Re: Public Information Request No. R007558

Dear Mr. Evers:

This e-mail is in response to your public information request to the Office of the Attorney General ("OAG"), received by the OAG on December 14, 2020.

The OAG has reviewed its files and has located the attached documents that are responsive to your request. Although the Public Information Act allows a governmental body to charge for copying documents, the attached documents are being provided to you at no charge. The OAG has redacted employees' dates of birth from the attached documents pursuant to the previous determination issued by the Open Records Division in Open Records Letter No. 2016-11398 (2016). See Open Records Decision No. 673 (2001) (providing that Open Records Division can issue two types of previous determinations to governmental bodies). The OAG has also redacted personal e-mail addresses from the attached documents pursuant to section 552.137 of the Government Code and the previous determination issued by the Open Records Division. See Open Records Decision No. 684 (2009) (governmental bodies may withhold certain information without necessity of requesting decision from Open Records Division).

Additionally, the OAG has redacted access device numbers that are confidential under section 552.136 of the Government Code and employees' personnel cellular telephone numbers that are confidential under section 552.024/552.117 of the Government Code. Because our office is prohibited by law from releasing this information to you, we have removed it from the attached documents. Normally, we must request a ruling from the Open Records Division before we can withhold information. However, sections 552.024/552.117 and 552.136 allow us to withhold this specific information without requesting a ruling from the Open Records Division. You have the right to appeal our decision to withhold this information from you. Instructions for appeal are attached. If you do not want to appeal, you do not need to do anything else. Please note that we are only withholding the specific categories of information that are confidential under sections 552.024/552.117 and 552.136.

The OAG believes the remaining information responsive to your request is excepted from required public disclosure. We have requested a ruling on this information from the Open Records Division of the OAG. A copy of our brief to the Open Records Division is attached.

If you have any questions, please contact me at publicrecords@oag.texas.gov.

Sincerely,

Lauren Downey
Assistant Attorney General
Public Information Coordinator
Office of the Attorney General

Monthly Microsoft Software Security Patching

Software Update: Workstation Security Patching

New security patches for agency workstations will be deployed Tonight after 10pm. A workstation restart may be required to complete the deployment process. These updates will appear in the software center as available for the next week. This is to allow you install and reboot your machine as necessary when it is convenient for your work schedule.

If you do not perform these installs during the 1 week grace period, they will be force installed, and your machine will likely be rebooted to complete the installs.

If you have multiple computers, please ensure that they are turned on and connected to the network to receive these updates. If you have a co-worker that you know will be out of the office, please turn their PCs on so they can receive the updates.

Why is this important?

Security patches are deployed on an ongoing basis to ensure agency workstations are protected with the latest updates. The update process is **NOT** complete until all patches have been applied and workstations have been restarted.

What if I shut down my PC by accident?

If you shut down your workstation, the updates will be applied when it is powered back up. You will then have to allow the updates to cycle to completion.

If you have a laptop and the laptop is not docked at the office during the deployment, the updates will be applied next time the laptop is docked.

The monthly updates being deployed to agency workstations are critical to the success and health of A&L resources, and ensures they are protected with the latest security.
