields and face Masks without having the resource to be able to stock up on. These resources belong more to our first responders than our salons because they are still in need of them. State board is not prepared on what to do when salons open and what sanitary precautions we should take. I've read their suggestions and it is way overwhelming. I would rather stay home until mid or end of may knowing I'm making a difference by doing so. I do miss my job and I miss my customers. But their safety and health matters as well. Please make the right decision and do not let salons open soon. This will take time but we will get through this!!
Palm Beach	Education	For college students, they're debating when they will be able to go back to school in the fall. Students who live off campus with leases are debating if they should renew the lease or get a new lease. I think that we should be able to give these students a response or decision by May first. Colleges in the north like UF locates in Gainesville Florida has double digits of corona cases and the county has 200+. Leon county where FAMU and FSU are lobster at has double digits. Besides east side of Florida where I live and Orange county, Some of these countries are ready to be open to phase two, Rather than pass one. I think Governor Santis should open the state by counties and set deadlines for the next phases. And have a goal.

AMERICAN OVERSIGHT

DeSoto	Construction	Just open the state. This is just another influenza. We can't sacrifice our livelihoods, and future, to save a few lives...Humans cannot stop a virus....remember citrus canker....it's a parallel to this situation The idea of humans staying 6 ft apart, is inane and ludicrous...we aren't made that way. Humans are social animals.. Open up our lives...save our Bill of Rights, which is being trampled and ignored. This is flagrantly in violation of our Constitution. It was an irrational action, to close down. The virus will do what it wants. Each day that goes by, damages every American, more and more. Please stop this madness.
Orange	Tourism	Open Walt Disney World!! People want to come. Start by opening Magic Kingdom and Animal Kingdom (largest and easiest to social distance in) plus the resorts and Disney Springs. Only allow people with resort reservations and Florida residents. No busses either. Everyone must use their own vehicle or ride share services.
Alachua	General	Dear Governor and Task force, It is imperative that you begin opening up Florida for business immediately. We have now crossed the line where the cure, shutting down Floridas economy, is way worse than the actual virus. Every day you keep businesses closed you are hurting the hardworking citizens of this great state way more than COVID 19. Our state should be leading the way on how to safely allow businesses to open up and begin recovering this country. The entire point to the shut down initially was never to have business closed and life stopped until there was zero risk or a vaccine. We did this to flatten the curve and most importantly not overload our health care system. That goal has been accomplished- it is time to re-open our great state immediately. It is time to stand tall and led the way back for the rest of the country. The Death rates of COVID19 do not support the continued shut down. The models have been proven wrong and the extreme measures we have taken are unnecessary. The unintended consequences are worse than the virus. It is time to re-open Florida! Life, Liberty and the Pursuit of Happiness- comes with inherit risks. Each citizen should be allowed to access those risks for themselves. Please re-open this great state. Sincerely, Aimee Oelrich
Lee	General	Open the state up. This has been a horrible extreme overreach of government.
Martin	General	Please Rez-open. We are not NYC. The curve is flattened! I am an RN at Cleveland Clinic Martin Health and the hospital is empty and only 1 civic. This shutdown is going to have detrimental consequences.

AMERICAN OVERSIGHT

Broward	General	The purpose of the lockdown was to keep hospitals from being overwhelmed w COVID cases at one time. They are not. A vaccine could take years. We need an option, the freedom to get our lives back. Now. We can, with measures, with common sense. Government cannot keep us from getting sick. Let those who want to remain home, stay home. It's about options. It's about the future of Florida.
Duval	General	There is no reason why smaller establishments should not be reopened. We should all be allowed to visit retail store, day cares, hair salons, nail salons and restaurants. People are allowed to go to beach where there are large crowds but not go to the nail salon that cannot hold many people at a time. Congregating at church and going to grocery stores is allowed but not quick visits to a retail store or nail salon. Salons could at least be open by appointment only to adhere to stricter social distancing if you feel that is necessary. It is time for the city to learn how to get back to normal. There is no reason that with social distancing requirements and the use of PPE that you cannot allow people to reopen retail stores and small businesses. Please allow us to start reliving life again.
Pasco	General	We are not out of virus trouble yet. Opening some of the economy slowly and carefully makes sense. Restrictions on eatery's, beaches for recreation and exercise, salons , barbershops sounds like a beginning. Policing this is not going to be easy and need the help of everyone. Opening gyms would be a nightmare. Small business is taking the biggest hit and in Florida we have a lot of them. Sometime in May could be a good measure, but the level of the virus at that time has to be closely monitored. People are getting ants in their pants and they need to see some light in the tunnel.
Marion	Professional Services	I work in a salon, I feel that we should not be able to open yet as we can not social distance 6 ft away, we have to physically touch the client. Due to COVID 19 we are lacking the ability to continue to buy sanitizing and disinfecting supplies. It is very hard not impossible but hard to continue to get all products needed. So I ask you to please keep such businesses closed. Thanks
Orange	General	Reopening of the state is a large task and one that I can imagine weighs heavily on our state and local officials, however it is time to start getting our business community back up and running. I believe that if we were do this in a safe and orderly manner that we will come out on the other side of this sooner rather than later. With the proper guidelines and protocols put in place a successful plan can be accomplished. There are going to be many who say it's too soon but everyone has a choice to either stay in or get out and about. We do need to take care of our most vulnerable but how are we ever going to know if things will get better unless we start to open up and get moving once again. I appreciate all that our officials have done to keep us safe and they will continue to do so in the future. I am looking forward to being able to support my local shops and restaurants once again!! Thank you for the opportunity to express my thoughts.
Hillsborough	General	Need a fighting chance to stay alive. We a chance to be safe other ways to fight against Covid-19 but have no chance to fight if you keep the economy shut down.

AMERICAN OVERSIGHT

St. Johns	Healthcare	As a kidney transplant recipient (May 1, 2020, will be one year), I am not opposed to the reopening of Florida with certain rules still in place. I would like to see protection for those of us that are afraid to leave home for fear of catching COVID-19. It would put my mind at ease knowing that I am not going to lose my job because I choose to stay home after the state re-opens; especially since we do not what is going to happen. I am 45 and would like to know I can protect my precious gift of life without being penalized.
Broward	Management	Please be careful in your decisions. I think that much of Florida will be able to open excepting Palm Beach, Broward and Dade counties. I am a business owner, but no business is worth opening if we're just going to have another wave of infection. If that happens, we'll end up under lockdown again. That's the worst thing for a business in SE Florida...better to wait until infection rates are very, very, very, very low. And please, don't reopen the beaches here..let the sea turtles have some peace, and stop preventable transmission. The beaches will be mobbed when they reopen.
Leon	General	I am a senior citizen of Leon County. I realize we all are impacted by COVID-19. However, until we can come up with a way to alleviate so many deaths caused by this virus. We need to be cautious about opening back up the state of Florida. We must keep practicing safety. I agree with the citizens of Florida that they need to get back to work to support themselves. What do we have in place to keep people from getting the Corona virus when the Governor do decide to reopen Florida? How can we asked working people to come back to work? When we are told if you believe you have the virus. Not to go to the hospital or your doctor office. Phone your health care provider and they will instruct you on what to do. Yes, you go to the hospital when you're near death. Some people able to recover but, so many of us do not. When we Come up with a solution on keeping Floridian safe from this virus. I believe the Governor should use caution.

AMERICAN OVERSIGHT

Palm Beach	Professional Services	The economic fallout from this mindless shutdown will have public health implications for a generation, even if it ends today. On top of the increases in suicides, alcoholism, domestic violence, drug overdoses and other causes of "deaths of despair", the lost jobs, wealth, professional and educational opportunities, and more will accelerate the decline in business and family formation. The former drives future economic opportunity, the latter is critical to economic growth and social cohesion and strength. In particular, today only 26 percent of those under 35 are married, and much of that historic decline is attributable to the last economic downturn. What does the future portend? Marriage is the greatest indicator of wealth, physical and emotional health and well-being, and educational achievement and social development among children. The decline of marriage has driven a drastic drop in fertility which means we will have a horrific time maintaining entitlements (Medicare goes insolvent in 2026 and now probably sooner), but less paying off the increased debt. Already, some 60 percent of children in FL are born out of wedlock with devastating consequences on education, crime and social stability. You don't hear much mention of this but the effect of this economic downturn on marriage and family formation will be devastating. Re-open FL. Yesterday.
Miami-Dade	General	Hopefully decisions are not made based on fear. As a state or millions to have just surpassed 1,000 fatalities is telling that we have done a great job and we the governor noted all models suggesting high mortality and infection rates have been way off. Obviously we all need to adjust to new guidelines to protect everyone we we have done but PLeASE let’s not simply open without buisness’s to have the ability to be competitive by requiring overly aggressive guidelines like 10 people at a time in a gym which isn’t realistic for any gym to even make even under those conditions.
Sumter	General	My wife and I are senior citizens living in The Villages. We are very concerned that opening up restaurants, business centers, and group recreation areas like beaches will prolong the duration of our struggle with the virus. What good does it do reopen places that will allow people to congregate thus continuing to spread the virus!. By doing so Florida would take longer to get to its desired result. We must keep taking precautions until a vaccine is developed. Even increased testing for the virus and/or antibodies will not eradicate the virus. It will only help to minimize it. Keep people safe by keeping them apart!!!! We encourage the governor to make health and safety a higher priority than opening places that will help the economy but spread the virus. Put people back to work only if it can be done safely. Don't open theaters, beaches, personal service shops, salons, sporting events, eat in restaurants, etc. too early or we will all pay the price. The federal government's 3 guidelines make sense. Use them wisely.

AMERICAN OVERSIGHT

Miami-Dade	General	Time to open up the economy and begin the journey to recovery further delay will inflict more economic pain and suffered far greater then COVID 19. As responsible citizens we know how to accept risk, act appropriately for the greater good. None essential business should be allowed to reopen to allow House Holds to earn money, contribute, act and then spend. Beaches, waterways, parks, non essential business like Barber shops, hair salon, dog groomers, need to get back to work and can certainly do so as safely as essential business are operating today. Restaurants should be allowed to open to begin to allow dine in restaurants perhaps with occupancy restrictions. But the longer we wait to begin the journey to recovery the more difficult the journey is, and the longer it twill take to reach our destination. In order to start the journey we need like in any journey to take our fiat steps. Open up the economy is the first step. Have faith in the Public to accept the risk and act accordingly, for the benefit of all citizens.
Palm Beach	Recreation	My name is Matthew Chapnick. For 5½ I have been proud Park Ranger for the City of Boca Raton. I'm usually stationed at Gumbo Limbo Nature Center. On a Weekdays we average 400+ people. During the Weekend we average 900+ people a day. I urge you to please hold off on the re-opening of South Florida. As a Park Ranger my responsibility is to look for the safety and well being of everyone visiting the park. If we open to soon even with social distancing and mask that will likely not be possible. It could be deadly. It's one thing to put your own life on the line but to put someone else's life on the line is something else. Mr. Governor I urge you to please be patient. Believe me I miss the responsibility of my job. I miss working out in a gym instead of doing sit ups and push ups at home. I miss seeing my mom and grandma in person instead of on Zoom. In time the world will get back to somewhat normal but only if we do this correctly. You severed your county, you provide and take care of your family. All I ask is please look out for the best interest of the people of South Florida. There is nothing that can replace somebody's life. Thank you for your time.
Lake	Recreation	Please reopen the national forest recreation areas and State Park recreation areas. For some of us the outdoor life is a necessity, a healthy dose on every weekend. Especially those of us who continue to work.
Okaloosa	Management	We need to open the rental industry back up as Florida gains a huge amount income from these properties and the people who stay in them. This is causing millions to be out of work and many small businesses are going to go completly unde, through the domino effect it is creating from being shut down, without the revenue generated through this industry!

AMERICAN OVERSIGHT

Nassau	Professional Services	Open all businesses. Retailers. Salons. Let hotels start taking reservations for dates past May 15. Let office-based companies make their own decisions but offer suggestions. Get this state back to work. I'm concerned for our future and our competitiveness. Offer suggestions for keeping health facilities safe. Quarantine or recommend stay home for at-risk people. Let restaurants and bars reopen with occupancy restrictions for 2 weeks. Then lift all occupancy restrictions if no major spike in cases. Encourage the counties to open up for visitors from in the state until memorial day then allow all from out of state. Mandate that no mayor can extend lockdown past May 1. Give Floridians back their lives and liberties. And no face masks.
Broward	Recreation	Please, open our parks in Fort Lauderdale!
Pasco	Recreation	It's time to open Florida. This has gone on too long!
Osceola	General	I don't think the stay-at-home order should be lifted in any way until we see the cases, hospitalizations and deaths are reduced to 100 per day! We are an aging population and are very susceptible to the virus! If things open tourists from around the country and the world will be here and contact tracing will be impossible! The safety and health of the residents of Florida has to be the most important deciding factor! You can't buy a life! PLEASE'
Hillsborough	General	I believe the fear is beating a lot of people up, including myself. We all have been taking this day by day but I believe it should be a lot more under control before reopening the state. Think about our elderly, children, and healthcare staff please!
Palm Beach	Recreation	Beach opening in Boca Raton.
Bay	General	OPEN FLORIDA IMMEDIATELY!!! High risk individuals can self quarantine and isolate themselves if they choose. This is no way for a free people to live. This quarantine was to avoid overwhelming the hospitals. We are well passed this hazard. Open up Florida immediately!
Palm Beach	General	Very concerned that's we will open things up too soon. People should be mandated to wear the masks and gloves when everything starts to open up. I think the way you are opening beaches with limited times is good. I am very unsure how to suggest hairdressers unless they disinfect the chairs and of course masks on.! I think checking temperatures is also good except for the Asympomatic people. I think everything should be slow to open until we have a cure and/or a vaccine.
Seminole	General	In no way are we ready as a state to reopen. With so many lives at stake. Who gives anyone the right to toy with lives especially for the almighty dollar. What bothers me most is we are suffering by way of being used as pawns in this pandemic we are lab rats being used in this experiment. NO it is not safe to reopen the state too many lives have been lost it is not worth any more. Please keep our country safe.

AMERICAN OVERSIGHT

Palm Beach	Recreation	Hi Mr. DeSantis, I am a dentist and have had to go in to see emergency patients. I am glad to help them out and I can keep some of my staff working and it is an opportunity to treat those that desire my care. I have taken all precautions like jacket over scrubs, face shield over mask, gloves, eye protection, no waiting room by seeing one patient at a designated time, wipe down every door handle and tape them also, survey pt as well as take their temperature and have them do a peroxide mouth rinse and have them wear a mask until in the operatory. I feel safer there then when I go to Publix. We have the antibody test as well. Now, when I am not in the office , I like to play golf. I have traveled to Clewiston and previously to Martin county. We have wiped down the carts, not touched the flag, at times not raked the bunkers, and have elbowed our other golfers instead of handshakes and followed social distancing. It is easy to avoid the other golfers and you are out there in the open air. Also as members of a private club, we want to be even more careful of our fellow members. I am planning on going back to work after the May 8 th guidelines you recommended, it would be nice to get a few rounds of golf in and not have to travel across the state anymore. Thanks, Scott Barr dds
Sumter	Government	Where is my children's unemployment, and the 600 each that was given to FL for them by the federal govt? That is what the government should be focusing on right now. As to reopening the state, there has not been enough testing. A very careful and slow reopening is the only way to keep more people from getting sick. This will be an endless cycle until we have a vaccine. Additionally, FL has people traveling here from all over the world. How is that going to work. Please be careful with our health. We need you all to be thoughtful leaders right now.
Sumter	Administrative	I do not feel it's safe to open Florida totally until more testing is done, I see in my zip code the covid-19 virus is still on the rise and since many citizens here in town are not even wearing something over their nose and mouth tells me things are only going to get worse in this rural area.
St. Lucie	Healthcare	Please up Florida back up.. put some restrictions No publicly attended sporting events. Open churches open beaches restaurant with limited seating for just a while Be smart about it BUT OPEN FLORIDA
Duval	General	Please do not rush to reopen the state too quickly. I feel like since the kids are out of school through the end of May, then I feel like we should keep people home at least that long so parents can continue to be safe, and be available to help with school work.
Sarasota	General	Rules are put in place to protect the people and life as we know it. We are opening up certain areas for the safety of all. We need to quarantine foreigners coming into this state as this problem caused a pandemic maybe without their knowledge. Because so many have died and action must be taken cautiously.
Orange	Finance	Too fast too soon, about one thing at a time, like fix your broken unemployment system. But ya don't care about hard working tax payers only politics

AMERICAN OVERSIGHT

Broward	Accommodation	We are a people whom have had very little support from the government. Most of us are still not receiving unemployment checks and those of us whom have received some are still behind and this includes the checks we are supposed to be getting from the federal government. If the state is to remain closed then we NEED to have better support from our government. We are a tourism heavy states and reopening too early will not be beneficial and could be detrimental to those of us in the Service and Hospitality industries. We were the first ones put out of work and as a result we were the ones omitted from the "waiving of the waiting week." So many people in the hospitality industry live week to week. IF we are being told we are getting a stimulus from he government. That stimulus needs to come in OR you need to let us work. Secondly, please open the wild spaces at the least. Spring break is over. just implement heavy fines if people do not obey social distancing but to remove all of Florida's wild spaces makes people congregate in the streets.
Orange	Tourism	I'm certainly an advocate for the theme park industry and there is nothing more that I want than for Florida to reopen all of its major theme parks. I know the virus isn't anything to mess with but I think there are many ways to work around it and I have many ideas that can be implemented on reopening the theme parks as soon as possible while having social distancing protocols in place. This would include, Virtual Queue systems similar to Star Wars Rise Of The Resistance, Mobile Order only at Quick Service Restaurants, Limited Capacity on Ride Vehicle's, indoor and outdoor theaters, shops and table service restaurants. Also for security purposes implementing, temperature checks, proof of immunity or proof of being completely free of the virus, proof of being Florida Resident or Walt Disney World Cast Member and much more, if you want more intake and information on what I would do just give me a call, I'm still in the Orlando Area and more than welcome to help out the theme park industry.
Citrus	General	I personally think the Theme parks should not reopen yet, start with amall busimess, retail, hair and nail salons. Then a few weeks later reopnen the Theme parks. Don't go what some other states arw doin and reopen the entire state at once. Take things slowly. I believe that if we want to continue our down scale things need to be done sloy and with some priority.

AMERICAN OVERSIGHT

Leon	Healthcare	I am extremely concerned about opening the state too soon without the testing infrastructure in place to test and track cases so a secondary “wave” doesn’t overwhelm the state. While I recognize that any opening will increase transmission of the virus - and that cannot be helped, opening without the ability to adequately test not only symptomatic but asymptotic people with short (less than 24 hour turn round times) seems like a recipe for possible disaster. I hope that with any opening will be the continued advice for those that can work from home to do so, and those of high risk (older and with underlying conditions) to continue to stay home. Also, as continued research is being done - that we specifically call on those with high blood pressure, diabetes, and obesity to stay home as a continued evidence that these groups have the worse outcomes with this virus. Economically, we will not be able to recover - regardless of opening up - unless the citizens of the state have confidence that it is under control and we have mechanisms in place - and plans to address in place to identify new outbreaks as the inevitably occur. Thank you for requesting input and your consideration of my concerns.
Hillsborough	Food	Please open restaurants. Let the people decide if they want to go out to eat. People need to get back to work. Shutting everything down is not smart. We’ve been shut down for four weeks.
Pinellas	General	I am in full support of re-opening Florida businesses and schools. If Target, Walmart and Publix can be open to the public there is no reason small businesses cannot. We must get people back to work. People can be responsible for their own health and safety. If they feel it is not safe to go out, then they can continue to isolate themselves while the rest of us get back to work and life. We have already seen that children and teens are the least susceptible to this virus so there is no reason to keep schools closed. Even if the school year is almost over, there are many private and Charter schools that provide summer programs and they should be opened.
Bay	General	This virus is deadly to a very small percentage of the population, as is the influenza virus that comes around every Fall. But, keeping everyone at home is also deadly. We are retired and losing our life savings. Most people don't have savings, and are losing the money they had to live on. If everyone wanted to stay alive, they would all stop smoking, stop eating junk food, stop texting and driving. So, open up Florida and let us decide for ourselves how we want to live... or die.
Hillsborough	Recreation	I feel it is safe to immediately open all outdoor recreation in all counties other than the 3 or 4 counties around Miami Dade area. The outdoor recreation should include but not limited to community pools, beaches, parks, nature trails, biking, boating, fishing piers, dog parks, golf, tennis, campgrounds, and other outdoor activities and sports that do not involve more than groups of 10 or more at this time.

AMERICAN OVERSIGHT

Leon	Government	Please encourage state government entities to discontinue tele-working so state government can operate at more efficient levels and better serve our citizens. State government is barely operational because so many employees are working remotely. Restrictions need to be lifted ASAP. Try getting anything done at almost any agency and see how long it takes.
Broward	General	DO NOT RE-OPEN Florida
Bay	General	It would be great if face masks in public were made mandatory in order to prevent transmission via droplets while speaking, breathing, coughing, or sneezing. If everyone's droplets and germs stayed stuck at their own faces, this virus' ability to float around in the air and settle on surfaces would be drastically reduced. Thank you for considering this simple idea.
Brevard	General	As a professional educator and lifelong resident of Florida, it is way too early to reopen our industries. We need another 30 day stay at home order to see the positive impacts. We are still watching our cases of COVID-19 increase along with our deaths and hospitalizations. It is appalling to think you as the leaders of this state would even consider it. You were late on the stay at home order and now you want to jump the gun on opening! That is pathetic. Look at the polls. 75% of Floridians feel it's too early to open. Stop listening to the insane president of this country and start listening to medical professionals. Not one medical professional on the task force just shows how you and the other leaders are more focused on short term Fixes that impact the piggy bank vs. long term solutions that save lives. My father just finished chemo and he has a lot of live in him. I have countless colleagues and friends and family who have medical conditions that could get sick. Do the right thing and keep us closed. Use the mayor of Los Angeles as a role model or how about the governors of Washington state or California. Do not reopen Florida. Your residents will certainly remember your choices at the polls.
Volusia	Information	I live in NY but I own property in Ormond by the sea. I drive down to go fishing on the Sea Spirit, especially RED SNAPPER. My son also attends Embery Riddle and lives in Florida most of the year. While I understand the severity of C19, it is also important to start opening business live fishing. You can still have people wear mask. But I have self contained my self for over 30 days. I would and really could use a good trip to Florida and go fishing.
Sarasota	General	Looknig for sufficient testing and ways to test qucikly and effectively. Also, its difficult to open the state back up, when you have shut down schools! How are parents supposed to go back to work if their children are forced to be at home? Lets transistion with outdoor public spaces, then get us back into an early school yeR with indoor public spaces.

AMERICAN OVERSIGHT

Volusia	Tourism	I've come to Daytona Beach from West Virginia for the last 40 years to fish your party boats and charter boats. I could almost say that I begin to plan the next year's trip immediately after this year's trip is over. Over the last 40 years I've made good, lasting friendships at the docks with good people I've really come to care for. I'm 73 years old.....these fishing trips give me something to plan for and dream about from year to year. I know that my friends in the recreational fishing industry are suffering. No fishing equals all bills and no income for the owners, captains, mates, and dockworkers. They will not survive unless reopening is imminent. These people are hurting; families are suffering...and need immediate relief. Tourists will find other places to fish, and will possibly never return to Florida. I urge you to seek immediate reopening for all charter and party boats, and for all recreational vessel. Sincerely, Sherman Taylor (304) 732-6907 *** I marked Volusia County, because your system would not accept my West Virginia county ----- Wyoming.***
Lee	Healthcare	I am a retired RN from NY, open parks beaches first, enforcement of crowd control essential. Salons open with appointments only, cleaning after each one, make more space in shops. Retail, remove racks to open space, control numbers in and out, with distancing, have some one clean dressing rooms after each use, wipe down things that are touched.Have health department visit salons to make sure they are following protocol.I don't see why Hobby Lobby can't open with crowd control , Walmart and target have more people in, In parking lots put in mobile hand washing stations for use.
Orange	General	Open ASAP. The cure is worse than the disease. Those who don't want to open can stay home. Open playgrounds, start camps, all of Florida is open for business.
Palm Beach	General	Please open the economy, lets not make 'the cure worse than the problem'
Orange	General	It is still far too early to be opening FL back up. My wife and I are both in the high risk category with underlying medical conditions and are Seniors. We both feel it is way too early to be even considering this because we are afraid this is going to have us right back at SQUARE ONE with Covid-19 ramping right back out of control. Do we like staying in? No, but it's the better of opening too soon and causing a fiasco that many of us are certain will prevail. We need to HEED THE EXPERTS at the CDC, WHO and other MEDICAL Professionals, as Florida is NOT currently adhering to the guidelines put in place by the Federal Government. BIG MISTAKE in TRYING TO OPEN US UP FAR TOO EARLY!

AMERICAN OVERSIGHT

Leon	General	I believe that this pandemic and the approach to protecting the American people should be lead by the medical researchers and doctors in the field because they have the the experience and knowledge. Politicians as a general rule do not have this knowledge and should be deferring to the advice and orders of the medical professionals. This would give the people more confidence in the political system as a whole, because you have leaders in the field finding solutions and implementing them, not people who have no idea what they are doing. I believe this would create more unity among all Americans and less ill-will. The country, while needing to be opened due to the sake of livelihoods, needs to also be done with input of leadership of medical professionals. If they say that all workers or anyone in public needs to have certain PPE, then that needs to happen. If they say that more companies who manufacture more frivolous goods such as trendy clothing need to contribute to creating and donating PPE because they are a large organization and will not take a loss if they do it, then that needs to happen. As it stands, medical professionals can lose their jobs if speaking out about lack of PPE while exposed to CO-VID19, are having to reuse potentially contaminated PPE while treating patients, and are not given a voice on this Task Force. Something is wrong with this picture here. The leaders in the medical field are predicting many things that i have no doubt will occur. Peaks in this outbreak are occurring at different times than expected, and there may be more. The curve is not flattening, but continues to spike at random intervals. Additionally, we will more than likely see a second wave of this virus that has been worse than this first one. Please follow the lead of the medical professionals and stop pretending that politicians have all the answers because they don't - let the ones who do this for a living do the leading. Thank you.

AMERICAN OVERSIGHT

Miami-Dade	General	My name is Gauthier, I own a hair salon and I will like to comment on the re-opening. As some people can think hair salon is a high spot for covid-19 spread due to contact with client, I do not think so and may be even safer than a lot of other business having a lot of walking. As long as employees follow the right routine. For intense, the way I will re-open once we will be open is: *Client will be ask if have any symptoms before appointment and will not be coming if they do. *employees and client will have temperature checked asap they come in *only work on appointments *the salon has 12 chairs and 8 stylists, *The opening hours are usually Tuesday to Saturday but will be extended to 7 days with 2 teams of 4 stylist working 4 and 3 days per week so the 2 teams never meet. *Each stylist will work the farthest of each other with is more than 6ft. *Only one client at the time per stylist. *Only one person a the time in the back room. *bathroom will be cleaned really regulary during the day. * We have 4 shampoo bowls to wash hair and will only use 2 at the time which are separate from about 6ft * hand sanitizer at each hair station and one at the front door inside and outside before touching the door to open it *each stylist will wear mask and protection glasses at all time and gloves when necessary *each customer will wear gloves at all time and mask when the service allow it (As roots color or even hair cut where customer will just have to take the elastic off and hold it few min while cutting around the hears). *chair, station and shampoo bowls will be cleaned after each client. * casher will have a protection glass on the front * a/c will have a uv light installed inside to clean the air (installation and uv light for no more than 200$) * We will clean and sanitize the entire salon every night. * We will not offer drinks and magazines to read to reduce all risks. * employees will shower, change and clean their clothes asap they got home. * everyone will clean there hands and/or change gloves every 45 to
Pinellas	General	We need to get back to work. Businesses need to reopen. People need to work. We need to have the beaches open and some restaurants to be open. We can still maintain social distances and.be safe. Please let us get back to some kind of normal. People can choose to stay open if they like.
Duval	Healthcare	We must have testing ramped up before we open again
Pasco	General	I think the state needs to wait a little bit longer to reopen. Make sure it's safe to do so. Make sure that unemployment gets fixed for the people with no income. But in my opinion safety of the people is most important. And if things start reopening, the people that have been going out all along will come into contact with more people who are leaving their homes and it will be a mess. A mess for healthcare and a mess to businesses of things turn out ugly and. Numbers start spiking again.

AMERICAN OVERSIGHT

Broward	Professional Services	All business is essential as people's livelihoods depend on commerce. Accordingly, businesses should be allowed to gradually open in the immediate future with reasonable restrictions. For example, retail stores should open to the public with the recommendation that all patrons and visitors where face masks. The government should not be forcing people to wear face masks. Rather, individual business and property owners can enforce these restrictions on their patrons if they so wish. As for restaurants and bars, they should be permitted to open as well at 50% capacity. Their employees should be required to wear face masks. I'm no expert, so these are mere suggestions. However, keeping things closed as they are right now is no longer an option. A balance must be struck between commerce and public safety. Right now, no such balance exists.
Palm Beach	General	Condominium and private club pools should be open now Public Beaches should.be open. Walking only Private beaches open walking and sitting Outdoor seating at restaurants and private clubs should be open
Pasco	Government	A Quinnipiac poll from earlier this week found that three out of every for Floridians (76% of registered voters) do not want the state to be reopened until medical experts say it is safe to do so. Listen to Fauci, not Trumpy!
Miami-Dade	General	I think it would definitely be a death sentence to open up the state of Florida especially Miami Dade County. We are over 10,500 confirmed cases of Coronavirus and over 286 deaths. I am in my late 60"s with underlying health issues and I don't want to have to worry if and when my loved ones that live with me will get the virus due to working or the chance of it being brought home to me. DO NOT OPEN FLORIDA! DO NOT OPEN MIAMI DADE COUNTY! DO NOT OPEN FLORIDA! DO NOT OPEN MIAMI DADE COUNTY! DO NOT! DO NOT! DO NOT! DO NOT! DO NOT! DO NOT! DO NOT! DO NOT!
Broward	General	Please open all society now. So much more damage is happening with this shut down than would if we could live normally. We can take care of those at risk, let the people show you. Floridians will rise. Millions will flee to where they can live/work normally if this continues any longer. PLEASE OPEN NOW. Please, Thank you.

AMERICAN OVERSIGHT

Broward	General	Dear Governor DeSantis, While I live in the same state as you I feel a world away. You asked us to help you, we did. You asked us to close our business, we did. You asked us to stay home, we did. You asked us to continue to stay at home, we are. So here I am, at home, waiting. You told us don't worry unemployment will come, it hasn't. You told us don't worry grants are coming, they haven't. You told us don't worry forgivable loans are coming, they haven't. So here I am, at home waiting. I wait alongside my coworkers, family and friends, small business owners, the self-employed and the independent contractors. A massive number of Florida residents who are waiting for the Unemployment portal to open for us, waiting for loan approvals, waiting for stimulus checks. All of these programs, we are at the back of the line for. So here we wait. While bills come daily, savings continuously dwindling and still doing our part. It is time you do yours. It is an inconceivable expectation to close unessential business halting all income and expect us to survive. We need to pay our bills and put food on the table. Without immediate action, you are leaving us no options. How are we to survive? We deserve an answer. Coming soon is no longer acceptable!!!
Duval	General	I want our country open but considering the plaque we're dealing with, believe it's too soon especially since majority of people don't wear masks in public, Publix workers and others. Please provide our public with masks to purchase. No stores have them. I've tried all stores locally. Home Depot told me as soon as they get them in, they send them to hospitals. You Governors and Mayors, President, and all our Leaders and Health Providers have a tough job. God bless you and God bless America.
Brevard	General	YOU CAN ONLY LIFT THE RESTRICTIONS. PEOPLE WILL NOT GO OUT UNTIL THEY FEEL SAFE. BUSINESSES WILL NOT REOPEN UNTIL THEY FEEL IT'S SAFE. IF YOU GO COUNTY BY COUNTY YOU WILL CREATE A DISASTER. IMAGINE BREVARD OPENING THEIR BEAUTIFUL BEACHES AND WONDERFUL RESTAURANTS. ALL OF SEMINOLE, ORANGE AND OSCEOLA WILL COME HERE. ALTHOUGH, LIFTING THE RESTRICTIONS IS A GREAT WAY TO THROW PEOPLE OFF UNEMPLOYMENT (THOSE WHO HAVE BEEN ABLE TO GET IT) , GET PEOPLE EVICTED & FORECLOSED AND DESTROY A LARGE NUMBER OF OUR SMALL BUSINESSES . WAIT . IT . OUT ! IT WILL BE BETTER FOR ALL IN THE LONG RUN.
Hillsborough	General	Keep your Florida residents safe! Extend our safest homes till June 1! People who live in other states will be flooding our areas and infecting us. All counties should still be under the safe at home ordinance!

AMERICAN OVERSIGHT

Orange	Professional Services	While my profession is already considered essential, I believe it's in the best interest of Florida to re-open all business. As a society we can learn to maintain safe distances and clean living habits all while performing our regular routines and daily activities. Without an economy the virus is the last thing we will have to worry about. I also believe that many of us already contracted the virus and we never knew it and testing of all Floridians should be a priority for data analysis. While I will ultimately concede to the scientists, once the "true" data is confirmed, I do not believe this will be much different than the flu. Thank you for consideration of my comments.
Broward	General	Totally against re-opening the tri-state area at this time.
Polk	General	Just open Florida up so people can get back to their lives.
Duval	General	Time to reopen is now. The curve is flat and the model predictions have been horribly wrong. Time to allow adults to decide what they will or won't do. I for one will be in restaurants and stores the moment they open the doors. My greatest concern right now Is the millions of people who were out of work right now. Thank you and God bless America.
Manatee	Recreation	I believe it's time to open the beaches and parking lot 6 ft spacing 6 people max. They was doing this at Coquina beach in Bradenton 5wks ago. But all people saw was Clearwater. Spring breakers. Also all places serving food, hair salons, nail salons. Movie theater no way. I thank you for your time reading this . WE NEED TO OPEN!!!!! Gaylan Winans.
Collier	Food	Collier County should not be open until COVID-19 new hospital admissions and deaths have decreased for 14 days in a row. Better to be safe than sorry. Opening up the county too soon may put us back to the beginning of the shelter in place cycle. This decision should obvious. There are too many elderly or health-compromised people who live here. LISTEN TO THE SCIENCE PEOPLE. DONT LET YOUR DECISION BE MOTIVATED BY POLITICS. Your decision is a life and death one. Please make the correct one.
Marion	Professional Services	I know the numbers are getting smaller I feel that is to due to social distancing so please keep all non essential businesses closed a while longer to keep the spread of the virus under control.

AMERICAN OVERSIGHT

Broward	General	Saying that social distancing has been effective is extremely misleading. There is no evidence of that. Every single flu virus trends downward this time of year, so downward trends could simply be due to the weather. Politicians continue to say they will make data driven decisions, but there is no data to even support a lockdown. Cases are suspected; deaths are suspected. There is no concrete information on anything, and operating from a position of fear has been harmful to everyone. Encouraging people over the age of 60 to isolate while allowing the virus to take its natural course through the population makes sense so that people develop herd immunity. Isolating people suppresses the virus, it doesn't eradicate it. It looks like politicians have been selling our rights to the highest corporate bidders (Bill Gates, in this case) and have called a national emergency to justify their own financial agendas. People increasingly don't trust their government, and with good reason. The public is becoming increasingly aware of how botched the coronavirus data is, especially as physicians come forward and report how they are being encouraged COVID19, how they are being controlled, and how absurd all of this is. People die everyday from the seasonal flu and there are no lockdowns. Why? Because there is a vaccine. This just looks like a push for mandated medicine. The longer you wait to open the state, the more resistance you are garnering to vaccines from people who already called BS on this situation from the get-go. If there is a revolution with AR-15s, then do understand the part that you have played in creating that. Let's be clear that this has nothing to do with public health: if there was interest in public health, then cars would be banned since there are so many deaths from accidents; cigarettes would be banned due to lung cancer; and butter and sugar would be banned to stop diabetes. There is no evidence that lockdowns for a new strain of a severe flu are in the interest of public health. Politicians are being driven by "herd mentality" and profit, not data.
Pinellas	General	As a life long Florida resident now retired, it has been extremely difficult to see our fellow Floridians financially and emotionally devasted by the abrupt shutdown due to Covid-19. One close friend that recently opened a small business has been totally shutdown. Another close friend lost her job of 15 years overnight. And then lost her health insurance shortly thereafter. It is time to safely open our Florida businesses to minimize any further negative impact on the residents of our state and our economy. Thank you for working promptly for the benefit of all Floridians.
Pinellas	Government	In my opinion Florida's businesses and activities should not be reopened until there have been 2 weeks of a continuous decline in the number of coronavirus cases. Then it should only be phase one openings as recommended by the federal guidelines. It's not worth the risk of a resurgence.
Marion	Recreation	Governor Desantis has said multiple times that we should exercise outside as long as we keep social distancing. Yet, he has closed all the state parks. He needs to open up the state parks, especially the ones with trails. I normally hike every weekend on the Florida greenway trails, yet they have been closed since March. Even if the amenities were kept closed, the trails should be open for those who follow the social distancing rules.
Lake	Tourism	Stay home to slow the spread

AMERICAN OVERSIGHT

Broward	Healthcare	Absolutely not! What a slap in the face to us healthcare workers. Instead of focusing on the fiscal aspect of this pandemic, how about refocusing on the medical portion? The moment everything begins to reopen there will be a wave. Why? People in general are lax in their responsibility to distance themselves and wear protective gear. At this point in time you have THOUSANDS upon THOUSANDS of healthcare workers who know what this virus is, does, and is capable o . You, who sit in your suits and slacks, do not. Don't be the one to perpetuate this when it's clear that reinfection has occurred. When rapid tests are 65% failure rate. Where we're working so very hard to not intubate a patient because their outcome is grim at best. Please be prudent. When God brought the plagues He didn't tell people to protest their rights, He told them to place blood on their doorposts and stay indoors, stay alive!
Indian River	Retail	It seems foolish to consider removing restrictions just a day after Florida had a spike in deaths and infections. I feel that the people making the noise to push the state open are the only ones being heard since they are louder, while the main goal should be safety, not satisfying the loud. I am the COO of several large antique malls around the state, and I don't feel comfortable calling my work force back knowing this pandemic is no where near over. Even if I do open the malls, its a gamble to think our customers (who are mostly older) would risk their safety to come spend money on nonessential items. Opening prematurely means all the overhead is in full operation, but revenue is nonexistent, which would only put the company that much more in debt. I am not for opening the nonessential businesses yet.
Polk	General	Please open the state up. We know we can’t live in fear. This is not what America was built on. You as a Republican knows this. I’m a self employed hair stylist. I have my own salon suite less than 10x10 at Phenix salon suites. It’s me and one client at a time. I sanitize after each client as I was doing before the virus started per the Florida state board. Please Mr.Desantis allow me to go to work. If people can go walk around publix,Target,Walmart ,and ride airplanes with other sharing the same air flow then I should be allowed to do a clients hair one on one.
Duval	General	As an expectant mother, it is unfair and inappropriate to not allow the father to be present at appointments of our child. If multiple people can visit a grocery store, the same should be applied to hospital as both parents should be considered "essential ". Retail stores, nail salons, hair salons, etc should be allowed to reopen as they can easily follow social distancing standards. If you could just require these facilities to wear PPE, then that should be perfectly safe and acceptable. Thank you for your consideration
Sarasota	Construction	Re-Open the state Governor, this unconstitutional stay at home order must end! Forcing businesses to close their doors is tyrannical and goes against the constitution of the United States! Keeping the state closed will do nothing but further damage the economy and prolong suffering for your voters! Follow suit with Georgia and re-open the state and allow the FREE people of your state to make the call for themselves whether or not they want to stay home or not!

AMERICAN OVERSIGHT

Orange	Tourism	You need to start opening this state. People are hurting economically and it will lead to a bigger disaster than the pandemic. Stop saying you are in no hurry. I understand the need to be safe and organized when reopening, but you do need to be in a hurry to start reopening.
Nassau	Professional Services	Salons, spas,barbers,nail salons, massage and tattoo parlors should be last to reopen due to the fact it is impossible to social distance and clients can not wear a mask while getting serviced. In some situations it would be impossible to trace the virus due to clients not giving correct information.
Volusia	General	Look at the CDC data. There hasn't been anything bad happening in Florida the whole last month. I find it extremely frustrating to see the Governor talking about shutdowns lasting till June or later. I don't want to see the government ever do shutdowns like this again, and the shutdown should have never been done to begin with. If you look at the animation of the 10 years of weekly flu data on the cdc usa map, you can see that all the major outbreaks center around the Port of Louisiana including this outbreak. That is where black poverty is higher and that is the largest port in the USA. Black poverty is also very high in New York City. If the government wants to do something about the flu/pnuemonia deaths in the future, they need to investigate why Louisiana is so unhealthy and probably address the health of the poorest people in the entire country as these heavily afflicted areas are the source of outbreaks. We need a minimum level of health services for these areas, and treating/quarantining those areas early would be more effective (free flu shots, etc). Forcing us to shut down for weeks and months does nothing to stop poverty and the outbreaks of flu will continue to worsen as our average lifespan increases since the immune system is weaker at a higher age. The shutdown will kill more of us, through pushing more people into income losses, poverty and suicide every day this shutdown continues. Our digital marketing business has never needed the government's help, we can work at home and online, but the businesses we support are shutdown and almost all our income has been lost. We don't need free money and testing, we need businesses to go back to normal now. Especially dining and tourism. Everyone in Florida has been very healthy, Florida's numbers are so low especially if you consider the antibody testing NY, CA, and Germany that suggest 14% of people already had covid19. There was a greater risk of dying in a car accident in Volusia county area then Covid19 where I live. How can such a low risk of death have become so important. The government has become the greatest risk to our lives now. The at-risk people should self-isolate and use common sense during the flu season or during outbreaks. Common sense, not mass control/policy change.
Baker	Tourism	I believe we need to open up our tourism to Florida residents first. Give us a break from all the craziness we have endured, especially us Essential Employees. And it would give us the piece of mind that someone isn't bringing in the virus from other states or Countries. Theme Parks and Cruising should be first to open up to Florida Residents then to others once more screening processes are brought online.

AMERICAN OVERSIGHT

Sarasota	Retail	I have 3 retail stores on st Armand's circle , sarasota. Please open up our coast, my business won't survive if I can't go back to work... For the people who don't feel comfortable leaving their houses as of right now the people who are vulnerable the elderly don't have to leave their houses but let us have an option Please!!!! Thankyou
Leon	Education	Don't do it! Not at least until there is a vaccine.
Broward	Healthcare	Empowering the new generation to take action during this pandemia through different volunteers programs and private initiatives to make locally PPE to protect citizen and prevent the spread of virus to others.
Palm Beach	Recreation	We would appreciate in this crazy time to be able to have some outdoor activities that are safe to be social distant. The parks to ride bikes and the golf courses. In our case we have our own cart and golfing is an easy activity for distance. Thank you. Rich McGuigan.
Collier	Recreation	The state must wait until testing can be done on a broader basis before allowing gatherings of more than 10 people using social distancing. Opening ANY business should be regulated with the same guidelines. Masks should be mandatory as well as gloves. Don't undo what we have done. Florida is very vulnerable to tourists who should be quarantined for 14 days UNTIL we have sustained the flattening of the curve.
Pasco	General	I would suggest reopening state parks and beaches but limiting tourism because locals to the state that live here shouldn't be limited to what we live here for because of tourist. Also I think high school and college graduation should be allowed for graduates who have earned it and immediate family. I think there are places big enough to allow this type of graduation where it's limited to immediate family maybe limiting each student to 4 people max with them. There are more people in Walmart than this! As for healthcare, I think certain hospitals should have sections for covid patients only while others hospitals serve surgeries and births. For jobs, I think following the presidents advice of the three separate rounds to get people back in offices works and I don't see a problem opening restaurants because again grocery stores and Walmart has more people crowded together One last thing, throw out the grades from the last quarter of school just like you did for the actual schools. Reality is many students are struggling and can't learn like this and they shouldn't have this held against them. Just cut the last 9 weeks grades.
Pinellas	General	Please let the science have an equal place at the table. Do not let the planing be dominated by the Chamber of Commerce. What ever the plan be accept the responsibility for deaths as well as the credit for jobs.

AMERICAN OVERSIGHT

Miami-Dade	General	My comment is about reopening. My concern is my HOA will block normal activities beyond what the state or county orders or directs. They can use the virus as a means to obstruct normal activities. And I have seen excessive, beyond city or county orders, restrictions that appear self serving of individuals. Please address this in your opening directives. Otherwise, many citizens will get stuck in limbo and conflict with quasi-governmental HOAs.
Volusia	General	I believe we can slowly reopen businesses if people follow the rules. 6 feet apart, only so many in a store depending on the size, touchless payments, everyone shoppers and sales people alike wear masks or you can't come in. If people follow the rules we should be ok. Still no large gatherings. If everyone has to wear a mask to go in stores it will be easier but that must be enforced so people know it is important. There will be consequences that takes it off the shop owner. If done right should work but there must be stiff consequences for those not following rules. Fines will be no good many people have no money and jail would be bad because no distanced gets there at all. Community service maybe. People will need to know the rule follow them or this will happen. There will be more people that feel safe to be out that way.
Orange	Recreation	One of my concers is the fact that Brevard county has opened all of its beaaches but closed all public parking. I do not believe this was well thought out as people that want to access the beach now have to park illegally on side streets, business parking lots, etc., then have to cross a busy road such as A1A . This is a great disadvantage especially to the handicapped that want to go to the beach to walk, fish and other activities allowed or for those with small children wanting to use the beach. It is dangerous to cross those roads. I don't understand the thinking of county leaders as it doesn't benefit the public. It benefits people that live within a block or two or the very rich that own beachfront properties. It needs to be accessible to all. Overall I believe Governor DeSantis has handled the coronavirus pandemic very well with his actions taken and his handling of the press. Kenneth Carpenter
Hillsborough	General	As long as, for now, social distancing, disinfecting procedures, masks, etc., can be complied with, PLEASE open things up!

AMERICAN OVERSIGHT

Bay	Tourism	Vacation rentals have taken a tole on business with no help from the govt as small businesses. This is our savings and was some retirement. We still incorporate HOA fees, electric, mortgages with no one to turn to. Insurance, govt loans - overlooked We feel the individual owners are safely keeping condos sanitary over the big franchisee we hotels. At this time we see hotels in our area renting to vacationers otherwise we're not suppose to. Many owners of 2nd homes are suffering and may lose everything. Please consider help for this group. Also area struggling from no tourist tax base We have applied for disaster loan but appears big Co. Getting finding over the little guy. We want to be safe with bilringing in large groups limited people at this time but the system needs to review this group of people and see if we can either open up some or help support funding Thank you and appreciate the governor's continued updates
Hillsborough	Retail	Please open up the state people need to get back to work to pay bills an put food on the table Thank you
Polk	Recreation	55 plus communities need their pools open for exorcise with proper precautions, same goes for beaches. Nobody makes you go to beach or pool but we should have that right!
Pinellas	General	Shut Down = Entire State Should Open to Phase One. Authorize Doctors to prescribe Hydroxychloroquine Cocktail to their patients, if they want. Keep controls on Senior Facilities. Require positive seniors 2 B separated from others. Pause Immigration & Make Int'l Guests Agree 2 Self Isolate 4 2 weeks like Hi. God Bless everyone!
Miami-Dade	General	As a medical worker for over 30yrs, a Florida native and a mother/wife, I ask that we tread lightly when it comes to opening things back up. We need to bring to light how important it is to follow social distancing and remain using masks when out of our homes. Restaurants should be take or delivery only. Large gatherings such as concerts, festivals, etc should not reopen. Beaches should not reopen unless there is STRICT enforcement of necessary behavior. While I accept that 70%+ percent t of the global population will eventually have had this virus what we don't need is unnecessary deaths caused by overwhelming the healthcare system . This is done by spreading out cases as much as possible. We must work hand in hand with the medical and science community using data and ya tail proven information. Keeping the public aware of what is going on and being cautious about lauding remedies that are NOT clinically proven to be safe and affective.
Duval	Government	Please keep Florida closed for one more month. There are way too much cases still and it's only growing larger

AMERICAN OVERSIGHT

Walton	Tourism	Wayyyyyyyyy to soon! I believe Once we start letting tourist in our maintained Corona virus will be extremely worse a abundance of cases will appear!!! We need to keep it closed for a longer amount of time as once we open ppl from around the world will be coming wither they arw sick or not !!!! TERRIBLE IDEA TOOOOOOO SOON
Hillsborough	Education	In the same way there was a domino effect in things shutting down I believe there will momentum built for opening back up. I fully support efforts to reopen businesses in stages and work toward having schools open on site in the fall. I am currently still drawing a paycheck on reduced hours but expect to be furloughed at end of June if not sooner. There is so little good news being reported, so few messages of hope and of plans to open things back up. We need states to lead the way in getting us back to where we were.
Miami-Dade	Tourism	Dear Governor, its time to open the Hotels in dade county (perhaps not the hotels in beaches) with social distancing , reduce capacity, employee checks as well as wearing PPE. Same should be applied to restaurants and bars whit in the hotel along with Pools , IF we don't act now there will be nothing left to open as all most likely will be bankrupt. Also the response of handling DEO unemployment, for workers, gig workers, all unemployed with their benefit of $275 per week as well as $600 from the federal government should be paid rapidly. As you can see the system is overwhelm and wasn't prepared and needed much upgrades. Lets work get Floridians paid and start re-opening the economy with Presidents outlies stages (stage 1-2 etc) Florida may never recover
Hillsborough	General	Looking at the trends from other countries, it is pretty clear that when you lift restrictions that there is a secondary peak in cases. Therefore, most countries have chosen logically to wait until the curve has not just peaked, but has made it about halfway down the down slope before significantly lifting restrictions and reopening things. If you reopen things too quickly, and the number of cases increase to higher levels than the initial plateau we will have lost the ground we have gained. That would mean that we would have to endure these economic and personal hardships even longer (the higher the peak the longer it takes to come down). That would result in more deaths, more economic collapse and a lot of ticked off people. True there is no "playbook" but there is most certainly data from other countries. It takes about 1 month to reach the peak in cases and it takes about another month to reach a position on the downward side of the curve to safely reopen things. That means mid to late May is when it would be reasonable to begin lifting restrictions without serious consequences. A large number of people are already ignoring the restrictions you have in place now. When I ride my bike around, people are having block parties in their neighborhoods, young people are having huge parties in apartments with alcohol because the bars are closed, Bayshore Blvd in Tampa looks like Gasparilla there are so many people trying to exercise with no social distancing, etc. Just think of what happens when you start relaxing things and more people begin to engage in unwise things because now it's "OK" to do so. Greg C. Kaiser, M.D.

AMERICAN OVERSIGHT

Broward	Healthcare	Thank you for providing this opportunity for the public to send concerns/ comments about reopening Florida. I am a nurse, and although I am not currently on the frontlines of this pandemic (awaiting deployment is needed) I was very concerned when I heard that we will be resuming elective surgeries on May 11th (as of now.) I have tons of colleagues and friends that are on the frontlines fighting with this disease and I do not believe that elective surgeries are vital to the first phase of reopening. Especially in our area of Broward where new cases continue to grow. Some of our constituents in the hospitals are protesting and fighting with administration (STILL) because our PPEs are being rationed and we are being told that we are not able to bring our own N95s from home. I understand that this is a crisis and we need to make proper use of these PPEs, but I do not believe that in the same breath we can say that it's safe to resume elective cases when those on the frontlines of this pandemic do not have what they need. We need to listen to our fellow Americans- Floridians on the ground, in all government owned and private hospitals when they are saying we don't have what we need. Please reconsider resuming elective surgeries until ALL of our frontlines are safe and able to PROTECT THEMSELVES.
Pinellas	General	Open Now!!!
Brevard	General	YOU CAN ONLY LIFT THE RESTRICTIONS. PEOPLE WILL NOT GO OUT UNTIL THEY FEEL SAFE. BUSINESSES WILL NOT REOPEN UNTIL THEY FEEL IT'S SAFE. IF YOU GO COUNTY BY COUNTY YOU WILL CREATE A DISASTER. IMAGINE BREVARD OPENING THEIR BEAUTIFUL BEACHES AND WONDERFUL RESTAURANTS. ALL OF SEMINOLE, ORANGE AND OSCEOLA WILL COME HERE. ALTHOUGH, LIFTING THE RESTRICTIONS IS A GREAT WAY TO THROW PEOPLE OFF UNEMPLOYMENT (THOSE WHO HAVE BEEN ABLE TO GET IT) , GET PEOPLE EVICTED & FORECLOSED AND DESTROY A LARGE NUMBER OF OUR SMALL BUSINESSES . WAIT . IT . OUT ! IT WILL BE BETTER FOR ALL IN THE LONG RUN.
St. Johns	Food	I do NOT think we should reopen bars and restaurants yet. I work at a bar and I haven't gotten unemployment yet but I don't feel like risking my health basically being a slave and serving people for their convenience . It's not smart! Cases keep increasing! Keep Florida closed!! Restaurants are Making a lot doing to gos .
Seminole	General	Open up everything ASAP!
Hillsborough	General	I would like to see the state open up differently depending on the region with the parts of the state with fewer cases opening up more aggressively and the regions with more cases opening up less aggressively. I don't think MIAMI can be treated the same as TAMPA or the same as Live Oak, for example. I also think we need to open up so people can get back to work in a manner that the health professionals advise. We need to get schools opened up for camps over summer so parents can go back to work. It doesn't make sense to open businesses if schools and camps are not open.
Polk	Food	Would definitely be beneficial to restaurants and restaurant employees to open... just have guild lines to follow. We can easily open safely at half capacity with cleaning schedules. If unemployment can't be fixed we need to go back to work to survive.

AMERICAN OVERSIGHT

Duval	Retail	Safe reopening of florida is imperative. Opening all retail shopping is necessary for small business owners, mall shop owners, and the many flea market vendors in florida. Ask the public and store workers to wear face coverings. Continue to encourage work from home for office buildings and people who can do so to eliminate many people working in close environments and to help parents whose kids are not in school Open campgrounds if only for florida residents. Without sporting events, concerts, theme parks and kids in school many florida residents could enjoy camping and be outdoors . Florida has alot of open outdoor space that we would love to enjoy.
Hillsborough	General	We have done our part to flatten the curve and have plenty of hospital beds. We can re-open while minimizing risk.-Much like wearing helmets while riding motorcycles or seat-belts in cars. Beaches and parks should be open. Restaurants should be able to utilize outdoor seating and indoor seating with less capacity. I am a commercial realtor, I represent restaurants looking to purchase and lease space. They have shouldered the brunt of business closings. Now is the time to start opening before they are forced to close for good.
Bay	Food	I want to start by saying that we appreciate all that you have done to ensure that our medical facilities are receiving as much supplies as possible. When reopening Florida, I think that you should divide the state. Clearly the Panhandle isn't considered to be anything like Central and South Florida in the number of cases or the percentage of deaths. My recommendation would be to allow North and Northwest Florida to go into phase 1 as well as other counties that have a low rate of positive cases. Please don't open bars or theaters.
Lake	Tourism	Varsity.com puts on a National Cheerleading competition (Summit) at Disney's Wide World of Sports every April. Thousands of kids from all over the U.S attend. It was postponed back in March and now just announced it will now take place June 19th! HOW can a cheerleading competition that will include thousands of children and their families be allowed during this pandemic? They are also stating that the Disney Resorts and Disney Parks will also be open for this event. PLEASE, have this even canceled!! The virus is still not contained and there is no way to social distance when athletes cheer. This organizations www.Varsity.com is one concerned about money and not the health of these children. They are also refusing to refund families until 2 months after it takes place.

AMERICAN OVERSIGHT

Alachua	Education	I honestly feel that we have come such a long way. That said the cautious will continue to be cautious but I am afraid the majority will begin to let their guard down and it iw way too soon for that. I feel that any and everyone entering a place of business,no matter what it is should be required to wear a mask. A mask is a very small inconvenience that could possibly save a life. If left up to business owners i am afraid it would not be enforced. My hope would be that the Gov. would consider this before opening Fl. I am very proud of the way he has handled things up to this point and just pray that we continue to be smart about opening back up. We are all very ready to get back to business but have so many lives that depend on our choices and actions. Masks my friends are very necessary until this virus is under control.
Orange	Technology	Please open back up. Economy is very important. Curve is flattening.
Broward	General	First off I would like to say that I am a nurse working in Broward and working in the COVID units which includes the ICU so I have seen the impact of the virus with patients that have survived and those that unfortunately have passed away due to the virus affects on them because of their other health issued. Before being a nurse I worked in the restaurant business. I do feel that it is time to slowly start opening up many different types of businesses as many that I even consider non essential have remained open. Salons including nail salons, hair salons, and tanning salons should be able to open as long as they maintain sanitation and limit the number of customers that they see at a time. This may mean that they have to extend their hours and open days that they would normally be closed. But before the orders to close down businesses officially happened my nail salon was actually already doing this as well as another one I visited. They were limiting the number of clients and employees while keeping distance as they were performing services which I feel was responsible as they were looking out for both the client and the their employees. Tanning salons are not high traffic areas and maintain their own sanitary practices therefore there is no reason why they should not be able to open. As for restaurants, I do feel that dining rooms should be able to open but once again limit capacity and ensure tables are spaced apart. Once again if this means restaurants need to take reservations and change their hours to ensure they can follow these guidelines then that's what they'll have to do. It's also important to ensure employees in the kitchen especially are in masks , washing hands, and changing gloves frequently. As for the bars and bars in restaurants I do not feel as of now it is to open them because of the close contact of the customers. I do not feel it is necessary for servers, host/hostesses, bussers, etc. to wear gloves and masks unless they're cleaning or performing another task that it is necessary. I personally would not feel confident going into a restaurant if the whole front of the house is masked and gloved.
Hillsborough	General	I live in Hillsborough County. Please consider opening with limited capacities. We need people back to work but social distancing and maybe masks can help move forward. Please look at each county and the leader there to help everyone get back to work
Holmes	General	No, do not open the state yet.
Seminole	Professional Services	I don’t think we should open the state until it’s safe to do so, according to medical professionals. At this time, reopening is still dangerous and not in the states best interest.

AMERICAN OVERSIGHT

St. Lucie	General	Please do not reopen the state right now we should stay at home at least until June....medical data states this info. We cannot risk letting people come down here for vacations and risk the spread of the virus....it is not fair to the people who live here in this state. The virus will be here until we get a vaccine or until we can all get tested and know who is sick
Charlotte	General	Let's open restaurants, retail, fast food dining rooms, and more previously closed businesses. You can impose strict sanitation and social distancing restrictions. This will give people hope and something to look forward to. Open beaches and parks with social distancing requirements. Ask vulnerable people to stay home. Allow nonvulnerable people to live their lives freely. Have a 20 people at a time in dining room limit at restaurants. If somebody is concerned about the virus, they can simply stay home. They shouldn't be able to continue forcing this upon others. The sooner we begin opening up the economy, the better it is for our economic and mental health.
Pinellas	Healthcare	I prefer to open up beaches, pools, retail stores, bars and restaurants at the minimum. They can adjust for distancing and I don't see it being any more dangerous than patronizing the grocery stores. I would wait a little longer for direct human-to-human contact business openings, but it is essential to get as many back to work as possible. Those of us (including me) who are immunocompromised will be more careful and may stay home awhile longer, but let those who are healthy and able to work do so.
Franklin	General	As a barber/stylist in Franklin county not working and ready to reopen Franklin county, not for tourists, but for our community. We need our restaurants to open and people need to go back to work. We have had 2 cases, one from my and another who came back from a cruise. I believe both are survivors as the media has exploited the negative. We have kept the virus under control. We also believe it may have already touched our community from Nov. 2019 to Jan.2020 as many were deathly ill with respitory illness and we're negative for flu. It's time for our small community to get back to life, in our town.
Brevard	Food	I work in the food industry and worry that it is still too soon to open the state. I care for my two elderly grandparents and we all are sheltering in place. I don't want to increase my or their risk for exposure. They are 87 and 83 years old. I worry that I'll have to go back to work and will be exposed to people who do not care if they're sick or not.

AMERICAN OVERSIGHT

Lee	General	As you discuss the possibility of “opening” up Florida, I would like you to consider the following. On March 16, Florida has 160 cases of COVID-19. Over a period of 10 days, these exponentially grew to 2,355 by March 26, doubling roughly every 2-3 days. At that point, the areas with the most significant outbreaks (Broward and Dade) put a stay at home order in place. These efforts helped in slowing the growth to approximate doubling every 4 days by April 3, when the statewide “safer at home order” went into effect. By April 24, the data shows some signs of progress and the growth rate has slowed to doubling every 20-25 days. However, growth has only slowed, it has not been driven to a point of a consistent decrease in new cases. As you “open” the economy, growth of new infections will likely accelerate. By the expiration of the current “safer at home” order on April 30 and at current growth rate, you will have between 35,000 and 40,000 cases in Florida. The number of cured infections is not public in Florida, but I would assume you have a base of 20,000 active infections, with around 1,000 being added every day. If the “opening” is too aggressive, you risk a re-acceleration of the growth rate, but this time with a much higher base to begin with and new infections can grow to the point of overwhelming the infrastructure very quickly. Given the incubation period, by the time this is realized, you may well be on the path of New York or Italy. Successful relaxation of restrictions requires (a) a reduction of new cases to the point where contact tracing can be implemented, (b) a contract trace and test program in place, (c) sufficient medical infrastructure to handle surges and (d) a plan on expediently handling possible explosive re-growth. “Opening” today without solid plans risks a resurgence and eventual re-closure of the economy, with likely even worse economic effects than continuing the restrictions with only minor relaxations for a period of time.
Osceola	General	I’m concerned that if we reopen with out testing every day for everyone that enters work or theme parks (which is my biggest concern). I live right outside of dinsey. If them and all other. Business and tourist location open how are we going to make sure that people coming into our area are healthy. Which a promise how and that every one will be tested then I am putting my self and my child at risk of coming in contact with it. We already have place like Publix in my area and target that are not making employees or customers wear mask. People are coughing and walking around the stores like there is nothing wrong with what they are doing and when you tell management about it they say well we can’t make them. Call the cops and told it’s not a police matter but up to the store. I’m sorry but no one is following the rules and as everything reopens and it gets hotter people are not going to follow the rules and we have people sick all over again.

AMERICAN OVERSIGHT

Clay	General	First and foremost there need to be instruction to all Floridians to RESPECT each and every residents' desire to either quarantine, get back to "normal", or anywhere on such continuum. Those that self-identify as "high-risk" shall be encouraged to self-quarantine as possible until a successful vaccine is rolled out. Those who do not identify as high-risk of having adverse outcomes to Covid 19 should proceed to safely regain their "normal" existences while exhibiting higher safety measures. Requesting the public wears masks. Require all businesses to provide public access to hand sanitizers. Frequent hand washing. Sanitize public surfaces several times daily. Those who exhibit symptoms of sickness should stay home until symptoms are gone. Testing is overrated and only explains moment in time. Once a test is widely available for Covid 19 antibodies, everyone should be tested. I reiterate that there should be no acceptance of shaming one another based upon their desire to either social distances or get back to work. We all lead unique lives with distinct pressures and need to be respected for our respective desires to approach this situation.
Escambia	Tourism	We own a condo in Perdido Key and we reside in Broussard Louisia a. We want to go to our condo for the rest of the year but we dont think its fair to quarantine for 14 days. We have very few deaths in Broussard and being punished for New Orleans. We also follow the Stay at home guidelines. pls consider opening up parishes in La. That are not infected with the virus. Mandate by parish not by state. Thank you for your consideration
Okaloosa	Tourism	This virus was overblown, and a power-grab. There's not ONE scientific or medical reason that each state should not be COMPLETELY and FREELY re-opened, excepting, MAYBE, NYC. We need our God-given rights left alone, and tourism back!
Hillsborough	General	Good afternoon, I hope that restrictions are lifted as soon as possible. We can practice social distancing and protecting the vulnerable, and still continue going to restaurants and retail shops. The shut down is destroying the livelihoods of millions and is causing an undetected amount of stress and anxiety. People can choose to visit these businesses if they are comfortable. If others are still not comfortable in public, they can continue isolating at home. The hospital system isn't overrun. My brother in law is a nurse at TGH and had his hours cut. My uncle is a doctor in the Bay Area and is working 1 day a week. My brother is also a doctor and reduced his hours 25%. The current course of action is not sustainable. Please re-open Florida now!
Pasco	General	I think phasing out the reopening is the smartest plan however it needs to be considered when have a consistent drop in numbers over a steady period of time. A plateau so to speak over 7-10 days where the numbers don't jump high. And social distancing still need to be enforced. The unemployment benefits needs to be fixed for those who need it. If we're going to start opening businesses we also need to take into account there are single parent households that still have students at home that need to be cared for and they need to be taken of as well. Those parents don't have child care because schools and after school programs are closed.
Polk	Tourism	If you can guarantee me I won't get the virus, by all means open up.

AMERICAN OVERSIGHT

Lake	Healthcare	Please allow elective medical procedures as soon as possible. I need a biopsy to determine if I possibly have cancer. This is an essential procedure that must occur soon.
Bay	General	Open Florida asap
Miami-Dade	Retail	I work in commission based retail shoe store and i cant social distance from customers. My paycheck depends on helping customers. I have to help elderly customers put on and take off shoes, customers touch everything, they obviously have to touch the door handles to open the door. The mall i work at is so busy that sometimes you're walking shoulder to shoulder with other people. Memorial Day is coming up and Miami Beach is going to be jammed packed with locals and tourists. Please , wait for a 14 day decline, which there hasn't been, one day its 400 cases and the next day it will be 800 cases. Im very nervous about catching this virus, i have elderly parents at home. Please chose the safety of your citizens over politics. PLEASE DO MORE TESTING AND WAIT FOR THAT 14 DAY DECLINE.
Seminole	General	We need a way to track cases & contacts & have more testing available before re-opening. Re-opening before we have those things is Dangerous. Extend the stay-at-home order, please.
Lee	General	Every day I see people in and around my community that are not following the social distancing directives nor the safer at home directive, and there is still a local gym open. Clearly people are not understanding the seriousness of this virus and what it takes to reduce the numbers. I am concerned that businesses will open, the people will flood in and all will be forgotten about protecting ourselves and each other. I would like to see a strict policy of social distancing including reduced numbers of people allowed in stores, in restaurants, and in businesses, and the requirement of wearing a mask in all public areas. Please let's follow the science on this and not rush to get back to the old normal in every way, too soon. When we open let's ensure it is done so with the safety and wellbeing of everyone as the top priority.
Palm Beach	General	I believe that Florida, particularly South Florida, is not ready to open May 1. We must protect our most vulnerable people.
Hillsborough	General	Do not open until everyone can be tested and retested weekly if required. Once you can show you have the antibodies you are free to do anything. Until then ask yourself would you send your kid to a crowded place? Would you send your parents? If you can't say yes you can't open
Leon	General	I believe the state should not reopen until health officials say otherwise. At this time the numbers of positive cases and deaths are still high.
Hillsborough	General	My husband and I would like to see all business to open up fully with restrictions. Tiered over a time period. We are over the age 60 and would continue our social distancing, mask, gloves, etc. let the younger people go back to work. Most importantly, implement in stores and restaurants the same practices as found in Publix and Sams club.

AMERICAN OVERSIGHT

Duval	Tourism	Reopen state parks and limit capacity initially. State parks with beaches are prime candidates for reopening because social distancing can be practiced with capacity limits and beach patrols. This should include allowing use of chairs, blankets, sunbathing, and umbrellas, not just exercising, fishing, swimming, and surfing. Allow Floridians priority access. Don't let the stupid people ruin access for everyone.
Hillsborough	General	Let's get Florida opened up. People need to get back to work. Everyone needs to get on with their lives. We can wear face masks and keep our distance but please - open up our state. Thank you.
Suwannee	Healthcare	Please allow us to reopen and see urgent dental care. Patients who needed treatment and bordering on emergency care now. We have been using ppe for a long time for pathogens and have always used approved disinfecting procedures. Our patients need us.
Hillsborough	General	I don't think it's enough time to go and open Florida up. Too many are still sick and alot of us haven't been tested. I think if you open alot of people won't listen to the guidelines issued and it will ultimately ruin what the people who do care have done. I know it's ruff out there right now especially for people who have filed for unemployment or are trying but it's just too soon. I say fix the unemployment site and get these people help ASAP, then slowly move forward on a SLOW PLAN. I deliver prescriptions pt as an essential job and I know if people really need to work they can find a job like this without having to reopen the state. Don't do like Georgia is doing as they are asking for failure. Unfortunately, they are right above us which them failing could be a risk for us in Florida and were not even open. Just wait for awhile longer.
Bay	General	Please open Florida immediately. Thank you.
Bay	Tourism	Please keep safer at home in place! Please close our beaches! There has been a large influx of out of state license plates on the beach. Beach homes ARE being rented to out of state tags
Collier	Retail	A measured return to open the state should keep the health of the residents the primary focus. I believe that opening before the health issues are going down, could be economically disastrous. I would wait until May.
Pasco	Professional Services	We need to open Florida back up and understand that the longer we wait it will have long term impact to our most vulnerable. We will not be fully free of virus until there is a vaccine which is some time away and we know it is not reasonable to wait that long. In the interim we have to fight the virus and do it in a Practical and responsible way. We can not shelter in place for the next 18 months. Unemployment will continue to rise and will cause pain and suffering as well so we have to balance both safety but also financial health.
Broward	Government	Open Everything!!!! Enough, everything is crashing!!!! People should have have the choice to open their businesses and patrons can go in if they want or stay out but everyone should be able to go back to normal if they want to!!! This is ridiculous!!!! WHERE IS OUR FREEDOM. 98% OF PEOPLE THAT GET THIS VIRUS SURVIVE! I voted for you, pull your head out of your ass

AMERICAN OVERSIGHT

Pinellas	General	Please open the state immediately! No restrictions needed. It has already been proven this “virus” is not the threat initially thought. I understand things are happening behind the scenes not in your control but this has to STOP. Open the state now!!
Nassau	Government	I just do not know why the tax collector office is closed. Hunting,fishing concealed carry permit. How do you register a car? But you can buy liquor. We need to get back to work as the state can not get unemployment system working.
Broward	Healthcare	May 2020 is too soon to re-open Florida. As of 4/25.2020 we are still seeing an increase in the number of cases of COVID-19. We have stayed home and out of work for a month already. None of us want that month to have been for nothing. Re-opening too soon will allow for a resurgence of the disease and we will have to start all over again-those of us still alive that is. Thank you for allowing the public to express their opinion on the most critical issue of our times.
Flagler	General	Reopen by county - based on 2 weeks of declining rate of total new cases (per day) as a percentage of total tests administered.
Pinellas	General	To open fl now would mean making more people sick and putting those who are most vulnerable at risk. I have an autoimmune disease and will not be leaving my house for a while anyway. I am worried about my husband, friends and other people like me. Who can't risk infection. Is opening fl worth lives? I know there a there are people suffering because of unemployment, work on that system instead of killing peolpe.
Broward	General	Leave restrictions in place until everyone has been tested including those that are asymptomatic. To do otherwise is putting even more people at risk with the potential of suffering and possible death. We also need to be closer to having a vaccine that is widely available to doctors, hospitals, clinics. Reopening now is a suicide mission. Lets be smarter than Georgia and South Carolina. Florida is usually the laughing stock state. Lets do better!
Indian River	Government	Open the economy! Some Floridians want to get back to work! No more government checks let us get back to work before we completely destroy economy.
Broward	General	We need Florida open as soon as possible. We stayed at home as we were asked to. Now it is time to get us back to work. We can do it in a smart way. You just need to trust the people.
Palm Beach	General	Just my opinion as a concerned citizen, wife, mother, and grandmother. It is extremely too early to open up and loosen restrictions. I am in the beauty industry. I personally feel very offended that the beauty industry over all other necessities would be on the table. Its disgusting and shallow. My husband cant see his Doctor for a back and shoulder procedure but women are filling salons in Georgia. This is an embarrassment I personally refuse to take clients. Our country and ALL citizens health should be more important than anything else. Again extremely too early to start opening up our state.

AMERICAN OVERSIGHT

Leon	Healthcare	Reopening Florida now is not a wise decision. We are successfully flattening the curve but the curve hasn't flattened yet. The possibility of a resurgence of COVID is very real and continuing the shut down for another month is the best way to squash it. Just leave the shutdown in place until the end of May. Take our health seriously. If we are dead, we can't spend money. If we are dead, you can't be re-elected. Showing us that you care about our well-being is the best way to ensure that you will be re-elected and that the economy will have the backing of the people in this state.
Manatee	Education	Reopen Florida. Maybe allow higher risk people to opt to stay home. So many people out of work.
Manatee	General	Manatee County has a 16% positive rate and lowest testing per capita on the state. Cannot look ar reopening based upon total numbers but has to be down to a lical level. The numbers for Manatee would indicate that enough testing has not occured. Particularly as a third of the cases and 50 % of the deaths are in Nursing homes. Why arent all residents and staff of nursing homes being tested Without better figurest and a much lower testing percentage Manatee cannot be opened
Palm Beach	General	We need to open back up the parks,beaches,pools in communities where there are HOA's etc. We should open restaurants back up w/50% capacity for a couple weeks and see how the numbers track. Open back up slowly,methodically but open back up now. Let each person make their own decision to either go out or stay in. Let's get back to work and back to normal
Seminole	General	Please do not re-open non-essential businesses at this time. It's still too early to accurately understand the trends in almost every county. So many counties have had severely limited testing availability. Even Orange, one of the state's largest by population, has had to close their drive-up testing within seven minutes of opening because they have had so few tests on hand each day. You cannot in good conscience look at this data and say, "There are only x positive cases" when you know full well hardly anyone has been able to be tested. Please fix the unemployment debacle left by the previous governor, instead of opening too soon in order to avoid paying unemployment.

AMERICAN OVERSIGHT

Okaloosa	Transportation	We should look at the COVID-19 response adopted by Sweden. Social distancing whilst allowing businesses to open shows the same results as lock-downs. The virus is spread by airborne droplets and contaminated surfaces. Social distancing, hand and area cleaning helps reduce the possibility contamination. This can and should be practiced by everyone. Florida needs to reopen to prevent the fast approaching social and financial catastrophe, which is surely coming. The current restrictions are crippling the people of this state and especially our local community, which depends heavily on tourism. We are starting to see increases in petty crimes such as theft, this will get worse as time goes on and people are without money. We simply cannot keep living this way. Summer is fast approaching as are the number of businesses which will go bankrupt with the obvious knock-on effect to the employees. Law enforcement should be enabled to issue fines for those that openly do not practice social distancing guidelines - i.e. groups of more than four/six people in any public place; beach, restaurant, workplace, etc.
Hillsborough	Education	Please re-open Florida. I am a stay at home mom that homeschools three boys. Fortunately, our education process hasn't changed with the shut down. But I have noticed by boys suffering from a form of depression because they can't go to State Parks and ride their bikes, go to the playgrounds, or go to church or sports. Please re-open Florida to help relive the mental suffering on our kids.
Lee	Healthcare	Please open up somewhat for our health and sanity! Beaches with distancing...have the beach pa rollers enforce safe distances. Keep bathrooms closed. Restaurants with social distancing. Retin stores open. Hair and nail salons with restriction.
Clay	General	I feel this is a hard decision if we open too early then there's a chance of spreading but people do need to go to work and to feel normal do I think we should be cautious.
Pinellas	General	With the heat of summer coming, I'm not sure why people would not be allowed to walk the beaches. I'm not recommending large parties and having was too many people gathering on the beaches for the summer parties. However, I am recommending that the task force consider opening beaches during the summer months and that police officers are on foot or patrol in someway and give out citations for those people who do not obey social distancing laws. I also believe that Florida is a place where takeout food has been allowed and we have plenty of outdoor seating in the downtown Saint Petersburg area. Once again I think people should be allowed to sit at tables at a minimum of 6 feet apart from each other and eat the food that they are able to take out from restaurants. Not sure servers should be waiting on tables yet. The curve should flatten before indoor seating is permitted.

AMERICAN OVERSIGHT

Manatee	General	Manatee County has a 16% positive rate and lowest testing per capita on the state. Cannot look ar reopening based upon total numbers but has to be down to a lical level. The numbers for Manatee would indicate that enough testing has not occured. Particularly as a third of the cases and 50 % of the deaths are in Nursing homes. Why arent all residents and staff of nursing homes being tested Without better figurest and a much lower testing percentage Manatee cannot be opened
Pinellas	Government	Please just open Florida. Allow people to work from home that can. Provide extra protection and resources for those in hospitals, nursing homes, and first responders. Get Florida back to work and enjoying our freedom without restrictions. Thank you!
Duval	General	Please reopen our economy. We have let this virus almost wipe out of economy. Those who wish to stay home may do so. We do live in America and they have the right to stay home. If this thing is so bad why are we not seeing a high rate of essential workers being infected. Open the restaurants, hair salons, all small businesses, 100% reopen. If we need to take temps and use common sense ok I'm fine with that but let's get working again.
Broward	Healthcare	In every area of healthcare, mandate that all staff must wear a mask during work hours. Even if the place of work is a Dr's office, non profit organization, vision school, eye glasses store, etc. It can be a cloth mask, but some type of mouth covering. Also, physical distancing should be maintained at work wherever possible.
Pinellas	General	The purpose of the lockdown was to prevent the hospitals from being overwhelmed. That been accomplished. The death estimates have dropped substantially, in terms of mortality rate and total number. The state must be re-opened or we lose a decade of financial growth.
Polk	General	This is getting ridiculous. I don't know what 3/4 of the state you polled, but the survey was clearly biased in some way. People want to get back to work. Floridians are ready to get back to enjoying their state and everything that entails: beaches, theme parks, state and local parks, restaurants, etc...Our economy is ruined because this was taken too far. If people are concerned about their health for whatever the reason, then they should have enough common sense to quarantine themselves. Sorry DeSantis but this state has lost complete faith in you over this. At this point, you're just the lesser of two evils.
Orange	General	Why are any retail stores closed? I can go to Walmart and buy new shoes,but not Foot Locker. I can go to Target and buy new clothes,but not Macy's. I can go to Costco and buy a new computer, but not Best Buy. I can go to Home Depot and buy a new BBQ grill, but not the store down the street which specializes in grills. What right does the government have to keep stores closed? What right does the government have to cause an economic depression on fallacious assumptions of Dr. Fauci?
Broward	General	Please we would like you to reopen our pool

AMERICAN OVERSIGHT

Okaloosa	General	I feel that it is too soon to reopen the state. If we open up I feel that we will be putting more citizens at risk of coming in contact with someone that could be asymptomatic and get the virus. Opening the state up will also bring an influx of people from out of state which would also but a hinderance on our already depleted supply of essential needs. Grocery stores are still having trouble keeping essential household items stocked and if more people came then it would hurt the locals more with trying to find the things they need.
Manatee	General	As a resident of Florida I demand that health and well-being be put first. Please wait until the health professionals say it is safe. Do not make the same mistakes others are making in rushing this reopening. Florida is much different than a lot of other states in that we have a huge elderly population. Also, opening the theme parks is absolutely ridiculous to me. The minute Florida gets reopened we will have people flocking here from all over the world. Please please please wait till it's safe. Thank you very much
Lee	Government	Personally, I think it's time to reopen Florida. People are hurting from the loss of jobs, homes etc. We have dealt with Sars, Ebola, Swine Flu & never have we shut down the economy like we have with COVID! It's time to put an end to this circus!!
Pinellas	Technology	Tennessee seems to have a good phased approach to reopening. I would think that wait until at least May 15th to even think about reopening.
Leon	General	The re-opening of Florida without proper testing, tracing, and isolation will result in the deaths of thousands of Floridians and even more others, should they decide to travel here. Their deaths will be on DeSantis' hands.
Broward	General	The thought of reopening Florida is a scary though to someone with asthma. I know the economy must be restarted in someway but I fear people going too crazy when things start opening. I'd feel a lot more comfortable if masks were required for all. Especially anyone serving customers of any kind. Continued gathering size limits, even though I miss going to church in person. Recreation areas should be giving size limit/ passes made available for a limited number.
Hillsborough	Retail	Please begin to safely re-open outdoor recreation areas such as beaches, parks and pools, with appropriate 6 foot distancing and maximum capacity limits. Businesses such as restaurants with outdoor seating should also be allowed to operate with appropriate distancing. Our entire county has very few infections- so we should be allowed to start slowly living our normal lives again due to very low overall risk.
Palm Beach	General	I don't think this state is ready for full re-opening. Understandably the hospitality business and restaurants are suffering, but it is to soon. It is a very scary disease that not enough testing has been done and there is no end in sight. Don't force an opening of the state when the majority of people are not ready just to appease certain groups of interested parties.

AMERICAN OVERSIGHT

Brevard	Professional Services	As a Leon County hair salon owner of more than 20 years, I ask that you please delay the opening of hair salons. I am 66 years old, and more than 75% of my clients are over 65. We do not feel it is safe to return to doing a service that requires very close personal contact, as close as medical services. Reading the requirements of Georgia, for reopening salons, presents an impossible work procedure. It is too early to reopen hair salons. I do not want to have both my live's work and business end because of an early opening. Thank you.
Manatee	General	Florida cannot remain closed. Entertainment and Hospitality workers generally live paycheck-to-paycheck, many with tips providing most of their income. With he Florida unemployment compensation hopelessly broken, these workers haven'y been paid in 4-weeks. This is unsustainable under any circumstances. There will be violence and death not directly related to the virus if this continues. Working age people who are not going to get sick from the virus will start dying from other factors because of this lockdown. This comes down to a basic, age-old equation. The needs of the many must out-weigh the needs of the few. Or, more colloquially, the cure must not be worse than the disease. Free our economy! This comes down to who has a stake in the economy versus who doesn't! Keep the elderly, weak, and in-firmed in isolation. This is the meaning of quarantine -- not the reverse.
Duval	Recreation	As antibody tests confirm that as many as 15% of the population and a death rate that will rival influenza as the data comes out, we are truly punishing the innocent mentally and physically by not allowing kids (students under 22 years of age) who have not been proven as carriers of COVID-19 to be excluded from their basic rights to pursue life, liberty and the pursuit of happiness while encroaching on their Civil Rights guaranteed by the US and Florida Constitutions. As businesses fail, please consider that children are being discriminated against unfairly in many respects. Mostly out of fear. As data proves, children are not the focus of the virus. The elderly and the sick are considered "vulnerable" populations. These populations should take special care in respect to this virus. But we don't live in a state with massive public transportation, high population density, or poverty in high rise projects. Nor do we have a cold climate with low humidity. This committee needs to stop buying into the fear and start looking at the advantages that we have as a state. That said, bolstering consumer confidence is at the heart of reopening businesses. We should do things to educate and inform customers of our efforts as we deal with the repercussions of a NY media centric environment.

AMERICAN OVERSIGHT

Manatee	General	To whom it may concern, I would very much like to go back to some semblance of a normal life. I realize that may be different than before Coronavirus, but I am smart enough to make my own decisions. I don't need the government telling me to hide in my house till I have so little money left, I am waiting in a bread line. Protect those who are most at risk, the elderly, but those who have put themselves at risk, such as the obese, well, good reason to start a diet. Let's open it up. Sincerely, Robert Noland.
Lee	General	Open the State Parks and beaches as well as retail stores. We have learned a great deal about this virus and have protocols that can keep us all safe. It's time to TRUST the citizens of this great state. Let's move forward !
Hillsborough	General	The purpose of the Stay at Home order was to flatten the curve and to prevent our healthcare system from failing. While we are still learning more about this virus every day, it is evident that Florida has not seen the level of infection that was predicted, despite our state's high elderly population and spring break tourists, who likely brought the virus with them into the state unknowingly. We will never get to a zero case situation, even with a potential vaccine. I believe a staged approach similar to what the CDC has proposed makes sense...ie. I don't think bowling alleys should come before we allow elective surgeries and dental procedures. Though I don't want anyone to fall ill from the virus, there needs to be increased communication regarding the dangers of putting off preventative healthcare and what will be done to keep people safe when they visit the doctor. Illness from the virus may pale in comparison to the tide of people coming in with preventable health problems that have accelerated in severity because exams/treatment was deferred. I am also very concerned about plans for education in the fall as I have small children and work. Students must be able to go physically to school if any reopening plan is to be a success. Long term virtual school will have a detrimental impact on not only the educational preparation of our young people, but also on their mental health and social development. Most parents work and cannot educate their child plus keep up the demands of a career for long. Our residents are aware of the risk and are being cautious, which must help in reducing the risk of an unbridled outbreak. Our public health officials are also on guard now, and if new cases do break out at a fast pace, as long as they are ready to act, I support moving ahead with a reopening plan.

AMERICAN OVERSIGHT

Pinellas	General	Thank you for the opportunity to weigh in on this. While not an expert, I believe we need another 30 day stay home order during which there is extensive testing, especially in rural areas. Based on those numbers, we can then divide the state into quadrants to determine the the very next phase of moving into a 14 day phase 1 of loosening restrictions per CDC guidelines and guidance. Including all required PPE Allowing a county to open while surrounding counties remain on lockdown will not work. Folks in Pinellas will go to a neighboring county to get a haircut or their nails done or eat a restaurant, etc. Aggressive testing, let's the numbers tell the story and dictate the timeline. Mandate that EVERY person in nursing homes and assisted living facilities be tested ASAP. This includes ALL staff. The staff leaves work and interacts with the public. On those unemployed, get these folks money ASAP. Authorize banks to accept claims and pay on the spot, by appointment only. Or allow banks to accept proof of filing to automatically deposit $1000 in to persons accout. Thank you.
Pasco	General	I'm a germ phobic I will not go anywhere unless I know it's being disinfected CORRECTLY. The consumer will dictate where the clean places are, welcome to my world. GOD BLESS THE US!
Palm Beach	Healthcare	the decision as to what activities remain closed should be made by public health professionals and not by the general public. the general public cannot make an informed choice
Okaloosa	Management	Do not reopen everything. Only essentials should be open.
Duval	General	Let's get on with it. Cases peaked April 2-4. The shutdown is going to cost many more lives than the virus. Just examine the upswing in deaths from despair after 2008-9. We should open Phase 1 on the 1st of May

AMERICAN OVERSIGHT

Brevard	General	Please, please, please end this lock down on May 4th. We have all been locked in our houses for over a month now and it is affecting our mental being. Ever since my husband has been furloughed I haven't been able to sleep through the night. We received our stimulus checks and he was able to cash out his 401k but even though we have a cushion the uncertainity of if and when we will be called back is too much. Not being able to go to church or see my loved ones, especially my dad in his assistant living facility is overwhelming. Facetime, messenger and online services are not enough. The interaction and love that is missing is too much for a social person. I started a great job with Hilton, work from home and ended up being furloughed after 2 months. I had all my travel planned until New Years. I have cancelled 3 trips so far. I live 10 mnutes from the ocean and can't lay out or go in. It has been hard. Please slowly open up restaurants allowing seating on the outside. Making air conditioning vent cleaning mandatory. Let us go back to the hotels and get some relaxation and sit out on our balconies even if it is just interstate travel. Open up the stores so we have some where to go, Online shopping has been my only lifeline, but you're unable to try anything on causing me to have to return items for the first time. Please follow up on my unemployment and get me paid. I am in the system but had to do over since the system was going off of an old claim. Now I had to start over again with Hilton's proper FEIN #. Not having money, staying home all day and the uncertainity of when we will be called back is too much. Please open back up 5/4 so we can all get our lives back.
Brevard	General	The original reason for shutting down businesses was to make sure our healthcare system was not overwhelmed. The state has been successful in meeting that goal. Now is the time to allow people to go back to work. Common sense guidelines should be provided and then it is the responsibility of all of us to protect our own health. We all have the responsibility for our own health in the final analysis. Time to allow people to earn their livings, while practicing good health habits. The same habits we should be practicing year round. Also, allow the gyms and health clubs to reopen in phase one.
Leon	Technology	Please reopen the state. I've been laid off and am looking for jobs everyday.
Pasco	Finance	Show so leadership and OPEN FLORIDA, NOW!
Seminole	Finance	Don't reopen just yet, too soon Last thing we want is to have to start all over again. We need to be concerned for the health and safety of all before anything else

AMERICAN OVERSIGHT

Volusia	General	I would love the stay at home order gone. I know many are still scared but we are better off with herd immunity. Get out there, before there is a big second wave bc we hid and “avoided” it. It’s going to be here from now on anyway and I refuse to stay home until a vaccine is available. The CDC (joke) and communist run WHO are continually fear mongering with their ever changing information and I don’t trust them in the least. The number of cases is always growing only bc of the tests and the deaths are not nearly as much so that means it’s not nearly as deadly as they first and still are trying to report. The Flu is more deadly by a large margin and that’s due to the vaccines not being effective even after all this time so what’s the difference. The economy will darn near collapse if this continues as well as that we can’t get ‘non’ emergency procedures done. I can’t get my check up to make sure my cancer is still gone (which I had an appointment in March , but of course is on hold 😠. And my cousin can’t get her surgery to remove her cancer.😠😠 This is ridiculous!!! ENOUGH...PLEASE OPEN OUR STATE (and fully)!!!!!! Lives are at state more from these closures than the virus!
Pinellas	General	I believe that a complete shutdown of the Florida economy was a incredible miscalculation. I think that the elderly and the at risk group in general should stay reasonably isolated and taken care of and the rest of the public at large should return to work and businesses should reopen. The businesses that have higher capacity such as restaurants should be allowed to reopen with at least 50% to start as they are doing in Tennessee. Far more lives are going to be destroyed from the economic impact than this virus was ever going to do. Once the re-opening does take place it is going to take a while for people's finances to recover so this should happen immediately.

AMERICAN OVERSIGHT

St. Johns	General	Good afternoon! I am so glad we are able to convey our thoughts to you! Thank you! So, I am a single mom of 2 teens, and though I understand the closure of schools for the duration of the school year, I am not quite confident in the inability of not being able to work to support my 2 kids. I do receive SSD, but also bartend to ensure I can take care of my kids and my bills. My income is the only source to support myself and my kids. My ex husband, and father to both of my kids, is just over $20,000 behind in his child support. His mom claims him as a dependent on her taxes so his tax refund doesn't get garnished to pay child support. So, as you can imagine without working, this has been an extremely difficult month and a half for me...as it has been for many. Especially here in St. Augustine where most of us make our income in the restaurant/bar industry. The stimulus check idea is great, but let's be honest, it won't go far for many of us....then what? We all have to hope for another handout? I, like many, want to work. I not only have 2 kids, I also have rent, bills, car payment, pets, and credit cards. I don't want to lose everything I have worked so hard for. Mostly, I don't want to lose what I have for my kids. I understand this pandemic has caused massive hysteria throughout the country, understandably, but I am now more in a panic about my responsibilities and obligations., not over COVID 19. I don't mean to sound as if I have taken this lightly, that isn't the case. I have watched thousands of people moving out and about in town during the entire stay-at-home order, driving, at parks, stores, etc. and it just seems most of us are just ready to move forward. Life is about chances, and unexpected situations, but life shouldn't revolve around fear. When we have no control over the choices we need, or want, to make for ourselves, family, and personal situations, it makes the entire circumstance horribly worse. Before I proceed, I do want you to know I am truly happy with the job you have done so far...including before the pandemic. These are just things that I have found to be an issue more than once for me during this lock down. The next problem I have encountered, as i am sure with others have, is the inability to actually get things done that are deemed necessary, like getting into the courthouse for things that can't be done online. Also, needing and not having access to printer services for things that are essentially needed documents off the internet- like bank statements for a rental application. There are many things
Hillsborough	General	DO NOT OPEN THE STATE YET. IT IS NOT SAFE PLEASE LISTEN TO SCIENCE AND WHAT PUBLIC HEALTH OFFICIALS ARE SAYING. IT IS TOO EARLY TO RE OPEN OR ELSE WE RISK A SECOND WAVE.
Lake	General	It should be mandatory that everyone wear a face mask when out in public. NO EXCEPTIONS! Taking temperatures at the point of entry is a waste of time, because if you are running a fever medication can mask it. Not all people are the same. If I run a fever i always have a rash appear on the trunk of my body. Bright red, hot and itchy.
Broward	Professional Services	My business is window treatments to the design trade. Not retail. This shut done is hurting every person in America. I would hate to see us open only to shut down again. We need to do more than we are doing to stop the spread. I think all business can gradually reopen with stiff rules.Limits on how many customers can be in on location at a time can be calculated by square footage. Restaurants slow and very limited who wants to go out to dinner wearing a mask. All retail MUST have a better system, such as Monday people born on even years can shop or Monday's last names A-F limit still by square footage. Temperature taking, spraying down people and purchases with alcohol. Only 1 person per family allowed shop. We can get through this with a little effort from all in our communities.

AMERICAN OVERSIGHT

Marion	Healthcare	Not enough testing done!!!!! Marion County is predominately elder residents and their hasn't been any test sites here locally.!!!! More testing needed before opening this state or there will be more deaths. Remember who comes out to VOTE!!!
Hillsborough	Finance	It is time to reopen Florida. We have been closed long enough. Start slowly, but get it done. I have been out of work for 5 weeks, can't get the unemployment to acknowledge my case, and we need to get back to normal. There are precautions that can be done, but now is the time.
Volusia	General	While it is important to restart the economy, this needs to be done in a methodical way. First, this should not be considered until the expansion of testing for both the virus and previous exposure (antibody testing) needs to be greatly increased. Right now, the sample size of those tested vs. the population of Florida is woefully inadequate to statistically draw any conclusions. Those services and positions that can maintain 6 feet or more should be the priority in re-opening the economy. Face masks need to be required to further risk the exposure to the virus, especially for the asymptomatic individuals. This should be for those returning to work and those out in public. Finally, the unemployment site MUST be fixed and fixed now. I have been unemployed before due to position elimination in another state. The process took a total of one hour to complete and the first check was received, with pay back to separation date, within two weeks. All Floridians who have been negatively impacted by the inadequate system deserve a resolution to the website and processing delays immediately and all benefits need to be retroactive to the date of separation. Doing this would also allow for a slower restart of the economy if individuals have a source of income, even if less than normal, to be able to meet immediate necessities.
Hillsborough	General	Hello, I am a resident of Hillsborough County. I am writing to say I want Governor DeSantis to Open Florida for Business. Floridians don't need to be dependent on government handouts, we need to get back to work. We love our neighbors and know how to use common sense to live and work safely. Governor DeSantis can lift the penalties for opening our businesses and still keep the CDC Recommendations. Let Florida get BACK TO WORK. Thank you. Governor DeSantis c
Santa Rosa	General	Don't open anything yet
Orange	Government	Please do not open yet, we need at least 90 days. We actually need to all wear masks. Please enforce this.

AMERICAN OVERSIGHT

Orange	General	As a small business owner I'm eager to make a living again. However, I'd rather do what we need to do now to keep people safe so we don't have to close down again months down the road for who knows how many times. We should open up cautiously. As of now, when I go to the grocery store, at most 25% of people wear masks, most of which are younger people like myself. Downtown winter garden where I live, was bustling with people this afternoon with zero regard for social distancing. Neither of these things are safe, everyone knows it, and the behavior won't change unless you make it change. There should be enforceable guidelines in place to allow people to go out, visit businesses, assemble in groups, while maintaining the health of as many people as possible. Complete shutdown isn't the answer, but neither is a flagrant disregard of the proven threat of covid. Please excuse any typos. Typing from my phone. Thank you.
Leon	Healthcare	Please continue to protect Floridians by not re-opening prematurely. The original guideline was 14 days after the last confirmed case. We are still getting new cases. Make it possible for Floridians to stay at home by making it easier to get their unemployment benefits. Make more testing widely accessible.
Duval	Government	OPEN UP FLORIDA - NUMBERS DO NOT SUPPORT THIS SHUTDOWN, THIS IS CRIMINAL
Broward	Tourism	We need more testing available in Florida before we can consider opening businesses. It needs to be as available as strep tests are when people think they have strep throat! Otherwise we will never know just how many people are walking around with it without symptoms. So work on that before anything else!!!!
Hillsborough	Healthcare	We all need to be wearing masks! We also need to have instructions on not wearing shoes in our homes that have been worn outside, we should be removing clothing upon coming in to our homes and showering before having any contact with anyone who is vulnerable. If everyone knew to do those simple measures we could begin to lift Stay At Home restrictions. If fitness facilities, hair and nail salons can limit the number of people in such a way that there is 6 feet between individuals there should not be a problem with folks being able to visit those businesses. These are basic public health measures that have been in place for a very long time. How or why they were not utilized at the onset of the pandemic is a mystery to me. As for the masks- there are directions for many options for no sew and others on the internet. I will be wearing a mask when out in public for a very long time! Laurie Stark, RN, PhD
Hillsborough	General	So we have stay at home order that was only done because Governor DeSantis went with the thought process of “ok lawmakers I’ll show you I’ll do a stay hone order that’s just plain embarrassing”...It’s beyond horrible and to be honest has so many holes in it It’s worthless...our numbers haven’t flattened, beaches are reopening...you want to make Florida the next New York? Go ahead and reopen. I for one think it’s better to wait to reopen...just remember want it bad, get it bad...reopening for what reason to get people sick? No - do not re-open Florida at this time!

AMERICAN OVERSIGHT

Marion	General	I believe it should remain closed for now due to some counties not getting testing like others because they were hot spots. Now some counties are just starting to spike and u wanna reopen.
Hillsborough	Healthcare	I feel like opening with limited patients in the office beginning May 8th as the American Dental association has recommended is fine as long as we have the proper protective equipment (N95, level 3 surgical masks, gowns etc). My worry is there isn't enough for hospitals and they are having to go without or reuse them, then we are not ready to reopen. It is not ethical to force medical and dental offices to work without proper protection that is changed regularly for their safety and the patients safety. I also feel as if anyone that must come within 6 feet of their clients or customers should wear masks. Anyone handling/serving food should have masks and gloves. Gloves need to be changed and not used to serve food and take payments. There should be training on cross contamination. With all that being said, there will be a lot of masks and gloves needed to reopen business safely. Therefore if there isn't enough protection for everyone in these business, then we can't reopen safely. If we can't reopen safely, then we need to limit who is reopening until we have what's needed.
Hernando	General	Leave it closed we haven't even hit the peak yet and our economy will be damaged by phase three people having to stay in linger
Broward	Construction	Please trust Floridians to have good judgment and maintain good health practices. Reopen Florida!
Palm Beach	Healthcare	It is far too premature to reopen the Florida economy. Until this virus is contained, more specifically, until new cases drop radically there is no room To take chances with peoples lives. Personally, I would love to go to the hairdresser and get my nails done but that's not gonna happen. I would never put my own health and the health of others in front of my grooming needs. Do not re-open the Businesses in Florida
Osceola	General	I believe it is still too early to re-open the state! Currently, cases are still rising and there has clearly not been 14 days as in mandated by Phase One,! I went to pharmacy and Publix today, first time out of the house in almost 30 days. There did seem to be quite a bit of traffic, which surprised me. Quite a few shoppers as well, with many of them not social distancing. I am a 75 year old retired counselor/therapist. My husband died last year and I now live with my daughter. She worries constantly about her husband who is 23 years her senior and she worries about me as well. The coved-19 frightens her greatly. Speaking by phone or Internet, I find that most of those folks are also afraid of the virus and of opening too soon. My guess is that we are not alone. I would like to see Gov to follow Phase One guidelines! I do not see where this form is to be submitted!

AMERICAN OVERSIGHT

Seminole	General	Do NOT reopen Florida yet! I'm a furloughed teacher and it's been SIX weeks I've been waiting on Unemployment and it says STILL PROCESSING! Fix the Unemployment! I also have heart and asthma conditions and autoimmune diseases. I am not able to take the drug they use for COVID-19 due to my heart issues. There's virtually NO REASON to open this state to allow crowded beaches and parks do the Second wave gets even worse! You need to realize FL has more elderly people and many people who have health conditions who moved here to better their health in our environment. Do not throw the progress we've made away! Schools need to be closed all summer- sanitized- and not reopen til August! Theme parks need to stay closed! Think how many lives will be lost needlessly if you open the state- Blood on YOUR HANDS. It's bad enough no one is practicing social distancing in Oviedo and I cannot even imagine what will happen if you lift the small order we currently have. STAY HOME STAY SAFE!
Broward	General	Take it slow
Hillsborough	Management	It's time to reopen Florida Governor! Everyone is ready to go back to work! OPEN OUR STATE!
Pinellas	General	Florida should not reopen until the CDC and top epidemiologists deem it appropriate and safe to reopen. Social distancing should be strictly enforced even when the state reopens until there is a viable treatment or vaccine. Please listen to medical experts.
Hillsborough	Government	I think there should be a set of COVID standards designed to keep employees and patrons safe. Additionally, some diversity on the task force would help eliminate any blind spots that tend to appear when a homogenous team Is assembled. Consider including some different income levels, races, sexes, or political affiliations for maximum success.
Broward	Healthcare	Incentive the remotes work in all areas, avoid person contact and incentive food distribution for senior population.

AMERICAN OVERSIGHT

Broward	Recreation	We own 2 martial arts school that have been in business since 1988. We must reopen before it is too late to save. This is the only income for our family and we can not or do not want to depend on others. I have provided a list of things we put into effect [prior to closing as well as things we can do upon reopening. 1.First and force most keep families informed at all times in regards to safety procedures put into place.Most are supportive when kept informed. People want to contribute to positive efforts to make a difference. 2.Check temperatures upon arrival. 3.All students wear masks in class. 4. Students 6 feet apart. 5. Limit number of students in class. 6. All students wash hands upon arrival. (We had an associate escort students(children) 1 x1 to bathroom to wash hands while singing ABCs) 7. Teen/ Adult students can train outside 6 feet apart verses indoor training for places with outdoor property.(Our students love to train outside) 8.Only students in building. Parents can observe child through Facebook Live in the comfort in their vehicles(Our parents had no problem doing this.) 9.Along with students in class practicing all of the above , Facebook Live or Zoom class can coincide for those whom are vulnerable or not yet ready to attend in person. 10.Students can wash hands again upon exiting class. 11. The only equipment to be used is the personal equipment of each student. 12. Disinfect school daily through out the day if necessary. This can work. We have the right to reopen. Who is essential depends on who is asked this question? My family is essential, my business is essential our students are essential and our community is essential. We must be fair. We The People must have a choice.
Brevard	General	Hi. I know you are working long and hard and we appreciate that. However, these restrictions deteriorated my mental health. I have looked at the numbers of cases and deaths and compared them to projections originally given, and the projections were very wrong. We need to cure the economic damage as soon as we can. We need to open and allow Floridians to breathe. I hope the Task Force can understand how we are feeling and the pain and suffering, mentally and economically, we are going through being shut down. -Open parks and beaches with restriction on group sizes and only for certain hours. -Eliminate the safer-at-home order. -Allow delivery and pickup of goods from retail outlets. -Allow elective surgeries to resume. These surgeries, although "elective" can save lives too. -Allow sports without fans and allow athletes and personnel be tested weekly. -Open by May 1. This will allow a few weeks for you to assess how things are going. Then start the next phase of opening up the economy, further easing restrictions. Then by June-July, we need to be fully open or this economy will not survive.

AMERICAN OVERSIGHT

Volusia	General	I love my job as a massage therapist but I do not feel it's safe for clients, coworkers, and myself to return to work without testing in place.Testing includes sophisticated antibody testing for tiger level (not sure how to spell it).. We have no idea who is asymptomatic and shedding virus, we need assurances as do our clients. We are also still growing our case numbers in Volusia, we don't know. We need some level of security. We aren't ready to open.
Volusia	General	I believe it is too soon to rescind restrictions.... PERIOD. Reopening the state will result in more infections and deaths. The result will be a worse burden on our economy and health system.
Orange	General	Being one of the states that closed last we should be hesitant on being one of the first to reopen. The damage is already done to jobs and the economy, the other hotspot states will not follow our lead and will only bash reopening no matter what and put the governor under harsh criticism thus making his approval rate drop. Put the people first make them beg you to reopen the state and call it day already.
Walton	Accommodation	Dear Governor DeSantis, RE: Please reopen short term vacation rentals. I am a homeowner and taxpayer in the State Of Florida (Walton County). Over the past years I have owned a vacation rental condo in the Destin area. The closing down of short term vacation rentals has created a financial hardship for me. Over the years I have paid thousands in property tax and thousands more in tourist development tax through my property management company. I respectfully ask that you reopen the short term vacation rental business at the beginning of May.
Bradford	General	Given tat the virus spread so quickly and there are many who are asymptotic In order to help minimize exposure they should maintain executive order for al those that have been teleworking you continue to work from home
Walton	General	Lift all restrictions now. "Open " our state so families can feed their children and pay their bills I firmly believe the government's reaction to the virus is an overreaction and if not remedied soon will have a permanent and devastating effect on our families, our economy and our society. Some small businesses simply cannot and will not survive regardless of the monetary government assistance. Personally I know only two people who have received aid I implore you to lift all restrictions effective immediately. Thank you.
Polk	Retail	I feel that retail shopping centers should be opened along with restaurants, Doctor & dental offices. Please open fast. If we lose our economy our lives and Florida will die. Don't let our beautiful state die! We are responsible adults that know how to operate safely! God Bless you, Florida, America and our awesome President Trump. Thank you
Broward	General	Push for a May 1 open date...we need to get back to work. The numbers don't justify the lockdown. Continue to support the medical community and nursing homes. Those that wish to stay quarantined can do so. We need to get our population out and about to develop immunity. Don't let the media shame you into keeping the shutdown going.

AMERICAN OVERSIGHT

Leon	General	We can't stay home forever, so please let people open their businesses!! Me and my husband have gone to work everyday with state jobs and have been fine. Our son works at Publix and is still fine. Local businesses can not survive if we continue to stay home!! If a business or patron choose to open or go out to these places, then that should be our choice. Those that are not comfortable going out yet can stay home!! Summer camps need to open in June because parents have to go back to work!! Parents can't stay home forever!! Please open Florida back up!!!!
Broward	Recreation	Re open beach for use of exercise (walking on sand and swimming)
Broward	Recreation	1. Open the private beaches 2. Open all beaches for walking and swimming, perhaps not yet opening public parking to keep visitors to a minimum. 3. Open state parks, county parks, and city parks for walking and biking 4. Broward county must relax prohibitions on use of outdoor pools and pool decks in multiunit buildings. The order was discriminatory. 5. Everyone should wear masks when providing or receiving essential services 6. Allow restaurants with open air dining to serve with strict distance requirements between tables and elevated hygiene requirements.
Volusia	General	Please open the state of Florida by May 1, 2020 without restrictions. Let the citizens use their own best judgement & personal care/best health practices. Let the healthy get back to work & sickly stay home. Let our children citizens back on the playgrounds. Thank you!
Hillsborough	General	I am personally appalled I'm a 40 year long resident of the state of Florida on the way our governor is handled this virus. Why did you make WWE wrestling an essential business after McMahons donated 18 million to a gop pac? Stop playing political when our lives are at stake. You announced you consulted Trump before doing your stay at home order You should be denouncing what he is talking about at his news conferences. Listen to the scientist doctors and CDC not the President of the United States please! I'm a resident and disabled and I can't find toilet paper, masks or hand sanitizer. Why haven't you had a company mass produce this and handed out to the public. I was also a palled when you pushed it disinfect it that doesn't have any alcohol in it at the CDC said he's not a sanitizer. I voted for you and just very disappointed in our governor. I'm giving my feedback on the stay at home we keep our citizens safe and we listen to our doctors. I'd also like to know why you did not invite our commissioner of agriculture do your task force is it because she's a Democrat?
Sarasota	General	Do not re-open Florida until June. Keep the social distancing and non essential business's closed. Mandatory masks in public settings. Antibodies testing for anyone/EVERYONE . CLOSE DOWN FOX NEWS!

AMERICAN OVERSIGHT

Levy	General	I am 47 and have Asthma and COPD as does my 59 year old husband. I have taken a leave of absence from my job until this is over. I was a cashier at Taco Bell in Dunnellon. When they closed the dining room only drive thru was left open. After trying to work there and having the scare of people coughing on me it was the last straw. I believe opening now would be akin to stopping antibiotics just when you star feeling better. Stupid!! We're making ends meet as my hubby gets SSDI. Yes I miss my job, but the health of my husband and I have presidence.
Bay	Tourism	BEACHES- NO large "Groups" /Safe Distancing RESTAURANTS/BARS-Employees wear Masks/Limit Customers Inside w/safe distancing at Tables ,NO large "Groups" and continue Carry out and Delivery Services .RETAIL STORES AND OTHER BUSINESSES-All Employees wear Masks/All Customers wear Masks and safe distancing and limit number of Customers at the Door, if necessary, due to Volume. ALL EMPLOYEES, SHOULD BE TESTED AT LEAST TWICE PRIOR TO RETURNING TO WORK/. THERE SHOULD BE NO RESTRICTIONS ON WHO GETS TESTED. WE ALL ARE VULNERABLE AND MANY SHOW LITTLE OR NO SIGN OF INFECTION. TESTS AND MASKS SHOULD BE MORE READILY AVAILABLE TO THE GENERAL PUBIC/. ANY BUSINESS OPERATOR, EMPLOYEE, DOCTOR, HEALTHCARE WORKER, GENERAL CONSTRUCTION/SERVICE WORKER, ETC. SHOULD HAVE BEEN TESTED AND CONTINUE TO WEAR A MASK DURING THEIR SERVICE ESPECIALLY IF NOT ABLE TO REMAIN AT A SAFE DISTANCE AND CONTINUE SAFETY MEASURES UNTIL POSITIVE CASES DECLINE AND HOPEFULLY DISAPPEAR./ NON-LOCALS/VISITORS SHOULD BE QUARANTINED UNTIL TESTED HERE(Could set up Testing Sites convenient to Visitors) OR THEY SHOW PROOF OF NEGATIVE TESTING FROM THEIR HOME STATE AND MUST AGREE TO FOLLOW ALL SAFETY GUIDELINES AS SET FORTH IN FLORIDA DURING THEIR STAY OR FACE A FINE AND/OR NOTICE TO VACATE. IT'S JUST A BEGINNING WITH SOME SAFETY MEASURES..THIS VIRUS IS NOT LIMITED TO AGE OR GENDER OR RACE AND NEITHER SHOULD THE GUIDELINES BE. I GET IT THAT EVERYONE WANTS TO GET BACK TO WORK BUT AT WHAT COST IF WE DON'T TAKE SOME PRECAUTIONS DURING THIS TIME WHEN THERE ARE STILL MANY UNKNOWNS.IT IS VERY DISHEARTENING TO ME TO HEAR REMARKS LIKE "WELL, IF YOU ARE SCARED, STAY HOME." "WE'RE NOT SICK, WE WANT TO WORK AND PLAY." IT ONLY TAKES ONE TIME FOR THAT ALL TO CHANGE TO "WELL, I DIDN'T THINK IT WAS THAT SERIOUS.", WHEN SOMEONE CLOSE TO THEM SHOULD BECOME ILL.. SINCERELY HOPE YOU CAN COME TO SOME COMPROMISE AND SAFE WORKABLE SOLUTION FOR ALL AND ESPECIALLY THOSE WHO NEED THEIR JOBS .WITHOUT
St. Lucie	General	I believe when it comes to services, every job is essential in their own way, we shouldn't have to choose between essential and non essential, when it comes down to it everyone has to make a living. I feel there is always a way to make a worksite safer, it we have to wear gloves or facemasks and up the safety restrictions, im ready to go back to work and will stick to the guidelines to keep myself and everyone else safe.
Broward	General	Please open up the state. We all need to get back to normal. Normal with health guideline concerns. People need to work and socialize

AMERICAN OVERSIGHT

Palm Beach	Recreation	Most places can be re-opened with restrictions. With the requirement of everyone wearing masks in public the spread of the virus is minimal. Restrict congregating in areas, do you not restrict the use of all areas. For example, boat ramps can be opened but not allow boats to dock together. Beaches can be reopened, but require social distancing. Department stores can be opened with the requirement of all patrons wearing masks and have required hand sanitizing stations at the door for people entering and exiting.
Palm Beach	General	Please do not open the state. It is way too soon for that. Cases are still growing. We need to flatten the curve!
Manatee	Healthcare	I work for an orthodontic office. They are planning to open the office as soon as the order is lifted on May 8th. I feel this is a risk to the employees and community. They want to continue seeing as many patients as possible and open more days to see more patients. As we are working on opening in phases I feel it is important for elective procedures to also phase in slowly. Social distancing is working! Cases are still rising in our county and those around us.
Orange	Government	Reopen all businesses by the end of the month. Allow all businesses to operate with limitations on crowds and social distancing guidelines. Open all beaches and state parks with social distancing and crowd limitations
Miami-Dade	Tourism	There is really no point of opening hotels in miami dade yet when travel is still limited and we have more cases down here compare to the entire state of Florida. Who would want to come get the virus down here? Also hotels need to be atleast at 50-60% to break even, with locals I highly doubt we would get to 30% and risk another round of infections just because you want to rush opening the economy again.
Lee	Recreation	Competitive swim teams could be allowed back at county and city pools with proper social distancing. For example, a pool with 10 lanes could have 10 swimmers - one per lane but starting at opposite alternating lanes. This way there would be about 8 feet between swimmers. Swimming was one of the exempted activities but all facilities have been closed making it impossible other than in at home pools. Coaches can wear face masks. Bathrooms accessed by key entry with only 1 -4 per time depending on size of bathrooms. At home pools cannot provide competitive swimmers with enough space to practice properly. Many of these kids have been working 2 hours a days for years and need to return to competitive size pools as many are hoping to get recruited for college or starting high school seasons. Additionally, 99.99 percent of the pools in the State are outdoors and thereby issues with circulated air are not a risk for this activity. With the separation listed and the activity being outside this is activity is no riskier than golf that is already or will shortly be allowed. Please consider allowing the opening of pools for swim teams with the suggested social distancing procedures.

AMERICAN OVERSIGHT

Lee	General	I would like to see a soft opening of services and recreation extending over the month of May, with a review of how things went before further opening up in June. For example, I would like to see: restaurants be able to open at 50% capacity, reservation only, perhaps 2 seatings per night, with ample time between seatings for staff to disinfect tables, bathrooms, etc. I would like to see salons and barbers open up, restricted to half capacity, with seating and treatment areas requiring 6 feet IN ALL DIRECTIONS between customers. I recommend regular customers only during May and by appointment only. I would like to see beaches opened, but with only half of public parking utilized and no groups larger than 6, with a minimum of 6 feet IN ALL DIRECTIONS between each group. I would like to see hotels/motels, etc., required to open at 50% capacity only, with stays of 7 days or longer. I would like to see stores and smaller shots opened but face masks REQUIRED. I am unsure how to manage bars. It seems to me that eateries with bars should probably only serve liquor to diners. Bars would probably need to be under 50% capacity, with groups or individuals seated, not hanging around, and 6 feet IN ALL DIRECTIONS between customers. I think that sporting events, whether recreational or professional, should be players only, no audience through May. I believe that there should be no large performance venues open. There needs to be a disclaimer clearly printed at the entry to every open store, eatery, hotel, etc. CLEARLY STATING that those who enter do so at their own risk and are responsible to hold to social distancing behaviors.
Palm Beach	Recreation	Thanks for doing a great job and handling the crisis without crazy tactics like some states have implemented. If you could consider an order to open parks, beaches and boat ramps for the public while maintaining social distancing standards, it would be great. Georgia did something similar about a week ago ordering all beaches opened. With some counties and municipalities scared to make any decisions, grocery stores, hardware stores, sidewalks and the few others things not closed are jammed packed with people who need to get out of the house. The situation has been getting worse in my area with people crowding main sidewalks and essential retailers. It's way worse than opening the beaches and boat ramps. People either need to work or be free to enjoy the sunshine. Please help push the counties and municipalities to restore some of the taxpayers' freedoms which they are scared to do. Those residents with anxiety about covid can stay home.
Lake	General	Reopen May 1st.
Palm Beach	Healthcare	Please do NOT open beaches, schools, etc. until the virus has totally stopped spreading or they have found a vaccine. YOu are just inviting a reoccurrence or further spreading of the disease. It is unconscionable and irresponsible to reopen at this time, or to lessen social distancing or the use of masks.

AMERICAN OVERSIGHT

Broward	General	Dear Governor DeSantis, Please reopen our state and allow us the opportunity to get back to work and life. You have done a wonderful Job! Trust the people of Florida to be responsible and cautious. We have a right to work and live, please lift the gates! Many thanks, Kristin
Broward	Real Estate	Real estate sales, rentals and listings have continued during the shelter in place status in Florida. If you want to improve our business climate test more like 20,000 people per day and find out exactly how many people have the antibodies and how many don't and use that as your decision maker for opening up the state. More people would be likely to come hereWhen they know it is safe. The only way to know if we're safe is if a vast number of the population are tested and we can determine the exact ratio of people that have been exposed and that was it or not.
Broward	Retail	I believe it is time to reopen all retail businesses. It is totally unfair that major box stores like Walmart, Home Depot, etc. are open and other places like Marshal's and Bed, Bath and Beyond are not allowed to open. Everyone now is aware that masks, hand sanitizing, and safe distancing is in order. All restaurants should open as well. If there is safe distancing and food take away options, it should be okay. It is the choice of the people to decide if they wish to patronize various establishments or not. I think the current administration under President Trump has done an excellent job in leading the fight against the virus. Governor DiSantis has done a great job for Florida. It is time to open up the country. It's understandable that no one wants to take the heat for anyone who gets the virus after we open up. Unfortunately it takes time for a pandemic to die out. However, saving the economy and the future of laid off workers is important and takes courage. Go for it.
Sumter	Government	Please leave stay at home order for seniors at least to the end of May. Before this order is lifted seniors should be able to get anti body tests to ensure they are safe to go out in public. Also social distancing and wearing masks should be required. Thank you. Barbara West

AMERICAN OVERSIGHT

Broward	General	Hello, As a family with those in the high risk population, my thoughts are ensuring that we reopen using common sense, science and care for human life. We should do so slowly and only after we follow the guidelines set by the professionals, such as the CDC, WHO or our own Public Experts at the many Universities within the State. This should ONLY be about our Public Health. ONLY! Not about the economy. We trust that our State leaders will ensure that our economy is boosted at this time. That we are taking full advantage of every single Federal dollar that is available to the people of the State of Florida. That should include, but not limited to, funds that will improve health care, food to the needy, small local owned businesses and our futures. You have actual lives at stake. And you have millions of people watching every move you make. This is a make or break situation. Be a leader, not a follower! The State of Florida needs a humane leader not a politician only about their own interest. For me personally this situation is a make or break for my decision on the Governorship. As a devout Democrat, I had approved of this Governor until this situation. Please do the right thing. Our lives depend on it. Sincerely, Kimberly J. Vaughan
Leon	Recreation	My family would like to be able to ocean fish. We would like to see boat ramps open for fishing. I understand people should not be congregating in boats, so possibly a compromise to fishing is people in the boat must be from the same household or If you fish with someone who is not from your household, you can't have more than 2 people in the boat (for safety also). (I may not be able to enjoy the beaches right now in the Franklin county areas, but would like to be able to utilize the boat ramps and get on the ocean.)
Clay	Tourism	Our reopening plans must be smart and data driven. In the Task Force meetings I heard someone say that we needed to let the healthcare professionals set the guidelines and the businesses will adjust. Many of the businesses, specifically restaurants, have adapted. Consumer behavior may adjust too. We have to be mindful and consistent with what reopening looks like. I would also suggest a regional approach and encouraging counties to work with one another so that residents don't get confused from one county to another.
Hillsborough	General	Florida should be opened as soon as possible. Just open the state in stages and with guidelines. It will be nice to have the parks open again.

AMERICAN OVERSIGHT

Hernando	General	I am a 75 YOA white male, and I have been following closely, the affect that COVID-19 has had on the people and the economy of Florida. While I support reopening businesses and public areas as soon as reasonably possible, the fact that those over the age of 65 comprise 82% of the total deaths is quite disturbing. I, as well as many others in this age group, would like to resume a somewhat normal lifestyle, but I think, however, that most restrictions should remain in place for those over 65. Many, if not most, in this age group are retired, and make up a very small part of the workforce. Allowing younger people, who are less likely to suffer death or debilitating complications from the virus, to return to a somewhat more normal lifestyle, including returning to work, would enable the economy to quickly recover without endangering nearly as many lives as would be endangered by a full reopening which included those over 65.
Pinellas	General	Open all community's immediately, Let owners and managers police Their business under CDC guidelines.
Martin	Recreation	Thank you for seeking public opinion on re-opening our beautiful Florida. I think it is pre mature to look at this for at least two more weeks, as our infection numbers continued to rise, as do deaths from or related to this virus. Please wait just a little longer. Our safety is worth it!
Miami-Dade	Transportation	I would like to say that reopening the state especially the Miami Dade county area is not a very good decision. Due to increasing cases and death tolls are on a raise as well. We should at least go through a other month of stay at home order and see how the month of May goes before making a decision of reopening the state and the county I'm from. I'm a truck driver and honestly I have not worked for the past three weeks because I'm scared of getting the virus and spreading it to my family at home. Also loads aren't paying much for the amount of money that needs to be put monthly on a truck. I know it might be hard that a lot of family are not getting a paid check but I think it's better staying home safe with the family. So my honesty opinion it better to wait a whole other month before making the decision on reopening the state and county. Thanks you..
Brevard	General	Do not open Florida until there is drive thru testing available in every county and the case number and death count have receded for 14 days for the entire state.
Okaloosa	General	Strongly recommend the florida Governor open the beaches and restaurants. The Panhandle s primary source of revenue is tourist and Military.
Broward	Finance	Please do not rush to open the state atleast not south Florida. The risk outweighs the benefit. I do not want my life and family's life to comprised because some idiot needs to get a hair cut and eat a burger inside a restaurant. We do not have any cure or adequate testing literally all we have is social distancing and its proven to work. Please take your time and dont be an idiot like Georgia's governor

AMERICAN OVERSIGHT

Hillsborough	Food	Good afternoon. I think if you have the power to open or close the State.But the decision have to made by Doctor's the are the only one who are working around the clock. I am the owner of the small business, And I want all this to be over of course I am a mom of 4 beautiful children and I don't want them to be sick neither me or my husband. I'll believe that decision is to be leave to the (DOCTOR'S) they are the only ones who can make decision at this moment to open or close the state of course you handle problems with everybody every business every company but the (DOCTOR 'S) actually have the power to turn ON or OFF the State.
Lake	Healthcare	I can understand the need of many residents wanting to lift the restrictions. As a manager, I see the impact it has taken on our surgery center as well as my associates. However, the risk of placing thousands of people in danger doesn't take precedence. Many Floridians have not been affected by this pandemic other than financially which is a blessing but also damaging as they are not heeding the advice of medical professionals. I have had patients accuse my center of exaggerating about the pandemic and ungrateful for all the safety measures we have implemented so we may continue to care for our community as much as we are allowed to. As a nurse, I have held the hands of my patients as their soul left us, gave comfort to the grieving loved ones left behind, and then dealt with my own grief thinking I could of done more. I pray that our state puts life over money for just a little longer hoping it would give our society time to value the true meaning of life.
Broward	General	We are in the most difficult of times. In my opinion, COVID-19 will continue to spread if our great State of Florida reopens. Without a vaccine, I feel without stay at home measures, the virus will spiral out of control again resulting in many more cases and deaths further crippling our fragile economy. I understand the need and desire to reopen and get back to work. We, the working people, were left to starve by government stimulus. A monthly stipend is needed for the duration of this pandemic so people can stay home and can scratch by financially. I want to work but I don't want to get sick and die
Collier	Retail	It is time to reopen. We are facing economic devastation for a virus that has killed less people then the flu, cancer, automobile accidents, etc..
Pinellas	Recreation	My wife and I are in the high risk category (68/69) we want the Governor not to open the state until our numbers are down for 14 days in compliance with CDC guidelines. We are not prepared to leave our house except for food and 2 mile walks in our neighborhood. We will continue to stay at home until we hear the state has meet the CDC guidelines regardless if he opens the State. He should also make sure that all of us can vote by mail in both the primary and the national election.
Hernando	Food	I think restaurants and bars should open at half capacity. Have sanitizer station when you walk in and leave the place
Pinellas	General	Please re-open Florida. My husband is our only source of income and his hours have been cut in half.

AMERICAN OVERSIGHT

Hillsborough	General	no, is not time to reopen, evereday de number go high and high , has to be crazy to open the beach, park and cities,, the lives is more important that the economy, the economy can back, the life no,,, so please stay a home, go out only if is necesary pls ...thanksbody... God bless america.
Indian River	General	The beaches should be open to sit. It's time to get things going again. People are going to go bankrupt and depressed
Pinellas	General	The focus should be on the quarantine of high risk individuals, not the entire population. Please open the state for business.
Leon	General	I would like to see not for profit fraternal organizations allowed to reopem like Amber's VFW and Loyal order of the Moose
Broward	Recreation	Open the public fields, people need to get put and it is still possible to social distance.
Broward	General	CONTINUE TO MANDATE MASK USE AND SOCIAL DISTANCING.
Broward	Healthcare	This time should be taken to disinfect the schools. Healthcare should be considered. Some retail stores gradually, not big vicinities.
Broward	General	Do not reopen until there is widely available testing and cases are showing a downward trend for 20 days minimum. We can't afford going into a second round of 2 months lockdown. We rather stay 1 more month in than going out, having a spike in cases and reset to day 1 of a new lockdown. Think about the medical workers that are risking their lives on a daily basis, do not prolong this for them!. Thank you
Collier	General	I am terrified of returning to lifted restrictions if we are not ready. The citizens here in Collier County have been so lax in following the guidelines that I believe we will be losing many people, especially since so many fall into the category of having underlying conditions and age. Also many are older, stubborn and lack the respect and desire to be good citizens and empathy toward others, like those workers that cater to them. I understand people don't like sheltering and distancing, and that ultimately it's personal responsibility, which is why I'm staying home, regardless of what the guidelines will be. But I have real empathy toward those workers whose health will be compromised catering to those that will be carrying the virus. We should be focusing on fixing that unemployment website and opening healthcare for those that dont have it, since they're the ones that are catering to the virus carriers. The economy will fail if we lose so many citizens.
St. Johns	General	Open everything
Wakulla	Healthcare	Please start reopening Florida, at least the small towns, we need to work before the money runs out and jobs disappear
Duval	Retail	We need our jobs. Please let us open. Please let us work.
Miami-Dade	Recreation	Open all beaches and parks (including dog parks), with 6' restrictions and always wearing face mask.

AMERICAN OVERSIGHT

Broward	Government	So we all need to get back to work but how to do that safely? It can be done. Smaller business would have to limit customers inside and everyone would have to mask up. Stores limit the amount of people and bars and movies theatres are the last to open. Salons and nail and massages will be by appointment only with no waiting inside the premises. People would have to be spread apart and cleaning and wiping down areas a must between patrons. A questionnaire and temp test taken at the door. We should open till after the first week of May and do it in phases. We are a heavy tourist economy and with unemployment lacking in speed and help we need to do something to get people back into work even if it's part time in the beginning for a month and see in June how everything health wise is.
Sarasota	Administrative	Please do not open spas or cosmetic elective offices yet. Also be sure receptionists are required to check patients in and out via "parking lot" or car check in when they do open to avoid exposure. Places that administer botox or injectables won't be able to adhere to protective measures easily. Please require to keep them closed a little bit longer.
Okaloosa	General	As someone who is out of work due to Covid19 and struggling to navigate the failed unemployment system, I obviously am looking forward to the day we reopen non-essential businesses and return back to normal. However, it is imperative we do it safely and per the relevant scientific research. We cannot forego science for the urge of the here and now to "get back to normal." If we do this too soon, we run this risk of a massive new outbreak and ultimately shutting back down again a second time. Which our economy simply cannot afford. With adequate unemployment and reasonable economic measures such as more loans to businesses to stay afloat, coupled with continued suspension of mortgages or rent in the short term, there is no reason we cannot be both economically sound AND safe at the same time while we ride out this storm.

AMERICAN OVERSIGHT

Broward	Food	This virus has been here since at least Decemeber and we have managed like any other "bad" flu season. The hospitals are ready to take of sick people, which is their purpose. WHat is going on now is merely delaying herd immunity. YOu can test all you want for statistics but it is virtually meaningles as you can be negative one day and positive the next and be perfectly fine. You cannot only let people with immunity out, thats smacks of a society we do not want!! . THats what herd immunity does. The vulnerable population know to take precautions, just like any other flu or disease. THat is their choice and herd immunity, if allowed to happen, will help them the most. People are not going to take the vaccine anyway. Open up our restaurants (and other places) and people wll adapt as always. This is causing more harm to people, esp mentally to children!!, than it is helping. Opening restaurants any less than 50% capacity is just prolonging, and even hastening, the inevitableend for most. 50% for 2 weeks max, then let them open 100% and let people take the personal responsibility they always do. Sanitation will have increased so thats a positive. This is causing WAY more harm than good. Government cannot stop all death or other things from happening and to try to do so is trampling everything this country stands for. I own four family owned restaurant and we cannot survive much longer 380 employees will be permanently out of work. And to open with reduced capacity still means we have the nearly same costs as operating at full capacity. We all made it through the beginning of this virus in December & January without all these draconian measures. Knew many people who were sick and yes one died, but it was "the flu". No hysteria and panic. What the government has done to people and livelihoods must be stopped. OPen it up and people will make their own choices based on their own circumstances and then we will still see if this can be overcome economically and/or mentally. That's the true cost.They say "summer" and heat kills it!! Well that is here now!! Dont be afraid to do the right thing for fear of poitical reprisal - that's going to happen no matter what you do. And we cant be used as pawns in that fight. Open up the restaurants 50% with employee screening (masks do NOTHING) on May 1, the full open two weeks later. Why are restaurants being punished for everything? I havent heard yet 50 people coming down with Coronavirus after visiting PUblix or Walmart ! It is what it is and we need to let it run its
Orange	Professional Services	We need to open the economy. If not soon,we as Americans will not be able to survive. If some of the people want to stay home,they can but people want to go back to work and make a living so they can function and live. This is no way for human being to live all sheltered. Please do right by your people and let us get back to work.
Walton	Real Estate	We own a small clothing retail store in Apalachicola and 2 rental properties on 30a. Unfortunately the loans available for CARES don't nearly cover the losses of rental revenue and sales during the Spring. We're worried we'll lose everything we've invested if the State doesn't immediately open and allow folks to vacation back to area. The fact that big box stores are allowed to sell clothes, etc but we can't and hotels are allowed to book rooms and rental properties can't is anti small business. Hotels aren't only allowed to rent to healthcare workers, nor does Walmart, Target, etc... block off clothing sections in stores. Please help. Thanks Stephen and Cathy Hull
Pinellas	General	I believe we should not open up public places and work force until after our peak has hit Pinellas county. Lives matter and no one is following stay at home order as it should be followed

AMERICAN OVERSIGHT

Walton	Retail	We need to reopen Florida ASAP. Our economy cannot sustain this kind of shut down. People need to pay their mortgages, car loans, food, etc. The elderly and unwell should OBVIOUSLY stay home but the rest of us need to get back to work and our lives. As the numbers prove, this epidemic has not been nearly as bad as led to believe. There's no cure for the influenza which kills up to 60,000 in the US and up to 650,000 globally. Let's stop this nonsense please!
Walton	Accommodation	As a Florida resident of a Beach community I am very concerned about the early reopening of short term rentals. That would expose our community to the virus brought here by people from all over the country without proper testing. It could set us back the 45 days we have already spent trying to mitigate the virus. My suggestion would be to revisit this business activity on May 31 based on the facts at the time. It could be that we might not be ready for this activity until July
Duval	Professional Services	I am a self employed hairstylist and feel that it's too soon with our kind of work, we are in close proximity with our clients and will have to take extreme cautions and I feel we are not ready to do so. The numbers need to go down much more significantly for our industry to feel comfortable going back in the salon.
Walton	Tourism	While I agree that the state has to re-open I strongly feel that short term rentals should continue to be closed. The priority for government is to protect its citizens. Opening up short term rentals would bring a surge of people from hotspots around the country with no control. Our area on the panhandle is not set up to handle any increase in medical problems along with the short supply of numerous materials. Please protect the citizens of this area by not allowing uncontrollable out of state people to potentially infect the year round residents. At some point you will be able to allow rentals but not until we all feel safe.
Bay	Food	Due to the latency issues with the unemployment payouts for the state of Florida it would be in the best interest to allow the hospitality, food and beverage people to be able to return to work. Those people need to survive and pay bills, a check from the president and waiting on unemployment isn't stopping people from having to take care of bills. Prolonging this is a recipe for a further disaster than what has already been done. I understand health is priority however so is the well being of those who are healthy and ready to return to work. It's time to reopen Florida and restore faith in our government and constitution.

AMERICAN OVERSIGHT

Lake	Education	*continue the development of virtual education and expansion of courses for public schools and colleges-- to provide education while virus is decreasing and to prepare for future viruses *move from face-to-face classrooms to hybrid-- divided classes in half-- rotate face to face and online-- students could alternate campus attendance and virtual training *provide at least one health station at the entry of each school college for distribution of facemasks, temperature checks, mental health counseling, social distancing instructions *expand hiring of teachers-- to create smaller class sizes *optimize time in class - shortened school day while expanding virtual instruction *expand campus security responsibilities to include enforcement of social distancing *expand national awareness/advertising of great online programs at Florida colleges-- more funds to the state with addition of out of state students. Many colleges outside Florida are not prepared to teach online courses to students *more outdoor and hallway for seating for students to get fresh air and practice social distancing *create a nanovaccine institute with Florida colleges *no waiting rooms-- by appointment only to see counselors and staff *develop state task force to develop innovative revenue streams for Florida schools and colleges, for example, millions of dollars from state control of water rights
Duval	Healthcare	I think it is safe to open up Florida by the end of April. As a Medical Doctor working in hospital and clinic setting - i have not seen any shortages of PPE nor have I witnessed a surge in COVID 19 cases. The public however still needs to be reminded of continuing with the safe practice of frequent hand washing and wearing masks when in close contact with others.

AMERICAN OVERSIGHT

Citrus	General	We were told to stay home so this virus could pass. Yet you have let so many “essential” businesses open that shouldn’t be. Wrestling, gun stores, some beaches closed, others open but no “social distancing of 6 feet” enforced, too many people at one time in the grocery stores and pharmacies and only half of them wearing a face mask. It seems like over half the businesses are open and the other half suffer. Did the local, state, and federal government learn nothing from the Spanish Flu of 1918 about spreading a virus when you let quarantine measures end too soon? The people wanted to celebrate and leave home before it was safe, and what a price they paid ! What is worse and most troubling of all of this? You don’t a Task Force to decide what to do when you have the leading doctors and scientist telling you. By and Lafarge the government (local, state, federal) seldom listens to the people or does what is best for the people. It’s an election year and people are sick and dying but a few are angry about being asked to stay home. Fearing the voters reaction our governor will reopen this state to soon. He was late to close the stores, late to react, late to close the beaches during spring break. But he will reopen the state, regardless that today 04/25/2020 almost 31,000 have been infected and over 1,000 have died, They are just numbers, but I fear those numbers will double if the state reopens anytime soon.
Leon	Government	Contact tracing is essential. Certainly our testing capabilities need to be increased before opening back up. However we also need to greatly ramp up our contact tracing efforts. Yes, this will require bringing on more people to the Department of Health. However, contact tracing is an absolutely essential part of managing an outbreak. We must have robust contact tracing staffing and procedures in place BEFORE reopening our state. https://www.cdc.gov/coronavirus/2019-ncov/php/principles-contact-tracing.html

AMERICAN OVERSIGHT

Manatee	General	My name is Alexander Wiegand, and I am a 20-year old senior studying economics at Florida State University. I was originally scheduled to walk and receive my diploma this upcoming Saturday, May 2nd, in Tallahassee. Even though I still technically am graduating, the ceremony has been cancelled. On top of that, due to the student body being informed in the middle of spring break that we were not permitted to return to campus, most of my belongings are still in Tallahassee (I'm not allowed back on campus to get them). At school, I worked about 20 hours/week at the on-campus UPS Store, but obviously I haven't been able to keep that job since I've been displaced back to my home in Lakewood Ranch. Thankfully, I have been blessed, and have been able to transfer stores, and still work enough to keep a little bit of income coming in to pay the bills. However, I realize many others are not as lucky. Each day, I have dozens and dozens of customers walk through the front doors of my store, telling me their stories of what they've had to go through due to coronavirus. Inability to pay rent. Not being able to meet together at church to worship. Not being allowed to see their loved ones, their own family members, in the hospital. Life has stopped. And every day, I cannot help but believe more and more: this has to stop. NOW. We MUST re-open Florida immediately. We must re-open AMERICA immediately. We MUST re-open the economy, and allow people to work again. We MUST allow churchgoers to attend their places of worship, and congregate as they wish. We MUST allow small business owners to reopen their establishments, and try to stay afloat. We MUST let people be FREE. It is times like these where we must not be short-sighted. It is times like these that we must think about our future viability, and not just our short-term peace of mind. We will never be rid of coronavirus completely, just like the flu, or pneumonia. But we will also never completely be rid of car accidents, school shootings, and drug addictions. Being apart of society inherently involves taking risks, and we as a society must rise up- even now- to get through this together. Yes, it
Orange	General	While I understand that not everyone has the ability to work from home and that an extensive amount of unemployed individuals have been experiencing difficulty getting through with their unemployment claims. I think it is important that the state takes into account the overall welfare of everyone who lives here as well as travel to and from the state. By prematurely opening back the state too soon their could be a dramatic influx in numbers. Thus I believe it would be safe to keep it closed until the numbers and hospitalizations is low. In addition, if the state opens up everyone should be tested to make sure they aren't asymptomatic and/or to see if they have the antibodies. Florida is a major tourist attraction so that should be kept in mind as well. I truly feel the result of businesses opening too soon could greatly impact the state in a negative way if there are still COVID-19 cases.
Broward	General	Re-open Florida immediately. As long as we have the hospital capacity and resources to deal with sick people, government needs to stay out of it and let everybody get back to their normal routines. Those who choose to remain "quarantined" may continue to do so on their own.

AMERICAN OVERSIGHT

Collier	Healthcare	Dear Governor DeSantis, I am a conservative Republican, a small business owner, and Florida resident since 1975. I do not believe government should interfere with personal matters - except in cases like this. We are Not Ready to reopen businesses and beaches. Yes tourism is an important part of our life here, but that is why we cannot compromise the Health, Safety, and Welfare of our own lives by being impatient. Please keep restrictions in place until adequate testing is available. Respectfully, Victor J Latavish, Architect.
Broward	Retail	Very simple- The Cure is worse than the Pandemic. Wife waited 3 weeks for unemployment check. I have taken a 20% pay cut and if things do not open soon I will be unemployed. Phase one should open ASAP!
Palm Beach	General	With a population of approx. 22 million, Florida really needs to ramp up the testing for the coronavirus so that the Governor and his staff can truly make an informed decision as to when and how to open the state. Hopefully, the Governor will follow a slow phased in approach and most important look to the example being sent by the State of Washington and NOT GA!! I would also hope and pray that our Governor will reach out to great scientists like Drs. Fauci and Birx, and keep politics out this process.
Sarasota	Recreation	It would be wonderful if state parks would open to residents of Florida. Very easy to social distance. Maybe just hiking, biking, boating. No shuttle or boat tours. No large gatherings. Each park could regulate as needed for their specific parks.
Pinellas	General	I strongly believe Florida needs more availability of testing, both rapid and antibody before opening up the economy. In my area, social distancing is not practiced well and cases are still far too high. We need to know who is sick and who is still at risk.
Hillsborough	Recreation	I'm concerned because my daughter does competitive dance, and they're still planning on holding a dance competition at the RP Funding center in Lakeland May 15-17 and another June 5-8. Last year 3/4 of the dance studio contracted the flu in April after a weekend competition at the same venue. Dancers travel from all over to attend these as well. I do not feel this is an essential service, and I'm concerned for those who feel it's not a big deal to attend. I'm also concerned with opening hotels and beaches. I fear people will travel down from up north to vacation and further spread it.
Miami-Dade	Recreation	Please reopen the beaches, or at least the water (like in Hawaii). The heat is arriving and buildings don't have access to pools. Kids and older folks need the sun for Vit D and to strengthen their immunity. Have police officers monitor social distancing in beaches. Sitting on sand and sunbathing should be still not allowed but access to the water and swimming is a relief. Please consider this option.

AMERICAN OVERSIGHT

Miami-Dade	General	Public health is my main concern. I do not support opening up before the recommendation of the CDC, WHO, and White House Task Force because I do not want to get sick or have the health of my family compromised. I have been under quarantine for six weeks now and followed all of the guidance of the experts. I've done my part and don't want it to have been in vain because of premature reopening. I also don't want there to be a resurgence in cases. I'm simply not comfortable with putting the economy before public health. Please be humane and put public health first so that we can save lives and have a rebuild a robust economy with more healthy people.
Miami-Dade	General	I believe that it should be up to the people. If you are willing and able then you should be able to return to work. Over a million people are without jobs and thousands still have not received stimulus checks or unemployment.
Orange	Government	I write in this portal today in the hope that the Reopen Florida task force will recommend the end to the stay-home order as soon as possible. At this moment there is absolutely zero empirical evidence that states with lockdown orders have fared better than states with no lockdown order. COVID-19 clearly disproportionately negatively impacts certain vulnerable people (elderly individuals and others with underlying medical conditions) when compared to younger healthier people. Therefore it is nonsensical to apply broad prohibitions in this state to everyone. Lockdowns only made sense to make sure that hospitals were not overrun by sick people but it never seemed as though Florida was at risk of this happening, thus making a stay-home order unnecessary. As many have said, the cure cannot be worse than the disease. Individuals and businesses need to be given the freedom to determine their own level of risk management. Entrepreneurs and small business owners in the state should not be subjected to this overly broad and economically damaging stay-home policy. Please recommend the end to the stay-home order for the health of the state of Florida.
Volusia	General	What is the trend per the president's guidelines? Have we trended down for 2 weeks to go to phase 1? I suggest we follow those guidelines explicitly.
Broward	Professional Services	Models have been wildly inaccurate. Data is showing virus is affecting elderly and people with pre-existing conditions. Let's concentrate on protecting these people and let everyone else go back to work. Our hospitals are currently underutilized and many elective surgeries should be allowed. Health care workers are being sent home due to low work load. Crazy! We are headed for a depression if we don't start opening up now. It will take years to recover. Let's get back to work!
Broward	Government	Do not reopen florida. My chins and husband are immune compromised. We need more testing and better data.

AMERICAN OVERSIGHT

Duval	Recreation	Please consider reopening the state parks for camping. It is very easy to do social distancing while getting out of your house and into the outdoors. Preregistration and prepay and your don't have yo interact with anyone. Thanks. No school remainder of the year, but be ready for August. No to fully opening beaches. Too many people right now. Bars? No. Restaurants? Not yet
Lake	General	Keep lock-down in place
Hillsborough	General	A slow and deliberate approach, taking necessary precautions would be most prudent in my opinion. My family business is suffering, but the risk versus the reward is not worth it. Social distance guidelines should be considered when reopening, and all efforts should be made to educate and enforce social distancing guidelines until such time as public health officials have declared the virus as contained, OR until a vaccine has been made widely available across citizens of Florida, all other states, and abroad.
Lee	Education	When schools reopen we need to be sure to try to curb the exposure to kids. At our current high schools were average 28-30 kids per class period for 8 periods. That is not only not conducive to learning, but it's a giant petri dish of germs. We've been asking for years for lower class sizes to help students achieve gains. Now, though, I think it's necessary to limit class sizes to 20 so there can be more space for kids and keep them healthy. These kids need in person classes but we have to ensure their health is at the forefront when they go back.
Broward	General	I believe that we should trust the epidemiologists and doctors and not the politicians when making the decision to open up businesses. It should not depend on the economy or the next election. The most important issue is how many people will die unnecessarily if we open up too soon. This is not fair to all of those people who have isolated themselves in the hope of not contracting this virus. For am historical reference regarding this issue refer to 1918 Pandemic in the city of Philadelphia which was hit by a second wave and the city leaders decided to open up the city anyway. Thousands of people died as a result. The deaths were so many that they had to buried in trenches. Barbara K Ringenberger, PhD

AMERICAN OVERSIGHT

Pinellas	General	Nope - not safe to open - cases and deaths are still on the rise and like most of the country - we are under tested, therefore, there are potentially many more cases than reported thus far - I work at a local museum here in St. Pete and considering we had anywhere from hundred to thousands of visitors a day right prior to shut down - visitors from all over the world - bus loads from China, Italy - you name it - I consider myself lucky to be alive and don't know if I have even been infected due to test restrictions and avilability - prior to close there was constant arguing with management regarding signage warning about the virus, cleanliness habits, etc - I and many in the staff had been coughed on, sneezed on, dealing with people touching products, licking their fingers to count out their money - handling money - which is probably one of the most germ infected things - Florida is a state and area that relies heavily on tourism - already too much risk within the community, let alone having visitors from all over the country and the entire world - not time to open until it is proven there will not be a second surge and proper testing for the virus and antibody are in place
Lee	Information	*Open restaurants - to start with half compacity indoor dinning for now then later full compacity - out door dinning full compacity right away *open retail - only let so many in at once as retailer that are now open are doing *open parks - mostly done with social distancing - let people be accountable for themselves *open beaches - with social distancing - let people be accountable for themselves *anything else - with social distancing - let people be accountable for themselves *Done - close schools until fall **We have been taught important info on the virus & how to protected ourselves well but now we need to get back to our lives and MAKE PEOPLE ACCOUNTABLE FOR THEMSELVES AND THEIR ACTIONS. It has been explained very clearly how to protect ourselves
Seminole	Government	Please do not re-open anything. The state is barely starting to recover from the virus in the slighest ways and we cannog have it regress into a second wave.
Palm Beach	Recreation	According to the recommendations made by our governor today, outdoor activities should be opened, which should include golf. Courses are open air, not crowded, and the virus is killed by sunlight and humidity. Thanks for the opportunity to express my opinion on this important topic.
Putnam	Professional Services	Don't even consider reopening until Florida meets Phase 1 requirements.
Miami-Dade	General	I feel that as long as we still have more cases on a daily basis is to soon to lift ANY restriction. It will set us back for sure, after 15 days of consistent no new cases than is the right time to start lifting restrictions.

AMERICAN OVERSIGHT

Palm Beach	Government	To the Honorable Members of the Task Force Regarding: Government Over-reach and Violation of Constitutional Rights Upon writing to my Palm Beach County representatives I am very distressed to find out that the full board of elected commissioners have NO SAY over closures.I received a reply from Melissa McKinley of the PBC Commissioners office on 4/19/2020 stating, "during a declared emergency, the Mayor and County Administrator have sole discretion over closure decisions. Therefore, a Roll Call vote is not appropriate.". Therefore right now, in my County my elected representative has no voice and therefore I have no voice. This is a violation of my rights as a citizen. "No taxation without representation". Public amenities and even private amenities within my complex have been removed without a democratic process and without democratic recourse. One of my gravest concerns from the beginning of this crisis is the closure of churches and support groups. I have a constitutional right to freedom of assembly and freedom of religion and the loss of my support system has been exceptionally distressing. As far as I know, such closures are unprecedented in the history of this country! My mom recounted stories of a form of "social isolation" practiced during the Polio epidemic- but churches did not close, nor did schools for the most part. I feel far more threatened by the summary closure of my church and support groups and restrictions on my freedoms than I do by the virus despite being a boomer with a known risk factor. The closure of beaches, parks, and shared community pools is especially hard on those of us of modest means who live in densely populated landlocked condos or apartments. Public and community recreation areas constitute my "yard" and I use them daily for therapeutic and immunity enhancing exercise where I am in no contact with anyone else (boogie boarding, kayaking, swimming, water aerobics, walking). There is no valid scientific basis to prohibit the citizens of Palm Beach County from using our parks and beaches for essential
Orange	General	I don’t think we should re-open until cases consistently decline and rapid tests are readily available both COVID & antibody

AMERICAN OVERSIGHT

Broward	Education	Higher education should be looked at very critically, universities should remain online for at least fall 2020. Dormitories are a breeding ground for ominous outcomes with any communicable disease, let alone one with no vaccine like COVID 19.The large 600-700 lecture halls at for example the university of Florida,. Dorm rooms that students are extremely close in and they cram 30-40 kids in a very small room. You will have students , Professors, dying. The hospital systems in the university towns will be bombarded with. Very sick people. the residents other than students who live in the college towns like Gainsville, the nearby Villages . South Florida, Orlando. I love Florida. I believe we can be a. model for the whole world. Let's take the Florida state college systems very critically. There will be major lawsuits, if we bring classes on campus in the fall 2020, this cycles around stronger. The university's in Florida have done a great job transitioning to online.the dangers, fraternity,soriority life will bring to all the campuses. I have the greatest faith in our Governor to keep our wonderful university systems safe, until all can be vaccinated. Masks up in all locations where six feet apart is not feasible essential locations , grocery,medical office, house of worship , etc. Florida can be the model for the whole world. Thanks governor. I am a nurse practitioner and an educator. Contact me.
Okaloosa	General	Please don't re-open Florida right now. I think a lot of people are letting their guard down. I would wait until June 1st
Hernando	General	Please reopen the businesses In Florida now. Caution with the nursing homes is understandable as well as keeping schools out in May. Businesses need to reopen, people need to get back to work. I think keeping businesses closed past May is unnecessary and dangerous to the economy.
Seminole	Retail	I feel there needs to be a number of issues that are addressed before reopening. I'm in the fine jewelry business, there is a definite safety concern about masked customers entering the store. It is also a business where in the case of engagement ring shopping for example you have small groups together, you're passing items back and forth face to face. Then there is the issue of handling jewelry repairs and or cleaning client's jewelry which has to be closely examined beforehand. My husband is undergoing chemotherapy and I am terrified of bringing the virus home to him, These are concerns that have never been addressed just in my own industry but there will be overlaps In other businesses . Right now, there aren't enough gloves, masks or even toilet paper for goodness sakes to make available to employees much less clients walking in that don't have a mask. I feel there is also a need for training on how to safely resume business living in the COVID 19 era.
Broward	General	I believe we need A soft opening of restaurants, retail... with limited capacity we need to start having some sort of new reality ..
Miami-Dade	Professional Services	I think you should err on the side of caution. Better to be criticized for businesses going under than for causing unnecessary deaths as a result of opening up prematurely. Lives over money.
Lake	Food	I feel that we need to open restaurants and leave the social distancing up to the individuals. The servers can guide to tables. We have had very few cases in South Lake so the threat is minimal.

AMERICAN OVERSIGHT

Hernando	Healthcare	Re: COVID quarantine- I am 69 yo with pre existing conditions. I think the states should open up. Quarantine those of us in jeopardy (with assistance in safely meeting our needs) let the 25 million people that are currently unemployed go back to work.
Monroe	Tourism	I will admit I am hurting financially but I think it would be a mistake to let everything open up unless it is viable to test everyone for COVID-19! We still are only allowed testing if we have been in contact with someone who has it or show any symptoms ourselves. But as they've discovered in New York many people have contracted the virus and gotten over it without ever realizing they were even sick based on the antibodies in their system. Please do not re-open Florida based on the presidents wishes the man is a complete buffoon anyone who would publicly mention ingesting Lysol or bleach into our bodies is a raving lunatic and if you don't admit that now; your political career, governor DeSantis, will go down the drain just like Lysol!
Hillsborough	Accommodation	Good evening, We own a condo in St. Pete Beach that we occasionally use as a vacation rental. While we understand that shutting down the state was a necessary measures to reduce the spread of CoVid-19, we also have been seriously affected by not being able to rent our place due to the beach closing and other entertainment facilities that visitors love from St. Pete. In addition most of the restaurants and bars that makes the beach life in St. Pete so special and enjoyable are closed and people are out of jobs with families to feed. For this and other reasons, I agree with reopening the state in a cautionary manner. We need to jump start our economy again and as soon as possible. Thanks for this forum and for the opportunity to voice our thoughts. Very respectfully, Lillian Flinn, MS, MT (ASCP)
Brevard	General	I think that a mask requirement must be put into place first. No mask=no entry into a building. Next, businesses that can meet CDC sanitation and distancing guidelines should be allowed to open. No dine in restaurants yet because masks would have to be off. Those providing close contact services (dentists, hairdressers, etc.) should open if they choose to but should have stricter mask requirements for the employees . Daycares should be held to high standards of sanitation, number of children together, and monitoring temperatures several times a day. Thank you for asking for input!
Sarasota	Government	It is too early to open up the state as we were wtay to late in shutting it down. As you can see by the protests people will not adhere to wearing masks or keeping the 6' distance. Also there are a lot of stupid people who still think this is a hoax and could spread the virus to many.
Orange	General	Absolutely do not open Florida back up. I am an essential worker and this was a soft shut down which no one took seriously. DeSantis should be sued for his lack of leadership and the handling of this pandemic

AMERICAN OVERSIGHT

Orange	General	Hello, As a bride affected by this pandemic and my wedding having to be postponed, a lot of us want answers about if weddings and gatherings can take place. I know all of my vendors have adopted new sanitation practices to keep safe. No one has been addressing this industry and consequently many couples are losing thousands of dollars. I believe that as long as everyone takes proper measures and guests are instructed to wear masks then important life gatherings should be able to be held (weddings, funerals). I would just be really happy to see this aspect addressed. How many people would we be limited to? I know we just want some form of guidelines
Orange	Professional Services	To whom it may concern, I am writing with great concerns in regards to the possible reopening of spas at this time. As an aesthetician (facial specialist) I do not feel that it is safe to resume services that require direct person to person contact so soon. I would like to share some information on what our services entail so that it may be considered when discussing the reopening of businesses in our industry. Lumping services such as facials, massages, and eyelash extensions with hair services would be a HUGE mistake that will undoubtedly contribute to a spike of new cases. Some things to consider that you may or may not be aware of: - During a facial treatment, the FACE to FACE distance between the client and the aesthetician is only about 12-15 inches. That's it! Add steam and the germs we breath out between each other further spreads in the treatment room. - While the aesthetician can and should be wearing a mask, it is impossible for a client to wear a mask while receiving a facial service, which is performed with the aestheticians hands. - Facial and massage services typically consist of 60 minutes of direct person to person, skin to skin contact. - Medical aestheticians who work in medical spas and doctors offices usually wear gloves for the duration of the service, however MOST aestheticians who work in salon spas and chain spas do not. I have worked in this industry for 15 years. Colds, stomach flus, and viruses spread through these spa settings unbelievably fast. A client comes in, the aesthetician or massage therapist provides a service to them, the service provider gets sick, the other coworkers get sick, and we take it home to our children and families. Even with the best sanitation practices in place, this is a very common occurrence in our industry. From November 2019 to February 2020, for example, the spa I worked for was hit with three waves of sickness. It would be a huge mistake to overlook spa services as hotbeds for spreading COVID19 throughout our community.
Charlotte	General	All restaurants and stores completely open. .
Volusia	General	How do we get back to business ? The issues as I see it is there are the people that won't take this seriously. Give them a inch they 'll take a yard. The rest of us who do care will have to watch out for these crazies. So no matter what is decided we do have to start coming back to life . It will be a challenge. Each one of us has to do our part so that we all stay safe. With that being said we move slowly an responsible. We need to start moving forward now. GOOD LUCK I promise I'll do my part. 😉

AMERICAN OVERSIGHT

Santa Rosa	Government	Open up government offices so we can at least do registrations, etc.
St. Lucie	Retail	Retailers could be allowed “half” the maximum occupants set by Fire Marshall currently as a general allotment of patrons in the store as a temporary control measure. People counters at the entrances. YES!! REOPEN ALL BUSINESSES. ALL ARE ESSENTIAL TO SOMEONE. Everyone retains the choice to self quarantine as desired.
Brevard	Administrative	Please do not be foolish and greedy and make a decision for our state based off of money alone. As someone with small children and elderly parents who are at risk of dying from Covid-19, this is all very serious for me and my family. Please do not rush and force an opening before we should. We do not need tourists flooding back into the state bringing sickness and infecting our people. Please extend the stay-at-home orders, actually pay out unemployment, and keep our citizens safe and healthy until we know more about this threat and are less at risk. If you open now the blood of all those who die, or even the people who were left with permanent lung issues, will be on your hands. Show that you care. Extend the quarantine. Keep Florida healthy.
Miami-Dade	General	Sir, it is too early to reopen. I’m a disabled veteran with multiple autoimmune diseases. I don’t even see people adhering to the mask mandate. I don’t want to die from it. I think you should follow Univ of Washington model
Miami-Dade	General	I think it's to soon to reopen and risk what we've sacrificed for nothing. There are still alot of infected people that don't know they're infected that can possibly infect hundreds more and we're back at square one.
Duval	Education	I think the state should look to expertise of the medical community, follow the model of successful containment elsewhere in the world, and learn from historical pandemics such as the flu in 1918. Social gatherings resumed too early during that pandemic, leading to a second wave of infections that was deadlier than the first. You don't take off the parachute before you're on the ground, you don't drop the football before you're in the endzone, and you don't protect Floridians by resuming business-as-usual now. Keep us safe. Keep us at home, and help those citizens who need it.

AMERICAN OVERSIGHT

Brevard	General	While there are many people criticizing everything from both sides of the political aisle, I am not interested in doing that. What I am interested in is reinstating citizen's constitutional rights in Florida. It is time for our Elected officials to give Floridians the opportunity to make our own choices. Allow each individual to make the decisions that our best for us with the information that is provided to us. My doctor is capable of taking care of my medical conditions if I get sick. It is not the government's jobs. If a person feels threatened by the virus they have the right to stay at home but they do not have the right to infringe on my liberties because of their fear. The stay at home order needs to expire. All businesses that have a business license should be allowed to reopen. It is unfortunate that the children of this country have lost a half of a year of education. Parents trying to step in for teachers while teachers are getting full paychecks. Why didn't school get suspended as if it were summer time and then reopened after the 10 weeks? This shutting down of a nation was science at its worst trying to instill fear into the nation via the news and internet. In my county during this emergency Elected officials were not even in charge. An Emergency Planning Committee was in charge. So many things that are truly wrong have come out during this time. I pray that as our Governor you attempt to make sure in the future the the rights of Floridians can never be infringed upon again.
Pinellas	Healthcare	Do not open Florida until WIDESPREAD testing is completed, follow the models set forth by Univ of WA, go with science.
Lee	General	I am totally against opening Florida up in the month of May. I believe it is premature and could set us back. I am a small business owner and it is to my convenience to have everything open back up again but I think that it is wrong. It will put the elderly and vulnerable at risk, It is not worth it. You cant balance the economy against human life. Florida should take it slow, the economy will boom and everything will go back to normal. Please make the right choices, The wrong choice could cost us more lives. It is NOT worth it.
Hillsborough	General	I am comfortable to a certain degree with the opening the state. Whenever we do it, it will serve as an experiment, and the first steps are always the most difficult. What I am not comfortable with, however, is the opening of the state borders. Resuming the busy tourist economy is not in the best interest of the Florida taxpayers at this time. It may be interpreted as isolationist, but I think that we should take care of our people first. In that way we can keep a cap on the amount of spreading, and prevent the hot spot citizens from escaping their confines and bringing the virus here. We have our climate and level of activity in our favor for keeping a lid on this, but once the state borders are open, it becomes a free for all once again. In my most humble opinion. Respectfully submitted.

AMERICAN OVERSIGHT

Pinellas	Government	Re-open when it is safe for workers to go back. After the epidemiologists and infectious disease experts tell us we should, instead of listening to a man who suggests people should inject themselves with Lysol to avoid getting Covid-19. Re-open at a time where the maximum amount of lives have been protected, instead of at a time that will maximize the profits of those who don't need anymore money. Be on the right side of history, Governor DeSantis, instead among it's class clowns. Protect your people. Keep Florida closed, and I'd even suggest a more robust quarantine to help protect Florida citizens. Doing anything less will drag this crisis on longer than any of us woul like. Your Constituent, Christy M. Foust, Ph.D.
Palm Beach	Government	Too soon to re-open state. Especially since not enough testing has been done & our Governor and both US Senator's are idiots who only care about what the moron in the White House thinks.
Miami-Dade	General	I honestly believe that we should not be in a rush to open up the state. I understand that we have businesses and we have an economy that needs to be fulfilled, but we won't have anything fulfilled if all of our citizens are ill or dead. Beaches should not be open, restaurants should be open to deliveries but not in house dining, and lastly a curfew should remain until the bellcurve reaches its peak and hopefully flattens. We, Florida, have yet to reach our peak, there is no way she should even decide to lift the stay at home orders.
Broward	Recreation	City parks opening Barbershop
Orange	General	Please be careful in this decision as I have parents who are in their seventies and I myself who recently suffered a major health scare in November of last year. In my opinion, open slowly and in steps starting with the least dangerous areas such as open air spaces like parks and beaches allowing for extreme social distancing. Shy away from from places like gyms and barber shops which would be quite risky due to multiple people using the same machines in the case of gyms and extreme social contact in the case of a barber shop (not sure why Georgia does not realize this). I would rather we do this right the 1st time as opposed to rushing into things.
Palm Beach	General	The state should NOT OPEN up until we know for sure that most people have some antibody protection from COVID OR UNTIL THERE IS A VACCINE. You can't count on people to do the right thing (masks, social distancing, etc) and these reckless people could put me and my family at risk of getting sick. Health is more important than money. The government should provide funds for people who need to eat and pay their rent. Also, the government should provide healthcare for all during this time.
St. Johns	Professional Services	Public health first but was rejected without explanation for unemployment. Fix FL unemployment and let us quarantine while also paying bills!

AMERICAN OVERSIGHT

Broward	Professional Services	I feel right now is not the time to open Salons,nail salons, tattoo parlors and or barber shops. I work in a salon and as much as id like to get back to work I worry how we can social distance in these places. I realize lots of my coworkers feel we should go back but i feel we havent gone down enough in our cases to say we should open. I feel salons and such are smaller places (some are larger) but alot are small places. I feel the beauty industry should wait till June 1. I as a worker in this field feel another month will not make or break it. I think our case numbers need to go down for at least 14 days in a row before we make this decision. Please dont open for another month our state needs to be safe. Also i think nursing homes need a little longer to. My mom is in one and as much as i miss seeing her I dont want them open yet till we are safer and we have a proper plan in place for them. so please Mr. DeSantis give us another month and lets see. Thank you Erika Cooper
Osceola	Government	Reopen the state immediately, but continue to encourage limiting nonessential activity outside the home. Those that do not feel comfortable are more than welcome to stay home, wear masks, etc.
Duval	Government	Why are you listening to the president and not scientists and doctors and virologists by opening the state of Florida up sooner than u should? Lives will be sacrifice in the name of $ and economy How do you reconcile your "pro life / all life is sacred" with exchanging lives for dollars? Sadly, Mr DeSantis, you make me sick.
Hillsborough	General	We need to reopen the state. We waited in quarantine to give the healthcare system time to adapt and respond. That has been done. It is now time to reopen and let individuals have the freedom to protect their health themselves. Our rights should be protected and we should be trusted to act responsibly.

AMERICAN OVERSIGHT

Lee	Wholesale	I own an average size wholesale business. I have lost more than 70% of sales and had to lay off several employees. The socialized Care Act grant which has driven up the national debt only covers 8 weeks. We have well exceeded that by now in losses. The closing of the businesses is a Tyrannical move by the Governor. What gives him the right to decide what is essential and not essential. All business and facilities should be open. Those who are vulnerable are the only ones that should quarantine. That still should be by their choice only. This is called freedom. The state and governor are acting liking communist. Someone will always be a carrier of convid 19 just like the flu. This convid 19 has been here since November. It blew through the school system then and every house hold attached to it. Open Everything. You are destroying lives just to look good for the fake media. Of course big corporate and a lot of the rich don't care. They are and will capitalize on all the cheap properties for sale and all the non corporate business closed. If the convid 19 was as real as the government was making out to be everybody that works at the groceries stores, Home Depot, Lowes, Target and all the business that are allowed to be open would be infected and dying. Wake up and Open up. Health care workers should never been in charge of making economic decision they always side with fear. They are also one of the few industries getting paid besides government employees and their pensions. How many lives will you destroy of the healthy by keeping businesses closed??!! Why don't you put some real local not real estate business on your Task Force. I will gladly volunteer my time and be a voice for the true small business.
Duval	Government	Do not open the state yet. Give it another month and re assess the numbers
Brevard	Recreation	Hello and thank you for allowing me a place to comment and ask questions. I hope to get some very anticipated answers. I am interested in finding out if I will be able to host a special family event in Indialantic? I plan on having family there, if possible from Dade County, Broward County, Palm Beach County and Canada. Are there going to be any restrictions on Florida residents being able to travel to another county to attend a special family event? Are there guest size limits for private parties? How will these rules be implemented? The event is scheduled for June 2020. I hope to hear from you soon so that I can proceed with planning or rescheduling. But, if I need to reschedule, when will you allow us to host the familial event? Thank you for your attention to this delicate matter. I truly appreciate it.
Okaloosa	Healthcare	It is time to reopen our State. There is so much more data to support that over 99% of us our safe from this virus. Let us all go back to work before our economy is destroyed.

AMERICAN OVERSIGHT

Volusia	Government	We should not reopen. We have a high level of elderly and we shouldn't be on the news. Wait longer to reopen because as soon as we do, people will be coming from other open states and will bring more cases to Florida. Let us stay closed for another month. Don't put us at risk. Let us be the model state of what would have happened if you stay closed vs risking getting half of Florida sick and 10% or more dead. Just wait. There are potentially a lot of essential jobs. Make resources for people to find alternative jobs. People and companies are hiring. Make tax breaks for next year if companies of essential jobs hire now. Open Florida, force me to choose between health and being "forced" to return to work at our office, and I definitely will advocate against reelection of anyone responsible for opening Florida too. early.
Duval	Professional Services	Sir, First I want to thank you for all the incredible work you are all doing. I am the owner of a photography studio in Jacksonville. My background is in nursing as I was registered nurse, specialized in cardiology in my birth country, Switzerland. I worked for years with patients that had immunosuppression post cardiac transplantation. I am very used to risk of transmission of diseases. As non-essential service, my photography studio has been closed. However, I know that it is entirely possible to re-open following all the phase 1 recommendations of the government and being 100% safe for our employees and our clients. I saw today that you were interested in receiving feedback and ideas from Floridians so I decided to share what we decided to do. Please do not hesitate to reach back if you would like to discuss the protocole or anything. I am more than happy to help with anything you may need. Best regards, Severine Wider
Broward	Professional Services	I feel you should open with restrictions. Masks, distancing and clean protocols . These people need to work before they loose their businesses. It would also make us cooped up people feel more human if we could get our hair done. It's been way too long and I feel like I can wear my mask and use common sense in the real world.
Polk	General	I support keeping the state shut down longer to make sure it is done correctly and just once. I think having unemployment fixed will help a lot with this as people who are out of work will have income supplemented at this time.
Broward	Professional Services	As for restaurants, all staff and guests temps taken before entering building. Seating, seat every other table. Masks worn by staff at all times. Santize after each table has left before seating same table. Limited number of guest in space at a time based on seating capacity

AMERICAN OVERSIGHT

Palm Beach	General	I wish the governor was as concerned about the unemployed being able to get onto the state's unemployment assistance site. And why open when the number of Florida cases are rising daily?
Palm Beach	Government	Floridians are relying upon our government to assess the relevant factors and make careful decisions based on facts, and not based on politics. Given that the illness is widespread, and there appears to be insufficient testing and insufficient medical resources to deal with more sick people, it strikes me as imprudent to re-open. Government officials have access to the best available information, and Floridians need our government to make wise decisions using that information.
Seminole	Food	Bars should reopen as soon as anything else does. Most local bars have the same clientele day to day, not like Walmart stores that see 1000's of different people every day, why are bars being persecuted.
Pinellas	General	I think this virus has shown us that our system is untenable and our education system is sorely lacking. It is imperative that we follow the medical professionals' advice and see a consistent decline in cases before segments of society are re-opened. Anybody who can work from home should work from home. Restaurants should continue to only do take out until we have a vaccine available. Bars should remain closed, as should gyms and tattoo parlors. Vacation rentals and hotel rooms also need to stay closed until there is a vaccine. What we learned from the 1918 pandemic is that the desire to get back to normal comes with a heavy heavy price and that patience is what protects lives. Ron DeSantis has ruined his legacy and he will not be reelected. His handling has been horrible. Additionally if businesses want to re-open, it needs to be mandatory that they carry general liability insurance. And finally but most importantly, we can buy tests from South Korea or Germany and test every person in the state on a regular basis to keep the virus from spreading and that needs to happen.
Broward	General	I want to first say that since our state has more people around the world living here it creates many issues and problems because ever culture has its own ways of doing things.My biggest concern is a lot of people including Americans do whatever the hell they want at times and a lot of the times get away with things.(Ex.-social distancing and not wearing mask).Their is no respect for doing the right thing when deem necessary.Unless everyone goes by the guide lines there will be no ending this pandemic.This starts with the supposed Leaders of this country and the other countries around the world.DeSantis needs to listen to the CDC as to when the decision for the guidelines for when Florida needs to re-open our state.I honestly believe that the very rich and famous people in the world should all donate a certain % of their salaries to the health workers,first responders and doctors and nurses who every day are risking their lives to save other people.Also this money should go towards testing and finding a cure from the Covid-19 virus EVERY ONE BE SAFE AND MAY PRAYERS HELP US GET THROUGH THIS.

AMERICAN OVERSIGHT

Pinellas	General	REOPEN FLORIDA. The economy is devastated, people's lives destroyed and YOU are responsible. You did not ask citizens before you took away our rights and freedom; before shattering business confidence, violating contractual rights, wrecking tens of millions of lives, prohibiting freedom in association, trapped us in our homes, dictated where we could and couldn't go, or whom we could see. From testing failures to policy failures to flat out Covid modeling lies that change daily, to straight up brutalism in your shutdown antics, the reputation of your governance will not fare well. There will be blowback now or at the ballot box. There is fury against your lack of leadership, stalling tactics on reopening and horrific criminalization of freedom itself. I am so sorry I voted for you. This is torture you are putting us through. While you get paid and blather on about testing we fall into the abyss of total financial destruction. Do you care that for every covid death, more than 600 people lost their job? There are many studies showing it is not as bad as you claim. End this insanity now. Open all business. Quit moving the goalposts, of flattening the curve, hospital occupancy, testing, etc. It's obvious you are afraid to open or make any decision that might hurt you, but help us. There will be blowback against you, the pandemic is over, open the economy and end the torture. You will soon own this gigantic botch of policy and leadership.
Volusia	Healthcare	Please reopen all aspects of Healthcare FIRST ... and as soon as possible. We continue to suffer with conditions that require diagnostic testing and elective procedures that just continue to worsen. You asked us to stay home to flatten the curve. It has been flattened. We lived up to our part ... now start to reopen the economy of the state. It should not be delayed further. Also ... you look so dashing and well groomed on television. WHO IS CUTTING YOUR HAIR? No one is allowed to cut mine (and I fear that soon someone might mistake me for Bigfoot).
Franklin	Healthcare	As A retired nurse with a 47 yr career with 14 years of international nursing, Hawaii's Africa, Israel) no one knows this virus...and it may be a long time before we can understand how to treat it. What I can say as a professional, a virus is a virus until it isn't. ANd in one bat of an eye, it can rise up again and strike without warning. Please for the sake of our communities, do not open the borders....locals should be allowed more ease but to open for the sake of $ isn't the way. You can rebuild a business, but not a human being. ease into it and i don't mean tattoo parlors...not essential in my opinion. May the FOrce be with us!
Indian River	General	I feel that it is too soon to lift Florida's stay-home order. I feel the stay-home order should remain in place, until there is a COVID-19 vaccine. Thank you for allowing the general public the opportunity to comment.

AMERICAN OVERSIGHT

Citrus	General	Florida should abide by the President's criteria of falling rates of infection and deaths in a particular state prior to opening the economy. So far none of the states, such as Georgia and South Carolina, seem to be paying any attention to these criteria. They are chancers, taking risks with the citizen's health and merely hoping for no increase in infections, not relying on real science to substantiate and support their wishful thinking. Florida should not follow the example of these weak and ineffectual "leaders". If we have a resurgence of the rates of infection and deaths after "opening" the economy, I can guarantee you that the electorate will crucify you. And I am a registered Republican.
Hillsborough	Government	PLEASE We should not relax restrictions in place. The economy will come back, it always does. The dead people won't come back they never do....
Brevard	General	It's time to start opening businesses up. Limit the amount of people if you have to. I would like to be able to get a haircut and visit the Canaveral national Seashore. Season pass holders only on a trial basis to see if people can behave. Make salons appointment only. It can be done. We need to get stores open. I can only do so much online and I like to try things on. Thanks for listening.
Duval	General	I really believe we should wait until a treatment or cure is available. Losing family no matter how many recover is to much. Just because people arw complaining doesn't mean its ok to reopen. Saving lives is more important than getting haircuts and nails. I have a small business and I have learned to operate from home. I don't want anyone to give it to me no more then I qant to give it to someone else. I am asthmatic so I know how it feels to have poor lungs. Please don't open up too soon.
DeSoto	General	It's time. I feel we may have made a huge mistake by not allowing herd immunity from taking it's course, and we will see more waves of Covid 19. In the meantime, I am a 57 year old server who needs to get back to work. Fortunately, I have savings, (which is dwindling)but so many do not and I fear for my fellow Americans. The longer we stay locked down, the longer it will take to recover. We see the numbers, we see it is safe to venture out. BUT, for those who are so afraid, we need our leaders to calm them and give them reassurance and you can help make that happen by opening up the State. Thank you for all you have been doing.
Charlotte	General	Please don't open yet. I think It will only make things worse and un do all we have been doing.
Pasco	General	It is far too soon to re-open the state. The numbers are down because the shelter in is working. It needs additional time to continue to work. I understand people are struggling, unemployment is not easy. But what price are we paying to open the state again? Peoples lives. People will continue to die from this virus if we don't do all we possible can now. Florida needs to remain shut to curb the spread and hopefully stop an event worse resurgence.
Brevard	Real Estate	Open the economy

AMERICAN OVERSIGHT

Lee	General	Here are some important aspects from me. I am 38, a mother of 3 little children, and we own several small businesses. - opening the schools at least for graduation classes so children have a smoother transition and can find a conclusion - closing all schools leads to another sort of problem: people need to pay extra for daycare - where the children are exposed as well, and it is an additional burden, otherwise a lot of parents are in risk of losing their job / income or at least part of it. Not everyone can take their child(ten) with them. I have also seen a single mom working in subway with her 3 little kids playing in the restaurant. they are exposed, they expose others, not a good situation overall (no judging here, I take my 3 children to work with me at all) - In my opinion schools should open partially. Maybe for graduation classes. Maybe voluntary, so parents who have the possibility can leave their child at home can do so without any consequences. Students could be spread out, classes sized down, maybe masks... lots of options in my opinion. - small businesses suffer a lot, out of question. Some might never be able to recover. open all up would help tremendously As a conclusion, I would suggest to open everything up - and give a clear recommendation to elderly and people on risk to stay home. This would give everyone else a chance to survive, give their business where they probably invested all they had a chance to make it through the crisis, give people their lives back so they can make ends meet. Educate people to keep up protection and precaution and trust in their very own judgement what they can "risk" to do and what not.
Pinellas	General	There are many in business that are anxious to open, but many in the public are afraid of things moving too fast and too early. We all have a lot of faith in what Dr. Fauci and his staff are recommending for guidelines to use as far as numbers of cases and numbers being tested. If you do not follow these guidelines, people are going to be angry when cases go up if things move too quickly (and rightfully so!) In listening to friends and neighbors talk about how this has been handled at a state level, the majority of people we hear from are unhappy. There is not a lot of trust, especially when no one with medical background, training, and knowledge (not a CEO of a hospital!) is included on your opening committee - that is, unless you felt one was not needed because you will be following Dr. Fauci's guidelines. Transparency and frequent communication as well as taking questions from all reporters is also extremely important. Just as different counties vary as far as when they will be safe to start the reopening process, so are there differences in risks of a poor outcome from one segment of the population to the next. The elderly and others at risk, need to know that they still need to take vigorous precautions, and that the fact that restrictions are being eased does not mean that their risk of getting the virus is any less.

AMERICAN OVERSIGHT

Orange	General	It's not safe to open the state yet. The stay at home order needs to be put in place. The cases and earths in Florida are rising. If we reopen now, they will skyrocket up.
Orange	General	I do not think we should rush to reopen Florida and allow any progress made fighting the virus to go the opposite direction. I'm a huge Disney fan and passholder but crowd control would be too hard and letting people from other states come in I think is a bad idea overall. Especially when some carriers don't have symptoms. I myself have still been having to go to the office as an essential employee and staying home when not at work, wearing masks etc. again letting others back into Florida too soon is a bad idea in my opinion.
Charlotte	Food	Please find a responsible plan to open taverns and restaurants for physically distanced dining and seating. Make them submit a plan to comply with these requirements where their license is suspended for 1 month for each violation. Social media can be used as a tool to monitor this.
Lake	General	I am in favor of opening the state as soon as possible. American businesses have the right and freedom to attempt to earn money. We cannot pay our bills and support our families/pay for food/housing if we do not have income (and we have not received any support that we have applied for over a month ago). We should have the rights to open our businesses and those that do not want to or want to stay home have the freedom to do so. Thank you. God Bless America.
Polk	General	As one of Florida's seniors, I am concerned that the relaxing of the stay at home order will ramp up the cases of the virus. I would hope that hair salons or retail establishments that reopen will be required to have some form of distancing and precautions in place. I think that parks & beaches should reopen because there is the ability to easily social distance.
Miami-Dade	Healthcare	Dade County has the highest amount of positive cases in the State. Yet, we never truly enforced social distancing, people were not fined and aggressive measures were never taken to ensure that a full lockdown/closure took place. While I understand the financial impact to tourism and the economy, as a whole, I believe if we would have had a true lockdown from the start we would be coming out of this "curve." As a frontline healthcare worker, every single day putting my life at risk, we need to do something more. Opening up and expecting folks to social distance is unrealistic. The main people that will affected are the frontline workers who cannot go home to their families, who live under constant pressure and stress that they may infect their loved ones. Perhaps, the government should interview healthcare workers from the tri-county area before making a decision. Please don't say frontline workers are "Heros" but, then reopen everything without thinking of how those heros are going to be affected. It is mentally, physically and emotionally exhausting! In any event, thank you for all the work you are doing.
Polk	Healthcare	Please open Gyms, this will help with our mental health!
Marion	Government	If you reopen the state it should be mandatory to wear a mask over your face in stores and businesses.

AMERICAN OVERSIGHT

Palm Beach	General	Open beaches and parks as soon as possible with strict social distancing guidelines. Small business's need to open as soon as possible also with social distancing guidelines.
Hillsborough	Government	Dear Governor DeSantis Please start to safely open the state's economy back up. The COVID-19 case curve has been flattened. Unemployment is at an all time high. Now it's time to let people get back to work. Keep high risk facilities such as nursing homes restricted and safe while opening up lower risk entities such as parks, beaches, golf courses and outdoor malls, requiring social distancing. Bars, strip clubs. sport stadiums and theme parks should not be allowed to open yet. Face masks can be encouraged in stores and businesses that are indoors. Healthy people are ready to get back to work. Florida is unique in that we have warmer weather and more sunshine than much of the rest of the country. Outdoor heat and sunshine may reduce risk of transmission of the virus. Keeping folks cooped up in their houses with little recreation and no jobs is unhealthy. Besides job loss, people have other stresses and domestic violence as well as child abuse is increasing. Alcohol and marijuana sales/ use and substance abuse rates have gone up. Florida residents need to maintain good physical and mental health. Healthy people will be at lower risk of viral illness, including COVID 19. It's time to start moving forward carefully and thoughtfully. Continue to offer COVID testing for those who have symptoms. Cities and counties with fewer COVID cases should be allowed to decide on individualized reopening plans within state guidelines. Thank you for your leadership.
Pinellas	General	REOPEN FLORIDA. The economy is devastated, people's lives destroyed and YOU are responsible. You did not ask citizens before you took away our rights and freedom; before shattering business confidence, violating contractual rights, wrecking tens of millions of lives, prohibiting freedom in association, trapped us in our homes, dictated where we could and couldn't go, or whom we could see. From testing failures to policy failures to flat out Covid modeling lies that change daily, to straight up brutalism in your shutdown antics, the reputation of your governance will not fare well. There will be karma now or at the ballot box. There is fury against your lack of leadership, stalling tactics on reopening and horrific criminalization of freedom itself. I am so sorry I voted for you. This is torture you are putting us through. While you get paid and blather on about testing we fall into the abyss of total financial destruction. Do you care that for every covid death, more than 600 people lost their job? There are many studies showing it is not as bad as you claim. End this insanity now. Open all business. Quit moving the goalposts, of flattening the curve, hospital occupancy, testing, etc. It's obvious you are afraid to open or make any decision that might hurt you, but help us. There will be karma against you, the pandemic is over, open the economy and end the torture. You will soon own this gigantic botch of policy and leadership.
Polk	General	Until the government buildings are open for their regular public hours including tours and things like that the state shouldn’t re open. Don’t put us at risk until you are willing to take the risk too.

AMERICAN OVERSIGHT

Walton	Tourism	I am writing to ask you to please extend the Short Term Rental ban in Florida. I live in South Walton County, specifically the 30A neighborhood of Blue Mountain Beach. During a typical season, our area is a popular tourist destination and the current pandemic has not reduced interest in our area. During Spring Break, we were overwhelmed with families & college students who only wanted to enjoy the beaches. I can certainly relate, as the beaches are my favorite outside activity as well! However, during this national crisis, the only thing that has alleviated the stress on our local infrastructure, resources, grocery stores, etc. has been the short term rental ban you enacted earlier this month. I beg you to please extend the short term rental ban to ensure our area does not become a hot spot for the Coronavirus with thousands of visitors seeking to ease their stress & enjoy the beaches. With the beaches potentially re-opening on May 1st, lifting the short term rental ban is the quickest way to re-introduce thousands of families to our area. Schools are closed for the school year, families are stressed & going stir-crazy; what better way to release stress & tension than a trip to the beautiful beaches of Walton County!?! I understand we must begin re-opening our economy and helping families get back to work. However, re-opening beaches & short-term rentals on the same day, week or even month cannot be our answer. We need more time to ensure this virus is better contained or managed without the added worry & stress of thousands of temporary neighbors. I appreciate your time & consideration and look forward to a decision made in the best interest of citizen health & not focused on tourism.
Palm Beach	General	We have seen, thankfully, the doomsday predictions of Covid 19 be consistently wrong. We have endured 6 plus weeks of being in a lockdown while we watch the economy be decimated. At this point, there is no reason why hospitals and various healthcare facilities cannot resume elective procedures. There is no reason why beaches, golf courses, tennis courts and public parks cannot be opened. If scientists are correct in that COVID 19 does not thrive in sun and heat, then Floridians should be encouraged to remain outside as much as possible. If there are concerns about beach crowding, then limit access to local residents. There is no reason hotels, restaurants and so on cannot open with reasonable risk mitigation policies put in place. Florida needs to get back to work.
Broward	Retail	I work in retail sales and would love to return to work but only when it is safe. My mother is 85 years old and in frail health. I cannot risk her health just to see the economy attempt to restart. If we rush into this too soon there is a good chance all the gains made in controlling this pandemic will be lost. Please put our health and the health of our families over politics. Thank you.
Lee	General	Until we have widespread testing and antibody testing available, opening up the state again is foolish. We need to know who the silent carriers are before we let everyone commingle again. The economy is obviously important, so any future opening of any state needs to be done in a controlled, systematic and safe way. Currently, we have no standard protocols in place in fl, so I can only imagine the chaos at opening without strict rules.

AMERICAN OVERSIGHT

Clay	General	Open FL back up. We aren't a communist country. We have the right to work and conduct business. The government is putting families on the streets with no way to recover and they don't care! We know that you care about FL and its residents. Thank you and God Bless you.
Orange	Education	As a public educator, I feel we should not reopen schools until Health officials say is it safe to do so. I have an autoimmune disease and even though kids are less likely to get sick, it puts me and other teachers at high risk. What if one student gives it to another student who then brings it home to an elder family member? Digital learning can work for us (for even 1 year) until a vaccine comes available. Lets take the summer knowing we are going to be digital, and teachers and schools can work on resources over the summer to give us time to be ready for the Fall, when we know the virus will come back with full force. I'm a science teacher, I know these things. Thank you.
Seminole	General	Open the state now! We can not destroy our economy and hold people hostage any longer. We will be fine!!
Sarasota	Healthcare	Non essential medical procedures should continue to stay postponed.
Palm Beach	Government	Reopen asap but only if we know we're safe when we go out. How do we know we're safe when we go out?
Pasco	General	dont open the state to soon as there is no cure yet.dont do something in a hurry or say something stupid like injecting yourself with lysol or other disinfectants.is this guy for real.dont do like gov, in georgia and open non essential shops like tatoo parlor etc.why cant you government people do your job correctly???if you know who doesnt its going to be biden in 2020 as president.do your job and protect the public!
Pasco	Food	Dear Governor DeSantis, I am a resident of Pasco county and I have a business in Hillsborough county. It is time for Floridians to get back to work. Throughout the past weeks of COVID restrictions businesses deemed “essential” remained open. Floridians who patronized those businesses voluntarily engaged in social distancing, voluntarily followed CDC guidelines. With these businesses open, sometimes serving hundreds of people at a time, twelve hours a day, seven days a week, we have witnessed COVID numbers falling. The State of South Dakota never mandated a single business closed and are also seeing COVID numbers falling. Every business is essential when families are dependent upon that income for healthy and happy lives. I believe these facts prove that Floridians are responsible people, who love their neighbors, and will CHOOSE to do the right thing. But we need our elected representatives to do the right thing; we need our businesses open. We don’t want government handouts. We want to get back to work. We want our businesses open now, not later.
Broward	Healthcare	re-opening has begun too early and must be done very cautiously. Going though a second wave and a second social and economic shut down would be so much worse than a slow and methodical reopening.

AMERICAN OVERSIGHT

Osceola	General	DO NOT open Florida until we have mass testing showing a significant drop in positive cases. We cannot open if there hasn't been anything changed from when we closed. As soon as we open the virus will return. We need a treatment or vaccine, we need tests for everyone who goes back to work due to the fact many have no symptoms. We need tracing and following up on who contacted whom if there are positive results. Listen to the Scientific community... the virologists not the politicians. Life before money. Thank you!
Hillsborough	Retail	Reopening the state I believe is a mistake. It is too soon, and why start to open up when the numbers will only increase even more, and then we will end up being shut down again. It's frustrating that it seems our government doesn't care about its people.
Manatee	General	It is time to reopen the state. Individuals who wish to do so and feel in good health should be free to visit whatever business they choose. Likewise a business should be free to open. Business should be told they have the option of wearing unproven masks, and residents should have the option IF they feel it helps them. It is NOT appropriate to require it. It is fine to encourage social distancing but even the distance chosen is rather subjective versus scientific, so avoid as many RULES as possible. In other words, stop managing the freedom of residents and small business owners to choose their path. Every business should be free to open. Those that are uncomfortable and wish to remain home can do so. Thanks for returning us to a FREE America and a FREE Florida and ending the extreme quasi house arrest that is now in place due to closing almost all establishments. Some local limits have been absurd (such as curfews implying virus danger must go up if you are out after 11pm) or stopping people who appropriately social distanced from visiting beautiful outdoor beach's and taking in fresh outdoor air and sunshine, both of which are good for people's health. I appreciate one might have felt it necessary to over-react in the absence of good science but it is now time to move forward to a FREE America once again; let's start in Florida. Please don't remove the healthy individuals civil liberties again, it is suggestive of the beginning of a movement to a totalitarian state versus the free democracy we were meant to enjoy in this country after the hard fought efforts of our ancestors.
Seminole	General	Open Businesses
Palm Beach	General	We shouldn't reopen Florida anytime soon, we're basically putting the elderly (which is a large population of residents within our state) at a high risk just because someone wants to go to the movies. It's selfish and vain to try this when we don't even have the ability to test everyone within our own cities and counties and most people are being forced to wear masks just to enter many stores/establishments.

AMERICAN OVERSIGHT

Marion	Tourism	FLORIDA MUST BE OPENED FULLY BY MAY 15th, the original planned date in Florida. With this unprecedented shutdown, every aspect of life and commerce is suffering greater damage than the virus could have ever injected into Florida. #1. The spread and death numbers used to foment this action on the individuals of Florida were high by a factor of 10-1 or more. So much for experts. #2. This virus is a BIO-WEAPON created by man in Maryland, flawed in it's design, making it easily treated with the simplest of treatments. Initial ventilator treatment actually killed the infected. So much for experts. #3. Actions by States, Counties and Cities directly interfere with Interstate Commerce and are illegal. #4. Continuing this shutdown in light of the REAL facts will be considered criminal. SEE > https://www.youtube.com/watch?v=gAtKnciEVB4 #5. A QUESTION - If Florida opens the State Parks and counties block access to individuals with CONTRACTS for use of those parks, will Florida order them to STOP?
Hillsborough	General	I feel that our governor is ridiculous and it may be the craziest and most ignorant thing to do like opening up Florida at this time when everyday we have more positive cases and more Floridians dying. Keep everything closed and enforce the stay at home more severely that's what you all need to be doing because who's going to suffer are people like my son and I that we have essential jobs .
Duval	Food	Hello Everyone, Thank you for giving us a voice your re-open plan. As a restaurant worker I am eager to return to work ASAP. However as you and your team go through scenarios and try to implement guidelines for re opening, i feel based on my experience that restaurants should not be considered to be re opened until after mothers day. Even with implementing guidelines, I don't think the public or a restaurant can adhere to them even if they tried. Social distancing would be impossible and the holiday would create long waits for restaurants that creates large groups. Thank You

AMERICAN OVERSIGHT

Alachua	General	My beautiful wife had a diagnosis of breast cancer and was scheduled for surgery until you shut off "elective" surgery. Many others are in a similar situation whether for cancer, severe pain or other important health issues. We now know from studies in Florida, New York, and California that the Covid 19 mortality rate is about the same as seasonal influenza. We also know that Covid 19 is not the "most contagious virus" ever. How long must we prevent people from getting needed critical medical care that will likely result in more deaths than this virus. This is for health issues. The devastating health and other personal deleterious effects of the economies destruction is probably worse. Please do not delay reopening Florida any further. I have a strong personal interest as well as one for Florida and the USA
Lake	Agriculture	Open up the state. Support agriculture. Open the state labs for business and TRAVEL so that they can do the certifications that farms require for business. Without them, we are completely shut down. Allow us to feed and care for our livestock since not having an income is not just detrimental to my family. Allow farmers to make a living. The stress is unbearable.
Polk	Healthcare	Please open gyms primarily the smaller businesses that can follow the mandates and still allow for people to workout and maintain a better mental and physical wellbeing.
Seminole	General	Please do not open anything until the curve is flattened. People will go Way over what is allowed bc they don't think they will get caught. It's going to set off many more cases.
Osceola	General	In regards to opening Florida...I would rater be poor and alive than have money and get sick and due to my age, possibly die. In regards to unemployment...I can't claim my weeks. Something needs to be done
Pinellas	General	Please do not open up the state too soon. Stay at home orders have prevented a mass infection and numbers are still going up. For the immune compromised and those at high risk, please do take those on consideration when making plans to open everything.
Pinellas	General	Open all businesses and ask each business to follow the CDC guidelines - most people will comply - no one wants to get sick nor do they want others to get sick. Allow people take personal responsibility. Offer antibody test ASAP - I believe you will find that many people have already been sick with this. Thanks!

AMERICAN OVERSIGHT

Hillsborough	General	No. We're not ready reopen. 1. Most shoppers don't social distance. It's very dangerous just to do weekly grocery shopping. 2. People running, biking, walking, etc. don't social distance. I've had to run in the bike lane or the street just to social distance from groups of people on the sidewalk. 3. Not everyone is wearing a mask. Those ,not wearing a mask, are putting everyone else in danger of getting COVID-19. 4. I've already seen beaches and playgrounds. However, there's not enough requirements for reopening. There has to be increased sanitation regulations for open places. There has to be mask, social distance, and group limit regulations. People are just going to go back to their self-serving lives and put the rest of us at risk for COVID-19. If unchecked, they're going to make it so the rest of us won't be able to go out because the majority aren't willing to be safe for all of us. 5. Not us you can make anything reopening safe for everyone. Safe from COVID-19 spreading.
Miami-Dade	Healthcare	Mandatory hand sanitizer use when entering and exiting public buildings / enclosed places. Required wearing of mask covering mouth and nose in public buildings /enclosed places. Support availability and distribution of necessary PPE and hand sanitizers. Support to encourage public health education. Support hospitals and primary care staffing levels and capacity. Process unemployment insurance and other temporary programs appropriately (not to be least or last in the nation), to help prevent crime. Continue reassessing and adapt plans as necessary to keep Florida healthy and strong.
Sarasota	Tourism	I work at a condominium complex that has weekly rentals. I feel it's too early to open up for short term rentals as guests will be flying from different states and will subject themselves to the virus during their travels. I highly recommend we don't open the state in that nature until June 1st - we have been getting this virus under control and opening too early will defeat the purpose
Orange	General	More Democrats should have been included on your task force including Mayors Demmings/Dyer and medical experts. After looking at pictures of people returning to the beaches, it's obvious that most are not social distancing. If you are going to wear a N 95 mask, at least learn how to wear it properly and responsibly, otherwise you have wasted a mask that could have gone to healthcare.I have to say,I am ashamed of your actions.
St. Lucie	General	IT IS TOO SOON TO START TO REOPEN THE STATE OF FL. I am a retired healthcare professional who has been a house hostage for the past 7 weeks. The State has not reached its peak yet. Opening too soon will be catastrophic! History does repeat itself - Flu of 1918. Stop trying to rush things and protect the citizens of FL! Don't let the pressure from "The King" sway what is the right thing to do. There is no contact tracing, something I have experience in. That is so important to do before this should even be considered. Please feel free to reach out to me if you have any questions.
Pasco	General	Reopen all businesses, state parks, and recreation areas in Florida.

AMERICAN OVERSIGHT

Pinellas	General	REOPEN FLORIDA. The economy is devastated, people's lives destroyed and YOU are responsible. You did not ask citizens before you took away our rights and freedom; before shattering business confidence, violating contractual rights, wrecking tens of millions of lives, prohibiting freedom in association, trapped us in our homes, dictated where we could and couldn't go, or whom we could see. From testing failures to policy failures to flat out Covid modeling lies that change daily, to straight up brutalism in your shutdown antics, the reputation of your governance will not fare well. There will be karma now or at the ballot box. There is fury against your lack of leadership, stalling tactics on reopening and horrific criminalization of freedom itself. I am so sorry I voted for you. This is torture you are putting us through. While you get paid and blather on about testing we fall into the abyss of total financial destruction. Do you care that for every covid death, more than 600 people lost their job? There are many studies showing it is not as bad as you claim. End this insanity now. Open all business. Quit moving the goalposts, of flattening the curve, hospital occupancy, testing, etc. It's obvious you are afraid to open or make any decision that might hurt you, but help us. There will be karma against you, the pandemic is over, open the economy and end the torture. You will soon own this gigantic botch of policy and leadership.
Duval	Real Estate	Please reopen FL! At least re-open with guidelines and safe measures in place. We need to go back to work, make money, and continue to run our businesses. Thank you!
Pinellas	General	Please allow small businesses to open back up quickly. The sooner places can open up the sooner people can financially recover from this.
Palm Beach	General	Please do not open up the state yet. Cases are still increasing and people are scared. It will be worse to open too early and then have to close again. Wait until June.
Broward	General	Please reopen our state. I have two small kids, ages 2 and 5 who need to go to the playground and parks. They are at home everyday and it takes a toll on them and me. The sun is good for us and vitamin D boosts our immunity. We shouldn't be closing playgrounds and barricading them so kids can't play. It's horrible that the playground near my house was barricaded all around to prevent children from playing. I can't just take a walk because my 2 year old is special needs and runs off without stopping. A fenced playground is a necessity for me. Besides that, people are not working because of this shutdown and need to work. You can reopen slowly and still recommend social distancing and masks if you'd like. Please help the thousands of families that need this shutdown to end to get back to their normal lives.

AMERICAN OVERSIGHT

Miami-Dade	Government	I work for BROWARD County i have been working from home since 3/24 . At this time my husband is 5 weeks at home with no Pay he applied for unemployment thru the paper application he hasn't received any money nor the $1,200 . We are living with my salary and is tight but no complaints given the situation . My position about re opening the county is that until there's proof that the curve flattens . If we go out now the effort of these weeks will go nowhere . Masks we know are not safe especially the home made we will use . Maybe they are ok for a trip to the market but no for 8 hrs of work . The shortage of hand sanitizer , rubbing alcohol and bleach makes everything more difficult . I don't feel I could come back to work in safe way that won't end up with a massive contagion and the probable collapse of the health system. I understand that these are inmensurable hard times for many and most but health is a priority at all times . Do not te open we are not ready for it yet.
Okaloosa	Tourism	I believe it is important for the residents of Florida that we open the restaurants, beaches and other tourist attractions even if we have to limit occupancy to some facilities. The hotels were allowed to stay open while the vacation rental industry had to shut down. To me that just didn't make any since. In a vacation rental you have one or two families in the unit, where as with a hotel you may have 600 families in the building all using the same common areas and touching the same entry and exit door handles. This area runs on tourism and the vacation rental industry is a huge part of that. We need to get our people back to work in order to survive.
Clay	General	I've listened to and read a lot about Covid-19. I believe the actual death rate is on par with or less than the flu. I understand that the point of the quarantine was to flatten the curve and to protect our healthcare system from being overrun. In Jacksonville, we've done that. Nurses in other areas of medicine are actually being furloughed. It's important that the cure isn't more harmful than the disease. Those at high risk should take precautions but it's time to get back to work.
Leon	General	It shouldn't until medical professionals and not the people who line your pockets say it's time to open. This will only lead to us going through this repeatedly with more devestating outcomes to health and the economy. Fix the unemployment system and stop trying to shortcut and loophole an epidemic. History shows us that doesn't fair well. Don't be stupid and repeat history.
Nassau	Retail	This virus is a joke. We live on the Florida Ga border and hubby works in Florida he is an essential worker, but we see people hurting that need to get back to work. Open the state so we can spread out instead of everyone going to the same 3 businesses that are open. OPEN OPEN OPEN...EVERYTHING ALL THE WAY! Stop picking and choosing who can and cant, let the people decide.
Pinellas	General	Safety is first. There is many who feel that one life doesn't count if not immune. There must be a plan of action that can test all citizens and determine who and when they can return to normal life...if possible
Charlotte	Food	Open up the restaurants. I run a fast casual restaurant. There is no reason we can't keep people separated at appropriate lengths. The stay at home order should be removed for everyone except for high risk and 65 and older.

AMERICAN OVERSIGHT

Marion	Education	I am 53 year old Certified School Counselor working in Middle School setting in Marion County. I am fearful of returning to the school setting. The possibility of lifting the order scares me. Even though students would remain in distant learning setting but bringing adults into the work place does not guarantee that the virus in ones system. People who are older starts to weaken with their immune system. And is at a higher risk of getting sick. Every day the number of cases continues to rise. I don't feel comfortable returning to work for this school year. We have distant learning in place and of course it's not the most ideal setting but we have made it work. For me I have arranged my home Office to accommodate what I need to do as the School Counselor. I have access to my county's portal. I have downloaded zoom and other video system to conduct my individual interaction with students. I have joined meetings using zoom. So for me staying home for this school year works effectively. So please take that under consideration of the Employees having to return to their schools after May 1st. Again the numbers keep going up as people are being tested and found positive with the virus. I am hopeful that the task force will carry out the stay home order for us.
Hillsborough	General	You should wait to open Florida until the curve is truly flattened. It's just that simple. When opening, there should be significant social distancing required. There are to many a symptomatic people to open now. Wait until 1 June.
Orange	Education	Open all construction- allow us to bid and start new jobs. Open elective surgeries and dr offices. Open retail stores, gyms, and restaurants but put a limit on number of customers at a time. Open hair salons, massage and tattoo parlors - require masks.
Pinellas	General	Florida should remain closed until the numbers are on a 80% decline. Keep Disney closed for sure. Too many tourist and no way to keep social distancing
Osceola	Accommodation	The second wave of Spanish Influenza was worse than the first. Learn from history- please don't be too hasty.
Hillsborough	Healthcare	Let spas, salons, other allied healthcare to open and have professionals wear a mask and continue with hand washing. If my provider is wearing a mask, we should all be fine. Stop perpetuating fear based on social media panic that isn't supported by research.
Lee	Healthcare	Until we have a plan established to do more testing on everyone not just those with symptoms we should not stop the quarantine. We need to know when we stand before we can go forward.
Marion	General	If you reopen the state no one is going to follow the guidlines and we are all going to end up like New York. There are too many people in laundromats right now, not social distancing. Not to mention the older community that lives here. What are you trying to kill them?
Lee	Government	Reopen Florida let's get back to work. Those that want to remain home may do so if they so choose. Require face mask in the workplace. We applied for unemployment beginning of March and have yet to receive any notification let alone a check. We cannot continue without income to support our families. Once this is over unemployment needs a major overhaul.

AMERICAN OVERSIGHT

Sarasota	General	Outdoor spaces, like beaches and state parks should be open. These are outdoors and easy spaces to practice social distancing. People know how to stay healthy and keep their distance. Sitting on the beach should be allowed, as long as people are not sitting on top of each other or in large groups. I don't think there should be restrictions other than that, people know what they need to do. We need to get out and breathe in fresh air from nature and the beach before we all go insane. Also I think gyms should be opened as well. We use cleaners before and after using each machine and group classes are usually pretty easy to distance yourself, they could always put a limit on the size of the group according to the space available. We need to stay healthy. Restaurants, retail and other businesses should also be open with best practices in mind. It is time to open things back up so people can get back to work and we can get on with our lives. Also I think summer camps should be allowed to open for children, they have been couped up too long and since it is something optional parents can choose whether they want to send their child or not. I worry about the homes where there is already domestic violence and now the parents are not working and the kids are home full time, I don't think this can be good for those families. We are all very capable of taking care of ourselves, we can all take responsibility for our health and take the necessary precautions.
Pinellas	Healthcare	I don't believe Florida should be opening up for business as usual until no one in FL is dying of the Corvid-19 Virus. Numbers of cases and deaths are going down because we are all staying home and protecting ourselves with masks and gloves along with washing hands, sanitizing our shoes, the home and our vehicles. Letting large groups gather are just going to cause more harm. Until there is a viable vaccine that won't cause more harm the status quo should remain, "Stay at home." And, all essential workers on the front-lines should have adequate protection available at all times including hazard pay.
Pasco	Recreation	Please consider re-opening the parks and playgrounds. With new evidenced based decisions regarding fresh air and natural UV radiation killing the virus, re-opening these activities will be beneficial to the children already battling obesity before the pandemic started. Opening extra activities including zoos and aquariums with capacity and Max allowable ticketing for proper social distancing will allow our children to continue learning in natural environments.

AMERICAN OVERSIGHT

Palm Beach	Healthcare	I applaud Governor DeSantis for the fantastic job he has done in handling C-19. His data driven approach with an empathetic focus on the people is a fine balance. His immediate reactions with regards to providing laptops to students, installing new testing sites and being on the front of data has been truly impressive. I arrived in Florida on 3/1 planning to spend a lot of time diving the beautiful Blue Heron Bridge as an avid underwater photographer. Unfortunately we only got 2 dives in before we decided to self isolate. We are in Jupiter which is the northernmost point of Palm Beach County and of course the beaches were shut down in late March which was a smart decision due to the situation with kids out of school, adjusting to life in this new world, amount of vacationers, concern regarding the transmissibility of C-19, hospital capacity, etc. I have greatly appreciated Governor DeSantis' emphasis on the need for outdoor activities while maintaining social distance and his focus on mental health of Floridians. I encourage the Governor to re-open the beaches in Palm Beach County with limited operating hours and emphasis on healthy exercise vs sun bathing which has been done successfully in Jacksonville and other areas of the state. Of note, Blue Heron Bridge in Riviera Beach is a national treasure and I hope the Governor considers the tide tables and allows exceptions for scuba diving at this pristine location by allowing scuba divers to dive at that location since it may not be within the normal time parameters as you can only dive close to high tide levels. Diving is a very safe recreational activity with divers utilizing their own compressed air. Thanks again for Governor DeSantis' impressive approach to handling Florida during this worldwide crisis which has been recognized throughout the country especially with regards to his handling of educational need, data and pre planning to insure the state was in a proper position prior to the start of this pandemic. Sincerely, Deborah Garber
Miami-Dade	Education	With 20+ years as a school Principal, you are doing the right thing by keeping the physical plants closed. If it rolls into next year, you are going to get criticism about the quality of the material currently being used. I suggest you try to get ahead of the curve on that. Get some good teachers together and have them critique and modify the material that is either dated or incorrect.
Pinellas	General	Do not open state before everyone is required to wear mask and social distance. I was in the grocery store the other day. 1/2 of the people did not have a mask on. This needs to be a minimum $500 penalty and enforced for not wearing mask in public. Public places should be off limits to those without a mask. Lame governor needs to quit mimicking Trump...both need to be replaced as they do not care about the people they serve.
Palm Beach	Recreation	Fishing....single person fishing on the beach.... in the SUNLIGHT which kills the virus. WHY can't this be done to make my mental health complete?

AMERICAN OVERSIGHT

Santa Rosa	General	Based on the results of the anti-body tests from LA County, New York, and Santa Clara, it is a a proven fact that the mortality rate is 0.21% in the US. Based on that number, how do you justify keeping businesses locked down or closed? How do you justify keeping hundreds of thousands unemployed in Florida? Ruining their lives, their family lives, the lives of business owners, all over a virus that has the same mortality rate of the common flu? How can you ration the thought of keeping restrictions in place, now that we're beyond "the peak" when the original reason given to the state from the governor, was to suppress the peak to prevent a rush on our medical services? The restrictions were never meant to remain in place until the threat of the virus is over, and that is directly from the governor. Why has our state government moved the goal posts on lifting the restrictions? Keep those most at risk quarantined and let the people decide what's best for them. Last question, what will the final cost be, in lives and money, in keeping our economy closed? I am not talking about the virus. I am talking about homelessness, dysentery, drug overdoses, suicides, children being removed from their parents because the parents cannot feed/clothe/house them, evictions, car repossessions, and etc ad nausim.
Citrus	General	I am a hair stylist and I am self employed. I have yet to see any income with unemployment and I haven't received my stimulus check, it is a hard time but with all these factors I still think florida is not ready to open up. I am so nervous to go back to work and to be in a small room with not a lot air circulation, I can not practice 6 feet distancing with my clients. I am practically on top of people while I am doing their hair. When you go to the store the cashiers are behind plexy glass, you have to stand behind tape that's marked every 6 feet, and with my type of work I can not do any of that. If you left the ban too soon then we can get hit with an even bigger second wave. My town is a retirement town, a lot of senior citizens will not want to stay home and they will still come get their hair done, even if they can be in danger. Please take beauty salons, tattoo shops, medical spas, anything that isn't essential but businesses that work directly with the public, into consideration with reopening. Thank you, Lauren

AMERICAN OVERSIGHT

Leon	Professional Services	Hello, I am a salon owner with 10 employees. I am also a hairstylist. I am very torn on the timeline of when we should go back. I know a lot of people are suffering but I also know how very close we are with our clients. We touch them throughout their entire service. A lot of women are in our chair for over three hours. Our faces also have to be very close at all times. We cannot work from a distance. I am an educator for masters of balayage. I travel throughout the country and have met hundreds of hairstylists. Our industry is completely torn. I know a lot of stylists in Georgia are choosing not to go back even though their state has opened. This poses another problem. If some open and some remain closed , does the salon that remains closed risk losing their clients? Of course they do. This forces stylists to work even when they feel it's not safe. I feel like now is not the time to be so close to people. I have had hundreds of people calling and texting my salon to get in as soon as we open. This scares me. If we open, they will come. People will not choose to not get their haircut. They will not stay home. I really hope unemployment can get resolved so that people do not feel the need to return to work so quickly. I have continued to pay my stylist from my savings. I now have the PPP which will hopefully help. I pray that you take our industry into consideration when thinking of opening the state.
Orange	General	BIG CONCERNS FOR ME: 1) Why aren't Orange County and Orlando represented on the task force? 2) Why aren't virologists on the task force? I think when you actually test ALL OF US, you'll know when to open. If you're not going to test all of us: 1) Every employee in every business needs a temperature check 3 times a day. (Before shift, during shift, after shift.) High temps at any point mean you go home and don't come back until you're normal. 2) Every employee in every business wears a mask. 3) Every person going into a business wears a mask. AND KEEP THE FREAKING IDIOTS OFF THE BEACHES! What the heck is wrong with you people? Keeping us home has kept most of the epidemic away. Why the rush for all of us to get sick? AND.....I've been trying to send this since about 5 pm: "We are experiencing higher than usual traffic. Please try submitting this form again. If the problem continues we recommend submitting again later, or contacting the owner of this form for assistance." THE STATE OF FLORIDA IS A JOKE. Makes me so proud to live here.

AMERICAN OVERSIGHT

Hillsborough	Healthcare	Due to the Governor's lack of safety initially in regards to closing the State due to "his" feelings for the less affected counties, I have no need for a weak, opinion in critical conditions, thus now at this time he needs to show strength, leadership, and value for "ALL" citizens in the state!!!! DO NOT REOPEN THIS STATE until the spread of this critical infection has stopped, a cure found, or positive proof can be assured. Based on all the negatives the Florida citizens are facing due to state inability's, I urge you to rethink this matter, be sure your decision is right. As with unemployment failures..... we ALL must stand accountable! Thank you.....Tony E.
Leon	Information	Reopening too soon would be the worst thing. Too soon the numbers are not good and keep going up. Lives are important. Money is the root of all evil. Fillowing the guidelines should be about June before we can open SMARTLY. Yes our economy is suffering. I know. But ask yourself whoever you love most in your life. Is it worth the. Life of that person for you??? Safety first has always been the way things were in EVERY job . Why is it a question now? Follow the medical professional's guidelines. PLEASE
Brevard	Information	I think we should start opening Florida in stages. Encourage people to be considerate and take responsibility for self and families. Encourage situations for outdoor use (restaurants, exercise, beaches, etc.)
Orange	Information	Please do not open the State up until May 15th on a LIMITED basis, and perferrably June 1st. We need to get the numbers WAY down so we don't have a strong second wave that shuts down the state AGAIN. My worry is a second wave, and a second shutdown. That will so WAY more damage to our economy that just slightly prolonging this first shutdown. We can't afford two shutdowns! Please delay opening the State back up until the COVID-19 numbers are MUCH lower.
Broward	General	I am unsure how long anyone thinks we can run and hide from Covid 19 or any other disease. We need to treat people like they understand what is going on and can act in accordingly. If not, everyone should understand understand the risk they are taking. People can only last so long without a means of income. The government can't support everyone indefinitely.
Hillsborough	Professional Services	Florida is not ready to reopen. The pandemic is not gone. Our numbers are still increasing. People over money.
Polk	General	Florida is not testing enough people at this point to know who has COVID-19 and who does not. Reopening the state at this time is dangerous and irresponsible. I support a significant increase in testing, providing needed PPE and other necessary equipment to our nurses, doctors and hospitals, and fixing the unemployment website. I don't support reopening Florida at this time.

AMERICAN OVERSIGHT

Broward	General	It is past time to re open. This has been a political debacle from the beginning. The "medical experts" are constantly moving the goal posts. First it was flattening the curve. Now its more testing. To shut down an entire economy for a death rate under 1% is ridiculous. It is going to take time for people to feel safe to patronize anything again so it does not matter how long you wait. People need to begin the process of accepting that life must go on. It will never be "safe" per the medical experts. Mr. Governor, it is time.
Palm Beach	Recreation	Open the parks, Golf Courses and out door swimming pools
Broward	General	I believe it's too soon to start reopening public places it's too soon to end the shelter at home act it's too soon for anyone to recreate in public areas even if social distancing is being followed
Hillsborough	General	Please make a decision. People and businesses need guidance and a date that they will be able to get back to work. We are all hanging in limbo waiting to see if the Governor will start phased openings May 1st. Just some movement in a positive direction will help people have hope. I encourage our Hillsboro County leaders to let the county start phased openings on May 1st.
Orange	General	1) balance the interest of public health with the general welfare of all of the people in the state of Florida. 2) insure that healthcare workers and care givers have the necessary protective gear and equipment needed to do their jobs. 3) make sure thAt everyone is aware of the highly infectionious nature of Covid-19 and do not allow undue exposure to the disease to businesses and customers during this time.
Lee	Healthcare	I feel it is too early to open our state of Florida. I'm a Registered nurse in Lee County. We are currently in our peak and it will keep going. I am so annoyed regarding lack of testing in oir area. We do have Page field but we need more resources available in our communities. Also national guard has not sent to help with testing. Please add testing locations including walk ups, low cost for east Ft Myers near downtown, also near MLK/I75 , South Ft. Myers and of our Nursing homes. Lee county has the highest number of cases and rising. Also a huge elderly population from Sarasota down to Naples. I feel our area is neglected
Okeechobee	General	You should open up the state. People can make their own decisions as to whether or not they want to go out. What's essential to some isn't the same for others. Just like what's non essential to some isn't to those who are making a living in those businesses.

AMERICAN OVERSIGHT

Pinellas	General	REOPEN FLORIDA. The economy is devastated, people's lives destroyed and YOU are responsible. You did not ask citizens before you took away our rights and freedom; before shattering business confidence, violating contractual rights, wrecking tens of millions of lives, prohibiting freedom in association, trapped us in our homes, dictated where we could and couldn't go, or whom we could see. From testing failures to policy failures to flat out Covid modeling lies that change daily, to straight up brutalism in your shutdown antics, the reputation of your governance will not fare well. There will be karma now or at the ballot box. There is fury against your lack of leadership, stalling tactics on reopening and horrific criminalization of freedom itself. I am so sorry I voted for you. This is torture you are putting us through. While you get paid and blather on about testing we fall into the abyss of total financial destruction. Do you care that for every covid death, more than 600 people lost their job? There are many studies showing it is not as bad as you claim. End this insanity now. Open all business. Quit moving the goalposts, of flattening the curve, hospital occupancy, testing, etc. It's obvious you are afraid to open or make any decision that might hurt you, but help us. There will be karma against you, the pandemic is over, open the economy and end the torture. You will soon own this gigantic botch of policy and leadership.
Citrus	Healthcare	My area has not been hit by corona virus, my hospitals are empty, I am a home health care RN, my hours are being cut, due to no business, wrong to shut down areas not affected.
Polk	General	Honestly, you shouldn't need to ask anyone but the scientists and medical professionals what is the best course of action. It doesn't matter what any of us think because WE AREN'T THE EXPERTS! To answer your question though, I work at a theme park in retail. Keep as much shut down for as long as needed medically to keep as many people as possible safe. It doesn't matter how good the economy might be if no one is left to buy anything!
Brevard	General	Thank you for all you are doing. I would not like to be in your shoes right now. Tough times and tough decisions. My family's health and safety is the most important thing to me. We have been home since the onset of the virus and only done online shopping . We will continue this practice until we feel it is safe to venture out. Since the virus is spread mostly from the hands to face, my very basic theory is until you can ensure that every home can purchase ample hand sanitizer and disinfectant wipes we are no way ready to think about opening up anything at all. Neither of these I have been able to purchase since the onset. I certainly will not be sending my children out without ensuring they have these basic necessities. Obviously there are more important issues at play such as testing , PPE supplies ect. But if the basic things like hand sanitizer are not available , surely that is enough of an indicator that we are nowhere nearly ready to think of opening our State or county.

AMERICAN OVERSIGHT

Orange	Professional Services	I work for a small hair salon, that also does facials and massage. We feel that we could safely protect our customers and employees by limiting the number of clients in each service area to one at a time, by scheduling time in-between each customer, along with making sure no one is sitting in the waiting area or that there are only 1 or 2 waiting, with ample space between each person. Also, we are willing to provide masks to each person who walks in, along with hand sanitizer and gloves. We would make sure to sanitize thoroughly in between each client, and every employee would be required to wear masks and gloves. We would also give clients the option of not coming in if they do not feel that our efforts are sufficient. We are all adults and if someone is not comfortable coming in, they have the option of staying home or finding another provider. If they are ill in any way, we would also suggest that they not come in for services. Everyone needs to work together, but the most important thing is GET US WORKING AGAIN ASAP. thank you
Brevard	General	The state needs to open slowly, and at the direction of medical experts and the CDC. We need to strengthen the safety net for furloughed and at risk individuals with government programs so they are not desperate to risk their lives and open. We need to significantly expand testing for the virus and antibodies, and extend that testing to anyone, not just specific criteria. Testing should be free, readily available and easy to administer with quick results or it is an ineffective measure. We can not open the state for business until we are adequately testing.
St. Johns	Healthcare	I want FL open NOW..... with continued recommendation of wearing face masks where possible and continued social distancing where possible. Start with counties or regions where the #'s are the best and do a staggered opening. Give citizens their rights back and save these businesses and jobs. It's time to start elective surgeries and procedures. Not happy about bailing out hospitals when they need the revenue! Continue to keep nursing homes quarantined longer, perhaps till there are better medications or a vaccine. Stop the cycle of fear that is rampant, and be BOLD and act with FAITH - We want a Leader willing to step out and LEAD the masses, not double minded looking at public opinion polls! People giving opinions should have to give a disclaimer if they are working from home or are retired with a good pension because they are the ones with the loudest voice screaming 'Stay home till there is a vaccine"..... There are no guarantees in life - God numbers our days, so let's save our economy!

AMERICAN OVERSIGHT

Sarasota	Healthcare	1. What members on this task force have medical backgrounds esp in public health field or epidemiology? 2. What will you do to insure the curve does not increase as people (hopefully follow, but we know that will not be 100 percent) policies and mandated practices? 3. Will FL have sufficient supplies on hand to provide care and safety measures? 4. What criteria will be preset to measure success versus failure? 5.Will this criteria be pre-publicized to citizens?
Broward	General	I think that much of Florida can be opened up by May 1st or 8th, allowing businesses to start up, as long as people still wear masks and social distancing is practiced. Maybe limit the occupancy like stores are doing in Broward. It would be a little tricky for restaurants since you can't eat with a mask, but if restaurants are limited to only allowed 30% occupancy, and people are spaced out, with only same household/families sitting together, that should work. And hair salons and nail salons could open too, with lots of hand washing and masks, and spacing people. Also most importantly, people that are at risk (seniors, ill, weak immune systems) need to stay home, even when the State opens up. But tourism needs to hold off a little while, maybe until late May. Tourists have a way of forgetting about personal spacing. But for Broward, Miami-Dade and Palm Beach, it needs to be slower since this area is still a hotspot. I think this area needs more time since numbers are still going up. Maybe wait until May 15 especially if numbers are going down. At risk people definitely should stay home, but maybe start opening some retail stores and restaurants around May 15. It is VERY important to be able to get the antibody testing going. When people know that they have already had Covid-19 and have the antibodies, then they will be more comfortable going out, and it could show that the death rate is really MUCH lower than thought. I would like to know if I actually had Covid-19 in early March when I was sick and had fever and cough but was told it was just the flu.
Pinellas	General	We need to increase testing throughout the state before we open up the state. That should include more antibody testing.

AMERICAN OVERSIGHT

Martin	Professional Services	I'm a salon owner. I do not believe we should be in the first phase of reopening. We have very close contact with all clients. The majority of the clientele is 65 or older, especially in Martin County. We border one of the heaviest positive counties. We can not do anyone's hair 6 feet away from them. Gloves are suitable for some services but not all. We are hurting financially but humanity, health, and safety are more important. I'm fearful of liabilities. I'm fearful that because the Florida's unemployment system is not working effectively and efficiently, people will have no choice but to go back to work so they can provide for their families. But at what expense? Am I risking my life? My families lives? My clients lives? Is it worth it? Trust me my grey is showing too! I desperately need a haircut! But can you live with yourself knowing you are risking lives for what?..... a trim? A root touch up? Please consider holding off allowing the opening of salons until a second or third phase. Please do not sacrifice health for vanity!
Osceola	Food	We can imitate know how from California, in order to provide foods for seniors and sick , the Florida State can make contracts with all restaurants to prepare and to make delivery of the foods and drinks . So we can make guidelines to keep safe everybody .
Brevard	Healthcare	I do not feel that it is in the best Interest of the public to open dental offices In two weeks. Not only do most clinicians not have the appropriate PPE, but most of it is on backorder for months. We will be putting the general public at risk, not only because of aerosols released during procedures but also droplets, and interactions between people that are more than just not socially distancing. We aren't even 100% sure how well our disinfectants work on this virus, and it will be suspended in the air if someone is sick. There is still so much unknown. It would be worse to open and then deal with a second wave because we opened too soon. Thank you for your time.
Hillsborough	Food	While I work in foodservice in Tampa and would love to see more business come through so that my staff and I can receive higher tips, seeing as Florida has been a hotbed for new cases and is generally of higher risk due to its older population, I don't think Florida should be opening sooner than other states. It feels that most people arguing for the reopening of the state either seek to profit off of it, simply want nonessential goods and services to be available again, or think their rights are being infringed upon (which they are not - people are confusing emergency measures with total martial law).

AMERICAN OVERSIGHT

Broward	Real Estate	The reopening must be done with care. As business really need to reopen soon before they collapse under financial strain. If Covid-19 re-populates and businesses have to close back down a second time, many would never make it and could be the death of many small as well as big business. We need to get this right the first time out. A clear plan on social distancing must be in place. PPE and set rules for office; industrial; retail and restaurants. Each business would submit a written plan well ahead of a reopening on how they would meet these rules and would be inspected by an approved person from the City, County, or State person to confirm their plan would work and/or to recommend or require changes or additions. The inspection process will be difficult to meet demand. This might be addressed by addressing the more in demand locations first or if possible think outside the box on who will be trained to inspect. After all, they are just confirming the business is able to accomplish their Covid-19 plan for sanitization and social distancing. If a business is able to maintain a strict enough social distancing and frequent disinfecting, there may be the possibility to remain open under limited conditions should a 2nd closure be required. Some ways to maintain control under re-opening conditions might be: Perhaps restaurants could only seat reservations for the 1st month or so. Have solid surface dividers between tables that are not able to be 6 feet apart. For retail, limited customers within their store. Office users would need to address distance between staff; close break rooms; conference rooms and other places that would not qualify for social distance Industrial / Warehouse would follow similar restrictions to office. I have spoken to a few businesses on the re-opening.They have noted concern that the financial strength will not be there right away and may want to hold back on opening. A study of this should be in advance of the re-opening to let businesses understand that their sales may not be in line with their expectations. Some may choose to hold back further limiting the re-opening process.
Pinellas	General	Keep social distancing - open slow and steady - beaches, small businesses, restaurants at half capacity - end the safer at home except for those with under lying issues. Praying for you who need to decide This. I know it's a difficult decision- however we need to be accountable to our own well being and allow business to get back up and running. Thank you
Miami-Dade	Healthcare	Please use an abundance of caution in decisions on reopening businesses and schools and parks. Miami is poised to be the "next NYC" and given our high proportion of senior citizens, it would be reckless and potentially lethal to put business interests above human lives. And voters will remember....
Volusia	Recreation	I would like to see the state parks open with a limited number of entries per day. I also believe it is important to supply fresh water hand washing stations or anti bacterial gel. Perhaps rangers could lead informational sessions on the best practices for state parks.
Pasco	Healthcare	I think the state needs to be closed until the cases are way down. The present number that is increasing every day is unacceptable. The governor needs to take this seriously and actually issue the shelter in place for 2 weeks. I f he truly wants to flatten the curve, this MUST happen.

AMERICAN OVERSIGHT

Martin	Education	I work for the school system in Martin County. I am an extended day person and will be working the summer program there. When will the schools reopen so that I can go back to work?
Okaloosa	Healthcare	It is time to let everyone in our state have their freedoms back! There is plenty of data and evidence now that shows we will be just as safe open as closed. There has never been any reason to shut down small businesses while the big stores rate in the money. Let's reopen before more people are financially destroyed.
Palm Beach	Healthcare	NO ON OPENING FLORIDA. PBC is still rising in cases, poor testing numbers and announced today, even with COVID19 antibodies, it does not mean that you will be immune to a second or 3rd or 4th infection. So NOT YET,MAYBE JUNE.
Okaloosa	Recreation	Please open the state parks and campcrounds in Northwest Florida
Broward	Tourism	Opening up vacation rentals prior to hotels should be considered as a smart move to keep people separated. There are people that are stranded and rely on vacation rentals to find cost effective temporary housing.
St. Johns	General	It is time to open Florida now! Those with underlying conditions can choose to stay home. This has been a gross overreaction.
Orange	Accommodation	We respectfully ask for you to reopen vacation rentals and allow Floridians the chance to get back to serving guests in the state's premier industry. They can reopen safely with staycation guests initially even, but they have to open. We are closely following your Task Force meetings assigned with reopening the Florida economy. Despite not having a vacation rental industry representative on the Task Force, we would like to respectfully ask that the vacation rental industry be allowed to reopen in May and resume operations in a limited capacity at the very minimum. We are a $31 billion dollar contributor annually to the hospitality economy throughout Florida. Prior to the Covid-19 pandemic our industry was creating 312 jobs per day. Today many of our industry employees are unemployed. We need to get back to work. Vacation rentals have implemented enhanced procedures to clean and sterilize homes using the most advanced techniques following CDC and EPA recommendations. Small businesses like those in the vacation rental industry have suffered enormously over the last 30 days and need to get back to work. Many have applied for CARES Act funding and still have not received approvals for funding and maybe never will. Many small businesses have been shut out of this program.

AMERICAN OVERSIGHT

Lee	General	Hello, I would like to voice my support for re-opening the State of Florida. It's time to get back to work and our social lives. There are thousands of people who are suffering out of work, domestic violence is up, child abuse all of these things that no one is thinking about. I respect the effort to protect the public, but this has gone far enough. People who are at home isolating are losing valuable immunity. Generally healthy people without compromised immune systems should be out - kids should be in school. This stay at home order will create far more problems than it solves if it doesn't end NOW. On top of that, there are countless instances of violating our Constitutional Rights. We live in the greatest country in the world with freedoms and liberties that many do not enjoy. Please don't let this virus change that. Denise Gott
Palm Beach	Healthcare	I am a recently retired surgeon and have been providing a "morning update" to friends and our Senators, as well as our local House representative for over a month now. This is based on my twice a day review of what little data we, the public, can get. Based on my analysis, I noted the curve flattening after April 3-5, as stated in my notices then and which was finally picked up by the MSM this week. As I am in Palm Beach County I can comment on the tricounty area, most affected by the pandemic, and the two counties to the north of us. St. Lucie and Martin counties, with minimal infection should never have been closed. Based on my analysis, Palm Beach may now reopen safely. Broward can likely open May 1 and Dade will still have to be closed for now. Ongoing containment is useless as the disease has already spread widely (despite the low numbers of positive tests). The young, healthy and covid negative people may all safely return to work, keeping in mind that over 80% of those affected are at worst minimally symptomatic. The mitigation should continue for the elderly (over 75), and those of any age with comorbidities, such as hypertension, obesity and DM. CDC hygienic measures remain useful only in that they serve as reminders to interact safely. The M&M from this pandemic will likely mimic a bad flu, but in a compressed time, for which economic strangulation was a terrible policy. Live and learn. Get this state open now, remember the purpose of containment was to not overwhelm our hospitals and health systems. To that end, this has been successful. Time to open up.

AMERICAN OVERSIGHT

Duval	Tourism	Dear Re-Open Florida Task Force, We have to save the tourism industry. Florida may not be known for tourism anymore if we continue under these restrictions. I suggest: + Open hotels, sports venues, movie theaters, and tourism businesses by May 20. Give these businesses guidelines to abide by, such as only recommending non-vulnerable individuals attend these places. +Open restaurant dining rooms by May 1, asking servers and employees to wear gloves and masks. Allow these establishments to be operated only during certain hours (e.g., 10AM-8PM). Recommend that only non-vulnerable individuals go to these establishments. This will also take the burden off of grocery stores who are mainly the only source of food right now. +Allow out-door seating at restaurants by May 1 if it is feasible. +Allow nonessential travel for non-vulnerable individuals May 1. +Allow schools to open, with limited classroom sizes, starting July 1. +Open public places in entertainment districts, with social distancing requirements and group size requirements by May 15. Thank you so much! You are wonderful!
Pinellas	General	Opening up Florida is fine as long as social distancing and wasks are worn
Pasco	Tourism	Please open Florida! This has gone on too long! This closure is. Not sustainable and thus irreparable!
Lake	General	FL has a large population of elderly & feel that it is detrimentally to open too soon & it is imperative to follow the four phase reopening. Opening the beaches or theme parks, even golf courses is risky.
Pinellas	Professional Services	As the mother of two children and the daughter of a very much loved senior citizen (who dedicated over 40 years of her life to educating Florida children), I BEG you not to re-open our stare until it’s safe to do so. Please do not forget that you hold people’s lives in your hands! Please do not place more worth on your bottom line than the lives of our loved ones!
Okeechobee	General	I can't believe considering opening retail movie theatres casinos restaurants etc would come before people's lives. It's all about the money. Money is the rude of all evil! The Governor and Mayors State of Florida is all worried about the tourism dollars before the virus. Put the people's health first then reopen later when numbers are very low on the daily charts. You have people still DYING ALL OVER!

AMERICAN OVERSIGHT

Broward	Healthcare	We need to exercise caution reopening businesses in the state, or we're going to see a second resurgence. If I'm honest, I will continue to avoid non-essential businesses even if they are reopened until health officials say it's safe. I can't spend money if I'm sick, or in the hospital, or dead.
Flagler	General	Open Florida back up ! Beaches , businesses etc. We do not need more government overreach . In my city of Palm Coast the mayor just released a 4 season plan to re open palm coast . ?palm coast has 2 covid 19 deaths) This is Ridiculous. Open business , parks and beaches already! The police is taking people out of the water here which is unconstitutional.
Broward	General	Open up now. Put testing I place for healthcare, hospital workers and those around the elderly and high risk. Require face masks on public transportation only like buses. Allow everything to open back up. Please look up Dr Scott Atlas of Stanford and follow his recommendations.
Seminole	General	Given that COVID-19 is spread via respiratory tract, masks (or some type of face covering) should be mandatory in public. This would allow more people to move about while preventing transmission. It would prevent asymptomatic, positive carriers from spreading their respiratory secretions. Kick it off with PSA's from public figures and make it "cool" to wear a mask. I'd approach high profile people like: Tom Brady, Steve Spurrier, Jennifer Lopez, etc.
Hillsborough	General	I think opening up the state is the worst thing you could do . No one was following the rules before , what makes you think they will now? All it is going to do is raise the numbers of the infected and more deaths. I think the numbers are high enough and still going up without opening up to soon. I know we have o open up eventually but all the experts in the field are saying its to soon. Don't you think they know more than anyone else? Lives are more important than anything else? What good is it to have the economy open if it will cause more deaths? Please be smart and wait. Listen to the experts not the morons. Than you.
Miami-Dade	Real Estate	open everything and do what sweden has done. Let the people make thier own decisions on and not treat us like we in nazi germany. This is USA, a vacine wont be available for at least 18 months, we need to get the economy going. The economy and its workforce is more important then public health lockdown. OPEN US BACK UP! LET US TAKE THE RISKS!
Lee	Food	Make Restaurants keep seating distance 6 ft apart and wait staff wears gloves and masks.
Lee	General	I believe it should be up to each individual wether to risk going out in public. I'm a healthy 65 year old. My retirement portfolio is shrinking because of this. The economy needs to reopen now!!!
Lee	General	Open the state. Especially SWFL counties that were not heavily affected.

AMERICAN OVERSIGHT

Volusia	Education	As a teacher, if the fall is still questionable, I advocate offering AM and PM school for all students. This will allow to keep the classroom numbers small and allow for social distancing. Teachers can teach reading and math Monday-Thursday and social studies and science on Friday. The AM students can take a bagged lunch home with them to eat. The PM students can also take a bagged lunch home with them to eat before they come to school the next day. This will allow for face to face teaching while keeping the numbers low. That way, if a student is infected, only 9 other students would be exposed rather than an entire class, cafeteria, etc. This will also reduce the bus capacity by 50%. Teachers can have lunch while the AM/PM switch is being made.
Polk	Food	Submitting as a 'Food' category because that it the premise of my input. As a craft brewery (not brewpub) owner, I would like to see brewery taprooms open within the phase that allows restaurants to open. Like many, we are struggling to stay open with to-go only. If food-based businesses are allowed to open for onsite consumption and brewery taprooms are not allowed to in the same phase, the struggles will become much worse and many of us will not survive. We are not bars and many of us have the capacity and ability to manage a restricted occupancy. Many of us have been supporting our local restaurants and encouraging our communities to support us all equally. We are also the hearts of our communities, both socially and economically, and if we can't make it in the long run, the community as a whole will suffer with less people coming to visit our downtowns and local businesses. Breweries are NOT bars.
Leon	General	Can we please wait until end of may, there are people that are sick and not being checked. We need test available for low income area's. Some people think this is a game, i work at Wal-Mart and customers don't take it serious..
Okeechobee	General	The damage of this virus and impacts to life and health are not limited to risks of getting this virus. The stay at home order has brought about a myriad of challenges to individual liberties, created the economic conditions where even businesses that have been in operation for decades are in danger of being unable to stay open or reopen. Though it may not be ideal, I believe that reopening is in our best interest. The health issues resultant of unemployment and poverty are real, those statistics should be considered before a decision to extend this closure. We are fast approaching the point where a willingness to abide will turn into a matter of survival superseding the will of the government. If we the governed have to choose between being governed and our interest in survival the orders currently in place may not be worth the paper it's written on and trust in the Governor will quickly fall off. Please open our economy back up before many more lives are lost.
Lee	Healthcare	Follow CDC Guidelines on RE-OPEN
Miami-Dade	Information	I would love to know when is Miami Dade going to be officially open? We are not ready people are sick hope you care a little more for humanity Thank you so much

AMERICAN OVERSIGHT

Volusia	Healthcare	Florida should look at what Canada has done,the state of Massachusetts has more deaths and more confirmed C-19 cases than all of Canada and Florida is not that far behind . I believe our northern friends have a better hold on this pandemic and I have heard that they are not far from creating a vaccine,I would think someone should be comparing all options. I believe our small business needs help for Ex.a barbershop opens by appointment only barber Wears a mask and gloves and one at a time by appointment..Grocery stores should only allow a certain amount of people in there store at a time and when one leaves another one goes in,the workers need masks and gloves mandatory including restaurants,monitoring crowds and improper gatherings should be fined ,including the beach.
Duval	Food	This has gone on long enough. Most of us have been good little soldiers. It's time to get back to work!
Brevard	General	Please reopen everything in Florida as soon as possible. From what I understand about the "stay at home order", it was enacted so as not to overwhelm hospitals. The hospitals are not overwhelmed. In fact, nurses and medical personnel are being called off of work because they're not needed. We cannot hide from this virus forever and it's not just going to disappear. I read in the news that a very small sample of our residents had the antibody test and according to that, it is estimated that only 1% of Brevard residents have immunity. And now because Brevard has very little immunity, we will be expected to "social distance for quite some time". So because we followed the "stay at home order" so we wouldn't get the virus, we have now inadvertently doomed ourselves to opening everything up again. Measures need to be put into place for the residents who are vulnerable and the rest of society needs to be able to go on with their lives. It is impossible to save every one, and we have done a good job at minimizing fatalities but we can't do this for too long. It is not normal or OK that my children haven't interacted with other children in 5 weeks. I refuse for this to be our "new normal" because THIS is NOT normal. Not seeing extended family, friends and neighbors. Not going out and doing things that we love and make us happy. THIS, what we're doing, is no way to live a life.
Volusia	Food	I believe restaurants could be reopened with a smaller amount of diners and continued options for takeout. It would allow options for diners to sit in the restaurant or take the food home.
Miami-Dade	General	it is true that the economy requires work to be reactivated, but much more important than work is people's lives, the return to a normal life must be very gradual and take stages starting with the activities of greatest need and under strict provisions of security.

AMERICAN OVERSIGHT

Volusia	General	I believe that the state must place public safety over the economy. We must learn from the Spanish flu pandemic of 1918 and know that a second wave of this virus will hit and has the potential to be even deadlier . When we reopen the state we should put a mandatory mask wearing initiative in place to protect everyone. In addition we should close our state border to non-residents until August. I would also like to see grocery stores reducing the number of people allowed to shop by having people shop by appointment or through designated times such as last name a-h shops from 8-10. I feel that restaurants should be by reservation only and only accept a certain number based on square footage so that one reservation has 144sq ft (rational being 6ft in each direction total 12 ft by 12ft). Restaurants could still do take out and delivery. I believe any businesses that open should be required to terminally clean at the end of every business day and must post this record of cleaning on the front entrance. All businesses should still allow employees to work from home if possible and required other meetings to be through webex or some conference platform as an option.
Polk	Healthcare	Governor DeSantis, As a Dental Hygienist, I feel we are jepordizing oursleves to return to work after May 8. We are 3-6 inches from a patient during treatment, infectious aerosols. Dentistry should remain emergency based during this time. PPE can be better utilized by other medical professions than a dental practice. DENTAL SHOULD BE EMERGENCY ONLY! For my safety as a professional , and others in my field. We are a hands on business that is not necessary, unless an emergency!! Thank you, Karen McLean
Brevard	General	I think it is way to early to reopen all non -essential business in florida. I don't think it's safe reopening florida while cases infected and deaths are still rising every day. It was already a big mistake reopening the beach. I think peoples life is more important then economy. And if they reopen florida the viirus will spread more and there will be more cases and deaths.
Leon	General	Masks should be mandatory. Only the most essential first and no personal services like nail salons and that foolishness. If you can work or study from home you should do so until there is a vaccine.
St. Johns	General	Gov. DeSantis - Thank you for not opening up Florida like Georgia. Please, please, do not open up our state until we have proper testing available for all FL residents. It's just not worth opening up early because we'll just have to redo the isolation when the virus gains strength again. Thank you for all of the testing supplies and testing centers that are available. Please keep up this work. We've got to get the cases down before opening up the state. We can't turn into a hotspot like NYC. Thank you for your time.

AMERICAN OVERSIGHT

Brevard	Recreation	I see no reason why we cant open our local parks to play sports. These are all outdoor venues with plenty of open area to play and practice safely. There is much more of a threat going shopping indoors then at an open venue. Restrictions on outdoor activities has to come to an end. Most of our parks are not side by side seating like major league sporting events. Most often parents just stand and watch their kids. Not allowing our kids to get outside and play sports is not necessary. Teams can gather and continue their seasons safely. I encourage the task force to allow kids to get back to being kids. We have lost our senior high school year. We dont want to lose our summer sports season as well.
Brevard	Healthcare	I think the state needs Atleast 2 more weeks, they r just now testing the town I live in. I am worried about the elderly I've worked with the elderly for years and there lives matter to.
Hillsborough	General	I feel bad for small businesses, but I really feel the Governor needs to take more steps to get funding for them, rather than loans. I also believe it is too early to open our state back up. It seems as though we are flattening the curve, but I am afraid they we will have wasted our hard efforts over the past month. I think we need another month (May) to keep that downward trend. We are a state that relies on tourism and if we reopen, I believe we will be inviting people from other states to visit and possibly bring the virus here again, especially with the President talking about heats and UV rays being a possible cure. I think that puts us Floridians at risk. What we are doing now is working well. Give us another month.
Seminole	General	I think the state is not ready to be open. We need more tests
St. Johns	Food	I would like to open sit down restaurants now to help the food service industry plus it will help people get back to having a safe, social life. I also would like to see beaches open full time with social distancing.
Manatee	General	Please re open the economy next week with restrictions. Any longer and small business may never come back. The time is now. This has gone on long enough
Lake	Healthcare	Let science guide our elected officials, let business owners determine what they want to do after science says it's okay to open the economy. There is no magic potion that is going to get rid of this killer.
Miami-Dade	General	Please DO NOT re-open Florida. It's suicidal, politically too.
Marion	General	It is to early to open Florida. Please do not open for at least another month. Every life should Matter. This is not about money. Coved 19 will win.
Leon	General	I believe that we need to do whatever it takes to keep us all safe. The more we know about this virus and the more we test for it, the better off we will be. If we open everything back up too soon we could make it much worse. I am not willing to sacrifice my family for money. I understand that people need to work (all three of my kids lost their jobs and so I am playing all of their bills and feeding them) but this is unprecedented times so we need strong decisive action. I don't need a haircut or go to the beach that badly!

AMERICAN OVERSIGHT

Lake	Tourism	The state should absolutely re-open. Sick people should stay home regardless of what the ailment is. We need Disney open, we need restaurants open. I refuse to wear a mask and take a test. Those items should be given to the sick and the front line. No reason I need a test if I'm not showing symptoms. Furthermore, if I am, I'm not leaving my house. Most Floridians feel the same and I do. Let's get this going, our lives depend on it.
Pinellas	Government	Please be cautious when setting parameters for reopening Florida. Group gatherings and nonessential businesses which encourage close contact are inviting a resurgence of coronavirus. Every life lost is irreplaceable. It is far better to be conservative now rather than risk having to manage a greater negative impact on both business and individuals.
Duval	General	A person that was born and raised in Jacksonville, I am also raising my family here. I have kept my family locked away in fear of this virus. Yes I have lost my job but I would rather stay home with my family than to risk my health or my family's health. My husband who is high risk has had multiple strokes along with kidney failure. I would rather have my husband around to watch our young children grow up! Please consider the safety of yourself and your family before making a rash decision on opening up our great state.
Columbia	General	Open Florida immediately. All businesses, government offices, beaches, parks and recreation areas. This lockdown is killing our economy and will kill our people as well. No soft opening, fully open Florida immediately!
Volusia	General	Do NOT OPEN UNTIL WE ARE SAFE
Citrus	General	I am among the most vulnerable group and live in a community that has a great older population. I would like to see our state not open until the virus numbers go down a bit more. I also know of the financial situation but would hate to see all the progress we have made be lost because we opened up a bit too soon. If we wait for a little while and see how other states do things we may gain some pointers to make our opening up Florida safer and more productive. We really don't want a rebound of the virus to set us back. Again I do know what the impact of the financial situation is because we are not getting income or able to safely get a job until the virus is under control. We have followed the guidelines and then some so we have definitely done our part and would not want to see this virus gain any ground because of a few weeks to slow the spread even further. Thank you for the opportunity to have a small voice in the decision you have to make. Tina
Lee	Healthcare	Do not open the state until testing is complete on the entire population. Please fix the unemployment system that Rick Scott totally screwed up. Stop listening to Trump and grow some balls.
Nassau	Healthcare	Please consider that all Florida is not the same. Amelia island is a small community that has no deaths and yet is facing economic disaster please open up business ! Let us fight this diesease by getting healthy people out
Pasco	Healthcare	Look at this from a medical standpoint instead of a political one. Hillsborough County was up 10% this week in positive cases. How can you open the state when cases are exponentially going up???

AMERICAN OVERSIGHT

Seminole	General	This is NOT SUSTAINABLE. People want to go back to work! Open businesses with parameters if needed, but let them open! People are responsible for their OWN health. People who want to stay home can stay home. Those who are low risk should have the freedom to operate how they see fit! Keeping the state closed is a disgusting government overreach and not at all what I would expect from a Republican governor. Not to mention, kids need fresh air and playgrounds! We need social interaction! we are not cattle to be locked in cages... we are humans! Don't let our state be like NY, MI, and CA. We voted Republican FOR A REASON and this was NOT it.
Pinellas	Healthcare	It's too soon to open. You're putting lives at risk.
Orange	General	As right now I think things need to stay closed intill there a control over this virus.
Sarasota	Healthcare	Make wearing of masks mandatory when people are inside any commercial business establishment If businesses do reopen it should be mandatory for customers to use a hand sanitizer when entering and leaving establishment. Protect our vulnerable healthcare workers from harassment by those demanding their constitutional rights. If protests are held outside hospitals, clinics etc make it unlawful for protesters to cross boundaries. Provide financial assistance to healthcare workers that need to be quarantined . They should not have to pay for their lodging be it in a hotel room, rental apartment etc Consider limiting number of customers in grocery stores at any given time. Store employees will be able to move customers through much faster and social distancing will be easier to maintain.
Brevard	Healthcare	Please keep dental hygienist SAFE! We are not being noticed amongst this pandemic! As much as I feel we are essential we MUST have approved PPE's! We have children and family! As much as we want to return to work, we want to be SAFE! Additionally, we NEED mandates...make it essential the appropriate PPE are needed to reopen! Don't make thing's interpretable...because everyone INTERPRETS things differently! REQUIRE LEVEL 3 masks and shields or N95 masks! Thank you so much!
Pinellas	Professional Services	Open Florida. Small business owner. Salon. If it goes any longer we and employed can not financially recover. Loans cover employees not house hold income for owners. Missing income for 2 months. Can't do other month.
Flagler	General	Opening businesses is really a 4 phase operation. If the Governor says it's okay to open small cafes not major restaurants, nail salons, hair salons etc. Then I think it should come down to the Mayor of the counties to decide what they feel is best for their city. If they are on board, then it comes to the business owner to make their decision on when and how. Then the individual employee. I think Disney Parks should open to ANNUAL PASS HOLDERS ONLY at first. That would give the parks a good start at testing out how they would work out the Que lines and the quick service food places around the parks. And test the fast pass virtual system without having the major crowds of a normal summer.

AMERICAN OVERSIGHT

Palm Beach	General	The purpose of this shutdown was to make sure hospitals were not overwhelmed. We have accomplished this so we need to start re opening FL now!!! People are in line for hours waiting for food at food banks. The end result of this is becoming worse than the means. People need to get back to work so they don't lose their businesses and their homes. The death rate was much lower than expected so why are we still under stay at home orders??? Let the seniors and high risk individuals quaranteen and let the rest of us get back to our lives!
Orange	Professional Services	While I and my family have been affected financially I have also seen medically the effects of the current pandemic and think it's best to wait until the medical officials give the ok to reopen businesses to avoid another waive of fatalities.
St. Lucie	General	Please keep the stay at home order in tact for another month. Please don't put us in danger. Keep essential businesses open with social distancing and masks. You've already made the right decision closing schools for the year. Opening malls and gyms and restaurants will only undo all the good that has been done. I'm already worried about opening beaches, but I'm choosing to stay home. One more month should flatten the curve and enable theme parks and hotels to reopen, which will help Florida's tourism numbers. Also, please extend unemployment waivers through May. Please give us a chance to catch up with bills so that we can stimulate the economy when it reopens. Please continue the stay at home order and unemployment waivers. Please, our lives depend on it.
Broward	Administrative	Good evening, I work in the hospitality/entertainment business and have done so for over 20 years. I work as an Executive Assistant, but I see how this lock down has affected so many of my co-workers and their families and how it has affected my own family. I understand that we must take certain precautions in order to be safe from the virus; however, I don't think that this statewide shutdown is the answer. We need to get this economy up and running while following certain guidelines that will ensure the safety of everyone. The high risk and elderly should most definitely stay home, but the rest of us should be able to start working and opening up businesses. The guidelines for these businesses to open should be clear and carried out prior to them opening. Consumers will not feel comfortable going out and patronizing these businesses until the guidelines are communicated effectively. I'm sure we will be happily surprised at the outcome of a structured reopening. Essential employees should be compensated as well. Thank you, Margaret Amoroso
Broward	Construction	Please re open as soon as possible
Seminole	General	This lockdown has been a huge blight on the economy and on the economic welfare of working people. The fact that COVID-19 is killing mostly elderly should not cause the entire state to shut down. They should have been the ones to be stuck in quarantine, in addition to those who have co-morbidities, not those of us who are young and healthy. I am so tired of old people running everything and the country doing everything for them when they are sitting on money and the younger generations suffer. Let us live our lives! End this nonsense now.

AMERICAN OVERSIGHT

Broward	Education	Do not open schools until there are zero cases in the district. Classes have students with 30 or more in a room that can not be formatted to be kept 6 feet apart. Some students live at home with elderly or at risk.
Sarasota	Education	I think the order should be extended until May 20th at least and then allow small businesses to open first and slowly. This would not include nail, tattoo, or hair salons. They should remain closed until June 15th. Getting unemployment working correctly in Florida would ease people for 2 more weeks, but Florida has done so much wrong. The unemployment link is constantly down and no one can talk to anyone. Do Better. Also, schools (all schools should be online until December of 2020. The governor works for the people, not big money, not Trump, and not the wealthy. For me, how this is handled will determine whether I stay in Florida or move back to Ohio where DeWine has handled this crisis amazingly well and is worried about his community. Know your audience, Florida is an elderly state. Let's not prove #FloridaMorons to be true
Broward	General	I can only take it for another 2 weeks max, I m going completely insane !My mental health a deteriorating rapidly. Nobody lives forever.
Pinellas	General	Please start a limited reopening May 1 Smart - distancing rules and guidelines, mask requirements where appropriate. For example restaurants and movie theaters at 1/2 capacity. Also all businesses open that agree to safe practices. Businesses are being crushed- we need a safe pathway back.
Brevard	General	Hit the open button. Open everything, send everyone back to work. Let people make their own decisions about whether to go out to eat and visit stores. Encourage vulnerable to use caution and protect themselves. Ignore the beating you're going to take from the media. Pray everyday and embrace the prayers of those of us who are lifting you up in prayer. Go with your gut. I'll give you the advice I received as a squadron commander in the Air Force--you're in charge, act like it.
Duval	Real Estate	I support re-opening Florida as soon as possible. I believe we are doing more harm than good by driving ourselves further into debt trying to avoid the inevitable spread of the virus.
Osceola	Food	I am a father of 4 with w jobs I am struggling a bit but the country is doing enough for us to make sure we do thing when we reopen I believe they should wait a little longer for stuff like restaurant and other biz. To reopen due to that we might wipe most of our ancestors with this covid 19 stuff that recommendations change everyday.please wait to reopen as a father and a spouse I would love to end up with my family intact as most of us prey for . Florida will kill its self if it reopens to soon people hear don't listen to food.
Palm Beach	General	Please consider encouraging and/or enforcing companies that have positions with the ability to work remote to do so as long as possible. Or to at least rotate working onsite and remotely throughout the work week.

AMERICAN OVERSIGHT

Palm Beach	Recreation	Beach activities are usually executed in a social distance type manner anyway. People maintain distances to post up and sit on the beach normally. The beaches are definitely a safe area to be and the most mentally fulfilling especially during a time like this after everyone has been cooped up for so long. We can enjoy our antiviral sunlight and relax. Please reopen all beaches.
Collier	General	I am a graduate student in business at Florida Gulf Coast University living and working in Naples. I am a Florida resident, born and raised, and I am asking our leaders to renew the safer at home policy for the time being. My grandparents are at retirement age, and this past year both of them were diagnosed with aggressive types of cancer. By God's grace and through several surgeries, they have both had their cancers removed and can now say they are cancer free. At the time of their treatment, I supplemented my income to support them because they were unable to run their small business. When life was beginning to look normal again, my grandfather was diagnosed with lung and heart disease. I continue to support my family financially and live with them in order to put as much money together as possible. Now with COVID-19, we have all lost our source of income. I was furloughed by my company, and my grandparents had to shutter their business indefinitely in response to the virus. The financial need we had before this was difficult but manageable, but is no longer without unemployment insurance. The thing is, I would love to go back to work if I could. I would live to help my grandparents get everything up and running again with their business. But I simply cannot and will not return to a physical workspace while people are still being infected locally, and around the country, even with all of our precautions in place. Due to their history, my grandparents would probably not survive an infection of this virus. I know they are not the majority, but as we now know, children and young adults like myself have become infected and have died from COVID-19. This is unprecedented and calls for unprecedented action. We cannot respond as if this were anything else. We do not have a vaccine. Treatment is sketchy at best and nonexistent at worst. Even with all of our modern conveniences, people have died in my community and will keep dying at higher rates if we reopen Florida right now. I pray that God grants you wisdom and grace in your decision making, and that we remember as a State that people's lives are priceless and shall not be sacrificed for the economy. We must stand our ground and protect what is ours. How can we preserver our way of life if we must sacrifice innocent people to maintain it? This war is not against the people, it is against the virus. Please, stand with Floridians and protect us by allowing, no, encouraging us to stay home if we must in order to be well. Thank you for considering.
Miami-Dade	Healthcare	Florida should not reopen for now. It looks like we are getting out of the woods but there are still new cases and we cannot put everyone at risk. Just like other diseases from the 1900,s the second wave killed 3 times as much as the first wave. We need to make sure there are no new cases.
Palm Beach	Healthcare	Re-open - need access to all medical offices health care facilities including fitness outdoor indoor facilities to maintain personal health care routines to stay healthy. Advocate others concerned with personal health risks how to respond take steps measures routines to protect their personal health care response.

AMERICAN OVERSIGHT

Orange	General	I was born in the state of Florida, even that i travel and lived all over the world Florida was always been home, a place I was proud to called home, Now I am a shamed to call it home, it has became once again the joke of the country. When we was asked we did what was asked, we hunkered down stayed home, stayed 6 feet away from others, didn't go out to eat, to the gym, to see friends. Now we are asking you to hunkered down and take care of us, we need you to fix our once great state and make it great again.
Pinellas	General	Way to early to open. Let's see what happens to Georgia
Duval	General	We can't hide from germs. We spread them in grocery stores, & we can't stop buying food. Let the young, healthy return to work. People currently working from home should continue to do so as office buildings are loaded with germs easily avoided by working from home. Let schools, parks, & beaches open without restrictions. It's much healthier to be outside than isolated indoors. A healthy immune system requires spending time outside interacting with others. Crowded offices, subway cars, etc are unhealthy, but being outside in fresh air with friends/family is healthy.
Manatee	Recreation	Drowning deaths in Florida are up 70% when compared to this time last year, according to Water Smart Tots.For children in the state between ages 1 and 4, drowning is the leading cause of death. Annually, enough children to fill three to four preschool classrooms drown before their fifth birthday, according to Florida Health. With the above alarming statistics I advocate that the Task Force look into the opening of swimming pools operated by Park & Recreation agencies. Summertime is one of the largest opportunities for youth to participate in learn to swim programs. Learning to swim is a life saving skill. Swimming is also a lifetime fitness and leisure skill that provides opportunities for those who may be unable to run or do other forms of exercise. Not reopening pools would have a devastating impact on all ages of Floridia residents. I firmly believe swimming pools operated by park & recreation departments or non profits would be able to safely open and maintain the proper social distancing with guidance from the task force. There have been other states (GA & Utah) who have worked into their public health orders the reopening of swimming pools. For example, look at the TRICOUNTY HEALTH DEPARTMENT PUBLIC HEALTH ORDER 2020-02 that is attached. This county in Utah was able to allow the Uintah Recreation District to open their community center in Vernal, UT for lap swimming. This has allowed their community to benefit. The CDC states that UV [sunlight] and chlorine water deactivate the virus. The Governor in his decree lists swimming as an essential activity [but with beaches and pools closed not much options] and Phase 1 of the Presidents plan lists opening sports venues as a priority. Since we have open golf courses, and scores of people walking, jogging, biking all over our state, why keep our residents out of the pools, of course in a very controlled environment.

AMERICAN OVERSIGHT

Charlotte	Professional Services	I'm a lawn care professional going into busy season. I've lost many clients due to they themselves being unemployed. I believe my family and I's financial wellbeing going into the summer months are at risk if the public can't get back to work. Please enforce strict guidelines to help protect public health while also getting our State back open as soon as possible. Thank you.
Duval	General	Mr DeSantis, In the last two weeks, I hav ed had two neighbors with parties that have had over 20 people. One of these neighbors is a leasing officer in my apartment complex. I, myself, work for a company that has allowed an employee to work the past 6 weeks from home, even though I am her superior and can do my duties from home, as well, i was NEVER offered this option. This disparity is puzzling and VERY stressful to my mental health. I suffer from several pre-existing conditions. PLEASE do not open up the state to the public
Palm Beach	General	Do not rush, we need more testing to make sure it is safe for people to resume life as before.
Lake	Professional Services	I am a hair stylist and have been for 25 years I don't want to lose my business or my home
Miami-Dade	Healthcare	We all have to get back to work sooner or later. When is it safe is the big question. I personally think we need to open back up in phases as the President suggested and leave it up to the governors and city officials of each individual States to decide. As far as Florida is concerned, it is to early to open up the beaches here in South Florida. The people down here will not abide by the rules.We still have to many people infected with the Covid 19. There are many people in Miami and Broward county that have not been tested and could possibly be a treat to our community if you open everything up to soon. We can open up some businesses any take precautions but I think opening up clubs and gyms and South Beach is a bad idea for right now. The elderly who are at high risk should stay home. The the people who are healthy and ready to work should go to work and follow the rules.
Volusia	Government	I work in the tourist industry of Daytona Beach. Please re-open the state for business. I work for the Sea Spirit Fishing boat and Manatee River Cruise. As your associate Drew can attest to, we are a small, family owned business dedicated to showing our area to residents and tourists. I NEED MY PAYCHECK! As it stands now, 6 weeks laid off, 6 weeks no employment paid, while every politician in the country is still getting paid, yourself included. Outside of the money, I am bored to tears! You can only read, do puzzles, talk on phone and watch TV for so long and I need a haircut. There are jobs out there and if something doesn't change, I will take a minimum wage position to pay the bills; because we also are still waiting for our unemployment benefits, which we pay into, yet have not received the benefits. All I can say is you asked for our support and you became Governor....where is your support for us?
Okaloosa	General	Mine is more of plea to slowly bring things back on line before the flood gates are opened. Maybe locals first. Also please look into bringing manufacturing into the state. We can not continue to live on tourism. We are loving our state to death with the amount of people visiting here. And moving here. I live in a area that is solely dependent on tourism and those that have can't see beyond their need for more $

AMERICAN OVERSIGHT

Pinellas	Food	Please extend the maximum account for Snap ...with no income it is hard to afford food and food banks are so low and many closed. The snap maximum amount made it possible to eat
Broward	Tourism	Tourism is the most important part of our Economy they help us to pay our bills without tourism is Economic suicide I would like to propose that we allow everyone and anyone that wishes to visit Florida to be able to come Down here without them we would be forced into bankruptcy do we want that no we don't
Collier	Healthcare	I am a dental hygienist. My job is number one at risk of getting the virus. My dentist just wants to open and fill up as many patients as he can in my schedule. We do not even have proper PPE . Moreover, we do not have vaccine for this virus yet. Anyone who is coming to my office and potentially carry the virus. I would like to make PPE as one of the requirement to open dental office. Maximum is 5 patties a day at the beginning. No one is allowed in the waiting area. However, best ideal is postpone non-urgent dental visits for now till we can safely announce general public health is safe for everyone. If one dental hygienist gets the virus , he/she can spread it to all the staff and patients in that office.
Seminole	General	Re-open Florida's economy like your reelection depends on it. It does. Some parts of Florida have been impacted heavily. Ours has not you don't have to open the whole state keep the south closed if you choose to. The original reason for the shut down was to slow the spread of the virus and avoid the hospitals being overrun I believe that has been accomplished it's time to get back to business. Please see video on YouTube by Dr. Erickson out of California discussing COVID-19. Thank you Ron DeSantis for hopefully making Florida great again
Sarasota	General	I think that we should wait until the health officials say it is safe to start to reopen. If we do this too soon we will only suffer a set back. Let's not undo all the good we have done so far. It is difficult and people are suffering however we are owed a better option than just opening up the state again. Folks from the north will still travel down here - at least those with disposable income will. Let's not let corporate greed take over for good sense here.
Escambia	Real Estate	We should have the maximum amount of liberty and freedom under the law with the best guidelines provided for everyone to follow. There's absolutely no reason that parks or beaches should be closed.
Brevard	General	Yes reopen the State!!
Lee	General	It should be gradual and if people abuse the freedom, be able to shut down again. Also, of course, test availability is foremost. Medically trained people should write the guidelines for each type of business, etc and do spot inspections to look for compliance.

AMERICAN OVERSIGHT

Clay	Food	I actually have a couple things. First why have Food Stamp Limits not been waived for raised during this time. Yes we are worked my, however I have 2 teenager athletes who are now home all day long and eat. They are no longer getting their Breakfast and Lunch options at school and know no one has thought that people's grocery bills have doubled. I am working from home and having my kids doing online schooling has caused my electricity bill to increase. These are added expenses to our normal bills that we are still required to pay. Another area of concern is my office building has 900 to 1,000 people when fully staffed. Having that many people in a building so close together is not safe. Employees sit in open cubicles. People never stay home when they are sick as advised because of lack of time. So they bring any and all sickness to the building. About 1/3 of the staff are over 65 or have health concerns. Please do not have employers send the workers back to the office if they are able to continue working from home. I see nothing good coming from people returning to crowded office buildings.
Pinellas	General	I have 2 children in school and have concerns regarding sending children back to school next school year with the risk of exposure for my children and the school faculty/staff/bus drives/etc. Online school is not ideal, but please give thought to how we can best protect our school communities and continue effective learning. I worry that the state will be reopened too soon and that we will regress and see an increase in COVID-19 infections if we aren't careful. I understand that it will be quite sometime before there's a vaccine for this, but our health is important and we must figure out how to SAFETY reopen the state, yet not cause a relapse of infections. SAFETY FIRST, please.
Orange	Professional Services	As much as I would love for our salon to be up and running, serving our wonderful community. I would rather wait to make sure it's as safe as possible for my staff, their families and the clients that to come to get pampered And get their spirits lifted while getting their hair done. I would never want my business to be part of a problem by spreading a very contagious virus. So if that means to stay closed for another few weeks, I choose that rather that putting people's life in danger. However my staff and I are facing some Financial struggles because we have no income coming in to keep up with the necessities of life. So it's is a very hard decision to be made.
Orange	General	If we have a mass surge of people die due to a reopen— it will be all the governments fault for not knowing how to be responsible instead of giving into people who are uneducated I. The subject. You are meant to protect the people, don't let them bully you into people dying.

AMERICAN OVERSIGHT

Lee	General	After 3 weeks of adhering to the "safer at home" order, where have we really gotten? The majority of people this was order was created to protect ignore it daily. The elderly are out at stores at all hours - not just during their special hours offered by so many retailers. This order had jeopardized the financial well-being of the majority of the state's tax payers, without cause. People can not feed their kids, pay their mortgages, make their car payments, pay their debts because of the fear - NOT because of the facts! Numbers have been outrageously exaggerated to sustain the fear in an attempt to control the people. As more TRUE information is revealed, it is actually better to maintain a normal lifestyle so average/healthy people can build up their immune system - not hide from it. It is time to reopen the state - let the people get back to work, let them get back on their feet financially, let them feed their kids. For those who are afraid, they can CHOOSE to stay home. After all, we all live in a free country. We have the right to choose what we do. For me, I am not afraid and my freedom should not end where someone else's fear begins.
Hillsborough	Healthcare	Orthodontics is different than dentistry because 90% of our work does not produce the aerosols that spread the virus. Our patients are in ACTIVE wires that have been neglected for almost 2 months. Without seeing the orthodontist, these ACTIVE wires can and will cause harm/damage to the teeth and periodontium (gums and bones). Please consider allowing us to open early May with the agreement that we will not do the procedures that cause aerosols (again, only 10% of our procedures). Dentistry should be treated the same as elective, outpatient surgical/medical procedures that Trump said can be allowed under Phase 1. Dentistry is an outpatient, medical procedure.
Sarasota	Food	We should open the economy. I am very concerned for my fellow Florida residents. The longer we are closed and the economy isn't rolling, the worse it is for our morale and wallets. A lot of my friends who are minorities have expressed the financial losses they have suffered due to being shut down. Many minorities work in restaurants, hotels, and entertainment. Keeping the economy closed has a substantial impact of the financial and mental well-being of minorities. I suggest we open in May to help these communities. I recommend we open in two or three phases starting May 1st. This will allow everyone to get back into the "rhythm" of going to work and living their normal lives. A lot of business owners and their employees in my area are suffering greatly, and it is time we help them. Thank you Task Force and God bless.
Sarasota	General	Reopen the state now! Personal responsibility for those at risk. They are able to wear protective measures or they have the right to stay at home. You are not legally allowed to compel the citizens of this country to stop working. We will not stand for it. Open the state immediately and encourage people to use common sense safety measures utilizing their freedom to choose whether to go out or not.

AMERICAN OVERSIGHT

Hillsborough	General	Please listen to the healthcare professionals and scientists! It is too early to reopen now. We want our children back in school and we want to go back to living without restrictions sooner rather than later, but if we reopen now, all the experts say that it is too soon. You can have rules in place when you reopen, but people will not follow them and we will see an increase in cases again. I understand that people are hurting. I fear for the children and spouses facing abuse and domestic violence. I fear for the people with no food, money, housing,! We need to find a way to help them emotionally, physically and financially without continuing the spread of this virus. FIX THE UNEMPLOYMENT SITUATION!! Provide more financial aid, KEEP people safe and alive. All the restrictions we have in place now will have been for nothing if we open up too soon. Now is too soon. I really hope you listen to the people and not move forward for financial gains only.
Pinellas	Retail	Own a small home decor/furniture consignment and redesigning store. I qualify for no help because I am sole owner, although my consigners greatly rely on their income. I have no statutory employees. So, to have no income except for the stimulus, is frightening as a single woman. Please open small businesses and trust that we will adhere to all social distancing and cleaning stipulations necessary. If there has been no mass viral breakouts stemming from crowded Home Depots and Publixs', I don't foresee problems with a few clients who shop small stores. Thank you for your reasonable management thus far. Valerie-Renovatio Redesigns-largo, Fl.
Pinellas	Professional Services	Dog grooming must be reopened and essential. It is very detrimental to pet health to not be regularly groomed and bathed. It is not just for aesthetics. Skin problems, ear infections, complications from anal glands and a host of other health problems for pets can be catastrophic. Groomers perform an essential service for the care of pets, which was part of the original order. It is unclear why pet grooming is not essential as a part of taking care of pets. Thank you.
Sarasota	Tourism	I work out on Lido Beach at a condominium complex that does short term rentals and I think we should no open short term rentals until at least June 2at as you are getting travelers from all over that are flying in from all over and that will not help control this deadly virus. I understand we have leveled off a bit and opening too soon will defeat the purpose. We need to take our time so we can make sure this is under control and not spread more as so many have lost their lives.
Orange	Technology	Initially, the state should require everyone to wear masks while inside businesses and provide masks to those in need. This will help reduce transmission of the disease while opening businesses. Restaurants and bars (where it'd be necessary to remove a mask) should remain closed until a later phase. There needs to be a steady state-wide decrease in new cases before people start gathering in public. We need fast and widespread testing, even for those without symptoms, so carriers can remain isolated and stop infection.
Broward	General	I think Florida should stay shut down until May 1, then start opening parks, boat ramps, and retail businesses that are capable of operating with strict social distancing. By May 15, if there is a steady downward trend of cases, continue opening businesses.

AMERICAN OVERSIGHT

Orange	General	When considering reopen please do not allow employees to force people to come back to work because things are reopening. I work for the government and thankfully have the ability to telework in order to stay home with my child whose school aged and out of school for closures. I feel people should be encouraged to stay teleworking as long as they are effective and stay home if they feel safer practicing social distance that way. Thank you
Hernando	General	I, James Dean Brimingham, (a lifelong voting republican) STRONGLY OPPOSE any effort to reopening the state amid the Covid 19 crisis. The leading medical officials has warned that doing so will have reversed all positive gains that have been made and cause needless deaths that could / should have been avoided. Furthermore, it must be stated how deeply troubled I feel by our elected governor's mishandling of this crisis as his decisions have placing short term monitory issues ahead of the long-term health and safety of Floridians.
Broward	General	It has taken China and Italy months to even consider reopening their countries. There is no way basically a month is enough time for us to reopen. Our numbers haven't even started to decrease and even once they start decreasing that's not time to reopen. Until health organizations say it's safe to CONSIDER reopening we shouldn't even THINK about it. Human life needs to come before the economy and if it doesn't nobody in this state government should have their jobs.
Hillsborough	General	Please do not Open Florida until 14 days of steady decline in positive cases and deaths. Our state has had too many Covid 19 deaths consistently.

AMERICAN OVERSIGHT

Palm Beach	Healthcare	Please please please strongly consider the very high risk of putting dental hygienists back to work in this first phase. Please also specifically be aware of the heavier covid areas like here in palm beach county. Please consider the following. According to a recent chart put out by the World Economic Forum assessing the most at risk professions, and Other articles published by Forbes and Business Insider collecting data from the Occupational Information Network prior to Covid-19, Dental hygienists are the number one at risk for contracting the corona virus. Putting us above respiratory therapists, emergency medical, nurses and doctors whom are all on the very front line. Dentists, and dental assistants are also among the top five most at risk. Among the top five are dental hygienists at number one, dentists, dental lab techs and dental assistants. One of the top reasons we are at such a high risk is due to the amount of aerosols produced during our procedures in both the dental and dental hygiene rooms. Aerosols can linger in the air for up to two hours and can reach a distance of at least 3 feet from the patient. As those aerosols remain suspended, we as practitioners are exposed when we remove our PPE and masks for proper PPE protocol. Not only are we exposed within that two hour window, but the next patient is also exposed leaving no time for proper room sanitation. Additionally, most dental offices are rooms without doors, leading to exposure to the outside hallways. As you well know, in Florida, we live among a large elderly population. Many of our patient base is above 65 and many have pre-existing conditions. Even though we do our best to ensure safe and sanitary environments, the reality is that it is never completely aerosol free. Therefore, even to the best of our ability in assuring patients that our office is safe for them, due to the highly communicable prevalence of this virus, we are unable to guarantee their safety. According to an article on infection control by the Centers for Disease Control (CDC) regarding the SARS-Cov-2 causing COVID they quote "The virus has been shown to survive in aerosols for
Pinellas	General	On Monday remove the states Safer at Home Order those who do not have an underlying illness or compromised immune system should still be safe for themselves and shelter at home but everyone else should be allowed to go out and practice social distancing places of religious service and all other business should be allowed to open and follow cdc guidelines Beaches should be open for exercise and also follow cdc guideline Pinellas county commissionars are meeting on tuesday to make a decision on how to go forward and would like to know the governors direction so that they can coordinate with it

AMERICAN OVERSIGHT

Sarasota	General	Encourage restaurants to use outside seating under tents to increase their capacity while maintaining a social distance between tables. State and Local could relax some parking and other regulations to help. State could perhaps help in locating portable A/C blowers designed for outdoor use. I think a good way to help owners get maximum seating and hire back the most employees. I like the beach openings but waist is the point of keeping the parking lot closed and not allowing people to relax on the beach. State and local could easily limit the parking to help control overcrowding. I've only lived for a year now as full time Fl resident and the only time I seen the beaches packed was on Fourth of July. Emphasize personal hygiene and social distances at all new openings And remind those that are sick and or susceptible to COVID to stay at home.
Lee	Healthcare	My boyfriend was in the ICU for four days, had a nine hour surgery, is STILL in the hospital eight days later and we can't see him. There's also a shortage of morphine pumps, so even though it was requested after his surgery to repair his 47 fractures, he couldn't have one because they're being used to ease the pain of those dying from the virus. Why the FUCK would you think it's time to open back up, you money hungry pieces of SHIT.
Seminole	Technology	It would be good if Florida re-open in phases. First restaurants and state parks could be opened following the CDC recommended social distancing guidelines.
Santa Rosa	Government	OPEN FLORIDA! NO RESTRICTIONS! WE WILL NOT COMPLY! Our founding fathers knew there could be pandemics. The Constitution which is the supreme law of our land guarantees our rights regardless of the situation. Our rights mean more now than ever before. Many of us are willing to engage in civil disobedience. And we will.
Orange	Healthcare	Need open up elective surgery and sample screen at risk patients with comorbitity, let others go back to work with precautions, temperature, mask , etc, those at risk at work give hydroxychloiquine

AMERICAN OVERSIGHT

Orange	General	In order for the people and economy to get back to normal people need to be outside and moving and making money. The reason this is so drastic is because you all are not on top of the unemployment . WAYYY to many people are out of a job and are not able to get paid because our unemployment is trash. How do you guys expect our economy to get back to normal if everything is closed.People are not going to want to go out to restaurants, bars, nothing with guidelines.. who would want someone serving them with a mask and gloves on that doesn't help anything, and some people have families of more than 10 so what?.. the other 4 people can't join?.. that is not fair. I understand people need to stay clean and make sure businesses stay clean but, we should have been doing all of those things anyway, so what makes the difference now? Because there's a virus going around thats killing people.. the flu kills people every day and the world doesn't shut down for that.. or what about the swine flu, ebola, those were all viruses that killed thousands of people and everyone acted like it didn't matter so, why is this virus putting our world into a recession? This is never gonna go away.. people are still going to get sick years from now.. so what is the plan? Are we just gonna shut down the country any time someone gets sick and have all the people of America act crazy and act like zombies are walking around. We should make sure our country stays clean, like it should have been anyways but, we should not make the whole world suffer over it. Kids are not able to do anything, parents are at home stuck watching them and can't work.. People are going to need to ea, people are going to need medicine, since people are not making money its going to make people commit crimes like a movie. If you guys don't step up your game and either give people money or open our country back up its only going to get worse. People are losing jobs, you have million dollar companies closed not able to make money and putting even more people out of jobs. Now, this wouldn't be so serious if people could at least get unemployment but they can't even get that and they are still responsible for bills that they have, and they have no job to pay for them, how is that fair? ITS NOT. You (The Government) all still have your jobs and are getting paid, and are not realizing or thinking about how much we are all suffering. People can't socialize, cant make money, cant live normally but, you all can?..People can only go so long without being able to do things, the longer we wait the
Manatee	General	I feel that the State should reopen. Social distancing should still be in place.. Business owners should be smart enough to keep their business safe..People will see that the business is safe and will participate. If the business is not safe they will not have customers. Walmart, Target etc are open why can’t others do the same. Let’s not micro manage this country. People are smart and want to get back to normal. It appears that the people who are getting paid are stopping the rest from getting paid. Time to stop. Time to let the people work it out for themselves.It time to stop worrying about the election.It’s time to get back to normal.

AMERICAN OVERSIGHT

Lake	Food	It makes zero sense to reopen at this point. Ive been in hospitality for 20 years. I love my work and i miss doing my job. But my experience also tells me that we are a major vector for the spread of illness. There is no way to keep us away from bodily fluids. We will carry it on us and bring it home to our families and ultimately our communities. Take out and delivery is working for now. It seems to me that this rush to reopen is more in the interest of the millionaire's and isn't considering those of us who'll actually be doing the work. We're not lazy, we're not looking for hand outs. We deserve to be seen and heard. Many of us are also homecoming our children and that is time consuming and stressful. Please look out for us regular people. Our lives matter and it's time the Florida government takes care of those of us who make the things rich people do possible. Also please look into companies not pay us delivery drivers for mileage and cutting our pay below minimum wage . Companies know we're stuck and we're being taken advantage of. Thank you for your consideration.
Volusia	General	I feel you need to open the beaches parks completely. People need to be able go and sit and read or just get a change of scenery. Start opening up the restaurants too. These owners need to get back to work and start to move on from this shut down. A lot of people haven't gotten their unemployment checks . People need to get back to work . People need to start living again and use common sense. Before this "pandemic" I always cleaned , wiped down and used COMMON sense when it came to Illness . If myself or my family were ill we stayed away from others . You cannot keep the state shutdown it's not good for anyone . I personally will go to restaurants, nail salons etc . If other people feel apprehensive then don't go . I'm ready and I think a lot of people are too !
Leon	General	I am in favor of re-opening the Majority of Florida, except the area of South Fla. That has been hit much harder with the virus. There should be regulations in place such as social distancing and, as needed face mask requirements in venues that people are close in. Restaurants should start out with half capacity, or at least spread out dining seating. With grocery stores, department stores, home shopping stores and many others open all along anyway, it doesn't make sense to leave other businesses out at this point. Thank-you for listening!, Michael Knudson
Pinellas	Recreation	We cannot open until we. have met the Federal guidelines, and then with restrictions

AMERICAN OVERSIGHT

Hillsborough	Government	We should start immediate removal of all COVID-19 related restrictions. Then organize a tribunal overseen by the Florida Supreme Court. The Governor, and all elected or appointed officials who ordered or supported andy shutdown related order should be immediately arrested and held in pre-trial detention for the capital crime of treason on the basis these orders violated the 1st Amendment protections on freedom of assembly. If found guilty of issuing, supporting, or voting for a shutdown order or related restriction, they should be executed by hanging, electrocution, or firing squad and the execution broadcast for the public. All assets of the guilty should be confiscated, and distributed equally to the residents of Florida, including any life insurance proceeds to ensure their families are subject to the poverty they inflicted on the citizens they betrayed, to serve as a deterrent to future oath breaking by public officials. A new state holiday will be declared on the anniversary of the Governors original shutdown order, to be called "Tyrant's Day". On this day the executions will be broadcast again, so we can all celebrate liberty and justice for all and bask in the glory of these scumbags taking bullets, being fried, and dancing on the end of nooses.
Broward	Professional Services	Open hair and nail salons quickly. Make it based on specific rules everyone has to follow but open them. These people can't earn a living and are starving unless they can work.
St. Lucie	General	We need the complete understanding of covid19. People's have traveled outside of this country and thought they had a simple cold and shortly afterward expired. These people's was working people's and attended church and had families.. (if this virus is as we are lead to believe) the worse is yet to come. People's has a mixture that they are taking to mast certain diseases. (fungal infectious, HIV, Aides, and flu like symptoms). My concern is that for those that do not have excess to these none prescribed meds. Most at risk. And this epidemic will continue to grow and be called another name shortly.. and become more powerful do to the multiple growth and mixture of diseases.. (blood work doesn't not reveal signs nor the presence).. we have been giving a warning! Thanks for helping to keeping us safe.
Miami-Dade	Government	It is not time to open the city!! Deaths are still happening daily from Covid and opening out too soon will cause more deaths. I understand people are hurting and the economy is bad but lives can not be replaced, the other stuff can and will come back.
Brevard	General	I feel like all parks and beaches and parking areas should be opened first. Why? Well, it would give families and individuals and all ages the opportunity to be outdoors together. Monitor the numbers for a week to see if there is an increase in virus totals or possibly a decrease. Into the third day, begin plans to add additional business openings on day 8 if everything continues to go well.

AMERICAN OVERSIGHT

Lee	Government	It is time to reopen Florida . Our small business is suffering . Our economy is suffering It's time for the people to be able to be free to make their own decisions . I will not forced to test or wear a mask or be tracked We have civil rights and a CONSTITUTION . We did as e were asked . Enough is enough ! The children need to be able to play sports , play freely . It's best to be outside in fresh air , sun and exercise . Not be stick in a house and on a computer or watching television , playing video games . The patents are stressed , the children are stressed . This virus is less dangerous than the flu . We should never ha e shut down for this
Gadsden	General	Please start immediately to reopen in stages. Unemployment cannot support the state...Andy it is woefully behind anyhow. Restaurants, even chains are going under. Let parks and recreation reopen with guidelines to not be in contact...tennis, pickelball, etc should be viable.to be played safely. Allow playgrounds to open...parents should take responsibility for their own children! Allow retail stores to open with proper safety protocols and restaurants. Allow elective surgeries to restart. The healthcare industry is hurting because of this and where will we be as these go under? Layoffs at a hospital should NOT be happening yet they are because of this. Please give us the chance to be responsible for ourselves and to have the chance to survive! Losing jobs also means losing healthcare so that prevents being able to seek care if needed.
Collier	Professional Services	If we are using gloves and wearing a mask plus spraying Lysol on every surface a client touches I would think we should be able to open up the barbershops. Also work by appointment only and limit the amount of barbers and clients in the shop to keep everybody at a safe distance
Broward	Healthcare	I am a pediatric nurse at free standing pediatric hospital. Covid 19 is very low in our population. We maintain a unit for positive patients as needed but usually empty and so is hospital and health care workers have been furloughed. I strongly encourage to look at this population and please let us start elective surgeries and admissions as soon as possible. The nurses are only working 1-2 shifts per week. Please help us we need to be open to take care of our children and chronic kids that have not been coming in. We need to let them know we are open and safe. Please consider us pediatric hospital in Miami. Thank you
Pasco	General	Florida needs to reopen May 1st and just take precautions and adhere to social distancing. Businesses need to take precautions and accommodations. You will still have plenty of people who will still stay home due to their own personal fears. The elderly folks and assisted living facilities should stay locked down.
Broward	Government	The aactions and plans to open our county is non actions of sanity or empathy. If you think that by kissing up to Clorox man is a ticket to your re election you're out of your mind. You make me sick

AMERICAN OVERSIGHT

St. Johns	Recreation	We own 8 Jacksonville area studios. It's a proven fact that healthier people have a higher resistance to colds and flu and other diseases. As a small business owner, it is imperative to reopen the lifeblood of our economy in Northeast Florida. Our studios represent an important part of getting people healthier during this time and we. Believe with rigorous cleaning and SD guidelines, we can get people back to normal faster and safely.
Duval	Retail	ITS TIME TO OPEN UP THIS STATE!!!! No more of this Bs!!
Pasco	General	I feel that opening back up, gradually with strict guidelines like masks and social distancing, is imperative. Each industry should develop a plan for safe reopening to be reviewed state and adopted as statewide industry minimum standards. Certain high risk people should stay quarantined if they can or be extra diligent when or if they have to go out. This should start asap. Next month wont be any safer. Or the month after that. Until there is a vaccine we wont be safe. But we cant stay closed for a year or more or the economy, food supplies, and ultimately social order would collapse. So, we just have to create a new norm and get on with life.
Broward	General	We should wait till we are able to test anyone with symptoms on same day without long wait. We must have strong measures to prevent imported cases from outside states and tourists. We should ask businesses to allow employees to work from home till end of May. Those jobs that cannot be done from home, should be allowed to come to work starting mid May. This will allow metered opening of the economic activity without undue risk of contagion. Allow Floridians to visit their family members in the state.
Brevard	Healthcare	It is still too soon to start lifting restrictions here in Brevard county.
Flagler	General	Test, test, test. Where are the tests? Until a large percentage of the population has been tested, Florida has no business being open to non-essential businesses and tourism. Keep Floridians safe and stay home. Given our elderly population, we should be one of the last states reopening in the middle of JUNE, not the end of April. Flagler County had their highest day of new positives just the other day. I am afraid that this will not end well if we open too soon.
Palm Beach	Information	Reopening our economy means social exposure that at this time means illness and death for unknown numbers. We can survive and continue to develop strategies and support for our most vulnerable, which over whelmingly include the poor and the elderly, but we should not sacrifice lives being brash and impatient. Take it slow and thoughtfully. We are not ready to reopen. Thank you for reading this. Sue-Rita Goldstein
Escambia	General	O P E N!!! FLORIDA!! Please and thank you 🙏
Collier	Food	My heart goes out to those who have lost their jobs because of the COVID 19. We need to get our state and country back to the roaring economy we had a short few months ago. Safely is the key. Ron Desantis, you're doing a great job so far, keep it up! Open Florida safely as soon as practicable. Forget the nay sayers. They have political reasons for wanting a delay.

AMERICAN OVERSIGHT

Miami-Dade	General	I work in Long term Care and we still have positive COVID patients and employees. Most people in the community are not following orders of 6ft distance or masks when when around others. A lot of people are taking this as a joke. I believe we need to stay closed for now: No beaches No parks No places with more than 10 people at aa time and everyone still ware masks.
Orange	Tourism	Reopening the Disney Area and tourism. In order to prevent a new outbreak keeping the Tourism closed to Florida residents only!!! This could start off as residents only for a few months and then gradually to open. Orlando and florida is a highly desired vacation state and location, please remember that we live here, work here, and pay taxes here. We want everyone safe including visitors please start small for all of our safety. I moved here a year ago and I am within 5 miles of Disney that is why we moved here. Disney is the best example to follow!! They cared enough to close before the state closed please take their lead!!!
Polk	Food	I'm all for opening up.
Pinellas	General	Before we open the state, we need a much more robust testing program in order for our health officials to be able to control flare ups. We also need to be at a point where most of us have the confidence that going out to eat or shopping isn't likely to get us sick. Opening the economy too early just might push us into a full blown depression, not just a recession. Don't blow it.
Pinellas	Healthcare	Please reopen Florida soon. Patients are in need of proper health care and some are dying at home without the proper treatment or medicines.
Broward	Healthcare	Continue social distancing.
Miami-Dade	Professional Services	i own a beauty salon in coral gables, and i think we should reopen salons and retail store under certain conditions. during crisis there is nothing better than feeling that we look good to put the moral up. Now we have to limit how many clients at the same time based on the space. everyone wearing mask, disinfecting stations and combs, shears and brushes between clients ..not reusing the same robes. having hand sanitizer etc...i's possible to do it in a safe way if everyone respect the protocol
Lee	Food	All servers, technicians, chefs, salespeople, cashiers and patrons wear masks at all times in establishments.. All credit card transactions- no signature needed. Nail salons. All customers wash hands when enter.. Staions and chairs 6 feet apart. plexiglass barriers between technician and client. Hands washed between each manicure and pedicure. Clients bring own polish. Chairs sanitized after each client. Hair salons: masks, chairs 6 feet apart. Gloves fresh with each client, no back and forth with same gloves. Floor swept after each client. All scissors, combs, brushes sanitized after each client. Chairs sanitized after each client Restaurants: all staff and patrons wearing masks. Tables and chairs at least 6 feet apart. Bar patrons 6 feet apart. All chairs and tables sanitized after each patron. Fresh gloves on each waiter delivering food. No shared salt, pepper, ketchup, mustard, sugar, etc.

AMERICAN OVERSIGHT

Lee	General	To date, the task force's executive committee does not have ANY doctors & the only public health expert is a hospital executive who was not involved in the initial meeting. There remains an ongoing concern about FL contracting a second wave of COVID-19 w/ insufficient testing.
Bay	General	We should reopen as soon as safely possible. We can be safe and keep our awareness up. Social distancing and common sense guidelines would he fine. Our seasonal economy has been wrecked. People who have been furloughed and people who outright lost jobs are still seeking financial help from unemployment. We are looking for whatever work we can but we are thousands of dollars behind in rent, loans, and bills. It might be months before we ever receive it. We are stifling the economy so people can feel safe about other people. We need to worry about ourselves first.
Miami-Dade	Professional Services	Please, open slowly. Any opening needs to be allowed under strict guidelines of social distancing and people wearing mask, as a minimum. Otherwise, authorities should close back beaches (Jacksonville), parks, restaurants, events, any places where people might get together without any regard to current situation. Be careful specially with South Florida. If people do not follow common sense behavior, be ready for a second wave. Do not open yet MIA, nor any South Florida airport, nor any airport in Florida to overseas flights; and if possible, none from the North East, and any other nation's hot spots. No cruise ships yet, keep they docked. Better wait until at least mid May, three more weeks, to see how the curve behave. Regarding unemployment insurance, advertise the progress being made; no one may expect a miracle or a magic nor a quick resolution to such a burden to the system; and opportunistic politicians should refrain from cheap shots meaning this is a time to work all together and not trying to confuse the population (constituents).
Palm Beach	General	I am providing my input about re-opening the state. I would like to see public spaces such as state, county and city parks opened back up as well as beaches and all boat ramps for everyone. I believe beaches should be open to use a each individual sees fit, whether that is sitting on the beach, walking, runnings, surfing, fishing or any other activity. Being able to enjoy the outdoors is essential to staying healthy. If there are people that think it is dangerous or is not good for them, then they can choose to stay home. I would like to see restaurants opened for dining in. I realize it may be decided that tables need to be further away from each other, but at least open them so that some people without a job can get back to work and so that we can enjoy a night out. I think that while there are certainly people that were impacted by the virus, that it was over blown and reported in a way as to instill irrational fear in people. Please get businesses back open and let each of us decide for ourselves if we want to utilize their services.

AMERICAN OVERSIGHT

Lee	Government	Good evening. I disagree with re- opening our economy at this time. I understand people need to work as do I (I've been furloughed too). However, I don't think people will listen to the social distancing rules as one u re-open our state, people will think all is ok and it will go back to how it was before this mess. I went to Publix today and I was surprised to see people without masks or gloves. This is very dangerous. I think another 2 or 4 weeks would be better and will keep our state safer.
Miami-Dade	Recreation	People jogging should wear face masks. When we run, we breath heavy and droplets exit our mouth with more force and thus can travel longer distances.
Pinellas	General	I am really concerned and against that our state is even considering opening up beginning this coming week. Our state has not shown a decline in cases yet, in fact has not even plateaued yet. My understanding is that the recommendation is 14 consecutive days without an increase in cases before beginning phase one. Looking at the graph on the Florida Health website we have only had 2 consecutive days of lower in new cases, none from lowering overall cases. I know there is concern over the economy but that is not as important as the health and lives of the people. If more people get sick and die that in itself will effect the economy as well. Loss of income can be regained for most but loss of life can not! I have been quarentining since mid March and looking forward to this being over however I do not want a rush to back to an open state which medical/science professionals have said is likely to lead us back to where we were and a great chance it would be worse. Closing the state up a second time I believe would be more difficult to get the community behind especially for those who are only thinking of how it effects them and not others.. We should learn from history and how the Spanish flu surged after safety measures were relaxed too soon. Thank you for helping to keep us healthy and alive
Hillsborough	General	It is time to open Florida. I believe The White House plan would work for Florida and we need to reopen now. It is bad for small businesses and the morale of people to continue the shutdown. The individuals including those in long term care facilities who are in the at risk categories should continue self quarantine measures.
Miami-Dade	General	Greetings, I seriously feel we can NOT continue hurting and setting back all the small businesses,, these businesses are the financial backbone to every community. I understand state/local governments have a responsibility to educate residents however EVERYONE has a responsibility to make sure moving forward they do their part (social distance/option mask/gloves). Seniors and those with medical conditions should stay home, remember there are those residents that will NOT comply no matter what we do. Open the economy and let residents make their own decision, local hospital are at less than 40 percent capacity, more people die of the flu, car accidents, smoking cigarettes and even drown in a pool and the economy doesn't get shut down .. The fear can NOT be bigger than the problem !!

AMERICAN OVERSIGHT

Miami-Dade	General	The State of Florida should seriously consider the advice of medical professionals as it relates to COVID-19. As the State considers when to start opening up businesses, the amount of people that are infected needs to be taken into consideration as well as the amount of people that may be infected and asymptomatic, but have not been tested. As steps are taken to ensure people are safe, some businesses may be more prone to the spread of it, e.g., nail salons, hair dressers, gyms, etc. Businesses need to take this very seriously and the State should ensure that a level of enforcement is there in order to ensure that the spread of this disease continues to be curbed and is not ignored.
Miami-Dade	Administrative	The Miami-Dade task force developed a safe plan for opening golf courses and the mayor seemed to support it. When will the courses open?
Broward	Healthcare	Governor DeSantis Please do not reopen Florida too soon. Your time table is too soon and a month or so of isolation and decrease in the economy will have been for naught. We will be back where we started and maybe worse. because cases and deaths from the virus are still rising. This is a nasty, terrible virus and it has been proven the only way to contain and get rid of it is keeping places closed,, real social distancing and testing so we know where we are. As it is the virus is needlessly spreading because some people don't follow the rules. Imagine what will happen if The state is opened too early. Please listen to Dr Fauci and other really knowledgeable healthcare people and follow their guidelines. Haven't we had enough death in Florida from this virus and some of them were healthy individuals in their teens, 20's and 30's. Please be non partisan here and care about your constituents by not opening Florida too early. Thank you in advance for saving the people of Florida by waiting.
Seminole	Healthcare	Please open the state, this has gone on too long and our economy needs to open. Staying on lockdown will not make it go away. We have to work our children need some normalcy again. There will be an increase in abuse, child abuse, sexual abuse, hunger loss of homes, cars and businesses. We need to open.
Orange	Transportation	Don't open. No abran
Broward	Education	As an aspiring teacher for the 2020-2021 school year, I think schools should open in August so we can teach our students the correct way. We can hire more teachers for smaller class sizes. We can check the temperature of each employee and student in the morning. Lunch can be eaten in the classroom to avoid big crowds. Outside play can be spaced out by class. Teachers and parents can wear a mask during drop off and pick up. Teachers and students can wear a mask all day if recommended by medical professionals. I want to make a difference in students lives and the best way I can do that is in the classroom. Now if medical officials say the above scenario is not safe then virtual learning should continue. All American lives comes first Thank you!

AMERICAN OVERSIGHT

Duval	General	Florida is not ready to reopen. SD should still be a way of life. The curve has not been flattened enough. I know businesses are floundering, but life is more important. This is so political right now, but Covid 19 has no boundaries. Please do not continue to make this platform political.
Lee	General	I don't think Florida should reopen soon. People have shown they cannot and do not use common sense. My mother works for a chain of retirement communities and there are times of residents and employees are asymptomatic and testing positive. Only last week we they even able to be tested. I work in county government. Our clients first concern is not health or heygiene. We were being exposed to people who had been exposed before the social distancing guidelines came out. People are concerned only with themselves and display this with their protests.
Hillsborough	Technology	First of all, thanks for the steps you have taken to keep Florida safe. Although I think that it is still too early to open the state, I know that it is something unspeakable and sooner or later it will be done. it must be a very well thought-out measure, and it must be done gradually. despite the fact that cases of COVID 19 are increasing. if the state opens, social distancing measures, meeting in places with less than 10 people must continue for at least a time 3 - 4 months , to avoid crowds and possible contagion, since not everyone will follow the normal ones at the foot of the lyrics. (applicable for all businesses, offices, banks, factories, etc.) The use of mouth covers must be mandatory in places such as supermarkets, pharmacies (today there are many people who do not seem to care about the use of mouth cover up because I have seen a lot of people without using it in publix, home depot etc...) small businesses, stores could open perhaps with a special schedule so that they can create jobs again and the economy would start to move slowly but surely (businesses should not open at the same time, this should be gradually to study if the infected increase or decrease) Finally, I ask that you prioritize the health of all your families, and of our families, health and life must prevail over the economy. Be sensible and make the best decisions. Thank you
Hillsborough	General	The only way to know whether reopening is safe is through adequate testing. Without that data, we're only making half-educated guesses about how safe it would be. The economy needs more certainty than that, and the well-being of every Florida citizen - regardless of political stripe - demands no less than comprehensive testing of every citizen. Our current testing capacity and access to it is a million miles away from being close enough.
Okaloosa	General	I am in favor of opening up our businesses in FL. Folks need to get back to work. It would be nice if we could slow down the influx of tourists, though - at least those from COVID 19 hot spot states. I think beaches should be open to only locals until June. Thank you for the opportunity to give my opinion !
Escambia	General	Open Florida please and thank you!

AMERICAN OVERSIGHT

Hillsborough	Agriculture	Please take things slowly. I pray you use common sense when trying to turn things back to normal. What's a few more weeks if it saves lives. Also we need more testing whether they have symptoms or not. We have to know where this state stands with who has the virus and who doesn't. Thank you, ELanda Bates
Pasco	General	Committee members, The priority is to keep Floridians safe. I know there is pressure with the economy, but until people believe they can reenter businesses, jobs and communities safely we are not going to have a successful restart. Let's listen first to the medical experts! Let's move slowly and with each successful day/week/month we can accelerate based on evidence that we are safe. Thanks, Dave Seriously, I could not send because of high traffic. This does not happen to me in everyday internet life! It should not happen here! Not impressed!
Pasco	Recreation	I do not believe Florida should be open for recreational purposes such as the beach and bars as it will be impossible to enforce social distancing and could reignite the virus Friday was the highest Spike we had so far and I think it needs to be at least 2 weeks on the downward spiral before even thinking of opening up
Brevard	General	I am very concerned about opening things back up. I don't feel that the brevets county folks have taken this serious or understand all the unknowns. I understand school is out for the year but what about the touch screens that parents use to sign in each day? What about parents walking kids to classes and visiting at lunch? How are we going to protect the office staff, teachers and students? What about buses? lunch room tables? This is not as simple as let's just go back to work. We have to have restrictions and precautions in place. What will those be? You can't even buy Lysol or wipes in the store and you want to open back up? What about PPE for workers that deal with the public? CDC has recommended masks and still a lot of people are NOT using them. How are we going to protect our citizens?
Brevard	Education	Numbers are low in Brevard county. Stores need to open, along with restaurants, using social distancing. People who are at risk or afraid should wear masks. Those who don't want to go out, shouldn't. I work for the school system, and agree with staying closed this year. Many of our students live with older grandparents, and are big carriers of everything. My concern is that many cases of abuse are happening and we don't know about them. We need our state to open up quickly. Many are out of work, and having difficulty getting the unemployment system to work. People are hungry, lonely and depressed. That in itself is a recipe for disaster. Beaches and parks need to open as well. People need to get out in the fresh air, socialize and enjoy the sunshine, being careful in the process. More people die of the flu every year, than this covid-19. Be careful, be safe, be free!

AMERICAN OVERSIGHT

Broward	General	I am against opening Florida Until end of May too many cases in south Florida and until we have more testing statewide we don't know how many people are asymptotic I don't want to have to quarantine again at a later date Thank you
Miami-Dade	General	The decision when and how to reopen public areas and the economy is a difficult one, and I'm not comfortable with widespread opening because I know how good I've been, but I don't have any information about the person next to me. I think that any public place should require a temperature check before being allowed entry. If it's within the normal limit, they can be allowed in. If it's above the normal limit, they should be denied entry and forced to take a test. This includes ANYONE entering the establishment: employees, contract workers AND customers/guests. This may not be realistic for some places such as parks, etc. so for those areas there should be strict rules and anyone not adhering to these rules should be subject to community service in a COVID unit, at a COVID testing facility, etc. I'm sure these locations could some extra hands.
Orange	General	The financial impact of the coronavirus pandemic is devastating. I'm fortunate enough to be able to work from home, but my husband has been furloughed. Even in light of those facts we feel strongly that you should make the decisions about reopening the state based on the science. The federal government provided a list of criteria our state should satisfy before we move through the phases of reopening. Florida has not met those criteria yet. In my family, we want to see the state reopened, but only when it's safe for us to do so. We've been staying at home to help slow the spread. We've sacrificed a lot over the last month. Please don't reopen too soon and make all our sacrifices for nothing.
Palm Beach	General	Open up all business, making the business owner and the customers responsible for their own behavior as far as their health goes. Definitely open up beaches and golf courses and parks as soon as possible. People with underlying health issues that make them more prone to getting the virus should honker town as long as they have to. The business owner and the Public will figure a safe way to do it. We don't need government holding our hand, just need correct and accurate advice from government.
Lee	Information	I am assuming we will receive notification as to when my husband and I (we are seniors) can take the antibody test, so we know where we stand healthwise. If my assumption is wrong, when and how will we find out? Thank you for this opportunity.

AMERICAN OVERSIGHT

Duval	Professional Services	Hello, our Florida barber and cosmetology laws are very restrictive when it concerns the ability to do mobile services. Given the recent epidemic I believe it would be in the best interest of the public and the staff of our barbershop if we were allowed to perform services at clients homes. I have always struggled to understand why food trucks have been allowed to do so but our industry is almost entirely banned from performing mobile services except under very strict circumstances. Food trucks are a great risk to public safety then barbers and cosmetologists in my opinion. Please change the law and allow licensed barbers and stylists to perform services at client's homes. Thank you very much.
Brevard	Education	Need to open schools for the new school year. Children need classroom education with their teachers and peers. It will also help the children's mental and social health.
Volusia	Recreation	I would like to see Volusia County beaches open for Seniors to sit Using social distancing Open for sun bathing and sitting watching the ocean and just relax with no restrictions on hours. Thank you
Volusia	Healthcare	Surgeries need to start immediately. Not all surgeries Florida and the Feds are calling elective are truly elective. I have aggressive cancer and my surgery was scheduled for Monday. This was not elective but life saving and it was postponed. These types of surgeries need to begin not just for me, but all the people who are in the same situation as I am. I hope the misguided decision not to perform life saving surgeries did not cause someone to die. Probably would blame the coronavirus not mismanagement.
Palm Beach	General	i would like community pools and beaches open. i have never been 20 feet from someone else at the beach in general. same with pools, people respects personal space in these areas in general. also parks where people can walk. JD for example where you are not near people anyway. Then maybe open up outside seating restaurants only with tables 6 feet apart? and limit total number of people to 50? movies theaters with people sitting 6 feet apart , same total of 50. etc
Sarasota	General	I think it is too soon to open!!! Also we really still do not want tourist here just yet either.. I understand the economy needs help but the economy we will rebuild. Especially in Florida with all the tourists that will definitely be back. If we open too soon it will be a death sentence. We can always make the economy better but you cannot raise the dead. It's bad enough now with people out and about thinking target is essential when it is not.I am scared to go to the grocery store. But I have no choice when I do so. Please think of peoples lives.

AMERICAN OVERSIGHT

Palm Beach	General	We shouldn't make the mistake of opening up to ealry then will have to suffer even longer. How can we even trust you to open the economy if you guys cant even properly handle paying people unemployment? Workout promlems first before you talk about being reckless and opening the economy to esly. We had every opportunity to sqush this ealry and did nothing. Im a bartender so i am definitely panicking and want thing to go back to normal ASAP. Im missing my birthday do to this. We can't afford to do this wrong and up to quickly. We need to test all workers not with just temperature checks. Testing and countoius testing we need those instant test kits to be available before opening up everything. Everyone coming into the state needs to be tested. You have to do it right most people are against you guys rushing to open the government my suggestion to you test test test and more test. Also fix current problems first. Pay us Unemployment we need it. I would also suggest you be more cautious with us front line works extended are benefits we need more then $275 a week thats pathetic. Because you cant just send us back to early risk are safety because fixing later is harder then fixing it now prevented in this stage is way more important now. Business will come back slow. Also look at models of other countries that are successful in handling covid19 don't be afraid to admit when wrong and take advice. The is reasons other countries aren't opening up now and rushing it because it could back and be much worse because we rushed it
Brevard	General	I want to applaud you for the awesome job you have done for the people of Florida. We breathed a sigh of relief when you beat Gillum, he would have been a horrible governor. Thanks for your commitment to our state. We pray for you daily. As for opening the state, I believe all those at risk should continue to isolate, however, our state and country should go back to work. The media will find fault with whatever happens as they always do when it comes to Republicans. I believe God picked you to lead us at this point in time, knowing you have the wisdom and faith to do the right thing. May God continue to Bless you!
Volusia	General	I feel that it is too early to open our great state. Confirmed cases are still going up and there is a lack of testing people are still afraid to venture out how do you social distancing for stores and beaches? We need to stay closed at least two more weeks until a master plan is developed and presented to the public. The health of our residents should always be first before anything else. I for one will not visit any restaurant or gatherings till at least for two weeks. I also feel social distancing should be enforced better to stop the spread of the virus. Opening the beaches were a joke when they are just loaded with people. Thank you mr governer and I truly hope you do the right thing and not bow to outside pressure or that of big business. Thank you again. Donald Watts

AMERICAN OVERSIGHT

Palm Beach	Recreation	I think we should start May 1 to open the public parks, private and public golf courses, public and private tennis courts. We all need more outdoor activities and all of those can be run safely. Since the children are not going back to school they desperately need to be able to go to the parks. Social distancing in those outdoor spaces are much better then them playing in the street where there is no oversight. both tennis and golf have PGA and USTA Covid guidelines that keep them safe. The beaches could be opened as long as you have the life guards and park employees monitoring those areas. Also some smaller businesses can be run very safely since few people frequent them at one time. We all need to work towards getting back to what we do. Especially since no one seems to be getting their re-employment payments from the state and many are not able to buy food, pay rent and survive this crisis.
St. Johns	Recreation	I would like to see beaches re-open 24/7 for all recreation and for sitting or lying down by oneself. By increasing the hours available, it should decrease the concentration of people. Walking after dark also seems viable. Thank you.
Duval	Healthcare	Ready to open up florida. As a mental health therapist, clients need to be in a room with a therapist. Virtual is okay but isn't like human contact. Let's open up now.
Brevard	General	Small businesses can put in place strict Protocols that make our businesses safer then the larger corporations. We need to be trusted to care for our customers in a safe manner. Many of us will lose our businesses if you do not open the state. How is this fair to us! We have an intimate relationship with our customers and the most important thing normally to us is keeping our customers safe! How is it safe for people to walk into Grocery stores etc where 100's of people go but not safe to walk into a business who can cater to an individual client at a time. I have sent my protocols to the Governor and written on behalf of my business many times with no response. My business supports 8 families none of which have received any financial help. Keeping people safe is good and can be done without destroying our economy and destroying peoples lives, hopes and dreams. Please Let Us Go Back To Work
Palm Beach	General	Have you forgotten how FAST this disease spread the first time? 1,600 cases March 12 to 609,000 cases April 14 (in one month)! We now have 933,000 cases How many will that be in one month? We have only social distancing as a prevention and by reopening without a cure / vaccine / or PROPER TESTING AND A PLAN is idiotic and puts everyone at serious risk. Although the economy is hurting, we cannot allow so many unnecessary deaths to happen because we want normalcy. Please use caution and wait for the right time. This is not it.
Orange	Professional Services	I believe that opening up hair & nail salons would be possible while maintaining social distancing by opening up every other chair. It's important for these types of businesses to be open, not only for the people who work there to be able to get back to work but also for people to be able to patron those businesses and try to feel better about ourselves and things that are going on because we've been staying home for so long now.

AMERICAN OVERSIGHT

Seminole	General	Please make wearing a face covering mandatory if people are out in a public space. I know the mask doesn't protect me but protects the others but why would anyone go into a Publix supermarket without a face covering on? those people are putting themselves and their families at risk by working for us. The least we can do is wear a face covering. And as a shopper, I want to be in as safe a place as possible. Face coverings in public areas need to be mandatory for the foreseeable future!
Miami-Dade	General	My recommendation for opening would be that if you want to open parks for example, then the week before, all employees who work in the park industry would get tested with the antibody test; and you can test each industry before opening. This way everyone can get tested and you would be able to get better data on how this virus has spread with people not showing symptoms. We can receive a card that can show status and present to boss or owners. Schools should not open till next school year. All first responders and all industry that have currently been open should also be tested. Social distance and wearing mask in large gathering should continue to apply until a permanent solution is found . Thank you for this opportunity.
Pinellas	Retail	Let me start off by saying we all appreciate all of the hard work and concern our government has for the people they serve. I understand the people in then entire state of Florida are upset-stressed due to fear, uncertainty, and most importantly the financial pressures we are all feeling. I truly believe we have come this far and I feel like we have been VERY successful containing the illness/deaths in Florida (in the beginning I thought we would be hit hard) we need to continue this stay at home effort at a minimum of 2 more weeks! We can all at least do this for our safety and the effort to safe more lives , continue the good work Kim
Clay	General	I don't believe the poll! Everyone I know agrees thst our state needs to be opened up now!
Lee	Education	I think we should listen to scientists and public health officials who are not politically motivated about when to reopen the state. We have an elderly population. Opening the beaches is not a good idea. We should in no way follow Georgia's example or listen to the daily ramblings of Mr Trump. He doesn't respect the leaders of the scientific community and goes off on dangerous tangents. Even in August and September we need to be careful about schools. Children have died, and they also carry Covid-19 to teachers, bus drivers, principals and support staff and then home to grandparents. We need to think about people and support people instead of corporate greed. More needs to be done for those unemployed and the essential workers need to be paid well and they their families should get money if they die. They are not disposable. We will all be watching how this is handled when we go to vote. People before corporate greed. CEO's should not be getting bonuses right now. That money should be going to employees. This is a time for citizens to come together, be safe and care for one another. It's time for the state of Florida to take care of its people the way its people have cared for its state.

AMERICAN OVERSIGHT

Duval	Administrative	It is terrible mistake to shut down an economy for any type of virus. You can Implement PP and social distancing Karma filtering systems in buildings, and testing instead of taking away everyone's rights even to go to a park which is dumb. SchoolSpeak app open so cases can be monitored and partitions installed if that is necessary between students. This can never happen again
Wakulla	General	Keep the businesses closed at least another month or two.
Palm Beach	Recreation	Please open up golf courses, parks and beaches. We can stay a safe distance from each other and cover our faces.
Collier	General	PLEASE do not open before we meet the criteria for Phase 1 given by Federal medical experts. We are not there yet, 74% of Floridians don't want to reopen until medical experts think it is safe. To get 74% of our state to agree on anything, is a miracle, and should be listened to by businesses. You're risking our lives and very possibly losing all the good we have gotten from staying safe so far. You will be rightly blamed for unnecessary deaths if you don't follow the advice of the medical experts.
Broward	General	I would like for phase 1 to begin in May 1. I believe the opening of parks, beaches, golf courses and boat ramps could be done safely and would provide a valuable outlet for people to look forward to during this time.
Orange	Government	Open the State up NOW! Why is this even up for debate? Our Constitution is clear, there are NO accomodations for the [cough] [cough] open beach PARKING NOW! THE BEACHES ARE NOT OPEN!

AMERICAN OVERSIGHT

Brevard	Government	I understand how difficult it is right now for our citizens financially due to the COVID-19 pandemic. We have now, unfortunately entered the Coronavirus Era. Our world has had to close attractions, restaurants, forms of travel, schools, malls, and the majority of other small businesses to protect ourselves from this highly fatal virus. This has erased economic opportunity across all continents. Workers and business owners alike provide an invaluable part of the synergy that created circular streams of revenue throughout neighborhoods, towns, cities, counties, and states. Those streams of revenue have now dried up like a desert. Our government stepped in and attempted to provide protection and relief, however, for reasons unknown (which is a travesty, as the American people have a right to know what is going on in OUR government) that relief has not reached many of those that truly need it. Many displaced workers and business owners are financially suffering and need immediate relief, which they cannot receive. They are still receiving invoices for electricity, internet, car payments, etc. This is unacceptable. The unemployment benefits are a joke and Rick Scott should be ashamed of himself for the disgusting view he has toward displaced workers. Without workers to purchase from businesses, there is no circular stream of revenue. Providing financial relief to businesses only creates a one-sided financial scale which will simply turn the economy upside down. Businesses will not have sales if the workers cannot afford to buy products. The virus has not slowed down, in fact, it is mimicking the Spanish flu (1918). I will attach some information from the same reaction from businesses and citizens from the first wave of the Spanish Flu who reacted the same way, sick of being cooped up, loss of income, etc. -refusing social distancing and/or not wearing face masks. This created the second wave which killed many more citizens. This is a grave mistake to even think about reopening anything this soon. I would focus on how to provide financial relief to the citizens during this time, and getting that in order before even thinking of re-opening the state.
Polk	General	In my opinion, this survey was very difficult to find. Therefore, the information you will receive doesn't represent as many people as it could have with an easy access button on your home page. I do not feel that Florida should reopen at this time as the statistical data released by John Hopkins shows the virus is still on the rise within our state.

AMERICAN OVERSIGHT

Franklin	Education	Florida should begin its opening with elective health procedures and appointments. Medical providers know how to properly sanitize. Maybe excepting dental hygiene and other non-emergency dental procedures since it is very difficult to properly protect against spreading droplets during those procedures. Then move to retail businesses that can control the number of shoppers allowed in at one time. Encourage delivery and contactless pickup whenever possible. Restaurants next, with no parties larger than 6 and reduce number of tables.. Personal services such as hair & nail salons should wait a while and should have strict sanititation and PPE requirements when they do open. Vacation rentals should remain closed until we have reached an appropriate testing benchmark. To prevent the transfer of virus, visitors from areas of known infection should be excluded. Beaches should open with restrictions to prevent loitering. We need to reopen the the tourism industry but we don't need a massive influx of visitors all at once. Some means should be designed to start very slowly with a slow ramping up of out of state visitors. Testing should be ramped up vigorously. Persons unable to work sjould receive financial help and struggling small businesses should receive loans or grants. Please do not rush the reopening. It will cost more in the long run if businesses have to close and reopen more than once.
Duval	General	I'm a small business owner in Jacksonville, my wife is a day care worker and is around a lot of people daily. I have no fears of reopening Florida and see it as a MUST for our mental health and our economy. Let's lead the nation in a common sense reopening of our state!
Lee	General	No one wants to get sick with cova. We need to reopen so no one loose they homes or family. Force wearing mask and social distancing. Re open please
Manatee	Manufacturing	Open the State, with reasonable guidelines.

AMERICAN OVERSIGHT

Miami-Dade	Healthcare	As a healthcare worker I plead our community to remain close. It is tough as essential workers to decide that those who are unessential workers that require their steady incomes to support their families to stay home. However our general population does not follow distancing guidelines and are unable to properly minimize any potential exposure even with the rules in place. If we go and resume all operations with the hope that the community will follow the rules then we will see the wave of infection and death skyrocket to a level where our hospitals will be so inundated and our poor exhausted medical team will not be able to effectively keep up as it is. The one thing that will surely happen is that once the request to stay home is placed in effect again, the community will not follow those rules which will cause our law enforcement to be at greater vulnerability as they attempt to enforce once again these rules. We see it on the news, on social media and through out the world how the conversations are guided through economy versus life and how our population doubts science and continues to be fueled by hate. How come the medical providers who are actually on the floors seeing what the virus does to a human and how we become a shell of a person in a comatose state with a ventilator supporting us are not the ones being asked to speak up if our state should re-open. We need the ones in the front lines to share their voice, not the administrators and not the ones who do not directly see this. If you want to think about the economy then what economy will you have if you have no one alive to thrive to mobilize it back to normal. We are making a huge mistake thinking to be pro-economy versus pro-life, we all know it is scary because we have never experienced this in our lives. This is almost as we had to approach it is bio-terrorism, don't put our state at such a vulnerable level where we are allowing the "weak" to be killed; the weak is a whole generation and that generation deserves life just like a newborn. We wipe them out but that generation includes MANY of our political figures; it is easier to judge from the comfort of our own home when we don't have to worry about paying the bills because we have enough to support us for a year perhaps. But I don't; I barely have enough to survive for a month and as it is I beg and implore our state to do what is right for the people, which is stay home and wait this out. All around you hear people shout that this is "fake news" and that this isn't real and that the science is not real, and yet our political figures fuel this and
Miami-Dade	General	Open gyms, corona can't stop the gains bro lol
Orange	General	KEEP YOUTH GYMS CLOSED (gymnastics/cheer) have slipped under the radar (Gymnastics/Cheer) gyms - hundreds statewide are set to open as soon as GYMS are given the greenlight to open. PROTECT the PARENTS
Brevard	Recreation	Please open the state parks for overnight camping. Social distancing at these facilities are much better than many apartments or urban areas. Thanks.
Broward	Information	Governor Desantis, We were told two weeks. Its well past that and there still seems to be no plan in place. I understand its hard to plan for uncertainty, however, it is time to let businesses re open. Many are barely going to survive this as it is and with every passing day, it is more unlikely. Opening up does not mean people are going to die. We are all most likely going to contract this at some point regardless of how long it stays shut down. The cure is much worse than the disease already. Prolonging this shutdown will only make things much worse. People need to get back to their lives and provide for their families.

AMERICAN OVERSIGHT

Orange	Tourism	Hon. Gov. DeSantis, We are closely following your Task Force meetings assigned with reopening the Florida economy. Despite not having a vacation rental industry representative on the Task Force, we would like to respectfully ask that the vacation rental industry be allowed to reopen in May and resume operations in a limited capacity at the very minimum. We are a $31 billion dollar contributor annually to the hospitality economy throughout Florida. Prior to the Covid-19 pandemic our industry was creating 312 jobs per day. Today many of our industry employees are unemployed. We need to get back to work. Vacation rentals have implemented enhanced procedures to clean and sterilize homes using the most advanced techniques following CDC and EPA recommendations. Small businesses like those in the vacation rental industry have suffered enormously over the last 30 days and need to get back to work. Many have applied for CARES Act funding and still have not received approvals for funding and maybe never will. Many small businesses have been shut out of this program. We respectfully ask for you to reopen vacation rentals and allow Floridians the chance to get back to serving guests in the state's premier industry. Sincerely, Rafael Graciano Baldez Neves Property Care & Vendor Management P: 1 321-430-6073 A: 330 Exchange Drive - Unit 10 Orlando, FL 32809 W: www.glasstonegroup.com
Miami-Dade	Education	NO!!!! Lives are more important than money Dead you do not spend
Polk	General	I thinks it's time to reopen the state. Common sense says the longer we stay closed, the longer it takes the state to recover. When stores like Lowe's and Hone Depot can be open, but a non-essential has to stay closed is ridiculous.
Broward	General	Please don't reopen Florida until the medical experts say that it is safe to do so!!
Orange	Healthcare	As a member of the working healthcare community, the possibility of the state reopening its many shops, restaurants and other establishments is a frightening prospect. I worry about the consequences that may occur and affect our young citizens as well as more of our middle aged citizens as they are more likely to want to resume their normal activities. I am sensitive to the fact that our local establishments which allow thousands of our citizens to feed their families and provide shelter are closed....causing surmountable stress and anxiety. For this reason, I am not totally against re-opening. I only ask for simple measures to be implemented, at a minimum, to assist in protecting the public.
Pasco	General	Do not reopen any aspect of Florida for at least another month.

AMERICAN OVERSIGHT

Osceola	Food	Before opening the economy we need assurances we are safe, we need way more testing. So far we have only tested a small percentage of the state population. We need oversight to isolate, contact trace and monitor the infected. I am more worried about opening too soon and having a rebound of new infections and deaths. It is way too soon to open restaurants, gyms, theaters, and hair salons.
Hendry	General	Please do not begin reopening yet. We are not at a place where enough testing, ppe, and general compliance from individuals warrants the start of reopening. Numbers will vastly begin to increase if we are not continuing to follow the safer at home rules we are under. We've already seen a large increase in our county in the last few weeks, and if rules are lifted, it will only continue to increase. Please give it at least another few weeks to slow the spread more and give our healthcare workers a break before we begin allowing even more non-essential things to open. Movie theaters have never been "essential." It's a luxury at any time, and since we have been watching more tv and streaming than any of us probably ever wanted to, movie theaters are the last thing we need right now. I know the economy and people losing jobs is a serious concern, but a few more weeks will not destroy everything, and the preservation of lives is always more important than money.
Escambia	General	We need to follow the guidelines set by doctors which state that we need to see a 14 day decline in covid cases before we attempt to cautiously open the state.
Lake	General	Reopen
Seminole	General	Let us decide. Open fully up. We didn't elect rulers, kings and queens. Let the frail, elderly, skittish and most at-risk self-quarantine. If a business wants to open, fine. If a business doesn't open, that's fine, too. Let the people decide where to go and what to do.
Volusia	General	I am not wanting to open the economy. I believe it is to risky and way to soon. I have watched as our county has gone up steadily. People are not respecting the 6 foot spacing not properly cleaning. I want to be 100%sure before we rush back to the old way of life. I am to scared and will not go to a gym or hair salon. Please take into consideration those of us who are chronic I'll and struggle with our own health conditions.
Escambia	General	I worry that opening Florida too soon will only increase the # of people infected. Our numbers of those testing positive goes up every day and we don't test that many. I don't plan on going to the beach or anywhere else where people congregate even if you open it up but I still have to go to work and buy groceries so I will be exposed to those who do congregate.
Brevard	Professional Services	I am a licensed hairdresser in the State of Florida Pennsylvania and New Jersey practicing since 1986 I currently work in Volusia County and reside in Brevard County I am 53 years old I've been in this industry for a very long time and I think it is absolutely insane to open a business where there is Hands-On within 12 in of contact of strange public people that could be an extensive anywhere from five minutes to 3 hour appointment in the salon there is no guarantee that they will be free of coronavirus there is no guarantee that we are free of coronavirus and there is no way to completely sanitized the interior of the salon between every single guest at a salon cannot open for one stylist and one guest at a time please do not put us in this position thank you

AMERICAN OVERSIGHT

Leon	Healthcare	Please do NOT reopen. It's too early. Yes, I understand people need to get back to work. However jobs don't matter if you're dead.
Miami-Dade	Finance	This shutdown Is doing more harm than good. We should have shut down immediately and waited for the facts the facts are A complete shutdown Is not helpful if we quarantine the older population of people that have symptoms and everyone social distances it would be better than the complete shutdown. I've also been furloughed and I don't know how I'm going to pay my bills because the unemployment still hasn't hit my account I urge you to please open up the state.
St. Johns	General	We are NOWHERE near ready to reopen. Sufficient testing is not there, testing that does exist is inconsistent and not always reliable. The nation needs to make mask wearing in public mandatory in the meanwhile. Too many folks out in the store are wearing nOthing...far too many adults wesring masks dragging kids with none. Florida needs to institute manadatory masks...as a start, but if all other states dont follow, goes back to peeing in the pool philosophy. This is just to continue flattening the curve... while the doctors continue to search for more answers and improve testing.....and TREATMENT
St. Johns	General	I personally think that the economy needs to reopen or there at least needs to be some sort of lack or give on the social distancing. Many peoples mental health is suffering, and even if we have to open the economy slowly such as not opening theme parks or giant tourism for the time being then the unemployment rate will go down still and more people will be understanding and able to live peacefully. We cannot live in a bubble for too much longer before the economy collapses further, especially in counties like mine where we do not have excessive numbers.
Pasco	Recreation	Please consider opening the boat ramps throughout the state. Fishing has always deemed an activity that could be partaken in within guidelines during the pandemic. Instead of policing boat ramps with FWC, Sheriff and other LE agencies many boat ramps are just closed. That is leaving many like me to go to ramps that are absolutely overcrowded! I have also seen exactly 1 FWC boat since this pandemic started. Lack of presence of law enforcement is allowing people to stuff 20 people on a pontoon boat. Preventing a bass boat from being on the water does nothing for stopping this pandemic. Thank you, Chris Cardamone, Esq.

AMERICAN OVERSIGHT

Polk	General	I am 63 yrs old, husband is 72. We have been annual pass holders at both Disney and Universal for 10 years. I want to feel safe leaving my house. I cannot feel that way while knowing asymptomatic people are out and about. For that matter I, myself, could be carrying the virus and not even know it, thus infecting others without meaning to. Note: in 10 years of living in Florida and attending the theme parks regularly, I've only had 3 colds) My daughter-in-law (and son) who is presently living with us and working from home, could be sent back to her workplace, become infected, and bring it home to the rest of us. She is VERY careful when doing OUR errands for us, including mask and hand sanitizer usage. BUT, maybe the rest of her workmates aren't that careful and would be exposed to the virus, thus exposing her, and then her exposing us. Our other son and his wife work at Universal, but are presently working from their apartment. We haven't seen them since their wedding in February : (Our household has been VERY careful and followed all the rules during this time. Our 85+yr old neighbors have NOT. They've shopped at Walmart, had a big family get-together for Easter with hugging/kissing on driveway, AND NEVER WORN MASKS! In the past, we've helped the woman when she fell. Now? The most I can do is call 911 for help for her without coming near her. She may or may not have been exposed to the virus. I have no way of knowing, but don't want to risk my own health. To make me feel safe outside again, EVERYONE should be tested for the virus, even if they aren't showing symptoms. EVERYONE should be required to wear masks out in public (Osceola county backed off on that really fast, and now my MASKED son and daughter-in-law share the grocery store with MANY people not wearing masks or following the requirements of social distancing, up one aisle, down another, etc. I realize there are "amendment rights" that people are claiming in order to defy the new regulations, but SOMEONE has to step up and be willing to enforce the regulations if there's any hope to ever seeing the end of this covid19 crisis. Warnings are not enough for some people. Monetary fines might be. I've heard so many times that this will be the "new norm". Fine. I can adjust to that AFTER regulations are enforced, AFTER everyone has been tested, and/or AFTER some sort of vaccine is
Pinellas	Healthcare	As an essential healthcare related worker in Pinellas county, I am concerned that any mass openings of now closed spaces and non essential businesses will result in another wave of confirmed cases. Until everyone has been tested, there is absolutely no way to actually know what the numbers are and how far we have to go to ACCURATELY flatten the curve. I feel as though a month long (or more) opening approach would be more beneficial. Open an area, monitor it for two weeks and then proceed with caution as to more openings but keep social distancing measures in place throughout the entire process. We have lost too many lives already.
Pasco	Government	Please reopen all businesses so people can go back to work. There are more people unemployed then people who died from the virus or even got sick. More people have overdosed in Pasco County because of the lock down then people who got the virus. The shutdown is more harmful to everyone's long term health. Nothing like having a family to feed and the government telling a person they can't go to work and provide for their wife and kids.

AMERICAN OVERSIGHT

Polk	General	Florida should open parks and trails and beaches. Businesses should open with guidance for safety. To help the economy I suggest the following: a sales tax holiday for purchases from small businesses. A reduction in property taxes for property owners renting commercial space. A sales tax forgiveness for businesses renting commercial space. Protect the elderly and people living in nursing homes.
Hillsborough	Education	Put Nikki Fried on this task force. To leave Florida's $137 billion agriculture community out of these discussions is a slap in the face to the farmers and consumers who make agriculture the state's second largest industry.
Pinellas	General	They should open beaches to Florida residents only for now. Plus open pools at condos.
Broward	General	Don't reopen South Florida until medical experts say so. We should remain quarantined and social distancing. We have to prevent spread as much as we can.
Broward	Recreation	Closing everything in Florida has made my move here very difficult. As I know that this was not planned by our governor and he held off as long as he can, the state needs to reopen. I am stuck without a valid FL license because I cannot physically fo to the DMV to switch my license. Furthermore, I am a dancer and desperately need to start making an income. I understand it's not the most prestigious area of employment, but it's the only way I can make rent and raise my 7 month old daughter and spend the most time with her. I have no family down here to help me. I really need Florida to reopen so I can establish myself down here. I had to make an emergency move out of NY state when my mom threw me out on the streets just hours before NY went into lockdown. I am now working at a grocery store, but the income I receive is not nearly enough to make ends meet. Dancers are real people and we need our income as well.

AMERICAN OVERSIGHT

Miami-Dade	Construction	Phase 1 out of state license plates should be stopped by Florida Troopers asked for the address of where they are going to stay and that license plate should be shared with local police so that they can be tracked, those people need to quarantine for 14 days . The date of entry should be entered into police system so when that car is out in the street if the 14 days have not passed they can be stopped and sent to jail. to be past it's peak for the specific county, to re-open following federal guidelines which state a 14 day decline in both deaths and detected infections. Once that has occurred county's can start to let non essential workers open, for office buildings each owner of the building should hire a couple of workers to check temperature of each person entering building. Each store owner, barber shop, restaurant, or what ever type of business has to keep a record of daily temperature checks. Local police should spot check different areas of the county to ensure that this is being done. Fines need to be harsh for those not following . Important, behavioral punishment must be firm if not things will get out of control. Offices spaces, all people need to wear mask and maintain 6 feet distance, if they can't the need to rotate the people who work from home. So one day one group comes in and another different group comes in and on the days individuals can't come in they need to work from home. If a county faces a 2nd increase in cases for more than 7 days they need to shelter in place the population again. In order for this to work testing must continue . Parks or public areas there needs to be supervision of social distancing. Cops need to be on the beaches and enforce 6 feet rules, although extreme all public areas temperatures need to be taken .
Citrus	General	Please follow the Federal guidelines. I want normalcy, but not at a higher risk of a second wave. We're talking about lives here! Thanks for allowing my "two cents."
Miami-Dade	Healthcare	My opinion on opening the state is that we should open up slowly and In away that it can be safe for everyone. It could be done the same way that the stat of Georgia is doing it but at the same time making sure that everyone is wearing face mask and keeping social distance still in place.
Collier	Recreation	People in Collier County have been incredibly responsible about social distancing and deserve to have at the very least the beaches and parks open. At this point it is a matter of mental health for a lot of us. Give us the opportunity to be outside!
St. Johns	Education	We have 4 kids at four different schools and have underlying health issues. Do not open schools until it is extremely unlikely that they will bring home a potentially deadly disease. Only one parent right now has health insurance. Opening the schools before a vaccine is available puts our family of six at extreme risk. Businesses should also remain closed for the foreseeable future unless deemed essential. Businesses need to realize that if everyone is sick or dead that they aren't going to make money. Money from government programs should go to people not corporations and fix the unemployment situation for self employed people. We are very disappointed at how Florida has handled Covid-19.

AMERICAN OVERSIGHT

Broward	General	1. Offer extra support to essential non profits that deliver services to vulnerable populations 2. Do not rush to re-establishing businesses - life is vital to businesses and you put lives at risk of you rush the process 3. Getting tested is too hard even with all the new testing sites; make it easier for people 4. Think of innovative ways to connect low income folks to telepathy services ongoing to save the industry and government money 5. Understand the process will be like a hurricane demolished our state - how will you financially support citizens to recover - the stimulus dollars will not be enough 6. Prevention dollars are needed for rent and mortgage similar to ones that have been used in the past 7. How will this state prepare for a second wave of covid do not think something like this won't happen again be prepared for the next incident regardless of it is covid or not president. Bush knew preparing for such things are important be willing to show leadership and plan for the next event now 8. Please be forward thinking and don't focus on today when making decisions - think about new ways to create jobs - be prepared to help people find jobs - get industries to support this
Martin	Finance	It is way past time to open up Florida's economy. Let people assess and take their own risks...we should have never been shutdown.
Duval	Government	FIX THE UNEMPLOYMENT WEBSITE BEFORE YOU WORRY ABOUT HOW TO REOPEN SAFELY. NOBODY WILL HAVE ANY MONEY TO SPEND IF YOU DONT GET THE UNEMPLOYMENT CLAIMS PROCESSED!
Broward	Recreation	County, city, and national parks should be re-opened as they provide integral spaces of recreation, exercise, and adventure for the community. They allow enough areas for safe social-distancing and masks can be optional. I think it's a simple choice. The most financially vulnerable county park employees were furloughed or laid off because of these changes. Some full-timers were able togo in for grounds maintenance but part-time and student employees lost everything and are not guaranteed jobs upon return. If parks were to open again, employees will not be left waiting and wondering what their fate may be and community members will have outdoor areas of recreation and enjoyment again.

AMERICAN OVERSIGHT

Brevard	General	Before reopening Florida, please make it abundantly clear that you've done so under the advisement of doctors and health officials, not just business owners and politicians. I realize people need to get back to work, but it seems like we'd be asking for trouble to just try to go back to normal. I don't know if I understood the President's phase process exactly right, but I thought numbers had to be going down progressively for a matter of time, and all I've seen is our numbers going up consistently. Florida was slower to close — it doesn't make sense that we should be among the first to reopen. I want to trust your judgment, I want to believe that you have the best interests of your residents in mind. Please consider all options, accept guidance from healthcare professionals, and err on the side of caution.
Pasco	General	1. Reinstate elective surgeries. There are many people that need these surgeries but cannot. 2. Keep out of state tourists out of Florida until later in the year. 3. Open beaches and nonessential businesses in phases according to being able to social distancing measures.
Lee	General	We MUST reopen. I'm a retiree living on social security and a retirement fund. The economy must open up. People can get back to normal at their own risk. I'm 65 and my partner is 70. We stay active and healthy and act responsibly but you have to let people make their own choices.
Duval	General	I feel they're trying to reopen Florida too soon because it should be waited till at least another month because look at all the positive cases we have in Duval county. Now you're saying it's going to be okay to go out and start doing things. The mayor and governor need to give it at least another month or so before we open up anything in Duval county or in the state of Florida.
Brevard	Recreation	I'm in no hurry to open up. I think this virus will be around for quite a while. That being said, I am SOOOOOOOOOOO stumped to the idea of opening beaches for just about everything EXCEPT sunbathing!! I just don't get it!!!!!! Me laying on a blanket by myself (not moving except to turn over) means I will not jog near anyone, will not walk near anyone, will not fish near anyone. It's just me on the blanket. I just don't get it. Can someone explain that to me? Or tell the people on the news, so they can inform the public. Every time i hear a report on tv, I scream "why can't I LAY there by myself?" Thank you! I realize, in the big picture, this is not a major deal. But I'd like to go lay at the beach and just get out of the house.....by myself! Thanks for all you're doing. Take your time opening up. Don't be Georgia!
Palm Beach	Recreation	please open the golf courses in wpb

AMERICAN OVERSIGHT

Suwannee	Education	Please reopen Florida to curb small businesses from closing and protect children from neglect. As a volunteer guardian ad litem for the 3rd circuit, I have been instructed to not visit my cases until further notice. There are many children that I am concerned about and I cannot verify the safety of thier placements at this time. Many local businesses near me are also permanently closed or very close to going out of business despite upcoming aid. My rural community is very fragile and many people depend on small local business as well as schools to provide food and safety. As we enter the hot weather quickly, illnesses will subside. The deaths in my county have only been individuals that were already elderly with conditions or ill and it is unclear if the virus was even a factor in thier deaths. Please reopen our state, especially outdoor recreation so that we can get back to work and better health outdoors! Thank you, Jessica Frost
Sarasota	Government	Re Open the state. Do the same as the state of Georgia
Seminole	General	Open up non-essential retail and offices first. Allow 50% capacity dining at restaurants. Also, please resume non-essential medical and dental care so we can have things like regular medical checkups, therapy visits, and dental cleanings. We should be able to have small gatherings and see our friends or relatives and such. Protect the vulnerable and those in nursing homes. Also, you may want to try Newsom's idea of allowing restaurants to open and serve meals for seniors in nursing homes. That way the restaurants can stay in business while seniors in nursing homes are taken care of. Also, can you please open the gyms too?
Lee	Food	Please open restaurants up with limited seating the hospitality Industry is being killed and we need to get it back up and going to kickstart more money in local communities for everyone to continue to spend to keep other business going again. Please open Florida
Duval	Healthcare	Desperately need my cataract surgery rescheduled in an outpatient surgery center. Are there any ideas when they may re-open? Thank you, Ruth
Putnam	General	I think it would be stupid to open so early. I feel as if opening before mid May-June would be putting more people at risk
Brevard	General	It is my suggestion to open FL slowly. Start with small businesses which have been hurt the most. Keep distance restrictions in place for now. This seems to be working. I would also start to open restaurants with the same distancing restrictions in place. I would not open Theme parks at this time. You do not want many tourists flocking to vacation and going to theme parks who have not been tested or could be carriers of the virus right now. You have done an excellent job so far on keeping FL virus positives down so far. See how this goes and then proceed to continue to open the state. Great job handling this virus so far.
Orange	Healthcare	Elective surgeries need to resume as soon as possible in May. Our first responders are being laid off. We have the beds, the PPE and test kits.

AMERICAN OVERSIGHT

Miami-Dade	General	We should let everything open up. With the cdc measures in place. Mask and social distancing for now. Then mask could be taken off leaving social distancing. going for a couple more weeks. we have all gained consciousness with all this. We don't have to be babied. If this keeps on we will be in a whole that it will be extremely hard to get out of.
Pinellas	Management	Im 65....been laid of since March 22. No stimulus check or unemployment yet. Going thru charge cards and getting deeper in the hole. Firmly believe the only way to deal with this is get back to opening up our state. If your old and compromised THEY should quarantine. We as citizens are dying out here and must get back to living our lives again. Feel very sorry for anyone who has suffered thru this sickness....but this safer at home has been long enough. Please get me back to work!! Thank you
Broward	General	I don't think it's a good idea to reopen soon. There are still many cases and we don't want things to get worst instead of getting better.
Sarasota	General	We are concerned that the proposed opening is too soon. While Florida hasn't had the heavy toll NY has had, its population because of age is much more susceptible. We have personally tried to support the restaurant industry by getting takeout and buying gift cards. We know this effort is only a bandaid but to open such establishments now as Georgia plans is just wrong. And yes we both need haircuts but neither of us would even think about getting one should they be allowed to open. Opening the beaches provided there is STRICT enforcement we feel is OK.
Miami-Dade	Retail	This has gone on long enough. Public officials are literally comatose, afraid to do anything. People need to get back to work. Businesses need to re-open with proper sanitation methods. Retail stores, including hair salons and barber shops need to reopen. Restaurants with proper distancing need to reopen. Parks and beaches need to be made accessible once again. We are living in.a virtual police state now. It looks more like the USSR in 1975 than the USA in 2020. Lines to get into food stores; rationing of basic goods. Curfews and the State deciding where you can shop and when. This is very much a Miami problem. The rest of the state has taken a slightly more nuanced approach. Down here in Miami-dade all politicians care about is whether they are getting the most votes by their actions - or lack thereof. The Governor needs to take control here in Miami-Dade. Local officials are ineffective and scared to come out from behind their cameras. As they sit in their palatial homes with large backyards and private swimming pools, the rest of us in one bedroom hovels are literally trapped. But the mayor of Miami or the Mayor of Miami Dade in a one apartment and they'd be a lot quicker to ease restrictions. It's easy to "hunker down in place" when your place is a large private home. We need to follow the example of Sweden - this is what we should have done from the start. (https://www.bbc.com/news/world-europe-52395866)

AMERICAN OVERSIGHT

Miami-Dade	General	As long as masks are required and people keep a distance people should go back to work. This sequestration is killing our country and people's ability to work and provide for their families. Florida's unemployment is benefits are dismal. They barely pay for food and some utilities. We are going to have massive homelessness.
Seminole	Recreation	Open our parks and playgrounds. Open the beaches without restrictions. Open public parking. Open it all. We are tired of quarantine. We need to get back to work. Antibody testing continues to show that the death rate is low. This whole thing is a political power grab. Let us free.
Collier	Tourism	Tourism must be reopened! The impact of the shutdown has been devastating to small privately owned businesses. We do not have the capital to stay in business much longer. Short term vacation rentals MUST open for the late spring and summer season so that we can begin to regain lost capital. If beaches and restaurants reopen WITH RESTRICTIONS, Florida will see modest tourism return. Historically, summer tourism does not draw the same number of tourists as spring, so the timing is perfect. If the state remains shut down to tourism much longer, many many small businesses will go under, never being able to recover. It is economic suicide. We realize that many residents are scared, but when you reside in a state in which tourism is the number one source of income and tax revenue, it MUST be allowed to reopen!
Lee	Recreation	Your system crashed on my 1 st attempt, of course. I am a 70 year old athletic, healthy male. I love tennis, fitness classes and walking on Bonita Beach. My 65 year ol girlfriend is similar. The state of Florida has locked down because of a flu l8ke illness that is serious for 1% of the population. The other 99% of the population has been subjected to an extreme sense of fear and anxiety unnecessarily. I have supported local take out restaurants, and those people are scared. I also cannot get a haircut because I am risking my life? I know people who do not want to go back to work because they are collecting $600 per week unemployment, more than they were making when they were working. This is absurd! You are economically ruining the lives and future of many people and the state by continuing this lock down. I do not wear a mask or gloves. Let me decide what level of risk is acceptable for myself. There are enough hospital beds and medical equipment for those people who need it. Reopen the state before you wreck more lives and the state!
Marion	Education	Cancel the school year, K-12, May 1st. Students have completed more than 3/4 of the school year. State testing, teacher evaluations, and closed campus means that there is nothing more to do. Let's move on and not students to the ever changing rules and policies. End the school year on May 1.
Leon	Finance	I feel like in comparison to the rest of the country Florida is way better off than most of the other states in the country and in hopes of lessening the impact on the economy we need to reopen. If we remain closed the devastation to our economy will kill more people than the virus will end up killing.

AMERICAN OVERSIGHT

Hillsborough	General	I think we should “open” the state if the greater majority of people are not severely affected as indicted by age and/or underlying conditions. However I think better data is needed specific to the older age group and those with underlying conditions. While we know as compared to the general public those folks are more likely to get seriously ill, we need to know what the percentages are specific to those people. For instance of all 60+ individuals tested what percentage got severely ill , how many died? Similarly what are the numbers by underlying conditions? This would help individuals such as myself decide to venture out more or not. I take responsibility for my health and thus if I knew the facts I could better judge appropriate actions.
Manatee	Administrative	My opinion is the State of Florida should open the counties with restrictions for the counties with the least number of cases. The other counties like Manatee, Hillsborough,Miami dade should remain closed. Reason is we need to see more testing in Manatee county. MCRS is charging 125.00 for a test. Also if you open Manatee and childcare totals increase how are we in childcare suppose to remain compliant with CDC 10 in a group setting. We don't need nail shops barbershops tattoo parlors heck we don't even need retail shops for now just the necessities. People are conducting small business from home anyway.
Lee	General	I think we should open the state. There are studies that suggest herd immunity is more important than previously thought. People would like to get back to their jobs, needing their paychecks, paying their bills., etc.
Polk	Recreation	Let's get the parks and business open. I need them open so I dont get laid off. I'm also tired of not being able to go places. I'm working from home but enough is enough.
Broward	Education	I think before we even look at resuming classes, we should ensure every school has been disinfected and well stocked with soap and hand sanitizer throughout the school. They need to develop movement plans to classes and/or rotating schedules throughout the week. The schools today barely clean and soap is usually absent in a regular school yr and this can no longer be accepted.
Manatee	Healthcare	Dont open Florida yet. I am an emergency room nurse practitioner and seeing this first hand. This is not controlled and still out of control in alf and snf. Reopening will be worse in the long run for the state and health of all.
Broward	General	I dont agree to be reopened until medical experts say it is safe to do so. Stay at home needs to be respect. Our lufe it is priority now.
Osceola	General	Please don't open the state yet. A lot of lives are at stake here. We need to see what happens when we do that. Let's not be the guinea pig for this experiment.
Hillsborough	General	I’m in favor of having business’ open up for the public. We now know a lot more on Coronavirus than we did 2 months ago. If there’s a flare up it can be tackled quickly. I have not been economically affected however I know a lot of people who suddenly lost their job. If we trust the grocery stores and home improvement stores to stay open and do it safely we should trust other business’ to do the same. Trust the people!
Marion	General	Open up all public area and banks

AMERICAN OVERSIGHT

Manatee	Professional Services	First I think it is pretty amazing that you can make a new web site for this but you cannot fix the unemployment sight. You really need to open the state back up before everyone is living on the street and starving because you cannot get them an unemployment check. I know people that have nothing and at this point are thinking of desperate measures to live. They have been in the system since March and still have not received any help at all.
Pinellas	Government	Sirs: I am writing to stand against opening businesses without the Doctors scientifically proven data agreeing with a two week down turn in cases. We Must Test.Test.Test. Please do not put more people at risk.
Pinellas	General	The Safer at Home order has had the intended effect of flattening the curve of COVID cases and should be lifted. Being ordered to further remain at home or for a business to remain closed will do far more harm than good. Much damage has been done both by the virus and the Safer at Home order. It should be now up to the individual adult to decide for themselves if the risk of infection is greater than the need to work, operate their business, or simply go to the beach. There is risk in everything we do. COVID is not going away anytime soon. We cannot continue to stop living for fear of death. Pinellas hospitals are well under capacity and have equipment available to treat those in need. Positive test in Pinellas have stabilized at around 5%. The odds of catching the Corona virus are low and may never happen to a person, however for those now without a job or a business to run the odds of financial ruin are very high. With so many in that situation, crime generally goes up, as do suicides, addictions, and mental health issues. Pinellas has already seen an increase in domestic violence cases. It has been clear to me in making my way around the county that small business owners are ready to open, people are ready to get back the beaches, to the gyms, to regular life. Compliance at the beginning of the order was rarely met with resistance and most stayed home. Now, the traffic on the roadways is nearing normal and people are being more defiant. Some are ready to accept the $500 fine for running their business. They see no other option to maintaining their life. It's time. Please lift the Safer at Home order and let us make our own choices. Respectfully, Scott Collins
Miami-Dade	General	We should NOT open anything yet. We need more time in quarantine.
Alachua	General	Re open on May4th. We have been closed down for too long. We can social distance, we can use common sense and get back to life. Please open Florida!

AMERICAN OVERSIGHT

Polk	Healthcare	I am a dental hygienist with a low immine systen which puts me very high risk for pneumonia as well as my 2 children at home. My children can't go back to school per their dr due to the risk of contracting the virus. I have noone to watch my kids. I have applied for unemployment over 1.5 months ago and still have not received the first penny. I have been told by my job if i feel insafe to come back or have noone ro watch my kids i will be voluntarily quitting and collect unemployment, not like i have gotten anything from it yet. Not to mention not feeling safe working when patients can come in carriers but asymptomatic yet soread the virus. We prodcue aerosols all day, this means i cant eat lunch in my office because everything is open, i cant even take my mask off in my 8 hour shift to take a drink without exposing myself to the virus due to the aerosols that are in the air. Im asking, begging that you post pone dental hygiene going back. I shouldn't have to choose to pay my bills to not be homeless or take the risk of killing me and my 2 kids because we have weak immune systems. Please help!
Hillsborough	General	I think you should taylor re-opening the State to each general area. I also have been paying attention to the state map and I see that everything that borders on I-95 and I-4 to be the ones that take a little bit longer to open because that's where most of our cases seem to come from. My hope would be that no later than the end of May but my hope would lie that it would be actually the middle of May.
Leon	Healthcare	Dear Governor Desantis, I am appealing to you to try to improve the overall population's immune health using Vitamin D, an inexpensive solution to Covid-19's severity. Please, everyone should be trying to boost their immune system, not just trying to hide from Covid. The most promising and easiest thing to do is increase your Vit D intake either by supplement, or direct sunshine on your skin without sunblock. Vit D will boost your immunity and reduce your likelihood of a respiratory illness like Covid. Vit D is strongly, and inversely correlated with Covid severity. The dark shadowy cities like NYC will be hard hit, because Vit D is made naturally by sunlight hitting your skin without sunblock. Nursing home patients all lack sunshine. California is relatively mildly affected because of sun exposure, despite many Chinese people travel between china and California. Dark skin people are affected severely because they don't make Vit D efficiently, with melanin blocking UVb rays. Italy, Spain, France, have the lowest D levels in their blood tests among European countries. This also explains why flu is a winter phenomenon. Viruses are not afraid of hot weather; rather people have better immune system in summer when they are out in the sun. Vit D allows your body to make cathelicidin, the only protein in your body that actually kills bacteria and viruses. Vit D also suppresses cytokine production, so you don't get a cytokine storm, which is a severe reaction to Covid. So hopefully, you will help us all increase our Vit D levels, and be much more immune by the time a second wave starts. More time sunning at the beaches would help. Florida is the sunshine state, and that is probably the reason it has not been devastated by Sar-CoV2, despite our large population of elderly folks, who fortunately are healthier than other old folks, because they are getting more sun(Vit D) than their northern peers.

AMERICAN OVERSIGHT

Broward	Healthcare	At this point, it would be beyond unsafe to "reopen the state". Right now, despite what DeSantis and other people in power have claimed, there's no actual way to know whether or not we're flattening the curve because only a small percentage of Florida's population has even been tested to know who has it and who has already healed from it. (Not that that truly means anything as the World Health Organization has shared that we don't know if having the virus cuts down the risk of a secondary infection as people in China and South Korea have left the hospital with a negative result after healing and have shown back up with a new positive result later.) With Florida's huge elderly population and the fact that life itself seems to be an underlying condition, the Florida government needs to act smart and keep at the Shelter At Home orders. If the worry is about Florida's economy - and not, as I suspect after seeing Georgia's governor push for "reopening" places where lower-income and marginalized people work more than anything despite cases in his state risking and how underfunded his state's medical system is - the goal should be to help these businesses at the same time that the state also takes care of their residents who run businesses. As it stands, reopening the state - even with the beaches that you all have already opened with minimal ordinances in place to stop people from being in close quarters - is unsafe. It will eat up all of the gains we have already made thanks to social distancing and cause another wave of cases that we're not prepared for. Right now, we're doing fine. We're at 40% capacity last I heard. However, we need to keep at it. If you want people to work: create contact tracing jobs to keep track of where everyone has been and what their spread has been. Put the USPS to work somehow. Get folks building the field hospitals and preparing the many more hurricane shelters we will need this year - as you can't have us in close contact during the storms as we'll survive a hurricane only to die of COVID-19. "Reopening" Florida is a risk that you all do NOT need to be taking.
Hillsborough	General	As an RN, I understand this virus is problematic. However, I'm more concerned the damage being caused by keeping the economy closed will far surpass any damage caused by the virus itself. Disease is something that occurs in nature and cannot be completely controlled. Long term effects of the closed economy could actually end in more deaths from suicide, abuse, murder, and substance abuse. Not to mention the very real possibility of extensive food shortages and famine.
St. Lucie	Food	We are interested in seeing our restaurants be able yo open using social distancing, our beaches be opened to allow people to have access to our greatest asset, to see parks and boating be open . Most importantly to my husband and I we would like to see d Dental offices open as we have a need for dental work. Thank you for the great job I believe has been done to keep us safe.
Broward	Real Estate	I don't owe a business or anything. I'm just expressing my opinion that we should start to reopen on May: hair stylist, stores, beaches,

AMERICAN OVERSIGHT

Brevard	Accommodation	Please encourage employers who are reopening their business, to allow elderly and immunocompromised employees to continue working from home. Employers need to be made aware that the virus is not gone and it remains a huge risk for certain individuals. This accommodation must be provided. This accommodation should be encouraged by our government. If an employee has been working from home to stay safe, this must be continued until the medical community says it is safe for those employees to return to company grounds. Employers should not put any at risk employees at an even higher risk at this time. Employers and business owners look to the government for correct safety standards for business operations. This information may seem like common sense however, leaders should not assume that employers take this information into consideration. It should be stated point blank. A timeline should be established to assist with compliance for this accommodation. Even if it is an estimated timeline subject to change. Please state this on television. Make sure that this life saving accommodation is not overlooked, as businesses reopen or return to more "normal" business operations.
Miami-Dade	General	In my opinion, the state can be reopened once there is no increase in those infected and until health professionals decide. because if not in my opinion it will have to be closed again the moment they realize that there are more infections after reopening the state. think carefully and without pressure from the inhabitants I think we have to be aware
Broward	General	Hello, I'm a Florida resident for almost 16 years now. I love this state and I also admire the effort from our local government to keep is safe during this pandemic. I have a suggestion and I hope it will be taken into consideration. As part of the re opening plan, I think the government should strongly encourage companies that have the proper technology to continue to have their employees to work from home. For example, the office where I work at, we have about 20 people plus other people that work in other offices in the same building. There is only 1 small restroom and a small lunch room that can barely fit 5 people. I personally don't fee safe going back to work under such conditions. However, our managers are pressuring us to come back to work in 2 weeks without first providing a safe environment for us. I've had bronchitis before and I have a hard time breathing at times so I follow the guidelines and stay home as much as possible. What are my rights as an employee if I don't feel like that employer is not providing a safe environment for me to work? I need my job and I'm scared to lose it, but I don't feel comfortable going back to an office where I won't be save. I have to chose between my life and my job when I can clearly work from home and be safe. I cannot speak up because I'm afraid that they will use that against me. Any advise?

AMERICAN OVERSIGHT

Seminole	General	Please keep all nonessential businesses closed until we have the suggested 14 day of consistently declining cases. At a Walmart today, many did not wear masks nor adhere to the six feet distance as recommended by the CDC. Clearly, we are not ready to open anything due to those who do not or will not take proper measures to help minimize the spread of Covid-19.
Pinellas	Retail	I feel we should open beaches immediately. Keep the rules on crowd control and social distancing. Restaurants, should open but with reduced seating, to also meet the same distancing. Retail must open ASAP. Keep the same social distancing and crowd control rules. However, let the economy begin to heal. I also believe , Corona virus cases will increase. Cases will increase regardless, if business and beaches open this week, in a month or in a year.. We must begin to heal quickly or we will have fewer opportunities , because of lack of finances. Thanks. Bj
Volusia	General	It is my understanding that when restaurants open for business the bars will remain closed. Im not i understand the logic behind that decision because restaurants have way more people coming in than bars. Most of the local bars serve food as well. I dont agree with excluding them from being able to reopen at the same time as restaurants so they can provide for theirs families as well. Theres no reason for them not to reopen. They could follow the same guidelines as restaurants and operate at half capacity. Could you please respond? Thank you
Lee	Government	Reopen Florida. ALL Jobs Are ESSENTIAL. People are hurting, especially the poor. Reopen
Pinellas	General	I am a small business owner who has a deemed essential business. We have been able to use proper social distancing and hygiene to stay healthy and still be productive. We need to get our state/country going again. Please, if we can do it I am confident everyone can do this! Make America Great Again!!
Duval	Recreation	Open the Keys to Fla residents.
Polk	General	I think its time to open the beaches up, and the state. People need to get back to work, the ones that don't want it opened up are the ones getting the extra money from unemployment, making more than they did working their jobs. You can go to any "essential" business and the places are crowded with people, think its safer outside at the beach, park etc. etc.
Leon	Education	As a school principal, if it is not safe enough for students, teachers and staff to return to school buildings, our State is not ready to re-open. I am praying we can partake in social distancing long enough within our state and be prepared for school to re-open in August. I am choosing more lives saved over money. People cannot be replaced yet money may be. Let Florida be a leader and not a follower in such uncertain times.

AMERICAN OVERSIGHT

Okaloosa	General	We should not open the state yet, too many stupid people and tourists will flock the area and cause a flair up in cases again. No one will obey a 6ft rule on the beaches especially in these nice weather days and months. The curve may be slowing but that's because we closed. More interaction between people will cause a spike again. Think about this before jumping back in.
Citrus	Education	I believe trade schools that are associated with the county's k1-12 system should be allowed to reopen as they are relatively small class sizes, and virtual learning doesn't work for this area of education. We are the essential workers of the future. We are able to maintain social distancing easily. We have paid for hands on training which is needed in fields such as welding, automotive, electrical, plumbing, etc. even if you just simply lifted the stay at home ban, we were going to be going to class 8 students at a time and practice social distancing and alternate days with the other 8 students alternating four days a week.
Pinellas	Tourism	before the theme parks reopen, please consider doing a public education campaign to explain to the public how it will be and what changes will be made within the parks
Hillsborough	Professional Services	Hi, Thank for making this portal available to us. My husband and I went to President Trump's rally here in Tampa at the Florida State fair grounds. We voted for President Trump and for Governor Ron DeSantis. We believe these great men will do great things for our country and our state. We are so grateful that you were both elected and we will vote for you both again. In reference to the stay at home order please please we are begging you to lift this order. This has been a brutal experience. We know that it had to be done. But it needs to be over now. It is time to get back to work. I do not want to have to apply for welfare and unemployment. Let's not make the cure worse than the illness. I believe in achieving the American dream through hard work. I started a small cleaning service the last quarter of 2019. I have spent a lot of money to get this up and running. I work very hard and need to be able to continue to pay my bills. My husband and I are both hard working citizens in Hillsborough County. We go out of our way to stay healthy exercise eat right and take supplements daily. We have not had fever and we are not sick. We are ready to reopen this economy and get back to work and continue a normal life as we know it. Thank you for your time and consideration in this matter. We are praying for you and we love you! We know that you will do the right thing. God bless America!

AMERICAN OVERSIGHT

Broward	Education	I am an educator and a person with an immune deficiency. I am scared. I am afraid you will open schools and the state before we are ready. Right now I am able to work from home. I use canvas, telephone calls , faceTime, WhatsApp and. zoom to communicate with my students. Is it perfect ? NO. But it is safe.If you open schools with out a real plan, we all will continue to get sick and die. Parents send their children every day to school sick. The schools are not cleaned properly every day. We can't wear masks all day when we teach. We can't keep children six feet a part . How will the teachers and other students be protected without a vaccine ? What will we do when children are sent to school sick and are not sent home or parents won't pick them up when they are sick because they are working? What about the parents that give the sick child medicine that hides their fever? A strict plan needs to be in place. Please don't open the schools and state until people are not dying. Please make sure that people like me who have a deficiency will continue to earn a salary . Please make sure that people like me will have an alternate job in the school system so that I can afford health insurance and live , if they cannot work in the classroom because is to dangerous for me at this time. I have been teaching. 33 years. I don't want to have to give up teaching because of a pandemic. I have been healthy with my plasma treatments but, I don't know what will happen to me if you send us back to work during a pandemic. I am scared.
Lee	Healthcare	Spare our elders. Do not re-open the stay at home directives until,there are testing and tracking systems in place and the curve is flat. Require masks in all public places. Get people their unemployment benefits ASAP. Food distribution to families who need it. Do not re-open beaches and parks prematurely. Save lives.
Lafayette	General	Although I am anxious to see the state reopen I am also concerned with the influx of out of state residents that would increase the risk for Floridians. I would like to see the state opened in the initial phase for residents and non-residents currently sheltering in place in Florida. I realize this would continue the negative financial impact for the state but I do think it would give officials time to determine if the state can be opened fully.
Orange	Accommodation	This Covid 19 Pandemic is still very new to us in the United States. Information regarding transimition, and contraction of the virus continues to be unclear resulting in confustion. Frankly, everyone is at risk for this virus as people may not be aware of possible medical condition unless the are seeing/experiencing the syptoms. As a state, we should be very responsible as to how we move forth with opening the state as Florida is a vacation destination for individuals around the word. Given the state is reopened prematurely, many people will be at risk. Please be wise in the haste to open the state. There should be action plans in place for testing as it appears that individuals carrying Covid 19 may be asymptomatic.

AMERICAN OVERSIGHT

Pinellas	General	I hope that the task force opens up the state fast please don't drag it out over a extended period of time. People need to get back to work and get their lives back together. I still cannot believe that this country and state has shut down over a flu virus that is no where as bad as all the experts said it was going to be. Please open this state back up quickly.
Charlotte	Healthcare	***Dental Hygienist here😊🦷*** PLEASE tell me how I can be safe going back to work at this time??? How do we social distance??? We work inches away from a patients face/mouth. I have no problem going back to work with the PROPER PPE.... BUT HOW DO WE GET THIS??? EVERYTHING IS ON BACKORDER😢 Please consider THIS in your decision Thank you!
Clay	Retail	Please re-open the state. We need to recover. We need to pay our bills. We can reopen and still be smart about it. Wearing masking and keeping at least 6ft from another person. Not shaking hands. We can be smart about it and still go to work and making a living to support our family.
Okaloosa	Tourism	I don't personally see how opening a beach is more important than opening schools. Moreover, this is the large draw which then smaller beach towns will be flooded by out-of-towners and more germs likely coming from other hotspots. There are plenty of people here to live and spend money. Please suspend rentals til June 30 and no non-residents (except military) allowed on our beaches.
Pinellas	General	I believe the key to re open Florida is to rapid test every resident in each county. This is the safest way, since there are symptom less people who have active virus. We definitely don't want to close back down again.
Lake	General	I cannot understand after a month we don't have masks of all kinds for sale everywhere! What an opportunity for a company to make money and offer something the public needs to open back up this company. Online price are crazy high. Masks need to be available everywhere to get this economy up and running. We also need massive antibody testing. Neither of these need to be free just available.
Pasco	General	My family owns a small eye care business and I absolutely disagree with re-opening the state. I do not want to risk my patients or my employees by an irresponsible decision to re-open when cases are still climbing and we will see an even worse second wave. I'd like my child to start VPK this year in a classroom and if we re-open too soon that will NOT happen as we'll have to go back to a full lockdown again for even longer. Trust the medical professionals, not people who are willing to sacrifice a few lives to make a few bucks. By the way, we make more open when the business is open than we do even if we were to be getting our unemployment benefits and I STILL believe that what's best for ALL Floridians is to remain closed. Beaches and churches included.

AMERICAN OVERSIGHT

Palm Beach	General	It is urgent that we reopen FLORIDA. The most urgent area is HEALTHCARE -- REOPEN ALL ELECTIVE PROCEDURES IMMEDIATELY. Obviously, Doctors and other helath providers need access to PPE. OPEN the Beaches, Parks, Golf Courses, Tennis Courts. All of these wonderful areas can be used while still observing social distancing. Continue as soon as possible with as many other small businesses that can open. Provide suggestions as to how to use services such as barber shops, hair salons etc in the safest way possible. Test for antibodies WIDELY and SOON
Pinellas	Real Estate	Regarding the "Re-Opening" of Florida ... we all want to see things open up and get back to normal, BUT, we all want to be SAFE! As anxious as everyone is to get back to normal, (myself included), let's not be foolish, and jump the gun and end up creating a bigger problem! When the Statistics, and Science, and the Medical Authorities agree it is Safe to re-open while still practicing social distancing ... then i VOTE for that time, and not before! There is nothing more important that life itself, and one life lost is one too many by needlessly re-opening too soon! Stay with the guidelines of the scientists and medical authorities... PLEASE!!! Thank you and stay safe ... Lana McDonald
Hillsborough	Professional Services	I'm the owner of The Barbershop Tampa in Hillsborough County. As a barber or stylist, we are regulated by the Florida Department of Business & Professional Regulations (DBPR) to keep our shops sanitized & disinfected at all times. This also goes for our tools. We clean before, during & after every client. This is something we did prior to the Pandemic and prior to the shutdown. We are ready to get back to work. We may not be considered essential but we are Essential to the workers who are still able to work. Every tool is sanitized prior to usage. We do not have a Union, we do not get paid vacations, we pay for our own insurance & don't have a corporation who will match our 401K. We are unemployed right now & don't qualify for I employment. We're not asking for bank loans or PPP. We're just asking the Governor to allow us to open our businesses. We only allowed one client per barber at a time prior to the shutdown. We take appointments & the next client would wait in their cars and we would call them when we were ready for them but not until after we had cleaned everything throughly. We're just asking to be able to provide for our families again. Liquor stores are essential but a barbershop or hair salon is not. Our establishments are clean at all times or we're fined by the State. Please Governor DeSantis, let us take care of our families the way we love to. Gino Maggio The Barbershop Tampa
Duval	General	Reopen ASAP

AMERICAN OVERSIGHT

Duval	Healthcare	Let seniors access n95 masks, there are enough supply in the health system, non n95 masks are not really very protective, and seniors are a high risk group
Columbia	Government	Governor DeSantis, I urge All of Florida to remain closed as it has been. The virus has pretty much reached all parts of the state. My spouse and I live in the country by the Ichetucknee Head Springs. It surely will bring much more infection to this area of simple living people. Many cannot read or write or obey the current orders set in place. Some are glad to have the elderly die. Im 61 and my spouse is 67. We both are disabled and have compromised immune systems. Very few people in Fort White wear face coverings or mind the social distancing. My husband has done our every two week shopping and he says each time, not one person adheres to distancing. He talks to the manager and she does tell them to leave the store. I'm being sincere and I am just not ready to get this virus and/ or die. Sincerely, Jack Ferrari
Orange	General	It's time to get back to normal... with some adjustments in place. Wearing masks in public- ok. Eating at restaurants with less tables crammed together- yes! Allowing children to play at a park- absolutely!!!! Let's get our tourism industry going again!!! Let's invite big corporations to Florida to have huge meetings (with chairs set farther apart) to discuss how to make up for lost revenue. Get the events going again!
Manatee	General	I believe the restrictions are very disproportionate on the public and especially the business Community. Let us determine our own fate. Open the State.
Orange	General	We need to start reopening things. The curve has flattened. We need to start getting back to work.
Okaloosa	Recreation	Gov Desantis, Many doctors are coming out saying covid 19 is similar to the flu & the death rate is as such.1 in 6 ppl are now out of work & need to feed their families. i hope that you will begin reopening Florida & lift restrictions as soon as possible! I hope that all restrictions are lifted in our state. Carolyn Schmidt
Palm Beach	General	The restrictions already in place are extreme and are worse than the potential consequences. Many of the businesses that have closed will not reopen and those jobs will be lost. Even hospitals are furloughing employees. The economic consequences of the restrictions will be far worse than the last recession. Most of Florida has had minimal impact of the COVID-19 and the severe restrictions should never have been implemented.
Brevard	General	Even though I am a small business owner, I think it would be irresponsible and reprehensible to open the state back up before a significant vaccine or cure can be scientifically proven and tested for COVID-19. The long-term impacts of opening up the state to soon would be far more devastating than keeping it closed while experts and scientists work to find solutions to this global problem.

AMERICAN OVERSIGHT

Clay	General	I think it is to early to reopen the economy. Based on the data I have seen a more reasonable time would be May or June. I am a senior citizen and have been at home for most of the last 6 weeks. Wear it's are in danger of the virus. Those who are younger can easily get the virus from the early opening like Georgia and past it on to us. We need to get the economy going but let's be safe and wait a while longer.
Hillsborough	Recreation	Please when you open up recreation open up as much as you can at once. If you do not what ever you open will be swamped. If you open up just the beaches, everyone has been cooped up will hit the beaches all at once. Then I can see it allover the news. We need and want to get out.
Martin	Real Estate	This doctor is confirming what my instincts have told me all along. First, I don't claim to be an expert, but I worked for 30 years in diagnostics, immunology, laboratory and pharmaceutical industry, including having the CDC as one of my major Public Health Clients. I believe my scientific education in chemistry & biology still informs my instincts. The observations from this doctor in California confirm my opinion that the "Shelter In Place" orders were misguided in areas that did not have the high prevalence. Let me clear... taking such drastic actions were beneficial and necessary to get control over the virus in a few hot-spots like NY City. There the virus was spread through the mass transit subway and bus system. #OPENUPAMERICANOW https://www.youtube.com/watch?v=gNTHuCOjAy8&feature=share
Bay	Accommodation	Please open short-term rentals back up for business!!! We only own one condo, got denied by insurance for loss of use claim, don't qualify for SBA PPP loan, and while the condo was fully booked up until August, we've been doing nothing but cancelling/fully refunding reservations ever since the shut-down. The condo has been generating bills, but no income. PLEASE?
Miami-Dade	General	Deben abrir cuando todos tengamos los exámenes necesarios sean mucho menos los casos ,es más importante la vida de nosotros que la economía, eso después se ve pero para mi itodos en mi familia y el resto son importantes estoy en contra de abrir hay que esperar mucho mas o serán más lis contagios y muertos POR FAVOR AHORA NO ES EL MOMENTO DE ABRIR

AMERICAN OVERSIGHT

Charlotte	General	I believe businesses need to be allowed to open. In my household, we have not received a stimulus check, and can't be sure we are getting one. I lost a job working at the local baseball park, and my husband is a barber. He was turned down for unemployment because he is self-employed, and I can't log back in to see why this was a problem. So many problems with his, that I didn't even bother filling anything out for myself. We really don't want handouts, or to find different jobs. How is seeing 15-20 people a day (with precautions and extra cleaning) so much worse than seeing hundreds that are probably not taking many precautions? Those at high risk should continue to stay home. Just let us get back to work and stop building debt because we can't pay bills. FPL and such won't wait indefinitely to be paid.
Brevard	Recreation	Isolation is still important and needs to be adhered to and it is not time to reopen. America has 1/4 of the world's reported cases. We're doing something wrong, period. However for mental health, exercise is also important. I feel the move to open the beaches and parks only if a 2 meter distance continues. Camping was my form of isolation before the Covid-19 and I would like to enjoy that again but the speration rule must continue. God Bless the First Responders and Medical Staff. Let's not burden them any longer than necessary.
Osceola	Government	The health concern and issues that we could face as a state and the damage that opening up this state would cause is something to be truly afraid of. We should focus on HELPING our front line workers helping our hospitals. its only a statistical death that's part of a bigger image until its your family member, aunt, brother or lover that's suffering from a disease which they will die ALONE. imagine being on the wrong side of history with this ? choose life.
Hillsborough	Real Estate	Florida is the place to retire and if this coronovirus is not handled right I guarentee you that you will lose it's reputation for taking care of the elderly. Retirees want to know if our leaders will do the right thing. This means listening to our CDC and our Health Professionals and all first responders that will be risking their lives for the decisions our leaders make. Better to be safe than sorry, 2nd go around may be too late to recover. God bless us all and may he bless our leaders to have faith and the courage to do the right thing for us all.
Duval	Recreation	It's time to use Georgia as a model for Florida. I work at Mayo Clinic. We act as if everyone has Covid but the reality is, we rarely see it. On top of that, we are being furloughed. Nomatter when you reopen the economy, there's likely to be a spike in cases. But it's time. Atleast open the springs and outdoor recreation.

AMERICAN OVERSIGHT

Alachua	Healthcare	I think it is important that we begin opening up non-essential business. We will see a spike in nee COVID cases; however it will not be catastrophic. The people who are terrified of COVID will still remain at home, but those of us who are aware of the risks will take appropriate measures to keep ourselves safe while in public. We need to stimulate the economy. Most people used stimulus funds to pay bills etc. while that is important we need to spend money on goods, restaurants, etc...
Sarasota	General	Please do not extend the Stay at Home order - open up the economy and let us get back to work. We can continue to follow social distancing guidelines for an additional period of time. If there are hotspots, like Miami, keep the stay at home order in place for that area while the rest of Florida leads opening up the economy.
Marion	General	Absolutely DO NOT open the state of Florida. We will make matters worse. Be a leader for once
Orange	Recreation	I believe that we should open boat ramps, state parks, and the beaches and just enforce social distancing. But native Floridians need to be outdoors, we need to get on the lakes. Keeping social distancing is easy on a boat.
Pasco	Finance	I won't make this long for fear that I will address issues that others will do. It's simple...I'm a school teacher who sees this is an unfortunately ridiculous situation. It's unfortunate that so many have died but it's also sad that this has been tremendously overdramatized. If we stay at this pace, we will have to close our borders every single flu season. Re-open now and give people's jobs back please!
Polk	General	Its time to open the state back up. "Essential" businesses are crowded....seems like it would be safer to be at any outside event over the stores.
Hernando	General	Floridians value personal freedom. I would have local County Health Depts issue ID cards for Floridians who participate in testing for anti bodies. Cards could be used in bars and restaurants for employees and patrons. Dividing seating I to two sections one for card holders and one for non card holders distanced further apart. Purpose would allow those with immunity it to Interact closer then those who choose not to be tested. Can also be issued as part of food server licensing requirements making workers less dangerous to the public. This could be voluntary program that increases capacity in closed environments reducing risk of infection. Think of sporting events where capacity is related to profits or concerts got a card get a better seat. Prerequisites to use public transportation or the airport. Gonna fly get a test, show a card.

AMERICAN OVERSIGHT

Osceola	General	I'm lucky enough to be able to work from home, but my company has an office that, prior to COVID, I was expected to go to for meetings at least once a week. If you do re-open the state in the next six months, please require that meetings that can be held virtually (pretty much all meetings, IMO) are held virtually. I'm young and healthy - not that that matters all that much - but I love with people with compromised immune systems. If I'm forced to attend a face to face meeting, I'll either lose my job for refusing or potentially put my family member's lives at risk. I'll either become another person on unemployment or end up with family members in the hospital. I don't want to contribute to overloading the system in either of those scenarios. Please also remind companies that can operate via remote work that forcing people to show up face to face unnecessarily could ultimately contribute to higher health insurance premiums for the company and its workers if a COVID outbreak occurs. I also wonder if it opens the company up to lawsuits for putting its workers at risk when they can work more safely and just as effectively at home. Thank you for considering my comments.
Orange	Healthcare	I do not think anyone knows how to contain or cure this yet, everyday seems to be inconsistent from one news channel or publication, so I am a bit reluctant to see an open of the whole state right at this moment. I think it needs to be started with the lowest count of cases in a zip code businesses as a trial but I'm not sure how that would work or if that is feesable according to laws. I'm immunocompromised and when I go out I take precautions wearing a mask, antibacterial wipes etc. however I do see many that are out coughing in public places and not caring for others so being in the mix of it I can truly say we are not as safe as many think or do we even know what the measurement of "safe" is yet? Large crowded areas such as arenas etc I believe should still stay closed a couple weeks or more until we come up with a better platform of treatments. Healthcare workers are on overload and I do know many in these conditions that are exhausted already. I would hope our Governor takes into consideration a slow very slow open and look at each zip code to determine lowest case zips or areas. Unemployment system needs fixed as well... without feeling like people are getting something monetary from all their hard work people will fail - We need a boosted morale in our community where everyone feels they are supported. Please get this system fixed so we feel some sort of normalcy in our lives. I love working and want to get back as well but safety should be priority for all.
Hillsborough	General	I think is a bad idea to reopen. Not until the virus is controlled or theres a vaccine. This would be taking a high risk on loosing many lives. The goverment shouldn't trust the people to behave and maintain social distance.

AMERICAN OVERSIGHT

Broward	General	I am a small business owner and I am struggling. Truth is as much as I want my business to open back up to make money - I value my life, my families life and my clients lives. I would rather be alive then make money and die. The lockdown should remain in place until the head doctors say that it is safe to reopen. No one wants a second wave. Please think about peoples lives - you can't take money to the grave..... Sincerely, Sheena - Owner of Experience Love Events (Pompano Beach)
Pinellas	General	Not safe to open Florida
Brevard	General	I think we should open next week. We just have to practice distance.
Santa Rosa	General	Reopen Florida. Quarantine is for sick people. Outdoors is good for health!!
Lee	General	Too soon to open in all but a restrictive sense. I do not plan to abandon the stay at home concept for some time.
Pinellas	Recreation	I believe the beaches & their parking lots should be open for exercise & sunbathing. For the most part people will social distance. I would like to see our community pool open in my 55+ neighborhood. Restaurants when you feel the time is right & guidelines to separate tables can be put in place. Face covering should be worn when shopping, etc
Polk	General	We are able to go into Target, Walmart, Lowe's, Publix's and stores of that nature with social distancing. Why are other store not not allowed to open with the same social distancing guidelines in place. Also some beaches are open. Why are all beaches not open with the same guidelines that the ones who are with success. Also why are parks not open. People are doing the correct social distancing guidelines and would continue to do so. This is difficult to understand why we are a state that is not doing anything to help get things open again. Other states that were far worse off then us are beginning to open places again. I am not talking about opening without strict guidelines but there are many things that could be done. Living in Polk county in the most northeastern corner of the county it feels like we are sometimes forgotten about. I see the residents of Jacksonville enjoying the sunshine on the beaches and here we sit in the middle of the state with nothing.
Orange	General	I'm a 66 year old, healthy retiree. While I do agree with the original stay at home order, I think that given the most recent data, we are already past the right time to reopen restaurants, bars and salons etc. I prefer that the government make the data/statistics available to the general population and allow people to indulge at their own risk! I don't need the government to tell me what to do and now that more is known, I resent that my government is still mandating that we all stay home and gathering places need to remain closed. Let us make our own choice and deal with whatever consequences ensue

AMERICAN OVERSIGHT

Marion	Professional Services	We are ready to open Hair Salon. Will take and screen customers by taking their temp before they can enter. If they have temp they will be turned away. All stations are 10-12 feet away. All stylists we have 3 will be wearing mask and gloves. All stations and chairs will be sanitized after each customer. We have followed the Governor by being closed. There have been others Salons who have stayed open, which has been unfair to us. We will do everything to.be professional to provide safety to all and only allow one customer per stylist at a time. Please help us get our business back open. Thank you
Clay	Education	I am a teacher. I DO want to go back to be with my students. We didn't even get to say goodbye. If we had known March 13th would have been the last day to be with our students, we would have done things a lot differently. That being said...how are we planning to make schools safe for students and staff? Again, I WANT to go back, but what do you plan to assure our safety? I have also heard that you may be cutting funds to education since we have no tourism dollars coming in. I understand that, but why punish teachers? Get rid of those tax breaks you gave to big corporations. Take the money back from the blood sucking charter schools. If you cut our funds, how will we afford PPE for teachers, staff, and students? How will we afford disinfectant? We already struggle with money to pay for supplies now, now since we always cut education funds. I currently pay for my own hand sanitizer and Clorox wipes for my own classroom. If I am fortunate, occasionally a parent will donate, but it is nowhere near what we will need. If we have to let teachers go to save the state money, how are we going to have the small class sizes that would be needed to have some sort of social distancing in place for our students? If you plan to continue with distance learning, you need to help lower income and rural communities with internet connectivity. Just some food for though. Thank you for your consideration.

AMERICAN OVERSIGHT

Broward	General	Mr Governor, we all know the severity of this virus. With that said it has been proven we could still serve the public with out mass infection. Grocery stores, hardware store, department stores, food delivery, convenient stores and gas stations are all operational. For those services to remain open we practice social distancing and ppe protection. People who have underlying medical issues still choose to remain home. If these services could remain operational without grave consequences then we know other company could do the same. Parks, beaches, restaurants while limiting occupancy, nail salons, hotels with limited occupancy and many other businesses. Doctors offices, dentist offices etc... We as a safe, responsible people can open up our state and get our wage earners back to work rather than condemn them to poverty. Governor DeSantis, PLEASE make this bold strategic move. Concerned, James Stefanu
Marion	General	Open parks and beaches with measured guidelines such as opening, closing times & days; Open restaurants with limited indoor & outdoor seating with spacing guidelines, employee screening, face masks on employees, limited times to allow for hygiene and sanitary measures; Oversight for all pubic venues to ensure protocols followed; Theatre openings not sooner than phase 2 or 3 because of close proximity; Large Dept stores limited days, hours increasing thru phases; Small stores with limited # patrons determined by square footage, limited data&hours increasing thru phases; Spas, nail and hair salons with limited patrons determined by square footage, limited days, hours increasing thru phases; Gyms limited patrons based on sq ft & equipment spaced, face masks on patrons $ employees, sanitizing equip after ea use & heavy cleaning day's end, limited days, hours increasing thru phases. All establishments stringent daily cleaning, testing for all employees and testing of patrons where reasonable and close proximity to others. Schools stay closed until 2020-2021 & consider combo of alternating at school/at home learning to reduce #students on campus, longer days, equipment to detect fevers in students upon entry, masks on students & staff, increase teaching aides for students help, laptops for all students, teach American history to our students in the lower grades to instill pride & understanding of our country's foundation. Thank you for the opportunity to provide public input. God bless Florida's leadership and people in keeping our state safe and well.
St. Johns	General	I don't normally comment directly on public matters but I believe this is so important, not only for the short term but for the longer term health and well being of Floridians. I would respectfully submit that the vast majority of health professionals would strongly recommend that an easing of the restrictions should NOT be pursued at this time. Despite some promising signs that things are starting to get better, we are not yet at the point that we can ease off - if we do, we risk going back to where we were a few weeks ago and the impact may be even worse. I fully understand the economic impact to date and the need to start to begin healing the economy but I would say that a delay of a few more weeks would significantly improve our prospects of controlling the virus.

AMERICAN OVERSIGHT

Orange	Education	I think gatherings on beaches and in restaurants should be monitored very closely until late June or July. By August, colleges should re open as students rely largely on college for board, food, care facilities, and jobs. It would do more harm than good to close colleges till 2021 and each campus is its own “bubble” in a way. For games, 50% capacity should be practiced, students should be allowed even anti body test taken and masks should be warn. There are over 30 strands so a vaccine will not stop it and we should not be losing out on life when vaccines won’t do much like the flu vaccines. If another outbreak occurs, keep colleges open and limit movement since everyone has already been exposed and going back home would be worse. We can open slowly with precautions. Florida has proven that not that many have been affected compared to NY
Hernando	Food	I feel opening the state up now is way too soon and feel in my gut another even more serious outbreak will occur. I think it should be at least till May 15th . Thank you.
Broward	General	We have no flatten the curve as much. Florida needs to think of public safety 1st. Small Caribbean islands with less than 10 deaths are flattening their curve till end of May. What if businesses reopen n more people get sick then what ???? Numbers need to get less before reopening
Duval	General	I do not agree with a "council" that's been made up of business persons and political donors, but ZERO medical professionals who are directly affected by this virus, and involved in the frontline battle against it. The rush to open the state instead of taking proper precautions and learning from other countries is selfish, petulant, and shows a complete disregard for human lives that WILL be lost if we rush this. The so called "leaders" of this state care more about lining their pockets and tax coffers instead of the safety of their constituents who make up the voters of this state. We WILL remember those who were willing to sacrifice people for profits come November.
Broward	Education	Do not reopen Florida until there is a cure for the coronavirus
Hillsborough	Government	Hi, As a Floridian for my entire life my Husband and I understand the importance of Florida's Economy and reopening Florida. We are concerned about the Health and well being of our most vulnerable which are the Elderly as well as others with Health Issues. As Parents to two Children we were happy with the decision to keep Schools closed until the end of the School Year for 2020 and encourage the State to remain closed until there is a Peak in Covid cases. We do understand the need for Businesses to reopen but at what cost are we willing to allow Businesses to prematurely open up? We pray that the cases stay low and stabilize however if the State of Florida is opened to soon with the Beaches, Restaurants, Hotels and Businesses as well as Parks the outcome could cause there to be a resurgent amount of Covid-19 Cases. Our hope is that the Task Force will consider all options and arguments for opening and for not reopening this soon. Best Regards, Concerned Floridian Family
Lee	Professional Services	KEEP FLORIDA CLOSED. DO NOT OPEN IT PREMATURELY.

AMERICAN OVERSIGHT

Alachua	General	I think opening up retail and government offices. Should happen and open up most dealerships and repair shops i think this would not to dangerous then later we can look into bars an clubs later
Collier	General	I am writing to express my grave concerns with reopening Florida too soon. Listen to the medical professionals and weigh their input over that from businesses. Reopening too soon will cause a resurgence of cases and our senior population can not afford that! We have been the punchline for reckless decisions and need to error on the side of an abundance of caution!
Palm Beach	Retail	As much as I need to get back to work I don't feel safe to go in to the public I feel it to soon to open the state.
Pasco	General	I worry that if Florida opens too soon then the virus will spike and Florida will have to be shut down again - making all this time we have already spent at home a waste of time. I think we should wait until we can test for Covid 19 antibodies. If cost is an issue then charge those of us who have been able to work from home, I'm glad to pay for my own tests. It may take frequent testing if the virus is still spreading. Thank you, Charlotte Horn
Miami-Dade	General	Do not open ANYTHING and let's keep everyone safe. We can't risk more people getting sick and dying just because some people can't stay home no more. Let's do everything online like we are doing now, admit jobs to do everything in a online way like clinics, etc. Restaurants to do deliveries BUT DO NOT OPEN BEACHES, MALLS OR ANY SOCIAL PLACES. THIS IS A PANDEMIC AND PEOPLE ARE BEING VERY IRRESPONSIBLE.
Miami-Dade	Education	I feel that children should not go back to school until they are guaranteed that they will be safe. At the same time every possible measure must be taken to provide children at risk with food, safe environment at home, proper school support (computers if so required for online access to programs), health care and ongoing monitoring services . Teachers also have to be guaranteed that they will be safe from this virus.
Brevard	Transportation	Open Florida. All jobs are essential!!
Duval	Retail	We need to open the state now. All the data appears to indicate this is very similar to a bad flu year and yet we have devastated the economy. As with any disease we should take precautions but destroying people's livelihoods is not acceptable. All this help is being given to small businesses but it is the large businesses which ultimately employ the majority of the workforce.
Miami-Dade	General	It is imperative that Florida remain closed. According to the Institute of Health & Metrics at UW the earliest we can begin to ease the shutdown is mid June. If we do so earlier, the curve will go right back up with hospitals full and thousands of Florida's residents dying. This would necessitate a new shutdown which would be even worse for the economy. Slow and steady will ensure public safety and generate the best success for the economy. If we rush we will have a lose lose situation.
Volusia	Healthcare	I would advise the task force to take the advice of Health Care Experts in any re opening of our state.. The health and safety of our fellow Floridians should be our first consideration.

AMERICAN OVERSIGHT

Lee	Professional Services	All Jobs are Essential. People need to go back to work. They need to pay bills. If they wear masks, take employees temp. I think everybody will be fine. Have people coming into the business wear masks. I think opening of beaches and parks was a stupid idea. People need money, so they need to go back to work.
Pinellas	Healthcare	Florida is facing multiple problems related to the COVID-19 pandemic. The embarrassment of the unemployment insurance system collapse is overwhelming a workforce which is unable to access benefits, and the business closures and related impact on our fellow citizens who are unable to pay their bills is bringing turmoil to our State finances. However, nothing could compare to the calamity which would arise from prematurely opening the State while the infection is still actively attacking and out of control. Florida has done so little testing that no reopening could be justified and would be based on pure wishful speculation. The rate of infections (reported just from hospitalizations) and the death rate are not decreasing, and it is the responsibility of government to act reasonably to protect the citizens of Florida. Even a phased reopening has the potential to be catastrophic. This is not the time to guess, no matter how much the financial suffering. As a state which depends on tourism, we cannot risk being identified as a place people go to get sick. We need a cautious, evidence and science based re-entry. We are weeks, if not months, away from that point.
St. Lucie	General	When the majority of citizens have been tested and new cases decline significantly is the right time to re-open. We have not even hit the peak on the current wave. If you open too early and a second wave comes, you will forever be painted with that brush.
Orange	Technology	The entire rest of the world is taking this seriously. The entire WORLD. Except for the US. Everyone else in the world believe in science and the thousands of doctors and people that have devoted their lives to epidemiology and virology that's are telling us this is an unprecedented event and people are dying in droves. Elderly people are people, people with diabetes are people's' parents and friends and members of communities, people with autoimmune disease such as myself are people too and our lives matter. Value the sanctity of life OVER the temper tantrums of adults that can't be bothered to care about the people in their communities. Improve our infrastructure so that small businesses don't go bankrupt and can pay their employees. But for the love of God, look at the science and don't reopen businesses as the death rate continues to increase. You are risking lives, including mine.
Orange	General	Our citizens of United States Of America need to return to work to earn a weekly paycheck that is needed to paid our monthly bills where if we continue to be on lockdown the worst will continue to happen to us for not receiving a paycheck to paid our monthly bills now
Polk	General	Time to start phased opening. Many small businesses, salons & barbershops, restaurants & others can accommodate asking patrons to mask, keeping numbers limited. We need to start expandIng those that can open.

AMERICAN OVERSIGHT

Orange	General	Our barbershop J&L Barbershop, located at 4945 S Orange blossom Trl unit2 has been closed since 03/26/2020 we are a total of 9 employees nine families eat, pay rent and live of the barbershop we have not received unemployment or the stimulus check and we have bills to pay our bills are still running we vote YES reopen all business
Volusia	Professional Services	I am a cosmetologist of 30 years and an educator in the field. I feel it would be very wrong to open salons of any kind at this point. It will be impossible for us to maintain social distancing with our clients not to mention our back rooms where us stylists gather, eat, keep our belongings etc... people come to us here from all over the country, I believe I caught the virus back in Feb. as all the snow birds from NY and the like came flocking in. As you know not all infected present with symptoms, not always a fever..so clients can not truly be screened. Also, I hate to say, clients want their services done so bad they will actually lie to us about how they are feeling, sad but true!! I feel that the antibody testing will help to know who could return to work, but I am very nervous about the 10 clients a day we will all be dealing with?? There will need to be a lot of planning in place to open salons safely, currently salons are just wanting to whip the doors open and let the people in...not a good plan. Thanks for your time!
Orange	Tourism	I request we do not reopen the state until the CDC seems it safe to do so.
Volusia	General	Don't open too quickly, many people are walking with the virus without symptoms. More testing is NEEDED.
Palm Beach	Healthcare	I have three (3) separate healthcare issues, Nursing Home and ALF protocols, testing protocols, and elective surgeries. First, it is my understanding that it is common procedure for some staff at Senior facilities to work at multiple locations. This practice would appear to increase the risk of staff unknowingly spreading the virus. The recommendation is to limit staff to one facility. Second, it is my understanding that the original recommendations for people who thought they were symptomatic to self-quarantine, and call their doctor. Forty days later, we are testing over 13,000 patients each day. The recommendation is to specifically add the language "and make an appointment to get tested" Third, even though there are elective surgeries that considered medically necessary by the attending surgeon, the hospitals in an abundance of caution are delaying these surgeries. The recommendation is to announce the date to terminate 20-72 as soon as practicable, so that patients and doctors can schedule necessary surgeries to coincide with the termination date.

AMERICAN OVERSIGHT

Leon	General	Florida's medical system and universities offer the best advice on what to do from a health perspective. As we understand the science, a phased-in approach based on accurate data will significantly decrease suffering and death, and reduce the unfathomable burden that is currently being carried by medical personnel. Please ensure that you follow their guidance as though the well-being of your loved ones is on the line for this horrible disease. We will self-isolate until government offices open. We assume government will follow continuity guidance, which supports the thriving of everyone at all levels. Therefore; our local and Florida spending will be curtailed. Tax dollars will be lost. We trust you will do what is right for all Floridians.
Pasco	Healthcare	As a registered nurse, I have several concerns about re-opening Florida right now. We do not have enough people tested for the virus and we also do not have effective and reliable testing for COVID-19 antibodies. This puts me and many other people at risk for contracting the virus. For example, If I were to have the current antibody test and the result shows I was immune to virus and I treat a patient who has COVID-19 and become infected with the virus because the test said I was immune. That would be devastating. Especially for a nurse like myself with chronic medical conditions that increases the risk for complications. We need to have 70% of the population tested for the virus before reopening the state.
Broward	Construction	I do not support re-opening Florida prematurely. We've seen how dangerous this virus can be with preventative measures in place - This is not the flu. Please extend the stay-at-home order until June 1st at the earliest. Lives are at stake! Economies can bounce back - Some people can't. Testing has been very sparse, and the prevalence of COVID is much worse than the numbers are telling us. It's simply too dangerous to go back to work right now for the majority of people. The risks outweigh the rewards here...72% of Floridians want to follow the President's guidelines on re-opening the state - There's no need to reverse over a month of progress. IF we had isolated properly the first time, perhaps we'd have a flattened curve. It's bad enough we were one of the last states to enact a stay-at-home order, let's not be one of the first to repeal the order...
Osceola	Real Estate	As an employee of an Essential Business we have only 3 people who are coming in to our office. The doors are locked to the Public. We are each in separate offices quite far apart and we make sure to maintain a 6 ft. distance when we need to talk with each other. Other small businesses should be able to do the same thing if they have space to spread themselves far enough from each other. Floridians need to be able to return to work. I am a second generation Floridian and I think we can all make the effort to keep ourselves healthy while also being able to work.

AMERICAN OVERSIGHT

Okaloosa	General	The testing has not been reliable (studies show up to 30% false negative) or widely available. I personally had to go to the ER five times and get breathing treatments before I was tested. I was told that even though I had all of the symptoms, unless I was on a ventilator or had SG approval from my military base I could not get tested. There are too many people out there that are sick and not getting counted in official numbers due to these variables. Opening up the state before we know more about what we are dealing with could be detrimental to public health and safety. It sucks being quarantined; I've been in quarantine since 22 Mar 2020 but if it keeps other people from getting sick, it is worth it. Please do not reopen before we have more solid scientific information.
Nassau	General	PLEASE OPEN UP and have people go back to work/life!!! Just have the regulation of wearing a mask, washing hands! and taking temperature of all employees. Do all these things until June. It's just another flu....stay safe! Thank you
Lee	Government	Many people are in deep trouble. Having lost their jobs and have worked hard all their lives they are about to loose their homes, transportation, etc. open up jobs. P Rolled must continue wearing masks and social distancing. Here in Lee County we're doing this before the closing. In restaurants people were sitting 6 feet apart. No matter what you decide people will complain but people are willing to work with you. Please consider to open all jobs and restaurants. ALL JOBS ARE ESSENTIAL
Miami-Dade	Government	Floridians should not pressure to reopen regardless they will always protest one way or another. If government officials open prematurely it can cause much more cases and deaths. Please keep Floridians safe even if its from themselves. Dont open yet as it is most have not held proper stay at home rules, imagine without, this is still not near over. Its hard on everone of us, but i vote health and life.. we will recover God is in control even in darkest time. .
Marion	Professional Services	I have a beauty Salon and we are ready to open, we will wear masks and sanitize regularly and I have a touchless thermometer to take customers temps and will not let anyone to enter if it's 100 or more. Safety is our number one priority and will take one client at a time, I only have three stylist that are 10- 12 feet apart and will ensure a clean and safe environment! We only have 150 positive cases in Marion County and customers are ready to get their hair done and will take precautions also. Thank you for taking my input
Pasco	Education	Kurt S. Browning, President of FADSS. Submitted on behalf of the Florida Association of District School Superintendents
Volusia	Real Estate	To open up the economy early is very foolish and will very probably be detrimental in the form of a second wave or resurgence of the virus. I understand everyone' frustration and desire to get the economy moving. But Florida still has not even met the basic recommendations to enter Phase 1 with fourteen (14) consecutive days of dropping cases of the virus. We need to be patient and think rationally. The health and safety of everyone comes first. Remember what caused the necessity of closing the economy. It was the virus. To close the economy for a possible second time would be even more disastrous.

AMERICAN OVERSIGHT

Brevard	General	I appreciate that Governor DeSantis has stated this must be done in a sensible manner. My opinion is "Live to fight another day". I feel much more testing needs to be done to provide the data required for re-opening decisions. I understand Covid-19 has simultaneously created a severe economic crisis also. However, I feel the economic crisis will be worse if we re-open then subsequently have to close back down again. These are obviously very hard decisions to make. I am grateful for the opportunity to provide comments. Respectfully Submitted, Guy Spring
Citrus	General	Until we have more reliable testing, understanding of how this virus thrives, plenty of PPE for all citizens and even a safe plan to opening up businesses slowly to prevent spikes in the virus and deaths, safety plans must laid out for all to comply. Guidelines for all businesses must be established before just letting businesses open at will.
Bay	General	Please begin to open us back up because we are losing everything.
Manatee	General	Definitely the beaches should be opened for use--Once the tourists/spring breakers were sent home the beaches should have opened for residents. Golfing (targeted sport) was open and beaches should be open for the rest of us. Antibody testing should be available readily to all. Restaurants should open with spaced seating to antibody tested individuals--who are banded.
Miami-Dade	Tourism	Please consider opening hotels . We are ready to sanitize and keep safe distancing for associates and the public alike. We got the tools.
Orange	General	Mr. Governor. I am very surprised that you are actually considering in re opening the state. I don't think it takes a rocket scientist to know that is a horrible idea. A lot of people are complaining that they have lost their jobs but the reality is, there are plenty of places where they are hiring essential workers so honestly and truly , there are jobs out there for those who have lost theirs due to covid-19. How can you even think about re opening the state when daily there a new cases? Even with all the guidelines put in place people still don't follow the rules. There is barely any social distancing, people are going out not doing the "essentials" not wearing masks. I think it's horrible that I feel You care more about money than about people's lives. As of now the Coronavirus in Florida is not contained so why would you want to open the state? More people will get sick and die if you decide to do this. FLORIDA IS NOT READY TO BE RE OPENED! Contain this plague first then gradually re open but right now with cases growing , it is not the time! I will not risk my families lives just because you're afraid to do the right thing!

AMERICAN OVERSIGHT

Polk	General	Call Texas Governor Abbott for guidance. Apparently, the current committee just wasted a who week and all they could come up with is let's ask confused and stressed masses. You were selected to make decisions that other states seem to have no problem making. Open beaches and parks (and their parking lots) now! Next, give the small retailers the same consideration as the big retailers, then let restaurants prove the have plans as monitored by local governments, then open them too. Quit wringing your hands and make a decision already, and do it now!
Alachua	General	I don't think we're ready to reopen, with cases still coming in and growing still in numbers we're going to hurt our economy more by opening too soon and risking having to shit down again.
Palm Beach	General	I would be comfortable if the State's reopening is done as conservatively as possible. There is too much we don't know about transmission, infection rate, death rate, etc. We have put all this hard work and effort into making things safer and reopening too early could make that all for nothing. I worry about the large part of our society that is older and with preexisting conditions, plus I myself don't want to experience this disease. We will learn from Georgia, but we must also listen to the input of trusted officials and medical experts. My kids and I have been staying home for quite a while and our current routine is starting to feel normal. Once the reopening starts, there should be requirements for masks. Ideally the Governor would put forth a very conservative, slow plan for reopening, with benchmarks along the way, and possible dates, all in keeping with the best advice from medical experts.
Duval	General	Please give all businesses and schools the ability to open at their discretion. Please allow masks to be optional. People can choose to work or stay-home. People can choose to wear a mask or not. The choice is the important thing. This is America- let FREEDOM ring.
Broward	General	Don't reopen until we vaccines and a sufficient tests available for everyone. I don't want to die.
Miami-Dade	Healthcare	In my humble opinion the State should take a decision with out be risking the citizens exposing them to a bounce back to the beginning of the crisis.
Citrus	General	Please do not open Florida yet, it is way too soon! Especially considering what the healthcare workers and first responders are dealing with; my son is a Firefighter on the frontline and we haven't seen him since March 14th and we miss him and the grandkids terribly, but the risk is too great! The idea of opening gyms, hair and nail salons is insane! I'm sure many voters feel as I do that another 3 or 4 weeks is a much better, realistic goal for opening our wonderful state...STAY HOME, STAY SAFE!

AMERICAN OVERSIGHT

Miami-Dade	Recreation	ALL outdoor recreation and leisure areas and pursuits should be reopened (Beaches, Outdoor pools, boardwalks and the Hollywood Broadwalk, all State and National Parks, etc). Citizens are becoming restless, edgy, angry and depressed. This will lead to non-compliance with existing regulations, violence, crime and severe mental health issues. It's been too long. We need access to more than just narrow city streets. Given the mortality and contagion rates and statistics, few citizens who contract COVID19 become extremely ill and/or succumb to this virus. We are being held hostage in our small spaces, to try and prevent a small minority from becoming infirm. However, it is time that the onus of protection is switched, to those at risk. Anyone elderly and/or with co-morbidities, can choose to take extra precautions, or remain in isolation. The rest of the population can wear masks, when physical distancing is impossible (such as we do now in stores). These openings can be rolled out slowly, with all counties in sync. Once citizens have adjusted to our new 'freedoms', decisions can be made about reopening summer camps, indoor pools and exercise facilities, etc. The longer we wait till we return to 'normal', the harder and more dangerous it will be. Please, let our people go!
Polk	Professional Services	As a hairstylist Who work close contact even with guidelines in place there are some people who refused to obide by them . And in Polk county we are increasing every day . I don't think Salons Should reopen at this time it's not safe for us until we start seeing the decreasing rates of infection per county.
Leon	Government	It is too soon to reopen Florida. We as a state need to look at other countries who eased their restrictions and the results. Per my research every country so far that has tried to open back up has had a resurgence of the virus. I understand the money and livelihoods that are being lost. But at the same time we as HUMAN BEINGS should value HUMAN lives over money. Money can be replaced but lives cannot. With the current spike in cases, no vaccine in the near future and testing being very limited, we need to wait at least until June. At the very earliest to begin this talk again at that time.

AMERICAN OVERSIGHT

Miami-Dade	General	Hello Governor , I live on Miami Beach , and am currently homeless . Even though I don't have a home , I do have a vote for or against you and your friends . I see it all to well out there . Many businesses are not , going to hurt , but are already hurting . I feel that there can be compromise between people and the safety standards . Let hotels and motels continue to be open again . If you have them a 3rd full or half full , and wearing the mask inside and outside . Besides , I would love to have a real shower , and a real bed again . Me and a friend have rented them to get a break from the street when they were open before . Not everyone homeless is a drunk or drug addict or crazy or going to steal from people . Even homeless people have a right to dignity . Also , I'm a member of aa with almost 3 decades sober . I am also in ga , which is why I'm homeless , because of my gambling . But thanks to ga meetings, I haven't had placed a bet of any kind in over 3 and a half years . I would like to see the 12 step meetings opened up again . They're essential to recovery , if need be , we can wear mask in the meetings . Or have the meetings in the parking lots . To reiterate , I can agree with mask , and social distancing . Please think about it , you asked for people's opinion , just listen to it .
Pinellas	Government	Please do NOT OPEN florida its to soon we have only had less then 30 day of stay home. Other states arecway ahead of us in stay at home. I feel like alot more people will end up sick. Were living this way in stay home and we have adjusted to it some people don't listen it's to early to open back up
Orange	General	I don't think we should open yet. People are complaining and saying those who want to stay home should stay how but open things up...if a lot of people choose to stay home then the businesses that open will have to employees with no one visiting the stores. They will just end up closing again. Stay closed. Stay safe

AMERICAN OVERSIGHT

Polk	Tourism	first of all let me say opening Orlando needs to be done in stages safely to ensure the virus doesn't spread. Firstly I would open small businesses and restaurants first with a 50% capacity for restaurants with seating 6 feet apart, would also have a person at the door counting guests in all personnel wearing masks and going round constantly to ensure all tables and chairs are wiped down, why because people have been doing stay at home too long and need to get out. Theme parks whilst there is task force in operation the theme parks should now be preparing ready to open, putting things into operation to make sure that when they are ready to open the parks ready for guests, team members should be also brought in lets say two weeks before opening to train in safety measures to keep everybody safe against the virus, and parks should only be at 50% capacity to start with its going to be difficult but if a great deal of thought is put into it can be done. Team members should also have a say in how operations are going to change, that also goes for any business that is going to open after the shutdown. I hope my thoughts and ideas are of use to the people reading this. Thank you
Miami-Dade	General	I don't think we should open the state businesses (especially locations where people gather or there is close contact like restaurants or salons) until we have enough testing where symptomatic and asymptomatic people can get easily tested with results returned quickly (within 48 hours) and tracing of any one diagnosed can be made promptly to prevent the spread. Re-opening the state early will undo all the sacrifice everyone has done for the past month.
Pinellas	Recreation	Please open up apartment communities pools and beaches and small local bingo halls
Santa Rosa	Finance	I believe that it is far past the time for you to remove these illegal orders and let the people of Florida be free citizens again. You never should have put these orders in place from the start and it is beyond time to remove them.
Pinellas	General	Governor DeSantis. ---BTW, I support that which you are now doing and have done since becoming Governor. ---Based on the events of the W Palm Beach shooting and the reaction(s) thereto, I submit that the Pinellas County Sheriff, Bob Gaultieri, is a perfect selection to advise you on any public matters and, in this case, the reopening of the state or not whenever. ---So you will know my background, I am a retired U S Army Colonel. I served 27 1/2 years before being medically retired for permanent physical disability. I graduated from Dartmouth College in 1956 with a BA in Engineering Sciences and followed that with a MS in Mechanical Engineering from the Thayer School of Engineering, Dartmouth College in 1957. I was designated a Regular Army officer upon graduation from Dartmouth, obtaining the same designation as a graduate of the USMA. I served from 1967-1969 in combat during the Vietnam War earning two decorations for valor and a Purple Heart for wounds received. Thank you. Arville L Hickerson, Colonel, U S Army Retired

AMERICAN OVERSIGHT

Duval	General	We need to re-open the state as soon as possible, with as little restrictions as possible. It has already been proven that the a larger number of people that get the virus have no symptoms. I understand we want to save lives, but there are risk to doing everyday tasks, like driving a car. Anything can happen to anyone at anytime, and we cannot continue on this path. Businesses should be required to incraase their cleaning, disinfecting and sanitation requirements, but there also needs to be personal responsibility. There will be a good number of people that will not feel comfortable going out and they won't, and if someone is concerned about getting sick, they know what precautions they need to take. I along with many people I have spoken with are ready to get back to life, as normal as possible. Let people do the things they enjoy that make life worth living. Thank you for the opportunity for our comments and thank you for listening.
Polk	General	OPEN THE STATE UP!
Leon	Healthcare	I work in healthcare, I am blessed to be working at home. I do want to see businesses across the board begin to open but, safely and in a highly monitored way. I would like to see this happen slowly in phases, while continuing to monitor whether the infection rates climb. I think it's a good idea to require citizens to wear face coverings. I know some feel it violates their constitutional rights but, sometimes we all have to sacrifice for the greater good.
Pinellas	Healthcare	Please keep the stay at home in place for a little longer. I am a senior with medical issues and live alone. Staying home by myself is very lonely but it's better than catching this virus, getting very sick or dying from it. I understand that many people are out of work and need an income. I live on a very limited income myself, but people's health is much more important. Without your health you have nothing.
Seminole	General	Until more aggressive, widespread testing strategy is available, there is no logical reason for this state to consider more widely opening. We have too many at risk populations—elderly, minorities, low income, uninsured—and the risk is too great. As a person who is still waiting for the faulty unemployment system to get it’s act together, I desperately wish to return to work. However, I live with elderly parents and I cannot manage the risk to their care. I implore you to do the right thing—which is to protect our health and wellbeing first and foremost. Already our essential workers are at risk and seeing no end in sight. Let’s not add more to their plates by re-opening too soon.
Miami-Dade	General	PLEASE DO NOT OPEN UNTIL EVERYONE CAN BE TESTED FOR ANTIBODIES AND WE HAVE GOOD DATA. WE WILL BE BACK TO SQUARE ONE IN A WEEK OTHERWISE. IT MAKES NO SENSE! DON'T DO IT. I'M IN THE HOSPITALITY INDUSTRY SO IM GETTING HURT AS MUCH AS ANYONE...BUT ITS NOT WORTH OUR LIVES. DON'T DO IT!

AMERICAN OVERSIGHT

Hernando	General	Recipe for disaster if you open now. Too soon! As long as cases are climbing, and I don't care where in the state you are, there will only be a second wave. Third wave? 4th? What if you opened a state and no one came. I know that I won't be going out anytime soon with cases climbing, not enough testing, and Covid Marys out there spreading. I also know that until real antibody tests are the mainstream, I will continue to do my business from my house, shop from my house...and forget about any entertainment even if the crowd size is 2. Eat in a restaurant? Are you nuts? Did you now see the restaurant spread map of a Chinese restaurant. Look at what is happening to countries that have already peeked! Resurgence. LEARN FROM THEM! Omg. The mighty dollar is NOT more important than people's lives. Anyone who gets sick or loses their life, if you reopen, that blood is on your hands. I can guarantee that their or their family will NOT be voting for you your next election. Be smart dammit.
Duval	General	Do start opening up Florida for businesses to resume operations this week! Provide some guidelines that are reasonable for restaurants and barbershops/salons and dentistry offices to begin to accommodate customers. After a period of time and based on Florida's experience with the virus, further loosen those guidelines with an eye on eventual resumption of normal business operations by summer.
Pinellas	Healthcare	Postpone non emergency dental care longer then May 8th. You should not consider reopening dental care to full services until June. The risk for dental professionals is very high being over 93% risk factor. Unlike other infectious diseases Covid-19 has no vaccine or cure and healthy people have known to die from it within a short period of time. With other diseases that you can catch from airborne saliva such has hepatitis or the flu, there are vaccines available and treatments to lessen the risk of catching it. Not only risking dental professionals lives but also patients because patients will not be able to wear a mask and the dental rooms are not enclosed in most dental offices leaving airborne particles to travel and infect other patients not being able to wear mask. Please consider postponing non dental emergencies and limit to only dental emergencies. We should not take unnecessary risk in the dental offices. Even with proper ppe gear the risk is too high. We have no way of testing patients before entering the office for covid-19, unlike elective surgeries done in the hospital where they are able to test patients before preforming surgical procedures lessen the risk of transmission.
Palm Beach	General	Beaches and golf courses should never have been closed. Since closure more people are walking on the course than than use to play golf. Golf can be played without breaking a social distance rule.
Broward	General	To whom it may concern: The purpose of closing everything was to avoid overwhelming the healthcare system. The numbers are way lower than originally projected and hospitals aren't in danger of being overwhelmed. At this point its causing much more harm than good for the people Of florida to be out of work and spending any savings they have left. Please reopen our state.
Lee	Food	Be Smart and be cautious because this virus is very tricky for our health care workers and all that are out and about working.

AMERICAN OVERSIGHT

Palm Beach	General	Youi should not be in a rush to open any county in Florida. People travel throughout the state and will not stay in their city/town only. We need to make sure that every citizen is protected. Many people are still not wearing masks in supermarkets. They are not concerned about anyone, including themselves. Stay the course and only reopen with the curve is at the bottom.
Broward	Tourism	To open things before there is a definite decline in cases and deaths would be a grave mistake and put more of our seniors in danger. Lives do matter.
Broward	General	Just double checking some people say it's not working snd maybe they just didn't know about the asterix * . Thank you for asking public comments that's very good idea and what a decision to make. Good luck and I will support you
Broward	Education	Please don't open up Florida yet cases of COVID 19 are still raising.
Manatee	General	I am a retired 66 year old nurse with a medical condition so I am begging you not to reopen our state Florida. I have been home 6 weeks but willing to stay home to rid thus virus. I am very active with volunteering & church activities but willing to put this on hold for while longer Blessings to you in making thus difficult decision
Palm Beach	General	I think you shouldn't open up the state until there is better testing. I for one will continue to have my food and other necessities delivered to me I won't be going out anytime soon, probably not for a few more months.
Santa Rosa	General	Please open the state. Everyone needs to wear masks and social distance but we are smart enough to do that. This started out to stop the hospitals from being overwhelmed and has morphed into we must eliminate the virus before we open. Governor DeSantis please let us go back to work.
Clay	General	Yes re-open jacksonville the retirement age can stay home . The longer this city stays closed down we will not come back from this our small businesses need to reopen and people need to get back to work but everyone smart person use precautions keep wipes in your car wash hands don't touch face so on ... I have drove to work everyday since then has started. I get fast food I go to gas stations. But I keep sanitizer in my car. I hang out with my friends I continue to live but at our house still are people and I'm alive . It's been long enough I work at Baptist and my work is starting to slow down for health care that's scary .. REOPEN but jacksonville residents need to do it smart....
Duval	General	I do not support reopening any time soon. What good is opening up early because of the economy if more people keep dying that will effect the economy too but at least desantis won't have blood on his hands. People are more important than the economy.
Leon	General	Since walk up free tests are available in Leon County until May 8,, encourage everyone to get tested before returning to their workplace. Results will be available within 72 hours. The site is not accepting my email address. Please send response to marthajanel@yahoo.com Thank you

AMERICAN OVERSIGHT

Lake	Tourism	Please do not extend the degree for no rentals shall not accept new guests for check-in for the duration of this order, which expires April 30. I would like it to say no new guests from out of state, but in-state residents could travel within the state to rental properties. We have reserved a rental which we had to push to the 1st week of May, hoping we will still be able to go. Being responsible citizens, we would be sheltering in place at the rental house, as we are doing at home, but a change of scenery would be so welcomed. Kind regards, Kim Schaefer Clermont, FL with a rental reserved on Anna Maria Island to hopefully travel to
Sarasota	General	It's too early to open back up!!! And close the beaches back down. Restaurants shouldn't even be open for takeout. Too much risk!!!
Broward	Professional Services	First- thank you for this opportunity to respond! I am comfortable with hair and nail salons opening ASAP if they have social distancing, everyone wears a mask, the chairs are sprayed down with a disinfectant, and the salon takes everyone's temperature including workers and customers. Again, thank you for my seeking our input and keeping us safe!!!
Broward	Finance	I am a self employed Financial planner. I believe it is necessary to open our State and allow each business owner to implement safety opening protocoles. I also feel that the business and it's employees should reserve the right to provide or not provide services to individuals who show signs of being sick, who do not want yo follow protocol, who do not wear masks. We need to be able to count on the Discipline and good judgement of the american people. In my view, we are all essemtial. Our jobs and businesses are all essential to the family that depends on them. We need to open up our state!.
Duval	General	i mean why not try to reopen some business this virus has virus could have been here since january when there was people getting sick and nobody knew what was going on with them if they went to the drs the dr was just calling it upper recessionary infection some people are ready to go back to work. alot of people are ready to go back to work. espiecally single partents they need to get back to work people get mad for single mothers or fathers taking their kids to the stores if they have to go get essteinals but not everyone has family that can help and with day care closes it makes it hard for them lets slowly open things back up people are ready to get back with their normal lives if you still scared to go out still stay home
Lake	Education	All students and employee who have contact with them should be tested before being allowed to return to school. There are many educators and other employees who are older than sixty-five who are at a greater risk of becoming infected. There is no way social distancing can be practiced in a school setting.
Orange	Tourism	Ready to return to Disney World, so let's get it reopened asap!

AMERICAN OVERSIGHT

Duval	General	We understand the need to start reopening businesses and my husband has been laid off for weeks with no unemployment in sight due to the system failures, which is frustrating. We are hopeful that the task force will smart and reopen slowly starting with most critical places first. Our biggest concern is that there is not adequate testing to ensure going back to work and know that other individuals are not infected or asymptomatic. If there was consistent and readily available testing, our concerns would be less. We won't be going out and using services immediately upon opening as the concerns are too great. PLEASE reopen slowly and wisely so the infection rates don't skyrocket!!
Sarasota	Healthcare	Why are there no medical doctors or healthcare professionals on your task force? This is a health crisis, not an economic crisis. It's not about stimulating the economy, it's about keeping people safe. Without the people, you have no economy . It's not about reopening businesses, it's about making sure people can stay home safely and still pay their bills. With none but CEOs making the decisions, it's abundantly clear what your priorities are. We'll remember being reduced to sacrificial logs on the fires of business when it comes time to vote.
Hillsborough	Professional Services	I am a small business owner in Hillsborough county in Tampa. I own a small salon and have 2 girls that do hair with me. They both have 2 children each and we have been closed for 6 weeks now making it difficult to pay our bills and feed our families. I decided to close my salon a week before the state actually made it mandatory to help flatten the curve and do my part to be safe. I think that if the Following guildlines are put in place we should be able to reopen may 1st. Both stylists and clients must wear a mask. Clean capes for every client. Each stylist can see 1 client at a time while the next client waits in their vehicle till the first leaves the building. Extra time between clients for extra sanitation. Contact less payments when possible. I believe restaurants should continue take out but be allowed to have indoor at 50% and outdoor seating options when possible. Everyone wears a mask when they aren't eating. Thank you for your time.
Polk	General	I would like to say to our state leaders that we must start things back up. I understand this virus will not go away and we will not have a cure till next year but there are to many people that live from pay check to pay check and work two jobs to get by. From small to the biggest business must open. Everyone in public should have to wear a mask to help from spreading the virus and social distancing. This just needs to happen. Thanks
Sarasota	Healthcare	History has been written about pandemics. Take care of the people of Florida. The economy will recover. It's not worth risking lives. The economy has already taken a major hit and it'll be years to recover. Sacrificing lives for business is immoral. The people of Florida did not elect you to barter there lives for money.

AMERICAN OVERSIGHT

Polk	General	Hello, I am writing to ask you to please open our state back up ASAP. We have not worked for going on 3 weeks now, qualify for everything and have recieved no relief as to date. We prefer to make our own money instead of waiting for the government to hand us some but considering the circumstances our job is non essential and therefore we are home sitting. Its very upsetting seeing the fear people in my community are experiencing from being home watching the news 24/7 and being told death statistics that may or may not be factual. If the states/US does not open soon there is going to be a higher death rate from suicides than covid. People can only be confined, scared and controlled for so long before they mentally lose it. It makes no sense we can be around many people at Publix, Lowes and Walmart but can not go to the small businesses where there are few to no customers And quarantining the healthy makes no sense what so ever. There is a very good youtibe video about covid 19 by Dr. Erickson you really should check out. Thank you for your time. Time to open the country back up.
Sarasota	General	Please do not rush to reopen and drip the stay at home orders etc. I know people are desperate for normalcy but we still have few answers & solutions. The value of human life is so much more important! Please be cautious and prudent and move ahead slowly & judiciously. I worry about all of us not just my family. I have kids that work in hospitals & others in my family with health issues. Everyday we seem to be surprised by more scary information & unknowns related to this virus. Please take human lives more seriously. Not to be a Pollyanna but everything else will resolve itself but we cannot bring back the dead.
Orange	Education	I am concerned that the primary focus of this task force is to serve the interests of large businesses in Florida. I do not see small business represented at all. I also notice a gaping lack of physicians, medical doctors and experts in epidemiology. My profession is in education, and although s hooks will continue distance learning for the remainder of the school year, we need to consider the implications that opening businesses will have on future school openings. I encourage you to add an innovative entrepreneur from a technology field to provide alternative operational strategies for brick and mortar businesses. I would also like to see additional representation from our legislators from every region in Florida.
Palm Beach	Finance	for those people that have lost their jobs or being laid off due to covid, with bills higher than wat unemployment assistance provides.... once the economy reopens, billers need time to pay everything...all bills shouldn't be expected to be paid at one time...grace periods are needed to get everything caught up.. to say to the least😭😭😭😭
Pinellas	General	I have been following guidelines and can continue to do so. In general, I think that what is important is that we isolate individuals who are sick, and immunocompromised due to health or age. I dont think it is correct to isolate everyone. Vaccines are not an answer either because vaccinated people also carry diseases to others. Currently vaccines are cultured on animal tissues which contain viruses themselves. This should be looked into. Due to not alot of testing, they really don't know what they are injecting into people. Handwashing and isolation of sick people is the way to go. And offer assistance to these people, not the entire country. That is not sustainable.

AMERICAN OVERSIGHT

Miami-Dade	Technology	Florida should fully open for business asap. Implement wear a mask policy for inside and outside. Setup fast testing machines in hotels, Disney, cruise ports and airports. Test everybody that stays at hotels or entering country. Test all passenger before flight in the Dr. Office and they bring a negative result of a test before the flight. This could be done for amusement parks,a convention centers etc. No more shut downs to destroy economy and people jobs. We are smarter than that.
Lake	General	I am a mother of three. 6 years, 4 years and 12months. I'm also a stay at home mom and college student. I think the longer the stay at home order stays in effect and the longer that people stay at home and the longer that schools stay closed, the safer we will be. The slower that the state opens back up the better. I just want to feel safe and keep my babies safe.
Collier	General	My wife and I are retired in our late 70s. We ask that the State re-open as soon as safe BUT with an aggressive ad campaign to encourage Social Distancing, masks etc. The risk as we see it is with the people themselves. We need continuous reminders to save our own lives as ridiculous as that sounds. Let us do it right but do it.
Indian River	General	Be smart. Go by the data. Don't open too early. Social distancing is working. I still think the beaches should be closed till end of May but nope ours are open on Tuesday Please don't let political influence decide things. Every life matters I think Florida blew it a few times letting Ny Nj and Ct flights in early during this. These people were coming her to escape and were not quarantined foe 14 days I personally think keep stay at home till Msy 31 Good luck. No decision is going to be easy Thanks for all the efforts
Palm Beach	General	While I am all for Florida re-opening, I fear it is much too soon. Please consider taking the small steps until a vaccine has been developed, or there are more tests readily available.
Collier	Food	Please DO NOT reopen our State. There are still so many unconfirmed cases of the virus. Our Governor has not made the message clear and forceful enough. There are many people of all ages that go without face coverage or gloves. Now his message to relax the control of the virus will do more harm then when it began.
Pinellas	General	Time to let people get back to work. Social distancing is very important but keeping everything shut down is not a option. I am part of the population that needs to be extra carful but we cannot make the cure worse than viruses.

AMERICAN OVERSIGHT

Pinellas	General	I am very concerned that if we do not begin opening business soon, we will see many small businesses go completely out of business. Unemployment could last much longer that our ability to help people from public funds. If we go on like this too long, it might take many years to fully recover, and many of the newly unemployed might not find jobs that will pay anywhere near what they were making. This could impact their mental health, family relationships and wellbeing in ways that might not be recoverable. Small business of all kinds are the backbone or our economy, and have never before been so vulnerable. If mandates for opening businesses include requirements for taking as many precautions as practical to keep employees and customers protected from covid-19 as might be considered reasonable, we should consider opening as soon as possible. I am retired and not in business, but I realize the importance of getting our economy restarted, even with the risk of some additional infections. We can not wait for a cure, which could take a year or more.
Walton	Real Estate	Please urge Governor Ron DeSantis NOT to re-open the rental businss in Florida on May 1st! IT IS JUST TOO SOON! We Floridians, full-time residents, do not want an influx of out-of-state strangers, vacationers, and tourists flooding into Florida bringing with them an abundance of germs like the Coronavirus! If we re-open the rentals, we will be in the predictament just like March 1st with all of the spring-breakers invading us and distributing the Virus again, causing more infections, deaths, and the re-closure of Florida. I do want essential business to re-open, in moderation, continuing the social distancing and limited groups of 10 of less. However, the rental business is not essential! In my Walton County, the BCC is re-opening all the beaches, public and private, 24/7, on May 1st, and that as well it TOO SOON! Thank you for your consideration on this Coronavirus matter. Stay safe and well!
Highlands	Government	I feel that until everyone in Florida has had the opportunity to be tested for the coronavirus or Covid 19 the State of Florida should not reopen. There has to be enough tests for every person in Florida to be tested. I know everyone is itching to reopen and get back to the way it was. But don't be in that much of a hurry. I Feel that if the State of Florida opens back up to soon thing will get worse. Then all people who wanted to open up the State of Florida will say why did we open up so soon. This is just my opinion. and I haven't been tested or had any symptoms so far Thank for Asking All Stay Safe, Stay Strong Mr. Daniel OByrne USN Retired

AMERICAN OVERSIGHT

Broward	General	A terrible idea. It's way too early. Beaches are being opened prematurely and putting tens of thousands Floridians at risk. We need MORE TESTING with published results prior to considering opening the state. We already have far too many cases of coronavirus because of the federal late response and false narratives regarding the true scenario in the US. As a result, Florida was late and the result is far too many deaths. These large numbers could have and should have been prevented. Do not reopen the state of Florida until TRULY safe to do so.
Escambia	General	Would love to see beaches open and nail and hair shops
Volusia	General	Open up the whole state. The damage to the state economy far outweighs any benefit of staying closed. Herd immunity will solve the problem.
Pinellas	General	Unsafe to open Florida. Need to maintain Social Distancing. Terrible risk of exposure to largest senior population in the country. Lives are worth more than money. I am not willing to sacrifice my life or the lives of loved ones for the pursuit of profits. The flood of visitors from elsewhere into Florida to the Visit our many attractions throughout the state will kill untold numbers of state residents. Ultimately - opening too soon will bring this state to its knees as the virus spreads more rapidly, putting the lives of our most vulnerable citizens at risk. We are voters. We will remember the prioritization of money over lives when we return to the voting booth.
St. Lucie	Food	Reopen restaurants with precaution and social distancing
Polk	General	I am a cosmetologist in Florida doing hair for 22 years. I do not think we should go back to work until health professionals say it is safe for our health to do so. I think opening Florida would be a mistake. Please DO NOT OPEN FLORIDA YET! PLEASE WAIT UNTIL HELATH OFFICIALS SAY IT IS SAFE!!
Hillsborough	Healthcare	As a dental hygienist, I personally think opening up dental offices (May 8) , where at a very high exposure rate, is to soon. I think elective procedures, non emergency should still remain postponed. I think if we go back to the “regular” ways, the number of cases will continue to grow significantly.
Lee	General	R.E.-open the stare now we need to get back to work
Madison	General	I believe it would not be in everyone’s interest to open the state at this time. As a Multiple Sclerosis and and auto-immune comprised patient, it is not safe for me to go out into the public to take care of my interest and I feel if things open up to soon might have an prolonged effect if The virus rebounds. I think it would be smarter to wait and continue with social distancing for awhile longer! Thanks for all the hard work the last several weeks and hard decisions that have been made! God bless you all, you are in my prayers for God to give you the Wisdom and guidance needed each day!

AMERICAN OVERSIGHT

Hillsborough	General	It would be irresponsible and ignorant of history to lift restrictions on social distancing and quarantine at a time when we do not have long-term strategies for preventing the disease, lack even basic hygiene and protective equipment to keep people safe, and are months away from effective treatments and vaccines. This does not go away like a wave of bad weather. It is a communicable disease. There are no rules about who it will affect and how bad it will be for supposedly health people. It is also monstrous to consider elderly people and otherwise vulnerable people an acceptable casualty in this pandemic. If we focus more on a robust plan to buy people time while researchers learn more about the disease and develop options to fight it, we will have a much more comfortable and less lethal ride back to "normality," though many (including me) would argue that the normal of before wasn't working for many vulnerable people already. Studying pandemics of the past yields one answer: we "open" after the distancing measures have been WORKING and they will stop working. The result is needless death. We shouldn't shrug that off because we think it's not going to be us. Especially since there is no guarantee of that.
Brevard	Government	Please, if you are going to start opening up businesses, start with ones that can follow safety guidelines for Corona virus spread. In addition, I think that all citizens that are able to work from home should continue to do so and it should be supported and encouraged by employers. The less physical interractions between people the better.
Broward	Healthcare	I don't think we should be opening state right now, I am a RN and have been out of work since beginning of March because we are not allowed to go into nursing homes. I applied for unemployment and the DEO website is always down when it is my day to apply. Hopefully it'll be up and running accurately soon and I can receive my unemployment benefits
Clay	Healthcare	I'm totally confused as to why the State and Government leaders think it's ok to put people lives in jeopardy. Why didn't they open up all the state and government offices first since they think we should be fine going to the nail salons, tattoo parlor, restaurants, etc.? It's clear that what's more important is money not the public health. I have health problems and I'm considered essential (sacrificial) and can't quarantine. I'm thankful I still have income coming in but the more openings that happen extends the length of time I have to live in fear of contracting the virus or pray that the cure reaches the public before the government kills everyone for money. I have never seen the job I work at in this state which helps me understand why the government is rushing to kill the people. The general public can't get simple supplies to disinfect there homes. My job produces hospital beds and struggle to fine the basic supplies. Where's the cure?

AMERICAN OVERSIGHT

Nassau	Education	I believe the government has done and overall good job of flattening the curve. Since the goal was to flatten the curve and increase necessary supplies to hospitals, we have met the goal. It is time to open Florida so that people can return to work, take personal responsibility and enjoy the freedom our country stands for. We are not a socialist society. Every person has had a chance to be educated about the dangers of COVID-19. The government has done its job of protecting the citizens and to equip hospitals. It is time to start normal life, not only for the sake of freedom, but for the sake of mental health of all citizens. I work in education and I am concerned about our students. I meet with students and families virtually via video contacts and they are overwhelmed. Our children, and leaders of the future, need to see that we act on logic, not on fear. Start testing for antibodies, look at the data for present studies about antibodies, and OPEN Florida. Continue to support those with conditions that are threatened by COVID-19, but allow the rest of us to return to work.
Putnam	Healthcare	I think we should resume our previous activities/jobs before the covid19 pandemic. Everyone should be required to wear masks . Employers should make sure their employees should wear masks properly or be sent home. Violators will be fined on first and second offense. Third offense should be jail time for putting the community at risk (jail would be a risk for them but it's better than the general public suffering for their risky behaviors). Those who don't want to wear mask should stay at home or get penalized. Social distancing should be observed as much as possible. Parks should be opened but observe social distancing except family groups who lives together. There should be guidelines on homemade masks to maximize protection as much as possible
Broward	Healthcare	I get it; florida relies on tourism. But this virus has been shown to spread at about 1:3 (one person carrying it can affect 3), and now 4 people are carriers, even if they have no symptoms. And now the new three also spread 1:3, meaning 9 additional people are now affected. It doesn't take long for this to become a much larger problem. At this point, the number of new cases has remained relatively steady for about 3 days. That is not enough to make the governors case that the curve had flattened. It is trending that way, but with an incubation period of 14 days, we need more time. That, coupled with uncertainty about *how* to reopen spaces like beaches or theme parks or hotels, complicates this. And it's unclear how many people might actually want to travel here to provide an influx of tourist dollars. If the only people who show up are florida residents then this decision is pointless. I would suggest that things should remain closed for at least mid-May, and we can evaluate again - and consult with health professionals to make the best decision for the future.
Broward	General	Open up rhe state and put rules in place And let people know if not followed there will be consequences I want to get back to work some type of normal

AMERICAN OVERSIGHT

Leon	Government	Dear Governor: I have grave concern about the premature opening of Florida Beaches and consideration for the premature opening of other non-essential businesses such as bars. I will write only of science and facts. 52,000 Americans have died as of earlier today. COVID 19 travels as much as 38 feet when one is riding a bicycle. (CDC) If the wind is blowing outdoors, it has the same effect as riding a bicycle. Sunlight, Clorox, Lysol cannot kill viral loads inside the human body without killing the one who ingests or injects these chemicals. I witnessed our President ask Dr. Birx to look into this possibility. There is a bar next door to me. It is on the Georgia Florida Border. It is a known haven for drug dealing, motor cycle gangs, driving under the influence, not paying alcohol taxes and the list goes on...Please do not open these non essential businesses. This is operated by a convicted felon who has allowed his daighters and wife to file for the extended unemployment in addition to the Stimulus.COVID 19 does not recognize boundaries. IF one person spreads it....6 weeks later we will return to where we are at this moment in time. It is a difficult decision for some. Protecting human life should not EVER be difficult and should never be considered along with economic impact. God bless the task force and your family Governor.Curtis Bradley Chapman (Toby)
Brevard	Education	Let's open up. If you want to go slow maybe each week open different venues each week. Small owner businesses first.
Palm Beach	General	Open the state. Everyone under 40yrs old with no prior condition. Back to work.
Hillsborough	Government	PLEASE THINK TWICE BEFORE YOU DO THIS , IF SOME OF THE COVID PATIENT ARE STILL TESTING POSITIV AFTER 21 DAYS AND 14 IS NOT WORKING , WE NEED ALITTLE BIT MORE TIME TO DO MORE RESEARCH ON THIS SITUATION ,AND I KNOW YOUR WANT TO DO WHAT IS RIGHT,BUT DO WHAT IS RIGHT AND HELP THE AMERICAN SLEEP BETTER AT NIGHT,BELIEV ME ALOT OF PEOPLE MAY NOT LIKE YOUR DECISION ALL THE TIME ,EVEN ME ,BUT JUST THINK ABOUT THIS,YOU DONT WANT THAT PHONE CALL THAT SOMEONE YOU KNOW, FAMILY OR FRIEND HAS BEING IN CONTACT WITH COVID19 AND DEALING WITH IT IN THE WORSE WAY,I KNOW FOR A FACT WE ALL FEAR WHAT WE DONT UNDERSTAND ,SO IF WE DONT UNDERSTAND IT DONT TAKE THAT CHANCE,PRAY ABOUT IT AND ASK GOD TO GUIDE YOU, AND YES WE MAY NOT BE HAPPY ABOUT YOUR DECISON ALL THE TIME,BUT WE WILL LIVE TO BE MAD ANOTHER DAY AND THATS IMPORTANT TO US ALL . (C-CONSIDER O-OUR V-VOICE I-IN THIS D-DECISION) COVID.

AMERICAN OVERSIGHT

Miami-Dade	General	Please make sure you implement and can enforce strict measures before you open. I do believe that many businesses can reopen if and only when the following can be enforced: 1) everyone must wear a mask when not at their residence. 2) strict enforcement of the above with civil / criminal citations for not wearing a mask 3) being able to maintain a minimum of 6ft distance 4) no dine in restaurants. There is no safe way to be in public without a mask. 5) schools: all students, staff, and teachers must wear a mask at all times. 6) school lunch ** this is a big worry - school cafeterias are overcrowded - eating lunch mean removing the mask**. A school cafeteria will be a high risk area for rapid spread. Schools need to address the risk of lunch and cafeterias before they can re open. Today, 99% of people are outdoors not wearing a mask. There is no enforcement and without the proper level of strict enforcement re-opening will cause many deaths. To reopen you must mandate masks at all times. Be able to enforce this mandate and be able to deal with non -compliance in a strict manner. Schools need to address the use of masks and risk of cafeteria lunch. Thank you Suzette Siblesz Administrator for independent dialysis facility
Indian River	Government	Please reopen government offices ASAP - construction/new development relies on them as regulators to approve site plans, building permits, inspections etc. the current “state” of affairs is disgraceful, it takes DAYS to get a return call, most undid tins are getting shoved to the back burner. Site plan approvals in many jurisdictions have been out on a TWO month hold till June.
Manatee	General	Population in Manatee County 403,253 (2019) Number of Deaths in Manatee County. 39 (23 of these deaths from TWO nursing homes) These statistics DO NOT justify closing down Manatee county. OPEN UP FLORIDA. WE WANT OUR FREEDOM BACK!!!!!!
Duval	Healthcare	It’s to soon to re- open the State and or Duval County. I work as a dental assistant, we are unable to get all the PPE required to safely see a patient. It is all on back order with no known date of when it may ship. Not to mention we can’t get hand sanitizer to put in our waiting area for patients as they come in. And the requirements keep changing on what we need to have in place to safely see our patients . I wish people were taking this more serious and really seeing what is going on and that this virus did not just show up the past few months and it will not just go away if we ignore it. It should be safety and health first and foremost.

AMERICAN OVERSIGHT

Orange	General	Opening up the state does little to help the fact that a tourism based economy is going to struggle. One of the key reasons that America is struggling is due to the lack of a solid manufacturing base, due to it being more economically viable to produce goods in China. This could be a great time to give incentives to bring responsible manufacturing to the urban areas of Florida to broaden the economic options in the state. Currently we have backed ourselves into a corner with over reliance on our tourism industry. And unfortunately even if we opened up and invited tourists back in, the numbers will be low for a long time. I doubt that most tourists will want to take the chance of having to quarantine for 14 days once they return home from vacation, so believing that we will be able to quickly go back to where we were is unrealistic. Many people are embracing working from home, and content is needed for those people. From home schooling to training, it could be valuable to have a vocational online education system. The state could hire skilled workers to teach people who are out of work the basics of low skill jobs that they might not have considered. This would pay the teacher and help quickly broaden the skill base of workers. This will be needed to train an army of contact tracers to help keep up with the outbreak. Another option is to allow unemployed people to do community service for a weekly paycheck and food services.
Sarasota	Healthcare	It is impractical and immoral to open the economy in order to save business and not lives. Rebuilding an economy is much easier than rebuilding a life. Your constituents did not elect you to barter with their well-being. There is no politics in sacrificing human lives for money. History has already been written regarding pandemics and how to deal with them. During the 1918 Spanish flu politicians thought about people. People respected them and look to them to take care of them. The rich who have business and are worried about their lifestyles are complaining that we need to re-open business. However, we have not even reached the peak of this pandemic and we should wait until the numbers dwindle to zero. We cannot aggressively contain this virus without being able to reduce the numbers low enough to chase contacts. If we do it any earlier, we risk more Floridians lives. I am not okay with that.
Marion	General	I say slowly very slow open up but with stimulation. Like schools there are to many kids per teacher. Think of some other ways. Restaurant has to be limited in smaller open areas. We are all at risk. Everyone still walks around like nothing is happening and those who need to go out to get food and essentials have to be worry we don't catch anything. I myself is on stage 4 COPD and require oxygen 24 7 and I have no choice but to go out and get things I'm a single parent raising 3 teenagers. I worry that I can easily catch it bring to my kids. So yes slowly slowly open but caution. Thanks

AMERICAN OVERSIGHT

Broward	Education	We should wait until the testing is available at drs office. And there is a treatment
Orange	General	With more than 1400 cases just in Orange County i think is to early to go back
Volusia	General	We need to open everything back up, even if there are guidelines and restrictions. So many people are out of work, and unable to get unemployment rolling, and businesses are shuttering for good. Families are suffering, and it needs to stop.
Seminole	General	It is not safe to reopen the state so soon. Scientists are still learning new things about the virus every day. How can we as citizens possibly stay safe when we still don't fully understand Covid-19. Until there is mass testing in place, and we know truly what we are up against, we cannot allow our people to put their lives at risk.
Brevard	General	Florida does need to be reopened so people can get back to work and school. I do think it should be done slowly and methodically.
Collier	General	I hope you don't continue with your program to expand opening the state for commerce without approval from your medical advisors. No bars, restaurants, beaches or shopping till the curve is flattened and you get at least two weeks of declines of new cases. Don't continue with your asinine sycophantic cow towing to the hospitality industry while forgetting your responsibility to the safety of your constituents. Families that have lost loved ones from this disaster or who are living in fear of covid 19 won't forget your callous bravado to their losses when election time rolls around.
Duval	General	I support the stay at home. I do not believe your is a time to lift any part of the stay at home/self quarantine. I have coronary artery disease, high blood pressure and COPD. My concern is that I may contact the virus due to returning to my workplace that employs many individuals. 70 plus employees. Many of these people are younger, my age group is mid to later 50s. From my years experience these younger people do not follow even the simplest of directions, rules, regulations etc., Put in place to keep order, sanitation, waste, cleanliness, cross contamination, under control and repeatedly these people have been told time and time again to adhere to these rules and regulations and repeatedly these younger employees just ignore, absolutely do not care, show absolutely no concern, no regard whatsoever. Work this Said o do not feel comfortable, firstly being at work, secondly being out in the general public unless required. Many of these people wonder around aimlessly while at work and do not stay put as they should. So in the public, these people pose a serious risk to me about my community. They to this day do not where PPE, Face masks, gloves etc. I ask that another month thru the month of May tension stay at home. Masks become mandatory, gloves become mandatory both customers and employees alike. Strict regulations and guidelines adhered to with training classes that should be mandatory. Just like food, gloves needed to be changed out every single time a person comes in contact with you etc..... We need strict guidelines to follow to stop the spread of Covid-19.

AMERICAN OVERSIGHT

Brevard	Recreation	It is my concern that we reopen the state to normal business as soon as possible. I believe that it would be reasonable to allow the individual citizens to make their own choices about when, where, and how often to interact in the general population. Please let our individual freedom and liberty to rule the decisions we make. In addition, I believe that the longer we keep these restrictions in place, the more businesses we will lose and more permanent unemployment we will see. You have my full support to get us back to normal as soon as possible. Thank you for providing me a forum to express my thoughts!
Lake	General	I think you are doing a fantastic job— thank you. Please open up the economy and tell people to be responsible— especially senior citizens— our younger generations need to get on with their lives and financial futures! PS Please run for President in 2024!!!!
Duval	Professional Services	Open the hair salons, barber shops, and nail salons. By appt only, must check in outside, temp taken before coming inside. No more than 10 inside at one time. Masks must be worn by all. When u look good you feel good. People are beginning to not care which leads to depression which can lead to other unhealthy practices. Churches....promote drive in churches until this passes. Restaurants/bars.....consider waiving the penalty for SRX Percentages until they resume normal operations. Designate a day of prayer....once a week.
Hillsborough	General	You have to get childcare going ASAP. That's really hurting a lot of people who could have worked throughout this mess. Thank you.
Flagler	General	Government repartition
Duval	Recreation	It would be really nice if Gyms and Fitness centers could re-open in some capacity. As an avid weight lifter and strength trainer, health and fitness is an essential part of life.
Pinellas	Technology	The lack of testing gives us low confidence in the infection rate or recovery rate in Florida. Regular people can agree that the common sense would be to start with businesses that can reasonable work at a distance. Do not start with personal services like nail and hair salons and gyms. So not open tourist areas that will attract ... Tourists. Let's not be that Florida joke. It would be better to continue too long than to open too soon.
Hillsborough	General	Please do not rush to open Florida. Please wait til the top medical experts say it is safe to do so. If you open too soon, we will be right back to where we started (or worse) in a matter of weeks. It will mean we did all of this for no reason. People were unemployed for no reason. Businesses that closed and will likely never open again, for no reason. Please, don't risk more lives. Be patient. Let's keep Safer-at-Home for a while longer.
Broward	Government	Follow the three phase guidelines set forth by the government.
Duval	General	Open the state and let people think for themselves. Stop looking at just the virus, whilst everything else goes to the wayside. Alcohol sales are way up, glad we kept them open...
Lee	General	I think keeping the quarantine in place is the best option! At least another 2 to 4 weeks

AMERICAN OVERSIGHT

Hillsborough	General	I work for a transportation company and I hear people from the tri-state area are aching to bring their asymptomatic bodies to flood our beaches and enjoy the warmer, awesome weather. And Georgia has open their state, which they don't have enough beds in the southern parts of the state. I think it would be awesome if people of Georgia flood the northern part of Florida with sick bodies.
Broward	General	There are a number of residents that did not qualify for the stimulus (salary too high) yet are still not able to pay rent. Allowing some companies to open up by June 1 (those with 50 employees or less). If they can space their employees 6+feet apart; wearing masks/face covering; stagger people in the office to allow for coverage but not an office full of people. Allow for very small businesses (nail salons; hair dressers) to open but with the caveat that they can only seat 50% and have to observe social/physical distancing at all times. Some may have to only operate by appointment only and not open to the general public. First wave of beach openings should be residents only (allowing only the 2 adjacent zip codes to access). (i.e, Hollywood Beach open to Hollywood residents only; Surfside beaches to Surfside/Bal Harbour residents only, etc.) Continue curfews. Restaurants with 50% capacity and if they have outdoor seating, they must utilize (weather-dependent). Tax break to businesses who allow employees with children to keep working from home (to help with home schooling).
Palm Beach	Healthcare	Opening now shows total disregard for the health and wellbeing of the citizens of Florida. While I understand that businesses are suffering, opening before this has been resolved is lunacy. It simply enables the state to cut unemployment benefits, minimal as they are, and risk the health and well being of those at risk. DeSantis is showing that he is a tool if the administration in Washington, who have no empathy for the those on the front lines and thise who have been stricken .
Collier	Education	As a former public school teacher and current staff member of a college, I am concerned with the idea that we reopen too quickly. Students might have the option to study online, but I don't have that option when my college reopens. The students that visit my office frequently come in when ill, even as adults. I have a son at home who doesn't make antibodies, so the idea of students who are unaware they have this virus terrifies me. I am not opposed to testing for staff/students before our return. I also understand our economy needs to restart. I just ask for a common-sense approach to protect our citizens as best as possible. Thank you for your consideration!

AMERICAN OVERSIGHT

Lee	Government	I am extremely concerned that the decision to reopen Florida is being driven by politics and business interests. Why? 1. No medical or science people on your committee. 2. Petty petty petty to exclude the one Democrat elected statewide. 3. We have not had 14 days of decreasing cases/tests. 4. I am a 66 year old state employee with 7 years of service. I don't want to be a statistic in your urge to start up the economy prematurely. 5. Our numbers are not out control because we are physically distancing. Open up too early, we spike. Just be patient. 6. I am teleworking, as is a majority of my Department. Please keep it that way for a while. 7. Your freedom to work and go shopping and get a haircut, etc: how many lives of Floridians is that worth? Really, I would like to know. Assure you I won't be availing myself of whatever you open.
Okaloosa	Tourism	I am a native to Northwest Florida, I have been in vacation rentals for 20+ Years and the company I work for specializes in individual house rentals mainly. In our area Tourism is by far one of the largest employment industries for our area and 1/2 of my families income is driven by tourism. If you all keep Tourism closed during the peak rental time for our area there will be tremendous downfalls for a lot of people. Please we need to Re-Open Florida.
Brevard	Healthcare	Do not reopen yet, just one more month could help flatten the curve even more.

AMERICAN OVERSIGHT

Orange	Retail	I feel there is not enough testing and not enough known facts about the virus. Without having tough restrictions on where we are allowed to go and where people can gather we are opening up the opportunity for more people to gather and become infected. Tourists from around the country will flock to Florida as soon as they know that shopping centers are open even before we reopen theme parks. Our shopping malls and outlets are also a large tourist attraction for them. Our malls specifically market to tourists from around the US and other countries. We are already seeing tourists here at beaches that are already reopened. These tourists are from states such as Michigan, New York and other states that have high levels of infections. People know that they can come here on vacation already and have disregard for the health of locals here. We need to think about the local community that lives here and how much they'll be affected and or infected by allowing people together in large places. We need to be realistic and prepare for a peak of infection. Locals themselves are not consistently taking this seriously and are going out in public without masKs or protective gear therefore putting others and themself at risk. As soon as people have the OK to venture out they will in the masses and we will see tourists come full force. Retail is a gathering place on a regular day or a rainy weekend. We need to protect the people that work in retail and put their health first. The stay at home order should be in place for additional time to coincide with other states due to tourism. I understand people need to get back to work however this can cause other people their lives. We need to get the economy going but it will rebound if we reopen next week or in 2 months. People will always shop and visitors will always come. Let's not open too early and have a horrible scene with more cases because we jumped the gun! Please protect the health of our locals who work in retail!
Brevard	General	Please keep the Social Distance in effect, drive thru and take out only, and have a stronger mask policy in high traffic areas. We dont know where this is going and think it would be better for another month and we dont want no more fatalities from this virus. Thank you.
Broward	General	Governor DeSantis, I believe it's time to let the citizens of the great state of Florida reclaim their lives. As long as we continue to practice good hygiene and social distancing measures I feel we will be safe. Florida has the best weather in the Country yet we are not able to enjoy our parks, beaches or waterways! For the sake of all Floridians, please allow us to demonstrate that we can be responsible and accountable. Thank you for your consideration. Sincerely, Mary Unterbrink
Pinellas	Professional Services	Open business now

AMERICAN OVERSIGHT

Lee	General	I recommend phased reopening based upon stringent conditions as there is no no excuse to endanger many Floridian lives with a premature opening due to pressure from a vocal minority. No. 1 There should be a significant decrease in the number of new cases in all counties. No. 2 There must be an ability to immediately test anyone presenting symptoms. No. 3 There must be a statewide contact tracing force in place to quarantine any exposed. No. 4. The first businesses to open should be those with no public contact. No. 5. The next phase would be those with minimal public contact that can safely do so. No. 6 The last ones would be those that have public contact but only after there is no evidence of community spreading.
Palm Beach	General	I believe that we should reopen all businesses and allow people to isolate and trust their judgement on refraining from participation in social distancing as they see fit. I think we should follow Sweden like guidelines.
Osceola	Tourism	Keep closed. 1 more month
Broward	Healthcare	I get it; florida relies on tourism. But this virus has been shown to spread at about 1:3 (one person carrying it can affect 3), and now 4 people are carriers, even if they have no symptoms. And now the new three also spread 1:3, meaning 9 additional people are now affected. It doesn't take long for this to become a much larger problem. At this point, the number of new cases has remained relatively steady for about 3 days. That is not enough to make the governors case that the curve had flattened. It is trending that way, but with an incubation period of 14 days, we need more time. That, coupled with uncertainty about *how* to reopen spaces like beaches or theme parks or hotels, complicates this. And it's unclear how many people might actually want to travel here to provide an influx of tourist dollars. If the only people who show up are florida residents then this decision is pointless. I would suggest that things should remain closed for at least mid-May, and we can evaluate again - and consult with health professionals to make the best decision for the future.

AMERICAN OVERSIGHT

Martin	General	KEEP UP SOCIAL DISTANCING. Let the ones who want to get back to work get back. It's up to each business to what works for them as the market will show what will work in the long run. Working from home is now HIGHLY suggested if you and your company can. No mandatory mask as people don't know how to wear them. A LOT of emphasis on washing hands AND not sneezing in the elbow but a tissue. If you have to cough please do not cough around others without a tissue in hand. MOST adults have always fallen short on this one. I know because I have always been a germaophobe. The hospitals will need to separate the CO19 from regular hospital beds. Push for more online doctor visits for all. If they need to be seen by the doctor they would like to be able to have a family member with them so they are not pushed into procedures that they don't want or have not had time to think about. No out of US travel at this time. Beaches do a soft open in the morning and an afternoon. See what happens.
Lee	Healthcare	My daughter is a dental hygienist and I am scared to death about her returning to work May 8. Her office is not equipped with sufficient PPE to prevent her from contracting Covid 19. I myself would not have dental work performed unless it was an emergency! Working in a dental office is a very high risk operation and especially in the position of dental hygienist. Please reconsider the return date for dental hygienists, to a much later date, this is a matter of LIFE & DEATH!
Miami-Dade	General	It is imperative that Florida remain closed. According to the Institute of Health & Metrics at UW the earliest we can begin to ease the shutdown is mid June. If we do so earlier, the curve will go right back up with hospitals full and thousands of Florida's residents dying. This would necessitate a new shutdown which would be even worse for the economy. Slow and steady will ensure public safety and generate the best success for the economy. If we rush we will have a lose lose situation.

AMERICAN OVERSIGHT

Pinellas	Management	My recommendation would be for the task force that is giving recommendations to the governor to consult medical professionals, epidemiologist, medical doctors, laboratory Physicians, and those with experience in dealing with communicable illness before any decisions are made . I would also hope the governor will follow the federal guidelines for the three part reopening strategy..... according to the federal guideline, before phase one can be enacted.. there has to the 14t straight days of lessening cases within the state and current statistics show we are not there yet as of today, April 25th 2020. I would also hope that when the reopening of the state begins, social distancing, gloves, masks will still be required.. please do not make the mistake of reopening too soon only to result in a spike in cases. Thank you very much
Palm Beach	General	The state should not be re-opened at all..stay at home order, to remain in place, until health officials give the all clear. People are afraid. No one is going to go out, anyway, if they dont feel safe. The numbers are getting worse, not better. We havent even reached the peak, yet. Governors need to follow guidelines, put out by White House, to even jump on chart of phase 1, and not just do whatever they want. The health and safety of your citizens is at risk.
Miami-Dade	Transportation	Dont re-open florida until medical experts say it's safe.
Madison	General	I understand the financial impact this crisis is having on people and businesses. If opening small businesses with very stringent screenings and enforced social distancing could help then great. But as a mother of two small children and 36 weeks pregnant with our third, the risks are still far too unknown and great to be getting "back to normal" any time soon. The idea that our economy is more important than saving as many American lives as possible is absolutely sickening. We are a strong nation and we will recover. We just need to be prudent and smart about it.

AMERICAN OVERSIGHT

Broward	General	I am an 18 year old who has been at home since before the stay-at-home order was in place. I believe that we should reopen again and reopen soon. My concern is that people are being affected more by staying at home than this virus. People are filing for unemployment, are unable to see the doctor because of this virus, and are suffering from mental illness such as anxiety. Take me for example, I have anxiety every day because I am concerned about when we'll reopen and when I can go back to feeling some sense of normalcy. I'm also anxious because I don't have the freedom of going to see a pediatrician if needed like I once did. I understand that this lockdown is in place for our safety and protection. However, we don't have lockdowns for many things such as the flu, cold, heart disease, car accidents, and cancer and yet more people die from those things than the virus. SARS took more lives and was more effective and yet it wasn't as big of a deal as it is now. I understand why this lockdown is in place, to protect us (especially the elderly and sick) and to study this new strand of the coronavirus. However, I believe that life needs to continue and go back to how it was before. In a safe and sanitary manner of course. Our health, both mentally and physically is important as well. Studies have shown that staying at home for too long can cause issues such as mental illnesses, an increase in cardiovascular disease, sleeping problems, and much more. We need to be normal again and we cannot allow a virus to control our lives. Roughly 30,000 people have the virus and roughly 1,000 people have unfortunately passed because of this virus. However, there are 21,480,000 people living in Florida. Those numbers are extremely low. I understand that this is a fast spreading disease. I also understand that you guys are trying to keep us safe and I couldn't thank you enough for your services. However, my input is that we need a sense of normalcy again and it needs to be sooner than later. We also need to reopen public facilities such as pools and tennis courts in order to promote exercise and athletic activity. I am a swimmer and I can say that me not being in a pool and being able to train has taken a huge toll on me, both physically and mentally. Those areas should be open because social distancing can be in place and there isn't much person-to-person contact (having people swim in every other lane or one court open while the one next to it is closed.) To conclude, I am speaking on the behalf of those staying at home and those who are
Pinellas	General	I think all that should matter is everyone's safety. Just because we don't like being stuck at home and its hurting the economy should not outweigh the value of being alive! I'm not a doctor, most of us are not. They should be the ones helping to decide when to re open. We might not like being stuck at home, but I would rather be home than get to go out again and then die or contribute to someone else dying or becoming severely ill. Good luck with this huge decision! Thanks for listening.
Clay	Healthcare	There needs to be measures in place to ensure it is safe to open Florida. With summer approaching our state has an influx of vacationers who could be carriers of the virus.
Union	General	Personally, I think that businesses should open in the opposite way they were closed. Maybe begin at 50% for restaurants and other services. Slowly increase group #'s such as church, movies, night clubs, only if #'s stay good. Continue to recommend social distancing, masks, hand washing, etc. and make people aware that if the numbers begin to go up, we will need to scale back
Flagler	General	Flagler County cannot and will not survive being shut down any further. Our community is one of small town businesses and the owners are devastated. We just recently opened back up after finally having A1A restored from hurricane Matthew. It is time to open!

AMERICAN OVERSIGHT

Pasco	General	I believe that by ending the quarantine and lock down of non-essential persons and jobs at this time would cause more illness and deaths. Since this seems to be a rolling pandemic, varying in strength from place to place and time to time, I feel that a longer time frame for closure would be prudent and save life's. While many of us are enduring monetary hardship, at least we;re alive. How much of a boost to the economy is necessary to justify the possibility of having more people die?
Lee	General	Here in SW Florida, we have not seen a large number of CV cases. The damage to our economy has been exponentially worse than the health impacts to our citizenry. It's time to reopen. There is no reason to treat all areas or all citizens of Florida the same. One size does not fit all. Whatever restrictions that remain in place after April 30 should be minimal and should be limited to locales (e.g., Miami-Dade, if still appropriate) and demographic groups that are the most susceptible to the virus (e.g., nursing home residents). Waiting for a vaccine that is not likely to appear in the near future or improved availability of testing (when testing is not overly accurate) risks irreparable damage to the economy. Our citizenry has done a good job of maintaining social distancing and otherwise acting responsibly. It's time to trust people to act responsibly.
Miami-Dade	Healthcare	I completely disagree with re-opening Florida due to the obvious reasons of every day we continuously gain more and more cases as the days continue. By encouraging residents in Florida to go back out is irresponsible and completely disregarding the safe and health of everyone. We need to focus on the safety and well-being of everyone instead of focusing on the economy of the state. We need to instill programs of relief instead of just throwing people back to work and risking their safety.
Orange	Healthcare	I do NOT think it's safe to reopen Florida yet. We have increasing numbers of Covid-19 cases and we don't even have enough tests for everyone. We have a shortage of masks, gloves, and antibacterial cleaning supplies. We need to have MORE COVID-19 TESTS, decreasing infection rates, and plentiful protective equipment (masks, gloves, cleaning supplies, sanitizer) BEFORE we can reopen safely. We also need to educate the public on how to wear masks effectively and to stay off the beaches.
Orange	Tourism	I don't think we should open till mid June. Give things more time. I know it's hard but having this disease is harder. I work for a theme park and scared how I am going to feed my family with the unemployment system so messed up but I have family that will help if need be. Getting the disease is worse. Especially for me who is high risk. Please don't open till cases have gone down significantly
Lee	General	Let each person decide for themselves how to conduct their business and conduct their safety. If they choose not to protect themselves it is what it is. If they can shelter in place, they should do so but if they have to work to eat, to feed their family, KEEP their home, or pay their bills, then definitely they are ESSENTIAL.
Broward	Recreation	Please reopen the parks and beaches! Social distancing is required. Fine those who don't comply.

AMERICAN OVERSIGHT

Miami-Dade	Education	Although I think is still early to think about a reopening for the increase of new infections we observe everyday in Miami Dade, my big concern in the re opening is about childcare. How is gonna work? I have a toddler boy of 2y , his day care is suppose to open the 4th of May , how schools are gonna provide safety to the kids that playing with others and touching always anything can infect each other and bring the virus home? We know checking just the temperature is not enough. Moreover, the guidelines for the first phase of reopening should follow 14 days of no new cases , it doesn't seem to me we want to follow these guidelines , considering also the behavior of many in Miami Beach, walking with no mask , gathering and taking no care, if no strict measures are applied it will be very hard to flatten the curve and have soon those two weeks of no new cases. Thanks for listening to my opinion
Hillsborough	Government	Open everything immediately. The consequences of everything closed down far outweighs any amount of people with viruses. May 1 everything needs to be opened. This is unconstitutional and people need to work.
Palm Beach	Education	Please be very thoughtful in your guidance. I believe we should use the cellphone more to get the word out to more people on a daily text messages to used social distancing at all times along with mask or face covering at all times especially at work or inside should be mandatory. Schools should supply face shields along with mask for staff and students along with require washing hands when they arrive at school or summer camp and temperature should be taken before they enter the building. Along with social distancing. Thank you so much for your time and consideration to these ideas.
Orange	Tourism	I am a travel agent and the majority of what I sell is Disney and Universal. I am requesting that you please open FL back up so that the people of the state can get back to earning a living along with those of us that are in tourism. We need to be able to put food on our table and need FL to open back up so that lives are not ruined. Thank you
Broward	General	OPEN the BEACH I am a 65 year old responsible adult- not a sproing breaker This is rediculous overreach I pay a lot of taxes to live oceanfront my neigghbors and I are going crazy for no reason Open the state now!!
Flagler	General	Open the beaches
Bay	Healthcare	My 12 year daughter is in need of her second ulnar nerve transposition. PLEASE allow orthopedic surgeons to do their jobs and help their patients! Coronavirus patients aren't the only ones suffering. Blocking doctors from helping their patients should end as soon as possible. Thank you for all that you do.

AMERICAN OVERSIGHT

Palm Beach	General	Thank you for this chance. First let's go slow. Stay at home should be in effect at least another month. As far as restaurants I think they should stay at take out. Social Distancing is still important as is wearing masks. Putting tables 6 feet apart does not allow for how many at a table. If you have a table for 4 there is no way they are social distancing etc. Unless limited to people of same household this will not work. Community Pools.(condos and residentail communities) Allow pools to open, with minimum seating if okay with boards., however continue social distancing both in and out of pool. Beaches, Would like to separate private and public beaches, but not really possible. Beaches open for swimming, walking etc, not for sitting. Again social distances to be enforced, especially at public beaches. Theater and public shows still closed probably until June Hair salons still closed,social distancing impossible. Public Gyms closed, gyms in communities can open but with a limit of no more than 10 people at a time and have to be spread out. Going back to work and opening. If companies can work telacomputing all the better., however if Social distancing is possible allow people back to work. Shops and businesses which can keep social distancing could be opened. All of the above is based on limited use, with urging of staying home for the most part. Also if any change increase in an area.of positive testing, reclose. I agree with the Governor that what is allowed in the northern part of the state, will not necessarily be okay for Dade, Broward, and Palm Beach county. These counties should be allowed to work together and modify the statewide recommendations as necessary, Thank you for the chance to have input in our way of life
Polk	Recreation	Please open up the national forrests. Being surrounded by trees and sun is NOT bad for you. Being locked in your home depressed it. You do not need to quarentine the healthy. Either open it all back up or shut down everything, even stores because more people in a store is more of a health risk than in the woods.
Lee	General	Keep Florida closed! I'm a person with an autoimmune disease and can not leave or be in contact with others. Please keep the state closed until we are healthy.
Broward	General	Please open the beaches and parks immediately. Fresh air and sunshine. Proven repeatedly to curtail the virus.
Seminole	General	To avoid a second wave of infections I would ask that the shelter in place mandate stay in effect until such time that the the body of epidemiological evidence supports a return to non essential interactions.
Miami-Dade	General	DO NOT open

AMERICAN OVERSIGHT

Brevard	General	Please do not reopen the state yet. On average, 50 people are dying a day here in Florida as a result of Covid-19. I don't know about you, but I consider that unacceptable. The current governor's order isn't being enforced completely, which may be one of the key reasons the numbers keep going up. Non-essential businesses are open on a daily basis. Housing reconstruction and lawn care on the barrier islands are operating as if everything is normal. We need at least another 2-4 weeks of fully implementing the governor's order, with NO beach access, in order to get this under control. Then, we need to do testing for everyone in the state, and tracing where people who are positive have been.
Volusia	General	People NEED TO WORK!!! I work from home, home healthcare, my husband for the county. But people who are not working must go back to work and businesses must open. Me? I just need to sit and relax on the beach again. Please let us sit and relax on our beautiful sandy beaches. That IS something that can be controlled.
Sarasota	General	Until there is a two week decline, no deaths , no new cases, I have no desire to go back to work. I am a bartender and sorry, RICK SCOTT, my life and health is more important than your insulting opion. Who are you to judge anyone!! The risk is to high at this point in time to return to work even on a part time, half capacity schedule. Florida is full of vacationers, snowbirds ... visitors from all over . Why should we be forced to choose between our health or our job! Govenor Desantis, PUT YOUR FOOT DOWN, follow the CDC guidelines ...two weeks no deaths, no new cases throughout the entire state then start talking to us about getting back to work. THANK YOU to all out there keeping us safe and healthy and caring for those that cannot care for themselves, you are all ANGELS. Those of you that want to protest and not follow guidelines step back, look at the harm you can do not only to yourselves and your family members but to your friends, their friends and that stranger who one day may help you. Lets all just RELAX and get through this, please.
Pinellas	Professional Services	Hair salon, don't take my right to work!
Orange	Accommodation	Please, keep those who need accommodation in mind so that we aren't social distancing for years.
Brevard	General	open everything up, now. people are going broke, have no access to any monetary help. the PPP was a joke. unemployment is a joke. and $1200 wont put a dent in any ones financial burden. not sure that desantis should be re-elected. our lives have been ruined.
St. Lucie	General	The White House says it's not time to open up per it's own guidelines.
Orange	General	One NoW!
Walton	General	I think it's too soon to open Florida back up. Governor Desantis made promise to the people who applied for unemployment that they would get an additional 600.00 but that did not happen. Now he wants to put people back to work to soon and watch more people get sick.
Walton	Real Estate	Please let the ban on vacation rentals expire on 4/30. We need to get the revenue stream going again to support ourselves and the local economy. Walton County will follow your lead is my request is to allow rentals to commence May 1. Thank you.

AMERICAN OVERSIGHT

Palm Beach	General	Dont risk it. Keep everything closed another month.. Better safe than sorry.. People are sick or dying.. There are certain govt OFFICES with people who have Tested positive that have not even been disinfected. STOP THE SPREAD.
Charlotte	Tourism	I am in favor of opening restaurants safely. Especially ones that have outdoor seating. I will wait a bit before dining inside. I am not in favor of theaters opening yet, or large indoor shopping malls. Most of those businesses have web shopping available. They can open after 2 more weeks. I feel retail businesses in “strip” malls could be opened safely. Hair and nail salons can also operate safely. Restaurants are a large part of Florida tourism and are needed.
Brevard	General	Does Florida plan to utilize the federal guidelines for The proposed state gating criteria as a condition for easing restrictions? If not, we insist that be used as a minimum condition . We also insist adherence to whatever restrictions are in place are enforced including civil and criminal penalities.
Collier	General	Governor DeSantis, I want to compliment you on a job well done! My opinion is that you continue to take care of our vulnerable citizens especially in Nursing Homes and LTC facilities, as you have been doing....please keep this up. I believe Florida should be OPENED UP! Of course, when the announcement is made indicate that if any one has reservations about contracting this virus, encourage them to continue to shelter in place. I am not even sure this complete shut-down of our economy was the right thing to have done. The purpose was not to over burden the hospitals....we have accomplished this. I personally am retired. However, I know people need to get back to work for their families security. Please Sir, OPEN UP!
Pasco	Healthcare	We need to follow science and not conspiracy theories about virus such as the bad mistake of buying hydroxychloroquine after being promoted by Trump. Science, facts and the health of residents matter more than political party loyalty. We need to make sure that the amount of positive covid19 cases are very low and hospitalizations are minimal. Testing of every resident iwithout symptoms s key and must be ramped up before considering easing restrictions. Antibody testing is something that must be done to determine exposure for those people, including myself, who suspect they were infected already based on symptoms I had in February. Don't listen to pressed from Trump, you represent the People of Florida including Independent voters like me. Do the right thing for the health of residents. Remember, FACTS and SCIENCE matter.

AMERICAN OVERSIGHT

Orange	General	A lot has been done to stop the spread of covid19. There won't be a safe point in months. Quarantine has made millions of Americans to lose their jobs and this is not helping the economy, it's destroying it. Florida has to open in faces now. We could be on a new normal where people who are vulnerable can stay home safe but also, helping people to get their jobs back as soon and as safe as possible.
Collier	General	I'm fighting lung cancer and don't believe we should open our state for at least 2 more weeks. We have not reached our peak and I fear it's not safe yet. Thank you
Orange	Education	Florida is not ready to reopen. I would rather stay at home longer now than to reopen and be back to the same place we are in now. The concern is that the cases and deaths keep rising. The scientists are who we should be listening to. Even if businesses and restaurants reopen, I would not go. The scientists say that we should be closed until mid June.
Miami-Dade	Retail	I am in dire need to reopen my business but I consider it's too soon for non essential business to open. In my humble opinion event though it goes against my financial interest, is that stay at home order in Dade-County should be extended at least to the middle of may or until we hit the threshold of 14 consecutive days of declining new cases of Covid 19; it will be the sensitive and safe way of reopening to a healthier and safer future. Otherwise its my opinion that if opening up to soon will do more harm than good. I just hope you all consider the health of all of us Americans before the economy. Economy will recover, lives are more important. Each person live we save by honkering just a little bit longer will be worth more than any amount of money. Respectfully. Jose Lopez
Broward	General	Florida business unless needed by the public, should not open. We do not need spas and tattoos, silly entertainment business, they should not open. Only food, markets restaurants. Doctors, Dentists. Large market chain. Also make more available tests. And each person temperature should be taken as they enter the premises..
Holmes	General	Open up the state and the economy. There are more people suffering financially than by the virus. People are going to change their habits and businesses can have safe practices in place. It is not fair for the big box stores to be open and others not able. Thankfully my professional service area of engineering is able to continue working, but others are not. They need to have the same opportunity to support and provide for themselves and families. Florida needs it and Floridians need it. Thank you for your leadership, professionalism and wisdom on how it has been handled to date. Brian Lemieux, PE

AMERICAN OVERSIGHT

Duval	Recreation	Organized, social distancing friendly sports for youth (e.g. golf, tennis, baseball, etc.), should be allowed as soon as possible, with the expectation that participants and spectators will maintain recommended social distancing as much as possible. School closures and cancellation of extra-curricular activities have been especially hard for youth and their families. Allowing for healthy, outdoor social activity, including organized team sports that can be played with a high degree of social distancing, should be permitted to promote the physical, emotional, and mental health of our communities, which have taken a huge hit during this difficult time. Potential spread of the virus during organized youth sporting activities can be mitigated by prohibiting sharing of equipment, eliminating traditional game handshakes, encouraging frequent handwashing, and other similar measures.
Palm Beach	Healthcare	Dental professionals produce aerosols when providing treatment for patients which poses a high risk for spread of Covid-19. Dental offices should remain closed until the threat of the virus is considerably lower for the protection of patients, healthcare providers, and their families. If dental offices are to reopen, then it should be mandatory to extend appointment times to allow for thourough sterilization to prevent cross contamination. Patient's must do a preprocedure rinse with peroxide. Air ventilators must be utilized to reduce aersols. No healthcare provider should be expected to work without the proper protective equiptment provided daily. Covid-19 tests should be provided at the dental office prior to each patient's appointment.
Orange	Education	Kids spread germs. Keep schools closed until there is a vaccine.
Manatee	General	We should wait to open Florida .we need to wait until may 15 two weeks will make all the difference. Don't rush now be responsible. Then open parks beaches June first open restaurant. This is my thoughts thank you for giving me a voice
Suwannee	Healthcare	I DO NOT BELIEVE WE SHOULD REOPEN THE STATE. OUR HEALTH AND SAFETY NEEDS TO COME FIRST.

AMERICAN OVERSIGHT

Miami-Dade	Healthcare	Although I truly understand the need to re-open I feel it is wrong to open up the state so quickly. As the governor and mayor Suarez have said themselves, there are people who have tested positive without any symptoms. These people are going to be going out into the world infecting others. I know of one case in particular that hit very close to home. There is this women that works at one of our more popular warehouse stores that had tested positive. She did not tell anyone for fear of being fired. One of her coworkers (friend of my family) caught covid-19 from working alongside her. Our family friend that caught the virus from this other lady took it home and passed the virus on to her husband. They lived in their own house. Their children are grown adults. The husband had underlying health conditions and ended up in the hospital. They were both tested for the virus and obviously both were positive. They discharged the woman and the husband had to be kept admitted. He died 4 days later. Why did this happen? Because of people who are positive and will not admit to it or it could just as easily been because they simply just didn't know. This poor woman is now home alone and sick without being able to say goodbye to her husband. This is not the first or last case like this. It will continue and provoke a second wave. To all those that say that we are getting taken away our constitutional rights.....no rights have been taken away. We r avoiding deaths. We are trying to preserve the rights of people to stay alive. It's easy to give statistics and talk about them. Don't forget that Behind ever statistic there is a real person suffering or dead.
Orange	General	I am a retired very active senior with chronic bronchitis who lives alone. I have been on a stay at home order now for over a month. I feel like I am on house arrest without the ankle bracelet. Prior to the stay at home order, I visited my Son and Grandchildren twice a week. I have not been able to spend time with my family for over a month now. I want the house arrest to end. We seniors need to have interaction with others. We need social interaction in person and not just on line. Please end this stay at home ordinance and let me see my family. I have a leaky water heater to replace and moldy carpet to replace in my home. I am doing much worse being confined to my home. I agree with the lady the news showed on TV today. She said we all have a appointed time to die. It may be now, it may be later. We don't know the appointed time. Please let's get our lives back.

AMERICAN OVERSIGHT

Osceola	General	I would like to suggest the opening of small business again. Hair salons, nail salons, massage spas. Ask that they still limit how many people are in a small area at a time but allow them to get back to work. Also doing the same for restaurants and retail stores, opening them back up but limiting the amount of people in the business and then eventually getting back to the norm before. I understand this virus has changed us and things may never be fully the same but we need to get back work and allowing business run again to get back the American dream of Life Liberty and the Pursuit if happiness! Thank you for your time.
Broward	Tourism	Florida should remained closed until at least June. South Florida still carries the majority of the cases. We are in no position to flood our beaches and surrounding areas with large crowds of people. Took China 76 days before they saw results and we are not even close. Keep it closed so we are all safer in the end please.
Broward	Government	Please open the state parks and beaches.
Clay	General	I think it is time to open up Florida in areas where there are few or no Covid-19 cases, or where the curve has flattened. The Governor's update tell us that the curve HAS flattened and we should be in phase 1 of the President's plan. People need to see light at the end of the tunnel and have their morale uplifted by seeing the beginning of the opening. The data shows us that it is not necessary to test everyone, many have had the virus without problems, and the death rate in the country is figured at about 0.1%. We are smart enough to continue to distance ourselves, to wear masks and gloves, and to greatly reduce numbers dealing with businesses as they open at first. I have seen on TV how the businesses in Georgia have done this. Our economy has suffered enough and people need to be, and can be, responsible for themselves. Let us start to return to some form of normal!
Broward	General	Open up. Enough of this. Start opening up!!
Orange	Government	How do we reopen Florida? We don't. We have to wait until we get a handle on this virus and make sure that the numbers are going down not just plateauing. It is very irresponsible to open Florida at this time. I want it open I'm pretty sure you want it open but like any sick child once they feel better they have to still recuperate.
Volusia	General	Follow guidelines of 14 straight days of decreasing Covid19 cases in that county, encourage continued remote working practices through May.
Miami-Dade	General	I think going forward the people need to come first I think we need to be sure on opening too soon please take heed of the medical field suggestions
Brevard	Manufacturing	Open it up people need to feed the children and the unemployment system in Florida stinks

AMERICAN OVERSIGHT

Broward	General	I have been a Florida resident for 35 years and am employed at Port Everglades, an essential component of the south Florida economy including cruise, cargo and petroleum. Having said that, I believe the great state of Florida with regards to opening back up in the midst of this terrible pandemic should proceed with caution. The economy is extremely important but so is the well being of Florida's citizenry. Please defer to the medical experts on how and when we open for business. Absolutely open in stages but only after many more tests have been done and the positive covid19 rates are trending downward. I dont believe we can put an exact date on re-opening but can base opening on testing results and actual facts. Thank you for the opportunity to share my opinion.
Broward	General	I agree that it needs to be done in phases. There are still uncertainties as to all the symptoms of this virus and there still is not a cure. And right now testing is still not available to all . I agree that employment is very important but what is the importance of a job if we are dead and not able to provide for a family. The last thing we need is a second wave if we are prematurely sent out there. I couldn't live with myself if I ever infected my child or anyone. We need to be able to handle the virus before everyone can return to our regular. So please carefully assess our health before pushing us out for it hit us even worst than it did before. Thank you
Hillsborough	Administrative	Please do not open this state before there is a vaccine and wide spread testing. You have such a large vulnerable population here. You have the elderly, you have Black & Latino communities who we can already see are disproportionately affected. We don't deserve to die because of commerce. I matter! My family matters! My children matter! This virus could kill any of us. I work for a law firm. It's included within the governor's wide portrayal of essential businesses. I don't believe this is an essential business. But I'm not allowed to work from home. I am forced to risk my life to make enough money to survive. If I'm forced to work so that lawsuits move forward then please don't do this to others, please don't reopen barber shops and restaurants etc. ... they hardly deserve this. No one does.
Seminole	Food	I don't think Florida should reopen until we have a safe vaccine. As soon as you reopen the state, the numbers will spike again. It's inevitable with how contagious this is.

AMERICAN OVERSIGHT

St. Johns	General	I've done a LOT of logical and rational thinking and evaluating of this situation. While I'm nothing more than a contracts manager, I'm an avid researcher and have read and watched information from every source available. With that being said, the best approach in my opinion, I think legislation should be put into place to allow those who are immune compromised or are afraid to go back to work and back to life the ability to collect unemployment for a specified period of time and protection from employers so they don't lose their jobs if they choose to or cannot risk their health and well being. While allowing the rest of the public who chooses and wants to go back to work and back to life to do so. There will be a resurgence of this again no matter what we do and nothing will make it better or worse. But herd immunity is a real thing and the survival rate is far higher than the fatality rate especially for those with healthy immune systems. Isolating and quarantining the healthy will actually weaken and lower their immune systems (basic science) which could cause a larger resurgence if we wait to long to open back up. Not to mention the economical and financial affects this has on the state and the people of the state.
Lake	General	Hello Yes time to reopen . If I can go to work every day yes I am in health care . Time to be normal again . Time to park and go to the beach , shop beside groceries, go to church . This is also good for your mental health and well being ! I have now monitored my news intake since it is so negative on all !!! We need more positive in our lives . Time to live again like we were . People need vacations yes even cruising!!! I have always taking precautions like washing hands sanitizers . I have never sat on top of people at the beach coughed in faces . Flu season will be upon us soon are we to keep shutting down like this ? This isn't good for the mental health also . I believe if people use there common sense we will be fine .Tank you
Duval	Healthcare	I am confident that it is time to reopen our state. We can begin slowly by getting the schools back in session and letting businesses reopen, then add sports and concerts later. This virus has proven to be less deadly than anticipated so I ask you to please consider this request to get back to our normal routines. Thank you !
Martin	Healthcare	I believe Florida is not ready for reopening. We are 8th of 52 states. We are continuing to rise. Louisiana is now 9th and their numbers are stabilizing. If we reopen we will be faced with a second wave of the corona virus. I do not believe martin county is doing enough testing. I also believe some health care clinics are taking advantage of people testing ro see if they have had the virus...$150 per test that costs $33. This is not FDA approved, not covered by insurance. Beaches should not be open.
St. Johns	Recreation	Please allow in the first phase of reopening to allow the gyms to reopen as it would help

AMERICAN OVERSIGHT

Polk	General	I have custody of 4 small children and do work as a plumber I have worked 3 days total since 3/10/20 I would love to go to work but the health of my kids and everyone else is more important than any amount money even though the kids drive me nuts most of the day I don't want anything to happen to them I am 60yrs. old and worked all my life and I would like to live to see these kids grow up right. we where slow to start this lets not be to fast to start up again for the life of everyone who could get this and not be here to see us do it right its hard but hard makes us stronger in the long run be safe and think of others
Walton	General	My heart breaks for everyone now out of work and those potentially losing their small business, or having it forever impaired. (In addition to those who have had their health impacted and the families who have lost loved ones.) I think the state has to open up immediately, and all citizens must collectively bear the responsibility of doing the right things when it comes to mitigating the risk of further spread. The government has done enough in terms of restrictions and should go no further and should rescind all that are in place. The precedent this governmental response has set is completely unsustainable with respect to future health crises. We have to respond as individual citizens, which means with our liberties come responsibilities, and upon which this country was founded.
Lee	Healthcare	open up everything if you don't want it to be open then stay inside
Broward	General	With all the businesses considered essential, we found that we can safely conduct business. Please Governor DeSantis, lets's open up for business before we are all driven to the depths of poverty and dispair some won't be able to recover from. Thank you
Volusia	General	The shutdown was intended to prevent the hospitals from being overwhelmed and to beef up the PPE supply which has been done. ALL businesses should be allowed to open with the social distancing and proper PPE where necessary. NO Mayor should be allowed to override the Governors decision without his approval.

AMERICAN OVERSIGHT

Palm Beach	Management	I'm a restaurant manager in a prominent hotel in South Florida. 1) I really think that Florida's reopening process should be looked at on a county-by-county basis. The health care situation and the confirmed case rate in the tri-county area of South Florida does not reflect that of the entire state. I would go so far as to say that it should be done on an even more granular level eventually and move to a city-by-city basis. 2) Our industry needs guidelines. I know that my company will go above and beyond anything expected from us by the state as well as by our guests. HOWEVER, IF THERE ARE NO SAFETY & CLEANLINESS GUIDELINES, THERE WILL BE NO GUESTS. Customers need to feel like when they walk into a space, there are certain rules and health standards that are being followed to ensure their safety. This isn't just for maintaining constant and consistent cleanliness and safety, but it has an incredible psychological impact that would help ease anyone who is wondering whether it's safe to go our again, spend money, and jump-start our economy again. I feel very strongly about this last point. They will not come if you just tell business owners to "figure it out." The public will not trust that and continue to stay home. 3) Look at what NY State announced today about how they'll be rolling out testing. We need more testing. But that's a known fact. Give the public a plan. This helps ease people as well. Start by testing the front line workers just as you have been and giving them priority. But then start with anti-body testing for all health-care workers, police officers, fire fighters, EMTs, first responders, and elderly care workers. Then make Covid-testing available for all people whose occupations require them to interact face-to-face with others: grocery store workers, restaurant and hotel employees, care sale people, gas store clerks, dentists - super important, etc. And then move apply that same prioritization for the anti-body testing to these groups as well.
Sumter	General	Since most of the state park camping sites are not on top of each other,open the parks for camping but if you really believe it is necessary,keep the bath houses closed.
Duval	General	We should be measured and follow the guidance of our health professionals and science. I also believe we should monitor Georgia to see what happens with them before we do anything. Lets be smart about opening Florida for both natives and tourists.
Leon	General	Time to reopen FL. Agree big events not yet. Baseball, golf, other summer sports should have no spectators there; people can watch on tv. Fewer people in restaurants with spacing between tables. It seems odd to me that all small businesses like boutiques, etc were closed because usually only one or 2 people in there at a time even before Covid. Really all stores should have remained open because I can't think of any store I go into such as furniture, mall, appliance, etc that has as many people as grocery stores in Walmart. They should have all stayed open and just limit number of people. Overall, I think DeSantis is doing great job and I urge him to open our economy back up with few restrictions mentioned above. Thank you for your great leadership, Governor!
Brevard	General	Open Florida up.

AMERICAN OVERSIGHT

Orange	Recreation	We need to open up Orange County. There has been decline in COVID 19 cases in four weeks. This is a tourist town. The parks are out doors and are a happy place. This being locked up listening to media is depressing. We are Americans home of the free. I understand its a pandemic and people are getting sick and dying. We should continue to wash our hands but should have a choice to leave our homes and life is too short to not be able to be happy and enjoy happy places.
Pinellas	General	Let's open Florida back up enough is enough - be careful but be realistic
Lee	General	Florida needs to have Stay at Home order at least another month I would like to know how Jacksonville,Fl opening the beaches affected the Covid-19 cases to increase Now Miami-Dade wants to open!!! That's a real hot spot. Florida needs to be ahead of the game before we start getting people from other states coming for vacation and starting this up again like Spring Break!! The weather is still cook up a North making people antsy since all schools are closed and people out of work but...They are getting their Stimulus check and their unemployment with the extra $600.00 making it possible for them to decided to travel. WE DONT NEED Other states viruses here again to reinfect us. Yes, our economy here is a problem but LIFE AND STAYING ALIVE....is more important KEEP OTHER STATES OUT OF FLORIDA....It's enough that we have people here that don't follow the 6 Foot Social Distancing when out, they beaches in Jacksonville don't seem to be following, WE NEED TO BE KEPT SAFE IN FLORIDA because we have enough people already not following. You really think people coming from other States wii following the 14 day Quarantine when their vacation may only be 2 weeks? Then go home and Self Quarantines? I don't think so. It will get out of hand again.
Brevard	Healthcare	People need to go back to work. I'm a registered nurse who isn't "frontline" and cannot start my job due to low census. I need to pay bills and provide for my family. It's not that difficult to require people wear masks depending on the county so they can safely re enter society. Keep those immunocompromised or elderly home, have everyone go back to work. Schools should resume in the fall as well as colleges. Hospitals have enough beds and PPE for now. Keep a distance from others but don't make people be kept inside. Either way it's a negative. Risk going outside and get sick or stay inside, go manic, potentially commit suicide, no money coming in, homeless.

AMERICAN OVERSIGHT

Polk	Recreation	Hello Governor Desantis Please open vacation rentals we have a paid vacation for June 1st ending on the 15th on the Bay in a private home in Englewood beach ...The realty company Manasota Key Realty is waiting to hear the release for this to open and all other rentals they handle As a private home we will be at the private pool or on our pontoon boat continued following guidelines. Please open these also! Thank you Debbie Lacy
Palm Beach	General	Hello! I'm a mom of two children. Myself and my daughter have braces on our teeth and we are going without treatment due to the restrictions put in place for Florida. I'm supposed to get my braces off this month and my daughter needs hers tightened. These are not considered "emergencies" however this is our teeth. We did not do this for cosmetic but due to myself and my daughter having a class 3 underbite which affected our teeth and gum care. I would like restrictions loosened for orthodontics and dental care services. This is very important to me and I've talked to other moms whose kids teeth are chipping or they have lost retainers. Please allow them to open even if it means limiting capacity, sanitizing between each client or whatever needs to happen. I think we need to trust all of our healthcare providers to use common sense discretion. I feel that way for other retail outlets too but the dentist and ortho should really be allowed more flexibility. I paid a lot of money to fix mine and my daughters teeth and I don't want that to just go to the wayside overnight. We're all wearing masks and using sanitizers. I think we should open as much as possible with common sense restrictions. Thank you!
Leon	General	Dont flat out just dont. It needs to stay this way a couple more wrrks. Look at China they reopened and a few days in thw cases at the hospital started rolling in double time. We need to keep keep our community safe. As a resident i feel we need to keep it closed a few more weeks.
Pinellas	Healthcare	Governor DeSantis, I implore you to listen to scientists. Listen to experts. This has been a painful time for all of us but social distancing has worked to mitigate the damage of this virus. We cannot take our foot off the gas now. it is too early to return to normal life. Doing so will kill people -- plain and simple. It will overburden our first responders, our nurses, and our doctors. It will also ensure that we end up right back to where we started, with spiking numbers of new COVID-19 cases and a brand new need to shut things down. This will essentially wipe out the gains we made through our collective, tremendous sacrifice over the past several weeks. Do whatever you can to get checks into the hands of the people who cannot work and are hurting, and let's ride this out for as long as it takes until the experts -- not a loud minority of citizens -- decide that opening back up is the right thing to do.

AMERICAN OVERSIGHT

Brevard	Healthcare	Open up elective surgeries and preventative procedures. If hospitals feel they have enough beds for Covid patients, then let them get back to business . Keep a stay-at-home for elderly or at risk individuals. Masks if one desires. Keep practicing hand hygiene. Let's get back to work. Open public parking at beaches and parks. Open salons, tattoo shops, small businesses that depend on themselves. If the whole goal was to flatten the curve, and the curve has went down, then it worked and now we are educated and have the tools to make informed decisions.
Broward	General	just went by Home Depot. they cut hours, people are packing in like you'd think a hurricane is coming. Extend hours, limit customers. free bus rides in Broward make people ride more, packed in like sardines. yes to elective procedures - hospitals hurting - they use PPE there. I know of a suicide of hospital worker that was laid off. Holy Cross. please tell bosses to tell employees to stay home when sick! People do what they thing the boss wants, not the Gov on TV. the ones that always show up when sick will be afraid to if they hear it from the boss.
Pinellas	Healthcare	Keep Florida closed until people learn how to properly social distant. I went into Walmart two days ago for the first time in six weeks and was shocked by the amount of people not wearing masks and not using social distancing. If you look at the comments about opening the beaches, a lot of people from other states say yes open them because we have plans to visit, raising the of people who are infected and not aware of it coming here. Just open the beaches a few hours a day for now for exercise.
Seminole	Food	Please open our country back up! This feels like a communist government. This is taking away our rights of freedom. It should be our choice if we choose to get sick or not. I have not stopped working since this pandemic and the only caution I've taken at work is gloves. I see more than 100 people a day at the golf course and I have not gotten sick nor has anyone at the golf course. They barely practice social distancing now. We did not close this country when the HIV/AIDS pandemic happened and a lot more people died than. You are only hurting everyone and the economy by staying closed. So please do us all a favor and end this bull crap.

AMERICAN OVERSIGHT

Lee	General	I believe that Florida should be reopened effective immediately. All jobs are essential and people need to provide for their families. People have worked so hard to be where they are and it's not right that they should lose everything and even go hungry because things have been taken to the extreme. Not to mention- Florida is the slowest in issuing unemployment payments. Maybe if people were getting their money, they wouldn't be so eager to risk their health to work. The benefits have to outweigh the risk. I have two babies and I am a stay at home mom, but my husband lost his full time job and delivers pizza at night. If it wasn't for our food stamps, we would be hungry. He applied for unemployment over a month ago and still hasn't received payment. He will do whatever it takes to make sure our kids don't go hungry. It is a choice and people should have a choice. If they feel safer at home than that's their choice, but people who need to work can wear a face mask to protect themselves. This is not healthy for people's mental health and their welfare.
Orange	General	I think you need to give dates for Reopening to Floridians. People need an end date. Just not knowing is depressing. I understand you are working towards a plan but we have had weeks of uncertainty as to when we can have some sense of normalcy. Please give us something to look forward to even if later we have to tighten things again. People are tired of being locked down with no end in sight.
Broward	Retail	I think businesses should be given the chance to reopen with the restrictions necessary. I own a hair salon and am bleeding money every week trying to keep my staff on payroll. We need to be given the opportunity to make money or else we will never recover from this.
Nassau	General	This shutdown is hurting more people than it is helping. Antibody testing in California and New York have shown that many people had the virus with slight or no symptoms. That means the hospitalization and death rates are very low, similar to the flu. We should get back to normal immediately and let the old and frail self isolate.
Broward	Healthcare	Regarding reopening stores and the stay at home orders - PLEASE DO NOT RUSH INTO THIS - let's be safe. I know people want to go back to work and to be out and about. However, I remember my Mom telling me about the Flu in 1917-1918 - She was a little girl and said that many died and they allowed everyone to go back to life as normal and 3 times the first amount died in the second round. Please, we don't want that to happen. Help keep your people safe. Thank you.
Lake	General	Open May 1.
Marion	General	Since there's a lot of people out and about due to the very large list of "essential" jobs and others just ignoring the stay home order, our cases continue to increase daily. I think the stay home order should be extended. I don't feel we should open anything until our cases start declining and continue to do so then we could start opening things in steps with safety measures in place. It would be great if everyone was tested then those who are sick can be quarantined. Maybe that would safely speed up opening things back up. There are to many vulnerable people in this state and moving to quickly can cost more lives and us a set back in progress. Unlike the GA governor, please put the people before the economy. The economy will bounce back but some people's health may not.

AMERICAN OVERSIGHT

Lake	General	All businesses are essential. Open all restaurant patios. Open all stores. Require store employees to wear masks. Require shoppers to wear masks inside stores. Covid cases requiring hospitalization should NOT be in our general hospitals. They should be set up in field or temporary hospitals. Our healthcare system and workers should not suffer because of this virus. Entertainers are out of work. Start a fund for gig workers (artists) now. My link is www.helpfloridaartists.com Our livelihoods are gone. We need help. We need outdoor activities. All outdoor recreation should be open with social distancing guidelines. We want to know how many people have recovered.
Sarasota	General	Due to the recent studies which show that COVID 19 is not nearly as deadly as once thought, I believe it is in Florida's best interests to reopen our economy. Florida has already hit it's peak and there is no reason to keep everything closed. People must work in order support their families.
Duval	General	Flip the switch to full on. Time to let's business thrive and people live.
Collier	Professional Services	I hope you can start to relax the government overreach next week. No more stimulus money. We need to get people back to work. Salons should be able to open if they practice safe hygiene and have only one appointment inside at a time. The next one can wait in their car. All outpatient procedures and elective surgeries should resume. Rehab should be encouraged to be at home initially until all the rehab facilities have enough testing. Churches should open and practice social distancing and mask wearing. O0en 5he beaches for walking and small groups. Get restaurants open that can. People need dates to have hope and plan ahead. We cannot wait until there are zero COVID cases. People that are healthy will go out. Those who are compromised will be cautious and wait. We need to be treated like real adults. Give us good info and we will decide. We don't want government overreach.
Miami-Dade	Healthcare	I believe opening up the state in May is too soon. I know a lot of people have to work, but it will put a lot of other people in danger of getting infected. I believe social distancing and staying at home will help end this virus and people just need to be more patient and hopefully this can all end soon. The government needs to help those who do live paycheck to paycheck with suspending electric bill payments and rent for at least 2 more months. If they open up the state then they are guaranteeing a second wave that will hit harder. It will give this virus a chance to mutate and make it even worse.

AMERICAN OVERSIGHT

Seminole	General	80%-90% of those hospitalized or dying from CoViD are BOTH 65+ and have compromised health pre-conditions. So re-opened Florida should be focused on STRONGLY PROTECTING this defined group with relevant and ENFORCED EXECUTIVE ORDERS, but otherwise allow residents and visitors to VOLUNTARILY adhere to preventative and mitigating measures that are STRONGLY ADVISED and promoted by state health and political authorities. If hospitalizations of CoViD cases begin to increase after this re-opening, then EOs to selectively regulate certain businesses and/or behaviors should be introduced that are tailored with updated data and analysis to reduce hospitalizations.
Broward	Recreation	I think that golf courses are perfect places for not only recreation for most of us, but actually by it's nature, a social distancing sport. How is it any different than Martin County where friends have been golfing the whole time ? As a senior and my fellow players falling into that category too, we are very aware of the consequences of not being diligent about this virus. If the opening shows people disrespecting the rules, either kick them out or close the courses again. We'll never know unless we try. We were all practicing these procedures even before they closed the courses.
Sarasota	Healthcare	I support reopening all businesses in the state with social distancing measures implemented. I am a physical therapist that works in an outpatient clinic within a physicians' group (considered essential). I was furloughed yesterday. If businesses don't reopen soon, there won't be any businesses to go back to, including healthcare businesses.
Escambia	Recreation	1.) I hope that when Escambia County opens their beaches, they will allow seniors and special needs people to use beach chairs since rests are often needed between walks, swimming and fishing. 2.) I feel that restricted hours will cause the density of beach goers to increase during those times, thus putting people into close proximity with each other. 3.) Where applicable, such as the National Seashore or State Park entrances, allow only those with a valid Florida residency ID to enter.
Duval	General	I'm a healthy working 65 yr old female. I just have a simple point to make. I believe the problem is being made worse by closing businesses. The economy has taken a serious hit...its like rubbing salt in the wound. I believe all should be allowed to reopen with strict guidelines. No one wants to get this virus...so it makes sense everyone will take precautions. If businesses practiced the safe distance rule, if the public all wore masks, stayed home if they had any symptoms, I don't think we would be any worse off by allowing businesses to reopen. Let's begin the repair before there is so much damage .....beyond repair. As far as restaurants...if they took temperatures when someone comes in...spaced tables apart...I believe they should also be allowed to reopen. This country was not made to be shut down. I vote reopen everything...period.

AMERICAN OVERSIGHT

Pasco	Healthcare	I guess over 30,000 positive cases in Florida isn't enough to keep the minimal measures Florida has taken in place. Open the state further and the cases will sky rocket. Yes, all small businesses are suffering including mine but if we are dead we will have no small business to run.
Manatee	General	It's time to open back up and get back to work. Do it in slower phases in the hardest hit areas if that makes people feel better but it's time. Shelter in place was designed to slow the curve for the hospitals, which it's done. There is no reason not to let businesses open back up. The essential stores that have been opened this whole time have not been overwhelmed with illness or death and should be able to be used as a good gauge. Those people have been on the front lines, unprotected, dealing with customers in close proximity with no protection until recently. I'm sure if someone ran the statistics of the numbers of employees exposed to people, by the number of people they were exposed to against how many of those employees became sick, my guess is the numbers would be low. I'm sure if it were an epidemic amount, we would have heard about it on the news. Scientists are proving heat and humidity does slow or kill the virus. We have the best means to implement that at our disposal - our beaches. They need to be re-opened statewide. People should be able to use them, not be locked out of them. If some reasonable restrictions need to be placed, so be it, but open them. The taxpayers do have a right to use what they pay for don't they? If grocery and big box stores have been able to remain open with crowds of people why are the small businesses who have way less customer traffic been essentially discriminated against in not being allowed to keep their businesses open? Just because someone may think a gift shop, barber, hair stylist, clothing store, etc..., is not important to them it is to others, especially the owner trying to make a living. We all have a choice once things open - we either go to them or we don't! For those who are scared they have the option to continue to stay safer at home, away from the world. But those who chose to get back to work and life should also have that choice and right to do so. Is it possible more people will get sick? Of course, but the numbers to date have been no where near what was predicted and is an extremely small percentage of our population. If we had not know about this virus, we would have gone about normal day to day life thinking it was just another flu season strand. The majority of the people who have died from this are people who would have likely died from a cold or flu anyway. I'm not dismissing the value of their lives in any way, shape, form or manner but am merely saying it likely would have been their time anyway from any illness. We need to get our economy working
Pinellas	General	I am in favor of strategically opening the state. If each county could make the decision for their area, I think that's the best. Some counties have very few cases of Covid-19 and others have a lot. There should be some latitude based on what is happening locally. I'm concerned if we do not re-open soon that the damage to small businesses and the economy will be irreparable. Those with concerns can continue to shelter in place - elderly, those at a higher risk etc. Limit large crowds in restaurants, bars, concerts but let them set up with fewer customers but be open.
Charlotte	General	Open up!!! Please at least phase 1

AMERICAN OVERSIGHT

Hillsborough	Administrative	Current known infection levels in Florida are significantly below 1%, currently sitting at approximately .15% of the population. I find it difficult to justify saddling so many individuals so heavily with the economic and social burdens of isolation, when so few even been verifiably infected at this point. I think it's reasonable to request businesses to make accommodations for at risk individuals and those living with/ having mandatory direct contact with at risk persons until further notice, but I do not think that refusing people's ability to choose to take a health risk by continuing to work is the proper approach given current conditions. Thank you for your time and consideration in this issue.
Lake	General	Our County has been blessed with few cases- none in our town or surrounding towns. We live in a retirement community that has been proactive and have kept us in Independent Living and our neighbors in rehab, assisted living and skilled nursing healthy. That said, many are suffering here in the country with no work. Perhaps you could consider ruling that everyone wears a mask outside their home to avoid infecting others. We should reopen parks so that people can get out. And if I can go to Walmart or Target, consider opening the smaller businesses that are more easily controlled by the owner. Continue lockdown for elderly in institutions and hospitals and please - test everyone ASAP. Thanks
Alachua	General	I think it unwise to open Florida too soon. Testing is no where near what it should be and yet we are still seeing an increase in the number of cases and deaths every day. The numbers may be slowing due to the efforts we have all put forth over the last month, but it will all be for nothing if we get ahead of ourselves and reopen too soon. I think to be safe and avoid a resurgence in coronavirus cases, it would be best for us as a state to wait until it has been deemed safe by public health officials even if that may not be until June or later. We need to be smart and protect the residents of our state above all else. This disease has already taken too many lives. Let's not feed it more. The safer-at-home order is working. Don't end it too soon and erase all the progress we've made. Extending it may not be ideal for some, but it is safer for all of us.
Pasco	General	Open slowly, keep social distancing for everyone until next year. Maintain track of how many people are in stores and keep a limit amound , sliding door at all businesses, provide masks at all public evens,TEST EVERYONE EVEN IF THEY DONT HAVE SYMPTOMS!
Pasco	General	The virus is not going anywhere, the hospitals are ready. If you are in the target group, stay home. If you are not we need to be out and restarting the economy that has been devastated. Its past time to re-open and pay the stupid unemployment

AMERICAN OVERSIGHT

Sarasota	General	While I am looking very forward to being able to reopen my business, I have not been able to purchase PPE that will be necessary to protect myself and my clients. While I follow all protocol for Florida state law in sanitation I cannot absolutely guarantee the safety of my clients. I may need to have them sign liability waivers as they enter my studio. There's no way to do this job from a distance. Maybe salons should wait a little longer before they are opened. I have cleaning supplies on hand but there is no hand sanitizer to be bought anywhere. Until I can reliably source some sanitizer and face masks I will not feel safe for myself or my clients. I am a sole proprietor who shares a small space with another hairdresser. We definitely could do one client at a time each but it is a very small space.
Hillsborough	Healthcare	Reopening the state of Florida this early will be disastrous for everyone living here. With so many people already laid off and the FLDEO website completely nonfunctional, many of us are left without unemployment benefits and will be forced to decide between the safety of ourselves and our loved ones or our ability to pay rent and buy food. I am not willing to risk the lives of my immunocompromised family members to revitalize the local economy. Our lives are worth more than profits. I implore you to think about all the blood that will be on your hands if you reopen the state before things are under control.
Pinellas	General	While I want nothing more than things opening back up and life going back to normal, I belive it would be a huge mistake to start opening things up. Here in Pinellas it was just announced last week that an assisted living facility has faculty and residents test positive for the virus. If you start opening things up people will do one of two things. They will either flock to these places or they will be responsible and take precautions. It's not a risk worth taking. This isnt the end of the world and things will start going back to normal but right now we just need to grin and bear this situation like we are right now. We will survive this and we will rise stronger than ever just like with anything else we've endured.

AMERICAN OVERSIGHT

Orange	General	I do not see Personal Services listed which leaves out a very large industry of beauty and spa professionals and cosmetologists so I am selecting a general category. I feel that there should be a phased approach to reopening businesses after we really ramp up testing to get a good grasp on where we are at with the number infected. I feel beaches should remain open only for sports and physical activity, but not lounging, socializing or parking. Sun and salt air is good for health. I feel we should wait the 14 days after we flatten the curve and see a decline. I feel once restaurants allow guests that it should be outdoor seating and tables should be staggered with social distancing protocols. I feel nail salons should be allowed a small number of clientele staggered with appointments and also adhering to social distancing guidelines. Same for spas and salons but workers must have no symptoms, wear masks and gloves, clients should wear masks, and they should have medical grade protocols for cleanliness, sanitation and sterilization. Maybe even an additional training should be rolled out by the board of cosmetology to be passed and inspections should be done for practices with two or more professionals to clear their facility as safe for 1-2 clients at a time or show their setup to adhere to social distancing practices. I feel non-emergency medical should have a phased approach to opening because currently my medical provider can write a script for my labs and I can go have blood drawn, yet he cannot perform a procedure for hormone balancing as much as I need it and even though he has already tested negative for COVID 19. I feel practitioners should be tested before returning to administer treatments. At this point in Orange County which is more densely populated, I think we should extend the lockdown for another two weeks but the state really needs to speed up the unemployment system. I personally have been deemed to make too much money for TANF even though I have had $0 coming in since March 20th when we voluntarily closed our spa as a safety precaution. That money would be used to pay my electric bill and internet while I try other means of online work and my daughter finishes high school virtually.Rent assistance has only been available to those who are 2-3 weeks behind on rent...even though $0 has been coming in since March. So in summary, I feel we need to be extremely cautious and get a handle no how many cases we really have before taking a phased approach to reopening. We
Collier	Real Estate	I believe we had to re-open the economy in a socially distancing responsible manner. I am both a real estate attorney and a landlord, with a few small shopping center. Tenants are closed, and thus cannot pay the rent. I am forced to renegotiate with lenders. This economic breakdown has long tentacles. I believe that the social distancing will not overrun the hospitals and will permit our economy to be rebooted. I urge you to reopen the Economy as soon as possible. While all life is precious, we make decisions on lives and the cost to sustain lives on a daily basis. As long as our hospitals are not overburden, we should do everything possible to reopen our economy. Thank you. Tom

AMERICAN OVERSIGHT

Hillsborough	Healthcare	I suggest requiring the 6 foot rule continue. businesses where close contact is needed, masks should be worn. Require businesses to continue limiting how many people enter a large area, grocery, retail, doctor's offices and any other venue where there may be too many people in a specific space. ententes employing large numbers of employees and those interacting with the public need to be checked daily for COVID-19 symptoms. something needs to be done to make schools healthy. something needs to be done to protect seniors and those with compromised immune systems.
Seminole	General	Let's get Florida open. Social Distancing recommended. We are killing the economy. Got to stop the insanity.
Marion	General	I think you should start reopening with stores and restaurants. In other words places that people can go and still be able to practice safe social distancing.
Hillsborough	General	The re-opening of Florida in the current climate, with no known cure or halt in the progression of COVID-19, is irresponsible for the public health. Why should we re-open businesses when there is no reason for it to be open other than boredom and amusement. Until the virus is contained, the beaches must be CLOSED and remain on lock-down until things settle. We are still in the process of flattening the curve, and we shouldn't forget it. Healthcare workers are still severely lacking necessary supplies. Re-opening the public would only cause more Corona-related deaths and more hospitalizations, which are already overwhelming. Instead of re-opening Florida, we have to focus on what we can do to stop the virus and to aid people in need until that is done (via supporting healthcare workers, halting rent payments and student debt, providing food for those who have no jobs, etc). There are much bigger priorities at hand that need immediate action. Sincerely, an 18 year old who just wants to live Madeleine Coreen
Martin	Healthcare	No PPE equipment yet released by counties to non emergency health care offices. Please realize, the longer that openings and PPEs are delayed, the greater the political damage inflicted. That would be perhaps undeserved, but it will happen.
Palm Beach	General	Please do not open public places. Do not spread virus
Pasco	General	Our family supports Governor Desantis in reopening our State.
Alachua	Agriculture	I am concerned that Commissioner Fried is not on the committee, as her expertise in agriculture will be vital when it comes to opening up the rural areas of our state. I live in North Central FL, and Ag is vital to our region. It is a shame to see partisan politics get in the way of seeing professionals like Commissioner Fried on this committee.

AMERICAN OVERSIGHT

Miami-Dade	General	Despite the fact that I have lost a significant portion of my income due to the closure and I'm financially desperate, I feel that it is very important that we follow the science and proper medical advice in order to very safely reopen when the time is right. We're particularly suffering here in Miami-Dade County with the highest number of cases in the state by far. If we open too soon, we'll lose any progress already gained. I'm already concerned about what Georgia's ill-timed reopening is going to do to Florida. Do the testing, do the contact tracing, figure out what is really happening before you risk the health and lives of so many. Please listen to those with actual knowledge at the national and state levels rather than to those with personal political motivations. True leadership is doing what is right for the people as a whole as opposed to what one perceives as right only for one's self.
Pasco	General	I would like for the Task Force to please consider recommending to our Governor that Florida begin the process of opening up all areas of our economy. I am a professional singer/musician and have been working in bars, restaurants and hotels for 27 years. This shut down has had a negative effect on my financial and emotional well being. I am married and have a son and we, like all Floridians affected by this, are struggling to make ends meet. I realize the enormous burden that comes with securing public safety and I do thank the Governor for doing an excellent job during this time. However, I do believe that with the proper precautions and guidance, most businesses should be able to open back up ASAP. Performing in restaurants and bars I have seen first hand what my fellow citizens are going through. I think the service industry, more than most, has suffered tremendous loss and some people may not be able to recover. Please take into consideration all the small businesses that cannot afford to wait another day to reopen. We have to get the Florida economy back up and running or the damages could last for decades to come. Thank you very much for your time.
Okaloosa	General	Please reopen. I feel the negative economic impact is way too high a price for such a small number of people negatively affected by the virus. Keep tabs on nursing homes, make accommodations if possible for schools. These two groups need responsible people to help take care of them. Everyone else needs to take care of themselves in the best way they see fit. They can choose to take wear masks or to stay at home. Put the impetus on the individual instead of locking us all up and destroying the economy of our great state because of fear. You guys are doing a great job. Thank you!!

AMERICAN OVERSIGHT

Marion	Healthcare	Until we have access to the proper PPEs and the proper protocol to for dental health care providers to provide services, services should be limited. Offices should be opened in phases, dentists should continue to see emergent patients and any patients that can be seen via teledentistry should. Further, with proper PPEs and equipment (HVE, air filtration), dentists should begin seeing patients who have active dental caries (decay). Once PPEs (N95 masks, gowns, face shields) become readily available and equipment to reduce aerosols (HVE systems such as the Relieve HVE system) dental hygiene procedures such as nonsurgical periodontal therapy, periodontal maintenance (supportive periodontal therapy), and dental prophylaxis can then be offered to patients. It needs to be required that as these aerosol creating procedures are performed all above PPEs are used and changed in between patients to prevent cross contamination.
Lake	General	I feel that we do need to begin reopening some of the core components of our economy and new normal life. But that this should be done in graduated steps with protective measures that have already been implemented in some areas to become a standard for those seeking to reopen. Things such as counter barriers between cashiers and customers, servers and patrons. Face Shield use in situations when maintaining the 6 foot Social Distancing may be a challenge, such as salons, barber shops, people stocking shelves, etc. I do believe that any business that comes back online needs to do their best to enforce social distancing as the general population begins to venture and and burn off the pent up frustrations. My personal order of priorities is: 1 Service Business's that are currently closed. 2:Dining establishments being able to offer sit down dining. Need to get the supply chain flowing against to support Florida Farmers and producers of perishable goods.3: Retail that has been considered non essential, Department store's a lot of pent up demandl4:entertainment such as theaters and bars. Lastly tourism and attractions. The life blood of our economy but probably the most challenging to bring back online.
Osceola	Tourism	I think it is too early to relax the shelter in place order. We should have most "face to face" workers tested to be sure there is less COVID19 transmission. If possible regular citizens could get tested to verify they are not transmitting the virus. If we think it is hard now, it will ruin all of this hard work to lose ground and have to return to having to quarentine in place. This sucks now but will definitely be worse to start over again.
Miami-Dade	General	Considero que todos los Floridanos estamos ansiosos por la apertura de los negocios y el regreso a nuestras actividades cotidianas; pero considero que es algo prematuro para la ciudad de Miami, que es la más afectada. Creo que hay mucho temor porque gran cantidad de personas no respetan el distanciamiento social y siguen apareciendo gran cantidad de casos aún y continúan en aumento los fallecimientos. también nos cuestionamos por qué hay negocios abiertos en la calle 8, si no se ha dado el permiso de re-apertura. Esto demuestra que hay indisciplina por parte de la población y eso es necesario controlarlo para que la tarea de re-apertura sea exitosa.

AMERICAN OVERSIGHT

Sarasota	Finance	Retail health protection hard to be safe do not open for a while
Hillsborough	Finance	We have done a good job staying safe at home. It's time to be safe outside the home and open things up. Simple measures mandating physical distancing where possible and REQUIRING masks be worn when it's not possible will keep us on track. Certain businesses will still need to remain closed or will need to adjust to a new normal like restaurants. But in the end, we have more control over this than we think as long as people do their part.
Palm Beach	General	I believe the economy need to be restarted slowly. Businesses need to get open again, parks, entertainment place and so forth. All testing is does is determine if you have Covid-19, there is no cure yet and may not be for a long time. Besides re-opening the economy again, I believe masks should be mandatory and tested if you have a fever. I know you could not have any symptoms and still have the virus, that's why masks should be mandatory. In places like the beach or restaurants where it's hard to wear masks, social distancing should be mandatory. We can't stay at home forever! Getting back to work finding employment is very important! NON-ESSENTIAL JOBS MATTER TOO and need to open back up!
Orange	General	Time to open back up. Too many people out of work, and the data doesn't hold up enough to restrict our rights as American Citizens.
Broward	General	Please do not remove the stay at home Oder and requirement of masks for Broward, Dade and Palm Beach. We have too many cases due to spring break, cruise ships and tourism. You should consider that businesses can not obtain thermometers, masks and hand sanitizer. There will be no efficient way to police the requirements putting us all at risk. Thanks
Volusia	General	Re-open the state! The whole point of shutting everything down was to flatten the curve. That has happened. We cannot now move the goal posts. We cannot now make "new requirements" for opening things back up. We did what everyone asked, and the curve flattened. In addition, by shutting down what you all call "non-essential" services, you have told millions - MILLIONS - of Floridians that they are not essential. EVERY Floridian is essential to our state and we need them working. Small businesses, big businesses, every business that has been able to weather this so far. OPEN UP THE STATE! ALL OF IT!
Leon	General	Do not open up the state too fast. We need to ensure that there is a significant decrease in the number of cases and an increase in testing. There are still too many people not observing social distancing measures and not wearing masks; which puts Florida's aging workforce and retirees at risk.
Manatee	General	Physical health is very important! HOWEVER MENTAL health is just as important. Open Florida those at risk can stay home. People are going stir crazy sitting at home. We need our life back.

AMERICAN OVERSIGHT

Volusia	General	Reopen the state this is a virus and won't just disappear might mutate but will be around forever. People need to work, go out have fun, eat at restaurants, be with friends. If they are afraid then individuals can choose to stay at home but the majority of us want our right to live our lives.
Orange	General	Begin opening Florida. The immunocompromised can still stay home and have groceries/food delivered. The rest of us can get back to work so we can put food on the table.
Duval	Government	Is the goal of this shutdown to prevent every citizen from getting sick for any reason, or trying to reduce deaths? It should be to minimize deaths, which has been accomplished weeks ago. When a true death rate, not a padded one, is less than 1% except for old sick people (heart problems, diabetics, obesity, cancer, etc.), like it is now, there should be no restrictions on anyone. I am very disappointed in the Governor and the President in this matter. The cure is hundreds of times worse than the disease, which has proven to be a sham.
Pinellas	General	The state should remain shut down. I think it's common sense that there's still a lot of people at risk. We need to open when there are no longer any cases coming in.
Orange	Accommodation	Regardless of when things start opening up, there will be people who should remain distant so as not to come in contact with people who may be sick or asymptomatic. People who have an auto-immune disease should probably not go back to work. I have Crohn's Disease for which I take a immune-suppressant drug. My concern is that if these people choose to not go back to work right away, they might get fired or loose their unemployment benefits, when they're only trying to not get sick and die. Perhaps there could be a way for them to at least maintain their unemployment benefits?
Manatee	General	While I understand people being afraid, we cannot allow fear to continue to keep our State closed. It is ludicrous to think we can continue to live this way. If those that want all their conveniences while they sit locked inside their home want to continue to "live" that way, they have the freedom to do so. Those of us who are in favor of opening the state back up should also have that freedom. I also would strongly urge that there be no mail in voting. As citizens of the United States we should make going to the poll to cast our vote on voting day, our very top priority and not see it as an inconvenience!!'
Palm Beach	General	I am concerned about clubs and bars, particularly in college towns. I know these kids are dying to get back out there and socialize. I'm afraid that this will bring on another wave where the younger adults will be affected. It would be great if these establishments were to remain closed as long as possible.
Miami-Dade	General	I think we should until mid to end of May to begin reopening

AMERICAN OVERSIGHT

Palm Beach	General	Human lives are much more important than worrying about US dollars. Yes our country needs to return to a somewhat normal life again but it is way too soon. We are not doing enough testing yet, everyone needs to be tested to see who are carriers thus eliminating further spread. We need treatments available and closer to vaccine before reopening totally again. If you open beaches In one county what's to stop people from other counties from going to those beaches? Are you going to post police officers along the entire beach to prevent this from occurring? Are they going to limit people congregating? As it is people congregate in supermarkets making the continued spread of this virus. Our testing and numbers are not where they need to be before you even think of reopening anything especially not palm beach, broward or Miami dade I myself will not be going out to public places again for a very long time especially not without a mask on. Please be smart before opening up again. Please think of human lives-we've lost way too many already and healthcare workers are already at their maximum potential. If we rise the numbers again and flood hospitals you will lose most of your healthcare workers as they can't handle much more of this. Please don't rely on the president for guidance-do what's right for Florida Thank you
Okeechobee	General	I support re - opening Florida. People are not going to stay home no matter what you do. NON COMPLIANCE is in American value. Seems the only places closed are small businesses, restaurants (dine in) and bars. Everything else is open. During this " SHUTDOWN " IWent to a car dealership, met with friends , gained new opportunities that wouldn't have occurred during normal operations. No matter what , you aren't going to stop commerce. It's the responsibility of each and every individual to protect themselves from COVID. Nobody is forcing people to leave their homes. If they don't feel safe they can stay home.
Seminole	General	Please do not rush opening the state. Please follow the federal guidelines of 14 days of the numbers going down, then a slow phased opening. Please carefully consider the public school if this virus is still around in August. The schools are packed full of kids with no way to social distant.
Indian River	Real Estate	Families are being destroyed. We support you reopening the state of FL. Places like IIndian River and other counties that are more rural should not be treated like Dade. And get the unemployment fixed!!!
Sumter	Finance	Get the unemployment system working correctly FIRST
Hillsborough	General	My husband and I are both disabled and in a high risk category in reference to the virus. He is on oxygen. We were both born in Florida. Yes I would love a haircut & be able to go somewhere besides the grocery. Our children and grandchildren live in Florida too. But our main concern is all of our safety!! I understand how bad the economy has been hit. But want to thank you for taking things slow and really considering everyone's safety and health 1st as you reopen our state. All Our Respect
Seminole	General	Absolutely for the love of everything DO NOT open the state until EVERYONE has been tested OR YOU WILL BE RESPONSIBLE FOR EVERY DEATH THEREAFTER. Thanks!

AMERICAN OVERSIGHT

Brevard	General	Shelter at home is working. The curve is flattening...but if we don't continue we will be right back where we started. Then we will have to do it all over again. Please don't rush re-opening. The long term effects of re-opening too soon are potentially devastating!
Pinellas	General	Listen to the scientists and medical experts. If you open things up too soon we will respike and have to do this all over again. It sucks, but its better than my grandparents being killed because you want to save the "economy". People are worth more than money and it sickens me to even think that someone would be more concerned with money than saving lives. "Promote the general welfare" in the bill of rights means to me, making sure people are healthy. Thats in the first damn paragraph of the bill of rights. Do the right thing. Keep everyone at home until actual experts in science and medicine say its safe to stop. Dont listen to people who are more interested in their stocks/businesses. Those who dont care wont care until made to care, and that means they become sick or someone they love dies.
Hillsborough	Recreation	I'm desperate to have the gym back open so I can continue with working out and for stress and overall health and also find out when my daughter can rerun to her gym for competitive cheer as she has dedicated many years to the sport and every day of no practice is a deficit to her overall health and physical endurance! I think people should be responsible for wiping their equipment down and using hand sanitizers as well as common sense . I am also thinking that it would be helpful for people to get back to work and if need be for restaurants and salons etc you could have them operate at half capacity if still considered. I would not think large events like concerts should go on but as a parent to a senior desperately request graduation continue even if you make people leave a seat in between ! Our future youth deserve this and have worked so very hard !!! Thank you
Orange	Information	Microban 24 Multi-Purpose Cleaner Is listed as an approved agent against covid19. What is unique about this product is once you spray and wipe the surface, the product states it keeps the surface 99.99% germ free without having to be reused. This would greatly assist in reopening efforts across the state, if areas where their is a potential for a large gathering this product has the potential to keep commonly touched surfaces virus free.
Manatee	General	Governor DeSantis has done a great job managing this Covid 19 crisis. He thinks logically and has been making great decisions for Florida in spite of how some Floridians feel. I would like to see Florida reopen as soon as possible. We can reopen safely if we all continue to follow the CDC guidelines. Our businesses need to open so our economy can start to return again. If businesses don't want to reopen that is fine, but those businesses that do want to reopen should be given that option. I agree when the Governor states that the more options we have to spread out the fewer people will be congregating in all of the stores that are currently open. We have a greater chance of getting sick in one of these big stores then we do in a smaller business. Thank you.....

AMERICAN OVERSIGHT

Lee	General	Please reopen small businesses right away. There is no reason that I can go to Home Depot and not be able to go to my local shops. The small business owners will lose their families and livelihoods if they cannot open soon. Open restaurants at 50 to 75% capacity and allow the customers to decide whether or not to go. Allow churches to open and find their own ways to celebrate mass safely. Open the beaches and allow the public to decide if they want to go or not. Open the salons and barbershops. Reopen the malls, we know how to keep ourselves safe. Let large businesses open and let people get back to work. Of course the number of cases of COVID 19 will increase, but that number is not important. Keep a close eye on the hospitalizations. Don't waste time and money on useless rounds of testing. Treat the sick when they need it and move on. I'm over 65 with underlying conditions. I'll take care of myself. Let the rest of young and healthy population get back to their lives. Do it now. Thank you.
Volusia	General	ENOUGH ALREADY!!!!! REOPEN!!!
Hillsborough	Government	It is definitely time to re-open on May 1. I am a responsible adult and am willing to distance from people as well as wear a face mask, but I sincerely think it's time for folks to be able to get back to work if they are healthy and feeling fine. This is beginning to take a serious mental/emotional/economic toll on adults as well as children. We have done our part, it is now time to begin to attempt to get back to normal. Please do not extend the "stay at home" mandate and let us reorganize this Friday, May 1. Thank you for listening. Sincerely, Barbara Myers
Charlotte	General	We have been in our home for over 6 weeks. No outside contact. If you ppen the state we will never be able to go out. We are elderly and have obeyed the quarantine. Why are we going to be punished because of our age. Please think before you act on opening the state
Lee	Tourism	Please open beaches for access. Put time limits, social distancing requirements, whatever is appropriate. But please open up the beaches atleast.
St. Lucie	Recreation	I think re opening too early is incredibly dangerous and irresponsible. No matter how many people are complaining that they want haircuts or massages, reopening before there is a safe way to stop a resurgence of the virus is inconceivable. The state should remain the way it is, curbing the threat of the virus spreading and ensuring the safety of the residents

AMERICAN OVERSIGHT

Hillsborough	General	We should NOT reopen Florida AT ALL until it has 14 days of declining cases. We have not even flattened. 4/23 numbers spiked and tied with the highest on record! This is NOT good. Keep the status quo until we see a clear and sustained downturn. Making exceptions for counties with low numbers will likely spike them. And it would be harder to close places again than it is to just leave them closed for now. Too many businesses can't do social distancing e.g. hair salons. Once numbers are trending down for 14 days, there should be phased openings, just a few businesses at a time over a period of weeks. Even then, all should be required to wear masks, practice sanitizing measures, do social distancing, limited occupancy, etc. DO NOT MAKE ANY DECISIONS WITHOUT CONSULTING INFECTIOUS DISEASE EXPERTS! Save lives first. Mistakes can be deadly.
Hernando	Transportation	It was prudent to do before we knew, but now we know. OPEN and let us live.
Duval	Wholesale	I think opening up all small business would do better then keeping them closed because so many are hurting and may never come back from this if we dont do something now....people need to work and pay there Bill's not waiting for a stimulus check.....we are putting our country in debt and this was done all wrong....$1200.00 for one family hurting to pay their Bill's is not going to get it when the government is sending money to SSI people who have not lost any money in this crisis...and then families are laughing at the government because they are sitting at home and dont even work and live off child support and the government and have 3 kids at home and they will benefit from the stimulus checks.. they are sitting home saying yeah trump send my check...it is not fair to the families who have lost there jobs or have had there hours cut back..please open the city back up
Pinellas	General	We have done all that you asked and now it is time to give us our lives back. Please start to open the state May1st or earlier. Please trust your people to have common sense. Open all small businesses with some form of safely measure in place. Limit the amount of people, extra cleaning, etc. All businesses and employees matter so they should all be able to open. Open all beaches , at least for exercising. Condo pools as well . They are closed in Pinellas. It is time to get our lives back. We have flattened the curve and it is time to reopen the state.

AMERICAN OVERSIGHT

Orange	Healthcare	My name is Veronica Boehm and I am a behavior therapy technician. I work directly with children who have various developmental disabilities in the greater Orlando area. I also have asthma, drug allergies to prednisone, and and am being monitored for an autoimmune disorder. To put it bluntly: I could very well die if I contract the coronavirus. I have prepared an advance directive and a living will in the last month for myself, my husband, and my father who is 74 and has a heart condition. In the last few weeks, we have all gone through each stage of grief in relation to how the coronavirus has upended our lives. My career is my life. Not going to work is taxing on my finances and my psyche. However, the very real reality that if I were to contract the coronavirus I could require ICU care is a greater weight on my and my husband's shoulders than missing out on pay. I urge the task force to follow the science and data on the coronavirus. Please listen to local doctors and nurses on best practices. People like me, who are medically fragile, are terrified for our future. We all very much want our lives back in whatever the new normal entails but please don't put me, and others like me, at risk by jumping too quickly into the deep end by reopening the state before the data says it's safe. For me, and others like me, it won't be safe until there is an evidence-based treatment or vaccine.
Charlotte	General	Open back up
Seminole	General	Please reopen the state. Those elderly or at risk can voluntarily stay home and all healthy, willing individuals can go back to work and life. Playgrounds and parks should never have been closed. When the decision was made to close the state it was based on in-accurate death calculations. And although it made sense based on inflated numbers, now that we know the death rates for health people is little more than the flu, it's time to change the course and open the state. People living in a free country have the right to weigh their individual risk and chose their own path. Prolonging the shut down will cause increases in mental illness, suicide, drug abuse and domestic violence. Enough is enough...
Miami-Dade	General	Deberían esperar un poco más, aún es muy prematuro, las muertes no se pueden recuperar

AMERICAN OVERSIGHT

Hillsborough	Healthcare	I completed masters degree in nursing in the family nurse practitioner program. I am very concerned about the health and wellbeing of the public. I would like a medical evidence and research towards how to safely gather to ensure there is no public health risks of wide spread of this coronavirus. I am concerned that the government should provide relief to all people financially to ease the concerns people have over how to financially survive while following the guidelines. I am concerned people will seek income under the table regardless if there is not assistance available in the form of financial help or some means. I would love to gather with my family mostly such as my parents, brother, niece. I am in no means trying to promote further division but it seems there is a great lacking of the pieces in the government right now and I hope to see relief to everyone. It is a stressful time for many reasons and I wish and pray the health to everyone. I think those protesting in other states have legitimate concerns such as finances and everything they see now without knowing long term or short term relief and that is what we all need in this country is a clear plan both for the public and healthcare providers. With much love and respect to the government and those in a position to help I salute and appreciate the hard work being done. I know there are many dynamic aspects which are being looked at. God bless USA.
Volusia	General	Please do not go from sheltering in place with businesses closed to completely opening everything back up. Even if you ask folks to limit exposure and social distance, of businesses are open, people with poor judgement will continue to make poor decisions and begin to go out in droves again. There needs to be a methodical and enforced step plan. If salons open, there can only be x people at a time. Same with all businesses and public places. We have no idea yet how reintegrating communities will impact the curve yet. We do not need the curve to start another climb. Then we will all be home for much longer. In addition, and this is the most important part. Hygiene and sanitizing products are still impossible to find, as are appropriate face masks. How are folks going to begin to meander about communities when they won't have the tools needed to practice good hygiene and sanitizing. Also, anyone out in public needs to wear a mask. That needs to be mandatory. Happy to discuss this in further detail. Thank you.
Orange	Transportation	I'm concern of the economy relating to the airlines. My husband has been an employee of United Airlines for the last 17 yrs and is turning 65 next month. I'm sur other employees are in similar situations and may be worst. But I'd we dont get Orlando up and running very soon it already appears the the airline will be laying employees off this coming Sept. My husband wanted to continue working for at least the next 4-5 yrs and possibly long health permitting. I've hear many other small business owners are struggling as well. We need to be AMERICANS THE LAND OF THE FREE!!!!!

AMERICAN OVERSIGHT

Seminole	Information	You can't even solve the unemployment insurance crisis So I have zero confidence that you will come up with a safe and comprehensive plan to open up the state. Until numbers go down and there is a flattening of the curve over a thirty day period we should keep the status quo. Also personal contact businesses like hair and nail salons, massage and tattoo parlors, barbershops should be the last to open. There also needs to be a comprehensive plan on how businesses will be required to clean and disinfect as well as the number of people allowed to be in the facility at one time. Responsible distancing still needs to be required.
Seminole	General	Yes, reopen please. Hospitals are fine, doctors hours have bern cut as well as nurses hours which overloading the hospital system is why we went on a stay at home policy. They never were overloaded, and people are hurting without work. Let the people go bk out for work and entertainment, and let the people be smart about it. People are hurting and keeping businesses shut down has hurt do many lives. Please, talk to real doctors...not those who have not seen a patient in over twenty years such as Dr. Fauci.
Pinellas	General	Please do not be reckless and driven by money and politics. Do NOT open Florida until we have a better handle on this. One model coming out of Univ. of Washington says Florida shouldn't re-open until June 14. If you rush this, our death toll could be huge. Please proceed with caution and protect Floridians.
Hillsborough	General	Please do not be in a rush to open the state back up, this needs to be done safely and systematically. I am a small business owner who sells my chocolates at markets, but the health and safety should comes first. I play ice hockey and go to the gym. Ice hockey we have a little more space between us, but at the gym, when it opens back up,I will be going only likely a month after it opens, and very late at night when the crowds are smaller. Please, please follow the recommendations of the doctors and do this in phases. In Hillsborough County during the Emergency Policy Group Meeting they presented that the numbers have gone down, from 7% to 2% positive of those tested. But in the past week they have tested less people than three weeks ago when they had their peak of testing. The recommendations of opening back up in phases should be followed, Phase 1 of still keep social distancing, and Phase 2 loosening it a bit while still keep groups smaller than 50 people. Stores should be allowed to open, but limit the amount of people allowed in. If that is at 50% capacity or what ever still allows space and distance between patrons/customers.
Orange	General	Please remove all restrictions. Issue voluntary guide lines.
Clay	General	I believe that reopening should be done in stages. I hope we don't follow the Georgia model by opening salons and barbershops and definitely not tattoo shops. I believe you can open outdoor malls, movies if you block off seats, indoor malls if enough sanitation stations for hand cleaning.

AMERICAN OVERSIGHT

Sarasota	Management	We are not equipped to open FL. Premature opening will ruin chance of a swift economic recovery. There are no quick fixes or escape from this pandemic. We need extremely accessible and sensitive testing and contact tracing before we open. The rules are too Lax and open To interpretation as it is. The virus can not be sequestered that way. People are suffering horribly and dying due to lack of respect for the virulence of SARS CoV-2.
Pinellas	Retail	We need to reopen many of the businesses closed. Right now it appears the big box stores are able to remain open at the expense of the smaller retailers. You can go to Walmart, Lowe's, Home Depot, etc. and get what you need, but can't shop smaller retail like Bealls, Homegoods, etc. Makes no sense. Also, need dog grooming opened as well as hair salons, barbers, and lots of other small businesses. They can most certainly do what the big boxes do with less contact and contact that is known. Please let's begin to reopen the state including the beaches. Thanks!!
Pasco	General	I would like the state of Florida to open back up and allow businesses to safely we open using proper social distancing protocol.
Pasco	Recreation	The cure is becoming worse than the cold. Let those who want to stay home, stay home and the rest of Florida, get back to all aspects of life. work and play! Quarantine is for the sick, not the healthy and the numbers simply do not support a state of lock down like we're in at the moment. Open Florida NOW!!
Collier	General	Has there been a 14-day downward trajectory of documented cases of COVID-19, or a 14-day downward trajectory of positive tests as a percentage of total tests? This is the threshold issue before considering reopening? Decisions must be made on the basis of health and data. Also the statewide Democratic head of Agriculture should be on your task force. It's insane that she isn't. Don't follow Trump. He's wacky.
Palm Beach	General	There have been three studies released this week in Miami, New York, and Los Angeles. They all show that their true fatality rate from coronavirus is no worse than the seasonal flu. The economic damage that the lockdown is causing will be much worse than the disease itself. Open up Florida now! People will be losing their homes and the state will be In an economic decline for years to come.
Miami-Dade	General	I'm not in favor of reopening Florida I think is Vs a big mistake and it will cause more deaths

AMERICAN OVERSIGHT

Broward	General	(PLEASE REPLACE PREVIOUS INCOMPLETE SUBMISSION). Dear Gov DeSantis thank you for soliciting/considering our advice! -- I believe we need your strong leadership example of kind, gentle encouragement to reinforce/praise how well we "have been working together" and still need to and will continue to work together as we move back to "normal" while trying hard to understand/balance different problems. Many are tired and worn....There are such divergent needs that we need to BALANCE-- many are sick, suffering and dying while many others are very fearful with no funds for family food & shelter (we need to work together in love and not be divided). 1) As for reopening -- we need God's wisdom -- I am a Christian and think churches could/should be opened later on (like some northern states are doing - no economic impact in keeping churches closed). We are not being told we can't worship (many are using God's gift of technology in interim) and we could continue status quo and open later in order to prevent virus spread and help keep others safe -- many churches tend to congregate in close groups when together. 2) I would also suggest that you support any existing bills or propose new legislation to quickly (this year) allow deductions of charitable contributions over/above the standard deduction. It would help greatly and demonstrate that our country encourages charitable giving and caring for the vulnerable (I think it was a big mistake to eliminate this deduction - many non-profits have been struggling since its elimination, especially with the COVID19 crisis). Our country has previously used the tax code to encourage actions that would help our citizens and society in general (example after WWII - mortgage deductions). Prayer that the Lord may grant us all His wisdom, grace, guidance & blessings! In Christ, Donna
Martin	General	My wife and I are 72 and we have no idea why we can not walk on the beach. I know enough not to go with a crowd and I only want to walk and maybe take a quick swim. What is wrong with this and why has this been disallowed and why are the state parks closed? There will be no economy left if your do not start to reopen the economy. Schools are a total mess. I taught Public High School for 12 years (second career) and I think the students have been sacrificed for little gain. How about opening school two weeks early to start a catch up? Get some tests and test people who need to work and who see the public. It is that easy. Why are there not enough tests? Who is hoarding them?If we can build ventilators, we can get tests. You have scared people when you should have told them on a daily basis how many people DO NOT have the virus. There are a lot of older women in my community terrified of leaving their house,. They are hungry literally and try to order but very little comes to them. Get tests and reopen the state.
Volusia	General	Open the state!!!! You are going to sink the economy and make us solely rely on the government! And you closed gyms which is an essential part of mental health and they have cleaning equipment readily available at all times, stop allowing a virus and the sheep of Florida dictate you keeping us closed, it’s a damn flu virus

AMERICAN OVERSIGHT

Orange	General	I believe that Florida should re-open according to the guidelines put forth from the White House. I also believe that we need input from medical and business leaders. Together, I trust that you can develop a smart plan to protect people and kick start the economy. Thank you for the opportunity to voice my opinion. Sincerely, Mark Bruno Orlando, FL
Duval	General	1. Keep spacing...but one-way aisles do not help with social distancing in stores. Takes longer to shop & you end up having to go down extra isles, passing by more people than you would have needed to if you were shopping normally. 2. Increase curbside, pickup, and delivery services 3.Prohibit the use of reusable bags 4. No self-service food stations and dining 5. Clean chairs, tables, menus between customers 6. Stores/restaurants should have social distancing reminder signage and announcements 7. Enhanced cleaning protocols 8.Keep some hours for only at risk population 9.Setup hand cleaning stations at high traffic areas like malls & playgrounds 10. Need a safe way to try clothing on at stores 11. Masks when needed in tight enclosed spaces like kitchens. We need to reopen now...
Volusia	General	Omg. Reopen already!!!
Duval	General	don't open too early
Orange	General	I would like for Floridians to stay healthy and alive and prematurely opening the state is going to get people killed on Governor DeSantis' watch. More people will die and it will be primarily his fault. If more effort was put into helping the unemployed and bolstering our health and financial safety nets, many more people wouldn't feel the need to "reopen" everything.
Pasco	General	We cannot open FL until we have a treatment that is effective or we have a vaccine. I am a teacher, there is no safe way to social distance in a classroom no matter how we teach the students to do it. We have to keep in mind that teachers custodians and other personnel have preexisting conditions and opening without a treatment would be detrimental to these folks. I am afraid that if we open, people are going to flock here from other states, spread the disease more and not follow social distance guidelines. I know they aren't now! When I'm grocery shopping people are not mindful of others now. Walmart has become a theme park! Do not open until we have a proven treatment please!!;

AMERICAN OVERSIGHT

Hillsborough	General	We will not be able to test every individual in this state, not everyone shows any type of symptoms for this virus. The curve has already dropped in Hillsborough county with the hot spots being in Dade and Brevard counties. We have individuals who have yet to receive their stimulus checks and a very small percentage in this state has received unemployment. To keep businesses closed is going to wind up shutting down many small businesses permanently. These individuals are still paying the rent and electric/cable for their businesses plus with zero money coming in, they're also paying for their own apartment rent or mortgage plus all utilities. Allow them to reopen with a start at a smaller occupancy levels, at least that way perhaps they can make some money. We can't stay down like this much longer. Auto loans/rent/mortgage/utilities/food...that income being lost isn't fair to them. Most of our hospitals in this county are sitting with very few patients and even the hospital staff being furloughed.
Pasco	Education	First, i wanted to say THANK YOU for all you have done keeping us safe during this time.. Thank you for keeping the schools closed for the rest of the year. I know it is so hard on the kids and the families, but it is safest. I would love to see a way to watch football (even if we have to watch from home). Now that Brady and Gronk are in Tampa, it would be nice to watch the games. Finally, please find a way to open up hair and nail salons and the Hard Rock Casino- They can turn off some of the machines and remove the chairs, so we will be social distancing. The card games will have to be delayed, but the slot machines would be great to go back to. Thank you so much for doing your best during this rough time. Karen.
Manatee	Professional Services	There are masseusers, hair stylists, nail techs, aestheticians, etc. who operate out if single operator facilities, which allow only 1 customer at a time. These should be opened with recommendations of wearing masks, etc. They are known for cleanliness anyway, and are always cleaning. Having opportunity to improve personal appearance goes a long way in maintaining positive attitudes and outlooks.
Pasco	General	I think its a crazy idea I think if we open back up too soon this shit it's going to hit 100× harder.
Seminole	Healthcare	I was to have a total shoulder Replacement on 03-27-2020 which was canceled 03-23 as it is considered elective . I have been working on getting this done for months R/T tests other treatments and insurance etc. I am having increased pain in right shoulder and due to chronic renal failure am limited to what I can take for pain . I am hoping that elective surger ywill be allowed soon. I know the local hospitals have a plan to deal with this and Corona virus
St. Johns	General	Dear Governor Please be prepared to take your family to any all places of business and entertainment. You show you have full confidence to expose yourself and family to venues you open I will respect your decisions. You open a company like Disney you ate setting off a time bomb of the virus. Travelers will expose your citizens to a possible pandemic off impossible proportions. ...

AMERICAN OVERSIGHT

Lake	General	Absolutely we need to reopen the state. I personally am blessed to not be financially impacted by this and my son is out of school, but the ramifications of shutting the whole country down is worrisome to say the least. The lives that will be lost b/c of that are very sad. I worry about abuse of all kinds...drug, child abuse, alcohol, domestic. At some point, we have to call it and I think May 1 is a safe time to do so. At the very least, open up the beaches and parks. We should encourage recreation and socializing. Loneliness was rampant even before all of this happened. Now it is just exacerbated. I think the people that are vulnerable can make the call themselves as to whether or not they want to go out but it is time to REOPEN the economy. I know this was uncharted territory and the President/Governors did what they felt they had to do, but again, it's time to call it. People are putting off routine screenings etc. b/c of this too. Not to mention just plain hygiene. I mean who'd have thought that a person in America couldn't even go get a hair cut??? I mean, we'd all be "safer" if we never left our houses (well, in most cases) but that's not living. Risk - benefit....
Orange	Recreation	Please reopen Disney as it's environment is completely open and not enclosed like you stated.
Broward	General	SInce Broward & Miami-Dade were the hardest hit, it is too soon, in general. I think we should wait one more week. Let the other states open and we can see what happens. You could open Golf Courses and Tennis Courts(I don't play either one) where people are not standing next to each other. We need a reliable test where we know that we can trust the results where anyone and everyone can be tested. And we need the results within 24-48 hours. Should be Scientists and Doctors on your Opening Up Committee not just CEOs who are primarily interested in their Bottom Line. No More Deaths due to bad decisions and lack of tests.

AMERICAN OVERSIGHT

Orange	General	There is no scientific evidence to date that distancing is the answer. When you have state orders to “stay in” for over month, how does this prove the distancing theory. No one is going anywhere. Masks may keep me from spreading droplets on someone and prevents them from spreading droplets on me. Every death has been reported as covid-19 no matter the underlying cause such as diabetes, cancer, obesity and lower immune .The man hit by truck and died from his injuries was counted as a corona death which was very unfair perspective wise. Over 6000 jobs lost for every death and guarantee 6000 people without the means to care for their family that group will exceed more than 1 death. Absolutely no leadership. General Eisenhower sat with troops on D-day and made the decision to invade knowing many would die in order for thousands more to survive. President Truman same thing. Men Women Children would die but many more would be saved. There may be casualties. Someone should study a little economics and mental health issues surrounding this unprecedented decision to continue with isolation and unemployment. I feel I am in unique position, I work for Disney in one of the lowest paid positions in park operations (our retirement jobs) yet we own almost 20,000 shares of the company, putting us in a very unique position of seeing the perspective of both sides. I would like to be appointed to committee Philip Camden 15525 Honeybell Dr Winter Garden Fl 407-973-9399
Hillsborough	General	Dear, Governor, Nothing has changed. We still do not have a vaccine, widespread accurate rapid testing, contact tracing, adequate ppe for healthcare worker or the public, and we don’t know if previous exposure means immunity. All we have is social distancing and the shutdown. To ensure the resilience of our people and businesses, as well as the success of sheltering, the government needs to implement a plan where loans, mortgages, fees, and rent are suspended. People need a basic income to pay for basic necessities, and they need access to healthcare whether it’s covid-19 related or not. What I’ve described is cheaper than say reopening without the precautions listed in the first sentence, getting people sick, causing people to die, orphaning children, ruining businesses, and letting corona take a larger foothold to mutate and stay and greet us every year. Sure reopening might benefit some people’s pocketbooks as there are always people that profiteer in a disaster. Is that who we are?
Polk	General	Please don’t open tell we can test more people. Also tell the rate of the virus hose way down and the death rates goes way down.

AMERICAN OVERSIGHT

St. Johns	General	Even this site keeps crashing! Please don't open too soon. All of the hard work I've actually closing down the state is done and it would be a shame to reopen too soon and have to shut down again because of an outbreak. It is better to be closed two or three weeks longer than necessary then to open too soon. also I think salons should be the last business to open... I am a hairstylist and I was infected with covid-19 from an asymptomatic client who had just returned from a cruise. lots of elderly women come to the salon and there is no way to social distance when you are working on someone's hair. also all of these things that the government is doing is because of the coronavirus and yet I was actually infected with coronavirus and hospialized and still have not received in 5 weeks a paycheck or a stimulus check and I just think that people that were infected should have been taken care of first.the health department in cdcr had my address and everything and yet you guys still can't get an unemployment check or stimulus check to me! bu acceptable for half a million hard-working Floridians not getting unemployment benefits after 5 1/2 weeks. I'll bet if we took all of the governor's money and didn't pay him and he could see what it would be like to not have any income and to be sick
Seminole	General	As of now, I do feel that it would be best to allow the lock down to expire. I feel that this would be beneficial for small businesses and other economic interests. However, I feel that the government should continue to limit gatherings and continue enforcing social distancing procedures as well as limiting maximum occupancy within businesses and public places. While Florida hospitals may be stable at the moment, completely pulling back restrictions may cause a surge that could overwhelm the health care system. Additionally, I think beaches and other state parks should have limited hours and should be completely closed to the public outside of these specific hours. I feel that by allowing non-essential businesses to re-open, but continuing to enforce proper social distancing measures it can allow Florida to slowly re-open without causing surges in Covid-19 cases.

AMERICAN OVERSIGHT

Pasco	Professional Services	Hello, Being in upper management for a small business here in Pasco, Florida, I Believe that the safety of the public and my clients are the most important issue when considering re-opening Florida's economy or easing Safer-at-home mitigation. The numbers just don't support re-opening the economy or easing the restrictions. We don't have the testing capacity to test the entire workforce and/or public at this time and our Infection numbers/deaths are still on the rise. Being also in the high risk category and knowing it's nearly impossible to meet the requirements to get tested, I also have a personal stake in this. We are the 8th highest state with infections and in the top ten with fatalities. We need to extend the lockdown because the science from the Taskforce and just from what we are seeing from other states and around the world is that when easing lockdowns most business just aren't equipped to enable proper social distancing or have the means to properly sanitize their locations. We fully don't know how many people are asymptotic or infected and not tested. It's too high of a public health risk and too many unknown variables. I support extending Restrictions till all these requirements can be met for phase one reopening. The economy is taking a major beating but we won't bounce back if our workforce can't maintain their safety. We could also develop a second wave because Floridians moved too quickly to re-open which would overwhelm our healthcare system, cripple our workforce leading to the economy rebounding more slowly which could lead to more fatalities. We all want to re-open but we have to do it right and I believe its too early. Please extent the Safer-at home mitigation past May 1st. Thank you for strongly considering this measure to keep Floridians safe, to keep our workforce strong and healthy so that WHEN they do return to work, we can all continue our focus on making Florida the amazing State that it continues to be.
Lee	Professional Services	I would like whoever is in charge to take into consideration my job as a hairstylist/ nail technician should NOT open right away. I am high risk (asthma), and there just is no way I can keep myself safe at work during this time, I am hands on , spending hours face to face with people, I cannot safely do my job, I am struggling finically, haven't received a stimulus nor unemployment, but I do not want my kids to grow up without a mother because someone NEEDS a haircut, color, or their nails polished. My life is worth more, as well as many others. Please consider putting this type of work towards the end of the phase at least, let's learn from Georgia first. Thank you.
Leon	Healthcare	COVID-19 cases have slowed but they continue to climb. Florida is NOT on top of the situation. We do not have the widespread testing needed to do proper epidemiological tracing and containment of new cases. We cannot open back up responsibly until this is in place. Many people in our state are still not taking precautions like maintaining social distance and wearing masks. Opening up is a signal to these people that everything is "back to normal." A second wave will then assured.
Miami-Dade	General	Yes please reopen Florida, and no more face masks. It is well known than only KN/N 95 masks works agains the virus which is what we are trying to prevent.

AMERICAN OVERSIGHT

Escambia	General	Governor DeSantis, Please open the state ASAP. Up here in Northwest Florida we have not been as affected by the virus. Like only 11 people have died in Escambia County out of 320,000 people that live here. I know it's sad when anyone dies, but people die in car accidents too, but we don't stop driving. All of life is about a calculated risk. I think we should open Florida back up (at least the Northwest part of it) so people can get back to work and we can get back to having a normal life. We have "flattened the curve" for our health care workers to have time to get more PPE. (My son is a nurse at Baptist hospital and works on the covid-19 floor, so I am grateful for the time for hospitals to stock up on more supplies.) But I think it's time to get back to work and life in general. My daughter is a senior at a Christian school, and she was devastated that she doesn't get to go back to school, and that they are having a "virtual graduation" with only a hope of having something sometime later in the summer to celebrate a real graduation with friends. If people are at risk and want to stay home, they can. If you opened the state, it would not be mandating that anyone go out. Just that the people that want to get back to life can. I believe the majority of people want to get back to life. Thanks for listening to me. Jennifer Willingham
Martin	General	We are not ready in all the state of Florida but Especially in Miami dade county the people never was in quarantine it’s the reason for the numbers in contagious A lot of people loose jobs no matter what happens if open or not
Manatee	General	The reopening should associate with a continuous downward trend of new cases. This should also be based on an increasing amount of testing a and contact tracing. Our State has lots of elderly and reopening too early put those folks in high danger.
Lee	Professional Services	Good afternoon I'm extremely concerned about opening Beauty Salons and Barbershops since we Can't stay 6 ft away from people (social distance) Even with masks the clients would have to take it off or be touching it with their hands while we cut by ears and sideburs we can't trim beards or doing shampoo when they lay down on shampoo bowls they breath almost in our face so please consider when to open The Beauty industry. Thanks .Att. A worried Barber.
Miami-Dade	General	A general opening without the proper test capabilities and capacities will trigger a huge bunch of new cases and deaths. As constituent I want to know what is the government plan(state and local) to do that in a safe way, because recommendations like inject Lysol or Clorox or bleach or get UV enemas aren’t science based nor logical one to be follow by any human being

AMERICAN OVERSIGHT

Columbia	General	Please re-open Florida as soon as possible for these very important reasons: 1) It was never intended for the lock-downs to stay in place until the virus was completely gone. That is impossible. We simply did this to "slow the spread" and "flatten the curve." This allowed medical personnel time to gather adequate supplies and prepare. And they have done so. We are in a good place right now. We are prepared in case numbers rise again. 2) Florida's economy must get back going. Many people are suffering a worse fate from the financial devastation than they would if they actually had the corona virus. They would recover from that in 10-15 days, while they may never fully recover from the financial devastation that is occuring which affects their families, and their employees families. 3) We must consider people's mental health as well. During this time of isolation and lock down the depression and suicide rates are rapidly increasing. This may be more detrimental than the virus. Violence among families is on the rise as stress and pressures are mounting on individuals. Crimes are also on the rise as people find themselves with idle time or lack of necessities. Not saying this should happen; but it is! We must re-open! Thank you governor for your hard work and conservative approach. I also appreciate you making church services essential. You have used much wisdom in all that you have done in our state.
Pasco	General	Please, please, please, reopen the state.
Volusia	General	OMG ENOUGH ALREADY REOPEN !!!!
St. Johns	General	Seems like any business should be able to open with a reservation system in place controlling the number of customers allowed at one time. The business owner could decide whether customers are healthy enough to come to his business, and when reserving a spot and time, the customer can decide whether he feels safe enough with the safeguards the owner has in place in order to go to the business. Exclusive stores, restaurants and other businesses have operated this way as a normal system and it could be one way to allow things to gradually return to normal. We can't hide inside forever and then expect a virus to suddenly disappear. Once people go back to real life, they are all going to be exposed not just to this problematic virus, but to a host of others that have popped up as well.
Charlotte	General	Please consider keeping the state on ' stay at home ' til mid/late May. It will give us a few more weeks to bottom out and not put anyone in unnecessary danger. When you start up all the businesses we won't have the option to stay home without loosing our jobs. I am 73 and still work by choice. You can't protect me in the workplace but can you protect me from losing my job if I choose to stay home for a few more weeks due to health reasons? Thank you for listening!

AMERICAN OVERSIGHT

Citrus	General	I believe it is time reopen Florida. It will be a catastrophe to continue this shut down. We need to allow ourselves to work up an immunity to this virus and any other that may occur. That can only happen by subjecting ourselves to each other in a normal way. Masks, gloves and constantly using sanitizing hand wash will come back to bite us. Especially if there is a return of Covid-19. This is not a healthy way to handle this pandemic, contrary to most reports.
Duval	Transportation	I think we should pray about the situation and seek spiritual guidance from above meanwhile take slow steps towards a solution while using SoCal distancing because slow and steady wins the race so let's not be to hasty
Palm Beach	General	I do not feel that we are ready to reopen as of yet. Given the fact that Florida is known for the biggest tourism state is the U.S.A, we are more prone to increasing the virus even more if we open up too soon. Why wold people want to go spend over $100 in entrance fees at parks with this pandemic. I think entertainment is completely not on anyone's minds. People cant even buy toilet paper. I think the last things they are thinking about is going to Disney world and eating out at restaurants. You have to understand there is fear left inside of people, and even if you open up certain places, do you really think people 1. are going to go with fear of being contaminated, and 2. what money are they going to use to buy things- they lost their jobs. I've been laid off and I have no money to go spend at restaurants and Disney World. When I get my checks I want to pay my mortgage, and all my backed up bills I haven't been able to pay. The number of cases are increasing and so is death. The numbers have not come down as the governor has reported. As much as I would want to go back to work, I am scared because I do not feel safe. I feel that society has acted very irresponsible in many ways. I still go to the supermarket and see people with no masks, touching their face, no social distancing. Even the fact that we have a stay-at-home order in place, and the numbers are still going up is very much alarming. I am a medical professional and I am very much aware of the precautions needed to avoid contamination and I still fell society still has not gotten it yet. Unemployment is still an ongoing battle, and we are the worst in the country in receiving any benefits. We need to come up with a better plan on how to fix this issue. I am waiting over a month and I still have yet to get a check from UI. Re-opening right now would be a big mistake.
Hillsborough	General	My vote is to re-open EVERYTHING ASAP. Look at Sweden, or other countries not shutting down, no difference in being quarantined, people are losing $100's a day for nothing. If you are at health risk then take precautions just like anything else we are a good judge of how to stay safe. We don't want or need the government telling us what to do. Please open everything now!

AMERICAN OVERSIGHT

Collier	Food	Hi my name is Rodney and I work at the Boathouse restaurant in Naples on the Bay. I bartend there and have been there 12 years now. I would like to reopen because of the money I make but I don't think it is wise idea. I know how people are and they will not follow the six feet apart at the bar. we could take away the bar stools but then I wouldn't make any money. I feel like the Governor, who I voted for and like, would be making a mistake reopening to soon. People are already trying to hang around the restaurant and we are just doing to go food. The unemployment not being paid out is really making things extremely worse for us in the industry because we are being forced to allow people to drink and get stupid because we have no money coming in. The unemployment needs to get to the people and then I think they will not be as ready to open. The small businesses need to get there money also. I know people will also flock down here again from other states to get away and that will make it worse again. I don't want to reopen to have to close again or get my family sick because people don't care about anybody but themselves.
Orange	Government	I am very much against reopening the state at this time. I am an attorney. I'm also high risk. I have asthma and have had pneumonia twice and a history of chronic bronchitis. The thought of walking into a courthouse with hundreds of people any one of whom could be carrying this virus, and being exposed to them scares me to death. It only takes ONE person to ultimately infect hundreds if not thousands. This virus probably started with only one or two people having it, and they passed it and from there it is world wide. It is not time to open this state up. We are going to have rebound and end up in a worse situation than now. If we can just wait another couple of months we can kick this thing. But hosting thousands from all over the world in Central and South Florida and reopening tourism, it's insane. Our economy and the health of people in this state will be SO much worse if we reopen now. Let's put our money into our universities in searching for a vaccine, and treatment FIRST.
Broward	General	I would like to see the first stage of Re-opening Florida include opening Beaches, parks and outdoor activities. Or any other place that social distancing can truly be obtained. Even if we do begin to open restaurants, gyms, movies theaters, ext, most of the public will still be hesitant to go and therefore those types of businesses will continue to suffer. Let's observe the number of cases that come about by opening outdoor activities to help make a decision on when and how indoor business should open.
Hillsborough	General	No dangerous.... we don’t know anything about this virus except speculation.
Orange	General	Please take the utmost caution with any action to reopen the state. My wife is in a high risk category for COVID-19 and we can't afford for her to get sick. The state is nowhere near ready to reopen. Reopening the state before we reach the bottom of our curve will cause a second wave that will result in more deaths that could have been preventable. Please do not prioritize the economy over the well being of your citizens.

AMERICAN OVERSIGHT

Seminole	General	I believe that if people have access to n95 masks and gloves, and if we make it mandatory to use them, we can start reopening businesses with social distancing rules applied. If it's not mandatory, or if there isn't a good supply of masks and gloves, there could potentially be another outbreak, and it would be much harder to close a second time. So, phase one with the right gear, otherwise I vote against it.
Duval	Government	Please reopen the state in as many areas as possible. We own a small business and yes we received a loan but we need to get back up and operating at full capacity. This will not happen if the Governor and Mayors do not officially declare the State officially open. There are so many families that are being hurt with this closure not only financially but mentally as well. I cannot comprehend why it is ok for big box stores to be open with hundreds of people milling around but small mom and pop facilities including restaurants and beauty shops are mandated to be closed. How can you tell me this even makes any rational sense? And the beaches being closed is even stupider. Please let is get back to work
Orange	General	It's time to reopen the state. You can require restaurants/businesses to limit customers but we need to get back to normal. The most at risk should be the ones taking extra precautions not everyone.
Miami-Dade	General	Open Florida, no more face masks, no more social distancing.
Sarasota	Healthcare	I would rather wait longer if necessary, to reopen the State of Fl. If we open too soon we could end up being right back where we started or worse ! I am a senior with an autoimmune disease and can't afford to get this virus! I don't like the quarantine anymore than anyone else, but I would rather be safe than sorry!
Sumter	Government	Please Do Not Open Florida To Soon It is too soon to reopen Florida, the numbers in my area of Sumter Co. Are increasing daily.
Miami-Dade	Recreation	I believe it is time that beaches and pools be re-opened
Palm Beach	Healthcare	I work as a licensed massage therapist and have high risk family members as well as very high risk clients. I am terrified that if we reooen, they will come in andthat i may get exposed by either a client or at the grocery store etc and end up causing death. A lot of death. Or health complications. I work in a small, poorly ventilated room with people coughing, Sneezing, blowing their nose, mouth breathing and talking. We have linited time (5 mins) between clients and have to change out the table and get the next client back. There IS NOT ENOUGH TIME to clean the room properly and there is NO WAY to avoid passing the virus. Mask or no mask. It is too intimate and direct in contact nature.
Collier	General	Reopen our businesses now!!! The mortality rate is way down and the hospitals are not being over run! Reopen now. People at risk or scared can stay home for as long as they want. The rest of us want to live again.
Orange	Food	In phase 1, opening restaurants to 50% capacity, phase 2 at 75% and phase 3 at full capacity.
St. Lucie	General	Stay Closed, Staying Safe!!

AMERICAN OVERSIGHT

Miami-Dade	General	No estoy de acuerdo abrir todavía. Ya que hacer esto están abriendo la puerta a la muerte a miles de personas. Porque no veo la forma del control en las personas si se habré todo. Esto sería algo que nos llevaría a algo peor de cuando empezamos. No creo todos los Dia hay más contagiados y más muertes. Que pasaría se reabrieran a Miami dade? El doble de contagios y el trole de muertes
Alachua	Information	Open the state back up now. Don't wait and keep it open. We will only get they this with herd amunity. Do it now and let's save our economy. Do let the liberals and people who want to see the economy go to pot drive you decisions. Allow restaurant to open and all business to open now. Come on man this is ridiculous.
Lake	General	Please take your time in opening the economy. I owned and subsequently coached small business owners and understand the anxiety and pain they are going through. We have spent many weeks trying to get ahead of Covid 19 but rushing the return will only extend the pain and inconvenience. I would encourage that the committee develop specific criteria for the businesses to reopen to assure the safety of the public.
Polk	General	Reopening Florida is the best route to go. People need to work and the economy needs to get better. The virus has been here much longer than thought and while people are getting sick and some dying it is not as bad as it’s been made out to be. Businesses are closing, people are going hungry and will lose their homes and vehicles if they cannot work. Please reopen Florida!
Pasco	General	I believe it is time to reopen our state and get people back to work. Be innovative and give Americans our country back. Florida needs to be a leader and allow people the right to work for their livelihood. The longer you allow people to stay in unemployment and collect their funds from the government the harder it will be to get them to go back to work and the greater the lots of businesses and jobs in the state. I went into the Army many years ago and was sent over to Saudi Arabia and Bosnia to liberate people and offer them the right to choose freedom and sadly many of our state leaders are no better than the corrupt leaders of their counties. Governor Desantis please be confident that Floridians are behind you and those that aren't can easily move to one of the states that want to hold their constituents hostage. Thank you.
Orange	General	I think it's far too early to reopen the state. I am currently furloughed from my job and have yet to see any money from unemployment however I would rather give up my paycheck instead of my son's life who is 19 and has been an insulin dependent diabetic since he was 7 months old. I am terrified of him catching the virus.

AMERICAN OVERSIGHT

Broward	General	All counties should be reopened! This is America, and every single person has constitutional rights and freedoms that have been trampled on far too long!! You did this to us, and it is your responsibility to fix it, and fix it now. You were a coward when you started letting other states and your own Mayors take over actions. Look at all of the cities in and outside of the US that took precautions without extremes such as shutting down businesses and outdoor activities. They fine! They had the same low death rate percentage as anywhere else that freaked out and used "save our healthcare" as a cowardly excuse to push rights-revoking orders on free people. The healthcare system was never and still isn't in jeopardy, so reopen everything. The only reason beaches and park were closed was because the Miami-Dade mayor had to prove his point that Spring Break was over for Florida. Instead of mandating all tourists go home, he jumped the gun and instilled irrelevant fear in everyone. Even though the CDC and Dr. Fauci have repeatedly stated being outside is not an issue, and that beaches are, in fact, one of the safest places people can be outside, you allowed them to be closed. So, reopen all beaches, parks, public areas immediately. The Florida Health Department website has stated that properly treated pools are not an issue, yet ALL private property pools (apartments, condos, etc) are still locked. Why!? Why aren't you doing anything about this? Why should I be forced into social isolation because of the 2% health risks? That is pure discrimination against me and everyone in this state. There will be total anarchy if any form of closure lasts longer than April 30, 2020 at the latest. It is unfathomable to watch citizen's rights be stripped away and businesses be forced to shut down, and it is despicable for any government leader to thank citizens for their cooperation and patience. No one has a choice! Governor, don't you dare thank me for something you forced me to do. And don't you dare allow city Mayors and County Mayors to allow the crime of closures to continue. Lawsuits will happen, and rightfully so. The fear mongering is over. It's time to stop all closures across the board, because in order for
Duval	Administrative	I don’t think you should open the state up now maybe Open Later. We need a better grasp on this pandemic . we wouldn’t want to see many more death once the state is opened to soon. Also, once you do open up consider many people will continue doing what they want like gathering in large groups and not washing their hands. Maybe require everyone to wear gloves along with the mask and practice social distancing . I think many people will die once the state is opened up again unless you have a good handle on all the safe practicing. regarding unemployment give out cash for the first 2 weeks and make sure to collect unemployment application to be processed. Lastly get you a spiritual task force with pastors praying for Florida, governor, mayors, presidents etc. along with the secular task force. Thank you for listening.
Orange	Tourism	Please reopen Disney and Universal as it will help the economy and everything is outside and with wearing masks it helps.
Charlotte	Management	I think we are on the right path. I think to be safe we should wait to re open untill may 8th.in my busness which is sales its just a 100 square foot building.hard to keep 6 ft distance when you have to show and explain products. 1500 square foot building not 100

AMERICAN OVERSIGHT

Clay	General	Elderly and aged stay home. Open up so we don't destroy our econom . We may not recover for years as it is. This country is obscenely in debt . Purchase safety equipment for all workers dealing with public
Miami-Dade	General	Hay muchas gente contagiadas y si abren se van a contagiar muc has mas
Hillsborough	Healthcare	We do NOT want the state to re-open until EVERY citizen is protected from catching COVID-19. This includes mass testing for the virus, mass antibody testing, more ventilators and N95 masks for ALL citizens - medical personal, first responders, restaurant staff, retail staff, school staff, etc. EVERY LAST PERSON deserves the right to life.
Sarasota	General	It's time to open up. The research and statistics don't match the fear mongering and hype. As more testing is rolled out, it's going to become apparent that this is just another flu strain. As a small business owner, we are being destroyed for nothing. Open up!
Palm Beach	Government	Lets do it safely with some guidance as to masks and social distancing and sanitizer available. I wouldn't open bars and other large public gatherings, but with the proper precautions, I believe that restaurants, stores and offices should be open.
Pinellas	Healthcare	Why is there not one medical advisor (CEO of TGH is not a physician) on the Taskforce nor anyone from agriculture for the state? Not having the guidance of medical experts such as the Surgeon General or Department of Health to aid in opening any business is inappropriate and misdirected. It leads one to think it's not about the people but the money and especially big business. We all want to get back to work safely and without the expertise and emphasis on the medical implications we will be right back where we are again in a short period of time.
Marion	Government	When will DMV be open? Online is not an option for my Drivers License renewal. There can be social distancing at DMV branches, A Grocery store, Liquor store & Dollar Tree are all open in the North Marion County DMV branch location.
Pasco	Construction	Hello, as a resident of Florida and current University of Florida construction student, I will be entering the labor force in the very near future. With the states economy being shut down I am getting increasingly nervous of the impending economic depression. I believe that it is essential we open up the state as quickly as possible to ensure the effects of this depression are less severe. I'm sure many students are in the same boat as me. Although opening up the state early has potential risks, they are risks I'm willing to take to hopefully prevent the cure from being worse then the problem. Along with us I believe it should be an individual right to choose whether or not you should go out, not a mandate to stay at home by the state.
Lee	Healthcare	Non elective dental treatment such as dental prophylaxis should be postponed at least another month. Dental hygienists such as myself are the #1 healthcare provider susceptible to COVIID 19. Until more test results are submitted and the numbers go down we should not be providing treatment. Please for the health of ourselves, our families and our patients postpone dental prophylaxis. Please.

AMERICAN OVERSIGHT

Collier	General	I believe we should open up by May 15 or sometime after that and we should make it mandatory in this state that all people wear masks !!!!!! When we return our kids to schools they need masks also . I believe that everyone need to remember to sanitize hands whenever they can . But they need to be responsible people and stay 6 feet away . I would make it till the end of year 21 to wear masks and the other precautions . But the people need to get back to work . Flying will have the most difficult time but face masks and keeping hands clean is most important . We must pray and take our chances. Governor DeSantis , you have been during a good job but we have to leave this in God's hands and get people back to work and hope they follow the guidelines because it's their lives that are at stake . Wear Masks!
Lake	General	The way I see it is that this Corona virus is going to be around for a long long time. we should all by now know what we need to do to protect ourselves and others. However there will always be stupid people and you just can't fix that. but the world can not continue to just stop. While I agree that most businesses could be safe to open I do not agree that places like Disney and Sea World and the other attractions where large crowds cannot help but gather should be opened. They should be closed until something better happens with the Corona virus.
Palm Beach	Retail	Reopen Florida. The vulnerable still have the option to stay at home. Let people have more choice and let them use it wisely. Bankrupt companies do not pay taxes.
Broward	General	I do not agree that they reopen and remove the quarantine. We are still in our forties and people act as if nothing, many unnecessary businesses opened and that has caused more spread of the virus. Europe and China if I respect quarantine and here people do what they want and nobody does anything.

AMERICAN OVERSIGHT

Brevard	General	As of now Florida still shows no clear "14 day progression" downward on the number of positive COVID 19 cases. I urge our government leaders to look beyond political objectives and take careful note of similar situations happening around the world. Take for example Japan and South Korea; they opened up businesses, parks and other areas too quickly and now they have cases spiking. Many of Tokyo's hospitals are at max capacity and the healthcare system is on the verge of collapse. South Korea who had expeditiously flattened their curve, opened up some airports and the virus "flew back in." Florida is not ready to reopen most industries, especially those that involve close contact such as gyms, nail / hair salons, massage, etc... At a bare minimum, the government should require that everyone utilizing or working in public transportation, a store or other essential business wear a mask and limit the number of people allowed in the building or vehicle at one time as well as maintaining social distance. The Air Force base in the local area mandated these measures early on and to this date they have NO documented cases of anyone on base. These measures may seem overly severe and extreme to some, but they work! "Stay at Home" orders should be extended and reevaluated on a bi-monthly basis based on careful analysis of number of cases, hospitalizations and death rate per county per day. Counties such as Dade, Broward, Palm Beach and Orange are still very much on the rise and are nowhere near containing the outbreak. Once a definitive 14 day decrease in these parameters is observed, then consideration can be given to opening up certain industries on a gradual scale. First and foremost, testing needs to increase exponentially and ideally conducted on all persons returning to work on a weekly basis. That way, any "positives" can be quickly identified and thereby locked down and maintained on a much smaller scale. Also masks and social distancing need to be mandatory. In some instances, this may involve resorting to shifts and attendance staggering. Pay close attention to case numbers in Georgia, South Carolina and other states that have already taken measures to reopen. We will
Pinellas	General	Retail, Recreational, and Tourism interests It is vitally important that things start getting opened back up. We are not having hospitals over-run. We CAN NOT let the race to see who can be more careful get out of hand. Water access and beach areas (as well as parks) need to be reopened. Currently the few outdoor places people can go to are significantly more crowded than any place would be if there were more options. My store on St Pete Beach (windsurfing and stand up paddle retail, rental and lessons) can safely function with the precautions that the market will demand (cleanliness, small groups, social distancing) immediately. All we need is to be able to let people know we are open. From what we have seen here locally on a small scale you only have a short window of time to have control over how things open.....people are out and about more and businesses are starting to serve them more, regardless of the governmental restrictions. Things will open back up - you need a relatively quick, clear path or it will happen ad hoc in spite of you.

AMERICAN OVERSIGHT

Escambia	General	Please reopen everything. It should be up to citizens whether or not they want to risk interacting with others. Right now our livelihoods are all being threatened for the sake of some lives. The deaths are going to be inevitable and we have the capability to treat people. Even if we don't, if people are going out at their own risk then they also risk not being able to get treatment. The greater good would be served by letting people get back to work and live normal lives again. The scope of the mental health and financial crisis far exceeds the number of deaths, and I am sick of the war rhetoric and other scare tactics in the media that will lead to people signing away their liberties.
Lee	General	Use common sense -- learn from others-- enforce what you direct. Specifically, what have we learned from Walmart, Target and grocery stores that can be applied to other retail businesses, like Kohl's. Don't forget to account for human nature. When you open the beaches, there will be a lot of people there initially. Crowds will reduce over time. Establish a hot line for citizens to report flagrant violators.
Osceola	General	Too soon to open! You need to have a life to have a livelihood. It's better to be 6' apart than 6' under! Yes, it's hard economically, but need to slow open safely. We all want some sort of normalcy, but until there is a vaccine, the virus isn't going to disappear. Need more testing,(for virus and antibody), tracking and tracing. Need to listen to health experts above all. People need to be safe and feel safe. Need a plan in place to open smart, not just rush open and then have spike in cases/death. Most experts state models show Florida shouldn't open til June. Please put publix health above all. Also masks should be required everywhere in public.
Duval	General	I hope that our state adheres to the three steps that President Trump suggested. If everything is opened to soon I am concerned that people will not adhere to safe distancing and wearing a mask in public places. I live at the beach and I have witnessed people not adhering to the opening times for the beach. Or just sitting on the beach instead of walking or exercising on the beach. If some people can not obey the simple rules of the beach for everyone's safety that are now in place, than how can we be sure they will adhere to the other rules that will be put into place once the state opens up.
Orange	General	Until health officials announce that it is safe, I do not believe it would be wise to re open Florida business, etc.
Miami-Dade	Recreation	No creó qué abran ya qué hay muchos trabajadores de la salud exponiéndose ellos y sus familias, hasta han perdido sus vidas y hay muchos irresponsables que no se cuidan , yo paciente de Cáncer y si él virus retrocede qué pasaría, ni con él toque de queda las personas están en casa fiestas y más fiestas no creó qué eso sea justó ahora mismo aquí detrás de mi casa un fieston y no importa a esas personas que se exponen, cómo policías, bomberos y otros centras qué están abiertos para abastecerse de comida y otras cosas necesarias
Seminole	Recreation	I believe that Theme Parks and attraction like areas should remain closed because I think we should only really worry about opening really essential businesses, we don't have to worry right now about opening places where people have fun because that is not that important and some of those places can't social distance and a lot of people go to these places which could pose a risk.

AMERICAN OVERSIGHT

Bay	General	Short and sweet. We need to reopen. Not sure we should have closed. Didn't give ourselves a chance to build immunity. I'm an essential worker so I was lucky enough to keep my job. I know lots of people who need to get back to work. Btw: Florida government needs to be ashamed that our UI system didn't work for all these weeks. For Christ's sake we look like morons. We should be better than that.
Collier	General	We have to be very careful. As a tourist destination, if we open beaches, restaurants etc... too quickly we will live to regret it. We live on the beach and ever since the beaches have been closed we have seen people walking on the beach, sunning themselves and swimming with impunity. Floridians and others will come to Naples to enjoy what they can't have at home. It's a difficult decision to make but it shouldn't be political or even economical. It's all about keeping Neapolitans and others safe. Give it time for the "curve" to flatten. It hasn't happened yet. Look at the numbers and listen to the experts.
Manatee	General	I just wanted to take a moment to thank you for the difficult work and decision making that is required of you during these unfamiliar and uncertain times. I do not envy the positions you are all in. I wish all of you the very best as you move forward to reopen Florida and have faith that you will do what is necessary to get the job done to the best of your abilities.
Broward	General	Let the doctors decide.
Lake	Recreation	Please open State parks, Ocala national forest, and green spaces with restrictions as needed.
Hillsborough	General	Please DO NOT reopen the state until we are fully operational in testing and treating people for this pandemic. We arent close to being prepared for the next wave. While many are hurting financially, its not worth the risk. Instead of funding the big companies that can afford a couple of months of salaries, help the little guys and gals! All first responders should be getting hazard pay and protection from the government and their employers. Nurses being put in units they've never worked is dangerous to the employee and patients.
Leon	Transportation	Personally, I think it is too early to reopen. Florida relies on tourists from other states...think New York, New Jersey, for example. Are we ready for the influx of cases brought in from other states? What about International travel! Are our hospitals fully stocked with PPE, adequate tests, adequate staff? Is contact tracing set up, and ready to go? What mandatory guidelines for businesses have been set up? Can the businesses make a profit while running at 50% capacity, or social distancing? What about hotels? Are they safe to open? What protective measures are to be taken? What about transportation? Buses running, trains, taxis, ride-sharing? Are airports set up to handle large crowds? I thought North Carolina did a good job with seven milestones that have to be completed, to open the state up. Here is the article: https://www.newsobserver.com/news/coronavirus/article242239441.html
Hillsborough	Recreation	Please reopen County and Florida State Parks. The curve has flattened. It's time.

AMERICAN OVERSIGHT

Miami-Dade	General	Please do NOT reopen this state until there are tests readily available to test for anti bodies. Also, the numbers of actual cases are currently not accurate, the numbers coming from the state do NOT take into consideration the tests being done by private companies. I feel the pressure to open up is based on these misleading numbers and should the governor open up more businesses the infection rates and death rates will soar. Lives should matter.
Manatee	Tourism	Thank you for the opportunity to voice my opinion. I believe our state should open. We are a community we closed fast so there is no reason we can't open to life as usual. Open the beaches & recreation areas so folk can be outdoors. We are a state of thinkers mixed with an older generation. Yes the older folks are at risk as are folks with pre existing conditions. Heres a thought if you feel at risk stay home just like you would when you are sick. Don't penalize the entire state/nation because a few folks feel they are high risk. Those of us that are out of work have zero income it is crippling many not to mention the depression that comes along with this. Common sense tells me that we cannot make this worse than the original problem. Staying closed is hurting our economy every day we are closed. Yet the government employees are still getting paid so of course why would they want to go back to work us business owners went from 100% to zero overnight! Most of us at risk of losing our lively hood. The assistance that was offered to us through the President all of the business owners that we know in Holmes Beach not a one of us has gotten any aid! We cannot hold on much longer & we are trying to keep our employees on the payroll but with no income with being shut down we don't have much time left, we are down to days and then we will have to layoff all of our staff. Our dear friends that own a Resturant just up the road from us had to layoff 3/4 of his staff and one of his employees had just purchased her first home the week before this all hit. What is that going to do to her credit if she can't pay her way, some of us have tried to help her but all of us are literally out of money. We are not getting any assistance from the government and have never asked in the past but you have crippled all of us told us to close our doors and stay home that is not realistic. How can one survive with no income?? We have always prided ourselves in supporting ourselves and helping others but you have taken that away from us & offered up NO hope! So please tell me how are we to survive? With no hope, no income & no promise of when we can open up again! So how do we stay positive, hopeful & happy around our family members? How do we pay our electric, water, food, mortgages? The USA has fallen & crippled its states & it's tax payers expecting us to be content & listen to what has become a dictatorship of a nation. I am normally a positive glass half full person that sees tons of opportunity in this world but our government our elected government has taken that
Seminole	General	Having 2 children and auto-immune disorder, I am extremely nervous in opening FL back-up. Even if I continue to social distance, if the state is opened back up and my kids expected to return to possibly to summer school/camps and my husband back to work, I worry about their exposure and I worry about it being brought home. My friend who has MS and an asthmatic son are in the same boat. If the state does open up, it should have limitations of the capacity of people that can be in that particular place/venue and continue with the direction of keeping the right amount of space between people. I am very concerned with the opening of the beaches. I understand the longing of people wanting to be outdoors and back to our glorious beaches, but let's be real. Some people just dont respect other people's space or just dont care.

AMERICAN OVERSIGHT

Miami-Dade	General	Buen trabajo el del gobierno federal que llegaron los 1200 a la cuenta, buen trabajo del Family Children que pusieron los sellos de comida. Muy mal trabajo del Unemploimet como no reabrir si nadie tiene dinero.
Osceola	Recreation	Gradually open up the state
Flagler	Professional Services	Hair Salons Restaurant at distance seating
Lee	General	I know people want to get back to work even though their taking a risk of contracting covid & possibly bring ot back home where other family relatives can catch it because of financial issues. Only 2 put of 10 people whonallied for unemployment benefits & cares act money has actually received money. But i believe May1st is too early. I got hired as an enumerator for the US Census in mid march & my training was delayed obviously because of the situation were in...i checked back on my profile account with them today & it says they aren't going to do field operations until June 1st. If the US Census says June 1st, we should follow that guideline. I've attached a screenshot of them saying this. Cali just rolled out their PUA application site. We need one asap because at least 35%-40% of UI spplicsnts are going to be ineligible and are going to need thst $600 Cares Act money asap & hopefully retroactive...because the landlords are going to want their rent they waived retroactive so thats where a chunk of our Cares Act money is going to. WE NEED HELP ASAP.
Miami-Dade	Recreation	Out door spaces should be reopened in an organized manner. I suggest reopening beaches first for morning exercise ... 7 am - 11 am. If that goes well add the afternoons 5pm - 8pm. Golf courses should be reopened with restrictions. I come in contact with more people walking the streets that I do on a golf course.
Alachua	General	Open Florida!!!!! All jobs are essential, we a ALL need our paycheck...
Orange	General	It would be irresponsable for the government to open any business now. People need to stay home and continue with social distance. Doesn't 53,000 deaths meant anything to you?
Martin	General	Please don't open until this is under control.
Broward	Recreation	I do not think that business and social activities should be reopened until the state is able to administer testing for Covid 19 can be administered to all citizens to determine who is afflicted with the virus (even those with no symptoms) to ensure that with the virus go into quarantine/and or medical care. Retesting would be required a regular basis until a vaccine can be developed. Masks and gloves , and social distancing are essential until a vaccine is developed to protect from the virus. Also, a consistent message, supportive from our leaders is really important to support protective efforts is essential as well, to ensure that people have confidence in safety measures. Experts predict further increased outbreaks in three weeks, if activities are reopened without the testing measures in place. It's so important to continue to be very cautious until more effective protective measures can be put into place, despite the strong urge we all have to get back to the way it was. Human life protection should be the highest priority.

AMERICAN OVERSIGHT

Miami-Dade	General	Keep miami closed until 2022. And give us our 2K a month as well as legalize marijuana for recreational use. Thank you Sincerely Joanna Rodriguez
Broward	Education	Thank you for collecting feedbacks. I think we should open parks with clear arrangements for social distancing, nature walks can provide relief for all ages. I hope that summer schools will be open to allow parents to work. When the curb is down and only then, restaurants shops and so on. We are staying home with all the difficulties because it's important for us to save lives.
Duval	General	We were to stay at home to stop the overcrowding an rush on The hospitals We have done that We have sacraficed for a few The numbers are way lower (even though exaggerated) Than were expected You cant expect to keep ppl down with no money coming in We need to take care of our families as the state an federal government Can't do it for us. I need to make money now! I have sacraficed enough OPEN OUR STATE PLEASE Before the ppl take it back themselves
Hillsborough	Government	Dear Governor DeSantis, I am a resident of Hillsborough County. It is time for Floridians to get back to work. Throughout the past weeks of COVID restrictions businesses deemed "essential" remained open. Floridians who patronized those businesses voluntarily engaged in social distancing, voluntarily followed CDC guidelines. With these businesses open, sometimes serving hundreds of people at a time, twelve hours a day, seven days a week, we have witnessed COVID numbers falling. The State of South Dakota never mandated a single business closed and are also seeing COVID numbers falling. Every business is essential when families are dependent upon that income for healthy and happy lives. I believe these facts prove that Floridians are responsible people, who love their neighbors, and will CHOOSE to do the right thing. We need our elected representatives to do the right thing; we need our businesses open. We don't want government handouts. We want to get back to work. We want our businesses open now, not later.
Citrus	General	It is too early to open up Florida, we are still growing in cases. I live in Citrus County and we have people that are not staying, not social distancing and not wearing masks. Everyday we have more cases. I have been in my home for two months going on three. I would like to go on vacation with family,but can't risk it. Do something to get us on track to open responsibly

AMERICAN OVERSIGHT

Sarasota	General	We have been closed too long. In addition there ate so many inconsistencies when choosing to have one store open and nit another. Its not entirely the establishments responsibility to keep me healthy. They can only do so much there are no guarentees If im afraid or high risk i dont go out its as simple as that Open the beachs with parking and allow chairs we can social distance the ocean can help destress. Open up it us time!
Polk	General	Re-Open our state you socialist bastards!
Brevard	Retail	I am 60 years old and I take care of my 90 year old mom. If I choose not to return to work out of fear of infecting my mother if I should get the coronavirus can I still collect unemployment? (Assuming I ever get it?)
Brevard	General	Please remain closed.
Pinellas	General	I'm a die hard conservative but Governor if you open the state up before June 15th you will be branded a monster people will die. Now if you ride the wave and ppl complain about the economy well the economy is down the drain because of this virus that does not fall on you opening the state and people dying does. Be smart I know you are.
Santa Rosa	Healthcare	In the interest of physical and mental health I think it is important to open public spaces such as parks and beaches as well as outdoor recreation. This could be achieved safely with protocols to adhere to social distancing. As an RN working in a regional acute care hospital I realize the risks but also realize that transmitting the virus in open air is less likely. Peer groups and families have quarantined themselves well over the 14 day period. I would like though as a nurse the ability to be tested for COVID after every work period such as a three day work week to protect my family and friends. We live in a fairly affluent area full of nurses and doctors. We put our families at risk every week and cannot safely visit our older parents. It seems imperative that healthcare workers are given access to regular testing.
Marion	General	Good afternoon! I do not believe Florida should re-open just yet. I think it is too soon and we should remain on a lock down for a few more weeks. I think by prolonging opening Florida this will only help contain and flatten the curve of the Corona Virus. I want for nothing more to go back to a normal life, but I also understand everyone needs to do their part in keeping themselves, and their families safe and healthy. Please consider keeping Florida closed and even possibly suggesting curfews. Thank you!
Miami-Dade	General	Opa Locka Mail Processing Facility of Post Office does not do social distancing. They are forcing employees to work where they don't feel comfortable because there is work to be done. But employees are literally all over each other and not everyone wears masks. Is there any way to make it mandatory to wear masks if social distancing cannot happen in an essential job?
Indian River	Tourism	Open Florida! We've done our part! Curve is flattened!
Polk	Information	I believe it's too soon to go back to business as usual...we need more testing and fewer new cases first.

AMERICAN OVERSIGHT

Osceola	General	We need to stay closed. People are not understanding that their choice to go out in close quarters with other people and spreading infection does not only affect them. Their decision affects everyone else. If we stay closed we can reduce the statistics drastically and actually beat it. If we re-open it could become much worse, more lives will be lost and the pandemic can continue for longer than it should. We've become way too indifferent to mass deaths.
Duval	General	We need to start opening businesses. State parks also need to open. You are out in the open air and 6 feet apart.
Pasco	General	Start reopening with precautions based on localities. Counties should be able to open based on their numbers, not Florida totals. Hotspots should not dictate the entire state's fate.
Duval	Professional Services	Please don't open salons too soon... a lot of the people who have signed the petition for them to open early are clients who want their hair done, not thinking about the safety of the stylists. As a stylist myself, I am hurting financially but prefer safety to be first priority. Stylists are in people's faces and not able to work 6ft away.
Palm Beach	General	Please do not open public places and spread the virus
Lee	General	Dont reopen too early. Not enough testing. Too many cases still coming up every day. Too scary. Thank you Anne Callahan.
Orange	General	I would like to see Phase 1 for reopening start right after the stay at home order is lifter. I'd like to see more rapid results tests, having to wait days isn't helpful because you may need something like milk and then you come into contact with more people right after you took a test. More antibody test sites in central Florida since I'm not allowed to leave Orange County and the nearest antibody site I've heard of us in Brevard county. Open schools normally in the fall, if there is a vaccine for Covid-19, then add that to the list if required vaccinations to start school on day 1, require all adults working in schools to get the vaccine too. Pay unemployment benefits from the date the people lost their jobs...starting with the date you closed things like bars, restaurants, and gyms. These people weren't terrible employees, they work in low paying jobs and the system in place couldn't handle the influx of applications, and just hit "approve" for all the people that lost their jobs from this, stop denying so many cases. I'm jealous because they will get the FL benefit plus $600/week from the feds ands that's more than I make in a week. To pay people from when they were lucky enough to score some voodoo magic and actually file days after they got unemployed is cruel.
Orange	General	Do not open back the State. You have bigger things to worry about, like, I don't know, THOUSANDS OF UNMPLOYED PEOPLE WITHOUT THEIR UNEMPLOYMENT INSURANCE BENEFIT?
Orange	General	Please do not rush to reopen. See article: "San Francisco's 1918 Spanish flu debacle: a crucial lesson for the coronavirus era" https://www.sfchronicle.com/bayarea/article/San-Francisco-s-1918-Spanish-flu-debacle-A-15191518.php Thanks!

AMERICAN OVERSIGHT

Volusia	Food	I feel restaurants should be able to open in Phase 1... People need to eat.. social distance worked prior to the to go only... I feel chain restaurants should open first or I hop, Perkins, etc.
Bradford	General	I have major concerns about reopening the state. I have been having chemo through all of this and it has been stressful. The thought of opening up scares me because I see that not many people in the general public are taking this seriously. Going to the store for necessities I see so very few people even wearing masks. I read the date in one place May 1st and another recommendation of June 22nd. My vote is June. I am in no hurry to get around the public again due to my medical issues and I work with the public under normal circumstances. Because I know the public, they are not taking it seriously now, so I believe it will be crazy when things open again, which will up the stress and more stress is worse for my health. Thank you for your time.
Orange	Education	My question is, since schools are not re-opening until the fall what about the children that would be in the elementary and middle school summer programs? With parents returning to work what are parents supposed to do with their children. I haven't heard anything about this situation. It's like nobody cares about these children that need a safe place to go. Parents need viable options here.
Miami-Dade	Healthcare	I would love for elective surgeries to be able to start back. My infant daughter surgery has been rescheduled three times.
Sarasota	General	Due to recent numbers and trends I support reopening Florida so people can get back to work
Pasco	Government	Everyone with a solid brain knows that this virus is an election infection. A ploy to stop the Republicans from ever winning another election. Trumps employment rate, the stocks, everything because of failed impeachment. By not fighting against the dems, you are condoning their behavior. Quarantine is for the ill, not the healthy, this is Marshall law or tyranny, which ever you want to call it. It is against our constitutional rights. Mr DeSantis, I grew up in a very highly political family, and watched this type of actions come from the dems...you are not a dumb man, you know what is happening but not fighting it is showing your voters that you are condoning it. The number of deaths are wrong as EVERY death is being blamed on the virus. I belong to a group that the majority or calling out for a new governor next term, they are furious about not being able to live within our God given rights..I sir, had the virus, and as many others are alive and telling the truth. Please consider your voters that put you in your position, because right now they are not happy.
Marion	Recreation	I would like to see parks and rec open. Leagues such as baseball, soccer and other things could keep kids active and keep their lives somewhat normal. This could be done safely by telling parents to space out along the fence and also taking tempatures of all kids prior to practice and games. This is a very trying time for adults and kids alike but the more normal we can make it for kids the easier it will be for them.

AMERICAN OVERSIGHT

Volusia	General	As a fellow citizen, I hope we can reopen sooner than later with common sense, and safety. I am concerned that safety and security as well as society as a whole will suffer if we do not. I also was wondering if the tests are free for the non insured. Churches should reopen as soon as possible so people will seek spiritual help and guidance. Thank You.
Pinellas	Real Estate	I was hoping that the government could please allow tours or real estate (condominiums, apartments, etc) again. The real estate market is continuing to crash, aggravated by the fact that nobody can view a place in person. It will crash harder if this continues- I know I wouldn't buy a place without looking at it in person. I am against big open houses with many people- but the tours could easily be under ten people, and people could even socially distance during the tours. This would be not very different then being in your own home by yourself, and certainly safer then grocery shopping. And besides- what about the people who need somewhere to go, but don't want to get sucked into a dump? Nobody wants that!
Lee	General	No estoy de acuerdo en abrir la economía porque estamos a un mesde dar la orden de todos en casa y eso no se cumplió todo el mundo está en la calle sin protección porque no hay dónde comprar ningún tipo de des IFEs tante para las manos y cada día hay más casos positivos que pasan de 1000 diarios si abren vamos a tener más de 2000 diario.
Sarasota	General	Open up gyms, coronavirus is a joke
Alachua	General	Open outside activities. Parks, beaches. We need to develop herd immunity and healthy people need to start to be active. Masks mandatory. Keep physical distancing, Resraurants, gyms open with limited people Schools should be open this summer. We need more healthy people tp get infected before fall. Risk individuals stay home
Sumter	General	State should not begin to open till June. I am well aware of economic repercussions, but opening now and then have to close down again because of irresponsible adults would be worse. This decision needs to be made with the input of state and federal medical personnel with the expertise of such matters. Unless law makers can guarantee that social distancing guide lines will be enforced to the letter of the law, then keep the state closed. I see nothing but problems by opening this state now. Thank you

AMERICAN OVERSIGHT

Marion	Healthcare	I would like to know safety strategies in social gatherings and to know how to prevent the spread of the coronavirus. I would like to know all people are guaranteed financial assistance like the small businesses and employees that work and live paycheck to paycheck. I would like to know how to safely see my children and grandchildren since I am older than 60 years old. I am concerned about the long term plan and how to financially make ends meet for all people. I would like to know for sure there is an understanding that is clear and guaranteed to prevent the spread of this virus so everyone can continue in life with honest knowledge and no political agenda. I hear of those in tip businesses and small business who are working from their homes to cut hair or do house calls which is not safe. I am concerned my own family would be doing this to make enough money to pay their bills. I want the government to help everyone so no one will feel the need to seek alternative options which arent safe to make money. I do not want to see the cases of this virus rise and I do not want to see mistakes made by the government in opening this state causing a rise in cases and more lives lost. I want the government and task force to put the life first right now because we can see other countries who were able to contain this virus that way. It can be tough but a sure way in strict precaution and government help short term otherwise we have a very long term and long drawn out suffering none of us want. Please help the people. No one wants to suffer and no one likes to quarantine and isolate ourself at all but we understand if you can please provide safe measures and knowledge to the people. We all feel very unsure of the government role and government priority sometimes. I thank you all and I appreciate all the hard work being done. I have worked hard my whole life in construction and I am a supervisor. I oversee the work and feel for the people to have an income. I appreciate your concern and all the aspects you are looking at to reopen this wonderful state of Florida in a safe way. Thank you.
Pinellas	Healthcare	Many states are considering how to reopen the economy, including dental practices. As your constituent and a licensed dental hygienist, I am writing to encourage you to reinforce the importance of continuing to follow the Centers for Disease Control and Prevention (CDC) recommendation that dental facilities postpone elective procedures, surgeries, and non-urgent dental visits, and prioritize urgent and emergency visits and procedures now and for the coming several weeks. The dental team works in close proximity to the patient and utilizes handpieces that can generate aerosols or tiny particles and droplets from the patient's mouth that remain suspended in the air and pose a risk of infection to the dental team and other patients. I write to alert you to the need for and availability of appropriate personal protective equipment (PPE) so dental hygienists and the entire dental team may safely and effectively provide care to patients. Dental offices should be limited to emergency, urgent procedures in accordance with CDC guidance. As you consider next steps in responding to the COVID-19 pandemic, please ensure dental hygienists, the entire dental team, their families, and the patients they serve are as safe as can be.

AMERICAN OVERSIGHT

Brevard	General	I have some concern about reopening to soon. I don't understand if there are people still testing positive for this virus how can Florida or anywhere else open up. Myself and grandson have asthma and have done well by staying home and not going out and about. If it is open then those who carries the virus might infect other people who don't have it. It is a huge concern for me.
Lee	Healthcare	Governor DeSantos. Please do not open dental offices for non emergency dental treatment at this time. The aerosols that are emitted during a dental cleaning are very hard to contain and disinfect between patients. We need a way to encapsulate the aerosols or this terrible virus will continue to spread. I am a Dental Hygienist and desperately want to go back to work. I do not want this virus to continue to spread to my patients and their families.I know I will be protected with proper PPE (if available), but the air I. Our dental treatment areas will be hard to disinfect and I do not want to endanger my patients. Thank you, Beth Irizarry, RDH
Polk	Agriculture	Let people make their own decisions on how to conduct business.
Seminole	General	Please don't open anywhere that people can gather, no indoor businesses. Outdoor cafes, businesses that can provide pick-up/carry-out services & products, etc, ALL WITH SOCIAL DISTANCING & MASKS are acceptable.
Orange	General	Please stop the economic destruction and start opening our businesses. The true data does not support our response. If Texas, Georgia, Tennessee and South Carolina can put together a plan and get moving forward, what is FLA's hold up?
Orange	General	Florida is not ready to b opened at this time especially in light of our numbers increasing. We must all do our part in order to come back stronger than ever.
Miami-Dade	General	Please Do not open yet, until the Dr's who are the ones that know when is the best time to fo it.we already waited for more than a month so I think is better to waiy.
St. Johns	Healthcare	I am a surgical tech and spend several hours a week ensuring a srerike environment is maintained during surgery. Given this I know the importance of proper mask and glove use to reduce the potential for infection rate. This applies to the use of masks in public. As you know non-N95s are used by an individual to protect others from that individuals potential infection. It seems the general public has not been educated on this. I propose a statewide education on proper PPE use and importance to bolster support for its use St John's County alone has a 17% population 65 and older. Add that to the other high risk individuals and we need to do all we can to protect them in the public. We can't just ask them to isolate 24/7. That model is not currently working as some reports may imply. Thank you, Ron Burchett

AMERICAN OVERSIGHT

Sumter	Professional Services	Please Reopen ASAP on May 1st for all Hair and Nail services. Just make us follow the guidelines of temperature checks. Shields. Masks. Wash hands before services and 6 feet separation. The small businesses need to survive as all of the bigger companies received the PPP and EIDL. We Need to Open.
Brevard	Professional Services	PLEASE have a real conversation with a stylist about his or her wants at this time and how that affect many areas of their lives. *How would we be able to maintain the CDC guidelines of being 6ft away? * I do not agree with the idea to go back and do one client in the entire salon at a time, wearing face masks, face shields, PPE and gloves. Sterilizing/sanitizing between every client. (Yes I believe these glove and possible mask precautions are important when we do go back, but read on) * Who is providing our masks, face shields , PPE and disposable masks for each client? If we are, where are we purchasing them as they're pretty much sold out everywhere and even hospitals aren't stocked with them? What grade of masks are acceptable for us? For clients? If we aren't able to get the masks the petition is demanding we get, and we then can't open our doors, are we still eligible for unemployment relief and any other relief offered to individuals/salons who are unable to work because of COVID19? My guess is no. * My child has severe asthma. My other child has one kidney. My Mother-in-Law is over 65 with some heart issues. Not that I should have to share our health history here, but not every stylist is safe to go and work with people who may not be taking any precautions or are posting pictures and updates with groups of friends, family, and neighbors outside their homes. If I choose not to open my salon suite for one person at a time because of these concerns, will I still be eligible for unemployment or any other offered relief in the future? * If I do cave and go in to do one client at a time so I don't lose my clients, my business, and become unable to make income or receive unemployment aid, my costs will HAVE to go up exponentially. How do I know this? Because my last week of work was one client at a time, with time in between to sterilize every surface, in addition to my tools, and allow to dry. I made around $50 in profit total for an 8 hour day.*My current prices don't sustain the inability to double book and an extra 25 minutes of unpaid time between each person to thoroughly sanitize. That time will have to be calculated and factored in as a cost to you. This also means I will not be able to offer any type of complimentary services until I am fully operational, so if you have won a holiday giveaway it will have to wait, if you use bad products at home and accidentally fade your color or toner in the first week, it will cost to fix and it won't be

AMERICAN OVERSIGHT

Pinellas	Healthcare	Many states are considering how to reopen the economy, including dental practices. Collier	General	Way too soon to open - wait until cases are way down please/
Orange	General	Why are retail stores closed. Why can I go to walmart and buy a pair of shoes,but not Foot Locker.Why can I buy clothes at Target, but not Macy's. Why can I buy a computer at Costco, but not Bestbuy. Why can I buy a BBQ grill at Home Depot, but not the store down the street which specializes in grills? What right does the government have to close millions of businesses based on fallacious models. Open everything now.
Wakulla	Food	I am a small business owner in Wakulla County I look all around and there are lines in the gas stations and piles of people in the grocery stores and dont understand the difference in that and dinning in a restaurant. Carry out is only about 20 percent of our sales. We are down 80 percent and can only employee 3 of our 16 employees. At this point our seniors will not have prom, senior trips, last walks or a graduation ceremony. It seems that we could allow the food establishments to reopen so the employees can get back to work. Most of them have not seen or heard from unemployment and we are out of excess funds. I think Floridians are smart enough to know their medical history and take what precautions they need to without being told. We need to get back to work and have faith over fear.
Charlotte	Recreation	I used to work teaching low income and elderly people fitness classes in government buildings. I can no longer do this. I can't get unemployment,but I could pivot to teaching in the outdoors with proper social distancing and support myself again with no help from the government. I would like the ability to do that again. We know from the DHSST's work that this is possible. Could we get guidance on how myself and other fitness professionals could safely do this? Added DHSST paper https://www.scribd.com/doc/456897616

AMERICAN OVERSIGHT

Broward	Healthcare	Do What The Doctors Tell You! Please follow the professional advice from our country's medical leadership currently advising and doing their best to guide our U.S. Government. And also follow the professional advice from our local medical professionals that guide Broward County and the City of Hollywood. No disrespect intended, but following advice from non-medical personnel may cause confusion, negative effects, and even unintended death to Hollywood residents. To be frank; don't take medical advice from a politician. Be a smart, responsible leadership and protect human life properly via medical professionals' guidance. Thank you and may God bless us all.
Hillsborough	Transportation	Depending on what type of job u do like me I transported disabled ppl to program I have more then 12 ppl in a van so how I'm supposed to have distance on the van
Orange	General	In my opinion, Governor DeSantis, Florida is not yet ready to re-open. We have a large community of elderly individuals in the at-risk group for COVID-19 and I believe, even in areas where a younger, less at-risk population lives, that re-opening activities and businesses where people can congregate will lead to an increase in the virality of this disease. I do, however, believe that the state of Florida can not stay shut down much longer because most of our state thrives on tourism and events. I think staying shut down for the month of May and re-opening on June 1st is a fair and safe compromise for residents of the state, both left-leaning and right-leaning individuals. It's disheartening that even a pandemic is now a partisan issue but I truly believe if we are to keep our communities safe and healthy for the foreseeable future. Thank you for taking the time to ask for our opinions on this matter, and may God bless you.

AMERICAN OVERSIGHT

Brevard	General	Food establishments should require masks/ face coverings when actually serving food. Not when taking orders but when handling cookin and preping. Social distancing requorements should ne enforced in all workplaces. If not capable the masks should be worn and empoyers to maintain hand sanitizer/ fully stocked hand washing areas in restrooms. General public areas should be restricted to the amount of occupants allowed. Matatical equation can be done using the fire marshals occupancy guidlines. Comprehensive guidence county by county on employees return to work practices after being out sick. Will employers require covid testing? Or can employer make dicisions nased on guidlines. Require theme parks to offer/sell face coverings and gloves for visitors. Careful not to rip people off. Gloves and coverings from home should be allowed. Hand wash stations should be plentiful at the parks also Temperature checks on all inbound flights from out of state. Snow bird policy should be addressed before fall weather. Health department should work with daycare facilities in order to help parents who can not work from home. This maybe more dificult but you could limit number of children and sanitizing schedules of rooms used at the facility.
Hillsborough	General	We have not had a decline we should extend social distance until end of May.
Pinellas	General	Please wait to start reopening Florida until the end of May. Reopening should be done slowly. Require all people to wear masks. Public education should not reopen until the end of the summer, only if data shows that data numbers of COVID have gone way down.
Lee	General	Open up the State!
Citrus	Recreation	Open the Withlacoochee Trail . Ask riders to wear masks, require social distancing.
St. Johns	Food	Would like restaurants to open, maybe until 10pm to help out the food service industry.
Lake	Tourism	It is time to carefully reopen the state. We need our jobs back. Ask people to wear a mask and take temperatures before entering the theme parks, restaurants, hotels, stores, etc... We are all adults and need to be able to make our own decisions. I appreciate the government's attempt to "protect" the people, my family has been home and out of work since March 14th with no unemployment compensation and we have been ready to go back to work. Not trying to be rude or disrespectful, just ready to go back to work to provide for my family.
Orange	Recreation	Please reopen Universal and Disney and it helps the economy and bringing money back to Florida and the pats are outside. Could this happen in May or June as Disney is still allowing people to book stating June.
Palm Beach	Healthcare	Please do NOT open dental offices to elective procedures such as dental cleanings! This is not good without rapid testing. Too dangerous for the dental hygienists!!

AMERICAN OVERSIGHT

Lee	Recreation	Think through your decision to open businesses, recreational areas, stadiums/arenas with precautions first and foremost. Open eateries slowly with restrictions on the seating and number of patrons allowed. For those who choose not to obey the rules, stiff fines (with no excuses) should be enforced. Prepare a major tv and internet campaign stressing the rules and consequences for not adhering to the laws.
Leon	General	Do not open up the state too fast. We need to ensure that there is a significant decrease in the number of cases and an increase in testing. There are still too many people not observing social distancing measures and not wearing masks; which puts Florida's aging workforce and retirees at risk.
Manatee	Government	I am NOT in favor of opening Florida! It is way too soon and to many lives will be lost. We have come this far and I say we wait until the right time down the road to open. All my neighbors have the same sentiments on this. Do not open Florida!
Miami-Dade	General	Only 1% of the state has COVID19. The whole point of the quarantine was to slow the spread. After a month (month and a half for most).. we have done what we came for and its now time to start opening outdoor activities, including beaches. We also need to save our restaurants and hotels and other small businesses and begin opening up. Those at high risk will need to stay home and keep caution but the rest of the population should be able to get back to work.
Hillsborough	General	I think we are adults and should be able to decide if we want to go to the gym or out to eat and even to a bar. I believe it should be up to the business to decide if they are comfortable opening up or not. I think the public can make up their minds if they will go to those businesses or stay home. I think you should leave it to the public to make up their own minds up and let them decide what and where they want to go. If the public isn't comfortable going to a certain business that business will see that very quickly and have to make the decision to stay open or close. Ultimately if you leave it to the public they will make up there own mods and dictate what businesses should be open.
Miami-Dade	General	I thought this was a portal for providing thoughts on how to reopen the state; however I could only select "general" from the drop down. With that said, U implore you to keep the entire state shut down at least until June 1, 2020. At that time, let's reassess based on testing availability and testing results and data. I know it hurts but too much us at stake to go backwards now. I do not know one single person who is willing to chance going out to hairdressers, nail techs, barbers. Let alone sitting down in restaurants. Do not even think about theaters, malls, concerts or sporting activities. Those will not come back until next year and only if the wurst is behind us. Are you willing to send your family out into the masses. I don't think so. Concentrate on getting people their unemployment checks. Thank you. I hope someone reads this.
Pinellas	Recreation	I feel reopening the parks and beaches may still be premature. Yes, the Spring Breakers are gone, but there are so many Air BNBs around and they people that come to rent come from all around the world. Just a little too scary yet.

AMERICAN OVERSIGHT

Sarasota	Healthcare	Please don't open things up now. We've gone this far and rushing the reopening so soon will make that in vain. PLEASE!!!
Broward	General	Get Florida back to work! End the shutdown NOW!
Seminole	General	I'm an artist who travel selling her art at art festivals and it's how I supported my family and I need the state to reopen so that I can continue to do so
Volusia	General	Good Afternoon, I definitely think it's time to open some things. I think all state parks and recreational areas are open to the public, including camping. I think most retail stores should open with limitations on people in the stores. Restaurants and Bars should remain closed, along with schools, child care facilities, gyms, movie theaters, spa and hair salons should remain closed 2 additional weeks.
Highlands	Healthcare	No opening should be happening until the number of people getting and dying of Covid-19 is way down for weeks. Who cares about money if your family member or friend could die. I live in Trumpville and I know many people are not serious about this Virus being a serious threat to all of us. My son can't touch or be near his father because his dad has a part time job doing maintenance in a rehabilitation facility. He wears a mask all day and sometimes gloves. He says there have been no cases there yet. Everyone should be wearing masks and it should be mandatory. The President should be modeling it. It's obvious he doesn't believe Covid-19 is a serious problem. I've spoken with three people who think the media has blown it out of proportion. The media hasn't been as strong as the major scientific communities. Goodness, Trump had multiple rallies while the Virus was killing people! Keep businesses, except essential ones, closed. No, Governor DeSantis, WWE and WWF are NOT essential businesses as bowling allies, cosmologists, massage parlour, and restaurants are NOT essential businesses. Keep things closed until a vaccine is found. Don't be stupid. Use rational thought and scientific and medical advice. If school is opened my child will not be in the Covid-19 laden crowd. His life is more important than school. It's a stupid to start school without a vaccine available. Listen mini Trump, I'm not usually a name caller but Trump has taught me well. Please stop thinking about getting money and power for yourself and stop listening to people who don't know how to reason well and do the right thing to keep people ALIVE!
Manatee	Education	We do not think Florida should open on May 1st. Once you do that people will get lazy on stopping the spread. People will feel everything is back to somewhat normal circumstances. It puts people myself included at risk because I have an underlying condition. I feel we should still be doing due diligence with regards to the spread. Lives are more important.
Hillsborough	General	People need to get back to work! Reopen BUT keep social distancing in place...limit capacity on things like restaurants etc. our local small businesses are suffering - some may never recover. Retailers can offer curbside if they choose and also social distance. This can be done if it's done smart and with precaution but we need to start recovering our local economies!

AMERICAN OVERSIGHT

Osceola	General	Testing of the FL population needs to be done and with quick results so we can figure out who has the virus vs. not. With so many people being asymptomatic or having very mild symptoms how can we know who is spreading it and where without test results? Someone with even mild symptoms may decide not to go to a doctor or get tested for a number of reasons. But now that person could actually be someone with the virus walking around town infecting others! How are we ever going to stop the spread without knowing who is spreading it?! We are just going to keep reinfecting each other. Especially if it is still unknown if one can develop immunity or not. We need to have a decreasing number of new cases for multiple days as well before considering loosing restrictions. We should definitely listen to the medical experts advice! After all, they are the experts on medical/science matters. Once we are able to consider reopening some things, we still need to have some type of restrictions in place. We can't afford to attract guests to our state right now unfortunately. Opening the state for business is certainly going to attract people here from other states. Who doesn't want to come to FL especially if their home state is still under stay at home orders? We already saw that with New Yorkers and others from New Jersey that came running down here to escape their states when they were under stay at home orders first. We don't need to add more people to our already large population especially if they may have the virus and may not have been tested. Agreed that business needs to get back to some sort of new normal as soon as possible. If we loosen restrictions too soon things will just blow up in our face and we'll end up worse off than we are already! We'd end up with even more sick, more dead and a longer period of stay at home orders. And EVEN MORE money lost!
Lee	Healthcare	Thank you for all your efforts. While I'm concerned about the economy I believe that opening up the marketplace in the time of pandemic requires great caution. I would like to see businesses open with stringent guidelines. For example; restaurants open with tables 10 feet apart, servers wearing masks, all staff regularly tested, no close quarters for staff and customers. I know the businesses will suffer but I for one would be willing to pay more to support these accommodations.
Palm Beach	Healthcare	,I strongly believe that Florida should NOT reopen recreational activities and relax our individual vigilance at this time. We have just begun to see the numbers diminish, and it has not been consistent or obvious that we are significantly improving. LIVES MATTER! Take more time, no matter how long and then reopen our beautiful state. People will not come if they are fearful. We will see the economy surge when fear is gone. Our country, our government, help keep people alive and we will never regret the decision. Rosalie Pollak

AMERICAN OVERSIGHT

Citrus	General	I am an active person, my wife and I love to walk State Park Trails and we are annual members of Disney and Universal. I am having a hard time saying this, but the "stay at home" directives must remain as originally directed by Governor DeSantis. I have personally observed people are not wearing masks nor using gloves while food shopping, they get on lines without proper distancing and they still get together at their homes. The beaches in Florida were terrible last month and required police enforcement, now people meet on islands or sand banks with their boats to party with others. At this time Florida is still too vulnerable in this epidemic and people need to be forced to heed the medical advice and guidelines for this virus.
Orange	General	Thank you for all your efforts, Governor DeSantis. I agree with re-opening in a smart & slow pace; after going through this surreal pandemic & the current life changes. Thus, the Stay-at-home can be lifted (for everyone) & stay that way. A do over would be so much worse, on all levels. As long as Unemployed Floridians are able to receive income (Unemployment & other Assistance); they will be more patient & not be angry.
Brevard	General	I strongly feel the state of Florida should not re-open until there is wide spread testing. We need to know how many have or had the virus.
Hendry	General	My husband and I strongly believe we should open everything back up. Our economy has been decimated for political reasons. The numbers have been all over the board and unreliable. I believe many are just flat out false and exaggerated to push an agenda. Sun kills it and we live in the sunshine state, it's a no brainer. We understand the incredible pressure you must have been under to shut down, but were very disappointed in your decision to do so. OPEN THIS STATE BACK UP!!!!!
Pinellas	Information	https://www.facebook.com/124538510989702/posts/2884967008280158/ Common sense has apparently gone out the window. After reading this, I couldn't agree more. I believe people not only need to be outside not only for their physical health but also for their emotional and mental well-being. It is time. People need to feel some sense of normalcy and return back to work. If not, continuing to keep the economy closed, even for a few more weeks..... I see a state which depends so much on our tourism industry being unable to recover for many many years amongst many other issues of course. It is time to reopen Florida's economy. Elizabeth
Duval	General	I absolutely do not think you should reopen Florida! We are in Jacksonville where the beaches were overrun the first day not only with residents but people who drive from other states. We didn't spend 6 weeks in quarantine to have it tuned by a bad decision.

AMERICAN OVERSIGHT

St. Johns	Professional Services	I am a tanning salon owner in St. Augustine . I have the cleanest salon in St. Augustine with one of the strictest cleaning guidelines you will find in our area for a tanning salon. Before Covid-19 we were already using hospital grade disinfectants. Our beds our cleaned by myself and trained staff as soon as a customer leaves the room. They HAVE to be cleaned within 12 min or the bed has to go through a very thorough sanitation process. Once we got the notice of covid-19, I increased our diligence in cleaning, implemented the 6 ft social distancing for our customers and staff. I truly believe I can be beneficial to help kill the virus within m y customer base who ran on a regular basis. I will require my staff to wear a mask and we will continue to go above and beyond to give our customers a safe and clean environment to patron. I only have 11 beds total in my salon and each tanning bed is in a separate closed off room. We have never had more than 4 people in our lobby before we closed down for the virus and we will continue to practice social distancing once we can reopen. If that means customers will wait in their cars if there isn't a bed available for them to use, them that's what we will do to ensure everyone's safety. Anything a customer can touch, my staff and I are wiping it down with our disinfectant. For example: counters, key pad, pens, door handles, stools, chairs and the bathroom is cleaned and wiped down after every use. I want to reopen and my customers are reaching out to me daily begging me to open. This also includes nurses and CNAs.
Osceola	Real Estate	I highly agree with reopening the state due to economic loss. I feel that if we continue to remain shut down the economy as a whole will be directly affect in a negative way. Im a realtor and it is a struggle to perform certain services virtually. I do it funny how WWE is considered essential business and real estate not. Reopen the state, its our best shot right now.
Pinellas	General	Please wait to start reopening Florida until the end of May. Reopening should be done slowly. Require all people to wear masks. Public education should not reopen until the end of the summer, only if data shows that data numbers of COVID have gone way down.
Sarasota	General	When you open the State House and County Offices you shouldn't be opening businesses.. Unless you test every person going back to work, you won't see me supporting you in the future. Stop following Trump and listen to your health officials.

AMERICAN OVERSIGHT

Lee	General	I am one of the fortunate ones. I have been able to keep my job and work from home. Others are not so fortunate, and I worry about our state, our country and our economy. However, I am more concerned about the possibility of lives lost due to COVID-19. It is my opinion that it is too soon to make blanket reopening decisions. We don't have enough data to analyze. We simply don't have enough information at this time. Florida delayed its recommended closures and seems to be rushing to reopen. I think time will tell what the right course of action is, if we can be level-headed about what should be our first priority: the lives of others. I fear a rush to reopen will be detrimental to the lives of so many. Please proceed with utmost caution. Thank you.
Miami-Dade	Transportation	As a Floridan resident I would like to give my opinion but in this moment I am going to write in Spanish because it is my mother tongue. Creo que todos estamos deseando regresar a nuestra vida normal, pero sin el peligro latente del contagio, sobre todo los que hemos sido respetuosos de las orientaciones de las autoridades. Desgraciadamente muchos ciudadanos no hacen lo mismo, por eso creemos que es prematuro aún la re-apertura en el condado de Miami Dade que es el más afectado en el Estado de La Florida. No creo que todo el transporte público tiene las condiciones creadas para el distanciamiento social, específicamente los trolleys que tienen una sola puerta de entrada y salida, muy cercana al driver y gran cantidad de público en ciertos horarios. Gracias por la oportunidad de dar nuestra opinión.
Palm Beach	General	Why are you purposely skewing the number of deaths from covid by disregarding non residents? If someone Anyone dies here in this state from covid THATS to be counted. You are lying to the public to appease trump. You will get more of us killed by opening the state too soon. The next wave is coming. Look up Spanish flu. It didn't end well
Brevard	Healthcare	Opening up dental beyond emergencies is irresponsible to all involved.
Palm Beach	Government	As a task force in deciding on the right decision to relax the rules & re-open the State there is no qualified Epidemiologist or Scientist guiding you. Since this all began we have been consistently lied to & slow to respond due to the POTUS & the GOP calling it a hoax. This I'm sure is responsible for the deaths of our citizens. It is time to put money and politics aside & do what's right for the citizens. Our elected politicians took an oath to protect & represent every citizen. We trust that the right decisions would be made including during a pandemic. The specialists are advising we need rapid reliable mass testing with tracing. We also need a solid supply of PPE to our healthcare workers. Most importantly EDUCATION of the general public on blood borne pathogens and how to not spread any deadly virus. We must remain diligent of keeping isolation in place until we have proper precautions in place!

AMERICAN OVERSIGHT

Volusia	Tourism	The Honorable Ron Desantis Governor The State of Florida Dear Governor Desantis & Task Force Members I am hereby requesting that you direct FWC to deem the for- hire recreational fishing industry an "essential business. As you know, the for-hire recreational fishing industry in the state of Florida is a vital part of our tourism and local economy. Hundreds of charter and party boat captains have been tied to the dock for the past several weeks and have already missed out on prime fishing days for their customers this early spring season. Making matters worse, these captains -as small business owners- most are not eligible for traditional Unemployment insurance, and for those who have been able to apply for Pandemic Unemployment assistance, their claims are still under review. Similarly they have been unable to-or have been disqualified from (through no fault of their own) - applying for any of the various loan programs available through the Small Business Administration. Simply put, with no income for weeks we risk losing our for- hire recreational fishing industry in the great state of Florida forever if we do not develop a realistic plan to get these boats back on the water. The current model is unsustainable. Starting May 1st is the opening day of Grouper fishing, as you are well aware our fisheries have had many years of regulations that has affected us to no prevail. As many floridians are avid outdoors people, you know that these boats are professionally operated following the highest health and safety standards. Not only are they cleaned thoroughly before during and after each trip, many customers regularly wear gloves while on the water. With respect to our social distancing initiatives which have proven to be successful I am confident our party boat captains which often carry large groups of #50 plus anglers would be willing to temporarily decrease and limit on-board capacity to a much lower number to further insure customer safety. The current guidelines call for 10 passengers including crew but unfortunately this current amount of passengers does not cover expenses including fuel bait and staff. Lastly I know we all care about maintaining mental health and strong family units during these trying times. As the weather continues to get nicer I can think of no better recreational activity than practicing safe fishing in the state of
Miami-Dade	Information	I would like some information on when I can get my hair cut??I don't have long hair. I can't wear a mask when getting a hair cut. I think hair dressers could wear masks and gloves. Also that is so silly the mayor of Dade County stating manicurists should have plexi glass between them and patron. That is total impossible. Massaging hands and arms is relaxing. I only get my nails cleaned up not painted. You can't move around with plexi glass in your face with a small hole it, whole hand is taken care of. Same with toenails. So we have to wait a year to get all of this done? Till there is a vaccine? Manicurists were already wearing gloves and sterilizing instruments . No plexi glass. Also when will the National Guard come to my CCRC for testing will they test independent or only assistant living, skilled nursing and long term care? Who is a carrier could we find out? When will Fairchild and the Zoo reopen? Fairchild does not have crowds. Thank you

AMERICAN OVERSIGHT

Orange	General	We should not be reopening the state right now. The number of new cases is too high. Opening now to save the economy will only hurt it worse later when we have a resurgence and have to close all over again. Make sure you use healthcare experts as part of the decision making process.
Marion	Healthcare	We need to stay safe, practicing the guidelines set. Dentist offices should be allowed to reopen. They work under sanitary conditions as a rule. As far as all other businesses, I believe if we relax the guidelines, people will return to normal behavior and undo all we have worked so hard achieve.
Lee	General	Don't open until the virus is under control. Protect those of us in charge of protecting the community.
Alachua	General	I am in full support of opening back up businesses. Even if it's with limited capacity.
Broward	Tourism	Our state is dependent upon tourism. We need to slowly open things up and allowing people to go outside. We slowed the curve and it's time for the next steps. Please open the beaches. I see people all over the rest of the country being able to go outside and we have nowhere!!
Manatee	Healthcare	we are not ready to reopen florida. Use the safe system in place, til the numbers of those inflicted with the virus goes way down for a long period of time.
Bay	Government	I am seeking answers to who is responsible and of course who enforces the no short term lease rentals in the state of Florida. Governor has set no short term lease rentals and yet some owners are renting. I live in Long Beach Resort, Panama City Beach, and write down the hall for me we have an owner who has rented the last two weeks. The police of been called and they said they do not enforce this law. Our HOA and Securty are doing the right thing but no one else is. Im told Department of Business and Professional Regulation. are responsible for dealing with these renters who are renting. Please give these people the power to evict these renters. Slapping them on a wrist and warning them does absolutely nothing. I'm just wondering why the governor sets down state laws but does not provide any teeth to enforce them. Total lack of foresight. I am counting on the governor to protect it's citizens. Rich Hoffard
Palm Beach	General	Please don't open the state back up until the doctors and scientists say it's time. We don't want a second wave. That will just make it take longer to get back to some semblance of normalcy. Essential workers need hazard pay right now. Most don't have any other option but to be working right now, and they would stay home and be safer if they could. Since they can't, they should be properly compensated.

AMERICAN OVERSIGHT

Seminole	General	Dear Governor DeSantis, It's time to let our businesses get back to business. They are so many Floridians who have been devastated financially by this shutdown. I am one of them. Our economy cannot withstand another day of this, let alone another 2 weeks. We can social distance as necessary, but please do not hold our economy hostage for one more second. No one will be forced to go out if they choose not to. They can stay in their homes for as long as long as they want. But please, let the rest of go out and live our lives.
Brevard	Recreation	While I do not believe Florida should rush to open businesses, especially in hospitality, until we have the ability to test a large segment of our population and have protocols in place in businesses to minimize viral transfer, I do believe Florida should reopen its large scale open space public lands for resident day use. People need nature for their mental and physical health. All state paved trails, preserves, and other large scale water management and wildlife management lands with minimal facilities and multiple entry points should be available for day use, along with county natural lands without facilities where crowds may gather.
Hillsborough	Education	Please see the attached file which is a letter addressed to the Governor.
Collier	General	Do not re-open Florida! We are not ready.
Duval	Government	Governor DeSantis, I am amazed how fast our Republic's Civil Liberties have been taken away. I have listened to you, our President, and hundreds of experts about the COVID 19, and all seem to have different opinions on this Virus except; the washing of our hands with soap, and water. I in no way would want to be the family member that had a family member die, and couldn't say their goodbyes but I do feel it is time to re-evaluate the percent of Floridians that are slowly dying do to stress from the overstep of our Civil Liberties given to us by our forefathers in the Bill of Rights. You may soon see more "Vulnerable" individuals. For the economy to run you need healthy individuals to work. Healthy individuals create healthy families. I just had my 69th birthday and am blessed to have been born in to this exceptional country. Please treat us Floridians like the intelligent common sense hardworking people we are. Please read this and rethink opening Florida to the Freedoms due to us. very Respectfully, Linda S. Dyer lindaddyer49@hotmail.com

AMERICAN OVERSIGHT

Okaloosa	Accommodation	Please wait to open short term vacation rentals. Only 584 of 74,000 have been tested in Walton. We have very small hospitals AND workforce, lots of out of town tourists from hot spots drive to our area & a flare up would be devastating. Also my Musckogee Creek Indian Tribe relatives live in Walton/Holmes/Washington are vulnerable as a race. I clean condo's for a living in Walton/Okaloosa and I can tell you 80% of vacationers do not care about us or our town. Maybe we could wait til May 15th-30th...it would be good to see how having the beaches open goes. Spring Break was HORRID. Residence don't have confidence Walton's 35 case count is even right because they refused to test, so folks are going to Okaloosa/Bay/Escambia. it is unclear if those folks are ACTUALLY being counted in Walton. Like people that work at the Blackwater Jail live in Walton and had issues getting tested. Also I had to clean a condo after people who fled here from Italy.
St. Lucie	Retail	I am a store manager for a nonessential retail store. I do not feel we should open. We can Sanitize shopping carts, credit card pin pads ect but there is not way to sanitize our merchandise. We carry household nonessential goods. The store gets extremely crowded on most days and at this time I do not feel it is safe to be placed in an environment that is nonessential. Grocery store workers are now testing positive for virus why would we risk more lives for nonessential goods? I believe it is just to soon. Thank you .
Hillsborough	Retail	I work for a Bank. I am really nervous about opening the lobbies again. We should at least operate through drive thru only till at least July. There is going to be another round of COVID and I feel it is going to be 10 times worse.
Volusia	Recreation	We need to reopen the state. There needs to balance between safety and the economy. Like trump said, the cure cannot be worse. And right now it is. Let people make their own choices about how to live their life. This is government overreach. I can make the best decision for me. I do not need to government to protect me. If anything, put protections in place to protect people's jobs who cannot return to work because it is too risk for them due to health issues.
Charlotte	Food	Extend the safer at home. As someone who works as a cook. I say that its too early. Better safe than sorry. If people were getting their unemployment checks no one would be pushing for this. I'd hate to see it open up only to be shutdown again when this spikes up. I know its hard not working right now i went from 50 plus hours a week to zero. But if i have to stay home a little longer for this to pass im willing if we rush back to soon and this pops back up all that we have done will be wasted
Lee	General	I think the state of Florida should ease into opening up by sections of the state that have positive tests and deaths decreasing, then opening the more dangerous sections of the state (example- Miami-Dade) later on once their numbers show a downward trend for the better.
Hillsborough	Food	Hell no not yet seting yourself up for failure, lawsuits, and no reelection

AMERICAN OVERSIGHT

Lee	General	I believe it's time to let the healthy, not-at-risk population return to work and school. Large gatherings for such things as sports, entertainment or amusements should be canceled for to foreseeable future, to be reassessed In the fall. The elderly and at-risk population should continue to shelter in place and should get priority for testing and health resources. FYI, I am a registered nurse. Thanks for letting me voice an opinion.
Collier	Professional Services	Governor You need to ask the FDOH why there is a spike in numbers every Thursday and where those numbers are coming from? If you looked at an overall trend we have been declining in numbers absent the Thursday spikes. So why are we not reopening? In Collier County you are allowing mass unemployment be driven by .15% of cases per population. The number of deaths is even lower at .004%. This is the definition of the cure being worse that the virus. Reopen the State county by county as you have three or four problem counties that are continuing to make the rest of the state suffer. What Industries and how can be driven by your panel of experts but you need to start acting at this point. If you declare it will be another two weeks before we open consider yourself a 1 Term Governor.
Miami-Dade	Healthcare	No estoy de acuerdo en este momento, las personas ahun no han tomado la seriedad de la enfermedad, yo he estado trabajando desde mi casa y ya el lunes tengo que regresar somos 14 personas y cada escritorio está uno pegado al otro, hoy fui al supermercado y vi personas sin máscaras es demasiado riesgo ahun.
Pinellas	Education	Please do not reopen our state until the health EXPERTS say it is safe to do so. I am a mostly healthy 20-something-year-old but fear the havoc that COVID19 could wreak on me, my almost-70-year-old parents, and the medically-fragile students that I teach. If I become ill or worse, I would be unable to support my parents and my students, should they become ill. Because we DO NOT KNOW the status and statistical effect of asymptomatic people yet, it is inappropriate to reopen our state until accessible testing is widespread and can provide health experts better understanding of this status. Please wait until the health experts say it's okay to do so. If people are dying, there's no use to reopen the economy.
Collier	Healthcare	Please proceed with reopening businesses as usual. The harm that is being caused by the lockdown is greater than that of the virus. Allow indivuals to have personal liberty to choose how they would like to live their life. Those that are at risk should be encouraged to continue sheltering in place and antibody testing should be utized with those individuals. Healthcare Director of Operations
Broward	Government	ALL GOVERNMENT OFFICES SHOULD OPEN FIRST AS.A. "DRY RUN." EVERY CAREER SOURCE, DMV, CODE ENFORCEMENT-everything. Do a dry run and then go from there. ALL.STATE REPS.AND SENATORS SHOUKS BE OPEN TO THE PUBLIC 8-5 FOR ONE WEEK.. Let everyone come to them personally with concerns and complaints. Then we can go from there.
Alachua	General	Please open back up the economy. We need things to get back to normal.

AMERICAN OVERSIGHT

Marion	General	We need to stay closed. Let Georgia be the test case. We will need to wait a month to see how Georgia is impacted. Though they need to do a better job on testing, as does Florida. Before we can consider opening we need more testing.
Lake	General	Would like to see the State open up gradually. Testing needs to be ramped up. I feel not enough of the population of Florida has been tested and truthfully I don't even know where to go in Lake County. All places that would draw large crowds should remain closed until more people have been tested and our numbers start to go fine. Also I feel people coming from the hot zones in the country should not be flicking down to Florida at this time. We are a family of 7 and all five of my children are nit working and two is them can't collect a dime because they are self employed. One if them ya divorced and has two little kids so the stress on her is immense. Hospitals should be able to do fine surgeries and people need to feel safe when they go anywhere. More testing less anxiety fur the state to gradually open up. Also if a person was ill earlier with a respiratory where can they be tested to see if they did gVe the virus earlier.
Jefferson	General	It is time to push the decision making down to the local government level based on their progress and response to the virus. The shopping in the big box stores is basically unregulated yet the small businesses in rural areas are shut down. The little stores would provide a much safer atmosphere than the bigger stores, Elderly women need to be able to go to a hair Solon to get their hair and head washed. Many depend on this service for personal hygiene as they can no longer do it theirselves. This can be done by appointment only and time between appointments to snatize theworkmares. The state should support counties and cities but not dictate to them. The elected politicians are the ones who should be held accountable for opening or keeping their areas closed. It makes absolutely no sense to have liquor stores open and othe small businesses closed. People can still stay home if they chose no can social distance . Government is killing the small shop owners who have invested what may be their savings in the hope of doing business only to be treated unfairly bu their government allowing the big guys to sell any thing not just essential items. This is taking these small shops to the end of their capability to survive. The state is diverse and needs to be opened the state pass the decision making responsibility to the local levels to open their businesses and services.

AMERICAN OVERSIGHT

Leon	General	Opening everything is a must due to no income for everyone. I believe most people will abide by the rules. My concern is all the ones not following recommendations by the Government. Lots of people walking around without mask. Not following the one way lane directions in stores. I also see a lot of people hanging out together & on the water. Which is fine if they all live together. But I see some going to work everyday (which I understand no income) except I have been only going to essential errands & home. I have a 18 year old who lost his job & I am in service industry. We were broken last year due to losing everything after Hurricane Michael. Now we are barely surviving & scared of going back to work & catching this virus. No unemployment response yet for either of us. So if there is a way to charge people who aren't complying or refuse service if they don't comply. That would help. People are panicking because no income. Hopefully funds will come soon before we are homeless. We must work & be responsible for all man kind. Thank you. I know this isn't easy. God bless
Volusia	General	Even though it may not be considered essential, chiropractors and massage therapy is necessary when you have back injuries and or other muscle injuries that are required to stay healthy and active. Liquor stores seem to be necessary but yet medical care to alleviate pain and discomfort is not. Let's start looking at what is essential for health, mental health, and every day quality of life
Hernando	General	Wait for scientists to decide when to reopen the state due to coronavirus. Otherwise, we'll keep spreading it and it'll take longer for this crisis to end.
Miami-Dade	General	The economy has to reopen otherwise we'll be bankrupt soon. However it has to be done escalated and by people keeping safe measures and social distancing.
Pinellas	General	Please do not rush to reopen the state. If you do, lives will be sacrificed all because of money. Our large, vulnerable senior population is at significant risk. Throwing the doors open to travelers beyond our borders will cause the virus to spread dangerously. This is foolish and could cause the state to face overwhelming losses as hospitalizations and deaths increase. If Florida opens too soon, we will all pay a terrible price. As a state this could be crippling for years to come. Save lives. Safer at home.
Lee	General	My thoughts on reopening Florida. I think it is a little soon to open public establishments. Florida is a popular destination state. I fear by opening too soon will attract too many out of state visitors and we will have a new influx of covid 19. Our stores are not stocked with protective items ie; face mask, hand sanitizer, disinfectants, alcohol to make sanitizer. Too many people will have to return back to the working without proper protection. Please consider waiting until every Floridian has proper access to protective measures.
Broward	General	I do not think the stay at home order should be lifted on April 30th for Palm Beach, Broward or Dade county. We will end up being closed longer if we re-open too soon.

AMERICAN OVERSIGHT

Collier	General	Please re-open Florida! I understand that we had to shut it down because we didn't have enough data. Bur now we do. The data is not substantial enough for closing down the entire economy. In order to resist this virus we have to build herd immunity. Staying home we are only weakening our immune system, exactly the one that we need to strengthen. We can focus our efforts on protecting the weak, but not on weakening the healthy. Thank you very much! Cordially, Cosmina Lemoine
Hillsborough	Healthcare	Hi, I am an RDH in Hillsborough county. My biggest concern is PPE. Do we need an n95 mask? Are level 3 masks sufficient? Do we need face shields or disposable gowns? I think the minimal amount of PPE for this time should be mandated so we are all on the same page. A member of the public should be able to walk into any clinic and see the same level of care during this pandemic. And finally, If we should become ill as a result of working in a high risk environment, I was wondering if this will fall under worker's compensation? I think that is something that should be addressed since in our field many do not have healthcare coverage. Thank you
Pasco	General	Open up Florida all the way! Now!!!
Pinellas	General	I am a college student at Florida State University, and like many of my fellow college students, I am struggling to find a job now that I have been forced out of my school and back home for four months. This is not as much of a suggestion as I do not believe I have the experience necessary to make one, but more of a plea to do your best to open the economy quickly. I must find a job soon to be able to support myself next year, and if the economy remains closed I will not be able to do that. The stay at home order that is in place has also had negative consequences on the mental health of myself and my peers. I understand that it was put in place to flatten the curve, but now that the curve is flattened I do not see a problem with being in public among my friends while wearing a mask and practicing good hygiene.
Pinellas	Recreation	One way to open public libraries and gyms is to designate areas separated by six feet and have people allowed to come in to get/renew books or work at the computers, etc. Gyms can have sign-up sheets where people can sign up for specific equipment, labeled at six feet apart for a half-hour, to be cleaned thoroughly before and after use by the user. Personal service businesses can also open to restricted business using a sign-up method also. All of this until we finally get everyone tested/vaccinated/inoculated with antibody serum, etd.

AMERICAN OVERSIGHT

Hillsborough	Manufacturing	it essential to go to work nowhere to receive unemployment check and stimulus check over 5th week since everyone got their benefits I get nothing to get food for me social distance work every station skip one and coming to work check temperature and necessary masks during work splitting shift break group 10 depending however many work at companies some can work from home splitting up in warehouse halfway I can't getting benefits at all it risky to waiting for eat healthy worker go work if someone doesn't want work stay home or refused mask send them home follow rules masks and temperature how long out of working and receive no benefits at all for some reason I didn't get nothing while half of Florida people receive no problem no one replied to me
Pinellas	Healthcare	It seems that we have been given the green light to return slowly and safely to normal. One area Is seldom discussed and that it the opening of the Churches. This is very important to many people. The stores are marking the 6 ft. spaces for safety. This plan can also be applied to Churches. They can mark the benches 6 ft. apart. Masks may be used for more protection. Please consider these ideas as a possibility for people to get to Church again and we will be sure to pray for the end of this epidemic. Sencerely, Catherine Mandalinich
Flagler	Education	Please do not re-open Florida until this pandemic is passed. Keep us safe. Our lives are in your hands. Ty
St. Johns	Government	I would rather suffer longer than have a chance of more people dying
Leon	General	Until there is a vaccine, no one is safe from this virus. All reputable health experts say it will continue to work its way through the population until there's a cure. Social distancing is the only way to guarantee that we keep hospitals from being overwhelmed so people can get adequate care. The reason that Florida hasn't been overwhelmed is because distancing is working. Any business that opens before there is a cure is killing people. So far, the rush to reopen is coming from business interests who do not value human life. It's immoral to assign a dollar value on people, which is what the push to prematurely reopen is doing. Our government (in theory) is put in place by citizens and should work for the public good. Considering that the makeup of the reopening committee is so business heavy, it's clear that the Governor is willing to sacrifice human lives to help them make a buck. It's shameful, immoral, and not Christian. This pandemic should make Florida rethink how heavily it relies on tourism to fund everything. Our state is beautiful and people will want to return, but it's going to be a long time. Tourism is too fickle to rely on wholesale. We need to look at more stable sources of tax revenue and start with requiring corporations and large businesses to pay their fair share. If they want to sacrifice our lives for their bottom line, they should have to pay for it.

AMERICAN OVERSIGHT

Lee	General	I request we open all business on or before may 1. we are now allowing 90% of our population to funnel into a handful of stores. this makes no sense. Are we trying to stop the spread of this virus? we will be locked down until the economy is destroyed..The so called essential workers have found a way to work safely i am sure the rest of us could also . Ninety Eight percent of people infected with this virus either did not know or thought they had a cold. The other two percent had underlying medical conditions which caused in some cases death. If we are to confine anyone it should be only the two percent. We cannot let the cure kill us.
Lake	Professional Services	As a receptionist at a Salon in Windermere, I am begging that you do not open the state. I can put up with meager unemployment benefits, and the non-existent (for me) help from the federal stimulus bill, but I absolutely can not put up with the risks that going back to work at a salon will put me and my family through. I've seen a few reports of the task force calling salons and barbershops low risk businesses to reopen, and I can not stress how untrue that is. Salons may be less risky than Disney, but that doesn't mean they are low risk. I know if you decide to reopen the state, the owner of the salon will reopen, and I will have to choose between my safety and having a job... I would give a lot to not have to make this choice, especially when I know it will effect those aforementioned unemployment benefits and would inevitably leave me with nothing but my health. Please do not reopen the state until we are sure that the worst is long gone.
Pinellas	Government	Sir or Ma'am, there should be no talk about reopening until all emergency responses are completed to include National Guard. If there is a need to have people deployed all over the state that should be a good indicator that we are not ready to open.

AMERICAN OVERSIGHT

Pinellas	Retail	As a small business owner for nearly 30 years in Florida, my struggles and hard work from scratch with sweat, blood and cancer to arrive to thrive in beauty supply retail store (which is not the same as skincare service or salon, rather it sells retail personal care products on shelves to customers just as Walmart or Walgreen; and the Governor and Pinellas County commissioners ordered my retail store to shut down without any option for curbside or pickup. Inconsistency in decisions made in COVID19 crisis for many retailers are clear: neighboring Hillsborough county with more cases of COVID19 let similar business operate, Pasco county let the similar business have curbside pickup and Jacksonville changed to essential for the same businesses. Economic impact is devastating for me since landlord is not flexible, expenses are still there, suppliers payment is all on hold, and SBA PPP payment assistance, not a dime yet, as we all know... If this forced hold on nonessential retailer as the state categorize goes pass May 1 to unable to open for business, it will bring my business to ground and struggle to survive. I was doing well with business responsibly following the safety measure by masks, gloves, and social distancing with no more than 10 people gathering and even installing clear barriers near register check out counters prior to shut down order. Yes, even small business owners can follow safety measures just as Walmart or Home Depot; Just give us the same leveling options. I am proud veteran, seen the both side of the sector, one receiving pay regardless and the private business only survives when open and working. Respectfully, let small businesses open with same measure you allowed big retail companies - let me support pay to my employees and taxes to the US government, sir.
Hillsborough	Government	It is time for Floridians to get back to work. Throughout the past weeks of COVID restrictions businesses deemed “essential” remained open. Floridians who patronized those businesses voluntarily engaged in social distancing, voluntarily followed CDC guidelines. With these businesses open, sometimes serving hundreds of people at a time, twelve hours a day, seven days a week, we have witnessed COVID numbers falling. The State of South Dakota never mandated a single business closed and are also seeing COVID numbers falling. These facts prove that Floridians are responsible people, who love their neighbors, and will CHOOSE to do the right thing. But we need our elected representatives to do the right thing; we need our businesses open now, not later.
Pinellas	General	I strongly believe Pinellas county & other parts of Florida need to begin reopening. I work at a dental office and since the executive order we have all been furloughed, thankfully we received the PPP funding. Our office can not wait to get back to seeing patients for elective procedures and hygiene cleanings as these lead to 90% of our revenue. Allowing retail stores, restaurants, salons to reopen will help bring our economy back! As citizens we are smart enough to take the health precautions when out in public and will obey social distancing rules! Our goal was to flatten the curve and that is exactly what has happened, time to get back to work & life!

AMERICAN OVERSIGHT

Broward	General	As a Floridian I am extremely concerned especially with the new information as far as people being Asymptomatic with the active virus. I truly believe this is something that needs a closer look before we take any advances on reopening. I am a Veteran and I have children this new information concerns me very much. Also all the food distributions are mainly Miami, as well as being mid morning I am homeschooling 3 children and a single parent. I cannot leave my children at 2am to get in line. Something needs to be done about this. Please EVERYONE deserves to be treated equally and I feel like I'm out in the cold because I do have children and all the distribution times are during remote learning. I'm trying my best but it seems to benefiting everyone but those that really need it.
Seminole	Recreation	Open publicly pools, parks.
Pinellas	General	Please save lives do not open too soon
Baker	General	I do not believe Florida should open everything but some things such as salons, barbers, and nail could open if they can prove they can keep customers safe and 6ft apart.
Broward	General	First concern is that parks, beaches, public areas are closed. These are areas where people can safely social distance and exercise. Especially for the amount of population. In condos/apartments where you do not have access to green space to be able to exercise. Seems like an overstep of the government when social distancing can easily be observed. Personally, people need to get back to work and do so on a safe way. You cannot cause an insanely high unemployment by closing businesses when the minority of the population has been impacted. 1 in 4 Americans are in a retail related position. We have to get them back to work in some safe capacity. The closure was meant to not overwhelm hospitals, not to completely solve the issue. We have prepared hospitals and not overwhelmed them. The time is now to begin the process of reopening to save the economy and well being of Floridians.

AMERICAN OVERSIGHT

Lake	General	My family joins the many who believe our society must immediately return our way of life to the pre-COVID era, with some very limited large-group exceptions. Yes, policies should be implemented to minimize COVID-19 widespread loss of life. But, exclusively due to the systemic and prolonged shutdown, there will also be many other: lives lost, business failures, quality of lives decimated, cases of clinical depression, American “visions” abandoned forever, and so many more adverse effects. I state this because it is a fact — and notwithstanding that my wife and I are seniors who some would consider members of a vulnerable group. To truly scientifically (versus arbitrarily) assess any absolutely-necessary exceptions to full reopening now, among other 21st century tools there are artificial intelligence algorithms that can be designed to optimally balance the two competing principles of: (1) minimizing widespread loss of life from COVID-19 and (2) other important — indeed essential— societal goals. Certainly, we can do better in this day and age than the one-dimensional and one-size-fits-all framework we are now under. The imbalance inherent in the present system is further frustrated by the fact that projections have been materially wrong, guidance has been misinformed or mis-communicated, and accountability regarding these missteps has been strikingly absent. In this regard, so many science-based questions have gone unanswered or unasked. Here are just a few: 1) What are the key assumptions of the models, and have they been sensitivity-tested? 2) Have the models been adequately peer-reviewed and retrospectively tested based on the data that have emerged? 3) What are the confidence intervals of the projected model output? 4) Exactly how has the CDC forecasts and decision-making deviated from the model projections and assumptions (before-the-fact), and exactly what was the science-based and medical-based criteria for the direction and magnitude of the deviations?
Osceola	Professional Services	using appropriate safety measures, Salons and barbershops should be allowed to reopen. As a senior, it is difficult for me to wash my own hair and certainly not cut it. If it means one client at a time, that would be oaky and I wouldn't mind paying a higher cost for the service.

AMERICAN OVERSIGHT

Sarasota	General	Hi, I'm 14 years old, and I go to Booker High School. I lived in Florida for 5 years going on and I love it. I hate to see this town struggle and people fighting over the virus. I am concerned with the way everyone is handling quarantine and how to fight the virus. I know I'm not a medical professional or educator but I think I speak for a lot of kids and adults when I say to please reopen the state. I'm scared I won't be able to go back to school in August and of the vaccine which I've heard people want to put a chip in. I think it's crazy, I know Desantis is a smart man because he's made many decisions that have saved us and I know he'll make the right decision with reopening the state slowly. I hope by July we will have everything opened up. It sounds crazy but I know we can do it. Our country can not survive a quarantine that long we will fall to another and even worse economic depression and that worries me. Rumors of another war don't seem as outlandish as they do now. I want to be able to see my friends and family again, go shopping and go to school. The online schooling is really hard for a lot people because there's just no motivation and it's hard to deal with the different tasks I feel I'm never in control with what I do. Even if it means wearing a mask everywhere I go with limited hours it's still better than nothing. For businesses small and large to flourish again after this economic drought would be impeccable. I know my opinion is probably insignificant but as a teenager living through this it feels like hell and no one is thinking straight. I hope you will consider my opinion and ideas and slowly reopen this beautiful state that more than 20 million people call home. Take care and God bless.
St. Johns	General	Feel it's too soon still to many people sick .
Brevard	Government	Although I may not offer any thoughts on as how the health of the State is, I will offer that if we are in this situation then we need to be patience and await the numbers to become back to pre-situation conditions. Opening the State before we see this happen could only put us in a place that we would have a much a harder time to return. America is built on small business, and I think a lot of people forget this. Those small businesses that will struggle to get out of this now, before we are clean, will have, if they even can, a much harder time returning if this pokes its head out again in 30-90-days. There is a lot of cost needed to re-open, although to use this cost now, only to have to do it again, will probably put most out of business. As far as the governmental agencies, they can continue to work from home, saving a lot of others which may not be able to, e.g., resultants, hair salons, etc. The agencies can continue to work from home without causing others to spread what might return... the small businesses. I commend what the governor has done with closing the state, and ask that he continue this until a time that our numbers are lower than when we started. I know he is in a tight spot, but this is best for not only Florida, but America. We are a tourist state. Open others to come in only increases the possibility of another out break. We need to wait it out! Thank you. Scott

AMERICAN OVERSIGHT

Orange	Education	I am writing my comments as a healthcare worker who has been treating patients and working at covid-19 testing sites. I am also the parent of a child in first grade. I am disappointed that schools will not be opening in some form, even a couple of weeks. Education and socialization are very important, and what children are receiving at home is inadequate and likely detrimental. School is also the main source of childcare for our family. My husband and I are both essential workers, and it makes it difficult to perform our work duties without childcare. When non-essential workers are able to return to work as well, what will they do for childcare? In order for our economy to start resuming, we need to be sure that options for childcare will be reopening, particularly summer camps, since school will be ending for the academic year. Thank you for reading my comments.
Pinellas	General	Dont open up! People are dying.
Pinellas	Recreation	Please open up public swimming pools for exercise. Lap swimming and training can be done safely in a well maintained, chlorinated pool. The City of St. Petersburg has full time certified,pool operators that keep the pool water quality in pristine condition and exceed health department guidelines. Please allow North Shore Aquatic Complex to reopen with social distancing, lap swimming for youth and adults. It's imperative for mental and physical health. Locker rooms can be restricted and rest rooms can be sanitized adequately between patrons. Lap swimming for all ages is an ESSENTIAL activity. No swim meets for awhile but please open now for exercise!!!
Escambia	Recreation	Need a haircut and go to YMCA and workout and loose these pounds I put on in the last month please
Leon	General	We have had only 2 deaths in Leon County. Let's open up. My husband is laid off and no money coming in. Unemployment is a mess. Not having any money for so many people is worse than the virus. The economy is going down fast and we have surpassed the 2008 recession. It's a necessity. The Dems would never have us open so they can try and hopefully have Trump lose the election. I know we have to wear masks and keep 6 ft. apart. But, we were in Walmart on fri and it was absolutely packed. What difference did this virus affect that business..none. People are trying their best but bottom line OPEN LEON COUNTY.
Hillsborough	Healthcare	As a dental professional, I beg you to extend non urgent dental procedures until at least 6/1. Dentistry is one of the leading occupations who are at a high risk of disease and virus. Currently there is a shortage of proper PPE. Dental professionals can not safely treat non emergency patients at this time. I find it completely irresponsible to do so and complete negligence to dental staff. Everyone needs to get back to work but it must be done in a safe manner. Thank you
Broward	General	It is still NOT safe for the state to reopen. The spread of Covid-19 can not be detected in people who do not present the illness. I do however, feel as though some recreational activities could be accomplished by keeping safe social distance as long as equipment is not commonly used.

AMERICAN OVERSIGHT

Volusia	Healthcare	IF you want to reopen the state...YOU MUST TEST MORE AGGRESSIVELY for those of us who had symptoms back in late Dec and early Jan. We plan to go to to the volusia county fair grounds on may 4th, but have little faith that they will have testing available . YOU MUST TEST FOR ANTIBODIES. I can tell you where we got it and when... both came down with it a day apart... mine was mild hers was fever chills and respiratory. ONILY place common was LA Fitness... I am O neg she is AB-.....STop testing usually and test for those that believe....along with our health providers that we already have had it.
Pinellas	Professional Services	As an immunocompromised hairdresser, I do not see how we can possibly open and social distance. There is obviously a shortage of all PPE for all medical personnel, so how on do you suggest we protect ourselves when people are literally in our faces all day? Not to mention it's still almost impossible to find sanitizing wipes anywhere. If you open salons up, we all have to pay rent again, which means we have to work whether we would like to or not. I did not beat cancer twice to die of stupid corona. As for the unemployment, did you think maybe you should just approve everyone so that they can at least start getting the federal, and then maybe deal with the state part later? I doubt too many people are trying to scam you for the $275. But if people had the $600 it might give you a little time and breathing room...just a thought...
Leon	General	I would like to see the state wait and see what happens in other the states that are starting to relax restrictions. Take advantage of seeing what does and what doesn't work for them. At the very minimum wait a couple more weeks before opening back up. I would also like to see testing for antibodies since people could have had the COVID19 and not known it.
St. Johns	Healthcare	North Florida ready to open gyms pools hair salons restaurants with distance rules
Brevard	Healthcare	I think we need to allow restaurants to open and let them seat tables 6-9 feet apart and to wash tables, chairs after every customer leaves... the waiters need to wear masks and even gloves and change the gloves after each is served. The other businesses also should be allowed to open with the same consideration.... Banks have been open from the beginning as have food stores and they did not start wearing masks or using shields until recently. So, I think all businesses should be given the same considerations. It is time to allow limited visitors to see patients in nursing homes and hospitals. Again, the visitors should wear masks but patients need their families and should never die alone.... It is time to open up the state and the country but we should all be encouraged to wear masks in closed areas and use hand sanitizer until we are able to wash with soap and water.... thank you. Millie Dunn
Orange	Government	Our county is still going up with cases. I think the beaches should be closed. The theme parks should remain closed . Be stricter on how many people enter the stores I went into a target today for items I needed, no social distancing looked like a regular Saturday afternoon so much people. If we actually practiced the percentage on how many people entered we wouldn't keep having so many cases. We will open soon but no In the next weeks still to soon. Cases have to drop

AMERICAN OVERSIGHT

Pasco	General	I have a hard time finding disinfectants to purchase for my house, where are these businesses going to get all the disinfectants they need to keep their customers safe after they run out?
Orange	General	Please reopen
Palm Beach	Recreation	Please open public boat ramps and keep sandbars closed. Please open beach access for exercise swimming,surfing, and walking. No group gatherings. Thank you!
Pinellas	Tourism	This is the area that makes our family of 4 feel the least safe. Travel particularly on airplanes where passengers SHARE cabin air Is a real concern. Supporting our local communities should be our main focus.
Wakulla	Government	As a previous Healthcare worker, and a family full of medical doctors and nurses, I feel the peak as yet to come, continuing to keep the state close for few more weeks will not allow the virus to Repeat itself, as we are continuing to see multiple new cases every day I feel as if the human cases will began to rise. We need more of a plan then just this new medicine that has came out, more knowledge on how to prevent the Society from risking themselves and exposing until there are other alternative.
Hillsborough	General	I think all restaurants should be opened. All beaches with limitations. All stores should reopen with limitations. We should get back to normal as soon as possible just with limitations. Clinics should start performing blood test to see who has the antibodies as soon as possible. We probably have more people who have had it and are fine.
Manatee	Food	Hello I write to you as a hospitality worker that has been doing a strict stay at home since I got laid off 3/18 from my restaurant job. I would love to get back to work however I work in a place that has outdoor seating and I am terrified to even go back to work in an outdoor area as well. We have a lot of employees that may have not have practiced stay at home as strict as I have and also I do not want to rush having customers come in that are not as mindful as I have been. Please please wait a few more weeks to open dining areas inside and out. I respect we all have to go back sooner than later but please for those of us that have worked so hard to be careful, mindful and have respect for others by isolating don't put me or anyone else in a situation that can wait a few more weeks. Grocery stores are not as over crowded as once they use to be so it really won't make that much of a difference. Don't forget employees hang around one another when in close outdoor areas as well just keep it closed for everyone's sake. Thank you!! Your doing a great job taking your time keeping us all safe so that we can return even stronger!
Miami-Dade	Healthcare	As a physician working in miami area I'm frankly concerned about the status of many patients going home waiting for semi elective procedures. It's time to open the healthcare for business the way we normally do.
Broward	General	Please open South Florida as soon as possible!!We are retired but have to support our son because he has no income now , please open so Florida ASAP! Thank you!

AMERICAN OVERSIGHT

Santa Rosa	General	I do not believe that one size fits all. Santa Rosa County. Is made up of a lot of small businesses. The people in this area are hurting. Small non chain restaurants and their employees need relief. Other small businesses in our area need relief. Please open State Parks for camping I can not see how social distancing would be a problem on the campsites. I think this would relieve a lot of mental anguish people are feeling I guess what I am trying to say is open back up our County/our State. We are a nation of free people Most people want to work and live their lives. Not be treated as children on restriction. This is a health crises It should not take our freedoms away. For those that are vulnerable let them do what is necessary to protect themselves. Let the others make their choices according to their lives.
Manatee	General	I call BS on the whole "people need to go to the beach" to get exercise and sunshine. They can open the damn front door and walk outside. Most people in the world don't have access to a beach and they seem to survive. Listen to the scientists - and oh yeah, maybe have someone who specializes in public health on the advisory panel. Stop kissing the ass of the president, Governor. I thought you showed some promise of reaching across the aisle - WRONG! You suck!
Seminole	Recreation	Reopen public pools and parks.
Franklin	General	I support starting the reopening process for the state, however, I believe it needs to be done in careful stages. Begin with the more unaffected counties, allowing stores and restaurants to reopen, adhering to social distancing rules. Require restaurants to operate at limited capacity, with 6 ft between tables. Same with stores. Limit capacity. Require the use of masks in public. Keep the epicenters locked down until their numbers are on the decline.

AMERICAN OVERSIGHT

Orange	Tourism	Hon. Gov. DeSantis, We are closely following your Task Force meetings assigned with reopening the Florida economy. Despite not having a vacation rental industry representative on the Task Force, we would like to respectfully ask that the vacation rental industry be allowed to reopen in May and resume operations in a limited capacity at the very minimum. We are a $31 billion dollar contributor annually to the hospitality economy throughout Florida. Prior to the Covid-19 pandemic our industry was creating 312 jobs per day. Today many of our industry employees are unemployed. We need to get back to work. Vacation rentals have implemented enhanced procedures to clean and sterilize homes using the most advanced techniques following CDC and EPA recommendations. Small businesses like those in the vacation rental industry have suffered enormously over the last 30 days and need to get back to work. Many have applied for CARES Act funding and still have not received approvals for funding and maybe never will. Many small businesses have been shut out of this program. We respectfully ask for you to reopen vacation rentals and allow Floridians the chance to get back to serving guests in the state's premier industry.
Hillsborough	General	Follow US recommendations for phased opening. Testing should be available for all and special Senior hours must be available until a Covid-19 vaccine is ready for the entire public.
Charlotte	Administrative	I have very little confidence in the governor and his ability to lead Florida. He was slow to accept and to react, and was politically motivated on how to react. His first ambition should be to the residents of Florida.
Leon	General	Please re-open Florida. If people don't want to go anywhere or do anything, they can stay home. The shut-down is a total disaster. The worst is the schools being closed. Kids need to be learning in the structured environment of schools. Kids aren't doing anything except playing outside in groups all day. They might as well be in school together. The state parks need to be open for recreation. Getting sunlight and exercise helps to prevent illness. Opening gyms, restaurants, bars, etc. might not be all that safe, but if someone doesn't want to take that risk, they don't have to. What is going to happen to the State budget if we don't re-open? Let's give people a chance to get back to work. Let us try to get back to a normal existence!!!
Polk	General	Creo que debemos esperar hasta el día 10 de mayo o un poco más es muy temprano para abrir hay que dar por lo menos unas dos semanas más a ver qué pasa con la pandemia ya hay muchos casos en Florida y no nos podemos confiar y entremos en la recurva .

AMERICAN OVERSIGHT

Sarasota	General	Please OPEN all of the state without additional lockdowns. Do NOT put this on the Mayors!! The Mayors say it is on you and then you say it is on them! PLEASE be the strong Govenor that we put our trust in when w elected you. The residents can make their own personal decisions if they choose to stay at home longer. We do NOT want to continue this "socialist" style of living. Thank you for all you do!!! Best Regards.
Brevard	Professional Services	I think it makes sense to start opening retail businesses and operate them on a limited number of patrons aloud inside. Same for movie theaters and restaurants. Face coverings should be worn by employees and suggested (but not required) by patrons. In regards to office space businesses, they should be required to maintain a certain number of people per square feet (equivalent to staying 15' away from other people). But, if the business is capable of continuing to work remotely, then they should be directed to do so. Any gathering of more than 50 people should not be allowed until June, then it should slowly increase every 3 weeks until we see how things go.
Broward	Professional Services	As a Hairstylist, it is impossible for me to maintain CDC recommendations on social distancing and do my job. I want to caution against letting salons reopen at this time. Especially as my area is highly affected (broward and palm beach where I work) and has a large elderly or at risk population. If you open the salons too soon I guarantee the elderly from this area will flock to the salons and it would become a hot spot for a surge in the spread of this virus. When you consider all the measures we would need to take to even begin to try to keep ourselves and the clients safe. Right now we can not get proper masks to protect ourselves as they are only available to medical proffesional (as they should be) so you would be putting the entire salon professional industry at risk by allowing them to reopen too soon. I believe they should not begin reopening till at least June. Please salons are not like restaurants or other non essential business where you can work and maintain social distancing do NOT group them in with those. I implore you to apply extra precautions with this area of buisness when you choose to let us re open.
Lee	General	OPEN, OPEN, OPEN!!! We are freedom loving Americans who are not willing to have our way of life taken away. We know we can social distance and do whatever, but, open our state, we can follow the rules.

AMERICAN OVERSIGHT

St. Johns	General	Governor, we do not keep people from cigarettes or other things that are known to cause death or severe illness - we just put a warning label on it and let them make their own choices. This media hyper panic has caused the government to overreach on our constitutional rights, and we need them back. Please reopen the ENTIRE state, and tell people that if they are concerned about their safety, they should take the advised precautions. but stop holding the rest of us hostage, while our finances fail.There are thousands upon thousands of us that have already had this virus and gotten over it prior to the country even knowing that it existed. Herd immunity is much better for our state than hiding out in our homes, letting our economy fail, and thinking that the virus is going to go away while we hide. In addition, closed spaces are much more likely to transmit the virus than going from place to place, especially outside in our sunny state. Plus, the longer we are closed, the more the evil Nancy Pelosi wins in her war on our great President.
Jackson	General	I think we should open back up and have the same rules we have when we go to the grocery stores. Social distancing and masks, washing hands, sanitizer. I'm 66 years old and I'm very careful everywhere I go.
Clay	Information	I FEEL CHURCHES SHOULD BE ABLE TO HOLD SERVICES AS LONG AS THEY PRACTICE SOCIAL DISTANCE. PEOPLE NEED THIS GUIDANCE DURING THIS TIME!
Orange	Healthcare	Lift ALL restrictions!!! This 'pandemic' is weak and not nearly as bad as the propagandist dictated. Are people getting it and sick? Yes, but not nearly to any levels that require any lockdowns, shutdowns, or curfews. This isn't any worse than the seasonal flu on that level. #ReOpenFlorida !!!
Pinellas	General	Like everyone else, I look forward to things being back to normal. However, I have a son with a respiratory illness and I do not want him to get sick. If we open up too soon we could cause another spike causing us to have to be locked down even longer. If we open up and allow people to gather in large groups too soon it could be bad. We need to think about the people this could kill. I worry about my small business friends. They are having a hard time, however opening too soon could cause more problems for them in the long run. Let's make sure we are in a good place with this, then and only then should we slowly start to do this, with the guidance of professionals who have studied how to do this.
Brevard	Healthcare	I believe the reopening of Florida must coincide with a greatly increased effort to test our State's population for the virus. To reopen without knowing who among us has been infected by CoV-19, isolating those that test positive and returning to work those who have survived the virus (and hopefully are immune) to work would, I believe, leave us open to a resurgence of the pandemic. Additionally, determining those who have had the virus and recovered would provide a source of antibody treatment for those who need help to recover from the illness. We know that social distancing has helped to contain the spread of the virus, so it also seems reasonable to consider opening business that could realistically maintain safe intervals between customers. From what I see from neighboring states, I don't think that beauty shops, barbers, tattoo parlors hardly fit the reasonable distance criteria.

AMERICAN OVERSIGHT

Volusia	General	I do not think that the restrictions should be lifed on April 30, 2020. There are too many careless people out there that think this whole situation is a joke. They have not stayed at home and they do not work. In and out all day long, touching others, not staying 6 feet apart. I watch the numbers daily in central Florida and they are still climbing. I am sure that they will go up drastically if the restrictions are removed. Too many people only care about themselves. Thank you. /s/ Linda V Marshall Former Health Care Provider
Orange	General	Hoping to fully re-open in 3-4 phases, as quickly and safely as possible. Health and safety is top priority, but the economy is also important. FL can do this!
Broward	General	It's too early to reopen. New cases are still too high. You need to reinforce the lock down as too many people are out and about Luke it's another day in the park. Please wait until June to consider opening any more businesses. We need to get a better handle on the situation
Seminole	Professional Services	We have been handicapped by the closing of our business. The reason is that Seminole county has issues a executive order that you are unable to have a business open and be within 6 feet of a customer. Our business is a hair salon. As you know in this profession that is not achievable. The executive order states that We are unable to open our business until this order is modified or state of emergency lifted. I dont feel that the state of emergency will be lifted anytime soon. We have applied for small business loan thru SBA.gov as soon as the care act was signed. We have now been told my application is not good due to website application process was outdated. I did not find out until 3 weeks later as instructed by SBA.gov by then all the payroll protection funds are gone. I have also filled for unemployment and still not received 1 dollar. I also have not received any stimulus funds. So without any government assistance as promised we are running out of money with a toddler at home. Also the hair business is also required by the health department to sanitize after every client. So you would be safer in my business than the super market, lowes , home depot etc. PLEASE HELP US OPEN OUR BUSINESS
Bay	Education	I believe we should reopen the state. I work for the schools but enough is enough. People need to get back to work and provide for their families and the state will not survive neither will the country if we don't PERIOD!! This making people wear mask is crap. People pass gas and your clothes don't hold it in so what makes you think a mask is going to prevent getting this virus if that is what it is?? It ain't unless you have one of the N95 which the general public does not. We can not contain this no more than the flu or common cold. So you might as well just open the state besides the flu doesn't survive in HOT months! This is Florida it's always 100+ in the shade! I don't believe there is a virus but that is my opinion. Open the state get back to normal. Thank you!!
Sarasota	General	Although I am very eager to get all back to work and resume normal activities, I have strong reservations about opening Florida up too soon. Think we should wait 14 days and evaluate the data. Staying in place a bit longer will save lives.

AMERICAN OVERSIGHT

Pinellas	General	Start with small businesses , beaches (limit 4 per group) and pools . i would hold off on restaurants and bars and outside events that attract a large crowd .
Polk	General	I hope Florida will extend the stay-at-home order and remain closed longer. I have only gone out in public for essential items (i.e. groceries), and am so frustrated by the number of people that aren't taking the health and safety guidelines seriously. Hardly anyone wears masks, people don't keep an appropriate social distance, etc. I know that our economy is struggling, but if people aren't going to take these basic health and safety directives seriously, it's not safe for Florida to reopen. Please keep us safe and don't reopen Florida.
Broward	Government	Was wondering who Is on the task force from what groups and who was it made up of how many men how many women how diverse is it hopefully Democrats and Republicans just to be fair a little bit of everyone. Hope not all white men in polo, CEO's or friends of Governor only. Just neighborhood people would be fair. I'm think maybe June for phase two, take it slow and we'll see how it goes.
Hernando	General	First I want to say THANK YOU for caring about what Floridan's are feeling!. I feel we DO NOT open Florida at this time.. With the nursing homes still being affected, every day we still have several hundred positive tests, and people need to NOT be selfish at this time. We need to do this right the FIRST TIME because if we don't, we will be in a much bigger crisis if this virus flares up. The government is helping the small businesses with forgivable loans & it is their choice to take it or not!.IF they chose not to participate in the packages the government is putting out, they have no voice to complain. Let me explain the BIGGEST ISSUE we have: My niece, her boyfriend & the boyfriends 17 year old son were tested on April 4th and the positive results came back on April 7th. The Health Dept sent a text every day asking about symptoms(which my niece got very sick). On April 15th they released all of them from isolation because they didn't have symptoms for a few days. My niece has two little boys ages 5 & 8 who had to stay with their father while she was in isolation. The father wanted her to have a negative test before the boys went home. Hernando County Health Dept refused to retest her saying only Healthcare Workers are retested. My niece works in Pasco so she called Pasco & they agreed to test all three of them. On April 21st they all got retested and on April 23rd ALL THREE of them were still positive. After being released on the 15th they were out to all the stores getting things she ran out of or was low on, My niece has asthma & a cough all the time. After coming back positive she called the Governor's office & left a message saying what is happening & how she could of affected several people. NO ONE has yet called her back. I called the CDC myself asking if she was still contagious if she has no fever, I was told they didn't know that answer & they will give it to the directors to contact us. My niece has not had her boys since April 4th, she has had to depend of me to drop things off to her in her driveway,/ All 3 people in that household had done every thing right & STILL is positive. THIS IS A MAJOR PROBLEM & until we can get a handle on RETESTING people to see if they are negative we should not open. I am sure this has happened to several thousand others & being Asymptomatic is one of the biggest things the doctors at the white house talked about almost every briefing!! I think we need to give it until June to reopen & get a handle on testing better. The sports, well I am sorry, that is not a necessity. The beaches I agree

AMERICAN OVERSIGHT

Osceola	Professional Services	In my humble opinion, I think Florida should re-open in phases. At first any businesses or services that require large gatherings or produce a breeding ground for germs should remain closed (i.e., churches, gyms, events, etc.). During this initial phase, restaurants and bars should be allowed to open, but with reduced capacity following social distancing guidelines and perhaps limiting table sizes to no more than 3. All staff should wear a face mask for protection and must sanitize the tables after each customer and all door handles prone to contact. During the second phase, gyms be allowed open and must implement protocols for sanitization and reduce capacity. I know at my gym they have towels everywhere and people use those after each use. This would need to disappear and instead have individual wipes for people to use to clean off the machines. Also, churches can open and events can occur, but with some of the similar protocols mentioned above.
Indian River	General	Gov. DeSantis, It's time to OPEN Florida for business. No additional delays. Our United States constitution gives people the freedom to work. While I understand your concern for those in critical care situations and how the CCP Virus can affect them, they should remain quarantined. Everyone else should be allowed to move about. I'm concerned about stores like The Fresh Market requiring customers to wear masks- the longer this stay at home order exists the longer our freedoms are eroded. Please give Floridans their freedom to make our own choices. Thank you for all you have done but it's time businesses decided to open or not! It's the American way!
Seminole	General	I would exercise extreme caution in phasing the re-opening. The tourism centers will need particular attention regarding distancing and limiting exposure, however, temperature checks are inaccurate and and just a single indicator of a compromised individual, especially in the wake of prevailing evidence of zero symptom carriers. Additionally, fines should be associated with those individuals who refuse to respect social distancing and PPE guidelines. Their opinion is irrelevant when others lives are at risk. This should be a requirement for re-opening. The parks, concerts, and sporting events all need to be treated equally as the risk of transference is significant.
Leon	General	Time to reopen the businesses. If they observe social distancing. It will be worse if the businesses are not reopend.
Duval	General	I believe we should wait for June 1st to get here and evaluate things at that point.
Indian River	Food	Open it all back up and maintain social distancing guidelines.

AMERICAN OVERSIGHT

Marion	General	DO NOT REOPEN FLORIDA! I understand the economy is suffering but to reopen too soon would only put more pressure on our already exhausted healthcare system and cause even more deaths. Cases continue to grow everyday and those are only the ones being tested, so many can't get tested until it's too late and they've already infected hundreds or thousands more people. The only time it will be safe and make sense to reopen this state will be when the deaths stop and no new cases occurs for at least two weeks. Nobody I know will risk going into a restaurant or social gathering until we are can see there are no new cases, so businesses will never be able to fully recover anyway...we haven't even peaked yet, so why risk it and open too soon? Why risk even one more life?
Hillsborough	Construction	I believe this is nothing more than a political stunt by the Dems and the media completely overreacting to what is, a really bad flu. The percentages flat DO NOT add up and this is killing the economy for what? I'm going to give you a simple fact, people are going to die every day. It's a fact of life. As a whole, I'm extremely disappointed with the liberals nationally and what they're willing to do to beat Trump. We should ultimately be the most scared of the media in this country.
Broward	General	keep everything closed. Need to stop the spread of COVID
Orange	General	Keep social distancing in place until the level of infections is determined to be at a non-threatening level. We are currently at a likely peak level which means the possibility of contracting the virus is also at peak level. Don't listen to those who would trade lives for dollars.
Flagler	Healthcare	I am an Cardiovascular Technologist working in an outpatient facility. We have definitely felt the impact of this pandemic by patient schedule decrease. Our facility is going over and beyond to adhere to the CDC guidelines and more. All of our technologists have to touch or come face to face with the patients on a daily basis. Our patients are mostly senior based and the response to shutdown has been a positive one. Here in Flagler County our positive cases have increased due to more test sites like Daytona College. From my perspective, it seems like the population who wants to reopen is the middle aged 60 and younger. The Floridans are either running out of or don't have anymore cash flow and bored. I definitely do not want any more outbreaks simply because I don't want to get it but my suggestion would be to open up restaurants with limited hours like you have done with the beaches, things are going well with take out and delivery so keep that as a choice. Nail and hair salons same thing, limited hours. Taking these baby steps back to normal will possibly take the anxiety out of us. I would first look at Georgia's stats in the next few weeks to make any decisions. I feel blessed to have such an Governor who cares about us! God bless! Joelle Dalton

AMERICAN OVERSIGHT

Broward	General	I believe opening up the state too soon will be devastating. Until there is a vaccination it will not be safe to be out in public. Everyone keeps saying well if you are older or if you have a compromised immune system just stay home. So what happens when you have a family member that you live with that has a compromised immune system and you live with your parents who are in that dangerous age bracket. And myself and my two children live with my parents and sister.....how do I protect my parents and sister when you open up schools without a vaccination. My children then are put at risk of getting Covid-19 and bringing home to our entire family. People are so selfish and only think about being stuck at home. No one understands the situation unless it affects their family.
Lake	General	As a parent of 5 children under the age of 10 and an elderly parent that suffers from end stage renal disease, diabetes and heart failure. My biggest concern is their safety. Many people aren't taking this pandemic serious and choose to go out without any type of facial covering. This is happening even though their are stay at home order and the CDC issued guidelines to wear face coverings. I shutter to think about what things will be like if the stay at home order is lifted. Please let decisions be driven by science and facts. If the state doesn't see a decline is cases, don't lift the order.
Orange	Recreation	Opening up pools. Opening up retail stores. Restaurant openings with a limit of how many people are allowed in with reservations.
Franklin	General	Businesses need the state to provide guidance for each industry and businesses need to be inspected to make sure they are following guidelines. What do cities that have a low infection rate do in light of tourist coming to the area from areas with a high infection rate?
Manatee	Healthcare	Open the state? You've got to be kidding me! My wife and I moved here a year and a half ago from Tenn. I'm 70 yrs old, have GBS (Guillain-Barre Syndrome), have had COVID symptoms for over 6 weeks now, and cant get a test in Manatee County - you have to have a "prescription" here from your doctors! My doctors are back in Nashville - not in Florida (yet)! I cant get a "prescription" to get a COVID test! (Who ever heard of a "prescription" for COVID?) Give me a break! Manatee County has more cases/deaths but no folks being tested! And you want to open the state? PLEASE!
Broward	General	Do not believe the tri county areas of Palm Beach, Broward and Miami Dade are ready to open as yet judging by their numbers. If smaller, less affected counties want to open, I believe they should. I am totally against the large theme parks re opening any time soon. As a retired R.N. with many near and dear to me working in Florida's health care system, I am especially concerned about a second spike of the virus and being unprepared for it. PPE, tests and critical care beds will be needed more than ever, let alone staff. I cringe when I hear masks are being reused and gowns are not available. Floridians also need to remember that we are fast approaching hurricane season. A Cat 4 or 5 storm impacting any part of the state would certainly impede the ability to pandemic fight in that area, giving the opportunity for the virus to reinfect.

AMERICAN OVERSIGHT

St. Johns	Retail	Freedom is a fundamental right of American citizens. If someone feels like they a part of the vulnerable or have recently tested positive, then as grown up responsible adults, they should not go out in publlc. But you cannot continue to keep everyone locked up in their homes as a fear tactic when only a very small percentage of residents have contracted the virus. Especially when you are very well aware that the virus was in our country as early as last September and people have become ill and recovered without having their entire state shut down. For example , St. Johns county has less than 100 positive results but you shut down an entire county???? Governor Desantis should be leaning into the one and only option he has for fixing his UCB issues. His one option is to get his residents back to work so that they are no longer trying to access the failed Florida UCB site. If you DO NOT treat your residents like grown ass adults and trust them to do the right thing when it comes to conducting themselves appropriately when testing positive or not feeling well, you are going to end up being a one term Governor. None of us need you to our Father. You just need to do your job and improve the livlhiood of your residents. Political suicide the longer you keep things closed!!!
Orange	Recreation	Reopen pools in the area
Broward	General	It's time to re-open the state. I have lost all of my income and it's time. I have abided by all the rules and have sheltered in place since the order went into effect. However look at the stats. Only 0.14% of the entire state has been diagnosed with the disease. I understand the severity of this disease but I also understand my chances of getting it are much less than the government and the media wishes me to believe. Most everyone I know doesn't even know anyone that has it. Time to re-open Florida.
Orange	Finance	We should only begin reopening when we can be reasonably sure of keeping people safe! Just because people are bored at home is not a reason to potentially sacrifice many people. While we cannot wait for a vaccine, we should hold off a bit longer and then begin slowly reopening, watching for the potential of a second peak. Further, we should not open the door to out of state travelers just yet. Begin opening to locals, then regional, then nationwide. Only when things seem safe across the globe should we begin allowing international travelers.

AMERICAN OVERSIGHT

Seminole	Finance	Mr Desantis, I believe Florida should open. Florida being closed is not only destroying the economy but, will ultimately destroy lives. The loss of life from unemployment in Florida will far exceed the loss of life from the Virus. People and business owners have the right to choose. We should be able to choose (with guidelines in place such as mask wearing) to venture outside, go to work , eat in a restaurant, get a hair cut etc. Business owners have the right to decide to open or not. When Florida Residents are forced to stay inside. In what amounts to a lockdown we have no choice in the matter . Same holds true for a business who can not open. I understand there may be guidelines to follow but, let people have a choice. Have trust in the residents who elected you to make proper hygeine and social distancing decisions. Do not lock us up any longer. This needs to be done swiftly. The consequences far outweight the benefits. Thank you
Lake	Information	As long as corona virus cases and/or deaths exceed the rolling average for 10 days, there should be no public gatherings. Please place public health as a priority above economic recovery. No economic recovery.can overcome a health crisis.
Hillsborough	General	It is time to open the state. Sadly state and federal governments have not keep us fully informed, we need answers to the following questions: 1. Who is getting affected? 2. Where are they getting infected and are they infecting others and where? 3. Restaurants should be allowed to open immediately with precautions. 4. Businesses like gyms need to be tightly regulated to stop the spread. 5. The parks need to open immediately, the disease isn't on the grass and the trees. 6. The majority of deaths are the weak and the elderly, elderly patients in hospice and nursing homes. Their deaths were a forgone conclusion as they are sick and dying to begin with. 7.Are people contacting the disease in supermarkets or the dirty convenience stores? 8. Has all of this been worth it? In the future we may find out it was unnecessary to ruin the American economy. 9. Democrat politicians have been looking for a way to destroy the American system, the American people and our global economy. They may have actually succeeded. 10. Please stop the cover ups and start telling us the truth.
Broward	General	I know we are all going through a difficult time but staying at home and not working is not going to be the solucion.Not everyone can get help from the goverment example checks stimulus check ecx.We have kids and we need to provide for them.Im a mom of 4 and im pregnant im do in 2 months and we havent paid the rent nor utilities for 2 months.My husband cant work because his job is close..he works at the swapshop we need those jobs to be open please.A good way to reopen jobs is for the workers to wear gloves and mask.And let the costumers need to wear masks as well of they want to get service...please open florida is not only me but alot of families need to work.Please
Orange	Food	Reopen restaurants

AMERICAN OVERSIGHT

Broward	General	I say open up Florida especially if we can't get unemployment under control. People are waiting months to get money so that can live. Let's put the unemployment on the top list to get fix and get people money for food and living. Park,beaches , amusement parks, gyms and moves should stay close for longer. Open the retail stores because they can control the 6 feet district. And put on a mask.
Lee	General	Do the math people that are infected is less than .0001% and the death rate is even lower For the population of Florida Why are we still in this state lockdown? People are hurting businesses are failing lets get back on track and open up the state
Broward	Retail	1) Testing available and a negative result for anyone called to report back to work 2) Employees with highly vulnerable family members should be given the opportunity to delay a return to work order; especially those in "Hot Zones" Perhaps allowing them to go back to work when the county hits the Stage 3 Mark; without penalty. 3) Plexi guards in place at every cashier station to protect customers as well as employees 4) Limit hours of operation to avoid excessive exposure; increase hours in stages based on Covid #'s 5) Traffic control in all stores to limit large crowds from accumulating (ie; perhaps based on square footage (customers as well as employees included) 6) Retailer's must allot time within their hours of operation for cleaning and sanitizing the store Thank you for your consideration, Monica Scott
Pasco	General	I work in the dental field & feel it would be very dangerous to open too soon.Wait it out through May this can not & should not be rushed.
Seminole	Recreation	Open pools and playgrounds in private house complexes
Palm Beach	General	I feel this needs more cures for this instead of opening too soon cuz as soon as a soft opening is made people will just hear get back to normal and effect everyone else.
Pinellas	Government	Please do not open any non essential businesses without a documented and verifiable plan. Leaving the fine details up solely to the business owner without their fear of review or stiff penalty for infringement, could set our state businesses up for needless litigation and subject our residents to more illness. Our tourist attractions should be "at your own riisk". Florida should respect the right for people to choose to patronize those businesses/attractions during this time. But, people should do so assuming all risk withstanding any belief that the business could have done better. But, above all don't open until the State Health Department has honestly disclosed all numbers in every area, pertaining to every person infected with COVID-19. Do not lie.

AMERICAN OVERSIGHT

Lee	Government	Re-Open FL without limitations Now! As more and more truth pours out in media reports, it is abundantly clear that either the virus came and went, prior to our reaction to it, or there was no health threat at all. Let's assume the virus exists, but hit earlier than we were made aware of its existence. When were we infected, and by what mechanism? Clearly most of the nation, and certainly most of FL, and absolutely all of SWFL, began a rise of fever rates above what we would normally expect from seasonal flu on or around Mar 3rd-7th. We peaked on or around Mar 18-19, and dropped to normal on or around Mar 25-26. Weeks before a mandatory lock down was put into place. I brought this to the attention of Brian Hamman and LC-BOCC on Mar 30, 2 days before FL lock down. And yet still Hamman spread fear to everyone who would listen, and he continued to do so weeks after. Either through negligence, incompetence, or worse, you crashed our entire economy and played into the hands of those who wished harm on us. Now that this has seen the sunlight, so to speak, it is imperative that we go outside, get out of our homes, return to full normal, not "new normal", or "normal-lite". The hoax is over. Not the hoax of a possible virus. I believe there may actually be one. No, the hoax of "crashing the economy will save lives". And that has been proven a hoax, as we now know, and should have known all along; that viruses live indoors for tens of hours, while out in UV sunshine, they live only 2 minutes. The safest place for anyone to have been was on a beach, in FL... the first places you shut down under penalty of arrest. You literally threatened to jail people for exercising their God-given rights. That's the real pandemic (dem-panic)... the attack on the Constitution.
Broward	General	Attached you will find a chart from healthweather.us which shows To whom this may concern, This virus although deadly to some has been a nightmare for the majority. The Majority is the ones who have had it (known or unknown) and the ones that have survived it. We have flattened the curve and that was what this lock down was intended to do. Do I say open movie theaters and gyms, probably not. But there is no difference going to a mall store or another store than the grocery store with a mask on. Make wearing masks mandatory to be places but open parks and beaches and other stuff that is wide open to the public keep "social distancing" but we as a whole need to get back to work back to normalcy. Please and this is the biggest get everyone on the same page and instill some confidence that even if you do get it there's (once numbers are completed) going to be less than a 1% chance that it is fatal. The fear mongering is worse than the virus. This is coming from an "essential worker" who has missed zero days of work and still has a job. Open up, easily confidence or this will be the Greater Depression.
Orange	Retail	Reopen clothing stores

AMERICAN OVERSIGHT

St. Johns	General	Florida needs to get back to work. Our economy cannot survive this shutdown. Open things back up. We can still use precautions, and people who don't want to venture out or have other medical conditions can stay home. Everyone is aware of the guidelines to keep themselves safe and most people are following those guidelines. This country needs to get back on it's feet again.
Marion	Recreation	Please open recreational parks May 1st so I can be closer to my family to help out with my fiancee's 92 year old mom thank you
Pasco	General	As a Florida resident I would like to see stay at home restriction in place until June 1 2020 or longer if health affiliates deem necessary.
St. Lucie	Healthcare	I am a retired nurse practitioner who believes in science and epidemiology. I am very worried that concerns over our economy will override the very real and present risks from COVID-19. I am in favor of a gradual reopening of businesses but not until we have done more testing and are able to identify area hot spots. As long as our cases continue to climb and for several weeks after leveling off then declining, I feel we should continue stay-at-home except for essential services for health, sanitation, public safety, food and medical/pharmacy businesses. Agriculture businesses should continue with social distancing, including harvests as long as food distribution is guaranteed. This is no time for business as usual for non-essential services, like massage parlors, hair salons, tattoo parlors, cinemas, sports events or bowling alleys. Outdoor recreation should be encouraged, with distancing. And Nikki Fried should be on your task force.
Broward	General	We need to open. Start with parks, beaches and outdoor areas. Then move to restaurants, bars, ect. We have slowed to curve it's time to get back to business.
Orange	General	We should not be reopening the state right now. The number of new cases is too high. Opening now to save the economy will only hurt it worse later when we have a resurgence and have to close all over again. Make sure you use healthcare experts as part of the decision making process.
Collier	General	Open it up. Follow the guidelines Open tennis golf and the beaches. We have done enough
Lee	Recreation	As newer residents of this beautiful state I urge you to open beaches. We have hundreds of miles of them. Spring breakers went home. Now it’s just us residents. We have hundreds of miles of lovely sand. Staying 6’ apart should be no problem. Why not be able to sit and enjoy the weather?. My husband and I are that vulnerable age but are in good shape. We have been good and heeded the Governor’s orders to stay home. Enough is enough. Personal responsibility enters in. If you are uncomfortable going out then stay home. But the rest of us won’t and can’t live in fear.
Pinellas	Recreation	Completely closing the beaches has a downside to the health of Floridians. Many of us who live near beaches use the beaches multiple times a week while never setting down. We use the beaches for walking or running. I would suggest state wide opening of beaches for exercise in the morning and late afternoon and evening. If people feel it should be more restrictive open the beaches to people of the particular county.

AMERICAN OVERSIGHT

Palm Beach	Healthcare	Florida has been able to keep the cases and deaths of coronavirus at a level that is lower than expected due to closure policies and strategies for social distancing. It is imperative to maintain these now because we do not yet have enough tests, medications Or even PPE. We need to protect each other and the poor, elderly And homeless by maintaining the policies which are successful.
Clay	General	Please reopen the state NOW ! Enough with government hysteria. Time to get back to normal using 'common sense' ! Thank you
Pinellas	Government	When the hurricanes roll into any of our coastal states and people are packed into shelters or escape to other states by car, the virus will spread like wildfire! About that time the flu season will begin and along with it, the CoVid19. That's when the resurgence will occur with a vengeance and all hell will break-out. What preparations are being put in place by our fearless leader, president Trump, or you governor, to protect us? It's way too soon to open everything. This is NOT the time to loosen restrictions. This is a REAL threat! That governor of Georgia should be just as worried. I'm shocked not one word has been mentioned by Trump, the Fed's doctors or you, Governor DeSantis, about this very real scenario. I realize people need to live but so do I! I feel most people haven't got much chance of survival without an effective vaccine. BTW, I'm 73 yrs. old, so I feel I'm doomed and will probably become a victim and die this year because our fearless leader, Trump, did not use common sense right from the beginning. An immediate, world wide travel ban from the first hint of this virus would've certainly been a huge deterrent. Too late now.):
Pasco	Healthcare	We closed the state when there was only 100 cases. Know we want to open the state when we have 31,000? The reason its leveling off is because we closed the state. If we reopen it know the numbers will soar and many people will die. Then we would have to do this all over again only longer. Lets wait at least till May 15 and see what the numbers do. Lawrence.
Volusia	General	I live in Edgewater, Fl. There are a lot of 55+ community in Volusia county and only 2 testing sites, both in Daytona Beach, not one in Edgewater or New Smyrna. I feel there was more testing in Orange County then our county and I think we have over 300,000 people and need to bring the testing to other city's in our county before we tell the elders it's ok to go back out.
Palm Beach	Healthcare	Give our free n95 mask to all residents of Florida. I am willing to pay a reasonable fee but can't find them anywhere. It's time to get things moving with regards to the economy of Florida. Have the resources necessary on standby but open up Palm Beach. Open the courts the police etc. allow small business to open again with restrictions. Georgia and other states have done it. It's now time to allow Florida to her back to work, being in tax dollars and make America great again.

AMERICAN OVERSIGHT

Leon	Transportation	I think it is time to start reopening the state because I think the economic destruction and loss of jobs is so terrible. There are so many things that are essential and have stayed open without devastation - grocery stores, airports, etc. What is the difference between the infection potential of a grocery store versus a furniture store? So many people are out of work and that is impacting so many more. I think elective surgeries/procedures should open back up immediately for overall health of the citizens. I think schools should reopen to get kids back into healthy learning environments. I think restaurants should be able to reopen at half capacity if they feel comfortable. Salons could reopen with masks. My opinion is that gyms, amusement parks, and major sports events that put people perspiring in very close proximity should probably stay closed. Overall I agree with the President on one thing - the solution can't be worse than the problem. And the shutdown is destroying lives. Please make it stop.
Pinellas	Retail	Absolutely not yet. I own a business and of course want to get back to it but NOT yet. I do not feel our curve has flattened enough and want to shelter in place longer so we don't create another wave. What have we done all this sacrifice for so far if you are willing to open too soon and negate what we have tried to do and protect ourselves and others. We are safe at home DO NOT open yet
St. Lucie	Healthcare	Please check out the assistant living in Vero Beach . My wife works there and they lied to here about how many 19 people that they have. It is Harbor Chase of Vero Beach.. Thank you and keep up the good job God bless y'all
Indian River	General	I certainly understand businesses wanting to reopen and people needing to get back to work. In this area I feel we needed more testing of those when have been exposed everyday while working with the public. There so many places that were late in practicing social distancing. If they decide to reopen certain businesses there has to be important restrictions with spacing. Opening beaches spacing 10 feet apart! If they don't abide by rule shut it down ! I am 69 working from home . I want to go back to work for a company with 1,000 employees, but there is a part of me that makes me scare. They report no employee has had a fever. But what about one who has it without symptoms. The Palm Garden Nursing home has their first resident come down with Covid-19 and my sister 73 is there due to a emergency survey and has infection. My question is how did this resident catch it. I feel we may see fewer case in FL, but I feel it's too soon in this area to fully open! Sorry this is written on an I phone and to forgive me for typos! Pray from the nursing home and all nursing as you know the care is not the same as a hospital,

AMERICAN OVERSIGHT

Sarasota	Healthcare	I work in a dental office. Our Doctors said we are going to be seeing 40 patients a day and working 10 hour days for 5 days straight. I think all of this is too fast. I fear my life and my kids. I think this needs to slow down. We don't not have what we need for safety. Things are on order and won't be in until sometime in June. I think the economy needs to pick up, I just don't think starting this pandemic all over again is worth it. I'm not. Ok with this
Collier	Professional Services	Yes. I have a small clinical Skin Care business in Naples since 2006. It's a solo practice, so the most people in my office is one client and myself. Being State Licensed the office is inspected every year. My usual protocol for sanitation is using hospital grade disinfectants , one use disposable Supplies, working gloved and with mask. Understand the need for shutting everything down for awhile to get Virus under control. However the distinction between essential and non essential is questionable! Allowing golfing to continue, ,groceries and drug stores having people crowd in is far more dangerous than one client in my office. It is time to open the small service businesses. We missed the best 6 weeks of our seasonal business in Naples. The Fl Unemployment has been a joke. Going in debt is not the answer. Many new businesses will not survive this! Please set your perimeters to keep our state safe and open May 1sr in areas with low number of cases. Thank you Elizabeth Kay Williams
Broward	Healthcare	I don't believe we should reopen our county, Broward, until we have more testing, my county was hit very hard with this virus and the older population is still very scared. The governor should extend the stay at home order for at least another month to protect the elderly. The citizens in Broward deserve to have no fear of foreclosure or removed from their home and the governor should extend that since the unemployment system is such a mess. Large groups should not be able to gather until we understand this virus better. I feel that money is more important than people. I feel that our governor is to worried about what the President thinks instead of the people of Florida.
Orange	General	As a resident, I would like to see the stay at home order extended through May, and longer if public health requires. We are a family of three, working at home when able, and have a toddler. My main concern is my family's health and the sooner we reopen without a lower number/ratio of cases we are worried of having to go through this again near term after a resurgence. I would like to see small community businesses open first as a test run for safety before all businesses are opened, especially the tourist industry. Your consideration is appreciated.

AMERICAN OVERSIGHT

Palm Beach	Healthcare	I am writing to you in hopes of your support for Dental professionals. Dental hygienists have been left out of the equation in terms of our risk and exposure during the Covid-19 pandemic. Dental Hygienists are the most at risk (#1) professional for exposure.to everything that can be transmitted in aerosols as most of us work without the benefit of an assistant. This causes a major concern with the protection of the dental team as well as our patients. Please consider postponing the opening of elective and NON -URGENT dental treatments such as dental cleanings. as there is no real way to obtain proper air sanitation, currently. There is also no way we can social distance from my patients who are a foot away from me while we work in their mouths. This would release possibly infected microbes, wherein a situation where the majority of carriers are asymptomatic and testing has many false negatives, this can prove to be problematic. Another issue is, that many of us have already had a fight on hands (with our employers) as it pertained to proper level of PPE, with this threat, we need changes to MANDATORY PPE for Dental procedures. Currently, there are no mandates that require DDS to supply specific levels of PPE, and many only supply the minimum regardless of the recommendations based on risk. Please keep this in mind as you hear from DDS across the state. They are understandably concerned for their businesses, but sometimes overlook the fact that we work solo while they are with an assistant which makes their risk lower than ours. I urge you to advocate on our behalf with your fellow senators, and thank you for your consideration
Pinellas	General	We are still seeing new cases daily and people dying daily, how can we even begin to worry about a second wave when the FIRST wave is still happening. You need to take all your energy and FIX THE UNEMPLOYMENT FUBAR and get these people money and food stamps so that they can stay safe at home a little longer until we see the numbers and testing tell us we are in the clear! STOP RENTS and MORTGAGES for 3 months PERIOD! Florida needs to take care of the people, spend your money and energy on FEEDING AND PAYING the ones that can't work for now. We need to have medical and science call the shots with our lives and not let politics and politicians decide. People are still dying every single day, how many more need to die? Small, slow steps and allow people back outdoors for fresh air and sunshine for healthy immune systems, but none of that can happen if you can't pay and feed your own State. If you can't take care of them the FIRST time, what are you going to do if and when you have a SECOND round because you moved to fast?
Monroe	General	Please... Do NOT open the Florida Keys for business. We are working very hard to keep COVID-19 infections to a minimum. We are sacrificing a LOT. Don't ruin it for us!

AMERICAN OVERSIGHT

St. Johns	General	I applaud our governor for proceeding with caution in reopening the economy. I am a retired nurse with 43 years experience in health care. I would restart jobs that occur in outdoor spaces, starting with agriculture. We need our local food and Florida farmers have suffered enough. I would also use this opportunity to do road and bridge repairs. Construction jobs such as new construction, golf courses, landscaping businesses and such should be safe enough if workers practice social distancing. After a two week period, I would then open factories under certain guidelines as they may need shorter shifts or fewer workers in order to maintain social distance. Some restaurants with spaced seating could also open. Salons and spas for one on one services and NO waiting room. Last to open after numbers have dropped 90% open bars, theatres, churches, and shopping malls. Social distancing and stay at home should remain in effect for at risk populations. Thank you for allowing me to voice my opinion.
Seminole	Retail	Open malls and clothing stores
Brevard	General	I believe it is appropriate and necessary to jump start the economy to be safe and successful. With modern technology, common sense and hygiene, this should be able to happen in short order.
Osceola	General	Please OPEN our businesses and parks! The economic impact threatens to surpass the damage from Coronavirus. It is time to let businesses open, and let people start earning a living. The actual virus numbers have proven that we do not need to live in fear. We can all use caution as we see fit for ourselves.
St. Johns	General	Don't repeat the Spanish Flu scenario. Open when the numbers are down. I think most would prefer to only have to go thru one lock down.
Manatee	General	I'm a hairdresser and I will not feel safe to go back to work if I'm allowed to as of May 1st. There is so many unknown still about this virus, we don't know if you can be reinfected, everyday the time frame for how long the virus can survive on something seems to change which just means we don't know, we don't know how to tell if we are a carrier, and there is no vaccine to protect us again this. There has been so little testing done that our numbers could be substantially larger than we even know. Do some research on the Spanish influenza. We need to learn from their mistakes. People got sick of having to stay home so they went back to their daily life and when the war ended, everyone partied. The second wave is what kill more than 20-50 million people. The same thing can happen if we are released back to our daily life. If you have been in a grocery store on the last week, people are already becoming more relaxed about social distancing, not wearing masks, ect. Peoples lives are more important than the economy. The economy will always return. People won't. And don't try to say "if you don't feel safe, stay home" because sadly that doesn't work. Businesses that open back up will let these people go without pay, basically forcing them to work. People may riot saying the deserve their freedom, they obviously aren't very bright and are selfish. They think they are being oppressed when in reality they are actually just being inconvenienced. Please don't open Florida up until we know more about the actual virus and have a way to fight it better. Lives are more important than the economy!!!!
Gadsden	Healthcare	I think it is too soon.

AMERICAN OVERSIGHT

Indian River	General	no one in Vero is following the current order!!!! Not enough testing. It would be deadly to open the state.
Lee	Retail	I am a manger in a retail location that is usually single coverage in a very busy outlet mall. I am fearful of what opening to soon might mean to how we help customers. My store is large enough that I can manage the store alone but before my customers would gather in the same section due to best sellers and favorites. How will malls survive now? Will temperatures and masks be required before entrance to each store or the mall in general. Will freedom to walk around be a thing of the past? What are the plans for reopening retail safely and with the employees in mind?
St. Lucie	General	Please don't open the state too soon.
Miami-Dade	Retail	Please keep Miami Dade closed. You can reopen parts of the state that have not been as impacted. However the ports of Miami and Broward and surrounding cities that clearly are impacted MUST remain closed until July 4.
Hillsborough	Construction	Please open our business but in the safest way possible. The cure can't be worse than the disease.
Collier	General	We need to open up and get people back to work. Our grocery stores are opened people need to get on with life keep us closed another month and we the economy will not be regained. I don't think anyone wants to go back to the Great Depression. People dye daily if flus etc and we continue on our daily journey. It's getting overly rated and hyped.....
Leon	General	I disagree with efforts to reopen the state preemptively. Without the opinion of experts in the medical field, of which your committee has none, this discussion is at best ignorant and at worst wholly dangerous for the citizens of Florida. The state needs to allocate these res pieces towards seeking the input of actual medical experts and scientists, because lives are at stake and people are dying.
Orange	General	Governor DeSantis, Florida and Orange County coronavirus deaths have been decreasing now for more than two weeks. Orange County has experienced a total of 30 deaths in it's 1.4 million population, or at a low <22 deaths per million rate. Yet the damage to people's lives in other regards and to the economy can only be described as devastating. Orange County meets and exceeds National and all sensible measures for entering the Phase I economic re-opening. Essentially everyone will eventually be infected by the coronavirus, and there is no shortage or strain on our medical facitlities to provide for them. The sooner we get on with it the greater the number of people who will become immune and allow for herd immunity, plasma transfusions and other positive therapeutics. Please begin the transition of Florida and especially Orange county into Phase I recovery ASAP! Thank you, Bob Jackson

AMERICAN OVERSIGHT

Palm Beach	Professional Services	I'm I'm sympathetic to the responsibliy your group is carrying right now. While I personally believe it's too soon to open hair salons, I have to prepare for the idea that others don't feel the same way. Unfortunately, in salons it's common for clients come in regardless of sickness. Our services are what helps them to feel better. Considering the asymptomatic nature of covid-19 there is little a temperature check will do. Not hearing any proposed dates, I've been trying to prepare as if we were going to open May 1st . I've had three orders for masks canceled. Barbicide and capes are hard to come by. Even our color is backordered. If salons are unable to get the proper PPE this will not stop them from opening once the green light is given. There are plenty of people walking around with no masks on that believe this is a hoax. They have been going to clients houses without masks doing hair during the lockdown. Those same people will be behind the chair shortly making the same poor decisions and there won't be anyone verifying salons are following the orders. We've had one state board visit in the last 2 years in our salon. I know the department is stretched thin. I don't think I can convince any of you to postpone opening salons. I can ask that you give us ample time to prepare. We cannot source what's needed to properly open our salon in 7 days. Please give us at least a14 day lead time for our opening. That could give us a fighting chance to protect ourselves and our clients. Thank you for your consideration, Beth Harman

AMERICAN OVERSIGHT

Orange	Professional Services	There will be a new normal, and we will adapt, but we need to give ourselves the chance to do so slowly and methodically. Please first consider the safety of workers and the families they come home to daily. Reopening too fast or reopening the wrong types of businesses would be detrimental to the long term goals. Financial security will not come back overnight, but a measured and slow increase is better than a fast rise and steep fall. A resurgence of the virus would be so much worse than staying home and closed for another month or so. Tourism will rebound if we are methodical and safe. Otherwise, to act rashly would erode any initial gains. We will lose the trust of travelers. Inability to maintain a safe distance, and making direct contact with others will only increase the spread of COVID19. To open up hair and nail salons, massage clinics, spas, movie theaters and gyms/fitness centers of any kind would be foolish and dangerous. Too much shared equipment, too much direct contact. And when those businesses do eventually open, the layout and rules would have to be vastly different than they were before. Outdoor spaces like parks could be ok, for solo exercise or fishing etc, if there was personnel to assure social distancing rules were followed. Group sports should wait longer as well, because wearing masks while playing something like soccer or football in the Florida heat would be dangerous. Retail spaces, malls, schools, stadiums, bowling alleys, pool halls, etc etc should wait to open longer as well. Curbside service seems like a possible option for retail, from online orders people could pick up. Could there be a FastPass kind of situation for a while, to borrow from Disney. Certain time slots assigned or reserved for pick up? Take the time to do one thing well, then move on to the next. Please don't try to open up too many things at once. Clarity and control will actually make things happen better and faster.
Hillsborough	Recreation	Florida's state parks and their RV sites should re-open to Florida residents first. This would allow those whose taxes paid for the parks and their upkeep to enjoy them and it would also discourage people from other states hit worse with coronavirus from traveling to Florida and setting up for long-term RV residency and possibly spread the virus. The ReserveAmerica site could easily be set to accept only Florida resident reservations through the end of the year.
Marion	Healthcare	My daughter is on the frontline as an ICU Nurse -Ocala . I am also on the frontline as a Publix customer service associate. Please be diligent & cautious when you make a decision to open up the state of Florida's economy & in All areas!!! There is too much at risk due to the people that DO NOT follow your recommendations of "staying at Home", and social distancing when going out. I respectfully & sincerely believe it is WAY too soon!! Thank you for your consideration in my request!
Volusia	General	If everyone is mandated to use a mask, and they become available first of all, I believe businesses can open back up. Ease it with a limit of occupants. No masks, longer shutdown.
Volusia	Government	Having 4 autoimmune diseases, lung and heart abd 65 . Please don't open things to fast You've been doing a great job thus Far let's continue . I'm very fearful of what's to come if it's all open to soon .

AMERICAN OVERSIGHT

Duval	Healthcare	I do not believe it is yet time to reopen the state. We may have seen the curve begin to flatten however, there are still many people infected who do and do not show symptoms. Once the state is reopened and everything goes back to normal, we will see a major spike in positive tests that will surpass the numbers currently being shown. This will result in more deaths, overcrowded hospitals, and not enough medical staff to respond to the surge in COVID patients. I believe we should have at least one more month (until the end of may) at the very least, in order to further flatten the curve on the virus and prevent more positive test results. The state of Florida should also introduce some sort of stimulus fund for it's residents since many of us have lost either all or some of our income since this begun. It will help us recover a little bit and hold us out for a little longer until everything goes back to normal.
Seminole	Healthcare	With regards to the re-opening of the state during the pandemic, I am vehemently opposed to it. Don't get me wrong, my husband is a small (unessential) business owner, and it would financially behoove us to re-open; however, I worked for an assisted living community. Thank god, we have had no positive cases or concern at the moment, but I'm worried that with a reopening, my residents would be out in danger of more easily contracting COVID-19. Additionally, my parents, for whom I am the primary source of assistance, are over the age of 65 with serious pre-existing conditions. To me, a life cannot be outweighed by financial game. I understand the implications of a terrible economy but no life is worth losing for financial gain. Please, enforce social distancing as it has been for an extended period of time. This is the chance for our politicians to put the physical well-being of others before financial gain.
Hillsborough	General	We need to trust our professional doctors and scientists in regards to managing the COVID-19 and re-opening. Let's do what's RIGHT and not what's easy for the sake of our WHOLE country and not just selected individuals. If we do this right the first time we can avoid it happening again. Let's not screw it up.
Sarasota	General	Open Florida. Allow individual businesses to decide whether to reopen or not. We agreed to stay home to give our healthcare system the ability to care for those who need care. The healthcare system is now furloughing workers as well as some being close to closing due to the restrictions placed on them. This virus has NOT turned out to be the massive killer we thought it would be. We live in the USA. Give us back our freedoms!
Volusia	Healthcare	We need to see a real trend down on new cases. We need more pcr and anybody testing. We need to protect vulnerable populations, like nursing homes. I think we are not ready yet but once the above is met we should do in phases every couple of weeks and reevaluate. Have no hesitation in stepping b as co if not going in the right direction. Suggest everyone to wear s mask if outside.

AMERICAN OVERSIGHT

Brevard	Healthcare	I would just hate to see the State open to early and our Covid-19 numbers and deaths continue to rise. Both my husband and I are essential workers, he in manufacturing of fibers to make masks, and myself a LPN who is currently on medical leave. I have left my home 3 times since 3/16/2020, for my post op visits. My husband works long hours to continue with production. You can definitely tell that people have not been obeying the governors' safe at home orders. The traffic hasn't changed that much. Our restaurants/healthcare/salons/tattoo parlors are all abiding by the orders. It's more like people just out joy riding and visiting friends. So afraid if everything is reopened too quickly, Governor Desantis will end up having to order another shut down because people just cannot follow the orders correctly. We are so very proud and honored to have Governor Desantis leading our state!!
Nassau	Healthcare	Hire is CNAs who can not get a job because we are over 50 to take temperatures at every business. Once tested, you are given a ID that needs to be renewed every year or sooner if you see a doctor.
Okaloosa	Finance	Open everything. If someone is medically compromised, urgently suggest that they continue to stay home. Nobody gets quarantined when they're healthy, never have before, because it simply makes NO sense. WE THE PEOPLE know exactly what this was, and history will eventually judge the bad actors accordingly, and those who used common sense (like the Governor of Georgia) as such. Look at Sweden, as an example! Do the right thing!!
Sumter	General	Everything needs to open slowly. Schools, and bars and clubs and places like Disney/ Busch Gardens etc should stay closed to stop the introduction of new carriers. As well as Cruises staying closed. We don't want to add to our problem with more illnesses. But people must go back to work, we are a nation of workers and our families rely on that paycheck. Unemployment needs to pay up to those owed. In public ALL should wear masks and practice proper hygiene and social distancing. God bless us all and God bless our President Donald Trump.
Volusia	General	Please extend the stay-at-home order for the state of FL because we are a state with so many senior citizens. Please keep us safe. With the theme parks and most hotels not opening to tourists for awhile it is possible to keep us safely at home if our governor orders an extension. Thank you!
Seminole	Healthcare	While I understand the importance of rebuilding the economy and resuming normal lives, I think any talk of reopening the state at this point is premature. Public health experts warn that premature steps towards reopening can result in even greater loss of lives and drains on resources. I strongly urge the task force to consider following the directives of experts in the field and make an effort to recruit these professionals to the committee. I am appalled that this task force does not have any members that are trained medical doctors or public health experts. We are more likely to regret moving too quickly than being overly cautious. Announce of prevention is worth a pound of cure. And in this case there is no cure!

AMERICAN OVERSIGHT

Pinellas	Tourism	Please do not try opening Florida too soon. Pinellas county sheriff stated it would be like stopping a 10 day prescription after 3 days. Many medical professionals have stated this as well. It is a public risk considering we don't even have sufficient testing to know who all has the virus. Despite what the state decides me and my children will be staying home for May, we wouldn't return to school this semester even if they opened them. It's simply not safe. Please don't do what Georgia has done and open salons and gyms which are the dirtiest places with so much contact.
Miami-Dade	Healthcare	As a health care worker (RN) we don't even have the supplies to take care of the patients. We are not able to obtain any N95, masks, Clorox, Lysol or any supply to prevent and protect are families. Our priority should be to restock supply and little by little reopen again. It's not fair for all those heroes that are out there taking care of all the patients that they don't even have the proper PPE to take care of the patients and themselves. A rush with out proper supplies will reflect in a couple of weeks with a higher rate of people contracting the virus.
Collier	General	Open up Florida please ....
Seminole	Recreation	Please open the public pools and parks.
Lee	General	Please open FL back up and open the parks, tennis courts, bike trails and every business, we are all adults and can handle taking care of ourselves.
Marion	Professional Services	Personal services like barbers and salons could open but only patrons who wear face masks could be serviced. I think schools should remain closed for the rest of the school year. Restaurants with open air or outside seating could open again social distancing with tables placed 6 ft apart.
Lee	General	Reopening businesses would be incrdibly irresponsible at this point.More needs to be done for those who are now out of work. At this point in time most businesses cannot open without exposing themselves to liability and negligence claims. We need more information regarding immunity and a possible vaccine, perhaps just an effective treatment before we risk more lives.
Hillsborough	General	REOPEN ASAP! We need to save our economy and jobs. The impact to our economy, food supply, and more is going to kill a lot more people than this virus.

AMERICAN OVERSIGHT

Broward	General	I would like to strongly suggest that as the state of Florida is opened again, that it would continue to be mandatory for all individuals to continue to wear Face masks in public wherever they go, and to keep social distancing. I think Restaurants should keep the heighten condition of cleaning maintained, even as they begin to be opened again. I think places like salon's, barber shops, and small store's, should Have the workers, and clients continue to wear masks. Seating in restaurants should be More spread apart, at least for 3 more months. A hand sanitizer machine should be at entry ways of public places for people to use. Announcements should be made regularly for people to stop hoarding. Products like Mask's, Hand sanitizer, toilet paper, should stop Being hoarded, and made easily available again! I still can't find these products! The media Needs to stop capitalizing on fear regarding covid-19. Listen to the medical personnel, but When we do open again, and it really needs to be soon. Everyone, in every industry should Continue to wear mask's and wash hands frequently for 3-6 months!! Our economy needs to be up and running again!! But, safety is very important, too! Thank you for this opportunity to To express my thoughts!
Orange	General	I do not believe we should open yet. We need to be going down in cases for a while to show it is on a down swing.
Orange	General	I feel that in order for Florida to begin to reopen, we should follow the criteria laid out by the President. If Florida has not shown a downward trend of new cases for 14 consecutive days, how can we begin to think that we can safely start to reopen if we still don't have control of the virus?
Osceola	Management	We need to reopen the economy, sooner, meaning before the economic consequences, unemployment, shuttered businesses and depressed population cause more harm. We can speculate about a possible Covid-19 resurgence however it is just speculation and guestimates have been overstated by a factor of 10. There are severe health consequences of poverty, unemployment and delayed healthcare. These consequences include the loss of life through depression, suicide and poverty itself. Poverty kills. For those that are at high risk or afraid or believe it is too early to return to normal, they can choose to isolate themselves and we can call them heroes. The rest of us need to get back to work.
Orange	Healthcare	As excited as I am to get everyone back to work, I am sincerely worried about falling into an endless cycle of "alright everyone have at it! Back to normal!" Followed by "oops! Too soon! Back inside everyone!" Rinse and repeat. It's like not finishing your course of antibiotics because you feel better after 2 days. PLEASE FINISH THE ANTIBIOTICS! Don't let everyone rush back to normal too soon!

AMERICAN OVERSIGHT

Palm Beach	Professional Services	1st and foremost it would be more prudent to get people some money by getting their unemployment claims out and maybe the economy would not be so angry. I have not seen a check and applied on March 18th to day's date is April 25th . The site is yet again down until monday. Status never changes when i check. Active but nothing. As a Cosmetologists who works one on one, doing hair color, cuts, nails, pedicures in a small salon, I spend hours with a client in very close quarters, social distancing is not an option! And the person sitting next to them. A face mask can not be wore and color or cut hair?! I would like someone to tell me how I am supposed to go back to work and handle this sort of environment and not be overly exposed or carry something home. Already with restrictions in place people do not listen in palm beach. They do as they please. Face covering is an option to them. It should be required no matter what outside the home, especially inside stores and enforced at the doors! Definitely lower the number of people in buildings. True, not fake vigorous cleaning should be being done. I see lazy people who dont do so. Most definitely the self entitled palm beaches is NOT ready to follow rules. Slow opening should be in place! I have an underlying condition, I live with 4 ppl, 2 people who are elderly, One with underlying conditions, as well as a child in day care whos parent is an essential worker. We have been fine so far with no symptoms but believe we may have had an exposure back in February with weird symptoms but do not have now nor qualify for any testing as if now to know if we are some of the asymptomatic people. We have been doing our part as best as we can and leave our home as little as possible.
Collier	General	We need to start reopening. Too many people with NO money since our unemployment website has failed us.
Brevard	General	The particular area of Brevard county has thousands of retired military and civil service employees due to the proximity of Kennedy Space Center, Cape Canaveral Air Force Station, Patrick AFB, etc. Why not utilize a ready-made workforce with years of federal experience in opening back-up the state of Florida? With minimal training, this workforce could help the state in a myriad of areas. Patrick AFB already has an active program entitled Project Emeritus that supports volunteers over many different disciplines at Patrick. It would be very easy to support a 'state operated satellite" office in whatever area is needed for the state to be re-opened. For example, it took six tries re-submitting this form to be accepted. Software Engineers are abundant due to work being performed at the above mentioned locations.
Hillsborough	Healthcare	Please continue the stay at home order. If we own the state we are guaranteed another huge coronavirus wave.

AMERICAN OVERSIGHT

Manatee	Professional Services	As a new small business owner, this pandemic has taken a major toll on my finances as my business opened its doors to the community 4.5 weeks prior to the stay at home order. Not only am I losing money by not having my business open, which is a salon, I also did not qualify for any assistance as my business was “too new” to show revenue. A long with the business, my personal income didn’t get approved for unemployment as I’m self-employed and didn’t seem to qualify. I’m a single mother and run my household alone off of my income only, as their father has been absent for the last 10 years. I am struggling to put food on my table as my bills at my business are still to be paid for, along with my financial responsibility in my personal life at home. Opening up businesses in Florida, with restrictions in place, will allow me and my family to survive this pandemic. I do think that our social distancing should be kept in place for as long as needed to prevent the spread, but it’s not fair to let small businesses drowned in the process! How is it okay to allow beaches and boat ramps to open back up, where hundred of people gather, but not my salon of 5 employees and a minimum of 10 people in the room at one time. Please re-open up businesses that do not have a gathering of many customers. My business is essential because it is essential to my families financial survival in this world.
Broward	Construction	I think that room essential businesses need to open with mask. Mask is the key. Are; theatres any indoor or even outdoor large crowds should stay closed, bars and pool halls do. It need to be open there are over 100 people on league night.. we need to get the economy going.there needs to be consequences for people that don’t follow the rules
Nassau	Management	Make sure health and science issues are part of any reopening plan.
St. Johns	General	Before Florida reopens our state, we should increase testing the majority of our state's population to determine what are infection rate truly is and be sure we have met the government's coronavirus guidelines for reopening.
Pinellas	Recreation	Opening the beaches to residents would be so helpful for not only our physical health but also mental health. Walking along the beaches and or swimming is so beneficial. I don't know why pools are grouped in with the beaches??? It would seem that opening beaches in conjunction with state parks like Honeymoon Island or Ft. DeSoto might be easier, as you must pay to get into the park - therefore more of a restriction on number of people on the beach would be able to be determined while paying. The park could be closed when the designated number of people reaches capacity. A question that you might think about is would wearing facemasks be required when on the beach? Social distancing SHOULD continue to be in place!!! Face masks when out in public as well.
Hillsborough	Healthcare	Open up. Get back to work. Focus on economy. Get jobs back. Revenue back. Test for antibodies against C-19. Know whose rules out whose rules in and needs to use the extra precautions. Enough. Too many people suffering financially and will be in ruins as a result of this shit down.

AMERICAN OVERSIGHT

Hillsborough	General	I do not believe we should reopen the state right now at all. It is too soon. In fact, opening the state will decrease my confidence going to local businesses. I am less likely to order take out, etc. If schools are closed for the remainder of the school year, businesses need to stay closed to.
Miami-Dade	Administrative	Open up the small businesses and stores. Make sure all patrons wear masc and we have to maintain social distancing . Restaurant will need to be open but only a few patrons allowed at one time. The stores should offer gloves and hand sanitizers If possible.
Polk	Healthcare	As a healthcare worker it is important to me that emphasis on wearing masks when out in public. For workers and people just being out in public. I also am concerned about schools reopening as a mom who has had a lot of kids go through the public school system here I can say school buses are overcrowded and many kids are sharing a seat and social distancing would be impossible . Schools in general would not be able to sustain social distancing as they are very overcrowded. Possibly allowing virtual learning to continue and maybe sending kids to school one or two days a week on a rotating basis? So only maybe a fourth of the kids are actually at the school on a given day? But very strict social distancing would need to be in place and I am afraid a lot of young people would not be able to sustain it especially because they would have to wear a mask and for young children this is very difficult if not impossible. I believe an emphasis on virtual learning with small group in person activities would work best . I also believe not enough attention has been focused on home health care and the protocols for having nursing and physical therapy going in to assisted living facilities and homes since these are usually people of a vulnerable age .

AMERICAN OVERSIGHT

Santa Rosa	Real Estate	Governor DeSantis, your rush to re-open shows a complete disregard for the lives of Florida resident and visitors. You are alienating, infecting, and killing the people who got you elected. Much of the population are elderly, have underlying conditions and/or immunocompromised. Reopening will force people at greatest risk to make an impossible choice, go to work knowing you may very will be infected and die or stay home with no pay and no unemployment since they cannot guarantee their availability and accept work. How can you put a price on a persons life? How many people have to die for the economy? Only a fraction of the population has been tested. How can you make a plan when you do not have all the information? Most likely this virus has been in the US for longer than originally thought and many more are or were infected, making the death rate lower, however, those percentages are only numbers. Each number represents an entire life, that person had family, friends, loved ones who now have to grieve and bury the dead with no way to have funerals, no way to say goodbye. I find it difficult to understand, or relate when these people are reduced to numbers on a screen, so I think of it this way: currently the death toll for our state is 1055. Imagine in the course of less than 2 months, 1055 houses being empty because the resident has died. Break it down by community, look at Miami, Broward county, where the death tolls are the highest. How can you tell the loved ones their family members lives meant nothing? Money and economy are useless when you are dead. If you want to save the economy, if you want to save the people who are out of work and have no money for food, expand the unemployment benefits, create a larger workforce to help process these unemployment claims. Urge ALL mortgage companies to suspend payments – offer tax incentives, do whatever it takes to keep people at home until we know more, because there is no way to make a careful, thought out and knowledgeable decision when you do not have all the information. The economy can be fixed, but the people who die cannot be replaced.
Clay	General	Re-open the entire state. To elaborate, ‘opening’ the state does not mandate businesses have to re-open, but it allows them the option to. At this point, everyone knows the risks of going out in public and potentially being exposed. Everyone also understands the risks of driving, which kills thousands too. Allow the people the OPTION to work or socialize. Those that want to remain sequestered away have the freedom to do so. This is about so many things from individuals being able to feed their families to freedom. I know numerous people who have yet to be able to submit an unemployment application despite attempting to do so multiple times a day for WEEKS. Furthermore, reopen all public lands and parks. That land is for the people. Period. Lastly, stripping people of their rights is totalitarian and should not and can not stand in this country.

AMERICAN OVERSIGHT

Miami-Dade	Real Estate	The areas of interest, from an economic standpoint, you can't have one and not the other. From a safety standpoint, you can't restrict one area and not the other. If you open real estate, and not tourism, what's the point? A lot of people's income depends on tourism. They're not able to qualify for loans without their places of work such as parks, restaurants, hotels being operational anyway. And with schools and daycare facilities being closed, the mobility of most parents have been reduced to nearly zero. Let's say all restaurants are allowed to revert back to normal operations. A lot of laid off workers are going to be called back of course. But how are they supposed to leave a 6 year old home with no supervision. The callback of course hinge on the willingness of Floridians to put theirselves at risk with so many cases on the rise. For the economy to work, you need all sectors activated. They all depend on each other. And until a cute or treatment is found, it would be disastrous to give the greenlight for lifting the current restrictions in place.
Palm Beach	Food	Open us back up! I'm in the hospitality industry and we have already missed high season. This is killing us!!!!! No reason to continue staying closed. This is outrageous.
Broward	General	Please slowly re open only. Do not rush. The goal should be to avoid a fall resurgence if opened too quickly all will be for nothing.
Orange	General	Open the ecenomy ASAP!!!!!
Okeechobee	Professional Services	Hair salon and barber shops. They are known for cleaniness.
Lake	General	I am concerned that there has not been enough testing done in the state. I live in an area where people live and commute to work at Disney or Universal and fear that they are in the same stores I am in. I am 74 years old and have health issues, I don't want to get this virus.
Seminole	General	Don’t reopen sooner then we need to. Listen to the scientific evidence and pay attention to the numbers. If we reopen this will be another Spanish flu and millions will die.
Monroe	General	All jobs are "essential". Let people go back to work so they can take care of their families. I personally have not stopped working due to the fact that apparently I am essential, but a lot of my friends and neighbors don't know how they're going to pay their bills and afford their homes. It should be left to the individual as to whether or not they should leave their house.
Collier	General	I need a haircut! I do not believe salons should be open at this time. I miss my friends! I do not believe bars/restaurants should be open at this time. I sometimes think I’m having a “meltdown “. I’ll survive! Do what’s best! Not what’s wanted!
Bay	Retail	To whom it may concern I own a retail store in pier Park on Panama City Beach Florida which is a Simon mall property And Simon is not forgiving our rent for every month we are closed so we need the economy back open before we get a Evicted so we can open back our business
Hillsborough	General	Nope, fuck no, hell no.
Charlotte	Healthcare	The governor should not be involved with encouraging, promoting, and hoarding unproven drugs. What a waste!

AMERICAN OVERSIGHT

Hillsborough	Healthcare	At this time we are only testing those with symptoms, what about all the people with no symptoms but are positive for corinavirus? Test everyone before opening anything, people are most contagious 24 hours prior to symptoms. You are setting us up for more deaths just for the sake of those people screaming their rights have been taken by sheltering at home. Well it's my right to not be exposed to this virus because you wanted to go out. I am a nurse and I risk it every day to help my patients, but I do not want to risk getting sick because you did not want to be told to stay home.
Miami-Dade	Transportation	Governor, Thank You for the task force to re-open the state! we are in desperate need to re-open the state, our families are running out of savings/credit cards. we need to be able to pay rent and buy food.! PLEASE LETS GET BACK TO WORK!!!
Leon	Healthcare	I'm an X-ray tech at a hospital and I haven't been able to work in 6 weeks due to elective procedures and surgeries being cancelled/postponed and the hospital making cuts as a result.
Hillsborough	Information	I am a resident of Hillsborough County. It is time for Floridians to get back to work. Throughout the past weeks of COVID restrictions businesses deemed "essential" remained open. Floridians who patronized those businesses voluntarily engaged in social distancing, voluntarily followed CDC guidelines. With these businesses open, sometimes serving hundreds of people at a time, twelve hours a day, seven days a week, we have witnessed COVID numbers falling. The State of South Dakota never mandated a single business closed and are also seeing COVID numbers falling. Every business is essential when families are dependent upon that income for healthy and happy lives. I believe these facts prove that Floridians are responsible people, who love their neighbors, and will CHOOSE to do the right thing. But we need our elected representatives to do the right thing; we need our businesses open. We don't want government handouts. We want to get back to work. We want our businesses open now, not later.
Martin	General	We need to open back up.
Pinellas	Education	I think Florida should lead the way with a blended school model. So many high school students that I teach (mostly struggling learners) are being very successful with the online model. It is not for everyone, and I think it would be nice to have blended education. With offering an opportunity for more high school-aged kids to stay home and teachers to stay home so we do not overpack the schools next school year. Teachers have been frustrated about for over loaded class sizes for many years. this may be a viable solution. I do believe Governor DeSantis is very much progressive on education and I support him fully. I know he will find a way to make people safe in this new reality we all are facing. As far as opening up businesses, unfortunately he is doing the best he can by waiting. I do think more testing is needed to make people feel more confident going into their local businesses. Also, if people think the governor should remember that the people who are not getting their unemployment are going to be in a dire situation very soon. Thanks for listening. Kristin

AMERICAN OVERSIGHT

Walton	General	As Walton County commissioners are on the verge of FULLY opening the beaches, we plead with Governor DeSantis to extend the ban on short term rentals. If that is lifted we WILL be overrun with visitors from neighboring states. After all, the beach is the primary reason they all come. All locals have done a great job adhering to the stay in place order & the other requirements. Our own health & safety will be immediately jeopardized with a huge influx of visitors. This needs to be a gradual ramp up so data can be collected & analyzed. If the floodgates of visitors opens the consequences could be devastating, & would truly undermine the tremendous effort every Walton County resident has put in to minimize the impact of this terrible virus. Sincerely, Garry Hedges
Brevard	Manufacturing	I want Florida to stay closed until mid June at minimum.
Highlands	Recreation	I think it would be good to open state parks and campgrounds. Safe distancing could easily be done in the outdoors and in campgrounds..
Lake	Tourism	Do not open yet. Reopening now would be a really bad move. For one, it would state that Florida is more concerned with money than health, which would not be good for the tourist industry moving forward. Also, perhaps we should FIX THE UNEMPLOYMENT SYSTEM and actually make sure people get their payments before we do anything else.
Pinellas	Healthcare	I am a healthcare worker at a major hospital. We have daily shortages of PPE for all our patient care. We are at risk of infection when we are needed the most. Opening Florida, bringing a flood of uncontrolled visitors to Florida from around the world, will only magnify the daily challenges to life that we face. Please - for the sake of our residents and our first responders, please do not reopen Florida. We are not prepared for the loss of life and disaster to our economy that opening too early will cause. Help us. Keep us at home and safe.
Broward	Healthcare	Being a retired health practitioner it is extremely foolish to remove ocial distancing. To open up the state without adequate thorough covid 19 testing only invites a firestorm of resurgence and more tragic deaths. what ever is decided to open must be enforced with 6 foot distancing, masks for all both customers and owners. Continuous cleaning and all possible actions to prevent a resurgence of the virus as well as its cause and effect to the economy.
Miami-Dade	General	I strongly think that everything need to start be normal. Make mandatory the used of face mask, keeping physical space and follow the guidelines(washing hands,etc)The movies theaters can open living space in between seats, restaurants making more space between tables, this are some ideas .. Being careful and common senses. Thank you for your work, have a great day

AMERICAN OVERSIGHT

Leon	General	Don’t reopen yet. Keep up the social distancing. Make people mask in public. Stop following trumps lead. Be a leader. Let other states open and wait to see them get overwhelmed. Be cautious, extend the safer at home order by at least two weeks, of the other states don’t see a spike and you think our situation is under control reopen in segments. Start in rural areas. Areas that have peaked. Then move to address other areas like broward and miami
Lake	Tourism	Antibody test for 10% of the population, Germany is doing a great program that could be used here based on zip code. Same time positive negative test Increase unemployment to $400 a week to help middle class during the pandemic Start opening process on May 15 with two week intervals
Hillsborough	Healthcare	Please let doctors do procedures! I am in pain and cannot see my doctor for an in office injection!
Martin	Recreation	We need to open our open spaces especially our beaches. It’s very easy to use the beaches and accomplish social distancing. And it’s outside and we are now getting more information that being outside amongst people is far safer than being inside with people (say in a supermarket). Second we need to take the counties out of it. The county officials don’t have the cowrites and the data that the federal and state governments have. That causes their decisions to be made in an overly conservative manner. They don’t want to get sued because someone dies based upon them not enacting overly strict rules. I would like to see the state give the counties very little latitude in adopting more onerous rules. And golf courses should be open. It’s ludicrous for them not to be. You won’t die from covid 19 if standing too close to a fellow golfer. You are going to die from a club head striking you in the head! It’s time we make proactive decisions for the benefit of 95 plus percent of our people. If we need to quarantine the remainder let’s do that!
Broward	General	Open areas which are very open like parks, golf courses, beach boardwalk for fresh air and walking only. Listen to the science and their recommendations. Money can't buy lives.

AMERICAN OVERSIGHT

Escambia	General	As a Manager at Publix Supermarkets, I beg and plead to you to extend, and actually enforce the stay at home order. Our cases are not on a decline, and our community has not followed, nor taken seriously any one the recommendations made by the CDC. Each day our retail associates, who were labeled as “essential”, are spit at, threatened, and completely disrespected by customers everyday who were supposed to be at home. We consistently have customers approach our associates, unmasked, violating the 6 foot social distancing. They purposely walk down the wrong way of our one way directional aisles. They curse at associates, some of which are 16 or 17 years old, for simply asking them to maintain their distance. I recently was threatened by a gentleman that said he was going home to get his gun to blow my brains out, and had to press charges. All this is happening because the community is not staying at home. They are not shopping for essential items, but rather for beer, or lottery tickets, or their one meal for the night, treating this as if it has been a month long vacation. We do this everyday, for a community that does care for our lives, or stop to think about how much they are putting “essential workers” lives at risk. We are not heroes, this title belongs to the hard working medical workers, law enforcement, and first aid responders. We do not need or desire recognition, as most grocery chains have slapped us in the face with a quarter raise hazard pay, reminding us we are not essential, and that that’s how much they value our lives. Instead we ask to keep us safe. We are a vital service, but each day, more and more retail workers face the very hard choice of serving the community, or protecting their own lives from citizens who are not taking this seriously. Keep the beaches closed. Extend the stay at home order. Don’t give tourists a reason to flock to our county and further jeopardize the lives of your constituents. Until we are all actually in this together, we stand as citizens that are only concerned for ourselves. Until Floridians realize this, and follow instructions, we are a poor decision away from becoming a breeding ground for this virus. Do the right thing. Be smart. Be safe. Protect me. Please.
Polk	Education	Keep schools closed until testing, treatment and tracing is in place (and accessible) to all school board employees, students and their families. Have a sensible plan in place for screening students once schools reopen. Allow the local districts the flexibility to determine how social distancing can be implemented at all grade levels. Give families and employees who are at higher risk of contracting corona virus the opportunity and means to distance learn and work. Keep CoVid personnel measures (re: days off for illness of an employee, caring for a family member and compensation during this time)in effect. Relax attendance policies for students directly impacted by CoVid. Finally, remain willing to either keep schools closed or close them again, should a second, third or fourth wave hit (particularly during influenza season. ***Provide PPE (masks at least) and disinfectant for employees and masks for students ****

AMERICAN OVERSIGHT

Miami-Dade	General	Governor DeSantis, I appreciate the initiative and your interest in knowing what the residents of Florida think about reopening our State. I would like to offer my opinion and I think that many people will feel identified with my situation. Four months ago I became a mom for the first time. You can imagine my fear in these difficult times that we are all experiencing. I don't think opening our state is the most convenient decision right now. We still do not have a vaccine and we do not have enough information about this virus that is plaguing humanity. Many people are not yet aware of the seriousness of this situation and this affects us all. Thank you for your time. Respectfully, Dayana Lopez
St. Johns	General	I'd like to start off by saying that even the discussion of a re-opening this early in a pandemic is so incredibly idiotic I'm actually not surprised our governor is contemplating this. The president of the United States clearly shows no remorse, and apparently no responsibility, for the hundreds of thousands and predictably millions of American families who will never recover from losing a loved one. This is not fair. I believe that 100% of the American population better approve on a reopening instead of some ignorant politicians deciding how many people should die before we learn that this is not something to underestimate. We don't even have a vaccine. My answer is NO. Two months is not safe enough. I speak for the safety of myself, my family, my friends, and my country. And no one should be allowed to decide their fate for them. I appreciate this submission website, and I hope to God that you will consider my feedback. Thank you.
Broward	General	Please start allowing condos to open their pools again & allow certain businesses to open with limitations. If anything there should be an order in place that advises elderly people and people with compromised immune systems to stay home. Also, the masks NEED TO GO!! It's awful and people are miserable. This is no way to live and this is not America. We are all jailed inside of our homes or forced to wear masks in public. I voted for DeSantis and Trump and I have faith that you will open up Florida this week! Also please do something about all of the homeless people in Pompano Beach- they are violent and on drugs along A1A and US1 and probably infected with COVID-19. Rex Harden does NOTHING. Thank You & God Bless
Broward	Government	It's hard to believe that the governor of the state would say he's not in any hurry to open the state. What are we going to wait for the state to be so far into a depression it will be years to recover. No matter when you decide to open the virus will be with us for ever. OPEN THE STATE.
Hendry	General	Hon. Gov. DeSantis: Please re-open the great State of FL now. It's time to re-open all of FL. The shut down was based on misinformation and lies. Please don't continue this unconstitutional insanity. Small business and our rural areas can't take much more. Respectfully, R Zimmerly LaBelle, FL 33935

AMERICAN OVERSIGHT

Pinellas	General	I believe that it is too soon to open the State at this time. There are not enough safety precautions to prevent, or even limit, another outbreak. The medical world has not yet figured out all of the components of the virus. They are just now discovering that COVID-19 is affecting all of the organs and has been known to cause blood clots in 30-40 year olds. Opening up now, even if it's just for Floridians and no outsiders, will be detrimental to the health, wellbeing and lives of all Floridians. With an extended period of those infected being a symptomatic we could end up decimating the population within a couple of years. At the same time, Floridians need to be paid Unemployment without having to Job Hunt, as that would defeat the purpose of Safer-at-Home. Other States such as Michigan and Wisconsin have waived this, and so should Florida. You can reduce requirements, cannot added them.
Pinellas	General	I understand the desire to get things open again. That decision should be made with direct input from infectious disease professionals, health care professionals, and epidemiologists. They cannot play second-fiddle to the interests of the private sector. There is no scenario where re-opening Florida is done with the acceptance that thousands could die, because people "need the economy to go." That is a horrifying thought.
Alachua	Transportation	I feel that Florida should be opening up for business. We have learned a lot about how to protect ourselves. Everyone is getting beyond stircrazy! Please open the restaurants and the bars so that folks may have extra activities to enjoy. I used to drive for Uber and Lyft in Gainesville. Since it is a college town it was helpful in supplimenting my income. I , like many other folks really want things to return to normal. I too do not have enough to pay my bills. Falling behind on payments was not my goal! Still not received any stimulus check. I really want to be able to go back to work so that I pay get my bills paid. Please let Florida open for business! Thank you.
Miami-Dade	General	Please open as quickly as possible. All of this Coronavirus stuff is just lies and fear mongering. People need to get back to work and we need to get back to enjoying our lives.
Lake	General	no do not reopen the market.
Lee	General	In order to open any type of SERVICE industry job that has immediate contact with customers I believe ALL staff should be required to wear a face mask when conducting business. Sales, Cashier, food service, cosmetology, spas, car dealerships, florists, Mom & Pop stores, etc. should have mandatory face masks on while conducting business open to the public until the infection numbers have reached significant decreases throughout the state. Safety to decrease transmission must be the most important priority. Social distancing with no covering to the face will not stop the transmission of germs. People must feel protected when they go out of their homes in order to conduct business with the public.
Hillsborough	Healthcare	Please do not reopen the state yet, it's too soon. We will see a spike in illness as people patron their regular establishments, escpecially the beach. Testing is still scarce and what will happen when more people need tests. Please wait till July to reopen if we are on the predicted downswing then.

AMERICAN OVERSIGHT

Martin	Education	Closing schools for the rest of the school year was a wise decision. Not only for the students but for all the rest of us that work with schools and students. In reopening Florida, please consider each county separately and what would be safe...and what activities would attract hundreds of people placing everyone at risk. Yes, economy is important but a second and larger outbreak would be devastating. It is fine line err on the side of safety. Do not sway because of politics or economy. Weigh medical facts and see that although not as expected our numbers are still rising even with the shelter in place. My family is my safety would appreciate if you consider our health and well being as you consider you own family.
Orange	General	We absolutely should not be opening the state up yet. Until we have the resources in hand to help with the the second wave of the virus, which WILL happen and, as other similar pandemics in the past will be worsened by the extended separation encouraging friends and families to come together once full lock downs are over. Attempting to restart the economy at the cost of Floridian lives would be short sighted at the best of times.
Broward	Recreation	I feel very strongly that we should not open things up until the professional medical people say it safe and then we should follow their guidelines. I am a swim coach and would love to get back to work, but I am 65 and my wife is also and has breast cancer and diabetes and I don't want to kill her.
Manatee	General	Yes start the state and its economy back up, paying close attention to assisted living and nursing homes. We the People will take care of the rest Rich Dinan
Leon	General	I haven't been able to work in 2 months due to restaurants closing down due to the coronavirus quarantine guidelines.
Volusia	Education	I think that you and your team are doing an amazing job in a very uncertain and evolving time. I would like to Thank you For erring on the side of caution and keeping our schools closed and protecting all stakeholders. I urge you to stay the course and side with caution as we begin this process of reopening.
Bay	Real Estate	I own condos in Panama City Beach, FL. I rent my condos myself. March through September are the busiest months for our rentals. These months are usually what pays our bills for the year. If Florida isn't opened soon, people will be losing the investments back to the mortgage companies.
Brevard	Recreation	Open parks/ beaches outdoor activities
Broward	General	If you want my vote, don't rush to reopen. We can't take a round 2 of this. Be safe. Our residents lives and public health are what matter most.
Pinellas	General	Florida needs to reopen! The small businesses are hurting, some beyond repair. The shut down is doing far more damage than the virus. Those who are fearful or high risk can stay home if they chose but the majority of us want our god given freedom back.
Palm Beach	Real Estate	People are struggling to pay rent!! Let them work!!
Polk	Recreation	Please OPEN ALL beaches, state parks, restaurants, and all retail shops immediately. This virus has been way blown out of proportion and we have destroyed Florida's economy. OPEN FLORIDA IMMEDIATELY!!

AMERICAN OVERSIGHT

Duval	General	We should not open anything until the amount of infections each day decline. I don't see the point of reopening so soon. You are putting peoples lives at risk so that someone can go out to eat or get a hair cut. It's first world problems. Give us the necessities. Besides that, I don't vote to reopen until we actually have this under control and the rate of new infections decline. Thank you.
Polk	Finance	I was never polled or even received an email asking for my opinion. There is no link on your government web site front page even asking for residents' opinions. I am all for reopening Florida with restrictions of social distancing and facial masks in confined areas where 6 feet cannot be maintained. I think there needs to sworn statements from service providers that their employees are practicing safe disinfectant practices and will not work if they have any symptoms. In addition the 5 min tests should be given to those in restaurants handling plates and glasses or cooking handling food
Broward	Recreation	We own 2 martial arts school that have been in business since 1988. We must reopen before it is too late to save. This is the only income for our family and we can not or do not want to depend on others. I have provided a list of things we put into effect [prior to closing as well as things we can do upon reopening. 1.First and force most keep families informed at all times in regards to safety procedures put into place.Most are supportive when kept informed. People want to contribute to positive efforts to make a difference. 2.Check temperatures upon arrival. 3.All students wear masks in class. 4. Students 6 feet apart. 5. Limit number of students in class. 6. All students wash hands upon arrival. (We had an associate escort students(children) 1 x1 to bathroom to wash hands while singing ABCs) 7. Teen/ Adult students can train outside 6 feet apart verses indoor training for places with outdoor property.(Our students love to train outside) 8.Only students in building. Parents can observe child through Facebook Live in the comfort in their vehicles(Our parents had no problem doing this.) 9.Along with students in class practicing all of the above , Facebook Live or Zoom class can coincide for those whom are vulnerable or not yet ready to attend in person. 10.Students can wash hands again upon exiting class. 11. The only equipment to be used is the personal equipment of each student. 12. Disinfect school daily through out the day if necessary. This can work. We have the right to reopen. Who is essential depends on who is asked this question? My family is essential, my business is essential our students are essential and our community is essential. We must be fair. We The People must have a choice.
Lake	General	Open May 1st.

AMERICAN OVERSIGHT

St. Johns	General	I think Florida needs at least another month of stay at home. If mortgage companies and car payments can be suspended for a month plus utilities. Then just add the suspended payment on the back end of the loan. With utilities spread the one month over the next twelve months of bills equally. We need to protect the people. I am essential and I am okay with that. As we know people will not follow proper guidelines if you open up now.
Duval	General	It is too soon to open the state or relax stay at home orders. Pay out the unemployment claims. All of the people I know have been furloughed or working from home. We shouldn't be risking lives to avoid an economic slowdown. Ensure the safety of Floridians lives first. Most people would rather we extend stay at home orders for a little bit longer so we don't have to do this again in the fall or winter and have more economic losses.
Miami-Dade	Healthcare	We should NOT open MIAMI dade county yet. My mom is a nurse and is putting herself at risk everyday. This is a ridiculous question!!!!!!!
Orange	General	Keep the state closed until doctors say it's safe to open.
Miami-Dade	General	Opening too soon may likely have the virus to appear again. As a senior I have been in my home for seven weeks without leaving and understand the reason. Those people who think it is a joke need to look at the numbers of people who have been infected and died. Maybe they don't know someone who has been sick or died but at least think about all the people who have put their lives aside to save people they don't even know. Opening slowly is the way to go. Not theaters but open air parks. Not totally open grocery stores but limited number at a time. Doctors free to open offices for elective procedures but space patients apart so no one is waiting in a waiting room with others. But most of all make sure everyone wears a mask when with others. ....no exceptions
Lee	Real Estate	We need you to open up the state of florida. This is going on too long and the people of Florida want to go back to work. There are many wearing masks and I think that this will be was going to be. If we had to do something for the ones not wearing then that that is what we have to do. Open up salons and barbershops they can go by appointments. They are always cleaning their products. We have start somewhere. This is ridiculous. We cannot worry about the next pandemic. . Well never leave the house start opening up now and be the leader you are meant to be Thank you Lou and Judy Simonetti
Flagler	General	In my opinion not opening Florida as soon as possible will ruin businesses, lives and families. If it is deemed safe to go to Walmart and publix with caution then just about every business can be opened this way. Majority of the people saying to wait did not have 100% of their income taken away. In my opinion this is a major overreach. How do you expect people to survive? Businesses are already closing down. This is an extreme overreaction given the scope of things. most people recover, it is not as huge as people make it out to be in my opinion is fear mongering. Keeping Florida closed will cause FAR more damage to the people than this virus!!

AMERICAN OVERSIGHT

Palm Beach	General	I think you should reopen state now at least parks golf and beaches for residents. We are very capable and have been social distancing for awhile now. The large majority who have not already gotten the virus will not die if we do get it so no need to quarantine the healthy, doesn't make sense now that we have seen the data.fyi I am in the risky set because of my age but I know how to take care of myself.i also think the media have done a major disservice to the people and just scaring them .I would hope we would see more common sense from both our politicians and scientific community!,
Lee	Government	Do not reopen ! It is too soon, and we will only get shut right back down. It's too soon!
Suwannee	Professional Services	Do not open hair salon, nail salons, tattoo shop, massages, gyms as there is no safe way to social distance.
Pinellas	Government	Open up the State! The economy is going under! The people of Florida NEED to work! The sunshine is good for us! Let the sick stay home. Our business will close for good if you don't open up our economy! We want to work we don't want printed money that will cause sky high inflation! We're counting on our Republican Governor to not turn Florida into a Socialist state!!
Miami-Dade	General	I believe it is important to keep the court houses, beaches, and the entertainment business closed as these are areas where people will congregate and will be difficult to contain. However activities like boating (without sand bars) nail salons (with plexiglass), and nature preserves (with a max capacity) should start to slowly open back up. Floridians need some sense of normalcy without the opportunity to infect others
Lee	General	Hello, I would like to urge Governor Desantis to extend the stay at home at order and not to lift it at the end of April as suggested. These measures are working but all that work will be undone if the order is lifted too early. To keep all Floridians, safe, the order should stay in place until we are sure we can control the virus. Thank You
Lee	General	The state should have never been closed in the first place, but I understand why they did it with the outlandish data they were presented with. But now that we have current data and we see the mortality rate is much much lower than they projected, it is time to open. The economy had been destroyed and people's lives have been destroyed because instead of just quarantining the sick and at risk population, they have quarantined everyone. Locking everyone in their homes for months makes no sense medically. Our immune systems are weakening as we shelter ourselves from all the bacteria and viruses that our immune system needs to strengthen itself. It just doesn't make sense. Herd immunity is the only way to control viruses when there is no vaccine! And closing outdoor areas like beaches and parks is also not in line with science. You have less chance of getting sick in the warm sunshine outside than being stuck inside. Open ASAP and save our country before it's too late. If we wait too long we will never come back from this.
Escambia	General	Do not open up yet! It is still too soon and we have too many elderly and we don't know enough about how many cases there really are here yet!!!

AMERICAN OVERSIGHT

Palm Beach	Food	Like to see places that offer outdoor eating get to open, ,getting parks, beaches open as well. ,and if all goes well,open more and more each week.
Broward	Management	Utilize information provided by professional medical epidemic experts to open the economy not political cronies.
Palm Beach	Healthcare	The opening of the business is a function of control of the virus. The first step is testing of all types of persons in a given region. The nonsymptomatic and presymtomatic must be tested in addition to those with symptoms in order to understand the depth of the virus. A reasonable sample should be used in each region. After that testing is done, the national guidelines set by the Trump administration can be followed. The quicker testing is done, the quicker a safe opening will occur. In the absence of sufficient testing, there is a great likelihood of a second shutdown. A second shutdown will be more devastating than the first as it will erode public confidence in pursuing consumption to levels that insure long term recession.
Citrus	General	I think we should wait. Our numbers go up then down then back up. Until they are going down, and staying down then we are still at a very serious risk. Thank you Please stay shut down.
Lake	Healthcare	The "Stay At Home" was based on inaccurate information feed into a model that proved to be consistently incorrect and unreliable. As a result, 26 million people have lost their jobs, children have not be able to go to school, events canceled and to top it off no one has been able to get needed preventive health and dental care. The tyrannical government has taken away our rights to decide what is best for ourselves, family and business. Quarantining the well as well as the vulnerable is completely irrational and harmful to our health and well being. Common sense has completely disappeared and has been replaced by fear and irrational, contrary nonsense. ENOUGH. Time to wake up, Governor DeSantis and return freedom and liberty to the people you were elected to represent.
Miami-Dade	General	Necesitamos tener más pruebas para tener elementos reales para determinar lo peligroso de es levantar la cuarentena. Recordemos que son más valiosas las vidas humanas que las ganancias y cargos que obtendrán al reabrir los negocios.
Seminole	Professional Services	While I'm one of the small businesses greatly affected by the shutdown, I'm concerned that if we reopen too soon, we'll be back in the same situation in a few months. We can't go through this again. Please err on the side if caution.

AMERICAN OVERSIGHT

Polk	Professional Services	I am a hairdresser and I just want to make you aware of how close we work with the customers. We are in their face to wash and style their hair. Blow dryers are making everything fly around in the room, they sneeze and cough and hairspray picks up everything and we breathe all this. Plus, our customers love us and they love to hug and give us a kiss and they hold our hands. Nothing makes them feel any better than their hair looking good and they have missed us. It is so scary out in the public, please don't open the salons yet. Customers will come even if they are sick. We deal with that on a daily basics even when there is no virus. The virus makes it so much more dangerous. Yes I miss them and they all look awful right now , but don't take a chance with our lives just to give a haircut or style!
Orange	General	I think non essential retail and restaurants should reopen with social distancing measures in place on May 1. I am not opposed to nail or hair salons including spas opening either. Again with measures put in place. I think in a couple of weeks gyms should be allowed to open. People need to be able to get back to work. Our numbers have flattened and yes there will be new cases but people should be able to make their own decision what is best for them. Mental health is also very important. Coved-19 is not going away but we cannot hide for 18 months for a vaccine. That is not healthy.
Broward	Education	Please don't re-open now. First make sure that the State is actually helping Floridians in unemployment condition. It has been said that a majority of those without paycheck has not even being approved to receive unemployment assistance. Please help them immediately. That should be your priority. Opening beaches, parks, commercial places without a proven successful treatment or vaccine will only bring a second wave of COVID-19 stronger than the first one. Half of the re-open task force must consist of medical doctors. I understand Business men are visionaries who move the economy but science should say the last word. It is a virus that we are fighting and we need science to help us to defeat it. We need test for each Floridian (even the "healthy" ones) Please make tests available to each Floridian. It would be safe to open only when a treatment has been found or when every single Floridian can be tested. Thanks for your work! May God be with you and guide you through all of this! Respectfully, Gladys Cantillo
Orange	General	Please open the Beaches AND the Beach Parking lots. Of course with Social Distancing, for Sun Bathing, swimming. FOR FLORIDA RESIDENTS ONLY!!!!!!! I don't think that we are ready or the country is ready for the tourists to come back yet. Hopefully soon, but not yet tor the tourists. Thanks

AMERICAN OVERSIGHT

Pinellas	General	It’s time to open this place up. I have three grown children that have jobs on the beach with children they have no income. They filed for unemployment they have not gotten any money at all from the government. It’s time to let everyone go back to work. If you can be careful enough to go to the grocery store You can certainly be careful enough to go to work and make a living. I think you need to read a little more on the doctors that are helping Trump both of them have been helping the Democratic Party and our Democrats. Everybody’s doing everything they can to get rid of Trump.It’s time let’s open it up so our families can make a living. Can’t you see what these two doctors are doing doesn’t take a rocket scientist. When you hit done
St. Johns	General	Thank you for taking public opinion on this important community issue. In regards to re-opening, I'd like to suggest that you keep the rule/guideline that we have in Jacksonville that states "If you can work from home you must" indefinitely. I am an IT worker at CSX headquarters in downtown Jacksonville and as an IT worker, we already routinely worked from home several days a week and we can do our entire job from home with no loss of service to our internal customers or external customers. We have done exactly that through the shelter in place orders. The company goes by state and local guidelines, so if that rule were removed, they would very likely ask that people return to the office just because that is the guideline, when there is no reason to place anyone at undue risk by having them be in the office vs safe at home. The idea that we may have to return to the office soon for no particular reason just adds undue stress and concern for our health. As far as opening things up in general, I strongly believe we should err on the side of caution and take our time. If certain businesses like hair dressers or restaurants can open up safely with distancing and health as priority one, then we have no problem with that. In those cases people have a choice whether they feel safe visiting such establishments. We would likely avoid doing so until a reliable vaccine is available, but we are trying to do our part currently by supporting local businesses through take-out, touch-free pickup services and anything we can do to keep the economy going. Health and safety is our top priority and continuing to require people that can work from to do so indefinitely would go a long way towards keeping a big portion of our economy safe, without any negative effects. Thanks for your time!

AMERICAN OVERSIGHT

Gadsden	Recreation	I do not think it is safe to re-open the state yet. We should continue to stay at home in order to flatten the curve. Phase in businesses slowly, but require implementation of social distancing within the establishment, For example, everyone needs a haircut by now. Allow the hair salons to operate with only 10 people total in the facility. We should NOT be congregating in large numbers, so I'd say keep the churches closed, the malls closed, and other events, such as sports or concerts where people congregate en mass. Continue to stress the importance of continuing teleworking, especially for state employees, universities, etc., where large groups of people must work. Telecommuting has proven to be successful and should be considered as the new norm. The state could save money by reducing the amount of office space that is required to house a full staff. One area you could start reopening is the state park system. As long as the parks are not inundated with people, it would be good for folks to be able to enjoy some outdoor activities without putting themselves at risk. Being able to walk a trail in the woods would be such a reprieve st this point in our lives. Please consider the well-being and health of all Floridians first and foremost before opening the floodgates. We do not need a second wave of the Coronavirus to wipe out part of our great state.
Pasco	Information	Re-open Florida task force: Please Do Not Open up for health reasons. To many people are NOT following the safety rules Gov DeSantis created. Example problems with customers at stores and nobody enforcing 6' rules. (Walmart Ridge Rd) Safety everyone wear masks not to Spread virus! I would like start opening up AFTER people follow Rules.... period I am not interested in starting over because of people Not Following Directions! Thank You for listening to my concerns :-)
Brevard	Food	Hello, just wanted to provide an opinion on the reopen topic since your offering the public to weigh in. I feel like just from what I am hearing and seeing around and about, for some areas if restaurants feel like they can resume business safely with following social distancing guidelines, then they should be allowed to do so. Maybe not everywhere, but in many areas it seems like they could get back to a small start. Big chains may be a little different as they are larger with needing more staff etc, but I am thinking more local locations and local run restaurants which provide just as many important jobs and are good for the economy as the big ones. Basically how they operated before being fully closed. Certain seating capacity limit, spreading people out, and all the cleaning measures etc. If some do not want to or cant then they don't have to reopen yet, but for those that think they have the ability to do so and want to get some cash flowing, it may be a good way to get some back to a degree, slowly but surely. Thank you
Pinellas	Tourism	I am losing $500 a day on rental income this is my sole source of income how can you justify closing down everything for the flu? People are responsible we don't need government making decisions for us they only get in the way versus help.

AMERICAN OVERSIGHT

Broward	Retail	I would like to see Hobby type stores be re-classified as essential businesses. I don't mind staying home but many of us have hobbies to which we need to replenish supplies such as paints and brushes and so forth.
Miami-Dade	Healthcare	As an employee of a senior living company who's been working from home for the last month, I don't see how any "stay at home" order can be changed or ease until a much more massive number of tests will be conducted. The state of Florida must see a constant decrease in the number of new positive Covid-19 patients for at least 14 days AND be able to test any person that enters any senior living community before any changes can be made.
Orange	Tourism	As much as this pandemic is hurting our economy and business, I don't think re-opening the state this early will solve the problem - we were one of the later states to go into quarantine and not enough safety was practiced, keeping the beaches open too long probably spread the virus massively. We need at least another few weeks if not a full month to really counteract it in my opinion. Besides, even if we open everything up and open the parks and invite everyone back, doesn't mean they will come. The rest of the world is still in various stages of recovery and travel will not resume as normal for another month at minimum, if not more.. opening Florida early will not get everything back to normal, and only risks making the situation worse.
Pinellas	General	If you don't open up the beaches the hotels the restaurants and all the other businesses they're all sensual people work at all of them. It's time to open this up put people back to work or there ain't gonna be any work to put people back to if you guys ain't smart enough to figure that out you don't belong in Tallahassee or Washington. If you can put 100 people in a grocery store you can put people on the beach this is the most ridiculous thing that I've Ever seen in my life. Open this place back up so I can buy toilet paper, among other essential items general staff at Genesis general he had that little arrow in that space in the same genera ever seen in my life. Open this place back up so I can buy toilet paper, among other essential items. Dr. Fauci and Berks are only interested in the virus. they could care less about the economy. If Trump and the governors don't wake up there will be no economy. And don't forget both of those doctors are Democrats. THINK ABOUT IT. They don't want the economy to be good because they don't want Trump reelected. Can't believe you people can't see that
Lake	General	Open the state, maintain social distancing, advise the elderly and those with co-morbidities to stay at home and remind people that just because the state is open does NOT mean you have to go out. If you want to stay at home stay at home!!! Keep nursing homes secure and allow non corona patients in hospitals to have visitors that are escorted to and from patient rooms. Thank you

AMERICAN OVERSIGHT

Pinellas	General	There is nothing that leads me to believe you know how to open Florida safely, or will follow any practical guidelines experts give you. You are a Trump ass-kissing Republican who will simply do what Trump says, no matter how insane. We know that you believe that starving--and I mean literally starving--unemployed workers by blocking unemployment benefits will get these desperate workers to want you to open Florida back up faster because they will be dying to work. And, hey, if they stage protests to open up Florida fast, that's even better for you, right? It's like having workers do your bidding for FREE. And that will make you look good to Trump, to whom you owe your career. But, some of these people will actually end up dying, because prematurely opening the state will result in a new surge of infections. But, you know that already. You just want to impress your master-in-chief. Good luck in 2022, you horrible excuse for a governor. PS: You use BOTH elastic bands when you put on a face mask.
Lake	General	Hello, I believe it is time to reopen . I am in healthcare, we need to get back to normal, to park at the beach , play at the beach, shop beside groceries, go to church. People need back to work, normal again. I have been working through all this. i have been monitoring myself watching the news, to much negative with media !!! Using common sense,. When we go to the beach we never sat close to other people any way. You also need to think of people mental health through this . People need to go back to work, back to there normal. Flu Season will be here before you know it, will we shut down, stop living, certain people work all the time while others will not ? Lets have vacations, go out to eat, play at the beach, need to let us park there to ! People do have common sense . Think of every one's mental health we need to go on back to the normal ! Thank You !
Broward	Healthcare	My Mom is 89, I'm in my 60's. My son is in his 20's. Opening up Anything u til there is widespread testing ore knowledge of the virus' immunity is a death sentence to all.
Okaloosa	Food	Please open all Florida beaches and businesses to full capacity ASAP. I own 2 restaurants on the FL Panhandle (beach areas). I employ a staff of about 50. We had to shut down completely because they The pick up/to go model just does not work for us , especially since they closed the beaches and condo rentals, which chased off all of the tourists. We lost lots of money trying take out/to go. Little to no customers. Staying closed much longer could cause us to shut down permanently.

AMERICAN OVERSIGHT

Broward	Food	Good Afternoon Governor: I'm very happy of the decisions you going to re-open the State. But its a good chances people who didn't have the virus before will have 99% chances to get it by return to work to early. For instance ME who have diabetes and cholesterol those underlined people more at risk because we have low immune system. I'm working in the food industry a lot of people Come and goes you dealing with sick customers and non sick Customers in that case what can we do to protect our children Who left at home. I can't effort to get sick or my children's and we need to pay our bills too. In my opinion best thing is to spray the whole country and re- open the less harm places. Everyone still have to keep 6ft apart and ware mask and gloves. I thinking food place for public should re- open with a very special precautions by last week of MAY. Thank you for the hard works you being doing for our Country. God Bless
Okaloosa	General	Florida is a large state with wide demographics. Commissioners can make responsible decisions for their counties. I own a small bakery and know many other business owners. The fine print on the grants will turn most of this into loans. Many of us do not meet the criteria of 75% of income needing to go to payroll. Business loans from people having the dream to start businesses in the thriving economy, equipment, maintenance all needs to be taken care of to employee the employees. I'm the 3rd in my family to run the bakery which has operated since 1970. We have 4 hospitals in my county. This past week we had 6 hospitalizations at one point. Last week there was 7 at another time I checked. Weve had about 30 total, with less then 200 cases, and this was after not closing our beaches until the end of March. Please allow us to work and prepare ourselves for a possible 2nd shelter in place this winter.

AMERICAN OVERSIGHT

Collier	Accommodation	As a full time resident of Collier County who has lived here for many years, I find it absolutely appalling that this epidemic has become completely political and not serving the best interests of the local residents. We need to put politics aside and protect our citizens. This epidemic has everyone completely on edge and we need to protect the local population (most of which are elderly and are at major risk) from this deadly virus. Reopening our state, beaches, parks, and other popular gathering locations, we are not only inviting people to congregate but also to come from all over the country to visit. This would be putting millions of service and hospitality workers at risk who have to deal with the public (including myself) and risk exposure to COVID-19. As a vacation rental manager, it is almost impossible to check in and service incoming guests, maintenance requests, provide housekeeping, etc to these individuals without coming into close contact with them. All of those who decide to electively travel to Florida clearly have no regard for the local population and could care less what risk they pose to people who live here by coming to visit. You know these individuals who are traveling here do not follow any social distancing guidelines where they are from, if they are eager to travel all around as soon as possible. The missed revenue that everyone is concerned about is nothing compared to the cost we will incur from irresponsible people coming to our state and spreading this virus to all of our local citizens, many of whom are prone to serious health risks. As a father with a wife and two small children at home, I ask that you please take this into consideration to protect us until things become more stable and we begin to see a significant drop in the curve. If I bring this virus home from work and my wife and I get extremely sick, what are we supposed to do? Who will take care of our children knowing that they risk being exposed to COVID-19 from them? What would you do in this situation? I understand that quarantining at home is not enjoyable or fun for many people and everyone is getting restless. However, what is this small sacrifice to prevent the rampant spread of this disease in our local community? I am very grateful of you for giving us the opportunity to provide feedback on this issue and I want to thank you for taking the constituents' opinions into consideration. I sincerely hope you keep the local, full-time population's safety in mind when you make your final decision.
Pinellas	General	Many peop!e are wondering if opening summer camps is a.good idea? What is the risk of having all of the kids back together and potential spread of this virus?
Sarasota	Retail	Retail stores in Florida should be selling face masks . None are available at grocery or retail stores. If we can buy them easily, more people will wear them. At least for those who feel safer with a mask or want to wear one, it be nice to easily buy one at stores like Walmart, Target, CVS, Sams, Walgreens etc.
Duval	Education	Opening up the state too soon will be the biggest mistake ever made. Tourists will be terrified to come here unless they feel it is safe. Listen to the experts. Not the president.
Hillsborough	Tourism	My vote is to re-open EVERYTHING ASAP. Look at Sweden, or other countries not shutting down, no difference in being quarantined, people are losing 100's a day for nothing. If you are at health risk then take precautions just like anything else we are a good judge of how to stay safe. We don't want or need the government telling us what to do. Please open everything now

AMERICAN OVERSIGHT

St. Johns	Professional Services	Hello! I appreciate the daily press conferences and this gesture of collecting public comments. I am absolutely in favor of a measured, data-based plan to re-open our state. Researchers and health officials are learning enough about this virus -- how it infects people, how it survives outside the human body, and how we can protect ourselves -- that we should be able to figure out a way to re-open safely. I am confident that Floridians will be able to follow whatever guidelines they are given. Equal with the virulence factor, there's a psychological component to this pandemic. It's very important to give people some semblance of a timeline. The federal guidelines that outline phases 1, 2, and 3 are extremely helpful in this regard. We need to know there's a light at the end of the tunnel. The "better" we behave (in terms of following the guidelines), the faster we can get back to normal. We need these hopeful messages, along with the statistical updates. In contrast, if you fearmonger and don't give people any idea of when social distancing could end, you more are more likely to 1) ignite skepticism and resentment toward the government and 2) trigger those who are prone to pessimism to behave irrationally, perhaps intentionally stifling the economic recovery. A drawn-out economic recession will make this entire situation triply worse. Just give people specific scenarios and explain how they should proceed. Outlining procedures for close-contact situations -- for example, hair salons, nail salons, day spas, dentist offices, orthodontists, physical therapists -- will be particularly important. There's so much good that has come from this situation. I sincerely hope that we can adopt a national (or even just a Florida-wide) remembrance of April 2020 each year going forward. Let's call it "The 15-Day Pause." We can use two weeks each spring to spend more time working from home, practicing school from home, driving less, traveling less, and re-familiarizing ourselves with the protocols we need to use in situations like this. Something similar to COVID-19 is bound to happen in the future. I hope we'll be more prepared, as a society, the next time it occurs. We need to be able to keep calm and carry on. Our national security depends on it.
Brevard	Tourism	Based on new findings, the number of cases is drastically higher and the number of deaths is lower, so the mortality rate is significantly lower. No worse than the flu. The drama is created . Stop buying onto it and let all of Florida carry on as they were in December.
Duval	General	As a teacher & a mom, this has been very tough. We have watched the numbers & cases etc. We have seen the now decline. April 30th is right around the corner. Please open us back up. If the northern counties are ready, which it really seems we are, let's do this. We weren't meant to live like this. Please open up soon so we can get back to friends, life, & church. Please!!

AMERICAN OVERSIGHT

Osceola	General	Dear Re-Open Florida Task Force; I am one of the many Furloughed workers here in central Florida. I share many of the same concerns as others for my health but those concerns seem abstract as they are only numbers and news articles to me at this point. My very real concern is my lack of income. I have very real bills and a very limited source of income in reemployment assistance. Reemployment assistance is limited in its pay out and limited in its duration. The federal government's supplemental is also limited in its duration. At the end of July, all these programs will have reached their set dates of expiration, during which tens of thousands of people will be looking for jobs while local businesses will still be suffering from a lack of demand. The number of unemployed individuals dwarfs the number of confirmed infected cases in Florida. The media and the governing bodies have done a great job in creating fear so that people will abide by the social distancing requirements. I believe desperation will begin to override fear when adequate public assistance starts to wane. I strongly believe the economic concerns are going to quickly overtake the health concerns in the near future. I humbly ask that the task Force take into consideration how to get the maximum amount of people back to work and how to undo some of the fear people have with the social distancing. I do not believe businesses will bring back employees in mass if there are no customers to go along with them. Sincerely Logan

AMERICAN OVERSIGHT

Orange	General	I'm a college student in Orlando who's out of work. The school I was an after-school counselor at through OCPS, obviously, closed. My second job at Disney - which I just started - also is shut down. My rent is $846 a month. I was paid $87 a week from Disney, just enough to cover groceries and medication, until I was furloughed. I have yet to receive unemployment money, and because I'm a dependent, I never received one of the $1,200 stimulus checks. Despite this, I do NOT want Florida to reopen. Our state is the epitome of tourism. My job and my city relies on tourism. If Florida is to reopen, our entire city is at risk. I have asthma, so I'm doubly at risk. If Disney reopens along with Florida, I won't be able to return to work without potentially risking my life. Not knowing who comes into my state, and more importantly my city, means I'll have to continue staying indoors. It's not worth it to reopen until we're safe. My dad is a mail carrier for the USPS. He's a medically retired veteran and is almost 60. He works 6 days a week. Every day, he goes home to my mom who is also almost 60, and is considered at-risk by the CDC like me and my dad. My whole family is at risk if this state reopens. It shouldn't happen. Our economy will bounce back eventually, but the lives lost will not. If anything, reopening now and risking those lives may even make our economy worse in the long-run if we have people dying at rates even higher than now and then have to close AGAIN. It's not worth it. It shouldn't ever be. This is something that will be in the history books students like the kids I watch will read one day in their classes, and hopefully they'll be saying we did the right thing and stayed closed.
Pasco	Healthcare	I'm an executive with a national healthcare company that specializes in an area of disease recognition called Risk Adjustment. To shut down our country the way it has been shut down, with the numbers & information provided is/was mind boggling. Our state and country should be open immediately. This virus impacts only a small %, yet the reaction has set us all back many years, some will never recover financially. I beg of you to not tread on our freedoms and the fabric of our financial model, capitalism. We are getting to a point that Patriots are going to rise up and take them back. We are stronger together and I voted for our governor because he aligned with these values. I hope you will consider relooking at our current situation and how misaligned that is versus the platform you ran on. I appreciate your consideration and hope you will help us get our state and country back to work!
Pinellas	General	Remove the order to shelter in place and have a dedicated task force to encourage shelter in place for the elderly and overly concerned immunocompromised populace. The majority can decide for themselves the when, where, what, when and how to live their lives. Those who are weak and concerned about their health should take the necessary precautions to protect themselves. If the weak and overly concerned need assistance we can maybe have a dedicated task force to help them continue with the their own shelter in place. The rest of society should be encouraged to get back to being a productive one.

AMERICAN OVERSIGHT

Charlotte	Food	My husband and I believe that waiting until the middle to end of May would be beneficial for the state of Florida to open restaurants. Take out and curbside has been working for restaurants that have the ability to. There are too many people that don't care about the coronavirus or how dangerous it is...until it is...these careless and/or uninformed people are not a good mix in the relaxed state of Florida
Pasco	General	The state needs more testing both for COVID and the Antibodies testing before the state can open. We need more public health officials providing input based on the testing data.
Santa Rosa	General	We are already used to social distancing in essential businesses. Home Depot, Lowe's, Feed and seed stores, gas stations and more are some good examples of places we social distance now. Other businesses could use same practices, adapting according to their type of business. Sonny s BBQ is doing drive up service at this time. Why couldn't they allow a capacity number of people(based on social distancing) that want sit down service to come in and wait staff deliver tray of food to table and let patron distribute it at their table. At retail store like Bealls outlet control capacity by counting customers in and then subtracting those that leave (Our Home Depot is doing this with great success)social distancing can be accomplished in almost all businesses. When dealing with schools it is probably not a good idea. You are always going to have those that will cause problems with whatever plans you devise. The question is should we abandon trying to reopen our economy because some will not comply with the rules? NO! Where we can, move forward.
Hillsborough	General	We need to follow the Georgia Governors lead and allow any business to open if they so choose. It has already been proven in California, other states and around the world that the only way to address this virus is through herd immunity. This virus just like the Flu, the Cold and HIV will never have a vaccine to prevent it. But, because it has been proven time and time again, that HydroChloroquin does work when the illness is not severe and works when combined with Zpac and zinc in serious cases there is a way to treat and survive the CoronaVirus. Therefore, it is obvious that the only members of the population that need to be in a controlled environment are the elderly, infirm and others who suffer from debiliating diseases. So, follow Georgia's lead and OPEN UP FLORIDA FOR THE MAJORITY OF THE POPULATION THAT IS HEALTHY ENOUGH TO WEATHER AND SURVIVE THIS VIRUS.

AMERICAN OVERSIGHT

Pasco	General	Gov. DeSantis, Please be cautious about opening the state. Do your homework. Know the facts and make the best decision for the state. Do not let each county make their decision which will cause chaos within the state. Govern on the side of caution. Is our state at its peak yet? Wait at least two weeks after this to see how the numbers move, hopefully in a downward spiral. Then begin to slowly open parks,, some businesses, and medical opportunities. Hold off on restaurants until social distancing can be achieved there. Continue to get out the word that a second wave of this virus could hit us if we're not careful and continue to social distance, wash hands, and not congregate in large crowds. As a Republican voter, I'm counting on you to take the sensible and cautious action.
Duval	Healthcare	I am a clinical laboratory scientist. I understand the problem. I see it. However, at some point, the remedy is worse than the illness. Covid patients are coming to the hospitals for help, but all other health care is essentially at a stand still. Healthcare professionals are losing hours, jobs, pay differentials....and in an ER, it put any patient at risk because the staff is a skeleton crew. In addition, my husband is a retired marine with a small business. We cannot self sustain that business much longer being closed. We have yet to hear from any lender for any government aid so I assume we are on our own. I would hate to be forced into bankruptcy by government mandate. Particularly since it's such a non standardized ruling. It's a very subjective rule currently as to what businesses are considered essential and allowed to be open. I can go to Home Depot or WalMart and see a large gathering of people but cannot attend church or go to a hairdresser where there is generally never more than 3 people at any given time. At some point, the general public has to be aware and take responsibility and precautions to safeguard their own health. The covid numbers are going to increase any time the restrictions are lifted, if it's today, next week, next month, 2 months...because there will be an increase in public mobility. People have to safeguard their own health and decide themselves. The world can't close forever because people need to work to live. Take precautions and get back to life. The government can't support us all forever.
Miami-Dade	Management	don't open until medical and scientists say we are ready to open. Don't rush it and potentially have or encourage a second wave.
Lafayette	General	Open up and let personal responsibility kick in,

AMERICAN OVERSIGHT

Volusia	General	The state needs a slow opening such as requiring anyone in public with in 6 feet of another to be wearing a mask . Example restaurant, bars reduce the capacity to fall whiten Business need to be accountable to require customer and employee to follow guideline .Should they not comply with this they will need to shut down . Increase testing site with test that can tell if a person has ,had ,or is immune to this virus . Reduce the additional $600.00 per person receiving unemployment. Have employer reduce employee rate and use money reduce to add to employee rate to go back to work .Employee will receive two separate checks . Personal protection in hospital go back to laundry employees scrubs in house ! Monitor for 30 days with regular results public informed by weekly .
Brevard	General	When there is comments from the Governor in his re-opening thoughts such as "I'm in no rush", and other comments that express plans it does not appear that input is really wanted as the path is already set and ignores the fact that the unemployment request process is still in shambles. Get down in the weeds (the people) and learn how people are suffering from no income and no clear end in sight to obtain income while they are staring at bills for May and beyond. "I'm in no rush" appears to be the motto for the unemployment system. Wrong attitude expressed to the people. Lots of politicians are losing my vote if they run for another term; I will not forget. The numbers outside of south Florida don't dictate that the entire state should still be closed. OPEN it up!!!!!!!! Hey, and just like the unemployment system, it doesn't work the first XXXX times you try to submit comments.....
Orange	General	Governor, it is past time to open up the great state of Florida. In the last some-odd 30 days, less than 10% of deaths in Florida have been related to COVID-19. We are past the peak. We have flattened the curve. It is time to let people get back to work and allow them to provide for their families. Respectfully, David Ferrell P.S. I have tried submitting this twice now, and have received an error: We are experiencing higher than usual traffic. Please try submitting this form again. If the problem continues we recommend submitting again later, or contacting the owner of this form for assistance.

AMERICAN OVERSIGHT

Pinellas	General	At first we were flying blind about the coronavirus but we no longer are. The intent of the shutdown was to prevent overrunning medical resources. Florida succeeded. The goal posts must not be moved and It is time to start reopening the state. FL has about 3.3% of all cases in the US - unlike NYC metro area that has over 50% of all cases in the US. Pinellas has 2.2% of all cases in FL and none of the cases in the nursing homes in Pinellas were due to social distancing issues by the public. Time to stop the one size fits all solution that is devastating people's lives and livelihoods. Americans are the best in the world of multi-tasking - we can continue to mitigate, protect the vulnerable, continue testing including antibody testing, continue working on treatments and vaccine trials, reopen businesses and public spaces and stop punishing everyone and healthy people. It is time to deal with this pandemic like we have in the past - protect the vulnerable and isolate the sick. No Commander goes into battle with only one General. There are more stakeholders than just the medical modelers, who continue to be wrong, that must be heard. Actual data now reflects the virus has been circulating in the US since at least mid-January and perhaps longer. The economic devastation resulting from the shutdown must stop. We need the parks, beaches and public spaces reopened as Sunshine and fresh air is necessary for both mental and physical wellbeing. The flu season is over and hospitals are sitting with so much excess capacity they are losing money. Small businesses must be reopened.I feel safer going to my hair salon where the same lady has been cutting my hair for over 30 years than going into Walmart or Publix. The cure is now becoming worse than the disease as unemployment skyrockets and businesses forced to close through no fault of their own may never reopen. At this point, it is not the role of government to decide the risk acceptance for everyone. The government must trust that the vast majority take personal responsibility seriously. And Trust is a 2 way street. Americans have the right to decide for ourselves our own risk acceptance. Liberty must be preserved over tyranny, impoverishment and serfdom. The emergency to prevent the over run of hospitals and medical resources is over. We are no longer flying blind. Those with paychecks cannot continue telling those who lost their paychecks they cannot go back to work.Time to Reopen Florida Now! Thank you.

AMERICAN OVERSIGHT

Orange	General	I request that guidance be formally provided that clarifies that neighborhood (HOA) swimming pools can be immediately re-opened for lap swimming and exercise purposes. Specifically, I live in a Homeowners Association (HOA) that has a very large community swimming pool with multiple lap swimming lanes, each of which are at least 6 feet apart. Lap swimming is about the only effective exercise that I can do, since it is a non-impact form of exercise. Our pool has been closed for over a month, and my physical conditioning and overall health have declined over this period of time. I have done extensive research, and have not found any federal, state, or local mandates requiring that neighborhood swimming pools be closed, other than maintaining social distancing. The Board of Directors (BOD) of our HOA closed our pool, because of the state mandate to close gyms. Although we have a separate fitness center, which I agree needed to be closed at the time, our HOA BOD has extended the vague requirement to close gyms to also apply to outdoor swimming pools. I strongly support and practice social distancing, but I see no reason to prevent me from lap swimming, where I am submerged in chlorinated water and separated by at least 6 feet from the next closest lane and person. In the absence of being able to swim, I have instead been doing long daily walks throughout our community, and I have observed 100% compliance with other walkers practicing social distancing. We have all seen the traumatic impacts of this virus over the last month. We don't need mindless, dictatorial requirements to mandate basic safety. Although this may seem to be a trivial issue to some people, it is very important to my overall physical conditioning and health. Therefore, until my HOA community pool is re-opened, I will NOT spend any money in our state or local economies, and you will not collect one penny of sales tax from me. In summary, please provide specific guidance that clarifies that community swimming pools can be re-opened for exercise purposes. Until this is done, anything and everything else that the state or local governments allow to re-open will not be patronized by me.
Indian River	General	Thank you all for your hard work. Comments below. Enough is enough. I no longer understand how the government is willing to sacrifice millions of lives for a few thousand. You have two choices 1. Open everything back and maybe a thousand people die. 2. Keep everything closed and sacrifice millions of lives knowing starvation is a long slow painful death. Not to mention depression, foreclosures, etc etc. Reopen the state already! Respectfully, Laura Peacock
St. Johns	Recreation	Open up as much as possible. The data that is being used to make the decision to stay shut down is faulty and our economy is suffering. If you need to, do a random sampling of people across the state to see who has antibodies. I'm sure you will find many more people have actually had the virus and do the mortality rate is much less than you are assuming. Put restrictions or suggest restrictions for people who have a comirbid condition like diabetes or cancer or elderly. Everyone should assume their own risk.

AMERICAN OVERSIGHT

Broward	General	I really cannot believe DiSantis is even considering re-opening Florida. He needs to stop being a pansy for 45. It's disgusting tosee him acting like a puppet for 45 when there are lives at stake. People are dying at an alarming rate and the only advice they can give as they send us all back to work is to drink some disinfectant.Or, better yet....inject ourselves with it! We have an unhinged person running our country who knows nothing about government, and even less about it medicine. Can we not see that the main goal for 45 and all of his puppets, is not about the health crisis our country is suffering from, but the state of his financial affairs. Disgusting...just disgusting?!!
Miami-Dade	General	no creo sea apropiado aun abrir , en muchas ciudades los casos siguen en aumento . Tambien entiendo que otras coudades tienen pocos casos pero creo mas bien que debemos esperar un poco mas . Dios les de sabiduria .
Orange	General	Please open the state!
Lake	General	I think it's time to begin opening up the economy, at least in the parts of the state that don't have high numbers of cases and deaths. I don't think large events should be allowed yet, such as sports, concerts, or theme parks. However, situations in which social distancing is possible should be opened, like retail stores. This is no different than going to the grocery store. I think that testing should be increased, in order to determine the asymptomatic people and allow for contact tracing. I don't want more people to get sick or die, but people as rest really struggling financially. The stimulus money from the federal government isn't going to last very long, and the unemployment system is a mess. People need a way to safely earn income again.
Sarasota	General	NO - I feel it's to soon to Open the state to all businesses. We are still trying to get people to distance and wear a face mask. Opening up should be done slowly with limitations applied. I am just as anxious to get things to whatever the new normal holds. I would like to go back to my normal life, go out to eat, get back to work, take vacations etc. At the same time I don't want to be another statistic because we were so anxious to reopen.. We need far more testing available before any consideration.
Sarasota	Real Estate	I am completely for opening asap. Protect the elderly and the compromised and let everyone else get back to it. If someone doesnt feel safe returning to their job then an additional grace period should be given to protect there job. Just because an establishment is open doesnt mean you have to go into it.

AMERICAN OVERSIGHT

Miami-Dade	Technology	Floridians will die in record numbers if we don't let real science lead our decision making process. Asymptomatic carriers are a big threat and allowing people to believe the virus threat is behind us will backfire spectacularly with the a wave of infections. Our hospitals and medical staff need a break and can't be running near capacity on an ongoing basis. Businesses that require close contact such as restaurants, bars, salons, sporting events, concerts, etc.. cannot be allowed to reopen as normal. Restaurants should be able to sell food for take out and delivery as long as new internal protocols are put in place. Warehouses with low employee density can operate safely with thoughtful strategies. We need to keep up the same grocery store protocols: 100% mask requirements, sanitization practices, limit of people in the store at the time, partitions between cashiers and customers, marked 6' waiting line spacing. Please don't let special interest groups or political pressure override common sense. My wife has cancer and her treatment is already impacted by the rapid spread of Covid and the resulting stress on our medical system. Every person who gets sick needlessly takes up vital resources of other people in need of medical care.
Miami-Dade	Education	I think that florida should indeed open up because 99% of these kids are not doing online learning ....some of them are falling asleep at the computers...and others aren't doing it at all....i think its best to reopen schools to get these kids back to place of education the right way ....kids and college students are losing out on alot of activity and graduations they really have they hearts on walking on stages and being around their friends .....so i really think school should reopen

AMERICAN OVERSIGHT

Leon	General	OPEN the state!!!! And get unemployment completely paid to everyone that is due compensation. Take off the blinders and realize that staying closed will create a whole host of new crises. Homelessness for one, especially since ourUC rate is ridiculously low and short term - and of course the system is designed to not pay anything. Look at the number of corona virus cases, and then look at how many are unemployed. I saw elsewhere that for each death we have 600 people out of a job. Soon those people will be starving on the streets. Rioting, looting, etc. most of those people have also lost their health insurance. Soon they will run out of their prescriptions, and I'm sure some will die because of it. Suicide rates will rise. Domestic violence is already increasing - including child abuse. Seems like the "health advisors" can only see the virus and the deaths it could cause. Is one life more valuable than another?"! Do only the rich matter? The "essential workers"? The people who have been put out of their jobs should matter too. Their families should matter too. It seems that they have been mostly forgotten. They will soon start to die - and not of the virus. It's bad enough that you haven't cared enough to make sure they at least have their paltry $275 a week, but the Feds already gave FL the $600 per week they're supposed to be getting - and the state apparently doesn't want to pay that out either. When will these people start to matter? When you find their bodies in the street? When they are panhandling at your front door? Yes - there will be more lives lost to the virus, but that will happen no matter what you do. It isn't going away until we have "herd immunity " - which can only happen when enough people get the virus and develop natural immunity, or a vaccine or cure is developed. That could take years. Let people go back to work. People at higher risk can choose to stay home. We can all use common sense - like washing hands and avoiding sick people. But we cannot sustain what we're doing. It's not working anyway. And it won't unless we lock everyone up for a month or so with zero access outside their homes, other than to go to ge hospital it they're sick. Even that won't work long term. The virus is here to stay. Just like the flu. And testing is NOT the answer. Text negative today, catch the virus an hour later. We can't text everyone every day, so quit telling people we just need more testing. That's just $$ wasted. And hey,
Pinellas	General	Start opening with areas with lower records of infection. Counties with higher numbers go last. Also monitor and if people are ignoring the basic safety rules shut that county down for 30 days and have them work way back to opening. Without life there can be no business for anyone. Do like how have protected our young by keeping schools closed until fall.
Pinellas	General	I don't think the state should be reopened till we have a decrease of cases and deaths for at least 14 or more days. I also think that there needs to be testing available to everyone . I think that if we rush into everything reopening there will be more cases and deaths, and the healthcare system will be overrun.

AMERICAN OVERSIGHT

Collier	Recreation	I would like to see our parks, preserves, beaches, Zoos, public gardens, and other outdoor recreation locations open to the public. This will give us a wonderful sense of getting back to normal, relieve stress, and provide places to exercise, reflect, and relax. All of outdoor locations should have clear cleaning, distancing, crowd control, and visitor contact protocols to follow that will help their staff and visitors feel safe. They may need help with additional cleaning supplies, masks for staff, etc. I am also concerned about liability issues with volunteers who work with these organizations. Most volunteers fall into the 65+ age group. While an organization's staff must follow new rules and protocols, volunteers may be less attentive to new standards.
Miami-Dade	General	Thank you for the opportunity to comment. To summarize my position, I believe we are beyond the period of a reasonable shutdown in Miami Dade. Understanding the extraordinary circumstances, asking residents to remain at home for over 4 weeks is NOT consistent with our basic rights as citizens, nor is it the proper approach to balance Covid 19 with mental health, economic, and social damage caused by a shutdown. I understand the need for the initial shutdown in order to provide time to build hospital capacity and slow down infection rates. WE ARE THERE. We are well beyond the peak of new cases, have sufficient hospital capacity, and understand how basic social distancing can reduce spread. SO, at this point, just as it was the obligation of politicians to protect human life, it is now the obligation of our leaders to face the reality that Covid will not simply disappear. That means we should gradually re-open, in order to release our population from a home-bound confinement that is irreconcilable with basic liberties. To allow our doctors to serve their patients, who need heart procedures, MRIs, and physical therapy. To allow our children, who have been staring at school screens 5 hours a day, to go out side and get some air. To allow our small business owners, who provide so much of our employment and basic services, to open and save their life's work. We CAN do this in the context of effective safety measures, including masks, distance, gloves, and hand sanitizer. We CAN do this carefully while making sure we retain sufficient hospital capacity to care for the sick. In closing, I would ask our leaders to be mindful of the innumerable unintended consequences of this shutdown, which go beyond massive unemployment, interrupted educations, and the infringement of basic rights. It is not natural to keep millions of people in their home against their free will, and it is incumbent upon our leaders to exercise flexibility, creativity, and courage that it will require to restore our freedom.
Flagler	General	I am a hairstylist eager to get back to work but I also Need it safe enough for my sons daycare to reopen or else I wont Be able to go to work. My husband is an essential employee. We want the state to open, but safely. So please before making any choices consider if it’s safe enough. Do we think it is? No. But we only can be closed for so long.

AMERICAN OVERSIGHT

Hillsborough	Healthcare	Due to the lower number of positive Covid-19 cases and deaths in Florida, I believe it is time to start opening our economy back up and let citizens get back to work. The Florida Unemployment program is been a failure to hundreds of thousands of Florida residents and they need to be able to get back to work to feed their families and pay bills. I believe it would be good to still protect our vulnerable population - elderly and immune compromised - by advising those people to still shelter in place. However, the rest of the population should be able to slowly return to work and get our economy on the road to recovery.
Lee	Government	My job allows me to work from home, which has been amazing since my kids are not in school. When thinking of reopening, you should allow those workers that have been working from home successfully to continue. If their employer has no objection. Please take into consideration that you closed down schools and not all of us have the money for daycare. The goal should be to keep those that can work and function from home at home and only reopen the businesses that cannot afford remote work.
Orange	General	Please open everything back up.
Miami-Dade	Healthcare	I totally disagree that you open the places, because is your open the virus is going to spread further. Second the government do not you have taken fumigation measures to kill the virus. The test is only for person present síntomas. The health is more important than your blessed economy.
Clay	General	Dear Governor DeSantis and Task Force Members, I am writing to respectfully demand that you reopen Florida's economy when the stay-at-home order expires on 4/30/2020. The purpose of the order was to flatten the curve and the current data proves this has been achieved. Additionally, the evidence that is emerging daily supports that a significant percentage of Americans have likely already had and/or been exposed to the virus, many even before any of the shut downs. Furthermore, the evidence now points to a mortality rate that is equivalent to that of the flu, which does not warrant violation of our constitutional rights. As such, all businesses and beaches should be opened with restrictions only on those who are vulnerable or exhibiting symptoms, consistent with guidelines for seasonal influenza. As President Trump has said, the cure cannot be worse than the illness and at this point, it very much is worse. It has become apparent that those pushing for continued quarantines are interested only in a political agenda and not what's best for our country, our state, or our citizens. Thank you. Michelle Weigand
Pinellas	General	Do not reduce current restrictions until a full plan is in place that has been put together by doctors, public health experts, epidemiologists, and other health experts. There is no vaccine and no cure. Please invite a nonpartisan group together to also work on the economic future of the state. Talk with the Ag Commissioner. Find ways for Florida's PPE to not get intercepted. If we have no consistent PPE, safeguards, and accessible healthcare if we still get sick then we can not open in a manner that would be beneficial to the citizens of Florida.

AMERICAN OVERSIGHT

Pasco	General	The state should make policies regarding safety before reopening: Workers should have the ability to call off work if sick. Examples of policy would be that there needs to be an on-call staff member OR staffing service, for each shift that requires the business to function. Employees should not be forced to come in sick due to lack of coverage. There also needs to be a certain number of paid sick days by the employer, so the employee has an opportunity to get tested and return if cleared. There needs to be clear directives of when to call off work, such as a fever, a new cough or breathing problem that is not related to a prior medical condition, a household member or very close contact being diagnosed with Covid-19, etc. The government should provide an add-on to its state medicaid programs that allows for those who test positive to have 2 weeks of some type of pay to cover essential bills (with requests for extensions due to complications). Employers who have numerous employees with Covid-19 (a percent of some type) should have a way to apply for state assistance as well. We need to make it practical and economical to allow sick days. For schools and childcare facilities, kids need to be protected. When both parents work, kids are often pushed into school when sick. This isn't fair or right. If a child is sick, at least one household adult parent should have the same ability and responsibility to call out sick to care for their child/children. School nurses should have that contact info and ability to quarantine student and require physician note or 2 week health suspension with suggested isolation upon certain criteria. Childcare facilities should have the same. Elder-care facilities and special needs facilities and residential facilities should have the same except instead of a guardian, they should have a hospital that they can go to to await test results while in quarantine. Prisons should have an area dedicated to such an area as well.
Pinellas	Professional Services	Please let salons reopen
Brevard	General	There was not a choice for "bars" above in the areas of interest section. I am a local bar owner in melbourne, florida. I have owned my business Cheers 2 U Bar & Drive Thru Package since 2007. My plan was to put a manager in place to be able to take time off now that my husband and I are older and ready to retire. Unless we can re- open soon i am very concerned that with the current economy & so many people out of work, that my dream to retire from here on is not happening any time soon. I just feel that noone really thinks about bars and bar owners. we are a local bar and our customers are like family & friends. We would not do anything to put them in jeopardy. we have cleaned & disinfected every surface. I feel if restaurants can open back up and use social distancing, why can't we? If we have to be closed much longer i'm not sure we will survive. We will put out hand sanitizer & abude by all rules. i hope we can re- open soon. scary times for all.
Hillsborough	General	Florida should reopen not everyone stays home anyways If u take precautions every one will get through this but people need to get back to work already family's like mine need to work or we can't servive some family's haven't Even received unemployment yet or stimulus payment reopen florida now

AMERICAN OVERSIGHT

Broward	Healthcare	My concerns are mainly the spread and management of this virus. I manage an optometrist office 37 employees including doctors. My daughter works in the medical field also here in Broward. My mother has Pulmonary Hypertension, Diabetes, High Blood pressure and Heart disease. Everyday I discuss with patients why we are unable to schedule their routine eye exams, some understand but most really do not appreciate the danger of this situation for themselves, staff and our families. I don't see the cases dropping sharply, we are not ready to reopen at this time. More testing needs to be available, more knowledge about the people with antibodies. Please continue to help us stay safe.Dont give in to lobbying pressure to reopen South Florida too quickly! Thank you!
Santa Rosa	General	Please don't open the state too early. Projections from the Institute for Health Metrics and Evaluation state is will be safe to start the process in June. As a household with several immune compromised individuals, I beg you not to open our state.
Hernando	Government	Mr. Governor, I am a registered voter and part of a 7000 member group called Open Florida. We are asking you to step up and end this lock down now. We need to have our small businesses back open and our places of employment back functioning. You support us now and we will support you in the next election. Do the right thing. Lead from facts not fear. Responsibility Submitted , Thomas Curcio
Hillsborough	General	I think more testing needs to be done before this is considered. As a person who has been denied the opportunity to be tested several times, I don't think there's an accurate assessment of how many people are infected.
Seminole	General	Open now
Leon	Retail	I think we are opening too soon. If we can open non essential retail busks was I think we should still be closed and do curb side or online deliveries only. The malls should remained closed during phase 1 but we should still be able to go in our stores and do online orders and curbside pickups.. just until cases go down.
Sarasota	Administrative	I noticed that the Re-open Florida task force does not have (m)any healthcare/medical people on it. This is an administrative mistake and will not lead to a good product if we are trying to reopen businesses in a safe and prudent manner. If you to to restart the economy safely you must have the input of the healthcare providers and the business community.
Polk	General	Why cut the parachute when we are still in the air? Our class numbers per day are still climbing so opening everything will result in more deaths and closing again. Just dumb to even ask.

AMERICAN OVERSIGHT

Orange	Tourism	I have been in 2-3 Publix groceries this past week. No one wants this state opened up! Those of us that work in essential jobs are extremely concerned about this PANDEMIC. The loss of a job is a huge concern of course for the millions across the country that are suddenly unemployed, through no fault of their own. These Publix employees thanked me for wearing a mask. Then they all offered their own opinion and concern for their safety, unsolicited. Plz don't open up this state! The numbers are still climbing!!
Lee	Real Estate	As a senior citizen and a part time realtor, I am well aware of the need to open the economy. The news media is not factual and I don't believe all the information is accurate regarding the virus. Business needs to open safely asap before it is too late for economic recovery. We can do more testing, for the virus and for antibodies, use distancing, and common sense.
Volusia	Professional Services	Need to be able to work , appliance repair and home services. No PPP funds , lost all my employees , no stimulus check. , need to generate any kind of funds to stay open !
Lee	Transportation	Please reopen our state as many people's lives depend on providing gor themselves and their family's. While this virus is a serious issue. I believe the economic impacts are far more serious.
Hernando	Healthcare	The state is not ready to open. I personally work on healthcare and the cases and deaths keep growing. It is too soon to open
Bay	Accommodation	Please re-open short-term rentals. We're dependent on this industry on the Emerald Coast.
Pinellas	General	I believe all businesses should open following social distancing. Make should be optional. People at risk always have the option to stay home.
Pasco	Government	I don't think it's time to open Florida state yet there is 2 waves of this pandemic. We should not rush into this
Broward	Healthcare	I will listen to the Health expert/scientist as to when businesses should re-open. I do believe doctors should do elective surgeries again because the spread is under control and we will not need all the hospital rooms and PPE. Thank you.
St. Johns	Professional Services	Please start to reopen. I stil haven't gotten unemployment of any kind (filed March 15) and haven't gotten stimulus check yet. I need to go back to work!
Alachua	General	Please re-open in areas that have declining percentages. Alachua county has declining cases for over 2 weeks. The only spikes have been in nursing homes. Opening up outdoor dining, nail/hair salons, childcare/summer camp programs so we can begin the path back to normalcy. Being quarantined at home while our county averages 4 new cases a day seems too restrictive. Mental health of citizens is equivalent to physical health and long term restrictive stay at home orders should be limited to high risk areas.

AMERICAN OVERSIGHT

Collier	Healthcare	Do not open up quickly. Watch the other idiots opening too quickly. Don't open up to make up for your epic failure re unemployment. Fix the system and pay people. If you blow it, no one will come here next year and you can kiss that revenue, and your job, goodbye. When you open, enforcement is key. Numbers go up, don't ignore it like you did this year. Stop playing catch up. Be smart for once. Have little faith in FL gov ability to handle this carefully and based on science. Ignore what that idiot Trump and protesters say - they are clearly fools. Inject disinfectant! How irresponsible and dangerous. He is not anyone to model, as you have throughout. It's clearly becoming a losing proposition. Be your own man. Do not forget us older and less healthy people. We need to stay at home through all phases (if you even have the sense to follow the guidelines) and need protection like telehealth to protect us from going to medical buildings full of possible disease when we don't need to. Have a real plan. Stop endangering the people of FL. No one I know - even Trumpers - feel confident in FL gov. That says a lot from deep red Collier.
Polk	General	On the topic of reopening Florida I think a lesson needs to be taken out of our history books, we all studied history some more than others but what we do know is when the Spanish flu hit cities and states were also shut down, what happened to the ones who reopened to soon is that their second wave of the virus was worse than the first yet for the people who remained with a strict lockdown policy either didn't have a second wave or a very mild form. I as a hairstylist in the state and with my job I can not follow the 6ft guidance while dealing with clients. As much as I desperately need to get back to work since the unemployment system is such a failure I don't want to be forced to go back while it isn't safe and deal with the issues already coming out of Georgia when it comes to liability. Thank you for your time
Lee	General	Agressive testing, contact tracing, and containment is necessary to prevent a resurgence in new cases. We will not be leaving our home to resume normal consumer behavior until Florida contains this virus, even if that means 2 years.
St. Johns	Construction	We did our part, we flattened the curve. Unless you lied to us, time to open up!
Hillsborough	Education	Please listen to the Scientist. This isn't about Right or Left. Just saving lives. If the scientists say "Stay closed".....then please listen.
Sarasota	General	I believe schools, beaches , movie theater, chucks cheese, bowling ally's , churches etc should remained closed because of large gatherings. If other small businesses open there should be restrictions such as,; must wear mask and hand sanitizer should be available upon entering. Restaurants should remain as our take-out only.
Osceola	Technology	Do not fully re-open business in Florida. Wait until new cases have dropped for several consecutive weeks. When we do re-open, do it in phases with significant precautions against large gatherings. Seek the advice of qualified experts in pandemic response above the advice of business leaders and politicians.

AMERICAN OVERSIGHT

Indian River	General	I don't feel like we have waited long enough yet. I understand we all need to get back to work and get the economy up and running but I feel our health is more important. We will all eventually get back to a new normal, but I think a few more weeks would be a smarter choice.
Polk	General	I believe we should open the state up to save our economy and people's lives. I also believe we should wear a mask until this virus is under control.
Broward	Government	Dear Governor, Do not reopen Florida until the proper amount of testing has been put in place, the contact tracers have been put in place to track the virus course, and the infections are stable and in a downward trend. Please do not fall for the false choice of the economy over life. If you are in the so called 'party of life' then the choice should be life. Please make decision based on the science and the health experts. If a disastrous second wave of virus hits, then there will be no economy to save. Let's get if right the first time. Best regards,
Leon	Food	I honestly feel that it is far too soon to attempt to reopen the state. Health officials suggest that we have not fully hit our peak, we don't meet the CDC requirements for number of cases in a two-week period and reopening the state prematurely will force those most vulnerable to choose between returning to a job that might not be safe and keeping that job. I think that mirroring Governor Kemp and the state of Georgia is a very bad move for the state of Florida. I am a small business owner, of a food service establishment that greatly depends on the economy getting back to "normal" and I would rather suffer the hardship of no income for my business than risk my community getting devastatingly sick with this horrible virus.
Duval	General	Please wait until numbers stop growing this fast and until more testing is available. Please do not place economy on top of health, $$$ on top of human lives. A fast re-opening will bring the numbers back up...and remember those numbers are human beings... they could be your relatives
Brevard	Professional Services	Hair salons: could open if there are only a few in the shop at a time. Employee and customer can both wear masks. When coloring hair, gloves are worn by the hairdresser. Hair is washed in warm water and shampoo. Nail salons: technicians routinely wear masks; clients can wear masks. Hands are washed before polish application. Limit number of persons in the shop. Nail equipment is sterilized routinely.
Orange	General	Please open the gyms up
Orange	Finance	Please open everything back up.
Orange	Tourism	While we are getting there we aren't there yet. Why risk everyone early and have to do this all over again just cause people are getting stir crazy. Let's do things right and listen to health officials and not people who are home who sick of staying there.

AMERICAN OVERSIGHT

Broward	General	Regarding the opening of the economy, the state of Florida should not wait and see what other states due but rather, they should advise the knowledge and recommendations of scientists, researchers, doctors, and the first responders. This is not a situation in which the Florida government should make on their own. Please listen to the guidance of those in the medical field as well as those in the scientific community who understand the situation on a more scientific level who can predict how safe it will be to begin opening up our state.
Miami-Dade	General	Please donstatewide testing before opening the state. I have a 62 year old mom and we live with her. My husband works at Aventura Mall and I am scared that we may unknowingly give her the virus if the mall should open. We lost our dad to cancer in December; we do not want to lose our mom. Thank you.
Miami-Dade	General	We should NOT re-open any public venues until we have increased testing by 300%, increased PPE and ventilator inventory (already in hospitals) by 200%, and have plans of treatment approved and ready to initiate (plasma/anti-body treatment and/or stem cell therapy). Miami Dade County (with more than 10,000 infections) should be a lesson for the entire state of Florida. In the middle of a pandemic we allowed public events to move forward,(such as Miami International Boat Show, Festival of Lights, etc.) despite the warnings and potential danger. Granted the information received from the White House Administration was faulty (if not misleading), but we now see how dangerous Covid 19 is and can be for everyone. Do not relax your guard or there will be a resurgence in late Summer or early Fall 2020 - and if this occurs any excuses or apologies given will fall on deaf ears. The protestors seeking an early re-opening, brandishing military weapons in a public setting, must NOT be allowed to bully the government into making a wrong decision.
Leon	General	First I think it's odd that you have no drop down to comment on public safety. I hope that this task force understands that the lives of Floridians should be more important than their jobs. More Americans have now died from COVID-19 than in the Vietnam War. Our leadership needs to listen to medical leaders now not business leaders. Banks should be giving the unemployed a grace period on their payments not expecting them in 3 months all at once; tack them on at the end of the loan period. This will help to stabilize our economy in Florida. Show leadership and stop having everyone laugh at the state.
Broward	Professional Services	Business needs to reopen with responsible limits. Law offices and other professionals offices should be open. Retail should open with responsible limits. Even schools should reopen perhaps with stagard schedules. We need to plan as if this will continue for at least a year and figure out ways to conduct our daily life activities.

AMERICAN OVERSIGHT

Orange	Tourism	Tourism is essential, not just in Florida but the entire world. We must be brave enough to understand we cannot eliminate death. The top 10 causes of death in Fl claim over 200,000 each year. So we must understand death and disease is a part of life. Open FL and those who are high risk or choose to stay home can and should. Personal hygiene is the best step against the virus, so allow businesses or theme parks to open with handwashing or sanitizing stations. Allow the individual to decide whether to participate in activities. Government should not make decisions for businesses but rather provide information and let them decide.
Seminole	General	It isn't safe to reopen Florida at the time. The population has barely enforced the 6 feet rule and masks are not worn by the major population. Workers going back to work are being forced to put money over their own and families safety. Masks when outside and 6 ft distance has to be enforced. Rent and other bills that people are not able to pay at the time should be not be forloughed but instead forgivin.
Palm Beach	Recreation	Hello, I live in boca raton, I feel the beaches need to reopen like the rest of the states beaches. If we can run on the sidewalk, let us run on the beach. We'll keep our social distancing, for our sanity, please open the beaches. Cheyne cottrell
Seminole	Tourism	The State needs to reopen as soon as possible. We should not be killing the economy and everything that we have gained to slow the spread any more. We have done a good job at mitigation but now comes the time to reopen and bring back what makes Florida great, our tourism industry! We should not be loosing everything we have in order to hope that we slow this virus down. We can not stay closed forever, there is simply not enough money to support everyone. The lock down is now getting rediculous and needs to end so we can get back to our lives.
Hillsborough	Professional Services	This is a comment regarding private hair salon suites. As a licensed cosmetologist we already abide by the Industry health, sanitation, and safety requirements on a regular basis, with the viral pandemic those standards will definitely become elevated. I work in a private salon suite with no more than 2 clients at at time when I can easily work on one at a time if required to do so moving forward. Adding additional time in between clients for extra cleaning and Sanitation is also completely doable. All combs and tools are either sprayed with disinfectant spray or submerged in wet sanitizer (Barbacide), capes and towels are laundered regularly after one use, chairs, handles, and surfaces are wiped down with disinfectant wipes, soap and tissues are available for clients, and gloves are worn for every on contact service provided. I understand with my profession that I cannot maintain the 6 foot social distancing rule but I feel with my industry standards and even with added reasonable requirements such as providers wearing masks, we can provide a safe and healthy working environment for our clients. Please consider opening private salon suites sooner than later.

AMERICAN OVERSIGHT

Hillsborough	Education	I would like the state to move forward slowly (months) First continue with the task force which I do feel should have an ad hoc committee of medical and psychiatric doctors with a weighted say in the decision making. This committee work should take a month or longer to plan a move to open. I do think caution is important. It is working now because we are social distancing and staying at home. Until a vaccine is available and/or a drug to cure I feel we should move slowly back to a new normal. Please follow the medical experts. You see people out protesting to move quickly but remember a greater majority of us you cannot see or hear because we are staying at home and trying to our best to flatten the curve and allow testing to get more available and accurate and medical knowledge to catch up
Lake	General	I say the state should reopen as soon as possible with the current guidelines in place. It is especially important to get Disney and Universal back open, as once those giant employers are back up and running, the rest of the dominoes will fall in a very good way. Rather than "stay six feet apart", I think it would be better to have mandatory temperature checks at entrances to parks and big stores -- those who have fevers, no admittance. This will be a much more easy to enforce action to take as opposed to constantly trying to make sure folks are six feet apart, something that's even impossible to do in the local Publix. Bottom line, we all know what is working and what is not working with COVID-19. We are all conscious of it now. Instead of masks and six-feet apart -- which not everyone has the same tools for and is too difficult to enforce -- have mandatory temperature checks similar to mandatory security checks at the parks and airports. You have a fever, you go home, plain and simple. I realize this is not a cure-all and some will object, but I think at this point we have to get up and running. In February and March we did not understand. It's April, and everyone gets what needs to be done now. Thank you.
Broward	Government	We are all concerned about the economy. Mostly I am concerned about human lives at stake. We can use the federal funds to help feed people until it is been deemed safe by the health professionals. Take your time and get the proper tools and tests we need to move forward. My son's gf is a nurse treating patients without proper PPE. Lets save people in order for the economy to matter...from a Floridian of 48 years. Thank you

AMERICAN OVERSIGHT

Hillsborough	General	I don't think this should be a priority to be opening any places. I think the focus should be in helping those with the virus and helping with getting your people the people who voted for you some money. Some places should remain close to stop the spread of the virus. People should understand how bad this virus is because it mutate.maybe I think you governor senator etc have not had a close family member die from this virus. Maybe if a close member of your family does maybe you would understand how important is to help keep the people your people at home and get them benefits to pay their bills and get food so so many of your people your voters won't be dieing. Right now opening Florida should not be an issue or in your thoughts. The well being of your people your voters the ones that helped put you and your family where you are nice and comfortable, they should be your priority. Get them working unemployment website and get them their money benefit fast. We American citizen should be all in this together but we American tax payer citizen are not. Again think about your people the voters. This virus mutate if things are opening and people are out there more then usual guess what will continue to happen...your people the American tax payer citizens who helped you live in a comfrey home which your family does not need to be worried about when that check is coming or when will a unemployment website will be update or even a federal check will come in....we the American will suffer more more. So again rethink your priority. Focus on what really matters. Help us stay at home help us pay our bills and food. Help pass the no rent or mortgage bill for up to 6 months untill all this is under control that way we can stay home stay safe and help prevent the spread of this deadly virus..I do have family member who have dies from this and the worse is you can not even visit them all you get is their ashes.god help you and all of us. Use your heads. That's why we voted for you governor
Pasco	General	You have to think about everyone not just a handful of people at the end of the day people are going to get it and that's it you can't keep us locked in our houses is becoming completely ridiculous open app people need to get back to work people need to get out of their houses you are causing severe amount a mental illnesses and mental distress that's going to start with people committing suicide and they're going to have a high rate of suicide because of this just start opening stuff up you can social distance going to a movie theater you could social distance going to a bowling alley just open stuff up

AMERICAN OVERSIGHT

Charlotte	Food	I work at a golf course as a beverage cart attendant and a server. I have been unemployed there since March 21. I applied for unemployment shortly after and my application is still pending. I am hesitant to go back to work yet. I personally think it's too soon. If my employer asks me to come back I don't feel like I have any choice but to do so. In my area our season has ended prematurely. Summers are difficult in this business. Add to that the fact that many people are short on money and some are hesitant to go out even if you give the ok. If I go back to work I'm afraid that I will be making next to nothing. Most of my income is tips. So essentially I feel like I'm putting myself and others at risk for very little return. Also I am concerned that if you open the state too early it would be very difficult to shut it back down again if it's determined that it was a mistake. I think that would be worse than erring on the side of caution. If my employer had to shut back down again I would have to start the unemployment process all over again which would be a nightmare. I would like you to wait a little longer but whatever you decide I wish you would give us an answer one wY or the other soon. It's hard living with the uncertainty and not being able to plan for the next couple of weeks.
Volusia	Tourism	I agree with the plan to open tourism to residents first. Open by June 1st
Orange	Healthcare	I work as a massage therapist. Opening the state now would not do any good except higher cases. Everybody wants the state to open,but fail to realize that things will not be back to normal for a few years. You can just go places like you wanted to before. Dont open the state because people want you too,do it when its right.
Lake	General	The state of Florida has come no where near hospital capacity through the entirety of this farce. Meanwhile, unemployment has been slow to meet the demand of Floridians forced out of work, and families are hemorrhaging funds and some are going hungry. Open the state, let us go back to work, save the money on UI which the state cannot, in reality, afford, and salvage the economy that was doing so well before the government succumbed to panic.
Broward	General	NO, I do not think that is is the correct time just yet to re-open the State of Florida to business interests of any kind particularly at the expense of everyday citizen. We have come a long way, with just a little still way to go ..... why in heavens name chance a a potential escalation if the present timing is later found to have been wrong. This is not a crap-shoot ..... timing is everything ..... and then we all must live with the consequences ....
Broward	Education	People that want to get back to work should be able to do so. I think you should open up north Florida and work your way down. I think Orlando and up should start to see businesses back open. Restaurants and bars that have outside patios and restrict the amount of people in each establishment. There have been more suicide deaths because of depression from not working then the coronavirus deaths.
Polk	Education	I am a teacher about to move to S Florida and begin a new job for upcoming school year. Does Governor Disantis see reopening school in August as a strong possibility?

AMERICAN OVERSIGHT

Brevard	Healthcare	We need our hospitals and outpatient clinics running at sustainable capacities. PSA's from health officials on the use of masks, gloves (not wearing them to touch everything), and hygiene will go a long way in keeping everybody safe and increasing public trust in the measures. There are clear misconceptions of how viruses spread and what protective measures work versus what protective measures can exacerbate the problem or provide a dangerous sense of confidence. Antibody testing for healthcare providers needs to be readily available and mandated. I've noticed many grocery stores having self-service food where patrons can touch the utensils without them being cleaned between uses. These buffet-style areas must be serviced by a worker or shut down. Condiment stations/trays and menus at restaurants need to be disinfected thoroughly between patrons or switched to disposable methods. Door handles and bathroom sinks in facilities need to have disinfectant wipes, alcohol gel, or another way of sanitizing or avoiding use of the handles. Thank you, Alex Barabas MD
Volusia	Healthcare	DO NOT REOPEN! It's not yet safe. We have been doing a good job of staying home, please continue until we have enough tests or a vaccine in place. If you have to open, please do it slowly. I know I won't be going out unnecessarily. Hopefully other Floridians will do the same. Please social distance, wash your hands, and don't drink bleach!
Pinellas	Management	I would like to see the state opening up May 1, Beauty and Barber shops, Beaches, using Jacksonville as a model for beaches, shops and stores and shopping centers, limiting the number of shoppers at a time and limiting hours they are allowed to be open , we all know what this virus does to us if we catch it and are capable of making out own decisions as to how best to get on with our lives to avoid it as best we can. Schools should be opened in late August, allowing parents to make decisions if their children should attend or be home schooled. Churches should be opened and people allowed to attend but in small numbers and using the distancing rules we now are used to. Neighborhood pools should be allowed to open for small numbers and distancing rules should apply. We all understand how this virus affects us and none of us want to catch it or spread it but we have to be able to continue to live our lives, doing whats necessary .
Polk	General	It is too soon to fully reopen. The reduction in cases shows social distancing is working. Should Florida reopen, it should occur in stages and all businesses that are open to the public should be mandated to reduce capacity. Those who are able to continue telecommuting should do so. Florida needs to evaluate how many parents will be able to return to work with the amount of daycares and summer programs that are closed. The state needs to make sure all businesses that reopen have reasonable access to PPE for their employees and it must be enforced. Florida will also need to increase availability for testing and we need faster turn around times for results.

AMERICAN OVERSIGHT

Lee	Tourism	As a fishing guide in southwest Florida I've learned to deal with adversity from day one,.There have been oil spills,hurricanes and a red tide event but nothing can compare to the economic damage caused by the closing of our state with this occurring during peak tourist season when we make most of our income.I understand that some believe it was necessary to prevent major loss of life but unfortunately I believe the economic damage will be far greater due to the timing.So now we are at a point where it is time to move forward with the re opening of our state,not everyone will agree with this but if we are to begin the road to recovery it needs to start now.I agree with your idea on promoting tourism within the state,it has to begin within,we need to start with our parks and beaches,not opening just a few but all preventing overloads in certain areas.Also needed is advertising to promote tourism within our state.We need to get people back to work at restaurants,hotels and other attractions starting small and working our way back to a healthy economic situation.After the BP oil spill the state had a tremendous advertising campaign that brought money back into the state when most thought it would take years.We spend billions a year on summer vacations with our families and if we could advertise the many activities in our state outside of large theme parks we could create an economic impact in the immediate future instead of years from now.As early as June we could see the beginning of economic activity in our communities and although not what we see during a good year it would be a good start. Captain Michael Avinon
Marion	General	We have had zero cases in our zip code. Would like to see all hair salons, nail salons, restaurants, vets, dog groomers, etc.vopen using social distancing. Have all workers' wearing face masks & gloves & limit occupancy to 10 or less. All patrons to wear face masks & gloves where possible. Let 55+ communities open clubhouses, restaurants & pools to members where they have had zero cases. Again use social distancing, mask & gloves where appropriate.
Orange	Recreation	I don't think places like Walt Disney World, Universal Studios, and the outlet malls should be reopened until late summer/early fall at the earliest. These places see an incredibly high amount of international tourists and could easily be the cause of a second wave of the pandemic. I also don't think businesses should reopen when the state's stay-at-home order expires on April 30th. I believe this is too soon and could very likely undo all of our efforts and sacrifices made to slow the spread.

AMERICAN OVERSIGHT

Marion	General	Sir, I request that you absolutely take your time and at the very least follow the White House guidelines for re-opening. Please be aware that around the world where areas opened too early, there has been a 2nd wave of COVID-19. As an active senior in the OTOW community, my neighbors are all at risk, as am I. It is the responsible thing to wait until there is more statewide testing available, as this disease is invisible. I cannot go to a store or a restaurant for a long time, as I am vulnerable. Everytime my husband goes to the store, I worry that either or both of us will get sick. If I get sick, I will probably die, due to pre-exsisting conditions. I am most content to wait longer and to see the curve flatten a lot in Marion County and in FL. Our state is all connected and if we don't feed the virus, it WILL die. SO please BE SLOW, BE WISE, KEEP US SAFE, since we have no way of knowing who can pass the infection along to us. Gov. Kemp was wrong and I bet he will see a resurgance of the virus. Let's be smart in FL and WAIT, WAIT, WAIT to very slowly open, erring on the side of caution to keep Floridians well. Many thanks, stay well.

AMERICAN OVERSIGHT

Miami-Dade	General	I can't believe that the government has to ask the people if they agree to open the state when the scientifics are saying that is we open the state is going to be 10 times worse than now.I seriously can not believe what am seeing and listening "A Governor asking the people who don't know anything about Medicine if they think if we can open the state when the numbers are increasing day by day,so he do not listen the scientifics which are the ones who knows about it ".And in the other side we have a President that is recommended to applied injections with desinfectan (the doctor was sitting in front of him was looking at him very scary).I ask myself "are these politicians serious ",if anything happens to my family,specially my 3 kids some one of these people are going to be guilty for that and for sure is going to be accused for murder.They just care the money,not the people.God bless America and save our lifes cause we can not count on the government.This is really disgusting.Gobernor if you want open the state and I sure you that is less than a week millions are going to be infected and millions are going todie and you are going to be the responsable for that.Remember that the President clean his hands like Poncio Pilatus and put the responsibility on the Governors because he knows what is going to happens and then he will put the finger in all of you guys.Be smart do not open till the scientifics give you the green light because they are the ones who really know what is going on.The CORONAVIRUS have not friends.I really ask you from the bottom of my heart "DO NOT OPEN THE STATE" or thousands of Americans are going to die for your mistakes.GOD BLESS AMERICA FOREVER.I hope that you take the right decision if not you will not be in peace with yourself the rest of your life.You have kids like me,seat and think in our people and our country.Is not enough money in the world that can pay for a human life.I expect that God be with you and make you take the correct decisions,Thank you very much,we will see you in the next elections.
Pasco	General	Please use science and not politics when making decisions that affect all Floridians.
Charlotte	General	Please do not open the state too soon. Until you have definitive proof that the cases are on the down swing, you're putting lives at risk. Once you open too early, you'll start at the beginning again. Plus, you're inviting tourists to Florida who will bring more citrus with them. And Governor, you seem to forget SWFL. You've been to a lot of places, but not here. We vote too. Don't forget that.
Pinellas	Food	Hello, great idea on this web site. My biggest concern would front line workers in the food and beverage industry (waiters, waitress, cooks, bar tenders, etc). Pleases implement mandatory face masks (at the owners expense) until we find a cure or vaccine for the corona, virus. If we want to see this industry (restaurants, Bars, etc) to thrive again, this in my option is a no brainier. Really appreciate the chance to voice my option. Again thank you for letting us give our input. Brett Yeates (Pinellas Native)

AMERICAN OVERSIGHT

Hillsborough	Retail	I own a small clothing boutique .. it will be great if small business like mine could open soon with all sanitation precautions and only one customer at a time ... Germany is opening small business that are about 800 sq ft . In my case I just opened before all this virus happened and I can't afford to be paying rent with no customers .. Also online sales are more difficult now because we are competing with more aggressive big stores that also have the physical stores closed ... I know that the local people would like to shop and support ...
Santa Rosa	Recreation	It has been a very difficult time for me. I'm sure it has been a more difficult time for my fellow Floridians in South Florkda where I was born and raised. I currently work in public transit in Santa Rosa County. Trust me when I say it has become a very stressful job. What I will say is there is no such thing as social distancing on on bus no matter how much you regulate the number of passengers which very few wear facial coverings. In our count the number of cases are low. And when you subtract the numbers in the Blackwater Prison and the folks in long term care facilities the number amongst the local populace is below 100. I am a retired veteran and a member and officer of our American Legion Post. What I ask you to consider when reopening our county is you consider those who visit veterans posts on a regular basis. Veterans posts consider themselves to be family. And for some of us it is our only opportunity to interact with others. I understand that we may be considered a bar where social distancing may be difficult. I will again say we are family and some of us need that regular interaction amongst others veterans to maintain our mental health. I know for a fact that members of my post who are concerned about social distancing in a facility such as ours will stay away as they see needed. I ask you to make special considerations for veterans post when you look at reopening bars. We are so much more than just a bar. Some of us including me rely on being able to interact with other veterans. Thank you for your time and consideration.
Orange	General	DO NOT OPEN FLORIDA YET! The number of US cases is almost at 1 million and the number of Florida cases has increased. It has not plateaud for a significant consecutive amount of days. Spiking sporadically. Living your life how you want is not more important than others having a life at all.
Brevard	Healthcare	We, as dental professionals (especially dental hygienists) , should not and cannot work as long as Covid19 is still prevalent. We create aerosols that linger in the air and will put us and our patients at risk. We have no standard of care set and are unable to purchase PPE. Please consider extending the date of dental opening until those two things are in place - a standard of care and proper PPE. THANK YOU!

AMERICAN OVERSIGHT

Lee	General	We need to reopen for peoples mental health. The kids have lost a lot and miss friends and sports. Most that want to stay closed are collecting more money on unemployment than those of us who are essential workers. We bust our butt everyday just so everyone else can degrade us and say stay home. We need to get back to nature. Limit visitors coming in still but we need outlets. Let small businesses open and maybe big business 50% or 75% dine in with limited hours. You've done a great job. Since everyone received their checks they are all out in the stores now. I delivery groceries in addition to my full time job and I've seen all the people now going out. Please reopen with limited visitors. Kids need their graduations. Our school superintendent even changed the kids from block schedules to 7 period days until we fought him on it.he did this during a pandemic because no one was paying attention. He said he will postpone for a year and take some input but it will happen. These are the things that happen when no one is looking.
Miami-Dade	General	First - The task force must be reconstituted to include workers, consumer rights people, unions, first responders, doctors and epidemiologists. It should also be bipartisan. There is no such think as non partisan or non political in any of this, so let's be transparent and include democrats in the task force. Second - Pay people their checks ASAP, expand unemployment to include more workers, and increase the amount paid and the number of weeks. Third - DO NOT OPEN YET. Wait until the curve has reversed, cases are consistently diminishing and test is widely available. Fourth - Offer full transparency about the response, with documentation, to any independent investigative effort, by the media, the legislature or the public. FULL TRANSPARENCY Very Important: There are millions of Floridians ready to fight with all our strength and conviction to hold the governor accountable for any preventable death.
Franklin	General	We need our restaurants opened this is our way of making a living for our families.I have been laid off since all this started I have just about begged for help and got nothing.Hell no unemployment no stimulas.On top of all that no school so my little 385in food stamps don't last long.I have my 11year old son Ryan Langley that lives with me and 6 grandkids.This has definitely been hard on all of us.Please we just want our lives back.
Leon	General	Please follow the recommendations of scientists. Until we've had two weeks of dropping cases with WIDESPREAD testing (well beyond our current testing numbers) and everyone wearing masks, please don't open the state. While we all *want* things to open up, we want to do it smartly and not invalidate all the work we've already done by staying home. Don't cause a huge jump in cases by opening too quickly and without appropriate steps in place. A smart opening process that follows the steps outlined by scientists is best for Florida. Don't be short-sighted please.

AMERICAN OVERSIGHT

Orange	Finance	Every single person in the Florida state government (reps, Senators and Governor alike) should be spending 100% of their time awake getting the unemployed paid. Love DeSantis, but this is a disastrous fail.
Sarasota	General	If we're not going to be able to pay timely unemployment to our citizens, then we need to allow them to get back to work. Open with recommendations on how to practice safe day-to-day activities. A failure of our state government to assist with timely unemployment shouldn't be met with another failure in disallowing those impacted to responsibly get back to work. Georgia is in the same situation as Florida (inability to process timely unemployment checks) and have found a way to get willing citizens back into the workforce.
Lee	General	Enough sheltering in place - Please RE-OPEN Florida!
Broward	General	I believe large free standing stores could open BUT follow guidelines that are proven. Stores like Home Depot have door monitors that allow only a few people at a time controlled by the exit of people from store. This model Is in practice at target ,wal mart . I think this model could be put into play at stores like Dicks Sports, Best Buy, even tj max or Ross Again free standing stores only no malls etc.And stores would require a door monitor and all shoppers have face coverings and The number of shoppers would be limited to square footage of shopping area of store. This is following the plan in place for large stores that are open now Thanks
Collier	General	According to the CDC website, 80% of Covid-19 deaths occur with people 65 and older and another 18% occur with those aged from 55 to 64. I propose that businesses be allowed to open since most of the workers are not at significant risk of dying. Measures could still be put in place for the working population such as working from home, social distancing, re-design of the workplace, etc. Those 65 and older, who do not need to work, can continue to stay-at-home as much as possible and take precautions when going out for food shopping, etc. This approach would allow our economy to re-start while substantially reducing the risk of people dying. Over the course of time it is hoped that herd immunity would occur and/or antiviral drugs and vaccines could be developed. This approach should also not increase the load on our front line workers and facilities.

AMERICAN OVERSIGHT

Duval	General	I think this lock down has been long enough we should open things slowly starting May 1. I need work and its been 6 weeks and no unemployment money coming in yet as i have been completely let go from my job. This Florida unemployment has been a joke and caused me a lot of stress and crying. Beaches should be open all day with groups of 4 people only and 6 ft apart. Hairdressers and barbers should open May 5 gyms should be last as they are dirty and people do not always clean up after each other. Small business should open then as well allowing only a few people in at a time with social distancing.
Volusia	Finance	Time to re-open and unlock Florida. Some guidelines for social distancing are fine. We have been operating as an essential business and our clients and visitors all have been sensible as to social distancing. All have been understanding and considerate of others.
Broward	Healthcare	Please do not be foolish enough to open all businesses. Parks would be ok if the number of people permitted into the park would be restricted. And any business that is opened must be able to practice social distancing AND must they enforce it or face serious consequences including, but not limited to, closure for at least 60 days
Miami-Dade	General	My hope is that we can open beaches and other recreational places while still having social distancing rules in order if possible. I think this should happen first because the outdoors are not an enclosed space.
Walton	General	Proceed with caution! Relatively few cases in northwest Florida, but it could change quickly if millions of tourist flood the area from hot spots. Initial openings must be very conservative.
Seminole	General	Re-open Florida... God gave us the ability to develop antibodies to these things. We have the RIGHT to make our own decisions for our own selves and families as to when and where we will re-emerge into the public places.
Miami-Dade	Healthcare	Dental offices need to open. Dental care can not be closed. Many emergencies happen because of dentists closed. Please open Dental offices soon
Volusia	General	Please open our community. Citizens are suffering with business closures, unemployment and face tremendous losses. The models have all been incorrect and we as a society cannot survive. Place resources to help vulnerable population and monitor emergency room and doctors office reports to manage conditions. We loose 200,000 people to car accidents annually do we stop driving? We closed our economy and endured significant economic injury to eliminate overrunning our hospitals and reduce death. What were the projections? What were our goals? We met and exceeded these goals! Our society is at risk of socialism with government control of our movement, ability to earn income, withholding much needed loans, stimulus, unemployment and more. We are not a socialist society...yet. Democrats actions of suppression are about making the election for more government control and we are suffering.
Duval	Management	I believe hair salons can be reopened safely by having people wear masks, having 6 ft between chairs, sanitizing everything. I have never felt as safe as I did at my salon in early April before it closed. And, these people can not work from home. In the

AMERICAN OVERSIGHT

Pinellas	General	No to early to open. If comes back because we opened to early it will be catastrophic for the economy.
Hillsborough	General	Open outdoor areas like beach walking, zoo, parks for trails & play area for kids, fishing, boating. Mandate everyone wears masks, gloves or sanitizer & 6' distancing or not allowed in the areas.. We need something to do with kids. Hair salons. 1 customer at a time. Mandatory face masks & gloves, disposable capes. Chair & equipment must be sanitized between customers. Open drive in movies and food orders brought to car or bring own snacks. Restaurants with outside dining patios. They said humidity & heat kills virus outdoors in a minute. Well we are in high humidity rainy season & hot out. We need to get this economy going and things to do with families to prevent bigger problems. Also elective surgeries & oven dental offices again limit patients & all staff must wear masks & gloves & sanitizer chairs. I need some dental work done fillings & crown that can't wait much longer. Please
Palm Beach	General	To whom it may concern at the re-open Florida task force, I am a resident of South Florida for over 15 years, I and my family ask that you only re-open up Florida in a safe, scientific manner during this extremely dangerous contagious COVID-19 pandemic. My entire family, which includes four generations, all live, work and have flourished in South Florida for over 40 years. Being a Registered Nurse and an intricate part of our South Florida community, I am very well aware that everyone wants to return as soon as possible to be an active part of their past daily lives. Whether it be going back to work, school, attending a gym, playing in the parks or at the beaches there are different Life altering risks now. Together, collectively we can smartly be re-introduced back to our south Florida lifestyles with carefully thought out actions & plans to enhance our safety and well being. Very truly yours, Karen

AMERICAN OVERSIGHT

Miami-Dade	Construction	As a small business owner My input is to reduce the long-term economic effects closing longer will have on local economy. In order for PPP to work, the city must open retail so consumers can spend. They would also need to be back at work which allows them to have an income to spend on products like mine. Open the retail sector first and create a temporary capacity limit similar to the ones issued by local fire department. Reduce the capacity for first week or two to 50% of normal inside the building which must include employees in that count. Have the businesses register online and pay a small administrative fee (50$) to process the “early opening “certificate”. This signage MUST be placed at entrance of retail location and enforced by business owner or there is a fine imposed on the business. After week two, you can increase capacity level to 75% and then after week 4 increase to 100% (back to normal) while abiding to rules (masks, gloves if needed and distancing. You can then require local municipalities to use their personnel to drive by and report on business abiding. This can be done by local zoning departments which are authorized to issue fines for other matters. Every retail location MUST provide patrons with masks and sanitizing stations in order to open early or face fine by local municipalities. After three violations, business is ordered to shut until 100% reopen status for entire city. Please open the local economy soon. My customers are not purchasing anything as they are unsure of future. You will have a larger problem down the road. Also the PPP will be wasted as we paid salaries but had no customers. We will be forced to lay off come week 9 when PPP is either forgiven or asked to pay back. Thank you and I hope to hear from you and/ or Mayor Carlos Gimenez.
Pinellas	General	There are too many things to list, we need to put the State of Florida back to work this is financial devastation. For farmers the restaurants the small businesses we can't just keep printing money and hope it will go away we need to stand up and face it maybe keep some restrictions in effect masks and gloves and high-risk areas
Polk	General	Florida should not reopen until this virus is under control. With hundreds of new cases each day even with the state closed the rate of infected will only increase if people are able to return to their lives as if no virus is present.
Duval	General	No, not yet...it’s just TOO soon Period!
Volusia	Management	Here is what you do Ron, you hold a Corona virus update press conference. During the press conference you tell the citizens of Florida that the time has come. As of May fourth all business can and will be reopening. Some precautionary guidelines may be put in place. If you still feel the need for your own peace of mind to continue to stay at home, please do. If for your own peace of mind you still want to wear a mask in public, go ahead. We should still try to social distance to a point. You are now free to move about the state. You are now free to go shopping, dining, beaching, visiting. Go to your local bars and businesses. Live your life again. Thank you for your patience and cooperation at this time. Have a nice day.

AMERICAN OVERSIGHT

Orange	General	It's a little past 7pm on a Saturday and I've just returned home from a walk along the main road near my home. Normally thriving businesses sat with empty parking lots. One drive-thru had 2 cars waiting; another had none but a hopeful sandwich-board sign encouraging visitors. The always bustling bowling alley was a ghost town and the only activity at Starbucks was a lone employee wiping a picnic table next to a vacant parking lot. To see my community like this is breaking my heart. Having said that, I want us to be safe and proceed with caution. Having said THAT, My job is in tourism and I worry over how long it will be before we can get back to work. I don't envy your task, but I have faith in your ability to find a proper path. Take care and thank you.
St. Johns	General	I am NOT comfortable with reopening businesses yet. My concerns are the lack of concern or understanding of the possibility to the spread in those that have no clue they have it. So many immunity compromised and elderly adults in Fl, its a big risk. If we start opening up more than you have, we will have an influx of out of staters that are carriers. We still dont have enpugh groceries and cleaning or sanitizing supplies for residents, it will put a higher strain on our supplies and food. People seem to take this as a vacation with total disregard for the seriousness of the spread. If you do start opening restaurants, it woukd need to be strictly outdoor, open air seating, and would need more than 6 ft between. No groups, limit to couples or singles to start. Maybe places with large outdoor space to allow families up to 5, seated away from others. I dont know the answers, or know whats best, but really feel a few more weeks or even a month would be a safer choice before beginning. Thank you for putting us first.
Orange	General	We need to be cautious in reopening businesses so we dont have another community spread. I think we should wait until probably June to be safe. Please consider carefully public health before reopening.
Pinellas	Administrative	Please know that it only takes one person to spread this disease to many of us. Just one. Again, many of us can be infected by one person. One person can infected me. One person can infect you. One person can infect my family. It only takes one person. Now, I hear the complaints from folks who have never been asked to give more of themselves than they have before. They are usually young, self centered and are looking to sooth their souls with human contact events, errands and jobs. We, as a whole, are better than the few whiners. We, as a whole, can flatten the curve. We, as a whole, can create a better Florida. If we open too soon, we may be back here in July or August, with the complainers well armed with, 'See, nothing happened to me, so let me do what I want.' You are better than the few. You have been given the chance to create wellness and a hopeful future. You can make this a cluster freak or a long stroll on a summer night. Your choice, but please choose wisely.

AMERICAN OVERSIGHT

Hillsborough	General	To “re-open” the state of Florida at this time is must plain criminal. Inviting a second wave of the virus is to put the importance of peoples lives behind the all mighty dollar. As a veteran and a health care professional, I truly believe that the science will prove itself and that you are playing Russian roulette with a fully loaded weapon. Gambling peoples lives, if you believe the fools in the White House or the Governors mansion. Relax the unemployment regulations and open the checkbook to do what is right by the people of the State. People are hurting in this state, hurting from the virus that is killing their family, friends and neighbors. Opening the tourism, beaches and business’s too soon is only going to increase that hurt. People of this State are also hurting do to the lack of financial support the Americans should expect from their government. The Lack of Leadership in this state is killing people and will continue to do so until someone steps up and does what is right and just for the people.
Sarasota	Tourism	We have flatten the curve. Now is the time to reopen. Americans want to go back to work!!
Clay	General	Based on the testing that has been ongoing and the decline in fatalities I believe that it is time to re-open the state, possibly in stages, but starting immediately. We need to be realistic enough to say that trying to prevent any further spread or deaths is unrealistic. We wouldn't think of shutting down for any of the other terrible, fatal problems in our country. Continued shutdowns have the potential to take us to a place far worse than the Covid19 will ever take us.
Polk	Professional Services	Governor Desantis, while I understand people are frightened of this virus, it has proven to be no lord either invasive than the flu virus we endure annually. Why are we continuing to sacrifice our economy because of people who choose to price in fear? We all need to get back to work! Although I am considered essential, I recognize the risks we face if we co time to keep our state shuttered. We will not survive. The rind to public health is far greater if unemployment grows and we sink into a deep recession. Let's get back to work and make Florida the vacation destination it was meant to be!
Volusia	General	Let us go back to our lives. We are adults. If people are scared they can stay home. Numbers are inflated and media is a joke regarding this entire situation. bu this logic we should be shutting down every flu season.
Brevard	Professional Services	Please open salons and government offices such as social security

AMERICAN OVERSIGHT

Palm Beach	General	To whom it may concern, I believe what President Trump said. The cure can not be worse than the disease. Also as a nurse I am seeing doctors and nurse being laid off and very few covid patients in the hospitals. Most of us will develop herd immunity if we open up. If we stay shelter in place it will prolong things. Once we have most people out of work for much longer our business will not recover. And we will not have a country. I believe China needs to pay! This is the third virus from China. We need an investigation into this matter. America was made to be open and I feel this is a violation of our rights in the name of safety. If people don't want to go out then they can stay home. The rest of us want to be free to live our lives. Quarantine the sick but not the healthy. Open Florida up! Robert Kerns
Broward	General	Please keep the state shut down as much as possible until the scientists say that it is safe to do so. Follow the advise of the experts.
Orange	Healthcare	Reopen Florida and the country -- watch this in full and realize what a mistake shutdown was: https://l.facebook.com/l.php?u=https%3A%2F%2Fwww.youtube.com%2Fwatch%3Fv%3DxfLVxx_IBLU%26feature%3Dshare%26fbclid%3DIwAR20g4Xe19yfmtj1aRi1Qu6iHEiJIN-l6lMyzv65Vg36NO7N7Ok6B-MtYUg&h=AT1ANa2z5wnjs8Oviv6TwCjoZdx7T-6uYj83hd0C_pi-65N-2CQ9Xb_4ACOvEzBg5FtmyAJ4NQBeDDrLJMzYjdpI5oDS-eyHsDuSgYdK4KNQP3FBdXcfRn057efq8ssVX9azIg2cMMHHPJM

AMERICAN OVERSIGHT

Pinellas	General	Bottom line, we need to reopen immediately. Not in a month. Not in a week. Not tomorrow. Immediately. The conversation of lockdowns transitioned from "flattening the curve" to "until the virus is gone". Getting rid of the virus was NEVER the point of the lockdowns. The lockdowns were to flatten the curve and prevent our hospitals from overloading. We've already done that, the curve has been flattened. Our numbers were nowhere near the grim projections we were given before lockdowns. At this point, there are no valid excuses for keeping people out of work and confined in their homes. Certain "polls" state 3/4 of us support lockdowns and/or believe it is "too soon" to reopen anything, but those polls are only of a few hundred people that no one knows anything about and is therefore not truly reflective of the state's constituents and the overwhelming desire to return to normalcy, and should not be used to make the decisions. There should not be an accepted consensus of spending months in lockdown until a vaccine is found, because effective vaccines can take at least one year to develop, and people cannot legally be confined to their homes for such an excessive amount of time. Reopening our state, and by proxy our nation, should not be contingent on projected models that have consistently been exaggerated or outright wrong, but rather on common sense and personal responsibility. Those who are truly afraid or vulnerable should be the ones staying at home and in quarantine. The rest of us need to get back to our normal routines ASAP. As we can all see, some elected officials are already taking advantage of the pandemic to deprive us of our constitutional rights. Another day of lockdown is already too much. Our rights do not end where your fear begins, and I strongly urge the Task Force to reject the notion of keeping us confined any further and reject the naysayers who believe we should all be curled up in a ball of fear in the privacy of our homes for months without end. I urge the task force to immediately begin reopening our businesses, transportation, and public places so that our economy can begin the tough but necessary steps to rebuild and undo the damage caused by COVID-19.
Hillsborough	General	You must NOT reopen the state! Do not fall victim to the crowd who is complaining about mild inconveniences. The majority of the people calling to reopen do not want it open for their economic benefit, they want it open so they can go about their "normal life" for their hair dresser or to eat inside a restaurant, which will put everyone at risk. I pray and hope that the governor and his team have educated themselves about the implications of what will happen if the state were to reopen. Yes, the hospitals are not overwhelmed at the moment, but it is because he made the correct choice to close down earlier this month. If the schools are closed for safety, why should anything non-essential be open? It is the time to be cautious, instead of risking the lives of all Floridians. Because even if one does not die because of COVID, they are left with possible long-term harm, plus things we don't even know yet. I am begging, please keep the state of Florida closed, please.
Sarasota	General	Too early to open up. Putting too many people at risk. Do it right the first time or it will be worse if we have to do a lockdown again!

AMERICAN OVERSIGHT

Bay	Food	My husband and I own a family diner in Panama City Beach, Florida and this is our sole income for our family. We attempted take out only however our business relies heavily on the tourism industry. We really need these summer months in order to get through the winter months when we are slow. In order for us to pay the winter bills we have to make the money in these summer months to do that. With no income right now even with the Payroll Protection Loan if we do not get open in May we will be in this same situation come June. This is a very hard time for everyone but I believe we could open up at least 50% like we did before we had to close. If everyone working needs to wear mask we can do that if we need to use paper menus and utensils we can do that also. We are willing to do anything at this point to get our doors open. Thanks so much for letting us have an opinion on this matter.
Collier	Healthcare	Please reopen outpatient surgery centers for elective procedures as soon as possible.
Hillsborough	General	Will it be opening in the am or pm.... so I know when to walk my dog?
Pinellas	General	I do not think Florida should re-open until the Covid cases stop climbing. If opened too soon more people will get it and then we will be back to square one. I am one of the fortunate ones still working as essential. I don't like the quarantine but feel it is necessary. Just my opinion.
Seminole	Healthcare	Please do not reopen until June, numbers are not going down. It is not worth it. People are dying due to the virus as we speak.
Leon	General	PLEASE OPEN THE CHURCHES, GOVERNOR. WE NEED TO BE IN OUR CHURCHES. I CAN GO WITHOUT A HAIRCUT AND THE GYM. IT'S THE CHURCH I WANT OPEN.
Lee	General	My opinion too early to open sw. Fl. We hav not went the. 14 days of decline as recommended by doctors of fed. Gov. In fact this area has see a increase,in cases. If Fl is opened now. We will see a spike increase and many more deaths. How many more deaths must we hav to get so cld. Economists back?? The season is over here for retired who bring in the. $$$ if we still hav virus start of next season retired will not come back. Then no $$ Like you want. Open now no business because people out of work what$ they hav will keep To survive... every year this time people who work in service area cry no business..all we will Get is spike in virus..our season is over.also why are we letting thousands come to Fl from hot spots new York will go down in cases we will go up. These are not retired people coming in will not go to restaurants bars etc. will stay in grandmas condo and go to groc store I even if they still come to get out of hot spots. I hav lived on this small island over 60 years. And seen it go down . People walk beach now no respect for law or others. Here short time leave virus here and leave Please keep Fl closed. To rid us of virus. Then open up follow what doctors hav said to do. It's working so continue til gone then people retired with $$ will come back.. THANK. YOU!!
Sumter	Healthcare	Please do not open dental offices yet. It is a very dangerous profession due to the aerosols. We are all very nervous and scared that work in this profession.

AMERICAN OVERSIGHT

Palm Beach	General	Wearing masks / face coverings should be mandatory for everyone in any public place. If that had been done from the get go along with mass cleaning we probably could have stayed opened and our people would not be hurting for money and it would have been better for the economy. Also unemployment benefits process is a joke. Thank god myself and my husband are essential workers. Unfortunately my daughter who is supposed to graduate from FSU has 2 jobs both there and at home and they were both closed down. Now we are responsible for paying her car and rent. She has not heard back or received anything from unemployment.
Flagler	General	How to re-open Florida--open the damn beaches enough for me to take my chair, my little cooler and a good book, BY MYSELF, to one of Flagler (or St. John's, or Volusia's) beautiful beaches, so I can take a dip in the surf and then sit in peace and quiet and read, and catch some rays. This is not hard, the beach is HUGE. Hint: if I'm by myself, I am by definition "socially distant" from other people. I can "go in the ocean", why do I have to get out of the ocean and immediately "move on" to walking or leaving or whatever, why can't I be "stationary" on a damn beach chair? Why on earth do people have to constantly be moving to be on the beach, in order to enjoy it? Nobody has ever declared "sunbathing" to be bad for people. Being outside is said to be good for humans as well, of course while maintaining a 'distance. Also, there has to be thought put into opening up pubs for bands pretty soon, there's a whole lot of "gig economy" with musicians that are almost destitute at this point. This closure has almost completely slain "live popular music" as we all have known it for over half a century now. Why not *start* there by allowing pubs with an outside stage to open up and serve their usual fare and allow bands to play? That way, some "gig economy" people are working again, and we're all OUTSIDE, which--again--is better for us all.
Seminole	General	I think it's time to reopen FL, the economy needs it. People are suffering not only financially but mentally, spiritually. Life needs to begin again. I can' say this virus should have never shut the country down the way it did. Everyone is living in fear that the media has placed in us. Open up Florida!!!!
Hillsborough	Tourism	Even though I lost my job in March and still waiting for stimulus check and unemployment money, I don't think we should open everything right now but I do believe that at least the beaches should open. We need to get out of the house and enjoy the beach. After all, that's what drew most of us to Florida. If we can grocery shop or go to a gas station then why can't we go the the beach. I have never had to be close to anyone at the beach in the past and I certainly wouldn't be close to anyone now. The beaches are big areas and I don't think anyone would catch COVID-19 at a beach. People spread out. Your way closer to people in Walmart than at a beach. Please consider opening our beaches.

AMERICAN OVERSIGHT

Pinellas	General	If the state really wants to reopen then it must mandate that everyone wear masks when around other people outside the home. That applies especially for all food service, preparing and handling employees and all employees in public retail from 7-11 to Publix to Olive Garden to government employees to the banks to the Armored Car carriers to UPS and to the Post Office and to all the customers patronizing those places. The only places I can't see being allowed to reopen are eat in restaurants since there is no way to eat with a mask on. If the state mandates that then the number of cases of Covid 19 will dwindle down to almost nothing in time. P.S. The state will have to get off its ass and find a way to make decent quality washable and reusable masks available for purchase by the public to make this work.
Lee	Recreation	SHOULD OPEN PARKS, BEACHES, GOLF COURSES, OUTDOOR RESTAURANTS
Broward	Technology	Www.answerquestIT.com - as CEO of A recruiting firm, all I do is help find jobs for people. I have been doing this for 20 years and can help considerably I feel. PLEASE call me, I really want to help...cure > disease
Broward	General	It is too soon to ease Shelter In Place restrictions. The positive Coronavirus test results are decreasing because of these restrictions and I firmly feel that we will have a rebound in cases if we don't keep the restrictions on for a longer period of time.
Pinellas	Government	We should start relaxing the shelter-in-place/safer-at-home order with the Governor's office. The next group would be the legislature. This would then be followed all other branches of government. All government workers that did not work from home before the order will be required to return to work. This would start with the Governor. No restrictions would be placed on visitors to these offices other than the 6 feet of social distancing. Once this has been accomplished and there has been no rise in Covid19 related cases for a period of two weeks then other aspects of the economy can be reopened. Of course this would be predicated on the Governor doing this in a "safe" method when the time is appropriate.
Alachua	Education	Not enough immunity/antibodies built up in the majority of our population yet. Review the Spanish Influenza pandemic- even higher death rate the second time around than the first wave of deaths. If we open up so soon, deaths will double. Until there's a vaccine - we stay home! Listen to the CDC, flu season coupled with Coronavirus will be devastating. Stay home!
Pasco	Food	In the rollout, are we looking at doing a phase approach based on % of occupancy based on fire code? Since, we need to start up the service industry, and rollout a similar concept for department stores. Some areas might have a lower % based on current active cases.

AMERICAN OVERSIGHT

Escambia	Education	I am a teacher, and I am very concerned about the reopening of schools in the fall. I feel there needs to be state-wide guidance about how to minimize spread in our schools that districts will be expected to follow. While students may not be at risk of getting seriously ill, they can pass it to teachers and other employees, many of whom are in high risk age groups with accompanying comorbidities and to their families at home. 1. How will students/staff be screened to make sure that they are not entering school buildings sick with covid or as asymptomatic carriers? This may need to take place daily when spread is occuring in a community. 2. What protocols will be put in place to make minimize risk of spread in classrooms and other high density situations like lunch rooms and class changes in crowded hallways? 3. Many school systems already outsource cleaning to the cheapest bidder which means that cleaning is minimally done with the fewest staff possible. More rigorous cleaning protocols will be needed along with the funding and possibly supplies to accomplish this. What is your plan for keeping schools sanitary? 4. What accommodations can be made for students and teachers in relation to testing and school grades when large numbers of absences affecting learning can be expected for both students and staff? Students will lose learning opportunities in both cases. Thank you for the opportunity to express my concerns.
Hillsborough	General	Please reopen as soon as possible. Are Great State cannot afford to keep closed and ruin our economy. We have enough hospital beds if more people contract COVID 19 . I am unemployed right now. I believe more harm will come to our residents if we go into a economic depression. Save the sick and save the healthy at the same time . Thank you. We need to work and flourish!
Escambia	General	Open everything
Marion	General	I don’t think it should reopen yet or will have a resurgence of virus outbreak
Collier	General	It is too early and to risky to let our guard down and reopen Florida. Social distancing initiatives have been very successful let us not get complacent and regress to the point where Covid-19 infections rebound and we need to start over again. The human risks are much too high. We can’t afford to watch and endure a New York City like catastrophe here in Florida. There are those that will want to reopen the state to save jobs and the economy. If we weigh the value of lives versus the economy there is no question that we have to protect lives. I am a retired healthcare professional that has seen too much illness and death throughout my career, trust me when I say that this killer virus is not to be fooled with. It is a devastating illness and a horrible way to die. Do not put money ahead of people’s lives. This is not the American way. People come first.

AMERICAN OVERSIGHT

Orange	General	I urge as many businesses and companies to open as soon as possible it can safely. Florida is very lucky to have only 4 deaths per 100,000 while over 20 states have more than that. It might have something to do with our warmer climate and the rainy season will soon be here to thwart the virus. California whose population is more than ours had less of a death rate per 100,000. The virus gets worse as the population ages so urge those over 65 particularly with underlying health issues or obesity to still stay at home as much as possible. Florida is a very large diverse state with most of north Florida and even Tallahassee not affected more than the common season of influenza. I used to live in Panama City and I feel for those up there now having to stay at home for very little reason. I also feel the original death numbers were grossly exaggerated and indeed the "experts" keep revising those numbers down. With the treatments (hydroxychloroquin) and others, I say let the population at least go to the governments Phase I on May 1 if not sooner. Keep up with the treatments as the cases come up. We know a lot more about the virus than we did 6 weeks ago so open up the state to save our economy. Thank you to those of you who read my opinion.
Broward	General	We have a 200 seat restaurant located on fort lauderdale beach. we have been in this location for 21 years. If we don't open soon we will be out of business. I suggest reduced indoor seating and sepanded space for outdoor seating. We have already purchased gloves, masks and a dozen infrared thermometers so we can take the temperature of every employee and every customer entering the restaurant. no abnormal temperatures will be allowed in the restaurant. COME ON WE NEED HELP
Duval	General	I say do it step by sterp get handicap buses up and running, will call opened back up at UF Shands, Doctors too. Also hair sloons, eating places too but if they donot obeybrules shut them d own. Told our peak April 25 to may 7
Palm Beach	Recreation	It's time to open the state and the beaches. So many of us haven't gotten any unemployment and have no income since the state shut down. We need to be able to work and provide for our families.

AMERICAN OVERSIGHT

Sarasota	General	1.)Please make it mandatory to wear a face mask in public places for the entire State of Florida until further notice. Employers should be providing face masks and gloves to their employees. I see too many people not taking this seriously here in Venice. 2.)Limit the number of people in grocery stores and eventually non essential stores as they open. Have them put the deli ticket stands out front and when your # is called you can go inside. I think we're ready for non essential store to open with guidelines. 3.)Open our beaches allowing parking to vehicles with Flordia tags only. 4.)Continue carry out, delivery and drive thru only service for food. That has been working out well. Our Outback Steakhouse in Venice has a great system that others should mirror for takeout. 5.) As much as I need a haircut and a pedicure we are not ready for that yet, but when we are the stylist should have masks and face shields and so should we as guests. Limit the number of guests based on square footage. Appointments only no walk ins.
Miami-Dade	Recreation	As the owner of a small business (Pilates studio) I am concerned about a premature reopening of business. If it is not based on medical readiness, more than likely we will be back in the same place (or worse) and forced to close again quickly when things inevitably flare up again. When we do reopen, it becomes my responsibility to keep my clients and staff safe when they are in my studio. Until we have both more testing and more guidance on HOW we can safely reopen, the risk does not seem worth it.
Pinellas	General	Test

AMERICAN OVERSIGHT

Charlotte	Food	You Need to open up Restaurants and Casinos, they are not only the Life Line of Florida but the Hospitality Industry. I have Been In the Industry Since 1971 and threw the years has seen many Flu's , Virus's, Etc Come and go. I have work threw it all, even through we have a high population of elderly here. I believe that you need to be, a Hell of lot striker with Nursing/elder care facilities and the food and vitamins you give these people so this dont happen again and Give them fresh fruits ,vegetables,meats not prepared foods. If you do your own research on the FDA,CDC,WHO, and bunch others you will see that Americans Especially The older population dont get fresh from farm Foods that has the natural vitamins and minerals in there foods, just process and additives added to the foods.This has Health risk Compromise on there health and Immune System. I have Mush research in Natural Foods and (Monsonto) Chemical Foods. This Has A Major factor on the immune system and health. As For the Economy Florida Survives on Tourism Which is Our Restaurants & Casinos first, then retails, amusement parks , and so on. Restaurants and Casinos should be the 1st to open not what you have on the list otherwise. If you Need Help Or Advise or anything Else, I Have 50 years In the Industry. I Can Help, if Needed. Thank You For your time, Cheryl
Seminole	General	I think opening up Florida to soon is a big mistake, it will of put all our efforts of being on lock down the past few months in vain. There needs to be a systematic system or a model of other areas who are having success that we can follow. I don't think opening up is all of a sudden going to get the economy up and running, people will still be in fear of going out into the public. As a business owner, I'm not expecting to have record breaking days once we open, it's not realistic. All those business owners starving for business doesn't necessarily guarantee they will be booming once Florida is open. People will still be hesitant. The risk of further spreading the virus is still very real, and very prevalent opening too soon is risky. We need more tests, more areas to model that have or are showing signs of improvement. We are not there yet. We need to continue to isolate ourselves, practice social distancing, and keep learning from our healthcare experts, scientists, and model communities that are showing success. My fear is that opening to soon will cause further chaos and a pandemic that will further slip out of our control. This is a long term investment in our communities one that will pay dividends once we beat this virus, now not the time to relax our efforts!

AMERICAN OVERSIGHT

Broward	General	I think everyone in the state should be tested before schools reopen, people goes back to work, planes start flying regularly, before things start going back to some form of normalcy. What will happen when employers open up and people goes back to work and we end up with a breakout will people sue their employers. What about children with illness going back to school, how can they be protected? Will there be a law for us to ware mask to every public place. People are not being paid or making enough money to stay afloat. Can lenders push few months mortgage payment to the end? Do you think enough people are going to go back to the way things were to Sustain the economy? Please make testing sites available in each city at more than one location. Please also think about health workers and their families. Also, wearing masks will that be a way a live going into public places including school?
Martin	Government	C
Martin	Healthcare	Please reopen our state back up!! You cannot shut don't the world because of a so called virus!! More people die from cancer, the flu, suicide, etc People are out of jobs. Vaccines do not help viruses! Do not let Bill Gates and Fauci decide what's best for us. People need to get back to work to survive. Do not let the Dems destroy our country!! Please Governor De Santis help us and our economy. We are not afraid. YHWH is our shield and our protection!
Broward	Education	Why don't you fix the unemployment website? Also why are you asking the publics opinion? The public is stupid. Ask a doctor, better yet a team of doctors, then some economists and then the people that have to do the work. Your wishwashy way of leading got us into trouble in the first place because you toadied up to Trump in the first place.
Sarasota	Healthcare	We are in our late 70's and living on social security, our pensions and our investments .. The shutdown has impacted us mentally, socially and economically..we cannot live long enough to ever recover...stop this madness immediately and open up the Florida economy before everything that we have worked for all our working lives disappears. We support President Trump and Hope Governor DeSantis follows his lead to open up our economy pronto. To delay will be even more devastating! Some additional Floridians may unfortunately die, but many more will live another day and prosper!
Okaloosa	General	I live in Okaloosa County in the panhandle. As of today, out of a estimated population in the county of over 210,000 we have 145 cases and a total of only 25 hospitalizations. We need to reopen the panhandle. This is totally overblown and we need to get back to business.
Pasco	General	Why are there no doctors or scientists on Youree open Florida team. This is something you need to make a very informed decision on our lives and our businesses. Instead of chalk this team with only Republican small business owners first off what about the Democrats what about the independence and what about the doctors and scientists who are working their asses off to give you accurate information you won't even review it seems you're a pathetic excuse for a governor to just make sure your good ole boy network makes the call on opening the state.

AMERICAN OVERSIGHT

Orange	General	I think we should err on the cautious side. There's no way I'd go out to eat in a restaurant or go to a gym till after the second wave of covid passes. I really would like to see Orange County require everyone to wear a mask when inside a public place till after the second wave passes. It seems pointless to take people's temperatures at Disney and screening of employees in the restaurant industry if someone is asymptomatic. Restaurant employees would have to be screened by a health official daily which I highly doubt people would actually do. Slow to reopen is better. But I feel we should continue to social distance for a while. And please require everyone to wear a mask in public. I'm really concerned about the second wave. I'm a student at UCF and am a bartender and I'm having high anxiety about possibly having to go back this year. I don't even feel like opening back up businesses is suddenly going to make everything better. It's still going to take time and this is all going to happen again in a second wave. We need more test kits of many varieties.
Polk	Retail	Exercise is good for depression. When it's too hot outside, I like to walk the mall. Retail therapy (shopping) is also a great tool for depression. Open all beaches. People like to walk and get vitamin D. It's also good for COVID 19. Swimming is great exercise. Restaurants could spread tables out to social distance. It will lighten the crowd at the grocery store.
Polk	General	SLOW AMD STEADY! Do NOT rush to reopen this state, it's not worth it. You also should have included Nikki Fried on your task force, she is an important part of the state government .
Seminole	General	As unenforceable as the stay at home order has proven to be, I believe we should just get back to business as usual, with provisions in place to enforce social distancing until this pandemic is completely under control. I really don't see the need for a stay at home order that seemingly doesn't apply to anyone. It only works on the basis of an honor system that places too much trust in the masses.
Okeechobee	Education	Please allow private schools to return. We are smaller and can keep class size down Open up summer camp
Volusia	General	There will be no real opening of the economy until people feel they will be safe. The only way to make sure Floridians and visitors are safe is testing, testing, testing....and with the testing must come tracking and tracing. Those who are found to be positive with COVID -19 can be isolated and the virus will not have liberty to spread as it is doing now. As more testing is being done, the positive cases are increasing as are the deaths. These statistics certainly do not make people feel safe to resume a more normal life. The "safer at home" should be left in place until at least the middle of May. We need to bring the contagion and death numbers down.

AMERICAN OVERSIGHT

Hillsborough	General	Please do not open anything until there is a sustained and substantial down trend of case numbers and deaths! It is irresponsible otherwise! Even the administration's guidelines said phase one needed a 14 day downward trend of case numbers. Our numbers are still rising, and that is with limited, at best, testing. We need substantially more testing, and then look at the data to see what areas might have a chance of opening without a rise in numbers. Please be smart about this. It is not a one size fits all. Do the right thing. That is protecting lives! Also, be sure the unemployment benefits are getting to the people who have applied!
Lee	General	Re open it and let people work
Hillsborough	General	Thank you for taking the time to ask what the public thinkable about re-opening Florida. First I feel like this process needs to be slow, calculated and very clear. So we as the public can plan and know what is expected. I feel on the most basic level that as a citizen being out away from my home I feel most confident in being safe when I have on a mask and others around me have on masks. I follow other cdc guidelines by washing hands and trying to stay 6 feet from others. With opening certain businesses I feel like it would be prudent to have everyone wearing masks and checking temperatures and having access to hand sanitizer. I would feel safely confident for small businesses to open first like salons, and other smaller establishments. See how that goes give it time to see if compliance with wearing masks will work. If rates of infection doesn't climb after a time of several weeks then roll into larger businesses and churches. With the stick orders for people to wear masks. It is going to take you as our leaders to enforce measures like wearing masks to keep us safe while reopening Florida. I see it as the safest way. People don't like wearing seatbelts but they save lives.
Marion	General	This lockdown has gone on long enough. I understand why you did it, but did anyone ever take the time and stop and think about the adverse effects of it. I am a service connected veteran who has been trying to get care at the VA facility in The Villages. We cannot get a face to face appointment with our doctors, or xrays and other procedures to prevent pain and suffering on us. How many in this state will maybe die, not from the virus, but from the orders you instituted. Great way to treat us. Again, I understand at the time what you did, but you did not think in advance, how much suffering other veterans are experiencing. I now will have to experience a a lot of pain in my body, until the VA can get caught up with their scheduling. Open this state and country back up, and get it back on track.

AMERICAN OVERSIGHT

Polk	General	Kind regards, Governor Ron Desantis, I am a citizen of this great country and a resident of Florida. First of all, thank you very much for taking the time to listen to your people, the same people who have put their faith and trust to represent you well. In my humble opinion and of course, ignoring perhaps a large amount of information that would be crucial to be more exact, I dare say that I believe that although the continuity and growth of our economy is important, if the vaccine or some scientific method to eradicate the virus in our city. I believe that our Florida should not be completely reopened, because the virus can take hold and take many more lives than it has claimed so far. It is time to grow. To put life first and not money, I think it is time to fearlessly represent the interests of the peoples and defend them by their representatives. The biggest engine of any economy is people, which is the most valuable thing. I believe that when leaders make their people feel safe and happy. people will defend and support him until the last moment, the greatness of a state is in the attitude, commitment and security of its people. Believe me you will see great things happen in Florida if you make the right decision. we are not a social number, we are beings with all the power that this encompasses. please there will be no florida wait a little longer to have a better health guarantee for your city. The economy is recovering, lives are not. Great leaders become the message, not the messenger. they are always the verb never the noun. Thank you very much, God bless you and God bless the United States --- --- --- Saludos cordiales, gobernador Ron Desantis, soy ciudadano de este gran país y residente de Florida. En primer lugar, muchas gracias por tomarse el tiempo para escuchar a su gente, las mismas personas que han depositado su fe y confianza para representarlo bien. En mi humilde opinión y por supuesto, ignorando quizás una gran cantidad de información que sería crucial para ser más exacto, me atrevo a decir que creo que aunque la continuidad y el crecimiento de nuestra economía es importante, si no está garantizada la vacuna o algún método

AMERICAN OVERSIGHT

Lee	General	We need to Get these people back to work . Enough is enough , If you are afraid of Covid 19 stay home , keep away from others and continue to live in fear . I can not continue to sit back and watch the people I love and know losing everything they have and own and love to protect the same people that say to stay home but continue to live as nothing has changed. I'm sorry but ENOUGH IS ENOUGH !!! . If you have underlying health issues , are of elder age or don't feel safe being around other people then stay home . Do as you have demanded others to do . Let The Country get back to work and our lives .. Why has the freedom to make that choice to been taken from Us by the government Why ? Because of a Virus that they still can't seem to tell us the truth about ?? We have allowed this to go on long enough . How can we sit back and watch OUR COUNTRY , OUR FREEDOM and OUR LIVES be destroyed ??? Wear a mask , keep a safe distance and if your sick stay home !!! But let the rest of the people do what we need to do to get back on our feet . Start the path to recovery . WE CAN NOT and WILL NOT SURVIVE another month BEING BULLIED ,, CONTROLLED and MANIPULATED BY THE GOVERNMENT ,that's PUTTING OUR COUNTRY INTO POVERTY and being told " thisIs the right thing to do " as we continue to NOT receive the help they promised and still don't have a solution to how or when help will come . ALL to cover thier their asses for what they have done . Show me true facts , numbers and proof that Justifies. What they have done , cause the false accusations , false Covid 19 death number and false. Assumptions of how many people had covid19 and the true deaths actually caused by Covid 19 . And I guarantee you will be sickened that our country has been crippled and devastated. For a virus that was no different than the annual flu that kills just as many if not more people every year .. RE- OPEN FLORIDA SO WE CANT START THAT PATH TO RECOVERY , STOP THE FINANCIAL DEVASTATION THAT WILL KILL MORE PEOPLE AND LIVELY-HOOD THAN THIS COVID19 EVER IMAGINED !!
Brevard	General	Florida is not ready to reopen. We are still having areas where COViD-19 cases are increasing. Opening the state under this circumstance would produce a even higher public health emergency as well as economic break down. I would follow the suggestions from out public health experts and the models they provide. It is the best we can do.
Volusia	General	Opening back up the state parks with admission by appointment only limit the number of admits., Id auction of the admits for the first month the pristine parks with wildlife wandering is a prize, Recoup lost income,, donate to a food bank, do whatever you need to do to make it better. You could auction a day at the park I know I'd bid a hundred. It's actually a once in s lifetime opportunity
Polk	Wholesale	Reopen our state for business. If you sit on this any longer the Trump base WILL leave you and we will NOT vote for you again. Your inaction on this has been noted and it is extremely disappointing your unwillingness to provide any guidance. I expected to hear something from you after Trump presented his plan for reopening our economy. You have said and done NOTHING. A task force. Really? That's all we have had from you. Be the leader we voted for and open our state.

AMERICAN OVERSIGHT

Orange	Tourism	Open the STATE! Everything before Florida is out of business, let cruise lines sail with restrictions on age and limited Guest. Also open theme parks and resorts also with limited guest.
Hillsborough	General	The reopening of the state is extremely important for a number of reasons. The pandemic has brought awareness and people will be forever impacted. For the better or worse is entirely up to the individual. We live in the greatest country in the world. What makes us great is our freedom and capitalism. Both have been stripped during this event. We face far bigger threats ahead if they are not restored to the American people.
Hillsborough	Education	Please DO NOT loosen restrictions until testing, tracking and isolation measures are available for all FL residents, inclusive of non-symptomatic individuals. This is the only way to stop the spread and avoid a resurgence of virus cases. Suffering through this again is not an option. You have once chance to get this right and will be held to account for your decisions. Make the right decision for the longterm health of the citizens. Failure to do this will be the failure of your government.
Miami-Dade	General	As a immuno compromised person with a child that is also compromised. I feel that there needs to be strict oversight on any opennings that are accompanied by stringent fines before openning. We have to hold businesses and residents alike resposible for ensuring that they do not put others in danger. Even with the required masks in place, every week when I go food shopping I see some one without a mask and/or not respecting social distancing because there are no consequences to force them to obey the rules.
Miami-Dade	General	I think pools in small communities should be opened asap. We live in a small 10 unit community and we had a system to use the pool area. One unit at a time. The pool is not only a source of exercise, but a source of mental relief.
Nassau	General	Yes I think we should open back up. So people can get back to work. And vist family and they can take their kids to the parks and have fun. And some can go and vist family in other states to
Pinellas	Healthcare	PLEASE, PLEASE don't open up Fl. till after the number of cases of the Corona virus is considerably lower day after day. Our lives are more important than the economics of delaying a few weeks for the virus to lessen its impact on Floridians!
Lee	General	Open everything!!! Get back to work!! Allow Florida to recover and recreate the economic boom it was experiencing before COVID19.
Palm Beach	General	There is NO WAY we should be relaxing the stay at home orders yet. Way too many people are currently violating them, and we are still getting almost 1,000 new cases per day. Cannot yet get antibody tests that are reliable on any type of scale. Took m,y assistant 3 weeks to get a test for COVID despite 101 degree fever and cough. 5 days now and still no results.

AMERICAN OVERSIGHT

Orange	General	Do not "open" the State back up. This is bigger then businesses making money. People are dying. Whole families are being wiped out, people can't pay for things because the of the stupid unemployment website. Hospitals need more supplies. None of that can be fixed by allowing people to go out and start being reckless. The current order doesn't even really close things down. There is a new normal and we can't just flip a switch and have everything go back to how it was.
Collier	General	I think only essential businesses should open. Masks should be mandatory when out of your house. Beaches should be open with masks and no sitting. Oh, and the beaches should be returned to the public. Not the wet sand line, but the high water line whether it's wet or dry. Disgusting what Scott did with the beaches.
Charlotte	Healthcare	Sending this input via email to Governor Ron DeSantis. Attempted to send Task Force to Re-open Florida.....but the web site is not accepting giving message that site having high traffic and to try again later. After numerous attempts decided to still send my input to Governor DeSantis: GovernorRon.Desantis@eog.myflorida.com As follows....Immediately restart up and perform all medical surgeries both elective and essential surgeries. Surgeries in both hospital inpatient and out-patient be performed first on our most vulnerable patients being seniors. Ensure that all medical professionals and medical facilities have the needed protective safety gear. Do not allow any further delay to prevent conditions and illness from happening or getting worse . The seniors are entitled for this help and protection.
Marion	General	It's a bad idea to open the state when the positives cases still emerging. Testing is essential, testing should be available to every person regardless if the person is experiencing symptoms. Its the only way to know the magnitude of the pandemic. Stop comparing statistic with others states. Focus on our state and coordinate with our neighbors states. The state is not ready, if the state open the numbers are going to spike, Floridians will perish. Better safe than thought and prayers.
Pasco	General	I have a elder Grandmother and grandfather who has prosate cancer. I am 7 month pregnant and I don't need a new born getting this virus. Nobody takes this seriously. Re opening florida is too soon.
Pasco	General	Please do not open the state up. I know that there are people without jobs but I honestly feel we should have the safe at home till June 1st. We are over 30,500 cases and I'm sorry it will continue to rise. One month is not long enough. Keep the state, beaches, and parks closed. We want everyone to be healthy. Kids can't go back to school and therefore keep it all closed.

AMERICAN OVERSIGHT

Volusia	Tourism	I have heard from more than a few acquaintances that they are heading to Florida on April 30th for vacation from out of state. Considering Disney has not opened and when they do it is on a limited basis, Universal is closed until May 31st, the beaches are limited at this time, restaurants will be also limited...where are these people going exactly? Just what we do not need, people from out of state bringing the virus with them so they can vacation when we have not been out of the house for weeks per Gov DeSantis Executive Order. I ask that you please consider Florida first, extend the executive order on vacation rentals for another month until we get the state back together. Thank you
Manatee	General	As a healthcare worker, I believe if you open up business and beaches to full or semi full capacity it can trigger a second wave of this virus. Are numbers are still going up and yes we are stabilizing but not enough to open or lessen the restrictions yet. I believe we should look and reevaluate the issue every two weeks rather then by month. I understand we are a tourist state and that is how we make our money but I also do not want to keep seeing people sick or die from this virus because people don't u detest and the importance at this time to social distance and limit there outing for a short period of time until all this dies down. Thanks for everything you and your committee are doing for us and be safe . Be smart on your decision , think of the people's health and well being. We are American and we will bounce back stronger
Pinellas	Healthcare	Until we are able to have free and widespread testing and contact tracing for COVID-19, we simply cannot afford to risk re-opening the state. Especially here in Pinellas County where we have so many seniors and so many Coronavirus cases. Our curve is anything but flat and declining. Now is not the time to lift the Stay at Home Orders. We need for our leaders to consider providing direct payments to every adult making less than $75,000 per year until this pandemic is finished. Perhaps $2k/mo per person for the duration. Rather than this nonsense of doing PPP loans get rid of the bureacracy. That $1200 one-time check won't go far, whenever it arrives.
Sarasota	Healthcare	I work in community mental health. I have seen first hand the impact that COVID-19 and the stay-at-home home orders have had on individuals and families. The top concern I hear is hear is for the health of themselves or a loved one. What feels like this mass pressure to reopen has created further anxiety. Please consider extending social distancing guidelines. There will be a negative impact on people's mental health by reopening at tthis time. There is a bigger picture here than just the virus versus the economy.

AMERICAN OVERSIGHT

Broward	General	You should keep all non essential businesses CLOSED. We have a lot of elderly here. My opinion, don't open until at least 5.31.2020. Keep beaches to residents ONLY as well as parks and recreation. You need to disavow the president who is killing your own people with his iignorance. Wake up and do the right thing for the people that voted for you.
Sumter	General	It's to soon to open up this state with all the seniors
Sarasota	General	I support reopening Florida with 1. Compliance with state/federal distance guidelines 2. Continued testing and monitoring
Broward	Finance	Have accrued forbearance payments instead automatically deferred to the end of the loan (no penalties). Lease payments should use security deposits and last month payments to offset losses. Do not count furloughs or temporary loss of employment against a loan applicant's work history if they had a good work history previously and regained employment.
Broward	General	Please listen to the scientists and go slowly and cautiously on reopening South Florida. We are doing our part in staying home to flatten the curve. Please do your part in protecting the public, especially our elderly. Thank you for your time.
Hillsborough	General	As an elementary school teacher and a mother of two children with autism, lockdown has been a challenge on many levels. The daily effects are seen in meltdowns and increased tantrums for my children. I also have immense concern for my students who are not always in the best of situations at home. I worry about their safety and their emotional well-being during this time. I implore you to please reopen schools in the fall not only to prevent academic regression but to ensure that students are in a safe situation. I also request that they Hillsborough County trail system be reopened soon. This has been a tremendous strain having even the trailheads closed. As my two children with special needs need an outlet to exercise and be in nature. Opening trails even with bathrooms still closed would help families to have a much-needed break and and help mental health status to improve. Thank you for your time and consideration.
Broward	Finance	We have already sacrificed one month and on our way to flattening the curve. I don't want to go backwards and risk more Covid19 cases or deaths. I think we should be prudent in reopening. Curbside pick up is a great idea for retail businesses. Hair and nail salons along with tattoo parlors should wait until testing is readily available. We are not ready for dine in options yet. Working from home has worked in many businesses. In larger businesses maybe have half the staff trade off working at the office (one week on, in week off) so there is not such a large concentration on people. Continue testing.

AMERICAN OVERSIGHT

Polk	General	Mr. Governor, Please DO NOT re-open the state of Florida. I fear for my safety and the safety of our community. Please have patience and allow time for a vaccine to be developed and distributed. Show us all that no one is disposable and give us all a fighting chance to survive. I hope that your family and yourself are healthy and safe. Sincerely, Sandra A concerned citizen of Polk County Florida.
Hillsborough	General	OPEN ALL OF FLORIDA (RESTUARANTS, BEACHES, RETAIL), IMMEDIATELY. WE ARE LOOSING THOUSANDS OF JOBS AND IT IS EFFECTING MENTAL HEALTH.
Orange	General	With no vaccine near us at the moment, my concern is the health of Floridians. I believe that if we open popular areas where many congregate and interact, we could see catastrophic spikes in infection. As someone as high risk, I am incredibly thankful that my work has let me WFH but I also understand the economy must open up at some point. I really encourage that we do limited openings if anything. If it was up to me, I'd keep us on lockdown for longer until we see a dwindling in infections.
Broward	Education	Florida should be re-opened slowly, and according to the number of infected people with COVID-19, as it changes. First, state parks and beaches should be opened. The curfews and the stay at home order should be lifted, as well. The second stage, presuming a decrease in the number of infected, is to open businesses, abiding by the rules of social distancing, as established by cities. Finally, after the danger of the infection is no longer present, restaurants, bars and coffee shops, together with public events, should be reinstated into business. Re-opening the state, especially Miami-Dade and Broward counties immediately, would result in a worsening of the pandemic. However, state parks and beaches may function with social distancing as the first step. Businesses should re-open only after a decreasing trend in the infection after that.
Pinellas	General	I think reopening should be paced. Slowly if need be. Scientists and Drs. keep speaking of a second wave, if that a possibility I think we would be better if we were poised to pull back short reigns versus have tried to completely reopen and start with an entire shut down again. Other states are reopening, take a little time and observe what happens there. We are far better safe then sorry. The economy is devastated, we own a small restaurant. Will we survive this? That remains to be seen. But we're already in trouble, something good should come of it, like lives saved.
Lee	General	please start this economy towards full recovery by allowing business to open.
Orange	General	Please do not open florida yet, especially schools. They will find a medicine or vaccine soon. Let's wait until October and see what happens. Thank you.

AMERICAN OVERSIGHT

Hillsborough	General	I have 3 teenage girls. One has a compromised respiratory system. As a parent, I feel it is too soon to open the state up. If we do it should start very small. I also feel we have had no where near enough testing yet.
Charlotte	General	Beaches are opening here, we are trilled and excited. Restaurants should open, limit the amount of people inside for now. Stadiums maybe a bit later. I also wan to point out that the older folks that at a higher risk should keep social distancing. A vaccine if any will not be available for a year or two, what are we going to do in the mean time? Not LIVE? Bankrupt the State, the business by keeping the economy locked up, keeping us locked up? It just does not work that way. We are human beings not animals. It is time to move our state forward and start reopening little by little. Older folks most likely will need to be more careful. I want to start testing everyone that will be better than imposing more lock downs. Thank you Raquel
Franklin	Food	Please do not reopen too soon. We are not ready. It would be irresponsible and cause a larger problem. I looked at a model that said June 14th for relaxing the restrictions. I am good with this if things are moving in the right direction.
Orange	General	Even with the current measures in place, the number of coronavirus counts has continued to grow at an alarming rate. It is much too early to relax the strictures; doing so would endanger lives.
Miami-Dade	Retail	We need to face this situation as it will be with us for a long time. Society needs to be responsible for following the guidelines and using common sense. The longer we wait to re-open the bigger the social damage will be. We have seen very low death ratio and we know the elders are the one mainly at risk. Lets protect them and hope they understand their high chances of sickness. We were asked to close to flattened the curve, not to extinguish the virus, which it is not possible. To give hospital the chance to safe more people. I think the federal, state and local government were not prepare initially and that is the reason we had to disrupt our normalcy. Time to open, make some money so we can continue fighting this devil. Be smart about the business that can open, reduce the occupancy , and keep a curfew in place . We need to WORK, no need to party at this time. OPEN UP so business owners like my wife and I have a chance to keep our dreams alive, we will make sure to follow guidelines and protect our community. Let’s bring the USA spirit back!
Broward	Healthcare	Reopen Florida now. The science has been very wrong on the impact and danger. We are NOT New York City. If Home Depot and Publix are safe si are other businesses. We need to work. Beaches and sunshine are healthy. We can manage the minimal risk. This is America. Thank you, Timothy J Cleary

AMERICAN OVERSIGHT

Palm Beach	General	REOPEN NOW. The cure can't be worse than the disease. 22,000,000 population with 1056 deaths, coded as corona deaths, do not warrant further closure. Open now. With LIMITED RESTRICTIONS. You said yourself, we have sufficient hospital capacity. I supported you in your election. Now support us by starting this economy up. Don't do it halfway. The numbers don't support it. Open now. I am an airline pilot and a U.S. Navy pilot veteran.
Palm Beach	Tourism	It's time for the US to get back in business! Florida is one of the top tourist destinations with a magnitude of attraction coming from Europe. We are grown adults, and if there are people that want to stay sheltered in place until the end of time, they can, but those of us who are ready to get back to work, traveling, and a normal life should NOT be prohibited from doing so. It's not anyone's responsibility to take care of me should I choose to take a so-called "risk" and get back in action! Sweden chose to leave it up to their citizens and they have reportedly done well. Please allow Florida to get back to being the paradise of the US and allow all travel to resume! Advising citizens to be cautious of their own health is sufficient at this time.
Pasco	Recreation	I was wondering if we would be able to open gyms that hold classes in open spaces (i.e. warehouses with open bay doors) and limit the amount of people who attend the class (capped off at 10). I realize the problems with traditional gym settings, but would hope you take this into consideration.
Polk	Government	Please end the lockdown/stay -home-order/quarantine (call it what you will)! Don't keep moving the goalposts!!! The goal was to "bend the curve," not wait until the virus disappears and we are all dependent on government assistance. My family, friends, and neighbors are going broke. Hospitals are basically empty and I have elective surgery (bulging disc in my back) that needs to be performed but I can't get it. Sometimes I can barely walk it hurts so bad. The virus is not as lethal as it was supposed to have been, there is a certain amount of risk we all accept just in daily living, and it should be left to free, informed citizens to make their choice as to how much exposure to others they want to take. If someone doesn't want to go to a restaurant or hair salon, fine. If they want to wear a mask in public, fine. But don't take my Constitutional Rights away from me. END THE LOCKDOWN NOW!!!!
Volusia	Tourism	I work for one of the major theme parks. We are ready and willing to reopen while maintaining a safe, and clean environment for our guests. We need to get the state into phase one to allow the economy to begin moving again.
Pinellas	Healthcare	do not reopen state until covid numbers have been on a 14 day downward trend. We need to be safe

AMERICAN OVERSIGHT

Alachua	General	This is a very informative briefing with a doctor from California. It includes data on Covid and also some of the secondary effects being in lockdown has had. We can not remain in lockdown forever (or even 18 m until a vaccine). Shelter in place was to slow spread that hospitals could prepare and not be overwhelmed and hospitals are prepared and if anything they are underwhelmed. Many throw up the photo of the Spanish flu with side walks packed for a parade; as soon as someone mentions reopening. This is not what many people mean by reopening. The theme parks may take longer and huge arenas shouldn't be filled to started with. Those with high risk conditions should initially continue shelter in place for 2 weeks (or more) longer https://youtu.be/xfLVxx_lBLU
Duval	General	Please open the economy. Enough is enough. People needs to get back to work, and Florida needs the revenue.
Escambia	Healthcare	Don't be trump foolish , it will cost you in the next election. Don't go on tv and put the mask on totally wrong; it only shows your insincerity. Use CDC guidance before opening state, not the lumps drivel...
Collier	Tourism	You can not have the entire country under lock down it is in American and DeSantis I will not vote for you in future open up Florida people need to be responsible for their on actions stop treating people like they have no common sense the sad part is they probably do not have any. But people will always do stupid things. Because something g is open that does not mean you have to do it. It is a persons right to make decisions for themselves people need to be cleaner anyway i think this is a political stunt to get president trump out of office I will vote for trump in the election
Lee	General	Open Florida now, we want to go back to work
Brevard	General	I say open everything up and let the chips fall where they may. The south has the worst healthcare and overall health of any region in the country, so it probably won't go well. But we do have the most Trump voters so I'm sure it will make 'Merika great again. Let everyone get what they deserve from their leaders. Fortunately I'm not elderly, overweight, or otherwise in a high-risk group. Good luck. Our governor and president have already shown that's all they rely on. it's sad but seriously, our leaders should start a comedy improv troup. Oh, and don't use this as an excuse to roll back environmental regulations and start doing shady payouts to your business cronies. We're watching....closely. Ken

AMERICAN OVERSIGHT

Okaloosa	Government	Open up the dang state already. This is way over stepping our constitutional rights over a dumb virus that isn't even real. Yall know this yet you keep scaring the american people and we are over it. I am not one of the 70% you claim wants florida shut down. I am one of the 30% who is over this crap and wants to go back to work. So please open up the state already.
Indian River	Professional Services	Re-open beaches with restrictions. Walk, swimming, surfing, going to/from beach ok. No laying out, congregating, umbrellas, blanks etc. But please let us take a walk on the beach within family, same household groups. Strongly believe that this is one of the safer ways people can get out in the sun and fresh air with extremely low risk of contact with the Covid virus!
Pinellas	General	do not reopen state until covid numbers have been on a 14 day downward trend. We need to be safe
St. Johns	General	I am a 68 year old State employee at the Florida School for the Deaf and Blind. I hope you will phase in the older at risk employees last in opening up the State. If necessary, perhaps a furlough for a few additional weeks. I also would like to be virus tested by my employer before returning to my work place. Thank you Governor for all you do for us.
Lee	General	Reopen Florida. People should continue to practice social distancing. People need to get back to work.
Lee	Recreation	We believe for the safety of the island of Boca grande and the home owners the beaches need to continue to stay closed, the average age of each home owner on this island is 70 plus years old. Exposing the elderly to this virus would be deadly. The homeowners walk the beaches for their health and ride bikes on the bike path daily risking the thousands back would be deadly. Also, the environment is at risk to as well as the rip tide has been dangerous. The island needs to stay safe for the best of the elderly. Thank you. Kathy
Bay	Accommodation	I would like to see testing to track who has it and who doesn't have it I believe I had it back in January so I would surely show an antibody but if everyone could get tested it would ease the mind of the public before opening

AMERICAN OVERSIGHT

Pinellas	General	I don't usually involve myself in these kinds of things, but honestly my family and most of the people we communicate with think this lockdown is ridiculous. Open the beaches and the pools, open the restaurants and keep a limited capacity if necessary, allow all businesses to reopen again. Allow others to earn an income rather than be dependent on the scraps thrown to them in the form of a stimulus. The longer this goes on, the more angry people are going to get. There is already a political divide but this event will polarize Floridians even more. In the process, law enforcement and the government in general will be viewed as a contributor to the restriction of rights rather than the entities that protect and serve. The police officers will suffer the brunt of it and that is not acceptable. At this point, others LOVE to publicly shame and it has beaten into everyone's brains. Allow the lifeblood of this state (tourism) to come back to life and set guidelines for people to follow. For about 25% of the population, they can't wait to call someone else out on bad behavior. Others that are afraid for their own lives or overly concerned about someone around them...they should maintain the stay-at-home. It seems very simple and common sense...but mass hysteria and the media blitz every moment of the day has diminished common sense approaches!
Taylor	Food	No buffets should be open Restaurants should still be every other table. If buffets or salad bars are open every one must wear gloves Hair stylist should wear masks Churches every other row closed if reopened and everyone 6 feet apart
Osceola	Professional Services	I believe the social distancing has helped and will continue to help. We need to continue social isolation for a little while longer to prevent spread and reinfection.
Hillsborough	Administrative	I understand the need to act prudently and cautiously in regard to everyone's safety, but I also understand the great need for people to get back to work again, so Id love to see the Safe at Home restriction lifted.

AMERICAN OVERSIGHT

Broward	Finance	Please for the love of god rely on the morals that were instilled in you as a young boy. You're the governor for a purpose; that you are capable of both empathy and reason. I doubt you were ever taught that human life was worth less than the economy. I understand you have an enormous amount of pressure on you, and you handle it well. I hope you're a fan of batman, becauase you should do as his wisest advisor said in times of unprecedented turmoil: endure it. They'll hate you for it, but that's the point. You can do the right thing by waiting. You'll be saving thousands of lives by waiting even an extra month. You're a politician, not a scientist. I'm sure your advisors are the best the state and fed can offer, so listen to them. Stay true to your moral compass. Do not let it be corrupted by the pressures of those that (like me) own a business and are facing financial hardship because of it. We will live. Reopening too early is the equivalent of euthenizing those inevitable victims yourself. The preventable spread of this largely unknown virus could lead to a much worse fate than a staggered economy. Florida is a state that can endure. Disney World will reopen. Miami, Orlando, Ft Lauderdale and the many other cities in this great state will normalize, but it's up to you to use the power invested to you by people like me in a responsible way. Money doesn't matter after you've lost those whom you're responsible for. And you are responsible for our safety. Look inside yourself. Do you truly believe wealth is more precious than life itself? I beg you; until we know why people in their 20's, 30's and older are have strokes after contracting COVID 19, or how many asymptotic carriers there are - endure. It's what batman would do. And it's what you should do. The money will begin to flow in again...it's inevitable, just like the deaths that will be on your conscious if you crumble to the pressures of the rich who have never had to sacrifice. Not now, not ever. Respectfully A concerned Florida business owner.
Duval	General	Open up now while we still have a country to open. This is getting ridiculous. Let the medical people deal with this virus. We are not children or idiots. Wr will follow all the safety precautions. It will take this country 20 years to recover from this debaucle. .
DeSoto	General	Please reopen the State of Florida as soon as possible. The existing executive orders can be allowed to expire on their own effectively causing a two phase reopening.
Duval	Government	Please open irs offices asap. The irs is holding ppls tax refunds due to identity check. With the offices being closed no one can verify their identity so the irs continues to hold refunds and it also seems to be holding up stimulus payments for ppl like me who can't verify their identity. I am lucky enough to be an essential worker so I sit have money coming in but I still need my money from the irs times are hard enough without the government holding funds from hard working Americans!!
Palm Beach	Real Estate	I do NOT think Florida should reopen at this time. Money does not compare to health and safety. We need to get some control of how Covid 19 is spread before we risk lives.Watching it spread in real time is NOT the experiment we want or need.

AMERICAN OVERSIGHT

Indian River	General	I believe the state should begin the process of opening slowly effective May 1. Allow businesses to open while maintaining the same social distancing and sanitary precautions that all other essential businesses have been observing. People need to get back to work. Businesses need patrons to visit the establishments so they can employ and pay their staff. The financial food chain needs to get going again. People with health concerns should continue to shelter in place whenever possible. Washing hands, sanitizing and wearing masks should also continue. Let's get people back to work! .
Lee	Accommodation	I am in the hospitality industry. I am an entertainer. My server friends and bartenders are not only roughing it, they are going stir crazy. You're talking about a segment of the population that are largely introverts who are holed up deprived not only of their lifestyle, but of what they love to do. Please open up with as least restrictions as possible.
Pasco	Recreation	Please consider opening outdoor recreation soon. This is a low risk option. Parks, trails beaches, camp sites, boat rentals and other venues where social distancing is very easy. people who frequent these places are usually trying to get exercise and would likely comply with health guidelines. We went boating and County Sheriff boats patrolled the islands to keep people from walking on them; this is wasteful and unnecessary.
Duval	General	People that are able to work from work and have been doing so without problem since this started should continue to work from home for a much longer period. I believe this will help the transition because they are still contributing to the economy and sustaining the need to flatten the curve while giving people who are out of work a chance to get back on their feet. My company has been talking about phasing people back to the office based on age and their pre-existing conditions but I don't think that should be the only factor. If the shelter in place in lifted, please at the very least continue to make work from home mandatory for those that are able to do so.
Polk	Healthcare	It is critical that we take our time and follow the most prudent advice of scientists regarding the lifting of restrictions and restoration of non-essential business. Florida's numbers of Covid 19 cases, hospitalizations and deaths continue to grow. These numbers could have been lower except for your delay, Governor, in implementing the stay at home restrictions. As it is, your allowing for church gatherings has most likely resulted in sickening if not killing Floridians. My husband is a healthcare professional at the largest skilled nursing facility in Polk County and my son and Sheriff's Deputy. They cannot stay home. Restricting person to person contact in normal business and social interactions greatly reduces the likelihood of them contracting the virus, bringing it to others in their workplace and bringing it home to our family. Follow prudent medical professional's advice.

AMERICAN OVERSIGHT

Brevard	General	Being an "essential" employee, I have to continue to work every week. However, our employer has required us to go to night shift. While this normally wouldn't bother me, I have a pregnant girlfriend and her son at home that I also need to take care of. I took off work last week to meet her for the sonogram of our child and was informed that I wouldn't be allowed in. My first child and I was denied because of the governments reaction to this virus. This state needs to re open so my family and I can go back to a normal life. Also, a lot of people in my area are members of gyms. Before the shut down, extra measures were taken to keep equipment clean and everything was running smoothly until the state government decided to strip ALL of us of our rights. Im a healthy individual with no underlying conditions who maintains a healthy lifestyle. Since you took my rights away for the minority of people, how about you force them to adopt my healthy lifestyle to keep them from getting ill. Open the gyms, open the doctors office, and open the state. Its ours.
Orange	Retail	Please open the state back up!
Lee	General	We all are aware of the risk, even when we get in a car we may die. take prudent precautions and move forward. We cannot stay hold up and treated as hostages by people afraid of their own shadows. Lets get on with life, God only knows when my number is up. I know what precautions to take Thank You now lets get on with life and back to work. A 68 Y.O. Vet and twice a cancer survivor and Vietnam vet.
Sarasota	Government	Open our state back up now! The whole point of the quarantine was to (supposedly) “flatten the curve” so that we didn’t overwhelm our hospitals. Check! Now open back up. You had no right to shut down our state to begin with. This is total government overreach, stripping us of our constitutional rights. People need to get back to work! Now! You are going to have a much bigger problem on your hands than you did with the virus. Your “solution” is worse than the problem. The REAL numbers (the ones the MSM won’t report on) are showing this virus to be no worse than the flu. If people are still scared to go out, then they can CHOOSE to stay home. It’s their right to do that. Stop making HEALTHY people stay home.
Lake	Technology	Please use the existing good data from the CDC regarding true Covid-19 numbers and death rates. There is no reason to destroy the health and lives of people throughout the state for a virus that statically similar to the annual flu season. This is a ridiculous situation when allowed to continue and the proposed restrictions on restaurants and businesses will simply cause more to shutdown and close up because the cost of running the business will not be offset by a maximum of 50% of the necessary revenue. The tax base in Florida and the rest of the country is going to be significantly impacted in an exponential way with everyday these baseless restrictions continue. I hope that we can recover as a State and as a Country but if we keep following the foolishness, we’ll ensure that we won’t. Again, if anyone is actually reading this, please look at the real data and extrapolate the true death rates.
Broward	General	If none of us are getting tested, how can we trust opening up the state, I am sure there are a lot of a symptomatic people that could spread the virus, what are you going to do to prevent it?

AMERICAN OVERSIGHT

Lake	General	Please follow the recommendations of health professionals. Do not open the state based on ranting Facebook groups and group-thinks.
Miami-Dade	General	Mr. De Santis, I respectfully, as an American Citizen, ask you to please re-open Florida. I feel the desperate need of Floridian people to go out and continue, as before the pandemic, to provide for themselves and their families. Although, Covid has affected many people around the globe, and my heart goes out to those families, it's time for us to rise up and fight this battle differently. Through the use of our most advanced medical technology and hard work, and most importantly, through our closeness to one another. The strongest vaccine to rid of this virus will be our closeness to one another vs. our distancing. Distancing will never make the US stronger, but will make us weaker. Closeness will make us happier and happy people have stronger immune systems, have the ability to come up with creative ideas and solutions, and in general happy people will have a great positive impact in our society. Even the strongest virus will have to bow down its knee when all of us pour out into Churches to praise God for our freedom and the ability to worship together with Thanksgiving for our beautiful country. Thank you for your consideration. God bless you and your family and God bless the United States of America. United in Jesus we will succeed and we choose to start moving forward right away. Best regards, Jenny Vargas
Brevard	Healthcare	Reopening FL now is a deadly train wreck in the making. The only way we can ensure the safety of our elderly and immune compromised is to stay home and self isolate. My job as a Chiropractor is not doable from a distance and can't be done maintaining 6 ft distances.

AMERICAN OVERSIGHT

Pinellas	General	Without a massive increase in available testing, and full contact tracing, it is entirely too soon to "re-open" Florida. Opening before at least mid May, or ideally, May 31, risks another outbreak in the state and a spike in cases and dead. As it stands, only 320,000 floridians have been tested, out of the 21 million residents. That's less than 2%. Currently, the only way to get tested is to already be sick (or have traveled to a "hot zone", or with a doctor's note), when we know that the incubation period is up to 14 days. (see Tampa Bay Times link below for reference). Moreover, Florida is one of only 10 states with over 1000 dead. Only New York City has a higher per capita death rate than Florida, even California and Texas rank lower. To put this in perspective, there are 4636 dead in China, out over 1 Billion people. The state of Florida has fully 25% the number of dead as *all of China*. Too much remains unknown about the virus - do anitbodies mean immunity? Why does it present so many varied symptoms? As of this date (April 25, 2020) there is no cure, no treatment, and no known immunity. Please listen to the advice of *every* frontline medical professional, doctor, immunologist, and virologist, who has even a modicum of experience with this disease.... It's too soon. Thank you for your consideration. https://www.tampabay.com/news/health/2020/04/24/florida-one-of-only-10-states-to-pass-1000-coronavirus-deaths/
Hillsborough	General	I believe the governor is doing a great job. I do think we should open the state over a 30 day period.

AMERICAN OVERSIGHT

Pinellas	Professional Services	While focusing on the safety of our state in the process of re-opening businesses, I ask to please consider that all markets and industries. are extremely dynamic in the sense that not all busineses operate the same way. Compared to store fronts, I work from home. I am a private dog grooming business. I operate from with no other staff but myself owner and professional stylist. I am a licensed, registered, insured, and certified business just like any other standing salon only with no foot traffic. Dog grooming is one of the industries that is essential but hasn't been considered one even though dogs and pets are deemed as family in the US. Dog grooming and vet centers work as a team to keep pets with severe skin issues for example under control. If we really focus on the safety of others, please look into the fact that some salons can re-open and offer services following strict guidelines. My concern is on the health of pets that suffer from conditions that cant be neglected. I had thought of maybe if some pet salons are allowed in each neighborhood, then people would have availability to the service. Although it would be a disadvantage for many shops, taking less appointments in a day and only grooming the pets that really need grooming is also an option. Before I got shut down, I was doing free pick up and deliveries with a mask and gloves on. I would pick pets up and have their owners hand me the leash with minimum contact, I was accepting payments through cash apps to avoid contact, I disinfected leashes and collars, disinfect in between each dog, and deep disinfecting at the end of each day. I was also not allowing anybody inside my shop. I have potential clients calling my business everyday asking if I am opened and they don't understand why I am not since unlike an active grooming shop I am not public. there are many home groomers that could be opened right now delivering safe services to pets in need. Please consider home based businesses as we are low- risk with the advantage of no foot traffic. instructions could be given over the phone and the only contact is grabbing and returning the dog to it's owner which consists of handing off a leash.
Hillsborough	General	Too soon.
Duval	Professional Services	NO! IM A COSMETOLOGIST!! WE ALREADY DONT GET ANY TYPE OF NEWSLETTER/MAGAZINE/EMAIL FROM THE BOARD OF COSMETOLOGY. THIS FIELD HAD DECLINED TREMENDOUS OVER THE YEARS. WHO WILL PURCHASE SAFETY SUPPLIES IN A FIELD OVERRAN BY FRANCHISE WHO ARE NOT REQUIRED TO EVEN HAVE A LICENSE TO OPEN??? THEY HAVE LOW WAGES, BO MANAGEMENT TIER, AND ALREADY ARGUE WITH EMPLOYEES FOR WASHING I I THEIR HANDS IN BETWEEN CLIENTS. BE HONEST ABOUT THE FIELD. DONT SEND COSMETOLOGIST BACK OUT TO DO HAIR UNPREPARED. GOD BLESS YOU
Orange	Food	Do not reopen until virus cases have gone way down. Open in reverse of previous for sure, with long delays on moving between steps to prevent having to close again. The worst possible thing economically is to have to close again if we reopen too early or too quickly. That'll kill confidence and then, once open again, no one will come.
Volusia	Food	We need the restaurants to reopen. With out them we have no hope of getting our state backup and running. You see even if you want the people in Florida to do staycations. With out a place to eat and place to sleep you have no chance. The way things were before shut down would seem ok to me 50 percent capacity and 6 feet between tables .

AMERICAN OVERSIGHT

Collier	Education	I am an Educator, and I feel there needs to be a system in place that will allow EVERY teacher, parent and student to be tested BEFORE they can return to school, and that will allow them to be REGULARLY tested, since a vaccine is currently unavailable. The reason I say this is because testing, right now, is limited to essential workers or those who have doctor notes. Also, since teachers care for elderly parents, and have elderly spouses, and children live with elderly grandparents, it's ESSENTIAL to have methods to catch ill children/teachers/parents with mild symptoms before they infect everyone AND to figure out how to deal with asymptomatic children/teachers/parents since it can take up to 14 days for them to show symptoms. I also believe teachers shouldn't have to use sick days to stay home and recover, nor should they have to take unpaid leave because, if that's the case, many will still come to school ill because they can't afford to stay home nor do they have the days in their bank. That would be a terrible decision for everyone involved, but it's reality. On the same line, children who are ill and are staying should also not be penalized for being absent 14 days in a row or more, and parents have to be required to keep them home and not send them to school sick (like they currently always do) because they have to go to work.
Alachua	General	My business (small law firm) is suffering greatly with current shelter in place orders. Nevertheless, I am not in favor of re-opening all businesses. I jread an article about Hokkeido (not sure I have spelling correct), Japan which had a second wave of virus infections worse than the first after reopening too soon. Let's learn from them. I'm reading about younger and middle-aged people dying of strokes caused by the virus. I'm seeing that younger people do not understand the value and requirement of social distancing, as their usual feelings of immortality overcome any common sense. My concern is that you will have half (or some percentage) of people going to work, to movies, to restaurants, to shopping malls, etc..The other half will stay home. People in both groups are going to get sick, but those in the first group are going to spread the virus much more quickly and end up with a much greater spike in infections and deaths. Let's be smart, let's learn from the actions and mistakes of those in other countries and states. And let's give doctors and scientists the time they need to study this virus and develop treatments and vaccines.

AMERICAN OVERSIGHT

Seminole	Retail	In a very short period, the coronavirus pandemic has darkened much of the United States' economy. Unlike prior economic downturns, market forces are not driving it, rather we are forcing a hard stop to much of American life. Some industries have been particularly hard hit. For example, brick-and-mortar retailers of products deemed "non-essential" have been forced to close by various state-issued executive orders over the past few weeks. Because of the distinction between "essential" and "non-essential" products, the hardships inflicted on businesses have not been equal – or intended. For example, in the furniture industry, big-box retailers like Walmart, Costco and Target have been allowed to sell furniture throughout the pandemic because they also sell other products such as medications, food, and hardware. Similarly, e-commerce retailers, like Wayfair and Amazon, are continuing to sell and deliver furniture because they have deemed themselves part of the essential e-commerce infrastructure. Yet, brick-and-mortar furniture stores that provide service and value to our local communities have been forced to close. This approach – which unintentionally allowed some businesses to sell furniture, but not others – is threatening the viability of thousands of local furniture stores that employ hundreds of thousands of Americans, like our 40 year old, Longwood based family business. At the very same time, this crisis is causing families to quarantine together, forcing people to work from home, while children study at home and college students finish semesters from home. Families are finding that they need furniture that will allow them to live and work comfortably and productively in their new home-bound realities. Some may find that they need specialized furniture, such as "lift chairs" that assist the elderly or infirm to be get in and out of chairs or electric beds. As a result, we believe that household furniture should be considered an essential product, and Slone Brothers Furniture should be permitted to operate consistent with CDC guidelines. The
Indian River	Education	Open up college workforce programs that require face to face interactions such as Police, Fire, and EMS academies. These academies are essential in adding more essential workers to departments already low on people.
Escambia	General	I would prefer social distancing last into the second week of June. One can't deny that the positive results keep climbing in FL. Most of the people in Pensacola act like. nothing is wrong anyway. Stores are open that shouldn't be and when you go into Publix on 9th ave people do not keep their distance. It's like they never got there notice or they don't care. I left because the mgmt there isn't making people adhere to the guidelines.

AMERICAN OVERSIGHT

Seminole	General	To whom it may concern: In regards to reopening Florida it is my opinion people are going to do what they want to do and people will get very desperate. Small businesses like mine are struggling to stay alive, and people need to get back to work. Even if people are only able to work part time it would be something. I think strong recommendations for social distancing and even mandatory face masks in public, would help slow the spread. A disclosure that your proceeding at your own risk and leave it to people to make there own choices. Wide spread testing would be helpful regardless of insurance coverage. Governor DeSantis your doing an amazing job, and no one could ever imagine the stress you are going through in this time! I just wanted to thank you for your continued efforts to keep our state running and keeping everyone safe.
Palm Beach	Government	We the people of Florida are imploring you, Governor Desantis, to re open our businesses. Allow us to return to work. Open all of our beaches, parks and libraries. Many of us are hurting economically and struggling to feed our families. You need a population that produces, not one you have to spend all of the state's money on to support. We want to work, we want our constitutional rights restored. Many of us put our faith in and feel we are being let down. We will not be voting you back in if you continue to trample our rights and ignore our pleas.

AMERICAN OVERSIGHT

Sarasota	General	We need to open up Florida, a very big percent of this state is aged and responsible, we are not children that need to be told what to do, when to do, and how to do it, that closely resembles a socialist state! I understand Covid19, I have watch all news programs including BBC NEWS, FRANCE NEWS, FOX NEWS, CBS NEWS, CNBC NEWS, HLN NEWS, besides goggling info, I understand the repercussions of opening up the state both ways, the good and the bad, I went from a fear monger, to careful, smart, diligent, and respectful. I have worked throughout this time, I have been blessed, except for 2 weeks I did take off with my employers approval, I think because stress was playing a factor in my health, now I went back to work today, and I was very appreciative of that blessing to be able to do so. What I most realized today, it felt good not to be stuck at home, emotionally, spiritually, and financially. It was almost liberating. I feel if we hold out too long giving our freedoms back to the people, there will be PTSD involved, if it has not already been installed into many Americans, the lesson has been learned, we know social distancing, we know to wear masks, we know to wash hands, this is the flu, a dangerous one, there may be some that push back on the guidelines, but now with the tools we have been given, we know what to look for and we move away from them. I want my freedom back, I want to go to the beach by myself and just sit and listen to the surf , it is relaxing for the body and soul, if someone comes too close, I will move, it is as simple as that, but not giving me that right is another story at this point. I also work in a health profession that was closed down due to Covid19, but thank God I work in a warehouse also and they were good enough to keep me on, but feel bad when my patients ask for help, and I explain we are closed. The lessons have been learned now let’s put them into practice, and make America strong again PLEASE! Thank you for listening, Sincerely ME
Leon	General	With as wide and as deadly this virus is i think that things should remain closed. Just cause things might be looking up doesn't mean things are all better. Just like when you get a cold you rush it and think your better your really not and you relapse.we rush this thing and get people back around everybody else maybe we will have a relapse. Maybe this time it's worse. I know people want to get back to normal. But no need to rush it and not at the expense of harming others. We just need to be patient. And let this thing run it's course.
Manatee	Food	Last thing we need is to re open too quickly. Let the doctors and scientists lead us in this difficult time. I’m a restaurant manager and would be making more if we were back open. But the well being of everyone, like my cancer patient father, is more important . We are in this together.

AMERICAN OVERSIGHT

Hendry	General	I live in Hendry County and work in Lee County. I see no less people out and about (in either county) due to the "stay at home" order. There are so many "essential workers" being exposed to all the people who are supposedly sheltering at home, yet we see no substantial increase in COVID cases. In my opinion, people are being cautious in their ways, and we need to open everything back up ASAP!! Enough charities and other services are available to help those who do not feel safe going out. The rest of us are ready to get back to whatever normal will be. I do feel that statewide antibody testing would help ease the minds of many. I am an essential worker (law enforcement), and my immediate household consists of only essential workers (pharmacy tech, mechanic, and farmer), and my daughter works in the COVID unit at NCH in Naples (lives in Collier County). For what my opinion is worth, please Re-open Florida and let people decide what to do as individuals.
Lake	Professional Services	Everything should be allowed to open now, leaving the decision to individual businesses whether or as to whether or not they're ready with the proper safety equipment and protocols set forth by federal and state officials. Especially in counties and cities with low infection rates.
Orange	Government	I vote no. Focus should be placed on making unemployed whole again. If that's by fixing the unemployment system or having the federal government continue checks to everyone, that's first or foremost. Opening the state won't guarantee anyone a job...corporations are greedy. They get a bail out, they send jobs overseas, they find tax shelters and loopholes to pay less. The common man/woman is getting hammered while everyone is focused on corporations. I vote no on opening the state. Take care of the residents, make them whole and then worry about the businesses.
Washington	General	No. It's too early. We just gave away a ton of money... The SBA loans alone avg. out to approximately $10,000 each For every person that works for a small business. (according to 2019 stats) Of course none of my kids (3 working) or I benefited at all from this. We each got the $1200...what 10% of what we paid in this year back. Even without any assistance none of us feel it is time to go back to normal. It's time to let all the people that have been living off of our hard work and taxes to step up. They got loans that will supposedly be forgiven from our tax $$. Let them pay salaries with it until we know for sure what this thing is doing. If not it will have all been for naught. Just a giant tax giveaway to the upperclass and a bunch of deaths that you will be responsible for.

AMERICAN OVERSIGHT

Broward	Healthcare	I don't feel as if we have seen a steady decline in cases - maybe there still isn't enough testing going on. I don't feel as if the decline has been a for a solid two weeks and if we open it should be with the requirement of everyone still having to wear masks in public and stores / restaurants shouldn't be able to open to full capacity. I feel like opening too early would ruin all the progress we have made. Would make more sense to me to be mid May.
Palm Beach	Government	Open parks and beaches: Vitamin D from the sun, ocean air and water are natural ways to boost our immune systems. People with or without families need to get fresh air by going to places like the park and beach, especially if they don't have backyards. We need to utilize parks and open spaces again. We pay taxes for these facilities to be open and we want them open now. It is imperative to physical and mental health to have public spaces open and available. Suicide and vitamin deficiency is just as if not more important health issue. Re-open restaurants with reservations: We're facing an economic depression and making this country and our citizens more vulnerable to China's influence and takeover. We've been self sufficient before and are fully capable of doing that again. What is happening with our Florida farmers and their produce rotting in the fields is a disgrace. Instead of the produce rotting, it needs to be sent out to the local restaurants, homeless and domestic violence shelters, welfare recipients, etc. Are we going to start facing food shortages because of all this? Restore local businesses: We need our businesses to open up immediately. There are many out of work, struggling to feed their families, make rent, pay their mortgages, and some small business don't qualify for the loans that they were promised. Stop 5G Infrastructure We can see the impact this pandemic is having on all of us as the internet offers us many opportunities for communication, exploration and collaboration, however, in many homes it brings with it an unseen problem: exposure to radio-frequency microwave radiation (wireless radiation) that is emitted from all wireless devices, including laptops, tablets, game consoles and smartphones. One of the many reasons to halt the deployment of the 5G wireless network is because there have not been any health studies on the 30GHz to 300GHz radio frequencies on human (or any life form) health. The FCC has not conducted any safety studies on such high frequencies and the affects of millimeter-wave small cell antennas. In comparison, 4G is around 8GHz. There is a significant difference
Pinellas	General	I left a comment to not reopen until safe but wanted to include that we need lots of testing.

AMERICAN OVERSIGHT

Duval	General	Please Re- open the state for all our sakes. My husband and I have been working continuously but so many others have suffered more by not working. Susceptible people will stay at home and healthy or asymptomatic can bounce back. Slow and steady reopening will help us get back on our feet. The beaches are safer, everyone has room to spread out. Make masks mandatory in areas of higher susceptible, hotspots, lock downs for nursing homes, schools, malls, sporting events, etc. People can still practice social distancing, 6 feet apart, and washing hands. The numbers don't warrant keeping everything shut down longer, could be doing more harm than good. I also beg you please make diagnosis testing and antibody testing available for everyone in the state. That's the only way we can know who has or had it. Thanks for this opportunity to share my humble opinion. Thanks for keeping everyone's safety your number one precious priority.
Brevard	General	We need to lift the stay at home order and let people get back to work! Unemployment isn't coming through so how can you expect people to not want to get back to work. If you are scared stay home!
DeSoto	General	Open the State of Florida, you're making the people sicker by keeping it closed.
Lee	General	OPEN THE STATE.!!!! I believe that the residents of Florida have enough common sense to do what is best for them and their family. Sure we may have a few more cases of covid, but I am confident in our healthcare system to manage them. Open up the state with the social distance codicil. it is obvious that our unemployment system is failing and people need to pay their bills. If we wait much longer than the original May 1st order I feel that we will not be the same tourist state for a long time. Also, our people will have a harder time recovering financially. Let's show the world that Florida can get back to business and do it right! Once again, OPEN FOR BUSINESS!!!!. Parks. Beaches. Trails. Launches. Restaurants, medical, retail and service industries. And all the others not listed. I'm willing to talk to anyone at anytime.. please feel free to call. And of course thank you for your commitment to this committee.(task force).

AMERICAN OVERSIGHT

Orange	Management	I request that guidance be formally provided that clarifies that neighborhood (HOA) swimming pools can be immediately re-opened for lap swimming and exercise purposes. Specifically, I live in a Homeowners Association (HOA) that has a very large community swimming pool with multiple lap swimming lanes, each of which are at least 6 feet apart. Lap swimming is about the only effective exercise that I can do, since it is a non-impact form of exercise. Our pool has been closed for over a month, and my physical conditioning and overall health have declined over this period of time. I have done extensive research, and have not found any federal, state, or local mandates requiring that neighborhood swimming pools be closed, other than maintaining social distancing. The Board of Directors (BOD) of our HOA closed our pool, because of the state mandate to close gyms. Although we have a separate fitness center, which I agree needed to be closed at the time, our HOA BOD has extended the vague requirement to close gyms to also apply to outdoor swimming pools. I strongly support and practice social distancing, but I see no reason to prevent me from lap swimming, where I am submerged in chlorinated water and separated by at least 6 feet from the next closest lane and person. In the absence of being able to swim, I have instead been doing long daily walks throughout our community, and I have observed 100% compliance with other walkers practicing social distancing. We have all seen the traumatic impacts of this virus over the last month. We don't need mindless, dictatorial requirements to mandate basic safety. Although this may seem to be a trivial issue to some people, it is very important to my overall physical conditioning and health. Therefore, until my HOA community pool is re-opened, I will NOT spend any money in our state or local economies, and you will not collect one penny of sales tax from me. In summary, please provide specific guidance that clarifies that community swimming pools can be re-opened for exercise purposes. Until this is done, anything and everything else that the state or local governments allow to re-open will not be patronized by me.
Lee	Recreation	Dear Governor DeSantis, I would like to make a comment with regard to opening the beaches in Lee County. My husband and I just moved here from Maryland and one of our favorite things to do is to take long walks on the beautiful beaches in Lee County. We see no reason why these beaches should not be open during this time. The Lee County beaches, such as Bonita Beach and Lover's Key are rarely crowded with lots of people. Please reconsider opening our beaches soon so we can at least enjoy the beauty of amazing sunsets while we exercise and try to stay healthy! Thank you for your consideration!

AMERICAN OVERSIGHT

Palm Beach	Tourism	I am eager to return to normal. However I am very very grateful and appreciative for the strong measures we have taken to slow the spread. I am glad to see we are being very detailed in our measures to reopen safely. I hope any pressure from protests to open too fast are ignored until the data supports that it is safe to do so. I am begging that our unemployment system be fixed. We cannot wait for these benefits any longer. I submitted March 19th and it is April 25th and I have not received a penny in assistance from Florida. We need a system overhaul and I refuse to give up and wait for my job to reopen and lose these precious weeks of income. We will keep fighting. I'd like to see social distancing measures in place and some sort of order that will have consequences for those who do not want to follow. I am very afraid of individuals who do not see the point of social distancing and will not respect the boundaries of those who do. I have already been harassed for wearing a mask in the grocery store and it makes me nervous to go back in public. I hope it will be required that all food service workers wear masks. Thank you for your time.
Polk	Food	My thoughts on re-opening Florida: Restaurants, coffee shops, and similiar businesses should be allowed to open soon, as long as they maintain social distancing with their table spacing. All tables should hold containers of sanitizing wipes so customers can wipe their own tables upon entering. Wait staff should wear masks. People need to get out and socialize. Bars and clubs should remain closed for at least 30 more days. You can keep people apart in restaurants, but not in bars or clubs. Small manufacturing businesses can be re-opened with social distancing, becoming a model for larger businesses not less than 14 days later. Houses of Worship can be re-opened on the weekend of May 15-16, maintaining social distancing. (Ushers or other persons to count people entering, maintain 6 feet between seated people, in every other row of pews or chairs.) Services allowed to broadcast over low frequency to vehicles in parking lots, parked in every other space. I realize there are other people besides the above who need to open their businesses and put employees back to work, but I figure this is a good start. Police should randomly monitor these situations as their time permits, with person in charge of the venue given a first offense warning, second offense close the venue for that day, third offense a fine to be determined by someone much smarter and politically attuned than I am. Thank You to whoever might finds the time to read this and forward it to the proper people. Walt L.
Orange	General	As a Disney employee, I understand the economic impact more than most, however I must encourage caution in reopening the economy in Florida. Please be careful opening too fast as a relapse is more detrimental than anything that could be imagined. I think some nonessential business could be reopened, but I caution in reopening any business that may reopen the pandemic concerns. I am willing to do what s necessary to ensure no further outbreaks of the virus to ensure we are all safe. I love this state and the people in it. So please take an extra precaution to ensure this ie everything we can do.
Putnam	Retail	I work in retail an it is way too soon to release people freely into the public.

AMERICAN OVERSIGHT

Miami-Dade	General	I feel we need to work towards opening areas where people have lost their jobs such as restaurants, hair and nail salons retail stores. Have workers wear masks limit people to half the capacity. Many are families are struggling and our economy is slowly dying. Those that can work from home fully should continue to do so. Elderly should continue to stay in as much as possible
Citrus	Recreation	Exercise is important and the Rails-to-Trails being closed is keeping a lot of people from getting safe exercise. We would love to see it back open ASAP.
Duval	Transportation	We should be able to open everything up except large crowd venues like theaters and concerts or Disney . We can social distance.
Orange	Healthcare	Open the State. Asap
Charlotte	Professional Services	I work doing laser on clients abd body treatments, it is non essential , j am concerned about being in close contact with my clients as well as going to restaurants, functions and other events right now! I think its too soon to opren our state! All of the tourists will be back and who knows what they will be bringing to us! Please rethink for our safety
Polk	Professional Services	I own a small business. I do massages nails and facial services. Even though this is a burden for most small businesses, I think we need more time needs to pass before we reopen. I know for myself, I need to gather more necessary items like masks ect to keep my clients and myself safe. These are things that are difficult to find right now. I was denied unemployment and have not received any sba grant money. The unemployment is a total mess. Too soon to open non essential businesses at this time!!
Indian River	General	I do not favor the reopening of Florida at this time.
Manatee	General	This crisis has been over blown. Healthy people should never have been required to stay home. This quarantine needs to end now. There are numerous ways to boost the immune system. We should focus on helping people become more healthy. Focusing on eating habits, exercise and vitamin supplements. Not pharmaceuticals. Stop killing the Florida economy! Reopen NOW!
Miami-Dade	General	I feel we need to work towards opening areas where people have lost their jobs such as restaurants, hair and nail salons retail stores. Have workers wear masks limit people to half the capacity. Many are families are struggling and our economy is slowly dying. Those that can work from home fully should continue to do so. Elderly should continue to stay in as much as possible
Broward	General	Follow the science and data! This lunacy has to end now. Open the beaches and let every single business owner open if they choose to. If people want to stay in lockdown, let them.
St. Lucie	Healthcare	Please be sure that all Healthcare facilities have appropriate PPE Please OPEN VISITATION in hospitals for at least 1 person especially to those in Critical Care Units, for both non covid and covid patients. Its heartbreaking that patients are dying alone and love ones can't be there. This can cause medical issues in survivors such as Tackosubo. Since SLC continues to have rise in covid cases with minimal tesing, not sure we are ready to reopen everything.

AMERICAN OVERSIGHT

Escambia	General	I do not think it is safe to open the state back up. We have only been shut down for 1 month.....thats NOT LONG ENOUGH at all to help stop the spread because look how quickly it travels.....look how many cases we have gone up since the state shut down.....so i hope nobody thinks the numbers will go down if we opened the state back up so soon. Me and my family will be in the house either way.....good luck....stay safe and god bless
Leon	General	To the Re-Open Florida Task Force, The social distancing guidelines that Florida has been practicing have been helping to prevent our State's healthcare system from becoming overwhelmed. However, reopening the State now would only negate the work that we have done so far to reduce the spread of COVID-19. I would urge you to consider extending the current protections put in place by the Governor to keep our citizens safe and healthy. While we are all looking forward to a time when these measures will not be necessary, we are not there yet. Thank you for considering the well-being of our State and its people.
Indian River	General	Please open up the state. Please. Let the healthy, willing people work and if people choose to stay home and continue to do what they are doing. But give us the choice. Please. I haven't gotten my unemployment yet. Haven't gotten business application approved yet. I have two kids. My husband is laid off. I'm laid off. All I want to do is go back to work. Please.
Sumter	General	I think it's too soon to re-open. That being said, I do not feel that it is too soon to plan to re-open. We do not know enough about this virus currently to re-open yet. I feel that it is likely to cause more deaths that did not have to be. I have been lucky...I am healthy and working still. A lot of others are not as fortunate. I would like to see the unemployment system in better working order for them to stay afloat during this time.
Miami-Dade	General	Florida SHOULD NOT and I repeat SHOULD NOT RE OPEN until this pandemic is no longer a risk as much as it is right now. In fact I don't think we're closed enough, people should not be allowed to leave their houses PERIOD!!! Floridians are continuously being reckless and going out everyday and without protection. This will never end if we continue with this ignorance. There are seniors like me who lost their Senior year because of covid 19 and we would like to at least go to college on campus and not online. People need to get back to human interaction, this isn't healthy and in order to return to this safely WE MUST CLOSE DOWN FLORIDA PERMANENTLY AND SERIOUSLY. We should follow these procedures until new cases stop arising. As a future voter, I will have my voice heard and will be able to gather hundreds of people who will agree with my views and opinions and will only vote for people willing to end this sooner rather than later.
Sarasota	Recreation	I am an avid walker and bike rider, and love all recreational options Florida has to offer. However the spread of COVID-19 should be our utmost concern and we should have a logical and medically suggested amount of time to allow sufficient calming of the virus spread. It is not critical that we be able to lay on the beaches, that is a privilege. Please hold on opening our state until the medical professionals guidance directs us so.

AMERICAN OVERSIGHT

Brevard	General	Please refer to history, the Spanish Flu in particular. We are not ready to reopen so soon. Thank you for closing the schools for the remainder of the year.
Lee	General	Florida and Lee County have done a great job monitoring COVID-19 and instituting smart policies to keep its residents safe. Looking at the data and how well Lee County and Florida are going in comparison with other counties and states, it's time to phase in a loosening of stay at home restrictions. I am essential worker, so I have not been unemployed. Considering the percentage of our population in the hospitality industry, they need to get back to work as soon as possible. I was at a price club today stocking up on food and I was amazed at how many people were there. No restrictions on the numbers going in. No restrictions on wearing masks. I don't think that's fair to our hospitality workers
Broward	General	If we look at the testing volume and compare it to the number of positive cases we see that the testing capacity has been relative constant while number of cases is rising linearly. If we had enough testing we could be exponential and we are most certainly not near the top. Reopening will make sure thousands more die at your hands.
Miami-Dade	General	feel we need to work towards opening areas where people have lost their jobs such as restaurants, hair and nail salons retail stores. Have workers wear masks limit people to half the capacity. Many are families are struggling and our economy is slowly dying. Those that can work from home fully should continue to do so. Elderly should continue to stay in as much as possible
Lake	Tourism	Please reopen the state, we want our jobs back. Ask people to wear a mask as they go out, take temperatures of guests entering theme parks. We have been unemployed since March 14th and have yet to receive unemployment money. We just want to go back to work. Please do not implement insane tests and restrictions to return to work. We are adults and can make our own decisions, please respect our freedoms.
Hillsborough	General	If im going to continue to work for the same pay while the unemployed are getting paid 600 to stay home then the state needs to re open. This is a free country if we want to go out in public thats on us. Those that want to stay home let them stay home.
Hillsborough	Recreation	All outside recreation should open. Parks, beaches, tennis courts, pickleball courts, skate parks,
Hernando	General	Please do not open the state too quickly. Put safety first.
Broward	Government	In my opinion things should stay as they are until a cure is invented. From what I see the number of people testing positive has not stopped. If things go back to normal it will get worse and many more will loose their lifes. Also every single person in Florida needs to be tested that is the only way we're going to get ahead of this pandemic.
Seminole	General	I believe its still too early to open beaches and theme parks etc. Businesses need to be opened but recreational sites not yet.
Orange	Healthcare	Re-opening Florida before we've had time to "flatten the curve" is dangerous and will put citizens lives in jeopardy. It's irresponsible and puts public health at risk. Florida needs to heed advice and guidance from the World Health Organization and medical professionals and remain in a Stay at Home order.

AMERICAN OVERSIGHT

Miami-Dade	General	We absolutely must NOT open up the state until we have a significant flattening of the curve, and at least two weeks of decreasing cases and deaths. Doing so would only serve to facilitate a resurgence of the virus and an even longer shut down. I am in a high risk category and fresco it is currently absolutely unsafe to return to business as usual. We must continue to sacrifice now in order to beat this.
Santa Rosa	General	Every day beyond April 30th where our state is locked down because of COVID is 💯 The responsibility of FL state elected officials. At that point, every business that suffers, every mortgage that must be foreclosed on, every suicide as a result of the mental stress the state is placing on everyone, the officials need to own that as there soul responsibility. Every delay in opening the local economy needs to be heavily questioned by those it impacts. We can no longer allow our freedom to enjoy the beaches in which we pay taxes on, enjoy the freedom to go to work and make a decent living, and most importantly enjoy the freedom to come together and celebrate activities and people we love. #openflorida
Collier	Recreation	Please open the gyms! It's easy to keep a distance and helps keep us healthier.
Manatee	Professional Services	Please follow opening procedures ONLY when it is deemed safe by public health experts. Let's do this RIGHT the first time. I am a small business owner that REALLY wants to go back to work, but only when it's safe to do so. I also have a daughter with asthma and a grandmother that is very high risk health-wise. I will not put their safety in jeopardy so that I can work.
DeSoto	Finance	At a minimum, I would expect that we should continue with a shelter in place or safer at home order until the state has had 14 straight days of reduction in Covid 19 cases. I think that large gatherings should be banned indefinitely until better treatment options or a vaccine are made available. Increased testing continues to be a necessity. Those who can work from home should continue to do so, and social distancing should be mandatory when outside the home. None of these are easy choices, and they all have consequences, but a rapid reopening that fuels new infections could lead us right back to a shelter order if we do not properly plan.
Lee	Manufacturing	Breweries currently have the same designation as nightclubs, however, most often we operate more like a restaurant -- with a supporting food truck onsite. I hope that you will consider letting breweries open with limited capacity (no standing room only, tables pulled apart, etc) at the same time as restaurants rather than having us wait to open with dance/nightclubs.
Orange	General	Re-open now!!!
St. Johns	Professional Services	There is no reason to rush the opening of the state of Florida. I would feel that an impulsive decision such as this would be laying the constituents of Florida at the feet of those looking to just push this through. We would become collateral damage for political enhancements. Nearly all involved in public health say rushing this is deadly. We must take the opinion of knowledgeable and practiced professionals over hearsay best guess responses.

AMERICAN OVERSIGHT

Sarasota	General	DON'T OPEN YET! Our state runs on tourism, but tourism brings illness. Let's get our people as stable as possible before the tourists come back. I suggest staying closed until May 31. I'd rather do the time now - than have to do this all over again later in the year.
Sumter	Recreation	Please open small businesses, gyms, and recreational areas . People may keep safe distances in them and maintain their own and others safety.. Open Churches too, as people who wish to go can safely sit apart. Thanks
Orange	Tourism	We need to reopen FL every actual data point I'm looking shows covid is no worse then the FLU. Worldwide we have 200k deaths while the flu has between 250k-650k deaths per year and thats with a vaccine. We should let people choose what they feel comfortable with. Advise those at high risk to continue to stay home and reopen with some basic rules in place. Wash hands, don't come to work if your sick, check for temperatures, social distancing, etc. We need increased testing and positive results should be placed in at home quarantine, but let those that are healthy out and let us make our own choices.
Pinellas	General	I work as a makeup artist I don't feel it's safe going back to work at this time.
Jefferson	General	Several things come to mind.... Fast and accurate testing that ties to a full-scale, statewide testing and contact tracing system which is linked to an effective quarantine-and-treatment system. Allow businesses with minimal contact to open with guidelines. A florist comes to mind. Open up elective surgeries that do not require an overnight start and that occur outside of hospitals to start back up.
Okaloosa	Tourism	Good evening, Me and my husband owe a home in Destin. We rent it as a vacation rental in order to be able to pay the mortgage and other expenses as my husband and I had to move out of state for work and his salary dropped. Having to pay the rent and the mortgage, we need the income from the vacation rental. Renting the home we guarantee that maintenance people, cleaners, management personnel etc have direct jobs, and this is not counting the indirect ones (all the business that depend on tourism mere in destin, which are almost all). Since the vacation rentals were cancelled, we have experienced a big loss and it will be even worse if vacation rentals continue to be blocked. It is discriminatory that hotels are open and receiving customers, that have to share spaces with other customers, but we cannot receive any. Our home sits in a private closed community, with no neighbors around, with no shared facilities, and SAFE TO QUARANTINE. People booked the home knowing that the beaches, shops and restaurants were closed but the rental prohibition extension forced us to cancel. Please reopen the vacation rentals, at least the ones that can guarantee a safe environment, like ours. Thank you

AMERICAN OVERSIGHT

St. Johns	General	I want all Floridians to be healthy and safe. With that said, we can not sit by ideally as the economy dies and peoples futures are changed forever. People should be able to steady return to work and normal life even with Covid still present. Let's face it, we aren't going to see Covid disappear and we can't live in fear, inside our homes until there is a vaccine or advanced drug treatment. Let who have a higher risk tolerance go outside and those who are fearful (for many valid reasons) stay inside. People will generally follow better hygiene and distancing methods to prevent from getting sick after all of this. The state should not mandate what private citizens can and cannot do when it comes down to simple civil liberties. Unless we are prepared to sit and wait in our homes for a cure or vaccine, even if it takes a year + we need to open things up. If we waited another month or two what would be the difference? Covid cases will still appear and critics will say we opened to early. You can't make everyone happy, but giving the CHOICE to people to live and risk as they see fit is what should happen.
Palm Beach	General	Just was the grocery stores and box stores have managed to operate with minimal -yes minimal- employee sickness, we CAN do the same in a more open state. I considered Palm Beach County with 1.5 million residents visiting Publix, Whole Foods, Trader Joe's, Walmart, Target and more with few Employee cases reported . These companies didn't provide employees protection until a few weeks ago. We can do the same for many other retail stores, salons, and more Open our state. Open our outdoor spaces.
St. Johns	General	Enough already. The data proves this is less deadly than the seasonal flu. People are watching Ron and will remember at election time. It is time to bury our dead, care for our sick and get back to work. Someday I want an explanation for our beaches only being open from 6am to noon????? This is simply little tyrant behavior. I also think it is time to investigate the grocery stores for playing games with the toilet paper. This simply keeps the panic going. Maybe that is your wish Ron.
Seminole	Professional Services	I would like to see the state opened back up very soon. Especially, hair salons,barber shops and for people like myself in the state, The Hair Club. As a client of the hair club myself and other clients rely on the professional stylists there to maintain the hair systems that are applied. After two months of not being able to have appointments to have my hair cleaned, and reapplied, my hair system is extremely gooey from the adhesives used to apply it to my scalp. It is barely staying on my head. At the Hair Club they always use gloves and sanitize their equipment, their stations, which are in separate rooms,(client and stylist only in the room). The only thing that would be necessary for further protection would be for both client and stylist were to wear masks. Please, Mr. Governor, at least let hair salons, barbershops, and the Hair Club be allowed to open immediately. Thank you, Andrew Goodman

AMERICAN OVERSIGHT

Broward	General	I have been home home come Monday 8 weeks and I am not complaining if it's going to keep me and my family safe. I do understand that people is eager to get back to their normal lives but not to rush it. Let's make sure that it is safe for us to go back out there and not be fearful because for someone like me who lives with Asthma I am very fearful. I vote open up June 1 2010
Duval	Recreation	We need to treat people like adults. Open the state back up and let us social distance, wash our hands, wear masks, etc, if we want. Those who don't want to open back up can stay home. We need to focus our efforts and resources on protecting the vulnerable. The rest of us should accept personal responsibility for our actions. Secondarily, the virus has a half-life of 18-hours indoors. That drops to 3 minutes in the sunlight. Why on earth are we restricting any outdoor recreation? Open the beaches, open the playgrounds, open the golf courses, open the tennis courts. People are much safer outside than inside. Review this study: https://www.medrxiv.org/content/10.1101/2020.04.04.20053058v1 Outdoor transmission of the virus is practically impossible. So why are we locking people indoors?
Hernando	General	I think Florida should be open in a very very slow way, the beaches should be allowed open for walking only, not for swimming or sun bathing and there has to be strict measures in place to make sure this happens because a awful lot of people do not keep the social distancing rule, the parks open for the children to run around but not play grounds with slides etc, sport games for now without fans be televised, I do not think hair salons should open (and believe me I need my hair cut) its just to much close contact at the moment also the same with nail salons and Tattoo parlors, we need to see the cases drop more first, clothes shops with social distancing in place could open, restaurants with outside dining with a limited number sitting apart, but not inside dining, I feel the hotels and tourist industry could open in small phases, and I feel for now wearing a mask in public places should be a must. I am 68 years old, I have MS and have been in lock down for two months now and I still feel Florida needs to wait
Leon	Healthcare	My wife and I are interventional cardiologist at CRMC in Tallahassee. We would love to assist in reopening Florida safety.
Santa Rosa	General	I am all for keeping the state closed if unemploymemt and the extra $600 were available. Since they are not we need to re-open Florida. Families that live paycheck to paycheck are now 7 to 8 weeks with no income. If we do open, open it all back up. Fix unemployment and you wouldn't have the problems your having. Also, raise it higher than $275. What an embarrassment. My Father made more on unemployment in the 1970s.

AMERICAN OVERSIGHT

Palm Beach	General	I am an educator with a PhD in microbiology. I also have healthcare experience as a foreign physician. My main concern is how to open the economy in a safe and effective manner. There is still a lot we don't know about this virus and the disease it causes, but we can't let that freeze our economy. However, one thing we don't want to do for sure is to open the State in an unsafe manner. Doing so will backfire, lead to many more cases, lack of public trust and confidence, thus resulting in the worst economy collapse ever. I have studied SarsCov2 and COVID19 extensively (please fell free to request copy of sources). I would suggest the following: 1. Assure a minimum 6 feet distance between workers and customers. This can be achieved by limiting the number of individuals physically present at a given time in the premises (could be compensated by increasing hours of operation). 2. Mandatory nose and mouth covering in public. Obvious short-term exemptions: dental patients, swimmers, etc.) 3. One-way circulation in sidewalks, parks, beaches and other public areas. 4. Widespread hand-sanitizing stations in open areas and buildings. 5. Shoe sole sanitation stations in hospitals. Would extend it to entrance of other buildings. CDC is publishing soon on this. 6. Increase educational campaigns. The more people learn about how to prevent infection the more they will see these measures as an effort to keep them safe and not as unnecessary restrictions. 7. Make educational campaigns accessible to non-English speaking individuals. 8. Make use of the wonderful resources we have in Florida: Vitamin C rich oranges and Vitamin D sun exposure. Although not a cure themselves, they provide for a healthier immune system. A healthy Florida will lead to many more people wanting to come to a State that is rich in those two important infection-fighting resources.
Broward	Food	We should not open large public spaces until testing is available to ALL, not just those exhibiting symptoms. Bars should stay closed along with concerts and sporting events with large capacity. Restaurants could be open at reduced capacity, if they can space and social distance. Beaches and Parks could open in Mid-May, as long as no large gatherings are permitted. Keeping it to 10 or less for gatherings.
Leon	General	This virus is going to get worse before it gets better. There will be an increase of cases of positive for covid19. There is no point in what we have already done if you allow things to go back to normal. Money is not always as important that the health of your friends and family.
Duval	General	This has been so hard on all of us. We have been watching the numbers closely. It really looks like the northern counties at least can open up now. So let's do this! We were not meant to live like this. I believe people will be careful because we want to get back to life. We want to see family & friends. We want to go to church. April 30th isn't far away. Please open us back up!!

AMERICAN OVERSIGHT

Okaloosa	General	STOP THE INSANITY! It is time to reopen the Florida. An honest review of the facts makes it very clear that Covid-19 does not pose anything even close to a pandemic-level threat to Floridians, citizens of the other states of the union, or the citizens of any other countries across the world. Even with the inflated numbers medical personnel have been asked to report, the Covid-19 numbers aren't even one-fourth of the CDC's numbers for the annual flu! Let's admit this grave threat to humanity turned out to be naught and get back to our lives!
Broward	Healthcare	Do Not Re-open Florida before June. Please be very careful in the opening up of the State while 100's of people are still dying . Please make your decisions based on the CDC, science and medical fact only. Err on the side of caution to protect the most people. Thank you.
Hillsborough	General	My husband and I own a private fitness studio. People are concerned about their health and well being, and working out promotes positivity and less stress in our lives. We can practice social distancing while being able to provide a service to those that would like it. We have masks, gloves, and sanitizer to wash down equipment in between clients. We did this prior to the non essential shut down. We didn't wear masks and gloves, but have always washed down equipment. This is not like going to a gym where there are 100 people in it, and many do not clean the equipment after they use it. If a person feels comfortable to open for people, and the people want to come we don't have a concern. We will ask people that are sick to not come in to our business and if anyone has come in to contact with a Covid 19 individual to reschedule appointments after a 14 day time frame. This was posted on our doors prior to the shut down as well. Personally we will continue to practice social distancing in all matters, and will not be a part of large crowds for some time. We vacationed at least 3 times a year by plane, but this year we don't know if this will be possible and can only hope. Thank you for providing this area to provide feedback.
Broward	General	I look forward to the reopening but would like to see it reopen slow as I would prefer going couple weeks in quarantine than having a relapse and messing up the entire summer. I am afraid that people would go wild at which time we could lose people and the hospitals be impacted again. As a senior citizens I do not intend to rush out until the month of June, will limit my contacts, and that is my advice to all Seniors and to all with underlining issues regardless of the age. Thank you for giving me a chance to voice my concern.

AMERICAN OVERSIGHT

Orange	General	Hello Governor Desantis or team, as a resident in Orange County we are mostly forgotten as we are approaching 1400 cases. The topics I see is mainly in south Florida. We are being affected to, but for the sake of the safety of everyone well being, I recommend you extend the stay at home order until May 15. This allows for more preparation and discussion within each community. Looking at Thursday and Friday Covid cases level began to rise again surpassing 1000 or almost 1000, and even 60 deaths reported in a day. If you choose to extend the stay at home order 15 days more (May 15), please keep gyms, schools, parks and other nonessential things close and even restaurants unless there willing to allow outside eating more than 6 feet apart from everyone. I hope you recommend these suggestions and take Florida on a more safer path.
Osceola	Government	Reopening the State should be very simple: let everything reopen with the state's guidance being quite simple: maintain 6 foot spacing as practically as possible; encourage citizens to continue updated hygienic recommendations; encourage businesses to continue updated hygienic recommendations throughout their human contact areas. People are resourceful and ingenious at times--trust them to do the right thing(s). Businesses ARE people too: let them do the right things. Government NEVER gets things right so ask people to do the right thing rather than mandate the same. The overwhelming majority of people involved WILL GET THIS RIGHT. Thank you for your time & consideration.

AMERICAN OVERSIGHT

Alachua	General	"The Florida statute (381.00315) governing public health emergencies defines isolation for 'an individual who is reasonably believed to be infected.' There is no provision for isolating the entire population. The statute also requires 'rules to specify the conditions and procedures for imposing and releasing an isolation' (emphasis added). Furthermore, the statute only authorizes isolation and quarantine for 'communicable diseases that have significant morbidity,' which we now know is not true for COVID-19." (Quote from my April 17 column; link provided below) The Governor and county commissioners have violated their oaths of office by trampling the rights of Florida citizens for no legitimate reason. Even if they did have the authority, the data do not support a complete lockdown of the state as I've been arguing since April 3: https://alachuachronicle.com/refusal-to-reopen-economy-exposes-real-agenda/ https://alachuachronicle.com/sweden-is-showing-that-the-destructive-lockdowns-were-unnecessary/ https://alachuachronicle.com/paying-the-price/ https://alachuachronicle.com/there-doesnt-seem-to-be-a-plan-is-that-intentional/ https://alachuachronicle.com/opinion-panic-ensures-bad-public-policy/ There is no reason the entire state should be treated the same as Dade and Broward Counties. Open everything now. Do not allow local authorities to impose stronger measures. COVID-19 poses almost no threat to healthy people under 65 (with no medical issues). Allow citizens and business owners to judge for themselves. Businesses can make their own accommodations to cater to paranoid customers who fear COVID-19, but they should not be required. The one thing the state government can do to help reopen is to ensure businesses cannot be sued for COVID-19 cases that will happen once people emerge from their quarantines, which prevented herd immunity.
Hillsborough	General	Start to open the states & cities economy May 1st following the Federal Governments three phasing recommendations. We have to start to go back to normalcy. We are Americans and can walk and chew gum at the same time. Open up May 1st please!
Broward	Government	Do not reopen Florida it's not safe.
Bay	Transportation	I think something similar to what Georgia is doing but maybe not the nail and hair salons. Restaurants, movie theaters and some retail should be able to open with restrictions in all but south Florida.
Highlands	General	The thought of opening up Florida to allow more idiots who are non-compliant in is just scary. Heck, the morons here can't get it through their own heads this result in their death. We are not dealing with geniuses here! People actually are getting together for parties...SMH. I am content to save myself by steering clear of the common sensibility challenged.

Miami-Dade	General	If more testing is performed and businesses can use Plexiglas, masks, gloves and maintain waiting areas within the 6 feet, than yes. The State of Florida needs to keep a close watch on the numbers after two weeks and we all should be tested for the antibodies as soon as possible to have a true base line. We do not want to flood our first res-ponders or hospitals. Our respiratory therapists, personal asst. therapists, doctors and nurses need PPE as they do not have enough.
St. Johns	Education	Please make sure to add TEACHERS and other school based employees to your task force for education. There truly should be representation from ALL districts. I am a Dean of Students for St. John's County and would be more than happy to volunteer my time to come to Tallahassee and assist.
Osceola	General	PPE (mask) and distancing requirements (with consequences) need to be in place for any level of opening. Close face-to-face contact businesses should be the last to open, not first.
Volusia	General	Please, do not open yet! It's to soon! Thank you for allowing us to put are input.
Brevard	Retail	Please re-open retail stores we can safely shop in Publix observing social distancing we can do the same in Department stores and boutiques. It has been long enough open the stores!!
Santa Rosa	Real Estate	First to begin with my opinion is that most counties r not the same I think the beaches should open n let ppl in that r less than 10 Second. The governor is doing nothing to help the self employed. I have a daughter in law that has 2 kids n n cannot even get assistance She is a new to the job realtor n does not make much She is considered self employed. Why is it that ppl r pushing for illegals to get the unemployment n my daughter in law is struggling to feed her kids. Can't even at this point pay her car note. Please help the ppl like her. She is struggling. Some ppl r getting so depressed. Help the self employed please governor. Ppl want to go back to work to support their families. This is ridiculous.
Citrus	Healthcare	To whom it may concern, Reopening Dentists offices prior to a decline in the virus is dangerous to the health of the whole community. Dentistry requires the use of high-speed Dental instruments that create aerosols that cannot be controlled. This will cause the hygienist, the dental assistants, and the dentist to become sick and carriers of the virus. On top of bringing this virus home to our family we will also unknowingly be giving it to our patients. Our offices are unable to get the proper PPE n95 masks. We must have proper PPE before we even think about seeing the public. Dentistry should only be seeing emergency patients until June. The sacrifice we have all made has worked. Let's not destroy all the good by opening to quickly and unprepared. William Temme RDH

AMERICAN OVERSIGHT

Broward	Food	Restaurants and bars should not be open till this is under complete control!!! delivers n takeout is fine. I work in the industry and would really prefer not to be exposed to people with covid-19 regardless of how dangerous or not it is I seriously hope you take that into consideration because it is a cesspool of germs
Hillsborough	General	As long as it's safe to re open things should re open slowly. For businesses that allow work from home options that should continue until further notice because their is not enough workspace in most offices to have all employees safely social distance. Mask should be made mandatory until the spread slows. The one thing alot of people are afraid of is if we all go back outside without things contained death rates and more cases will increase causing us to do an even tighter lockdown.
Brevard	General	Please reopen the state immediately. I feel like a vocal minority is promoting these lockdowns and they aren't based in science. We need to protect our vulnerable and build up immunity in the healthy. We can't let our businesses fail. We can violate people's rights.
Miami-Dade	General	I think it would be very irresponsible to open at this time because this virus is not a joke and is only getting worse. Please do not open yet until it is safe to do so. Thank you
Seminole	General	I think we should listen to medical experts not economists when it comes to a pandemic. I believe it is too soon to "re-open" the state.
Orange	Real Estate	It doesn't make sense reopen right now especially without having concrete proof that the people will be safe. This is a global emergency and it should be treated as such..the people do not feel safe to go anywhere..there needs to be clarity on exactly where we are within the state..we dont want to open prematurely and have another waive of COVID19..the economy will not thrive if people do not feel safe
Brevard	General	Please open May 1! I'm all for keeping some guidelines to percent of fire code for locations or even some distance but we should NOT be under stay at home as May 1. If people have a problem or are worried they can stay home. Please open ASAP. Our family depends on the money. My husbands hours cut at hospital because no elective procedures. It's awful. My daughter is a waitress and because they give her take out orders she doesn't get unemployment but it's not enough to pay rent, insurance, groceries etc. We beg of you!!
Palm Beach	Government	DO NOT open up the beaches and start business again while there is no flattening of the curve for 14 days. Don't open us up to more illness and death.
Seminole	Finance	Please fix unemployment (Connect). I know people that have filed 7 weeks ago and still do not know the status of their claim. Disney employees will probably get checks because they were ushered thru system, NOT RIGHT! Florida will not open up until people that lost or furloughed because of virus receive help. Governor said DIsney employees will not skip anyone that made claim before them, but that seems what is going to happen. Also, rest of nation is getting federal unemployment, while some are still waiting for State of Florida to approve them. Please fix ASAP Governor.

AMERICAN OVERSIGHT

Flagler	Professional Services	Dear Governor, I am a licensed cosmetologist in Palm Coast, FL. I am writing with concern on where cosmetologists stand in the phases as we are not essential. We are with some clients for several hours for their needs and literally touching them/in contact with them. Wearing gloves while cutting women's hair is nearly impossible, all the while performing the haircut properly. We are in our clients faces while cutting their bangs, and coloring/highlighting etc... We are literally not even 1 foot away, while performing services on our clients. It is impossible to safely practice social distancing. I can't wait to go back to work because I love what I do, but I also don't want to have to do this quarantine all over again because of the possibility of coming back to work too soon as we are not essential. I appreciate your time and wish you well. I hope you & your team take this into consideration. Sincerely, Ashley Lupi
Brevard	Tourism	If our state is opened too soon, there will be an influx of people coming to Florida to get away. This will increase our exposure to the coronavirus.
Duval	Retail	I hope that the governor lifts restrictions of gyms and dining rooms. I think you can easily do social distancing at these places. Salons as well. I know a lot of people who work in these areas, and are really struggling.
Broward	General	Please, do NOT, under any circumstances, re-open the State of Florida until it is the SMART action to take. Thank you! Furthermore, it appears as though the Public Feedback website is having the same technological issues as is the Florida Re=employment, DEO website, as I am unable to submit my input! See message below! 'We are experiencing higher than usual traffic. Please try submitting this form again. If the problem continues we recommend submitting again later, or contacting the owner of this form for assistance.'
Collier	General	I would like to suggest a trial opening for about three weeks, with strict monitoring by health departments. This would allow those of us who have been trapped here in Florida the opportunity to get back home, which might help to reduce the case load here. If the rest areas on the highways are carefully disinfected and those of us on the road wear masks and gloves when we are using public bathrooms, and we observe social distancing, it seems like this would benefit everyone. If the caseload stays stable, then the state could continue on. You probably wouldn't see an increase for a month from the opening, right? If thousands of people leave, your numbers could even improve.

AMERICAN OVERSIGHT

Broward	General	The COVID-19 positive numbers are rising in my community. We are not ready for re-opening for business. Seriously, we must test people before thinking about re-opening.
Orange	Tourism	I think it would be better if we held off u til the end of May to begin re-opening the state of Florida. Then, slowly re-open it
Orange	General	Governor DeSantis you must reopen the state,including the theme parks as soon as possible,the economic situation can still be saved,this state survives on tourism,without it it is dead and many residents will suffer greatly.I understand the stay at home order to flatten the curve,however given that the situation at the hospitals is not as dire as it could have been and that infections have dropped it's time for you to save the state by reopening the economy.You said it yourself if people are at Costco buying toilet paper during the lockdown why can't they safely eat at a restaurant or visit a theme park,as long as people do it safely I don't see why we are risking losing our livelihood,unemployment is as broken as broken gets,people will start losing their homes and the ability to feed their families,all for what,the truth is the final outcome of the virus will be a vaccine or 70-90% herd immunity,people have died and more will die but please reopen the economy,aside from the virus how many will be crippled with the anxiety,stress and depression of the situation because you're not opening the state,do..n't make the situation worse than it is,reopening our businesses,restaurants,hotels and theme parks with safety is the solution,do what needs to be done,those who are susceptible to getting sick,elderly or those with pre existing conditions know they can't be out and about like others,but come May 1st we need to start moving forward.
Palm Beach	General	DO NOT,OPEN THE STATE. LEAVE THE RESTRICTIONS IN PLACE. THEREMHASNT BEEN NEWRLY ENOUGHMTESTING DONE YET M
Palm Beach	General	It’s too early to open the State, particularly because there’s not enough testing! I live close to the beach. People are not responsible enough to social distance on the beach! I have seen it first hand. Just wait until we have a steady decrease in cases. Better to stay in a bit longer so that we avoid another shut down in the fall!!!
Palm Beach	Real Estate	In the middle of a war one makes the necessary sacrifices and does not say I don't like this any more. We must pull together and do what is hard but right. Nobody is happy to suffer financially, but we must put it second now.
Broward	General	Wait at least another 2 weeks. Let's get this behind us safely and then open our economy
Indian River	Retail	Being in retail sales, we work directly with customers and at cash.This puts us in harm's way . I have underlying conditions that make me afraid yo go back too soon. Another 2-3 weeks and I will be more comfortable returning to work.

AMERICAN OVERSIGHT

Lee	General	As much as I don't like everything shutdown, I do believe we need to stay shut until the curve comes down over a sustained time. It's sad that we didn't jump on this earlier, but we are where we are now. Let the science and doctors be our guide. I'm thinking long term here, big picture. We need to protect lives and health first. The economy will come back. Our tourist season is over anyway. Open spaces, such as beaches, hiking and biking areas should open... with reasonable distancing. My business is hurting, but I don't want to die and certainly don't want my loved ones to die. I'll take the financial hit now, for a safer next year.
St. Johns	Transportation	Let's do this. I see everyone going out anyway. This was a major over kill by the liberal media. Let's just allow people in the high risk situation stay quarantined. Our economy can not take much more of this.
Palm Beach	Information	You have a committee of 98 Republicans and 2 Democrats who collectively earn in the billions each year and have access to every scrap of information asking a bunch of people who have expressed their opinion to a major pollster, on their way to the nearest, loudest bar how you should proceed. If we open up, what is the probability of kicking off a new round of victims? What is the probability if we stay closed? How many businesses will go under and the unemployment rate go up if we stay closed? If we open up? Where is the money coming from to finance the handouts? How much further into debt is the U.S, going? How can we possibly pay down the debt? Any notion of how long till we get vaccinated? Is our military dangerously depleted by the virus? Lot of questions few of us know the answer to. Give it your best shot and don't look back.
Martin	General	PLEASE END THE SHUTDOWN.
St. Johns	Government	Please don't open too fast. My husband and I are both state employees. I am a juvenile probation officer. He is a crime scene investigator. We have four children at home. Two of us have asthma. I think that opening the parks and beaches and outside things first would be best. Allow sunshine and swimming and excercise. Even perhaps the gyms. I think jobs like ours that require human contact with people who don't usually take very good care of their hygienic needs or practice law abiding behaviors or medical suggestions will put us at a greater risk if we need to start seeing them face to face again already. Start with the outside things and move into smaller business like hair and nails and local restaurant chains. Or require masks in stores etc. thank you.
Hillsborough	General	Please open I have a job I don't have no income coming In because my job is closed
Palm Beach	General	Until an easy to use, readily available and reliable test for Covid comes on line to distinguish between the infected and not, we need to maintain this lockdown. Florida cannot afford to risk its future as a tourism mecca by rushing to judgement now. Polls indicate that the majority of residents are not ready to risk their lives for the sake of livelihoods.

AMERICAN OVERSIGHT

Duval	Retail	Stores should be allowed to open. Someone coming in and purchasing clothing or home goods, is no different than risks from shopping at the grocery store. We are city of almost 1,000,000 people, and 18 deaths. If 1000 people have the virus, that means 999,000 do not. The odds are in our favor. Let's get the economy started again!
Sarasota	General	It's time to begin opening. Many have not received stimulus check yet or received unemployment. Money is running out for them. Bill's are due. Food needs to be bought. Their jobs are essential for their families.
Orange	Healthcare	We are still discovering new aspects of and issues caused by the SARS-Cov2 virus. Any attempt to re-open the state in a wholesale manner will result in a surge of infections that will not only put the elderly and infirm at risk, but also the young and healthy, as indicated by the recent discovery of Covid-19 related strokes in young people. No re-opening should occur until the number of new cases begins to decrease. Then, any re-opening should be carried out in a cautious, methodical and staged approach in consultation with medical professionals. Re-opening of small businesses in small facilities will allow the beginnings of economic recovery while allowing the monitoring of new cases and tracing of their path of contagion.
Hillsborough	General	I think there is now an acceptable risk for limited re-opening of the state. While social distancing is still critical, I think 50% occupancy of restaurants and bars is reasonable. The effect of re-opening efforts by places like Georgia should be monitored carefully with a carefully controlled reaction to the effect. I am concerned for the general publics mental and financial state while in effective isolation. As a society we need to get accustomed to a new normal for the next year or two. I think the time is right to begin that education.
Marion	General	I am the owner of a sports bar in Ocala Florida. We serve less than 10% food so we have been closed up tight since St Patricks Day - Good day to choose Mr Desantis - NOT! So far I have not received a dime from the Govt., none of my employees have gotten any unemployment benefit so we feel like we have no chance of surviving through this. I need to re-open and generate some cash flow otherwise my business is finished! So what is the plan for Bars? Is there one? I doubt it very much. Are we going to have to socially distance people in a bar? How the hell are we going to do that? Are you going to reduce our occupancy? (And BTW in my backward county there is no requirement for me to have a certified occupancy certificate.) And if you try to reduce occupancy then should you not also mandate that Landlords should accept a reduced rent, because my income is going to be reduced proportionately? Have you even thought about any of this? It doesn't appear so to me. All I see is the federal Govt. now telling States that it's their responsibility to set the policy, and then we get a totally fragmented response not only from States but even from local Counties. This whole thing is falling apart, and I have zero confidence that this can be handled safely and appropriately. Give us some firm State wide procedures to follow, don't tread water and allow county people to sit on their fine leather chairs and talk about it ad nauseam. We need leadership like Andrew Cuomo has exhibited daily in New York. Right now I don't see this in Florida.

AMERICAN OVERSIGHT

Duval	General	OPEN UP THE ENTIRE STATE BEFORE WE GO BANKRUPT. GET PEOPLE BACK TO WORK NOW. THE PEOPLE WHO HAVE COMPROMISED IMMUNE SYSTEMS NEED TO BE THE ONES STAYING HOME. PEOPLE CAN DECIDE FOR THEMSELVES WHERE THEY ARE COMFORTABLE GOING OUT IN PUBLIC. JUST LIKE SWIM AT YOUR OWN RISK NO LIFEGUARDS ON DUTY. LET PEOPLE DECIDE FOR THEMSELVES BUT TELL THEM THEY CANNOT SUE ANYONE IF THE CONTRACT COVID-19. LIVES ARE BEING DESTROYED BY THE CURRENT SHUT DOWN POLICY. WHERE ARE THE STATISTICS OF SUICIDE, DRUG AND ALCOHOL ADDICTIONS, DOMESTIC ABUSE, VIOLENT CRIMES, AND NOT TO MENTION PEOPLE WITH HEALTH CONDITIONS WHO HAVE HAD TO HAVE SURGERIES PUT ON HOLD. AT THIS POINT THE CURE IS WORSE THAN THE DISEASE.
Seminole	General	Wouldnt be safe to reopen, theirs no treatment or vaccine all that will happen is the virus will spread until the entire state is infected.
Highlands	General	The numbers are NOT going down as our officials said so I say another 30 days as we are now...No reason for the banks to be closed,except for Fridays there are not a crown in these lobbys so they need to reopen and police their own crowds....Our police units need to step up like NEVER before to make sure people are adhearing to the rules and the road ways are safe....This is something that the state Law Enforcement has FAILED at terribley for many years..We kill way more that this virus every year because of a severe lacking in this area...If you don't have a Florida I D then you CANNOT be on our beaches!!!!
Orange	Accommodation	Community pools need to be re-opened for lap swimming. This is important for good health.
Hillsborough	Government	It’s embarrassing to see our Governor kowtowing to the most unethical, foolish, lying & lacking leader we could possibly experience in the highest office in America. We’re not ready to open the city’s of Florida until there’s a better way to test and treat the virus. We just don’t have it. If people are dead, what about the economy will matter? He’s only concerned about the money!

AMERICAN OVERSIGHT

Pinellas	General	Please do not consider opening Florida back up for business or beaches just yet. This should not be considered until the entire state has shows a downward slope of at least 14 days. It doesn't matter if some areas have less than others. The state as a whole must show the number of positive Covid-19 cases going down comsistently before we should even think of repopening anything. Very little is known about this virus and although I understand the economic impact is very difficult for businenes, families and individuals, but until we really have a strong handle on things, it's not worth taking the risk. We don't have a true understanding of how many people are infected because we are not testing enough. How can you come up with a solid plan to reopen when you don't really know what you're working with? So many people have really tried to help flatten the curve, and that is apparently working, that doesn't mean that it's safe to stop doing the things that helped make that happen. Money is not worth more than people's lives and wellbeing. People are going to suffer either way, but less people getting sick means less hell to pay later. If we reopen too early, there is a significant possibility that the numbers will rise dramatically and the spike we were trying to avoid will occur. This is an extremely difficult time, and I understand that people need to make money, keep their businesses, keep the economy going, but please I beg of you, don't make any hasty decisions. Please make sure that you are listening to qualified medical advisors more so than the businesses, the money, etc. This is tough for a lot of people, but it's a pandemic... it's not an easy thing to go through. Keeping people alive and keeping the hospitals and front like workers protected with the proper PPE and protected from an unnecessary spike in cases should be your main priority. Testing, testing, testing, contact tracing, keep people at home and please make the right choice for the protection and well being of all. Do not open for the sake of big money. Lives matter more than money.
Seminole	General	This shutdown cannot go on any longer, people need to be able to go back to work and earn a living. Masks, hand washing and social distancing are advisable and probably should have been what was done from the start of this rather than the shut down and the result would most likely have been very similar. It is being done in grocery stores, convenience stores, gas stations, Walmart, Sam's, Costco, car dealers, Michael's, real estate offices and chiropractors offices to name just some of the businesses allowed to stay open. I understand the need to protect the more vulnerable but at what point was personal responsibility replaced by big government taking over? If we were not prepared for a major virus as a state and country who's responsibility was that? What have our elected officials been doing all these years that this has been a real possibility? Time for government to step back from shutting things down and starting to be ready for a possible flare up with enough PPE and hospital beds to handle it.

AMERICAN OVERSIGHT

Osceola	Retail	Dear Florida Task Force, I am sharing my concern regarding with opening the businesses in Florida. I currently watch Gov. Desantis' briefing about opening restaurants and themes parks; however, I have not heard any comments or ideas about retail industries opening up. I work in retail and there has not been any word about opening the retail industries in Florida. Retail is as important as restaurants and theme parks. People in the retail industries is as affected as other businesses; therefore, retail stores should not be excluded from opening up again. Although, I feel it is way too early to consider easing on the restrictions since there are still a number of cases increasing in Florida, checking temperatures prior to entering the businesses is essential. All businesses planning to re-open should be provided all the necessities in order to keep people safe; social distancing should also remain in place. Thank you...
Orange	Professional Services	I do not that Salon should not open right away. There is no way to self distance from cutting hair with the six feet guidelines. Is not safe for the stylist or for the customer.
Pasco	General	Would love to see us reopen restaurants and all service industry jobs.... perhaps with restrictions similar to those when this entire thing began.... limit amount of people in stores, restaurants can serve but every other table to keep some distance, etc. People can determine if they want to risk going to these places or hiring these businesses for services. Others can choose not to and can stay home. This gives us more choice and the ability to work but keeps a few restrictions in place. Thiss cant be the new normal and we can't possibly stay like this until it's "completely safe". That may never happen.....

AMERICAN OVERSIGHT

Miami-Dade	Healthcare	I am a healthcare worker. As much as I would love to have life return to some semblance of normal, caution needs to be taken. Testing has to be be inreased...not just for the symptomatic. Also testing sntibodies...those two will help determine how close we are to herd immunity. Please, please, please don't allow all these comic cons go on...there is no way social distancing is going to work. I know these are big revenue makers for most part, but way too dangerous...at least for right now. Indoor concerts no way! Maybe outdoor events - small - can be phased in sooner than indoor ones, but it's just too soon for right now. The only restaurants I see remotely opening are those who can offer outdoor dining and even then with tables prudently separated from each othet. People can't eat with a mask on. I can see some businesses where masks stay on and proper ventilation may be able to open as long as limitations made on how many can be in the business. Again no rush but where ever it's possible to get some people back to work, it will at least bring some hope. Each County is different but have to be careful...where one County may reopen more things, others will travel there, so keep that in mind....like New Yorkers came to Mismi/Florida, same can happen with South Floridians traveling to another County and unintentionally spread the virus. I guess the point is, don't rush, consider all options carefully and be aware of upcoming events in your State that draw large crowds.
Martin	Recreation	Please consider reopening the state parks for camping, hiking and cycling. RV enthusiasts can social distance in their own camper . Thank you
Brevard	General	Reopen Florida fully now. Stay at home orders and the restrictions on business are unconstitutional.

AMERICAN OVERSIGHT

Orange	General	I beg of you to please end the COVID-19 stay home orders and open up all businesses on May 1. The prevalence of COVID-19 cases and deaths in Florida are very low on a percentage basis. We only have 31,000 cases in Florida out of a population of 21.5 million which is only 0.14% and we've only had 1,055 deaths in Florida which is only 0.005% of the population of Florida. Every death is tragic, but we just weigh the costs, risks, and benefits of the COVID-19 containment strategy. According to a recent Stanford study the death rate for COVID-19 is between 0.2 to 0.3% of those infected which places it on par with a bad flu season. The Stanford study showed that a large percentage of the population has already been infected with COVID-19 and had no symptoms. These people are not being counted in the COVID-19 statistics and when they are factored in, the death rate drops significantly down to 0.2 to 0.3% not the 2 to 3% being reported by dividing COVID-19 deaths by the number of reported cases from positive tests. Millions of Florida residents have lost their jobs and thousands of small businesses are going bankrupt due to the stay home order and businesses shutdowns and this is only after a month and half. We need a new strategy that gets people back to work and gets businesses open while protecting those in high risk groups such the the elderly and those with certain pre-existing medical conditions. For the rest of us, the risk of death is extremely low and on par with the regular flu. To date no child age under age 19 has died in the United States from COVID-19, even though thousands of teens and children age 19 and under have been diagnosed with COVID-19 in the U.S. With a 0% death rate among teens and children, why are we continuing to keep public schools and public universities shutdown. Teachers and staff can wear masks and those in high risks groups can stay home on a leave of absence. Same for businesses. We need to get Florida business back open. According to the a Stanford study people under age 65 without high risk medical conditions, have a very low death rate for COVID-19.
Polk	Recreation	I would be worried about the large number for people going to the amusement parks. That is a densely populated area not following social distancing. The parks would be more worried about profits not personal safety. They would say otherwise but it's all about the dollar to them.
Palm Beach	Information	I read in the Palm Beach Post Newspaper yesterday (Friday April 24) that 11 people had died in our county (Palm Beach County) of Coneravirus. HOWEVER I did not read in the newspaper of how many people had applied for unemployment benefits on the same day! THIS IS ONLY FUELING FEAR....AND IT MUST STOP IN MY OPINION. PLEASE MAKE THE FEAR STOP....I IMPLORE YOU! I am not afraid of being around others in the stores that I frequent but I an afraid of the FEAR that is being spread into our communities via the media!
Clay	Healthcare	Please do not re open the state. As a healthcare worker, this is a recipe for disaster!!!

AMERICAN OVERSIGHT

Suwannee	General	It is too early to be reopening Florida. As someone with asthma and a weak immune system, I will not have the option to stay home and protect myself. As soon as my job is able to be opened, my boss will expect me there regardless or I will be fired and ineligible to receive unemployment as it could classified as refusal to come to work. Please stop being selfish and put the lives of your people before money.
Orange	General	Opening the state would be a huge mistake! We need to be following facts and the facts say that re-opening would be deadly and attribute to an even deadlier second wave of COVID-19. I know we all want to get back to work, but the economy won't recover overnight and it'll take even longer to recover the longer that COVID-19 is around. Please do the right thing, keep the lockdowns in place.
Volusia	General	I believe face masks should be mandatory for everyone outside their home now through the month of May ,especially as businesses reopen. Special precautions need to be taken at bars and restaurants, sick people go there because " they are tired of being at home" and they want to see their friends. If we can't make the patrons wear PPE then the workers have to. Whatever is decided upon please make face masks mandatory at the very least for the workers at any given workplace, probably gloves too. You have to make it mandatory or they won't do it. I am just now seeing the majority of workers in Walmart, Publix, Home Depot wear masks and gloves, maybe because of the workers testing positive and even deaths in these stores in other areas.
Orange	Accommodation	Reopen community pools for lap swimming.
St. Lucie	Education	SLOW OPEN ONCE TESTING IS WIDELY AVAILABLE: With direct WHO guidance and county coordination. Medical input must be real time and vital to staying opened. People should be prepared to freeze if spread increase.
Miami-Dade	General	Florida in specific my county of residence, Miami-Dade County should not reopen public areas in any way shape or form. On the contrary Florida as a state should take initiative to protect its citizens as its first and foremost priority and close everything once and for all for at least a month in order to stop the spread of COVID-19. Although businesses will suffer the health and lives of many are at risk including those of health care workers which should be deemed more important. Many floridians in my county are not taking the stay at home order seriously and are continuing to go out and put their lives and those of who they live with in danger. A mandatory stay at home order along with shutting down the state should prevent the further spread of COVID-19 and is the fastest way for everything to return to normal as soon as possible. As a high school senior who has had their last year of high school taken away from them and now possibly their freshmen year in college it is not fair for our lives to continue to pass before our eyes and miss all the events I along with my class have awaited years to attend. As an active citizen and voter I will make sure my voice gets heard and those with ideas to reopen for business and economic purposes do not continue to hold a position in power.

AMERICAN OVERSIGHT

Pinellas	General	Don’t open before June. If the models and science suggest distancing then continue to follow the science. Let other states open and see how they do for a few weeks. People don’t have confidence to go out to restaurants, bars, salons, etc. so businesses will suffer if they open. You have to figure out how to instill confidence before you reopen. Either there has to be very few new cases each day (less than 10) or there has to be testing available to anyone who wants one symptoms or not.
St. Lucie	General	Keeping Florida closed is ludicrous! If the fatality rate was as high as we were told, 3/4 of essential employees, would be dead. The numbers are not accurate and the fear tactics are ways of controlling the state. People are still shopping in enclosed businesses, WalMart, Publix, Target etc.. as normal. There is no reason to keep things closed. If someone doesn't feel safe, they are free to stay home. This is a virus, they have been around forever, we will have to live with it, there will be fatalities, yes, but unfortunately viruses kill people every year. The death rate does not justify sinking Florida's economy. The cases will go up, because yes, people will be positive, and we've seen, many will carry on, with little to no side effects.
Clay	Government	Governor Desantis, please reopen Florida sooner than later. The shutdown was only supposed to keep our hospitals from getting overrun. It was never designed to rid of us of the virus completely. In fact if you examine the original flattening the curve chart you will see the mitigation actually made the virus stick around longer in the population.Extending the shutdown will not make a difference in the virus ,it will run its course no matter what,but extending the shutdown will hurt our citizens and small businesses and farmers....Its already destroying peoples lives.
Hernando	Recreation	Hello and thank you for your assistance during this troubling time in the world. I am a small business owner of a roller skating rink in Hernando County, Fl. The business name is Locomo and I was wondering what phase will we be considered to resume business in. Our capacity is 508 customers and know that we will be opening with way LESS than that amount. I read your concerns with movie theatres but was curious what the protocol will be for roller skating since it is a moving sport. Thanks for your time and assistance.
Duval	Food	Restaurant should be allowed to open. People who don’t want to go to restaurants will stay home. We are being served already with to go orders and our statistics are not increasing with new viruses. We are city of A Million people. With 1000 cases and only 18 deaths, that means 999,000 people are not sick. The odds are in our favor. Let’s get our Connery back on track

AMERICAN OVERSIGHT

Walton	Accommodation	Dear Governor DeSantis, Please reopen short term vacation rentals. I am a homeowner and taxpayer in the State Of Florida (Walton County). Over the past years I have owned a vacation rental condo in the Destin area. The closing down of short term vacation rentals has created a financial hardship for me. Over the years I have paid thousands in property tax and thousands more in tourist development tax through my property management company. I respectfully ask that you reopen the short term vacation rental business at the beginning of May. Thank you, Kent Pafford
Lee	Recreation	I wasn't sure if the correct area of interest would be recreation or education. It's both for me, and I'm sure serves many purposes across the community. Please consider opening the public libraries as soon as possible. A first step/partial reopening could allow for reserving books online, picking them up on the hold shelf, self-check-out. Social distancing could be easily accommodated, and this would also get folks back to work. For kids homeschooling, this could also provide extra resources and a respite for parents. An hour in the library researching or exploring a topic while observing social distancing and wearing a mask might be a great added home schooling tool. Thanks for your considering.
Collier	General	Open in stages starting with beaches and parks. Limit gatherings. Second phase businesses, restaurants and bars limit size of gatherings. Any new cases of the illness we should go back to square one. Closely and effective monitoring and testing should be provided. Start at June 1.
Duval	General	Please open the state, and specifically Jacksonville, as soon as possible and by that I mean May 1st. The virus is not as serious as it’s made out to be, and it makes ZERO sense to destroy the economy state wide and locally for something so absolutely ridiculous. It is causing more pain and suffering that any virus could ever do. Thank you.
Palm Beach	General	Just a comment, We are NOT ready to open the economy again. Stay at home order should be extended at least until the end of May.
Pinellas	Healthcare	I would like to keep the dental offices closed until it is really safe to be in close contact with the patients. Keeping in mind that we as hygienists are in absolute close contact with patients. We can’t isolate completely the areas that we’re going to work on. Even though we all need to get back to work, we can have a very high number of professionals infected. As a united state, dental offices should be reopen for other than emergencies once we have enough testing material available and PPE resources. Thanks for taking the time to review and taking into consideration our opinions.

AMERICAN OVERSIGHT

Miami-Dade	General	Hi, We think that in our building Carillon, you should let the swimming pools to open as it was before the complete lockdown. The staff were having mask and gloves and were installing the residents on the long chairs with cleans towels and social distance. Don't forget that it is hot humid and full of sunshine. The beach can also be open in the same way. Social distance is important and the staff were installing at the beach all the chairs at more than 6 feet from each other. People respect the guidelines and follow them very well. The staff was following it very well before the complete lockdown and stay at home order. The hair salon can be operate the same way. We can have the restaurant or at least corner store at the hotel reopen too, with the staff wearing gloves and masks and again making social distancing. We have to live and older population or fragile populations can stay home if they want. That is again their choices. Not everybody has to stay lockdown as the economy has to run, otherwise we go to the biggest disaster ever. By the way, I got sick for 2 weeks end of January and I am sure that I had Covid 19 with all the symptoms. I will do the antibodies test when available, but this disease was certainly already here this winter and everybody was living normal without knowing it and nobody died in my building of it, even the older residents..... Thanks.
Volusia	Healthcare	I believe we need to stay closed st least another 6 weeks until the curve is at the bottom. I know many who have had the virus - some faired better than others. As a health care provider I am afraid if we open to soon there will be another wave and more lives lost. Many drs and nurses have died and they should not have died in vain
Leon	General	Do NOT reopen this state!!! The coronavirus is still spreading in this state and people are dying!!! Listen to the scientists and medical professionals and not big business!!! I want to go out and do fun things like I used to, as does everyone else. But I'm not willing to risk my life or the lives of those I love!!! I'm ready and willing to stay home to make sure that curve gets flattened!! DO RIGHT BY THE CITIZENS OF FLORIDA.....KEEP IT CLOSED!!!!!
Pinellas	Finance	You need to reopen the state as soon as possible. So many people are suffering from the economic side effects from this. Not to mention the psychological side effects from this. The economy and our sanity can only handle so much. My husband and I are out of jobs. We have 4 kids and our priority is money for rent and food, everything else is not a priority. This economy and the people can only take so much before we lose it all. More people die from cancer, car accidents and abortion than this virus and yet people don't take those as seriously as this. Why??? We are trading lives for lives and I've had enough. Give us our freedoms back now!

AMERICAN OVERSIGHT

Manatee	Recreation	To The Re-open Florida Task Force, Thank you for your service, and for reading many of the public's concerns. Mine may seem silly our stupid but with entertainment options low due to social distancing problems. I'm surprised that they are not allowing the Ruskin Family drive-in movie theater to say open. It is a place where you could actively socially distance in your closed car and still maintaining a resemblance of normalcy. It would also help people who feel trapped in there homes have a place to go and feel relatively safe. Thank you again for your service. Sincerely, Martin Armstrong The Ruskin family Drive-In is located at: 5011 US-41, Ruskin, FL 33572
Miami-Dade	General	Florida should be reopened when it is safe to do so. Not while the number of people getting infected are still rising. Reopening would be putting more people's lives at risk. If people want to work they should go get an essential job. There are many people hiring. Reopening the state at this time would be making things worse.
Miami-Dade	General	The stupidest thing Florida can do right now is reopen, Florida's Coronavirus numbers are still going up. If we reopen we are just risking for a lot more people to get contaminated and causing a greater spike.
Miami-Dade	General	Please open the state slowly. Enforce social distancing as much as possible. Don't open beaches yet, movie theaters, malls until people follow the six feet apart guideline. Parks are ok to open but as long as we prevent having large groups too close. Restaurants should open slowly but limiting the amount of people and practicing social distancing. Perhaps encourage early reservations to have ahead count. Thanks.
St. Johns	Professional Services	Please open restaurants, hair and nail salons with guidelines and precautions.
Lee	Healthcare	I would like to see a safe reopening of businesses. I think each business needs to have a plan in place of how they will practice crowd control, and infection control. I don't believe it's necessary to test everyone before they go back to work. The majority of people currently working have not been tested.
Orange	Food	Opening needs to be done with caution. State/ city parks and beaches should remain close to prevent gathering of people. Restaurants should stay at take out only for time being and should be eased into half capacity measures etc when the time is appropriate. If we are to lift any stay at home measure a curfew should be in place to prevent and large gatherings/parties. Face mask should be required in industries that require customer interaction as well as constant employee interaction. However we return to normal I feel doing so slowly and with caution will be better over all.
Pinellas	Healthcare	We need to reopen the state immediately. Those that are over can 65 continue to stay home if they do not feel safe. The rest of us should continue social distancing and wearing masks. The stare has to reopen soon. It's wrecking the economy.
Pinellas	General	its too early. we need more testing first. please keep us safe and get the testing materials in place with enough tests and enough testing material throughout the state..

AMERICAN OVERSIGHT

Palm Beach	Recreation	Open the beaches & the psrks immediately. People need exercise & fresh air. It's healthy physically and emotionally. People are smart enough to distance themselves from non family members in an outdoor environment. We don't need a totalitarian nanny state to over protect us. The parks & beaches belong to the tax payers of Florida, and are not the private domain of governments. Tape off and secure playgrounds if needed, but open spaces need to be free of government overreach. Logically human exhalation in an outdoor breezy environment, particularily in bright sunshine will both disperse carona molecules & kill them quickly with UV rays. Contrast the great outdoors with a closed environment of a supermarket without UV lighting and the combined accumulation of thousands of shopper's breaths, where's the A/C filtration systems are not designed to filter & destroy tiny airborne molecules, and you can see that it's probably 100x more dangerous in the supermarket than it is going for a run in the park. The nation needs to spend billions of dollars ramping up the ability for hundreds of millions of covid tests and snti-body tests. Then we would know who needs to isolate and who can be out and about. Facilitate that Governor & you free Florida.
Manatee	General	As much as I'd like to return to work and feel stability, I only want Florida to re-open when the majority of medical professionals and scientists say we should. If we re-open too soon, it is the belief of doctors and scientists we will see another surge later on this year and may have to do an open-close-open-close situation. I'd rather stay closed until: 1) we see a decline or plateau in new cases of COVID-19 for 14 days 2) we have enough testing centers with a quick turnaround of results When we re-open, I believe: •we need to continue physical distancing guidelines and wearing of masks until there is a vaccine •large scale events need to continue to be cancelled until there is a vaccine
Pinellas	General	No, do not open yet. The population of seniors and otherwise health compromised residents is too large. A job lost will be regained at some point. Hurricanes and fires destroy homes and communities but they can be rebuilt over time. A life lost can never be recovered.
Flagler	General	We r not ready to reopen. Positive cases have not declined. Some counties in panhandlers with very little testing at 19% or above positive cases. Death rate still climbing. Do not put myself or my coworkers at risk by opening to soon. Not enough testing per capita.
St. Lucie	General	I would like to see public beaches and passive recreation open but with stipulations. As an oceanfront resident, I witnessed a great deal of responsibility by a few beachgoers. It would be important to see some sort if policing to prevent large grouosnor contact sports being played. If rules were enforced then our resources could be enjoyed by residents. In terms of general opening, I am in favor of doing so once testing is available and tracking is accurate and effective. I would rather not risk a spike in cases by opening too soo .

AMERICAN OVERSIGHT

Broward	General	Until ALL people can respect social distance and wear masks when they leave their homes, we are not ready. People are coming in contact everywhere I go especially the grocery store. Most people do the distance dance while walking, but there are still too many people that do not even try to move. There has to be a mandatory message of mask wearing at all times and people need to better understand how to wear the mask. They need to understand that taking the mask on and off puts them in danger. I constantly see people wear a mask, pull it down to scratch, then put it back up. These events happened after the people in question were touching surfaces interacting with other people. These are just a few of the examples that I think show how we will continue to spread the disease until we all get better at what we need to do.
Orange	General	I currently believe that it would be unwise to reopen the state amidst the ongoing pandemic. Doing so will put Florida citizens at great risk to their health, and will lead to a continuation of the pandemic beyond the range predicted under shutdown conditions. Reopening the state, based on financial greed, would be irresponsible, and speak volumes to voters about the character of the governor if he were to sign such an action.
Orange	General	There should be "TESTING" State, County, City, and Rural Testing. The Plan must ensure all PEOPLE of this State is SAFE!!!!! Especially ALL PEOPLE.
Alachua	Professional Services	Please open restaurants, nail and hair salons using guidelines and precautions.
Orange	General	Listen to the experts, the scientists, the doctors, and the epidemiology community, Florida's case numbers and deaths are still rising. As Dr. Anthony Fauci says, it's up to the virus, not to us. We don't have enough capacity to test or to do contact tracing.These are key. Fix the unemployment website, supply health care workers and other Essen personnel with needed PPE, & procure tests and ways to do tracing. I'm tired of staying home. But right now it's a necessity for my own good and the good of the community. Follow the science, please.
Lake	Healthcare	1- Florida needs to provide FREE testing for ALL citizens before reopening the state. 2- Successfully completed all 3 phases of the guidelines to reopen states for 14 days each!
Lee	General	I do not think it is smart to reopen shopping retails of such. We still need this virus to be more contained and I believe if we reopen businesses, we will see a lot more people infected, getting seriously ill, and more deaths. Please do not open. I am a student and a retail worker and I am scared to have this virus as well as bringing it home to my immune compromised mother.
Palm Beach	Recreation	I recommend we open all outdoor recreation first and all at the same time. I recommend keeping beach parking closed but opening the beaches. Also opening all parks, golf, tennis, boat ramps, etc. If cases dont spike then begin opening businesses that have only a few people at a time i.e. dentists, doctors, hairdressers. As well as restaurants for outside dining only. Thank you

AMERICAN OVERSIGHT

Orange	General	I request that guidance be formally provided that clarifies that neighborhood (HOA) swimming pools can be immediately re-opened for lap swimming and exercise purposes. Specifically, I live in a Homeowners Association (HOA) that has a very large community swimming pool with multiple lap swimming lanes, each of which are at least 6 feet apart. Lap swimming is about the only effective exercise that I can do, since it is a non-impact form of exercise. Our pool has been closed for over a month, and my physical conditioning and overall health have declined over this period of time. I have done extensive research, and have not found any federal, state, or local mandates requiring that neighborhood swimming pools be closed, other than maintaining social distancing. The Board of Directors (BOD) of our HOA closed our pool, because of the state mandate to close gyms. Although we have a separate fitness center, which I agree needed to be closed at the time, our HOA BOD has extended the vague requirement to close gyms to also apply to outdoor swimming pools. I strongly support and practice social distancing, but I see no reason to prevent me from lap swimming, where I am submerged in chlorinated water and separated by at least 6 feet from the next closest lane and person. In the absence of being able to swim, I have instead been doing long daily walks throughout our community, and I have observed 100% compliance with other walkers practicing social distancing. We have all seen the traumatic impacts of this virus over the last month. We don't need mindless, dictatorial requirements to mandate basic safety. Although this may seem to be a trivial issue to some people, it is very important to my overall physical conditioning and health. Therefore, until my HOA community pool is re-opened, I will NOT spend any money in our state or local economies, and you will not collect one penny of sales tax from me. In summary, please provide specific guidance that clarifies that community swimming pools can be re-opened for exercise purposes. Until this is done, anything and everything else that the state or local governments allow to re-open will not be patronized by me.
Polk	General	Hello my name is Diane and I live in Polk County and I would have to say I agree with 2/3 of the citizens of Florida that we should remain closed. President Trump is an expert businessman, Governor DeSantis is an expert politician, I believe we should listen to the experts in the medical field and go along with their recommendation I'm not closing until the second week of June. They are experts in the field and they know more then we do and they know more than what they are probably saying. It is so much better to be safe than sorry, I understand that the economy needs to come back but in all honesty the dead do not shop. As you know Florida has a high number I've senior citizens that need your protection . Please do not close until June. Thank you
Duval	General	Please re- open the state and schools!!
Broward	General	It is too too early to reopen the state. More testing needs to be done and the numbers need to reduce before reopening. This is especially in South Florida.
Clay	Healthcare	As a healthcare worker and a concerned family member I have parents health that are high risk I think reopening Florida will just deplete breaking the curve was all about.but more local businesses need higher support financially. That most definitely needs to be not overlooked , stop putting us in a position where we have to choose money our lives of those we love. The American people need more help! #DoNotReopenFlorida #help local and American businesses!!!

AMERICAN OVERSIGHT

Orange	General	I request that guidance be formally provided that clarifies that neighborhood (HOA) swimming pools can be immediately re-opened for lap swimming and exercise purposes. Specifically, I live in a Homeowners Association (HOA) that has a very large community swimming pool with multiple lap swimming lanes, each of which are at least 6 feet apart. Lap swimming is about the only effective exercise that I can do, since it is a non-impact form of exercise. Our pool has been closed for over a month, and my physical conditioning and overall health have declined over this period of time. I have done extensive research, and have not found any federal, state, or local mandates requiring that neighborhood swimming pools be closed, other than maintaining social distancing. The Board of Directors (BOD) of our HOA closed our pool, because of the state mandate to close gyms. Although we have a separate fitness center, which I agree needed to be closed at the time, our HOA BOD has extended the vague requirement to close gyms to also apply to outdoor swimming pools. I strongly support and practice social distancing, but I see no reason to prevent me from lap swimming, where I am submerged in chlorinated water and separated by at least 6 feet from the next closest lane and person. In the absence of being able to swim, I have instead been doing long daily walks throughout our community, and I have observed 100% compliance with other walkers practicing social distancing. We have all seen the traumatic impacts of this virus over the last month. We don't need mindless, dictatorial requirements to mandate basic safety. Although this may seem to be a trivial issue to some people, it is very important to my overall physical conditioning and health. Therefore, until my HOA community pool is re-opened, I will NOT spend any money in our state or local economies, and you will not collect one penny of sales tax from me. In summary, please provide specific guidance that clarifies that community swimming pools can be re-opened for exercise purposes. Until this is done, anything and everything else that the state or local governments allow to re-open will not be patronized by me.

AMERICAN OVERSIGHT

Duval	Healthcare	I am a resident of Duval county for 16 years and work in healthcare in the office setting. In my position, I am unable to work from home. As we know the virus is still taking a toll on the lives of many and I am afraid of it. I feel that a month to stay at home for the virus to pass may not be enough. This is not like the flu to pass in a week or two and then back to work again. A person who recovers from Covid-19 can test positive again and infect others unknowingly. Staying at home is the way to control and reduce the chance of contracting it from persons who do not have symptoms but have the virus. The person may even have symptoms but is afraid of going to the hospital therefore spreading it in the air. Once everyone is back in close quarters, breathing the same air, touching the same surfaces and communicating with each other, the possibility for transmission from asymptomatic staff is high. I don't want to die! The president has said one death is too many. We need to be absolutely sure the virus has run its course with no new hospital admissions or deaths before Florida can open confidently again. From what I have seen on the news and read about, a person can feel symptoms today, be in the hospital within 24 hours be put on a ventilator and die within days. The risk is too high to send us out too soon. I know the economy needs to be functioning again. We need strong healthy persons to make this possible! If they are asked to return to full work capacity, we are going right back to high pandemic mode again. Yes, we can wear a mask, but how are we to stay 6 feet away from an office full of staff possible? Please allow Florida to stay at home another month to ensure we are safe and the hospital admission numbers for Covid-19 are slim to none. Thank you.
Lee	General	As a small business owner and an RN ... OPEN UP!
St. Lucie	General	In my opinion as a Florida native is this, there is no reason to reopen at this time too much is still unknown about the virus our season is over and we are heading into summer and hurricane season how devastating would it be to reopen too early have another wave of infection with possible hurricanes coming in with everything they bring? I can't imagine a shelter in place order in August while having to choose between shelter in place and evacuation from a storm . Mass casualties would be prominent in all areas . The month of June would probably be a safer bet to start the reopening phases. Reopening too soon would be something that would take us decades to overcome the damage financially and honestly nationally it would damage our state, our brand and our tourism because how as a state could we be trusted to put health over dollars? Thank you

AMERICAN OVERSIGHT

Pinellas	Education	We have closed our schools, parents are home...if you open everything up, how many children ages 0-18 will have to be left home alone or make parents chose between going back to work or leaving their kids home?? Things should stay closed and cut off travelers through the school year! We saw spring break beaches and pools, opening them Up would be a repeat! We have managed this virus BECAUSE of the stay at home order! It's not fair to tell those at risk to stay at home but allow everyone else not taking it seriously to put themselves at risk then visit ESSENTIAL places the vulnerable have to go to!
Hillsborough	General	I have elderly parents, children of my own and I work in the public sector. Florida needs to take very slow, calibrated steps to reopen. The public needs to take precautions such as wearing masks while in public to protect all. The key is to open one sector at a time and give days/weeks before opening another. We do not know what is to come and taking a slow progression is the right choice for all citizens. We need to keep all citizens safe and most importantly the elderly! No one wants to stay home and everyone wants to get back to the normal way of life but this is has to be a process. And a slow process at that! I do not want things opening up quickly with little thought. Keeping everyone safe is top priority. Citizens will respect direction and are looking to leaders for that guidance. Personally, I will continue to distance myself and my family, stay home, wear masks and social distance for the near future. I will not jeopardize the health of my family just to go out!!! And I think most people feel this way. Please take the reopening process seriously as lives are at stake.
Palm Beach	Professional Services	I think small businesses are hurting now more than ever. No one was prepared for this. I have not met anyone that got anything from the sba or get anything from PPP. I'm a barbershop owner and have been closed since mid March. If you open in May and allow barbershops to open we will do everything in our power to ensure people are safe. The people that don't feel safe should stay home. No one is forcing anyone to get haircuts. But don't punish the people willing to take all the precautions. Every day we stay closed is another day we have to suffer. We have families and we are hurting.
Orange	Retail	Please re open the state as quickly as possible. So Many of us are out of work and we don't know when we will see unemployment and even with unemployed it's not enough. We need to get back to work.
Polk	General	Open Florida ASAP!! I feel there are different agendas going on in our country as we deal with the Coronavirus and the decisions hasn't been for the people's best interest. Our country has forced everyone to suffer over this virus and therefore it is causing our economy to fail. I'm scare of what this will do for my future and even more important my children's future. Life can go on just like it does during our flu season. People with immune compromised systems can take extra precautions when the virus is on the rise. We need to build herd immunity and we can't do that being locked up in our homes. We need sunshine and exercise and we can't do that when we are not allowed to go to parks, beaches, lakes and walking trails. These things can build our immune system up to fight these viruses. Please open up our state and let's get back to life.

AMERICAN OVERSIGHT

Osceola	Education	Please require all K-12 schools to offer all virtual or hybrid virtual—in person (so kids stay socially distant and hygiene maintained) Families could sign up for various options so families who can keep their kids home (full or part time) could free up space for kids whose parents can't due to work commitment. Maybe schools could have different tracks. Or some type of creative scheduling . My son gets sick very easily and I worry about him back in groups. I wish there was a way he could stay full or part time virtual with his current school to decrease risk until a vaccine exists.
Broward	General	Please work to open state as soon as you can. I am an RN and I am more scared of financial implications than the virus. Thank you.
Highlands	Education	I am a professional and mother of a college student, high school senior and middle schooler. Fortunately my husband and I have been able to continue working. What I have seen is those that have not been working and "sheltering" are scared those of us who are working are DONE. We no longer buy into this narrative that everyone is going to die. We agreed to shut down to keep from overrunning the hospital. That fear was proven to not be a factor now it appears that the media has the country convinced we can't have school or restaurants or life until there are no cases because of fear. PLEASE GET THE SHOW ON THE ROAD. Open the state. I expect to have my kids in college AT UCF AND FLORIDA SOUTHERN in the fall. Not online. My middle school daughter wants to do volleyball this summer. I expect that is possible by June 1st . Continuing the fear narrative is ridiculous.
Pinellas	General	OPEN US UP! It is time to re-open Florida business. I feel continuing the lock down will continue to cause more damage than good. I worry about my job, availability of everyday necessities, my child's social growth, and the mental health of my family and myself. Simple things such as my son, playing with a friend, my wife and I going to the gym for mental and physical breaks, have been taken away from us. I could go on and on about all the issues I see with a continued lock down. We cannot live our lives based on fear, we should have the opportunity to make decisions for ourselves and take necessary precautions upon ourselves. Please begin lifting restrictions ASAP!!!
Duval	General	Multiple reports and findings show that this nationwide house arrest was useless and the numbers are dropping. People need to eat and pay bills. OPEN NOW!!! Not later, not in a day or a week, NOW!!!!
Seminole	Healthcare	Two things: Do not harm citizens of Florida to appease your master, Trump. Pay people their unemployment. They paid into it, they should be able to use it. An influx of cash will help the economy.

AMERICAN OVERSIGHT

Alachua	Recreation	I believe outdoor activity should be opened, such as pools at Villas and apartments as well as fresh Springs and canoeing. The beaches should be open all day to help with congestion. All of this is outside and us FL residents need to be able to do things and get fresh air without feeling confined to our homes. I also believe this will help everybody stay positive and calm during this trying time. I believe reopening things is absolutely the right thing to start doing.
Palm Beach	Healthcare	I understand that there are those who wish to create a panic, especially those who have a vested interest in promoting pharmacological remedies. I understand that the CDC has issued guidelines to report "COVID 19 related" deaths, even without proper testing. It is important to understand that it is normal for a healthy individual, when in contact with a virus, to respond with its' immune system to create an antibody. The newly released Stanford University study demonstrated that much of the population already was exposed to the virus and developed an antibody. This is called "herd immunity." Top scientists, like Dr. Shiva Ayyadurai of MIT have demonstrated that most of the fatalities are among those with weakened immune systems or who have co-morbidities. https://www.youtube.com/watch?v=E6FyDSuTDCM The Bakersfield California doctors Erickson and Massihi pointed out that "social isolation" prevents the Public from developing immunity and is also related to far more dangerous results like domestic violence, suicide and other mental issues. https://www.youtube.com/watch?v=er-azTkTjP0 The Corona virus has a lower fatality rate than the seasonal flu. We also know that Dr. Fauci and Dr. Birx are connected to the Bill & Melinda Gates. Dr. Fauci owns a patent to GP 120, fundamental to Corona Virus https://patents.justia.com/inventor/anthony-s-fauci The Gates Foundation, which funded the Pirbright Institute, owns the Patent to the COVID 19 vaccine. It is well known that Bill Gates is no friend to humanity and has even been thrown out of India because of the horrible consequences his vaccinations had on the children there. I believe I had COVID-19 back in February 2020 and took extra rest. I am 74 years old. Please listen to Dr. Shiva Ayyadurai, Dr. Rashid Buttar, Dr Judy Mikovits, and others. https://www.youtube.com/watch?v=y_T_L-lwmBM I hate to say it, but this is just another attempt to harm the country by traitors who have close financial and ideological connections to foreign unfriendly powers.
Hillsborough	General	1. Use scientific and medical evidence to advise and guide the process of re-opening. 2. Consider phasing in the opening of restaurants and bars by first allowing them to open with reduced occupancy rules and wider separation of tables. 3. Because some parts of the state have been very heavily impacted by the virus and other parts much less so, consider a regional approach to re-opening. 4. Keep the Task Force in operation for at least a year to monitor the status of the pandemic. 5. Finally, thank you to the members of the Task Force for the hard work you are doing under very difficult circumstances.

AMERICAN OVERSIGHT

Gulf	General	The people keeping things closed, should go without pay. Then they can be as Laissez-faire about reopening as they want. Those people not getting paid arE DESPERATE for the economy to open up again! Your going to start having suicide deaths from lonilness and sooo many without income. The economy is being ruined. It's not worth it!! OPEN UP.
Lee	Recreation	Please open the beaches practicing social distancing with being no more than 10 and 6 feet apart to begin with. We should be able to sit on the beach with our umbrella. We are not in a closed room. There is data that shows exposure to the sun may help defeat the virus
Hillsborough	Government	Please support Floridians by opening Florida and getting us back on track to normalcy. Please protect us from the outside forces that we all know are controlling the show. Ron Desantis, I think you are doing an amazing job. Please stay strong for us.
Seminole	General	1. Counties and municipalities should have some control over this process. The needs of an urban area are very different than the needs of a rural farming community. 2. Open up our beaches and parks. Science has shown that this virus is much more likely to spread indoors, with very few cases worldwide where the virus spread from person to person while outdoors. 3. Keep large meetings and assemblies closed for the foreseeable future. If a meeting has to take place it should take place outside. 4. Let smaller, boutique gyms open. These are often owned by individuals who need to be open to survive. Class sizes can be kept to 10 people or less. Think boot camps, cycle gyms, Orange Theory, Crossfit, Barre, etc. 5. Let our restaurants in areas with few cases start opening up. Maybe Miami needs a few more weeks, but if a county of 500k only has 300 cases maybe they should be allowed to open up for business. 6. Get our kids back in school. 7. Recommend our elderly and high risk citizens continue social distancing until a vaccine is available or we have reached a safe level of herd immunity.
Gadsden	General	Open as indicated by health officials of the decline in cases.
Pinellas	General	The state should open, cautiously, maintaining the social distancing guidelines we've been using. As it is now, people are congregating at places that are still open, and it's nearly impossible to maintain safe distances. Lpwe's was a madhouse today. People need to get back to work. That said, employers should not penalize high risk employees who choose to stay home to stay healthy.
Pinellas	General	Clearwater Beach

AMERICAN OVERSIGHT

Hillsborough	General	Please do not “re-open" Florida yet. You did the right thing putting the stay at home orders in place. It's working! The infection rate is decreasing because people are staying home. But testing still isn't where it needs to be. Only a little over 1% of Florida's population has been tested. In addition, there is no vaccine and no treatment for COVID-19 yet. Reopening now is like taking off your parachute mid free-fall because it's already slowed you down. Reopening is going to put countless lives at risk and risk overwhelming our health care system, even with "social distancing" recommendations. If we reopen now we are going to risk a resurgence in infections and an increase in deaths from the virus. Losing workers and customers is bad for the economy. There is no "good" option for the economy right now. But there is a good option for public health: continue enforcing the stay at home orders. People are safer at home, plain and simple. I would like to pose a few questions to consider: Why risk opening now, when we do not have the infrastructure to test and treat COVID-19? At a time like this isn’t it best to err on the side of caution, to put human lives and public health first? If in a month from now there is a significant surge in infections and deaths, how will you feel about making the decision to "reopen" the economy now? How will we manage if our health care system is flooded with COVID-19 cases? My desperate plea is to extend the stay at home orders. Human lives are at risk right now. Human beings, my family, my friends, they're worth so much more than any amount of money. We must protect our citizens. Yes, economic insecurity is a real threat. But that is why we need social safety nets at a time like this. Rather than re-opening the economy now and risking human lives, it makes more sense to put more energy toward increasing testing and fixing our unemployment system so that people who are out of work can get the funds they need to ride out this crisis.
Lee	Retail	COVID-19 is not going away any time soon. Re-opening the I feel we need to reopen all retail stores to help the Florida's economy bounce back.
Martin	Recreation	When you open the beaches, please allow seniors 70 years old or older to take their chair to the beach. We want to sit at the beach to get sun, ocean breeze and watch the waves. We do not want to exercise at the beach, we can walk around the block to exercise.
Osceola	Construction	I do not think the state should open yet. The virus is still deadly and numbers are still rising. If a potential second wave comes it will be worse than now and alot more people will die. I know it is a money issue because everyone wants to see cash flow coming into fl. Is it worth to sacrifice alot more lifes?
Hillsborough	General	Please do not open the state back up until we have sufficient testing completed and have had several days with no new cases. My concern is that if we reopen and allow people from other states in that we will have a second wave that will kill more people. It will be hard for a lot of us, but I think in the long run, we will be better due to staying closed.
Hillsborough	General	Do not reopen until the rates of infection , and deaths. and hospitalization are down, i.e. days without the same. Lives are more important than economy.

AMERICAN OVERSIGHT

Polk	Tourism	Gov Cuomo said it best, the cure ISNT worse than the disease. The disease is death. Period. We have not just ourselves to be concerned about, but also our neighbors. We do have a high population of older folks and many people moved here due to the nice weather who have health issues. Unlike some of the other states, opening up also means welcoming in people from all over. My livelihood is solely tourism. With no help from the state unemployment, and no assistance from the Fed Govt, I've had to permanently close my location, because the commercial landlord gave me a 3 day notice for being 2 weeks late on rent. I've been in this business for 31 years. I am sad and mad. But, what is the alternative? I take care of my 83 yr old mother, and for me, there is no alternative. We are staying home. We need to wait until someone comes up with a safer and honest answer. Otherwise we are just asking for trouble.....for death. We've come this far, we need to hang on and keep the course. We are not ready to reopen, we never really shut down like we should have, but it helped. Let's wait at home and see how the other states manage reopening. And when we do, do it slowly and please don't let tourism come back to life for awhile, we need to take care of Floridians first.
Pinellas	General	Before y'all Re-open Florida please require the health care, first responders and all places considered essential to be tested for Covid19 free of charge.
Palm Beach	Recreation	open golf courses outside is good for you take out the rakes and ball washer one person per cart no caddie
Seminole	Retail	June 1st would be ideal to open retail. We are nervous about taking the virus home to our spouse and kids. I would be more comfortable interacting with clients in retail in June.

AMERICAN OVERSIGHT

St. Johns	Tourism	I encourage an immediate open for all but the most high-risk venues! 1/4 of my annual income as an instructor and private field study guide for history students in Florida has been lost in just these few weeks because the virus hit during my peak season. I appreciate Governor DeSantis's efforts to limit the "lockdown" as much as possible and to wait as long as he could. He was right! We still have better results than most, even with that conservative approach. Now, however, the "cure" has become worse than the disease and it appears that much of the modeling data provided to Florida to shape our response was erroneous. I encourage an IMMEDIATE and full reversal of course with very limited "phasing." Any phases should be moved through quickly as testing shows that Covid-19 is much like seasonal flu. There's just no justification for the continued lockdown. Sincerely, Laura Caruso History Educational Services
Brevard	Food	We need more public aid, otherwise when you reopen the businesses nobody is going to be able to afford to go to them. From unemployment, to the stimulus check delays, the majority of consumers can't spend right now without some form of rent or bill forgiveness.
Columbia	General	YES!!! Open the State. While I remain cautious about this virus, I am more afraid that NOT opening will cause untold negative consequences for thousands of people as well as thousands of businesses.
Marion	Government	Open the State. This has been ridiculous. The virus has a 98% survival rate. I cannot believe the hoopla surrounding this nonsense. Survival of the fittest. If you are old/sick, stay home. We dont need the government to tell us the obvious. If we want to live our lives in public, let us!
Orange	Construction	Opening the state and risking death is not appealing. From a simple economic cost, losing a percentage of the population is a permanent loss of GDP, as opposed to a temporary one of shelter in place. One can easily see the payback period—it's a far better investment than any stock or bond—so why are we debating it like it isn't? On a more emotional level, I'd rather live with my parents and family in one room in one house, than not have them—at any price. My grandparents grew up dirt floor poor, without our luxuries—if they can do it, we can too. The Florida crackers were a tough people.
Orange	General	State needs to reopen for economy.
Brevard	Healthcare	Please do not re open Florida. It's to soon and the virus will continue to spread. Wait at least 60-90 days then seen where Florida stands.
St. Johns	General	Please reopen SLOWLY, beginning with open spaces whilst enforcing social distancing. Then perhaps reopen restaurants to dine in, but with social distance and limits. It MUST be a slow open or the flattened curve will spike.

AMERICAN OVERSIGHT

Palm Beach	General	Since medical experts have determined that social distancing has helped curb the spread of the virus I urge you to hold off opening up public places. It is obvious many people do not take this seriously and it will cause a resurgence which is unnecessary.
Palm Beach	Healthcare	Please reopen for business I work at the va medical center and the clinics should reopen to our vets. We should continue prescreening as it has being at the entrance taking every guest or employees temperature. Please help us and reopen the estate. We love governor DeSantis. Thank you for your love for Florida. Thank you Mr President Trump for your love for Americans Please reopen Florida!!!
Seminole	General	Yes I believe that necessary businesses should start reopening,for our economy,our employees,and our residents. Such as Doctor's Office's,Lab's. Also Mechanic Shop's. Beauty Salon's,and Barber Shop's. Restaurant's Also For Dine In I think we have all learned a lot about taking precaution's,and people need to get some kind of normalcy back in our live's. Thank you,Connie Fisher
Miami-Dade	Government	This is my personal opinion. I think is time to open everything up again taking this preventive method into consideration. Keeping a safe distance from each other. To wear a face mask every time you go out in the public. All business should be able to provide hand sanitizer to the public, desinfect all common and most frequent areas of contact with public. Also limit the amount of people allowed to enter a business base on the square footage of the location or business. I think is time to open up. People are in desperate need and struggling financially.
Hillsborough	Healthcare	I own several medical centers focusing on seniors, and have been following the crisis closely from a clinical perspective in addition we collaborate with USF. Do not open the state, we are not ready, nothing clinically has changed. Before considering opening every man woman and child needs to have access to masks at a retail level, every drug store and supermarket needs to have them in stock on their shelves, once that is accomplished and antibody testing is available also in mass quantities then start reopening.
Seminole	Recreation	Please proceed slowly. Bars, events venues, festivals, public places like beaches should not be opened for recreational events. Social distancing cannot be enforced. I would like to see non essential stores, libraries, barbers and beauty shops open. All persons in public should be required to wear a face mask. All public places should limit the number of people per square foot.
Duval	Tourism	Hotels should not be re opened, with close proximity other guest and the closed environment of the hotel it’s a Petri dish of potential viruses. Why put hospitality workers in an un safe environment? From front desk employees, housekeepers, maintance workers, and food service. Floridians do not have extra income to blow on hotel stays at this time in their life when they can’t put food on their tables.

AMERICAN OVERSIGHT

Orange	General	TOTALLY DISAGREED WITH GOVERNOR RON DESANTIS SINCE HE IS PLANNING TO REOPEN THE FIRST WEEK OF MAY, HE HAS TO WAIT AT LEAST ANOTHER 30 DAYS TO FLATTEN THE CURVE AND COMPLETE MOST OF THE TESTS, ACTUALLY SHOULD BE DONE 150 TESTS DOR EACH 100,000 PEOPLE AND THEY ARE DOING ONLY 45 OR 50..... TO AVOID OUTBREAKS OF THIS SUPER CONTAGIOUS AND SUPER LETHAL VIRUS DESANTIS SHOUL NOT HURRY AND INSTEAD SHOULD WAIT FOR THE GREEN LIGHT OF SCIENTIFIC AUTHORITIES WITH DR FAUCI AND DE BIRX HEADING OTHERWISE IF ANOTHER OUTBREAK COMES WILL BE HIS FAULT AND DEVASTATING
Pinellas	General	I get that people want to go to beaches, and bars, and have their hair cut and their nails done, but if we can just wait until we have no more cases (while maintaining regular testing!), I believe we will be better equipped to handle the second wave. We currently don't know whether people can develop immunity to covid-19, so there is a large chance that those who survived one case may be killed by a second, or they may carry it to their loved ones, mistakenly believing that they can no longer pass it on. Please, please wait to re-open Florida.
Lee	General	Put all nonessential workers back to work. They need the money now. They have families to support. Hair Salons, Barber Shops., they need help. They can wear masks, gloves, also the customers can where masks.
Collier	Healthcare	As a healthcare professional, I understand public safety is at the forefront. However, we cannot shut down the entire economy forever. The tourism industry and small business will be destroyed, if they aren't already. On that note, precautions should be recommended to everyone and those that don't follow them, will naturally suffer the consequences. Everyone will be affected by COVID19. Our hospitals in Collier county not even close to typical capacity. Our ERs have few patients. We need to re open and we need to all continue careful interaction and common sense. If you're sick, stay home. If you're elderly or have risk factors, stay home. Everyone else, carry on and wash your hands. Thank you for your time and attention.
Lake	General	I think if people use common sense stay apart, use face masks for a period of time, wash their hands!!! Start with a small amount of people, slow and steady!!! I agree people that are compromised stay home until they say it's safe!!! It's time to start getting the economy back
Orange	Retail	I believe the state should reopen with some restricts. First would limit access to nursing homes and other places that older people congregate. The second would keep limiting concerts, audiences at sporting events and other large gathering. We need to prepare for the general election with booths further apart. Also we should have additional free testing sites available to avoid a hot spot of covid19 from appearing. Overall though all nonessential bunessness should be able to reopen with small restrictions. Parks and beaches should be completely reopened. Restaurants should be put at 50% compactly. Non essential retailers should be allowed to reopen along with manufacturing. I still think limiting travel into the state is a good idea and like I said lots of testing to avoid a hot spot or outbreak especcial in nursing homes or other areas with a lot of high risk people.

AMERICAN OVERSIGHT

Manatee	General	Dear Governor Ron DeSantis, I want to strongly encourage you to open the state of Florida. Science and experience proves that isolation is not healthy, either for our immune systems, which others say they are concerned about, and for our mental health. Not to mention the livelihood of our families. People need to feel like there is a reason why they are here. A reason they are gifted to wake up alive each day. A desire to provide for their family the way we are suppose to. Shutting down our state has not served to help in any of the important areas of our lives. Making people who are healthy stay in isolation makes no common sense. Making people who are sickly or have compromised immune systems stay in isolation does. PLEASE OPEN UP THE STATE OF FLORIDA! Our lives and livelihood depend on it. Thank you and I am praying for wisdom for you to truly understand what would be the right thing to do. Sincerely, Susan Arnold
Orange	General	We need to open up all businesses in Florida now. People are losing their livelihoods and many businesses are already doomed. Many people cannot last another week or another month without work. Florida's unemployment system has failed and people are starving. The immunocompromised and elderly should isolate. People will wear masks if needed in shops and around crowds. People will keep distance from each other. Ultimately this is a constitutional issue. You cannot arrest people for going to church or for going out in crowds. This is America and people have a choice. Many will open whether you say it's ok if not- otherwise they will lose everything.
Palm Beach	General	You are going to be accountable for the decisions made now. The lack of discernment regarding what the "science" is based on is criminal. Public officials are going to pay dearly for locking down 22 million healthy Floridians for a month. Financial crippling of the economy and financial violence. This is not how any pandemic in the history of the world has been handled. The suspiciously "new rules" for aerosol viral nuclei are beyond silly. I can honestly say this because I have checked the science. You will be asked "What are these rules based on? Show me." Open Florida up and let healthy people function. If people are sick, there are better ways to handle upper respiratory infections. The news and government will be ignored when they cry wolf one too many times. The population will rise up and take over.

AMERICAN OVERSIGHT

Hillsborough	Professional Services	I am a licensed cosmetologist and I am independent self employed individual. To dat I have no received and support that was to be available to the small business and self employed. I currently lease a loft Salon Lofts where we have 20 plus individual licensed professionals in the beauty industry working as independent businesses under one roof. Prior to the shut down on 3/27/2020 we did not have all of those individual business owners including the salon loft organization following the proper protocol for Covid-19. There is no way we can social distance while serving our clients so as hard as it for me financially I worry about the reopening of salons for several reasons 1 who is going to hold loft owners and loft landlords (salon lofts) accountable if you reopen salons in the 1st. 2- and most importantly when will be get our protocol from the cdc and or Florida health department for servicing clients? 3- most of us either can't find everything we need "sanitizers Cleaning product masks gloves face shields ect to be able to keep ourselves and clients save. This also opens a huge liability on us as small businesses if it is traced back to the common community of the loft setting that alone could close our doors forever. These are just some of the things as a business owner we are carrying with little to no financial support. This not an easy decision to make for you as our elected officials or us as business owners. Thank you for your time.
Santa Rosa	Healthcare	There needs to be more emphasis on how dental offices in Florida are going to reopen and be able to provide a safe atmosphere for patients, providers, and administrative personnel. Although, I am sure the CDC and the American Dental Association will have input on the guidelines to reopen, the state should ensure dental clinics are ready to reopen safely and have the proper PPE available to do so. We cannot afford to lose one more life to this highly contagious disease. The dental career field produces large amounts of droplets and aerosols. The first priority should be to ensure all dentists, dental assistants, hygienists, and administrative personnel have access to N95 masks. You may ask why administrative personnel. Unless patients are being treated in negative pressure rooms there will be droplets and aerosols in the air throughout the building. Think about 2-5 dentists working in one small building office along with 4-5 hygienists as well. These clinics will be a breeding ground for transmission of the virus until we have a safe and effective vaccine. The current dental office my family and I use, is designed with a somewhat open-bay concept with no doors in the hygienist area. This is a rather small building with 2 dentists and 4 hygienists all working on patients at the same time. My plea to the Task Force is to please not let routine dental procedures begin again until we can be absolutely certain we can do it in a safe manner. The dental world needs to be more in the spotlight, since it is one of the most exposed career fields since providers, assistants, and hygienists are working inches away from the mouth for 8-9 hours a day. Thank you for tackling the huge challenge you have ahead of you, and for allowing the citizens of Florida to provide input to the Task Force to reopen our great state of Florida.

AMERICAN OVERSIGHT

Collier	Recreation	I own a mobile swim school, it is so important that kids learn to be water safe. Especially in Florida! We really need to be included in the guidance for re-opening. Our school closed early in an effort to keep all of our swimmers safe. However, swim schools are common in FL, please include us in your re-opening plan. Our school has ordered temperature guns (no contact) for checks before each class, hats with full face shields and we already have a great cleaning system. We are counting on your guidance to help us know when it is safe to implement our new plans and start teaching again. Thank you!
Leon	General	Yes, reopen the state. Let people make their own choice.
Miami-Dade	Manufacturing	Dont open.
Orange	General	Guidelines of the federal government state there has to be a decline in cases, increase in testing, and contact tracing. Follow the guidelines.
Broward	Retail	It would be a horrible idea to reopen non essential businesses like malls and stores. Please do not be greedy and think of the health of the people that work there and voted for you. I think more time should pass so that we can reopen safely.
Orange	General	Please don't re open. It's too early, we should wait it out a little longer. If theres no health, there's no economy. Without people none of this matters. Also, we shouldn't be paying rent since we are all (or most of us) out of jobs. I'm runnning out of funds. Thank you
Charlotte	Healthcare	I think it is important to expand testing to plan this re-opening and to control the upcoming outbreaks.
Leon	General	The infection rates and death toll are relatively low because social distancing and self-immolation are working. Reopening before things are fully under control, against the advice of doctors, scientists, and epidemiologists will lead to more infections and more unnecessary deaths. This illness has severe consequences, including long-lasting side-effects, in many of those who contract it, including children. Children who may survive, but have a high chance of then infecting and killing their parents and grandparents. That you are seriously placing your idea of economic success over human lives stupid at best and psychopathic at worst. Keep things closed.
Indian River	General	I have a bachelor's degree in forensic science I emailed CDC regarding a common sense issue about ventilators...I used a car analogy. I still believe the ventilator is what's killing people see my example.. Pretend your lungs are a cars radiator hose that is 80% clogged with gummy residue. You drive around slow it works but is still clogged . You head out on the highway mash the gas pedal you force more fluid through that 8o% restricted hose now it gets overwhelmed and what it bursts .the same way the alveoli are in your lungs and bronchial tubes. They put you in the ventilator and your lungs are taxed .like as if you are that radiator hose and your lungs cannot handle that extra pressure. And the results are devistating.. so I think they need to be easier on the pressure and if possible just use old school oxygen in the nose as long ass possible . Or earlier ventilator before the lungs get over taxed..just my theory..Also as far as reopening why not the old store slogans with a twist .NO shirts No shoes no masks . No service .everyone should have on masks to enter a buisness until we have this under control

AMERICAN OVERSIGHT

Hillsborough	General	Do not reopen anything.
Leon	Education	As much as I ache for local businesses, and am trying to spend as much money as I can on them instead of out of state corporate interests, it is pre-mature to broadly re-open Florida. There are many talking points regarding COVID-19 but the one I'd like to take a moment to focus on is "It's no worse than the flu" and there are a few things that make that preposterous. - Recently COVID-19's death count surpassed 2019's flu death count, WITH all the precautions in place. Were we business as normal we would undoubtedly have blown by it. - Annual "flu" death counts ignore that there are multiple strains of seasonal flu and are generally a combined total, while this is only one ailment. We need to stay closed and you need to be hounding our government representatives like senators Rick Scott, Marco Rubio and my rep Al Lawson, to fight for relief for America's WORKERS and SMALL, LOCALLY OWNED businesses. The amount of many being passed out to prop up the stock market could have been used to stagger 20-50 THOUSAND dollars of relief PER TAXPAYER. No, we don't actually need nearly that much, but the ridiculous gap between support for taxpayers vs. support for corrupt businesses is disgusting.
Broward	Recreation	Gyms, beaches, parks, Ramps should open. I also believe that setting only a timeframe for the beaches will make people run to the beaches for those hours. When beaches open they should just open without a timeframe. People need to exercise. I am someone who goes to the gym everyday for not only my physical health but mental. People are becoming lazy and depressed which will result in more issues down the line.
Leon	General	Please do not re-open the state so hastily. COVID-19 is a serious issue, and re-opening the state prior to most estimates of peaks is irresponsible. Businesses and the economy can be rebuilt, but lives are irreplaceable. Please do not endanger millions of people for short term gain.
Hillsborough	Manufacturing	When we had less confirmed cases we shut down the state. Now that we have more were going to reopen without having any significant advances on how to combat this virus.
Leon	General	The heartbeat of our state is not business. Our most valued resource is people. We and businesses are more resilient than you think. Common people can handle challenges. The wealthy might fear the unknown. The people will prevail if provided the safety to required to protect their health. I urge our elected officials to make sound decisions based on what is best for the people of Florida, not the businesses.

AMERICAN OVERSIGHT

Brevard	General	We do need to reopen, but it needs to be done slowly and under advisement of the health professionals. All models don't show us peaking here until the beginning or the middle of June. The worst thing world be to try to do too much and we overload our hospitals and people die unnecessarily. We would have to shut down again and that would be more devastating to us all than the first shutdown. The second worst thing would be to reopen too soon and businesses open but then face having to shut down again because there are not enough customers. For every one person yelling to open everything up, there are many more sitting quietly and hoping you will do the right thing. Any reopening should be slow and under the advisement of health officials. Outdoor activities first, they're lower risk with everyone not breathing recirculated air. Once a small step has taken place, we need to watch and wait. It would be more traumatic to everyone if we take one step forward then two steps back because we rushed things. You can't rush a virus. This is hard on us all but would be even more difficult if we face another shutdown because we rushed things.
Broward	Healthcare	As far as PPE we need more of it there's a shortage providing gowns, masks and gloves. It necessary and there is a shortage. There also needs to be more people in hospitals to care for these covid-19 patients, nurses ,doctors, paramedics and tech all aspects; Also firefighters and cops. They should all be getting Hazard pay until this pandemic has ended. All the students whom are studying to be in all and any Medical field or front line need to have their programs open at all colleges and universities. Their Hands-On internships have been halted due to this pandemic, so we need to figure out a way for them to accomplish their academics and get on the front line as soon as possible. I only recommend that we open the state of Florida if we can safely protect all the citizens. I don't care how long the social distancing and stay at home orders last.
Hillsborough	Government	You are doing a great job Governor. My family and I believe in you. Please get us back to normal as soon as you can! Don't let the outside forces, like the media, prevent you from doing the right thing, and opening the state. I think we did a great job on our initial reaction, but not that we know it isn't as deadly as we once thought we need to get back to the way things were before they were to late. More people will suffer the longer we are on lock down and can't socialize with others in our society. Please keep up the good fight, we have your back, and open Florida wide open again!
Pasco	General	When we are in unprecedented times and faced with the unknown the masses let fear rule. With that said, historically speaking I believe it is of utmost importance to heed the words of the medical community. While it's true that this disease is not easily predictable, it has been proven throughout time pandemics have come in waves. Most Floridians are educated enough to understand this possibility and call upon our government, who were placed in their positions by the people and for the people, to use caution when deciding our fates. I urge you to err on this side of caution. Please DO NOT rush to re-open our state.

AMERICAN OVERSIGHT

Palm Beach	Recreation	Please open the beaches back up. I live in a tiny apartment, the leasing office closed the pool and took away the chairs. We do not have a patio or balcony. We are STUCK INSIDE. The beach was all we had.
Palm Beach	Education	Vocational and Career Training schools must be re-opened quickly. The masses of displaced unemployed workers now require re-training in programs that are short term in duration and lead to professional licensure. Rather than incentive citizens to remain home unemployed, funds should be redeployed and invested in Post secondary Vocational Programs , especially in hard hit Palm Beach/Broward/and Dade county.
Orange	General	Please consider reopening the state. I have been out of work for nearly two months now as a gig worker, I am barely making it off of my savings, and even with the stimulus package I do not have much more money left to keep going as the sole provider with a family of 5. I am a gig worker, I have field for unemployment just like the rest of us and I have not only heard nothing, received no unemployment benefits, or federal benefits. I desperately need work and unfortunately that will not begin to trickle in until the state opens. I also have two children with disabilities who due to all of this are no longer able to receive their needed therapies to help them improve their quality of life. I understand that these are scary times, and that people are unsure of what to do, but I say if you as a responsible adult understand the risks and are willing to accept the risks involve then you should be free to go back to as much of a normal life as possible and for those that are afraid, which is also fine, they should be allowed to continue staying at home and keeping distances. It should be a matter of personal choice and taking personal responsibility for our own personal actions.
Broward	Retail	I work in retail furniture sales and it is a hardship not being able to work. Social distancing has been difficult but if we rush into opening South Florida before we are ready it has all ne for nothing. I have a frail 85 year old mother and fear the tragic consequences of her and others face when contracting such a savage virus. We need to put our health over economy and politics. We need to do this the right way. Right now there are just too many uncertainties.
St. Johns	Healthcare	Please reconsider lifting the order. I am a RN and I'm working around the clock with my colleagues to fight this virus. We have not seen the worst of it yet. I know people are losing money, jobs, and so many other things but your health and the health of every other Floridian is the most important thing here. Let's not have a situation like other states and this thing gets out of control. Let stay under the order for a few more weeks to get this under control.

AMERICAN OVERSIGHT

Collier	General	Please Re-open Florida! The numbers of people affected is extremely low. The consequences of shutting down the economy are far worst than the consequences of a seasonal virus. What are we going to do in October when the cold weather comes back. We can start opening the parks and beaches. We have to open the schools so kids can strengthen their immune system in order to build herd immunity. Thank you, Sebastien Lemoine
Brevard	Professional Services	Hair salons should be the absolute last business to open. As a hairdresser we cannot stand 6 ft from our clients. It takes a minimum of 20 minutes to apply a single color to a guests head, and that's going very fast. We stand inches from our clients to cut hair or do color on them, would you want to stand inches from someone who is breathing on you who could be sick? Gloves and masks will not protect us, and changing PPE between guests will only add to the expense of running a business. It is too dangerous to ask us to risk our health just to cut someone's hair or color their roots. People want haircuts and color, they don't NEED them. Our clients lie to us all the time when we ask if they are sick, and taking their temperature is pointless if the virus takes 2 weeks to show symptoms. So i ask you, to protect my fellow stylists and put us last.
Leon	General	I do not think it is safe yet to re-open Florida. We are 8th in the country with Covid-19 infections and those numbers need to stop going up before the state can safely open back up. If opened too soon, we will see the numbers of residents with the infection skyrocket.
Volusia	Healthcare	Please restart elective surgery and joint replacements. Many people are suffering with debilitating pain.
Pasco	General	Poverty kills. We need a plan to open our economy and put people back to work. We have damaged ourselves in just about every factor from economy to infrastructure to students. While a single death is not acceptable, the long term effects of this shutdown will kill many, many more than the virus. The government needs to get out in front of this in a structured, organized way before the citizens of our country conduct their own random opening of the economy. Let's go!!!!
Pinellas	General	Florida has more cases than 42 other states, and should not reopen until June 8th or later per official guidelines: http://www.healthdata.org/covid/updates Opening prior to June 8th would jeopardize our health. Please do not do this. More deaths = less votes.

AMERICAN OVERSIGHT

Duval	General	I am very concerned about re-opening without strict limitations or guidelines. I have seen a drop in people following guidelines over the last week or so in Duval county as our numbers have shown improvement. I'm concerned that when the stay at home order expires, people will resume life as normal and we will see a resurgence in the virus. One of the areas I'm particularly concerned about are places of worship. While I agree that worship centers should be allowed to continue meeting, I think it is imperative that the government put parameters on the number of people allowed to be in attendance, how far apart they should be, if they need to wear masks, etc. Most places of worship can be someone's biggest exposure risk for the entire week so setting up guidelines will be crucial to ensure the virus does not spread. Thank you.
Volusia	Professional Services	I am a hairstylist in Volusia county. My only comment is that I don't believe it is safe and/or healthy for stylists to be performing services at this time. I have read other states requirements for reopening salons and believe that if we are at a place where we are having to follow so many protection protocols then why are they re opening. It doesn't seem safe. We are too closely working with individuals and there is almost know way of being able to definitively assure we are not spreading or contracting COVID-19. Almost all of the fellow stylists I have spoken to or seen make comments agree. It is more clients putting vanity over our and their health and safety. We are not essential. As much as I would love to return to work and be able to service my clients, I do not want to put my pocketbook over my own health and the health of my six year old son.
Leon	General	If the state is reopened with: no readily available proven treatment, no increased testing, and no steady supplies of protective equipment for healthcare workers I WILL SUE YOU
Hendry	General	This state should not lift restrictions . Or in Miami and that area there should be more restrictions because of the rise in cases .
Seminole	Recreation	Open public pools in gated neighborhoods
Lee	General	If we screw this up we do get a second chance but it will be costly.LIves, time, and money! Please take the time and precautions needed to do this right. Like cutting lumber, "measure twice cut once" ! Please take the extra time to reach significant testing levels and decreased positive tests. Retired Ft Myers Fire Chief of Operations Randal Jones
Seminole	General	I think it would be foolish to open up early considering the fact that schools are closed and daycares are still suffering. I think we should wait until late May to open up and see what happens in other states first. I think we need to think about opening up places that could help as a retrieve from the chaos like beaches and state parks first ....gyms and barbers should be last to open up and it should be done in phases to see how things are going not all at once..

AMERICAN OVERSIGHT

Pinellas	Retail	I am 30 years old. My husband is 32. We live with my grandmother, who is 95. As a result of Covid-19 we have become her full time caregivers, as our household is completely locked down to anyone from the outside. I was laid off from my full time Retail Manager position at the Aveda Institute Tampa Bay, a cosmetology school, on 3/20. I was contacted to see about coming back to work with a hopeful return date of 5/4, but this is just too soon. I don't feel that it would be safe for me to return to work, interacting with my coworkers, students, and guests, and care for my grandmother without possible exposure to Covid-19. The virus would be deadly for her because of her high risk. Therefore, I find myself in a position of having to turn down returning to my career of 5 years, or remain at home where I can keep my family safe. I implore governor DeSantis to hold off on reopening businesses until we have seen 14 days of reduced cases, with widespread testing available for those who may have been exposed to the virus in the workplace.
Orange	General	Guidelines of the federal government state there has to be a decline in cases, increase in testing, and contact tracing. Follow the guidelines.
Palm Beach	General	I am a member of Loxahatchee country club a private community and am 76 years old and feel that Golf is essential for my health and mental wellness. We will follow all the guidelines for social distancing please allow us to open. Thank you
Miami-Dade	Healthcare	Its not time to reopen Florida state. When every one is asking what you prefer first our answer is HEALTH. So please let people keep safe home. Economy is in second order.
Orange	Government	It's still too soon to think about reopening the state. If we reopen to soon, people will start to become complacent, thinking the virus is completely gone and we'll end up with a second wave of this thing and it will take even longer to get back to normal. If we hold out until the number of cases is either in the single digits or non existent and stays that way for several weeks, we will be much better off in the long run.
Brevard	General	Florida should remain mostly closed until a testing capacity of at least 50,000 tests/day statewide is achieved, and contact tracing has reached an adequate level.
Bay	Tourism	Keep the tourists out and ban vacation rentals until at least June 1st. They will come in and go to grocery stores and beaches and spread the virus, causing a sooner second wave. Please keep them out and extend the travel ban. Allow the residents to attend the beaches.
Duval	General	Stay closed as long as we need to be.
Duval	Healthcare	I think we should remain closed through at least the middle of May. I do think that dental/orthodontic offices as well as other medical offices that are closed should be allowed to reopen and resume caring for patients. However all other nonessential businesses should remain closed - especially gyms, tattoo shops, and massage parlors where the risk of contamination remains high.
Polk	Recreation	I'm writing this asking for you to allow people to access our beaches and county parks. These are places where we can enjoy the outdoors . Obviously, being outdoors is beneficial mentally, emotionally, and physically. It is the total opposite of a confined space, which is where the majority of cases are contracted.

AMERICAN OVERSIGHT

Brevard	General	Hey there, I feel this is like asking the students if they should have recess or study more. Also, most of the public are not scientists, economists, doctors, healthcare administrators. That being said, we have about 24% of Brevard's population is 65 or over, proper precautions need to be put in place to protect the most vulnerable. With workers going back to work, will they have the necessary PPE? Are you going to mandate if the business is open, that proper PPE gear or masks need to be worn? Ensure that each establishment has hand sanitizer for everyone coming in and leaving the facility? Are you going to limit the number of people allowed in an establishment. If there place of business opens, yet they do not feel comfortable going back or can't due to childcare or caring for an older person, they can't claim unemployment. The opening of businesses should be like a dial, not a switch. The beaches have been steadily increasing with traffic. Traffic on the roads is steadily increasing. Hospitals are starting to do elective surgeries. Let's see how that goes first.
Pasco	General	By all means you should NOT re-open FL at this time. ALL the science and lessons learned thus far say we need tight lock-down until testing is ubiquitous, a plan for contract tracing is in place and our healthcare worker have ample supplies. DeSantis, you are a disgusting, evil and profoundly stupid Trump sycophant. Reopening at this point is a truly & thoroughly idiotic idea! Obviously you fascistic, soulless, lying Republicans care nothing about good governance (since you don't believe in the concept of government), but I had no idea how little you care about human life or the greater good. I just wish the virus could help us purge you and your dangerous ilk from our society. Republicans are a cancer on the democracy and planet ... literally.

AMERICAN OVERSIGHT

Seminole	Healthcare	I am a dentist in the Orlando area. We have such a huge issues with treating our patients....way more than hairdressers, tattoo artists, etc. Yet not one person has even mentioned our careers. We work 12-18 inches from peoples mouths and create aerosols with almost every procedure. So of course I don't believe that it's safe to go back to work without the ability to have our patients tested and with the assurances that we aren't putting ourselves, our families and co-workers at risk. But I have a bigger issue...In today's world, many of us work for larger companies and are employees. Yet because many of us make more than $99K, we have no income coming in at all and aren't eligible for any type of relief or financial assistance. This is really tough for dentists (and many other healthcare professionals - dermatologists, optometrists, etc) who have recently graduated within maybe the last 2-10 years. Because we have student loans (Not all loans are federal loans - non-federal loans aren't waived!!) and many have purchased homes, so now have mortgages. What a lot of people don't realize is how far in debt we are coming out of school...easily $150K-500K especially if we have specialized. Student loans, do not cover all expenses in school. Most of us have large credit card debt coming out too because we are on a very fixed income in school too. But it's not only recent grads in this situation. Life happens and sometimes situations just get difficult. I've been off work for six weeks, and per the guidelines, we aren't returning until after May 8th at the earliest. We are the people that are struggling too that everyone forgot. So no, I don't think it's safe to work again yet. But we might not have any choice but to go back to a VERY dangerous situation, because there is no possible way for us to maintain social distancing. But we have bills to pay and have to live too. Thank you for asking For and taking our input. Sincerely, Beth Cherry, DMD, MS
Orange	Tourism	Please considered the long term implications shutting down the economy/tourism will have on Orange and Osceola counties. The longer the shutdown the more likely business will not reopen and furloughs will turn into layoffs. With unemployment only being 12 weeks in this sate if theme-parks do not open by July and workers do not get back to work the economical fallout will be huge. Growing up in Michigan I have firsthand seen what happens when an industry collapses (automotive). Climbing out of that hole is long and painful. Many communities never fully recover and the population begins to fall. As I do not take the seriousness of the pandemic lightly, it needs to be understood that the stay at home order was only to buy more time for hospitals. We have done that and must move from mitigation to containment. If not, the future could be very dim for Florida.
Orange	Tourism	I hope you can get disney open by June 1st because the food and wine festival at Epcot is in the fall and a lot of people are booked for the trip
Lake	General	Please do not rush to re-open our state too soon. We need to have much more testing and a report of the results before my 80 year old husband and I will feel comfortable leaving the safety of our home.

AMERICAN OVERSIGHT

Sarasota	Professional Services	I'm a Hairdresser, I have NO Income, NO Unemployment, NO Stimulus!! I AM am Eligible for Full Florida Unemployment, Born in the USA And have a gold star on my drivers license. I have been employed at JCPenneys for 15yrs, as with most of my coworkers with NO Unemployment. Unemployment has asked me to verify my identity after a month, and I am still pending. My husband tried to HAND deliver my information to the capital building and DEO after a 5 1/2 hrs drive, one way, and NO ONE would take IT! There are Two choices her PAY ME MY UNEMPLOYMENT CLAIM, or REOPEN THE ECONOMY NOW. This has cost me well over $1000.00 in interest Alone This Month. We are Now OUT OF MONEY!
Palm Beach	Healthcare	Do not rush to reopen the State until we know more about the level of infection in Florida. Florida needs to test everyone that wants a test whether they have insurance or not. Without this information you're inviting a second wave of infection. The Stae of Florida needs to stand with the people of Forida and not with the Chamber of Commerce.
Lee	Professional Services	I own a salon. PLEASE let us open. We can not survive much longer. If you don't let us open we will loose everything. We can do it safely. The cure can not be worse than the virus! Don't let the Democrats win!
Miami-Dade	Information	I am 72 yrs old I know we have to reopen soon even as the infections still are going up. I am scared I don't want to end up on ventilator and death. Saying that I feel safer if we could get real good masked for the elderly and people with conditions heart disease, diabetes, high Blood pressure, compromised immune system. I think all service workers should also get masked. I would like the criteria to be admitted to hospital for Covid infection be more relaxed, instead of on deaths door , age and compromised systems be a major factor. A lot of the deaths have been people come in and sent home get sicker then have to go on a ventilator and die. Can A person be admitted with the criteria covid and then age and health problems keep a few days to see if they will get worse or better. This is what scares me the most getting sick but not on deaths door sent home coming back with double pneumonia and going on a ventilator. When there are treatments like plasma and stem cell are available will help in the reopening and feeling somewhat confident I will live if I get this virus. We need to feel confident in the masks protecting us is that KN-95 just as good and available for the public to buy.
Okaloosa	Professional Services	I am a hairstylist. We have a very small salon and were working just fine being across the room from one another, screening our clients for symptoms and wearing protective face masks. NONE of us contracted ANYTHING and a lot of our clientele are military who travel. We're responsible professionals who are TRAINED to SANITIZE AND DISINFECT as part of our MANDATED routine between EACH CLIENT. Northwest Florida has the LEAST amount of cases and we have done EVERYTHING you've asked of us. It's time for us to go back to work! And yes, I applied as we were instructed, hell EVERYONE I know in my field applied for the grants, loans and unemployment. We've been completely left out! US and our FAMILIES are suffering! Please let us GO BACK and continue to practice the safety of our health the way we're trained and LICENSED to do!

AMERICAN OVERSIGHT

Miami-Dade	Professional Services	Statistics show that Miami-Dade county and the city of Miami, in particular, have a significant larger number of Covid-19 positives and deaths. As such, this county and city should not be compared with lesser affected counties and cities in Florida. The re-opening of business for Miami-Dade county should be extended and completed in several phases, commencing with small business openings, continued social distancing, small number of people gathered. Schools and universities in this county and city should also remain closed for a continued period of time. Miami-Dade should be the last county in Florida to be re-opened for business and recreation, as supported by the numbers and statistics.
Polk	General	When considering reopening the state, please consider that my family is just as important as yours. So, if you're willing to open the state, please be willing to open the state house for visitors and be willing to be out in the public, just as I will need to be. Please also utilize the many scientists that we have in our magnificent state to assist you in making decisions that will affect all of us.
Collier	Healthcare	Please do NOT open the state of Florida too early and put all of us, especially our healthcare workers at risk for Covid-19. With our demographic being on the more vulnerable side of the curve, we risk more cases and more deaths to this horrible pandemic. Don't be irresponsible and don't play politics with our lives and the lives of our fellow citizens.
Leon	Government	Please keep everything closed until the 1st of June. It appears that social distancing is working, but local and state offices need to continue working from home to make certain that the workforce does not become affected.
St. Johns	General	1. Yes it is an unprecedented virus but the fallout of an economic crisis and mental health crisis and human dignity and self determination crisis is so devastating to all . 2. The greatest fallout is in the homes within the at risk neighborhoods and the working poor, I know of one home where the grandmother is home sitting 17 grandkids who cannot go to school or daycare. I know there is very little virtual school work happening in so many other homes too. School should reopen June1 and let the kids go back to school giving working parents a break. 3. Hospitals and clinics must reopen. My Father is an at risk suicidal patient of the UF Shands and he cannot go in for his regular scheduled ECT treatments . He is one of thousands of people suffering during this time of closings.
Pasco	Recreation	Open the beach for sunbathing!! Experts originally said back in late February that the “virus” did not do well with heat. They back pedaled on that to instill and listen to “doctors” with false agendas ... now miraculously the virus gets killed by sunlight!!! Even if we have to stay in groups of 10 or less we need to be able to get outside!!! Nothing helps heal the body and mind like the sun, the salt air and the sea breeze. Makes no sense to open parks but not beaches. And everything else for that matter!! If this virus really spread the way they claimed it did, everyone who works at the grocery store, Home Depot and Walmart would all be sick but they are not!!! Stop the fear before the suicide rate starts going up markedly over this ... families are stressed out and kids need to be able to get out and play!!!

AMERICAN OVERSIGHT

Duval	General	Do not open everything back up! You are trading lives for dollars. People are too stupid for their own good, you have to have restrictions in place so we don't all get ourselves killed.
Broward	General	I believe we are not ready for reopening our statesjust yrer mainly Palm Beach, Broward and Miami counties. Thank you.
St. Johns	Professional Services	How are nail technicians and hair dressers supposed to do social disiciting ?!?! Even with all of the ppe in the world. They touch people for a living. . .
Hillsborough	General	Please DO NOT reopen our state yet. It is much too soon. There are still way too many deaths from this pandemic. I know that so many people are hurting financially, but this situation could get even worse than it is right now. Think carefully, Governor DeSantis, before making a decision that could cost more lives. Thank you.
Palm Beach	General	we need to re open
Broward	Healthcare	I would like to see businesses that have successfully implemented a work from home model continue to operate as such until the risk of coronavirus lessens.
Pasco	General	TEST TEST TEST! We can make a hidden enemy seen if put all our focus on test. Antibody testing. You can open business but people won't go to business if they don't feel safe. The testing HAS to be fixed.
Hillsborough	Recreation	Please open our Beaches and parks, for walking and swimming. Also open the zoo . I think we should have a mandatory face mask order. People will feel better wearing a face mask if it is mandatory , at work ,at the zoo , Grocery store,
Hillsborough	Healthcare	Please follow the guidelines set forth by the White House. Before reopening Florida we need to test the public on a large scale and demonstrate that our case numbers and deaths are declining. Currently we have not done this! We are not testing on a large scale and our numbers are climbing! Once we can demonstrate we have met the criteria for the first gate then we can begin to open some sectors of the economy as the White House outlined in their phased approach. Be careful governor we have a high population of elderly in this state!
Seminole	Recreation	The state has to be opened in the safest way possible . Should it reopen yet? Not until we have this in better contro. There has to be enforcement of the precautions we take to ensure everyone's safety. People are not taking this as a serious concern.
Broward	General	County should wait until mid May, then open slowly.
Broward	General	I just ask that we follow the 14 day decline prior to opening anything. We have averaged 9-10,000 tests per day. Yesterday was the first day we had an increase in testing (approximately 19,000). I know people who still can't get tested even with symptoms. We had a surge in cases on 4/23 as well as deaths. Broward was on a steady decline with 86 reported positive cases on 4/22 then surged to 177 on 4/23. That wasn't due to more testing. This shows we are not ready to safely reopen.

AMERICAN OVERSIGHT

Hillsborough	Healthcare	I believe non essential procedures should be allowed again. I've got a big issue with my eye and was supposed to have gone to St. Luke's doctor that specializes in my type of eye problem. The longer I wait the worse it may get and could that mean a loss of vision. Also, I hear the hospitals rely on non essential surgeries to pay their bills. This said, I think most people know to wear a mask and practice social distancing. In the doctors office or hospitals they will need to take extra preventive measures as well. We're playing chicken between our economy and a virus. Who's going to win.
Volusia	General	Please follow current CDC guidelines and DO NOT re-open dental practices for non emergency procedures. The dental field is one of the highest risk professions for infection per the CDC and ADA. These offices can not get the amount of proper equipment needed to safely perform these procedures. The workers are working in very close quarters in people's mouths and using drills etc that create aerosols that will spread the virus quickly in close quarters. My wife is terrified of going back to work as she knows she will have to decide between working without the proper safety equipment or losing her job permanently. I attached a copy of the current guidelines Thank You
Broward	Government	I think we need to wait at least through the month of May. Our numbers are still increasing. The testing sights in south Florida are still packed. I think if we reopen we will have even bigger problems and more people getting this virus. Please give us more time to stay at home and let's try to get this virus from continuing reaching more and more people
Manatee	Healthcare	Where are the test sites in Manatee county
Volusia	Healthcare	I think we should decide when it time to open up the businesses and not the politician. When one says that Lysol can be injected or other such products to cure the virus I have to wonder- I wouldn't believe anything they say
Leon	General	I strongly support the Governor in moving forward with reopening the state. The restaurant industry should be allowed to return to business and put the businesses in a position to serve their communities. My granddaughter is a server in a local restaurant and was furloughed a month ago. She was so proud to be able to support herself and live independently. Now she has no income and what little savings she had is gone. She is just one out of thousands in Florida impacted. To get back to work gives back the pride and independence so many need. I believe it can be done responsibly without risking the health and safety of others. We the public have learned the valuable lessons of social distancing and wearing masks, and for those at greater risk they must choose to stay home. I understand that there are risks with any disease but poverty kills people as well.

AMERICAN OVERSIGHT

Orange	General	Please reopen gyms! I need a place to release stress and my gym has already discussed how to implement social distancing.
Duval	General	I would recommend places that allow smoking and/or vaping: poolhalls, bars, night clubs and casinos to be the very last to be re-open. If the establishment agrees and sign agreement (Posted at entrance of establishments) to be smoke/vape free would be allowed to open earlier. Violation of this agreement would carry immediate shutdown and not allowed to reopen for at least 3 months from date smoking/vaping would normally be allowed.
Orange	Government	I think until the entirety of the country (and possibly global) has a hold on the COViD outbreak it would be irresponsible to reopen as we are a tourist destination that brings in people from all over the world not just the country and makes us a potential hotspot for outbreak just like the problem in Miami and New York but at an even larger scale. We depend on tourism and to risk the lives of both the workers and tourists would be a horrible mistake that would cost us not only the trust of our visitors but possible lives. To open any sooner than globally responsible would be irresponsible and negligent.
Lee	General	Covid 19- Until there has been adequate testing and contact tracing, this virus will continue to spread especially as more people disregard safety measures. Keep thing closed until it is safe. It is already too ripe an environment for continued spread. Listen to the scientists and medical experts, not the politicians.
Flagler	General	We need to focus on the long term effect of what small businesses, family restaurants, and overall economic struggles we Floridians will continue to face and have worsen if we don't start opening restaurants, schools, and essential establishments soon. To say only grocery stores and pharmacies are "essential", I hope those who have children now struggling with "learning" at home will disagree. Our education, life savings, freedom to assemble have been taken from us in hopes of prolonging the lives of those who would already be at risk from the flu. These senseless orders need to stop, for they are hurting businesses, children, and any financial security Floridians once had.
Pasco	Retail	I don't think enough testing has been done in areas besides metro. Ppl are not social distancing in my county. I am for opening the state's IF it is safe to do so and not for profit reasons.
Lee	General	PLEASE GO SLOW. ABIDE BY ALL MEDICAL, RESEARCH AND PROFESSIONAL PUBLIC HEALTH GUIDELINES AND RECOMMENDATIONS. The "protestors" demanding opening businesses etc. now are in fact EXTREMELY FEW IN NUMBER, only a VERY TINY portion of the larger Florida citizenry. ALWAYS place public health and safety above general economic concerns, ALWAYS. Otherwise there may be a sizable flight out of the state, thus wrecking property values and the state's general economy.

AMERICAN OVERSIGHT

Palm Beach	Administrative	With schools closed and not staffed update needed for storm shelters procedures in case of hurricanes We also need local supplies of masks impossible to buy Open golf, beaches only after we peak a how control over infection growth
Orange	Education	Please do not open the state until we have reached a comfortable rate of testing and following up. People are out and about without even knowing they are infected and may never show symptoms while killing everyone around them. Testing and follow up should be mandatory especially if you work with the public. All supermarkets and food handlers should be the first ones tested.
Orange	General	Governor I've been watching this scenario unfold, I think you understand the need to reopen the state. However, as with most governmental issues, we have a small elite, who feel that they're anointed with divine wisdom. This "elite", and supposed experts want to dictate policies that will change America as we know it. Sir, I know by it's hard to take a stand, but the stakes are immense. Honestly, with our economy producing very little, combined with the federal government printing oodles of money, something has to give. For the sake of our nation, let Florida get back to work!
Palm Beach	Healthcare	Let's learn from the mistakes of others (China) and not rush to relax the "stay at home" restrictions. It's better continue the restrictions for shorter period of time now, than to expose people to the virus and to continue the sickness, deaths and economic impact long term. Slow and steady wins the race!
Brevard	Professional Services	I read the requirements Barbers and Cosmetology Salons have to follow in GA to reopen. This is very good info that can be followed by salons in Fl. Where I go, this is already done before this virus started. Hairdressers have the most washed hands of anyone. Take temps when client arrives. 1 client at a time. Masks, gloves, etc. My nail tech has always followed heavy sanitary cleaning. Every time the pedicure chair is used, it is cleaned with bleach. Bleach is run through the jets every time and soaks for a required amount of time. Each client has their own bag of files, etc. Everything is sterilized. she wears a mask and gloves, plexiglass shield if warranted. It can be done. Some women have medical reasons they need hair done for them. I'm one of many. Please open them soon.
Osceola	Tourism	Keep the state closed. More people will die, and I don't want to be one of them!!!!
Broward	General	CDC guidelines should be strictly followed. Reopening should be done so as to protect the jobs of elderly workers and workers with pre-existing medical conditions which make them more vulnerable. Those who need a bit more time to feel comfortable in returning to the workplace should get it. Personal care business which require the employee to touch the customer like barbers, hair dressers and nail salons should be phased in last, and masks should be required for workers and patrons.
Brevard	Professional Services	I work in a Salon. I'm not comfortable going back to work now.

AMERICAN OVERSIGHT

Flagler	General	I had eloquently expressed my thoughts on opening the state. It was a clear explanation why we should not rush to open. I tried to submit and was told that due to "high volume response" I should try later. Waited, tried 3 more times and then everything I wrote was gone. So please allow me again to say please wait. We have adjusted. Yes we are struggling financially. But to open now when we as a state still struggle to test a broad spectrum of our citizens as well as have the knowledge to aggressively treat an ever evolving virus is just not what I feel would be best for the citizens of Florida. We are a social state. The majority of our citizens earn their living from some part of the service industry. A large majority of my family as well as friends base their income on restaurants, resorts, bars but that's Florida. But to put them back out there with the attitude of well, we'll see what happens is reckless and unneeded. So I'm asking Governor DeSantis to please lean on the side of caution. Yes, people will be irate to still be out of work but that will pale in comparison to the lasting effects of human loss.
Miami-Dade	Recreation	Parks, gyms, restaurants and movies should open ASAP for our sanity !
Miami-Dade	General	I think that salons/spas/barbershops could open with certain restrictions.
Orange	Government	I truly believe that the state should wait on reopening. As long as you have new cases, you have the potential to have another significant wave of this virus which will mean more sick people and deaths. IMHO, you should err on the side of caution. Money is great, but lives are greater.

AMERICAN OVERSIGHT

Hillsborough	General	People are not taking this COVID19 seriously. My neighbor's dad (who lives in the same community we live in) was diagnosed with COVID19 (he was sent home with double pneumonia and underlying co-modities. He was sent home with Azithromycin and hydroxychloroquine. My neighbor was told that if she was taking care of her dad that she would need to move in with him and self quarantine in seperate rooms of the house (Her husband is in a very high risk due to heart problems). The health department stated that she would then have to self quarantine another 14 days after taking care her dad. 1 week in she came back home to be with her husband going back and forth to care for her dad. In addition both continued as if they were not exposed to someone with COVID and went to Lowes, Publix, etc. I see numbers going up and do not feel that people are taking this safer at home seriously. We have elderly people that live in our community and they just don't get it - they congregate (30+) at our park sitting arms length from each other without the proper PPE. We recently had to have our car jumped and the roadside assistance person did not have a mask on nor did he care about respecting the 6 foot distance. We've received deliveries where the delivery person isn't wearing a mask or respects social distancing (allows people to come up and have conversations without respecting the social distancing). I understand the need to get back to some type of normalcy- whatever that will be moving forward, however I feel that with numbers still increasing we are not going in the right direction (decreasing the spread) and I seriously fear a second wave of spread if we don't stress the importance of everyone adhering to social distancing. I feel we need to know who has COVID, who has the antibody so we have a marker of where we stand. I feel uneasy that this is an ever changing environment where the COVID findings change from day to day. The primary goal should be the safety of all people and communities. I don't believe we are at a point where we are ready to open yet. I know that there are several people as well as myself that feel we are not ready/prepared to get back to norm and are not comfortable going to a movie theatre, stores, or any function that involves people. Not to mention a work place that houses multiple companies in one building and shared restrooms - how can we be safe in this environment when we don't know who is carrying or has this virus.
Pinellas	Education	Closing off the economy is damaging the lives of many. Forcing businesses to go bankrupt and allowing people to lose money.
Hillsborough	General	I am not sure who are members of this "task Force". However I hope and pray it is an eclectic members who include citizens from various professionals (legal, law enforcement, hospital, essential worker, religious,mental health, transportation,education) these are citizens who make up a diverse community . I suggest before discussing opening up our state we need to ensure we don't have any loose ends or pending task that have not been addressed. I was born and raised in Florida. I graduated from Florida State University. I am a Florida License Mental Health Counselor and Certified Addiction Professional. I am employed at a local hospital system in Tampa Florida.I suggest we provide mental health services to persons and their families who were diagnosed with COVID 19. I would also like to nominate myself on being on this or any future task force .. I think the Task Force should be organized and continue for at least the next year.
Lee	General	I believe Florida should stay closed till the middle of May. We still have people dying everyday. Our numbers just started going down.

AMERICAN OVERSIGHT

Lee	General	Please reopen Florida! Start with beaches, all parks, salons, dining. Open Disney even if just to Florida residents. People can protect selves while out. We need to get Florida working. Open schools as of 5/31 so kids can start summer activities! Yhank you!
Broward	Recreation	I believe you should reopen the land entrance to the everglades, located at atlantic ave and the sawgrass hwy. in broward county.. my wife and I love to go fishing there. while several people use that access, they do not congrgate there...people hike fish and bike, and view wildlife. there is many many more people hiking and biking along A1A in ft Lauderdale, coconut creek, Boca Raton, Delray beach ect than use the land access. This is a wilderness area not a crowded Walmart or Publix parking lot.
Columbia	General	In Columbia County we have 47 cases and 0 deaths. I think this should be taken into consideration when opening our businesses and activities to the public. If we are not in an area of extreme cases, we should be able to move along much further in the phases than South Florida or other areas. This is taking a toll on my children psychologically who are 14 and 6 who have been limited to only very few activities on the 1/4 acre we live on. They would love to be able to have their sports and other activities back. Their whole life came to a standstill in mid March. It would be nice to be able to take them to the state parks, float down the itchetucknee, etc.

AMERICAN OVERSIGHT

Duval	General	Thank you very much for inviting us to give feedback. In general my opinion is that there is no reason to keep the economy closed any further. There is more and more evidence coming up that the death rate of this virus is a fraction of what we thought. It's probably less, than 0.5%. We can't keep ruining people's livelihood because of something that's essentially a bad flu. What I personally wish could reopen are libraries, schools, and USCIS offices. Libraries because people don't come close to each other anyways. It's a place where social distancing was a thing even before Covid-19. Schools, because if people want to go back to work they need childcare. The virus is not dangerous to kids, let them build up immunity while they can do it without any real risk. I really wish USCIS could reopen again. I've been waiting for my green card for 1.5 years now. My interview was scheduled for the 9th of April. Now I have to wait for who knows how long and it's really upsetting to have to put my life on hold for years. But I really think that all businesses should just open up again. This situation is ruining people's lives for no real reason. Yes, the number of cases will start growing faster than before. But it's true no matter how long do we wait, as long as there is no vaccine. And that will take a really long time if that ever happens. There is no guarantee that there will ever be a vaccine. There is no vaccine for SARS-1, HIV, or Hepatitis C. This situation is hurting the poorest people the most,not just in the US, but everywhere else too. It's not sustainable anymore.
Palm Beach	General	South Florida should not reopen yet. This virus is still spreading and will hurt the vulnerable. My father works for the government and they are prepping employees to reopen. Masks and gloves will not stop the virus. Right now I am able to work from home but if we reopen I will be forced to go back to work with no where for my children (preexisting conditions) to go. The 2/3 FMLA pay is not survivable and I would make more money on unemployment. So many people will die if we reopen to soon and will be completely the governments fault. Save our families!
Seminole	Professional Services	I do not think it is smart to reopen just yet. Please listen to the scientific facts.
Pinellas	General	Open following the set 3 phase plan suggested by the president.
Manatee	Healthcare	I think beaches and parks could be re opened with contined social distancing. Also walmart resume it's normal hours wth continued behavioral modifications
Lee	Food	Keep restaurant closed. China is already getting its 2nd wave and Singapore is already getting its 2nd wave if you reopen to much to fast we are going to get in the same mess and it’s going to kill more people so please just give it more time . Restaurant can continue to do Togo if people really want the restaurant food .
Miami-Dade	Education	Please whatever you do , DO NOT OPEN SCHOOLS, adults know how to wear a mask or take precaution, but children is very hard , specially small children, Do no open schools !!!!
Broward	General	I think we should continue as we are until at least mid May. I would love to get my hair and nails done as much as anyone but it is not worth the risk. I miss seeing friends and family but as are numbers are still going up I find it very irresponsible to open things back up too soon.

AMERICAN OVERSIGHT

Lee	General	Hello, Start by ensuring we have an ample supply of WHO approved hand sanitizer. Every business must have a gallon on hand at all times. If this means we have distilleries making etoh from the corn farmers are throwing away, so be it. Regular replenishment of sanitizer is a must. 100% mandatory face coverings to go out in public. Many unemployed people could be trained to provide basic enforcement. Every idea must be thrown out, regardless of how draconian. This is the scrum of a lifetime and we al have a part in securing our future. Warm regards, Dave
Hernando	General	Do not reopen florida. My 3 year old son has respiratory issues and I am fearful of the world reopening this early think about someone other than yourself and think of families.
Palm Beach	Food	Now that it has been proven that heat, humidity, and UV sunlight greatly impacts the virus life span, let's start to open up public spaces. As long as social distancing can be maintained I think it is important to let people get out into beautiful Florida open spaces. I also think that much like social distancing measures are the new normal at retail stores and grocery chains, other outlets like restaurants can have simular guidelines. Thank you
Broward	General	When doctors say it safe June would be good enough time for testing to be done
Pinellas	General	Please reopen everything, including bars and stripe clubs because I REALLY NEED to go back to work. I can't live like this anymore. This is getting ridiculous and I want my life and job back.
Hillsborough	Healthcare	I am a small business owner, in the entertainment industry. My company has seen 100% revenue reduction for the rest of the year. Despite the pain we are experiencing, I don't believe we should open the state (or any other state) up for business, even in limited ways. Until we have a robust, nationwide contact tracing system and rigorous, widespread antibody testing, with proof that having antibodies confers immunity, we should continue to shelter in place.
Charlotte	General	Testing and tracking along with individual responsibility is key to getting through this pandemic. Until the testing protocol is in place 100% and there is a means to establish tracking of known cases and establishing who they were in contact with certainy, we might be able to stay ahead of the spread. Opening too soon is a walk into failure.
Palm Beach	Healthcare	Open Medicare Insurance offices.Seniors need help in this crisis. They are scared and want consultation.

AMERICAN OVERSIGHT

Pinellas	Education	I am a high school senior and I've been made aware that my freshman year of college is now in the question of being cancelled. The government and this virus took away so many last memories I will never get to have and now my first college experience. The restrictions need to be lifted before a lot of children begin committing suicide and become depressed.
Polk	Government	Mr. Governor, Please DO NOT re-open the state of Florida. I fear for my safety and the safety of our community. Please have patience and allow for a vaccine to be developed and distributed. Show us all that no one is disposable and give us all a fighting chance to survive. I hope that your family and yourself are healthy and safe. Warm Regards, Sandra A concerned citizen of Polk County Florida
Pinellas	General	Until we have adequate testing throughout the state of Florida and able to track, isolate and provide care, we should not and cannot open this state to a resurgence of this deadly virus.
Leon	Government	The task force is made up of CEOs and corporation owners. I think these people will only have making money in mind when deciding when to open the State. Why didn't the Governor include anyone from the medical field or the dept of Agriculture and Consumer Ser to serve on the task force. I don't feel like the well being of the people are represented with the existing task force.
Orange	General	I am in favor of allowing all businesses, including libraries, museums, theaters, etc, to begin reopening under appropriate safety guidelines, such as social distancing, increased cleaning/sanitation procedures, along with the recommendation that employees & customers wear masks inside stores. Set reasonable limits on large gatherings. Those establishments serving food/drinks offering dine-in service should limit capacity to create more space between customers, perhaps creating more outside seating. I would apply these rules to theme & amusement parks also. We need many more people tested, including readily accessible antibody testing. People are hurting, Florida needs to get back to work & life. Thank you.
Pasco	General	We need to have our government officials to start this economy. People are loosing their futures so the cure is getting worse than the virus. Restaurants need to be open and tourists need to cone back asap or Florida will be in a depression withis 3 months. Open Florida now PLEASE.
Duval	General	Open it up balls to the wall f this virus it is media driven cover your ass bs

AMERICAN OVERSIGHT

Palm Beach	Government	Governor, while you devote vast amounts of time and resources into reopening the state's economy, millions of the constituents you represent are starving and without funds that were guaranteed to them by right. I won't go back to work until you give me a guarantee that I won't be evicted from my home, and I'll be made whole for all the potential money I could have made due to YOUR order to shut down the state. Regards, Reuben Isaacson
Miami-Dade	Recreation	Parks, gyms, restaurants, churches, movies need to reopen for the healthy ASAP for our sanity
Broward	General	Reopen small businesses And retail first Do not open beaches
Pinellas	Tourism	Please get our beaches open for locals and tourists. The area has been devastated by shut down of beaches, hotels, hotel pools, and loss of visitors. We are responsible adults and can maintain social distancing, and sanitize ourselves. We can work, and play safely. No need for a Nanny State to rob our freedoms and destroy our local economy. Restaurants are going under, We need to get open again. ASAP!
Volusia	General	I would like more testing - including anti-body testing- before opening everything back up. I am / I do not feel safe yet and will not go out to dinner or to the theme parks for a long time. I lost a relative to the 1918 pandemic in PA and do not trust voices clamoring for opening everything up. I just don't and I feel bad for business, including my own, but my life is worth more as are those who I love. Period.
Lee	Government	I actually edited it ... I'll spare the lengthy message. My suggestion is simple. We can sacrifice 90 days now, or pay dearly later. Is 90 days much to ask for human lives? We can and WILL bring the economy back. However, you cannot bring back a head of household, a mother, father, grandparent, spouse, son, daughter, etc. Such a loss WILL FOREVER change lives. Please don't place the mighty dollar before human lives. If you ease up too soon, this WILL come back to bite us. April - May - June followed by a slow, well informed phasing to reopen establishments. Anything sooner, and time will let you know if you made the right decisions. Every action has a reaction. I pray you make the right one. God bless.
Volusia	Government	I know that it is portent for people to get back to work but we are still seeing an increase in cases and not everyone has been tested. It is crucial that everyone gets tested and more or less see what those numbers are. I think it is too early to reopen!

AMERICAN OVERSIGHT

Lee	Healthcare	My concerns are opening up elective services, especially dental. Dental procedures produces aerosols that can stay suspended upwards of 3 hours. Hygienist are at the highest risk as they see 8+ patients a day and are inches from a patients face. There are not enough measures in place for these offices to open. The PPE's are backordered for months. Many of these patients come in sick normally because they feel they "just have a cold" or they are "almost over it". I had many patients in January-March coming in sick after having traveled all over. That poses a risk to everyone in the office including other patients and their families. I feel like there should be special attention paid to the field of dentistry.
Hillsborough	General	I feel that rushing reopening carries the risk of the virus spreading like wildfire and having to lockdown all over again. I would prefer continuing on the way we have through April until it is safe to reopen over having to do this all over again because of rushing and potentially risking more lives.
Duval	General	Follow the best medical advice and also use the Institute figures and dates for easing the distancing restrictions. Let wisdom prevail from the medical community to deal with a serious health issue and crisis. Why any need to rush? Let us not have a resurgence of cases when we ease on social distancing and contact too soon.
Palm Beach	General	Open us up! People vulnerable to the virus should still keep distance, but the rest of us need to get back to living our lives. The medical experts always bring the doom and gloom and always are on the side of over-caution, which is not necessarily best. People want to get back to some kind of normal. We just heard the other day that uv rays kill the virus and we are the sunshine state, open the parks, beaches and playgrounds at a minimum. Studies in New York show 20% of 3000 tested have already had the virus...and obviously they survived it. Lethality rate of the virus is far less than we are being led to believe by the fakestream media.
Pasco	Management	We need to open Florida. It should have never been closed. I would forgo my unemployment if I could get back to work. I have not gotten any monies yet, but would be happy not to. I believe 1 death is too many, but, crashing the economy will do much more harm and cause more health issues including mental health.
Duval	General	Just open everything back up. Too many people are out of work. Make businesses set special hours for the elderly, people with pre existing conditions or are otherwise disinclined to go near other people. This has gone on long enough and is causing far too much harm to our economy, societal norms and way of life. Waiting for a vaccine that may or may not work is untenable. Humans are social creatures that have survived for thousands of years with far greater adversity that Corona.
Pasco	Food	Please have all workers tested for virus before allowing them to open their business especially restaurants. Also have them be required to wear protective gear and check temperature daily before working. Have regulation in place for workers and still have social distancing for those planning to eat at these places. Would like to see business open sooner than later.

AMERICAN OVERSIGHT

Hillsborough	General	People are not taking this COVID19 seriously. My neighbor's dad (who lives in the same community we live in) was diagnosed with COVID19 (he was sent home with double pneumonia and underlying co-modities. He was sent home with Azithromycin and hydroxychloroquine. My neighbor was told that if she was taking care of her dad that she would need to move in with him and self quarantine in seperate rooms of the house (Her husband is in a very high risk due to heart problems). The health department stated that she would then have to self quarantine another 14 days after taking care her dad. 1 week in she came back home to be with her husband going back and forth to care for her dad. In addition both continued as if they were not exposed to someone with COVID and went to Lowes, Publix, etc. I see numbers going up and do not feel that people are taking this safer at home seriously. We have elderly people that live in our community and they just don't get it - they congregate (30+) at our park sitting arms length from each other without the proper PPE. We recently had to have our car jumped and the roadside assistance person did not have a mask on nor did he care about respecting the 6 foot distance. We've received deliveries where the delivery person isn't wearing a mask or respects social distancing (allows people to come up and have conversations without respecting the social distancing). I understand the need to get back to some type of normalcy- whatever that will be moving forward, however I feel that with numbers still increasing we are not going in the right direction (decreasing the spread) and I seriously fear a second wave of spread if we don't stress the importance of everyone adhering to social distancing. I feel we need to know who has COVID, who has the antibody so we have a marker of where we stand. I feel uneasy that this is an ever changing environment where the COVID findings change from day to day. The primary goal should be the safety of all people and communities. I don't believe we are at a point where we are ready to open yet. I know that there are several people as well as myself that feel we are not ready/prepared to get back to norm and are not comfortable going to a movie theatre, stores, or any function that involves people. Not to mention a work place that houses multiple companies in one building and shared restrooms - how can we be safe in this environment when we don't know who is carrying or has this virus.
St. Johns	General	We were told to do this to flatten the curve and give hospitals a chance to not be over run. The hospitals are empty and the curve is flat. Now it seems to be about control. You can't keep people from getting sick. This was not the reason we were given. Now it has morphed into this tyrannical confinement order. Stop the madness. Open Florida tomorrow and let the people make their choices. After all this used to be America. And if you think the party trying to nullify the 2016 election, then investigated our President for 2 years, then impeaching him for looking too hard at corruption, is above using this for political gain, think again. This is not about us anymore. It's about government limiting our freedoms and we are sick of it.
Pinellas	General	Please don't reopen before at least mid May, preferably end of May

AMERICAN OVERSIGHT

Seminole	General	Hello Task Force! The health/medical reporting is overkill. We've had a GREAT education, repetitively, on how a pandemic affects these areas for the last couple months now that it's beginning to become classified as grumbling. **We need to hear encouraging (ongoing & comprehensive) news on next steps. This WE KNOW: MANY people need to get back to work, it's a disaster most Floridians are suffering. We understand the repercussions. 'INEXPERIENCED' QUESTION: what if the majority of businesses open in the State (except bars, sports arenas & maybe another industry you deem to remain closed) Statewide Order curfew (except those working during curfew), social distancing & mandatory masks. **This way people can get back to work for a few weeks. Perhaps, maybe, the demonstrators wouldn't demonstrate if they could at least work.
Escambia	General	Please LISTEN to the medical/infectious control experts! They kinda know a little something. DO NOT do like the idiot so-called governor of Georgia did. Re-open Florida thoughtfully and carefully. Do not rush just because elected officials want it or people ask for it. Take your time and do it right. Everyone's lives depend on it. We've lost too many lives already because elected officials in Florida acted out of complete and utter stupidity. They are murderers in my opinion. I do not intend to be a name on a gravestone.
St. Johns	General	Florida should remain “closed” for another 30 days. The only thing that should be reopened are the beaches for recreation and exercise.
Pinellas	General	I think we should be slow to open the counties and the state. Especially counties where demographics show more susceptible or higher rates of infection. My county has a lot of older constituents—myself included. You may think that the older generation can just stay home and have things delivered That breaks down when the delivery person is contagious but not tested or diagnosed. They’re in that two day to two week period before they are feeling sick but could be contagious. In additionWe don’t know if, like many other viruses, COVID-19 will mutate .I understand the economic issues but in the long run one cannot enjoy improved economic state if one is ill or God forbid deceased.
Citrus	Recreation	Open up the beaches for scuba divers
Seminole	Healthcare	To early to open up. Need to see a significant decline in positive cases and deaths. The curve needs to drop, not just flatten. After peak decline should reach at least 50% before phase 1 begins. This virus is not going away easily and it would be irresponsible to think it will.

AMERICAN OVERSIGHT

Hillsborough	Administrative	I am a retired NASA scientist & engineer (KSC) and while my degrees in Math/Physics and Aerospace are not medical, I do have an ability for numerical analysis. I have studied the graphical nature of the Johns Hopkins data from various countries, states, my local county (Hillsborough) and even zip codes. In addition, I have made observations of the daily lives of people in my area. What I have seen is not encouraging. The threat of COVID-19 in Florida will last well into 2021 and longer if not handled properly. What I recommend is neither continued current quarantine efforts nor completely opening the state, but a compromise. One truly encouraging effort was performed during the Toronto outbreak of SARS in 2003. The containment endeavor was heroic, albeit on a much smaller scale than the current pandemic. Their concentrated efforts were on exposed individuals, which is too granular to be part of a statewide effort at this point. County wide quarantine is also too wide an application to be effective. However, from what I have observed, it may be possible to isolate individual zip codes. This may be more manageable from a state perspective. These are my suggestions for your consideration in opening the state for business: -Statistically analyze each zip code for COVID-19 trends. -For those zip code with no increase in cases, allow them to open for all businesses. -For those zip code with an increase in cases, close them down completely for one week. -All closed zip code areas should have streets blocked, police patrolled, and people home. -Mandate use of masks for all people in all public areas for a minimum of two weeks -Mandate use of masks for business employees serving the public until further notice. -Individuals traveling into the state should have their temperature measured. -Hotels should restrict all communal areas. -Beaches can open with a minimum of 10-20 feet between groups.
Miami-Dade	General	I don’t think is a good idea to reopen the business at this point We should wait longer to make it safe for everyone .
Volusia	Construction	OPEN THE STATE YOU TYRANTS! The lockdown is ridiculous. Tell those in charge to get off their power trip and let people manage their liberties. The hospitals aren’t overflowing (which was the reason for this in the first place) so let’s get on with life. Waiting for a cure is abusive and stupid.
St. Lucie	General	I'm comfortable with safely opening the Florida economy. We can't go much longer. The country is headed for bankruptcy, so please consider lifting the lockdown order by May 1. Thank you. We all need to be able to get out of our houses and go somewhere other than the grocery store. Let's take the partisan dynamics out of the decision-making. We should all be able to use our common sense to keep ourselves safe with a gradual re-opening in Florida.

AMERICAN OVERSIGHT

Hillsborough	Administrative	Governor DeSantis, Thank you for being a truly great Governor! We really appreciate everything you're doing but PLEASE OPEN FLORIDA - ALL OF IT! Here are my suggestions: 1. For anyone that is fearful of catching the virus or is in a high risk category, give them the choice to remain home and do what they feel is right for their situation. 2. For anyone that wishes to go back to work, it should be their choice and they accept whatever risks are associated with their decision The above two suggestions cover all scenarios easily by giving the people the right to make a decision that is appropriate for their situation. For the people that wish to remain home, they can stay on whatever aid they require if they are entitled to receive such aid (unemployment, etc). Hopefully, many of these people are able to work from home and will still be independent of government aid... For the rest of the people - they can't wait any longer. It's time. Please don't let the pressure from the fear mongering nut cases impact your decision. We know "you got this!" Thanks for everything you do. Much respect, Ken Jones 727.510.1624
Osceola	Healthcare	I feel the State needs to stay closed longer.
Okeechobee	General	Please dont re open... Keep us safe at home. I think more should close, i think the numbers are going to increase once reopening. I have children with asthma and i Fear for their life. I have elderly parents and I hear for them. I fear That this is nowhere near being over and I fear reopening will make it worse.
Manatee	General	GOVERNOR DESANTIS IS DOING A GREAT JOB. NO NEED TO BE HASTY IN OPENING PUBLIC SPACES AS LONG AS THE NO. OF DEATHS CONTINUE TO RISE. MORE TESTING IS NEEDED.
Lee	Healthcare	Reopen the economy without delay and as fully as possible. This is the greatest scam ever perpetrated in world history and you fell for it. We need to get back to work fully and immediately before we permanently destroy our economy and our world. Poverty kills far more people than viruses each year. There's not enough money in the world to bailout every person, business, municipality, and state. There will be severe economic repercussions if we just continuing to print money and run up debt in perpetuity. Doing the right thing will take courage and won't be popular but the future of humanity is at stake if you don't act now. Do the right thing, let us get back to living.

AMERICAN OVERSIGHT

Hillsborough	General	I would like to see all the parks , beaches , retail & restaurants open May 1. Even if everything opened up May 1 , people will only slowly go back to normal life. The more people see life is going back to normal , the more people will begin to go to the dentist & doctor again . People are afraid to go to the doctor even if they aren't well. My husband, a pediatrician, business is down by 1/3. A couple weeks ago he had a patient that had to be admitted to the hospital because the parents were afraid of the coronavirus & delayed bringing their child in to his office. A hospitalization might could have been avoided if they had brought their child in sooner. The sooner things open up & people feel like we are on the road to normal , everyone benefits & people begin to take care of the things they have put on hold, most importantly their health. There is no way to count the numbers of cases where people didn't seek medical help because they were afraid to go to the doctor or hospital that led to serious consequences. Please get people back to work. It benefits everyone.
Lee	Real Estate	My interest is all. If people choose to stay home because they have fears then that should be their choice. It's beyond evident that there is more to this COVID-19 than meets the eye here sir. Based on the amount of evidence that we have it is completely unreasonable to expect assistance to continue to stay in a quarantined situation which is far more detrimental to peoples health mental health financial health not even to mention the fact that the economy has been crushed. Governor Desantis- I know you want to do the right thing I know that this is campaign season but this is about America. People can choose to wear masks and gloves and whatever they need to do to feel okay we can continue to practice social distance thing or whatever other stuff we have to do open the city of Fort Meyers Cape Coral open Lee County thank you sir
Hillsborough	Healthcare	Please do not reopen until we see a considerable decrease on the amount of people confirmed with the Coronavirus in the State of Florida. I believe if we can extend the stay at home until 6/1/2020 hopefully, by then it will decrease. Thank you for your consideration, Lillian Gonzalez
Alachua	General	Fl needs to reopen schools for summer school. Need to reopen restaurants and use the distance method and have patrons make reservations. By keeping ppl at home you are lowering their immune system so that when they are allowed back out they will be easier compromised.
Broward	General	It is way way too soon to open the state back up. We need to wait until the actual medical experts tell us it is safe so that it isn't prolonged and we don't have a second wave.
Hillsborough	General	Please don't open the state of Florida at this time. We have had such a limited amount of testing done that the numbers can't be correct. I think opening the state at this time would cause mass spread of the Covid 19 virus. We need to have an iron tight plan in place before this is done.

AMERICAN OVERSIGHT

Seminole	Education	As an educator I am genuinely concerned at the risk of spread in my classroom. While young people may be at less risk of extreme consequences they are not immune to them. Just as well I and my colleagues are at greater risk if they bring in the virus and spread it to us. In addition their families at home are at risk if one student gives it to another. It would be greatly irresponsible to put so many people at risk. While I understand many people are also suffering financially there are steps the federal and stars governments could have (could still) help while not also putting our population at greater risk. The unemployment debacle here in Florida has been a national embarrassment as have the initial steps taken by the governor. It can be assured that the response to this pandemic will heavily influence how I will be voting. Please do what is right for the people of the state and nation. It is my strong belief that a hasty reopening of the state is not in the people's best interest.
Orange	General	I would recommend opening back up outdoor activity venues - such as beaches, parks, etc. -- restricting group sizes to 5 or less people - safe distances of 6 ft from others - 7 - 7p daily. That should give enough of a group size to accommodate families with children, extended family while providing a safe environment that has minimum risk (UV light/heat kills virus on surfaces) - this could be done as a first phase. Provided that phase doesn't prove a spike in infections within 3 weeks, I would roll out another tier of services such as elective procedures (chiropractic adjustments, acupuncture treatments, massage, hair dressers, - provided appropriate PPE measures are taken). Provided there is not a spike in infections within 3 weeks of opening up the second tier of elective services I would recommend opening restaurants, theaters, work out centers, etc. with spacing considerations. That again would need to be tested for another 3 weeks to see if there is a spike of infections or if it stays flat-lined. The tricky part is figuring out what goes in each tier - I'm certain I've overlooked many industries that could be woven into the fabric of the 3 tiered approach. I think that we have to get this right - our State relies heavily on travelers coming in and spending money at theme parks, resort stays, excursions, etc. If we open up too fast then we have a major problem that will affect many people for years to come. You guys are in my prayers as you try to make the right decisions on our behalf. Thank you for your consideration.
Brevard	Food	As much as I would love to open up our restaurant and serve customers I don't think it's time yet. If I still have to wear a mask for safety and limit the amount of guest I would just like to continue doing to-go only. It's keeps all our employees safe and protected for right now.
Pinellas	Retail	I'm a bar owner and patiently awaiting reopening! How can our UI website still be such a disaster? My 9 year old grandson could have this fixed by now!

AMERICAN OVERSIGHT

Miami-Dade	General	Masks are very hard to wear in the heat especially those that have asthma or you may run into the problem of heat strokes. Please do not enforce them at theme parks like Disney. I've overheard there is talk about making everyone wear masks... it's not realistic especially with kids. Also- open business that operate with few people at a time... ex: my hairstylist, she works on her own at my salon suite and it's literally her and myself.
Hillsborough	General	I am a Small business franchise owner here in Hillsborough Co. At least one of my members was hospitalized with COVID19. Her daughter and sons also visit my gym. I have an underlying heart condition as well as a pulmonary issue. I am tremendously worried that with the lack of testing in our county that the virus will enter my establishment. We work hard to clean and are known for our cleanliness but no gym can all of a sudden stop the spread with how members move and touch and sweat over everything at all times. We have no windows and no sunlight. Most gyms are the same. Seeing that testing increased the positive tests, if the Citrus Park area was tested I'm concerned we will see an up tick and those folks will spread the virus to all of us who have properly quarantined for safety purposes. I'd really like to see more testing and smaller establishments open first to see if larger places like mine can open without being part of a new spread. Will there be legal ramifications if someone claims they caught COVID in a gym? Please open small to big to factually gain data and be able to control that data for the greater good!
Hillsborough	General	To truly consider rolling back current safety measures, increased and open access to testing is needed. The extent of the disease and who is affected cannot be understood without open and widespread testing to get a statistically relevant understanding of the actual infection rate. Continued and regular testing should also be a key part of any reopening operations to understand how measures being implemented are changing the infection rate. We are at a critical stage in this pandemic and we should not proceed with changing current policies without having a system to monitor and determine if we are putting the population at risk.
Nassau	Healthcare	PLEASE DO NOT REOPEN FLORIDA YET. Social distancing - a rather blunt force approach - has been the only thing that has worked well in reducing COVID-19 infection rates. Given that the ability to monitor (test for) the virus is insufficient at this time, social distancing remains the only viable way of controlling infection spread. When either cases are showing a strong and persistent decline OR there is the ability to proactively test and contact trace would be an appropriate time to "reopen" the State of Florida. Not before.
Nassau	General	We feel that the only way to feel SAFE, which is the only way to get the economy truly going again, is to follow the reopening guidelines set out by the CDC. That means FLORIDA needs to test, test, test! Both for current infections, but reliable tests to know if you have had it and can now go back to normal. As a teacher working with distance learning, BRAVO, you did the right thing about keeping schools closed until summer!

AMERICAN OVERSIGHT

St. Johns	Recreation	Please open the beaches full time and everyone can still continue to social distance. Please allow businesses to open and restaurants but enforce a maximum number of people using social distancing and take their temperatures before they enter. Perhaps open restaurants with outdoor tables first. Open retail establishments as well but have requirements in place with regards to the virus. I vote to Re open Floirida but safely.
Wakulla	Government	As someone who takes a medication which makes me severely immunocompromised, I think it would be wise to wait a couple.more weeks to re-open Florida . Florida just started doing more testing which should give a clearer picture of where we really are. I also think masks or face coverings should be mandatory in public places for at least a few weeks. My husband is a Type 1 diabetic and my mom has stage 4 COPD. Any extra precautions the Governor can mandate for a few weeks would be greatly appreciated.
Pasco	General	There are now reports that those infected with the coronavirus previously are not immune and can get it again. This combined with the fact that we will not have a vaccine for the foreseeable future likely means that all were doing is delaying the inevitable. We can't keep the economy closed forever to run from a virus or even for the 12 months they said best case scenario for a vaccine gives me the opinion that we need to open the economy now altogether before we have a huge outbreak and an almost dead economy. People will be suffering both ways if we don't reopen if we just go to straight reopening we can make it just one. No steps can be taken that will make anyone safer from this in the long run till we have a vaccine. Thanks for your time in reading and taking my opinions into consideration. Also desperate people do desperate things so in the long run keeping stuff closed will result in more crime including violent crime to obtain stuff from those who are still employed increased homelessness (though thats not a crime) etc.
Orange	Transportation	The state needs to stay closed as long as epidemiologists and doctors say it does. This is a health decision. Not an economic one. Opening up the state is just a cruel way to throw thousands off unemployment. Stop playing games and keep the state closed until this pandemic is over. People’s lives depend on it.
Hillsborough	Healthcare	I believe we should open FL when it is safe for every one and we have access to more texting. I am worried because we don't have access to antibody testing yet in our state and we don't gave a clear idea of how virulent covid19 really is Other area I am concerned about is a second peak. We don't know enough about this virus to bank on the fact that the worst is over we don't know. I don't think some people know the danger they are putting themselves into I still see people shopping for groceries with children crawling all over the floor. I understand that the money is not coming in but if you get sick it will be worst.
Broward	Education	I am not in support of reopening Broward county. I am concerned about our elderly and those who could possibly be affected by the virus. I am in favor of doing what it takes to keep our communities safe. We will always be able to rebuild the economy but we are NOT able to rebuild lives taken from the virus.

AMERICAN OVERSIGHT

Orange	Education	I would really prefer if businesses didn't open yet. I understand the impact it's having in the economy yet medical professionals and scientists are overwhelmingly opposing this idea. I would prefer to listen to those who have dedicated their life to science and medicine on these issues rather than politicians who have little to no understanding of how viruses and infections work. If Florida fully reopens people from outside of state will come to our beaches and other areas possibly bringing more cases with them. I don't feel that's fair to the citizens of Florida who are doing their best to social distance. Please don't reopen our businesses without the go ahead from actual scientists and doctors. Please compile a panel or committee of doctors, scientists and economists to come up with a plan for when it would be best for the population. Thank you.
St. Johns	General	Please don't open up businesses yet. Too many people are sick and don't know it and not enough tests are available.
Okaloosa	General	I am a mother and grandmother who is concerned for the health of of state and the people who live here year round. I feel if we open up to fast we will be hurting our state. Our business are feeling it for sure but if we all get sick and die then we have done nothing for anybody. Are number are still going up so that right there should tell you that we are still not ready to allow our state to open up for guests to come visit. We still can't go to the stores and get what we need for just the Florida residents what will happen when you open us us up? Also people have issues with social distanting instead they want to fight. I think that California lockdown was was the best way cause there number went down but it didn't seem to work here cause people went out and just messed around at Walmart and tennis court baseball court's so that really didn't stop any thing
Broward	General	reopen everything. people are trained in social distancing and from what I've seen, they are very well behaved and respecting it. having closed beaches and parks was a stupid idea....people are never close to strangers in those places (except during spring break).
Orange	General	If people can congregate in walmarts, costocs, target, home depot, lowes and publix they are smart enough to follow same principles in other businesses (that are dying and may never recover). If not, they can choose to stay home. Allow businesses to reopen - they will police themselves for both their employees and their customers - restaurants with outdoor seating/distancing, salons that can schedule customers with physical distancing all without undo regulations that they cannot meet because thermometers aren't available (unless the State can provide them)....the economy of Florida is too important to ignore and we have done an excellent job with 22M people and only 1000 deaths (70% lower than model projections).

AMERICAN OVERSIGHT

Volusia	Education	As an employee at a Florida college, I worry that reopening public venues, such as colleges, will cause a second wave of COVID 19. People often think of colleges as places for young, healthy people. However, there are many students and employees who are immuno-compromised. There are tight spaces in classrooms and student affairs offices where masks will not be affective. Please consider the safety of Floridians and don't open too soon!
Miami-Dade	General	This is the state of Florida it needs to open back up people need to take precautions wear mask when in public for the next few months but the economy needs to start up The cure can't be worse than the disease
Orange	General	Our area is not ready to be open. Visitors from around the world with who knows what kind of germs could gain access into theme parks which are not equipped to scan for viruses. It's not all about the money.
Volusia	Tourism	We need more testing and antibody testing statewide especially in Volusia where it has been limited to little or none. It should be mandatory for people to wear masks in public we don't know who is asymtomatic. Too soon to open up our state, tourism and small businesses wil come back. Besides who has money for shopping and tourism we are lucky we have food on our tables!! $1200 is nothing and most used it to feed their families, unemployment payments aren't happening fast enough to help the people survive. School should NOT Resume till next yeat. Mandatory masks. More testing!! Do not open yet peoples lives are at risk and not just the elderly!!
Pasco	General	I am in favor of reopening the economy. The vulnerable and sick should take extra precautions but the rest of us want to get back to work. Thanks
Alachua	General	We should not open the state for at least another month. Socal distancing is working. We do not have the virus under control. Opening now would be several steps backwards. Please please wait another 3-4 weeks
Miami-Dade	Retail	Malls business should open first before beachs with limited times 10-6 With social distance
Broward	Administrative	I think it's a decision we will regret if Florida opens up. Think about the outbreak in 1918 it came back even worst than the first outbreak. I have 100% faith in Dr Fauci predictions that we're going to have another outbreak in the Fall. Also people are still sick and dying daily. Hair, nails, restaurant s opening is not worth my family's life. If this happens the only place folks are going to wear their new hair dos and nails is in a Casket.
Orange	General	I believe the stay at home order needs to be lifted. I met a Carney today who was out of a job. There are many people like this that get by on very little income and now that has been taken away from them. Individuals should be able to decide the risks they are willing to take weighed against the possible consequences. Sometimes you need to take your kids to the park before you lose your mind, and sometimes you need to go to work tomorrow because if you don't, your kids won't be able to eat. America is about the freedom to be.

AMERICAN OVERSIGHT

Orange	General	I feel its time to open Florida with 4 weeks of decreasing cases. Lets open the economy and save jobs. We can practice social distancing inside all businesses and take prudent and sensible care. As long as the hospitals have availability we can help anyone who might get sick. That was the whole point of the complete global shutdown. Lets get started and save the economy using common sense and safe practices.
Volusia	General	With a note from the doctor allow high risk and high risk dependents to stay home with they jobs protected on unemployment or furlough. Make masks mandatory in public places, continue with 6ft apart, and have businesses continue to run with 50% capacity. There is no reason Florida can't open up with these precautions.
Orange	General	As a Floridian who works in hospitality, please DO NOT open Orange County too early. WDW and Universal do not have to open before June 1. I do not want to die, or my family to die, because people want to go to a theme park. PLEASE.
Broward	General	Because parks are closed, I am seeing families walking and biking in the streets, children playing in the streets and I feel this is dangerous due to traffic. In other states, parks and green spaces are not closed. It is easy to practice social distancing in the open green spaces of our parks and beaches. Fresh air and exercise are important for our health. I hope that parks and beaches will be among the first things that reopen.
Manatee	General	Let's get back to work! Incredibly disproportionate fear is bankrupting our country. The deaths are regrettable. The deaths from influenza are regrettable. The deaths from car accidents, cancer, heart disease, drug overdoses are also truly sad. We didn't close down the country for these serious problems. Let's proceed with caution. Now.
Seminole	Recreation	Beaches that are self sanitizing and wide open spaces and national parks where people can hike in the wide open outdoors would be a huge boost for people's mental/emotional health which seems more pressing at this point in quarantine before we hear of more abuse/suicide/etc. People can safely get outside breathe fresh air and obtain some vitamin D to boost their immune system. Please consider lifting the bans for those areas. Thanks for the consideration! ♡
Orange	General	Gov. DeSantis please open the state,businesses,restaurants,hotels,theme parks are needed,if anything keep Miami Dade on a weekly delay as it's the only area that has extensive cases but the rest of the state is ready.

AMERICAN OVERSIGHT

Brevard	Agriculture	To whome it may concern..i have watch this world transformed herself into somthing new without our help lives has been changed drastically and no one person has an answer as i looked around no one are taking this pandemic seriously. We are all a part of this and it seams no end is in sight peoples are loosing control because our government has no solid knowledge of when ,what,or how sure you will have people disagree with you no matter what decision being made someone will rebel against, its to soon as long as people are dysfunctional in their behavior toward others by not respecting other people we are all in this together its sad people risk their lives and their families lives to help us and the majority of us wont wear a mask.i know we all look silly but its ok better to be safe than sorry.that governor in Georgia and other state unless they know something we dont keep it closed,until we learn how to utilize everything we have in finding a cure something are bigger than the eyes can see people have no idea life is greater when we all come together for the good of humankind. THERE IS NO BLAME I BELIEVE WHATEVER HAPPENS ARE ALWAYS MENT TO HAPPEN.the things that are opening up are not that important you consider how important is one life being taken to soon because someone wanted to go mingling with other to soon i know all should stand tall plant,pray and enjoy your families medical care we need ,agricultural yes..this is not that hard you and all the rest of our public officials has to do what is right and keep us safe in spite of what other may think.i could go on and on but I'll give others time to express just mabe we could help shed a little light.God Bless
Duval	General	Life has never been and never will be 100% safe. In fact, when can we ever extrapolate a safe percentage? Take away the term "COVID19," just look at the numbers, and you should be scratching your head as to why we killed the economy the way we have. It is clear there has been an extreme overreaction and if we do not correct it fast, there will be little to return to. There is a saying "sometimes one must cut off a finger to save a hand." In this case, we are cutting off a hand to save a finger! We need to get back to business regardless of what the so-called experts are guessing because, guess what, another flu season is just around the corner. There will be another flu season after that as well. Somehow we let this morph into a panic not pandemic. And we won't even go into this ridiculous deficit spending on all levels - that will prove to be more harmful than this virus. Shame on the people who have let political expediency get in the way of common sense. Let's get back to work - government people should realize that unemployed cannot continue to pay taxes and then the gravy train will crash. Let's get back to work, end the insanity! Have felt this way since the beginning.

AMERICAN OVERSIGHT

Palm Beach	General	I want SCIENCE and SCIENTISTS AND MEDICAL JUDGEMENT to guide the reopening of our state. As one of the many senior citizens of the state, I am fearful for the well-being of my husband, mother and me if we do this too early and in a reckless manner. DO NOT take Georgia's lead and open businesses that in no way can operate with social distancing in place. Bowling alleys, nail salons, barber shops etc. CANNOT maintain at least 6 feet between people and function. BE SMART and wait until our COVID-19 cases hves decreased substantially and there is much more testing available and contact tracing is in place. We do not need a second wave of this pandemic sweeping our state filled with those most vulnerable people. PLEASE BE SMART and follow the guidelines of the medical experts.
Manatee	Recreation	It's time to open FL. Our state can not survive economically this way. People need to go back to work, to provide for their families. Taking away their livelihood and telling them they have to stay home can not continue. The goal was to flatten the curve, that has been accomplished. Now it's time to get back to business.
Osceola	General	Do not feel safe returning to work in an enclosed environment such as a shopping mall until the amount of cases have decreased and we have flattened the curve . Leaving the decision to top health care advisors . I think stay at home orders should still be in place until we are in the clear and minimal exposure to the virus . We would like our unemployment checks though . None of my household has received any unemployment thus far .
Manatee	Healthcare	Dear Gov. DeSantis, As a provider of dental healthcare in Manatee County, I feel that we are prepared to reopen our offices safely. As a practitioner with over 20 years of experience, I feel prepared to deliver safe, essential care to my patients by May 9. I feel that the ability to test patients and employees for CoVid19 would be a big benefit to my patients as well as the local medical community by both reducing the workload for the medical community and intercepting incidences of exposure. As an office that has followed your guidelines, I request the designation of essential medical personnel so that I may order and provide to my support team the proper personal protective equipment that will continue to ensure the highest measure of safety to my patients. Professionally yours, Tiffany Boyd, DMD
Broward	Recreation	Reopen pools in private condominium
Pinellas	General	Please open up some sectors of our economy. Slowly. With strict guidelines. And please please open the beaches. We need that venue to get out and walk, sit and exercise. The beaches are large enough that we can do that and still abide by social distancing.
Pinellas	Management	Florida needs to reopen there is way to many people out of work. Florida unemployment is a mess. Reopen Florida
Broward	General	Should have never been shut down the annual premature death rate for broward county residents has averaged between 300-400 per every 100,000 each year!!! Considering Browards population is over 1.9 million people... that's a lot.. also palm beach and martin counties which btw don't enforce mask wearing has far less cases than broward and dade although very close geographically.. open up now!! Before anarchy begins

AMERICAN OVERSIGHT

Sarasota	General	Open FL up just like normal, the research shows we have been way over cautious. Let's us common sense by not being around those most vulnerable and let's get this economy moving again.
Volusia	General	I feel retail stores and restaurants need re-opened with sone social distancing. The state needs to open up to allow people to return to work! Beaches also need re-opened to allow sunbathing, swimming , and exercising.
Leon	General	We need to get businesses open as soon as safely possible. However we should adhere to the guidelines that President Trump announced earlier. Once the first gate is reached, we should get as many small businesses open as possible. If this takes all citizens wearing masks, so be it. If by wearing masks, social distancing, limiting customers in the stores, and increased sanitizing actions will allow us to reopen, let's do so. However as a Senior, my plan is to continue to limit my activities to only essential things, so that I can be safe. Even if we can reopen the stores and shops, large crowds should still be restricted. Schools and our colleges and universities should remain closed, and conduct distance learning until a vaccine, or other medical treatment is available. Take care, and be safe and well, and thank you for giving Floridians a voice in this decision.
St. Johns	Healthcare	It is prudent to open elective medical and dental services. We can not postpone ongoing care to all our patients without causing harm to them.
Seminole	Tourism	Please allow most businesses to open as of Friday May 1st. All businesses that do not have large (50 or more) numbers of people gathered at any given time. Please keep theme parks closed until July 1st. DO NOT allow the theme parks to open until July 1st!
Seminole	General	I don't believe it is a good idea to re open the state. Everyday we are learning something new about the virus and if we open too soon, the consequences will be undoubtedly worse than if we wait longer. I do believe that a lot of people are in a bad situation because of the economy and so the state government needs to be better about taking care of those who are affected financially.
Marion	General	Florida should be allowed to open small businesses, restaurants, etc, in phases. Maybe 25% capacity, then 50, then 75 to see how the numbers of cases rise. People are are in fear of resuming normal activities should be allowed to stay home and quarantined. I do not feel that quarantining everyone is wise because it is depressing and that along with anxiety of not working or receiving enough money to pay bills can lead to other problems, such as suicides. The people who are more at risk souls continue social distancing and let the rest of the people go on with their lives.

AMERICAN OVERSIGHT

Orange	Professional Services	To whom it may concern, I am writing with great concerns in regards to the possible reopening of spas at this time. As an aesthetician (facial specialist) I do not feel that it is safe to resume services that require direct person to person contact so soon. I would like to share some information on what our services entail so that it may be considered when discussing the reopening of businesses in our industry. Lumping services such as facials, massages, and eyelash extensions with hair services would be a HUGE mistake that will undoubtedly contribute to a spike of new cases. Some things to consider that you may or may not be aware of: - During a facial treatment, the FACE to FACE distance between the client and the aesthetician is only about 12-15 inches. That's it! Add steam and the germs we breath out between each other further spreads in the treatment room. - While the aesthetician can and should be wearing a mask, it is impossible for a client to wear a mask while receiving a facial service, which is performed with the aestheticians hands. - Facial and massage services typically consist of 60 minutes of direct person to person, skin to skin contact. - Medical aestheticians who work in medical spas and doctors offices usually wear gloves for the duration of the service, however MOST aestheticians who work in salon spas and chain spas do not. I have worked in this industry for 15 years. Colds, stomach flus, and viruses spread through these spa settings unbelievably fast. A client comes in, the aesthetician or massage therapist provides a service to them, the service provider gets sick, the other coworkers get sick, and we take it home to our children and families. Even with the best sanitation practices in place, this is a very common occurrence in our industry. From November 2019 to February 2020, for example, the spa I worked for was hit with three waves of sickness. It would be a huge mistake to overlook spa services as hotbeds for spreading COVID19 throughout our community.

AMERICAN OVERSIGHT

Palm Beach	Education	Mr DeSantis, You did the right thing by keeping the schools closed. I am a teacher of deaf and hearing impaired young children in the public schools and it is not possible for them to social distance. I also live in a 55 and over community and now that you and president trump have begun to talk about opening up the country prematurely everyone thinks they now have a license to begin having gatherings of over 10 people. Wine and cheese parties for the last two weeks have been occurring in front of my house!! The management company says they answer to the board of the homeowners association. The president of the board is at ending the gathering and says “let’s just see how it goes!” I was told to call the police and a lovely Sargent Johnson in Delray Beach told me no one would come out to Villa Borghese! Said no gathering s is not a law and they wouldnt even encourage people not to gather. We need a strong decisive government to keep people safe. This pandemic is not a joke. Testing is only now becoming available And I for one believe I had the virus back in February. No antibody testing is available My doctor sent me to an urgent care center and when I called they did not have any antibody tests. Please do NOT open up our state as all our hard work will be for naught. Thanks for asking for our input. Sincerely, Lynn Brown
Pinellas	General	Dear Governor and Task Force, Thank you Governor Desantis for the tireless dedication and hardwork you are doing for the residents of Florida. Thank you to the other officials helping with this situation. I would like to share my thoughts with you about re-opening of the State. I want to be constructive here so I will offer my reasons and tangible suggestions. I believe that at some point the entire economy will be open, so opening in phases is practical, but the phases must be more than just "baby steps" back. They should allow everyone to get back to at least 75% of their normal lives, while officials work out the finetuning of specific areas that are a little more involved or complicated, whatever those areas are. It is not right to have the public wait around for the authorities to catch-up. If an individual is fearful or concerned about going out at this time, then they have the right to just stay home. It's basically that simple. Most all areas should be opened on May 1st, (with limited exclusions) and give Florida residents the option to weigh the risk and decide for themselves and their children. Afterall, isn't that what we do everyday when we leave our homes. No one tells us that we better stay home instead of driving on the road because there are no guarentees that we won't be injured in an accident. Things need to be normal again. The closing was done quickly, and we all cooperated very well with the authorities (Floridians yielded well to all the warnings, compared to some other states) and in turn, you should re-open just as quickly! Good luck!

AMERICAN OVERSIGHT

Leon	General	As to when to re-open the Florida economy: DON'T listen to business representatives DON'T listen to politicians DON'T listen to your relatives DON'T listen to news commentators and most of all DON'T listen to that idiot in the White House DO listen to the best experts in epidemiology and public health. Failure to do so will get millions of us killed. An economy can be rebuilt. Dead people can't.
Levy	General	I would request for there to be very clear guidelines for churches and worship venues. If possible, please provide a guideline that regulates people per sq. ft. This will help churches guide how many services they need to have based upon the sq. footage of their worship centers. It seems there wasn't a working group that was detailed with such guidelines. I understand the government's desire to avoid an intrusion into church. But, I think some hard guidelines alongside some helpful suggestions (no bulletins as to avoid person to person contact, offering boxes rather than "passing the plate) would be very beneficial to Florida churches and worship venues.
Collier	General	Please consider exempting specified categories of Floridians from continuing stay at home orders. Stay at home orders should continue only for the most vulnerable. Exemptions should apply to (1) individuals without a history of lung disease who routinely engage in daily aerobic exercise (anti-oxidants are produced that shield the vast majority from severe effects or death from COVID-19) (2) individuals who test positive for Coronavirus antibodies (they are either immune or beat it once, and if infected again, are extremely likely to beat it again. Other exemption categories should be considered based on such characteristics as age. Companies should be allowed to reopen, including without limitation sports teams, and given the resources to test their employees so that they can take appropriate steps to shield their employee from infected individuals.
Lake	Finance	Do not open until we have 14 consecutive days of declining cases.

AMERICAN OVERSIGHT

Manatee	Healthcare	My career of 30+ years encompasses environmental and public health management working at EPA in both Washington, DC and their laboratories. During that time, I have worked closely with and supervised a staff consisting of both epidemiologists and medical professionals . While they are experts in their respective fields, neither are expert in the economic and societal impacts their risk assessment activities have on the public. Rather, their focus is generally on what and how to study viral epidemics as opposed to managing epidemics. To state the obvious, albeit not of the level of impact Covid19 causes, we all deal with and manage risk as an every day activity. We balance and accept a certain level of risk just as government now must do. Reliance solely on science can only lead to decision paralysis as there is never enough safety for science to accept. Yet we live our lives contently and relatively safely. The science of risk assessment must be balanced with both economic and societal concerns. These not not mutually exclusive considerations. We can do both - open our economy cautiously while managing and addressing any subsequent resulting impact(s).
Seminole	Manufacturing	We have plenty of hospital capacity, "flatten the curve" worked. Let's get back to work. Open gyms and state parks now.
Broward	General	I have lived and worked in Florida fro over 30 years as a Registered Nurse. The facts of the day and of the latest days needs to be addressed same time every day by TV and radio. If we miss the update we do not get full details in the news People need to be held accountable and fined if that’s what it takes to make them pay attention People need to be able to report concerns without reprisals Employer’s need to be accountable and keep their staff safe. Many will put themselves in jeopardy to make money for their families and then we are back to square one Thank you Margaret
Polk	General	Open up the State of Florida on May 1st. slowly. Require all Floridians to wear a mask when entering grocery stores, retail stores, Nail salons, movie theaters, hair salons, pet salons etc..Allow elective surgeries immediately. People are in pain and suffering and need their surgeries performed. Social distancing is a must for any businesses that will be allowed to open. Make it mandatory at least through the month of May and longer if the numbers continue to rise. People have to hold themselves accountable to follow the guidelines. They know the risk and they need to take measures to protect themselves and others.
Hernando	General	I am in favor of slow opening of Florida’s economy. However; I don’t understand however the logic in keeping everything shut down if the reasoning was to flatten the curve. If the curve is flatten out then I am not understanding why it’s still necessary to keep everything locked down?

AMERICAN OVERSIGHT

Hillsborough	General	It is not time to reopen. Is very important stay at home until the curve of contagies and deaths be lower and stable and find the vaccine No es tiempo de abrir. Es muy importante mantenerse en casa y mantener la distancia hasta que la curva de contagiados y muertes disminuya considerablemente o se encuentre la vacuna o la medicina que la contrarrestre.
Brevard	General	Please do not reopen our state or even our country, yet. Until our country is showing large numbers numbers (decreasing by the thousands each day for weeks) we cannot afford these chances to be taken. We can come back from an economic crisis, we cannot return from the grave.
Collier	General	Dear Governor DeSantis and members of the task force. I am a long-term resident of the state of Florida, a resident since 1973 , voting in every election since I turned 18 in1968. I urge you to open up and restart the Florida economy as expeditiously as possible. We need to return to normalcy, not any "new normal", which is a progressive or liberals way of saying that the people have less liberty, less freedom and less rights than before. With the recognition that you have knowledgeable people advising you, I am fully confident you will make the right decision to re-open and restart the Florida economy to allow people to return to work, to restore their mental health, and to return to normalcy, and as noted, not a freedom and liberty restricted and government controlled "new normal". As articulately stated by a columnist Avik Roy in the Wall Street Journal on Saturday, April 25, 2020 "it's not true that the only way to improve public health is by shutting down the economy and the only way to improve the economy is by sacrificing public health". Also, as stated by Avik Roy "we need to escape from the false dichotomy which insists that the only way to improve public health is by shutting down the economy in the only way to improve the economy is by sacrificing public health." And further ".....It's essential for the US to move rapidly away from an unrealistic checklist of public health milestones..."; and most importantly "instead of thinking of creative ways to force people to stay home, we should think hard every day about how to bring more people back to work." I urge you to disregard what I perceive to be the false science of the CovidActNow group of Democrat activists that has a political agenda and was wildly exaggeratedly inaccurate in it's forecasts of the spread of COVID-19. I also urge you to reject the progressive, socialist concepts that would deprive Floridians of their rights liberties and freedoms. I appreciate you and your group having faith in the intelligence and strength of the people Florida to do the right thing. Reopening our economy will allow us to remain free and independent. Sincerely Anthony P. Pires, Jr.
Osceola	General	Opening up the state would be a terrible decision. There are many vulnerable citizens over the age of 65 here, including my parents. The governor and mayors in this state have a duty to make proper decisions regarding ALL citizens. It is not just about money and the economy. There must be a logical AND emotional decision. Many will fall ill and die and blood will be on your hands. Make the right decision. Pour funding into our hospitals and make sure that your citizens are being well taken care of. Do the right thing. We vote you all into office and we won't forget the actions that were taken during these trying times and we will take it into account next election.

AMERICAN OVERSIGHT

Seminole	General	We must tread with utmost caution regarding opening Florida back up. It will come back to bite us if we proceed too quickly. We must follow the guidelines of the CDC and medical experts. This decision cannot be based on politics, but medical and scientific data. Public safety should not be jeopardized. Thank you.
Broward	Education	I would like to know what the plan is for working parents. If we have to go back to work in our offices rather than working from home, what are we supposed to do with our elementary aged children. Most families are two income these days and most employers are not flexible when it comes to working from home, flexible hours, etc.
Manatee	Construction	I feel with only 830 cases and 74 deaths in Sarasota and Manatee counties shutting down business and life is ridiculous! I also feel that being a sole proprietor and a lot slower business with only unemployment coming in which is spotty and confusing that with people home business will not thrive. Let's get back to living and not being in fear of a virus that isn't super prevalent in our hot state?!
Miami-Dade	General	Please re-open Florida now. The damage you are causing to our financial lives and mental well being is far more than the risks if we catch COVID. We are never going to get this perfect but we can balance getting back to life while protecting those that are more vulnerable to complications with this virus. Please do not delay any further.
Pasco	Healthcare	Pleaseeeee open up the fertility clinics. I'm up against time with my age and low egg quality. I don't have much time to waste
St. Johns	Healthcare	As a healthcare worker I feel that opening Florida back up right now is going to make matters worse. If you think things are bad now just wait and see what happens and all the lives that will be taken from Covid 19. It will spread like wildfire. I feel like we need to stay closed until June 1 at least. We need to see what happens to Georgia in the next few weeks and then make an educated decision.
Orange	Healthcare	As a dental hygienist, please require all dental offices to provide staff face shields and N95-level masks to lower risk of infection. Allow us to be tested for Covid once per week. Thank you!
Miami-Dade	General	Please open Florida ASAP. The economy is way too important to let thus go another day. I vote republican because I value my rights. Florida has fine enough. Now we must assume some risk and get Americans back to work. Let's allow Florida to be an example of how we can do this quickly and in a smart way. People at risk can choose to stay home. The rest of us want to get back to living!

AMERICAN OVERSIGHT

Pinellas	Recreation	We are very hopeful and very much need beaches to be reopened. We have a small business renting umbrellas and chairs on beaches. March through May are the months where we typically bring in the large majority of our annual revenue and we have been absolutely devastated by the beach closures. Previous years saw impact due to hurricanes and red tide, and we were hoping to rebound this year :(We understand that the spring breakers were grossly violating social distancing protocols and risking the health of our population; however, much time has passed and the public is much more aware of how to distance. Given that beaches are an outdoor space where people typically distance themselves (outside of spring break crowds), we are truly hopeful that beach reopenings are part of the first phase - and not just limited hours for exercise. Our workers will take every necessary precaution!
Broward	General	Open the state and stop playing to the Democrats or would you prefer we drive to Georgia? I need to work and Georgia is open.
Collier	Healthcare	Please open up all essential businesses. You can limit the number of people or have everyone wear face masks. Those who are immuno-compromised or elderly should stay home. We need more testing to help people feel safe.
Volusia	Education	If there were ever institutions that were specifically designed to help the spread of communicable diseases, it is our universities and K12 public schools. Do not resume "normal activity" until it can be determined that we are safe to do so. The very same people who seem healthy are the ones who will continue to spread COVID 19 for the next several months. Proceed with caution in your endeavor to reopen the state.
Sarasota	General	If the economy is not opened as quickly as possible, there will be irrevocable damage done to Florida for the next decade. There is strong evidence that the virus does not thrive in sunny, hot and humid locations. There are ample safeguards in place to protect our most vulnerable. There is heightened awareness of the need to maintain social distance. All retailers should be opened immediately esp. in counties such as Sarasota. There is no logical difference between a Walmart with a furniture department and a furniture store. If anything, the latter will have a lower traffic count. Doing a prolonged re-opening does not accomplish anything. It will take time to get supply chains re-established, and to do a piecemeal opening will only confuse and complicate the process. The economy is sick and needs to be treated right now! I own a boutique consulting firm serving a wide variety of industries, and I can attest that the biggest obstacle our clients face is the lack of certainty and direction about re-start. Harvard Business School MBA, Finance 1974

AMERICAN OVERSIGHT

Collier	General	It seems wise, based on the experience of other countries and our own growth curves, that we reopen in phases, and not until cases have leveled in our county. Retail businesses need infection and crowd control plans. Collection for testing needs to be available at drug stores by appointment. Antibody testing should be available by home kit. High touch businesses like beauty salons, etc need to start with spaced appts, using masks and gloves, taking staff temps daily. The point isn't only to keep up with hospital beds but to minimize suffering for all.
Seminole	Professional Services	Hello I feel that it's time for Florida to open . Our businesses need the chance to make a living. The restaurants can open safely with limits on capacity., etc. the salon owners can allow limited patrons in the shops, ask patrons questions regarding travel, sickness , extra sanitation and I'm sure they would be willing to wear masks , anything to be able to work! And as a resident of Florida I sure would like the opportunity to enjoy a nice meal at a restaurant and just the basics , like having my hair done! Another point is, if anyone is not comfortable going out and doing anything then they can stay home. But for us who want to do the simple things , please open up Florida Thank you for your time, Marcia Salas.
Columbia	Professional Services	Open businesses and make it mandatory that people wear mask in public. If restaurants open the employees wear mask and set families 6-8 feet away from other tables. Have hand sanitizer on all tables. All businesses practice social distancing.
Orange	General	Yall really want us to die huh?
Lee	General	Please follow data and listen to medical experts about reopening the state. My husband is a cancer patient and Cahill afford to be exposed to the virus. We have spent nearly 2 months in quarantine and would not like to see things opened prematurely.
Lee	Professional Services	My suggestion is to not open hair salons and barber shops for at least another month. We are too close to people when doing their hair. It will put so many people at risk.
Leon	General	Safety first Floridians. As a retired state employee of 12 years, it is hard for me to understand how responsible citizens haven't increased their savings accounts Annually. I know that many live check to check but one must live within ones means. Open the stores that don't require head on contact with an employee. I really need a haircut though and wonder how these politicians are getting one. With regard to mail in ballots, come on folks we can't even find all the mail in ballots we get now. And under the proposed pmail in system, I can vote for my mother, father, sister, brother...you can see where I am going with this. If you go to Publix and Home Depot, you can certainly go to a church to vote!!!
Seminole	Healthcare	Reopening should only begin after curve flattens and line is 50% in decline . Anything else would be irresponsible.

AMERICAN OVERSIGHT

Hillsborough	General	I think that we should re open in the same manner in which we closed down....In stages. I do not think that we are entirely ready to do so at this point as we are still experiencing the spread of the virus.I think we should keep things as they are now and re visit this re opening on May 15th. The last thing we need is to open this to soon and have it back fire on us. We most certainly don't want to have to go thru this again. In the mean time we need to plan on how to re open.On site testing seems to be an excellent option. Regardless of where you are , where you go, ….before you enter any building for whatever reason, you need to be tested at the door. With that in mind we need a uniform (CDC and FDA) approved system in place for testing that may be utilized for all. We need to assure the American public that it is safe to move around again asap to get our economy , and our country moving in a positive direction.
Miami-Dade	General	At this time I feel that reopening the state before we can conduct up to 750,000 tests a day, per CDC recommendations as well as health-care professional recommendations is a grand mistake. While the economy does indeed affect me, and my career as a mental health provider, I do not feel that we should place more value on the economy than that of human lives. I have elderly family members, immunocompromised family and friends, and others whom I do not want to lose nor risk them catching COVID19.
Martin	General	Give people choices. If the don't feel safe yet going out, let them stay home with job-protection guarantees. If a person is ready and NEEDS to work, let them!!!
Brevard	Administrative	Over 65 with underlying health issues. Do not consider lifting the stay at home ban.
Pasco	Retail	IF you reopen the state and businesses please look to the medical world for insight . This is not over. Florida cannot even abide by social distancing rules on the beach or while golfin . Yes this is hurting our economy and our small business, but the bigger issue is if we reopen full steam can the medical world handle an influx of cases? Set firm guidelines for businesses to reopen and penalties for those that violate. We still cannot get the grocery stores fully stocked yet, imagine what would happen if we have a bigger impact after this?
Orange	General	Please don't reopen State. It too soon. Too much risky. If you want to reopen, make a new law: " Everyone must wear a facemask"

AMERICAN OVERSIGHT

Brevard	Professional Services	I have been a licensed hairdresser for 23 years in Florida. I have always implemented the cleaning and sanitizing protocols to keep my clients safe. Every two years we have to be recertified in order to maintain our cosmetology licenses. Although it isn't possible to socially distance ourselves from our clients we can greatly reduce the probability of infection by practicing the standards set in place by DBPR and Barbicide. These include frequent hand washing, sanitizing stations between clients, Not double booking in order to achieve the proper time intervals for disinfection to occur, not reusing any cloth smocks or capes, Removal of any items used to be disinfected before next use, using neck strips on each client, implementing touch free payment methods, maintaining 6 feet between stations , disinfecting shampoo bowls between clients and making sure they wash their hands prior to services. In addition to these we can implement wearing of masks by stylists and taking temperatures of everyone who enters salon. Those who present with any level of fever will be turned away- including employees. Discontinued service of coffee and snacks, removal of products for sale in Order to eliminate cross contamination between clients. it is my sincere belief that we all are anxious to return to work but want to do it with the utmost level of safety and protection of ourselves and our clients. Clients want to get their beauty services done but are hesitant at the same time. It is our job to instill confidence in our clients and the general public that we are not Vectors of this virus. It is possible to provide services and not transmit if we are hyper diligent in our approach.
Polk	Information	Please open up Florida I votes for you because I trusted that you would up the constitution. However you are not doing that more people will die from the affects of the economy due to you forcing them to close businesses then this stupid virus. Floridians are done if you do not open us up by May 1st we will be out in the streets. You need to remember you work for us we dont work for you. Please do what's right and open us up now. Joanne Allen
Broward	General	So far as reopening the state, please do it in steps and with adequate additional testing in place so that any effects can be quickly measured, allowing for fast response, whether it's to continue reopening or to slow it down. Adequate testing which has been absent thus far, is a must for this phase. We need to get the economy going again and quickly but please, consistent with common sense and safety.
Broward	Recreation	People are struggling and it is time to allow businesses to reopen. Masks are mandatory now so it is safe to allow people to go back to work. There is no cure or vaccine anytime soon so we need to just modify our behavior to be safe and let people get back to work.
Orange	General	My biggest fear is you will open up too soon. Please be smart and wait until we have a 14 day decline of positive tests. It just makes sense. You all are on this task force for a reason, you have shown that you can make good decisions. Please make a good decision now. Don't make this decision based on money. It really is about life and death.

AMERICAN OVERSIGHT

Orange	Healthcare	I believe Florida can start to reopen gradually at the end of the current stay-at-home order (May 8). I also believe that the more-infected south Florida counties should stay locked down until at least June 1. Movie theaters and restaurants need to create some sort of social-distancing measures. and outdoor activities should also be allowed with some distancing measures. Churches also need to follow the same type of distancing guidelines.
Leon	General	Until there is a vaccine, no one is safe from this virus. All reputable health experts say it will continue to work its way through the population until there's a cure. Social distancing is the only way to guarantee that we keep hospitals from being overwhelmed so people can get adequate care. The reason that Florida hasn't been overwhelmed is because distancing is working. Any business that opens before there is a cure is killing people. So far, the rush to reopen is coming from business interests who do not value human life. It's immoral to assign a dollar value on people, which is what the push to prematurely reopen is doing. Our government (in theory) is put in place by citizens and should work for the public good. Considering that the makeup of the reopening committee is so business heavy, it's clear that the Governor is willing to sacrifice human lives to help them make a buck. It's shameful, immoral, and not Christian. This pandemic should make Florida rethink how heavily it relies on tourism to fund everything. Our state is beautiful and people will want to return, but it's going to be a long time. Tourism is too fickle to rely on wholesale. We need to look at more stable sources of tax revenue and start with requiring corporations and large businesses to pay their fair share. If they want to sacrifice our lives for their bottom line, they should have to pay for it.
Brevard	General	I feel like our current government cares more about money than people. I live near the beach and still can't believe how long it took for them to issue stay at home orders, while kids from all over wereon our beaches spreading covid around. I'm so worried our state will open too soon and we will get a bunch of new cases. We have a lot of high risk people in the state, you should think about them. I work in a call center (Radial Inc) and am lucky to be working from home. They are very unhappy about it and keep threatening to close down our shift. They don't like paying for the IT support for us to work at home. As soon as the stay at home orders are lifted, they will make us go back to work in the building. I'm very afraid to go back to work in the building. We share headsets and computers between the different shifts. Radials idea of sanitizing is to ask people to wipe down their desks. Every year the flu spreads through like wildfire and everyone gets it. Covid will be no different. Sure I would love to go to Disney World again (I'm a passholder), but I don't think it's worth my life if the state opens too soon.

AMERICAN OVERSIGHT

Alachua	General	Please wait to Re-open. With great sadness and personal sacrifice, I must urge you NOT to abandon the statewide safety measures that have started to flatten the curve of the Novel Coronavirus in Florida. If we reopen too soon we will likely see another spike of cases and deaths, possibly worse than the first wave (as with the Spanish Flu's course, after the initial signs of improvement, they celebrated and returned to normal and the death toll in the second wave was tragic and preventable.) We have to do better this time. We have to be patient and steadfast. Being away from work and my patients (I'm a therapeutic massage therapist) as well as my friends and family is heartbreaking and the financial struggle is frightening. I understand the sacrifice that keeping safety measures in place means. But I believe it's worth it to save lives. Maybe it will be mine, or my mother's, or my immune compromised fiancé's. Or someone you love. Or you. My grandmother died last week of lung failure. We don't know if she had the virus, because there are simply not enough tests in Florida. And the fact that testing is so limited should worry you. Please wait. For more information, for us to learn more about what we are dealing with. Even young, otherwise healthy people are dying (horribly) from this. We don't even really understand this disease. The more that we learn about it the more dangerous and confounding it seems. Wait for testing and research. Please just wait.
Putnam	General	I believe we are rushing to open up the state to soon , I believe we should wait until the Covid 19 has a vaccine to prevent it. Because in my county are case continue to increase every day. And in other county their case keep increasing every day. Once you open stuff up it's going to get worse than it is now. Because are government waited to shut stuff down are case have sky rocketed and since stuff like beach in Jacksonville have started to open are case keep rising. So I request you take a long look at everything before rushing to open stuff because we haven't beat this yet.
Escambia	Government	I work for the department of homeland security in Pensacola, FL. I think based off the data I have been working with and also the cyber attacks we are dealing with as a result of this virus that it is simply too early to ease social distancing measures. When it does become time to do so I think it should be slow and gradual.
Seminole	Healthcare	Do not open the state until we have at least 2 weeks with no fatalities
Palm Beach	Recreation	Surfing and golf should be an approved sport during these times. There is never contact with another human and social distancing is practiced even before pandemic. To allow cycling, joggers, bikers in groups it contradicts the guidelines. Please approve surfing and other ocean related activities/exercises like Standup Paddleboarding, swimming, surfing, diving, fishing. Golfing is being practiced in many other counties.

AMERICAN OVERSIGHT

Broward	Government	I feel that the closing of the boat ramps was an over reach and unnecessarily for the current situation. Law enforcement could have just as easily enforced a ban on the sandbars, islands, and rafting up. Closing the boat ramps discriminates against those blue collar boat owners that dont own a million dollar property on the water. Those who can afford to live on the water have complete access. Also, what justifies the closing of the Everglades boat ramps? No one goes out there to raft up. Fishing has been mentioned so many times as an acceptable activity during these times yet you limit it greatly. I also fail to see how it is in accordance with the constitution to have a checkpoint for the Florida Keys. I understand that these are difficult times but you have sworn to uphold that sacred document. Please do so. Thank you.
Hernando	General	Approximately 1,500 tests performed in a county of approximately 200,000 residents. Respectfully, it's too early to reopen without more testing. I would have no confiidence in returning to places of business, recreation, etc without widespread county testing.
Miami-Dade	General	I feel that wearing a mask in all public places needs to be mandatory .Mask must cover nose and mouth as many do not wear it that way.. NO MASK, NO SERVICE. Encouraging goes only so far with the renegades. When schools open, the masks should continue, maybe with fun themes. Counties that still have high number of new cases should not reopen yet. I believe Mayor Gimenez is handling it well. Tattoo parlors are not essential and i would think those people would spend their money in a wiser way. Tattoo operators need to find a gig for now.
Miami-Dade	General	This cure is worse than the disease. Cut our losses - it's been a mistake from day one. I hear from a reliable source that there's been an 800% spike in suicides and overdoses and billions lost for every week of shutdown - not to mention now trillions borrowed against our children's futures. The economy is on a ventilator because the media pressured politicians to put us into a coma "for our own good". This has not been good for us. The mere act of being put on a ventilator has put our lives in jeopardy, and the longer we remain on this ventilator, the lower our chances of ever recovering. The unintended consequences of shutting down the world economy already far outweigh whatever benefits anyone was hoping to achieve. Time for the egg-head academics to go back to playing war games with pretend lives and pretend money. We are counting on you to lead, ignoring the idiots whose flawed judgement persuaded them to vote for the degenerate gubernatorial candidate over you.
Orange	General	I understand everyone is hurting economically, but there will be no economy to speak of if there are mass deaths. It is far too soon to think about re-opening the state. There is no safe way to do so. There is no evidence that prior COVID infection confers any type of immunity, long lasting or otherwise. It is far too dangerous to open the states at this time. We don't want to be embarrassed by a double peak of infections! Florida is a laughingstock, and with good reason this time. Please do the sensible thing for once!

AMERICAN OVERSIGHT

Pinellas	Retail	Dear Governor Please Open up small businesses right away as many of them are going to shut permanently due to lack of funds many have still not received any aide from SBA you can't take down a country for a pandemic just have people who are scared to go out stay at home
Lake	Tourism	The extended lock down is causing tremendous harm to the vast majority of people. While the virus is real, we must look into alternatives over shutting down 90% of all commerce. Look to Sweden as an example and lets look to the greater good.
Hillsborough	General	Put Agriculture Commissioner Fried on the Re-Open Florida Task Force.
Miami-Dade	General	We operate a family-owned business in operation in South Florida that began in 1934. Our children are now the fourth generation in the business. We are dealers and distributors of warehouse equipment (pallet rack, shelving, conveyors, etc.). It gives us an excellent view of Florida business economics (more warehouse activity = more business activity and vice versa). Florida needs to be reopened but on a safe, orderly basis. This, to us, means mass testing, social distancing, educating the public on safety measures and using plain common sense. Once we can develop a pattern of virus reduction we can begin the reopening process. We must follow the guidelines established by the legitimate medical community. This is not something to be orchestrated by political maneuvering. ALL lives matter!!
Polk	Healthcare	The lease is up at my fitness center at the end of June. Myself and my team were doing amazing and we're on our way to our best month since we opening 10 months ago (which was still $1,000 under what we need to be making to make this journey worth it). That being said I do not have the funds to keep it open after this time off. We have had multiple cancellations since the stay at home order was put in place. We just want to get back to the American dream. My wife and I both own our own business and unfortunately neither of them are considered "essential" by the gov standards. We miss work! We miss being around people and we miss paying our bills on time and not living in fear of what may happen if we don't. I thank you and our gov for putting precautions into action, but it's time to make this state bubble again. Please and thank you from all the small "non essential" business owners in FLA.
Hernando	General	I am a 77 year old Republican male who hopes you WILL NOT OPEN the state back up until this virus has had time to completely run it's course. The fear is, we'll have to go through it all again. Thank you
Seminole	Tourism	I feel that May 15 for restaurants at limited capacity. Sport can start training May 1 and possibly go without fans until June. Theme parks open sometime in June. With limited capacity. Theaters open June 1 at limited capacity, Look at number of cases on June 1 to see if can open restaurants fully and if safe to start having crowds at sporting events. July, everything back open unless there was a spike again in June.

AMERICAN OVERSIGHT

Hillsborough	General	I am in support of opening Florida due to the current state of our economy. As a professional working within the Tampa market for talent acquisition and HR, I have witnessed firsthand the impacts the shutdown and Safer At Home initiatives has had on unemployment at large. The longer we, as a community, keep "non-essential" businesses closed, the more companies - both large firms, such as PwC and Raymond James, and small Mom and Pop shops, such as our local bakeries/delis and curio shops, are going to be affected, forced to furlough or lay-off employees, and potentially close their businesses for good. The longer this shutdown goes on, the more likely people within our communities will struggle to feed their families, afford housing, and decrease local spending.
Duval	General	What are the criteria being used to determine when to reopen? What is the % of the population that will have to be tested in order to reopen? How many ventilators are in Florida? How many more are needed to reopen? Who is on the reopen task force and what are their qualifications? Are there any poor people on the task force? Are there any minorities on the task force? How many of the task force have commercial interest in reopening the state and how do we know they do not have a conflict of interest? How many doctors are on the task force? What kind of doctors? How are the medical schools in Florida participating in the task force?
Lake	Government	By what authority have you shut down the state and an overwhelming number of businesses? You as government officials are public servants (actually mini kings and queens lording yourselves over the people) and you are allowing the media to twist and ignore the real virus data and terrorize the populace into becoming subservient and acquiescing to your “will.” You know the facts and the death rate and real numbers and instead of lifting bans and calming the people you are Rahm Emmanuel-ing it to “NEVER WASTE A CRISIS.” You have no constitutional basis to shut the country down and should be held accountable for your Big Brother style actions. Now that you as elected officials are able to manipulate voters by promising to give us “bread and circuses” you have sealed America’s fate and as a result started our nations decline. Many nations much larger in scope than America have come and gone, perhaps this is the beginning of the end of us as a Nation. It is highly unlikely the masses will wake up. What a tragedy. I highly doubt you will respond to this but if you do tell me how I’m wrong, PLEASE.
Orange	General	Please just listen to the advice of the medical professionals and only reopen once they say it is safe to.
Bay	General	I am for a slow and measured approach at opening up our economy. I think the vacation rental ban should remain in place through summer. Restaurants can open with safeguards in place other businesses can reopen staggered and limit travel from known hotspots. However I do believe more testing is needed and most certainly the antibody testing needs to pick up quickly to find out true numbers of infection.

AMERICAN OVERSIGHT

Jackson	General	Please open Florida asap. So many people are struggling financially and people are going to lose their small businesses if they can open soon. People who already have problems with anxiety and depression are really suffering because of the circumstances. We in northwest Florida have not seen as many cases and it has not been widespread. People with underlying conditions should definitely be extra cautious but our economy and people's livelihood can not withstand a delay in reopening. We miss worshiping with our church family too. Gives us some of our ways of life back soon please.
St. Lucie	General	I think ever social destine and the stay at hone order should and will be lifted at the end of this month. And everything should reopen.
Seminole	General	Please reopen and let people get back to work! Public places like parks and libraries should also be open for use. I also don't see why retail and restaurants can't reopen (considering Target, Home Depot and other "essential" stores are) so long as they adhere to social distancing and capacity limits for awhile.
Hernando	General	Approximately 1,500 tests performed in a county of approximately 200,000 residents. Respectfully, it's too early to reopen without more testing. I would have no confiidence in returning to places of business, recreation, etc without widespread county testing.
Martin	Transportation	Please open Florida! My company that employs over 500 people is not eligible for any stimulus packages. We are trying our best not to lay anyone off, but in order to do that we need business and air travel to open back up. People will end up dying from complications from not having the financial means to pay for food, healthcare, rx and housing....not to mention indirectly deaths due to depression and domestic violence. Please, I beg you to give individuals the rights they have to make decisions to return to work and a sense of normalcy, or choose to stay home if they prefer. Thank You!

AMERICAN OVERSIGHT

Collier	Healthcare	I am 65 years old with multiple underlying conditions and live in Naples Florida. During the governor's briefings of the issues with this virus in Florida I have been EXTREMELY FRUSTRATED that most of the testing and resources have been veered toward the East Coast and Orange County area and northern Florida. Here in Naples,Florida, we have a very elderly population and have snowbirds here during the virus season with people not only from all parts of the US but from all parts of the world. Whenever the governor speaks in his briefings, I have not heard him mention Coller or Lee County, NOT ONCE!!! Testing here is been virtually non existent, no way for anyone to know how many people here are infected and spreading it to others. Yes maybe our population is not as high as the East Coast, however, everything is relative. and we needed to have testing, testing, testing and contact tracing here in Collier county 2 months ago. The numbers here are DEFINITELY not reflective of the amount of people infected, on top of that, we have one of the states worst hospital systems, NCH (or as the annual resident's here call it "N"EVER "C"OME "H"OME). WE NEED TO BE RECOGNIZED AND HAVE THE SAME AMOUNT OF TESTING DONE HERE, OR MAYBE YOU DON'T WANT THE NUMBERS GOING UP! IT SEEMS TO ME AND OTHER'S, THAT YOU ARE FOLLOWING SOMEONE ELSE'S WISHES, WHICH JUST MAKE YOU LOOK LIKE A PUPPET, GROW A PAIR, AND REALIZE EVEN JUST 1 LIFE LOST, WAS TOO MUCH. OR MAYBE, YOU REALIZE YOU'RE ACTIONS MAKE YOU A 1 TERM GOVONOR. YOU DID NOT PUT STAY IN PLACE ORDER UNTILL APR 1,YOUR REASON, AND I QUOTE YOU "THE PRESIDENT DID NOT TELL ME TO"!! YOU SHOULD ONLY BE LISTENING TO DR'S AND SCIENTISTS RIGHT NOW!!!
Palm Beach	Retail	I work at Saks Fifth Ave in Boca Raton and have been furloughed since April 5th. Even though I want to get back to work I'm concerned about opening too soon. The last week any time I've been out for essential activities, people are no longer taking things serious and they aren't being careful with masks and social distancing. I'm afraid if we open too soon, they won't follow guidelines and everything we've done will be for nothing.
Hillsborough	General	1) please consider the effect shutdown has on elective "non-essential" surgeries. Many people are suffering because they are told their surgery is not considered essential. We need to start some surgeries again for the people who really need it! The hospitals are wide open, with the deceasing cases these people should not be left to suffer in pain or put off their treatment any longer. 2) Please open the state parks! Put a maximum cap on number of people. Use law enforcement to remind people to social distance. We can enjoy Florida's beautiful natural springs and beaches if people act wisely and social distance. 3) policies must protect public health overall, but the threat of this disease is more than death and overloading the hospitals. People are unemployed and need to start making a living again to support themselves and their families. We can live without concerts and crowds, but we must start trying to live with this disease and accept that it is going to cause some death. People need to start living again.

AMERICAN OVERSIGHT

Broward	General	open up business starting may 1. Its really not that serious, wearing masks is pointless. Elderly people or at risk should just be given an optional stay-home-order. Everyone else will be perfectly fine.
Pasco	General	I believe it's time to allow the electorate to make educated decisions as to when and how far they feel safe venturing back into social situations. After weeks of isolation listening to supposed experts fail to agree on much, let the individual be free to assume the liability of their actions. A lot of the updated information appears to indicate that a large percentage of those infected with Covid 19 have mild or no symptoms.
Polk	Recreation	Opening the gyms will be a great start for Florida.
Leon	General	I believe Florida should stay closed until mid May to allow for additional time for the virus to die on any surfaces. Additionally to allow time for those that are sick to stay quarantined & heal, so that they are not continually passing the virus on to others. Children at home and teachers working from home should be allowed to continue working from home until the next school term since school ends in a month. I am currently unemployed and the sooner things get back to normal, the sooner the job market will pick up again.
Sarasota	Accommodation	I feel when need To give the isolation issue more time. My daughter is a server How of work for 7 weeks Still trying to collect unemployment She is called back to the restaurant There probably won't be enough customers for her to have tips that she can live on Plus now she will not be eligible for unemployment And she has been without money for 2 months She has 2 young children at home and 1 has a long issue
Seminole	Healthcare	As already proven, Florida residents are only following the rules when forced. It would be a mistake to open up again too soon. We need to wait.
Hernando	General	Approximately 1,500 tests performed in a county of approximately 200,000 residents. Respectfully, it’s too early to reopen without more testing. I would have no confiidence in returning to places of business, recreation, etc without widespread county testing.

AMERICAN OVERSIGHT

Broward	General	I do not believe that Florida should reopen right now. We need more information about the true number of people that are infected. My biggest concern is about people not following social distancing guidelines. My family and I have quarantined since the first case was announced in Broward county. My husband is the only one who goes out for essentials. The only thing the rest of us do is go for walks. Each time we do, we encounter plenty of people, and most of them are not wearing masks and are not following social distancing guidelines. We have taught our children to move out of the way when someone is coming, because people are perfectly willing to come within 6 feet of us. This concerns me, even as it pertains to the reopening of places like parks. I work in an office full of cubicles and I am afraid of returning there because I don't want to put my life or the lives of my family members in jeopardy. We don't visit our family who lives nearby just to be cautious. I urge you to follow the recommendations of health officials as we attempt to reopen our state. We just aren't there yet. I understand completely the need to make money and take care of our families. I have been deeply impacted by this pandemic. But we should not have to risk our lives to do it. I don't want to die. I don't want to lose the people I love. We are all at risk because we don't know how this virus will treat us. I see other states making foolish decisions in the effort to restart the economy. In a few weeks we will see what their experiment has wrought. Please don't experiment with the lives of Floridians. I urge you to follow public health guidelines and wait. For the sake of our families.
Manatee	Food	Continue to self quarantine the elderly and high risk. Make sure hospitals and health care facilities are ready for any spike. Pay special attention to nursing homes and nursing home staff.
Pinellas	Healthcare	At this point, to open the State of Florida would be increasing the number of covid 19 cases and deaths in two weeks Once open it will be more difficult to close it back down Please keep the state closed until the new cases decrease to single digits
Brevard	Education	Please do NOT reopen until there is more testing for all people and not just those who are are showing symptoms. Do not put workers at risk.
Sarasota	General	REOPEN NOW!!!! WE ARE DYING ECONOMICALLY!
Orange	General	I want to express my support for a FULL and immediate reopening of the entire state of Florida and the restoration of all civil liberties to our residents. Liberty and safety are not mutually exclusive. Florida's citizens are capable of self-government. We are capable of using common sense. I appreciate your prolonged resistance to "shut down" and your gut instinct to keep things as "open" as possible. You can boldly "stand in the gap" right now by making reasonable recommendations and releasing local governments to regulate themselves. For 64 of the 67 counties, coronavirus is a manageable issue and those should be freed up immediately with "hot spot" counties maintaining heavier measures at the discretion of their leadership. Now is the time to re-open Florida.

AMERICAN OVERSIGHT

Palm Beach	Recreation	PLEASE OPEN UP THE BEACHES AND THE PARKS. THESE SEEM TO BE THE LEAST LIKELY PLACES TO SPREAD THE VIRUS. THIS WILL ALSO IMPROVE MORAL IN THE STATE TREMENDOUSLY.
Miami-Dade	General	I believe it is too early to re-open South Florida especially Miami-Dade County. Perhaps in June depending on the numbers and testing some areas can re-open. I don't believe parks and other recreation areas are essential at this time.
Broward	General	I think it is way too early to lift restrictions and stay at home orders in South Florida and other highly populated areas. The virus is most certainly NOT under control because there are still positive cases being reported on a daily basis. And those are just cases reported for individuals being tested. There are hundreds of thousands of people who are not, and have not, been tested. This means you really have NO idea of the actual number of positive cases there were and are. If you open, people are not going to follow social distancing or wear masks. This has already been proven because there are peoplge now who aren't following mandatory facial covering orders, including at retail and food establishments employees even though it is mandatory. It would only be worse, no protection for at risk people, if restrictions are lifted and establishments are allowed to open. There are not enough police to enforce even partial restrictions that you might consider implementing. These are the facts. I am happy to discuss my thoughts.
Charlotte	General	We need to start opening up for people that need to work.
Manatee	Education	Is it possible to offer Florida Teaching Certification testing online/remote? There maybe a need for an influx of new certified teachers once schools reopen. Offering online testing can get many seeking certification ahead of the game and ready to go when schools reopen. Pearson offers remote testing services for several tests can this method be offered for the teacher certifications?
Manatee	Healthcare	Covid 19 - Reopen Florida Immediately lift the restrictions on healthcare professionals so we can get back to work tomorrow. We are licensed by the Department of Health so we already adhere to higher hygiene standards than many other offices/facilities. We care about our client/patients well being. Please allow us to adjust our own practices and procedures to further limit any potential risk. The main problem I see in most workplaces are the lack of employer paid sick days. Illness continues to spread because workers are no longer given paid sick time, like I had 25 years ago (6 days). Most people now live paycheck to paycheck and can't afford to take any unpaid time off. How would you get employers to pay people to stay home when they are sick?

AMERICAN OVERSIGHT

Marion	General	This is a repost: my original submission was posted under Manufacturing in error when it should have been posted under General. It seems to me that any plan to reopen the state should be based on the science and medical experts. While everyone may have an opinion, the reopening needs to be done in an orderly and thoughtful manner based on science and not lay opinion. The launch page of this portal writes " public feedback will be a critical component of the Task Force's final report to Governor Ron DeSantis", and that concerns me. The public feedback is nothing more than opinions some of which may be informed and others uninformed and based purely on individuals' wants. Social distancing and stay at home actions have slowed the progress of the virus. We have nothing else at this point with which to battle it. It seems we should continue with what has been working and heed the opinions of the experts. At the very least, we should follow the federal plan. Certain areas of the state have already diverged from the federal plan which I think is unwise. Our plan needs to be implemented uniformly. The virus does not respect county borders so our response to it needs to be a coordinated effort not a patchwork of rules for different counties (and states for that matter). Our economy will never thrive if Florida's, as well as the country's, populations are decimated by this disease. As outlined in the federal guidelines, it's the disease's downward progression that should take the lead as to reopening plans and not public opinion. As I understand it, this portal was just launched and some of the subcommittees are going to have to render a recommendation this weekend. How can these subcommittees rely heavily on opinions posted to a portal that only has a day or so for people to learn about it and respond? Seems that whatever the prevailing opinion that is posted here will not be a true, honest and representative cross section of opinions given the small window of time people have to learn about the portal and respond to it which will consequently limit the number of responses that you'll get. The same applies to the task forces' recommendation given that this portal will have been up less than a week before they render their recommendation. And, again, whatever is written here is just public OPINION.
Pinellas	General	Please do not consider opening the state to increased activity until we have adequate testing available and a clear decrease in the number of coronavirus cases statewide. To do so will cost additional lives. No loss of life is acceptable, especially when you have the power to prevent it. I urge you to consider which of your loved ones is worth sacrificing for financial security.
Orange	Education	Open up the state strategically. Miami Dade needs to be the focus. Ensure all hospitals do not furlough nurses and staff due to this. Allow all Retail establishments To open but only allow 50% of Capacity /patrons in at a time time. Keep the state closed to visitors from current hot spots - nyc etc.
Miami-Dade	General	I do not agree that the economy opens, wait a few more Wells. Thanks
Manatee	General	Open. Open. Open! Thank you. I am finished pandering to Crazy people. The cure was worse than the sickness.

AMERICAN OVERSIGHT

Pasco	General	Please lift these restrictions. Most neighborhoods are NOT following them anyway (I am typing this as 15 of my neighbors congregate in a driveway across the street and no one has masks or is social distancing). The intent was to flatten the curve to avoid over-taxing the hospitals and medical providers, not eliminate it forever or completely - people are forgetting that. You've flattened the curve, so time to get back to real life so people can earn a living. The state will go bankrupt and there's people who are collecting unemployment who were NOT even working before this began! The state cannot afford to continue writing blank checks (nor can the federal government).
Leon	Government	I think that the government needs to make sure that we have the Virus under control before we open up all businesses and send people back to work. I think we need to pay most attention to what the doctors, nurses, and scientists are saying and not as much attention to the few protesters who have been vocal but by far the minority regarding re-opening everything now. Imagine having a computer virus on one of your computers at work and not making sure that you stop that virus before it spreads to all your other computers. How much more important are people than computers???
Lee	General	Please OPEN our economy ... real doctors are reporting low numbers not unusual to typical flu season. Real doctors are telling us that our immune system needs exposure to every day activity to stay strong. This is a hoax and killing our economy, starving poor families, increasing suicide, domestic violence, child abuse are FAR more important than less than a 3% (actually less than a 1%) death rate. Fearful people can stay home. But this is a virus of fear not facts. Watch this: https://youtu.be/xfLVxx_IBLU Thank you for giving us an opportunity to contribute. Gov De Santis you are in our prayers every day. Thank you for all you do!

AMERICAN OVERSIGHT

Broward	Healthcare	As a physician here in Broward, I am very concerned about our timeline in opening up. I am grateful you are asking the general public about what to do, but I urge you to listen to your healthcare professionals in the state and from The WHO and CDC. I actually thought Presidents Trump's guidelines for reopening were reasonable, allowing for a two week downtrend in cases. However, we are not there yet!!! In fact, we have hardly hit our plateau. Regardless, opening up will likely result in at least a small peak in cases. We need to be prepared for this with appropriate testing locations and appropriate provider PPE. We need to do everything we can to protect our healthcare providers- they are not disposable. At a minimum, it takes 7 years to train a physician after college. Finally, our frontline workers, in addition to healthcare workers- everyone that is forward facing to the public - needs additional protections. You should also prepare to protect their families if they die in the line of duty- i.e.: doing their regular jobs. Unfortunately this list of essential personnel/ frontline workers is very long. If you are able to provide protection for healthcare providers and compensation and family protection for all essential personnel, have increased your testing (optimally with at least readily available antibody testing) and local PPE production, then you should slowly reopen. I still believe that large gatherings should be prohibited and that dining in restaurants should still be prohibited and that wearing a mask EVERYWHERE at all times should be enforced at least until a vaccine or treatment (that works) is readily available. Masks will only work if everyone wears them, but they can curb the spread of virus if everyone wears them. Thank you.
Duval	Healthcare	I think it's too early to open. We should go a longer period before new cases are being diagnosed. Get medical, hospital opinions.
Osceola	Tourism	I feel that based on the current data curves a division of the state into 3 divisions: north, central, and south which would in turn fall into the 3 levels of release. The north would hit tier 1 release first, then two weeks later when it hit tier 2 central would go tier 1. As the north hit tier 3, central would be tier 2 and south would be tier 1. The next stage would be central at tier 3 and south at tier 2 with the final stage would put the south at tier 3. As a focus on central as that is where I live I could see us being in tier 1 mid may and tier 2 June 1 with tier 3 for possible July 1. As an educator I am concerned about the prolonged lack of tourism and what it will mean to the economy of central Florida for the remainder of 2020. We need strong social rules such as the 6 foot rule, wearing a mask, and taking temperatures when entering crowded spaces like theme parks or stadiums. It has to be that the public has the right to make a decision for themselves. Socialization is a cornerstone of our community and I truly fear for the mental welfare of several members of society if we do not allow for a return to societal norms.

AMERICAN OVERSIGHT

Lee	Retail	At this moment we are losing both our small businesses and the lost of product with no help from the government..no income no house no car no food no money for insurance ect ext
Alachua	General	Please don't require people to wear masks to be out in public. Re-breathing your own carbon monoxide is harmful. Also, tmany measures I see in place now seem great at face value but the next step makes no sense and puts you at risk of exposure. IT, plexi-glass at the registers only in front of the cashier, but then you have to move to the right of that plexi-glass to pay and there's no covering. Almost every measure I see in place is like this. It's ridiculous. We should have never been locked down in the first place.
Broward	General	I would rather look at four walls than the inside of a coffin. Please take your time and consider how much impact opening too early would have. People will get sick and people will die if we re-open too early. We need a lot more testing before we open up shops and restaurants with close contact. My hair is turning white, but I'd buy a box of hair dye and do it myself, before I would risk going to a beauty shop!
Palm Beach	General	Recently 4 separate antibody tests conducted across the nation have been conducted to gauge how much of the population has been exposed to COVID 19. All found high levels of virus saturation leading to a revision of the mortality figures based on WHO projections of around 3.4% downwards to .05% or less. These much lower figures are consistent with the common flu's types of disorders that combined take around 160k Americans per year. These results are consistent with mortality figures seen around the world and in our own country -- whether a lockdown is in effect or not. This makes the antibody studies the best possible science to rely upon and vastly superior to the science that was relied on to institute the lockdown -- which was sold as a way to prevent millions of deaths, was based on bad data and deeply flawed assumptions. The Antibody tests also indicate that a lockdown won't matter as the virus has so saturated the population already, it is futile to try and protect everyone. Furthermore, just as we have seen in Sweden and well as in states that did not lockdown, there appears to be no substantial difference in results when locking down or not. The only thing that matters is protecting the very small minority of people who are vulnerable. Fortunately, it is also very easy to identify vulnerable populations due to age and existing conditions they likely have – allowing our communities ample opportunity to provide them with the attention they need. Also mandating everyone to surrender their rights will do more harm than good. We as a civilized society allow people to make decisions for themselves that may lead to self-harm, because we value freedom. The logic behind preventing people to go to church or assemble for a protest could be used to disenfranchise gay men because of the high rates of transmission of STD's in their communities. What is to stop a future government from using a fake concern for public health to disenfranchise any group it chooses? What good is the right to speech if you cannot gather? How can you have a speedy trial if the courts are closed? What is the right to an education if the schools are closed? How can you

AMERICAN OVERSIGHT

Alachua	Healthcare	Where are the tests? Without accessible and rapid testing, detection and containment of the coronavirus is impossible. With enough testing, we could safely reopen Florida. That is not the reality...Where are the tests??? Put Florida's people first. Get testing in place before reopening Florida.
Pinellas	Education	As a teacher, I have many concerns regarding the opening of schools in August. Florida is not safe to return to school buildings that soon. I have read many scenarios from other states regarding split days, split weeks, limiting class size, etc. This does not work in elementary schools at all. Families send sick children. The young children do not keep their distance from each other or adults. The schools are not well cleaned as there are always custodial shortages. And not once do they mention the safety of the teachers in all this. I am 61 with moderate asthma. I have to help care for my 87 year old mother. There is already a teacher shortage and starting back to soon will just add to it, as many teachers simply cannot or will not take that risk. All of these scenarios to make it safer for children to return that soon do not protect the adults involved at all. I think it would be best to continue digital learning (which is working great in our Pinellas district) through December at least. That will take us through the possible second wave. Also, please protect our pensions and not consider filing bankruptcy. Some of us have worked all of our lives for those meager pensions. Getting the unemployment situation corrected as soon as possible will put money in people's hands that currently have nothing coming in. Slowly, slowly reopen step by step but most certainly not until at least June 1st. Not here in Florida, most certainly not in Tampa Bay. The safety and health of all people, young and old alike, must absolutely be first priority. Thank you.
Okaloosa	General	It is much to early to open. Florida is #8 in the states with the most cases.We just went over 30,000 cases. The cases are going up not down. We need to protect our elderly and our healthcare workers. People are not taking this serious in Nwf, half the people don't wear masks and carry on like it's just another day. Please protect the people instead of putting us at greater risk.

AMERICAN OVERSIGHT

Escambia	Healthcare	Hello, I am a Medical Laboratory Technologist of more than 20 years experience. It seems to me that any consideration for 'opening' for any state must follow careful guidelines that accounts for safety first and keeping careful watch on the continued spread of the novel COVID19 virus. Let science be your guide here. Institutions such as eat in restaurants may open but only at no more than half seating capacity in order to spread out occupants and certain venues such as a salad bars and self serve shall remain closed until we have determined to have achieved a desirable level of 'herd' immunity...that determination should be based on testing. We need more data as to how many Floridians already have antibodies to COVID19 and develop a paradigm based on statistical data collected for each county of the state of Florida. This data can be utilized as a guide to aid in determining what can be opened and where. Institutions such as gyms and fitness centers must adhere to even more stringent guidelines due to the nature of proximity of patrons to each other, the equipment used, and the availability and willingness of patrons to use the antiviral wipes and the personal hygiene of the patrons factor into this as well. Facial masks/coverings must be required for all grocery stores while still implementing social distancing. It is my recommendation that all shopping carts are wiped down after each use. Barber shops and salons must require all employees and patrons to wear a mask/facial covering and wipe down all chairs and surfaces between each customer. Beaches can reopen as so long as there is a reasonable means to enforcing social distancing for the remainder of this pandemic. I recommend that any public restrooms be cleaned frequently and signs posted to remind the public to wash hands properly and clean up after themselves.
Osceola	Healthcare	I do not believe restrictions should be lifted at this time. Public safety is far more important than hair cuts and dining out. I am immunocompromised and it is a struggle to keep those around me safe with the current restrictions in place. Removing them and reopening central florida is not only reckless it is dangerous.
Hernando	General	Approximately 1,500 tests performed in a county of approximately 200,000 residents. Respectfully, it’s too early to reopen without more testing. I would have no confiidence in returning to places of business, recreation, etc without widespread county testing.

AMERICAN OVERSIGHT

Hillsborough	Food	My husband is a server in a high end restaurant in Tampa (Hillsborough county) and since being laid off has been taking care of our 2 young children since schools are closed and I am working full time. I understand that we have never been through a Health crisis like this before but I would like you to consider the fact that sending certain employees back to work without the proper child care will create a hardship on many families. I am also concerned that by him going to back to work there is increased risk for our family to get the Coronavirus, unless people have the confidence to go into restaurants that the risk of him having to go in will not be worth it because no one will be dining and he will not be making the money he made prior to this health crisis because he cannot have the same amount of tables now that they have to be 6 feet apart. Also gloves are not a good option bc they can't Change them for every interaction with each table. It just seems unrealistic. I am all for getting the economy in FL moving in the right direction and feel like you have done a great job in your decision making and I would encourage you to continue the take out option in restaurants For awhile longer and get other industries that have less contact up and running sooner.
Orange	General	Open Florida!
Lee	General	The act of reopening the state to free-for-all business is too soon. People are still contracting the Covid-19 virus, and not enough people are being tested for it. For as much as I would love to see my friends in their stores and boutiques again, I do not want them being sick because of it. Stop holding up the relief checks for the small retail owners, forget about the large chain stores and restaurants. Get help to the people that really need it, not the super rich that line your reelection bank account.
Sarasota	Retail	We need to be very careful with retail in general. Florida gets so many tourists who spend their time (and money) shopping. They will be bringing undiagnosed viruses with them from all over the world. That is true for everything, but retail is hard to change. How can you keep people safe? I know it's boring to be at home, but for those of us who work retail (and have been closed recently,) it's very scary to think about having to deal with all the changes, attitudes, germs & stress. We have families we have been trying to keep safe for the last 6+ weeks & now if everything is reopened, it's possible it was all for nothing as it is too early & too many will get sick. Restaurants opening for in house dining will be just as bad if not worse as those buildings are much smaller than many retail stores. Please keep most businesses closed at least thru May...then look at very slow, very strict rules when the doors open. So that there are 1000s less who will get sick &/or die. And please listen to the doctors, not just the business people worried about the bottom line. Thank you.

AMERICAN OVERSIGHT

Indian River	General	Dear Governor Desantis and others, First of all, I want to thank you for this opportunity for my voice to be heard. Not only am I a citizen of this fine state, but also a business owner. I own MRG Partners Inc., doing business as Heavenly Cleaning operating in Indian River County. I have paid very close attention to the events concerning this pandemic. Despite the criticism that I have read concerning this historical time, I will say this. No one was prepared for this event. I will admit, like most of us, those of you who are in charge are learning as time goes along. I want to commend all of you for the time and effort you are putting into this situation. Within 3 weeks of the time that the Governor decided to put us in quarantine, I was already feeling the effects of this. My business was in decline by a minimum of 75%. My thoughts on rather my business should be considered essential is not the issue here. My customers, like most Floridians, are the elderly. They were canceling our services to protect themselves and I get it. Thankfully I have been in business long enough to handle this even if it lasts a few months. My heart does go out to those that are not as fortunate. With that being said, I do have faith in the economy to restore itself. Because I believe in the American people and their resolve. This is uncharted territory for all of us. But my thoughts on reopening the state are as such. First of all, we need to extend the deadline. We need to show a downward trend for 14 consecutive days at least. With the results that came out on the 23rd of April, this is not it. I also oppose allowing some counties to open when others can't. That is opening a can of worms. I know the county just south of me, St Lucie has a lot of their citizens that commute to Palm Beach county which we know is a hotbed. Another factor to consider is this. We do not have a proven cure for this virus nor a proven vaccine.
St. Johns	Healthcare	The idea was to flatten the curve so the medical system could respond. As long as we can keep the curve managed and the medical system can respond that is the original stated goal. We simply are not going to be able to wait this out. Plus looking at the actual mortality numbers out of NY and considering what the antibody tests show is the probable actual infection rate, it would appear that is it much less lethal. That being said, we do need to allow for at risk persons to be able to quarantine. Meanwhile, open with masks, limit gatherings, and moderate social distancing for the rest of us. The people will die fear mantra...news flash, people will die as they do in auto accidents, cancer, suicide, etc. You can manage risk, you will never eliminate it. Add testing capacity without a doctors order and start antibody testing.
Orange	Healthcare	I have several auto immune diseases that are hereditary, as such I am very susceptible to catching viruses. Please re-open Florida very slowly! There will be a second peak if we don't wait until this virus is not just slowing down but has stopped. If a second round of this virus is worse the second time as predicted it will only be because we re-opened too soon. Save the lives of all Floridians I curing those of us in danger of catching Covid 19 easily. Thank you, Diana Hopkins

AMERICAN OVERSIGHT

Walton	Tourism	We love our beaches and our tourists; however, opening short term rental up so soon will be a disaster. Our community is very small and cannot handle the influx of tourists that short term rentals will allow. Please consider extending the short term rental ban so that we can enjoy our beaches with low risk.
Volusia	Government	I think Florida should reopen, I can't we my mother in law in assisted living, can't go to the beach, unable to go to church, many out of work. The Covid Numbers are way less than the flu and we never closed for that. Parents are stressed from home schooling. We need to get back to normal. The testing sites seem empty, the hospitals are managed fine.
Palm Beach	General	Delay reopen ing until curve flattens more. Too dangerous right now how effective is the economy going to be if number or worker are reduced because of an upsurge in deaths we are far too close to Miami
Polk	General	Do not open up yet. Fix the unemployment payment issue which would give people what they need on a immediate basis. This will buy time for health officials to come up with a treatment/shot to treat the disease. Florida is filled with retirees and people with auto Immune illness who have moved here for health reasons. Economies can be rebuilt but Lost lives cannot. Nonessential personnel should stay home.
Pinellas	Technology	It is vital to reopen Florida inmediatly. Is necessary contemplate a balance between safety and survival. This situation is destroying the economy of the people. People need and has the right to work and provide for their families. We need to take care of the people of the risk group. And allow the rest of us to work and play and to acquire he necessary immunity to be ready for the next winter season. That immunity is the only guaranty that this situation will not come again. Thank you
Hernando	General	Approximately 1,500 tests have been performed in a county of approximately 200,000 residents. Respectfully, it's too early to reopen without more testing. I would have no confiidence in returning to places of business, recreation, etc without widespread county testing.
Orange	Real Estate	I am fearfull to go back toly job that is in a gymnasium. Of course we have to make payments.
Seminole	Professional Services	I work as a hairdresser and there is no safe way to do hair while standing the 6feet distance. Just wearing cloth or paper masks is not enough to protect us while standing on top of people. We would have to be in a full medical gown with a plastic face shield and where do we get these protective gear? It is not safe to reopen us 1st according to the presidents phasing system we should be one of the last to open not one of the 1st.

AMERICAN OVERSIGHT

Pinellas	General	How well you be ensuring our safety when we return to work? Especially considering many of us have taken pay cuts. You'd like us to risk sickness,death, and long term effects for reduced salaries? Will you advise companies who's employees dont need to be in office to perform their job to continue to work from home? How will asymptomatic people be screened? How would I ride elevator to my work floor while practicing social distancing? Our elevators are stuffed shoulder to shoulder every morning and evening. Will companies have access to health professional to make guidelines for returning to work ?
Broward	Healthcare	I think it's very important to open healthcare offices such as doctors and dentists I believe we should all wear face masks and social distance but our healthcare is extremely important. Not all important reasons to go to drs and dentists are emergencies yet they are extremely important to our health Also not every health or dental issue can be addressed virtually If appointments are made with time in between each one there should be no problem doing this. If people come too early they could be asked to wait outside till their appt time. so there are not a lot of people in the waiting area I have never been to a dr or dentist that didn't have private rooms for their patients being seen I would like to see everything begin to open per the presidents guidelines so we can try to get back to a "normal" life but in a structured way so we can get our economy going again soon Thanks for letting me give my input ! Good luck opening our wonderful state
Orange	Transportation	Open Florida!
Pinellas	Retail	Please open up small businesses! Many of them will permanently shut if they do not open up May 1st as was promised by the government.
Manatee	Construction	Until we have tested 80% of residents, the state should remain closed.
Pinellas	Retail	Thank you for your efforts, your hard work, and your commitment to keep our communities safe. Both my husband and I have been unable to work since late March. No work means no income in our household. Our efforts with the unemployment website have been unsuccessful- no response to our submissions. We NEED to go back to work. We want to do it safely. Please ease restrictions on retail, restaurants, gyms, etc. sooner rather than later. We are happy to abide by all new safety measures. We need to get back to generating income for our family.
Hillsborough	Recreation	Will there be any support for event hall at night clubs? Seems that this will be the last to open. Will there be extra help financially for the business and staff due to the fact we will have to open in phase 3? I don't even see "hospitality" for areas of interest?? John Santoro The Ritz Ybor

AMERICAN OVERSIGHT

Lee	General	Please re-open Florida. NPR reported a few days ago that we should be watching for positive tests vs. total tested to be at or below 10% -- if you follow our cumulative testing, Florida (unlike states like Michigan and NY) our cumulative positives vs. cumulative total tests have barely been above 10% the entire time. I also listened intently to the Governor's press conference on 4/24 and noted what he said at about the 9 minute mark -- that the total positives have been skewed due to people who have been tested multiple times and have tested positive multiple times -- this means the data is skewed. Please get antibody tests into the state so that a broad number of people can be tested like in areas of CA, Boston and NY that have shown that more people have already had this than are currently being tested -- therefore making the death rate less than being reported. But, bottom line please re-open Florida!!
Orange	General	I do not think the state should reopen until health officials say it is safe. They are medical doctors that I believe God set in place with the knowledge and wisdom needed to lead us in a healthy way when it comes to sicknesses. Please please I am begging you please allow time for a cure before allowing the state to open with a potential set back. Please consider the health of people instead of capitalism. Let's all love and appreciate people lives and not put them at risk to fail or even loose their life. I pray God's will be done.
Miami-Dade	General	I do not agree that the economy opens. Because is very soon now. Thanks
Lee	Recreation	Open up everything! If need be put restaurants on 50% capacity for 2 weeks then all open. Then hire the people in Sweden to take over. Lol. Open up the beaches and parks for sure. Sunlight is a good natural defense
Broward	Healthcare	Open Florida back up! W"not all in this together' as we're being brainwashed by the commercials. To quarantine is draconian and a push towards government control. People who believe it's too soon to open are free to stay at home. They don't have to allow anyone inside. Testing does nothing because you will test positive for covid19 if you've ever had the flu or have vaccination for flu. When you have a baby, the first thing it does is put it's hand in it's mouth, taking in germs and potential viruses/bacteria. That's when the baby's body starts making antibodies naturally and building immunity as it grows. You wouldn't put the baby in a plastic bubble to live and you shouldn't mandatory quarantine us either. Isolation lowers the immunity and the ability to build antibodies by non-exposure. China wants to dominate the world and have a one world order. With mandatory vaccines that Bill Gates is pushing it's an agenda to insert everyone with a microchip, this an ability to control you. Dr Fauci should be locked up for breaking the law in 2015 after then President Obama stopped him for his research and study of virulent strains from bats in human tissues. Obama said if the superbug was leaked it had the potential to become Lethal. So in 2015, Dr Fauci took our taxpayer money and outsourced the research to China. Wake up America!

AMERICAN OVERSIGHT

Suwannee	Healthcare	Hello. First I want to thank you for leading our state. I can imagine that when you won, you never imagined this was what you had signed up for. But here we are. Now, regarding the opening of our state... I am a Florida born resident who loves our state. I am a Registered nurse for 20 years, serving in the Emergency room for over 10 years. We serve a rural and poor community who depends on our little hospital. And of course, I view the reopening through the eyes of a healthcare provider. We MUST reopen when ALL hospital employees have enough PPE to not have to reuse, or skimp out on N95s. We MUST wait until we have enough testing kits to test any and all people who need them. In the ER, we must test for Covid as easily and promptly as we test for the flu, with results done within the hospital and given to patients within 30 minutes. THIS is essential to be able to open and properly isolate those who are positive. Nurses and Doctors are risking their lives for others. They are risking the lives of their families for their community. Lets keep that in mind when we hear people whining and complaining because they want to reopen right away and "do the things they want to do" only thinking about themselves. The economy will grow in a better more consistent growth if the reopening is done in the healthiest way-- strengthening healthcare.... because at the end of the day... who is going to take care of the sick?
Charlotte	Healthcare	I'm for reopening the state ASAP, our economy and small businesses desperately need to get back to work.
Indian River	Tourism	Open Florida
Sarasota	Healthcare	Do not open the state for Another month. I'm a healthcare worker and we Are at risk everyday and people are coming to The dr more Because they are Bored
Orange	General	The idea of shutting everything down was to "Slow the Spread". Not eradicate the virus. We definitely slowed the spread and people and businesses are hurting. Just wear a mask if it's required or makes you feel better, wash your hands, dont touchyour face, and wash your hands. It's simple. This whole "stay at home" crusade has definitely gotten out of hand and so many people are suffering. Suffering from more than the virus itself. Look at the local police reports. They are full of attempted suicide, domestic abuse, rape, and domestic disturbance calls. So many people are suffering psychologically and financially. It's not worth keeping things closed. Please open our community.
Brevard	General	I am a 58 year old woman with underlying health issues. My husband is able to work from home. We have only picked up nprescriptions and have not left our home since March 10th. We would like to see a statewide mandatory mask requirement! A PSA on how to wear a mask.. Protection is essential.

AMERICAN OVERSIGHT

Monroe	Healthcare	Governor Ron DeSantis and Florida COVID-19 Task Force on reopening Florida. First, I want to say thank you in advance for reading my concerns. I am a Florida Licensed Dental Hygienist in Key West. I have been in dentistry since 1984 and went through the HIV/Aids epidemic here; I felt safe with what I was doing at that time to protect myself, office and clients, but this virus is so different that on daily basis new findings are coming out. Are we ready? I am concerned for dental treatment in general. I understand that by delaying dental elective care, such as cleaning, perio maintenance, etc, can progress to more periodontium destruction and cause more harm. I don't want that at all. As Dental Hygiene care, we do create a lot of aerosols. Even if we don't use the Ultrasonic units- Piezo or Magnetorestrictive units, we do polish and rinse periodically throughout our treatment. I for one am very anxious to get back to work, but in a safe manner for both myself, our team and essentially our clients. I do have proper PPE available and purchased other equipment to minimize aerosol transmission, but I do feel that we don't have enough information on how safe these can be. I see people in hospital setting wearing full gowns (hazmat suits) we don't have these and only besides N95 masks, disposable gowns, face shields, disposable hats; is that enough? We would screen our clients and questions asked to ensure they haven't been exposed, including taking temperatures, having them wait in their car prior to coming in the office (no one in the waiting room) and in office disinfection for them for hands, etc. but what about the asymptomatic population, is that enough? I believe before we open, I would feel comfortable in having all of the dental community obtain antibody testing and for us to be able to test clients prior to treatment to assure they are not communicable. Maybe in the future or soon talk about it, we will all have to have AIIR systems in place, only this will assure no transmittable diseases may pass. Final note: please consider prior to opening dental practices for elective care, especially dental hygiene, that FDA and ADA have a protocol for dentist to follow and must adhere to it, including
Pinellas	Retail	Should keep enclosed environments restricted to so many people at a time with definite mask required. Face mask required
Hillsborough	Professional Services	I support the reopening of our state ASAP. While i am not personally affected by the unemployment, it pains me to see the increasing amount of hard working Floridians out of work. Let’s get Florida back out to work with guidelines to stay home if sick or immunocompromised.
Polk	General	I feel we should reopen the state slowly and with caution. Slowly open more furniture stores (RentACenter Type) maybe more businesses with lobbies that remain closed. No out of state tourism. Still keep social distancing at All businesses and any outside activities or recreational activities proceed but limited to small groups only of 5 or less. Maybe summer will drop the spread. But we need to be prepared to lockdown Florida if and when the very first case hits in the fall or winter season. Thanks for your time and God bless America
Miami-Dade	General	I think it is too early to open the city.Everyday with have cases. My family and I dont feel safe is the state open.Life is more important than the economy.Please open when it’s safe for everybody. We don’t want to die.

AMERICAN OVERSIGHT

Broward	General	I concur with the majority of Floridians that we would like to Re-Open Florida during the Month of May, 2020. However, it should be labeled Conditional Re-Opening. Specific Conditions must be in place prior to, during and continuous. Such as: Guidelines: Wearing Face Mask outside of the home; in offices, businesses, and any space wherein you can reasonably expect to come within 6ft of another individual Self Quarantining if you are experiencing flu-like symptoms An On-line Physician Hotline for Individuals to discuss symptoms with a medical professional A Hotline set up to for reporting businesses that violate the guidelines A Hotline set up to for individuals to report any activity in violation of the guidelines Reduced Business hours (All businesses close by 8PM Free Test Available in mass quantities At least one member from each household receives Free test during the Month of May and June
Seminole	General	Please open up now. No restrictions. Thank you.
Orange	Healthcare	Stop putting us at risk. This surge of new cases was because of the beaches opening and people thinking that things are back to normal. Essential workers are now at more risk. What are you going to do when all non-medical essential workers strike because you don't care about us? We're prepared to sit this out for months already. TP, food, things to do, cash in hand... when we go... who is going to train these new hires. Shut down Florida for two weeks. If you would have done this early we would have a handle on this a month ago. But now Florida is once again a joke. The whole world is waiting for the dumb toddler to come back inside so we can get this cross country "grounding' over with but no... Florida has to be an embarrassment and we can't start the clock on healing. You owe essential workers big time because we're over here keeping the peace on the daily.
Duval	Information	Now is not the time to reopen Florida. There is not even a vaccine at this time. Reopening could cause a worst out break of this virus with people to comfortable.
Broward	Recreation	As an Olympian who chose South Florida to prepare for the next Tokyo Olympic Games I'd like to see parks and sports facilities such as the Coral Springs Sportsplex back open. Off course we'd need to adapt to the new reality and have some better control to maximum occupation and interaction guided by the latest social distancing guidelines, but I still believe sports and recreation can play a big role on the mental aspect recovering from the effects of the quarantine and social isolation. Bruno Fratus, 2x Olympic Swimmer from Brazil, currently number 3 in the world and 4x Worlds medalist.
Marion	Management	PLEASE Don't open until we (state) reach, at the minimum, the 14 day downslope on Infections. To Open ANYTHING earlier is putting ALL of us in jeopardy of a Relapse in Infection Spread.

AMERICAN OVERSIGHT

Orange	Healthcare	I am 71 with asthma, HBP and disabling arthritis. When the mobile Covid testing came to my area I called for an appointment but was told that all appointments were already taken. If I wanted to she said I could go to the convention center. That is an hour away. So not only have I not been tested but no one I know has either. The actual number of cases is probably not all that accurate. People are not getting testing. So I am staying home and away from people. Please be prudence when reopening the state. I know unemployed people are hurting but I want to feel safe.before I venture out. Also, I never received that $1200 check and have no idea if I ever will! Thank you for listening.
Seminole	General	I am a 45 year old father of two school aged children, proud republican, and a tax paying contributing member of society. I also am one of approximately 34.2 million people in the U.S. that suffers from diabetes. There is a big emphasis on how Covid19 affects the elderly and rightfully so considering they have the most negative outcomes. Unfortunately, historically little emphasis has been put on those of all ages with countless medical conditions like diabetes that also make them susceptible to Covid19. The prospect of our children having to go back to school is frightening considering children can be a vector of transmission. It was a relief to hear that schools would remain closed for the remaining school year. I hope this decision is not reversed due to reopening efforts putting a lot of us in harms way. Also recall that non N-95 rated face coverings do not completely protect wearers from the virus, and therefore are not a substitution for the six feet social distancing measures. Opening up businesses such as nail salons, tattoo parlors, gyms, and theatres etc. that break social distancing measures by design without the use of proper protection as has been done by some of our neighboring states at this stage is a mistake.
Clay	General	I live in Northeast Florida for less than 2 years. My family and I are transplants from Long Island, NY. Having many friends and relatives from Long Island, as well as counties within the realm of New York City, I definitely think this should be done very slowly. New York has been hit very hard, and I believed Florida looked to New York and what was going on there in order to sort of get a jump on our reaction to the Covid 19 virus. I think Governor Desantis and his staff have done a great job.But I definitely feel that the health of our citizens should outweigh the economic effects of our people. True, the economy needs to open, but slow and steady wins the race

AMERICAN OVERSIGHT

Hillsborough	General	We all understand that life must go on , but let's do it responsibly so that we all have lives to live . I believe reopening in a slow steady pace in the same fashion that we shutdown is the safest & most effective way to proceed. Re open businesses that can accommodate outdoor seating in limited capacity, no large group gatherings , keep theaters, arenas, shopping malls closed. Stores that don't carry essential needs can be reopened with limited capacity & social distancing guidelines just as the essential stores have been functioning . As a hairstylist while I agree I need to be paid I also don't feel that the environment I work in is safe without extreme restrictions not only for my safety but my customers which I can guarantee will not make stylists nor customers happy to deal with, which in turn I feel like people will start cutting corners and when someone gets sick we as stylists will be to blame. It will go from us being told we are essential to being we are part of the problem. One person could literally make it so difficult for us all .and all it would take would be one lawsuit to severely damage an already suffering business . I feel waiting a little longer to open would be best option . Regardless like Dr. Barsoum stated " just because you can do something , does not mean you should."
Osceola	General	Reopen Florida now. All of it. Compromised and sick people can take precautions...wear masks etc but let the rest of us go back to work and whatever else we choose to do. I'm more likely to die in my car and you should now that!!! You are not my baby sitter. REOPEN FLORIDA NOW.
Collier	Technology	I am an Apple Certified Support Professional that provides assistance to Apple computer users in Naples Florida. I have been doing remote support since this crisis began, this is keeping myself and my clients safe. I would not want this stay at home policy to end until we are sure that the threat is gone and the second wave is not on the way. We cannot afford to lose anymore lives by carelessly opening public places before it is safe.
St. Lucie	General	If any Governor of ANY State attempts to re-open and/or takes any actions not meeting the CDC Guidelines for COVID-19, SHOULD NOT be eligible to receive ANY assistance money through the US Government or its agencies. If any Mayor, City Commissioner or governing agency attempts to re-open and/or takes any actions not meeting the CDC Guidelines for COVID-19, SHOULD NOT be eligible to receive ANY assistance money through their State or any US Government or its agencies.
Lake	Government	Mr Governor, please reopen our state . I know you will do it in a responsible way . Our economy is suffering people are suffering and want to get back to work . Thank you sincerely, Ruth C Messare
Seminole	Healthcare	I agree we should open up, but it must be in a rational, science-based manner and include a drastic increase in testing for infections and antibodies. We can't go forever like this, but we must wait until the curve is not only flattened but decreasing so we can phase in reopening. Then we should reopen in stages with appropriate safety in place to limit infections and keep them under control while protecting our most vulnerable citizens.

AMERICAN OVERSIGHT

Hillsborough	Healthcare	As a healthcare provider holding an advanced degree in a medical field, I am appalled that we are considering reopening wide swaths of our previously normal society. As a small business owner who is going through an extremely uncertain financial period of life as a result of the pandemic, I understand the serious effort to stem the economic collapse we're seeing and give people a chance to get back to work. That said, this needs to be done under the following circumstances: 1. We need to wait until current measures have the spread of the virus on the ropes - declining case numbers for 14 days. Once that occurs, the risk of spread is low enough that we can move on to number 2. 2. "Re-opening" implies that we go back to what was. The reality we must face, starting with this next phase of the pandemic, is that many facets of our normal social life can not go back to their previous normal. Having people regularly enter environments where they stand shoulder to shoulder breathing down each other's necks will give too great an opportunity for the virus to re-enter a rapid growth phase instead of being forced to remain in a smoldering existence. Strict regulations need to be placed on businesses to adhere to distancing guidelines and protective measures and the regulations need to be enforced. Want to stay open? Follow the rules.
Marion	Recreation	Let me start off by saying thank you for all you have done to keep us safe. But at this time, I feel it's time to re open this great state. I am the manager of Anytime Firness on Baseline rd in Ocala FL. We pride ourselves on our customer service and cleanliness. Weeks before shutdown, we were cleaning every hour to make sure everyone felt safe. A lot of our members would like to get back to the healthy place. Working out is something to help fight covid 19. As we all know, most deaths have come from 65 and older with 88% having 1 or two underlying illnesses. Obesity and diabetes are the most common underlying illnesses. Working out helps prevent this. I am asking to ease open up our health clubs. Thank you. As I tell all my members, stay safe by staying healthy
Palm Beach	General	It is too soon to reopen Florida. Especially the hard hit counties. Opening up beaches is a big mistake. People will travel from county to county going to beaches golf course etc spreading the virus. It is too soon to lift stay at home order. The numbers do not support opening. Stay locked down help people financially. Test more. Please put people first. The more people out and about the farther the virus will travel threatening all of us. We need to go another 3 to 8 weeks before we re visit opening in stages. Restaraunt seating cannot happen yet. Please please protect the people of FL.

AMERICAN OVERSIGHT

Palm Beach	Healthcare	My main concern is that due to the current concern with the Corona-virus, many other, often serious, health issues are being ignored. I completed treatment for cancer last year. I am supposed to be seen by my "team" every 3 months. My appointments have been cancelled, not once, but twice because of this pandemic. I understand the need to protect people who are currently in treatment, it does not ease my concern for my own health and well-being. I worry, not only for myself, but for so many people who are going undiagnosed and untreated. In many situations, time lost can make a huge difference between life and death. For some of us, we have bigger worries than catching this virus. Please take this into consideration. People should be able to assess the risk for themselves and do what they feel they need to do to protect themselves and their families. Please Open Florida Now. Thank you.
Leon	General	Open up the businesses. The impact to our economy will last years. The longer we are closed the more negative impacts this quarantine will cause. Should have been like sweden and stay open.
Hillsborough	General	I think we need to wait another few weeks to flatten the curve further and get better prepared with testing before re-opening businesses.
Orange	General	Please note the following concerns: 1) Restaurant seating is too close, i.e., Briar Patch in Winter Park and Columbia Restaurant in Celebration; servers cannot even walk between tables; local government should reduce the capacity per square footage; 2) Allow all elective surgeries at this time; people are in pain and need surgery; 3) Allow all outdoor activities at this time stressing social distancing; 3) Open all retail; grocery stores are more dangerous than retail shops; 4) Open all small businesses; 5) Require businesses that service senior citizens to wear masks; 6) Strongly advocate for anyone with an underlying health condition conducive to COVID to wear a mask when in public indefinitely; all physicians should promote this precaution; 7) Continue indefinitely with public service announcement information about hand washing and social distancing as a constant reminder until a vaccine is developed; after the vaccine is developed then aggressively promote the vaccine; 8) If masks are required, business owners need to buy their own and not ask government to provide them; 9) Better manage nursing home and assisted living facilities to report COVID cases; fine them if they do not report cases (a key and only clinical employee at my mother-in-law ALF came down with COVID and no one advised us until three weeks after she was hospitalized; this is a small business with only six residents; require all nursing homes and ALFs to have a written plan and submit it to the Department of Health addressing if key clinical personnel cannot work who will cover the clinical care of residents - especially needed for small facilities with six residents); require hospitals and physicians to report anyone with COVID to the health department similar to what has been done in the past for sexual transmitted diseases. Note: The vast majority of New York City deaths were senior citizens with serious underlying health conditions. The entire economy of Florida should open and focus on precautionary measures for that age group and not penalize everyone who is trying to earn a living.

AMERICAN OVERSIGHT

Orange	General	Florida should remain closed as their is already a recent increase in cases and there is no vaccine to protect others, especially those with andy underlying conditions. Our lives are more important than the economy.
Osceola	General	I really don't think it's at best interest to open Florida . We should give it another month. We have been quarantined for a couple months where lots of people did not do so but I Think in the month of April there were more people doing things they were suppose to do So why not wait another month and see how it goes. If we rush into this situation it's outcome maybe not what we are looking for and the last couple months would of been wasted. You are putting all of the work that the healthcare industry have accomplished just to open up and send them more. They can only take so much also. Please do not rush this situation. Yes we all would like to get out there but not to have wasted the time We stayed Quarantined. Common sense for the safety of our communities to many people have died such a terrible and unnecessary death . Stay safe, stay home and keep your families safe no one should have to lose a loved one to this virus and yet they have .
Pasco	General	Please start phase 1 then every two weeks open more. Need to open asap. We are going to be in the great depression. More people die from proverty. If you dont get things back up soon. I will not vote for you next term. Your killing us.
Orange	Real Estate	We run an international real estate, property management, rentals and mortgages company of 22 years. Our business has been severely affected by the restrictions. Please reopen the economy. Most sensible people now will continue the social distancing procedures now in any event as we all want to be careful but we need to reopen our economy soon to preserve our business and keep our American staff on.
Alachua	General	I don't believe it's safe to re-open Florida because that's what others are doing. People are still dying from this virus.We value money over people lives. The people who are on the frontline sacrificing their lives and withering time away from their own families and for what, just for us to be in the same place two weeks from now because we couldn't wait. It's so easy to follow, but it takes courage to led by example and go the right thing.
Hernando	Government	I don't believe that Florida should be opened so quickly. I feel we need to wait until June 1st. The reason why everything looks like it is heading in the right direction is due to being closed. There are people not taking this serious. If we open to soon we are going to see a lot more cases and deaths. Please take this into account.
Miami-Dade	Professional Services	Nail, waxing, and hair salons should not open during the pandemic. We should not open since there is no medication or vaccine for COVID-19. We cannot install plexiglass at the manicure, pedicure, and waxing stations for we have to see well to do our job. We cannot stay 6 feet apart since we have to be near other people to do our services. People would get infected more. The best decision is to keep social distancing and follow the stay at home orders until the health experts find a way to eradicate the virus.

AMERICAN OVERSIGHT

Orange	General	I do not feel safe for the state to reopen and to come back to my office job without proper testing. I do not think it would be safe to reopen until there still are cases in NY and CA. Stay at home order should be extended.
Hillsborough	Transportation	Follow medical advice and open slowly. Stay essential only for several more weeks
Volusia	General	As a small Business owner please open ASAP. Keep Maintain social distancing masks or scarf. Small Business can do it. They are enterprising people and will come up with the right solutions for their individual situation. DO NOT MAKE OVER BEARING HARD RULES. I have personally seen Lowes Home Depot Walmart full of people it has not been a disaster. The public are doing the right things keeping distance and wearing mask if they have them. I believe they will continue if you ask them. Please get us open. ASAP Thank you for giving me the opportunity to speak John Willams
Orange	Healthcare	I am a licensed massage therapist who is concerned with opening our profession up to early. We are directly touching clients, multiple clients each day. We are not essential at this point and should be opening once this pandemic is over. If a client comes in, who isn't showing symptoms but has the virus or a client who is lying about being sick (which happens because they just want a massage and don't care about who they get sick) and we touch them than we are spreading that to every single client after that. If we see six clients a night, that's now six people who can potentially be carrying the virus back to their home, work etc. We made an oath to do no harm. I will stand by that oath. Opening up in May would be a mistake.
Seminole	General	Give the stay at home order another 2 weeks or until the end of May if needed. If you open too soon, the past 30+days will have been a waste. There are many not social distancing and not taking it seriously and they will out the rest of us at risk. Stop listening the Trump and lead your state b

AMERICAN OVERSIGHT

Alachua	General	WE MUST OPEN FLORIDA AND GET BACK TO WORK! As a small business owner who just relocated to Florida, and watching the local small businesses struggling to stay a float, we need to get back to work before it is too late and there is no work to go back to! I think that the business owners who have worked hard their entire life, provided for their families, and the local community, paid taxes; are responsible enough on how to properly re-open their businesses and put in place the safe guards for all customers. If you are older, if you have some health issues, if you are or become sick, if you can and don't want to go out or even if you can work from home, then may be you should stay home, but for everyone else we need to do our part and get back to work ASAP! If you can go to the grocery store, pharmacy, gas station, eat takeout from the very restaurants that you all closed, I think we can get a hair cut, go to the beach and out to eat without it causing any issues. Yes there may be some problems along the way, just like when you decided to shut down the state, but we have overcome them and will do the same with any new problems that may occur. Please open the state up and end this stay at home order immediately, so we can all get back to our lives and make up for we have lost due to the many irresponsible decisions that have been made. This country has seen these virus outbreaks in the past and never have we ever needed to do something as crazy as this. Please help us before it is to late! Thanks
Hillsborough	Healthcare	Elective procedures
Miami-Dade	General	A lot of people are still getting sick they should open anything, I think they are just opening cause they fill pressure from the president, but the safety from the residents the lives of people are more important then economic problems, the money its not going to bring you the lives of people who died.
Hillsborough	Professional Services	I think it is vital that we reopen businesses. We need those at risk to continue sheltering at home and Florida needs to be able to get back to work and function. Covid 19 is here to stay but our economy and businesses will not be. We must keep calm and carry on. Please open Florida.
Orange	Tourism	Let make Florida great again
Lake	Government	While I do not support a mass reopening at once, I do believe we could start working on opening up certain areas such as Government offices, Outpatient MOB’s, State Parks & Beaches.
Lee	General	The current virus response should have been allowed to go as with previous contagious diseases: the scared people stay home, lose there jobs; the sick people get sick pay, vacation pay or time off without pay. Life continues nearly normal for all others. It is time to remove all government imposed 'emergency' restrictions.

AMERICAN OVERSIGHT

Lake	General	I believe we shouldn't reopen the state just to reopen the state . Sometimes I think like you guys do not understand the severity of this virus. And if we do reopen we should know to have measures in place for the people's security. Economy is one thing and the safety and health of the people is another. Fix the broken unemployment system and change the outdated right to work law that does not work on behalf of the working class people, this state has transformed throughout the years and is no longer just a retiree Haven or a tourist state but also a growing working class state and it is a shame to see how the cost of living rises while salaries are below a living wage here in the state of Florida. For once do something right for the people of our state.
Polk	General	until I see a consistent downward trend in cases I don't agree to reopen the state
Miami-Dade	General	I think before the state of Florida should open up. Everyone in the state needs to be tested. Kits can be sent to all home viaa Drone. Or kits can be mailed to households. I thinks it very important that everyone be tested. Once everyone has been tested and cleared of the virus it would be safe to reopen the State! Until this is done I think it is a disaster waiting to blow up!!!! I think if we should take these measures very seriously and you will have a better handle on preventing the spread. We must also continue to do social distancing for quite a while
Miami-Dade	Recreation	I do not agree that they open the county because I am in the part where they are most infected, I am an asthmatic person and I am afraid for my life, Thank you
Orange	Healthcare	I lost a job and had to file unemployment due to the Coronavirus outbreak. My now former employer didn't make it safe for us enough within the work environment. I am a caregiver of a disabled relative who has MS (multiple sclerosis) and has NO immune system. I worked for a retail pharmacy's call center that didn't practice social distancing on the production floor. They offered for working at home but I would have to pay for the Internet service and I wasn't offered an increase in salary. Since I relied on public transportation to commute to work for 90 minutes to 2 hours, my relative is now sick with the Coronavirus. I had to decide whether to compromise her health or do what I could to protect both of us. Re-opening the state NOW is NOT a good thing and is VERY counterproductive. Funds are depleted due to bills and I have no idea of how I'll pay the rent for May and still looking for work.
Broward	General	Do not open Florida yet it’s too early and too dangerous please we don’t need people to die

AMERICAN OVERSIGHT

Flagler	General	I believe that it is time to re open Florida and the rest of the Country. We are losing job's very fast and we need to allow them to open before we don't have any left to open. We have stayed in long enough. The chance of dying from this virus is very low if your not already fighting a preexisting condition. Use common sense and open our county now. People can't afford to not work. The government can't afford to keep bailing us out. People are already suffering financially and if we keep going on like this people will start losing homes and cars. We can't allow this to happen. The outcome if you don't reopen our state and country now will be more catastrophic than the virus. Stop scaring people with the numbers dead, how about focus on how many have it and are fine. You will see alot of unnecessary damage if people can't go back to work. It's already showing, domestic violence and child abuse, suicide and murders are higher than normal and will get worse the more people that can't pay their Bill's, all the time being quarantined in houses is just a time bomb. So please for everyone's sake, open Florida back up and people need to use common sense.
Broward	General	Re abrir ??? Es una locura en estos momentos solo en la Florida ay más de 30 mil personas con el virus y 1.055 muertos. Soy madre soltera hace más de 1 mes que estoy sin trabajo, necesito mucho trabajar pero soy consciente que no quiero terminar en hospital, y no quiero ver a mi hijo que se me lo lleven por un virus. Debería. De poner cuarentena por 14 días obligatorio con multas para las personas que no lo respeten ,y ahí después que bajen los contagios poder reabir.Uds piensan en reabrir cuando los infectados cada vez van en aumento. Deberían de cuidar más al ciudadano y no pensar tanto en el dinero. El dinero se recupera la vida no. Por favor haga. algo para ayudar a que las personas respeten la cuarentena así podemos de apoco salir adelante.
St. Johns	General	Though it is an inconvenience, I think it is unwise to reopen restaurants/barber shops/movie theaters etc while this pandemic continues to rage, and no vaccine or cure has been developed. Florida especially has a high population of residents that are vulnerable to COVID-19, not just the elderly but immunocompromized people like diabetics and asthmatics. It is not worth the risk to sacrifice tens of thousands of lives just so our richer citizens can profit off our labor. We need more ventilators, and while I know Governor DeSantis would never criticize our shithead president, it is very telling that he would rather preserve his reputation with a man who holds no regard for anyone besides himself than take the president to task for his poor handling of this health crisis. The economy is not the real concern: it is human lives. Florida itself could allocate tourism dollars into providing stimulus checks for citizens.
Palm Beach	General	Please lift some of the restrictions as safely as possible so we can get back to work. I Ihave not seen the stimulus check yet nor do I qualify for unemployment or a small business loan. I am broke and can not pay my bills rent or buy food. This has become a dire situation and if we can not go back to work soon a lot of people will be homeless and financially ruined including myself. I can only hang on for another couple weeks like this at best.

AMERICAN OVERSIGHT

Orange	Retail	Why open back up when people health is at risk look in retail they try on clothes they sweat that's nasty they touch everything it's plenty of people in the store Jesus think about tgat
Broward	Professional Services	I am a solo practitioner lawyer with two employees. I closed down from April 7 through April 22 because one of the employees woke up sick the morning of April 5 and did not get tested for COVID-19 until April 25. Although I am sure she has it (and three full weeks later she is still sick) that technical uncertainty led me to conclude closing was the only option available to me. My other employee and I have felt fine all along and she returned Thursday, April 23. I went to my office every day and did whatever had to be done to keep my tiny law practice going. I did my work, I did clerical work, I did bookkeeping, I took out the trash. It has been very stressful because in addition to all that I promised to pay both regardless of whether or not they came to work (I can do that now thanks to the PPP, which I successfully navigated under the most stressful of circumstances). So you probably think I am pushing to reopen small businesses! But no, I worked too hard for what has seemed an eternity doing the responsible thing to now just change course, backtrack, and jeopardize or undo what I accomplished so far. I still have one sick employee, starting week #4 of her illness. That is probably symbolic of the state of our state. We cannot possibly be ready. I have no idea if my other employee and I have the disease and we were exposed to my third employee on April 3- two days before she got sick. How do we know we are not endangering each other or others? We are working- behind a locked door because I cannot let my clients and defendants in the door! We need to be tested to see where we stand. My landlord won't allow my sick employee back to the office complex without seeing her doctor's note approving her return to work. I cannot find the disinfectants I want despite visiting two, three, four, five stores each day. Publix food shelves were not even full today. My hair is a mess because my salon is closed!!!! THIS IS NOT WHAT I CALL READY!!! I DON'T WANT MY HARD WORK TO BE FOR NAUGHT! Let's do the job- a complete job- the right way.
Polk	Education	Education, healthcare, retail, restaurants, bar shops, hair solons, government, & churches too. These are essential for people who are hurting and are willing to go out and not able to work.. American will not have any jobs, or economic in another two to three weeks. There will be no recover. I am register voter of Florida , I support you but you should support your voters too.
Sarasota	Recreation	Open the beaches to ALL Sarasota County residents. Only use one entrance to the public beach parking lots and limit it to whatever number will be safe. Check for Sarasota County ID at the entrance. We live here 12 months as year for a reason. We are committed to the community. I am a teacher and my husband is a plumber. We need the beach to relieve stress and have a place for our 7-year-old son to play. The beach is part of kid lives. Schools are closed, our neighborhood pool is closed. We need the beaches to spread out and get some sun for our mental health. Open to Residents ONLY!

AMERICAN OVERSIGHT

Hillsborough	General	Please reconsider opening Florida, there are to many people that can and will die due to this virus. My recommendation should you decide to reopen is to strait with the small businesses and then possibly the larger ones after the small businesses have made it with no new infections. I'm hoping you are tracking the virus in the various county's and considering which ones you should reopen, thank you for being cautious with everyone in our state. All lives matter. Kathy Mahoney 4/25/2020
Broward	General	It is time to open up. People are starving and have to wait hours in lines to get free food. Lawn services, golf courses, tennis, gyms, camp grounds, sporting goods stores, and elective surgery should start ASAP with guidance on the protective measures individuals should take. We are purposely destroing our economy. There must be counties that can open now. It is time that individuals must be responsible for themselves the State can't be mother and father to everyone.
Hernando	General	Approximately 1,500 tests have been performed in a county of approximately 200,000 residents. Respectfully, it's too early to reopen without more testing. I would have no confiidence in returning to places of business, recreation, etc without widespread county testing.
Broward	Technology	The State should start opening up at the beginning of May keeping social distance guidance for the different types of businesses. Parks and recreational areas also should open. Thanks.
Miami-Dade	Healthcare	I don't think we are ready to reopen and lift any curfews. People are still getting sick the virus keeps spreading. Miami Dade needed a total shut down for at le East 45 days if that would have been done things would already would have been back to normal. Your after money for the state and you've lost more by not shutting it down. This is only getting worst because of irresponsibility. We are concerned for our children and family members. I'm pretty sure congress and their families are safe at home while we are struggling with all this crap going on.
Clay	Healthcare	Please do not reopen FL. I am a registered nurse and it is imperative that we continue to shelter at home and keep Floridians safe. This virus is highly contagious. You have no idea what it is like to see people struggling to fight this virus or to watch patients take their last breath alone with no family present and only medical staff present.
Hillsborough	General	Please don't reopen the state. My husband is a retired Sergeant with Hillsborough county sheriff's office and is now working security in the er at our local hospital....we are not anywhere near reopening. It is just going to get worse, I would wait until June 1st and reevaluate. I have had one close friend already die from this. It is not worth it to rush it.
Hernando	Administrative	Please do not reopen. It's too risky until we know how to fight it. My family and I are uninsured and cannot afford to be sick. My 8yrs old has two heart conditions. She won't survive if we bring it home to her.

AMERICAN OVERSIGHT

Sumter	General	If our state cannot acquire all the testing needed to guarantee the safety of all Floridians then how can we be sure of not starting this all over? In the area I live.....very few people TRULY practice social distancing as prescribed. I want our state to open. I want our beaches to open. I want our tourism back as strong as ever. 1- we need to focus on getting unemployment applications completed so people can feed their children and pay their bills. We need to help these people fine the means to survive. 2 - focus on acquiring tests. 3 - only reference data and science for reopening our state. I would like to believe we could do all the above at the same time...but multitasking seems to be a forgotten art. Leadership prepares us for difficult situations and this is most definitely difficult times. And we seem to continue to struggle and blame everyone else for any deficiencies. It's not the time for politics. Again.... not the time for politics. We need real leadership....not tail wagging politics! Let's all do our jobs for the betterment of Florida and for our country.
Broward	General	As a single parent of a high school student , I am most concerned that we open are State safely and that we do it long term and not short-term. I would like every resident to be able to have a home test sent to them and be able to take the test for their symptoms or not. Then we will know, if there is a curve or it is been flattened to be able to make the best decisions. May God bless you.
Orange	General	I am more worried about the health and well being of everyone versus the economy. Ues the economy is very important but if we do not focus on health first we will be back where we started. I for one will not be going anywhere. Even if businesses are open. I am too scared. I voted for Ron DeSantis and I hope he considers health over money. I definitely will not be going to a restaurant anytime soon. If one person goes to a restaurant and the server waits on them then takes the virus to another table and then another. Menus are touched etc. You can put in place rules all you want but doesn't mean someone is going to do it. Wipe down every menu? Every ketchup bottle. Wash their hands. I do not trust other people. I have seen people be very careful and I have seen people do stupid things these last several weeks. I feel its careless and negligent to reopen with so much that is unknown about this virus. I have a baby and I want to make my family is safe.

AMERICAN OVERSIGHT

Collier	General	I am not in favor of reopening the state until widespread testing for Covid 19 and antibodies are available and we can be assured that we have the medical and emergency resources available to support a health crisis. Our population is similar to New York and we have the highest elderly population in the country. Slow phases of reopening would be better long term. Otherwise, we will destroy any chance of tourism for 2021.
Broward	Tourism	We need to reopen ASAP! We are not able to get unemployment, so please reopen South Florida! You are definitely not getting my vote this time around if you keep South Florida closed.
Sarasota	Recreation	Open the beaches to ALL Sarasota County residents. Only use one entrance to the public beach parking lots and limit it to whatever number will be safe. Check for Sarasota County ID at the entrance. We live here 12 months as year for a reason. We are committed to the community. I am a teacher and my husband is a plumber. We need the beach to relieve stress and have a place for our 7-year-old son to play. The beach is part of kid lives. Schools are closed, our neighborhood pool is closed. We need the beaches to spread out and get some sun for our mental health. Open to Residents ONLY!
Marion	General	I think everyone should be able to get tested, so that way we have a true count of how many people test positive, especially before everyone heads back to work.
Polk	Tourism	As someone who works in central Florida's tourism industry, you'd assume I want the state to open as quickly as possible. No matter how stressful this furlough has been, I will always realize how much more stressful this has to be for people affected by COVID-19 personally. Reopening our state too quickly will result in a spike, the loss of thousands more. We have to be smart and we have to turn to medical opinions in these times, not the opinions of politicians and people that have special interest in the stock market. Human lives matter. We can pull through this if government is willing to take care of its people in these trying times. We have to work together and we have to do whats best, even if it means hunkering down for a little longer. I beg the governor to listen to the doctors warning of a spike, the ones warning we need to use great caution when considering re-opening.
Marion	Food	I do not think it is a good idea to open the state back up while we still have people dieing. I have a boyfriend, 48, with asthma and I am scared to death to go anywhere for fear of him catching something please we need to wait at least another month.

AMERICAN OVERSIGHT

Broward	General	I believe Florida is no where near where it should be to re-opening. In fact, there are many business that fall under the category of "essential" such as BODY SHOPS, that are in fact, NON-ESSENTIAL; regulations are NOT being enforced in public places; I see people jogging along EVERYDAY as if it was a 3-day weekend along Turnberry path in Aventura, FL. and several other places. People running and walking without shirts and in skimpy clothes splashing sweat and spit all around them with no regards to anyone. THIS IS RIDICULOUS! We are dying!!! while police cars sit by in their cars. I see people in supermarkets with masks hanging on their chins laughing and speaking out loud spreading their spit to everyone they pass next to with no regards to social distancing. THIS IS INSANE!! There needs to be enforcement. PLEASE, PLEASE consider large fines to people who are not wearing masks and practicing reasonable hygiene and social distancing in public. FORGET ABOUT OPENING SCHOOLS. THAT IS CRAZY!!! Children are at risk too!! They may have much slimmer chances of dying, but they have higher chances of spreading to teachers, administrators, janitors, siblings, friends, parents, grandparents. THIS IS INSANE! FORGET ABOUT OPENING BUSINESS THAT REQUIRE CLOSE CONTACT. We have not even peaked!! To even CONSIDER opening, makes people think politicians are being paid off by big businesses. What other reason could their be? Why else would ANYONE want to gamble with LIVES, unless they are being paid off? There is no other reasonable explanation and people are fully aware of that. I pay taxes I volunteer I mentor I'm young I'm healthy I have a mother I have a conscience I vote.
Lee	Retail	You have to trust people. If I feel I am at risk then I am not going to a restaurant or retail outlet that is packed. If I do, I would request a seat away from people and I would sit in a booth furthest away from the nearest person. People cannot live in fear. This is really not much different than 9/11 except that we are succumbing to fear. I would propose for the first 2-3 weeks of May that restaurants open at 50% capacity. Put half the chairs up. You have to handle the waits that could happen. Until rainy season, people waiting can wait outside. Encourage call ahead or reservations. Move to 75% for the following 2-3 weeks if things are going well. Open full after that period if things are looking good. Retail is similar. Close contact jobs like massage/nail/hair are no different. In those cases, the staff should wear a mask and gloves (where able). Have masks available for customers. Trust me, customers who want to wear a mask will bring one and where it if they done feel comfortable. Trust people...

AMERICAN OVERSIGHT

Lee	General	I think you should start opening with the less chance of death residents. If they have underlying conditions they should stay home. That's diabetics, asthmatics, morbidly obese people. The companies they work for should make it simple for them to work from home. If they are in a business that cannot be worked from home then they go first in line for remote jobs. These are the ones that will take trainings to help with the unemployment applications and the PPP program matters. And the private sector should be mandated to create work from home positions. This can be every industry. All the call center positions that were outsourced to other countries should be subsidized to bring them back to the US in a new work from home set up. Any call center should be mandated to be from home and then mandated to add positions that will be partly subsidized. It could be a tax credit per employee. Also companies like Facebook, Google, Yahoo and Apple should have to hire certain amount of employees. A percentage from home and a percentage from the able to work on site people. Such huge companies will not have subsidies. They can take the economic hit. If they refuse, higher taxes, required donations, salaries caps. If they refuse the IRS will get into their books and bank accounts and control things and use some of the money to help pay for the crisis. Any money used by these companies to help the country can be credited in they're taxes. It will start on 2030 and the full amount will be credited in an annual portion for the next 30 years. Then the government and the private sector will have to hire at least 10% of their work force from "the list" of high risk people. If they are over 65, they should stay home and if they are not retired they will be added to the list and actually prioritized. If they are retired they have to stay at home. If they prove they need to have a part time job they will be added to the list. Outside the rule should be 10 feet instead of 6. Restaurants can only serve a tiny amount of tables on site based on the size of the business. No more than 10 should be together any where. And 10 feet apart. The masks rule stays. Then there should be a lottery based on social security number to start testing the whole population. Daily. Of course if they have symptoms or believe they were in contact with an infected person then they will be tested. All tests should be free to the population. Hospital systems, Insurance Companies, County Government, City Government, State Government and Federal Government will pay
Hillsborough	General	ITS TOO EARLY TO REOPEN THE STATE. The opening of gyms, sit in restaurants, movie theaters, and area where people will be in enclosed spaces should be limited to only a few people and very spread out. To reopen gyms, there should be MINIMAL new cases because the spreading of germs and sweat. Since a lot of people are asymptomatic, it still brings a lot of risk to reopen too early and IT. IS. TOO. EARLY. Yes the economy is suffering but until we realize if people with antibodies are immune or if there is an easier way to prevent the spread we shouldn't completely reopen. It runs the risk of a second wave, which could be worse than the first and puts many more lives at stake. The reopening will bring in tourists who could also have the virus and spread more.
Manatee	General	Please do not open our state before we're ready. Make sure we have adequate testing & a way to handle new cases of COVID-19 before we start allowing gatherings. Fix the unemployment stern - ESPECIALLY for 1099 workers! Most of us who file as contractors are out of work completely. We are all waiting on our $600 /week unemployment funds to start getting paid until we can get back to work. Please keep our safety as your first priority.

AMERICAN OVERSIGHT

Osceola	General	Ok first of all asking what state? This is supposed to b for florida resident asking about reopening. Anyway, I thank governor for all his efforts! I think we should reopen state and let the environmental situation let people breath. We cannot as people do compare to 1812???? What no internet no one knows anything. I believe we should open our magical state and people will be responsible and slowly we we prevail. Life as they say is too short so we need to embrace our amazing Osceola County life!
Brevard	General	We are demanding that you re-open our state without mandates. I'm getting a petition together this is not right and something sinister is going on. I'm going in looking at everyone's government page for each state and found out that Michigan pass a bill for funding in response to coronavirus back in 2019 June 2019.!! This is nothing but a ploy before election time and we're not having it. Our constitutional rights of been taken away. I cannot wait for phase 3 and phase 4 to go back to work. I work in two different night clubs and we need to re-open without mandates. I've done my research the numbers are wrong anyone that died of coronavirus it was just the flu but they died of pre-existing conditions. Everyone knows it I have driven by I have gone in the hospitals are dead nurses are getting laid off. There are doctors and nurses coming out all over the Internet saying that they were told to put that on a death certificate because he get $13,000 for each person diagnosed with Covid and 30 something thousand dollars for each ventilator. Last I checked our constitution was supposed to protect our prosperity as well. We are going to get a petition together and if we have to see the state using the 14th amendment we will do it! We have several groups and over 60,000 people in those groups ready to roll. We see the truth and we're not liking it and we're done and the shut down now and end it with no mandates. Go look for yourself it's not just Michigan do the same homework I've done you are governor you do the homework that we have to do over here to find out the truth. It's not right we are not going to vote for you keep our businesses shut down I've already got 60,000 people backing me on that. And we're not having it any other way no mandates. If people are scared they can stay the hell home. It was the flu and that was it I know tons of people that had it I had it everybody was sick everybody get better just like we do every freaking winter when we get sick.
Miami-Dade	General	I have been protecting my family since this started after all the effort i have made is not easy that we all catch the virus because someones's else decision ...Miami dade should not open at all ..All of these is common sense if we open we will go back again ..This is the time to show care for each other..where do our feelings stands... Tomas Cruz
Pinellas	Education	I encourage the task force to address what schools will look like after summer. School districts and educators will need a lot of time to adjust- and these plans should be made in conjunction with the superintendents..... and all school districts will need reassurances that finances will be in place to assist all of these endeavors. Finally- PLEASE do not add the burden of standardized testing. As this issue will continue well into the fall- causing great disruption, not only can this be a cost saver, but give districts greater maneuvering power to work with students.

AMERICAN OVERSIGHT

Hillsborough	Healthcare	As an ER nurse I do not feel that the state of Florida should be re opened until we start to see a decline in numbers. Everyday the number of positive cases and deaths in Florida is increasing therefore, by reopening the state now we are not only putting everyone in the state at a higher risk but we are also putting all of us that are working on the front-lines at a higher risk and also taking the risk of a second wave occurring. I think it would be a disservice to the citizens in our state and to all the people risking their lives already that are working on the front-lines if we open the state to soon.
Broward	Recreation	Please allow opening city/town pools for adult swimmers, deep water exercise & lap swimmers. Sports for responsible, senior adults should be encouraged, especially water sports. Suggest removing lounge chairs, tables, chairs & umbrellas to discourage congregation. Thanks in advance for consideration.
Collier	General	Open the State! 450 cases in Collier. 15 deaths. 385,000 pop. .001% MR. This is insane to bankrupt us. We don't want handouts. We want our jobs, lives, and freedoms restored and we want them now. We actually do not need the governments permission to end this unconstitutional shut down. Protect the nursing homes. Let the rest of us go on with our lives. People have had it with you elitist know it alls. Where did it get us?
Broward	Professional Services	I am so ready to reopen. I am an independent nail tech who rents a suite alone in a large salon that rents out individual salons (each with its own walls and it's own entrance within a big location). I serve one client at a time, do not take walk ins (appointment only, no groups of people waiting) and use hospital grade disinfectant already as required by law. I miss my job and have a full book of clients waiting to get in, I do not want to burden the unemployment system nor would I need to should I am able to go back to doing a job I love and miss dearly!
Hernando	General	I do not think, at this time, Florida should reopen.Over the past several weeks, we have tried our best to follow the guidelines set out by local, state and federal agencies. We have limited our trips outside of our residence to getting necessities and going to the doctor. I feel that the vast majority of Floridians are also doing their best. However, it is the minority of residence that don't seem to take the virus seriously. These are the people that have no respect for the guidelines or worse, for others and are the ones, in my opinion, will cause future problems. I strongly believe that Florida needs to follow the federal guidelines to enter Phase 1 and not before. The whole state should be in this completely.

AMERICAN OVERSIGHT

Duval	General	OPEN, OPEN, OPEN !!! It's time, people are anxious to get out, and get back to work. You sit there is your mansion, with all you need and could possibly want. You are NOT serving your people by continuing with this lockdown. It is absolutely ridiculous. The people that voted you in …. you must think we're pretty stupid, to not know how to practice social distancing on our own. We don't need you to tell us what to do. We need to be able to choose. So your first step is putting together a task force ?? What a joke and a coward's way out you've taken. Man up and make a decision. Open safely and soon. The longer you keep this up, the angrier people are becoming . So, again … OPEN , OPEN, OPEN, OPEN, OPEN !!!
Osceola	General	All business should be reopened. It has been long enough. Simple common sense guidelines should be in place while business takes place. The scale had tipped from being more beneficial to have business closed to being more detrimental to have business closed. Open Florida. There is no more to be gained by having business closed and the stay at home order.
Broward	Government	Please open thing up. Open the parks and dog park so my dog has a place to run! I'm a disabled person like everyone else I take precaution. I bleach thing it time to go on with our lives.thank you! I love Ron Desantis and I listen to his daily briefings my I predict people are getting a little frustrated.
Pinellas	Healthcare	I work at the VA Medical Center. We have a large population of homeless veterans as well as those that come in and out of rehab and nursing home facilities. While we have thus far only seen a small number of positive cases at our facility we still care for some of the very highest risk population. It is important to me that not only rehab facilities and nursing homes in our area have adequate training in screening and managing the appropriate care of their at risk residents but also that the homeless shelters in our are able to do the same. I also am mother to two special needs children that I homeschool. As true homeschoolers this means, more often than not, that we are NOT at home while schooling. We do multiple field trips a month with other area homeschoolers and these can take us all over the state. We have been from The State Capital to Kennedy Space Center and everywhere in between as well as headed south. Our ventures include major theme parks, federal and state parks that hole large events, museums, zoos, animal sanctuaries and almost anything else you can think of - including beach ventures. With this in mind, while we are MOST eager to get back to our normal homeschool routine that gets us out of our home, it is equally important that myself and my children as well as the other families we interact with feel like these facilities are prepared with proper cleaning and screening techniques in place. I'm fine with having temperature checks and screening questions upon entry. I'm also fine with waiting for rides to be wiped down between riders. This would of course means that these facilities must have an adequate supply of the necessary cleaning supplies needed to complete such a task. I do believe that we need to start getting settled into whatever our "new normal" daily life will look like - outside of our homes and in contact with our beautiful communities - enjoying the sunshine of our amazing state. I also believe that we need to be smart and responsible within our community. Part of that involves trusting that places we visit have responsible owners/employees that care about our safety and the other part of it falls on our responsibility to protect ourselves.

AMERICAN OVERSIGHT

Seminole	General	Reopen Florida immediately! Let people decide what risks they can tolerate. It was foolish to shut the state down in the first place.
Alachua	Education	I agree that schools should not reopen this school year and thank the Governor for making this decision. But I also recognize the burden this is on parents and the extra work it has created for teachers. I hope that the DOE's position on grading using "grace and compassion" is reflected in the students grades. After all, parents are NOT teachers. We rely on the education and expertise of our public school teachers to do that with our support. Please do all you can in your budget this year to start paying the teachers what they deserve. They need raises- ALL of them. Thank you
Miami-Dade	Administrative	Obviously we all want our economy to open and get back to our work/business (been out of work without unemployment or SBA assistance) but how can you guarantee that it is safe to do it now because according to CDC, health experts and all the models Florida supposed to open on June 01. I own a spa in North Miami Beach and with opening and keeping social distancing of 6 feet would you have a suggestion on how to do that when esthetician have to be right next to a client while performing eyelash extensions, body and facial waxing (client can not wear a mask during this service), permanent makeup and other services? A lot of people obviously understand that rushing to open the States is to get people out of unemployment (Georgia is an example) but I honestly think that our lives are more valuable and important than money.
Broward	General	Do not open beaches, restaurants, etc etc until you have enough availability to testing and enough tests - which we do not yet have. Those of us who have self quarantined since early March still do not feel comfortable going out because we have no idea yet how extensive it still is in our communities. Thank you for hearing us, Ronnie Heller.
Manatee	General	I supported a brief stay home measure to ensure that hospitals could cope and to bend the curve. I do not support the measure any longer because it is devastating so much, especially mental health and hope, My 20 year old has zero options for a future, and no social life. As a nurse, I am lucky to have a job. But the emotional strain is dreadful. Life is full of risks. Covid-19 is a threat that is less than the threat of starvation, homelessness, domestic violence and child abuse and neglect, substance use disorders, and suicide if the lockdown continues. Let us take our chances by actually living, not just existing.

AMERICAN OVERSIGHT

Seminole	General	-opening phase period must have no known virus transmissions -Environment has to be safe for customers and employees with no virus transmission -The State of Florida's emergency warehouses must be ready for a second virus wave and a hurricane simultaneously from June 1-November 30 -Mass gathering business like theme parks, ships and stadiums must have temperature AND negative covid19 test prior to gaining entrance daily for both customers and employees. Including a way to refund customers and allow the customer to exit safely - capacity limits for all government and business venues until a vaccine - continuous cleaning regimens for all government and business venues - masks mandatory in all indoor venues - assisted care facilities must have temperature AND negative covid19 test prior to gaining entrance daily for both customers, visitors and employees - enforcement OSHA 3990-03 2020 - restrictions not relaxed until a vaccine is available and at least 66% of the Florida population has been inoculated - follow FEMA pandemic response guidance
Seminole	General	There should be a place in the debate for personal responsibility. This pandemic has shown the real possibility of viral infections becoming a part of our daily reality. Running and hiding in homes will not and can not become our only choice. We should be safe, but rely on the good judgement of our neighbors to protect us as we protect them.
Pinellas	General	People die of disease. One life lost is too many, but businesses must open and life must resume. The % of those that die of coronavirus is tiny. The % of people who've lost their livelihoods is astronomical. If people need to stay home, encourage that those with compromised immune systems and the elderly be the ones to do so- not everyone else. Please encourage nonessential businesses to reopen, but stipulate that they follow certain cleanliness standards. Bathrooms need to be clean, surfaces need to be wiped down, soap dispensers Should be monitored. Home Depot outsourced their cleaning to an actual cleaning company. Really great idea on their part. Businesses will figure out what works for them. PS- HD's bathroom is immaculate. Still encourage distancing where possible but don't handicap FL businesses. Thank you so, so much for NOT attempting to turn into a dictator unlike some of your fellow governors (Whitmer!). I am praying for you and am so grateful That my vote was for you in the last election.
Palm Beach	General	Relax restrictions, allow businesses to operate. require masking in retail establishments. Open the beaches and boat ramps, maybe the gyms. Allow service industries (hair nails) to resume w distancing. Recheck numbers in 3 weeks. Inspire confidence, the fear is causing division not cooperation

AMERICAN OVERSIGHT

Broward	General	We haven't seen a reduction of cases as set by the President.
Broward	Healthcare	Why are we opening beaches when we cannot even manage a virus testing program let alone a worker unemployment program?
Palm Beach	Professional Services	I am a native of Coral Gables, 14 years living in Boynton Beach; since 1998 I've own a small marketing company and 7 years ago opened a senior salon management division: Ripple Effect Marketing Co./REM Co. I have six 1099 stylists/ nail techs which work weekly from Deerfield to Boynton senior communities I contract with. We've been hit hard and most likely will be the "last" back up and running. (ww.salonmanagement.vpweb.com) As a career Marketing Professional from manufacturing to banking I'd like to throw out a few suggestions regarding the reopening of Florida/Businesses. First, the Genie is out of the bottle and that has fear running rampid. I believe calming that fear must be done and that will stop only when the rumbling that anyone who is of senior age will most certainly die if exposed stops... that is a terrible misnomer and no matter what channel you turn on that's the over tone. We in Florida have the best two weapons to fight this thing: Warm Sunlight and Fresh Air! Start promoting this by encouraging people to get off the couches and out of the house. Encourage walking, biking, park picnics, boating, fishing, swimming in salt water. Give the Feature, give the Benefit... old sales technique. Secondly, start a weekly business lotto allowing the state the ability to control how many businesses of each category are opening weekly and monthly. Along with that, people love to voice their opinions; have a website where, each time they go to a business, they can write about the experience. There incentive to write the review is a chance to win a "lotto" prize... Keeps you up to date on resident feedback, keeps them excited about winning a possible prize for getting back into their business community. I have other ideas and would welcome an opportunity to become part of any team marketing Florida as I believe we, by far, have the very best State to live and work in. Together I know we can be up and running very soon. Gailynn Davis, President REM Co. Business: (561) 200-9236 Cell: (305) 613-2493

AMERICAN OVERSIGHT

Manatee	General	Dear Governor, Thanks for your leadership not only during this crisis, but also before. I continue to be a strong supporter of yours. With regard to the current situation, I believe we are positioned to move forward in a very positive manner. When this COVID situation developed earlier this year, everyone was pretty much in the dark as to the nature of the virus (ie target population, contagiousness, mortality rate, etc). Our actions as a nation reflected that lack of certainty. While there remain many things unknown about the virus, at this point we do have much more information : We know the most vulnerable Americans are the elderly and the physically infirm. We know that vast majority of the younger, healthier Americans are not at risk of losing their lives to COVID19, recognizing there will always be exceptions. We know that the best way to protect the broader public, absent an effective vaccine, is through herd immunity. We know that further stoppage of the economy will cost us many lives (suicide, drug ODs, mental illness, etc), primarily from those who are not vulnerable to COVID19. The big picture is that the actions taken to date across the US have been taken to protect the vulnerable, which we now know to be the elderly and physically infirm. Many of this group are no longer in the work force. Our mitigation efforts have resulted in tens of millions of Americans losing their jobs and, potentially, everything they own. Most of those unlucky people are not vulnerable to COVID, but they are vulnerable to the self inflicted economic disaster our country is experiencing. In short, we have asked tens of millions of Americans who are not vulnerable to COVID to make a huge sacrifice, ostensibly to protect those who are vulnerable. We now know the most important sacrifice being made by the vulnerable group is staying at home and
Orange	Professional Services	I have heard some restrictions in other places as to only allowing 10 people in an establishment. I believe there should be restrictions however the sq footage and capacity of a place should be taken into consideration and as long as they can maintain the social distancing standard it should be able to be more. Another point to make is that children have now been in a quarantine for many weeks and it has been said they can be potential asymptomatic but at this time they are probable the most risk free of everyone. As it is most difficult for them to practice social distancing for example in their daycare or sport environments I believe the social distancing standard could be relaxed for them.

AMERICAN OVERSIGHT

Pasco	General	Hello, I believe that Ron DeSantis was careless in his laid back response to "I am in no big hurry" to reopen. Well Mr DeSantis, you are not in any hurry because you are still getting paid as are the doctors and other politicians. You all still get your hair cuts and other things with nothing stopping you. But then you say no to the citizens? Points for you to take note of when thinking about reopening our state. 1) You put panic out there when you shut this state down for a virus before you even had a full hospital overload. 2) You took away every citizens Constitutional right to Freedom. You know, the document that binds this country together, the one you served in the military to protect and uphold. 3) You took the people's food, money and all their livelihood and you , the government, would take care of us. Well Mr DeSantis, that is not your choice to do. And you are having a terrible time doing that because there are many people who haven't gotten anything one month later. We already fill the grocery stores and hardware stores with no problems. Closed buildings, so that is not an excuse to hold every other business from running theirs. 4) You are now telling the people how they should live and how to run their businesses and when they can restart it. Who gave you this right? This is nothing like Anthrax, nuclear bomb, etc going on here. 5) You shut this state down for a virus. A virus that is going to be coming back because you told everyone to hide inside so their is not enough people out building immunity. Just look at the 5 US REPUBLICAN states that DID NOT shut down their economy. They've built up an immunity already for the majority of their citizens. They let the people in their state decide for themselves whether they wanted to shut their business and stay
Palm Beach	Tourism	I think Governor DeSantis and his staff have done an amazing job dealing with this crisis. My main concern is as we carefully open Florida and as a US citizen, what is Florida's plan to rigorously screen people from all over the globe as they arrive in Florida? They alone could create the next wave of COVID-19. Thank you!
Okaloosa	Healthcare	The thing is this: we've been closed For weeks and people have been doing right. However...small businesses, restaurants, etc..they are going to lose their livelihoods completely. No, we shouldn't open 100% at one time. Obviously. But, slowly? YES. Please. Beaches open for locals would be a lovely start. Parks. Restaurants. Then move forward. People can not hide from a virus forever. We all are going to be exposed at some point. It's time to start working on that. I rarely repeat things that any politician says. But, it is true that the cure can not be worse than the virus itself. And that what's going to happen. Suicide rates up. Abuse rates up. Children home With parents who don't care, who only saw love and care at school. Keeping things closed? It will be detrimental to people psychologically and mentally and in a world where having mental issues is already a rough one? Not a good idea. Open. Piece by piece.

AMERICAN OVERSIGHT

Miami-Dade	Retail	What I think as a very realistic and common sense individual... No gyms, no concerts, no movies, no mass gathering events at all! Non essential retail can be open and follow guidelines. I'm at Walmart and Home Depot almost everyday and it's busy but most everyone is following protocol. If Walmart and Home Depot and dollar tree can be open, then so should non essential businesses. I run a souvenir shop and while we won't have many customers, Atleast my boss will bring me back to work and get me off the unemployment system. There's no reason for most of us to be on unemployment when our jobs are def nothing more busy than a Walmart or Home Depot! Beaches can be open for anything. Tanning, swimming..... Restaurants can be open with maybe some seating following 6 feet apart guidelines. One booth open, one booth closed...that sort of thing. The biggest thing is this...if you open the state, it's up to the stupid people to do the right thing and follow protocol and if they don't and get sick, well that's their problem and let them get sick and die. Most people are so scared now they will follow the protocols.
Broward	General	How to Reopen: 1. Parks & Beaches: Only for walking, not seating or touching. 2. Sanitize all surface daily spraying with canons Clorox dissolved in water. 3. Social distance and masks forever. 4. Regular businesses open just like essential businesses limiting people in, or for take out only. 5. Be a follower from other states and countries, when they had proven success reopening. 6. Keep students at home till fall 2022, by then use face shields and divisions like the ones on pictures. 7. Risking no life it's worth it, being one of the wealthiest states, including income for years from Disney World, and others, no need to risk lives.

AMERICAN OVERSIGHT

Pinellas	Professional Services	I have been a meditation teacher in the Tampa Bay area for 47 years. I teach people how to reduce stress and anxiety, and strengthen their immune system -- which is what people need now more than ever -- this should be an "essential" service, but since there is a lot of confusion and arbitrariness about what is considered "essential" I have been unemployed recently, unable to make a living even though many people are asking for my services right now. I work with people one-on-one or in small groups of 5 to 10, and can easily practice social distancing and other health measures. I am hoping that anyone providing a service, whether it is considered "essential" or not, can be allowed to go to work, right now, as long as they practice appropriate social distancing guidelines. We should not quarantine healthy people, no matter what their age. This has never been done at any time in human history. People who have health concerns can choose to stay at home, though they should not be quarantined unless under very specific criteria. We should pay careful attention to public health experts, but not just a few pre-selected experts. A wide variety of expert opinion should be considered. A panel of health experts should not make the final decision about how the people of Florida can live their lives. The state and county officials need to weigh the evidence, and make decisions based on their judgement about what is best for all citizens. We should not set an impossible standard that "no one should ever become sick, or die, from COVID-19" -- we don't do that with hundreds of other serious illnesses and risks. We have to weigh the risks of this particular illness, against the equally serious risks of mental illness, suicide, and illnesses caused by the stress of massive unemployment. We should keep in mind that America has always been (until now) the land of the free and the home of the brave. If the brave can be free to live their lives (while practicing rational healthy guidelines), this will set an example for others to strengthen their health and build their courage. State and local officials should encourage a more positive outlook among our citizens, not a defeatist and fearful outlook. For example, NYC Mayor Rudy Giuliani demonstrated an inspirational positive outlook in the aftermath of 9-11. We have the strength to overcome this challenge, and become stronger and better.
Broward	Education	Re: the reopening of schools in mid August: Should we consider double shifts in high density schools so as to have less students per classrooms.
Santa Rosa	General	Please put the lives of the citizens of Florida above tourism and money. Wait to reopen. No amount of money is worth the amount of people who have died already.
Pinellas	General	With all due respect, I believe the re-opening of Florida should only follow the informed decision-making of scientists, doctors, and researchers; the state should not simply re-open at the behest of corporations or politicians who believe the economy is more important than the literal lives of our residents. Considering the state STILL continues to severely lag behind in widespread Covid-19 testing, and has been lackadaisical at best in following social distancing guidelines, it is much too soon to start letting things return to normal - especially a normal that very well may not ever exist again.
Broward	Technology	It seems reckless and irresponsible to reopen Florida at this point. At the very least let some other states open first so we can analyze their strategy and resultant data sets. There is no reason to risk our lives by opening prematurely.

AMERICAN OVERSIGHT

Hernando	Finance	First and foremost thank you for all your time and effort during this unprecedented time. As an essential employee and a resident of Florida, I do believe it would be within our best interest to keep the state closed. Although I understand the impact this may have for other residents who are currently unemployed, I don't believe as a state that we would abide by the social distancing standard if we were to reopen. We've already experienced what happens when the state is not closed so why would we even entertain the idea unless we can have clear guidelines for businesses, employees and residents? I understand this is a very difficult decision to make but I do believe you have our health and well-being in mind when doing so. Kind regards, PeggySue
Lee	General	To the honorable Governor of the State of Florida, is the cure worse than the illness? That is the question that needs to be answered and it is not an easy one. We own an independent real estate brokerage and a cleaning business (national franchise). Both businesses are considered essential so we are luckier than most because our businesses could remain open. However, our brokerage focuses on property management and vacation rentals and - of course - tourism has taken a big hit. We can no longer rent to our out-of-state and out-of-the-country vacationers (most of whom are from the northern States, Canada and Europe). Our maid service business has been less affected because we still clean and sanitize homes and businesses. However, at the moment, we have much less vacation home changeover cleans. Our employees, who live paycheck-to-paycheck, still work and make money but less than before the crisis. Yet they still have to buy food, pay their rents or mortgages, auto loans and the like. The same applies to us as a business. We were amongst the first to apply for the SBA Economic Injury Disaster Loan and the SBA Paycheck Protection Program for our employees. So far, we have not seen a cent. As said before, we and our employees are still far better off than most. Our state largely lives from tourism and retirement spending. With the lockdown, tourism has come to a complete standstill. We are deeply concerned that should the lockdown continue, the damage to our state's economy might be irreversible. Non-essential businesses and their employees have been without income for about a month now. Whilst the programs to help them are very generous (SBA EIDL, SBA PPP, unemployment etc), we have heard and read from many businesses and employees who have not received any of these benefits (yet). When people are left without income for such an extended period of time, there is a risk of higher crime rates or even civil unrest. That in turn might be deadlier than the risk from Covid-19. Reopening the state now appears to be the only way to avoid this. Prudent precautions such as frequent sanitizing of homes and businesses should be taken. Our employees wear masks, gloves and shoe covers. Of course, this cannot be done in every business.
Pinellas	Recreation	I would like to see small businesses such as barbershops and nail salons be allowed to do business. I would like to see the marinas be allowed to open up And except transient dockage I understand large groups such as Disney or sporting events need further study but there are a lot of small venues That would be just as safe as a grocery store

AMERICAN OVERSIGHT

Jackson	General	Reopen already!! The implementation of separation was too sporadic to be fair to the people. Waitresses are out of work. Food service owners are struggling to keep their business. And yet, you can still get coughed on standing in line at Lowe's or Walmarts, etc. I am the director of a 501c3 charity that operates food pantries in both Jackson and Calhoun counties. I have never seen such an increase in the number of people needing food. Our sick and dying numbers do not justify the economic problems that are currently ongoing, much less the repercussions of this continuing. Let our state get back to being productive!!
Charlotte	General	I have a 27 yr old son who is type 1 diabetic, high risk, at FAU that was furloughed from his job as a valet in Siesta Key and filled for unemployment back in March. His status is pending financial confirmation. He lives off of tips. He spent an hour Friday morning trying to reach someone at unemployment only to reach a variety of busy signals. He has been unable to get a temp job. How is he supposed to live off campus, pay rent, insurance, and get groceries without some type of assistance? My 19 yr old daughter is a single parent, medical assistant, with a 1.5 year old, between jobs, and cannot start the new job because daycares are closed. She also filed for unemployment in March and has not received anything to date. How are individuals in these situations supposed to survive with no income and no ability to work?
Lee	General	I am writing to urge Governor Desantis to please not lift the stay at home order at the end of April. The stay at home orders are working to reduce the spread of the virus but will only continue working if we leave them in place. Please consider maintaining the stay at home order as long as is possible so we can save lives and try to figure out how best to control the virus. Thank You
Broward	General	Open the state back up immediately in all areas. This was completely unnecessary and driven by the media's fear mongering. The number of cases in Florida does not come ANYWHERE NEAR justifying this. Nor does the number of deaths in Florida. And that number is disingenuous anyway. All we did is make a bad situation worse by doing this. Open everything back up immediately.
Hernando	General	Approximately 1,500 tests have been performed in a county of approximately 200,000 residents. Respectfully, it’s too early to reopen without more testing. I would have no confiidence in returning to places of business, recreation, etc without widespread county testing.
Seminole	General	Please do not open gyms. Consider requiring face covers in public places. Require those who can work from home to continue to do so and stagger work days for workers in office spaces reducing daily occupancy by at least half.

AMERICAN OVERSIGHT

Collier	Recreation	I propose that Tennis should be added as a specifically approved "Recreational Activity" under the April 1 Executive Order 20-91, page 4, Section 3-A-ii. Golf was quickly added on April 2, and tennis should get equal status, so long as proper Social Distancing is maintained. Perhaps approve at least singles tennis, with the added requirement that each player, when serving, uses only his own can of balls, and the other player only touches the balls with his racket, and never with his bare hands, to avoid virus transmission by touching the balls. Of course, this same system could be used for tennis doubles.
Sumter	Recreation	Open all of Florida now. Stop starving us to death and taking all our savings!
Collier	Recreation	I propose that Tennis should be added as a specifically approved "Recreational Activity" under the April 1 Executive Order 20-91, page 4, Section 3-A-ii. Golf was quickly added on April 2, and tennis should get equal status, so long as proper Social Distancing is maintained. Of course, this same system could be used for tennis doubles.

AMERICAN OVERSIGHT

Pinellas	Healthcare	While I am in full support of a progressive plan to re-open the State of Florida, careful consideration should be given to remain cognizant of the vulnerability of already strained businesses and infrastructure should additional waves of this pandemic emerge. In addition to the financial and logistical challenges presented by constraints on supply chain and manufacturing operations, healthcare facilities and other essential businesses are still struggling to keep up with supply demands related to COVID-19 - and this certainly should not be calculated solely from COVID-19 case data or quantifiable levels of exposure. The cost of maintaining operations is far outweighed by revenue across so many industries. However, we cannot take for granted the cost in human lives if these measures had not been in place. The ideal outcome of preventative and treatment measures is to contain and eventually halt the spread of communicable diseases. I believe it may still be too early to quantify how effective individual measures used to combat disease truly are in this phase of disease analysis, but I strongly continue to support 6-ft social distancing and universal masking in all scenarios in which social distancing is impractical or physically impossible (e.g. on public transportation). The public is scared and listening, and I urge you to hear the concerns of our communities. We need to anticipate long-term fallout from premature re-opening of the State. I was born and raised in St. Petersburg, FL, and while I cannot wait to return to our outdoor playground, let's continue to remember the uniqueness of this situation and its implications.
Alachua	Agriculture	Continued social distancing and obvious efforts to minimize spread are paramount. Any app to trace known cases and isolate exposed people welcome. However, we have to open as many businesses as possible with these guidelines. And as soon as possible. People at risk are going to have to continue to isolate for probably another year. So support for these known groups is mandatory to eliminate their need to expose themselves unnecessarily. However, the rest of the world needs to go on and everyone will have to understand the special new needs of the at risk population in their lifestyles so we can all live together sensibly. Definitely support the lower income groups. They are ALWAYS in need and just as likely, if not more so, to exhibit bad social distancing behavior as a result of their circumstances making it worse for everyone. Thanks!
Pasco	General	Do not be quick to reopen the state and risk putting lives in danger. I understand that businesses are suffering and people are stir crazy sitting at home, but the last thing we're need is to go back to work only to get sick or die! I doubt want tourists flocking to our state bringing the illness with them. We could infect ourselves and not know we are contagious, spreading germs as we resume our normal routines. Listen to medical experts and scientists when developing your plan. This is their area of expertise!

AMERICAN OVERSIGHT

Miami-Dade	Education	Online classes are terribly insufficient replacement for schooling, and kids have been struggling, and stalling or even falling behind developmentally, besides educationally. We need kids bacl in school, especially younger grades that need in person schooling more. Perhaps limited classes open, depending on which parents are willing to send and how many teachers can come, or perhaps more outdoor time when possible. Kids suffering irreversible damage from this.
Miami-Dade	Retail	any business that can open while avoiding dense indoor crowds, should be given permission to do so. All stores that have entrances from outdoors (most retail shops that aren't inside malls) should be allowed to open with limited capacity, masks and gloves.
Sarasota	Retail	I would like to see all non-essential business open in phase 1. By May 1. With personal responsibility and common sense. If you are at risk or are sick stay home and isolate. Let the rest of the people go back to work and life to be able to build immunities and tolerance against COVID-19. Florida businesses have lost the main tourist season, its going to be hard enough to survive until next season without extending this hardship longer. Reopen the beaches and parks...all the tourists have left so there will not be overcrowding. Allow us to be RESPONSIBLE.
St. Johns	Recreation	Anastasia State Park in St. Johns County has guards posted on the beach to prevent people from exercising on the several miles of beach north of St Augustine Beach. This causes the human density to be significantly higher near the pier as everyone from the city parking lot must go south instead of both south and north. If other areas of Anastasia Park are not ready to open due to employee safety or other reasons, just block the two exits from the beach front to the western areas of the park and allow people to move north on only the beach area.
Okaloosa	Tourism	What are you thinking re-opening beaches? We will start to get tourist coming into the state who could be infected or are carriers of Covid-19. It is bad enough going to stores to buy supplies and maybe 2/3 of the people are walking around with out mask and are right on top of you shopping.
Columbia	General	Please follow recommendations of public health authorities in regards to reopening the state. Our economy will recover in time, but unnecessary loss of life cannot be salvaged.
Orange	General	Please reopen the economy now!! People are losing their homes. If people are sick they should be considerate and stay home. If your immune system is compromised then you should take precautions. But the rest of us need to get on with our lives no

AMERICAN OVERSIGHT

St. Johns	General	Please, please, please, do not listen to those trying to reopen the state. We have flattened the curve, but that does not mean were done. I understand that some of you maybe struggling with your businesses. We all are. That does not mean we need to reopen so soon. We've just started to win this battle, and if we take this risk too early it will be all for naught. The moment we start to put a dollar value on a human life, and decide to "reopen the economy" we are taking a dangerous step. Where do we draw the line with that? Who are we to decide that people over the ages of 65 are less valuable to society than a 22 year old is? I certainly don't want my grandparents to contract the virus and potentially die. I want to be able to see them in 6 months without fear of being the one who passes it on to them, and if we reopen too soon, that is going to be exactly what happens. Again, I understand where you may stand with your business struggles, but please understand everybody is hurting right now and the reopening too soon could make this problem even worse. Thanks, A worried 22 year old who wants to see his family.
Broward	Finance	Full appreciate the Governor's hard work and dedication to follow the science no matter where it take us. His deliberative approach is just what Florida citizens need and appreciate. Opening up the State's outdoor parks (Phase 1) with stringent social distancing standards is a great first step. Please take far more time to open indoor facilities (Phase 2) such as gyms, movie theaters, hair salons, shopping centers, public meeting facilities. It's patently obvious there is no national/federal leadership on this. As a result, our State must get it right.

AMERICAN OVERSIGHT

Manatee	General	Good evening, and thank you for this opportunity to provide feedback to the Re-Open Florida Task Force. Now that significant testing for COVID-19 has been done and is ongoing, the actual data shows a very different reality than any of the original theoretical estimates and models that were used to push our nation and the state of Florida into this economic shutdown, which is absolutely devastating businesses and individual lives every day it continues. The factual data clearly shows that an overwhelming majority of people do not have any significant risk of dying from COVID-19. The recent Stanford University antibody study now estimates that the actual infection rate is far lower than the models predicted, and the actual fatality rate if infected is closer to 0.1 to 0.2 percent. With this COVID-19 virus, the data also shows that medical care is not even necessary for the vast majority of people who are infected. It is so mild that half of infected people are asymptomatic. This virus has been falsely portrayed as a problem requiring mass, forced isolation, and we are actually prolonging the problem by preventing our population from developing "herd immunity" as we do every annual cold and flu virus season. The appropriate policy, based on fundamental biology and the factual evidence we now have from the millions of tests performed, is to institute a more focused strategy like some recommended in the first place, before dire theoretical predictions unsubstantiated by actual data began to drive these decisions: Carefully protect the known vulnerable, have the mildly sick self-isolate, and reopen most workplaces and small businesses immediately. This would allow the essential social interactions necessary to generate immunity among those with minimal risk of serious consequence, while ultimately saving lives, preventing overcrowding of hospitals, and limiting the enormous harm and financial hardships compounded by continuing this total isolation.
Palm Beach	General	Please maintain “ Stay at Home” directive for the County as well as for Broward and Miami- Dade because they house a very significant number of older people and very often with various underlying conditions. This population is almost entirely retired and aren’t directly concerned with the economic impact of the virus, but are very concerned with the fact that this population represents the overwhelming majority of deaths. Would be O.K. With the directive applying to only those 60 or 65 and those older if that is feasible. I believe that no easing up for anyone in these Counties should take place before the Counties show a significant decline in the number of cases daily over a period of 14 days. I also believe that increased diagnostic testing and contact tracing is an essential strategy to obtain essential data prior to lifting the basic guidelines of staying at home for non-essential activities. We have children and grandchildren in California, North Carolina, Connecticut, New Jersey, and Florida. Normally, we would travel to see them or they would come to us. In these trying times, we FaceTime regularly. No, we can’t kiss or hug, but we can and do keep up with their lives and ours.

AMERICAN OVERSIGHT

Pasco	Government	I am alarmed at the Friday presentation by the FL Police Chief Association. Their use of the phrase "unnecessary curtailments of the constitutional rights and protections of the citizens" leads me to believe they feel necessary curtailments are fine. There is never an excuse for curtailing freedom. Smallpox ravaged Washington's army during the revolution and he did not ask for a truce or put everything on hold. I am disappointed in this shutdown and the arbitrary use of power by all levels of government. I saw nothing in the Florida Emergency Powers statutes or the governors job description in the state constitution allowing for the destruction of the economy and abridgement of our state Declaration of Rights. You need to re open Florida now. You can urge people to use masks if they choose to, and people who choose to stay inside can continue to do so. So very few of you can relate to the small businessman you have destroyed, or the working single mom whose service sector job you made go away. Reopen now, no limitations, no nanny state orders. Let the people go! If you really and truly want to help, suspend all taxes and fees for at least six months. That will make an impact. Letting people keep their own money to use as they see fit in a truly free market will do more to get Florida going than any task force recommendation. You also need to abolish every regulation prohibiting voluntary free trade. Restaurants should be able to sell groceries, continue to sell cocktails to go. End the protections put in place by special interest groups that have proven to be unnecessary. The economy is not a light switch to be turned on and off willy nilly. It is a living organism with the seen (your well intentioned actions) and the unseen- the great destruction you caused for something that would have had less impact than other influenza like illnesses. You must now open Florida back up. No qualifiers, no restrictions and certainly no curtailments of the rights and protections that are ours by birth and codified in our state constitution's Declaration of Rights. Re Open Now!
Duval	Healthcare	I feel as we still need to be cautious and not open too quickly. We still have hot spots within the state that if they travel to other areas of the state we could end up where we are right now. I also would like to suggest that with the bars and night clubs closed it is a great time to make Florida a 100% smoke free state like so many other states have done. Smoking and vaping are dangerous not only to the person smoking, but they also infringe on the non-smokers rights with the second hand smoke that they put into the air. Non-smokers should not have to worry about going into a bar or billiard hall and worry about the smoke that they inhale. As Florida is the sunshine state there isn't any reason why the smokers cannot go outside to smoke when they are in need to have nicotine. This is their right as much as the non-smokers right to go out and enjoy themselves without having to inhale the smoke.

AMERICAN OVERSIGHT

Palm Beach	Retail	I own and operate a retail clothing and surf shop in JUPITER. I employ 16 people that depend on our store being open to pay their bills. I feel that Floridians have adjusted to how to shop for their necessities and (non-essential things) over the last month. Grocery stores, liquor stores, hardware stores, bait shops, gun shops, marijuana dispensaries are all open. It's time to allow retail clothing stores to abide by the same rules these other businesses currently operating are following. I feel that it's time for Social Responsibility to take the place of Stay in Place. Please allow retail businesses to open on May 1st. Allow us to keep up with our mortgages and contribute to the local economy. Thank you.
Volusia	General	I think a law should be passed that no one can sue any business saying they got covid19 from their establishment, unless its medical malpractice from a hospital or doctor. The hospitals should still keep covid19 patients separate from other patients admitted to hospitals for other things. Maybe the people taking anti rejection drugs for transplants or cancer patients taking chemo or other immunocompromised (depending on conditions) could be allowed to file for permanent or temporary disability so they wouldn't have to work. Have businesses keep doing the sanitation/cleaning like they are now going forward. Let adults make their own decisions.
Hillsborough	General	COVID-19 ... Please OPEN up our state. Counties that are not hotspots (like Hillsborough) should be opened immediately. Every business owner and employee is essential. We need to build herd immunity in order to prevent such a disastrous shutdown in the future. Thank you.
Broward	General	Thank you for asking for the public's input. I believe the reason we are seeing the numbers in Florida is because social distancing and shutting nonessential businesses is working. Until we have full extensive testing and tracking we are not ready to open up our businesses yet. I lost my job due to the pandemic and want to get back to work, but now is NOT the time to ease up on restrictions. It is too dangerous. Please listen to the health experts. Please.
Lee	General	I strongly oppose the premature rush to reopen non essential activities. You have tested less that 1.5 percent of the population, you have NO idea the the real extent of the infection. Nationwide surveys overwhelmingly are against impulsive reopening. Do not risk citizens lives for selfish whims of the vocal minority.
Broward	Professional Services	As a hairstylist, our salon owner is not ready to open to public when we need to have a very close proximity to our clients, until all precautions are taken. A month ago, and after two weeks of difficulty, I filed for unemployment benefits. As of today, the online system keeps dropping, cannot request for benefits, there is no answer to my application, phones do not answer, and I am at loss when, how and how much I should be receiving. The Florida system is lags behind all other states in the nation and is completely broken.

AMERICAN OVERSIGHT

Pinellas	General	Reopen all closures expeditiously, we all must be exposed to the virus anyhow, as have been most NYC residents, with mostly good results. Only the sick and elderly were culled, as one would hope for during virus season. I, as a 75 year old, see only death ahead, as my usual routines, yoga, spin, stretch classes at the Y and gyms (thanks to Silver Sneakers) are gone, and now so is my body. The local zealots here in St Pete also shutdown tennis and pickleball and why?
St. Johns	General	I urge Gov. DeSantis to reopen FL now! The point of “safer at home” was to flatten the curve and to give hospitals the time to prepare. This has been done. Floridians need to get back to work to be able to feed their families and pay bills. We need to have access to non emergency healthcare. Research from multiple studies is showing the death rate to be closer to .1-.3% of cases, so why are we even debating reopening at this point? I am very thankful that our governor has not taken the draconian measures that others have in their states, however, any more time that businesses remain closed and residents forced to be unemployed is too long. Reopen FL now!
Manatee	General	Please reopen the state of Florida! 26 million are unemployed and that number grows everyday. This will lead to drastic increases in suicides, overdoses, and domestic violence (I am already seeing this at my job as a firefighter/paramedic working on an ambulance)... we are only delaying the inevitable by staying inside indefinitely. This virus is here and it’s most likely going to be seasonal. Let’s build herd immunity by opening and protect the most vulnerable. Antibody testing out of NY and LA shows this is less deadly than initially believe. Lets look at NY numbers...Governor Cuomo says that 1 in 7 New York City residents have been tested and 21% had antibodies. This by extension means 1.68m had it in a City of 8.4m. Under 11,500 died which is a mortality rate of 0.68% which is no higher than the flu. It is obviously highly contagious in tight proximity so distancing makes sense in hotspots but it is NOT the mortal danger described to otherwise healthy people according these numbers. Let’s open back up! Thanks for the great leadership, Scott Bertrand
Pinellas	General	Please be very careful in reopening our state. It should be done slowly so that we don't have an increase in cases. We have watched the guidelines and stayed home not to go backwards. Testing must be increased. Self tests using swabs probably will not give an accurate reading. Don't open beaches unless they can be policed. They should only be for exercise. They should not be opened yet. Also social distancing is a must be followed for a very long time. Malls should remain closed as well as gyms.

AMERICAN OVERSIGHT

Osceola	Retail	I have worked in retail field in Orlando and lived in Florida for almost 7 years now. It is really important for me to go back to work as I have not received a stimulus check or unemployment benefits since I became furloughed, but I only want to return to work when it is considered 100% safe to do so. I have savings and know they officials are doing their best to get people paid but I can always get my savings or credit back in order, I can't however bring someone back from the dead. Customers need to know that when they go into our retail stores and try on a pair of shoes or clothes that they are a 100% safe. If someone that has COVID-19 try's on an article of clothing retail stores don't have a way or cleaning them, which would continue to spread the virus. If an employee goes back to work and becomes/is a-symptomatic for COVID19 they can and will unknowingly infect a lot of people. In order to open back up retail stores and even theme parks we need to test way more. The state has only tested 1-2% of the entire population and by opening up high traffic areas Science, History and Statistics tell us we are asking for trouble. We can't ever put a price on a persons life.
Palm Beach	General	It seems to me that if grocery stores, Target, WalMart, Home Depot and Lowe's can remain open with shoppers wearing masks and maintaining social distancing, why can't clothing stores, shoe stores, etc, that are in open shopping centers (not enclosed malls) be open following the same guidelines? Aren't clothes and shoes essential? I have a grandson who is just beginning to walk. He needs shoes! We live near the South County Regional Park. The park is closed to everyone. My husband and I are avid bikers, and the safest place for us to ride is on the bike lanes in the park. Why can't those lanes be open for bikers, walkers, and joggers? We have been forced to ride on busy roads that do not have bike lanes. It is very dangerous! What about golf? It is easy for golfers to maintain social distancing while on the golf course and while on driving ranges. I appreciate all that is being done to keep us safe, and I also feel that we need to open up our economy. Thank you for considering my suggestions.

Lee	Healthcare	1. Masks should be required in public. 2. I do not recommend pharmacies to test for COVID. This brings possibly contagious people into places like Publix/CVS/etc. I see this causing more problems than helping. Also, pharmacists won't have enough PPE to perform tests while keeping themselves safe. 3. More drive up test centers. Perhaps 1-2 per county or more-place based on population. People can then drive up for test without a doctor's order. Dated certificates given to people once tested neg. 4. Automatic check for IgG COVID antibodies when people donate blood. Similar to the routine blood type, HIV screen, etc. This will help encourage blood donation as well. 5. Require 2 negative Covid tests prior to elective surgeries. 1 naso-pharangeal test should be 3-5 days prior to surgery, second should be point of care test just prior to surgery.

AMERICAN OVERSIGHT

Miami-Dade	Administrative	I believe you have to tread these waters VERY CAREFULLY and consider health care expert advice because many lives are at risk. When certain businesses are reopened there needs to be lots of restrictions. e.g. beauty salons, by appointment only, max 2 or 3 clients depending on size of business so that people are at least 8 or more feet apart (forget 6) and at least one empty chair between clients. EVERYONE SHOULD WEAR A MASK & take all other precautions. Same can apply to other similar types of businesses, gulf courses, by appointment only. NO GYMS or contact sports. I don't see how or when it would be appropriate to re-open restaurants or other similar places, as people sit to converse & eat, this should continue ONLY take out. That applies to any business where food is sold, pre-order/payment only. Any place that people gather to converse, Facial Coverings should continue to be REQUIRED and limit capacity to on fourth of occupancy. Some retail stores, yes with limited foot traffic (one forth capacity or less), with special hours for seniors/disabled. Tourism, No, it is way too early. Our economy will eventually recover, but lives can be lost forever. Baby Steps is what we have to take. Baby Steps. Respectfully, LR
Broward	Education	I believe we need to open Florida businesses, with healthy social distancing measures still in place. The purpose of closing businesses was to flatten the curve, so that the healthcare system could deal with severe cases of Covid_19. Now we have more data, and the healthcare system appears to be handling the situation. The scientific data shows that the infection death rate is much lower than previously thought. We can always adjust in cities and counties where there are hotspots, but it is irresponsible to ruin the economy and shut everything down even in areas where there is not a current problem. Everyone can be responsible, wear masks, stay 6 feet apart, and continue to be productive. I am much more concerned about the lives we will lose due to hunger, unemployment, and recession if we do not take action now.
Collier	Healthcare	I strongly support opening the state of Florida as suggested in the guidelines set forth by the White House Task Force. I believe Gov. De Santis has done a commendable job in protecting the most at risk demographic in our state. People have been very responsive to the social distancing guidelines and I believe our communities will continue to do so for quite some time.// As we now have a better infrastructure for flare ups of the virus when they occur (and they will occur), the healthcare system will be able to handle these spikes.// Additionally, without knowing how many people are positive asymptomatic or those who've already had a mild form of the virus, we won't know how many are already protected. I am in favor of having widespread antibody testing for this reason. It seems to me the most important metric at this point. In the meantime, let's get out there safely. Enduring a pandemic and restoring economic stability should not be mutually exclusive in this day and age. We need to be able to walk and chew gum at the same time.

AMERICAN OVERSIGHT

Palm Beach	General	Thank you for this opportunity to share my opinion. I've been listening to your daily meetings and I'm thankful for the depth of experience and knowledge on this task force. I'm lucky to be employed full time, in addition to running my own graphic design business. I'm a mother & grandmother. I've lost business and my daughter is unemployed now, due to this lockdown. The health of my family & friends, especially those with underlying health issues, is very important. At the same time, I realize that the ramifications of this lockdown on the economy and mental & physical health are going to be far worse than anything this virus can do. It saddens me to think of the future my daughter & grandson have to look forward to, due to this. We need a balanced approach to opening up the state – not one based on fear or recklessness. Even though I'm a cancer survivor, I'm not afraid, but I respect those who are. Therefore when I do go out, I wear a mask and follow all precautions. The other day, I was shocked to hear the FL Surgeon General proclaim that we need to get used to this as our "new normal" until a vaccine is available. A "safe" vaccine won't be available for 12-18 mths at least and we don't have that kind of time, even though, Bill Gates has said that "we have no choice" and "Normalcy only returns when we've largely vaccinated the entire global population". Anyone who uses critical thinking will beg to differ. We DO have a choice. I've no idea why a man with NO medical experience, who openly talks about population control, has so much power over influencing our healthcare policies. That's wrong, and I pray you make decisions based on facts and not pressure from him and his "buddies". Businesses NEED to open back up. People NEED to go back to work. Children need normalcy. Parks and beaches need to be open - with social distancing guidelines. The likelihood of getting this virus is MUCH higher shopping at Publix than walking on the beach. Mental and physical health are being damaged every day. Not to mention the uncertainty of tomorrow for many Floridians. I was in tears as I passed the long car line for food pickup the other day.
Lee	Manufacturing	I think the economy needs to be opened asap. Florida has already had 21 days of downward trajectory in new cases. If we follow the task force guidelines we could have entered Phase One 7 days ago. Businesses that can find a way to operate safely can open. That includes restaurants. Let hospitals do elective surgery so they are not laying off workers. Put all the Corona patients in one hospital if necessary. Open the beaches now. Anyone that is susceptible to this virus can stay home. For people under 45 this virus is less dangerous than the flu. There is no reason to keep these people locked down. A permanent solution for many businesses like nail and hair salons, barber shops and even restaurants would be to install a powerful ducted exhaust ventilation system. It could have strong suction at each station or table that would vent to the outside. Vapors from people talking etc would be sucked out of the building. That would be a funded infrastructure project that would make sense. If a virus like this happens again businesses would not have to close.

AMERICAN OVERSIGHT

Sumter	Professional Services	I am a local Hairstylist in The Villages Florida, my concerns are the area I work we have all people that travel and visit family. Area is a retirement community around my salon and I am worried for everyone that comes into the salon. Myself personally can't wear a mask due to heart conditions for long periods of times. In my area we still aren't able to get essential cleaning supplies and would highly suggest all salons remain closed due to not being able sanitize stations or salon and having such close contact with every person that comes into the salon. Shampoos, waxes, cutting and coloring we have to be right on client and that is concerning for a lot of us stylist not only in Florida but everywhere. Please highly consider keeping salons closed at least to phase 2. Thank You
Lee	Healthcare	Please Re-open Florida, Governor DeSantis. The number of deaths and the number of deaths per million are low for a state with the high population of Florida. Speaking as a 64 year old retired person, I want the economy of Floria to be re-opened for the good of ALL Florida people, especially the younger working people and all small, medium, and large business owners and companies. Our Florida jobs are the life blood of the people of our state. We also need to have elective surgeries and all medical appointments available for all of our Florida people. The experts so far have been grossly wrong in their predictions for our country and the state of Florida. Our hospitals have NOT been anywhere close to overwhelmed with Covid 19 patients. The media has scared many Floridians into accepting indefinite quarantine of healthy people. Please encourage people (who are without great health risks) to confidently and carefully enough go about re-opening all business, recreation, and the scope of all medical practice for all Floridians. Thank you, Martha Siegfried, Bonita Springs, FL
Broward	General	Please re-open Florida

AMERICAN OVERSIGHT

Orange	General	Governor DeSantis, My opinion is we have to begin to open our state, safely, of course. Just as we have been shopping now for our essentials, we can also apply those measures of distancing and face coverings on the rest of retail stores and small restaurants. Our hair/nail salons are essential. Those shops can limit the number of customers and the technicians can wear appropriate gloves/masks and practice proper cleaning/disinfection. The loss of jobs in all the small businesses is creating financial and emotional problems which will last a LIFETIME, not a season. We need to speak broadly about keeping up a healthy immune system during this Stay Safe Inside/Quarantine. We need to open up private and/or public areas for some outdoor, healthy activities (keeping distance or limited numbers) especially for our children. Physical education at school, is sometimes the ONLY exercise some children receive. Staying inside, for 6 weeks, watching television and playing video games is unhealthy. It is time to return to care for people who have been unable to seek medical attention for their ongoing mental and/or physical issues. Our hospitals/medical facilities have cut hours of medical personnel since the virus was contained and their positions weren't used, as anticipated. Now is the time for our state to put these health care employees, with safety measures, back to serving their communities. Thank you, Governor DeSantis, for all you have done for Florida.
Palm Beach	General	No, we should not lift the stay at home orders. This is a very dangerous time and we do not have enough information on this virus. Tooo many deaths, reopening is only going to lead to more deaths and why risk it if you have citizens doing what they need to be doing at this point. Why jeopardize any more lives. The deaths are still going up and the cases are still going up. We don't want to have to go through what NY is going through and it could happen because of all the people in South Florida. Just keep doing what we are doing at least for another month to see how the numbers are going.
Alachua	Healthcare	Comment about re-opening FL during COVID19 pandemic: Please listen to the infectious disease/epidemic experts about when and how to reopen, not politicians or lobbyists. Also, essential workers deserve hazard pay.
Palm Beach	General	Open us up! People vulnerable to the virus should still keep distance, but the rest of us need to get back to living our lives. The medical experts always bring the doom and gloom and always are on the side of over-caution, which is not necessarily best. People want to get back to some kind of normal. We just heard the other day that uv rays kill the virus and we are the sunshine state, open the parks, beaches and playgrounds at a minimum. Studies in New York show 20% of 3000 tested have already had the virus...and obviously they survived it. Lethality rate of the virus is far less than we are being led to believe by the fakestream media.

AMERICAN OVERSIGHT

Broward	Education	I believe it is much too early to open up Florida. My concerns include: 1. Taking temperatures is a waste of time due to the many cases with no symptoms. 2, False negatives on virus tests may be as high as 30%. Many people with virus symptoms get false negatives.They can easily spread the virus. 3. Many virus testing personnel have no training, may not be swabbing deep enough in the nose and may be responsible for the false negatives. 4. False negatives make people go back to work since they can't prove they are ill to management. 5. People are sent home who have the virus and are supposed to get better or die. When are they supposed to get treatment?
Miami-Dade	General	This is a difficult decision to make and I can appreciate both side of the argument. The guidelines made by the federal government are weak, but I did like the Gating Criteria of a 14-day downward trend in number of cases or positive tests as a percentage of total tested. I will note; however, that the percentage criteria does not work for me; especially since we have tested such a small percentage of people. Mayor Gimenez remarks about the preliminary finding from the UM antibody research is another story all together. Since it appears that there are more people that have gotten COVID19 than actually known, this places an entirely different dimension on the issue of opening up the state. Granted, there is no “one size fits all” solution here, as every county has its own issues. Being a resident of Miami-Dade; however, we really cannot afford to make the wrong call. Our numbers are not as high as originally projected, but this is due to the stay-at-home order social distancing, and face covering. We live in a country of silly people and we all know that, once the door is opened, way too many people are going to run right through it and not pay attention to any limitations placed on a phased reopening. This is hard for our community and for our economy. We are where we are right now and can’t take it back. I would rather see this go on a bit longer than have to deal with the problem all over again. I like the idea of a 14-day period with downward trend in new cases per day. It is not perfect, but it does provide some support for a decision. I suspect that, were I unemployed or the owner of a small business, my position would be different, but it would be based on what is best for me and not best for the community as a whole. Good luck with this, because you do not want to get this one wrong.
Broward	General	Please do NOT be hasty in reopening Florida only to face even MORE time in lockdown because we did not wait long enough. It's like taking an antibiotic, when things improve a little we are tempted to stop taking it. Guess what? The illness comes back stronger and more resistant to our meds. Take the time needed!

AMERICAN OVERSIGHT

Palm Beach	Healthcare	Even though as a small business owner, the lockdown is hurting my business, I think we should wait til the end of May to reopen the economy and only once we are testing a sufficient amount of the general florida population and not just symptomatic cases or suspected contacts. If you review data from the 1918 flu pandemic, you will see that those states that locked down earlier and lifted lockdowns later had smaller or minimal second waves whereas those states that locked down later and opened earlier had bigger, and in some cases, more significant second waves. We should learn from history. There are potentially two different types of second waves. One second wave would occur very soon after the lockdown is lifted if we did in fact reopen the economy too early. Another second wave would occur later and coincide with the winter flu season. I question if this distinct difference is fully comprehended. If we open early I have no intention on going to any restaurants, hair salons or gyms. Unless we get down to an R0 of less than 1, a second wave is inevitable with further damage to the economy not only due to the greater likelihood of a 2nd lockdown but the fear people will have of coming outside. This will also result in further distrust of anything the government says. It better to get it right the first time around!!! I don't think an alliance with some of our foolish neighboring states who want to open prematurely is not in the best interest of the state of Florida. We have a very different demographic with different population needs and expectations.
Pinellas	General	Before open we need to have the most vulnerable people tested and from this create social rules that everyone needs to comply as wearing mask (compulsory). This is an state of emergency and leaders has to stand to preserve each one life. I propose to incentivize the media to go around and talk to people without mask and develop a "You Shame Campaign". Yesterday at Costco and Aldi 50% of customers did not wear any protection. If you want to kill yourself, you have the right, but you do not have the right to kill other, this is criminal! The economy never die it recovers. People die!
Palm Beach	General	Please do not open Florida at this time. There are too many cases of Covid-19, and until a treatment or vaccine is found, without social distancing more people will fall ill. We see tht some people don't even bother to wear masks.

AMERICAN OVERSIGHT

Pinellas	General	Please make certain we have more than adequate testing at large ports and points of entry like airports and sea ports. People coming and going should be tested. Set up testing at rest stops along major highways. Test those with and without symptoms as symptoms may not have appeared yet and/or they may be of something else besides COVID 19. Allow businesses to be open who provide PPE to all employees and require its usage. Encourage Washington to incorporate this into OSHA. Involve more small businesses and professionals in your decision making. Someon running a billion dollar company who started a business 30 years ago is too out of touch with today's realities, small business financing issues, and small business tax. LASTLY, RAISE TAXES TO PAY FOR THE GREAT SERVICES WE GET. OUR NORMAL SOURCE OF REVENUE WILL BE MISSING FOR OVER A YEAR -- HOTEL, RENTAL CAR AND SALES TAXES PAID BY TOURISTS! HAVE THEM AUTOMATICALLY EXPIRE IN TWO YEARS.
Pinellas	General	Absolutely not. Will we never learn? After the Spanish Flu, you'd think we'd have figured it out.
Miami-Dade	General	For the safety if all, can masks be mandated? Not all places are easy to social distance. Some jobs that are essential like postal processing centers are not doing enough to keep workers safe because it requires employees to work closely, but masks are not required so a lot of people don't use them. This is a place with some reported cases already.
Orange	General	Please don't open premature based on pressure, it would be worse if we opened and had to shut everything down again and potentially have a harder hit than now . We need to open up more Covid and antibody testing sites, especially where those that are homeless or do not have driving capabilities so we can determine how safe a re-open would be. The US and the world is watching and we don't need to set a bad example.
Palm Beach	Government	Listen to the medical professionals- don't rush to open things up too fast - wait until illnesses and deaths have been down for at least 14 days. Better be a little slow than a little fast. Going to early will lead to more deaths and a longer lock down period.

AMERICAN OVERSIGHT

Leon	General	I am not in favor for reopening the state. Not completely anyways. I've had the idea since this all started to have time slots and/or days designated convenient for everyone. Monday and Wednesday for people ages 50 and above. Tuesday and Thursday for the ages 30 to 49 and Friday, Saturday and Sunday designated for people aged 29 and below. Obviously the days can adjust for areas with more seniors or college students. This would protect our most vulnerable. If school isn't safe enough to open, why is it safe to open our entire state? There's roughly 20 million seniors in our state. How many of those suffer from cancer or COPD? It is too dangerous to open our state. Use Jacksonville as a social experiment since the beaches have been open and watch the numbers. Wait about a month and determine if they have increased or not. But opening our state at this time would be detrimental. People do not like to be told what to do and that's why everyone is overreacting and screaming about their rights. Well if they're dead, they won't have any rights. As for me and my family, we'll gladly stay in our home.
Monroe	Tourism	No matter what anyone says or does, the virus cannot possibly be 100% contained. Therefore, spend the time concentrating on educating people on building up their immunity to fight off the virus, which we are only delaying now. We can't stop this, so let's fight it with healthier bodies and attack this hoax a better way. Let us PLEASE get back to enjoying our Constitutional rights, like we are supposed to.

AMERICAN OVERSIGHT

Pinellas	General	I do not believe Florida is ready to re-open as more than 1,300 new cases were reported just yesterday (4/24). You must extend the safer at home order. We are simply not ready. There is much we still do not know about this deadly virus and testing is still very limited in availability. As a recent cancer survivor, I have serious reservations about reopening under these conditions. Even if businesses open, our family will not be patronizing them any time soon. Many critical supplies remain totally unavailable. We cannot purchase any quality medical grade masks as the supply chain is still broken. Any re-open must require everyone to wear masks in public. This country is basically conducting a huge experiment with its citizens by re-opening with no treatment and no vaccine. We have all seen the images of people on the beaches. Many have not and will not effectively social distance. Thus at a minimum, Florida must require masks in public immediately. Also, there are still huge shortages of hand sanitizer and basic cleaning products. It has even been a struggle to find hand soap or paper towels. I want to see significant increases in both testing and critical supplies, and most importantly I want to see low numbers of new cases statewide for at least 14 days before we even talk about a very limited and cautious re-opening. This virus is incredibly contagious and our healthcare system will be quickly overwhelmed if you open at this time, not to mention the deaths and serious health impacts that will be visited upon Floridians. Florida must follow the best science and err on the side of caution. All testing capacity AND components must be in place at high levels, reliable and FDA approved (not unproven antibody tests). Contact tracers must be staffed at numbers more than adequate to do the necessary work. And again, we must actually see consistently low numbers for a sustained period of time (which we do not have) before any restrictions are eased or else Floridians and this economy will pay an even greater and long lasting price. IT is not time to be short-sighted or imprudent.
Broward	General	Open up slowly and starting with open spaces. Keep recommendations to use masks and social distancing.
Pinellas	General	Re opening Florida Safely and with prudence without affecting Public health should be left up to county government with a full throated endorsement from the governor. No Politics and no pandering to the federal government. do what is right for the great state of florida
Palm Beach	Healthcare	The state of Florida should not reopen until we have a sustained period of flattening of the curve for new cases AND we have a robust testing and tracing program in place. The two must work together. Also, we must have full reports on the number of positive cases, not just from state-run testing but all. The residents of the state deserve accurate information and safety. Many thanks.

AMERICAN OVERSIGHT

Broward	Government	Regarding the COVID-19 issue, I'm in favor of opening up Florida as soon as possible. Sweden did not quarantine at all and they seem to be doing well; and, the majority of Sweden's infection cases are traced to immigrants due to their open border policy not a failure to quarantine. I heard the New York Governor state that the quarantine is better than death. This is an ignorant statement. Scientific evidence proves that approximately 98% of people infected with the corona virus recover. Additionally, we need to develop "natural" vaccines known as "antibodies", to COVID-19, which is the most effective public method to defeat it. Lastly, our economy is suffering. Many blue collar workers and small businesses may not ever recover unless we all get back to work. If not, we will be vulnerable to socialism to take over with more "bailouts". Remember: "he who pays the fiddler calls the tune", soon those handing out bailouts will demand we "kowtow" to their demands which will surely be pernicious to our way of life. Therefore, I am more than willing to risk having a COVID-19 infection than to risk our State and Nation falling to socialism.
Lee	Retail	LET US OPEN OUR BUSINESS
Hillsborough	General	We Floridians need to keep the stay at home and essential business only order for another 30 day's at the very least. At the same time, this is a great opportunity for folks to take some REQUIRED online learning. The. REQUIRED learning would be necessary to educate the public on what can and possibly will happen if we do not learn from the mistakes that were made leading up to where we are now. I cannot see a Successful scenario where we just jump back into a public gatherings without social distancing. We must take this very slowly or we will be right back to full on pandemic again. Please Governor DeSantis , keep the state on lock down another 20-30 days. Schools should have the second part of the 2020 year at home as well.

AMERICAN OVERSIGHT

Pinellas	Government	Hello.....Interestingly there was not a safety category thus choice of Gvmt. Historically, people asked to compromise for the good of the overall populace has proven to be ineffective. I'm speaking in recent history. Topics that come to mind: environmental, health insurance, transportation emission changes and not hoarding necessary supplies during a pandemic. From this vantage point, opening up FL and an individual county based on people will do the right thing for the majority is flawed. So the question becomes what mandates are required to open businesses in a different way to ensure safety of all? Not all businesses will come back that's where creative government programs may be of assistance? Think WPA programs from the 1930's and the various other relief programs -- they got people back to work to the benefit of the country - let's think in that direction vs re-open because simply stated not all business CAN be re-opened without major alterations to their business model. So this becomes a business model scenario with a myriad of possibilities - please do NOT leave this to each business to figure out on their own. Beaches = create beach business consortiums to craft what renting chaise lounges and umbrellas will look like in a condensed space. Bars - well that's a real tricky one because alcohol does not so funny things to many people. Agriculture most likely the easiest -- food is a necessity although changes in the food chain will persist again create business groups to brainstorm. Air travel BIG issue without a mandate for all to wear masks - and that's a simply solution isn't it. Clear the path for stranded snow birds to exit the state safely that will lower overall risk for awhile. Enforcement is a requirement for any/all changes - does this mean extra FWC and police will be needed now - yes it most likely does; no problem recruit and get people working. In times when unemployment rates are HIGH identify the gaps and fill them with incentives such as free education to fill the gaps - perhaps educators, infrastructure, or others? Please be creative in your thinking - projections from medical professionals suggest virus(es) will be a recurring event; let's take what we have learned about 'gaps' in the current FL economy as a result of Covid19, evaluate how distancing/close quarters will be woven into our future footprint, and prepare for the next event whether it be another wave of Covid19, a new virus, or rising sea levels. This is a call to action to shift 'the current' to a sustainable future. Think beyond 'the way it

AMERICAN OVERSIGHT

Osceola	Healthcare	Hello.... I came to Florida in March to see a surgeon about having total knee replacement surgery and I had my consultation. The next step was to take the knee replacement class at AdventHealth Celebration Hospital and when I got there they told me the class was cancelled because all “non-essential” surgeries were being postponed until further notice. Okay I understood how the virus had started spreading like wildfire throughout the entire United States so I’d wait it out. Well I’m still here and I’m now being told that if I want to have the surgery done anytime soon I’d have to do it as an Outpatient procedure because the hospital still wasn’t allowing “non-essential” surgeries to be done and they don’t anticipate them being allowed until the beginning to mid June. 1.) If you have ever had a knee that was bone on bone, had spurs that needed to be shaved down and possible ligament or tendon issues I guarantee you would NOT consider it a “non-essential” surgery. I NEED THIS SURGERY ASAP...Please I am begging you. The surgeon’s office even tried to appeal to the hospital and told them the co-morbidities that I have, they told them that I can barely walk, that I need to get home and I’ll still have to be here for 4 weeks after surgery and they FLAT OUT DENIED me. I need Dr. Brad Homan to be granted permission to do my Total Knee Replacement at AdventHealth Celebration Hospital. I thank you for any help you can give me in regards to my surgery. God Bless You Sincerely, Deborah Daniels

AMERICAN OVERSIGHT

Orange	Technology	Florida must continue to adhere to the recommendations set by the vast majority of doctors, healthcare professionals, and healthcare workers and continue to strictly enforce social distancing and closures. We cannot continue to bend the knee to radical, immature, convenient conservatives and place at risk our children, elderly, families, and vulnerable residents. Every time these protesters express their views on the subject it is with ill, selfish, and misinformed information that disregards everything in the way of facts and the beliefs of actual conservative individuals, such as myself. These vocal few who demand we reopen cannot even form a competent argument, when pressured to answer for their actions, that does not devolve into bizarre conspiracy or the equivalent of sacrificing our most vulnerable in the name of the economy. They would rather we mindlessly open ourselves to death than have the Government protect our finances in a manner similar to nearly every other 1st world economy, such as Canada. Where companies are expected to better the country and their communities to be bailed out, instead of blindly bailed out as we are seeing today, here, in the greatest country on Earth, The United States of America. Florida needs to remain closed until we are comfortably on the way to a vaccination program or the majority of residents have already been infected and we have reached herd immunity. It is a crisis that we all are dealing with and can get by, the government must be held accountable to it's citizens, not shareholders of corporations who don't even pay taxes nor abide by the same laws and protections we must endure. Do not give in to these unfortunate few, who fail to see the disastrous future, in a belief of saving the uncomfortable present.

AMERICAN OVERSIGHT

Broward	General	As businesses start opening up we need to be sure that the public and the employees area safe. To do this I recommend the following : 1. We need the government to pass a law that any business that decided to open and has all of the required protection in place, is held harmless from any lawsuit or law enforcement action if a person contracts COVID-19 while at the establish business. currently insurance does not cover this. 2. The businesses should not be open until the level of new cases of COVID-19 are below 10 in the state. 3. You cannot open businesses unless there is proper testing in place (not just equipment that can analyze the testing). This means we need the swabs and regents that are required for testing. We also need to make sure business with 10 or more employees have access to test kits. This is especially needed when the employees may come into contact with the public. 4. OSHA needs to establish procedures to protect and mitigate the virus. They need to have this training available and ALL and any business that wants to open should be required to have all employees take the course and pass the test. 5. Employers need to be held accountable if they do not provide the following to the employeess : a) Washing stations with soap and water - b) Hand sanitizer available. c) Masks d) any other protective equipment relative to the business they are in. 6. Every business that wants to open is required to test employees temperature at the door. This has to include their customers as well. 7. The emplover and emplovee both have an obligation that puts
Orange	Healthcare	I am a pre-medical student in Florida, and to even THINK about reopening the state because uneducated, idiotic, and frankly, stupid people want to go grab haircuts or eat out for dinner is absolutely disgusting. This pandemic has caused the death of over 50,000 Americans. To reopen the state would increase the number of Covid-19 cases and deaths, and I for one would not like to suffer at the hands of another. Neither would our citizens working in healthcare and service. I understand that the economy will suffer, and that citizens need to work to pay for supplies, but if you reopen the state, there will NOT BE ANY CITIZENS left to fix it. Why can't this country be like other nations? Other nations supply their citizens with food, free healthcare, and a variety of other things just so they can stay home during the pandemic. Reopening the state will just prove to the world how dumb Americans are. Again.

AMERICAN OVERSIGHT

Leon	General	Dear Governor DeSantis, Please allow our state to open for business. Small business owners and pay check to pay check employees need their jobs back. We have already learned that this "pandemic" is not a bad or as deadly as the media led us to believe. It in my opinion is no worse than the seasonal flu. Actually, also in my opinion, this was another shot by the Democrats to get President Trump out of the White House. You know, since Russia, Russia, Russia didn't work. Then there was the impeachment which was bull as well. I am tired of this happening again and again. President Trump was duly elected and all the witch hunts must stop. He has done an exceptional job thus far as have you. I did vote for both of you and will vote for you both again but the madness must stop. Allow your people to be free and show how responsible they can and would be. We do not have to be locked away to do the right thing. Thank you, Donna Varnum
St. Johns	General	Since the pandemic, Florida has done the absolute BARE MINIMUM and thats why our numbers continue to rise. If we want this over, we need to keep quarantining so that we can get back to normal in a reasonable amount of time. The longer we keep twiddling our thumbs the longer and worse this will get. I would love nothing more than to spend time with my friends and families and go to the beach but its not worth the risk right now. Especially when our administration is being lax about quarantine and mandatory rules. Please keep the schools and all non essential businesses closed until we get a handle on this and we start to see our numbers drop. We cant possibly open our state back up with cases still on the rise!!
Pinellas	Government	As a life long Florida resident, now retired, it has been extremely difficult to see our fellow Floridians financially and emotionally devastated by the abrupt shutdown due to Covid-19. One close friend that recently opened a small business has been totally shutdown. Another close friend lost her job of 15 years overnight. And then lost her health insurance shortly thereafter. It is time to safely open our Florida businesses to minimize any further negative impact on the residents of our state and our economy. Thank you for working promptly for the benefit of all Floridians.

AMERICAN OVERSIGHT

Miami-Dade	General	Thank you for opening this portal for people to be able to give input. It is critical for the future of our state, neighborhoods, families to start to open business immediately. We are already 3 weeks passed the peak of death count in a state. The whole country passed it. And more and more data shows, that we put shut down in place, where we already were on a way down in a count of people infected with COVID-19. Most of people already infected and immune at this point. As with any flu season, nursing homes should be closed to visitors for now, but schools definitely should be opened, so children will finish building up herd immunity and let parents go to work. We need to look at experience at countries, who did not even do shut down at all, like Sweden, and learn from them. There is no really promising data of when vaccines or treatment will be available, if at all. But we have a climate in a FL on our side. We NEED to open beaches and parks, not only for general health of population, but specifically for mental, that is suffering tremendously. Events with large amounts of people should be postponed, but we need doctors offices and hospitals start doing elective procedures before they will fail under current conditions they are in. The health of population depends on it too. Plus opening businesses now while hospitals are still relatively empty will serve as a buffer in a case of spike of COVID-19 cases. But we need to do it ASAP. Every extra day will carry consequences for months of recovery. Those, who are not comfortable, will stay home. It is their choice. We have already millions of people in FL, who are infected and were asymptomatic or already recovered. They should not be held hostages by the fear of others. We cannot wait to test everybody and loose our livelihood, because we do not know when those test will be available and how reliable they are. We have to go back to life. Otherwise we will loose more lives in a longer terms and financial future for the whole generation.The cure should not be worse than a problem. And we cannot listen to voices of people, who now sit at home and get unemployment benefits, that are higher, that what they were getting by working. Or those, who work form home. Or for all the offices, that are funded by taxpayers money and now closed, but all employees are getting paid and without even salary cuts, like others. Staying home for those is not an issue. Thank you.
Broward	General	As a resident of South Florida, I see how much the virus has spread down here. I understand the importance of trying to bring the economy back to a normal place, but I believe public health comes first. I therefore believe it is important to keep social distancing regulations and closures for non-essential business in effect until the number of new cases per day drops SIGNIFICANTLY and we are at the bottom of the end of the curve. At the point that it is time to begin reopening the non-essential businesses, it will be important to still keep social distancing and mask requirements in effect. Limiting the number of people in those non-essential business will be crucial to ensuring we do not have a resurgence of the virus. Offices where people are working in close proximity to each other should still be required to have some or all employees working from home.
Pasco	General	I’m going to keep it simple...open the state up. Impose necessary precautions...those that want to continue on with their lives will do so, those that what government imposed restrictions can continue to follow.

AMERICAN OVERSIGHT

Collier	Healthcare	To all those anxious to "return to normal" too soon: Please think of your loved ones, and neighbors, as it is evident that you only think of yourself. Wear masks outside of your home when you go to the grocery store or pharmacy. There is no emergency that would require you to shop for anything else! Wash your hands often. Practice social distancing wherever you are. This virus is not gone, is still here, and will rear it's ugly head again in the fall. Let's wait until all Florida residents get tested and the results of those tests acted on. Listen to the science, not some half-assed hunch's from half-assed idiots. And whatever you do, DO NOT DRINK ANY CLOROX PRODUCTS!
Orange	General	I think that Florida should follow the President's phased plan for re-opening. We have come too far to revert and we should be smart about how to proceed. After seeing a 14-day decline, we should re-open businesses that can comply with 6-ft distancing and no more than 10 people; i think those that can work from home should continue to do so (not only to minimize the spread, but also due to school closures and parents not having childcare). If Phase 1 continues to show a decline in cases, then we move to Phase 2 and so on.
Okaloosa	Healthcare	I am an ER nurse. I have been for 30 years. I understand testing is informative but we treat symptoms. I think most businesses can reopen as long as face masks are worn and strict hand hygiene is maintained for most of the population. Immune suppressed, elders, and small children are should continue to be restricted in mixing in groups. People should continue to practice social distancing. Public swimming should be restricted.
Lake	General	Do Not reipen until 10% of people in a region are tested and infection rate is below 0.5%. Shut back down when infection rate raises above 1.0%. Repeat tests every week
Broward	Professional Services	I will strongly recommend that we open up the economy back to normal ASAP. The main reason is that by keeping people isolated in constant fear and stress is weakening their immune system. This makes people more prone and vulnerable to attack of viruses and bacteria. In addition, this will lead to more alcoholism, smoking, depression, perhaps suicide etc as well. This is very opposite of the effect that we are trying to achieve by social isolation. We all sympathize with people who are losing lives but we don't want to create a knock on effect of negative impact on a much larger population of americans.
Hillsborough	Government	We need to reopen our County for business, I understand the importance of public safety, but without economic activity is impossible to sustain the life of our families. We need our people to go back to work.

AMERICAN OVERSIGHT

Brevard	Government	First of all, thank you for your work/service to the citizens of Florida. We voted for Governor DeSantis and will support his re-election for his second term. We are grateful to be in Florida that is governed by a commonsensical governor and real patriot. However, numerous family members and neighbors have been out of work for over a month, still have not received unemployment checks, and have no definitive date on the reopening of our great state. The federal and state China-Virus briefings are saturated with medical/testing updates and yet no update on our unemployment payment system. Our citizens are weary with endless medical/testing reports that can be covered with a couple of Power Point slides and a thee minute report. We desperately need definitive business oriented re-opening schedules/information. The shutting down of our state/nation has done incalculable damage to our economy, security, constitution, freedom and morale of our great country. So yes, resoundingly, the cure has been worse than the China-Virus. Recommendations: 1. Communicate to all media outlets the time and place for all daily re-opening Florida briefings. A consistent time would be advisable. 2. Keep briefings short, factual, positive with clearly defined progressive steps to re-opening Florida. 3. During Briefing Q&A's, solicit real questions from citizens rather than from media only. Most of the media representatives are out-of-touch with citizen's concerns/needs and typically use the Governor's Briefings as target practice. 4. 04 May – Open healthcare operations, elective medical procedures, small businesses, parks, restaurants and full array of worship services. 5. 11 May – Open barbershops, beauty shops, health gyms and massage therapy.
Manatee	Professional Services	Opening Phase 1, should happen May 1, including non-essential surgeries & dental, as well as nail, hair ,massage, and other 1 on 1 services. Hold on phase 2.
Pinellas	Recreation	Re-open all of our beaches. Even if limited. I would like to walk and sit and gain some calm. Spring-breakers have gone home. Thanks.
Palm Beach	General	Beaches and parks should be reopened.

AMERICAN OVERSIGHT

Broward	Healthcare	Both WPLG and the American Red Cross have already expressed interest in participation. 100% of funds would go to the Red Cross: Local celebrities/business leaders would participate in a regularly recurring Red Cross Blood Drive for potential plasma donors. As one of the 'first steps' in modifying social distancing i.e. outside the immediate family would involve adding a friend/acquaintance to the home, one celebrity/business leader would visit the other's home. What better (and more familiar/family-oriented) way than to have participants (properly attired in protective masks/shields) competing in the well-known, iconic board game, Scrabble. Prior to each scheduled event, participants would be publicly announced via WPLG with Blood Drive funds procured in a fashion similar to a Walkathon. In time, participants would be permitted to add a friend (or two) to their traveling entourage. --- With the Task Force's VOICED approval, we'd be happy to proceed and offer further details.
Sumter	Healthcare	Dr Babu of the Orthopaedic Institute was scheduled to give me an Epidural shot on March 23rd, the first day of the no-elective surgery order. It was meant to alleviate severe pain in my spine. I have had to deal with that pain since that day and sincerely hope the no-elective surgery order will be ended as soon as possible. Thanks for your help
Broward	General	ITS TIME TO AT LEAST LET PEOPLE OUT OF THEIR HOUSES TO AT LEAST GO TO A PARK, GO TO BEACH (WE HAVE A LOT OF THESE- STILL SOCIAL DISTANCE), GO TO A POOL, PLAY GOLF, PLAY TENNIS, ANYTHING THAT CAN BE DONE WITH SOCIAL DISTANCING. YOU CANT LOCK PEOPLE AWAY IN THEIR HOMES FOREVER.
Sarasota	General	I just recently retired from teaching in Connecticut and have moved permanently to Florida. I would like the governor to follow the guideline that the Federal Government set up. I would like to see the 14 day downward trend before you open up the state. I am telling you now that if you can't follow those guidelines to protect the health and safety of the citizens you can open up everything and I will not be going to restaurants, hair salons, big box stores or anything else until I feel safe. It is your job as Governor to protect the citizens of Florida. I am a 59 year old female and would like to continue to live in Florida but if the govt of Florida is not responsible to do the correct thing I will be leaving the state. Please do the right thing for are safety and well being.

AMERICAN OVERSIGHT

Lee	General	Slowly start these steps Mid May Hotels-Resorts— start w 20% occupancy Restaurants- start w 20% occupancy Retail - all must wear Masks & provide sanitizer to employees & clients Personal salons etc... one hairdresser only w clients apps spread out Beaches - start slow open to residents in their towns only till Mid May or further unless resort w only 20% occupancy Limit of 10 people at ANYTHING
Lee	General	open the golf courses. safety measures for pins asocial distancing and 1 to a cart . our course has been openand we are overwhelmed by people coming all the way from miami to play. this causes higher risk factor since most are younger people compared to our members.
Orange	Retail	Yes, we should start to open the society. If we focus on closing everything, Can the government provide to all citizens housing, food, and mental health? Furthermore, we are growing a isolated generation. Some students will know and understand themselves and their parents. This is new segregation that we are teaching to our children. If there are elders and underlying health persons, we can ask if they can stay in isolation until a vaccine can be found. However, we need to practice to keep the distances, washing hands, wearing masks, etc. for safety. In school, we need to focus on small class sizes, mixture of online classes and face to face teaching. These actions can apply at work place also.
Seminole	Recreation	I have spent 12 years building my small gymnastics training facility. In Seminole county. We have been closed since March 16th. I have applied for and received a PPP loan, which will last until the middle of July hopefully. However, the public is so scared that I don't know if my business will survive even after we are "allowed" to open. The economy has been destroyed along with my business and the people are too scared to come out of their homes. Florida is a big state with 21 million people and .001 people have had this virus. How does this make sense to anyone that uses logic and not emotions to think? Please allow businesses to try to salvage our lively hoods. (I won't even address the over reaching government and mob rule that we have allowed to happen)

AMERICAN OVERSIGHT

Seminole	General	It is time to reopen Florida. People need to go back to work and resume their lives. Who is paying for us to sit home and be idle? Our children and grandchildren will be paying dearly for this. I don't think the numbers support the drastic measures that have been taken. The same could have been accomplished with restrictions on masks, hand washing and social distancing rather than the punitive measures taken and supported with scare tactics by the government and media. Why are we not putting the responsibility for taking care with the individual rather than big government? Government's job should have been to be more prepared for a potential epidemic with PPE and hospital beds enough to handle it. I understand the need to protect the vulnerable but this has gone way too far for the rest of us for way too long. I have tried to submit this 4 times now, this is working as well as the unemployment website evidently.
Hillsborough	General	I believe that Florida must develop a set of key health indicators, based on hard data, to establish when “reopening” is safer and appropriate. I also believe that Florida’s top economic priority should be fixing its shameful unemployment compensation system in order to provide emergency support to the millions out of work - leadership on this matter in particular has been terribly incompetent.
Volusia	Information	I heard the governor comment that the fact that the percentage of those testing positive going down is a positive sign. It is neither a positive nor a negative. The governor can't be expected to interpret the data, but whomever gave him this information is giving him very incomplete information at best and possibly just bad information. Please get in touch if you need help understanding the data. No charge.
Polk	General	I appreciate the work the task force is doing to create a plan for the re-opening of Florida. Further I greatly appreciate the work Governor Desantis has done to limit as much as he could the closure of Florida in order to minimize the economic impact on Florida. When considering the recent studies indicating the number of individuals who have had the virus is actually much higher, and also comparing the rate of spread verses the approach to the virus in Sweden and the US, it is time to reopen the state of Florida. Tennessee's model is a good example (although maybe a little slow) of a multi phase plan to be fully reopened (assume things continue to improve) by mid-June.
Volusia	General	We need to go back to work governor, the cost of this quarantine may prove worse than any loss Covid 19 delivers...
Hillsborough	Tourism	Taking it slow on the opener is the wise approach. In the meantime, lock down the GA border.
Polk	Healthcare	We want to open our church immediately with Social distancing (6 feet apart). We have attenders that have been suicidal and baker acted 2 times, and many of the others are dealing with depression. They need liberty to worship!

AMERICAN OVERSIGHT

Hillsborough	Professional Services	We need to start a soft opening ASAP. people are suffering mentally. Dr appts canceled. Routine procedures cancelled. I have a staff of 22 and we will have to lay them Off since business is down 80 percent. We are in the recruiting business. I also own a horse farm and our business is down 90 percent for lessons yet we still have to feed the horses. This was about flatting the curve which has been. Clovid 19 is not going away but we must be able to start to bring some normalcy to peoples lives and businesses
Collier	General	Businesses should consider reopening with a plan to maintain social distancing
Leon	Retail	Used item stores and donated items stores are much more hazardous to the community than new goods retailers such as Walmart and Target. If Retail reopens, thrift shops such as Goodwill, Salvation Army etc. should be opened 7-14 days after new goods clothing retailers such as Kohl's reopen. Thrift stores DO NOT wash donated goods before placing them out to sell to consumers. The vast majority of employees at charity and thrift stores and used clothing stores do not have health insurance and would be forced to work and hide any illness they may have to make a living once their unemployment benefits are taken from them through reopening the stores prematurely. The employees work in highly crowded back of store operations preparing donated items and share common bathrooms. Often, donations come from homes and senior care facilities that have had recent deaths or have been evicted. Donations include kitchen goods, toiletries, and intimate apparel and are NOT washed after they are donated. They are put on the shelves without sanitizing processes. The environment at thrift stores is a natural breeding ground for germs and viruses. Many customers of thrift and charity stores are older than 65 and/or disabled and especially vulnerable to lingering viruses that may still be active on donated items. Before stores such as Goodwill and Salvation Army are reopened they should be required to follow recommended sanitization procedures and leave donated items in quarantine for 72 hours prior to putting out for sale to consumers. Without these requirements, the thrift stores will become breeding grounds for viruses- much more so than Walmart and Publix that do not have donated and used goods. The employees at Salvation Army and Goodwill, etc. are far safer at home until proper procedures can be guaranteed. Financially, they are better off on unemployment due to the federal unemployment benefits through the 2020 CARES Act. Please consider charity and thrift stores as a special category of retail that should not be reopened as soon as large retailers. It will save lives to delay their reopening until it can be done safely and

AMERICAN OVERSIGHT

Hernando	Healthcare	My 3 year old son has a genetic dental condition that requires special treatment or his teeth will deteriorate with rapid wear. During this time of Safer at home, we have been unable to proceed with treatment because multiple dentists have been hesitant to treat him as an emergency case. His condition requires preventative care so that he is not an emergency case. I have paid 2 months of my dental premium (300$) without the ability to have him treated for his condition. Please reopen dental offices for standard treatment immediately so that his case does not become an actually emergency case. As a single income (11 year state employee) family of 5 and foster parents, our children are our number 1 concern and we would do anything to be able to take him to a dentist for his preventative work. Thank you for strong leadership and guidance through these difficult times.
Miami-Dade	Government	OPEN THE STATE BACK UP. If people are worried they can stay home. Its too many people out of work to continue this the state is build mainly on the industries that are shut down. We need the sunshine. The beach is one of the safest places to be right now, easy to social distance, plenty of vitamin D, plus we live and pay our taxes mainly for the right to get to the beach, THE SUNSHINE STATE. OPEN UP PLEASE ASAP
Okaloosa	General	Emphasize (or even mandate) mask wearing in essential places such as grocery stores, pharmacies, and other places for workers and shoppers. I understand the need for businesses to open but this needs to be done safely and I can tell already in our area that everyone is geared up to open the doors wide open May 1st when the stay at home order ends. This seems to be happening without respect for suggested phases of re-opening. Clarification needs to be made regarding organized youth teams as they are already beginning to reconvene. As far as I have heard we have not gotten new orders from the governor so our county seems to be gearing up for business as usual May 1st. What happened to new infections numbers needing to downtrend for two weeks before phase one begins? Short term rentals should be one of the last things to re-open as it is hard enough as it is for locals to get the groceries they need.
Lake	General	I think that the state should set metrics such as cases per capita (a better metric than just number of cases), testing results (% positive; % with antibodies), and hospitalization rates vs. capacity to guide re-opening decisions. These statistics should be done on a regional basis as conditions can be (and are) quite different in Southeast Florida counties (Miami-Dade, Broward, Palm Beach) vs Central Florida (Orange, Lake, Osceola, Seminole, Sumter, Marion). I'm not sure how many Florida regions should be identified but probably at least 4 or 5. That way actions will be responsive to local issues and conditions. The state is too large and varied for a "one size fits all" policy. This may not be practical for all types of policy decisions but should be useful in terms of balancing risk/reward for high contact businesses such as gyms, nail and hair salons, restaurants, bars, etc.

AMERICAN OVERSIGHT

St. Johns	General	In my opinion, slow and steady wins the race. It is too soon to re-open Florida. Baby steps must be taken. Until we have rapid testing FOR ALL, and a plan for isolation for those that may test positive but be asymptomatic, it is far too soon to open up movie theaters, bowling alleys, inside dining, sporting venues, nail and hair salons, tattoo parlors, etc. I have been doing my part by working from home (thankfully able to do that) and social distancing, even from my sons who are in law enforcement and other family members. I do not want the sacrifices I and my family have already made to be for nothing. I would like testing for law enforcement generally (my son cannot even get masks, glove or sanitizer currently), all health care workers and grocery store clerks and even for myself whether symptomatic or not before I can go back to work with some peace of mind. What about testing for antibodies? If we had that and could ensure that those who may be positive and asymptomatic could keep from causing harm to others, that's a start. I am all for getting things back to "normal" but not at the cost of more lives or overwhelming our health care system. Also get the unemployment benefit sites up and running first. So many friends laid off or furloughed and unable to even access the site, much less see a first check. I am a 4th generation Floridan and proud of my State. Let's not make a mistake that we cannot come back from.
Pinellas	General	I believe the state can start being opened in geographic sections. The panhandle, Central Florida, Tampa/St Pete. etc. Beaches and outdoor activity areas should be opened to allow people to get fresh air and exercise. Social distancing would still apply. The reopening should be the reverse of the closings; restaurants at 50%, etc. As data improves, specific cities and/or counties can be opened more, in response to improved data.
Lee	Real Estate	Greetings....Small business owner's & their employee's are the backbone to our economy in SW Florida....these are the people who purchase homes, condo's, manufactured homes & lease properties year round from realtor's like myself & pay the needed sales taxes to flow to the city & county budgets....I also personally own 5 rental properties & need these properties occupied for cash flow...we need all of the small businesses open full-time while practicing social distancing to keep our economy thriving. Lodging, restaurants, pubs, salons, cosmetology, fitness,, etc need to be open or Lee County will see foreclosures & eviction rates rise like 2008 - 2010 again...Allowing 50% occupancy to start is better than "Out of Business" signs thru out the community. Yes, people over 65 with health issues should shelter in place as much as possible....don't penalize the other 95% who are healthy & pump up the local economy!!!!...let's get SW Florida back on track May 1!!!....Thank you!

AMERICAN OVERSIGHT

Miami-Dade	Accommodation	Please open up our economy . from all the studies being done this virus will have the same death rate as the Flu or maybe twice as deadly. Should we sacrifice the well being of all Floridians for 120k deaths across the US. I want to rehire my employees I laid off about 40% of my staff from Miami to Orlando. We need to get their jobs back we need Disney and Universal open. We need our beaches, world class dinning, retail, and all entertainment open before May 15th lets not lose track that more people will die due to Tabaco and alcohol then this virus Open us back up!
Pasco	Education	It is getting ridiculous how long everything is being closed. Approximately 1% of Florida's population has ever been reported with Coronavirus and we are all paying for it. In Pasco County there have been a little over 200 people ever reported and most of them are over it now. We are all having to pay for some people who are sick and we are being treated as if everyone is sick. It's ridiculous how the media has so many people scared of their friends, neighbors, and strangers - 99% or more of which have never had a problem. Of corse people need to be careful and stay in if they are sick and wash their hands often - but PLEASE open Florida back up again! Everything, including schools need to go back to normal. Kids are missing out on once-in-a-lifetime milestones and opportunities because the adults are making the decisions for them.
Pinellas	Tourism	Reopen the beaches asap. Sunlight/Solar has once again been proven to kill the virus. Keeping the beaches closed is ludicrous. Albeit You'll probably have to EO the Pinellas Co. Chair Pat Gerard. She's a rotten selfish corrupt individual. Meanwhile 75% of the state is also out of work. She doesn't care.
Broward	General	Open golf courses, tennis courts, parks with people wearing appropriate covering. If Walmart and Target can stay open, why not shops and small businesses. If is unfair to small business to let people shop for things other than food in those stores. I will never go into a Walmart or Target again.
Broward	General	I believe we need to reopen businesses as soon as safely possible so that people who are suffering greatly financially can get back to work. I believe if people can be responsible and keep social distancing or wearing face masks in public buildings, we can get back to work. Also encouraging proper handwashing and use of hand sanitizer in the absence of soap and water. And of course staying home if you think you are sick. I also think we need to open county parks/state parks as soon as possible to allow people to enjoy the open public space/nature.

AMERICAN OVERSIGHT

Collier	General	Sir, Please consider opening up the State business's. Not full bore like nothing happened, that would invite trouble. Must keep social distancing and use sanitary/disinfectant wipes, masks and anything else for protection. We do not yet know who's had it, who currently has it but asymptomatic or who may have had it and has antibodies. Every person in Florida needs to covid 19 test and especially the antibody test. I know my wife had it back before we even heard about it (January). She had all the symptoms and was doing in-home breathing treatments as she has lung issues. Hence I was exposed and later realized I had a few of the symptoms and was down for about 3 days. My wife was down for 2 weeks. She is a medical Professional and I'm in Site Development. Both ready to retire & don't need this crud !! People need their jobs and paychecks Everything within reason needs to open with restrictions, safety & disinfectant everywhere. Thank You, Craig Granchi
Broward	Recreation	I believe reopening can only be done after sufficient testing has been accomplished. Testing of people who do not exhibit symptoms, especially young people because they are the most dangerous in terms of spreading, is essential to know the virus behavior. We are no near that and only scratched the surface. The administration MUST institute testing programs on a grand scale so ANYONE can be tested. Not doing that will only delay reopening of the economy and endanger the life of people. We hope the Governor is listening and NOT listening to the President who hasn't got a clue! P.S.- Typical of implementations here and across the country I have been unable to even submit my comments. This is the third attempt in 2 hours!
Orange	General	Open Florida and keep social distancing in tact. For salons, make stations 6 feet apart, service one client at a time, disinfect in between services. For retail, like a Home Goods or Macys, limit inventory and redesign stores with more space between aisles. For restaurants, open at half capacity. And for goodness sake, open the parks and tennis courts!

AMERICAN OVERSIGHT

Orange	General	Please refer to reliable, scientific, unbiased data in regards to when to "reopen" the state of Florida. I am a mental health professional, and I am also someone who is immunocompromised. I have spent hundreds of hours over the last six weeks helping Floridians process their anxiety, fear, trauma, loss, and grief during this time and most people do not have the necessary resources to recover from a debilitating disease if they were to be exposed. Our state already does a terrible job of caring vulnerable people. We are in no position to make it worse. Please step out of the President's pocket and think about the people you were elected to serve. The best leaders are servants, and this seems to have been forgotten. Please remember who you are here to serve. https://www.npr.org/sections/health-shots/2020/04/25/844088634/when-is-it-safe-to-ease-social-distancing-heres-what-one-model-says-for-each-sta
Santa Rosa	Professional Services	I'm retired but I have 2 children that are 50 .(twins) One in a hair Salon and the other in a spa. They both are afraid of going back to early because neither job can be done safely with the 6 foot.rule. They both think the Georgia Phase one is very scary with the salons & spas. They are very anxious to go back to work and will if called to do so but are afraid as Santa Rose and Escambia Counties are both very tourist orientated with out of state vacationers who are a lot of their clients.
Broward	General	This is regarding the reopening of Florida while we're still dealing with COVID-19. I strongly recommend that we keep Florida shut down as the virus still poses a threat to our population particularly here in South Florida. Perhaps in other counties where the virus has peaked and is coming down and the infection count has been low consistently, there is opportunity to open parks, some business that can effectively social distance and maybe even some schools (but teachers and all of those working in those establishments need to be tested first and then tested periodically). As hard as it is for many out of work, the health of Floridians and our economic futures ought to prevail. If we move too quickly to reopen and the virus bounces back with even more vengeance, the economic impact will be even more devastating . . . let's wait until the end of May and see what the trend lines are looking like then.
Charlotte	Real Estate	Thank you for opening this up to public commenting. Why not permit the local pharmacists, example, at Walgreens, to do corona virus testing, as they do flu shots? Many people are afraid to return to work, to eat at restaurants, etc. without available and regular testing.

AMERICAN OVERSIGHT

Hillsborough	General	So much for the buck stops here and having decision making abilities but here goes...It is too soon to open the state! People will not follow recommendations, they will only follow orders and even that is iffy. We are not ready to re-open the state. It is unfortunate but unless there are mandatory orders to wear masks in public and very few businesses re-opened, it is just not time yet. We don't want another wave to come back and put us back at square one!! Please think this through and do not let politics or party lines drive your decision. Be smart, look at the politics of what is driving the re-opening and do not be one of the sheep. Up until the coronavirus I was surprisingly impressed by your leadership but I have been disappointed since then. You should have closed the beaches and you cowered. Turn it around and show Florida what you're made of! Lead us and show the nation that we are not Flor-I-duh!!!
Hillsborough	Healthcare	While it is wonderful that our state and locality's rate of increase has plateaued, it has not decreased in a sustained fashion to fit the guidelines put forth by public health entities for beginning re-opening businesses at high-risk of contributing to spread of the virus. I think it is incredibly irresponsible that there is such a sudden push to reopen "normal life" while we are only just (for a couple of weeks) seeing the impact of the measures to begin with and still do not have an effective treatment for those most severely impacted. Shame on us if we re-open things in an unsafe manner to get back to "normal life" at the expense of human health and lives.
Miami-Dade	General	Floridians - including very politically active and engaged Republicans like me - trusted Gov. DeSantis when he said Florida would open on Friday May 1st. The medical data is good and improving. Hospitals are mostly emply and were never overwhelmed. There is no good reason to continue the lockdown. The economic and psychological and political (people are becoming more accustomed to the idea of being submissive and dependent on goverment) is already catastrophic. Stick to Friday May 1st. Do not move the goalposts. I can see a couple of exceptions: stadiums and movie theaters. NOTHING ELSE is justified. Allow Everything else to open at 9am on Friday May 1st. No restrictions: restaurants, bars, everything. Life must get back to normal ASAP. Floridians will care for the sick - as we always have and always will.
Collier	General	I believe Florida should start re-opening immediately. As long as CDC guidelines can be followed, businesses and activities (i.e., beaches) should be opened following those guidelines.

AMERICAN OVERSIGHT

Orange	General	My husband and I have been very proud of how you have handled all of this for our great state. We are greatly bothered that people from other states are trying to tell us how to run our beaches, parks, etc. If you are not from Florida and only travel here once in awhile you would have NO Idea how large and diverse Florida is. We are not just Miami and DisneyWorld. My Husband is a 6th generation Floridian from Madison, Fl. Most people have no idea where that is in Florida unless you are from North Florida area. Comparing what we should close and open in Madison to Miami would be ridiculous. So our opinion is you have to look at this county by county. Another great example, we reside in Windermere but also have a condo at New Smyrna Beach. Those 2 places are completely different and would probably not open on the same schedule. We have been staying at the condo most of the time since shutdown. The news makes it sound like the beaches are packed, WELL they are not! There is plenty of room to spread out. When the beaches were shut people were jammed up on the sidewalks trying to keep distance, but it is very difficult on a sidewalk and not at all on the beach. Honestly most of the folks on New Smyrma are 60 plus years old. I am totally in favor of restaurants opening and having tables apart and outdoor seating. So many restaurants have outdoor seating already and could use that space well. I am tired of New Yorkers trying to tell us HOW to Live. They have no clue how spread out our state is and how diverse...this in NOT NEW YORK or the Jersey Shore. Thanks for listening and realizing that we 70 year olds are ready to go back to Church, out to dinner and enjoy our family and friends. We pray for you Governor DeSantis and ask God to give you wisdom as you lead our great state. Sincerely,

AMERICAN OVERSIGHT

Pasco	General	I appreciate all Governor Desantis is doing. However, I would like to see the Governor and his task force address virtual calls or distance visits to love ones in nursing homes, assisted living facilities and hospitals. My mom is 89, in an alf and has dementia. I am unable to do face time with her because the facility she is in has not pursued it, but fortunately can have phone calls. I would like to see testing ramped up at some level, so that we can visit her, since this is imperative to her emotional and physical well being, and I don't know how much longer she will live. I have not seen her for 6 weeks and prior to this saw her every day. Each facility is obviously making their own decisions about this, and I think it should be across the board that there should be some way to physically see each other, since this affects our loved ones and us as well. Caretakers have no way to follow up on our loved ones, since we are not there. Fortunately, my mom is in a location where no virus has been found, to my knowledge. This situation has obviously gone terribly wrong at some facilities, and that has to be addressed by the State consistently, because these businesses will all do what they deem is right or fair because they don't want the threat of lawsuits, so the State should be monitoring them. I am grateful to be able to work from home. Although financially I am fine, I know others that are not so fortunate. There has to be a way to reopen at levels where people can get back to normal living so their mental and physical health does not suffer from this just as much, if not more so, than that the individual would from the virus. If someone that has no income becomes depressed, they will have other issues that could be just as bad if not worse for them. Thank you for the chance to send my comments.
Miami-Dade	General	The people needs to work . The economic impact and collective depression is going to be worst than Covid 19 . We need to re start the economy ASAP. I understand should be gradually but do not delay to much time or we are going to collapse . Thank you
Hillsborough	Healthcare	Please allow doctors dentists and eye Care professionals to go back to work. These people support laboratories who are suffering for lack of routine testing such as pap smears and biopsies. I work in a laboratory that may furlough me if things don't get going again. I do not want to join the millions filing for unemployment. Thank you.

AMERICAN OVERSIGHT

St. Johns	General	Most of the Covid-19 phenomenon seems to be Media driven. If I were to rely on my local community for information the Covid-19 would not exist. I don't know anyone who has it and no one I know knows anyone who has it. However a lot of people have allergies and the ubiquitous springtime NF cough. A few people I know have had mild flu for a couple of days. I think the govt and other wanna be controllers have latched on to this for their benefit at the expense of the FL citizen. Experts that know nothing are everywhere. Just let the adult make their own decision about what they do. If you can't make a law to force me to go to a restaurant they how can you restrict unalienable rights of pursuit of happiness going to a restaurant? For my perceived safety is not a valid reason. Right of assembly is specifically mentioned in the bill of rights. You are treading close to the cliff on a slippery slope.
Palm Beach	General	WOULD ASK THAT BEACHES, PARKS AND GOLF COURSES BE OPENED AS SOON AS POSSIBLE. SOCIAL DISTANCING SHOULD ALWAYS BE ENCOURAGED. PEOPLE SHOULD STILL HAVE THE RIGHT TO DECIDE WHAT IS SAFE. WE ARE ALL AWARE OF THE DANGERS AND SHOULD BE RESPONSIBLE FOR OUR OWN SAFETY.
Palm Beach	General	I think that the public has been educated about the virus and ways to minimize its effect. The stay at home orders were put in place to make sure that the hospitals were not over run and overburdened. This has not happened so it is time to trust your citizens and reopen the state. There is no reason that pools can not be opened for swimming (given guidelines) the beach also can be reopened immediately with social distancing of course. Golf courses, tennis courts all of these things should open tomorrow in my opinion. The goal was to help hospitals not wait for no new cases. Restaurants, retail stores etc can open too, when they have put safeguards in place (like register shields, servers with masks etc). People know the dangers and will work to limit contact. our endangered population will not put them selves in harms way until they feel that the risk is low for them. It is time for the government to trust its citizens and give them back the freedom of choice.
St. Johns	General	Florida needs to be fully re-opened immediately. Covid is here to stay. We cannot send it back to China. We must all be exposed and develop immunity; it is the only way forward. Our hospitals are less full than they were before the pandemic. It is time to allow our businesses to get back to doing business so there is a quality of life for our citizens and children. Floridians are intelligent and have the right to decide for themselves how to proceed. REOPEN FLORIDA IMMEDIATELY AND FULLY!

AMERICAN OVERSIGHT

Brevard	Healthcare	Elective dental care should be postponed until the CDC and ADA create new guidelines and offices have time to receive the new necessary PPE and policies. Dental providers are the highest risk of exposure due to proximity to patients and aerosols created. Patient care rooms are small with no filters or way of removing aerosols between patients, which are known to stay in the air for 3 hours. Minimizing aerosols can be done through avoiding certain procedures (ie use of handpiece and ultrasonic scaler) but then patients are not being treated with the standard of care. This being said, I also believe that the list of vulnerable patients should be expanded to include those who are pregnant. Not enough research has been done to completely rule out that women infected with COVID-19 in their first and second trimesters will continue to have healthy pregnancies and babies. The majority of research at this time affected third trimester babies.
Hillsborough	General	The public health experts recommend far more widespread testing, and two weeks of declining cases, before any change in stay-at-home orders is considered. Florida has NO IDEA how many asymptomatic virus carriers a re-opening will put back out in our communities, infecting their friends, neighbors, and clients/customers, if we re-open businesses too early. We already have too many people flouting the recommendation to wear masks, and keeping at least 6' away from others. Please add some public health experts to your task force and give their, the CDC's, and the World Health Organization's expert opinions the deciding votes in your planning. If a too early reopening prompts a second, more deadly wave of deaths, YOU will be responsible for putting short term economic interests over citizens' health.
Broward	General	Re open Florida Now
Lee	General	Re-open Florida Comment. Follow CDC Reopening guidance to the letter. Never substitute what you think you know for what the CDC does know. Never follow the guidance of the President. Every morning say to yourself out loud “Roy Haber’s life depends on the decisions I make today”
Broward	Recreation	There are no spaces more wide open, with less people than parks, golf courses and the beaches. They need to be re-opened. Thank you.
Broward	General	I want Florida to follow the scientific Federal Guidelines for reopening the state with even more restrictive measures based on the characteristic of our population (elderly and those in the country illegally). It should be made clear to those in the country illegally that they can have food and medical care without fear of being deported. Strict rules should be developed for nursing home safety, to supplement those already in place, based on the impact of the coronavirus. Uniform rules should be developed for the state as to how many should be in a business that is open as well as additional safety protocols (such as hand washing, temperature checks, use of face masks and social distancing. We need more testing and we need to verify the truth about antibodies in a person's system. With so many elderly people here we need to make sure we know how many asymptomatic people we have before we even begin to think about opening up the state.

AMERICAN OVERSIGHT

Pasco	General	Couldn't we use percentages to determine relative safety? For example; match a county's population against the number of infected people. Come up with a percentage that is considered reasonable and then authorize business as usual. Continue monitoring and if the percentage becomes unreasonable, take an appropriate action. Monitoring the entire state as one rather than by county is not fair. Also, if a business wants to enforce employees AND patrons to wear approved masks and gloves BEFORE entering the establishment, wouldn't that be effective??? Add to this a substantial fine to the establishment if they don't follow the rules
Sumter	General	Hello, I am a resident of Sumter County and a voter. I would like to express the fact that based upon the behaviors I have seen from fellow citizens, that we shouldn't take a broad reopen step at this time. Many of my friends who are in the medical field and the real estate field and even a family member who works in an accounting firm in Collier County do not feel we are ready. Our cases are climbing and many of us are afraid of what this may mean. The economy is suffering but there will be even more suffering if people are unwell, dying and medically challenged. You would please a great many who believe this and are Trump supporters as well...Also, many of our services have remained open anyway. Unlike the train wreck in Georgia. Thank You....
Lee	General	Don't open nonessential businesses until medical professionals say it is safe to do so. Creating a second wave could create a real setback making things even worse than they have been. Buying more time may allow for new developments and a better read on the actual rate of infection through increased testing. Please!
Pinellas	Administrative	It is time to open the state! Let people get back to work and back to their lives. The people who are immune compromised should take extra precautions as they always have in their lives and let the healthy people get back to living life. We were out and about today and people were in the water, fishing, etc. Not one person had a mask on, because they know they are healthy and they are ready to live!! The media coverage of this has instilled fear in the world like I have never seen in my lifetime! Common sense is out the window and fear is the order of the day. It is time to live life and go back to work. Take precautions, wash your hands, open the beaches and if people get sick, which they will, let them heal.

AMERICAN OVERSIGHT

Broward	General	Personally, I do not think it is a great idea to reopen Florida in the beginning of may due to the increasing numbers of death and individuals catching the virus already. In many other states, they have pushed the closure of state till May 15th or later. Therefore, we could prevent more people from getting the virus as well. Please think for the people, it would be safer if the state continues to be in lockdown mode. I am in Broward County and own a local business in Plantation which offer massage services, there is no way that my employees can stay away for 6 feet or more. This will be hard for me and others like me to restart the business. We need more time to figure out how to proceed these issues. I have two elders that I need to take care of at home and a daughter that is in college, I would like to stay safe for them. Summertime is near and it would be more difficult to prevent the virus spreading, because most people would bring their kids out. Then it will be harder to prevent the virus from spreading. In addition, Broward County has a high number of people getting the virus, it would benefit the state and the people to stay in lockdown for a little bit longer. Please consider and thank you!
Volusia	General	Dear Governor DeSantis and members of the Re-Open Florida Task Force: Thank you for the humility shown in seeking the opinion of those for whom you serve: the residents of the amazing State of Florida. While my reasons for re-opening Florida are several, I would like to share just one that is affecting our family in a negative way. My amazing, hard-working (government-employed) husband and father of our seven children has been working at home since the Stay-at-Home order was put into effect. I have been attempting to help my middle school and high school children navigate their online schooling, while also working to help my Kindergarten student with her school and keeping my toddler content and quiet. I am also an essential financial worker in the education field, trying to keep up with my job. This time has added much stress to our family. Telling my toddler to keep quiet as her Daddy is on an important conference call; telling my children that their Daddy is off-limits while working in our bedroom, when this is usually their safe place; dealing with a stressed out husband and father; my husband having 24-hour access to his work that he is usually able to leave "at the office". Please, let those who desire to work return to work. And, let those who are high-risk or nervous about the epidemic stay home for a bit longer. Let my husband and I have a night out to dinner; let me take my little children to the park; let my big kids ride their bikes to the basketball court; let my oldest son who just graduated with his AA take his TEAS test so that he can pursue his dream of being a pediatric nurse practitioner; let my children see their grandparents (PLEASE let my children see their grandparents. My kids miss them, and mine and my husband's parents miss their grandchildren so much!). Thank you for your hard work for our state. I recognize that there are many who will attack you if you make a decision with which they do not agree, and that puts added pressure on you all. Please know that you are in my prayers, and I am trusting that God is guiding you through this.

AMERICAN OVERSIGHT

Seminole	Finance	I am 100% operational from home so the shut down doesn't affect me personally (other than I am not spending any discretionary income that I normally would) but we if we don't re-open the economy ASAP many people won't have businesses to go back to. We can re-open businesses safely and smartly without continuing the economic hardship many are facing right now.
Martin	Professional Services	As a business owner, I am requesting to open up Florida's "economy" by 5/1 in Martin County. Thank you
Orange	General	Before opening the State for business there should be a specific and detailed plan specifying mandatory and consequential obligations and responsibilities incumbent on "all" businesses. For example; if an individual employee, director, owner, etc of any business has been notified of or if he/she believes that another individual of the business is possibly sick, there should be an immediate test administered. Also, before any non-employee enters an establishment he/she should be administered a test establishing their lack of the Covid-19 virus. Lastly and thereafter, everyone should be required to submit to a temperature test before entering any establishment and be identified from a central database showing you have not tested positive within the previous three day period. In other words, everyone should show results obtained within this three day timeframe. I believe it to be a disgrace that we not be able to monitor and control this outbreak ever again. We all as individuals should have the right and more importantly, the belief that our government and employers and business establishments are doing whatever is necessary to secure the safety and well being of its' most important asset, its' human capital. For the better part of the last month me and my family and friends have been responsibly confined to our home surroundings with exceptions only to secure basic necessities such as food, doctor appointments, etc., and I do not believe that neither I nor anyone else should ever have to endure such measures again if they can be avoided through responsible behaviors mandated by the powers that be. EVERYONE SHOULD BE TESTED AND THEN EVERYONE tested again, and then tested at the first sign of any potential Covid-19 symptoms. This just seems like common sense. It may seem a costly venture however, we deem ourselves rightfully so, to be such a rich and wealthy nation, and to be clear, the biggest, richest, wealthiest, and best, we should therefore invest some of our great wealth into what makes us the BEST, our own human capital to preserve what we have.
Pinellas	General	I believe that Florida should be re-opened as quickly as it is safe to do so. We the people can figure out how to be safe when going to stores, parks, beaches and shops. I think the governments of the world overreacted and did terrible damage to our collective economies.

AMERICAN OVERSIGHT

Highlands	General	Dear Gov DeSantis, As an active constituent of Highlands County and the state of Florida, I implore you to put forth and enact a plan to reopen Florida AS SOON AS POSSIBLE beginning no later than May 1 upon 30 day lockdown order expiration. Out of a population of 21,670,000 in the state of Florida, we have had only 1,055 deaths, many of which are being incorrectly reported as COVID deaths, when they are not. Even so, that is a mere 0.005% of our population. Florida's cases are at 30,000, which is 0.14%. LESS THAN A QUARTER OF A PERCENT. Most of those are mild cases with a 98% recovery rate! This number is not a pandemic by definition. A pandemic is an outbreak "which has affected a significant portion of the population". 0.14% is NOT A SIGNIFICANT PORTION. Knowing new facts that have come out which include the terribly flawed "models" by which all decisions were made, the death rate of this virus being 55% less than previously thought, the survival rate being close to 98%, most cases mild to asymptomatic, Dr Fauci now stating in the New England Journal of Medicine that this virus is actually much more like a "seasonal flu", and considering the main reason we were told we were forced to stay at home in the first place: to keep our hospitals from being overrun which has not happened at all. In fact, NONE of our hospitals are even close to capacity and many are furloughing nurses, physician assists, and physicians. Being that that was the reason for the lockdown, it is neither reasonable NOR CONSTITUTIONAL to do anything other than allow all businesses to open, parks to open, beaches to open as they see fit. The citizens in my community have behaved appropriately and we have been in forced proximity to only our immediate families for over 40+ days. Parents need to work, people need to live, children need to play. Please stop forcing an agenda of fear upon our city. We are no longer afraid of the virus, the concern now is for the mental well being and financial well being of our city and state. The government at any level (county, state, federal), does NOT have the power to legally take constitutional rights and liberties away from the people when it is ABSOLUTELY NOT JUSTIFIED. The state and local governments MUST CEASE AND DESIST the abuse of power and control of Floridians. Further continued stay at

AMERICAN OVERSIGHT

Seminole	General	Florida workers should not be forced to risk their lives because nonessential businesses were reopened too soon. What are you doing to ensure their safety? People who are unemployed deserve better than the broken unemployment system currently in place, and with rent and mortgages due next week, what are you doing to get them the money they've spent weeks unsuccessfully applying for and not receiving? What doctors are you consulting? Have you seen the data on strokes and heart attacks tied to COVID-19? How will you ensure, after weeks of being told to look for respiratory symptoms, that people with other critical symptoms get the testing and healthcare they need so they aren't dying at home? How can you be confident reopening the state when we don't have widespread testing and contact tracing in place? When the laws regarding quarantining individuals vary county-by-county? Seminole County merely fines a person with a positive COVID-19 test $500 for leaving their home and infecting others. Why isn't there statewide guidance on this? Even if you reopen soon, my family and those of many others I know will not be spending our money on anything more than urgently needed essentials, and will be isolating at home regardless of the state relaxing its stay-at-home order. We do not trust you to make a decision that is in our best interest. If you reopen soon, you will be risking priceless human lives for a minuscule return on taxes and business revenue.
Palm Beach	Recreation	Please re-open the golf courses in South Florida. In addition to the health benefits, Golf is one of the few sports that can be played while complying fully with social distancing requirements. It's fine to require no rakes, no touching poles, longer spacing between group starting times, even no rental carts, etc. The idea that its ok to walk outside but not play golf makes no sense. Further - a significant number of people work in this industry and continuing the prohibition risks the demise of their employers. Thank you.

AMERICAN OVERSIGHT

Seminole	General	I believe that to reopen Florida the state must have an extensive testing (both for the virus and for anti-bodies), tracking and quarantining program. As tests from around the country show that the numbers of persons who have contracted the virus without symptoms increases (latest test results from NY show greater than 20% there) in almost all instances more and more of those persons should be able to return to relatively normal lives and those who cannot return to their previous work are available to safely help implement the testing, tracking and quarantine program or other programs to help those who have been impacted the most. For example a California support program pays restaurants and out of work restaurant workers to make meals for the elderly. We could implement and expand a program like that in Florida to also help all persons who are incurring food insecurity. We would need funding from the Federal government but we will need help anyway due to the lost revenue from the great decreases in our travel and hospitality industries. This type of program would also help keep people in Florida so that as businesses reopen, and people start frequenting the businesses, workers will still be there to help Florida recover as quickly as possible. The testing, tracking and quarantine program can be successful, one day last week the program in South Korea had a total of nine - 9 - new cases. That amount can be easily managed and the cost of a program like that compared to the cost of our current shut down is pennies to dollars. Just reopening without a program isn't going to work if a large number of people still stay home out of fear. Without a testing/tracking/quarantine program we will end up with businesses closing a few weeks later than if we didn't reopen at all and additional uncontrolled waves of cases of the virus forcing everyone back into their homes. Also in my opinion all of this changes if a reliable treatment for the virus becomes available. With a treatment I believe the situation becomes more of a "perfection being the enemy of good". With a reliable treatment for those who do not have an underlying health condition, we can modify/focus the testing/tracking/quarantine program on those most in danger and the rest of the populous can go back their lives. It will be a new normal but at least a functional one. Also once a vaccine is developed then we can deal with this almost like we deal with the flu. Numbers-wise it kind of like a race between which occurs first, a drop off in cases due to herd immunity
Pinellas	Retail	do not open business yet. at least until may 30th. don't risk our health

AMERICAN OVERSIGHT

Orange	General	Hi There- SO my opinion may differ from many, I AM NOT a business owner, I am the spouse of a Cardiac ICU nurse who's entire floor has been turned into a COVID unit. I AM a bartender who works at two bars- local, small businesses in the city, I DO have an autoimmune disease. I AM also a nursing major myself. With that being said; I want everything to open up and go back to normal ASAP, is that possible- NO. If we open up the slightest bit too soon, we will be in a repetitive circle of quarantine and isolation. If we continue to wait it out just a little longer I think reopening up the state will be easier and smoother, more steps forward, not 2 forward and 3 back. While the ICU floor census has gone down, and we may have " peaked " the number of cases we have is still continuing to grow. As a population, we cannot rely on our neighbors to make the right decision. If you decide to open up bars and restaurants too early, people will rush to them, just like they do after a hurricane curfew. Unforunately the virus will spike again and we will be back where we are. My husband and I don't sleep in the same bed, we don't touch each other, I hear the horror stories of people and their families, what happened on shift the night before- that alone scares me straight into staying home. Not everyone has this sake insight. They don't have loved ones and friends on the front lines. They don't know someone directly impacted by the virus itself. It's scary. I don't want to be forced into going back to work, that probably wont be operating at capacity, and risk being infected and continuing to pass the virus, when we could wait a few more weeks until it has slowed.We have been successful in flattening the curve, but that does not mean to give up all precautions. I look at friends who live abroad, who were placed in locked down before us, and are still in one- but here we are trying to open up ASAP because profit over people in the U.S. Please make the right decision in keeping us safe. Fix unemployment so the people who are starving and struggling, aren't pressured to get back to work, even if they don't feel safe doing so. Please make the right decision- the virus isn't going away anytime soon, our protectors are you. It is literally in your hands- I don't want my family and loved ones meeting my husband in ICU and passing alone.
Leon	General	After 14 days of declining cases, 'what we really need ... for phase one, is to be able to identify, isolate, contact trace..... That is something that we absolutely need to do." Anthony Fauci Coronavirus Task Force Your task force wouldn't go against best medical practices, would it?
Hernando	Education	Please put the Health of Florida Citizens First over the Economic Concerns! You have the opportunity to do this the Right Way! If we reopen to early this could become catastrophic to our State and Country! Lives before Dollars !
Lee	General	open the golf courses. ours is open in lee and we are overwhelmed with young people coming from miami to play - not right
Seminole	Administrative	I think opening needs to be done slowly. While economics is very important, it is as important that it is not rushed into & we end up right back where we started or worse with this virus. It needs to be done correctly because our Counties, State & National economy can not Take a hit like this again. Our hospitals, & staff & first responders have given their all,. Our local governments are in danger of shutting down, so do this correctly. The State needs to help local governmental offices such as the Clerk of Court, County & City Police Depts. & many more. Anarchy will ensue if local, county & state office close down. I practice God will grant you wisdom & guidance in your decisions.

AMERICAN OVERSIGHT

Manatee	Tourism	We have to get back to work. This state relies on the tourism industry, as does my business. All of the big businesses have taken the government financial aid intended for small business, we have been left with nothing to support ourselves or our dying businesses. The unemployment system in Florida is broken and we are struggling pay our bills and feed our families. You opened our beaches yet keep the parking lots closed only so that local law enforcement can give citations to people who are parking, it makes no sense what you are doing. We are sick and tired of governors playing politics. Stop following suit with what other governors are doing and just do what is right, fair and safe for this state. And please, do it now!
Hillsborough	Healthcare	We have been at this for 6 weeks and most of us have done our part. I think we need to start re-opening, being as smart and safe as we can. We have to move on. We can not sit here forever.
Pinellas	Government	Please do not fully reopen the state of Florida. We are still seeing increases in cases. The risk is too great to public health. If we had more certainty regarding how this virus works and how to combat it, I would have different feedback. It's way too early to open the state up to visitors. Just one asymptomatic visitor to the state and we'll reignite the pandemic in the state and it could be even worse than what we have now. There is a need to address the mental health aspects of this virus as being in quarantine and "safer at home" is giving people problems with coping with isolation. However, it has been shown time and time again that some people are not following protocols and are actually putting others at risk With all of this in mind, there has to be a balance of needs and a lot of creativity to resolve the issue of reopening Florida. Whether it is having the "non-essential" businesses rotate being open with limited capacities for people in the buildings or other ideas from smarter folks than I, something has to be done to keep our most vulnerable safe from the virus and safe from mental health crisis. Thank you for the opportunity to provide feedback.
Broward	General	While of course safety is important, the economy and people's livelihoods and quality of life are important too. Please do not listen to the people living in fear. Please find a workable compromise to re-open the state as soon as possible, in stages, that allows for more freedom and choice for individuals. But please please please, fix the unemployment system!!! I can't file a claim, and I can't get through to get help with that. I'm sure you're aware that thousands of people have the same problem. It's still going to be a slow process of returning to work and seeking new employment if necessary, even with beginning the reopening.

AMERICAN OVERSIGHT

Indian River	Food	Lets get restaurants open now! Reduce capacity in the short term so social distancing is easier. Require workers to wear mask. Explore using sealed disposable utensils. Waiting for a table must be done outside using social distancing. Touch less payment options. Tons of ways to limit exposure and still let businesses function. Lets get this going!!!!
Palm Beach	Recreation	Dear Governor, thank you for this opportunity to weigh in on the reopening plans. I appreciate your willingness to hear from citizens and local leaders alike. I strongly urge you to exert your influence with our County Mayor regarding the restriction on golf in our county. Specifically private clubs. There are two reasons why I feel the ban on golf and tennis at private clubs is unreasonable. First, golfers follow the rules and, prior to the ban, we had complied with all necessary and appropriate safety precautions. One person per cart, no rakes in the sand traps, no touching of flag sticks, hand sanitizer stations throughout the club, etc. No food and beverage service as well. A typical golf hole is 7 acres and we would have at most 8 people on a hole. Social distancing at its best. Secondly, as you are aware member clubs (501.C7) are not covered by the federal payroll protection plans. Therefore, our employees who are in food and beverage (servers, bartenders, cooks, dishwashers, etc), golf operations, administration, golf course maintenance, and facility maintenance are being supported by a club that cannot generate any revenue. We will not be able to do that forever and then these employees will join the growing ranks of the unemployed and the state/federal government will support them with unemployment assistance. Thank you again for your consideration and for your leadership during this crisis. Charles Zacharias Bear Lakes Country Club, West Palm Beach FL 561-301-6232 cz8764@gmail.com

AMERICAN OVERSIGHT

Collier	General	When making this decision, please research and consider the long term public health outcomes that will result from the current state of poverty, unemployment and financial stress. While we are faced with a very serious short term health crisis, the current way of life is creating long term consequences that will also negatively impact exponentially more people than this virus will ever kill. The very real long term impacts must be considered against the short term wins and that is the true risk-benefit analysis. I have great anxiety of the long term effects to come from keeping millions out of work and in social isolation. As a society, we need to think long term when we are making these decisions. We should absolutely work to keep our most vulnerable safe, but are we really keeping our most vulnerable safe right now? Is everyone actually 'safer at home'? The answer is NO. I think we should focus on finding ways that we can assist our seniors and other at-risk citizens to stay 'safe at home' while allowing the rest of society to resume somewhat regular routines. Additionally, we must again think long term and consider that most of the people who are vulnerable to this current virus have underlying health conditions which can likely be managed by improved diet and exercise!! How will we work to address that issue so we don't have to worry about a healthcare surge in the future? Will we do more to encourage people to eat well and exercise? Will we encourage more collaboration between traditional and allopathic medicine so they can work together to keep everyone healthy? If our society were 'healthier', this virus would not be such a big deal because our healthcare system could truly care for the most vulnerable without fear of being overwhelmed. Thank you for your service and leading us through this difficult and unknown time.
Duval	General	I have been a resident of the State of Florida since 1991. I am a disabled veteran. I am in one of the high risk categories for COV-19. Individuals wanted parks and beaches reopened for exercise. This has been accomplished and people seem to be able to maintain the recommended 6 ft distance. However, opening up gyms seems a bit reckless. People can still safely exercise without the opening of gyms. Prior to these big gym chains opening people exercised outside. The general public does not have access to the N95 masks because first responders and healthcare workers need this equipment. The mask that are made out of fabric with no filter provide a false sense of security. There is no vaccine, no proven medication to treat this disease. I want to feel safe when I return to work. Right now, the only place that I feel safe is at home because I can control my environment. I can't control the environment of others. I was able to work from home prior to the pandemic. I would encourage you to encourage business leaders to continue to allow their employees to work from home to continue to flatten the curve and those that cannot work from home to ensure the safety of all employees and their families. At some point, if the morality rate continues to rise, families will eventually begin seek compensation via lawsuits because their family member died due to COV-19. Please adhere to the guidelines outlined by the WHO, CDC and others in the medical field that have determined it is not save to let the guard down so fast. Look at the data, stick with the recommendations. A very concerned citizen.

AMERICAN OVERSIGHT

Miami-Dade	General	Fund the Bridge Loan program again but set aside 30% specifically for minority owned businesses. Limit the number of companies that can apply for the Bridge Loan funds that is owned by the same subsidiary. Fund loans in the areas that have the highest number of individuals that have tested positive. Fast track capital projects. Make certain that the guidelines are the same for businesses reopening from city to city and county to county.
Flagler	General	Reopen the whole state. Just protect everyone in the long term facilities. You need to have people live in the facilities for the next 2 months and no visitors. That way, those people are completely protected. Pay the people additional money to stay there. Anyone that has a preexisting condition should stay inside in there home. Have all food delivered and all medicines delivered. Doctor visits can be done via phone or web meetings. The healthy and able can get the state back to work. All data shows from all states, the only ones going to the hospital are ones that have preexisting conditions. So protect them, especially the ones in long term facilities and let the rest of us reopen the state. Only 63 deaths in Florida for people Less than 54 years old and they had preexisting conditions. We need to reopen the state because we will lose almost all the mom and pop businesses. We can do this. Just make sure people don't enter Florida from other states and we will be fine. The reason we closed the state was to not overwhelm the hospitals. Prior to Covid, hospitals were at 65% capacity, and they never went over that since Covid hit Florida. Open the state up.
Lee	Real Estate	Good evening Mr. Governor, I am writing to urge Governor Ron DeSantis to re-open the state of Florida as safely as possible. This shutdown has caused much more harm to lives than the virus ever will. It is time to open up again so we can restore the economy the best we can. I think that overall, the majority of the state wants to get back to work. We can no longer live in fear. Thank you for all your hard work throughout this crisis. I understand there have been some bumps and other are not happy but you have done a great job Mr. Governor. Thanks, Frank Glaab

AMERICAN OVERSIGHT

Miami-Dade	General	Follow the advice of doctors, epidemiologists and other scientists . That should be the first priority and the primary consideration. Do not do anything until the medical and science experts say it is safe, and then only under conditions they recommend Protection of the workers and the public must be the paramount consideration In order to know how to protect people, we need widespread testing, many times more than we have now Mandatory masks, gloves, hand sanitizer, handwashing stations and breaks, and social distancing for all employees and clients of any business that opens. This includes all businesses - farms, factories, health care. It includes all workers - from the cleaning people and sanitation workers, warehouse workers, field workers, to the head of the company. It includes independent contractors Enact provisions that make it possible for workers (including independent contractors) who might pose a danger to fellow employees or clients to stay home - including, but not limited to Paid sick leave, either from the employer, if they can afford it in this situation, or from the state, for all employees who are sick (even mild symptoms) or live with or have regular contact with someone who is sick or who is vulnerable due to age or infirmity. Financial assistance to employers (grants, not loans) to make it possible for them to provide necessary protection and benefits Food support - surplus food should go to people who need it, not just wasted Expand healthcare including medicare and medicaid Fix the unemployment system immediately. Provide substantial unemployment insurance benefits to workers. No work search requirement for however long it takes for the doctors to declare it
Hillsborough	Education	I do not want to see public spaces opened widely until COVID-19 testing is much more highly available. I am a teacher, and would not feel comfortable returning myself to the school building, nor having my severely intellectually disabled students returning, without regular testing. These students inherently are more challenged with practicing safe social distancing and personal hygiene. In addition, my second job is at Home Depot, an essential retailer. There, customers do not always respect the 6 ft. distancing, and many do not wear masks or take other precautions. Due to the high volume of customers we have had during this time, I do not feel safe working at Home Depot when customers are there until regular testing has been implemented. I have developed some symptoms of COVID-19, am in self-quarantine via doctor advice, although I tested negative for COVID-19 last week. I have some viral respiratory illness that increases my vulnerability to other infections, including COVID-19. I wonder if I will be able to get tested again if I develop additional symptoms. My spouse has multiple high-risk characteristics, I do not want to infect them.
Highlands	General	I'm in favor of opening our county safely back up. We need our people back to work. And my opinion only this blown way out of per portion.

AMERICAN OVERSIGHT

Manatee	General	Please do not re-open the State of Florida, especially to tourism. I saw that the Task Force is comprised mostly of hospitality industry leaders. My opinion is based on recommendations from health care providers. I value their interest in my health and well-being much more than a politician or a business professional. People from across the country and around the world will congregate in beautiful, sunny Florida, not knowing they are bringing the virus with them. They are not going to self-quarantine! (They are not traveling here to sit in a hotel.). And the virus will spread. If you open up our state to tourism, I believe you will be creating a new Hot Spot. We don't understand this virus yet. From the onset we've heard that it mostly impacts the elderly or the immunocompromised. Now we are hearing about strokes in 20- and 30-year olds and children suffering with this disease. We need to learn more about this virus before we throw caution to the wind. The sooner you open up the state, the longer those at risk or those who prefer not to come in contact with this virus will be forced to stay at home. I cannot imagine the outrage that will occur when you have to lock things down again. Give it more time so we can understand everything that could happen. And so we can understand the behavior of this virus. Our lives are more important than a balance sheet.
Sarasota	General	Please keep the state closed! There is too much at risk to open things back up so quickly. Please value human lives over money. Like we say during hurricanes we can always rebuild but we can not replace a life.
Hillsborough	General	Re-open Florida! The long term cost of keeping Florida closed will be detrimental to not only the economy but the mental health of adults and kids alike. People can choose to stay home as long as they like if they feel their health is in danger. But we need to re-open Florida. Let the people choose if they want to go out and eat at a restaurant. Let the residents of Florida choose if they want to see a movie at the theater. Let the people choose whether they want to stay indoors, or go out and live their life. Re-open Florida ASAP!
Manatee	General	Please don't let the cure be worse than the disease. It is destroying the state's economy to be on lock down. Those at risk should stay home and the rest of us should go back to work. The government should provide test kits to the public as soon as possible and those who are sick or even have symptoms should stay home. Life is never completely risk free.

AMERICAN OVERSIGHT

County	Area of Interest	Comments
Lee		The Honorable Ron Desantis, Governor of Florida, This is a very complex and humanitarian situation, but my suggestion is to allow only those visitors or family members that have a proof that they took the COVID-19 Test in the last 3 days with negative results. A copy of the results need to be disclosed prior entering the long term facility, and the visitors/family members need to follow up the CDC guidance in the facility,; surgical masks, globes, distance, etc... This visitation can be established in a specific area for the purpose of visitation and screening.
Hillsborough		We have been so lucky in this community with very few cases. Our Director has followed all the safety rules. WHY take any chances now? I can see if someone is extremely ill or dying, some way should be provided for family to visit in very controlled conditions.

AMERICAN OVERSIGHT

Highlands

Please help us help our loved ones that can't help themselves. We are their voice and also their hands, eyes, ears and feet. We need to be allowed in to check on their living environment. I know the staff at my Mom's ALF is a caring group and has done an awesome job under difficult circumstances but the residents are not their family. And their job is to take care of all the residents my job is my Mom only. It's time to allow us the opportunity to help our loved ones, time is limited for most. Staff can come and go with procedures so can we. It is to our best interest to follow the rules and procedures. Also it's our duty to make our loved ones feel loved and cared for now and for the rest of their days. Thanks for understanding our plea. Time is short. Thousands of students and staff are returning to the classrooms all over the US...if they can do it we can do it too. 🙏 This is America, home of the free and the brave. Let's stand together to be brave enough to do what is right by our older generation. They deserve their freedom many of them fought for it.

AMERICAN OVERSIGHT

Miami-Dade	Please know to be isolated like this is no different than being in solitary confinement. No one to eat with. No fresh air. Feeling as though their family has deserted them. What good is it to live longer? Why protect them from death if they are in a living hell. My mother got Covid anyway. Managed to live through it and now has bedsores as no one put her in a chair. This is a death sentence, this isolation. Death from Covid would be quicker. Start out slow with one caregiver:family member allowed. You have maintenance and nurses and housekeeping and CNAs going home every night and out all weekend. Being tested every two weeks leaves almost three weeks of the unknown with our loved ones. Why can we not see them? Please!!!!
Collier	Please stop talking just about the "vulnerable elderly" and remember that there are young disabled people who have also been locked up in isolation for 5 months. Many of them have no co-morbidities, but are physically or intellectually disabled. We have let the prisoners out of prison but have locked up the elderly and the disabled. There is no reason for this. First we gave medical facilities a financial incentive under the CARES Act to declare everything to be COVID, and then we were surprised when the numbers increased. My 26 year old daughter sustained a traumatic brain injury in February. She is non-verbal and needs substantial therapy. She needs one designated caregiver to visit in person. This lengthy isolation has caused greater damage than a virus with a 99.5% survival rate, and it must end now. Let's figure out how one visitor per patient can have access to visit with testing and PPE, inside or outside. Other states are far ahead of us. Let's stop messing around and take action now. We are running out of time.

AMERICAN OVERSIGHT

Pinellas	Hi my name is Ian i live in a group home called adult care housing Which is in Pinellas county fl I would like to know when will we know more about reopening the grouphomes and be able to start seeing our families and friends and girlfriend again PS Ian c Puccio
Hillsborough	The only thing about the isolation lock down in Florida is the "Consistent Inconsistencies." There are no guidelines and those in place are being interpreted differently across the state and within areas. The ability to visit our loved ones needs to be of an urgent nature for well-being all the way around. 1) Consider Essential Caregiver designation to get something started immediately for our loved ones. Time is of the essence. 2) Guidelines that are clear, including an agreed upon golden standard best rapid test for visitors, staff, etc. needs to be decided on. Even the test kits being sent by the federal government are being disputed for accuracy and best practice. 3) Guidelines that are clear from the top and with the Health Department, that seems to ever changing. Every facility is interpreting things in their own way. Example: If I can go inside my Mother's facility to have a meeting about my concerns, but I can't see her, makes no sense. My mother's facility will also not consider outside visitation, but others have various forms of it. Another facility is allowing residents to leave after a negative covid test and then come back in 10 days later after visiting family with another negative covid test. Some facilities 4) Allowing those in long term care or other lock down facilities, to have the right for at least one family member or health surrogate to be with them in a hospital situation. This is adding fuel to the fire without having any advocacy for our loved ones.

AMERICAN OVERSIGHT

Collier	Family members should be allowed to see loved ones. They should be screened and have temperatures taken. Social isolation, Anxiety, and depression all have profound effects on chronic illness and can predispose our elderly population to an early death not to mention extremely poor quality of life.
Collier	It is imperative that we allow our residents of long term care facilities and assisted living facilities to see their family members if they so choose. Those facilities with low to zero Covid cases should allow family to enter after thorough screening and temperature checks. Perhaps limiting the visitors to no more than two and maintaining social distancing from others as well as wearing a mask for their entire stay. Perhaps appointments could be taken so as to limit the number of visitors in the facility at any given time. Social isolation can profoundly effect psychosocial wellbeing and exacerbate chronic illness. As we have seen throughout the spring summer rates of anxiety, depression, and even suicide have increased. While it is of utmost importance to protect the vulnerable, they also crave love and kinship in the form of visits from family and friends. Many a birthday and holiday have passed without the presence of their loved ones. Facilities allowing visitors should be individualized based upon community transmission rates and positivity rates.
Collier	I had to move my mother into an assisted living facility, and it's very hard on both of us. I feel if I wear the same mask, gloves etc that the care givers are wearing I should be allowed into my mother's apartment.

AMERICAN OVERSIGHT

Lee

Good Morning,
My family removed my mother from an assisted living facility largely because she was isolated (I fear no physical activity will kill her) and visitation was severely limited (outdoors for a very short time).
My questions are as follows:
1. Could dining facilities be opened so residents can eat with others (socially distanced) so residents can have at least some contact with others in the facility?
2. To reduce load on the staff, I would be willing to visit mom by speaking to her at her window (one story facility) where this would be possible - and not require staff participation to assist with moving her outdoors.
3. Residents need to have the ability to move out of their rooms to exercise and engage other residents and friends. Even if time is limited - every day.

Thank you for considering these issues.
Sincerely,
Ronald J Melvin

Lee

Do you think the emotional effects of people in long term care, even in rehab for a broken hip not being able to see loved ones is causing health problems to both the patient and the loved ones.My mother is in the hospital.I can visit her twice a day.She begged me not to leave yesterday.They want to send her to rehab.I will not be able to visit her if they do.I would like to see at least one person to be able to visit.

AMERICAN OVERSIGHT

Collier	i know staff are essential caregivers but so are family members . not enough people have antibodies so afamily member should be treated like astaff member- tested every two weeks. we should be aloud to see our loved ones on a daily basis as the staff does while wearing a mask. the virus will be here awhile and our loved ones are lonely and confused by our absence. they are elderly and time is running out for many of them. i am sure many of us would be willing to pay for the test if it would allow us to be with our loved ones.
Charlotte	My dad is in an assisted living He is 92 years old and we almost lost him in October I don't know how much time I have left to be with him anyhow my biggest complaint is he is a World War II veteran and his brother was a p o w I am concerned about the fact that he is now locked up in his room and premises and how that might affect him mentally . This is no way to treat a WW2 veteran!! It is very hard not to see your own parent it's not right and I can have tests I can have my temperature taken just like anyone else it's not fair that caregivers people from caregiver agencies are able to go see him anytime they want it's just not right I understand you want to protect him but this is ridiculous. If I knew this could happen I never would have let him move into an assisted living!! Thank you. Unless you are going thru this you should not be making decisions for family members! Let them in!!!!!

AMERICAN OVERSIGHT

Lee

I am an entertainer at various nursing homes who has been out of work since March 12th. In order to work at the majority of them I have to pay monthly for their security log in and out service and have a chest xray I pay for. Am I going to have to be tested at each facility to go back to work? This is one more burden and cost on myself a small business operator. Is it possible to return to entertaining at facilities that have outside areas to perform in without being tested at every location? This has been something the residents have looked forward to and participated in on a monthly basis. Thankyou.

AMERICAN OVERSIGHT

Palm Beach

Please please authorize outdoor screened distanced visits immediately. This is relatively low risk, does not required testing because of distancing, and would give significant reassurance for our loved ones.

Within one month of start of lockdown, my 95 year old mother, in this isolation, experienced profound cognitive decline, cannot perform tasks of daily living, can no longer speak on phone, use TV remote, tell time...this may be the end of her life and she is frightened and constantly agitated. I have hired private duty aides at an annualized cost of $150,000, which i cannot personally sustain.

When someone assists my mom and i can speak with her by phone, she begs and pleads with me to come and see her. She cannot hear well and masks make that more challenging. The masks (absolutely essential) eliminate visual cues to understanding language and make it impossible for residents to recognize staff members.

My mom is frightened, alone and isolated. She needs comfort and reassurance from family members. Video phone calls are too frightening and overwhelming. If you find this not credible, please accept that cognitive impairment due to aging changes everything that we take for granted in our daily lives.

I'm not asking for increased risk, but distanced outdoor visits can be done carefully and safely now with minimal staff oversight. Please help us.

AMERICAN OVERSIGHT

Seminole

In addition to my previous email that asks the Task Force to take action NOW and set the appropriate guidelines to open ALFs and SNFs for family visitation.

Needed action:

1) the designation of an Essential Family Caregiver who can visit regularly and

2) Rapid COVID Testing at every long-term care facility

And my plea to help me obtain access to regularly visit my wife - before it's TOO LATE!

I also request that the Task Force recommend the use of clear face mask and face shields among all personnel (and Essential Family Caregivers) that will allow the residents to see their full facial expressions. As Secretary for Lions of District 35-O Hearing Program (Central Florida) I have already sent out in the last two months 955 clear face masks and face shields originally intended to the deaf and hearing impaired who depended on reading lips. During a recent Google Duo call with my wife Nancy in Memory Care, she actually paid attention to my image on the iPad with the staff member commenting on how much it would help them associate with the residents allowing their smiles to be seen.
Yes - let's improve the quality of life for residents in ALFs/SNFs highly recommending clear face masks and face shields!

AMERICAN OVERSIGHT

Escambia	Suggestions from an email I wrote to my fathers ALF in May, Thank you for your consideration. I do not have to tell you how difficult these policies have been to manage to for yourself and your staff but most especially, the unintended consequences they have had for the ALF residents you care for daily. As it relates to my father specifically, I am referring to the multiple phone calls he has placed to both my brother and myself over the last 6 weeks where he has been depressed to the point of uncontrollable tears & even hysteria. This is extremely uncommon behavior for him and we are extremely concerned for his mental and emotional health. In a very rare moment this week, he called me and the person on the other end of the phone was the man who raised me. I have not had a conversation with that person in a long time. He said he is aware that he is where he belongs but that he cannot help the severe bouts of depression, frustration & anxiety brought on by sheer boredom & loneliness & being completely deprived of the company of his family. As heartbreaking as that phone call was, even more heartbreaking was when I saw him last through the door at your facility; the deep sadness that I saw in his eyes was unlike any thing I have ever seen in the eyes of another human being in my life. I cried for days suffering over what to do about it and I am crying now as I write this. Please understand that I know this is not your doing or your fault but I AM BEGGING YOU: If there's anything you can do at this time to
Leon	These fscilities are obsolete. Warehousing the infirmed is a inhumane method of caring for the elderly. Home care is best. And state should care for homeless in small community enviornments. Eldercare villages staffed with licensed staff.
Lee	Well children from other states be allowed to come visit their parents in the nursing home

AMERICAN OVERSIGHT

Seminole	Why are the numbers of COVID-19 cases listed on the LTCF report each day not cumulative? It can be really misleading when you are concerned about how bad an outbreak has been at a facility.
Lee	My dad lives in a senior living community in Bonita Springs. The testing for current health care workers has been a nightmare. It takes sometimes over a week to get results, preventing them from going into the facility. Consequently there is a shortage of badly needed health care givers. Improved testing/results provided would be essential in the current situation as well as reopening the facilities.
Hillsborough	For screening purposes, have you considered temperature screening kiosks? Also, in regards to possible inside visits I would like to know the difference between staff or families going into the facility if they are all screened and wearing PPE?

AMERICAN OVERSIGHT

Nassau

Suggestions from a visiting nurse.
For the visitors, temp check, exposure check list , hand washing, shoes covers, surgical mask, plastic face shield. Limit visits to one area of facility. Begin with 1 hour visits twice a week and then reassess every 7 days.
For patients, hand washing before and after , surgical mask, temp check.
Ask for volunteers to assist with monitoring and screening of visitors or utilize staff or agency nurses.
Also, a paper copy of a negative COVID19 test performed in the past 14 days.
These are the rules for visiting clinicians at most facilities. I would argue that family members offer no greater risk than visiting clinicians other than the increased amount of people entering facilities. They have a vested interest in keeping that facility free from infection.
The loss of human contact and isolation is causing irreparable harm. The loss of life and financial impact of increased illness and injury, related to isolation and reduced assistance from family members can no longer be overlooked. The unintended consequences of the lockdowns are horrific, please allow some compromises. I am a nurse and I have no family or friends that are patients in a facility. My professional opinion is that this is bad medical care, this is bad policy, this is inhumane. Change must happen, we cannot continue to treat these people as property to be protected. They are human beings with a right to dignity and compassion.

AMERICAN OVERSIGHT

Alachua

I doubt that there is currently a safe way to reopen facilities. The contat and spread is an issue, with anyone entering the facilities. Just look at the fact that workers are showing up with the novel coronavirus and then ask how can you make it "safe".

Once you forget making it safe you realize that many older persons in these facilities have gone months without seeing or touching family members. That is posing anohter health risk.

With the latest research from UF showing airborn spread of the virus we really have to look at the options. Ventilation is of utmost importance, each room must be negative pressure not allowing the virus to drift from the room. Then we have to make certain that halls do now allow the spread of virus to anyone's rooms.

It would seem our designs over the past 50 years eliminating windows that open is causing an issue. Central air if used must have UVC steralization. Visiting area's should of course be outside, yet that alone is not assurance of someone asymtomatic spreading the virsus into and across a facility.

If would seem the only safe way to allow visitation is with a same day virus test, allowing only individuals that test virus free in to visite within a 24 hour period of the test. That would require running screenings at the facility with immediate results.

AMERICAN OVERSIGHT

Alachua	I miss seeing my mother, who will be 90 in September. However, I do not see a way to safely reopen facilities. As much as I would love to see her, neither she nor I would want to responsible for the deaths of other residents so that we can celebrate together. Death rates in FL are still going up, though cases seem to be stabilizing. We expect cases to go up quickly statewide once K-12 schools reopen, given patterns in Georgia and other states. In Alachua County, once UF reopens, cases are likely to skyrocket from that as well. In short, then, this is absolutely the wrong time to be having a discussion about reopening.
Alachua Duval	Visitation suggestion - One family member in appropriate PPE several times a week. Essential caregiver designation for family member of resident who can visit following the same guidelines as staff. It shouldn't matter whether there is Covid in the building or not if they follow the same guidelines. Visit can be in the residents room and can be for 1-2 hours at least and at least several times a week. Can start with assigning the designation to a family member if they have been already visiting on a regular basis. NO plexiglass or 6 foot distance. This DOES NOT work for dementia patients anymore than it would for a small child.

AMERICAN OVERSIGHT

Lee	Please allow family members inside with PPE and negative COVID test-not just antibody test. Most of us have been super vigilant in protecting ourselves from contracting the virus and we should be allowed in without having the antibody. I was an essential caregiver for my mom but unfortunately we lost her on July 22 due to complications from Parkinson's. I had not seen her in person since March 13. My dad is now grieving the loss of his wife of 72 years inside the ALF where they lived together-without his children by his side. My sister and I need to see him in person to help him through the grieving process. We will never again be able to hug our mom-please let us hug our dad and share our grief for our beloved mom.
Broward	MY WIFE, SALLY, SUFFERS FROM DEMENTIA AND IS IN SEASIDE COVE ROOM 2013 AT JOHN KNOX VILLAGE WHERE WE HAVE RESIDED SINCE 2004. I HAVE BEEN UNABLE TO VISIT HER THERE FOR OVER 5 MONTHS. THIS IS A HARDSHIP FOR BOTH OF US. THERE MUST BE A "COVID-SAFE" METHOD THAT ALLOWS VISITS BETWEEN SPOUSES; ESPECIALLY WHEN THE SPOUSE RESIDES INDEPENDENTLY AT THE SAME CCRC.

AMERICAN OVERSIGHT

Sarasota

We suggest outdoor visits, with masks. Fresh air would do the residents good as would seeing a friend or family member.

No visitors indoors unless the resident is totally unable to be brought outdoors, then selectively with all precautions.

If the resident is terminal, one family member at a time, fully protected, should be allowed to be with that person. He or she should be in a separate location.

Residents should not be moved from one familiar facility to another for the convenience and financial benefit of the nursing homes who choose to establish a Covid-19 designated facility for the Medicare benefits unless the individual and family approve.

AMERICAN OVERSIGHT

Clay	My mother passed away on 7/29/2020. Thankfully the ER doctor who recognized she was not going to make it allowed my sister and I to attend her for the two hours before she passed. Her death was due to hemorrhage, and quite likely from a fall/head injury back in May. We were fearful to send her to rehab because of COVID so let her go back to assisted living. Her dementia progressed rapidly, but she was able to Face-time with us several times a day, right up until 4:30 the day she died. My sister and I previously visited at least 4-5 times a week so nearly every day one of us was there. We were both POA, and were refused the right to attend her while she was in lockdown. This is an assault on the human and civil rights of every elderly individual and other-than-elderly who are in ASL or skilled nursing facility settings. How could anyone conclude this was a good idea? Lock a human in an apartment and don't let them have access to anyone except by phone. We will never get those five months back. Her facility were great people, but they were tied by the mandates to isolate our mother. Atrocity.
Pinellas	PLEASE GIVE SERIOUS CONSIDERATION to allowing us to re-open our salons. Our Beautician does not work anywhere else and is not at any higher risk than any other of our staff. The beautician should follow the same guidelines as our other employees and be allowed to resume service under the same guidelines that apply to salons that are open out in the community. Five months is too long to go without hair services and several of our residents are now contemplating going out to have their hair done. I would feel much safer if our residents stayed in our community and had their hair services provided on site. PLEASE HELP!

AMERICAN OVERSIGHT

Lee	My parents live in the Terraces at Bonita Springs, FL. My mother in Independent Living and my father in Skilled Nursing. My mother has not seen my father, her husband since March 15, 2020. They live in the same facility but are separated due to nursing home orders. My father has Alzheimer's and this separation has resulted in his disease worsening. He is unable to have virtual visits because he cannot relate to a picture on a phone or computer. The governor has divorced my parents, divorced them durning the final time of their lives together. I believe safe visits can be allowed between couples that are both quarantine in the same facility. They are safer visiting each other than the exposure they get daily from staff members coming and going daily from the nursing home. My parents have been married for 72 years and now are forcibly divorced by the governor!
Charlotte	My mom is in nursing home in Punta Gorda .It's been 5 months since I've given my mother a hug. Even limited visitors and restrictions i really hope they open soon.

AMERICAN OVERSIGHT

Duval

Governor DeSantis, Secretary Mayhew, Moderator, Members of the Task Force on the Safe and Limited Re-Opening of Long -Term Care Facilities.

I am Jim Jandreau, writing only as a resident of Cypress Village, a CCRC in Jacksonville. I am also the Treasurer of Florida Life Care Residents Association (FLiCRA) Board of Directors. I am a member of LeadingAge Florida, and I participate in their 3X@ week conference calls. I have also been written two successful grants for the increase of 2 iN2L Tablets I received from Project: VITAL to a total of 24 iN2L Tablets to reduce the impact of isolation on our critical senior residents, which by the way, is extremely successful!

My wife and I bought our home here 10 years ago. Several years later, Judy was diagnosed with Alzheimer's. I was the caregiver initially, then hired CNAs from Cypress Village and ultimately moved Judy to Memory Care here. Being a progressive disease, Judy's condition worsened! I moved to an apartment and visited Judy daily. Then it was pandemic, and the door was shut in my face—I can't visit my sweetheart wife anymore! Until Judy is dying and is in Hospice in Memory Care—end-of-life! I visited Judy many times daily, for 7 days and Judy died on 16 April 2020!

Consider Mr. R. and Mr. S.J., AL/IL residents here and visited their spouses daily in Memory Care, who currently haven't seen their spouses for 5 months. Does it take hospice and death for them to see their spouses?

We know that over 40% of the Floridian deaths are from the LTC communities. We also know that once

AMERICAN OVERSIGHT

Broward

My mother is in an ALF. I have not been allowed to see her since mid March. She is not allowed to leave her small studio apartment and meals are brought in three times a day. The lack of socialization has taken a terrible toll on my mother. She is depressed angry and despondent. She feels like a prisoner and tells me that often.

There have been no cases of the virus in her facility. They are not allowed to do communal meals. This would be a big big big step in moving forward..

AMERICAN OVERSIGHT

Orange	My father will be 99 on 8.26.20, less than 2 weeks from now. He is a WWII veteran and worked hard all of his life beginning at age 4 by carrying milk bottles from the neighbor's cow to homes in the area. He was felled by a stroke 4 years ago and is physically impaired with left side neglect and cannot walk. But his brain is pretty good for 99. He resides in a SNF and I always viewed his care to be a partnership; the facility taking care of him physically and me taking care of his emotional health. So what happens when he has to go for 5 months without emotional support? Cognition declines, depression sets in. Please recommend to Governor De Santis that One Essential Caregiver be allowed into LTC facilities. My Dad needs to see me in the flesh. His birthday on 8.26.20. Please give him this birthday present. Thank you for your attention to this. Linda Warren, daughter of William Warren
Palm Beach	I want either the same requirement as every other healthcare worker. I want to be considered essential. Rapid testing would be ideal. I don't want outdoor visits in 94 degree heat.
Duval	Can you please remove the clock on the screen that is covering Mary's face. It's because of her there is this task force.

AMERICAN OVERSIGHT

Alachua

Dear Governor DeSantis:

We ask that you do not reduce the protocols for the safety of residents in assisted living in Florida. Any lessening of the strict safety requirements would cause more deaths, as shown by the several elderly who died in a facility here in Gainesville, and as we have seen in much larger numbers on other states.

We understand your oath to uphold the Constitutions of the United States and Florida, and know their provisions for ;liberty and freedom of movement and association. There are strong arguments to be made in this regard and we as Americans hold them in the highest esteem. There are, however, stronger arguments to be made to ensure as much as possible the "life" of our most vulnerable citizens. There is no doubt that looser standards will result in more deaths, and while there would be no single perpetrator and victim, there will be many more deaths abetted by what in effect is legislative fiat.

Governor, you have a hard choice. We are no different than countless families who desperately want to have human contact with our loved ones. But this is an extraordinary disease with known consequences to the residents of assisted living in Florida. We ask that you hold fast, and as it were stand your ground, for the thousands of elder Floridians loved by many thousands more.

Best regards in your difficult job.

Polk

Please allow 1 essential caregiver in to see their loved ones! We are willing to follow any precautions!

AMERICAN OVERSIGHT

Duval	The idea of automated animals and music are great but not instead of family visits. There are no activities where my mother is- they have basically halted as soon as there is a positive case. Family can follow the same guidelines as staff and give the staff a break must better than electronics can and which would require staff to help in memory care units. The memory care units get minimal benefit from all the electronics you can offer. Also, there is a wide variety of what is being done in different facilities and I would like to know exactly what they are required to do and what is "suggested".
Orange	Who does the task force think they are speaking to? They seem to be updating each other on what their particular silo has been doing. This task force is supposed to be addressing re-opening LTC facilities to loved ones. The task force needs to understand there are thousands of us listening getting more and more aggravated because they are not addressing what they are going to do to help re-open LTC facilities. The FLorida Health person has no clue! He is off topic. Rein him in Mary Mahew. I know you just tried but now please cut him off. Other states have found ways to re open LTC facilities. They did not need a task force. If this is how the FLORIDA task force is going to operate, please just ask Governor DeSantis to do what any of the other states have done. More progress will be mad that way.
Palm Beach	If I gave the antibody why shouldn't I be allowed in without restrictions.

AMERICAN OVERSIGHT

Lee	Please let us see our love ones. My mother in law has Alzheimer's and we have not seen her since Mother's Day when she entered Evans. Her husband is very bad health and Is scared he is fie before seeing her again. If he can't go in then please open the curtains so we can see her.
Miami-Dade	To reduce the exposure of residents and staff, patients should be assigned an "essential family member. Make it mandatory that the family member must attend a class for training. I think to open to multiple visitors, etc is going to put staff and residents at risk. Let's start slow. 1 person per resident. Then if someone does contract covid, the contact tracing won't be overwhelming. But please pass and make some rules and get this moving.
Hillsborough	How can you possibly do this without front line workers at the table to tell you what is actually going on at the bedside in these nursing homes!!!!!!! If you want FACTS, include Certified Nurses Aides (who do the bedside care), Dietary workers (who go room to room and see everything), Housekeepers (who are your main infection prevention team) Pencil pushers can't give you the reality of what is happening and why COVID keeps spreading!!! This task force is a joke without them!!!!!!!!!!
Lee	I and my wife reside in Independent Living in a CCRC and have not been allowed to have our daughters visit. We should be able to have a rapid test that we can pay for so they can stay with us for several days while following following the rules of the facility.

AMERICAN OVERSIGHT

Hillsborough	Essential Caregiver and Compassionate Caregivers are needed immediately Adding a caregiver ir two to the plan of care is a good step Family members are not responsible and should not be penalized for visitation Because of staffing shortages at facilities A phased approach is not appropriate- open them all! Families are willing to pay for testing or PPE, as necessary and to take training (add the training to an internet site). Time is of the essence - please do the right thing quickly
Alachua	I believe this is a bad idea! My mom is in an assisted living facilities here in Gainesville and the facility is beginning to have some positive tests. At least 2 other facilities that I know of have large numbers of cases (10-15 residents). With kids going back to school and positivity rates going up in surrounding counties, it's asking for trouble!
Leon	Essential caregiver definition should include health care surrogate. Visitation should be mandatory on these facilities, or it will be a business decision and they won't bother with it. These people need to get this done immediately! They've had five months to diddle around with a task force. People are withering away and dying. Stop the brown nosing of the governor and git 'er done!

AMERICAN OVERSIGHT

Sumter

Regarding optional vs obligatory: please refer to it as obligatory, that is it is a right not an (optional) privilege, for a designated caregiver to visit (starting with outside visits) with the following contingencies:

1. Adequate PPE
2. Adequate testing
3. Adequate isolation for existing C19 cases
4. Record of regular care (for designated caregiver(s))

Also, PLEASE provide a roadmap for moving forward, a staged approach with clearly stated steps.

A loving family member

Orange

I visited my father at least 5 times a week. But the facility did most of his physical care, bathing, changing, shaving etc. I helped with mouth care and other things but mostly I was there for emotional support, enrichment and entertainment.

I should be his One Essential Caregiver. Please do not preclude me in your definintion for One Essential Caregiver.

He needs me!

AMERICAN OVERSIGHT

Nassau	I have been watching the Taskforce for opening LTCF back up. One of the suggestions is to allow for 1 person to be considered an "essential" caregiver. I think that is a great idea but the guidelines were that you have to prove that you were in the facility more than twice a week. I live out of state, prior to lockdown, came down for visits every 6-8 weeks, those visits are documented, and now have not been able to get in at all. There should be exceptions for caregivers like me. I am the ONLY family that comes to visit. I talk to my mother almost everyday, and I am her only advocate. Please, let there be exceptions on a case by case basis. Now she is ill, and I am not allowed in. Help me. Please. Help me get into see her. Thank you!

AMERICAN OVERSIGHT

Miami-Dade

How can you have a Long-Term Care Task Force and NOT include long-term care workers on this task force? Nursing home caregivers have the biggest role and second biggest stake in long-term care policies (LTC) in Florida, (right behind the residents who live in our nursing homes). I know well because I have been working in long-term care for 45 years. We see, work and live the reality of every LTC policy each day. Caregivers are the true experts. Pre-Covid, caregivers were like family members to our patients, and now even more so with visitation limitations.

Nursing home workers also are the ones taking the greatest risks of contracting the deadly virus, all for near-minimum wage. We know what's needed to keep ourselves and our patients safe. Nursing homes need to be treated as a Level 1 emergency. Workers need rapid testing, universal masking and screening, proper PPE, better wages so caregivers don't have to work two jobs, quarantine pay, hazard pay, and safe staffing levels and no rushing workers back to work before we're clearly Covid-free.

Excluding the frontline workers on this task force makes no sense if you truly wish to solve this problem. We feel like nursing home caregivers have been treated as expendable, not essential, in this emergency. Sadly, more than half of the 9,000 Covid-related deaths in Florida have been nursing home patients and staff.

Protecting our nursing homes must be a priority. We

AMERICAN OVERSIGHT

Pasco	Please allow two family members to visit our loved ones . My sister and I were rotating everyday. Helping my mom get dressed, showering, going outside for fresh air , feeding her , getting her ready for bed . We never missed a day. Her facility has been Covid free . It's small - less than 60 residents. We are willing to be tested , wear ppe, do whatever it takes . Time is of the essence. I'm afraid I'll never get to hug my mom again . Get rapid testing in the facilities. Please do something fast .
Collier	if the staff can get close to my husband in long term memory care i want to be able to do the same thing . there is no difference between us . they go home each day and hug their family members. i live alone now so why can't i hug my husband? mary daniel makes common sense! we should be allowed into our loved ones rooms . we are paying the bills for these facilities! please let us be with our loved ones. we have been patient for six months!
Lee	Need to bring up the subject of social visitation by family members who are not caregivers so that those of us who reside in Independent Living in CCRCs can see our family members. My wife and I have not seen our daughters, who used to visit monthly, for months and would gladly pay for their testing if they would be allowed to visit. Of course they would have to abide by the facility rules for masking and social distancing while here.

AMERICAN OVERSIGHT

Palm Beach	My husband is 88 years old. He has already had covid and lost 35 pounds in 6 weeks. I am his essential caregiver. I took a Home Health Caregiver course ($500) in the hope that I could get to see him. I was his sole caregiver before he went in the facility. I told him to hang on I am trying to visit him. He said that he does not know how long he could hang on. He is very emotional. He wants to desperately see me. I want to do everything for him I did at home. He needs me and I need him. PLEASE. PLEASE help us. I will do anything, take any test, wear anything to be with him. The isolation is killing them. Please find a way so that I can see my husband before it is too late. I love him. I promised to be by his side.
St. Johns	My concern is in regard to the requirement of "no new facility cases with 28 days". Many of the new cases are transmitted by staff members either regular staff or contract workers who come in to care for residents. How can you justify a contract worker entering the campus and deny a family member from an essential or compassionate visit when both groups have the same testing requirement protocol? The "failure to thrive" is becoming more apparent as time moves on when residents are deprived from contact with family members. Increased levels of depression and anxiety and increased use of anxiolytic and antidepressant medications will persist without familial support.

AMERICAN OVERSIGHT

Broward

Thank you for coming together and thoughtfully discussing the next steps to safely reopen long term care facilities for our loved ones. I am working closely with Mary Shannon Daniels and it has been a very long and painful road for all of us. We are ready to assist you as we bring families back together.

My father's life is at risk and his overall health is rapidly declining due to the lack of touch from his family, and more importantly, the love and care of my mother, his wife of 58 yrs.

I totally support the ESSENTIAL CARE GIVER DESIGNATION and POINT OF SERVICE MOLECULAR RAPID TESTING.

Please accelerate the drafting of recommendations, criteria, and guidelines for presentation to the Governor ASAP.

My story on AARP nationally:
https://states.aarp.org/florida/a-personal-story-of-the-difficulties-imposed-by-covid-on-seniors-and-their-families-during-a-pandemic?fbclid=IwAR1NRR2w0uKXP9pn0CofyvbIcl4Gnv7peTsR88QyYWwHrpG9go4AffGn0h0

AMERICAN OVERSIGHT

Lake

Family visits are essential. Please make provisions for families to visit senior citizens in assisted-living facilities. Residence in these facilities have made the decision to live there because they need assistance. Locking them up, incarcerating them and keeping them from family is quietly killing them. My parents mental capacities are starting to dwindle and they are getting depressed. Allow family to visit dressed in PPE, following CDC guidelines in private living quarters. Do not lock them away for the rest of their lives without contact from loved ones. Staff members go home each night to family and out in the community. Family would do this more safely and even staff

AMERICAN OVERSIGHT

Orange

Thank you for allowing us to participate in the virtual task force meeting today. It was reassuring to learn more about all of the work that has already been done to protect our vulnerable residents of care facilities and even more reassuring to hear the compassionate tone of those sharing remarks. I am a member of the Facebook group Caregivers for Compromise and am heartbroken after reading story after story from family members sharing their heartbreak. Most of the stories are not just about missing their loved one but are stories about death. Most of us with elderly parents in care facilities have been preparing ourselves to lose them but not under these circumstances. The rules put in place and strictly followed by facility administrators may be helping protect residents from contacting COVID but not protecting them from a hastened death from othe causes including failure to thrive. The essential caregivers have not only helped to provide basic hygiene and activity of daily living care but have been essential advocates to monitor the care being or not being provided by facility staff and to step in to discuss care planning with doctors, nurses, aides, therapists to ensure appropriate care planning and that care plans are being carried out. Without access to see and assess our family members first hand we are watching them fall victim to a greatly flawed system where without advocates residents often do not receive individualized optimal care to maximize their health and well being. Family must be a partner in care. The facility in FL where my parents lived was not only disallowing visitation from family but also of Hospice nurses and physicians. For weeks and weeks

AMERICAN OVERSIGHT

Hillsborough	My father has been laying in a bed since March I was told by the nursing staff because he is a fall risk they cannot put him in a chair this puts him at high risk of bedsores. I offered to be his sitter they said no . We constantly call the administrator the activities director and the social worker leave messages they rarely call us back.I am a registered nurse I am part of the disaster relief team of Hillsborough county I know how to Don and doff PPE. Prior to Covid I visited my father almost every day I cleaned his nails brushed his hair provided companionship fed him turned him took him outside and wiped his butt do to incontinence. The facility was kind enough to allow us to have a communication device in his room unfortunately the hotspot that I purchased for him has come up missing therefore I am unable to communicate with him on a daily basis.Please for the love of your own parents please allow us to visit and care for our love ones please imagine if it was you and your family. Ruth Serrano RN
Marion	My mother just died and I didn't get to be with her. My mother-in-law is now in an assisted living facility and has been isolated for 5 months. We all miss her and worry about her being isolated. But we do NOT support reopening such facilities right now. It is like schools. We all want them reopened, but now is not the time. Especially here. Rates are still startlingly high and experts predict cases to go up quickly statewide once K-12 schools reopen, given patterns already observed in other states. Please do not move toward reopening now. Keep our moms safe, for gods sake.

Pasco

SUGGESTED FRAMEWORK: from various sources

Note just for Assisted Living..... Framework for Nursing Homes & Compassionate Care Situations would need to be listed elsewhere...

GUIDELINES TO ALLOW GENERAL VISITATIONS AT
FLORIDA ASSISTED LIVING FACILITIES (ONE RESIDENT/COUPLE PER ROOM)

When is an ALF facility allowed to transition to restrictive general visitation and activities (the next level) ?
1. The facility must not have had exposures from COVID-19 cases in the past 28 days whether that be staff and/or resident.
2. The facility must have completed appropriate staff testing and have a written testing plan.
3. The facility must consider other risk factors identified in the guidance. For example, virus case incidence in their county/local area, rate of positivity in their county/local area, etc

You should as a visitor be expected to do the following for the safety of residents:

•Schedule your visit, or follow visitation times allowed knowing the facility has to balance resident activities and the number of visitors at any given time.
•Only one designated family member visitor at a time.

AMERICAN OVERSIGHT

Hillsborough	My son is 26 yrs old and lives in a Behavior Focused Group home with 5 other in Tampa Florida. None of them have any underlying conditions except for being Autistic. Yet they are under the same rules as nursing homes with hundreds of people. We saw our son 3 times a week before the virus. We have gone on Fox News National tv show and asked the governor to amend the ruling. My son is showing signs of depression and has become more aggressive. My husband and I are willing to be tested, wear masks snd PPE. The group home doesn't even wear PPE! Please it's been 5 months. Please help us get this changed. My sons mental health is at risk. We are will to speak with anyone on this subject and provide our suggestions if we can get someone to listen. The young disabled adults need a voice to advocate for them and we are willing to be that voice.
Charlotte	I hope this helps with reopening Nursing Homes so loved ones can get in to see them. My mom is in one and she is losing her sight and i would like to be able to get in before that happens so she can see me before that does happen. I don't see why we can't go in as long as we wear a mask seeing how they are supposed to be working. It is no different going in there wearing a mask or going to the stores wearing one. and i don't believe loved ones should have to get tested to be able to go in. You don't have to get tested to go into stores or other places so you shouldn't have to get tested to see your loved ones. That is a double negative. well I hope with what i said helps.

AMERICAN OVERSIGHT

Citrus

Thanks to all for a thoughtful meeting. I watched with great interest because my 89-yr-old father has advanced dementia and is in a memory care facility here in Florida. I have so appreciated the efforts of Mary Shannon Daniel to passionately represent the families who have not been able to visit their loved ones for five months now. She is completely accurate when she speaks of the desperation we feel to see our loved ones in person and the feelings of helplessness when we see our loved ones rapidly decline due to the imposed isolation and the inability to personally affect any change. My father lived with me for 15 months before going to the memory care facility, and I was his primary caregiver. I stand with other families in begging, truly begging, you to quickly propose a plan that will allow us to be with our loved ones again. We will do whatever is asked of us in order to make that happen. I would prefer to see the recommendations made mandatory because I fear too many facilities would not comply if they were optional. Please don't let this be like so many committees that are all talk and no action. Every additional day away from our loved ones is a day we will never get back.

AMERICAN OVERSIGHT

Lee	It is imperative that families be allowed to visit in a safe manner. We are the eyes and ears to what goes on in the facilities. We are able to hold staff accountable and help care for our loved ones. We bring home cooked meals, clothing and hope to our loved ones. I would be happy to visit out doors. A porta potty could be installed for visitors. When I visit my husband I usually interact with 10-20 residents while there. Not being able to see family while sick is difficult. Missing holidays and family events. Missing simple things like a haircut. I understand the importance of staying safe and have quarantined the entire time in case my husband was hospitalized so I knew in good faith I could enter a hospital and not put others at risk.
Collier	the task force needs to listen to caregiver mary daniel. she knows what family members want. we don't need a video on how to put on and take off a mask etc! don't insult our intelligence! the staff who bring our loved ones to the windows aren't six feet apart from them and every one is doing fine. we want to get into the building and into their rooms.we've lost six important months already. we all know the importance of PPE! we don't need any more delays for our loved ones. treat us like staff.i'm sure they go to grocery stores etc. i've talked to other family members of loved ones and we are all extremely careful and follow the guidelines and wear our masks. all nursing homes and long term care facilities should not have the option of opting out of allowing one or two family members to visit their loved one. we all had to follow phase one and phase two of the gov's plans.please we can't wait longer to be with our loved ones.we may all have to live with this virus a very long time.my husband is 91 years old and he and i may not have a very long time together! please let me be with him!

AMERICAN OVERSIGHT

Putnam	Interesting meeting today. Can totally agree with Mary and most on the panel this afternoon about phasing opening up facilities safely and fluidly. Can totally relate with Mary's statements today as well. I have a 93 year old father-in-law in a memory care unit and we took it upon our selves to do window visit with the permission of his facility (they didn't initiate the option or conversation there we had to) during this time period. He doesn't understand why we can't come in to visit with him and we have seen him degrade more during this time both mentally and physically (loss of muscle mass). I would at least have one family member to be able to see him and check on him. When we see him in his room a light "might" be on but normally he's sitting in the dark staring at a wall. He doesn't know how to operate a TV but they don't even turn that on for him. It is truly sad site to see. My wife has a running scheduled DUO video call with him on Friday afternoons...which she did not get today which makes six weeks that she hasn't been able to communicate with him via Video Call since this order has been in place. The aids you all were talking about during the meeting today have't been offered to him to our knowledge or discussed with my wife. I would really recommend that a baseline requirement to be set out to all the Nursing Home/Assisted Care Facilities that is well defined and have some recourse if not followed. Right know they do what they want...I know this because I've seen it first hand. By the way my wife is in the Medical Field and where she works they require her to test weekly and as of today has been negative of COVID and as usual she will be
Duval	Would you please make it clear that these rules apply to nursing homes and assisted living facilities, and that no rules apply to independent senior living facilities.

AMERICAN OVERSIGHT

Sarasota	My Mom is 99 years old. She has been in virtual lockdown for 6 months. She suffered a stroke 2 months ago from the stress and depression caused by the lockdown. She suffers from mild dementia. She does not remember the virus but clearly remembers and understands abandonment and loneliness. Prior to lockdown I would visit her everyday and sometimes twice a day. Her facility only allowed 2-10 minute phone calls per week and did not do window visits for 3 months. She was confused by the window visits and I found them not helpful. I moved her to a new facility which I had to do by virtual tour. Her belongings from her facility were put on the street where I picked them up and deposited them on the street in her new facility. This is ridiculous! Her new facility allows daily window visits which have helped. If a facility is COVID free, why can't essential caregivers take the same (and better) precautions as the caregivers hired by the facility and visit. We have no idea where the caregivers go after they leave work. They are more of a threat than we are to our loved one. Here is my solution: 1.Give us the same rights as the caregivers. Test us as often as you like and allow us to visit with the same pre-cautions taken by the caregivers in regard to PPE. 2. Train us to use proper precautions.3. Allow only one caregivers to be allowed visitation. It's simple - and can be done. I think you have to make a distinction between alzheimer patients and dementia patients. Our parents that suffer from dementia recognize their families, they know life is very different. They are not comforted by stuffed animals and paper arms. They want contact and hugs.
Pinellas	I need to get in and see my mother (Susan Mulnix). It has been hell on us and this needs to be over and let Mother Nature do what she needs to do You can not stop a tsunami

AMERICAN OVERSIGHT

Lee

My husband and I live in Cypress Cove, a continuing care community in Fort Myers. After a fall and 3-day hospital stay, he was admitted to the skilled nursing facility here at Cypress Cove on Friday, March 13th, the day that Governor DeSantis closed the doors. He is diagnosed with end-stage unspecified dementia. This situation is heartbreaking for both of us. I have written letters, sent emails, and done a television spot, in an effort to be with my husband—all to no avail. Please begin by

ALLOWING RESIDENTS WHO LIVE IN THE SAME FACILITY, AND TEST NEGATIVE FOR THE VIRUS, TO SEE THEIR LOVED ONES IN SKILLED NURSING.

The fact is that I have not been off campus for over 6 weeks, and have virtually no contact with staff (my meal bag is dropped at my door). I pose significantly less threat to my husband than the staff who take care of him. That being said, I do not feel that nursing homes should be opened up to outsiders in the foreseeable future. My issue is that I have been isolated IN THE SAME FACILITY for over 5 months and after 57 years of marriage, this separation has been tortuous. PLEASE consider those of us in this particular situation.

Mary Waldau

AMERICAN OVERSIGHT

Palm Beach	Please have APD involved as they follow the same rules for seniors in nursing homes. Our children some as young as 10 years old living in group homes are left behind and having failure to thrive, depression, anxiety , increased behavior issues due to not having distance visits or any communication from family. Some of these disabled kids would go home on weekends to spend time with family and looked forward to it. Please some of these kids are like orphans due to pandemic. Some are non verbal . While I was locked out my child got a positive test. Staff had no mandate to be tested. Just asking to include and monitor group homes run by non for profits and other big chains or they could be the next big out break. Lastly,State mandates testing for staff of nursing homes yet nursing home residents travel to dialysis' three times a week with no testing. Isn't this a doorway to bring infection into facility? Please look at these issues. Thank you.
Escambia	Suggestion 1 - start with visitors listed on the patient's emergency contact. That one person can come visit for the first 60 days with negative rapid test, by appointment. Of course with face covering. Suggestion 2 - rapid testing at the door before allowed to come in. Suggestion 3 - appointments by alphabetical order by days of the week, rotate weekly. Suggestion 4 - set visiting hours like icu, one hour windows. Suggestions 5 - complaint person designated at the facility.

AMERICAN OVERSIGHT

Escambia	Anyone that does not comply with PPE will be trespassed from the facility.
St. Lucie	Practice social distancing as much as possible but you'll have to allow hugs. Thank you for sharing the informative discussion for reopening long term care nursing facilities. I am very hopeful that access to her happens soon. My Mom lives in PSL Rehabilitation Center in PSL, FL. She tested positive for Covid but was non symptomatic. Has since tested negative. I feel if she already had Covid that I should have been able to visit at least outside. I missed her birthday. She was moved 3 times to 3 different rooms with little consideration to her transferring abilities. Her belongings were not all moved with her. It has been a struggle making sure her level of care was as it should be. I cannot wait to be able to get in the building to inspect her room and ensure all is good.
Lake	Our loved ones need to see our faces and hear our voices and know that we have not abandoned them. Some loved ones do not understand the Covid pandemic and do not understand why we are not with them. If our hospitals feel safe allowing one person per day to visit and our schools are allowing our children to return then please open our Long Term Care Facilities for us to be with them by providing a safe area for these visits.
Collier	please let thoes in jail not guilty or murder, rape or molesting children out of jail, you can round them back up once this virus passes. My son has been in jail 8 months waiting to go to court, now the virus is there. He has asthma, please send him home. I'm 77 I need him, plus I am raising his daughter, and he needs to get the one out of foster care. Please let him out of jail, I'm begging

AMERICAN OVERSIGHT

Bay	I watched the segment on the news where the wife of a resident at LTC facility said that nearly 4000 residents in LTC facilities are dying from failure to thrive, and just wanted to take a moment to respond on how reopening nursing homes will affect everyone. I am a nurse at a LTC facility, and am fully aware the impact this pandemic has made on our elderly population. I'm going to respond to this from as a health care worker, and through my experience of over 25 years as a nurse in long term care. Many residents who have failure to thrive come to the nursing facility already in the conditions that many may blame on LTC. However, as a witness to this, our team rallies around that person in need of care, love, and compassion. The residents I care for are my family. We engage with them, and a bond is formed, forever in many cases. I do understand how a family member must feel. In my opinion, for residents who have immediate family should be allowed some sort of limited visitation (if possible)put in PPE, for their own protection. Also, as the visiting family member, there needs to be clear, set rules written and signed as being agreed upon. I feel, at first, it should be fair to all. I suggest limited visits, maybe to have approximately 30 minutes to one half hour visitation twice weekly.I feel one resident per clean area, with only one family member at a time, to prevent issues such as, over burdening an already overwhelming situation for facilities which are already fighting the battle with Covid. We are taking care of many residents, some who are in constant need, and sometimes with the bare minimum of staff due many
Collier	please permit one relative to enter the long term care facility. treat that one essential person like staff. the staff doesn't social distance when they help our loved ones brush their teeth, shave, wash& dress them or help feed them. surely,one relative can help do this again. we did it before the virus came. we will wear masks. our loved ones need us now!

AMERICAN OVERSIGHT

Orange	How does the Federal Civil Rights Resolution signed June 9, 2020 affect caregivers ability to get into the SNF? The complaint alleged that the state's policies related to hospital visitors during the COVID-19 pandemic violated the Americans with Disabilities Act, Section 504 of the Rehabilitation Act and the Affordable Care Act. I understand that this is for short-term facilities but I think it could reasonably extend to SNF. We use to visit my FIL several times a day. If he called us confused, we would run up there for 10-15 minutes and explain what was happening. We played "Go Fish" and UNO with him every night. This helped him in so many ways - human interaction, hand eye coordination, reading numbers, remembering. His health has deteriorated substantially in the last 4 months.
Marion	Elderly residents are not the only people affected by the isolation of the covid epidemic so are the people like my fiance, 42 yrs old, who was in a horrific motorcycle accident which left him with soinal cord damage and traumatic brain injury. He was an essential worker constructing power lines and living in Florida since January. He was in Shands Gainesville ICU Trauma Unit for 34 days after which time he was moved across the street to Select Specialties, a longterm rehab facility. I flew down here from Michigan the night of the accident and have been by his side the entire time. I'm residing in a rv park to be near him. I was devastated to learn that I could not be with him. He had been making such good progress. One day away from him and he's already regressing. We are 1300 miles from home. Its so frightening. I should say, I lost my dad May 24. Two months locked in and never got to hug him while he was aware. I pray for antibody testing...SOON

AMERICAN OVERSIGHT

Broward	This needs to be done as SAFELY as possible! People need to be tested. I understand that if I test negative right now that I may be positive later, but testing and/or antibody testing needs to be done! Are are family members supposed to get and purchase PPE. I have tried and it blocks you if you are not a healthcare worker. Specialists should be let in first. Residents need to see their doctors and have their eyes and feet and other things checked and taken care of regularly. Employees and family members need to follow the same rules. I wanted to see my dad and I want to hug him and take care of him again, but my mom and sisters need to see him too. MORE needs to be done in FLORIDA to protect everyone!!! All residents should have a robotic pet and/or an MP3 player. The facilities need to designate someone to work with the residents on the tablets and video calls. I think visits should be limited and not all families at the same day or time. Maybe a special room or back door. Walking through a memory care facility is not easy as there are always going to be residents around. It needs to be private and secure and SAFE. They need more help to provide in room activities. I would love to go and take care of my dad and so would my mom and sisters, but we have to know that when we leave we are ALL safe and not affecting our loved ones or facility or bringing it home to our families. Outdoor visits are great but it is too hot. Can you provide trailers or a/c controlled areas that can be easily sanitized between visits? I don't know the answers, I am just scared for everyone as I know everyone is tired and overworked and trying their best and the isolation is so very bad. I just wish

AMERICAN OVERSIGHT

Hillsborough

I have watched the meetings and a subject that not has been addressed is the young disabled people in group homes. I am a father to a healthy 26 year old low functioning Autistic son. His mind is that of a 7 year old. We were stopped from visiting him back in March and we haven't seen him in the past 5 months. He is not the type of "vulnerable" that the restrictions were designed for and he should never have lost visitation. He lives in a home of 5 similar type of young men. We are essential as we get the things he needs and provide the love that only parents can give. We are legal guardians. He comes home with us for a couple days every holiday. I keep hearing 1 visitor which is all designed for the spouse of an elderly person. My son has 2 parents so 1 spouse needs to equal 2 parents. We can wear the same PPE that the staff does and there should be no problems. He is suffering right now, not knowing what is going on and why we have stopped visiting him. I see depression and anxiety in short face time contacts. There are other similar homes that have 18-20 year olds living there and have lost visitations. Ironically, they still go to high school and are getting ready to go but their parents can not visit them? 3000 students is safer than 2 parents? This is messed up and needs immediate action.

AMERICAN OVERSIGHT

Hillsborough

By the way, I see no member of the board that represents people like my son. Mary Daniel said she would bring it up at the last meeting but we did not hear anything from her. She is focused on elderly facilities only. I am retired and could work at a group home but unlike Mary, I'm not wanted. I am a retired child and elderly abuse investigator from a local police dept. No home would ever hire someone like me that would not let any thing wrong slide. My wife and I were on Fox's Daily Briefing about 3 weeks ago over the issue. Everyone agrees with us including other heavy weight state politicians. The governor and his wife have a 3 year old child not much mentally younger than our son. How would they and the child feel if they were suddenly ordered to not visit that child? I watched the first lady and it would devastate her. That is what is happening to my family and we are being told to just take it. If you switched places with us, you would raise cane. I'm asking the group to switch places with us, think of how their lives would have changed and the lives of their child and I can not see any logical person that would disagree with us. what I recommend is visitation to be allowed at homes like my son starting next weekend. The governor and AHCA has to send an order to APD and the subsequent group homes. Not a request but an order. Allow 2 parents, as my son is aggressive like the others in his home are and in many other similar homes. Have us wear PPE and have our temperature taken when we arrive. We would also request that APD encourage group homes to work with the parents to start the healing process that will take years to do. Allow these kids to go home for

AMERICAN OVERSIGHT

Charlotte	I think you should open nursing homes ASAP so loved ones can get back in and see there love ones. the only requirement should be you have to wear a mask. you have to wear a mask in most stores and you can go in so as long as you wear one in nursing homes you should be able to go in there it is no different. and i don't think you should have to get tested either to be able to go in you don't have to get tested to go shopping or other places so why should you have to get tested to go into nursing homes. it's not fair. I hope by what i am saying works so i can get in to see my mom and she can see me before she loses her sight which she is. you need to have more compassion for the elderly and there loved ones.
Lake	My mother lives in an ALF in Gainesville, FL. They have done a wonderful job about caring for her and trying to protect residents and employees from the virus. They have also been accommodating in helping me gather her personals, delivering essentials to her and arranging for video chats. My mother has been been hospitalized twice and in rehab since March. I have been able to see her in certain circumstances. She was in quarantine for about half of that time (either in hospital, at rehab or at the ALF). I was able to speak to her on the phone but the lack of interaction has taken its toll on her. She has declined significantly and has cognitive struggles (more frequent). I would like to be able to see my mom -- even for just 30 minutes at a time and at a safe distance. The video chats have been helpful but it's not enough. As her primary representative, I would like to be able to see her room at the ALF to make sure everything is okay and that she has everything she needs. I believe that family members can safely see their loved ones -- with appropriate measures in place. Thank you.

AMERICAN OVERSIGHT

Sarasota	PLEASE advocate for Independent Living residents in Assisted Living facilities!!!! My mother has a 2 bedroom, 2 bath apartment, and drove her own car to shopping, church, visit with friends and appointments. She independently used the gym, pool and participated in social activities on site. She does not require nor engage any nursing or support services from the assisted living staff. Since mid- March she has not been able to leave except to walk the grounds or with special permission, go to a medical appointment. Her meals are brought to her apartment and activities have been cancelled, restricting social interaction. I am not allowed to visit her on the grounds even with PPE! I can only visit thru a window. THIS IS WRONG!!! Please help the forgotten independent living residents swept under Assisted Living restrictions to regain their physical, mental, emotional and spiritual well being
Duval	Please open up ALF & LTC to at least one family member. Isolation & loneliness & lack of family touch is causing serious decline. Many are dying. It's ok for me to hire a caregiver that also works another job & cares for her family to visit my parents but, it's not okay for me. This makes no sense. The workers in these facilities are over worked & underpaid. They don't earn enough to care. Let the family in to love on their relatives. Please do the right thing now!

AMERICAN OVERSIGHT

St. Johns

My parents live in a stand alone home in Westminster St Augustine (CCRC). My Dad is 96 and Mom is 91. A month ago, my Dad was taken to the hospital. It took 7 days to get Covid test back. Then, Westminster made him quarantine at Julington Woods and then after 8 days, he was able to return to St Augustine skilled nursing. My Mom is an RN and has been his primary care giver for years. They would not allow her any access. While in the skilled nursing, his isolation and lack of care has caused both a mental and physical decline. They are moving him home this week, primarily so Mom can provide more care. But, Westminster will NOT allow any family access to my parents own home. So, is not a Florida requirement. I have filed complaints, contacted the Governors office, called Westminster corporate and no one will answer. My parents need their children and we need to be there. We have all quarantined since March. Please help us get these gates open. This is my parents own home, not a nursing home. It is just located within the property of the CCRC. Thank you.

AMERICAN OVERSIGHT

Pinellas	As a caregiver to my mother who has Parkinson's and dementia and declining rapidly, I recently hired a paid caregiver for her in her assisted living. I pay $24/hour at 12 hours per week. These paid caregiver visits basically take the place of me not being there a few times a week to do things for her and keep her company, as I've always done. As far as reopening LTC facilities, I am in favor of anyone who was a regular caregiver before the pandemic began should be allowed to follow the same protocol as a hired caregiver such as wearing PPE and getting tested for Covid regularly. If a paid caregiver can go in and out of multiple facilities each week by following these protocols, where is the logic that says I can't go see my mother? I will take any precautions necessary. I appreciate your consideration.
Citrus	I'm my mothers rock. I am her only child. She is in deep depression. Sleeping all day will not leave her room. I visit her 3-4 times a week outside her window. If I go more than 2 days without visiting she gets more depressed. February 2020 when my mother came to long term Care she walked in with a walker. Now she can't even get herself out of bed. These residents are dieing from loneliness. Which is it? Covid or Depression? Please help us.

AMERICAN OVERSIGHT

Alachua	I watched the first meeting. As an essential caregiver to my husband who has dementia and who has been declining over the past 6 months partly because of the social isolation, I would like to be able to perform some of those essential tasks that I did before the lock down. That is, I would like to be able to feed him, take him for a walk in his wheelchair, give him a hand massage and cut his fingernails. That would require my being closer than 6 feet. The director at this facility is a stickler for rules and my sitting 6 feet away covered with gown, mask and gloves will not be conducive for giving that essential and personal care. Heck, his room is not much bigger than 6 feet wide. If the CNAs and nurses can get closer than 6 feet, please consider allowing those closest to the patients to get as close as the CNAs so that we can, indeed, provide essential care.
Wakulla	My mother in law of 44 years is in a LTF in Gainesville. We haven't seen her since November of last year. Partly because my hsband, her eldest son, had by pass surgery in December. Winter became spring and the lock down began. She has a son living in Alachua that was visiting her several times a week. My mother in law is handicapped on her left side and depends on help to do even basic daily tasks. We feel she had "given up" before the Covid situation. Each time we or another family member talks with her we get the feeling she is just existing and doesn't care to live in isolation. Please let each family have one advocate for LTP/STL so each one of us can feel confident our loved ones are well and thriving.

AMERICAN OVERSIGHT

Hillsborough	My mom is in an assisted living facility, and so far we have been blessed that the facility has stayed COVID free (to our knowledge) The separation from family during this time has been very difficult, we are fortunate that we can stand by her window and "visit" while on the telephone but it sometimes makes her feel more isolated. She's fallen twice and we haven't been able to go in and comfort her. I don't know the "safe" answer, but I listened to your previous meeting and perhaps having a designated person for each resident able to go in and reassure them, while the other family members are able to visit outside from a distance might be a good start? Thank you so much for working this sad situation, there are no perfect solutions I'm afraid.
Seminole	As you work to open our Health Centers to visitors, could you please address the needs of residents living in the Independent Living facilities who have not had visits from family since March. These restrictions impact many of us also. Perhaps we could have family visits. Limit 2 per apartment or villa. They do not need to visit any other parts of the campus except perhaps to take a walk with Mom or Dad. I personally need to have my sons come help me settle the estate of my husband, their father, who passed away on Jan 24th 2020 in the Health Center at Village on the Green where we lived and I still reside. Thank you for your work to open our health center/nursing homes. I know how I would be feeling if my husband was still in the health center. Sue

AMERICAN OVERSIGHT

Seminole

I sent an email to Governor DeSantis on 06/23/20. I resent the email 18 plus times. No response. The email has many voices behind it. I explained that I wear two hats. One being SOUL caretaker to my 94 year old mother with late stage dementia. Two being the salon contractor manager for Senior Residential communities. We reopened the salon the end of May for IL residents ONLY. I see the AL residents outside for their air time. Their hair looks so unkept it's heartbreaking. The depression is noticeably sad. I see the changes in our IL residents as well. Some now needing care when 6 months ago they did not!!! I cannot see my mom. She is a resident in memory care there. I work there. I am screened twice daily and tested biweekly along with following ALL PROTOCOLS in my salon. Contractors come and go all day. Virtual calls has only confused my mom. She lives in a world of confusion already. She's 96 lbs. Pallative care. The depression on campus is like a plague. PLEASE read my email. Please hear OUR VOICES. Our elderly are dying alone. We have lost so many recently.....not to COVID-19. Thank you for your help! I would be happy to forward the email to you as well.

AMERICAN OVERSIGHT

Bay

Our facility in PC.Florida has only has only had 4 patients positive since Marchn13th...there have been approx 6 or 7.staff positive during this time. Every time we get close to being able to have limited visits, a staff member pops up positive. The staff and admin are indifferent
in trying to plan for.limited visits and some have expressed dread at letting families visit. To date, no limited visit plan have been discussed or are in place. Many.of us families feel like we are being held at bay and.our family member held hostage during this time. We have had NO COVID Deaths! I am.disturbed at the lack of initiative or effort to plan any type of even limited visits. You ask about it, you get a flat "No"! No effective communication

My family member has had 2 hospital visits in 2 months for GI bleeds..one of these my having to call the MD. myself, due.to dismissed symptoms for 3 weeks.
Please mandate these limited visits start! I am a Court Appointed Guardian.

AMERICAN OVERSIGHT

Hillsborough

I am now into Day 158 without seeing my 85 year old mother in assisted living. I'd like to point our that the only thing consistent about all of this is the inconsistencies. A few examples:

1) After trying to get many unanswered basic questions around protocol with things at my mother's ALF, I was invited to speak with the executive director. I cannot walk on the porch or go inside to see my mother, but somehow it was "ok" for me to enter into his office.

No concern and/or understanding on what hypocrisy this is by the facility.

2) Lovely news media footage showing family going into see father at Memory Care. The "workaround" that is being used, is the use of hospice. While I am happy for these families, it is outrageous that we are shuffling care resources to figure out a way to "get in" to see our own family that is paying dearly to live there. Once in memory care and hospice, anyone can come into visit.

3) ALF in Ft. Lauderdale allowing resident to leave for days with negative covid test and then re-enter with negative covid test.

4) DOH visits are truly inconsistent with what is being told to each ALF.

There has to be a better way. Civil rights are now being violated and what happens when flu season starts? There is already coverage around this. I hope the urgency to this matter is tended to in Task Force Meeting #2.

AMERICAN OVERSIGHT

Charlotte

I hope you finally decided to open long care and nursing homes. I think as long as people wear a mask to see there loved ones in there that should be enough. You say mask are so good at stopping it then what is stopping you from opening them? I don't think we should have to get tested to go in you don't have to get tested to go to the store and any other place so what is the difference? when you go out to the store you are around a lot of different people old and young. so getting tested is not fair just to get in to see your loved ones.

AMERICAN OVERSIGHT

Lake

My 92+ years old Dad is in Vista Lake Memory Care here in Leesburg, FL since Oct 15, 2019. I am his daughter, his POA, his voice! From the time he moved in on Oct 15, 2019, I visited him several times a week, took him out to eat, brought him home for family gatherings, etc. I tended to his needs and concerns, brought in his guitar so he could play his music, etc. etc. The last day my Dad got a hug from me was on March 13, 2020. He has been locked in his facility over 5 months now and we were told it was to PROTECT him from COVID that we could not come in or visit at an open window. Window visits were scheduled in 15 min. increments during limited hours. During this time, I have watched my Dad decline (cognitively) each time that I see him at the window, and he has lost weight. He doesn't understand why I can't come in, he doesn't understand the virus, etc. I am his only local loved one. Other loved ones could only see him if they have an Apple device for Facetime. That has completely left out one of his sons who lives out of state. No other options to see him! Communication from his facility has been next to nothing. They have an automated call sent to families every 2 or 3 weeks I believe. I got the first 2 or 3 and haven't been getting them for a while now. I have written to and spoken with the Executive Director and this is still not correct. I have no idea how Dad is doing unless I call in and mostly can't get anyone to answer to the phone. They are understaffed, so family is bottom of their priorities. When able to leave a message, it's rare you get a call back.
On Thursday morning, August 13, 2020 (exactly 5

AMERICAN OVERSIGHT

Charlotte	It's been roughly 5 1/2 months of lockdown and I can certainly speak for my mother, that she's had more than she can take, they have so little time left in their life and it's being stripped away from them, all they have left at this point is family, and that means so much to them, they get so excited about their visits and this is just completely heartbreaking, I have to visit her through a fence like she's in prison, once a week for 15 minutes with an appointment. I'll see if the picture can be attached. it's cruel quite frankly. They can't even get there hair done. What sense does that make that age can come and go but they can't have the hairdresser that works there come in the whole thing is absurd, it's such a little thing but it's so important to people.
Seminole	Please enforce Health Care Surrogate, POA, Essential Care giver on a HIPAA Release right's to residents medical records requests. With Covid we are unable to in person submit their "form" and pick up records. They are not responsive3 to phone calls or emails. They are not cooperating with record releases and when they do they are charging $1.00 a page which is not incompliance with Federal law. They can charge $6.50 or actual costs as defined. Few SNF and Ombudsmen know the requirements. This is important to facilitate an essential care giver role to prevent inadvertant neglect and failure to thrive. https://www.hhs.gov/hipaa/for-professionals/privacy/guidance/access/index.html

AMERICAN OVERSIGHT

Charlotte

THE HEALTH RISKS OF PROLONGED ISOLATION are equivalent to smoking 15 cigarettes a day!. A study, which looked at data from more than 3000 people showed that strong social relationships decreased the risk for premature death by 50 PERCENT!

I work in a Assisted Living Community. Of our 42 residents here, 8 has passed since April - not from COVID! We watched them give up - lonely from not having the interaction with family and outside friends. We have to open up!

Suggestions: Family would have to show negative COVID test, scheduled visits, a dedicated visitation room with limit to one family/friend at a time. Of Course, masks required.

AMERICAN OVERSIGHT

Sarasota

TASK FORCE ON THE SAFE AND LIMITED RE-OPENING OF
LONG-TERM CARE FACILITIES

The purpose of this email is to advocate for the forgotten Independent Living residents in Assisted Living facilities. They have been swept under Assisted Living visitation and activity restrictions implemented in Mid-March.

My mother has a 2 bedroom, 2 bath apartment, and drove her own car to shopping, church, visit with friends and appointments. She independently used the gym, pool and participated in social activities on site. She performs all her own ADL's and does not require nor engage any nursing or support services from the assisted living staff. Since mid- March she has not been able to leave her facility except to walk the grounds or with special permission, go to a medical appointment. Her meals are brought to her apartment and activities have been cancelled, restricting social interaction. I am not allowed to visit her on the grounds even with PPE! I can only visit thru a window.

THIS IS WRONG!!! Please help the residents of Independent Living to regain their physical, mental, emotional and spiritual well being.

My ask is for you to propose visitation with Independent Living residents mandating temperature checks and use of PPE. Visitors could social distance on the grounds of the facility not causing potential contamination. OR restrict visitation to areas / rooms that can be easily sanitized between visits. Being able to visit in her apartment would be ideal, but baby steps are good and easily monitored.

AMERICAN OVERSIGHT

Palm Beach	My mother who is 95 years old has been severely depressed as to not seeing me her daughter. She has stopped eating. I have paid a large fee to have her in Symphony of the seas in Delray. NO entertainment, and very little to do. Why can I not see her? I do not know how much longer she will live. Why can I not see her in the outdoor atrium? Please advise. Thank you I will take full responsibility of her if she gets sick. I have been tested 3 times. All negative.
Polk	SIR, I'D LIKE TO SAY THAT THE CLOSING OFF OF RELATIVES WITH THEIR ELDERLY FAMILY MEMBERS IS TORTURE TO BOTH. MY FATHER WHOM IS A VET AND ONLY 81 LIVES IN A MEMORY CARE FACILITY AND WE CAN'T COMFORT HIM. ITS BEEN SINCE MID-MARCH. THIS IS CRUEL TO HIS WIFE OF 60 YEARS AND CHILDREN THAT LOVE HIM. WE SEE CAREGIVERS GOING IN AND OUT WITH PROTECTIVE GEAR, WHY WOULDN'T YOU BE USING THE SAME EQUIPMENT TO LET US IN? PLEASE DON'T SAY ITS BECAUSE OF A LIABILITY.. WHAT CAN WE SIGN? THIS IS WAY TO LONG TO SHUT US OFF. PLEASE FIGURE IT OUT, THERE HAS TO BE AWAY.. MY DADDY DESERVES BETTER THAN WHAT HE'S GETTING. I KNOW COVID-19 IS NOT YOUR FAULT, BUT NOT HIS EITHER ! SINCERELY A SUPPORTER

AMERICAN OVERSIGHT

Sarasota	Please create safe guidelines that work for all those facilities grouped under Long Term Care Facilities. My brother who is 61 years old and mentally retarded lives in a group home in Lee County. He has spent almost every weekend, or longer, with family his entire life. Until COVID-19 hit. He has now not been able to see my parents, or anyone outside of his home, since March. He has not been able to go to LARC, Inc and participate in his normal activities. He misses his family deeply and we miss him. Phone calls and letters are not the same. He needs to get back to a more normal routine. He has already learned about the need to wear a mask and distance himself. On behalf of my parents and myself I am asking you to provide a recommendation of the safest possible course to re-open these facilities and allow visitation with loved ones. Thank you. Sincerely, Wendy Prell, James and Barbara White
Lee	Individuals in group homes operated by the Agency with Persons with Disabilities are subject to many of the decisions and policies that are developed by this group, yet are not represented as part of the process. Their voices, their needs and their circumstances merit attention by policy makers who oft overlook them. Please consider this and add representation.

AMERICAN OVERSIGHT

Polk	Just had a very productive call with the director of operations for my mom's facility. She agrees that ACHA should give the facilities guidelines moving forward. She does not think it would be productve to have each facility doing their own plan. I agree. Put forth some guidelines and let's get started.
Sumter	I heard an idea regarding the opening of schools which could be applied to this problem as well. Test visitors' sense of smell with something potent...an onion comes to mind. Please...I want to see my dad. Thank you!!!!!!!!!! Katie
Leon	We support the leadership of our local management and that of our Orlando management team in keeping us safe and happy.
Leon	Than k you for your service. As it relates to visitation, how will the regulatory agencies respond to caregivers/visitors when certain providers may require caregiver/visitors to sign liability waivers in order to visit their friends or family? Bennett Napier Florida Life Care Residents Association www.flicra.com
Broward	There's an app that a tech company from Ft.Lauderdale created that allows for a safe biosphere at long term care facilities. It tracks COVID-19 testing and creates a QR code that allows access into facilities if the person is COVID negative. I believe the company who created it is called OZ. You should look into it.

AMERICAN OVERSIGHT

Leon

First, I want to express my deep appreciation for your leadership of this Task Force. I have watched two of your meetings, as a very active resident in a CCRC in Tallahassee. My focus has been Assisted Living and Skilled Nursing patient/resident needs for social and spiritual support.

Second I so much appreciate the distinctions you are making, and how you are trying to look at this from a variety of angles.

Two points: it strikes me that it IS within your power, and would be highly desirable, that each facility over which you have some authority be REQUIRED to submit a plan for opening up their facilities, whether or not that are required or encouraged to follow state guidelines.
2) I believe there is a gaping hole in your your definition of a compassionate caregiver. Many residents have deep spiritual needs, and visits from clergy/pastor/rabbi/imam, or even peer spiritual caregiver could be EXTREMELY important. Please add this category to your category! As a retired pastor/pastoral caregiver, I can vouch for how important to a person"s general health such a visit can be. Thank you. I'll tune in again tomorrow! And gratitude for the goodwill and commitment of your entire task force. You make me proud to be in Floridian! :)

Margaret (Greta) Reed

Pasco

This is how other states worded it....
both did NOT 'require" but strongly recommended.....

AMERICAN OVERSIGHT

Broward

Hail Mary squared! Thank you Secretary Mayhew for aggregating the overwhelming amount of information and finally articulating a strategy that makes sense. I'm working with Mary Daniel behind the scenes and appreciate the accelerated movement by the task force to present a workable solution to the Governor soon. As you know, time is of essence for my 85 yr old father and so many others. My mother, his wife of 58 years, should at a minimum, have equal access to him in his Memory Care facility as the staff does that holds his hand and comforts him when he cries everyday. Please make sure she can qualify as an ECG. I'm happy to wait a bit longer for my visitation with him if it allows my parents to be together during these last remaining precious days of their lives! Also, I sense there will be a greater need for PPE support and I have the company to do it. Please contact them for further information or let me know if there will be a procurement process set up at some point. They are a Florida-owned company called https://www.aquabluemedical.com/

AMERICAN OVERSIGHT

Clay

I appreciate all the hard work that each of these individuals do for our loved ones. I know that they have our loved ones' best interest at heart even though each come from a different angle. Thank you, Mary Mayhew, for trying to move these objectives swiftly and smoothly and keep everyone on point.

I just have a few thoughts to add to the discussion today.

I sympathize with Mr. Emmitt Reed and the need to consider the cost of any proposals you make. I understand this is a realistic and necessary consideration. There must be funds available to do the proposals you make. But I also want to encourage Mr. Reed to consider the long term cost of NOT allowing visits to begin to take place. If something does not change and change very soon, I fear this industry is going to begin to suffer financially. Many residents have been taken out of facilities by their family because of the isolation. Other residents are dying from the isolation. And still others will never be placed in a facility because families will refuse to deal with isolation. Empty rooms don't pay bills or salaries.

I appreciate Dr Rivkees and his concern for the safety of the residents, but 28 days is way too long and definitely should not be applied to outside visits. The health risks from isolation far outweigh the minimal COVID risk from outside visits.

Requiring "monitors" to remain through the whole visit

AMERICAN OVERSIGHT

Palm Beach

1. Who in this country (I think it is still the U.S.A.) is not allowed to leave their home or have visitors? Prisoners. Illegal Immigrants held in detention centers. Vulnerable, dependent, disabled elders who have done nothing wrong. * Shame on anyone who supports this barbaric treatment of elders. Who decided it was fine to throw the 5th commandment into the garbage heap? Governor DeSantis.

2. Why are facilities, like the one where my mother lives, allowed to permit private duty aides into the facility, but not family care providers? I spent 7-12 hours a day with my severely limited mother until COVID-19 gave the facility (with DeSantis' and Mary Mayhew's blessing) cover to deprive my mother of my companionship and care. In fact, the facility won't let her have any additional care; she is not one of their "chosen." Just so you know, my mother cannot initiate any communication or requests, and she is blind and immobile. Imagine for one minute what life would be like if you can't initiate a request, or ask for help, or tell someone you are in pain, etc.

To be clear, the facility where my mother resides has contorted the provision in DEM 20-006 for entry of "ANY individual providing necessary health care to a resident," to serve the facility's "needs" (to reduce costs and oversight), not the resident's needs. The people managing this facility are both ignorant of the law (or believe it doesn't apply to them) and cruel. And I assert that the Governor, AHCA and the DOH are complicit in the cruelty.

AMERICAN OVERSIGHT

Leon	On behalf of independent living residents that live in continuing care retirement communities can the Task Force on its August 19th meeting have some discussion relative to visitation protocols. Many independent living residents want/need to visit their loved ones or friends who may be residing in the assisted living or skill nursing portion of their CCRC. Are there any elements that could be considered for people who already live on campus as opposed to a caregiver or visitor who resides outside of the retirement community. There are 30,000 CCRC residents in 71 licensed CCRCs and they have actively been tuning in to the last two meetings. Thank you. Bennett Napier Florida Life Care Residents Association www.flicra.com
Miami-Dade	Dear Governor. Please apply for the loan for us the Floridians to get the extra $300 a week. You know very well no one can live off $275 a week like you have said. No one asked for this Corona virus. But you as our governor we need leadership and for you stand by us. Apply for the loan! We need help!
Hillsborough	I am a single mother to two children. My business dried up with covid. If you keep dragging your feet with this pitiful $300, you will not get my vote as a life long republican and I will actively campaign for your opponent. What youre doing is shameful typical political bs.
Hillsborough	Please please please apply for the funding for the $300
Escambia	Governor DeSantis, please apply for the LWA ——— $300/WK Federal unemployment boost. We, your fellow Florida citizens desperately need this.
Duval	Please apply for the LWA GRANT for unemployment. We are struggling !

AMERICAN OVERSIGHT

Orange	When do you plan on applying for the $300 LWA program . Floridians can not live off of $275 a week. Most of us are unemployed because of the shut down of businesses. I was furloughed from work and have not been called back. So please apply for the $300 LWA to help Floridians.
Orange	People are struggling, no one has asked to be out of work....we are losing our homes, we cant feed our children.....not only did desantis open up the state and knowingly put us all at risk he has done nothing to help anyone be able to survive.....no florida is notflourishing, no there arent jobs so readily available. Stop worrying about your pocket and pay unemployed Floridians who not only didnt ask for this we dont deserve this! You dont deserve to be in your position.....PAY YOUR PEOPLE! APPLY FOR THE LOAN SO WE CAN FEED OUR FAMILIES!
Osceola	I call for DeSantis' resignation for his failure to all Floridians.

AMERICAN OVERSIGHT

Miami-Dade	Governors from Alaska, West Virginia, and North Carolina have also confirmed they will be applying for the LWA Program Grant that would provide their unemployed residents with the $300/week federal supplement. Arizona has already been approved and will begin paying out the $300 to its claimants this week. Florida's Governor Ron DeSantis has yet to speak on the issue or even apply. Meanwhile, millions of Floridians are out of work and attempting to survive off of $125/week. While Governor Ron DeSantis has opted for the second option offered by the mandate of paying out the federal $300 to claimants without a full $100 state chip-in, he has not yet applied. Other states have already applied and been approved to begin the issuing LWA payments of $300/week (federal supplement). So, to make sure it doesn't slip his mind, I urge you to email Governor DeSantis and demand he apply for the LWA funds so that unemployed Floridians can receive some relief while Congress continues negotiating a full package. Please make sure to include the link to the application, in the event it slips his mind: https://www.fema.gov/disasters/coronavirus/supplemental-payments-lost-wages Governor's Email: governorron.desantis@eog.myflorida.com You can also call Governor DeSantis at: (850) 488-7146 Don't let Governor Ron DeSantis keep delaying the
Manatee	Why are you stalling signing the LWA loan? Your holding back funds to the unemployed...people are in peril- I really pray you sort your priorities out soon
Pasco	Why should people vote for ypu when you delay signing the lwa to get the 300$ coming in? Do you realize that your loosing millions of peoples votes?

AMERICAN OVERSIGHT

Pasco	Why haven't you applied for LWA yet? We are suffering. You personally have enough money. I know there is something in this for you or you would of apply for it by now. Be your own man not Trumps boy.Shame on you for not helping us.
Broward	Gov Desantis I beg you to apply for the fema money for all of us on unemployment.
Volusia	Im begging you to please do the lwa loan..and tet us help with this unemployment$...im on the edge of losing what ive worked so hard for...
	I am a Republican and voted for you before..but you have to look out for us floridians..who have lost careers right now...
Volusia	Begging you to please do the 300 lwa loan..hurting very badly..
	Im Republican and voted for you before..we need you to act now please
Volusia	My grandfather is in a long term care facility- Assisted Living, his health, mentally and physically has declined rapidly after he lost my grandmother in April from reasons OTHER then COVID-19. COVID-19 has not made it any better, he's lonely, depressed, and in a horrible state of mind. The workers can come and go as they please, and are the ones who take care of our loved ones. Why cant the family see there loved one, especially if that loved one has dementia/Alzheimer's, not being able to spend quality time makes things worse. This needs to be opened at least "Limited" so that families can get to see their loved ones who are suffering in these facilities, they lock them down, they can't do much with other residents, they dont get real companion.

AMERICAN OVERSIGHT

Pinellas

Governor Desantis,

We the people are BEGGING you to not make us homeless. I was a hospitality employee and as you surely know there are no job openings in hospitality with our current state of half open. The few lucky individuals who were able to keep employment have had their wages slashed and are still clinging on to stay afloat while the rest of us are unable to find a spot for ourselves. There simply isn't enough room for everyone until things are under control.

Please do not leave a million people hanging to be evicted, behind on mortgage/rent to the point where even if an eviction is delayed still inevitable, unable to pay electric and utilities and ultimately homeless and unable to provide food for our families.

Thank you,

Sarah Martin
Pinellas County

AMERICAN OVERSIGHT

Duval	Governor Ron DeSantis, You said you are planning on increasing the weekly unemployment benefit with money from a federal loan. This increase would significantly help claimants currently receiving below $100 qualify for the $300/week LWA federal supplement. This includes me, and I desperately need it. The LWA Implementation Grant application is now available for states to request the FEMA funding necessary to execute the unemployment extension mandated by the President's Executive Order. While Governor you have opted for the second option offered by the mandate of paying out the federal $300 to claimants without a full $100 state chip-in, you have yet to confirm when this program will begin claimant payouts. As of today, we do not know if you have even begun the application process. Governor DeSantis please please apply for the LWA funds so that we unemployed Floridians can receive some relief while Congress continues negotiating a full package. https://www.fema.gov/disasters/coronavirus/supplemental-payments-lost-wages If you had the power to do what you did with the Sheriff in Clay County, you have the power to make the lives of Floridians easier. If Rick Scott did what he did, you can reverse his course of action and put it back to what it used to be.
Volusia	Governor - We implore you to do the right thing. Do not delay in applying for the LWA funds for the people of Florida. You need to apply for the citizens Florida. Stop screwing us over. Submit the application.
Lee	I would like to know why the governor has not si duo for the LWA grant from fema? We at least deserve the decency of keeping us up to date.

AMERICAN OVERSIGHT

Polk	I f you don't apply to extend the federal $300 and extra $100 from the state I will be a homeless with my family of 4 . Please do it, my hotel Hilton they email me that they are not opening next month 😐😐
Volusia	Apply for the LWAProgram Grant or you'll have thousands living in the streets in a few weeks!
Okaloosa	I am an hairstylist in 2 assisted living facilities It is becoming a health issue for the residents that haven't had any hair or nail services since March I also need federal unemployment I'm drawing 121 a week!! I'm dying!!!
Pinellas	Please, please, please apply for this grant immediately so unemployed-through-no-fault-of-their-own Floridians can eat and have a roof over their heads. I am missing $2,065 in unemployment from April and May that I have spent countless hours over 3 months trying to retrieve due to the messed up Connect website. My days consist of fruitless DEO contact attempts - phone and email. It is such an unnecessary and frustrating waste of time. It seems you do not care about us at all. One of the unemployment Facebook groups I belong to, there are a few people that have even been suicidal over lack of unemployment payments and not being able to reach anyone at the DEO. It is so sad and heartbreaking to watch people suffer. Florida is not only a US laughing stock, but a global one due to lack of pandemic leadership and the messed up unemployment system. I am ashamed to be an American. Please do the right thing in a timely manner for us struggling Floridians as we cannot live on the meager allowances we may or may not even receive!

AMERICAN OVERSIGHT

Manatee	Governor Desantis, We are begging you, please apply for the lost wages loan. We desperately need these $300 federal weekly payments. At this point we dont care about the $100 chip in. We will be happy with the $300. We voted you in office to be our governor because we believed in you and believed that you would do the right thing and stand up for us(the people) but you are failing us right now. ARIZONA has a low max for unemployment just like us, they are a little lower than us and their governor already applied and got approved and started paying their people today. Why are you doing this to us making us wonder if we are going to be able to survive this. I make 448 every 2 weeks so 888 a month thats not enough to pay my Bill's after mymain bill RENT $238 is what I'm left with for electric, food, water, and phone. Please stand up for us and help us start recieving the federal extension. Thank you for your time Chelsea
Charlotte	$494 every 2 weeks is not going to pay my mortgage and electric. Stop being stupid and help Florida instead of constantly blaming other people. Pretty sure you will not be voted back into office. I hope you struggle and have to live out of your car someday.
Miami-Dade	Gov. DeSantis apply for the LWA program grant and being paying unemployed residents the $300 per week we desperately need.

AMERICAN OVERSIGHT

Pasco	Why do you keep stalling on the federal extension for your people. People who are hanging on by a strand financially, which leads to them hanging on by a strand mentally. People who are, to no fault of their own, without jobs. People who are just trying to feed their families and pay their bills. Imagine if you had to try and survive off of $173 a week!
Pinellas	I am a 65 year old woman, going through divorce, single income. My job was done away with. I am living on $275 a week. Will you please approve the $300 so I can pay my bill's and at least be able to eat a decent meal?
Seminole	When are you going to apply for the federal extension for us who are still unemployed in Florida!???? Don't you care about your people.
Manatee	Lets worry about the people who are unemployed and give us the $300.00 a week. We voted you in, its now time you did something for the common people. I work for a Non for Profit Veterans organization. We can't set outside stores and collect donations because of covid19. Therefore, I can't work. Manatee keeps having high cases and you want to open nursing homes. Unbelievable!!!
Orange	Any chance us unemployed individuals can receive our federal funds? We do have mortgages and rents to pay,as well as, children to feed! I mean what's going on I have paid taxes for years! Now I'm needing help and can't seem to get it!!!!!
Sarasota	please file for the 300 benefit from government. What are you waiting for us to be homeless and starving our kids????? I can't get food stamps because apparently 275 is to much income. Please. This will be remembered clme election time.

AMERICAN OVERSIGHT

St. Lucie	Hello, We the people of Florida would like to know why your ignoring us?We urge you to apply for the LWA program? You have not addressed this issue to us and we demand to know what's going on. Please help us and apply! Thank you.
Brevard	Please apply for the states federal funding. I am still recovering from having covid19 & can not return to work yet. I will not be able to survive without the federal help!!! Please do the right thing for the satiate of Florida!!!!!!
Osceola	Please open up so senior apartment buildings can allow immediate family in to visit and help those that cannot do everything at their apartments. These are not long term facilities and the family members/friends need help to clean, organize and simply have some company from time to time even if just immediate family/caregivers and screening process is in place. I This lock down is taking its toll on family and friends being isolated and affecting their mental state of mind. I completely understand and appreciate the safety precautions but how can you prevent residents that pay rent from having guests/visitors in their apartment home. Thank you
Collier	Governor Desantis please apply for the LWA grant immediately. Unemployed Floridians are suffering!

AMERICAN OVERSIGHT

Lee	When are you going to apply for the LWA grant for your unemployed Floridians? Other states have already been approved meanwhile your Floridians are losing their homes and starving
Orange	Can you please help the unemployed Floridians? HOW ARE WE TO PAY OUR BILLS? WE NEED HELP NOW? NOT SOME BS FROM TRUMP. WHY WON'T ANYONE LISTEN TO US? THE HOSPITALITY AND TOURISM BUSINESS HAS CRUMBLED AND NO ONE SEEMS TO CARE ABOUT THE WORKERS? HELP US NOW. ——$300 FEDERAL SUPPLEMENT TO BEGIN GOING OUT THIS WEEK IN ARIZONA. FLORIDA HAS NOT YET APPLIED. KEEP THE EMAILS GOING. While Governor Ron DeSantis has opted for the second option offered by the mandate of paying out the federal $300 to claimants without a full $100 state chip-in, he has not yet applied. Other states have already applied and been approved to begin the issuing LWA payments of $300/week (federal supplement).
Miami-Dade	Señor Gobernador, por favor estamos desesperados, solicite la subvención LWA para poder recibir los fondos del desempleo, con $121 dolares a la semana no puedo pagar mis utilidades, ya he agotado mis ahorros y debo 2 meses de mi renta. AYUDA PLEASE!!!

AMERICAN OVERSIGHT

Hillsborough	Unfortunately, the movement to open long-term health care facilities is premature as evidenced by the continuing incidences of COVID-19. The risk to residents is too high as the virus cannot be satisfactorily controlled, no matter what precautions are taken. The virus is too infectious and science does not have a clear picture of the proper remedies. Until vaccines are developed, access should be withheld.
Collier	Why haven't you applied for the LWA? We can't survive on $247 week! Can you?
Okaloosa	I appreciate all that the task force is doing! I don't see much mentioned about guardians. I am my mom's guardian - so basically I am the parent and she is the child. I have responsibilities mandated by law that I have been unable to accomplish - inspecting her living conditions is one that comes to mind. I know you are focused on family members who are caregivers as your #1 priority, but, I hope you consider guardians when making recommendations. thank you and keep up the good work! Carol Mullins-Hernandez 850-240-0616
Miami-Dade	Hi as stated above I'm one of the many struggling Floridians that are unemployed which it has being very hard for me since I lost my job my side hustle/gig which the sba have not even issued my grant so I'm struggling. So I ask as a humble employee of Florida that the governor apply for the 300 federal payment and also increase the Florida 275 attolment to a 400 too so it may help people that mostly need it like me. Thank you

AMERICAN OVERSIGHT

Palm Beach

Beyond the obvious facts that . . .

1. The Governor, his clan, and all in power who have not spoken up, have effectively imprisoned (and I argue illegally) hundreds of thousands of vulnerable, dependent elders who have done nothing to deserve such treatment.

2. The Governor, his clan, and all in power who have not spoken up, have arrogantly denied these citizens THEIR RIGHT to decide if they want higher risk in exchange for visitors and the right to leave their homes.

The Governor, his clan, and all those in power who have not spoken up, have also put these vulnerable dependent elders who have done nothing wrong in a situation that is seriously detrimental to their health -- from isolation, not from COVID-19.

From the CDC:

"Loneliness and Social Isolation Linked to Serious Health Conditions"

Social isolation significantly increased a person's risk of premature death from all causes, a risk that may rival those of smoking, obesity, and physical inactivity.1

Social isolation was associated with about a 50% percent increased risk of dementia.1

Poor social relationships (characterized by social

Orange	Governor DeSantis, Why do you continue to ignore the needs of struggling unemployed FloridianS?? Why have you not applied for the LWA Program grant in order to begin paying unemployed Florida residents the $300/week they so desperately need? Why??? Tiffany Ashbaugh
Hillsborough	If possible, Senator Marco Rubio's office would like a copy of the final recommendations. Please feel free to reach out to myself or the Regional Director at taylor_sanchez@rubio.senate.gov. Additionally, our healthcare staffer can be contacted at Jaime_varela@rubio.senate.gov

AMERICAN OVERSIGHT

Clay

I responded yesterday, but I forgot a couple of things. I don't know that you will read this before the meeting the today, but I will have at least tried.

Mr. Reed mentioned the critical stage of short staffing currently in the nursing homes. Mary Daniel pointed our several times that is when family members are needed most by the facilities. I totally agree with her. Nursing homes are always short staffed. Having worked in and with nursing homes for years, I know that the high turnover rate and staffing shortages have been issues long before COVID. It comes from the nature of the work required. On the days that my Mom's nursing home was short staffed, I would dress her, feed her, shower her, and/or change her bed linens. Those were the days she and the staff needed me the most!!

Can Ombudsman be listed as a separate category from essential caregivers and general visits? Something more along the lines of a doctor's visit?

Please, don't forget the hairdressers Mr. Reed mentioned in the first meeting!

My Father , Art Axelson , resides at Clyde Lassen State Nursing Home in St Augustine Fl
He is 96 yrs old . He is almost deaf, blind in one eye and extreme Macular degeneration has about taken total sight in the other eye.
He is at the point of walking has become a problem also however hes a tough old guy. He walks every day and We speak to him every day with much difficulty due to his loss of hearing.
He has raised 6 kids , served in the military, been through the depression, lost his wife of 60 years in 2009. The only thing that is keeping him around is the day he will be able to wrap his arms around us and feel our hugs! Hes an amazing man and has been his whole life. I understand & appreciate your rules so people wont die from this virus but physical contact possibly in a suit and mask would be an alternative to no contact at all ? I know that my dad would surely die just from knowing he could never hug his kids again which he has stated many times recently. I understand your challenges and pray for this horrible virus to go away. I really Hate thinking about how many elderly are passing just from loneliness .
I pray your team will make the right decision for all of our loved ones. God Bless our parents and keep them safe.

Duval	Essential Caregivers or Compassionate Visitors? I do not feed them or bath my Wards, I am there Legal Guardian per The Duval Court. What about Legal Guardians? I have 2 people Im responsible for, my mother in law and father in law. I was told by my mother in laws doctor her dementia has gotten much worse. They were use to me visiting them several times a week and taking them out to lunch etc. They have not been able to have any contact with me as there Guardian and the dementia has gotten worse. I ask that you include Guardians not just Essential Caregivers or Compassionate Caregivers. Thank you- Laura Brantly
Palm Beach	Please give us the 300 a week
Palm Beach	As an unemployed Floridian,I am asking for you to PLEASE HELP me and the millions of others who desperately need the additional aid of $300.00. And to work out the problems with the Connect site! It's been months and I'm not fully paid yet.
Lake	Florida has become 1 of the most destitute states. Our paradise is no more because we're starving and homeless. Our Governor doesn't care. He's proving that with every moment that ticks by and he hasn't applied for the LWA funding. He is rightfully earning the nickname given as Ron DeathSentence.

AMERICAN OVERSIGHT

Hillsborough	Please allow essential caregivers also private sitters. The sitters are paid for by the family Please imagine if this was you! You have been in a bed since MARCH, malnourished, just a room number. Just go lie in your bed for one day, not able to position yourself, your cries are ignored you are sitting in feces and thirsty. This is the reality of many residents. Please HELP them! You don't believe me? Go in an inner city nursing home unannounced, you will think you are in a haunted house. PLEASE!
Highlands	When you make decisions regarding re-opening we ask that you please consider direction to providers who run group homes that serve individuals with intellectual and developmental disabilities. This is a very important group of vulnerable individuals in our state.
Orange	Why is the Governor not applying for the additional FEMA funds for unemployed Floridians? He keeps letting us down by his lack of with DEO. He's defunding Floridians!!!
Putnam	I feel there should be a limited opening for ALF's my daughter has been on lockdown since March. We have missed her birthday and Easter and many visits. We can visit looking through bars. I feel that clients that have r responsible family she should be able to come home. I don't really want her going to stores where there's all lot of people because the state will not mandate face covering . Thank you
Palm Beach	Enough is enough! My 96 year old mom will not eat unless she gets to see me. If schools are reopening, then, with all the rigid precautions necessary, so might my mom's facility.

AMERICAN OVERSIGHT

Monroe

Hundreds of thousands of Florida citizens cannot pay rent, utilities, or put food on the table. Why? Because on top of the miniscule unemployment stipend doled out by the state, YOU have not applied for the new $300 weekly federal benefit. WHY? WHAT ARE YOU WAITING FOR? Do you sleep well in your cozy bed, in your cozy mansion, after eating your nice dinner every night? People are struggling like never before, and you have to sympathy or empathy. All you have to do is apply for federal money. That's all. Well, you could do so much more, but right now, right now, apply for the money! Do you think that hungry people will forget this when you're running for re-election? No one will forget that you callously chose to do NOTHING to help.

AMERICAN OVERSIGHT

Volusia

I am a retired RN and daughter of a WE2 Veteran @ CE Lassen VA Home/St Augustine. This lockdown has greatly affected my father and others in this home. Depression, lack of care and delayed care even deaths have occurred. The facility has poor conditions where money has not been used to fix A/C, leaky roofs, dilapidated patios, and more. Now the veteran are confined in a prison like lockdown against their will!

My dad wants to know, "Why am I a prisioner?...Did I not fight for my country's freedom?" Good question, I believe this is a civil liberties question and they are being violated. There is no Great disaster looming, no curve to be flattened and only 1 Covid case in a veteran and that was over a month ago. It's the employees bringing it in. With the new testing this will eliminated for everyone.
The physical and emotional needs are ignored. My dad's nearly died 2x from lack and delayed care and now his heart has been permanently damaged.
I am his HCS and he needs me by his side.

I want to be on the task force! Please call me. Also, the ombudsman should be on and AHCA! Hope to hear from you soon.
Thank you!

AMERICAN OVERSIGHT

Orange

Governor Desantis,

We are begging you, please apply for the lost wages loan. We desperately need these $300 federal weekly payments. At this point we dont care about the $100 chip in. We will be happy with the $300. We voted you in office to be our governor because we believed in you and believed that you would do the right thing and stand up for us(the people) but you are failing us right now. ARIZONA has a low max for unemployment just like us, they are a little lower than us and their governor already applied and got approved and started paying their people today. Why are you doing this to us making us wonder if we are going to be able to survive this. I make 448 every 2 weeks so 888 a month is not enough to pay the monthly bills. Please stand up for us and help us start receiving the federal extension.

Thank you for your time
Michael

Putnam

It's time that we get back to our normal lives just like everybody else. We can't just be sitting around waiting for people we have never met to decide the fate of our lives. To reopen, wear your mask, wash your hands, and stay six feet apart just like everyone else does. They cannot keep us stuck in the home forever. We should be allowed to come and go just like everyone else does. I just can't wait to get back to normal. I know it won't happen right off the bat, but it will slowly reopen. We have been stuck and unable to see our friends for five months.

AMERICAN OVERSIGHT

St. Johns	Good day. My in-laws moved to Florida just a little over a year ago. They currently reside in an ALF located in Duval County (Brookdale Mandarin). My wife , Catherine, and I have been their caregiver since they moved here in July 2019. We shop for them, assist with dressing, assist with bathing, clean and tidy their apartment, occasionally make meals. Before the pandemic access was easy and it was no trouble to do this. My father-in-law passed away in December 2019 leaving my mother-in-law on her own. Since the lockdown it has been a struggle to perform even the most basic of the above duties. While the ALF has been great the time has come to let assigned family caregivers access to our loved ones. We will do whatever is asked of us but we need access now. Our loved ones are declining rapidly without family members around to assist them. Thank you.
Broward	Dear governor I know this is a very difficult task for you at hand and with what is going on in the country right now it must be very daunting task. unemployment never qualified me for the right amount of benefits I was working two jobs 7 days a week not making a lot of money but enough to survive and im.asking that you please consider those who are earning less than $100 a week I am currently living on $83 a week and I would appreciate it if you could speed up the process and help us to receive the extra Federal money as I will not be able to survive we need your help Governor thank you and God bless I live in Broward County and currently my job is still not going back yet

AMERICAN OVERSIGHT

Pinellas

I certainly understand the need for visitation as an long time administrator for ALF's. However the risk is so great that we have serious concerns about visitors as we discovered early on family was prone to not telling the truth and actually was providing misleading information when it came to taking their loved one to an out side physician. Our first case in our building was caused by this. A family stated that they were taking their dad to his physician to get a new 1823 filled out and they would go directly to the Dr and back. This proved not to be the case. The family did take to the Dr on a Monday and returned him to us on Wednesday he tested negative and moved to another Alf on Friday he tested positive for Covid. The family called us to let us know that he had tested positive and then told us what they had done. they took him to Dr and then out to lunch and then to a barber shop. We got our first case on Wednesday right in the middle of this episode. The ease of transmission among the elderly is extremely quick and fast once it gets in He was in our memory care unit. bu the end of this episode 12 residents were infected with the virus and 7 staff. I am extremely concerned with this most of my families now completely understand why they cant visit from what happened and we all have made the best with virtual visits. I just have no idea how we avid liability if someone was to die from it walking in the building. My Dr's who work within our building and all against visitation due to the frailty of our residents and their health concerns. We would need to have the ability to test all residents on a weekly basis to make sure it would not get in to the building and us not know.

AMERICAN OVERSIGHT

Okaloosa	Is the Governor going to address the Lost Wages Assistance program which was signed as an executive order by President Trump on August 8th? There has been silence on the matter thus far. FEMA requires that applications be submitted before September 10th. As of 8/19/20 the State of Florida has yet to apply for funding for this program created by our President and 13 other Governors have responded already to the program. What is Governor Desantis doing to ensure that Floridians will not be facing the continuing economic burden of Covid 19 under one of the poorest and low paying unemployment systems in the United States of America? Will the WBA be increased with a loan from the Federal government? Will the Governor be applying for the LWA program and if so when? Millions of Floridians deserve to receive information on what is happening with these programs. Information is critical during these times. Thank you for your time and consideration. Stay safe.
St. Johns	Anxious to hear why independent living facilities are on the shut down list - are they not different than nursing homes and assisted living facilities? Thank you

AMERICAN OVERSIGHT

Pinellas	SIGN UP FOR LWA GRANT NOW. Many Floridians income is dependent upon tourism, it is dangerous to try to attract tourism currently and international tourism is decidedly out of the question. There are not enough jobs to go around to fill in the gaps that COVID has left our state. I am an event worker, mainly working in tradeshows. From what I have heard from bosses and other people who are more in the know nationally than I am, my old job will not really start to reopen until MAYBE late 2021. I watched the tradeshow industry try to rebuild after 2008, and it took a decade to maybe get back to the scale it was pre subprime mortgage crisis. There are huge swaths of industry in our state that have CEASED TO EXIST. It is not a simple as just 'trying something else.' The job market, because of scarcity, is incredibly competitive, and there are not enough jobs for all. We must do everything in our power to avoid an eviction crisis. We must be good christians and care about our neighbors who are suffering because of this catastrophe. We must come together and help each other, and forcing people without health insurance into service industry jobs in order to keep the more fortunate placated is NOT a valid option. EXTEND UNEMPLOYMENT NOW.
Palm Beach	I demanding Governor DeSantis apply for the LWA Program grant and begin paying unemployed residents the $300/week.

AMERICAN OVERSIGHT

Broward	I am one of the Floridians is the high risk group I took medical leave after being furloughed in March ending in May I just cut short that leave to return to work due to the lack of livable amount of money from unemployment terrible decision to make health or work
Volusia	people of Florida are in dire straights...in need of Covid relief funds! This lag will cost dearly.
St. Lucie	Shane on you as Governor. Floridians need your help! People are dying if this Covid-19. Your talks about mental health...all of the people that need your help are going to have mental health issues thanks to you and you're not helping us.
Duval	DeSantis. I am a government employee furloughed right now. Single mom of four boys. Your enforcing school next week WHILE cutting my unemployment and requiring we pay extra PPE cost for schools. We are not just the lazy jobless. We are you. You are me. You are us! Our voice. YOUR PEOPLE NEED YOU to apply for the LWA loans.
Palm Beach	You claim to care so much about Mental Health yet you are not addressing or applying for this FEMA Grant for unemployment. Nor are you addressing any of this with your constituents. 14 days has gone by since the president signed the executive order yet you still have not made any kind of announcement or any kind of press conference regarding these issues. You are hanging Floridians out to dry. You don't care about people's mental health. Don't you think that it's going to hinder someone's mental health that they cannot pay their bills? People collecting unemployment through no fault of their own due to a world pandemic and you are talkin about every single thing other than unemployment situation and the grant from FEMA. People are starving and losing their homes, cars Etc and you refuse to address this and choose to ignore it!

AMERICAN OVERSIGHT

Putnam	I currently live in an ALF with the Arc of Putnam county I would like to share how the COVID restriction have affected me, and the other residents where I live as well as in the other homes. . These restrictions are having devastating effects on all of us, and something must change, and soon before it's too late. For me personally my doctor had to increase my anxiety medication just to help me get through it. At this ALF we have our own apartment. My Dad has only been allowed to drop things off for me at our gate, and say hello, once every three weeks I am grateful that I get to see him, but to not be allowed to touch him is making me go downhill very quickly, because he is the only parent I have left. My Mom passed away almost 16 months ago, and I always visited her gravesite twice a month on anniversary dates, and dates that are important to me. It has helped me cope more than anything else, and now I can't even do that. I haven't been since March, I missed my first birthday without her, and the 12 month anniversary of her passing which are only three days apart as well as many other things.
Palm Beach	I have a few suggestions on how you can begin the reopening process. Similar to how things are done when you go to the doctor. Have everyone's temperature checked, and ask them the COVID screening questions. Everyone should be required to watch a mask, and possibly gloves, and in the beginning limit it to only meeting the common areas such a the living and dinning room. another idea could What about UNEMPLOYMENT PLEASE APPLY FOR LWA LIAN HELP HELP WE WANT TO WORK WE ARE WAITING ON YOU

AMERICAN OVERSIGHT

Palm Beach	Mental Health is most impact due to financial hardship, that is where most suicide occurs. If you care for it why aren't you taking car of the hard working family, We have Jobs no work, some of us working on reduced hours. YOu would not make your wife live on $125 a week with children, so why are you doing it to other mothers". Children are having high anxiety watching their parents struggling and fearing losing their roof. Treat people with humanity with dignity raise unemployment. Help families
Pinellas	Please apply for the LWA!!! Even Alabama has!!
Broward	I am a single mother with two school aged children who can not be left home alone and was furloughed due to covid 19. Without the extra $300 I will loose everything I worked hard for since I was 16 years old.

AMERICAN OVERSIGHT

Hillsborough

With regards to Essential Caregivers and Compassionate Caregivers. My mother is an example of an 85-year-old woman that receives medical management and does NOT need dressing or bathing assistance, but emotional support. She does have a bit of cognitive decline and chronic UTI's, and anxiety can run high at times. I believe that the emotional support and the ability to monitor her health is as critical as anything on a list of determining criteria. Her care plan would not support any feeding or bathing that is needed.

I am also her Health Surrogate and POA. She has had one hospital visit over July 4th weekend, that I truly believe would not have been necessary if I had been allowed to be visiting like normal for assessment.

This hospital visit created a lot more anxiety and logistics that was totally not necessary.

In the case of dementia beginning stage to late, the emotional support is key for further decline.

I am also concerned that a Director of Nursing or Executive Director could slam the door shut on a case by case basis, which would also be a disaster for residents. Right now it is very difficult for someone like my Mother on the ALF side to understand why some in Memory Care with hospice help are allowed to have family and friends come in. I would hope the criteria would be wide enough that there would not be any discrimination or partial subjective decisions by the leadership of a community.

Secretary Mayhew, I am watching every moment of this Essential Caregivers Task Force and comments of the Caregivers Facebook. My mom is at Blountstown Health and Rehab, whose corporate office is in North Carolina. I have presented the order and clarification memo twice and they will not even discuss. My mother has digressed approximately 50% in 6 months, including loss of ability to feed herself, dress herself and basic desire to live! I cover these meetings with her every night and it is giving her hope.

I am begging that we begin the ESSENTIAL CAREGIVER IMMEDIATELY so that I may get through the red tape asap. I did spend several hours every single day with mom prior to COVID. I now visit every day through a window!

I just submitted to Covid test this week in case this is approved!

And I thank you so much for keeping moms hope alive!

AMERICAN OVERSIGHT

Leon	Please, PLEASE include in the report on relaxing guidelines admitting chaplains, pastors, deacons, etc as the case may be to provide spiritual care to residents. This can be vital. Thank you so much for your leadership. I have admired the way this task force has worked together, and the fair and expert way that you, Mary Mayhew, have executed your role as head of the Task Force– always asking people for their views, and allowing for discussion, and trying to reach consensus among people representing many different interests! Thank you, thank you, thank you! Greta Reed
Clay	Thank you so much for an extremely productive meeting! And thank you for all the hard work you have done and are doing to safely open our long term care facilities back up! Thank you for giving Mary the opportunity to represent us and for listening to her. I believe there is finally hope.
Sarasota	Hoping you will soon open things up again so we can visit my 91 year old mom. (Bet you haven't heard that before!) I realize that you're doing what you feel is best, but you also need to take into consideration the emotional and mental impact on everyone. We appreciate all that you've done to protect elderly loved ones in Florida. Sure glad she's not in New York!! Life is short -- and at 91, it looks even shorter! We've cried enough tears long distance - we need hugs! Prayers to you all for making changes we can all agree with -- AND live with. God bless you! Better days are ahead!

AMERICAN OVERSIGHT

Miami-Dade	I am all for the Governor opening LTC facilities, but what concerns me the most is that if we still haven't gotten control of this virus, how are we going to prevent it from entering these facilities if you open up the flood gates? And what's going to happen if these facilities that have managed to prevent Covid from coming into their facilities all these months suddenly get an invasion of this virus? Is AHCA going to cite them with a deficiency? Are families going to sue these facilities if their family members start getting sick and die from this virus? It's unfortunate that this is happening not only to the families but to most importantly to the residents, but it would be devastating for all if the consequences of letting visitors back in And creating havoc !
Duval	We appreciate the work of the Governor's task force. Attached please find find our thoughts on how we might proceed in reopening facilities. Martin Goetz, River Garden Hebrew Home for the Aged
Sarasota	I am a single mother who has worked as a server since she was 18.. The only times I was ever on unemployment were when the places I worked closed down..And I have always looked for work while on unemployment but this situation right here is different I was let go back when the reopening started and any job worth having is out of season for me.. if I go and try to do the job I do I will be lucky to get 15 hours a week.. I simply cannot provide for my children and me on 15 hours a week.. I pray every day that this terrible pandemic will be resolved and I can go back to doing what I actually love doing but until then I need help.. it's not easy for me to ask but I do I need help to be able to provide for my family.. please take the Trump money or apply for the loan but please make it fast.. I don't even have a car for us to live in.

AMERICAN OVERSIGHT

Osceola

Dear governor Desantis,

I am writing the email in the most desperate of times, please apply for the unemployment fund, your people are suffering. We need you, sir. We need someone strong enough to help us thru this terrifying and historical time. What you do for us now will be remembered. Please help. We are begging you...

Duval

Please expand essential caregiver to include emotional support. My mother has alzheimers and is in a skilled nursing home where they have no real visitation possibility for someone with dementia who doesn't understand why she cannot get on the other side of plexiglass wall and just becomes angry when given the opportunity to "visit" through it. Her grasp on reality is rapidly diminishing. I'm the one who can reduce the anxiety and make her smile. They do no formal activities, they eat in their doorways with as little contact with others as possible. She often calls to tell me she'd rather be dead- one lucid thought she has- or in a state of delusion that requires a lot of lying to calm her down.
This isolation is not saving her- it is killing her.

AMERICAN OVERSIGHT

Broward	I Marlene Stewart Rn am recommending myself as an essential caregiver for my mother Margaret a resident of Palm Gardens of Aventura Florida. The facility has been in lock down ordered by Gov. DeSantis since March 2020. My mother a former registeted nurse has dementia. I would greatly appreciate a change in this mandatory lockdown. Nursing homes are understaffed and overworked. This is where we as caregivers come in, as we have always done. The residents did not work all their lives to end up in a dead end, without family support at this critical stage of their lives. Politicians can afford to have private nursing care should their love ones need home care. They would be the first to say this mandatory, solitary, prison confinement is unfair. Seniors need us as advocates to speak for them as essential caregivers. Thank you Task force for listening to me. I am an essential caregiver. A Registered telemetry/medical surgical nurse for 34 years. My mother needs me.
Palm Beach	I demand that Governor DeSantis apply for the LWA Program grant and begin paying unemployed residents the $300/week they so desperately need.

AMERICAN OVERSIGHT

Seminole

The following was sent to Dr. Robert Redfield, CDC Director:
Dr. Redfield,
The CDC needs to assess and include clear face masks for use among people who need full facial recognition for communication, including the deaf, hearing impaired, autistic and dementia. Your section on "Feasibility and Adaptations" on https://www.cdc.gov/coronavirus/2019-ncov/prevent-getting-sick/cloth-face-cover-guidance.html needs to acknowledge the benefits of clear face masks for those who be safe but read lips and view smiles and expressions now blocked by the solid mask. On June 8, 2020 the ASHA wrote to Dr. Redfield "to revise its current recommendations to emphasize the need for clear face masks."
https://finance.yahoo.com/news/asha-cdc-recognize-clear-face-224000900.html
I have yet to see a response.
The Lions of District 35-O Hearing Program in Central Florida have created a new volunteer service to provide over 1,000 Clear Face Masks and Face Shields over the last two months to those who need these devices to improve their quality of life and safety. My wife Nancy has Alzheimer's and is in the Arden Courts of Winter Springs Memory Care Community. She needs her life improved by seeing the smiles and expressions of the personnel who provide daily services for her. I am encouraged that Florida Governor Ron DeSantis' Task Force on the Safe and Limited Re-Opening of Long-Term Care Facilities will soon finalize their recommendations. Once Florida

AMERICAN OVERSIGHT

Lake

My mother suffered a very bad stroke last March and has suffered from aphasia and severe confusion since. After stroke I moved her from Chicago to Florida and she has been living in a memory care community since. Despite her dementia my mother is a very stubborn and independent women and because of her confusion she is often unwilling for CNAs to assist her. So much so that she has become very agitated and has struck a CNA on occasion when they were being too insistent (no means no). Prior to COVID I was able to assist with her bathing and general upkeep of her room (she doesn't like the housekeepers coming in). Since COVID I'm NOT ALLOWED to provide this "essential" assistance. The memory care community has tried to find creative ways that we can keep in touch with our loved ones but with 60 residents it means the family only gets one visit every two weeks. It breaks my heart when I do get to talk with her and she cries because her kids don't come to see her. At times, when I am allowed a "contactless visit" she either can't or won't get out of bed to come to the front lobby for a visit making the time between visits very long which just increases her depression and sadness. I understand the importance to keep the other residents in the community safe and I would totally agree to testing, PPE and any other requirements imposed just so I can visit my mom. In my opinion this lockdown is HEARTLESS it has made prisoners of our elderly robbing them of every last bit of joy they might have experienced in their last remaining days, months, or years. What on earth have they done to be treated

AMERICAN OVERSIGHT

Alachua

Dear Governor DeSantis and Members of the Task Force,

My name is Patricia Baker and I am seeking in-house visitation with my Mother at The Plaza Healthcare Care Center in Gainesville, FL.

My Mother, Mary Margaret Lovely, is currently a patient at the facility. She is 92 years old and has been a patient in this nursing facility for four years this October. She has Alzheimer's and is in a wheelchair. I go to see her almost every day. However, it has not been easy and I have been moved from location to location. Different doors, different windows in the shrubs in the rain in the sun. My Mom is receiving hospice care with Vitas Hospice Healthcare at the facility, though she is not at the end of life stage yet. She is still in her room.

During the pandemic, her doctor told me months ago that I should ask the nurses to feed her because she would always eat for me. Despite my efforts, my request was denied by the Director of Nursing. The only thing they did was call me to ask to put her on an appetite enhancer. She gained 1 pound and I tried again to request to feed her but it was denied again. At this point, I am very concerned because she is still hardly eating and is extremely thin. My mother is 5ft 7 inches tall with a larger frame. As a result of her not eating, she has went from a size XL blouse to a medium sized blouse and size 14 slacks which are both too loose on her. Every time I see her it deeply I haven't been able to assist my husband in over five months. He is running out of time. I need to get into the the LTC facility and see if I can reverse this downward spiral. I need help now. When can I be allowed to save my husband's life ?

St. Johns

AMERICAN OVERSIGHT

Indian River	Florida nursing homes must be opened to husbands and wives of the residents. They are the compassionate care givers needed for the well being of the individual resident.
Alachua	Re. the 14 day criteria, in the facility where my husband is isolated, it is the EMPLOYEES who are getting the virus. They are temperature tested when they enter and must wear PPEs at all times. However, during the bi-weekly testing it seems that, each time, one of the employees (CNA, etc) is found to be asymptomatic positive. THEY are the ones going out into the community, mingling with their family and friends. With the 14 day requirement, I feel that I will NEVER be able to be providing the physical and emotional care that my husband needs from me.

AMERICAN OVERSIGHT

Orange

Our loved ones have been isolated to save them but the isolation is killing them. We need help NOW! There has to be a better way!"

My FIL is getting worse by the day. Before this he was out of his room exercising, playing bingo and eating on his own in the dining area. No is bed bound and some else must feed him. I would love to be the one.

Our visits gave him a schedule. We brought him a donut and coffee every morning at 6:30. He knew if he woke up during the night and his donut was not there it was to early and he should go back to sleep. During the day he would call us if he felt the nurses where not being nice or not acting fast enough. We could run up there and calm him down and hand him his remote. In the evening, we played a fierce game of "Go Fish", Facetime with other family members that lived far away and shared our day.

The SNF he is at discourages window visits. So much so, that have pad locked the gate so no one can get to the windows. Although, now he would not be able to get to the window.

PLEASE do something before it is too late. No one should spend there last days alone and confused.

AMERICAN OVERSIGHT

Seminole

When do we get to go outside??? Nurses and CNA people get to leave the building and come back inside. they have their tempatures taken each time they return to our nursing home. Why cannot we be given the same courtousey?? I would like to be with my wife,in the car, to go , for an outside meal.I would stay in the car at all times., I can see my lovely wife thru the window. Do you see your wife?? It has been 6 months,since this covid-19 started. Other people are able to go outside. Why not us?? They cannot go to many places but can move FREELY Why cannot certain people be allowed the same Priveledge?? I am a veteran. I am asking for consideration. What happens if I have to go to the VA ?? I know you have your hands full,but I think a reply is a proper to answer my concerns. I am in the LutheranNursing Home at the present. It is in Oveido,Fl. 32765 . I am in a hospital bed. When I get up I am in a wheel chair. Thank you.

AMERICAN OVERSIGHT

Pinellas	One size does not fit all. Separate rules should apply to different levels of longterm care. Independent and Assisted Living Residents need more leeway at this stage of the pandemic. I am presently allowed to get a Covid test every two weeks to attend to my 93 yr. old Mom's needs. She has mild cognitive impairment, impaired sight and impaired hearing. She needs my help to shower. She had just moved from her home in another state, and was just adjusting to a gigantic life change. We had barely gotten her apt. minimally set up last March when everything shut down. Mom became depressed and was not able to adjust her thermostat, use her appliances, etc. My major concern now is the 14 day quarantine after she returns from critically important medical appointments. That exceeds CDC guidelines for Asymptomatic healthcare workers returning to work after positive Covid test. This seems arbitrary and unnecessary. Mom needs to have her exercises and the little bit of social interaction now that the dining room has reopened. She has a 4300/ mo. Apt. and our primary reason for moving her was for the social interaction and graduated levels of care as needed. I have noticed a rapid decline in her cognitive ability due to lack of stimulation. She does not use any electronic equipment but the tv and telephone, both which require regular help for her to use. Rapid testing capabilities for ALF's, in addition to continued proper instruction and use of PPE for residents and all who are properly vetted and screened to enter.
Lake	I am also concerned about the safety of Covid positive I am disappointed there are no practicing physicians (i.e medical directors) or Directors of Nursing on this panel.

AMERICAN OVERSIGHT

Collier

Sir or Madam,

I was not turned away from my church service today, but I was reminded that the allowed attendance numbers are a small fraction of our capacity and we must reserve a spot in order to attend.

What I want to know is...why are we enforcing strict limitations on church attendance, which our US Supreme Court recently upheld, but we are not enforcing these limitations on protest marches with hundreds of people carrying signs and, in some incidences, shouting vulgar and offensive language at Black Lives Matter gatherings??? Yes...right here in Naples FL.

I am not talking about Chicago or Portland or New York or Baltimore. I am talking about protests in cities in Florida, including my own town of Naples.

Why is breaking the law for civil disobedience OK if you protest the right causes, but not OK for houses of worship??

I am not blaming law enforcement, but I want to hear the response of the elected officials who direct their activities.

Why is 1st Amendment "freedom of assembly" OK for a protest march but freedom of assembly for religious church service is held to a stricter standard?

AMERICAN OVERSIGHT

Bay

Almost everyone I have ever known who was in a nursing home or an assisted living facility would prefer to catch and die from Covid19 (or anything else) than to be cut off from visits by their families. I am convinced that I know of a couple or more deaths in one single assisted living facility in my city of Panama City that were either a direct and complete result or a partial result of their depression from being cut off from their families. Such separation is inhumane not matter how well-intentioned the purpose is!

AMERICAN OVERSIGHT

Alachua

I live in a university town (Univ. of Fla) in a house on the campus of a CCRC. My husband is a dementia patient in the Skilled Nursing facility at this CCRC. He has deteriorated in the past 6 months, partly because of the isolation. The health unit has been very careful about following all the health protocols, even going to having the staff wear full plastic face covers and N-95 masks and gloves. Everyone is temperature checked upon entry and they are asked various questions when entering. However, there have been a few CV19 cases among the staff, the latest being the virus in a private care nurse for a patient in the skilled nursing unit. These CNAs and nurses go home at night and associate with their children and husbands, who have jobs who knows where. The director of the health facility here cannot follow all these people home and monitor what they do when they leave here. Now that the university students are coming back we expect an uptick in the virus cases. The 14 day mandate for no covid cases before even allowing outside visits is going to preclude our being able to get back to providing essential care for our loved ones because these cases are popping up about one every 10 to 14 days. Perhaps you would consider allowing OUTSIDE visits despite the employees who come in from the outside catching the virus when they leave this CCRC campus. Please, with the 14 day limit in place I may never get to visit my husband and provide him the care that goes beyond what a CNA can give. Please!

AMERICAN OVERSIGHT

St. Johns	I respectfully ask that you provide for at least one essential caregiver for each long-term care facility resident. Essential care covers many things, emotional health, bathing eating dressing, mobility assistance, mental stimulation, hygiene, and just participating in life in general. We need to get our loved ones busy living, instead of busy dying from isolation. Isolation has been come worse than the disease. Thank you for your immediate attention to this important decision.
Broward	Please consider the small space that APD licensed group homes have to safely welcome visitors. Most homes are for 6 people in a typical 3 bedroom home. The cost of additional PPE for visitors should be offset by the state and Curative tests should be made available for family or friends. The home should also be COVID free for at least 2 weeks. Thank you for the opportunity to provide feedback.

AMERICAN OVERSIGHT

Indian River

I am asking you to please come up with a solution to reopen the nursing homes and assisted living facilities to family members, even if its limited to one or two a week. These are our elderly parents/ grandparents/ aunts and uncles and most are either too physically sick to speak for themselves or mentally ill due to dementia or something similar. They have no voice or advocate for them. Also they are still getting covid due to staff carrying it in. These elderly family members are suppose to be revered yet we are letting them die of a broken heart because they feel abandoned and not loved. We are no better than the state of NY in this case. I am sure family members would agree to adhere to any protective ppe requirements in order to see their parents of other ill relative. The private pay facilities are probably better than the Medicare/Medicaid ones. I am speaking from experience as a daughter whose mom was in one and I know the lack of care they receive when they know or feel they are not being watched. This decision while I know was meant to keep them healthy is actually inhumane and needs to be changed. As a state that is largely made up of retirees and elderly, we owe it to them to find a better solution and lead the way for states. I am willing to be on any task force or committee to help come up with a better solution for all.

Thank you for your time
Robin Raiff

AMERICAN OVERSIGHT

Palm Beach

The recommendation MUST include a statement:

"IF a facility allows in private duty aides, they must allow in family care providers."

This should be OBVIOUS.

The ONLY reason the explains resistance to such a requirement is that facilities want the continued reprieve from public oversight. They want to get away with the continued neglect and abuse, and their insufficient infection control protocols.

The Governor's disdain for "We, the People" as well as the LTC industry's parasitic treatment of vulnerable and dependent elders is amoral and unconscionable.

AMERICAN OVERSIGHT

Palm Beach

While I am all for family (or friend) care providers limiting contact in their "outside" life, this should be a requirement for ALL STAFF and all private duty aides, and all providers. It is this egregious oversight that has resulted in excessive exposure to residents. In my mother's case she has been exposed to 3 COVID-19 positive staff members.

I will share with you that the staff and visitor screen at the facility where my mother resides originally had a question that went to the heart of community spread, asking if someone had been in what I will call a "confined crowd" within the prior 14 days. That question was removed within 2 days, when they realized it meant staff would have to answer "yes" if they went to church, or the like.

In addition - ALL staff, vendors, and others who enter the facility should be wearing KN-95 masks. These are readily available, and in bulk. Again, the facility where my mother resides has not made these mandatory, or possibly made it mandatory within the last week or so. For months they wore surgical masks.

In addition, the staff in the facility where my mother lives do not abide by staying 6 feet or more apart unless necessary. Distance is as important or more important than anything else.

Finally, in the grand wisdom of the management in the facility where my mother lives, some staff move between Assisted Living, Skilled Nursing, and Memory

AMERICAN OVERSIGHT

St. Johns	My parents live in an INDEPENDENT LIVING FACILITY they ate not in a nursing home or memory care facility. Before covid they could come and go as they please. They chose to live. There for the communal restaurant style meals and social activities. Now these ate gone. We cannot visit and they cannot visit us Meals in the room and we still pay 6000 a month. Why is this considered the same as nursing homes?? These residents can sign waivers and live their lives. At least they can come visit their children for an afternoon. We will not take them to a bar! Help
Hernando	I'm broken hearted Haven't seen my 93 year old Mother since end of February this year. She thinks we ve abondoned her. Mom has Alzheimer's/dimentia She doesn't t understand She needs our love and care Before Covid we were like staff at her facility in Florida. Mom has lost weight now talking feeding tube. This is a woman who s husbands ,sons grandsons served in the military proudly protecting our country. Please give our Mother back her family. She doesn't t understand FaceTimes ,phone calls ,window visits now prohibited We need to see our Mother to hug her but more importantly to be the caregivers we ve been for so many years. Please Governor Desantis allow us to see our loved ones

AMERICAN OVERSIGHT

Duval

My husband has Alzheimer's and is in a memory care facility. I haven't been able to visit him in almost 6 months. He doesn't remember me but that doesn't mean I don't want to spend time with him. I have no clue how much time he has left. But if allowing visitors is likely to expose him to COVID and shorten his remaining lifespan, I'd rather the facility NOT allow visitors unless they can GUARANTEE his safety. He and the others in his facility have done very well in virtual lockdown. Why open Pandora's box now when there's still no cure? I miss him but I'd rather wait for the opportunity to visit him safely (and all the other residents and their visitors) than run the risk of that one infected asymptomatic person getting inside.

AMERICAN OVERSIGHT

Polk

This is suppose to be a new plan only to if people qualify for the right to visit their loved ones, essential care giver or compassionate care giver? What is a wife of 50 years, what does this make her does she not qualify to see her husband who has been in a nursing home since Nov. 2019? Since that time I was there everyday till the COVID, then March everything stopped, we have not seen each other since then, going on 7 months. Now we have to pass a test to qualify to see them? We have waited long enough and have had no one to turn to get help, we feel so helpless,. No one knows the hurt this has caused us and how much longer they can go on as well as their spouses. To me this plan is not acceptable it should include everyone that has loved ones in facilities and we have waited long enough, if other places can open with just wearing masks, so can we.

Don't show a plan that doesn't include everyone, we need to move on and get back into the facilities to be with our loved ones, In my case my husband of 50 years, who suffered a stroke on our 50th anniversary,which left him half a man, he has no use of his left side. This man a Vietnam Vet, military retired, loved playing golf and many other things now half a person and we can't even be together. How would you feel? Haven't we had enough restrictions over the past months and this one has been the hardest. While he has lost over 50lbs, I am afraid of what I will find if and when I do see him.

The woman who worked as a dishwasher to get to see her husband was very lucky, but not everyone is that

AMERICAN OVERSIGHT

Hillsborough	Thank you for all that's being done regarding the safe re-opening of our Long Term Care facilities . I am looking forward to being a part of this task force forum very much. My mother is 93 years old with Alzheimer's/Dementia that has been progressing over the years. The rate of that progression has increased since the prolonged restrictions on visitation, especially the last couple of months. No one can replace family and it is taking its toll not only on our mom, but on members of our family as well. We are looking forward to visiting mom in the near future.
Pinellas	I am an Essentional Caregiver for my Mom. I have not been able to hug my Mom since 1pm on March 14th. My Mom had to be put on anti depressants to stop her from crying daily. I need to see my Mom now, not when she is dying from depression and isolation. Outside visits should have never been ended...my Mom misses being outside and seeing her family. If I had the money to bring her home, I would.The time is Now, we need to see our Mom ASAP. Please provide me an email so you can view my story with pictures. Please acknowledge Essential Caregivers and Please allow outside visits ASAP. Thank you
Palm Beach	Please make at least 1 family member essentional for emotional support, inside with them in their apartment. It is 94 degrees in Florida and it is unfair to expect me or my 91 year old Alzheimer Mother to sit outside. I need to be able to have human contact with her, help her put her things away, clip her nails, etc. A healthcare worker is not going to be more careful then me and I will get tested just as often as they will.

AMERICAN OVERSIGHT

Collier	Please allow one family member to visit our loved moms! My 81 year old mom has dementia. I have not been able to go in since March. My moms dementia has gotten worse these past 5 months. She's sad, she's lonely, she feels abandoned. I need to be able to go in. I know this will lift her back up. We can go back to our routines; I give her mani/pedi's, I can cut her hair, I can bathe her, I can pamper her! I can help her with her daily activities. I can hold her hand! We can have a meal together! I will take any test necessary. PLEASE 🙏
Palm Beach	Here again, I will argue that the Task Force and Governor MUST make it mandatory that if a LTC facility allows in private duty aides, they must allow in family care providers under the same protocols. While it is nonsensical to allow private duty aides and not family care providers, it also reflects a bias and favor to the wealthy, that is - those who can afford private duty aides. If this is not included in the recommendation of the Task Force today (Tuesday 8/25/2020), I will do my best to make this a public and political issue going forward. Enough is enough. The cruelty, neglect, abuse and disregard for our elders at the hands of the profiteers and the politicians they have bought must end now.

AMERICAN OVERSIGHT

Palm Beach	Please! At today's meeting when discussing caregivers remember those residents on hospice. My mother wants to return to her ALF. At present this means I, her only family member, will be unable to see her. How can that be? You allow caregivers to go do their shopping at Walmart. You allow delivery persons to go into the facility but not allow a family member for someone o hospice to provide emotional and physical assistance? I am willing to do whatever is necessary. Get tested, provide my immunization status, whatever will protect the other residents and staff. I get it. We want to keep everyone safe. Unfortunately, your orders and the facility' s responses have had a detrimental effect on our elderly. PLEASE. Let the family in for their loved ones! Outside visits cannot take place when they can no longer make it happen. As it has been said before. You have kept them alive...but they are not living 😢😢Please!! We can do what needs to be done. Just let us in to care for our families before it's too late for any more of us... and them. Thank you.
Marion	I am so happy to see this recommendation to Gov. DeSantis. I visited my grandma 3 times a week and was there for about 5-6 hours a day. I have noticed a drastic decline in her mental state and need very badly to get back in to help her. I had lunch with her on those days. I helped her with her showers, putting lotion on her legs, helping her walk with her walker, writing letters to her sister, and many other things. I took he to all her doctor/dentist appointments. Please stress to Gov. DeSantis the importance of this recommendation. Thank you.

AMERICAN OVERSIGHT

Sarasota	We are not visitors, we are family. I know you have heard this before. Please open outside visits and allow family to assist in the care of our mother. We have been thankful for the help we receive to care for our mom. However, our family saw our mom everyday, and we continue to do so at the door window. She does not have dementia. Her body is not able to move due to her diagnosis. She was thriving mentally and emotionally before the lockdown. Now she is declining. Please, allow us to assist in the care of our mom.
Duval	I could not find this program. Will there be a way to watch a recording? Thank you.
Miami-Dade	I would like to suggest: 1. All visitors should provide a negative test result prior to the visit. 2. Essential visiting to start with one visitor the facility at a time. 3. Visits to be scheduled ahead of time so that the facility could make arrangement and provide appropriate staff coverage. 4. Visitors will limit to visit area only.
Brevard	I tuned into the Florida Channel today (8-25) at 2:00 to listen to the Meeting Agenda Task Force on the Safe and Limited Re-Opening of Long-Term Care Facilities, but could not find this discussion. Please advise if the session was recorded and how I might access the discussion. Thank you.

AMERICAN OVERSIGHT

Lee

Thank you all for all you are doing to make safe visits available for our residents and families.
My mother is in an assisted living, dementia facility and I can not say enough good things about the facility my mother is in. I am very confident in the leadership, care and love she is receiving and honestly believe they have worked extremely hard to keep all the residents and staff safe from Covid during this time. They have done everything they possible could to keep families informed and have offered many options for communication with the residents, Facetime, lanai visits, pictures and udates.
My biggest hope with the opening has been that it is done with a lot of thought and with safety in mind and I feel the task force's is trying very hard to accomplish that.
Here is my concern.... When it comes to the social distancing part. It was a very emotional part of the meeting and it pretty much seemed that Social distancing was going to be adhered to. Mentioned was the spread through masks within 15 minutes of contact.
Yet, within 5 minutes of an emotional moment of discussion addressing the need for human touch and hugs from family, Hairdresser were going to be allowed to come in and spend well over 15 minutes with a resdient. It does not make sense. A family member is going to be more cautious than an outside contractor providing a service.
My next concern is making sure "Season", which is coming in 2 months, is addressed when we have numerous people coming from all over the nation and

AMERICAN OVERSIGHT

Lafayette	My Son is non verbal, has dementia and Downs Syndrome. Has been under Hospice care for the last 3 weeks. Because he's not critical I am unable to see him even though he could pass at anytime. He was hospitalized for aspiration pneumonia and in the ICU for 20 days. We were able to see him in the hospital and he responded to us and we felt it was because he was able to see his family his condition improved. We have been locked out of the center since March and we believe his condition has worsened because he can't see his Mom and Dad. We have not been sick during this time and are more than willing to be tested regularly to be able to see our son. Employees come and go and have brought Covid into the center but families are denied access to their loved ones. This hurts them just as much as Covid could ever do.
Leon	My dad is in memory care and thinks we have abandoned him, even though we FaceTime with him, call, and visit through the window frequently. I've seen a significant decline since the family has not been able to spend quality time with him and hug him and love him. Our last in person visit at the facility was March 13th, 23 weeks ago. I don't understand how it's considered safe for care staff to go home and come back to work but it's not ok for family members to visit their loved ones. If we apply similar protocols to visitors - validate a negative Covid test, have visitors wear appropriate PPE, even limit the number of visitors a resident may have per day in accordance with CDC guidelines, and/or have the family members visit residents in their rooms or areas away from other residents - please. I will do that, to be able to visit with my daddy. The isolation from family is causing us to lose him.

AMERICAN OVERSIGHT

Brevard

I have just found more information about your task force and watched your 2 hour zoom call from 8/25/20. My mother is in a nursing home and with her age of 89 and some dementia, she asks me all the time why I can't visit her. It pains me to answer her as I know she is confused and doesn't understand why none of the family has visited her. I send her care packages and/or pictures and letters every week and try to do facetime with her every week but she still doesn't understand what's going on.

If the facility workers can get their temperature taken and wear masks, so can family members. This is ridiculous to not allow us to see our loved ones. 6 months, now going on 7 months is way too long. If anything, allow us to have supervised meetings with our loved ones. If we have to wear gloves or a protective suit, then so be it. You know that none of the facility workers ever give our loved ones a hug or a rub on the hand. They have a job to do and the personal touch isn't there.

Let's end this and let us see our loved ones!

AMERICAN OVERSIGHT

Collier	one designated family member needs to be able to hug and touch their loved one! dr.rivkees doesn't seem to understand the importance of this ! let's hope gov. desantis has more common sense. dr.rivkees doesn't have a close relative in long term care.the cdc has made plenty of mistakes so far dealing with this virus. i don't need to hear what other states are doing. stop delaying and treat us as staff! most of us have been more careful than staff. we wear masks and wash our hands frequently. after 7 months the florida attorney general is being way too cautious . we have to learn to live with this virus for a long time. time is running out for our loved ones. please listen to mary daniel. gov desantis needs more like her on the task force . has gov desantis still prevented his children from hugging their grandparent's? have the task force members prevented themselves from hugging or touching their loved ones ?
Charlotte	I hope this helps in reopening nursing homes so i can get back in to see my mother. I don't think family members should have to get tested. That is not fair to the family members. we should not be forced to get tested because that should be are decision not the task force. This is a free country and we should not be made to do something that we have a say on. you think and say mask on one of the best things that just have everyone wear a mask.

AMERICAN OVERSIGHT

Lee	I appreciate the care and consideration shown by Task Force members as they deliberate next steps in the best interests of all parties. APD Group Homes are following the Task Force guidelines, and they provide housing and supports for a very diverse population - many who are struggling as they are not able to benefit from services and supports like day programming. The Task Force as composed doesn't have sufficient time or expertise to create a path forward for these persons - can a special sub-committee be created to craft a strategy? School aged children in group homes have been approved to attend schools - yet younger adults have not been approved for day programming which offers them community inclusion, training and supports unavailable elsewhere. Please consider a plan to address these diverse needs.
Clay	There are protective measures that could have already been done to visit our loved ones in long care facilities. Just like other businesses have changed their policies so could they. Visitors could be scheduled appointments so the number of people could be controlled just like restaurants and retail stores. Designated areas could be assigned to reduce the spread along with reducing hallway traffic. Mask, gloves, gowns, face shields could be worn and proof of a negative Covid-19 test. These are our loved ones and it is our right to see them without causing harm to anyone else.

AMERICAN OVERSIGHT

Hillsborough

Please consider emotional support to Essential Caregiver designation. The wording seems to leave this up the facility and I can see this becoming problematic. For my Mother to thrive, it is necessary as with everyone, to be around family for emotional support. She does not need attention with dressing and bathing, but the emotional upset has caused one hospitalization already. No one can offer support and encouragement like family.

I also see each facility dragging their feet around the visitation set up with the wording being used. Strong encouraged can be interpreted many ways. I do believe it will be necessary for families to continue the pressure and the fighting to get change.

In my Mother's facility, they are taking residents on a bus for picnics with no masking, but yet refuse to take anyone to doctor's appointments on the bus, including a resident undergoing chemo treatments. Nothing logical is part of this decision.

I'm also concern ed that AHCA representatives and those onsite at facilities are not being consistent with what is allowed or not. What is cited at one facility is fine at another. How can some standardization be done? The complaint line is great, but I can see that becoming flooded with calls and based on past experience calling AHCA it is very difficult to get guidance.

Thank you.

AMERICAN OVERSIGHT

Brevard	My mother is 91 and beginning to slip away from us. Not because she has COVID but because her life was much fuller prior to the mandatory quarantine of nursing homes. She recently had to have an IV put in due to dehydration and a lack of interest to eat! No contact for those that have already been put in these homes due to lack of other choices is killing healthy elderly citizens. A safe process needs to be established so families can visit and interact with their loved ones before they DO die. The emotional stress for both the families and loved one is terrible. The exception to visits should not be whether or not the loved one is dying!!! Because whether they are healthy or not they will surely die alone if something doesn't happen soon.
Pinellas	When making your decisions, more attention should be given to resident spouses in Continuing Care Communities. If a spouse of a Skilled Nursing Center resident resides on the same campus of a CCC that includes the Center then there should be less restrictive visitation guidelines - i.e. that spouse is not coming from OUTSIDE the community, but is already under campus-wide restrictions.

AMERICAN OVERSIGHT

Martin	My dad, 95 years is in assisted living and the solitude is detrimental to his cognitive health. The facility, the Symphony is Stuart Florida is doing a fantastic job keeping all the residents COVID free- I have no complaints. At this point could we start to do outside visits with our loved ones - with masks and 6 ft.distance and temperature check protocols? Thank you Mr. DeSantis for all you've done for the Florida seniors....
Lee	Dr. Diane Romeo Hi, Our residents want to see: 1) the hairdresser brought back 2) communal dining 3) activities such as movies and music 4) scheduled family visits outside on the porches I have brought in a psychology group in to address the depression in our seniors. The isolation has been detrimental to their cognitive and physical health.
St. Johns	When this becomes a document to amend or replace the current executive order. PLEASE PLEASE also address residences independent homes within continuous care communities. Westminster is currently not allowing visitors into people's own homes (ie not residing at the skilled nursing locations). They site the Governor's executive order as the reason, even though the order is for long term care facilities. If this is not addresses, we have no leverage to get our children into our homes for care.

AMERICAN OVERSIGHT

Lee	My 52 year old brother is in a long term living facility due to a stroke and he suffers from kidney stone issues which require him to have surgery. Unfortunately all medical issues are delegated to Fort Myers Rehabilitation which is his long term facility and due to lack of family involvement, we are unable to help coordinate the surgery that he so desperately requires. Since COVID 19 he's been in and out of the hospital on 3 different occasions. The last two visits to the hospital have allowed us (his family) to visit with him but we still are unable to get his life threatening procedure scheduled.
Palm Beach	I think spouses deserve a separate category and not just be lumped in with "family members." My wife is a two-year resident in a skilled nursing venter (nursing home). Our two daughers are near, but nowhere as involved in my wife's life as I was before the pandemic response shut me out. I spent an average of four or five hours per day with her, including dinner every night. There was lots of caregiving which was yanked away by the closedown. It needs to be restored before it is too late.

AMERICAN OVERSIGHT

Union

My mother was admitted in November to a Memory Care facility. We visited her at least every other day. In March when we were no longer allowed in, mentally and emotionally she has rapidly gone down. She cries and cries trying to reach us through the window and fence. She cannot understand why we can't hug and hold her. While I understand keeping our elderly safe, in the situation of Alzheimer's patients, it has definitely caused a rapid decline in their health. I would rather my mom die of Covid-19 than of a broken heart, thinking her family has deserted her.
PLEASE allow us to spend time with our terminally ill loved ones. I agree with the precautions of letting a limited amount of visitors wearing PPE. I don't see a difference with us visiting than the healthcare workers coming in and out everyday while when home caring out their normal activities, such as grocery shopping, church, school etc.

AMERICAN OVERSIGHT

Santa Rosa

Governor DeSantis,

Sir, I am a Combat Veteran and Veterans of Foreign Wars (VFW) Post Service Officer and I respectfully request your help. Florida's VFW organization is made up of many local posts spread across the state. Some are large, but many, like mine, are very small. As a small post, our very survival depends on our members conducting fund raising events to pay our bills. Participation in these events has been reduced to a level which makes them economically unfeesisable, due specifically to our inability to provide alcoholic beverages to our members. This severe loss of fundraising has caused us to deplete our already minimal savings, simply to pay our bills. This has halted our ability to provide veteran advocacy services to our local veterans and fundraising to the different state and nation veteran's foundations, including financial support to long term veteran's care facilities (veteran's homes). I respectfully, but desperately, ask that you amend the guidance to allow our veteran's organizations to serve alchohol during the remainder of the covid 19 crisis. The survival of our smaller Florida VFW posts depends on it.

Thank you for your consideration,
Respectfully,
Barry Bergschneider

I have just spoken to your staff member Lucy and she directed me to this page. I'm very concerned about the people who are stuck in the nursing homes without benefit of their family members or visitation with anyone. The staff at these places are stretched to the Limit the residents are not getting the care that they need and in some cases the family members were taking up the slack to provide this care. My brother-in-law has been in this nursing home for 8 years and now he's been without visitors for visitation from his wife or son or family members for over 6 months. He's becoming depressed he's not getting shaved or a haircut he's left in his bed till late in the afternoon and then he's put to bed by 7 at night he has no life you understand. We treat dogs better than this honestly. And I can't understand for the life of me why theme parks are more important to open then letting people visit their loved ones in the nursing home. Makes no sense at all to me. Does it make sense to you governor. What if this was your family member your wife your parents how would you feel about it. All right enough for me please see what you can do about this you and your staff and the legislature and senators all those people are getting paid a lot of money to do something about this. Thank you for listening You're voting citizen Frances Adams

Citrus	My 90 year old mother is in Arbor Trail Nursing Facility in Inverness (Citrus County) I have not been able to see her since the first week of March. This is taking a heavy toll on her because she does not really understand why. We have to explain to her almost everyday that there is a bad flu bug going around and we have to keep you from getting sick. She has lost a considerable amount of weight because she is not eating as much as she was because she thinks nobody wants to come and see her. There is ABSOLUTELY no difference between myself going in there to see her or an employee, i can don a mask, gloves, gown etc..whatever is needed just like their medical staff. I work at Bayfront Health Seven Rivers Hospital and I know what to do and not to do.There has to be something done soon for family to go in and see their lived ones and reassure them they are still loved.
Charlotte	If the president can hold a rally at the white house with 1500 people in the audience very very few masks according to the pictures and zero social distancing; if sports can have contact; if schools are opening; if we have salons open there is no excuse for the country to keep nursing home residents and family members away from each other. The people in the nursing homes are going to stores and salons and exercise facilities and bringing the virus to the nursing homes anyway. You are not protecting them from the virus you are keeping them from their families.

Pinellas

Steps need to be taken to open visitation in long term care facilities. However, before this happens, the rapid result testing must be made available. We need to have the type of testing that is made available to our professional athletes. The results are available in only 15 minutes. Before, we start letting a lot of visitors in, the testing needs to be available for visitors. We have to protect "our most vulnerable residents".

We have not had any COVID cases among residents. I'm sure it is because of the strict requirements we have lived under since March. I want to see us open to visitors, but I think visitors should be tested before they are allowed in to visit their family member. Thank you.

Gov. Desantis: I have an adult daughter in a Naples nursing home. Under the current visitation policy, I cannot enter her facility, her room or a common area to check on her well being. I cannot see her physical condition, her hygiene, her clothing needs, or any other requirements I pay the facility my life savings to do.

You must begin to make check-up visits allowable to a family member. Residents must have advocacy in all facilities. Residents have been fending for themselves for months now, and their ability is unlikely to be successful. All facilities are notorious for lettings slide. It is the family who will get results, not the residents. I wish it was different, but it's not.

Additionally, residents have been deprived of companionship, loving attention, and interaction for months. How you would you like to spend time with only staff members? There is no substitution for loved ones, and check-up visits would provide better care and much needed family or friend interaction.

I await your response.

My father has been in the hospital and now rehab for almost 7 weeks. The well being of patients depends on visiting with spouses or at least one caring family member. It makes no sense to have a rehab within a hospital that allows visitors but the rehab doesn't allow visitors. Common sense has left the world. Let the spouses see their loved ones for Gods sake!

My mother is in an assisted living facility in Florida. I am unable to see her. I live in Wisconsin. She is 89 years old and lost her husband 3 years ago. She has no one but my sister who also lives in Florida but is not allowed to see her. I haven't seen my mom since March 2019. I simply can't miss the rest of her life. She is extremely lonely and feels like she is being punished. I love my mom. She is my best friend. My heart is breaking. I feel she is slipping into depression. I need to know when visitation will resume. I beg of you please allow visitors with protocol in place. I simply can't miss the rest of her life.
