Volusia	Retail	Retail merchandising companies such as Crossmark and News America Marketing, among others, employing thousands of workers statewide, support retail operations including grocery, drug and dollar stores primarily by installing point of sale materials like signs and coupons. Product resets and small pack out projects are also on the agenda. Employees travel from store to store daily, completing mostly short tasks. These workers and the tasks they perform are unnecessary to retail operations and are the perfect vehicle for community spread of the virus. Some of these companies are representing themselves as essential retail workers and have been continuing operations during the pandemic. These groups need to be the last folks to return to work, only when the crisis is mostly over and/or there is a vaccine available and mandated for these employees.
Okaloosa	General	I truly believe by opening our state this early we will be setting ourselves up for failure that will lead to a second, and far worse, round of the virus and closures. I am a single mother with a child who has Crohn's disease. I'm a massage therapist and I do not have another income coming in, but I still believe another stay at home order is the best thing for us all. I'm praying for those who have to make these difficult decisions for so many. God Bless.

AMERICAN OVERSIGHT

Palm Beach	General	It is vital that we increase testing exponentially and start contact tracing before we should even consider opening Florida back up. The numbers of infected and deaths are still rising. I don't believe we have even hit our peak yet. Listen to scientists and experts to gauge the timing and follow the steps to open our state safely. We do not need a second wave that would ultimately prolong the shutdown. Also, the Task Force you've appointed, includes the mayors of Miami-Dade, Broward, and Palm Beach counties. Also hospital CEOs, the presidents of Walt Disney World Resort and Universal, and CEOs of Publix and FPL. While business leaders' input is important, it should be secondary to the advice from scientists and medical experts regarding keeping us, your constituents, safe.
Hillsborough	Government	Governor DeSantis - please consider reopening the Florida economy. Even with existing vaccines for other viruses such as the seasonal flu, there are still thousands of deaths per year so continuing to wait until a vaccine for Covid-19 could take years and at that point who knows how effective it would be for the most vulnerable. Taking into consideration the total mental and physical health of the rest of the general public, the added stress of wondering IF there will be jobs to go back to and how to provide for my family during these times along with unemployment not yet being paid out, the stress on our family continues to build. If the real purpose of shutting down the economy and quarantining healthy citizens to protect the elderly and those most vulnerable, then why are those the majority of people I see anytime we go for groceries, mail, etc. It seems to me the more practical approach would be for those most vulnerable to continue self quarantining until they seem they want to reenter society. This is the United States of America and NOT a communist or socialist country, that is IF we can keep it that way, just as stated by our founding fathers. Thank you!
Polk	Healthcare	I think we need to wait until there is a true reduction in cases. It is to soon to be opening public places. The earliest we should look at reopening is June. There is not enough PPE to protect from actual positive COVID cases and because people want to work they may ignore early symptoms. Other countries like Ireland have been shut down sooner than us and extended last week. Their death rate is much lower ours. Thank you for your time.
Hillsborough	Government	The curve has flattened, time to open back up while still promoting social distancing and washing your hands
Polk	General	It is NOT time yet to re-open the State of Florida. We just posted 300 more cases TODAY and opening to soon will only result in us ALL doing this all over again in a few short months (OR LESS).... that is if we don't contract the virus and die. As painful as it is for EVERYONE involved, we CANNOT irresponsibly open too early which would most certainly cause irreparable harm far worse than our current situation.

AMERICAN OVERSIGHT

Broward	General	Florida should not consider reopening until there have been several weeks of steady decline in positive cases and deaths, and tests should be readily available for everyone who wants them. Additionally, Nikki Fried should have immediate input in this Task Force and unemployment benefits should be expanded indefinitely with all the kinks worked out. Governor DeSantis should be ashamed of his response and partisan politics during these uncertain times.
Osceola	General	I believe the state of Florida should wait to re-open until public health officials have deemed it a responsible decision. Florida is such a hot spot for tourism and the reason we have been so successful in not overworking our healthcare system is because we have been so cautious. We want to keep it that way
Brevard	Healthcare	It is way way way too soon to start opening-up the state for business and regular life. Lives are more important than businesses right now!!!
Seminole	General	Dear Governor DeSantis, I am a resident of Seminole County. It is time for Floridians to get back to work. Throughout the past weeks of COVID restrictions businesses deemed “essential” remained open. Floridians who patronized those businesses voluntarily engaged in social distancing, voluntarily followed CDC guidelines. With these businesses open, sometimes serving hundreds of people at a time, twelve hours a day, seven days a week, we have witnessed COVID numbers falling. The State of South Dakota never mandated a single business closed and are also seeing COVID numbers falling. Every business is essential when families are dependent upon that income for healthy and happy lives. I believe these facts prove that Floridians are responsible people, who love their neighbors, and will CHOOSE to do the right thing. But we need our elected representatives to do the right thing; we need our businesses open. We don’t want government handouts. We want to get back to work. We want our businesses open now, not later. Sincerely, Lucia Harris Anewlucia@gmail.com
Marion	Education	I understand the media has been saying that students and teachers are adapting well to "distance learning". However, as a student, I can say that neither myself, my classmates, or teachers are performing as well as we would normally do in the classroom. I also believe that our school has already felt the coronavirus. Our seniors went on an AICE trip to New York back in January, once they returned many of them were sick and many other students in the school got sick as well. I would not be surprised if many schools have already experienced the coronavirus, this means that students survived and developed antibodies. I do feel terrible for all who have suffered; however, this disease has killed less than 0.005% of Florida's population, the closure of schools affects over 14% of our population. This is not good for the well being of our students not their education. You are responsible for the pain you have caused seniors and students across the state, and I hope you know that. Make this right and open up schools even if it is just for a few weeks.
Collier	General	Medical professional should be making the decision on when to reopen, not business interests

AMERICAN OVERSIGHT

Charlotte	Food	I would like to see a mandatory use of mask when people are out in public. I work with public and people just don't keep their distance
Polk	Government	I definitely agree that until we are told by the CDC or a department of Health that we are in the clear of the COVID-19 outbreak being under control the ban should remain in place. There was just talk of the country putting in place a 14 day ban. This is definitely a time for politics to stay out of this. Polk county alone has people purposely trying to spread the virus to others. I feel it would weaken the state even more if the ban was lifted at this time. I don't see enough people in Polk county abiding by the ban as it is. Thank you for your time and reading this. God bless us all and many thanks to those of you putting yourself in harms way to take care of us.
Pasco	General	Dear Governor DeSantis, I am writing to you and your task-force dedicated to re-opening the Florida economy in hopes that I can share my personal feelings on the current situation regarding COVID-19. To make this message brief, I DO NOT think Florida is ready to re-open and should remain under a stay at home order for at east the month of May. I say this as someone who lost their job due to the impact of COVID-19 and as someone whose entire life was forced to a standstill. I would gladly remain here in this state instead of risking a second, deadlier wave of the pandemic gripping our state. History has shown us that pushing to quickly to return to normalcy instead of listening to the counsel of medical and scientific experts and professionals has devastating impacts on the health and safety of the greater population and economy. In 1918, Philadelphia decided against public health concerns to hold a parade to raise moral and support for war bonds. 200,000 people packed the streets to celebrate and within 72 hours every single hospital in the city had been filled to the brim with infected patients. After 6 weeks 12,000 people died. after 6 months that number rose to 16,000. History is meant to warn us as much as teach us, and those who do not learn from the mistakes of the past are doomed to repeat them. Do not allow Florida to follow in those doomed footsteps, Governor. Sincerely, Nicholas Kuhn, a concerned Florida resident.
Volusia	Healthcare	too too soon to open up!!!
Collier	General	PLEASE do not open too soon!!! PLEASE follow the CDC and White House recommendations. Here in Naples people are not following what they are supposed to be doing now as it is, it will be a HUGE mistake to open too quickly. I am sheltering in place and going to the store only as needed, and when I do go out I am SHOCKED at how irresponsible the general public is being, I really fear for everyones health if we open too soon and not as recommended. I am eager to be able to go back to work, however not when my health is at stake because of peoples stupidity. PLEASE PLEASE PLEASE do something about unemployment one month without any money is very difficult. Thank you for your time.

AMERICAN OVERSIGHT

Sarasota	General	In New York City they've tested 1 Iin 7 and found 21% have antibodies which with s population of 8.4m and 11500 dead the mortality rate relative to infection is 0.68%. Based on the exaggerated mortality rates being published people are scared. Some facts as to the mortality rate and reassurance that those that are vulnerable will still be protected will help in the process of reopening. We absolutely need to reopen on May 4th as there is no credible fact to suggest continuing destruction of our economy not to mention stomping on civil rights
Clay	General	We need to reopen the state. Get people back to work. Open without restrictions Let people make their own choice if they want to wear PPE.
Seminole	Administrative	I do not feel we should re open yet. Its premature as the cases keep increasing. I don't feel safe being out with my family.
Broward	Recreation	To Whom It May Concern, We are ready to go back to work to try to recover before it is too late. We the people have the right to make the decision for ourselves and our families. Each have the right to decide whether or not to stay home. We value all life. Protect the vulnerable, take safety precautions. Life must continue. We can not depend on the government or anyone else nor do we want to to. That is what makes our country so great. Generations have been challenged with illness and disease and have recovered . We will do the same. We are informed and must be given this opportunity. If this does not happen we will lose everything that we have worked hard for. It wont be death by Covid 19 it will be death of economy, proverty ,etc.
Clay	Healthcare	My husband is a veteran. He was scheduled for total shoulder reconstruction surgery on April 29th. That was cancelled because you stopped elective surgeries. My husband's surgery was not going to be in a hospital, it was going to be at the orthopedic building, surgeries that are done there are for the doctor's patients only. My husband is in extreme pain and we cannot see the doctor to get any medications to help with the pain, he is taking motrin, aleve, tylenol by the handful. It would be great if you gave a date. If all goes well, we will reopen on May 14th. Sitting here trapped in our homes because of this safer at home stuff is old. We have been home since March 1st - almost two months. Cannot walk the trails, cannot walk in the parks (state and local) cannot go to the beach except Jacksonville, cannot go out on boat - ramps are in parks. I am also having issues with my sons teacher here in Keystone Heights, she refuses to respond by email or phone or text to myself or my son, even after I contacted the principal at the school. No one will help us regarding this matter and it is horrible. My son failed last semester and the teacher didnt care, she did not contact us once telling us he was not doing his work and when he told he that he didn't understand it, she didn't care. I moved him out of advanced math because the teacher was going too fast and he expected the kids to understand it the first time. This woman should not be a teacher because it is clear - she could care less if they understand the math, she will not help or respond, she is just there to get a pay check! Monday morning I am contacting the local school board and I will continue going higher and higher until someone helps

AMERICAN OVERSIGHT

Pinellas	Tourism	Reopen museums, restaurants, aquariums, zoos and beaches because my parents and I haven't been able to do anything since we moved here to St. Petersburg
Orange	Healthcare	Do not end the isolation orders until a vaccine is ready. Keep your people safe, expand unemployment, do the right thing.
Nassau	General	Take action to open the state now. All of us are suffering from the economic disaster caused by the shutdown. We can't stop living to keep from dying. Open the State Parks now. Open businesses now.
Leon	General	I hope the governor takes the time to read all of our reviews about opening up Florida again. I work at Chop Barber Shop (Killearn location) and have for the past year and a half. I am also the manager at my location as well as a stylist. The most important part of opening our shop back up has to be safety. The beauty service industry is one of luxury, it is also one of the most dangerous to open back up. Because we are in the customers face all day it is extremely dangerous for up to reopen until the end of strange 2 or even in stage 3. We talk with them, we are touching them the whole time during their service with us and the customer cannot wear a mask during the service of getting a hair cut. The amount of time it will take to sanitize EVERYTHING will take so long as well when we have a new customer in our seat every 15 to 30 minutes just does not work. We have several barbers/stylist at our shop and even at half our work force per shift still is to many at one time in our shop. The amount of elderly clients and children we see daily is crazy and customers will not follow guidelines to ensure everyone's safety. For example not all people who come into the shop have 2 daughters with compromised immune systems like I do. Customers of all ages come into our shops when they are sick they don't realize that when I leave work I have to go home to my family who potentially could get any germs I have brought with me. Then where does that leave me? We also have tons of customers who travel all over the United States. We have no idea if the people who walk through our doors have been taking this seriously or not so we have no way of knowing who or when this virus could strike our little shop and endanger our health and the health of so many others. When it is flu season we seem to all get the flu not because we don't sanitize but because it's a virus that is air born and no matter all the safety precautions we take we are still enclosed in a small building and their is no way for anyone to ensure the safety of the staff and customers. I know the world must keep going and I do miss work terribly but safety has to be number one.....not money.....not politics....not the economy....but us the people and the people we go home to everyday. Getting your haircut or hair color is not essential, as much as people would like to say it is, I promise you it is not!! What is essential is protecting my customers and my family from a terrible sickness that could be
Pinellas	Professional Services	I BELIEVE THAT HAIR DRESSERS AND NAIL TECHS SHOULD BE ALLOWED TO REOPEN IF THEY ARE A ONE PERSON SHOP. BOTH THE CLIENTS AND THE OPERATORS CAN AND SHOULD WEAR MASKS. IF NEITHER PERSON IS ILL OR HAS BEEN ILL THERE SHOULD NOT BE ANY REASON TO DISALLOW THE SERVICE AVAILABILITY.

AMERICAN OVERSIGHT

Seminole	Healthcare	Please I am urging you as a person of science to reopen everything. As they run more antibodies tests we say this virus is way more prevalent in the general population. I am a dentist and we have been dealing with aerosols since it started. We have delt with other respiratory diseases and have had no more incident outbreak. Look at TB, SARS, SWINE FLU and H1N1. The fear monguering must stop. People should be allowed to go out in the public. If we learnt anything we need more hand washing stations. If you are sick don't just tough it out, go home and rest. There are plenty of issues locking up non suck people in quarantine. Quarantine was made for the sick to be isolated.
Hillsborough	Professional Services	Regarding photographers, we have different needs based on the genre of photography. All have different levels of exposure and will need guidance based on scientific data. Some of these disciplines are easy to limit exposure and maintain distancing, such as engagements, family portraits, headshots, food, architecture and products. Events and weddings will need more guidance regarding number of people and indoor vs. outdoor. Most of us are not expecting to work events until August at the earliest.
Polk	Professional Services	I know you say salons are non essential but as a salon owner I disagree . Even before you shut us down we where doing all stylist 6 feet apart some stylist even gave a private suite . If a client is willing to come into your establishment to get a service they are confident you are taking proper sanitation procedures! You can tell as soon as you walk in a salon if it is clean or not! You works be amazed at what it does for a persons mental heath when they can not have these services done! We also offer tanning and those People need us also some have skin conditions that need the uv lights to help keep it under control! And some need it for vitamin D . I would like to know out of all the people that contacted the virus how many of them where Hair Stylist Barbers lash technician facial specialist cause I can tell you Once you said or state was closing every salon in Florida was busy! So think about that when you say we can't safely go back to work! I have 13 girls and none of my girls have received unemployment they have been denied because they are self employed. I have some for small business money and nothing we need to get back to work to pay our bills you are going to kill us by giving us so much stress !

AMERICAN OVERSIGHT

Lee	Real Estate	as Broker and German speaking Immigrant I have the opportunity to look on both sides of the Atlantic. 1. There is a lot of fear of the unknown and that stops the thinking, like walking alone on the street or driving alone in the car with a mask. 2. The Statistics only talks about cases, not of cases already out of hospital and or without symptoms. 3. Zip code 33914 has 40000 people but only 41 cases. Small businesses should be able to reopen incl Restaurants 4. the hot Florida Climate causes breathing issues, sweating, fogged classes with a typical mask, therefore a plastic face shield should the favorite recommendation for face mask in public to protect against coughing. 5. European property owners should be able to enter Florida 6. Restaurant should reopen in situations like in 33914 with only a small amount cases 7. Beaches should be open for all to walk, special the air in the wave zone is very healthy for people the lung problems. German North Sea islands are all "Heilbaeder" for that reason. 8. European vacationers should be allowed to travel as they are my typical customers, first as renters, than as homebuyer. 9. Get immune testing kits, a) for blood plasma for the thick, b) to proof you are healthy again or immune anyway. The best way to eliminate the fear. 10. The Sweden Model should be reviewed
Pasco	General	Open the state up ASAP please! We need our businesses to be open now...nobody can get thru to unemployment and we are suffering. Please open Florida up again.
Brevard	General	For just generally opening county by county allowing people to use their own judgement regarding their wellbeing & that of their families. There will always be those who disregard others regardless of rules! But most people are capable of understanding safety & responsibility. So let's get back to business & get people back to work & government out of our everyday lives & children back to school! Elaine Harris
Volusia	General	Close it all down til this virus crap gets out of here.. no exceptions no excuses.. we are all hurting 1 way or another. But until this is gone why jeopardize everyone anymore??.
Duval	Finance	I don't think we need to reopen until the middle of may to see where we are and to make sure that people who have had covid 19 can't get it again
Pinellas	Government	Set up hand sanitizer UV lights and Mask Kiosks around densely populated areas to give out and cleanse . Also isolating people that test positive in closed motels is a great idea.
Volusia	General	Reopen!!!! We need to work!
Orange	General	My greatest fear is once the theme parks reopen that people from all over the country and the world will flock to Orlando and there will be a huge resurgence of Covid 19 . As for education it is impossible to social distance in school and there must be a better implementation of distance learning. Digital inequity is a huge problem. State funding for technology in education must be significantly increased to make 1 to 1 digital devices the starting point not the dream. There also must be greater access to broadband in rural areas.

AMERICAN OVERSIGHT

Broward	Healthcare	I need to go to dentist and elective surgeries should open asap!
Seminole	General	Dear Governor DeSantis, I am a resident of Seminole County. It is time for Floridians to get back to work. Throughout the past weeks of COVID restrictions businesses deemed “essential” remained open. Floridians who patronized those businesses voluntarily engaged in social distancing, voluntarily followed CDC guidelines. With these businesses open, sometimes serving hundreds of people at a time, twelve hours a day, seven days a week, we have witnessed COVID numbers falling. The State of South Dakota never mandated a single business closed and are also seeing COVID numbers falling. Every business is essential when families are dependent upon that income for healthy and happy lives. I believe these facts prove that Floridians are responsible people, who love their neighbors, and will CHOOSE to do the right thing. But we need our elected representatives to do the right thing; we need our businesses open. We don’t want government handouts. We want to get back to work. We want our businesses open now, not later. Sincerely, Harvey Harris
Polk	Tourism	First of all I'd like to thank you for opening this up to suggestions to Florida residents. I work for Walt Disney World and I'd like to provide feedback on how best to open all theme parks I have seen several "rumors" online about opening it to Florida residents only so I'd like to share my thoughts. I know how the Disney-fanatics will respond when it's opened even if it's for "local residents only" and that is that those that have rental properties down here will likely flock here claiming to be "local". I feel that if the theme parks are to open only local/Florida residents only for a specified period of time then a Florida drivers license or Florida state ID card should be required as proof of residency, not just a mortgage/utility bill. Too many people that live out of state have rental properties that they use normally as proof of residency to obtain WDW Florida resident annual passes but do not actually live here. Also if someone were to try to enter the theme parks without such proof that they be turned away. This should be enforced starting at the auto plaza when entering the theme parks. I know Disney culture is to make the guests happy but with this situation a hard line needs to be drawn in the sand so to speak and any protocols that are created to reopen safely should be strictly adhered to until all operations resume under normal circumstances. Thank you!
Collier	Professional Services	Don’t call. Deaf. I worry cosmetology deaf working on hair with mask on???I work with 35 hair dressers.How test Costomer?? My experience Costomer will not tell you everything about there health(lies).wow

AMERICAN OVERSIGHT

Nassau	Government	Please reopen our parks, beaches and businesses. The purpose of the shutdown was to SLOW the spread and allow time to learn more about the virus and get hospitals and front line workers equipped and better prepared. It will take much longer to make more testing available. Finding effective treatments and a vaccine will take even longer,. The scientist say a year or more. We cannot afford the loss of our economy and the risk of losing lives to other things like suicide, abuse etc.I live in Nassau county, Fl. There have been zero deaths but I wonder how many local businesses will survive. The world and the way we live has changed very quickly. We now need to take precautions. relative to your age/health/risk factors , you may still need to stay home.to stay safe. Let the rest of us get back to work before we have to deal with a cataclysmic economic depression .the likes of which we've never seen. But most of all, let's feel free to be open to discussion while still being kind and respectful of different views. Covid-19 effects everyone on this planet. We are all in mourning to varying degrees relating to our losses. We are going to have to solve this together. In the pandemic of 1918 the scientists said that they discovered more people were getting sick and dying who were indoors and that if there were ever another pandemic they would advise people to get outside as much as possible. I would add to that that diet, exercise, lack of, or using meditation and other tools to deal with stress improves our immune system thus helping us fight off this highly contagious virus. So I end this the way I began, please reopen our parks, beaches and businesses! Thank you
Collier	Management	I am a management level leader in a law enforcement agency, and I support Gov. DeSantis' decisions to date on the safer at home because it was based on the contemporary science. However, our understanding of the disease now leads us to believe it is far less dangerous and our healthcare system can handle it. IT IS TIME TO RAPIDLY OPEN ALL MANNER OF BUSINESS IN FLORIDA.

AMERICAN OVERSIGHT

Putnam	General	We can't keep this up. It's honestly ridiculous that we literally killed our economy here based off bad models that projected this virus to be worst then it is. It's gonna be here with us for a while and it's not nearly as deadly as the media and governments are making it out to be. I am not saying we shouldn't be diligent and take precautions. But when it comes to getting a hair cut, going out to dinner, sitting on the beach, etc. We have every right to decide if we want to do those things as Americans. In the name of public safety you have taken our rights away thats laid out in the bill of rights. As Thomas Jefferson said " I prefer dangerous freedom over peaceful slavery." You should allow restaurants to at least open up with 50 percent capacity and groups of 10 or less to be able to eat together. If we want to go to a barber shop or hair salon we should be able to do so. You as a government have and are destroying people's lively hoods. You all are over reaching in taking our freedoms away. Every job is essential in there own right as well. People who are at high risk need to be educated and let them know to self isolate, not go out if they don't need to. Even if you let It be voluntary and people who are healthy but don't want to go out, let them stay in. But you need to let the healthy go out if they want and get on with there lives. We need to develop herd immunity and that can't happen if you keep people locked up. It's a virus and you can't kill a virus. Even if you find a vaccine/ anti viral to help treat it. (Examples: the flu, herpes, HIV, etc.). It will be here with us and we maybe able to lower the effect with a vaccine but people will still contract it.
Duval	General	I am opposed to reopening FL soon. I understand our economy is in bad shape, but this virus is no joke and it will be better to be safe than sorry. Lets continue to be patient. The possible negative impact of opening too soon out weighs the possible negative impact of opening late.
Broward	Recreation	Open the beaches and boat ramps , if needed, with restrictions please! We need our outdoor space!! Also, please no masks at least for outdoors. There's plenty outside space to be outside and far away from others.
Brevard	General	First, thank you for taking comments on reopening Florida. I am a native Floridian live in and was raised in Brevard. I work as an ocean rescue lifeguard. I would like to say how proud I am of my county and thier decisions on what course to take. My concern would be the beach and opening up parking. Memorial Day weekend is one of the most dangerous holidays because of the potential for rip currents due to unsettled sand from both the season and renurshment projects. I will stand behind any direction from the Governor and the BOCC. They have both proven to do the right thing so far. In summary, stay the course on beach parking until june 1st, and get some of the restaurant and other small businesses open with distancing restrictions as soon as possible.
Duval	Recreation	Please open the Gyms back up! Physical as well as mental health a very important. For some of us it's more than lifting weights. It our escape, our outlet, our community, or tribe.

AMERICAN OVERSIGHT

Orange	Government	This state CANNOT reopen any time soon. You are trying to kill people when you even suggest it and you are actively encouraging it. The message should be that people need to continue to shelter in place. You need to allow air bnbs to be in business as they are safer than hotels for people who need lodging. AND YOU NEED TO PAY THE UNEMPLOYMENT THAT YOU ARE DENYING 95% OF THE PEOPLE.
Pinellas	Tourism	I work two jobs: I work as an assistant in the travel industry and I manage a small restaurant. I have temporarily lost both of these jobs as a result of covid-19. I applied for unemployment benefits a month ago today, and have still not received anything. I tell you this so you understand I am majorly financially impacted by this, and I understand people's concerns in wanting to get back to work. However, I think it is imperative that we do not rush to reopen. I hope that the plan for Florida follows a similar guideline that the White House has proposed: slow, phased reopening after consistent declines in cases, while watching carefully for a spike, and shutting things down again if it does spike. If we rush to reopen and see an influx of cases, we will further damage the chances of tourism returning to this state, and our jobless Floridians will suffer for even longer. I know people are eager to get back to work—I certainly am too—but if we move too quickly now, we could see worse repercussions in the long run. Public safety & careful monitoring must come first, because it's the only way to regain people's trust.
Santa Rosa	Professional Services	I am very ready to go back to work, however i am a hairstylist There is NO way that we can practice social distancing in our profession. I am nervous that people want their haircuts so bad at this point that they would not communicate that they were sick or had been around someone who was. I ask you please consider extending the shutdown for our industry. Hair salons, barbershops nail salons should all remain closed.

AMERICAN OVERSIGHT

Manatee	Healthcare	I'm a licensed massage therapist and since so many people don't seem to have a clue what we do, I thought I would tell you. There is NO WAY to physically distance 6 feet during a massage. Even if therapists wear a mask (we usually don't) the client will not wear a mask. So we would require n95 respirators, which I've been told by my nurse friends that they're not even getting in the SNFs and they are around positive cases. The massage therapist is trapped for an hour breathing the air of a client in a small room. We need you to understand that massage therapy should be one of the last things to open. Since we are lumped in with the non-essential health care my fear is that as soon as you allow it, many massage therapist will return to work even with no or inadequate PPE because they can't afford more time off since the unemployment situation is so dire. I haven't gotten my stimulus check or unemployment, but I cannot afford to have a stroke from the clotting disorder associated with COVID-19, and as many Floridians, I am the primary caregiver for my aging parents, one of whom is on dialysis. But if you allow massage therapists to reopen their practices, and I choose not to become a lamb to the slaughter, I will be kicked off unemployment. I need this money at this time to survive until I can get trained to be a 911 dispatcher or some other job that is useful to society but with minimal exposure. Please do not allow massage therapists to practice before it's actually safe. Spa owners ignore health department rules on a regular basis, mine does, and I have no reason to think that it will be different now. Only now, that means I will be exposing myself and my clients to a potentially deadly virus that causes clotting all over the body. Massage is useful, but it's also dangerous because it can dislodge clots and send them to the heart and brain!!! This is the most important thing to remember.
Polk	General	The hospitals are not overwhelmed. The virus appears like the flu. This is the most absurd thing I have seen and we need to reopen our economy. Protect the vulnerable. People who are scared can stay home. We need to get back to work before this economically devastates our family. We are washing our hands and taking vitamins. We are outside as much as we can, with everything closed. We are healthier than ever. Reopen beaches (and parking-like who can go to the beach if they don't park). Reopen state parks and businesses and let people use their own judgement and common sense as to what's best for them. I believe our restrictions are now onerous due to the number of people in the hospital and the difference between the models and number of deaths. Florida doesn't want lawsuits. I want to worship, work and live freely and I am done living in fear. Please do the right thing for our freedom and Constitutional rights. The executive order is no longer needed by the data, and continuing would open Florida up to lawsuits for government overreach. People will eventually realize this overreaction. If you do the rig HT thing now, it will be in our economic and in Florida governments best interest. We should not be faced with layoffs and economic devastation for the small impact this has made. Reopen Florida Now!

AMERICAN OVERSIGHT

Hillsborough	General	I would prefer that the state open as immediately as possible. For weeks, going into months, we have all had our freedoms and liberties suppressed, our jobs taken away, our mental health comprised, all because 0.0005% of the population has been affected by something. That is 1 in 50,000. Meanwhile, 1 in 5 Americans are jobless. As the numbers stand, you are more likely to be struck by lightning. Millions are being pushed to the brink of poverty. In the effort to preserve a fraction of the at-risk population, we are compromising the working class and children now. The state should be reopened and if certain people are still fearful, then by all means, they can exercise their right to remain quarantined.
Clay	General	A key proponent of the success of this mission is to instill confidence in the people of Florida. As the U.S battle with the virus has progressed, greater uncertainty within the trusting of Governmental ruling has developed, and for understandable reason. This battle has exemplified clashing ideologies within the nation regarding the balance of safety via medical precautions and safety via economic stability. I as much as the next person wish for life to resume "normally" for a general, predictable flow of habit to return. But, in order for life to resume, people must feel it's safe. Going to the grocery store now feels like venturing into the unknown, for people to resume other activities they will need to know that they are safe to do so. An accurate representation of numbers, easily available to the people and an analysis of these numbers on a basis further than fear mongering and political rearing is necessary for those who have been closely following this progression.
Okaloosa	General	I have pre-existing conditions and I scared to go back to a busy office setting. I've been following the Covid-19 response daily and I truly believe social distancing is working. There is zero PPE available to protect the public! Please extend the lockdown to ensure the most lives are saved!
Polk	Healthcare	Reopen Florida. All one has to do is look to Sweden's approach. The data is in and this virus is not the virulent killer that was modeled. Protect those in high risk groups; nursing homes. If the governor wants my vote he will Reopen Florida now!
Pasco	Healthcare	When do anticipate opening Surgery Centers in the Tampa Fl area? I've had two scheduled procedures cancelled because of covid-19 outbreak. I'm desperate to get this procedure completed to rid me of my back pain! Thanks, Olen
St. Johns	General	Time to reopen. The curve has flattened. Can't hide in our houses forever. The goal was to flatten the curve not stay inside until it's gone. Businesses will run out of money. Hospitals will close and state and local governments will run out of money. Many essential people are working today and are surviving. I certainly don't think opening retail is going to cause armageddon. Beaches and parks should reopen immediately. Get people outside. A phased in approach to open tourism needs to be established. Older and sicker people should be encouraged to take precautions. The state has done a good job so far but it is time to move on.

AMERICAN OVERSIGHT

Manatee	General	Please consider allowing mobile dog groomers to go back to work. The very nature of their business allows for social distancing and we have the ability to take that distancing further by not having any client to groomer contact. Most of us work alone in our van's with one dog at a time and take all disinfecting protocols. Most mobile groomers have clients who are disabled and housebound and rely on our services weekly, biweekly or monthly for their pet care. Thank you.
Miami-Dade	Healthcare	I am a second year medical student and while I'm not on the frontlines dealing with these COVID-19 cases, I am seeing it through the eyes of my colleagues and family on the frontline. It is horrific to hear about whats going on in the hospitals, and while I know everyone wants to get out of their house and go out, I don't believe we are ready to do so. I am getting sick of being home but its not safe to go out and resume life before COVID-19. There are still risks and I think we should wait on our public health officials to dictate when we can do so. I think if the state reopens at the moment, we will will see more COVID-19 cases. Hospitals are overwhelmed and it's not fair to exhaust our healthcare workers even more. It's better to be safe than sorry. So please do not open the state at the moment, we are safe at home.
Pinellas	Government	The White House coronavirus commission outlined a 14 day pre-opening requirements. We don't meet most of them, neither does Georgia, neither do most of the 50 states. We have over 1 million people who've filed for unemployment but only 700,000 of those have verified (Today it was announced the system is off-line until Monday) and only a bit over hundred thousand of those who've actually received their unemployment check. Many haven't received their COVID19 stimulus money, Social Security recipients with minor children have been told they missed the deadline to receive a 500 bonus they were promised, and Americans married to undocumented citizens have been told they're ineligible for a stimulus check, and it may take 20 weeks to send some people their paper check. Where is all this money going to come from when we reopen businesses? They will have to re-close because A. no one has any money or B. serious minded people understand they need to stay home, Or they are or live with someone who is immune compromised and will stay home.
Orange	General	Every day we are closed we are destroying livelihoods, through both an economic standpoint and a health standpoint. The lockdowns are causing more damage to mental health and safety than we can imagine, and far beyond the threat of coronavirus. specifically, from a county standpoint, we have not seen dramatic increases, we are past any "surge", and our health systems are prepared to take on any patients. We need to protect the vulnerable, get kids back in school, open businesses, and allow people to try and salvage their livelihood. Every day we are closed, We are doing more harm than good. Please allow us to get back to our lives, and livelihood. The curve has been flattened, and we can take precautions to prevent any further surges. The lockdown needs to end April 30. There is no reason for it to continue.

AMERICAN OVERSIGHT

Osceola	General	I think it is a horrible idea to open our state. We have a vulnerable population mixed with a gen z population that does not care. Parking lots are full of discarded masks and gloves. The community cannot even follow direction within the stay at home orders and you want to re open for money. Get the unemployment system up to pay, do the right thing by the citizens of this state regarding rent and mortgages and you can rely on people to be less panicked and follow proper guidelines. The risk of death is much greater, and with our county having less than 300 hospital beds available. If this gets out of control we see nothing through the remainder of the year. Its toooooo soon.
Manatee	General	Open up the state and all beaches to sit. I'm older and like to sit on beach. All stores need to open people are losing what they have. $ 1200 is not enough to live on.
Broward	General	It is understood that thid virus has caused great concern amongst the masses. However, the virus is not the only factor to consider as its effects reach much farther than any of us anticipated. Access to green space like parks and nature areas as well as beaches has proven vital to the human condition and its ability to remain healthy. Small businesses have taken a tremendous hit as families are selling off whatever possessions they have to be able to continue to buy food. Healthy people have been put at a severe disadvantage making catching this virus a pale comparison to what they are dealing with as far as no income to support everyday life. For those who are so concerned, they should be supported in their ability to work from home, do school at home and any other measures they would want to enact to prevent catching the virus. But all else who want to work and be in nature, they too should be supported in their decision to expose themselves knowing the risk. And they should be able to do it without wearing masks. Our rights are God given and must be maintained. Self preservation does not trump anyone's ability to breathe fresh air.
Polk	Technology	Why are we putting stock into the opinions of health experts to decide how long we commit fiscal suicide and not equally weighing the expert opinion of economists? Why are we ignoring secondary effects completely? Why are we allowing a media frenzy to drive us to authoritarian and draconian measures in the United States of America? We will get sick. A vast majority of us will recover. You quarantine the sick. Not the healthy. How did we get here? We should have started opening two weeks ago and we never should have been okay with authoritarianism in this country EVER.

AMERICAN OVERSIGHT

Brevard	General	I live in Brevard County and on a daily basis, the number of China covid -19 cases go up. Took awhile for tests to made available. This is a all new virus. People are not symtomatic and they travel all over. By the time they come symtomatic they have infected, god and google only know. I have two, beautiful grand-angels, boys ages 6 and 7. My son-n-law has a tree service business. Non-essential worker. He has been out of work since all this started. He has to protect his beautiful sons. My grand-angels, or my daughter would RESPOND him. I encounter, complete IDIOTS, every two weeks, when I have to go and load up on two weeks worth of food.. No mask, touching everything and buying one package of donuts. Most , humans do not follow rules. Please, give this at least two more weeks before WE, STATE OF FLORIDA, opens! I have seen where this China covid-19 test can cost 100$. I know of NO ONE, who could afford this test. I have one neighbor who is a vet on medicare. He may be able to afford the test. How, with no income coming in, could anyone afford a cost for this test? Thus is a deadly virus. Proven to cause death. Please wait to open Florida up. Now we have to stop people from Georgia coming here. Bad enough we had New York people coming here. We, in Brevard just got toilet paper on shelves to buy. No hand sanitizer. No disinfectants on shelves. Dollar general NOT cleaning carts between customers. This virus will continue to grow. Make mask wearing, cart cleaning, disenfectants available to purchase, hand sanitizer available to purchase Law, with a fine if you break law. Only way I could see to SAFELY reopen MY STATE.
Pinellas	General	Please, please listen to health experts and the scientists who say it is too soon to reopen and relax social distancing guidelines! Please don't let more people die needlessly! Take care of first responders and people on the front lines! Please also listen to the polls! People don't want to reopen too soon. Listen to the people who know what they are talking about! The science says June at the earliest and that can change! Don't listen to people who have no clue. Get the unemployment website working ASAP and that will help people who are struggling!
Hillsborough	General	I feel that we should be careful and slow reopening the state and speed up testing to assure that we dont spike in cases.
Martin	General	Open beaches with hours for seniors and hours for kids. Calming for those that are stressed and let kids swim for exercise. We all need sun (vitamin D) to build up immunity.. Business: Use common sense and don't make it mandatory. Use masks and gloves, monitor temperature of clients. If they don't like it , too bad . Publix has done a great job , staff is well trained . Continue to search for cause and effect: ex:blood types and inherent antigens,

AMERICAN OVERSIGHT

Osceola	Education	We should follow CDC guidelines and advice from the REAL healthcare and scientific experts to prevent from having to start all over again, which would extend and worsen the need for lockdown. We don't want children ill or dead for going back to school when a vaccine doesn't even exist yet. Look at how Canada's leader handled his people's economic matters to ease the lockdown up for them. Learn something from him, not from our irresponsible leader who would dare to suggest for the use of house cleaners and disinfectants in humans and then claim he only said it sarcastically. People are desperate and some will see that as a green light to ingest that. We need more sensitivity in our leadership's words, actions, and mandates. Money (economy) can be recovered over time, lost lives can't.
Sarasota	Healthcare	We have the data to prove that cov-19 is no more dangerous than the yearly flu. 99.9% of population gets this- gets no symptoms (strong immunity) or cold or flu. Active virus for 2-14 days? Then gone. Natural antibodies for life (what the vaccine biz wants to do.) Better healthcare strategies for nursing home, assisted living, and hospitals needed? Yes. Open up FL!!!
Orange	Education	Distance learning needs to continue until there is a vaccine or treatment. Therefore, for August 2020 through May 2021 students should practice distance learning.
Seminole	General	I am writing this to inform everyone that I am very much interested in reopening the State of Florida as soon as possible. After seeing photos of people packed into an airliner, and people packed into home Depot, Lowe's I feel that keeping restaurants and other business closed is extremely hypocritical and borderlines on tyranny. I am not a big fan of smaller groups than five because I am not aware that the virus can detect group sizes and know exactly when to infect someone when that limit is reached, it is an idiotic rule it makes no sense and it only takes one person to spread the virus. We are Americans we fought and died to be free it's time to let us live our life. if you don't want to go outside then don't go but don't make me suffer because you don't want to go anywhere.

AMERICAN OVERSIGHT

Brevard	General	First off DeSantis has done a very poor job in handling he COVID pandemic in Florida. In the interest of revenue he delayed our lockdown which put Floridians at much greater risk ultimately resulting in an nreae of confirmed cases and death. His lack of immediate action proved that he was willing to sacrifice lives for revenue. Question: Why did he allow the spring break partying in Dade and Broward counties? Answer: Revenue...Result: untold number of unnecessary cases and deaths and extended our time to flatten the curve!!! NOW he wants to reopen the state much too soon....again, revenue vs. lives!!! UNEMPLOYMENT BENEFITS: DeSantis has done little or nothing to resolve this issue!!! Thanks to his blatant disregard for FLORIDIANS thousands are going hungry and unable to pay their bills....while his focus is on the WWE in Orlando!!! What's wrong with this picture? He is a disgrace to his position and all FLORIDIANS. He knows he is done which may hurt President Trump in November...very sad! DeSantis = negligence and DERELICTION of duties...good luck with your next business venture!!!
Orange	General	Just play it safe. I have family that are doctors and elderly. I don't agree with beaches being open already. I would like to see the stay at home extended to May 15th at least.
Sarasota	General	Here is my detailed, well founded petition to reopen beaches in Sarasota that was successful but could be useful elsewhere http://chng.it/6N9k9Q4R
Palm Beach	Government	Please DO NOT reopen Florida so soon. We have been quarantining since the beginning of March. I have been out of work for seven weeks now. My husband has been out of work for two weeks now. Let everybody remain closed for another couple weeks so we don't have to do this all over again. I can't do this again.
Orange	General	Keep small business closed at least until June. Opening within the next 2 weeks could be dangerous. If small business open and get confirmed covid cases it could possibly put them out of business. Its best if we all wait. There is no way of hiding which companies get confirmed cases. People talk.

AMERICAN OVERSIGHT

Hillsborough	Recreation	While I work in healthcare and have seen the effects of this disease and agree that we should wait until public health experts are okay with opening back up the state, I think when we do open up it should be cautiously and focusing on areas that would boost back up the economy and get people back to employment. For Florida this is the tourism industry however there are a lot of Florida residents that are wanting to safely go back out and start enjoying what the state has to offer. When opening up, provide businesses that reopen with rules, such as having to enforce social distancing and sanitation of common equipment. If they want to open they must put limits on the amount of people in one place and how close they are and must be able to be constantly disinfecting all surfaces. For example, many places in the past are willing to be open with dirty bathrooms, but now they must be willing to have the staff clean more frequently and extensively or risk being shut down due to inability to protect their consumers from risks related to COVId spread. All places should also screen consumers and employees at the entrances to ensure no fevers or other COVId symptoms. Lastly, antibody/COVId testing should be widely available prior to opening. More people should be able to easily find out if they have or have had this disease in order to safely prevent people from unknowingly spreading it to others.
Lake	General	Sensationalism by the media has warped all sense of perspective. The stay at home orders were intended to prevent an overload of medical facilities. That problem has not materialized thankfully. For a small minority there is high risk and that minority can continue to isolate if they chose to do so. The majority, low risk population, should no longer continue to have their lives and livelihoods uprooted. COVID-19 challenges will be displaced by other social issues very soon if things continue to progress as they have. Public opinion will begin to flip when the dollars run out and true human nature will emerge. It won't be to anyone's liking. Manage the hotspots as needed but let the rest of the state be the adults they are and manage their own lives. Tim Sloper
Miami-Dade	General	Please stop rushing the reopening of Florida. I want it to reopen. I want the economy to get back up. But you put peoples lives before that and it is disturbing. Fix the UNEMPLOYMENT web site!!! For the love of God, don't open the beaches, don't open the theatres, and restaurants yet. Many people in Miami Dade county don't even know how to keep social distance.

AMERICAN OVERSIGHT

Broward	Retail	My husband works in retail in Palm Beach County and has held the job for 5 years. I am disabled with Lupus and recovering from brain tumor removal. We also have my 80 year old mother-in-law with COPD. If my husband has to go back to work, he will have to find another place to live, because he can't risk our health. We would rather be poor than dead! Please don't rush to open. FL has too many older people that this can be spread to. My husband wants to go back to work, just not yet. Our numbers are too high. We haven't left our house since March 15, and our numbers are still going up locally. If he has to go back to work May 1st, I feel like the whole month and a half of quarantine will be for nothing.
Santa Rosa	Recreation	Limiting hours that beaches are open only causes more crowding. When you limit the times, people are forced to go in those small blocks of times. If it was always open, you would spread out the influx of people.
Lee	General	Will Rogers once said: " You got liars. You got damn liars. Then you got statistics." I've never trusted the MSM. It's always slanted. Until something happens to change my stance, I have come to trust Ron DeSantis. Having said that; I only assume that he has the actual numbers to the following: Folks made ill. Folks hospitalized and deaths ACTUALLY caused by the COVID 19. A 'statistic' in the Fort Myers News April 25 stated that 25 % of the Covid 19 deaths in this state were in nursing homes and/or assisted living facilities. My opinion, remove those numbers from the top and start over again. Now? What are the new numbers, then? Numbers don't lie. During the Types A and B flu season of 2017-18, this country experienced: 35 million made ill. 400,000 hospitalized. 4,000 per week for 16 deaths for a total of 65,000 deaths. And both state and federal governments were idle. I'm reading that within 2 weeks, Sweden will reach herd immunity. Lock down kills; more; later. This country needs herd immunity. I have neighbors and family members, mostly single women, that are living in 24 hour panic and fear and literally, are too afraid to walk out their front doors. Their lives have ended. Living from presser to presser - waiting for GOOD NEWS. Shame! Shame! on the government that should know what our citizenry rights are and should be PROTECTING our rights. The governments are not capable of protecting 270 million people. So stop trying. Its not working.
Suwannee	Healthcare	It’s too early to reopen the state as long as your having new case every day.
Indian River	General	Open but REQUIRE face mask, 6-8 foot distancing, retailers to have shorter hours, disinfect more and allow antibody testing for all and accessible. Concerned Registered Nurse.
Broward	Professional Services	My family and I feel it seems too soon to open salons since we are in direct contact with people. We don't want the country to go backwards. Thank you.

AMERICAN OVERSIGHT

Hernando	General	Think about the last time you went to a barber shop/beauty salon. Not many as it used to be - just sitting and talking. In Spring Hill, I once saw two gents in the chairs and two people waiting. For the old folks who live near me, there isn't much hair to cut and the total time is 20 minutes (even less for me!). Women don't sit under hair dryers anymore. Appointments are made and there are few ladies just sitting there. Open them up.
Hillsborough	General	It is time to reopen Florida and our economy. We now know enough to protect those who need it so there is no longer any need to punish healthy people who are willing and able to work. You will not forcing anyone into anything. You will be offering then a choice to either work or stay home as they see fit. The time for fear is over. Floridians need to be empowered to take charge of their live and rebuild our economy.
Citrus	Government	Please keep libraries closed. Books are a surface of high exposure and that's not a big economic driver.
Okaloosa	General	people need to get back to work open fla
Brevard	General	It is way to early to open Florida back up. The curve is not at a point where we the people can feel safe to open everything up. It should start opening once we have flattened all together. We still have way too many people coming up positive. Once flattened then it should be medical facilities and government offices that open up first. See how that goes and then open up more businesses.
Volusia	General	I believe it is far to early to reopen the state, with the warmer months coming up you're opening the gates for thousands of tourists looking to vacation and spread the disease around even more. Keep the state on lockdown, we still have way to many cases of our own to deal with, and opening it up to everyone is gonna make it a million times worse. I work in a restaurant and have a fear of what's to come. Having to make contact with all these people is a scary thought
St. Johns	General	In general open everything. Retail & small business first. People should wear masks if they want. Do social distancing when necessary. People need to be responsible for their own actions. Those who don't feel safe should stay home. If business not ready to open they can stay closed. Out of state tourist should be allowed in last and kept to minimum especially from high risk areas. Bottom line, people need to work, play and spend money to get Florida economy running again.
Pinellas	General	I would very much like Florida to be opened up as per the step plan I would like to be able to go to the beach and swim and paddle and walk along the beach I think it is safe to do the stepped approach and open it up beginning with the first step at the beginning of May

AMERICAN OVERSIGHT

Seminole	General	I'm terribly concerned about opening too soon. I feel a lot of people are not going to respect any "limited" measures, rather an all or nothing mentality. Opening too soon may also just increase the amount of covid-19 cases, we'll see another spike in a couple or weeks and that will effectively eliminate all we've worked for over the past month. I want to get back to normal just as much as the next person, but not at the expense of my health, the health of my loved ones, or public health. Opening too soon and seeing another rise in cases will only prolong this issue and more people getting sick and more deaths, will further hinder any return to economic normalcy. We've come so far, don't squander it by trying to force things and opening up too soon.
Brevard	Information	Yes open the state
Palm Beach	General	BIG BIG Task ahead for your group ~ God's Speed in your deliberations and recommendations as to when-how-who-what-where- to re-open our Glorious Great State of Florida ~ Remember privileged travelers brought this unwelcome & dangerous COVID 19 Pandemic to our beautiful state ~ and indeed ordinary citizens suffer the most !! The future is in your guided hands ~ caution is imperative ~ do not let big business push you around ~ be judicious ~ be smart ~ be wise ~ Be Floridian !! I'm retired at a young 65 in West Palm Beach, after a long public service career in City Government Management and I can assist in any way ~ Just Ask !! My Privilege to help !! My Gift w/o any compensation whatsoever ~ at-the-ready. THERE IS NO ROOM FOR DO-OVERS HERE !! NONE !! I do recommend that part of your recommendation in conclusion ~ includes sending The Communist Regime in China a DUE BILL for damages. All the best ~ Richard "Rick' Collins
Orange	General	We should reopen Florida as soon as possible- the testing facilities are not even using their daily allotment of tests as no one is sick to be tested. We in Orange County have Ben at home since mid March - 6 weeks- and the people testing positive has gone down daily - even the hospital beds are empty. We do not want the small businesses to never open back up. We are all aware about social distancing, and if people are still concerned they have the option of continuing to stay home.
Brevard	General	OPEN THE STATE UP NOW!!!!! Want to commend Gov DeSantis on his leadership through all this and "right" sizing his policies, but let's get this thing going before it's too late to recover.

AMERICAN OVERSIGHT

Sarasota	General	This survey is a very good idea, should have begun weeks ago and not end now. Fl is a very important state, we entice retirees to come to Fl. Cruisers, vacationers, want important high paying businesses to open here. The handling of this virus has left a lot to be desired and has made aware of the fact how little has been thought of in advance. When it comes to the virus, once you began to realize the strength of this virus and knowing the number of passengers that every ship holds coming in and out of MIA/FLL immediately you should have had a field hospital built. Knowing that NY was #1 in Covid-19 I should have taken firmer steps to control the in flux. We need serology tests and anti-body tests NOW, for everyone. I am an independent contractor travel agent who normally earns $75,000 + a year, I will now have 0 monies coming in until Dec at least and can't apply for assistance because of your BROKEN system, I pay my taxes. Would you like to send me a check? When are you going to straighten this state out. Oh, and aren't you embarrassed that unemployment max is $275.00 a week, disgraceful. Have you realized now how important our agricultural workers are? WAKE Up, now we have to worry about Hurricane season. OH, and when are you going to clean up the undrinkable water in this state, I got an bacterial infection on my leg from the pure Fl water.....and NO we should not open up to the dredge of people that will come down here to play without safety not the citizens of FL who pay your salaries. This pandemic will be back and we need a plan. Listen to the Drs. And scientists. And do what is right. Thank you
St. Johns	General	Thank you for opening our beaches. I think we should keep them open the entire day. Limit groups to 10 or less and keep from other groups by six feet. Enjoy the beach, lay out, picnic, etc. Also, open restaurants and hotels. Allow Florida residents the opportunity to enjoy their state. Staycations within their state, etc. Slowly start opening other businesses, etc. Let's get our state and economy open again. Prep for school opening in the fall. Thank you for your service to our state.
Escambia	Recreation	I personally think the state is ready to open up... the numbers are still raising the young people don't care I feel as if these is a slap in the face to risk lives of ones who actually care about there lives.i just wouldn't open Florida up just yet
Pasco	General	Please do not reopen the state until it is medically safe to do so. Please give it atleast until mid May or beyond so that it is a successful and safe reopening versus prematurely reopening and then we are all back into quarantine due to another major outbreak. Thanks!

AMERICAN OVERSIGHT

Hillsborough	General	It is time for Floridians to get back to work. Throughout the past weeks businesses deemed “essential” remained open. Floridians voluntarily engaged in social distancing, voluntarily followed CDC guidelines. With these businesses open, sometimes serving hundreds of people at a time, we have witnessed COVID numbers falling. The State of South Dakota never mandated a single business closed and are also seeing COVID numbers falling. These facts prove that Floridians are responsible people, who love their neighbors, and will CHOOSE to do the right thing. We need our elected representatives to do the right thing; open our businesses now, not later
Palm Beach	Recreation	Please open the large parks as it is the perfect place to social distance with thousands of acres. There are thousands of miles of trails - if you come across another person step ten feet off of the trail. Thank You Teal Clark
Orange	Retail	Keep small business closed at least until June.
Palm Beach	Recreation	open golf courses, beaches for sunning, swimming, and all businesses!!!!!!!
Seminole	General	Whilst I understand the business community wanting to get back to work and get going again, I firmly believe that this should only be done when health professionals along with supported data show and demonstrate that the risk has been severely mitigated. The concept of a decline in new cases should be a factor but not the deciding factor. I would rather see is being safer rather than sorry and extend the deadline until the 15th to gather evidence and see the impact and trends then. I believe our Governor is doing an immense job under extreme pressures but given the bill signed and the grants being paid I think it will do more harm than good opening next Friday. It should be about safety and well being rather than $’s in company and people’s pockets. Yes, Ofcourse that is important, but nothing compared to a life of which too many have been taken already. Please extend our lockdown. Best, Alistair Kerr
Palm Beach	Professional Services	I would say reopening malls to walk around and shop as well as hair places to get hair cut

AMERICAN OVERSIGHT

Seminole	General	Dear Gov. DeSantis, I would advise for the CDC to allow hospitals to treat COVID-19 patients with blood plasma since it's been effective in getting people out of ICU and it's been saving lives. Here would be my proposal: Get "recovered" non-hospitalized COVID-19 patients to donate blood as it has antibodies to fight the COVID-19 and to give those blood transfusion to whoever is in mild to severe condition. We need to get as much "COVID-19 recovered" blood donors to donate blood not only because it's been an effective treatment, but because we may not see a vaccine until the Fall season. Blood plasma transfusion is the ONLY effective treatment as of NOW as we wait for a vaccine. Please get these recovered people to donate blood so that we can decrease the amount of people who have been infected and get the state to reopen again sooner! Again, this is the only treatment that has been effective as we wait for a vaccine. Sincerely, Brian.
Manatee	Healthcare	I am an Uber driver and fear every time I go to work as I pick up people connect me sneezing and coughing right behind me on a nightly basis. I would like to put my mind at ease and find out if I have already had this virus. People that have had the virus should be cleared to go back to work immediately after negative test. Question are the antibody test going to be available soon help people figure out if they've had this virus or not and how quickly can I get tested
Miami-Dade	Professional Services	Hair and Nail Salons open . Still practice safety wearing masks taking temps at door . Spacing out clients. Opening hotels with new guide lines.
Osceola	Healthcare	Dear Governor, Please re-open the state. Covid19 numbers aren't as high as it was predicted by faulty models for a complete shutdown. We should go back to normal, all healthy individuals should be able to do everything as usual, sick and high risk needs to do voluntary quarantine. We want natural heard immunity, not a future vaccine derived one, where studies and proper safety protocols were skipped, no long term risk/benefit assessment done. No mandatory future vaccine for people, as everyone should be able to consent to it voluntary without any repercussions over flying, driving or other insane measures. Some political and medical leaders are considering ID certificates for immunity, I see it as discrimination and infringement on our rights. Where is the land of free and brave!? Open the state!

AMERICAN OVERSIGHT

Polk	General	All of Florida's industries need to reopen on May 1. Social distancing should be encouraged, but not mandated. Theme park attendees should wear masks. Florida's families have been effectively quarantined for over a month. I am a school teacher and through my conversations, this is taking a toll on families. Depression if it hasn't already, will set in. There is essentially no way to exercise or have recreation outside of the home. Unless you golf, and that is OK, while boating in my city is not. Please get Florida back on track, reopen, and protect our freedoms.
Orange	Healthcare	Do not open the state. I'm worried for the safety of myself and my grandparents.
Union	Agriculture	Please help
Seminole	General	I'm an essential that's terrified every day when I'm at work that I'm going to catch it or worse, carry it home to my family. I haven't seen my grandchildren in person for over a month. We do NOT NEED TO OPEN FLORIDA BACK UP YET. People still aren't following the guidelines correctly and if we open to soon, it will only get worse.
Hillsborough	General	I live in Hillsborough county and the number's for this virus are way below what was forecast. Small businesses are hurting people need to get back to work. We need our lives back. I'm 65 years old and I had this in December 2019, I had all the symptom's, I went to the doctor and was told it was a virus, it took a couple days for my fever to break and the cough lasted about 15 days. Many people I know had the same thing at the same time. Please open things back up NOW. Thank You David Storck
Brevard	General	Determine ahead of time what will happen to those at high risk if exposed to Covid 19. If a business reopens or if a small business qualifies for Payment Protection Plan. FOR THOSE AT HIGH RISK: 1. If laid off need to return to work? 2. Lose unemployment if unable to return to work? 3. Have to be paid by PPP even if unable to return to a job in a high tourist area?
Flagler	General	Sometimes our governments have to trust us, the public, we have trusted in them and made the mitigation work. I don't think there will be a run on the bars by 65 year old persons. Open the beaches on which people especially the older people usually social distance anyway. Open the trails and parks so we can be outside which helps prevent exposure. Develop and enforce work place rules of social distancing, sanitation and tele-work whenever possible. Everyone will continue the social distancing and protection of masks. Elected procedures in hospital should be done, not to may be as dangerous as the virus. The targeting of nursing homes should be continued, it works. Open the state offices and get those persons back to work. Restaurants must reduce the number of tables and distance, sanitize, and employees monitored for fever and virus. Once an immunity is developed we can open sports arenas, movie theaters, and malls but not until then.

AMERICAN OVERSIGHT

Brevard	Healthcare	I understand the need for opening up, but it needs to be gradual with appropriate precautions. What really annoys me though is when people say “the higher risk can CHOOSE to stay in”. How is it a CHOICE for them and their family members? My 17 yo grandson lives with me and is high risk due to a compromised immune system since he’s on anti-rejection meds after having a kidney transplant 2 years ago. If he goes out to go to school or work or we go out, then we don’t just risk getting Covid 19, we risk his life and his new kidney. Opening up too much too soon means the longer he and our family and others like us can start venturing out. Basically, healthy people are saying, allow us to go out and I don’t care if higher risk have to stay in longer because as long as I have my freedom it’s more important that waiting a little longer to make sure it’s safer for everyone. It’s not really a choice if it means risking you or your loved one’s life.
Lee	Healthcare	I work in a dental office. The dentist wants dental hygiene to reopen May 11 th. I am a dental hygienist. We use machines that produce aerosols / droplets. These droplets can stay in the air for 5 hours and are circulated through the office. This puts the patients after the infected patient at risk. Cleanings should not be in phase one! If anything they should be in last phase. This is not ok! People who aren’t in dental field do not understand this! We are trained for preventing blood borne pathogens not airborne. There are air filtration and new suction systems coming out now but we don’t have them yet. We don’t have proper PPE. May 11 is too soon!
Polk	Education	My only concern is school for 2020-2021 and the virus. I have 2 kids that attend public school and while the claim is that the virus doesn't hit kids hard they still bring it home to their families. I'm diabetic! I'm for opening everything like parks, restaurants and all small businesses back up so life can go back to somewhat normal. But we do need to plan for the future as well and in areas such as school too. Maybe mask should be mandatory in all public places for a while. Just my opinion, thank you
Hillsborough	General	I do not think it matters what people think to reopen a state especially when it's a matter of life and death. I think we should take our time to reopen and make sure this won't start a second wave of infections.
Duval	Recreation	Please open the state parks especially for camping. We are adults who can care for ourselves and when camping aren't you really looking to social distance from others anyway? Thanks.
Duval	General	Please open businesses, or at least those businesses that can implement social distance guidelines. Our economy and people's lives are being destroyed.

AMERICAN OVERSIGHT

Duval	General	Too soon to reopen!! Ever since the beach opening in Jax, the road traffic has been bad. It was like it gave the okay for everyone to go out and forget about social distancing. I went to Ed Austin park to walk last night and there was a large gathering in the large dog park. Noone social distancing, same as the ones in the parking lot the night before all hanong out at their tailgate drinking beer while their dogs rested. That was only a group of 4 with dogs there, but having a good old time splitting a 12 pack. My point is everyone is acting like it is a normal day in Jax . Next was the Walmart on beach Blvd and Hodges, no social distancing existed there. Point is you gave them a foot of leeway and they took a yard. Imo too soon to reopen.
Osceola	Recreation	Keep small business closed at least until June. Opening within the next 2 weeks could be dangerous.
Pasco	Healthcare	I think we should open things back up slowly and safely. However the labor and delivery at the hospitals should be allowed two people that get checked at hospital entrance. Expecting mother's want the father present but most usually really need their mothers as well. Also ultrasound appointments should be allowed to have the father present. These are hard times but their are certain things that you can never get back such as the birth of a child
Escambia	General	Please do not re-open the state until we have met the phase one criteria of 14 days of declining cases.
Orange	Healthcare	Persons under 65 without medical conditions appear to be very low risk with an extremely low death rate. Probably less consequential than the flu. Let's reopen Florida for this very low risk group. Special precautions can be taken for the higher risk group. But we do not have to have the same strict precautions for the entire population. Let's use some common sense / customization. One size does not fit all. If we do not get the economy moving, the long-term negative effects on the quality of life in Florida will be significantly greater than the impact of the Covid virus.
Miami-Dade	Healthcare	NO! TOO SOON to reopen cases continue to rise daily, fix Florida unemployment and get Floridians their money ASAP! We need to have a period of very low cases and then we can consider reopening in phases. Miami Dade is at extremely high risk considering our current cases stats, as much as I personally need to work for my family I am much more concerned about my family (my children's) health and well being above all!
Hernando	Education	NO! We can't reopen yet! As a teacher I track to various schools and I can get covid from anywhere! Also kids do not need to be exposed to adults carrying the virus! It is irresponsible and a crime to reopen! Florida needs to test everywhere not just some areas but everywhere! DO NOT REOPEN! TEST FIRST

AMERICAN OVERSIGHT

Lake	General	I am the caretaker of my 2 elderly disabled parents, unfortunately my father has prostate cancer and my mother suffers from COPD, Syncope and acute pancreatitis. For the past 2 months we have sheltered them at home, even started a month ahead of the "mandatory lockdown throughout Fl". Durung this time I, myself, have became the only one who risks going out to pick up medications, food, etc, anything that can not be purchased through home delivery. I have made the 3 layered masks and wear them on every outing and practiced the 6 feet rule. Unfortunately EVERY TIME I AM OUT I ONLY SEE MAYBE 2% wearing masks, this includes the ELDERY, PLEASE MAKE MASKS MANDATORY FOR EVERYONE!! Our wonderful essential workers needs this to help them also. Our healthcare workers NEEDS THIS SO THAT THEY CAN ONE DAY GO HOME AND HUG THEIR FAMILIES ALSO!! Thank you for your time and effort that everyone in our beautiful state has dedicated to help us through this pandemic. My God bless us all!! GOD BLESS AMERICA!!
Pinellas	General	I want to speak my mind about the prospect of re-opening the state. I honestly don't think we're ready. We're still seeing more cases pop up each day, and I was under the impression that we were going to wait for the curve to flatten. It obviously is still a problem, and allowing people to do more non essential activities is only asking for more people to die. I am willing to bet most of those out of work would choose someone else's life over a paycheck right now. Show that our leaders care more about people's lives than the bottom line. Together, we can beat this.
Bay	Accommodation	Time to open up, will be thousands of foreclosures in vacation rental business if not addressed quickly.
Volusia	Food	You need to do something to help us in the restuarant business who have yet to be paid In ALMOST 6 weeks..
Hernando	Tourism	Opening will be great please let's keep it Florida residents only for a few months. Just to see what happens. I do realize we need out of state visitors for our economy. But not yet. Yes open parks and campgrounds to Florida residents only. Thank you
Duval	General	Please make it mandatory for all business that can allow their employees to work from home to continue to work from home (especially large call centers) this will help to stop the spread of the virus.
Lee	General	Open fully now. No mandatory masks. Just full freedoms and back to our lives immediately! The data is in and does NOT support these shut downs and loss of income and business. Masks are not healthy to be worn all day and do very little if anything to protect you especially when done incorrectly which the majority of the population is doing. We can all do our part by keeping up good hygiene practices and staying home when sick just like we should do during flu season. Facts over fear please consider what the fearful public is seeing daily and how it's effecting their opinions of reopening. Spread the facts like wildfire to provide some relief to their fears. Re-open Florida!

AMERICAN OVERSIGHT

Pinellas	General	Hello. Thank you for starting the process of re-opening our state. This virus has upended millions of people throughout our state. We have all done our part and limited our movements in an effort to limit the impact of this virus. It is now time to re-open Florida. Millions of residents are struggling to provide the basics for themselves and their families. We cannot keep this going without permanent damage to our state. We cannot let the shut down of our state do MORE DAMAGE than Corona. PLEASE re-open our state immediately. At some point most of us will get Corona. This is NOT a matter of eradicating this virus, we simply needed to slow it down. We have slowed it down. Now let's get our state back to work. Thank you!
Broward	Recreation	Open parks and state campgrounds with safe restricrions
Taylor	Information	While I would love things to be opened now is not the time. In my county it is hard to get a test a I believe the numbers are higher than we know. Give two more weeks to get this under control. If we don't wait we might never a summer. Don't open to soon. Cases are still showing g daily.
Marion	Healthcare	About the reopening of the state. On the one hand I don't think we're ready. So many people are still dying. However on the other hand my daughter is trying to get unemployment cuz she was let go until the state opens up. I have mixed feelings because I have asthma, hypothyroidism and fibromyalgia. I'm afraid I'd be a good candidate for covid-19. I think we should open the state slowly. If possible testing us to see if we do have or have had covid-19. Marion County is mostly rural and they have told us to not call for testing unless we have symptoms. The actual count for covid-19 here maybe higher. We just don't know. If we can get tested I think we should open up the state. Thanks for listening.
Orange	Recreation	Please open all the state parks, campgrounds, beaches and beach parking. People still need to stay at least six feet apart, but we also need fresh air and the sun. Please open offices and businesses as well. The economy and people need for people to be back at work. I am not a frivolous person. I realize how dangerous this virus is. My sister is very ill in the hospital. Everyone needs to wear a mask, and carry hand sanitizer or water with beach in it everywhere they go. Thank you for all you are doing.
Seminole	General	It's way to early. Ppl are out more and not social distancing and there is a lot more of them not wearing mask. If Florida opens to early there will be more cases and death and lives are more important then the economy! Governor DeSantis reacted slow on the stay at home order and relying on what President Trump on would say on the virus. DeSantis should've done better and put the ppl that elected him to do was protect Floridians! Now will be the test to show Floridians!
Broward	Technology	Military Veteran/Field service technician wanting to get back to work and play it safe. #FLORIDAISOPENFORBUSINESS #MAGA Let's make it happen!

AMERICAN OVERSIGHT

Brevard	General	Let's stop being a national joke or punchline! Follow the CDC Guidelines and stop bowing down to corporate and political donors. Act on behalf of the safety of the people!
Brevard	Food	I do not understand why bars are treated differently than restaurants. With reasonable seating and capacity rules there is no difference than spacing at a grocery store or restaurant. There are many people unemployed for the sole reason that there establishment does not server food. If restaurants are opened, with reasonable accommodations, bars should be as well.
Brevard	General	Please do us all a favor and wait to open up when it is deemed safe and healthy to do so
Lee	General	I think the state of florida should stay in lockdown until there has been a multiple day decrease in the amount of cases per day. encouraging social distancing and keeping businesses closed will help the situation from getting worse than it already is. I would rather the state be locked down for longer, than the state open and then have to close again due to a spike in cases.
Broward	Recreation	Dear Sir, I am writing this as a long time resident of Broward County. I am a retired man who's only activity is my daily trips to the dog park. I have a one year old fox terrier who has more energy than the sun.Since I bought this highly active dog we have been going to the dog park seven days a week for four hours every morning. I think that at our age we are responsible enough to follow rules of safe distancing and using PPE. I beg of you to consider reopening these neighborhood parks for my dogs health and my mental stability. Just kidding on the mental stability thing. Thank you for the opportunity to add my input into this serious conversation.
Orange	Accommodation	•Immediately lift Stay At Home order and night curfew. •If you feel sick "STAY HOME" do not go to work. •Maintain social distancing as much as possible. •Anyone who chooses to go outside especially into a public gathering/forum must be wearing a "MASK!" •Allow for social gatherings such as eating at restaurants, drinking at bars, shopping at department stores or social visits, conducting COVID-19 testing and temperature readings for all visitors who visit nursing homes prior to entry. •Continue good hygiene such as: avoid touching your face; washing your hands especially after touching any frequently used item or surface; sneeze or cough into a tissue or inside of your elbow. •Disinfect frequently used items and surfaces as much as possible. •Open theme parks and Movie Theaters at 75% capacity, taking temperatures as people are walk through security stations. •Daily COVID-19 testing for all employees subject to/exposed to public social gatherings such as theme parks, restaurants bars, nursing homes. •Allow for sporting events at 75% stadium/area capacity taking temperature readings prior to entry. •Should you choose/decide to go outside your home to participate and/or enter any of the above establishments/gatherings, you do so at your own risk for exposure to COVID-19. •Post sanitary squirt stations (as in cruise ships) throughout establishments.

AMERICAN OVERSIGHT

Broward	Education	In the case of children in EHS it is a risk to go to school, it is recommended that infants and toddlers stay at home with their parents, most of them do not work therefore they can assume their responsibility. Therefore it is a good decision to end the school year, graduations, home visit, online. Taking into consideration the health of teachers and caregivers. It is good to wait for medical studies.
Pinellas	Government	Please be cautious in re-opening the State. The Institute for Health Metrics and Evaluation at the University of Washington Is recommending that relaxing social distancing may be possible with containment strategies that include testing, contact tracing, isolation, and limiting gathering size ONLY AFTER JUNE 14th. Use good data and metrics to make these decisions and not emotion. Thank you.
Polk	Healthcare	67 yr asthma (compromised immunity) Healthcare worker. Furloughed from a very large clinic Insure my protection when called back to work. PLEASE
Pinellas	General	Regarding opening the state after covid-19 lockdown. Please monitor how Georgia's cases change after 2-4 weeks after their re-opening before deciding to open Florida. You can watch how it affects them and make decisions on that.
Lake	Healthcare	I believe this lockdown has been beneficial, but now it has to be lifted. I did the infection rate for 3 counties - Lake, Sumter and Marion respectively. The infection rate is less than 0.5%, when taking in account the total population. The economy is basically at a stand still; the public is not going out and supporting local businesses. With the infection rate this low, it is unreasonable to allow to continue on with this lockdown. People are hurting economically, unemployment is skyrocketing, and even with federal support - small business owners will inevitably will have to let go long time good employees. This does not and should not happen. Please open up the economy and end this ridiculous lockdown.
Duval	General	its time to go back to normal. no gym, no beach, no life. just tell everyone to spread out. its easy to stay apart. florida needs the money. things are calming down
Escambia	Finance	I am a hairstylist that is an independent contractor and being self employed I was denied unemployment and have not been able to appeal that decision all month because the overwhelming amount of claims that are being submitted. The online amd phone system are not open. My family is suffering and returning to work is vital. I take all necessary precautions i can to stay safe and keep others safe but I need to go back to work.
Seminole	General	Open it all up... everyone wears mask
Sarasota	Healthcare	Expand access to antibody testing to permit rapid and convenient availability to those who believe it would be of benefit.
DeSoto	Government	What good will it do to open to early and have a resurgence of the virus and everyones sick or dead.The economy will fail worse. Dont trade lives for dollars. Do what the experts say to do and dont follow politics.

AMERICAN OVERSIGHT

Sarasota	General	Please do not reopen businesses and recreational facilities until there is much broader testing available and the number of new cases declines for several days. And keep social distancing guidelines in effect indefinitely as we know the virus is still circulating. Also require people to wear masks when out in public. Thank you for considering the concerns of vulnerable senior citizens.
Miami-Dade	General	Do not reopen yet it's a recipe for disaster
Orange	General	I'm very optimistic about reopening Florida, I think it will be better for everyone and for the economy, we need to be flexible in this times to find the right solution, but keeping everyone in the home just will make no one gain immunity to this virus that we know will stay with us for a time, the better chance for or economy and for our lives, is, let every one that is not from the group of risky have their days back to normal, with some precautions, as the use of masks and doing our best with social distancing and sanitizing crowded places. With tourism, small businesses, and schools coming back to operate most similar to normal our economy probably will start to recover slowly. I think it's for the best and we will soon have a chance to fight tougher against this invisible enemy. I saw other countries plans to reopen doing something similar, and keeping the risky group in isolation until 70-80% of the population get immunity. With especially hours and flexible shifts for those who need and also keeping everything working as normal till the hospital's capacity gets to 50-60%, passing this capacity the state goes through a smaller stay at home till it gets lower and reopens again. But it's fundamental that the state reopen the economy as soon as possible so we will get ready for the winter season.
Manatee	General	Please require the use of masks in indoor places. People are in stores intentionally getting within 2 feet of people because they have the attitude that they are free to do whatever. They are putting others who are trying to socially distance themselves from others in harms way. They should not be able to be around others and possibly infect them. I have heard of fights breaking out in stores because an unmasked person got within 6 feet of others.
Seminole	General	I've worked in healthcare for 19 years. I specialize in infection control. I worked at advent for 17 years and now a surgical center. Reopening restaurants, ESPECIALLY those with alcohol are particularly dangerous. We all know for a fact alcohol lowers inhibitions. People's guard becomes lower. They are more likely to participate in risky behavior, same as before. in addition to that spreading the virus unwittingly. The people who have worked in this industry in my opinion most often lie on their taxes as servers claiming less. They should've had money in the bank and cash on hand. Why should the rest of us suffer because they have poor money management skills. Plenty make more than I do as educated health care personnel. The only food we truly need is from grocers. Open restaurants if you choose. Forbade alcohol sales in them. It promotes loitering, & risk taking behavior.

AMERICAN OVERSIGHT

Marion	General	I believe that reopening the state and country too soon could be detrimental to what the CDC and health care workers have been doing to try to slow the spread. Opening too soon could cause a spike in numbers and a regression. Everyone needs to listen to the CDC, WHO, and knowledgeable medical teams. Safety should always be put first above all else.
Lake	General	Please start to open things up soon! Continue with mandatory masks. Continue promoting good hygiene. If you are not comfortable going out due to age or comorbidities, then don't. Let the counties with the smallest cases open up first. We must get enough people out there to develop herd immunity. We can't all be forced to sit in our houses until a vaccine is developed, that's crazy and will destroy our country economically.
Osceola	Tourism	In my opinion, the theme parks could reopen BUT at reduced capacity. Instead of 100% capacity, start out with 10%. Make it for locals only. Have the theme parks judge on how this is doing. Report back to the Governor, then in a week or 2 increase it by 10% (to a total of 20% capacity). Then keep doing this increase over a week or 2 as long as there is NO negative results (positive Corona Virus results). Let the theme parks use infrared cameras to check for body heat (a sign of infection). Also give the theme parks the ability to turn away anyone that maybe infected (with NO consequences). Put the theme parks on notice, that it is up to them to keep their place safe and clean. Any increase of positive test results will result in the theme parks being shut down and the state going back on lock-down.
Broward	General	I'm giving my full support for the opening the state in full in as short time as possible! We family of 5, unemployment without any help with 3 kids at home. This is genocide of freedom and free people!!! I believe in facts and pure science which proof that all this hoax is absolutely FAKE. OPEN THE FLORIDA, OPEN THE COUNTRY WITH NO RESTRICTIONS.
Escambia	General	OPEN THE STATE UP! Let the ones that are at risk or that are afraid stay home. Open the rest of the state up please.
Orange	General	Please do not open too soon. My wifes uncle recently passed away and was only 58 years old and healthy. I think a slow open, keeping each business to be opened slowly. I think it is ridiculous that spas, salons and barber shops are opening.. They should be the LAST business that open. My works at a spa and I want her to go back to work, but for her safety and her staff, they can not stay a part in that line of business. How can you open a spa during this time, when they touch bodies all day. You cant stay 6 ft a part there. What ever decisions you make, please be safe about it. Lives lost are not worth a few more weeks of the economy being closed. Thank you for your time

AMERICAN OVERSIGHT

Pinellas	General	I think beaches should reopen. I work in hospility on the beach. We closed down as soon as the beaches and pools were closed down. Even though hotels are considered essential, we shut down knowing with the beaches closed no reason to stay open. Hotels, resorts etc..need to be still only operate at half full or actually less really. If the beaches do open, people will crowd in. Open them up, but only operate beach parking lots at half full or less, and hotels, resorts operate at half or less. To keep the crowds down at beaches for now. Do curfews on the beach, to close at sunset Public pools, or hotel resort pools should still remain closed. Only because with those reopened. Hotel guest just pile in the pool. Hotel resorts do not have time to babysit guest and make sure they are "social distancing" which is hard to do in a pool setting. Outside eateries. Restaurants that offer outside eating should be allowed to reopen for customers to sit down and eat. . Bars...still need remain closed for now, that is another area that be hard to control crowds for now. It is time for things to start reopening and life to start moving again. That stimulus check was a joke. I make more money a month than what I received. People still not receiving their unemployment. With no income coming in, and families its time to start getting things reopened. At the end of the day, no one will step up to the big companies and make them hold off on collecting on people behind on paying their bills. Its going take some of us forever to just get caught back up.
Duval	Transportation	I was laid off on March 23rd from being a mechanic at Z-Trip in Jacksonville. Since I've been unable to get unemployment which needs to be priority number one right now. Once people are getting paid they'll start spending money and then the jobs and economy will come back. Unfortunately this is a unprecedented disaster that will forever change American Life. But until the unemployed, which is realistically at 20% right now, get paid they will suffer tremendously. I'm unable to find a job right now because no one has money to get their car fixed. I've even attempted freelance work on my own but no body has any money. They all either has lost their job or like my brother went from working 60 hours a week to 32 or less. We Floridians need help first then let's worry about the economy.

AMERICAN OVERSIGHT

Pinellas	General	While I do believe that there are certain areas that definitely have a larger number of Covig cases the huge majority of the state is not dealing with the influx of positive tests. For that reason we need to get the big majority of the state on line with a re-opening in line with President Trump's phase 1. People are nearing a breaking point as I am sure that people all over the country are. But there is one exception...The state of Florida has hung the people out to dry when it comes to unemployment (worst in the country). This was a designed program by former Governor Scott and Governor DeSantis has not done a good job at all of taking care of the citizens. He has pretty much run from the issue (by the way, I am a staunch Republican and voted for him). He has really let us down and that is the compounding issue to get the economy back open. If it is not done in short order, there will be an uprising never before seen. The citizens of the state are not going to let our rights be trampled any longer. Might seem like a rant but I promise you this state is on the edge of disaster, get things open!!!
Escambia	Recreation	I do not believe thatFlorida should open up at this time. We are a high tourist area and with Memorial Day coming up I am really concerned that it will be dangerous. Our Covid number are continually increasing and until we plateau or even reduce these number I am totally against opening our state.
Orange	Education	In August open schools only if data shows no cases by area. If the area is with very low incidence open schools only by two grade levels at a time per school upper grades first. Monitor the incidence by testing those students and teacher, keep track by-weekly, then open two more grades. We do not want to open all grades at the same time all schools and have our children all infected. Teachers with underlined conditions or 60 plus years should be allowed to keep Distance Learning for their safety and students safety.

AMERICAN OVERSIGHT

Palm Beach	General	I am a psychiatrist and have 2 kids. In my practice, we perform TMS treatment for depression which requires patients to come in daily. I can tell you, not only did our patients continue treatments, we are seeing new patients come in despite the risk. They see the precautions we are taking and are reassured and feel the risk of their depression worsening outweighs the risk of catching covid19. They all report that the economic impact has them more concerned. As a Florida resident for my entire life, I I now we are smart people. I want nothing more than to see businesses given the option to open smartly. Patrons will come. THE POLLS ARE WRONG! The young and healthy are ready to go shopping and eat at restaurants and go to salons and the business owners are ready to set up to open with proper precautions. Let them have the choice to open. Let us have the choice to attend. As a parent, my kids need to be able to get fresh air at camp this summer. They, like all kids, have been cooped up for long enough and have missed out on enough milestones. Evidence supports they are at the least risk. They have been home with their parents who have been likely leaving the house for groceries, exposed and fine. No spikes in pediatric cases. Let them out. Keeping them in longer will cause more damage to them. Let the camps have a choice to open or not. We are capable of making smart decisions if given the chance. I predict the Georgia experiment will prove everyone wrong. Let business owners and patrons choose. We will make you proud!
Duval	Government	Its not smart to re open any state especially FL. You have checkpoint in the state but you aren't using that data from the site to make the state safer. You are allowing ppl from NY, CT, LA. We have no clue if these ppl are carrying the virus or not. But we are told act like everyone has this virus. In 1 week more than 1500+ ppl from those HOTSPOTS enter FL. The checkpoint are still open so there's more entering the state with nothing set in place to watch these outsiders. The only thing we asked them to do is self quarantine for 14 days. These ppl been on lockdown for 45 days + & you want floridans to think these people are going to listen and not be outside walking or living among us. Plus all science data tell FL not to re open until June. WE HAVE NOT HAD 14 DAYS OF DECLINE OF CASES, DEATHS or REACH OUR PEEK. STOP THIS REOPENING. It's not safe and y'all know it. If you want to economy the boost y'all to your buddy 45th again and tell him to do a better stimulus package for the people. Other countries provided their citizens with monthly payment. This admin only cares about the BIG companies. We should not be talking about the oil companies they made billions of dollars of the years and they shouldn't need many from taxpayers. The taxpayers need that money more.
Orange	General	Our community is being destroyed by this shutdown. The restrictions are government overreach in my opinion. Let vulnerable people take precautions or stay at home and let central Floridians go back to work. Folks can't get unemployment, can't make mortgage payments and rent payments. The suffering needs to stop now.
Seminole	General	I believe we should start phase 1, and re-open gyms as soon as possible.
Orange	Tourism	Please open the beaches fully!

AMERICAN OVERSIGHT

Citrus	General	Please open everything. Let the people decide to quarantine themselves.
Santa Rosa	Retail	Please think about slowly reopening businesses and restaurants. I am a small business owner, and I know a lot of other small business owners that are ready to open back up! Our businesses are our livelihood. We can take precautions, and of course we want to be safe and want the safety of our customers to be priority 1. We are willing to take extra steps to ensure that because we need income. We are ready to get back to work!
Hillsborough	Construction	While our industry has been deemed essential, we have certain safety items we need to acquire in order for work to continue. These items include masks, sanitizing/disinfecting wipes or sprays, gloves, hand sanitizer. These items are increasingly hard to find, not easier. As you look at opening up sectors of the economy, no doubt safety measures will be required. This will further strain the supplies available. Allowing a business to open, but then having to shutter once again when they can't acquire the needed safety items is not helpful. Particular attention needs to be paid to the suppy chain and availability of these items in these discussions.
Pasco	Healthcare	Dentists need to get the proper PPE and get all employees tested before reopening
Levy	Food	Many of us in the restaurant and bar and hotel business have been hit hard with this pandemic. Will we have a heads up as to when we will be able to open for sit down service. We need to restock and prep our entire establishment. Our rent was due and paid for last month and will need to be paid again with no money coming in. To reopen our doors will be quite costly again. Many of my employees are receiving unemployment, have children and/ or elderly parents and no intention of coming back to work for fear of contracting this Covid19. The way this unemployment us set up why would they come back to work. Half the seating capacity is a start I guess; however, I'm surely not going to need 20+ employees with 30 seats. The PPP loan is another story. We have 2 months to pay it back and we are not even open yet. Am I suppose to hire 20+ people in order to get the forgiveness? What are they suppose to do with hardly any business stand around? We are a small mom and pop veteran owned business. We are in a small town with only 12 cases and no deaths. Please open our doors before we cannot afford to and when this unemployment ends there will truly be 20+ people officially out if work with no assistance and less choices to find employment locally.
Hillsborough	Tourism	I don't believe the stay at home restrictions should be lifted yet, at least here in Hillsborough and Pinellas counties. Not without adequate screening and hope for development of a vaccine. Social distancing, for the most part, seems to be working. Opening restaurants, bars, and especially schools, despite the hardships, is an open invitation to disaster.a more detailed study and observations, followed by a sensible and slow re opening of the state, should be considered, and it should be done on a county by count basis.

AMERICAN OVERSIGHT

Walton	Technology	Phase in short term rentals toward mid to end of May and provide a mechanism for enforcement at local level. As a property owner who also rents, I am concerned that our small area cannot take the influx from other areas and states. We are a tourist destination and that is the lifeblood. However, we could ruin the summer if not done properly. Unlike most of Florida, summer is high season. We have lost spring break. If 22 miles of the 26 mile stretch of beach were accessible to all under customary use, we would be better prepared for the summer. The current beach nightmare needs to be addressed. The legislature broke it. They should fix it. Thanks.
Manatee	Food	I believe opening restaurants with strict guidelines would be a great place to start
Orange	General	I believe a slow opening using social distancing as soon as possible is needed. Hotels need to show cleaning that would prevent the spread of the virus. Restaurants could open with half capacity to keep people apart. I think most businesses are planning for this and need to be given the opportunity to open up, maybe only using a reservation system.
Broward	General	Should not be opening until there is testing for immunity as well as for Covid19 in all people returning to work. There needs to be a way of providing what is known as “Positive ID” in the form of either a smartphone “certificate” that can only be unlocked with the person’s fingerprint OT an implantable microchip that’s associated with a record in a national or state database registry of B people who have immunity.. also there needs to be widespread surveillance testing to identify even asymptomatic people who test positive for Covid 19 and to isolate those people. Until it’s possible to implement a digital “immune passport” and isolate Covid 19 positive people as detailed above., we should be opening ONLY businesses where it is possible to practice social distancing that keeps people safe and then should require masks that filter out VIRUSES, not just bacteria. Meanwhile Fed government should use the DPA to require businesses to manufacture these masks, and make them available to citizens to purchase at reasonable prices. The opening of tattoo parlors, massage parlors, bowling alleys should NOT be done. There is NO way to practice social distancing in those businesses. And restaurants should definitely not be allowed to open for anything other than FB delivery & pickup.
Seminole	General	I believe it is too soon to reopen Florida. As a tourist hub, reopening the state would just encourage unnecessary travel and expose many more people to the virus. We could back to zero in less time than it took for us to get here.

AMERICAN OVERSIGHT

Duval	Government	Please please please think of all the severely immune compromised people who depend on you to help keep us safe. I am a young person with breast cancer in the middle of chemotherapy. If my caregiver or I get COVID19 from others who are forced to work unnecessarily, I will likely die. Our lives are more important than political optics or minor inconveniences of haircuts. You can literally save my life and others with your decisions. Thank you for making the right choices.
Orange	General	Please do not be hasty.
Orange	Food	Hi, I am a bartender for a venue on International Drive in Orlando, FL. Although I have been severely impacted by the quarantine due to the nature of my work, I urge you all to consider to reopen at a later date. Being in the hospitality industry, it is our job to serve both the local community and those who travel and vacation here in the city. We are being put at a unique risk of not only becoming sick but possibly infecting others just by the nature of our jobs. We get paid below federal minimum wage because we are in tipped positions. If business is slow, we make nothing. Our hourly rate barely covers the taxes that are taken out from our tips, so most of us barely see anything above $100 on a bi-weekly paycheck. Please understand that I have no qualms about working or working hard, considering the industry norm is at least 8-10 hour shift on our feet, running around, the entire time. However, I value my health and the health of my family over the desire of others wanting something to do. There seems to be a group of individuals who think it's ok to expose others to the disease simply because they are bored, they need a haircut, a massage etc. I find it insulting that these individuals do not want to go back to work themselves, they are asking US to go back to work to service THEIR needs and that is NOT ok. Public health should be this administration's number 1 priority.

AMERICAN OVERSIGHT

Lake	Education	The task force needs to take in to consideration that there are people who have/will have the opportunity to work, but with the schools being closed, no camps, and child care not being easily available, people are not able to go back until there are options for child care. Also with the kids being out of school, and not going back, for this academic year, they will have missed an entire 9 weeks of school. I believe there needs to be a plan for the kids to start the new year early. The "Distance Learning" does not benefit all kids, as they all learn differently, and not to mention the fact that not everyone has access to wifi. My child's "Distance Learning" has heen nothing more then short videos, with a few basic questions, she's not engaged at all. I have reached out to the teacher for things to do to get ger ready for next year as the "Distance Learning" is not providing anything beneficial. As a parent this is my responsibility to get my child ready, however not all kids are in an environment where any learning is going to continue, there are kids that will be left behind as they learn better in the classroom, or they are in situations where learning is not a priority for whatever reason. Also the FSA testing should probably be held off for the new year as well, especially if the missed 9 weeks is not made up. Typically there is time during the year where they prep the kids for FSA, but with this missed 9 weeks of classroom time, the kids will need a full review of this past school year before learning new grade level topics, then they will need adequate time to actually learn new topics before having FSA pushed on them, especially those who will be taking the FSA for the first time. Being out of school from Mid-March-August is 5 1/2 months, that is a very long time, especially for school aged children. Please take into consideration have the missed 9 weeks made up, I understand the teacher's union won't be in favor of this, but think about the students. This has been an unprecedented situation, I understand that, but it isn't like a few missed days or weeks for a hurricane and not making the days up, this is a total of 5 1/2 months of missed time. Thank you for your attention. Jamie Oliver
Duval	Transportation	I was laid off on March 23rd from being a mechanic at Z-Trip in Jacksonville. Since I've been unable to get unemployment which needs to be priority number one right now. Once people are getting paid they'll start spending money and then the jobs and economy will come back. Unfortunately this is a unprecedented disaster that will forever change American Life. But until the unemployed, which is realistically at 20% right now, get paid they will suffer tremendously. I'm unable to find a job right now because no one has money to get their car fixed. I've even attempted freelance work on my own but no body has any money. They all either has lost their job or like my brother went from working 60 hours a week to 32 or less. We Floridians need help first then let's worry about the economy.
Orange	Retail	We need to open ASAP. The state's disastrous unemployment system has not provided any relief for my self of any of my 35 staff members put out of work by the stay at home order Let businesses open.

AMERICAN OVERSIGHT

Lake	General	First is gas stations , We should put clear inexpensive gloves for the pumps and the debit keypads .or bottle of common spray for the keypads . Second in construction only have 1 company at a time in the home for new construction. Also for watery places have a plastic sleeve cover for the cups that way the only thing the customer is touching is there throw away sleeves on the drinking cups in restaurants.also shield just The supermarkets have between tables then then restaurants wipe down shields between family
Pasco	Education	As a veteran teacher of over 20 years in a public high school, I can say with confidence that because of the lack of leadership and leading by example. students will not social distance under any circumstances that allows them to be around each other . In a classroom that is 17x 30, 35 students and 3 adults are crammed in. Many days there is not enough room for fire safety, let alone social distancing recommendations. Most schools in our county have no windows in the classrooms and the entire school shares the same air recycled and pushed through mold ridden air duct . The number of teachers with health issues should not surpise you under these conditions. We have 7 cancer survivors, 2 teachers with MS, 15 teachers with illnesses related to immunodeficieny . This does not include the teachers with severe breathing problems like asthma and chronic bronchitis...Our school houses and educates the special education students, many of whom are wheelchair bound and have underlying health issues related to their exceptionality. Requiring the reopening of school, even in the fall, is going to be a death sentence to our a large percentage of out staff. . In addition, quite a few teachers care for their parents, creating a highway for covid 19 to spread and decimate the population of educators in Florida. Making teachers choose between working and increasing the threat we face on a daily basis that could cost us our lives and taking care of the students we hold so dear. I have already had 2 students permanently withdraw to home school because of health issues and the fear of them dying if they go to school. Think for one moment about that. We are not policemen, though it is expected if us to shield students during a shooting. We are not therapists, tho the state forces us to teach mental health and suicide prevention to students. We are not doctors, but we are usually the first to acknowledge a student is ill, because we spend more time with them that their parents in many cases. We are teachers, which requires a selfless mindset, putting the students' safety above our own in a number of situations. Forcing us to go back to work in a building with zero fresh air, zero circulation, no windows and packed tighter than economy class on an airplane (in 2019) will cost many of us our lives and quite possibly the lives of those we care for outside the school day. Please listen to science. Please look at Italy. Please know this is not anywhere near being over. We slowed the coronavirus down, by staying at home. If we open up now, it
Seminole	General	DO NOT open businesses especially where large groups gather without widespread testing and tracking. The first businesses you should open are government offices and places the governor's family would like to frequent. If the governor deems these safe for his own family then maybe it's safe enough for mine. Support food pantries and fix the issues with unemployment claims.
Alachua	Healthcare	It is cruel and heartless to continue a lockdown that prevents citizens from obtaining the medical care they need. No Covid19 data supports a continued shutdown. It’s imperative to lift the onerous restrictions placed on our well being.

AMERICAN OVERSIGHT

Palm Beach	General	I am a psychiatrist and have 2 kids. In my practice, we perform TMS treatment for depression which requires patients to come in daily. I can tell you, not only did our patients continue treatments, we are seeing new patients come in despite the risk. They see the precautions we are taking and are reassured and feel the risk of their depression worsening outweighs the risk of catching covid19. They all report that the economic impact has them more concerned. As a Florida resident for my entire life, I I now we are smart people. I want nothing more than to see businesses given the option to open smartly. Patrons will come. THE POLLS ARE WRONG! The young and healthy are ready to go shopping and eat at restaurants and go to salons and the business owners are ready to set up to open with proper precautions. Let them have the choice to open. Let us have the choice to attend. As a parent, my kids need to be able to get fresh air at camp this summer. They, like all kids, have been cooped up for long enough and have missed out on enough milestones. Evidence supports they are at the least risk. They have been home with their parents who have been likely leaving the house for groceries, exposed and fine. No spikes in pediatric cases. Let them out. Keeping them in longer will cause more damage to them. Let the camps have a choice to open or not. We are capable of making smart decisions if given the chance. I predict the Georgia experiment will prove everyone wrong. Let business owners and patrons choose. We will make you proud!
Volusia	General	State needs to require mask be worn while in public until further notice. Also let businesses reopen at there discretion as long as employees and all customers are temperature checked at the door and social distancing is maintained to the best extent, then have local city PDs follow up on restaurants to make sure they are following guidelines set out if they want to remain open, any other type business would need to do temperature checks as well as social distancing and additional cleaning and disinfecting measures in order to remain open.
Charlotte	Retail	I would like to see us not open so quick. Charlotte county has had no testing sites at all and we have 199 cases as of last night that was over 40 cases in past few days. I have 3 people including myself that have at risk health issues that would be very dangerous for us to get covid-19 including my 80 year old dad that i take care of. I think at least another 30 day stay at home orders would be a very good approach go battling covid-19.. we have only been on stay at home for less then a month we got kids still out of school. For the safety of our family and kids that most since-able answer to protect our Florida families. Im not gonna lie im pretty scared to go out and Im not leaving my house to ho to a restaurant or any stores till i see huge drop in daily cases. And please test the inmates at Charlotte correction institution they are life's.. Some that don't even belong in there . TEST CHARLOTTE COUNTY please before you open. Im so concerned.. 😩😂. Please fix unemployment system. Family's are hurting .. can expect people to rush back to work with home schooling still going on the rest of May. June 1st earliest day should remove stay at home orders. Keep Florida safe..

AMERICAN OVERSIGHT

Martin	General	The state SHOULD NOT open until there are no new cases, and everybody can be tested whether they have symptoms or not, and a tracking system is in place. We now have over 30.000 positive cases. Florida was to slow to close the state, don't be in a rush to open the state. If the state is opened to soon you will see a spike in cases. If the state opens everybody out in public should be mandated to wear a mask.
Pinellas	General	I think it's time to reopen Florida's non-essential businesses, but still keep high risk populations safe. For instance, keep restrictions on assisted-living, or skilled-nursing facilities, but let's reopen restaurants, retail shops and the like. The sooner business activity can resume, businesses can (hopefully) start to hire displaced workers from the virtus. Business owners should be able to choose to enforce social distancing guidelines, or not, or unless public health officials declare otherwise. Thank you Governor, and all the policy makers for your leadership.
Brevard	General	Please do not reopen Florida until there has been two weeks without any cases. If there is an area that you are thinking of re opening then I think there should be a certain percentage at least of the people who have been tested negative. I heard that some tests are being counted twice so I don't think that a determination should be made on the number of negative cases alone. Think about maybe testing 75% of a city/county and if there are negative then I think it would be more reasonable to open. There's so many people with symptoms that have not been hospitalized or tested but are out there that can increase infections. I would not be proud of Florida if we enabled a second wave. (
Escambia	General	It's WAY to soon to open the state. Cases in escambia county (which is never addressed) is doubling. I feel like that if the state opens, people like myself (immuno compromised) can and will get the virus. If u do open the state are you going to MANDATE face masks to be worn by EVERYone?
Brevard	General	allow non-essential small business units that have very little interaction between employees / public to reopen with guidance. examples might be machine shops, sign makers, ...
Okaloosa	General	Our economy will be in ruins if you do not open our state asap. The impact on smammbusinesses and working families is tragic. It needs to reopen with precautions, asap

AMERICAN OVERSIGHT

Sarasota	General	I feel re opening of any area should be done very incrementally. Open a small sector, monitor numbers for 2 weeks then go from there. Part of the problem is some people will adhere to the guidelines of social distancing, mask wearing, coughing or sneezing so as not to spread potential germs/virus, but as we have seen, many will also not comply with these things at all and do not take the risk seriously as they selfishly don't see a risk to themselves. Not thinking about the risk they bring to others who are older or more at risk. All some folks have to do is here there is a possibility of re opening and they are already out and about and it's not even official yet. I'm also very concerned about the lack of PPE for the Home Care Industry in the state of Florida. We all know this is very difficult to come by, PPE and sanitizing supplies. I work for a Private Duty Home Health Care Agency (administrative not out in the field). We have struggled exponentially to acquire PPE and sanitizing supplies to our employees out on the front line caring for vulnerable elderly residents in their homes, some in facilities. We have spend countless hours searching online for places to by the very basic of supplies to protect our staff and keep our clients safe. I'm worried with relaxed restrictions the potential for fast virus spread amongst our clients and our Caregivers. Numbers are difficult to come by but there are likely a few thousand Home Health Care agencies in the state of Florida and potentially several hundred thousand people receiving private duty personal home health care from licensed agency home care workers. These numbers alone and the potential ripple of spread following relaxing current restrictions. Thank you for your consideration. Let's let Florida do things smartly for a change!
Osceola	Tourism	Please take the public health into consideration and not open up to soon. Just because things are looking good here in Florida doesn't mean that we should open. Once you open you will be opening the door to everyone coming from everywhere and they could bring more infection into the state thus driving numbers back up. Do not let a small group of protesters dictate policy for everyone. Our lives matter and the fact that these people are selfish and entitled was the cause of this infection spreading so fast.
Polk	Recreation	right now, State Parks for camping, should only be open to residence of Florida State. All year should be limited for out of state to only 1 week in and out for 3 weeks and how many can be at each park. plus no reservation made prior to 90 days out. this control would control out of state virus. also would open up the keys to local Florida residency, Out of state are reserving parks over a year ahead, and then cancel at last minute or sell parking spot to others. Locals can not enjoy the Keys and we are tax payers here all year.

AMERICAN OVERSIGHT

Pinellas	General	Please do not allow politics to run the decision of opening up the state. Fewer than 2% of the population have been tested!!!! How can we possibly know when or where the curve is with so little testing?! Please keep travelers coming from o of state shut down and beaches and vacation rentals closed for at least another 2 weeks while you roll out a plan to get everyone tested! Otherwise, all of our shutdown lock in efforts will have gone in vein. Show that you give values in others lives, first. Follow suit of so many other states, who are extending lock down. We are at a high risk here because everyone wants to take a vacation. Please don't open things up and create a new epicenter here in FL!
Orange	General	Reopening establishments should coincide with increased testing, including people without symptoms, having plentiful PPE for medical staff and first responders, and scientific knowledge. If we invite a second wave while we're already reeling from the first it will be worse. Reopening things should be as widespread as possible. If Orange County reopens retail and dining while surrounding counties do not, it's a guaranteed mad rush of people in orange and social distancing goes out the window. Study known cases of asymptomatic spread and understand them first. Boston homeless shelter documented nearly half their population that was asymptomatic at the time of testing. The church choir in LA that had massive spread, and a report out of China documenting a single contagious person infecting 9 people at 3 tables while dining out. Understand asymptomatic spread and put requirements in place when reopening things. Require masks for places like retail, etc where 6' distancing isn't likely to fail.
Hillsborough	General	In regards to "re-opening" Florida, I believe it should be guided by the science - and the ability of our state to adequately test and contact trace - which is abysmal at present. We should NOT re-open until the state's unemployment benefit system has been repaired and ALL of the presently unemployed have been given their rightful chance to the assistance they are owed. WE SHOULD NOT RE-OPEN until all our workers have adequate PPE, and our hospitals are guaranteed reimbursement for all of the work they are already doing. We should not re-open until there is a plan to mitigate infections in long-term care facilities and jails. Without these plans re-opening will results in additional Floridian deaths, and our Governor and his administration will be solely responsible for that human tragedy.

AMERICAN OVERSIGHT

Manatee	General	You must implement wide testing measures before considering even a soft re-open. Without testing the wide population - not just those exhibiting symptoms - especially if the age group 20-30 are the "silent carriers" of the disease - would be catastrophic. There would be multiple outbreaks and then the state would have to shut down all over again. Request tests from the WHO on behalf of the well-being of your constituents. Our country may not have enough tests produced, but we can request RELIABLE, READY-MADE tests from the WHO, or even ask for help accelerating testing methods from South Korea. Not doing so would be prideful, and pride goes before the fall. I get the push to reopen. Nearly all of my friends are in the service industry and they're all out of work doing what they can to get by. But they do not want to go back to work if it means potential for infection just because people are bored sitting at home. If you are pushing to reopen, there must ABSOLUTELY be state measures in place to mandate business like hotels, restaurants, theme parks, local attractions, theaters, etc. Provide their staff with protective equipment. While many business still open have done just that, there are many more who have not provided PPE to their workers. Assuming that corporations will do so is naive and childish. A state order assures people's safety and well-being. Until there is a reliable vaccine - and when schools reopen, there should be a mandate that all students have received this vaccine once it's available - social distancing practices are the only reliable method of minimizing infection until widespread testing is possible. Testing will show the trend of infection in the population, and where resources like PPE, food, etc. should be concentrated. Widespread testing - and also antibody testing - will show you when Florida can safely reopen will minimal consequences and in what manner.
Lee	Government	Governor DeSantis Committee Please reopen. We feel we can continue to protect ourselves.
Santa Rosa	Education	I understand opening the state and if that’s what happens that I will accept that but then open the schools back up for the children. If your opening beach’s and restaurants then why are we keeping kids from the best part of school? End of the school year is the time of year all kids have worked hard for. Seniors have waited years for this moment to graduate and have prom. Elementary kids won’t be able to say thank you to their teachers or goodbye to their new friends. I am a parent of 3 kids and I feel if we are opening the state we as parents should choose if our kids are doing distance learning or if they can go back to the classroom. If parents choose letting them go back to school have the parents do drop off only. I am also a Healthcare worker so I am doing homeschooling and trying to work full time. Just open the schools up for the last month and extend the school year into June to make up for lost time.

AMERICAN OVERSIGHT

Volusia	General	I think county by county is the best approach to the situation. While South Florida is still going through a much larger situation, Central Florida is doing a lot better. We believe we already had the virus back in mid January but testing was unavailable. We had the same symptoms as the virus for roughly a month. With no way to do antibody testing we can't know for sure so I wish we could do that. I think we would have a better idea of how many people have been previously infected that is not being figured into the whole number. With many other states it seems that the majority of people have been previously infected and that is giving us a completely false sense of what the real percentages are. Los Angeles County for example is saying 0.1 to 0.4 % which would be like flu percentages.
Palm Beach	Government	I am 64 years old and have Adult Onset Asthma. Opening up the government without requiring everyone to wear masks when out in public will spread the Coronavirus at a rate that the hospitals will not be able to handle. I understand the need to open up businesses but please be smart about how you do it. If you don't require people to wear masks than most will not if it is only a suggestion. Most people don't realize how dangerous this virus is to people who have immune problems and the elderly. PLEASE REQUIRE MASKS!!!!!!
Walton	Tourism	I implore you to extend ban on short term vacation rentals to at least May 15. This is from an owner of a second home. I will be losing money but our health is more important at the moment. Hopefully we will be back to normal by June 1. Thank you, Cathy Butler
Orange	Tourism	Theme parks should be front of mind in the opening plan for Orange County, they are the blood line of this area. They should re-open during phase 2 in a responsible manner.
Sarasota	General	Re open the state. With the flattening of the curve, and recent studios that show 10-85 times have already been exposed. It's time to reopen everything and practice social distancing too But the recent opening of the beaches here are a joke. They are open on 4-27, but parking is closed, so in reality , you can't go. Plus no beach sitting,, but it's ok to walk the narrow path people walk on the beach crammed together. The recent studies show the mortality rate is close to the flu, time to reopen everything and get back to living . Life has risks, but the government can't shut everything down and keep printing money to stay home, it's insane and now reality shows the shutdown was not really needed. So many lives ruined for this for no real gain
Collier	General	We need to open up our state and only quarantine THE PEOPLE AT RISK!!! I am going to have to file for bankrupcy. I am in serious financial hell. We need to open the beached. Quarantine the people who are at risk, to shut down our entire state is going to have more problems than the virus.

AMERICAN OVERSIGHT

Orange	Education	I would open retail, restaurants, and movie theaters first. There must be strict limits on the number of patrons allowed, i.e., one-third of movie seats and minimum of 6 feet between each restaurant sitting area). Moreover, the bar area in a restaurant should not have any seating. Patrons could have alcohol at their table. Retail must have spacing designations at checkouts. Unlike Georgia, salons, barbershops, gyms, etc. should not be opened first. Patrons and service people are just too close. Finally, I would wait a minimum of 14 days before moving to the next stage unless adequate testing and contact tracing ability have been adequately established. Otherwise, I know my wife and I will NOT be venturing out for anything more than necessities.
Polk	General	My comment is related to keeping people at a safe distance while waiting for a service (i.e., haircut, dry cleaning, cell phone repair, restaurant, etc.). Consider the method Walmart uses with grocery pickup. The app allows one to check-in and GPS alerts the Walmart employee once you've arrived. Similar virtual queues could be implemented for other industries where there is a waiting room concept. Patrons could alert the location they are on their way; alert again once they've arrived; wait in their car until the retailer contacts them via text/telephone call that they can come into the building. This way people are not exposing themselves to others, but waiting safely in their cars. This would also allow the retailer to take the necessary time to sanitize the areas before patrons arrive. It would give the retailer control over the situation. Thank you to the task force for all of the hard work they have been doing!
Pinellas	General	We appreciate the Governor's leadership during this crisis, but strongly feel that a crisis of equal proportion is looming if we do not get the state's economy back to normal, albeit safer, operations. Our state is funded primarily on sales taxes and with businesses and tourism shut down, we stand a greater chance of an economy crash in our state than in others which are funded by a state income tax. As of this morning, Florida has experienced a 3% death rate and a 16% hospitalization rate. Sad as these cases may be, they do not justify a prolonged shut down. The state needs to transition from quarantining the healthy to quarantining only the sick and vulnerable and let the rest of us get this economy back up and running. We understand there will be spikes and that cases will continue to occur, similar to other diseases like the flu, but if the healthy are not permitted to get back into society and strengthen their immunities, this thing will never become manageable. We strongly encourage you to END THE SHUTDOWN by 4/30/2020 and trust the citizens to act responsibly. We've been bombarded with the messaging, which should continue, and should be given the chance to resume our lives.
Brevard	General	Mainstream media has created unwarranted hysteria. Open the economy back up immediately. Natural herd immunity is the only immunity. The people will not accept mandated vaccines of any kind. Give us liberty or give us death. We will not accept the New World Order without a fight. Stop participating in the brainwashing!

AMERICAN OVERSIGHT

Volusia	General	FL needs to open up , I am a health care work and have small children . If we keep everything closed we are doing more damage than good . People need to get back to work , we can't shut down everytime something new shows up . People with auto immune issues and the elderly should be given the option to stay home with a doctor's order and it would be great to get them some kind of financial help in during that time , it's easier to help a small group of individuals financial that than more than half of FL . Our economy is important to everyone , if we stay closed more people will be on snap and cash assistance ,than we can handle.
Orange	Manufacturing	I am a small business owner that had been deemed Non Essential and am facing a month to month decision of staying in business or closing the business due to lack of funds for operation. However, I want to live free if Coronavirus and believe with all my heart that's keeping the state CLOSED until the virus cases are going down per the President is the right thing to do. Florida has just passed the 30 thousand mark and our increase of infections is maintained around 1,000 +/- EVERY DAY. This is not a good situation for Florida. Secondly, I know that we are a tourist related economy and to open the state and allow travelers from other state or from other countries WILL MAKE IT WORSE. I understand that the theme parks want to open the state so they can increase their income status, but are they ready to accept the fact they could become the major contributors to the infection rate in Florida? I am sacrificing my income, but not my health. PLEASE KEEP FLORIDA CLOSED UNTIL THECRATE OF DAILY INFECTION DROPS CONSISTENTLY FOR 14 DAYS.
Indian River	Construction	Reopen the entire state!!! I work in hvac and a lot of businesses and customers I have are waiting to do work to there Ac units once the state economy reopens. Reopen the state so we can go back to work.
Orange	General	At a minimum, please follow federal guidelines for reopening businesses around the state.
Orange	Food	Where is representation for small, independent businesses, like restaurants, on this task force? We are tired of getting overlooked and politicians being clueless about the impacts of their decisions. It must stop immediately. Who is respires entomb is???
Pinellas	Recreation	Hello my name is James Edward Smith I'm 60 I live in downtown Clearwater have a girlfriend that lives with me it's 51 between me and the senses that our apartment complex which the age range is anywhere from average of 32 to 60 I feel my girlfriend feels you're moving too soon and so does the 15 other tenants here at a Jefferson Apartments however that being said and I realize myself that you can't stay stagnant the whole time so if it must be open May 1st or May 15th or May 30th whenever then I would say just let the people go back to work and do a very very strict social Recreation opening the beaches for exercise and some parks that's my suggestion anyways we'll see what happens I just think they're so it's still too rampant this very transient State and opening it up too soon we all know the results of that

AMERICAN OVERSIGHT

Orange	General	You should not " open Florida " while we are in a pandemic. You should not open until there is a good plan in place, until our hospitals won't be overwhelmed, until all health workers and people would have personal protective equipment to wear. Don't open too soon or we will have our numbers rise.
Charlotte	General	Yes to reopening when the stay at home order expires 4-30-20
Pinellas	Recreation	You tell us is it safe? Carry out. Deliver? Beaches? Hair cuts?
Brevard	Technology	Please do this the CORRECT way and not just the way a minority of vocal business people want it done. I'm also a business owner and this has affected me greatly, however, I see the need to proceed slowly and carefully. We are not yet out of the woods. We have no idea how to prevent, treat, or manage this virus. Do not send foolish and/or misinformed people back to places where rapid spread of infection is likely to occur. I want things to return to"normal", but not at the expense of a second wave of sickness. Go slow. Listen to the science and medical professionals. Proceed with caution.
Hillsborough	Healthcare	In regards to elective surgeries. Similar to examples such as Whole Foods. Schedule outpatient procedures based on the elderly and Pre-existing conditions. One of the issues hospitals will face is patients being fearful to have their procedure done. Hospitals should schedule cases based on age and preexisting condition. Ex: From 7:00am-2:00pm they will conduct cases only for elederly and pre-existing. Rest of population after 2pm.
Hillsborough	Healthcare	Florida is unfortunately still experiencing spikes in cases daily, especially in largely populated counties like Hillsborough. There are literally millions living and traveling through the I4 corridor daily from Pinellas all the way through Osceola. If allowed to open, there will be substantial increases in cases. The second wave of infectious diseases has been historically worse than the first. It is too soon to open fully yet. Please wait until new cases numbers have plateaued and antibody and diagnostic tests become more widely available. Thank you for considering my opinion.
Broward	Government	Re-Open immediately. It looks like the fatality rate in Florida is 0.114%. Therefore a recovery rate of 99%+ What are you waiting for? If someone gets the Wuhan bug they see their Dr. who'll probably cure them. If not the hospital will probably take care of them and if not then they are part of the .114% and that's too bad. Let's make it happen. The sooner the better for self reliant freedom loving American citizens.
Franklin	General	Please open up businesses & tourism (vacation rentals). Only recommend the elderly and people with compromised immune health to stay-at home to safe guard themselves.

AMERICAN OVERSIGHT

Okaloosa	General	I am tired of seeing people who are still receiving a paycheck making decisions for people who are not! My heart goes out to those who are struggling right now. Stop restricting healthy people and let those who want to go back to work go. People who are sick should be the ones in quarantine...not healthy people. Those who are more at risk should be self isolating. This is out of control!
Volusia	Professional Services	Should open up businesses on May 1.
Hillsborough	Recreation	Outdoor recreation areas should be reopened immediately. This should include all beaches and especially state parks. There is no better opportunity for distancing than those in these wide open areas. Closing campgrounds was an especially bad decision. Campers in self-contained units do not require any services beyond perhaps power and water. The campgrounds should be reopened to these types of self-contained units immediately.
Marion	Agriculture	May 1st is too early to open up restaurants and non essential businesses. Need more testing and time for positive cases to decline further.
Okaloosa	Healthcare	Why aren't mask & gloves available to buy in stores? Additionally with corona virus numbers going up daily why are beaches being reopened... for the love of tourist $$$????
Duval	General	I think Governor Ron DeSantis is doing a great job of handling the Coronavirus crisis in the state of Florida. Regarding the process of reopening Florida, our state needs to allow businesses to reopen immediately. Gyms, hair salons, retail stores, and restaurants can all open safely now and should for the purpose of revitalizing our economy. It is not healthy for residents to remain in their homes for an extended period of time without any hope of a return to our former livelihoods. The physical and mental health of Florida's citizens depends on the quick response of the reopening Florida task force. The shutdown has continued for too long already.
Citrus	Tourism	This virus is impossible to contain unless we all stay inside forever, therefore, the majority of the people will contract the virus, it's just a matter of when. With the increase in antibody testing (which is still limited), it also seems that many people already had it, they were just asymptomatic. This brings that dreaded death rate down immensely. Yes, the symptoms of Covid19 are worse than the flu, and it takes longer to recover, and some unfortunately do not recover, but we can't stay inside forever, so we might as well embrace it and deal with it the best we can. Sure, be smart about opening up, and doing it in phases sound good, but open up rather sooner than later.

AMERICAN OVERSIGHT

Duval	General	I feel that Governor DeSantis has been doing an excellent job throughout this Pandemic. I have tracked the infection/death rates on the Johns Hopkins Coronavirus site for Florida since it was made available. I believe it indicates that the curve was successfully flattened, and we are well past peak. I have several family members associated with Mayo Clinic, and they agree that their experiences support the statistics. I believe a carefully phased opening of society would be prudent in most of Florida, while concentrating efforts in south Florida and with at risk individuals. I live at the beach here in Jax Beach, and believe the majority of people can properly social distance and take proper precautions, as witnessed by the beach re-opening that recently occurred. Thank you for your Task Force efforts, and thank you Governor DeSantis for your great work.
Orange	General	There's an article in the New York Times about going on the offensive to defeat the virus and I think that's what we need to do prior to reopening. We need to do large scale testing and containment of the virus to ensure it does not spread after infection. We need to get our unemployment site up and working. We need full scale testing for antibodies. It doesn't do our economy, our state, or our residents any benefit if we open early and continue to combat this virus defensively for over a year.
Brevard	General	If we slowly allow businesses to reopen. That is using common sense and some type of social distancing, it will either prove or disprove that it works. Give all business the option and hopefully we will be able to do it successfully. Perhaps we need some form of check system to monitor this. Unidentifiable checkers doing spot checks on businesses? I just know we need to get back to work and some type of normalcy.
Pinellas	General	I do not think the state is ready to re open. I feel people have not been taking the stay at home order seriously. We need to see much more of a decline before we re open! Better to stay at home longer than to re open & have to close again later.
Hillsborough	General	Please let's not open up. We are a high risk state. People are not add heading to the laws.
Leon	Transportation	Many people cannot go back to work until it is safe to fully operate public transportation. I was spending $100 a week on rideshares until my job went remote on April 3. I am still trying to make up for that lost income. This is especially true for those who work on university campuses or otherwise have to take free university routes to get around. If businesses and schools open before transportation is widely available as it was before the virus, there needs to be an accommodation made for those who do not have cars to either be reimbursed for rideshares and taxis or be protected from being fired/laid off. Similar accommodations would need to be made for children who rely on school buses to either allow them to continue learning from home or staggering start times to allow the buses to run.
Escambia	General	Open up our state immediately! The suffering caused and lives torn apart by this has gone on long enough. We should never have closed for this. We want to work and go on with our lives!!! Enough is enough!!!!!

AMERICAN OVERSIGHT

Volusia	General	I wholeheartedly feel that all decisions should be data and science fact driven. What do the Florida numbers show? What is the best advice from experts in the field of dealing with this virus. While I understand many are struggling financially, it seems logical that if FL opens too soon, that the backlash from increase in sickness and death would be doubly devastating. No one is enjoying this situation, but with literally lives on the line, we must continue our current course until the data and models dictate that it is safe to relax some of the directives currently in place. Thank you for asking.
Volusia	Retail	Please open Florida we cannot go any longer like this. this is ridiculous w need to get back to our jobs
Okaloosa	General	First I want to thank everyone working so hard. My family owns a small business(Roller Skating Rink) in NWFL for over 44 years. We have been closed 6 weeks now and it is devastating us. We were completely shut down, we have no income coming in to pay our bills, which in turn means our family can't pay our personal bills. Bills are piling up. We've paid into our economy for over 40 years. We've spent over 40 years pouring into our community, sponsoring little league teams, sponsoring schools, helping keep kids off of the streets and out of trouble. We've been left up here, forgotten, while our family and business drowns. Our cases aren't bad here. We take precautions daily, virus or not to protect our customers. We need to open Florida back up and get our economy going. More people are going to die from suicide or starvation from the economic downfall then from the virus. We need to get our businesses open and families back to work! It's is our constitutional right to assemble and provide for our families. It's a dangerous slope we're on right now with our rights being taken. We need to get back to work. My nephew is special needs and can't get his NEEDED therapies right now because it's been deemed nonessential. Every single business is essential. Our business is essential to our family and to many many children in our community who come from bad homes and the time they spend every Friday, Saturday and Sunday with us is their safe place on the weekends. It is our right work and provide for our families.
Osceola	General	Opening up our state too soon would lead to disaster. Covid cases would most likely spike, which would also mean a higher death rate. It would also open the door to tourists, which will also raise the number of cases. I believe we should wait, for the sake of our health. We don't want a repeat from the year 1918 when Bird Flu took over. We should at least wait for another month or two or until the number of cases in our state starts to decline. People should still continue to practice safe social distancing. I believe it is way too soon to reopen our state and open the door to even more cases.
Palm Beach	Healthcare	Please do not open gyms or workout studios. They are disgusting to begin with and I don't think they can realistically disinfect equipment and areas in any way shape or form - from weights to group exercise classes. People touch, sweat, cough/sneeze -- and this is one of my greatest fears. Thank you.

AMERICAN OVERSIGHT

Franklin	Tourism	Please re-open our commerce. Restaurants, stores, boat ramps, dental offices, & especially private vacation rentals. The over-kill is ridiculous. I retired from the state of Florida & manage a single condo in my home town of Carrabelle that I rely on for income. The cleanliness of "privately" owned & operated rentals offered on platforms such as Airbnb & VRBO typically surpasses most hotels, motels, resorts & inns. This Virus is not going away if we hide, nor will the next one. It is going to run its course. If you are elderly, have a compromised immune system etc. STAY AT HOME! Damage being done to our country's & world's economy etc. is far worse than Covid-19 will ever tally. Wake up & smell the bleach!
Broward	Recreation	Thanks for letting us give input. Please allow tennis facilities to allow doubles to be played rather than only singles. The greater majority of our players play only doubles . The dimensions of a tennis court area is 60'X120', 7200 square feet. We can easily manage the social distancing requirements. Thanks
St. Johns	Healthcare	I am Senior Accountant at a local hospital. I have been working from home since mid March however my hospital wants to bring my department back ASAP. As I know the need to get back to "normal" as soon as possible however I feel that going back increases my risk of getting Covid 19. If I have the capability to work from home why force me to go back to the hospital to work.
St. Johns	Retail	My only request is to get the information as soon as possible around Reopening the state. I just need to plan. I work in a well known Retail company, and would like to be able to tell my team when they are working, if at all. Thank you, Amy Moeller
Palm Beach	General	I do not think smart to open up because people aren't taking precautions now during the shutdown. Once it opens I feel this virus could spread more and cause another shut down in a few months. Smarter to play it safe and keep things closed while numbers are still increasing. Even if the state opens now I do not plan on exposing myself to the masses in public for a while to protect myself and my children.

AMERICAN OVERSIGHT

Duval	General	Please, please don't open everything up too soon. I would love to be eating out again, but we can do take-out for a good long while yet. I would love to be going to the gym again, but I can still do video exercise and workout at home. I would love to be going to the library again, but it make sense that it should be only for book pickup (requested in advance via library hold system) and return, NOT using computers , NO kids activities, NO sitting around. Yes to opening pools for laps only, NOT for playing around. How to make social distancing real for people...Require masks for everyone all of the time for the forseeable future.. Go to the store, but keep away from other people. Start the general message that, DESPITE what everyone wants, this is not going to be over for a good long while. MONTHS of this lie ahead and we are going to have to ADAPT and CHANGE our lifestyle. Our day-to-day-life is just NOT going to be what is was before. WE have to change OURSELVES and THE WAY WE LIVE.
Pasco	Recreation	Open Tampa Hard Rock Casino!!!!! We are so bored! We can practice social distancing there!
Pinellas	Tourism	We have 3 rental condos in Indian Shores, and we have lost numerous reservations because the beaches and pools were shut down, and tourism was discouraged. We understand there was a need for a shutdown, especially during the outbreak. While no deaths are good, the fact is that most of the deaths are from nursing homes, very elderly, overweight, and people with underlying conditions. Recent revelations that the virus dies in sunlight and heat and spreads in close quarters should indicate to everyone that it only makes sense to let people go outside.The beach in front of our condo never has many people and the whole 35 mile stretch up and down Gulf Blvd in Pinellas County is never crowded except at the North and South ends, Clearwater Beach and St. Pete Beach. We were penalized because of the reaction to the Clearwater Beach spring break crowd. Also, the closing down of the condo's chlorinated pool, which is private, is a hardship to the residents who are living there. People are not stupid. We know how to protect ourselves and social distance. By now, people who are vulnerable should know what to do to be safe. Let's get our beaches and pools open so we can exercise and get some heat and sunlight!
Clay	Food	Everything that is left at the store is always the most expensive brands and I'm high risk. Please us shut down so I can live for my family.
Pasco	General	I am hoping to see at least curb-side pickup being opened to all retailers. There seems no difference between being able to pick up or even shop in Walmart and having limited curb-side pickup for retailers like Bells, Kohls and JC Penney. Clothing is essential too! Thanks Be blessed
Walton	Recreation	I suggest opening up our State and private campgrounds. I see no reason for them to be closed. The same social distancing guidelines could be used but campers are not going to spread the virus because everyone has their own RV and the few large gatherings that happen in a park could be controlled by the Park Rangers/owners. We need a place to get away and unwind during all this and a weekend outing is perfect for that.

AMERICAN OVERSIGHT

Osceola	General	I am concerned that we will open earlier than we should. I work in the tourism industry, and I am currently furloughed, so I would love to reopen the economy and go back to work. However, I am more concerned about the health and safety of my community.
Manatee	General	Please open everything as we are responsible people who can make wise decisions concerning the health and well being of our families. This shut down of our total economy is devastating for all of our residents. Keep watching out for our elderly population and make testing easier for those of us who think we may have contracted this virus already and recovered with no problem. Thank you!
Okaloosa	General	Re-Open Florida NOW! American citizens are not stupid. We know the risks. We know that there are risks everyday. We know the ways to better protect ourselves. Dying from the virus is no longer as scary as becoming homeless and starving. End this insanity.
Putnam	General	I believe that the Safe-At-Home order was an overstep of power. I believe that shutting down restaurants and small businesses was a colossal mistake for Florida's economy and has thrown countless thousands into poverty and hunger. Bankruptcies are already starting and many business will be unable to open up again. Each day of delay adds to that number. The projections and models for the impact of Covid-19 have proven unreliable and detrimental to the physical, spiritual and mental welfare of Florida citizens. A quarantine is for those who are ill and a lock up is for those who are healthy. I do not believe that the Florida governor or anyone has the right to deny a means of support to its citizens. End the lock down NOW, do not wait another day. The curve, if there ever was one, is well and truly flattened and hospitals, clinics and other medical facilities are furloughing their staff for LACK of patients. Stop the insanity immediately.
Lee	General	I encourage and support seeking a broad variety of input from both medical and business communities and balancing the interests and concerns, however, I caution that the medical and public health concerns should be paramount. If the medical advice is to maintain non-essential business closures for at least several weeks, I would support that. At a minimum, the reopening should be staggered and not as abrupt as other states (not like the way Georgia is handing it). There also should be some degree of state wide coordination, otherwise, people will simply travel from one part of the state to another to obtain the services or products that they cannot obtain in their own county. I support more available testing and antibody testing, as there a presumably a large number of people who may have been undiagnosed or asymptomatic and their status changes their workforce availability. Thank you.
Duval	General	I think we should see what happens in the states that are trying to open to early. It is too soon to open up. Although, I would like to see dental services opened on a limited basis.

AMERICAN OVERSIGHT

Polk	General	Wait ti later in summer!I think that for larger retail to do curbside would be a small way to start, but the biggest concern is for employers in jobs where we work with mostly high risk mental health clients, many of whom are out in not so safe areas. Our employee likely to try and open too early just to make more money when we have been working hard at home and all have family who are high risk but aren't seen as reason to not have us go to the building. Please keep things where people working with clients closely out in phase 3... More time to see how things go when slowly open.
Orange	Tourism	There have been many studies that have been published that indicate that COVID-19 has infected far more people than originally expected by as much as 85 times. This goes to indicate that COVID-19 has a much lower mortality rate than the 3% originally indicated. Furthermore, there are studies that show that the mortality rate may be less than that of influenza. Closing things down was the right thing to do when we had relatively no information about the true impacts of COVID, but now that there are real wide spread studies published showing that it wasn't as bad as we expected, it's time to re-open. We do not need to continue the social distancing or have a slow gradual opening, as suggested. Let the American people back to work. Let the American people travel. Let us make our livings again. We need to look at Sweden and their results. Respectful, Benjamin Lembree
Duval	Recreation	Reopen gyms but with safety restrictions, it is getting too hot to exercise outside. Also reopen hair salons.
Palm Beach	General	Governor DeSantis is doing a great job. Please do not reopen prematurely. There are too many people who don't think they are vulnerable and that only older or at risk people are and those people should self quarantine. Those selfish people will endanger everyone unless there are mechanisms to prevent them from acting stupidly. You can read it in their comments to the Governor's briefings. To our governor - keep doing what you have been. Great job for Florida.
Broward	Healthcare	In my humble opinion as a resident of Broward county, I think that to reopen the country before a fully tested and confirmed medicine to treat COVID-19 infected people, will be a big mistake, since the Vaccine is many months away, a confirmed medicine by the WHO, is crucial for reopening. One of the reasons England is going through the highest deaths of the COVID-19 is that they did not close the schools. I hope that our beloved Governor will be super cautious.
Santa Rosa	General	General comment about reopening: I am in support of opening county by county based upon cases vs population vs hospital capacity. Things should be smart and well planned out. Social distancing should still be taken into consideration, however with some concessions made for hairdressers, nail techs, tattoo artists, as it will be impossible for them to do their jobs within the social distancing guidelines. Maybe require those fields to where a nose/mouth face mask. Restaurants would be the second step after a two week opening for jobs listed above. That gives two weeks to see if there is a spike of active cases, but more importantly a spike in hospitalization cases.

AMERICAN OVERSIGHT

Orange	General	No, I do not believe we should be opening the state. Please do not fall under the pressure to do just because people are protesting! The long time recovery goal needs to be what we remain focused on!
Sarasota	Recreation	Please reopen the state parks and campgrounds so we may enjoy the outdoors. Camping is the ultimate form of social distancing.
Osceola	Healthcare	The public health needs to be taken into consideration and not open up to soon. Just because things are looking good here in Florida doesn't mean that we should open. Once you open you will be opening the door to everyone coming from everywhere and they could bring more infection into the state thus driving numbers back up. Do not let a small group of protesters dictate policy for everyone. Our lives matter and the fact that these people are selfish and entitled was the cause of this infection spreading so fast. The biggest problem is that we need help from our state with Rent, Mortgages, Unemployment. The state has failed us and they want to open up to soon so that they can fail us again.
Pinellas	General	Please open the state up!! Do not allow our older population to control it!! They do not work therefore they don't have to worry about losing jobs, they do not have small children who NEED to go back to daycare. The younger people of this state are dying. It is not healthy and we are in pain..mentally, physically, and financially. Please we are begging you!! If people feel they are at risk, then they have the CHOICE to stay home, self quarentine . But it is our right to WORK and leave our homes and let our children play at parks and at the beach and pools. Think of others besides the at risk. They are not the only people who are going to suffer
Duval	General	I think the types of establishments that are opening in Georgia are the worst as all require close contact. Open larger department stores as they are not usually crowded and you can stay separated by 6 feet. Stores like Steinmart, Belks, Nordstrom and Bealls. Restaurants are the worst because the mask has to come off to eat. People often cough while eating. After the larger stores are open for 2 weeks then the small retail stores like jewelry, sports boutique. If all goes well then restaurants and bars. You need 2 weeks between each stage to study the growth of infections. Also people need to understand that if they don't have when tested they can still get it the next day, week or month.
Orange	Technology	Reopen everything, and make it mandatory for everyone to wear mask or some sort of face covering, or else impose a $300 fine and or 30 days in jail if violate mandatory mask/face covering rule. Continue with social distancing. Everyone should wear gloves or sanitize hands. If you are sick, have a cough, sneeze or temperature stay home or face $300 fine, or 30 days in jail. Restaurants can remain open for take out only, employees must wear mask and gloves. Companies should reopen to stimulate the economy. Employees of those companies should wear mask/face covering, gloves or sanitize/wash hands often.

AMERICAN OVERSIGHT

Pinellas	General	We need to open up now. The psychological, economic toll this is taking on us Floridians is surpassing the physical toll this virus has taken. Please have the courage Gov. Kemp of Georgia has shown. Respectfully, Frank Krogh
Volusia	Recreation	Beach should open for sunbathing. Restaurants should open with distancing masks etc a hair salons and nail salons should open. Will keep us from driving to Ga and spend our money.
Hernando	General	There are 22 MILLION Florida residents and only 1046 deaths to Covid 19. While any loss of life due to a virus is regrettable, it is an injustice to take away the lives of the MAJORITY of people that live in Florida. We've sacrificed enough to protect the most vulnerable. STOP pussyfooting around and open Florida for business as usual. Let's get back on track Governor DeSantis. The ball is in your court. JUST DO IT.
Broward	General	Let's stay the course, what stay at home is working. We can protect our citizens when testing counts the private labs in the overall numbers of those infected. We need total transparency to feel safe. I would not go to a restaurant, movie, gym, hair salon, or even shoping for clothing, cars, furniture, and non essential stores until the curve has made a significant drop. Health providers should be calling the time frame to reopen non essentials.
Broward	Recreation	Second try at submitting my comments. OPEN UP! It is ridiculous that tax-paying citizens are denied access to EMPTY beaches and parks to take a walk for some sunshine and fresh air. Equally ridiculous is closing the parking lots - So, the end result is that unless you live on the beach or in the park you can't park so you can't go to a beach or a park? From the beginning of the pandemic it was known that the virus does not do well in sunshine, warm weather & humidity. So why cut off citizens access to it??? In the community where I live you cannot even walk on a closed golf course paved pathway. Equally disconcerting is a local 12-6 AM curfew. For adults! What exactly is the rationale for that - if there even is one? The closing of our society is CASTRATING our economy. Those career legislators living in mega-mansions don't have a clue about how the restrictions are killing the average citizen or destroying their business and jobs. Is all of this a political ruse to destroy the economy? More and more of our citizens are beginning to feel that way. YES! We do need to keep citizens safe - but give us the unadulterated facts and let us make our decisions about the safe way to handle both our lives and businesses.

AMERICAN OVERSIGHT

Escambia	Recreation	I'm not entirely sure where Hair Salons fall into but I feel like they should not open up yet. I work in the hair industry and I feel like if we are still social distancing, doing hair contradicts that practice completely. It's not imperative for people to do their hair right now. It's more important to be safe.
Lee	General	people need to get back to work. but we need 7 million plus test. test every person in Florida.the have and the have not. if you are not a full time Florida resident go back to the state that you reside in.then you know who has it and who dose not. quarantine the sick people and in a few weeks every one should be in good shape.hurricane season is coming.we have armed guards in the stores now what is going to happen if we get a storm.there is no toilet paper,no bleach,no rubbing alcohol, plenty of the drinking alcohol.no meat at times.milk,eggs.paper towels use a rag.what will happen when there is no gas no electricity. with all the grocery stores we have here in Florida one store only has about three day worth of food.and if a storm even show it face the stores will be empty in a matter of hours.we need to do something very soon and very fast.stop all people from coming to Florida.only trucks carrying goods.we should not be letting people from any other state come here go back to where you came from.you live in new York or new Orleans or any other state why do we have take care of them. let the state they came from take care of them.THIS IS NOT VACATION TIME.go back go back.how meany of these people from where ever have infected someone in the state.they are checking them at the border but if they have no symptoms they are suppose quarantine 14 days. a new yorker left new York because they did not want to quarantine for 14 days in new York like the official told them.n.y. person response i will just leave and go to Florida. stop the madness close the border and kick out everyone not full time resident.seams mean but a Floridan is dying just terrible.everything should have been shut down.people coming by car,truck bus, plane boat, that' s the only way this is going to stop till a vaccine is available 300 plus million for the hole country.
Nassau	General	I'm concerned about opening things too soon. This morning I went to Publix and Walmart. People are still not wearing masks and coughing without covering their mouth, or using their hand to cough into then touching products on a shelf. It doesn't make me feel safe. I would encourage the stay at home order longer to help eliminate the virus. I'm not ready to rush out anywhere once things open back up.
Duval	General	The state should continue to funnel money to small businesses and ensure that individuals that lost their jobs due to COVID 19 receive their unemployment more timely. Other than that, the state / counties should remained closed for another 30 days. I do fully understand the economic impact however we as Floridians and Americans will prevail as we always do. While there is no cure for the coronavirus, we should allow more time to avoid infecting more people. We should wait for the daily confirmed cases to drop below at least 75 before making further decisions. I am sure that my one opinion is not going to matter however I will not take part in boosting Florida's economy unless I feel safe.

AMERICAN OVERSIGHT

Osceola	General	Thank you for all of the work that you and your team have done so far to keep the public safe from the spread of Coronavirus. I think the earliest to re-open Florida should be June 1, 2020. Opening up sooner than that could cause more harm than good to businesses. If a business is found to have people that contracted the coronavirus in that facility, people will stay away and the facility will lose a lot of business.
Bay	General	I own a condo in PCB that we are not able to rent during the Covid but hotels & motels are able to rent. What is the difference?
Clay	General	I believe that the Safe-At-Home order was an overstep of power. I believe that shutting down restaurants and small businesses was a colossal mistake for Florida's economy and has thrown countless thousands into poverty and hunger. Bankruptcies are already starting and many business will be unable to open up again. Each day of delay adds to that number. The projections and models for the impact of Covid-19 have proven unreliable and detrimental to the physical, spiritual and mental welfare of Florida citizens. A quarantine is for those who are ill and a lock up is for those who are healthy. I do not believe that the Florida governor or anyone has the right to deny a means of support to its citizens. End the lock down NOW, do not wait another day. The curve, if there ever was one, is well and truly flattened and hospitals, clinics and other medical facilities are furloughing their staff for LACK of patients. Stop the insanity immediately.
Sarasota	General	I think it is too soon to open Everything up. We are still seeing new cases every day with no vaccine. Few more weeks to a month....at the least. I don't feel safe unless we are home

AMERICAN OVERSIGHT

Pinellas	General	As someone who is susceptible to complications from the COVID-19 outbreak due to underlying health conditions, I find the response to such an outbreak abhorrent and I don't expect the re-opening to be any better. 1. Closure - When it became trendy to lockdown certain citizens due to "essential" status, the government chose winners and losers. Taking a look at the local emergency order in Miami-Dade, which is referenced in the Governor's Executive Order, they amended it 5 times to further carve out "winners" who were allowed to stay open for business. The state furthered the changing of rules by adding others deemed "essential." 2. Aid - Despite the slow roll-out of federal stimulus funding and other aid compared to the swiftness of stopping the household revenues by the state, the state has been terrible in response to the need of the "losers" the government chose. The unemployment rolls grew exponentially in response to the massive closures, yet the state made excuses about the system in place. They knew that closing and curtailing the businesses deemed "non-essential" in their mind would lead to MASSIVE unemployment, yet they stood still. It took WEEKS for them to roll out a PDF of a paper application for people to mail in. It took WEEKS to replace the inept director of the DEO to respond to this emergency. Despite addressing only a small percentage of applications and a massive stockpile of emergency funds that state leaders are quick to brag about, denying many for unemployment aid and dragging on a humiliating process for the rest. Being completely unable to speak with anyone in person due to closure, on the phone due to an overwhelmed system, or via email due to a complete lack of response to submitted queries. There are people who've applied and qualify for unemployment aid, yet have not received even an inkling of communication about their status in the month since applying. With an estimated 3/4 of Americans living paycheck to paycheck and an even higher level at lower socioeconomic levels, you have failed the poorest among us. The lack of opportunity, robbing Peter to pay Paul, and the poverty instituted in your leadership failings will drive many out of homes, return to their jobs, and down the socioeconomic ladder with little hope of climbing back to where they
Lake	Professional Services	More free places for getting screened for the Coronavirus. Out of the millions of people that live in Florida hardly any has been screened. Restaurants should be opened only for take-out by walkin or ordering on-line so long as a mask is worn by everyone and distance is kept between patrons and workers.
Escambia	General	I lost my income due to covid-19 I'm a daycare teacher but due to a immune disease a had to stay home and even though I miss being outside my health is more important to me than my economic hardship and the government should not open until is totally safe for everyone I wish you would go to the business that are open and see how they are packed with people shopping like nothing is happening out there I go out to take my daughter to work she works at a fast food restaurant and I worried about that every day please think about others not just business and economy would the governor please think before you make a mistake by opening Florida back please
Broward	Healthcare	OPEN UP ELECTIVE SURGERIES AND THE DENTIST! i just got my wisdom teeth removed and I need to check up please!!

AMERICAN OVERSIGHT

Orange	Recreation	Please open the gyms, in phase one of Donald trumps recommendations they said that opening gyms with strict sanitation protocols was okay. As a health advocate and currently studying exercise science the gym is crucial for not only physical but mental health as well. Death rates are way lower than what everyone thought they were going to be and young healthy people are Not typically dying. Have the vulnerable stay home but allow us to continue with our lives and at least allow us to have some outlet to look forward to. I am confident that all gyms would adhere to protocols and everyone would be considerate of others. The gym is more necessary now than ever considering the mental toll this pandemic has taken on us all. Please that is all I ask, the gym is so important to me and other residents of Florida. Thanks for your time! -Hans Jeziorski
Collier	Education	Please get the schools opened up for Fall. We cannot continue distant learning due to the virus whose death rate is minimal relative to the population. We have to get back to work, and get back to living.
Lee	Food	Hello, thank you for opening this portal, I am a business owner in Fort Myers Beach. This was out of our control to close, we were unable to get the SBA loan due to the funds that ran out, our employees were unable to log on to get unemployment. We told by Wells Fargo a new funding is in the works, but seriously, how much longer until we open back up, we don't want to lose our business, we worked so hard to get it up and running. I am also a RN too and know the virus exists, We will have a virus every year, we have to go on with life, numbers of people dying is sad, but do you know we have a greater chance of getting struck by lightening or winning the lottery,than dying of the Covid 1?? I mean yes we have to be smart about it, just like if you had the flu, highly contagious. wash your hands and be smart when in contactwith others. this shuldnt be this difficult.Bottom line we need back to work, the ones that don't agree has a right to stay home, pretty simple if your still worried or concerned. But again Hard working Americans need to work before they lose everything they eared!! I think the ones that don't agree to open right now, well work from home, received unemployment, or a businesses received their SBA loan, or lives off the state and it doesn't matter to these folks, because they are getting income. my business is losing about $8000.00 a day and I still have bills that come in and have to be paid with no income coming in to save our business. LETS OPEN UP!! Please our business will have to close up for good if we don't open soon without any income coming in. I also how when we open we are ready and know that people are going to have concerns, We are ready, and put actions into place for a more clean and safe environment due to the covid 19. The people that don't want to come out they have a choice to stay home, again pretty simple, stay home if your not ready. please help with this matter.
Orange	General	Hand sanitizing/hand-washing after handling of cash. Because of the microorganisms that live on money, transmission very easy and leading to cross contamination of others' goods

AMERICAN OVERSIGHT

Orange	General	Please take into consideration that without proper testing or without having a vaccine, we're all at risk of being exposed to this deadly disease. What they're doing in the state of Georgia is reckless and terrifying. Opening up businesses like salons and massage studios where it's impossible to practice social distancing is inviting an increase in the spread of the virus. Please keep in mind that when businesses open up, even if you tell people to practice social distancing and take precautions, not everyone will follow this guidance, thus putting us all at risk. Personally, I have a compromised immune system, so I haven't left my house (except for yard work) for 5 weeks. I don't feel it's safe to leave my house. I read stories from my neighbors on Nextdoor where they've gone to grocery stores and patrons are not following the arrows guiding them on the direction they should be walking down the aisle - and not everyone is wearing masks and the store isn't enforcing limited amounts of people in at one time. Also, for every person who posts a concern about this lack of consideration, there is another person saying they should just "suck it up." One person literally said, "I went down the wrong aisle, so shoot me." This is not the type of attitude that will keep us safe if we reopen. Reopening too soon will negate all the sacrifices we've made over these past several weeks to get us to where we are today. I fear that if we open too soon, we will see a new spike in cases (similar to what occurred during the Spanish flu) and we'll have to shut everything down again and stay closed even longer. We have only tested 1% of the population. It is irresponsible to open without extensive testing or a vaccine. Thank you for taking my thoughts and fears into consideration when making such a monumental decision.
Orange	Government	We are not ready. Please fix unemoloyment
Escambia	General	U.S. population: 332,000,000 U.S. C-19 cases: 906,551 U.S. C-19 deaths: 51,956 Flu 2018-2019: 35.5 million Hospitalizations: 490,600 Deaths: 34,200 Source: CDC Comment: There is no logic in ruining the economy over this! Quarantine the ill, let everyone else work!!
Brevard	General	My situation: Retired Swimming Pool Retail Store owner. 67 y/o, Stage 4 Metastatic Renal Cancer patient for 8 years now who is on immunotherapy treatment and diabetic (from my cancer drugs). I see no problem with opening up the Brevard County market entirely. People like myself that are high risk can assume the responsibility of protecting themselves. Our economy is dependent upon business and people working. You can not take away income from younger working people while at the same time the government can not afford to continuously support these people. I am willing to take the risk and responsibility so that this country can thrive again.

AMERICAN OVERSIGHT

Palm Beach	Government	Please start opening us back up again! May 1 would be a day to start by opening parks and nature preserves. 7 days later open beaches and golf courses. 7 days later start opening restaurants and bars with limited hours and less capacity for more distancing. Once that takes place and numbers do not rise, I feel like everything should be opened up by the end of May.
Volusia	Professional Services	Open our state now. Everything. Not just state parks and beaches. Thousands of people a day are going bankrupt. Stop this insanity. We will remember this on election day
Sarasota	General	Please do not reopen Florida. The coronavirus has not yet dissipated. I am also in favor of health certification for travelers coming into Florida to continue after the passage of the coronavirus. The United States needs to reinstate Ellis Island policies of immigration and traveling for safety and health of our United States citizens. Thank you
St. Johns	Food	Thanks to the DBPR's food safety programs restaurants are uniquely prepared to take all necessary precautions, albeit most of our practices are to prevent food born illness and cross contamination we do work hard to maintain safety from human transmission of hepatitis, influenza, etc. Also please warn that gloves can pose more threat of cross contamination than just using good hand washing practices.
Volusia	General	Dramatically increased testing (both for disease and for antibodies) and significant increased contact tracking capability should be demonstrated and results analyzed before reopening anything. Health care experts repeatedly list these as criteria for lifting restrictions, but I see no evidence that this is happening.
Lake	General	We need to follow the advise of public health experts and scientists. Also more testing. Please be cautious.
Baker	Recreation	Can you please reopen gyms!! People use them for therapy, like myself! I have PTSD, and several other physical injuries I use the gym for physical and mental therapy!! It's been over a month and everyone is talking about how "the curve is flattening"! Well start showing the citizens appreciation and allowing the some kind of freedom back!
Hillsborough	General	We need to reopen Florida and we believe we can do so with precautions or there will be nothing to open up to. There is no reason I can go and hang out in Walmart, Lowe's and Home Depot but small businesses that sell similar goods can't open. Seems to me the businesses with the most reveue are the only ones allowed to remain open. Open Florida now!!
Volusia	General	Do not open the state. Close the border with Georga I do not trust DeSantis because he does nothing to refute the lies of his president like inject lysol. I am afraid of DeSantis's judgement and perhaps a cover up. I willl not listen to politicians ONLY the medical people The leadership is dangerous Stay in place it is working and unless there is a way to guarantee that the people that are out and about are free of the virus and not a carrier we should stay in place and away from each other
Okaloosa	General	Please open business in Florida , we need our jobs. This is getting ridiculous enough is enough. I need a job to pay my bills, and to put food on the table. Please let me know what it is going to take to open all businesses

AMERICAN OVERSIGHT

Walton	Tourism	Please keep your short term rental ban in effect for at least another month. This is set to expire on April 30th and I believe we will see an enormous influx of people to the state. I know tourism is our biggest industry but we don't need to see the virus spread from out of state vacationers. Schools are closed all over the United States and people are working from home so many people will be looking for a place to escape from the virus. Please keep Florida safe.
Nassau	General	I believe we should open up a few things at a time and see how that goes and then on and then on . Just take it slow but get everyone back to work and start building America back up .
Brevard	General	The Government Reopening is a good idea it needs to happen so people can work and opportunities can come open.. We Trust In GOD and don't near to fear anything, he leads us and guides us. GOD Bless These United States Of America
Duval	Retail	please open the bookstores (secondhand or new) but allow for social distancing and also disinfecting the items. This will allow the people to tolerate staying at home more.
Collier	Recreation	I think people need to get out on beaches, parks, trails etc.as long as they keeo social distance. I also need a haircut! My biggest concern is the economy. Job losses, the market, and stores and restaurants that won't come back. We can't bring people back that die from the virus but we can save people's livelihoods. Thank you for listening.
Pinellas	General	Fix unemployment.
Citrus	Professional Services	Hair salons must be in phase 2. We also will need strict guidelines as far as only allowing so many people in the salon at a time.
Miami-Dade	Education	I'm a cancer epidemiologist that works for the State of Florida and while I'm may not be currently exposed to the virus directly. I am seeing it through the eyes of my colleagues and family on the frontline. It is horrific to hear about what's going on in the hospitals, and while I know everyone wants to get out of their house and go out, I don't believe we are ready to do so. There are still risks and I think people should understand the extensive research that is being done. If the state reopens, the state will see more COVID-19 cases and the curve will spike. Hospitals are overwhelmed and it's certainly not fair to drain our healthcare workers even more. So, if you could kindly rethink about not opening the state at the moment. If it was your innocent family member being exposed every day in the hospital, would you promote more illness?
Alachua	General	I believe in opening Florida up for the first month we should maintain 50% occupancy to ensure the safety of the workers as well as consumers. Please be smart in the reopening of Florida it could save many lives!

AMERICAN OVERSIGHT

Sumter	Healthcare	Governor DeSantis and other parties — please do not open up the state. Given our high elderly population, a second wave would be more deadly than the first. Our testing facilities and hospitals already struggle in the hardest hit places. My mother and grandparents live in The Villages and I fear for their safety. It feels like a ticking time bomb waiting to happen. Opening the state before the majority of cases are recovered would only lead to mutation. This would make it even harder for our health professionals to care for the sick if current treatments stop being effective because covid-19 has mutated. Also — pay out unemployment. Florida is statistically the worst state to pay out unemployment right now. People are struggling!! One more thing — essential workers don't want your thanks. They want hazard pay and higher wages. If they have to risk their lives to ensure the rest of us get the things we need, then they deserve hazard pay AT LEAST! Best, Elizabeth Salcito, BA/BS
Lee	General	I think if we do start reopening certain businesses and things like beaches and parks that we need to keep in mind that slow and steady wins the race. Figuring out innovative ways to keep following social distancing is key! Perhaps only allowing so many people inside a business at one time not only for restaurants but for retail stores as well.
Pinellas	Recreation	I believe it's important to open all parks, not just beaches at the same time and this should be done after businesses have been open. Everyone at this time has the ability to exercise In their neighborhoods and it's more important to open businesses and get real paychecks into people's hands.
Santa Rosa	General	Please take it slow...never talk about Northwest Florida where numbers are climbing... and alot of the 1st 2000 test never came back and comments say they were lost or wrong swabs were used. Im not sure but scared of the numbers climbing. Please do not reopen bars gyms salons nails are all the places there is no way to not to stay away from each other...me being older & underlying conditions already half to contend with my husband DEEMED ESSENTIAL TO SELL CARS LOL..and bring the virus home to me or even himself...he has diabetes and had throat cancer so its very scary for our family as well as others
Collier	General	As a business owner who is currently watching my business die a slow death we need to open the state back up NOW! We are still allowed to go out to Publix, Walmart, Sam's Club etc on a regular basis and it's now time to open up the remainder of the state's businesses. Place restrictions and put precautions on us that's fine but allow us to get back to business, making money for our families and getting the economy going again!
Hillsborough	General	Open it up, I love watching people die. I love chaos.

AMERICAN OVERSIGHT

Bay	Government	Why are we all being forced to stay home and limited to what a small group consider to be "essential" for everyone else? The scientific evidence shows that sunlight and fresh air are the most effective treatment in killing the virus. Healthy people should not be forced to stay home in Quarantine nor limited in any capacity. Our hospitals are wide open, completely empty. Most of us are asymptomatic with no issues. We should be allowed to go sit on the beach at 2pm and get that great burst of natural healing solar light. The government has gone too far. Mayors, council members, most of us in our community don't even know who these people are. Yet they make decisions on our behalf they limit our daily lives and they're taking away our civil rights and liberties out of fear and panic. You got Chinese drones flying around now doing mass surveillance to "monitor social distancing". It's a massive abuse of power and goes against our privacy laws. The data shows that the coronavirus is far less deadly than we were all led to believe. For the ones that are scared or worried about their health, they have every right to stay home! They can still work from home and order delivery services. My rights and liberties do not end where your fear and panic begin. Open the damn beaches! Stop taking people's rights away. This is not China. You don't get to impose a mandatory quarantine on healthy people. We willfully obliged to help "flatten the curve" and that's it! Not to sit and wait for a Bill Gates vaccine.
Polk	Professional Services	I want to share my opinion as a small business owner in Orange County. I believe we should resume our work once there is major control of this desease, there is enough ppe for myself and my clients, and business owners are in economic ease to continue business. As of now I don't even feel safe to go to the grocery store I can't even imagine working on my clients. My services require me to be in a very close distance to my client's face so in my line of work I cannot have a safe distance between me and my client. As of now I can't find soap, hand sanitizer, proper face masks, gloves, disinfectant detergents that my line of work requires, or protectant gowns. As a business owner I have many experiences which non of them I can cover since I don't qualify for small business benefits and even if I did the systems are not working properly. I haven't been able to even file for unemployment so I'm in economic disadvantage to get back in business. This is not our fault we didn't provoke this. Getting us back to work right now will put us in a very fine line to close down.
Palm Beach	Recreation	Open beaches and parks for exercise ONLY (walking, swimming, surfing, etc) NO sitting, lounging, fishing, or gathering!!! People need exercise!!!

AMERICAN OVERSIGHT

Broward	Healthcare	I don't think it's a good idea. Until today I've been seeing dirty gloves on the ground all over. CVS parking lot, Publix parking lots, on the roads. People just don't care. I live in a big apartment complex and someone threw their dirty glove in the bushes by my door. The only good thing would be for people who need to go to the doctor for cancer treatments or diabetes or heart disease. I need to go to my doctors in the Cleveland clinic in Weston for CT scans that my life depends on and I keep rescheduling them because I'm frightened. I had two cancers radiation and chemo and I have high blood pressure anxiety, Atrial Fibrillation so I need my doctors but I'm too scared to go see them because I might catch the virus. Because so many people are ignorant, how can they be so thoughtfulness throwing gloves on the ground all over the place. I also see so many young and old not wearing mask in Publix. How can I see my Doctors without catching this virus?
Lake	General	As a state our cases are increasing daily, if we were to reopen the state the number of cases would grow exponentially. We have managed the virus for now because most of the people of Florida are staying home, not interacting with each other.
Okaloosa	Tourism	Opening up beginning of May will not cause a mass influx of people but rather allow us to assure people we will be ready for late June and July so we can stop losing the remaining rentals we have. Guest are not going to flock here the way they think please help us open back up
Broward	General	Close contact people need proper PPE. Hair stylists, nail salons, opthamologists, dentists, oral surgeons etc. We need enough for everyone. The health care profession does not have enough supplies! Also educate how to properly use personal protective equipment to keep the population safe!
Manatee	Government	The State of Florida should not reopen until proper PPE equipment is available to Floridians, along with testing. Workplaces should be required to take temperatures for employees, public areas should have to follow the 6-foot distancing. We retired here 3 years ago paid for our home and pay for taxes. We want to feel safe in our community Bradenton is a retirement elderly community
Palm Beach	General	My family lives in Boca Raton Florida and have been quarantining for six weeks. There is an enormous amount of non residents that have " quarantined in our city and continue to overpopulate the streets while they vacation. I believe it's important to get businesses moving forward and allowing residents to get back to work. Please consider requiring face coverings for the safety of all parties while opening everything as soon as possible . Our personal income and financial future rests in the hands of the government. Please allow us to move back to earning a means to meet our bills.
Washington	General	I am a born and raised native Floridian, I believe this "quarantine " has run it's course and is futile to continue. In order to save the economy and people's sanity this needs to be lifted.

AMERICAN OVERSIGHT

Volusia	General	Florida should o[pen immediately with no restrictions. The original intent was to flatten the curve, which has been accomplished. Don't move the goalposts by saying that once the disease is nearly past, we can start doing more things This would not happen for many months, at best. Now that the curve has been flattened (Well below initial modeling), the medical field has the equipment and facilities to handle future caseloads.This would help build somewhat of a herd immunity, which is also a necessity. It is way past time that we restore the constitutional rights that were so egregiously taken away, back to the citizens. And give the economic impact, it's fair consideration in the debate If the medical impact is the only or main consideration, Florida's economy will be destroyed beyond repair. Remember, that in reality, for someone to know for sure that they were virus free, they'd have to test almost daily until we developed a vaccine or cure. That's completely unrealistic. I'd like to also point out that the CDC RECOMMENDATIONS of 6' for social distancing have been turned into law by the Gestapo across the state at every level. Be as close as you're comfortable with If you are uncomfortable being close, stay away. In the end, the per capita fatality rate in Florida is going to be .00015 or lower, yet we self imploded our economy Unfathomable
Polk	General	Please do not ease restrictions. I do not support it at all. If you open up I will not go. I do not feel safe around strangers at this time. Until there is a viable treatment or vaccine I will not go into the community except for absolutely needed reasons.
Pinellas	General	People just need to use common sense and take responsibility for themself. My wife and myself both had the virus at Xmas time and stayed home until the 3ed week of Jan. So let's get people back to work and be able to make a living again and don't break the state unemployment bank. Please open the state so I don't feel like in Nazi germany.
Hamilton	Education	Please do not re open Florida until it is medically safe to do so. While I know there is testing going on, only those that meet the criteria are being tested. It is VERY difficult to find any medical care in Hamilton County, much less testing. One location at the Health Department which is located in the southern part of the county. Numbers are probably higher then we are showing. Perhaps if the unemployment benefits and the loans for small business owners were addressed and dispersed in a timely, fair , and professional manner, there would not be this "rush" to open. The numbers have not leveled off nor are they decreasing. Florida does not meet the CDC Guidelines.

AMERICAN OVERSIGHT

Santa Rosa	Recreation	Please reopen the panhandle of Florida. Santa Rosa, Escambia, and Walton counties have NOT been effected like the southern counties. We DO NOT need the same restrictions as the larger metropolitan areas of Florida currently have. We need business to reopen, we need kids back in the parks and back on sports fields participating in youth sports. We need to renter society and get back to the freedoms and prosperity that are guaranteed to us as United States citizens. We cannot as a nation, state, or local community continue down this road of isolation and shut down. People are loosing faith, loosing money, loosing confidence in our leaders. Let's listen to local medical leaders, a three local hospital administrators agree- reopening into phase one is acceptable, they are the experts, they are the reason we shut down to give hospitals a chance to not be overrun. We've established what needs to be done and what safe social distancing can accomplish, let's move forward into phase one and show the nation it can be done and must be done.
Palm Beach	General	When is unemployment going to come through? It's been over a month and things are pending. I am a bartender and relied on my weekly paycheck and tips and now with all of the restaurants closed, I can't get another job and unemployment isn't coming through.
Hernando	General	ONE DEATH is TOO MANY! We need to do EVERYTHING we can to STOP the spread, not just slow it and allow people to get infected and others to die. I have been out to get essentials for my home, to place like Home Depot and Lowes as well as to the hospital and it has been my personal experience that many people don't care enough or don't know what 6 feet is. I had one older man, I am in my 50s, come and actually brush against me in one of the stores and I was upset and asked him what his problem was. He called me a name, because apparently he believed it was ok to berate a disabled person. Then he asked, "what am I supposed to do?" My response was, "Wait, go around, keep your distance, and if you don't know, STAY HOME, because you are putting yourself and everyone else that you literally run into at risk." I had to tell another individual that came within 6 inches of me, even though the lady with him kept at 6 feet, that he should talk to his girlfriend to find out the difference between 6 inches and 6 feet." It is very common for people outside of stores and in checkouts that face each other to still be less than 6 feet because they don't think about those moments when they are walking up behind someone that is going slower than them or passing and individual coming the other way. If people are that oblivious, they need to stay home so that this virus doesn't keep spreading. Places that have one exit/entrance door like convenience stores, etc., should be extra cognizant of distancing at these clog areas because human nature tells us to open the door for others, but in these times, we need to wait, look and distance and then go when it is safe. My first suggestions is: ONE WAY - In stores, aisles that are less than 8 feet apart (enough room for 2 people to walk close to either side and have 6 feet of distance between those individuals) then the aisles should be ONE WAY and shoppers need to wait for others no matter how much time it takes so that distancing can be maintained. BETTER EDUCATE - Do something to educate the public on what 6 feet is, it's not one or 2 feet and that passing another person briefly is all it takes to get infected or pass the virus to

AMERICAN OVERSIGHT

Volusia	Education	As an educator who works in multiple schools and with students with disabilities I am concerned about opening schools without sufficient safety measures in place. There may be a number of students on campuses that are asymptomatic spreading it to vulnerable fellow students, staff, & families. I have seen what “normal” cleaning looks like in the school....no wiping down door knobs or desks/tables or vacuuming. We’re lucky if they sweep when they take out the garbage. Cleaning every room on a daily basis with proper supplies must be required. Further, consideration must be made for class sizes, common areas, and buses. It’s not unusual to have 20+ people in a classroom, 300 in the cafeteria, 70 students on a bus, & countless numbers in halls. Maybe masks should be required for all on campus, providing sanitizing supplies to all schools (teachers should not be expected to pay out of pocket), anyone with a temperature must stay home, do random COVID tests of staff & students (if allowed legally), schools need better air filtration systems, bathrooms cleaned every hour, and access to campus be restricted to only those who must be there (meetings with parents can be done virtually). Honesty, these measures may not even be enough.
Brevard	General	I feel that we have moved passed wanting to reopen out of boredom. Peoples livelihoods, jobs, mental health, kids mental health, all of this is so important and we need to reopen the state. I think we should start by limiting restaurants to half capacity or every other table sitting. We are in FL and outside tables are options at several restaurants and I think would help people feel more comfortable. My family for one plan to be at a restaurant as soon as we are able. We have two young children who miss school and miss their friends. While I understand school is closed, it would be nice to be able to have small gatherings where they could at least see their friends. Open the playgrounds and let them play. We have annual passes to Sea World and would love to see them open. Maybe start small with just annual pass holders and Floridians. Stagger seats during shows, skip seats on rides. We would feel comfortable going to theme parks when they open.
Seminole	General	Please consider the harm reopening Florida will do. Things are hard for everyone at the moment but reopening nonessential businesses and allowing social distancing will just cause another spike and another lock down later in the year. As a State we need to think about us as a group rather than individual needs. Sacrificing a few weeks of non essential actions like hair cuts, going to restaurants, and theme parks is what we should be doing to preserve the lives of fellow americans. We cannot be selfish. The economy will recover but we cannot bring back those who will die. Please ask yourself, how many men, women, and children are you willing sacrifice for the sake or the economy. If you can produce a number, then by all means, tell the people and reopen Florida.

AMERICAN OVERSIGHT

Seminole	General	Everyone at all places, needs a temperature check. Scans when they walk in the door. Restaurants-plexiglass in between tables.lower the amount of patrons. 12 feet between tables allowing the server to go between the tables. Bars-masks for bartenders. Drill chairs into floor so they cannot move them close to others. Nails salons-plexigass with cutouts for arms and feet. Limit to a small amount that come in. Patrons must wear masks as well as the techs plus the techs need to wear gloves.. Hair salons. Stylists must wear an N95 mask with shield due to the splash of hair when washing and same with cutting. Patron needs to wear a mask. Stadiums and theatres. Remove seats to keep the 6 feet requirement. Build outdoor theatres. Have a deal with door dash or local food trucks to order their food , etc. Make it a requirement for everyone to wear a mask in public. Discourage gloves as they just pass germs from one to the other and have hand wash stations everywhere. Must have more testing. If someone tests positive and shows no symptoms, their blood needs to be tested for antibodies. This may help to find a cure! Please be smart and not allow business togo back so quickly. We need to beat this!
Osceola	General	So many more lives will be lost if we open the state back up right now. I want badly to get back to normal life as my son, neighbors and family do too. But I am more interested in keeping myself ,loved ones , Floridians , ALL humans ALIVE. We have to be mentally strong in order to rationally see what this pandemic is capable of doing and defeat it successfully with no more lives lost. Let's sacrifice our freedom for now in exchange for LIFE! by all means necessary!

AMERICAN OVERSIGHT

Osceola	Accommodation	Thank you for requesting input. We need to open for business IMMEDIATELY. Our family's multiple stream of income strategy has completely failed. -Our tenants are "iffy" and under-paying rent -Our B&B has no reservations (and won't until the fall) -I have been furloughed from my Technology Manager job at Walt Disney World -The unemployment site is down – who knows when that will provide cash to me? -The SBA lost our Economic Disaster Loan application – or something – who know? -The State has our application for a loan but no money to fund it. -Right now we have enough in the bank – after depleting my 401k to cover two months of our payments due. Our private lenders also own businesses and need our money to cover THEIR families. We need to open for business IMMEDIATELY and start creeping back to life. People who are terrified can sit at home and be terrified. That alone will meter the rate at which the economy opens up and begins the long recovery. Business protections needed: -Indemnify businesses against lawyers and lawsuits chasing COVID as an income stream. This will allow Disney to open and other businesses as well -Immediately remove the review capability from all social media platforms for all small businesses based in Florida -Immediately make it illegal for a social media "pile-on" and "gang warfare" to occur against small business (or any business) Mental protections needed: -Fully 50% of our population is paralyzed by fear
Hillsborough	General	We need to stay under the safer at home order for longer.

AMERICAN OVERSIGHT

Hillsborough	General	To whom it may concern, As a small business owner in the Tampa Bay area, i believe now is the time to begin the process of opening up Florida. The pandemic has been terrible for business in all industries, and it will take time for consumers to gain confidence in not only being in a public setting, but spending un-essential capitol on purchases. It will take time to rehire, re-train on enhanced cleaning policies. This is why we have to start the process now beginning MAY 1st. As i heard through reports, reopening should be done in phases. Restaurants, theme parks, and other areas i believe should be allowed to open with limited capacity, and heightened cleanliness. These business will obey by the rules as they desperately need money to to cycle back in there respected companies. Our elderly residents especially with underling conditions should stay home and we should assist them in any way possible in doing so. Theme parks such as Disney World have a important and therapeutic role to my family and they should be able to open to Florida Residents only with limited capacity. I have a autistic sister and Disney world is her safe spot and it allows her to get away from the normal day to day activities. It has been a struggle for her not being able to get away as we typically do several times a month. Apartment complex should also be allowed to open up amenities such as pools and gyms, with no large gatherings 10+ to help keep people out in the general public and spreading it county to county. Thank you for your time.
Lake	Education	Hi My name is Morgan Collins I am 18 and a senior in High School. Last year i had cancer and in December i did my last chemo in February I got to go back to public High School i thought life was looking up for me but sadly no this has all happened and ruined my last chance at a senior year. Ive had to start online school but with no actual teacher helping me i cant keep up and im now failing just thinking of school makes me cry because after years off working towards my diploma chemo has made it harder to work on my own. I just wanted to graduate high School with all my friends but with is learning disability i sadly cannot so if i were to recommend anything please try and make distance learning more personalized to who its for.
Pasco	Healthcare	Please reopen our state!! I miss smiling at strangers, hugging my family, going to the beaches and parks with my kids. If government truly cared about our health they would mandate sunlight and exercise, hand out free vitamins and ban fast food, gmo crap food.
Manatee	General	We need to open the beaches
St. Johns	General	Encourage the wearing of masks, and if possible have some of the work force work at home. Also help business like restaurants by having the fees waived in order to reduce or expand expand their business. Also encourage companies with at risk employees to have them work from home. And testing is a waste of time and money, because you could be negative one day and positive the next, so the key is to get as many people tested for the antibodies. We have to get back to work. I am praying for the Governor and the rest of our Country.

AMERICAN OVERSIGHT

Marion	General	It's about time this state stopped worrying about big business interest and worried about its citizens. We are all smart enough to know that by the stay-at-home rule we have begun to turn the tide, stopping this at this time we'll just reignite the transmission of this virus. My business has lost valuable income but I understand that a human life is worth more than any dollar amount. Please do not consider opening this state until it is very safe to.
Palm Beach	General	I am imploring the governor to listen to the medical experts and only open the state WHEN THER IS SUFFICIENT TESTING AND HOSPITAL CAPACITY and PPE The guidelines for reopening the economy is being ignored by other governors Do not listen to poiticians, especially those who spout unfounded medical solutions that will end up killing people. its time to actually stand up and protect your constituents, All of us. disengage from your blind allegiance to those with blood on their hands, those who put their own political aspirations before the people they were elected to represent, those who lie on record then deny their lies,
Volusia	Finance	Dear Governor. I can't get through to unemployment, I can't go to work, I can't pay my bills or buy groceries. To say we are in this together is faults. Only those receiving money are willing to make that claim. We are not in this together. There are those of us on the verge of homelessness and starvation. Open the state. Those who wish to stay home out of fear, medical necessity or who can continue to work from home can continue to do so, but those of us living paycheck to paycheck need to get back to work.
Bay	Tourism	I own 2 vacation properties in PCB. While I understand why we must be careful I can not see the difference in allowing hotels and motels to remain open but not my units. I rent to families who are also careful. By not allowing me to rent my units you are causing me to face financial difficulties not excluding foreclosure and bankruptcy. Please consider EVERYONE when making your decision to reopen. Vigilance in cleaning and time outside on the beach can only help people get passed this. Thank you.
Miami-Dade	Healthcare	I think is to soon to open and too you are risking people live just for money
Orange	Tourism	I would like to see Florida reopen because I am now furlough I have a 1yr old child and Bill's have to be paid. Unemployment isn't working and no checks have be sent and rent is due nextweek. I cant keep living like this not knowing when I will be paid and not knowing if I will be homeless or not.if we can reopen and do it safe and have everyone wear gloves and mask and just be safe we can do it.but to keep having places closed and the unemployment not sending checks is hurting Florida just as much as the virus is.
Hernando	General	We have not yet flattened the curve, in Florida. We are still seeing many new cases and many deaths. We are not yet ready to reopen the state. We need to follow the recommendations of knowledgeable health officials, and maintain safer at home guidelines and social distancing in essential businesses.

AMERICAN OVERSIGHT

Pasco	General	It is entirely too early to consider this. Florida overall still has cases increasing. I suspect it would be even worse if more testing was done. We do not want more of our friends and neighbors to die. Since our family is already financially devastated due to not getting any unemployment (waiting since mid-March), no stimulus check yet, and no SBA grant for my sole proprietorship, a few more weeks is irrelevant to us. We will never recover the lost income and my job requires travel to other states that remain on stay at home orders.
Polk	Education	DeSantis is a fucking joke if he reopens the state. Maybe read up on what the scientists and intelligent people have to say about it instead of worrying about the economy. That will come back. Lives won't. Wish we had a real leader during these times.
Hillsborough	General	I AM 74 YRSNOLD AND CURRENTLY HAVE A HOSPITAL POSITION AT A LOCAL HOSPITAL, AND HAVE CORONARY ARTERY DISEASE AND HIGH BLOOD PRESSURE, DURING MY 12 HRS SHIFT I AM IN POSSIBLE" DIRECT" CONTACT WITH UNDIAGNOSED COVID-19 PATIENTS AND IN DIRECT CONTACT WITH THE FOOD TRAYS OF DIAGNOSED COVID-19 PATIENTS. I AM FEARFUL THAT I MAY CONTACT THE COVID-19 DISEASE , THEREFOR , I HAVE BEEN ON PTO BY MY OWN CHOICE ...FOR ONE WEEK NOW AND ASKING , DO THE DOCTORS AND OTHER HEALTH CARE ADVISERS MANDATE THAT I STAY HOME UNTIL THE INCREASED RISK OF CONTRACTING COVID-19 IS LESSENED. PLEASE SEND EMAIL TO: JMLAKEHOUSE@YAHOO.COM FEARFUL...JOAN MURRAY 817-320-7953
Citrus	General	Please consider re-opening the state, this allows those who want to venture out the opportunity to do so and those who do not to still choose to stay home. At the very least please open up parks, beaches, and other outside activities. What is going on now is a not a quality way of life, honestly it is just terrible. We have to give our kids other options, at least some outside options..
Alachua	General	Don't!!! It's not safe to reopen yet. We need more testing so that numbers are reflective of the actual number of cases, and only then can we determine if we're flattening the curve. Last week was the highest jump in Florida cases of Covid 19 yet- it is not safe to reopen!
Polk	Recreation	I dont know where you stand with youth sports and sporting events. But I just heard your briefing and I feel you may be for it because its outside. I think that's a bad move. Even if we can prevent people from being too close how can we protect the kids in the dugouts. Or the people in concessions. How can we prevent spreading through asymptomatic people? I think keeping us closed longer may be highly beneficial. Not the walking paths and such, but the parks for sports. We are still having new cases. Dont put more people at risk. If Disney isnt opening that should be something to consider. They are losing the most money being closed. Yet they are smart enough to know it's not the route to take right now. Please take into consideration how many people dont believe this is actually a thing. It makes me sick to know some still think this is a political thing. So please open slowly and when it's truly safe enough to do so. It is imperative you do the right thing. Thank you

AMERICAN OVERSIGHT

Orange	General	Thank you for all of the work that you and your team have done so far to keep the public safe from the spread of Coronavirus. I think the earliest to re-open Florida should be June 1, 2020. Opening up sooner than that could cause more harm than good to businesses. If a business is found to have people that contracted the coronavirus in that facility, people will stay away and the facility will lose a lot of business.
Orange	General	DO NOT start reopening our state yet! Human lives are more valuable than the economy. Fix our unemployment program, keep people at home and safe, and do not needlessly endanger more lives for profit. All that will do is cause a second peak and extend this even further.
Pinellas	Professional Services	I work at a spa and there is no way to social distance from clients. Please don't reopen too soon, we need a better way to test who is out on the streets and contagious.
Lee	General	Start opening now!!!!
Hillsborough	Professional Services	Please open our state for business, within the state. Nearly everyone I know is suffering greatly and wants to work, they are tax paying law abiding citizens who are professionals and have spend tens of thousands on their education and are being forced into bankruptcy by a fear of something that chances are, will not affect them more than the Flu would. Sick me compromised people can't and should stay home, but think of all the commission based employees that are losing everything. I am living off my savings, supporting my disabled veteran son and I just want things to be as normal as possible so I don't end up losing everything. I'm not worried about being sick.. our hospital system was never overrun. You can keep tourism closed but let businesses decide to open and take proper precautions. Let us be able to work and put money back into our economy. We want to, let us. And please do something about the tyrannical leaders in Tampa attempting to remove even more of our civil rights. Please allow us to work!!!
Okaloosa	Professional Services	I own a small barber shop and use all the safe practices. I really need to get back to work. I can not survive if I'm made to stay home much longer. I have already went through my savings to keep my home and shop running. Please let me go back!! To those who say I'm putting money ahead of lives you can choose to stay home. It is that simple. This is my lively hood! And for those who say the government is offering help!! It is very hard to get just look at how it's going with unemployment!! Which by the way I can't receive.
Collier	Government	How about worrying about the issues of unemployment before opening the state?!.
Escambia	Food	I work in an restaurant industry, I like to get back to work. And look toward my future.
Orange	Government	PLEASE listen to the science!!! Our state is not ready to reopen!!! Adhere to the phasing guidelines set forth by the federal government that was created by the scientists!!! The model the federal government is using says as of last week that Florida should not reopen until middle of June. 14 day decline of positive tests and more testing is needed before even considering opening back up and going into phase one!!

AMERICAN OVERSIGHT

Duval	General	I think it would be incredibly irresponsible to reopen the state for business and public re recreation at this time. Please follow the guidance by the CDC and Drs. Faucet and Birx, not any politicians, when determining what is safe and appropriate. They have indicated that to reopen too soon will result in another spike in cases, meaning additional needless deaths. The lives of Floridians are more important than the bottom line. Please put us first.
Alachua	Healthcare	I am requesting that the order ceasing elective surgeries to be lifted immediately. Every day is costing millions of dollars in lost revenue to the state. I am a cataract surgeon who employs over 50 people in my office and surgery center. My staff is currently laid off. As you have stated, hospital capacity is now greater than before the pandemic began. According to the data, we are well into the downside portion of the curve, ie, PHASE 1! PPE is no longer a significant concern. Vice President Pence has recommended that the outpatient bans be lifted. Phase 1 recommended that outpatient bans be lifted. The chief of CMS recommended that bans be lifted. The Florida Society of Ambulatory Surgery Centers has briefed us on CDC guidelines to be followed to minimize risks to our patients and staff. I respectfully request that the Executive Order to discontinue elective surgeries be lifted so at least that portion of our economy which is significant can be resumed. Thank you for the opportunity to make this request. I would be happy to serve on the task force to provide feedback on this important segment of our state's economy. There are many patients that are suffering with joint pain who need knee and hip replacements and many patients with reduced vision who desire to have their cataract surgery in our outpatient surgery centers throughout the state.
Nassau	Healthcare	My husband and I are senior citizens with pre-existing conditions. Opening Florida at this time, since there has been inadequate testing, would put both of us in a position of potential harm. Many Nassau County citizens as a whole continue to not wear masks or observe social distancing
Pasco	Management	I have been without a income since March 17. I have also received a denial letter from unemployment as I am a independent worker. I have exhausted my savings and now can not buy food and other basic necessities. At this point I would advocate to reopen the state so I can begin to provide for my family. Starving and/ or losing my business and home is the largest threat to me at this point.
Lee	General	We still cannot even find face masks. I think until everyone has what they need to try and get back to something that reflects normal we should stay shut down. If/when this resurfaces we won't recover as easy if we don't wait to at least get what we need for a chance to survive.. And...I'd like to know where Marco Island got the 1000s of masks they handed out. Why can't all the cities do the same? I'd say mid May would be a better time to try and reopen.

AMERICAN OVERSIGHT

Brevard	General	The COVID-19 numbers, of infections and deaths, are still rising, both locally and nationwide. We have not even reached the peak of infection, let alone flattened the curve. Reopening the state for business, and tourism, would be sheer folly. You cannot govern, or tax, people who are dead. You cannot encourage tourism when people are bringing home souvenirs of germs that are killing people. I want to see Florida thrive, but in order to make that happen, Floridians have to be alive. This is not a time for Florida to live up to its reputation for reckless stupidity. Keep Florida closed, and keep Floridians alive.
Pasco	Healthcare	PLEASE don't lift the stay at home order unti Coronavirus cases decrease to minimum and all contacts are located and isolated.
Pinellas	Real Estate	Open our state up now! #1 Fix our unemployment. Florida is now rated the worse in US. Thanks DeSantis. You're the worse ever. People wouldn't mind sitting on lockdown if they had some money coming into their homes to cover expenses. You have been making people very angry and for good reason. Well part of that don't you understand. I for one won't vote for you again.
Hillsborough	General	I feel very strongly about opening the economy back up slowly and safely for Hillsborough county. Advise the elderly and immunocompromised to stay home if they can and let everyone else get back to their jobs and socially safe distancing. We need our stores, gyms, restaurants, beaches, etc to be back open. Thank you for your hard work during this trying time.
Volusia	General	Please re-open non-essential businesses.
Orange	Food	I am a server on popular idrive. As much as I want to return to work. I also know that restaurants are a breeding ground for all kinds of viruses. 1 person gets a cold 10 people get a cold. 1 person gets a stomach bug and 10 people get a stomach bug. I get sick more at work then my kids get sick at school. If we open up to fast this will be worse for people.
Manatee	General	Re-open the Florida economy! The covid precautions are worse than the virus itself. Wether it needs to be opened in baby steps or full force, it just needs to be business as usual. Thank you.
Pasco	General	It isn't safe to open Florida yet. Instead the gobernor should be concerned and working on how to process the unemployment benefits. Many people still waiting for their checks since February and still nothing. The website doesn't wowrk and calling is a big problem. Please put your attention on how to fix this asap tinstead of opening the state.

AMERICAN OVERSIGHT

Brevard	Government	I am in favor of ending the stay at home order in light of the fact that anti-body testing in other areas of the country are showing that more people have had COVID-19 than the data is showing - by t0 to 50 times more according to recent reports by the media. While it's extremely sad that so many people have died from this virus, but we cannot afford for our economy to collapse because of it. I have friends and family members who feel certain they actually had the virus during January and February, but had no idea it was the COVID-19 virus. Given the new symptoms the CDC just announced this week, there are probably even more people who have had the virus. The data on which the Government is making stay at home order decisions seems quite flawed. People need to get back to work and our state needs to recover economically sooner rather than later! I believe this can be done while implementing precautionary measures to protect those most vulnerable to this virus. People can decide based on their own personal risks whether they should stay at home.
Escambia	Tourism	We rely heavily on tourism My biggest concern for our area is the opening of our beaches and bars prior to that happening in other states bringing those closest to us here in drove . We have one of the largest memorial day gatherings on Pensacola Beach coming up and it scares me to think of that amount of people because social distancing would be impossible if not enforced. i come from Illinois originally and my family and friends are located in their hot zones Im 54 and i have had 5 friends my age and ibe my sons age if 31 die from thi . Of those only 1 had an underlying condition of diabetes. Economically we cannot continue to be shutdown but we need to have very careful enforceable guidelines especially when it comes to tourists. Fyi so many are bitter that when press conferences occur that the pan handle is not ever addresse .
Okaloosa	General	Please open our state.
Broward	General	I believe Florida should be gradually opening with proper social measures outlined by the federal government. Parks and beaches should open immediately so people can have a place to go to get exercise and fresh air and sunlight. Retail and personal service should be opening with maximum capacity of 50% and follow all guidelines. Restaurants as well should be included. I believe at this point most if not all will police themselves and follow more then adequate measures to protect themselves. Florida's economy is heavily weighed on tourism this has to be streamlined in the decision process. We will have spread but the natural evolution of economics and personal metal healthiness has to be taken into consideration. Thank you
Orange	Government	Do not reopen the state! Our COVID numbers are still rising and will only due so if the stats is open. Keep it closed until there are a small portion of cases to be easily contained. A second wave can hit and that would be even more detrimental to our economy. Keep it locked closed PLEASE!
Hillsborough	Professional Services	PLEASE RE OPEN IN MAY. RE OPEN WITH MANDATORY MASK .PLEASE ALLOW HAIR SALONS TO REOPEN WITH GUIDELINES MASK,LOW CAPACITY.

AMERICAN OVERSIGHT

Volusia	Tourism	I personally think Disney World and all other theme parks should open in June even though there could be cases rising or deescalating because i believe anybody who feels safe to come out should be allowed to come out and anybody who doesn't feel safe Or who is near someone who is vulnerable should choose to stay in. Also several of my friends work in the theme park industry and the ones who aren't furloughed (specifically universal) should open up sooner rather than later because not all of these people have years of savings they can live off of for an uncertain period of time and they need to get back to work. Also, anybody who is not vulnerable should be allowed to visit with friends who aren't as well if they have a mask on. I think a timeline to reopen should be announced next week because this uncertainty and waiting is going to have an effect on peoples mental health which would result in an even bigger catastrophe when not just looking at coronavirus deaths but both sides (mental, physical and financial). As i saw a celebrity on facebook post, the long-term effects would be worse than the crisis that i think we should open up sooner than later specifically Disney because i know so many people who would love to have a date planned sooner for when they can go back to work instead of living in fear and uncertainty. Honestly if we are quarantined much longer, the problems are going to be much worse than the virus itself in my opinion. Please consider both sides of the equation not just related to the coronavirus cases/deaths but peoples mental health and financial stability and having a date in mind much sooner instead of later. Seeing specifically that there is a deescalation of cases in Orange County, i think Disney would be safe to reopen in June and anybody who feels safe should be allowed to come and those that do not feel safe can just stay in the house. This extended period of slowdowns should give the healthcare more time to over prepare by getting more beds and PDE. Another thing to consider is people from around the state/county who have to keep rescheduling their Disney vacations due to so much uncertainty. Even though Disney is taking reservations as early as June 1 (though there's no guarantee it will be reopened by then) having a date to reopen set much sooner than later will help set their minds at ease. Please consider the long-term mental effects of everybody who can't work from home.
Manatee	Construction	The stay-at-home order was the biggest April Fool's joke of 2020. The only people that seem to affect where those who already were affected i e restaurant workers and the elderly. The rest of us have still been out here working. Since you guys aren't taking this seriously you might as well let us get back to our normal lives.
Pasco	General	Before you waste any more time and energy here, Fix your unemployment system! I'm five weeks, my wife four waiting, and waiting. This...after dozens of hours over multiple days just to apply for the meager sum. We have savings. Most do not and your ineptness to fix the system will cost all of you at election time. Fix your unemployment system. What you've done so far, is far from enough.
Duval	Retail	Hobby Lobby,Joann"s for cloth and material for making masks Wal-Mart is cleaned out and only has limited items.They also have games and crafts to entertain children.

AMERICAN OVERSIGHT

Orange	Tourism	Unless you can keep tourism open for state residents only, keep it closed. We dont need people from other states or countries coming here right now and risking bringing it back here or contracting it in florida and taking it back to their state or country causing the cycle to continue. If we open up for state residents only it would allow some generation of income with less crowds and less risk of people bringing it from other countries. Then after 3 months if the curve is still relatively flat open tourism up for US residents. And then after 3 months of flattened curve we can allow for international tourism. We must consider that this isnt just a state issue but a global issue and need to look at the whole picture when it comes to tourism and how not only the virus effects tourism, but how tourism can contribute to the resurgence of the virus.
St. Johns	Education	When making decisions on education, please consider ALL entities and not just children. Staff will be interacting from close quarters in busses, cafeteria, hallways. Our classrooms are not big enough for social distancing and all of our schools are overcrowded. High schoolers are jam packed like sardines at class changes and primary school will not be able to follow hygiene recs. And special needs students should not be forgotten. Please ensure that schools are provided with abundant supplies- hand sanitizer, tissues, PPE, cleaning agents, and weekly or monthly heavy cleaning of the school. Keep in mind students are sharing desks, computers, headphones, etc.
Pinellas	Recreation	It makes zero sense Dog parks are closed. Now even more people are congregating along the shore line by the Vinoy because more people are walking their dogs there. Open dog parks !
Okaloosa	General	Personally, I do not feel safe returning to work when there are citizens with zero common sense, meaning even if they're sick, they still go out and about without the consideration of others. Until we see a decline in cases NATIONWIDE, Florida shouldn't be reopening. Florida should be freezing utilities and other bills so those who can't work or are feel unsafe returning to work are able to live comfortably under quarantine.
Volusia	Healthcare	Too soon to reopen
Seminole	General	Hello, I am reaching out to ask that the state of Florida extend the stay at home order. While we, as a state, have done a good job in helping flatten the curve, we are not at a point that we are ready to return to "normal." The stay at home order should be extended while we maneuver through this unprecedented time. It is not yet the time to be opening hair salons, gyms, etc. when we know people who are going out to these places are not the ones who will follow procedures properly. When we are ready to re-open I strongly recommend opening slowly, but I would be highly uncomfortable if we returned to normal when many states are still canceling major events through the next few months. Please do not put our citizens in harms way. Please keep us safe.
Volusia	Real Estate	Should stay closed down until end of May/beginning of June. If opened everyone should have to were masks.

AMERICAN OVERSIGHT

Hillsborough	Healthcare	As an RN MPH , I want to thank you for this opportunity. We have all been alone and isolated and for me this is hopeful site. We need to be smart, small businesses need to require masks and gloves until the numbers of cases is 0. What does not need to happen is a resurgence of cases and a repeat of this crisis. Restaurants need to distance tables and reduce the number of patrons entering their establishments. All cooks and food prep workers must wear masks. Bars need to distance bar stools. Salon workers need to wear masks and gloves to protect their clients. We need to slowly reestablish our state in a safe manner establishing faith in our system not fear. I think with guidelines in place and reviewing the number and location of cases every two weeks, we can then make further changes. So let's safely and slowly with confidence move forward in a smart manner and open florida. Use MD guidance, political, small business owners, caregivers, and feedback from the general population. Let's all do our best to understand this virus and take ownership of the decisions made for the safety of all Floridians. I am willing to help in becoming involved as we all pull together for an amazing positive comeback. We can beat this virus by working together.
Clay	Retail	Please reopen our state. We need to go spend some of the stimulus money on small businesses and restaurants so we can save them before they all go under. please please please please please open it up
Palm Beach	General	We need to get things back up and running. Those who need and want to can still stay home as they please. More have had this then we know of and are fine. People walk and still get together all day long. End the suffering and open!!
Collier	Recreation	Please open all beaches throughout Florida on the same day. I feel this is so important....example: Miami does not come to Naples beaches and vice versa. So many more cases in Miami than Naples. Thank you for all your hard work through this disaster. Be safe and God bless! Debbie Bonavita
Brevard	Food	I think opening some businesses slowly is the right move, but I think restaurants should remain doing take out only. There is no way to properly socially distance and the workers are directly involved in handling people's cups and utensils. I think the risk factor for restaurants and bars is too high still.
Walton	Tourism	I feel it is too early to open back up. Especially with us being a beach community, people from hard hit areas will travel here. And increase our personal risk. I think we should keep everything closed down for another month. Please do not reopen everything. It's about everyone, not just us getting antsy and wanting to go to the beach. Our ancestors got drafted and died for our country. We can stay home for our country.
Lake	General	I do not feel that now is the time to step back into everything being open ..we still have an influx of travelers coming into and out of our state daily. They can say the will self quarantine --but will they?? I feel that we need to at least think about the ramifications of all the places opening at once - how will you track anything then... we will be back to ground zero and have to start the process all over.

AMERICAN OVERSIGHT

Pasco	General	There are 551,947 people that live in Pasco county of that there have been 230 people infected by the Corona Virus and 4 death. The Safer at home order effects 551,717 people that are not effected by the virus in anyway but we can not go to a restaurant get our haircut or walk in the state parks. The government says that Sunshine kills the virus within 1 minute but yet the one place that would be the safest place is the beach and it is closed. Also if social Distancing is supposed to stop the virus then why after a month are there still infections. Italy, Spain and France had some of the strictest stay at home orders and still after almost 2 months there are still many infections everyday how is that possible if social distance is supposed to get rid of the virus. OPEN THE BUSINESSES BACK UP BEFORE IT IS TOO LATE!!!
Lee	Professional Services	I would really like to see hair salons not open so fast. It is not fair that we have to wear all this protective gear to cut hair. Open hair salons when we don't have to worry about only having 1 customer at a time or not take temperatures. It is not possible to stay 6 feet from a customer cutting hair. Open us up in phase 2 or 3, I was tested positive for COVID19 and it was a horrible experience, I was a lucky one to not have to go to the hospital but I was nervous for my children. God for bid a customer gives something to one of my stylist then brings it home to there family all because we had to be open so early
Sumter	General	No way. Wait until you have met the federal guidelines.
Volusia	Tourism	Please do not open any tourist attractions until July 1st. Let's make sure we are all safe from this terrible virus before opening Disney World, Universal or any theme parks. As much as I miss going to these parks I would much rather have a plan in place that keeps everyone safe. Proper disinfectant must be used to clean all area and rides of the parks. Cast members must wear mask, guests must wear masks, hand sanitizer must be available throughout the parks and proper social distancing must be done. Until all of these needs are met, then the parks shouldn't open.
Osceola	Food	I don't believe Florida should be reopened, I think that we should give it 2 more weeks after Monday. Just to insure no one has been contaminated in the ending of quarantine.
Orange	General	Until we have adequate treatment and safety measures in place and testing of the whole state , it should remain closed.
Polk	General	I think it is way to early to reopen Florida. People do no follow social distancing now. What makes you think they will follow later or at reopening. Yes I am going stir crazy but want to keep the virus away from my senior dad so I stay home. Yes I want to get back to work but want to be safe first. Please do not reopen Florida yet.

AMERICAN OVERSIGHT

Palm Beach	General	Please do not loosen stay at home restrictions until we have at least two weeks of dramatic decrease in new cases AND there is widespread availability of free testing for all. AND an accurate antibody test is available. And only those areas able to truly maintain social distancing and have PPE available for all staff. If we end this too soon, all this financial pain will be for nothing. And the second wave will be much worse on health and pocketbooks. The protesters are a small minority of idiots. Listen to epidemiologists and medical experts. Make experts part of your panel. In other words, use logic, not politics or emotion. Unless that emotion is empathy.
Lee	Tourism	Theme parks are a way to boost economic prosperity quickly. Theme parks were open during highly infectious times and NO cases were reported AT ALL. They are also a means of escape during a time when we have all had enough. Disney and Universal did everything right by closing, but at some point we need not only the financial stability provided by those services but the sense of normalcy they give us. If opening is not your plan, please let us know the steps to reopening that will occur as there are a ton of people with hotel reservations that will need to to make plans and book/rebook trips
Duval	Government	Governor DeSantis I know the importance of re-opening the State of Florida and getting the economy back up but I believe we should wait. I believe we should wait until the end of May or the beginning of June to start slowly re-opening. This will give extra time to make sure the curve is flatten while insuring the safety of all Floridians. Once this passes business can recall their employees back to deep clean stoves and cooking area's that have not been operational in sometime and to disinfect the stores or resturaunts. Together with all safety measures in place we can come out of this stronger and better Floridians..
Duval	Information	I say we should stay closed and not allow states who have open to come to Florida, until we won this fight the economy will come back you cannot get the people back I take care of my elderly parents, I might survive cov 19 but can they we have to many seniors, to take that chance there is no way to social distance in a theater or restaurant , I think the gov should help people financially to keep up with mortgage , rent etc, and when the country safe we can go back to work and pay the gov back when the economy better, people can wait to get there hair done or nails done that is not essential, only thing that is essential is food, shelter, gas, healthcare, the beaches are ok if its safe but that should be it people should be able to get unemployment, to get them through tough times, and sbl or set up online service to keep them afloat. Keep Jacksonville on stay at home where it is safe
Orange	General	Need more time and testing to determine reopening. Should not have reopend beaches. Good that Gov consulted with Cleveland Clinic. Not the time for politics. Feds have failed the American people.
Broward	General	Florida overall is not ready to reopen. There is too much at risk...lives.

AMERICAN OVERSIGHT

Polk	Tourism	Theme Parks should open to Florida only. With discounts about half off their prices for hotels and stuff like food than they will not lose a lot of money. Also legalized cannabis would be a smart move states that did this made at least 3 million in the first month. With tourist that come to Florida you have a chance to make more. Also legalized cannabis could fund programs like health care that was unfunded. Or body cameras to protect our sheriffs and police and youth programs to keep gang activities down. Or cut housing taxes and lower rent costs. Or fund visit Florida. What is great about doing this yourself you can put the money where it would be best used in our state and set the rules for it. I have seen articles about states harvesting the rewards from this decision why can't Florida. If it was legalized here when Florida opens back up the state would be able to get way more money to fast track our state to a better tomorrow.
Polk	Professional Services	I am a self-employed hair stylist in salon were there is only 2 of us. We operate by appointments only and can schedule clients one at a time to be able to clean between appointments. Plus we are able to were mask and take all precautions to keep from spreading the virus.. i understand salons with more stylist would have a harder time ,but I think smaller salons should be able to return to work on May 1st, especially on an area we're we have a lower case number.
Escambia	Construction	Handymen are not essential, having said that buisness will still suffer while a vaccine does not exist, I am a worker who goes to peoples homes, the safest place to be! People will not willingly invite me to their home where the cover of safety is to be compromised, by reopening without the numbers dropping is not only a doom to the buisness I'm running, but it's also a doom to your voters, residents, and all of the like wise, I understand people are frustrated, I am too, but I'd rather not have a hand in the death of citizens, make more testing available, then let's recheck our options
Pinellas	General	Dear Governor, I voted for you. I know you are doing the best you can. But, my daughter works as a server and has been out of work over a month. Please re-open Florida. Some very evil people have turned a bad flu into an epidemic and you know it. Don't betray your people. Thank you, Bambi Neal
Manatee	Government	We should not re-open. The economy will always come back. You cannot bring back the dead. We have not peaked. We should of closed earlier !
Pinellas	Retail	would like the health experts to tell us when safe to reopen florida--I work in retail and right across from our store is a retirement village that has had 9 deaths recently due to Coronas. I do not feel safe opening store with virus still hitting hard

AMERICAN OVERSIGHT

Lee	General	We need to get everything up and running by June. Too many people are unemployed and desperate. This may become a grave safety issue. The public had 6 weeks of education in distancing and staying home when sick. The responsibility is on the people. You can't stop life for months til people wise up. Initially, open up requiring anyone going into a building to wear masks and gloves. The entertainment venues and sporting events should be back to business July 1st. Maybe large venues could have screening in place. The economy is the biggest issue to me. Thank you! Lisa Kruvelis
Manatee	General	Dear Governer DeSantis, You did the right thing by keeping all public schools closed until the end of the school year. However it is indefensible attempting to open portions of Florida, beaches included, with an aging and elderly population that heavily occupies every county of the state. It is absolutely unconscionable and you will have blood on your hands and your cabinets hands by allowing this to happen too soon, when the state numbers for coronavirus infection and death have not yet peaked. Please consider re-closing beaches and businesses for the health of ALL. Secure tests and masks for all. MAKE people wear masks if they must go outside. Make all supermarkets and big box stores contact-free curbside pick-up or delivery. Make Florida AS SAFE as possible. You are not doing that when you open businesses and beaches.
Washington	General	Please don't cave to the pressure and open too soon, I do not need my hair done, but I do need to go to the dentist. First thing to open should be doctors and dentists, non emergency surgery and the like, with hair, tattoos, restaurants and tourism at the end. I know people are hurting, but we cannot weather another, potentially longer, shutdown should we have another wave of this virus.

AMERICAN OVERSIGHT

Miami-Dade	General	I believe that with caution wearing a mask business's should be able to open as long as they follow the proper rules for preventing the spread of the coronavirus.. People also if going back to work employers should provide protection with masks, hand sanitizers, alcohol wipes, or a water spray bottle with some bleach to wipe the area down for their employees.and the public. If offices have windows they can be aired out a few times during business hours or have Air filters if it helps eliminate the coronavirus and now maybe those ultralight installing them in AC' systems it might help. For the restaurants if they have the space to provide tables outdoors with distance if not continue with take-out orders.. I am not an expert in any of these things I've mentioned its just suggestions. I do pray and hope that God blesses us all and saves us from this evil coronavirus and that soon it's all in the past and that we've learned from it and not take life for granted and to be more kind to one another nothing in this life is guarantee only our Father in Heaven does.. I want to thank all of our Government and Dr's, nurses, police, rescue, fire dept , pharmacy, and grocery store employees, restaurants employees, volunteers for food distribution, volunteers, red cross, for all their wonderful and great help God bless them all thank you so very much w love love you all !!!!!
Escambia	Professional Services	I do not see that it is safe to reopen salons, barber shops, tattoo parlors (yet). While we can wear protective equipment, check temperatures, etc. we still come in very close contacts with our clients, ultimately putting us, and the client at risk. While we can spread the chairs out and limit occupancy in the salon, we can not distance from performing the service the client is having done.
Broward	Healthcare	Regardless masks /face coverings should be mandatory in all essential business,anywhere where it is not possible to maintain 6 feet distance,until a vaccine is available . All universities should remain online at least until spring semester 2021. Due the nature of large 600-700 seat lecture halls. Dormatory lifestyle, fraternity,sorority lifestyle,sporting events and the list goes on . would put both Faculty,students at very high risk . And endanger lives. and of course put our wonderful university system open to major lawsuits, due to many deaths . The hope is by spring 2021. We would have perfected antibody testing,And be that much closer to a vaccine. The problem with hybrid learning allowing students on campus who must be hands on,you must open the biggest liabilities the dorms. Increase funding to the state university,to keep all learning on line ,until we have Much more valid scientific data on Covid 19. I am a Nurse Practitioner.
Hillsborough	Recreation	I understand there is a virus out there but you have shut us down for over a month. As a small business owner I am a grown intelligent adult that can be safe and take care of my customers in a safe way. You, the people making the decisions, are still getting paid and could not possibly understand what it's like to not have income to pay your bills. At this point you need to find something in the middle. We cannot stay closed. We need to open. Treat us like adults let us do the 6 feet apart, 10 people or less, wear masks and open Hillsborough County!!

AMERICAN OVERSIGHT

St. Lucie	General	Please do not open the state of Florida. I fear that it may be a bit too soon. My family and i have been practicing stay at home since March 15th. Just ask that we wait it out a bit. I do understand that some may not have a job and have bill's to pay, but the bills will remain after they are no longer. Try to help those people, they need assistance the most at this time. Just my humble opinion.
Duval	Recreation	People need to be outside. Being cooped up just makes people unhealthy. Open up all campgrounds and areas where people can get away.
Palm Beach	Healthcare	AS A PRIMARY CARE PHYSICIAN, I AM REQUESTING THAT THE STATE TAKE GRADUAL STEPS TO RE OPEN FORIDA'S ECONOMY. THERE IS LITTLE YET KNOWN ABOUT THE SPREAD ANBD IMMUNITY OF PEOPLE WITH THE VIRUS AND IT SEEMS PREMATURE TO EXPOSE CITIZENS TO THE SIGNIFICANT HEALTH RISKS ASSOICIATED WITH WIDESPREAD CONTACT. WE KNOW THAT IOT WILL TAKE UP TO 3 WEEKS TO SEE THE EFFECTS OF ANY CHANGES AND WITH OUR INABILITY TO ON SITE TESTING, CONTACT TRACKING AND ISOLATION YOU NEED TO ACT RESPONSIBLY. WE STILL DO NOT COMPLY WITH THE REQUIREMENTS OF THE CDC FOR RE- OPENING. ALSO I AM CONCERNED THET THE ONLY ELECTED STATEWIDE DEMOCRAT NIKKI FRIED , WHOS IS RESPONSIBLE FOR FLORIDA'S AGRICULTURAL SECTOR WAS NOT INVITED TO THE DISCUSSIONS RELATED TO RE OPENING . ALSO NO HEALTH CARE OFFICIALS ARE ON THIS COMMITTE - ISN'T THAT A LITTLE STRANGE SINCE THIS IS PRIMARILY A HEALTH CARE PROBLEM . STOP THE PARTISANSHIP AND WORK FOR ALL FLORIDA CITIZENS
Orange	General	Schools are now closed the rest of the year and now your going to reopen the economy. This is going to force many people back to work. This is not a bad thing but you need to make special considerations for childcare as well as parents with immunocompromised children. Special contingencies for people in these situations is required. Maybe free childcare should be offered. An on-site day care at state government offices for their employees as well as community options for non government employees. Also special funds or wash center people can use before they return home to their families.
Orange	General	All businesses should have a system In place . As long as we have a system and certain protocol we can open everything. Enough shut down . It has been 6 weeks now. I believe we gained enough time to be prepared for dealing with this situation. I am In favor of at least moving to phase 2. Stating May 1st. May God bless State of Florida and bless America.
Hillsborough	General	We are not ready to open yet.
Hernando	General	Please reopen this state and allow people to go back to work. The numbers that are being supplied do not JUSTIFY keeping things shut down while people are not working, not receiving a paycheck, not receiving a stimulus check, not receiving unemployment, victims of domestic abuse, suicidal, mentally ill and on and on and on. I have auto immune disease and work in the health care system. There are things we can continue to do to be safe. Not allowing people to LIVE is just ridiculous when the numbers don't JUSTIFY it!

AMERICAN OVERSIGHT

Sumter	General	PLEASE TALK ABOUT THE ECONOMY MORE & GETTING PEOPLE BACK TO WORK SOON. Talk less about testing. People need to go back to work now.!! Please address those floridians who are losing hope. The economy is JUST as important as the virus.
Orange	General	There is a nonpartisan plan developed for opening the economy in a four phase system that should be considered if you haven't heard about it yet. It's called the Road map to Pandemic Resilence. https://ethics.harvard.edu/covid-roadmap https://youtu.be/HhRQxk9QA-o
Lee	Healthcare	Please address dental offices. When are we to open for elective dental work? Dentists need to be able to test their patients for COVID19 before they are seen in the office. We also need access to antibody testing for ourselves and our staff to know who has antibodies. This needs to happen ASAP. Why allow pharmacists to administer the tests and not dentists? We also need to be able to obtain PPE for our staff - something that so far has been extremely difficult
Pinellas	General	Open up the State. People need to go back to work. The economy needs to get back. If people don't want to go out, that's fine. The rest of us are intelligent humans and can make our own decisions. Enough is enough. We need to move on.
Pasco	General	1. Please re open tennis courts at the very least; tennis is played apart from each other! Social distancing defined! 2. Please allow restaurants to re-open and if necessary limit capacity like what was initially done (50%, every other table, etc.) Ultimately please let us, the taxpayer and educated individuals have the freedom to choose what to do. If people are scared to patronize businesses, that's fine! Nobody is forcing them to do anything. Freedom means allowing people to act and take their own risks. I risk dying in a crash every day I go to work. I risk drowning every time I go in the pool or ocean. We risk my daughter's life every time she goes in the car or pool with us. That responsibility is ours and ours alone. Please let us have the freedom our forefathers fought and died for back. They dealt with extremely contagious diseases too, just as every generation has. They didn't take freedom away as a result.
Brevard	Healthcare	After testing 1,000 people in Brevard Co. to see how many had developed antibodies after having Coronavirus, only 1% developed antibodies. The herd immunity theory is not working. Listen to the healthcare workers' advice for reopening the state, not the economists. Include the nursing home Coronavirus numbers in Florida's count.
Lake	Healthcare	Do NOT relax our covid distancing yet!!!! We are not ready and our cases are still rising!!! We don't have enough testing yet and you need to put us before money!!!!! Stop trying to please Trump and think about us first!!

AMERICAN OVERSIGHT

Palm Beach	General	Im all for the slow reopening of our state. I do believe it should come in stages, with required precautions in place. As a restaurant employee who has been working this entire time providing take out and delivery services, I've seen first hand the need and desire for these services. I believe when opportunities are available many people will choose to to go out, so please require businesses and consumers to maintain safety standards and limit capacities allowed at one time. Reevaluate bi weekly and make adjustments as needed.
Sumter	Healthcare	Central Florida in general, and the Villages specifically, needs widespread testing before reopening. The Villages is a community where people congregate in large numbers and where the majority are elderly and/or vulnerable. In addition, there are many here who deny the seriousness of COVID-19 and have refused to wear masks or practice social distancing. Testing here is essential!
Sarasota	General	I think that we should open everything up ASAP. Otherwise we risk a lot more damage to local economy and people involved as it may lead to more deaths because there is a saying that states. If people loose everything and they got nothing left to loose, they loose it. That means there could be more violence and other things where people will die as a result. We should be smart and open up the economy so that people can go back to work and support their families. This virus covid-19 proved that is no more dangerous than the regular flu. We should be safe and maintain our distance and keep clean as much as possible but at the same time we need to get back to our daily lives ASAP. Thank you
Hillsborough	Recreation	Safety of the public citizens first! We must first be able to control before we can go back out! I like the stay-at-home orders because people do not listen to how serious this is.
Brevard	Healthcare	As a recently retired Infection Control Practitioner, my background in the field tells me it is way to early to open Florida back up. I understand that we are all worried about the economy, but we need to ride this out a few more weeks or we will be right back where we started in the beginning.
Duval	General	In my opinion it is still too early to reopen Florida, we must wait a little longer and be very careful, to reopen, I do not think it is good to reopen public spaces such as restaurants and bars yet, I think that should be the last thing that opens, I am strongly agree that schools remain closed for the remainder of the school year. I do not agree with the decision taken in duval to reopen the beaches, in my opinion it can generate more infections. I can only suggest that they think more about the health and safety of people, than in the economy, if there is a large outbreak, the economy will not serve them, because then they will not have anyone to support them. For me health comes first, without health we cannot do anything.
Pinellas	General	Don't open Florida for business. All healthcare workers and service providers are at increased risk of dying! Greed is not the solution to a man made problem. Keep Florida closed.

AMERICAN OVERSIGHT

Pinellas	General	I just have a few ideas to share with you. I agree businesses should be opened up in stages. Some types of businesses before others. In addition to deciding which types of businesses to open initially and particularly for customer-driven businesses, it could be recommended that businesses open under a strict "no walk-ins", "by appointment only" or "reservations only" basis. Of course, still observing "social distancing guidelines", proper distancing between customers and disinfecting thoroughly between customer visits. As an example, if a restaurant has a seating capacity of 50, at first make available only 20 seats. After a period of time and according to government guidelines, then you may make available more seating. Many of the "nonessential" manufacturing businesses could also reopen by implementing the use of masks and gloves, social distancing and thorough disinfection of tools, machines and areas after use. Limit the number of individuals allowed in common areas according to the size of the area and safe distancing recommendations. Likewise, medical and dental offices and all doctors could begin their practices with appointment only visits, and hospitals should be allowed to start elective surgical procedures and well patient screenings by appointment only again. As for beaches and parks, initially, open the beaches up to local residents. Monitor this for a couple of weeks and reassess. Eventually open the public access gradually to other visitors. You could do this by limiting the public parking areas as to only allow a set number of vehicles parking during a given time. Blocking off the parking lots could help to limit the number of persons in the areas. Shop owners along the beach areas must adhere to the "customer only parking" allowed in their lots. These ideas are mainly for the smaller parks and beach communities. I am sure the larger parks (Disney, Busch Gardens, and the like.) will have their own ideas more tailored to their services. Observe the guidelines for a time (maybe 14 days or so), re-evaluate how this is doing and adjust accordingly. Obviously if there
Pasco	Manufacturing	Good afternoon, As a Florida business owner and someone that travels frequently for my company, I would like to start off by stating that i am truly pleased with how this situation has been handled so far with regards to our great state. Comparing it to how other states have handled this I am proud to be from Florida. With that being said i believe it is time to open Florida back up and get things going again. Even with some minor restrictions if necessary. This has taken quite a toll already on my business and many other of my friends that own businesses here in Florida. Thanks, Tim Rosej
Hillsborough	General	Do NOT reopen the public beaches, parks, or restaurants for sit in dining without a clear plan to lessen the risk of exposure for all citizens.
Pasco	Tourism	Our sole purpose of staying at home was to flatten the curve. We have done just that, hospitals are not overwhelmed right now. For everyone’s sanity and health we need to open the state. Theme parks could be opened to Florida residents only, I would gladly participate in a simulation if they needed people to help. The kids need outlets, parks and playgrounds should open ASAP. The number of drownings in our state are ridiculous right now.

AMERICAN OVERSIGHT

Walton	Accommodation	THANK YOU for allowing our voices to be heard! Thank you for attempting to take care of our state and constituents the best way you knew how. As a small business operator. I cannot imagine the stress and insults being thrown your way from both directions. I represent a professional vacation rental management company in the FL Panhandle. I cannot begin to express to you my concern of our economy being shut down and the local economy suffering. Should a shut down continue with the vacation rental ban, our economy will collapse - it's only a matter of time. We are a driving force to this area with bed taxes, supporting other local businesses, and employing over 20 team members (not including our 100+ Owners, cleaners, vendors, etc.) Without rentals, Owners cannot pay Association dues.The real estate sector would be on the brink of collapsing again if so many Owners have to sell and the inventory floods the market. As a professional vacation rental manager, we are setting up all necessary precautions to ensure our properties and guests are safe: following CDC guidelines, wearing PPP, disinfecting properties with solutions that kill COVID-19, etc. We would be willing to require a couple day gaps between reservations if that makes everyone feel better. I see the devastation. I see where things are headed if we don't begin to slowly re-open. I support your efforts for a solid, slow re-opening, but we need to know what's going on. I cannot flip the light on and begin operating tomorrow. I need a week lead-time. Knowing at the last hour is debilitating to allow me proper time to stock up on supplies, prepare, train, re-hire, etc. Please have daily press conferences at the same time, every day, on TV so we can stay informed. I never know when you are going to pop up on the screen, and it's very hard to stay tuned to the terrible media all day long just waiting for your voice. The only other thing I would like to say, is that it was completely discriminatory of you to close only vacation rentals and not hotels - if you are going to force one sector of lodging to close, you should ensure those businesses are going to receive government funding. Thanks for listening.
Clay	General	I agree to reopen Florida people we need to work to feed our families our bills. Farmers need money as qell. People who disagree came continued doing their social distances and other can return to work. It has impacted our family business our house payment our other bills.
Brevard	Healthcare	FL should be re-opened in phases in line with those set forth by the White House. It's time to open and allow businesses to operate using smart social distancing guidelines. Those who are elderly and/or medically fragile should continue to stay home unless leaving for essentials or medical care. Get unemployment up and running; pay retroactive claims. Disney should only be open to FL residents for the foreseeable future.
Duval	General	Desantis and all appointees are trump lap dogs, can them all and start over with educated people
Bay	Tourism	I would like to see vacation rentals opened back up. I have already seen rental management companies go under. It is time to allow vacation rental owners to restart their business. I own and manage two small lower end units and in one month I have personally lost $18,000. My story is not the only one.

AMERICAN OVERSIGHT

Miami-Dade	Retail	Don't open up the state until it's safe! Between April 24 & 25 we got 800 more cases of Covid19. I live in Miami and I work in retail, it's a small store and I have no way whatsoever of social distancing from my coworkers and I have to help customers so I obviously can't social distance from them. My store also attracts tourists from all over the world. For the love of God, wait for the Covid19 cases to dramatically drop, a lot!! Health over politics. Why even ask the public what we prefer??? The governor needs to do what's best for the people In his state. He needs to think about our health no matter what anybody says. This virus is terrifying and if we open up too soon Covid cases could surge. Memorial Day is coming up, and Miami Breach is going to be insane packed with people!! I feel we should wait a bit more to open FL until more testing is done.🙏🙏 Signed:very concerned citizen.
Lee	Healthcare	We need to treat our dental patients and the aerosol is high risk. All the dentists I have spoken with and staff want us to do testing. We need to be able to administer a test to any patient that is going to get a procedure that produces aerosols. Dentists are highly trained in blood, saliva and injections. -we would be interested in the quickest test possible for 15 minutes or 45 minute test or even the next day test- we could run them the day before if even needed. please stop overwhelming the pharmacist! they have enough to do with all the Rx and vaccinations— let the dentist help because we also need to know the status of our patients for our safety and the staff safety— people have had their dental work put off for six weeks now— we've had to go in for emergencies But the number of emergencies is starting to grow— please include dentistry for testing especially out of network dentist— dentist in or out of network should be able to perform the testing and submit to the insurance. We are here and ready to help and this would kill two birds with one stone and would make dentistry safer to perform
Duval	General	It appears our governor is President Trump's tool. He is embarrassing. He only seems to care about economy. Churches, guns, professional wrestling?!?! Not only are these absolutely NON ESSENTIAL, two of the three are dangerous in the hands of most weak minded Americans. I leave it to you to figure out which two. Re opening the state shouldn't be based merely on hospital capacity and political interests. I abhor our so called leader and I cannot wait to vote him out of office.
Osceola	Finance	Before trying to open the state.... first fix the unemployment issue.... my husband filled for unemployment on march 28-29 and still no answer... that is 4 weeks without income
Polk	General	We're never going to have zero cases. Nobody is staying home anyway so we might as well get these folks that are out of work, back to work. Everyone knows the risk/precautions so let the people decide how they want to handle it. Let's put this thing in gear and send it.
Hillsborough	Administrative	I believe June 1st would be a date to satisfy most Floridians. The curve has been flagged and people need to get back to work, especially with the unemployment website isn't helping people get paid.
Hillsborough	Professional Services	I personally still do not feel safe to go to work and/re-opening of including the impacts to small businesses, healthcare, education, tourism, agriculture, retail, recreation and sports and construction.

AMERICAN OVERSIGHT

Seminole	Recreation	Keep small business closed at least until June. Opening within the next 2 weeks could be dangerous. If small business open and get confirmed covid cases it could possibly put them out of business.
Alachua	Recreation	I desperately need to open my business by June. I run an event venue where we hold weddings. I am hopeful that we will move forward with reasonable precautions such as hand sanitizing stations and limiting to no more than one person per 30sf or so. My fear is this. I am in Alachua county and our numbers are all down, qualifying us for phase one under the federal guidelines. However, ourcounty commissioners have been publicly saying that even though we qualify, they do not intend to stop the stay at home order when the Governor's order is relaxed. Please protect counties who have reduced infections and hospitalizations from government overreach. Thank you
Volusia	Professional Services	Massage therapists open, medically needed
Seminole	General	NO NO NO NO NO. HOW MANY "NO"s will it take for people to understand that it is NOT TIME YET to open Florida. America is a great country BECAUSE of all of our freedoms but some people are behaving like spoiled brats in time out when they are told we have to take necessary precautions...not just to protect themselves but the rest of society. we are in the middle of a WORLDWIDE HEALTHCARE EMERGENCY. Time for community leaders to step up and be the "mean parent" who is making the unpopular decision because it is the RIGHT thing to do.
Palm Beach	General	Open the private community pools and private beaches. Restaurants salons and close contact should remain closed. Stadiums and gyms should remain closed.
Bay	Healthcare	With Bay county being a tourist destination it's ridiculous to open everything at once. I would like to know how Hotels and motels can be open and receive bailouts as condo owners go broke. I'm not totally in favor of opening short term rentals however there's no difference in the two. No one is following stay home order now that city and county officials partially opened the beach and tourists are driving in to stay in those hotels and motels you left open. Numbers will increase in our area due to this and we've been lucky so far. I realize things will have to open eventually for economy but don't go strictly by our numbers or population in a tourist town. Fix unemployment people have been laid off for 6 weeks and are starving it's ridiculous.

AMERICAN OVERSIGHT

Miami-Dade	General	Mr. Governor, I'm a single mom of 2 kids with asthma, a proud registered Republican for this great state, and I wish nothing more to get back to work. I would love nothing more then to get back to work. I'm a bartender at one of the longest running restaurants in Miami, I miss my regulars, I miss interacting with people over 5 feet tall, I miss my co-workers who I consider not just friends but also family. But I also have to take into consideration the health and well being of my own family. my daughter gets a flu shot every year and still ends up getting it. Every year this little boo ends up in the hospital in respiratory destess, crazy fevers, and non stop asthma attacks I trust your better judgment to protect our state, but all ask , is that you take my little family into consideration I just received my first ui check which was for a fraction of what I normally make, if I'm willing to take a huge pay cut to stay home to keep my kids safe , that should mean something . I know you just had a little one yourself, if you dont feel safe taking that little one into a restaurant, please dont reopen them and force me to make the choice between the job that I love or the kids that I have promised to protect.
Seminole	General	We must increase or testing level such that EVERYONE who plans to resume contact with others outside of the people with whom they live daily. This means pre-testing must include not only people such as barbers and tattoo parlor owner/operators but anyone who plans to be in an enclosed space such as a gym, restaurant or store. This virus is been established to be very, very contagious and not knowing if you are shedding virus means you are gambling with the lives of those around you some of whom are being required to work in these environments or risk losing their jobs. Additionally, everyone traveling outside their homes for work or shopping, etc. would need to wear a medical grade mask as a precaution. As of now many people are still entering stores and other enclosed places without any mask being worn. Any first responder or healthcare worker should be tested at least monthly for COVID-19 as they are at greater risk of exposing others and themselves to the virus. All COVID-19 testing including antibody testing should be at no cost to the people being tested. When a person tests positive for COVID-19 they MUST be quarantined by the local health department. Their immediate family or those with whom they live must be quarantined as well until they can be tested and then retested a week later to find out they are still testing negative on both tests. Anyone who has been in the community before testing positive must have their contacts traced back at least 5 days to make sure that all who had close contact are tested.

AMERICAN OVERSIGHT

Miami-Dade	Government	Please reopen our beaches and parks. It is no longer disputed that sunshine and fresh air are conditions in which the virus is least likely to survive and be transmitted. Please end the mandatory masks. I can not wear them due to breathing difficulties and I am severely ridiculed for it every time I am forced to go in public for necessities. Please allow businesses to reopen. My friends are suffering financially in ways some will never recover. Some are despairing. Please we do not have to continue to punish the healthy to protect the at risk. Please help us reopen and those who still need to isolate may certainly continue taking those precautions. Please end the punishment of the people who NEED to get back to work in order to provide for their families.
St. Johns	Professional Services	As a licensed cosmetologist for almost 14 years I am a 1099 independent contractor. I was frustrated to see that there was not someone from our industry on the task force to reopen Florida. Although you have a representative for the DBPR our industry is very unique. Our licensing, continued education and daily work revolves around close contact with others and sanitation and disinfection. Please consider someone from our industry to be on your task force to help open Florida, stimulate the economy, and get people back to feeling like themselves again. We are so important to mental and emotional health. As a 1099, as many are in our industry we have been completely skipped over. We have not received a stimulus check and unemployment.....well, you know the issue with that. We need to get back to work! We cannot continue to “work from home”. It’s not possible. Please help us! Please help our industry! Everyone needs us! Everyone needs a haircut!

AMERICAN OVERSIGHT

Broward	General	Covid-19 is never going to go away, the point of the stay at home order was so slow the curve, which we have done. If Floridians want to go back to work, they should be allowed to. It's up to people who have underlying health concerns, or live with people with underlying health conditions to stay at home. Healthy people need to go back to work. Florida should also reopen the beaches. We need somewhere to go outdoors. Staying indoors is making us sick physically and mentally. There is more risk going to a grocery store than going to the beach and maintaining social distancing. The longer you wait, the more crowded the beaches will be as people get more and more cabin fever. Limiting hours will also funnel more people into a shorter frame, so limited hours is not a good idea. Open the amenities in our complexes, we pay for them and we can maintain distancing and wipe down our spaces to mitigate risk. It's should be our choice and we pay for those things. The more studies come out proves that people can have the virus and still appear healthy. That is why the vulnerable population must take responsibility for themselves and continue to stay home. Those who can work remote should continue to do so. But keeping all people home is just delaying the inevitable, we cannot stay inside forever. I fear people will become desperate and start crime. I fear people will lose hope and hurt themselves. A phased opening will help to expose people to the sickness slowly and start herd immunity. Start with parks, beaches and outdoor spaces. Then open resturants, movie theaters, salons and stores occupying at 50%. Then open bars to 50% by June 1st. Any later and many will not survive, especially in South Florida. We need travel to start again this summer. The airlines need it. People with family out of the state need it. We need to look at the facts that this virus is not nearly as dangerous as anticipated. Its important to lay our fact because people are running off of emotions and being irrational. Give those who are still scared the option to
Pinellas	Food	Mr. DeSantis and task force members, Please consider opening restaurants in Pinellas county as soon as possible. I have worked for the same company for 27 years as a bartender. That may not be a thing to brag about, but I have always provided for myself and now my son and I haven't been able to do that since March 21. I have also not received any unemployment money since then so reopening would be a god send. Just like many others, I fight not to get depressed because of the situation. I am healthy and wanting to work and not just collect a check from the government (if it ever comes). I WANT TO WORK!!!! Have the old people stay home so us healthy ones can be productive members of society!!!! Thank you.
Seminole	Healthcare	Extend stay at home order until more testing
Hillsborough	General	We all want to go back to normal, but please don't reopen the state too early. By doing so, we're going to end up in worse shape than before. Extend the order, and keep us safe.

AMERICAN OVERSIGHT

Broward	General	It is too soon to open the state of Florida.... 1000 people have died in our state and the medical people say its WAY TOOOOOOO SOON! Don't do anything now that we will regret later... Remember that this is the health and LIVES of our people, just because your mentor (Trump) is an idiot doesn't mean you have to be. Cindy Berger
Polk	General	As a teacher here in the state of Florida, I must implore this task force to please pay attention to medical experts. Yes, people are hurting financially, they need to be helped, but sending people back to work when it is not safe is just endangering people in the name of money. Listen to experts, push to make changes that can support people until it is truly safe to begin working again. Dont make people go back to work and endanger themselves, just to increase profits and line the pockets of investors more than front line workers.
Polk	Recreation	Keep small business closed at least until June.
Escambia	General	The state should open back up not just for economic reasons but for health and well being. People locked down is taking a toll on basic health, not being to get out to exercise, but for mental well being. People are social creatures and being confined breaks down that barrier and creates greater depression.
Brevard	General	LIVES over money!
Okaloosa	Tourism	We are highly encouraging you all to please open vacation rentals with no additional restrictions. We are a respected self regulating industry with impeccable standards. Further, the market will respond appropriately in regards to consumer confidence. We have unfairly suffered as hotels have remained open. Thank you for your consideration
Pinellas	General	Testing - that is the only answer. Let's do what South Korea did. Let's invest in testing. It's the only sure way to resolve this - test, isolate and quarantine - test some more until there is a vaccine, then make sure it can be mass produced
Flagler	Government	I would wait until June to see where we are then. I think we should make sure there is not a wave coming plus see what happens to the states that open sooner.
Palm Beach	Recreation	PLZZ RE-OPEN THE DOG PARKS IN WEST BOCA (BURT AAROHNSON REGIONAL PARK). PEOPLE WILL DISTANCE THEMSELVES AND THE PARKS ARE LARGE ENOUGH TO ACCOMODATE THAT. THX!
Pinellas	Healthcare	I truly believe we need to reopen with a phased approach as soon as possible. All areas of the economy are suffering, not just restaurants and travel. For example the lack of elective procedures are having a huge negative impact on healthcare providers and hospitals. The economic impacts on many will be far worse than the impacts on COVID-19. Unfortunately, we will not see many of those for months or years to come. It is time to open up at least parts of the state for everyone's well being.

AMERICAN OVERSIGHT

Duval	Government	PLEASE re-open the DMV for Florida. I have been waiting since February to have Title transferred to my name in addition to Tag transfer. Also, I am anxiously waiting for Nail Salon to open. Please take these requests into consideration.
Pinellas	Recreation	Thank you all for your Hard work. On May 1st Please open the Beaches for exercise in the am and pm for locals only . Do Not open the beaches to for sitting UNTIL Memorial Day weekend is Over. Then to locals in small groups. If Sun light kills the virus and is good for mental health. PLEASE allow us to walk on the beach . Thank you.
Pasco	General	Many localities in Florida have minimal cases of the virus and should be completely opened. Citizens can take responsibility for themselves to take precautions for staying safe.
Polk	General	Thank you for this opportunity. As businesses open and employees are called back to work, what consideration will be taken for those whose children are normally in school, daycare, or after school programs, that will now affect their ability to go back to work? If they have no one to watch their children, they could be fired for not returning back to work? There is so much more than to just “open up”. How people have to readjust should be carefully considered.
Lee	General	Please do not make any decisions that will impact the seniors living in the state - do not open places that do close contact like nail salons , hair salons just yet - as much as I want to get my hair and nails done, it is puke be reckless to allow right now. You can open things like retail stores with curbside delivery and offices with minimum peopl working. We have stayed in quarantine for so long a few more weeks won’t hurt but could do actual damage if populations jump right in! Rather take opening slow and steady then jump in with two feet. If we have a huge spike in cases then we have done all this quarantine for nothing and we are not getting younger! As an aide my husband was 85 on April 23 and a group of our friend drove by honking their horns and left signs ! It was actually one of his best birthday present s!!
Broward	General	Need to open up all stores and restaurant's to lower capacity.. Keep in practice social distances. Until someone has come up with a vaccine.
Pinellas	Government	I want you to start re-opening the state. It is time
Volusia	General	Keep small business closed at least until June.
Hillsborough	Retail	So I have a auto immune lung disease called Sarcoidosis. Had it diagnosed since 2000. Don’t worry. Most people with this live a perfectly normal life span. I know at least one lady that is in her nineties and has this. Not contagious. Actually, they do not even know what causes it. 70% of the time, it goes away on its own. This makes me one of those higher risk folks if I should get any flu, but yes, this one in particular. So that means I might need to take precautions. But the solution is not to stop you from working and protecting me. It is my responsibility to protect myself. So, go back to work, and I will do what I think I need to do. .
Osceola	Management	I believe we should not open. We should give Atleast 2 more weeks to reopen.

AMERICAN OVERSIGHT

Orange	Tourism	I want to make sure the public & tourists are held to some kind of enforceable standard in locations like malls, attractions, theme parks, entertainment destinations, etc. I will not feel comfortable if the business is not able or willing to enforce that individuals follow social distancing guidelines, the need for face masks, etc. I am nervous of the members of the public that have not taken this seriously, and I fear those individuals will be the most lackadaisical visitors once entertainment venues are reopen.
Orange	General	We flattened the curve now feather it. We cannot let the cure be worst than the disease. My dad was kicked out of the house in 9th grade during the Great Depression for lack of food. Death and misery from a depression might be much worse than COVID 19. Keep up the great work and push to keep our economy open as much as possible.
Indian River	Healthcare	I do not feel we should be reopening the state. As an "essential employee" myself I still don't feel comfortable around others and we have hundreds of new cases a day. If we reopen everything that is going to go way up from everyone being exposed to one another.
Escambia	Retail	While I understand the economic impact this virus is having on everyone,as an essential employee we are exposed everyday working in the retail industry. With the number of cases still going up throughout the state and here 8n nwfl, I don't understand the reopening of the state. Ppl still are still out and about because if Bordem. I get that. But I feel the virus is and will be a larger issue in nwfl if Florida ooens completely. There still needs to be measures to protect us.
Martin	General	As you consider opening Florida please consider what we have already gone through and terms of loss of life and difficulty. It would be imperative if we were to open the state for every single individual to wear a mask except when doing solitary exercise or walking in an area where there will be no other human contact. I have a second home in California and there everybody has to wear a mask. Everyone in every store and every gas station wears masks. Here in Florida the people have failed in that regard because it's been left as an option. I also think strict measures at our beaches would have to be enforced so that large groups do not get together and began a second surge of infection. Nursing homes would have to be even more careful than ever if the stay-in-place order is lifte. I hope you are considering these very dangerous factors. Jobs and the economy can be rebuilt but lives can not be! It would also be critical to test many more Floridians and begin tracking the infection rate much more thoroughly.

AMERICAN OVERSIGHT

Broward	General	I think no matter what is decided upon, once businesses and locations start to open back up Floridians will go out in masses, not sure how to combat that, but no doubt that should be addressed. Unfortunately, we live in a world where not everyone listens and abides to the rules. I would like to see beaches and parks opened first. I would support limited hours and their use for EXERCISE ONLY to start which keeps people moving, and not for sunbathing or picnicking where larger groups would gather. If hair salons, gyms and tattoo parlors are to open first then all retail stores/businesses should open at the same time - that makes more sense. More importantly, the supply chain needs to get back to normal. Too many products out of stock everywhere - maybe put a 1 per person limit on everything everywhere until that happens. Lastly, I want to thank everyone for managing this crisis as well as you all have. I have been in agreement of the stay at home orders from the start and doing my part. So thank you very much for keeping us safe.
Pasco	General	RE OPEN FLORIDA
Pinellas	General	Would like to wait a couple more weeks before gradually reopening.
Osceola	Professional Services	I think Phase 1 should begin May 1st. Get small businesses open before its too late. It's unreal that large box stores can be open with 100's and 100's of customers and the salon I work in with less than 10 people counting clients cannot open. We are willing to wear masks and take safety precautions to be safe but it's unfair to wait and cost us our livelihood. I feel if people are afraid to go out let them stay at home. For the rest of us give us back our life, liberty and the pursuit of happiness.
Volusia	Education	No cases are going up here in Volusia it better to be safe
Pinellas	Tourism	Leaders in Florida need to seriously consider restricting non property owner vacationers/tourists . Once Florida opens there will likely be a surge of non property owner vacationers/tourists from hard hit NE states. I truly believe this will likely be a big problem with repeated coronavirus case spikes.
Flagler	General	Please keep the state closed for atleast another few weeks! It is such a mistake to reopen this soon... my family will not support this at all... You are signing 10000s of folks death warrant!
Osceola	Recreation	Keep small business closed at least until June.
Hillsborough	Education	I personally still do not feel safe to go to work and/re-opening of including the impacts to small businesses, healthcare, education, tourism, agriculture, retail, recreation and sports and construction.
Pinellas	Healthcare	Do nor open up Florida..
Indian River	Healthcare	I work as a oral surgeon assistant in Indian river county my concern is how safe are we with reopening when me and many other assistants have to perform surgeries along side the doctors for sometimes 4 hours on end. We don't feel safe having to go back into this kind of environment where there is no option for us to social distance and that's second to the fact that the mouth is one of the dirtiest places to work on in general we don't have an option for a patient to put a mask on either. we are scared for our lives and don't want to be forced to go back to work and chance bringing something home to our family for an ELECTIVE SURGERY. NOT MANDATORY!!!!! Please listen to us !
Sarasota	General	I feel safe enough for the Quarantine and the lock down be lifted. Let's reopen FL!

AMERICAN OVERSIGHT

Seminole	General	I feel that the “stay at home” order should remain in effect until at least May 31, if not longer. I fear that many people think once the order is lifted, the virus will be eradicated and they can return to the same habits and lifestyle they were living prior to this crisis. if they do so, we will see an even bigger outbreak than we have now and all the sacrifices we are currently making will be for naught. Why should my family be put at risk by the selfishness of others who want to get a haircut, their nails done, go shopping at the mall, or just get out of the house because they are bored. I think that the majority of people who want the state reopened want their selfish nonessential needs met, not so that they can go back to work to provide for their families. There are too many asymptotic cases out there, too dangerous. Please act quickly to close when next wave(s) come
Lake	General	Good afternoon, my suggestion is that for essential workers who have been on the front lines at grocery stores, pharmacies, and general places outside of the medical field be rotated with those who active and willingly want to work in there place giving individuals a break and also allowing them to be tested. Mandatory washing stations for proper cleaning with sensors for hand soap, doors, and hand drying be emplimented in all open establishments. Social distancing has to remain at the for front but young individuals who have or will graduate college should be encouraged to take advantage of delivery service positions to better serve the community as a low risk. Masks should be mandatory and those without masks can be refused service. Hair salons and grooming services are by appointment only after acknowledging that they have not had flu, covid, or exposure to either. Workers must wear masks and gloves and customers the same. All food and groceries must remain curbside and delivery for another 30 days. Hotels reopen in select locations heavily monitored for covid 19 symptoms reserved solely for families who experience hardship due to disaster and temperature checks implemented upon reentry. Local events like basketball games and soccer games open to players and select audiences no more than 1000 socially distanced among stadiums for first 3 weeks of reopening. Janitorial service workers should be contracted by the state for cleaning of commercial buildings to lighten the load of essential worker . This should all be monitored over a 30 day period. Lastly for medical services. Telehealth should continue but dental workers and vision care should be on a need basis. Food assistance programs should be established closer to hurricane season.
Brevard	General	I know we have to be cautious but we must open small businesses. People need to work. Please open beauty shops.
Volusia	Recreation	Sunbathing with social distancing please reopen and allow for this

AMERICAN OVERSIGHT

St. Lucie	General	I am asking that first the beaches be re-opened, secondly the parks and pickleball courts. I am a fisherman that mostly fishes on the beach and by its nature there has to be distance between us so are lines do not cross. 20,30 feet or more. Also the pickleball courts where you are also distanced by the nature of the game. So many of us have had our rights trampled by these blanket rules that don't make much sense. Another insight is the fact that this virus has to run its course through society, it has to happen and it will happen, we have no way to stop it, only slow it down. Protect the elderly, sick and unhealthy people. That should be the focus.
Flagler	General	Florida has to open up eventually. So if the govenor decides to open up May 1st or so then atleast make it mandatory for people to wear masks and still respect social distancing in stores. We live in a tourist state so we are going to be getting travelers from everywhere to come here. I also work in retail and we all know once stores open people are going to shop and flood the stores, which I'm sure that's what the governor wants for the economy and for businesses but that is going to be unsafe for all of us especially because most people do not take this seriously. So just put some serious rules in place like New York and other states have!
Sarasota	General	Keep small business closed at least until June.
Brevard	General	florida in not ready to be re-opened. it would just set back the progress we have made. And out of state people with come and bring more cases. LIVES BEFORE MONEY!
Pinellas	General	Offer tax credits to every company that keeps their workforce working from home and online Reduce occupancy limits for any company that runs "cube farms" where employees perform work that can be done online to reduce the chances of another pandemic spreading. End state and local taxes on internet service Reduce regulation of internet service allowing more providers to enter the market Wave workers comp for every employee that a company keeps working from home and online Expand online schools (charter, private, public) so our kids will never go without a quality education whenever another disaster strikes End city and county licensing requirements for any self-employed/home business that works online
Volusia	General	Hello, my name is David Baldauff I am a resident of DeLand Florida, my suggestion is to allow all mom & pop businesses including bars & restaurants to reopen in a safe and responsible way. Because in deland most of our restaurants & bars are independently owned and operate on shoe string budgets so let's get back to work.
Sumter	General	Re-open all businesses, advising the vulnerable to stay home. Too much damage is occurring to the economy. Considering that most people will survive the virus, we are sacrificing the economy for a small minority that can stay home.

AMERICAN OVERSIGHT

Orange	General	Open May 26th, 2020 or June 1st. Get one major holiday out of the way so there will be no large gathering to celebrate. Open all boat ramps. Keep the islands closed that everyone hangs out on, but people should be able to go fish or take boat rides.
Broward	Professional Services	I am basically a one man operation as a nail technician providing hand, foot and nail care for men. It is a service that many men require to maintain the health and integrity of their hands, feet and nails. Some cannot reach their toenails or have ingrown, calluses, diabetes, neuropathy, fungus etc.and maintenance is required to prevent bacterial and other infections. At minimum small business where there is one customer at any given time with all safety measures should be allowed to open. Risks are minimal and these are . My services are not for cosmetic but more for health reasons. There should be a mechanism for businesses to apply for exceptions otherwise there will be a lot of business closures. I will reemploy my employees at the right time but I have to pay the Bill's and be able to get food etc especially when no signs of any stimulus money, UI, PPP. We are being failed by the system. Other countries like Canada have successfully implemented procedures that work smoothly .This a failure on government. However, I applaud this ser up of a task force and getting public input. Thank you to our good governance in our State by our Governor.
Orange	General	Just don't open until it's safe, if you are going to open up give people the option to either work or stay home and collect unemployment until it's safe for us to work, a lot of us have immunocompromised people at home, and by opening too soon people like me are going to have to make choices of sacrificing our selves and our family to covid or going back to work for an hourly paycheck. fix unemployment we all pay for it, I have been paying for it since I started working in 2007 and I have NEVER used it I have never been with out a job and now that I need it, it's not working! My husband has also not been able to work his grocery job because it's not safe, his mother lives with us and she is HIGH RISK, and still no unemployment we have been with out jobs for a month. You guys know it's not safe better then we do, make the right choice please.
Broward	General	I am a nail salon owner which 30 nail technicians in Fort Lauderdale. I think it is too early to reopen business right now. I have talked with my technicians and other nail salon owners, Due to the nature of our business that requires touching our clients and gathering of staff and clients, we are all worried to work at this time. I believe the coronavirus cases will increase really fast again if we reopen now. There are plastic shield which can be installed on manicure stations. Unfortunately, those will not help to stop the spread. Nail salon is not only about manicure, there are also pedicures station and waxing room. Also, all nail salons have a very small rest area for technicians to share to eat and rest together. The health of our technicians and community are the most important. Hope you can make right decision to hell us go through this pandemic. Thank you for your hard work.

AMERICAN OVERSIGHT

Pinellas	Tourism	Let's follow the science. Covid 19 doesn't seem to like heat and sunlight. Getting people outside in the sun will be better for their health. We can still social distance, and wear masks where appropriate. Also, swimming in condo pools, which are typically chlorinated, is a safe and healthy activity. Please allow our beaches and pools reopen. Finally, it is time to allow visitors to returns to our lodging options.
Volusia	Management	It is my concern that the cases in my county have not subsided and continue to grow . Unfortunately people haven't taken this seriously in the 1st place and should we open people will absolutely disregard the social distancing recommendations because they will think it must not be that much of a threat if the government is willing to open back up so soon while there are cases of infection still being reported. I lost my Father to the Coronavirus and had someone say to me "oh it's really real I thought this was just a scam" those words hurt so bad because we are losing so many people and there are those who still think it's a joke and are not taking the proper precautions! Its because of them that we will continue to grow in infection numbers please do not open back up till we truly know how to battle this I cant keep losing people I love!
Polk	General	I would begin to lift restrictions as of May 31st by removing the "stay at home" ban, but keeping the social distancing plan in place. Open smaller business (salons & gyms), as well as beaches, restaurants and clothing retailers to open and allowing 50% capacity at a time. Allow dentist and doctors to go back to normal practice allowing small capacity in the waiting area. In 30 days (June 30), open smaller attractions (Gatorland, Fun Spot, LEGOLAND). July 15th - August 1st, (if all is well and CoVid-19 cases continue to fall), open larger attractions (Disney, Universal, Sea World etc.) The larger attractions MUST be last. These draw the most Foreign tourist and will have the biggest impact on spreading the virus if we open too soon. I don't believe we've had enough of a decline throughout the world to safely open these places yet.
Hillsborough	Education	I personally still do not feel safe to go to work and/re-opening of including the impacts to small businesses, healthcare, education, tourism, agriculture, retail, recreation and sports and construction.
Orange	General	Please reopen all community parks. The mental well being of our children even as young as 2 is declining. We need access to our playgrounds for so many reasons. We can even create more janitorial jobs for someone to sanitize the playground 3-4 times a day. We should install purrell stations at all playgrounds in the future as well. Also companies should not be cutting pay for those in the frontline. My husband is a physician assistant who is staffed by a company named envision health, they cut my husbands pay by 10%. This is a stab in the back to someone who works in the ICU with limited PPE & now limited pay. Not asking for more money, but it should be illegal to cut the pay of medical field employees amid a pandemic.
Brevard	Management	I'll be comfortable opening up when we have achieved 100% testing and have a contact tracking system in place. Until then if they open we won't go.

AMERICAN OVERSIGHT

Hillsborough	Management	Good afternoon! I am a restaurant manager who has been working since this all has started, let me explain to you the importance of keeping it closed for a little bit longer. I go to work every day and still work with my staff and talk to guest. I don't know where these people have been but I continue to serve my community, with the hopes of not bringing it home to my family or mother in law who lives with me. My husband also works at all children's in st Pete and they have had zero cases and I would like to keep it that way. We are getting caught up with the idea of having money flowing again and being "normal" and trust me I get it, my restaurant is losing money everyday, employees who don't have income, but I want to be safe, I want my staff who has been working hard to stay safe. We didn't get to be home with our families and be safe. Testing more is bringing more people with it and it is scary! Please keep My staff and I safe, so we can continue to do our jobs for our families.
Polk	General	We need to open up Florida. Studies show that immunity builds with social interaction.
Seminole	General	First of, I would like to thank the Governor and mayors and other authorities in Florida for keeping us informed in an honest and open way throughout this epidemic. I really appreciate and feel safe because of how you handle it. Secondly, regarding reopening state: I am not opposing the idea. However I have asthma and so far I have protected myself from getting the virus following guidelines and I plan to do so until a cure for it is found, since I am afraid of the consequences of me catching the virus and my respiratory system may or may not fail me and kill me as a result. Therefore I request authorities to keep people like me in your mind and make decisions for us as well as majority of people who are healthier than us, so we would not lose our minority voice among the population. For example for my job, I have been teleworking and have been productive employee. I would like to have a choice on whether to work in the office or keep teleworking when my work opens up. I would not want to lose some of the conveniences such as special hours of shopping for people who are at risk at the grocery places or food delivery services or having my delivery left at my door without me interacting with the delivery persons. Please consider these during your decision making. Having enough hospital beds is good however no one can guarantee that IF I get sick that you can save my life if I end up in the hospital because we don't have a FDA approved cure for it yet for hospitals to use for my therapy in the hospital. So please provide us options to choose to decision how much risk we would like to accept in our regular life as the cure is trying to be found. And please make it public when the cure is found so we would be aware and know exactly how to get it so we don't need to worry anymore. Thank you for giving us this opportunity to provide our input.
Hillsborough	Construction	I think it's too early to open up.

AMERICAN OVERSIGHT

Hernando	General	Hello my name is pastor Amy Byerley. I am the senior pastor of Brooksville Church of the nazarene. In my opinion we should wait another month before opening. Wait till June 1. The cases are increasing and I'm worried about the people of Florida. Churches have a lot of elderly. If and when churches reopen I think we should start off with 20 people and that's if we can provide social distancing. We can do that by easily removing chairs and keeping the seating at 20. Then over time slowly bringing in more congregants. I would love to have all church people show up. I love being with my church members but right now what's more important is to keep everyone safely. And that is loving your neighbor. I also think that we should just limit ourselves as a church to worship services only. Then gradually introduce Sunday school classes, children's activities and youth activities. I would love to help in any way I can. God bless Pastor Amy
Orange	Accommodation	Under the current stay at home order, workers who fall into the low socioeconomic class are currently at high risk for infection due to the nature of their occupations. Those include people who work in customer service and the food service industries. The large corporations that they work for do not provide their employees with enough masks and gloves to authentically protect their or their customer's health. In doing so, it only creates a faux image of safety while lying to the parties involved, stating that it indeed protects them against infection. I feel that a new policy must be in place to ensure that those workers are provided with a necessary supplies to ensure a safe working environment void of cross-contamination. If a big corporation wants to stay open during this pandemic, they must provide a safe working environment for their employees. Otherwise, they are clearly putting their profits over the lives of their customers and employees.
Hillsborough	General	I think Florida it's not ready for open yet. Everyday we have more cases and people died. just as many people do not realize how serious the situation is. But the government is only do what most people think. that is why nothing will come of it.
Pasco	General	Thank you for all you're doing to open our state. We all know the hit it's taken in every area. It has absolutely nothing to do with me as I'm retired but "the state" really needs to dump it's current tech people and purchase or develop a site for unemployment that works! It's just terrible and a total embarrassment to the citizens that live here what these people are going through and totally uncalled for. As a senior I would love to see the parks and beaches opened. Restaurants with perhaps limited seating; disposable utensils wrapped in cellophane as some fast food places have, "to go" paper menus as many have, better cleaning habits for restaurants. I pray for all that have these decisions to make. Thank you again for what you're doing and for asking for our imput.
Seminole	General	Please follow White House guide line for each phase. Re-open only when Florida cases decline for consecutive 14 days.

AMERICAN OVERSIGHT

Duval	General	WE SHOULD NOT RE-OPEN FLORIDA ! IT IS STILL VERY EARLY FOR US TO BE BACK IN THE PUBLIC, WHICH INCLUDES RETAIL STORES ,TRAVELING,VACATIONING AND ETC. THIS IS A DEADLY VIRUS THAT IS KILLING OUR COUNTRY AND IF WE CAN PREVENT IT AND STOP THE SPREAD WE NEED TO DO THAT . Why DO WE NEED TO RE-OPEN AND PUT EVEN MORE CITIZENS AND KIDS AT RISK . PLEASE PLEASE PLEASE DO NOT RE-OPEN FLORIDA . WE NEED TO STOP THE SPREAD AND SAVE OUR PEOPLE. LETS MAKE THE RIGHT DECISION AND REMAIN ON A LOCK DOWN . PLEASE PLEASE PLEASE DO NOT RE-OPEN . THIS VIRUS IS VERY VERY VERY DEADLY . THE HOSPITAL WILL BE OVERWHELMED IF WE MAKE THIS MOVE OF RE-OPENING FLORIDA . PLEASE PLEASE DON'T KILL US !!!
Hillsborough	Education	I personally still do not feel safe to go to work and/re-opening of including the impacts to small businesses, healthcare, education, tourism, agriculture, retail, recreation and sports and construction.
Pinellas	General	This shutdown is causing more harm that good. The state of Florida can not afford to stay shutdown. We have small business owners such as barbers and hair stylists that live off the income they make as that is their only source. We do not get unemployment because we don't qualify. How do you expect families as such as these ones to live through this? We have had all our rights stripped from us. Including access to the beach which is an escape for many with mental illnesses to find peace when they need it most. It should be up to us to decide whether we want to quarantine or get back out into the world. My children are suffering from this as well, being cooped up in the house the behavior of both of them has changed significantly not being able to enjoy being around their friends, let alone learn is the social setting they are supposed to be in with the ones that are best qualified to give them an education. Us parents are making this time the best positive way possible, but for how long that may last if the state is not opened back up soon? I recommend restaurants have a capacity limit, I recommend people be able to go back to the beach in groups less than 8 while maintaining social distancing. I recommend we work our way back to where we were before all of this. There will not be a cure or vaccine for 18 months, and we people can not make it through 18 months of quarantine. The virus will be back just like the rest but we have to make a decision, we hide from it or we accept this for what it is and give us the RIGHTS WE HAVE WHICH IS TO MAKE OUR OWN CHOICE AS TO WHAT WE DO IN REGARDS TO KEEPING HEALTHY.
Hillsborough	Retail	Fix the fucking unemployment issue and backlogged cases. Finish helpining those they are already impacted and fuck the whole "open back up thing." you can open back up when people stop getting sick and stop dying, that's how you'll fucking know. I have completed the unemployment application, on the mobile friendly version you had to launch because you can't even run a regular government website correctly with updated code, and have yet to even be notified that the application was received or submitted, let alone processed and this was week one of April. Just in short, just fuck fucking off.

AMERICAN OVERSIGHT

Manatee	Government	Reopen everything but with guidelines in keeping with the six feet of social distancing gloves mask and few people in public areas like the stores grocery stores just allow a few people at a time a few people is better than no people for businesses. And make sure you tell businesses that they will be penalized for Public Health risk if they have more than 10 or 15 people in at a time This is new for this generation I know some of the older people are saying that it looks like the depression but it is new to most of us so I hope you all are remembering that whether you are rich middle-class or poor that this happened to everyone and that we are Kinder and gentler to one another in the days and years to come.
Pinellas	Professional Services	Please allow pet grooming to reopen. This can be done with minimal human to human interaction. Mobile groomers take animal at the front door straight to their vehicle, easy to do safely wearing mask and gloves. Groomers with storefronts can easily walk out to vehicle to get pet, wearing mask and gloves. Pet grooming is a health issue for the animal, not just about beauty. Nails need trimming, ears and teeth need cleaning, and in case of non-shedding breeds, hair MUST be cut to avoid matting and skin damage. Groomers are for the most part low paid self employed people who can safely go back to work without endangering people. Thank you.
Citrus	Real Estate	Please do not open the state until it is absolutely safe to do so.
Orange	General	I work in the retail industry in Orlando, FL. I have worked in the industry for fourteen years and am proud of the work we do. However, I know better than anyone that if we open too early, then I will feel responsible for my staff and customers. Experts everywhere agree it is too early to open and I live in constant fear of going back to work and then bringing home COVID-19 to my older parents, who watch my dog when I am working. As there is not a single doctor on the committee to reopen FL, I fear that money is more important to the governor than people's lives. The best thing to do is to remain under lockdown for as long as the experts say. And maybe the governor can focus on fixing the unemployment system instead of killing Floridians.
Santa Rosa	General	America has learned a valuable lesson. People carry germs! Wash your hands, don't touch your face, and cough in your elbow. These are all basic infection control procedures that have now been emphasized to the public to maintain a healthy interaction with others. Let's all be conscientious of this so we can open our economy and start the recovery process of our great nation.
Broward	General	Keeping the beaches and outdoor spaces closed are going to make people more vulnerable to the virus than opening. We need sunlight and exercise to keep our immune system strong. High risk individuals should continue to stay home and send healthy people back to work!! Fear has been instilled in the community and we need facts and numbers to show the virus is not the dangerous sickness we thought it was. Proven by asymptomatic people, and those testing with antibodies to show many more people had it than we even thought.

AMERICAN OVERSIGHT

Duval	General	I believe we should have already been reopened and we need to get things back to normalcy. The only way to do this is to open again like Georgia did. Someone needs to look into all the deaths that have occurred due to having to be shut in, such as the Kennedy family. There are going to be more and no one speaks about that. Both the mother and son would still be alive today if their state had not enforced a lockdown. Also, the ramifications from mental and physical health decline from not being able to go to gyms and exercise like before and have a healthy everyday lifestyle will be substantial. So more lives will be lost in this respect and will likely surpass the number of lives lost to the virus. This is something that needs to be addressed as well. Child abuse and domestic violence and the loss of first responders' lives handling these calls have increased and will continue to rise of the stay at home orders are not lifted. Why is no one looking into all of these numbers and making charts? Truth prevails.
Citrus	Tourism	Everywhere, I read the suggestion of taking people's temperature wherever you go, theme parks, restaurants, etc. Really this is a joke. Research shows that people are more contagious before they show symptoms of Covid-19. Therefore, even when people do not have a fever, they can still spread the virus. This is how people contracted Covid-19 on cruise ships and theme parks and they did not get sick until they got home. Instead of checking people's temperatures at the parks, maybe we can use the antibodies test. These are supposed to show whether people have antibodies, have the virus, or do not it at all. I am one of our many Floridians who have Disney and Universal annual passes and is an avid cruiser. If you tell me that you would open the parks tomorrow without making any adjustments and I would have to sign a waiver, I will be there to spend my money.
Pinellas	General	I'm getting ready to move to largo Florida may 2nd in with my mom and dad. We aren't ready to open yet..please don't yet.. I'm Deana I'm on social security disability.
Sarasota	Recreation	I don't understand the opening of Siesta Key beaches and Longboat key beaches while leaving Lidi key beach closed?? We are all Satasota ounty and the excuse that there are more cases here is ridiculous.... I walk to both Longboat and Siesta ,,,we all shop in the same stores ???? I understand Manatee has more issues which again includes parts of Longboat but yet they are open..Again, I get it it if all are closed but to leave the middle one out doesn't seem to make any sense..... Thank You.
Orange	General	I don't believe we need to re-open Florida until health officials deem it safe.
Broward	General	Please open playgrounds, golf, beaches and salons. We need to get out of the house. We need to exercise, we need to play and we need to feel good about ourselves again. People who are worried can stay home.
Hillsborough	General	Please open the state and end the media made crisis. Encourage vulnerable to continue to shelter.
Clay	General	Please open our state. Too many people are hurting not being able to work. The people who are saying its too soon are sitting at home being paid until its over so it doesn't affect them. We cant stay closed any longer than may 1st. Our world may never recover. Please Mr.Desantis. Please.

AMERICAN OVERSIGHT

Sumter	Healthcare	Despair. That's what delays in "elective" surgical procedures means to people in pain, especially those whose conditions mean that delays today in treatment will rob them of future life expectancy. Despair. Folk who have had their surgeries cancelled hours before the first stop order have since been on a medical roller coaster, seeing their procedures scheduled and then cancelled again. The hope of relief from pain and related problems gets crushed by successive indefinite "governmental schedule changes," inflicting emotional agony on top of the physical harm. This "for the greater good" malarkie can only go so far, especially if it's intended to placate the general public. Hours before their scheduled surgeries Joe Everyman who can't walk due to pain and Jane Everywoman with severe gastrointestinal problems are told their surgeries are now "indefintely postponed" and need to to "suck it in" for who knows how long, but "Tommy John surgery" for major league baseball players with multi-million dollar guaranteed contracts is considered "essential" in Florida. I guess making sure 30-year-olds can throw a 100-mph fastball is considered more "essential" to society than average folk being able to walk, sleep pain-reduced or the like. The celebrities don't seem to have to live with the unknown "if or when" our health care system can give relief, as they seem to qualify for "wink, wink, nod, nod" exceptions to the restrictions placed on the rest of us. The "you can wait a few more days or weeks" concept because there may be more COVID-19 cases which need hospitalization gets lame when one looks at the numbers and sees the suffering folk in pain endure up close and personal. We're not talking about wanting face-lifts or liposuction, but real, honest-to-God pain and suffering. COVID-19 is bad, but causing extended physical agony and emotional despair to those with conditions as bad or worse than COVID-19 is downright cruel. Yes, folk can die from COVID-19, but folk also die from what they can't get now out of the fear of COVID-19.
Hernando	General	Thank you for allowing input. Hernando County has 86 cases with 3 deaths. I think moving to Phase I reopening would be good for the residents of the county - if they are low risk. Encouraging high risk residents to remain at home would be appropriate. Opening Outdoor restaurants with social distancing would be a welcome relief and allowing social distancing with hair salons would be much appreciated. I think encouraging use of masks in grocery stores and retail is a good idea. My son and wife live in Hong Kong and truly believe the masks in crowded areas has positively impacted their numbers. We need to restart the economy and get people back to work or I believe we will see more health related issues other than the virus. We need to take some positive action and give Fl residents hope for the immediate future.
Flagler	General	Please dont risk my families life for a dollar... please keep Fla closed atleast til our numbers start dropping.... dont sign our death warrants

AMERICAN OVERSIGHT

St. Lucie	Healthcare	COSMETIC SURGERY. when you reopen electives, this will include a massive influx of cosmetic surgeries. You said at the Cleveland clinic task force meeting today that when you speak about electives that you don't mean "like cosmetic surgeries " but those are a huge amount of the types of electives that will influx to our offices, surgery centers and hospitals when you allow electives. Are you going to prohibit certain kinds of electives? . I work in plastic surgery and we have patients begging us to open. Also, how will you insure that the hospitals aren't overrun ? Will you limit the amount of procedures allowed per day ? Cataract doctors will easily do 30 cataract surgeries in one day with an entire pre op area full of these patients for just one doctor. They are 15 minute cases so they are filling the waiting rooms and pre op areas . How will you prevent that kind of congregation? We all want to return to work but do it safely. How will this work ? Simply reinstating elective procedures is too broad . Hospital admissions are down because we aren't doing electives. Those numbers will shoot back up once we restart at an alarming rate. Not just covid patients - but the normal influx of admissions associated with the volume of patients recovering from electives and their complications.
Polk	General	Keep Florida closed!
Hillsborough	General	There should be no re opening atleast until August or September, its better be safe then sorry. The goverment needs to supply people without bank accounts with cards to put money on and supply sed mony until August or September to keep the economy going
Volusia	Information	Dont reopen until were sure we wont get this virus. Stay closed until 100% safe and no risk.
Pinellas	Food	Start phase one now and open the beaches. People are left without pay and need their jobs. Those who wish stay home can.
Seminole	Education	Leave decisions up to scientists and medical professionals.
Charlotte	Education	As a special educator in the public school setting who works with preschool children with various developmental and language delays I would encourage a class size limit moving forward. These students require a level of close contact with their teacher and peers, lack an understanding of social distancing and will need constant adult support to maintain rigorous hygiene routines. In addition many students are non-verbal and are unable to share that they are not feeling well or someone at home is sick. Prior to the school closure I had 14 children enrolled in my classroom with two more slated to start when school returned from spring break. Limiting class sizes for these young delayed students would allow better mitigation, sanitation, hygiene and slowing of the spread of various germs. Keeping our youngest most vulnerable learners protected must not be overlooked.
Hillsborough	General	I agree it's time to take a measured, careful approach to reopening the state. Starting with the lowest risk businesses and expanding from there. But requirements such as mandatory masks (by all patrons), hand sanitizer available, nightly cleaning/disinfecting of the business. Also, careful consideration of location---more rural locations are less at risk than congested cities. So start there. And absolutely NO preferential treatment given to businesses with more political clout than others! Do not make this political, or you will lose the trust of everyone and create more chaos. The WWE move was ridiculous.

AMERICAN OVERSIGHT

Lee	Government	Undoubtably the task force has sought the advice and input of highly skilled medical experts in preparing its reports and recommendations to Governor De Santis. It would be better to stay the course and endure a few more weeks of restrictions than prematurely end them, have the numbers start to escalate, and have to revert to even more restrictive practices. I support listening to the medical advisors and a delay of reopening non=essential businesses for a few more weeks, or a gradual transition. It would be helpful if the task force sought information by industry if different types of businesses can really operate and maintain safe practices until testing is universal and a vaccine is available, and available for all. Best practices should be identified for safe practices, standards developed, and adhered to, for going forward, for public health reasons. This should be a centralized function, not county or city, and even all governors of the states could share the best practices and adapt for their own states but not have to reinvent the wheel.
St. Johns	Healthcare	We have sacrificed a lot to get this far. The plans of the diligent lead surely to abundance, but everyone who is hasty comes only to want. ~ Proverbs 21:5 We have Dr Fauci for a reason. We have a Surgeon General for a reason. We have a head of the CDC for a reason. Take your guidance from them...not politicians, not businessmen. A healthy nation is a STRONG nation.
Palm Beach	General	Don't open things back up, they need to be closed for atleast another 2 months or so. People are still testing positive & ecspecially with summer coming up and so many people party and go to beaches its gonna spread like wildfire.
Hillsborough	General	I personally still do not feel safe to go to work and/re-opening of including the impacts to small businesses, healthcare, education, tourism, agriculture, retail, recreation and sports and construction.
Orange	General	Not sure if my comment will be read. But we need to start reopening. Our economy is going to suffer greatly. As a community we need to treat this like any illness and use good hygiene. We can't close the doors to establishments and lock ourselves inside when an illness is spreading. We don't do that for the flu and that kills more younger population than Covid-19 has. Also, we need our dr's to make sure before declaring someone died of the virus to make sure a test was conducted. It's so sad to see ORLANDO and the surrounding cities, communities and our nation in fear. We can't live like this and have our god given personal Freedoms stripped.
Seminole	General	CDC guidelines should be followed exactly as written. Its is what is recommended by the federal government who is overseeing the safety and well being of all citizens. Every phase should be implemented only when all safety measures have been established. Each phase should also not have a designated timeline, only moving into next phase once the risk for exposure, infected cases has not increased. Overall, limiting the number of individuals congregating in one location should still be limited. Travel into the state should also be limited.

AMERICAN OVERSIGHT

Brevard	General	Personally I have confined myself to home since March 15th. As a senior citizen I couldn't wait for the President or our Governor to protect me. The President played it down as nothing and the Governor waited for Trump to tell him what to do: As Florida continues to have an increase in cases I see no ethical reason to open up Florida and spread Covid-19 when waiting several more weeks or even a month for a huge decline in cases and deaths. Personally I'm listening to Dr Fauci who knows more than the President or Governors.. Unfortunately the President has mysteriously omitted Dr Fauci from his recent press briefings. Maybe Dr Fauci is against Hydroxychlorquine, axithromycin and disinfectants as a cure. Carol Ellis
Escambia	General	I believe that we should begin reopening FL. Of course, we should still have guidelines in place, but let small businesses find ways to reopen so they can provide for their families. And please reopen the beaches for families and those who wish to exercise! Of course, no large gatherings or parties, but let families get out into the sand and water for our mental well-being and to let our kids run out all their energy! I believe that we have flattened the curve well, now let's get people back to work so we don't flatten the economy as well.
Duval	General	I believe we need to open FL as soon as possible. There are risks in everything. We simply need to mitigate the risks by enforcing social distancing and washing hands etc. People aren't staying home anyway. So I cannot see the need to continue cripple the economy
Orange	General	DO NOT OPEN THINGS BACK UP YET!!!! We're going to be right back to the beginning again and. This will never go away.
Polk	General	I want the medical professionals to decide when it is safe NOT the politicians
Clay	General	Re-open the state, yesterday!!!!!! As a small business owner and member of our area business association I can tell that we are all healthy and desperate to go back to work. We don't have a gubmint check coming in to pay rent, utilities etc... Alot of our members have applied for the relief checks but NO-ONE has received a dime. Your killing us with the senseless pandemic panic. OPEN UP NOW!!!!!!!!!
Pasco	General	I support only essential businesses being open & doing what we are doing now. I love that the Keys shutdown for one more month. Spirit just canceled my Mom's flight in June to be with me for my birthday. It was the right thing to do. No flights between TPA & ACY in June by them at all. I do not think anything else should reopen until the number of positives stop, as well as the deaths. I know our economy is suffering, but there are plenty of places hiring to keep up with consumer demand (Publix, Sam's Walmart, Costco, BJs & many others). Please keep it the way it is until the number of positives and deaths stop.

AMERICAN OVERSIGHT

Alachua	Accommodation	I understand the concerns for public safety. That's why I understand keeping essential business and services open. Now if other businesses are to be kept closed, there needs to be an executive State and local government decision on waiving(not deferring)essential bill payments. This includes rent and mortgage payments, and utility payments. A stipend should be given to realty owners landlords of apartments to cover expenses. If business do open, then all business operations that don't require physical contact should be open with the same social distancing guidelines. All hair salons, gyms, and other business that perform physical contact services are to open with testing methods for workers and customers who are requesting service.
Manatee	General	Although I am terrified I am unable to pay my bills, opening up the state right now would be a huge mistake. Our numbers are still rising and testing still isnt being done as it should be. Florida residdents are going to be hurting due to unavailable unemployment benefits and those who are out of work. The state should have been shut down completely from the beginning, because it wasnt, it went out of control and isnt getting better. 2 weeks of a strong lockdown as opposed to this months of light lockdown would have made a huge difference. I am one of the ones who cant go out due to health issues. I cannot provide for my family! Opening the state will be a mistake. Also everyone should be wearing masks. EVERYONE!
Leon	General	It's time to end restrictions on people and businesses that prevent them from making a living, and infringe on our rights. If there is no spike from the last months experience of going to the grocery stores and the home improvement stores while practicing social distancing then we've proven that this disease is a paper tiger and we can get on with our lives. End it now. Give us rational guidelines and get out of our way. Put your administration's energy into discovering who has been damaged by the shutdown and target relief to them. I'm talking specifically about the small businesses of Florida who always get the short end of the stick and have had to bear the the bulk of the financial burden during this crisis.
Brevard	General	It is too soon to open everything back up. Testing is not being done as it should be so the numbers are not accurate. I know at least 2 people turned away from testing at the ER even though they had symptoms and contact with positive cases. And with beaches now open, and people in general not taking this seriously, cases are continuing to rise. If we must re-open, it must be done with severe restrictions in place. Anyone who can work remotely: should. Those who can't shouldn't be forced to go to work simply to save the state from having to pay unemployment. There are too many people who are compromised medically who are forced to work as it is. Lives before money! It is time to show Floridians that our government actually cares about the people who live here and not just about money.
Seminole	General	As hard of a time as I'm having to take care of. My family right. I feel that we are in no way ready to reopen we should not even be looking at loosening things up until the end of May. I would rather struggle and hopefully dont become homeless that open things back up right now.

AMERICAN OVERSIGHT

Clay	Government	Please don't re-open Florida yet. It's too soon. If the schools are closed, everything else should be. We need to keep those of us who are susceptible to the virus, who have children & who have elderly parents with health issues safe.
Hillsborough	Construction	Please re open Florida this has gone on long enough. We want to get back to work. If you extend the lock down then you have to fix the unemployment site first. Also, it's not worth ruining the economy over something we can prevent by being responsible citizens. Please give us a timeline and/or criteria to meet to open back up. AND NOW THIS RESPONSE IS ERRORING OUT FOR HIGH TRAFFIC DO SOMETHING RIGHT FOR ONCE!!!!!
Citrus	Healthcare	The profession which has the highest risk of contracting COVID-19 is dentistry. All members of the dental team are at high risk of contacting the virus due to the unavoidable production of aerosolized particulate matter generated while performing dental procedures. Dental offices have been closed since March 23rd. They are supposed to re-open May 11. There are still no standards from CDC or the ADA as to how to safely perform dentistry, and how to equip an office to contain the aerosol. You should keep dental offices closed for all but emergencies until those two agencies establish a standard, and offices must prove they've met the standard. Otherwise, all dental professionals and all dental patients are at risk of contracting and spreading the virus.
Manatee	General	No opening until scientists say so! Staying safe is a PRIORITY!
Orange	Government	I understand everyone is ready for the state to open but we are not prepare for this. As my self considered as first responder we first need to see the numbers decreasing before opening the state. We haven't taken any action on disinfecting the streets. I understand smaller businesses need to open but, most business come from our tourist and we won't have tourist for awhile. How will these small business be able to disinfect their store and restaurants if we are still lacking these disinfecting items at the stores? These items would need to be use after each customer. By opening the state little by little this early will cause more people to get infected and end up dying due to the lack of medical machines. This will end up causing the state to take extreme measurements where the economy in the state will become worst. That will prolong us to go back to normal. We need to continue what we already have in effect. We need more control over this COVID19. I understand the economy is important, but keeping people alive is a priority. We need to understand us humans are the ones that bring the economy up and we need to be safe in order to do that.

AMERICAN OVERSIGHT

Indian River	Healthcare	I work as a oral surgeon assistant in Indian river county my concern is how safe are we with reopening when me and many other assistants have to perform surgeries along side the doctors for sometimes 4 hours on end. We don't feel safe having to go back into this kind of environment where there is no option for us to social distance and that's second to the fact that the mouth is one of the dirtiest places to work on in general we don't have an option for a patient to put a mask on either. we are scared for our lives and don't want to be forced to go back to work and chance bringing something home to our family for an ELECTIVE SURGERY. NOT MANDATORY!!!!! Please listen to us !
Broward	General	I think people should have a negative test band showing name and ID number on their hand (something like the band the hospital use on their patients) valid for a week or so (i'll leave that to the experts) to show before you are permitted inside a restaurant or an event, together with mandatory temperature check, and masks.
Columbia	General	I am appalled that the Governor is so willing to "open" the economy when positive cases and deaths are still going up! I believe that masks should strongly be encouraged if not mandatory. Please do not do this!
Broward	Education	Schools need to be revamped, before opening, by either class size, scheduling or health checks, including vaccines. This is a protective measure for students, faculty, staff, families and the community.
Pasco	General	You need to start re-opening. People are suffering economically. My husband and I have been blessed enough to be able to continue to work, at least at this point, but we feel for those who are not. Sure, it's easy for those to stay home when you have money coming in from a job, government assistance, social security, or rich, but there are those who don't any of this. I am not saying to open up and forget cautions, but let people work. They keep saying the cases should go down for 14 days but how do you expect to do that when more and more people are being tested. Enough is enough already. Open things, limit restaurant capacity, space people out, wear masks, just let things start moving again, PLEASE! It's so much damage for such a small percentage. I know it's serious, but it is not going away as long as we stay in hiding. We are destroying ourselves. People need to work.Thank you for listening.
Pasco	Government	Governor, We are on the verge of losing everything. Please reopen the state now. If people are afraid for their health they can stay home. This is supposed to be a free country where we can choose our own paths. If you go beyond May 1st we will have to bankrupt personally and business. We have laid off 50 employees who are all suffering. If you leave the state closed you are the person responsible for causing more pain, bankruptcies and I believe deaths. STOP THE MADNESS - REOPEN FLORIDA NOW!!!!

AMERICAN OVERSIGHT

Palm Beach	Finance	Dear Team, The moral question of reopening and the effects it will have on our citizens is an extremely tough decision to make. There are many unknowns and the data pool | models are skewed to reflect an inaccurate mortality rate. Unfortunately, I believe everyone will at some point encounter Covid-19 in their life and herd immunity will be our most powerful weapon in the short term. Back in January my entire family became ill with a strange virus. My wife, four boys, and even our standard poodle were ill. We had headaches, sore throats, fever, fatigue, and diarrhea. The sore throats lasted for over five weeks. We thought it was our filters, maybe our cats, and we even procured air purifiers for the entire house. It was a miserable time as we struggled with our daily routines, but we kept moving forward. We remained mentally positive, took our daily vitamins, and continued with our lives. On April 8th, 2020 I tested positive for the Covid-19 antibodies confirming my theory that we had encountered Covid-19 earlier in the year. We also believe that many of your local constituents in Palm Beach County are in the same category of having contacted the virus earlier in the year and have since recovered. The main goal for shutting down our local economy was to not over run our hospitals and give science time. We do not have the infrastructure to support all the high-risk patients encountering Covid-19 at one time. However, we have achieved that goal as hospitals are now prepared for the influx of Covid-19 ill citizens. In fact, many hospital ER rooms in our area are reducing staff hours. I am certain your team is aware. As a local financial advisor, my desire to re-open our community is not one of selfish desire. It's from a fiduciary perspective. It is for the people, our local service business infrastructure that needs the opportunity to get back to work. We will never forget our social responsibilities and we fully understand the risk. Personally, I already work out of my home and can do many reviews online with
Escambia	Recreation	A very large recreation in Florida is bingo halls. There are 7 in my town alone. Are crowds range from 25 to 75 people in most halls are open from 10:30 a.m. To 10:00 p.m. 7 days a week. Since we are volunteer workers we have no so called boss to help us regulate openings and closings. PLEASE PLEASE specifically name Bingo halls in your regulations on opening
Pasco	Information	Do NOT reopen Florida, MUCH of the state is elderly or high risk? WHY WOULD YOU PUT LIVES AT RISK? Disney probs won't even open til next year and you wanna open a tourist state? Do not truck in all these infected people to our state. Y'all know your only caring about $$$$ so just stop and care about the people for a minute damn. I myself still won't be able to leave even if y'all are stupid enough to reopen WAAAY TO EARLY. Stop trying to go against the advice of MEDICAL PROFESSIONALS AND DO JOT OPEN UP THE STATE UNTIL THE CURVE HAS COMPLETELY FLATTENED

AMERICAN OVERSIGHT

Orange	Education	The task force needs to be guided by the scientific and public health experts in any and ALL decisions it makes. Gov. DeSantis must NOT play politics — especially in an effort to appease the erratic and dangerous whims of President Donald “Disinfectant Injections Can Cure Covid-19” Trump — and overrule science or health experts as we move forward. Moreover, the state needs to begin contingency planning for future inevitable stay at home orders, especially regarding supplies for health care workers, funding for hospitals, and protections for all frontline workers. Additionally, the state needs to begin planning for long-term disruptions to all schools and universities by budgeting for increased support for distance learning. All health, education, and other important public service certification programs — whether permanent or temporary — need deadline extensions for 1-2 years as public servants work through this crisis (amidst all the turmoil, do we really need our valued public servants jumping through certification and re-certification hoops when they have a sudden, massive surge in work load changers?). Finally, state business and political leaders need to consider ways in which state taxes can be altered — perhaps on a temporary “wartime” needs basis — to make up for lost revenue. If this state is firing one nurse, firefighter, cop, or teacher at this time so that taxes can be kept artificially low for big businesses, there will be political hell to pay. Likewise, state pension funds must be preserved and protected.
Sarasota	General	First of all thank you to Governor and his team for not panicking and instituting draconian measures. I really think phasing of the opening makes good sense both by location (county) and business or activity. Farmer Markets seems to be something that should get opened sooner rather than later. Many of the small farmers and artisan food people are really struggling. With the outdoor nature of the markets they are more safe than most retail environments. There could be limits set on many people are let in the market and then keep the booths separated more than in the past. People love the Sarasota market and it will have a positive impact both financially and from a mental health perspective. Restaurants need to be allowed to open with reduced seating. The wait staff and the owners of these places are really struggling. I would keep bars closed for the first phase. Perhaps the following week I would loo to expand the openings to include beauty parlors, health clubs. etc. I would think both a different plan for Miami as it is very different than Sarasota. I cannot offer any suggestions on that. People need to be able to reclaim some normalcy so please move as soon as you can with Phase 1

AMERICAN OVERSIGHT

Seminole	Tourism	I work at WDW in Security. I honestly think all theme parks should be last to open as they draw the out of country and out of state visitors the most and can cause a second go around of the virus locally by infecting those who work in this industry and many don't have the money to continue to stay home from being sick. Unemployment is so many weeks behind no one is going to have faith in any other system to support staying at home when work resumes which will cause the sick to go to work.
Volusia	Education	When schools return in the fall provide flexibility and financial support for each district to support their students and families. We will need to decrease the amount of students in a classroom. This might mean having session A and B. My idea would be session A attends school Monday, Wednesday and Friday with no more than 10 students in a class for teacher direct instruction. Then on Tuesday and Thursday those students would work digitally independently. Session B students would attend Tuesday, Thursday, and Saturday for direct instruction. With Wednesday and Friday being the days they work digitally. Kindergarten needs to become a half day program. Half day program for kindergarten is still used in many states (Colorado as an example). We need to be thoughtful and aware that next year we will have many difficulties with health, and fear for students/faculty/families. We need to be proactive and develop a plan early for everyone to make a plan on how to adapt with the many changes our world is facing. Don't wait plan now!
Manatee	General	We will continue to do things curbside through this year. We will not travel and we will not "shop" anywhere in randemly in stores. We will order everything on line. We call in ahead and pay and have it brought to our cars. If the State opens up we will not use services.
Palm Beach	Recreation	Good day As much as I want to be safe and have the entire country safe, it isn't healthy remaining in the house for this length of time. Although I am working remotely from my office, my business has been hurt by this Pandemic. I am sure things will get back on track soon; maybe by late summer, but it needs to get going As for me, I play golf and we were already practicing social distancing at the PBC courses. We were not that close together to begin with. Yes riding in a cart with a fellow golfer has it's drawbacks but they can always let just one golfer per cart. Even golfers that walk the course is already social distancing. Being outside has a huge effect on people especially children. We need to be outside doing the things we are/were so used to. I am a Vietnam Veteran and except for it being much quieter here, I felt safer over there. Strange as it may seem, but I did. Let's get this state and the rest of the country back on track in a safe environment before we all begin losing our minds, please! Thank you

AMERICAN OVERSIGHT

Walton	Retail	PLEASE REOPEN!! I have two retail stores (one in PCB and one in Destin) I employ 21 women. Not one of them have been able to get unemployment due to the Inefficient website. They want to work!! The numbers of Covid are showing that we will be ok! The sales numbers are showing that our businesses will fail. Doesn't make since you keep the store, Target, next to me open and keep my small store closed. I guess you only can get Covid in small businesses?
Pinellas	Food	I am in complete favor of outdoor dining resuming as well as any other outdoor venues as long as some type of social distancing is still maintained. Such as limiting each table to no more than 5-10 people and spacing tables at least 6 ft. apart. I think this needs to happen May 1 to help the local economy and businesses because the weather here would allow those business to regain more of their revenue immediately. It also gives us locals a way to get outside where statistics continue to prove that transmission is nill to none as the overwhelmingly vast majority of transmissions in this country and beyond have been, and continue to be, spread indoors.
Hillsborough	General	Reopen Hillsborogh County ASAP.
Duval	General	Let's be smart, let's be cautious, but let's also be reasonable as we ease back into this in May and get people who've gone without income--or their much needed unemployment benefits--back to work.

AMERICAN OVERSIGHT

Pinellas	General	It is the opinion of health experts around the world that if we reopen too quickly we will see a spike in cases. I believe it makes more sense to listen to people who have spent their entire careers studying infectious diseases than it does to listen to the minority of Florida residents who want to reopen right now and politicians who may be more concerned with the economy than of human health. More than 75% of Floridians are on the side of wanting to keep stay at home orders until health experts agree it is safe. There has not been a steady decline in cases, in fact it's been the opposite, we continue to increase. Please consider maintaining the stay at home orders and have patience on reopening. States likes Georgia are already reopening and if you want an example to look at, wait and see what happens to that state. Our neighbors to the north could see an influx in cases and decide to shut down again for all we know. Give it some more time. This is what your citizens want. Yes, many of us are out of work, so how about distributing the unemployment checks that have yet to go out and offer some additional protections for people struggling to pay bills. We're supposed to be in this together but reopening too soon just shows that we are not. It shows you'd rather please the minority of Floridians who are ok with reopening and you'd rather worry about the economy than human lives and the safety of medical workers. The fact that people discuss sacrificing "the weak" for the good of the economy is sickening, and I hope you will not give in to the people who think that way. I'm a 30 year old woman who exercises regularly, eats well, and is overall healthy but I do have asthma. It's under control for the most part but a respiratory virus could do serious damage. Am I one of the "weak" ones people are ok with sacrificing? At least I know about my health issues and have taken precautions. On the other hand of this, there are close to 30 million Americans who don't have health insurance and millions more are underinsured. Do you think all of them know about their potential underlying health conditions? Even people with insurance don't go to the doctor regularly and may have something that is undiagnosed that could put them at risk of COVID19 complications. And as we've
Brevard	Healthcare	Elective medical procedures and dentistry should be first to go back. We understand infection control the best and provide much needed services for the citizens of Florida
Pinellas	General	It is not safe to start re opening Florida or any other state for that matter. The second the state is opened too early, you will see a spike in positive cases and deaths and those lives lost will be on you guys. Be smart about this people.
Palm Beach	Recreation	If parks and golf courses are opened there should be strict adherence to the "new normal". Also, all facilities should save a supply of PPE that is replenished weekly for employees and the public or they should be mandated to close.
Palm Beach	General	We need widespread testing and contact tracing, to see a decrease in new cases, hospitalizations and deaths before re-opening and coordination with our healthcare professionals (not pushes from corporate lobbyists) .

AMERICAN OVERSIGHT

Pinellas	Healthcare	-Follow the example of Sweden and allow everything to be opened up immediately-- all businesses, beaches and parks, etc. -Encourage continued social distancing and hygiene. -Encourage at risk individuals to continue to shelter in place. -There well may be an increase in COVID-19 cases, however, the benefits of opening back up the economy outweigh the risks.
Orange	Professional Services	Hi I just want to share my opinion on opening up the state. I want to share my opinion as a small business owner in Orange County. I believe we should resume our work once there is major control of this desease, there is enough ppe for myself and my clients, and business owners are in economic ease to continue business. As of now I don't even feel safe to go to the grocery store I can't even imagine working on my clients. My services require me to be in a very close distance to my client's face so in my line of work I cannot have a safe distance between me and my client. As of now I can't find hand soap, hand sanitizer, proper face masks, gloves, disinfectant detergents that my line of work requires, or protectant gowns. As a business owner I have many expences which non of them I can cover since I don't qualify for small business benefits and even if I did the systems are not even working properly. I haven't been able to even file for unemployment so I'm in economic disadvantage to get back in business. This is not our fault we didn't provoke this. Getting us back to work right now will put us in a very fine line to close down.
Pinellas	General	Open up now. It has to be done at some point. People know how to stay distant and wash their hands. People who are too afraid to come out can stay home. Our economy needs to start.

AMERICAN OVERSIGHT

Flagler	Administrative	Hopefully this protocol guidelines will help communities deal with the start up and limit exposure to communities not currently affected by high number of active exposure. I think each town should not be open to out of town workers to or from a high epicenter. For FL it currently maybe be Jacksonville, Tampa, Miami and Orlando. If people want to work there they should relocate or arrange work at home. Maybe allow sublets or housing exchange allowances. Each town needs to be accountable to fend off the virus until numbers are a certain standard as ? Per square mile. If a High Exposure City has an abutting town with slightly lower exposure rates both cities can join together as a plan for remediation for their district. Also all people with chronic lung conditions, heart conditions and low immunity in these areas made to work from home, given a temporary leave of abscence or provisional work accomodations to limit their exposure to other workers and public areas. No public transportaion for at risk persons can be allowed unless less than 3 or less persons share and precaution measures taken. All persons working in commercial buisness that can functionally work from home should be allowed to continue during first phase of reopening. Public should stay home except for essential service needs, low risk of human contact or low risk of contracting the virus (have antibodies). Personal visits between at risk persons with people in hi risk exposure jobs be limited except between household members unless within 48 hours after person has recently cleared testing for the virus and precautions taken not to transmit the virus. At Risk persons should not be going into homes of persons with hi risk exposure. Limiting transmission to at risk people is the ultimate goal and restrictiing surge in low occurrence areas. People having tested for antibodies can transport virus. All persons must continue precautions until the virus is irradiated. Each retail buisness to prepare a statement of thier commitment to limit virus exposure and be made publicly available for consumers. State will provide guidelines for public safety which are to be followed for each buisness type relative to size and space. Committees with participation from businesses to set and revise guidelines as conditions change. Buisness are asked to submit plans to best allow limited transmission of the virus and maybe designated hours or day of operation with extra precaution for at risk persons. All accomodations with stated times of availibility must be posted and
Monroe	General	Tell DeSantis that I said he should take his newborn baby to the beach, the grocery store, or any other public place and just hang out with people that don't have masks on. Tell him I said to give it go.
Pasco	General	Hello, I go to work everyday and Unfortunately it has slowed down a lot but I get in customers cars everyday and use protection and stand next to a lot of my co workers everyday and knock on word don’t get sick and I get on the snap on truck with 6 guys in a 5x5 feet area and knock on wood don’t get sick. I have not changed a single thing in my life style and myself as well as my family haven’t got sick. Although I do believe there is a illness out there I don’t believe that it’s as big and scary as the media hypes it up to be. Thank you and with that being said I’m gonna name my new 18 degree headed 632 COVID-19 because it’s gonna be a mad mfer

AMERICAN OVERSIGHT

Hillsborough	Professional Services	As much as I want Florida to open, I know the business I was laid off from, didn't strictly follow the CDC rules before oir shutdown. It's the beauty industry. There is no way to do that SAFELY 7 feet apart. Especially if one sneezes or coughs near a blowdryer. It will spread it around 30 feet! We were OFTEN over the rule of 10. Had no masks or lysol due to their delay in ordering and the shortage. And me, being reception, am EXPECTED to clean the bathrooms, common surfaces, take the trash, and share orgone systems and computers with other employees at the same time. As well as constant touching of merchant systems without plexiglass or any protection. So one sneeze or cough and Im forced to be exposed. I don't believe beauty services should be essential, there is no true way to mitigate that close contact risk. I also DO NOT believe anything should be opened UNTIL UNEMPLOYMENT claims have been paid. Period. It's unacceptable. And lastly, those, like me with illnesses making them rethink everything and in concern for their lives (and I live with two people over 65) should remain eligible for unemployment even after reopening. It isn't right for us to be sent to our death march just to pay bills when we know our risk is high.
Okaloosa	Tourism	I wanna know how is this social distancing and etc gonna work for people in the hotel and resort industry. There is no possible way to keep us safe if people is allowed to congregate and book rooms and then housekeeping has to clean up how do we know them people haven't been exposed or infected with covid-19. I'm very concerned for my family as I work in this industry.
Okaloosa	General	It is too soon!! I watch the governors press conferences every day and NOT ONCE has he mentioned the panhandle area!!! Did he forget that we exist up here??!! Our numbers are going up and continuing to go up daily. Its great that he feels there has been a start to the overall state decline, but that is only the first step. Now is the time to say “this is working” and take it to mean we continue until ALL AREAS OF THE STATE see a decline or everyone is able to be tested for antibodies, sick or not!!! It is only just now starting to decline. Please use common sense!!! Opening too soon will just set us back and more will be sick
Polk	Information	I believe we need to open the state when medical experts say its safe.. Lets just say that if the virus kills a small percent of the people , Would you wanna open the state if your own family were mostly in those numbers . No, you'd wanna know its safe for them and thats how we feel out here. We wanna know its safe.
Santa Rosa	Recreation	Regarding the short hours for beaches in any county ... Short hours will make for crowded beaches. Open them up totally... My husband and I always went in the morning when there was no crowds. We like it that way. A few hours a day it's gonna look like OC Maryland on a hot day. It will be so crowded no one will be able to enjoy themselves. Just some food for thought. Thank ya much 😁🌴 Navarre is our beach of choice.

AMERICAN OVERSIGHT

Orange	Tourism	Opening up the state to tourism to early is putting thousands of people like myself who have conditions that place us at high risk in danger. Once businesses open back up we're going to be forced to choose between our job and our health because we all know that no business is going to be ok with us calling out of work so that we aren't putting our own lives at risk just so that people can get out of their homes. I say wait until the Coronavirus has a vaccine and wait for the numbers to be close to 0 before reopening any of the theme parks back up. I rather lose my paycheck than lose my life or the life of a family member or friend. This isn't the time to focus on making money it's time to show your employees, customers and the people of Florida that you actually care about us and want to do what's best for everyone's health.
Hillsborough	Retail	I think Florida should reopen safely. I for one am on the fence as I was temporarily laid off on March 18th and my unemployment application is still pending. I think for our economy we need to open, but want it to be done safely. I work for a small business in a mall in Hillsborough Cointy and am concerned as they want companies to pay rent for the entire time closed and yet small businesses can barely make it not opened.
Miami-Dade	Finance	Fix the unemployment website and start paying people. This is a main problem. Stop rushing the reopening! Start worrying about people's health.
Duval	General	Mandatory masks , tracking and testing would make people feel safer going out into the public again . Taiwan is an excellent example although I realize that all could never happen in the United States. Thank you for giving us an opportunity to voice our ideas.
Bay	Tourism	I think we need to start vacation rentals in May 1. There are not many bookings for May and this will allow for a soft reopening before June comes. I think everyone should have to wear masks when in buildings and stores and this will keep the spread down. I know some of the condo buildings are requiring masks when you're in the buildings common areas. I think this is a great idea but it's only going to help is everyone does it. We are recovering still from Michael and something like this would certainly wipe many people that are small business owners out. I have kept my 2 employees paid to minimize the stress on the states unemployment as well as my staff who could not possibly live without a paycheck for 2 weeks. They are both single moms. But this had been coming out if my savings add I am making no income myself. Lucky I got the PPP LOAN si that gives us a little while but that will end too and then what? Please consider opening up while keeping us a safe as possible
Hillsborough	General	Just open it up and let us get back to living our lives. People that are scared and want to continue with staying at home can and should be able to but we should have the same choice to get on with our lives. There has been so much of this that makes absolutely no sense, I can't take my family out in the wide open to the beach or out on hiking trails but can stand shoulder to shoulder inside a Walmart. This is more tyranny than anything, you quarantine the sick, not the healthy. Open Florida

AMERICAN OVERSIGHT

Broward	Retail	I currently work in retail and believe it would be a mistake to open up all stores. Despite the fact that you limit the amount of people inside the store , it is still difficult to maintain social distancing. Many people come to buy groceries, while we have other who just come to walk around the store and take their masks off once inside.e
Pinellas	Healthcare	I am a dental hygienist. We are more at risk then dentists and assistants due to aerosols our equipment makes, the amount of time we are with patients, and the fact we are by ourselves with no one to help suction (four handed dentistry). Hygienist can see between 8-15 patients a day. Some offices have two or three hygienists at a time plus the patients that the doctor sees. That is almost 50-100 patients a day an office can see in a day. If one person comes in asymptomatic with no way to test the patient prior to ANY dental procedure then we are putting potentially hundreds of people at risk including the community. I purpose a phased opening for dental offices. Restorative procedures should start on 5/11 followed by hygiene services on 6/1. Also, dental offices should be required to have 2 weeks worth of PPE on hand and be able to have access to ordering PPE to be able to open. We need access to rapid antibody testing that is reliable and can be completed on each patient when they arrive. Aerosols being suspended in the rooms after the patient leaves is also a concern as we see back to back patients. We can only control aerosols so much especially without an assistant. Procedures should have an required amount of time between when a patient leaves and a new one enters set by the health department. Florida is a high risk population (especially Dunedin where I work) due to the geriatric population and medical problems that patients have. Our PPE has been designed for bloodborne pathogens not respiratory pathogens. Dentistry has never been able to treat a patient with TB due to it being respiratory unless we had the proper respirator or pt was treated in a hospital. Taking xrays can even lead to the spread of the virus due to a patient coughing and gagging. Again, am pleading that the consider dentist AND hygienists high risk and assist us in getting antibody testing, ppe that we need, and do a slow phased opening of dental offices.
Seminole	Healthcare	We should not reopen until there are more tests available for everyone. Also, we have to ensure that there is enough PPE's for not only hospital employee but also for healthcare workers in other settins like home health and nursing homes. And I want to emphasize that we need enough PPE's to use like we did prior the the virus. Right now we are reusing which causes cross contamination, we need to go back to the right way to use PPEs, not the current change in the rules.

AMERICAN OVERSIGHT

Flagler	General	I don't think reopening right now is very smart . Are numbers are going up alone in my area of Flagler County numbers are going up daily do to more testing finally be able to be tested . I'm someone with a high risk health issues , I still have to go out to get food , meds , pay Bill's, I'm scared to death each time I go out because we don't know if the person to left , right, front or behind us has it and is still going out. My daughter that is 20 works for Publix on the Bakery and she already tooken care of people that don't wear mask , that have told her they are taking care of someone that has it , or they have it people don't care about others when they do that . We are risking the younger generation, we are risking people like myself all lifes matters . Please keep it the way it is right now . Fix the unemployment site I know many people that are about to lose everything because the site is so mess up . I feel also we need to shut down everything for 2 weeks atleast to flatten this sucker , make groceries all available for delivery up hiring for it state wide .
Hillsborough	Government	Why is Nikki Fried not a member of your Task Force? She represents a great deal of Floridians and we need to be represented.
Pinellas	General	I recommend we open with same guidelines as GA. Open restaurants to limited number of people. all Public places have hand sanitizing stations, and at every table. Limit number of people in pubic places like salons. Keep SD markers in grocery stores. Gas station should be made to provide dispensers of disposable gloves and hand wash by every pump.
Orange	Manufacturing	I own a sm. Business. We are in shut down at this time . I would like to see measured reopening . Say using the customers address so if you have an odd number address you can shop on Monday Wednesday and Friday.. even number addresses Tuesday Thursday Saturday that way crowd control at shops would be easier . No long lines waiting outside just to get into stores because you have cut the shoppers out by half . And in some of the other countries book stores allowed to open 2 days a week Children’s clothing stores 3 days a week To slow the stampede Thank you
Polk	Healthcare	Until testing can be done on the majority of population it would be foolish to reopen the State. It is suspected that half of the carriers are asymptomatic. Currently people who.have no insurance are being charged $85.00 for test. That in itself can stop a majority of the citizens to just take there chances.
Hillsborough	Healthcare	As a public health expert, I do understand the consequences of premature reopening of the state. Please consider observing the epi curve for both the cases and deaths before making decisions. Allow the epidemiologist at the department of health to interpret the data not lay politicians. The cost of increased cases and deaths as a result of premature reopening will be far worse and outweigh the economic gains.

AMERICAN OVERSIGHT

DeSoto	General	My concern is do we have enough testing completed by county that are representative of current populations that have been tested to ensure we are on the down side of the Virus? I don't think our rural community has the resources to get a accurate number to make a informed decision. Is there a quota of a percentage of population to be tested to ensure the most accurate decision to open back all of our business. We need it the most in our small community but we have come this far and I would hate to see this be a business decision verses a balance medical Analytical decision based on accurate test. I believe you've done a good job attempting to protect the citizens of Florida and I just hope that we can make the best informed decisions for all the sacrifices so far so that we don't have to face these obstacles again with the resurgence of the virus.
Broward	Healthcare	I do not think Florida needs to reopen any time soon. Cases and deaths are still going up . I'm at risk given my respiratory issues. Decisions should not be made politically . If you care about the people sometimes the hardest decision is the right decision . Opening Florida will mean there will be a spike .
Broward	Recreation	Please allow private condo associations to open pools as long as social distance is respected. No large gatherings or pool parties. This is no different than back yard private pools. The beaches, parks, and marinas should be opened with social distance rules. Why are road gas stations allowed to sell fuel, but marinas can not ?
Alachua	Professional Services	I have a Barbershop in Newberry fl. Im have a one person shop, I need to reopen. Ive been unable to get the $600.00 a week Ive applied for it. Alachua county closed non essenial businesses two weeks before the Govenor closed us. Ive spent my savings and have nothing less if you dont let us work, Im going to lose my home and business. This is sad that we have to write and beg in the United State of America to work, go out side our homes. Im afraid if you dont do something socialist is around the corner for us all. Thank you for your time.
Pasco	Food	Please do not open Restaurants during phase 1 they are a breeding ground for germs.You cannot social distance everyone is on top of each other.I work as a server.I feel it is to soon to open bars and restuarants.
Pinellas	General	I believe Floridians are ready to open our state responsibly. Those with underlying illnesses and low immunity should responsibly remain vigilant. Those living with the vulnerable should be responsible for their actions. There seems to be no reason to not allow all businesses, large and small to open their doors responsibly. We need to resume living as normal life as possible. Ignorance is never a good excuse for bad actions. If our lives are unable to return to our choice driven responsibility that too is ignorance.
Seminole	General	As an medical employee, we shouldn't open the state. There's still too many people getting sick from the virus and people will just not comply with the social distancing if we open now. We'll risk our families and mor deaths.
Orange	Real Estate	I think we should start reopening businesses and allow those that are able to continue to work from home if they can. Especially 60 plus.
Orange	Recreation	Keep small business closed at least until June.

AMERICAN OVERSIGHT

Brevard	Government	Please do not open up yet! Brevard peak isn't until mid May. Opening sooner could spell disaster I fear. Let's see what June looks like. Business owners and workers who have been left unemployed by this pandemic would not be as willing to risk their lives to go back to work had they been receiving the stimulus money and reemployment money they should have had these last 6 weeks or more. I can only imagine the stress and hunger they are experiencing. I also fear by opening , those who will go out and about will only increase the chances of becoming exposed greater to those of us who have strictly followed the stay at home orders and plan to continue. Thank you for your consideration, Sincerely, Christine Gaskill
Hernando	Professional Services	Please re-open Florida I am a cosmetologist and we need to start to get back to normal with health and safety precautions.
Hillsborough	Management	We need to protect our citizens from an invisible enemy. I understand everyone wants things back to normal. We have to make sure it is safe to reopen without risking people lives. Right now it is not safe. We need to fix the unemployment system. Be lenient and help all the people out of work. It may take a couple months before we can go back to normal. But reducing the risk of death due to this virus should be our number 1 priority. Let's focus on the business of saving lives at this present time. Its hurricane season as well. Having people stay at home is not a bad idea. Fix the unemployment system so people can feed their families and keep their homes. Extend the no eviction policy for one month. We should reopen when it is safe to do so. God bless
Indian River	Food	I work in a restaurant as a server and at work I'm constantly clearing people's used flat ware, drinking glasses, and soiled napkins. All of these things make COVID-19 easily transferable to the server and dishwasher because they are likely to have saliva on them! So reopening these establishments seems high risk to me since it is still difficult to find hand sanitizers and disinfectants. As Rick Scott has stated that Floridians would rather collect unemployment instead of work is far from the truth. I have not been able to collect any unemployment due to problems with the system and still feel that it is still to early to reopen these establishments because even though the curve is flattened there will be a resurgence in covid weeks later! Please take into consideration that the curve is flattened because we are not handling people's infected items. Maybe when testing supplies, new work procedures are in place, ventilators, and better access to disinfectants are available we will feel more comfortable getting back to serving the public
Pinellas	General	Re open the state so we can have our American freedom back. Let people stay home if they choose to. If someone is at risk they are old and retired anyway and can stay home without sending us all into poverty. Please re open !!!

AMERICAN OVERSIGHT

Duval	Government	They need to reopen the IRS to the extent possible or at least have workers re-serve over the phone. because like me there are many people presenting problems with their taxes. I have submitted my taxes since February 24 and I have not yet been able to get my refund due to problems with my identity and therefore I have not received the stimulus either. I work in the hotel industry and I lost my job a month ago due to the closure of the hotels, many employees were left out.
Polk	Recreation	My family and many others in the state of Florida love living here for the many beautiful state parks that we have access to. We love to hike, fish, camp and kayak. We feel so blessed to live here. One of the suggestions we have for reopening state parks is begin opening them for day usage and camping at 30 or 50% capacity. You can even put an extra fee to pay for the extra attendents that would be needed to monitor capacities and to pay an attendents to keep restrooms and picnic areas disinfected. We understand their would be a demand so maybe have a lottery for camping spaces and reservations for day uses. As the virus comes under control we can up capacities until back to normal. Thank you for taking suggestions. Just among my friends and family are some great ideas on how we can take back some of the things that this virus has taken from us. It may look a little different but that's ok. Their are worse things then having to wear a mask at the beach or a park. And worse would be not being able to go to these places at all. Sincerely, Joanna Lowery and family
Sarasota	General	Don't understand how you can reopen businesses but not schools. Who is going to look after the young kids when mom/dad or just mom or dad (single parents) have to go back to work. A 7r old can't take of oneself.....hello! So basically you are going to penalize single parent households who are barely hanging on to now pay for child care while they have lost jobs or weren't paid? I can't afford that....are you coming to look after my kids while had back to work during the day?
Hillsborough	General	Reopen Florida!
Pinellas	General	I live in Pinellas but have a job in Hillsborough. I am an office employee that still has a job. and I am currently working from home. Moving forward it should be mandatory that if you can and are working from home that needs to continue. I fear being forced back into the office as it seems everyday there are new facts emerging. Companies should not be able to put our lives at risk when we can and are working remotely. Thank you.

AMERICAN OVERSIGHT

Lake	Professional Services	I want to express my concern over the opening of salons. I am employed by a franchised corporate salon. We perform strictly haircuts, beard trims, and shampoo services. The salon operates on a computer system that uses walk-in clients or online check ins. Therefore, no employee is accustomed to the appointment procedures. In a six hour shift it is typical to perform at least 25 haircuts per stylist. I ask that when you imagine the phased approach of hair salons you consider the businesses such as the one I am employed by. I feel that we are at a greater risk than what some may Invision when they think of a salon. Additionally, the access to mask and other ppe right now are very slim. While I live my job, I do not see haircuts as essential.
Volusia	General	I do not think we should open up businesses or end the stay-at-home order yet. Georgia has opened and they're still saying they are 5 days out from the top of their curve. Let's wait and see how things go there for a couple weeks to see if the virus spreads more or it doesn't make a huge difference. Getting the economy up and running is of course a priority, but not more than our lives.
Hillsborough	General	I believe that Florida should at least be kept in quarantine till at least mid may.
Brevard	Retail	Please open salons! We need haircuts! Restaurants in our area should also be reopened! Our economy is really suffering.
Pasco	General	Reopen the state. The closures been going on for way too long. Recommend elderly ppl or severe health conditions to continue to take extreme precautions but everyone else should be allowed to continue their lives with precautions as well. People losing their jobs, businesses, their lives will cause more deaths in the long run. Reopen Florida ASAP.
Pinellas	General	The cure is worse than the disease. Florida an$ the Governor have been unable to deliver support to the people. It's time to let people get back to work. Time for tyrant government to give the state back to the people and respect the constitution.
Marion	General	Shelter the nursing homes. Open every single park, restaurant, salon, hotel, marina, fishing ramp, and remind people to wash their hands. I am 71, and my children and grandchildren are afraid to come near. I am a teacher, (adjunct College of Central Florida) and I received a memo that the College (which has a significant foundation endowment for emergencies) gets $5 million, while the mom and pop restaurants and businesses wait in line. Something is very wrong here. There are plenty of respirators, I hear, and it's time to open up. If you have to, say something about masks, even though we've been told repeatedly by doctors they don't do any good. If you have a cold, wear a mask and stay home. OPEN UP.
Hillsborough	Education	Students who show any signs of illness or allergy should wear masks when returning to school. As a teacher I see children spread illness all the time, parents will send kids to school while they are sick, claiming it is allergies. Then the illness cycles over and over throughout the class.
Okaloosa	Tourism	I don't think that we should freely reopen everything. Bringing tourists here is inviting the virus to our homes. Especially when there's so many military families here who are not even allowed to travel why should they be "quarantined" with the state inviting potentially sick people. Waste of time

AMERICAN OVERSIGHT

Manatee	Recreation	I am a member of the United States Coast Guard and I believe that the current stay at home orders are not feasible. We need to get people back working. I am unaffected and still feel this way. The statistics are out there and we need herd immunity. The current stay at home Order will only push things further along and make this longer and harsher. Also, gyms need to reopen because this is an immune affected virus and how can we strengthen our systems without facilities to do this. I could get into statistics but I'm not, we know this needs to end, so let's get it going.
Lee	Healthcare	I think we should open the state as Italy is doing in stages! I know that people are hurting to get back to work but opening too fast will create nothing but a second wave of the virus without a way to cure it.
Polk	General	Please begin to re open. Limit number of customers per square feet, require that places are clean and sanitized regularly, encourage face masks and maintain 6 feet distancing. Be sure adequate medical care is available to those needing it. Begin in phases and move forward from there. People need to get back to work , Be reasonable and aware, but open us up please! Thank you!
Lake	General	Having a child with down syndrome I am a bit nervous to reopen too quickly. Knowing this could possibly kill him frightens me. We have spent numerous weeks in the hospital with him from a cold leading to double pneumonia. We also have another baby. My fear is this. If we reopen and have to go back to work our little children will have to go to a daycare. These children in daycare we know are carriers and where it might not be serious for them my child gets sick very easily and will end up possibly dead. Because all these children's parents work and are surrounded by other potential carriers and then they drop their children off at preschool where it is near impossible to practice social distancing. Deaths are still on the rise. If some people were not following the safer at home order now when it is lifted there is no chance they will be following social distancing. I think we need much more antibody testing and employers need more tests on site. I think in 2 weeks we can have much more progress and would know much more and test many more that it would then be safe to consider start opening
Escambia	General	PLEASE DO NOT!!!! Reopen. Too soon!!!!
Manatee	General	In the counties with less cases, let the younger people, 55 and under go back to work and go out. People need to wear masks when out. Businesses such as hairdresser need to practice social distancing as best possible. Customers need to be maybe 8 feet away from each other while being worked on, the hairdresser has to wear a mask. Clients cannot wait in the salon, and will have to wait in their cars for availability. Could have a forehead thermometer and take everyone's temperature, including the hairdresser, and do not work or take anyone with temp of 100 or more. Practice hand washing and sterilizing of equipment between each client. Client even needs to wash hands when comes into the salon. Would need to wipe everything down with bleach wipes in-between customers, especially chair. Women are willing to do anything right now to get their hair cut. Please let the hairdressers go back to work. Everyone 55 and older, or anyone with health condition still needs to stay home.

AMERICAN OVERSIGHT

Miami-Dade	General	Do not reopen the state for business to tourists unless all tourists are tested and retested. Daily sterilization of common places and transportation need to be done multiple times a day. The airport and ubers, taxis, trains, ships need sterilization. Fix the unemployment process. Mortgage and rent needs to be suspended without affecting the credit ratings. Organize the farmers that are throwing away food and arrange for safe delivery of those food items. Pay the farmers for these losses. Masks need to be worn in public until a vaccine is available. All employees of government, social services need to be tested more than once. Environmental protections need to be in place and not reduced. Too many people are out in Miami Dade county. It's like there is no stay at home order.
Marion	Food	Until medical experts state unequivocally that it is safe to do so, you should not reopen the state. You should reserve your efforts for correcting the unemployment situation.
Hillsborough	General	Please begin re-opening as soon as possible! Trust businesses to make decisions that will be best for the communities we serve.
Okaloosa	Retail	Please reopen hair salons and barber shops. We can wear masks.
St. Johns	General	Please reopen this great state! It is time to take care of our people again by letting them provide for themselves! We can be responsible and be trusted to do the right thing with everything open! This is terrible for mental health and for our children and families!
Pinellas	General	I know Florida should open so people can go back to work,but maybe open slowly with restrictions and everyone should be wearing a mask when leaving your home. Maybe that way the virus will lessen more. Thank you Governor for your concern
Osceola	Recreation	Keep small business closed at least until June.
Escambia	General	Please do not rush to re-open the state. We need to follow the advice of medical experts (not those hand picked by the governor to tell him what he wants to hear). Do not follow the lead of Georgia (which our President disagreed with). Please do not kowtow to those who want to open to make money off of tourism. We do not need the be open for business so people from God knows where can flood into the state. Do what is right to keep Floridians healthy!
Pinellas	General	The state should not reopen until public health officials say that it is safe to do so.
Bay	Government	My husband and I have a vacation rental that is bleeding money. We will not be able to keep it much longer and will be forced to let it foreclose. We have filed for EIDL and PPP with no response. Please Reopen short term rentals.

AMERICAN OVERSIGHT

Orange	Food	I am a Florida native born in Miami living in Orlando and before that lived in Kissimmee. I love supporting local non chain restaurants, bars/breweries, local farms, local shop owners. I am wondering how these establishments can reopen safely and still make enough to keep their doors open, especially if they are mandated to try to run their business at half capacity? Will there be assistance from local state or Federal government to help them "bridge the gap" until they can operate at 100% again? Finally, my confidence level is and probably will be at zero because I cannot be 100% assured that building ESPECIALLY the HVAC, or that booth, bar, door, seat, restroom etc. is completely free of covid19. While I would like to think my smaller locally owned places might be better than a national chain, but what assurance can you provide? Are the health dept./inspectors going to issue a "certified covid19 safe" certification they can put on their door? How do we know when it is "safe" again? I do not think I/we will venture out until June/July/August, well maybe. The same goes for our vacations, we always go to the West Coast beaches and there we also support local places, in other words we do our part to support our local economy we live work sleep and eat FLORIDA.
Volusia	Healthcare	Dear Governor Desantis, As someone who has her own array of health issues and works in healthcare, I have to let you know that I think it is far too early to consider reopening the state. I understand hat it is hard to see our economy falter, but it is your job to protect all of the citizens of Florida, not just the healthy ones. There are other, healthier ways to stimulate the economy. We are in a health crisis and reopening the state too early will inevitably end up with more deaths that I'm sure you do not want to hold any responsibility for. Please do the right thing and hold off on reopening the state until it is clearly safe to do so. I hope you and your family stay safe, Brittney Giles
Miami-Dade	General	My family and I have been taking this virus very seriously and remained in doors we would hate for stuff to fully open and then the outbreak becomes even worst and it be a major setback ! Better to move slowly then rush into stuff and be on boat in a few weeks but now only with more deaths or people infected!
Okaloosa	General	Please allow the opening of all business, beaches, parks etc. If people are too scared to go to these places then they can stay home. But the rest of us are tired of house arrest without a crime!! FREE FLORIDA!!!
Pinellas	Finance	The government should not re open Florida until there is a vaccine or cure to covid 19

AMERICAN OVERSIGHT

Sarasota	General	First step fix unemployment and Open the Beaches and beach parking lots, but still have the 6 feet minimum, just make only every other parking spot available enforce with citations for people who do not follow. Second step after proof of a week of no increase in covid cases (as in, an almost flat curve) Open restaurants and all beach parking. Open state and municipal parks but leave nightclubs/social clubs closed Step 3 Open nightclubs and aquariums and other businesses/establishments, as well as encourage ride shares again.
Hardee	General	I think we should open up Florida , open up the malls,bars,movie theaters, etc but we must do it extra cautious.
Hillsborough	Healthcare	I am a hygiene assistant. This means that I'm a dental who assists a hygienist. We are the highest risk occupation. Actually, higher than respiratory therapists. I also have asthma, a disabled daughter, and an elderly father who I care for. I do need to work, however, I am concerned about my and my families health. I believe the state should reopen when their are sufficient tests with a quick turnaround that we'd (staff) be tested periodically. I also think the new case rate needs to drop for at least two weeks-and maintain or continue to lower. My thought would be that the lowest risk would open first, wait two weeks and assess at that time if the next level can open or if need be pull back. Systematically open lowest to highest risk occupations, allowing that period of two week between each phase to assess how we are doing. I don't feel we are ready to start at this time. I Don think as a state we have a good enough handle on testing and contact tracing. This link shows occupations by risk. https://www.visualcapitalist.com/wp-content/uploads/2020/04/covid-19-occupational-risk-scores.html I also am concerned as we are quickly approaching hurricane season. Could you please address what the impact of Covid will have on that?
Pinellas	Food	So many weddings and baby showers have had to be postponed. Please consider allowing groups of 50 people or less to have showers and weddings by 6/1. Postponing event have crushed event locations and put a hardship on vendors financially but also their schedules.

AMERICAN OVERSIGHT

Hillsborough	Healthcare	As an RN in a large hospital in Manatee County, I would like to see our state gradually, but quickly, open back up and get out of this panic response mode. We also need to quickly roll out large scale antibody testing so we have a better idea of how much of the general public has been infected and had an immune response. On a personal level, I feel that these draconian shut down measures are unjustified, ineffective, unConstitutional, and will ultimately do more harm than good. This view is not changed by my role as an RN. We need to accept that there is no way to STOP the spread of this and acknowledge that the best we can hope for is to prevent hospital overloading and save as many lives as possible. Herd immunity is ultimately the only thing that will finally end this outbreak. We should be focusing on protecting and supporting those most at-risk of becoming seriously ill and requiring hospitalization, rather than pursuing this fruitless shutdown of the overall economy. Start opening back up, please!
Okaloosa	General	I think it's irresponsible to open beaches up this early. We should wait until our numbers actually start to go down. Once the tourist come back we're going to overwhelm this area. It's not all about money, these are people's lives
Brevard	Healthcare	I feel like we should only open restaurants and things that are necessary. Pharmacy's, grocery stores, doctor offices, and hospitals are the ones that are essential. People are going to think we are back to normal if we reopen everything. My 4 year old just got over pnemonia and had it for a month. She was unable to get tested due to her age. They tested her for strep and flu which came back negative. We need to get more people tested before we just give the okay to open again. Florida has so many tourists and it's almost summer. We keep hearing that if you have symptoms you can get tested. That's not true and if it was my daughter would have got tested. I can only imagine how many others are in the same boat.
Palm Beach	Healthcare	As a high-risk person I am totally against re-opening the state until such time as testing has been completed on at least 50% of the population and the rate of infections is down to less than 10 per day. Then we'll know the virus is being controlled. Opening up now without testing capability is asking for more trouble than we're able to handle. If we must continue to social distance and wear masks, so be it. By doing so we're saving lives. At the same time the state MUST resolve the unemployment situation. People are literally starving! Thank you.

AMERICAN OVERSIGHT

Hillsborough	General	I think We as individuals know what's best for our families and ourselves. We do not need Government overreaching it's assumed powers and treating its constituents like War prisoners. We should have the right to go about our daily life if we choose to do so. If we choose to stay at home, that's also our right. Business should be able to continue to operate with its employees making decisions for what's best for them. People die everyday. So do we limit cars, traffic, motorcycles, walking in the street, in order to protect everyone? Faith is more important than fear. Our Government and Media has spread fear throughout our country with hopes of destroying our economy before the election. Funny how we have a major pandemic every 4 years before election. We will continue to vote out the government officials restricting our rights. Elected officials should not try and play God, we all will die of something.
Orange	Construction	I believe we should not open prematurely. It would nullify the point of closing the state to protect the public health, if when people get out, those that were locked up, now become exposed to the virus and we are back to square 1, as if the lockdown would have never happened. Then, we would have closed businesses, lost revenue and impacted the economy in vain. Moreover, if we get a second wave because we opened prematurely, then businesses would have to be kept locked for a longer time than if we postponed it enough to make sure the pool of susceptible individuals that could continue to spread the virus has decreased substantially.
Marion	General	Nothing should reopen until the number of new cases and deaths shows a steady decline for at least 2 consecutive weeks, and the medical advisors agree it is okay to start opening low risk things..
Lee	Education	It's time to reopen and encourage those who are vulnerable to stay home. As an educator, I am saddened that kids will go 5 months without seeing teachers and friends. The negative emotional impact of continued closures will outweigh the impact of the virus on the majority of the population. Graduation ceremonies need to be able to take place by July and school must reopen in August.
Pasco	Healthcare	I feel elective surgery should open for people who need it. We will take all precautions but people can't not have these procedures. Also doctors and nurses needs to open their business back up for the economy.
Orange	General	Good afternoon , I am writing to voice my opinion and concerns on reopening. I can't wait to have things start to open up. My family has lost out on a lot during this shut down. Every kid had a milestone school year and missed many activities. My husband work has been very slow. I'm all for opening, what I am not for is being forced to wear masks, gloves ect. If the sick and immune compromised want to stay home and wear them then that is there choice. A lot of people cant wear then. Whether is it health, phobia ect. I am claustrophobic putting stuff over my face causes panic , my son has a lower heart rate and has been known to pass out therefore restricting is air flow will only make it worse. What about autistic people that cant handle them ? I think you have seen and felt wearing them in the heat and long term causes breathing issues. As far as parks and ect wearing them people will constantly be touching their face to take them off and on to eat drink and get a few deep breaths. I see lawsuits in the future when people start to pass out from being over heated due to wearing them.

AMERICAN OVERSIGHT

Orange	General	My husband is considered essential because he is in the moving business. Isn't this dangerous having these men sit 3 to 6 people in the truck And going into strangers houses to move them. Needless to say due to his age he has stopped working he is 65 and is afraid of bringing it home to his family. We have not received our stimulus money nor has he received his unemployment. I also am considered essential as a licensed title and it scares the hell out of me when I have to walk into a closing room with total strangers. I do have a mask but it is scary as hell. Please keep Florida closed and reconsider some of what is considered essential
Orange	Tourism	One NOW or we will lose everything! Leaders will be voted out of they prolong this!
Pasco	General	Slowly reopening the state i think is critical safety and the economy. We are in a very difficult situation of having to protect both of those issues. This isn't just about the virus, or just about the economy. I would feel safe if Florida took its time slowly opening businesses and limiting capacity. Theme parks allowing Florida passholders first, then allowing ticket purchase, then more and more as we continue to hold fast with improvements. Making disinfecting cleaning practices the standard and norm, a requirement of you will in order to operate. Require masks as mass gatherings and encourage sociology distancing. I really this those with underlying conditions and elderly facilities will need to continue to shelter and not allow visits. That group will need to do so till we have a drug therapy or vaccine. It's unfortunate but it's for their safety while allowing the rest of the state to carry on carefully. We need to ensure those people are financially and medically taken care of during this time.
Bay	Accommodation	Sort Term Rental we need to be allowed to open up we are way less susceptible than South Florida and with social distancing will be fine. Hotels and motels are much more likely to be not as clean as our condos. We have been impacted for two years now.
Pasco	General	We need to reopen Florida ASAP. People need to get back to work and live their lives. People are losing their businesses and jobs which will create more deaths than this virus. Elderly and people with severe health conditions can continue to use extreme precautions until vaccine is created. We need to put money back in the economy and help save lives by having ppl keep their businesses and jobs.

AMERICAN OVERSIGHT

Okaloosa	Healthcare	Governor DeSantis because the Dental Hygienist are concerned about practicing and putting their patients and communities at risk. Many health care providers in our state of Florida have not been able to secure a reasonable supply of PPE that would be required to actively and safely treat patients. We use universal precautions assuming every patient has a communicable disease. Now we must include COVID 19. There is literally a PPE shortage. Why should we see any patients for prophys, perio-maintenance, scaling and root planing with the amount of aerosols we produce without proper protection? As many unknowns still remain with this virus, we fear we do not know how to properly disinfect our operatories in a normal fast-paced day. How do we remove all the aerosols lingering in the room after the use of our equipment so that the room is safe for the next patient? Isn't it possible that we could be spreading this virus to every patient we see and our families? As a dental community, we will just add to the percentage of health care workers affected with covid. I want to stress that dental hygienists are ranked amongst the highest of professionals at risk for both contracting and spreading this virus, and we still remain amongst one of the most at-risk professions. All we have available to us at this time is level 3 masks, gloves and eye protection. These items are the same PPE being recommended for store clerks and shoppers. Please Governor DeSantis of Florida, we are asking the you delay allowing dental hygienist to practice until we can practice safely!
Pasco	General	I think we should not rush the re opening! Even when we reopen the economy is not going to be the same people are not gonna spend like they before and that is gonna make the workers even more hard on them because there will be no assistance and less income! To go along with schools still being out and issues of childcare as like for myself! Also there is still an incline of cases I believe opening now would be irresponsible wait until the cases have gone down into the 300-200s thank you
Pinellas	Food	As much as I would love to open Sea Sea Riders Restaurant our 32 year family owned and operated restaurant up for business I'm concerned it's to soon. We need to be prepared and we are not in the food industry. We need more guidelines on keeping our staff safe. The liabilities jeopardize our industry. Please play it safe. We can't control the customers coming in that will infect our staff.
Lee	General	Here is my suggestion. Look at a map. There are 2 sides to Florida yet you seem to have forgotten that. Southwest Florida watches your press conferences everyday and you have become a joke to us. You have no idea we exist. You have shown us no help, no compassion, no sign of any thought of us. The only good thing is, we will remember you when the time comes. We want a leader who is concerned about the whole state, not just Miami. Just because our numbers arent as high, doesnt mean we dont have sick people. It would of been nice to know you are helping us also. I fear now it is to late, no one cares what you say. Its seems it is all patting yourself on the back and telling us about Miami. At least you finally stopped talking about The Villages. That was turning into a drinking game.

AMERICAN OVERSIGHT

Hillsborough	General	Elective surgeries should be happening. Dentists and optometrists should go back to work. Restaurants should open as long as they can practice social distancing where patrons are. Gyms, salons, etc. should limit the amount of people allowed in their business and be emphasizing the importance of cleanliness and sanitation. WE NEED TO RE-OPEN No matter when we re-open, there will be a peak in numbers so we can't worry about that too much - it is inevitable.
Palm Beach	Healthcare	Please do not open restaurants,theaters ,gyms, until COVID FLATTENS significantlyi in late June or July. OPEN BEACHES,POOLS,TENNIS COURTS IN NEXT TWOWEEKS AS LONG AS SOCIAL DISTANCING AND MASKS ARE MAINTAINED HEALTHCARE FACILITIES SHOULD BE OPEN FOR EMERGENCIES AND NON-ELECTIVE PROCEDURES.
Manatee	Tourism	please consider extending "no vacation rentals", we want to get Florida residents up and running first before having to worry.
Pinellas	Retail	People should be able to decide if they want to resume normal activities. If they want to stay home, fine, if they want to get a haircut, fine. I believe that the potential consequences of this threat is way overblown in comparison to other flu occurrences.
Duval	General	I appreciate the fine balance between safety and economy, and I realize there will be no ideal solution. But I like the idea of reinstating healthcare-related industries first, then retail and food service with stipulations of social distancing. As far as parks and recreational facilities, I would like parks open, again with stipulations and clear understanding that shared spaces like bathrooms or picnic areas could be inaccessible for a little longer. Schools should be made available for summer school purposes, especially to combat the summer slide, but online solutions could continue in some way. It's important for the kids to have the social interactions and normalcy though, so by fall it would be great to have a plan for going back to normal classes and being prepared for round two if it happens (if nothing else, to be prepared for flu season). I think any mass gathering that encourages travel or extended time in areas outside of "home" should be discontinued until fall. In other words, meetings, conferences, sports. I hate to hit the hotel industry like that, but I feel like that would help to contain outbreaks. Meetings and conferences can happen online. Sports can be televised and streamed. Churches need to continue to provide services but the close gatherings of people should be limited. It would be great if they could continue to broadcast online through the summer as well but I realize that's hard. Thanks for asking for our input.
Palm Beach	Food	I deliver food. Until everything is open again. The CDC says wash hands often. How can we do that when restaurants are not letting us use their restrooms? Not everyone can get gloves. Thank you.
Lee	Education	1.Number of cases still going up... why aren't we locking down completely instead of discussing reopening? Makes no sense. 2. Are there plans for ALL kids to get tested prior to entering school in the Fall?

AMERICAN OVERSIGHT

Pasco	General	I think until we have less than 500 new cases per day things need to be the same. If ee do decide to open a few things masks should be mandatory. There are to many people in FL. That won't follow the guidelines. Do not embarrass our state. Look to health officials for advice. If we open everything and more innocent people start dying that would be horrible. I'm sorry but ONE DEATH is too many. Keep Floridians safe and take this very very slow . Hinestly if we had just shut everything down for 2 weeks ..Everything and have gas stations pay at the pump only and grocery stores carry out only the curve woukd of Been flattened sooner. But everyone is still out NON ESSENTIALLY SHOPPING. Keep your people safe a little longer !!!
Osceola	General	My thought for the day.....How many people would be an okay number of people to die for you to get to eat dinner out, go to get a haircut, or go to a shopping mall, concert or sporting event. Call all your family into your living room and pick which one you would let die for you to go back to work. Your mother or father. How about your child or grandchild. Maybe your brother, sister, grandmother, grandfather, uncle, aunt, or cousins. Your spouse or significant other. How about your best friend. Well, who did.you pick? Yes, let's all go about our normal lives. That is way more important than a few thousand lives right? Here is my choice.....I would stay in my house for a year to save your life.....or to have back someone who I lost for just one day.
Palm Beach	General	I am giving my opinion on partially opening up Florida. I believe that opening up parks and beaches should be allowed. Both venues can be controlled by social distancing, opening and closing times for both. Before the parks closed there weren't that many people in the park that visited during the weekdays. So I believe that the parks should be opened on the week days between 8:00 and 5:00 to start. We have park rangers that can enforce social distancing. Weekend times should be open between 8:00 and 3:00 with the same conditions mentioned above. Golf courses should also be opened as well during certain hours. The range masters can enforce social distancing. Restaurants and gyms can also open to strict rules on social distancing and if they don't follow them they they would be subject to fines or closure of there business. They could be required to check patrons temperature to be sure that they don't have a fever and not be allowed in. These are my ideas and I'm sure you folks have heard these ideas already, but I do believe Florida needs to start open the economy. Sincerely, Jon Morse
Highlands	Healthcare	I'm on the frontlines and we do not have the appropriate PPE to protect ourselves and not enough testing and antibody testing. These 3 things in my opinion have to be readily available before we completely open up our state.
Pasco	General	Why would we reopen if numbers are still going up? I am considered an essential worker and I only go out when needed to. We should not reopen until we see a decrease in numbers with this virus.

AMERICAN OVERSIGHT

Pasco	General	I am a mother to three kids - 2,7 and 11. Our neighborhood has shut down access to the parks and pool. One of my kids has autism, the other has sensory issues due to being drug exposed in the womb (we adopted him through foster care) we desperately need the park and pool and some of our old routine back. Please open the parks and pools to help with this and to also relieve some of the anxiety and mental health issues this lock down and pandemic are causing. We respect the danger that exposes and think that hand sanitizing, limiting the number of people at a time, and other measures can be taken and we will respect them. I know that I'm not the only one in this situation. We appreciate ALL the governor is doing and are avid supporters!
Lee	Accommodation	Reopen all of Florida without restrictions. If folks feel unsafe stay at home. We MUST get things going or we will indeed die. Masks and distancing may still be needed, but we work around it. Free the people, state and country. Thanks, Bob and Mary
Pasco	General	You need to open now. Certain businesses have been able to stay open and do social distancing . I feel the rest of our businesses should have the same opportunity as those. I feel we the people are intelligent enough and have the right to chose for ourselves how we go about our business and in doing so safely. We need to get back to work
Okaloosa	Food	Dine-in service should be reopened in Florida. The measures we have taken to keep things sanitized and safe are far greater than the stores that have been allowed to remain open. Small business owners and their employees are struggling right now and need to go back to work.
Escambia	General	Reopen! Especially beaches (no time limits).
St. Lucie	Healthcare	My hip is deteriorating and my surgery delayed. We need to open up INDICATED surgery like joint replacement. Mine will be outpatient at a center that does only ortho cases and does not treat sick or covid pts. I am in pain every day. Please open up these needed surgery.
Pinellas	General	I think you should absolutely NOT reopen Florida. Why cut the cord to your parachute just because it slowed you down. It makes ZERO sense. I have 3 small children which suffer from asthma please don't jeopardize the heath and safety of our people they do not deserve this. I thank you for considering the people of FLORIDA
Citrus	Recreation	The state parks and forests need to be reopened now. The equestrian trails including the Greenway by their very nature are always isolated from public gatherings. There was no reason to close the trails to begin with. Along with people, trail horses need to be exercised and cannot be idle for months on end.
Lake	General	Open NOW!
St. Johns	General	There's no significant decrease in cases across counties nearby. We should extend the stay-at-home order until June.
Seminole	Professional Services	I don't not believe we as a community are ready for reopening anything just yet. We need more time. Let's be smart about this whole thing.
St. Johns	General	Please open us businesses now and stop talking about it. I have lost all of my work and my husband has his own business that was thriving and is now struggling. People need to work and get out! Please do this ASAP. Thank you!

AMERICAN OVERSIGHT

Miami-Dade	Education	I do not think Florida is ready to completely open yet. We should remember that the coronavirus has hit the US the hardest. Florida is in a group of the top states with cases. I think beaches should have law enforcement to enforce social distancing. I also think that south Florida should remain closed for another month. Particularly Miami Dade county and Broward county should remain mostly closed. Universities should keep dorms closed. Other parts of Florida can resume classes in person but I do not think Broward and Miami Dade counties should resume in person classes for a month or more because the gatherings of thousands of people will overwhelm our hospitals and see a rise in cases. I have multiple family members who work in the hospitals here in Miami and they have said their ICUs are already full. I think it is extremely unsafe to re open anything that cannot have social distancing enforced in hot spots of Florida. If DeSantis truly wishes to reopen the economy, he should primarily focus on doing so in parts of Florida where coronavirus is not as rampant .
Collier	General	As a retired couple, ages 74 & 83, living in a high rise community directly on the Gulf, we have carefully observed all the precautions and stay at home instructions. Yet it is time to reopen restaurants, hair salons, nail salons and other retail businesses closed by the shutdown. Masks and gloves can be worn and distancing put in place. Large groups can still be prohibited. Much of this has currently been done in grocery stores and Home Depots. I trust the people of Collier County and of our generation to exercise good sense and make thoughtful decisions for themselves. You should as well. That said, it is important for employers to be required to make employees with illness to stay at home with pay. Special monitoring of each employee (temp, contact w/ positive cases, symptoms) is important for every business. Continue expanding testing capabilities. Most snowbirds have (or soon will) gone home. I cannot speak for East Coast FL but I do not believe our beaches restaurants hotels will be overrun in Collier Co. Most will cautiously venture out gradually in my opinion.
Hillsborough	Healthcare	I am a nurse in Tampa Florida. We have never had a lot of covid positive patients at one time. (Thank god). But I am currently undergoing fertility treatment and my fertility clinic is not allowing new treatments until elective surgeries are resumed. I do not feel my infertility should be viewed as elective but it is what it is. I understand the point is to flatten the curve and reduce the risk of more people contracting covid 19. However, if we do in fact meet the presidents guidelines to enter into phase 1, I really hope that you and the committee decide to allow elective surgeries to resume May 1st as well as opening up some of the stores etc with social distancing.
Orange	Tourism	I strongly am hoping for the re opening of theme parks in June. I am an employee of Universal Orlando and as such, along with many others, am concerned about the company's future. I am confident that with measures in place, the park could reopen in a limited capacity in June and still provide all the rides, shows, and entertainment that guests are used to. Slowly over time, it will return to normal. I think beaches should have reduced hours, along with enforcement of social distancing. I think restaurants should remain carry out only for awhile longer.

AMERICAN OVERSIGHT

Miami-Dade	Administrative	Good day. I suggest that we follow Georgia's governers Kemp and open everything asap. In azed by the abuse of people not paying rent that have the money to pay rent. This is not right. To summarize, who ever wants to stay home, has that right but we should open back up asap. Including the court system in order to end the abuse tenants are imposing on landlords.
Escambia	General	Don't reopen state! Keep as it is until we have 2 weeks of decline in cases. Listen to the medical experts! Reopen slowly.
Escambia	General	It's time to reopen FL. The COVID numbers presented by the press focus on the dramatic. Somewhat like, "If it bleeds, it leads.". The recovery rate is the important number. Recent studies have stated most COVID deaths are in conjunction with associated co-morbidities and 90+% related to two or more co-morbidities. If "herd-immunity" is what is needed to develop anti-bodies, isn't a "stay at home" order the antithesis of this? Those that are sick need a stay at home order. What has happened to America and our unalienable rights?
Hillsborough	Recreation	Open Florida back up.
Sarasota	General	I support reopening Florida with 1. Compliance with state/federal distance guidelines 2. Continued testing and monitoring
Hernando	Education	In regards to college openings. I do believe college campus locations should remain closed throughout the Fall semester with a reevaluation on reopening being done prior to the 2021 Spring term. The possibility of a relapse of cases and the potential of having to transition back to an online format in the middle of a semester is incredibly difficulty on the faculty, staff, and students. Many students have been forced to withdraw from courses because they could not make the transition on such short notice, which was warranted under the circumstances, but to ask them to again be prepared for a second round of transitions to an online format in the middle of a term is an unecsessary burdon.
Palm Beach	Healthcare	PLEASE OOEN FLORIDA NOW. IM SICK AND TIRED OF THE FEAR MONGERING. THE SICK NEED TO QUARANTINED NOT THE HEALTHY! OPEN FLORIDA NOW AND RESTORE OUR RIGHTS.
Palm Beach	General	I don't believe that South Florida should be reopened until we've had at least 7 days of no new cases. If you open it up now you will just have more cases, more deaths in assisted living homes, nursing homes, rehab facilities. You people in northern Florida have no idea of what we need here in South Fl.
Pinellas	General	Open Florida for Business. It has shown that there is no difference between states that are closed and Not Closed. Open Air and Sunshine will kill viruses even the Fauci's own NIAID funded China Virus. The Beaches and associated Business should be open to assist in virus elimination. There is not a single business in Florida that is not essential, yet we see local State, County and city governments that are far less essential and should be reduced in size and scope or eliminated. Why is it that so many government offices are closed, yet no government positions are eliminated? Is it because Governments have no money but is wasting our money.

AMERICAN OVERSIGHT

Duval	General	We need to get a good grip on Covid-19 BEFORE we reopen statewide. There are too many unknown factors and the need for easy, manageable testing should be paramount before just getting back to normal. If you start too soon, people can/could die due to increased, unnecessary exposure. That point alone should be important to everyone and keeping people safe should be the priorty.
Sarasota	General	I want to thank Governor DeSantis and the members of the Re-Open Florida Task Force for their self-less time and efforts. We are grateful for your commitment. I'm sure you all realize how damaging the shut-down has been to the economy and how many lives have been impacted. While the health concern is paramount, the measures taken to address Covid 19 seem disproportionate to the actual threat. Carefully restarting the economy is essential to the well being of every citizen. As you gather recommendations for reopening Florida, I urge you to be mindful of the first ten amendments to the U.S. Constitution, including Freedom of Religion, Speech, Press, Assembly and Petition. We need to balance responsible mitigation with a robust economy. For example, please consider the benefits of "Herd Immunity." Thank you for your consideration.
Broward	Food	Please I'm really want the county to be open but look at the cases we have,I have been not working for almost two months,I had aply for help nothing yet I need to pay my bill,please see what you can do ,just like the motor in Miami helping the residents there pay there bill look at the situation of The Who vote for who help you get there please don't let's us down,please so I need food at the same time I don't want to go at there in die
Seminole	General	Pleass do NOT open up state its only going to get worse then going to have to shut down again!
Hillsborough	General	Please do not open up the state to soon. I have not seen my grandchildren or children since March 11. They have been stay at home as well. I would hate for all of this sacrifice to in vain. You must think about the health of the citizens and if we are healthy in Florida or economy will follow. Thank you
Escambia	Healthcare	Considering that the numbers of people in the state that have the virus and the numbers of deaths from the virus are still going up every day , opening the beaches seems to be a very bad idea . If the numbers start coming down that would be the time to think about opening up the beaches but money seems to rule more than health and that is sad in the country that's supposed to be here to help others in need and we can't take care of our own .
Orange	Healthcare	I'm not agree at all is to soon ,also the kids stay home doing home schooling if we go back who is going to take care of them ,I work in health care we don't have enough PPE
Brevard	General	Please reopen Florida asap!

AMERICAN OVERSIGHT

Palm Beach	Recreation	There two topics I feel strongly about needing to be reopened as noted below: 1) ALL Florida Beaches(including state parks) - all florida beaches should be open for Sporting activity which can not take place else where. Examples of sporting activities includes surfing of any kind(surfing, kite surfing, skimboarding), ocean swimming, ocean kayaking, beach dives, etc. An example of an activity that can take place elsewhere could even include running or walking as these activities can be done inland and will keep beaches less crowded for Watersports. Also, most cities allow walking or running with beach views as for how they are developed. Absolutely no lounging, laying, coolers etc should be allowed. Violators should be fined and required to leave 2) Boating - All boat ramps and kayak launches that safely allow groups to remain 6ft of space. It is my opinion that no sandbar mooring should be allowed unless no boats are within a 50foot radius of said vessel, and all water law enforcement and military(USCG) should strictly enforce an executive order like this. Fishing is an essential activity and even recreationally done, feeds numerous florida families and adheres to social distancing guidelines. Both of these areas are extremely important to physical and mental health of a large number of floridians.
Lake	General	As a retired individual with a steady income stream its easy for me to say keep everything closed until we're sure there's a handle on this virus. In reality though I understand the need for opening up the economy and getting people back to work. That being said, as an older individual with a history of some health issues I feel there could be a balance between opening up the economy and protecting ALL of our citizens. First I think it should be absolutely mandatory to wear a face mask when inside buildings open to the public. Restaurants would have to be an exception because you can't eat with a mask on therefore there should be mandatory distancing in restaurants. Personally I would choose NOT to eat inside a restaurant for quite a while yet and that certainly is an option for people. Face masks should also be mandatory outside where people congregate such as a public park etc. Finally there should be consequences if you violate rules intended to protect the health of people. The obvious consequence is that you could make someone very sick but if you don't follow the rules there should be fines in place where the first offence may be $50 second offence $250 third offence $1000 and possible jail time. People MUST take this serious and unless faced with steep penalties I'm afraid many won't.
Palm Beach	Retail	I work as a Manager for a gas station. I think we should wait until Mid May before you make any decisions. We are still having too many deaths and people getting sick. Opening now might only make things worse

AMERICAN OVERSIGHT

Duval	General	Reopen with the requirement of wearing face masks. Restaurants should limit the number of patrons..seat guest every other table, staff to wear masks. Visiting Salons, theatres, or restaurants are no different then going to the grocery store. Keeping the service industry from working is more detrimental than the virus. Providing “free” monies to this class is worthless and ultimately just cost taxpayers.
Palm Beach	General	We should NOT be opening Florida if this virus cannot be contained. People will be walking around for weeks not knowing they have it, And it will be another disaster such as New York City. I know our leadership in Florida is much smarter than this and will make The right decision moving forward. Not just to align your pockets. Think of the people. The people make Florida.
Osceola	General	My thought for the day.....How many people would be an okay number of people to die for you to get to eat dinner out, go to get a haircut, or go to a shopping mall, concert or sporting event. Call all your family into your living room and pick which one you would let die for you to go back to work. Your mother or father. How about your child or grandchild. Maybe your brother, sister, grandmother, grandfather, uncle, aunt, or cousins. Your spouse or significant other. How about your best friend. Well, who did.you pick? Yes, let's all go about our normal lives. That is way more important than a few thousand lives right? Here is my choice.....I would stay in my house for a year to save your life.....or to have back someone who I lost for just one day.
Palm Beach	General	Please go slowly and keep us safe. I have known seniors and young healthy folks who have died to this terrible disease. Please in everything you do remember the safety of your citizens. We are your responsibility. I didn't vote for you, but I have come to respect many of your policy decisions. You are not a stupid or evil man. Just remember us. Our lives have meaning just like yours and those of your family and friends. We are a big, difficult state, but I hope you can craft solutions for our different areas that work for the needs of those areas and prioritize citizens' safety. Thank you for the work you are doing and for your stewardship of the state and all the many different people in it who are in your trust. We are in your hands. Thank you.

AMERICAN OVERSIGHT

St. Lucie	General	Yes re-open the state. Those who are medically at risk and those who don't feel comfortable yet need to stay home until the risk lessens further. Florida needs to start its engine again. If an area flares-up, then the state needs to take action to quiet the flames, but we can't be held hostage for months until a vaccine is created. Keep social distancing in place and a strong suggestion to wear masks. The supermarkets are full of people doing exactly that. Other businesses can implement the same protocol. Folks keep talking about testing. That's fine, but I can be negative one minute and positive 10 minutes later. What are we going to do, test ourselves every hour? Talk about triggering OCD! Those who have the Wuhan Virus symptoms need to get tested and seek medical attention, of course. Testing is partially a red herring in my humble opinion.
Hillsborough	General	Swedens method of keeping everything open while implementing some social distancing measures works! This unconstitutional draconian lockdown is going to create the next financial depression and it looks like some liberal politicians want it that way. Open the great. State of Florida now! I promise Floridas voters will remember you if you dont.
Miami-Dade	Administrative	Good afternoon, As a governor, we trust in you to do the best for our health. I feel if are number of cases keep rising please do not reopen until there's a realistic action plan by health experts and not the public option. Thank you
Pinellas	Professional Services	We need to re-open Florida as soon as possible, I propose the following to help spread not only coronavirus but other diseases - 1. Open the beaches first to boost our immune system 2. Reopen business making it mandatory to wear masks inside of the buildings 3. Make mandatory prohibition on wearing medical gowns outside the medical establishment especially in to stores - grocery etc 4. Require businesses to install hepa filters, use UV light for sanitizing the environment for 1 year 5. Require businesses to install sneeze sheilds 6. Require businesses to install dividers if "cubicles" are used We need to re-open Florida back up as soon as possible!
Escambia	General	I think the limitations of opening the beaches should be considered. While I agree and want the Beaches opened...the time frames will have more congestion in your hours than if you had full blown access. When you limit the hours you may as well just pile all of these folks in a public arena. Open the beaches 24 hours so people will not feel the need to pile in on a 3 hour window..that increases popualtions at stores as well.

AMERICAN OVERSIGHT

Volusia	Government	You need to reopen the state now. After a lot of antibody testing, it has become very clear that this virus is nowhere near as deadly as previously thought. Governor Cuomo has announced that New York City has had an infection rate of 21%, and New York State over 14%. Testing in Chelsea Massachusetts shows even higher levels of infection. In California antibody testing has shown 55 to 80 times more people have had it then of tested positive for it. 94% of the people thatwere hospitalized for the virus in New York City, had pre-existing conditions. Most people had pre-existing conditions, and were over 65. There never should have been a Statewide shutdown. That was based on politics, and not science. To allow the shutdown to go on for one more day should be criminal. There should be no Statewide restrictions. If there are any restrictions, it should be at the local level where it is easier to throw those people out of office. You are destroying the state. The panic has been much worse than the pandemic.
Hillsborough	Food	Reopen Tampa and allow people to get back to living and working again.
Palm Beach	General	Do not open Florida, I am an essential worker...let's be safe first...
Orange	General	I'm going to keep this short and simple. PLEASE protect our elderly citizens. My family has lived in Florida for 35 years. PLEASE Do not allow people over 65 to return to the workforce until there is a vaccine. My parents are both 75. My father has worked full time his entire life. My entire Family works in the service industry. He has 4 underlying conditions. If you let him go back to work he will go and get himself sick and my mother sick. PLEASE I am begging you do not allow people over 65 to return to work. thank you and God bless you.
Volusia	Healthcare	I'm a health care provider and business owner. I think we should wait until Mid May then SLOWLY re open. Base it on science FACTS. If up tick in cases/deaths re apply some restrictions in those SPECIFIC/TARGETED areas!
Flagler	Accommodation	Open the economy ASAP - just watch this video - qualified doctors can say it better than me https://www.youtube.com/watch?v=xfLVxx_IBLU&feature=youtu.be&fbclid=IwAR2xLCgAxXlQ-CulWzowBOgKgVUhxVOHaj1PsLyW4_4dsAN9mo7h-rdX8Oo
Sarasota	General	I believe the economy should open in phases and with guidance from scientists and health professionals. Having a family member in long term care, I'm also highly concerned about residence and employees of those facilities. I believe that testing in long term facilities should be a requirement of all employees, new residents and re-admits. I believe large gatherings, such as conventions, theme parks, sporting events and concerts should be allowed only after a vaccine or pharmaceutical treatment is available.
Hillsborough	Recreation	Parks and recreation and beaches need to be opened immediately for exercise and mental health of Florida residents. If we have to wear masks... enforce that. Closing public lands is over-reaching, unnecessary and damaging to public health and the economy.
Broward	General	do not reopen the state especially south 'FL

AMERICAN OVERSIGHT

Hillsborough	Tourism	I don't think that we are ready to open up yet with the daily number of confirmed cases and deaths. Especially places like hair salons, movie theaters and bowling alleys. And restaurants. There is no way to be 6 feet apart at hair salons and they are not essentials. For movie theaters, they should skip rows when seating people and leave quite a few feats in between people. And it should be mandatory for people to sign something stating that they have not been sick or are not sick when they first go in, there should be signs everywhere stating that people with any symptoms should not go in to any of these places
Lee	General	Lee county has not been hit the way some areas have, enough time has passed and it's time to move forward. If people don't feel ready they can stay home. Common sense and responsibility for oneself is what people need to do. The governor and others with him have been doing great.
Monroe	Government	It is pathetic the way the unemployment has been handled. Shame on the Governor for going on Hannity on Fox News patting himself on the back. FL is the ONLY state whose unemployment fund is actually increasing. Every single state, except FL, is seeing their funds diminish because they are paying unemployment. Ken Lawson needs to be fired, not put in a different position. Desantis should not take a paycheck until every person who applied (and those who are still trying) gets paid. The website has been completely down for days. This is not helpful. Also, the numbers on the DEO dashboard do not add up. Apparently you think we're stupid but for those of us who can do basic math, the numbers don't even add up. This is shameful. I am a registered Republican and will absolutely not vote for Desantis. And as seemingly typical with anything in FL, even the link to submit this would not work. I will hit submit for the 4th time and hope it goes through. This must be controlled by DEO! Nope, still doesn't work. My 4th grader could handle IT better than Florida.
Pinellas	Government	To reopen before the pandemic would be foolish, to say the least. Reopening would lengthen the duration of the pandemic! I certainly have no desire to be exposed to someone who's carrying the active virus,
Escambia	General	How do you sleep at night supporting this damaged and amoral man
Duval	Healthcare	I would like for the "re-opening" decisions to be based on science and fact that keeps our community and state safe. Going back to "business as usual" or creating increased interactions between people could increase the number of positive cases and for the elderly, medically vulnerable or those with respiratory issues, could lead to death. I value those vulnerable people in my family and community and do not want you to make decisions solely based on money. Our federal government with the blessing of our state senators thought our nation was wealthy enough to have the richest people and corporations pay zero in tax dollars so we surely have enough funds to take care of the working class and working poor since the nation has found that we rely on them exclusively for day to day existence.

AMERICAN OVERSIGHT

Sarasota	General	We need to keep our state going, a lot of people who live in Florida are elderly but they can order online and have it sent to their house and use social distancing. A lot of people aren't going out and are scared to come out and work because of the virus but everyone is wearing masks and being safe. We need mainly important stuff open like the DMVs and government offices
Palm Beach	Healthcare	Until there is more widespread testing and there is a continuous drop in the number of new cases, the stay at home policy should remain in place.
Santa Rosa	Professional Services	I have served on a State Board of Cosmetology for 3 years in New England. I own five salons. Two in Santa Rosa and three in Escambia county. Suggestions for salon openings. Sign on entry door for clients to go directly to restroom and wash hands. Stylist take infrared temperatures of client and self to show client. Give client mask. Use clean capes on every client. One client area time per chair. No clients in waiting area. Must wait outside salon. All tools soak in Barbicde after every client. Use diluted Barbicide in spray bottles and wipe everything client touches after they leave. Salon stations must be 6' apart. Salons with more than six stylists can only work half their staff at one time. Stylists can't have an assistant or apprentice working in salon. Salons need HEPA filter air purifier for every 500 sq ft. End of day everything wiped down with Barbicide spray.
Duval	General	Enough is enough already. We've flattened the curve and are getting tired of being told what to do by the government. OPEN UP THE STATE OF FLORIDA! Or at least the counties that aren't as affected. If people want to wear a mask and quarantine themselves voluntarily, so be it. But you're killing the economy and ruining the lives of people.
Hillsborough	Government	Recommend masks/social distancing. Permit businesses to refuse service with no repercussions if they post regulations and ask you to leave. Request input from various business as to how they would maintain social distancing, such as restaurants/bars. (difficult to eat and drink with a mask on). Do not permit large gatherings including sports and social events until further testing with real data can show an accurate infection/death count. Open parks and recreation areas with warning signs to inform persons that playground equipment may not be safe. Depending on the area, steps may be implemented at a City or County level, possibly even by zip code.
Sarasota	General	State should reopen along lines that President Trump outlined.
Seminole	Manufacturing	Need more essential jobs, instead of heavily relaying on tourism & Service job. Need more job creation to take care of seniors citizens in FL. Unions to Contribute to State, learn from California there home health aide system. A win/win for state & for the people.

AMERICAN OVERSIGHT

Martin	Recreation	Outdoor recreation is fundamental to the stability of Florida's tourist economy. Golf, beaches, tennis and other outdoor areas such as parks need to reopen as soon as possible. Medically, these areas have been shown to be safer than interior environments both in levels of contagion and overall human health. Martin is a great County as golf is still permitted under restrictions. One of those however, married couples in their own cart or the same cart is where things are over enforced. Yet, golfers to my South would gladly comply just to be out playing. Give people the healthy option in Florida to exercise, cause their vitamin D levels and ease anxiety and stress. It is medically supportable as a decision.
Lake	General	Please do not put us at unnecessary risk to accommodate large businesses with huge cash reserves. Opening stadiums and theme parks right now could put us right back in the same situation a few weeks from now. I think there is room to carefully open some businesses that do not force close contact, and where physical distancing can be practiced. Telework should still be mandatory for any business that is reasonably capable of doing so.
Hillsborough	Government	Governer DeSantis, I'm respectfully asking you to keep the state closed Umbro the virus can be contained. Our population is especially susceptible and you have a responsibility to protect your constituents. In addition, please have the unemployment website handled. It's embarrassing. Many Thanks, Courtney Clayton
Palm Beach	Retail	Please DO NOT reopen our state too soon! I know these are hard times for us all but our health and lives are more important than than opening the State too soon. Besides the last thing we need is an influx of irresponsible tourists.
Indian River	General	There needs to be a testing system in place - diagnostic and antibody - with clear goals and metrics. Like Governor Cuomo is doing, key numbers need to be tracked and reported publicly in real time. Those key numbers determine under what conditions businesses, etc can open and, if and when they must close again. There also must be a system for contact tracing. And the unemployment system needs to be fixed, benefits extended, so people can afford to stay home as directed. Basically, follow what Governors Cuomo and Newsom has been doing - not what Kemp is doing.
Hillsborough	Healthcare	It is time to get back to our daily routines and get back to work!!! We can all go back to our daily routines using safety measures. We have been quarantined long enough and statistics will eventually demonstrate that COVID-19 is not any worse than the flu. We can still use protective measures with the elderly and high risk. Everyone else needs to get back to their routine before we fall into an economic depression!!!
Palm Beach	Recreation	People who live in condos and apartments are suffering unnecessarily. Please open parks, recreation areas and beaches immediately. We trusted you to lead us through this problem - it is time now for you to trust us to behave responsibly. Thank you.
Orange	Real Estate	Re open Florida as soon as possible. Keep distancing guidelines until numbers are safe enough to remove them . Vulnerable should remained sheltered with limited contact of those going out. Masks should be used in any crowd setting, large social setting.
Broward	General	When MEDICAL experts (which Trump is NOT) say it is safe.

AMERICAN OVERSIGHT

Broward	General	It's time to open ! With care of course. Restaurants need to space out tables or continue takeout if feasible. Retail stores should have all employees masked. Food industry should also have employees masked and gloved! We can open safely if masks are mandatory inside places. Limited number of people to enter stores, restaurants etc. theirs is the new norm, so let's embrace it.
Orange	General	It is too soon to open Florida. Cases and deaths are still rising. This is not only a florida problem, or an American problem...it is a world problem. And it is still out of control. Continue social distancing and really help people find a way to make money safely with out risk of getting infected and infecting others. Have real solutions and stop listening to politicians over medical experts.. Do what is really best for the people.
Okaloosa	General	We are number 8 in states with the most cases. Or cases are going up not down. We don't have ample testing. And I don't think we should be putting our senioes and healthcare workers at a greater risk. Too many people aren't taking this serious and this is going to backfire on us. I think this is a very bad idea to reopen so soon.
Broward	Government	HI, in reference to Covid. I think beaches, parks re recreational areas should be the last places to open. I feel maybe stores could open, only allowing a certain amount of customers based on square footage. Same for restaurants. Just my opinion. Thank you for your time. Stay well Karen
Lake	Healthcare	It is not safe to open anything right now! Especially for the immune compromised!
Brevard	Government	The state of Florida should not reopen. The numbers keep getting higher and higher and opening the state up again will cause an even higher amount of the states population to get infected which can include you and your family.
Manatee	General	NO.. definitely not ready to open Florida with all the new cases daily!!!!!!! I am very stressed out NOT having any of my due unemployment yet, 5 WEEKS later! I would like you to try to live week to week in normal everyday life as I was, and not this is 5 WEEKS later, and I haven't received a penny! Think about all the people in this position, and try to live for the next 5 weeks on NOTHING!! I want my due unemployment, and pandemic money now please!!!! No more waiting and delays!! Thank you!
Orange	Government	It is clear that cases are still increasing and we are not out of the woods yet. The soonest Florida should reopen would be mid to late May, and even then it must be done gradually. If done too soon and too quickly then people will assume we're in the clear and have a free for all when that's not at all what the current climate we're living in is like. Also please fix unemployment before even reopening the state. No amount of reopening changes the fact that you still owe thousands of Floridians pay for the past 6+ weeks.
Palm Beach	Finance	It is stupid to reopen right now. I understand people are hurting for money but you will make things worst if you open now

AMERICAN OVERSIGHT

Lee	Government	Opening up the Gates in Florida!?😁 Sorry Bad Idea ! 😕😯 I know like everyone else, I want to start being able to go out an do more things. But I also know as I work in Food Service, People are not listening to begin with . I'd say start with outdoor activities like Beaches, Parks Yard Sales. Places where people can stay 6 feet away from other people easily enough. See how that go's first before we start sticking people in groups in confined spaces. Just my opinion😉
Brevard	General	Until there is treatment a general reopening would not be wise. But some successful normalization will help when tourist attractions can open (with pop. limits). And there are a number of things that would start normalization and get some of the people that need it jobs. Cleaning, cooks and other home jobs (especially for the elderly). Vendors should where masks and clean hands going in then coming out. And change clothes between locations. Open restaurants with separation. Serving staff in facemasks. Tables 50% closed or minimum of 6' apart. Table seating recommended for family groups. 8 seats max. Disinfect tables and chairs after each use. Get Dept of Health out checking And instructing. Get people out. Golf is ongoing and easy to keep distance. Now try beaches. But limit parking. No busses. Enforce distancing. Only family groups in 6' of each other. Authorize staff, etc. to cite and remove those who don't comply. Did you get the virus danger? Any beach must have full time designated toilet staff. For parks, use stimulus money. For restaurants on beach do similar, and in each case enforce. Good PR...we are using stimulus and state funds to help instruct and ensure cleanliness and disinfecting is universal as we re-open various activities. Places like museums should be easy. Staff with masks. Suggested for all. Again, toilets to get special attention.
Polk	General	Governor DeSantis waited too late to close the state. Spring break alone contributed to the spread throughout Florida and the rest of the country. The idea of opening the state back up now is crazy. The numbers keep growing and it would be foolish to lift the stay at home order now. The governor should be concentrating more on fixing the unemployment system as the number one priority. He owes it to the people of Florida. Take care of us and not his own ambitions to politically position himself for his next election. I for one will vote him out. I also hold him responsible for the deaths of Floridians. He is in a position of leadership and he needs to step up to the podium and lead! If he does make the stupid decision to open businesses, I won't be patronizing any of them. It's not safe yet to leave home.

AMERICAN OVERSIGHT

Columbia	General	I believe we need to continue to isolate high-risk populations and keep voluntary social distance guidelines. I believe all other business and commerce should be opened up without restriction because the negative economic psychological and social effects of the lockdown outweighs in my opinion any benefit. Herd immunity in my personal and professional opinion is the solution. The Swiss are showing us the way. I've been a registered nurse for 23 years and I'm currently working on the Front Line Screening patients coming into my Hospital. I believe if we did widespread antibody testing it will show a significant portion of the population have antibodies. We need to get to about 80% for herd immunity and now that it's clear that ventilator shortage is not a problem it's time to open up.
Polk	Tourism	Polk Supply. We are a HVAC Service company that works in the resort areas around Disney. This stay at home order has destroyed the majority of the businesses that rely on the tourist industry around the amusement parks. Tens of thousands of people are unemployed and it will eventually collapse the economy in this area. We must start getting back to business in this area the beginning of May. If not the economic affects will filter down into every industry including the real estate market. Please, let's get back business. This virus can be dealt with and not destroy our lives.
Pinellas	Recreation	I am currently temporarily residing on the East coast in Delray assisting my girlfriend with the care of her parents. My concern is the importance of state residents being able to exercise and enjoy the outdoors. Several Golf courses and boat ramps are open on the West coast though on the East coast everything is shut down. I understand that there is a higher occurrence of Covid-19 on the East coast. That being said and providing residents on the East Coast abide by the same restrictions in place on the West Coast why is it that Golf courses and boat ramps are not open on the East coast?
Volusia	Recreation	To early to reopen
Palm Beach	Recreation	Open parks and beaches for recreation.... not gathering on the beach yet,but soon, still as family, not mass gatherings. Time to be able to swim, surf, walk, jog the beach again. And walk dogs down there.
Pinellas	Government	Local governments have too much power and are out of their league when making decisions on what, when, and for how long things will be closed. They need better and more consolidated guidance from the Governor. Also, all of the beaches, parks, schools, and other public facilities that are closed are payed for by property tax. Home owners should receive a tax break or exemptions for this and next year's property tax bill for not being able to access these taxpayer funded amenities.
Polk	General	We should not be opening it up until we have reasonable assurance that we aren't putting ourselves at risk and risk having to do another quarantine. Our lives are more important than tourists or business as usual. Error on the side of caution please
Hillsborough	Healthcare	Open the state! We have sunshine to spare! If people are too fearfull to go out, they can stay in. But for me and my house, we serve the Lord & it is time to open the state! May 1st should be the target date!! Thank you, Louise

AMERICAN OVERSIGHT

Pasco	General	As someone who is now staying at home to home school there child and someone who is also 8 months pregnant . I believe it's a horrible idea to reopen the state at this time . Why not wait till July when the virus is expected to slow down. And see what happens slowely. Reopening the state right now is such a horrible idea. Someone with kids should understand that it's just putting our youth and older people at risk. Another 30 days or more. Isn't gonna hurt anyone it's gonna help.
Polk	General	The cure will kill more than the actual illness. We have women, children, and pets who are stuck in violent homes. We have children home alone because their parents are essential and must continue working. These children are not attending virtual school because there is no guidance or accountability at home. Our local businesses are suffering tremendously. While some have adapted and have continued operations while adhering to social distancing guidelines, many cannot and may have to shut their doors forever. Suicide rates are high. Mental health patients aren't being seen. Please reopen our state to residents, at least. Allow us to enjoy the reasons why we live here: our beaches, lakes, rivers, and nature parks. Those who aren't ready to emerge can continue to shelter in place, but let it be a choice!
Hillsborough	General	I'm immunocompromised and my parents, both in their 80's and high risk, live with me and my family. I've put a lot of thoughts into keeping us safe. Here are some ideas: 1) Testing: We need to be able to test nearly everyone in FL -- symptomatic and non-symptomatic. It's the only way to know how the virus is spreading. 2) "Clean zones": Zones where you have to prove you free of the virus, either never having had it or completely resolved. Once in one of these zones, we can relax distancing. But, if someone leaves the zone, they have to re-certify to come back in. 3) Keep stay at home, social distancing measures, and allow for only essentials business to operate outside the "clean" zones. This all hinges on testing and A LOT of it.... and fast testing.
Okaloosa	Tourism	The state must be fully opened. All businesses and schools have suffered enough. We, as a society, have learned lessons that will carry us into the future on this virus. In the meantime, continue to protect the at-risk and let us all get back to work. It is cruel and unnecessary to continue to leave us all in the dark, with little hope that a wise solution will be reached. If you wish to delay opening the state until this virus is fully eradicated, we will all be economically ruined forever. Open the state now.
Orange	Information	I support a slow and staged re-opening of Florida. But I think social distancing and wearing masks should be required until the end of the year.

AMERICAN OVERSIGHT

Polk	General	Please open up the stores and restaurants. Allow hospitals to perform elective surgeries. Maybe advise those who are immunocompromised and or over 65 to continue to stay at home but for the rest of us we need to work. I work for a hospital and my hours have been drastically cut. We are not overwhelmed at all. I want to continue to work and help others. For the restraints, maybe allow dining at 50% capacity again. And the stores allow so many in at once. Advise people to continue to use masks if possible. I am worried for our economy. I am worried for our mental health. And I am worried what is going to happen to me if my hours continue to be cut. I only have 3 weeks of pto. Please consider reopening. Even consider reopening salons with social distancing, only one client per stylist and wear a mask. Thank you for your consideration.
Polk	General	I believe Florida needs to be "reopened." People are well informed and knowledgeable as far as social distancing practices are concerned. Most people will be responsible when they go get their hair cut, take their kids to the park, and go to the gym. And the business owners will be responsible also. Enough is enough. Our economy is suffering. Thank you.
Lake	General	1. CURRENTLY the general public and ALL employees of ANY open businesses MUST wear face protection when inside business areas and in contact with employees or customers. Employees should wear gloves when handling items in direct contact with customers (any business providing direct customer services like grocery checkout). Social distancing standards would remain in place. The current STAY AT HOME guidance would remain in place. All CDC guidelines would remain in effect. 2. ASAP all public safety, medical personnel, and essential business employees should be tested for COVID 19 antibodies. The general population including AT RISK persons should be tested after all business employees are completed. NON RESIDENTS must be tested upon entrance to Florida. Those who are antibody positive can return to work/normal activity without PPE restrictions. Those who are Antibody POSITIVE should be issued a Certified ID stating they are Antibody POSITIVE. This ID can be presented upon demand to verify their status. Those without such an ID would continue to follow current CDC guidelines for face masks and other measures deemed necessary. Antibody negative or not tested NON RESIDENTS would be required to self quarantine upon entrance to Florida. After quarantine NON RESIDENTS must follow all CDC guidelines until they obtain an ID card. 3. After initial CDC guidelines are met for infection control rates Phase 1 should be a SLOW CONTROLLED opening of non-essential businesses based ONLY on public need and safety. Ex: Personal contact services limited to hair cutting ONLY. Restaurants, movie theaters, retail, and other social based businesses remain closed for inside customers unless those customers can produce a certified antibody positive ID. No one without this ID would be allowed entrance. Social distancing standards would remain in place inside these businesses. Phase 1 would continue until infection rates are under control across the entire state. 4. Phase 2 would add more non-essential businesses based upon public need and safety. Phase 2 would continue until a vaccine is available and the general population has been vaccinated. Increase the limit of the number of persons allowed inside a business provided they have a certified antibody positive ID. STAY AT HOME guidelines would remain for anyone in the AT RISK

AMERICAN OVERSIGHT

Manatee	Retail	My wife and I now have NO income since the beginning of April. We are both hard workers and have built our lives around our work as so many Floridians have done. We are both local west coast Florida kids having attended Sarasota and King High respectively. We have lived through hurricanes over our lifetimes and have always being responsible enough to prepare for and survive those storms. We protected ourselves and our 3 children during those storms and through the bad flu seasons we have experienced over the past few years. The Governor did the right thing in issuing the "stay-at-home" order but MORE IMPORTANTLY zeroed in on protecting the most vulnerable Covid-19 possibilities in the nursing homes just like his military background would tell him to do, i.e., FOCUS IN ON THE TARGET AND SEND YOUR "SHOCK TROOPS" IN TO DESTROY THE ENEMY. AND HE DID IT SUCCESSFULLY as evidenced by the compliment he has received for the state's performance. I DO NOT intend to shop at, eat at or gather at a nursing home anytime in the near future. I DO intend to go out to eat, shop and get my hair cut IF THE STATE ALLOWS me to do that. And I'm speaking for many other Floridians who feel the same way. LIFT THE ORDER AND WE CITIZENS AND BUSINESS OWNERS WILL TAKE IT FROM THERE in a wise, careful and innovative way just as we've ALWAYS done. Treat us as constitutionally-abiding citizens....and we vote! Thank you ad God bless. Nick and Nancy DeVirgilis
Duval	Retail	Hello Govenor & Taak force, I am a retail District Manager, and my concern for the retail industry is ensuring all companies have the essentials to keep patrons as well as staff safe. I think as we slowly open it definitely should be in waves, and Retailers should be ready to open by Mid May. Malls are going to be a huge concern because that is one area "everyone" will flock to. It must be mandated that all patrons visiting Malls must where face masks, if not that will be another potential hot spot. Ensuring that Retailers have everything needed to safely open, because if it's hard for us to get it as consumers, what have companies been able to get while closed for 30+ days. And if any area sees a spike in cases, then those areas immediately begin to shut down businesses because if not our second wave will be here quicker and more rapid. I trust in the task force decision, but again approach with caution, and let's take baby steps, a rush to open everything will only comeback and bite us!
Polk	Tourism	Please keep Florida closed until advised otherwise is safe to reopen my health officials. We are about to hit the peak of the virus in May and we need to remain closed until at least June 2nd. Human lives are worth more than reopening the state right now.
Manatee	General	Reopen the beaches in Manatee county so residents have a safe place to go outside!
Santa Rosa	General	Open all State Parks and no time limit on beaches.
Duval	General	Slow n steady wins the race. Stimulus for anyone under $75K for the next six months.

AMERICAN OVERSIGHT

Orange	Government	When the state capitals are open back up for business, tours, and the courts are hearing cases live, then you can begin to reconsider opening up the rest of Florida. We are not beyond the curve by any means, testing is not readily available, the numbers continue to go up, and this seems to be a ploy for the state to get out of paying unemployment benefits.
Brevard	General	In my opinion, Counties should not open until their are no more positive cases. Or until the counts start going down. Thank you.
Palm Beach	Healthcare	Everyone currently working should be tested for the antibodies. Then any group going to work in fields that will be opened up should be tested for the antibodies, if they have the antibodies they can go to work. As different operations open up employees and owners should be tested for antibodies and be free to go back to work. I believe many people have already had the virus, but don't know it. They also have not been able to determine because of testing.
Polk	Healthcare	Eyesight is essential. Open Opticals and let Opticians place orders for eyeglasses. Parents are getting upset because their child needs eyeglasses. The chairs I are spaced out. Appointments are spread out. The frames will be wiped down after trying on. Wal-Mart needs to hear from the governor to give permission to take care of the people eyes. Please help. Www.ciambronevision.com Inside Wal-Mart. Let's keep our employees working.
Pinellas	Healthcare	You clearly don't understand how viruses work. Listen to the experts not wealthy business interests. If you open the state without this virus being contained first, you absolutely will make people into vectors for this virus and further place Floridians at unacceptable risk of dying. Life trumps economy. If you don't understand what a vector is, think of a mosquito spreading malaria
Charlotte	Real Estate	Dear Governor Ron DeSantis , While I live in the same state as you I feel a world away. You asked us to help you, we did. You asked us to close our business, we did. You asked us to stay home, we did. You asked us to continue to stay at home, we are. So here I am, at home, waiting. You told us don't worry unemployment will come, it hasn't. You told us don't worry grants are coming, they haven't. You told us don't worry forgivable loans are coming, they haven't. So here I am, at home waiting. I wait alongside my coworkers, family and friends, small business owners, the self-employed and the independent contractors. A massive number of Florida residents who are waiting for the Unemployment portal to open for us, waiting for loan approvals, waiting for stimulus checks. All of these programs, we are at the back of the line for. So here we wait. While bills come daily, savings continuously dwindling and still doing our part. It is time you do yours. It is an inconceivable expectation to close unessential business halting all income and expect us to survive. We need to pay our bills and put food on the table. Without immediate action, you are leaving us no options. How are we to survive? We deserve an answer. Coming soon is no longer acceptable!!!

AMERICAN OVERSIGHT

Broward	General	Please open the golf courses if not all the courses then the private clubs Thank you
Broward	General	South Florida is not prepared for re-opening.I was diagnosed with pneumonia in mid-February after battling upper respiratory issues since early January. I have been exposed to a large number of high net-worth, frequent travelers. I contacted the Broward Department of Health on March 11 and was referred to their Epidemiology Department for follow-up. I did not qualify for testing given my age, lack of travel, and no "known" contact with somebody who has tested positive. I still have not received a call or a test despite repeated calls. There a few provisions, such as gloves and masks, available to protect our health and mitigate exposure. I ordered masks from Amazon in early April and they are not projected to arrive until mid-May. People are already being non-compliant. Don't endanger those of us who are listening to the science and taking this seriously. Models are projecting that we will not hit the peak for another 2 weeks. Put people over profits! Let's not jump the gun until we have adequate protective equipment available to the public!
Manatee	Healthcare	My biggest concern with not re-opening the state is that NO herd immunity will be present if this virus does come back around in the fall. Why would we continue to go through a cycle of opening and closing the economy instead of developing the greatest weapon we have against this virus, which is herd immunity. As bad as it sounds, it is survival of the fittest, but i feel like floridians are forgetting that that has always been the case with any outbreak such as the flu. If the coronavirus is really showing lower mortality rate than the flu, why is the state closed? The high risk people and communities should stay at home if it is necessary, but the majority of the population should be developing immunity so that we do not see the same amount of cases or deaths in the fall.
Osceola	General	It is time to move on. Life is full of unknowns and risks from driving a car, flying on a plane, living through heart or cancer treatments. You cannot legislate life. The very low numbers Of Covid 19 compared to the population of Florida do not add up. Stop punishing everyone for the few who need protection. We must restart our economy. People are suffering much more from confinement and worry than from the virus. Please open Florida up right away. The 21,964,000 people who are not affected can follow reasonable requirements for a while. But we need to LIVE or we will suffer from much more than a virus. Our Constitution has been violated and it is time for freedom to be restored.
Collier	Recreation	I am a handicapped senior, I rely on my community pool for exercise. Please encourage the opening of community pools, as I and many others rely on them.
Brevard	Healthcare	I do not think meetings of more than 10 which are at least 6 ft apart should be done. I think all parks and rec bookings for meetings should be suspended until there is a vaccine

AMERICAN OVERSIGHT

Pinellas	Recreation	At the very least, I feel that Florida is ready to be able to go to parks and beaches. With the increase in heat and humidity, the threat seems to lessen each day. Most of us enjoy the outdoors in small groups or less normally. If the comfort level needs to be there, then keep social distancing in place. It is ridiculous to me to keep people locked up indoors. That's not human nature and frankly not healthy. Those at risk should continue with extra precautions like face coverings. This would be a good start, but more openings should quickly follow. Thank you.
Charlotte	General	This county is getting more and more covid caseses and I know many have not been reported to state like it should be. I believe you should hold off on opening the atate beachesnor patks until we are less than the 14 cases ib 2 week time period like said in beginning. We have gone up over 50 in just 3 days .. please keep the safety of you state in mind and question before you make a drastic choice to reopen .
Manatee	Recreation	I've lost my job 3/18 applied unemployment which as of today no answers ! Please open to the ones who can and want to work ... I can't pay rent or elec or buy food ??? My landlord doesn't care ???
Hillsborough	Recreation	I think things should stay as is for now. I think face mask should be mandatory when in public places like stores, gas stations, etc. Open up parks but only the trails not playground equipment if possible.
Charlotte	General	My cent's worth, that business is able to open where they can follow guidelines setup that are common sense.people should be able to spread out where feasible. I also do agree that the knee jerk fashion in which things have been handled should be a wake up call and that the administration have an open mind and take in advice from many different perspectives and not just the nanny state types. Thank you Daniel Williams Punta Gorda.
Hillsborough	Education	Please reopen school ASAP. Kids are suffering! Also extracurricular activities such as clubs, sports, pools, playgrounds, etc. We all know this is nothing but a common cold.
Pinellas	Professional Services	We need to reopen businesses with recommended CDC guidelines. People are NOT able to access unemployment from the state and people need to get back to work. The patch work of some counties allowing some businesses and some NOT is a ridiculous situation. I have a small business in Pinellas county and neighboring Hillsborough county allows the same business to operate, but my business cannot operate. I am losing my business because of that. We were easily operating with the CDC guidelines, with 6 feet separation and wearing masks etc. People are hungry and desperate, we need to have business open SAFELY NOW.

AMERICAN OVERSIGHT

Duval	General	with guidelines, I feel we can opened most business..the arrows work as in aisles one way and checking out line up. I feel people know how to protect themselves and others.. open most of fla where the virus has flat lines...people are desperate to have money to pay bills etc and to eat...business need to open and see if they can make it...
Orange	Food	Please consider opening Florida with masks and social distancing. Those at risk can stay home. Asian countries have been doing this for 2 months. Thanks
Marion	Education	I am a teacher and have been for 19 years in Marion County. Teaching virtually is not the same as teaching them face to face. As both a teacher and parent of a middle and high school student, we need to get back in the classroom. I am worried about students, not just the ones that I haven't heard from, but also the ones doing their work. Are they really okay? When I I would see these kids each day just by looking at their faces and expressions to know if they were having a good or bad day. Were there issues with friends, a boyfriend, a girlfriend, or something at home. Virtually, I can't tell how they are doing. This year we started mental health training. If we are truly concerned about mental health, we need to get them back in school. And school is more than the book learning. It is learning how to interact with others. It is the extracurricular activities and sports that can't be done virtually. If there was a true health concern, we sacrifice these things for our health. However 99.99 % of our population is well. Thousands die from distracted driving. Have you banned cell phone? No. We have to get this economy started and we can't without school. Who keeps the kids so parents work, if there is no school. We need to start this summer. We also need closure for this year. We need to be able to gather back with our students, of course it can be by student and parent choice. But we should not deny those who want to be in school, their right, because others are too scared to go back. The longer we wait the more scared people will be due to the media. Start extracurriculars, sports, summer school, drivers ed., etc. For one, it will be a smaller group, easier to get started. Two, it is summer and Florida and hot. Viruses don't live long in the heat. Then we go back in August, no mask, back like normal. Sanitize and clean schools. Make sure kids, especially elementary are taught proper hygiene. Make those standards for kindergarten and 1st grade. These things used to be taught but we have put so much on these teachers to get these kids to do that there isn't time for that. Good hygiene is important - pandemic or not. You think parents teach this, but most don't. Otherwise, go back to normal, we owe it to our students, teachers, and society. Remember 99.99% is not infected or were infected and it didn't make them sick. We can't let fear run our way of thinking. That is not the American way. If we would have used this mentality, we would have never formed this great nation or have done all the great things we have done. So let's

AMERICAN OVERSIGHT

Pasco	Retail	Good afternoon I am writing to you as a mother of two autistic toddlers with an online fashion resale business. After my children were diagnosed with autism, I had to find a way to make a living while being present with my children. I started a fashion resale business that requires buying inventory from thrift stores and retail outlets like TJ max, Ross etc. This allowed me to find marketable items that I could resell and provide for my family. Since the shutdowns began, I have been desperately trying to find other ways to get inventory, make money, etc. The closures of all the stores have put my business in jeopardy and my family in financial ruin. And on top of this, I am trying to homeschool too. Please reopen our stores so that people like myself don't have to loose sleep and worry about how I can put food on my table. Perhaps there can be limitations on the amount of people allowed in stores or face mask requirements. I don't know what else to do with my business at a complete halt with no where to accumulate inventory!! Please help !!
Pasco	Transportation	I work for a car dealership and sales are definitely down. For a group of people that relies heavily on commission to pay, it can be very frustrating to handle. I also used to work in healthcare so I understand the need to protect citizens and hospital staff, but I fully believe people who are at risk should quarantine and the rest of us need to get back to work. We're going to have more healthcare issues if i can't afford insurance with no income than if we allow people back to work. I am strongly looking forward to loosening the reigns on the stag at home order.
Broward	General	I STRONGLY want to keep the state closed until we meet CDC guidelines of 14 days in declining deaths... even then, continue wearing masks, social distancing, and small groups.
Flagler	General	As someone who is the sole caretaker of my Dad who lives with us and is 92 with underlying lung issues, I would oppose any re-opening of the State until it is mandatory for EVERYONE to wear a face covering in public. And have it enforced. My dad's life depends on this, as I am sure many other people's who are in the high risk zone. Thank you for taking the time to let me have a voice in this very important matter. And thank you for all you do. I have faith you will make the right decisions. I might add, my family has been home - and I mean home - for almost 40 days now. Groceries are delivered. No one has come into the house. We are doing our part and would hate to see our sacrifice go to naught by other irresponsible people. God Bless.
Escambia	General	Wait it out! Opening up things too soon will not only spread the virus even faster, but without consumer confidence in safety and health, no one will be spending money! So you'll overwhelm our healthcare system, kill thousands of innocent people and the economy won't be bouncing back and we'll hit a possible deeper economic hole. You can't rush consumer confidence and safety. In the meantime, having only 6% of applicants get a check for unemployment is absolutely UNACCEPTABLE. This needs to be fixed ASAP.

AMERICAN OVERSIGHT

Pinellas	General	Open the beaches to walking with social distancing. Allow local stores to open with safeguards. Allow hospitals to accept patients other than COVID cases. Most surgeries require only a couple of days in the hospital at most and you recover at home. Protect the most vulnerable, but allow others to get back to work. Allow service industries (AC, Plumbing, Electrical) to do non emergency repairs and maintenance. Allow stores and restaurants to turn people away with no penalties if they are concerned with either that person's health or demeanor regarding health precautions. Allow short term rentals of least 30 days at first then allow shorter term rentals as the data permits. Make sure municipalities and counties are not being too restrictive in their policies to keep consistency throughout the state. Have friends that are still being kicked off the local beaches while walking.... and yet they can walk along Gulf Boulevard.
Monroe	General	For us here in Monroe County that live in the Florida Keys. We need to keep the roadblocks up even though we still have mainlanders coming down and of of state visitors as well, so we know the road block is fully secure. We should be able to open up everything locally as our population is a little under 26,000. The numbers reflecting the sick here and the number of deaths is proof in itself that this has long been far stretched and the medical agenda has taken this too far. Most people I know down here believe they already had it and recovered from this, local doctors state the same and it started as of late november. Here in the keys we are exposed to every cold, flu, disease across the globe daily. Number one transmission which no one talks about is money! Currency Bill's and coins. The entire state of Florida but more so here in the keys has always had an over abundance of sunshine, fresh air and at this time of year our UV index is very high. People will get sick, some unfortunately will die, and the bigger majority will survive. This is the only factual scenarios of life. Some of us are and have been wide awake to the politics of the world and here in our country. There are literally hundreds of thousands of not more medical professionals and scientists around the world. Most would've already cured this but we all know what's going on in the background. Keep holding the people money from them in this game of politics and its only going to escalate into retaliation. I'm blessed to be working as I am a construction worker and Ac worker. Plenty of jobs are available but the masses would rather depend on your slow processes. The masses are scared with your death numbers, your exhausting contradictions. It's all common sense and you all know it while your wasting your mass for the public and such. We voted you in, some of us knowing that it's all corrupt. You all still have jobs and the security of knowing this is a sham. Let the people go and live, make the right choice, before the choice is made for you. Do your jobs without yourselves in mind, that will truly have you working for the people. Speak your honest opinions without fear of losing your jobs because as you know millions are waiting for their money by you people. Thank you!

AMERICAN OVERSIGHT

Marion	General	I believe that reopening Florida needs to start in small, two week stages. Only after we see a steady decline in new cases. I do not believe we are ready to reopen come May 1st. I think at this point, May 15th should be our first goal date, again only if we are seeing a decline in new cases.
Pinellas	Healthcare	DO NOT REOPEN FLORIDA YOU WILL KILL PEOPLE.
Hillsborough	General	I dont think the state should open to tourists as covid 19 isn't under control and the numbers in florida look bad and also here in hillsborough county . Social distance should still be applied and masks should be worn if in stores or out and about . Beaches should be open to swim only or exercising no beach parties or concerts or filled stadiums. Restaurants i think should only do takeout for now until the numbers improve . And schools should remain closed until its under control but my children have never been to a public school and I won't put em in 1 because of how bad our school system is here in Florida.
Pinellas	General	Dear Governor: Thank you for your thankless work. I will be brief: I am a partially disabled, 70 year old Viet Nam vet and I depend on exercise to try to stay well and to stay sane. I am not allowed to use the pool or exercise facility in my privately owned condo. This is crazy. Do not take away personal freedom or responsibility. I can look out for myself. Please open beaches, gyms, and private facilities immediately. Don't deny freedom to play it overly safe. People want to work and need to recreate. Help the people without hindering what this country stands for the most: freedom. Sincerely, Jack DeMumbrum
Hillsborough	Recreation	Parks and beaches should open with restrictions. Some beaches have opened but without a Florida directive I don't think some counties will ever open the beaches because they are being so conservative. Our kids need larger green spaces to throw a football or frisbee or just run out energy. Kids are playing in the streets and it's not safe. The front or back yard is just not enough for recreation anymore. Playground equipment may not be safe and could be restricted until further informaiton is known on the virus but please give us some open spaces. Thank you.
Broward	General	Slow opening only if supported by medical experts. Would like to see service areas such as restaurants be some of the first. Must follow strict guidelines as recommended by the cdc. Masks at all times , no crowds, distance. Bars only if food is served. I want consideration to areas that have the highest lay-off and lower income be considered. Thank you from a registered nurse, health and safety first.

AMERICAN OVERSIGHT

Hillsborough	General	I believe that it would not be the smart thing to reopen the state. Since florida stayed open longer than most places and beaches were not shutdown when this all started to spread the virus. Your putting people lives at risk by opening pre maturely. I understand that people are hurting and have lost jobs because of this but our lives should come first because when you do open many jobs won't be filled because people are sick, scared to go to work or dieing. Help us by putting something in place to protect those that are hurting. Help the people that are on the front line of this. Do something for us and stop worrying about how big business will fall. If we keep going and open everything will be worse. I can not see it being a smart move to re open the state before atleast June.
Volusia	General	I think reopening the state now would be putting money and politics ahead of the lives of our people. If we act too rashly more lives will be lost and the state will have to be closed down again, only this time the economic toll will be that much greater. Please think of our most vulnerable citizens and show them that they are not expendable.
Hillsborough	General	It's time to Re-Open and let people choose for themselves if they go out or not
Manatee	Administrative	NO.. definitely not ready to open Florida with all the new cases daily!!!!!!! I am very stressed out NOT having any of my due unemployment yet, 5 WEEKS later! I would like you to try to live week to week in normal everyday life as I was, and not this is 5 WEEKS later, and I haven't received a penny! Think about all the people in this position, and try to live for the next 5 weeks on NOTHING!! I want my due unemployment, and pandemic money now please!!!! No more waiting and delays!! Thank you!

AMERICAN OVERSIGHT

Duval	General	Please don't reopen Florida until we have better testing and tracing. Don't reopen so soon. I fear we'd have a second and deadlier wave. My husband and I, especially he is at very high risk to die of Covid-19. He's a diabetic and he works at a call center. Even though they don't have a date in which they'll return to the building, please keep in mind those who are immuno compromised and elderly, especially when that's a large chunk of Florida's population. At least let them work from home if they're able to. Please follow the lead of California and New York. Do it very gradually. Don't do what Georgia is doing and in fact, I don't know why the Southern states aren't doing a coordinating plan like the Western, North Eastern, and Midwestern States are. It would help. Also, PLEASE, PLEASE listen to the public health officials, the scientists, the doctors. Don't listen to politicians. DON"T listen to TRUMP! Please...please don't throw us all under the bus for the sake of the economy. Yes, I understand that financially, people are hurting A TON but please...please think of public health and safety. Economies can bounce back. Human lives can't if their dead. So I beg you...be very gradual about this. Adhere to social distancing, mask wearing, NO large gatherings! Not yet. Not until we have a peer reviewed and scientifically proven treatment and vaccine and I know it will take a long time but I'm ok with sheltering in place as long as it keeps my husband and family safe. I'm more concerned about health right now. In regards to the unemployment website: PLEASE fix it! So that people can get unemployment checks and so they can get money to tie them over! Geesh....
Seminole	General	Keeping with all the safety and health recommendations should stay in place. Large venues that hold massive amounts of people should stay closed for approx. 2 more months. Places such as salons, for 2 more weeks. Doctors offices that need to see patients in person, such as Dentists, 2 more weeks. Technical schools, in 2 more weeks. Restaurants, 3 more weeks.Department stores and malls, in 3 more weeks. Public Parks, in one week. All these farmers that have all this food that is being wasted, not to mention their income, is just a sin. There are too many hungry people in the world to be throwing food away. There has to be some relief. I myself am without a job and life is looking pretty bleak. Central Florida is so dependent on tourism. The hotels are vacant. My son laid off from a prominent hotel/restaurant in downtown Orlando. I hope the leaders on the Task Force come up with a good plan soon. I am trusting our elected officials to make the best decisions with the best information possible. I am trying to be patient, still waiting for the Federal Cares Act money to be available for me, as my UI benefits ran out 5 weeks ago and hope there will be an extension to get me by. My son has yet to get his benefits. Regards...

AMERICAN OVERSIGHT

Manatee	General	Yes! We need to reopen the state. I do not believe we can eradicate this virus by staying home and our temporary closures have given the medical community time to get provisions in place to handle a spike I believe will happen when we reopen the state. However I also believe a spike is inevitable no matter when we open. It is only delaying the inevitable go stay closed. The sooner we open the sooner we can all begin to build immunity to this virus. I also believe the mortality rate is significantly lower than is being reported due to the simple fact not every one who has had the virus has been tested and counted in the numbers. Thank you! Leslee Bennett
Leon	Retail	If retail reopens thrift shops should not be reopened until 7-14 days after stores with new goods. Thrift shops such as Goodwill, etc. do not wash donated items. They should be required to hold donations for at least 7 days before putting out to sell to consumers to guarantee viruses become inactive. Employees are safer with the delay and will be better off financially with federal help. Most do not have health insurance or sick leave. If called in they would be forced to work while I'll and jeopardize public health of customers, many of whom are over 65.
Charlotte	Education	Thank you for allowing students and staff to continue E-Learning this year. As an educator of students with special needs, this is their best option. Unfortunately, it is not possible to insist that all residents of Florida wear masks nor follow social distancing. This is a personal choice, one that I have adopted and follow. What can be done? Producing the facts and research, as well as the pros and cons is all one can do. It is up to each individual as to whether they want to follow the guidelines or not. As an educator, we only want what is best for each individual. I have been in grocery stores and see what each establishment has placed, i.e. arrows, shields, guide ropes and other items, to help insure that guidelines are followed, but many of the residents will not follow the guidelines. It's a catch 22! We need more education, billboards with education and just the facts. Continued closures where large groups can and will congregate. Continued social distances. It would be so simple if everyone would just do what they are suppose to do... wear masks until we are cleared or have a vaccine, but life is not that simple and people do not like yo follow rules or be told what they must do. Thank you for allowing the residents to voice their concerns, Connie Whelahan
Miami-Dade	General	I'm in favor of reopening certain things in our state. People going back to work with masks and distancing themselves seems right. I would not reopen beaches and bars because I believe it's hard to keep distance and wear masks in a beach and or bar. I also have kids and I'm grateful schools won't reopen and even think that universities should only offer online classes for now.

AMERICAN OVERSIGHT

Hillsborough	General	Hello , I will not feel confortable going back to what it use to be, everything open, that is!..Unless, the advise to do so, comes from health proffesionals, and not from business leaders..I will not be going to the Gym, there is no way to isolate weight, and such..Heck, i will not be going shopping either, unless we have a vaccine available.. This virus is too contagious , to be allowing people close together again. We need a cure. Not a band-aid. thank you for the opportunity to offer my feedback.
Pasco	Healthcare	I am writing to you today because I am concerned for my personal safety at work, and for the safety of the patient's that I care for. I am a licensed Dental Hygienist in the State of Florida. As you know, dental office are planning to open soon. I understand that dentists, as business owners, are eager to reopen as they are concerned about finances. However, resuming elective dental services at this time puts the health of their staff and patient's at risk. Personal Protective Equipment (PPE) is still in short supply, and some dentists are expecting their hygienists to work without proper PPE and new infection control training. Dental Hygienists have the highest risk of contracting the coronavirus of any occupation due to the unique nature of our work. We work in very close proximity to the patient, and utilize dental instruments which create aerosols. These aerosols can suspend the virus in the air for hours, potentially infecting us, the rest of the dental team and our patients. It is virtually impossible to have your teeth cleaned without generating aerosols. The aerosols created by Patient A at 8:00 are still lingering in the air and dropping down on surfaces on Patient B at 9:00 and Patient C at 10:00. It is estimated that 50% of people actively shedding the coronavirus are asymptotic. Without the ability to test, we must assume that everyone is infectious (Universal Precautions). The Center for Disease Control, CDC, recommends that dental facilities postpone elective procedures, surgeries and non-urgent dental treatment until further notice. I urge you to enforce the CDC recommendations to postpone dental hygiene services at this time, and mandate resuming elective dental services As you consider next steps in reopening businesses, I hope you understand the unique risks to dental hygiene professionals. I ask you to make decisions that will ensure the safety of dental hygienists, their families and the patients they serve.
Broward	General	Do NOT open everything up just to please the “fool” in D.C. Show some leadership and don’t just be a “follower.” Until there is MORE widespread TESTING it is NOT safe to go out. “Senior hours” at grocery stores and pharmacies have been a tremendous help to thousands and thousands of people! You need to pay more attention to the older, more vulnerable part of the population. WE pay the majority of your taxes, WE need to be tested!!!
Duval	General	I completely disagree with re opening, look at JAX beaches, it is very hard to do the social distances there, look at the numbers it is going up, I don’t know why governor or Mayer’s they are happy for more testing but I don’t see there plan to bring the number down. Thanks

AMERICAN OVERSIGHT

Broward	General	If cases continue to decline and antibody tests can be readily administered, I would like to see an opening to begin by Memorial Day. Beaches and parks first June 1-small businesses like hair salons barbers and restaurants at a limited capacity June 10- begin to allow malls movie theaters other larger venues June 15-Disney and other tourist attractions Perhaps start with Florida Residents and limited capacity with proper procedures in place such as hand washing stations , removing parades fireworks, guests would have to drive so that monorails and buses do not operate yet July 1-summer camps and schools can begin preparing for August We need the antibody tests to be a regular part of our plan to get Fl back to work!
Flagler	Management	Too soon to open up. We still have new cases daily and to jeopardize the progress we've made is irresponsible.. What will we do next time? How many have to die? It's crazy. Don't make this political. Leave it shut down for. Couple of More weeks then re-evaluate. Not now.
Duval	General	Yes, we should reopen immediately. I am a first responder and the destruction caused by shutting in families is on the rise. No one is wanting to talk about this or the numbers. It far outweighs the impact of the virus. There needs to be a task force put in place that looks at past, present, and future numbers on the loss of lives and health issues caused by this method of handling the virus. We are talking about the elderly but why are the doctors not talking about heart disease and bone density loss from not having access to weights and cardio equipment? Simple guidelines and measures such as washing your hands, sanitizing surfaces, and distancing yourself properly is the way we have always handled diseases like this in the past and should continue to do moving forward.
Palm Beach	Education	Reopening businesses and lifting stay at home orders too soon just for this governor to earn Brownie points with his buddy in the White House would be an epic mistake and cost lives. What percentage of Floridans have been tested? Last I saw, it was only around 1%. That means we have absolutely NO IDEA how many cases there truly are. And you absolutely cannot claim we have flattened the curve without accurate DATA. This governor needs to stop being a Trump puppet and do his job and protect the citizens of Florida.
Pinellas	General	With the number of cases rising daily it would be ludicrous to open things back up at this time.
Escambia	General	Reopen beaches immediately. Provide comparative death tolls of other causes [heart disease, cancer, violence] next to Covid-19. Show Florida citizens respect, illustrating your faith in our talents for polite self-preservation. Remove any public official who believes he or she is my dad or mom. We the people can do this without being marched by pinched ears.

AMERICAN OVERSIGHT

Hendry	Government	I personally think our state should NOT open back up, it's to early and out little county's numbers are still rising I think we need to give it another month, if everyone is getting unemployment the small business are qualified for loans what is the big rush, I personally think everything should be shut down for 2 weeks in order to get our numbers down and to beat this virus, if the schools are closed why is it a big rush to open everything back up!! So no we should not open up right away!
Flagler	General	Please do not open the state up until the health EXPERTS agree it is safe to do so. Everytime you let people out to congregate it adds another 14 days to the closure as infections spike after you do so. You have a duty to protect the citizens of this state from this disease. The people protesting the continued closure and social distancing are a small minority whose real purpose is to show discontent and incite violence in the community. Don't be fooled. They are not Patriots. Also like your unemployment system this system is impossible to work with. Either fix it or take it down. It makes the state look like a third world country.
Hillsborough	Education	Please reopen business, especially universities as soon as possible. Our economy is going to hurt a lot more than those who have been negatively affected by the virus as we continue to stay closed. Universities need to reopen as they are large scale employers, just as any private corporations. Please reopen so that our students could be taken care of so that their education doesn't continue to suffer.
Hillsborough	General	Open by 1 May. Let the economic forces dictate requirements. For example, people will not go to a restaurant, theater, or sporting event unless they feel safe at those venues. Owners of these venues know this an will ensure they attract those customers. Life is full of risks and this is one of them...too many families are being destroyed by the shutdown.
Osceola	General	I know this is tough times for everyone but the governor has made wise choices and has extended huge relief both monetarily and health care needs. I do not agree with reopening at this time, being a single mother of two I k kw tge struggle with home schooling but as rough as it may seem it is safer this way and school will be over soon. The CDC map states it is best to open Florida in June,one more month is not that long to see where we stand by then. I ask to please take in consideration kids elders and the sick, I have a mother with cancer with whom loves with me and the more in people coming in and out of the house the more chances she or any of us will be compromised for the corona virus. Let's wait a little longer. Thank you
Orange	General	Allow all business that want to reopen to reopen. Establish flexible sick leave policies for employees.

AMERICAN OVERSIGHT

Marion	Government	As Americans we all did the right thing. The Chinese Communist Governmemt hid the virus and facts from us so as a precaution we canceled travel and temporarily closed our businesses & livelihoods. Thanks to great leadership in Washington DC & our Governor Ron DeSantis thousands & perhaps millions of people were safe from infection or even death from potentially overwhelming hospitals. Since we have more knowledge of the virus now & what people must do to protect themselves I believe it is time to allow businesses to open back up. I speak from personal experience being a cancer survivor & navigating society and life for over a year during times my immune system was compromised. People can get back to work and go out as long as they know how to protect themselves.We must get the great state & nation moving again. Thank you and God Bless.
Manatee	General	As concerned as I am about the health...I'm equally concerned about our citizens (overall) and economy. All three must be considered. My husband has been laid off since the first week of April and the states unemployment web site is always crashed. We finally got filed but have not received any communication whatsoever. When calling the help line it disconnects us and we can't log in. If you can't get $ into residents accounts, we cannot afford to pay bills, therefore worsening an already bad situation. It seems citizens need to either risk their health (and others) by working, or risk losing everything not working because our state is so inefficient in handling this overall crisis. In banking I had to have a pandemic plan and a disaster plan ...and recovery plans for both. Audited and tested regularly. Why doesn't our state have this for unemployment etc? I believe our hurricane preparedness is better than any state, but this has been bad overall.
Pinellas	Healthcare	In addition to current social distancing, require everyone wear face masks in public places or any workplace. Obviously, testing needs to be massively increased but just as important is contact tracing. Several states are implementing this, and it can provide jobs for people, many while remaining home. Any re-opening should be done AFTER a couple weeks of declining new cases, which has not yet happened in Florida. And should be done stepwise, starting in businesses and areas where monitoring can be more easily done. Opening up large public areas such as beaches will not be easily enforceable. And perhaps waiting at least 2-3 weeks to see how case numbers responded in the other states, like GA, following their re-opening, will provide at least some data on what works and what does not.

AMERICAN OVERSIGHT

Leon	Healthcare	As a dental hygienist, we as a whole DO NOT feel safe going back to work May 11! There needs to be CLEAR protocols and mandates across the board for ALL offices. “Recommendations” are an absolute joke because many dentists do not take it seriously and it’s business as usual for them. The staff and patients have the right to be protected accordingly; there should have been a hygienist on the task force for input since we are at highest risk due to being inches from the mouth creating aerosols/droplets with every patient, every appointment, all day every day. With new information coming out every other day about COVID-19, more time needs to be given to make sure offices are fully prepared with clear protocols and practices and not rush to reopen because of public pressure. Our health is worth that!
Charlotte	Healthcare	PLEASE OPEN THE STATE UP. Losing tons of money and work, losing interest, going house crazy, the world needs to thrive and be open, the people who are at risk should be advised to stay indoor and wear masks if needed in public places, let people live again
Pinellas	Government	Too soon to opem up 6/9
Pasco	General	Please I beg of you be slow when re opening. My mom is high risk. She has asthma a bad case of pollen put her in the hospital for a week before this all happened. If you reopen fast she is one of the ones who could die. Please be smart and take every persons lives into account. I know this comment won’t do much but I’m hoping someone sees it and does the responsible thing and slows down. Test more, and have an actual count of who’s sick and who’s not.. I am disappointed in how we are testing or the lack there of.
Highlands	General	There appears to be a general consensus in the medical community; i.e. physicians and other health care providers, that the opening of communities at this time is happening too soon. This opinion was communicated clearly by Dr. Fauci a good number of times. Be that as it may his voice as well as the majority of other medical professionals voicing the same opinion have been shuffled more or less into the backdrop in favor of a more vocal crowd willing to risk opening their communities, and the country generally speaking. I fear the true danger that COVID-19 presents is being overlooked in order to rush back to a sense of economic security, and I believe that this kind of attitude is dead wrong, and will prove to undermine the efforts made so far to curb the spread of COVID-19. I have a sense of dread that general public does not understand that we are not going to be able to change the virus without a vaccine in place. Magical thinking, which is to say, believing simply that it will not be a problem, is wrong in this instance and will prove to herald a relapse in outbreaks of the disease. There was a similar situation that occurred during the 1918 Spanish flu pandemic. It would serve us all well to look into that because those affected by that pandemic behaved just as communities of people today are demanding to open back up. Those who do not learn from history are doomed to repeat it. I hope I am wrong but my instincts tell me that I am not wrong about this. Thank you for allowing us to express our opinions.

AMERICAN OVERSIGHT

Citrus	General	Now is NOT the time to reopen Florida. Most people are not following social distancing guidelines as it is. The health and safety of citizens should be number one priority at the moment. I beg you, please do not reopen schools. Please do not go back to business as usual yet. We havent even hit the predicted peak of infections. I am immunocompromised and will likely not fair well if I am infected. My children are essential workers who are put at risk daily. Keep Florida CLOSED and learn from the pandemics of the past. Too early and we will loose more citizens to Covid 19 unnecessarily.
Volusia	General	Let's get started on all aspects of opening up. If we need to wear masks, gloves, etc. We are ready. Everyone has been cooped up for too long. Our economy is going to hell and we all can do something about it. Thank you for your time.
Clay	General	Please reopen state and county offices, libraries, tax assessor, etc first by at least a week before general opening.
Hillsborough	General	It's too soon. Following the 14 days of declining cases model we just had a huge spike of over 1000 a few days ago. If we have come this far already. A few more weeks of stay at home and businesses closed Has far less potential for harm than reopening portions of certain business and risk a second wave. How much revenue will these minor openings really generate? Who will even feel safe enough to go to these businesses? And who has disposable income to start spending away? So why open if there is a majority of people that still won't even go to these businesses. Play it safe. Get more testing. Have 14 days of declining numbers at least before even considering opening anything in any capacity.
Pasco	General	The state needs to be reopened. People are tired of staying indoors. Most adults want to be treated like adults and not be forced to do anything they don't want to. If I am afraid of COVID-19, it should be my choice to stay in. I do not need the government to dictate my personal life. How about the government focus on the homeless or elderly care? How about the government resolve high prescription prices? They sure as hell don't need to tell me to stay away from a park or beach. Finally, staying at home is actually causing higher infection rates. Familial infection is the highest. Why? Because when five to seven people live together, if one gets sick they all get sick. May as well let everyone do whatever the hell they want. Stop killing people.
Hillsborough	General	Please make sure we are at a low or no virus before you open anything in our state. I do work for a Bank and am currently working from home but I am also high risk and I don't feel we are at a point that we are safe to re-open. Wearing mask and gloves does help but we can end up in a relapse and more people can get infected. Please keep the state closed.

AMERICAN OVERSIGHT

Miami-Dade	General	Hello DeSantis We urge to take consideration into opening the majority of Florida back up to its citizens. Individuals with Chronic illnesses, or elderly in homes with previous health issues should be recommended to stay home. Healthy individuals should be allowed to go back to work. A bulk of Floridas GDP is hospitality and service industry. Hotels, Restaurants, and Small business must be allowed to open at the will and choice of their owners. Currently there is absolutely no one consuming anything in the State besides basic necessity's so there is barely any tax revenue being collected. Not allowing Florida's citizens to go back to work is causing more harm than good. Even with the Governments $1,200 check people will not get by since rents, mortgages, car payments, utility's, and cell phone bills are all still due. Aside from the economical harm the psychological toll this lock-down has incurred on people and their well being should be taken into consideration. The total population in Florida is 21.48 million people. The total cases are 30,533 with 1,046 deaths. This is about one-third of the death rate from the flu. If you take the population of 21.48 million in Florida and take the current COVID-19 flu deaths you are looking at a death rate of 0.0000498% There is no reason for everything to be lockdown for something that has caused less harm than the flu from every year prior. I urge to get things open again for the people.
Brevard	General	My husband and I are more than ready for the state to open businesses in Brevard. We can still maintain 6ft distancing and wearing of face masks, when practical. Please allow restaurants, nail salons and hair salons to open. The operator can wear face masks and customers can as well. This has gone on long enough. Those who are not yet comfortable can continue to stay inside. It's called freedom! Let's begin to live our lives. Thank you for allowing the beaches in Brevard to remain open with activity restrictions.

AMERICAN OVERSIGHT

Charlotte	Healthcare	I would like Gov. De Santis to use healthcare advisors as his source of direction in 'reopening' Florida's non-essential businesses, beaches, sporting events, etc. Our country continues to rise dramatically in confirmed cases of covid-19 as do deaths. Premature return to 'normal' will result in drastic consequences. Does the state or individual counties have a way to direct those who are unemployed to a specific employment site? Many restaurants are providing take-out, including delivery. Many stores that remain open for essential purchases, like food & toiletries, require additional stockers, etc. Restricting inbound interstate travel, which could have been implemented early in March and curbed the drastic increase in cases that we've seen occur, is but one way to reduce the number and severity of cases. Again, Governor De Santis, I implore you to take your direction from the medical experts on this matter!
Brevard	General	Re-opening the economy should be done slowly and in progressively planned stages. Guidelines need to be in place so that social distancing and use of masks will protect patrons & workers. Enforcement of the guidelines also needs to be laid out & understood before reopening. Please do not open things up without the approval of healthcare professionals & advisors. Our state welcomes tourists from everywhere making it imperative to insure successfully reopening without more outbreaks of the virus.
Duval	General	RE: Re-opening businesses in Florida. In light of the fact the Covid19 virus is highly infectious and there is neither a cure nor vaccine it seems prudent to delay re-opening Florida until there has been a well defined and sustained drop in new infections for no less than two weeks. Even then we can expect an uptick in new infections as a result. This virus is highly lethal in certain age groups and Doctors are seeing catastrophic lung damage and excessive clotting induced strokes. It is more likely a biological weapon than a “natural occuring” coronavirus. Dont open, it cant be cured.

AMERICAN OVERSIGHT

Okaloosa	General	I can not speak for what has happened in other parts of the state, but for our little town of Crestview, pre safer-at-home order and post safer-at-home order has been exactly the same. That said, I appreciate the Safer-at-home as it has had an enforcement of the social distancing protocal. For my family, as a Girl Scout Leader, and Asst Cub Master; we will be continuing social distancing through end of May. My Girl Scout Troop will not be meeting for rest of the year to protect the elderly of the church we meet as the young may be asymptomatic. I am trying hard to convince our Cub Master to follow the same for our Pack. I plan in June to restart meeting in open air environments. I have an asthmatic son. I have watched his lips turn blue and him gasp for air after his first asthma attack. I do not want to go through that again. I do not want any parent to go through that, not child to watch their parent go through that. That is why I feel I am taking the extreme. While there is no right time to try to reopen the state. I do feel, just a little more time to truly have a game plan is necessary. 5 days is not sufficient to make a plan to re-open the entire state. Give us 2 more weeks to feel like we are on the down hill of this virus and our government has a solid plan in place. I also feel the state needs to be re-opened in sections. Our area has not been hit as hard as southern Florida. We will be ready to open before they are. Let us be your trial for if the plan works before implementing on a larger population. Please keep in mind how vastly different parts of the state is and somethings will work in the urban that will not work in the rural. Thank you for taking on this difficult task and more for opening up for the public to voice their viewpoints.
Palm Beach	General	Open Florida Back Up, I got shit to do!
Pinellas	General	I think we need a few more weeks. With the numbers still rising and the vulnerable having it brought to them in their sheltered environments scares me that people are carriers. I have a special needs daughter and the more people out and about the spread will get worse. I think we should still have a better handle on how to fight this in a few weeks. We are getting there but we aren't there as of yet. I work in a gym /YMCA and am so afraid that if you open them the spread will be horrific. People do not need to be in a gym to work out. We are offering many ways to stay active during quarantine.
Sarasota	Transportation	Please open the DMV we have essential workers that need to register cars and etc. if its about safety then do appointments and put up those plex glass barriers for the workers and put tape down for the 6 foot rule.. thank you
Hillsborough	General	The state of Florida has followed stay at home protocols. A lot of people are on the brink of losing their businesses. We need to get back to work while continually following safety measures for our elderly and high risk population. The statistics will later demonstrate that COVID-19 was not any worse than the flu. It’s time to reopen Florida before we head to an economic depression.
Highlands	General	Please stop sacrificing the lives of 8nnocent people for a few billionaires upset about their stocks dropping a bit

AMERICAN OVERSIGHT

Collier	Food	Mr. Governor, I am a restaurant employee in Collier County. I am deeply concerned about you opening this state before the medical professionals not business professionals advise it would be safe. I'm sure the business owners want to reopen as soon as possible and rightfully so. However the Health and safety of the citizens should come before anything else period. The economy will be rebuilt and come back on time. It won't be rebuilt immediately whether you open now or next month but you can save precious lives by waiting until we have this virus under control. A life can not be given back but the economy will come back. We need to test way more than we are now. It's unacceptable to be where we are testing wise. We workers have families to take care of and we can't do it dead and buried. Please think long and hard before you reopen. If it's too early and people Did you will Have to live with that decision.
Hillsborough	Recreation	We need to open parks. Generally speaking, those are going to be healthy individuals anyway. I get still not having massive group outings but for exercise and recreational activities I think it's is safe and easy to continue to social distance.
Sarasota	Food	As a mother of two young children, one of which needing a nebulizer any time he has common cold, I am a waitress. I am petrified of what is to come if dining rooms are to open back up. Even with mask protocol and paper menus, it will not contain the virus. We come in contact with cups you've drank from , silverware you just had in your mouth, napkins you used to wipe your mouth and hands, we scrap your food you are from your plate to the trash, we clean up your table you've sat at for an hour, we take your credit cards you've touched over and over, and all 20 employees use the same computers to ring in food, over and over again. It's too soon to re open dining room restaurants. As a result the virus will spread too quickly between the employees and their families. Take out only until the virus is out of each county.
Palm Beach	Information	Wait until we are 14 days past the peak.
Orange	Healthcare	I would love it open. BUT I don't think people will respect the guidelines, therefore, I think it's to soon.
Hillsborough	General	I think as we open we need to be aware of the places most will go and most that are young and may not show signs of symptoms but have covid. I think as much as I would love to get back to the bars and gym as I went to those everyday. That's will ppl will swarm the most and if those open too soon we will Reinfect all over again. I think gyms more then bars should be last too open

AMERICAN OVERSIGHT

Orange	Healthcare	I am a Dental Hygienist and I am very concerned about what our future will look like? I would like to see all dental personnel be tested with the antibody FDA approved test before returning to work. There has been no definitive guidelines from the CDC or ADA on PPE when we return back to work after this outbreak? The current level III mask recommended for us to wear (if they are available) does not protect us nor the public from diseases such as Tuberculosis and will surely not protect against Clovis 19! I am concerned working in such close contact with patients body fluids and the aerosols created from patients saliva due to such items like cavitrons to perform cleanings and the “drills” dentist use, they will disperse aerosols on surrounding surfaces and clothes. Although we disinfect and sterilize dental equipment the aerosols have contaminated our hair, clothes and shoes. I feel this will allow a further transmission of the virus that can be better controlled if PPE requirements are made and available to us and our patients. If the antibody test is mandated for dental office employees at least we as healthcare providers can feel safe returning to our families and can continue to serve our patients needs at ease. Thank you for your time and consideration, Cristina Eiben, CRDH
St. Johns	General	If you do reopen, please still allow work from home to work from home. Kids are out of school with no camp. Immune suppressed people who are forced to go back to work. Going back to work should be optional! Everything should be optional with no firing or lay offs. If business reopen we will not be allowed to work from home. Please create an option that employers can not fire people for wanting to work from home once this begins. There is still a month left of school. With teaching our kids and working full time in office the American People will be put under stress and working from home can keep the spread low if they are able to work from home. We are not ready to go back with kids being out of school!
Brevard	General	1. Dentistry & Medical : specially Dentists must get back to work and performing normal procedures immediately! Of course the protocols for seeing patients must continue, but there is no reason in the first place why this had to stop! The same methadology applies to Medical Doctors, and all selective surgeries. 2. Mr. Governor, if you don't get Florida back to work, and ramp up the testing at a higher capacity, so we can keep those who are sick Quarantine, and those who are Healthy back to work, You will be part of the bigger problem and not the Solution and will end up destroying the Economy of our Great State & turning this State Blue in November!! Which we can not afford to do. I am from Ponte Vedra Beach, I have met you personally, my former wife is related to your wife's long time Hair Dresser, and Im begging you to get Florida back to work, eith the Healthy work force! Yes, we NEED MORE TESTING, so we can Quarantine those that are sick, but Businesses are suffering, many will go under already, retail stores need to open, service Industries need to open! Don't allow the Solution to be worse than the problem Thank you.

AMERICAN OVERSIGHT

Alachua	Recreation	Opening in phases is one of the smartest ways to move forward. It is time to open the State Parks and the beaches. Then move on to businesses with restrictions such as social distancing and include wearing masks when indoors. The curve has been flattened. Even hospitals are hurting financially because of reduced usage. Some of the cities/counties in south Florida will have to open at a slower pace because of the prevalence of the disease.
Collier	Tourism	We need to be very careful and take our time and not rush to open beaches especially here in Collier county> With Miami-Dade and Broward county beaches closed we will get an influx from the east coast of people coming to our beaches. The east coast has a higher percentage of covid--19 and will put us at risk. We should wait at least until after Memorial day weekend and take it slow with restrictions. I believe the restaurants should open sooner with social distancing and employees taking precautions. We should open our pools in private developments for renters and condo owners again with social distancing.
Hillsborough	Education	As a public charter school principal, I applaud the decision to continue distance learning in K-12. If we had more weeks of school left, the issue might be different..but we are almost at the end and could not handle the inevitable brick-and-mortar PLUS distance that would occur when only half of our students returned. However, with adults and businesses.....we should reopen businesses, with a caution about large groups, vunerable populations and interstate travel... and allow the capitalist market to control the situation. Citizens will only do what they feel is safe! Destroying our economy could result in as many lives lost as the virus! Black Tuesday in 1929 resulted in many lost lives! Reopen and trust to the judgment of Florida's Citizens!
Osceola	General	It's too early to consider a date for opening the state. Initial steps should include: - guidelines for employers for each type of business/organization regarding what they must do to provide a safe environment for their workers, with a checklist to be completed and submitted to the counties in which they operate. - guidelines for customers of each type of business/organization to protect themselves. - Ramp up testing for everyone, not just those with a doctor's recommendation.
Miami-Dade	General	I think we should start with construction and agricultural and maybe offices

AMERICAN OVERSIGHT

Hillsborough	Healthcare	Kill the ban on "Elective Medical Procedures" immediately! Hospitals are not overrun with Covid-19 patients; and we have plenty of gloves and masks for medical professionals. Routine exams are when medical providers discover potentially deadly problems when they are still in an early stage - a time when many options exist. Cardiac stress tests; high blood pressure screenings; skin exams; hip replacements, colonoscopies ... all of these procedures are not being done right now. Ninety percent of medical professionals are woefully under-utilized right now because of the focus on Coronavirus and nothing else. Covid-19 is a very discriminatory disease - WE ARE NOT ALL IN THIS TOGETHER! Let's protect those at risk and stop pretending that is is an equal-opportunity threat to us all. Millions of asymptomatic people have proven otherwise.
Seminole	General	Open all retail stores with the REQUIREMENT that customers AND employees have to wear masks or face shields. Nail Salons need to provide plexiglas shields to separate the customer from the tech. The shield can be easily attached to the manicure tables. They can be portable for the pedicure seats. Restaurant owner should space out their tables and/or provide portable plexiglas dividers between them. Servers should wear masks or face shields.
Lee	Tourism	Please reopen Florida! The coronavirus has impacted ALL phases of life and will completely destroy our economy if businesses don't reopen soon. The economy is tanking and will take a long time to recover. We are in a recession, and heading into a depression. I'm retired and living off money I invested in the stock market. Life MUST return to "normal"! Thank you for allowing us to share our opinions!
Polk	Food	I'm wondering what type of system will be in place to make sure these mom & pop, out of the way restaurants, are actually going to comply to any conditions. I know at least 1 that didn't comply with initial guidelines and has allowed inside dining late at night. if we don't feel safe enough to go back to work in restaurants is there any protections for us? Also, what type of child care is available? I don't have assistance with that as my kids are 8, 10 & 14. I don't know where they can go and I can't afford regular daycare even if they are open. Please make sure this is a slow process. Florida is always portrayed poorly. Lets not help that narrative.
Hillsborough	Retail	I understand. A slower reopening for Dade, Broward and Palm Beach counties but the rest of the state should be able to start phasing in non- essential businesses and elective surgeries. We should also open up beaches, trails and parks. Give us restrictions. We will abide by them. Please do not leave it up to mayors. Jane Castor will never open up Hillsborough county with only 1000 cases and 24 deaths in a population of 1.5 million. Over half of our deaths and cases are in south Florida the rest of the state should.not be held to the same restrictions as they are. Thank you!!

AMERICAN OVERSIGHT

Taylor	Information	When will dance studios reopen? How will the distancing be implemented? It's difficult to social distance with a class that has 15 to 25 students, in a small dance room with 1 to 2 teachers, and dance routines that have physical contact. Also would you allow an end of the year recital? There will be a least 300 plus people in the auditorium. My child attends a dance studio and I have been told that if you open up gyms the studio will reopen, I don't see how they can adhere to strict physical distancing. Please specify this when making an announcement of your decision to reopen Florida. Thank you.
Indian River	General	I'm in favor of opening the state back up. Too many people are hurting right now. The economic impact of this will be terrible. Let the snow birds go back home. No body knows what shelter at home means. We can go to all the big box stores, and the mom and pop's are not allowed to open!! If people are scared they can stay home. Its every Americans right to have the choice. People can't pay their bills.Nothing is consistent. Don't do this but you can if you need to. I have a grandfaughter 9 mos old needs an EEG and they won't do it until the restrictions are lifted, but I had a colonoscopy 2 weeks ago. Come on !!!!! Doesn't make much sense.
Duval	General	I do not feel that Florida is ready to reopen. I understand that some people are eager to get back to work, however science has proven differently. I live in Jacksonville, one of the largest cities in Florida. This virus is very contagious, someone can be asymptomatic and still spread this virus to someone else. There needs to be some time of system in allowing people to go back to work. Its understandable that some want to open up thier businesses and go back to work, but what good is the money if you die trying to make the money, and you are no longer here and able to spend it. We are one of the richest countries in the world, however we have one of the highest death rates of all the countries, that alone should tell you that we as a country should do more to keep Americans safe. I am also a Veteran and I love my country and my state, but opening up Florida to soon is not what is best for America or Florida.
Santa Rosa	General	I vote NO. The COVID 19 millions of people are still catching the COVID 19. I feel like we shouldn't open up because the COVID 19 is going to get worse and more and more people will start to pass away. We don't want to keep putting risk to our families. I feel that opening restaurants is putting our Society at danger. I feel we should give everything at least another month or two. I feel that if the government can open our community back up, That the government has higher power to make people really stay home!!
Orange	General	It would be great if we could open the state. However I would not go anywhere without a mask and the service industry's workers need to wear them too. Why would I risk my health and safety eating out/shopping when I don't know if the people around me are sick. Until the virus is completely gone. #masksforall
Volusia	General	I honestly believe the state, as well as ALL states, should resume business as usual. I also believe it is unconstitutional to force everyone to close shop and quarantine. Quarantine should consist of the folks that are high risk. It makes no sense to lockdown everyone over the few that are in the high risk category. The few should take the necessary precautions and the economy should resume.

AMERICAN OVERSIGHT

Palm Beach	Recreation	Open all beaches, parks and golf courses immediately. Ask people to use social distancing &/or masks. We need to have our outdoor recreational areas opened up. The science states that sunshine and humidity kill the virus more rapidly. What are you waiting for? We complied with your mandates to ensure we did not overrun our hospital capacity. We have protected that. Palm Beach County has 1.49M people and 0.17% of people have tested positive. Sadly people have died but it is time to stop holding the rest of us hostage to your “nanny state” mentality. We are adults and can make our own choices. You are all losing credibility when you say “follow the science” but only when it suits us.
Pinellas	Healthcare	It is too soon to open up. The apparent plateau of case numbers only reflects the plateau of number of tests applied... We must act using long-term strategy, if we open up prematurely it will only amplify the problem and set us back even more. So far, limiting contact has been effective and we must continue to do so in order to save lives. We are discussing public policy. I suggest we organize a more effective strategy to deal with recent economic setbacks for wage earners and try to limit human contact for as long as possible. This will save lives and help restore long-term economic benefits sooner, rather than imposing on healthcare facilities, endangering staff and prolonging the effects of this health crisis.
Pinellas	General	Please, Extend the Stay at home orders till Jun 1 atleast . A common approach then can be decided based on Phase by phase approach depending upon STATS
Pinellas	Healthcare	I'm a RN in a hospital in St. Petersburg. We still not have an adequate amount of PPE, testing swabs, respiratory inhalers and cleaning supplies. The hospital is about to open up to elective surgeries. The hospital administration with recommendations from the CDC are coming up with new ways everyday to have us work with less and less protection. I think until our hospitals can provide protections to frontline healthcare providers we need to be very careful how we open. I recognize people need to get back to work. Businesses should be able to open if the can maintain social distancing and sanitary guidelines. Beaches should be able to open for exercise. I think by limiting hours it would increase crowding. I think parking lots could open at half capacity. Every other space blocked off.
Sarasota	Finance	With the number of cases and deaths in Florida continuing to increase, I do not believe that it is a good time to re-open Florida and lift the stay at home order. I personally believe that we should follow directions from our federal government and the CDC. Let’s not prolong the effects of this pandemic by opening Florida back up too soon.

AMERICAN OVERSIGHT

Pinellas	Construction	The focus at this time for the governor should be GETTING THE UNEMPLOYMENT FUNDS TO THE UNEMPLOYED in this state. You need to do whatever is necessary to GET THE JOB DONE. If that means people working over time and around the clock if necessary than DO IT!. To make matters worse if that is possible , the unemployment offices are shut down this weekend so people can't check on the status of their claims. I am a native Floridian and am ashamed at the way this administration has handled this issue. Florida unemployment pay is one of the lowest and shortest time periods in the country. You are wanting to open up the state and expose more people to Corvid-19 before they receive their first unemployment check! I understand why people want to open up the state especially when they aren't even receiving the pittance from unemployment to feed their families. YOU NEED TO GET YOUR PRIORTIES STRAIGHT.
Pinellas	Healthcare	HELL NO FLORIDA SHOULD NOT REOPEN! We have too many vulnerable people to risk it. If we reopen too soon, we will be repeating the pattern of the flu of 1918. It is foolish and pointless to reopen when we'll just have to shut everything down again. There is no cure and no control to coronavirus. Lives are not worth risking over making a few dollars. The economy will recover from this. People will not. Please, do the right thing. Do not reopen Florida until this has passed!
St. Johns	General	Please open the state up! Protect our Seniors and people who are high risk. But if someone wants to work let them if they don't let them stay home. No one is forced to go to a store or business. Just don't go if they feel unsafe. But the rest of us understand no one gets out of this world alive.
Lee	General	Let us decide and keep government out of our business as much as possible. We can make our own decisions. Open Florida up!!! We need to be outside - we now know that heat and humidity dramatically can decrease the chance of contracting and containment of the virus. Open the restaurants- they're dying. Why can stores like target and Walmart be open and not other retail stores? This can all be done safety- it's not rocket science. If folks do not feel safe going out yet, then they should not go. Make a decision now! Please OPEN before the cure becomes worst than the virus.
Hillsborough	Retail	I think it is to early to relax restrictions. They appear to be working. Still, the number of cases and deaths increase daily. We need to wait till there is more testing so we know who is sick and the number of people with new cases and deaths decline substantially. I'm not going out until I think it is safe whether DeSantis or Trump say is safe or not. Trump is a proven liar who cares nothing about who dies except to the extent it effects him or his re-election prospects. DeSantis is a Trump lackey who owes his job to Trump and will do whatever Trump says so he cannot be trusted either. Jane Caster has been a good leader and made good decisions for Tampa. I trust her leadership mush more than Desantis or Trump.
Marion	General	Do. Not. Reopen. The numbers now represent the success of the lockdown. We currently do not meet step one or two of the guidelines. Let's consider this for June at earliest. Also might want to start testing the essential workers without symptoms (grocery store workers, health care workers,)

AMERICAN OVERSIGHT

Miami-Dade	General	I think that Florida should re-open. However, first and foremost, every county should be required to wear masks at all times when in any type of business. NO EXCEPTIONS!! The reason being, if the state opens, people are going to be more mobile and move around to different areas, so it has to be all or nothing. Every business should modify to continue a safe distancing. I am in Palmetto Bay, and frequent stores there, in Coral Gables, and in Pinecrest, and they are always packed, but everyone wears a mask, and for the most part is very respectful of personal space, especially when the stores mark off designated areas in between each person. That should also be something that each business would be required to do as well So I can't imagine why any other business should not be allowed to open, as long as everyone is properly covered and distanced. Like I mentioned, I believe it has to be every county or nothing.
Pinellas	General	We have been watching this pandemic across the world and across the country. We need to learn from this. We need to continue stay at home. We need to require masks in public. We need to assure food support for those who need it. We need to halt any evictions. We need to fix the unemployment applications. We need to support people in need. We need more testing. We need to publish daily the numbers of infections, hospitalizations and deaths. We need to follow science. We need to shelter in place until it is safe not until wishful thinking makes it so. This requires a strong governor and strong congress. Be a leader. STEM in schools is important. Show people you get it. Follow the epidemiologists recommendations. Listen to the doctors. Watch what happens when things are open. People die.
Orange	General	Opening the state without following the guidelines of the federal government is an irresponsible decision. I understand the need to get the state economy back up and running but more testing is key to opening safely and we as a state have not meet any of the requirements for the phases of opening.
Orange	General	I feel strongly that for many to feel comfortable it is essential to have the ability to test for anti-bodies widespread. For many that have not displayed symptoms, the anti-body test would help me to understand the level of personal caution and protective measures I would take when going into public would be affected greatly if I knew if I had antibodies.
Hillsborough	General	Florida is not ready to be reopened
Lee	Healthcare	Shouldn't reopen till cases drop really significantly in the counties ! This is not the time to relax guidelines !
St. Lucie	General	Has no one looked at the history of the 1918 pandemic? They reopened the states when it looked like everything was subsiding and then there was a second wave of infections that was worse than the first one that killed more people than the first wave. There was a 3rd wave after that but the second wave was the deadliest. People that don't learn from history are doomed to repeat it.

AMERICAN OVERSIGHT

Hillsborough	Healthcare	Florida needs to get back to living. I'm all for opening up Florida but I firmly believe we should all wear masks in public spaces. This is such a simple thing to do to help prevent the spread of COVID-19 so I can't understand why our government doesn't promote this. Sincerely, Stephanie R. Moore, APRN, FNP-C Mask Wearer and Hand Sanitizer User
Hillsborough	General	The state of Florida has followed stay at home protocols. A lot of people are on the brink of losing their businesses. We need to get back to work while continually following safety measures for our elderly and high risk population. The statistics will later demonstrate that COVID-19 was not any worse than the flu. It's time to reopen Florida before we head to an economic depression.
Hillsborough	Recreation	Reopen disney but limit it to state resident pass holders. This will allow cast members to get back to work but will limit those able to enter the park for social distancing. It will also prevent people from entering from other states to go to the parks.
Miami-Dade	General	I am concerned that we are rushing the opening of business in South Florida. We are heading into the slowest season of the year. We are not, nor should we be getting tourists yet. My recommendation is to review this situation every two weeks. Out of country and out of state folks should not be allowed into Florida until the healthcare providers say it is okay. We are all walking a tight rope, you fall to one side and it hurts financially, you fall to the other side and besides death, we have a lot of people that will be much weaker, possibly disabled to some degree due to the virus. It is a terrble choice either way. I would love to say Floridians are smart, but I see runners running around Brickell Key. My wife and I would love to walk around, but is supposed to be closed. We have been in our condo building from March 9th and will be here at least to the end of June.
Hillsborough	Management	Slowly open, but definitely make it mandatory to use face masks.
Broward	General	We need to open up florida, beaches&department stores. You can't even go to the dentist? Everything need's to be open.A lot of companies are going to go out. Mary

AMERICAN OVERSIGHT

Seminole	Government	We have not seen full tracking of this virus within our state. Before we put people back to work we need to make sure we are in a position to handle the eventual exposure for everyone. What about the people who can go back to work but will expose others once they do? Without proper FULL accountable tracking how can this happen? We should not even have the beaches open at this point. Data from the 1918 flu showed that communities who rushed and went back to work too see soon recovered slower than those who waited. The ones who waited made a better recovery also. We must not rush this process. Be responsible and take care of those who are out of work.
Orange	Healthcare	Please open the gyms back up as soon as humanely possible.
Brevard	General	I work for a major government contracting corporation in Brevard county. We have been deemed essential to report to work. 65% of the company is teleworking from home. I can not do my job from home so am forced to physically report to work. As someone that does have to go to work, though thankful to have a paycheck, I worry everyday about coworkers I come in contact with. I would prefer not re-opening the state until there has been a significant decline in cases and deaths and some effort is made to test a larger sample of our population before everyone is released to the public/work. If we essential workers have to work, we should be protected as much as possible. Thank you.
Broward	Recreation	Please reopen gyms, tennis courts, golf courses and parks for our mental health. Society has been crippled financially, mentally, physically and to some degree spiritually.

AMERICAN OVERSIGHT

Orange	General	To Whom It May Concern, Thank you all for allowing the public to voice our opinions as you make the difficult decisions about the re-opening of our great state. Also, your collective hard work and dedication in these trying times is greatly appreciated. I am in the “time to open up camp” of citizens who feel we can’t continue to allow weeks to pass without a phasing plan and dates. We’ve had near six weeks of quarantine already and the damage both financially and mentally keeps piling up. I understand and agree with what we’ve done thus far and the things we will continue to need to do even after we start a phased re-opening. But we need to start bringing back the positive, giving hope and restoring people’s sanity. I believe a phased re-opening, following the federal guidelines, is responsible. I also feel that areas with minimal cases may open at a faster pace than those with higher case numbers. Further, I agree with an instate campaign to help jump start our economy, give Floridians the chance to get out, return to work and spend again. We are a state with a significant population and if we start with ourselves, we buy time and allow businesses to get going before we open our doors to everyone else again down the road. It would also allow businesses to implement, practice and improve on any new standards employed for their respective fields. It is all of our responsibility to be personally accountable to maintain the appropriate safety measures needed at home, at work or out in public. Let’s trust Floridians, like we did successfully with the quarantine and open up and smartly get the proverbial “ball rolling”. Thank you for your time and consideration. We all appreciate how hard you are working on our behalf. Respectfully, John G. Scarfo Orlando, FL 32836
Citrus	General	Gov, Please consider reopening hospitality businesses, gyms, hairdressers soon. Your task force encourages in state vacation, but if you don't give people some kind of date then hope is lost. People will travel to GA for vacations! More important, our local businesses are hurting.
Martin	Healthcare	Gov. We do not need to reopen Florida. Our lives are at stake. Tourism may be where our dollars come from, but we need Floridians safe. Do not reopen our state.
Osceola	General	I am a Certified Safety Professional, with extensive experience working for municipalities and time share. I have served on the EOC for Volusia County. Currently, I work in insurance. These are my thoughts and I am sharing it as a citizen of Florida in hopes to assist in the effort to get Florida back online. Feel free to contact me if you have any questions. Andrea
Pinellas	Healthcare	I am a dental hygienist. We are to return to work May 8. I am not comfortable without the proper PPE. Everything is on back order and we don’t have access to gowns...shields...or n95 masks. What I do produces aerosols. I am concerned for me and my patients and we need to be protected.

AMERICAN OVERSIGHT

Polk	General	It is way too soon to be reopening. I live with someone who is immunocompromised and two others who are almost 60. You need to be putting people's health first and not the economy. The economy can recover, there's no recovering from death. If you're so worried about the economy than put your efforts into fixing the reemployment system. If we reopen too soon, it's going to hit even harder and more people will die.
Polk	Retail	I have a business where we interact with the public all day. Please help me keep staff and customers safe.
Washington	General	Personal services like hair care, nail care, massages should be opened for business. While they are very close the parties can wear mast and be protected. Why should Walmart, Lowe's, Target get most of the business when the small business go out of business?
St. Lucie	General	In the interest of all of our citizens, with special concern for our over 60 and compromised populations, my strong belief is that it is too soon to open our state. Even with the current order in place, people are not abiding. To open our state with the restrictions required for such action would require people to respect the rules and Florida has proven time and time again that they cannot. We were late in closing down. Let's see what happens in the states that open early and take our lead from them. Too many asymptomatic folks here not being cautious.
Palm Beach	Recreation	I really want the parks and restaurant open but to be safe, please consider this
Pinellas	General	My 2 cents for what its worth. I feel the state should begin to open and use the same guidelines they did when it began to close. Restaurants go to 50% occupancy and all tables and bar stools 6' apart. Beaches should open but not the parking lots, at least in the first phase. Monitor how people behave and as things settle, then open the parking lots but keep the current social distancing rules. All pools should be put under the discretion of the building owners or HOA's, each complex is different and should be managed that way. Hotels should also be allowed to open but keep the current social distancing rules in all areas where people could gather. Movie theaters should open but monitor the seating arrangements, families only sit together all others adhere to current social distancing guidelines. The delivery system (food and grocery's) that is currently in use should stay for those that are not healthy or elderly or simply dont feel comfortable going out. Tennis and golf should open as well as parks with workout sections, but abide by current social distancing guidelines. Retail/wholesale business's should open but use the 50% occupancy rules and the current social distancing guidelines. Its time to get back to work and get things moving, I think most people understand the situation and will abide by the rules. I know their will always be some people that won't but that's no different than prior to the shut down.

AMERICAN OVERSIGHT

Nassau	Tourism	Is it possible to limit tourism for a week or two? Get a baseline of the locals using the restaurants, stores, hair salons etc. then let the tourists return & see if Fernandina remains stable or if numbers shoot up. I do want the tourists to return, but not in droves all at once. We don't know where they will come from & how much they will bring to our small island. Right now when I go to the store, I know mostly local nassau county people have been there before me. Once the tourists come, who knows where they have been... will there be safeguards in place if the covid19 cases increase to say 100 cases? Limit tourists until the number goes down to 25-50 again? It's a small hospital here, let's do this smart-PLEASE!
Brevard	General	I think it's a month 2 soon. As a person of extreme high risk, I have Multiple Sclerosis, asthma and COPD. I don't think healthy people understand the wide spread effects opening will have. I also believe opening early will just force another rise in positive cases and more deaths in a month or two from now. You won't see the negative effects right away and we'll find ourselves in yet another lock down. The importance of stopping it should be for front above money and ecommerce.
Hillsborough	General	I recommend that we should wait and see how reopening will work with other states. Don't be among the first states which are reopening because it is not a wise idea. Let's watch other states reopening closely especially the number of new cases and then make a decision. However I think it is too early to reopen now because Florida didn't reach the climax yet. Always look to New York as an example, well someone will say Florida is different because population is spread out. Remember this virus can get from human to human through different ways. Thanks for the good job you are doing.
Hillsborough	Healthcare	The state of Florida has followed stay at home protocols. A lot of people are on the brink of losing their businesses. We need to get back to work while continually following safety measures for our elderly and high risk population. The statistics will later demonstrate that COVID-19 was not any worse than the flu. It's time to reopen Florida before we head to an economic depression.
Pasco	General	I am a tennis player, The tennis courts on this area should be left open for players. This is a distance game.We are safe here, no coronavirus reported. We go by the CDC guidelines. Thanks for your attention.
Palm Beach	Recreation	Please consider opening beaches and golf courses ASAP.

AMERICAN OVERSIGHT

Sarasota	General	As a single mom who own her own cleaning business, I would like to know how I have been declared ineligible for remployment. My last day working was March 17th 2020. I care for my elderly father an work with my 71 yr old mother. Alot of my customers are elderly and one is in a nursing home, whom I visit weekly. The risk of going back to my job is just too high. Going into peoples homes to clean the germs right now is not even an option for me if and when we open back up. I need assistance!!! Mom and I have been doing drive through food banks, takung the kids for free luches at the school, my church helped me pay my power bill and I have started to sell what I can online. Please help me get unemployment and DO NOT open everything up all at once. Lets watch china, Italy and now George first and learn before we put everyone I live at risk. Look at the fliruda keys.. Maybe we need to follow their lead!! By opening up beaches we are only inviting New York here, and others who are ordered to stay indoors. Praying for our world right now.
Hillsborough	General	Please delay opening until accurate testing is in place and available to all who would like to be tested. Testing for antibodies, if accurate, can only serve as a guideline up to the time of testing these are your results. When a person leaves the testing site and goes out in public they are no longer guaranteed the same results which leads to a false sense of security. Anything can happen after the time of testing. No one really knows if these results still hold true days, weeks, or months later, it all depends on their actions. If opening is going to occur, please trickle or stagger in the businesses categories opening allowing the numbers to be closely monitored. Compassion and empathy must be in place for first responders as they take on the brunt of this dreadful virus. They risk their own lives and their families for us. They need more than prayers and well wishes. They need all necessary supplies and equipment on hand in order for any type of reopening. Put yourself in their place,. Lives, all lives matter.
Lee	Accommodation	Please look into providing restrictive and best practice guidelines to hotels and restaurants in order to allow these businesses to accept guests at an initial reduced capacity beginning May 1st. Also, recognizing that these guidelines may need to be more or less restrictive in certain cities, counties, age groups, etc., please ensure that these guidelines recognize these specifications so they need not to be reinterpreted, reduced or expanded by local municipalities. Direction from one source is imperative, statewide, and should also be a mandate put forth by the State. Thank you for your time and service to our wonderful state!

AMERICAN OVERSIGHT

Clay	General	I realize we are fighting a deadly disease. I am immune deficient. I am use to staying home and I have a specially made mask. We need to re-open our state with some restrictions. I know a lot of people out of work not getting unemployment because of our dilapidated system. My granddaughter has not received hers and she is single on her own. People have to feed their families. Food Banks cannot keep up with the demand. People with health problems, hypertension, diabetes are not eating appropriately which is going to increase their problems. Depression is increasing in people that has never had it. Nurses ARE being laid off. Hospitals are not full. Put restrictions on businesses. Must wear mask, take temperatures every day before working, washing hands between waiting on people and disinfecting tables and areas, safe distancing of patrons. All stores continue special hours for seniors and people with health problems.
Escambia	General	My concern about reopening is that there is still a lack of availability of sanitizing items such as disinfectant wipes, sprays, hand santitizers etc. It is nearly impossible to find these items. How can we fix this issue? I work at an essential business that has remained open and order supplies, but have not been able to order the mentioned supplies in over a month. How can we be sure businesses are able to sanitize effectively during this time of reopening? Also, would like the antibody test to bw more widely available to test for possible immunity.
Okaloosa	Recreation	I am a Tikis boat Captain in Destin. We have been shut down over a month with no income now. Our boat only carries out 6 people maximum, open and outdoors. To me opening these businesses up will be safe and effective for people's income to get back to work. We follow all guidelines with keeping boats 50 feet apart and less than 10 people. We have germx onboard and masks if needed. We are open air and sunshine. Once to our destination people get off the boat and swim. I understand large groups or packed vessels, but there are many tourist attractions on the water such as ours that would be social distancing and abiding by the guidelines. We have to get back to work before we are all homeless and lose vehicles and utilities. Even if it is temporarily only available to locals who need to get out of quarantine or get some much needed sunshine. We all have to find a way to get some normalcy. Please open up the beaches and our waterways so we can make income on what already is a seasonal income and the clock is ticking. Thank you
Palm Beach	Management	Ready to go back to work, but unable to collect unemployement because system didn't work.
St. Johns	Tourism	When the state does open up, people from EVERYWHERE will flock here to escape and they will bring the virus with them. I believe the state borders and hotels should be closed to out of state tourists and the experiment of reopening the economy and the tourism industry should be for state residents initially. I am very concerned visitors from hot spots will flock here in mass numbers and spike our curve. The theme parks and beaches will become Petri dishes. Open the theme parks to Florida residents first, then out of state residents and later on to international guests. People need to get back to work but we need to take care of our Florida residents and employees before we accommodate evacuees from hot spots. #floridafirst

AMERICAN OVERSIGHT

Broward	General	Please look at the authentic numbers of cases and put it all in perspective and open up our state!!! Please!!!!
Palm Beach	Recreation	I live in a condo complex and we have about 38 acres within the gated community. Our pools, tennis courts and gyms are closed. I would like to suggest that the decision on opening of recreation facilities within private properties be assigned to each of such private entities, as long as the state guidelines are required to be followed, i.e. distancing, wearing masks etc.
Lee	Healthcare	The state shouldn't reopen until there is a therapeutic medication to kill the virus or a vaccine to prevent the virus. People and governments are in too much of a rush to reopen and people will get lax at following guidelines and we'll be back to square one or worse.
Escambia	General	With numbers rising it is too dangerous to open right now!
Pasco	General	The economy, economy is people, can't survive being isolated, unproductive. Too many will lose all. Businesses and homes. Protect yourself. Those that don't think they've been isolated long enough can stay isolated. We can't knowingly allow people to lose what they have worked years for! Some can not recover.
Hillsborough	General	Do not reopen the state. Keep the public and essential workers safe.
Sumter	General	I am only one person, but I am very concerned for the welfare of our economy, and hope that we reopen as soon as possible. Thank you
Hillsborough	General	Everyone SHALL be required to wear a face mask which will protect each other. Hair salons barbers, tattoo limited appointments so only a few at a time masks and new pair of gloves for each customer. Bowling alleys masks and gloves limit number maybe half capacity. Restaurants of course face masks remove seating so patrons are at least 6 ft apart. Throw away menus(suggest to owners maybe even limit food items to the most popular which will help restaurants from having to buy alot in the beginning) Massage parlor require masks even during massage.
Broward	General	Both myself has been furloughed by our jobs from hospitality business. With two kids I wish I could say I want to have everything opened but that isn't what we need. We should follow Doctors,researchers specific guidelines when to open up. As much as I hate not to be able to go to the beach , phasing opening out seems like a good idea. Hair salons, spa, where physical contact a must should be in the very last phase. We want to be safe . As safe as possible. Another help from government will be needed. We also have not received unemployment benefits despite that we have filed a long time ago. Hope it helps.
Pinellas	Recreation	Open beaches, restaurants at minimum.

AMERICAN OVERSIGHT

Duval	General	Please make a campaign to encourage the use of masks as we reopen. Still so many are not using them. I think if we can make an encouraging campaign to normalize the use of masks more will do it. Support businesses who will ask their customers wear masks. This may also help those who may have to return to work sooner than they prefer and also encourage those who do not wish to be out to maybe go out and support their local businesses. Masks, masks, masks. Paper, cloth, with inserts, etc.
Broward	General	It is way to early to be opening the country back up, we have no vaccine and there is still thousands of people with the virus. I believe if we open back up without a vaccine we will spread it worse the second time then the first time. We will he losing innocent lives who have been avoiding getting the virus. Is the dollar really more important then Americans lives!
Charlotte	Professional Services	I would like to see a reopening soon of hair and nail salons. It could be by a county-to-county level depending on the outbreak. And it should be by appointment only, masks worn by both nail techs/hairdressers and customers. Also limited amount in people in each shop depending on the square foot size of the shop. Also take the temperature of the customer before allowing in the shop. Strict rules about cleaning work stations after each customer. Also dog groomers could reopen without having contact with the dog owner except to drop off and pick up.
Polk	Professional Services	Open up the fricken state. This is ridiculous. People need to get back to work.
Orange	General	Open the economy at once. This is doing nothing but destroying economy and people's lives. Open parks, boat ramps, beaches, nature trails and everything that should have never been closed that allow people to get away from it all and unwind. The governor even commented that hospital occupancy is lower than before all this crap started. That tells me it has been way over exaggerated and blown completely out of proportion. And the fake survey that says Floridians want to keep things closed now a joke! Nobody wants that. People want to work and get on with our lives and to end this political motivated mess!
Volusia	General	Re-Open Florida: I think as much as I would love to have everything more accessible again we have to be cognizant of the average age and health of the general population. We need to have more availability to testing both for the virus and antibodies and be able to treat effectively those who need care for severe cases of the virus. We are still a long way from having this highly contagious disease under control in this state and elsewhere. The tourism industry is vital to Florida, but that just makes everyone more vulnerable. Please proceed cautiously.
Duval	Education	Please do not reopen Florida nor Jacksonville. We clearly have high rates of infection rates and who knows, there are so much more untested but are infected. With that, it could be unknowingly spread more and infecting more people. Thank you.

AMERICAN OVERSIGHT

Collier	General	Thankx Gov DeSantis for the awesome job you are doing for us Floridians. You certainly have our health and best interests first and foremost. I would like to see elective surgeries open. My husband had one cataract done the morning that it was announced later that day all elective surgeries must stop. These are not done in a hospital. But an eye center. It's been almost 4 weeks now and one eye is clear and the other getting harder to see out of Also if you open hair salons, limit the customers in there at a time? And both client and hairdresser masked. Same w nail studios..these people are really hurting through this. Restaurants open outdoor seating only at this time? And socially distanced? For 2 weeks? See how that goes? FYI I am 66 years old and work for a major airline at RSW and have had to go to work everyday. I am a ticket counter/gate agent and are in contact w people everyday and cannot social distance when we have to take their luggage credit cards see their license etc. ..but we are taking any necessary precautions we can to remain healthy. Thanks again for your relentless hard work and putting This awesome task force together.
Bradford	General	Governor Kemp reopened Georgia and today, for whatever reason, folks from Georgia are flocking to Florida. We still have rising numbers of Covid cases and deaths resulting from same. Now, with people headed to Florida, we can expect more of the same. Most folks are wearing masks and gloves, taking the proper precautions, but I see many that are not. These same "are not" ones, will spread Covid. Open if we must, but in tiny increments, counties with the least amount of cases first, then on down the line. I for one, am not going to stop wearing my mask or gloves in public spaces. Thank you for the opportunity to voice my opinion Best regards
Pinellas	General	Please open up Florida. The longer we stay closed, the more time it will take to recover our economy and more and more people simply won't be able to recover. We will see a marked increase in applications for government entitlements as businesses and restaurants close permanently, many jobs will be lost. Anger, depression, suicide, addictions, families at risk, will increase and strain our economy further. Taxes will need to be increased and this will force the price of goods and services to increase, as well. Please let at least those Floridians who are of low risk, and those who need to earn a living to feed themselves and their familie, get on with it. Thank you for your consideration.

AMERICAN OVERSIGHT

Palm Beach	General	If many antibody studies are now showing a death rate of .5%, with a disproportionate amount of these deaths in older and at risk people, then there is absolutely no reason to not open up the economy. Protect the at-risk and let the rest of us mingle. It is actually safer to have us mingle and create herd immunity now, in less time, rather than let it spread slowly and have these people at risk for longer periods of time. Safest option is to open back up! I appreciate DeSantis taking it smart and slow, and that when national emergencies occur, some restrictions may be appropriate. However, my right to life, liberty, and the pursuit of happiness is taken away, it better be for a very good reason. Right now, it' appears that the cure is becoming worse than the problem, and that concerns me a lot. I consider myself a rational and reasonable person, understanding that there needs to be a balance, but me and the rest of my friends are all loosing our patience with this. Be smart, but you need to start creating some sort of relief plan now, "let out some steam" , so that there is not a huge explosion. It would be politically wise to give SOMETHiNG on May 1st, so that people feel like there is progress being made. That will go a long way in calming nervous people.
Hillsborough	General	We desperately need the economy to be restarted sooner than later, people are getting desperate and mental wellness and health is deteriorating for many. More testing is needed, as long as there is ample testing, then targeted mitigation can be enforced as not to shut down the entire economy of Florida again as the safer at home orders are lifted. There needs to be a defined plan of action to address opening up the economy that is transparent and communicated with all Floridians effectively.
Osceola	Government	THE FACT THAT THE VIRUS CAN be spread thru the air conditioning, we need to keep buildings closed until it is safe for those on the front lines can remain safe and healthy! We should shelter in place till June 1st
Pinellas	Retail	Dont open to soon. We only have one shot at re opening.
Pinellas	General	The state is not ready to open up yet. We are still seeing high numbers even though we are plateauing. When there are reports that we won't see our spike until June, we need to listen and heed their warning. I appreciate the closures of school for the rest of the school year. But hearing that beaches are opening up in various places, some packed full of people, shows that while people are happy to get out of their house they are not willing to listen and take precautions. The same will happen if you open restaurants or even Disney. Even if they limit the amount of people getting in, the crammed line out the door will be where people could get infected. It's just not safe. Please think of those of us who are high risk and wait to open up the state. Thank you.
Lake	General	Please reopen the state. Failure to save our economy from collapse will result in more harm, to include deaths, than this virus. I appreciate your consideration.

AMERICAN OVERSIGHT

Volusia	Professional Services	I am a Licensed Massage therapist. I work in an 8x6 room and see upwards of 12 people a day. A lot of them over 60 or immune compromised. I myself am immune compromised. I am in this room 30/60/90 minutes while breathing others inhalations. The Florida Board of Massage has not updated their website since February about COVID. I need to know what Phase I'm included in. I would assume Phase 3 as there is no way I can socially distance with what I do but I need direction as I have an employer. When everything opens up what am I supposed to say when I hear 'Well everything is opened up get to work' when I know through my education that what I do is NOT safe for the public and COVID spread I'm the near future. OSHA has us a medium exposure risks as well.
Okaloosa	Recreation	Its time to allow people to go back to work. The spread in our county never got out of hand and only affected a fraction of a percent. 3 deaths are attributed to the virus, but one was a friend of a family member and the family says it was a known heart issue and when they treated it as Coronavirus it possibly cost him his life. Allow people to make their own choices and protect and support the most vulnerable.
Leon	General	I think the state needs to stay closed. I am concerned about the impact on the health of the citizens that opening will have. I believe the economy will be hurt more if we open too soon and the population gets sick. We need to prioritize the health of the citizens over everything else.
Pasco	Food	I'm a server, working at a small restaurant, I can't pay my bills. Unemployment is a joke. It's been over a month and I haven't received any help from the state. This is unreal. Open back up so we can go back to work. I'll take my chances. Mask or no mask, I need to work to pay my bills and eat. Thanks
Sarasota	General	It is my strong opinion that we wait until scientists and medical experts say it is wise to reopen state. I applaud our leadership for not reopening schools at this time. Before reopening is an option all hospitals need to have ample stock of what they will need in regards to PPE and ventilators, etc. Hospitalizations will increase for all reasons after reopening. More car accidents, etc. The system needs to be prepared. From my understanding of what is being said, there will be a resurge of cases once reopened and possibly/ likely in the winter. We are poised to be prepared ahead of the curve. Have what is needed on hand rather than scramble for it and put health care workers at greater risk. We are doing this. We are in it already and it is working. Why open up just to see numbers increase and people die?
Palm Beach	General	I do not understand why golf courses are closed. They should be reopened with restrictions--walk or one person per cart. I can't think of many other activities that are easier to be socially distancing. Outdoors, sunshine--healthy!
Orange	General	Please open the library. I am a senior citizen and need to read. Both the libraries and book stores are closed.
Hillsborough	Food	I think we should re open but have limitations basically a trial to see if the number of COVID 19 goes up or not and if it doesn't then slowly stop the limitations

AMERICAN OVERSIGHT

Palm Beach	Administrative	I have two teenagers and a heart condition. As much as I would love for Florida to re- open, it is way too risky and too soon. We are a tourist area and people esp from northeast come down here often putting even more strain on our health care system. We have to be responsible and do this only when there are enough valid tests and a cure or remedy for this virus. Kids going back to school or me going out there to work with a heart issue is scary. Money is not more important than life. We need to help single moms and people in need. Get unemployment working to relieve tje financial burden on us or propose for more stimulus help. Please. Most don't enjoy isolation and quarantines, however, this is the situation we are in and to be reckless or greedy will only set us back. Stay closed, acquire tests, get food and money to your people in Florida, keep borders to Florida strictly monitored until we can heal properly and be tested and cured if we get this. I surely don't want to have anybody I know, most importantly my family to get this virus.....To me, we should stay quatantined until testing is sufficiant, until we know if there is immunity once you get this, and/or there is a cure or remedy to keep.people from dying. In the meantime, people need your help and not just words. Unfortunately, people who contract this if mild walk around in public bc and say they don't have it infecting people. I know for a fact that there are people going to work with thid virus knowingly infecting people but need money so they work. That is the Reality. People are selfish and this goes on everyday so NO...it is not just asymptomatic people we have to worry about, it is people walking around inconsiderately as well. That is why it would not be prudent to open up before things mentioned above are in place. It would be RECKLESS AND GREED MOTIVATED. NOT PEOPLE AND THEIR LIVES.
Palm Beach	General	It is my understanding that the Commision is looking for opinions on reopening our beautiful State of Florida regarding covid-19. As the mother of an ICU COVID RN in Palm Beach County, and a resident of this great state, I urge you to slow down and do not reopen completely. I am not understanding why you are not making it mandatory for everyone to wear a mask when in public. If we were all protecting one another, opening up slowly might not be a bad idea. But just suggesting that people do things will not be successful in fighting the 'invisible enemy'. Make it mandatory like you do seat belts(Social Liberty attack, my ass!)! If you insist on reopening our great state at the cost of lives , the least you can do is use the slogan "NO shirt, NO shoes, NO mask, NO entry!" I have never been more disappointed to be a native Floridian as I am now!
Broward	General	Please keep us alive. Not at least until June
Bay	Finance	Residential Insurance Mediation under the FL Dept of Financial Services - please add a law that allows these to be done via phone or video so mediators and insurance adjusters do not have to travel throughout the state and meet at public libraries. This has been has been done temporarily due to covid-19. It been very effective, made scheduling easier, and made the process of getting claims resolved faster. It needs to be continued and an order is necessary. Thank you.

AMERICAN OVERSIGHT

Alachua	General	Dear Governor DeSantis and Task Force, PLEASE OPEN FLORIDA. I am a small business owner of a pool hall/ sports bar (with no food, just ocassional food trucks outside) in the city of Gainesville, FL. We have been completely shut down with no revenue since March 17, yet our monthly bills continue, and our small staff is out of work and displaced. We can definitely maintain any cleanliness or social distancing guidelines within our large interior and exterior space. No one at risk comes to our establishment. Additionally, I work on the Heart to Heart committee at our local schools' PTSA , taking care of lower income children in our county. These families where parents were already struggling financially are now STRUGGLING, and in some cases STARVING AND ABOUT TO BE HOMELESS. Yesterday a mom I delivered groceries to said she had a slow leak in her tire and did not have quarters to use the air machine at the gas station to fill it. PEOPLE ARE GETTING DESPERATE- PEOPLE ARE GETTING ANGER- DOMESTIC BATTERY AND CHILD ABUSE AND EVEN SUICIDES ARE ON THE RISE IN OUR COUNTY. Please open Florida. Thank you, Kim Cinque
Volusia	Professional Services	As a Barber and a Cosmetologist I am terrified to go back to work. Yes there are new guidelines for safety but it only takes one person to mess it all up at my job for people to unknowingly get the virus. I have elderly clients with health issues at risk. I have my parents and grandparents at risk. I'm the only one in my family that deals with the public so obviously I would be the reason the virus would enter my household and get my family sick. Opening back up is going to do more harm than good. Honestly I do not trust my job with my health, my family's health, and my clients health. You can't guarantee me the everyone in Florida is going to abide by the new protocols for health safety.
Lee	Retail	Businesses need to open. People are ready, they can do it while keeping safety there number 1 priority. Beaches open to the public with limited hours to start open every other day.
Sarasota	General	Although I think Desantis has done an amazing job, this non-sense has been carried on too long already. OPEN THE STATE before you do any more irreparable damage! It was obvious weeks ago that the foretold devastation was all a lie. If the purpose of the economic and societal destruction was to 'flatten the curve' and let the hospitals prepare for the onslaught of bodies, they were ready weeks ago and would not be sitting at 40% capacity and laying people off. The curve turned flat and downward starting April 2 and has been declining ever since. The numbers referred to are irrational and baseless. This entire ordeal is an unconstitutional overreach by all divisions of government and must stop immediately!
Lee	Real Estate	Until testing is readily available to all that need or want a test, we should wait to re-open the state.

AMERICAN OVERSIGHT

Marion	Healthcare	i feel that the state should reopen when we see a decline in sickness. People are still going out without regard. If you allow to many people back out you are going to see a greater influx. I know marion county has seen no decline in cases. Please continue to put safety over profits.
Lee	General	Please reopen everything for residents only for time being. NO Tourist. See how that goes
Monroe	Healthcare	Relaxing the stay at home order could significantly increase the death toll from the coronavirus, most medical professionals are warning us. Health officials continue to say that the best way to defeat this virus is to order nonessential businesses to stay closed and to KEEP STAY AT HOME orders. As a nurse, I am pleading with you to NOT reopen the state until the medical experts say it is safe. Do the right thing and you will save lives.
Brevard	General	Please do not "open" our state restrictions regarding the Covid 19 virus until health officials are reasonably confident that the threat to us is very low. In a state where so many are "at risk" because of age and underlying conditions, it is imperative that we protect everyone. Our older citizens must not come in contact with those who have impatiently demanded a less restricted environment.
Pinellas	Healthcare	I feel that the public does not understand the full impact of the virus and do not take pre-cautions as instructed. If restrictions are relaxed the public will take less caution and think the virus is no longer a threat. When the second wave hits - more will resist restrictions and guidlines. The old adage "give an inch - take a mile" I have an adult child who is a Critical Care Paramedic and whose life is on the line everyday taking care of people who are sick including those that selfishly did not follow the guidlines. Please, do not re-open the state for another 30 days. - Thank you.
Lee	General	I think Florida should reopen immediately. This virus has been overblown in the news and people are losing their businesses . It is ridiculous to allow this to go on. Our economy is dying. Whoever doesn't want to venture out , can stay home. The rest of us want to live!,,
Taylor	General	Are you reopening dance studios? Please keep them closed a little while longer as they can not adhere to strict physical distancing. There is more than 10 students in a class and in the older classes they have physical contact in there dance. They practice for a recital and have more than 10 or even 50 people at the recital.
Marion	General	This has to be done slowly or we will end up with more cases . Things need to be reopened very slowly to see how it goes. Perhaps open restaurants with limited capacity but no gyms, or personal services that involve direct contact. But....now is not the time....we have cases climbing steadily. We need more testing, including antibody testing in all counties. I realize our economy is tanking but we can not risk people's lives despite of that.
Lee	General	I think Florida should OPEN! If people want to stay home no one is making them leave their homes! We can be safe and open the state! We have go to get people back to work!
Orange	General	I am vehemently against opening the economy at this time. I did not see any doctors or scientist on your committee. That tells me money is more important than people and their families.

AMERICAN OVERSIGHT

St. Lucie	General	If you can shop all isles if Wal-Mart you should be able to shop anywhere. Restaurant should stay carry out only fir 30 more days. Lifeguards on every beach open and enforce social distance. Beauty shops can open with masks only and only 1-1 ratio within 6 ft.
Lee	Government	I believe that the re-opening of the economy should be done in stages and slowly. I base this on the experience I had when visiting the grocery and the pharmacy. While I was wearing a mask and gloves, the great majority of people were wearing neither and were not practicing 'social distancing'. Since, by my observation, many people were acting irresponsibly during the peak of the pandemic, opening the economy will convince them that no further caution is necessary.
Palm Beach	Recreation	Open the parks, reserves, etc. Do not open the venues for those area. Give people and families a place outside their homes. Give people a place to exercise. Allow fishing in the wonderful lakes, allow immediate families to enjoy the outdoor. Golf courses could be open.
Martin	Manufacturing	We must get the state back to work before we're driven into poverty. I understand the need to protect the vulnerable but at what cost? Livelihood over lives.
Hillsborough	General	Reopen the state!!!!
Lake	General	I do not think we are ready to reopen. Despite what is said in the Media. Social Distancing is not happening in this area Specifically the Villages. I am a nurse and greatly concerned of the surge in cases we are seeing in addition to the lack of concern in the area as well as not following direction. Very few wearing masks, no social distance at all literally had a person cough on the back of my next yesterday when I was out to get my monthly groceries. At least with the restriction there is a scrutiny but if we reopen it will be a bigger free for all then it is now. I really think things are just getting started here in the villages. Not what is being reported in the villages and this community spans three counties. Please help us healthcare providers and do not re open yet. Please lets make sure these cases are slowing down first!!
Broward	Recreation	Please re-open the public boat ramps. I have been boating and diving in this state for over 40 years an have rarely, if ever, been within 6 feet of anyone who wasn't along with me when launching, diving or pulling out my boat. I understand the reason to keep the beaches closed but this shouldn't apply to boat ramps.
Marion	General	Although the Chinese flu is serious, the media and the liberal Democrats are blowing this way out of proportion trying to inflate the numbers of deaths that have been related to COVID-19, help the people who are out of work at this point for no reason of theirs and small businesses need help now we don't need to be adding all these liberal ideas and things into the stimulus package take care of the American people now this is such a disgrace there's a lot more going on here then just try to protect people from getting infected especially when you see the Democrats putting in the bills they want to give to the Kennedy foundation keep open abortion clinics may God help us.

AMERICAN OVERSIGHT

Osceola	General	I think we should wait to reopen until our curve has gone steadily down and that we are testing and tracking. Reopening should also stress distancing as well as sanitizing and face masks. I don't think the governor should he political in his decision at all and should do what is right for the people
Brevard	Recreation	I am a resident of Brevard county within 10 minutes of the beach. i have a pass to Jetty Park. I would like to return to my almost daily walks at Jetty Park on the pier and my grandchildren playing on the beach and at the playground. I suggest that if you would like to re_open slowly you might start for just pass holders temporarily. If this is too much perhaps group by odd or even addresses from FL licenses or by alphabet; i.e., A-M certain days N-Z others. Of course opening all the parks and their surrounding restaurants would be ideal. Such a healthy Florida resident lifestyle. Pedestrian and family friendly. We always traveled with our hand sanitizer as any citizen should be happily encouraged to do all year. But especially during any flu season. The other situation is gyms. I am a senior citizen and their are certain exercises I simply can't set up at my home. I have been doing a great job retaining my fitness up to now but feel like I am starting to stiffen up in certain areas. i need the gym for my health. I believe it is essential. Please consider people like me in your re-opening decisions. And thank you for the good work you are doing for our communities! I believe our Governor is doing a great job and have high hopes for his task force covid-19 recreation task force . Sincerely, your friend, Holly Olsen
Polk	Food	Opening to soon , may cause the virus to spread like wildfire
Pinellas	Finance	Open the state back up!!! Our freedoms have been stolen. This cannot continue. People need to work.
Broward	General	I live in Broward County and think that first of all we need anti-bodies testing for everyone to see how many residents have already had the coronavirus. If the majority of the population has had it vs. the deaths than the ratio of deaths is much smaller and the state can open back up. Although I'm fortunate to still have a job my heart breaks for those that don't and are struggling to pay their bills and have food on their table. This is not fair to them so we need to find a quick solution. Without proper testing we don't have the right data to know the impact of this disease. Once opened up those that suffer second ailments and the elderly should make their own decision of quarantine until there's a vaccine but the entire state shouldn't suffer for a small population. As far as schools opening back up let them just finish the rest of the school year remotely and reevaluate in August when the new school year starts. We as humans fear the unknown that's why we need anti-bodies testing and rapid 5 minute coronavirus test to ensure that employees can be tested before going into work each day.

AMERICAN OVERSIGHT

Hillsborough	Healthcare	I do not believe we should reopen the state until we have enough tests in medical facilities (not just hospitals, but doctors offices, urgent care centers, and skilled nursing facilities), all medical facilities have an abundance of PPE, and the number of novel cases in our state is on a continuous decline for a minimum of 4 weeks. It is too risky to prematurely open the state as it puts ALL lives in danger.
Polk	General	I do not believe Florida is ready to reopen entirely. I sympathize with all those out of work since I am also one of them. However, until testing is up to speed we are not ready. You should be focused on fixing the fiasco with the unemployment system. I luckily have additional income but for those thousands of tourism jobs who rely on a weekly paycheck it must be sheer devastation. But what do the politicians care, they have not fixed this broken system for years. Now there is a price to pay and the low income Floridians are unfortunately the ones who are paying. Why are there so few tests being done? Why are there still shortages of PPE? It is a disgrace for this country to be in the situation it is. Heaven help all of us if it gets any worse. GET THE TESTING DONE and when it's at a decent negative results per capital then consider getting the economy back on track!
Escambia	Healthcare	We have a small Dental Office in Pensacola, Florida. We have been closed for over 4 weeks. We have 8 employees and one dentist. Please open up all Dental offices. We already practice infection control above and beyond what is necessary We don't know how much longer we will be able to keep the office open if it stays closed much longer. We have spent countless hours trying to get UI for them and weeks to get the PPP. WE NEED HELP NOW! Please please reopen Dentists ASAP!

AMERICAN OVERSIGHT

Pasco	General	Opening the state to early could result in even more deaths than we already have. Floridians as a whole Have already proven that they cannot handle basic social distancing guidelines. And have no regard for other life. Throughout our block down people have proven that they are irresponsible disgusting and don't understand hygiene. Opening our state to early will surely results in a lot more deaths. Not everyone is taking this seriously enough and they don't seem to understand the repercussions of their carelessness. Personally, I have loved ones who could be susceptible to this virus. As a result my mother has stayed home for now 40 days. Opening the state to early would prove her efforts fruitless. Most Floridians would prefer the state to have tigher Constrictions. There are too many people deemed essential that are not essential. A haircut is not essential. Fast food is not essential. There should be stricter guidelines for all Florida residents. there should be more repercussions for not following the stay at home orders. People should be understanding that a few months of staying in lockdown is a lot better than dying and being in a casket. The irresponsible masses should be held accountable for their irresponsible actions. Even if you are not in the age range or have previous medical conditions that may make you susceptible to this disease you may still be a carrier and You in turn may be responsible for causing somebody Else to become ill. It should be noted that your civil liberties are not more important than other peoples lives. A few months of a stay at home would be a lot more feasible if our unemployment systems were properly in place And being expedited properly for people that really need the help. If we could get the help for the people who are out of work less people I'm sure would be protesting for the state to be opening back up. There is absolutely no reason restaurants fast food restaurants drive-through's are considered essential. I understand the thought process behind this is to preserve life for those employees to the best of the company's ability but it is just another reason for people to leave their homes. Do Not open the state just yet there are plenty of people who are either infected and don't know in spreading it around to others or people who are affected they know and they have zero regard for anybody else. It's a scary world we live in. I think martial law should be put into affect and then hopefully that'll cause people to actually get it together. Thank you for taking the time to read this
St. Lucie	Management	open some regulations now. Like interior painting, cabinet installation, furniture delivery and trades work at condos. The owners of condos need to get things done, the trade people need the work some are one or 2 person businesses. They are all suffering. These are all low impact businesses RE distancing. Yet they are all vital to the property owners, to the business owner/operator, and they are all vital to the economy.
Bay	Tourism	After Hurricane Michael hit the Panama City Beach outlying areas, it's taken 18 months for many people to get back into their homes. Within weeks, rumors of Covid19 hit which then shut down most of the businesses. Since Panama City Beach is made up primarily of Condo's, Hotels, Restaurants and various other businesses, the shut down of the beaches is devastating. Opening only partially is still costing these businesses huge losses of revenue which has resulted in many furloughed or lost jobs. Please encourage the City of Panama City Beach City Council to completely open the beaches. People are calling daily asking when the restaurants and beaches will be fully operational again and ready to book! Please open the Panhandle for tourism.

AMERICAN OVERSIGHT

Lee	Tourism	Please reopen Florida! The coronavirus has impacted All Phases of life and will completely destroy our economy if businesses don't reopen soon. The economy is tanking I will take a long time to recover. We are in a recession, and heading into a depression. I'm retired and living off money I invested in the stock market life must return to normal! Thank you for allowing us to share our opinions.!
Clay	General	People are losing their small business. We can't pay our bills with no unemployment. This alone is a disaster. We the people demand you give our freedoms back. Open the pools, beaches, restaurants.. Etc. We need our livelihoods back. I voted for you sir. Please don't let Florida down. Get us back to work..
Seminole	General	Please open the state back up. Many are suffering.
Hillsborough	General	I was sent home from work April 3 because I am over 65 your order only said senior citizens must stay at home that was so wrong social security doesn't start until 66 1/2 I called your office did not get a call back emailed twice no reply I am asking whatever you do to start opening the state do not discriminate because of age Please be sure the Governor gets to read this I bet you don't even mention it to him
Duval	Education	As an elementary special education teacher at Mandarin Oaks Elementary and a mother of 2, I believe schools should remain virtual for a long as needed for the safety of teachers, students and caregivers. Over my 17 year experience in the classroom in Duval County, the amount of bodily fluids, sneezing, coughing, puking, nose blowing, etc that I have witnessed would turn anyone into a germophobe. I have been sneezed on, coughed on, had boogers on me so many times it's disgusting. I also have a thyroid issue and a sensitivity to histamine, which both suppress my immune system. I am no match for this virus. It is not possible to contain the spread of germs in a school. I have seen stomach viruses and the flu spread through class after class like wildfire. This past December, in my daughter's middle school language arts class, 25 kids dropped like flies from the flu in the matter of 2 days, which then spread to us caregivers at home, myself included. The point is that this is in middle school where the kids are independent and know how to cover their mouths and hands - and it still did not matter. It spread throughout the school like wildfire. The outcome from the spread of this virus in a school setting could be absolutely catostrophic. Schools do not need to open back up until it is safe. Duval County has a virtual platform that is amazing and needs to be continued until this virus is no longer a threat, no matter how long that may be. I believe it should be considered for Duval and the state of Florida to remain virtual for the upcoming school year 2020-2021. Thank you for listening.
Brevard	General	The # of infections are not going down so why would you place citizens in harm way, stop trying to pass the buck you know what the right decision is stand up for right
Hillsborough	Management	Don't be a turd, Ron. We need widespread testing, including those without symptoms, before we can reopen. You also need to require face covering for all people in public places. Research shows that if everyone cooperates, the infection risk drops. Don't put all of our lives at risk Show the world that even though we elected you, Florida is not actually a state full of idiots.

AMERICAN OVERSIGHT

Palm Beach	Recreation	Please allow condo associations to reopen their pools with the social distancing rules. I have arthritis and swimming daily helps with the pain. It has been so long since I have been able to swim. I am a low income senior citizen living on social security. This affects everyone and I am suffering from not being able to swim. I also would like to walk on the beach where it is cooler in the late afternoon than around my neighborhood. Please consider reopening and hopefully the citizens of Boca will follow your guidelines to stay safe. Thank you for all you do.
Broward Polk	Construction Healthcare	We need our economy running again. Research from the Federal Reserve and the MIT Sloan School of Management indicates that prematurely stopping pandemic mitigations will have a devastating long term impact to our economy. https://papers.ssrn.com/sol3/papers.cfm?abstract_id=3561560 Concurrently, a Sloan researcher has published guidelines on how to reopen effectively. https://mitsloan.mit.edu/ideas-made-to-matter/how-to-restart-economy-a-post-pandemic-workforce We need broadly available, effective testing available in order to re open. It is a hard pre requisite. We need to observe 14 days of reduction in cases, death, and hospitalizations. This is a hard pre-requisite, otherwise inter and intra state travel will cause an even stronger resurgence of the disease. A second wave will destroy our economy. We need to make sure that we are investing in the long term, not the short term. Please make sure we are making decisions based on facts and analysis, not emotions. At your service, Dan Nutting
Orange	Government	You do not have the authority to tell two consenting adults they cannot voluntarily exchange labor for money. You do not have the authority to tell free people they cannot leave their homes. You are not a dictator. Rescind these unconstitutional orders now. Don't cave into the pressure from misguided social distancing warriors. They are but a tiny vocal minority. Just do what you know is right and do it with confidence and conviction. If you do this, you'll win re-election in a landslide, trust me.
Brevard	Accommodation	Allow vacation rentals at hotels at a percentage of maximum occupancy such as 25%. Allow vacation rentals at smaller establishments)i.e B&B to rent all rooms allowing a 14 day interim between rentals.

AMERICAN OVERSIGHT

Lake	Recreation	PLEASE open beaches, small groups of youth sports, gyms, and outdoor recreation. My children, specifically my 4 year old is severely depressed. There has to be a better way to protect the vulnerable without killing businesses and killing jobs. The youth of America are now suffering far more than they would from what is mostly a mild virus. The curve has been flattened. I own a small gymnastics business and we will not survive this if it continues much longer. We MUST re-open. This is largely an overreaction. Sweden is doing it right. Herd immunity through youth and younger healthy people will be the best protection for elderly and vulnerable. We cannot continue to ruin lives. There are many business that will never recover, and children who can't get their childhood back.
Brevard	Healthcare	I am writing today to ask you to consider staying shut down for a little longer. I understand that people that are at home are bored, tired of staying in the house and financially worried, however the focus needs to be on the healthcare at this time. Healthcare workers are the ones that have to explain to residents and loved ones why they can not see each other, why they cannot leave the community, why they can not do group activities, etc. The residents are the ones who are declining mentally from being less active then ever before. The healthcare industry is concerned that opening up so soon will cause this too reoccur which means, the residents and loved ones have to be on lock down longer than they need to be. This means each week anxiety increases for loved ones and residents, declines in cognition, and risk for physical declines and more. The only way that we can get back to some sort of normality and safety is prolonging the shut down to make sure we do not have an influx from Easter weekend. While we may have been shutdown, most people felt it was okay to have block parties and family gatherings for Easter Sunday. It is too soon to tell if these gatherings caused the spread of COVID-19. I ask you to please wait to reopen Florida again. Thank you for your time.
Hillsborough	General	I believe the governor should NOT reopen the state so soon especially when Covid 19 cases keep increasing. He's just asking for another mass virus spread and for the state to become another hot spot. People will not follow social distancing and there isn't strict enforcement of those CDC guidelines. If people knew they would get fined or even arrested for not following CDC guidelines in public then MAYBE reopening would be somewhat successful.
Lake	Transportation	I personally think we need to open everything up again. This disease is not going to go away. Staying at home and doing nothing and destroying our economy is not going to make COVID-19 go away. We can't make one major problem into another major problem. We can't have a pandemic and a great depression! I know the disease is bad I'm not trying to minimize that. I'm just saying that closing everything down is not going to cure the disease. So if there is no endgame to this then we need to open up.

AMERICAN OVERSIGHT

Miami-Dade	General	This is more inline with Miami Dade. I feel if the residents of Miami Dade use caution súcubo as social distancing and proper face mask, we could certainly and gradually open up small business and stores etc. not sure if this would be possible with law enforcement but I see a lot of young people in our country doing as they please and totally ignoring all the protocols to keep safe. Maybe if the state starts giving citations we would be better off. I'm all for opening up business and getting back to some sort of normalcy. But I feel if something stricter like citations where people need to pay and be hold accountable especially the younger generation who is clearly ignorant or just stupid in doing what the state has been saying from day 1. Social distancing and wear your masks when you go out. Thank you for all your hard work Governor! We appreciate you.
Hillsborough	General	Until new cases of covid 19 stop Florida and the us should stay shut down... more and more new cases every day.... are the citizens life worth nothing
Sarasota	General	We need to open all our businesses again now. Millions of Floridians are unemployed with rent overdue and hungry children to feed. The public is now well aware of how to minimize the risk of being sick from this virus. Restrictions are strangling our economy. Lets get back to work now!
Palm Beach	Professional Services	I am a salon owner. I think if businesses are able to open masks should be required for service providers and patrons. To keep both businesses and its patrons safe.
Sarasota	General	I think it's time to reopen FL fully. As a single Mom of 6 who had just lost her job of 20 years right before this, I need to get working again. My ex husband is also not working , and not providing child support. I've lost my health insurance, but do not qualify for Medicaid due to other circumstances, but now can't afford medical insurance for my kids who have significant medical issues. I need to get back to work to get on insurance and provide for my kids. This virus isn't as serious as we all thought, and I am well enough to work, my children's long term medical issues would not be effected by the virus if they got it. Please let us get back to work, I do not want to have to cash in my 401k to survive, when in my late 40s I shouldn't be touching. Please open up FL fully to all businesses!
Brevard	Healthcare	More tests need to be available and people need to be tested, especially antibody tests. Continue social distance and require masks in stores., etc. Slowly and safely open the state?and the woeful and pitiful unemployment system, Florida should be ashamed and thus needs to be fixed NOW! People are in dire straits not be able to work.
Polk	General	Make it a law that Everyone Must Wear Face Masks! If anyone is out in the stores or not exercising, they must receive a fine. It's the one way to start. All grocery stores must still have someone keep cleaning the carts once they are turned in & before they go to a new guest. Anyone seen disposing of their gloves or mask in public on the ground or shopping carts also must be fined. Open areas with limited access to patrons. Everyone needs to be responsible for themselves & others.

AMERICAN OVERSIGHT

Hillsborough	General	Please do NOT reopen Florida. We just had the largest number of cases in 24 hours since April 3. If you reopen, numbers will get worse than that creating an all-time peak. People do not follow social distancing guidelines. You have to keep us closed until there are no more new cases and people are recovering, otherwise this will last much longer than it could.
Okaloosa	General	My family and myself are opposed to Florida reopening. Until there are medical ways to fight the virus ie: vaccines or medicine. The state should remain closed. Florida is known as "God's waiting room". There are so many old vulnerable residents in the area that would highly benefit if the state stayed shut down. Another point is that alot of Florida has beach towns which attract alot of tourists. Tourist= virus threats from outside the local area. Someone that is living in a highly infected area can bring the virus to one of our beach towns and cause an outbreak. The government has done a VERY poor job in this crisis and I highly suggest to look at the methods of other countries (like Canada) on guidance of how to keep our citizens safe.
Pinellas	General	Task Force and Governor DeSantis, While it would appear that the state of Florida is on its way to flattening the curve, please keep in mind what got us to this point. While we didn't become the next New York or Italy, we could have. It was only through the efforts of the citizens of the state, local governments not being afraid to step up, and yes the governor, even if he came to the conclusion the rest of us did a little late. Everyone wants to reopen the state, get people working again, recharge our economy. We, the people of Florida, are dependent upon you, our highest elected official and those he has designated to assist in planning to do this carefully, smartly and based on sound data by actual scientists, not aspirations, ramblings,llining your own pockets and politically charged rationales. Thank you
Polk	General	I think if the economy is opened there should be a stipulation of wearing masks while in public.
Orange	General	I feel the state needs a plan to reopen but at a slow rate of phasing the openings. The safety of our residents has to be 1st priority with our economy right behind that. I think 2 weeks is a great point to start the opening of our state. Mask wearing needs to be mandatory for as long as it takes to keep the virus under control. Businesses need to be allowed to open at a reduced capacity as soon as possible. Our people are needing help and are not getting it especially with unemployment. I feel it is horrible at the end of April that people are still waiting for any money at al- how does Florida expect people to survive? Make mass testing a priority and enforce quarantine if positive
Okaloosa	General	It’s not safe yet! Reopening means exposing retail and hospitality workers like myself to thousands of people from all over the country how selfishly want a vacation. How can we justify putting state income over the life of someone’s brother or mother or friend?

AMERICAN OVERSIGHT

Hillsborough	General	Seems like we should be listening to health care officials, doctors, CDC, people with education and experienced in healthcare fields not politicians who are uneducated in healthcare and are obviously going about this for political gain. Sure doesn't seem like much has gone right. Florida is still seeing peaks and deaths going up. An unemployment system that is failing Americans. We have Floridans out of work with no money. How about fixing some of these things. Should be a slow process to get Florida open. Otherwise we will be shutting down again in a couple weeks.
Polk	General	People are hurting but we should not rush to open. Listen to the physicians, they are the only ones with the public's best interest at heart. Rushing businesses to open with no safety net for their employees should they become ill, and with no provisions for child care, is a recipe for further suffering. Consider if a business can even survive if it's operating at half staff and following CDC guidelines. An thoughtful caring approach needs to be taken. Pictures in Georgia show people crowding barber shops, clients not wearing masks. How about we cool our heels and watch what happens there before jumping in. Remember, this is a purple state, not red, and there are a lot of unhappy Democrat voters right now. Don't let fealty to the president bring you down. You had a lot of support prior to this.
Palm Beach	Food	If Workers with underlying health conditions, weak immune systems ect, are required to stay home once we start re-opening Florida, please MAKE IT CLEAR to employers not to fire these workers due to this situation. Assure these workers that they be able to return to their jobs once government decides its safe for them to return to work. These workers have bills to pay just like everyone else. They are very hard working people who have underlying health conditions they are sacrificing staying home for the sake of their health, their co-workers, their customers and their communities. Thank you.
Santa Rosa	Recreation	I believe the state does need to slowly open. I am an at risk individual who is on chemo for an autoimmune disease. I understand the need for stores, doctors, etc to open for the economy. As a teacher, I think it was the right decision so stay with virtual school. However, I have children who play sports. We travel for sports. It is a huge part of our life. I know local ballparks plan to reopen. I question where youth sports are essential??? I DO NOT believe youth sports should be allowed to resume. Children coming from different towns isn't safe. Tournaments with hundreds of people, even though outside, are not safe. It would be impossible to social distance and that is hundreds of people using the same restrooms. Please consider not starting up youth sports in stage 1

AMERICAN OVERSIGHT

Charlotte	Healthcare	Don’t reopen Florida until the Government gets input from the medical professionals, showing a decline in cases and no new deaths for 14 to 21days, then and only then, open up the more essential businesses first, that does not mean restaurants and bars at full capacity. There still needs to be social distancing to keep new cases popping up and may have to continue to see where we are at until fall, when flu season starts. The less contact we have going forward, the less severe outbreaks during hurricane season and the upcoming flu season. There needs to be strict guidelines to be followed by all businesses to ensure a safe Florida, especially when the snowbirds return.....
St. Lucie	General	YES!!!! Open it ALL up now! Tired of this BS. If YOU want to stay sheltered, be my guest. I plan to use my God given sense and Freedom to NOT stay sheltered and dependent on the gov't!
Orange	Professional Services	In a word caution wins. From my years of experience in the salon industry (41) I do not feel we are a phase 1 business. We work in closer contact than almost any other profession and our services while very important, they are not essential. We are in the beauty/appearance business. We make people “look” good. You can not make that essential no matter how much we would like to. It has been suggested that clients and hairdressers alike wear mask and gloves and that they be changed every client. Is that what we as people want? To take valuable PPE out of the market place when they are still asking all healthcare workers to reuse one mask for an entire week. With all of these strict guidelines that have been suggested elsewhere for salons, who is in charge of seeing that it is adhered to? The vast majority of salons are independently worked. There is little to zero supervision. I have worked in this business since I was 10 years old helping my Aunt in her salon and these rules will not be adhered to. Hairstylist are artists that work from our hearts. We create. We make people into beautiful people. We are free spirited. We are not typically scientific or medically minded. I have loved the salon life from the day I first picked up a hair roller in my Aunts salon. Our time will come again to make the magic we all do so well. This however is not that time. Stay at home for now so the art and beauty that we do can shine bright later. This is the time to put this effort into true essentials as they need all of our help getting restarted now. When that happens,the things that are truly essential and necessary...it will be the time for us but not now...

AMERICAN OVERSIGHT

Palm Beach	Tourism	The original goal was to flatten the curve to prevent an overloading of the healthcare system - that has been accomplished. Our state thrives and exists because of the tourism industry - whether it is beaches, theme parks, golf courses etc and all of that and what it entails MUST be a priority. Communication is key, and it needs to be much better and not so overreaching. The Virus while not the flu, IS similar in that overall the vast majority of people do not experience severe symptoms and that needs to be communicated more clearly. Scaring the people does NOT WORK. Don't scare, just prepare. Masks are not the answer unless people are using them properly. A very public showing of proper hygiene, spreading out tables a bit more, more outdoor seating and encouraging people will work much better than a threat of do this or else. The lack of leadership in PB County has made most of us feel like prisoners in our own homes - relying on faulty models has cost so many so much. Some ideas ... Hand sanitizers mounted outside of each store, designated employees for sanitizing throughout the day. Restaurants opening are critical, much like salons that can be cleaned and sanitized between customers. More automated doors, more locations taking Apple Pay/Android pay. Temporarily no reusable bags. Whatever I can do to help I am happy to do so.
Clay	Professional Services	As a massage therapist, I want to re-open as safely as possible for ALL my clients and myself. Please DO NOT open us until you have made the best possible choices. We should be some of the LAST to open due to direct contact and close proximity. People are not honest about being sick or being are sick people they just want a service. We all need to be protected including the client after the dishonest and the therapist. PLEASE PLEASE PLEASE DONT RUSH INTO SPA RE-OPENING.
St. Lucie	General	I wanted to find out when Florida will start to re-open. I know and agree that it needs to be done safely and in steps. I think we can do that. Thank you all for the steps to take care of the residents of florida.
Lake	Food	Please start to reopen. People that don't want to go out don't have to. Eating out is our main source of family time and to-go orders aren't the same. Our house is small and tensions are high in our household we need to get out. Not everyone is employed and unemployment only pays a portion of what we eere making. We are stuck at home yet retail isn't open to buy clothing that's appropriate for staying at home. Shopping online isn't always an option. Salons are also essential businesses. My nails are so long I am scratching my contacts and I am working from home but makes typing difficult. Cutting them isn't an option as I fear damaging them further.

AMERICAN OVERSIGHT

Santa Rosa	Government	It's time to re-open the economy. If you're sick, seek medical help or stay at home. Protect the elderly who are at risk the most. These are individual choices not governments. It's time to re-open the beaches. Beaches in North West Florida are large and wide. No reason to close them. Sunshine, exercise and being outdoors are healthy activities. Not being ordered to confinement by government. This government overreach has gone on long enough and too far. This is the United States of America, Home of the Free. Thank you.
Seminole	General	Require everyone to wear masks in public places and closed buildings. Focus on plan to get small businesses up and running again. Establish a maximum occupancy per square foot. Maintain social distancing as much as possible. Have theme parks limit admission & require everyone to wear masks.
Broward	General	I am strongly positioned on the side that knows, based on facts, that if we don't open businesses quickly in a common sense way that still addresses the virus, we will lose many more people's lives to actions that are causing our economy and society to collapse
Orange	General	It has become clear each day that COVID is not nearly as dangerous as thought!! The MORTALITY rate will be dropping and it is more widespread than thought as well...These issues should have been looked at LONG BEFORE CLOSURES, STAY HOME and SOCIAL DIST!! People PANIC and they see HYSTERIA so they think WAIT UNTIL IT IS SAFE...there is no SUCH THING AS SAFE!! Before COVID are you save from the FLU? PNEUMONIA, DRUNK DRIVERS, AIRPLANE CRASHES, INFECTIONS, HEART ATTACK, CANCER and such...LIFE is a risk and when people say wait until it is safe...THAT IS RECIPE for PARALYSIS and that is what has happened!! Until PEOPLE see people eating out, traveling, shopping, living, working out, going to theme parks, water parks, going to the ocean and they will feel FEAR!! FEAR IS PARALYZING RON!! We are in the GREATEST STATE for SUN, HIGH TEMPS and HUMIDITY which WE KNOW KILLS COVID and HINDERS IT!! We need to CELEBRATE our GOD GIVEN CLIMATE and SUN that GOD gives to KILL COVID and SHOW PEOPLE NOT BE AFRAID!! The more people see others LIVING and DOING their FEAR will subside! The Health Experts have had a HORRIBLE RECORD...the UNDERESTIMATED the ARRIVAL OF COVID which looks more and more like late 2019 and OVERESTIMATED the DANGER and LETHAL RESULTS of COVID DRASTICALLY!! The MODELS HAVE BEEN TERRIBLE!! Ron as the VIRUS is MORE WIDESPREAD here then why SOCIAL DISTANCE? The MORTALITY is much much lower...WHY SOCIAL DISTANCE? We have had this here since I BET DEC or NOV 2019 were the HOSPITALS SWAMPED?? NO? did people fall over NO? Were we alot happier in Dec, Jan and Feb YES and STATE WAS THRIVING!! Social Distancing cannot exist in THEME PARKS, RESTAURANTS, SHOWS, EVENTS why? Because as a people we do not LIVE 6 ft apart and MASKS are separation, isolation, suspicion and misery!! They are not even PROVEN TO HELP and we know the OUTDOORS is least likely place to catch VIRUS...THE

AMERICAN OVERSIGHT

Miami-Dade	General	Florida, at least south Florida is not ready to be reopened. I can't risk my loved ones because everywhere around me in downtown Miami and Brickell has had recent outbreaks of Corona. It is not safe yet to reopen, let the educated doctors take the lead on this. Open South Florida in the middle of May at the earliest anything sooner would be selfish and irresponsible by the government. People's lives are more important than money, we already lost over 1,000 people for not going into a strict lockdown and not quarantined earlier. It is selfish and unnecessary to reopen at this time as so many more lives that could be safes by staying home would be lost.
Palm Beach	Professional Services	I think you need to open up the state, if people are comfortable going out with masks and feel safe they should. If people are concerned they should stay home. It is necessary for the economy.
Pinellas	General	The top health leaders are stating that it is too soon to open our state as we need to remain vigilant on the social distancing guidelines and staying safer at home rules. I understand that economics are taking a big hit right now. But if we don't remain vigilant and the virus spreads faster, businesses and the state of Florida will take an even larger hit and will impact this state for much longer. Please listen to the health professionals and have the courage to lead our state following their advice on re-opening our state.
Brevard	General	think baby steps in reopening. I would start on May 1st with gyms, restaurants at only 50% capacity and even regular retail but with limitations on the amount of people allowed in at a time. I would keep bars closed for now as those are way too crowded and people do not have good judgement when drunk. No parks, amusement parks, move theaters at this time
Collier	Retail	I work in a small clothing boutique on 5th Avenue in Naples and I am concerned about the idea of opening all retail businesses without some guidelines in place concerning the square footage of the establishments and number of people allowed within those parameters. On a normal business day, I am in very close contact with the customers assisting with clothes fittings, fastening accessories, and positioning sunglasses on their faces. Not to mention, the checkout process involving the handling of cash and credit cards and the use of a touch screen signature pad. It would be virtually impossible for us, the employees, to be "distanced" from the clientele in a small shop if we reopened too soon without any restrictions. When the task force looks at reopening the retail industry I recommend that you start with large scale stores that can better practice social distancing and monitor how they are impacted by COVID19 before reopening smaller stores.

AMERICAN OVERSIGHT

Orange	General	Fix the unemployment website Expand testing Leverage the resources of the State University System to accelerate research for therapies and vaccine development Fix the sieve structure of the tax code to broaden the tax base and overcome shortfalls in the state budget Expand Medicare and Medicaid Expand the Food Assistance Program Don’t be Georgia
Pinellas	Healthcare	I would suggest re-opening slowly once the numbers have trended down. Not if they are trending up or at a plateau, since they would likely trend up. I would leave room to close again if needed. It would make sense to reopen beaches with strict measures to continue social distancing, limits on groups and 6 ft apart, etc. Police would likely have to monitor the beaches to ensure compliance. Areas like state parks and smaller beaches such as Honeymoon island may have to limit the number of people coming in. But as long as social distance guidelines are followed I would understand reopening nature to the world. I would suggest continuation of social distance measures in grocery stores, pharmacies and limiting capacity in restaurants to start out, when the time is right.
Seminole	General	If Florida reopens, then everyone should wear mask if going out in public.
Indian River	Accommodation	We have been isolating in our RV in the same park, everyone around is doing the same but some of the parks will not allow you to stay more then 2 weeks. So allowing many of the RV parks state parks to use the RV sites will help with reducing the movement. Florida is home to many full time RV'ers. Please open the RV slots back up.

AMERICAN OVERSIGHT

Orange	General	There are so many areas that coronavirus closures have impacted, it is impossible to choose just one! I am a healthcare worker whose place of employment has been closed. I work for a wonderful company who is still paying us to work from home for the most part, but my husband, who is a PA in dermatology, had to sign a waiver of employment contract because his company closed multiple offices, resulting in a huge cut in pay. I want to see the state open up again in a cautious manner. If some businesses, such as grocery stores, big retail stores and others can continue to operate using social distancing and wearing face masks, etc. then I think most other businesses should be allowed to open as well. As for beaches, they should also be opened as long as they are patrolled and social distancing is enforced. Sunlight and fresh air are some of the best things you can do at times like this. In addition, it helps so much with a person's mental health to be able to get out and see other people, participate in life again and feel that they have not lost everything. So many are hurting financially and emotionally and prolonging this isolation is having devastating effects on people. For those who have a great fear of this virus, let them stay home! Nobody needs to force them to come out in public if they are afraid to. But, in turn, there are a lot of us who take responsibility for our own health and don't appreciate having our freedoms taken away from us when we could easily do the things we want to do while maintaining social distancing, handwashing, etc. Has everyone forgotten how deadly the regular flu has been in the past? The flu season in the winter of 2017 killed over 60,000 people in the United States alone. Nothing was done. No closings, no mandatory curfews, no mandatory PPE, absolutely nothing! No one was forced to get a flu shot if they didn't want to, although I and my family always get ours. There is so much more to be said, but that is enough for now. Please start opening the state (and the whole country as well) by May 1st so people can start living again and enjoying the freedom that this country stands for. As for those who want to stay in lockdown, go ahead and stay locked down, but don't force the rest
Sarasota	General	Businesses should & have to open as soon as possible. People are all ready starting to leave their homes. Traffic & out door activity have increased dramatically in the last couple weeks as I drive for a living. I suggest stores opening with strict guidelines such as temperatures taken at door along with mandatory use of hand sanitizer supplied by the store upon entry, & most importantly, patrons "must wear masks."

AMERICAN OVERSIGHT

Lake	Healthcare	The priority in this season of the Covid 19 is to keep everyone safe. Most of us are trying to do our part social distancing, good hygiene etc., but it's frustrating that we can't get the supplies to implement this. Shelf's at the stores are bare. We live in America this is unacceptable. There are limited testing places in this part of Lake County. Thursday a testing facility was opened at Cooper memorial library. This testing place will only be opened twice a week and you have to pay $20. Why do the people of Lake county have to pay when there's free testing elsewhere?They were testing for both Covid and also a blood test to see if we have the antibodies. The lines were so long. If you got there an hour before they open the wait was over 3 hrs. The mental health of us all is a big concern. Worst unemployment system in the nation! My son in law filed weeks ago and can't get any information. Both my daughters are first responders and after working in the Covid unit for over 12 hrs she has the stress of her husband not being able to get any answers about his unemployment. Their bank screwed up the insurance on their mortgage and is taking no responsibility so they have tried for days to straighten this out to no avail. God is the only one helping us get through this. I understand we never had anything like this before and Trump and DeSantis are trying their best, but the every day Joe is desperate. I'll keep praying for you please help us.
Volusia	General	I am 73, a veteran, relatively healthy. My Doctor thinks it is "certainly possible" that I had the virus in December. I am far, far more concerned with the economy than I am the Covid. This country weathered the Spanish Flu in 1918, the Asian Flu in 1957, H1N1 in 2009 and the flu every winter. There is a vast abyss between concern and panic. Too much of the media is on the Panic side. We need to push forward as much as possible to open this economy back up and make an active choice to live our lives the way we want to. And I don't want to live it in a shell. Final comment- I shudder to think where we'd be now if our Governor race had gone in the other direction. See Michigan.
Duval	Recreation	Please allow us to sunbath and use towels while at the beach. It is proven that UV rays dispose of the virus almost immediately. Also consider the sun interacts with our bodies to create vitamin D, which helps improve our immune system. Not to mention the stress relief of enjoying a beautiful day at the beach. And please also open the beaches completely, not just a few hours each day. It is easy enough to social distance while there, as most of us do keep a good distance from others.

AMERICAN OVERSIGHT

Lee	General	Health is and always will be more important than the economy. If the state is opened too quickly and is poorly managed, the result will be twofold: 1. More death 2. Greater distrust of government and business Those two outcomes will result in consumers refusing to participate in the opened economy and will lead to longer term economic decline. The reopening must be smart and should follow the federal government phases and guidelines. Florida is not ready yet for anything more than the limited opening of certain large outdoor spaces. If this is done poorly, Florida will lose confidence, tourism, and livelihoods. Thank you for allowing my comments.
Pinellas	Healthcare	My mother is in an ALF and is late stage Alzheimer patient on Hospice. I am POA and have not been allowed to visit nor has my hospice nurse been allowed to come in as of the last two weeks. I am very supportive of the concern to protect our elderly in facilities but it seem as if interpretation to any order directed varies from place to place. It has been 6 weeks now that I have not been able to see her and i feel there needs to be some clear direction for family members particularly of hospice patients and the need for them to receive proper care. It is very unnerving to think that my hospice nurse has been denied access to her patients. If there is not some clear direction soon to these facilities, then my only other option is to bring her home which would be quite difficult. Human compassion needs to factor in on all this. Thank you.
Manatee	General	I believe we should open up our beaches and restaurants this Is going to far when you can even use bathrooms in 7 eleven stores and it is a proven fact that sunlight kills any bacteria and warmth the beaches should not have been closed at all salt water and sunlight kills any bacteria do they should have not closed Florida period, there have been hundreds of bad viruses out there and never once was the country shut now I think this is ridiculous already, arresting people for parking , going to church services, and parents taking children to park and being arrested in front of children that time is uncalled for what do you expect families to do when you close everything down, kids out if school people out of work in danger of losing everything they worked all our lives for. THIS IS A FREE COUNTRY NOT A COMMUNIST COUNTRY, OUR MILITARY FOUGHT AND DIED TO KERP OUR FREEDOM AND YOU ARE TAKING AWAY OUR LEGAL RIGHTS¡!!!!!!!!!!!!
Manatee	General	Not everyone shows signs of being sick, which will infect many. How could you possibly protect us by allowing anyone in the work place. Floridians working paycheck to paycheck can't afford to take off if they're sick. Do you really think people who are hungry, who can't pay their bills will tell you to stay closed?!?

AMERICAN OVERSIGHT

Polk	General	We need to reopen the state as quickly as possible. Antibody testing has shown this virus has been with us for far longer than originally shown and has affected a greater number of people. The number of people who get sick is not much greater than a bad Flu season. Since this virus seems to affect Seniors more, we should keep enhanced protections on Senior living centers, but the rest of us need to get back to work. This state needs its people working before poverty and depression will kill more people than the virus has. We need our parks reopened. Being outdoors in the sun will only help kill off the virus and make the population healthier. Thank you!
Hillsborough	Government	No, Florida shouldn't be reopened until at least 60% residents have been tested. Plus, how can you wear a face mask and get a haircut or get your hair washed, permed, or colored? It doesn't make sense! After the large majority are tested, I can see clothing stores opening, not barber shops & beauty salons.
Sarasota	General	I think we should suspend schools, including online schooling, before the end of the year. Right now, the children are attending and spend about 1-2 hours online, they have to do "homework". It is very hard and stressful for me to schedule 2 children for their Zoom classes, and then keep up with the homework they have to do. Those of us who are responsible, will continue to get on I-ready once a week, but right now the extra classes are very stressful. I would also love to get my hair done, but am very weary....maybe salons could be reopened just to their regular clients, or for those people who are regular clients and appointment only, no walk-ins.
Duval	Healthcare	I disagree with opening up Florida. The main thing is there are still Covid-19 cases being reported daily. You need to wait until there are no more positive cases being reported. If you open to soon then the Covid-19 could be more detrimental to our state. I also think that opening the beaches was to soon. What if this virus is spread again and we have more people die. This could be bad for our state. Thank you. Teena P Cox
Martin	Administrative	Do not open businesses and the state. Until every Floridian has been tested and the positive people are quarantined, we should be told to stay home. To ignor the rise of cases and deaths is incompetent, stupid and murderous. Save lives.
Brevard	Food	Please reopen restaurants, we need to work!!
Pinellas	Government	Until there's a definite flattening of the curve our state should NOT be reopened.

AMERICAN OVERSIGHT

Escambia	General	The amount of new cases per day is currently higher than it has ever been, including during the time period in which the stay at home orders were put in place. Specifically, yesterday, April 24th, the US saw the highest one day new case total ever recorded and this is a trend, not an anomaly. From early on, the CDC stated explicitly that the majority of the US population will eventually come into contact with this virus. Florida has only seen 1.5% of its residents infected, therefore the lion share of the pandemic is still ahead of us, not behind us. What logic, based on the aforementioned current trends and future predictions by the CDC, is being used in this decision to relax current restrictions? Is that logic any different than what was planned when the current restrictions were enacted?
Hillsborough	Healthcare	If we re-open we are going to lose alot of lives. I personally think it is too soon because there are thousands of lives still dying daily. DO NOT OPEN PLEASE!!
Brevard	Government	It's honestly too early to reopen Florida. It's understandable that people want to get back to how things used to be but that's not going to happen anytime soon. The lives of Floridians are way more more important than anything else. If we open up too soon we will see more deaths. We need to be a little more patient and stay closed until it is safer to reopen.
Osceola	General	I have been a resident of Florida and Osceola County for nearly 12 years and have often seen rash and unwise happenings. In this time of Global Pandemic, I have been keenly aware -- through cyber connectivity -- of international handling by communications with friends. All too often, my international awareness has caused me dismay over POTUS handling. Fortunately, FL Gubernatorial handling has not mirrored the ignorance of POTUS. In FL the Govenor has evidenced his depth of understanding Constitutional Rights while exhibiting all the best practices of prudence that scientific knowledge can give. Although I espouse a different political ideology, the govenor builds confidence and trust by exhibiting a nonpartisan genuine concern for citizens health first. In my opinion, we all know, by historical fact, economies rebound and severe job loss is not new in the span of time. The economy depends on life and life depends on health and well-being of citizens. I just finished watching the govenors briefing from the Cleveland Clinic (4/25/20). I am encouraged by his wisdom and clarity. I am in the "at risk" population and appreciate his saying openly and with educated conviction such things as: "I am not in a rush (to reopen), ...shopping is more a place of infection (opportunity), ...to open a movie theatre and maintain proper social distancing doesn't seem possible, ...we are only discovering so much of the unknown (so speculating is not valuable without facts)." Of course I may have paraphrased due to just picking from memory of what I saw him say in the broadcast. Bottom line is that he instills trust in the system that governs and guides this state in a time when no living person has adult wisdom of such a circumstance. Please, TASK Force, be cautious and keep Floridians safe and healthy so that in the long run, we are better for having taken the steps with wisdom, and not in haste just to "feel free." False freedom is oportunistic toward foolishness and foolishness lacks responsibility and diligence..... a lack of diligence lets the lurking enemy invade, atrack and kill. I prefer to stay-safely-at-home for as long as necessary.
Jackson	Retail	We need to get back to work. Still heard nothing from unemployment

AMERICAN OVERSIGHT

Palm Beach	Government	I ask that you reopen all business within the state of Florida. I know several people who are running out of money and will soon add to the congestion at food banks. I believe as many do that because the mortality rate of the coronavirus is so low, the people at the greatest risk and their loved ones need to be careful but they also need the rest of us to keep the world going for them.
Hillsborough	General	Reopen Florida in the best interest of he whole state
St. Johns	General	An easy fact based opening after the 2 week decrease in cases. No hair salon .barber or tattoo parlor need to be open during this time. No bars either. Required masks on for grocery stores and pharmacy. A quick open and relapse would be terrible for our economy and safety of us all.
Seminole	Healthcare	Dear Governor DeSantis, Please don't re-open the State of Florida too soon. I understand the financial ramifications, but lives are at stake. People are clearly not responsible enough to properly social distance, gather in crowds and take precautions - thus the need for additional regulations and continued closures. My house is filled with essential workers (paramedic, nurse, security and teacher) and opening too soon will put my family at risk in addition to thousands more. If everything opens too soon, the number of cases will significantly rise again. This will in turn create a burden on the healthcare system and possibly prompt another closure. Please do the right thing! Sincerely, Julie A. Ward, RN, BSN
Bay	General	You have asked for comments about re-opening the state. I realize that there are many people having financial problems now because of the mismanagement of the Unemployment system. And while I know that people need money, you also know that a lot more people need to be tested for the virus first. Not only the sick, but the ones that haven't shown any symptoms. There is evidence that people who aren't getting sick after exposure could donate their blood to help those that are sick. Maybe because I'm in a smaller county, we haven't seen anyone doing this. I hope it is being done in the larger cities. But until this is done, I'm opposed to re-opening Florida.

AMERICAN OVERSIGHT

Pinellas	Government	The state of Florida needs to listen to medical professionals and not lobbying industries looking solely at restarting the economy for their bottom line. Disregarding science and continued best practices has detrimental effects. The government delayed protective orders, jeopordizing millions of citizens and visitors. If we would have been progressive in response, we would be back to normal faster. At the rate we are going with inconsistent legislation, priority placed on business versus human lives, the temporary inconvenience of being unemployed and unable to make income as a sole proprietor of several businesses is fine by me, because the consequence of going to interact with the public without proper protective gear or protocols leaves a risk of medical bankruptcy if i become ill. My father, who lives in a different state, is COVID-19 positive and is asymptomatic. He is a carrier with NO symptoms. He contracted it an assisted living facility where staff were following recommendations. If medical professionals cant be protected and protect patients without 100% certainty, why should I believe that the general healthcare uneducated and overzealous people who publicly picket without protection will do what's best for all. It's obvious they only care about ones self. Little do they realize the manipulation of civil rights and throwing one-liner jargon is not a substitute for actual government and civics education. The government's main focus is to protect and provide a safe and amiable life for all. Where there is an overwhelming majority of people who support staying at home for as long as possible , it seems that government officials lean weary on the small minority that can help them get reelected. If the government officials are scared of their re-election options when disrupting the small minority that got them elected, I would rather have them give up their seat and see what happens when somebody who is competent and reflects the will and choice of the majority is able to do your job.
Hillsborough	General	It would be helpful if people that are employed are prioritized in testing, that way we know which employees/workers can get back to work and which can't. That way we can at least get a part of the economy back up and running. I received my test results today and I tested negative. I would REALLY like to get back to work so that I'm not depending on government hand outs to save me. Thank you.
Santa Rosa	General	SPA AND BEAUTY INDUSTRY***** I believe there should be a very slow and modest approach to the reopening of spas in Florida. As an esthetician, we are in such close proximity to people. Spending a full hour working on the public's faces. Them touching linens and everything else in the room that would cause contamination.

AMERICAN OVERSIGHT

Santa Rosa	Recreation	I am opposed to the reopening of certain places of businesses. As an independent contractor, I have not seen any clients until I feel safe to do so. I also maintain a fitness center which is planning on reopening May 1st. I understand that some counties have not been affected as badly than others. To open beaches, barbershops, fitness facilities in my opinion would be a mistake. We have gone this long without so what would more time hurt when people are still getting sick and unfortunately dying. To social distant in a gym would be chaos as not all patrons sanitize before and after use, you still have people who chose not to wash their hands when using the restroom, as well as individuals who don't wear shower shoes. The list is long on gym rule violations and with added pressure on staff and their health and exposure, it would be an unnecessary risk.
Walton	Accommodation	Please keep short term rentals closed for a while longer. We do not need an influx of tourists right now. Please delay reopening for at least a week or two.
Hillsborough	General	I feel like we do not need to reopen at this time, wait two weeks in May and look at the numbers, if not wait until June. It is not safe for the people to open back up and all of us be in this same situation we are right now. Just please don't open up the state yet until we have better certainty.
Orange	General	Thank you for the opportunity to comment. Floridians understand the tough decisions facing our State right now. And we appreciate the careful thought and analysis given to the reopening of our State. With that, our family urges State leaders not to reopen at this time and to extend the stay at home order for another month. People are hurting financially, yes, but please don't compound the situation by endangering our health more than necessary. The criticism you may receive for being thoughtful and slow will be far less than acting hasty and dangerous. Please keep us safe. Please go slow. Please do not reopen our State at this time. Thank you for your continued efforts on our behalf.
Seminole	General	If the money that was allotted to the state would be passed out there would be a lot less people agonizing but our state is so incredibly inefficient is that why people are complaining . Too many political appointees and not enough brain power. The opening of the state should be done by scientists and not politics
Pinellas	General	Florida should allow only essential businesses to remain open til May 15th After that everything should open up in stages Restaurant and gyms should wait until June 1st
Palm Beach	General	I definitely think that re opening too soon can lead to some catastrophic results. Through history we have seen states that relaxed their policies too soon after Spanish flu had rebounds of infection. I think we have to be very slow with re opening and keep these shelter at home restrictions in place until at least the end of May. I think opening the boat ramps with very strict rules about congregating is ok but the beaches should remain closed. Restaurants & bars should remain closed as well. Saving lives is more important than the economy at this point.
Orange	Administrative	Mail home test kits with a central (multiple) drop off locations One person can drop off for whole family

AMERICAN OVERSIGHT

Sarasota	General	You can open barber shops where most chairs are 6 ft apart anyways maybe say you have to wear mask but I don't think it's needed and restaurants should be open and fallow the rules you used before you shut them down tables 6 ft apart and no more than 10 people together
Lee	General	Regarding the Re-Opening of Florida, I believe the date of reopen should be determined by a medical expert and as far as what should be opened first I would suggest the places that have the least chance of spreading the virus such as open areas. You all started with some parks and trials and that is a great start. We should follow the CDC director's suggestion of opening up gradually and county by county (based on Covid numbers). Maybe beaches next with limited access. Small businesses should be opened before large ones due to the number of people inside the business and the small business needs more help then the giants. I understand we want the economy to open up even though it already is with online ordering but if people do not feel safe out there than opening certain businesses do not make sense as no one will show up. My biggest worry is that we open too soon and the virus spreads even more. From what we are finding out about this deadly virus is that it effects people of all ages. Thank you for your consideration, Linda Magyar
Broward	General	Please open all playgrounds and public parks immediately. I think we should not have public schools summer camp this year to avoid large gatherings. Please open the beach by May 1st. I believe it is too early to open indoors entertainment facilities like movie theater and indoor playgrounds. I would say to open them by June 1st. Restaurants can continue to do pick-up and delivery until June 1st. In summary, let's start slowly reopening after June 1st.

AMERICAN OVERSIGHT

Miami-Dade	General	What we know…fatality rate by age: Under 50 has a 1.9% fatality rate if you have underlying conditions. Above 60 has a 26% fatality rate and is in the high-risk group, especially those with underlying conditions. Therefore, a focused approach needs to be made to protect and sequester those in the high-risk group...the elderly, people with chronic diseases, and the immunologically compromised. Establish groups of health professionals, tested negative for the virus, to tend to those at high-risk. The remaining Floridians should be treated the way we have always dealt with familiar outbreaks such as the Swine Flu and others. Trust Floridians to continue to be respectful of others when coughing or sneezing, washing their hands regularly, and staying home if they feel sick. The vast majority that are or get infected will get over it in days, a small number will require hospitalization. Sending everyone home for an unspecified period has in fact increased, not decreased, risk to those in the high-risk group. For example, unnecessarily closing beaches and college dorms leaving low-risk students no other choice but to travel back home to high-risk parents and family members was an error. Allow Floridians to make their own choices. Those who have symptoms should self-isolate with or without testing, which is exactly what Floridians do with the flu. Low-risk Floridians should be allowed to return to work or school. Stay at home measures, business and school closures, and public areas closures need to be lifted. Follow examples, such as in Sweden, where the most vulnerable remain protected while the remaining population is free to make personal choices. Trust Floridians to stay cautious and help protect those at risk. I for one continue to keep myself and my children at a distance from my parents, who are in the high-risk group. Allow the free market to dictate how businesses respond. Allow businesses, restaurants, and bars to open. Floridians should be given a choice if they want to visit these establishments prompting business owners to respond to demand, to make decisions if and when to open, how to protect staff and patrons, and when to phase in employees and staff as needed.
Clay	General	I would encourage the governor make up for his initial delay. ONLY once the numbers go consistently down which requires TESTING, TESTING, TESTING should we really start to think about it, not jump blindly in, but come to a plan with your constituency having confidence in the plan and you. And you can open things all you want I guess, but can not make anyone avail themselves of those services or support unsafe businesses.
Seminole	Finance	I am an Rn for 38 years still working in a hospital. I am blessed to have not gotten sick and still have a paycheck. Others not so lucky. Open up the economy with common sense. Wash your hands.Hand sanitize often. Wipe down carts cover your mouth with a mask or covering. People need to get back to work.

AMERICAN OVERSIGHT

Volusia	Information	So we have applied for ELID and PPP Loans and have been denied or ignored in our efforts to receive help! We have been 2 businesses since 2002. We have been forced to pay 12000 dollars worth of property taxes leaving us with no working capitial! Our mortgage broker Select Portforlio select gave us a 90 day forbearance but we are expected to pay the 3 months in full plus late fees at the end of the 90 days? With what money? Now we are extending the stay at home order to May 8th!? The cure is becoming worse than the disease! Volusia County has 600000 people and about 200 cases of infection but we are closed for business? Not sure why? I am not saying be careless but we believe we can open up with common sense! If you are gonna ignore our cries for help at least let us get back to work! I am a 16 year US ARMY military veteran, father of 4, registered voter, and business owner please help us!
Lake	Healthcare	I work in a gym that's part of a hospital in Lake County. We serve a large population of senior citizens as well as several thousand general population members. We have 6 staff members and no more than two working on the floor at a time. It would be extremely difficult to keep up with serving our members AND trying to manage all the cleaning that would be required. Exposing our members to one another at this time (very close to the peak of infection rate) would not only be short-sighted, but would put my life and our members lives in danger. Please wait until testing capacity is increased, infection rate is decreased, and people are better versed in social distancing measures.
Pinellas	General	Lives are worth more than money. EVERYTHING but human lives is replaceable even if difficult. Do not open Florida until the scientific and health experts say it is safe to do so. Florida is still on an upward curve, as far as I can see. If we open too soon, how many more infections? Worse, how many more deaths? Bottom line, do the right thing for our citizens, the ones who voted for you and the ones who didn't-doesn't matter now, we're all Floridians. And when you look at our population demographics, high risk Floridians.
Palm Beach	Healthcare	Palm Beach County is one of the highest counties among two others in the state of Florida in death and positive coronavirus. My mother has an immune deficiency, a common cold could rob her of her life. I find it quite difficult to agree with Opening up the entire state of Florida even with social distancing. The two times I have had to go to the grocery store and shop in the past six weeks has been absolutely terrifying for me. My mother lives with me and she's the only family I have so I'm stressing my great concern.
Broward	Retail	Hello, I am 29 years old, I have two auto immune disorders and get sick very fast and easy. I don't want to be in a position that I have to chose risking my life or having a roof over my head. I think opening the state back up before we are ready is not only a bad idea but it's signing the death certificate for people like me who aren't able to fight illnesses off. I do not want to be one of the lives that are risked for the economy.

AMERICAN OVERSIGHT

Santa Rosa	General	Please reopen everything! Open the beaches all day. Do limited capacity at restaurants but lets move on. The emotional, mental and financial toll that this is causing appears to outweigh the toll of the virus, at this point. Look at local domestic violence and child abuse reports. School should reopen early in August to help students “catch up” on what they missed. Re open Florida!
Pasco	General	State needs to stay closed. Even with it closed people dont listen. People are still gathering and not listening to any advice they have been given to prevent the spread. If the state reopens it's going to get worse. It is too soon to open. Hillsborough county in itself only has tested 1% of their population, it could possibly be so much worse than what is being said. People should all be tested to get accurate readings and then decide then whether or not to open the state.
Osceola	General	Hello, I am writing today to ask that we continue stay at home practices through the month of May. I believe that only by continuing the trend of flattening the curve to keep covid from spreading faster. Based on how other countries with strict lockdowns and longer times are now emerging with few to no deaths is proof that it is not safe yet. Our numbers are still going up. I along with other Floridians, are not going to be going out if you open too soon. We are a family if 8 and we plan on staying home through June. Maybe even longer if you reopen too early and numbers go up. We are not going to vacation at all, we are not going back to our old shopping ways or eating out 4-5 nights a week. We had a few in state trips planned before this, but we cannot trust that this virus will be gone now, with the rush across America to reopen. I have lost trust in the government when it comes to public safety with this rush to reopen. A diverse panel of scientists are the only ones who should be determining when it is safe to start a modified lifestyle again. Florida is a huge risk for a second wave due to tourism and I am not willing to risk myself or my childrens safety for money. Thank you for your time.
Orange	General	I think reopening the state this soon is a terrible mistake. It opens us up for a second wave of the virus.
Orange	Tourism	Hello! I work for the theme parks and hospitality (as do a lot of unemployed Floridians). Our state is a big tourist destination and while I would love for everything to be open and ready to go ASAP, I know we can’t without social distancing and safety guidelines. I would like to see the theme parks be open to localities first like the counties and cities they reside in to show people what to expect and get it out into the media, and then start a gradual increase if we keep numbers of new cases low and keep expanding until we hit statewide, then start opening up. Floridians are ready to get out so why not let them so we can start practicing our social distance, teach the city, then the county, then then the state. Open up in phases, keep the numbers low, and grow from there. It’s the only way to make the general public feel safe and that we know what we are doing. If we can’t do that, I’d like to see a guaranteed basic income for those displaced until we can open because it not our fault we can’t work. Thanks so much.

AMERICAN OVERSIGHT

Pasco	General	Dear governor of the state of Florida, we need you to open up Florida. Businesses are hurting and may have to close permanently! Your unemployment is broken! Families are loosing everything! Their is not enough data to support this shutdown on the entire country. Our freedom is being threatened! I voted for you because I believe in president trump! I know your trying and cannot please everyone, however I have to agree with the governor of Georgia! He is doing right! You cannot stay in your house and hide to be safe! We all have an appointment to die and cannot escape it! I want to enjoy life while I'm here. I see crowed grocery stores, home depo, big lots etc, etc. you can get sick there so why not let us go to the movies! This makes no sense. This is not a pandemic! Same amount of people died from the flu! Open up the state! You will be making the right decision! Don't bankrupt Florida! Thank you!
Bay	General	Please don't open up florida just yet.. we are not ready. We should listen to the health workers who say it's too soon to open up, not just open up for tourism. Please think about the health of your people.
Okaloosa	Tourism	Open up for business ASAP. Our community has suffered enough. It's time for people to be responsible for their own actions!
Brevard	General	There are certainly areas of the state that have less cases than others and cases of COVID-19 do seem to be leveling off in some places. But please consider allowing citizens the option to stay in their homes if that's what makes them most comfortable. Many people haven't seen COVID-19 as a threat and continue to go about their lives. But others of us are worried about our health and are staying home and wearing masks when going out. We shouldn't have to be made to risk our lives just like those who want to continue to go out should be able to do so if they please. Mass congregations of people I think have to continue to be limited. No more than 10 people congregating, businesses if open at 50% capacity, people staying 6 feet apart, and masks should continue to worn if that makes you feel more comfortable. We all will continue to be exposed to the virus and until there's a vaccine no one is safe. Opening too soon will cause more people to die unnecessarily. This isn't over after only a month. I think businesses can reopen if they think they can sanitize and keep people 6 feet apart while in their stores. Restaurants will have to limit their capacity. People should be allowed to wear masks while out if that makes them comfortable. No large sporting events, concerts. People will go out if they feel comfortable to do so. This will be a slow process. Please don't rush into it.
Palm Beach	General	Please reopen all of Florida and without mask mandates or required vaccines at any point. The data does not warrant a continued total shutdown. Our businesses need the option to reopen and all natural areas should be accessible! Lead the way, reopen Florida!!!

AMERICAN OVERSIGHT

Martin	Healthcare	Please open Florida and The Dental offices - We are essential business for keeping people healthy and we are well prepared and ready . Our office had to let us go with no PPP loan money coming in (not because they didn't apply) I filed for unemployment for the first time in my life .(Not a good feeling).And no one knows when we will get money from unemployment. The numbers speak - Compromised people stay home - isolate specific hospitals in each area and GET FLorida open for business NOW . Thank You
Manatee	General	They should open up the government. It will NOT make a difference if we stay in out home longer. People are out without a mask. Keeping us in our home longer in gonna make it worst.... What the governments should do open up back everything but make people wear their mask in public.. If we stay in our home longer is gonna be worst. People are worrying about bills. Bad stuff could happen if we stay in our homes. People are worry about their bills.
Broward	Retail	I believe that we should start opening things up as soon as possible, whether that is this week or May 1st. I think all outdoor activities should be allowed to resume. I believe all retail stores should be allowed to open, while keeping the social distancing guidelines in place as the current stores do. Small businesses should be allowed to reopen as long as they can safely do so. I think that after the first phase, masks should become optional, and the first phase should not last longer than 2 weeks.
Hillsborough	General	It is time to start re-opening the Florida economy. Allow stores to re-open, with social distancing measures and smaller crowd sizing restrictions in place. Restaurants seat every other table, and no more than 4 at a table. buffets need to be closed down for now, and maybe new rules regarding them to stop people from physically touching the food, and worse, tasting soup from the ladle. Perhaps buffets need to be attended, more like a cafeteria rather than self serve. Same with public parks and beaches. Facilities that open need to disinfect tables, key pads, counters, door knobs, handles, etc. on a frequent basis, and mandate hand sanitizing frequently for people who are going out. Masks are actually ineffective, and can cause the spread of viruses because people do not wear them properly, and still continue to touch their faces, and air borne droplets can enter through the eyes. If people are symptomatic, they should stay at home. If absolutely necessary to go out, they need to wear a mask to protect others, and they need to practice hygiene measures even more . Gloves give people a false sense of security, they wear the gloves and still touch their face, or consume food, and they don't change their gloves when moving from area to area, and they spread the virus. Time magazine article quote : As the new coronavirus COVID-19 spreads in the U.S., people who are well want to stay that way. But since no vaccines are currently available, the strongest weapons Americans have are basic preventive measures like hand-washing and sanitizing surfaces, according to the Centers for Disease Control and Prevention (CDC). The simplicity of those recommendations is likely unsettling to people anxious to do more to protect themselves, so it's no surprise that face masks are in short supply—despite the CDC specifically not recommending them for healthy people trying to protect against COVID-19. "It seems kind of intuitively obvious that if you put something—whether it's a scarf or a mask—in front of your nose and mouth, that will filter out some of these viruses that are floating around out there," says Dr. William Schaffner, professor of medicine in the division of infectious diseases at Vanderbilt University. The only problem: that's not likely to be effective against respiratory illnesses like the flu and COVID-19. If it were, "the CDC would have recommended it years ago," he says. "It doesn't, because it makes science-based recommendations." The CDC also does not recommend N95 respirators—the tight-

AMERICAN OVERSIGHT

Hillsborough	Education	I am in a category that is considered essential. Having our children at home has been very trying. I have an elderly father that has deteriorated in health over the years including battling cancer, Parkinson's disease and broken bones due to a falling injury. Even though it is very difficult having the kids at home and I do have some at a very young age, I would not send my children to school right now if we are open our schools. I prefer to supper and work long hours, come home to do more homework and wake up early to do more homework than to put my kids at risk which would in turn put the rest of my family at risk. I cannot take the risk of having any illnesses brought to our home. Yes children can rebound easily but the adults that are around them cannot. I support keeping the schools closed. I think until a vaccine is created this is an essential move. The governor has done a lot to help people and I think opening up a lot of these areas would just put us back to where we were on the onset. We need to stop this insanity and people need to adhere to the guidelines to keep everyone safer.
Hillsborough	General	Please reopen the State. If people want to stay home that is their right. Many people did not get checks from the federal government. Stop depriving them of their right to provide for their families. If you leave this up to local governments, Hillsborough County will be very slow to reopen, as their emergency planning group seems to pay no attention to the economy and obviously has no faith in the common sense of the community. I've sat at home for almost a month. What's the point in prolonging this? At some point, everyone is going to get out again and some people are going to get sick. Please don't make these shutdowns a new way of life. I pay taxes. I've never been arrested. I've never gotten unemployment or welfare. My husband and I work. Now our elected officials have decided that our right to work is secondary to this pandemic. Some of these estimates have been wildly incorrect. Before destroying people's lives, shouldn't we have number within a 100,000 range. I've never been more disillusioned with the government than I am now. This pandemic has come with the sobering knowledge that my government really can take everything away.
Miami-Dade	General	Totally Agree in opening the economy in Florida. ENFORCE the basic safety guidelines at all public places and working environment places. ENFORCE the use of FACE MASK all the time. Gatherings allowed for 10 or less. Easy access for testing kits of Coviv to monitor and control the spread. EDUCATE ALL CITIZENS constantly.
Orange	Tourism	I work in tourism (Disney). I trust Disney to open when necessary, presumably after the rest of the state. My opinion is that tourism sector will be fine, and should stay closed until it's safe. If that means most tourist attractions are closed until July or later, that is completely fine! I have been disappointed by how the governor has been managing this situation, but I believe he can make up for it by opening the state in a safe manner.

AMERICAN OVERSIGHT

Pasco	General	1.) Reopen small business just regulate social distancing per guidelines. Big box stores put on a good show outside of bldg., but not practices once inside. 2.) Gas stations need to become full service to limit qty of people handling pumps. 3.). Panhandlers are out again. Pass legislation to eliminate this practice.
Orange	Healthcare	Both anti-body and infection tests MUST be readily available to EVERYONE before FL reopens so that people have the information needed to make appropriate decisions about being around others. I am a 60 year old female with asthma and continued weakness who tried and failed to get an appointment for a test at Blanchard Park. Given that awful experience and articles I've read about ER visiting Floridians being turned down for testing, it seems like the government is managing infection numbers by controlling how many and who gets tested. Until the numbers are REAL and people are able to determine the state of their own health, the state should remain closed
Seminole	General	I would like to see salons , retail , and restaurants with limited capacity. Clearly marked areas to stand and sit and still maintain social distancing. Take temperature and require face mask to be worn while shopping and in the salons. Elective surgeries And dental offices should be allowed to be reopened. Floridians need to get back to work! I believe we are intelligent and can maintain a safe distance and still be allowed to live our lives. Please keep in mind football season is about to start as well. Our athletes need to get back into training and that needs to be a top agenda as well. 😁 Regards Janie Lloyd
Manatee	General	Don't open the state until late May. Keep your eyes on Georgia, Texas, and S Carolina. Let them be the guinea pigs and see what happens to their Covid -19 numbers. Get those checks to people who need them. Organize farmers who are throwing away milk, vegis, etc... and get those items to food banks. Love the idea of allowing pharmacists to test for Covid.
Citrus	General	Open up the stae like Georgia!! This is a big state with counties not affected hardly at all! The hardest hit from virus are obese,old, comprimised individuals,nursing home patients! These people should stay home and practice all suggestions for precautions. People need to work!! I am older and dont go out much but I would like to go to a restaurant etc.PLEASE OPEN THIS STATE UP!
Hillsborough	Healthcare	Please do not let tourists start rushing to our beautiful state! You have to keep in mind the virus is still out there and highly contagious. Public places should enforce using masks and stop allowing people to wear gloves. They are cross contaminating everything they touch with gloves on.

AMERICAN OVERSIGHT

Hendry	General	As far as I am concerned and ALL of the people I am in contact with, feel EVERY business is essential. Its essential to their livelihood. People are smarter than you you give them credit. They will do whatever it takes to be able to work. These people are the ones sheltering and following your guidelines. It's the high risk, retired people in my area that could care less. The ones we are supposedly doing this for aren't following rules but the ones that are are being punished. You are threatening the mental health and well being of everyone that keeps this state going if this continues much longer.
Sarasota	Information	No, we are opening beaches and parks to early. I am afraid opening up too early is more political than for the safety of the public.
Okaloosa	Government	Restaurants need to be open with 50% restrictions They have been trying to maintain with to gos but workers are hurting
Orange	Tourism	Keep the theme parks closed until after vaccination of tourist and resident population.
Walton	Professional Services	The state being shut is killing our small house cleaning business as it is our only source of income.PLEASE OPEN THE STATE NOW!!!!
Escambia	General	Hello, I hope you and your Family's are well. I have alot of breathing trouble I have Copd so I can speak from experience on how hard is for me . I'm afraid that opening to fast I believe that people are not taking this Virus serious enough.I pray to God that the Government would take a little more time to think about people like me and not be selfish that really go's for the the one's trying to open up everything to soon .I'm a student at Pensacola College and I live on SSI half the time my ends don't meet. Thank you and Love and Mercy. Julia Benton
Charlotte	General	We are not ready to be opening up retail, hair salons, barbershop, tattoo parlors. Way too close to easily spread the virus even if wearing masks. The virus can be on your hands and you can spread it on surfaces and being in close contact. People need to be wearing masks 100% of the time while in public.
Broward	Recreation	Pools, water parks and sporting activities can open only pertaining to temp checks before admission. Retail can be opened with masks only. Restaurants, should only be allowed limited seating, temp Checks at the door before entering

AMERICAN OVERSIGHT

Palm Beach	Tourism	The original goal was to flatten the curve to prevent an overloading of the healthcare system - that has been accomplished. Our state thrives and exists because of the tourism industry - whether it is beaches, theme parks, golf courses etc and all of that and what it entails MUST be a priority. Communication is key, and it needs to be much better and not so overreaching. The Virus while not the flu, IS similar in that overall the vast majority of people do not experience severe symptoms and that needs to be communicated more clearly. Scaring the people does NOT WORK. Don't scare, just prepare. Masks are not the answer unless people are using them properly. A very public showing of proper hygiene, spreading out tables a bit more, more outdoor seating and encouraging people will work much better than a threat of do this or else. The lack of leadership in PB County has made most of us feel like prisoners in our own homes - relying on faulty models has cost so many so much. Some ideas ... Hand sanitizers mounted outside of each store, designated employees for sanitizing throughout the day. Restaurants opening are critical, much like salons that can be cleaned and sanitized between customers. More automated doors, more locations taking Apple Pay/Android pay. Temporarily no reusable bags. Whatever I can do to help I am happy to do so.
Miami-Dade	General	Hi , I live in Miami Dade county in Hialeah . I really think the we need to re opening the state soon but right now the cases of Covid -19 still increasing , if we re opening too soon we are going to have a second wave and our economy is going to be even worse , not talking about how many more deaths . THIS IS NOT ABOUT POLITICS THIS IS ABOUT PEOPLE THE GOVERNMENT HAVE TO PUT THE PEOPLE FIRST . We pay a lot of taxes where is the money when Floridians need it .In Hialeah a saw a lot of persons on public parking lots getting together with out protection .
Seminole	General	It is time to open per the federal phased guidelines.
Pasco	Government	It's time to reopen Florida. The economic impact is unacceptable. Floridians know what's going on and how to protect themselves and others. There are more people suffering from job loss than Covid-19. It's time to get back to work.

AMERICAN OVERSIGHT

Broward	Retail	Have a plan to spread out sick people in hospitals if hospitals start to be overwhelmed. We have more than enough space right now. Here in Broward their is no one at the hospital.i was there the other day. People are going to get this and it just is a matter of time. Educated people on it that is doesn't mean you are going to die. You may not get sick at all. This needs to be repeated over and over again. People are confused from the media and they that if they step outside of their house they may die. Reality is that if we don't get the state back open soon they will. We will start seeing hunger and violence. This is unacceptable governor. Use real facts. How come no one is checking up with the people who had it to see if they recovered. The number keeps going up because no one cares about people who have recovered. Open it back up. Every time I watch a update from the governor all people want to say is where is my money? Where is my unemployment? They aren't wanting to get back to work. All they are worried about is sitting at home collecting. The education of this pandemic is terrible. The news as well doesn't highlight any good and keeps digging deeper to make it worse. All the facts point to many things that you are more likely to die from. More people die from car accidents. Did you know more people have died from stress. We are going to end up hurting people in the long run if you don't open back up the state. Have people wear masks for a while till control is restored. That is all. Read the real statistics. Send them out to people. Come on don't ruin our economy and people's lives. People gonna end up committing spice and violence if you don't reopen back up everything. Do what is right and what makes sense with actual facts. Not what people are wanting because they are confused.

AMERICAN OVERSIGHT

Citrus	Education	I would please like to address state colleges. Our son is a grad student at FSU. We support him 100% financially. He has to live in an apartment in Tallahassee. We have to pay rent plus Tallahassee electric even when he is not there, which comes to over $100 per month for utilities due to sewer, garbage, and ambulance fees. He left his apartment Mar 10 to shelter at home with us in Citrus County. We still have to pay his lease until July and his utilities, even though he is not there. We had previously signed a lease for next year at $1250 per month plus utilities starting in August. If FSU does not return in August, it does not seem fair that we will have to pay for the Tallahassee apartment he won't be in. Can there be some legislature to address this scenario if students do not return for the fall semester? I worry about the economic effect on Tallahassee apartment complexes too. Also, I have an idea to phase in students returning to FSU if you are worried about the fall. Perhaps have just the grad students return for the beginning of the fall semester. Their class sizes are smaller, so social distancing would be easier, plus they live off campus not in the dorms. The grad students often are the instructors for courses. They could use classroom space to tape lectures and offer the online courses to undergrads so they could hopefully return mid semester or in January. Another idea would be for Florida students to return first with out of state then international students later. We did not receive any stimulus money for our 22 year old college son, and this worry about paying for his apartment if grad school is not a go for the fall is what keeps me awake at night. Please consider the points I have raised and that you for the platform to bring this up.
Pasco	General	Not at all a good idea to reopen anything until a vaccine is found. This so called "malaria treatment" should not be an excuse. Would you send someone into the core of a nuclear reactor without protection just because we can treat cancer? In fact there should be stricter quarantine policies. I live in a small town, am in fact part of the "essential workforce", yet ever since the "stay safer at home" went into effect, I have yet to see a drop in daily traffic. There's no way that many people in a small area are all essential workers, or doing that much supply shopping on a daily basis.
Hernando	General	Please reopen Florida for business. By all means have companies institute social distancing and cleaning procedures but we cannot stay locked up forever. The longer this lasts the worse it will be for our economy. The cure will be worse than the virus. Thank you!
Pinellas	General	I believe Florida should resume Life as soon as possible. If people want to stay home and deteriorate until there is a cure for the virus that's there choice. So be it.
Orange	General	There is no need to create a wheel. The good thing South Korea has already created the system to overcome global pandemic. All we need to do is copy their methods over. Sure, some may cry over limited freedoms, but we need to push it aside as freedoms mean nothing when hundred of thousands can die by end of 2020 if drastic methods are not implemented. Help your residents by guiding them through tough times.

AMERICAN OVERSIGHT

Orange	Tourism	There shouldn't have been any closure. There should have been guidelines to which a free people can choose to follow. Private businesses could have created their own policies for which free citizens could have made a choice in following, or not doing business. We need to open Florida without restrictions from the gov't only guidelines for those that want to follow. The models were incorrect, the data was missing, decisions was hastily made that has ruined many lives economically. There's antibody studies emerging that this is no worse than any other year's pandemic, and that the measures taken were too extreme. I have not followed any stay at home orders, and I will continue not to follow them out of protest of unjust infringements of my rights to be free without molestation from local state or federal gov't The people have a choice and we don't need a nanny state telling us what is safe for us.
Miami-Dade	Healthcare	As a healthcare worker, we are struggling to stay safe and care for the number of patients diagnosed with COVID19. Opening the state/county to early can be detrimental to many healthcare workers, first respondents, police officers, etc. Citizens, especially Floridians, are clearly not responsible enough to be out in public.
Hillsborough	Healthcare	Healthcare professionals are all saying it’s too soon to open and encouraging people to continue to stay home. Other places are opening up because it is beneficial for the economy, not because it is safe. Also, if the state does open I am not confident that people would take the necessary precautions to stay safe seeing that we are one of the top 10 states in the country with confirmed cases.
Orange	General	I feel like we have to move on.. The research is made to accommodate the agenda of the presenter. Stanford published a study that states infection rate is 50-85 times higher than reported which puts mortality rate at 1-100,000.

AMERICAN OVERSIGHT

Osceola	General	If Businesses provide hand wash/sanitize stations, and masks are required (No shirt, no shoes, no mask, no service). I don't see why we can't begin to reopen our economy. Restaurants might need to reduce capacity to allow 6ft spacing between tables, but as long as employees are wearing masks, and guests keep masks on until food arrives I would be comfortable going back to eat somewhere. The same holds true to our theme parks. Masks all the time, reduced ride capacity, markings within queue lines to designate six foot spacing. Increased sanitization of handrails and such in queues. All should be manageable. Large fireworks shows are problematic for some time, unless the parks reduce their capacity to match what the believe they can safely space out in their viewing areas. While some will not venture out, some will. The theme parks should be allowed to reopen, but continue to work with the State and the CDS to look at park capacities. Initially, profitability may be zero or low, but some income is better than zero income. Theme parks that reopen working with the state and CDC guidelines should also be protected from liability if someone gets sick. People need to take personal responsibility for their safety. Bring hand sanitizer and masks, and monitor proximity to other guests. The longer our economy remains closed the more damaging it will be in the long term. Before the parks can open, we need to see a definite decline or plateau in new cases/deaths. Any adjustments to capacities need to be done carefully, and perhaps a couple of weeks a part. My hope is that Disney and Universal would begin to put measure in place and bring cast/crew back to to work to test those measures before beginning to reopen to guests. the them parks/movie theaters and such may need virtual queuing to enter the park to manage the number of guests in line at screening check points. This is a complex logistics problem, that I have faith that the entertainment industry will be able to solve for. The industry adapted to 911, they will adapt to this until there is a better long term health solution in place.
Bay	Food	Need to restart b4 there is no work left no money to pay house payment bills never received my coronavirsa check because TurboTax how they make account then delete them the irs has no clue what your bank info is no government irs support
Hillsborough	General	Don’t be a tyrant. Let people go back to work. Individuals will decide voluntarily whether or not they’re ready to assume the risk of going back out into the world. Forcing them to stay home is unjust and goes against everything this country stands for. It’s a matter of time before protests start then riots follow. Protect the nursing homes, continue to update the public with new information, stock up on medical equipment, and encourage innovation to fight this and future pandemics. Have the courage to be a leader who says you believe in civil liberties and trust that individuals in this state will make the best decision for themselves and their families. It’s not the governments job to make choices for individuals; we are not property of the government.
Washington	General	Reopening the state will absolutely cause the numbers to spike up but I am of the personal opinion that the faster enough of us contract this virus the quicker it will have run its course. I say open the state for business but keep the hospitals limited for now and keep the nursing homes on lockdown until its ran through the rest of us.

AMERICAN OVERSIGHT

Marion	Information	I do not think it's safe to open Florida just yet please consider waiting until at least May 15th to reevaluate. I am a widow my son's only parent and I'm scared to catch COVID-19. I have been sheltering in place in my home since April 1st. I am not able to work from home so this decision has impacted me financially but I would rather be broke than dead. Thank you in advance.
St. Johns	Healthcare	Adult daughter suffering substance abuse and severe mental health issues. Local behavior health facilitie can't extend an appointment for 6 to 8 weeks. BCBS not willing to cover residential care.
Hillsborough	Professional Services	Governor, As a business consultant I have been fortunate that I have been able to continue my services, with an easy transition to a virtual function, and earn an income. Tens of thousands of others are not. Floridians care about each other and will not compromise the health of our community under any circumstances. I strongly urge you to reopen Florida's businesses and services for the sake of the thousands of Floridians living in a petrifying pergatory. Many of whom facing hunger, An inability to afford medical care for themselves and their children, and a wide range of mental stressors contributing to the fear, panic, and misery of this trying time. Be clear, concrete, and resolute in your guidances and allow the citizens of the Great Sunshine State to get back to work, play, and financial security. I wish you health and wellness as we all get through this together. Please stand to this call to leadership for which we elected you, and of which we trust you to be capable. Hillsborough Co. Resident, Ian Callander
Brevard	General	Disinfecting supplies and toilet paper need to be readily available before any return to work. Companies/agencies/organizations need to implement infection prevention procedures. Until a vaccine or proven and effective treatment is available, teleworking needs to be the recommended option if conducive to business type. Workplaces need to be redesigned for social distancing. Parents of young children need options to work from home, vary their hours, or receive emergency paid parental leave if daycare, after-school care, summer camps, etc. are not available.
Hernando	Retail	In Hernnado county, testing has been minimal. No one following social distancing. I work at Walmart and it public hangout number one. Too many people, too little control. We need a free drive thru testing here. Many of us retail workers do not feel like we're protected. Liquor stores open, grocery open, and people everywhere. Please keep it closed for a month more but be stricter on masks, capacity and testing. Here in our county no one taking this seriously

AMERICAN OVERSIGHT

Duval	Tourism	As a grandmother of 2 young boys and mother of an adult child who are vulnerable, my concern is opening attractions and beaches prematurely. There are those who refuse to follow social distancing. Even keeping them at home, there are adults who must go out for medicine, supplies, and work. There is an increased chance of exposure if the population has this entertainment to attend. Please carefully consider all options before decisions are made, and not the bottom line only. The economy will rebound in time. People may not.
Broward	Management	We need to begin open our state soon , right now people are panicking, we need to give back trust to the people locked down is hurting more then Corona virus , i believe when we begin doing test to everyone we will find out the many more people has been infected with the virus and the lock down didn't worked at all , and in fact this had damage our state far beyond repair, the beginning of the opening need to start now every where and make it the by the end of my every business is open again. Let's look at the same Science facts .
Broward	Real Estate	I have sold Real Estate for over 26 years and am self employed. My husband Is also self employed. His business is remodeling and renovating. We are out of business. We need to reopen on all levels. People have to know it is safe to let others into their homes. We have to be able to pay our bills and we can't. We didn't shut down our state of our country for the Flu or for Measles, or for Polio or for Chicken pox, or for H1N1, or for Polio, or for any other communicable disease! Common sense says we should reopen all businesses in order for businesses and people to survive.
Orange	General	Please wait one more month and please fix unemployment! My children and husband mean more to me then this economic screw up! Please help your unemployed Floridians and keep us home!
Seminole	General	Thank you for having a portal for residents to submit there thoughts. That said, the citizens of Florida have done their part to help flatten the curve and it is now time to wisely and slowly reopen the economy. There comes a point where we cannot afford to have people not working and no incomes for families. Additionally, for those who feel unsafe- they have the freedom to stay home.
Pasco	Management	Somehow Florida needs to open back up on some level. I understand the health concerns, but economy is a big concern. When ole omg back up, people have to have to take personal responsibility.Government can not be responsible for everyone, and those that do not feel comfort can stay in, but we can not survive without commerce. I would love to share more. Chad

AMERICAN OVERSIGHT

Martin	Retail	I work at a unique retail store that has closed some of it's stores and cut back staff at other locations. The Covid 19 virus is still out there across our state. If you start re-opening the stores then people from highly infected areas in the state will start coming to Martin County to do there shopping. If this happens then the outbreak here will explode. I take care of my elderly father who is at high risk due to age and underlying health issues. I can't imagine bringing the virus home and infecting him just to get paid $13.00/hr. We need to be smart about this and not rush into opening places that have a higher risk of infection due to shoppers/employees being in close contact. Please think of the potential for doing more harm than good! I know people that have died from the virus and also some that have gotten very sick from it. The state needs more time to heal before we start re-opening non essential stores.
Walton	General	We must keep short term rentals closed. I am a small business owner in a coastal Community, Santa Rosa Beach. Our cases of Covid-19 spiked during Spring break but subsided once the tourist left. Our economy, including my small business, relies on tourist dollars. However the health and wellbeing of my neighbors and family is not worth a couple of months income. I am familiar with economic hardships beyond my control. In the mid 80's I moved to Florida after the economy in Louisiana tanked due to oil prices. I learned to save for a rainy day, good lesson that has served me in many ways. Some people may be learning that lesson now. Our County Commissioners held an emergency meeting last week to open the beaches which will bring a flood of tourist from states with high numbers of Covid 19 cases. Most of the public commenting to open up rentals and beaches were out of state rental property owners. They do not live or vote in Florida. Follow the Federal guidelines. Do NOT open nonessential commerce until the cases are on the decline. We are still on the upswing and you are killing your constituents with a rush to make money. Follow Disney and Seaside's lead, watch what they are doing.
Pinellas	Healthcare	I pray that careful and knowledgeable consideration is being taken in regards to opening dental offices for routine care. It is not mandated at this time to wear N95 masks when treating patients. The aerosols that are produced when using our equipment, the proximity that we are at when treating patients and the proximity of other patients in different treatment rooms all needs to be in consideration. Knowing how fast and easily spread this virus is quiet frankly scares me to work in someone's mouth at this time! We are not in a safe enough state to go back for routine care at this time. So many times when we work saliva and debris will fly into our hair, hit our foreheads or even go over our glasses and hit our eyebrows or eyelids! Times that by 8-15 patients a day without the proper PPE. We are doomed to be exposed and spread this virus. Numerous reports put Dental professionals at an extremely high risk for exposure to this virus. PLEASE don't let this fall in deaf ears. Sincerely, Registered Dental Hygienist.

AMERICAN OVERSIGHT

Sumter	General	My Real Estate business here in The Villages has changed over the past month due to Covid-19 regulations. Virtual open houses instead of physical open houses, which is a big deal where I live. But the biggest change was the early departure of seasonal visitors and the cancellation of those that were coming in as I'm sure was the case throughout Florida. Although we have been living life a little more fully here than those in some other places, the lifestyle here is still much less than the norm. That being said, the health and safety of everyone is of utmost importance. For the most part, people here in The Villages who have other medical conditions that make them a higher risk for severe illness or death from Covid-19 are not going out. The rest of us are helping them with shopping, dog walking and any other needs they have, and can continue to do so until it is truly safe for them to get back to a routine life. I strongly feel that we have to open businesses like salons, barber shops, governmental offices, financial firms, services and associations (like RALSC Realtor Assoc.), retail, restaurants, really almost everything with certain restrictions in place, depending on the type of business they are and the manner in which they operate. The wearing of masks is an easy restriction to live with, as is the use of gloves, if people are properly washing or disposing of used items. Keeping surrounding areas sanitized is a difficult taks, but wearing masks and gloves will help to keep people safe. I know restaurant owners in another state that are feeling a terrible impact, which I'm sure many here feel as well. That field may be one of the more difficult ones to open in a manner that is safe for both workers and patrons, but it really has to be done soon before these restaurants reach a point where they can"t recover from this. We need to open in a limited fashion, places of worship, entertainment and sports areans, with less occupancy allowed for the time being. These events can be supplemented with free streaming services from places of worship and with pay per view options for entertainment and sports. I do think that we should continue with virtual communication in addition to or instead of physical meetings whenever possible for business meetings, seminars, educational classes including public and private school through grade 12 (through end of school year) and medical visits that don't require actual physical interaction with the doctor. Medicare and the V.A. have already approved virtual
Hillsborough	Recreation	please open state parks and forests to day use on May 1. camping can be at later time..need public lands to get outside in the sunshine
Pinellas	Professional Services	Hello, I currently work in an upscale salon and spa in Wesley Chapel. As a professional nail technician, i would highly suggest that both technicians and clients wear masks and technicians also wear gloves. Also the idea of having a plexiglass barrier with slots for clients arms/hands. Before the stay home order the salon staggered appointments so that we didn't have alot of clients in the salon at once. Also we already did deep cleaning, we wore masks and gloves. I do have lots of ideas that could work for alot of the industries. Thanks.
Brevard	General	Please DO NOT lift the shelter in place orders until the CDC or other scientific organizations say it is safe. It is too soon. Please pay out unemployment to those economically affected, and support expanding federal relief programs.

AMERICAN OVERSIGHT

Palm Beach	Healthcare	The Governor's rush to reopen Florida during this healthcare crisis is irresponsible and dangerous. With over 30,000 cases and over 1000 deaths we are obviously not in any way prepared to handle this problem and reopening the state before the disease even peaks is reckless and will undoubtedly cause more cases, leading to more deaths. Do something about actually helping people that need the help but carelessly reopening is going to hurt far more than it helps.
Orange	Management	Both anti-body and infection tests MUST be readily available to EVERYONE before FL reopens so that people have the information needed to make appropriate decisions about being around others. I am a 60 year old female with asthma and continued weakness who tried and failed to get an appointment for a test at Blanchard Park. Given that awful experience and articles I've read about ER visiting Floridians being turned down for testing, it seems like the government is managing infection numbers by controlling how many and who gets tested. Until the numbers are REAL and people are able to determine the state of their own health, the state should remain closed
Pinellas	General	I think an extension would be good. We have come to far to go backwards now. I work in healthcare and I see the cases slowing but not enough to put the public back in the public
Pinellas	General	While I do understand the importance of opening up there needs to be strict guidelines that are monitored. Yes people need to get back to work but at what cost. I feel leaving Florida closed for a little longer say the middle of May wil give more time. Businesses need time to prepare properly. Opening beaches and parks will bring people out in millions. I think travel should be banned at least till July and then only in the states. No one belongs traveling out of country. People should wear masks when out, and summer camps need to cancel field trips and have children stay at the camp.
Broward	General	No matter when the state opens the virus will still be there. However I do feel like if you had arrangements made for any strip hotel stay or whatever that they should accommodate you for that loss that was made because it was at no fault of anyone's that this happened.
Hillsborough	Tourism	I am employed as a Travel Agent by AAA Travel. Our Travel industry is going to take a long while to come back. In the meantime, I believe you definitely need to open certain businesses slowly. People have been confined to their homes and as soon as you open the gates, its going to be like a wildfire. I believe the elective surgeries should come first, then public parks, restaurants with strict guidelines as to how many people can be inside at a time. You almost have to treat this as if youre letting your child Out of the house from being grounded. Have to monitor how people are going to behave first. The last thing we need is this Virus to come back with a vengeance.

AMERICAN OVERSIGHT

Volusia	Government	Cases are still on the rise and opening this soon will most likely start another surge .. Most of the people i have spoken to are very scared and think its unsafe to reopen this soon ... THERE MUST BE AT LEAST 14 CONSECUTIVE DAYS WITH A LOWER NUMBER OF POSITIVE CASES AND APRIL 23 WE HAD A HIGH OF OVER 1000 CASES IN FLORIDA ,.. WHAT DOES THAT TELL YOU? THIS VIRUS IS STILL OUT THERE WAITING TO SURGE AGAIN IF YOU LET PEOPLE OUT ...Volusia and flagler counties continue to have more cases each day out peak is comming
Lake	General	I'll be the first to say that I didn't want my husband to be out of work. He's the bread winner of the family and was furloughed from both jobs. However, I maintain that I want to hear from health officials on the re-opening of the state. I'm not a doctor or a health professional but it stands to reason that since herd immunity can't happen unless millions more are infected or a vaccine is available, we will just end up having to close the country again. I've read a new study about the younger people who are asymptomatic are having major strokes but testing positive for covid-19. This thing is scary. Remember, you are hearing from a mom of 2 who has a husband who lost 90% of income, can't get through the unemployment system (aka no income), and wants her husband to go back to work...but not so soon. Not without an effective course of treatment.
Orange	Real Estate	All of the information people depended on, leading to the shut down of our economy, is false. The models were all wrong. The death numbers wrong and manipulated (ie labeling deaths as covid19 even when they weren't tested). Ron DeSantis needs to lead the charge, be bold, and open this economy in Florida full throttle. There is no need to pussy foot around as, day by day, businesses are dying and not coming back. Open the state without qualifiers.
Brevard	General	Florida's stay at home order should rescinded, including outdoor parks, beaches, and hiking trails. Those that are vulnerable need to stay home and be protected while the general population needs to get back to life and business. Our immune systems and our community will benefit from those who can be immune becoming immune as well as getting fresh air, exercise, and access to the oceans. The collateral damage from these shutdowns is going to be greater than the benefits at this point. Not only are we keeping children at home on computers more rather than outside, but we are seeing an increase in drug related issues and abuse which have lasting consequences as well. That is without even mentioning the people who can't work, pay their bills, and feed themselves because of the shutdowns. I am fully aware of the reasons for why we are doing this, but we are throwing the baby out with the bathwater so to speak. We are trying to solve one problem by creating many more. The reports coming from hospitals saying that the heart attack and stroke patients that would usually come in have all disappeared and the assumption is because of fear of contracting corona-virus, are these people dying in their homes? I understand there are counties with much worse situations than mine and in that case let's look at opening county by county, but these blanket orders are causing widespread collateral damage in order to solve shortages in small, specific areas of the state and country.

AMERICAN OVERSIGHT

Broward	General	The number of Floridians who have lost jobs is astronomical. These jobs are not coming back. The delay in reopening the economy has placed the welfare of the elderly and immunocompromised above the welfare of families. Parents are no longer able to pay their mortgage, money for food is running out. I read a statistic that for every person who died, over 500 people lost their jobs. This is unacceptable. We must reopen our economy immediately. People who are scared, sick or vulnerable can still remain in quarantine until they feel safe but the remaining residents should be able to open their small businesses, go back to work and begin the Herculean task of rebuilding. Additionally, any measures that people want to take to protect themselves, masks or vaccines, must remain voluntary. Americans have the right to decline medical procedures that have risk. Vaccines cannot ne the exception. Masks have been shown to increase respiratory problems and most people are not wearing them correctly anyways. Further, making masks mandatory increase fear. With the mortality rate declining everyday, the fear should be directed at the possibility of increased suicides, children left without parents and not for a virus that is killing less than 1% of our country with an average age of 80.
Pasco	Tourism	I am asking for two things. One is open up community pools. I need to swim again. Swimming laps is a safe way to get exercise. Also it would be nice to go to a theme park again My vote is start opening
Pinellas	Management	Do not feel there is enough testing being done or even available to establish baselines for thoughts of reopening the state. There are nursing homes, ALFs, prisons that need testing, help with staffing to insure those folks safety. Feel the state needs to be more open about deaths and concerns about these folks and facilities. No the state is NOT ready to open up without endangering more deaths.
Santa Rosa	General	Open up small business in places that are not impacted as much as other areas. We had one but because of this we lost it entirely when the money for loans etc. ran out.. Healthcare can still be kept as it is now but on a scale to which area it is located. Might as well keep schools closed but will children have to renter the same grade? Tourism has suffered and places should be open to help get the economy going again. Florida is a Tourist state. Agriculture needs to already be going, the virus has nothing to do with growing food that i know of. If you look at it logically it all goes hand in hand together.
Pinellas	General	Let's get the ball rolling! We cannot let our economy go further into the abyss! Open everything up now!

AMERICAN OVERSIGHT

Broward	Recreation	Hello, I believe it is in parent you open beach and boat ramps up, there is absolutely no reason for the boat ramps to be shut down that is very un American and it pisses a lot of people off. I am not a rocket surgeon but the fact I've lived in Florida all my life allows me to know that wind coming off of the ocean is much cleaner than anything in the city therefore the beach is a very safe place and it's very very frustrating, I live in America and if I want to go to the goddamn beach I should be allowed to this is absolutely ridiculous open the GD state back up all this BS needs to end I feel as if I'm living in a communist country. There was a mother with her baby in a park in East Fort Lauderdale sitting on the grass in a police officer over his microphone yelled at her" to get out of the park or face arrest" Disgusting. Governor I think you're doing an excellent job and please try to open us back up it is killing everybody monetarily wise, I don't want handouts I just wanna work and be able to come and go like an American is supposed to be able to without harassment, all Publix is were out of meat and I can't even go catch fish due to not being allowed on the beach!! Shameful I know sheriff is only doing job but do you give somebody to much power and a lot of negative people take that as they can do whatever they want so sheriffs and police are taking advantage as well by harassing people that are trying to get exercise or just walking to GD Park which they cannot do. Shameful I know sheriff is only doing job but do you give somebody too much power and a lot of negative people take that as they can do whatever they want so sheriffs and police are taking advantage as well by harassing people that are trying to get exercise or just walking to GD park which they cannot do. HopefullyThis will come to an end shortly but it has dire consequences as to the public relying on the government,Which the Democrats obviously want everybody to do so they can look like the good guys
Osceola	Real Estate	I think its time to start reopening in the phases. We're supposedly ahead of the curve ,& this financial burden closing the state needs to end. Ppl are out of money, unemployment is taking too long to process because of the number of ppl applying. Smsll businesses are being denied their insurance claims. I am a state licensed public insurance adjuster & I am helping snsml businesses with their civil authority curfew claims & the insurance companies are changing the perils to deny coverage. We'll gladly talk to someone about this. These businesses need to pay their bills & their landlords are not working with them. In fact many of them were unable to get funding & their landlords are saying pay or we're evicting you. The landlords have expense too& those expenses haven't stopped because of the pandemic. How many more cases of child abuse are occurring because of the state being shutdown & the stress? How much has our murder-suicide & suicide deaths increased because of the sttess? Start opening up & apply guidelines. Ppl are suffering. Start antibody testing to get numbers of projected cases so we can move forward.

AMERICAN OVERSIGHT

Hillsborough	General	it should continue to be stressed to all medium and large companies that all employees that can work remotely continue to do so for as long as possible to continue to promote social distancing. While the current trajectory of the 'curve' is low, an extended work from home mentality will continue to help immensley.
Pinellas	General	I think we can open is slow and safe. However we need our supplies like Clorox wipes, hand sanitizers, mask and assurance extra sanitizing will be happening in open areas. I have a 70 year old husband who has had 4 open heart surgeries I'm scared for him! We can't find supplies when we go even during senior hours!!! We must do this right the first time. Protect us and please lean on these manufacturing of supplies to step up. Sincerely Deborah kennedy
Santa Rosa	Tourism	I'm concerned about tourists coming in from states that opened without following federal government phased guidelines, such as Georgia, South Carolina, and Oklahoma. We can't afford to be myopic or short sighted about the harm that premature "normalcy" could cause. We need to pay attention to science and the experts and forgo the temptation to listen to those who are using an emotional response to a crisis as their basis to make decisions. We need testing. I have been waiting for a call back from our community health line for almost a week. I've had zero response from an overwhelmed system. We need testing before a reopening plan evolves.
Pinellas	Healthcare	Florida's elected officials need to take the danger posed by the COVID-19 pandemic seriously and NOT prematurely re-open the state.
Bay	General	Please open the State under the Phasing recommendations from the President. While I believe we need to get back up and running, I believe we must use common sense and make sure we are responsible and deliberate about the process. We must use care not to put lives at risk in this arduous task by moving to soon to get back to normal. Sincerely, Lorrie Buschmeyer
Marion	General	We have a family of 10 3 different families living under one roof. 2 with disabilities 4 children under 7 and myself and my daughter who is 18 a senior. All the adults lost their jobs back in March. Mom of 4 was denied unemployment why? Who knows can't get through to ask. My sister and brother in law who is a triple amputee (and was supposed to have brain surgery on the day of the lock down). Neither one of them has gotten their stimulus money Why? I myself have not gotten unemployment either. I got my stimulus but because my daughter is 18 but a senior who I claimed I didn't get the 500. We can't do or go anywhere because we r broke. We are having plumbing problems and can't bath or do dishes can't even go get tested. This all is ridiculous stop saying we r working on it. Pay the claims and deal with the rest later. We r hungry We r aggravated We need to buy essentials Please help Sandra Yeager

AMERICAN OVERSIGHT

Lake	Food	Allow restraunts and cafes to have more spread out seating by using outdoor space like lawns, sidewalks, parking lot areas. This would help keep safer distances between tables.
Hillsborough	General	Don't open yet. Increase testing first and than you need to start and extend antibody testing as well. Then we could consider reopening slowly. Some business may have to change their way of business until we get through this.
Palm Beach	Education	Every Florida Class of 2020 student deserves an in-person graduation. Please direct every county - including Palm Beach County - to schedule in-person ceremonies for graduates. Parents and students are having no say in the decisions that Superintendents are making. They can not make the decision for hundreds for students and their families. Schedule in-person graduations for later this summer!!!!!
Pasco	Recreation	OPEN FLORIDA
Escambia	General	I am a Floridian who is concerned we will open things too early. I am currently furloughed and my husband is not. I would love to get back to work, just not at the cost of my life or others. I have been listening to what scientists are saying, and am afraid if we open things too soon then we will just be back to where we are closed down again. Living in Escambia county and my husband working in Santa Rosa, I have not seen a great difference in the amount of people out and about during this stay at home order, and this concerns me. Just wanted to give my opinion, and I hope you do what is best for everyone in the state, and not a select few. Thank you.
Duval	General	I understand that everyone wants to get back to Normal, but I doubt if the Country let alone the State will be back to Normal. I understand that people want to get back to work. But what happens with the kids that will be home alone and are doing school work from home and parents have to help them, Why are people so in a hurry to sit down in a restaurant to eat a Burger or Chicken when you can bet they won't be cleaning the way they'll be doing once their open for a minute and germs are still being spreaded. It is way too soon being a Cancer patient it scares me to even go to my appointments & store because I'm afraid. I think this state needs at least another 30 days to June 1st or at least until kids or out of school, parents with school aged kids some cant afford daycare especially if they have more than 1. People are still contracting it and more Testing needs to be done, Open back up for those to go out and be subject to bringing it back to their families and make matters worse again. I day NO
Pasco	General	Hello Iam writing in regards to the reopen Florida ideas . I think we need to educate the owners first. Every different business well have different needs and guidance. Educate .1st Next give them the tools they will need .Temputure readers, gloves , mask. And of course a gradual opening . Thanks Greg Jackman

AMERICAN OVERSIGHT

Pinellas	General	Please open Florida back up. We want to get back to work and pay our bills. We can't let this virus rule our lives. Let the Elderly and the ill stay at home if they must. Hard working Americans want to work.
Hillsborough	General	We are ready to reopen Florida's economy. People are hurting financially. Common sense guidelines to keep social distancing are what is needed. Publish those guidelines for each industry to give people confidence. We have been doing what is needed to grocery shop. We can do this. The state is prepared. Keep testing but please put people back to work!!!
Hillsborough	Management	What mandate does this group have to follow medical professionals guidance and which medical professionals are involved? As no one on this list has any background in epidemiology and public health expertise is limited. What access to state medical resources does this group have, where is that informationbeing made public? How is the safety of the public being placed ahead of the clearly politically driven information Gov Desantis has been repeating and relying on.
Hernando	General	Please consider how devastating it would be for a small business to reopen now, have the virus spike, and have to close back down. Almost all businesses are going to have to expend capital to reopen. If they have to close back down , losing that investment could be the final straw for many. We are making progress against the virus, but we have not won yet. 2000 more Americans died yesterday. Wait a couple more weeks and those numbers will become negligible. Only then will it be safe to reopen. Thank you for your consideration.
Okaloosa	General	I think start with your retail stores.This will allow people to go out and do something a little different while being able to somewhat control the social distancing and getting the economy started as well as maybe save some businesses. Once we see how this is working with the number of new cases (while enhancing our testing) start with eateries based off their occupancy numbers. Limit it to 25%, then 50% etc while watching the numbers. As this increases, look at elective type medical (dental, elective surgeries) to begin to come on line. Just my thought but most likely has holes that others may find which is why having several eyes watching and inputting will help us get online with hopefully no resurgence.
Walton	Tourism	As an owner and resident of Florida and someone who owns property for beach rentals. I think it's only right that the state does NOT open up statewide rentals until at least June 1 . Then make a decision depending on new cases and the activity of the virus. It would make safe sense to gradually open the state to residence only and we must be very strict on that anyone crossing state lines should go into mandatory quarantine thank you.
Broward	Professional Services	Specifically beauty & nail salons. Would like to know when we can open & guidelines in which to do so. Would prefer not to open until the medical & scientific experts tell us it is safe.

AMERICAN OVERSIGHT

Broward	Technology	Hi, As part of the process for Florida to reopen, I feel places that conduct IT services such as data centers should be re opened. These places are essential as they provide the backbone for major companies. For example, the Autonation headquarters in downtown Ft Lauderdale has been closed since lock down has been initiated. Allowing at least some of these individuals to go back to work can help keep the technological operations of the company up and running which can provide overall benefits to customers and dealerships across the United States. -In general, I feel IT departments across the state in al companies should be allowed to go back to work under strict guidelines until the pandemic subsides.
Volusia	General	I feel that if masks are mandated for everyone to wear and with mandated social distancing opening up all our daily activities and business operations its an acceptable level of risk as a resident I'm willing to assume.
Martin	Recreation	Please open all beaches with guidelines for social distancing, if neccessary. Pickleball courts should also be open for doubles play at least for people within the same household. Open stores while requiring all to wear a mask & social distance. Hand sanitizer should be available at each store. People who are at risk should be given extra help to remain at home, if they wish. Thank you!
Brevard	General	Kudos to the Governor of Georgia for opening his state when other governors have failed to take the lead.
Volusia	General	Governor Desantis, I implore you to hold off on reopening the State of Florida's economy until our country's expert medical officials say it is safe to do so. This virus is killing people regardless of age or current health status. Over 50,000 American lives have been lost already. We should not put even one more life at risk. To sacrifice Americans for the sake of money is greed at its worst and most evil. Please, do not reopen our great state without the ensured security of your citizens' safety from medical experts with experience and integrity. Thank you.
Sarasota	General	Dear sir I have been out of work since March 17, we all go in grocery stores home depot etc we can catch it there more than we can at bars , restraunts, there are about 100 of my friends who are bartenders but we all have families to support, I personally have four children We understand that covid is dangerous but so is the flu, the swine flu, h1n1 so we don't close everything down so we all lose our houses cars etc please help us we have done what you have asked but we can go on much longer. April 30th the stay at home order is up can you please let us get back to being normal Americans Thank you for your time Please help us and open the state Give us the chance to show you we can wash our hands wear mask dont tell us we can't do it and leave us shut down.

AMERICAN OVERSIGHT

Polk	Technology	The state needs to be re-opened, without delay or any compromises. The majority of the public continues to be allowed to do close-quarters shopping, with 6 foot distance. However, it is said the coronavirus can be spread as far as 27' away. The masks people are wearing do not prevent the spread of coronavirus - from nor to the wearer. The flu season of 2018-19 killed more people in the US than who have died from covid-19 *GLOBALLY* - These are all proven facts. Our civil rights are being trampled due to a state of emergency which never should have existed, and is the ultimate ends of the abuse of these powers. This coronavirus has been nothing but a tool by the politically corrupt to further their agendas. This outbreak is nowhere near as severe as our yearly flu seasons. I'm not saying this virus is no big deal at all, but it most certainly has been blown way out of proportion, especially when compared to the influenza. My statements are based on publish scientific data, the CDC statistics for the 2018-19 flu season, and worldometer's coronavirus tracker. The stay at home order is unconstitutional (now that the state of emergency has been proven to be invoked improperly) The State and all counties in the State of Florida should be ordered to revoke all laws and orders given to suppress civil liberties.
Polk	Technology	It's past time to open. Killing the economy will be seen as not worth it once the dust settles and real numbers are out.
Sarasota	General	Don’t open up the state till everyone gets tested! We have to much tourist influence that could set us back to the beginning! Let’s not make a mistake that could really hurt our state!
Manatee	Healthcare	Mandated PPE for DENTAL HYGIENISTS. There are not mandates for PPE only recommendations from OSHA and the CDC. Hygienists are constantly overlooked or lumped in with dentists. We create a massive amount of aerosols in the process of completing the procedures required of us. We must depend on the judgements of our employers as to what PPE they feel is necessary. DENTAL HYGIENISTS NEED OUR OWN VOICE AND SHOULD NOT CONTINUALLY BE LUMPED IN WITH DENTISTS.
Lee	Government	My opinion is reopen Florida now. Obese and the elderly should not influence whether we can leave our homes. The hospitals, doctors offices are empty. People need to have elective surgeries that have delayed them. We need to go back to work and back to our lives. Please let Floridians reopen our state now. Thank you.
Orange	General	Its time to open our economy enough is enough Floridian's businesses are important too the virus is on the downward turn we have to get back to work its time.
Lee	General	Good Afternoon, I think it would be great to open the parks , but with no congregating . Walking ,jogging, and biking. Restaurants with proper spacing and the staff should wear mask and gloves.

AMERICAN OVERSIGHT

Pinellas	Healthcare	As a nurse I do not agree with opening the state so soon. One of the reasons our numbers are flattening out is due to the stay at home order. Open the state and watch the numbers skyrocket. I feel opening the state is placing money over lives. I get it people need money and need to work but at what cost?
Pasco	Construction	Under Department of AG, pest control is likely to already have in place the equipment to sanitize andisenfect public spaces. Has there been talk of waiving non-compete agreements for employees of those companies who have forced people from the bbn industry? Also, Is there any talk of suspension of non compete agreements during this pandemic as it could cause a hindering to the recovery efforts and/or cause undue hardship on the unemployment sector. It seems only fair that an ex employee should be able to find a job in their industry rather than the State to bear the burden of retraining.
Citrus	General	First I have to say that that Quinnipiac poll must be flawed, as they have in the past, because I haven't talked to a single person that feels the way they claim so many people do about re-opening Florida. Everyone I've spoken with knows they have to be more careful, much more careful, then they were in the past. And they also believe things can start to open now with a little thought and responsibility on everyone's part. I have a very close friend with a restaurant who is hurting really bad. She can stay afloat if thing could only go back to as it was in the beginning days of the virus. She stopped selling alcohol and divided her seating so there was large spaces between guests and it was enough to keep employees on the payrolls and at least break even. Take-out doesn't pay the bills or keep people employed as she had to cut the personnel to four employees. Each and everyone of us has an expiration date. Some protections are good and maybe required. Unlike politicians and entertainment stars, my hair needs cutting badly. Funny how their hair doesn't grow in a month or more. Let us be responsible adults and allow us to get back to living and working within limited guidelines. Please.
Lee	Government	In support of REOPENING Florida ASAP
Seminole	Food	We need to open up everything now there is no reason to delay any more. There is such a small number of deaths compared to population this is so overblown. Please let's open everything up now.
Seminole	Recreation	Please open. Those will stay home that choose too. I'm sure this will be around for months. If those who are sick just need to stay home. It's that simple
Orange	Tourism	Open theme parks by June, make sure Halloween Horror Nights still happens. Ok with 6 foot rule in lines, but don't take away our alcohol and food stands.
Brevard	Healthcare	Reopen the state. I am a nurse, work in healthcare and we have diseases that kill and hurt far more people. People need access to medical care, ways to provide income and minimize risks to mental health exacerbation. It's time.
Miami-Dade	Education	Miami dade schools are set to open on August 24th. It would help to start right after Labor Day so that teachers have ample time to set up classrooms and plan for the year. It also gives time for the virus to Hopefully be eliminated by that time

AMERICAN OVERSIGHT

Polk	General	Too early to open People do not follow social Distancing now. So they won't follow it later. I have not been exposed and do not want to when it reopens. Don't want a 2nd round of this and it will happen. I want to Get back to work sooner then later. I lost my job due to this virus. And can't find work yet. Reopening too soon will affect me again later with a 2nd round of the virus.
Pinellas	General	I'm concerned about the farming industry and wasting less produce. I hate to read about letting all those vegetables and fruits being left to rot while there are so many hungry. Offer up limited access to locals with pick up trucks who can then get the produce to the masses at a low cost or for free . Florida has so much great produce and we should take care of Floridians. I also would like the state to mandate use of masks and eye protection once we get things reopen. We need to learn from history that people are basic foolish and will revert to old ways which will cause a bigger problem than we had previously. I dear a huge second wave if we leave it in the hands of the people.
Volusia	General	I feel like the medical professionals are still saying it's not safe to reopen which brings up 2 concerns. The first is in regards to massage therapy. LMTs are in a position where they do not know when they would be safe to practice again. They should not be allowed to until phase 3 to keep up with social distancing guidelines and they need it in an order so they dont lose their jobs. That brings up my second concern. If these people practice or social distancing and the safer at home order is lifted too soon how do we know there wont be a devastating 2nd wave? I believe we should stay closed until June at the very least. We have an older population and many people with weak immune systems. I choose life over money. Please extend the safer at home order and place a clear order for massage therapists to not rub until phase 3. Thank you.
Marion	Food	since no one in the restaurant business has been able to recieve their unemployment checks they need to open back up. my daughter goes to the website to claim her money and it kicks her off.
Marion	General	1st, I say wait 2 weeks and see how the numbers move in Georgia. 2, the second you open up beaches, parks, hotels, watch the tourists come in and then watch our numbers go up. I live on top of The Villages and find this would be a very dangerous area to open up. 1/2 the people here refuse to see this virus as a threat. Open up the Villages and see the numbers GO UP !! If you make this area any more dangerous than it is already, I will need to seriously think about moving my elderly parent back up north.

AMERICAN OVERSIGHT

Broward	Education	I think we can safely reopen public schools next year with some new policies put in place.. Perhaps children do not attend 5days a week but rotate every other day or so with 1/2 or 1/3 of the class attending each day and using distance learning for the times they are not at school. This would be especially important for families to get back to work but also for young children to actually participate in lessons and learn strategies to use at home independently during times they are not at school. Distance learning for kindergarten, using the computer for the majority of instruction, is not developmentally appropriate.
Polk	General	I feel the we should not reopen yet. It is still too soon, especially with new reports that, previously infected with COVID - 19, does not make you immune to reinfection. Florida does rely on tourism, as our biggest employers have thousand of employees not mention, the millions tourist from all over the world, each year. Which would increase our chances of starting another wave of COVID - 19 world wide. We need to listen to the science AND how other countries have been able to flatten the curve before profit. I do miss my job and the people I work with, but the health of my family and friends are most important to me.
Lee	General	So many people are hurting from this shutdown. Way more than those who have been affected by Covid 19. This shutdown should have never happened. The unemployment system has been inaccessible and people are not making anything at all. This is killing small businesses. The numbers aren't there to support the closures. Open us back up!
Miami-Dade	Wholesale	We should continue as is until there is alot more testing, antibody testing on a mass scale. Social distancing should remain in place until there is a vaccine.
Brevard	Professional Services	Lift quarantine. Open schools. Remove all covid-19 restrictions.
Pinellas	General	I do not agree with a decision to reopen our state at this time. I am a business owner, and am impacted financially. However, keeping my family safe and healthy far outweighs any reduced income that I may be able to bring in at this time. I have a high risk household, caring for an elderly father with congestive heart failure, hypertension, and diabetes. The last thing our community needs is any influx of tourists coming to our area, potentially increasing our risk and case numbers. Please give our state more time to heal and flatten the curve. We are not ready!!
Pinellas	Healthcare	Please implement the proven measures to control an epidemic before a general reopening: (1) universal testing for anyone upon request with or without symptoms; (2) readily available masks, mandatory face mask use in public places where social distancing cannot be assured; (3) contact tracing; (4) Available surge capacity of PPE and clinical treatment facilities to deal with local outbreaks; (5) continuously and transparently update the public on case experience and the above measures.
Lee	Recreation	Would love the gyms and parks open.
Orange	General	Open Florida back up please! Open parks, businesses, beaches. Open it all up! Still recommend that those who are immunocompromised stay home, but let the healthy Floridians get back to work and back to life as usual. The hospitals have had plenty of time to get prepared. Let get that natural herd immunity on the rise.

AMERICAN OVERSIGHT

Marion	Healthcare	Are there medical professionals on the committee to open up Florida?
Lee	General	In order to reopen and help residents feel safer, wearing masks in public in counties that have high COV-19 numbers should be mandatory. If people don't feel safe, they will continue to stay home which will not help businesses get back to some type of normal. Florida has a high number of seniors. How can they and the people around them ensure that they have not been exposed when going out in public again? Given what our nation has been through, wearing a mask is a small thing to ask people. Especially with the threat of numbers increasing if stay at home orders aren't eased correctly.
Orange	General	Dear Governor DeSantis, This is not an easy time to be Governor and I'm confident you are doing your best to balance the health and safety of your citizens with the very harsh economic impact of COVID-19. Please add Agriculture and Consumer Services Nikki Fried to your Re-Open Florida Task Force because she was duly elected by the people of Florida. So many of us feel so powerless right now it would help to know that our vote did count. Hearing opposition forces only makes a person stronger. When making your decision to reopen Florida please consider MEDS:: What the Medical profession recommends, , what the Epidemiologist s are saying, analyzing the Data and looking at the Science. Thank you.
Duval	General	I am of the age and group with under lying conditions. All I hear is keep the most vulnerable isolated and everyone else go on with life. Doesn't seem fair I feel punished. I understand that we need to get back to work but I worry that things will be relaxed within days of opening and not being taken seriously. I can't stay in my home forever and hope others follow guidelines. Please enforce mask wearing and testing for everyone so I can at least have some what of a life as well.
Orange	Tourism	For Orlando, announce both Walt Disney World and Universal theme parks will open June 1. Offer 40% discount for each park; advertise that non-invasive thermal temps will be taken and if over virus limit, access will be denied. Getting theme parks open is key to getting hotels' up and running, for restaurants, rental cars, airlines etc. The key is get theme parks up and running, and that creates the Engine that pulls all the other cars, using train analogy. If we don't do this, Orlando will look like the depression of 1930's. Get Disney and Universal to each agree on reopening promotions to encourage attendance. We can do this !!
Broward	Professional Services	Reopen real estate, restaurants/bars where seating is outside largely and inside far apart, hotels and all office buildings where folks can't work remotely
Miami-Dade	General	Prefer if our state's government waits to see what the new cases and hospitalizations numbers are by May 1. If # are on an increase, even slight, we should wait to open. Concerned that the opening of beaches, may create higher #'s again. People from across the state are flocking to those opened places. Also others, even here in Dade County, have automatically relaxed their recommended sanitary procedures. Thanks for opportunity to express my opinion.

AMERICAN OVERSIGHT

Hillsborough	General	Thank you for asking. The small business community is in need of the community to re-open for the economic impact as early as possible (safely). With that said, health and safety is number one. Please, please make sure there is one set of clear set of requirements, expectations, rules/laws, guidelines, best practices shared (working in our new normal). Federal, State, AND County governments along with community partners need to have one untied message when the time comes to open up to the public again.
Pasco	Tourism	If we can shop in Wal-Mart, we should be able to camp! Open the state parks, we don't care if the bathrooms stay closed ... Let us camp! Now is the best timr of the year for Floridians to camp. It is after snowbird season and before "real" summer heat arrives. You can't fix stupid, some Floridians, will still congregate, but most will maintain their social distancing.
Hillsborough	Recreation	Allow re-opening of state parks for fitness only. Keep pavilions closed. Recommend that county and city parks can make their own decisions on park openings. Recommend that everyone use masks if possible in public. Have park rangers enforce rules at their own discretion. Thank you for the opportunity to make suggestions.
Duval	General	It's time to start opening up business and it can be done safely.
Martin	Healthcare	Do not re open FLORIDA until covid is gone!
Pinellas	Tourism	If the state is to open, it should open counties to county residents only first. Inviting in state or out of state tourism will only make distancing impossible. Allowing tourism will put all Florida residents and the populations of tourists home states at risk.
Washington	Professional Services	I am a small business owner! We should reopen and use common sense on keeping people safe. The Florida panhandle should be allowed to reopen we have low numbers of infections anyway.
Brevard	Healthcare	do not risk lives to rush re opening the state before we meet the federal guideines
Pinellas	General	As long as Florida is still having more cases every day it is too soon to open the state. When we see a decrease and a tibody tests are available, then yes. People wouldn't be so hot to reopen if they were getting their unemployment and if there was a rent/mortgage moratorium.
Orange	General	It is my belief that our state should reopen as soon as possible, especially given the findings of the Stanford Antibodies study. Building herd immunity is far more important to breaking the power of the virus than the hope that it will die out as we lock everything down. We need the young and healthy building these antibodies, and with a blanket shutdown, this is not possible.
Osceola	Food	Even thought we all feel the necessity to go back to our routines we should wait more before we open. While there still people getting sick and the number of cases of people dying still increasing in the state we should all continue at home to avoid to the max any type of exposure to the sickness. Thanks and stay safe.

AMERICAN OVERSIGHT

Brevard	General	A few things of importance to me in re-opening would be continued social distancing, including masks in public places; no large gatherings until phase 4 is defined. Also, there has been great confusion regarding beaches, particularly in Brevard County. Public parking is closed, but are the beaches open? Brevard County and Palm Bay has been the least communicative and least helpful during this pandemic. There were disagreements between the county council and mayors opening and shutting the beaches. Help us out. Also, when the bars with restaurants open, such as Meg O'Malleys in Melbourne, will there be repercussions for those that choose to allow large gatherings such as what Meg O'Malleys did on St Patrick's Day? It would be costly to re-open too quickly and have to shut down again in a month. Thank you for your time.
Duval	General	Open business back up using guidelines such as wearing face mask, limiting occupancy, and social distancing, Also make realistic guidelines for outdoor events.
Santa Rosa	General	Open with safe measures in place! Let's get back to business in the panhandle!!
Polk	Food	Restaurants should be allowed to open immediately allowing them to seat 60% Capacity. Resorts should be able to reopen and practice social distancing! We need Florida back open immediately. This lockdown is outrageous government over reach
Miami-Dade	Education	Regarding re-opening Florida, It would be very beneficial to require everyone to wear a mask outside the home, to include children above a certain age. Parents should be discouraged from taking small children into retail establishments. Since a lot of the Covid 19 virus is spread asymptomaticaly, by having everyone wearing mask would keep those with no symptoms from spreading to others. This has worked very well in places where implemented, such as the Chec Republic, South Korea, etc. Obviously common sense exceptions should be made for places like restaurants, beaches, etc. This is the one thing you can do to protect people and allow the state to open.
Hillsborough	General	I believe that Florida should NOT reopen, right now. Our cases are rising every few days and then they come back down. I have several friends in the medical community, and they are also wanting for it to not reopen right now. It's been a very scary and trying time for them. I also have several friends that have lost friends and family members from covid-19. When I am out in public I see how careless people are. Lots of them cough and sneeze in the vicinity of people and just don't seem to care. I've actually seen them laugh about it. How disgusting! And I definitely know that my job should not be reopening anytime soon. I run sound and lights, for bands that play in bars and restaurants. Our band draws in hundreds of people at every show. Very crowded! We were panicking the last week before they finally closed everything down. Praying we wouldn't catch the Coronavirus especially since it was spring break. Please do not reopen our state right now.
Brevard	General	Wait until June. I work in healthcare, and think keeping the community safe and healthy is better than opening too soon, and getting a surge in new cases.
Hillsborough	Retail	Tattoo shops, hair salons and cosmetic salons, and other one on one industries to open. Restaurants, malls, and bars should remain closed.

AMERICAN OVERSIGHT

Santa Rosa	General	Opening the state, right now or next week, is a huge mistake. We have flattened nothing. Please do not allow us to give in to a bunch of idiots and those that worship at the ass of tRump, Desantid and gaerz. Use your brain and let data and medical experts guide us back to normal life. I would absolutely love to serve on this team as an independent voter and free thinker. Do not bow to Orangina and his boot licking lackeys and trained monkeys. Keith Colvard U S Navy veteran
Hernando	Healthcare	Dear Governor Desantis, I am writing with many concerns over reopening of dental practices. As a dental hygienist for 30 plus years I believe it would be putting a lot of people at high risk since the dental office has a high aerosol component to almost everything we do. Presently it would be difficult to practice especially as hygienist as we are as face to face with our patients and obviously they can't wear masks.. I believe continuing with emergency treatment as needed is the best until we can get ahead of this virus. Please I beg of you to have some of your task force look into this as I've heard nothing about it in your briefings. Thank you Linda Launier RDH

AMERICAN OVERSIGHT

Palm Beach	General	Hello, Thank you for considering feedback from Floridians during this important times. My feedback is as follows: 1) DO NOT rush to reopen, Florida is a tourist destination and SFL cases are still on the rise. Follow the government guidelines to see STEADY decline for at least two weeks prior to making any announcements. 2) SFL should be reopen at a later time, the 3 counties are the hot spots of the State and you have to treat them uniquely. 3) When considering reopening, start with open space venues and limit capacity to mandate the 6 feet distancing. Limit venue capacity to 50%. 4) Restaurants should remain on take out and delivery for the moment. Putting a group of people indoors and while eating and breathing, it's a recipe for disaster during this time. 5) When indoor nonessential business are allowed to open, they should be mandated to limit capacity to the 6 feet and all citizens should be mandated to wear masks if running errands indoors. 6) If citizens are not following the rules, police MUST make them accountable. This is not a joke and those who don't take it seriously can get ill on their own but we must prevent them from hurting responsible citizens that are doing the right thing. 7) Schools should remain closed through end of school year. Children cannot be expected to follow guidelines and their safety is a main responsibility of yours! 8) Fix the unemployment system for the love of God! There are millions of impacted Floridians that DESERVE their benefits yet your system continues to fail while citizens cannot put food in their mouths or pay rent. Develop better technology, hire smarter and bigger, but do what you have to do to pay our people! Thank you and please make smart decisions to keep Floridians safe! Best, Mariana Marcano
Hillsborough	Government	Open slowly starting with businesses and restaurants. Avoid large gatherings in public places. Continue sanitation of everything. Forever
Hillsborough	Healthcare	Elective surgeries must be resumed, as multiple facilities are furloughing nurses, sterile processing technicians, and surgical technicians. The solution is to test every patient for Corona in the pre-op stage. Some of us live paycheck to paycheck, and we will not survive if this suspension of surgeries continue.
Martin	Healthcare	Do not reopen Florida until covid gone.
Hernando	General	Open up FL! No restrictions. Let's get back on with living. Those who failed to make good choices in life and have put themselves in a situation where a normal human immune system would fight off the Rona, are now vulnerable to it I.e. hypertension, obesity, diabetes, can stay home all they want. Let's get people back to work, let's honor the sacrifice of every American who gave their life for freedom.

AMERICAN OVERSIGHT

Seminole	Information	I think you should open up people need to make a living if you are over 65 in failing health or have issues at your own risk stay home or avoid large gatherings (most already do) it's time to open up Flu kills more people you can get run over or be in an accident or have a stroke or heart attack or choke on food. All life is precious and living life comes with risk. Let those who are scared stay home and change the laws about suing businesses Thanks for your hard work
Charlotte	Tourism	Please consider opening up vacation rentals to out of state people they will come to Florida from the hotspots and we don't need the added exposure at this time keep it closed at least in until May 30th please
Pasco	General	Where can the public obtain face masks so we can venture out. Online are sold out. Maybe the counties can offer at fire stations , offered by the state. Have a business have a daily certification posted that states they are disinfected. Limit patrons at establishments during business hours. Always maintain at least 6 ft. AND FOR GOODNESS SAKE GET THE UNEMPLOYMENT ISSUES FIXED ASAP AND IN THE MEANTIME CREAT A NEW SYSTEM GOING FORWARD!!!!!!
Hillsborough	Professional Services	I am the owner of 13 hair salons in the Tampa Bay area and I was mandated to close to no fault of my own due to COVID-19. This business has been in my family for 34+ years and has survived many ups and downs in the economy along the way. I was born in Florida, I am a graduate of the University of Florida, and a member of James Madison Institute (JMI), so I am a true FLORIDIAN! In a 24 hour time period I was forced from being a highly efficient business into having ZERO cash flow for the unforeseen future as a non-essential business! It is one thing to go from 100% cash flow to 50% or even 30% cash flow, but to go to 0% cash flow is impossible to navigate! Our professional cosmetologist workforce went to school to obtain a license in which a majority of their schooling was spent on disinfection. Now is the time to give them the opportunity to prove the value of this education. These professionals need to be allowed the chance to follow strict guidelines upon re-opening and earn a living. I am preparing my staff to take the steps necessary to provide a healthy and safe opportunity for providing an essential service. Steps like: Eliminating waiting areas and having guests wait outside or in their cars, taking temperatures of each person before entering the salon, everyone must wear facial covering, 1 guest per stylist, stations 6' apart, stylists must wear different gloves for each guest, hand sanitizer available, rigorous cleaning process with disinfectants and requiring each member to certify in Barbicide Disinfection Certification Course online. I believe we should be given the opportunity to prove that we have made changes to our business at this difficult time. Thank you for your time and efforts during this life changing event.

AMERICAN OVERSIGHT

Alachua	General	Cancel rent, cancel mortgages, cancel utilities, give everyone $2,000 per month, let people who want to work be essential or remote employees. Nationalize the healthcare marketplace, just make all hospitals charge to the state what it costs them to run without taking them over. This is the only way to save the system. Don't dismantle things, don't order people back to work, just please, please, stop killing people with hesitancy and privatization and austerity.
Polk	Government	Its almost been 30 days so i think Florida should reopen
Palm Beach	General	All of the latest data indicates that there are many more who have been exposed to CV-19 than originally thought. Moreover, additional data from NY tells us that almost all of those hospitalized had compromised immune systems (obesity, diabetes, respiratory issues, other immune deficiencies). No one wants lives lost, but millions of jobs have been lost and the mental health issues rising due to the shut down (lost businesses, lost jobs, fear of the unknown) are escalating at an alarming pace. Lives will similarly be at risk due to these health issues, no different than the virus. We MUST take a more targeted approach, focusing on those most at risk (pre-existing conditions, age). By focusing efforts, we'll be better at protecting those who need to be protected. This allows us to open the state in fairly short order while still protecting the most vulnerable. Leadership is needed here...tough decisions need to be made that will open up the state in DAYS, not weeks or months. The data supports such a move. We can implement a revised Shelter-In-Place order that focuses our efforts on protecting those most vulnerable, allowing businesses to open, parks and golf courses to open and our "new normal" to begin almost immediately. Short of this, you're ignoring the data and bending to public perception rather than showing true leadership. You're relegating our state to a slow death. Be bold. Be decisive and Florida can lead the way to a normalized, focused approach to open up not just in our state but nationwide.
Pinellas	General	PLEASE do the right thing and do not permit a rush to return to normal, because things are not normal. The virus is just as present and just as contagious as it has been for the last month, and reopening the economy fully will cause a second spike that could actually be deadlier than the first. Please extend the stay at home order to at least 15 May, and beyond if necessary, until we meet the precondition of 2 full weeks of declining cases. Please also make masks required in all public places including restaurants. Please continue to require social distancing and gathering of no more than 10 people. Finally, please do not reopen beaches and other large venues until 15 June for public use.

AMERICAN OVERSIGHT

Sarasota	Professional Services	Re-Open Task Force, I am a hairstylist, my CONCERN is going back to work WITHOUT having ALL the NECESSARY SAFEGUARDS in PLACE. We NEED to have DBPR guidelines outlined in ADVANCE. Georgia gave their guidelines days before opening...not adequately allowing time to prepare, in my opinion. The biggest ISSUE is access to PPE when there is NOT enough for the medical field. The Dental field expressed on the call on Friday, they DO NOT have PPE readily available either. How are we going to be PREPARED? PPE for our openings is SPARSE, sanitation, and sterilization supplies are NOT available. Other essential items needed for our NEW NORMAL are NOT ALL available at this time. (Touch-less hand sanitizers, touch-less soap dispensers, disposable capes, disposable aprons, touch-less infrared thermometers, and N95 masks, face shields etc). I have educated myself during this time and tried to prepare for what I will need being a high-risk person with an autoimmune disorder on a metabolic medication. I have taken the CDC guidelines very seriously, to protect myself, my family, and when I return to work my co-workers, their families, and my valued friends/clients. For me it is a matter of Life! There is no other option... PLEASE consider having the DBPR issue the Guidelines/Restrictions for Hairstylist/Barbers and the Beauty Industry WELL IN ADVANCE of opening them. PLEASE consider allowing TIME for PPE to REPLENISH after the medical and dental field have been allowed to resume normal activity BEFORE opening Beauty Industry. NOT having PPE in the Beauty Industry is a potentially devastating decision. Thank You All for Your Time, Thank You All for Your Service To Florida.
Lee	Retail	May 15th at the earliest. I really think we should watch what happens in other states that are Opening now, like Georgia, and see what happens with their numbers in a couple of weeks. My job does not afford me the ability to " social distance ", and I don't think it's right to make people work, and risk exposure at this point. A couple of more weeks is what we need
Charlotte	General	Re open everything in stages 50% for two weeks then 75 for two then 100. We cannot wait for a vaccine that is possibly 12 months away. heard immunity is our only path at this point.

AMERICAN OVERSIGHT

Polk	General	There are many concerns to weigh however right now we have no plan. We don't know what can open. We don't know if the stay at open will be extended. We only know schools are closed and eventually we all have to go back to work leaving kids where? Unemployment needs to be paid quickly. Unemployment, stress, suicide, famine, violence and addiction will cause many more deaths than COVID. We need a plan. What can be opened when? I would suggest allowing everything to reopen as long as social distancing can be accomplished. Random COVID testing can be at EVERY business to ensure the numbers are not rising. Masks can be required in indoor places. Allow tourism to open with these measures. Allow child care centers/schools to open for child care of working parents. No more than 10 per room and no contact. In the mean time create food distribution, help to everyone. My small town had lines for hours last weekend to receive food. People are NOT ok. We know what will help kill the virus... hand washing, stores sanitizing, social distancing, face masks, no touch check outs, sunshine and vitamins. It's time to be creative and thrive.
Palm Beach	Government	Open Florida all of south Florida we can make our own choices. You are causing the Florida economy to suffer. Open and let us choose!!! We want to work ! You are going to cause more problems
Duval	Healthcare	As a frontline healthcare worker in Jacksonville, the re-opening of the state is crucial and complicated at the same time. I feel it should be a must that when the state reopens it be mandatory for all to wear cloth masks to continue to flatten the curve of COVID-19. This is something that hospitals have adopted and have minimized the spread to healthcare workers by patient or each other. However knowledge is key, the cloth masks aren't to just protect yourself but other as well. Thank you!
Citrus	Construction	I've been out of work since the 16th of March. Still haven't heard anything back from unemployment. We have 3 adults and 1 child in the house and only recieved $1700 stimulus. If the government isn't going to help then, send us back to work we can't survive waiting around for the government to handle things.
Sumter	General	Not yet, it's too soon. People need to continue to work from home until at least June 30 Social distancing for most likely quite some time. When people do finally return to the office they need to wear masks and still follow social distancing as much as possible. To conduct meetings/hearings by video for several months.
Seminole	Tourism	I work at the theme parks and do we really need to open up the state when we're going up by the hundreds of people affected? Look at New York. They're making mass graves because they can't keep up with the death toll. Miami hasn't had a homicide in 7 weeks for the first time since 1957. 1957. Closing more businesses like Starbucks, Chick Fil A and forcing people to stay home is the best course of action.

AMERICAN OVERSIGHT

Martin	General	Thank you for the opportunity to provide public feedback into the process as your teams work to re-open our great state. Below are a list of items that I would very much like to see considered as it relates to communicating the path forward to our citizens. 1.Reducing FEAR to Caution. While you do not and cannot necessarily control how journalists will “frame” a story I would ask that the communications provided by the state to its people that are pre-written and provided to the press be purposeful in their content attempting to reduce peoples fear of COVID-19 to “caution” of COVID-19. It is a virus, and like all virus’, it is shed and spread through coughing, sneezing, and other means of contact while in its incubation period. It is NOT the “black plague”. It is NOT Ebola. It is a virus, and as with Influenza, it travels from host to host in the same fashion. And just like Influenza, it is best to be cautious and work to avoid contracting it. But it is NOT a death sentence for the vast majority of Floridians who have healthy immune systems and are without pre-existing conditions. We must continue every day to reduce the fear mongering that is so prevalent in the media. It does not help. 2.Facts. We are inundated daily with the numbers on how many positive tests, how many deaths, how many hospitalizations, etc. -- however, these numbers are presented WITHOUT perspective. As re-opening communications are prepared and in an effort to achieve the reduction of fear stated above, perspective should be a critical component of what is being communicated to our citizens. To achieve this perspective, please consider some or all of these additional statistics to help people understand that caution is necessary, but fear is not. Specifically: •The number of patients with recorded and documents symptoms who have fully recovered. •The number of documented Influenza cases in the State with the SAME stats as shown for COVID-19. (i.e case counts by week or month, death rates, hospitalization rates, etc.) •The percentage of hospital utilization, county by county. •All of this information as a percentage of the TOTAL population of Florida (which I believe is somewhere in the 21 to 22 million range). 3.Encourage “normalcy” with caution and common sense. It will do absolutely no good to open up the food industry if people are too afraid to go out to a restaurant. Or to tell property owners that it's
Clay	Healthcare	The re-opening of Florida is a public health issue. If Florida doesn’t have an enforceable plan/order tip require face masks to be worn in businesses, then the spread of covid-19 will spike and continue to spread. Also, if face masks are required to be worn in businesses, merchants must be required to enforce patrons to comply or merchants must be fined. Also we need the required resources for covid-19 testing as a proactive measure.
Polk	Wholesale	Please stop the nonsense propaganda of shutting down our entire economy for a virus that is not nearly as deadly as the flu every year! We have lost our damn minds. We will never recover from the financial mess this has caused! Turn off the damn tv AND GET BACK TO WORK!!! DO THE RIGHT THING AND PEOPLE WORK AND TESUNE THEIR LIVES!!!

AMERICAN OVERSIGHT

Orange	General	Reopen Florida, Floridian's are desperate for sensible policymakers who have the courage to ignore the panic and rely on facts. . Fact 1: The overwhelming majority of people do not have any significant risk of dying from COVID-19. The recent Stanford University antibody study now estimates that the fatality rate if infected is likely 0.1 to 0.2 percent. In New York City, the rate of death for people 18 to 45 years old is 0.01 percent, people aged 75 and over have a death rate 80 times that. For people under 18 years old, the rate of death is zero per 100,000. Of all fatal cases in New York state, two-thirds were in patients over 70 years of age; more than 95 percent were over 50 years of age; and about 90 percent of all fatal cases had an underlying illness. And young adults and children in normal health have almost no risk of any serious illness from COVID-19. Fact 2: Protecting older, at-risk people eliminates hospital overcrowding. We can learn about hospital utilization from data from New York City. For those under 18 years of age, hospitalization from the virus is 0.01 percent per 100,000 people; for those 18 to 44 years old, hospitalization is 0.1 percent per 100,000. Even for people ages 65 to 74, only 1.7 percent were hospitalized. Dr. Leora Horwitz of NYU Medical Center concluded "age is far and away the strongest risk factor for hospitalization." Half of all people testing positive for infection have no symptoms at all. The vast majority of younger, otherwise healthy people do not need significant medical care if they catch this infection. Fact 3: Vital population immunity is prevented by total isolation policies, prolonging the problem. We know from decades of medical science that infection itself allows people to generate an immune response — antibodies — so
Hillsborough	General	We need to start to reopen the state immediately, please look at the antibody studies, this virus has been here much longer than initially thought. With Miami mortality rate at 0.2%, would we have really closed the state if we knew this would be the mortality rate? We will soon be reaching unemployment levels only seen before in the great Depression, the leaders need to see that this economic harm will be far worse than this virus could ever cause. Also if you are really concerned about a second wave and it being during flu season, maybe it’s better to open now and slowly increase infections to have less people susceptible to it during flu season. These “lock down” orders may prove soon to be the greats failure of public policy in history. Another question never answered by the “experts” is now that we know the virus has been here probably since December but definitely in January, why were hospitals overrun in Jan and Feb? It’s because this virus is not as dangerous as political leaders and the news have made it to be. The state and local govts said all along these measures were to flatten the curve and not have our health system over capacity, well now hospitals are cutting hours and laying off. The state needs to ignore the media and their message of fear and panic and open the state to allow people to work and put food on their table.

AMERICAN OVERSIGHT

Duval	Healthcare	I think we need to reopen Jax to its residents. Don't allow out of state/country travel for residents nor anyone flying from out of the state/country into Jax. Don't allow elderly (80 years +) or anyone who resides in a nursing home/assisted living etc out in public areas unless for essential items groceries and necessary doctors appointments. And finally residents must wear some sort of a mask in all public areas (if outdoors, no mask necessary but to keep a minimum of 6 feet at all times).
Brevard	Information	Please do not open Florida yet. All reports from many agencies are stating it is too soon. Let us act on information and science not on the pressure put out by big business. A healthy state will draw more tourism than a state besieged by illness and poor management. Please give us another month to fight this pandemic.
Polk	General	This lockdown is severely impacting many people I know who work in the Restaurant and Bar industry. They were despondent when the original order came down on March 17th. Here we are almost at the end of April and these people are sitting here with no income. unemployment has been almost impossible to get due to the terribly slow process to get them approved. Even the industry I am in is being severely impacted because our revenue is in providing services to small businesses. We may loose large swaths of our customer base permanently if this caries on any longer. Open Florida. Let us go back to work. Let us decide how much interaction we can safely tolerate. We can be safe and still open the economy.
Pasco	Government	I do not understand. We see construction workers, utility workers, etc all out and about in groups.people standing in line waiting to get in a massive store. Wouldnt it best to be in open space than lined up againat a building? We are adults and know to keep distance. I live on the Gulf in a condo and they have shut us down to no family, no guests, no rentals (We rent our private home seasonally) and no deliveries. Beaches parks, and now most restaurants, and hotels know the protocols and new procedures, why are you still keeping your state locked up? I swear Im in a nightmare. People getting arrested to go to church and murderers, sex offenders are let free. I am so confused. Please let us out, open hotels, beaches, restaurants, etc. Florida is a hospitality state, and needs to be open, with care. Florida and lives are being destroyed over fear and losing their livelihood and PURPOSE. Ps i do not believe condos should be grouped with hotels. This is my private home, and they shut out our families and visitors. Thank you
Jackson	General	All the economies need to open up. Its not fair to keep things shut down. People are running out of food, they already live paycheck to paycheck. The best immunity to this is your bodys own immunity. We are devastating our communities & possibly even our country by staying closed. If we don't get back to a "normal" we could be setting pace to never recovering. We can still practice distancing & good hygiene.
Sarasota	General	Do NOT reopen Florida yet.

AMERICAN OVERSIGHT

Pinellas	Healthcare	It is too soon to open up Florida. Having beaches and other areas for people to congregate will eliminate any progress we've made thus far by social distancing. The current statewide public health statistics do not support opening back up. There are way too many older residents and others with compromising health conditions in this state. Just take a look at our nursing homes and retirement communities. I do NOT support opening up at this time.
Leon	Construction	I support continued public education regarding safe practices and loosen all regulations allowing freedom to open businesses or not. The free market needs to guide, not politics based on uncertain medical opinions. Test test test.
Broward	General	Encourage safety but open up the state. Personal responsibility is key.
Pinellas	Healthcare	We should start reopening with healthy outcome. Asking the right questions and being careful to screen for ill people is important keeping areas sanitary is also necessary. Possibly limiting the number f patients per day
Hillsborough	General	Please keep Florida closed until we show a consistent decline in new cases for a minimum of 3 weeks. Do not reopen any non-essential businesses and enforce the stay-at-home laws in place now. Personally very upset that I am being ordered back to work tomorrow when I have been successfully working from home for over a month. There is no reason for this and it is unsafe. More and more businesses will do this as standards are relaxed and this pandemic will explode again. More unnecessary deaths will result. Look at history from 1918 to see what is about to happen. All new deaths will be on the heads of those that allow businesses to reopen too soon. Lives are more important than money.
Flagler	Food	Please open Resturants with outside setting in Flagler. We have only has 106 cases. Thank You Gov. We are praying for You!
Palm Beach	Recreation	Phase 1 Golf, 9 holes only Per day ,front 9/back 9 so they are 2 courses. No carts.60 and over tee up in am and after 5 Tennis, singles only. 1 hour limit. Gyms. 1 hour workout per person. Up to 25% occupancy. Make appointment for time online. Example 8 am to 9 am appointment, exit all clients and clean gym for 1/2 an hour. Next appointment 930 to 1030 repeat. Open pools in community's and public beaches with restrictions.
Manatee	General	Just ready to get back to normal.
Duval	General	It seems the stay at home order expires on April 30th, which is this coming Thursday. With everything that we hear & see, it appears our county, as well as the majority of the northern counties are ready to start re-opening. It would help so much, especially since kids are still at home for school. We can't live like this forever. I feel we start opening slow soon & go from there. So let's just do this. Time to live again. I feel people will be more careful because we want to live again. Please open up!

AMERICAN OVERSIGHT

Orange	General	I work or worked as a dog groomer in lake county. My opinion is not to reopen until or unless deemed safe for all. The job I do much like others requires one on one with clients multiple people multiple times throughout the day. Yes we are a small shop yes we can clean and be safe but no we cant account for where or who our clients come in contact with. My youngest daughter has a kidney disorder that compresses her immune system and for me to risk bringing anything home to her is simply not an option. I ask that you wait and make absolutely sure the environment in Florida is the safest it will be before you decide to allow mass exodus for all! Thank you for the opportunity to weigh in on this a monumental decision. Now if we could just get unemployment up and working properly.
Pinellas	General	We need to extended the safer at home order for another 30 days and you should not consider reopening the economy until June. If we reopen too fast or too soon it could be a big disaster causing more people to die from covid-19. We need to protect the children and the elderly. If we open daycares and summer camps to early ,children are at high risk for contracting the virus and spreading it due to not being able to properly social distance. It is unnecessary to risk lives. If we reopen too soon the combat of fight the virus in could get a lot worse with rapid new cases infections and putting us further behind in combatting the virus and possible having to close everything again costing more money in the state and more lives will be lost. We need to stay ahead and protect the progress we have made this far and not take steps back in fighting the virus and taking a bigger hit on the economy. Without people living and feeling safe their will be no economy to reopen too. You also need to consider postponing non emergency dental procedures and extending the order. The risk is too high for dental professionals and patients doing non emergency dental care. Please limit to only dental emergencies. We do not need to risk people's lives for non dental emergencies. I seen a poll where over 70% of people want to extend the order to stay home. People do not feel safe going out. Giving another 30 day order will allow the people who are infected from the virus to recover and new cases to be on a bigger decline. We have had high numbers of new cases even with ther lockdown in place and if we lift it to early the new cases will rise at a very rapid rate. Giving the infected more time to recover with extending the orders will lessen the chance of transmission . We need more recoveries and less new cases to be able to reopen safely.

AMERICAN OVERSIGHT

Orange	General	How's this? Any suggestions? I would like to see small businesses open with guidelines to protect employees and customers. For example, outdoor dining could be allowed with social distancing as a first step. Recent studies have shown that the danger is reduced when outside. Beaches, parks, outdoor activities should be open with appropriate protective measures so that people can stay healthy while practicing measures to reduce possibilities of contracting the virus. It seems that gyms could follow social distancing and patrons could use gloves and masks. Guidelines should include protection from liability for small business owners. Patrons and employees should not be able to sue if they believe they have contracted the virus in connection with their presence in a small business.
Pinellas	General	Don't let down the restrictions so soon that we have to do this a second time. Instead, allow truly ESSENTIAL activities (not TATTOO parlors) to resume activities if they can present a safe way to operate. Theaters, and schools, must stay closed for now. Restaurants must be for take away only, with food ordered online, or by phone, and picked up out in front of the establishment. Courts could be opened, with spacing and masks, etc.
Escambia	General	It is WAY TOO SOON to open up Florida. Here in Escambia county we have more cases every day. Several bad decisions have already been made, and opening up too soon would be another, causing the state to close back up. We should wait to see what other states do and the results of those actions before our stupidity gets more people killed. Saving lives is more important than going to the beach or the economy.
Seminole	Healthcare	A comprehensive educated science based plan for businesses to open up with consideration of employees and the general public to follow so that the health of everyone doesn't become more detrimental
Hillsborough	General	I know these are trying times, but I feel like if we don't open up places, including restaurants, sooner than later that a lot of people are going to be put on a financial grave they won't be able to get out of. I am a full time musician so my work depends on restaurants being open. I understand it can't go back to full capacity but even at 50% can help a lot of people get back to work. I was asked by my government to stay home and do my part which I have and have had zero luck getting any financial help from unemployment, and now it's getting to the point I don't know how I'm gonna be able to help my family. We have 2 boys, 3 year old and 2 months. Please open things back up!
St. Johns	Transportation	Make it mandatory to work from home for those jobs that can effectively be remote.

AMERICAN OVERSIGHT

Pinellas	Healthcare	Dear Governor DeSantis, I would like to urge you to keep Florida closed until all the criteria of the plan for re- opening is met. I understand how this is affecting our economy, but I trust the experts opinions on this and believe opening too early would be a big mistake. As a health care provider, I want to get back to work seeing patients in my office, but not until it is safe for my patients and myself. Let's get this right so we don't find ourselves back in this same mess or even worse In a few weeks. Please help keep Floridians safe and do the right thing. Do not open Florida until the appropriate time. Thank you. Most sincerely yours, Amy Harrington
Palm Beach	General	ALL of Florida needs to open now as we are in economic ruin. Beaches and parks need to be first. A 5 year old boy got hit on a nearby street from trying to ride his bike and had to be taken by a trauma hawk. I have a 2 and a 5 year old that I am now scared to ride their bikes around the neighborhood. If gyms are opening in phase one which are way more dirty, then the parks can open. Small businesses need to open now as everybody is suffering. We need to return to work before my children starve and we lose our house. Unemployment is taking forever and barely covers the cost of food for a family. Please save our great state and OPEN all of it NOW!
Manatee	Government	Dear Governor DeSantis As your constituent I write to you to let you know that this is not the time to reopen the state of Florida for business. Florida has not peeked. The numbers are still rising. We do not have sufficient testing. My county for instance doesn't even offer open testing. Children cannot return to school, and risk exposing their parents and grandparents that live at home. I understand the economic impact. However economic impact is worthless without a healthy population. Do the right thing. People will suffer and die if we do not. One dead Floridian is enough not to open the State. I am not sending my kids back to school in harms' way. The virus is still circulating and infecting. We don't know who has it or who doesn't. I hope you understand. Sincerely, Richard Urra
Orange	Finance	Please reopen the state as soon as you can. It is very concerning financially not to be allowed to perform my job here and since my family has not been able to apply for unemployment due to the website not working we need our income. My brother cannot even login to website, it says his password is incorrect but cannot change it. Please allow us to go back to work next month.

AMERICAN OVERSIGHT

Clay	General	We are a small business. I have strict controls on the amount of people allowed in and out, strict controls on how people interact with eachother and strict control on the things that they do while they are in my business. Not only was my business deemed non-essential, it was demonized as a place where COVID was just allowed to run rampant and portrayed in a light that will cause irreversible damage for years to come. I own a gym, where people can strengthen their bodies, where I educate them on healthy habits, where I empower them with the tools necessary to become disease resistant, where I train them to be mentally stronger, and where the government put an unconstitutional & uncalled for overreaching ban. Many gym owners rolled over and took this ban as law, didn't receive any BS Stimulus, and now will never open again. REOPEN FLORIDA GOVERNOR! It wasn't your idea to close it, but I understand the pressures that led you to that decision. You can't stick by your guns as a matter of principle now, the truth is out about the virus and mistakes were made. DO NOT MAKE THEM WORSE!
Pinellas	Real Estate	Are all businesses opening and doing business as usual? There are people who have not been tested who will take the virus into the workplace, restaurants etc. I believe that more time and thought should go into this decision.
Manatee	Government	Brand new restaurant this year and we are now broke. My landlord is Benderson they will sue me until I'm dead. Your bridge loan is broke PPP is broke .. what am I to do to feed my family?? Open the state or pay all of my bills because I am broke what a sad horrible thing my whole life savings gone without a care in the world from this state. Cipriano Cucina and Bar 3561 53rd Ave W Bradenton

AMERICAN OVERSIGHT

Pasco	Government	Look at this based on REAL numbers. Here in Pasco county, the stay at home order seems to not be adhered to, yet we only have4 deaths. What it has had an affect on is now having to be herded like cattle to walk into a store, counted before you enter and left standing outside til someone comes out, so you can enter. We have destroyed our economy long enough. If warmth and sunshine kills the virus in a minute, then....I guess we should be back outside living our lives, putting Florida back together, WITHOUT tracking our moves. We are all running around anyway, so just give the green light to all people and businesses, stress the importance of cautious interaction, tell people if they wish to stay home longer, fine, if you choose to get out there, fine. It needs to be the people's choice. As the numbers are coming down, the risk is as well. DO NOT infringe on our Freedoms or Liberties as Americans. Governor, you could be the first to completely open our state, show the rest that we are past the worst and set an example of how, with a bit of caution, we can get back to NORMAL, not a new normal. In time, the masks will go away, the people will return to Florida and get us back on track. One important thing you need to be adding to your speeches, is that you will not allow ANYTHING to be put on us that steps on Americans rights, this will boost your approval. I don't believe in psychics, but Sylvia Brown predicted, years ago, that in 2020 a virus would come on strong and hard, then leave just as fast, not to be seen again for 10 more years. Coincidental? maybe, maybe not. You will be called many things if you do this for your citizens of Florida, but as this virus falls away and the Florida economy comes back, you will be seen as the governor who honored our Freedoms and Liberties, and made the right choices. Thank you for reading this and I hope you will keep your Constitutional oath to us. James Shafer
Polk	Government	It is reasonable to assume that after 45 to 60 days will behavioral modification our society understands what each needs to do to protect themselves. The state should open up all businesses according to the federal guidelines established by the Trump administration as soon as possible. Those who are compromised must shelter themselves to protect their own health and continue to modify their behavior exposure. The cure cannot be a allowed to inflict a greater cost to our livelihoods, Floridians need to start working their way back to some kind of normal as soon as possible.
Palm Beach	Accommodation	We need a Declaration for local governments to allow contractors to enter a condo to complete an existing construction job. Our HOA Board of Directors is not allowing us to complete our remodel to our permanent and legal residence. Therefore, we cannot move back into our residence. Our contractor has been banned for 4 weeks, with no end in sight. After talking to our Board of Directors, they have said that when they hear from Governor Ron DeSantis and local government via a Declaration, then they will allow the construction to continue. Please help with this! This is creating a hardship for us to have double housing expenses. Further, we have countertops, doors, cabinet, sink sitting at local vendors. They are at risk of being lost, stolen or damaged. Further, is the business decides to close, we will have lost all these materials.

AMERICAN OVERSIGHT

Seminole	General	Dear Governor DeSantis, Open Florida back up now. And completely. Any job that makes money for a family IS essential. It is tyranny to close down our economy and the way people provide for their families. Anyone who doesn't want to be exposed to the covid virus or any of the other 300,000 known viruses (that We don't shut down the state for) can stay home and carry on in isolation if they choose. But we must let the people who choose not to be under "house arrest" to go back to work. If you don't open up Florida you will see many more deaths from depression, as well as the costs of continued therapy we will all need from this trauma. We the people have rights to our liberty and the pursuit of happiness as well as the rights to assemble. And there will be many, hopefully peaceful, protests if the state doesn't open up and our God given rights to be with our friends, churches and family restored. Thank you in advance for doing the right thing. #openupflorida
Broward	General	Wait 2 weeks and observe the challenges of Atlanta since they already started to relax their restrictions. Then start easing restrictions in stages with least potential for spread i.e. parks and boat ramps, then increase the risk level gradually. Then medium gathering establishments such as restaurants and bowling ally's. Lastly large gathering potential such as sporting events and concerts. Until the virus has disappeared it should be "highly suggested" to be protected with a mask especially with large gatherings.
Osceola	General	Our state needs to open!!! This is just wrong.
Hillsborough	General	Please reopen the state. The excessive shutting down of the state has aided to the enormous economic crisis we are now facing and it is terrifying. Knowing that our state relies heavily on tourism, I can't even imagine the scale of loss our state is now facing because of this shut down and the years it could take to recoup these losses. My husband has already had to take a 30% cut in pay and we are now worried he will loose his job altogether. With millions of people already without a job, worrying he will be unable to find a job in a timely manner if he were to get let go is a sobering reality for us. In addition to financial and economic stresses, this shut down has taken a toll on the mental health of every member of my family. Please open up beaches without restrictions, please open up community pools. Give us hope again.
Palm Beach	General	Open everything. Everyone's work is essential to survive. 6ft of distance and mask required.

AMERICAN OVERSIGHT

Pinellas	Government	The State of Florida needs to be opened to Florida Residents only. Step one, close all hotels, motels and short term rentals in the state to all except verified business travelers. No families allowed. Step two, Mail an address verification card to every mailing address. Assign shopping/business visits based on the last number of the address. Addresses ending in 1 shop on the 1st, 11th and 21st. Addresses ending in 2 shop on the 2nd, 12th, an 22nd. All the way to 0 being the 10th, 20th and 30th. The homeless population would have to register with a facility for a shopping/business schedule. Guests in someone's house must adhear to their day. Everyone can go to work on their normal schedule with businesses make time allowance for the employees assigned days. Right now, very few people are following the stay at home guidelines and are in stores every day. Keep the beaches exercise only.
Manatee	General	I am ready for FL to re-open. In steps so people don't freak out but let's get this going! Thank you for hearing us! We love the Governor!
Pinellas	General	I do not want Florida to re-open in May. We need to keep our citizens safe. Thank you.
Miami-Dade	General	Please reopen everything immediately. This city is essentially open and ready to go, people want their lives back and we are ALL OVER the streets, parks, and eating places. The people who don't feel safe please just stay home until you are ready. Keep distancing measures in place (masks, limit venue capacities) until cases reduce to essentially zero per population capita. The large majority feels its time to get our lives back, we want our freedoms restored. This is not Cuba or Venezuela where we are told what to do by the government. This 45 day trial of Socialism is not what America is based upon. If you don't open, the people will open it for you. People are going to start losing businesses, mental health, physical health, and permanent economic damage (fewer tax dollars), The cure cannot be worse than the cause. Please reopen ASAP
Lee	General	Open everything immediately. You know that the death numbers are outrageously inflated.
Duval	General	I think that reopening is a risk our state shouldn't take. By opening Florida back up you're opening the state up to tourists who may or may not be infected or at risk. While the majority of the citizens who live here are permanent residents most are not. What is the point of opening the state if we've already stopped the children from going to school. It be smarter to just wait until other high tourist traffic states open and show that the curve doesn't go up. Opening our state means risking our states residents to tourists who do not care about our state or our safety.

AMERICAN OVERSIGHT

Pinellas	Professional Services	Please reopen the state. Even if the virus was as deadly as health experts initially predicted (it isn't) the half-measures we are currently conducting are meaningless. Why is it ok to be in a crowded supermarket but not ok to be at a crowded shopping mall? Tell the vulnerable population that they should remain isolated, wear masks, and protect themselves. Let everyone else earn a living. Reopen Florida now.
Escambia	Professional Services	I am a licensed massage therapist in Pensacola,FL. I kindly ask that Spas, Salons both hai and nail and tattoo shops remain closed during Phase one because these jobs are 100% hands on contact with the clients and proper social distancing is not an option while giving a massage , haircut, tattoo or manicures. We need to be cautious and safe for ourselves and our customers.
Santa Rosa	General	Please don’t follow the lead of other counties and limit the time. I believe this is the biggest (no brainer) thing I have seen. Why pack everyone in and limit them to 1 or 2 parking lots in a specified time. It is known now sunlight and heat kills this virus in record time. The heat of the day is between 11-2pm yet Santa Rosa decides to limit the time from 2-7pm. Please consider how beneficial this is for the people of this state. Staying inside is killing our immune systems.
Hernando	Healthcare	Countermanding the Stay @home order & reopening the state of FL will be disastrous for all of us & would exasterbate the Corona Epidemic & thousands more of our citizens! It is a reckless & deadly action!! Please do not do this! Thousands of lives depend on your NOT doing this!!
Charlotte	General	People need to be able to get back to work. The little guy is suffering financially. Let everyone get back to work, with guidelines in place. We can take our precaution and the people who don't want to venture out dont have to.

AMERICAN OVERSIGHT

Seminole	General	Florida in NO uncertain terms should be relaxing the measures it has taken to protect the people. The ONLY reason COVID-19 case numbers have not grown more is due to people staying at home and minimizing contact with others. My company (Cisco Systems) is suggesting we do as we are now for at least another 2-3 weeks and then they will re-evaluate. There are many others that have the same feelings that taking the risk right now is just not worth it. There is also an issue with simply looking and the number of people being admitted into hospitals. That number is reduced for one reason; staying at home and limiting contact with others. Spoke to a pal who is a MD with HCA and he advised that if we start to loosen things now he feels that it is likely to see us go back to where we were before with drastically climbing infection rates and hospital stays. Impact to business is horrible but everyone things that if small business opens back up that they will go back to work. That will not happen for quite sometime. Do we really think a resturant that can only serve perhaps 33-50 percent of its normal capacity will hire everyone back. The answer to that would be a no and the same would be true for many other businesses. Far safer to wait a little while until stats are much better and we can be more assured that we are past this until the fall. We think it is bad on owners now but many wont have the money to spend in small business stores until most are back to work for a little while. I encourage STRONGLY not rushing to open too quickly. We don't want Florida to be a Georgia. Florida is not READT TO OPN for at least another few weeks and then very slowly and we need to make sure it is essential business that opens. Not hair and nail slaons along with bowling alleys.
Pinellas	General	As a waitress of 44 years in Florida who needs to work (no unemployment or Fed stimulus yet for me and out of work since the third week in March), I need to work, but I am more concerned with my and others risk and safety. I don't understand in beginning to reopen the business' being chosen in other states and talked about here are the ones with the closest personal contact. When I serve people in a dine-in setting I can't help but get very close to my customers as I lean across the table in front of them to serve their food, clear their plates etc. There is no way to do 6 foot social distancing and they certainly will not have on masks while they are eating. I would love to at least be able to have on a mask, but the reality of a mask is that when I am wearing one, it protects them more than me. Please give this some consideration. I have left my house to grocery shop once in this time, but I would be more comfortable beginning to venture out if everyone were required to wear mask/face covering until it is safer. Also, I know many people, myself included, who had a very strange cough/flu-like illness in Jan. and Feb. If only we could do the anti-body testing to determine if had it already, we could more safely get back out in the world. Testing really is the answer until there is a vaccine, but in the meantime masks for everyone please. Thank you for your consideration. Nancy Ellen McVay

AMERICAN OVERSIGHT

Flagler	General	Reopen FL. The numbers don't match and the models are all wrong. Yes this may be a new serious virus but it is no different than viruses in the past. We have never done anything like this for any previous virus or illness. The shutdown is only worsening the situation. These stimulus checks just don't cut it. They don't cover anywhere enough of the costs of a family that has lost their job. They can not fix the soul crushing feeling of being unable to provide for your family. We have medicine that works. The facts are coming out about the mortality rate and how "suspected" deaths are included in the total death count which makes all that information FALSE! Keep "We the People" down too long and unable to do anything ourselves to make the situation better, we will rise up and take back our freedom. The DOJ is also saying they will side with citizens now. You will maintain more control if you open it rather than making us take it back.
Lee	Tourism	Gov DeSantis - Please consider extending the ban on short term rentals for out-of-state vacationers. We have a trip scheduled along with 20 other couples from RI, MA, NH, & Chicago area to Captiva in early May, as we have for years. If we are not allowed to congregate, sunbathe on the beaches, or gather in restaurants and bars our trip would be more remembered as "the Florida vacation that stunk" - which will stick in our minds longer than "the Florida vacation that didn't happen". We'd much rather save our funds and memories for next year, when the sunshine state is able to be fully open !
Miami-Dade	General	Florida is a large diverse state. What may be good for the Panhandle may not be good for South Florida. Population density is a key factor as well as the type of local industries, the dynamics of transportation, and even demographics like age. What this all implies is that different strategies may be required by location. Regardless of the location, though, all "opening" strategies should follow a minimal specs criteria and a phased approach such as the one suggested by the Safra Center for Ethics at Harvard, attached. And all of this is predicated on widespread testing of the population. Florida lags other large states in testing for the virus. And we should definitely continue to ease the burden on the unemployed. The Governor should also look beyond the present by establishing another task force to look at the world post COVID 19 with recommendations to implement in 2021 and beyond. Let's not squander a crisis.

AMERICAN OVERSIGHT

Palm Beach	General	If you open parks and beaches , people will have more risk to get infected, I have a compromised immune system and I am worried about catching the virus. You would tell me to stay at home right? and I am staying at home, But if you don't keep the guidelines and social distance, I will be forced to go back to work, with 200 coworkers, where people cough and sneeze right next to you, and go to work sick, and I will be at risk of getting infected. If you don't keep the guidelines, we will eventually get infected, with the virus. Please do NOT removed the social distance, we don't have a vaccine yet. Wuhan was in lockdown for 4 months before opening. Italy and Spain the same, so you think We will be ok if we open soon? Social distance and guidelines should be enforced and keep it for at least 4 months. It is not enough when Government officials are on TV saying that elderly and inmune compromise people should stay at home. It is not up to us to decide to stay at home if you are pushing to open the economy, people will be forced to go out again, and this weeks we spent at home will be for nothing.
Polk	Government	How about you fix the florida DEO before putting resources anywhere else. Desantis is a joke!
Miami-Dade	Tourism	In my opinion, Florida is not in a position to open for general commerce, especially in the area of tourism. In Miami-Dade County, one of the areas in the state that attracts a lot of visitors, we're already struggling with combating the virus as the most populous county in the state. It would not be wise to invite more people to the county that could potentially import the virus or take it with them after being exposed from one of our county's residents. Thank you for accepting my comment and considering my concern.
Broward	General	It's time to reopen Florida and the country as a whole. Get this unwarranted response that has destroyed enough of the economy and people's lives behind us and back to work and life.
Marion	General	Please re-open Florida now. People that feel they are susceptible to the virus can continue to self-isolate until they feel safe. And those that feel it is okay for them to go back to work or school can do so. The choice is up to the individual and their specific needs. This shutdown is having unintended consequences that are just as deadly and/or costly as the virus. We can do both - isolate the vulnerable and allow those that are healthy to work/ school. Furthermore, we do not need burdensome, job-killing regulations put on our businesses. If people want to wear masks they can. If a business needs to put extra precautions in place to assure their customers they can. Government edicts are a one size fits all solution that have the same affect as regulations; they hurt employers/ jobs and ultimately hurt employees and the economy. To treat this virus any differently than past viruses / flu is to set a dangerous precedent that could cause havoc to our society every Year. Please open Florida now.
Miami-Dade	Construction	In my opinion the governor should open trade and others with distancing people. but it shouldn't open fully. Thank you
Hillsborough	Food	If they open Florida to soon it's going to show Our leader only care about the economy in not the People but you can't have a economy if all The workers are dead from the (Beer virus)💰🍺🤢🤮😷

AMERICAN OVERSIGHT

Orange	General	There are many people suffering and losing out financially. Families endangered. Businesses closed down and won't be able to reopen. This is inhuman!!!! If people are fearful let them stay home!!! It's time to open up FLORIDA!
Seminole	General	I have been listening to the task force conference calls and to date all I have heard is companies trying to use the buzz words of "safety" and "health". Although we do have to consider those options it would be nice to hear someone actually speak to the issue of opening our economy. It is well known by this time that the virus is not the deadly enemy that we were told it would be. Florida's economy is very dependent on tourism and recreation attractions. I understand that we cannot open things immediately however we need to have an aggressive plan to get businesses of all sizes back open so our residents can get their jobs back and support their families. As to some of the topics that have been speculated in the media about possible actions, trying to require everyone to wear a mask in public is absolutely not something that should be considered for any reason. Also the idea of checking temperatures is also not practical and if the "experts" are correct, will only find those that should be at home anyway. The heat and humidity in Florida makes this more of a risk than the false sense of security that it would give those that do not want us to get back to work anyway. I ask that we institute basic common sense reasoning within the plan to open our economy and not focus only on the models of experts that have been wrong from the very beginning. Please open Florida quickly and allow us to get back to our normal lives.
Brevard	General	Until there are enough COVID tests for EVERYONE, WITHOUT LIMIT, to be tested, and enough antibody tests for EVERYONE, WITHOUT LIMIT, to be tested for antibodies, we shouldn't be sending people back into the fire. As it is, Floridians are terrible at social distancing, just go to any grocery store.
Collier	Professional Services	While the stay-at-home order has been stressful for me and my daughter, it is much better than the alternative of one or both of us getting sick. We have adapted by her completing school work at my office, while I work. It is just the two of us and we miss having a gym, ballet school, and girls nights out with our respective friends. However, we also have high-risk members of our family that we have had to avoid for weeks at a time. My mother is at an age that increases her risk. And, my father is a heart-transplant patient, which places him at an extremely high risk. While we are social distancing and maintaining safe standards, there are plenty of "weak links" who are not. The stay-at-home order protects us from them... Even when Florida starts opening up, we plan to minimize our time in public to reduce our risk of contracting the second wave of infection.

AMERICAN OVERSIGHT

Lake	General	My concern is specific to salons/spas. I own a small salon. While I'm anxious to return to work, I'm concerned about doing so prematurely. We cannot effectively social distance while performing hair or nails services and requiring costly PPE would add supply overhead that could be difficult to maintain and better used by medical facilities, and already REQUIRED proper disinfectants would be in short supply. I like the phasing idea to slowly reopen and putting limits on the amount of people allowed in at a time (including employees) based on total square footage. Ex: 1 person per 36 square feet allowing for 6ft of distance between people in any direction. We cannot look at only the extant to which something is essential but also the extent to which any business can operate safely under continued social distancing guidelines.
Charlotte	Information	I have been trying to contact the Governor for the past 5 weeks.. I applied for unemployment on March 8th... I haven't received anything... I have 2 kids and no job.. Please get me get my unemployment before we really do start going hungry! Please.. Last four of my social is 9439.. Please.
Brevard	Education	Schools need to open very soon. Online classes not really workin especially for K-3 grades. Teachers do not have any experience in online class and doing a terrible job. Zoo and other parks along with pet shelters should be open May 1. Summer camps need to get open as well.
Pasco	Recreation	I am interested in finding out how Florida residents will be protected once beaches, parks and theme parks open. I am extremely immune compromised due to chronic medical issues I have and while I love time outside at the beach I wish to know that it is safe.
Okaloosa	Recreation	Our family owns and operates a small business that we have poured ourselves into for over 40 years. We closed the business on March 16, with the understanding that we could re-open in a couple of weeks. We were also informed by the government that they were going to get assistance to small businesses while they were closed. It was over a month before our business received any assistance . It was barely enough to meet payroll and bills continue to pile up! What started out as being shut down for two weeks has turned into an indefinite period of time , With no end in sight! If we are not able to open up soon we will join the ranks of many businesses that will go under for no fault of our own ! Okaloosa has experienced three deaths to the coronavirus. One of these deaths was falsely reported as coronavirus. Our state cannot survive if the economy is shut down much longer! Please stop this insanity!
St. Johns	Retail	Sic Semper Tyranus. Dictators have always used fear to erode the populations rights and control them. The government's suspension of the bill of rights will only result in their removal. The picking of winners and losers must stop. Desantis should resign immediately. Open the state up today.
Pinellas	General	Do not open for at least another 30 days!!
Miami-Dade	General	Florida should not re open until we are cleared by CDC in combination with WHO.
Hillsborough	General	We just need to open. People need to work.

AMERICAN OVERSIGHT

Hillsborough	General	Regarding COVID-19: Please do not reopen without mores testing for the virus and antibodies. I've stayed in since 3/24- to go out now without knowing where and who is viral would be catastrophic and deadly.
Santa Rosa	General	Open everything back up with anyone high risk still staying in or limiting their activities. I don't think people understand that the virus will still be here if we close another month or 3 months. People are still going to Walmart in groups, with their families; to convenience stores and gas stations; and to home improvement stores. I don't see what the difference is in shopping there or at another "unessential" business. They have the potential to be exposed to the virus at any of these businesses. Places like dentist offices, optometrists and nail and beauty shops need to be able to open back up. These businesses can limit customers if needed. I also believe beaches and state parks need to reopen now.
Sarasota	Management	Reopen Florida! All jobs are essential!
Lake	General	Reopening the economy We can reopen some businesses such as retail by emulating what publix and Walmart are doing. Start out with baby steps, opening a few hours a day then increasing it as the public becomes more comfortable. Require everyone to wear masks. Put makings on the floors so people are going in one direction. Put plexiglass at cashier stations. Limit how am any can shop at one time. Parts of the state are already open, just carry what we learned in those business over to those that can open. We have to get back to work! Take dining outdoors. Open golf courses, beaches(with social distancing) miniature golf etc
Palm Beach	Healthcare	Open Florida only when: high quality PPE is available everywhere on demand; widespread testing has been completed; we have a good idea how much of the population has been infected; when the rate of infection of medical staff slows to a trickle. It would be best if we had a range of effective therapies and medications on hand before Florida reopens. Open slowly taking steps to ensure we do not overburden hospitals. If mortality spikes, be prepared to issue new stay at home orders. Personally, I am not sure the public would adhere to a second one as well as they have the first. Much better to keep what we have in force until we are confident we have everything we need to meet a spike in infections. Augment staffing of all nursing homes, ALF's, etc. Make infection control highest priority for patients and staff.
Orange	Tourism	I work at both Disney World and Universal. As much as I miss my jobs and am struggling without pay, I'd rather face that then go back to work and risk my health and safety everyday due to the parks opening up too soon.
Hernando	General	I believe it is a HUGE mistake to re-open anything in Florida. Our numbers of Corona keep climbing and I believe you will be putting people's lives in jeopardy if you choose to do this. I think we are going to have a second round of Corona, if this is done, and the 2nd will be worse than the first!
Taylor	Healthcare	I do not think the state should re-open because when it does this virus is going to spread and it's going to be very bad
Santa Rosa	Food	As a bar owner, I just need to re-open. So please, just allow us to welcome back all our customers.

AMERICAN OVERSIGHT

Collier	Healthcare	As an elderly, diabetic resident I am very concerned with the opening of Florida. With many of my neighbors and friends being in the high risk group, I would hate to see a growth in the number of cases. This would endanger all of us and lead to a greater economic crisis, not to mention the difficulties placed on our medical facilities and staff. In Naples, we will soon have the ability to test large numbers of people for antibodies. Let's wait until the results are in with this testing before beginning to open our communities to additional dangers.
Duval	General	Hello, I live in Duval County. When Mayor Curry opened the beaches, I saw an influx of out of state individuals flocking to the beach. We are all in this together; one nation, all 50 states. But if Florida is among the first states to open, the governor needs to plan for the influx of individuals seeking jobs, ammenitites, and something to do. Floridians have done well to flatten the curve and I would hate to see all of our hard work go to waste.
Washington	General	I think it is to soon to open up the state, stay put till its gone
Brevard	Recreation	When reopening consider Disney. Please make strict rules for the number of people allowed. Do not allow out of state visitors for a while yet in any regard because they will bring more cases from hot spot states. Make masks for everyone a must or they will be fined. It's the only way to curb new cases. Consider all the elderly and immune compromised! Please!
Brevard	General	Yes us Fl. residents would love to have the State Parks open for us. We live here full time and support our state. Please let us continue to keep the economy going by being able to use the state parks to camp and enjoy in.
Seminole	Education	There is a plan to run summer school at Valencia College with hundreds of high school students at six different campuses. This is a danger to all staff and students. Please keep all school gatherings closed for the entire summer. Let's try to get students back to 'normal' and plan for the Fall. The risks aren't worth the rewards.

AMERICAN OVERSIGHT

Hillsborough	Administrative	So in the drop-down list there's no option for "ENVIRONMENT"??? Why not? This issue is the biggest driver of ALL our State's economies; tourism, fishing, recreation, business, agriculture. NONE of those things work without clean air, clean water, protected wildlands, rivers, beaches and waters. The narrow focus of this appointed committee further illustrates the narrow focus of the Governor and Cabinet. Limited number of democrats appointed, making this a partisan committee; NOT including the Ag Secretary, so shutting out that HUGE part of Florida's economy; appointing mostly large corporate business leaders, leaving small businesses under represented (at best) when we are the ones suffering the most. And lastly (shame on you) including only TWO women in this group! Seriously, the lack of appropriate citizen and small business representation is overwhelming. And in case you haven't been paying attention, for the first time in a very long time, we have clean air and clean beaches and nesting/breeding wildlife where they typically compete with human impacts. How can you NOT consider these issues in your "RE-OPEN FLORIDA PLAN". There is WAY more to our state than JOBS. And we're all tired of that well-worn excuse. Please listen to the PEOPLE for a change! We don't care about Washington issues; we care about Florida's!
Pinellas	General	The industry in which I work is not listed in the area of interest. I work for a non profit organization that is governed by FLDHSMV. We deal with the public on a walk in & by appt basis as well as providing services in a classroom setting. It is almost impossible for us to operate while following the government standards- social distancing etc. I also feel like Pinellas County, Hillsborough County etc are not on anyone's radar unless it has to do with tourism or sports. It is completely unsafe for us to reopen and we need clear cut guidelines. The govt says 14 days of no new cases for Phase 1 but our numbers continue to increase. I don't think each county is being looked at individually and the focus is not on the smaller businesses. It is terrifying to think that I could go back to work in a week if the stay at home order is not extended, exposing my clients, my coworkers & myself to this virus. Testing is sparse, to say the least. We have steadily increasing cases but there's hardly any testing being done so it's obvious the numbers are higher than being reported. Until there is easily accessible & widespread testing, we should not be permitted to reopen in Pinellas County. If we reopen too soon,, there will be a spike in cases IF we can even get tested. There will be a spike in hospitalizations. The curve is not flat in FL. I am scared the regular person's interests are not taken into consideration. Big corporations, big money makers, that's the focus.

AMERICAN OVERSIGHT

Palm Beach	Information	Please follow the Federal Guidelines and only open up based on those guidelines. My mom is 89 years old and I'm good health, but I fear for her health should we rush to loosen protections which could result in increasing infection rates and potential disaster for the elderly, like my mom. Thank you for your time and consideration, Sincerely Erich von Unruh,
Orange	General	I believe that the state should not reopen until the new case count for the whole state has dropped dramatically AND not until there is widespread testing for every citizen on demand. And all workers should be tested BEFORE they go back to their workplace. And then re-opening in phases. In the first phase, ALL citizens should be required to wear face masks; social distancing with 6 ft gaps should be enforced, and with no groups of over 3 allowed to congregate in indoor facilities or outdoor public spaces, unless they are direct family who previously sheltered together. And this should be enforced strictly, with high fines and threat of potential jail time to ensure compliance! Police should make their presence known in high traffic areas and areas where young people are apt to congregate. Restaurants and other businesses should be allowed to open, but only IF they can enforce above social distancing AND below sanitation procedures. Strict specified sanitation procedures should be observed prior and after each customer's occupation or use of tables/booths/railings/door handles, register key-pads, etc... All public bathrooms must have an attendant who sanitizes the restroom constantly. All food handlers, kitchen workers, waiters must wear face-masks and disposable gloves (discarded frequently). And hand sanitizer must be available for ALL patrons to use with vocal encouragement to do so. Movie theaters should also be allowed to re-open under similar constraints. Public transportation of any kind, must be under strict sanitation procedures, with taxi/Uber drivers responsible for cleaning after each of their riders, and buses or trains having a dedicated crew-member to clean continuously after each rider departs. High traffic businesses should be under strict social distancing measures. And businesses with side by side employees, must be regulated to ensure their workers have adequate spacing, are wearing masks, and with proper sanitation. The key to everyone being safe, and feeling safe, is mandatory face masks for all, social distancing with no close groupings allowed (as specified above), and testing, testing, testing. The above should continue until new cases are rare!
Okaloosa	General	I work as a server in a big restaurant and I miss working so much. That being said, i dont want to go back until it's safe. I have a toddler at home who is dying to leave the house and i would rather lose my mind in quarantine thank risk reopening early and having a huge second wave. Tourism is a huge part of my daily life and it is sad here without it, but I'm not ready and I dont think its smart to reopen early. I think we need to continue to stay home. Being broke is hard. Being dead is way worse in my opinion. My job is talking about opening up may 1st. If we do I will be there. But I will be scared. Do we really want everyone out and about full time living in fear? Thank you for your time.

AMERICAN OVERSIGHT

Palm Beach	Government	Open the state! People will take care of themselves. We can't close the country to save a few lives—if that were the case we would do it every year for the flu! More than anything, let private golf clubs open their courses using best health care practices. Who are the idiots who think it's safer to go to Publix than it is to have 50 people spread out over 100 acres?
Putnam	General	I think we should start to open businesses with care and common sense if the state has the ability to contact trace outbreaks and contain them. Even if the officials are not 100% positive, we need to try. The cost of staying in lock down is devastating to the people of Florida. I am 67 with a long historyof asthma. I am aware enough to take precautions and restrict my travel. I feel for all the people that are suffering due to loss of work and trapped in a bad situation. Many of these people will benefit from opening up the economy as conditions are met. Just because I have your attention, It would be nice if we had hand sanitizer and toilet paper on the shelves out here in the country.....
Lee	General	The economy at both the state and federal level are going to need to be reopened without restrictions. Or both will inevitably collapse. A recession and or depression of any kind will have far more long term harmful ramifications than covid. Urge those who are most susceptible to continue to shelter in place. As for the rest of us life must go on. Death is an inherent risk of daily life.
Duval	Retail	We own a retail establishment and desperately need to open in the near future to survive. We do not qualify for any loans or assistance and also did not qualify to defer our home, business mortgages or other bills. We are on the edge of losing the roof over our head. We need to be allowed to open back up ASAP.
Duval	Healthcare	You asked for citizen input about reopening Florida. I believe until you have more testing you don't know how many people are carrying the virus thus positive cases could spike. I live two blocks from the beach, it is crowded with people with chairs and coolers and groups. Facebook had a picture of a couple on their chairs with beers in the cup holder sitting in front of a police officer, the local coffee shop with outdoor seats filled. How would you control what should be steep regulations like distancing and masks and taking temperatures if many will not obey them and there is little that can be done to enforce them. And this doesn't mention the hordes of people who will fill our communities from out of town. I believe if you miss vital steps to get to reopening businesses you will create more infected people and more deaths which will hurt the economy even more. Find a way to get the test kits needed, get the results, then figure out if and when to open. You infer a relationship with the president so maybe you can use that more affectively in getting the supplies we need.

AMERICAN OVERSIGHT

Orange	General	As much as we need to restart the economy, we need to ensure that we are doing it at the right pace and with wise and safe decisions. My chief concern is that reopening too quickly would increase the chances of having a relapse with the virus, which would hinder any progress made. In addition to the tragic results of a spike in mortality rates and virus cases that would overwhelm the health care system, a second hit on an already weakened economy would bring even more devastation to the Florida economy. Especially since our state is so dependent on tourism, we can't afford to reopen too fast - if consumers don't feel safe, then they will not travel here or go to any businesses. These are not easy decisions to make and I sincerely appreciate the opportunity to share my perspective with the task force. Thank you!
Orange	General	I feel that with extreme caution a few things like beaches and parks could be opened with strict enforcement of social distancing by local police. As someone who is immune compromised and has two adult kids living at home who are both high risk, it concerns me to open up too soon. I am also concerned about opening back up because then those of us who are high risk will be expected to return to work, despite the very real threat that poses. IF we do not return, we will not be able to continue (yeah right, I spent two weeks trying to register for unemployment on line before finally giving up and sending in paper app. who knows when I will hear back) receiving unemployment benefits. Under no circumstances should restaurants be opened for indoor dining, or movie theaters or bowling alleys. These places would be breeding grounds for germs and pose a real threat to both employees and customers. We must use extreme caution because those who are returning to society will definitely be exposing those who are high risk, both at grocery stores and at home, if they work and come home. Also, we have chosen to not eat out during this time because the restaurant workers are not wearing masks while cooking and handling food. If this was a requirement, I and I am sure others might be more willing to support local restaurants during this time.
Hillsborough	Professional Services	Only begin to gradually open when numbers come consistently down for 14 days. Be sure we have enough testing.
Santa Rosa	General	Opening the beaches prematurely is going to have massively negative outcomes. The states stay at home order is so lax, that people are still going out as normal. The panhandle hasn't seen a decrease in traffic and tourists are still coming here. They can't get renters for their beach houses, so they are flocking here instead, to "quarantine" at the beach instead of their home states. The military is not reporting it's positive case numbers which extremely skew the regions overall numbers. There isn't enough broad testing to get a handle on the severity of the situation. The lack of competent leadership in this state is astounding.

AMERICAN OVERSIGHT

Clay	Professional Services	My work is opening back up as soon as the restrictions are lifted. My doctor ordered an antibody test for me yesterday since we believe I may have had covid in march. I have not been able to take the test yet and whatever unknown virus i did have has left me with a compromised respirtory system and i use an inhaler now because my breathing is so shallow. I would feel much more comfortable knowing my test results before going back to being a barber in an extremely busy shop. I think we need more widespread testing available so we dont go into this blindly. It is too soon to reopen and I do not feel safe yet. Thank you for your consideration of the public.
Hillsborough	General	Do not rush to.open the state to frivolous services that you cannot maintain six feet of distancing. I would rather have bad hair days than visit an undertaker. So many people are not taking basic precautions..terrifies me!
Santa Rosa	Recreation	The beaches, parks and another recreation should be opened up during this pandemic. We need an outlet, somewhere to get out of the house. Social distancing is very achievable while outdoors. Let us get a breath of fresh air and enjoy the vitamin D. Being outside not only helps our immune system, but will overwhelmingly increase our mental health. We all have common sense here. We know how to social distance and will report if something is getting out of hand. Thank you Summer
Polk	General	How about our joke of a governor fix the Dept of economic opportunity before opening the state. Desantis is a joke!
Volusia	General	I realize people are concerned about being out of work but being sick or dead is not the solution. We need to continue the stay at home order through May
Dixie	General	Don't open the house door yet. It's because of allowing spring break to happen and opening Florida to northern states where shut down was in place is why Florida has so many cases now. Reopen and the numbers are only going to go up. Is our governor so far in Trump's pocket that money is more important than people?
Orange	Tourism	I fully support reopening the parks and having healthy people work. Allowing sick people to stay at home or someone who has someone with a compromised immune system is a good idea. I also fully support using temperature checks or QR codes like they do at China. That seems to be working ok for them. I really want to get back to work I never wanted to leave work to begin with. People also need their unemployment if they are to support the economy and buy groceries or go to stores and restaurants. Me and countless others have been waiting a long time for payments that haven't started yet.
Polk	Education	I have a daughter that is in college. I feel that financial assistant should be provided for tuition and housing to help college students who are not getting any financial assistance from the government. We are currently paying monthly for an apartment that is right near the university that she is not staying in due to the university being closed. The apartment will not work with us and says if the rental payment does not get paid then they will send us to collections. Financial assistance for college students would be very beneficial to the students and families during this difficult time that our country is enduring.

AMERICAN OVERSIGHT

Palm Beach	Food	I say we should reopen florida for the healthy people. Them being inside is not helping our immune system as a healthy man myself i say we reopen florida for the healthy and leave the sick at home!
Pasco	General	Open the state - with safety measures in place Open parks and beaches with safe distancing requirements Open small businesses that are able to meet recommendations Open churches with recommendations of safe distancing and cleaning Open restaurants with safe distancing & cleaning requirements Allow medical procedures
Hernando	General	Work with religious orgs to have them offer multiple services, ie Saturday Catholic masses at 2,3,4,5,and 6 o'clock. This would also offer some control of the flow of people into restaurants after the service. Also, work with local gov't to remove obstacles to expanding outdoor seating at restaurants. If we want restaurants to reduce capacity, let them use a section of their parking lot for dining. Set limits on #s of shoppers in stores. Not ridiculous low #s but enough to avoid crowds. As an example, my local Walmart has had way too many people in there at one time during the stay at home order.
St. Johns	Food	Such a difficult time, trying to balance health vs economy. I'd hold off till possibly mid May. Watching to see if we can continue a decline in new cases. Then, very carefully allow restaurants to reopen while holding back on the number of people allowed in, and seating distancing. Also the restaurant should keep areas sanitized. Right before restaurants were shut down, we ate at Keke's in St. Augustine and they were already doing this.
Broward	Government	Non-essential businesses should not be opened until we have more information about immunity for people who have already had the virus, we need more information about re-infection and antibodies. We need a major percentage of the population tested. SCHOOLS SHOULD NOT BE OPEN UNTIL WE ARE 100% SURE THAT IT IS SAFE!!! Kids are at risk too, Desantis!
Pasco	General	Please open everything. Keep advisories needed. Those who need to remain quranteed have that option. After 45 days my youngest son still hasn't gotten his UE $$. We will all suffer greatly if our economy dies. Screw the socialists, do not let them win. Process checks for everyone who has claimed, sort out errors when they get back to work. The system was broken befor this virus.
Orange	Finance	Reopening the state without the ability to test for a symptomatic infections is dangerous. We haven't truly quarantined which also has unseen affects. I don't see any evidence supporting Florida's on the downturn. Re-opening too soon will set us back farther than waiting until we see a decline for a significant period of time. Decision made in haste than can endanger 1 person is a bad decision. We are in a holding pattern due to lack of vaccine. Today, we are unequivocally safer in our homes.

AMERICAN OVERSIGHT

Volusia	Healthcare	People should be able to start working with social distancing guidelines. Restaurants should be able to devise a way for customers to view menus, remain 6 feet apart and still serve food. The antibody testing needs to be started and ramped up. Increased contact tracing needs more emphasis. Medical coding on cause of death needs to be accurate reported. PPE needs to be reinforced for all medical facilities with State and Federal support.
Polk	General	Events such as runs, triathlons, walks, plays, concerts, and festivals need to be cancelled. No way possible to police mass gatherings for social distancing or medical screening all participants and spectators. This places everyone in jeopardy at events that draw from all over the Nation and world.
Pinellas	General	Do not re-open until we have comprehensive testing. Our numbers look like they are low because no one can get tested. We also need wide access to anti-body tests prior to opening. Please use actual science as your guide.
Hillsborough	Healthcare	My interest is re-opening Florida due to covid19... (not "healthcare" in the regular sense) Florida should adhere to the strictest guidelines concerning social distancing and shut down businesses and schools and beaches etc for as long as covid19 is a threat to society. All residents of Hillsborough county should have the opportunity to undergo tests to determine their health condition to be in the position to address their health as appropriate for each individual. Under NO CIRCUMSTANCES should business interests take priority over the health of the community at large.
Leon	General	Listen to scientists and medical experts to prevent unnecessary deaths. If we reopen prematurely, more people will die and we'll have an even longer subsequent shutdown. I have a compromised immune system and cannot go back to normal without evidence we are all safe!
Escambia	Healthcare	Please do not open us up until there is a decline of coved-19. If you open one county to include beaches you are inviting people from other counties and states to come here, they may come from places that have a high infection rate and cause our numbers to continue to increase, therefore; taking it longer for us to bounce back. Also, your new unemployment task force is no better than before. I am not sure what needs to be done but perhaps look at how other successful states are handling it. I am a republican and concerned that this is really going to hurt us in November.
Palm Beach	Education	Probably we are gonna have second wave our school stay closed just remote learning till 2021 after winter. Also who is able to work from home should do it. Or companies should do employees rotation. It means one works from home today another tomorrow and etc.

AMERICAN OVERSIGHT

Volusia	General	When restaurants and stores do reopen , make sure to encourage them to keep up non contact curbside service, as those that are elderly or have underlying conditions should continue to have as little contact with others as possible until a treatment or vaccine is found.. it will not only help those people but will also help the businesses. I, for one, will not eat out immediately, as I live with an older person and, seeing some of the people who want to reopen and not take precautions will make me stay at home, as they have no regard for their own health, let alone others. Curb side service will help those who want to err on the side of caution but still generate revenue. Thank you.
Orange	Healthcare	With unreliable reporting, lack of widely available testing and continuing high numbers of cases, now is not the time to reopen the state. Until testing is available for everyone, with the addition of antibody testing, there is no way to ensure the safety of our residents
Flagler	Tourism	We need tourism. That is the states biggest industry. I own a tour boat company I'm deland. Blue heron river tours. This has crushed my business. I lost my entire busy season and so far I have no help of any kind financially. The only way I'm going to make it is to do tours so I can feed my kids
Miami-Dade	Government	COVID-19 has a 98% recovery rate, this rate of recovery does not justify the draconian mitigation measures that were implemented and it's time to lift them now. We were told at the onset, that this virus had a low risk unless you were elderly with underlying conditions. So, this was their going in stance; everyone else was low risk and no need to discontinue normal routines yet the Task Force inexplicably deviated from this posture and shut everyone down, now they are back to the elderly with underlying conditions (see Appendix to reopening guidelines below). The world stopped and the economy destroyed when we could have easily just looked out for vulnerable people and this is what needs to take place now; while everyone else goes back to work and public places. The flattening of the curve shelter-in-place was meant to buy time and prevent hospitals from getting overwhelmed; enough time has passed and hospitals are not overwhelmed; somehow flattening the curve was conflated with preventing death which was never the intent; the curve has flattened and the goal was met. All of the models used to justify the shut-down have thus far proven to be wildly inaccurate; current models reflect COVID-19 mortality is less than the seasonal flu; because of this, the Task Force has advised hospitals to count all deaths potentially but not proven to be caused by COVID-19 to be counted as caused by COVID-19 in an effort to hit high numbers in an attempt to make the actual deaths meet their inaccurate predictions; this is highly unethical and needs to be taken into account when weighing the decision to lift the shut down. Recall Broward County overreacted by shutting down when 3 elderly people with underlying condition passed away in a nursing home; only one out of the 3 was attributed to COVID-19; for this the entire low risk population was shut down. That action was unnecessary as evidenced by the Task Force's new guidelines taking us back to square one as to who in the State of Florida is vulnerable and needs to take precautions. In closing, refer to the Task Force Reopening of America Guidelines Appendix for justification to lift the shut down imposed on the majority low risk population: Appendix Vulnerable Individuals 1. Elderly individuals. 2. Individuals with serious underlying health conditions, including high blood pressure, chronic lung disease, diabetes, obesity,

AMERICAN OVERSIGHT

Charlotte	General	I considering Florida Numbers are still going up yes I've noticed they have slow down but in my area we've had a sudden jump in numbers we were low for a long time I think more testing needs to be done before Florida reopens I know this is hard on businesses and people. But I think it would be best besides what good is open up Florida back up if people are dead. I understand that people want to get back to work but at this point I think we will be just putting more lives in danger considering PEP is hard to fine for the public at this point.
Monroe	General	Dear Governor, You have done an incredible job since your election. Open up Florida and make individuals responsible for their own health. If you are elderly or are in a high risk group these individuals should be responsible for wearing PPE and making their own decisions as to how much to expose themselves to the disease. Of course our resources should go to increase resources and education for Nursing homes, assisted living facilities and home health services for the elderly but we cannot afford to keep our economy shut down. People need to go to their doctors, dentists, get screening and elective surgeries. We need to start getting back out and back to normal before society begins to breakdown. Over 50% of Americans live paycheck to paycheck and have no reserves to fall back on. Let your shutdown orders expire on April 30th and open Florida up for business. Thank you.
Lee	General	I think we have elected DeSantis to govern our state, therefore, I feel confident he is acting in best for our state. Our economy already weaker this past months, needs to get back on track and people need to learn how to get back on track slowly, but surely,. If we are to ever learn how to avoid sickness, it is not going to be hiding out. I am ready for things to open as appropriate.
Pinellas	General	I am a manager of Lifetime Athletic. I speak for all 350 employees at our Tampa club when I say that allowing fitness businesses to open is critical for our overall well being as human beings. People go to the gym for so many different reasons, whether it be to get in shape, blow off steam, or for long term medical reasons such as myself. Being a young cancer survivor, working out is not an option for me. It's a vital part of my survival. I run the LifeSpa inside of the Tampa Lifetime Athletic. I also oversee all of our spas in Georgia and Florida. For me, being furloughed has been detrimental to my overall well being, mental health, and financially life. Unable to support my family, unable to get the necessary equipment needed to stay strong, is not sustainable. Having gone through chemotherapy, I am considered at risk. However, I am smart enough to know my own limits and stay safe. We need to reopen sooner rather than later. If those at risk don't want to go out, they can stay home. But to keep businesses closed that aren't essential is biased and leaves way too much room for interpretation. What's essential to me, may not be essential to you, but we need to reopen our country and our beautiful state.
Polk	General	There is a greater chance of being struck by lightening than death by corona in my county. I don't understand why its illegal to have family over for dinner.

AMERICAN OVERSIGHT

Duval	General	I dont approve opening Florida back up as the numbers are still climbing along with deaths. This virus is very serious and also how many will get it when you open Florida up? This virus has definitely has hurt our country and economy so which is more important saving lives or money ?? Need to put God back in our schools, churches, meetings and etc and the rest will take care of itself along with God. God bless each and everyone of you and God bless the USA. Governor Desantis you have done a great job protecting the people of Florida ! Keep up the good work! Thank you Sir and I voted for you and will vote for you again !
Pinellas	General	Open necessities such as barber shops but strict social distancing has to be enforced. Working in Tampa and living in Pinellas, I saw more daily traffic after the state stay at home went into effect. Before the order, traffic was light. It tripled after the order was placed. Most retailers and grocery stores are very good at maintaining social distancing. When people are out in between these areas, they are shoulder to shoulder because they dont care. Dont open too soon for the masses.
Pinellas	General	Please think long and hard before "reopening" the state. We are doing fairly well right now with mostly only essential businesses open. Our level.of cases and fatalities is relatively low. By reopening non essential businesses like Georgia has, you will see bigger spikes in both cases and fatalities. We have not done nearly enough testing to have even a faint idea of how many people actually have the virus. Since the virus can be passed from people who are completely asymptomatic you endanger us all by getting back to normal too soon. Look at the pools, the vast majority of people on Florida and nationwide agree, there needs to be more time before reopening.

AMERICAN OVERSIGHT

Orange	General	I 100% agree we should re-open Florida with the continued social distancing, hand washing and responsible living day to day. Individuals that are smart will protect themselves, I wash my hands frequently and wear a mask when I think I'll be around a lot of people, like the grocery store. I don't think gloves are working at all. Most people don't know how to use them correctly and they are continuing to spread the virus. Washing hands is the better solution. One idea I have is that when workers are sent back to work, if they were able to make arrangements to work at home during the quarantine, that they should be allowed to continue to work from home indefinitely. That will cut down on the re-introduction of the virus in the workplace. My husband works for the state and has been allowed, successfully to work at home. He's also 68 years old and should be allowed to continue that as a matter of course for his job. It will help morale and lessen the concern about their colleagues. It would also help with the flu season as we get ready for it again in the fall. I believe it would also be good for the economy because businesses will find they can reduce costs and overhead while having more productive employees. I'm also a licensed Real Estate agent and have been taking excessive precautions while showing homes, wiping down doorknobs and counters while my clients are viewing properties. I open and close anything I can for them as well. I also give them gloves to wear inside each home we see which are discarded after each home and I provide them wipes and hand sanitizer after removing gloves, until they can wash them again.
Okaloosa	Retail	I work in a small jewelry in the Destin commons. I can not see myself going back to work. There is no way to social distance, people try things on and there is no proper way to clean them afterwards. We all have to go to work sick or not. Most can not go back to work, because we have children home and home schooling. I also have a family that is higher risk of catching covid-19, I would feel devastated if I brought it home to them. I think opening to soon will be devastating for us all. More will get sick and more will die if we do not control and have no new cases for at least 2 weeks. A major shut down need to occur before we can get back to a some what normal life.
Manatee	General	Governor DeSantis, Please se do not let our state repeat the mistakes made with the Spanish Flu. Of you allow us to reopen too soon that is exactly what will happen. I recognize that financial impact is hard to quantify but I can assure you it will be more devastating if you allow it to happen too fast. I also think when we do open up it has to be on a County by County based on medical professionals best practices for this type of scenario. Thank you for all you and the team is doing. Regards, Matt Woods

AMERICAN OVERSIGHT

Indian River	General	Reopening Florida would be a huge mistake. We haven't even come close to peaking or flattening the curve. Furthermore, Florida is a state full of retirees who will die if we reopen the state. There are studies shown that even young, healthy people like me are at risk of sever complications from COVID-19, including stroke. Every time a person comes into contact with another person, they are giving that other person the germs of every person they've come into contact with, including COVID-19. Considering how many asymptomatic people there are and the extreme lack of testing, the only tool we have against this deadly disease is physical isolation. I am begging you to not reopen the state.
Lake	Tourism	We must get the state back to work. Yes, a very small percentage of people are dying from covid and it's unfortunate. However, we are doing more harm to more people due to the loss of jobs and medical benefits to thousands of families - by not opening up the "crue" is worse than the disease.
Walton	General	I believe NW FL should be opened back up because there are a lot lower confirmed cases of COVID 19 overall in the area. I believe 65 years and older should remained quarantined, but that Floridians should use their own judgement with this virus.
Broward	Recreation	Public boat ramps-no restrooms, just access to the water for fishing.
Orange	General	Voting NO to re-opening the state. The reason is people are Not following the rules for social distancing and safe practices for COVID-19. It would be better to revisit this matter in mid-May. Thank you.
Miami-Dade	General	Poverty and suicide rates is way higher that Covid19 death. This makes no sense to continue the lock down. Open up our country, let's up do our job. This quarantine is against the constitution. We won't stop fighting for our right and the truth. Thanks
Broward	Recreation	Regarding gyms....I know many gym business owners who are willing to take extra precaution and necessary actions to keep clients healthy and safe before, during, and after exercise. These owners rely heavily on maintaining clients and gyms should be a priority. After all, most people don't congregate anywhere close to each other As they do in the supermarket or Walmart...Etc. A maximum of 10 persons in a gym (depending on size) would work. We know that, because we tried that prior to the closing of non-essential. We are greatly appreciative for consideration.
Jackson	Education	No! It is too soon to open the state for business. Hundreds of new positive cases of Covid-19 are identified in the state of Florida each day. PLEASE do not open the state for business until it is safe to do so. Thank you for your consideration.
St. Johns	Retail	I feel the worst is probably behind us, the state should reopen and just keep social distancing in place for the time being and the rules in place for the elderly
Broward	General	Please allow elective surgeries again!

AMERICAN OVERSIGHT

Polk	General	Hi Mr.Gov so my family and i have some recommendations that could be used in opening florida so one thing that has to happen is fixing the unemployment website and to get people like me money to help pay there bills. Second the people of florida need beaches to reopen safely and in a timed manner. Finally parks like disney should open soon but just with florida residents and annual pass holders but mr.damaro can help with that in helping disney reopen safely and fast and and encourage jobs to have better sick pay so they can stay home and still get payed. And being a fairly new resident in fl for a year why is florida ONE OF THREE states with a minimum number of weeks and pay benefits so when something like this happens it would be better suited for our residents. Thank you so much,Matt Livingston and family.
Orange	General	I feel we should remain closed at least thru the end of May. We have one of the largest elderly populations in the country and one of the largest tourism states, especially here in Orlando in the country. The combination of the two are just asking for trouble. Not to mention the uncertainty and fears everyone has. To partially open does not send confidence to the public that it is safe to get out and mingle among people or shop in stores. I feel like the economy would not be helped as much as we think and we run the risk of this pandemic coming back with a vengeance. Maybe we could speak to the banks and creditors that are getting money to maybe put a 90 day moratorium on all mortgage payments, car payments, credit card payments. That would be real help and felt by the people of Florida. Then we could focus on our families and communities and get past this time with as little pain as possible.
Polk	Finance	I'm writing to express my views on reopening Florida. Please do it cautiously and in phases. To have a second wave would certainly be a disaster. I'm in the exceedingly high risk group, over 65 and one lung, so I will remain isolated as much as possible. The Governor commented in today's press conference he wasn't going to rush in to allowing closed in areas to reopen. I agree. Go ahead and slowly allow restaurants with outside seating to resume operations. I would go get my haircut if I could request it be cut outside. Open some things, wait 2-3 weeks to monitor the change in infection rate, then if good open a few more things. Have someone research the best airflow patterns for restaurants and other smaller venues to minimize spread if someone has no symptoms. Please don't just turn the switch and either condemn me to never leave my house or worse to die. Thank you for this opportunity to speak. Regards, Ellen Bagdon
Orange	General	It is absolutely unsafe to open yet, we have a number of deaths each day and it's currently rising. It's not fair to ask us to risk our life just for a dollar !!!!!

AMERICAN OVERSIGHT

Hernando	Education	There's no reasonable way to guarantee the health and safety of children and school staff. Many will not be willing to return until there is, especially those of us who fall in the high risk category. Numbers are still growing !You must also be mindful of the data that strongly suggested that there will be a resurgence later in the calendar year. Keep schools closed! Put efforts into getting stimulus money and unemployment checks out! To safeguard the future, the present policies need to be continued. Continue to be preventive, not reactive! And do not allow the pension funds of your public employees to get raided. The people who have been stepping up deserve some protection, loyalty, respect and appreciation.
Palm Beach	Government	Do not open this state. Are you totally insane.
Hillsborough	Food	One of my largest concerns is the opening of restaurants and I work within the industry. I have dedicated my life to hospitality and work my way up into the corporate structure. I love my job. I want nothing more than for all of our concepts to reopen! However after working in the industry my entire life I have some concerns. The culture within a restaurant has always promoted servers, cooks, and hosts to come in sick. If you can't get your shift covered you come in. If you can't make rent, you come in. You don't have health insurance in most instances so most can't afford to go to a doctor out of pocket. What can be done to ensure all front of house and heart of house staff are never working Ill. How does one keep a kitchen line 6 feet apart? Stations would have to be entirely redesigned. How do you keep booths 6 feet apart and tables. There would need to , at least initially be limited seating capacity. What are we gonna do about shared tea pitchers , water pitchers, beer pitchers, coffee pots, etc etc These are just the tip of the iceberg when discussing reopening restaurants. Please do it safely and with all of these issues and beyond addressed
Orange	Administrative	As has been made abundantly clear by the state government -- not just over the past two months, but stretching all the way back to the first days of the Skeletor era -- Florida has zero regard for the working class and the middle class, the very people who make up the backbone of this state. The unemployment fiasco is emblematic of this: the system is not "broken" and "in need of repair." It's working exactly as the folks who destroyed it had intended. I'm utterly convince that Florida will attempt to reopen before the proverbial curve has had a chance to hit a downward arc, because it's better for the people who run this state to sacrifice its most vulnerable residents (health-wise or financially) than to provide tangible assistance to them in a time of need. Even if (when?) the number of unemployment claims continues to skyrocket, the state's response will almost certainly be along the lines of, "Look, we're open for business now. You guys are all on your own." This is the level of depravity that has overtaken, and now crippled, the Florida legislature. Nothing matters as long as the faceless developers, shady businessmen, and other multi-millionaire/billionaire shitheel sugar daddies -- oops, I mean "supporters" -- are looked after and pampered in a sufficient manner. As for the overwhelming majority of the state's population, well... let them eat yellow cake.

AMERICAN OVERSIGHT

Hillsborough	Management	If Essential business can open safely, so can other businesses. Keep people who can perform their jobs remotely doing so. Keep the schools and day cares closed through the end of this school year. Open the parks and beaches and continue to recommend social distancing. The people will do what is right and safe. Provide citizens the death rate information from this year (March and April) vs last year. Curious to see if there was a decline overall. No one has provided the public with this information and curios to see what that looks like. Also, has there been an increase in domestic violence, suicide, and substance abuse this year. All needs to be taken into consideration when opening back up. Staying inside cannot be healthy. Thanks.
Lee	General	The 'Covid' shutdown represents government overreach. Let's end it now.
Hillsborough	General	It is well past time to begin reopening the Florida economy. Agree that throwing open the doors is probably not the best way forward, but there are plenty of mitigation strategies that all businesses can utilize. In addition, the ability to go back to work, earn a paycheck, and provide for one's family should be paramount. The virus is here, it's not going away and stumbling towards another great depression is dangerous. What is worse, a virus that is treatable, and somewhat preventable, or a state or country with nobody working, a broken government, and no hope? People need to be allowed to be people, the government should not get into the habit of dictating peoples' livelihoods. Please, look at the statistics, look at our resources, look at what limitations the State has, and let's get back to work.
Manatee	General	We agreed to 30 days to stop the spread to not overwhelm hospitals. I sincerely hope you intend to open business as usual at the end of the month, we do not consent to any further lockdowns.
Volusia	General	I do not think we can risk our citizen's lives by reopening until our curve is in decline. What Georgia is doing Is dangerous and stupid. Fix the disgraceful unemployment system, and keep us safe for at least another month. If you do open it, I won't be out spending because it's not safe, and many avoidable deaths will be in the Governor's head.
Miami-Dade	Recreation	Dear Gov DeSantis, Please encourage local counties to expedite the opening of their beaches. Here in south Florida our beach communities are full of children that have no where to play but literally in the street. In my opinion you can open all beaches and allow residents to access the beach closest to the home at a certain time. For example, 33160 can access Sunny Isles Beach from 9-10 am and 4-5 pm, 33180 can use from 11-12 and 5-6pm and so on. Thank you for making this portal available, I think you're doing a great job! Best, Michelle
Pinellas	General	Can WE get back to "Living" and not just 'Existing'!? I'm all for "herd immunity' at this point. We worked hard all our lives, lived within our means, saved, paid our bills did all the right things and NOW, we face THIS? I want to the sick and at risk people to do what they have to, stay at home, etc but LET the healthy get back to LIVING!

AMERICAN OVERSIGHT

Hillsborough	Professional Services	The reason China steals our technology is freedom! Our citizens, armed with freedom, create amazing every day. My firm has helped more than 70 business owners file for EIDL & PPP over the past 4+ weeks, and the one constant they share is a desire for freedom. If the Florida Governor, state, local & municipal leaders would step back and take a 30,000 feet perspective, the answers would be crystal clear! Tell the PEOPLE of Florida "we trust you". You own businesses & make difficult decisions all the time. Tell the people "here are the guidelines, now everyone do what it is you do best". Once business owners are shown they are trusted, and every Floridian for that matter, they WILL rise to the occasion and show the world why we are the greatest. It's time for Governor DeSantis & his Task Force to step back & let Florida prove them right by stepping aside and not micro-managing.
Martin	Professional Services	Our business provides Summer Camps and tutoring services across our county. Some to very disadvantaged populations. On our site, we can separate children into groups of less than 20 all day with no parents allowed in building. We need to prepare if camps are going to be allowed to be open. We also need guidelines though we have put many rules in place on our own for when it happens. Many of our families need childcare to return to work or want extra help due to school time loss. We want to be safe as well. We also need guidance on employees over 65. Rules that keep us within the parameters of discrimination laws as well as safety recommendations.
Okaloosa	Healthcare	I'm an outpatient Pediatrician working in Crestview, FL. I'm a parent of 4 children who attend public school, and a military veteran & spouse. I've lived & worked in medicine in 9 states as well as England, over the past 26 years.. I have concerns about 1) the LACK of AVAILABLE local testing for my patients, 2) how difficult it has been to get any kids tested, and 3) the strong likelihood that kids in the community are the vectors, spreading COVID19 at their daycare or school. Many of my patients are uninsured, Medicaid, foster kids, or in custody of grandparents, etc. They are not able or willing to drive 45-60 min to be tested for COVID19 in Pensacola or Freeport or Destin, and they shouldn't have to. They also can't afford to pay for a test or pay for an ED/Urgent Care visit just to get tested. If we send everyone back to work, daycare, summer camp, and such, there will most certainly be a wave of COVID19 in NW FL far bigger than the current, though our numbers are certainly artificially low due to lack of testing. I also have ongoing concerns about appropriate PPE availability for future waves of illness that we will see when we re-open. PLEASE insist on local testing in every county, for everyone regardless of their ability to pay, before allowing everything to re-open. The local Health Departments should be actively working this issue and planning for the long term. Please continue to fund them and staff them. Please continue programs like WIC and DCF, which are keeping many of my patients alive during this time of economic distress. Thank you

AMERICAN OVERSIGHT

Lee	General	With the numbers staying steady in SWFL, opening the state back to normal is going to cause a second wave of this virus, in which I don't believe Florida is ready for. I think we need to continue to have restaurants as take out only. I think we still need to limit the times people are out and about and still urge for them to be out for essentials. I am a store manager of a business deemed essential and we have people daily coming into our store to just "browse". If we are so concerned about schools that they are staying closed, then we need to about our citizens, especially with the elderly population that we have.
Palm Beach	General	Hello Governor DeSantis and Re-Open Florida Task Force Team, Thank you for taking the time to read the comments of concerned Florida residents. I strongly believe that all plans to open the state should be guided by the medical community and science. While many are anxious and ready to go back to life as we knew it, we must accept the fact that life will never be normal as we knew it. We have to adjust to a new normal, and this requires that we have a clear, calculated plan. As a mother of two children attending Palm Beach County Schools, I am relieved that you decided to keep schools closed for the remainder of the year. This was a wise decision that will save many lives. Thank you! Please don't allow the shifting wave of politics to guide your decisions. A slow and steady, methodical path is the only way to truly reopen the economy successfully. As a consumer, I wouldn't even consider venturing out to a restaurant, getting my hair cut, going to the mall or going on vacation in Orlando. All of these activities come with great risk to my life and the lives of my family, neighbors and friends. If we follow science and listen to the medical community, public confidence will increase. Right now, I have zero confidence that it is safe to go back to life as we knew it. If you move too fast, you will immediately lose any ground that was gained through social distancing. While moving steadily will anger and frustrate some residents, they will one day thank you for saving their life and the lives of those that they love. I also believe that most Florida residents would prefer to sacrifice life as they knew it for the short term to preserve their lives. Respectfully, Julie Barbera
Broward	General	Thank you Governor Desantis for giving us an opportunity to share our thoughts regarding how to reopen FL. For counties like Broward County, I feel it is too soon to reopen businesses. Our County is still being heavily impacted by COVID-19. I do feel that other areas in the state that have less cases may be ready to open but using standard precautions such as enforcement of all having to wear masks, 6ft social distancing and proper sanitation of businesses with law enforcement ensuring this measures are taking place and giving fines to those that do not adhere to the rules. With regards to Broward, I feel we need to see less cases reported on a daily basis, more testing and less cases occurring in our nursing homes. Thank you for all that you are doing Governor to keep us safe in this great state of Florida.

AMERICAN OVERSIGHT

Pinellas	General	The Federal Government put out clear guidelines regarding reopening. Follow the Phases recommended.
Pasco	General	Everything needs to be reopened immediately, worst decision to shut down
Palm Beach	General	Please open NOW! We are aware of the risks!
Broward	General	I think the first thing that should be done before any consideration is given to opening businesses, schools, beaches and Parks is that everyone regardless of current health status should be given a test for covid-19 and blood work for antibodies. After the results are compiled then I believe staggered opening with limited amounts of crowds should be considered. Although staying at home has been difficult, I find solace in the fact that I may be contributing to halting the spread of this vicious disease.
Columbia	General	I believe it is to early to open the state . Cases are still occurring daily . Florida deaths have went up. I work in the Hospitality industry and if we open back up to in state travel most jobs will be slow still resulting in no hours . More people will get sick then we will not be able to work again . I live in Lake City and work in hospitality . If no events are happening then we won't see much business and risking our health . The little town next to us has over 100 cases
Palm Beach	Healthcare	Elective surgery(all specialties) should resume asap. Free-standing and office based surgery centers are even safer than hospital based elective surgery when it comes to infectious conditions. Social distancing can be maintained more easily. Of course, no patient will undergo any procedure if there is a concern of any medical problem and the operating room itself is one if the safest places to be as it is the closest you can get to a sterile environment. We all need to get back to work. Thank you.
Pinellas	General	Please consider this FACT..."95% of deaths have been people over 60 years or age". If the goal is to save lives, this FACT must be leveraged. It has been totally ignored to date. The Stay-At-Home order should now only pertain to people over 60, effective immediately. Stop putting hundreds of thousands of people out of work simply to avoid them having flu symptoms.

AMERICAN OVERSIGHT

Pinellas	General	As a 25 yr combat veteran family we choose Florida to be our forever home. That being said, please remember to continue lead from a place of fact over fear. I am also a trauma psychologist and have devoted my adult life to helping my fellow citizens nurture our innate ability to do hard things. Allow Floridians to do what we do best and they is to address stressful complex issues with intellect and compassion. We do it every hurricane season and this novel virus discovery is really no different except we have had our livelihoods held hostage. We are all suffering but most horrifying is the suffering of our most vulnerable. Our elderly, veterans, at risk youth, mentally ill, homeless and children. We must use this as an opportunity to not let them fall behind any longer. Make sensible and replicable plans to care for them going forward. Socially conditioning people is never the answer. Make progress to continue to put system based plans into action. Bring in leaders from the veteran community to help make policy that Continues to address this need. Do not over legislate a medical crisis. Set an example of how smaller governance does indeed foster more societal responsibility. Allow citizens to problem solve along with you and empower us with knowledge and not fear.
Orange	Healthcare	As a nurse and following the ever evolving updates of Covid19, in my opinion we should air on the side of caution with opening up places slowly. Like first restaurants at minimum capacity of no more then 25 -35 people inside establishments eating at any given time. Start out small and if no further cases are becoming critical then slowly open more restaurants. Then start opening small gatherings of Health related Doctors offices but of course still practicing social distancing and proper hand washing etc. and masks for the compromised patient populations that need them or people with Asthma, or Immune Compromised patients. No bars or social gatherings places for frivolous reasons till we get a better handle on testing people who have had Covid19 and for further testing on how long the Antibodies will flourish in individual patients bodies etc and if the need more antibodies. Make sure to have all proper PPE available to all hospital, Doctors offices and let pharmacists/Extra nursing staff have an area in the store to properly be gowned and with PPE and conduct Covid 19 Test Sites and Antibody Testing at various locations. Not just during the day only but up till 10pm at sites as needed for further data collection of who all has had Covid 19 already and who might be asymptotic carriers. Hopefully my ideas can be of some help. I would gladly help out wherever the Govt or Any Covid 19 Testing Sites would need help. Thank you for your time. Sincerely, Felicia Steele, Nurse

AMERICAN OVERSIGHT

Orange	General	I'd like to see FL taken off the Stay At Home order effective April 30, 2020. I'd like to see restaurants, gyms, bars, shops, salons and dentists opened with social distancing and cleaning measures as apart of their reopening. I think opening things May 1 would be safe with social distancing in mind. Thank you!
St. Johns	Healthcare	The White House guidelines say that there needs to be a downward trajectory of flu-like illnesses reported within a 14-day period; a Downward trajectory of COVID-like syndromic cases reported within a 14-day period; a downward trajectory of documented cases within a 14-day period; or a downward trajectory of positive tests as a percent of total tests within a 14-day period. Until we have met those standards (and we have not) then we need to continue to shelter in place. Forcing businesses to open, when they are going to have very few customers, means that their employees will no longer be eligible for unemployment (assuming they ever get it from the Florida system). The aim is to keep front-line workers safe and with enough food to eat, and letting them stay home achieves that. PLEASE listen to the doctors and public health experts before you listen to the Chamber of Commerce. It is not worth even one dead employee or customer, when we can wait three weeks and have everyone be safer.
Manatee	General	Reopening Florida before the Covid19 numbers start to decline throughout the state on a consistent downward trend is a dangerous, irresponsible idea. I live in a county where the Covid19 numbers are climbing, and my zipcode in particular has a particularly high number of cases. The local government has caved in to demands to open boat ramps and exclude private property from curfews. The result, as predicted, is a spike in cases. If Florida reopens prematurely the result will be a resurgence in deaths. Opening the state gradually, while on the surface sounds logical, with travel so easy and frequent, people in areas with a high concentration of cases will carry the virus to areas with a low concentration and cause a spike in those areas. When the state does reopen there need to be STRICTLY ENFORCED rules on wearing masks in public. If everyone is required to wear masks it will at least slow the spread to levels that can be managed. During interactions if both parties are not spreading saliva/nasal droplets, the chance of spreading virus drops significantly. This means strict liability with associated penalties for failure to comply.
Pinellas	General	Reopen Florida gyms.
Palm Beach	General	I am 100% AGAINST relaxing restrictions at this time in reference to the coronavirus. The ONLY reason we have had success with keeping numbers down and not overwhelming hospitals is due to stay at home orders. To continue that success, we need to continue the stay at home orders. The numbers.....aka sick people.....are still increasing. Please find a way to help those hurting financially so we can continue staying at home without some going hungry. Please help the people of Florida and do the right thing for us.
Palm Beach	Recreation	I think the gated communities can begin opening their clubhouses by following the cdc guidelines and for their own residents only

AMERICAN OVERSIGHT

Broward	Accommodation	I feel it's important to have vacation rentals open and would site economic and health benefits.
Broward	General	Make the entire state wear masks/ coverings. As a Broward native living in Lee County for college, people don't understand what 6 ft is and get too close.
Brevard	Government	In reference to re opening the state.....some businesses could open as long as you can have the social distancing of the 6 ft being observed. My opinion.....with Trumps guidelines to open....we are not even close to being able to open. I know the Gov has stated at one point that we are flattening to curve . I don't see it, again my opinion. Too many ppl are carriers and don't know it.. Brevard is just now ramping up with there numbers Increasing daily. I know we are a tourism state,and we are losing money, but please take care of your ppl of Florida before letting them back in. Let's wait a little longer. We dont know a lot about this virus yet. Please wait. Thank you.
Hillsborough	General	Please start slowly and give very precise instructions to our businesses. Maybe not rules, but instruction and guidance. I would like to have 4 weeks between phases...
Miami-Dade	General	condo facilities that are well managed should have oversight for their own facilities and be able to open pools etc. also as you're policing beaches now how is it not possible to poilce them with strict hours and distancing measures in place? fine the violators give the money to small businesses. a working website would be helpful as would multipole choose for quick answers!!!
Hillsborough	General	I feel we should start reopening now with safety measures. Restaurant s with more spacing. Salons with staff wearing masks, gloves, and proper spacing, etc. Beaches definitely. Police can write tickets to those who do not follow the rules. Parks and playgrounds should be open. People do not need government deciding their every move. Those vulnerable should stay home for their own well being. Those who disagree with opening should also stay home and distance themselves from their family members and friends who chose to go out. Thank you!
Lee	General	First off I think Gov DeSantis has done a great job through all of this. This is a situation that no one saw coming and for this long and no one knew how to properly prepare for it. However I do feel we need to open the state back up, with certain restrictions, such as social distancing. They majority of the people out of work, at least in my area and from what I see are your core of the economy. Restaurants, Hotel, Retail, Beauty and Health. Open those up!! Immediately! You will then see a decrease in unemployment claims. Well at least you will from me, I work in Retail and also in Real Estate so I welcome things opening up again!! I need to make money!! I have been waiting for my UE application to be approved, it took me 10 days to even be able to submit my application so obviously that is a hot topic and needs to be revamped severely. Keep up the good work Governor!!!

AMERICAN OVERSIGHT

Hillsborough	General	It's not sustainable to keep the state on lock down until this virus goes away. Instead we have to learn to live with it. Advise the proper precautions be taken and reopen the state including opening restaurants, barber shops, gyms, movie theaters, etc.
Hillsborough	Recreation	Open our beaches. Pinellas County is thinking of reopening their beaches, but not open public parking. That makes no sense. I used to go to Sunset Beach every Saturday by myself early in the morning to walk and collect shells for a couple of hours as a stress reliever. So please, open the beaches and don't forget to open the parking lots too. Thank you for this opportunity to hear my concerns.
Manatee	General	I think it would be beneficial for the whole country if Florida began opening up ASAP. Following the model that Georgia is going seems like a good idea in my opinion. We need to take into account that studies, such as the one fro University of South Carolina, which showed the number of people who have COVID-19 antibodies was 20 to 60 times more than recently thought, with these studies, and the need of Pennsylvania having to remove hundreds from their COVID death count, which points to false numbers on total dead from this virus, we should still take precautions, but open up all business to reopen and take precautions. Let people,like the elderly, take proper precautions, like staying home, while young people like no longer be restricted.
Lake	General	Please reopen some businesses with people keeping social distancing. If some people think it's too early, they can stay home until they feel safe but I think you should reopen some businesses now.
Manatee	Education	I have serious concerns about schools opening in August. I think by doing so this puts not only the children at risk but the teachers and other staff members getting exposed. I think that doing this will put a lot of us at risk and cause a second outbreak far worse than the first. Personally online schooling is working for all three of my kids and I am still able to work with my students throughout the week. We call schools germ factories and thay is because they are. This is a serious corpus and without a vaccine I think it's careless to put everyone in danger like this again.
Hillsborough	Healthcare	People are in the hospital because they have no choice. People go to the dentist and get Covid19 due to droplets in the air that last 3 hrs and there will be more people at the hospital due to COVID-19. Opening is reckless. Need more time to have more info about this virus and implement measures to avoid spread of disease.
Suwannee	General	For the sake of our economy and small business owners, we must reopen. If Walmart and Lowe's can remain open, small businesses should be allowed to open. We can keep social distancing in effect and still reopen businesses responsibly! For the sake of many families' livelihoods, we must open.
Marion	General	It is time to end this unlawful and inappropriate activity. End the shutdown today and introduce legislation to prohibit the practice.

AMERICAN OVERSIGHT

Hillsborough	General	I would like to comment in favor of the slow opening of the state. My husband (single income family with a 5 year old) works for a wine distributor. They have 2 sides- hotel/restaurant and grocery. My husband works for the restaurant side and thankfully during this, they have asked those employees to help out on grocery and are able to keep their jobs. They received an email yesterday that if this continues they will have to start layoffs because at the time, they have over 4 million dollars in outstanding invoices, which (to be honest) some of these restaurants may not open back up. So while people complain about “I miss restaurants! I want to go out!” Please remember that some people NEED these restaurants to open back up. Please help us and our friends! Just as the state slowly closed them, 50% capacity, we can do the same for opening!! We have to! Please! May 1st!!
Duval	General	I am concerned about the health of the people of Jax Fla. I think reopening the city now is to soon. People are still dying and being infected. We can't be moved because everyone is anxious to return back to normal. Which is okay but not now! Please take your time in making this decision. If the city reopens within the week myself and my family will not be participating in anything. No dinners; no movies; no gyms! We will be at home! Thank you for your time.
Marion	Recreation	Communities like on top of world have many activities that are on hold with lock down. Would be nice to see our activities (golf, pickleball, tennis, badminton, rec centers, wood shop, etc) reopen with people recognizing the social distance in place, and many if not all residents would continue with wiping down rackets, balls equipment etc. Club meetings could wait til phase 2 or 3. Our activities are not open to the public unless visitors with families. Until into phase 3 limitation of visitors could be excluded.
Lee	General	For the health safety of our community, it is too soon.
Alachua	Healthcare	As a concerned citizen, I do not feel as if it is in the interest of public health to re-open Florida's economy until public health officials have deemed it safe to do so. To open the economy now when social distancing orders have finally begun to make a lasting dent on the viral curve would be ridiculously naïve, putting the risk of many workers and citizens at risk. Without these workers, there will be no economy. Please, for the sake of the state, extend the stay-at-home orders and keep the economy closed.
Miami-Dade	Recreation	Please open up retail. Why are liquor stores open but places like Hobby Lobby & Kohl’s isn’t? Grocery stores, gas stations, office & home supply stores are open but yet our infection rates remain low. It’s time to open them up, let people get back to work & shopping. Please over ride the Mayor of Dade county. He is abusing power & is beyond ridiculous with his closings.
Hillsborough	General	Do not open Florida yet

AMERICAN OVERSIGHT

Seminole	Tourism	I strongly believe we should NOT open right now. If we were to re-open all the beaches and theme parks for instance, think of all the people that are NOT from the state of Florida who would want to come and vacation during this pandemic. This was proven during spring break. They would be bringing more risk to Florida when we, ourselves are still not safe. I understand the damage to the economy but is human life not more important? Can't have an economy without healthy people. I also do not think it is fair to the senior citizens. They have to stay inside just so everyone can be out and about being irresponsible? And to be fair, they are not the only at risk group. Re-opening is inevitable but that does not mean it needs to be right now! Think saving lives not saving money!
Broward	Recreation	Covid is NOT a death sentence. Are we trying to keep people from dying or from getting the virus. IT IS NOT a death sentence. Look at the recent DATA. More people have been exposed or gotten COVID than previously known. I.E. California and NY studies. the amount of people his HIGH but the death rate is not correlated equally.. This the death rate is quite low and 989 percent of people recover. Its looks like the FLU death incidence is more .. We have NEVER closed the country due to an illness.. if we don't open soon, more people will suffer Poverty and suicide. We MUST balance economics with this situation. Open up Florida now. This include Beaches. UV and humidity kills it.
Duval	General	I do not feel that Florida is ready to reopen. I understand that some people are eager to get back to work, however science has proven differently. I live in Jacksonville, one of he largest cities in Florida. This virus is very contagious, someone can be asymptomatic and still spread this virus to someone else. There needs to be some time of system in allowing people to go back to work. Its understandable that some want to open up there businesses and go back to work, but what good is the money if you die trying to make the money, and you are no longer here and able to spend it. We are one of the richest countries in the world, however we have one of the highest death rates of all the countries, that alone should tell you that we as a country should do more to keep Americans safe. I am also a Veteran and I love my countr and my state, but opening up Florida to soon its not what is best for America or Florida.

AMERICAN OVERSIGHT

Pinellas	Healthcare	The shutdown of the Florida economy by this administration with the recklessness of a bull in a china shop is staggering. Specifically, the vague EO 20-72 was implement and destroyed parts of the healthcare system with the stoke of a pen with no real purpose than to supposedly preserve PPE. The re-gearing and retrofitting the entire healthcare system to ONLY treat the China Virus was simply stupid. Does this administration truly believe that all other healthcare needs took a hiatus during this period? This administration has put far more at risk by such broad and vague restrictions. Define "emergency". Conditions that were necessary, but not yet emergency, now predictably become an emergency. Options to treat are much fewer and now extraction or amputation are all that is left. Patients and doctors are fearful that insurance companies will not cover treatments during this period if they are not virus related. This administration seems oblivious that people hang on their every word and parse the meaning. It seems to me that the government has collected a lot of data and information. I suggest it be used for more than your trivia games and to scare people. I can understand that at first it seemed that the virus was falling from the sky or it was magic. No one knew how it was transmitted. It has been more than a month and things have changed. This administration knows the HIGH PROBABLITY situations WHERE, WHEN and HOW the virus is transmitted. Restrictions should be structured based upon PROBABLE and just not just POSSIBLE. Since the federal, state and local governments have not shared this information, all you have done (and a fine job I might add) is cause a panic. People are not sure when to have their guard up. So they do it all of the time and never go or do things. Where are the incidents of transmission? It appears large number of people, indoors with close contact situations. That would be travel hubs, airports, nursing homes, etc. Not beaches or dental offices. Show me the transmission incident data on restaurants. By zip code really does not give information regarding the situation.
Escambia	Healthcare	Scientists, epidemiologists, and contact tracers should be making this decision. Please follow the science.
Sarasota	Retail	Please require everyone that comes into a store to wear a mask. I will be wearing a mask when I am working to protect the customers and they should have to wear one too protect the employees. Also would be great if all stores had the plexiglass at registers like target has. Publix has it too but target did a better job with it extending all the way across the register area. Keeping cashiers and store employees safe will keep everyone that comes in the store safe. Thank you.
Alachua	Real Estate	OPEN OUR STATE NOW!! This is Uncontitutional. The numbers DO NOT JUSTIFY ruining our entire Country!! Be THE LEADER and show the Country WE'RE FLORIDA STRONG!!
Hillsborough	Management	I strongly agree it's time to start opening up. If people feel the need to stay home they may but the long term effects of this shutdown will be catastrophic if we continue. I am an essential worker and my financial situation has not been effected except in my retirement account but I feel for all the effected people in the hospitality industry and others. I agreed with the precautions to start but each day I feel it is overkill and we need to get back to somewhat normal.

AMERICAN OVERSIGHT

Polk	General	Gyms need to be able to open. Including apartment/condo/HOA-sponsored gyms in these communities. I am pre-diabetic and need to continue to lose weight. Others are gaining significant weight due to no access to fitness equipment.
Broward	Professional Services	Governor Desantis, I applaud you for asking to include those who are more directly affected than the 'professional' ones who often make these kind of decisions. I definitely believe in listening to, and heeding the advice of professionals and experts in the field of which a decision should be made. But the people who are directly impacted should be solicited and heeded as well. I am a self-employed tax and bookkeeping professional. My business has been impacted by the virus, though not as critically as others. However, I am aware of those whose businesses, such as some of my own clients, are very much impacted. I believe that in the cases of some nonessential businesses such as barber shops or nail and beauty salons, eyeglass shops to name a few, can begin to be reopened gradually. I am suggesting this more for the benefit of the business owners than the customers. But perhaps they can begin limited service hours, and limited customers in the shops at one time. Staff and customers should wear masks and there should not be more than 10 customers in the business at one time, and even less depending on the size of business space. I believe that some restaurants can be gradually reopened using some of the same guidelines, though i do realize that it is not sensible to implement using masks while eating. I would also suggest including residents, including those such as myself, to be a part of your task force, and explore options regarding reopening those closed nonessential businesses one by one and see which can be reopened gradually and wisely. i am totally against a complete reopening of the state at this time. Thank you for this opportunity to be a part of this forum.
Charlotte	Healthcare	Hi. How will offices have social distancing? They put out memos of things they are doing for safety, but they aren't actually doing them..
Hillsborough	General	It is now established that you way over reacted because these numbers were immensely overblown. Stop trying to save face with this slow open. Own your mistakes. Sun, heat, and humidity kill COVID. Open state parks and beaches immediately!
Hillsborough	Finance	As much as I would love to see the economy reopen, I do not believe the time is now. We are still seeing spikes in cases and opening Florida could be more devastating. What about small business owners that aren't comfortable opening up, how many of them may lose businesses as landlords will look to begin collecting rent. I know this is a hard decision and I hope the best one is chosen by looking at the health and safety of the florida constituents and not from a pure business perspective.

AMERICAN OVERSIGHT

Orange	General	I really feel that prolonging this shutdown further will cause irreparable damage to the economy, and to peoples lives. What is the point of saving people's health if they have to live with their lives destroyed? I think the tasks at hand should be to figure out ways of implementing stay at homes for those with compromised immune systems and the elderly, and taking better care of providing public health options in the communities. If you're going to continue the stay at home order for everyone, you'd best fix the unemployment system first. It's a national embarrassment.
Levy	General	It is time to lift ALL restrictions that have been imposed as a result of the Wuhan COVID-19 virus. Our economy has been devastated and if we don't quickly restore our freedom to live our lives, it may soon be a permanent death to prosperity. The knee jerk reaction, from the top down, should NEVER have happened. This is not the way we have "handled" any other health epidemic EVER! The original recommendations of wash your hands, don't touch your face, stay home if you're sick we're all reasonable and adequate. We would be far ahead of "the curve" by now and we would not have destroyed our economy (including the healthcare industry), left so many seeking unemployment compensation, allowed Congress to create horrendously humongous spending bills...and I could go on and on. Every measure taken that deprived us of our property (jobs and businesses) and our liberty has been unConstitutional and MUST be lifted immediately! Restore our freedom to practice individual responsibility and reliance on self. Get out of our way and We The People will fix what overreaching government has broken. Nothing less will be well tolerated by people who prize the freedom layed out in our US Constitution and granted to us by Our Creator. We are eager to turn the page and go back to life pre-coronavirus! Signed; 65 yo trying to survive on 1K/mo SS since being told I could no longer work as a licensed massage therapist!
Pinellas	General	Please open up salons and gyms! We can be safe. Those who don't agree can stay home!!!
Hillsborough	General	Reopening Plan Extend current stay at home for 2 weeks. Establish places where people can get masks for no cost. Require masks until end of May in public settings where 6 feet is not possible. Masks required for any large gathering until science tells us it's safe.
Orange	General	Until there is a dramatic decrease in daily COVID cases consistently for several weeks, it is entirely too risky to reopen the state. As the daughter of a man who lives on a ventilator, it is like playing Russian roulette by opening up the state with a knee jerk reaction. Don't follow the foolish steps of the neighboring state, Georgia. My father's life, and so many others, is more important. Yes, we need to open at some point, but its too soon.

AMERICAN OVERSIGHT

Pinellas	General	I think we need to have a rolling opening for Florida residents ONLY. We cannot afford to allow throngs of tourists from who knows where to descend on our state, which they certainly will do once the beaches open. Keep the beaches open for exercise only. As someone said, do what is working and build off of that, like curbside pickup and delivery for any store/business that can do it safely. Opening restaurants is very concerning since I work in a hotel and restaurant. I am having a very hard time with feeling comfortable in going back to work amongst tourists from anywhere around the world. I might feel a little better about having only Florida residents in the hotel and restaurant. Also concerned with how my employer will keep us safe as it is impossible to practice social distancing working in a restaurant. What about public pools? How are you going to operate a pool at a hotel safely? As anxious as I am to get back to work, especially since I have not had one unemployment check for 5 weeks, I would appreciate your recommendation to open slowly so we do not see a spike in cases/deaths. Thank you and good luck.
Pinellas	General	As long as the numbers keep going up, we need to stay home. We need the numbers to decrease at least 14 days straight before we even think about reopening the cities or the state. We need to increase testing. The nursing homes are 'Petri dishes' for COVID-19. All nursing home employees need to be tested and every teacher needs to be tested as well as all hospital employees need to be tested before the cities and states are opened even a little. Then the ones testing negative need to have tracing done to mark their contacts. This disease can be spread by an asymptomatic person, that is dangerous. I have 4 asthmatics in my immediate family. They are at risk as am I, I am over 65. In addition, I wish small business owners were on this task force, Barbers, hairdressers, nail techs.etc.. They are most impacted by this Pandemic. White collar workers can work from home
Nassau	Accommodation	There is no way for businesses to maintain the 6' social distancing requirements. People must be vigilant in their hygiene and cleanliness, which probably will not happen. We need testing in all businesses with quick results to stop the spread. Business leaders must be at the forefront of accomodations for their employees and held responsible if they do not comply.
Lee	General	Everyone should be required to wear a face covering at all times when they are out in public.
Osceola	General	I believe we can re-open slowly with certain rules. For example maximum capacity in restaurants, keep curbside pick up available. Hotels/libraries can open up with big social areas closed off to promote social distancing. Keep sanitation and social distancing a high priority still, encourage Floridians vacation in FL & not let fear takeover. Also if you feeling unwell be responsible and get checked incase

AMERICAN OVERSIGHT

Palm Beach	General	I do not think that Palm Beach County is safe to open at this time. More testing needs to be done and the county needs a little more time to see the level of cases and deaths decrease. Safety is the most important over getting back to work. If you put our county back to work and the virus worsens or spikes again then we will have to stop working again and that will be worse than just waiting a bit longer now. Thank you!
Alachua	General	We need to stay closed for a few more weeks. We need to keep the majority of this virus out of the mainstream before the tourist & Hurricane season starts. It is going to be hard enough with people from out of state coming to visit during the summer potentially bringing the virus to us. Flattening the curve a little bit longer will also buy us time to get the proper Medical testing available for everyone. Please continue to keep the State closed until at least June 1st and re-evaluate from there. It would also be nice if there was a clear explanation of the stages of reopening the state. Also the precautions that will be needed to do so. If we are going to reopen, we need to have items readily available to do so. This includes hand sanitizers, face masks, wipes and other precautionary items that will help us stay safe. I have not seen definitions of the stages of reopening but having the supplies available is the first step.
St. Lucie	Retail	Please reopen businesses. Stores, offices, beauty salons, barbershops, restaurants have been closed long enough. We need to get back to normal life. The fear-mongering needs to stop today.
Alachua	Education	Hello Governor DeSantis! I'm writing to you to request that you order/recommend schools and universities to open at the start of the 2020-21 academic school year. I am currently a student at the University of Florida. Having UF resume their normal operations will allow students to return to in person classes, extracurricular activities, and university jobs. If classes remain online, students will not be able to continue most extracurricular activities which are complementary to formal education (for example, I am on the UF Mock Trial Team to prepare me for a law career). I am also concerned that many businesses in Gainesville will not survive if classes remain online for Fall 2020. These businesses rely on students to stay afloat and many students rely on them for work. Please consider ordering and encouraging schools and universities to open in Fall 2020 for the benefit of students, faculty, and local businesses. Thank you, Shayna Schulman

AMERICAN OVERSIGHT

Lee	General	It would be foolish to re open everything at this point in the pandemic. It was negligent to even open up the beaches and parks and now you are thinking about putting even more lives at risk. Rick Scott screwed us with this and DeSantis hasn't done anything to make it better. I never voted for either of them and I. Glad I didn't because I knew they would be incompetent when stuff got real. This is absurd, and blatent negligence as a public office holder and will make every effort to make sure everyone involved will never hold any power or representation of the people of Florida because he is doing a crappy job at it. Keep the state closed and maybe take notes from the Michigan governer. The woman with more balls to do something to protect her state unlike you. You put the disclaimer there because you know how badly you've done as a governer and know people will rip into you. DESANTIS IS A PUPPET.
Duval	General	Please reopen north Florida!!
Brevard	General	I don't feel our numbers are leveling off. The cases are growing like crazy to me. I think its also important to start reopening, but I'm afraid that it is to soon. I think 2 more weeks should show our numbers hopefully leveling out. Then I think the 3 phases should start. Every one is struggling but 2 more weeks is better than to soon and all we have done will have been for nothing.
Pinellas	Healthcare	Set up testing at blood banks and plasma centers for people willing to donate.
Indian River	General	I feel we should continue what we are currently doing. Keep Essential open until our numbers are really down. We all can be a little more patient. We need to make sure schools and colleges can reopen. The students have already suffered enough not getting stimulus money and paying tuition and leases.
Manatee	General	PLEASE re-open the state for normal business. People NEED to get their lives and business back. People who are at risk or concerned can continue to social distance but the rest of us NEED to get back to normal. I don't agree with abortion, but pro-abortion people constantly use "my body my choice" to justify why the rest of us have to allow them to have abortions. I don't think it's a fair statement in abortion because it's the baby's body. However, in the case of this virus, it is my body and my choice if I want to go out into the real world and live again, I can and do assume all the risks that go along with that. I risk car accidents, food poisoning, plane crashes, viral infections (of all kinds), bacterial infections (of all kinds) as part of living my daily life. I accept full responsibility for the risks associated with living in an imperfect world. PLEASE RE-OPEN!!!
Orange	General	Would like to open the state slowly and in the same way it closed. A limit on the number of people in social gatherings with bars and nightclubs the last to open.

AMERICAN OVERSIGHT

Palm Beach	Healthcare	I am a librarian in Palm Beach County. Almost all of my patrons are over 60. The fatality rate in our county is higher than it is in any other place in Florida. Reopening Florida at this point when the infection rate hasn't lowered in any significant way is a death sentence for a significant part of our population. If you're worried about the economy, worry about all the people that will not be contributing to the economy because they've died. Just as 155 people have already died and more than five percent of the 2,600 infected people that we know of, because testing is limited and we really have no idea how many people actually have covid, will die. That's our fatality rate her in Palm Beach County - 5.96%. I would, going forward prefer to see my patrons still alive by the end of this year. If that means waiting another month or two to see any of them in person, that is no sacrifice at all.
Orange	General	In my opinion, I believe we should structure our re-opening similar to the way Georgia has done -- but this should not happen until we have a consistent pattern of a decline of confirmed COVID-19 hospitalizations for at least two weeks prior to the re-opening of non-essential businesses. Additionally, I would highly recommend that the antibody testing is available to all Florida residents whether they are symptomatic or not. This will be the most effective way to gauge the current status of COVID infection and recovery in the state.
Indian River	Information	When will we begin to receive the additional $600 Unemployment Benefit? As of today, I have not received any; I am grateful for the $275 weekly benefit, but the $600 would help me buy food and pay bills. Thank you for listening to me and I look forward to hearing from you.
Hillsborough	General	You need to start reopening parts of the economy. The lockdown was meant to give hospitals time to prepare. Hospitals here are empty. My friend is a nurse in a cardiac unit was let go and took a temporary assignment in MA. This was never meant to prevent Covid. Keeping everyone this way is dragging it out. There's no guarantee of a vaccine. People need to start getting acclimated to openings. Otherwise come August school will be a disaster. Florida kids don't have another year to waste on faux online school. Please start reopening some things on a limited basis. It's also killing businesses and self employed folks.
Palm Beach	General	Keep salons stadiums and restaurants closed. Open up private community pools and beaches.

AMERICAN OVERSIGHT

Pasco	Healthcare	As an RN, and former small business owner (local bar in new port richey, fl), i see this from both sides.... health and economy. on one hand, we do need to be responsible about health and take precautions.... on the other hand, we can not just hide under our couches, and let our civilization crumble around us I think we do need to open for business. I do think that humans need contact with others I do think that we may need to be cautious about how we interact I do not think that we can just "isolate" and "hope" this all goes away one day. I think there is a new reality upon us. many "3rd world" countries have had to deal with mass death and pandemic for a very long time..... Those of us in "1st world" nations thought we far advanced and immune We need to be better prepared in the future for these kind of national emergencies. This will not be the last time it happens. For too long, Florida has relied on "tourism". We need a stronger economy and stop tying to "live in the 1950s". We could be an industry leading state in the area of healthcare both in personell and supply manufacture and distribution. Open up Florida, but don't just rely on tourism and entertainment. It is time to build Florida's economic base.... responsibly
Hernando	Recreation	Please open our State Parks. These parks can provide recreation while keeping with social distancing. Florida residents need to exercise and enjoy the great outdoors.
Lake	General	P L E A S E anyone tell mr desantis to refrain from comparing this virus situation to the life altering 911. I cringe every time he says it. He obviously knows nothing about how many lives were affected thru death, injury, long term illness etc. 911 should never be compared to any other event. It stands alone. And shame on mr desantis for not knowing this very very important fact of history. Thank you.
Palm Beach	Recreation	Our dogs are going crazt. They do not understand their lack of exercise. OPEN THE DOG PARKS
Lee	General	I urge the state of Florida follow the science and NOT open up until, as the guidelines from the Federal Government state, that we have a 14 day period of declining deaths and infections, and then only when we have enough testing to do an effective job of contact tracking so that we do not have a second wave of infections. Then we would be able to be in PHASE 1, and then need to follow the steps before getting to PHASE 2, and so on. Thank you.

AMERICAN OVERSIGHT

Duval	General	This is unconstitutional and unacceptable. The burden is on the State to demonstrate why the least restrictive intervention can't work and you have not done this. The science goes against the policies in place in fact. It has caused immeasurable economic and psychological hardship. This is on you. The longer it goes on the more deaths and distress and social unrest there will be. You can end it now and show courage.
Pinellas	General	1. Everyone must use hand sanitizer at the door before entering a building. 2. Everyone must wear a face mask in a public building or in areas where people are near. 3. Restaurants should continue curbside pick up, but allow 25% of indoor seating to be used as you can't eat with a face mask on. 4. Movie theaters remain closed for now because some people will do what they want when the lights go out. 5. Reopen craft, clothing, all retail stores but limit amount of people in at a time. Again, everyone wears masks. 6. Theme parks will reduce amount of visitors, indoor shows allow only 1/3 seats filled, spaced out. Social distancing and redesigning lines to promote distancing as lines move. 7. If it flares up in the fall, which it will most likely do, please suggest that food truck vendors be allowed to park at truck stops, mall parking lots, etc so truck drivers can get some decent hot meals. Truck drivers can pay for their meals, food vendors will make money, and truckers can eat something beside fast food or junk food.
Lee	General	Open FL back up no reason for healthy people to shelter in place!!! We now have enough microbiology studies of this new virus & it's similar to the flu! Use common sense and wash your hands!

AMERICAN OVERSIGHT

Polk	General	I agree with opening the state but still with restrictions. We don't want to have a massive freak out like March 2020. Baby steps. I do no believe opening the state back to 100 % functionality will be helpful. There is still a very contagious virus being passed from one person to another. If we open at 100 percent again we're likely going to experience another outbreak/peak of positive cases. Please do not open the state all at once and without restrictions. Here's an example. Here in little ole' Lake Wales, we have an awesome restaurant that everyone loves because it's the only of its kind within 30 miles of us. Japanese Steak house EXPRESS. Our city loves it! The closed one is in Lakeland or Orlando. Our local Japanese gem opened up yesterday for the first time in a month. They open it restricted to only take-out and had a little tent set up outside for patrons to pick up/pay. It was pouring cats and dogs. Raining like we haven't seen in a year. I heard this morning we got over 5 inches! That's a record for this time of year! We were thinking about ordering a Togo meal and I couldn't get them to answer the phone. So we decided to hop in the car and drive over. There was a line outside the door of close to 25 people. All of them standing in the rain and huddled up together trying to get a order. This is what will happen to ALL restaurants, gyms, beaches, malls and theme parks. It would be a disaster. Like I mentioned before I believe baby steps would be the right move. Thank you for opening this suggestion box. I will be sharing with all my near & dear to do the same.
Santa Rosa	General	Test
Escambia	Healthcare	I do not understand why we would listen to anyone but health experts on when to reopen Florida's economy. We have one of the oldest (greatest risk) and most poorly educated populace in America. We need to keep our economy closed. For comparison, we spend $6trillion on 2 wars as a direct response to 9/11/01 where less than 3,000 people died. That is a $2BILLION response per lost life. Now we are 1/3rd of the way there (1,000 deaths from covid19) just in Florida alone and we are already talking about reopening the economy after just a month? The only reason the virus has not hit us harder is from social distancing measure put in place. Do not trade Florida's safety for corporate greed.
Seminole	General	My feeling is we need to get back to normal business as soon as possible unemployment does not pay you enough to pay bills it barely provides food for an individual much less a family. Not to mention the website has been riddled with problems for years and every time a concern is voiced it falls upon deaf ears
Pinellas	Healthcare	Please watch this enlightening video from 2 doctors/scientists who've done extensive testing of 10s of 1000s of residents in Kern County, CA. This is a presentation to journalists from 3 days ago. This is the science and facts about Covid19 and the terrible secondary effects that are taking place because of stay-home policies. If anything, just watch the first few minutes. https://youtu.be/xfLVxx_IBLU
Seminole	Healthcare	Please open up the dental offices so we can get our teeth checked and cleaned and fixed

AMERICAN OVERSIGHT

Polk	General	money is important! Floridians understand this. Especially since we have not gotten unemployment from the state or from the CARE act which you have received. We really need more focus on that than whether you can get business open! Most are out of money and you have been totally avoiding the subject and when responses are made they are nothing more than excuses at this point. America sent US that money to help US! It almost feels like making interest off of it is the priority. I'd hate to believe that! I'm a 1099 the lady, at unemployment, on the phone a couple of days ago said you aren't even working on releasing the CARE act money yet.With regards to opening up, I have high blood pressure and asthma. My son and grandchild have heart disease and asthma also. I am in need to work but am not stupid enough to go out for the unforeseen future. The company I did contracted work for has not set up remote access and therefore I've been out since March 17, 2020! I felt more at ease after watching the update with the drs from Cleveland hospital and seeing it wasn't a rush to open. There still isn't a flattening for 14 days went up a lot Thursday. Please give us our money the reasons are old and NOW is the time! Please have stipulations in place that protect the vulnerable, like me, that should stay home when business open up that will still help us financially.
Pinellas	Healthcare	The health of Floridians should be prioritized ahead of economic concerns. If businesses are reopened prior to the control of the Covid19, we are likely to face another spike in cases and deaths which may, in turn, lead to a repeat closing of the economy which would likely exacerbate suffering more than current negative effects. Florida has not had, nor does it now have, adequate testing for the virus with quick turnaround. Widespread availability of testing and contact tracing is necessary to protect the population from rampant recurrence. For many businesses, it is obviously not sensible to expect adherence to social distancing guidelines, e.g., barbershops/hair salons, tattoo parlors, massage studios, retail of most types, etc. Instead of a focus on reopening an economy that relies on tourism (leading to an influx of out-of-state visitors), fix the unemployment process, including outdated equipment, laws pertaining to the ridiculously low benefit, etc. Spend time planning how to assist the millions out of work now and help small businesses survive a few more months until it is safer to reopen. Florida is a well-deserved butt of scorn from much of the country due to its poor response to the pandemic. Put some people to work to identify the response issues and begin fixing them; plenty of work to be done there!
Bay	General	North West Florida should be opened up at this time very low risk of virus spreading at this time.
Broward	Government	THE VERY FIRST THING YOU NEED TO DO GOVERNOR IS GET OUR UNEMPLOYMENT CHECKS TO US AND OUR FEDERAL CHECKS TO US NEARLY 6 WEEKS WAITING PLEASE

AMERICAN OVERSIGHT

Lee	General	We need to open things up and get our lives back to normal. Our mental health is suffering. My kids social lives are suffering. Our economy is beyond suffering. I am fortunate to have worked through this whole process and my older daughter got laid off but found another job to get her by. However, it's playing a HUGE ROLE on my anxiety, mental health, and relationships with the community, our own friendships, and co-workers. We are all divided as a community. My daughter that's a freshman in HS is suffering from doing distance learning and falling behind in where they should be for graduation. Her sports activities are nonexistent. She's always been very active and that's not the case at this time. We need to go out and socialize. We need dinner dates, date nights, and family beach days to save marriages and family relationships. We need to be human. We need to live life. We need to have our own choices to go out and enjoy our hobbies and feel a sense of normalcy. We beed shopping days. Mom daughter lunch dates, ice cream treats after dinner while watching a BEAUTIFUL SUNSET after spending a quality day at the beach making memories with our kids. We need friends over for dinners and drinks. Game nights with friends. We NEED NORMAL!!!
Orange	General	I think businesses should reopen May 1, 2020. As long as people are wearing masks and continuing social distancing, that should help prevent spread of covid. Also no gatherings of more than 10-15 people, including churches, should occur yet. Give that another 2 weeks. Do phases as the president suggested
Duval	Food	As a small business owner I am very much looking forward to everything going back to normal. However, it seems to me that the best way to make it through this crisis is to take an aggressive and painful approach initially to shorten the overall length of the problem. At the very least, we should at least be able to check off the following critical items to be able to ease into life as usual: - An abundance of Personal Protective Equipment (PPE) for our healthcare workers - An efficient self-testing process for everyone - Data that shows a significant decrease in local new cases - Data that shows a significant decrease in local virus deaths - A scalable approach to identifying and containing known virus hot spots - An efficient screening process for incoming travelers from known hot spots We can hope that we get though this quickly but as a smart person once said, “Hope is not a strategy”.

AMERICAN OVERSIGHT

Hillsborough	Finance	I think that we should wait to reopen. To cause people to choose between there life and there livelihood is inhuman. People are scared and not enough scientists and doctors the ones that have been to school for years to become a expert, the ones we all run to when things go wrong or our children are hurt or there is a pain that we can't identify with. All of a sudden when finances are affected from the rich to the poor instead of when we become sick going to the doctor we are running to business men who are in the me stages of there life, they have not sacrificed any of there lives to save lives but we are seeking there advice and this is who we are consulting with. This is a tragedy and a mistake, because they are the ones that will have to deal with our mistakes if we get this wrong. The hours they will spend at the hospital to put there lives at risk to care for all the ones who want there freedom at the expense of other Americans. We are in out 5 th week of this and we are at 52000 deaths that's almost 7000 deaths a week from one disease. Our priorities are in the wrong place and if our governor can separate himself from the President and focus on the people who promised to lead he would stop making irrational decisions that are being pushed by businesses. Governor businesses don't vote for you people do, if you win now only to lose later have you even won at all. We are loosing and we are divided more as a nation than we have ever been, and our inconsistency is helping this virus to wreak havoc in America.
Polk	Utilities	Sir, I work at the power plant here in Lakeland. I am 66 years old and of out work only because of the order to stay at home for those like me 65 years old and above. One rule should not and can not fit all. Like me I work in the coal yard and drive a large tracker. It has a closed cab with air and heat when needed. I work be myself, and the closest other worker would be 100 feet or more away in his closed cab tracker. So there is no reason to say I can't work. Or workers like me over 65 at these kind of jobs. We are and would be SAFE. I enjoy working and other my age need to be working. So please change this rule. Thank you Richard Williamson
Escambia	Recreation	Please open back up but with safety guidelines in place. My kids aged 10 and 11 play travel softball and travel baseball.. we are ready to get back to the fields but that shouldn't happen until at least June 1st, after we've had a couple of weeks to see how things go with opening everything else back up. As ready as we all are to resume our normal lives, we news to do it safely. I support you Governor DeSantis and our president, but please don't move too quickly. Thank you all for all of your hard work during this crazy time in our lives.
Okaloosa	General	It is time to get Floridians back to work. There are far too many people who simply wish to support themselves and their families on their own, without government dependency. The current course is unsustainable and will inevitably cause more harm than good. Give Floridians a chance to survive this blow for the long term. Thank you, Michelle Hatley

AMERICAN OVERSIGHT

Clay	Information	Lifting mitigation measures, right now, is an entirely ill-conceived idea, probably more based on sycophantic penchant of Gov DeSantis, than in facts about epidemics, or sound interest for the welfare, safety and security of Floridians. Every day, over 2500 Americans are dying, testing is very limited AT BEST, and isolation is constantly flouted by science deniers. "re-opening" right now will only result in MORE DEATHS and push the curve UP and FURTHER AWAY, which means we will see MORE CASES, for LONGER. It's a no starter. Voters will remember. Upward-failing frat boys seeking approval of a single audience of a bumbling idiot who suggests people perfuse disinfectants are NOT to be trusted.
Sarasota	Healthcare	I am a Registered Dental Hygienists in Florida for over 27 years and working in a very productive Periodontal Practice for 25 years. ALL DRNTAL OFFICES should remain closed until they have COVID-19 test kits to test patients prior to tx. Dental offices can spread this virus faster throughout the community. We also need the highest PPE available and strict guidelines as many dental office owners may be more concerned with the business side and not spending the money or time needed to keep employees and patients from getting this virus. Negative pressure operatories and rinsing with a 1.5% hydrogen hydrogen peroxide pre-rinse are all shown to reduce the aerosols and show less contamination if implemented. https://www.perioimplantadvisory.com/periodontics/oral-medicine-anesthetics-and-oral-systemic-connection/article/14173521/covid19-and-the-problem-with-dental-aerosols
Lee	Healthcare	I have many friends and family who have been affected with this virus and I beg you to not open just yet!!! Working in the health field I believe it isn't the right time and many people are safe at home! Please do not open back up we would crash our own hospitals
Palm Beach	Retail	Hi, The main objective of implementing a shelter in place was to flatten the curve in order for hospitals to prepare should they be needed. That goal has been accomplished! The pendulum swung way too far as a precaution since there were a lot of unknowns with this Coronavirus. Now that we have learned more about the people who are at most risk, new precautions can be suggested for those. Let the citizens decide how to behave, where in public they feel comfortable going, while opening back up all businesses, parks, beaches, and golf courses, immediately!! Take a slower approach on big venues like concerts and stadiums but put these on the timeline to eventually open up. Thank you

AMERICAN OVERSIGHT

Broward	General	Florida should reopen when numbers have dropped and sufficient testing for people are available not just for people showing symptoms oh and when our Governor learns how to wear a mask correctly
Duval	Food	Slowly opening restaurants with limited capacity is ok with me. Retail is not so much needed as online is still availble. Additional recreational places need to open up soon so we have outlets to exorcise
Palm Beach	Recreation	Golf Courses, beaches, pools, parks should be reopened for public health. For some seniors if they don't get this exercise the will lose mobility
Polk	General	By this point it is beyond obvious that a lockdown has been complete over reach. The death rate is possibly just a bit higher than that of the flu...possibly. The economic destruction that has occurred thanks to this tyranny is vast. How many lives were harmed and/or destroyed thanks to the reaction of knee jerk politicians? Even if it is as deadly as the fear porn on mainstream media would have us believe explain to me why walking a nature trail is not safe yet going to the grocery store is? You can't! I'm disgusted by the actions of government at ALL levels from BOTH parties! You all can join together in taking credit for the complete economic destruction and the final nail in the coffin that is the United States! You disgust me!
Broward	Tourism	It is to soon to open the hotels for toutism
Miami-Dade	General	I know.the Govenor will NEVER read this, but I will say it anyways, Please DONT be another Rick Scott, thibking about yourself, your pockets ans not the well being of your people. We as a state need to stop moving backwards. Would you send your children, parents or loved ones out to get sick. I get it the econony has to be reopened trust me we know my family is one of you million suffering with no income, and nothing from unemployment. But I rather be poor for now than dead for ever. I WILL NOT SEND MY KIDS BACK TO SCHOOL if you decide to open without proper treatment of vaccinations, yes Im all for reopening when the time is right. We have Drs, Nurses, frontline workers fighting everyday of their lives to help others, saving peoples lives for what to reopen and cause a huge recurrence and then just cause a chaotic mess, going backwards and staring again. Listen to your heart and the facts. NOT THE JOKE OF THIS PRESIDENT that we are forced to deal with. Gov. DeSantis I see in your eyes your a good man do the right thing by your people, your state and the family you were chosen for to lead. Dont reopen till the time is right. GOD Bless you and your Family.
Walton	Healthcare	I'm a Paramedic and I see this first hand. Please keep the state closed. Keep the Beach and short time rentals closed. If you don't you will have a very high chance of destroying your EMS services. Just think when someone calls 911 and no one shows up because we are sick or dead. Florida can't even provide the proper PPE that is required for EMS or the Hospitals. If you open the beaches and rentals up you have a very good chance of over running your EMS. Already busy with the vivid-19. And add tourist to the mix we will die for sure. Please think twice before opening the state back up.
Lee	Recreation	Please reopen beaches and parks with restrictions

AMERICAN OVERSIGHT

Miami-Dade	Retail	Open retail now with mask and social distancing guidelines. We are doing it now at the grocery, Home Depot, Ace Hardware, etc.. it doesn't make sense that general retail remains closed.
St. Johns	Government	i AM AGAINST EASING RESTRICTIONS DUE TO COVID UNTIL DR. FAUCI OR ANOTHER RELIABLE SCIENTIST SAYS THAT WE HAVE FLATTENED THE CURVE SUFFICIENTLY. WE DON'T NEED A SECOND WAVE OF COVID-19 THAT IS WORSE THAN THE FIRST AS HAPPENED IN 1918 WITH THE SPANISH FLU..
Pinellas	Real Estate	Open up the state. Please.
Escambia	Food	I work in the service industry and have for 8 years, with the same company. I fear that opening restaurants on May 1st alongside every other business will doom us to another outbreak and promptly throw us into another burst of Covid-19. Should this be the case, I beg of you to request businesses provide employees with the proper respiratory masks to protect us from inhaling this potentially deadly particle that could so easily spread. I'm incredibly concerned that I will contract this, as I am an at-risk. Please consider phasing in service and recreational activities or limiting them to to-go orders once again until May 15th.
Manatee	Professional Services	I have been a hairstylist for 20 years during which time I've made a great living to support my children and family. My industry is at the front of sanitation and disinfection on a daily basis and I feel we will be able to follow the guidelines to keep ourselves and our clients safe. I'm at my Whit's end. Unemployment hasn't come through, the stimulus hasn't come through and I'm out of money. I need to be able to work! Please don't let me and my children become a homeless, jobless statistic. Thank you for your time.
Hernando	Healthcare	As a healthcare worker, I believe that the state should not consider a full-scale reopening at this time. During this crisis, Floridians have shown that they are prone to do what is in their individual best interest and not the best interest of anyone else. There are people out in our communities sneezing and coughing on groceries intentionally, protesting in enormous groups, and expressing interest in mass-travel such as air and sea. Opening the state at this time will likely create a resurgence of the virus. My personal recommendation is to reopen in either June or July.
Duval	Government	I would like to see a gradual opening of restaurant s with PPE and social distancing. We should implement liability protection for businesses that operate with proper protection for clients. We should be very thoughtful about how we approach “reopening “. We don’t want to backtrack on our progress!
Duval	Healthcare	It is MUCH TOO SOON to reopen Florida!! Listen to scientists and EXPERTS and do not inject anyone with bleach. 🤦‍♀️
Baker	General	My husband and I both work in Jacksonville and every day we see people who are not practicing social distance. The only place we have been to is the grocery store and it is the same there. People are not taking this seriously. As much as I would like to see things open again, I feel it's to soon. We are considered essential employees and have been trying to keep people out of our business. Meeting them outside to take care of them. We have been laughed at, spit on, and called crazy. It's been difficult for everyone. But opening things to soon is scary. I don't want to get sick or die.

AMERICAN OVERSIGHT

Osceola	Retail	I am currently out of work what I make it's not enough to support me and my family I will like to be able to go back to work. I live in a very expensive apartment I cannot afford to pay monthly.please let's re-open florida so that we dont end up in the streets homeless we want to work for our money. Not the president money thanks in advance.
Lee	Retail	Please open hair salons. Nail salons, and restaurants.....we can social distance
Lee	General	Please open the parks and beaches!!!'n
Palm Beach	General	Keep in closed. For health care worker health. They are the true heroes
Manatee	General	I think the state should let the stay at home order expire and allow non-essential businesses such as restaurants and salons to begin working again and ease the restrictions on elective surgeries.. I am an Office Manager for 3 neurosurgeons and our office cannot remain open forever without the return of elective surgeries return of our economy. We currently have 40+ patients awaiting surgery that have had to be postponed. We are following the guidelines and have modified how and when patients come to our office, we have been 1 whom we have asked to stay at home as she is at greater risk than the rest of our staff. We have had to reduce our hours in office to 2 1/2 days a week down from 5 due to reduced referrals and patients afraid to come in. My husband owns a blueprint shop and he too has been able to stay open while adhearing to the guidelines. If our businesses can adapt so can any of the,. We also need to ramp up testing everywhere. I do not believe any of the numbers that we are given as I believe many more people have been infected and the mortality-severe illness requiring hospitalization and/or ICU admission rate is much lower than we are being told. How can those numbers be accurate when you are only testing the extremely ill. In Manatee County it takes and act of God to be able to get tested even to this day. If you aren't testing more citizens how can you know the accuracy of your numbers. I DO NOT believe that you need to wait for testing to get ramped up before you begin to ease restrictions. I firmly believe that every American has the right to make choices of their own and the numbers being given to us are not accurate enough to justify the continued shut down of our country. My husband and I both have underlying medical issues that could complicate issues should we contract COVID-19 and we do not want to give anyone this virus but we also know that continued shutdown is not sustainable and could cause more harm in the end and we want the government to believe in us the way we've believed in you. We've followed your guidelines, some have lost
Collier	General	Lets open the resturants, beaches and the parks in Naples. What is the mayor waiting for? COVID-19 will never be gone. Government can't "save" us. People who are at risk will learn to acclimate to THIER new normal; those of us who are healthy should be able to relax, enjoy a stroll on the beach, a bike ride through Baker Park or a dinner out. To shut everything down for approximately 1% of the population is grossly unfair. Those clamoring to keep the county shut down are probably still being paid their salary; what about all those who aren't? What about the small business owners who may never open again? Enough. Open already.

AMERICAN OVERSIGHT

Duval	Healthcare	Please don't open the market. What can learn from history during the Spanish flu in 1918 is that when Philadelphia ended it early and had a parade to boost morale, and within days, thousands of cases erupted with shortages of hospital beds everywhere and 4,500 people ended up dead. We are far from ready to open the economy. I know business I hurting but lives are more important. Furthermore, by opening up the Matket early when the virus is not under control, more infections and deaths would occur and it would take longer for us to quarantine anyway, so it's just going to take longer for the city to recover.
Polk	Education	It's to early to open Florida. Stay at home order should be extended until the virus is under control. I realize many Floridians are out of work but by reopening Florida we will see a spike in cases.
Broward	Recreation	As a business owner to a health club in South Florida I would ask you that you do not have us re-open in the first phase. I just can't imagine how I can keep people 6 feet apart. I know most of our members would never wear a mask when working out. On social media we took a poll from our members of how many people would come back in the majority all said that they would. The scares me how do I protect my staff, my husband and my senior citizens.
Lee	General	As a teacher I'm ready to get back to work. As a parent we chose to live here in Florida so we could go to the beach and enjoy where we live. I want to get back to our life. I have family here that I have not seen I want to get back to Our life. I am now taking anxiety meds my husband's health is failing were worse off than we would have been
Pasco	Professional Services	I would like to suggest that we fully reopen for business, with the only restriction being that we try to remain approximately 6 feet apart and that people at high-risk be permitted to continue advanced "social distancing" at home. If we can be corralled through Publix and WalMart, certainly we can go to work, school, restaurants and church. Our economy is suffering and we need to get back to work....everybody, not just essential workers. Besides, I'm concerned that we are losing the possibility of "herd immunity" not just for the Covid-19 but for so many other communicable diseases. While I agree that we should not put our most vulnerable at risk, but we also cannot put the entire State and the economy at risk due to over-protection. There has to be a middle ground to preserves both.
Miami-Dade	General	allow condos to have oversight over their own facilities- condos that have facilities have already implemented appropriate changes. as you are already policing beaches-how is it not possible to continue this with strict hours and social distancing. fine violators and give the money to small business get a working website! multiple choice would have given immediate results!

AMERICAN OVERSIGHT

Pinellas	Government	I work for local government and we have been working on a skeleton crew, but working. I feel safe in my place of employment. I am a FREE citizen and wish to be responsible for myself, whether to wear a mask, where to shop, when to go to the beach. It is truly evil for the government to have required all of the small business owners to close their stores, while groceries, walmarts, targets, convenience stores, Home Depot and many more large, corporate owned stores are doing business. Open the state. Let the businesses and the business owners and the employees and the students get back to work. And give me liberty or give me death. I will gladly take my own chances, but the government doesn't need to hold my hand.
Columbia	General	I am writing to you today to beg for the reopening of the State. We should not be caged like animals. We live in a country built on the tenants of freedom. Doctors offices are closed and refuse to see patients unless it's "a dire need". There are many needs that may not be considered "essential" to the government but that doesn't dismiss the importance it may be in an individual's life. For example, chiropractors, acupuncturists, and massage therapists are not taking patients. My daughter, as well as myself, suffer from migraines and oftentimes these doctors are the only relief we can get , however due to the shutdown they won't see patients. She also just recently got married, after several bad past relationships, but has been unable to change her name because of thus shutdown. She was able to change it with social security but then the shutdown occurred. She was not able to go to the DMV to get a new license. She is a law enforcement officer and needs her credentials updated, however her employer will not allow it unless they see the new license. She upholds the law and protects the public and puts her life on the line to protect others every day. She operates at a constant stress level that most people can't even comprehend and wouldn't want too. She was so excited to get married to a very special man who is also a law enforcement officer. Her excitement has unfortunately come crashing down because she can't even change her name and update her legal and professional credentials. She has called the the DMV, however they act like she might what, falsify her records? She enforces the law, not breaks it. All over the website they say they are doing things online but what about changing names? This is so very sad. Please let government offices such as the DMV start operating again. This is necessary in our society! In addition my daughter and her husband are desperately trying to have a child and have sought the help of a fertility clinic. It's my daughter's dream to be a mother and she has been through so much tragedy in her life such as ugly divorces, miscarriage, death of fellow law enforcement officers to suicide, and the death of her own father at a young age. She was told by the fertility clinic that she can't even be seen at the clinic for simple blood tests until this ban has been lifted. She is already 41 years old and running out of time
Osceola	Food	There will never been a 100% perfect time to reopen. Use reasonable distancing in restaurants, encourage thorough sanitization of surfaces and people, and perhaps use temporal thermometers to check for fevers with employees and perhaps customers. Of course, not having a fever doesn't mean that a person is "clear," but that has always been the case. It is good due diligence, and would reassure most of the public.
Lee	Agriculture	Too soon to open.

AMERICAN OVERSIGHT

Brevard	General	It is simply unsafe and irresponsible to open right now. We have to get testing and contact tracing going if we are going to do this the right way. This means 4x or more the amount of tests we are currently running. And small armies of people calling and tracing who an infected person came into contact with. We have the choice right now to delay opening until we are able to do massive testing and contact tracing, or push forward and cause thousands of preventable deaths. There will be no strong economy if Floridians are dying by the thousands anyways.
Pinellas	Tourism	Open up Florida. 1. Beaches are big enough to keep away from each other and we are adult enough to make the decision to go or not to go and stay a safe distance. 2. Restaurants can sit people away from each other and limit access. They can also take the temperature of workers to make sure they are not sick. If a worker is not allowed to work because they are sick, then the worker needs to be paid for that day and every day they are off whether they have sick time or not. 3. If a person can work from home, then they should be allowed to do that even if a company wants them to come to the office. There needs to be a state mandate to make sure the employee has a final say where they work from. 4. Open up the theme parks. They can limit the number of people per day if necessary. People who don't want to go can stay home. Most parks are big enough to keep your distance. They can have virtual wait lines so you won't have to wait in long lines. Open up the parks to Florida residents first, then out of state and finally foreigner tourists. WE NEED THE TAX DOLLARS IF FLORIDA IS TO SURVIVE. People die every day from the flu, car accidents, etc. but we don't shut down the state. Also put a stop to false news and fear mongering. I have seen stories that Disney wont reopen until 2021. This is not official from Disney so it shouldn't even be on Facebook etc.
Polk	General	I do not think Florida is at a reopening stage yet. Our family has been supporting small businesses and we understand the hardships they face, but with half of our family being at-risk population, we don't think Florida should be reopening the economy. We understand and share that this cannot go on for a long time, but a relapse will be much worse. Most of Florida's business comes from tourism, so reopening too early in the game will mean opening the door for more infections. We need to be able to control it, not getting rid of the virus, we know that will be virtually impossible, but we need to be in control before reactivating any part of the economy.
Lake	General	I am in a family with very high-risk individuals who have been quarantine for over 6 weeks now we started it on our own we do not mind staying quarantined until this virus has resolved there is no reason to lose one more life because others want to go out for money the root of all evil. Governor DeSantis I voted for you it would be a shame for you to lose the next election because of a concern for money

AMERICAN OVERSIGHT

Hillsborough	General	It's time to open. We've been forced prisoners for long enough. People need to get back to work. Students need to be able to have prom and Graduation. Businesses need to open. Florida is in a good position to open up. If Walmart, Lowe's and Home Depot are fine for people to be at so are the rest of the businesses. Social distancing needs to be over. People need people.
Broward	General	Please reopen Florida. Buisnesses need to open and normal daily life needs to resume. "The only thing we have to fear is fear itself - nameless, unreasoning, unjustified terror which paralyzes needed efforts to convert retreat into advance." - FDR.
Hillsborough	General	Restaurants, Beaches and gyms should open and practice social distancing. Everything else should remained closed. We need to eat, we need to exercise and get out in the sun. This will not only help us mentally but will keep us healthy. Opening all of Florida up when everyday we have new cases would be irresponsible.
Pinellas	Healthcare	How can Florida reopen the economy if it has not put a comprehensive testing and tracking program in place? We are far behind most states in tests per million. What is being done to test asymptomatic residents? How much did the million doses of anti-malaria drug cost Florida tax payers? These drugs have not been approved for use or proven to help with covid 19. Can FL get a refund and use those funds to increase testing to at least 100,000 test per day. Opening the state without a robust testing and tracking program will keep residents and tourist from supporting the re-opened businesses. May your God guide you to not let politics trump our health! Thank you for all your efforts.
Hillsborough	Professional Services	As a Licensed Massage Therapist of over 17 years, as well as a current small business owner who has received NO HELP FROM OUR GOVERNMENT...I'm pleading with you to KEEP OUR MASSAGE BUSINESSES, SALONS, SPAS & THE LIKE CLOSED. We are not able to practice proper social distancing because the very nature of our jobs is hands on. We have no access to proper PPE or cleaning products. We as an industry are hurting and miss our clients and miss our jobs. But, this is a healthcare crisis and needs to be viewed as such. Our industry is going to require very specific protocols across the board and TIME TO PREPARE before any reopening occurs. I rent space from Salon Lofts for my business. We have 20 individual businesses in our building. On any given day, there are at minimum 40 people in a space the size of a small movie theater (which Governor DeSantis just said he was not prepared to reopen in his press conference). We can not afford to become the powder keg for resurgence of this virus. I need to pay my bills as much as the next person right now. But, I cannot do it at the risk of my health or the health of my clients at this time. Please continue to help us stop the spread of covid-19.
Lee	Healthcare	Stay closed until large portions of the population has been tested for anti bodies. Also make sure that everyone has PPE for protection. And if not for the general population for businesses...
Pinellas	Food	Don't open the dining rooms yet... it is just too soon! Delivery and take out is just fine!

AMERICAN OVERSIGHT

Pinellas	Food	While I myself, NEED to get back to work. I feel May 1 is a bit premature. I am a bartender in a large restaurant in Tierra Verde. I am 49 yrs old. Our clientele is made up of A LOT of retirees and snowbirds. This was our busy season we were just getting into. While drowning here with no resources or money coming in for over a month now. Given unemployment and the CARES act are apparently not real entities. I am willing to say maybe mid may or June 1. I think we should see what happens in Georgia first. If the incubation is 2 weeks, then that's when we will know if it'll be a catastrophe. I don't feel we've actually reached our peak because we started having a rise in cases later. If we reopen I think it'll open the floodgates to tourists which we need...but not right now. Infected people will flock here and it will be impossible to control a new outbreak. Either way, I will be returning to my job. I just hope not to watch my people drop off in droves. Thank you.
Pinellas	General	Best was to re-open is to have massive testing. That way we will know who has it and who has been exposed and we can quarantine them and get back to business.
Orange	Tourism	Reopen the theme parks by June or July
Lee	Real Estate	The state should open back up with the practice of social distancing in place. There should be special risk advisories for elderly and at-risk residents with additional precautions and possibly to continue to shelter in place until the danger to them is believed to have been mitigated. The larger chain stores and grocery stores have remained open with these practices in place and we have not seen those locations become hotspots for the virus. Small businesses that make up the backbone of this state should be allowed to open under those same guidelines. What makes big business any more important than the people that actually live and do business in Florida. Florida is one of the more populous states, but the fatality rate is low relative to other states. Evidence is showing that this virus may have arrived in the United States earlier than previously thought. Florida sees over 100 million tourists yearly and we were in the peak season for Northern residents to be visiting from New York, New Jersey, Michigan, Ohio, etc. going to MLB Spring Training Games, Theme Parks and Beaches. If the reports on the virus's arrival are correct, then we should have seen impacts comparable or worse than New York. Additionally, within those 100 million annual tourists there are estimates that hundreds of thousands are visitors from China. We would have inevitably seen residents from locations that are or were considered hot spots for the virus at almost the same time these other states did. I believe we have reached our plateau and are on the downward end of this pandemic. We should begin to open the state May 1st and begin rebuilding Florida.
Seminole	General	Open the state this week. Enough is enough.... prepare the necessary precautions and isolate the most vulnerable if needed, but overall open up the state
Lee	Tourism	Why would you open the state this early. As soon as you do this it allows everyone still on lockdown up north to come vacation here causing a much larger concern for the residents of Florida. I understand we NEED to open up asap, but its just too soon.
St. Lucie	General	Our state needs to open. The effects of being closed are far greater than the effects of this virus. Please do the right thing. Businesses need to open

AMERICAN OVERSIGHT

Broward	Education	Hello, Thank you for your service. I have a concern with opening the economy while schools are closed. Is there any plan to assist parents of school-age children? What is the plan? Some parents may have difficulty returning to work while schools are closed.
Broward	Healthcare	State should open by testing via Zip codes and open via zip codes findings. Please
Volusia	General	Unless you plan to make it a requirement that all residents wear face masks in public then you're not doing much to protect us. Limit eat in restaurants to 40% capacity and all restaurant staff must wear ppe, require temp testing as a condition to enter.
Okaloosa	Food	I work as a server at one of the busiest places in the pan handle and I'm concerned that we don't have any testing or PPE or any kind of plan about keeping the workers from getting infected by the customers as well as visa versa....so If there are steps in place I'm all for it...if not...I'd rather not get sick or WORSE spread the virus to someone who doesn't have a strong enough immune system to fight it off.
Pasco	Healthcare	I am concern about opening to soon as a dental professional with the aerosols we produce, the amount of patients we see and the proximity we have to work on patients. More guidelines need to be in place. I also feel the state in hole hasn't taken this serious. We may have shit down business but she make it mandatory to wear masks in public.
Hillsborough	General	Please wait still too many cases
Orange	General	We should not open the state. Not yet. This is still a crisis that we have yet to see the end of. Reopening next week would be a mistake. More gathering will cause this virus to spread because it is still here - there are still thousands of people dying. Leave the shut down how it is until it is safe for all. Risking lives to go out to a restaurant or go shopping is not worth it.
Manatee	General	Please re-open our state! We have got to get back to our normalcy of life. We need to get the economy back up and running before everyone loses everything! Enough of the lockdown.
Hillsborough	Management	Offices, schools, beaches, theme parks, resorts, should remain closed throughout summer. Restaurants and stores to reopen with limiting the amount of people allowed in and required to have hand sanitizer at every table or displayed in multiple places throughout stores. Reopening doctor offices but limiting the amount of patients for non essential procedures per day. Once reopening Theme parks, resorts, and beaches, only Florida residents should be allowed in for first few weeks/months to avoid tourists massively invading the state and reinfecting multiple areas all over again.

AMERICAN OVERSIGHT

Seminole	General	Why haven't people received unemployment benefits yet? I understand there was no way to prepare for this disaster, but people still need to pay their bills and put food on their tables. The government forcibly shut down many lines of business, but have not properly compensated these people. My father has been trying to apply and receive unemployment benefits since March, and has not received anything. He has diabetes, so he is a high risk person. He is unable to work, and has rapidly depleted his savings because of not having any income. People need unemployment benefits. I do not think the state can open up until a few things happen. First, we need mass testing to be available. Taking temperatures is not 100% accurate in determining wether or not a person is infected. Next, we need a reliable treatment. Malaria medication is not fully reliable, so we are putting many in danger with opening the state. Last, we need a vaccination. I understand these things take time, but this is the only way to ensure people are safe. If we are worried about the economy, the state should be focused on opening up businesses that promote economic stimulation. Opening up beaches does not help the economy. Whatever industry in Florida, except tourism, generates the most business, should be the priority for opening first.
Seminole	General	I'll keep it simple. OPEN THE FUCKING STATE BACK UP!!!!!!!!!! I NEED TO FEED MY FAMILY & PROVIDE FOR THEM!!!!!!
Charlotte	Manufacturing	To whom this may concern, I live and work on the west coast of Florida. My work position is an non-essential job in Sarasota county. I do not have a problem going back to work so we can get re-started with the economy, the thing I am very concerned with is my job is hard to do at a social 6 foot difference. I am worried about myself and many co-workers. I received a call the 24th of April to return to work May 1st. It is Sat. the 25th here and the restrictions have not been lifted yet.Also I am 57 years old and have underlining(heart) conditions. What are good recommendations for me to return to work? Thank you very much! Linden
Collier	Recreation	OPEN THE BEACHES !!!! Open schools, let's get back to living and making a living.

AMERICAN OVERSIGHT

Nassau	Education	Based upon the news reports that I have seen, it is too soon to lift the Safer at Home policies that are now in place. In order to flatten the curve and keep it flattened, I feel that we need to continue "Safer at Home" for a while longer. If businesses are to slowly re-open for the sake of the economy, there needs to be very strict guidelines,policies, and safety protocols that need to be in place. Pertaining to schools, if the Safer at Home policies are lifted, school buildings are going to re-open for faculty and staff as well as be open for meetings, end of year procedures for teachers, and for parents/students to retrieve personal belongings. While this may eventually be a possibility, May 1st is too soon for school buildings to re-open for the above mentioned activities. Thank you for keeping our students Safer at Home. My hope is that you protect the faculty and staff as well. Help to keep Florida Teachers, ParaProfessionals, - all faculty and staff safe.
Orange	Professional Services	As a Licensed Cosmetologist & Salon Owner I would like to see salons reopen within 2 wks time with strict regulations as to limited occupancy, one client at a time maybe only 20% capacity. Masks for both stylist & client. Right to refuse service to people who appear ill or refuses to wear a mask. Smocks/ PPE worn by stylists. We are licensed with a complete understanding & respect for sanitizing. We already know the state's guidelines surrounding this & will implement what we have been taught in addition to new ones. Salons with refreshments (coffee areas, etc) no longer should serve them. Clients coming in for appts alone, No friends or family with them. Minimum 6 ft between all workers & stylist stations & clients. No walk-ins , appts only. I would feel comfortable returning to my salon with similar guidelines in place
Polk	General	Open the economy in stages starting May 1. We need to get people back to work. Open restaurants, small businesses, restart elective surgeries, open State Parks for camping and hotels . With the proper social distancing enforcement, this will succeed. The longer the economy is shutdown, the greater the increase in businesses that will close permanently.
Palm Beach	Education	Unless there is widespread, accurate antibody testing, I believe it would be harmful to our vulnerable populations to reopen FL.
Hendry	Professional Services	I think if the business owner of a salon or barber shop open safely then they should be allowed to work. For example no one other than the stylist and there client, no clients need to bring guest. The stylist should wear a mask and gloves and sanitize after every client. By doing this I think they should be allowed to open there business.
Alachua	Management	Do not reopen yet
Volusia	General	Please reopen the state. Parks and beaches for sure need to be reopened for the publics benefit. And people need to be able to get back to work. EVERYONE'S JOB IS ESSENTIAL
Martin	Healthcare	Do not open Fl too early just to save business interests. You are endangering lives For example golf,hair saloons , barber shops etc. are not essential services.

AMERICAN OVERSIGHT

Charlotte	General	I don't think we are at the point of opening Florida yet. I know a lot of Floridians are anxious and tired of being home, but they need to understand that it is keeping our families safe and not spreading the virus. I think that if the unemployment website was working correctly and making sure that people who have been affected are not denied, Floridians would feel more secure staying at home a little longer.
Hillsborough	General	It is time to open up and give small businesses a chance to survive. Put in the 6 foot rule and you can add minimum capacity rules for businesses. There are ways to keep people safe. You can add extra protection for people who want it but don't infringe on civil liberties. It is time, people are not getting UNEMPLOYMENT CHECKS, people need to eat! LETS GO
Hillsborough	General	I think that this has gone on way too long. I am in healthcare and will say yes, people should still be cautious and keep distance/wear masks if going into stores with closer contact. One thing I think that is being blown out of proportion and should be lifted is the keeping closure of beaches. Going to the beach is the easiest place to keep 6-feet apart from others. I know it is being opened for exercise but I think it should be opened to the general Public. Summer is coming, and a lot of companies, restaurants, hotels bank on summer season for their revenue to last them throughout the year. Consider all of the small businesses that may have to close down that did not even get the PPE loan because it was given to big "small" businesses.

AMERICAN OVERSIGHT

Pinellas	Education	In the reopening plans, I of course would like testing to be widely available. As an immune compromised person, I am vulnerable no matter what but it would be nice to think that people who have access to testing will stay home and take precautions not to hurt people like me. They can't do that if tests are expensive or inaccessible. For education in particular, I think it's imperative to make a class size rule as our classrooms are so overcrowded that it is difficult to get to your seat without touching another person and the students are crammed in touching one another in most cases. We must consider rolling flex schedules as a choice for people who can attend late with their own transportation and/or implement rolling online learning 1-2 days per week so that the number on campus any day is reduced. Finally, we need to make healthcare accessible as a right and not something linked only to certain full-time jobs or complete insolvency (Medicaid). Many jobs, as you know, will work you full time without benefits. As an adjunct instructor at a Florida college, I have worked 10 years without benefits or healthcare through my employer while doing the same job as my colleagues. With the private healthcare I get through my spouse, the deductible is $5,000. What is key in my point is that people will continue to go to work or school when they can't afford to go to the doctor. They send their kids to school sick because they have no choice. Healthcare and Daycare need to be ESSENTIAL PANS to stop the spread of infection in schools and properly support all Floridians. Please rely on scientists to determine our pathway forward with regard to all infection questions. The economy needs surely to work again but let's do it without purposely killing anyone through hubris and haste.
Collier	General	Reopen Florida. We have flattened the curve and need to be able to leave our houses Guidelines are fine but it is time to ease restrictions. Too many businesses are going to fail and not reopen if we stay closed any longer
Seminole	General	Open up the state this week. Prepare and isolate as needed but overall open it up. How’s
Walton	General	I personally think it’s way too early for our state to open. I do not feel safe being around strangers at the grocery store, let alone being in personal contact with multiple people at my job. It also isn’t fair to make everyone wear masks out when hospitals all over could benefit from extra PPE.

AMERICAN OVERSIGHT

Columbia	General	As a veteran and citizen of the US, this shutdown for FL should end immediately. While the Gov makes comments about “not being in a rush to reopen”, millions of Floridians are unemployed, have burned though their savings, and many - like myself - have NOT received a stimulus check due to delays with the IRS. This shut down is NO LONGER supported by any current medical data or shortages in hospital beds. Open our state back up so families can begin to get back to work and normalcy! To continue to demand we stay at home in order to avoid a VIRUS is completely illogical. We ALL now know this virus is not as deadly as when all this started. LET’s REOPEN FLORIDA!! Also, any type of mandatory face masks will not work for citizens. Basic facemasks have medically been proven NOT to work.
Manatee	Food	Dear Committee Members, I have been listening to your meetings, thanks for sharing with the public. I own an independent restaurant and have been in business for 6 years. Although I have many concerns I will only address the re-opening as that is what you are tasked with. When we re-open I would assume the COVID-19 cases are declining for the prior 2 weeks as that was given in the guidelines form the President. That being said as a restaurant I would ask that common sense prevail with the potential requirements that could be written into this. A dining room is not a triage unit nor is it a place that is prepped for containing a virus. It's a place to relax, enjoy and be with friends. Does the consumer really want to be health screened by a host at the front door? Do they want to be served food and drink by a server that looks like they are on the front lines of a pandemic crisis? The server dressed in PPE but the customer doesn't wear a mask??? Our 4 cooks cannot stand 6 ft apart on a 12 foot cook line and it's 100 degrees on the line....wear a mask!!! We have allowed the public to basically shop at will in grocery stores and yet this has not apparently caused an outbreak of disease. If we are to reopen lets set a safe date and return to a normal life as much as we can. Many of us are going/gone broke from this. Please don't exacerbate the problems with so many restrictions that we open for business and then loose money anyway. Thanks for listening. Best regards, Michael Herley

AMERICAN OVERSIGHT

Seminole	Professional Services	I own a hair salon in Winter Springs. I've been in business for 23 years, I voted for you and normally agree with what you're doing for Florida, but don't agree with your decision to extend the stay at home order. we need to start opening small businesses but continue To practice sterilization sanitation. The fallout from this is going to be catastrophic for a lot of small businesses who were unable to get assistance.The Fl department of unemployment is a complete disaster and considered the worst in the country, knowing this, how could you continue to say that you were in no rush to reopen? We are the land of the free, people should have a choice,If people want to stay home, they stay home if businesses want to open, they open.
Escambia	General	First of all the task force MUST be DIVERSE, we come in all colors and as a Black Woman I want someone who looks like me making suggestions,I believe that we should listen to the Science and reopen Fl when science says it is safe and then with guidelines and restrictions,if we can save lives by not jumping to reopen beaches,retail stores, salons etc..... then we should do it and not listen to politicians , whose only focus is money- elections are coming up and if we open too fast,those who have lost loved ones will be relentless,A lot of people have become so use to having things their way as if they have more rights than others,, Not so We are All Equal in the eyes of God,whom I put my trust in, so I urge this hopefully DIVERSE task force to listen to the Science and do the right thing for all Floridians regardless of race, income etc..... Blessings
Palm Beach	Transportation	OPEN UP NOW! Enough! ALL of the computer models where WRONG. Don't hold the citizens of the state hostage any longer. We are intelligent enough to make our decisions and those that are high risk and/or concerned will tend to themselves. This has been an overreach of power and you must set it right. Thank You.
Manatee	Healthcare	We need much more testing before we ease restrictions on social distancing. We don't know enough yet about the virus and if we open up now, cases will rise again and undo everything we have already done. Once we have a system in place to detect and test quickly then people can be allowed in public spaces in a limited capacity and actually enforced. I would say we need at least half the population tested before we even consider easing restrictions. More data is essential and a full understanding of how this virus behaves. People are being infected again so antibody testing may prove you won't fall deathly ill from the virus but it does not show people who are infected again cannot transmit to someone else. If we don't go about this carefully we will have a deadly fall/winter with overloaded hospitals. Florida's population is mostly older residents and we need to ensure they remain safe. I'm not one of them but still understand this is necessary to avoid an uncontrollable increase in cases and deaths. It's too soon, re-evaluate the situation in another month at least.

AMERICAN OVERSIGHT

Hillsborough	Healthcare	I feel that it is time for elective dental and medical procedures to be allowed and ordinance to be dropped. Medical doctors and staff have taken huge steps and precautions and know what needs to be done pushing forward for safety. I also feel like education and mental health of our children is suffering. Summer schooling or school programs would be an excellent opportunity for kids to help with a redo of this last quarter! Thank you
Pasco	General	Please open the beaches and waterways for those of us who just want to fish in a socially distant way.
Bay	Healthcare	Subject: Elevators and Short Term Rentals. We live in a short term rental Condominium complex. Our concern is the social distancing practice that should be put into place for Elevators and the cleaning protocol . Our association has placed signs for social distancing, but we think the State of Florida should set up specific guidelines for the people visiting from outside of Florida and our citizens. Short term rentals should also address the cleaning of rooms between rentals and safeguards to ensure that the next renter is not impacted in anyway. Thanks for you work in trying to provide the citizens of Florida a safer environment to enjoy once again.
Pasco	General	Open this state back up! At the very least allow Pasco County to! My website design business may be thriving but it pains me to see how some of my clients with flourishing businesses are now losing everything. In Pasco we have 4 deaths. To shut us down over this is does not make any sense. The cost-benefit to losing everything this county has built up since the recession does not add up. This is the United States of America where we didn't shut down like this due to any previous circumstance. Give people the freedom to open their businesses, commence commerce, and live their lives. If someone is vulnerable then stay home and don't let the country die for their sake.

AMERICAN OVERSIGHT

Pinellas	Real Estate	With over 50% of Americans having more than 50% equity in their homes, many economists are predicting that housing will be what pulls us out of this recession. But the sale of homes is not the only aspect of real estate, especially not in Florida, where tourism is our bread and butter. And yet, vacation rentals were singled out during this COVID-19 crisis as being unsafe. That decision has left MANY property owners of vacation rentals with no income for properties that would have otherwise been earning money to offset expenses. It is imperative that vacation rentals be allowed to reopen for transient rentals. Some of these vacation rental owners, including myself, have lost a HUGE portion of their income from their jobs. Others are outright unemployed. As a real estate broker of three offices with a heavy proportion of vacation rental management, I have had to furlough my vacation rental management staff. At the same time, I have a very lovely and very empty vacation rental that would have otherwise earned several thousand dollars from return visitors. I am not alone. The ramifications of the decision to close down or to continue to keep vacation rentals closed down for terms of less than thirty days, would be grossly unfair and particularly injurious to those homeowners, as well as tourists who prefer to vacation in the comfort and safety of a private home or condo. Bear in mind, a full kitchen and several bedrooms make it easier and less expensive for families to enjoy our Florida weather and beaches. Let me ask you this: Which form of transient accommodation has the least potential for self-isolation/ social distancing? A. A hotel/motel/resort room with daily maid service and no kitchen facilities B. A vacation rental condo with a bedroom, living room and full kitchen C private single-family home rented to a vacation rental guest with private pool I STRONGLY suggest that the answer is “C”. Here is another question: Rank the type of accommodations below from 1 to 3 on the basis of their suitability for self-isolation/ social distancing?
Hillsborough	General	The cure is worse than the disease. People are losing their livelihood and their homes. Taxes are not being collected. Cities, Counties and State governments are facing huge deficits, Layoffs will happen both in the private and public sectors. This will trigger a fiscal nose dive resulting in a collapsed economy. We don't need or want a Nanny State, we need elected officials to listen. Open up the State. Those that need or feel the need to isolate can do so. Those that are willing to accept this risk (like the risk of driving, playing sports, working with power tools, swimming in the oceans, etc) can live their lives again without the heavy boot of government.

AMERICAN OVERSIGHT

Lee	General	I'm a. Proponent of Herd immunity. I'm not convinced the numbers ever justified shutting down the country. And I certainly don't agree with fudging the numbers to justify what's been done. All numbers should be accurately divulged and add up front to back, and sideways. Open the state! If someone isn't comfortable because the media has them scared, they can stay home. If someone is sick, they can stay home. If someone feels they are at risk, they can stay home. Sunshine and warmth kills viruses. It always has. The real death rate was falling in March when things were shut down. It makes no sense to open a beach for fishing and walking only. There no more risk of sunbathing as there is walking. Others will disagree. I'm a fact and numbers person. That's how I was successful in business. I sold everything in NY and moved and am doing business here because I felt it has less of a controlling expensive govt. Let us go back to life. Good luck Harry
DeSoto	General	I think it is time to open up safely now I am 71 on blood pressure pills has Hashimoto's Had breast cancer and chemo 13 years ago heart issues I will try to stay safe but can't keep shut down We need our economy back up and running If people want they can stay home
Lee	General	DON'T REOPEN!!!
Miami-Dade	General	Please reopen miami...obesity and depression kills too..confinement is not good...we are falling hopeless here...we trust our governor so pls pls reopen miami..take over our mayor's task as his reopening plan is not realistic and far out too long for such process. Need a realistic and promising plan..not "we are looking into it' or we have hired more enforcement personnel..
Hernando	General	Please listen to the medical experts. There is no point in reopening if things will just have to shut down again because workers are getting sick. On top of that, businesses that reopen and no customers show up will be losing more money. Until we have a real way to protect against this virus and a much better understanding of how and why it kills who it kills, we have to continue to be safer at home.
Pinellas	Retail	I think all workers who feel like they should still be in isolation should have a choice of going back to work or not. It shouldn't be mandatory. Everyone still practice social distancing at shops and still wear gloves and have hand sanitizer around. I would like everything opened and people to have the freedom to choose if they want to be put at risk or not. Senior hours should still exist and places close early for cleaning.
Lee	General	Is it possible to consider opening gyms just for personal training, if so we can track what is touched, that way we can clean immediately before and after use. I also believe by opening just for personal training will limit the individuals on the fitness floor. It would help many trainers who have been unemployed since the closer, additionally most trainers are subcontractors so they don't qualify for many of the covid-19 aid that is available. Thank you for your consideration.

AMERICAN OVERSIGHT

Broward	Recreation	As the current owner of two dance studios in Boca raton and Coconut Creek we should definitely be open as we are akin to child care which has been deemed a non essential business. People have to get back to work and be able to make a living or it is only a short time before you see riots in the streets and bricks going through windows. This virus is going to be with us a long time and the sooner we can get back to some form of normality whilst still taking reasonable precautions the better.
Polk	General	Florida restrictions should not be loosened for some time. We are not at all ready. Opening for elective surgeries should be allowed but non essential businesses should remain closed thru May. Even in grocery stores , in my experience, half the people have masks and maintain social distancing and half go about their business as if nothing is wrong. Hair salons, gyms, theaters, bowling alleys and clothing stores will just spread COVID. We are in financial difficulties as well as many Floridians but I feel human life has more meaning then the economy.
Alachua	Education	Please do not open the state until there is significant input from trusted medical authorities with substantial, documented testing that provided a high level of assurance that the virus is well-controlled. This is imperative for all industries, but especially education. Children are more susceptible to any disease because they don't always follow safe sanitization practices. Regardless of if they can catch the virus as easily as others, they can still be carriers, which puts immune compromised parents at risk. We should also think about the health and safety of our school employees. Education is important, but staying alive is more important.
St. Johns	General	Good Afternoon, Please re-open FL for business. As citizens we did what was asked of us and flattened the curve. People want and need to get back to work and reopen businesses. People who need routine life saving screening for heart disease and cancer should be able to see their doctors for routine checkups. Please don't delay past May 1. Thank-you, Jeff Sturtevant, St. John's, FL.
Miami-Dade	Education	I own a music school in which there are only 4 people at a time every hour. I dont see why I should keep my business close for another month. We did not got money from the first round of loans,. We just re applied yesterday the 24th of April. We have not been able to pay rent from April and if we dont open in May and we dont get the loan it will be imposible to survive.

AMERICAN OVERSIGHT

Palm Beach	General	Thank you for introducing this portal and making it available. Great move. Health is of the most importance for everyone, so this industry should be allowed to resume at a more rapid pace. Without health, you cannot work, play, etc. Social distancing is a must for the interim. Parks and recreation areas should also be considered to be opened to allow more options for everyone to relieve stresses. Follow the phased approach outlined by the federal government to have the most effective and safe opening of the state. The counties with the highest population of virus should be monitored and opened more cautiously. Corporate environments and office buildings can have thermal monitors as they are doing in other countries that will detect the temperature of each individual as they enter the building. A small investment with long term value. Retail stores can be opened but should implement mandatory facemasks when entering. The supermarkets are doing this and it seems to be working fine. Again following the phased outline.
Duval	General	Please open Florida immediately. We have to be able to provide food and shelter for our families. That is a bigger crisis than this virus. We can all be adults and take precautions to not get sick. There will be no herd immunity to protect those at risk if we stay at home for so long. Our hospitals are furloughing employees at staggering rates. The implications of staying home are far greater than more covid-19 cases. The media has blown this out of proportion and aren't sharing facts, only fear. Poverty, domestic abuse, and suicide also kill. Please open the state immediately.
Polk	General	Florida needs to do whatever Taiwan has done since the beginning of the pandemic. Despite having a population of 24 million people, they have only 400 confirmed COVID-19 cases and 6 deaths. Taiwan is the gold standard. Their students are in school, they have plenty of PPE, their public transportation and businesses are open, and they have the only professional sports league which is currently playing in the world (their professional baseball league, albeit without fans). Florida and other states must look to Taiwan for guidance. As part of this, masks must be made mandatory inside buildings or places where many people gather (except for people's residences obviously). There continues to be a cultural stance against masks in many parts of the state - thus the mandatory nature of the mask wearing must be implemented.
Orange	Healthcare	In spite of the financial, and often social hardship, we will benefit mostly by remaining careful to keep the stay home mandate in place. The long-term outcome is where we should be focusing, not our immediate gratification. There are SO many aspects of this Corona Virus we still do not know, which indicates caution is needed. So NO - please do not re-open the state until we see definitive drops in the number of new cases and the number of deaths for the recommended two-week time frame. Thank you for requesting public input for TY is decision. We are being forced to notice and met the needs of others in a way we would otherwise not have done - a blessing out of the chaos !

AMERICAN OVERSIGHT

Osceola	Tourism	Thank you for everything you are doing! I can't imagine how hard this is for you; but I really believe we all want the same thing. How we get there may differ.... I'm sure you have all the data I do so I won't bore you. But More Like Sweden; Less Like China has been my mantra this whole time. We can open safely and wisely so please put small businesses back to work! Thank you again.
Palm Beach	General	I think the state should be re-opened. Allow the people of Florida to take their safety into their own hands. If people want to stay home that is their prerogative & responsibility.
Pasco	Government	We can't open Florida until numbers in the Corona virus have already fallen. It will be completely irresponsible to open too soon. Other countries are still under a stay at home order and their number have declined. I have zero faith in our government and I don't think any of you will listen, so pretty much do what you want. You will anyway. All of this is just a way of you showing that you care but we all know that you don't. I've personally seen how local government handles decision-making situations and I'm quite terrified to see what is going to happen in the next months with this Corona pandemic.
Hendry	Education	I am a music Professor at Florida Gulf Coast University. I believe if we have to reopen the state, we should do this in increments so that the entire state doesn't have a relapse. One essential business I would love to see open is daycare services. I've had the hardest struggle teaching remotely having two very small toddlers home with me. I believe those types of establishments should open back up to help those of us having to still teach from our homes. I would also like to see small business like family owned restaurants and bars reopen but have strict policies in place to not only protect the workers, but the customers as well. I don't feel that beaches and malls should reopen just yet as those are the main attractions that would be very difficult to keep people six feet away from each other. Gyms would maybe work if they clean the entire building every day once everyone is gone. This is my two cents with the reopening.

AMERICAN OVERSIGHT

Pasco	General	I support the full reopening in the state of Florida. As a small business owner, a registered voter, and a tax paying citizen of Florida I do not support a continued shut down! The fear mongering of the media and the draconian measures of government control has to stop! My constitutional right to pursue liberty, freedom and the pursuit of happiness is being unjustly infringed upon! Those wanting to continue living in fear and being controlled can stay home but healthy individuals who want to work should be able to! Your fear should not control my liberty and freedom! I refuse to descend into poverty and allow my business I have spent over a decade building disappear. I refuse to participate in the unconstitutional oppression of my freedom by state and local government. I refuse to wait for or receive an unsafe, untested vaccine for a virus that has already mutated over 30 times and has a 0.0001% mortality rate. We are allowing fear and politics devoid of scientifically accurate data to destroy Florida and America! I believe in liberty NOT tyranny! I will not allow my constitutional rights to be infringed upon. I know there are many others that share my beliefs and we will STAND UP and FIGHT FOR OUR RIGHTS if you force us! Stop allowing the government to destroy: The Food Supply Small Businesses Medical Autonomy Access to Healthcare Religious Gatherings Privacy Rights Fellowship Tourism Reopen Florida Now!!
Lee	Healthcare	Please reopen Florida now! Some level of risk from pathogens will always be with us, but the damage we are doing through keeping the economy closed and banning most non emergency healthcare will not be completely reversible. Reopen now before we have lost everything!

AMERICAN OVERSIGHT

Broward	General	I understand the potential public health impacts, which is why I suggest opening the state with precautions and then once this virus seems to be going away, the precautions, at least some of them, can be lifted slowly. For restaurants: the tables be every other table and either using paper and disposable supplies at each table, having everything on each table be changed and/or sanitized between each group and possibly allowing customers to order and pay on their devices if that is preferable. If cash is used, people should sanitize their hands before and after use. For nail salons: every other station with proper hand sanitizing, mask wearing, 1 customer per technician at a time. Similarly, hair salons should have: 1 customer per technician, sanitizing tools before and after each customer, hand sanitizing before and after touching tools and customers and everyone wearing masks. For most businesses: being able to space out employees and customers, if applicable, have everyone in the business wear masks and promote hand sanitizing. For malls: there are a lot of stores, which should make it easy for people to spread out and maintain 6 ft distance and everyone wear masks and hand sanitizing. Anyone serving or making food wears gloves. Hotels, cruise ships and airlines: should have requirements to keep everything sanitized between guests, require everyone to wear masks, they need to have 6 ft between tables if serving food, everyone serving food wears gloves, they need to enough space to maintain 6ft between seats on a plane, with the exception of those travelling together, or anywhere on a cruise ship or in a hotel. The exception to wearing masks for this category is if someone is eating. Beaches in all counties should be able to be open for active activities like walking, running, surfing, swimming, fishing, exercise on mat so long as 6 feet is maintained between each group and that each group is less than 10 people. For the eventual opening of sports events and other large gatherings: seating would need to be arranged in such a manner that accommodates 6 ft in between people who are not part of the same group, which can be controlled with ticketing online. Additionally: masks and the people who are serving food should be wearing gloves and have their hands properly sanitized.
Seminole	General	We need to follow the guidelines and recommendations from the CDC and the scientists. Not the politicians who care only about their image and getting g re-election. The health and safety of citizens should be the top priority. We started the safer at home later than we should have so we need to wait till the numbers decline according to the CDC and until the trsting is able to accommodate everyone who wants a test.

AMERICAN OVERSIGHT

Flagler	Technology	Since Flagler cases are still rising, and many offices, including my own, cannot enforce social distancing (lack of space), you should encourage ALL people that can, to continue working from home. Where I work, there are a minimum of 10 people in a six foot radius because of our small cubicles. My company also does not have the money to pay for tests for all employees. It is also not practical to wear a mask in the office all day because once you remove it to take a drink, you risk contaminating yourself or others. With that said, masks SHOULD be required when people are in public and cannot adhere to social distancing. With as many asymptomatic carriers as there are, all steps should be taken to protect the vulnerable. You should also let cities and counties administer their own plans. You should not take the route of Kemp and put in an executive order forcing a reopening that doesn't allow cities to reopen on their own terms.This should be a measured approach as FL would be responsible for starting the second wave if we move too fast. FL needs to wait until we actually see a 14 day downslope in cases. Don't think a flattening curve means we are out of the woods. You need to be on the clear downslope, near the bottom. Having almost 1,000 cases every day, they are not all repeats, and are new cases. While some counties have truly leveled off or are sloping down, some like Flagler are actually sloping up. Think about how many asymptomatic people are around in the 3rd oldest per capita state in the nation. Not only that but people in my age group are now being shown that COVID is causing sudden strokes. You also need to keep social distancing in place. You cannot get lax on that issue. Social distancing works. It's why 1918 had such a terrible second wave—they relaxed social distancing too soon. You want to make sure you can keep a lid on this and continue the downward trend that will happen in every county. You don't want this around during flu season. In order to prevent that social distancing must remain throughout the summer and fall.
Brevard	Healthcare	Please refrain from Re-opening too soon. Follow the directives prepared by medical professionals and wait for our cases to consistently decrease. Kids are already out of school and need family at home to care for them. Take a close look at what has happened in other countries when they opened too soon.
Polk	General	As a RN, I think elective surgical procedures (especially out patient, in facilities not in hospitals) need to resume ASAP. People need these procedures. They aren't life saving procedures but they're incredibly important ....delaying these procedures any longer can lead to a greater strain on the hospital. The facility I work at puts little to no strain on the hospital system. We're RNs and we're ready to work and help our patients! I also think think there is an at risk population....but those that aren't at risk need to get back to normal life. Help those at risk but also allow others to live. This is surging right now but not living. Life is short.

AMERICAN OVERSIGHT

Palm Beach	Healthcare	This pandemic is no where near under control enough to consider reopening the economy at this time. All this will lead to is a larger outbreak and more deaths as the medical system gets overwhelmed. The economy is going to take a much harder hit if this thing spreads out of control then it would from continuing the lockdown. Frankly, people's lives and health vastly vastly outstrip the economy in importance. If the system we have now can't handle putting people's lives first then it's broken beyond repair and needs to be replaced.
Lee	General	I very much want to see things opening up for the sake of workers, small businesses, etc. but, I think it is mandatory that we wait until it is safer, less cases, more test kits, closer to finding a vaccine.
Lake	General	Reopening FL should be conducted in a specific and systematic process. Fl continues to need increased testing, contact tracing and antibody testing before any procedure for reopening the state is completed. Testing should be free to all unlike Lake County where they are charging for testing. Results of testing should be delivered in 24-48 hours max. Directions to police, fire, EMS, healthcare facilities, education, restaurants, hair salons etc should have specific and concise guidelines. Guidelines should include reducing occupancy capacity in businesses, distancing guidelines for people in lines waiting, sitting at tables etc. Under no circumstances should people be encouraged to wear gloves in public especially servers in restaurants. Everyone should be required to wear masks in any public place. All businesses should have hand sanitizer and hot water in the bathrooms for employees and patrons to easily access for frequent hand washing. We should take advice from other states (NY) who are completing their reopening using advice from medical professionals and leaders in infectious disease. We absolutely should not follow in the footsteps of states such as GA and reopen without direction. We also need to prepare for the possibility of a resurgence of COVID-19 and be ready.

AMERICAN OVERSIGHT

Lee	Retail	After seeing the Georgia Governor royally screw up with his reopening I hope it teaches you what not to do. Tattoo parlors and massage parlors, are NOT by any means safe places to go, it would make more sense to open retail stores like TJ maxx Ross Home Goods Marshalls, etc. Where people don't put their hands on you. We still have essential services not following guidelines, employees at dispensaries like Trulieve and the patients walking in unprotected spreading the virus rampantly. That is unacceptable and dangerous irresponsible. They don't even have professional cleaning people cleaning the stores and they have 52. They make billions of dollars in this state alone and don't pay employees hazard pay or even overtime, they should be reported to the department of labor, that is illegal in any other business. Masks should be mandatory in public until we have a vaccine and this is not a threat to our health. You are out of the loop of reality. Why don't you and the president try going grocery shopping and see what it is like for the rest of the people in the state. Trump lives in West Palm Beach and probably never saw the inside of Publix. You get your haircut we all need that! Not Tattoos or wrestling! You don't know what priorities are to the working public. Our farms have dumped millions of pounds of food from Immokalee. Go there, not Cleveland Clinic with a pretty background. Get real. Talk to real people. Our state will barely recover and most small business will not re open after this fiasco. I hope you can get something right when you let us out again. We don't need clorox baths or disinfectant sprays on our bodies, what an idiot thing to say. He shoud be off tv for good.
Pasco	Government	We can't open Florida until numbers in the Corona virus have already fallen. It will be completely irresponsible to open too soon. Other countries are still under a stay at home order and their number have declined. I have zero faith in our government and I don't think any of you will listen, so pretty much do what you want. You will anyway. All of this is just a way of you showing that you care but we all know that you don't. I've personally seen how local government handles decision-making situations and I'm quite terrified to see what is going to happen in the next months with this Corona pandemic.
Palm Beach	Recreation	golf, parks, library, marinas, ramps, manufacturing, outdoor dining, should all be open,asap.
Indian River	General	We should not be bullied into reopening without science to back it up. I'm a permanent resident, an RN, a veteran and a Republican. I have worked every pandemic since AIDS. I have a 9-yr old white was already in public K12. We should work on teacher-led classes on the internet. If we don't wait for the testing to be done and numbers to LEGITIMATELY go down, we will rebound before we even have a break before flu season. I will NOT go back to work. Other nurses I know are leaving for states who are testing. Our heath care system will fail. Be smart. Don't be trained seal.

AMERICAN OVERSIGHT

Manatee	Professional Services	Open Hair Salons in phase one with the following guidelines. Limit number of stylists and clients to no more than 10 people in salon at one time. Clients will need to remain in there cars until stylist calls them into the salon. No waiting in the waiting area. *All stylists and clients MUST have temperatures checked upon entering the salon. Anyone with a temperature of 99 or above will be asked to leave, is not allowed to return to the salon for 14 days and must not have a temperature upon return. *All stylist and clients MUST wear a mask at all times while in the salon. NO ONE will be allowed in the salon without a mask. *All clients will be asked to go wash hands in restroom upon entering the salon. *All clients will need to leave all personal belongs in vehicle except cell phone and method of payment. Both of which are to be placed on a plastic tray at each stations unless client chooses to hold items during appointment. *No food or drinks will be allowed to be brought into the salon during appointments. *All magazines have been removed from waiting areas. As well as all refreshments. *Each stylist MUST clean/sanitize chair and tray after each client.
Hillsborough	General	The cure is worse than the disease. People are losing their livelihood and their homes. Taxes are not being collected. Cities, Counties and State governments are facing huge deficits, Layoffs will happen both in the private and public sectors. This will trigger a fiscal nose dive resulting in a collapsed economy. We don't need or want a Nanny State, we need elected officials to listen. Open up the State. Those that need or feel the need to isolate can do so. Those that are willing to accept this risk (like the risk of driving, playing sports, working with power tools, swimming in the oceans, etc) can live their lives again without the heavy boot of government.
Pinellas	General	Definitely believe we need to start cautiously reopening things up. Start with safer places and have policies in place. I live in a condo and believe ridiculous that our pool is closed. We have security and all the snowbirds are gone. We had practiced social distancing even before the order to close. Do it at half occupancy. Open beaches slowly for exercise first and limited hours. I work at a small shop in St Pete beach and we could open and do things safely. Limited number of people in the store. Masks mandatory. Wipe counters card reader down each transaction. Grocery stores are the worst somehow they need to be better managed. Unfortunately get people that flock here and have sense of entitlement, that will happen everywhere. Baseball play without fans for awhile then bring in 1/4 of seating etc. Hockey same way. I do believe we should wait another 14 days though. Good luck to us all.

AMERICAN OVERSIGHT

Collier	General	Please follow all guidelines but I would like To see The boat ramps open as well as beaches people are getting housebound Keep social distancing we have to many east coast people coming to swfl making it unsafe I would also like to see resteraunts open with the social distancing people need to get back to work
Lee	Recreation	We need to resume to some normalcy. Parks need to be opened 100%, kids need the social interaction, they are our future. When you step back and look at the overall picture many parents are considered essential workers, leaving children glued to computer screens to not only complete their abundance of daily class work but also YouTube, FaceTiming their friends, family. My 8 year old who is very outgoing and a social butterfly is fighting depression. We are their parents, let US make the decision of what is and what isn't safe! It's really very simple, if you don't feel safe, DON'T go out!! I know many adults who are fighting depression and it's only going to get worse as time goes on. Which will lead to more deaths, more crimes, etc.
Miami-Dade	Professional Services	It is better not to rush and have a 2nd shut-down wave or a prolonged Phase 1 w/o being able to move to Phase 2 than rush to get going and have people move back out of isolation too quickly. Two hits to the economy will be worse than one that goes for a bit longer to ensure when we come out of isolation it's for good
Duval	Recreation	Social distancing cannot be done if recreation activities are opened. CDC, Dr. Fauci other medical and epidemiology experts know better than politicians as far as keeping the curve flattened.
Santa Rosa	General	Way too early to open everything back up - without widespread testing and tracing, there's no way to prevent another serious outbreak. Opening too early will cost additional lives. Don't do it!
Charlotte	General	Are u guys out of your ever loving mine the numbers are still going up and u guys are opening things up when u should have required masks to leave home watch you are only going to make things worse remember I told u so

AMERICAN OVERSIGHT

Santa Rosa	General	I am a 61 y/o retired military and government civilian who moved here 18 months ago. We are very happy here and think moving here was a great decision. We here in Florida have done a great job in reducing the spread of the COVID-19 virus. I would like to make a couple of suggestions for re-opening the economy of this state. Please implement mandatory wearing of face masks when in public. Even the wearing of a simple cloth face mask can reduce the spread of the virus between people. I have seen many people who say that the government can't make them wear a mask. Well, the government makes them wear clothes and they are not protesting in the streets about that. Please implement restrictions on the density of people allowed into a business. Bowling ally's may only be able to rent every other lane, stadiums may only be able to use every third seat, a hair or nail salon may only be able to have two chairs open at a time, and stores will have to regulate the number of people inside at any given time, but at least they will be open and people will be able to get back to work. I've heard the people who say "open the economy, if there are people who don't think we should be out and about let them stay home". But the simple reality is that having more people in close contact raises everyone's risk, even if they are just making a necessary trip to the grocery store. There is a crisis of credibility in this country right now. Knowing what the truth is requires research, because we all know way too many of our news sources are pushing an agenda more than reporting the news. This virus is serious and will come back at a moments notice to bite us all. Finally, people need to know why the restrictions are necessary. They also need to know that the fall is going to be an entirely different problem. From the beginning it has been known that if the shutdown was successful, it would look unnecessary. Explain that we are in this together and the welfare of individuals is in the hands of the group. People need to not be selfish.
Pinellas	Healthcare	Please OPEN the state Governor! Why? Because Income is more Important then thisvurus and because we know hospitals are counting Chronically ill patients as COVID! I also has a friend who works at the health dept and the numbers are lower then the flu! We are finished being on “House Arrest” for a crime we never commited! Our families have a Right to ho out and live our lives! My child has a chronic illness and he is working! Why? Work is great for anxiety! There are people who do not want to reopen because they are getying a FREE RIDE sitting at home collecting a check while hurting their Employers and our Economy! Quarantine the Sick Not the Well!

AMERICAN OVERSIGHT

Lee	Recreation	Please, please consider opening our beaches. It's not about socializing or getting a tan. It's that Florida is not known for its safe sidewalks. I rarely have time to get to the beach, but now with them closed the sidewalks are EXTREMELY over crowded with walkers, joggers and cyclists. Most often people are stepping into traffic lanes because of over crowded sidewalks. Also, SWFL drivers are HIGHLY disrespectful to pedestrians. In recent walks people have commented time and again that they are stunned at how cars disregard pedestrian right of way. If you would kindly open the beaches then those who live at the beach will resume their outdoor activity in their area and those of us who are inland won't be at such a high risk of overcrowding. Thank in advance for your consideration. All of you are in my prayers as you put forth a well thought out and safe restoration of living. God Bless You. Ruthie Struble
Lee	Government	Open Florida back up!!!
Lee	General	I believe that with the high number of retired individuals in the state, and as a mother to a 4th grader, I feel like opening the state back up to ANY non essential services or businesses would backfire tremendously. As hard as it is to maintain my sons attention span on his online schooling, and my work as a manicurist being nonessential, I STILL think everything going back to business as usual would cause a much much worse time for citizens in the fall when the second wave of Covid-19 sweeps through. Although we aren't as bombarded as some of the northern states, Florida has an even bigger issue to keep in mind for the immediate future: Hurricane season. If all of our resources are spread thin helping and supporting the pandemic, how will we ever manage to recover or build again when (not if) a major disaster hits us? I think this could be the beginning of the end and there will be a mass exodus of Florida after hurricane season decimates our state this time.
Duval	General	Please don't require everyone to wear gloves in public. Most people don't know how to use them properly without still contaminating everything they touch. All this will do is create more panic buying of gloves which will drive up prices and create shortages for healthcare workers who really need them. Proper hand washing is what people should continue to do.
Manatee	General	It's time to begin reopening....in a responsible way.... Restaurants should open outside and inside dining at 50%. Bar seats 6' apart. All water sports open All golf open Stores should open with social distancing Masks should be optional for patrons and workers.... In the very near future the economic damage will be much greater that the health threat.... Focus on the "at risk" community.....

AMERICAN OVERSIGHT

Volusia	Professional Services	Re open in the state would be a major disaster for people with low immune systems like my own. I am stage 3 breast cancer. My boss did not close our office until the governor closed the state with re opening the state he will be demanding me back in to the office which is small to deal with clients in a small confined space with no social distance and I will then have to send my 3 grandchildren I am raising to day care where there will be no social distance in putting my life at danger and my family's life in danger with not knowing who has the virus and who was carrying the virus and who has had it and gotten over it I believe we should wait at least until school goes back for this to run its course.
Lee	Information	It is important to communicate with all methods to keep our resident informed. Direct mail, text and email
Okaloosa	General	Well, if you can't issue unemployment checks effectively we must be permitted to return to work. There is also no enforcement of the governors stay home order, which is completely unfair. My retail clothing store is closed yet most local furniture stores are open? One other note I have supported and paid into an unemployment system for 40 years never drawn a check now I need it and it fails me. I will NOT support Governor a DeSantis ever again. Even if it means we have Entire democratic leadership through all state. And I a lifelong republican. The governor SUCKS, ashamed to admit I voted for that idio,
Pinellas	General	Please do not reopen the state yet. There needs to be more testing . You need to wait til the number of new cases has decreased. Opening part of the state will increase the likelihood that people will travel there just to get out of their house. PLEASE DON'T REOPEN FLORIDA!
Lee	Retail	As it is right now numbers aren't there or were there to close us down.If you are compromised stay home. My wife is losing her business as it is right now. No unemployment and no SBA help as of yet. Landlord is no help wants rents. So you are giving us no choice but to open. if you don't adhere to the April 30 order. And start opening Florida. We all will be hurting if you don't open the business. Crime will start climbing. I
Charlotte	General	I don't think they should reopen, even with social distancing and masks. Because I'm an older woman, I'd like to get out but I'm afraid. There's things that I like to do but I can't do anymore. Normal things. That's all I'm gonna say. I'm waiting for the DMV to open so I can get my drivers license. Thank you.

AMERICAN OVERSIGHT

Escambia	General	Business reopening continued 15. There does not need to be a bottle neck of state /county /city approvals. If the processes, procedures meet established guidelines and criteria. But businesses are subject to inspections. 16. Ultimately what will accelerate the economy is buying AMERICAN and avoiding items made in china. 17. Still recommend considering the isolation and social distance. If social distance is 6 ft, if a restaurant had a distance of 15 ft between tables, that would allow servers and guest to and from a table proper distance. Consider a 2 – 3 ft walkway with 6 ft from walkway to table. A lot of restaurants may not have that much room for this, but if an old business section with lots of restaurants could have the street closed and tables set up in the street, such as Palafox St from Garden south to Main or further. 18. Another option if space is limited is possibly curtains, such as you see on the news of crowded emergency rooms. Or Plexiglas partitions like at some of the grocery checkouts. More later when I get time. George Levy GL51802@yahoo.com
Miami-Dade	Government	Listen to the scientists and doctors. Business people have no ability to make these decisions. Nor do politicians.
Pinellas	Healthcare	Keep Florida Closed. If we open the Florida too soon will only be right back in this position. Salon's nail salons, Massage, and skin care businesses should stay closed one of the primary ways of transmission. Been a cosmetology educator for many years and can guarantee you that the majority of stylists will not abide by rules for social distancing were competent sanitation. Please save lives in Florida and keep the state closed through May
Pinellas	Retail	Please open Florida! We need to stop living in fear!
Lee	General	I think that we should re-open the parks and beaches with mandatory social distancing and the wearing of face masks. Open business and restaurants that are able to practice social distancing and wearing of face masks. Common sense should be stressed in discussing opening of any business. People need to respect others which is why I think the face masks are mandatory.. Boating, off-roading, motorcycle riding, bicycle riding, walking etc should be promoted with social distancing being in effect. We need to get people back to work as soon as practical. Florida needs tourism to survive economically. I just don't know if people will respect others and do what us recommended . Thanks

AMERICAN OVERSIGHT

Pinellas	Healthcare	Florida is still not in safe place to reopen. As A Registered nurse I witness how some people do not use common sense. Such as the grocery stores. Im shopping with a mask. I notice all over a parent will have a mask on but they are not protecting their children. Im not stating that everyone is unintelligent, I am simply saying there is not enough common sense in people today. We open up Florid with just the now beginnings of it hitting nursing homes were going to open up the flood gates for an increase in cases. We are a very populated state and so far thanks to our Govenor we are not the next New York. Please lets keep it that way!! Sincerely, Tina Janovich
Hillsborough	General	Dear reopen Florida task force, I have been a Floridian my entire life, and to not enjoy this beautiful weather is killing me. Please please please reopen Florida soon, we've done everything you ask. Stay home, wear mask if you need to go out... ect. We're asking for your cooperation this time and help reopen the beautiful state of Florida. The small businesses need the money, and the public needs to get out, we will do our part and give back and support our small businesses in this time of need. We just need your blessing to do so. Thank you!!!
Marion	Professional Services	As single Dad with custody of my kids, a Marine vet, Republican voter and a licensed Barber I say please open the state back up and let us return to work by May 1st or before... Nobody sick or dying in my area...90% of other business are still open and ppl are out in the 1000's every where i go. Thanks
Brevard	Healthcare	Get unemployment system fixed! So many suffering because they have no $$. Make masks mandatory for EVERYONE. Sanitizer required before entering ANY business. All employees at business also need to be required to wear masks. Please do not re-open our state until our numbers are reducing for 14 days as required by the WH. The worst thing that our Governor could do is to open too soon and we have a surge of cases that are uncontrollable. PLEASE DONT OPEN THE STATE TOO SOON. I'd happily wait until June or July.
Charlotte	General	I am one of 5 in my house My fiancee is low immune system and my 88 year old mum has 5 of the aliments that covid would kill her. We haven't been out in 7 weeks. We have everything delivered I feel if we open up too quickly without everyone being tested first we will just continue to spread this virus. I'm a nail tech and food service worker and I can't imagine being that near to people at this time. I feel we should wait a few more weeks to try to get complete control of testing. I understand businesses want to open but are they truly cleaning and disinfecting the way they should be. I have to say thank you for asking for our opinion and I would like to see a few more weeks of stay at home orders and much more testing. Even on people who do not have symptoms, In fact they are more important to test as they could be positive and not know it. Please don't begin to open yet.

AMERICAN OVERSIGHT

Pinellas	Government	I think we should wait until atleast mid may to open up florida. I am too furloughed and my wife and I havnt see unemployment pay since we filed March 19th but seeing the new cases in florida and our country not going down suggests that it is not time to reopen. Florida has only tested 1%. With that and the number of new cases everyday shows that the virus is still spreading.
Collier	General	I feel strongly that the guidelines in place should remain. The pandemic has not eased up And it continues to escalate. It makes no sense to open beaches and Public places!
Lee	Healthcare	I believe that since everyone has basically stayed home for the past month, our immune systems have now changed. The reopening should be very gradual or it will cause all of us with now lower immunity to be more susceptible. I suggest opening everything with the same restrictions that have already been placed such as limiting the number of people in a particular area. People with immunocompromised conditions should remain in shelter in place. Educate the public with universal precautions to take. Hold businesses responsible and accountable to keep appropriate distancing for their customers.
Palm Beach	General	Reopen the country, but wear masks we are going to destroy United States by closing it!!!!!
Sarasota	General	I think is ok to open slowly. As long as employers follow safety guidelines to keep employees and staff safe. Any one with underlying conditions. Should wait. I my self work for. Salon And it is a busy place. Some time. Packed. We do not. Take appointment and safety. Comes first. And there should be strick consequences for employer that does not adhere to this to keep people safe
Miami-Dade	Retail	Social distancing can be implemented in the same fashion for small retail establishments. Small business can implement the same rules for social distancing that we currently follow.The establishments can decide how many customers can enter at one time, for outdoor venues especially this should not be an issue. Appointments are part of many other operations they can continue to operate along with social distancing guidelines. How do we justify that big chains like Walmart, Target, CVS, Costco and others can continue to operate and small businesses can't; it's not just they are selling essential products, these stores also offer other commodities and shoppers that go to these stores are following social distancing. If its good for them why not smail business. Thank you governor for your hard work and commitment to keeping Florida safe and strong.
Lee	Recreation	Please re-open all RV parks & resorts that are closed. People can responsibly social-distance within their own RV's while having the opportunity to enjoy the outdoors. Please open all beaches, outdoor spaces and state parks. Sunlight, exercise and fresh air is needed after all of this time indoors! Please open sooner than later - a week or month delay is not going to make a difference in the spread - only a vaccine will do that & we can't stay shut in our homes until then.

AMERICAN OVERSIGHT

Broward	General	With regards to re-opening Florida it is now readily apparent that any outside venues that provide for adequate distancing should be open to include parks, boat ramps, beaches, etc. Enforcement of the distancing should be provided using our current LE folks already on the job at these locations. Businesses should be encouraged to restrict crowds and provide more spacing for their customers until such time as "herd immunity" has occurred or a viable preventative vaccine is in place. Continued public service announcements for distancing and face coverings as appropriate should continue. Random checks of businesses by public health should help with reinforcement of rules/recommendations. Continued whole population testing (with and without symptoms) should be conducted, focusing on known hot spots and vulnerable populations. Respectfully, M. Balcom
Pinellas	General	Reopening Florida is a delicate manner that is vital for the overall health and safety of our citizens. I realize a the decision can not be taken lightly. The numbers, however, need to be truly representative of the true story. It's a hard sell to have a "closed" county with a population of close to 1 million and have 600 total cases with less than 20 deaths, not all residents of that county. When you have other states like Nebraska, Iowa that simply asked people to be responsible much like Sweden. Their numbers are remarkably lower. There are better ways of handling this rather than a cancel culture that cripples our state and our economy. I have two older children that are now unemployed since March and still have recieved no benefits since filing. Frustrating will only grow. People need to get back to work. Employers that laid people off may not rehire their employees once they can reopen, and for many, that would be devastating.
Miami-Dade	General	DO NOT LIFT THE STAY AT HOME ORDER UNTIL THIS VIRUS IS UNDER CONTROL.
Miami-Dade	General	Please re-open. We need to eat and without work we won't be able to. Please re-open.
Broward	Education	Hi! I am a teacher, a mother of 3, and the wife of a restaurant manager. I have been school PTO president, Girl Scout leader and school general volunteer. I am very good at being devils advocate and thinking about all sides of an argument. I can also make hard decisions or admit when something is needed even if it goes against what I would prefer or my views. I would love to have a voice!
Pasco	Recreation	Please reopen the state parks. We need outdoor recreation please. Please open the state parks!
Polk	General	OPEN the State for business. Require ALL to wear masks in public and keep social distancing. LETS GO TO WORK ! Open the Theme Parks when they are ready. Tier the public attendance. First only Florida Residents. Second only US full time residents. 3rd North America...4th only when world travel is safe again we open to the foreign travelers.

AMERICAN OVERSIGHT

Jefferson	Healthcare	I brought my family of 4 (soon to be 5) home from Shanghai, China. I was and still am convinced we are safer in the good ole USA during a pandemic. My opinion is we should NOT risk opening up for business as usual. If we do that, we will be blamed for all the death and destruction that is coming to the 3rd world. That would be a propaganda win for the Communists. We must do everything possible to prevent deaths and stop Covid-19. I believe Bill Gates has the best grasp of this crisis. I think we need all our Grad students with online teaching experience assisting our classroom teachers. Also, we need to insist the internet providers install service to every family.
Lee	General	I think you are considering opening the state too soon. We do not have a treatment nor a vaccine for COVID19. This area has many older people who will be unnecessarily exposed to potential carriers of this virus. We need more testing available to everyone before the state should open. Once open, out of state visitors will arrive to vacation and that has a potential to overload our healthcare systems. Please consider this carefully. People will not self isolate for 14 days since that probably exceeds their vacation. If and when we reopen, masks need to be mandatory until a vaccine is widely available. I emphasis, testing and treatment needs to be available to all. We do not have a handle on how this could affect the health of all Floridians. Err on the side of caution please.
Seminole	Professional Services	Hair & nail salons, spas & massage clinics: Studio settings that contain one practioner & one client in a private room (istudios, Sola salon suites, Phoenix salon suites, etc) should be allowed to reopen. They are able to meet sanitation guidelines & restrict clientele as recommended. These are all self employed persons who need to get back to work. Chain salons, privately owned salons employing multiple people & booth rent salons utilizing stations on a common work floor space should remain closed. They are not able to meet guidelines without severe financial impact for both themselves & their employees.

AMERICAN OVERSIGHT

Hillsborough	Healthcare	As a Licensed Massage Therapist of over 17 years, as well as a current small business owner who has received NO HELP FROM OUR GOVERNMENT...I'm pleading with you to KEEP OUR MASSAGE BUSINESSES CLOSED. We are not able to practice proper social distancing because the very nature of our job is hands on. We have no access to proper PPE or cleaning products. We as an industry are hurting and miss our clients and miss our jobs. But, this is a healthcare crisis and needs to be viewed as such. Our industry is going to require very specific protocols across the board and TIME TO PREPARE before any reopening occurs. I rent space from Salon Lofts for my business. We have 20 individual businesses in our building. On any given day, there are at minimum 40 people in a space the size of a small movie theater (which Governor DeSantis just said he was not prepared to reopen in his press conference). I am personally locked in a 9x11 room for an hour or more in close physical contact with my clients. We can not afford to become the powder keg for resurgence of this virus. I need to pay my bills as much as the next person right now. But, I cannot do it at the risk of my health or the health of my clients at this time. Please continue to help us stop the spread of covid-19.
Lee	Government	Please reopen Florida. We just recently moved here from NC . We want to see all business resume. It not only helps us in terms of purchasing furniture etc it helps the economy.
Brevard	Transportation	Lift State government restrictions, executive orders. Allow local jurisdiction, businesses and service providers to set their own availability and access limitations. Allow individuals the freedom to chose if they feel safe and comfortable enough venturing out and visiting local facilities and businesses.
Lee	Education	Thank you for allowing residents to give their feedback. For graduations, we are hoping for the students to at least be able to walk up and pick up their diploma (from a large table)and get their graduation picture taken. This can be done outside at the football fields or at a large arena parking lot. They can have the parents and family members stay in the car and show everything on a big screen. If they do graduations in June, this will give extra time to let the pandemic numbers decrease even more, and also give the schools time to plan everything. The high school seniors have already had to miss their proms and high school trips. This would be wonderful if they could have this special time for their graduation. Thank you!!
Sarasota	General	Time start opening up!!! We have several family members with small children who are out of work and haven't heard anything about unemployment when they filed over a month ago!!! They're going to have to split up their families to move in with other family members who have a little extra space. If people don't want to go out, they don't have to!

AMERICAN OVERSIGHT

Pasco	General	I do not think we should open Florida up yet we still have not tested enough people to get a true number of cases that are infected. Without more testing you cant be sure on how safe it is to open and have everyone chances of being infected go higher. We should at last wait another month and do as many tests as we can. These are people's lifes you have in your hand so the blood will be one them if we open to soon. Ask yourself do you really think it is safe enough for your children or your high risk family member even if they are the ones staying home parents and relatives will still be going out when we open and then bringing it back home. We dont NOT have enough PPE or medical staff to support if the cases have a huge jump which they will without more testing. Think of Florida people as your children and when you believe its safe enough for them then make the decision its safe enough for us.
Pasco	General	I'm writing this to express my strong desire that this state needs to open asap. We currently have a death rate of 0.0047% in the state of Florida. I support pushing people to continue to wash hands, wear masks and practice some form of social distancing. I am afraid of what inflation will do to the working class due to stimulus money. Please get the state open and back to work
Lee	General	I've commented before; has anyone considered separating the residents to alternating days like the water restrictions in place for shopping, groceries, restaurants, entertainment, etc? Terry Kohler 3524 SE 3rd Ave. Cape Coral 33904
St. Johns	General	I'm 64 not scared open up our state The FAMILY LAW COURT must open to get arrearages in SUPPORT!!!!! Open up stop scaring people live free or die . I need my money and jobs business are going out of business .
Seminole	General	It is time to completely reopen Florida! Staying at home and social distancing is not sustainable for several of our states most prominent industries. New studies that are factoring in undiagnosed and asymptomatic people, that are only recently coming to light, are showing the fatality rate to be well below that of the seasonal flu and other diseases. We don't shut down the entire economy for the flu the same way we don't ban driving because there are car accidents. We have to get businesses and people working again, and the sooner that happens, the better.
Collier	General	I feel we had the correct procedure approximately 40 days ago by keeping only essential business open. Although, now that we have the knowledge on how to keep ourselves safe, I feel we should transition from essential/non-essential to safe and unsafe. Those businesses that can operate under the social distancing guidelines should definitely be able to do so without discrimination. As for the parks and beaches. If we are not being monitored in Walmart's and Publix(enclosed spaces) then I feel that the parks and beaches are even more safe than the "essential" businesses that continue to operate. With the education, we now know how to monitor ourselves and actions in open spaces so I feel our parks and beaches should open ASAP for good mental health. Not to mention, being in the water and using the outdoor rinse stations would be beneficial for rinsing germs and viruses. Thank you.

AMERICAN OVERSIGHT

Broward	Retail	We own a barbershop in broward county we currently have 11 employees. We have been closed for 6 weeks already, none of my employees could get unemployment benefits, or stimulus check, or get approved for ppp. Our business did not get approved for sba loans or any help whatsoever until today. Please reopen business! My suggestions for barbershops: gloves/masks/faceshields Clients wearing masks Disposable capes Appointment only Clients waiting in their car until is time for their appointment Strict sanitation rules
Citrus	Recreation	Since many people are in need of getting outdoors and exercising for their mental and physical health, , I am requesting that you open parks and beaches across the state with restrictions. Thank you for your consieration.
Manatee	General	You closed the schools til June, without daycare, how can we return t work? You failed us in providing food when you closed Florda! You failed us with no adequate unemployment software capabilities! And now you want hungry, desperate families to decide for you.
Miami-Dade	General	Do not open back up just yet. It's way to soon. OUR SAFETY COMES FIRST!!
Volusia	General	My concern is for Volusia County residents, the Coronvirus cases are going fast I live in Ormond Bch and am afraid to go Grocery shopping. I believe residents who go out to stores should have to wear mask. I don't believe we should open til cases drop not increase.
Lee	General	Reopen our state. Please, we need this. The President said the cure cannot be worse than the disease and yet here we are. The cure is becoming worse than the virus. People are suffering in immense numbers due to lack of income which is in part because of the shut down. People are loosing their homes and cars as banks won't work with us. No one is able to get unemployment due to a flawed system. I want to see my children enjoy our normal activities in a safe way, which I don't mind doing. We need our economy back up and running in order to provide for our families. Unemployment is failing us, so please open us back up so we can get back to work and bring home income once again. We need to be able to enjoy all outdoor activities again. I am only one voice of many, but a voice that echoes what the rest of Florida says. Open us up, and let's do it sooner rather than later. Let's get our Restuarants open so we can support our fellow Floridians. Let's open all outdoor activities for mental health. Let's open our lives again. Thank you!

AMERICAN OVERSIGHT

Brevard	Healthcare	As a high-risk senior with underlying health issues, but still employed, I'm finding it difficult to determine if/when I can safely return to work. Being high-risk, I had to remove myself from the workforce and obey the stay-at-home order although the aerospace company I work for continued to run as an essential business. Functions that I perform requires me to be onsite, not able to perform from home. The company provided two weeks of paid time for the high-risk seniors having to take themselves out of work. That benefit has long since run out, and I'm now on unpaid leave. Having voluntarily taken myself out of work makes me ineligible for unemployment. After watching the governor's update this morning, featuring Cleveland Health experts, moving forward is going to mean that high-risk seniors remain at home, indefinitely. I completely understand this as this virus is still evolving, and much remains to be learned about the spread. Having asymptomatic people walking around passing the virus to those who are susceptible, and could possibly become a statistic is a huge unknown, and must be avoided. At this time, there is not enough testing to test everyone. Also, there is not enough PPE to protect everyone. Until testing and PPE can catch up, I fear many of us seniors will stay on lock down. That too is understandable, but doesn't help my personal situation. For myself and my wife, if we catch this virus, most likely we're done. I'm just hoping to see the day that I can safely return to work, given that I can obtain adequate PPE to protect myself in a closed workplace. Either that, or I may be forced to retire...something I'm not ready to do.
Broward	General	Businesses will not be able to open back up if they stay shut any longer. Some are already closing for good.

AMERICAN OVERSIGHT

Hillsborough	General	Absolutely do not open yet! Also talking about 38% of our state is based on tourists from all over the world and if we open we will allow all these people to fly here. I waited tables for 18 years and worked at Disney and universal before graduating from college and if you think you can open any restaurants and keep social distancing and you know nothing about restaurants or how many people are crowded into these parks. 1st of all I can't even make it through a store with a mask yet better.yet work in a hot restaurant or patio of one in Florida. Example: Margaritaville at universal does 35 million in sales a year, they seat 1,000 ppl, have 500 employees and have two kitchens. When you run an entire shift working sometimes 16 he shifts there are two levels and a patio. Kitchens, back of the house and side stations are very tight quarters. Most restaurants are like this the line cooks are on top of each other and the servers also sandwiching each other running each shift. Nzot to mention it is hardly helping them to open at less staff and people live.off tips, they will have cut staff hugely. Go from 100 servers who maybe forced to work less hours but they make tips so it's that or cut staff but, definitely not wearing mask and protective gear all day in the summer of 110 degrees.... This goes for many jobs I encourage you to try to wair a mask all day then image people doing it their whole shift and many in a physical job. I would not even be able to work in the a/c in Amy office like that, No way! And on top of that until you lower restrictions on testing for symptoms and numbers go down this will back fire and you still cannot find, mask, disinfectant, toilet paper better yet open back up! This can not be rushed it will hurt worse and last longer.
Lee	Healthcare	Florida should not reopen any business completely much less those that require or allow for close personal contact to function, until at minimum 150 out of every 10,000 citizens have been tested and the number of new cases has not increased in 14 days, or a vaccine is developed and widely distributed.
Pinellas	General	I feel businesses should be allowed to re-open and be encouraged to continue to use social distancing, masks, and other common sense safety measures. The people who do not want to go back to normal, under any circumstances, would be welcome to remain in their homes as long as a they want. Thankyou.
Brevard	General	The numbers are proof that there is no reason to prolong the total economic shutdown of this state. Keeping businesses closed and preventing people from working is harming more lives than this virus ever will! The state needs to open for business on May 1st. Let the American people decide what's safe for them to do. Keeping us locked in our homes and telling us we can't work is infringing on our constitutional rights! And if you haven't noticed, there are daily protests across the state because of this very fact. People are already missing payments on bills and rent. Unless you plan on magically conjuring money to pay all those debts for us, you need to let us get back to work to save our homes and our local businesses! This is all a political game. In the history of this country, we have never shut down completely for a new virus before, and there was no reason to do so this time. It's time to end the stay at home order and reopen Florida!

AMERICAN OVERSIGHT

Pinellas	General	I am a concerned resident of Florida. My thought is we are opening too soon because there are still too many cases and too many careless people out there so if it means anything please hold off. Please be wise and don't be pressured by foolish people.
Miami-Dade	Education	I find that the government needs to take more precautions when it comes to those who are walking around freely. Mask will not solve half the problems if the citizens are not all deemed to be tested. Want to walk in a grocery store you need to be tested or show when you were last tested. It needs to be a record that people need to have when was the last time you were tested. Are you negative or positive atleast until we have numbers dropping instead of raising. How can we reopen a government and use distance of 6ft to protect any one when in a building there will me many. This will not resolve what is really going on. How are people really getting sick. What is this virus, how is it actually in existence I do not feel safe going out any where knowimg there are people walking around in stores and etc that have not been tested it needs not to be a choice or options it needs to be mandatory.... I was pregnant and recently gave birth and I was tested yet the nurses that treated me or the other staff walking in and out my room were not tested how is that protecting me and my children. School should not be allowed open for these same reason will everyone be tested??????? Everyone needs to be tested! Make is MANDATORY to shop, to return to jobs, to work in schools and etc. Please for the sake of my yoyng children please we need a better resolution not just opening up thr government and allowing numbers to rise more because everyone is still not being tested
Lee	Tourism	I know we all want to get out go back to work etc but I feel that the minute things are open the beaches and restaurants and bars will be jammed. It is too early April 30th. We are still getting too many cases. People like me that are older and have underlying conditions are at risk. I believe that like Pennsylvania there should be a formula on number of cases and amount of people in that county to be used. We are not low enough yet. Thank you for giving us the opportunity to air our concerns
Manatee	Education	This is a very dangerous and reckless idea. Please listen to the doctors and other medical specialists and don't rush to reopen this soon. This state hasn't even curved yet. I have an autoimmune disease so I'd be in great danger if we were to reopen, as would so many others in this state. Over 100 people have died in 2 nursing homes in my city to begin with. Please be very cautious about reopening businesses.
Manatee	General	Please reopen as soon as possible, as in May 1st.
Dixie	Tourism	We should not reopen the state until we have better access to testing and ppe supplies as well as more information on many people are currently infected (we are not being tested so we don't know.) We are in the middle of a pandemic, there is no reason to think that this is over or that we are ready for what is to come. We are still learning about the symptoms of this virus.
Charlotte	General	Please open it up and let us get back to as normal possible.People and the economy are suffering badly.
Hillsborough	General	We need the Florida economy to get back to where it was. REOPEN the state!!

AMERICAN OVERSIGHT

Orange	Tourism	We need to reopen the state as soon as possible. Most businesses can control their own social distancing. Barber shops and salons could only be open for appointments for instance. We are entering hurricane season anyway, and we need to be prepared for any evacuations in Orlando anyways. People are going to lose their businesses, jobs and homes if we keep this up. Open the state.
Orange	General	I understand everyone's concerns about the economy and being cooped up for so long, but it is my opinion that if we don't listen to the scientists it would be a deadly mistake. I am 70 yrs old and I would like to live to be the oldest resident in Florida. Please listen to the scientists and open only when they say it is safe to do so. Respectfully, Me
Sarasota	Recreation	I believe everything including the beaches need to be shut down until it is totally safe to reopen. We do not want this to start all over again. Opening the beaches to walk and swim is just asking for crowds. Just visit Walmart parking lot. Doesn't even look like anyone is concerned.
Miami-Dade	General	Yea don't reopen till August.
Pasco	Healthcare	Dental offices need to either continue to postpone dental cleanings. Another option is to mandate that air purifiers are installed in every room with a minimum of one hour long appointments. This will give clinicians the time they need to thoroughly clean the rooms between patients. Periodontal scaling and root planing should be allotted 90 min per appt. The use of the ultrasonic scaler used to perform a cleaning produces a mass amount of aerosols that will linger in the air for a few hours. So even if the hygienist has on PPE, the virus will continue to spread through aerosol transmission between patients. Dental offices could easily become a breeding ground for the virus. Lastly, PPE should mandate that dentist MUST supply hygienists with N95 masks. No exceptions. We are too close to the mouth and we work in a cloud of aerosols. Booties, hair covers, an over-jacket, and a face shield should be included. I say MANDATE because many office ignore "recommendations". They will not properly protect us because of costs. Perhaps dental offices should be given allowances to update offices to the new standard of care.
Lee	Retail	I'm ready for Florida to open back up. I have been without work for going on 5 weeks now.. there has been no help from unemployment its just continued to say pending. I don't get a stimulus check so having an income is crucial. There is no stop on bills wanting money every month so the ones who wanna go back to work should be able to. If you can work from home then you should be offer the to continue to do that going forward for a period of time .. people need to be able to recover from this and well this is just putting slot of us in debt . I was just getting mine on track and now everything is late. Late fees are still being put on accounts. Please open businesses back up at least come up with some restrictions
Lee	General	I think it is a mistake to reopen Florida. With all that has been done to move forward, I believe that it would all be done for nothing. We need to make sure 100 % that Covid19 is under control . It is important that everyone is tested and retested to understand how this virus has s moving. Until this happens, Florida should remain closed.

AMERICAN OVERSIGHT

Polk	Professional Services	Do NOT open us too soon please. I am a hairstylist and I cannot practice social distancing with my job. At times I am inches away from people and often have clients in my chair for hours on end. Throughout my 30 year career I have had countless clients come in sick...newly diagnosed strep, flu etc and they dont care of I get sick, they just want their hair done. I have a compromised immune system and have no health insurance. I cannot afford to get sick. Please dont rush things!
Palm Beach	General	Gym s, tattoo parlors, beach, hair salon should be last to open. Was first to close. Schools should have safe distance between pupils. Let's be smart, safe.
Polk	General	Please don't open Florida to soon and fix unemployment
Broward	General	Don't do it yet
Martin	Recreation	Please open the public boat ramps for recreational fisherman. The fishing industry which is supported by the recreational fisherman is dying. The bait shops, marinas and fuel docks are not going to remain in business if the ramps are not opened soon and boaters start purchasing fuel and fishing products from them they will never survive this. Also the beaches need to be opened as soon as possible for people to get out and get fresh air and swim in the ocean and give there kids something to do. The same can be said for the fisherman who fish from the beach. I don't know why other recreational industries Golf, Tennis and things like that are ok to keep doing but not being able to put your boat in the water and go fishing. You are killing a whole industry over this.
Hernando	Tourism	Would like to have our vacation rentals re-opened to Floridians. This has been a significant financial loss for us over the past month. Social distancing and CDC protocols can still be done while we have guests staying here on the river. It also allows for outdoor recreation. We are ready limiting the number of guests. Please consider re-opening the vacation rentals for May 1, 2020. Thank you.
Manatee	Professional Services	Your decision to call dog groomers non essential was devastating to disabled people with service anals everywhere. Not being able to get working dogs nails cut makes it difficult to impossible for a service animal to help their disabled handler. Further, it forces trips out for both human and dog to large public box store (PetSmart) where they get GOUGED and forced to purchase a full groom because nail trim isn't an option anymore. Of course full bathing is 3x the cost, and useless if you just have to walk a clean dog across a potentially contaminated store floor or parking lot! Mobile groomers already sanitize their vans between dogs and social distance because there is no room in the van for clients. Reopen mobile dog grooming - for the sake of the folks you claim to want to protect, and for the sake of their helper animals! I've been waiting weeks for a grooming appointment from the only game in town - who is price gouging me!!!
Orange	Management	Reopening the state, but with restrictions to go into businesses. For instance, you can't go into a local or private business without a mask until we reach the following phases and start to looses social distancing. Temperatures checks if possible in all areas, but definitely wear a mask but keep slowly reopen

AMERICAN OVERSIGHT

Lee	General	I don't think we should open Florida until the risk has subdued!
Sarasota	General	Please put in guidelines where people must wear masks in a public indoor area. Please open salons...how can they not be essential? Minimize the number of people who can go in at a time and keep social distancing. Have the patrons wear gloves and the stylists wear masks. Same for dog grooming. Small shops can easily accommodate. They could come out and get your dog so no one goes in. How is this any different than a small at home business!.? People need to get back to work and we need to save the economy. Require temperatures to be taken when workers walk in the door. Mandatory time off if you are sick. I am 65 with underlying conditions. No matter what you do, I am going to stay home as I have. People know how to do this! Please please!
Lee	Recreation	Me and my family our ready for the reopening of parks and beaches. But will the Lee county school board open schools as of August 10 for the new school year..
Sarasota	Professional Services	My family owned salon of 40 years is on the verge of extinction. I have worked for this business all my life and employ 18 people, most of who have worked for me for 20 years or more. This is not just a job to us, it's home. Please don't kill our home.Please reopen small business in Florida immediately!!!
Collier	Administrative	The shutdown due to the virus has created severe economic challenges not seen since the great recession or depression. I believe we need to be very careful in how we revive the Florida economy. It's not as easy as ready, set, go! My thought, would be to open up a small county, one that has less than 100 positive infections with the virus. We could then monitor and test to see if there is a rapid in crease or if we can continue to control the outbreak in a small area. The key is testing. Not only testing people with symptoms, but rather the whole population of the chosen county. Right now, that is our problem, we can't test a large group of 75,000 to 100,000 people. They would be allowed to work and travel within the county border but not outside of the county. This would enable the health care directors to prepare an accurate study and report to the Governor. Obviously the State and local municipalities are being challenged by budget constraints and shortfalls. Instead of having to beg the Federal Government for everything, we may try and be more self sustaining while we combat the virus. The State and local Municipalities could raise money by adding a temporary tax of 10 cents on gallon of gasoline. With gas price extremely low, I don't think the public would balk at this. The same could be true on adding 15-20 cents on a pack of cigarettes. Most smokers are at a higher risk to developing long term problems associated with smoking and the virus. Also raising the sales tax temporarily by 1% would also help. This would in turn give the Governor the opportunity to help Floridians that need help. We need long term solutions for the sake of Florida. The stimulus recently past is only a bandaid, when what we need is a tourniquet.

AMERICAN OVERSIGHT

Okaloosa	Government	Please follow federal guidelines. Re-opening should be done when we start to see a DECLINE in cases. The hospitals and healthcare system and WORKERS need your support in this. It isn't right to force them to work in unsafe conditions and overload them with cases, because that is a possibility. Thank you for your time, Signed, A Healthcare Worker.
Clay	General	It's time. I think everyone will practice good healthy guidelines
Duval	General	Now that the worst is behind Florida, it's important to safely reopen the economy and restore jobs. I believe we should reopen restaurants and stores on May 1, but limit crowds and encourage people to continue to practice proper health safety techniques. Everything should be reopen by June 1. Places with large crowds, like Disney, will need to provide hand sanitizer to all individuals and clean down commonly touched surfaces at the beginning/end of each day. Let's reopen Florida!
Duval	Technology	Please just open the doors turn on the lights and hang up the open for business signs. No one has to go out if they do not want to. Please know allow those that are willing to step back out into society and get us back on track economically do so Please just open the doors turn on the lights and hang up the open for business signs. No one Hass to go out if they do not want to. Please no allow those that are willing to step back out into society and get us back on track economically do so
St. Johns	Recreation	Hello I believe we should reopen state parks and beaches with social distancing rules in place. We have flattened the curve. These areas allow families and individuals to enjoy Florida's natural beauty, provide safe entertainment in a healthy manner, and would benefit people's mental and physical health. These are areas where people can have limited contact with each other and maintain safe distances. I would love to see much more of Florida reopened including non-essential retail and restaurants with social distancing policies as we had before we shut down. Our goal of preventing our healthcare systems from being over run was accomplished. As a St. Augustine resident I am sad for the many small business owners who will never recover from this.
Collier	Transportation	All airlines should require that all passengers wear face masks. This will impact all travelers flying into FL.

AMERICAN OVERSIGHT

Lake	General	Florida is not ready to re-open yet. We just had a major holiday Easter in which many people went against the stay at home order. We will see a spike in two weeks from the date of Easter. The curve is not correct as many people choose to stay at home and not get tested. I work in the restaurant industry. We are not ready yet. How can we safely serve people. I specifically am a bar tender...How can I serve my guest and make sure they are happy and safe. I can't sit people 6' apart. I cannot also enforce all my servers to sanitize everything in between guests...from the seats to the tables to the floor. Not everyone can listen. The virus last on shoes for 5 days so people would get the virus all over the floor. Kids don't stay in booths they would have their hands all over the floor getting the virus and than they will be touching the tables and people spreading the virus. My fiancé and I have not received one bit of unemployment. Florida cannot re open if they cannot get unemployment straightened out. We applied in Mid March. How can Florida ensure our safety? We would rather work we make more money working than the Florida unemployment amount plus the $600 and we only have to work four days a week. We would love to get back to work but it's not realistic. We work in Mount Dora, FL a area which is mostly geared to the older community. It's not work the health of the employees or patrons.
Nassau	General	Florida businesses should ALL be allowed to open. Government has failed us at all levels, Fed, State and local. The media, supposed, expert healthcare officials along with misguided politicians have irreparably destroyed a great economy - and our way of life will never be the same in my lifetime!!
Miami-Dade	General	Keep Florida closed until doctors and scientists say is safe to open gradually if not is going to be like taking antibiotics when you feel better you stop taking it and not finish the cycle and then you get worse stop all the bills since we are not working lire rent utility credit cards etc.for 2 month and payment back should be gradually
Bay	General	I know it has to open, but please please move slowly and continue to protect our older citizens. Education of especially our elementary aged kids is going to have to be creative. Many parents send littles to school sick or not as babysitting service. Once the child is at school, parents are unavailable. Companies need to be forced to do more to protect the essential workers. A covid symptomatic employee goes for testing after work one day and 4 days later he's still waiting for results but all the ppl working in the same office are required to continue working as normal., no temperature checks or follow ups. Those reporting not feeling well are "just trying to get out of work." Focus needs to be on health more so than economy.

AMERICAN OVERSIGHT

Palm Beach	General	We have a mayor in Palm Beach Gardens (dave kerner) who is acting out of spite to continue closing golf courses. We now have mayors in Miami-Dade, Broward and Martin who have opened courses. This is ridiculous, he acts like a dictator and talks down to the people. We need to be outside and have something fun to do. We know how to be responsible -- one person per cart, no flag touching, no raking bunkers, maintain social distance. When will the government trust us. Governor Desantis seems to get it, but these local mayors are more interested in their power trip and getting their face on TV than thinking about the people. Someone needs to step in and advise Mr. Kerner. thank you for listening. Gary Eversole
Duval	Professional Services	Open up the little businesses hair salons, elective physician services, dentist, small gyms, pools,. Keeping people that can work from home at home but put people back that do not have that luxury. If u can work at home stay there but people that can't need to make a living. People need to feel good about themselves and part of that is life ok'ing good. Let women get their hair done etc... they need to look good for self esteem. Depression is far worse and lasting effects are not pleasant!
Broward	General	Hello, Thank you for your service. I have a concern with opening the economy while schools are closed. Is there any plan to assist parents of school-age children? What is the plan? Some parents may have difficulty returning to work while schools are closed.
Hillsborough	General	I believe at the very least businesses and retailers should be aloud to resume business as long as they follow guidelines to stop the spread of covid19. Also I believe recreational activities such as parks beaches MOTOCROSS TRACKS and parks resume business as long as they follow guidelines to ensure they do not spread covid19.
Marion	General	I feel that we should open business with social distancing when possible. I have worked in a grocery store this whole time and we have not limited the number of people coming in and we have all been fine. Hairdressers need to be able to work and support themselves also. All businesses should be able to open back up and limit the number of people coming in if they feel it is needed. If people don't want to go out in public they can stay home let those of us who want to go back to the businesses have the opportunity.
Broward	General	Small businesses will be closing for good if they cannot bring in any money. The help that was promised isn't enough to carry a whole country.

AMERICAN OVERSIGHT

Osceola	General	I am for a cautious reopening of the State; however, with caveats: 1. Face covering and social distancing is a must! 2. No parks or recreational areas should be opened -- reason being that social distancing would be impossible to enforce (in others words "One bad apple can spoil the bunch."). I have seen all to often that many people have a complete disregard for humanity and it becomes an "all for me" syndrome and the heck with anyone else (just look at the hoarding of essentials -- still can't buy bleach, wipes, disinfectants, etc.) Strict rules need to be in place (that's the compromise) during these uncertain times. Perhaps making appointments to shop at stores. But definitely NO CONGREGATIONAL activities.
Sumter	General	Open the state! If people feel at risk they should stay home
Lake	General	Please open up our businesses. So many people are suffering financially and mentally.
Lee	Healthcare	What will dental offices do? We can't get N95 masks or shields. How will employees be protected. We have a very high risk with our jobs. There hasn't been much iformation in regards to our field.
Lake	General	Open all businesses, limit occupancy to square footage. Increase spacing of dining tables, and chairs at bars/restaurants. Require face coverings, social distancing. Open theme parks to Florida residents during first month with max 25% capacity, scale upwards thereafter. Start mass antibody testing.
Collier	General	Please don't open the beaches yet
Sarasota	Tourism	We need to reopen. Money is running out.
Palm Beach	Management	Follow Whitehouse guidelines and move into phase 1 may 1st
Sarasota	General	Florida is not ready to re open. Please do not open Florida yet and please extend the stay at home order. I am a part of a non essential business and they will force people like me to come in even though we have low immune systems! I'm able to work at home right now but as soon as the state re opens we are required to come back into work. PLEASE KEEP FLORIDA CLOSED UNTIL IT IS SAFE!
Hillsborough	General	It is very disturbing that the first meeting of your task force focused more on the thoughts and hopes of financial stakeholders than it did on the advice of medical experts. The second wave of the outbreak in 1918 was far more deadly than the initial outbreak. This is something to consider when we talk about a timetable for reopening Florida's economy. This task force has an obligation to the health and welfare of its citizens before the financial stability of lobbyists, corporations, and special interest groups. I recognize that it is an extreme burden on the individuals of our state to not have continuous employment at the time. But a booming economy will be no comfort to people who lose loved ones if this task force jumps the gun. Listen to the epidemiologists, and the CDC. Do not follow the money, follow the advice of the experts. The lives of our citizens depend on it.

AMERICAN OVERSIGHT

Volusia	General	If any and all states open it should be mandatory that everyone wears a mask at all times
Nassau	Administrative	Would like to see Florida start opening up..Governor and team has done an excellent job.
Palm Beach	Food	I eat a mostly fish diet and I have had no access to my boat or any place on the water to catch food. I spend hundreds of dollars a year to register my boat, purchase licenses, the required safety equipment etc and have now gone 6 weeks without use of my boat. We are struggling because of the state's inability to police a sandbar party. Shameful.
Hillsborough	General	Please follow the President's advice on reopening and do not reopen until we see the decline. Otherwise these last three weeks will have been for nothing. All.the children missing their graduation will have been for nothing. BUT PLEASE GET THE UNEMPLOYMENT BENEFITS TO THE PEOPLE.
Brevard	General	I hear about some states (and/or counties) releasing inmates for health reasons (reduce overcrowding, and thus, vulnerability to the virus). I wonder why they don't rent out some nearby hotels that probably don't have enough guests to stay open anyway. Maybe place low risk (crime-wise) inmates in those, reducing overcrowding in the jails. Would provide some income to the hotel operators that are probably hurting. And maybe a system could be developed to maintain some of the hotel employees (kitchen staff, custodial, etc.). Guards (existing guards, National Guardsmen, etc) could monitor by floor. Maybe the same idea (lease out unused hotel/motel space) for nursing homes to create more "distancing" in these facilities that house highly vulnerable people.
Sarasota	Finance	We own an insurance company here in North Port and we understand the magnitude of the decision to open our State. Our employees are currently working from home, or I should say that we are floating their paychecks because this is not generating new business. Childcare is the issue. Employees can not return back to work until school/summer camps are opened. Can we start the 2020-21 school year earlier? The 6 month break will be long. The summer brain dump is real and kids need normalcy. It will all owe our work force to return to work without the stress of having to find childcare.
Lee	General	I do not think it's a good idea to open Florida because there is still a lack of testing. There have been issues with the testing in Lee County, so we cannot be certain that the numbers are accurate. I would feel more comfortable if everyone could get tested, either for COVID or the antibody test. Plus, all essential businesses are in operation still so what else do we really NEED? Let's play it safe so we're not sorry later.
Lee	General	My wife and I are 75/72 in good health and independent. We believe that first the decision for lifting the stay at home order on May 1 should be based on regions of Florida and not one size fits all. Second we believe the retirement homes and nursing homes should receive special care to protect these people. We support a broad opening of Southwest Florida including restaurants, salons, and other small Mom and Pop stores providing they can maintain all safe protocols under the President's guidelines (50% occupancy, masks, gloves). Trust your citizens to do the right thing for them. The economy must be restarted now, not two or three months from now.
Hillsborough	Education	Can children go to summer camp on June 1? What is the plan for schools opening in August?

AMERICAN OVERSIGHT

Citrus	Recreation	I am very concerned about scallop season this year and think it should not start until later in the summer. We have thousands of people that come to our area each year and already do not follow rules. They are not going to maintain proper distance around our community or on the water. There is not enough law enforcement to monitor it properly. Please consider starting the season later or not at all this year. I understand that it will hurt our tourism industry even more but the health of the Nature Coast is more important so we can get businesses and schools back open.
Escambia	General	Perhaps allow beauty salons, nail spas and barber shops to reopen. Lots of people are starting to feel bad because they need hair cuts or their nails done. Some people simply don't have any way of doing it. For myself, a fresh hair cut would make me feel great and improve my spirits considerable.
Hillsborough	General	No. Please do not open Florida. The number of cases are increasing daily. The is no such thing as a curve. It's only an attempt to justify re-opening businesses. I do understand the importance of opening and getting people the income they need, but at what cost? My family and I will not be going out no time soon. Close it down for another month. Close everything down. Then you will see a curve.
Palm Beach	General	Please re-open with precautions everything asap. Thank you
Miami-Dade	Food	I believe the state should slowly start re opening businesses on May 1st. Due to everything being closed, millions lost their jobs and only source of income. I understand the severity of the matter, and we still must take precautions, but we must not let this virus take over. Unless there is a better solution, I'm all ears, but we all need to get back to working and making money. If there is an extreme death rate once we reopen, we will know that this is not going to work and we need to take different measures. But we all have been in quarantine for the most part for about 2 months. It's time. Re open America.
Volusia	General	Please open as much of the economy as possible as soon as it can be done relatively safely. I'm retired and haven't lost income and not suffering personally but obviously there are millions in FL that are hurting. I think people who choose to "go out" should be able and those who want to wait and the high risk can join in when they are comfortable. Accommodations might in the short term may be needed for those afraid to get back to work. If there are very small numbers of new cases by Sept. 1 stadium sports and concerts, etc. should be quite safe...that's four months from now so that should easily be realistic. I also hope churches will open soon...some will attend in person but some won't for a while so we should be able to distance. Thanks for opening Florida!
Pinellas	Information	Please do not reopen. We need to keep the state safe for everyone.

AMERICAN OVERSIGHT

Orange	General	Please consider opening into Phase 1, as outlined by President Trump and as you may deem that to be tailored, asap. It's time for business owners and their employees, many of which are teetering on the brink of what will be a permanent landslide and cycle of poverty to sustained illness to early death, will have an opportunity to economically recover before it is too late (which may be very soon). If business owners, in turn, including those of restaurants, do not adhere to the guidelines, then they can and should be shut down as determined on a one by one, subjective basis. At this point, after so much hardship and set backs, Floridians deserve the chance to return to our business operations under the restrictions which may be imposed. I respectfully request that this be done right away, as each passing day is yet another day in which an individual and/or a family endures the incomparable stress and uncertainty of not knowing when and where their next utility or rent check may come from, let alone their next meal. Thank you for your consideration, Michael
Collier	Technology	You can NOT re-open Florida before the medical experts advise! As we've already seen with beaches, people will not follow any of the guidelines with regards to social distancing. If you make the same mistake Georgia has done, we're going to find ourselves closing things up again, more people getting sick, and hospitals (which have luckily not been overwhelmed yet) become overwhelmed and unable to help those who are sick. If none of that matters to DeSantis, perhaps knowing a foolish decision could hurt his re-election efforts might help him make the smart choice. Either way, Florida needs to be smart about this. That also includes not allowing anyone in the state from states, like Georgia, who are not doing the smart thing. Unless they're essential workers, and no, I don't mean wrestlers.
Brevard	General	I do not believe that the state is ready to be reopened. Watching the path from state to state showed that Florida cases started show much later than in other states - so we are behind. Also - we have not conducted as many tests as in other areas to really know true statistics. I think if you open the state - we have a better chance of going downhill. The higher infected areas will start spreading to the lower infected areas of this state.
Duval	Retail	I feel it is too soon to discontinue work at home. also, too soon to open schools and resturants.
Pasco	Wholesale	OPEN FLORIDA, We owned a medical supply business for over 30 years and we are doing ok through this. But Dentist and every other business are hurting and may not re open if this goes longer! We are selling to Emergency Management and FEMA,also know the true story why PPE is in short supplies. Media is putting fear into the people and it needs to stop.
Martin	General	Please open services like beauty salons and barber shops, as well as small retail businesses. Employees and customers should be required to wear masks. Sanitizing requirements should be mandatory. Social distancing for one more month at all establishments.

AMERICAN OVERSIGHT

Hillsborough	General	Please just open places up stop waiting we are killing this country I'm old enough to have seen I don't know how many viriuses in my lifetime and we didn't go hide from them people need money to survive your taking away our rights to figure this out for our selves open up and let's get going before it's to late
Orange	General	I am really excited that we are heading to our way to come out of this strong. However, with the cases going up and down costantly from 1100 to 500 or 1300 to 600 a day i just dont think we are ready to open restaurants, beaches, even maybe stay st home order. All it takes is one week of ipening the state to fast and cases could skyrockey with too much interaction. Most people are even to worried about getting out still, which if people wont go out it doesn't matter if you open things up earlier the businesses will just loose more money getting product, paying staff and expecting a return to normal just to possibly backslide. I think the stay at home order should maintain until around may 15th, like California and a few other states. People will feel safer with low numbers getting out with the media constantly putting fear out there. Just my two sense. Thanks.
Hernando	General	Would genuinely appreciate some guidance from the state safe opening practices for Churches and houses of worship. You'll notice even in your "Area of Interest" religious, non profit is not even an option to select. So far information to houses of worship has been unclear or confusing. Recommendations directed to churches would be beneficial for us.
Monroe	Tourism	Please DO NOT open Florida until all necessary testing for Covid-19 is complete and our safety is no longer in jeapordy. Please get your shit together with applications for unemployment. Many of us are going hungry because of your failed system.
Polk	General	Florida is NOT ready to reopen. You cannot bend to pressure to open it up at this point. We do not need another New York. Are you going to allow your family on the beaches? Your children on playgrounds? Don't you remember how everything goes into their mouths. The governors slow to act has cost this state. How can we trust when there has not been enough testing and the government has failed so miserably. The unemployment site is just another slow to act lazy inept example of this government yet Ron DeSantis wants to hurry opening up which will cost lives. It will be on you if you make the mistakes that this governor has.
Collier	Recreation	Please open the beaches as it is open air space and UV sunlight ikills the virus. Possibly patrol the beaches to make sure social distance and give a citation to those that don't comply. Put up sign saying that as you enter access to beach so they will be warned.
Lake	Accommodation	Open up phase 1 ASAP. Everyone is suffering.

AMERICAN OVERSIGHT

Seminole	General	My daughter works part time at SeaWorld and Universal. SeaWorld had furloughed her starting 3/16. Universal is wonderful and kind enough to still pay part time employees until May 3. My daughter filed for unemployment on 3/16 because of SeaWorld and is still in the limbo black hole of pending monetary determination. If the DEO can't figure out what she should be paid through the state, they should at least approve and send the $600 federal money that she is entitled to. As far as getting the state back to work and it's obvious I am interested in the theme parks. I feel the parks should only open to the "local" passholders in order to keep the crowds at a minimum. We don't need those coming from other states in a rush as soon as they start to open. Do it like they do a "soft" opening for new rides. If the parks would decide to do my suggestion, please make sure to enforce locals or Florida residents only.
Palm Beach	Retail	Please open the state back up The financial implications are worse than the virus Our small business is lost
Osceola	Tourism	To whom it may concern, As a Florida resident who works at a theme park and has medical training, I urge you to not reopen the economy until medical officials say it is safe to do so. Reopening the economy too soon, will ruin the progress social distancing as started. I know that the economy is important, but people's lives matter more. These are not all "old people" - they are parents and grandparents , best friends , and active members of the community as well. It is imperative that people's lives matter more than money. 1,000 new cases a day are still 1,000 people! Who knows how many people have it and don't even know it and those are the ones you have to most worry about. I have been reading a lot of "supposed " ways for theme parks to reopen. Do you know that 2/3 of those admitted to the hospital with Covid-19 (so severe cases) had no fevers ! So what does employees or guests having their temperature taken do? Almost nothing! I am a proud resident of Florida and I love everything that the Central Florida area stands for- but please, don't put people lives at risk in the pursuit of money. Also, please get unemployment money out. People are struggling , they can't pay their bills and they can't buy food! This should be a priority over reopening the economy. The Florida government has a duty to take care of the Florida people. I know that once things are safe to resume, Floridians will be the first out to theme parks and restaurants and move theatres - but as of now, it's not safe- and you won't get the crowds you are looking for. Once it is safe to reopen, it needs to be mandated that ALL employers provide 14 days of paid medical leave (in an attempt to
Miami-Dade	Healthcare	Open Florida up! I live in Dade-County. Hospitals are not overwhelmed. Business are closing left and right. Of 6+Million people living in this county, there aren't even 300 deaths. Let's get back to work!!!

AMERICAN OVERSIGHT

Broward	Recreation	We need businesses reopened. I have not worked in weeks now because of this lockdown. I cannot pay my rent that's due in 11 days. I can't pay my insurance that's due in 2 days. I cannot pay my phone bill that's due in 9 days. I need to get back to work. Unemployment site has no worked for me and I can't even get a stimulus check because of a pin. I can't get a pin because government claims my info is not right. As if I am me. Who knows my info better than me. I've worked hard these past 3 years to get my life back in order and this lock down has messed it all up. I'm going to end up homeless again because of this. Survival rates at over 97% and climbing and you people have the nerve to disrupt everyone else's lives? What do you think is going to happen to people that can't put food on their plate? What you think will happen to people when they don't have a roof over their head. What do you think will happen to people who can't even have a phone on to put down on a resume for a job or can't put gas in their car to drive anywhere for a job. Can't pay insurance so now even if you can afford the gas now you can get caught driving without insurance. You people will be causing extreme chaos. The moment people's lives are pulled out from under them and they have no home and nothing left to lose and are pissed off at what the state did to them. Do you really think everyone is going to take this lying down? Just because a few people got sick and passed. It's florida, people get carried away in ambulances down here everyday and pass away. You can see ambulances on a normal bases coming out of senior communities. People die everyday that's life. Not to sound insensitive but that's the truth. The crime and violence that will roll down hill in the wake of this lockdown will be your fault for keeping florida locked down. What you think it's a coincidence everyone is buying guns. And ammo is always sold out. They see what's going to happen. People putting up facebook stories that miami hasn't seen a homicide for 6 weeks since 1957 is a damn lie. A girl was shot and killed because she wanted to buy designer shows from an ad on the 9th of this month in miami. It's a no brainer. Robbers set her up because they knew an ad for designer shoes would bring in a nice chunk of money. She shows up and gets shot and dies in a robbery. Just one tiny example of crime that will start popping up left and right. For all of you rich people that don't care. Who in the hell do you think the poor are going to target and take their frustrations
Broward	General	I just want to say that while economic interests are important, lives of Floridians are more important. If we open too soon, there will be a spike in Covid19 cases, deaths, and it puts our frontline workers in more peril. Please stay as closed as possible for as long as possible.
Clay	General	The virus went through this area in fall and winter and we survived. Time for us to open up.
Orange	Tourism	Slow Down, don't put people at risk. Reopen in July make sure this thing has time to completely go away before we jeopardize our local community in orlando.
Charlotte	General	We need to protect our citizens from an influx of tourists carrying COVID-19 from other states. I see no way to do this opening up the state this soon. A soft opening, perhaps. Within our borders only, we have enough of a battle to contain this virus. Take care of our citizens first. You owe us that.
Volusia	General	Re-open the State as soon as you can. If the Miami - Dade area has a lot of cases then phase them in. Otherwise let the Counties open up and do business. MANY people are REALLY hurting financially and we need to get back to normal. This flu outbreak was no worse than any other flu outbreak and the reaction to close down the country is looking like an overreaction. Re-open the State!!!

AMERICAN OVERSIGHT

Pinellas	Recreation	Please open beaches for exercise. Keep the parking for beaches closed so locals are the main beneficiaries.
Palm Beach	General	Too soon to reopen. More testing needed.
Pinellas	General	My response in re-opening of Florida is for it to be safe. ALL employees should be required to wear a mask. 6 to 10 feet of Social Distancing MUST be mandatory with gloves. Hand sanitizers should be mandatory with proper hand washing. No more than 10 in a group at ALL times anywhere in public. STAY SAFE is the main goal. Check for temperatures also on a daily and safe basis for employees.
Hillsborough	General	We are a low-medium income family, so I fully understand the desire to open things back up, but we are also a family that has members that fall into the higher risk category of complications from covid. When things open back up (which I don't think should be until June so we can be sure we've definitely passed our peak), I would like to see mandatory face coverings and businesses operating at smaller in person capacities so we can try to prevent a second wave of this. I would like to have some definitive clarity on what the plans are for k12 schools for next year, so that I can prepare for what the best option for my family is. Lower capacities? Split schedules? Virtual learning? Mandatory masks? Please do not open us back up too quickly. I sympathize with the immense pressure you're under trying to balance the state's health and our economy and livelihoods. I appreciate that you have stated that you tend to err on the side of freedom and not telling people what to do, but I also believe that we need some guidance in this instance.
Lee	Professional Services	It's time to reopen. Too many others suffering from other issues. Abuse, suicide, no money. Open or I fear an uprising beyond control.
Hernando	General	I think reopening the state is going to cause a lot more virus cases & deaths. You can't control something if you expose infected people in public. We would like to get back to normal but that's going to take time . Please don't reopen our state now. In 3 1/2 weeks we went from 3,000 cases to over 33,000.
Lee	Food	I am 55 years old I have been without a job since March 12. Thank God I had some savings because I haven't got my taxes back my stainless check yet my unemployment and it's all paperwork is all done. I am a single lady but doing all this I refuse to go back to work I might get the virus. Right now my decision as I'd rather be broke and wait then be dead or may get infected infect somebody else I think it's crazy what George is doing I have two sisters and a brother there. I think they need to think long and hard because we all know this is not gonna be the end of it until probably next year I hope they make the right decisions
Pinellas	General	Please open the beaches, open marinas for membership holders, give small business chance to make a living.
Lee	Healthcare	I don't think it is wise at this time to open Florida. There still isn't a cure and that will expose us older people to the virus. It should be left like it is for now.

AMERICAN OVERSIGHT

Alachua	General	Please consider reopening personal care businesses such as hair salons, nail salons, and PET grooming. Personal care is important in keeping people's mental state strong. If you don't feel good about yourself it makes it hard not to get depressed during this time. Pet grooming is essential to dogs health in most cases and people are not equipped or skilled enough to groom their animals. Also for all of these businesses listed above they work in commission and cannot survive without clients. Thank you.
Palm Beach	Education	Virtual education is not for everyone. Some teachers are really hard on the students. The high schools need to adopt a pass/fail system like most colleges across the US have done. I have a senior and the decision of my county to do a virtual graduation is beyond disappointing. These kids are losing there childhood memories that can't be replaced. Florida needs to open up ASAP and let the people who are at risk still stay home and let the majority who are not effected go on with their lives!
Hillsborough	General	Let's get opened up. Set guidelines for susceptible folks that meet the age and underlying conditions vulnerabilities. Trust business folks and residents to make the right moves. Set guidelines and monitoring short term for travelers into the state. In summary, we know who is vulnerable so limit any stay at home/quarantine requirements to the affected group of folks to protect them. If they violate, they do so at their own peril. Help those affected that need it. Allow the no risk/low risk majority to proceed responsibly. Guard the import/travel of non-resident, high risk candidates until the risk diminishes.
St. Johns	General	Good afternoon, Please re-open FL for business, no later than May 1. Enough of the lockdowns. Let business owners and citizens decide what works best. Thank-you, Jeff Sturtevant, St. Augustine.

AMERICAN OVERSIGHT

Miami-Dade	Healthcare	More antibody testing, (mobile units by grids, increase test sites), there are a lot of folks who probably were exposed and never had symptoms, they are the key. The virus does not behave the same way in everyone exposed no matter age group. Focus on essential areas or businesses to open taking into consideration who has antibodies, who tested positive and completed isolation protocols. For those who tested positive, a robust and thorough contact investigation process is a must. Continue social distancing initially started I am well versed in Infection Control and the Contact Investigation process, I worked for the Bureau of Prisons for 25 years, and was the Executive Vice President Health Services U.S. Corrections and Detention until 2019 for GEO Inc.
Pinellas	General	We need to make sure that residents are tested to see if they had the virus if they did they are the ones that can go back to work. Until there is a really good deterrent we cannot just start everything up as it was. Most people will not go by the guidelines that are set up. President of the United States doesn't go by the guidelines stand up there with everyone and no mask. Please let's be smart.
Osceola	General	I am disabled and live with several family members. One of which is a 71 year old with lots of health issues. My family and I find ourselves in many discussions. While having people go back to work is important it isn't as important as making sure we are not risking people's lives. We are not ready to reopen Florida. I feel we should wait longer so we do not cause a worse situation when we reopen. I have carefully followed the stay at home orders but many have not and have become ill. The numbers still rising. Please give us another 2-3 weeks at home before making decision to reopen. Many families in our neighborhood feels the same way. We don't want to reopen yet. It is scaring us and we will be very unhappy if you open Florida too early. We live near Disney and universal. All the tourists sites. Reopening too early will cause an influx of tourists to come and that may cause us much sadness in future. Please wait. Please everyone I know in Florida agrees. We rather be safe and ready then not.
Manatee	Healthcare	Keep our county closed. We have too many beaches to reopen. The whole country comes here to vacation, that was the problem with spring breakers. If you open it, make masks mandatory!
Duval	Healthcare	End lock down. Open businesses and restaurants with social distancing rules. Wait before opening state to those outside state.

AMERICAN OVERSIGHT

Palm Beach	Recreation	Would like to see beaches open with restrictions. Nice to walk on beach as long as people abide by restrictions. Would like to see more places opened but only if it is safe..Doesn't seem like this county is quite ready to open- medially and health wise..Must use precaution with every step on reopening..Feed bad for the businesses that are closed, all the workers on unemployment but still think the safety, the health of everyone needs to be a priority. We do't want a surge after opening of this virus...All the leaders are doing a great job. Hope GA does not see a big spike in cases as that is a risky move Gov. Kemp made...
Glades	General	Don't put a $$ on peoples lives! If anyone wants to help people give out SNAP cards like was done after our last hurricane for food. Money can be spent smarter and more effectively. I'm all for supporting small business, but not the multimillion businesses! Let those that are able to prepare, but chose not to, for the future fail, not those that are unable to save up like those that can barely make ends meet.
Hillsborough	General	My suggestion to reopen Florida smartly and safely: Every business has to ensure their employees as well as patrons wear Masks. IF Patrons don't have any, the stores need to provide it upon entrance. Sanitize their hands as well prior to entry. Germany is doing it! If stores can't get them, the administration should provide some or sell at cost. It's That Simple! It can create jobs for people at the entrance, stores can imprint their Logo on the mask and it's advertisement. It needs to become the New Norm just for a short time. Prevention is Key and Cost effective! Also home tests should be free if not. Let's be Smart about this and LISTEN TO SCIENCE!
Lake	Recreation	Open. Lake County did not have too many positive cases.
Palm Beach	Retail	I do not think Florida should be reopened. We have not hit our peak yet and it would be very dangerous to reopen.
Pasco	General	It is still very bad on corona virus, please keep the "stay in home " order to protect people who lives in Florida! Thank you
Palm Beach	Recreation	I hope you will permit businesses in north palm beach county, e.g. Jupiter, Tequesta, Norgh Palm Beach, Palm Beach Gardens, Juno Beach, etc. to open early inasmuch as the vast majority of Palm Beach County cases and deaths have been in SOUTHERN Palm Beach County. I am especially interested in golf courses and Pilates studios. Although not in this category, we hope hair salons and barber shops in northern Palm Beach County will be permitted to open early. Thank you!
Flagler	Retail	I am a store manager at Saint Augustine Premium Outlets. On a weekly basis I see people from all over the state, country and even the world. The stores and common areas turn n in to a sea of germs, I've had employees miss over 30 days before the coronavirus due to regular colds. That said opening the malls at this time in this state will cause a huge spike in cases, hospitalizations (due to the high age range of most customers) and even death. Please think this through!

AMERICAN OVERSIGHT

Pinellas	General	We need people working and living normally again. Slowly open outside venues like pools and beaches again. Give communities the right to set limited hours for those places. Allow businesses like hair salons to begin limited operations. Encourage those places to create outside waiting areas. Allow teachers to meet with their classes maybe outside. Yes there is risk but the loss of freedom outweighs the risk.
Pinellas	Healthcare	I am a dental hygienist practicing in the Tampa Bay area. I have seen data that says hygienists are the MOST at risk profession for contracting covid 19. I am concerned about my safety returning to work. As a hygienist, I work in very intimate proximity to my patients. I am within mere inches of a patients open mouth, and am often sprayed with saliva. There are also aerosols produced by our instruments that linger in the air for hours. For example, I could be cleaning a patients teeth who is positive for covid 19 that is not showing symptoms, aerosols are forming in the air and lingering there. The next patient comes in and opens their mouth in a room full of covid 19 positive aerosols. They obviously cannot wear a mask while I am working in their mouth. We can be diligent in cleaning surfaces as we always are, but there is no way to clean the air. I have been told by my employer that n95 masks will not be made available to us and that the "next best thing" is to wear a level 3 mask and a shield. Dental cleanings (while important) are an elective procedure. I do not understand why we would go back to work, knowingly not having the proper PPE to keep us or our patients safe for an elective procedure. Please postpone opening dental offices until we can SAFELY go back!
Palm Beach	Transportation	I think it would be greatly beneficial to reopen the beaches as well as the boat ramps on a limited basis. 95% of the voters out there are well-behaved and we shouldn't let a couple of losers ruin it for everyone - I'm pretty sure that most voters would be pretty good at policing the others based on what we have been through.
St. Johns	General	I believe it’s too early to open anything without strict restrictions i.e. limit the number of people in each establishment. People are going to flock to stores and restaurants and it’s not going to be good.
Sarasota	Healthcare	Re: Covid response:opening state. I feel there is a rushed response to open the state up for many reasons. Of course the economy which is so dependent on tourism and service industry is suffering badly. Action: unemployment website and ability to access funds in any way are severely lacking. PPP funds for small businesses have been mismanaged by banks and allocated to lawyers, chain restaurants, and other businesses that have been doing business all through this pandemic and do not need the funds as badly as others who are truly failing. Why isn’t this being prioritized appropriately? So many factors are pushing people to demand reopening in order to exist or eat! In a crisis like this our first commitment should be to protect lives. We do not have testing anywhere near where it should be. Counties are acting as individual states making different decisions without true unity. Especially in close proximity. Dangerous decisions. We have not peaked and we will see a spike!! Pay attention to all of FL not just Broward or Dade! Bad decisions, bad governance!

AMERICAN OVERSIGHT

Escambia	General	I think parts need to reopen slowly, make sure it doesn't spike the virus. But what concerns me is I have worked at Golden Corral for 20yrs. I am now 61 with underlying conditions. So what happens to me??? If Florida reopens early and the virus is still out there, will unemployment require me to seek work even though I am compromised??? It's a scary thought to me even though I am ready to get to work. Not to mention I have been off work since 3/6 with no stimulus check yet and no unemployment check either. It took over a month to even get on the website. I am so stressed, Florida has not done well by it's people and I hope when we do open up that unemployment takes into consideration those who are compromised and give us a choice without pulling funds if we are too scared for our lives to work at the moment.
Miami-Dade	Healthcare	How can they plan to open the state safely when people are not following the guidelines now. In Miami i ride the metro rail train to work at the hospital and the train is full of homeless people all day with out any mask asking for money and putting everyone else at risk and other people not wearing mask or keeping the social distancing practice not only there but in supermarkets including are we going to have guards everywhere to enforce the rules take your time before you act so we do not become another New York City thank you .
Volusia	General	I think it is over time to reopen the state. I am a small business owner and I dont think we ever should have shut down.
Hillsborough	General	I think we should wait 2 weeks to see how Georgia does now that they have opened up. If we see an increase of cases and deaths then we know at this point its too soon to open up. We want to make sure we do it right and not rush to open because other states are doing so.
Lee	General	I'm in favor of opening everything back up except requiring all citizens to wear face masks or coverings. Especially opening the schools back up so that parents can go back to work while their children are in school. And the reason that I want this to happen is because of the extremely slow or no assistance from unemployment. And if we are not getting that assistance and we need to go back to work.
Pinellas	General	I'm requesting that Florida be the last state to reopen. I work in healthcare but not with patients and I have been able to work from home where I am more comfortable and safer than being in a building with approximately 3000 people. I also have my mother who lives in a nursing home that I visit daily and I cannot risk her being infected by me getting sick from someone else.
Hillsborough	General	Please take the advice of the President's Medical experts. Follow the Presidents plan/phases and keep our state under stay at home orders until the steps that are set out in the plan are set up and ready and we have no more new cases of the virus. I know people are ready to return to normal but the risk is too great without the necessary protections in place.

AMERICAN OVERSIGHT

Pinellas	Education	I implore the task force to look at the situations that occurred during the 1920 Spanish flu pandemic. Look at the history and what happened during the second wave of infection spread when they open things up too early. Opening up everything to soon will mean that the spreads faster and the death toll rises higher. If you have any care and concern for Florida and the families that live here you will seriously consider holding off. If we open up schools to soon, they will serve as nothing but petri dishes. The same is going to go for any large corporations that open back up (Disney, universal, etc). Yes it's horrible that the Economy is tanking right now, however, what will the economy do with nothing but dead people? The economy will bounce back, it always does. Lives that are lost during this will never be restored.
Orange	General	Can't open as soon as the numbers begin to stabilize. Wait another month until June and see how that goes. As a person living with two high risk people people, I would rather be stuck at home than mourning one of them, be in the hospital or left with thousands on medical bills. Do not re-open yet. It's too soon
Orange	General	Please do NOT re_open businesses now. There are still too many new COVID-19 cases at large happening every day.
Seminole	General	Please open Florida, all business, no restrictions. We need our freedom back. If those that are in fear of CoVID-19 do not want to go out, they don't have to. They can continue to stay home, have things delivered and wear masks. The rest of us want to get on with our lives. We have bills to pay and mouths to feed. As for school, students should return on June 1 and continue through July, taking a 2-week break before the start of 2020-2021 school year. Our children need an education and do not need to be left behind struggling.
Hillsborough	Education	Will school resume as we know it and if not what will new procedures be? Are face masks going to become mandatory for students and educators. Finally will social distancing continue to be enforced?
Manatee	Retail	It makes sense to continue the measures that we are, not reopen until we have sufficient testing capabilities. The school closures make sense. But as an "essential employee," a single mother, it's impossible to manage both. I've got rent coming due, I am eligible for the stimulus check, they have my bank information, but I still don't have a date. I took some leave from work, but my paycheck would only cover half the rent. I recognize that this is a very difficult situation, however it sincerely feels like anyone that doesn't have massive funds and cannot work from home is being left out to dry. I can't help but feel as if we're expendable, a "necessary" cost for the "greater good" corporate profits. It's sickening. We can't afford social security, but we can continue slashing corporate taxes? The weakest and neediest people are being left to die.
Orange	Healthcare	Do not open Florida yet. Too many cases and this can get worst.

AMERICAN OVERSIGHT

Martin	General	I am very concerned about a second wave of COVID-19 if restrictions are lifted to soon, and the even more detrimental impact it will have on our economy. I am all for lifting restrictions, but only when, at a minimum, N95 respirators, not homemade masks, are readily available to the public.
Pasco	General	Please make masks mandatory in public. Thank you.
St. Johns	Education	I am a public school teacher and a mother of 2 young children in public schools. As a mother, I do not plan on sending my children to school or to any organized group events until there is a treatment or a vaccine for COVID-19. We have been taking the "stay-at-home" orders very seriously and understand the importance of following the guidelines. As a teacher, I teach children that are vulnerable with various underlying medical conditions. Even though children are not considered "high risk" generally, my particular group of students are. My students are in a school with a large general education population, which could put them further at risk. Schools should open until there is a treatment or vaccine to protect our society. Parents and educators need to be given an option to keep their children at home or to work at home without being penalized. If someone does not feel safe to return to the schools, they should not be made to go. Ask people (educators & parents) if they feel safe to return to school before "making them" return to school. If they do not feel safe returning to school, come up with a plan to allow parents and educators to remain home. When the schools do open back up, have classrooms with 1/2 the amount of students. Have students attend half in-person and half virtually. Ease back into school before we fully go back and have a huge outbreak of COVID. Thank you for your attention to this.
Hillsborough	General	I think FL should reopen but in phases with limited numbers. Restaurants I think could reopen but seat far apart from other tables, if they can't do this then takeout only. If theme parks do open should be very limited numbers and FL residents only until September.
Hillsborough	General	As someone who is considered essential, I believe that it is paramount that we do not rush to open the state. Why? It's because all it will lead to is more contact with the virus. No one will follow the social distancing. It's barely in place now! I work in a small office with about 30 other people. While my company is trying to follow the CDC recommendations, we're still faced with being in a small space . It will take one person and our office will get infected. Please PLEASE do not open. Enforce the rules! This is not about your business goals, this is about people's lives. Protect your family and friends.

AMERICAN OVERSIGHT

St. Lucie	General	I feel we should open the economy as soon as possible. We are destroying the economy and our rights over panic based on flawed projections . The studies in Santa Clara, NY, and LA show that the death rate is no worse than the flu. I am 81 years old with controlled diabetes so I am one at more risk than some but I was with the regular flu also and we didn't shut down our country over that. We had a vaccine for the regular flu and had more deaths than we will probably see without a vaccine. The "cure" is worse than the problem. Chances are we will have more deaths from the destruction of our economy than the virus and we will be losing productive people rather than old and already diseased people like me.
Lee	Professional Services	I am an independent hairdresser and want to get back to work. We are much more sanitary than other businesses. We were already taking extra precautions in the salon before the 30 day stay at home order and had no infections to any clients or co workers. We wear masks, gloves and everything is sanitized before each client and all surfaces in the salon. We can limit one client at a time and not over crowd since we are a small salon. It's important for us to open so we aren't forced to go out to peoples homes to do a service which isn't sanitary. Please consider letting us open soon. Thanks, Patty Collins
Miami-Dade	Administrative	Who's going to be accountable when people get sick at the work place? No medical advisors in reopening task team?
Brevard Sarasota	General Professional Services	OPEN FLORIDA Open Florida now! Small business is on life support, the longer we stay closed the more we won't recover. Open Florida!
Lee	Education	Hello everyone. My comment is about the education factor in this COVID-19 Pandemic. I myself work at a daycare but was laid off due to not having enough enrollment but also because we got the call from our bosses to close. I just want to know since K-12 schools are closed until the end of the year will daycares also be closed until it is safe for everyone to go back? The reason I ask is while reading the task force information it said in the phases that daycares won't reopen until phase two. Many parents at this time may not feel comfortable sending their children back due to the COVID-19 also there is a lot of interactions with the children as well as coworkers. Thank you.
Orange	Recreation	Start opening Disney in phases beginning of June. Open Disney to Florida's for the first few months then open to other states.

AMERICAN OVERSIGHT

Orange	Tourism	Thank you for making it easier to submit suggestions. Work with TSA and Disney who are similar in wanting quick and safe way to process thousands through gates. Just like walking through airport scanning with arms up next to conveyor belt for carryons, can make a second walk through station for ultra violet light sanitation? A company like Abbot Labs and ultraviolet light manufacturer can jointly research and develop it. Don't need perfection. Hope it kills 90%plus of Covi on clothes and carryon luggage can walk though with, as well as on hair hair and skin, and travelers can continue on to sink stations that are made outside of restrooms to wash hands only. 2 step screening: Have to wait and arrive early for departures, so travelers do quick Covid test before boarding, and a follow up test that travelers take a few days after arrival in case symptoms arise. The follow up test can be done at major hotels, like at Disney hotels that can set up station to administer saliva tests or collect the new mail back self-administered "at home" tests. Can cost share with travelers--say up to $50 per person which travelers won't mind paying for the convenience of testing results and peace of mind knowing that others traveling in airport are also tested. Maybe phase in airport travel initially only for those staying at large hotels where follow up tests can be done at those hotels. To encourage car rentals, those companies can rebate some of the testing cost that a travelers incurs if renting a car. Airports have lots of idle capacity and space to be a great site for widespread antibody testing--any "population at large"-type sampling data can be done at airports where there is a nice cross section of people there, and travelers have the greatest ability to spread Covi in communities because they move around more and therefore should prioritize testing onto, and with good results create community confidence.
Pinellas	Real Estate	Please reopen all businesses in Florida now. The risk for the vast majority people dying is extremely low. We don’t have to rely on models based one predictions anymore, there are actual statistics worldwide on this now. Keep in extra precautions for people over 70 and people with underlying conditions. Everyone else can withstand and become immune or resilient to the disease if they haven’t already. There are plenty of hospital beds for those who get very ill. We cannot ruin the future for our middle class and younger people over a virus that is no worse than the usually flu or pneumonia., which is how the elderly and very ill often pass on naturally anyway. Thanks for your leadership! We appreciate you and your wonderful statistics. The media can go to hell, they are liars and have poor motivations - so don’t let them stop you or us from flourishing and prospering! Thank you, Donna Andrus
Manatee	Healthcare	Until at least 25% of the population has been antibody tested and/or masks are mandatory, keep the safe at home in effect.
Lake	Retail	Please reopen on May 1.

AMERICAN OVERSIGHT

Lee	General	Please, please be very careful about reopening our state too much at once and too soon. A considerable amount of residents will not adhere to voluntary guidelines that concern their health and that of others. I see examples of this everyday. Please error on the side of the health of our state, not the economics. Thank you, Larry D Glimpse
Walton	Tourism	I am a full time resident of Santa Rosa Beach in Walton County. We're a sleepy little beach town on the beautiful panhandle with a permanent residency of only 11K in the colder months. We rely on tourism heavily. And we love our visitors. We roll out the red carpet for them. But our geographical proximity to the Covid-19 hotspots of New Orleans and South Georgia put us in a uniquely precarious position. We NEED our visitors and yet simultaneously our limited medical facilities make us VULNERABLE to visitors. Please consider the panhandle in your decisions. Our numbers are lower and we can help our overall state "success" if we stay healthy. I have socially distanced with my family for 41 days now. We have safely recreated by fishing at the bay and on our dune lakes and we have played in our backyard. But other than that we have been at home. Our beaches have been closed and I believe they need to stay closed to deter the visitors from wanting a vacation. Please consider EXTENDING THE SHORT TERM RENTAL BAN for another couple of weeks. Look at our trending numbers on Thurs May 14th and make a determination then. That would give renters an idea if "check-ins" are available for that Sat May 16th. We also need to have plans in place so we can "host" the thousands of people looking to go on a vacation from their metro cities. We need to have guidelines for disinfecting rental properties between "turns" and we need to have more testing available so we can see a true scope of the spread here. There are indications the federal govt may extend their "safer at home "orders past April 30th. Florida can be a leader like Ohio has been in keeping its citizens safe at all costs. We are a very diverse state -- please don't forget about the panhandle and our proximity to the SE hotspots who are still battling this highly contagious virus. Thank you.

AMERICAN OVERSIGHT

Osceola	General	A large percentage of Florida's population are retirees. I myself have Lupus. For treatment I utilize methotrexate that greatly reduces my immune system. I have been home since before the shutdown of the state in order to ensure my safety upon my doctor's recommendation. Florida is a tourist state and opening it to soon will definitely entice people from other states (possibly from states with higher COVID-19 rates) to vacation here and possibly increase Florida's COVID-19 rates. I work with individual's with disabilities that range from physical disabilities such as hypertension to mental health disabilities. These people do not need to be in the community as many are in the high risk category just like myself. Florida has not even reached the Federal Governments phase one plan. Florida is not ready to open in my opinion. Recently my daughters 22 year old friend with no prior health conditions contracted COVID-19 and passed away. Until testing has become widely available to even those with no symptoms, and the numbers have decreased substantially in the next 14 days, Florida needs to remain on a stay at home order.
Sarasota	Healthcare	We have not done enough testing to re-open. I read that some areas are considering requiring employees be tested before they can return to work. Good idea but not nearly enough tests available for that. The biggest problem is that after the first week many people did not abide the stay at home order. This must be enforced!
Sarasota	General	Please do not allow non-essential businesses to reopen until testing is being done at a higher capacity. Instead, focus on getting help to those in need until it is safe to begin a phased reopening. That includes fixing our flawed unemployment system. Nothing is more important that preserving human lives.
Miami-Dade	General	I support re-opening of businesses in stages and of course respecting our health care professionals guidelines. Some businesses are functioning well right now and I believe many others can function in similar manner.
Pinellas	Healthcare	PLEASE DO NOT OPEN THE STATE! It would be a foolish move based on politics, not in the best interest of the people. The virus will get so much more traction if you open the state. I'm so deeply disappointed in the governor and his inability to see for himself rather than be Trumps pawn. If this task force CARES about keeping people ALIVE, do not open this state yet.
Hillsborough	Government	I THINK you should reopen FLORIDA.WITH GUIDELINES Open small restaurant and bars and business first. (WITH GUIDELINES and restrictions) SLOWLY OPEN BEACHES. (WITH GUIDELINES with RESTRICTIONS) The word of the Day is : GUIDELINES WITH RESTRICTIONS
Bay	General	OPEN !!! It discourages us when we see 955 negative test in Bay city. With only 63 positive. We are going broke, people are living fearfully crazy. Just Open and Trust God !!!

AMERICAN OVERSIGHT

Washington	Accommodation	I own a condominium rental unit in Panama city Beach. Banning short term rentals while allowing hotels, motels & resorts to continue business as usual, I believe is not fair. I was booked solid in April & May but have had to refund those reservations 100%. This has put a strain on my personal living day to day finances as we depend on that income to supplement our retirement budget. Please consider the financial hardship this has caused the individual mom & pop owned rental businesses. Thank you.
Broward	General	Broward County has a relatively low number of cases. We are ready to begin the reopening process. Studies have shown especially that outdoor transmission occurs much less than indoor transmission. How long do you intend to make us suffer? Advise the at-risk population to stay home and allow us to return to some sort of normalcy. Most hospitals are so low volume that doctors and nurses are having to endure pay cuts and shift cuts. This is not sustainable for anyone.
Collier	General	More testing and some kind remedy
Lee	General	As places reopen Florida should conduct 6ft distance between customers and make wearing a face mask mandatory for everyone that includes people receiving and providing a service. Florida needs to increase their overall testing in general.
Hillsborough	Government	My DEO/unemployment claim has been pending since 03/22/20. In the DEO Inbox, the fact-finding PDF shows “failure to meet work search requirements”. I’m not sure if that’s what’s holding up my claim, but due to the Governor’s order, work searches and CareerSoure contacts aren’t required due to COVID-19. I’m on furlough from my job and not actively searching for employment. I have been calling DEO every single day non-stop since 3/23/20 and can not reach a single agent. I’ve sent emails and faxes with my ID information but haven’t received a response. I have contacted my Senators, Reps, Jon Satter, DEO escalated claims, news agencies, anyone and everyone I can find contact information for. Those who filed in April (including Disney and Universal employees) are being paid before March claimants. We are aware of a system issue that occurred in March and feel we are being ignored and overlooked. It has been nearly 5 weeks since I've received a paycheck. We are falling further in debt. We need groceries, pet food, prescriptions. Our rent and car payment are due again next week, as well as car insurance and our electricity bill. We have no idea how we're going to pay anything. Florida DEO has failed us and doesn't care at all. Since I'm still pending on the state DEO site, I'm also not eligible for the federal CARES Act benefit. If the government officials weren't getting paid, they would move Heaven and earth to find out where their benefits were!

AMERICAN OVERSIGHT

Duval	Retail	It is too soon to open. How can retail workers protect themselves if they can't enforce customers to wear masks, gloves and comply with social distancing? We should not reopen until everyone in Duval County is tested. I am 64 years old with hypertension and COPD. I am at high risk and must work to live. If we reopen, you are forcing me to choose job over health. I have been trying Unsuccessfully for over 4 weeks to file for unemployment. My business closed on 3/19. My online application is locked due to no fault of my own and no one will help. What can I do? I have sent 3 emails asking for help. I have spoken with 3 people calling the toll free number and all they can tell me is I have to call another number for assistance. I call that number and can never get anyone on the phone. I was born and raised in Florida and my state government has abandoned me.
Hillsborough	General	Please open Florida as soon as possible so people can reenter the labor force and get back to work. I am an independent contractor who needs work. Unemployment is an issue that doesn't need to be solved with funding; we can open up the labor force again. People who want to stay home can stay home. People who need to work to feed their families should have that basic human right. The face is, heart disease has a higher death rate than covid 19 yet it is legal to buy meat, dairy and eggs in the grocery store. Cancer affects millions yet people have the right to decline treatment. Americans deserve the right to stay in or be outside, working their jobs and exercising their rights. Please consider this and consider the death rate and infection rate. Both are low, and we can keep it low by social distancing but reopening! Thank you so much for this. I feel like I finally have a voice.
Santa Rosa	Government	The economy is already in the toilet, and getting worse. First casualty of the virus. Food insecurity is a harbinger of increased crime...so let's look at Maslow's hiarchy of needs. FOOD. At the base. Please follow the SCIENCE & DATA; and recognize that some folks care more about materialism than human life. Do the right thing...open methodically with a FLORIDA plan, not a presidential edicts de hour. Ty for the opportunity to have a say, and God bless you all!
Escambia	Recreation	I am 71 with health problems, artificial heart valve, blood thinners, COPD, (never smoked). I have chronic fatigue syndrome and fibromyalgia so my immune system is shot. My husband is 82 with heart disease. We are avid bowlers (4 times a week). Here is the problem; if we open bowling alleys, public places it would be committing suicide. There is no treatment for this virus and it spreads like wildfire! Governor, do you really want this on your conscience if you reopen too soon? Please give us until June to reconsider reopening our state? We need more time for approved treatment. Thank you and God Bless you and your family. Jeanne Harlan
Jefferson	General	As a health care worker all I ask is that the state re-open employment people need to work jobs need to be created, other wise the entire state will end up in poverty and on welfare. Give the people the opportunity to work and support themselves.
Lee	General	Please open Florida!

AMERICAN OVERSIGHT

Miami-Dade	General	Although the virus has serious consequences for some, it is collapsing the economy of the entire country. We are all FREE adults and it should be our choice to stay in or go out. Its time to re-open and let people go back to work. Of course, with the generous unemployment there will be plenty of people who don't go back until they run out of benefits. The opening of parks, boat ramps, etc is just the government trying to continue to keep people out of work. Keep guidelines in place and leave it up to businesses to abide by them and fine those that do not. Keeping the public in FEAR is how communist/socialist countries control the population. Gov. DeSantis was right everyone's job is essential to that person and their families. Once again the government is hurting the ones that they claim to want to help. Soon Central Florida will become a GHOST town. OPEN Florida.
Pinellas	Recreation	If you're not going to open non-essential businesses, I urge you to at least open beaches to Florida residents. It is essential to our mental health. Sunbathing/exercising can be done safely at a distance, and it is much safer than going into grocery stores, pharmacies, etc. If you are going to open businesses (which I think should be done), a slow opening would be best. First, open beaches, gyms, and restaurants with outdoor seating. Then introduce things such as salons, bars, etc. There are families that cannot put food on the table or pay their rent. Please allow people to go back to work. Everything that is recommended to prevent covid-19 is simple hygiene that people should be practicing on a daily basis anyway. Wash hands, sanitize, and stay home when sick! The only way people can build immunity to this virus is to be exposed to it. I refuse to live in fear and allow whatever political agenda is behind this to keep me from supporting myself financially, and I refuse to allow it to impact my mental and physical health. Without gyms and beaches, I, personally feel very unhealthy, and I'd like to get back to a normal life, as do many others. If people are afraid, or more susceptible, they can stay home. But at least give the rest of us a fair chance to live our lives, stay healthy, and support ourselves financially.
Collier	Recreation	I think we need to be very careful when we talk about re opening Florida. The beaches are of a particular interest. I can not see how we are going to enforce social distancing I am so worried that we will begin to spread this virus in leaps & bounds. Until we have a vaccine I will not be feeling safe
Pinellas	General	I think we should take our time with opening the economy until we have fewer new cases..we the people lives matter and we wouldnt want to jeopardize more people contracting the virus by opening up the economy...and individuals think that everything is back to normal and dont social distance themselves and then the numbers of new cases go up again..just my opinion

AMERICAN OVERSIGHT

Lee	General	I support the reopening of the Florida economy. Official recommendations should be that the elderly, immune compromised and otherwise at risk residents continue to SIP and only leave when necessary. Those who are concerned should wear protective masks when in public. Businesses should enforce new policies with focus on cleanliness. Maybe a consideration for the government to offer small businesses a way to pay employees who are feeling sick so they stay home. So many sick employees go to work because they can't afford to lose a day's work or because they fear losing their job. Anyone with symptoms or exposure should stay home.
Hillsborough	Government	Please do no re open florida. I am a health care worker, and I strongly believe that we should stay closed. If we were testing everyone, I would say go ahead, but we can't. There are so many people who are asymptomatic and can other sick or worse. I see a lot of people that do not take precautions as it is, so please, take care of our us, the citizens.
Miami-Dade	Healthcare	Don't reopen this state while the death count is raising by the day and we're still discovering new facets of this virus' symptoms and spread. Also unemployment benefits have been nearly nonexistent for the people who need it. People are desperate not because they're out of work but because Gov. DeSantis failed to rectify sen. Scott's corrupt procurement and implementation of the unemployment website
Manatee	Healthcare	I'm a registered dental hygienist and I believe that it is absolutely not safe going to work right know without proper PPE which includes respirators, disposable gowns, surgical head cups, face shields and proper suctioning systems that will eliminate aerosols. We all know how desperate hospitals right now are and we don't want to create shortages of supplies for those frontlines. Also I believe that all attraction parks should remain closed
Escambia	General	Please open our state immediately. Everyone is suffering greatly from this. We cannot sustain the economic crash, lack of freedom any longer.
St. Lucie	Retail	Personally I feel we need to partially start to open as soon as yesterday. The suffering I see with people is far more widespread then the virus will ever be. It makes no sense to have a couple stores open that everybody tries to go to. There is no such thing as a non essential store. If one can be open, they all should be open as long as they follow the safe guidelines.This would distribute the people more evenly to more places so they all do not flock to the couple of stores that are open. Small business that can also follow the safe guidelines should open. Restaurants can be at 50% capacity and be safe. Large scale gatherings still need to be restricted at time. Beaches should be open in the morning and at night. It is a fact that the virus droplets are larger in warm weather outdoors and drop to the ground faster. That is simple dynamics. We are going to have to adjust our lives to live with this virus as it is never going away. We cannot hide in a bubble the rest of our lives.This staying indoors is going to create mental health issues that make us more vulnerable to diseases other then the virus. The path forward needs to start now.
Lee	Healthcare	Reopening at this time seems unwise, given that, according to current data, that would run counter to what public health experts are advising.

AMERICAN OVERSIGHT

Lake	General	REOPEN!!!!
Sarasota	Construction	To our task force. I would like to remind you President's words. Don't let the cure be worse than the problem. Open Florida for business, there is no evidence that the so-called virus would be worse if people are allowed to work. People in Home Depot, Walmart etc are in closer proximity than most workers in the job site. Thanks
Pinellas	General	I 100% support the requirement (enforceable and with penalty for not abiding) the use of face mask inside public places and outside if in large groups or congested areas. From my perspective it seems that easing movement restrictions and opening the economy back up can't be safely done without the requirement of face coverings of some kind. Data from the experts point to this virus being in circulation for a while, and much longer than the this country and this state can handle being under various lockdown requirements. Opening the economy back up, in stages for sure, is inevitable. Social distancing will be a must to keep the spread at a minimum. The simplest and most responsible requirement that must be placed on Floridians is rules/requirements regarding usage of face masks, face coverings. Again, data from the experts points to the solid fact that non medical grade N95 masks can protect others by greatly reducing the amount of "droplets" released when a person coughs, sneezes and talks. If everyone were to wear one in a public place, while still doing our best to abide by solical distancing rules, and businesses stay proactive on sanitization and increased cleaning I feel we can get back to the "new" business as usual. Additionally, having been required to work throughout the stay at home order (defense manufacturing) I can say from my personal experience that my employer has done the bare minimum to remind employees about social distancing let alone keep intrusions for happening in the first place. Without an enforceable directive/requirement they will not make employees wear masks. I've been told that by management. Mask use in my opinion is the all around best solution to getting us back on track while keeping the population safe.

AMERICAN OVERSIGHT

Brevard	Professional Services	I have tried several outlets on getting this question answered, so thank you for giving us an opportunity to ask here on this panel. For the first 2 phases of re-opening. It has been said time and time again that vulnerable individuals should continue to shelter in place. I want to know how do those individuals get compensated or make a wage if they are supposed to be sheltering in place? I have an auto-immune disorder that attacks my platelets. If my platelets drop too low I can potentially bleed to death. My platelets drop with even the common cold. However, my husband (restaurant management) was let go mid March. We still haven't received our unemployment for this (pending ever since) and so I have to work. I work at a retail supply house for licensed cosmetologist, estheticians and nail techs. For now we have been doing curbside pick up so my risk has been low. But they intend for us to reopen to customers on May 4th. I am very nervous about this. I cannot lose my wage, as long as my husband is out of work and still not able to collect unemployment. How does the government plan on taking care of people in my situation?
Hillsborough	General	So much of the news coverage of COVID-19 is focused on the deaths--but as you take a look around the state, it's not too difficult to see how everyone else is dying, and not from the virus. Businesses are shuttering at a terrifying rate. Unemployment is skyrocketing to levels not seen since the Great Depression. And if we don't act soon to reverse these trends, there may well not be a normal to which we can return when this crisis has finally passed. By remaining under lockdown, we are killing the patient in order to "save" him. We need to start opening back up, and we cannot delay. Take a good, hard look at the numbers and you'll see that there is a ig chance that this virus has been here for longer than anyone thinks and has already burned through a significant portion of the population--all without overwhelming the medical system. Simply put, the rationale offered for the lockdown at the beginning has not materialized, and is not likely to. Continuing at this point not only defies all reason and logic, it will condemn us all to economic and social collapse. Take the initiative. End the lockdown and let us get back to work.
Volusia	General	Please stop this nonsense and open my state! I am an Emergency Room nurse and we are being laid off and having our hours cut back. I have a vacation coming up and am being told I can not go to my house rental in the Keys and take my boat out in the ocean. I work and pay my taxes and should be able to enjoy my free time. The beaches need to open so that I can take my kids and watch them swim in the ocean. This whole situation is ridiculous and is unconstitutional. I am no longer going to follow these rules that infringe upon my civil liberties. Stop this madness and open the state

AMERICAN OVERSIGHT

Broward	General	I do not think we should open the state until we've had full clearance by the medical professionals. I live in Broward County and our cases are still increasing. If we have put this much time into staying home we should stay home a little longer. The concern is if we open things up people go out we will then have a rise in cases again and we will start all over with the quarantine. I understand wanting to restart our economy but putting people in harms way at this point is reckless and pointless.
Palm Beach	Real Estate	We operate self-storage facilities in Boynton Beach, W. Melbourne and Cocoa, which are closed in compliance with Executive Order 20-91. Executive Order 20-91 does not list self-storage as an essential service or activity. Nevertheless, most self-storage facilities remain open. Self-storage is an inherently low risk activity because social distancing is easily practiced. The number of people present at any given time is small in comparison to the square footage of the storage buildings. Please consider the highly safe nature of the activity and make clear in the re-opening guidelines/provisions that self-storage is a permissible activity.
Brevard	Accommodation	I have a very big concern about gyms opening in Phase 1. While I love to workout at the gym and I miss it, I am not sure it can be reopened safely. Most gyms are very full of germs and people working out in close contact. My gym before being shut down w/Covid, regularly had about 100 people at it during M - F from 8-8. There is a pool there plus 2 classrooms w/group exercise in one room and spinning in another. Both the classrooms are always jam packed w/people in a small enclosed room. The pool classes are full and when they come out of class-they all come into the locker room. The upstairs has weights side by side, treadmills side by side, bikes+ellipticals side by side. I just think that it will be hard to have gyms open that soon, w/o some kind of rules in place to limit the amount of people allowed in there at one time.
Lee	General	I believe that Florida should be opened very slowly to protect those most at risk such as myself. thank you.
Miami-Dade	Education	To reopen businesses - you will need preschools and daycares to reopen Knowing that it is impossible to social distance 1-5 yr olds no matter how few you have in a classroom - please consider increasing the number of people allowed in a room from 10 to 20. If not, many preschools will not be able to open if they are only allowed to have 8 children plus a teacher and asst in the classroom. Also, please consider helping schools get needed supplies - gloves, masks that will be needed by all employees Thank you

AMERICAN OVERSIGHT

Miami-Dade	General	Opening up essential places such as gyms and even barbershops. A gym is where people can have a stable mental state, it is a stress reliever and allows people the opportunity to be healthy and improve their cardiovascular system. Opening up gyms can be tricky but with the correct precautions such as the 6 feet rule, having wipes and hand sanitizer everywhere, being tested before allowed to enter the facility, and even using a mask while working out.
Lee	Recreation	I would like the beaches to open for walking only. No towels or chairs. I would like to know if it's safe to into a public pool also.
Pasco	Recreation	Re-open the beaches!! Limit the capacity so everyone can still practice social distancing but RE-OPEN THEM!!! Everyone is quite tired of feeling like they are locked away! Especially those of us with small children!!! The beaches are large enough to accommodate many families whilst still maintaining plenty of distance from all other families!
Hillsborough	General	I am a small business owner in Hillsborough County. Florida NEEDS to reopen. The economic fall out and effect from having to close will be worse than the virus itself if we don't act soon on opening. I know many other small business owners in Tampa, and the reality is that if business are not able to open SOON, many won't be able to return. Period. We should be able to open while taking all necessary precautions to ensure the safety of employees and customers. (Wearing masks if needed, temperature checks upon entering, maintaining social distancing while inside, limiting the number of clients in at one time). Our business is in the cosmetology industry, and it is possible for us to ensure that proper precautions are taken as we are operating in a smaller, controllable environment. Services can be made by appointment only. There are ways that we can operate safely. But again, I cannot stress enough the importance on being able to open. It is vital to the livelihood and success of our business, but also the livelihood of our staff. Let's open Florida. The survival of small businesses across the state depend on doing so.
Okaloosa	General	Short term rentals should restart May 15. A mask should be required in all indoor places until proven we aren't having any issues. Restaurants to open at 50% capacity. No bars until end of May earliest. No groups larger than 10. Hair and nail salons should open following distancing guidelines. The mask is a big deal to me as a Registered Nurse. This would help to stop spread the virus . You should be fined if you don't wear it like they are doing in California and Texas. Thanks. Debbie Duke
Palm Beach	Healthcare	It is foolish not to observe what the medical community advises. Prematurely opening up the state will cause unnecessary deaths. This isn't a game, nor do i believe in "sacrificing the elderly". Responsible leaders listen to the science, not the cash register. Further, to put it in terms you may grasp better, the more people you kill the less customers you'll have AND the less tourists will come down here. Do you really think intelligent people will risk contracting the virus in a state that is so callous and cavalier with individual health? Whatever happened to protect and serve? After this pathetic example of non-leadership, whoever is left to vote will be sure to remember.

AMERICAN OVERSIGHT

Seminole	Education	With schools closed the pressure on parents is overwhelming. Children need structure. They can't be kept in a house all day. Parents working full time have discovered they have another full time job helping with homework. Why were after school programs closed? They provide structure and help with homework. Tney served children of first responders and medical personnel. Temps were checked before kids went inside. Facilities were disinfected. It was an enormous help to parents and to children. Please remove restrictions on after school programs that were open all day now to provide what many parents consider an essential service. Thank you
Sarasota	General	I feel that Florida should be reopened. If all these box stores: Lowe's, Home Depot, Publix, Walmart, etc are open and are doing just fine, I don't see why smaller businesses who only get a handful of customers in a whole day can't be open. People who don't feel comfortable opening or comfortable going out don't have to. And businesses that have alot more social contact like gyms, movie theaters and restaurants might need more restrictions put on them.There are plenty of small businesses that do not have a lot of customers at any given time. It is more spread out during the day. Like Mens Wearhouse for example and many small mom and pop businesses. I think in the long run most people now know what to do to restrict the spread and stay safe. I think it is wrong to quarantine 99% of a population for 1% that is at risk. I think the sick, elderly and at risk should be quarantined. I am a small business owner whose business supports other small businesses. We don't have a large customer contact. But our business has been decimated along with those other small business that rely on our business. Please reopen Florida. People know what to do and they are very aware. Those that don;t feel comfortable going out don't have to go out. Paula Maffei
Palm Beach	General	We have been in lockdown long enough. People are hurting to put food on the table. We need to open the State back up by May 1st
Miami-Dade	General	You can’t reopen what was never closed. Shut the state down so this virus will stop spreading, then you can talk about reopening it gradually.
Polk	Recreation	As a father of 2 children, 16 and 12, I can honestly say this quarantine has been very difficult for them. Both are very active, football and gymnastics, and being limited on their activities has (and not being able to separate) caused much anxiety and stress By opening the beaches the children of Florida,and their parents, will be able to get some space and exercise. I would think that social distancing should be easy at such an open space such as our beaches
Collier	Healthcare	It’s time to reopen our country/state. God is in control, not healthcare officials or experts. The small percentage of additional lives saved, due to shutting down our country, have already been saved. We need to get our country back on track and give people their livelihoods back. Delaying any further will garner far worse results than the guesstimated number of COVID-19 deaths

AMERICAN OVERSIGHT

Lee	Retail	To whom it may concern, I am a 13 year veteran of the beauty business, also former Chief Operating Officer for Dessange International, and Fantastic Sams Corporation, with experience in managing over 1000 salons around the country. I have written a comprehensive plan for our company to re-open as of May 1, 2020 and will upload it here for viewing. Formerly I was in the mortgage business, landscape business, and restaurant business. This is important because my involvement has always been "C-level" roles. So my experience is vast. I think that the state will be pleasant surprised as to how small business will manage their business when it comes to safe openings. In our business, the beauty business, the controls on the atmosphere are much more robust then that of many other businesses, but I get the feeling that generally speaking, because we serve guest in close proximity, it is then assumed that the risk goes up. It could not be further from the truth. First and foremost throughout the state, most local codes require a ventilation system above and beyond that of the normal HVAC system. It is a separate unit that circulates the air about 12 times per day, per guest. The CO2 sensors when the door opens creates a signal to the damper that says circulate the air. Moreover, the use of sanitation materials is used in every aspect of the salon business. From using products that sanitize like Marvicide or Barbicide, Clipperease, which disinfects tools, to the organic products like Renown #11 which disinfects all surfaces. The Cosmo license requires 1200 hours of schooling, of which about 50% is all about sanitation. Many other licenses do not even touch that level of study in terms of sanitation. Our technicians need to be able to call on that education, prove they can handle it, and lead that charge.
Pasco	General	The technology in most POS systems is made for two-way communication to keep guest safe. On average our technicians probably wash their hands about 15-20 times per day, and the when having people return to the workplace/ offices if it's a large company where your sitting in a office with cubicles lined up side by side in a big room and everyone is in top of each other that company should contain the area better or continue to allow people to work from home. People can be testing on Tuesday morning and test negatively and then that evening go to Wal-Mart or running to Lowes and then become positive by Saturday. So testing yes is important but not a safety net. My husband works in st. Pete for a large company and I have MS and a compromised immune system so I don't want him bringing anything how to me. so that's another issue spouse's and family member that can put those at high risk in danger returning to the office around alot of people. Yes you can wear and mask and do all those things but the risk is there rather then being safer at home when you can still get the work done at home.
Brevard	Retail	Don't do it. It will put an additional strain on limited resources. Use resources to continue to fix unemployment and testing and healthcare.
Miami-Dade	General	I think we should keep the stay at home order in place until mid June and continue the social distance for now

AMERICAN OVERSIGHT

Hillsborough	Recreation	Have the bars open by Memorial Day weekend and test it out by having them at 50% capacity by mid May could be “no dancing” just standing. The Florida night life plays a big role in revamping the economy and also citizens of Florida have been cramped up in their homes it will be nice for them to be able to step out at night to a bar to clear their minds.
Palm Beach	Professional Services	Please allow businesses to open. I’m a hairdresser that needs to earn a living. I’ve applied for unemployment 6 weeks ago and have received 0! I want and need to get back to work. If other people don’t want to leave their house that’s their choice, they can stay home. Please allow us to go back to living in a free country. People are getting more depressed with each passing day of this lockdown. At this point, the cure is becoming worse than the virus.
Sarasota	Healthcare	To: Gov Ron Desantis, Before even considering opening: 1.The infection rates need to be considered along with the death rates. 2. Before anything is reopened, the curve needs to keep going down daily until it goes to 0 rates of infection and death over a period of at least a 1 month period minimum. This so far has not happened. We are not even close to this happening, as Florida's numbers have been not been going down day to day, and death rates have been increasing. Example: April 2, 2020 had 1,300 new cases and as of April 23, 2030 also had 1,300 cases! Very bad lack of improvement!! 3.At this point things should be opened very slowly and with much caution. People's lives and their health needs to be the number one priority. Not the economy, because when people's health is number one, the economy's improvement will come along, on its own. 4. If the people do not think it is safe to go outside or to go to a business, it doesn't matter at this point whether all the businesses are open or closed, because they will not go there due to safety concerns. This is only common sense. 5. Also there has not been very much testing as only around 1% of the people have been tested so far. The tests overall so far have not been accurate and now, it has been proven that antibodies tests shows that people who have antibodies are not protected. (see article below.) (Reuters) - The World Health Organization (WHO) said on Saturday that there was currently “no evidence” that people who have recovered from COVID-19 and have antibodies are protected from a second corona virus infection. So this is NOT a game changer. The practice could actually increase the risks of continued spread as

AMERICAN OVERSIGHT

Lee	Professional Services	I am a licensed Hair Stylist here in southwest Florida. Although I am anxious to return to the salon, I'm more concerned with doing it safely. I don't feel it would be wise that salons and spas should be in the first phases of opening. There's no way we can properly maintain a safe distance from our clients. We spend any where from 1 to sometimes 4 plus hours working on our clients in close contact to where we can literally feel them breathe on us. I know in other states temperature checks are done at the door, but I'm not sure that's enough to indicate whether someone is sick or contagious. Other states have also recommended face masks and face shields, both items which are scarce to find these days. I feel if salons opened in a later phase it gives us more time to prepare and understand how this virus will move with more lenient restrictions.
Bay	General	OPEN OPEN OPEN We miss going to Church !!!!!! And wok
Highlands	General	I I am very eager to see the economy open back up but at the same time we still have a number of people who are still passing around the coronavirus and until this is under control I feel that the economy should stay on lockdown In our community half of the people are retirement age and if we start going back out and entering into the community all of these older people are at risk and it's not fair to them so no at this point it should not be opened up until we get concrete evidence that all this is under control and there is a cure so that no more of the elderly people have to die when it's not their fault
Escambia	Recreation	Please make gyms and fitness centers part of Phase 1 re-opening. Having the ability to stay active physically seems a top priority in staying healthy and keeping people immune. Gyms in my view can easily maintain social distancing and can enforce things like not training or working out in groups. And most gyms have maintenance people as well as spray bottles and such to keep equipment wiped off after use.

AMERICAN OVERSIGHT

Martin	General	Communication is absolutely critical at this point. Thanks to social media, people now consider themselves experts on all things related to public health, regardless of whether or not they ever gave it a thought prior to two months ago. Two dichotomous "camps" have developed, one which seems to think staying "closed" until the virus is "gone" is the only option, the other which has bought into the idea that this has all been an overblown, no-big-deal "hoax" that has crashed our economy, made everyone's life miserable, and taken away our constitutional rights. They are both wrong, but it is crucial that our leaders attempt to understand where each camp is coming from and what fuels their fear and anger. The original projections of what could happen in Florida were NOT wrong or "false"- they were simply projections based on the best available information at the time. The drastic measures that were taken were necessary to "flatten the curve" and prevent overwhelming our healthcare resources, NOT to keep anyone from ever getting sick with COVID-19. Now that it appears the curve is flattening, the drastic measures are probably not necessary for much longer. However, this virus will be with us forever, it will be endemic in our population and will continue to be a threat until either herd immunity develops or there is a vaccine. We cannot return to what we thought was "normal" until we can prevent infection from this virus. Continued social distancing, washing hands and surfaces, and wearing masks will be necessary in a "new normal" that allows businesses and other community services to re-open. People at high risk for complications and death will need to continue to stay home as much as possible and take care to protect themselves if they must go out. I thought the press briefing today (4/25) was effective in getting these ideas across. Clear consistent communication that addresses the fears of many and the anger of others will be a key factor in successfully re-opening Florida. Good luck!
Seminole	General	Would like to know why the beaches are being open but not the State Forest Division areas are not for fishing, walking , etc . Talking about more so the Econ River areas in Seminole County . There are hundreds of people on the beaches . Some with close contact . At the Econ areas it was way less people using it as the beaches before the virus . And also it very rare you saw more than two people in a group unless a special event which was rare. And hardly any contact . If there is any it is mostly how are you doing . Did you catch any fish, where do the fla trail lead to, path to the river ,what a nice day it is to be around nature, etc . Hardly any close contact it being a very big and open wooded area . Thank you.
Lake	General	PLEASE REOPEN BUSINESSES.
Palm Beach	General	Slowly open up Florida. People need to start working not only for money put for a purpose. Open beaches parks and boat ramps. The virus isn't as prevelant here in Florida. People are spread out here.

AMERICAN OVERSIGHT

Palm Beach	Recreation	My husband and I live in Leisureville in Boynton Beach, an over 55 community. We have a golf course that allows only walking and it is closed. My husband used to go every day for exercise and it is very possible to practice social distancing. We have three community pools that are closed too. I use to go every day to water aerobics and we were at least 6 feet apart. We are both over 65 and healthy and would like to remain that way! Another thing is why can't the public libraries be opened to order on line and pick up. Most of us do this anyway, that way there is no contact with anyone I am getting to the mental state that I might as well sleep all day as there is not much more housework I can do and the social interaction that seniors and for that matter everyone needs is gone. Can't even get a book to read unless we spend our whole stimulas check on Amazon and buy books!!! PLEASE open these things up for our physical and mental health Thanks and I did vote for you
Broward	Recreation	Hi, I would like to see summer camps and activities open up for kids. My suggestion would be a 50 kid capacity, temperature checks at the door prior to entering camp.
Broward	Professional Services	I am a hair stylist. We NEED to open to be able to survive. We are ready to open as soon as possible with precautions (phase 1) Less than 10 people, hand washing,station and chair sanitizing after ever client, both stylists and clients wearing masks, and working in shifts to give more space, etc. Please give us the choice to go to work and be as careful as possible.
Hillsborough	Healthcare	I think you are listening too much and putting too much emphasis on what the doctors around you are telling you. It's understandable that their concerns are myopic but as governor you need to care about the health and well-being of all your constituents not just the one to have a virus or are susceptible to getting the virus. There's got to be a balance. I have friends and family members Who have lost jobs and are distraught, anxious and possibly even suicidal for one of them. Job loss and hopelessness leads to even more health problems in the long run than the virus will. And poverty also is detrimental to one's health. If you wait much longer to open thanks up it will be too late for hundreds of thousands if not millions of people. Their jobs will not come back. Especially in the food business. It will take years maybe even a decade before restaurants and hotels are functioning the way they used to. Meanwhile those people who work in those industries are left behind to suffer through bankruptcy at homelessness and health problems. I listen to as many of the press conferences as I can and I heard governor DeSantis say just this morning that he doesn't think that Floridians will complain too much about not opening up in about being overly cautious. He doesn't think the protests will develop into much. I think he needs to get out more because I disagree wholeheartedly with that sentiment. Please listen With equal open mindedness to all your advisers. Not just your health advisers. Trust Floridians to do the right thing. Thank you

AMERICAN OVERSIGHT

Miami-Dade	General	I believe we will get a severe second wave of COVD-19 and therefore, I think we should limit what we open to our residents. Parks are necessary, but continue social distancing through the month of May and re-open when the curve is further down and we have less cases being reported daily. Until then, continue quarantine/Social distancing.
Palm Beach	Food	Please do not open restaurants to full service capacity yet. The industry is not ready to grapple with the changes that will be needed. The interior of restaurants are designed to pack as many people into a small space as possible, we don't need people mingling in this environment. Quarters are even tighter in kitchen areas. Adding servers, bussers, and dishwashers to these areas will only cause problems. We can wait this storm out, we must wait this storm out.
Palm Beach	Recreation	As a diving business owner and instructor my families income is dependent on beach and marina access and usage. Our busy season is between January and April with March and April being the peak of our season. Personally 75% of my annual income is made during these two months. If beaches were opened, they will not be crowded like some of the media photos of springbreakers in the Tampa bay area. In Palm Beach County specifically, and specifically in the summer time here, it is very easy to have enough social distancing space between people. The beaches should be opened immediately for revenue, for family recreation, for some sanity for citizens who are out of work.
Marion	General	Florida needs to completely reopen. The models we have been sold as to how bad it would be were off by a country mile. Open all businesses now so there are business to open. The at risk and vulnerable can be still addressed but this whole charade borders on complete lunacy. The Florida COVID statistics compared to our states total population is so prohibitively low that it belies any reasoning for the shutdown to continue and harm our businesses to a point that recovery will be all but impossible
Volusia	Healthcare	Allow elective surgeries. Re-open hair and nail salons, stores and malls with continued social distancing ad PPE.
Brevard	General	I hope that any decision of loosen restrictions will be done in a thoughtful, logical way, with the health of Floridians, especially the most vulnerable among us, as the top priority, and with the advice of qualified medical experts as the most important input. Opening up the state in a willy-nilly manner will end up causing a greater number of illnesses and deaths and an even longer period of economic distress.

AMERICAN OVERSIGHT

Palm Beach	Administrative	Opening the state at this stage is absolutely unconscionable and the height of irresponsibility. The government exists, according to the Constitution, to work in the interests of the people. The avarice and greed behind this decision reflects none of those interests. Instead of worrying what large corporations and deranged despots with agendas want, who give this country nothing but seem to take everything and try to run it by the most unethical and unconstitutional means, you should be looking to protect the working people who really make the economy and who's efforts are what keep this country afloat, from this plague. This move has to be the greatest bit of idiocy to come out of our state, and Florida has a history of cornering the market on extraordinary idiocy. Lives are not are not up for sacrifice on the altar of greed. Any life lost from this point on is blood on your hands. Do not think for a minute it is otherwise.
Brevard	Education	It is important to get schools back in session...but only if we can keep kids, teachers and families safe. I am worried that our government is only looking at the risk to kids, not realizing that we have many teachers and staff who are also impacted by the return to school and that many kids may stay healthy but carry the virus home to families that are more susceptible. If you have every hung out with kids, you know that social distancing isn't feasible in a school setting. We need to look at how to safely return, how to resume sports, band, other large group activities, and how to allow our kids to be kids. Are we considering a late start to the school year next year to allow more time to control the spread?
Hillsborough	General	Re-open FL please.
Pasco	Food	As a way to "dip a toe in the water", so to speak, a good first step with restaurants re-opening would be to allow those with outdoor seating to open initially. Space tables the recommended distance apart consistent with social distancing rules.
Sarasota	Finance	REOPEN
Seminole	General	If you relax the stay at home guidelines too soon due to economics, the virus could resurge. We would be back to square one. What good is your economic status if you're dead ? It's kind of like going on a weight watcher program and quitting when you're 5 lbs. from your goal. Give it another month (May) , keep testing, keep accurate recording of new cases, deaths, etc. and then revisit the possibility of easing restrictions. There is good in everything. I see more families riding bikes together, people walking more, people walking dogs more and in general, more exercise outside. Children outside playing in their yards. This is how I grew up. Not gaming , watching tv, or on social media 24/7. To me, moving too quickly will come back to haunt us all. Try another 30 days and look at your stats then for re-evaluation.
Lake	Government	Please don't lift the stay at home order unless you're prepared to lift for the entire state. If you lift in certain areas and not others, those that still have one in place will travel to the areas that don't. If that happens it will cause areas with low numbers to increase.
Miami-Dade	General	don't reopen it until we have adequate testing
Lake	Tourism	Please reopen. Tourism is suffering greatly.

AMERICAN OVERSIGHT

Seminole	General	Hello, I would prefer to not have the stay at home order extended. With so few cases in our county and residents seeming to do a very good job with social distancing and wearing protective equipment it seems unnecessary and will continue to further harm our economy and small businesses. I would love to see a phased rollout allowing some semblance of normalcy for our families. While safety is a certainly a key consideration, further and more significant damage to the economy will cause more longer lasting effects. Thank you, Audrey Posocco
Lee	General	Without adequate testing in place opening business as usual is premature and is going to result in a rapid rise in infections, permanent and long term physical health problems and death. The low rise in the number of infected that Lee Co is currently seeing will come to and end. It will also unnecessarily expose healthcare workers who have to treat and take care of infected patients. My wife is one of those healthcare professionals.
Sarasota	General	Unemployment system needs to be fixed. More testing needs to be available and the focus should be on that. The economy will hurt more if we have a second wave of this by opening non essential businesses to soon.
Palm Beach	Information	I do not think Florida should open now. We have not reached our peak. Opening too soon would bri g increased cases of Covid-19.
Palm Beach	General	Even though I'm just a Lyft driver and I take my chances out there to get people to doctors grocery stores and to work I feel that you trying to open this place up to quick people still having issues out and how do you know that the same places that you are trying to open for people to go to haven't contracted this already like we just heard a Wawa had to close because they had a worker in there with the virus. I feel when you had the chance to quarantine this whole state that's the time you should have done it and stop this thing from spreading . People are still scared but you are the governor so do your thing
Broward	General	Good Afternoon. I begging you not to open the state too fast. My daughter is 10 years old and has asthma! I'm scared! I also am autoimmune and worry. My family is the most important! I'm thankful schools are closed. Please think about your children and family and do what's best for everyone. Please don't open yet!!!
Broward	Retail	Stores should be open with everyone wearing masks. Restaurant servers should wear masks and gloves. Restaurant capacity cut in half. Continue with social distancing as much as possible. Open Orthodontist and dental offices. No mass concerts or groups larger than 50.
Orange	Healthcare	Please make smart decisions about when to re-open, driven by scientific recommendations and advice! We've come this far, let's not undermine all our sacrifices by re-opening too early and losing everything we gained!!!

AMERICAN OVERSIGHT

Miami-Dade	General	Dear Task Force to Re-Open Florida, Thank you for accepting comments. Residents in Miami-Dade are very active and like to exercise and be outdoors. In light of all state park closures and beach closures, people tend to congregate in very few limited outdoor areas depending on the the neighborhood they are in. This results in crowded outdoor spaces with numerous people not wearing masks and jogging, biking, etc. close to each other. I believe that reopening big outdoor spaces such as public parks and beaches would be a good resolution to this crowding effect. Those public spaces can be reopened subject to certain restrictions (i.e., limiting the number of people allowed in at any specific time, limiting the areas or activities open in such spaces, requiring social distancing and the wearing of masks or other protective gear, etc.). Thank you for your consideration.
Orange	Tourism	Re-open the state of Florida. Let all businesses and theme parks reopen. Let the public decide whether they want to go out or not not the government. Give people the choice to go out and give small businesses and theme parks the choice to open. Please give the people the power to make their own decisions if they are not comfortable going to work the employers should let them work from home or not work at all. Please let us make a decision on our own lives thank you
Broward	General	It's difficult to understand why we remain so tightly shut down when everything I read says how well Florida is doing compared to other places. We all can filter through the same checkout line and touch the same POS system to pay at Publix, I see people waiting in lines at food banks. But I can't go to a restaurant, or for a walk on the beach. It adds to confusion when we see our hospitals are nearly empty, and laying off healthcare workers. Explain to us and help us take precaution, make sure everyone who needs or wants to stay home can, but please open Florida for business.
Pinellas	Information	I say it's time to open Florida - give us the choice. I work for St. Petersburg College and I'm seeing first hand how this is negatively affecting our students. Many of our students have part-time jobs in the restaurant industry so no longer have these jobs. There will be much more long term damage to our economy, the mental health implications, suicides, crime, alcolholism - all negative! There is no reason that all the beaches continue to be closed - people are aware of the social distancing. There's so many businesses that will not come back after this! Give us the choice, we're adults. I feel that my rights are being trampled on with so many of the local authorities exercising way too much power. Open up - give us the choice!!

AMERICAN OVERSIGHT

Palm Beach	Government	I am writing to express my support to reopen Florida immediately. We locked down so that we would not overwhelm our hospitals. Our hospitals are not overwhelmed and have stared to furlough their staff (Jupiter Medical Center). In addition, the data shows that this virus is not deadly in those that are healthy. The healthy need to go back to work now. The shutdown will cause more deaths than the virus. According to a study done in the 1970s, with every 1% increase in unemployment, 56k people will die. I do not understand how you can look at the actual data and think that we are saving more lives by continuing to keep our businesses closed? The virus is out there and it is still being transmitted and will still be there no matter when we open up. Instead of allowing the virus to run its course, we are dragging it out and doing more damage. Allow people the freedom to choose to go back to work. Lastly, Where is this stimulus money coming from? Printing more and more makes matters worse. Stop the tyranny and get people back to work.
Duval Nassau	General Recreation	Time to get back to work. Smartly and safely, but now I believe Gov DeSantis has been doing a good job under the circumstances. I would favor a a gradual relaxing of the stay at home and business opengings. Start with those that are likely to not attract large crowds and see how things work. Steady progress would be much better than a rebound in cases that will force us to slam everything down again. Beachs should also be gradual and coordinated. I leave on Amelia Islan in Nassau County. We need state leadership in coordinating the state parks, the county beachs and the city beaches. Press forward with continued testing so we have a better idea of where we stand - you can't manage what you dont measure. Thank you. Doug Roselle
Broward	Construction	As commercial construction and remodeling continues, residential (condo) remodeling has been haulted. Many of us are waiting to get painting done, carpet installed, blinds installed, etc but can't. Condo HOAs are terrified of allowing contractors into buildings. This uneven shutdown of residential remodeling and the tradesmen who supply the work, each day, is an economic hardship. Please specifically allow condo residential remodeling to start ASAP.

AMERICAN OVERSIGHT

Orange	Professional Services	We as a state and county are not ready to reopen. We are only at the beginning of the plateau. Opening up now would put us at square one all over again over the next month. Some places that have few employees that can safely social distance or work from home is one thing. In my Industry as a Hairstylist, there is zero possible way to safely social distance while working. Our clients are within 1 foot of us for anywhere between 1 and 4 hours at a time with people before and after them. Also. Until the APPROPRIATE masks, cleaning supplies, and PPE are readily available, there is NO way we can keep our spaces safe and healthy for our clients or ourselves. There is no way possible we can be even considered for phase 1 or maybe even 2. Hair is a luxury service not an essential service. Hair grows on average 1/2" per month. It have only been 4 weeks. IT IS NOT WORTH THE RISK, right now ,FOR THE SERVICE PROVIDER NOR THE CONSUMER. Thank you for listening and considering my comments. I can tell you that if you open too soo, my salon will not be opening right now. It is our job and duty to put the health and safety of ourselves, our families, our clients and their families above the dollar and physical appearance. If we open up too soon, and the infection rate rises too quickly, the healthcare system will be in the same position and people wont be able to work anyways. Let's do this safely and methodically! PLEASE
Pinellas	Government	Open the state economy back up NOW. Stop this non-sense or come clean with the actual threat. This has gone on far to long. Was scolded at Walmart speaking to a friend that was less than 6ft from me. I am a grown person and able to decide when and how close I want to get to someone. This is just stupid heaped on stupid....maybe people should start injecting themselves with disinfectant.
Collier	General	I do not believe any non-essential businesses or recreational areas should be re-opened until thorough testing has been done in the area and contact tracing is available. In my opinion this is the only way that things can be re-opened safely. Many people (including myself) in this area are older and re-opening too early would be endangering our lives unnecessarily. Lives should be more important than the economy!!!
Palm Beach	Professional Services	I appreciate you all reaching out to the public; however I strongly believe these types of decisions should be based on scientific data that is sourced from the professional health scientists. The decisions should be primarily for the HEALTH and SAFETY of our community.
Manatee	General	Very slowly reopen May 1 ONLY if the stats support it. Meaning allowing stores to reopen but only allow X number of people per sqft, masks , hand sanitizing stations, etc. Theme parks not until June and Florida residents only limiting crowds potentially to people who already have something reserved.
Brevard	Food	I feel it is to early to open florida to many people from other states will come here and we will start the spread over again. And we don't have enough testing sites and we aren't testing enough people. And the numbers keep going up each day. Iam a restaurant server and I feel like ours to early to reopen

AMERICAN OVERSIGHT

Escambia	Tourism	Tourism makes up a large part of our economy. It is our “life blood” of our economy. We need to stop living in fear and get back to work. Small businesses are suffering and we have the 2nd most unemployment claims in the nation. If not now, when? We can’t stay inside forever. We didn’t stop traveling when 9/11 happened. We can’t stop living our lives out of fear.
Orange	General	My husband owns a construction company based in Orlando. In the past month, his business has declined by 50%, as he is directly tied to the new home market. He was fortunate enough to secure a PPP loan to keep his employees, but if the housing market suffers a deep decline, he will be forced to layoff once the PPP runs out. We survived the Great Recession & he has made some adjustments in how he runs his business because of it, but no amount of good decision making will keep the lights on if the lockdown persists. We also have several friends who are business owners that have not been as fortunate. Some are facing imminent disaster if they aren't allowed to open up & do it quickly. Their life savings, insurance benefits, lives of their employees, and even mental health are at immediate risk. On top of that, we are also parents of a high school senior. He has been stripped of so many opportunities that he has been looking forward to for years. Please end the lockdown so that they have a chance to gather, even if it's in small groups for a time. Their age group is at very low risk & they thrive on interaction with their peers. And as his mom, my heart breaks for the things he can't get back. I was on board with shutting things down for a brief period in order to get a handle on what we were dealing with. I was also not opposed to some restrictions so that we could mitigate the risk of overburdening our hospitals. We now have so much more information than we did & our hospitals are not overrun. It's time to allow businesses to open back up & for people to get back to work and back to some sort of normalcy, while making sure that the most vulnerable are protected as much as we can within the framework of the rights afforded to us as American citizens
Lake	Accommodation	Reopen some businesses- keeping social distancing
Brevard	Recreation	My husband and I are retired senior citizens. My husband is disabled and has some mobility issues that make walking for more than 100 feet or so extremely painful if not impossible. Our exercise was going to the beach to sit in the sunshine and fresh air or to a park for a picnic. We are currently unable to do that with public parking at beaches closed. We can’t park somewhere else and carry chairs, etc. Please reopen all beach and recreation access and public parking and parks so we old folks can get out safely, avoiding close contact with others for our physical and mental health.
Miami-Dade	Recreation	DO NOT OPEN !!! HEALTH OVER ECONOMY!!!
Orange	General	Please, please, please start reopening Florida. So many residents, including my husband, desperately need to go back to work. The longer we stay shut down, the worse it is going to be financially for our families and for Florida’s economy. We cannot possibly stay closed until this virus is eradicated or until there is a vaccine, so we need some middle ground. Now is the time to start re-opening FL.

AMERICAN OVERSIGHT

Broward	Management	Hello, It is it extremely important to get people back to work, but not at the risk of the general public's health. I am currently working as an essential worker and I am on the front lines everyday. Luckily myself and my team have been safe and are taking all of the precautionary steps to ensure safety, but expecting the general population to do the same is unrealistic. Those who are pushing to reopen are likely those who have the means to stay in a "quarantine-like" state even after the state reopens. They will not have to go to grocery stores themselves, they have someone deliver them etc... they will use the general population as a clutch resulting in deaths across the state. Please rethink reopening the state. Open when it's safe to.
Osceola	Tourism	Tourism is one of the biggest industries in Florida, without question. I think we can all agree on that. There are thousands of people in unemployment right now and most have not recurved a penny, including me. I still haven't even received my stimulus check yet, so I'm trying to balance my expenses as best as I can knowing it's possible I won't be receiving any income for the foreseeable future. I'm stressed out and I'm frankly a bit scared, but I'm trying to keep my head above water. Economically this is tough. That being said, the health of our community is far more important to me than my economic woes. This virus is serious, and I'm afraid as long as people continue to ignore safety guidelines we will be stuck far longer than anyone could've anticipated and definitely longer than anyone wants to. At least with the tourism business goes, I think we can't even think about starting phased openings until June, and that is IF people can do what they're supposed to do and adhere to safety regulations. No, I don't know when I'll be able to afford to get groceries again so I'm trying to stretch my food as far as I can. Yes, I still need to make sure I can pay my car loan and have a roof over my head. No, I don't know how long I'll be able to hold out. That being said, I can't wait for the day I get to return to work, but I'll WILLING to wait to ensure the safety of everyone around me. The unemployment system in Florida is terribly broken. We need help. It's hard for me to fathom sometimes that I live in one of the richest countries in the world and we can't even take care of our people in crisis who don't have any control or choice over their circumstances. I used to stay up questioning if it was my fault because of my career path, but it's not. I didn't cause a virus. I was able to be financially dependent before all of this struck. We need to do better. Whatever phased openings we're preparing to see into motion, I pray it is set with the SAFETY of all of our residents and guests in mind; not just our wallets. This is coming from someone who is genuinely afraid of her financial situation and is trying to stay calm and do that right thing. Please do the right thing and take care of us. Focus on the distribution of unemployment first, then plan for phased reopenings as time and safety regulations allow. The last thing we need is to open everything up too quickly and end up right back where we started. There has been far too much death as it is.
Osceola	Tourism	Re-OPEN NOW! This is not sustainable and if we do not go back to work VERY soon then the economic deaths long term will be very high. The hospitals are NOT over run. Your shut down has ruined the Orlando economy and the lagging indicators will start really showing you that in a few months. Real Estate , loans , banking rev, theme parks might not come back for 6-12 months or ever in the instance of SeaWorld.

AMERICAN OVERSIGHT

Hillsborough	General	I think that if we exercise caution most areas of business should reopen. For example, the most retail and service establishments can operate same way that Home Depot does where only a certain amount of folks can enter as folks leave. The others stand in shaded line outside waiting outside while maintaining the prescribed social distance. This can also be implemented in restaurants and bar where limits can be placed on number of patrons allowed and more 6 feet distances between tables. We can all be responsible humans by adhering to social distancing while enjoying the outdoors!! We should not need government to keep us on lock down if we act like responsible residents!
Lee	General	I believe it would be reckless to reopen too soon. I see a lot of people helping those struggling with food and needed items. However, we need solid evidence there will not be a major resurgence of the virus. My daughter and her fiancé nurses here and although we are not overwhelmed, we could quickly become that way. Please wait just a bit longer to reopen. Please know as a teacher we need testing of all students to secure return in August. Just keep it light on reopen, my hair can wait. My 80 year old dad can wait. Thank you
Hillsborough	Government	My husband was furloughed from his job in Tampa and filed a claim on March 22. It has been stuck in “pending” ever since. We have called every single day for nearly 5 weeks,, all day long, and in the timeframe, I have only spoken to one agent who said his system was down and he was unable to log in to see claims. It’s nauseating to keep hearing the same “phone lines are busy” message over and over again, or to just get disconnected. I have also emailed and faxed, with no response. On Thursday I mailed a USPS Priority envelope full of all of the unemployment documents relating to my husband’s claim, I’m hoping someone will just open the envelope, read the letter, and offer assistance that way. If DEO was seeing claimants in person, it would be quicker for us to drive to Tallahassee to try to get this resolved. I have contacted the Governor, Senators, Representatives, Jon Satter, anyone I can find contact information for. Because my husband’s claim is stuck in “pending”, he hasn’t received a dime for his state benefits, therefore, he hasn’t received the $600 from the CARES Act federal benefit. It’s sickening and stressful. An entire month without benefits. While I’m happy someone is getting paid, it’s very disheartening to hear that April claimants are receiving their state and federal money before the March claimants. And there’s absolutely no way to reach DEO to resolve it. Per the Governor’s order- claiming weeks, work searches and CareerSource contact is suspended due to COVID-19, but the Connect system still asks for all of these things. This has caused so much confusion for claimants. My husband still claims his weeks, even though it’s nearly impossible to log into the Connect system and stay logged in without error messages. My husband’s claim is showing “failure to meet work search requirements”! Because, he’s furloughed, and will have a job to go back to when this emergency is over, he’s not looking for another job, and he certainly doesn’t want to lie and commit fraud by saying he is, just to get his claim to move through an antiquated system. All of the work search and claiming weeks sections should have been removed from the Connect system as soon as the Governor’s order went into effect. There has to be a way for the DEO agents to go into the system and release the March claims from pending. They know they’re stuck in the system and need to be resolved before the April

AMERICAN OVERSIGHT

Miami-Dade	General	I see more and more people going out on the streets. They are not abiding by the current rules in place any more. They can't as they are loosing their minds and everything they have worked so hard for all of their lives. Yes we need to stay ahead of the curve for the virus but also the curve for people doing what they need to do to survive. I feel you need to do something like this. Provide PPE to the People as well as regular disinfectants and wipes. This way they can help themselves fight the virus. Come up with a weekly opening plan State wide that all need to obey, maybe one thing at a time to "wean" us back into life. One week parks, another week beaches, another week restaurants etc. all following the guidelines for safety. Make it appoint that schools will reopen in the fall. Masks should be required in class and the schools should disinfect (spray) everything daily. We the people of this great state will make it work if you give us a chance. If you wont, based on what I see on the roads the people will do it anyway. Then e will see a light at the end of the tunnel.
Palm Beach	General	Please consider opening beaches, parks, golf courses, boat docks, etc immediately. The sun is healing and very necessary to fight the virus. Asking public building which open to require face masks would be awesome. No one knows if they have the virus on them. To prevent the spread, masks are a necessary evil. Let's get back to semi normal. Restaurants having tables 6 to 10 feet apart is a start. Customers should be wearing masks when getting up and moving around though. The heat kills the virus so we need more outdoor activity available for the people.
Lake Seminole	General Professional Services	Reopen our economy As a furloughed hairdresser my co -workers and I have all discussed the idea of continuing to wear masks to work , after re-opening and also think clients must come to salons wearing a mask or no services can be performed due to lack of social distancing required as in other situations. Where I work we were already sanitizing AND disinfecting all areas in our stations before AND after client services, so doing so after reopening will not be an issue, having said that, I also think that reopening too soon would put all of us in the beauty, massage, tattoo, and barber industry at even more of a risk of getting infected, and we all know it only takes one person to infect us and we spread it to our co-workers and all because one person was irresponsible. Thank you
Okaloosa	Finance	I do believe we should be opening up slowly. I think gyms and bowling allies are not a good place to start since they were germ infested before this virus started. I think all department stores and restaurants should start opening back up. I think people are becoming more afraid of losing everything other than their health to this virus. Thank you.

AMERICAN OVERSIGHT

Palm Beach	Professional Services	We need to open up Florida for health reasons! I need to go to my doctor for a blood test and the offices are closed. I need to go to the dentist but he is closed. I need to swim laps in our condo swimming pool to help with my blood pressure problem but it's closed. Myself and everyone I know has gained five to ten pounds. The only place we can walk near our home is on a busy street. Day after day waking up to being sequestered at home is affecting my mental health. Concerns about our two small businesses are keeping us up at night. We face shortages at our grocery store so we cannot get hand sanitizer or wipes. This situation is not sustainable. We are adults, we know how to wear a mask, wash our hands and distance ourselves. We voted for you Gov DeSantis. Open up Florida now!
Marion	Education	I am a third-grade teacher in Marion County. I am working diligently to create a "distance learning" environment for my students and their families. As of April 1, 2020 when Marion County officially began "distance learning", I have established a schedule for my students, their families, as well as my own family (I have two children who are sophomores in high school). My concern is that if the state reopens too soon (May 4, 2020), then Marion County will return to the "hybrid" model of working, which allowed teachers to work from either home or at their school building. I would personally prefer continuing (continuity plan)working from home until the Marion County Schools proposed last day of the school year (June 1). I believe that once it has been proven through data-driven decisions that it is safe to return to a sense of "normalcy" so to speak, then teachers could be able to return to their classrooms to end the school year by removing posters and putting the manipulatives and any other teacher/student materials away to prepare for the next school year (2020-2021). Perhaps then the schools can be completely cleaned/disinfected and closed for the summer to prepare for "possible" school openings in August. I would also propose thinking about delaying the beginning of the 2020-2021 school year if data has not proven that reopening our economy has been successful. I say this because I am concerned that Marion County is still having the number of positive cases of Covid-19 continue to increase. Thank you for reading my comments, and I am truly grateful for all of those individuals involved in making these most difficult decisions in these most unprecedented times.
Orange	General	I will relish voting against every elected official who puts money over human life during this crisis. If you're worried about the economy leaving people behind, concentrate on fixing the unemployment system first. I implore governor DeSantis to put politics aside and listen to qualified experts rather than following the crackpot whims of our nimrod president. Also why has the governor been dodging meetings with Nikki Fried? This is a bi-partisan matter and frankly the GOP is not doing a great job so far.

AMERICAN OVERSIGHT

Leon	General	Reopening should be slow and deliberate and be at the local level. Businesses should be required to disenfect their establishments frequently. Masks should be required of all patrons and social distancing enforced. Businesses should have to submit their plan for reopening and it should be reviewed by independent and qualified review teams established at local level. Failure to comply would require the business to close again. These procedures will be maintained until infection rate is down to a safe level as determined by medical professionals.
Broward	General	Make Sure Businesses can Buy sanitize products and the products are available and the rules are followed
Brevard	General	Please do not open up Florida yet. It will put all of the residents here in harm due to the movement from county to county and also from the tourist driving and flying in. This virus is not in anyway under control yet. It is way to soon to even consider life as normal.
Brevard	General	Do not reopen Florida until our level of infections goes down for at least 2 weeks. Then, do not open up the beauty shop, barber shops and any other close personal business until infections slow down even more, and there is adequite testing. Require masks in public, and limit the number of people at one time in grocery stores. Please protect Floridians.
Collier	Healthcare	Open up Florida NOW. Only those at risk need to stay in lock down- the rest of us can take reasonable precautions.
Hillsborough	General	No need to open up the state until there is a hugeee decline in the number of patients with symptoms or Covid-19. Once we are all back to normal, everyone will begin to get sick. Or if they do open up, make sure there is safety cautions, more sanitary spots in each public place, and a maximum capacity of people.
Alachua	Healthcare	I am a Physical Therapist Assistant at a hospital. While I am officially PRN I work a regular schedule of 3-4 days a week. In the last 5 weeks I have worked 1 shift which had to be cut short because not enough patients in the hospital and no elective orthopedic surgeries. Our hospital sits very empty and many employees are out of work. I think resuming elective surgery is an important first step in reopening the economy. While deemed “elective” these surgeries can extended or improve quality of life.

AMERICAN OVERSIGHT

Miami-Dade	General	Allow small business to open with the help of an app provider by Miamidade county so they can upload their own products and established delivery options upon themselves. Business services such hair salon and similar, install at the door some sort of disinfection booth, with small sprinklers so their clothes and shoes are clean to enter the business. If they can make happen in places like Argentina, why not here ?? Open beachs and parks, and establish enforce control regarding social distancing. We have enormous state parks and beaches, and its important to people to go out and boosted their immunology system at they very best, so in case of the virus, people have the tools available and ready to fight it. Instead of staying all day at home watching the news increasing their stress level. Identify the worst infection areas and make a real time map with all the new cases and such, and make and extra effort on thats area, like disinfect the street, twice a day, bus stop, gathering places. And put extra man power to show the community that you are on top of the problem and doing everything you can to solve it.
Leon	Healthcare	Please do not reopen until July. The statistics that show a decrease in cases is not substantial enough to reopen the government safely. We need a consistent decrease in cases in ALL Florida counties for 4 weeks straight, and this is a suggestion by healthcare officials. If you reopen now, you will affect the economy temporarily but not in the long term because the cases will increase again. The florida economy will be affected all year and not just spring and summer. Be wise, not rash. Keep us safe, that is your duty, economy comes second.
Orange	General	Although I understand the economic impact and hardships we are facing due to this pandemic and the subsequent stay at home orders, I support the state reopening once the scientific community is able to come up with at least an effective treatment for those who are affected by COVID19. Until then I would not feel safe being in crowded environments or even going back to the office. Even if the state reopened businesses neither me nor my family would participate, unless, once again, there is an effective treatment available in case we are infected. I believe life is more valuable than anything else and that the massive loss of it would have a greater impact than any loss of business will ever have.

AMERICAN OVERSIGHT

Palm Beach	Education	IAre we a state that values a dollar more than a life?! We should not even be thinking about reopening when there's no treatment or vaccine. What are we opening up for to have another resurgance? I believe that we need to continue social distancing, staying home, and using protective gear, until there's a vaccine., cure, or treatment for this deadly virus! If you open up to soon, who are you opening up to , the morgue, to continue handling dead bodies! I personally am not starved for entertainment and interaction to risk my life! Until there's a vaccine, cure, or treatment for this deadly virus, we can never return to life as we knew it. I think this is our new normal and we should embrace it in order to preserve lives. No one wants to be exposed to such a deadly virus, all in the name of economics and entertainment Economics can improve and entertainment can be regained, but a life lost is final!
Hillsborough	Healthcare	Good morning Govenor, I first want to thank you for everything you have done during this difficult time for our world. You have been level headed and mostly fair. I am sure this is exhausting and stressful. I pray the Lord would be with you in these upcoming weeks. Our family of 5 recently moved to Florida (Hillsborough county) from the north. We are a homeschool family and I am immune compromised. I have battled my whole life with arthritis which leaves me with a severely weakened immune system. All of my life I had to be careful of being around sick people. If someone had a cold I would get pneumonia. With all that said I am writing today to urge you to IMMEDIATELY open Florida back up. Our economy and the future of our children depend on it. We should be quarantining the sick and not the healthy that are able to work. If we keep people cooped up and businesses shut down we are at a much bigger risk. Our own Tampa Mayor is trying to strip away our constitutional rights one meeting at a time. She would love nothing more than to set our state into economic despair. These county officials must be held accountable and stop threatening mandatory curfews and masks. Please Govenor from someone who is at high risk I urge you to make swift actions to get our economy back open and give us our freedoms back. Thank you for your time and God bless you and your family.
Miami-Dade Broward	Food Finance	DONT OPEN YET!!! Hello, Thank you for your service. According to the SBA small business account for 48% of jobs. It appears that the banks may not have been consistent in assisting small businesses in obtaining PPP grants. Will there be any accountability on how the applications were handled?

AMERICAN OVERSIGHT

Hillsborough	Recreation	Can we get the fishing charter boats to open business for recreational fishing
Broward	Professional Services	Florida needs another month to determine reopening. It should open in waves from smaller businesses first to bigger ones including restaurants and social venues. Anything with large crowds. Anything with children should be last over the course of the next six months. Everyone In the state should be tested to see if they have present signs of the virus and to see if they have had the virus in order to return back to work. Companies should offer these testings as well to their employees which should be covered by their health insurance and or state health department. People who have contracted the virus recently should be monitored with a follow to their physician within 30 days of recovery. We still have much work to do and if Florida want to keep safe we must be aggressive in containing and stopping the spread.
Lee	General	You're destroying people's lives. You're forcing people into poverty. You claim you're doing it for their own good. We can see with our eyes this is not a pandemic. The death rate is very low. People die every day in this state and it's not going to stop anytime soon. Unless you're eager for massive civil unrest you better get us back to work. You will be attacked by the media no matter what you do. Open up Now!
Lee	General	Re-Open?? Wrestling is NOT Essential Golf is NOT Essential Disney is NOT Essential Beaches are NOT Essential Parks are NOT Essential If you want to have a New York-sized problem, go ahead and re-open before CoVID19 is gone for good. Otherwise you are playing with the deaths of many, many more Floridians. It will be on YOUR Responsibility and Blame and Conscience. Hope you have good Malpractice Insurance for practicing medicine without a license. STAY AT HOME PERIOD until this is over. Get used to it. Get over it.

AMERICAN OVERSIGHT

Pasco	Healthcare	To who it may concern: Open the State of Florida forthwith! In my opinion all Floridians as well as all Americans have a patriotic duty to suck it up, get past the fear and get back to work for their own good as well as for the common good of our fair State and Country. I lived through the Hong Kong flu in 1968/69 and I can tell you with all certainty that the United States did not shut down, I was in school the whole while. The US, it was estimated had a death toll of over 100,000, over 1,000.000 worldwide. I also remember polio as a very small child and that didn't shut the world down either But then again, people in those days were of substantially more intestinal fortitude than now. If I sound angry, there is a good reason for that: I see a State and Country not to mention tens of millions of lives being decimated by bankruptcy, suicide, increases of drug addiction, increases in domestic violence and for what? The only way the "Wuflu" situation will ever be mitigated according to prominent epidemiologists whose opinions I have read is through "herd immunity": yeah, it's going to like going to the Dentist...cowboy up, get on with it and get it over with it. As I'm over 60 and live the words that I've written here, according to our "betters" like Fauci I'm taking my life in my hands, so be it as I'd rather die a free man with liberty that to live under house arrest for an indeterminate amount of time. Scott Shevey
Brevard	Retail	Please let us open back up! As a small business family we are suffering. We cannot get unemployment as we are a small business. The small business loan initially ran out and we are now attempting the second small business loan. The stimulus check only got us through barely the first month. We have 2 children and 2 adults in our household. We need to start generating money!
Manatee	General	We shut our lives as we know it down based on models and projections. Turns out they were massively wrong and the actual data the actual numbers are coming in no worse than a rough flu season. We had a non-surgical blanket massive overreaction to all this - no it's time for a surgical massive correction to all this. Change the narrative and let people know they have a 99.7% chance of living - just like every year. Or we will destroy the lives of millions for a generation. Be bold, be a leader, be fearless - this is what our country and our state needs right now. Put the most amazing resources as discipline restrictions towards the nursing homes, elderly, at-risk and open EVERYTHING ELSE BACK UP. Send a message and watch how right you will be!

AMERICAN OVERSIGHT

Pinellas	General	Florida needs to start opening back up businesses in a well thought out process. Give credit to Florida Citizens to take care of themselves. We survive on tourism. Govt can't keep giving money away to support peoples lives and businesses. Businesses such as barber shops and salons, as one example, are not going to take chances to harm their customers. Govt should give mandatory requirements on how to maintain proper health conditions and monitor compliance. Maybe something as simple as a "Health Inspection Notice" on the door showing the business is in Covid-19 Health Compliance.
Miami-Dade	General	I believe it is too early to open up . It feels like a complete disregard to the people like myself who have been risking themselves and their families during this pandemic. The cases should be greatly diminished almost completely or at least a vaccine before anything goes back to normal . Please consider waiting a bit more . A second outbreak will bring death in much larger numbers . No economy or paycheck is worth a human life .
Charlotte	Professional Services	As a small business owner of a Salon and Spa I recognize the concern of cross contamination because as professionals in the beauty industry we are trained in sanitation and disinfection just as the medical professionals are. If the state of Florida wanted to keep us closed we would have received unemployment benefits that I so religiously paid with every payroll I ran for my 19 employees that are now out of work and have no income. Do not sign an order for a “30 day” stay at home and make it effective April 3rd and end it on April 30th, you are confusing the masses and you are already behind the 8 ball with the unemployment fiasco. As a business owner that W-2’s my employees and pays their taxes we were already underfunded in Futa and Suta due to businesses 1099 employees and trying to not pay. I know the IRS is aware and trying to audit those businesses but how do you justify to the business that does W2 and still can’t get unemployment income for their employees? Get the salons back to work, we are prepared and are trained to deal with covid19.
Broward	Retail	I believe, and I say this as a registered Dem. Our state did much better than projections. I give DeSantis a lot of credit. To add to that, I believe he should continue keeping things closer and should focus on getting financial support on those affected by the closures rather than opening so soon. Even if businesses open in Miami and Broward, at LEAST half of the population will continue to quarantine or strictly limit their time outside of the home, so opening and not offering assistance, or offering limited assistance won't matter as the amounts of customers would be drastically reduced. Also, opening so soon leaves us wide open for a 2nd peak and a rising of the curve. If we're gung-ho on reopening, let's at least wait 3 weeks to see how other states that are opening fare, and take a realistic look at their numbers rather than saying "it was a success" because only x-hundred people died rather than x-thousand died. My whole family has respiratory issues and my parents are older on top of that so this is all very worrying. I want to believe that you all are actually trying to take care of us.

AMERICAN OVERSIGHT

Seminole	General	I urge you to RE-OPEN our state May 1. People need to get back to work and businesses need to be open. With less than .5% of Florida citizens testing positive with Covid-19, it makes sense to open our state (30,000 positive tests of 21.48 million Floridians). Allow non-essential procedures to begin in hospitals again. Allow church services to resume. Allow non-essential businesses to open so employees can earn a paycheck. Allow gyms to open for their members to exercise. Allow people to go to the beach and visit state parks. Allow restaurant dining rooms to open. GIVE US OUR FREEDOM _ TO WORK AND TO MOVE FREELY. Reopen our state NOW! Allow citizens to make the decision about how to protect their family. Make decisions that support democracy and economic health for our state. Sincerely, Kristi Davis 407-716-3203 kristidavis0427@yahoo.com
Lake	General	Open up now.
Charlotte	Healthcare	Hi. Asking for public opinion regarding reopening FL is a great idea. I'd suggest that everyone wear masks or face coverings when in public. No exceptions. Thank you.
St. Johns	General	Recommend caution when considering when to reopen Florida. By most accounts, this covid-19 virus is virulent. We've already experienced the pain of shutting down the economy, so I would like to see the current restrictions remain in place until 1 June, it would be terrible to open things up, only to have another outbreak, and have to begin over. Please follow the recommendations of qualified epidemiologists.

AMERICAN OVERSIGHT

Lake	Tourism	I'm ready to go back to work however, only when it is safe to do so. I work for a Theme Park and meet people from all over the world. Knowing this virus is highly contagious, concerns me greatly as I cannot bring it home to my husband who has many medical issues. When I am able to return to work and be given the proper PPE, such as the N95 mask and the visor, this would ease those concerns somewhat. But wearing these in 100 degree weather will be very uncomfortable. I work outside however, people are constantly walking by, sneezing & coughing. Our registers are also within a foot of the customer's card reader which will not be feasible for the social distancing guidelines. Our merchandise carts are also not spread far apart enough for the distancing guidelines for Guests to shop safely. And visiting Guests touch everything! There would have to be hand sanitizing stations (always filled) all around the parks and at all registers for each time the employee processes a transaction. When all this first started and we were still open, many of these stations were empty! I would recommend Guests wearing face masks too. This helps us feel that they are protecting themselves as well. Thank you
Charlotte	Food	Open-air farmers markets should reopen immediately, with the recommendation that customers socially distance. Reopen restaurants' and bars' outdoor seating, maintaining 6 feet between tables.
Broward	Transportation	My elderly (61 yr old) mother will have to take the public transit to work once I'm off furlough. That said, I feel that transit buses are a potential cesspool for carrying the virus. In general, people do not respect the social distancing guidelines (I've had to ask many people to please step away from me while standing in check-out lines). On a transit bus, it will be even harder to enforce social distancing. And even with that, buses are basically seal-tight boxes where everyone has to breathe the same circulated air. I'm not sure what can be done, but I ask that someone on the task force please take this into consideration. Many people rely on public transit, and if the buses are not cleaned, if masks are not worn, if social distancing isn't respected while riding, this could be a means for the virus to spread to many vulnerable people. Thank you.
Orange	General	I don't see convincing evidence that Florida should reopen at this time.
Miami-Dade	Education	Do NOT open Florida. For the sake of our families, loved ones and health heroes!!! Please do not open Florida until we have more information. This is about us coming together as a community to get through this. Please!!!!!!
Charlotte	General	Open up ! Lets get back to work. The shut down was only to flatten the curve and not wait for a cure.
Broward	General	Re-open Florida.

AMERICAN OVERSIGHT

Broward	General	While I agree caution is necessary, I would think it's in the public interest as "re-opening" is discussed to consider these facts..... currently testing results in somewhere between 10% and 20% positives. This is significant BECAUSE under nearly all circumstances to date those tested are considered likely to be ill (have symptoms, have been exposed, etc.). Those who are "most likely" healthy are NOT tested because they do NOT have symptoms or have been exposed. Couple this fact with the number the CDC published recently that 97% of those who test positive have "mild symptoms." So as we consider re-opening, let's remember that - on average - of 100 people we think ARE infected, in reality only 20 or less are. And of those, probably 18 or 19 will only have mild, cold-like symptoms.
Brevard	General	Reopen the economy....put the burden on the vulnerable, like me, to self isolate. People who can survive this virus will need to take their chances and get back to work.
Broward	General	Thank you so much for what you have done to keep the people of Florida safe. Please do not reopen the state until our health officials say it is safe to do so,
Manatee	General	Yes reopening is vital to the economy and the virus will have a difficult time as the weather becomes warmer. When we start to flush out the snow birds would be an opportunity for a measured opening starting with essential businesses not the tattoo parlors and similar types of enterprises
Pasco	General	As long as the business can maintain the guide lines like the 6 foot rule, cleaning, and testing the employees I think they should be allowed to reopen regardless of their business. I do think the use of masks should be required for inside of stores. I was just in the Walmart in Zephyrhills and people were not applying the 6 foot rule and only about 50% of the shoppers had on masks. Not good as this area has a lot of elderly people living here. Not sure if anybody has an answer for that.
Brevard	General	I believe our health and safety should come first. Questions like have we hit the worst of it, have we platued, can we test more, will people keep cleanliness and distancing a priority and most important will people stay home if they feel sick to protect others, need to be considered before jumping into a reopening of our state and others. In my opinion people don't often make the best decisions on their own. Personally I'd rather be safe than sorry. Focus on getting the Fl.unemployment site working at full capacity and start slow with businesses that don't draw crowds. Thank you for this forum to express our opinion.
Hillsborough	Retail	Although reopening the state is a risky decision, it is becoming next to impossible to maintain finances and rent obligations for the unemployed and furlough workers such as myself. The stimulus check helped, but it wont be enough. Reopening the economy in Fl would be the only solution for recieving a check, but it also risks a second wave of illness and death. If Fl is reopened then there should be rules and guidelines like mandated face masks in the work force, 6 feet distancing in stores and regular cleaning. If employees need to leave work after a shift for personal reasons, then employers should not force workers to stay.

AMERICAN OVERSIGHT

Palm Beach	General	Please, way too early to reopen. Especially in Southeast counties. Let's wait and see how Georgia and other states do. Definitely please do not open anything that will attract large crowds, i.e., beaches, movies, concerts, etc. I haven't been locked in for all this time to see a major resurgence of this virus. We do not have enough valid info or testing yet. Do the right thing. The economy will recover but dead people won't. Thank you.
Hillsborough	General	Dear Governor DeSantis, Congratulations of the recent birth of your sweet little girl! Thank you for this opportunity to voice my opinion as a resident of Hillsborough County, Florida on re-opening the great State of Florida! The short answer is YES!!! My husband is still employed and working from home. His employer is ok for the moment but did hold a town hall type meeting for all employees and explained that they are anticipating a "pinch" in about a year to a year & a half. That is all due to no gas tax, no tax money for roads or buildings. It's like a trickle down - no tourism equals no money for building projects. The longer we're shutdown the longer for recovery. I had several part-time jobs cleaning houses but the people I was working for didn't feel comfortable with me coming into their homes so we all decided to follow the quarantine rules that were suggested and that dried up my part-time work. As I have been out & have been talking to my neighbors (from a safe distance :) I've learned that several neighbors on my street have been laid off from their jobs. And some have been laid off for the past 5 weeks. They are in the retail industry which has been hit very hard. Also, my sister who lives in another state has been laid off and wants to get back to work. There is risk in everything I do. Since I live in the Tampa Bay area and it's the lightening capital of the world, when I walk out to my mailbox I risk it. If I drive my car, it's a risk. If I ride my bike I risk falling- what I'm getting at is everything is a risk. Reopening the State is a risk that I am ok with. What kind of people have we become? I've never seen so much fear over a virus in my life. You need the risk takers to reopen this state. We are the ones who want to get back to work and not take government handouts! We are the ones willing to help you get this state up and running!
Miami-Dade	General	I know you have many experts on your task force but please listen WE CANNOT OPEN UP!!!!! PEOPLE ARE DYING!!!! WE CANNOT OPEN!!!! PLEASE I BEG DO NOT OPEN
Brevard	General	We should NOT reopen until EVERYONE can be tested everyday.
Lake	General	Open up

AMERICAN OVERSIGHT

Hillsborough	General	Health experts provided a very liberal plan of 3 phases and at a minimum the state of Florida should follow that plan. If you look at the country and follow the success of states who immediately issued stay at home orders until the number of cases went down you can see that it works. Florida's problems have only just begun. We need to monitor the number of cases after increasing testing and IF we reach the other side of the curve for at least 2 weeks we could begin to open slowly. If your team chooses not to follow health experts guidance, this is on YOU, and the number of cases and deaths will easily double. And if that happens I will blame each of you. This is simple factual data. Look at the models produced by Ithe experts and the scientifically proven probabilities of transmitting Covid 19. Look at the data. Do not make irresponsible choices that guarantee that people you know and live will perish.
Alachua	General	Do not be pressured into opening the state until it is safe to do so. We are continuing to see increases in the number of people testing positive. Please follow the science and public health experts advice and not the wishes of the business community.
Hillsborough	General	I think every thing should be opened back up bars,restaurants,schools malls,etc. This is killing our economy and taking us towards a recession the state needs to open back up my construction business has slowed down my wife's going to school to be a physician assistant is now having to do online school putting a burden on her and her job as a bartender is doing nothing for our household. OPEN FLORIDA UP

AMERICAN OVERSIGHT

Lee	Tourism	Ending this pandemic has required, and continues to require, many protective measures. I'd like to focus on one of the biggest and most important measures, which was the closing of vacation accommodations of all types. We all know Florida is a major tourist destination, so blocking millions of people from swamping us from all over the country was an extremely critical move to slow the spread of the virus. I and many others are now living in fear as the date that ban expires is almost here and no leaders are giving any indication of extending it. I live in Lee County. We have the 7th highest number of cases in the whole state. We have over 900 cases and continue to add roughly 100 cases per week over the past few weeks, so we are nowhere near peaking or being safe to start reopening anything, ESPECIALLY vacation rentals. To allow people to start flocking back here would be dangerous and reckless. So I'm pleading for the governor to extend the ban on vacation accommodations of all types. If not, then at the very least, direct individual counties who are bad off like my county to extend the ban locally. In fact, on that note, I think on a whole, it might be best to give some guidelines and parameters for reopening any sort of businesses and let individual counties do what fits their status and situation. Many counties, especially in the north of the state, seem to have very few cases and might be able to start opening some things. But counties like mine need at least another month of all protective measures staying in place. But back to my main point. Keeping masses of people from coming to Florida for non-essential travel was huge in keeping the pandemic from being much worse than it already is. And it would be a huge mistake not to continue that protection, especially for areas like mine. PLEASE extend the vacation accommodation ban.
Hillsborough	General	I've listened to several task force meetings and definitely understand the importance of reopening Florida. However, I think it's vitally important that the right tone is set early. This isn't over. We have not won ANYTHING. We are NOT back to business as usual. And, Coronavirus is something we will be living with for at least the next year. This is the message that should go out to the general public and anyone visiting Florida. Everyone who chooses to go back out in public should act as if they have ALREADY contracted the disease and are trying their hardest to limit the spread. That means going out with a facemask and gloves on at all times, and doing your absolute best to maintain social distance so as not to spread YOUR germs. Everyone should also be made to understand that what we are doing is taking a calculated risk in order to keep people from starving or going homeless. The health professionals should continue to monitor the spread, as well as the hospital capacity, ICU beds, and deaths. Should we again start spiking in those categories and approaching capacity, we must SWIFTLY shut it all back down, no matter the effect. As long as everyone understands this, let's move forward.

AMERICAN OVERSIGHT

Duval	Retail	As a Retailer of a shop in 5 Points, Jacksonville Florida, I have a real time perspective on this situation. My store is about 1000 sq. feet, and I have been in my location 10 years now. I am very disheartened as to how this situation has been handled. I strongly support products, goods and services that are made in the USA. Many of the products I carry in my store are domestic. When looking purely at the facts, the only business which were allowed to remain open, (other than grocery stores and pharmacies) fit into one of these to categories. 1. Stores that carry mostly non USA made goods. (Wal-Mart, Lowes, Home Depot, Target). 2. Or stores that generate large tax revenue for the state. (ie. liquor stores). This is FACT. Another fact is that like many entrepreneurs, I am self employed because I like to work in an environment that I can maintain and control. I know that I can keep my shop clean and sanitized, as I have been doing that for many many years. I also know that I can control the flow of traffic in my store as it is again, what I have been doing for many many years. In the State of Florida, I have the right to work. I the United States of America, I have Constitutional Rights. Both of these rights have in my opinion have been illegally taken from me. Going forward, I would like to immediately be permitted to re open my store and regulate it as I see fit. I can establish my own parameters as to how to do that. I do not need the state, local or federal government to regulate my dress shop. On a broader note, I also feel that the residents of Florida have been harmed by the Safer at Home Order, and that it should be revoked.
Miami-Dade	General	Should not reopen until the medical experts say it is totally safe to do so. As broke as i am i work or Construction Co. located on Lincoln Rd, Miami Beach and i do not feel it is safe yet. I am not going back yet no matter what.
Sumter	Food	I personally think it’s too soon to reopen the state. My job would be in the first phase and I feel like I’ve stayed home to keep myself and other s safe and the thing I want is to go back too soon and get sick after all this time of making sure that I didn’t get it and have to start all over with the quarantine and then getting release papers to go back to work. I feel that as long as we are used to the conditionsnowwhy chance it with opening up too early to have to start all over again.

AMERICAN OVERSIGHT

Manatee	General	1. Testing- needs to be accurate, accessible, free and include asymptomatic cases as workers are younger and often in that category. 2. Contact tracing of those who test + needs to be followed up, train and hire healthy younger , people to get this done, especially those unemployed. 3. Workplaces- most need PPE masks, state needs to assist in securing a main number or email address to address this issue. You don't want Hosptal/ 1st responders being in competition with business for PPE. Best it is purchased through state at cost. They also need to have distancing, disinfectants, plastic guards for dividing registers/ areas which are close in dining. More outside dining areas for restaurants that need them. 4. Those restaurants that deliver should be given some assistance for website development if needed as this might encourage more farmer market type purchase from restaurants, also ready to cook kits to take home with Florida products. 5. Home schooling through summer for those who need it, also those who need tutoring and increase in on line assistance 6. Community follow up in poor or low income community for higher risk healthcare, schedule free healthcare checks, to assess and try to get the community in better shape. Churches, clubs usually have the best outreach. Most don't see doctors/ dentist unless they must and usually at ER. We are looking at fall with both flu and COVID-19. Many live in multi generation family units , many work as CNA's or in retail, restaurant, and hospitality workers, are likely to community spread. Assessment and prevention is key. Testing is also key here. 7. Making sure that the testing is regularly done and contact tracing is followed up with (especially those who are familiar with that community) will mean trust in the results and consumer confidence as well as increased low risk behaviors. Reports showing this is important. Transparency is important. Especially in poor and low income communities were trust of government remains low. They must be involved. They trust their church leadership so involvement there is essential. 8. Homeless community must be tested as much as possible as they do come into contact, Manatee has several outlets to assist. Turning Points (they are
Orange	General	First of all, the fact that the beauty industry, hair salons, barber shops, nail salons, spas, etc. isn't even listed as an "Area of Interest" in your drop down and has no representation on your task force alarms me!! Second, we NEED to re-open. I qualified for PPP and have kept my staff off unemployment because Florida UI is severely broken! As a service based business, we are going to be effectively cut in half on our revenue when we do finally open. I need the last 4 weeks of my PPP to help me cover labor while I use my half revenue for other expenses like rent and debt I've accrued since closing. We need some cashflow as we just continue to bleed. PPP only covered one month of rent, now the debt piles on. We have a real solid plan in place for re-opening. We have disinfectants and have always, always worked around germs so we know how to be safe. Our staff will all wear masks and will treat stations and chairs with isopropyl alcohol (AS WE ALWAYS HAVE) once we re-open. We will limit capacity and appointments and insure effective social distancing. Give us the chance, otherwise you are going to have tons and tons of empty shopping centers as small businesses have to close their doors forever.

AMERICAN OVERSIGHT

Lee	Education	I think that although we should look into reopening we should be cautious as to how soon we reopen. Many cases are still happening and we should be observant of that and openly slowly and not all at once to avoid another spike in number .
Lee	General	Reopen all businesses with precautions. Places such as hair salons, spas, and dentist for routine cleanings with appointments only using social distancing and sanitize between customers. Department of health needs to be dispensing masks
Hillsborough	Food	I have five neighborhood bars that don't serve food throughout hillsborough and Pinellas county and waiting to open one in Orlando. I've previously emailed the governor as well as my county commissioner Ken Hagan to express my concerns. Currently the governor has lumped bars into the same category as night clubs. They are fundamentally different businesses and should be considered along the same lines as dine in restaurants. The same restrictions for restaurants can be implemented for neighborhood bars. All of our locations are 2000 sqft or larger with outdoor patios of 500sqft or more. We can easily distance inside and outside just like dine in restaurants. We can also implement employee safety measures that will be required of restaurants. Just like all other small businesses, we want an opportunity to open and adhere to any guidelines, but to single out the neighborhood bar and then associate them with night clubs is damaging to say the lease. We are designed like a restaurant with spaced out tables and outdoor patio seating so we feel completely confident that you will make the exception and allow us to operate just like you would with dine in restaurants. There will be no more risk of spread than with the dine in restaurant. Thank you for your consideration.
Duval	General	Just allow businesses to open and run as they see fit and open up state buildings and parks. If people feel they need to take precautions they are free to do that. How much economic pain are the rest if us supposed to endure? We don't close highways because some people die in crashes.
Pasco	Recreation	I would like to see the state parks open for at least camping with self contained RV's.
Collier	General	Please allow our businesses to open back up. People can take personal responsibility. If this goes on much longer more and more people become dependent on the state. We can't afford that.
St. Johns	Healthcare	NO OPENING until the State of Florida does full testing and CONTACT TRACING! This is vital to our safety and shorten this virus cycle. MASKS are mandatory for entering ANY business. Restaurants employees MUST be tested and contact tracing performed. All restaurants with takeout must have employees with proper capes or gowns, masks and gloves, same for deliveries. NO dining rooms open until much later. HAIR, NAIL, MASSAGE parlors must use capes and gowns, masks. Protective face shields. LIMIT hair washing.
Lee	Government	Florida should not reopen everything that is closed now until we have enough testing to confirm how our population is responding to the Corona Virus.
Pinellas	Healthcare	As stated by the task force, I should be able to see my Dentist as long as I don't have a temperature, feel sick or had exposure to COVID 19. Let Florida Dental offices open now.

AMERICAN OVERSIGHT

Lake	General	Open up our businesses. Keep social distancing.
Miami-Dade	General	Please do not reopen, please I am scared for mine and my families loves. We are smart and strong we will build the economy back up again but we can't do that if we're all dead.
Palm Beach	Recreation	Open the beach and boat ramps
St. Lucie	Food	I think Florida should open up the restaurants and do social distancing every other table and the waitresses can wear masks. This will help the food industry and all those employees get back to work. Also the department stores they can do the same thing like the supermarket put one way Isles and have social distancing lines at the register. If they find their stores are getting too crowded they can limit the amount of people in at one time. We have to do it we can't all stay locked up. A lot of people aren't even getting the paycheck this is going to get really bad real quick if we don't open up.
Washington	Tourism	Not local but DVC and WDW AP member with current June 28 reservation
Duval	General	There are many of us who had COVID-19 in Dec and Jan, who got diagnosed as having the flu or a respiratory virus. At that time COVID-19 was something happening in China, for all we knew. Because we had it, we have antibodies and can go back to work. We need an antibody testing system so we can be given a certificate to allow us to go back to work, and get this economy moving again. If we don't get this economy moving again, President Trump will lose in Nov. That is the Democrat plan. Please don't let this happen! I am a hairdresser who had a very bad case of COVID-19. I did not go to the doctor because I thought I had the flu, but I was VERY sick. Looking back, I can say that , without question, I almost died. I am 73 years old with compromised lungs. But I survived and now I have immunity and can safely do hair. Please reopen Florida, and let the people do what they do best. This has gone on long enough. Thank you.
Lee	General	All workplaces should take employees' temperatures daily before they enter the workplace. For their safety they should also wear masks. I understand people need to get back to work but not at their risk or the risk of others. We will continue to stay at home mainly and wear masks when we do venture out. Shutting down was a wise choice.
Collier	General	I live in Ave Maria. There are 4 confirmed cases. I think we should open our 3 or 4 eating establishments for Social distanced dining and allow any of the shops and stores open. I think that the majority of people here will remain cautious as well. We should allow panther run golf course to open to the public as well. Ave Maria is a pretty isolated place and I think we should loosen the reigns and let the residents and store owners manage the day to day. I think that many of the more vulnerable will remain quarantined.

AMERICAN OVERSIGHT

Pinellas	General	Best - Florida should not reopen all businesses until a vaccine is created and provided to all. 2nd best when scientists believe our testing and contact tracing is high enough to re-open some of our businesses It is determined that Covid19 cannot be passed through A/C. And those businesses can implement both masks and social distancing. Since Florida is a tourist destination, if we open too soon, those from our state and other states who may be carrying Covid19, may flock here and re-infect our state. They may not have symptoms or fevers. Hospital and healthcare workers will be overrun. Those of us who need to go to the doctor/hospital will not in fear that we will be infected. Learn from history. During the Spanish flu the areas that opened too soon were devastated by a second wave. Please listen to those scientists and doctors with real knowledge in this area. People need confidence or they will not return to open businesses. We should not reopen during hurricane season. This will put too much of a strain on our emergency system. Shelters could be a disaster for people in need. Evacuation plans need to be redone due to the virus. We should not reopen when cases are on the rise, even if due to increased testing, as the testing should be maximized for us to know the true numbers. We should not reopen until we can do contact tracing. Other ideas: Since airlines are on the decline, use planes to transport needed supplies not people. Study whether Covid19 is passed through air conditioning in public building or work buildings. If so, hospital type a/c should be mandatory in all businesses that are open.
Brevard	Retail	I feel large gatherings should be restricted for at least another month, then reassess. I feel some retail businesses can re-open, i.e. Dog Grooming, Hair Salons with spacing changes made and masks required.
Osceola	General	As a teacher and a person married to someone who owns a small travel business this all sucks. There have only been 5 cases on out town and very minimal in our county. We are struggling horribly in our business. We had to refund hundreds of thousands of dollars and are now looking at unemployment. As a teacher I would much rather be in the classroom than teaching online. I teach struggling readers in middle school and not having them in the classroom is really bringing them down. Hardly any are doing the online work. PLEASE open the state back up so many lives depend on it.

AMERICAN OVERSIGHT

Miami-Dade	Healthcare	The CDC guidelines call for these protocols to deal with supply shortages when a hospital is at crisis capacity. (See below) ...So why should HCA be allowed to reopen for elective cases when they are not protecting healthcare workers to the best of their ability who are risking their lives and their families lives caring for their current covid patients. Health care workers across South Florida are putting their lives on the line during the coronavirus pandemic. But, one of the largest hospital systems is now restricting the use of N95 masks for those treating patients with the virus. According to the HCA, there are new protocols for the use of protective equipment. N95 masks will only be used for aerosolized procedures, including intubation and nebulization, for patients who have or are suspected to have the virus. Other employees treating COVID-19 patients will be provided with a Level 1 medical mask, which the Centers for Disease Control and Prevention (CDC) does not consider respiratory protection https://apple.news/ADW5Ab3oMQHuTzXedNNLVXw https://www.google.com/amp/s/amp.miamiherald.com/news/coronavirus/article242084781.html Please do everything you can to make sure all these healthcare providers have enough enough N95 masks for all their nurses to not let any unnecessary infections of covid happen that can be protected by an N95 mask Why is it that healthcare workers are having to purchase PPE on their own to protect themselves shouldn't this be a basic necessity to have in stock for a very profitable organization like HCA before they are allowed to reopen for elective cases, please help us stay safe! Thank you
Lee	Healthcare	As a health care worker, my immediate concern is that this is too soon. I understand the economic reasons but the value of life should overcome that. People will only do the right thing if their leaders guide them in the right direction. Having seen the devastation of this disease first hand, if there is a rush to reopen public places, we will only undue all that we have accomplished up to this point.
Lake	Recreation	Yes I agree with reopening Florida to a certain extent I believed it the state parks and federal Parks should be reopened within certain guidelines and limitations even if that meant restricting capacity within the realm of reasonability each person in family is responsible for their own actions and they choose as to whether or not they go out and take the risk of being infected I also believe that there should be more latitude for restaurants and businesses to comply with within reason guidelines to continue to keep the public and their employees safe so that way people aren't forced to live on welfare as well as try and survive our Fallout from our overloaded unemployment system as well as our welfare system I also believe that if there is any influence at all their one way for the nation to recover financially would it would be to Institute and legal recreational marijuana even if that meant issuing licenses two individuals within a reasonable cost with that said thank you for all your work and efforts to improve stay safe

AMERICAN OVERSIGHT

Sarasota	General	I do not think FL is ready to reopen. Tests are still not readily available, hence #'s not accurate. I understand businesses need to reopen to avoid bankruptcy, but opening too soon will not be effective. Opening too soon will cause a 2nd wave of cases and completely cripple the economy and families. Please do not reopen on May 1st.
Miami-Dade	General	Don’t reopen Florida you dumb bitch
Clay	General	I hope FL will consider letting the stay-at-home guidelines expire on April 30. From what I've seen in my area, people are maintaining physical distancing, store employees are wearing masks, and inflow to open retail is being controlled. I think we all have an appreciation for the seriousness of the situation; however, we also have an appreciation for the economic impact on our small businesses, and there has been enough suffering. People need to go back to work - the govt can't print enough money to support all of the people who are eager to support themselves. Are there risks? Of course, but life is full of risk and being careful and cognizant are the best protective devices.
Okaloosa	Healthcare	Florida remains the 8th state in the US with the highest number of Coronavirus cases. There has been a steady daily increase. Our state needs to remain closed until there is a STEADY decline in cases for no less than a two week period, preferably a month. Reopening needs to be a very slow, calculated strategy. More testing sites are needed, more contact tracing is needed and the availability of PPE. Our state has the highest percentage of elderly citizens in the US. This population, elderly citizens, is at highest risk of death due to contracting the Coronavirus. We need to protect our elderly and the multitude of citizens with compromised immune systems. According to reports from the CDC, over 25% of individuals hospitilized with covid-19 in the US were under the age of 50 and too many have succumbed to this deadly virus. Please protect Floridians and keep our state closed until it is SAFE to reopen.
Seminole	General	May 1st is too soon. We are on the right track, and the curve is trending downward- if we open back up next week, we WILL see a spike in deaths again. Please, please, allow just a little bit more time for our state to be safe at home. Gyms, restaurants- none of that is essential to life. We can continue to order takeout and work out outside. Let's prevent another lockdown a few months from now.
Broward	Education	Distance learning is great for k to 12 but the children in VPK get left out because everyone focuses on kindergarten and above. My daughter is in VPK and has missed out on education since March 15 and will not return to school, until kindergarten. Distance learning should include vpk programs throughout the whole state whether VPK is in a private school or public!

AMERICAN OVERSIGHT

Pinellas	General	This comment is in regards to the reopening of Florida specifically Pinellas county. It is absolutely asinine to continue this safer at home order. Removing it doesn't demand people go out in public, those vulnerable communities or those constituents that are scared CAN choose to stay home. Those that want to work and live their lives can also choose to do that. Closing playgrounds and the beaches make no sense. They are outdoors spaces. If they're not opened by y'all people will continue to go without your permission. We the people do not ned the gov't to protect us. We need you to uphold the constitution. I am a registered voter, I attend legislative delegations & help organize protests & rallies. It'd be smart for y'all to open the state back up or everyone that is responsible for dragging this out will be voted out.
Orange	Recreation	Open everything as normal, instruct the old and vulnerable to continue to shelter in place. Require face covering for large public gatherings/entertainment events/venues. All schools and retail stores to have cleaning guidelines. Publish guidelines for other business to clean and provide employee safety.
Collier	General	I think once you truly feel it is safe to reopen the state you should. However i am still concerned about COVID-19 being transferred from person to person. Do not want it to be like Georgia opening so soon. Thank you, Diane Rabkin Naples
Lee	Recreation	First, let me say thanks for keeping schools closed, and therefore keeping teachers and staff safe. Secondly, does the state have any recommendations for how children can safely return to activities such as dance, sports, etc? Not only are children unable to continue their athletic endeavors, but many recreational businesses like dance studios are suffering from closure and risk having to permanently close. This would be a travesty for business owner and student participant alike.
Seminole	General	Please reopen
Manatee	General	My family and many others we know have had some negative financial impact from the current shutdown, but we and everyone we know would rather the state take a very cautious approach in trying to end it. Personally, I am very active community volunteer usually working with educating the public in general and school groups. I miss this very much, but I and those I work with would not feel comfortable doing this type of work at this point unless everyone involved was wearing protection and maintaining social distance. I also feel the same way about returning to any currently unopen business. I don't think a majority of people are going to want to get out and do business as usual if they don't feel safe. If you can't follow what the scientists are saying needs to be done, you will be setting us up for worse problems than we already have.
Lake	Food	Open up. Our restaurants are suffering
Orange	General	Open Orange County back up now, including beauty services and hair salons. Mortality rate for under 49 is less than half a %, this is insanity. Put restrictions on elderly and Miami-Dade, free the rest of the state!
Lee	General	We have to open as much as possible as soon as possible. If the length of the current shelter in place hasn't done the job longer won't help.

AMERICAN OVERSIGHT

Miami-Dade	General	I do not agree with Florida reopening before mid June and/or before the competent medical authority gives the ok to do so. Opening now will defeat the purpose of the stay at home order and will cost the unnecessary loss of lives. It is the job of our elected officials to preserve life and not sacrifice these in the name of the economy. Circumstances like the one we are going through now defines what the government really holds as value and priorities. We should not ease restrictions or open Florida at this time! Focus should be placed in getting unemployment benefit payments out to residents and put into motion financial aid programs for people like the one Francis Suarez is working on in the city of Miami.
Bay	Professional Services	Please open up tanning salons and nail salons and hair salons and small boutiques in Northwest Florida, we have the lowest amount of cases here and should be the first ones to be able to open up.
Hillsborough	Healthcare	Florida is far from meeting the gating criteria to even enter the first phase of the White House's "Opening Up American Again" plan. In particular, we need to meet this criteria: "Robust testing program in place for at-risk healthcare workers, including emerging antibody testing." And we have only tested 2% of Floridians, not nearly enough. What about identifying asymptomatic individuals so they can be isolated and not infect others? Contact tracing? Florida is far from being in a containment phase. We are not seeing the downward trajectory of cases and symptoms required in the federal gating criteria either. Until THAT happens, there is no way anything more should re-open in Florida - otherwise we risk more illness, deaths, and a longer costly stay-at-home period. PLEASE do not succumb to political pressure, even though this is a very painful time for our citizens and our economy. Save lives by meeting the White House plan criteria and processes. People over politics. Thank you for the opportunity to comment.
Hillsborough	Real Estate	This virus isn't going anywhere whether you open now, next month, or in 6 months. We cannot continue to live like this. If the hospitals can handle it like you say, Open the state back up.
Pinellas	General	First, thank you all for your commitment to the State of Florida and to us in this period. I believe that we should begin an aggressive plan on reopening. I understand the fear of spiking cases, afterwards, but I believe that social-distancing addresses this as successfully as do lockdowns. Florida is a great example of this. We had several weeks of social distancing, and local safer-at-home guidelines, prior to statewide lockdowns. The IHME model showed us peaking 2 weeks after this period, not after statewide lockdowns. Let's continue with social-distancing, give companies guidance, allow consumers to choose the retailers and businesses that are the best at this, and avoid those that aren't as attentive to it. There are many of us that are willing, and are eager, to begin building Florida again. Thank you.
Pinellas	General	Open up my apartment pool please
Lee	General	please keep florida closed at least for a couple more weeks. we do not need a second wave of C.V.

AMERICAN OVERSIGHT

Orange	Technology	Florida has 21 million people, the first COVID-19 case is from early January according to the most recent research. No one knew what was happening then. No one practiced social distancing, wore gloves and masks or did constant hand washing and our death toll is one of the lowest in the country proportionately. Orange county is under Stay-At-Home orders since mid March, it's been 45 days already. All the experts say it's a 14-day-incubation period tops, plus a couple of weeks to get rid of the virus and develop the antibodies, so why stay at home more than 45 days?? It doesn't make any sense. Our economy is being destroyed by it, the death toll from famine, violence, suicide and unemployment will be far greater than this virus. Also, now everybody knows they have to social distance, wash their hands regularly and wear masks, so the number of infections will be much lower once we reopened our economy. People are getting nervous already about staying at home and not being able to work, the consequences will be devastating If we don't open soon. Please OPEN our beautiful Sunny State !!!
Escambia	Recreation	It would be helpful for moral and mental health to open the state parks and the beaches to locals. I would not open up travel yet. The YMCA and other places can have a half compacity. Thank you!
Highlands	General	I understand people need to go back to work, but safety is more important. I have a daughter who has chronic asthma. I have an aunt who is elderly, has poor health and has to do kidney dialysis 3 times per week. For me personally, it makes sense to delay the opening of Florida until it can be done slowly and safely. The economy cannot be fixed If we are too sick to go out, or dead, because we opened everything back up too fast and carelessly. Thank you.
Lee	General	Open Florida up for business! We all take risks everyday when we get on the road, but we don't shut down because of auto accident fatalities. Not to mention the fact you have people who have been out of work for well over a month and just recently been able to apply much less get approved or receive benefits from unemployment.
Lee	Recreation	As Full time resident of Florida, I appreciate the opportunity to share my thoughts and concerns. OPEN the state to residents only, IMMEDIATELY Must be 21 yrs of age and/or in the servicel. ID required at airlines, hotels, restaurants, bars, etc. until July 1st. We need tourism dollars and out of state families can visit July 1st. OUT OF STATE RELATIVES can visit immediate family members if with parents/ guardians if under the age of 21 OPEN FL to residents only IMMEDIATELY

AMERICAN OVERSIGHT

Hillsborough	Government	Please please reopen the state of Florida to its residents. We want to support all the local businesses who are losing so much right now. Millions of hardworking Floridans are losing everything they have worked so hard for. The number of deaths from this virus don't justify making so many people suffer. It is time to think of the residents who support this State and it's ability to recover from this disaster. Thanks to the media people are terrified and not seeking medical care for other truly serious health issues. If people are afraid of catching the virus let them stay home. For the rest of us let us try to get our lives back. Shutting the state down has traded lives not saved lives. I hope you are taking into consideration the increase in suicides, domestic violence, child abuse and undiagnosed medical conditions into the covid numbers. I know all of you continue to get a paycheck so this is more of an inconvenience for you but for so many this is devastating. I wonder how quickly you would reopen the State if we took away your paychecks, health insurance, money for food and rent/mortgage?. Unemployment is a joke and millions are unable to get it. I am not willing to sacrifice anymore of my life so a small population don't get sick. Time to reopen Florida and give us back our Freedom and ability to provide for ourselves and our families. Thank you
Volusia	Education	The stay at home order hasn't been strictly enforced. This allows those of us who believe in the positive impact of social distancing because it empowers employers and employees to make remote work a reality. At the same time, people who are not on board for changing up their lifestyles for the greater good, have continued to life live as they normally would. Keeping a stay at home order in place for at least another month allows us to maintain a balance.
Escambia	Recreation	I think we should have at least one consecutive week with no new cases amd deaths. Most people don't realize how serious this virus is and won't abide by the rules and be safe.
Manatee	General	Please protect Floridians by extending the stay at home order. It is still very difficult in my county to be tested and our numbers the last week are rising a lot faster than in the beginning. The financial cost is detrimental to us right now but it is TEMPORARY. Our economy will bounce back if we keep mitigating the spread. The more people we lose and the more out of control the situation gets, the bigger the hit to our tourism which is what my family lives off of. There isn't enough PPE still in our hospitals, especially our kids hospitals like All Children's, where they couldn't even give my child a mask for her infusion this month. She is severe immune compromised and a lot of kids there are even worse off than she is. Please protect Floridians.

AMERICAN OVERSIGHT

Escambia	General	Reopening businesses 1. I think if we are logical we can get out of this. 2. I think watch the number of new cases (by state, county, city) and as long as the number of new cases continue to go down that is good. Any thing that causes an increase needs to be investigated and corrected. A good indicator might be number of cases and dropping in half every 7 days. 14 days is too long. Number of deaths is too delayed, can be up to 3 to 21 days after a new case is identified. 3. Need it drive the options and monitoring down to state, and local gov. There hot spots that need to be controlled. But there are large sections of the country with minimal number of cases. Examples NYC vs Adirondack Mts, Chicago vs southern point of ILL., and Atlanta vs SW corner of GA. 4. Need for PPE should be clarified, may be different for different situation. Example facemasks. That story kept changing. 5. Testing and test kits is another questionable topic. That needs to be clarified why, where and when. Testing everyone everyday does not make any sense. 6. This should be done incrementally like in steps, but can be done logically. 7. There needs to be a criteria in place that if there is an increase in cases that location and biz sector needs to stop and go back a few steps. 8. I think biz sectors can come up with recommendations that can be utilized, such as restaurants. And the state agency that regulates / represents that sector. It does not have to be over regulated. Suggestions, recommendations, best practices, processes and procedures. It will be a team effort, and team needs to understand
Broward	General	I would start with restaurants as they are in the biggest trouble. They can have half the number of tables they usually do, have disposable menus and take temperatures upon arrival. In two weeks you can assess how many extra deaths. If the number is low maybe adds more tables
Orange	Government	Please reopen our state! This video says it all. 2 doctors with 40 years combined immunology experience, with data they've pulled as of Tuesday: https://www.facebook.com/KGET17News/videos/537566680274166/
Hillsborough	General	I think they should wait longer

AMERICAN OVERSIGHT

Pinellas	General	Hi, I'm a business owner in Florida. We have an apartment rental, an art studio and bar. We suspended rent from our tenants when they were laid off. We have been unable to start collecting again due to the failure of the unemployment. The bar has been closed since March. And the art studio has been making PPE. for our local nurses for free. Our economic hit is pretty hard. All that been said, PLEASE DO NOT OPEN. Our customers at the bar will expect us to open when the all clear is sounded. We will spend thousands restocking. And will loose that if we open to soon without the proper precautions in place. We don't want to stock up, put our employees at risk and reopen only to be shut down two weeks later as the cases spike again. We can't find the hand sanitizer and cleaning products to keep the bar clean enough. We haven't had time to put in hepa filters in the ac which we plan to. We haven't gotten recommendations to change those establishments to make them safer. We aren't ready. We need recommendations. We need a careful approach that won't cause stock loss. We need ways to keep our employees safe.
Osceola	Retail	do it by county
Leon	Food	Please don't reopen. We need to close more down. There are people at my job who also are part time at the hospital as nurses or assistants. I don't want to catch this while making fast food. Not worth it.
Polk	General	Cases are still rising daily, I don't think it's the right time to reopen.
Duval	Accommodation	Good Afternoon. I am concerned about the Re- Opening of Florida. Especially about the tourism. I am a housekeeper at a Big hotel in Northeast Florida that accommodate's over 700 rooms. I am also a caregiver that cares for a high- risk disable person. So my concern is about reopening big hotels. What would be the safety protocols recommended by the Task Force for tourist and hotel workers? Thank you.
Hillsborough	Construction	As long as social distancing is followed. All businesses should reopen. Construction industry needs workers, let's promote construction opportunities.
Orange	Tourism	DO NOT REOPEN FL. TOO MANY SICK PEOPLE WILL JUST REINFECT ANYONE ELSE. THIS IS STUPID. LISTEN TO HEALTH PROFESSIONALS THIS IS THEIR JOB. ANGRY STUPID AMERICANS SHOULDNT BE A REASON FOR MORE PEOPLE TO GET SICK AND DIE FROM COVID.
Brevard	General	Yes, please open Florida back up.
Palm Beach	General	Don't even think about it until declared safe

AMERICAN OVERSIGHT

Osceola	Tourism	Make major parks make it a requirement for masks for all cast members, team members, and employees. Doesn't matter what they want their image wants to be. Masks must be a requirement until a cure is found. Rick Scott and DeSantis already screwed us all over royally with the butt of the USA joke of how horrible our unemployment is going with no fixes or speeding happening by any means. So don't screw us over by opening up without strict guidelines and no grey areas. The companies can either be on bird 100% or just remain closed. With the amount of tourist I see during the day I would feel safer with a mask and sanitation stations up everywhere. Don't open us up until a real iron clad game plan is in place. Do not let the big companies say want to protect an image. Again, either follow guidelines with no exceptions or let the business remain closed.
Broward	Recreation	Beaches: Beaches should remained closed, however, I think that the water(ocean) should remain open. Sports such as swimming, surfing, and fishing should all be allowed as they all acknowledge social distancing. If the sand area on beaches are reopened there is going to be a huge number of people rushing to the beaches from nearing counties/states. The beach would be a hotspot and just another pool of people leading to the possibility of spreading the virus further. Opening the access to the ocean via the beach would simply allow water sports to resume and allow those who enjoy the water to exercise. It is bizarre to me that are still packs of bikers and walkers on the streets, but people are not allowed to surf or swim in the ocean. I still believe that people should be banned from congregating or relaxing along the beach.
Lee	Professional Services	I do not believe it is safe for hairstylist to go back to work during the current state of covid19 in our county, state, or country. I can not properly socially distance myself from clients or other staff members while in the salon setting. It takes at least 30 minutes to properly sanitize and disinfect our tools to prevent the spread of covid19, and may of us do not have multiple sets of things like shears, blow-dryers, clippers, ect. We also can not properly perform our jobs with gloves on during an entire service that could take any where from one to four hours per client. I am also immunocompromised and it's very hard for me to breath for long periods of time in the limited amount of n95 masks I was provided by my rhumotologist. I don't feel I am safe in a large salon setting, and fear bringing home the virus to my son who i currently have to school virtually as a single mom. Would I like to work, yes as I'm still struggling to receive unemployment from 5 weeks ago. But at this time I do not think it's essential for people to get beauty services done. Thank you.
Miami-Dade	General	We abousloutely should not reopen Florida before it is deemed safe to do so by medical professionals. Yes, the economy is suffering, but it will suffer much more if we allow this virus to spread freely and hospitalize/kill a huge number of people. Please take these step slowly and only take advice from medical and viral professionals. Thank you. P.S. Please consider implementing new laws to prohubit the "wet-markets" here in Florida so we can avoid anything like this again.

AMERICAN OVERSIGHT

Miami-Dade	General	Please put the advice of healthcare professionals before businesses, politicians, and first amendment idiots.
Seminole	General	Let's reopen our county, state and country. We have suffered enough in so many ways. Let those at high risk and in the more vulnerable populations do what they need to do to be more cautious and perhaps out of the public for their own health and benefit. Let the rest of the population get back to life. Clearly we have flattened the curve, we have decreased the burden that 'may' have been placed on our healthcare system here in Florida. Reopen the state. For those opposed, let them do as they see fit for their own health and well being. The models have been off, we've learned this the hard way. Stop mandating me, personally to be responsible for all of the general public's health! Everyone needs to own their own health and well being.
Lake	Recreation	Open bars , boat ramps, beaches, bowling alleys, skating rinks but with precautions in place.
Miami-Dade	Recreation	DO NOT OPEN !!! HEALTH OVER ECONOMY !!!
Brevard	General	04/25/2020 First, we are not stable or ready enought to open, folks do not social distance in public as needed or take saftey precautions, that fact cant be ignored. *40% of working class America has pre existing conditions and are at higher risk to some degree. * Have medical experts on panel as well as folks that will not be financially motivated. * More restrictions on big box stores, the social distancing is terrifying. * Restrictions on assembly plants like Harris, DSR and Gruman to ensure masks are worn, these folks work very close to each other. * Have saftey teams that rove to stores, assembly plants, beaches, buses, trains homeless areas and offices to teach and monitor saftey percautions. * Have mental health teams ready to respond to mental health crisis, people required to go back to work when they dont feel safe or protected with cause mental health issues. * Target lower funtioning and foreigners with animated educational psa. * Have all food handlers, cooks and servers wear a face fask. Will not go to places that do not. To many times witnessed sneezing and coughing not handle properly in food service. Close all buffets. * Covid 19 is a serious threat but TB, MERSA, Hep C and many other things are a serious risk. We need to change our ways in gerneral. * Make sure all hospitals have proper ppe for any future flair ups and new threats etc, learn from this. No one should die alone with no family or friends because of not enough ppe to spare for loved ones to be with the sick. No medical folks or public saftey should die because not enought ppe or education. We should have learned from anthrax scare, bioterrorism possibility and many other things to be prepaired and responsible. * Teaching folks to be personally responsible is a huge task perhaps consult with a psychologist on how to get people to conform, learn and be responsible. Teaching and requiring

AMERICAN OVERSIGHT

Broward	Recreation	Tennis: 2 people per court. Glove on non dominant hand for handling balls. For match play each player has their own balls with different numbers. When picking up balls use gloved hand or pick up with racquet to foot and hit over without touching the ball. Wipe down all chairs and benches after play. Discard balls. Change racquet grips. Wash your hands. Sterile gloves can be worn however thin running gloves or golf gloves are way more comfortable. Wash after play is over. I manage a 23 court facility. Each court will have an empty court in between. All coaches will wear gloves while coaching. No players will be allowed to touch the balls. Each player has their own ball hopper or tube for pick up balls. After practice all equipment is wiped down and balls are lysoled. Only 2 people per court. 10 ft distancing at all times. Hope this helps
Columbia	Healthcare	Before we even consider opening the state, we need massive testing. If we open up too soon, we risk causing thousands of Corona Virus deaths. When we have a fully operational testing situation, where every person in the state has easy access to testing, it will be time to discuss how and when to open the state. We are in a war with this virus. You can't fight a war without knowing where and how strong the enemy is. To charge off into battle with blindfolds on would be suicide. Test, evaluate, and then discuss opening.
Osceola	General	I think it is very important to follow the suggestions of Health Officials. Some residents have not received the unemployment money from March and that could help stimulate the economy. It is risky having people go back to work because many of the symptoms are not noticeable immediately. For example, Publix stores are still announcing new Corona cases from their employees. I imagine the numbers are going down for cases in Florida but that is taking into account the fact that we, as a a state, are doing our best to quarantine. Releasing people into the community too soon may spike up the cases again. Not all businesses would not be able to open up immediately again so that means that while some people are making an income again, others will not and the economy will either stay the same or worse.
Lee	General	Wondering if beaches can open safely...and what that looks like.
Polk	General	Open back up. If we are elderly or at high risk we have the intelligence to self isolate. Let the young get back to their lives. How many dead or how many have had the virus will never be known because there are too many fingers in the pot doing the counting and testing.

AMERICAN OVERSIGHT

Broward	General	There should be a complete mandatory shut down for about 3 weeks. Right now yes, business have closed , essential businesses are open but the virus continues to spread through essential workers and also the people that are not working but are out and about everyday. Nothing is being enforced so really, many lost there jobs and children cut short on education for nothing . I've known and witnessed police pass crowds of people that are not social distancing or wearing mask and do nothing. The only essential businesses that should remain open while doing a 3 week enforced and mandatory shutdown , are hospitals and law enforcement. All other business will be fine. Imagine if things would have been shutdown and enforced a month or two ago to stop the spread.... not only would business be back up and running but also, the virus would be better under control and residents will feel more confident coming out once business are open . Right now, it's too early to reopen with the uncertainties of the virus. Money is the only thing driving people back to want to reopen and it's sad that they have to chose between their safety and well being and money. To me, it's not the virus holding us back from reopening to a new normal, it's the delay in a mandatory 3-4 week enforced shutdown to get the virus under control and get the confidence back in and the fear back out of the residents .
Orange	General	Please make EVERYONE required to wear a mask at all times when in public and at work.
Palm Beach	Recreation	Please listen to scientists, doctors, and epidemiologists. The health and safety of everyone is at risk if we open to soon. There is no evidence that cases are going down and we are clearly NOT out of the woods. Please keep the stay at home orders for at least another 2 weeks. It could mean life or death for thousands.
St. Johns	Retail	Open up Florida business. ASAP. Allow healthy people to make a choice and get pack to life. How are we supposed to take these staycations when everything is closed? A slow methodical opening is just a slow death for our state.
Orange	General	Keep Florida closed another 30 days! Let's see a drop in numbers. Give our hospitals another 30 days to organize and treat patients effectively. Schools are closed, if parents all have to repost to work, then what? Children will be in daycares which is far from social distancing. Let's be smart about this. Give it more time. Keep tourists out. Fix unemployment, get our people paid and let's all sit tight for another 30 days. Thank you.
Bay	Recreation	Hi! Thanks for your work on reopening Florida. I'm from Panama City Beach and think that restaurants need to be open, with capacity limits and distancing guidelines. it should be up to the owners if they want to be open. Small business and family owned places are suffering. Our favorite small restaurants need business, even if it's just from locals. Also, I think locals should be able to be on the beach whenever they'd like. I think beaches should be open, at least to locals, at all times. Thank you!!

AMERICAN OVERSIGHT

Pinellas	Retail	DO NOT rush to re-open Florida, either non-essential businesses or tourism factors. There are too many unknowns with the virus, and we aren't any closer to a vaccine or understanding of the virus itself. My fiance and I are business owners in St. Petersburg, we are in our mid 30's and expecting a child in October. We have saved money by living frugally so that we could endure a situation like this, and it is unfortunate that others have not done the same, but I would rather be poor and alive than rich and dead. The economy will recover, just as it did after 2008, and it is the federal government's job to help with that.
Broward	General	Educate People to defeat Corona by providing guidelines. Slowly open up business where people can maintain social distancing. For household where everyone in the household is below 45 they can be relaxed to work. Make cloth masks or social distancing as mandatory for another couple of months. Schools should be opened last. Children above age 10 can stay home with camera monitoring. Publish new cases by Zipcode every day, last 5 days, last 10 days. If there are no new cases in a zip code for last 5 days you can relax business with caution. Make public workers (Teachers, police , fireman , doctors) as team to figure out why cases are not improving on certain zip codes. Thank you and we all should do our best to to defeat corona in our state.
Hillsborough	General	We must adjust and prudently start opening our economy - When the news first broke about COVID-19, we were hearing estimates of a death toll of 2 million-plus for the United States...fear of waves of casualties, and of hospitals without space and equipment to deal with patients. Under these emergency circumstances, many were open to compromising their freedom and agreeing to lockdown policies. But the picture has changed dramatically. By the end of March, Dr. Anthony Fauci was estimating 100,000 to 200,000 deaths, and less than two weeks ago, he revised this to 60,000. At this writing, (April 23) the number of deaths from COVID-19 in the U.S. is 42,425....This is just a little higher than the number of deaths in the U.S. each year from auto accidents. Hillsborough: 977 Hillsborough cases (4/20/20) 19 deaths (I believe 2 more have passed since then) 12 total cases in my zip code 33594 We peaked on April 3rd. Curve is flattened in Hillsborough. Businesses are distressed, many NEVER will recover! People are begging to worship in church together again. We need to open Hillsborough for business & worship! I am against facemasks... social distancing is enough as we resume. Let’s go back to work NOW. Thank you for requesting my feedback. I appreciate you listening to my opinion.

AMERICAN OVERSIGHT

Palm Beach	Recreation	To Whom It May Concern I think beaches should reopen but under certain conditions like reinforcing social distancing with others, wearing a mask if you are walking too close to people, and and having police do round checks. As for the other facilities and businesses, I think it is too early to make a decision. The uncertainty around the validity of the anti-body tests put us at risk of getting a second wave. Personally I would still not use spas, salons, gyms, and restaurants except for takes out. I would still use social distancing, wearing mask, washing hands frequently, and I would like our state to reinforce the police force so that we feel better protected from thieves and scams during this unprecedented time. Thanks for your time. Nathalie Vilvandre Ramirez
St. Johns	Healthcare	We need the FDA to declare dental workers as essential so that they may be able to get the PPE need to work. We are currently unable to purchase level 3 masks let alone the KN95 masks.
Miami-Dade	Food	Reopen Florida, the sick have already been quarantined and the healthy have been quarantined long enough with no exposure
Pinellas	Food	We own a 300 Seat Restaurant with 100 employees in St. Petersburg. Although we have received funds for the PPP, we are ready to open! We are grateful for this funding and will use it for Payroll for the required 8 weeks, which we need because we have no cash flow right now and it will take a long time to catch up. It's time to open. Start at 50% Capacity for 2 weeks then open as normal after that. We feel that if people are not comfortable going out, they won't anyways. Everyone needs to be cautious, wash hands, don't touch your face, etc. Let's just get this State open PLEASE!!!!!!! On another note, there are employees who already don't think they have to work because of the 8 week payment of the PPP and those that are receiving unemployment. They will learn soon enough that we won't allow them to "Milk it" with our establishment. Such a shame that others will take advantage of the system for as long as they can.
Leon	General	Test
Pinellas	Tourism	Thank you governor for what you have been doing during this time. I would like to know when we open back up what will hotels have to go through to protect their employees and guests? It’s hard to social distance when you have to send housekeepers in rooms to service them, have max occupants in the building and at the pool area. I think we should reopen like you said the right way and safely. Will other states be allowed to immediately start booking rooms? Out of country guests? As treasure island is a very popular family spot and we get people from all over the world. Thank you for your time.

AMERICAN OVERSIGHT

Polk	Food	Restaurant Re-opening - To maximize restaurant capacity & provide adequate social distancing - allow restaurants to move tables & chairs into parking lots (where possible). Section off parking areas with barricades & create more outdoor dining spaces. Set up temporary tents or covers from the sun. Set up outdoor bars/beverage stations. Make it a party like atmosphere with tables spaced out. This will allow restaurants to accomodate more diners/customers and get back to more regular crowds. Gov. Desantis can authorize waivers of city/county ordinances prohibiting outdoor operations (where required) on a temporary basis so our restaurants can resume more normal operations & employment. It also gets Floridians out in the sun where the virus does dissipate quicker.
Okaloosa	Administrative	We are 78 and will continue to stay home so the younger folks can return to work before we enter another Depression. Open up everything including the schools and Churches. Gov. Stay safe and keep up the good work. God bless.
Lee	Professional Services	I work as a receptionist at a hair salon, and I personally do not think it's safe to "reopen" Florida just cause of the economy. We have to think about the people first, without the people there's no money, no economy. I think it's selfish that the state wants to be reopened already when they just closed it up. There's no care for people, for lives, everything is about money. I personally vote to keep the state closed at least until June, so we can ACTUALLY help with flattening the curve, since he took so long to close the state.
Lee	General	Please take time to open up anything non-essential. Let's err on the side of caution. It is my concern that upon opening the state non-essential businesses etc... We are, in fact, opening ourselves up to a second wave of Covid-19 before we have the first fully under control.
Hillsborough	Professional Services	I would love to see all businesses reopen. In my opinion, if people are sick or scared, then they have every right to stay home, wear a mask, or whatever they feel is best. Everyone else should be able to go back to work, go to the beach, etc. Thank you for listening and for all you do for us!

AMERICAN OVERSIGHT

Lee	General	I think we need to wait a bit more before we open. Its just not safe. I myself am laid off. Had to apply for unemployment for the first time in my life. Was a long frustrating process, but, I was persistent and got mine taken care of.. Life is full of trials & tribulations. I will survive. We were not ready for this. We are all learning what to do. People are pointing fingers at the politicians, but, Im sure they couldn't do a better job. People will complain no matter what you do.. I think opening up parks was a good move. People need to get out. Plus no one said they cant go for a walk in your neighborhood. You can go for a drive. We are not on total lockdown. Opening beaches is going to be tough cause so many people will not practice social distancing. Most just want to 🎉 party. More people care about bars then they do their fellow neighbors health. I understand people need to work.. Save your money for things you need also. ie: stimulus..See people buying crap everyday. Not essential goods. You all are doing your best. Your not going to be able to make everyone happy. My thoughts.. Be safe & bless you all, America & the world.....
Okaloosa	Tourism	Please reopen Northwest Florida to tourism! Destin is a vibrant tourism-driven community. 90% of our income comes in during our season (May-Sept). If we can't reopen in time to make money for the season, our businesses won't survive the winter! We have not seen the effects from COVID19 like South Florida has and have PLENTY of capacity to handle new cases as they come in to local hospitals. Remember, THIS WAS THE GOAL! We have flattened the curve. We need to open our businesses!
Lee	Construction	I don't think we should reopen our state due to the greatest possibilities we still have of contagious. We do not need to kill more people, we should wait a few more weeks to see how it goes with virus transmission before reopening Florida
Seminole	Finance	Dr. Gabriel Leung is an infectious disease epidemiologist and the dean of medicine at The University of Hong Kong. He said that for every death you see from Covid-19, you should be seeing from 80-100 cases. Sounds scary, right? However, keep in mind, that would bring the death rate down to 0.8% - 1.0% worldwide. He also said that UP TO 60% of the world's population would catch this virus. Also sounds quite scary, yes? But that actually brings the average death rate down to 0.6% at the most, worldwide average. That's a lot of people. It's horrible. Obviously, some areas of the world would be higher & some would be lower. There's no way to test the entire planet, or even an entire country. We can only work with averages here, which I believe Dr. Leung is quite clear on. There's no cure or vaccine for any of the other coronaviruses in circulation. Vaccines take years, sometimes decades. I don't want anything to happen to anyone I love. I don't want anyone to die. But my question is this: How can we justify destroying the world's economy for 0.6% of the world's population? NOT to save them, but only to delay their death? What about the 99.4% that are left behind? Left to what? Poverty? Social unrest? Record crime rates? How are we saving lives?

AMERICAN OVERSIGHT

Pinellas	Education	Hello Task Committee: Thank you for your hard work. Let me jump right in with a few suggestions. Education - This is tough. Not an expert to what the data supports but will/should we limit classes to 10? If so, staffing will be an issue. What type of capacity will schools have? 6 feet isn't practical even now for daycare/preschools. For those that are EPI EDU students now, maybe waive some of the requirements and grant a 1 year temporary/and or the 10 week free internship? Perhaps have hybrid approach to the 2020-2021 school year out of an abundance of caution. Meaning, have the children go to their school partial week/or every other week during the week and continue remote learning in case of second wave/ until vaccine. Creates more jobs for displaced, educated workers. Mental Health/Loneliness of those over 65 but Independently living in Own Home - How can we protect those we love the most but not see our own parents until a vaccine is reached? I think we need additional clarity and messages specifically to the 65+ that are not in nursing homes but also not seeing their grandchildren. We need more guidance here. What recommendations here to our community? I think this is important particularly we have a lot of active seniors in Tampa Bay. During Early Restaurant Reopening Stage - Require reservations, "no camping" allow staggering of reservations with time in between to clean tables. Expand patio/outdoor space where applicable. Plan on increase take out during next few months and continue to allow alcohol take out to keep more FL bars and grills going if beneficial. Enforcement of Social Distancing Farms/Small Markets - Personally, I tried to go blueberry picking in Pasco or Hernando County last week. Small to large family owned farms have no process for checkout. Instead of paying and getting a bucket in the parking lot to monitor capacity they still operate with no spacing and long lines at checkout. I know their are a lot of rural farmers that are awesome, but I do think they need help and should be required to
Lee	General	I am a FL. native as is my family of many generations. The re-opening of FL. is necessary for economic stability for both the state & our families. However, opening to soon will only cause this virus to spread even further within our communities. Most of us have done as the Governor has asked & stayed home to do our part. Please do NOT rush the re-opening of FL. From the graphs I have seen by late May/early June looks like a promising time to begin the re-opening in stages. Take small steps forward and proceed with the highest of caution!!! Our LIVES depend on a cautious plan. Please keep in mind many disabled, seniors & special needs children/adults can NOT wear mask in public. We need realistic shopping hours to get essentials and that is not from 7 or 8 a.m. & for 1 hour only. Our population moves later due to med schedules, lack of help, lack of transportation etc. Please consider this!!!

AMERICAN OVERSIGHT

Volusia	General	First, thank you to the governor for not sending the kids back to school for the remainder of school year. Smartest thing he ever did! Please do not seriously consider opening things up on a large scale until at least June. When you do, please do not push for tourism from outside the state. People can stay in their own states. I am a waitress on Daytona Beach, so I understand first hand how important tourism is. Summer time I make multiple hundreds of dollars in a shift, come off season, IAM lucky to make $50. MONEY IS NOT THE MOST IMPORTANT THING! The economy will get back to normal.when we get back to normal. The health of the people is the supreme rule! KEEP US SAFE! KEEP THINGS CLOSED!
Lake	General	Please open up here in Lake County at least.
Miami-Dade	Recreation	Deeply would like the government making sure that all essential have a plan, not just open and create a bigger issue with the COVID 19. Second of all not open beaches and marina for at lease 3 months. Being no one won't have control over them
Hillsborough	Recreation	Please open the playgrounds! With school closures, our kids still have the need to be physically active outside the confines of a home, and many kids don't have a yard or large home!
Brevard	General	I think the state should not considering any reopening until at least the Florida cases go down and stay down for 3 weeks. I think tourism activities should stay closed longer so people from other states don't come here and bring more cases.
Hillsborough	General	Open Florida back up before it's too late to recover from this madness
Palm Beach	General	OPEN THE STATE NNNOOOOWWWW!!!!! What's going on is absolutely ridiculous. The entire economy is being destroyed, when most people get well after having the coronavirus. This is absolutely insane. I have also heard scientists say it is better to be outside than inside, so to close the state parks, and the county parks, and the beaches was a huge mistake. This needs to end now and we need to get on with our lives! I know one person who died from the coronavirus and he was in his late 60s and he was a chain smoker. You cannot shut down the entire state hurting all of the residents based on a few people dying. People die all the time and we don't shut down the state or the entire country. Please end the shutdown immediately!
Palm Beach	General	I would love to see beaches, parks, (not playgrounds) and other things open with the conditions of social distancing of 10 feet, masks in any indoor area for all parties. Do it on a per county basis, based upon mandatory requirements of declining cases and deaths. Open it slowly, keep restrictions on the Assisted living and Homes for elderly to protect the vulnerable. Let people determine if they want to go to businesses or not based upon them following rules and being comfortable in those environments.
Miami-Dade	Healthcare	Please. Do not let out seniors 65 years or older until there is a known cure or a vaccine for Corona Virus.
Polk	General	Don't return to normal until the Virus is under better control.

AMERICAN OVERSIGHT

Palm Beach	General	Open all public parks and beaches (even before quarantine they were never full to where social distance can't easily be kelps). Open restaurants with glass separating tables and extra cleaning between customers. Beauty shops and hair cuts to take customers temperature before entering. Theme parks to open but limit entry to allow social distance and hand sanitizers available. Boating, fishing, golfing open immediately. Open malls and stores encouraging social distance, hand sanitizers and masks if social distance can't be kept. Open all urgent clinics and evaluation to be done outside to allow entry. All urgent clinics to do testing for the virus. Free testing to all.
Pasco	General	Govenor Desantis, Please open business back up! We desperately need to get our state back to work! Protect the elderly and vulnerable by asking them to stay home, but let everyone else get back to work and our lives! Let business open up and if some wish to not go out then that is their choice....but please LET THE PEOPLE DECIDE. Thank you for your service to our state and this country.
Walton	General	Thank you for keeping our state free of draconian lockdowns! Thank you for including citizen input and for keeping your decisions based on facts and not fear. Our county has only 35 confirmed cases of covid and no deaths. I think our county should open back up completely. Those that don't feel comfortable going out can stay in. Those that do should have the right to go out into an open local economy. Luckily we still have our income, but for how much longer if this keeps up? We cannot shut down our economy every time a virus comes about. Sweden did not shut down and their numbers are stabilizing. If everyone in our state was tested the number of positive cases would sky rocket, but the death rate would fall. We need to quell the fear with facts and protect the elderly and immune compromised. The rest of the population should go back to "normal". Thank you!
Walton	Tourism	Please open Florida. 100% of my income is based on short term rentals. Not because I own rentals but because I'm a housekeeper. Unemployment is not an option. Me and my 2 other partners with our husbands have taken whatever cleans we can to keep our business alive. We take care of over 100 homes on 30A. That means we have 54 other cleaners sitting at home un able to work. We have a office which comes with a monthly rent we also pay for laundering services which that business is waiting in anticipation for our call. We built this business to change lives not under pay or under appreciate our cleaning family. Over the last 4 years we have seen families buy cars and homes,stay home with kids ect. This is our life. The best thing about being an American is the freedom to take risk and create our own wealth. Please open Florida so we can get back to making America Great Sincerely Brandy Stone proud Republican
Seminole	General	I Believe We all want to open the state Sooner then Later , But I do think we need to do so when we have a better understanding of the virus . We need to make sure there are test available for everyone including antibody test. What we will do if there's Another flare up .There needs to be ppe available for all Businesses prior to opening up and proper training for what your individual business will look like to keep employees and customers safe.

AMERICAN OVERSIGHT

Sarasota	General	Retail establishments and restaurants should be allowed to reopen. They should be required to observe social distancing guidelines. Citizen should be allowed to make their own choices as to whether or not to patronize these establishments once opened. Each of us should have the right to assess the risk for ourselves. It is clear now that medical facilities will not be overrun. The damage to Florida's economy by continuing shut down will be more devastating than whatever increase in infections may result.
Collier	General	The numbers don't match the reaction and y'all can't pay people unemployment benefits, so REOPEN.
Sarasota	General	Take a look at other countries that opened back up to soon. Do u want to have to do this all over again? I can't believe we are even talking about this!! For get Trump and Listen to the doctors. I don't want to have to say I told u so.
Miami-Dade	Recreation	Please force Miami Dade to reopen parks and beaches asap. I live in a small apartment in little Havana. We have no access to green space. There is no legal way to access the water in Miami Dade to fish because it's all in parks. This is having an extreme negative impact on my physical and mental health. We can safely social distance at the beach we aren't children. Reopen parks and beaches in Miami Dade
Duval	Healthcare	Elective surgeries need to available immediately, There are many many outpatient surgery centers that we could be using that aren't even attached to a hospital or their beds and supplies, they are separate and have their own equipment. I personally was scheduled for a major shoulder surgery on 3/27 which was canx 4 days before after waiting a month already at that point. I have 2 herniated discs and a bulged disc in my neck and a pinched nerve. My neck surgeon told me to not let anyone touch my neck and I would start physical surgery for my neck with I started for my shoulder. I need 3 tendons/muscles reattached in my should, called anchoring, I have a cyst and the sac around my joint has spread out all the way across the back on my shoulder to my neck. As you can imagine I am in EXTREME ACUTE pan ALL the time. This will take 4-6 mos to heal enough to have neck surgery. I am reschduled now for may 20th. If elective surgeries were to reopen asap I am on a waiting list for my surgery and could possibly have it done already next week Also I would like to add my sergeon and much of his staff are basically laid off due to this. They get 97% income through elective surgeries.
Collier	Finance	FIX THE UNEMPLOYMENT !! It has been all over the news that Florida website was set up to fail so people give up. I think in such a big state with the tourism tax you take in that you would not want to take care of you citizens who work so hard to make that possible. We are the talk in the news as the worst unemployment system. These are you voters that voted for you. Take care of them they make this state run . It breaks my heart for these people they can not feed there family's and have to go in lines and beg for food. Thank You

AMERICAN OVERSIGHT

Brevard	General	Open salons and restaurants with social distancing requirement Resume non urgent surgical and diagnostic care at hospitals Education resume in September Concerts and sports hold till Julyand re-evaluate at that time Open retail stores with limiting how many can be inside at a time
Pinellas	Recreation	Please open the gyms. It is essential for health and well being. With distancing is fine but even for mental health it is necessary. I'm an essential worker and I feel that it is something that would make my days and weeks easier. If they aren't open to the public, maybe make them open to just essential workers
Brevard	Recreation	Please consider allowing swimming pools for lap swimming to open as part of the first round of low risk recreation activities. I am sure you are aware, the CDC has stated since the beginning of the Covid-19 pandemic that the virus cannot be transmitted through the water as long as pools are properly maintained. Swimming is one sport that cannot be duplicated or practiced outside of the pool as many other sports are able to practice in some capacity. The thousands of swimmers in Florida have been out of the pool for 6 weeks and for a swimmer it is incredibly difficult for them to return to competitive swimming shape (highly competitive or college swimmers typically take off 3 weeks per year). It would be very feasible for swimmers to change at home before/after they get to and from the pool, not shower or congregate inside locker rooms and only use restrooms for bathroom usage. In addition, social distancing is possible on the pool deck and in the pool since the swimmers are separated by lanes. Please allow these young athletes to get back to pursing their goals and dreams all the while following the safety guidelines. Thank you!!! Tara DeBoer mother of UF swimmer and a competitive high school swimmer
Brevard	General	OPEN THE DAMN STATE!! YOU WANT TO STAY HOME AND HIDE YOU HAVE EVERY RIGHT!! I HAVE EVERY RIGHT TO RETURN TO NORMAL LIFE!!
Broward	General	I would feel safer having the state re-open when there is a consistent downward trend in new infections for more than 2 weeks, as well as when health officials advise it is safe to re-open .

AMERICAN OVERSIGHT

Orange	Management	Please read. Very important. Reopening or compromising the stay at home ruling, anytime in the near future, would be a deadly mistake . This is not a time to put this question in the hands of 'business leaders' or citizens that are not qualified to make decisions on a national health crisis. It doesn't matter how many people have or have had COVID-19. The most important indicator is the death rate. Until the death rate starts to diminish dramatically from day to day, the virus will continue to spread at exponential rates. It defies logic: we went into the lockdown when we had very few cases and now we're thinking about easing up when there are more cases than we've ever had? That's simply insane. It's not a time to make decisions based on economics or hunches. Even implying easing up on the restrictions is causing people to let their guard down. Very dangerous.
Palm Beach	Recreation	Dear Governor, I am an EMS Tech here at the Dept. of Veteran's Affairs hospital in West Palm Beach. I work in the ER, the ICU unit, and everywhere else in this hospital that I get sent to on a daily basis. I have been actively working in all of our "Hot" zones since the beginning of this pandemic. But the thing that I'm requesting the most is for the beaches to be opened back up. (I'm also a local surfer.) In order for me to continue to stay healthy, both physically and mentally, I need to be able to paddle out into the water. Being out there, in the salt water and sunshine, s the best place to be able to get over any type of infection should I happen to acquire it. If the beaches themselves won't be allowed to open, please at least let us surf. Most of us that paddle out don't want to be bothered by anyone else to begin with, and those of us that surf usually stay at least 6 ft away from others so that we don't run into each other. Please, please, please allow us to get back into the water. Thank you. Sincerely, Peter T. Floyd, EMS Tech at VAMC WPB
Marion	Retail	The numbers are still rising in the area. Don't feel safe going back to work til numbers stop rising.

AMERICAN OVERSIGHT

Broward	General	To re open economy... suggest as follows: Please stop listening to or following any & all ideas out of DC. You can do it! Be your own man! To win battle needed are: 1. Healthy, well remunerated & equipped soldiers (dr's, nurses etc). 2. Segregate known patients in specific designated buildings. Severe, acute, manageable etc. (Hotels can be quickly adapted). 3. Start testing all, repeat ALL residents, legal or otherwise, and sorting by results. 4. Establish a street/avenue/parking area cleansing. 5. Borders have to be fully controlled, entry & exit with regards to testing. 6. Attack counties by segments, clean, test, examine, sort in small areas. Open that well controlled area 1st, then immediately onbto the next. 7. The press and protesters will haunt you. But place the plan before all to see & comment. If anyone can do better. Say it & place $ where mouth is. Dont play any more politics. Ignore trump completely. He just wants his followers to beg, kiss his feet then maybe he will authorize financial help., If you Sir, can get this started within the next 20 days, re election guaranteed, perhaps you are the man needed in DC. Trust nothing herein in interpreted to be offensive or distespectful. But I am not a politician nor am I politicalky correct.
Dixie	Healthcare	I live in the Suwannee community that many come on the weekend and holidays from all over. And even after you placed the stay at home order, our town on the weekends became inundated with people from CO, NC, GA, and people from all over Fl. Our one main road (sr349) became a drag strip for golf carts, 4 wheelers, side by sides. We were calling the police regularly. And what is difficult for us is that it can take the police up to 30 to 40 minutes to get here due to our location. We have a specific individual that flies in from New York City to one of the airports and drives to Suwannee regularly, and many from other states and all over Florida. Our town has a regular population of roughly 330 people that live here year round and on these weekends and holidays the population can swell to quadruple or more. My concern would be once you open Florida our town would be flooded with travelers and we would be open to becoming a possible hot spot. We have already had several cases where people have been here and visited and went home and got sick and tested positive for. Ovid-19 in their counties of Alachua and Columbia and one even went home to Canada after visiting her sister here in Suwannee and tested positive for covid-19. I understand the need to reopen Florida however i am extremely concered for our town due to its unusual cirumstances. Would the travel band from New York and other states remain in place? What restrictions would remain in place to protect us? We are not alone with this worry. There is also Steinahatchee, Horseshoe, Old Town, Jena, Shired Island and many more. We are not like other towns and cities in Florida. Maybe there may need to be some different restrictions applied to our are to keep us safe. So when you begin to look at reopening the Gulf side please take some time to really look at our towns. Come talk with those of us who live here year round, ask us what ideas we might have to protect us. We may surprise you.

AMERICAN OVERSIGHT

Orange	General	It is time to reopen FL. This gives everyone the opportunity to stay home or to begin to return to the new normal. Please!
Miami-Dade	General	I am in favor of reopening Florida as quickly as possible, while taking necessary precautions to minimize the impact to those most vulnerable. Since I read several days ago that an indigenous teenager from the (remote) Amazon region of Brazil had died of the virus, I've reasoned that this virus cannot be contained and only mitigated. The extended period of time required to have the virus gradually make its way through the population under lock-down conditions will have long lasting consequences. I do not believe it is realistic to wait until there are zero communicable carriers or a vaccine to be widely available to restore normalcy, especially considering the distinct possibility that we will not bounce right back from lock-down but instead gradually return to the new normal. Thank you.
Pinellas	Food	We own a 300 Seat Restaurant with 100 employees. Although we have received funds for the PPP, we are ready to open! We are grateful for this funding and will use it for Payroll for the required 8 weeks, which we need because we have no cash flow right now and it will take a long time to catch up. It's time to open. Start at 50% Capacity for 2 weeks then open as normal after that. We feel that if people are not comfortable going out, they won't anyways. Everyone needs to be cautious, wash hands, don't touch your face, etc. Let's just get this State open PLEASE!!!!!!! On another note, there are employees who already don't think they have to work because of the 8 week payment of the PPP and those that are receiving unemployment. They will learn soon enough that we won't allow them to "Milk it" with our establishment. Such a shame that others will take advantage of the system for as long as they can.

AMERICAN OVERSIGHT

Polk	Healthcare	Public needs positive education reinforced regarding the number of people who have successfully recovered from COVID19. Stop the hysteria regarding PPE in public (so many people don't use it correctly to begin with). Allow voluntary antibody testing for anyone who wants it. Open all outdoor public areas and all businesses. Implement smart cleaning practices. Encourage businesses who can work remotely to continue to do so. Allow all healthcare practices to resume services. Reopen theme parks with mandatory clean practices and crowd minimization. Federal and State response has been phenomenal with ongoing identification of areas of improvement and correrction. One suggestion in the future, do not reallocate all PPE from suppliers. Suppliers need to continue to supply current clients 100% instead of rationing or reducing percentage. Keep in mind that typical PPE order during non pandemic times is much lower then use during pandemic. Suppliers basing order coverage by using ordering history is not accurate nor reasonable. Home health and Hospice providers were given minimal PPE from EOC despite numerous requests. Had to become own supply management entity and search for resources.
Palm Beach	Technology	ever since I was a kid, there have been viruses. The worst I experienced was AIDS in the 80s, At that time it was worse, because there was no cure, no procedure, little information, however we did not shut down anything, not even gyms. According to data, this one has a very low mortality rate. . Governor, please reopen our State, there will always be a virus around. Just recommend guidelines, and I promise we will follow them.
St. Johns Osceola	General Professional Services	REOPEN THE STATE! I am a permanent make up artist. We have been using all masks gloves products our entire careers. I own a spa and I will get this up and running as soon as possible. I am working with the health department Carlos. Please let us go back to work we need to feed our families we are a week away from bankruptcy. I have two nail technicians in a hairdresser who are also starving we cannot get unemployment since we are independent contractors and the big companies are getting the money. This is up scene and pathetic and we need to open our offices.
Orange	General	I think that it’s Crucial to open small businesses but making sure that there is a plan in place to help prevent the spread or another outbreak. Practicing social distancing as well as having mandatory measures in place for those small businesses that hold more than 10 people at a time. As well as educating people with practicing good hygiene (washing hands, covering month when sneezing, etc). Becoming a new “normal”.
Broward	General	Do not open Florida until scientists agree it’s ok. Provide money to people and individuals.

AMERICAN OVERSIGHT

Broward	Recreation	It is important for gyms to reopen even if it's not the normal we used to have. The people have a right to determine if it is safe for them to participate and gym owners have the right to be open or implement new safety policies as they see fit for their employees and clients. This is not the governments job. If people do not want to follow the gym's new policies they can choose a new place to workout or workout on their own.
Flagler	General	What a wonderful way to get a voice heard. Thank you. I don't envy the decisions that must be made - economy versus well being. I would like to go on record that I prefer the "stay at home' mandate to continue. As soon as we open up, even on the smallest scale, people will take advantage - it's human nature. I'm going as stir crazy as the next person - perhaps even more as I am a widow and going through this alone. But, it must be done. So, I plead with you, do not 'open' Florida any too soon. Instead concentrate on getting the unemployment worked out. I wish all of you good health and patience. Dor Wachsmuth
Lake	General	Open up. If people don't want to venture out, they don't have to - but it's not fair to the people who want the economy open.
Pinellas	Real Estate	LowIncome people are being hurt disproportionally by the pandemic and disproportionate health disparities in those communities. They need mask and other equipment in the communities in the hands of regular Community Member to prevent more widespread viruses and other health complications due to poverty these people are lacking the necessary materials that's needed to properly prevent the pandemic.
Polk	General	I believe the decision should be based on what is safe and smart and will keep us from having a huge reoccurrence. While what we knew as normal can't return in the near future. I think the state as a whole would completely be more likely to be agreeable if all the people who filed for unemployment got their money. If they weren't feeling strapped they'd be more likely to follow guidelines and do the right thing other than demand the state reopen. Face masks need to be MANDATORY if you are in any public place. I think there are businesses that are considered non essential that are somewhat essential such as hair salons,. While going shopping is not a necessity but in a time that people are feeling down they need to be able to make themselves feel good with a fresh haircut or a manicure,. Of course there has to be restrictions and guidelines. Hair salons should only have one client at a time and both the stylist and the client must wear ppe. Nail salons can have plexiglas barriers between the tech and the client. Restaurants are tricky but surely some reasonable happy medium. Overall for now if companies are moving on with business as normal having employees work from home that should continue for awhile. While we should all be smart enough to have sense to do what is right the whole group that doesn't want to be told what to do can't seem to do what they should either. Lastly it's impossible to make everyone happy but if those not being paid can get some income so many would at least listen.

AMERICAN OVERSIGHT

Walton	Tourism	Please please open the economy back up! I am reliant on tourists, short term rentals and bars and restaurants OPEN FULLY! I will not survive financially without it. I haven't been able to get unemployment yet or a stimulus check. I haven't made a penny since March 19th and I have NO money left after paying my bills. I have to wait at food banks for food now. Please please open the economy back up! We are desperate to work and make money again
Palm Beach	Recreation	Hello I really am very much for staying healthy trying to be active for my health and swimming which how can we do if not allowed on the beach it's in ur things of what we're allowed to do the beach is my meditation exercise and my calmness since I have a disability like Parkinson's so keeping exercise everyday meditation and calmness are guidelines from my Neuro I would really like to have my hair done since the blow dry once a week which has Been stopped does not make me feel good either because it makes me feel better to look kept also it puts Money in peoples pockets that work for tips u can not allow to not have these which I think are essential as anything else my opinion I don't think the wwe is essential especially not from keeping me from helping me with my disability u need to open the beaches ASAP it's essential for people's well being the restaurants u should open but very strict guidelines if we can be in packed Costco Publix erc then we should be allowed on the beaches certain hours to start off I really get frustrated when all u do us talk about hospital beds and testing why do u do that ur going to continue it anyway just get to the point of opening jobs and beaches it's enough already the people who don't like it ok do let them stay in forever why should we
Pasco	General	Please re-open the state of Florida as quickly as you closed it. I am a small business owner and I've lost more than 50% of my business since this is happened my mother-in-law has a dentist and employees 19 people. None of them have worked in over a month and a half. This is absolutely devastating to the economy over something that amount no more than the flu. Please isolate those that are at risk or allow them to do so themselves but the general public needs to get back at work and get the economy going quickly. Otherwise you were looking at a total economic collapse in the devastation from that would be far more than this virus.

AMERICAN OVERSIGHT

Lee	General	To whom it may concern, I have lived in Fort Myers, FL since 2010. I absolutely love it here and want to continue to be a successful part of growth for our economy. I am sharing my thoughts, because I have respectfully paused my business during this time. Yet have received zero financial help where I should have. I have had my own suite salon in this area since 2012. I have always paid my taxes and done my due diligence. However, as no one could have expected a pandemic has disrupted our lives and businesses. If I am able to open May 1st, I will have closed my business in respect for 6 weeks. The reason I'm writing is because as I've done my due diligence, I have not received any unemployment, stimulus money, sba loans, or ppp loans. I am very disappointed and discouraged on how we the people are being handled during such a situation. I've respectfully stayed home and social distanced. As a stylist, my clients want me to reopen, they want a sense of normalcy, and being I am in a private suite and can take clients privately in a one on one basis I feel that I'm able to accommodate them in a safe manner. I know my clients and have known them for 5+ years, some 9+ years. My clients feel if they are immune compromised or ill, they would respectfully continue to stay home. However those of us that are well and able would like to get back to work and servicing the community and working towards rebuilding the economy. I will happily wear a mask, my clients have agreed to as well. I personally do not feel that all the excess ppe is necessary and it would inhibit me from properly doing my career. I have always followed proper sanitation guidelines and have increased my cleaning efforts even more so. I look forward to being able to grow in this community and prolonging the date for me to resume business only continues to slow that process. I don't think large gatherings should happen but I will say I've been in Home Depot, grocery stores, and gas stations where there are many people in and out of daily, if those places can be open I feel my one on one space should be open as well. I understand and respect taking precautions in this manner however, I fee that those of us that are able to open should be able to ASAP so our community can start to thrive in a positive manner. I respect everyone's health and am very empathetic towards those that are immune compromised and those who experience loss due to this or any other situation. However we cannot control a virus completely.
Charlotte	Healthcare	I believe that we need to keep the state closed until we see the number of covid-19 cases declining. What was the point of closing in the first place if we open at the peak of infection? I work as a dental hygienist and am concerned for the well being of my patients and myself along with my family. We need to extend the stay at home order until June 1st and re assess from there.

AMERICAN OVERSIGHT

Lee	General	Slow open by county. Counties with lowest rates and population density opening slowly first. In each county everything slowing opening includes social distancing. Outdoor restaurant seating only at first. Beaches and outdoor recreation opening. Small businesses that don't require close physical contact open, with half capacity or less. Outdoor businesses including charter boat operations. I would be wary of opening anything large inside that hold a lot of people, has a high turnover of lots of people in close proximity. Including hair dressing, nails, gyms, massage therapy and such. Things the Georgia governor took a lot of heat about. I have no idea about public schools. The governor should stress that social distancing is included in all openings My .02
Polk	General	I WANT THE DMV TO BE OPEN BECAUSE I BOUGHT A CAR IN THE LAST THREE MONTHS AND I CANT DRIVE IT BECAUSE THE DMV IS CLOSE RIGHT NOW I BEEN WAITING ON THEM TO RE-OPEN AGAIN. SOMETIME I FEEL LIKE I WASTE MY MONEY ON A CAR THAT I CANT DRIVE IT SUCKS FOR ME BECAUSE I JOYAND HAPPY THAT ACTUALLY BOUGHT ME A CAR .
Palm Beach	General	I understand the concern for social distancing however our mayor, Dave Kerner, for some reason will not open the golf courses. He should realize he sealed his re-election as NOT getting elected. He is or seems to be on a power trip and talks down to people. Why wouldn't Palm Beach County open when Dade and Broward are. Makes no sense whatsoever. Man can you talk to the guy! Or give us a idea what we should be doing. Thanks for your understanding. You're doing an awesome job for sure and congrats on the new addition to your family.
Pinellas	General	I believe "re-opening" Florida would be a bad idea. Yes, it would help citizens that have been without work for a while but the general public doesn't take necessary precautions and I believe it would spike the number of cases for this virus. It's not worth it.
Walton	Food	Our family owns and operates three full service restaurants along the 30A area of Walton County. We have remained open with delivery and carryout only. But we are desperate to reopen our dining rooms. We are prepared to seat only half of our dining capacity to maintain social distancing. But please don't require masks for our employees. Full service dining is about customers interacting with servers. We have already begun taking each employee's temperature as he or she begins each shift. And we will have sanitizing stations throughout the restaurants for both customers and employees.
Lake	General	Open up. It's been too long.

AMERICAN OVERSIGHT

Palm Beach	Education	Our Palm Beach County class of 2020 should have a traditional graduation ceremony. Many other counties and states are already planning theirs. Our kids have worked too hard all these years to not be recognized in a non virtual fashion. They have lost everyone of their senior activities. We need to make this happen. Thank you.
Broward	General	It's too soon to open in Broward.
Lee	General	My thoughts are that the economy should be put on a one month plan of reopening. Meaning, that over the course of one month different sectors of the economy should be allowed to open with guidelines for safety in place. The people who are or consider themselves to be at risk can continue to stay at home. Just because businesses are open does not mean they have to go out. The people who have to work and are at low risk should not be punished for a somewhat small section of Americans.
Orange	Retail	We need to be sure we have this under control protecting Everyone. Protective measurements needs to be put in place for fitting rooms and check out areas and returns. One misstep could put many at risk and create another epidemic. We should not open this area until we have those areas under control.
Palm Beach	Tourism	Please open theme parks, concert venues, sport arenas in the FINAL phase of the plan. I trust the ownership of the venues and theme parks to do so safely, BUT PEOPLE DO NOT LISTEN AND WILL PUT RISK THE PEOPLE WHO FOLLOW THE RULES. Sport arenas perhaps without spectators is fine. Thank you
Miami-Dade	General	I'm about to go bankrupt I Owen affordable beach weddings Fl Inc I average 9-10 weddings a day and pay Tens of thousands of dollars in permits for the beaches to be able to perform ceremonies on the study show that sound like kills this in one minute in the sun and you yourself have repeatedly said that keeping people together for prolonged periods of time in close quarters together his word spreads this virus please open the beaches allow us to go out in small groups for an example with my business I would only be doing small elopements less than 10 people at a time and observing social distance and guidelines please help
Walton	General	Please open up the restaurants and retail businesses before allowing the rental properties to be opened. If you open up the rental units now, there are going to be challenges. Lift the stay-at-home order, allow the supply chanins to get flowing back to the restaurants and other outlets, and open rentals middle of May for Memorial Day weekend. Grocery stores cannot handle local needs on top of tourism needs, if there are no restaurants open.
Volusia	Finance	I believe we need to open Florida. As very one knows, the financial is a big factor. You will always have people on different sides. Please take a stand and let the ones that want/ need to leave their homes do so. Please think about the healthy people that need to provide for their families. This virsus isn't going to go away, but we must learn different techniques living among each other. Isolation is not the answer. Thank you

AMERICAN OVERSIGHT

Leon	General	until all the requirements laid out by CDC standards can be met, reopening will only increase viral spread, overwhelm public safety and health workers and destroy any short-term benefits of economic nature. This state in particular is at high risk due to our high proportion of most at risk aged population. Any softening of restrictions (such as they are now) will inevitably aggravate the viral spread and the viral load that population has to contend with .
Brevard	General	I don't think Governor DeSantis should reopen Florida too quickly. I believe the cases of COVID-19 infections will increase or spike if he opens up too soon. The only reason we haven't seen more cases in Florida is because he did the smart thing and locked down the state. This virus is not a hoax. It's the most highly contagious virus we have ever seen. It is not going to magically disappear. If you truly believe that, then you are ignoring the science and the medical professionals. If you open up now, many more people are going to die. Continue to be smart, be cautious and save lives. I realize we need to reopen and get back to work, but it needs to be a cautious, slow, and planned process. Everyone, and I mean everyone, needs to be tested.
Palm Beach	General	I have pre-existing conditions, opening early will be dangerous.
Duval	Government	ADA VIOLATION or ACCEPTABLE INSENSITIVITY?☠ →The city of Jacksonville Beach has reopened beach access for able-bodied persons AS THEY EFFECTIVELY DENY / RESTRICT EQUAL ACCESS TO OUR DISABLED COMMUNITY.☠ ✔They have taken away 32 disabled parking spaces that are adjacent to the beach thus denying the disabled Community access to the beach parking. ADA requirements for municipalities require that they make "Reasonable Accommodations" when temporarily or permanently removing disabled parking. According to the mayor of Jacksonville Beach the "Reasonable Accommodations" that they are making is the installation of two parking (2) spaces near the beach life guard station (to replace the 37 taken away) and telling the disabled Community to use existing disabled spaces that are farther away from the beach (See Mayor Charlie's FB post in pic below). ✔This clearly is insensitive and a "denial of equal access" under color of authority. ✔Just because parking areas are closed to the general public does not mean a municipality can take away the disabled parking while allowing the general public to continue to participate in the activity that the parking was designed for. ✔ "Reasonable Accommodations" has not been met by the City of Jacksonville Beach and they should work to correct this problem and not thumb their nose and are disabled community hoping CV19 will end before this injustice comes to light. https://m.facebook.com/story.php?story_fbid=2896178207098195&id=100001181327142

AMERICAN OVERSIGHT

Pasco	General	Make N-95 mask and gloves available to the general public before opening up. The masks and gloves are impossible to find and not available for purchase by the general public. The paper and fabric mask only keep you from infecting others, but do very little if anything at keeping others from infecting you. Masks are not mandatory so individuals are not using them, which puts everyone else at risk. I have heard individuals say that Corona virus is not real, it is just political propaganda. Attitudes such as these put the rest of the population at risk. Originally, we were told the kids and young adults could not die from this, but we have seen that is not true. We were told that 6' was enough for social distancing, but the JAMA had an article stating that 27-33' is more realistic distance due to the way that it spreads. There is more information that needs to be known before reopening the state potentially causing a second wave.
Duval	General	Please listen to and heed the advice of the scientists and medical professionals when formulating any plans to re-open Florida. Do not be swayed by the politicians and short-sighted business interests who can not see beyond their own ambitions and economic fortunes, respectively. Our collective health is much too important! Unfortunately, the partisan nature of (and all too obvious exclusions from) your task force does not bode well for my opening plea and the future of our state.
Hillsborough	Education	Open the state whenever medical experts believe it's safe
Hernando	General	We need to open Florida up now According to the three stages Developed in Washington Your sick, stay home , do 14 day isolation . Your healthy no symptoms, you go back to work Be checked at work for fever and symptoms, free of symptoms you get to work. You check their history, ever have the virus , any of the symptoms, did you self quarantine if you did have it . After history they get to work Any facility, craft stores , clothing store, restaurant, any place can open. The public needs to keep in mind their own personal responsibilities, distancing and hand washing , etc. no one ever , in history made such a big deal about a virus ever!!! No one stayed home , self quarantined, Shut down economy, etc. and more have died of other issues and viruses . Why now ???????? It really makes you think ,???? Is there an agenda ??????? Don't violate our constitution!!!
Lake	General	REOPEN
Hillsborough	Healthcare	We should not open the economy and allow people to leave their homes until we can control the Covid19 Pandemic. If everybody dies, there is no economy. Health and safety must come first, not greed.

AMERICAN OVERSIGHT

Sarasota	General	It is time to open businesses. Churches can't meet but thousands in Walmart. Begin antibody testing and realize the infection rate is higher than thought and death rate much lower. The economy sinking will kill exponentially more than this virus. These lockdowns are a failed experiment. It is time to change public perception with the facts that are now undeniable. We overreacted.
Brevard	General	Start opening businesses, but within reason and using a modicum of intelligence and common sense...which unfortunately seems to be missing these days. Businesses and consumers both must exercise safety precautions. However, I firmly believe we really don't know enough about this disease yet. They (our nations 'leaders') are making a SWAG (strategic wild-a&& guess) as to how this disease is spread; there's no cure for it yet, and we will NEVER know the truth about anything pertaining to this pandemic, thanks to our government. People need to work. People have families to support and bills to pay. Our 'leaders' don't give a da&& about them. They are not financially impacted by this. They are not hungry. We the people are the absolute LAST ones our politicians care about.
Polk	General	Governor DeSantis - We fully support you reopening the State of Florida - we as Americans cannot continue to hide in our homes and wait for a "perfect" scenario of when to re-emerge. Floridians livelihoods depend on private enterprise and freedom to move about. We are a thoughtful, responsible but most importantly a free people. Let us be brave and move forward - sooner rather than later. I'm afraid it is already too late for some businesses and families. Thank you.

AMERICAN OVERSIGHT

Orange	Tourism	Theme parks are the blood of Florida, we all know that, and we understand the demand to re-open them will be strong. However, my fear is that people are going to make their decisions based off dollar signs, instead of public health recommendations, and safety. Ultimately, the theme parks pose a large risk, and should be among the last to open, since the logistics in trying to maintain the recommended 6' distance is extremely difficult, if not almost impossible. If they are allowed to open, then strict measures (significantly reduced capacity, quick test swabs and wearing masks) should be made mandatory to try and minimize any risk. The problem with Covid is, temperature screenings are useless. There are far too many asymptomatic carriers that will be able to pass temperature checks and health screenings, go inside the parks, have contact with thousands of people, who then go home and infect others. Also, considering that Disney is an international destination which poses a huge risk, ideally, you would open the parks to Florida residents only initially. Then expand to other states, and then lastly, international guests - and only from "approved" countries where we know the risks have been minimized. At least then, not only are you limiting the risks to Florida's population, but you're minimizing the risks to the rest of the United States and the world at large. Opening green spaces and beaches is fine, as long as social distancing is both a requirement and enforced. Gatherings should be strictly limited to 10, such as other places are doing. I see no issue with hotels reopening, as long as they are able to enforce social distancing, especially in restaurants, lobbies etc...
Brevard	General	Unless we can determine through antibody testing who has been exposed to the virus it will do no good to reopen things. If we reopen and mingle unexposed people with carriers, then we will just infect more and more people. Too soon!
Polk	Recreation	I would love the gyms and workout facilities to re-open for those that have personal training and a minimum of 10 to 20 people on site not including the personal trainer and trainee! I'd like the gyms to only allow one hour each for those that are in the gym to allow others to come in! Basically the gym manager will have to schedule appointments for those wanting to workout at the gym!
Miami-Dade	Education	We need to open up because we need to make money . On top of that , I am someone who has anxiety and staying home is no help
Lee	Professional Services	I truly feel that it is time to start re-opening our county. Open the beaches, fitness centers, hair and nail salons and restaurants. Let it be up to the discretion of the person that lives here if they choose to go out or not.
Lee	Retail	Please reopen our state. We feel we can continue to practice safe distancing. Our retail owners and customers are suffering

AMERICAN OVERSIGHT

Polk	General	If the purpose of flattening the curve is to not overwhelm the hospitals, then it is time to reopen the economy. As the governor said this morning, the state hasn't come close to meeting the predicted numbers that were upwards of 400,000. The cure can not be worse than the disease, and it has truly become that. The economy needs to reopen as the health and well being of those uninfected matter too. This state wide closure is causing more suffering on so many levels than Covid-19
Hillsborough	Real Estate	Opening Florida means as a realtor, we are able to show homes and give people hope. This is normally our very busy season. Buyers want to start looking and move in before school starts in August.its time to get back to normal but also keep our social distance and washing of hands and masks etc.
Charlotte	Food	As a restaurant manager, I am out of work right along side most of my employees. We would love nothing more than to return to "normal". However, "normal" is not possible yet in our industry. If forced back to inside dining, I fear and my employees fear this virus will spread rapidly. Please consider NOT opening inside dining until we are sure it is safe! Thank you!
Pasco	Healthcare	As a retired State employee of the Department of Health, I am against reopening the state at this time. There has not been enough testing within our state to determine if and where there may be hotspots within the state. In addition, testing of all nursing home patients and staff is required. Unless there is testing of this population, the virus will spread quickly due to exposure from patient to staff , staff to families.
Pinellas	Healthcare	my only concern is that i feel people should be able to get tested more easy and efficiently. and to make sure we place restirctions when opening and that people are fallowing the placed measures.
Broward	Healthcare	We need to allow hospitals and surgery centers to do elective surgeries again. Hospitals profits are shrinking drastically even though admissions and revenues are up due to COVID-19. These procedures involve individuals already wearing PPE due to the strict sterile requirements of surgery and the capacity we thought we needed to keep open because of COVID-19 ended up not being needed. You can always backtrack again if a spike occurs and the beds are needed.

AMERICAN OVERSIGHT

Hillsborough	General	I feel it's NOT safe to open yet. Cases and deaths keep rising and I am concerned for my own health considering I've had Mono in the past along with being very susceptible to getting bronchitis and other respiratory issues. I'm 28 years old and I've only been a wife for 2 years and have a step daughter I want to continue to watch grow and love. I shouldn't have to live my life in fear that I'm going to get the virus and risk being infected as we open things around us all. I recently was tested for the COVID-19 antibodies WITHOUT having the OFFICIAL NASAL SWAB from my primary! Makes me wonder if my doctors office even had the testing to begin with?! Not to mention the phlebotomist that took my blood caused me extreme stress explaining to me this is NOT how the process is done and that my doctor should have done this, should have done that. Not to mention she got aggravated she couldn't get more than 2 tubes on my right hand so she went to the left and i had to be poked yet again with the needle. Now I wait in stress wondering if I even got the correct care I needed let alone if I have COVID-19? I was recently diagnosed with Anxiety and Depression with thoughts of self harm and this whole thing with this virus is amping it but with the poor care and an extra high stressor added that I experienced Thursday at Quest Diagnostics has literally put me closer to the edge. PLEASE DO NOT OPEN YET!!!!
Lake	General	I'm ready for things to open up again. Reopen please.
Broward	General	Please wait until there is a significant decrease in the number of new cases and number of deaths. Thursday April 23rd was one of the highest numbers of new cases we have had. Obviously the virus is still rapidly spreading and reopening our state will do more harm than good.
Hernando	Healthcare	Please consider postponing opening of elective dental treatments such as dental cleanings. I am a registered licensed dental hygienist and this would be waaaay too soon to go back to work may 8. The numbers of covid have NOT declined. We are number 1 at risk and theres no real way to obtain proper air sanitation, testing and PPE at this time. I am immunocompromised and care for an elderly parent and children at home. Theres no way I can social distance from my patients who are a foot away from me while i work in their mouths. This would expose and raise your infected numbers greatly as it's been shown majority of carriers are asymptomatic and testing has many false negatives. Please please please help us out by proper PPE and procedures laid out prior to reopening. Standard precautions are NOT sufficient. Thank you! Get Outlook for Android
Okaloosa	General	Beach Opening: With all these people out of work and no schools or universities open this beach opening will turn into Spring break X 1M. Are you prepared to handle these large crows? Not!

AMERICAN OVERSIGHT

Miami-Dade	Management	We keep managing to the exception and the rule is being hurt. By no means taking this lightly, but media has a major hand in what is going on and we are seeing right through them. Too much politics in their coverage, and no mention, or very little, of the positive that is happening. Time to open public and semi public areas. Reduce indoor capacity of businesses by 50%, but allow them to open. Keep mask requirements for now, and until curve takes significant down turn. And keep praying for all those affected!
Sarasota	General	It is not time to reopen FL yet. Wait and follow the guidelines provided by the CDC and WHO. Only use scientific data as the basis by which to make decisions that are this important.
Collier	Food	Open!!
Broward	General	Please do not rush to re-open too soon, before we have adequate testing in place. Please include public health pandemic professionals in the economic recovery planning efforts. Please help ensure public subsidies toward unemployed and small business owners are sufficient to get them by without losing their homes/business locations, and to be able to eat and meet other basic needs. The worst thing we can do is re-open too quickly without the proper sufficient and widespread testing measures and safety protocols in place. Thank you.
Volusia	General	REOPEN FLORIDA!!! Pay attention to Sweden!!! SOCIETY is unraveling.. people can't provide for their families, the economic damage is so overwhelming. NEVER IN THE HISTORY OF THE WORLD HAVE THEY QUARANTINED THE HEALTHY!!!! SICK AND VULNERABLE. should stay home. GET FLORIDA BACK TO WORK RESEARCH SWEDEN AD FOLLOW!!!!! And GEORGIA!!!!
Hillsborough	General	No more restrictions, OPEN THE WHOLE STATE!
Hillsborough	Government	I'm opposed to re-opening any non-essential services or businesses in Florida until there is a SIGNIFICANT drop in Covid-19 cases. And I think the exemption of churches is a foolish mistake. I'd rather the economy crashes than having more lives lost due to poor decisions by the governor.
Palm Beach	General	No. I think re opening too early is a bad idea. I think it's foolish, we haven't even reached peak yet, cases are still going up. I think its selfish and dangerous to put people's lives at risk this early. I am a dog bather, and personally, I am not willing to put my life in danger so people can bring their dogs in for haircuts. I am high risk just because im over weight, and i have no desire to expose myself to this disease. No thank you. So I wholeheartedly believe that reopening florida this early into the pandemic is much to dangerous. I hope that our govenor and other politicians can agree on this. Its. Not. Worth. It.
Miami-Dade	Professional Services	Gm,I think ,Fl should open;but little by litle. County by county then:park,recreation,furniture store with respect & following the guideline of CDC.
Lake	General	Reopen
Charlotte	Government	Please reopen the state of Florida. The small business owners are being adversely affected. Keep schools closed until August. In Englewood we dealt with red tide adversely affecting business, barely recovered the pandemic of Covid19. Please reopen Florida- those with auto immune diseases can stay safe at home. Those who are healthy need to get back to work.

AMERICAN OVERSIGHT

Volusia	Education	I believe that we should hold off opening until at least the end of May. I have a daughter who will be a junior in college and am worried that if we open too soon that colleges and universities will not open in the fall. I am paying $850 a month for an apartment that she is not living in and I know that there are many families doing the same. We would cancel the new lease as will many others which will have another big effect on the economy. Also, I believe that we should all be wearing masks in Public. Let's get it right! Patti Lewis
Miami-Dade	General	To who it may concern. I think parks and Marinas should open being the public ably by the rules. Now i think for those who do not ably to the rules should be cited or removed from the parks or marinas. I've been without work for five weeks I have nothing left to do. I'm one of the lucky ones I have a big backyard and pool to relieve stress. I have so many family and friends that do not have that stress relieve.Lots of my family and friends are getting cabin fever and depressed . I think kids need to get out and get some exercise . I have two beautiful granddaughters and the youngest one which is five years old all she could talk about now is the coronavirus . I asked her yesterday while we were in the pool does she miss school and her friends and she said she really does miss them a lot .The kids need to get out and play and get some exercise.at the same time the public has to follow the rules . Thank you very much
Citrus	General	One of my concerns is when we do re-open we need to be able to protect ourselves as much as possible. However with the lack of disinfectant, wipes, rubbing alcohol, hydrogen peroxide, hand sanitizer, we can't possibly do that. Washing hands is best but sometimes not an option and I want to be able to wipe down things I come in contact with. These items cannot even be order inline for back order. We have got to get these items back on the shelves before re-opening.
Orange	General	I do not think anything should be open until end of May/early June and that is ONLY if there are zero to no cases happening every day and no deaths. There is no vaccine so better safe than sorry. I do not feel like this quarantine is being taken seriously. Even when we have gone out to grocery stores for curbside pick up or gone to do takeout, we see people not adhering to the social distancing. A little sacrifice is worth the rise in deaths and cases that we will see if we reopen too quickly. All restaurants should be able to do curbside pickup/take out, but everything else as far as nail salons, places that are nonessential and big social areas such as farmers markets, food halls, theaters, performing arts centers, etc should be closed, especially gyms! I was appalled to learn that gyms may open which is the worst place for germs. Definitely no gyms! that actually should be one of the last things to be open as well as the large social places. If things need to open up first, it should be places such as cafes, mom pop shops, places they can control better. If schools should remain closed then why should everything else open up? Makes no sense to me. We can't go back to work but we can go get our hair done? That is a recipe for disaster. Please be smart and do the right thing. Wait until the cases are so low it's safe, like they have recommend over and over again.

AMERICAN OVERSIGHT

Pinellas	Professional Services	We humbly and respectfully request Governor DeSantis and The State of Florida to so order; A. Barber Shop's, Hair Salons, Nail Salons or similar "Beauty Salons" to be classified as an "Essential Business's." Addendum: We request this order to encompass all other similar Small Business's in Florida, including but not limited to; Tattoo and Piercing Salons and Animal Grooming Salons and Services. B. Allow the reopening of these "Essential Businesses" after the "flattening of the curve," as related to COVID19 or May 1st, 2020; whichever occurs first; under the following restrictions due to the ongoing threat of COVID19. Please note: This request comes after the Paycheck Protection Program (PPP) for loans to Small Business's nationwide has been depleted/ AND in absence of a response from any SBA or PPP lender. While we realize the threat of COVID19 and the importance of "flattening the curve" in our communities, we are requesting permission to be considered "Essential Business's"; and have the ability to operate with the following restrictions and safety guards in place: 1. Employer shall provide work spaces in compliance with social distancing requirements from the CDC. This includes each employee and their work station. 2. Employer shall provide facial masks to all employees to wear while working with individual customers. 3. All Barber Shops, Hair Salons and Nails Salons and other included small businesses under this order shall operate by appointment only. Allowing only one customer, per employee, per appointment time; to minimize risk of exposure in any "Waiting Area". 4. No Barber Shops, Hair Salons or Nail Salons or any other included small businesses under this order shall operate with "open" "Waiting Areas". Customers may not wait or congregate for an appointment, in any amount. 5. Owners and Employees agree to enforce; and operate under these restrictions listed above; to reduce the employee's/community's risk to exposure to COVID19, while still providing an "Essential Service."
Miami-Dade	Finance	I believe Miami Dade should stay quarantined. The people of Miami Dade are not obeying curfews, at least in Kendall. Workers are not following social distancing guidelines including curbside pickup workers. Miami Dade should continue remote schooling. Please enforce a stricter quarantine to the following areas: Kendall, Richmond West, Richmond heights, Cutler ridge, and Homestead. Please announce free food for the public more often. Post flyers on social media (twitter, Instagram, or Facebook).
Orange	General	Open Gyms and health clubs
Hillsborough	General	Florida should not be reopened until there is a clear decrease in Covid cases. There should be a definite decline, for some time. Most businesses that are closed realistically cannot follow cdc guidelines, but will open either way, endangering more Floridians. I am currently on furlough, and have not received my unemployment benefits, yet I still understand that people's health and safety come before money. People are still dying in large numbers. Kids are home from school and Disney is closed. There is good reason. It is not time to eat grouper sandwiches and play on the beach. That time will come again, but not now. There should be atleast a consistent 2 week decline before ANYTHING opens up.

AMERICAN OVERSIGHT

Lee	Retail	Im a hairstylist in a busy salon. My mother who is 68 lives with me and has immune issues. I dont think there is any way in my profession that i could stay six feet away.i dont just cut hair. I wax eyebrows and lips. I also color hair. How can you guarantee this disease will not be passed on to myself or my clients.it is impossible to wear gloves while cutting hair and i can barely breathe in the mask.i feel my industry needs more time..we are just to close in contact for safety nor can an employer say for sure that i wont get sick or bring it home to my mother. This would open up the employer to a bounty of lawsuits because safety and security are a workplace right.
Pasco	General	We are ready to re-open Florida! Please move forward as quickly as possible. Restricting healthy people is detrimental to our economy and personal health. Please suggest that the older and health comprimised take extra precautions as they go out into the public but allow the majority of the population to return to their daily lives.
Miami-Dade	General	I suggest before any public areas be opened for the general population they should be visited by the Governor and his supporters, in a group, as a demonstration of their belief in the wiseness of the move.
Leon	Government	Enough is enough. The evidence points do the fact that they had him orders do not flatten the curve in any meaningful way. Let's reopen everything and let people make their own choices based on their own personal risk tolerance.
Martin	Healthcare	Open Gyms - people social distance at gyms under normal circumstances. If alcoholism is considered an essential business, which is obviously sad, then gyms are also essential since they support physical and mental health. But many other businesses can easily regulate capacity and social distance - currently Home Depot and Publix social distancing isn't very good considering the narrow isles.
St. Lucie	General	Dear Committee Members, I am a resident of St. Lucie County. It is time for Floridians to get back to work. Throughout the past weeks of COVID restrictions businesses deemed "essential" remained open. Floridians who patronized those businesses voluntarily engaged in social distancing, voluntarily followed CDC guidelines. With these businesses open, sometimes serving hundreds of people at a time, twelve hours a day, seven days a week, we have witnessed COVID numbers falling. The State of South Dakota never mandated a single business closed and are also seeing COVID numbers falling. Every business is essential when families are dependent upon that income for healthy and happy lives. I believe these facts prove that Floridians are responsible people, who love their neighbors, and will CHOOSE to do the right thing. But we need our elected representatives to do the right thing; we need our businesses open. We don't want government handouts. We want to get back to work. We want our businesses open now, not later. Sincerely, Michael Liberatore
Palm Beach	Recreation	Please re-open all golf courses, spas, exercise spaces. Thank you
Palm Beach	General	DO NOT OPEN THE STATE UNTIL AFTER THE MONTH OF MAY. REVISIT THIS IDEA IN 4 WEEKS.

AMERICAN OVERSIGHT

Okaloosa	Retail	I think we are moving way to fast to open back up. There are way to many peaking cases still. Opening up is going to lead to more people out, and less social distancing with proper sanitization. Once beaches open, beach stores open, then the bars etc... We will be back at square one. Once you open our beaches then the outsiders from other states come in and may bring more cases!
Duval	Professional Services	As a Hair Salon owner, I closed early on March 23, 2020. I have booth rentals who is older and most of their clientele is 80 to 90 ish. years old, so I didn't want to get them sick or myself, as well as the other ladies in the shop. So I don't feel they should have to pay for a booth they can't work, so I'm out of a lot of money to pay my bills at the shop. I'm waiting on the mayor to open Jacksonville back up with precautions. I have ordered 200+ face mask and I'm making a lot of face mask for us as cosmetologist and per customer. We sanitize after each customer, and have 6 foot away from each booth, and one customer in the shop at a time per stylist.(4) My shop is 900 sq ft. We hope to open May 4, 2020, Monday Thur Saturday. Our barbicide and barbicide plus kills aids, tuberculosis, and all bodily fluids, we wipe everything down good with it and Lysol, and Lysol wipes. Please let us open Monday. God Bless 🙏
Lee	General	I am deeply disappointed in Governor DeSantis' overall handling of the covid-19 pandemic. He was terribly late to close beaches and other places of public assembly, and he is reopening things too quickly! There has been a nearly complete lack of leadership and guidance from the governor, from the Florida Dept of Health, the Lee County Health Dept., and most others with an important role to play. I believe that there are far more cases than reported due to grossly insufficient testing. It looks like the governor is more concerned with saving the Florida economy (particularly the tourist economy), than in stemming the incredible spread of the virus and death. While I too am concerned about the Florida economy, his approach is short-sighted and will end up in a greater hit to the economy when the pandemic sees a new surge.
Collier	Tourism	Beaches in collier. Should be reopened.
Hillsborough	Professional Services	I know you are overwhelmed with comments.i wonder if you will even read them. I know you are making tough decisions. This is for company and large franchised salons. I am a manager for Great Clips and served in the military so I understand keeping things moving but as of right now we are not capable of social distancing or performing hair services safely. We stand less than 6 inches from our client and service over 400 clients a week. Even with masks and all of our disinfectant products we still cannot guarantee safe services. Why would we risk even one stylist getting sick and possibly dying. We as a community have to do better. I would be honored to walk you through salon service at my salon so you can visually see the health concerns. I understand getting a haircut makes people feel better but if we can't be as productive as we were before this we will not be allowed benefits but still not make ends meet because we will he making less than half of our usual income.. much to consider.

AMERICAN OVERSIGHT

Hillsborough	Retail	As a mall employee I don't feel safe with malls reopening. Malls attract large crowds of people and the don't get cleaned like they need to. It's like a big Petri dish and it's unsafe. I have a asthma which makes me more likely to have a harder time fighting Covid-19 I understand the money aspect but my health and safety is more important than the money right now plz give it another couple of weeks to really flatten the curve and then maybe open the malls back up.
Miami-Dade	General	Mandatory covid-19 state wide testing done in a monthly basis, mandatory antibodies testing state wide on a monthly basis. If people test positive they have to be segregated in a medical facility until they heal or die. Those that test negative can proceed with their activities given they have a non expired monthly covid-19 negative test result. In order to be allowed into a concert or sporting event or other entertainment person must have their negative unexpired test results with them or otherwise confirmable through a database accessible to all businesses.
Broward	General	Hi! My name is Elizabeth, I'm a Sunrise resident. I work in a place in Broward that sees large large crowds (5,000+). I'm very excited to go back to some form of "normalcy", however, I think we need to be very wise about how it happens. The idea of this thing spreading across our grocery stores, gyms, etc - it's terrifying. At the same time, I definitely understand why we need to get the economy back up and running. I would like to provide my input. I think we can open non-essentials, but I think we need to have (mandatory) laws in place, such as wearing a facemask while in public. I think we need to mandate social distancing laws. I think we should not allow large gatherings(especially in south FL). I think we require stores to have a certain amount of sanitation per hour. I think all these things will help us stay less vulnerable. But my biggest thing is - I think we should MANDATE sick hours. EVERY employee should be able to take off if they are sick. EVERY employee should be protected with those rights knowing that they will not be fired, and that they will be taken care of. I understand some people might abuse this - so maybe it could be that you mandate sick hours, however, if an employee is showing signs of COVID-19 - they will be required to get tested and forward that test to their employee (less people will fake it in order to get time off, and the people who do have it should be informing their employers anyway).

AMERICAN OVERSIGHT

Orange	Government	Hello respected and elected officials of the great state of Florida! To add my input into the matter of reopening the state, I would suggest that we wait until at least mid June to see how the cases are trending and consider input from the CDC. Reopening prematurely would only make it that much harder for Floridians to go back into "shelter in place" if cases being to surge. We've gotten accustomed to this new, temporary way of life and I'd rather stick it out until we're sure it's time to slowly reopen. Lives are at stake. As a public school educator, I'm hopeful that we can get this virus under control before next school year starts in August, to the benefit of our students. Please do not rush to open our state and put so many of our elderly and others at risk. Thank you for your consideration.
Santa Rosa	Recreation	We moved to Florida after looking for a job for 6 years so that we could walk the beaches. I have psoriatic arthritis & the sand is the only thing I can walk on that doesn't hurt my body. I walked the National Seashore every day & most days never saw a soul. When the beaches were closed down, I understood that we needed to get all the vacationers home. Now however I don't need time limits on my beach! PLEASE, PLEASE reopen our beach with no limits & please get our business back to work so our economy can thrive. If people are scared to get out, they can stay home but my family needs the environment & beaches we moved here for. Thank you! Linda Johnson
Palm Beach	Healthcare	With COVID-19 cases and deaths rising, as a Registered Nurse, I strongly believe that it is too soon to open South Florida for business, without widespread testing for antibodies to determine the extent of infection in our communities.
Hillsborough	General	This lockdown must end. This has gone to the point of ridiculousness. The economy is going to ruin and the reasoning is not correct. Every year we have a cold and flu season. Every year people die. This stripping America of our Constitutional Freedoms must end. The entire premise for this lock down is erroneous. Open the world back up before it is too late, and America is no longer free. The damage already done will take years to repair.
Orange	Finance	when will we get weekly unemployment and federal $600.00

AMERICAN OVERSIGHT

Manatee	General	When dealing with this pandemic, I am choosing at this moment to trust that the governor is doing what he thinks best. What I implore you is to fight against the news outlets sensationalizing this whole thing in an effort to get viewers, they are just creating panic. And since half of the country no longer trusts the news media, it results in further division. We all need honesty. It starts at the top. Don't just tell us what you think we should hear. If in January, we should have been wearing masks, do not say, masks don't help. Tell the truth, there aren't enough masks. Please don't use them. Otherwise when you come back two months later requiring masks, you look like dictators. We are Americans. We are and should be always fighting for our freedom. There should be no surprise when people fight back. That's not the only example. Remember, "Ask not what you can do for your country, begins with the world ASK. Ask and use honesty. That would be refreshing and received by most of us Americans.
Polk	General	I know this is hurting our econmy but we wii recover. The most precious thing we can not get back is all the people that have and wii die. Please in the name of God who gave us life please wait do not rush back and let it cost even 1 life.
Palm Beach	General	My name is Shanell and I live and work in Boca Raton. I work as a manager at a spa, and have been laid off like many all over the world. This time is really difficult for me. No money coming in. No stimulus check since my tax return is somehow still procession after a month. No unemployment, either. Still pending. No way to get through on the phone. No email response. The only godsend so far is access food stamps which is still allowing me to eat thank god. The process was smooth and pretty quick. This covid is also particularly scary because I am a Type 1 Diabetic in severe condition. As much as I fear starving, I also fear getting sick. With an autoimmune condition, healthcare professionals warn every year that a simple cold or flu can lead to serious complications or even death.. so this is particularly unnerving. I'd like to address 2 concerns. It's too soon to reopen non essential business. I work in a non essential small business and truly understand the losses.. but we have no choice. We are not at apex. Even if we just passed the apex, the numbers are still pretty damn high to risk. I fear going back to work in an unsafe environment. I fear seeing more of the public not following the distancing and small groups, masks. I hope and pray that these silly people protesting don't influence your common sense judgement on this.. please, we need more testing to control this. We know many are asymptomatic. We would just be rolling the dice. Focus on opening ESSENTIAL business first. Hair salons, gyms, spas, casinos are not essential. Work on opening the courts and other things that can be done safely with social distance. Also ENFORCE social distance. I still see crowds all along the beach and barrier islands and I fear how it can affect my health with all the carelessness. Follow the protocols the white house came out with...actually follow it. Thank yoi

AMERICAN OVERSIGHT

Broward	Healthcare	i forgot to mention the need for contact tracing. We need to know where the clusters are so that they can be quarantined. As the science says, we will be facing mutiple outbreaks of this virus before there is a vaccine or its run its course.
Duval	General	Sweden did it right with their herd immunity. Their per capita death rat is no worse than Finland who shut their economy down. Essential business employees are not getting sick at pandemic rates. OPEN the State. Sunshine kills the virus so why is sunbathing on the beach a bad thing. OPEN the beaches all day. We all know what we need to do and still be open. Our governor is a coward, the Georgia governor is the brave one. The Georgia governor is a leader. Let those who don't want to take the risk stay at home . Let the rest of us join the essential workers and let us work. Despite the head lines of a few sick spring breakers, the vast majority of them did not get sick. I fear the panic more than the virus.
Orange	General	Please do not rush to open Florida too soon! We should continue to stay at home for at least another month to protect the citizens of Florida. After that point, review the data to ensure the number of new COVID-19 cases and deaths have decreased for another two weeks. At that time selectively open the more essential businesses a few at a time. The beaches in Jacksonville were opened way too soon and put many people in danger. Do not listen to the vocal minority, who would put all of our health in danger. Don't let the tireless work of our nurses and doctors go to waste and jeopardize the citizens of Florida, by opening Florida too soon! Responsibly take an appropriate amount of time to ensure everyone is safe when evaluating opening Florida.
Duval	Retail	Open our state up!! This is out of hand! People need to start functioning again. Let the people that are afraid stay at home. We need our freedom back!
Osceola	Retail	I don't believe we should open retail spaces as of yet. To clarify, opening department stores will only increase the spread of the virus even further. Even if we implement a social distancing rule or check customer's temperatures, many asymptomatic people can unconsciously spread the virus even further. We cannot disinfect clothing on racks or shoes on the shelves. If we do, it'll damage half of our inventory and lose more money in the process. As a person who works in retail, the risk of health endangerment is greater than a paycheck that doesn't match the value of our labor. If we reopen Florida too soon, then a second wave will occur and we will be in this cycle yet again.
Orange	General	It would be very irresponsible to open up at this point.
Lee	Food	I would start opening up restaurants using the CDC regulations, restaurants main factor in Florida. I would start you opening up Gyms following the CDC regulations, I would not open up tattoo And hair salons right away but eventually gradually open them up slowly using CDC regulations. Beaches open using CDC regulations, state parks using CDC regulations. Hotels,Country clubs open up using CDC regulations.
Broward	Tourism	People are talking about keeping tourism closed until January 2021. Suggestion would be to allow people who are staying on resort property like Disney World and Universal Studios would be the only people allowed enter the parks. This way there will be social distancing and no so many people in one area.

AMERICAN OVERSIGHT

Hillsborough	Professional Services	I am a small business owner in Hillsborough County. I saw my business come to near complete halt with the Stay-at Home directives. I took all of the steps that were recommended by the “experts” to ensure that my office was clean for my 4 employees. I applied for the PPP loan through the SBA only to see the funds go to much larger companies. I continued to pay my employees despite a near 90% decrease in new business income. I watched the politicians weigh the bad information spread by the media, look at projections and not hard facts and waiver on positions based on special interest concerns. The single hinderance to our economic future as small business owners is to see bold and quick steps to open up the businesses in this state. We need to stop being treated like infants. We have taken and will continue to take active steps to ensure our safety and the safety of our customers. We cannot continue in limbo. Even businesses that are open have little to no business. Opening in phases will just delay and provide no benefit. I watch as literally hundreds of cars drive past my office off to some “essential” work or errand. There is zero enforcement of the mandates. People are not respecting the social distancing. Allowing the fast food industry to stay open was a slap in the face. With little to no visible precautions car and car drives up to accept food from a server through a window who is not wearing a mask and no other hand or body protection. That server is interacting with hundreds of people a day. At the same time, I am prohibited from having any in person client meetings. Prior to the forced restrictions I saw an average of 4 to 6 people per day in a clean professional setting. I guess it was assumed that I would stop cleaning and was not intelligent enough to take the necessary precautions. We have all been in a waiting pattern for weeks. Watching a curve that did not happen, field hospitals that did not get used. We have waited for the crush of patients at hospital being carried out the back in body bags to be staked like cord wood. This is what has dictated the policy thus far. The common person who has been decimated financially by all of this was given no options and then no assistance. We have fought it out ourselves so far. It is now your opportunity to give us a fighting chance to make it on our own, but

AMERICAN OVERSIGHT

Collier	Professional Services	Opening "non-essential", luxury, cosmetic, or other (fill in the blank) businesses at this time is dangerous and irresponsible. The businesses I'm referring to are hair salons, barber shops, massage parlors, tattoo shops etc. These businesses are not 100% necessary for a persons day to day life or immediate well being, so they should be considered a luxury. Opening these before having a 14-day decline in confirmed cases and deaths is putting these business owners in a tough spot, aside from the obvious health risk for them, their clients, and their families. Let's say that there is a situation where there are 5 salons in the area, and 3 of them decide to open next week, and two of the others do not, let say because they live at home with their mother who is going through chemo (which I'm happy to provide a real life example of here in FL)... if those 2 don't open, the majority of their clients will go to the other 3 salons, leaving the other 2 without an income when they reopen. This potentially puts the owners and workers in a situation where they have to decide between a paycheck and the health of their family, and that is completely unfair to them. We're all eager to get back to work (I am currently unemployed as I work in hospitality... even though I have been unable to sign up for unemployment due to the atrocious website/services) but we need to make sure we have all the facts, details, and responses in place prior to doing so. To think that we're gearing up to open businesses while we still learn new facts about this virus is mind blowing.
Seminole	Recreation	I would like to see state park and trail heads open up as soon as possible. Getting outside and exercising is important during our quarantine for mental and physical health. State closures are putting more people on county trails, which is counter intuitive for social distancing.
Sarasota	General	With less than 1% of the population having been tested, and with new cases still continuing to grow, now is NOT the time to reopen businesses. LISTEN TO THE EXPERTS IN INFECTIOUS DISEASES!
Manatee	General	With Florida now 21 days from it's peak (1,575 new positive COVID-19 cases on Apr 3rd), an increase in testing capacity (ave of 10,726 new tests per day since Apr 3rd) and a "new positive test" per "new test" percent of less than 7% this week, it is beyond time to start Phase I of the President's task force re-opening plan. Maintaining social distancing guidelines (6 ft between individuals, 50% capacity at restaurants, telecommuting for those who can and face masks for those who can not maintain 6 ft of distance), businesses should be permitted to open May 1st as they are capable of complying - this includes all businesses that can meet the guidelines. It's time for individual accountability now that the public is informed of the dangers and the protocols. Healthy people in low risk demographics should no longer be restricted from work or leisure activities.
Orange	Healthcare	At this moment I dont feel confident in the State officials. My local government officials I trust them more. Unless theres mass testing and we can do what South Korea with the tracing and mobile alert on who is infected I dont want to go back to the office.

AMERICAN OVERSIGHT

Lee	Food	Wouldn’t be a safe move to re open Florida early . May create another wave. It’s too soon.
Pasco	Information	I own a nail shop in Land o Lakes I am wondering when i can open my shop. Is May 1st okay or do I have to keep waiting.
Manatee	Real Estate	Please open Florida. Trump promised "30 days to slow the spread" which we suffered through. Somehow the strategy drifted from "not overwhelming the ICUs" to "avoiding deaths" to "people not getting sick." It's impossible to reduce the deaths and numbers who catch the virus. The ONLY ONLY criteria should be not running out of ICU beds. If you don't allow it to spread at a reasonable rate, it will take a decade to finish spreading through the population. You are doing more harm locking us down. There will be more deaths from resulting poverty. And OPEN THE KEYS. Those are public roads and they have no right to block access to public space and essential businesses.
Seminole	Healthcare	DO NOT RE OPEN. A good economy is nothing if people are dead. Too much at risk for the regular person let alone the vulnerable population. Stay closed until a vaccine is available.
Miami-Dade	General	I think it will be unprudent to reopen Miami Dade in the month of may. I think they are still too many unknowns and letting people go out will for sure cause a surge of new cases
Brevard	General	Dear Governor DeSantis - I wrote you a note to your email a few days ago. But since this portal was put into place today, I wanted to mention to you to please, when you decide to re-open the State, to do it cautiously. It is still risky. Until a vaccine is found there may not be an end to this coronavirus problem. I'm a very powerful psychic... a REAL one... and if we are not cautious this virus can terminate Florida as we knew it before. A vaccine must be found first, before the State Government finalizes all re-opening procedures for the state. I'm just in a hurry like everybody else is, if not more, to go back to work and go to Disney and the beaches and the malls and everything else, just like everybody else... (and I haven't been to Disney in a long time !), but caution is important in re-opening the state. I'm a real psychic (clairvoyant)... so plz be cautious in re-opening. Good luck in everything... . you are a COOL governor and wish you the very best.!... and I hope you are the Governor again after the next Florida election.!..... plz ignore any typos in this email... thanks and bye...
Broward	Retail	I am an employee at Dolphin Mall and being the epicenter of tourism given Miami International Airport and a heavy populated area, I think Dolphin Mall should remain closed until June or early July once the COVID cases drop . I fear for the safety of myself as well as my employees if we go back to work soon. If plans of re opening do occur, I suggest having a capacity limit and constantly sanitizing areas within the mall. Please give this much thought and consideration. The only places that should be opening are small businesses not located in shopping centers.
Pinellas	Accommodation	I forgot to add open up the pools at apartments, mobile home parks and condos. Everyone does not use the pools at the same time and we can keep a distance from each other. Also the chlorine in the water should kill the virus along with the sun.

AMERICAN OVERSIGHT

Lake	Information	Phase 1 reopening indicates that the state must have a downturn of the virus for 14 days. We have a population of 21.48 million people and have tested 318,827 and of those 9.4% or 30,100 have tested positive. We have tested 1.5% which to me is not acceptable. The graph clearly shows that the curve has not shown a downward trend. I know that every person and business want to go back to work but what is the plan to social distance? As soon as Jacksonville beach opened back up people were violating the 6 foot rule. Businesses that require close human contact should stay closed. Restaurants should have 6 feet or more between tables or seat less people. Paper menus and throw them away after each use. I would recommend that businesses check each customer for fever.
Pasco	General	I vote to lift the stay at home order.
Brevard	General	"open" everything immediately! We can continue to social distance appropriately with ALL our Florida businesses OPEN for business !
Orange	Information	Ignoring medical suggestions and not extending the stay at home order will not only hurt us long term, both in terms of our economy and our general health, but could also hurt our image, ruining our ability to bring in tourists. We should be able to protect our most vulnerable for another month or two without killing our healthcare system, hurting our economy, or potentially making a very bad situation worse by extending our first wave of this disease.
Collier	Transportation	Linstol is my business. We supply the airline industry with all passenger, cabin related products with the exception of food/beverage.
Sarasota	General	I feel that is too soon to reopen Florida. I hope that people would just be a little more patient and wait. A little longer.
Duval	General	I do not agree with opening the state earlier than it needs to be. That will put the rest of the state at risk of being exposed. I work in an office setting and do not like the idea of sitting within 3 feet from someone knowing that I could be exposed as the virus is still out there. I do not want to risk my family being exposed; right now I am working from home and do not want to risk my health or my families help.

AMERICAN OVERSIGHT

Pinellas	General	I do NOT want the state to re-open until EVERY citizen is protected from catching COVID-19. This includes mass testing for the virus, mass antibody testing, more ventilators and N95 masks for ALL citizens - medical personal, first responders, restaurant staff, retail staff, school staff, etc. EVERY LAST PERSON deserves the right to life and an N95 face mask! Personally my son has asthma and per CDC Guidelines is at high risk for getting very sick. This has put my family into a very scary situation. Every time one of us leaves the house to get food we are putting my son's life at risk. If you had/have a child with asthma you would be scared out of your wits every time you were forced to leave to get the bare necessities for your family. This is a very scary time that we are living in. I do not want to feel like I killed my son for food. I do not want to put his life in jeopardy to go back to work in retail and am looking for a work-from-home job. Every one of us is risking the life of every other person right now. We all are interdependent. Our every move affects everyone we come into contact with. I live and shop at one of the 2 Publix stores in Pinellas County that has had a COVID positive employee. This was in the paper around April 13th. I called the store that Monday because I had been there Saturday to buy some food. I asked them if I had come into contact with the person on Saturday - if that person was working that day. The man said no. Then I asked what they are doing to protect their employees and customers. After all - all the employees use the same time clock, break room, etc and therefore they have all been exposed. The man said they gave all the employees face masks -
Broward	General	Re open Florida immediately!!! We are dying financially, which causes physically, and beyond emotionally. We don't have ANY government assistance. We pay taxes and this shutdown has gone on BEYOND way too! Everyone who is too scared to re open the country can continue to stay home but this is ruining our lives and its getting harder to dig out the hole. My children are suffering we are SUFFERING! REOPEN NOW!!! Starting May 1st with ALL elective surgeries and dental centers, followed closely by parks INCLUDING playgrounds and play structures, followed closely by dine in restaurants, salons, barbershop, gyms, etc. Followed by concerts and live events. I expect to wear a mask but everything should be open and normal by June 1st the LATEST! I do not expect this 6ft rule anywhere, simply wear a mask or stay home. I expect my children to return to school AUGUST AS PLANNED and we will be normal! This is insane!!!! We are not poor or dependent. We live well off in Silver Lakes, we own a SUV, a Benz, and a Ferrari. I'm a stay at home mom, my mother is a teacher, my father is a 3 pension retired veteran, my mother in law is a head nurse MD, my husband is in surgical sales. We are good honest working Americans and we all agree enough is enough. OPEN America!!!

AMERICAN OVERSIGHT

Miami-Dade	Healthcare	As we continue to have empty hospitals in South Florida, personnel in outpatient centers, hospitals, drs office are now without a job! Small businesses will disappear from our community unless we return to work with restrictions. Our population is exposed daily to grocery stores, pharmacies, curve side food pick up, yet if you need a hysterectomy as a medical procedure necessary you have to way. Breast cancer patients undergoing reconstructive stages surgery have to wait, and yet we are now looking at opening parks, boat ramps. Elective surgery needs to open!! Give guidance, but allow the sector of our population with the most knowledge on bacteria, virus and practicing sterile techniques to return to work, before we all go under with the economy!!! No I do not want assistance I want to return to work !
Lake	Food	My husband and I are huge outdoors people especially fishing that's why we relocated to Florida from the Atlanta area 4 years ago. My husband is 68 with some health issues another reason to relocate to this beautiful state. We also enjoy outdoor venues, festivals and gatherings. However, this has changed as you well know. I still believe it is too soon to open up. Maybe restaurants with reservations only and limited seating. Maybe continue fast food drive thru only for a while. I'm still up in the air on nail salons and hair salons. I have several friends that own high end salons in Atlanta and they are proceeding with extreme caution. Very limited appointments and over the sterilization procedures. But, can you trust everyone to adhere to these strict policies, probably not. It's just too soon. Thanks for allowing my input! God bless and stay safe.
Miami-Dade	Professional Services	I think it is time to reopen Miami-Dade county. Salons, nails salons, laser centers, retail stores should open their doors. People need to be cautious but the numbers indicate that this virus is more common that what we thought. Schools need to reopen in August and life needs to continue.
Orange	General	I implore you to allow local mayors the ability to open cities in phases. This way places with higher populations and infection rates can open at a more gradual pace than rural areas with less population. Florida is much too large a state to adopt a one-size-fits-all approach.

AMERICAN OVERSIGHT

Hillsborough	Government	I just feel the economy needs to be open ASAP. The US has never ever closed the entire country and stop the entire economy over a contagious illness. The biggest take away I have learned from this is the Government is trying to get the people of the United States dependent on the government to move it towards socialism and take away our freedoms. The current decisions have destroyed our booming economy and millions of people out of work. Many people will never be hired back because the businesses will be weary of another outbreak that the government will shut down the entire economy. Florida's unemployment system is total failure to the Florida Workers. The governors of each state should be proactive in making sure their states are better prepared to handle pandemics and emergencies. Our hospitals should have been stocked with equipment needed to handle any emergency that may arise instead of them being reactive and not able to handle this situation. Our state is quickly approaching the hurricane season and may be faced with another catastrophic situation and we have no way to rebound that quickly from the current COVID-19 catastrophe let alone handle another one. At the most our state should have asked the people to follow the guidelines that CDC had suggested and kept our states economy strong.
Pinellas	Government	Open the damn state now!!
Holmes	Retail	The economy needs to re-open!!!! My small business is all but dead right now. Newly opened store front since Hurricane Michael. Please open back up Florida!!!
Pinellas	Recreation	Let people that want to work work. People that want to stay home should do so without penalty from work. Gyms should be open, as they lower risks of complications of Covid and aid mental health. The economic effect of this is way worse than the virus itself. Open us up!!
St. Johns	General	Please continue to restrict short-term rentals, in particular, larger "party houses" that can accommodate 10+ people. The local residents on my little street are older, at-risk citizens. In just our small beach-side neighborhood there are 36 rentals that accommodate 11 or more people, with a few for 18+ people. (That's just on VRBO - not sure how many more on AirBnB and local rental sites) Now is not the time to come party next door to our elderly residents.
Polk	Recreation	I would encourage you to open all state parks and open spaces boat ramps beaches now. I would say let's start opening business restrictions of dining capacity until may 15 . Hotels and everthing else on may 15 we did to be free to lice our lives of our choosing enough already

AMERICAN OVERSIGHT

Palm Beach	Government	Why even think about opening the state back up when the number of cases are still so high? Florida is such a big state with a huge population and it's a major tourist spot. Why risk DYING for some time at the beach or going out...? I get it, I love the beach as much as the next person and it sucks that we may not all have the summer that we were hoping for, but if Florida opens up, people will be coming and going as they please and just spreading more and more of the virus than before. People only want to go out so that they don't have to do everything themselves. Everyone is so used to getting their hair done by someone, nails done, makeup done, getting their house cleaned, getting their car washed, people getting their food and groceries for them, babysitting, etc. With the amount of time that we have all been inside of the house, it gives parents the opportunity to be closer with their children and spend some actual time with them. Also gives us the opportunity to eat actual home cooked meals with our families as well. We should all be thankful that we can take some time off from work to spend with our families and do the things we have wanted to do that we've never had any time for because we just all work so much. Yes, not having money is very hard, it's even harder when you're paying rent or mortgage and have children to take care of but our safety is more important and the minute you decide to open the state up, you don't just put a few people at risk, you put EVERYONE at risk. Not only that, but we all see how serious of an impact this is having on our healthcare system, people with other health issues are not being taken care of correctly because so many people have the virus and you're willing to open up states early and put an even bigger strain on the healthcare system because a few people cant handle staying inside for a while. When in all honesty, this is the safest our country has ever been since everyone has been forced to stay inside. Please, please, please, think before taking these measures to open up the state.. Don't just think about yourselves, think about the nation as a whole. Just so you don't forget, the Coronavirus can effect anyone, young or old, healthy or not. Please think responsibly and reasonably, and Stay safe everyone.
Miami-Dade	General	Good afternoon, I think the governor is right. We need to open up everything slowly. Sadly I was positive with the virus & it was not fun it was very scary & the sickness was horrible. I think the only places that should be opened first should be the places that's essential to everyone needs. Some hair stores should be opened up at least for us women that need hair products. Not everything we can find at places like Walmart. Places like entertainment (clubs) shouldn't be open to fast cause we need to continue practicing social distance & places like that would be impossible. I hope my opinion matters cause I truly hope we continue this social distance & wearing face mask.
Palm Beach	Professional Services	Open businesses in Florida. Retailers will collapse. People can wear a mask to enter store, limit number of people, movement directions. Target & Walmart are open. Dollar stores are open. I was in Joann fabric & people were buying craft & home decor. Restaurants & closer contact businesses will have to have a safer way to operate. Open up the retail stores while they Still exist. Another month & many many stores will be closed for good. I'm in the 65+ age group. Open up the economy!

AMERICAN OVERSIGHT

Collier	Finance	Hello, please keep the state shut down. Also, take care of your people.
Lake	General	Please reopen
Lee	Professional Services	Seems it would be best to have people that can work from home for so until this is over.
Miami-Dade	Recreation	Please allow the reopening of Miami Dade county beaches for exercise activities. It makes zero sense to open gyms before opening beaches. If you can enforce beach closures you can enforce social distancing on our beaches.
Hillsborough	General	As a healthcare worker, just because the curve is slowing down DOES NOT mean we can reopen everything. Unless you want a second wave, I recommend to continue social distancing and keeping non-essential businesses closed UNLESS they can stay open while practicing social distancing.
Palm Beach	Healthcare	It would be reckless and harmful to Florida's residents to reopen the state. South FL is a dangerous hot spot. While a rural area in another part of the state may seem safe to open, there is no way to prevent people from going from one county to another, potentially spreading the virus and creating an even more dangerous situation than we have now. If we don't get better control of the virus situation, we can't fully open the economy up. People are afraid. Surveys show that most people do not want to risk going out. Do I need a haircut? Absolutely. Would I go to get one? Absolutely not. I didn't even go in early March, before the shut down. I don't want to die because of my hair. You should want to either..
Leon	Food	My family owns a Chick-fil-A franchise in Tallahassee and are struggling to take care of not only our family but also our 40+ employees. There is no reason we cannot enter Phase 1 and have a happy medium of being open for business as well as taking extra precautions such as masks, extra sanitation, etc... The entire economy is bleeding out for something that may or may not happen
Hillsborough	General	Please don’t open the state too soon. If I have to go back to work too soon, I will expose myself to the virus and i have a daughter with cancer who can’t afford to be exposed. If I don’t go back voluntarily, I’ll lose my home so I don’t have. a choice once the state opens again. Just wait till it’s safer, please!
St. Johns	General	We need to reopen the state, businesses, everything. Who is to say my job, my family, my live is "non-essential " over others?? My job closed on March 19, 2020 and still has not reopened and I was told on April 20, 2020 that when they do open, I'm not being rehired! They have not received a dime from the PPP loan program AND i have not received any unemployment or the stimulus money from the Federal government. It is now April 20, 2020 and it has not gotten any better. For those that are afraid to go out, they can stay home. Why should I have to stay home because my neighbor does? Open the state!!
Palm Beach	General	YALL ARE DUMBASS AND YOU ARE TRYING TO KILL US ESPECIALLY PEOPLE LIVING IN LOWER INCOME PLASES
Broward	General	WAIT FOR MORE TESTING TO BE DONE!! TEST THE WHOLE STATE FIRST, THEN SEE WHAT YOUR DEALING WITH..

AMERICAN OVERSIGHT

Pinellas	General	As an individual who had Covid-19 without symptoms and now has antibodies by getting an antibodies test offered through my doctor, – I am asking you to make Covid-19 antibody testing more available to everyone. I truly believe that more people have been infected without knowing or having any symptoms, like myself and my family. Please also open up the state ASAP!-----So that we can all get back to normalcy. My children also do not like online learning. The kids need to be with their friends. We all need to go back to work and pay bills. ASAP!
Citrus	Government	Please do not open Florida. Lets wait and see how it goes for Georgia and other states that have opened. Even if there is another wave of the coronavirus we'll be right back to where we are. Prepared or not.
Collier	General	I think it's time to start reopening the economy. I will be staying home because I am older but young people can not survive without money, food, and employment. I am willing to stay at home to allow others to survive financially. Open all the beaches at the same time so they aren't overwhelmed with people rushing to a limited number of open beaches. And if the virus kicks up again, don't wait so long to shut everything down!
Alachua	General	Please continue the shelter in place ordinance. We can wait to "open up" the state. Health is the most important thing and the stay home orders are working.
Broward	General	I honestly think if everyone stayed home for 14 days this would of been over a long time ago. I mean everyone except healthcare and groceries. No garbage service, no public transportation, no McDonald, no biglots, No Lowes. Only healtcare and food and gas. I am 56 and I am scared.
Broward	Retail	I live in Broward & work in Palm Beach County. I am a GM of a retail shoe store & I am concerned for the safety of myself & my staff, if we reopen to customers before medical experts say it is safe to do so. Once we do reopen, I believe we should have strict mask mandates in place when shopping in my store for both my staff & my customers. I also think we must have strict limits on the number of customers who can be in my store at a time, so we can all maintain social distancing rules.
Palm Beach	Education	Regarding higher education and students return to campus. Students are commuting and living with family and also living in close quarters in residence halls. There neesd to be specific guidelines created to reopen college campuses, the virus could very easily spread on a college campus. Students and staff need to be able to get tested prior to return to campus and nobody should be allowed back who has the virus. Additionally, money should be available to provide staff with masks and sanitizing supplies. Guidelines for cleanliness need to be established.
Broward	General	This shutdown has negatively affected our entire state. Reopen Florida!

AMERICAN OVERSIGHT

Lee	General	I beg you not to open too much too soon. I'm an essential employee that has reported to the office since day 1. I am very careful following all CDC guidelines and have worn a mask since the beginning. I'm the family member that goes to the grocery, picks up prescriptions etc. I see people all day everyday that DO NOT use one precaution. Yes I need a haircut, nails done and brow wax but no way will I do any of that even when open. My community pool shouldn't open because it will be overcrowded with idiots. I say yes to opening beaches but only to residents that have drivers licenses for that city ex: Fort Myers Beach only people that live in Fort Myers can go there. Yes allow chairs umbrellas and let people sit. I realize that this will take manpower to check. But 2 Lee County Sherriffs cars are parked in my parking lot all day everyday. Make them work!! Open the hotels to Florida residents with ID to stay at a non gouging rate we will come. I'd stay on Sanibel for days if open. It's my favorite beach. Do not let people into the state that don't belong here at first see how that goes. People are worried about a surge when opening. Let's not help that happen. Two more very important things which I'm sure I sound like a broken record please fix the unemployment situation I know people that are losing everything and I have fed them. I'm happy to do so. Two, the stimulus checks are not coming fast enough. Thank you.
Lee	General	I feel businesses should be open and people can go where they want. The risk and safety instructions should be well advertised so people can decide for themselves, because the greater majority won't be affected and can help the ones who should stay in place. This is a great opportunity for businesses that have been closed to clean up, some of the restaurants especially are disgustingly dirty/ smelly. How clean the businesses run themselves will determine their success rate, shoppers should be willing to wear a mask no matter who is sick and who isn't to promote the ongoing way of life and livelihood of Americans. This practice will probably diminish many other communicable disease rates. Men should stop spitting on the sidewalks.
Duval	Food	I'm concerned about all of the food establishments that have been closed for indoor dining, during this time. Will they be required to have an inspection of some kind? I would hope they would sanitize all seating, tables, restrooms, the cash registers etc.... My family of 5, enjoys dining out a few times a week but I would like to know that it's safe to do so.
Sarasota	Food	DONT open until we have a vaccine!!
Brevard	Tourism	I don't want to die. Please don't open too soon.
Pinellas	Recreation	I still feel the virus is very serious. However, it would be nice to at least have the beaches open so we could walk them for exercise. Also, if everyone would at least wear a cloth mask it'd be nice.
Leon	General	it is too soon to reopen the state. We don't meet any of the criteria laid out by the White House for moving into the next phase. New cases per day has stabilized, but has not declined (and certainly doesn't show a steady 14 day decline). We do not have sufficient testing or contact tracing in place. We should stay closed for at least the first half of May, but use that time to dramatically ramp up testing and contract tracing capabilities. But staying closed longer, we have a better chance of successfully reopening without having to close again.

AMERICAN OVERSIGHT

Santa Rosa	General	start the phase to open up the businesses!
Palm Beach	General	Please do not open up the state for business it is too soon listen to scientists not to the president. So many of us have been sacrificing for weeks we do not want to see this all for naught... again listen to The Scientist not the politicians. Ron DeSantis you work for the people not for the president!
Walton	Tourism	If Short Term rentals are opened back up, please consider that "Season" in NWFL is happening now. While in most other parts of the State summer is "off season". Please limit the number of Short Term Rentals allowed, and have an ordinance as to what needs to be put in place to ensure they are sanitized properly. Typically the rentals here are Saturday to Saturday with many cleaners "flipping" 3 to 4 hours (anywhere 3-6 bedrooms) from 11 to 3PM (You can not sanitize a home that quickly). Also keep in mind that our hospitals are way below what is needed to meet our basic care without 750,000 tourist here. In our county there are less than 150 hospital beds and 14 Ventilators. IN OUR COUNTY. And many of the hospital in our area are also still not up to 100% from Hurricane Michael. PS: I understand the need to open for our economy, however, PLEASE take into consideration how many will come here if we don't put limitations.
Lake	General	Please reopen. Our economy is suffering
Orange	Government	This virus has been a hoax from the start. H1N1 was 100 times more deadly than this stupid virus. Open our state up immediately! You are violating our constitutional rights! You like all politicians are out of your league on this one! I thought Desantis would be good for this state, but I've seen now he sucks! The mayors are ignorant as well. If you are going to say 3/4 Of Floridians don't want the state open, why haven't most of us working class even been invited to the poll???? You lie as much as these states and the cdc about this hoax of a virus. GET OUR STATE OPEN OR FACE THE NEXT REVOLUTION!!!! Not to mention lawsuits.
Lee	Retail	Please REOPEN NOW!!! we have already been shut down for six weeks! I know of both small and large businesses in the Fort Myers and Naples area that are either shut down and out of business or will be soon if we don't reopen. It is economically ruining our cities in our counties there is no or very little revenue coming in to these entities including you the state of Florida we are all going to be in bankruptcy if you don't reopen the state. This is not New York City, I do feel for them but the daily TV broadcast of Governor Como has scared all of America and people think we're not going to make it physically. We will all be OK but economically going into bankruptcy or worse can have a bigger physical effect on us than the virus. Tim Traycik Business Owner and Florida resident 42 Years
Polk	General	Please reopen our state. I know too many people are without jobs. Our economy needs this. Our parks, trails and beaches should be open. I believe the isolation was good for a period of time but we need to get back to work and back to life
Marion	General	I believe we shouldn't reopen the state yet as our numbers are continuing to rise and I believe in the safety of our health and well-being

AMERICAN OVERSIGHT

Lee	Information	Hi, First A question. Are there any medical professionals or seniors on the task force, if not there should. I am not in favor of a fast opening of business and beaches in Lee county. As a senior citizen who can't even go to the grocery store for fear or the virus, I don't see how inviting more traffic and tourists to the area now can be a safe way to go. Florida's population is heavily senior, a very vulnerable group. I traink there is a chance that this will increase the health problem. Please don't gamble with our lives. Be safe. Thank you Amy
Miami-Dade	Professional Services	The State should open step by step with all healthy measurements.
Broward	General	Please keep Floridians safe. Do not open up the state until scientists and medical doctors say it is safe to do so.
Polk	General	As an immunosuppressive I am scared of the state opening too early. I think the decision should be made by a Healthcare professional and only after a significant decline in cases. Also as a server it would be impossible to serve tables and keep with social distancing guidelines, you can't toss drinks and food at a table.
Duval	General	Mandatory Work-From-Home (teleworking orders) should be extended through phase 2 to allow parents to continue working from home while schools are closed. Parents with school aged children need to have a way to continue to supervise and assist in the distance learning as well as care for their children. Our younger children cannot be left to navigate this system themselves, much less be left alone in general. Thank you for your hard work and for your consideration in this matter.
Pinellas	Healthcare	I do not feel it is a good idea to open up until the cases have seriously dropped off. I would wait until at least July 4th. Or August would be better.
Nassau	Recreation	I believe it would be wise to extend our stay at home order until May 15th so that we can see the effects of it being lifted in Georgia. If Georgia cases and deaths spike in 3 weeks after their stay at home order has been lifted, we can assume the same will happen here. We can then assess if spikes here will be more than our hospitals can handle. Open the beaches for exercise, limit hours. Enforce social distancing. Gyms should not be allowed to reopen. People can exercise at home and outdoors. Gyms are Petri dishes for viruses and bacteria. The general population does not clean equipment properly, if at all, after use. Gyms will not enforce social distancing because they will be too concerned with getting people in the doors in order to make up for lost revenue.
Jackson	General	Please allow those shops that want to open, using CDC guidelines. I live in the panhandle and there have not been many cases, only 12 in Jackson County, no deaths. I am thankful that . I believe a lot of the problems have been because of the mefia- people seem to only want to hear the bad. I have faith in our citizens and medical professionals. Let's start a slow open and see how it goes, can always slow back again.

AMERICAN OVERSIGHT

Walton	Tourism	Reopen Florida! I support the full reopening in the state of Florida. As a registered voter, tax paying citizen of Florida who has been furloughed for 6 weeks from the vacation ownership sales industry; the numbers do not support a continued shut down! The fear mongering of the media, the draconian measures of government control- it has to stop! Elderly, medically compromised or those wanting to continue living in fear and being controlled can stay home. But healthy individuals who want to work should be able to! I am not required to descend into poverty for anyone. I refuse to participate in "quarantine life" until there's an unsafe, untested vaccine released in eighteen months. I refuse to receive said vaccine to make others feel more safe. I won't set myself--or my children--on fire to keep you warm. We are Allowing fear and policies devoid of scientifically accurate data to destroy Florida and America! We have a constitutional right to take risks! Life is full of bacteria and viruses--many of which spread before symptoms manifest and after they subside. We have a right to receive OR refuse vaccines. Stop allowing the government to destroy: The Food Supply Small Businesses Medical Autonomy Access to Healthcare Religious Gatherings Privacy Rights Fellowship Tourism When the "new normal" is filled with starvation, depression, suicide, child abuse, domestic violence, imprisonment, and pure DESPERATION, the virus is going to look preferable to the world you helped facilitate. Reopen Florida Now!
Collier	General	Please reopen the state, especially Collier County. This virus has been no worse than the flu. Many businesses and employees are suffering. Thanks
Hillsborough	Tourism	I appreciate the work the governor has done for our safety but I feel that the we need to open up the state. Our economy cannot survive without the state reopening. I, like many other furloughed employees are struggling because the unemployment system is broken. Please, let us go back to work. Thanks!
Pinellas	Government	I would vote to open the beaches with social distancing in Mind. I guess the police on the four wheelers that patrol the beaches looking for drinkers could enforce the large gatherings..
St. Lucie	General	Reopen all Florida immediately its wrong to take away our right to work and travel
Hillsborough	General	Please do not hurry to reopen Florida. I think it is way too soon. Wait another month, then gradually open some businesses, a few at a time. Be prepared to close again if there is a resurgence of the virus. I am a registered nurse, so my comments come from a medical background.

AMERICAN OVERSIGHT

Pinellas	General	How about opening up orthodontists? Bad enough to have broken wires and brackets but this is delaying getting all this metal out of my mouth. The dentist is a health care professional who knows safe practices. Start thinking smart and not politically!!!!
Polk	Manufacturing	I live and work in polk county. Lots of industrial businesses are still open and have no precautions. Sending more people back will only bring more cases. We are already risking our lives with no additional pay or precautions.
Palm Beach	Government	Thank you for broadcasting all meetings. Very helpful for communicators.
Lee	Recreation	Recreation, as it applies to healthcare. Senior Citizens with health issues (heart, diabetes, back and joint issues, etc.) that have long established personal physical therapy through City Pool sponsored daily water aerobics and lap swim programs, need desperately to return to the water. With water aerobics being one of the top physician prescribed exercise regimes delivering low joint impact with simultaneous whole body circulation benefits, program cessation has personally been a detriment to me as a diabetic heart patient. Please consider the inherent safety of pool chemical atmosphere, persnal separation, sunshine and wind environment as positive factors. My health depends on this excellent low impact exercise! Thank you.
Brevard	Administrative	I will make the use of mask mandatory and encourage remote work
Collier	General	I feel that any business that chooses it is safe to reopen is free to do so. However, I feel a requirement for reopening is that the owners and managers of the business are right there with the front line people. If its a factory, management is working on the factory floor, not in a hidden office. If its a restaurant, management is working with the customers as well as the minimum wage employees. If its safe enough for the lower level employees, its safe for the higher level employees. If this is enforced, businesses will take it upon themselves to ensure safety and will open when they feel they have the right protocol in place.
Hillsborough	General	I do not believe it is smart to open up Florida to any extent yet. It is asking for that second wave right at the beginning of summer. It isn't easy for anyone but the lives of others are more important than the economy (if that's a hard concept imagine a family member of yours dying from COVID-19 because we just couldn't wait to reopen). I truly believe this shouldn't even be on the table right now with 300+ additional positive CI cases in FI between last night and today. Irresponsible and unsafe.

AMERICAN OVERSIGHT

Orange	General	PHASE ONE I would urge you to open as many businesses as possible with social distancing rules, and if close contact (such as salons, barbershops) masks are required by both customers and staff along with enhanced cleaning. Restaurants should be able to open with six feet distancing. All outside parks, etc, should be open with social distancing. Hospitals open for normal business with enhanced screening. Vulnerable.....nursing homes remain on lockdown.....those over 65 with underlying conditions suggested to remain home. Set June 1 as an opening date for theme parks, enhanced social distancing, temperature checks at entry, crowd capacity limits. Review for 14 days.....if no spikes....continue to loosen. There aren't going to be many businesses left if this drags on much longer.
Hillsborough	General	I think it's too some to reopen Fl. It would expose more people to contracting it giving it to out healthcare workers. Also, let's monitor Georgia's numbers to see how their numbers jump, flatten or continue to come down.
Lake	General	Reopen Lake County businesses
Broward	Information	Please open Florida! By May 1st! We need people to get back to work! Open retailers such as Macys! Open parks, beaches! This stay at home did what it needed too! It's time for everyone to get back to work! This is not good for the economy! It is not good for anyone mental health. I give you full support Open Florida. Thank you.
Pinellas	Healthcare	The state and the country have not hit their peak. It is very haphazard to reopen while record numbers are coming in daily. Wait for the numbers to stop raising. You can make more money, you can't bring back the dead.
Pasco	Recreation	It's time to open up Florida. The government has gone too far with these restrictions. People can and should go to the beach the pool the restaurants. We are all for safety but no more constraints. There is no "new normal" and don't subscribe to it. We want our country back and we want it now not in June or July
Polk	Recreation	Why in the works would we have classes ass the outdoor parks and beaches. Especially knowing that UV light, heat and humidity kill this virus. This was a severe over reaction caused by the media. The vulnerable should have been quarantined. NOT the whole state.
Miami-Dade	Recreation	gyms and parks should be open

AMERICAN OVERSIGHT

Polk	Food	I am 100% against the reopening of Florida dine-in restaurants on May 1st. I work as a server at a well-known Golf Resort. On the average day we can see between 100 to 300+ guests in our restaurant. These guests are not locals they have flown in just to golf on our courses. I am fearful of the outbreak that might occur due to reopening the dining room too soon. I feel we should hold off on reopening until HEALTH officials agree it is safe to do so. I would just like to feel safe in my own work environment. I think this is the best option for my coworkers, myself, and our guests.
Palm Beach	General	I understand playgrounds being closed for the time being, but I think open spaces like parks and beaches should be open, including swimming and picnicking. If I'm not mistaken, I don't think even NYC closed their open spaces. If necessary, cone off every other parking spot and perhaps require an ID with a local address to access local amenities. Or like they did in the 70's with gas rationing, limit those that can use the amenities by license plate number.
Lee	General	While I'm extremely concerned for our local economy, I'm in fear over health concerns, as well. I'm particularly concerned over putting children in school, where they have a high likelihood of becoming carriers of COVID-19. I'm also concerned that people with compromised immune systems will be forced back into an unsafe and unprepared work environment.
Pinellas	General	I do not feel that Florida should be opened yet. There are so many vulnerable people here and we have no effective way of determining who may have it and be asymptomatic. In addition there is no formal tracking plan in place. Add to this that there is no proven treatments and no vaccination. This equals a recipe for disaster.
Pinellas	General	I am a mother of 2 school age children, a professional, and a full-time resident of Florida since 2008. Do Not re-open businesses or the beaches or the state in general until doctors and infectious disease doctors agree that it is safe to do so. Please- the economy shutdown pales in comparison of The potential loss of human life if we don't continue to abide by social distancing and quarantine protocols until there is an effective vaccine.
Pasco	Government	Do not reopen the state. Listen to scientific evidence not politicians and big business. Please think of your fellow human beings and keep the state closed...their lives are in your hands.
Hernando	Food	Open restaurant like before with separate tables or seating

AMERICAN OVERSIGHT

Seminole	Healthcare	April 25, 2020 The Honorable Ron Desantis RE: Excluding the reopening Dental Practices in Phase One of FL Reopening Plan Dear Governor Desantis: I am a dentist who practices in Seminole county in Florida. I am writing on behalf of my practice and our 7 employees to urge you to exclude the reopening of dental practices in the initial phase of FL reopening plan and to keep the prohibition on elective dental surgeries and procedures in the state. Extending of this prohibition is necessary to both ensure that residents of FL have access to proper emergency oral care and the enormous impact of COVID-19 resurgence of infection rate can be mitigated. If the prohibition remains in place too much longer, I fear that many dental offices will contribute to the spread of COVID-19 levels. Presently we are only treating emergencies, allowing social distancing to remain and limit spread the aerosols created by dental procedures. Every day that the number of patients stay away from aerosols created by dental procedures decreases the likelihood of an outbreak of COVID cases to patients and dental staff. Continuing to provide dental emergencies allows us to continue to reduce hospitalizations due to dental emergencies and the expenditure of the limited resources and decreasing the likelihood that a patient will be exposed to COVID-19. We are health care providers and we want to contribute to the reduction of COVID cases. Infection control has always been a key part of the practice of dentistry but the exposure to aerosols is too risky for our people. With the use of PPE (N-95 masks or equivalent, face shields, gowns and gloves), we are using limited PPE supply and exposing all patients and employees to this deadly virus. I am asking that you work with other elected and appointed officials
Lee	Food	I do not think we should reopen fl cause we still have more cases popping up and if we do open there is just gonna be more people getting sick and its stupid to reopen the beaches right now to i think we need to do another 30 days to see how we are then go from there i know people are stuggling right now i am to even thou im still working but its not enough i live in the back of my work in an rv cause i cant afford anything at least yall have a home to live in. So as of right now i do not think we should reopen fl ots to soon we have over 30,000 cases what is wrong with people these days
Broward	General	I think we should keep the lock down definitely till April 30 and then there after make sure people are required to wear masks and stay 6 feet apart; we have to strictly enforce these social distancing guidelines (imposing fines and/or penalties if not adhered to) if we are going to slowly and cautiously go back to work. Restaurants and food serving establishments need to have their employees wearing masks and gloves going back this early as it is going to be risky and you know there is the possibility of a resurge of infections. The reality is we have not gotten this disease under control but again we do need to get our economy restarted let everybody not forget the risk we are taking and going back to work while the virus is still not contained safely.

AMERICAN OVERSIGHT

Hernando	Healthcare	It’s time. Too many people out of work. We don’t want a hand out, we want to work
Miami-Dade	General	We should not reopen until it is medically safe to do so. We could open in phases based on necessity of occupation and ability to maintain social distancing. Require social distancing rules when reopening and continued wearing of masks/gloves. Jobs that can be done remotely should continue to be done remotely. Prepare schools to potentially continue virtual learning in the fall. I'd suggest continuing to quarantine until at least June.
Washington	Healthcare	For the record, I am not proposing that people go running around in the streets exposing each other. I am suggesting that many of the impositions from state, local, and federal governments are excessive and do not contribute to containment. Complete restriction on deep sea fishing off the panhandle of FL, halting of logging and sawmilling in PA, and curfew in Colquitt county GA likely do not slow spread much if at all. I admit there may be places where sawmilling would be inadvisable, but by and large (at least here) small operations will not contribute to spread. 3 guys who hang out together in quarantine should be able to hang out fishing. I think many politicians are using this as an opportunity to see what they can trample, without due reasoning to whether the COVID spread is affected or not. Any job that can happen without increasing risk should be allowed to proceed. That will reduce the damage done to the economy. Many more people will be hurt by business closures than by coronavirus, I fear (naturally conjecture on my part). I am very concerned that the current measures will be for naught. I was reading an article that discussed the research of 2 university mathematicians. They have come to the conclusion that since no herd immunity is being developed right now, we will probably see the huge spike that is trying to be avoided. We are simply delaying it more than changing it. I don't know, obviously I'm not a statistician or an epidemiologist. But I have had this concern. Without herd immunity, I think we are banking on the sun/warm weather to kill off this wave of infection. Once travel sanctions/quarantine are lifted, any remaining undetected cases in the community will spread rapidly, possibly more rapidly than now since people will let their guard down.

AMERICAN OVERSIGHT

St. Johns	General	All non-essential businesses should be able to open by 5/1/20 as long as they follow the guidelines for practicing proper hygiene , constantly cleanliness of establishment and customers should be seated 6 feet apart temporarily. Hair salons/nail salons should be requested to take appointments only at this time- no walk-ins. The majority of small business owners have spent their life earnings as well as their time to open and run a successful business and with the stay at home orders you are asking them to sit back and do nothing while they loose everything!! People who do not feel comfortable going out can stay home as well as the elderly and people with underlying health issues until they feel safe to go out in public. This is the United States of America which is democratic country and the people of the United States of America should not be told that they have to stay home due to the fear of catching a virus. This should be our decision on whether we want to face this virus and fear that the Media is publicizing or sit back and do nothing. The United States of America is a country that fights for their rights and freedoms as stated in the Constitution not a country that hides in fear and waits for the fear to overtake us and do nothing!!
Sarasota	General	I believe it would be a mistake to open up Florida too quickly as a lot of our population here in Venice are senior citizens. This is far from over I believe & there is already talk of another wave. I have two grown sons that work in the medical field. The medical staff and first responders are already stressed and overwhelmed. They have to worry about their safety and bringing this virus home to their families. The last thing we need to do is overwhelm our hospitals with more positive cases of COVID-19. Or another wave of it . Public safety should come first . There are so many of those out there like my self that are struggling financially because of this virus no unemployment coming in as of yet but thankfully we are home and we are safe and we are healthy.
Palm Beach	Food	Hello. i work for a restaurant in palm beach county florida. as much as i am thankful for being open for take out and still having a income. but i think opening up certain things in palm beach county, which is one of the worst county with coronavirus cases is not the smartest move. i think other counties that have less cases should be the first to open and test it out to see if we can handle it. flu season is coming and it's going to get worse, and to reopen a lot of the economy for it to happen again is ridiculous. start off slowly and open the things that can handle social distancing without putting people in danger.
Okeechobee	General	We think they should wait another month before opening anything. It is to deadly and dangerous to take more people lives that do not need to die. We are seniors and my wife is 75 with about 3 different underlying conditions that it would kill her if she got it. Please keep everything locked down until the middle or 3rd week of may or later. Thanks Governor DeSantis. Tim and Judy Rain
Lee	Education	I work in higher education and feel that if the state opens to fast we will end up with a massive amount of illness. I think that thing should remain closed until at least August.
Hillsborough	General	I would like to have the state re open, I am just afraid that doing so too early would cause a huge spike in cases, causing another shutdown.

AMERICAN OVERSIGHT

Brevard	General	Please leave restrictions in place for another 30 days. Easing the restrictions too soon would be a major mistake. Virtually all health & disease experts are saying June at the earliest. If all goes extremely well, you can relax the rules early, but it will be very difficult to reinstate restrictions later Err on the side of caution.
Manatee	General	Do not open Florida until an actual health professional tells you it's safe to do so.
Duval	General	I am an RN, and I volunteer with a clinic. I spent most of my volunteer time working outdoors with homeless people. I really think we need to start re opening the economy. I understand the coronavirus is dangerous, but it is a small percentage of people who have a serious reaction or die from it. Common sense tells me that you don't ruin millions of peoples lives for such a small percentage. People are subject to virus and bacteria every day. I wonder what will happen when people who have made their environments so sterile, so back out. I see such divisiveness among people. The dirty looks you get from people even as you shop at the grocery store has really made me very sad. Everyone is so much more judgmental than before. People can stay home if they don't feel comfortable going out, but for the majority of people, please reopen things. And let me help my clients again. All of their services and resources have been shut down. Thank you.
Osceola	General	Think when we start to reopen we need to ensure social distancing is happening. I believe testing has gotten a lot better. We need to continue that. The needs to be guidelines like temperature checks everywhere, and a questioner to fill out. Masks are a must. Also the stay at home to be lifted to a point. There are people who hasn't seen there family members in over a month. If you are health you should be able to see the members or your family.
St. Johns	Healthcare	It is far too early to allow massage therapists to go back to work. There's absolutely no way to keep enough distance and there's no way to sanitize every surface to prevent transmission of COVID-19. Even if massage therapists could get N95 masks there would still be a lot of risk from surfaces. I have been a massage therapist in Florida since 1997 and still have an active license although I stopped practicing 3 years ago. Massage is a medical necessity, although it is not emergency care. Please exercise extreme caution before you allow massage therapists to go back to work. As much as I'd love to have a massage, I will not be getting one until it is safe.
Lee	Professional Services	Barber shops and beauty salons need to be aware of new sanitation laws as soon as it is available. Sanitation supplies are hard to find. We are going to need time to get ourselves prepared. Even if means we are shut down longer. Please let the DPR decide what is best to keep us all safe. I really don't want my client to become ill. And I certainly don't want to become ill myself. Keep in mind that Fliridas numbers are up and the barber and beauty industry puts us very close to one another We need to be updated on the progress and decisions made as soon as possible. Thank You, Vincene Lewis

AMERICAN OVERSIGHT

Hillsborough	General	We need to be extremely cautious and precise about reopening. We are in a good spot number wise because Floridians have stayed home.If we open too soon or too quickly we will be undoing the good we have done this far protecting ourselves. If you are going to open salons they should all have appointments so times can be spaced out for safety Same with nail salons. Stores should have limited hours and a set number of people who can be in the store at one time.Trying on clothes is a real concern. Restaurants should continue take out until June. Please be very cautious as this is important to the health of all Floridians.
Hernando	General	Governor DeSantis, please reopen the state. Too many people are living paycheck to paycheck and no longer have an income, particularly with the unemployment site difficult to get through. People are going hungry. Its time to reopen
Pinellas	General	I believe that it is to soon to open. There are new cases everyday and if we open to soon so many people will be affected. We need to do what is safe and that is staying closed until the numbers go down will be for the best of everyone
Pinellas	Government	I do not think it's a good idea to re-open the state at this time because cases are still clearly rising, as well as deaths. So, if people are still coming in contact with others at shopping malls, salons, movie theaters, bowling alleys, and other recreational activities all we are doing is continuing the spread of the virus. I think we should wait until the CDC and HEALTH PROFESSIONALS state that it is okay for us to start getting back to our normal lives. Until then, I think we need to keep social distancing, and being extra cautious. Peoples lives are more important than the economy at this point. Unless you're trying to weed out the weak, it's not a good idea.
Lee	General	I think Florida needs to open up get back to work and some normalcy still be safe but more people have died from the flu we didn't have to close down the state for that
Volusia	Professional Services	Hi! I hope this comment finds everyone well. I am a LMT here in Volusia County. My industry is not getting clear cut answers or hearing directly from our governing board. Please Advise. As Massage is definitely not at a 6ft distance, or with the asymptomatic carriers, how can we ever really return to the Profession in which we love, until this is behind us? We at the very least need to be in the last phase of reopening. Please address LMT'S directly, so we have a clear cut plan of action. Thank you I ABSOLUTELY! believe it is TO SOON to reopen. We are trying so hard to flatten the curve, I feel opening now will make it all for not. We will all be ok. Supportive of each each. Make it thru. We just need to stay in lockdown just awhile longer. For all the people that need us to. Please think this thru. Please. Thank you for taking the time to read my comment today. You are appreciated. Be Well.

AMERICAN OVERSIGHT

Escambia	General	Opening the economy is inevitable- it needs to happen but should be done w as much caution as economically possible. I think face masks should be mandated for all businesses for all employees and for all consumers. Essential healthcare workers, first responders, and those who ensure our public safety should get discounts, raises, and more recognition for their efforts; teachers should get more funding and incentives, and non essential corporate leaders should be furloughed. The focus should be on safety of Floridians and that includes safe practices such as mandatory face masks, more sanitation stations, more funding for essential health care workers, small businesses, restaurants, public safety employees and teachers.
Broward	Retail	Please consider a science based and cautious approach to reopening FL. There are still many unknowns and still many infected. You have to take this slow and large malls and big box retailers need to wait longer to open.
Lake	General	Reopen with masks and social distancing
Pinellas	Healthcare	Given the complete ineptitude of the government to manage unemployment benefits, and given the fact that there is no “overwhelming” of the hospitals, it makes sense to allow Floridians to return back to work. Special precautions should be taken for the elderly population (nursing homes, etc) and perhaps disinfection protocols for stores and places of public traffic... but the state needs to open up without burdening restrictions
Okaloosa	Healthcare	How can I be tested to see if I have the antibodies for covid19.so that I can donate blood in hopes helping someone else. I do no believe I have had covid19, but I do believe my husband did. I never got ill. From what I understand, that could mean that I have antibodies.
Palm Beach	Professional Services	I own a hair salon in lake worth and as much as i need to get the salon reopened for financial reasons I am also concerned that reopening to soon in our area, which is made up mostly of senior citizens, is not in anyone’s best interest. We are a very busy salon with many stylists so limiting capacity of people is not feasible if everyone is back to work. I don’t see how it can work if it’s not all (of course utilizing so social distancing and ramping up disinfection in between clients) or nothing. Everyone is anxious to get their hair done so if we open they will all be there. The cost of opening the doors will not be worth it if staff needs to be split and clients need to be spaced to far apart. It would literally take 3/4 of my daily totals away but still have overhead and salaries to pay. Please be realistic with guidelines when you do feel it’s safe for us to reopen
Duval	General	Open it all up except to those most vulnerable
Hillsborough	Government	Please don’t open Hillsborough County or Florida. We need few more weeks. I am very scared to go outside especially having a pre existing condition.

AMERICAN OVERSIGHT

Hillsborough	General	Dear Governor DeSantis, I am a resident of (Name your County). I want to thank you for recognizing in your Executive Order 2020-91 that “Attending religious services in churches, synagogues and house of worship” is an “Essential Activity” and lifting the restrictions on the Church’s Right to assemble statewide. I am requesting that you also recognize that the First Amendment includes the Right of all People to Peaceably Assemble. In consideration of the essential right it is important to note its connection to the Right to Petition the Government for a Redress of Grievances. Without the Right to Peaceably Assemble the Right to Petition is strangled into non-existence. Historically, the power of the people to petition their elected representatives has been recognized to be most powerful in the exercise of assembly. This is why our founders enumerated both of these Rights in the First Amendment. The Supreme Court has held many times over the history of America that the Right to Peaceably Assemble, especially in the aspect of protest and petition, is a “Bedrock Principle” of America. You have repeated publicly that the government has no authority to regulate the meeting of the church, neither does the government have an authority to prevent the people from peacefully assembling in petition or protest. As you did for the church, please lift all penalties imposed upon Right to Assemble and trust the people to follow the guidelines set forth by the CDC.
Polk	Tourism	I am a 37 year old female who is in close contact with many people on a day to day basis when I am at work. I am a server and have been for 20 years.I have been out of work since March 15. I am out of money and waiting on unemployment since March 20. I cannot afford to be out of work. At the same time... I have a 90, almost 91, year old grandmother who I have to be in constant contact with, here locally. She is in compromised health. If something were to happen to her because the restaurant opened and I had to go back to work, it would destroy me. I am not worried about me getting sick, I am worried about who I would give it to. I have an Uncle is Massachusetts that has been on a ventilator for almost 4 weeks, due to this virus. He is still testing positive. In isolation. In ICU. Today is his and my Aunt’s anniversary. Please DO NOT OPEN the state of Florida until testing is available to anyone and everyone for free. It is not worth the risk of the many lives we would be endangering. Please fix the unemployment system until it is SAFE for us to return to work as “normal.”
Nassau	Healthcare	Allow elective surgery in counties such a Nassau where there are few cases of Covid and hospitals are relatively under used. Delaying many such surgeries can result in poorer outcomes.

AMERICAN OVERSIGHT

St. Johns	Education	As a Special Education teacher at a separate day school in the neighboring county I am concerned with how we will address our most vulnerable students as well as those of us that teach and care for them. I know this is an issue for the fall but we need to have a plan in place and planning takes time and preparation. My class is comprised of children with significant health issues and all of the children require assistance with movement, changing, eating, communication,etc, - in other words - total assistance. There are other classes like this throughout the state. These children are transported on buses - again requiring physical contact with their equipment and being in close proximity to them. As a state we need to address how these children will have their needs met while protecting the teachers, aides, therapists, bus drivers, etc who will be in physical contact with them on a daily basis. Social distancing will not be an option. PPE will need to be provided for those that interact with them - for their protection and to protect those caring for them. Until a vaccine is developed these children are at greater risk of complication from infection. Unfortunately many of those that work with the, will be at higher risk as well - due to the higher rate of health issues in the ESE field. How will we address children have fevers or symptoms who are not kept home? Parents send them throwing up and with diarrhea in normal times. Will there be new policies to address keeping children with illness home to protect the rest? We are all aware that schools have become daycare for some parents and a necessary evil. However, sickness spreads. This virus has shown that in an awful way. Now is the time to address this issue in policy. My school has several classes primarily comprised of children with autism. How do you attain social distancing with these children? Or get them to wear a mask? Many put things in their mouths all day- thus transmitting whatever they may have to other surfaces. We have a number of emotionally behaviorally disordered classes. They will not social distancing or keep masks on. I can easily see spitting on peer/adults being the new form of attack. How do schools deal with the defiant children who have ESE labels that preclude suspending them for such behaviors? These are just a few of the issues I know need to be addressed
Miami-Dade	General	Every job is essential. We should not be picking winners and losers. I think general guidelines should be given and let all businesses open. They can wear masks, respirators and gloves. Have rules to keep people six feet apart when possible. I'm lucky enough to be able to telecommute with my job but there are many people who have lost there jobs. I go to the grocery store once a week and people are there social distancing. Other businesses can do the same.
Miami-Dade	General	It is very important that we start the antibody testing ASAP. Make this easily accesible, affordable and free to people that are in need. Also we need more transparency, we want to know how many beds and respirators are available in each hospital on a daily basis. This platform is attainable with technology and internet. This will help the public understand the level of traffic of hospitalizations. This knowledge will help influence how we move around. I am fine to go back to slowly opening as long as the numbers in hospitals stay low. That is the entire reason we are doing this. Let's not forget that. This will help as well if and when we get a second wave. Keep airport flights at a minimum for now. Essential travel only.

AMERICAN OVERSIGHT

Lee	Government	Get the healthy back to work and in nature!! Florida is not getting their unemployment checks anywhere near the rate other states are and we are looking fantastic in regards to new cases and death rates even now that their being allowed to add presumed cases and not just covid positive that was effective April 14th. Most of our healthcare systems are far from being overburdened and some are suffering greatly due to the LACK of patients, seeing tremendous profit losses and having to furlough medical workers which could encourage abuse of the covid reporting system to aid in profit. Getting elective surgeries back ASAP is very important in hospitals that are seeing few cases for those reasons and of course also to prevent what was once elective becoming emergent. We also know there's not enough funds so we need to get the healthy back to work ASAP so they can feed and shelter their families and so we can better protect the vulnerable to stay home by reserving funding for them to stay sheltered and fed. Kids need to be kids again, the amount of depression I'm seeing with my own with social isolation, the fear being pushed over facts is affecting an entire generation that are already has the highest mental health issues then we've seen in history. More people are sitting at home sedentary, feeling hopeless and drinking at rates that will far exceed what we were dealing with prior to this pandemic, there's no doubt addiction rates and deaths from overdoses, domestic abuse, suicides will rise significantly if it's continued. We are not NYC and the benefits of quarantine is not worth the risks anymore, Let Florida get back to work and let us have a right to our god given nature that should have never been taken away from locals. I vote republican to help preserve our rights and freedoms, most agreed to the original stay at home order for flattening the curve but letting it continue now with growing evidence that it can do more harm then good can be seen by many as a violation of our civil rights. No ones asking for the vulnerable to be put in harms away, they should be encouraged to stay home and we should be helping them doing that safely but the healthy are being denied the right to provide what the government can't and that's stability during this crisis and we are being left with no choice but too suffer. Crippling multiple generations to give a false sense of security to our elders when this virus isn't going anywhere doesn't seem like a fair trade off. In saying that, theres no win-win here and
Pinellas	Government	In regards to re-opening the state of affairs. It is my strong opinion that we need more time. There far too many new cases daily, and deaths. To take the risk of going backwards and undoing all the hard work the residents have done to control this beast, regression would be devastating. As much of an impact this has had on the economy, nothing is more priceless than saving peoples life's, and the suffering of the families who have to watch their love loved one die from a distant. How can this even be a question? We need more time!
Lee	Education	As an educator I am relieved that we will continue distance learning. I am hoping that by the start of the new school year things will return to somewhat normal. I truly believe that we should wait at least another month until reopening non-essential businesses. I have shown no symptoms, but I would like the opportunity to be tested.
Volusia	Healthcare	Even though the curve may be flattening out now, opening everything up too early will cause a drastic increase in the number of infected people. Even though some businesses might be suffering financially at the moment, if more people get sick, these businesses will continue to suffer.
Hillsborough	General	Get our economy back open please! Prepare our healthcare facilities to be able to handle a rise in virus #'s & have plans in place. However, we need to get back to work & life!

AMERICAN OVERSIGHT

Collier	Professional Services	Until Florida and Collier County has on-demand COVID 19 testing, re-opening the economy is a dangerous idea. I work in the salon and healthcare industry, and I do not want to have to come into contact with clients who have not been tested, nor do I want my clients to be concerned they may contract the virus from me. It seems like every level of government in the US has given up on testing, when the exact opposite is needed. We should be doing millions of test every week so people can know if they have the virus and can receive the necessary medical care.
Martin	Food	I am a manager of a restaurant. I am happy to have my job but as I have said before we should not have even been open for takeout. We have risked ourselves everyday for how beyond busy we have been. I do not believe we should open for dine in. It has been hard enough to try and keep people out of our establishment let alone distance ourselves from one another when having to run 20 employees a shift and managers. We are a huge corporation and busy when dine in is open. I feel we need to wait until the experts say it's safe. We would just be adding to our own anxieties and health risk that we already have on a daily basis. Please wait to do this. I would love however to sit on a beach for an hour.
Sarasota	Retail	Dear Governor DeSantis and Task Force Members, Thank you for taking public submissions. The decision to re-open should remain in the hands of the county health officials and the individuals who are affected by the pandemic. State wide regulations cause unneeded economic damages to small businesses and employees that will soon become irreparable. The county health officials understand (or should understand) the current state of the hospitals within their counties, and should be empowered to enact restrictions based on current hospital burdens. The people in the counties that are not restricted can make ADULT decisions as to what they want to do - they can shelter in place, or make their own decisions about their risks. Please allow us the ability to make decisions about our own future. Thank you for your time.
Hillsborough	General	While the economy is important and our businesses need help to survive, if the citizens die or are severely injured due to an early open....the economy and the careers of all responsible leadership will be negatively impacted. Stop playing politics and act in the best interest of all Floridians. If that isn't enough of a reason, know that we the people will remember and never forgive your ineptitude.

AMERICAN OVERSIGHT

Hillsborough	Government	I am writing to say It is time for Floridians to get back to work. Throughout the past weeks of COVID restrictions businesses deemed “essential” remained open. Floridians who patronized those businesses voluntarily engaged in social distancing, voluntarily followed CDC guidelines. With these businesses open, sometimes serving hundreds of people at a time, twelve hours a day, seven days a week, we have witnessed COVID numbers falling. The State of South Dakota never mandated a single business closed and are also seeing COVID numbers falling. These facts prove that Floridians are responsible people, who love their neighbors, and will CHOOSE to do the right thing. But we need our elected representatives to do the right thing; we need our businesses open. Sincerely, David Larson
Orange	General	I respectfully expect that elected officials and members of this panel consider how their decisions will impact the wellbeing, safety, and health of vulnerable Floridians before hastily opening our economy. Regardless of politics and their personal interest, you represent ALL of us. Your plans must consider the full undeniable impact of your actions on our collective future, which now we must trust you to protect. People can not support our economy if they are connected to respirators or left bankrupt by medical bills and nonexistent unemployment and basic needs assistance. Yes, we must carefully plan a tiered and safe return to a new normal. However, our state depends heavily on tourism and customer service. How are we going to prevent visitors from bringing he virus with them? How are you planning to track and prevent new hot spots? Why are we not screening for antibodies across a statistically representative sampling of statewide residents? Why are there still not enough diagnostic tests for anyone in the state? Why can't we find basic protective items like hand sanitizer, masks, and disinfectant? How are you supporting exhausted first responders and essential workers? Keeping children at home is essential until we can ensure they won't be exposed and make grandma or their disabled sibling terminally sick. Why are not all residents of group homes and jails being tested? Why are you allowing a narrow minority of religious leaders to expose their congregations? We can worship online and protect each other, like our wise pastor has chosen to do. How will you keep factory, big box businesses, and park workers like my daughter safe? You must track by testing. Please do not sell us out for political or personal benefit. This is the most historic moment of your lifetime, and we will ALL be judged for preserving the sanctity of each other's lives. In God's eyes, we matter just as much as you, your loved ones, your church or business family, your voters, your donors and investors, or your customers. We are scared for our lives and expect true non-partisan leadership based on solid science and gifted problem solving. We do not want political sham shows or dangerously irresponsible leaders. Help us trust you by raising to the occasion and showing everyone without fanfare that you can lead during the hardest moment of your

AMERICAN OVERSIGHT

Broward	General	I feel that many businesses should be able to open on condition that everyone continues to wear face masks. I believe that bars, and restuarants should be the last places to reopen due to the large number of people in those atmospheres; plus people would have to eat without a face mask which would put everyone in a non safe environment. Other than those two types of establishments, I believe that most businesses should be allowed to reopen on condition that everyone wear a face mask. Thank you, Mike Blanchard.
Broward	Professional Services	We have a lot of families struggling to feed there families. We follow all the guidelines with distancing and PPE. We all need to get back to work ASAP!!
Lee	Recreation	You don't need to social distance while outside. Only in confined spaces. Parks and beaches need to be reopened, allow people to use their own judgment on using masks and gloves. Wearing masks that are not properly fitted or of a material that does not allow proper filtering and especially gloves in public in general do no good without proper education...
Hillsborough	General	Governor DeSantis, It is so important to our constitution to reopen our economy. You have hundreds of thousands people out of work, an unemployment system that is not paying most of them and many will not have a job to go back to. I myself have been unemployed from a company that I have worked for 14 years since the end of March with no unemployment being paid. How do families survive and how to they continue to have a house to live in and food to feed them? I did not qualify for any stimulus money due to what I made LY.....not considering that my employment is no longer. I feel that so many politicians have taken a power grab not letting any bad circumstance go to waste. Including the mayor of Tampa who thought it was appropriate to mandate all Tampa residents were masks. Where are the peoples rights? We now know that 4-5x the populations have the antibodies and even with a vaccine people will still fall to this virus. Just like the flu. We are Americans and if we chose to go out and put ourselves at risk to Covid or the flu that is on us. We are a free nation and confining people to their homes is wrong and unconstitutional. The issue is the people that don't work or that are getting paid anyway are the 1st to voice that they don't want to reopen. I have worked my entire life to get to where I am not to have my life taken away from me and my freedoms. I voted for you and still continue to support you. Please do the right thing for our state and our constitution. Thank you
Pasco	Professional Services	Please just instruct majors and county commissioners to follow the president's phase 1 guidelines with common sense and mandating social distancing. Small businesses that can prevent close proximity can open. Beaches can open. Dog parks for heavens sake (St. Pete) and parks can open. Retail outside pickup only for now. Hair salons with proper mask and glove and disenfectant precautions. Maybe not germ-filled gyms? Maybe not tattoo parlors? But doctors offices and surgeries need to resume. Limit travel. Stay safer at home. Please! The numbers don't warrant a complete shutdown. In Pinellas for example, we have about 673 cases out of a MILLION residents! Our commissioners and mayors need to be urged to do the math, and not follow party lines. This whole thing has become partisan, at the expense of peoples economic lives. Thank you.

AMERICAN OVERSIGHT

Lee	General	As a father of a handicapped child I'm greatly concerned that we might be opening up too soon. I would be devastated if I was to lose a child..
Lee	Healthcare	Stay inside wear mask do what your doctor tells you. Nurses and Doctors are working full time to save people,. We can do our part by listening and doing what they are telling us to do.
Hillsborough	Healthcare	Absolutely DO NOT open Florida up yet! If Georgia wants to be the “Canary in the coal mine,” let them. Lives should not be a gamble. PLEASE use good judgement and let’s get the numbers going WAY down and then slowly open the businesses for limited use. It’s not necessary to open the Public areas, like the beaches and parks. Wait on all places and events that involve large numbers. Open slowly with necessary businesses first, not nail and hair salons, tattoo parlors, gyms, etc. Let’s be cautious and reasonable here and not repeat history. The second wave might well take many more of our loved ones. Listen to the medical world, wait and then move slowly! PLEASE!
Broward	General	Keep Florida closed until medical experts indicate that it is safe to reopen. Rushing to reopen will cost more lives. Safety must be our priority.
Orange	Healthcare	I am a pediatrician in Central Florida, and I see that, indeed, this is a very complex issue...protecting our health while simultaneously protection the economic well-being of families. I am seeing (from looking at the Florida Department of Health dashboard) that our community is NOT yet seeing a decline in cases (example....back up to 1.3K new cases on 4/21/2020). Thus, statewide, I do not think that we are ready to re-open. However, I think that there are great differences from one county to another. It is therefore my recommendation that a gradual re-opening of industy be allowed to take place in central and north Florida while south Florida (Dade and Broward counties....where the majority of cases are occurring remain in quarantine into the cases decrease). I also think that masks should be required in public establishments (stores, libraries). I also think that children and teachers should be required to wear masks in school next Fall, particularly since it will be very complicated to manage COVID-19 during Influenza season. I also think that businesses that re-open should implement various safety measures....employees kept at a 6 foot distance, masks for all (employees and clients/patrons), temperature checks, paid sick leave to ensure employees do not return to work while ill. Truly recreational activities, particularly those that attract large crowds, should remain closed a while longer....theme parks, theaters, concerts, sporting events. If/when these crowded attractions are allowed to re-open, a universal requirement for face-masks and efforts to limit over-crowding with a limit on the number of people allowed in each day is recommended. If we can safely re-open many small businesses, then we can proceed to with the re-opening of those more crowded recreational activities.

AMERICAN OVERSIGHT

Pasco	General	Regarding the reopening of Florida, I do strongly believe that if we keep social distancing in place but lift the stay-at-home-orders this will be best for the state of Florida. Getting back on track to a normal life is what most Floridians have been hoping for after this month ends. I do believe corporations and businesses should be allowed to go back to work after the end of April.
Miami-Dade	General	Keep stay at home orders until new case rate is at ZERO for AT LEAST 14 days in each county respectively. Cancel rent/mortgage payments from March through July. Release all inmates held on bail: poverty is not an excuse for imprisonment.
Polk	Recreation	Mental Health...I moved to Florida in 2018 to help my mental health challenges. I love being able to go to parks, beaches, and Disney World. A lot of us went to Disney the last weekend it was open. I miss my Annual Passholder friends. I live alone in an apartment building where everyone smokes around me. Staying at home is making me sick from the smoke. Please start opening things. None of my friends from Disney know anyone who has or have had the virus. People are angry and staying at home isn't working very well.
Pasco	Food	I am a bar and restaurant manager for San ann restaurant and Lounge in San Antonio FL. We are a small family owned business. We have been negatively affected across the board by the covid 19 closure. We would ultimately like to be able to, at the very least, open back up at half capacity. This would allow us to begin to recoup our losses. Most of our 8 employees have lost 50% or more in hours and monetarily due to loss of tips. Some of our vendors, we use small local vendors, may not be able to continue services for us. While we absolutely understand the need for the closure and respect all the governors decisions, and thank him for what he did do to help us continue to make money, we would love to be able to begin reopening and servicing our small town in a greater capacity. Thank you for you time and consideration in this matter.
Collier	General	It is very important that you put our state back on track slowly!
Hillsborough	Healthcare	The issue of health and safety goes beyond any economic consideration. It should be: On May First to carry out a test intensification campaign (press, radio, tv, internet) over ALL Florida State employees and employers, so that those able to return to work will be tested for Covid-19. Achieving a percentage of majority of healthy people could open the economy in phases in a period of 42 days by areas such as counties or regions. Statistical data maps will tell you what area needs to be open and when. It is better to have a healthy and productive society in the long term than a damaged, sick and unproductive economic system in the short term. My opion is to work tirelessly in field test during the month of May and reopen intelligently the economy by phases and areas or regions during June month. Thank you very much for your support. May Our Lord give you wisdom in these difficult times.

AMERICAN OVERSIGHT

Miami-Dade	Recreation	Hi,dear governor , I think we opened some area's some time working ,if the people continued safety used masks and distance from another one, 5his working but the problems must seriously is the school, the children don't know what happened, my criteria is we continue the school closed ,after we have a vassine,if we close everthing one month ago, this don't happened, but is to late,my wife in cuba years ago working in virology on the must important school in havana cuba ,carlos I finlay, and she know the virus, she said ,in cuba used the interferon, or ganmaglovulin, this in cuba working, in people have cancer ,and have the immune sistem down, I hope we have a wonderful doctor and people in this country,
Broward	General	OPEN EVERYTHING UP!!! BEEN OUT IF WORK WITH NO INCOME FOR OVER A MONTH. UNEMPLOYMENT BEEN PENDING FOR A MONTH!!!! CANT PAY BILLS!!!
Manatee	General	Need for more testing. Stay At Home at least two more weeks
Brevard	General	It is a great idea to obtain feedback from Floridians, but I think this would be a more useful tool, if it was more structured, in the form of a survey, so that answers of the community could be aggregated more easily. I think Florida needs to remain closed until at the very least, antibody testing is widely available to all and that data can be analyzed. Things, such as theme parks, should be closed for a bit longer, than the rest of the industries and should open at limited capacity at the beginning (perhaps start with Florida residents).
Brevard	Healthcare	Florida is NOT in a position to REOPEN non-essential businesses. Not until we have sufficient Cov.19 testing for having the disease, and for antibodies present from having the disease. Once we have that and people can have on-demand testing with near immediate results, along with universal screening of temperature at all facilities, we are still not ready.
Hillsborough	General	It is time to reopen in phases, while monitoring very closely. The Economy has suffered all its capable of. If we wait too long many businesses will never be able to recover. While I have a great concern for the safety of our people, I fell this is the less of two evils.
Miami-Dade	General	- Re-opening now would be a bad idea. I know. There are several nursing homes that the elderly are JUST starting to get infected. - REQUIRED AT-HOME testing for every household. There are more people that are most likely infected but doesn't know and they keep spreading it. - Create a Self-quarantining app, where people can monitor their condition and connect to doctors when needed. - There are not enough PPEs for healthcare workers in nursing homes (especially for LPNs). - MASKS should be required ANYWHERE, not just when going in an essential business. It should be required the moment a person leaves their home - The government should support small businesses in any way, there should be no favoritism. - DO NOT RE-OPEN BEACHES, PARKS, GYMS - Implement a program for environmental hazards as well, esp that people throws away gloves/masks just anywhere - GIVE support to lower-income cities

AMERICAN OVERSIGHT

Marion	General	OPEN UP !!!!!!!!! We are not children!!! Advise at risk, and elderly to limit social contacts. Advise any employee who feels. any flu like symptoms to stay home from work and monitor their condition. If not improved in short time seek testing for covid-19. Anyone who wants to use a mask feel free to do so. THEN LET US RETURN TO LIVING. All this one way store isles , marking floors etc. is silly. People now know to "keep their distance" from strangers. All this call of listen to the experts is bull. Just pick your expert to make your point. In other words there NOT experts. Only another opinion!!!!!
Orange	Professional Services	Open the state! We have flattened the curve. It is a virus that won't go away. We have to face it at some point... what's the difference between now and two weeks from now? Nothing. Meanwhile, people are starving. Open up ASAP. With great freedom comes great responsibility! Restore our freedoms!
Escambia	Government	Good afternoon! I am writing in today regarding the stimulus checks that were promised to millions of Americans. Sad thing is though, lots of Americans aren't eligible for the stimulus due to owed money. Whether it be for child support or other reasons. Those Americans, (mainly men who are behind on their child support payments) are "American Citizens" who are feeling the affect of this unprecedented time. It's bad enough most of them are out of jobs due to this, they were also given false hope by being promised a stimulus check that was supposed to help "America Citizens" stay afloat while being forced out of work. This is a situation no one can control, as the whole world can see. Be fair! Be kind. Do what's right, give these "American Citizen" some relief!
Manatee	General	We cannot re-open Florida until we have a handle on wide spread testing. The number of new cases in Manatee County increases daily yet the County records the lowest number of testing. The total number of positive cases of Covid-19 continues to increase state-wide.
Pinellas	Professional Services	In what phase do you see salons opening? I know the salon industry is in a panic about making tent and helping their clients. We are face to face with our clients and what will be the guidelines for opening salons again?
Okaloosa	General	Dear Governor, I ask that you leave things shut down for a few weeks. I fear when we open up rentals, restaurants and beaches we are encouraging tourists to come to our cities. I am a server/bartender and have definitely missed the income from a busy season and have had a stressful month thinking about my finances. However, if we have tourists coming to our beautiful state who obviously don't have any sense, because they are traveling during a pandemic. Are they brining the virus with them? Are out numbers going to triple because people are irresponsible and are taking vacation During a crisis because they are bored? Id rather stress about my income for a few more weeks, than have to shut down in the middle of the summer because 1/4 of our state is dying and our hospitals can't accommodate the masses of people. Thank you for your time, Jennifer Sweeney

AMERICAN OVERSIGHT

Broward	General	t is time to reopen Florida. You ask us to stay home while we got a handle on things and we complied. Most of the restrictions in place now are not logical. I cannot walk or sit on the beach in front of my condo but I can walk on the crowded sidewalk. I can't even stand on the sundeck of my condo building despite paying exorbitant HOA dues with the same people I ride the elevator with daily. I can't go to any small boutiques or restaurants but I can go hang out in Publix or Walmart with a 1,000 people for as long as I want. Of course the sick or immune compromised can and should be protected but it doesn't have to be all or nothing. We can keep people from starving to death and do it responsibly. The economic impact is getting more catastrophic every day. We all know now the initial projections were greatly misstated, time to move forward.
Hillsborough	Healthcare	Until testing is widely available (including antibody testing) and we flatten the curve, there is no need to open the state. With the kids not going back to school, most people will not go back to work as they will need to continue to homeschool. Opening the state while the numbers are still climbing is irresponsible and dangerous.
Pinellas	Professional Services	Please consider reopening Barber Shops and Hair Salons. My youngest son is a barber shop and were only allowing the client in their chairs as early as February. They were deep cleaning and sanitation after every client including after anyone use the bathroom. Each of the barbers are family men that are in need of income. Please allow them to reopen with both the barber and the client wearing a mask. The barbers wear gloves also. I am 66 and in the travel industry and been furloughed. I'm wish I had a windfall to assist these barbers in the his shop, but I not rich by any means. Please help us by considering reopening the barber shops and salons.
Miami-Dade	General	I personally believe that opening up is possible. However, there MUST be rules. First rule is that BEFORE entering and grabbing any shopping carts, there must be a hand sanitizing person at the door to make sure the customer has sanitized AND is wearing a mask. Gloves are not necessary since there will be no cross contamination. All we need is HAND SANITIZING STATIONS IN ALL ENTRANCES AND NO GLOVES BECAUSE THAT IS A MAJOR CROSS CONTAMINATOR. If we do this then there will be no spread since the hands are clean and the face has a mask. That should be mandatory for ALL building entrances
Orange	General	I do not think it is safe to reopen Florida yet.
Seminole	Professional Services	Open businesses with restrictions, show some leadership and save your state from economic disaster 400x worse than this virus. Folks know how to social distance, the daily case numbers are the same on lockdown as they were when we were just being safe. You were too slow to close, now you are going too slow to open!! And this system is broken just like your unemployment system.

AMERICAN OVERSIGHT

Miami-Dade	General	I say No to re-opening at this point; Bad Idea! Foolish. While some sectors of the economy may continue to function, it is beyond imprudent to consider re-opening at this time. At this critical juncture, this existential juncture, it is imperative that our leaders level with the population; speak plainly and truthfully about the state of our State. Let the Spanish Flu Pandemic of 1918 serve as a lesson to all of us. It ravaged the world for approximately 2 years. Better to wait until the key indicators support "re-opening" Otherwise, we may find ourselves closing for good!
Palm Beach	Professional Services	To whom it may concern: I am writing to put a respectful request in to reopen Palm Beach county. I am a mother of two and a hairdresser. As I'm sure you understand, if I am not working, I have zero income. I was also not one of the lucky ones to receive a stimulus check. My husband is a chef and has been able to work some so we can put food on the table but we are struggling to maintain paying out bills. We are understand that there will be proper precautions we will follow in order to get things moving, and I believe we can do that. With respect to the elderly and those with weak immune systems, they still would have the option to stay home. Being on a stay at home order goes against our civil liberties. Aside from this, those of us with mental health issues are hurting and need some sort of normalcy and routine back. Please REOPEN FLORIDA!
Miami-Dade	General	When reopening Florida, please reopen Barber shops first then Nail Salons and then Bowling alleys. This way we need haircuts to looking styling good. Later, need to reopen National Parks Visitor Centers in Florida, so that we can learn about the National Park and explore once again. Later if all goes well, everything else needs to be reopened such as a Shoe store, clothing/department store even some non essential retailers to get back on track.
Lee	General	Please reopen our state. Small business depends on it. More people will die of poverty related issues than of this virus. On behalf of our children , grandchildren and great grandchildren, I beg you to reopen this country and Make America Great Again!

AMERICAN OVERSIGHT

Miami-Dade	Food	Require touchless payment to any business , restaurant or retail store to minimize the potential of contamination with payment. Require restaurants to allow for online to table ordering via personal device Require disposable sanitizing wipes for cleaning tables after each diners who occupy a table (so that those bussing the tables do not reuse the same rag or wipe on more than one table) Require salt, pepper and condiments to be in disposable containers for dine in and dine out. Encourage drive up dine in car over dine in where possible (like the old drive in restaurants or Sonic drive ins) People could then enjoy dining out while keeping their germs to themselves so to speak. Require restaurant employees to wear face masks and sanitize hands in front of customers. Create a reporting system to establishments that are not following guidelines. Even adding a survey linked to a state site about restaurant practices. When conducting sanitation inspections require the report of the score on the establishment's entrance. When providing drink refills on a dine in customer, require a new glass. Many times restaurants that use pitchers will touch the pitcher to the edge of the glass. Require restaurants have online reservation system to reduce people waiting around in large groups to be seated.
Lake	General	Reopen our economy
Sarasota	General	It's time to rebuild the economy. The numbers of deaths is false. We all know that.
Hillsborough	Education	Please do not rush to “open” Florida too fast. I am over 65 and worry that opening too soon would compromise my health and the health of others my age and older. Please get the testing under control before you reopen!
Monroe	Tourism	Please reopen Florida , we need our non essential business be opened . We have to pay rent and taxes , thank you
Hillsborough	Recreation	I would like to see dog parks open as part of the first wave of restrictions being lifted.
Broward	Real Estate	Easing up on golf & tennis right away is very doable and they r social distancing , small group activities. Also kayak and boat rentals. Condos and apt bldgs can open their own amentities. Small cafes can open at 1/2 capacity , close off bar areas then when we see how they do, larger restaurants can open Stores in strip centers can open w mask policy and limited number at one time

AMERICAN OVERSIGHT

Lake	General	Since most (including myself) have not received any unemployment compensation, we all need to get back to work and soon! Businesses of all kinds will use their own good judgment to determine how their business can open and operate while still adhering to social distance standards. Also implementing sanitization, and monitoring the health and safety of consumers and their own workers.
Broward	General	Way too soon to re-open Florida .... we haven't reached the peak yet! This will do more bad then good!
Orange	Food	As an executive chef my thoughts are more driven towards hospitality however I believe in general this goes for any business. I think we all need assurance that businesses are doing everything possible to put or consumers safety and health first. Before covid restaurants had our random health inspections. These reports are part of public record and we get a certification. If there was some way we could come up with guidelines beyond the typical social distancing, personal hygiene and get inspected with those guidelines in mind I think the general public would be more apt to go out and dine in, go to a movie theater or whatever form of entertainment they choose. Also going forward to help fill restaurants maybe partitions in between tables and booths? Or business model mostly run off of very small margins and only running at 50% for the foreseeable future is a task that most stand alone restaurants probably won't make it through.
Duval	General	Open it all up based on CDC guidelines, and for those most vulnerable to remain at home
Manatee	General	Please do not open Florida yet. We still have many people who are sick & also many can't get tested. I was in the hospital end of February & they couldn't find what I had. This was before Covid-19 was even mentioned. I better everyone in my house had this during the month of February. Please make available to have everyone tested. I pray 🙏 for everyone God Bless
Broward	General	Everything outdoors needs to be opened up. Boat ramps, parks, beaches, at the minimum.
Hillsborough	General	It is absolutely too early to reopen. We don't even have enough tests for people who need them and we have not hit our peak. The numbers are still rising. People are dying and there is no known treatment. Until you have tests for every person who wants to be tested to be tested AND we show a major decline in the numbers, we should remain safe at home. I live in one of the hardest hit counties and my husband and son could not get tested in March. I have an immune compromised daughter and my husband is a pilot. People can't even follow the arrows in the grocery store. This should not be political. It should be about saving lives and stopping the spread and not having a second wave. Stop the politics. Give universal testing and for antibodies. Get every county on the same page with the same rules. Whether we live or die should not be decided based on the political color of our state.
Lake	General	Reopen

AMERICAN OVERSIGHT

Broward	General	Hello to All, Fine Regards. I am a widowed, 61, Caucasian Native American female. My input into reopening is to open all businesses with social distancing measures in force through next spring. The results of not doing so are too awful to think about. Even if the government expands payments there is no pride in living off the government. The pride in our country is developed and sustained by our working and earning our own monies,, paying taxes to better our communities goods and services and spending free time with family and friends That is an honorable and lifetime goal.It is also deeply satisfying. I vote to reopen businesses and beaches with social distancing and NO masks, the masks breed fear and are not nearly as effective as people seem to think for the general public. The plates in businesses to protect cashiers and other personnel are enough. FYI I had this vis virus in late Feb and lived through it. The severe part lasted 36 hrs. I thought I was going to die, my chest hurt so bad and I couldn't breathe. I took nitroglycerin and this eased the pain somewhat. I was feverish and then cold. I vomited 3 times and finally after the 3rd time vomiting I crawled into bed and as I was calling 911 I passed out for 17 hours. I felt much better when I woke up At the time I didn't know it was covid, I thought it was my lung cancer and my heart condition. I hope this helps in some way for our beautiful state, and our citizens, Melanie P
Hillsborough	Healthcare	In regards to: Re-opening dental offices for dental hygiene. I truly believe it is too soon to open dental offices for non-emergency patients due to high risk and aerosols. Along with inadequate amount of PPE available to providers. Thanks so much!
Hillsborough	General	I believe we should open state stores for 2-3 weeks. Everyone will have to wear masks And gloves in public places. Should the CovidD rise, then at the end of the extension the State will have to recluse again. This will put pressure on public to follow guidelines for health reasons. Keep schools closed until August as usual!
Lee	Government	I understand the need to re-open the economy. I myself, am still on unpaid furlough and not collecting any unemployment as of yet. I have a non-essential job. With that said, I think proper testing should be more readily available and the number of reported cases shown to have dropped considerably before we consider putting ourselves back into harm's way. Contact tracking I also believe would be helpful to narrow the scope of possible transmission. When that occurs, I could see slowly opening up some of the non-essential positions with a clear focus on keeping safe social distancing. I suppose it is possible and even probable that we see a second or so wave of infections but as long as we keep calm, safe and properly informed we will get through this as best we can.

AMERICAN OVERSIGHT

Hillsborough	Real Estate	We should remain closed another month if we attempt to reopen too quickly more individuals will be sick. Testing is imperative to reopen the State.
Clay	Recreation	Please re-open the State Parks! Please reopen the beaches! The "cure" is rapidly approaching the point where it will be worse than the disease. Being shut inside and prevented from enjoying nature and the beaches is TERRIBLE for mental health (Its also teeeible for physical health!). I need to be able to enjoy the main reason that I live in Florida--the REAL Florida--the beautiful outdoors! Let me be an adult and bring my beach chair and a picnic lunch. The stress of safer-at-home (a.ka. house-arrest) has to end! (If people don't feel safe outside of their home--NO ONE IS MAKING THEM LEAVE! If we feel that we can safely navigate the world beyond our front doors- PLEASE LET US! (Effective immediately!)
Hillsborough	General	I dont think opening up the state to it's original state is a good idea at the moment. The numbers of of people infected are still and deaths are still occuring. I understand people need to be able to pay their bills. But no one in the riverview/brandon area is respectful to social distancing either. I believe that by opening up the state to its full potential is going to put an even bigger strain on our health care providers. We definitely need them to be able to work and function. Please think of the people when considering reopening the state. Especially when there's still shortages of sanitizers and soap.
Hillsborough	General	Reopen restaurants, beauty salons, beaches, parks etc. ASAP!!! I'm over 65 and want to enjoy the time I have left. I'm healthy now but won't be if I'm quarantined much longer. I'm almost positive that I had the coronavirus since I had all the symptoms but can't get a test. Guess that's only for the rich.
Clay	Recreation	Please consider limiting the number of people on beaches which could be done at public access points. Keep social distancing in place. Open all parks first. However, playgrounds would gave to be sanitized daily or closed. Open restaurants with outdoor dining first with distance guidelines and table size restrictions. Bathrooms are of a concern. Maybe portable bathrooms would be better. Bathrooms would need some kind of cleaning requirement. Open all fruit/vegetable stands and encourage food trucks. All good workers and retail workers must wear gloves and masks. Where is Clay County Testing? Only testing in Jax. Many people can't go to Jax. Glad to hear about increase in lab testing. How about having masks avail able at retail stores or anywhere for free. Many volunteers are making them and would donate if requested. Open zoo with limit to number of people and social distancing. Encouage all construction and infrastructure projects. Fund these now. Continue Telework policies as practicable. Open charity and non profits. Everyone work on needs gloves and masks. Make these readily available. Heath care workers must have proper protection or they can't work. Assisted living and nursing homes are still not reporting Vivid 19 data.

AMERICAN OVERSIGHT

Pinellas	General	I think the “essential” businesses have done a good job in their efforts to protect themselves and the public. Those practices should be followed in progressively opening businesses. We’ve had services to the house who do well to keep their distance. Businesses where large groups meet (sports, theater, conventions, casinos, beaches) should be the last to resume business. Where people work in offices in pooled areas or close and active movement is necessary, they should start with reduced staff, staggered hours (shifts), mixed home/office hours to reduce people and maintain distances. Equipment needs to be disinfected on arrival and departure from work. Businesses should be monitored and owners/management fined for failure to maintain controls.
Manatee	General	There is zero reason for the state of Florida not to reopen. I am very worried that things will just be worse and worse economically for this state. If people want to stay home and be scared, that is THEIR choice.,
Sarasota	Retail	Please open up small retail stores. Let people have the choice No one has to go out if they don't want to We can not live in a bubble. Destoying lively hoods is more destructive than a virus Please open now.
Lake	General	Reopen
Sarasota	Healthcare	Florida should not open yet. The peak has not happened here on the west coast. This area has a large amount of elderly and I feel once it hits, it’s going to be just as bad as New York. We do not have enough hospitals or equipment. They are already re using N95 masks. Scary.
Sarasota	General	Please open up Florida!!!! I am self employed massage therapist. I pay taxes and have not received a stimulus check because the IRS doesn’t have my banking information, nor do I qualify for the CARE Act loans, or the Florida reemployment. I think I qualify for the Federal unemployment, but haven’t seen a dime. I haven’t had any income since the middle of March. I need help, or I need to work! OPEN UP FLORIDA!
Manatee	General	Do NOT look for a study or statistics that support your desire to re-open . Use CDC and WHO models and data to determine when to re-open the state. Researchers and medical professionals are the experts, not you. RELY ON THE EXPERTS!
Broward	Professional Services	Open private marinas. No human contact is needed in order to have a boat launched from a private marina. There is no reason why private marinas should be limited to boat access when anyone who lives in an intercoastal canal has access at any time. If there is an overcrowding of boats the logical solution would be to establish laws prohibiting an overcrowding of boats in a single area. Private marinas are extremely expensive and the ocean is large enough to avoid any human interaction whatsoever.

AMERICAN OVERSIGHT

Osceola	Tourism	I believe that if anything opens up in the tourism department, that it need to be limited to only Florida residents to start with. I DONT think that parks should open back up, but maybe springs, and some parts of the resorts. It needs to be limited, only so many people in the stores at a time, and limited hours. I know I would gladly go.out to play some Minnie golf or something! I also think that the sooner we can get our unemployment money (I have recieved nothing and had applied in March because my other jobs let me go before disney did) the sooner I can begin paying my bills again, and would actually be able to purchase other things that I have needed. That would help our economy!
Hillsborough	Professional Services	Yes. Reopen. In waves and with thoughtful attention. And a lot better education on masks and gloves. Not just in the news, but at locations where people will congregate. And control the number of people allowed in an establishment or park. Hire the unemployed to be door keepers. And please pay a living wage. Control hoarding. I am a massage therapist and cannot work without being able to clean my table and my equipment.
Pinellas	Information	Please don't completely reopen. There has not been enough testing.
Pinellas	General	Things need to open up slowly. One thing that is certain that there are a lot of people that still do not seem to take the virus seriously. I believe to start when you go out of your home everyone needs to wear a mask. At least until we know how this virus will react after the state slowly opens up.
Charlotte	General	I think it will be too foolhardy to open up Florida before we have 14 days of good numbers. We have reached the top and still lingering at the top of the curve. We need to wait at least another month before we open stores or restaurants. Our ambitions to get the economy going will only backfire if we open up too soon which may hurt the economy even more. We should be concentrating on fixing a broken system of the unemployment insurance. So, please wait ti be safe than sorry.
Polk	Professional Services	Reopen small businesses even salons.
Volusia	Recreation	I'd like to request that fitness centers and gyms be reopened as part of the Phase 1 stage. Keeping active and exercising regularly help to boost one's immune system and promotes one's personal, mental, physical and emotional health. Fitness centers and gyms should ensure that they are maintaining social distancing and that they enforce employees and members to clean and wipe down equipment with proper disinfectants. Thank you for the consideration.

AMERICAN OVERSIGHT

Hernando	Government	While it is imperative that our economy be reopened, I believe that there are still so many unknowns in regards to the spreading of this virus. We all would like to get back to normal, but there just might never be a old normal for any of us. I believe precautions should be taken to get the state reopened and that an extension of the stay at home order should be put in place perhaps in weekly or bimonthly increments until we have more information on the long term effects. Once testing is more readily available for all Floridians or antibody tests are available, we really need to be careful and healthy. Fortunately for me, I am an essential worker and the economy has not completely impacted my lifestyle. Sadly, for so many, it has been an extremely difficult time and people do need to get back to work soon, or at least be able to collect their unemployment benefits that the state has screwed up royally, for basic survival.
Orange	Healthcare	The most important thing here is safety. Until we have enough tests for another spike, or crisis, I don't see how the government could ask citizens to put their lives in risk by leaving the house unnecessarily. I have asthma, work in outside sales, and it's awkward to A- enter inside with a mask on and ask for $, and B-Do they even want to see a salesperson anytime soon, & C- Does a business owner want me 6ft away(usually much closer as a laptop presentation), and want me there mask or not. I think the government needs to take every safety precaution in terms of # test, # antibodies or other tests, that we have tested enough other clusters that may potentially cause an outbreak and that we strictly adhere to the 15 day drop before entering each phase as well as 15 day drop to even stay in the phase without having to go back. Closing too soonGA) reopening room soon(GA) people still don't want to leave house nor re-open for business as they don't feel safe. I think June 1st or MemorisI Day weekend to start phase 1 is most appropriate. With safety or when in doubt, always best to err on the side of caution. We don't want round 2 in another few weeks. Thank you.
Lee	Tourism	Please reopen Vacation Rentals-safe place to isolate and stay even if beaches etc are closed. I have refunded over $200,000 in bookings for March, April, May and beyond. That's a lot of tourist tax dollars lost for the State. I get a lot of requests for May to re-book weeks that others had previously canceled. Vacation Rentals are actually more safe than staying in a hotel where you are closer together and too many variables in cleaning. Please get our tourism back on track. Enforce social distancing but open vacation rentals. Thank you!
Hillsborough	Retail	Floridians have stepped up and done everything state officials have asked us to do. It is time to reopen our economy and show the other states that our citizens are willing to follow the guidelines to safely open our state. I have protected my 91 year-old mother, but I can not continue to financially provide for her without an income. I must get back to work to ensure that I am thoroughly providing for her care. Please open our economy on May 1st.

AMERICAN OVERSIGHT

Brevard	Healthcare	In response to when Florida should begin the process of opening up the economy, we need to take baby steps. Starting with removing the CDC criteria of who should be tested. All Florida citizens should be tested (corona virus and antibody test) and the outcomes utilized towards recommending when the state should move to open. If the state has a good representation of who has been tested positive, negative, and/or have antibodies associated with the virus, then and only then can the state begin the process of defining when to begin opening. Ad hoc steps will not helps us evaluate our state's situation. We need precise data and precise tracking in order to make a viable assumption on when to re-start the economy. Sincerely, Dr. Carl Wills
Pasco	General	I'm pleading with you to not follow a one size fits all approach. This disease was NEVER a problem in pasco county and many other counties in Florida. These businesses being closed is insanity, people only submit to it because they have been intentionally scared. Everyone is essential, NO ONE is nonessential. Let's not be China, let's be Americans who put rights and freedom first. Give people a chance to choose.
Baker	General	If DeSantis could remove his lips from Trumps ass, things would go much smoother.
Hillsborough	Healthcare	Dear Gov. DeSantis, As a dentist in the Tampa Bay area, I respectfully request the immediate lifting of the restrictions on elective medical/dental procedures. My offices are willing to take any precautions necessary, but we need to begin operations immediately. I also request to immediately open all other businesses in a way that will still respect social distancing guidelines from the federal government. COVID-19 has mutated at least 30 times according to recent studies. Coronaviruses are responsible for approximately 20% of common cold cases. A vaccine has never been produced. At best, a vaccine for COVID-19 is 12-18 months away. The likelihood of a complete vaccination cannot be guaranteed. This is scientific data that proves this shutdown will not eliminate the virus, but only slow the spread. We cannot shutdown the economy for 1-2 years for this virus. Unfortunately, the economic shutdown has become much worse than the consequences of the virus. Floridans do not want government support. We want the ability to work and make money on our own. Our economy and way of life is being destroyed by this shutdown. Please strongly consider my request to reopen Florida's economy immediately. Thank you, David L Castellano, DMD

AMERICAN OVERSIGHT

Seminole	Education	There should be consideration for schools to continue distant learning through January 2021. Teacher classrooms hold approximately 27 students in each core content area classroom in the middle school setting. With elective teachers holding anywhere between 30-70 students. Physical Education teachers have approximately 180 students each period in their classes. In a normal season of stomach bugs and flu seasons the schools are a petri dish for germs spreading. There is currently no cure and no vaccine for the COVID-19 virus and having students go back is putting students and teachers at risk. Another factor is if a student gets sick with the COVID-19 virus, they will have potentially exposed 100s of students as they change classes since students go to 7 class periods daily. Also if a teacher becomes infected with COVID-19, he or she will have exposed up to 180 students and there is an issues with finding a substitute that will cover their class for a minimum of 14 days. Schools are already short handed when it comes to substitutes. As easily as it has been for assistive living facilities to spread the COVID-19 virus it will just as easily to spread in the school setting. Therefore, we should continue distant learning through the fall as there is a chance the COVID-19 virus will start again once we get into the colder months.
Hillsborough	General	Governor is doing an excellent job! I'm 60 years old and know what limitations I need to take. Everyone knows what they can't and can't do. We need to get Florida OPEN and back to work!
Pasco	General	Please wait until at least the middle of May to reopen as deaths are still claiming and outbreaks are still happening.We could lose thousands more in this state alone if we open to soon .More testing is needed at least enogh for 20 percent of the state. Please be smart our lives depend you.If we die it will because of YOU.
Lee	Government	Hello, I have paid taxes my entire life. I still have yet to receive my unemployment checks. My status is pending. Apparently this is because of some issue. However whenever I click the link to fix said issue a page comes up telling me to try 2-3 times. However I try 10 times and the same thing happens. I can’t call anyone because apparently no one works in the office. I really could use some help. Florida now looks like the laughing stock of the nation. As a life long resident I am truly ashamed at both Mr. DeSantis and anyone else who treats Floridians this way. It is a crime and downright shameful. Do you job, Kevin McCarthy 2398517313
Pinellas	Accommodation	Florida is not ready for business as usual. When our cases go down, then slowly reopen.

AMERICAN OVERSIGHT

Pinellas	Professional Services	We need to proceed cautiously in reopening anything at present. There needs to be tools in place at all places opening to ensure that everything is disinfected and that plenty of space is allowed for social distancing. We don't need to create a second wave of infections by opening everything too soon. So far the social distancing and safer at home are working the number of new infections daily are typically lower than before these were enacted. I believe that the Governor has done a good job in maintaining a calm environment and hopefully we can maintain this during the gradual reopening of our state. Ron
Pinellas	General	Please dont open Florida yet
Pasco	General	I know you are doing the best for Fl. Do what you and the professionals agree on no politics involved! if you reopen slowly- I would prefer mandatory masks and 6 foot rule. Until known facts can prove to remove masks and continue life as normal.
Orange	General	Please do random testing areas to see if virus is more widespread than thought. Some afraid they'll get virus from test location. Mobile testing in neighbors so everyone can be tested. Allow restaurants more flexibility for outside seating and they may reopen and serve outside. Make permits easier for construction. Maybe construction companies have work now but all future projects are cancelled. Think about two shifts for schools, a morning and afternoon with cleaning in between and only essential subjects. Hire out of work restaurants and workers to make meals for under served populations.

AMERICAN OVERSIGHT

Pasco	Healthcare	Testing, testing, testing and sufficient availability of personal protection equipment. While a difficult task to achieve, I believe that a much higher percentage of Floridians should be tested and every outcome of that testing addressed appropriately. I am an optician and we are medical professionals who also work in retail. I work literally, INCHES from my patients and have direct physical contact with them. I do not feel safe going back to work at this time. I know that we must get the economy moving soon but Florida has only tested a tiny fraction of it's population and I believe that there are far more asymptomatic cases than we suspect. I have been furloughed since April 4th and have not received state unemployment, federal unemployment or the economic impact payment yet. I am painfully aware of the repercussions of the financial impact on individuals and small business such as the Drs office I work for. That said , I am very concerned about opening up the economy without a huge increase in testing so that people who are asymptomatic or have mild symptoms can be identified and stay out of the general public. We are all likely to get it eventually but as someone with an autoimmune disease and emphysema...I would prefer to do my best not to catch it or expose my family and patients to it because I don't know that I have it. I hope that an effective treatment is found or developed soon but until then, I believe that our best weapon is widespread testing (even if you aren't currently "sick") and sufficient availability of personal protection equipment... It is the only way I will feel safe to go back out and work, patronize local businesses, etc. Thank you for the opportunity to express my opinion.
Lake	Food	Open now
Hillsborough	Professional Services	As a pet groomer who owns a VERY small grooming shop I urge you to consider AT LEAST allowing grooming services to reopen. Groomers have the ability to carefully socially distance from our human clients while still performing our services and most grooming shops with multiple groomers can scale back enough to be able to social distance with co-workers. Grooming for animals is not something veterinarians are equipped to take over the way that they are being asked to. Many, MANY clients are not physically capable of doing the basic grooming on their pets at home due to infirmity, ignorance of how to perform these tasks, or tools to perform grooming at home. Many pets with long coats, even with home brushing are becoming matted and miserable which can lead to health issues very quickly.
Lake	General	I think the economy needs to be open May 1. The antibody studies around the country are showing this virus to be far more wide spread than originally thought. The point of the shut down was to not overrun the hospitals and to build up the hospital infrastructure so we have the capacity for a surge. We have done that. Businesses can safely run while maintains social distancing and being responsible. OPEN FLORIDA.
St. Johns	Food	Open up EVERYTHING. Open up Florida NOW

AMERICAN OVERSIGHT

Pasco	General	I think of the waitresses that have to go back to 1/2 the customers which means 1/2 the pay . Same with any one collecting unemployment during this time that will go back to 1/2 the income they cant survive on that. But as a landlord I think of the Government giving stimulus money to help people to pay there Bill's (rent being one of the most important a roof over their heads) That they should open backup for eviction let the judges decide if reasonably that they should pay rent or not. I have a tenant that didn't lose his job got stimulus money and still hasn't paid rent in 5 weeks cause he knows he can't be evicted at this time. I am sure this task force know the safest way to open that part I put in your capable hands. Do not want a relapse of Covid to happen again.
Manatee	Retail	RETAIL NEEDS TO OPEN IN ORDER TO GET FLORIDA'S ECONOMY ROLLING. IT SHOULD OPEN WITH SOCIAL DISTANCING GUIDELINES AND AND PERHAPS A SPECIFIC NUMBER SHOPPERS ALLOWED IN EACH STORE, DEPENDING ON SQUARE FOOTAGE OF THAT STORE. RESTAURANTS NEED TO BE OPEN BUT FOR THE NEXT 6-9 MONTHS, HAVE TABLES SPACED APART - PERHAPS RESERVATIONS SHOULD BE ENCOURAGED. BARBERSHOPS, BEAUTY SALONS, MANICURE SALONS AND ESPECIALLY GYMS NEED TO OPEN UP. THE PRESERVATION OF PHYSICAL HEALTH CAN ONLY BE DERIVED FROM THOSE ATTENDING THE GYMS, ESPECIALLY IN THE HOT CLIMATES OF FLORIDA. WE WILL ULTIMATELY LOSE MORE TO DEATH FROM LACK OF PHYSICAL EXERCISE. PEOPLE ARE DYING IN THEIR 40s-60s NOT BECAUSE OF COVID-19, BUT DUE TO SUICIDES, SUDDEN HEART ATTACKS, AND SO ON. OTHER BUSINESSES NEED TO OPEN AS THE REALITY OF WORKING IN AMERICA IS WITH TEAMWORK IN THE WORKPLACE. THERE IS NO WAY YOU GET FULL PRODUCTION FROM EMPLOYEES WORKING AT HOME. I'VE WORKED IN HEALTHCARE WITH PATIENT CONTACT FOR 33+ YEARS AND HAVE BEEN EXPOSED TO ALL KINDS OF FLUS/VIRUSES AND THE LONGEST I WAS OUT SICK WAS 2.5 DAYS DUE TO A MINOR RESPIRATORY INFECTION. TRULY, I BELIEVE THAT WORKING WITH THE VERY SICK GRANTED ME IMMUNITY. THANK YOU FOR THIS OPPORTUNITY VOICE MY VIEWS.
Hillsborough	General	Florida is not ready to be opened. I'm speaking as a high risk individual with Asthma and I'm begging you to use common sense as the numbers are still rising and I understand that eventually everything will have to open up but it needs to do so SLOWLY. There should be MANDATORY wearing of the masks when out in public where you typically may or may not be able to social distance because there may be many asymptomatic individuals and not everyone has been tested. I would also like to get back to some kind of normalcy but I need to feel safe doing so publicly. There are a lot of high risk and older individuals like myself who really need you to take EVERYONE in consideration including the essential workers. We need to also protect them from being exposed I say masks for everyone in public as of now make it mandatory since we know for sure that stops the spread and that buys us time and also keeps EVERYONE safe. Only when in public please consider thanks!

AMERICAN OVERSIGHT

Collier	General	It is of my opinion that we still need a little more time before we re-open the state. We are still on the top 10 for the states with the most cases of COVID-19 and our numbers are still rising. If we re-open too soon it could possibly do more harm than good. Please listen to what the medical experts are advising.
Manatee	Healthcare	Probably right to reopen. Biggest fear is pressuring others to do what is unsafe like work in an unsafe environment. Employers don't always care for their employees. Also concerned about healthcare worker that need a break. But then some need to go back to work. It will not change what I do. As a retired healthcare worker I will choose to stay home or very safe outdoors. Thanks for this site.
Lake	General	I urge you to please reopen Florida. Our hospitals will soon be on the verge of bankruptcy if surgeries and procedures don't start happening. Children are going without necessary treatments because hospitals can't perform "non essential" services. Small businesses are going under by the hour. The people of Florida are at risk of losing it all. Please, please let us go back to work to save what's left of our economy. We've flattened the curve and there's more than enough research to show that this has been here since well before January without causing a collapse of our healthcare system.
Pinellas	Healthcare	I have concerns about the re-opening of restaurants I don't know how economically feasible it would be for owner of a restaurant to limit amount of customers I don't know how we're going to ensure workers and customers are going to be safe And if we open too soon I would bet there's a high probability of someone having the virus coming in and then of course it'll get out and then I don't think anybody's gonna go to that restaurant and then I wonder if we're moving too fast statistically we're still getting a lot of cases every day And if the way the unemployment benefits are being dealt with although maybe well-meaning so far most people haven't gotten anything you see pictures of people in food lines so you want me to think after this colossal failure that somehow we can re-open businesses I don't have a lot of faith in it and I Would bet a lot of people think like I do
Orange	Technology	You need to realize that if you open the state too early, more people will get sick and essential functions will then be unable to continue. This will shut down the economy anyway, but the death toll will be much higher. These deaths, the protesters, the healthcare workers, the grocery store workers, the NON essential workers who are forced to choose between money and their lives... they will all be on YOUR hands. Forcing people to go back to work to cover up the failures of the state unemployment system will not fool anyone. If you think Floridians will forget, you are mistaken. It's time to stop playing political games with your constituents lives. Do your job. Nobody should need to explain this to you
Marion	General	If someone is off their property, they should be required to wear a mask. State parks should open for recreation and camping but social distancing must be adhered to. Take it slow and steady. Let's see what happens.
Pinellas	General	I don't think we should open until after May 23rd . I think opening too soon will end up having a resurgence. We're keeping our numbers low because were shut down . Let's not move to fast. We're almost in the clear . Let's hold on just a little more .

AMERICAN OVERSIGHT

Broward	Government	I want Governor DeSantis to reopen the Broward County Courts immediately so we can several important cases that will save lives. 1) To end the case Florida vs Ron Ziegler so we can exonerate him and arrest Linda Mendola, Jordan hal Mosman, Steve Pollen, Allan Scheck and the killer Earnestine Marie Davison aka Spankie. 2) To complete the civil case involving Gayle C Hammer vs YMP Reality. so she can move out of this sewer trap. 3) to finally safe the life of Jennifer Ruth Brietkopf who has been physically and mentally raped by Spankie Davison and Linda Mendola
Miami-Dade	Healthcare	Hospitals should reopen elective surgery and outpatient testing. Healthcare as far as mammograms, colonoscopies for preventive care should be available. People still need to prevent cancer and other conditions that can progress undetected. Using ppe of course and a few patients at a time. Nail salons with plexiglass is a great idea. Heir salons with sanitizer masks gloves and a few people at a time is a good idea. Everything while using protection always. Thank you
Hernando	Healthcare	Just “open it up.” Being a Firefighter/Paramedic my coworkers and I have seen that hospitals are basically empty, nursing staff is being furloughed, and our call volumes have not increased. The statistics don’t lie; there are multiple anti-body studies now from Stanford, USC-LA, New York, and Chicago suggesting the infection rate was 50-85% higher than expected. Additionally, we know based on hospital admissions and deaths who this truly affects. So let’s protect the nursing homes and elderly, those with underlying conditions, because they are at greatest risk. Americans across the political spectrum have common sense, and exercise it, when it comes to being ill and caring for loved ones. We also would respect and appreciate a more common sense approach as opposed to what has happened over the past couple months. Respectfully, Robert Watson
Escambia	General	I live in condo on Perdido Key. The parking lot is pretty full today, as is the beach. Our beaches are private so people have been coming. That’s ok, I can avoid the beach and sit on my balcony, which I’ve been doing. My concern is if people start coming for vacations, the stores will become much more crowded. I go to Publix once a week and the locals are doing good job with masks and maintaining their distance. Tourist will not. I’m sure tourists will enjoy themselves and go to local restaurants when they open, I will not. I’ve tried supporting locally getting curbside pickup a few times. But it will be awhile before I enter a restaurant. We are lucky, we have our regular income and I feel for those who don’t.
Brevard	Healthcare	We are not in a position to test for Cov.19 or for it's antibodies. So NO...do not relax regulations.
Broward	General	I would not like to open Florida until a vaccine is developed.
Pinellas	General	I think it is too early to reopen Florida. I feel if we do right now that there will be a spike in number of cases.

AMERICAN OVERSIGHT

Escambia	General	Our hair and nail salon has always practiced santitation between each and every client. We need to work!
Orange	Finance	Trying to re-open the state to avoid having to fix the broken unemployment system is downright evil. Putting millions of lives at risk because the government isn't doing a good job and sees the population as numbers instead of people is asinine. We have to wait, we have to make companies pay essential workers fairly, and we have to get the unemployment system functioning otherwise we're doomed to fail. We're doomed to see mass graves. We're doomed to die while our governor makes money and has healthcare and protections that the average person will never have the privilege of.
Bay	Accommodation	As an out of town condo owner who was a Department of Defense employee in Bay County for 23 years, I support allowing vacation rentals again. And as the mother of a 25 year old and grandmother of a 3 month old Bay County resident, I still support re-opening rentals. I agree that we needed a pause in order to make sure hospitals would not be overloaded, but that time has passed (and could be implemented again if needed). This virus will be here for a long time, we can't shut down until it's gone. We need to learn to live with it - increased cleaning protocols, protecting our vulnerable, AND allowing the young to develop immunity. Please do not extend the no vacation rental order. Sheila
Hillsborough	General	I do not think we should be re opening Florida yet. I equate this to a sports injury that will be injured worse if not given time to properly heal. We have made it this far and we need to finish what we started or we may end up starting all over from the beginning from worse circumstances. I am a retired Hillsborough County Deputy and prior USAF. I truly believe first responders should be asked what they think since they are the ones working night and day to keep the state a float.
Collier	General	I am a teacher. We are obviously done with this school year. However, my husband is a police officer. He goes out every shift into the public and while they try to maintain distance, this is not always possible. If we reopen too soon, his rate of exposure will go up. Which means my rate of exposure goes. Which means my 2 year olds rate of exposure goes up. Short of daily walks outside with my dogs and child, we have not left our home. Leaving Florida closed until June 1st is the least the State could do to help first responders, nurses, and doctors who have worked tirelessly during this time to help others without a second thought to how it may effect their own families.
Indian River	Government	We need to reopen the state for business now. We have a small business with employees waiting to work and get paid. The more we learn about covid the more it seems like a bad flu. We cant hide from this. Reopen the state for all business that ca promise to practice good hygiene and reasonable social distancing.
Hillsborough	General	Without doubt, the key to safely "open up for business" will be REQUIRING facial masks and regular hand sanitizing. We all understand that we cannot allow businesses to falter. However, a word of caution regarding social distancing should be adhered to (six foot rule). To forget what we've learned will undoubtedly be proven catastrophic.

AMERICAN OVERSIGHT

Hillsborough	Healthcare	Dear Governor, I am writing this to ask you to consider all of the people who have lost their lives to this virus so far and their families. The health care workers and police officers that have sacrificed so much to date!! If you re-open the state now due to pressure from individuals who are frightened about their income vs their health and their community health will be casting little or no value on human life! STAY HOME! STAY SAFE! STAY WELL! Until all Floridaian's can have access to two negative tests we look to you for leadership. West Coast & Hawaii closed until end of May. Hope you take a lesson from Gov. Como NY you may not always be popular with your decisions but, you will keep us all safe & well! DO THE RIGHT THING PLEASE!!! Thank you!
Lee	Food	I have been in the service industry for over 25 years, and never thought I would face something like this. As devastating as it is to have my owner have to be closed and she's a single woman small business owner, it will be even more devastating to open up and people get infected by this terrible virus. Even with social distancing being performed by employees it is impossible to be a server and be 6 feet away from a guest, it is also basically impossible to wear gloves and a mask and serve a guest. It makes more sense to extend the stay at home order for restaurants. They will lose money running at lower capacity, they will lose money ordering food in hopes that Guests will come out and eat. I love going out to restaurants, I love supporting small business, but I am not comfortable going out in public in a restaurant right now and being served. And I think most people feel that way as well. I'm a relatively healthy 40-year-old woman and I am terrified of what could happen if we open up to you soon! I love going out to restaurants, I love supporting small business, but I am not comfortable going out in public in a restaurant right now and being served. And I think most people feel that way as well. I'm a relatively healthy 40-year-old woman and I am terrified of what could happen if we open up to you soon!Thank you for your time and I have faith you will make the right choices.
Orange	Tourism	It's time to open things back up but to keep a close eye on things. If something needs to be locked down and track down do it but let The state try to get back to work

AMERICAN OVERSIGHT

Escambia	General	I am an ER nurse in one of the busiest local hospitals here in Pensacola. I am also a fire lieutenant/paramedic for the county fire department. Back some time around March 1st we started hearing about this "novel" virus and then about March 17th things started shutting down and events being canceled. Right now you cannot go to the beach, you cannot go boating or tie up two or more boats together, gyms are closed, one cannot even get their hair cut due to this massive shut down and stay at home order. Well is this doing any good?? Is it doing any harm?? is it doing more harm than good??. Viruses are not even considered living. They are simple nucleic acid particles and proteins and the CoV2 virus does not just form because 10 or more people are together or because 2 boats are tied up that is just silly. You can not be anymore confined than being in a prison or in a long term care facility and these residents and prisoners are getting the virus and some are dying, so obviously being confined has little to do with contracting the virus. Healthcare workers are getting it also caring for those sick, but they are contracting due to being very close, with sometimes limited protection and for long periods of time. All being said we need to have a more practical common sense approach to this pandemic. Of coarse you should wash your hands frequently and not touch your face and cover your face when you cough and by all means stay at home if you are sick regardless of a pandemic. But most important a person needs to take care of them self emotionally, physically and spiritually, presently with everything shut down the possibilities of this are limited which leads to depression which further lowers one's immune system actually making them susceptible to viruses. So lets consider opening the state back up where people can earn a living, get some exercise and just get outside and enjoy the spring because eventually everyone including the government is going to run out of money.
Citrus	Healthcare	I work in Inverness Florida at a testing facility. I along with many others feel it's a terrible decision to open up the state period. We have limited test kits and we have had limited test kits the entire time along with anyone else who works at a testing site here in our county. Unfortunately due to having such a limited supply our testing guidelines are very strict. We have been forced to turn away tons of sick people in the community due to them not fitting the criteria listed on the sheet given from the CDC typically the people who are getting tested are only the ones who fall into priority number one. Our numbers are much larger than they appear because of this. Citrus county is a retirement community full of elderly and majority of them have chronic health conditions to put them more at risk. Stop thinking about the almighty dollar and think of your people. Protect us better than this.
Pasco	Agriculture	KEEP THE STATE CLOSED UNTIL DOCTORS AND SCIENTIST SAY ITS SAFE! MODELS ARE SHOWING JUNE! TRUST THE EXPERTS!

AMERICAN OVERSIGHT

Hillsborough	Recreation	Here in Tampa I could not comprehend why for example Bayshore Blvd and the Tampa Riverwalk was exempt from closure and moutain bike trails are closed. The reality of the situation is that there is less social distancing on walking sidewalks. On a mountain bike trail people are riding and moving because on a single track trail social distancing is automatic because tipacally people don't stop in the middle of a trail ride to socialize. I suspect that due to the level of economic and political influence of the demographic that lives in South Tampa they influenced the decision. I respectfully request that re-opening bike trails be considered for re-opening. Alafia and Boyette Scrubb Preserve in particular. Areas that can be abused such as clubs etc... should remain closed. Gyms should not re-open etc. V/r Dan Mathis Jr.
Broward	General	We need to open, people should be able to go to work as you will not pay my mortgage. Time has come, open a beach in broward county, it is open space. If you choose to keep us in, then please pay me bills. Do something right since you dropped the ball on u employment. You and your team should be fired only 30% of people have been paid. You want input but cannot even do your job properly, you failed everyone that was laid off
Hardee	General	Need to open back up And get people working as much as possible. Barbar shops and beauty shops and restaurants open back up to start and let people out
Pinellas	General	Maintain social distancing, wearing of masks by all people out in public, having employers have way to test employees before opening
Santa Rosa	General	Please do not open Florida.We are still having many cases and many deaths. Enough testing has not been done. Don’t open our beaches!
Pinellas	General	We have to get everyone back to work, why don’t we start opening non essential business and just make everyone stay 6ft apart if possible? Publix has made it work and the cashiers are just as close to you as hairdressers/nail salons. Maybe require masks for a couple weeks? We also should start opening tourism, maybe a lesser capacity but slowly start back up. If the older folks are uncomfortable with this then they are welcome to still shelter in place as they have been. We have to start moving forward like Georgia is doing.
Pinellas	General	We should reopen our state. Start slow open the beaches have it monitored. only people with Florida licensesor prof of residency and living in the state can go. Only allow so many people on the beach just like up North. when the beach is full its closed. no more people can go on. Open restaurants and businesses they could only have 75% capacity to allow for space between people monitor if cases are growing up if they are then you pull back. If they are not then you begin to open the hotel's up and the out of state people can start coming in period

AMERICAN OVERSIGHT

Hillsborough	General	ILL BE DAMN IF YALL DECIDE TO OPEN FLORDIA. THE GOVERNOR GOT TO BE THE DUMBEST HUMAN ON THE PLANET. I BET HE WONT VE OPENING IF HE OR SOMEONE CLOSE TO HIM GOT IT. ALL YOU WANT TO DO IS KILL PEOPLE AND QUITE FRANKLY HE CAN GO IN THE FRONT LINES OF THE REOPEN TO SEE IF HE DIES OR NOT. SHOULDNT THE GOVERNMENT LEAD BY EXAMPLE ANYWAYS? THE COMPETENCY IS LACKING AND THE VIRUS SHOULD WIPE ALL YALL OUT, LEAVE THE PEOPLE OUT OF IT
Sumter	General	believe it is important to keep Flordians safe! With that said, I think small "Baby" steps should take place. Maybe start with people like appointment only Eye Dr, Chiropractors, Dentist, and such first and they should limit to maybe 5 patient at a time allowed in the office. They should still follow social distancing rules and wear mask!! Then, I think a week later, if that goes well, they should work on restaurants with social distancing rules... table at least 8 feet apart so they are actually 6 feet when occupied. If that does ok, then maybe private clubs with mask and the social distancing..if after those 3 weeks, if nothing has resparked the pandemic, they open public places with social distancing and mask. After the end of June everthing should be open if no covid-19 OUTBREAK. People need to work or they will get relaxed with the Government giving them money. Then they may want to stay home permanently. Just my thoughts! Thank You for the opportunity to share them with y'all.
Broward	General	Dear Governor, reopening of the states economy should be done in phases and a few business segments at a time. First, testing or home resting needs to be readily available Second, all places of businesses require masks and hand sanitizers or washing stations. Week of May 18th- Phase 1:Government/Offices businesses: guidelines previously mentioned Phase 2: Restaurants/ Chains and other eateries - seating spaced and reduced number of people in groups no larger than 6 at a table.masks required, hand sanitizer stations. At 2 week marker, evaluate consequences of measures taken then if no spikes or increase spread in new cases, proceed with same or stricter measures to open everything else on weeks to follow. Schools to be opened in August. Any summer school should be done online. Places of direct human to human contact, like beauty salons, massage parlors or places like movie theaters should be last to open in early June and contingent of outcome of previous measures.
Broward	General	I believe it is too soon to re-open Florida. Cases continue to go up. We need to prioritize people’s health over the economy.
Pinellas	Professional Services	I do not understand why dog grooming salons are considered non essential.My dogs nails are so long she can barely walk on them.The place that I go only does one dog at a time.There is only one groomer at a time.You drop the dog off and leave.When I am called I come back and she brings my dog out to me.You are trusting people to do social distancing ,so why don’t you trust the groomers .

AMERICAN OVERSIGHT

Volusia	Education	As a school counselor at an elementary school I am concerned about returning to school without a vaccine. How do you tell Kindergartens to stay 6 feet apart? Our cafeterias and classrooms are not designed for that. The school I work at has 950 students. This is a time for us to be creative, but wise, if we reopen. Maybe an A and B schedule, that is the only thing I can think of to reduce our size and not increase the cost of transportation. If you split the day (1/2in morning and 1/2 in afternoon) transportation becomes a concern. I know that with an A and B schedule it will cause a child care concern for the days the students aren't in school. I hope that you are looking at other countries and states for ideas and ways to keep us healthy.
Seminole	Healthcare	Do not reopen Florida until it is actually safe. It should NEVER be economy over human lives.
Orange	Food	I don't think it's still a smart thing to open at this time I think we need to wait another month
Lee	Healthcare	Do not open the State. We have no idea of how many cases there are in the state. States computer system has proved it's totally unreliable. It's the worst in the country on unemployment claims. Somehow it's blocked reports on the virus - ie. Lee County system of reporting covid19 was blocked from government computers. Until you can improve state computers do Not open the State. Why did you block reports from nursing homes? Big cover up on every level DO NOT open the state It appears to be as disorganized and incompetent as Trump.
Martin	General	People are statistically more likely to die driving in Florida than from Coronavirus. OPEN FLORIDA.
Walton	General	Please open up the state. We need to move on and not live in fear.

AMERICAN OVERSIGHT

Polk	General	IN ORDER TO REOPEN RESTAURANTS THEY NEED TO MAKE SURE THAT THEY CAN ALLOW 6 FT AWAY FOR EACH TABLE, BUT THEY CAN HAVE RESERVATIONS. THEY NEED TO LIMIT THE AMOUNT OF PEOPLE THAT CAN COME IN AND ASSIGN TIMES FOR EACH GROUP OR FAMILY. SOME RESTAURANTS HAVE SEPARATION PANELS AND THAT WAY YOU CAN'T GET ANYTHING FROM OTHER PEOPLE. I KNOW THAT IT WILL TAKE SOME ATTENTION TO DETAIL BUT IT WILL BE WORTH THE EFFORTS FOR RESTAURANTS TO OPEN. PARTITIONS ARE THE ANSWERS. CLEAR PARTITIONS. CLEAR PARTITIONS ON THE BACK OF BOOTHS THEN YOU CAN SEAT EVERY BOOTH. I HAVE BEEN TO A LOT OF RESTAURANTS THAT ALREADY HAVE THIS IN THE PAST. MAKE SURE ALL THE STAFF ARE WEARING MASKS AND GLOVES. CLEANING NEEDS TO BE A ONE PERSON JOB LIKE A BUS BOY THAT WAY NOT EVERY WAITRESS WILL BE EXPOSED. ONLY THE BUSBOY WILL BE CLEANING AND HE WILL HAVE A CART TO THROW TOWELS IN AFTER CLEANING A TABLE. THE COOKS NEED TO MAKE SURE THEY ARE WEARING PROTECTIVE GEAR LIKE THE HASMAT OUTFITS THE PAPER JUMPSUITS AND FACE MASKS SO THEY DO NOT SPREAD THEIR GERMS ON THE PUBLIC. I HATE GOING INTO A RESTAURANT WHERE THE KITCHEN STAFF DOES NOT HAVE FACE MASKS OR GLOVES ON. ESPECIALLY NOW! LIKE I SAID IT WILL BE A LITTLE WORK BUT IT WILL PAY FOR IT'S SELF IF DONE RIGHT, CAUSE IT WILL EASE THE MINDS OF THE PEOPLE COMING IN AND WE ALL WANT TO GO TO OUR FAVORITE RESTAURANTS AND FEEL SAFE LIKE BEFORE. ALL STORES COULD TAKE ORDERS BY PHONE OR BY APPOINTMENT ONLY THAT WAY YOU DON'T HAVE A MASS AMOUNT OF PEOPLE IN THE STORE AT ONE TIME. LARGE DEPARTMENT STORES COULD LIMIT THE AMOUNT OF PEOPLE THAT CAN COME IN AT ONE TIME. PUT THEM ON A WAIT LIST AND CALL THEM WHEN IT IS OK FOR THEM TO COME IN. BUFFETS ARE GOING TO BE THE HARDEST TO MANAGE. BUT IT CAN BE DONE IF CLEANING IS MADE A PRIORITY AND THE FACE GUARDS ARE CLEANED EVERY 30 MINUTES. DISPOSABLE SPOONS OR FORKS COULD BE THE WAY TO GO FOR BUFFETS. I BELIEVE BUFFETS WOULD BE
Polk	Tourism	In regards to opening the theme parks & attractions I believe that strict guidelines need to be fully in place before this can even be considered. With ppl coming from all over the country & the world the risk of a resurgence without proper guidelines would be negligent. As an employee in the field I would want to feel safe going to work knowing that I have been given the tools to perform my job and that Employees and Guests are protected and feel safe that they won't get sick. Whether it's temperature screenings and having anyone who comes into the state/or goes to attractions tested and strict guidelines on social distancing be enforced and everyone wear a face covering or something else I feel that it will be a disaster if it is not done slowly and thoughtfully to protect the visitors to all Of Florida's attractions and natural wonders. When ppl come to Florida they not only go to the theme parks, they go to the beach, Explore our history go to the shopping outlets, Disney Springs, City Walk etc and if they have Covid19 it will be spread everywhere. We need to protect our state by whatever means possible to protect residents of all ages. We have so many aging citizens and they need our protection above all else.

AMERICAN OVERSIGHT

Duval	General	My personal opinion is that re-opening businesses and lifting the stay at home order is a big mistake until a vaccine is available to cure Covid-19. Just the little bit of opening that has been done the numbers are still on the positive side. Re-opening is a big mistake
Seminole	General	It's too early to reopen. Please don't rush this. Please place people's lives over money. Don't let us be the state everyone is laughing at.
Orange	Food	Please reopen all Florida businesses ASAP. It's been long enough. I've had to enroll my wife and myself into Social Security earlier than expected to survive.
Duval	General	As long as the number of new cases continue to decrease, here are my comments: Require people to wear masks in public. Finance - open branch lobbies with social distancing set-up. Protect bank personnel with barriers. Everyone should wear a mask. Possibly limit the number of people entering at one time. Others can wait outside and enter as individuals exit. Wipe counters several times daily. Have hand sanitizer available. Grocery stores - limit number of people inside and again require people to wear masks. Keep lanes one way until risk factors are reduced. Wipe doors to coolers and freezers multiple times per day. Cashiers should be protected by the plastic barrier and hand sanitize after each customer. Restaurants - limit number of patrons. Set tables 7-8 feet apart. Employees should wear masks. If gloves are worn, they would have to be changed for each table so washing hands or sanitizing may be more practical. Salons - Masks for both employee and patron. Stations should be cleaned after each visit. Dentists should wear masks and be tested if it is available. Patients could answer a series of questions and have their temperature taken upon entry. Education - Either limit class sizes, continue to offer online LIVE taught classes, maybe offer both or a combination of both to help reduce class sizes. Some of the young people are thriving schooling at home and it may be an alternative. Possibly combine Monday, Tuesday at school, Wednesday school live at home while the classrooms are deep-cleaned, Thursday, Friday back to school or some combination of both. Lunchrooms will require creativity and bathrooms must be cleaned, stocked, and Monitored. I have never been to the school restroom and had access to soap, towels, and toilet paper all in the same visit. Another possibility could be to send
Charlotte	Healthcare	1. FACE MASKS IN STORES. 2. STORES MUST PROVIDE HAND SANITIZER STATIONS 3. COVID-19 TESTING FOR ALL HOSPITAL EMPLOYEES, SKILLED CARE FACILITY WORKERS. 4. PUBLIC TESTING STATIONS THANK YOU, ROBERT SOHL RN

AMERICAN OVERSIGHT

Miami-Dade	Healthcare	I have lived in Miami my entire life. I'm A registered nurse working in an area hospital. All I ask you is to please make a decision based truly on what medical experts suggest not a decision dependent on the economy. The consequences could be detrimental to our generation and will leave a lasting mark in many generations to follow. I pray to God to help you make the decision.
Santa Rosa	General	To reopen the state before we even have enough PPE, sufficient testing methods and sufficient supplies is, in a word, reckless. Florida holds the highest concentration of senior citizens in the country, and that's not even to include others within high-risk categories. I understand that the state economy is suffering, many have lost their jobs and their stability, but to reopen the state prior to virus cases becoming stable will only allow for a second wave to hit, and worse. It's better to bite the bullet, so to speak, and keep the lockdown until the rate of active virus cases is in a steady, predictable downward trend than to risk a second and much worse wave. The economy will recover - this is Florida, many individuals come to vacation and visit here. This state will be fine. Our high risk citizens may not. Money does not supersede lives.
Lee	Accommodation	The island is ready for reopening. We all are going by the guidelines and taking precautions.
Brevard	Government	Hi Governor DeSantis and/or the officials tasked with re-opening Florida, First, I would like to thank you all for what you do. This is an unprecedented situation and I think Florida has, for the most part, done a very good job. As someone who looks at data every single day, is a scientist, and believes in balance between public safety and the economy, I was hoping to offer my perspective. I think you've done a good job so far in helping contain the spread of the virus in Florida. Currently, Florida hasn't come down just enough to lift the restrictions. With still roughly between 700-1000 cases per day, while we aren't spiking in quite the same way, this is significant and with the restrictions in place. A premature opening of the state can, and likely would, cause a high spike in cases, and could do more detriment than good. However, I am also a believer that the people of Florida need to get back to work. My thoughts is that as governor, you should extend the stay at home order two weeks, to approximately May 14. In my view, with social distancing in place, an additional two weeks will put Florida in a very good place, and chances are we'd safely be able to open at that time. Additionally, if two weeks turns out to be too long, there's time to always reduce that time (and the alternative if it turns out not to be long enough). It is my opinion, that if we do this, Florida will set the example for the rest of the country.

AMERICAN OVERSIGHT

Sarasota	General	Have you seen this? PLease watch despite titles. https://youtu.be/BTLii-e_UtY https://youtu.be/o8_Uko2stS0
Pinellas	Recreation	Support beach openings for recreation statewide. It has really affected my mental health not to be able to walk the beach and I know many others who depend on nature and the ocean for peace and exercise. It has been so hard to not have this outlet during this stressful time. Support limited hours and not allowing chairs, umbrellas, etc to discourage misbehaving.
Manatee	General	Please open everything up it is time. I would like to get back to work to support my family same thing with my boyfriend please let's make Florida great again I would like to get back to normal thank you 🙏 for your time you are going a great job
Sumter	Food	My suggestion is in restaurant seating with 6' distance.
Manatee	General	TOO SOON TO OPEN STATE! According to federal guidelines, states need to see reduction in cases/deaths for 14 days. Florida does not reflect this. We would like to continue with stay-at-home guidelines. Also provide state-wide anti-body testing for all Floridiabs who desire it. Testing is critical for anyone who wants to be tested.
Miami-Dade	General	I have been unemployed for the last 2 months and still haven't gotten one cent from unemployment, with that said, I believe it's way too soon to reopen Dade, Broward, Monroe or Palm Beach counties! We need testing and tracing! I know we all want to and need to work but if we reopen too soon it will be a desastre! Also, I have great doubts on how to go about enforcing the new rules and regulations! People will be people and after a couple of days these guidelines will go out the window!!! Thank you!
Broward	General	I am concerned about spread of this virus by opening South Florida too soon and then we see increase in cases. I am concerned those at risk will be forced back into the community for fear of job loss, this exposing themselves to health risk and possible death. I remain concerned that we do not have a true account of infected people, and we have people with no symptoms spreading the virus. I am concerned that those who feel they are not at risk and display no symptoms will disregard heath of others. I also remain concerned that we do not know enough about this virus and reports are coming out about resurgence and reinfected people.
Collier	Food	Restaurant that are open air, private beaches for now, hair cutting salons and all boating.

AMERICAN OVERSIGHT

Volusia	General	I'm a local Barber Shop owner that was forced to close with no income for my family and no unemployment from the state. Its critical that small business are allowed to reopen. Salons and barber shops can limit the number of clients in the shop at a time by allowing customers to wait in cars, limit the amount in the shop at one time and by setting up appointments. We are already set up with disinfectants and can wear masks. People should be allowed to conduct business. We can practice common sense. You are doing far more harm destroying people's lively hoods than the virus is doing. If someone wants to continue to isolate that's fine, but the rest of us should be allowed to get back to work.
Polk	Government	Please open Florida back up. Those that feel they need to stay home or wear a mask do so. Most of us would like to get back to normal life. We need the small business to open back up. We need the restaurants to open back up.
St. Johns	General	I think it would be responsible to wait and see what happens in the other states recently opened. In my county only the the north side has high number so maybe back to work by zip code you live in.
Lee	General	I think Florida should enact a graduated process to reopen. Give each City or County the power to make decisions as conditions warrant. Open stores but taking the necessary safety procedures such as limiting the number of people allowed inside at any given time. For at least 2 weeks after opening, have restaurants limit seating with no large groups. Beaches should follow the lead of Duvall County and limit activities and hours. Just about every business should have the opportunity to operate. We need people to work! Some areas or businesses may need more than a 2 week period, depending on the type of business. We'll never really know without trying. Keeping a blanket "non essential" closing is not fair to those people trying to earn a living or run a business. It's obvious that the unemployment website is a total failure so let's get people working. One other suggestion is perhaps keep businesses from firing employees who elect to stay home for fear of getting sick. This too however should have a specific time period attached. Thank you!
Pinellas	Transportation	We need to open Florida’s economy ASAP before it is permanently damaged. The company I work for laid off 90% of its employees. We have to deal with this situation the same way we deal with flu - without closing schools and businesses. We cannot stay home forever. Cases will continue to occur whether we are home or not.

AMERICAN OVERSIGHT

Pasco	General	Everything I have seen from the beginning of this says that Florida is just getting ready to hit are peak. How can we open things back up to the public when people aren't adhering to the guidelines that are already set. I cannot go out due to the fact I have asthma, however I've had others go to get me items I needed. Only for them to come back and tell me super Walmart was like a normal family Sunday outing. Children running around the store. Parents wearing masks but children not. This is not how we stop an outbreak I don't feel like being home another two months because I did what I was told and then we haven't waited long enough and we have another occurrence of the spread of Covid19. Thank you.
Seminole	General	Don't take opinions about this critical issue from random citizens. Take them from public health experts, scientists, doctors - you know, people who would know the answer to this question. We should safely reopen when there's a concurrence among the experts as to when we should.
Lee	General	It seems extremely harmful to the economy and people in general to continue the extreme shut down. Nothing more can be gained and at this point, every day of the complete shut down creates more hardships for the majority of the healthy people. Surely people who are uncomfortable being in crowds or more vulnerable to this illness can remain isolated if they choose without disrupting/destroying lives and futures Life doesn't come with guarantees.
Pinellas	Recreation	Please Reopen Florida!! Please Reopen the Gyms!! We are going crazy!! Gym is my life..my routine..I train hard and not being able to has been extremely depressing and frustrating. Kids are bored and going crazy..need to reopen! People are losing everything! Thank you! We Support Desantis all the way!
Marion	Recreation	I realize that kids sports may not seem like the most essential thing to the task force, but as a mother of two competitive gymnasts I can tell you that it is most definitely essential to them and their mental health. My oldest has practiced in her gym 20 plus hours a week (5 days a week) for the last 5 years and dreams of competing in college. It is a huge part of her life and it is all she has talked about since the shut down. It is not possible to practice these things at home effectively and she is steadily losing skills. She asked me to write this asking you to please consider allowing private sports facilities to reopen so that she can return to the gym and practice while social distancing and sanitizing diligently. Her gym, even before the shut down was impressively clean and had taken extra precautions to keep the employees and athletes safe after things began to come to Florida. Again, I realize that there are much more pressing matters but I do hope you will consider this as it is effecting the mental health of many athletes. Thank you for doing a great job here in Florida.
Marion	Healthcare	I have not seen much testing availability in Marion County. We do not have any drive through testing sites or sites that do not require symptoms and appointments. The availability for testing is not being published very much for our county and our numbers are on the rise. I would hope that making testing more available here in Marion County is in the plans.

AMERICAN OVERSIGHT

Monroe	Tourism	We need to open the Keys. I work at a hotel here. We need to get back to business. I am furloughed. After May 2 I am supposed to be seeking employment. I have employment. I love my job. BUT. the major of The Keys has us closed to tourists for all of May if not longer. We desperately need to work. Please help
Lee	General	The numbers of positive cases are flattening or declining because people are staying home. Please be cautious about not opening too soon. Is there a plan to scale back if numbers start to go back up?
Orange	General	Yes please reopen !! We can do it safely and right we all need to go to work like we we have been, You can come up with a plan so we as a state can survive, we ALL need to get back to some kind of normal soon, PLEASE REOPEN ! The theme parks have great people to figure out how to do it safely in the beginning we all need the tourism industry back that is what we survive on!! Thank You
Hillsborough	Real Estate	I am a licensed Realtor and I need to get back to work. HOWEVER, my health and safety is also important. It is TOO early for us to open up!!!!! DO NOt open up, it's TOO EARLY!!!!
Pasco	General	Poverty kills... So stop acting as though it's we either save lives or not, that's a false dichotomy. What about the lives of those suicides the depression of from long term unemployment and homelessness? What about those lives? It is the poorest among us who will suffer the most, do they not matter? The threat of communicable diseases is not something new to society, so we heighten our hygiene habits and get on with our lives! Not to mention the FACT that you have no authority to override the Constitution, the very Constitution that you swore to "Preserve, Protect & Defend"!
Seminole	Healthcare	Looking at all the info it's quite confusing to come to a conclusion on reopening, but I do agree that the lockdown is detrimental to a strong immune system which is critical in this. I feel that opening slowiy in stages should be the plan. Churches must be allowed to reopen as God is in control and He is the Master Physician. Outdoor activities are important for our health so beaches, parks, etc. should open immediately. People wanting to go back to work should be allowed as long as they are not sick, test negative and are not in an at risk category. The elderly, at risk, etc. should stay in lockdown for their own protection and could utilize delivery and other services to help others earn an income. Hospitals and doctor's offices should return to fully staffed in readiness for a possible surge of cases as well as patients to be able to be seen for all other reasons.School can wait until fall as the semester is almost over, and large group events and settings should be monitored.

AMERICAN OVERSIGHT

Levy	Government	Please do not open our businesses too soon. If you open too soon more of our people will die from this virus. I believe fear is so much better that stupidity. We as a people want to be safe and see another day. I pray everyday for alli the position of making decisions for me to make the correct decision. Governor you have just had a new baby don't put her life in question with this virus. She may not go in the public but it had away of spreading. Praying you seek Jesus answer and not man's. Msn is known for destroying ourselves.
Duval	General	I think that we should slowly open non essential businesses starting May 1st. However, I believe that these nonessential businesses need to implement social distancing measures prior to reopening. Whether that's limiting the amount of people welcomed in a salon per day, (as an example) and establishing 6ft rules throughout the process. In addition, I believe that places like the mall can do the same thing. Just like we go in to grocery stores, the mall can implement those same strategies, each business can even have someone at the door to monitor how many people come in at a time. I even think restaurants can simultaneously do the same thing, that way we can slowly get back to normal. Meanwhile people should still be encouraged to utilize masks, businesses should be practicing sanitation and making it a priority for their employees to wear masks throughout their job duties.
Lee	Administrative	Please reopen our state. It's time to move forward. Our economy needs the state to reopen.
Pinellas	Information	I think that Florida is doing a very good job with the virus. We have been able to keep our numbers low and mostly confined, considering the population. I would love to see our state re-open but I'd also like to see us follow President Trump and his team's plan for stages. Slow to re-open is key as we can keep more control of how fast the virus spreads if it picks up momentum.
Seminole	General	Please don't rush to reopen. Don't make us as an example to other stated what not to do. Place value on lives. Please extend the stay at home order!
Polk	General	I believe Florida should re-open May 1st, if not sooner. Until the medical profession is able to develop a vaccine/cure the general public will never be safe. It should be an individual's choice whether to protect themselves or not. Businesses should be required to continue to deep clean every night and continue the cleaning, to the best of their ability, throughout the day as long as they are serving the public. It should be an individual business decision if they require patrons to wear protective gear. Continuing to require individuals to stay sheltered in place is placing an extreme emotional strain.
Pinellas	Management	Open businesses now!

AMERICAN OVERSIGHT

Santa Rosa	Professional Services	I'm a licensed esthetician that specializes in lash extensions and facial waxing. I work in a salon with 8 other hair stylists. Although we practice sanitation after every client. We don't know where our clients have been, we don't know if they'll be honest with us. Me personally I am 5 inches away from someone's face doing lashes. There is not enough PPE on the market for everyone in our field. That should be going to the front line personal in hospitals. Even if I did find PPE, they are back ordered until June or they are 3X the amount of what they should be. How can we protect ourselves and our clients? I haven't even received unemployment, but I would rather be poor than risk my life and other people's lives. Do not open the salons until there is enough PPE out there to go around.
Orange	General	Although these are hard and troubling times I think it's too soon to open up the state even in a phased state. As you can see with opening up the beaches people flocked to them immediately. I think by hoping people follow the guidelines by giving them "normalcy" they'll take advantage. I say we hold on a little longer until we are in the clear as much as we can; seeing numbers at zero or near zero, at least single digits. My husband and I both got furloughed but we still think the same
Lee	Finance	Banks are currently operating by appointment only and frankly people are wanting to come in to the banks to have assistance with things that could be done from home. PLEASE consider keeping a stay at home order in place. We are going to risk spreading the virus again if we are not conscious of what we open and how quickly we open. Lives are at stake.
Hernando	Healthcare	I am all for opening the economy and getting people back to work. As a matter of fact I want to help out by volunteering to do contact tracing, but I need to have antibody testing in place to determine if I have had the virus and have antibodies. I was in Italy in later December into mid January. I believe I was exposed as I had some minimal symptoms. So TESTING, TESTING, TESTING is the key, both to determine if people are actively shedding virus and to find out who has had it and can help get teh economy back on line.

AMERICAN OVERSIGHT

Miami-Dade	General	It's not the economy vs health, the two must be done in conjunction with each other. Increased testing should be the 1st milestone in order to reopen the state. Even if testing milestones are met by region versus the entire state. We should follow peak guidelines as to which areas can safely reopen. Until that region and immediate surrounding areas reach the peak the region should remain under a stay at home order. Once the region meets a criteria to reopen it should be down in a safe step down strategy. The state must first secure the proper PPE for the area slated to reopen. There should be stand alone hand sanitizing stations. The state should mandate commercial disinfectant/sanitizing criteria for all businesses to reopen. The state should also undergo sanitizing efforts of all public areas and roads similar to how other countries "washed their streets thoroughly ". Businesses must supply and require all employees to wear the proper PPE as needed by their industry and there must be mandatory cleaning/sanitizing every two hours/more as needed. Shopping Carts must be sanitized after each use. Restaurants, Dr.'s office, beauty salons must all practice safe social distancing. When applicable appointments must be staggered to prevent overcrowding and when able offices can call their clients up/in one at a time limiting the amount of clients/patients in the waiting room. PPE must be worn by everyone entering an establishment but the state must ensure that these items are available in great abundance. All school must be commercially decontaminated and cleaned prior to reopening. Daily nightly deep cleaning must be done. All athletes in contact sports must be tested the same way as required that they pass their physical before playing. Balls/bats/ equipment must be sanitized before/after each game/practice. Free standing sanitizing stations should be set up throughout the school and cafeteria. Schools should supply and offer each student a protective mask to wear throughout the day. Staggered lunches and assemblies to avoid crowds of over 50 at one time. Encourage digital platforms to
Lake	Healthcare	We started building a home in Clermont in Dec 2019.. we are moving from out of state. My husband is in the health care field and I run a farm and train working dogs. We previously lived in Tampa and Safety Harbor in the 90-2000's we moved back up north when the economy wasn't so great. Since the economy was doing so well we decided to build a house down in Clermont. Originally looking at Happy Trails (champions gate area) We found the land to be a little more reasonable in Clermont but still close to the city for my husband's work... the main reason we wanted to move was all the things to do in Orlando.. qith everything shut down it has stalled our home being built as well as offers little to no reason to move. Please open things up!
Polk	General	As a Cast member at Disney I plead with you to not open anything down here. If you open beaches and state parks, tourist will want to come and we will see a spike in cases and it will just prolong the virus spreading. As much as I would LOVE to go to beaches, theme parks, ect I would rather be safe then sorry. Please do the right thing and don’t open up.

AMERICAN OVERSIGHT

Pasco	General	I would urge you to very carefully and gradually reopen the state based primarily on medical considerations rather than economic. Please error on the side of caution. Opportunities for economic growth and money will always be there. Lost lives are gone forever. We haven't even determined the scope of this problem. We certainly should not consider it to be resolving until after we have determined its' magnitude.
Collier	General	We elected Ron DeSantis to lead our state. He has appointed this task force to help make decisions. This forum to allow any Floridian to comment is ridiculous. How long are you going to take every comment, question, etc before you lay out a plan? PLEASE do something, anything!! Make a decision and go with it.
Pinellas	Retail	There will be many bankruptcies if Florida doesn't open the state. The little guy can no longer hang on. Bills are due and no more net and no jobs. Open up FLORIDA
Pinellas	Retail	We should absolutely allow retail, food and other businesses to open. The public can choose whether or not to continue sheltering in place without a mandate if it is applicable to their current situation. But those of us who are healthy and able should be able to get back to work and our regular lives.
Marion	Professional Services	Good afternoon Gov. DeSantis: This coronavirus has put life on hold and we are tired of living in constant fear of catching this deadly disease... Without testing for EVERY person in the state of Florida, I would much prefer that our state stay on shutdown until May 30th... My husband is a barber stylist and I am concerned about him going back to work this soon... We must put politics aside and consider the best way to keep our citizens in our state safe by waiting longer to re-open our economy. Thank you.... Sincerely, Sandra Haney
Miami-Dade	Healthcare	I have been trying to get tested for antibodies, since I believe my daughter, son in law and myself had the virus in February. No one seems to know where we can go to get tested. Testing has to be easier before anything opens up.
Palm Beach	Education	Please consider the staff and teachers of the schools when making decisions about reopening in the fall. We have many staff who have health concerns and they need to be considered. It's not just kids who are at a school. Thanks
Levy	Healthcare	Ref: covid19 and Florida's response: 1. Cannot get current info on the fl doh site—data is not updated, and at present is not sent out regularly by my emergency services dept. 2. Testing in my county has been at about 1% of the existing population. Levy is very rural and many are not inclined to take masks and social distancing very seriously. Given that asymptomatic spread in communities has been documented in general, we need a much broader test base before a decision can be made that levy is safe to 're-open.' I don't feel safe in my community right now because we just don't know the extent of spread of the virus, and we need vastly more supplies, lab availability, and public health presence before our vulnerable population can feel safe. Please ensure that much more public testing occurs thruout the state, including among nonsymptomatic people. How about testing all who want a test? And more testing in communities where few tests have been done.

AMERICAN OVERSIGHT

Pinellas	General	When it is actually safe, which at this time is too early to tell ,to transistion back to work it should be done VERY slowly. Businesses should be REQUIRED to have all personal that.can work remotely do so. This would allow business to operate with no increased threat to the public. It would also ensure that offices have a much smaller amount of people in their buildings. Businesses should NOT rotate employees that can work remotely, however staff that can not work remotely should be rotated to.keep the number in bldg under acceptable levels. Businesses should.operate remotely until a vaccine is developed. This would allow many businesses to operate at full capacity as well as keep a large portion of the popultation employed, would also prevent the inevitable spike.in cases if we prematurely return to public life. By rushing these interactions its only.commen sense that the rate of exposure and infections will increase not.only putting our people at risk but have a much larger negative impact.on the economy. Things have changed there is no doubt, ignoring that is ignorant, rushing for the sake of money also ignorant. As a state we have to be nimble and adapt to overcome. We can change the way we do business
Volusia	General	I feel we should give it another month of stay at home and see where we are at then. I know business owners are suffering but if we open too fast this may start all over again and they will be worse off. We are still learning more each day about this virus. I say don't chance it. I am a high risk person. I have been doing my part to stay at home.
Collier	General	Florida needs to re-open!
Hernando	Recreation	Why can we not open the parks for camping, I am far safer in the woods away from everyone then I am going into a store.
Orange	Retail	You have to look overseas to see what issues happened there and know we are not clear of this now. In a state that depends on tourism we have to be 100% sure before we do anything or you will lose the trust of those we hope will come here and spend money in the future. Any premature opening now will have grave results for Florida going forward We need to make sure we take care of our people now, let the at risk stay home, take care of front line workers, including retail and make sure they are all test regularly. We need to make sure we act correctly on this, party does not matter, because in truth Florida as a tourist destination over the next 2-5 years depends on it.
St. Lucie	Food	We need to reopen for our economy and for the many people that need to get back to work. We do not necessarily want this government money. We need to reopen now! We ought to follow proper guidelines agreed and established upon from proper channels. We can't afford this national closure to continue any further!

AMERICAN OVERSIGHT

Manatee	General	I believe we should open it all. The longer we keep the fear and being boxed up the longer this will last. I believe the suicide rate will sky rocket soon especially with children not being able to socialize. For anyone that fears being around others or is immune compromised then they should make the choice to stay home. But there is thousands of us out here saying we are ready to open! I've been lucky to be an essential employee but speaking with my customers we are all on the same page thinking this is hurting us as people, the state, financially and physically not opening up. Please decide for the people not the misinformation we keep getting from CDC and WHO
Lee	Healthcare	How are you guys going to consider to open the state when more people are getting sick. You have stopped schools, but want to open us. How inconsiderate can you guys seriously be
Polk	General	I governor do not feel at this time we need to open the state , however, I do understand the economics of the state re-opening. My feelings on this are we should continue a safer -at - home measure for 1 month and then open the state gradual with limitations and guidelines , then maybe hopefully my June re-Open more with limits but more places opening along with thru all this pracicing distancing and wearing masks and hand washing .
Lee	General	Do NOT open the state
Collier	Healthcare	I am writing to ask that orthodontists be allowed to go back to work on May 8th when the Governor's Executive Order closing dental offices ends. I have over 1000 patients in mid-treatment who are eager to come to my office and be seen. My staff and I are confident we can make the necessary adjustments to provide a safe environment for our team and patients. Respectfully, Dr. TJ Albert The Brace Place Naples
Seminole	Retail	Restaurants Retail
Hillsborough	General	I feel that the city should not open up too soon do to the positive cases of covid 19 numbers rising and i feel that its not safe as of yet because some people don't have symptoms or show symptoms and have not been tested and can be walking around with covid 19 virus and may come in contact with someone else and spread the virus and then there will be more positive cases
Pasco	General	I have been out of work since the state closed. I am a single mom and need to provide for my family. Please open the state so I am able to go back to work
Hillsborough	Education	The decision to cancel school for the remainder of the school year and continue with online education was a good one. This will keep students, staff, faculty and administrators all safe. I think we should continue the Safer-at-home guidelines until at least the end of May. I believe we need more wide spread testing and contact tracing in place before we open up. I think it would be tragic to see the number of infections and deaths go up after all the sacrifice we have already made. Public health has to be the main concern. We will be in a better place to restart the economy once the infection rate slows down.

AMERICAN OVERSIGHT

Martin	General	I don't get it. This is simple. Open the economy. Require all in public places to wear masks. Require all business that want customers to have hand sanitizer inside the front door. Have a guard confirm that all who enter to have a mask on and hand sanitize. Simple. As a 50 year republican I have to say I have not changed, my party has How did we get such idiots as this gov in office. Before retiring I traveled all over this earth. I still stay in touch. Take Bulgaria. They shut down early and firm. Now look at their stats vs ours. Game over.
Hillsborough	Education	I am very happy the district decided to keep the schools closed with the number of teachers students bus drivers and other workers that keeps 1/3 of Tampa at social distance that helps a lot in this transition. As for how to move forward I think we need to do it in 3 different waves and watch the numbers closely the 1st wave is the most critical to people who are going hungry right now restaurants barbershops hair salons and selective surgeries. All of those fields of service Are critical to getting back small business and generating in common our community. Along with that 1st phase Comes respect for social distancing and how to handle being in public places. Our 2nd phase should be our churches retail stores workout centers and other places where small groups can congregate. The final phase could be Areas of large group gatherings.
Lee	Professional Services	I have a spa and have been taking certification courses on safety measure. I feel comfortable reopening with these guidelines. Clients waiting in the parking lot to be escorted in, touching as little as possible, retail area not available for self-serving, contactless check-out and increased PPE, infection control and sanitation. It is imperative to start income coming back in. PPE doesn't cover equipment lease payments. Cape Coral is also not impacted with the virus, numbers have been low. I feel our safety measures will not cause harm to our clients. We will also not serve high risk clients in the beginning.
Orange	General	Everyone's job is essential! So many families, including my own, are losing our jobs and small businesses we've worked so hard for. We have flattened the curve and minimized Hospital admissions. Let's open nature back up and send our people back to work!

AMERICAN OVERSIGHT

Hillsborough	Professional Services	I am a hairstylist and I have serious concerns about salons opening too soon, and I do not believe they should open on May 1st. Salons that are private and can operate by appointment-only do have a better capability of limiting the number of people inside the salon. However, salons that are franchises and work by both appointments and a walk-in basis cannot have good control over that and it would be very complicated, if not nearly impossible, to accomodate clients that choose to walk-in and not make appointments for their service. Waiting areas are small and do not allow for adequate distancing. Being required to wear gloves during services is also difficult for when we are doing haircuts. My fingers do not fit properly holding my shears if I'm wearing gloves. If clients are wearing masks it will make it very difficult to perform services as it will be in the way of what we need to do. Furthermore, we have to be in such close proximity to our clients that I do not feel comfortable having to be that close to people during this time when I feel the virus is still such a high risk, even if I'm wearing a mask, and especially if I do not have access to a medical grade mask where I know the filtration and protection are adequate. I have done my part by staying at home and only leaving the house to get groceries when necessary. When I go out, I still witness people being irresponsible and not taking precautions to be safe. I don't want to risk being in close proximity to those kinds of people that are not taking this seriously. I realize that people are complaining about how their hair looks, but I believe vanity is not as important as trying to stay alive and not adding to the already chaotic hospitals. I agree with reopening business that can provide curbside service or where a 6 ft. distance can be maintained. But since salons cannot provide this kind of service, I plead with you to please not follow in the ignorant footsteps of the Georgia governor and allow barbershops, salons, or any other type of businesses that are non-essential and requires close contact with clients/customers to reopen in just one week. We need more time away to feel safe and to remain safe. Please do the right thing and not include us in the first phase of reopening Florida businesses. Opening too much, too soon, will just cause a spike in the case numbers of people contracting the Covid-19 virus and we'll be back to square one. Be a good leader and sterling example to the rest of the nation in
Pasco	Education	Reopening the state will only bring an uprise once again. We will be back to square one, if not worse than we are now. I am 100% opposed to reopening the state so quickly. Yes there has been a slow decline, but that is only because we have certain restrictions in place. That will not last long if the state is reopened. If you think the economy is bad now, it will be much worse. People will flock to places, and this virus will run rampant. Many more lives will be lost. Many people will die that never had to. There is still very little knowledge about this virus. To open the state back up seems highly dangerous. There has only been roughly 1.5% of testing in the entire state of Florida. That statistic can not be judged accurately. Without the proper information and data, we are destined to fail with a reopening.

AMERICAN OVERSIGHT

Miami-Dade	Recreation	I live in Miami Beach and beach goes hand in hand with Family Recreation. My suggestion to phase in is to open the beach to resident of county required social distancing from 10-5 daily and 10-6 on weekends, this way parents can take their kids to beach daily. Also stress the social distancing at access points (which should be limited) Also it's time to open pools in condo's which have been shut down. The elderly use this as physical exercise, which many have been isolated due to shut down. Condo's can post resident only no guest and self police itself. Also a time limit of 1/2 hour for no more than 10 persons at time during busy times. Gyms should open and require all to self clean equipment and provide cleaning materials. Mandate mask for all. Parks can be same as beaches with rules at access points.10-5 daily .
Palm Beach	General	Open the waterways to boaters immediately. I pay a lot of money to a marina for my boat to sit and unable to use it. Not fair. We can boat. Enjoy the outdoors and sunshine and fresh air while social distancing with our families. Please open immediately. No reason they can't be. Open hospitals. They are not overwhelmed and having to lay off hospital workers.
Lee	Healthcare	I work in healthcare and there is no way the state should open yet. We need to give this time, even though it is frustrating. If the state opens too soon this will happen all over again. We need to be patient, as hard as it is. PLEASE! WE NEED TO BE PATIENT TO BE SAFE!
Okaloosa	General	I think it's a little too soon. Our numbers are not going down at all yet
Palm Beach	Construction	We must advise the vulnerable to maintain their isolation for their protection. Give them all the support we can until it is safe for them to get back into the general population. With that said we need to get Florida back to work not in a month not in a week now. We should all still maintain the Covid-19 protocols of masks where 6ft apart is not possible and keep the social distancing until it is safe to resume normality. Mr Governor you and your team have done a terrific job keeping us safe now we know what to do let us do it and get back to work to rebuild this fantastic states economy. I am originally British been in this wonderful state and country for nearly 20 years. Lets go to work

AMERICAN OVERSIGHT

Miami-Dade	Healthcare	My suggestions on how to reopen FL are based on a simple fact that we, as a community,, must at the end develop some form of herd immunity, which can only be achieved by recovering after getting the virus either via vaccination or the actual illness (staying home forever is not an optionP. Since the vaccine is not developed yet, that means that younger people without underlying health conditions should be allowed volunteer to return to work (plus get infected and develop immunity) while people in the risk group should be allowed to remain isolated if they so choose.until they can get vaccinated. That would require providing monetary stimuluses for the former and enhancing home-based services for the latter, such as personal grooming, food delivery, home testing, etc. That is at the higher level. Beaches and parks: these are FL main asset, and must be open. However, they are also a magnet for potentially infected people from other states. What do we do? Social distancing with enhanced penalties for violating it, mandatory enforceable 14-days quarantine for new arrivals.
Orange	Tourism	Yes, my vote is to reopen as safely as possible. SIP for those with underlying conditions and the elderly. But it's time to get back to some normalcy for those who are healthy and low risk. The virus is going to spread, regardless. As long as hospitals can operate within capacity, let's open our economy back up.
Lake	General	Reopen
Brevard	Government	I don't think the state should reopen as of yet.. Our numbers are going up every day. If we open now more and more people will die. We need the unemployment system to work so people out of work could survive this pandemic. I pray y'all make the right decision by keeping us closed and saving the lives of people.
Duval	Education	I have 2 children in elementary school. Although I'm glad we will continue distance learning for the remainder of the school year I'm nervous for the summertime months. My husband must work (manufacturing,) and I am lucky right now that I am working from home. I'm a city employee, and I worry that I will be asked to go back to my office mid-May. I don't have family or other help to watch my kids. I cannot keep them home alone. What does the city or state have in place for childcare or for parents who need to stay home during the summer months if summer camps do not open? My children have gone to their elementary school for summer camp. We need to know how to plan for these situations.
Hillsborough	General	We are past the 30,000 Bench mark of confirmed cases, let's be the smartest state and not end up like New York. I vote that we keep it closed until the cases drop and the doctors say it's ok. Please let's not mess this up..
Collier	Professional Services	You are asking people to stay 6 feet apart. I own a Nail Salon and I don't qualify for unemployment. I asked for the SBA loan and still waiting. You closed us down on April 3rd. How do you want the economy to get back if nothing you or president have offered have help us. Numbers keep going up in Florida. We are a retirement state with lots of elderly people. You need to re-think about opening Florida before if gets worst then NYC. Help the small business and your state. You have a family and a lot of us do as well!

AMERICAN OVERSIGHT

Miami-Dade	Healthcare	How can you open the state when the virus is not controlled. Please don't be a closed minded republican. Please take care of residents as if they were members of your family. Fix the problems please DO NOT OPEN. Take care of us. You made us work under the "essential" category not even protecting us from being fired. Fix the inequalities, then open the State
Sarasota	General	By May 1st, Reopen beaches and parking lots for residents to use. Open restaurants to half capacity. Let all stores open to 50% capacity with proper physical distance. Open day cares that are in conjunction with schools so those parents can work. Open bars with 50% capacity. There will be a small spike in people sick but every has been secluded and immune system is down. Let Disney and universal open to half capacity as well.let medical facilities open for surgeries and dentists and eye doctors open. Get medical personnel back working. You'll need them for the mini spike in illnesses. But we gotta push through and I think it will all work out and we will obtain herd immunity. By July 1st continue to open it all up and by august 1st it should all be open.
Escambia	Recreation	Based upon the new studies in LA county, Massachusetts, San Francisco county, stay at home has a marginal effect, as random testing is showing far more have contracted the virus and recovered than our testing reports driving down fatality and hospitalization ratios. With social distancing and some reduced numbers allowed in restaurants for example we can slowly build a herd immunity while protecting the vulnerable instead of blanket generic restrictive measures. Focus on the vulnerable and and realistic social distancing. In the end the longer you restrict the healthy population the more they will start to ignore severe restrictions.
Manatee	General	It would be better if we could actually really close the entire state for 2 weeks. We have not really close the state... Also, there is no vaccine yet, why re-open now?
Miami-Dade	General	I am very concerned to open beaches, restaurants, shops too soon. While staying at home is difficult I believe opening too soon will cause a relapse. I feel many in Miami Dade are irresponsible in social distancing and ANY LEWAY given will allow people to go all out and be totally irresponsible.
Manatee	Finance	I need to get back to work, unemployment website not working. I need money for bills. Open the state back up with wearing mask. Staying 6ft away. If people don't want to go out then they can stay home. I suffer from mental health. I need to get back to work. staying inside isn't helping at ALL. Thank you for your time.
Orange	General	It is too soon to reopen. Please be responsible in making decisions that may have grave consequences!
Lake	General	Florida needs to open. We need to get back to work, back to play, doing all the Florida things we love to do. Go to the beach, the springs, out to eat. Our economy is reliant on tourism. Don't devastate our economy any longer. Jennifer Overfield

AMERICAN OVERSIGHT

Manatee	General	Everything should open up. Those that are more vulnerable can be cautioned to stay home. But it should be up to the individual to decide for themselves if they go out or not - not the government's decision. The hospitals are far from overrun - they are laying off people and the deaths are less than normal flu season. Businesses are being ruined for nothing. No one is forced to go out - so let the people decide. Life is full of risks -telling everyone to stay home is not living and is not the way this country was meant to be run.
Miami-Dade	General	Look at the protocols of a cruise ship when they have a noro Virus on board. Implement same protocols for any building or small business and open up already!! Open all public places at once. If only parks, EVERYONE will go to a park. Open up all, so pralle spread out. Awareness is there, so we need to count on all people doing their best, but business must open ASAP!! Open the ocean at least for swimming!!
Broward	General	Please encourage counties to soft open beaches for exercise. https://www.change.org/p/ron-desantis-surfing-is-an-essential-activity?source_location=topic_page https://www.change.org/p/ron-desantis-ensure-safe-watersports-access-to-the-florida-s-waterways-during-covid-19-pandemic
Miami-Dade	Retail	It would be crazy to open anything in Dade county until there is a 28 day drop in cases. Everyone know there is not near enough testing to truly determine how many people have the disease/virus. I think it would be very irresponsible to re-open before end of May.
Lee	General	Too early to open. People, especially visitors have no regard for rules. Without the virus, people have no regard for our beautiful environment.
Orange	General	I saw this and really believe it says it all - Here's a very appropriate analogy: "The curve is flattening; we can start lifting restrictions now" = "The parachute has slowed our rate of descent; we can take it off now" Please do not remove the Stay at Home order to quickly.

AMERICAN OVERSIGHT

Pasco	Education	We have yet to see a 14 day continuous decline in COVID-19 cases. We arent testing at full capacity. In Hillsborough, less than 1% of the population has been tested and we are over 1000 cases. While I understand the economic impact of remaining closed, you need healthy and ALIVE people to stimulate the economy. This is a time that is unprecedented in the WORLD. It is not just us...but I do believe the government of Florida needs to take ownership of the failings of the unemployment system and the lack of care it seems to show. Sure, k-12 schools are closed and public universities...what is the expectation for private universities? There needs to be some sort of guidance and provision from the government...last time I checked that's your job as an elected official, instead of passing the buck. I think relaxing measures too soon will see a second wave, a worse wave, as with the historical evidence from past pandemics show. We are NOT smarter than people back in those times as people want more and have less care for the greater wellbeing of a population and are more "me" centered. I think it is WAY too soon to open Florida. We have the 3rd highest senior population in the country. We have a lot of children as well. While children may not be as affected as our elders...who is to say they aren't carriers? Be smart. Fix unemployment. Put government safe guards in place to maintain the well being of everyone. People are losing their jobs, their sanity, their loved ones and having an office that doesn't answer the questions of the people is difficult. There is no reason unemployment shouldn't be paid out to those who filed...especially those over a month ago. Take steps to ensure the safety of the public. Have doctors and Healthcare professionals on you boards ..as they seem to be the only ones who actually understand that we DO NOT have this under control. There is no known cure, no known treatment, no known aspect to who it picks over others...be smart. Be a leader. Keep Florida CLOSED.
Volusia	Healthcare	We need to remain closed at this point. I’m in healthcare and we are not ready. No electives surgery’s yetPLEASE!
Okaloosa	Healthcare	The Czech Republic has managed to bring their infection rates down by demanding the wearing of masks by all peoples. Preventing the infected from spraying droplets is what will help slow the spread and allow for all to move about and work. I would make some kind of recommendation or mandate for all people to wear masks while indoors. I would not criminalize refusal but let’s make it mandatory for establishments who require licensing or health inspection to not admit those who are not wearing a mask.I would also recommend that guests be served outdoors in open air and/or mandate all doors and windows of the establishment be opened for movement of fresh air. Same goes for the cosmetic industry. Long term care homes to remain closed unless visitor can prove they are negative. Hold off on opening back up to tourists for a bit or at least until we know we could tolerate the influx of the sick. Because they will be sick. I have many more suggestions but not enough time to type than out. I am open for respectful discussion and debate..

AMERICAN OVERSIGHT

Lee	General	We have been in the salon business 13 years now however if we are not able to get open on the first it may be the end of our successful business we have run all these years. We have had no income for too long now and need to get back to work to survive. We have very good sanitation systems in place including UV light treatment for the air. Those that are prepared should be allowed to work. Those that are too nervous should simply stay at home.
Hillsborough	Food	Hi, I would be wary of opening restaurants fully until at minimum we adhered to the 14 consecutive days of decline. It's not worth opening then reclosing on another outbreak
Broward	Healthcare	The latest COVID-19 data shows that actions taken by federal, state, and local governments have been working and total cases will be far fewer than projected without such measures. •Hospitals have built up stockpiles of PPE, ensured bed capacity (especially ICU beds), and implemented ventilator strategies to handle surge demand. •Testing is key, and testing capabilities have dramatically improved in Florida. Models based on real-world data show much more mild growth than initially expected. As mitigation measures remain in place, hospitals are at record-low capacity, roughly 50% on average across the state. •Deferral of urgent/non-elective surgery has occurred on a substantial level, even for urgent surgery categories. •Patients need to regain access to this level of care for their well-being, along with the well-being of hospital systems and the healthcare workforce. •Hospitals, physicians, and staff are struggling financially as a result of COVID-19. •Major health systems across the state and country have announced layoffs or furloughs of employees due to the record-low patient volumes, further exacerbating the economic downturn. Getting back to caring for all patients is essential as many conditions worsen due to delays in scheduled surgeries, while others avoid seeking care for life-threatening, yet treatable conditions, due to fears of face-to-face medical interactions. •Hospitals should be allowed to resume treating all patients provided they can demonstrate: oAdequate PPE to manage COVID-19 and non-COVID-19 cases oAdequate ICU and ventilator capacity and staffing oProtections and processes in place to prevent the spread of COVID-19 for patients and caregivers in the healthcare setting oContinued reporting of relevant data to state officials to ensure capacity is maintained as surgeries restart

AMERICAN OVERSIGHT

Highlands	General	We are a family of 7 living on medical covid leave . It more than supports us all as of right now along with the stimulus checks and the extra snap. My family has been hit hard with 5 children being sick and my husband. My daughter had all the symptoms of covid but was refused testing because of age. She could barely breathe. It then passed to my other 16 mth old daughter, 9yr old son, 5yr old son. My other 17yr old daughter (who is the twin of the first to get it) and then my husband who is the one on covid leave. Pleaae keep is closed they all need time to recover from this monster and to keep the rest of our community safe. We self quarantined over 4 weeks ago for help and everyone else's. Pleaae keep fl closed My 17 yr olds are also missing graduation for now tha is to covid. But I would rather them be safe and our community safe. Please keep fl closed
Gadsden	Construction	I submit this concern in regards to the state of Florida's interest to revitalize the tourism industry from the effects of COVID-19. My concern as a working class citizen who largely grew up in Florida, is that our construction standards and regulations have been neglected. This will pose a tightrope consideration upon whether tourism can stand. Affordable housing that is constructed with integrity needs to be accessible for Floridians. Without this, the state will be courting disaster on the scale of Louisiana. It is shown that more space in seating, better ventilation, better air quality and easier access may be the most vital modifications to restaraunts and other business spaces to reduce risk of infection. You can also apply a similar principle in terms of housing-- spacing, air quality, ventilation, more efficient access. Florida's infrastructure needs to be improved and it is no coincidence that we are seeing the need for this at every angle. Before everyone is told to go back to work, will those modifications be done to preserve our health? I urge officials to look into the conditions of most low income housing, apartments and leasing spaces to see if our buildings are really up to the challenge or if they can even adequately be modified with citizens wellness in mind. Tallahassee is a great example of where building and housing standards are out to lunch. The safety and protection of the working class must not be forgotten, even though FL economy may be way too dependent on tourism. We need an economic basis that is not just coming from tourism. We need to revitalize our infrastructure, since that is what is creating the most setbacks for the state. From the unemployment system blunder to lack of other jobs outside of the tourism industry that working class people can work, our housing and building needs improvement for our safety. The working class in Florida are kept remarkably poor with minimal chance of wage increase from a tourism dependent economy where the working class are many and tend to work those hospitality/tourism/food service jobs. Please consider creating or ensuring a) more jobs outside of tourism/hospitality that actually assists us in the functioning of our state & local agencies, in agriculture, or production of equipment, medical or otherwise for our well being b) safer living spaces and places of employment c) mandatory procedures in maintaining a low risk environment in any physical work space d) improved access to affordable housing that is built decently (no more slum Lord houses). Without this in place,
Sarasota	Food	Private clubs with controlled membership should be allowed to open. Restaurant's with restrictions of 50% capacity. Retail with capacity restrictions

AMERICAN OVERSIGHT

Orange	Food	Hello - in thinking on how to get restaurants open again... I think reservations are the way to for everything (fast food or otherwise). With a reservation you can control the amount of people that go in an establishment, you can separate tables accordingly. Reservations can be limit to 10 or less or 5 or less. At the same time, curbside and take out can still happen. Between guest staff can clean and disinfect chairs, menus, tables etc.
Orange	Professional Services	I believe we're doing a great job in flattening the curve. I think that mid May-early June would be our safest bet. There is no point in opening May 1 and ruining what we have worked so hard for by staying home and suffering financially. I want to return to work ASAP but I also know it could be worse if we're not patient. Thank you
Orange	General	Hi my name is Kacey, I am a 27 year old female who lives in Orange County. I am writing to you because I can understand how tough this choice must be for officials. I just wanted to address my concerns. As much I would LOVE to open my business back up, I don't fee comfortable having our state back up and running yet. I have an autoimmune disease along with my aunt & cousins. My dad had a quintuple bypass years ago, and we are in the category of who may not make it, if we were to get this virus. I care honestly more about my family than myself getting it, however, I feel as though if we start to open our state back up, or chances are going to be much much higher of contracting the disease then if we waited till it was a little more safe. I feel terrible for the people who are struggling to put food on their tables & are not working, however, I ask you to put a little extra thought for people like my family and I, who may not have a fighting chance to survive this awful virus. Thank you for your efforts and asking our opinions, it truly means the world. Kacey Kelly
Seminole	Technology	You have no idea what you are doing. You can't even get a website to work and you think you know how to tackle a pandemic? Your tenure as governor has been truly pathetic. Spend some more time at Mar-a-Lago on the taxpayer's dollar, why don't you?
Martin	General	Reopening businesses, even at a slow rate, will only increase fatalities from COVID-19. More time is needed to dissipate the spread of this disease. Human life is more important than the economy. If Mr DeSantis is truly pro life he will put human lives first not businesses.
Lake	Recreation	Reopen May 1st
Seminole	General	Please do not open the economy too quickly! We are a three generation household. My husband and I are retired and we live together with our daughter and grandchild. Our daughter is a hairstylist and we help care for our 9 year old granddaughter when she is not at school. Our daughter works two nights and alll day Saturday. There is no way that our daughter can style hair without getting into close proximity to her clients.. People can have Covid-19 without symptoms, so there is no way for her to know who is infected. She would be putting herself and the rest of our family at risk just for a haircut and color. Please be careful how you handle this virus. Lives are more important than vanity!

AMERICAN OVERSIGHT

Broward	General	Florida should not consider lifting stay at home orders until there is abundant testing available and some sort of medically sound consensus on treatment. As the father of a 1st grade student and a husband of a 4th grade teacher, I fear for my family's safety should schools reopen in the fall without greater understanding of COVID-19. New symptoms associated with the disease are being discovered daily and reopening too soon would set back any sort of progress that stay at home orders have helped make. Also, I work in commercial construction and am considered an essential worker. I worry about my employees and subcontractors daily because they are on construction sites where, the reality is, social distancing isn't always possible without impacting production and schedules that we are still being forced to meet in order to keep clients and thus, maintain incomes. The state's priority should be to increase the capacity to test individuals, spend available resources on developing treatments for COVID-19, and looking for ways to help individuals and small businesses ride out this pandemic. I fear that opening too soon is only going to lead to second or more waves of infection and thus, crippling the economy and livelihoods of Floridians in even greater ways than we have already experienced.
Broward	General	Please reopen everything. Especially Rattlesnake Jake's in Deerfield Beach, a man needs a watering hole to survive truly!
Santa Rosa	General	My husband's small business has no business and its the same with so many small businesses in our area. We cant see or doctors, make medical appointments etc. There are very few places we can go to "get out of the house" like the beach. Children are not able to see and play with their friends and many do not understand why. I beleive the Governor has done a wonderful job with what he has been presented but its time to get on with our lives. I do not beleive the statistics....I think they as skewed to keep us afraid and take away some of our liberties. Panic buying and hording is not the way we live. I feel the virus has been among us for quite awhile and is no worse than some of the strains of flu that this country has recently had. People are now more aware of personal space, handwashing etc. I think that you will be surprised with what happens when restrictions are listed. The numbers are not going to rise . Thanks and please let us get back to living.
Hillsborough	General	Hello. Unless numbers of positive, recovered and deaths cases have drastically started changing then we need to continue to stay home and not reopen the state. Simple as that.
Pinellas	General	PLEASE begin to reopen! Stress common sense things like staying home, washing your hands, still social/physical distancing. We must get back to business! Also, instead of giving cumulative data, tell us how many cases are ACTIVE; this will make people more comfortable. But, I beg you, open back up ASAP.
Duval	General	Reopen Florida!

AMERICAN OVERSIGHT

Seminole Healthcare April 25, 2020

The Honorable Ron Desantis

RE: Reopening Dental Practices in Phase One of FL Reopening Plan

Dear Governor Desantis:

I am a dentist who practices in Seminole county in Florida. I am writing on behalf of my practice and our 7 employees to urge you to exclude the reopening of dental practices in the initial phase of FL reopening plan and to keep the prohibition on elective dental surgeries and procedures in the state. Extending of this prohibition is necessary to both ensure that residents of FL have access to proper emergency oral care and the enormous impact of COVID-19 resurgence of infection rate can be mitigated. If the prohibition remains in place too much longer, I fear that many dental offices will contribute to the spread of COVID-19 levels.

As a dentist, it is my duty to care for patients who experience dental pain, trauma, infection or pathology. Presently we are only treating emergencies, allowing social distancing to remain and limit spread the aerosols created by dental procedures. Every day that the number of patients stay away from aerosols created by dental procedures decreases the likelihood of an outbreak of COVID cases to patients and dental staff. Continuing to provide dental emergencies allows us to continue to reduce hospitalizations due to dental emergencies and the expenditure of the limited resources and decreasing the likelihood that a patient will be exposed to COVID-19.

We are health care providers and we want to contribute to the reduction of COVID cases. Infection control has always been a key part of the practice of dentistry but the exposure to aerosols is too risky for our people. With the use of PPE (N-95 masks or equivalent, face shields, gowns and gloves), we are using limited PPE supply and exposing all patients and employees to this deadly virus.

AMERICAN OVERSIGHT

Duval	Food	My wife and I own TacoLu, a restaurant in Jacksonville Beach, in Duval county. As a small business owner, I was impressed at how the governor made decisions to help keep restaurants open and serving the community. Unfortunately, many businesses closed their doors—for reasons of their own, or because of the difficulty of remaining open during the current stay-at-home guidelines. As plans are made to slowly reopen, I would like to suggest that even when diners are allowed in the dining rooms, takeaway-only will still be a good option that many will prefer, so it would be really nice, and forward thinking, to leave the restrictions OFF regardIng alcohol sales. It would be a big step backward to limit us to On-Premise only consumption. It took us about three weeks to get our head around selling margaritas to people in the parking lot, after spending an entire career trying to keep people from leaving with a drink in their hand. But once we realized the demand was consistent—and where was anyone going but straight home—we began selling our delicious margaritas in safely sealed quart containers I realize that this was a gracious exception to begin with, but please remember that “reversing the flow”, So to speak, would put us back into the same place we were when this began Thank you for listening! Don Nicol
Polk	Tourism	We need to open. This is hurting more people than helping. This is not a sustainable solution long term. The answer to fixing a flat tire shouldn't be to burn down the whole car.
Lee	Retail	I’m a small business artist. Most of my sales are done at outdoor art type events. I’m currently not able to do these events due to the state being shut down. I have bills to pay and a family to feed. No unemployment has been approved for me. Please open up our state. Require people to wear mask and let us deceive if we want to work.
Pinellas	Healthcare	First, the process should be guided by healthcare professionals, not leaders of groups with huge financial stakes who lack knowledge of disease control. For example, they floated the idea of opening the entertainment parks, which although Florida is dependent on tourism, has be one of the highest risks for Floridians as it would open our State to people from all over the world without regard to risk factors. The priority should be healthcare for our residents. That means opening medical care first to keep Floridians healthy. If they do not have health, money means nothing. Second, if the healthcare professionals consider this safe, open counties with very few COVID-19 cases, but limit all services and activities to residents of that county, otherwise, someone from a 'closed' county could travel for a 'bootleg' service or to make a purchase in that 'open' county. Also, the Governor means well and has a lot of issues to deal with, but he should have his presentations fact checked before speaking. The confusion and misinformation is already rampant. Thank you.
Pinellas	General	With positive cases and deaths still rising I think it would be irresponsible to open up the state again. We've waited this long why not make sure the numbers still aren't rising and are going down and not up.

AMERICAN OVERSIGHT

Orange	General	Opening up the state too soon will only hurt the economy more. I rather wait a bit longer and let numbers go down to near zero at least single digits than opening now and having to do this again. Both my husband and I were furloughed and want nothing more to get back to work but if we do it now or too soon then we will have to close everything down and set us back even more and erase all the progress we as a state accomplished. Please be patient and wait to open.
Volusia	General	I know this is suppose to be for ideas for reopening Florida. But right now I think it's a terrible idea. We've reopened the beaches and numbers skyrocketed. Please stop and consider thr fact that it's not the best idea right now.
St. Lucie	General	It is time to open restaurants with 50% seating capacity and tables 6 feet apart. Our local restaurants have done a great job with to go food but missed the income from wine beer and alcohol. They need to survive.
Broward	General	In my opinion until the numbers are not escalating then opening up the state could be reconsidered but right now is it's very risky
Collier	General	I think it’s to early. I agree the economy needs to be up and running soon but it is to early. IMO. The focus right now needs to be on unemployment. That’s is ridiculous and unacceptable. Focus on that. All your time and effort should be focused on fixing unemployment.
Miami-Dade	General	I think a basic requirement for anything in life is to be alive and I think that this needs to be taken into account when making the decision to reopen. Yes, the economy is suffering. Yes, many people have lost their jobs. Yes, many individuals are afraid that they will end up losing their businesses. With that being said, people are dying and that's the reality. The healthcare system is overwhelmed and could potentially collapse if we reopen to soon. Not only is this pandemic unprecedented but it continues to challenge what we think we know about it. New information about covid-19 continues to come out. First it was only individuals who are 65 years old and up to individuals whose immune system are compromised whom had the most risk of contracting covid-19 and dying from it. Now, covid-19 has proven to be a risk for healthy individuals and people of all ages. There is still no vaccine, cure, or even any studies that have established immunity from covid-19. I understand people want to leave their homes and what not, however I think sacrificing for the greater good is what's needed. Until medical professionals advise it is absolutely safe to open, I do not think we should reopen. The risk of opening far outweighs any benefits in my opinion. Thank you for your time and consideration.
Manatee	General	It’s time to get things reopened. Successful businesses will operate responsibly. It is going to be impossible to come up with guidelines for every business. I manage and operate a golf course and people have been very respectful of the guild lines put in place. Good businesses will do the right thing to protect staff and customers. Open up things up slow but responsibly. We need to get this economy moving again.

AMERICAN OVERSIGHT

Seminole	Tourism	The state and county need to open the economy. The state and county need to let business and cousumers make their own decisions. The decision should be immediate. We do not live in a police state. The abuse of power by the state and county needs to be addressed . The unemployment system that has not processed payment to workers. It is a disgrace to impose work restrictions and not send payment to the workers for 6 weeks and counting . Self employed individuals like myself have got nothing.
Pasco	Healthcare	Allow all elective procedures to resume.
Hillsborough	General	I would like to see restaurants, bars, theaters, and other retail reopened soon, but at 50% occupancy for the next 45 days. Maybe even a 90 minute time slot to keep people from congregating for too long.
Polk	General	We need to reopen for our small business's. Some of these people will never make it if we stay closed. People are getting bored at home and need some activity to do. Walking parks,biking trails.etc.
Collier	Healthcare	I support the full reopening in the state of Florida. As a small business owner, a registered voter, and a tax paying citizen of Florida I do not support a continued shut down! The fear mongering of the media and the draconian measures of government control has to stop! My constitutional right to pursue liberty, freedom and the pursuit of happiness is being unjustly infringed upon! Those wanting to continue living in fear and being controlled can stay home but healthy individuals who want to work should be able to! Your fear should not control my liberty and freedom! I refuse to descend into poverty and allow my business I have spent over a decade building disappear. I refuse to participate in the unconstitutional oppression of my freedom by state and local government. I refuse to wait for or receive an unsafe, untested vaccine for a virus that has already mutated over 30 times and has a 0.0001% mortality rate. We are allowing fear and politics devoid of scientifically accurate data to destroy Florida and America! I believe in liberty NOT tyranny! I will not allow my constitutional rights to be infringed upon. I know there are many others that share my beliefs and we will STAND UP and FIGHT FOR OUR RIGHTS if you force us! Stop allowing the government to destroy: The Food Supply Small Businesses Medical Autonomy Access to Healthcare Religious Gatherings Privacy Rights Fellowship Tourism Reopen Florida Now!!

AMERICAN OVERSIGHT

Pasco	General	Covid 19 Re-opening Florida

I have a father who has COPD, A mother Who has Thyroid issues and I myself have Hasimotos. I think florida should remain closed. A pack of 10 n95 mask should be distributed to People and family via mail or the health department and enforced to wear. Beaches should stay open for recreational an UV exposer and law enforcement on the beach for squatters. With Disney not opening till 2021. I think the government should look at this as well..

Renters and home owners should get a Break till the 1st of the year. No rent.

When Florida see no cases, should be when it reopens for everyones health. Stop Travel into Florida unless the family has elderly residents or is for transportation of goods.

Online grocery shopping should be pushed. My ex-brother inlaw had been residing at home and contracted the virus thur the grocery stores.
Public Transportation should stop or take measures to space people out on busses. Uber and Lyft should shut down being there's a 4ft distance between heads.

We need to acknowledge that Animals can get this and this is a all species Virus an it can be transmitted any way.

When Florida opens back up and to get jobs out there we need to remove background checks and credit checks all people should have the right to work. We need to support our people to work an end This right to work state and have a law that companies should and will employe and train workers with no excuse. All business provide entry level job. All companies should hire. To pick up Florida pace and get past a recession. Companies should be able to employe at 30 hours and provide Healthcare or the people have a affordable state program that all Floridians can get Medicare or Medicaid at a affordable price, we can provide it for kids we should provide it for adult to be able to work in good health.

AMERICAN OVERSIGHT

Clay	General	The state should take the three phase approach seriously, waiting only until there is a true decline in cases for 14 days before beginning to open up Phase 1 below-risk non-essential businesses. Considering we had an increase in cases above 1000 just yesterday, we have yet to see a consistently daily decline. So that 14 day period has not even begun in this state. Businesses such as gyms, hair and nail salons, etc. that involve close physical contact and the potential of exchange of bodily fluids should be one of the last to open. The risks are just to high. I am fully aware of the economical collateral damage that this pandemic is causing, and it is heart wrenching. But, if you open businesses up too soon, you risk a full resurgence that could be worse than the first round. Then, the fallout from closing, then opening, then having to close again could be much worse than just waiting. Just as waiting too long to shelter in place in the beginning has some economical costs to our state. My six year old son has severe asthma. Adjusting to school at home with him and our three year old has been difficult and mentally taxing, but I look at my little boy, and I know that I am not willing to risk him getting sick. I spoke with his asthma specialist yesterday, who is a local expert and spokesperson on covid, and he acknowledged that my son is very vulnerable and high risk due to his asthma. It's terrifying as a mother. And while I know that sheltering in place forever is not realistic, I also know that I want as much done as possible to protect my child. And re-opening things when cases are still fluctuating so much every day means the state is not ready to protect my baby and others yet. I genuinely hope that the governor and those in positions of power will turn to the true data on the table to make these decisions, not politics. These are actual, true people's lives on the table. We just started really seeing cases come to Clay County in the last week and a half, especially in assisted living homes. It's just now showing itself in the smaller, more rural counties. It's a sad, sad state of our nation when lives are chess pieces in a political game. So, please, look at the data. Wait until there is a TRUE, consistent 14 day
Manatee	Education	The past few months set a perfect argument for a year round school structure k-12. There are so many kids that will fall behind and through the cracks since the closure not to mention the kids whose only structure and escape from their situation is school. A meal and someone who outs their eyes on them daily to know they are ok and in some cases they are alive. These lost weeks will result in kids who stay on track and those that fall significantly behind. Some will not recover. I think year round school could have saved some of that loss. I also think a better idea would have been return to schools July 1 thru August 15 to finish the year. A break then after labor day start new promoted grades and the new school year. You will see the fall out of closure affecting education for the next few years. Some of these kids will never make up the lost time.
Pinellas	General	As someone that works in a children's Hospital. We need to be smart about opening the state back up. Our numbers are not going down and we still have people that are not obeying the social distancing orders. The state needs to open up little by little. I would ask that we wait until Mid May before we start to open the state.

AMERICAN OVERSIGHT

Manatee	General	I would like to see Florida continue with Desantis executive order as is through April 30th. I might only consider reinstating elective surgeries and only based county to county. I would like the task force and Desantis to look more closely at what is happening in Manatee County. This county had one of the first community transmission cases reported. Thus county currently has one of the highest rates positive test result rates. (I believe 3rd in the state) we also sadly have one of the highest death rates, I believe fourth in the state Our testing capabilities (while improving) still remains around 0.05% of total population for our county. I would very much like to see Desantis visit our county, meet with our public health advisor and hospital staff and speak at a presser here on what he has learne . As Florida makes progress and moves toward each stage of the reopening, I would like reassurance that it will be done on a county by county basis, and not according to only what is happening in Miami-Dade or south Florida as the whole. Will someone PLEASE look into manatee county!?!
Lee	General	Healthy people don't get quarantined, that's tyranny. Give people the choice to stay home! Those immune compromised can stay home! But the rest of us work hard for our healthy immune systems and need to have life move on. We are not afraid of a virus. I'm afraid of this government dictatorship -like situation going on any longer. Please re-open the state immediately. We have freedom of choice, freedom of health, informed consent. It's not a matter of IF-it's WHEN will you re-open? Never should have gone this far. It's our right as Americans.
Martin	Government	Please do not open the state up to soon. I understand the economy took a terrible turn due to all of this but our lives matter more.. opening up prematurely is going to cause far worse damage then keeping us shut down for another month or longer.. I'm a server at a restaurant and as that I would never want to work under the conditions of serving half volume again.. I went from earning 300/500 a shift to earning 60/80 a shift because no one felt safe enough to eat out.. I do not feel it is the right time for me to venture out and I'm healthy.
Pinellas	General	I was laid off from a job in a law office On 4/1 because of the COVID mandates. I still have had no luck getting unemployment So if Pinellas reopens ; I still will not to be able to Find a similar job because of the long term consequences this has had in the legal field, so FIX unemployment. It's ironic that this website works but the state can't process Payouts to people who lost jobs due to this situation.
Lake	Recreation	Reopen. We all need some recreation now.
Duval	General	I believe we should not reopen people are getting sick. Who does the city care more about our lives or money? We should not reopen until we have a huge number of rest to accommodate others to see who's a carrier.

AMERICAN OVERSIGHT

Leon	General	Looking at the graph of new cases I don't see a leveling out. Its up and down 1300 cases just on the 23rd of April. (Reopen suggestion at bottom of email) I have mixed feelings. I need restaurants to open so that my husband can sell his farmed raised oysters. I would like elective testing to open for hospitals. I was in the process of elective testing to find the root cause to breathing issues since December. I would like to find out what is wrong with my health and start healing. But until then, I am high risk. I fear if I get COVID exposed, the ventilator would be a given since I am already on a nebulizer and inhaler which only half helps. Even with health insurance I fear my cost of a COVID hospital stay or God forbid a funeral. I understand the difficulties people are facing. It is a hard decision. Even with a stay at home order now in place, there are still a lot of people out and about. If you relax it how many more people will not obey. I worry about touching common door handles to enter the building and bathrooms. There is not enough supply of gloves and masks or lysol spray. I have yet to find them on the shelves when I pickup my medicines or grocery shop. I fear the person who doesn't know they have COVID but who is he/she? I fear the person who travels from one county to another for work ? Suggestions: Maybe open the counties (35) with less than 100 cases first and see what happens. (continue to remain truthful on reporting of cases.) Maybe some businesses could open by appointment only and no more than 10 people in the establishment. Work more on curbside shopping if possible. or E-commerce Stagger employees where some work only Mondays/Tuesdays,
Martin	Healthcare	Governor--Please re-open salons and barber shops. Not having these is a real problem for older people who cannot take care of their own hair. Not happy looking like a hippie. Mary Lee Cullen
Lee	Retail	My business is based on tourism and retail. I'm a Territory Manager in the gift, decor and souvenir business. I travel the southwest coast of the state. I believe we need to hold off opening and evaluate how Georgia and others are doing with reopening and resurgence. If we do this wrong it will set the state back though our next snowbird season. The keys have the right idea to take the pain now so we can be better off in the future. Once we actually can test all who may need it and do antibody testing we should start to open slowly. Please err on the side of caution for our long term success.

AMERICAN OVERSIGHT

Miami-Dade	Recreation	I am submitting this and please note I am a concerned, healthy, young adult. I received news from my gym that I attend (a small business, group session gym) who are planning to reopen May 8. I understand the economy and individuals are hurting due to the pandemic however I there is a strong likelihood for the pandemic to continue should gyms for be open. With every reopen of a business or place poses a risk. Opening parks people in groups could flock together. Opening marinas and boating groups of people could herd on boats and conflict with social interacting. I lived in Miami-Dade County, FL and makes up majority of the positive corona virus cases. I would not recommend South FL to reopen any time soon until there is a vaccine for covid-19 or if it is medically approved to reopen.
Pasco	General	Keep schools closed and Use a portion of the school tax to home school children and rededicate house holds and then it is taxable income and lower the unemployment benifits use road signs as tool of advertising Make more government positions more of a volunteer position not to become millionaires do a consumable tax instead on income taxes Reduce the restrictions on fishing and allow the more sport fishing to be commercial income fishing Thanks for your consideration
Orange	General	In other communities, I know they have limit the amount of traffic into stores, on the street or supermarkerts by only allowing cars on the road that end with even numbers or odd numbers.
Pinellas	General	Enough is enough, open us up and let us go back to work. If there are people who prefer to stay locked up let them stay locked up If you are vulnerable , stay home locked up. The rest of us have had enough. The longer you keep this up the more complacent people will be about even wanting to go back to work. Those that have money and steady income really dont need to worry, the rest of us do. And what in God's name will we do during hurricane season if we have a threat, where will we go. This is here to stay for the time being and we will need to adapt until and if a cure is ever found. No cure for SARS was ever found. Rest my case
St. Johns	Recreation	Please consider opening State Parks ASAP even if it's just for walking and biking for now.
Volusia	Tourism	Theme parks have the ability to re open if everyone abides by the 6ft distance rule. Disney has plans in Hong Kong for where everyone can stand. In most cases, everyone is so busy on their phones they are 6ft apart anyways. Additionally, Disney has been great about providing hand sanitizer. If we are going to recover and get back on track and salvage what is left it is up to us to save it by following the rules.
Pinellas	General	We need the ability to test and contact trace most Floridians before we can successfully re-open.

AMERICAN OVERSIGHT

Miami-Dade	General	After learning Miami Dade has a 6% asymptomatic patients after a study done I don't feel comfortable opening, at least, Miami Dade. We have stayed home to for a month to make sure we beat the curve. This is not the time to forget that. We will loose more if we open now. And that month we stayed home will be for nothing. I think lives is more important now!!!! We will survived and come back as we always do but let's think about consequences. Let's wait. It won't hurt to listen to the experts. MEDICAL EXPERTS!!!!!
Hillsborough	General	Dear Governor DeSantis, I am a resident of Hillsborough county. I really appreciate your stand for the first amendment regarding churches. I would also like to have Florida reopen! I believe that there are many other aspects to this issue aside from physical health. Many people are unable to go to work; therefore, the mental health of the citizens is declining. We need to be able to get back to work! Those who are concerned for their health and safety have the ability to stay home and self-quarantine. But as for the rest of us, we need to have our freedoms restored to us. Thank you, Governor!
Hillsborough	General	Everything needs to open up. Let us decide if we want to go out. If we don't get sick by going to Walmart then let us do what we do!! Thanks!!
Hillsborough	General	First of all, I appreciate the opportunity to participate in this survey. I want to express my interest that if the state government will make the decision to open businesses and companies so that the economy can start again, it will be slow and little by little. I think that we all continue to comply with the law of social distancing, the use of masks and the use of gloves. Thus we can avoid the contagion by the covid-19. where possible help to remove the language barrier. Thank you.

AMERICAN OVERSIGHT

Volusia	General	This requires a multi-faceted plan to open up business again. These would be my recommendations: 1 - NEW COVID cases need to be lower than 1% of the total Florida Population before re-opening general business. 2 - Those who are still infected at the time of the 1% rate must be traced and forced quarantine based on CDC guidelines. State of Florida pays for unemployment benefits during quarantine. 3 - Businesses need to be opened in a layered approach in 2 week increments. Required Government agencies first, critical business segments, moderately critical businesses second, less critical government services next, low critical business systems last. 4 - All business need to adhere to strict health/safety guidelines identified by the Florida Dept of Health. This could mean, that before treatments/vaccines are available, business must utilize masks/protective wear. Sanitize work environments periodically. Social distance measures if possible. Have hand sanitizers available at all business locales. Customers must also adhere to health/safety regulations to also protect themselves before entering businesses and adhere to safety measures. Those who do not may be fined by the state. 5 - Locations that are not business related or create a government incentive to Floridians remain closed until adequate health treatments are available (ex. The beach). 6 - Companies that cannot adhere to guidelines due to nature of business - because of close proximity to clients, (for example, hair salons), must see clients on a reservation basis only. Utilize disposable gloves (gloves must be changed out for each customer). 7 - All medical facilities (doctor offices, outpatient clinics) must adhere to strict saftely guidelines provided by the Florida Dept of Health - (ex. mandartory PPE to see patients, masks, etc.). Waiting areas must be sanitized periodically during the day. Patients seen on a reservation system only. No crowds of people in waiting rooms. 8 - Any business that cannot adhere to guidelines cannot open until suitable medical treatments become available. 9 - Even after new cases remain under 1% of total population. Florida must continually trace all infected persons and re-verify health status even after recovery based on CDC guidelines. 11 - Any individual who purposely defies health/safety order will be fined and/or subdued to be mandatory tested to verify health status.
Polk	Government	I am a caregiver to my spouse of thirty years. He completed chemotherapy and radiation recently. His immune system is not to where he could fight off Covid 19. My occupation is as a server at a local chain restaurant. I don't know how that we can open May 1st?? How can we be that close to patrons not knowing if they are asymptomatic? The last thing I need to do is bring that virus home to him. The tests that are positive are climbing and we're worried about serving people in that close proximity? We need to think again. We don't need a resurgence of this virus. Let's hit our peak here in Polk county before even considering opening full service restaurants. There is absolutely no way to social distance in such a small space. Think again about reopening certain counties in Florida. In Polk we have 400 cases and rising. May God bless us all. Sincerely, Michelle Shirah
Okaloosa	Tourism	Open tourism again so we can survive. Hell, open the whole state!

AMERICAN OVERSIGHT

Pinellas	Government	Dear Governor DeSantis, Thank you for listening to my viewpoint. We now have the statistics on this virus, and they were originally blown out of proportion times ten. It is a real virus, but the numbers are no different than the flu. In the past, it was the sick who got quarantined. Now it is those of us who are well who are locked down, with the economy crashing around us for absolutely no justifiable reason. This couldn't be more insane, and must be stopped immediately and prevented from ever happening again. It goes against a basic understanding of the immune system and herd immunity. Our immune systems are not developed by injecting vast amounts of vaccines against every possible virus or bacteria. Our bodies are miraculous, and if maintained correctly, will constantly develop a powerful immune system that will fight off most disease. Those who have challenged immune systems will not be able to fight them off. But they are the only ones who should quarantined--not the rest of us who have worked so hard to maintain our health. What we see now is the looming face of pharmaceutical tyranny that has taken our country prisoner, and most of the world, based on this utterly false information about how the immune system works, in order to impose their hidden agenda of pharmaceutical control with mandated drugs. My friends, church members, and I have never seen anything as horribly undemocratic and totalitarian as this in our lifetimes. We depend on you as our elected representative (and I enthusiastically voted for and support you) to reverse this oppressive situation and help us all land on our feet. Fortunately we have a president who will listen to ALL viewpoints, and is motivated by fairness and love. Thank you for your help with our beloved state of Florida. Maggy and Alan Graham, Dunedin, FL
Charlotte	General	It's time get all unemployed people back to work using safe guidelines....masks, distancing, etc. Restaurants open with spaced seating. Non essential business open as soon as possible. We sand to lose more if business remains closed. Our whole Florida economy is failing at a high rate of speed. We can't afford another depression.
Palm Beach	Healthcare	It would be reckless and harmful to Florida's residents to reopen the state. South FL is a dangerous hot spot. While a rural area in another part of the state may seem safe to open, there is no way to prevent people from going from one county to another, potentially spreading the virus and creating an even more dangerous situation than we have now. If we don't get better control of the virus situation, we can't fully open the economy up. People are afraid. Surveys show that most people do not want to risk going out. Do I need a haircut? Absolutely. Would I go to get one? Absolutely not. I didn't even go in early March, before the shut down. I don't want to die because of my hair. You should want to either..

AMERICAN OVERSIGHT

St. Johns	Healthcare	Please address spas and massage therapists who own their own business directly. We were lumped in together with all licensed healthcare practitioners under executive order 20 - 72 and it was very confusing for us to know if we were supposed to shut down or not. Please specifically address massage therapy and re-opening procedures so that we don't have to try to figure out if we are included or not. Also I feel it is way too soon for us to open back up on May 8. We are medium to high risk category and there's absolutely no way we can maintain a 6 foot distance from our client. We are also breathing the same air as our client and they're talking and coughing and sneezing and we can't get out of the tiny room that we are in with them. They also cannot be face down on a table with face in cradle with a mask on and breathe very well which is also a concern because they could be spreading the virus. A lot of my clients are in a high-risk category and that they are vulnerable and over 65. The massage therapists who work independently with their own business or who work in a spa do not have access to PPE and N95 masks. I do not feel safe opening back up on May 8 for massage therapy practice. I feel that it is unsafe for me and my clients. I cannot practice proper social distancing or any of the guidelines with my job. I am hands on.
Palm Beach	Professional Services	Pls reopen, it is crippling our closed business, closed since 3/21, over a month now
Collier	General	We've been told that ultraviolet light is a quick kill of the corona virus, so my suggestion is for businesses which transfer goods to or from a consumer to have a UV light source to pass over the item just prior to its transfer. This would protect both consumer and salesperson. The UV would also work well in hair salons & barber shops to keep hair equipment virus-free. The downside is that UV can be injurious to the eyes, so adequate eye protection such as a shield would also have to be used.
Palm Beach	Recreation	We need to have condo association pools open,. This is how a lot of us get our exercise and as most of snow birds have gone home, considerably less people are here to use it. We can still practice distancing, and of course our residents have the option not to use. I feel this is extremely important for physical and mental health. Please consider!
Hillsborough	General	Please, please do not reopen Tampa yet. It is too soon. We have too many people who will not listen. Please...
Duval	Food	Please consider letting restaurants reopen with 50-60 percent capacity

AMERICAN OVERSIGHT

Orange	General	Re-opening measures should take into consideration those over 60 and those at high risk for complications. Employers need to be encouraged if not legislated to allow those who can work from home to do so to limit numbers at workplace locations and to provide protections to those most vulnerable. Each employer should be advised to develop Virus Protection Policies to ensure workplace safety. Unfortunately government has to step in with advisement and rules as we saw the the difference with how employers treated employees. Some took all precautions and helped their employees and customers feel safer and others did not. Even some areas of the public sector still have not provided safe work spaces and threaten layoffs to those employees who say they don't feel safe. People who need too, will take measures to protect them self's from those who still do not take this seriously. There is stigma developing regarding taking precautions. Open up the state as much as you want as long as protections are in place to protect those who may potentially die based upon current medical outcomes. Smart employers will protect their workforce but not all employers care. Specific guidelines need to be in place. Allowing Masks, social distancing. No large meetings. 10 makes no sense in small areas. Temperature monitoring two times a shift. Sick employees need to stay home or be sent home. Hand sanitizer stations and standard cleaning requirements are just a few. OSHA still requires employers to provide a safe workplace free from harm or death. I think that will be one of the biggest challenges and of course people who will inevitably endanger others. Runners and bikers still don't wear mask and they have up to a 10 meters stream of droplets based upon a Belgian-Dutch study 4/8 using sports technology to measure spray of breath and Dr.Peter Tippet wrote a great article on LinkedIn.

AMERICAN OVERSIGHT

Pasco	General	Thank You for the portal for FL citizens. Now that we have all seen the doomsday predictions that prompted the shutdown of FL did not happen, THANKFULLY. It is time to ReOpen FL. This virus will remain with Florida, the US and the World as all viruses do. Throughout the history of this Nation, Americans have adapted to whatever we needed to. The shutdown of FL for Covid19 to the exclusion of EVERY OTHER issue Floridians deal with needs to end. This shutdown has ended the livelihoods of business owners and employees all across Florida. Floridians have sacrificed to the point that many have been driven to abject poverty. Sick Floridians have not been seen by doctors unless it was Covid related or what was considered an emergency, this in and of itself is highly dangerous for all pre-existing conditions. People who have been very ill are left in hospitals without their families to advocate for them, this is unacceptable and dangerous and cruel Floridians are smart and capable, they are able to adapt to the situation. Businesses are run by Adults who will adapt to what their customer base desires them too, that is how all businesses operate. This shutdown has permanently closed businesses which have no way to recoup their loss financial and emotional. The idea that Floridian families can survive on Unemployment is not realistic, UI was never meant to support a family, nor should it. Let Floridians decide what is best for themselves and their families. The physical, mental, emotional and spiritual toll on Floridians with a continued shutdown is incalculable. Fear can never be a guide. The confidence in Floridians needs to come from this task force, it will come with the immediate reopening of the State. Believe in the fact that Floridians do not need government mandates to make smart decisions for their lives and businesses. It was smart to not lock down the State, but now the partial shutdown needs to end. Let Floridians decide where they want to go and what they want to do. This virus has a 98.8% survival rate, it is NOT a DEATH sentence. Additionally, based on available evidence it appears that many people have had this virus without
Pasco	General	THE SATE OF FL CAN'T GET UNEMPLOYMENT STARTED! iF BENEFITS WERE PAID, THERE WOULD BE A UP SWING IN THE ECONOMY.INSTEAD ALL OF OUR STATE GOV HIDES BEHIND V/M. THE ONLY MONEY I WILL SPEND IN THE STATE WILL BE UTILITIES. I WILL ORDER EVERYTHING ON LINE OUT OF STATE. THE STATE CAN'T TAKE CARE OF ME DURING THIS STRESSFUL TIME.
Charlotte	General	I don't think we should reopen anything right now. Grocery and food store employees don't wear masks and gloves. I am undergoing cancer treatment right now and basically have been at home for 5 months. The beach is my happy place and no one more than I would love to be on it. However, because if the non existent idea of using furloughed employees of each county to check IDs to make sure only County residents are at their appropriate beach, I will not go. We could cordon off areas to develop checkpoints using 2 employees at each checkpoint. Before opening anything else, set up a plan of temperature taking to ensure no one is dealing with sick people. There aren't enough people with common sense anymore. We need a well developed in place plan. Good luck and be safe.

AMERICAN OVERSIGHT

Miami-Dade	Healthcare	We were told that the point of quarantine and a state wide shut down was to “flatten the curve.” That seems to have been accomplished as the hospitals are not overwhelmed and ventilators are not in short supply. At this point, the continuance of a state wide shut down only serves to perpetuate a hysteria among residents. People are now under the impression that they cannot go outside until it is “safe” — this is simply unattainable because “safety” is never 100% guaranteed in any respect. In the meantime, people are suffering financially and mentally. I work in health care as a medical device rep. We need to resume elective surgeries. However, just because the state “reopens” elective surgery for hospitals and health care workers, does not mean people will elect to have such surgery if they do not believe that it is “safe” to go outside and resume their lives. This is why regular people that rely on media outlets to tell them what to do need reassurance that they can resume regular activities (with common sense precautions in place — hand washing, not touching their faces, some level of social distancing, etc.). Restaurants and businesses need to reopen. This can be done with a set of guidelines at first if necessary (e.g. limiting the number of customers at any one time, sanitizing measures taken between customers, social distancing inside buildings, etc.). We cannot continue to let small businesses go bankrupt and close. We cannot afford the unemployment rate to continue to climb, while letting people worry about their future livelihoods (I.e. can they feed their families? Will their homes go into foreclosure?). Worries such as these take a toll on mental health, as does separation from family and friends. I think many people feel as if there is no hope - nothing to look forward to in the future except doom and gloom. We need to encourage people to continue living their lives —this can be done by reopening businesses, restaurants, bars, sporting events, parks, beaches, hair and nail salons, malls, etc. PLEASE REOPEN THIS STATE — it can be done with conditions and precautions to be phased out over time, BUT PLEASE START THE REOPENING NOW!
Lake	General	Reopen our businesses now.
Brevard	General	Please open Florida. This is devastating to the little people that barely survive paycheck to paycheck as it is. The numbers are nearly the same as the yearly flu. Please let us work agsin. If others wish to stay home, so be it.
Hillsborough	Government	We should not be re-ooening until we meet the parameters that have been provided. Until we see the curve flatten it is simply reckless to open back up. Even after we flatten out we should follow the 3 phase approach making sure we provide the accurate information for each gate.
Martin	General	Maintain social distancing and stay in place orders through the month of May. Provide better state support to the unemployed, essential workers and small businesses
Hillsborough	General	Not open yet. The state is not ready, especially the highly populated areas where a stronger come back will be devastating.

AMERICAN OVERSIGHT

Hillsborough	General	We should not open the state until our numbers decline for a couple weeks. The issue is with the testing being done by private companies of which 90% are take up to 2 weeks to add to the states totals. With that in mind opening early could cause catastrophic results. If we wait for the dr I ps to be for 2 weeks we would have all the data to make a more educated decision. We should also have schools devise e-learning plans for the fall since as researchers and doctors think we will have another outbreak then. I know businesses are struggling and my husband has been furloughed but let's take care of this now to protect our future.
Orange	General	Please open everything back up. EVERY model has been completely wrong and has incited fear for absolutely no reason. The lockdowns are going to cause more harm than the actual virus from financial ruin, mental health issues, drug overdose, domestic abuse and child abuse. The purpose of the lockdown was to no overwhelm the hospitals. They are clearly no overwhelmed especially since they are laying off or reducing hours of doctors and nurses. Do the right thing and open Florida back up.
Sarasota	Healthcare	Are you all completely insane? The very idea of opening up the state is both ridiculous and reckless. There isn't one medical professional on your advisory board, so speaking as one myself, let me tell you what I thnk; if you throw open the state now many more people will die! I'm basing this on science, on data we've collected from previous pandemics and from other countries during this one, and we know that second waves are very real and will occur in our country. This isn't about economics, which is all you people seem to understand, this is about human lives, and if you advise DeSantis to allow free movement about the state, you will also have blood on your hands. Tell him that you need medical professionals on your committee, not campaign donors and republican party cronies. You need experts, not the unqualified, so man up and tell him to stop further talk of opening up until he's consulted with the scientists, or you too will go down in history as those who caused thousands to die.
Hillsborough	Education	Please do not reopen until June 1 when summer camps Have had the chance to open and child care can be safely secured and testing can have happened
Palm Beach	Professional Services	We can open the state taking the safety measures of the White house guidelines.Thank you!

AMERICAN OVERSIGHT

Orange	General	Open Florida to Floridians. Hospitals are ghost towns and are beyond ready to take on elective surgeries and daily patients. Government had the correct initial response given all of the unknowns about the virus. It's now time to step aside, free the people before the damage to our local economies get pushed back to the point of no return. Too many people are suffering from the shutdown. The cure has clearly been worst than the virus. Our children need a future. Continue with messages re cleanliness and personal hygiene. Floridians are smart. They know the risks. Put the choice in the hands of the people. Allow businesses to innovate to face the challenge. May 1, open Florida to Floridians. All businesses, no restrictions. People can see the virus is nowhere near as bad as forecasted. Holding the economy back now is purely political and is a result of weak leaders being PC. Don't overthink this virus. The current data does not justify government holding the economy down.
Seminole	Education	If the state opens up too early I fear that there will be a spike in virus cases. Therefore, there could be a need to start the quarantine all over again, potentially for longer. Ending a school year with distance learning hasn't been ideal but we've made the best of the situation as a school district and as parents. To start a school year on quarantine or go back into quarantine during the 1st semester would be highly detrimental to our students' academic achievement and learning gains. Please focus on fixing the unemployment system to take care of those who need to get what they need.
Pinellas	General	Do not open florida yet. We have to many frail people
Brevard	General	I think the initial re-open needs to be staggered. If you re-open restaurant dining rooms, maintain the lowered capacity and required distance between tables. Employers should be encouraged to slowly reintroduce their workforce and maintain teleworking where possible. I think the key will be higher testing. If we can test closer to 10% of the population and see no sharp increase in cases, then each week we can get more lax with the standards until we have a steady 3 months without another spike. If there begins to be a large increase again then action should be swift to revert back. No outside visitors from states such as Georgia.
Brevard	Healthcare	Please resume elective surgeries. Many elective surgeries take place in an outpatient ASC. Surgeries in an ASC are in a sterile environment and do not require hospital bed use or N95 masks. In particular, please resume lens surgeries. These surgeries typically occur in an out patient ASC with a small and professional staff. They require no hospital stay and are relativity quick procedures which make the patient's exposure outside the home short and limited. Yet these surgeries drastically improve quality of life for those patients who are waiting to regain the ability to drive, read, watch TV and enjoy daily life without unnecessary blindness. These now empty ASC's employ thousands of healthcare professionals who are ready to work and continue patient care!

AMERICAN OVERSIGHT

Lee	General	Gov. DeSantis, As a GM of a small business in Lee County that is greatly affected by the mass closures in the Florida economy, I emphatically believe that Florida needs to open up its businesses beginning May 1st. The damage that is and will be done to our state and country by the economic shutdown is and will be far worse that the damage caused by the COVID-19 virus. I certainly support sensible precautions being taken when reopening to ensure public safety, but the economy needs to be reopened. Those that are at high health risks and the elderly should be advised to limit their trips in public. However, the rest of the population should be encouraged to get back to work. Please do this now! Thank you for your leadership. We are praying that God gives you wisdom and strengthens you in this historic time we are all facing together. God Bless, Matt Traycik
St. Johns	Healthcare	Please address spas and massage therapists who own their own business directly. We were lumped in together with all licensed healthcare practitioners under executive order 20 - 72 and it was very confusing for us to know if we were supposed to shut down or not. Please specifically address massage therapy and re-opening procedures so that we don't have to try to figure out if we are included or not. Also I feel it is way too soon for us to open back up on May 8. We are medium to high risk category and there's absolutely no way we can maintain a 6 foot distance from our client. We are also breathing the same air as our client and they're talking and coughing and sneezing and we can't get out of the tiny room that we are in with them. They also cannot be face down on a table with face in cradle with a mask on and breathe very well which is also a concern because they could be spreading the virus. A lot of my clients are in a high-risk category and that they are vulnerable and over 65. The massage therapists who work independently with their own business or who work in a spa do not have access to PPE and N95 masks. I do not feel safe opening back up on May 8 for massage therapy practice. I feel that it is unsafe for me and my clients. I cannot practice proper social distancing or any of the guidelines with my job. I am hands on.
Broward	Healthcare	Florida is not ready to reopen. I am a small business owner and I will not feal comfortable having people coming in and touching my merchandise. The scientists and doctors will determine when I reopen. I refuse to open back up prematurely and take the virus home to my family.

AMERICAN OVERSIGHT

Lee	General	Open Florida back up!!!! We don't understand how walking on the beach, or camping at a state park, or going to Disney World is any more dangerous. Let people decide for themselves and be smart about it! We also like the idea of Disney opening for Floridians only at first. We have to get people comfortable taking vacation in this great state before they start traveling.
Hillsborough	Recreation	I would REALLY appreciate you opening the parks and beaches so that my grandkids have something fun to do if even for a few hours. Not everyone has a home where they can go play in their yard . I can live without amusement parks and movie theaters but come on. You are asking for a whole bunch of psychological problems from parents being home with their children 24 hours a day. Give us a chance to prove that we can all GO OUTSIDE and still social distance while allowing the kids to play. PLEASE. As far as I have seen people have been doing a great job at doing everything you have asked. PLEASE READ and HELP
Collier	Healthcare	To whom it may concern, I firmly believe opening of public beaches and parks along the coast of Florida was a mistake. Furthermore, continued movement towards statewide reopening of businesses and public areas could very likely reverse the plateau that stay at home orders have started. It is too soon to risk a second peak and increase work load on public healthcare workers. To call them heros in this time simply to pile more burden on them with reckless action is insulting. I understand Floridians are in grave financial trouble do to economic closure, but I believe options are available in the form of supporting a universal basic income act and rent/mortgage suspension for the foreseeable future. The money has freely flowed for nontax paying corporations and wall street bailouts. The course should be shifted towards the American working class instead of handouts for company stockholders. Now is not the time to follow guidance from nonscientific, childish leadership. It is a shame to have this sort of behavior at the head of our government, but state and local leaders can rebuke this and step up in these times of need. I urge you to carefully consider the UBI and rent freeze acts. Sincerely, M Sullivan
Broward	General	Stick to the plan introduced by The President and the experts. Everything must open according to the plan. Everyone has to get back to their lives. I think outside areas should begin first, beaches condo pools, golf. Then gyms, restaurants and small businesses. All of them with restrictions such as social distancing, masks etc. Everyone must social distance , wear masks in public, wash hands, sanitize, until we have a vaccine. We must begin as soon as possible. Everyone must be smart and careful when they are out, and if everyone is, I think we will get through this. People can't stay locked up like this anymore. There has to be some easing now. Please. Most people I have talked to feel the same way. Let's get back to work and back to living. Please.

AMERICAN OVERSIGHT

Miami-Dade	General	The opening of more testing spots in South Dade. Also please work on unemployment web site (Connect). I have applied by paper 04/01/20 with no response from anyone. If person do not get the.unemployement why open business up. They will not be able to pay. Thank you,
Lake	Retail	Open up our stores now.
Manatee	General	Testing needs to improve and be offered to everyone. Including those with no symptoms to determine who is carrying covid as well as those who had it but didn't know. Next week is too soon and I am someone who opposed the closure entirely. People are still not responsible and people don't know if they were sick. Some new procedures cleaning social distance capacities can be implemented. Middle or late may seems like a better date.
Sarasota	General	Dont reopen now just cause you want to not fix unemployment. If you open too early and this spreads like crazy were just gonna have to shut down again and again. Were gonna drag this on for a year instead of just getting it over with. The damage is already done lets get through this so we can move on and not have to spend another year dealing with it on and off.
Hillsborough	Government	Florida isn't ready to open. You have people who are still going out not caring about social distancing and other people. Just heard of a hairstylist who is already saying she's taking clients at her house and that she's not taking any caution at all. People like her are the reason we need to stay closed. If you do reopen think about people like me who doesn't have a primary but would have to still work or the company will fire them but I have health issues. Florida needs to stay shut down for a little longer.
Hillsborough	Retail	The risks of not opening soon are greater than the benefits of remaining closed. The main objective of social distancing was to not overburden the healthcare system that goal was met. I am requesting hair salons be allowed to open, cosmotologist shave special training and certifications on sanitation. If guests and stylists wear a mask and use sanitation measures they already are trained to do in between clients the risk is minimal. Commercial landlords are still demanding rents and continued closures will cripple the businesses and the local economy more. PPP hasn't worked for the majority of small businesses. Unemployment isn't working, and if people do get it coupled with the $600 Federal pay it is more than many are making working so therefore they have no desire to return to work. Let people go back to work so we can begin to put our lives together. Even open the effects will go on for a long time. People are fearful and won't return to how it was before. Do not put unrealistic measures on these businesses when they open where they can't get the required supplies in order to open. Keep it simple, let us all open, wearing a mask, minimizing guests in a location. Stop trying to control what no longer needs to be controlled. The health care system is no longer in danger of being over burdened.

AMERICAN OVERSIGHT

Seminole	General	We need to get the economy back up and running now. If we wait much longer there will be little or no economy to reopen. The government can not support the economy, the economy has to support the government. The only way to totally prevent any more cases is to wait until everyone has had it or been vaccinated. That will take 18-24 months. We do not have that much time.
Orange	General	While I support the decision to keep schools closed through the end of the year. It is reaching a point where people need to be left to make their own choices regarding how and when they go back to work. The unemployment system is failing so many who have families to provide for. I truly believe it is possible to reopen the state in stages to those who live here before opening to tourists while maintaining a focus on public health and safety. It's just difficult to see how we can continue under a stay at home order if the financial support system for those in need is undeniably broken. People have to choose between feeding their families and potentially contracting the virus. This is where we are. We can't change that now. Those who can stay home should, those who need to work should if it's possible. In my opinion, a government that is failing to provide basic services to families who are struggling financially because of a lockdown implemented by aforementioned government should not get to decide the fate of its citizens if it can't support them through their decisions. We are all trying to do our part here, many are helping and offering understanding, and that's great. It's just sad to see how truly unprepared we were for this.
Pinellas	Government	Let's reopen and keep things monitored
Manatee	Education	If cases are still increasing, why would we open? People are still not taking precautions. There are still plenty of people on the road. And if we do open too soon, people from out of town will flock here just like they did when this all started. Big vicious cycle.
Volusia	Management	I don't believe there is really a choice. The virus dictates the terms. The goal should be to open at a time where we get as much economic activity before the virus spread makes us pull back again and social distance. Too soon and we squander what we've sacrificed so far. The virus is dangerous enough that the public will not have the will or fortitude to watch outbreaks happen in their warehouse, plant, theme park, etc, see coworkers die, and just carry on. Liability won't allow that either. Again it won't be a "choice". If significant spread happens soon after we open, the people and the concern for liability will decide, not a decision-maker. We've maybe flattened the curve but are still at the top. I think there's no choice but to wait for the cases to go back down to a level where scarcity of the virus will mean no outbreaks for a while and business can happen for a while during a gradual resurgence. Those are the hard truths of our situation. Thank you.

AMERICAN OVERSIGHT

Sarasota	General	I personally think it's too early to open. We have had major testing in the South Eastern portion of the state. I dont feel Southwest Florida has had the same extent of testing nor has a majority of Florida. We need more testing. We shouldn't open movie theaters or restaurants. I am a small business owner that is suffering right now due to lack of the PPP funds, the disaster grant and the unemployment system that isn't working for those of us that are self employed or for most anyone for that matter. However I still feel its too early to open most businesses. Malls should stay closed most retail that isnt essential should remain closed and these types of businesses should move to the online ordering and pick up. Anything not essential should remain closed. I d9nt think children's playgrounds should be open. I say that because in North Port they are opening them Monday with only cleaning them once a week and suggesting you bring your own wipes to clean equipment before and after use. That to me is absurd. They shouldn't be open if you can't staff someone there to maintain the equipment all day. Many people are put of work they would probably jump at the chance to work and be happy to clean the equipment. Besides the fact you can't even buy wipes anywhere to clean the equipment yourself.
Hillsborough	General	I am a 69 year old man, who is obese, and had open heart surgery Oct. 21, 1999 I honestly do not understand why consideration is even being given to reopening our State, which by the way I have lived here my entire life. It seems to me that you are going contrary to the Presidents wishes not to mention the fact that we need to error on the side of being safe. Look I know and understand that businesses are hurting right now and I can understand opening some business. Mr Governor please I can not accept that hair salons and barbershops being essential not to mention Tattoo parlors, and I have six of them. I think the health of all of us is much more essential than the before mentioned business's . I am the associate pastor of a small local church and we are not opening our doors until the entire country is opened!
Palm Beach	General	Please reopen or at least give residents the option to go out if they so choose
Polk	Agriculture	Please Consider opening the Fla economy as soon as possible. We in the Agriculture industry have been working hard all through the shutdown! Look at industries that have been working and see what they have done right. We need to accept some risk, just like We do every day when we leave our Home. If people do not want to accept that risk, let them stay Home. Let the rest of us live our lives responsibly!! Thanks for Your Service

AMERICAN OVERSIGHT

St. Lucie	General	We do not know the long-term effects of Covid-19. However, what we do know is that it can cross over into cells within the Central Nervous System (CNS), and most likely the PNS as well. As with all novel viruses, which are new to humans, the risk of exposure is not worth the potential, long-lasting medical problems which can arise later in life. The current morbity rates do not give us a full picture of the dangers of this novel Coronavirus. Even though many who contract the virus do not become ill enough to be hospitalized, we should not be foolish enough to think it's "just a bug" and pretend it's harmless. Those who contract the virus, and show no symptoms, could later experience neurological problems, or health issues. Please reconsider reopening the State of Florida, or at least make mandatory restrictions on travel and human-to-human contact. Caution now could litterally save people from CNS related, or other medical, problems known to be associated with exposure to viral pathogens.
St. Johns	Professional Services	HAIR SALON OWNER - NE FLORIDA As a hair salon owner and stylist, who has been in touch with many of my 300+ customers in my community in NE FLorida, I can tell you that some are ready to get back in the salon and many are wanting to wait awhile longer. Believe it or not, people seem to know if they feel comfortable in an environment! Please allow citizens to make the best choice for their own health and open the economy for those who feel comfortable in society again! We have had many weeks now to realize that no one has a handle on the virus and that there will be no perfect time to reopen our economy. We should not be forced to destroy our livelihoods to “protect” our neighbors, our neighbors can make their own best decisions on how to protect themselves. We have learned many ways to reduce the spread of viruses and it will effect the way we move forward; but move forward, we must! Our livelihoods and mental health are at stake. Also, many hairstylists are doing friends and neighbors at their homes and that is certainly NOT MORE SAFE than in a salon environment with higher sanitation restrictions! But, these PEOPLE WILL MAKE THEIR OWN DECISIONS, WITH OR WITHOUT GOVERNMENT CONSENT.
Pinellas	Information	Can we not open up pet grooming. That is just as important as pet healthcare.

AMERICAN OVERSIGHT

Okaloosa	Tourism	I see that Florida is wanting to lead the way and be one of the first to re-open. It's disappointing that our state is choosing to do so. I think we should listen to actual medical experts and scientists, none of which are on your panel. These people are not experts on anything but gross profits or listening to shareholders.This is a time to support the people of Florida through social programs and play it safe. Florida's responses to the outbreak have been insulting and a second wave surely won't look good towards your re-election, if you're thinking of seeking one. With the mess that is the unemployment system, it seems obvious that this corporate committee just want to ignore the problem and say " Hey, just get back to work". I've lived and worked in Florida my entire life, I've put up with our terrible low wages and at-will work state. I know it panders to your base to reject social welfare but it's a backwards ideology. Imagine how much different this all would have turned out if decent social programs were in place, not the ones we have that are designed against the public. This isn't the time for "starve the beast" politics. We need to catch up to the rest of the first world and reign back on this crony capitalism and corporate embezzlement of public funds. We have socialism for the corporations, but capitalism for the people.
Clay	General	I am a resident of Florida for over 65 years, I was born and raised in Jacksonville Florida. My parents were born and raised here and grandparents built their home and family in Jacksonville in 1900. I also have underlying conditions heart (pacemaker/defibulator, lungs, as well as kidneys so I feel my voice should count. Keep Florida closed.If not it will hurt worse in the long run. For awhile longer. Thank you.
Hernando	General	How about reopening our state. According to a ruling by the United States Supreme Court, after the civil war, see attachment, Government does not have the authority to shut the state down. Neither does the President, state Governor, county commissioners, mayors etc.Therefore Governors Desantis executive order to close our state is unlawful and unconstitutional . He has not the authority, under the U.S constitution, to commit this act.Our constitutional rights have been removed. I voted for the governor and Trump last election, but after this action I will not be voting for either him or Trump.What has taken place is unconstitutional and against a direct decision handed down by the Supreme Court of the United States and that decision still stands today.Your actions are unlawful. .People to work and have their lives back. Shop, eat out at restaurants, enjoy outdoor activities, worship in their churches etc.
Pinellas	General	Please open everything back up. I'm fine with restrictions, but at least open everything again. My husband's livelihood depends on it. Our economy and his business can't take more closures. If people don't want to go out yet, then they can stay home. Don't punish the rest of us for it. Also, please open schools back up in August. I'm a school-based speech therapist and I need to see my students again face-to-face. Students and parents don't need more distance learning, we need to go back to school.

AMERICAN OVERSIGHT

Palm Beach	Retail	Reopen Florida!! We need to go back to work with the right precautions many things can be done. I understand health comes above everything that's why we have to keep practicing social distancing with the right protocols that way no one is in danger of possibly contracting Covid-19. We cannot afford to let the economy go down more than it already is. We have one of the best in the country and i know with the great leadership of DeSantis we will get through this together, protecting both our health and the economy. I still do believe gyms are not a safe environment since it's constantly filled with germs and people using gym products one after the other. Retail stores, parks and beaches are among those that with the right precautions, social distancing can be done to keep us all safe and it could be one of the first to take the lead in reopening our amazing state FL.
Collier	General	Hello, I believe it is too early to reopen the state. There are still too many widespread cases of the virus. I personally believe based on the statistics being provided that if we reopen now we will just be faced with a second wave of the virus. We should keep the state on lockdown for another month just to be safe. Wouldn't you rather keep it closed for another month now then have another wave of the virus come through during the summer (high tourist time) or even the fall (when snowbirds start coming back)?
Lee	General	This can't go on forever. People are going to lose their homes and businesses. These people have no way to feed their families. People need to live and do it responsibly. If they are sick, stay home. Any type of sneeze, cough, GI, etc., stay home. It's common sense. Yes people will die, but there will be a higher suicide rate and crime if this continues much longer. I know my mental state along with my daughter that is a senior in high school has definitely declined. How can it not when their is no hope of ever being allowed out to just even walk on a beach. I have a paid parking pass and can't even use it to walk. Thanks!
Hillsborough	Education	Please do not open back up for summer programs until adequate testing is available. Until adequate supply of ppe for all workers is available. Also need available and consistent supply of cleaning disinfecting and sanitizing supplies. We still cannot get toilet paper, paper goods and hand sanitizer. Not sure how we can reopen anything without the basics. Thanks.
Pinellas	Management	We need to open up the economy this virus was in our area in January and February - as most of my family had an unidentifiable virus at that time. The quarantine has done nothing but destroy our economy as the science and data is backing up.

AMERICAN OVERSIGHT

Sarasota	General	Dear FL reopening task force, Please end the lockdown & let us return to our livelihoods. As a self employed personal trainer & life coach, I've seen my clientele drop to almost zero due to the media fueled panic & hysteria. We have met all the White House criteria for opening phase 1 & it would be negligent to keep our economy closed down. I know you're receiving lots of resistance to open but many of those people are no longer part of the workforce & don't have an accurate perception of how this situation is affecting the whole economy. The vulnerable populations have the strategies to keep themselves healthy & safe at home without sacrificing our long term physical, mental, & economic health. Even when we are open, those who feel safer at home will be free to do so for as long as they would like. Additionally, this is hitting us during season which is our most prosperous time...for every day we stay closed, it will take longer to return to normalcy & more lives will be lost due to economic ruin & long term psychologic & mental health issues.
Miami-Dade	Healthcare	Why is there no health care professional on the task force. This is very important to the reopening of any state
Volusia	Tourism	Dear Task Force Members, Thank you for taking comments from the public. I am a life-long Floridian, and I understand that people here are suffering economically and therefore eager to get going again and be back to "normal". Unfortunately, the virus is not on our timeline. We do not yet even have the means to know the full extent of the virus spread, through testing. I do not feel safe personally and I do not feel it is close to the time to start relaxing the stay-at-home requirements that have kept so many more of us from becoming sick or killed so far. My husband works an "essential" job, and he is already risking his health every day without complaint. By relaxing regulations before it is time, he will be exposed to many more potentially sick people, and it will be much more difficult for him to stay protected. I work at a family entertainment venue that is closed and would rather sacrifice my personal livelihood right now than risk spreading a disease to our families. Our businesses will recover but not if we are risking the health and lives of those who patronize them. If the task force suggests that we can open before health experts say it is safe, even with stringent safety measures in place (which businesses and guests may or may not be able to uphold at this time), it risks allowing further spread of the disease, risks the safety of guests and employees, and risks liability to the businesses that are forced to keep up. You have the opportunity to make choices that will help keep people safe in the long run, even if it is not what some are wishing for in the short term. I urge you to hear the medical experts who are telling us, for our own sakes, that it is not safe yet. Thank you again for your work and your time.
Lake	Food	Please reopen our suffering restaurants

AMERICAN OVERSIGHT

St. Lucie	General	In my opinion counties with less than 500 cases should be reopened 5/1, especially the small businesses with less than 10 employees with practicing social distance and face mask. Small Business stand alone Pet Grooming shops definitely need to be reopened as many pets require monthly grooming. Bars/Restaurants and indoor theatres need to be opened following guidance. Large entertainment centers, Like Disney and Universal studios should not be opened until June or July, with restricting international attendees. Airports should continue shutdown of international travel and all national travels need to be screened for the virus, and if possible including quick virus test.
Duval	Healthcare	As the spouse of a local doctor, and state employee, I am incredibly disappointed in the lack of available COVID testing for our medical professionals. All state hospitals should be conducting weekly testing of their employees. I know this is happening in Gainesville but the public hospital in Jacksonville (with a larger and more urban population) does not have adequate testing supplies. Why is that? How can we begin to re-open the economy if we don't have adequate testing, or accurate information about the number of COVID cases?
Brevard	General	Brevard is barely testing. Our island and surrounding areas probably have much higher numbers. I'd like the option of testing sites to see if you've been exposed or more help for Brevard residents. A lot of people are out and not social distancing, I feel we are being ignored, it isn't fair.
Broward	Education	I think the public school districts should email parents now and do a temperature check of which parents would be willing to stay home and do online learning like now through the school in the fall. So that would mean there would be designated teachers in the school that would have strictly online classrooms. Depending the number of parents that answer they can have an idea of how many children per grade level would be interested so they can form classrooms.This is gives you a percentage of kids who would be at home to reduce the number of the ones in school. The teachers that would be doing online can then plan accordingly and packets with the workbooks or textbooks can be prepared for this situation instead of a last minute situation. We do know the schools will have to work at reduce capacity and this would help. But plan so that it is at home homeschooling with the teachers and not crisis learning which is what we are doing.

AMERICAN OVERSIGHT

Orange	General	I can understand that people are afraid of the covid 19. It is a very stressful time in our history. And I can also understand why people would be reluctant to businesses opening up to soon. But we can not live in fear for the rest of our lives. We can't be dependent upon the government to support us forever. We need to be able to support ourselves, and the only way that can happen is to get back to work. I do believe that companies need to comply with safety as the number one priority. But I also believe that it is our responsibility to do our part along with the business to make reopening a successful process. I believe that with God's grace we will be able to open. We all need to pray for that grace and start to live again. So I think that we have to go with opening up our businesses. You can't force people to do what is right. You can only pray that others will help them to understand their need to be as safe as possible.
St. Lucie	Retail	As someone who works in retail, i think it would be best if the state or county that has 100 or more positive cases, that the customers must wear face coverings before walking into any retail establishment. Especially in food superstores! This way here it would help the slow the spread of the virus significantly. i know some counties down south of me are required, which is great but i would love to see it all around the state, particularly on my county and martin county.
Pinellas	General	Dear Task Force, I don't think we are ready to open just yet. I think we need to be very cautious about re-opening, lest we have another spike in infections. We need to have doctors, epidemiologists and scientists guiding all of our actions on this matter. We must put saving people's lives at the forefront of any efforts we make as a state. When we are ready to re-open, I think it likely needs to happen extremely gradually and slowly so that we can keep people safe and keep track of infection data, etc. We also need to keep testing going and we need randomized population testing that will help to track data related to antibodies, etc. I believe we need to help all those who have been affected by the shut-downs by getting them their re-employment benefits, Medicaid, food stamps or other benefits. We also need to make sure small businesses get the help they need to stay afloat. The more help these individuals have from the state, the more likely they are to be able to respect social distancing and keep themselves and their communities safe from infection. It is an outrage and an embarrassment that only a small fraction of the unemployed in our state have gotten the help they need! Please do NOT just re-open suddenly and please do NOT just do what big business wants you to do. Remember that the State should be working for the People. Kind regards, Bryan Casanas-Scarsella

AMERICAN OVERSIGHT

Lee	General	Open Florida back up. Get our economy moving
Broward	General	I believe a wholesale opening of business is not in our state's best interest. How can we accept gun shops as essential and now to consider gyms as well? It is just plain unacceptable and dangerous. Outdoor activities that can stress keeping space between yourself and others (golf courses, parks, boating facilities} would be not worrisome. We have come so far in keeping safe let's not damage those efforts by stopping short. I strongly feel that testing for the virus has been lacking. Our governor has been swayed by Washington and he has no backbone.
Hillsborough	General	I am a HCPS student nutrition worker, and have been employed throughout this shut down.Although I have multiple health issues I continue to work because I am needed. I hope you will keep the shut down throughout May and longer if necessary. We have to keep this from spreading, I haven't seen my father who is 80 for a month, I typically go visit every weekend. I haven't gone to keep him safe, we all have to sacrifice to get through this. Although I am still working my family have been financially impacted, my oldest son who is a full time college student at Polytechnic University lost his job due to closure and is still waiting to get unemployment. My 19 year old works full time at a restaurant and had his hours cut back significantly. As much as we want our lives to get back to normal, we cannot risk our citizens health, and lives. Please be keep us safe!
Sarasota	Healthcare	It is not safe for dental hygienists to go back to work at this time. We are # 1 profession at risk. The risk is too high and not enough PPE to protect ourselves. Taking temperatures is great idea, but what about those that are asymptomatic? It doesn't make sense that the general public is recommended to wear masks and social distance 6 feet apart, but the state of Florida would open dental offices with such close contact to someone's mouth electively. Please take this into consideration.
Hillsborough	Healthcare	Working in healthcare, people do not realize that while many are being praised for their hard work, etc. there have been significant casualties job wise for healthcare workers due to the missed revenue of non emergent procedures. We simply have to re-open that sector ASAP or we risk a catastrophic collapse in healthcare.
Hillsborough	General	People are scared. Go slow but steady. People who live on or near beaches should be allowed to be there. Maybe barbers and hairdressers by appt only. No walk in. We are floridans. Sun and water is necessary for our well being. I believe many of us will still practice some form of social distance and wear mask in crowds. Bars should be very last on list for opening. We were told 15 days. Lets back out every 15 days. Put off the requirement for real id for a year because people can't get necessary paperwork or make it all work online. We've learned a lot about online shopping, working online, expand that and work on fees. I personally like the cleaner air, quiet skies and learning about gardening. I hate I can't hug my friends. Lastly make the blood test to see if we have been exposed available everywhere. I,m thinking I had it in Feb. Lost of taste and smell. Freaked me out. Thanks for asking.

AMERICAN OVERSIGHT

Hillsborough	General	I am a server. I believe it is too soon to open restaurants. I honestly don't feel comfortable with going back to work especially since serving we come into contact with so many people within a couple of hours. I am afraid that we will reopen and I will have to chose between my safety and my job. Also if we do open restaurants then we won't be able to seat at full capacity which won't allow me to make enough money to support myself since tips will be impacted and the amount of shifts I will be able to work will be cut in half since all employees need a fair opportunity to make money too. I will lose a chance at unemployment basically for no reason.
Pinellas	General	I filed in March 27 for unemployment as a 1099 self employed worker. Then got a letter 3 weeks later saying they needed my birth certificate of all things!! No instructions how to get it to them... So I had to investigate on my own and found and sent the email. Sent that and a week later, I'm marked ineligible and all the wages I put in are now zeroed out and says I didn't have FL wages. I'm self employed, I'm not ineligible and I did have wages of 76k, so I will make LESS on UNEMPLOYMENT. I worked on adding the info again on Thursday literally from 11a-5p when their servers went down. Then they said they're closed for processing a few hours later. NO, THE SERVERS WENT DOWN and I wasted another day. Such nonsense...I honestly believe system is a mess, but they are trying ON PURPOSE to limit the number of applications coming in by closing at 8p every day. Please, I've received not 1 penny in 6 weeks...I'd like to grocery shop again. This will be a long term thing for me and my husband are he has lymphoma and I'm diabetic, as well as working in the newspaper and hotel sales sector. Doubtful it'll be coming back soon. I don't want to live on unemployment, but I do need it right now too survive!!!
Broward	Recreation	Parks should be considered with social distance (no social gathering of any kind at this time) Golf course opening along CDC gudlines
Miami-Dade	Recreation	Florida should remain closed until scientists, doctors, and health department says it is safe to do so. Counties where numbers of cases are higher, should stay closed longer than other counties.
Lee	General	I think for the safety of all residents the state should extend the stay at home order and closure of non essential businesses. No one needs to get their hair done or nails or get a tattoo. Those are all wants and not needs. Restaurants should remain take out only. Florida has a very large elderly population as well as those that are immune compromised we need to protect them by extending the stay at home order.

AMERICAN OVERSIGHT

Manatee	General	My husband sent in his thoughts earlier today and I wanted to second his comments for OPENING THE STATE but for different reasons. Both he and I are lifelong Floridians having grown up in Tampa and Sarasota respectively. Our 3 children all atteded K-12 schools and our daughters graduated from UF and UCF respectively. So the input received on this "opinion portal" will be comprised of 2 camps...LIFELONG FLORIDIANS and NEWCOMERS. The first have lived through many hurricane seasons while the latter have not and through many bad flu seasons many of us believe "comes down" in the late Fall. This is not the lifelong Floridians "first rodeo" in dealing with danger. From those storms to West Nile Virus threat during the FL summer rainy season (wear longsleeve shirts, etc.) to the annual onset of the Flu season in late November to March (get YOUR flu shot!) we have properly prepared as adults. We have carefully and wisely dealt with this virus and are well to this day. Take the POLITICS out of the solution and open the FL economy so that we lifelong Floridians can once again enjoy why we've lived here for so long. Those who are "newbies" often come from states that don't see or appreciate the dynamics of lifelong Floridians.and how we settled this state long before their arrivals and long before air conditioning or mosquito repellent! Thank you for reading this and for caring for us proud "Florida Crackers". Nancy DeVirgilis
Polk	General	We need to reopen Florida (and America). Our rights are being infringed upon. We need to treat this like flu season and take the same precautions. States and countries who didn't shut down are not worse than those of us who did. Open Florida!
Broward	General	Places which can control social distancing , should open first. Dentists, eye drs., nail/hair salons, a few beaches, small gyms, govt. buildings, small restaurants, hardware/auto stores, dealerships.
Collier	General	After being completely mislead by the WHO, CDC and others, I and many of my "in the know" friends who are not programmed like sheep by mainstream media have concluded that with the new information from Stanford and others, the entire country should have never implemented this lockdown to begin with, the cure is going to be worse than the virus with things like child abuse, suicides and domestic violence considered. I would like to see our state open up completely, without delay. I would also like to say, thank you for your governance being based on what you were told and not implementing draconian laws to punish people who did not agree with the status quo like other state representatives have done such as Michigan, we have a constitution that was sworn to and it can never be trampled upon as we are seeing in such said states, Thank You, god bless you and our nation.
Lake	Tourism	Please reopen. Our state needs its tourism.
Seminole	General	I think we need to reopen with crowd size limitations. If you want to stay home then stay home.

AMERICAN OVERSIGHT

Escambia	General	I completely understand the need for people to return to work. ,but there is no economic value that be placed on lives. Being a RN for 23 years has taught me that it is true that "an ounce of prevention is worth a pound of cure". This COVID-19 IS REAL! There is no reason to place lives in danger for the sake of the economy. Our economy will recover as it always has but as a daughter, mother, sister, and wife; I can't imagine being able to prevent illness and death, but choose not to for a dollar. Thanks for listening!
Lee	Professional Services	The Beaty industry has many hours and experience I'm santization on a regular basis and now even more than ever as we will be incorporating and continued long term as to always remain prepared. Thank you allowing you he heard as we all need to get back to work before we can't thank you
Escambia	Tourism	Please open up our beaches only for Florida residents for now.
Pinellas	Recreation	Please do not re-open the State of FL - Order to Stay at Home until we have flattened the curve. It is clear that we are experiencing a spike in deaths and new Covid cases two weeks after Holy Week when your exemption to attend religious services backfired. Pinellas,Pasco, Manatee and Sarasota counties are at the highest level of infection. Please extend your State Order of Emergency to Stay at Home well past April 30th. Give FL citizens another 2 weeks to flatten the curve before re opening the State back to normal. The New Normal requires you and our elected public officials to save Patients, not profits. Respectfully, Maryanne Sobocinski
Pinellas	General	Dear governor of Florida. I have been a Florida resident since 1998. I raised my kids in St Petersburg and I am 58 years old now. I think you need to open Florida back up. everybody knows what they need to do to stay safe and if people are that ignorant then it's on them. I don't feel that government of our state should act as our parent. Keep all the social distancing in all that in place but let everything open back up and it'll all get sorted out. where I live people have been going about business in stores and neighborhoods and recreation like there has not been a plague pandemic anyway. there's big parties in my neighborhood there's lots of people in the little local grocery store gas stations etc. We need our tourism to come back 90% of the people in my neighborhood that actually do have jobs and that aren't hooked on heroin all work in the service industries as hourly minimum wage people and they need to get back to work. they're scared for their kids they're scared because the slum landlord will evict them as soon as possible and all sorts of stuff. So please open the state up and let people get back to work.
Charlotte	Healthcare	Just wear a mask. This virus is not going anywhere soon and we can't stay away from each other forever. Mask mask mask please 😀

AMERICAN OVERSIGHT

Sarasota	General	Please consider not opening up restaurants to public seating due to the following reasons there is no way possible for people sitting at the same table to follow social distancing when sitting next to each other or across from each other. Yes restaurants can not fill their occupancy and have less tables in their establishments to have increased space between the tables ...BUT that doesn't increase the space between the people at one table. I agree to continue having curbside pick up and delivery services for all business that can do so. Also now they are saying that this virus can transmit through A/C vents if this is actually true then all businesses would be affected making it unsafe for all citizens to open the economy. I believe that all types of businesses that are able to conduct their business from home on online platforms to continue to do that. I understand that the economy needs to open...BUT I feel it shouldn't happen until we have a PROVEN vaccination, know exactly what we are dealing with (meaning know everything about this COVID-19 virus), and have set Protocols Globally to follow and N95 mask available to all residents even if it was only one N95 resident...as those types of masks are the only mask that truly prevent transmission through them. Handmade mask do not prevent. If you open the economy up prematurely A LOT MORE LIVES WILL BE LOST. Is Human Life Not Valued? WE ARE ALL HUMANS ....AND WE CITIZENS SHOULD ALL BE VALUED. I appreciate all efforts that truly protect us citizens. Get the facts ...Not theories. This virus is an unknown virus...so until they figure out this complex virus completely and confidently...Only then will we all feel safe and Be safe. Thank you for allowing us all to express our thoughts and suggestions. I hope you will take time out of your busy schedule to read and reply to my message. Stay Safe And Be Well, Mrs. Santoro
Orange	General	Please open the state slowly and with consideration. We do not need to open the state back up for the "economy" just for half of Florida to catch the virus and die. Theme parks should not open unless everyone MUST wear a mask. Bars and night clubs should never open until there's a vaccine. Time to put citizens of this state over money. My taxes fund the state. Also many work places are working around the "essential" status and making their employees work and not protecting them. These companies should be fined. My husbands job can easily be done from home but his company says no becahse they don't allow people to work from home. Bought masks for employees and then resold them because "the governor will reopen the whole stage on May 1.
St. Johns	Construction	we need to open all businesses in phases and safely. This can only be achieved by cooperation between the medical professionals and business community. Above all, unless and until every Floridians is tested, we are shooting in the dark! Thanks. Mitch

AMERICAN OVERSIGHT

Lake	Healthcare	I do not believe that we should widely open businesses until there is reliable testing available for Covid-19. The safety of Floridians cannot be trusted without it. Opening too early will result in more spikes and more deaths. This virus doesn't care about politics, your beliefs, or any other biased we may have. It will spread to anyone who comes in contact with it. Please take this seriously. Florida is already in the top 10 of states with Covid cases. We don't want to move up on that list.
Hillsborough	General	I am genuinely concerned about restrictions of my Rights guaranteed in the Bill of Rights and my Religious Freedoms. I totally understand the need for safety and precautions during the virus. However as more Scientific facts are found we are seeing that the survival rate is much higher and with some common sense and simple protection people can lower their risk. We NEED to adjust restrictions on meetings especially those in churches. We cannot take away guaranteed rights or restrict Religious Freedoms! Churches must be listed essential business and be given suggested guidelines, not mandates or orders. Let the people make their own personal freedom choices and let them decide if they are comfortable going out and exercise their Constitutional Freedoms. Churches and Pastors want their members to be safe and healthy and the majority will put protocols in place for safety like mask, hand sanitizer and social distancing guidelines. People at higher risk will choose to stay home and would be encouraged to do so. My fear is that may local, state, and National officials have been too quick to forget our Bill of Rights and the Constitution. Decisions and policies must be made for everyone safety However we cannot restrict people's rights. I think it is time to start getting people back to work and let them make their own personal choices to live their life and practice their Religion freely if they so choose. I thank you for representing our county, especially in this difficult time. I am sure it has not been easy. I hope we can see the Safer at home order amended or lifted soon. Thank you for your time reading this and your service. Pastor Roger Bunner
Manatee	Professional Services	I vote NO. It would be irresponsible to reopen the State until Covid testing and antibody testing has been done for a majority of the residents.
Volusia	Healthcare	It is time that Florida begins opening back up in a safe manner. We need to begin phase 1 in many counties immediately. The zip code I live in has less than 5 cases, but about 100 small businesses, many of them restaurants. If you don't allow them to open with social distancing requirements many of them won't survive. We will end up having more businesses close for good than those who have died from this. It's time to realize you might have overstepped. Get started now!
Lee	General	I agree we need to get back open but I also think it's needs to be done with high restrictions. Self distancing as well as for anyone to be able to be tested whenever they want to. There are still many people testing positive with no symptoms and for myself I am still very worried of a rebound and would like to wait a few more weeks to see how Georgia does. I will not go out except for food and employment.

AMERICAN OVERSIGHT

Orange	General	This state does not need to re open yet. Unless the state can provide masks for every individual and actually enforce these social distancing measures, we are in no way ready to reopen. There are still too many people who do not take this seriously enough, including this country's president. The curve has not happened yet and the second wave of this virus will be far worse. Please think about the people. Fix unemployment for those of us who need it and keep the state closed. Last thing we need here is to reopen and have tourists come and make everything even worse again.
Duval	Government	Dear Governor Desantis, The widespread fraud you have perpetuated on the Floridian people is now evident. Thankfully we did not listen to you, instead socially distancing ourselves out of safety. The economy cannot be opened back up until we have 35 million tests per day available in the USA. You are a scumbag for not releasing the data on Nursing home Covid-19 cases. We cannot think about reopening the economy until treatment is done. You should create a temproary medical task force to increase # of nurses.
Broward	General	The Broadwalk and beaches here have been closed now for a month. Police presence has allocated to the pedestrian bedside wall clearing off bikers, runners and walkers and moving them to Surf rd. The Broadwalk is as wide as 2 lanes, without traffic- while surf road is made for cars and is one single lane. Please consider opening the Broadwalk back up for exercise use only. I understand the importance of keeping social distance, this gives those who exercise much more distance between each other than the alternative. On one side note, please also allowing scuba diving as a form of exercise. Not only is it amazing for mental health, it keeps the reefs clear of invasive lion fish that ruin our ecosystem. This is a great social distancing activity, as divers have masks to cover their noses and regulators that cover mouth. We just need minimal access the beach to get into the water. There is no loitering in groups. Thank you for your consideration on these two items.
Lee	Retail	Reopening our state too soon could lead to devastating results in terms of people contracting and succumbing to COVID-19. We should wait a few more weeks. Memorial day seems like a good target date. It gives us more time to evaluate and reevaluate people who contract COVID-19, people who recover, and, sadly deaths per county as it relates to our state.
Osceola	Healthcare	Please follow DR. Facci's recommendations. We do not want unnecessary deaths in our state. Thank you.

AMERICAN OVERSIGHT

Lee	General	The decision to reopen the economy and/or rescind the Stay-at-Home order should be based on science and data and not the illogical whims of national/local political and business leaders. The Stay-at-Home order is not restrictive enough as some activities are certainly not essential for the well being and care of individuals. The plethora of cars diving down McGregor Blvd. on an early Saturday morning is indicative of some laissez faire policies on what constitutes essential activity. Fully advise the Governor and elected representatives to fix the unemployment process immediately. It is unconscionable that individuals have to suffer due to the broken down unemployment system. Fixing this and allowing for immediate aid to individuals who have been impacted will aid in the improvement of the economy.
Lake	General	Reopen May 1st.
Hillsborough	General	We need to reopen the state and the country immediately. There is no doubt in my mind the data is skewed and completely inaccurate. Millions of people have lost their jobs and/or income because of layoffs and furloughs. It's a terrible thing and the idea that this is about public safety is absurd. Allegedly, there are over 990,000 confirmed COVID-19 cases in the country and there are over 330 million people in the United States. Based on those numbers, I have a 0.0027% chance of contracting the virus. Even if I get the virus, 52,782 people have died out of the 919,066 who have got the virus. That's a 0.057 % chance that if I get the virus that I will not survive and the government flexed it's muscle and forced businesses to shut down over night! It's alarming and frankly sickening that our government could do such a thing so easily! Ronald Reagan once said, "Government is not the solution to our problem, Government is the Problem!" So, in conclusion, get our of the way and open up the state for business immediately! Stop fear "mongering" and let the people go back to their way of life. Let the free market get back to work and fix all the problems that you as the government have created! After all, we will remember this at election time!
Lake	General	We want to get back to work because we are struggling daily with out jobs losing our only income to provide food and pay our bills because the will keep coming every month. Im sure we will follow the guidelines hand washing, using mask, etc. We need to get back to work for our families. Thanks!!
Collier	Real Estate	It's time for people to get back to work! Boost our immune systems and our economy. It's been my dream to move here for as as long as I can remember and my husband and I are ready to get involved, contribute to the community, get our kids in school (next year)! Trashing the entire economy over this is counterproductive as we are creating new and more devastating problems in the process.
Pasco	Healthcare	please open the state up ASAP! It's not right that we can go to Walmart and Publix's but can't go to church. Small businesses are dying on the vine. This is taking our freedom away. We are under "house arrest". We should have the right to choose to stay home or not!

AMERICAN OVERSIGHT

Seminole	Tourism	Please find a way to open the Theme Parks to Florida residents! Here's my thought. When Disney previews a new land or attraction to Passholders, you have to sign up via a special link. You then have to pick a specific date and timeframe. This could help limit attendance. I'll happily wear a mask. Disney is not only a theme park but a way of life. It's an escape and happiness.
Orange	General	Please do not open the state! My husband travels for a living and we are as anxious as anyone to get business up and running. That being said, I am not confident the proper procedures are in place to prepare for a second wave of outbreak. Prepare prepare prepare. Do not leave it to businesses to weed themselves out. Do not allow anxious people to crowd and spread this virus and take the lives of so many more. Do the right thing, please.
Alachua	General	I am in favor of opening with extra precautions for protecting the high risk. I think given the antibody studies, it is evident the death rates are extremely low, and staying closed will see other death rates rise from suicide, physical abuse, drug abuse, and others. We need to move forward using smart methods such as temperature tests and other precautions. We either open or we wait for the vaccine, which is too long, we are already starting to see unrest in parts of the country, we need to start back towards normal. Thanks Rob
Miami-Dade	General	Testing to all Florida residents And open the state with continue social distancing
Monroe	Recreation	Don't open the Keys until we can test all people. Opening too early will have a long term effect on tourism in the Keys if this turns out to be a hotspot area. There is not a strong enough medical infrastructure to handle an outbreak.
Orange	General	Please reopen the state. I have lost my job and with everything being closed, there are no companies hiring. Unemployment is taking way too long to process and I have not received anything. I have 3 kids to support. We cannot sustain this any longer. Its having a mental affect on all of us. All of the public officials are fine with keeping everything closed because they have jobs, income and help with childcare and everything else. We dont have those privileges. We want to go back to work now! We had no say in closing everything and being in lockdown and it will show during the next elections. You have ruined the economy and the tourism industry in our state and the longer everything is closed the more angry everyone is getting.
Brevard	Retail	Hello. In my humble opinion, we should be allowed to go to stores and restaurants after the April 30th deadline. I truly believe most people will abide by the social distancing rules put in place, and those that are still wary can choose to stay home if they wish. If I can walk around Home Depot, Lowe's, walmart etc, what is the difference if I walk around Kohls or Bealls, for example. The longer this goes on, the worse it will be for people's mental health as well as the economic impact. Let us have our freedom. We have earned it. Also, we really need restaurants to open. Even with the social distancing rules in place, we can still enjoy a meal out. Please consider opening soon. All of Floridas citizens well being depends on it. Thank you for this opportunity to vent.

AMERICAN OVERSIGHT

Pasco	General	Don’t open up too early! Wait until it’s safe to do so. That means listening to the scientists and the Doctors and specialists... not President Trump. Dr. Fauci and other experts have spent their lives dedicated to understanding pandemics... they are the ones that need to be listened to. And please fix the unemployment benefits website ASAP... my daughter was laid off weeks ago and hasn’t received anything! How is she supposed to pay rent or bills and get food? She’s social distancing... so are we... we’re doing our part..wearing masks if we have to go out.... but mostly isolating.... now the State has to do it’s part! Help those in financial need by making sure those without work can apply and receive money to get through this crisis.
Lake	General	Open up Florida period. Put people back to work. Open up all businesses. FL economy is being severely harmed. Quinnipiac polls do not represent my thinking. Dr Fauci and Dr Birx have been a disservice to President Trump. Go by what Florida numbers show. I mean death numbers not cases. People are responsible, there is no need to further destroy Florida.
Marion	Management	I think it’s a bit early to open. As a retail store manager I feel consumer confidence won’t be ready to go out shopping until mid to end of May.
Pasco	General	It is too soon! I am a psychotherapist in Pasco county and working with my clients through Skype. I know that the numbers have been low but this is only because of the stay at home orders. I know as soon as they are lifted people will go back to usual, but social distancing because they didn't see high numbers. They we will repeat a tragic event like the Spanish flu. We were laughed at on briefing and news reports because we dis the least in the beginning. The economy will bounce back, people need to start applying at essential businesses and we need to keep our people alive. Don't jump the gun and kills many!
Brevard	General	I believe we should re-open. Every individual is ultimately responsible for themselves. If your health is compromised those individuals should take precautions. The collateral damage and the cost to our economy is far more riskier than this virus.
Orange	Healthcare	According to the Florida Health Department website, as of April 25 at 10:30 A.M.,98.4% of Florida's total population of 21.48 million people HAS NOT BEEN TESTED. That means that there are 21,145,901 potential cases in the state of Florida. Until tests are available to test any and all Florida residents, the state should remain closed. There is no evidence that our governor has a significant grasp of the necessities of protecting our population. Without testing, we should not open.

AMERICAN OVERSIGHT

Duval	Construction	Thank you for the opportunity ! I believe the Stay-at-Home order should be allowed to Expire on April 30, 2020 and not extended. Needless to say CDC Guidelines must continue for some time. Overall Construction, renovations, residential, condominium or commercial should be opened immediately along with their represented supply chains. In closed areas workforce should be limited to 10 or less and social distancing followed, If the nature of the work should not allow social distancing then workers should wear masks at all times while in the workplace. In condominiums where workers must transit through common areas and use elevators they should wear masks and gloves going to/from parking areas. Additionally, some General Contractor are taking digital no contact temperatures of all works before entering buildings and starting work. Of course normal sanitation guidelines must be followed in addition to if sick stay home policies. We can get back to work BUT precautions can be put in place until further knowledge of COVID-19 is known, a vaccine established and/or proven treatments....all with solid testing and the curve staying down. We can do this, let us get back to work May 1st, 2020 and we/individuals will comply to guidelines. Thank you!!! Don't let ultra-conservatives rule...just because the Emergency may still be in force for federal funding, loans etc. don't let that fact allow for unnecessary severe constraints to Re-starting Florida! Let CDC Guidelines and common sense prevail ...
Palm Beach	General	the opening of the economy would save the state from a possible economic crisis, many people are at home and unfortunately not all are able to receive government assistance, sooner or later the government will not be able to help the entire population
Charlotte	Food	Make people wear a mask so we can reopen
Pinellas	Food	Open Florida up now. This is all ridiculous and you all know that. Thank you!
Hillsborough	General	I read a lot of comments about this and the younger people wanting to open everything. I am considered elderly. I enjoy going places like everyone else but I also don't want to die. I'm a wife, mom and grandma. I think we should wait a few more weeks to try to open things. Just my opinion but thank you for letting me say that
Flagler	Administrative	To soon to reopen FL wait for the experts to give all clear.

AMERICAN OVERSIGHT

Palm Beach	Recreation	Good morning Governor DeSantis, I hope this email finds you well. I have admired your work since your term began, and I thank you for all that you have done for the people of Florida and the environmental concerns you have had for the state thus far. These are trying times with the spread of COVID-19 and I know you are doing all in your power to “flatten the curve.” One issue I want to address with you is something I witnessed a week ago, something that I believe hasn’t been made clear to the public and avid surfers like myself. As I pulled up to a particular surf spot along the beach in Jupiter yesterday, 4 police officers were in the middle of writing down two surfers names who were ordered to get out of the water and threatening to be put under arrest. In the water, they were out of anybody’s way, much more than 20 feet apart, and minding their own business while scoring some fun waves during this stressful time. While these surfers were getting harassed, hundreds of people were walking, jogging, and standing along the narrow sidewalk along the beach. Many of these people were in groups of 5-6 and no more than 3 feet apart. If you can’t see the ridiculous irony in this, then there is something wrong. Malls and stores where people are constantly in contact with each other remain open in places where surfing is ‘illegal.’ I understand and agree completely why beaches have closed due to high traffic. However, I see no valid argument why people can’t surf in the ocean while staying off the beach and keeping their distance during this time if other places of gathering remain open. The police seem to be enforcing the rules effectively thus far, so why wouldn’t they be able to handle such an exception? There is no lack of law enforcement officials already enforcing the current rules, so they wouldn’t have an issue of keeping people off the sand, or allowing running/walking on the sand. It is necessary to be considerate towards the physical and mental health of our citizens, which is why you should consider a partial opening of our beaches. Thank you for your time and consideration
Manatee	General	PLEASE REOPEN OUR STATE ASAP! TEMPORARY RESTRICTIONS OKAY. THIS CLOSURE IS DESTROYING US AS A PEOPLE - FINANCIALLY, EMOTIONALLY AND PHYSICALLY. PEOPLE NEED TO WORK, SHOP AND PLAY NOW. THE SMALL MINORITY AFFECTED BY THIS DOES NOT JUSTIFY ALL OF US LOSING OUR FIRST AMENDMENT RIGHTS. ACCORDING TO CDC STATISTICS OVER 61,000 AMERICANS DIED OF THE FLU TWO WINTERS AGO AND NO EXTRAORDINARY MEASURES WERE TAKEN AT THAT TIME.
Osceola	Tourism	I think everyone needs to get back to work since unemployment benefits are very slow getting processed because of the severe back log and everyone is really hurting for money. In order to do that companies need to keep employees and customers/guests safe by providing and require customers/guests and employees to wear face masks when in the store and of course keep the store sanitized. Theme parks should only allow half their capacity to ensure everyone has enough room to stay 6 ft apart and require guests and employees to wear face masks in the theme park.
Miami-Dade	General	We cannot stay inside forever. But as you do begin periods of opening up, please take a pause of two weeks to determine if each step causes hospitalizations or cases to go up.

AMERICAN OVERSIGHT

Lake	General	If the state of Florida opens now, I feel like we are putting everyone at risk. If we are having 1000 positive tests per day being quarantined, imagine the amount that will be positive when we are mingling with other people. We are not ready to open back the state. Remember if we lose one person because we opened too early, that's one too many.
Palm Beach	Professional Services	We are Americans. Our civil liberties are being infringed upon. We are capable of following social distancing guidelines. As a business owner we need to get our economy open and give our 40 employees their jobs back. PLEASE!
Volusia	General	Everything should not open at once, it should be gradual. Approximately every 4 weeks. This will show whether opening the stores, parks, gyms, salons was a good idea. If there are no reports of individuals who visited these place as coming down with the virus, more place can gradually open. The establishment should be required to obtain the customer name & address from their government issued ID. Around 2-1/2 to 3 weeks after the visiting the establishment, a health official should visit to be sure no virus. Part of the population will be out in droves but where is the guarantee there will not be a spike in the number of those infected and deaths.
Palm Beach	Education	Time to open up Florida!
Sarasota	General	Please open up Florida NOW, let people get back to work, school, church, etc. We need to get back to normal and continue our lives and livelihood. If people are not comfortable or scare, they can stay home.
Lake	General	Please do not reopen FL until we are seeing a definite drop in CIVID cases, and do so slowly. We will not get ahead of this thing if we rush. I want things to be back to “normal” just like everyone else, but I want to see everyone else on the other side of it all. Too many people aren’t taking this virus seriously. Please, please move forward slowly and cautiously.
Palm Beach	General	Governor & Task Force, I would respectfully urge you to open up as much of the economy as quickly as possible. I own small contracting business that has been impacted by the EO’s. I have three employees and I’m about to run out of money and work. Floridians have done what Was requested of us and we continue to SD and safely try and conduct ourselves. We are all hurting from the virus; some physically, and most others financially. Most folks I have talked with have not received anything from the Fed Govt and many others simply trying to apply for and obtain Unemployment Compensation have not been successful. We cannot continue to simply “suck it up” as others are suggesting. For most of people including myself if swift action is not taken we are going to ruined financially and spiritually.

AMERICAN OVERSIGHT

Okaloosa	Food	FOOD SERVICE / RESTAURANTS When restaurants are allowed to re-open, there should be very specific guidance for all restaurants to follow in order to provide safe operating environments for our employees and our customers. It will be important for consistency in how all restaurants approach these protocols in order to maintain our workforce in health and in security and also to make it clear that Florida is a safe place for tourists to visit. Restaurants will also need to be supported in asking customers who aren't observing appropriate social-distancing or otherwise endangering restaurant staff or other customers to leave. Therefore, there must be very specific guidelines for how we expect customers to behave in restaurant environments, too. And lastly, our restaurant also has a large retail store and an alligator attraction attached to it. We need regulations that assist in keeping everyone safe throughout the entire property and not in only a restaurant or retail or entertainment operation. Adapting to state-wide requirements for new ways to operate will take time to prepare for. Please provide ample time between a decision to re-open these businesses and the date the re-opening will take affect so that businesses have a decent chance of adhering to restrictions and time for visitors to learn what will be expected of them, too. Respectfully, Tracy Hook
Pinellas	Healthcare	I am a denyal hygienist and am very concerned about going back to work. Our profession is the highest risk job to catching this disease. I know for a fact my boss will reopen with a business as usual mentality. She will not and can not provide the proper PPE (face shield, level 3 or n95 masks, gowns) because there is a national shortage. I am very concerned that without these critical items I will contract this disease and I am at higher than average risk. I would also like to add that health care providers like myself should be provided an anitgen antibody test prior to returning to work. Thanks for listening am a denyal hygienist and am very concerned about going back to work. Our profession is the highest risk job to catching this disease. I know for a fact my boss will reopen with a business as usual mentality. She will not and can not provide the proper PPE (face shield, level 3 or n95 masks, gowns) because there is a national shortage. I would also like to add that health care providers like myself should be provided an anitgen antibody test prior to returning to work. Thanks for listening

AMERICAN OVERSIGHT

Osceola	General	I don't know why I am seemingly wasting my time on writing this but I guess it is nice to vent. With that being said I truly believe that nobody actually cares about what the constituents actually think. It seems we are witnessing all around us the process in which US citizens are being systematically converted over to subjects. I am watching my fellow Americans willingly (through the vessel of fear) give up our freedoms for security (a false sense of security at that) in which a wise man once stated while in that mindset we deserve neither. We are bombarded on a regular basis from the media on new numbers of infections and deaths to keep us in fear. Then on the other side of the coin we are bombarded with information that contradicts those numbers on a regular basis, and at the end of the day shows me that nobody actually knows the truth, or that corruption (propaganda) is leading us to think and react a certain way. The saddest part to me is that all of this is being done under the illusion that in some way some how, its for health, safety, and saving lives of Americans, which I believe to be complete falsity because if that were true there wouldn't be an abortion clinic left open in this country. More Americans have died this year alone (and will die after this virus is long forgotten) at the hands of fellow Americans in clinics than covid could even dream of through the lie of pro choice. Meanwhile our actual God given choices of life, liberty, and the pursuit of happiness are being taken away now on a regular basis. Instead of the government combating all the fake news lies with the truth it seems it is much easier and more convenient to go along with the lies. With all that being said, I just don't see how me now being unemployed (you don't want me to get started on the fact that Florida has done a completely horrible job with UI) , struggling to pay my bills and feed my family is helping to save the lives of people. Never in the history of mankind has all the pandemic death tolls combined has killed more people than poverty and totalitarianism has killed. In my opinion the answer to saving lives from a virus isn't to take lives of others by taking their livelihood and our ability to provide for our families away. The American economy (being the backbone of this great nation) is the actual key to preventing preventable deaths. Viruses will take lives. It's a unpreventable fact of life. After this virus is forgotten another virus will come along. That is a unpreventable fact of life. Everyone at some point is going to die. That is a unpreventable fact of life.
Orange	Healthcare	Florida is absolutely not ready to be re open! The state needs to stay shut down until we are more certain that covid 19 spread will not continue to increase. It would be so dangerous to open the state up prematurely before we are actually ready.
Collier	General	No it’s too soon to reopen. I think before re opening the state needs to focus on unemployment and by that I mean get people paid what they are owed because of no fault of there own have they been out of a job. The reason is COVID-19. It’s unacceptable how the government has handled this pandemic. There should be a simple form for people to fill out for unemployment because of the pandemic. The people that were let go, furloughed etc. because of the pandemic should get assistance immediately. They have been working and would still be working if not for the pandemic and THEY WOULDN'T WANT OR NEED ANY ASSISTANCE FROM THE GOVERNMENT IF THERE WASN'T A PANDEMIC. Enough of all of these hoops that hard working people of Florida are having to jump through to get what is owed to them.

AMERICAN OVERSIGHT

Orange	Professional Services	Please don't experiment with peoples lives under pressure to re-open from those that do not understand or follow the science of this virus. It would be irresponsible to relax measures in place that are at least holding down the spread until we know more about the behaviors of the virus both from transmission to why it affects different people differently. We don't even yet know if there is an acquired immunity. The failed unemployment system is no reason to push people back to work endangering everyone and dragging this out even longer when a 2nd wave hits. Florida is a laughing stock for the delayed response in the beginning, lets please do the right thing now and wait until there is sufficient testing, treatment, and understanding of how to move forward responsibly. Follow the science, not the lobbyists. Stay the course!
Broward	Tourism	Governor DeSantis should lift the suspension against short term vacation rentals. People who book our homes look for comfort and safety from thier gomes away from home. With case numbers dwindling, as along as there is a mandatory use and enforcement of masks and protective gear should be enough for most to be safe. High volume events should be cancelled til further notice, but the tourism industry should be opened up and financially helped if the State of Florida wants to keep small businesses and the industry healthy.
Manatee	General	I would like to see Florida and the task force make recommendations on reopening based on the guidelines provided by the President and White House. I think the 14 days decline (or plateau) is an important first step in entering the first reopening phase. I would like to see Governor Desantis mandate masks in public for all stages... and even before the first. I would like Desantis and that task force to please take a look at what is happening in my county concerning testing, our positive percentage rate of 15% and our having more deaths than Hillsborough County which has 4 times our population and more positive cases. Manatee County is testing less than .60 of the entire County population. This is insufficient. We are NOT on a downward decline and if reopening is to begin in some parts of Florida, I would like to see the task force give detailed analysis County by County as to which qualify to being phase 1. I would most likely to do this safely and smart, so that we do not regress in progress that we have made in the state as a whole. thank you.
Hillsborough	Accommodation	Please, at least open Vacation Rentals to those of us living in Florida. We have stayed at a VRBO for years and it's a perfect to self isolate while giving us a break from our daily existence at home. Thank you..
Brevard	General	Open the State!!!! The science isn't clear enough to warrant shutting everything down, domestic violence and child abuse is rising. We are trading one virus for another. The damage being done by fostering fear is far worse than the damage from this virus that we don't even know the severity of.
Sarasota	Information	Open up outpatient surgery. I need knee surgery and wife needs colonoscopy.

AMERICAN OVERSIGHT

Orange	Information	I own two businesses in Winter Park, one is a luxury guide called "PASSPORT WINTER PARK" that is distributed in hotel rooms like The Alfond Inn and Park Plaza and it is a luxury guide to the destination. On March 20th I opened an Art Gallery at the Park Plaza Hotel and had to shut down on March 26th. The hotels are empty, Park Avenue is a ghost town, all because of this lock-down and many of the businesses and artists I work with are VERY small, but unique businesses that add to the charm of visiting Park Ave. We need to get these businesses back open AND put together a marketing strategy to bring in the "Drive Market within the state" to come and visit Winter Park and Central Florida for shopping, dining, the arts and more! Orange County cannot be steered by Disney and Visit Orlando when they are all dedicated to big conventions and crowds. Winter Park is small and we like it that way! Please don't let Mayors Buddy Dyer and Demmings tell Winter Park what to do, it's a whole different community than Disney and Downtown Orlando! Thank you!
Broward	Recreation	Please open the public beaches in Southeast Florida, is, Broward county. The air is clean and breathing the sea air is very beneficial to ones health. Sunlight has been found to help kill the virus. Also gyms with proper hygiene also need to be open to properly exercise the body, get oxygen flowing through the body. A healthy body can better resist the virus.
Palm Beach	Education	I am a 13 year old schoolgirl, and I want all the vulnerable people to stay at home and be safe. However, I also want to go back to school as soon as possible to continue my learning, work on my grades, and see my friends again. I appreciate the great job that Governor DeSantis has done, now it's time for us Floridians school kids and adults alike to get Florida going again.
Collier	Tourism	I am quite unsure as to the question "Area of Interest." I selected Tourism because that has affected the most. However all industries should open as normal. Open all businesses. Those that fear illness should practice precautions just like with any flu or cold.

AMERICAN OVERSIGHT

St. Johns	Information	As a retired healthcare administer and disaster trained responder,I am very concerned about how this covid response has been managed. This is probably the most serious issue confronting our country in generations and we have not responded to this is a coordinated ,strategic way to reduce the long term toll on our citizens collective health as well as our economy. Unless we have a clear handle on the extent of the virus through large scale ,easily accessible testing we are playing “Russian Roulette” in making any plans to reopen the economy without this important data. Failure to do so before reopening, will give people a false sense of security about this health crisis being over, when in fact ,it’s only beginning. Any task force convened to make recommendations to reopen the state, must include and be lead by healthcare professionals.otherwise we are courting future disaster. This is NOT A PARTISAN ISSUE, this is a humanity issue. Healthcare professionals should take the lead in developing protocol to be implemented to ensure maximum safety and reduce a second wave of the virus that can do more damage than the first. Let’s look at countries that have begun to reopen . What are the best practices that have been effective. Look at areas (like Japan) that reopened too soon and the consequences they encountered from premature reopening. Let’s learn from the history of other pandemics about East was helpful and what was not. Everyone appreciates and understands the desire to reopen the economy. However, doing so, without careful planning, data and the primary regard for the health of its citizenry,is not only short sighted, ill advised , but also constitutes negligence on the part of our leadership in weighing these factors.
Pasco	Tourism	I feel Florida has to hit the criteria yet of health officials on 14 straight days of decline. Until there is a proven method of protecting us, and I mean everyone, the state should remain closed. We need testing for everyone made available. We need the state gvnt to fix the unemployment issue and allow these workers to get assistance. Even with social distancing the numbers are going up. It need to be unified guidelines and people have to follow the guidelines from the medical experts. If the state were to open next week, I would not be comfortable and would still stay sheltered and not partake in the small businesses or retail shops.
Polk	General	I hope Florida would open up again.Certain guidelines should be in effect.Guidelines all people must wear masks,and keep the six foot distance apart.I still see people without masks at stores.And most of all these morons who have the virus are not staying in their home. Should be a heavy fine for them voluntary stay at home is not working for some inconsiderate bastards.As far as amusement parks everyone should wear masks and sanitizing machines placed all over the parks.
Hillsborough	Finance	Please open back up the economy for all areas of business. There is enough research to show that while its spreads easily, the mortality rate is much lower than originally predicted. Open up full scale and allow those with compromised immune systems and elderly continue to be cautious on how they go out into public. Get our kids back to a "normal" life and enjoying activities and school. Get kids back to sports playing basketball and baseball, etc. Seems like everyone i talk to is depressed and people need some semblance of normalcy.

AMERICAN OVERSIGHT

Brevard	Healthcare	Please do not open the state back up until proper time has really allowed to show the true curve get better. Starting too early puts us all at risk. I work in the respiratory field and I strongly believe this will come back quicker (if it ever leaves) if we jump the gun.
Pasco	General	I would love to see the State of Florida re-open, but I think it's to soon. The cases of coronavirus in Florida has not seen a decrease. I don't see a lot of testing, especially in areas where the numbers are high regarding infections. There is still a problem with carriers of the virus. If we start opening everything to soon, the numbers will rise again. I am tired of being home as well as the next person and I would like to see my family and friends in person versus phone, text messages and Skype, but safety should come first. I feel as soon as you open things up people will forget about social distancing and we will be back where we started. If there is a way to do this safely and really enforce the rules then we may be successful.
Hillsborough	General	It is ridiculous that the whole economy shut down for a flu like illness with a 98% survival rate. Everything should reopen so people can make their paychecks to feed their families and provide for the roof over their heads! Let people go back to work and stop listening to people with an agenda with known falsified data and numbers, that work for their cronies and the pharmaceutical industry. We are a nation of hard workers and smart citizens. Let people go back to work and kids go back to school! The idea that we as a nation are denying surgeries, or loved ones to be in a room with a terminal patient is NOT America. It is communist at its finest. Please reopen the great state of Florida so we can get back to work! Ronald Reagan once said, “Government is not the solution to our problem. Government is the problem!”. Stop fear mongering people and let Floridians get back to their way of life!
Lee	Healthcare	Do not open the state until we are absolutely certain at the numbers are going down and we're past the curve. Let's use our heads and not be hasty and try to gain political points.
Hillsborough	Retail	People need to get back to work. The current conditions are unsustainable. It's ridiculous to imagine that people are going to stay shut in for very much longer. This is decimating lives and livelihoods. Please allow us to get back to work. We live in an unsafe world. To imagine that by staying home and going broke and starving that is somehow keeping us safe is insane at best, evil at worst. We need to get back to work. Please bypass local city councils and mayors, who seem intent on seizing and holding power for powers sake, and open Florida back up. Thank you.
Volusia	Real Estate	I feel that the state should not open just yet, I'd like to see several weeks of very minimum cases before we open . We have a large population of elderly and I would hate to see them suffer just to make a few bucks.
Manatee	Healthcare	Please inform the public if this virus has leveled off and cases are dropping before you decide to allow us to feel safe to do our own shopping, haircuts,ect. I really believe this isolation has saved lives here in Bradenton!
Charlotte	General	We can't keep six feet away forever. Put a mask on so we can get back to work.

AMERICAN OVERSIGHT

Broward	General	I think Florida should watch and listen to the experts. If there is to be another surge, we should let it pass. Provide test to doctors and allow for contact tracing by testing everyone. During this time essential services should be done first; like medical offices. Florida is different in that if beaches open they would come. Opening is residents to more cases. At this time mid May looks like a better time to start reopening if the numbers start going down. Also, encouraging hand washing and mask wearing should remain in effect for at least a year.
Hillsborough	General	I do no support a continued shutdown. As a nurse, I understand the health implications of the virus. However, I also understand the devastating consequences of a continued shut down. Florida is not experiencing a massive outbreak like NYC. Hospitals here in Tampa are at normal capacity, if not slower than normal. Nurses are being called off of work. The virus will now always be around and people will be exposed one way or another. Let's reopen and encourage individuals to always wash hands, not just when there is hysteria over a new virus. OPEN FLORIDA BACK UP (: (:
Charlotte	General	Keeping most businesses closed down is unsustainable and will lead to economic collapse. Recent information about the effect of heat, humidity and sunlight on the virus is more reason to promote outside work and recreational activities.
Seminole	General	I would like a very soft opening to prevent a spike in cases. Keep bars and nightclubs closed. Recreational sports and gyms to remain closed for the safety of the kids. Hair salons and barber shops can open if they limit the amount of people in at one time as well as small shops.
Broward	General	HAVE PEOPLE WEAR MASKS BE MANDATORY AFTER OPENING THINGS UP. open up slowly, keep the elderly in and those at high risk, but everyone else can go out. tell people that even though stuff is opening up it doesn't mean they should go out. have restaurants limit their hours. gyms too.

AMERICAN OVERSIGHT

Hillsborough	General	I am a mother of three who also cares for her 82 year old mother. It is so important to me that we take our time and reopen FL safely because the health and safety of these 4 people mean the world to me. I know that others feel the same about their loved ones but as a caretaker who is battling to defend her home from this invisible germ enemy having all Florida state and local government along with businesses and community centers to AGREE on consistent policy will be the first step in being successful to the reopening of Florida and help to me in maintaining the health of my household. Letting cities and counties be at odds with one another is truly ineffective. I believe that there needs to be a statewide public health standards of cleanliness to be enforced by the health department from this point forward. I know it can work because several years ago FL took a bold move to be a clean indoor air state. Ensuring that their is uniformity in cleanliness and hygiene standards is not insurmountable. Particularly in schools. I think a part of the budget for school operating supplies from this point forward for operation should include hand soap and hand sanitizer. Traditionally parents have been asked to contribute these items. Not all parents participate and this is problematic. These items are necessities and essential as we have learned in this crisis and all school districts and schools should have an ample supply ALL year round. I also want to just say thank you for our state leaders working together daily to keep all Florida residents informed and safe during this time. Thank you.
Lake	Recreation	Reopen May 1st. People can keep social distancing but need some form of socialization now.
Orange	Tourism	Speaking of theme parks... during this closure, why not allow construction to commerce ... not only are you getting another group of people to work but you are also going ahead on schedule. Another thing to do is possible to go back to vouchers for certain areas on the park. Maybe sell 1000 vouchers for fantasy land or 2000 for tomorrow land people would be limited to those areas, you can control the crowds by the number of vouchers you sell. Until further notice... all I have seen Machines that people walk through that spray disinfectant on people... have to along security checks
Polk	General	Please open up our state! This numbers just don’t work for keeping people from being able to make a living. People need to be outside and parks need to be open. Small businesses and restaurants need to be able to succeed. Don’t listen to the fear mongers! Please please please
Hernando	Professional Services	If a service can be rendered safely with both parties wearing masks,then why shouldn't they've opened??? The system has failed not only unemployment applicants,but the small business owners who don't have anyone to help them out until their application is first able to be submitted and then processed and hope the system doesn't crash and start over again!! You can't wait for everyone to be tested and then open up the Country again. We are all responsible for ourselves and Baltimore people lose control,wanted to lift some restrictions. Thank You.

AMERICAN OVERSIGHT

Pinellas	General	With both my husband and myself being RN's we think it's detrimental to keep Florida on the safer at home order until mid May. Many doctors do not feel we are ready to reopen. Too many individuals are still getting sick and dying. Open the state up just for political gain is absurd. Our lives are at stake. Be smart and go an additional 2 weeks. It's working now why chance it?? There's nowhere people need to be. If you reopen people might not come out anyways if they follow the news.
Broward	General	Wait until we have the 14-day downward trajectory, then re-open Florida the following Monday with Phase 1. Beauty Salons and Barbershops can open with restrictions like appointment only to prevent the number of people waiting, and limiting the number of people in the salon or shop to 10 people or less. This number includes the number of workers in the salon or shop. Restaurants should open at only 25% capacity, and redesign dining room layouts to ensure guest are 6 feet apart from each other. Major Department stores should only be open for curbside pick-up during phase 1, or open to the public with restrictions, such as, allowing a limited number of customers in the store at a time, but suspending the use of fitting rooms for at least the first 2 weeks after reopening. Parks can open, but should be heavily monitored by Police to prevent overcrowding. Same with public beaches. I think Public Beaches and parks should have an open and close time, perhaps 7am- 6pm EST as well. Call centers can reopen, but only if management can ensure all employees are 6 feet apart, and offer remote positions to help prevent overcrowding in the workplace. Nightclubs should remain closed until Phase 2 or Phase 3 of reopening. Bars can open if they can ensure patrons will be 6 feet apart from each other. Hotels can reopen, but with limited capacity. Public Pools should remain closed until Phase 2. Casinos should remain closed during Phase 1. Last, during both Phase 1 and Phase 2, Florida needs to continue to adhere to wearing a mask in public places no exceptions. We can reopen Florida safely and smart- we need to do all we can to protect our older population who is more susceptible to dying from this virus.
Sarasota	Government	Open libraries last. We get so many people, especially elderly. If the schools aren't open yet, the libraries shouldn't be either.

AMERICAN OVERSIGHT

Brevard	General	Thank you so much for asking for public comments. Please consider reopening our businesses in Florida. I believe that our COVID-19 situation has already peaked. People are smart enough to take care of themselves and will go where they feel safe. Our restaurants and small businesses are struggling. Actually, I think many of us will be surprised by those that have already gone out of business; a sad situation. Perhaps, increasing gatherings to no more than 50 persons is an idea. Many restaurants could accommodate that number. We could start attending some church services again. I think that having people stay home too long will actually hurt their immune systems. Anyone who writes and states that we need to wait another month or whatever should just stay home. The rest of us want to get back to normal, or as normal as we can at this time. Again, thank you.
Marion	Education	Re-open now! Beaches and all parks should be open!
St. Johns	Retail	Please open the retail, hair salons, gyms, restaurants, bars, etc...as soon as possible. People in Florida, especially NE Florida know how to follow rules, the beaches being open speaks to that. What's the difference in shopping at Publix and shopping at a retail store if we follow the distance guidelines. Thank you for considering opening up am the state.
Palm Beach	General	We need to open up now, without limitations. Studies have been conducted and published revealing the true nature of this virus, proving that we have overreacted by shutting down our country. Heat and sunlight kill the virus... That's all we have here in Palm Beach County. Numbers have been grossly cooked... Every death being coded as CV19 to manipulate statistics. Revised statistics show that this virus is not any more deadly than the yearly flu. I personally have a household of 4, 2 adults + 1 adult child + 1 high schooler. Between all of our activities from November to when we shut down in mid March, we were most likely exposed and built an immunity already. None of us have been sick, but now none of us are working. We are being punished with reduced income and limited relief. The only solution is to open up, apologize for your mistakes and move on.
Martin	General	Open up the state w minimal restrictions. People are losing houses, income and everything they have built over the years because of these closures!
Polk	General	Mobile dog grooming . Mobile car detailing service . Consignment stores example antiques . Outside gun ranges .

AMERICAN OVERSIGHT

Miami-Dade	Recreation	Im very thankful for the opportunity you have giving us, to provide feedback or suggestions. I think recreation is a big thing our community, especially for the younger kids, that have being through the pandemic and really being socially distant, at home. I feel the opening of our parks, for recreation and sports for kids, should be eased back in, to allow the kids to keep their minds occupied with their recreations and in return providing some self healing and looking towards something positive, moving forward.
Hillsborough	General	Please adhere to the CDC guidelines as you plan reopening Fl. Observe what is occurring when citizens without understanding the spread of the virus are allowed to come out of their homes. Face masks will be part of our future similar to other counties. The SARS-Covid-2 has not gone away. We need massive testing of our communities to better understand the status of those with antibodies. High risk persons must remain at home unless screened for antibodies. Those employees with antibodies should be allowed to move about as long as they are tracked for any return of symptoms.this will take a massive organization on the part of our state and local public health experts. Consider including the numerous healthcare centers of education, medical, nursing, veterinary, etc.. large gatherings must remain closed until we have more information. What data is available related to those essential businesses, rate of illness, deaths, return to work. Thank you for this opportunity to for providing feedback. Respectfully, Alix Alton, MSN, RN, NPD-BC, CEN

AMERICAN OVERSIGHT

Osceola	Construction	I think Florida should take a regional approach to reopening the state since different parts of the state have drastically different numbers of people infected with COVID 19. For the entire state, you should take a three phased approach to reopening businesses like opening businesses that are second, third, etc. in ranking of essential businesses to Florida's economy. In phases one and two, place social distancing restrictions that get relaxed as the state progresses through the phases. In phase three, have all businesses reopened to pre pandemic levels with no social distancing restrictions. In all phases, there should be sanitation protocols that are unique to each business to minimize the risk of any illness. The regional approach I mentioned is about how soon different regions of the state can start entering these phases of reopening. I believe northern Florida and rural south central Florida can start reopening as soon as today or as soon as May 1st depending on how Governor DeSantis wants to enforce the Stay at Home order. The rest of Florida can start when there's a continuous decrease of cases in a two week period much like in the president's plan to reopen America. Finally, regarding a popular trend of wearing medical masks outside of medical settings, I believe it should be the choice of people who live, work, and do business in Florida if they want to wear medical masks. My county of residence (Osceola) is one of very few counties in Florida that has made it a requirement to wear medical masks at public businesses within the county. I believe enacting laws requiring wearing medical masks in the three reopening phases I mentioned will turn away people from conducting business within said areas especially if they have medical issues that are exasperated by wearing said masks. At this time in our lives, we want people to conduct business in all parts of Florida and we should have rules in place that are inclusive for all individuals in the state of Florida.
Broward	General	Interested in the Opening of Condo Pools and Private Beach

AMERICAN OVERSIGHT

Brevard	Government	Our Constitutions both National and State are there to regulate Government. What a complete and udder failure across our nation. IMHO California and New York were a complete embarrassment to our nation. Each state cried "wolf" and "foul" yet where completely unprepared to satisfy any requirement of Public Safety. Each State was provided a Hospital Ship from the POTUS via USN. California the most populous state, New York the fourth, yet not much screaming and crying came from #2 or #3 most populous states, Texas and Florida. Was it just politics? Party of the Governors? Our nations economy was booming, unemployment at record lows, and POTUS Trump was on a track to an easy re-election. We are supposed to be a nation, lead by the people, yet Government proved they had no idea what they should do, in a crisis. Our Un-employment center has spent as much fixing their failures, as the small amount actually going to the displaced workers!!! Have I made a point clear yet? Fix what is broken, before you open our state back up. I personally witnessed an embarrassing county commission looking like a deer in the headlights not knowing what to do. Make a rule, and realize they can't do that. Not only embarrassing, and frustrating, but also unlawful, and unconstitutional. -EVERY COUNTY OFFICIAL, AND COUNTY CONSTITUTIONAL OFFICER needs a refresher course on the US & Florida Constitutions. What is a "state of emergency" vs "Martial Law" That the County Sheriff is the top law enforcement, period. -EVERY EXECUTIVE ORDER will be consistent for every (1) beach county (2) every port county (3) every intrastate corridor county (4) and every tourism county Not every county is the same, and needs a classification in the future. -EVERY FEDERAL DOLLAR must be accounted for, and spread accordingly.
Lake	General	As a side note, yet consistent and germane. Millions of school children were home schooled for a long time, while in the homes of REOPEN

AMERICAN OVERSIGHT

Hillsborough	Technology	Dear Governor DeSantis, I am a resident of (Name your County). It is time for Floridians to get back to work. Throughout the past weeks of COVID restrictions businesses deemed “essential” remained open. Floridians who patronized those businesses voluntarily engaged in social distancing, voluntarily followed CDC guidelines. With these businesses open, sometimes serving hundreds of people at a time, twelve hours a day, seven days a week, we have witnessed COVID numbers falling. The State of South Dakota never mandated a single business closed and are also seeing COVID numbers falling. Every business is essential when families are dependent upon that income for healthy and happy lives. I believe these facts prove that Floridians are responsible people, who love their neighbors, and will CHOOSE to do the right thing. But we need our elected representatives to do the right thing; we need our businesses open. We don’t want government handouts. We want to get back to work. We want our businesses open now, not later. Sincerely, Sign you name : Emmanuel Chebesi Your email : echebesi@gmail.com Your phone number : 8138109614
Charlotte	General	I feel it is too soon to discontinue the safer at home order for government & private entities. I believe they should continue to operate at 50% staffing for all with the ability & resources to work from home. This would continue to ensure maximum social distancing measures as well as the ability to keep remaining staff at appropriate distances to prevent transmission of covid 19. Passive screening at work is only effective for people with symptoms. Research indicates viral transmission is possible from asymptomatic people. It’s also very difficult to obtain masks for all staff members. Testing hasn’t been implemented en mass to ensure new cases are leveling off. Antibody testing is non existent. If each county administered 1000 tests a day and the positive results daily were decreasing, it would be one thing, but test results fluctuate daily & a scientific determination of what counties have peaked & now have a declining infection rate cannot be determined. A slow, conservative & carefully monitored state reopening process is requiered due to the still high level of uncertainties. Thank you.
Orange	General	Following the guidelines laid out by the White House Task Force is the best way to go. I think we should stick with that plan.

AMERICAN OVERSIGHT

St. Johns	General	I think it's too soon to open the state as we have seen some sharp daily peaks in the number of new infected individuals. It is important to return to life as normal, but what is the risk. How terrifying does it sound to have to redo this stay at home order in a couple of months if we do not do things right the first time. I think the trauma and impact to the economy would be worse. The restaurants that can operate through take out only is good enough for the time being. The risk of the servers touching things that people put their mouth on is very high and realistically sanitizing menus and tables and every possible item someone could have transmitted the virus on is difficult. It would be nice to open some stores with close attention to number of shoppers and fully considering the size of the property. Nature/ state parks should be allowed to open since there is little chance of transmission outside when keeping the 6 foot rule. Opening Florida should occur at a slow and steady process to insure that there aren't mistakes.
Brevard	General	I am a mother of an rising college freshman and she planned to go in residence in the Florida university system. We do not see how any college student could be in a classroom or dorm in the fall. We also do not see us participating in any recreation in Florida where groups of people are: movies, concerts, festivals, etc. The beaches are wonderful if people would social distance and ensure their teenagers are doing the same when the teens are not with them. Teens in a lot of cases are not social distancing when not with their families. Many parents have no clue and the virus will continue to flourish when teens bring it back into their homes. We need much more testing, education, discipline and common sense to get through this tough time. Opening like the state of Georgia did is completely political and makes their governor look like a clown-to many of it's own citizens. We have family in Georgia and they are disgusted. We need to help small business adapt to the situation at hand-outside eating areas spaced accordingly, contactless payments & deliveries. Structured rules at grocery stores, if entered. Amazon and Walmart have amazing logistics in place-ask for their assistance to help other business in their practices to do this right. Both companies are making a lot of money right now. Somehow link small business into Amazon where they can. Same with Walmart. These are huge umbrella companies that served the entire US and beyond. Please listen to Dr. Fauci's facts not the politicians. Governor Coumo is doing it right. I hope Governor DeSantis does also. Thank you and good luck in your task.
Orange	Tourism	I work at a theme park so I'm hoping for starters everyone including theme park employees must wear face masks and continue to wash their hands. I have no idea on distancing but face masks need to be a must. Theme park employees should not assist in taking photos for the guests at this time. Maybe assigning the guest their own photographer could work.

AMERICAN OVERSIGHT

Orange	General	Good afternoon, I think it's to early to reopen. We haven't had enough days of decline, we even had a significant spike recently which could be indicative of more testing but that isn't much reassuring, we have to many Ill persons in the state of Florida to reopen. Something I think we have to give serious weight to as well are the side effects of becoming ill. It isn't just death that scares people, strokes can be life altering and disabling. Liver and heart damage can severely impact quality of life for decades, and of course there's literal possible death. Furthermore with all those aside if we reopened in the coming week or even two we could reverse the progress of the last month and throw the curve flattening to the wind. When we do reopen I think there needs to be serious consideration on types of businesses. Anything that puts you in physical contact like nail salons, hair salons, tattoo shops ect should remain closed. There's very close contact, the shops are very small on average. Smaller bars should also remain closed as many times there's barely walking room without physical contact being possible. I also feel until a work place can provide basic safety measures for employees including masks, gloves, hand sanitizer, plexi covers for cashiers, ect they shouldn't be allowed to reopen. Social distancing is working but when we reopen and leave our employees on the front lines of mass contact without proper safeguards this will spread exponentially. We also need mass testing on weekly basis standards so we can identify and home isolate new cases before they have the chance to spread the virus further. This is impossible with current testing turn arounds and limited tests in general which is why I feel like it's to early to open. We do not know who is carrying this virus around asymptomatically, who all is sick, where they are or anything. We're flying very blind still. Until there's a quick rapid test available we must remain closed.
Orange	General	When you give the green for any and all of these businesses it should be mandatory that each establishment have a complete Clorox clean down top to bottom. I also believe the 6-foot distance should be also enforced and if you can't then you need to wear a mask period. Theme parks like Disney and all the other places that you're going to be around a lot of people you need to go ahead and check their temperatures with the machine . Folks with high temperatures should really never be allowed out in public. Thanks!
Polk	Recreation	Please reopen parks and beaches where Floridians can safely distance themselves while still enjoying God's creation.

AMERICAN OVERSIGHT

Martin	General	Opening the State of Florida and getting people working again is important. However, this needs to be done in a way that does not jeopardize public health. Please consult and listen to the health care professions. Also, please consider that it may be dangerous to rely on the number of positive tests and the number of unemployed at this time. Not everyone who is symptomatic has the ability to be tested. I have heard that this is because of the lack of testing kits and because the insurance companies will not cover testing certain people. Please look into this because if it's true then we will never have accurate data for our leaders to make sound decisions. Additionally, please keep in mind the unemployment rate is high in Florida and around the nation for many reasons. While most are probably legitimate, others are not. There are people who voluntarily chose to file for unemployment so they could receive $600 a week because this is more than they made before the COVID-19 crisis. It's unfortunate but it's happening.
Pinellas	General	Absolutely under no circumstances should we open the state until advised by medical experts and infectious disease experts. In fact, current restrictions are not enough. Your lack of action is costing Floridians lives

AMERICAN OVERSIGHT

Broward	Healthcare	The latest COVID-19 data shows that actions taken by federal, state, and local governments have been working and total cases will be far fewer than projected without such measures. Hospitals have built up stockpiles of PPE, ensured bed capacity (especially ICU beds), and implemented ventilator strategies to handle surge demand. Testing is key, and testing capabilities have dramatically improved in Florida. Models based on real-world data show much more mild growth than initially expected. As mitigation measures remain in place, hospitals are at record-low capacity, roughly 50% on average across the state. Deferral of urgent/non-elective surgery has occurred on a substantial level, even for urgent surgery categories. Patients need to regain access to this level of care for their well-being, along with the well-being of hospital systems and the healthcare workforce. Hospitals, physicians, and staff are struggling financially as a result of COVID-19. Major health systems across the state and country have announced layoffs or furloughs of employees due to the record-low patient volumes, further exacerbating the economic downturn. Getting back to caring for all patients is essential as many conditions worsen due to delays in scheduled surgeries, while others avoid seeking care for life-threatening, yet treatable conditions, due to fears of face-to-face medical interactions. Hospitals should be allowed to resume treating all patients provided they can demonstrate: Adequate PPE to manage COVID-19 and non-COVID-19 cases Adequate ICU and ventilator capacity and staffing Protections and processes in place to prevent the spread of COVID-19 for patients and caregivers in the healthcare setting Continued reporting of relevant data to state officials to ensure capacity is maintained as surgeries restart
Miami-Dade	Technology	Economic recovery has value and is important but human life is precious and is irreplaceable. Open the state ONLY when it is safe because otherwise everybody will pay for it. Simple people will pay with their lives, economy will not recover all the way because probably you will have to lock-down again and whoever made this hasty decision will never be elected again.

AMERICAN OVERSIGHT

Nassau	Tourism	I am concerned about the vacation rental ban and want to urge the Governor to lift it. I have a vacation rental and never even see my guests… they check in remotely with a code. My cleaning staff never sees them either. They are on their own completely away from contact with anyone other than themselves. It is frankly a perfect place to stay away from other people while still being able to enjoy Florida and SPEND MONEY on restaurant take out and other services and businesses that are open now. A hotel, on the other hand, has lots of people… guests and staff and usually a lobby and all sorts of public places. It's insane to think a hotel is safe and a private home isn't. I have a hard time understanding why the safest form of lodging in a private residence is banned while a large public place like a hotel is allowed to stay open. As a senior citizen, my vacation rental is the primary source of my income (IT'S MY SMALL BUSINESS) and I have been economically devastated … Why shouldn't I be able to make a living providing guests a safe, secure, secluded environment? Allowing a much more public, crowded setting like a hotel to remain open while I am banned, just doesn't make any sense. Please lift the vacation rental ban ASAP!
Duval	Healthcare	Please be mindful to not be rushed in opening all facilities where screening and non-essential exams are performed. I understand that our health is important, and the best screening practices prevent further necessary medical attention. However, screening exams could be delayed a bit longer than diagnostic exams since a few short weeks would not matter in the larger scheme of things. Specifically, optometrist, dental, mammography, and colonoscopies. (Emergencies excluded, of course) Thank you!
Polk	General	As a Florida resident for 22 years, I am in favor of reopening the state in a phased progression. Although that most likely means I still will not start working again, it does mean my child can leave the house to play baseball and see his friends. This will impact him for the rest of his life and I think by slowly allowing things like parks, etc to open will offer a small sense of normalcy. I'm discouraged by this states lack of empathy when it comes to the livelihood of our residents because the people we trust cannot figure out how to pay unemployment benefits. I have also been waiting for a month.
Collier	Food	Please for the love of all that is good open restaurants, stores and society again. If people don't feel comfortable they can stay home. All of our businesses are going bankrupt if you don't open it asap. This is total socialism there are less deaths then the regular flu. Please open up restaurants as stores so we don't all go bankrupt...
Hillsborough	Retail	This Pandemic Is Over. Let's Stop the Economic Suicide, and Get Back to Work. Hundreds shoulder to shoulder in Walmart, open the restaurants and churches with safe spacing!

AMERICAN OVERSIGHT

Orange	General	RE: The proposed reopening of the state of Florida as it relates to the Covid-19 global pandemic. It is far too soon to even announce that there is a plan in place to reopen our state. Until the numbers decline significantly more, it is not time. Until a significant increase in testing occurs, it is not time. Until reopening a single facet of our state will result in NOT ONE contraction of the virus, it is not time. As a state that relies heavily on the hospitality industry, we can not afford to subject our residents to travelers domestic or abroad until there is nearly no risk at all. Florida is and should always remain a safe and welcoming place for all to visit and relax without such an obvious risk. Thank you for your time. Jerry Coleman Orlando, FL
Hillsborough	Recreation	& Education. Both are essential! Please open the State & County parks. I'm watching my 1st. Grade grandchild who loves to be active gain weight because there is no place to go & be active. Being active also keeps us mentally & emotionally healthy. Education, e-learning in the 1st. Grade is also taking a toll on what are very formative years in a child's life. To go from "in the class" learning to e-learning basically in a very short time period also has had a major negative impact. In several ways, good Teachers in the school have an important role in the lives of young students. As well as the kids not being able to see & interact with there classmates.
Broward	Recreation	Please open beach, Quiet Waters Park, woofing Waters dog park. Just have the park rangers, lifeguards, police monitor the public to practice social distancing.
Clay	General	Opening the same way things where closed is ideal. Keep in mind that with their bing no school for the next 2 months, summer programs should use the month May to get their affairs in order to open up once parents have to go back to work.

AMERICAN OVERSIGHT

Jackson	General	I believe that reopening the state is a premature and harmful action. Without adequate preemptive testing of individuals on a large scale, the loss of human life could become an insurmountable obstacle in the fight to win against Covid-19. The economic loss will be far greater if Florida reopens now as opposed to leaving the stay at home orders in place. Without a proven vaccine or any other medically appropriate medication or testing, the spread would become unchecked and uncontrollable. Also, on the economy issue, the state's unemployment system is a complete and utter travesty. Attempted to complete an application online, more than a few times, only to have the system crash and burn. Completed the paper application and sent it. It's been 2 months. Haven't heard a damn thing yet... Governor DeSantis, do you honestly believe that reopening the state is a good idea at the present time before adequate testing is in place? I am a long time advid and staunch supporter of the Republican Party. I have become ever more disheartened by the aggressive actions of my political party to reopen the state. I fervently request you to reconsider this monumentally bad action.
Duval	Information	I think right now is not the time to re open Florida until the numbers drop from the covid19 I'm high risk because of health issues and I believe for the safety of Florida it shouldn't re open yet it's to soon I've seen the numbers of the cases in the state and we are nowhere ready until the numbers come down safer at home order should stay in effect until we see improvement thank you again
Hillsborough	General	We should get this virus under control before we even consider opening anything up. The city/county should keep the stay at home and social distancing rule in effect until we truly have this virus under control. Otherwise, I feel the number of cases will increase again and we will be right back where we started with this. The risk is too great. Air on the side of caution. Be safe now and not sorry later.

AMERICAN OVERSIGHT

Brevard	Healthcare	Good Afternoon Governor and Task Force Members, THANK You for what you have done (Gov) to keep the people of Florida Strong. My comments will be short but to the point. NO, I DO NOT think opening the state is the prudent thing to do. I think the decision is being based a LOT on pressure the Governor receives from business. In my area the peak has not even occurred yet it is being ignored with beaches opening along with some businesses. WHO CARES if it's tough!!! Our parents and grandparents got through the depression, so would we get through this ! Society has become wimps. Additionally - Why is the area of the barrier islands ie: Merritt Island and Cocoa Beach, Cocoa neglected so often? In this case Covid19. There is no testing location closer than a 45 minute car ride. A bus would take some 1 hour 30 min one way. There are MAN Y MANY people in these areas who a) don't drive, b) don't drive that far. Young and old. Why are there so many testing stations in other counties? If people in this area were being tested the statistics would be MUCH different. And for what it's worth, more thanks should be given to the OTHER HERO'S who continue to go to work every day and brave those who stand in their retail lines and operate essential businesses. They ARE hero's too! Hospital and First Responders know what they're walking into. The employee at Wal-mart stands their position not knowing what's walking through their line. She/He can't back up from a register when a customer unprotected walks up. Without them.... where do you get your toilet paper and other essentials? My humble opinion, Jim
Pinellas	General	I think we should wait until we have testing before we open up. I think we should listen to the doctor and not idiots who is telling us to Drink Lysol and Clorox and that other crap. And you listening to him is very bad for you politically. If you do open you should have strict orders to follow. 6 feet apart wear masks things to not be the way they were before. Not until it is safe again. Use some common sense. That includes beaches and parks. I have a friend four people from her family came from California Florida in March around the 10th they all got the virus and had to go to the hospital and we were very seriously ill. I'm not sure what happened cuz I haven't heard from her lately but this could have been prevented.. If you had took this seriously before maybe that wouldn't have happened. Don't listen to the president and he's killing people and when you listen to him you are killing people too. Also I want to know how we are going to vote in November. I know we have mail-in voting and that's the way I've been voting for years. I just want to know it's safe and we're doing that still. I want everyone to vote that way this year. I want it safe.
Lee	General	I do not think we should reopen right now. people haven't really been abiding by the social distance rules the way they should've been. In my opinion, if we reopen now, there will be more people infected with the Covid-19 virus.

AMERICAN OVERSIGHT

Collier	Professional Services	Let hairstylists that rent suites open! It's 1 stylist to one client in 100 sq foot room. We can make it work! 5 weeks, no unemployment and im broke! Let me work!
Hillsborough	Healthcare	Please do not re open the state. Simply put we are facing a crisis on a scale in which we have not previously encountered. It would be a crime against humanity to further expose the public to the virus in an attempt to stabilize the economy. Human beings are dying at an alarming rate and every day more of the global population becomes infected. The path to safety is long and vigorous. Many of us have to re frame our lives every morning. The possibility of infection. The potential of current unknown infection. These weigh heavy on the minds of those who do not have a choice. Those who are essential are already making a sacrifice for the public. Are we really going to let their names fade in vain? Reopening will only lead to a second mass infection. What a nightmare to have given your life to fight a virus and yet people still will not listen and continue to put the public at danger. Placing concerns over immediate finance over concerns for the public's health. Truly a sick nightmare we are living in. But it does not have to continue this way. we can adapt. We have the internet, the greatest networking tool of our time. All we have to do is put faith in the people of our state and grant them access to an economy that can be participated in from home. Stay at home work on a massive scale. We must rebuild the economy from home if we want to survive. Yes this is a matter of survival for many. We cannot ignore a body count that has already matched the American casualties of war. What would our ancestors say? We are at war with a virus. Adaptation is required of us all. Think back to those great wars of the past. Did the American people adapt? Or did they give up a battle of attrition, allowing the enemy to spread among the public? Please chose to be on the right side of history and save lives instead of destroying them.
Walton	Tourism	I have known many people in my life time. I can safely tell you a Gov DeSantis & Commission: We need to open Florida immediately, with very little to any restrictions. Why do I say this? Because it has become evident from the recent anti-body studies in NY, LA and Miami that the COVID virus is already much more widespread than the models assumed. Taking that into consideration, the hospitalization and death rates drop by AT LEAST a factor of 10. The economy is teetering on the point of depression, and this is entirely self inflicted. We need to admit that the data was flawed & we overreacted to it, and get back to business. What good will it do us if we stay quarantined, but the economy dies? Those with the virus or any other medical condition won't be able to receive care as our supply chain crumbles. We have wasted enough time and ruined enough lives. Let's get back to work. Those that are at greatest risk can and should take precautions to protect themselves, but let the rest of the state get back to our lives.
Lake	Retail	Open up our retail industry
Brevard	Healthcare	Are you people out of your minds ?? DO NOT RE-OPEN !!!

AMERICAN OVERSIGHT

Miami-Dade	Real Estate	It should open asap. People will be infected anyways and for the sake of sanity and well-being, please stop this madness and reopen the economy.
Lee	General	I think re-opening the state should begin with the places that draw the smaller crowds. In terms of places to open first through places to open last, I think re-opening the state should be as follows; 1, Small bars, especially that serve mostly liquor and chips. 2, Strip clubs. 3, Larger bars that serve food. 4, Gyms and fitness centers. 5, Restaurants. 6, Churches. 7, Nightclubs. 8, Beaches. 9, Schools. 10, Amusement/theme parks. 11, Large city events that attract a lot of crowds. 12, Stadiums and sporting events.
Seminole	General	4/25/2020. I would like the State to remain under " stay at home" orders until May 31. Then we can exit phase one correctly and move forward from there. It's one month, yet many lives more to lose. Thank you for all you have done. Except for the unemployment system. I hope it catches up and pays retroactively. Many have had to charge to get by. Retroactive means they can pay that debt back down. Please fix that system.
St. Lucie	Healthcare	I am a dental hygienist in St. Lucie County. In my profession of dental hygiene, we are consistently recognized as one of the highest risk occupations, as we deal with a high viral load. We are in close contact with our patients for extended periods of time. The use of ultrasonic instrumentation paired with an air-driven hand piece creates high levels of aerosols that linger in the air beyond when we introduce our next patient in the room. Not only does this put staff at risk, but our patients as well. I do believe in caring for our patients, but not at the expense of our own safety, health, and well-being. The mandate should be extended for all elective procedures in dentistry until there is adequate PPE, a massive upgrade to the standard of care, and a significant enough downward trend of the virus. I am in my second trimester of pregnancy and already had my financial plan mapped out for the year. As much as I would like to get back to work and earn the money that I intended to, I would rather be safe than create more devastating circumstances for the future.
Orange	General	I believe middle to end of May would be a good goal to open up Florida.. better now than later.. I feel Like would suffice the problem.
Palm Beach	Education	As a teacher I am nervous about opening schools until it is absolutely safe. My son has a heart condition and high blood pressure. He has Williams Syndrome. I can not contact the virus and bring home to him. I have older parents We need vaccine / test. Thank you

AMERICAN OVERSIGHT

Manatee	Healthcare	I have listened in on the commissioners meeting and found out that we have no test kits provided by the government and that we are forced to purchase them ourself for ManaTee county. I have also found out that we are trending up as opposed to rest of the Florida that is staying fairly stable and that trend may be attributed to our lack of testing in Manatee county. At this point I found out we are not even at 1% of population tested we are currently at 0.5%. if we were to safely reopen our Manatee county we need to do more testing we need the antibody rapid tests to ensure that workers taking care of our most vulnerable elderly residens in retirement homes are not endangering their charges. Considering we were way behind other states in USA as to closing down and slowing down the spread of covid19 I think we should not reopen too hastily. Or possibly just reopen certain counties that fit the CDC criteria for reopening and to not just pick and choose certain counties that fit the criteria and open the whole state by default.
Broward	Tourism	Be prudent and re-open (but only if you believe the health care system can handle a spike/increase).
Sarasota	Food	I am the office manager for a small locally owned restaurant. As you are well aware, the virus has hit hospitality & restaurants particularly hard. While I want to jump on the "reopen" bandwagon - I fear that if we do so too soon, before the public is ready, it will destroy our business. We are hanging on right now by a thread. The carryout/to go push is tenuous, but we are making enough to pay the basics. In order to commit to dine-in service, our costs will increase. If we cannot regularly achieve 25-30% occupancy, we will lose too much money. Yet, if we don't open when others do, we will lose our well-trained staff to restaurants that are open. We are not alone with this concern, several friends at other restaurants have suggested the same to me. I know that's the "wrong" answer - that we are supposed to be eager to get back to work, to have our staff back, to get back to normal. It's not that I don't want those things - I do! - I just fear that we will lose the business if we open too soon. We need to make sure that consumer confidence is high when we reopen. If not, we will lose countless business to a lack of business.

AMERICAN OVERSIGHT

Polk	Healthcare	I live in the City of Lake Wales, which gets no local news. I have been following the social distancing since New York started. (i am a native floridian btw and moved here from Ft. Lauderdale 3 years ago). Gov Cuomo seemed to be the only one taking Covid transmission seriously. Anyway, here in Lake Wales, i am convinced that the cases will rise. Only about half are practicing whats needed to protect others. We have a tiny 'medical center' and i am sure it will be overwhelmed at some point. I am convinced that central florida will see an increase if the 're-open florida' is implemented and those from the coasts start passing thru here again. I think, because there is no REAL access to news in Lake Wales, people will just think 'oh we dodged a bullet', and there will be even less compliance in the guidelines. I have no insurance, no family, no help and and over 60 years old. This has been hard enough, please dont open until the scientists say its okay. PLEASE (please remember that there are some that 'just dont get it', and we need officials that do whats right for ALL of us.) Thank you.
Duval	Food	I can't afforded paying 13-20 employees without any helps! Even though all kind of grant and loan out there. We got nothing they support all big company we too small to speak. I want to be on my own but not rely on anyone. We promise to follow all the safety including the social distances .
Brevard	General	Don't open until half of Florida has been tested.
Brevard	Information	There is too much conflicting information floating around to justify a continued shut down of the economy. For example, I see the antibody testing in Brevard County reveals only 1% of residents have the antibody. What does that mean? It means we are nowhere near herd immunity, which, I believe is the only available remedy at the moment. It certainly appears we are ruining our economy for no reason. I would like to see the State re-opened. Older and/or high risk individuals have been repeatedly warned. Everyone knows. It's very painful to watch the economy collapse. Let the people decide whether or not they want to return to work. It should be their choice.
St. Johns	General	I support opening up FL for residents as quickly as possible with restrictions on tourism at first. Let's get back to work, back to life. If we don't open soon I see a rise in crime, suicide, domestic violence and physical and mental abuse and depression. People are already losing their jobs. People will lose their homes and not be able to provide food for their families. Education of our childrem will suffer. We have flattened the curve. We can't eradicate the virus by continuing to stay home until there s a vaccine. We don't stay home during flu season. We need a reason to live. We need to see our friends and families. We need to be able to.visit our families in care facilities. We need to go to the dentist, have that surgery to ease our pain, attend weddings and funerals and graduations and proms and sporting events and concerts. We need to travel again. We need to sit on the beach and calm ourselves with the beaury of the ocean and the sounds of the surf. If people are scared to go out or compromisd we need to let them make that choice as others choose to go on with their lives. The numbers just don't support the continued lockdown and it's dire consequences. Our rights to free will ae being taken from us. People will start fighting back. The virus is much less scary than losing our freedoms.

AMERICAN OVERSIGHT

Palm Beach	General	Open the state of Florida with NO RESTRICTIONS ON MAY 1st!
Hillsborough	General	I am 43 years old, born, and raised in Tampa. I think a common sense approach to reopening needs to take place. Let businesses all business, parks, beaches amusement parks, movie theaters etc open. We will have more long term suffering of unemployment and recession staying closed. If business and people are scared to go out that's fine and we can still practice safety in public. Open schools in fall and offer e learning. Some kids will go some may not. We are supposed to be a free society. Have businesses offer work from home if their job allows and the employee doesn't feel safe at their place of employment. Sports without fans to start. Retail diners etc open to limited seating capacity at first then increase. Same with beaches gyms amusement parks etc. Let the business decide how and when to reopen and the public to decide to go or not. Sports starting without fans would be huge for a lot of people to stay at home and social distance. We need something else other than Netflix.
Collier	Professional Services	Reopen all business and public facilities now and let people live and earn incomes again
Hillsborough	General	Honestly in my opinion the state should stay the same as we are now but let us go back to work as long as it's within the order limits because we do have a family to take care of the government is not gonna pay our bills landlords are not gonna let us live here for free so it's important that we get back to work keep the social distance as it is limited access to things keep the food curbside ksut as we are now but allowed to get back to work
Polk	Accommodation	Is the short term rental ban going to expire on April 30 or will it be extended?
Brevard	General	It's too soon to return to business as usual. There has only been a fraction of our population that has been tested, and many of the anti-body tests are, as has been reported, likely to not be accurate. It's the old "if you give an Inch, they'll take a mile" routine ... some people are likely to treat everything as if nothing has happened if we open too soon. And we are likely to have to close all over again --- see the 1918 pandemic -- then we're really in trouble. I don't know the timeline, but my God, man ... act on the side of what has been working; do not bow to political pressure. Our lives are in your hands.

AMERICAN OVERSIGHT

Orange	General	Until there is a much higher percentage of the FL population which has been testing for live virus and antibodies from contracting the virus, so we have a chance of understanding the community spread of SARS-Cov-2, Florida is not ready to open. According to the John Hopkins COVID-19 dashboard as of 4/25/20 1:31pm, Florida has conducted 319,038 tests out of an estimated 22,000,000 population -- 1.5% of the population. Find me a handful of respected epidemiologists who will put their reputation on the line to say that is enough testing of the population before starting to try transitioning back to normal. Until the medical professionals say we are ready, all that will be accomplished by re-opening Florida will be the same thing which occurred in the 1918 influenza pandemic. A second wave of infections with a higher casualty count than the first wave. Additionally a harder economic impact to small businesses who tried to open but due to the rules for the loans they received from the Federal government, are expected to start paying the bills that were on hold during the stay-at-home order as well as making payments to repay the Federal loan. Any elected official who ignores the medical professionals and pushes to re-open the state, I expect to see every one of them without any PPE shaking the hands of every person who is part of the re-opening charge of the light brigade.
Osceola	Healthcare	I currently work in one of our local Emergency rooms and I have for the last 15 years and this is the first time ever that I have been in fear of loosing my job. Ok have seen 40% of our staff furloughed or as they are calling in it in our hospital system “redeployment” , we are seeing record low census but if for some reason tomorrow we were to get a surge of PT die to this virus or any other reason we would not have the staff to care for them ! Since administration decided to start from the bottom up instead from the top down so at least the actual care takers would be here to take care of the sick. Instead we have all these healthcare workers at home hoping that they get a call back to come to work but we still have all of our CNO’s , CEO’s , CFO’s ! They have all managed to keep their jobs while the people that actually do the taking care of are being sent home.
Hillsborough	Administrative	I do not think any business should be opened until end of May. This is the only way to stop the spread and get this under control. The sooner businesses ate open the more this virus. Will spread

AMERICAN OVERSIGHT

Sarasota	General	I want to urge Governor DeSantis to reopen Florida immediately. Since the virus data shows that senior people with pre-existing conditions are most susceptible, and that the mortality rate is very close to influenza, the state should be opened now! Our freedoms granted by God and our Constitution, have been extremely affected and it's time to reverse this gross imposition. Those citizens that are particularly susceptible to illness should continue to protect themselves with appropriate measures, but our Constitutional Rights should be restored ASAP! Sincerely, Larry Adams
Hillsborough	General	People need to go back to work. Businesses need to reopen too. Social distance as necessary, wearing masks, gloves, and/or take temperature as needed.
Bay	Tourism	I am a Missouri resident who recently purchased a condo in PCB last August. These are scary times for everyone. Badly behaved spring breakers led to the shutdown of our beaches, which is a shame for the rest of us. They brought this awful virus home to their families and spread it to the good people in Florida. The saddest part is, the beach can be one of the healthiest environments for people to enjoy due to the natural UV rays, fresh air and plentiful room for social distancing. I believe that reopening the beaches with enforcement of reasonable social distancing will be a good thing for people's health as well as a very necessary financial boost for the tourism industry that keeps places like PCB thriving. It saddens me that so many condo owners are having to sell or let employees go, due to the inability to rent their properties. I think that even with the beaches open to everyone, enforcement of rules regarding responsible behavior will be the key issue. As a new owner, I not only worry about being able to retain our property, but fear that the management company we contract with will no longer be able to maintain it. I have a daughter who works in an ICU with Covid-19 patients, and I have a background in healthcare so I am well aware of the dangers. I see the Florida beaches as a potential place of healing and wellness, if everyone cooperates and adheres to the CDC guidelines.
St. Johns	Food	I work in the food service industry in the downtown area of where I live. I have concern going back to work worrying that it may be too early. Although there are safety procedures that could be put in place, there is no denying the spread of the virus will increase with business and tourism returning to normal. I only want to go through this shutdown once, so we should do it the right way and not rush back. I feel a second shutdown of everything would be much more devastating to the state/ country.

AMERICAN OVERSIGHT

Miami-Dade	General	Florida should not reopen until medical experts have determined that it is safe (even if that means we have to stay quarantined for several more months). After it is determined safe to reopen, a phased reopening with medical and science based guidance would be best. Even after reopening we should continue with required social distancing and mask requirements, and encourage employers to continue with remote work where possible. Also, we need to prepare schools for potential distance learning in fall.
Broward	Professional Services	The state needs to be re-opened. This closure is economically unsustainable and people need to get to work again. They need to go on with life. As the statistics show, the curve has flattened and there is no reason to keep the state closed.
Bay	General	I definitely think and feel we should still stay on lockdown for another 30 days- schools are shut down- daycares are shut down and need to stay shut down. Our city feels like it is open for the most part. Restaurants are doing curb side pick up and delivery. You can go to the beach limited hours. Grocery stores are open - wear a mask- I do think because cases are still on the rise we need to keep the measures that are in place in full force- until we see a decline in our state and all states. I am a single mother, now laid off and am waiting just for unemployment to hit and the additional federal funds to make ends meet. But, I do feel the safety of my children is far more important than the dollar of going into an office with multiple people and contact with others, let alone bringing my children into a daycare facility. It is just not happening. Safety and health first. Not worth risking.

AMERICAN OVERSIGHT

Pinellas	General	Dear All, One huge component left out in the crisis is NOT teaming up w/ the Natural/Organics industry for solutions in all realms! There is a lot we can do and bring to "the virus," table to solve and remedy this epidemic! From food/drink, antioxidant supplements, to PPE solutions! And so many more! Integrative medicine! My GF "compounded," with Bayer aspirin using feverfew! Remember COD LIVER OIL? Vit C and Scurvy? I think we have an antioxidant deficiency when we become ill w/ the virus et. al. We call it- "bio- identifiable!" What the body recognizes it will utilize in a beneficial way. If not--- then all types of problems may occur! **We need to get ahead of the curve not behind it! We need to look at other cities/countries as to what is working and not- have a team(s), that divides up the states and the countries- COVID-19 researchers! Prevention is the key to our success and survival! Communicate- by e-mail, phone, text, TV, print, and smoke signal! Thank you for offering this as we are- One Tribe! One World! Rachelle Roach,MA,MNT,CADAAA,CCS **Why don't we have a State wide warning system/alert for weather? Like we have in Colorado for Tornado's etc?
Hernando	General	Open us up!! It has been long enough, the food lines are getting longer and the chance for this country to recover from this financially is getting shorter!! People should be free to go out and resume a somewhat normal life and those that have health issues and the elderly should stay home until they are comfortable going out. Our attention and care should be focused on that group. I am beginning to think that many of the elected officials in this coutry want to keep us shut down until the government is no longer accountable to us but, we are accountable to them!! That terrifies me so much more than the virus!!

AMERICAN OVERSIGHT

Pasco	General	I support reopening because the original intent of the shut down was to help our health system handle the surge. We have more bed space now than prior to the virus outbreak according to the stats the governor shared. Our temp hospitals are empty. We are now overreacting because the initial models and forecasts were inaccurate. The reaction was based on fear of the theoretical models, and some even assumed social distancing. They weren't based on actual data then because actual data wasn't available yet, but we have it available now and it shows this is similar statistically to the flu. We don't react this way to the flu, because it's not a practical response to the risk. The actual death rate will be even lower when you consider the studies of extrapolated data that show how many cases there actually were/are that are not included in the total cases data. Stanford medical and others did a study on this. Additionally, the death count is likely inflated some due to presumptive causes, but even with the inflation the actual death rate is similar to flu if you factor in the total cases not counted. The distancing is not safe for our immunity. It is weakening our immunity and will cause higher disease and sickness if we continue. Our bodies need to interact with people to build our immunity. We build immunity as we are exposed to germs and bacteria, not by putting ourselves in a bubble. This is scientifically sound. Even a newborn builds immune system as it is exposed to more germs and bacteria, not by being placed in a bubble. Please re-open before we do more damage. Suicides, poverty, mental issues/stress, sexual and domestic assault risk continues to increase as we are shutdown.
Highlands	General	It is understandable that the Governer is trying too reopen. Our state is in a financial crisis as is the world right now. Not a great move to do so with even beaches. We all understand the impact covid-19 has had on the economy, as well as people's jobs and the monetary impact everyone is suffering right now. This is a medical issue and the experts should be in control if safe to start getting back to a normal life. More and more cases of the illness and deaths go up every day. People are still not social distancing, not wearing masks and not seeming to consider that their family could be next in line to get sick. This is a virus that affects everyone and not just one race, which statistics are publishing recently! This virus does not discriminate as apparent around the world! There is no cure yet! Instead of the political power playes, why can't all the governors get together and face this with one plan across every state. If coming together had been approached from the onset, this virus may have had less of an impact!
Miami-Dade	Administrative	Reopening the state of Florida so soon will be a big mistake. It's important to put the lives of our people ahead of the state's economic interests. Although I do understand the frustration many businesses are having due to the closure, people's lives are more important at the end of the day. This virus is still out there and will not be gone until extreme, longer social distancing laws and/or a full statewide closure is put into place.
Broward	Real Estate	That is a TIME TO OPEN BROWARD COUNTY...THERE IS ALMOST 0 CHANCES TO GET ALL OF THE PEOPLES AROUND TO GET SICK ,BUT MOST PEOPLES HERE LOST A JOB AND THAT IS WORSTED THEN ANYTHING ELSE.

AMERICAN OVERSIGHT

Orange	General	Please re-open florida. No reason why you can't, the numbers just done add up to keep us closed. My opinion is that we shouldn't have closed down. Should have just had guidelines or restricted the number of people in one place.
Martin	General	Please allow permanent Florida residents to re-enter the Keys ASAP, and before opening to out of state tourists. I'm retired and I spend most of my time living on my boat in Marathon. However, I have a condo in Stuart and my drivers license has my Stuart address. Even though I spend most of my time living in Marathon, I'm not allowed into the Keys because I'm technically not a Monroe county resident. I'm not a tourist, Marathon is my 2nd home. Please allow us to get back to our boat (2nd home) in Marathon!! Thank you, Duncan Giddens
St. Lucie	Healthcare	You need 2 things before you can even think of re-opening the state. Massive testing and provide a supply of REAL masks for everyday people. "Face coverings" are useless and just give people a false sense of security.
Seminole	General	Opening of Florida I don't think they should consider opening Florida until the number of cases of positive Corona go down and the number of deaths start going down. Once that happens, then they should wait at least two to three weeks to make sure it's still is on a decline. If you go back to soon it's going to Skyrocket back up again. If you open Florida up to early, people are going to Slack on social distancing and start forgetting about the Virus. They will start getting into crowds where they're going to start spreading it again. If it takes 2 weeks from the time they are near someone that has it and to test positive, then we need to stay closed.It's better to be safe than sorry. Thankyou Sincerely, Tina Saile
Miami-Dade	Retail	i think we should re open Florida . Florida is one of the big population states with very low covid-19 cases i think because of the spreed of population that is why we can afford to re open with precautions like mandatory face masks 6 feet social distance and more. the alternative is economic disaster for years which will lead to many other deaths that will surpass the covid-19 casualties
Pinellas	General	It is too soon to reopen the state of Florida. We have not started flattening the curve significantly on a consistent basis, we have not provided testing for most of our residence. Let's wait to see how our neighboring States do for about 3-4 weeks then re evaluate. Our State is a tourist State, we do not want to open up then having others from surrounding States come in and increase our infection rate. Wait and assess. Be Smart!

AMERICAN OVERSIGHT

Clay	General	I feel that we are not taking this illness serious enough. We still have counties that have a large number of people contracting this and dying. Yes it is hard for the economy however you are subjecting people who have done their best to keep themselves in their homes to avoid catching this disease but when you reopen everything you are helping this virus reach those who havent gotten it yet and also subjecting those who have gotten it to get it again. Duval county is already having people that are being retested to test positive over again. Meaning they haven't gotten the antibodies to help fight this illness off. I think we need to look at the other countries and see how they are handling this because they have been closed longer than 30 days or even 45 days. I am someone with a compromised immune system and I really feel like the State of Florida is only worrying about 1 thing and that is not the wellbeing of the people. We need more testing facilities and we should have had stricter orders in place like Italy did then we might have seen this plateau earlier. I feel we need to listen to medical experts when it comes to reopening states not the people making a fit because they want their beaches open their gyms their fast food restaurants their entertainment because I feel they dont want to be home with their families or dont want to have to cook. Please lets take our time. We need to fix the unemployment to were those people are able to get online do what they need to and then pay them appropriately and on time. There are some people that didnt get a stimilus check because their corrupt parents claimed them as a dependent even though they didn't pay for them not even half but that stopped them from receiving it for themself and their child or children. There are people out there like that that got over looked when it came to this package maybe reach out to those people. See how you can help them but we need to wait to see if they can get a vaccine before setting everyone free to run about and pass this on again and the next time around could be worse than this time. I know this is kind of all over the place but that is pretty much my ideas about this and maybe we could come up with solutions.
Polk	General	It is time to open up. I know the coronavirus is real, but we are being scammed by the media and democrats. They don't want anything to open so the economy will tank, because they hate Trump so much. Several doctors are saying that staying home isn't helping anything. The malaria pill is helping huge amount of people and the sun kills the virus.
Hillsborough	General	I am the child of a microbiologist who worked for the federal government in bacteriological warfair. I was brought up to know not to touch your face when out in public and to wash your hands thoroughly. I think the state should open up and people should make decisions for themselves because that's what the USA stands for. As usual the 5% that can't follow the rules should not be influencing the 95% that can.
Bay	Tourism	I don’t believe it’s time to open vacation rentals yet as our locals don’t even follow rules and at 12:00 pm today people were still out on the beach! Our numbers are still going up and I believe it’s in the best interest of everyone involved we hold off till maybe May 15th and check numbers again!

AMERICAN OVERSIGHT

Manatee	General	The economy and a general return to work is far less important to retired senior citizens, who make up 25% of Florida's population. Without extreme care and diligence, employers and employees haphazardly returning to work can only increase the virus transmission risk to, and extend the isolation of, the 25% elderly. We do not trust that a general return to work at one time will result in the level of care and diligence that is necessary to protect our lives. We are full time tax paying residents and are the economic base/basis for the existence of the tourism industry. I fear we older residents owning homes and senior citizens in elderly care centers are being thrown under the bus as collateral damage in order to save a service and tourism industry.
St. Johns	Food	Hello Governor Desantis; I believe that in your heart you know that opening the state of a florida after 30 days is very dangerous and very reckless to every residents health. I am an Executive Chef at a restaurant in St Augustine FL. I believe as a manager over staff and responsible over my patrons that I would very scared to have people back in the restaurant fully engaged in activities. We should extend for another 30 days and do a soft reopen of business in June. With step by step guidelines coming not from politicians but by your state surgeon general and with guidance from Dr. Fauci. This is NOT ok and acceptable that you closed beaches late and now opening it up earlier then you closed it. My grandpa is 95 and elderly and in danger of getting hurt by this disease. Also my uncle is diagnosed with COVID 19 and is very sick now. You should not open up the state and I think people gathering in restaurants, theme parks and malls would be cause a resurgence in outbreaks in the state. The poll shows now that 75 percent of Florida residents say that extended orders need to be extended until further notice. I would not even give a date. I would extend until TBA which allows you to make a decision and not be held to a certain date. You must choose science over ego because if you open and everyone get sick again it will be on you. As a manager I know that St Augustine will suffer more because if you allow the state to open next week. People will not come to the restaurant causing us to be open for no reason wasting money on food cost, labor and utilities. Then you going to have businesses that will refuse to open anyway Florida is a tourist state and St Augustine a tourist city people will be afraid to travel and basically you will have businesses open for nothing. Keep it closed get it right and make sure a proper plan is in place for June or July. Plus hurricane season is coming as well. People will remember how you handle this Emergecy when they go to vote for you in the next election. We are watching you the people have spoken 75 percent said to extend that’s 75 percent of your voters that have to re-elect you when that time comes. We will remember if you listened to us or you went on ego. You are responsible to US not Donald Trump. We will be the one at the polls he will not be. Please make you choose science and people first I trust you will choose the people over politics. I’ve been out of work 6 weeks and
Miami-Dade	Education	Schools are of most comcern with classrooms being over populated how can we control 6 and 7 yr olds .

AMERICAN OVERSIGHT

Volusia	General	I am afraid that if one area or county opens for business, because incident rate is lower, others nearby will flock to that area. Systematically open businesses that are not likely to draw crowds, or can work by appointment. Have all stores keep or implement one way aisles, this is a great idea for those that have done it. Control the flow of foot traffic. Keep social distancing in effect until data shows it is less likely to contract. Separate new test data from retest data. New test / positive by day. Retest / negative.
Hillsborough	Healthcare	Follow federal government stage 1 guidelines
Polk	General	Open everything up!! Do you realize how this going to effect our economy in the months to come?! All are extremely aware of keeping distance, washing hands,etc. Open the parks, boating ramps, docks, salons, restaurants, all small business, department stores! What was considered “essential “ is just picking and choosing who should and should not close. Personally I think it was overkill to begin with! So again I say, let us open for business!
Hillsborough	Healthcare	My comment: "I understand that businesses are struggling, but Florida has yet to see a 14-day decline of COVID-19 cases and prematurely opening only opens up the state to future spikes of Coronavirus and more death, not to mention having to close again the future. Some people say 1,000 deaths is not much compared to other states, but in any other scenario 1,000 deaths would be considered a massive case of failure and incompetence by our government leaders and it is. The delay to release unemployment benefits have plagued Floridians financially and push them up against a wall to either work and die or starve. It shouldn't be this way, Florida could provide rent relief and more aid to consumers and small businesses. I listened to a number of the task force meetings and many leaders expressed concerns with consumer sentiment and safety, yet we are already proceeding to open beaches and to seriously consider re-opening when we have over 30,000 confirmed cases in 2 months with barely any testing. So many suggestions about how to protect workers and make people feel nice, but nothing concrete and no oversight seem like a recipe made for failure. Are those customers going to magically come back? Will Florida's travelers just show back up? It's a pipe dream from people who refuse to accept the reality that a killer virus is ravaging the world including many in our own home state. I am sure business leaders are the most aware of this ignorance. No, we will not be taking a vacation in Florida. We will be trying to not starve and not die from a deadly virus. That is the reality. The sooner the government and these businesses realize it, the sooner we can make a real plan that is grounded in science and not on the pockets of corporations profits over people. Florida has inadequate testing and does not to seem to be seriously trying to trace cases and stop them. What will stop us from becoming a hot spot? Why aren't businesses more concerned about that? You will not operate if your town becomes a town filled
Collier	General	REOPEN FLORIDA COMPLETELY ALL AT THE SAME TIME NOW. We are citizens who are free to make our own decisions of whether to stay at home or not. This freedom is OUR RIGHT to make.....NOT THE GOVERNMENT. Stop this tyranny!

AMERICAN OVERSIGHT

Bay	Tourism	You did a disservice to many when you closed rentals of condos in PCB. Many invested their life savings into these condos. We pay yearly taxes and monthly dues along with mortgage payments. Not only did I have to pay what I owed to the great state of Florida but I had living expenses to keep me and my family alive. Rental income would have helped tremendously. People could social distance on the beach and in our condos. I understand you did what you felt was best but it hurt tremendously to the hard working middle class of America. Please reopen . Thank you for hearing me out.
Hillsborough	General	Please reopen restaurants. The businesses and servers are going belly up. We can be adults and take our precautions as we feel necessary. If someone has age or health issues that make them a risk, then they can continue working from home without penalty. Masks are a good first step and restricting numbers also. Thanks Gov D !
Lake	General	I believe it is time to get areas with low Covid19 impact back to work. I an accountant and see many small businesses hit hard to the point they may never recover. Those who are highly susceptible should self isolate for a bit to wait and see the result of a soft opening.
Duval	Healthcare	One day we will have the economic strength back but until then it should be mandatory that every citizen get tested/to have a better control of the potential flair up areas. Forget about inconvenience,boredom. Continuing education is accessible on line but if you have love ones with the virus that is total separation,not to mention if death occurs. It is heartbreaking to have loved ones passed away without their family and friends around them, and also to give a decent burial. Governor, politicians, layperson, would you like that to happen in your family? Are you really aware of the stress placed upon first res ponders, doctors, nurses and the medical field in general? This is like committing mass murder on citizens. Test, test, test and then open. How do I know that the people out there serving me is not infected/and is unaware of it. This is serious, do not play with people's lives. Think seriously before you act.
Seminole	General	I worry about it being too early to open back up. Our second highest day of infection was 2 days ago. I work in personal care and do not have the luxury of social distancing.
Collier	General	I think history will show shutting down the economy over the virus was a huge mistake based on faulty and biased data. All restrictions, which hopefully the courts will rule were unconstitutional in the first place, should be lifted immediately.

AMERICAN OVERSIGHT

Pinellas	Healthcare	I beg of the state as a young man who wants to go back to work as much as the next person to please hold on reopening the state and extending the shut down further. I work in a healthcare office specifically an eye doctors. We are very close to patients faces and I know that my job will be providing minimal PPE, no N95 masks and if reports show even if you have full PPE people in healthcare are still testing positive, getting sick and fighting for their lives. We as healthcare workers that are outside of a hospital unless it's on an emergency basis do not need to be seeing standard patients at this time. We are also more at risk to bring this deadly virus that has killed so many in our state home to our families, wives, husbands and children. The shut down needs to hold. This needs to be done to govern the virus as much as possible and to make sure there will be no spikes in the virus, so we can flatten the curve and return to a somewhat normal way of life in the sun. Please make your decision to reopen this state not thinking about the economy but think about what would happen if you or your loved ones got sick and were dying in a hospital alone and scared without you or you without them. Think of the other states that have extended their stay at home orders and are doing the right thing by thinking of the people and not just flipping the switch. I beg you please keep us home and safe!
Palm Beach	General	Please allow access to parks, beach, and golf courses, with smart distancing and cleaning protocols. It's not any different than walking on a sidewalk or boardwalk and people need to just exercise some good judgement as adults here. Thx.
Palm Beach	Recreation	I need to get my boat out in the ocean to do some fishing. This is a critical time for good fishing. My boat is in the Boynton Beach Inlet Park Marina. I see no reason why my Wife and I cannot get out and fish, we would be several miles off shore. I know there are a lot of idiots that do not follow the glide lines for the virus but why do we all need to suffer!!! The responsible ones should be able to get out and relax from all this stress!!. Also the County will not even let me clean the bottom of my boat, that will cost me two to three times as much once I can get it cleaned. Plus there is always the chance if left unclean there maybe other damage from the barnacles and oysters clinging to the bottom.
Pasco	General	My home town on Long Island has been hit hard. I just talked to some relatives and they said "It's making it's way down there". And I said, "I know, but the idiots sown here are now saying they are opening everything back up". Of course it's the people from the pa[R]ty that caused all this to be 90% worse than it should have been. Along with screwing up the unemployment compensation. I'll never ever vote Republican on anything and tell everyone I see the same. And I'm Independent.

AMERICAN OVERSIGHT

Bay	Education	I work in our school district, most of my job works with preschool aged children and their families. I am a parent of three teenagers. All who are very active in sports and other activities. With that said, I don't believe reopening the state right now is the best idea. Our testing is still limited, and without knowing how many people have it by are asymptomatic, we are not only risking our own citizens, we are risking the health of those who come to visit our state. I know we rely heavily on tourism, but if contact tracing of someone who got infected leads back to a resort, theme park, or beach area, it will cause a huge domino affect in tourism. Follow the federal guidelines, rely on the models that show we are still farther out from being ready, and allow more testing for those who may only have a few symptoms. Our state is not ready to be fully open.
Citrus	Recreation	I manage a small park for SWFMD. It is beyond me why parks were ever closed while the Lowe's and Walmart parking lots look like "Black Friday" each and every day. Yet the covid rate ticks up ever so slowly. It is my belief that the virus has already passed through this area last Dec/Jan. But we can never be sure of that until the antibody test becomes widely available. But it seems The CDC will never allow that. Why is unclear. The peak has past and the hospitals are near empty. I say open everything up until everybody has been exposed and complete the "herd immunity". My thoughts
Osceola	General	You have violated our rights and civil liberties under the Constitution of America. Reopen all religious places immediately. Masks and gloves should be optional. End social distancing immediately. You need to have are least 1 person from the general public from each county on the task force so that the governor and the tadk force receives honest feedback from the public. All elected officials should immediately stopped taking a salary and feed it back into unemployment; make this retroactive from the date of the official shutdown. Suspend property taxes indefinitely; once the state is back up and running smoothly the state can reinstate property taxes; no penalties for non payment and no seeking back taxes. Make sure all small businesses are afforded the necessary financial relief. Theme parks and sports should be the last thing to reopen. Reopen all medical facilities including hospitals, and doctors office immediately. And, above all else admit to the public the virus is NOT as bad as originally announced and that there is 97% recovery rate; the flu is worse, cancer is worse.
Washington	Government	I think all businesses should be allowed to re-open as long as they are able to maintain the 6ft distance requirement. We have to open the economy at this point. There are too many people struggling and Americans are able to use common sense and self awareness to make decisions based on what is best for their family, not the government.

AMERICAN OVERSIGHT

Hillsborough	Management	Opening FL with social distancing protocols, restaurants and brewerys at 50% capacity and opening non essential business with same measures should be sufficient. People have had time to become educated on what it takes to go out in public. There should be no reason to continue a lock down. If people want to stay home, they can but we have to get people back to work and the economy going again.
Lake	General	My husband has diabetes and I am considered “healthy”. If I go to work, I will bring the virus home to him and he has the potential to get very sick. Taking temperatures does not matter since in recent news, patients with COVID did not even have a temperature. If unemployment was being paid, people would be able to go out and go shopping to stimulate the economy.
Palm Beach	Recreation	I work as a scuba instructor, and even though I've been out of work for the last month I believe it is too soon to reopen Florida to outside visitors and close contact activities.
Pinellas	General	Please wait to start reopening Florida until the end of May. Reopening should be done slowly. Require all people to wear masks. Public education should not reopen until the end of the summer, only if data shows that data numbers of COVID have gone way down.
Pinellas	Recreation	Please do not open the pools and beaches. While people in the community may want to access them, it’s going to cause a surge in the number of visitors to Florida. This is going to increase the number of cases we have, and infect the residents of the beach communities. Please keep us safe - keep the pools and beaches closed.
Polk	General	In regards to covid 19. It is now evident that the virus will be here a long time and the shut down of our state is doing harm to the economy as well as the mental health and well being of the citizens. It is time to open the state to normal activities not a new normal not a slow transition. The medical community is equipped to handle it and we can still continue to protect those most vulnerable by continuing their quarantine. Please listen to this video by doctors on the front line and their findings. Thank you. https://youtu.be/xfLVxx_IBLU
Bay	Tourism	I think everyone understands the medical risks involved with this virus. It has been beat into our heads day and night on every media platform there is. Meanwhile, our economy is on the verge of collapse. I own a small business and I am maybe 2 weeks from being done. I retired from public service as a law enforcement officer and spent the last 10 years of my life building a restaurant to fulfill my dream and to leave something for my son. Open the economy back and let the people use their own common sense in assessing their own risk and deciding whether they should go our in public or not.
Palm Beach	Recreation	All of the following with continued distancing guidelines 1) golf courses, public and private should reopen. All golfers should be required to walk (no golf carts). 2) all state and county parks should reopen. Smaller parks/playgrounds should remained closed for now.
Pasco	Tourism	Open Florida’s State Parks - people will maintain social distancing- keep restrooms and pavilions closed- but allow self-contained RV camping. Our parks need our dollars and we need the nature our tax dollars pay for. Parents need a place and space for kids to run and we all need to stay healthy.

AMERICAN OVERSIGHT

Lee	General	I am writing concerning the reopening of Ft. Myers Beach , Lee County Florida. Do to the escalating number of hospital admissions and escalating number of daily deaths In Lee County..... versus the Presidents Guidelines of a 14 day steady decline in these numbers .....it is not advisable to open Lee County , Sanibel or Ft. Myers Beach/ Estero Island at this time. To do so will mean that this virus will continue to spread. At this time our country's health professionals all advise that the state of Florida will not be healthy enough to reopen until mid June..... I urge you to please consider what science and and Dr.Fouci strongly recommend and that is to follow the 14 day rule that the numbers must steadily decline which is not happening at this time. If you move to fast we will just have to repeat on this all again.
Marion	Professional Services	If business can follow social distancing guidelines they should be able to open in order to support their livelihood. The task force should figure out a way that there is oversight to ensure everyone's health and safety.
Seminole	General	We cannot even consider opening the economy until we know how many cases we have and that the numbers are falling. , we also need an accurate antibody test to see who has had it. Once we know our cases are falling we can reopen businesses that can perform their functions without ,close personal contacts e.g. auto repair, retail store pickups, yard services, construction. Gyms, hair salons massage parlors, dine in restaurants must remain shuttered until new cases reach the bottom of the curve. Face covering in public should be mandatory
Broward	General	Every day the number of cases increase in South Florida , so how is that safe to open everything up? I understand that there is more testing being done which could account for the rise in cases, but the death count continues to rise and that is not because of ramped up testing. Of course we'd all like to get back to normal but let's do it safely without going backwards and having many more people infected or die!
Polk	General	Please do not endanger people just to re-open the economy. The large majority of people are AGAINST opening the economy. While it is a tough time for everyone involved, opening the economy earlier than necessary for health reasons would damage the economy more than it would help it. If we re-open, inevitably (backed by scientific data models) we will have another outbreak and will have to go into quarantine or risk the impacts that were seen in NYC or Italy. This costs businesses so much money because they would have to re-start their businesses only to shut them down again. The BEST thing you can do for us is get the unemployment money to the hundreds of thousands of Floridians who are struggling without paychecks right now.

AMERICAN OVERSIGHT

Brevard	General	The state should reopen when it is safe to do so. People that have been out of work shouldn't be forced back into an unsafe environment because they have to pay bills and unemployment is non functional. Single parents of children are also having a terrible time. I agree schools should remain closed the remainder of the year, but what help is there for parents of these children we can't leave home alone and have few options for sitters in the time of social distancing. Stay closed until we know what's best and move cautiously.. but on the unemployment from enough is enough. its time to bust out the rubber stamp. to many people have been left high and dry in the worst time possible because this is how floridas unemployment was designed to work...to frustrate people into not seeking benefits. the DEO's inability to solve the problem calls for a rash solution. Auto approve all the claims as a solution to the 6 weeks of unsatisfactory action and asking people to wait. No more. we are starving and following the damn rules and there is no help for us.
Volusia	Education	As the mother of an asthmatic child, please, consider how vulnerable children are right now. It scares me to think of people just going right back to "normal" and the possibilities of reinfection or a worse 2nd wave. People don'e understand this virus. Let's take the 1000+ deaths here in Florida as a reason to be cautious and learn more about it before finding our "NEW NORMAL". Please, don't take the loss of lives as a reason to move on. We need to slow down and learn from this before losing MORE! ESPECIALLY CHILDREN!
Marion	General	I am a nurse in a local hospital. I have been watching the daily reports from FL Dept of Health and am concerned about the number of positive cases that seem to have risen in the last few days and hope that the lower numbers prior to the last few days aren't a false sense of people thinking the peak has already happened. In my county alone, our cases have risen by 20 new cases in about 3 days. While I realize that people want and need to get back to work, I beg of you to NOT re-open the everything in the state all at once. Please follow the President's task force guidelines and reopen things slowly. Lets not have a new, worse surge of positive cases.
Walton	Tourism	I am all for opening up Florida again. I would love for you to keep a ban on the short term rentals until the middle of May at least if not longer. I live in Destin and when the tourists get the green light we are going to have so many people here from all over US. We will have no food or supplies for locals and they will over run the beaches. Yes this is the norm but right now we do not have enough food or supplies in the stores for the locals so if you could just give us a break from the influx that would be awesome!! I am all for opening back up but please do it slowly!!!
Pasco	Healthcare	This disease has been overhyped. The numbers are not supporting the reaction. We have reached the point where it has become a political attack on our economy. People are suffering economically, going through their savings and losing everything they have worked for.
Escambia	Wholesale	Please reopen our economy. I have been on unemployment for over five weeks and haven’t got a dime. I want to go back to work. If you don’t reopen Florida May 1st I definitely won’t vote for you again.
Orange	General	Open NOW!

AMERICAN OVERSIGHT

Broward	General	I don't think anything should be opened up yet I think it was a mistake to open the beaches in Northern Florida everybody and their brother from everywhere are going to flock to the beach and I can't see enforcement is going to be able to keep them safe distance. I would not open up any places like restaurants are anything just yet. Maybe to start out with guess small parks where no larger than 10 people can gather and stay at a safe distance. The reopening of Southern Florida would be a big mistake. Do not open or relax the restrictions on to the death toll in that area is down to zero. One life is not worth the economy. The government has plenty of money to take care of us. And what about all the government officials especially those that make a lot of money a year to take care of this country. Why don't they chip in something I know they got millions.
Sarasota	General	I do not feel non essential businesses should open up yet. I also feel anywhere people can gather should not be opened. Schools are already closed to students for the remainder of this year... grocery stores are doing well keeping us fed... but I am worried about the people not distancing themselves and causing others to get sick.
Orange	Government	Dear Governor Desantis, Please open the following industries: retail shopping, restaurants for seating, state parks, beaches for public parking. People need to get outside and the unemployment is too high. If we can social distance in Walmart and grocery stores. We can social distance in shopping centers. Our children should be able to play at playgrounds and public parks since schools are meeting online. People need to get out of their homes and back to work. Medical professionals around the country are showing low mortality rates. We need to open like the rest of the southern states. Keep groups under 100. Thank you for your work and we look forward to the state reopening on May 1.
Miami-Dade	General	If you must reopen, do so if and only the health experts agree it is safe to do so. We gain nothing by reopening and having to go back into lock down a few weeks later. Testing should be mandatory across each and every sector of the economy before they open to the general population.

AMERICAN OVERSIGHT

Duval	General	New studies have suggested the infection rate is at least 50X higher than current models show. This data brings the death rate to the area of .1% for Covid 19. As of today, April 25, CDC is reporting 895,766 total cases in the US and 50,439 deaths (which we know are inflated numbers). Compared to the number for last season's Flu "CDC estimates that the burden of illness during the 2018–2019 season included an estimated 35.5 million people getting sick with influenza, 16.5 million people going to a health care provider for their illness, 490,600 hospitalizations, and 34,200 deaths from influenza" it clearly shows our healthcare systems can handle an increase in the number of patients. Healthcare workers are being furloughed or laid off because we don't need them. We have shut down our entire country and economy for something that is slightly worse than the yearly Flu? While I understand that each and every death to this virus is not a good thing, the virus will eventually make it around to almost everyone. Staying home and having no contact with the outside world other than supply delivery has not even proven to be 100% effective since studies have shown the virus can live on surfaces for several hours. How long do we expect people to live like this? The virus isn't going away and people will die from other consequences due to being essentially on home arrest. It is time to do more testing, with both PCR and antibody methods, and see what the real data shows. It is time for scientists, medical professionals, and population health experts to do large scale research on the general population. While it may be true that there are no tests available that can detect or diagnose SARS-Cov-2 accurately 100% of the time, that should not preclude testing individuals repeatedly until an accurate answer is obtained via either method. The testing floodgates are about to open as new tests gain EUA from the FDA. Buy them, use them, and get real data from them. If the data is questioned, test again. These tests are inexpensive and are supposed to be used in conjunction with each other. The PCR detects the virus while the patient has active infection/symptoms, and the antibody test detects the antibodies around 12 days after the patient started to develop symptoms. Providers can build data based upon repeated testing with the two methods. Nobody knows how long a high level of antibodies remain in the body, nor do they know if they make you "immune" or partially immune to reinfection. Those answers will only come after follow-
Hillsborough	General	While we all recognize that “staying at home” is not a long term solution to the pandemic, we do not want to undo the good we have done over the last 5 weeks to “flatten the curve.” That being said, I think that tests being available to all whose doctors order them is a required first step in opening the state. Once we have the tests available, we can reopen in the reverse of the way we closed, starting with retail business that are not essential but that can maintain 6 foot social distancing and ending with bars but still requiring social distancing and reduced capacities. The state should establish a protocol for hand washing, disinfecting surfaces, use of face masks and gloves so businesses can be sure they are following the best requirements for protecting employees and customers. People over 60 or with underlying conditions should be cautioned to continue to avoid being close to others as much as possible. Thank you for everything the governments have done to help people stay safe during this health crisis.

AMERICAN OVERSIGHT

Pinellas	General	Ideas for opening Florida safely should include - wearing face coverings (requirement); allow restaurants and hotels to open but with strict guidelines; keep beaches closed through May and when open only for exercise (walk, swim, surf - no sunbathing or sitting) and 6ft apart from others unless a family; no schools; colleges until Fall and then with strict guidelines; parks ok but with social distancing; elective surgeries by June; please wait for cases to drop for 14 consecutive days as recommended by president/CDC; limit/monitor who is entering our state and perhaps keep closed through July; Floridians have worked so hard to stay home to save lives, we don't want to rush this and undo all that we have worked so hard for. Finally, please allow anyone to be tested that wants it, whether symptomatic or not. If not possible allow those over 60 to be tested. WE ARE PRAYING FOR YOU!!!!
Volusia	General	Please DO NOT mandate any sort of face mask law. The local police have enough serious issues to deal with in their communities without having this added on. This also lends itself to "selective" enforcement throughout the state where some authorities will be heavy handed and others will not which, in the end, is unfair to the average citizen. Another issue with face masks is the fact that some people cannot wear them due to medical or psychological reasons. I, for example, have asthma and would rather not wear a mask. I have read about other face mask laws enacted in other areas of the country that include a medical exemption, but, this puts the constant burden on the individual that can claim this to prove his/her situation every time they want to go out somewhere. This , again , is not fair and can be avoided altogether by not making face masks mandatory. I believe that enough of the public is already wearing face masks voluntarily and, along with social distancing, will be enough to curb the effects of this virus.
Gadsden	Government	As I miss going to my gym and my salon, I cannot possibly imagine how social distancing can be obtained. It simply cannot be done! It just increases the chance for growth of corona cases and while, as I said, I do miss these luxuries, I absolutely will not be participating in these and other close contact businesses. This is Economy v. Population! These suggestions are irresponsible, not intelligently given and extremely dangerous. Please rethink the consequences of such decisions. I appreciate the opportunity to voice my opinion.
Clay	Recreation	Open the parks allow us to maintain social distancing practices. I think if we take it slowly opening up we will see how other states will do opening up and how society is impacted by coronavirus. I think we should be mindful of our elderly and sick in the communities and should protect them. I think opening up without any point of reference is not a wise decision and we should closely follow the heavily populated areas before we jump the gun. Stimulus payments until the poor can get back to work and funding for small businesses is a must right now. We are in this together

AMERICAN OVERSIGHT

Pasco	General	Open Florida up the more testing we do the numbers will continue to rise. The virus isnt going to go away and we need to get a life back. We need to work and build antibodies in the process. Open us back up and just use common sense when going out.
Seminole	Healthcare	Please re-open the economy. We need elective surgery open to save lives and save jobs. Doctors in medical offices can undertake measures for safe social distancing to treat patients for essential and nonessential conditions. It has been shown that we have plenty of capacity in the hospitals and we are under all of the lowest part of the curves on predictive models. There are ample supplies of PPE. Central Florida has been well positioned and has four straight weeks of declining new cases. Consider opening up central Florida and northern Florida and panhandle first. Dade, Broward and Palm Beach counties can be a slower approach. let's get the economy going again and let doctors treat patients. Dr. Edward Gross Lake Mary, FL
Marion	Professional Services	Florida needs to re open now. I have seen way more people who have hit rock bottom and are barely making it through the day without job income and unable to feed their families. Corona cases in Marion county are few. More people are on suicide watch and severe depression state of minds. We need to get back to some normalcy. End it on April 30th please!!!!

AMERICAN OVERSIGHT

Miami-Dade	General	There is no doubt in my mind that something needs to be done so our economy can begin to heal. But cases rise each day and if people aren't practicing social distancing right now during quarantine, they sure aren't going to do it when business reopens and we can expect another surge of cases to come our way that may warrant another lockdown. People are so stir crazy right now they're not respecting the laws in place now. As a service industry worker, I feel like I can speak for most of my co workers and basically anyone else who is unemployed when I say that Florida's unemployment assistance program is probably the worst in the country. I've heard from multiple people that they've been denied because they've quit jobs last year. Is no one ever supposed to break the ceiling and reach for better opportunities? And what if those opportunities aren't what we thought they would be? A lot of residents are needing to verify their identity and told to call a 888-993-9713 only have busy lines all day and to be hung up on while waiting. I PERSONALLY have called 73 times in one hour and was never able to reach someone. I have been put on hold to speak to a representative for 1 hour and 22 mins and then was hung up on with no call back service. Office hours are from 7:30 am to 5pm. I woke up at 7:00 am to be ready to call when they open, at 7:30 on the for it said all lines are busy. For the influx of applicants trying to receive assistance, there is absolutely NO REASON why the office hours shouldn't include weekends and nights. There will be more cases. And most likely we will need to be quarantined again. But I need to have trust that the state I was born and raised in and that I love is ready and willing to have my back rather than just look for a simple way out. Reopening the state seems like such a quick solution to go ahead and get people off unemployment. The system is broken and desperately needs to be fixed. God forbid, something like this happens again (which it will) and we are right back to where we started.
Pinellas	General	The Task Force should include healthcare experts, not just business and city leaders. Deciding when our state should reopen needs their valuable expertise! I pray our state does not reopen until the curve is flattened! Even when reopened, I am not sure when I will feel I can go back to a baseball game, Disney, a restaurant and even a grocery store!
Hillsborough	Technology	Please Don't reopen till june
Collier	General	Do NOT reopen yet. We will just prolong this outbreak and cause more deaths. Follow science!!!!
Volusia	Tourism	I don't think that the non-essential business', that are closed in Florida, should be opened until at least June 20th, 2020.
Broward	Real Estate	We living on the boardwalk area. All beaches here is closed and potruled by the HPD. We have no other chance then go to the back streets just to walk. People walking here keep the distance and do everething they should to keep it safe and there is no reason to keep all beaches closed. The freash sea air newer make anyone sick.
Miami-Dade	Education	I would really like to continue my fire academy along my paramedic classes.
Volusia	Healthcare	Stay at home order should stay in effect until new c19 is on the down ward swing for 2 weeks

AMERICAN OVERSIGHT

Collier	Retail	Please reopen Florida! Business owner are bleeding profusely with no help from the government. How do you expect us all to pay our bills and employees? This so called virus was a statistical nightmare and the people are paying for your mistakes. Our son works in the ER with direct patient care and has had his hours reduced because hospitals are so slow in Naples. Please Open Now!
Miami-Dade	Healthcare	Please open gyms and restaurants with social distancing regulations.
Palm Beach	Professional Services	The non essential businesses need to open up now! It's not different than going to Publix or Walmart or a bank. You take precautions and wear a mask. They should be allowed to open with certain guidelines. If not the economy is going to be really bad. These people need to pay their bills just like essential workers
Pinellas	General	I Think a SWOT analysis approach should be taken on the re-opening. 1. Strengths a.) Adequate hospital beds b.) Adequate staffing c.) Adequate PPE d.)Testing ongoing and has been increasing e.)Task force has variety of experts to contribute information-reserves, tracking, etc 2. Weaknesses a.) Unemployement and delays in benefits b.)Amount of elderly nsg homes, alf's etc c.) People traveling from other states d.) Antibody testing o help identify workers able to return e.) Media broadcasting false information contributing to resistance of public to adhere CDC f.) Public health at risk chronic diseases to go to PCP, routine labs, etc. 3. Opportunities a.) Public practice changes- washing hands more freq- masks social distancing, etc b.) Business opportunities for employees working from home - cuts down travel- good for eco system- indirect costs on businesses utilizing technology reducing costs travel- meetings- etc c.) Antibody testing on a priority basis when available d.)Need to re-open on priority basis- 1. PCP providers and educating people this is safe healthcare practices to prevent non COVID hospitalizations. 2. Procedures and surgeries based upon MD assessments of medical needs using CDC precautions 3.Dental offices based upon dentist assessment of patient needs 4. After assessment of these if maintenance of stability then go to the next stage 1. Hair and barber shops with restrictions of scheduling # people-

AMERICAN OVERSIGHT

Hillsborough	General	I believe we should reopen FL. The original models were exponentially and woefully wrong. More current statistics indicate the virus is more prevalent and the death rate much lower than previously thought. People want to get back to work. They need to be able to support and feed their families. The federal government (tax payers) cannot afford to bail out our economy. We need to restart commerce and the service industry. People take risks everyday... driving, working, participating in recreation and even when walking their dogs. It is terrible that people have died. But how many have died of “the flu” and other things since January? People who are high risk can continue to act accordingly. Our national response to this has been an over reach and it needs to stop. The Bill of Rights and Constitution don’t get to be suspended - even for a pandemic. It is time to let Florida and America get back to work and life. Please follow Governor Kemp’s example. Thank you.
Polk	General	Do not allow the re-open yet. It's going against the CDC. Keep the state close before we kill our people here. We have been warned and we need to remain closed until July and maybe beyond that. Better safe than sorry
Hillsborough	General	Need an order to mandate waiver of all penalties, fees, interest assessed during COVID-19 and specify date range...TECO and many others acting as if there is no policy on payment deferrals and considering charging interest, fees, and/or penalties for late payments without a grace period...RIDICULOUS!!! On May 1st people who have had ZERO opportunity to generate income can not miraculously pay invoices on May 2nd....a grave period for all invoices due since 3/10/20 should be implemented through 6/15/20!!!! Set a policy to STOP the bleeding...people and businesses can’t operate without utilities and shouldn’t been penalized by IGNORANT and HEARTLESS vendors!!!!
Miami-Dade	Government	To remain safe we need to check everyone's temperature All entrance of business and churches . Full face mask mandatory everywhere including parks. Hand sanitizer everywhere n mask available everywhere. This is the only way I think it will work. Social distancing is a must
Seminole	General	Second attempt as my first attempt did not appear to be submitted. Rather than retyping everything I said previously, my summary comment is this: I support an immediate phased reopening of Florida with low risk business opening first and providing a model and lessons learned to higher risk business. 'Stay at Home' was meant to 'spread the curve' not to eliminate the virus. The curve has been spread and it is time to re-open Florida.
Orange	General	I think gyms, restaurants, stores, and movie theaters should be allowed to open with the stipulation that they encourage social distancing and limit the number of people allowed inside at the same time. People should also be encouraged to wear masks in public. Workplaces should encourage teleworking as much as possible. Bars don't need to be open at this time, though. It's tough to remember to stay socially distant when under the influence of alcohol.

AMERICAN OVERSIGHT

Hillsborough	General	In order to re-open Florida we should focus on the people first. Health-wise I do not believe Florida and the rest of the United States is ready to be “opened”. I get that opening the economy will create jobs once again, but doing so early will put people’s health’s at risk. So right now you should focus on how you can help ease the economic and emotional suffering of Floridians, without risking millions of lives. A rent freeze should be put in place, due to the incredible systemic failure the DEO has been experiencing. An eviction moratorium does nothing for those who have not earned any income during this difficult time. You CANNOT expect someone to have multiple months rent money readily available at the end of this. We simply cannot afford it, and you are just prolonging the inevitable loss of homes. We may have a roof over our heads now, but you can be assured we are suffering emotionally under them.
Brevard	General	Please consider the impact on those who are most at risk for covid 19 before reopening People are still flocking to our beaches, parking at stores and walking over, I forseethis increasing and in a few months back in quarantine due to more cases Please consider us
Walton	General	Reopen Florida Common sense can be used. Masks, social distancing so forth. If someone feels unsafe, stay at home! Give me back my Constitutional rights to live free or die!!!! Our country can not take much more of this! The political side of this is feeding right into the tyranny democrats!
Collier	Healthcare	As a nurse, I understand the need to flatten the curve to help the health care system. However, I do see the need to reopen the state and still monitor the virus. The public needs to have a sense of responsibility by following hand hygiene, staying home when ill and seeking medical attention when appropriate. The amount of testing being done is great but people are focused on the numbers and models when they don’t tell the whole story. This is especially true when the media use the numbers as a scare tactic. This virus is important to look at and the first round of mitigation efforts were very impactful. We know a lot more about the virus now and know what can be done if others in the future become ill. It is time to get back to normal with a phased approach that is deliberate. I do not agree with required face masks/coverings when going out in the public. People need to wash hands and use hand sanitizer. Thank you for taking the time to read my comment.
Palm Beach	General	I hope that public spaces (parks, walking trails, beaches, etc) are opened soon. When those areas were taken away, people had less areas to walk/run in. The sidewalks are more crowded than they need to be. And exercise is important in managing most health conditions, so it's an important part of reducing stress on hospitals and reducing mortality numbers. Until PPE is widely available (and we're not reusing or overusing disposable PPE), I hope that we hold off on opening businesses that will require PPE to operate. I do like the model of opening Low Risk, More Essential businesses first and High Risk, Less Essential businesses last.

AMERICAN OVERSIGHT

Manatee	General	Covid-19 suggestions: Open back up restaurants with more spacing between tables, servers to be wearing masks. Open back up personal services like hair, nails, and spas, as long as both client and professional are wearing masks. Masks should be mandatory while shopping in stores, but all stores should be opened back up again. Get everyone with symptoms tested, no matter the severity of symptoms, and administer antibody tests to the general public to see how much of the public has previously been infected. We need to develop 'herd immunity' like Sweden is doing. Of course extra precautions need to be taken to protect high risk people. People who can work from home should continue to do so, but businesses should be allowed to re-open. Also, tourism needs to get back on track, as the FL economy depends on it. We need to develop some way of verifying that tourists have recently tested negative or have had a positive anti-body test prior to visiting.
Escambia	Tourism	I don't envy you your job at this time. As a manager of a high rise condominium that does not do in-house rentals, but rather has independent rental entities operating in our property, I am very concerned for the health of my staff by opening up to tourists. I think the primary goal should be to get the unemployment claims paid so people can eat, which I feel would give a bit more breathing room to truly evaluate the situation. Opening up businesses to the locals could be done, still with the social distancing. My concerns are, if we do open to tourists, and the situations spirals down, would we be able to initiate stay-at-home orders again? I feel, once the unemployed are taken care of, small steps should be taken that can be more easily reversed. It will be incredibly hard to put the genie back in the bottle if we open too soon. Getting the unemployed paid is paramount to these small steps being able to happen. Good luck. You are between the proverbial rock and a hard place.
Manatee	Education	I do not feel it is safe to open state yet. I live in a neighborhood of 600 homes and many people have not taken social distancing serious, so I can only imagine how bad it may get!!! They congreate in driveways visiting, allow their children to play with their friends, etc. People in general are very selfish!!! Grocery Sores and other essential places are packed with people not taking this seriously. Also, one of my biggest concerns is that my daughter is a hair stylist and her boss wants to reopen May 1. He has no shields for them, disposable gloves or aprons!!!! Salons should definately not be open in phase 1 or 2!!! They have to touch people when they cut yheir hair. This is putting my daughter's life at stake!!! They have as much exposure as our health care workers!!!

AMERICAN OVERSIGHT

Hillsborough	Professional Services	I am a small business owner here in Tampa Florida. My shop is a 2 year old alteration and tailoring business. I closed my business down on February 20th (before any of the restrictions began) because I had people coming in who had been internationally traveling and in my line of work I cannot stand 6 feet away to pin clothing for alterations. My husband was laid off from his job as a line cook February 17th. Our income is extremely limited at this moment, so we have been making and selling cloth masks with 0 contact in order to keep our lights on. With EVERYTHING said, I do not think we should reopen, I do not plan to reopen my doors to the public until I feel safe. Every time I go to the store I see people who have no regards for social distancing guide lines and to think that everyone in this community will adhere to it is not a reality. Please keep our families safe and do NOT REOPEN!
Orange	General	-Fix unemployment -More comprehensive COVID tracking and testing -No reopening until the six WHO guidelines are met
Broward	Tourism	Please consider the long term effects of opening specific areas. While the state was slow to close down beaches and react we should be among the states in positive and clear reopening statement. This should be a task guided by science and medical professionals not just political and businessmen. We do not want a longer home isolation or a second round of this to occur. In my opinion stay home policies should stay in place until the numbers begin to drop more. As the number is on a steady decline is when considerations for some places should open up. Please be smart in how and when we reopen businesses and an effort of social distancing should remain in place for all.
Miami-Dade	General	Do NOT re-open until everyone in the county can be tested for free and the cases are down considerably.
Martin	Recreation	Closing beaches was an overreach in implementation of restrictions due to current pandemic. It seems to be quite unlikely to get infected while walking on the beach where intense sun exposure and UV effectively kills viruses, Covid 19 included. Also, as science proves, sun exposure promotes production of vitamin D that is essential (how we love this word lately!) to strengthen human immune system that is essential in fight against the virus. There are many benefits of beach activities that are great contribution to our physical and mental health. For this reason, I hope that our beaches in Martin County will be open very soon for the enjoyment and health of our Martin residents.

AMERICAN OVERSIGHT

Bay	General	I believe it is time to reopen Florida. I have been lucky due to my husband being deemed essential and has been able to work but I see the struggle many are having. People need and want to work to provide for their families and need the freedom to do so. If we can social distance in ig chain stores we can also do so in small businesses. If people are at higher risk or are scared let them stay home but it should be our right as American citizens to be able to choose. The government cannot continue to spend money the country doesn't have it us not responsible. If no one is working and paying taxes then there is no money. We need to do something to prevent the country from going broke and getting to a point of no return. We cannot let the fix to this pandemic hurt us more than getting sick and right now that's the path we are on. What are we going to do if we stay like this, people go broke then we get hit with another Hurricane Michael we would never recover. Thank you for allowing us to share our opinions.
Collier	Healthcare	Please put as much resources as possible into testing for CV!! For everyone not just people showing symptoms of the virus. No business should be open without this in place!! Make masks mandatory!! More PPE Please keep us all safe!! Listen to healthcare officials very carefully!! You are a great governor don't let that change by opening FL too soon!! Sincerely, Angelina Sullivan
Marion	Government	Given the inadequate levels of community testing and the delayed reporting of actual testing data, I would feel personally safest if the state took it's time to reopen fully. There should be county-wide testing for all residents. In a fury to reopen so as to save face or political capital, I do not trust the current direction of state leadership to do this in a thought-out and organized manner. There was too long a delay in shuttering our state and as such there are thousands of Floridians who have now been adversely affected by this pandemic. It's time to grow up, stop being worried about a reelection cycle and take command of the agencies that we elected leaders to run on our behalf. The state works for me.
Orange	General	The state should NOT open!!! This is ridiculous. Yes, there are businesses big and small who are struggling. Mostly, small business. However, by opening up the state people will never get the chance to actually live a normal life as possible. Even more people will get sick as they continue to do so, and there's a very high chance that those who were already infected could get infected again. I honestly don't understand why Florida can't be a normal state with common sense. It's as if you people never actually got an education or have even study anything within governing a state and so on. This is a time to really think about what is most convenient for all of us!! I think all businesses should continue operating but have very few in office and the rest working at home. Just how certain people are doing. Common sense doesn't seem to be in anyone of you officials other than Omari Hardy. PUT HIM IN CHARGE!! He seems to be the only one who cares, and wants to help, AND ACTUALLY HAS COMMON SENSE!!!

AMERICAN OVERSIGHT

Brevard	General	Florida should stay at home until there is a clear flattening of the curve. We are now seeing a gradual decline in the number of new cases. This is a direct result of the quarantine measures which are currently in place. There exists no effective treatment or vaccine for this virus. Opening the state before there is a clear herd immunity present or a vaccine has been developed only puts more residents at risk and puts us all in danger of a resurgence in the number of new cases. Listening to our Commander in Chief suggest, on National TV, that a way to inject bleach into folks should be investigated only makes it more clear that we have to take care of ourselves and that we can't rely on help from the outside.
Pinellas	Professional Services	Dear Governor DeSantis, Thank you for everything your doing for our great state of Florida. As a licensed massage therapist, we our regulated by the Florida Department of Health. Those of us that are sole owner therapists, usually only have 1 client at a time in our room or office. We must clean and disinfect our massage tables as well as wash our hands and clean our room surfaces and equipment before and after each client. I feel that we can maintain the safety of our clients and ourselves also by having us wear masks during the massage. I personally do not work on anyone if I am sick or not feeling well and reschedule a client if they come to the office not feeling well or sick. Please Governor DeSantis I ask that you consider allowing us to open up and perform massage. Thank you for your consideration, Jim Proctor III LMT
Hillsborough	General	We have done the bare minimum and the elected officials in each county have done more to contain the spread than the governors off office has done. This is insured to start opening beaches and public gathering places. Just because our federal and state governments don't see this as an issue, doesn't mean the local government does. Please do not be overly excited to "get things back to normal" before the time is right. Testing is not nearly as available as you claim and people are still dying!
Hillsborough	Professional Services	It is high time that we look at the actual stats, not the media-driven stats which support partisan political narratives. The data does not dictate the continuance of stay-at-home orders and the further decline of our economy. It is perplexing that fear now defines the American culture when facing a virus that is turning out to be flu-like in every legitimate sense of the word. Trust me when I say that truly educated, non-conspiracy oriented voters are paying attention and we will use the actions and reactions of our leaders to determine how we vote. Re-open Florida. Those who remain in fear are more than welcome to stay at home; however, you will quickly realize how few will do so once things begin to move towards some semblance of normalcy.

AMERICAN OVERSIGHT

Miami-Dade	General	I am a furloughed nurse at an ambulatory care facility that is likely to open soon once elective surgeries resume. I've been at home helping my 2nd & 5th grade daughters navigate home school. My husband has been at work with transit as a bus operator. We've been stressed as we realize that in order for me to return to work, he'd need to request time off on his end. Our employers do not seem to be very flexible when it comes to assisting us through this situation. When he asks about the 2/3 pay granted to parents that can't work due to school closures, he gets the run around. I don't qualify for it because my employer has over 500 employees. When I asked my HR if I would lose my job if I couldn't return to work due to school closures, they offered me no reassurance. They told me that they could not answer that. We need help with job protection as well as with child care options. This is a big stressor for a set of working parents who's jobs cannot be done remotely. Also, once businesses start to open up & more people are commuting, it is important to maintain strict rules in terms of masks and limited passengers on the buses in order to protect our drivers and limit the spread of COVID 19 in the community. Thank you for all that you are doing. Stay safe.
Hillsborough	General	Its still too early to re-open the state.
Pinellas	General	1) We MUST MUST MUST do antibody testing (using FDA approved tests that measure quantity of antibodies) for all workers returning to work (or AT LEAST for those most at risk, 65+ and underlying conditions to protect them). On fact many people would gladly pay to be tested, I know I would! Those who are positive can return to work AND donate plasma to treat sick patients. All POSITIVES!!! 2) Need to open VERY slowly once the Florida curve is confirmed to be headed down a good bit - but we are not there yet!!! However folks that get tested and show antibodies can return now. 3) Open the more essential businesses first and leave politics and lobbying out of the decision process. Or you will lose all credibility.
Broward	Professional Services	It concerns me that we are talking about re-opening the state. There is too much unknown about the disease, including reoccurrence and we put our lives at risk every time we go out. If you re-open the state we will be forcing our people to return to offices that have proven work can be done from home and therefore disregarding human life in the name of economics. Please keep to essential services and consider our health. I do not want to open our state until medical authorities say it is safe to do so.
Lake	General	I think we should be closed until at least June 1st and no one should be allowed into a public place without a face mask until then. This disease is no joke.
Brevard	General	Please reopen the state! I need to work to be able to provide for my family. My husband lost his job to this nonsense and enough is enough! At this point if people are concerned they will get sick then they should stay home. I believe not everyone should have to stay home. Thank you for your time!

AMERICAN OVERSIGHT

Duval	General	I urge the state officials to not be to hasty to reopen businesses in Florida potentially causing a dramatic rise in cases of Covid 19 ultimately resulting in more deaths and delays in stabilizing our economy.
Pinellas	General	Please re open and get our economy going again. I believe data shows we can do this with a safe, measured approach. I would love our beaches and restaurants to be open again while social distancing. While medical officials and scientists input is of utmost importance, what they believe varies widely so I think its best to make a decision using a data driven process, not fear or modeling or what ifs. Also, people need to understand that we can hide in our houses forever but the virus isn't going away. Thank you for allowing my input. I believe Governor DeSantis and his administration has done a great job managing this crisis.
Miami-Dade	General	Please apply for all federal money to help florida citizens who have no income. Demand forbearance and repayment plans for citizens with all florida lenders who have received bailout money from the federal government. Do not open our state until medical experts, doctors and scientists advise that it is okay. Use phased reopening of businesses with limited capacity...telecommute when possible. Continue social distance/mask requirements, do not allow large gatherings, prepare schools for potential distance learning in fall. Thanks.
Hillsborough	Government	Dear Governor DeSantis, I am a resident of Hillsborough County. It is time for Floridians to get back to work. Throughout the past weeks of COVID restrictions businesses deemed “essential” remained open. Floridians who patronized those businesses voluntarily engaged in social distancing, voluntarily followed CDC guidelines. With these businesses open, sometimes serving hundreds of people at a time, twelve hours a day, seven days a week, we have witnessed COVID numbers falling. The State of South Dakota never mandated a single business closed and are also seeing COVID numbers falling. Every business is essential when families are dependent upon that income for healthy and happy lives. I believe these facts prove that Floridians are responsible people, who love their neighbors, and will CHOOSE to do the right thing. But we need our elected representatives to do the right thing; we need our businesses open. We don’t want government handouts. We want to get back to work. We want our businesses open now, not later.
Lee	General	I can officially say that the governor has lost my vote next election. Open the economy for goodness sake. Not my governor. I don’t believe in the government anyway.

AMERICAN OVERSIGHT

Pasco	General	I believe the biggest obstacle we face to reopening the state is the general lack of understanding of the effort to flatten the curve. Even though COVID-19 case data is available to the public in a dashboard, people still feel like we're facing an extinction-level crisis. I believe one way to improve the accuracy of the common perception of our situation is to include data about the current availability of ICU and regular hospital beds in the dashboard and in your reports to the media. You should also connect your policy to that data and make it clear to the public that openings are contingent upon the curve remaining flat enough not to overwhelm the healthcare system. If the healthcare system in a county is in danger of being overwhelmed, you should selectively close that county. If a certain threshold of counties require closure, close the whole state. The big thing is tying the policy to the data and making the data available to the public and media outlets in an unambiguous form so people don't feel like you're making an arbitrary or politically motivated decision.
Volusia	General	As the owner of a swim team who has been shut down for six weeks now, I feel it is time to open everything while utilizing the distancing measures and enhanced cleanliness guidelines. The initial purpose of shut down was to slow the spread so that hospitals would not be overwhelmed. Mission accomplished, the goal was not to prevent death, that is impossible. Now we have to honestly look at the facts and science. It is impossible to prevent the spread, whether we open up now or prolong this for 12 months, everyone will eventually be exposed and unfortunately those pre disposed to a fatal outcome will only be prolonged. The numbers are the numbers. Three separate studies USC/UCLA, NY and MA have all done controlled studies that each showed similar results, roughly 18% of those exposed will catch Covid 19 of those only a small percentage are symptomatic with a .005 mortality rate. Sweden never closed and used simple social distancing measures and they are now under 20 deaths per day on a population 10.5 million. They did not wreck their economy because of faulty data and advice early on, and they are almost completely thru the event. The unintended consequences, economic ruin, increased suicides, domestic violence, drug abuse, despair and soon possibly increased crime and civil unrest are not worth prolonging this any further. We unfortunately are going to get to whatever number of deaths that are going to occur either now or in 12 or so months, but at least if we open now, we can prevent some or most of the secondary effects. Logically, how is going to the supermarket, drug store, c-store, liquor or hardware store significantly more safe than going to my favorite restaurant, laying at the beach or going to work. This overreaction has gone on long enough. Let those who wish to live, live and those who need or want further protection, the elderly, or at risk individuals choose their path of self isolation. Enough is enough, the time is now. I drove down to Flagler Ave in NSB this afternoon, there we hundreds walking on the beach and up and down Flagler, other than people not being able to enter a business, you wouldn't even know there was a Virus. The people are ready and itching to get back to normalcy. PLEASE!

AMERICAN OVERSIGHT

Escambia	General	Dear Governor DeSantis, Thank you for the opportunity to have a voice in the steps our Florida will be taking to rebound after the Wuhan Covid19 pandemic. First I would would tell you of our overwhelming gratitude and love for all Floridians who sheltered in, cared for the sick, protected our communities, and made incredibly difficult decisions regarding the welfare for us all. We have a son whose health would be devastated by this plague due to preexisting conditions. We have sheltered in since mid January and are perfectly happy with remaining so....our appreciation for the accommodations given for us to do so is boundless. While saying this, we do believe that our economy can not reach the point of no return. We have lived long enough to know this complete shuttering of our state and country cannot continue. After the economic fallout resulting in the now famously idiotic reactions to banking and finance, such as “cash for clunkers “ we have to realize the devastation left in this wake of joblessness and dependency on government cannot be cured whimsically..or based on fear or politics. You see, Governor, we have a son with medical challenges, but we lost a beautifully healthy son resulting from the financial crises of the mid 2000s. Loosing a job, a career, while trying to provide for your wife and children proves to be a “silent” killer as well. Addressing needs for those still needing to shutter...and it is very simple using common sense...and allowing men and women provide for their families at this juncture is the most important concern and must be expedited. Our hearts are breaking for those with businesses and those without jobs...from experience we can tell you the loss of life suffered from economic darkness cannot be comforted. Most importantly, we need our churches. We need to be buoyed up by our faith and in prayer. May God bless you in these difficult decisions ahead for you. Please remember this family puts you in the Father’s hands. Thank you, Jean McGaw
Pinellas	Recreation	Dear Governor DeSantis, I have watched you grow and turn this Covid19 into a positive crisis by having people get tested. I believe it was here back in November 2019 but we did not know. I traveled on Jet Blue from TPA to BOS on Dec 16, 2019 and back to TPA on Jan 3, 2020 as sick as a dog. I received medical attention numerous times, the z pal saved my life. I self quarantined for 60 days. I am disabled and would like to resume pool therapy at my condo please. Our president locked it up when Trump on March 17, 2020 stated there was an emergency. It's time to reopen and teach social distancing, that I can do as a new board member. Thank you sir. Janice Kenney Audubon Condos at Feather Sound Florida
Seminole	Government	According to government sources Florida is approx 3 weeks past the peak death per day. Currently Florida is at 40 deaths per day and projected to go to 0 by the beginning of June. We cannot take the chance of respiking the death per day curve and moving the curve to the right. Do not force people out, do not hinder our state's recovery.

AMERICAN OVERSIGHT

Pinellas	General	Governor Ron DeSantis and task force for Reopen Florida!! Thank you for your time and leadership in this matter. In my personal opinion, I believe it is time to reopen the state of Florida. The peak of the virus has passed and we are seeing a steady downturn of cases in FL and around the country. I think we should start with in state first. All businesses in the state of Florida should be able to reopen with no restrictions. This should include all sports leagues and teams (allow them to travel across state lines too). Second let's open up travel and tourism on May 15th to all in and out bound flights in the US, so people can again see family and friends around the country. On June 1st it's business as usual. Thank you for your time Jared Petersmith Pinellas County Resident
Pinellas	General	The state can NOT successfully open until we have the capacity for quick and efficient MASSIVE testing and tracking. This has nothing to do with politics or civil liberties, and has everything to do with public welfare. Read the history of how reactions to previous pandemics accelerated the spread of disease. We hear the same reasoning today, yet we now have more information about how disease spreads than we did 100 years ago. History may be already repeating itself. Listen to the expert scientists regarding disease transmission. Many of these people have dedicated their lives work to this very event that has been predicted and yet dismissed for years. Well, now is that time, Governor. Are you going to be a true leader or a follower of political ideology? Time will tell.
Lee	Retail	If you are afraid of the civil 19 stay home. Otherwise open the state up for everything
Polk	Education	Please listen o science as much as possible. Sustained decreases of instances and hospitalization for more than two weeks AFTER effective and rapid testing increases. Only then should a phased plan of reopening happen. Until then make sure that there are social safety nets to catch people who are financially hurting while making sacrifices to keep our health system from being overwhelmed. Stop the giant tax breaks for corporations and make sure your municipalities and education system is funded so that when we do come back our systems and supports are strong and ready to help those in need.
Miami-Dade	General	The state is not ready to be reopened. People before business. We still don't know how this virus spreads, we don't know if it is even possible to become immune after infection. And new evidence is suggestion transmission via the air. This State, and this country is not ready to reopen.
Pinellas	Education	I am affiliated with a private school and while I understand that Florida public schools are closing for the year, we should be allowed to reopen our private school and extend our studies into the summer in order to compensate for the shutdown. Thank you for your consideration.
Miami-Dade	General	We (the people) are tired of the clear violation of our rights and freedoms for something that has a lower death rate than the flu
Orange	General	Florida needs to start testing for antibodies. People need to know what their immunity is before they go interact with others to help protect their safety and their neighbors.

AMERICAN OVERSIGHT

Leon	General	We know a lot more now than we did when covid19 first surfaced. There are therapies that work! We need to get people back to work as soon as possible and we should take a more aggressive, rather than measured, approach to reopening. Shut down was to prevent health care facilities from being overwhelmed, not to prevent people getting sick. We need to get our economy moving, and scared and vulnerable people can stay home if they choose. We don't even know the accurate death count since Dr. Birx stated every death with covid19 is to be counted as from covid, which is a big difference.
Pinellas	Healthcare	Test all residents & employees at all nursing home facilities asap..even if there are no known cases
Highlands	General	I think one of the best practice measures we can implement is making it mandatory for everyone that leaves there homes must wear some type of face covering I am a health care worker and creating a barrier is the best practice for not spreading infectious pathogens to each other as well as maintaining at least a 6 foot distance between people. This virus won't go away until we have a vaccine but as long as we maintain these things in place as well as common sense hygiene we can begin opening things back up.
Broward	General	Registered Voter, (R) De Santis was endorsed by Trump and I voted for him. I can not continue to support this view of our elected offical if Florida is locked down past the 30th of April. Overwhelming actual facts from hospitalizations, Mortality Rate, and positive cases to Tested cases show out of our 22.5 million people in the state of Florida we have the LOWEST numbers in the Furthermore we are leading in testing and information. (Not to mention the overwhelming majority of Florida is senior citizens and we have the lowest numbers!) These Facts show there is no bearing to a phased opening. RE OPEN FLORIDA NOW. The SOLUTION IS WORSE THAN THE PROBLEM. BUSINESS SACRIFICED TO SLOW THE SPRAD, NOW THEY ARE BEING SACRIFICED. The People are going to continue to stand up for their constitutional rights. The fact is you folks already know all this information, and more. You swore to uphold and defend the constitution a d Oath of office as elected officials. OPEN FLORIDA NOW.
Lake	General	People aren't staying at home as it is. I think re opening to any extent is a terrible idea
Seminole	Education	Yes, we would like to see all business open back up, all schools open back up, and all colleges open back up. We can not survive much longer!
Lake	General	I do not think it is wise to open the state at this time. It's extremely premature and I believe it will cause an uncontrollable increase in Covid-19 cases and deaths. We should maintain social essential distancing and activities only, until there is a better understanding of and treatment options for this virus.
Orange	General	Why would you make this when you still haven't fixed problems with the unemployment website? Hundreds of thousands of Floridians are still waiting for their unemployment benefits. Absolutely appalled at the incompetence of this administration. Get your act together, Governor. There are people struggling.

AMERICAN OVERSIGHT

Hillsborough	Accommodation	Open the gyms, keep opening beaches, something you can't monitor, at least gyms they're kept clean and people clean after themselves
Palm Beach	General	Keep the schools closed at least until Sept. keep everything closed like it is now. Open the swimming pools at condos.
Broward	Recreation	There will never be a perfect time to reopen anything. Reopening the beaches and pools would seem to be reasonable for recreation.The fear of political backlash I'm sure is high but at this time I am sure the majority of normal thinking people understand the problem and would hold a leader harmless for making such a decision if it turns out to be premature. All the scientific modeling of the past has been abysmally wrong. Sometime leadership requires one to make a decision right or wrong.
Hillsborough	Healthcare	We need more cyclical testing to be in place until a vaccine is available before opening anything up. Phasing as suggested by the white house is good. But it is imperative to increase testing significantly!
Brevard	General	Please don't open the state prematurely and risk a relapse in virus cases. If you do that all that we've sacrificed to help flatten the curve will have been pointless. It's better to stay closed a little longer than to have to deal with an entire shutdown all over again. Schools opening during phase 2 may not be a good idea if too many of the teachers and staff members are in the "high risk" category due to age or other health conditions. In general there aren't enough substitutes to cover classrooms let alone if many teachers are out of work for an extended period of time. Also children who live with high risk adults could bring home sickness to their family. Thanks for your consideration and helping us to maintain a healthy life.
Alachua	Information	Hello, thank you for taking comments from the public. There is so much inaccurate information that is spread so easily via social media that I first ask that you make a concerted effort to always promote scientific truth and scientific fact. Please consult with medical professionals and peer-reviewed scientific studies when making all your decisions regarding the probability of re-infection due to opening up public spaces and public business too soon. We beg you to put aside the political gains of politicians and the economical gains of big business CEOs. Fill your task force with scientists, mathematicians, medical professionals, not politicians, business owners, and lobbyists. The last thing we need is to re-open too soon and irresponsibly spike the numbers of covid-19 infections, totally undoing all the good we have done so far. Give this the time that is needed to fully get past this crisis without having to start this all over again. Keep your focus on the greater good, what is good for the health of all of the citizens, not what is good for the pockets of big business or the re-election campaigns of the politicians. This is your chance to do something good, to do something right, to do something for the people, and the people will remember 2020 forever. I beg of you to keep Florida closed until the health crisis is over and to listen to all of the brilliant medical and scientific minds in our society who are willing to help. Thank you.

AMERICAN OVERSIGHT

Pinellas	Professional Services	Governor DeSantis I'm commenting about the opening of hair salons. I am self-employed at my hair salon I've yet to receive anything from unemployment it still shows pending although I know I've been verified. As far as the opening of the salon goes I don't feel that Pinellas County is ready to put the stylus and the customers with in 1 to 2 ft distance of one another. I feel that the salons should be the last thing to open not the first thing to open due to the safety of myself the stylus and my salon and the clients that will be walking in the door. Sincerely Michelle Armstrong
Broward	General	I would prefer Florida abide by the CDC Guidelines and consider the safeguarding of the health of the Florida residents first and foremost. Open up when the health and protection of the people of Florida is guaranteed and they can go out and not fear getting COVID19. Thanks Patricia
Miami-Dade	Government	I belive it would be a huge mistake to open up NON-ESSENTIAL businesses considering that we are in a pandemic and it would just be irresponsible to keep letting people conjugate and continue infecting others and exposing others to the virus and eventually death. I believe it is very selfish and irresponsible of us AMERICANS who just SELFISHLY want to go out to places and just completely disregard the health of many and disregard the hard and restless work of our nurses, doctors, and healthcare workers. WE MUST STAY INSIDE AND CONTINUE FIGHTING THROUGH THE VIRUS. Not risk going out and risk our HIGH NUMBERS in Miami-Dade to get even higher.
Seminole	Finance	Re-Open Florida Re-opening Florida is as simple as just saying "Florida is 100% open with no restrictions". No committees needed, No task force needed No rules or regulations needed. Citizens of Florida are free to socialize or not to socialize, free to wear masks or not wear masks, free to social distance themselves or not too. Our State and Federal Government is collapsing our states and our lives over chasing ghosts. It is up to the individual to heed a warning or not to. The fear the government is instilling in some individuals is doing more harm, more damage and killing more people than this current virus ever could. We should be more afraid of the tyranny our government is imposing on us. This by far will be the most damage that can be inflicted upon us. We The People,
Orange	Professional Services	I believe any re-opening should be done carefully and with input from health experts and local officials. Any re-opening should include the general population and require social distancing until the virus has died down.
Pinellas	General	Please open up the state. We are grown adults and can social distance and be safe.

AMERICAN OVERSIGHT

Volusia	Tourism	They say it's going to be a year before they have a vaccine. So the question becomes how long do you wait to reopen the State. Are you going to wait a year and kill Florida's economy. I really do not think it matters if it's another week or four weeks sooner or later someone will have to reopen the State. What I have read, we all need to keep our distance and wash our hands on a more basis regular basis. If people are a afraid then let those people stay home. But please let others of us out of the house. Please let us reopen our businesses and enjoy a meal inside of a restaurant. I do not drink but a lot of people do and would like to return to a bar. Which bars employ a lot of people to who are also out of work.
Miami-Dade	General	DO NOT REOPEN FLORIDA UNTIL WE HAVE A CURE FOR COVID. STAY HOME. STOP THE SPREAD. REOPENING FLORIDA FOR RECREATIONAL USES IS GOING TO BE A WASTE OF ALL OUR GOOD EFFORTS IN STOPPING IT.PLUS NOW ISNT THE TIME TO DO SO AS WE HAVENT EVEN REACHED OUR PEAK OF THE VIRUS YET
Palm Beach	Transportation	Please let business re-open with strong guidelines for elderly and compromised individuals to follow if they choose to go out. Health has to be ones own responsibility. The rest of the state needs to get back too work before this shut down causes deaths from economic factors.
Miami-Dade	General	Good afternoon Sir, There is no clean "win" it seems when it comes to this current SARS-CoV-2 situation. I believe reopening would be the least damaging situation for a politician. Sure some people will die from COVID-19 but the rest of the general public will accept it as a cost of doing business. While some people may not verbalize it like Lt. Gov Dan Patrick most are willing to tolerate anything as long as their needs are met and they get paid. I'm not sure how the current situation is from a full spectrum analysis of the state, or national, level sectors. Since testing capabilities are having to catch up to South Korean levels waiting will keep harming the population. At least from here in Miami, FL I can say that if things start getting drastic that it will be difficult to avoid another fiasco such as the UPS shootout in December 2019. While the effects of that incident were not as drastic as it was expected to be among the population it did change their perception of US Security Forces. I'm not sure what the effects of a similar fiasco caused by a mass of actual desperate people this time around would do to the population. There have been some slow implications of criminality growing at the moment. The only reason it has not become a major problem is thanks to the stimulus checks or unemployment that was handed out. The extension should consider this economic, political, social impact if it has not already by government planners. If a reopen were to be decided upon the population has to be reminded in a way that this is what was asked for not pejoratively of course. Without some sort of reminder like that the natural inclination would be to blame the current leader. As always the final decision rests on the leader as to what does or does not happen. Hopefully some considerations I have submitted to you can be of merit. Very respectfully, Eduardo

AMERICAN OVERSIGHT

Polk	General	We should absolutely wait before reopening for business as usual. I have found that the majority of the public do not follow social guidelines or wear masks. This is a huge red flag. It is unwise to begin opening these businesses or public spaces until it can be safely done. And that is not now.
Duval	General	Please open businesses back up! I own a barbershop and this business is my livelihood. I've been denied food stamps and all other assistance. My family needs money for survival.
Hillsborough	Finance	Need an order to mandate waiver of all penalties, fees, interest assessed during COVID-19 and specify date range...TECO and many others acting as if there is no policy on payment deferrals and considering charging interest, fees, and/or penalties for late payments without a grace period...RIDICULOUS!!! On May 1st people who have had ZERO opportunity to generate income can not miraculously pay invoices on May 2nd....a grave period for all invoices due since 3/10/20 should be implemented through 6/15/20!!!! Set a policy to STOP the bleeding...people and businesses can't operate without utilities and shouldn't been penalized by IGNORANT and HEARTLESS vendors!!!!
Miami-Dade	General	As long as they follow social distance and wear mask / gloves and wash hands I'm for opening up florida with baby steps as President Trump outline We need to get back to work
Hillsborough	General	Please put the health and safety of your constituents first. We need more information, we need more testing, we need to be closer to a treatment or vaccine. Don't reopen until it's safer. I know people's incomes are hurting. Those who have jobs and incomes affected should receive govt support for the duration of the pandemic. Don't make people risk their lives so the economy can reopen.
Citrus	Healthcare	Plz read Miami Herald about immunity and tests used to identify it- https://www.miamiherald.com/news/coronavirus/article242290816.html Next Plz ✓ info concerning Swab test FalseNegatives because Swab test FalseNegatives may be cause of immunity confusion? Plz read-"Negative results do not preclude SARS-CoV-2 infection and should not be used as the sole basis for patient management decisions." in https://www.washingtonpost.com/science/2020/03/26/negative-coronavirus-test-result-doesnt-always-mean-you-arent-infected/ More on FNs@ https://t.co/UISd06btet Then Gov Desantis - Answers1st, Open 2nd! Your getting the facts is vital in making sure one of the following is our future-- "Ye shall know the truth, and the truth shall make you free OR Ignorance is BLISSfully lethal

AMERICAN OVERSIGHT

Lee	Professional Services	As a hair stylist and manager, I feel that we are in a odd position. We are in close contact with our guests. Most stylists including myself are able to provide service to multiple guests at one time. The challenge now will be safe distancing and higher levels of sanitation than normal. All of this adds up to time and money loss for myself & my stylists. There is no playbook for managing business going forward. Safety is my highest concern! That we do not open to fast and find that infections spread quickly. We have been fortunate so far not to have any cases that are associated with my own business. But that risk will return as soon as people start moving around.
Pinellas	Healthcare	Please do not be so quick to reopen the state. I am a healthcare provider and the only reason we are not overwhelmed is the stay at home and social distancing orders. The last thing we all want is to reopen early and see a surge of cases and then have to shut down again. Thank you for taking this into consideration.
Broward	Recreation	Please re-open the boat launches. I don't understand the significance of why the boat launches were even closed. If anything, there was always social distancing in the open waters. Like most Floridians, I work extremely hard and enjoy the quietness and peacefulness of the open waters. My family, friends, and neighbors also love the fish we from the ocean. I understand the seriousness of this COVID-19 pandemic and understand my personal responsibility of continuing the social distancing protocols. Please consider opening the boat launches.
Seminole	General	We need to reopen before we fall back into a new Great Depression. If this continues I feel like it will lead to civil war. With unconditional made up laws. We don’t need war we need work.

AMERICAN OVERSIGHT

Santa Rosa	General	I do not agree with the state opening anytime within the near future. I understand that the economy is falling and suffering, and I do understand both sides of the argument. I am a student at Pensacola State College, but will be transferring to the University of South Alabama in the fall. I not only attend school full time, but I have a part time job at a retail store also. With my job, I am saving for college and making car payments. Due to the pandemic, I have lost my job due to this pandemic and it has halted some of my plans as far as taking courses in the summer to get ahead and paying my car note. I am wondering how I will make everything work because although I have applied for unemployment, my application is still pending, so I have no income at all. I would rather not be able to attend classes in the summer, then to rush back to work and see a negative impact on many people's lives. As I do understand that the curve has flattened, it is important to remember that the numbers are going down because less of the population is out. Right now, we are in a shutdown so there has been little to no tourists, mostly essential workers out and minimal contact between people. If none of us are going outside or into the community, of course the rates would go down because there is no interaction. However, I believe that if we rush to open everything back up so quickly without precautionary measures, then there will be devastating numbers that will arise. I feel as though even if we did open back up our economy because nobody is spending money, as far as buying clothes or shoes-non essential items, then it would cause businesses to lose more money than they would even gain. It could hurt businesses more than help them because people are scared and nervous. Even though, I understand both sides because I do need the money also, I just do not see why opening before June would be beneficial for our state, especially because it will be time for tourists.
Bay	Healthcare	Please begin allowing hospitals to do elective surgery. Many hospitals are experiencing very low census and are struggling to keep hours for employees. Elective surgeries will help health care workers get back to work. Allow stores to reopen with a mask restrictions so people can get back to work.
Miami-Dade	General	Please apply for all federal money to help florida citizens who have no income. Demand forbearance and repayment plans for citizens with all florida lenders who have received bailout money from the federal government. Do not open our state until medical experts, doctors and scientists advise that it is okay. Use phased reopening of businesses with limited capacity...telecommute when possible. Continue social distance/mask requirements, do not allow large gatherings, prepare schools for potential distance learning in fall. Thanks.

AMERICAN OVERSIGHT

St. Johns	General	I believe we should start slowly reopening businesses as of May 1st. I live in Northeast FL and I'm sure at this point we have more people die from the flu each year. We are not a hard hit area thus far. Counties like St. Johns where I live have barely been affected by Covid. In fact, Flagler Hospital where my daughter is an RN said they had originally opened up an entire unit for Covid patients. They are now beginning to close it down because they do not have a need for it any longer. Counties like mine should be able to open up restaurants, parks and beaches with the 6' distancing. After all we still go to the grocery stores, Walmart, CVS, Walgreens, gas stations etc.... Why not be able to do the same at other public places. Obviously, since we are still going to these places and most people are not contracting it then we should be okay in other establishments. If people are at high risk then they can stay home. Let us healthy people and young people get back to work using proper precautions. I also believe that salons of all sorts should be able to reopen with again the same precautions and possibly masks if the customers request. Please start reopening counties that are not hit hard and for counties that are hit hard, delay the opening slower. Hope this helps Gov. DeSantis. We think you are doing a fantastic job!!!
Seminole	General	As a new owner of a small business/self employed, I believe that with opening up that everyone should be required to wear a mask. Still have in place the 6' rule & other restrictions that the grocery stores have currently. It only makes sense to protect people as best as we can. Unfortunately, my business is non-essential and I have been without work since March 15th and my business will be the last phase of opening due to there is a group of over 100. There has to be some kind of monetary relief for the small businesses. Unfortunately I do not qualify for state unemployment but I do qualify for the federal unemployment. It has been a struggle getting any information on my current claim. I take care of my elderly mother so to not have a paycheck for over 7 weeks now has been challenging. So the small businesses should get some firm of compensation according to when they are allowed to open.
Broward	Information	Here in Hialeah there has never been socially distant, we should not open until the numbers have dropped for at least 15 days and then with some restrictions. Restaurants only by reservations and 50% capacity, same for beauty salons and barber shops only a certain amount of customers at a time
Brevard	General	Please open Parks, campgrounds, Zoo, repayment Astaire, all retail Store, restaurants, hotels,
Hillsborough	General	this won't matter and will ultimately fall on deaf ears because of allegiances but I think it would be a mistake to reopen the state and follow suite of other questionable decisions. I respect that the economy is hurting but you simply can not risk the publics' health for the sake of a "fast buck". I do believe that the second coming is and would be real and worse if the state or any other part of the country is reopened too soon.
Palm Beach	Recreation	Palm Beach county beaches should be open for limited activity. If you open some state beaches, you need to open them all. Indian River County is opening their beaches and yet Palm Beach county beaches are closed

AMERICAN OVERSIGHT

Bay	Food	Reopen tourism destinations, limited usage to begin with. Reopen support businesses, limited usage to include food and beverage venues and rental properties. Small businesses will close permanently if action is not immediate.
Hillsborough	Healthcare	Open everything up just emphasize social hygiene and masks. Economy needs this.
Highlands	General	Open Florida as Sweden is open and no outbreak. People need to get back to work and on with their lives. Drastic lock downs are unconstitutional and violate our basic civil rights.
Highlands	General	Florida is not yet ready to open. The virus is still traveling and here in the Heartland we are behind on testing. My county has had 76 infected and 7 died. That is 10% of the infected that have died! That being said, you must do something immediate regarding the unemployment situation. The website is a joke and there should be multiple phone numbers with work-at-home employees who can help those with questions.
Collier	Education	The state and its schools should not reopen until the flatten curve of COVID-19 infections is substantially declined to the point where return of the disease is not possible. This may require extended closures through the remainder of the year of 2020, and maybe beyond. The health of Florida's population is more important than the economy. If large numbers of people suffer or parish, the economy will be damaged much longer than just two years.
Sarasota	General	Re-Open businesses. The anxiety and stress this is causing is extremely detrimental to those affected by the closure. Please explain how all the "essential workers" working in Publix, Target, Walmart, Hone Depot etc etc that have been exposed to tens of thousands of people over these last 3 months, prior to the escalation of masks and shields at the registers, yet the virus did not spread wildly to all the employees of these businesses. How is that possible? Then these "essential workers" go home to their non essential spouse that is not allowed to go to work but is exposed to a person that is constantly exposed all day long. This does not make any sense . If you are immune compromised or have other medical issues you need to use good judgement and you obviously need to stay home but the rest of us need to get back to work and feed our families because most of us have not recieved stimulus nor unemployment help. Please re-open Florida.
Hillsborough	Healthcare	My wife is in the hospital and I cannot go see her. Also, the gyms need to be reopened as they are part of maintaining our health. REOPEN!!!
Hillsborough	Healthcare	Working in the dental field, there is not enough adequate access to PPE at this time. Lack of PPE coupled with the lack of informed and clear recommendations on safe practices leads me to question a safe reopening at this time, or even in the coming weeks. The WHO just announced today that antibodies do not equate to protection from reinfection so at this time is just seems premature to reopen everything and undue the progress we have made. If history has taught us anything, the second wave will come and it will be worse than the first. Becoming overzealous now with the small gains we have made and reopening will lead to insurmountable loss in the future. As the old adage goes, it's better to be safe than sorry.

AMERICAN OVERSIGHT

Hillsborough	General	This is what the University of Washington model says. It says Florida should not re-open until mid June!!!! Not safe until middle of June! https://www.npr.org/sections/health-shots/2020/04/25/844088634/when-is-it-safe-to-ease-social-distancing-heres-what-one-model-says-for-each-sta?fbclid=IwAR0NfIaKSO9QnE-LV0WCilCnMzn2sV5Msqhw7tekAiQ7OgzyzJqmV2ZYdz0#table
Walton	General	With counties such as mine opening the beaches with no restrictions; and the possibility of the Gov lifting the short term rental ban, if people don't think my county will be overrun with visitors they are sadly mistaken. Very few people will abide by the "suggestions" of the governments. The number of cases will rise, no doubt. But what does that number really tell us. Nothing! If they aren't sick enough to go to the hospital. We also have NO idea how many have already had it, with or without symptoms, since you can't get an antibody test yet. So honestly let's open up the businesses. People and businesses are losing everything. Those that are elderly or have underlying conditions or mist at risk can choose for themselves to stay at home or get out of the house. We can't stay shutdown forever.
Hendry	Government	As a life long Florida resident and retired County Emergency Management Director I would ask that you take a careful approach to reopening based on medical and scientific guidance and recommendations.
Hillsborough	Government	Need an order to mandate waiver of all penalties, fees, interest assessed during COVID-19 and specify date range...TECO and many others acting as if there is no policy on payment deferrals and considering charging interest, fees, and/or penalties for late payments without a grace period...RIDICULOUS!!! On May 1st people who have had ZERO opportunity to generate income can not miraculously pay invoices on May 2nd....a grave period for all invoices due since 3/10/20 should be implemented through 6/15/20!!!! Set a policy to STOP the bleeding...people and businesses can't operate without utilities and shouldn't been penalized by IGNORANT and HEARTLESS vendors!!!!
Sarasota	General	I do not believe it is safe for Florida to reopen. Thank you and be safe.
Hillsborough	General	I am definitely for reopening the state but in a safe and if need be slow manner. I believe most Floridians appreciate the need to continue with safe distancing and keeping ourselfs and spaces clean. I also believe a slow steady pace of a return to normality is possible. I ask with any decision made please weigh your options carefully we all want our businesses open but not to rush as to have to start all over again. It would be nice to be an example of how States can return to business without endangering the welfare of the people. I understand these are hard decisions and I'm sure not expected to be the ones to decide them. But I trust you will make your decision on the safety of the people and state. Thank you.

AMERICAN OVERSIGHT

Brevard	Education	Keep with the current "safer at home" policies. Social distancing and only leave home for essential purposes (doctor/pharmacy, groceries, gas and essential workers). It is too soon to start business as usual or too start encouraging people to move out and about unnecessarily. We need more testing available to see who is infected with Covid 19. We need to make sure we have ample resources for hospital workers if infections start to spike again.
Broward	Tourism	This cannot be rushed. It must be done gradually, only when numbers start to decline, and even then still keeping social distancing guidelines in place. Limiting people, the wearing of masks, 6ft rule. The worst thing we can do is re-open irresponsibly and then have to close then again if we get another big resurgence. We need to follow the advice of the EXPERTS (doctors, scientists) NOT politicians nor businesspeople. We also need to implement widespread testing to fully re-open. Slow and steady and safely.
Sarasota	Retail	I think to reopen retail stores in a safe manner could be done. All employees should be required to wear masks and all customers should be required to wear masks. The number of customers entering a store at one time could be based on square footage.. Hand sanitizer or wipes should be available for entering and leaving. Both employees and customers should feel protected. Most people are responsible. Continued education for the public could help emphasize the importance of following the rules.
Lee	General	Open the state
Lake	General	Reopen now
Seminole	Information	Thank you for leading our state through this crazy time. I am a independent contract travel agent and have yet gotten unemployment. It would be nice to get money.
Duval	General	Reopening before the CDC and WHO recommend it is a death sentence for many Floridians (and residents of other states who may come in contact with Floridians). While people will continue to struggle financially and the economy will take damage from things remaining closed, I don't believe that burden will be worse than the consequences of reopening before it's safe. Hospitals being overrun, healthcare workers doing in droves, people racking up thousands in medical debt, business having no one to work because all their employees are sick and perhaps several have died... There will be drastic harms to every Florida resident if we reopen too soon. Listen to the CDC and WHO.

AMERICAN OVERSIGHT

Broward	General	Governor Desantis and task force. Multiple ideas to reopen our State. Beaches and parks. Open only certain sections of beaches or parks with a limited amount of people. Maybe a schedule rotation or perhaps even make an appointment with city (fast pass) to go, online. There needs to be policing. Both parking lots and on the sand or park. Not to give citations, but to keep people moving and apart as required. Multiple disinfecting stations throughout. Rope off certain areas in a grid like pattern to keep proper separations. Perhaps 12x12 boxes with pathways in between to ensure separation. No congregations of more than 10 allowed. Restaurants: Outdoor dining only probably best for now. For those restaurants that don't have outdoor areas, Wave regulation to allow those restaurants to set up small dining areas in hallways or parking lots with proper table distancing. Clients must go through a rigorous disinfecting ,(misting body spray, shoe trays, and hand washing) before being seated. If entering building, a host who needs to be behind a plexiglass or separation of some type will greet them and ensure that everyone uses a mandatory disinfecting station (body spray, shoe trays, & hand washing) and enter and exit thru one opening all outside clients must wear masks and shields to enter. Employees must enter thru a different entrance (rear) and go thru a specified set of disinfecting rituals determined by the restaurant industry and certified by city or state. Every employee must be wearing masks and face shield at all times. Gloves are a must when handling food. Also, there must be a fully trained (perhaps online course for proper decontamination) person who's sole job is to police, clean, and disinfect every surface touched by anyone. After every client or anything else that's exposed to possible cross contamination and preventing it. No waiting in line allowed. Use a virtual line and a text will be sent when table is ready.
Martin	General	I think we should wait to reopen Florida till we know it is truly safe! I desperately want to return to work in West Palm but I also know it is currently unsafe at the moment. We can not expect the autistic students at my school to be okay with returning to school while wearing masks. I want to be with the students but I also want them to be safe. Additionally if we reopen Florida before it is safe the virus will spread more readily to people that were safely remaining inside.
Miami-Dade	Retail	Reopen slowly. Parks, beaches, golf courses seem fine since people are usually away from each other. Restaurants can reopen but with removed seating, and no tables for more than 4 people. No gyms or theaters should open.

AMERICAN OVERSIGHT

St. Lucie	General	The process of opening Florida needs to be a general progression. We can not say "open up" and just let people have at it. We are a state that is filled with constant travelers. People love to flock to our state for our beaches, fresh water, views, and many tourist attractions. You can not open the state quickly because it will cause another great migration. There are more people than others care to consider that have compromised immune systems; some many not even know they have it. I am an educator who is adjusting to the new learning and teaching system of our state. If you can't even determine when you are going to open the school system, why are you going to consider opening other locations that are not going to help the people of Florida? I understand that many people are financially disadvantaged; we are too. My husband works in the medical field and has not been able to work. You need to begin opening the state slowly with small disbursements. What is best for the people of Florida? Think of them first.
Manatee	Information	Up until Covid-19, I thought you did a pretty good job as governor. But, the non-existent testing for the virus in Manatee County (less than 1%) and many northern and central Florida Counties speaks volumes. We had 3 testing sites that only allowed 200 people to be tested and then it ended. So, unless you were dying, you could not get tested. Not testing and letting people die in nursing homes without counting them shows that you are kidding yourself and trying to pull a fast one on the residents of Florida. If you don't have an accurate idea of the spread of this virus how will you know when to take steps to open.? Many many more will die. Your primary constituents are people over age 55. They are currently all staying indoors and doing their part to Social Distance with masks and gloves etc. The people screaming to open the state are people under age 40 and most probably don't vote. The large businesses will survive but yes some won't. We have to accept that fact as well. Please be a Leader when you do finally take steps to open our state and set Ground Rules for All. First of All ; Please...Wait and let a few other states open first to see what happens. A couple more weeks won't kill anyone or any business. Banks will need to help everyone...and they will. Government can put incentives in place to help induce lending (you don't need to give away money the government doesn't have) Make it Mandatory to wear Masks and Gloves when waiting tables or I may never go out to eat again. (Do walk up windows or something) I don't want people I don't know breathing on me. Please make All Employers require employees take an Anti Body test before returning to work to know who has had the virus and take temps for those who don't. Make Employers take extra steps to clean with disinfectant etc. Lastly, please make it a gradual reopening. Nobody needs massage parlors. Places of Worship and other places were people gather Must adhere to social distancing which would include wearing masks. Again, I will not go same with other educated individuals. If business and/or people don't follow your guidelines- fines should

AMERICAN OVERSIGHT

Brevard	General	It is way to early to open our state. The state is still testing, none of the numbers you are giving out are correct. I hope if you buckle to a few who want it open, that you are still able to sleep at night with the death you have on your hands. Wonder if a sharp lawyer will take on the task of suing the state for wrongful death.
Charlotte	General	As a voter and essential worker it is myvrecommendation that FL continue tobwait to open. I have lost a family member in NY yo Covid-19 and also had another family member in NJ be tested positive after being sick as hell. If we do reopen i say that we be very cautious. Keep bank lobbies closed as pretty much all business can be conducted through drive thrus, through email, or over the phone. Restaurants if the open should be limited to 25 percent capacity. Movie theaters, bars, and gyms should remain closed. Gyms are a cesspool of sweat, body fluids, heavy breathing, and sharing equipment. There is no way in hell that i believe that these should be opened immediately. People can exercise outside or in their homes. I would recommend limiting gatherings to no more than 30-50 people as well because it only takes on asymptomatic person to infect a group. I would continue to limit nonessential travel. I have experience in pretty much all these industries mentioned and believe that if they reopen to quickly without very strict rules than cases will just go up especially with mother's day and memorial day around the corner.
Brevard	Healthcare	I would ask that our local and State leaders follow the phased approach set by the Whitehouse as determined by healthcare experts/epidemiologist . This means adhering to the phases strictly with transparency. Testing will be crucial in following the phased approach and to instill consumer confidence. In this county it is very clear that testing is not adequate or legitimate at this time,. This needs to be addressed before entering phase one. Please consider the phased approach set at the federal level and make guidelines clear and easy to follow. Opening up randomly will create sense of chaos and lack of unity in addition to placing so many at risk for illness and death.
Miami-Dade	General	I believe that testing capacity needs to be ramped up substantially before any true reopening can take place. We will be back in the current situation if there is no clear and reliable data on infection numbers across South Florida. It is way too early to reopen.
Lee	General	Focus seems to be on the East Coast of FL understandably. We here in Lee County want to know when serological tests will be available here. We listen to Gov. DeSantis' talks and he never mentions Lee, Charlotte or Collier counties. Our numbers seem too high compared to other counties. Please don't leave us out. Lee Health has screwed up reporting numbers and it is making us anxious as to what is truly happening here. Thank you.
Pasco	General	I would like to see every worker tested before returning to work and the people working still to also be tested. I would also like citizens like myself with underlying conditions also be tested. I'm would like the governor to consider that if the state is reopen, especially tourism that he really considers the fact that tourists can and probably will continue to spread this virus. Please tread lightly.

AMERICAN OVERSIGHT

Collier	General	I thought I voted for a republican governor. Let's open this state up. I should control the amount of risk I can take not government. You guys base decisions on numbers that nobody knows if correct. Three recent studies proved more people had the virus then what was reported. Your basing a decision on The medical professionals, haha that's a farce. They are all bought by big pharm!!!!!!! Open up the state!!!
Flagler	Healthcare	Please see attached letter to the Governor from The AIDS Institute with whom I an employed. I am a RN and licensed in this great state of Florida. I have been in the HIV fight for over 25 years. If anyone knows how to fight a pandemic, its those of us who have been in the frontlines of HIV/AIDS. Just look at who President Trump has on his COVID task force, every provider is from the HIV fight! We must be diligent and selective on how we reopen and take great caution with our planning as we test and contact trace. HIV/AIDS/STD/TB have been contact tracing for years, so please turn to us for the experience and expertise that we bring as you begin to develop the guidelines. I am at your disposal to help in any way I can, please read the attached letter and feel free to reach out to me anytime for the guidance needed moving forward. Thank you. Donna Sabatino, RN, ACRN
Broward	General	Reopening Florida before it's safe is an objectively bad idea which only serve to cause subsequent rises in infections coming in waves as social distancing is relaxed and tightened. To prevent these infections and unnecessary deaths, we need to extend the stay at home order until we're seeing continuous decline and very low amounts of cases. I'm the meantime the legislature needs to pass more stimulus packages.
Lee	General	First of all, let me say that I am very anxious for Florida to get back to normal. Today is Day 37 of quarantine. I can't see my doctors or dentist for routine visits because they are only seeing emergencies. I can't shop at places I like to go, at the times I want to go. I can't get a haircut, which I seriously need. I can't go to church, or to the movies. I can't go out for breakfast, because I like sunnyside-up eggs, and they & home fries & toast don't "travel" well. I can't meet friends for a drink. Our community has closed down all buildings & activities, so I can't swim at the pool. I can't go to the beach...it's a ghost town, with crime scene tape all over. I have many friends who are restaurant workers and band musicians, and they have been out of work for over 5 weeks. Many government agencies are even closed. The libraries are closed. And with all this, none of my friends nor I know of anyone who has or had the virus. Social distancing is okay, but we need for things to open back up. Thank you for listening!
Manatee	General	Please do not reopen Florida businesses or recreational activities/areas until health professionals state that it is safe to do so. We have some of the highest Covid-19 rates in the country currently, even with limited testing. Reopening before it is safe will allow more people to get sick or die. Thank you.

AMERICAN OVERSIGHT

Polk	General	My wife and I celebrated our 37th anniversary today while living in Florida for the past 20 years. Because of our age, we are classified as high-risk during the pandemic. We have been staying at home since late February 2020, only going outside to walk around the neighborhood. Given the lack of general testing capability for ALL Floridians, we would not support the Re-Opening of Florida and would not participate in any reopening since it would put our health at risk in the current environment. For us to support and participate in a re-open Florida effort we would have to have the following: 1) unlimited, free testing for COVID-19 for all Floridians; 2) the ability to purchase N-95 masks; 3) a law requiring all residents and visitors to Florida to wear masks and carry proof of a COVID-19 test status. WE ARE NOT WILLING TO RISK THE REMAINDER OF OUR TIME ON EARTH TO SUPPORT THE RE-OPENING OF FLORIDA WITHOUT A COMMITTMENT OF SAFETY TO SENIOR CITIZENS.
Palm Beach	General	Do NOT reopen the economy until we actually have this thing under control. Doing so will do FAR MORE DAMAGE than waiting. There will be a new spike, and small businesses will lose far more than they are now. You will send us into a new depression. Listen to the experts, for once! Stop rushing and only thinking short term!
Miami-Dade	General	Good afternoon. Please, reopen the state. We are suffering. Financially, emotionally and spiritually. Quarantine is when sick people are kept in. Tyranny is when healthy people are kept in. There may be a minuscule chance that I will catch COVID-19. But there's 100% chance that I will suffer from depression, poverty and sicknessI if the stay at home order is not lifted by April 30. Please help.
Polk	General	We strongly believe in re-opening Florida. We know of several people who's lives have been critically affected due to loss of work or small business. We personally know of no one affected by the virus itself. That's not to say it isn't important to stay safe, however I believe at this point it's up to the individual to protect themself. If they want to stay home they're more than welcome, as well as if they want to take extra precautions, however it doesn't seem feasible to continue forcing closures of businesses.
Lee	Food	It would be nice if it was mandatory to wear masks in public. Especially anyone working. Specifically in the food / restaurant industry. Contain their own droplets. Obviously if you are eating out you can't be wearing one, but the servers and cooks can.
Orange	Finance	Please stop this lunacy and open our state!! We need to get our lives and livelihoods back! Open us up and let individuals decide where they go and what they do. Please don't let Demmings keep us locked down like he wants to. We need hope that we can recover what is left of our lives.

AMERICAN OVERSIGHT

Sarasota	General	Florida should extend the stay-at-home order well beyond April 30, into late May or early June to avoid a drastic increase in cases. In no way should restrictions be lifted with the number of cases and deaths climbing each day. The beaches should stay closed and those that have re-opened should be shut down once again as this is a place that mass gatherings do and will occur as individuals continue to break the rules and disregard the health and safety of others across the state and the entire country. Restrictions on beaches or not, the re-opening of these places will have an impact on growing case numbers in the next few weeks as people refuse to take this situation seriously. A strict lockdown and shelter-in-place order should be established for at least several more weeks to ensure safety of residents and a chance at life for the vulnerable instead of prioritizing the economy over human lives. A lesson needs to be taken from the states with hospitalizations and death rates declining. Florida should follow suit, maintain the lockdown order and implement stricter guidelines to keep people safe and discourage others from putting lives in jeopardy. I understand wanting to get the economy back up and running, but if it's too soon, then it won't end up really making things better, as the state will need to shut down once again and/or the case and death rates will be disastrous. We should be tackling the problem head-on now while the peak is in sight and an already-established stay-at-home order is in place. Re-opening Florida could potentially push high risk, vulnerable individuals, such as myself, that are able to stay safe at home back out into the workforce too soon and people could lose their lives unnecessarily. I am 28 weeks pregnant with a lung condition and am trying to keep myself and my baby safe. I don't know if I could fight off the virus if I were to contract it, but I know I have a much lesser chance of coming in contact with an infected person if the state remains closed.
Broward	General	Time to open all the parks and beaches in Broward County. People can go to the beach and enjoy their time out while social distancing. They should also have access to the ocean. The mental health and limited exercise are taking a toll on the people of Broward. The beach is hot enough to kill the virus.

AMERICAN OVERSIGHT

Manatee	General	The people of FL have been locked down long enough, without access to many services and activities. The FL Constitution Article X Section 11 allows all the RIGHT to access the beaches, which has been denied. We are now being told where we can go when we can go there. Our businesses are forced to close, but their rents are still due, they still have employees who must work. We have gone so far to order, yes ORDER people to stay in their homes for over a month now for something that while deadly is no more deadly than other pandemics for which we have never shut down the economy. Within reason it is time to allow the people to decide where they want to go or if they want to stay locked in their homes. It is time to reopen businesses gradually, phasing in the more non-essential businesses a week at a time, reduce capacities of restaurants but let them open. Open salons and other small businesses and ultimately getting everyone open. We must reopen soon, weeks not months, or else the entire economy will collapse. People who want to remain home can stay home, if that makes them happy, but the rest of the people who want to be out and about observing distancing should be allowed to have the right to choose. America is based on a Constitution and Bill of Rights and the right to choose is a basic freedom and people need to make their own decisions within reasonable guidelines and not be deprived of those rights. It is a slippery slope infringing on Constitutional rights under cover of a pandemic, first time ever it has happened and should not be happening now.
Miami-Dade	General	I think it is too early to open up places yet. We have not even peaked yet!!! This will be never ending if you start opening things up. I would not do anything yet until things are re-evaluated on May 31. Get real people. Look at the statistics. Things are still bad!!!
Pinellas	Retail	I work 2 jobs in the mall & I am very worried about returning back to work with case numbers still on the rise. This virus is far from over & has shown how unpredictable it is & how little we know about it. I live with my mom who is high risk. She will be turning 70 next month & has asthma & 2 tracheotomies within the last 15 years. I need to work like every one else but I do not believe this is the right time. I feel as if we should wait until at least June. The state needs to focus on getting the unemployment website working & start submitting requests. I was furloughed mid March from my employers & applied at the end of March for unemployment. Since then I have not been able to access anything about my claim. It is extremely frustrating. I worry I cannot pay my bills but I would never risk my health or the health of my family for a paycheck, Instead of focusing on re opening the economy, you should first look at the broken unemployment system. Floridians have been mislead & lied to by the government. He put us in great danger when he left those beaches open & didn't put in a stay at home order until he was pressured to. Please don't put Floridians in danger again by re opening the economy & instead fix what we should already be doing by fixing unemployment. If we come together, we can get thru this. We should not be putting anyone else at risk for what has already been a devastating situation as it is. Please do the right thing & listen to the ppl who affect from it most. Thank you for the time.

AMERICAN OVERSIGHT

Hillsborough	General	Please open up the entire Florida economy to the maximum capacity allowed for all industries by or before May 1, 2020. We need to survive and start working again. Pay for housing / food / transportation and all other essential or nonessential products and services. The world will never be free and clear of all viruses and diseases. Please remove all restrictions and allow the florida people to return to normal lives and we will learn and adapt. thanks
Manatee	Healthcare	Wondering when elective procedures will begin again. I was furloughed due to this. I am for opening and scheduling elective procedures.
Hillsborough	General	If we open the state what happens to the parents of elementary children who have to return to work AND school their children? Its too soon. There's too many unknowns
Duval	Education	Reopening schools is my main concern. Our classrooms do not allow space to follow safe distancing guidelines, especially since very few schools adhere to class size for each grade level or subject. Restrooms and classrooms do not have warm water for safe hand washing. Many classrooms do not even have a sink. Shared water fountains are a hazard in normal times and a definite source of cross-contamination during a viral pandemic. Shared spaces—hallways, bathrooms, cafeterias, office areas, clinics, locker rooms, auditoriums, playgrounds, picnic tables—are all gathering areas that pose significant challenges to social distancing and effective and frequent cleansing efforts. If we do need to continue distance learning, all teachers and all students will need updated computers or tablets because our current situation has revealed the poor condition of many devices and the lack of equitable access to safe, reliable internet connections for students and staff. Our teachers have done an amazing job with short notice and tenuous resources, but we need more training in using digital tools and resources to reach every student to support effective, engaging learning.
Pinellas	General	I feel we need to slowly open things up. Some things that are closed can be of very low risk. Hair salons can book customers so they are staggered and spread out. Wear masks. Churches are important. They can have multiple services times and spread people out. Pools and beaches are healthy for us mentally and physically. We need exercise and the temps are getting warmer. If people don't want to go out then they can stay home. Open up counties that are doing well and those that still are having high rates keep locked down. Nursing homes should remain on lockdown till they test clear for a couple of weeks and have continued testing but they should not effect the entire county.

AMERICAN OVERSIGHT

Polk	Tourism	Why is Florida not building what it and the world needs and putting its tourism industry to work in central Florida? People know Florida Orange Juice. Why can Florida and its Tourism Industry be know for helping the US/world - Turn PPE and testing into an advertising mechanism for Florida Tourism. Florida Safe Central Florida has been hit hard with unemployment. We also have unused warehouse and convention space, first class methods of transportation and distribution. Our President has authorized federal emergency management to help with PPE and testing demand. Use the abilities of the federal government purchase and single source the materials and machinery to produce all the medical needs(masks, medical and N95, test kit supplies, test kits and supplies and face shields), as it is not financially feasible for private industry to logically make the purchases due to a relatively short demand cycle. Use public relationships to locate the equipment and supplies and use private relationships to leverage our empty buildings, Soundstages, Ballrooms, or convention centers and workforce in central Florida. Use private relationships to provide management and labor(Disney , Loews, Rosen, Freeman) to build maintain and operate the federally purchased and sourced equipment and finally the packing up and storage of equipment and supplies at the end of the pandemic that will be eventually stored in the strategic stockpiles. This would reinvigorate our transportation and distribution employers in the convention arena and bring back employees to Orlando International Airport. One February 1st I purchased 40 N95 masks for less than $40 at Home Depot in Mid April the US government purchased 39 million N95 masks for $139 million or almost 3.5 times more than I as a private citizen did. There is money to be made in consumables.
Charlotte	Information	Keep it shut down!! There are still so many people not complying with the stay at home order as it is! And over 1000 new cases in Florida everyday. I dont believe we've even seen the worse of it yet. Why put more people's lives in danger? How many people have to get sick and/or die in order for the government AND the public to take this seriously? I think the president should have issued a nationwide quarantine. ONLY grocery stores, a few gas stations and medical/pharmacy services and hospitals should have been open. No exceptions. If that would have happened from the beginning, we'd be over it by now and we wouldn't have had to sacrifice so many people! But the more we start decreasing the restrictions and open up, the longer we are all going to be dealing with this and things will never get back to "Normal"
Volusia	General	Personally a real lock down should have occurred in the beginning. But that didn’t happen. Citizens are currently unable to buy hand sanitizer. Sanitizer is a basic need for staying healthy. Washing hands is not always possible. First responders and health care workers can’t possibly need all of it. The healthier the population stays. The less the front line workers would need. Keep it closed until basic needs are met to remain clean out in public.
St. Johns	General	OPEN UP EVERYTHING - IT IS ALL ESSENTIAL

AMERICAN OVERSIGHT

Hillsborough	General	Opening the state now is not only dangerous but also stupid. Trump's task force provided guidelines for reopening the country. The very first point is that there should be a decline in cases and positive results for a period of 14 days prior to anything reopening. We are not at that point. We share a large portion of our border with GA and I guarantee you that they will have a huge spike in cases starting a few days after Monday. Please do the right thing and show the people of Florida that you actually care about our wellbeing and lives, keep it shut down. If all else fails, think about your positions. What I mean by that is that we have a huge elderly and older population that mostly vote republican. You'll be killing off your voters if you rush things. Guess what that means in November? Two years from now? Catch my drift? Or you could make it much easier to boot you from office when the time comes. Your choice.
Orange	General	Her immunity is the only thing thats gonna save us. Im ready to go back to work, reopen disney!
Walton	General	Have been saying to family at least a week before Easter, seniors and those with comorbidities need to self quarantine and others can get back to work. With 82% of the deaths in the over 65 groups, hard to justify keeping an economy on a death spiral. Please open up the state. As a senior couple my husband and I will do our part. People need to get back to work or the unintended consequences will be worse than the virus.
Pinellas	Recreation	Please open private pools owned by townhouses and suggest continue distancing of 6 feet. Seniors need this for exercising.
Lake	Recreation	Please reopen. We need some form of socialization and recreation
Broward	Retail	Don't open Florida or any part of Florida. It will be the biggest mistake you can ever do. We amongst the states with the most foreign visitors and old people. We are heading towards hurricane season and something like covid and a hurricane will destroy us. We need to get numbers down as far as we can because without a vaccine this will keep going. Lower numbers mean less destruction to our society. We can't function without a vaccine. It's just a factor we need to accept. Don't open anything. We cannot take the consequences.
Collier	General	I have a son with asthma, so I will not feel comfortable with sending him back to school until there is a safe and effective treatment and/or a vaccine. I know that one of the major concerns of not opening is mental health deterioration of people experiencing economic hardship. Please inform Floridians that many mental health professionals (myself included) are providing telehealth services and can do so for patients anywhere in the state. I accept BCBS and Medicare. Www.mymindspa.net 239-307-0886

AMERICAN OVERSIGHT

Lee	Tourism	Don't do it yet. Allow for slow re-opening of things for locals, not tourists; however, the businesses allowed to open MUST provide a plan on how they willl open yet maintain social distancing. I highly doubt hotels, restaurants, theatres, bowling alleys, etc have a plan to support this. Businesses CANNOT be allowed to open & act the same as they did before COVID-19.
Seminole	General	Open up parts of FL that have low new. Cases. South Fl can remain closed but open up the rest of the state. I am 69 and have worked right thru this pandemic in a hospital. Open us up now!!!
Clay	General	Please keep public safety first and foremost as we slowly and methodically open the economy back up. Please don't be afraid to shut things back down as needed. We've been patient so far, let's not screw it up by being to hasty now. The state needs to get unemployment funds out ASAP, too many have waited too long. This puts undue pressure on people to open things too quickly.
Pinellas	Healthcare	I do not think we are ready to reopen facilities. We do not have sufficient testing capabilities to allow us to asses how many people have been infected. Until that time we need to be conservative. People are already ignoring stay at home directives and the government is ignoring them. I've been to crowded beaches where police are watching. I've reported large groups meeting and have been told it's legal because they're posting the event in groups of 10 rather than the 30 that are really there. Bike clubs are riding in large fast groups on the trail. This will only get worse if you open too fast.
Collier	General	SW IS NOT READY TO OPEN! Im an essential worker as is my husband, Medical & trucking! The numbers are not accurate leaving out tests numbers performed. @ labs. Compound by Area's of in PTS at NCH are maxed out! We are not getting real info therfor opening up Are area's could be devestating in lives lost! Maybe the best thing to do is BE HONEST! Shoot for maybe 6/1 but keep isolation in place! The meds are not wotking, plasma therapy needs to be explored & a vaccine obviously in the works! Dont let more people die, this is about a disease not business!
Martin	General	We need widespread testing and contact tracing, to see a decrease in new cases, hospitalizations and deaths before re-opening and coordination with our healthcare professionals (not pushes from corporate lobbyists). Truley help small business, get the unemployment website functioning. Save your constituents!!
Bay	Tourism	We really need to get our beaches wide open and our condos back in business in order to continue making a living. Tourism is suffering horribly here in the North West panhandle of Florida
Broward	General	Lines at food banks are miles long. People need to work and EAT. Open the STATE!!!

AMERICAN OVERSIGHT

Lee	Education	It is too soon to reopen Lee County. In particular, office workers who are only separated by cubicle walls mostly sharing common open space. As an employee in the education system, I know many employees who get sick at a minimum twice per year from the common viruses spread in the office and at schools. Imagine how easily the coronavirus could spread in my work environment I humbly request the all year round school district personell continue to work remotely through the summer. Current closure orders only address schools and not the remaining employees in the system. Thank you for your consideration.
Alachua	Healthcare	Regarding Covid-19: Never has there been a time when the HEALTHY have been quarantined. It is not acceptable. NOW that we have *data* and see the low risk of death from this--on par with flu--we need to OPEN back up. The more we "stay at home" the more our immune systems are COMPROMISED. This is BASIC regarding the understanding of immunity. Don't cloister yourself with Cleveland Clinic. You need more information from more sources. Start here: https://www.facebook.com/KGET17News/videos/537566680274166/UzpfSTE2NjAzMDc2MDk6MTAyMjAxOTk5OTMyMjQyNzU/
Duval	General	I own a small business and who is it to say who is essential and who is not? We need to open the economy back up. We want and need to work. We do not want a loan. Open Florida!
Duval	General	I feel that it is still too early to reopen the state. My reason why is that, I think it is still too early. I understand that some of the numbers are going down. and we want them to stay on that track... I feel that if the state is opened the cases will increase very quickly. I feel that the longer the state stays closed, the sooner we will get this under control.
Hillsborough	General	Please start to reopen Florida on May 1st!
Broward	Recreation	OPEN THE BOAT RAMPS SO WE CAN FISH!!!!
Volusia	General	Do not open Florida, there are already so many people violating the order which will cause us to have a second wave of the virus . I dont know about everyone else but I enjoy living healthy.. if we need to stay at home continue social distancing that's perfect until this pandemic ends
Brevard	Healthcare	It is time to open elective surgery. Care has been delayed to many Floridians and this has negatively impacted upon their health and well being. Necessary procedures that could be safely performed during this time period should now be resumed. The curve has been flattened and we have seen greater than two weeks of declining cases in Central Florida: In addition to the impact on the care of Floridians, this moratorium has led to numerous lost jobs, lost revenue and lost time. The health of our healthcare system will be irretrievably damaged unless this moratorium is lifted.
Brevard	Healthcare	Do not re open the government until the medical professionals deem it appropriate.
Bay	Real Estate	It is time to open Florida up other than any hotspots, if any. This action should be taken immediately. You do not need to offer a survey to the public until you have a system that is capable of handling the traffic. NO EXCUSE!
Duval	Healthcare	Please declare dentist essential so we can get PPE under healthcare

AMERICAN OVERSIGHT

Charlotte	General	https://www.turnto23.com/news/coronavirus/accelerated-urgent-care-doctors-recommend-lifting-shelter-in-place-order Let's listen to our local doctors who are dealing with the Wuhan Flu. We have flattened the curve. Open up Florida. Let's not listen to New York. They are not the USA. They are one state that happens to be poorly run.
Duval	General	In my opinion. If people follow protocols from the CDC. We should start opening Florida back up. My family and many others are suffering from not having jobs and the right amount of income coming in! We need our business back up and running and to start moving on with our lives! Please do right by us Floridians and give us our lives back!
Escambia	Government	Please open our state back up!! The economy is suffering and people are suffering. I'm blessed to be an essential worker which allows me to go to work everyday and still earn a paycheck. I'm also a single mom, and if my son wasn't 16 and able to manage his own school work, my home life would be much more difficult than it already is. Google "herd immunity" and really read what the experts have to say. Just because establishments are opened back up doesn't mean people have to frequent them.
Hillsborough	General	I am a hairdresser who is expected to go back to work May 1st and I live with my parents who both have compromised immune systems. We do not need hair salons to open yet
Okeechobee	General	I am 51 years old. I do have m.s. I miss the lives we had prior to coronavirus and the goals I set for myself in the future. I still have those goals and work towards them but in my opinion as long as we still see new infections and deaths I dont believe we should open. People are careless somewhere there will be mistakes and then we will see it get worse. We already went this far go a little farther to see in a couple of weeks. I know this from financial situation and health issues. Just to soon.
Lee	General	First you must place a moratorium on evictions, repossessions, utilities disconnects, foreclosures etc for a time immediately. You must give Floridians time to earn money to pay their bills. Some have yet to receive stimulus pmt and no unemployment either. Then you need to only open in a phased rolling opening watching closely active cases. In Lee county our cases are still rising so I'm not sure Florida is ready to reopen if the cases are still rising. All medical offices should be required to open. Many are not.
Hillsborough	Government	I am writing to say It is time for Floridians to get back to work. Throughout the past weeks of COVID restrictions businesses deemed "essential" remained open. Floridians who patronized those businesses voluntarily engaged in social distancing, voluntarily followed CDC guidelines. With these businesses open, sometimes serving hundreds of people at a time, twelve hours a day, seven days a week, we have witnessed COVID numbers falling. The State of South Dakota never mandated a single business closed and are also seeing COVID numbers falling. These facts prove that Floridians are responsible people, who love their neighbors, and will CHOOSE to do the right thing. But we need our elected representatives to do the right thing; we need our businesses open now, not later. Thank you.

AMERICAN OVERSIGHT

Miami-Dade	General	I wanted to suggest that in the interest of everyone's physical and mental well being, the beaches, gyms and public lap swimming pools be reopened. As you are already reconsidering reopening parks, that same principle applies to beaches. There is enough open space for people to coexist while preserving social distances safely. Gyms could allow a limited number of patrons at a time, and have them wipe clean the equipment after each use . Public lap swimming pools could allow one swimmer per lane, and we already know that chlorine kills the virus. Lifeguards cuould be at the other end of the pool on their "high chairs," at a safe distance . On a different note, for present and future benefit, that state should have thougher and stricter regulations regarding air filtration quality standards requirements for businesses and offices, as to prevent the spread of airborne pathogens . Lastly, there is an absolute lack of stock of disinfectant Lysol or Clorox sprays or wipes at local supermarkets. How are we supposed to sanitize our homes or cars? Best regards, Myriam Garzon
Miami-Dade	General	Delaying of opening of the economy with some distant restrictions does harm the general population special economical and will not help the um avoidable second wave of this pandemic, which could be deadlier but closing the economy is not going to prevent it
Hillsborough	Information	I don't really agree with a reopen anytime soon. Def not before mid May at earliest with the volume if postivescwecstill have coming in. Now with info that the covid can spread thru the air conditioning, what measures and safeguards are going to be implemented towards offices, restaurants or any business indoors with air conditioners? I'm a high risk person as us with a lung condition and my job is talking if reopening the office, while this whole time we've had several of our recruiters in the office. So if they're asymptomatic and in there it's going the the ac in the building. So I'm really interested in the safeguards you have in place for this. Thanks! Tracy
Hillsborough	Healthcare	I really think we should do another 30 days to be honest… I work in an assisted living community and the thought of our employees going out in public and bringing back some thing that they may not know if there are asymptomatic it's just scary it doesn't a make any sense to re-open right now even with restrictions... I would love to see Florida lead something in a positive direction...
Orange	General	I would like for the state begging opening up. At least open the gyms and the state parks I want to go kayaking again. I work at the federal Bureau of prisons I deal with this virus and other stress every day and I'm at work every day and I'm stuck at home after a long 16 hour shift. On the weekends I'm just stuck at home. Let's start opening this back up. Also there never any groceries by the time I get off work and most people don't see correctional officers as first responders so I can never get any food from the grocery stores

AMERICAN OVERSIGHT

Palm Beach	General	RON DESANTIS IS A MORON THAT DOES NOT EVEN KNOW HOW TO PUT ON A FUCKING MASK HOW IS HE THE FLORIDA GOVERNOR https://twitter.com/RexChapman/status/1251300355582935046?s=20
Lake	General	Please reopen Lake County on May 1st. We don't have very many positive cases here.
Indian River	General	I believe we need to reopen the state and let people get back to work. The small businesses in my area are hurting really bad and some may never recover from this. I believe that we can open up businesses safely and limit restaurants to 50% capacity and people will be careful. We are suppose to be living in America where we have freedoms and we aren't having that right now due to a pandemic that isn't as bad as they have said it was going to be. They have scared us into Communism. We must get back open to save our country from becoming something that it was not intended to be, we can't let our freedom get taken away. Please open the beaches and the businesses before it's too late. Set the pattern to get America back on track.
Hernando	General	Reopen yesterday please
Duval	Recreation	We are for reopening Florida. We have kids who play baseball and softball and are ready to get back on the fields. Our 12 year old boys are potentially missing our on Cooperstown. We're ready to get on with our lives and get back to the field. Please re open Florida!

AMERICAN OVERSIGHT

Lake	Accommodation	I own and operate a hotel in Lake County, Florida. While hotels are considered an essential business in the current guidelines, they are dependent upon the ability of people to travel as well as the ability to serve food and beverage for the travelers. The crippling restrictions that have been put on the food and beverage industry make this task almost impossible. Furthermore, Lake county is an area that has been minimally affected by the virus, unlike some of the cities and counties in Southern Florida. I believe that the current situation in Lake County warrants a very efficient and phased-in reopening that reflects much less restrictive guidelines although also encouraging a responsible approach to sanitation standards. Restaurants could have tables more spaced out, limit tables to six people, have sanitation standards for cleaning menus and dry surfaces, and require servers to wear masks, in this initial phase, for example. Many of the restaurant owners I know are currently on the verge of bankruptcy. It is urgent that they be allowed to reopen immediately before they are finished financially. The damage done to our state's economy as a result of closing it up for business cannot be underestimated. We must start a phased-in reopening immediately if we expect the majority of our businesses to survive this. They are not on government salary, do not have retirement plans, and have put most of what they have made back into their businesses, of which they have really been robbed, possibly never to get an equitable return on their investment again. Please start a phased-in reopening of our businesses in the State of Florida immediately. Thank you for the opportunity to weigh in on this most important topic, and warmest regards.
Pasco	Recreation	We need to open up so people can work.
Polk	Government	Give county commissioners authority to open based on local conditions
Lake	General	Don’t open too soon!! I for one am one of the at risk with asthma and lung issues. There are too many people that don’t take this seriously and we need to stop the spread. My fear is if we open too many of the public entities we will see another spike. Follow California’s lead...everyone must wear a mask when they are around others, even outside. Make changes in the public places where 10 or more gather...It’s for EVERYONES safety. I miss my children and grandchildren.

AMERICAN OVERSIGHT

Palm Beach	Recreation	As a physician the chances of contracting this or any other virus outdoors in the sun, heat and humidity is very low. All beaches , parks, golf courses should be open state wide. Germany and Sweden both proved that there is no statistical difference in the virus r0 between social distancing hand hygiene and limiting large gatherings and home and business lockdown it was still equal to 1. This virus will not go away and there wont be a vaccine for several years. There has never been a vaccine made in 18 months in the history of mankind nor has there ever been an RNA or DNA vaccine ever to my knowledge. Only herd immunity along with current repurposed medication will get us through this. It will take at least 60% of the population infected to have heard immunity. Open the economy up let businesses make their own decisions the at risk population can stay home if they choose and limit large gatherings till September
Broward	Government	Please reopen the economy immediately! I can no longer afford to live without any source of income. I'm a business owner in Broward county Florida. Thank you. Also I have not received any government assistance.
Hillsborough	Professional Services	Reopen services to the public with social distancing and cleaning protocols in place.
Pinellas	Healthcare	Please open beaches & state parks for walking, running, swimming.....limited hours, during mornings & late afternoons/early evenings....I exercise 2x a day, morning & after dinner.....Dunedin Causeway is packed ....impossible to keep 6' distance.....walking, cycling, dog walking, roller blades, runners, etc....like the Pinellas Trail....allows residents to have a variety of exercise. Parking should be allowed, with every other parking space..... free parking. Gyms should be the last to open, with limited members....being a daily gym goer...I would never be able to go back with the equipment so close together & the classes, eg. Yoga, Pilates always packed.
Pinellas	Healthcare	I'm writing to ask you to please have the state of Florida continue with social distancing and stay at home guidelines. Even though I've lost my job as a health care worker, I feel strongly that if we re-open too soon we will see a resurgence in cases and have more cases amongst everyone in the community. Listen to the health experts and keep Floridians safe. Until more testing is available I won't feel safe going out in the community. Thank you- Keri Woloszynski
Duval	Finance	I Aaron Christopher Easley. Need help. I need financial help de to my stimulus check if filed gets snatched by child suport. I cant be mad but in dier times why? I need help as i make $2k a month and great portion goes to my son. 13 years old. I need help please! Iwork at 2023 jammes rd Jacksonville fl 32210. I need help...
Alachua	General	yes, we should open all businesses as soon as possible, with the correct precautions in place, of course...

AMERICAN OVERSIGHT

Hillsborough	General	I feel that we should open back up on May 1, 2020 with guidelines and in phases. Phase 1 starting 5/1/20 restaurants can open back up to dining in with 1/2 capacity and no one sitting at the bar and using every other table. If offices have people next to each other make their shifts where for 4 weeks only 1/2 the office is in and the other 1/2 comes in on the odd day. Barbers/Hair dressers can make sure that they are wearing proper PPE and only 1 person per time in the chair, once again if the chairs are closer alternate days when they will be in. Rodeos/4H and FFA need to get back to competing and showing. Agriculture needs to be back open 100%
Duval	General	As an adult who lives in America (a supposedly free country) I would really like to have my feeedoms back! The freedom to go out and shop, go to church, go to a dine-in restaurant, go to a movie, etc. I know how to practice social distancing and wash my hands effectively and not touch my face, etc. Those at high risk can still choose to stay home if need be, but it's high time that the rest of us have our freedom back!
St. Johns	Food	I am a mother of 7 and I am also 6 months pregnant. I have worked at the same sit down restaurant for 11 years. Losing my job has been rough.... especially with unemployment not coming thru. However I feel reopening inside dining is not a good idea at this time. There really isn't a way to have social distancing. The server and cashier will still have to be in close contact. Along with lines at the door or even seating. I feel safety is important to all. Also along with school now being from home. I don't see how parents can start working and leaving their children home alone to do schooling. I hope and pray we wait to reopen the inside dining option.
Duval	General	I don't think it's a very good idea to reopen FL. What I've been noticing since the beginning of COVID-19 is that a lot of individuals out in public aren't practicing social distancing. To include the wearing of gloves and face masks as well. Also, I noticed a lot of seniors out in public not wearing gloves or masks. Just a week ago I witnessed a senior shopping at a particular Winn Dixie for two items and that individual wasn't wearing gloves or a mask. Also, since the parks and beaches have reopened I noticed that there have been many individuals coming from different cities and states just to visit these parks and beaches, which puts FL more at risks and increasing the number of CIVID-19 positive cases. Please, reconsider keeping FL closed until a curable vaccine has been established. Thank you.
Lake	General	Reopen May 1st.
Pinellas	Professional Services	It's much too soon to consider reopening any business that puts people in close proximity to each other. Covid-19 is a very dangerous and easily transmitted disease. We don't even have adequate testing yet! 20% of our population is over 60. So many of our employees are personal service workers who come into close contact on a regular basis with an older and less healthy customer base. We can't afford to open non-essential business until testing is in place to assure that the disease is under control and can continue under control. We don't want to look as foolish as Georgia's government and business community!

AMERICAN OVERSIGHT

Broward	Professional Services	Dude, are you freaking out of your mind? Close everything damn the economic torpedoes. “Nice to see you still have a job dead person” the numbers are rising even with us social distancing and staying inside. This is not difficult to understand.
Pinellas	General	Please do not open the beaches, yet. Wait 2 more weeks to make sure the death rate is down to 0 and their are no more cases... I would like to see the impact of Jacksonville first, one more week for them and I will feel more comfortable. As of today I haven’t got my unemployment check, if more people get infected my fear is that I will have to go even longer without any income. I liked what DeSantis said today, that he is not in a rush.
Brevard	Government	I think we need to keep doing what we are doing through May. I live in a county where a lot of people still are out. If we open things up it will just raise the chances of many more cases. Our cases have not been going down for consecutive days. All the health folks say it is too soon. If we open now I fear the last 30-45 days would have been a sacrifice for nothing. I feel like by asking our opinion your asking what will look best for the governor. Don’t make this political. Keep people safe.
Pinellas	General	Good Afternoon..... I have grave concern for those that want to rush to re-open Florida. I believe that the reason that Florida has been able to keep lower positive numbers than the governor said was anticipated early on was due to us having knowledge of COVID19 prior to their being an influx of cases as what happened with NY. Because of this knowledge, some actions/social distancing were taken. Because there is now the belief that many people are asymptomatic, that the virus may flair up in the fall, many unknowns about the virus, not enough testing although I realize it has been ramped up, and there are many people still not taking the appropriate precautions, I believe opening up without strict proper protocols may be a disaster. For instance, while I wear a mask into work (I mostly telework but do have to go in 1x a week) barely anyone else is wearing one. So it appears that I may be protecting them, but no one is protecting me by them not wearing masks. I have 2 elderly parents, a sibling with cancer and a sibling that just had open heart surgery and thus am very concerned. I still see people congregating in the street while walking their dogs. While I use instacart and deliveries and whatever wipes I have to clean the items for both myself and my parents, other folks are not taking these same precautions. I think it is a grave mistake to open up gyms (and I do go to the gym and miss it since closures), a mistake to open movie theaters and a mistake to open any business that both social distancing and requirement of mask wearing is not in place and the biggest mistake of all would be to open up for tourism. I would love to have a haircut, have my dog groomed , go on vacation, and actually pick out my own things at the food store, but I don't and would not do any of those things at this time. The fact that there are more positives due to more testing and the argument that percentage wise the curve is flattening, does not make any sense to me given the theory of numerous asymptomatic positives that are an unknown. The only suggestion that I have at this time is to open things that would not risk the lives of Floridians. FOr instance, they are saying the outdoors/open space is fairly safe so for the beaches --- to perhaps open then from 6 a.m.-9 .a.m for those that want to social distance walk, run etc.....and hopefully to prevent the crowds of hangouts and swimming etc. with our beautiful weather due to early limited hours. I'm really not sure what else could be

AMERICAN OVERSIGHT

Hillsborough	Government	The stay at home order should be lifted and life resumed to normal. Our infection rate is .0001% of total population and our death rate is < 1% It is RIDICULOUS that this state should be ordered to stay at home and further and be subjected to these restraints. Our economy is WAY more important and Desantis is starting to kill Floridians every day he keeps us closed. It's time to get going. My decision to vote for him ever again rides on how he let's this state fail, or pull ahead and get going. ACT NOW!
St. Johns	General	Governor Desantis, First, thank you for your leadership during this crisis. Second, I am a small business owner and a mother, therefore my priorities are opening my insurance agency to the public--following strict sanitation and distancing protocols--and being able to take my son to his recreational soccer league. I don't expect to go to the movies or a spa, but giving my 9 year old son a sense of normalcy is long overdue. Thanks,
Bay	General	I understand that people are tired of being cooped up. I also how difficult it is being out of work (especially in light of the horrible delays and issues with unemployment!! Pending claims, unable to claim weeks and non-payment) However, all that aside there is no definitive proof that the virus can only be caught once. Much like the common cold it is still a VIRUS. Therefore in my opinion I think it would be best not to flood the public too much at once. In other words choose carefully what is opened and to what end...no more than the allowable amount of people in a business to safely maintain the 6 foot rule. This means that owners and Managers would need to be very diligent in protecting all patrons the ability to have 6 feet between themselves and the next person. Thank you for your time!
Orange	Tourism	Florida's tourism industry is NOT ready to re-open. We understand that the "curve is flattening", but we are still averaging 30,000+ new cases country wide. Re-opening our theme parks will make our numbers spike drastically. No matter how many precautions we try to put in place, it's impossible to control the hundreds of thousands of people we'll bring in everyday. We're all anxious to get back to work and our daily routines but not at the expense of putting our families and selves at risk in these times. Please do not rush into re-opening our state while the numbers are still rising at this drastic rate.
Hillsborough	Government	Governor, please reopen our state and beaches. As long as we do it with caution, all should be ok: we all need to get back to work and the virus ISNT going away. We need to build immunity and fight this. Thank you for all that you do. I'm a big fan us

AMERICAN OVERSIGHT

Lee	Retail	All retail should be opened. How can you justify having all the big corporate stores open: Home Depot, ace hardware, target, Publix and Walmart, but not allowing small business, mom & pop stores to open? It makes no sense! And beaches, open them for walking, swimming and even sunbathing! At least to residents! This is government over-reach! Please get us out of our homes! Get us back to where WE CHOOSE to go
Pasco	General	My father is a survived Vietnam veteran. He is 72. Has heart disease and has already had tripple bypass heart surgery as well as several heart stints . My brother in law is at Tampa general as we speak. He is stable but in heart failure and waiting for a heart transplant for the last two years. My wife is a insulin dependant diabetic and an asthmatic. I myself struggle with asthmatic issues. My brother also struggles with asthmatic issues. I would gladly stay home to protect all of them even knowing I have been waiting a month for unemployment with nothing paid out to this day. Please reconsider opening anything at this point. We need at least another month of staying inside to stop this spread. We have come so far to ease up anything now. We are nearing the finish line and I truly believe we can finish strong if we stay the course as we are. All life is precious and cannot be replaced once lost. Please consider this and imagine that your family is high risk. We also need to speed up payments for unemployment. Approve all that have applied and have been waiting for unemployment . If they are fraudulent after payment has been sent and after the pandemic then after the crisis you can go after them for repayment. Now is not the time for political red tape. People need money and they need it now. Thank you all for your time and understanding. May God bless you and give you guidance .
Martin	General	Do not open FL yet. Way too soon.
Miami-Dade	Food	We need to open up the economy. Do exactly what Phase One of Trump's reopening guidelines suggest. Significantly more people are being harmed by unemployment, mental health issues, and financial issues than by the virus. We need to BALANCE our economy with fighting the virus. You can't just turn one thing completely off to fight another thing because it just brings more problems and is very irresponsible. Keeping the economy closed will ruin significantly more lives than by reopening. PLEASE OPEN!

AMERICAN OVERSIGHT

Bay	Tourism	Governor: I have been involved in promoting the tourism industry at Panama City Beach since 1976, and I have served on the current Tourist Development Council Board of Directors for the past 14 years. The tourism industry from Pensacola to Daytona Beach depends primarily on the "summer" season. (Memorial Day to Labor Day) The attractions and tourism partners in Central Florida also rely on that critical period of the year. I manage Shipwreck Island Waterpark at Panama City Beach, and the month of July represents 72% of our annual income. That is why I believe it is imperative that we don't get greedy, and open our state prior to having adequate testing and truly having the virus on a downward trend. If we open too early, and have a surge during the summer, we might be forced to shut down in July, and that would be devastating to the entire tourism industry. Every day we lose hurts, but if we lost July, many of the small businesses who depend on tourism would close their doors forever. Please don't let us open, and then have to shut down at the most crucial time of the year. Thank You, Shelton Wilkes General Manager Shipwreck Island Waterpark www.shipwreckisland.com

AMERICAN OVERSIGHT

Manatee	General	Dear Governor DeSantis and Task Force Members- Thank you for presenting the public with the opportunity to provide comments regarding re-opening our state. As a nearly native Floridian (resident since about age 2), and someone with deep roots in my small community, I can tell you I want nothing more than for us to resume a somewhat normal existence. My husband and I are also expecting our first child, a son due in July. However, I do not think we are positioned to resume normal operations at this point. I have been working from home for roughly six weeks now and will continue to do so indefinitely until the virus is in a manageable state. I have done my part to stay home and socially distance from friends and family. We still support local businesses through ordering take-out food and purchasing grocery items. We also utilize online shopping whenever available. I encourage you to extend the safer-at-home order through May 31 or further if necessary as recommended by our public health officials. I would much rather stick it out in an uncomfortable situation than to open up too early and have an even bigger crisis on our hands and end up back in a safer-at-home order later in the year. I would also love to see some sort of public marketing campaign encouraging people to wear masks in public. When I have had to venture out, it is disturbing how many people do not wear masks or keep a 6 feet distance. It makes shoppers feel uncomfortable, as well as store employees. Please also encourage/mandate essential business owners to have employees wear masks while on the job. I strongly encourage you to keep theme parks and attractions closed and discourage tourism until deemed safe. We really do not need unnecessary travel into our state and large gatherings of people. There is a VRBO house in my neighborhood that is a constant source of concern. We finally saw a halt in our-of-state visitors about a week ago. I understand that this is our primary source of state revenue and sales tax dollars, but we will be fine another month or two. Our season is over anyway.
Collier	General	Please re-open the State. Thank You
Pinellas	General	Florida needs to stay shut down for at least another 2 to 3 months to be sure all is ok

Broward	Management	I'm a Facilities Manager for one of the larger Catholic parishes in the area. This is also following 19 years as a private school K12 school administrator. Given trends that we were seeing prior to the shutdown, a phased approach is the only option. That being said, would suggest the following (again giving consideration to trends we were seeing in the 14 days prior to the shutdown at the church): - Maintain all restrictions for at-risk populations. Period. - Remind the general public that flattening the curve is not the same as "zero risk of infection" and never was. - To allow restrictions and safety for at-risk, mandate openings have a set period for only at-risk customers/clients/visitors. This will allow institutions to double their efforts during these periods to maintain the highest level of sanitation while also limiting persons present. - Mandate suppliers add social service institutions and others to those currently receiving priority ordering for certain supplies (ie: commercial packages of hand sanitizer). With any reopening, many are not logistically prepared and are unable to obtain bulk orders necessary. For example, a restaurant cannot obtain the case of sanitizer wipes they will want to use to increase sanitation because right now online ordering for many vendors (Amazon) is restricted only to government/medical and those who have them (ie: Publix) cannot provide the quantities required for business operations. - It needs to be reminded that mandating masks simply isn't practical. People cannot get them, most who have done facility management know the "bandanas" people are using are a placebo and many have breathing conditions making them impracticable. - Re-opening policies should account for that some locations will have to maintain social distancing by "party" size vs per person. Example, a church will not need to keep a family of 5 who arrived together apart from one another. Their party will need to be separate from others no different than a restaurant. This should be a MAJOR POINT for policy decisions to allow a balance of maximizing capacity while allowing safety in the early stages. (Please Note: This document is exempt under Florida State Statute 119.07 dealing with confidentiality of public record requests given individual submitting them. Additional information available upon request).

Pinellas	Government	I appreciate what has been done by the President and the Governor to knock back the virus that has caused both physical suffering and economic pain for so many Americans. Having said that ... Now is the time to open Florida! I have watched the extraordinary efforts made by the medical and scientific professions to alleviate the physical suffering but I haven't seen an equal response by elected officials to the economic pain caused by the shuttering of businesses, loss of household income, damage to retirement savings and the loss of employment that will almost certainly continue long after the virus is contained. Now is the time for Governor DeSantis to follow the lead of those states reopening. It is time to open Florida. Let the medical community continue the battle to find treatments and a cure, but getting people back to work must be the prime focus of our elected officials. Unemployment checks (if the system can even be made to work) and federal assistance checks are both short term and not anything close to having a real paycheck. People need to have real hope. And, I see far too little effort to hear those asking for consideration while suffering financially because of the forced closures and stay home orders. It is time to focus on the economy. I look forward to seeing the Governor's plan and to seeing the daily number of people going back to work and the number of local businesses reopening. Let us press forward the virus fight, act responsibly (social distancing, masks, and isolating ourselves, if necessary) but also giving us real hope that the "new normal" doesn't mean economic devastation. Final thought … People will be responsible. They will be compliant and supportive. Keep Florida closed and people will not only lose hope but will also become less compliant over time. People have rights and they won't just give them up. But, they'll always do the right thing, too. Now is the time to open Florida! Be bold. Just look at Georgia.
Pinellas	Healthcare	Working in the dental field, there is not enough adequate access to PPE at this time. Lack of PPE coupled with the lack of informed and clear recommendations on safe practices leads me to question a safe reopening at this time, or even in the coming weeks. The WHO just announced today that antibodies do not equate to protection from reinfection so at this time is just seems premature to reopen everything and undue the progress we have made. If history has taught us anything, the second wave will come and it will be worse than the first. Becoming overzealous now with the small gains we have now and reopening will lead to insurmountable loss in the future. As the old adage goes, it's better to be safe than sorry.
Duval	General	Please open non essential businesses!!!! It has been long enough. Mental health is a major issues.
Sumter	General	Please open all business. We are adult and can judge for ourself what level of risk we are willing to take. Destroying our economy will have a much larger effect than coronavirus. I'm older and in the official " at risk" group. I say ... open now. I'm willing to protect myself and don't need government to act as my mother..
