Hi Christi,

We got Michelle and are still hoping for Karin.

Will you be giving the overview from NCSL?

Thanks.  
Joe

Hi Joe,

Here is our second choice for a speaker on prisoners: Michelle Davis, Maryland.

Michelle L. Davis  
Redistricting Coordinator  
Maryland Department of Legislative Services  
Office of Policy Analysis  
90 State Circle, Rm. 107  
Annapolis, Md. 21401

**To:** Kolman, Joe <[jkolman@mt.gov](mailto:jkolman@mt.gov)>  
**Subject:** RE: Speakers on prisoners

Hi Joe,

Thanks for reaching out. NCSL would be happy to give an overview on the reallocating of incarcerated persons for redistricting purposes. I agree with you, Karin Mac Donald, would be a great speaker. Another possible speaker could be Aleks Kajstura, legal director for the Prison Policy Initiative. Let me talk with Wendy and see if we can come up with additional names.

Also, thanks for asking about Salt Lake City. It was a fast and furious meeting with over 450 attendees, but it went really well.

Thanks,  
Christi

Hi Christi,

Our commission is hoping to have a couple of speakers via Zoom at the Aug. 17 meeting regarding possibly adding reallocation to our duties. I think they were hoping someone from NCSL could maybe give an overview of what other states are doing, how they are doing it, maybe any issues that come up. And then maybe someone who's doing it. I'm really hoping Karin would do it, but maybe you can suggest some back ups too?

Thank you. Hope Salt Lake went well.

Hi Joe,

Hope you're well! I'm sure you're buried in redistricting stuff, but I'm working on a water story about drought management in the Big Hole. Can you point me to the last time someone introduced a bill to require a minimum average annual streamflow in Montana streams? I'm looking for the bill number and year.

Thanks!

**Categories:** Districting Commission Public Info Request

Dear Mr. Hayfield,

Thank you for your interest in the Montana Districting and Apportionment Commission. The commissioners will be meeting soon to determine next steps for their work in dividing the state in to congressional and legislative districts. Those decisions will include timelines to start and complete their work, as well as about how the public will be able to submit comments, feedback, and maps. Once they select a next meeting date, information will be available at their website: <https://leg.mt.gov/districting/2020-commission/>. On that page, you can sign up to receive emailed updates about the commission, including meeting dates. That's the best way to stay up-to-date with commission happenings. I hope this information helps.

Sincerely,

Rachel Weiss

Dear Mrs. Sherley,

I am writing as a person from the United Kingdom who was so taken by a recent BBC documentary about Montana that, having decided a long time ago that the United Kingdom was no longer for me, has virtually moved (if not physically moved) into the state and would therefore like to know if I make a formal submission to your committee following the announcement that Montana is to gain a second congressman.

If this is possible, may I ask in what manner the submission may be made so that the committee can best understand my idea and whether or not (due to the seven hour time difference between the UK and Montana) when the committee meets to receive submissions, it would be possible to do so over the Internet (ideally by Zoom but whichever platform the committee feels is best) in order to explain my reasoning for my suggestion.

Yours sincerely  
Harry Hayfield

Dear Commission,

In a hyper partisan era of politics, I'm relieved to know that Montana has an independent group tasked with dividing the state. As key components to creating new districts, your group must divide the population evenly, be compact, and comply with national voting laws. Additional consideration must be cast to ensure indian reservations are contiguous within the new districts, and that partisan lean is minimized.

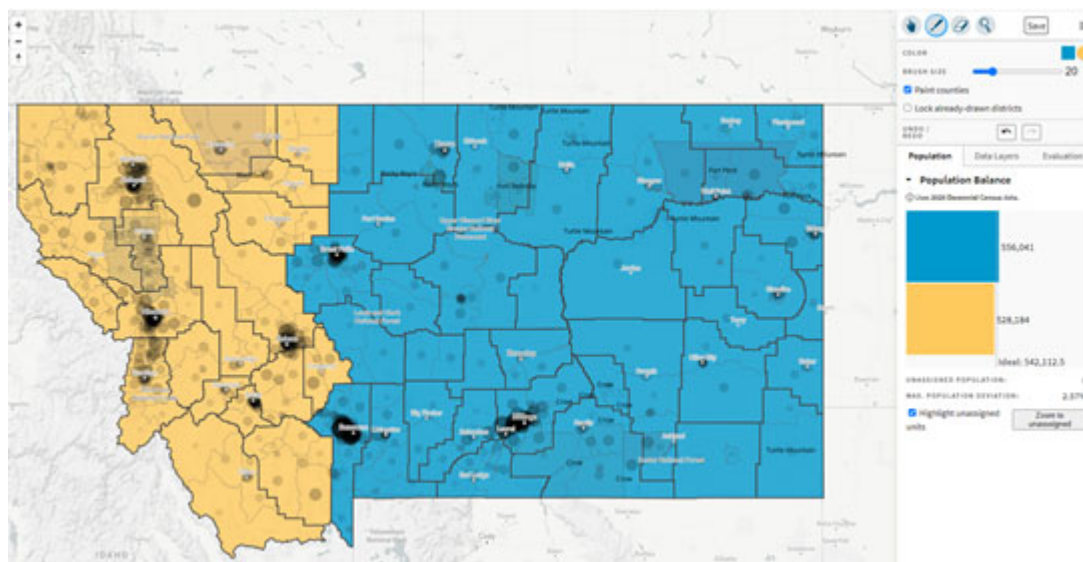

I think the cleanest way to do this is split at the county level, along an East/West divide. This proposal equally divides the metro areas, parses population evenly, minimizes legislative districts input to retain congressional autonomy, ensures tribal boundaries are respected, and aligns with regional economies/sentiments.

I'm happy to provide a shapefile if that is easier as well.

Thank you for your time and I look forward to the proposed maps.

Sincerely,

Sam

**Subject:** [EXTERNAL] District map proposal

I have attached my proposal for districting in Montana based on the new Census data and reflecting a fair and equal population based on a north/south delineation. east/west alignments make no more sense in Montana if the population is to be truly balanced given the dramatic shift in growth in the western counties, hence the more favorable North and South Districts.

Thanks for the opportunity to provide my public input.

**Subject:** [EXTERNAL] Map for new congressional district

The new congressional district for Montana should allow all Montanans the opportunity to be represented by making the district competitive. I have pasted a copy below of a redistricting map I recommend.

Recently I visited my hometown of Conrad where I learned that increasingly people in north central Montana are being referred to Kalispell and Polson for health care. It is important for people in north central Montana to have political influence in the area that provides essential services for them.

Of course, historically and today, many residents of North Central Montana own or visit vacation homes in the Kalispell region. The ties between these areas is growing stronger because of health care.

**Subject:** [EXTERNAL] Redistricting Map

Re-Districting Co0mmittee,

I've investigated the geographic composition of Montana and come to one conclusion. The redistricting for the second US House seat needs to be accomplished using East/West guidelines.

Western Montana has a cultural and geography that is very similar. Regarding its political composition, there are both Left and Right portions of the area that balance. For this reason I believe that the map that follows is a fair way to achieve the goals of the Re-Districting Committee while at the same time complying with State of Montana statutes that require balanced distribution along party lines and population.

Thank you for your time.

Mike

**Subject:** Re: [EXTERNAL] Congressional redistricting

Hi,

I selected a map from one of numerous ones sent to me by a friend because I am interested in my representation in congress. The one I submitted was one that was closest to what I would like to see happen. Actually I don't like that it divides Gallatin county as I believe all of the county should be included in whatever district they wind up in. The north to south division is what I remember when we used to have two representatives and makes sense because the industry and professions of the working people living in the east is very different then the people living in the west side of the state.

Please don't make these districts based on politics but rather about what will be the best representation of the people living in these areas

Thank you for the difficult work on this commission,

Brad Lotton

**Subject:** [EXTERNAL] Congressional redistricting

Dear Commissioners,

I would like to speak in favor of dividing the State into congressional districts similar to the map I have attached to this e-mail. The division should be North to South and not pay attention to any supposed political advantages to either party. The new districts should not divide counties or towns and should allow for equally populated districts as much as is practical.

I am excited that we will have a new representative regardless of his/her political affiliation that will actually be able to represent friends, neighbors and myself who have our own unique issues in our respective geographical area. Thank you for creating districts that will be fair and balanced representation according to the people living and working in the districts with no regard made to political differences.

**To:** Sherley, Laura  
**Subject:** Re: [EXTERNAL] Congressional Redistricting Map

Sorry, I got that from someone I agreed with and dont have time to do maps now.

I did try the maps once and I believe the population figures on the map did not agree to the 2020 Census Quick Facts by county.

Gallatin is the county in my scenario that needs to be split, either 32,000 or 45,000 people in Gallatin need to go to western district depending on whether Glacier County is moved to western district or not.

Please note that the 16 full counties I used for western district were 496,834 people. To get exactly equal districts, the western district would need to add 45,279 from Gallatin County if Glacier County stays in the esst district.

The full 16 counties I used for the west district are:

**Missoula**  
**Flathead**  
**Lake**  
**Lincoln**  
**Mineral**  
**Sanders**  
**Ravalli**

**and**

**Lewis & Clark**  
**Silver Bow**  
**Deer Lodge**  
**Beaverhead**  
**Madison**  
**Granite**  
**Powell**  
**Jefferson**  
**Broadwater**

**I got the population figures for those counties from the 2020 census Quick Facts for each county. Again, those 16 counties totaled 496,834 people.**

**Subject:** [EXTERNAL] Congressional Redistricting Map

Commissioners and Chair Smith,

This proposed map is based upon population. Please note that the attached map has 16 complete counties from northwestern and southwestern Montana with a 2020 population per the Census Bureau Quick Facts website of 496,834. One half of Montana's 2020 population of 1,084,225 is 542,112. Therefore an additional approximate number of 45,000 people from Gallatin County would need to be added to the western district to have districts of the same population. In the event that it is found that this division would divide Gallatin County's major population areas too onerously, then I would propose that Glacier County could be added to the western district, as an alternative, which would mean only approximately 32,000 people of Gallatin County's total population of 118,960 would need to be split off to the western district.

This is not based on political data and complies with Montana statutes and constitutional requirements. It creates East and West districts which follow historical precedent, it minimizes county and city splitting and the districts are compact and contiguous, faithfully representing the character of Montana.

Thank you very much for your consideration.

Commissioners and Chair Smith,

This proposed map is based upon population, not political data, and complies with Montana statutes and constitutional requirements. It creates East and West districts which follows historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties.

Please consider the following when selecting Congressional maps:

1. Do not create “competitive” districts – based on politics! The Congressional district lines should be drawn based upon Montana law, NOT gerrymandered based on political data.
2. The Congressional Districts should comply with Montana law and constitutional requirements. The Congressional District should be within 1% with rare exceptions of up to 3%. The map should minimize splits of cities and counties. The Districts should be compact and contiguous.
3. Precedent is an important concept that should guide the Commission. Historically, Montana Congressional Districts have been drawn to divide Montana into an East and West District, with the line going from North to South.

Thank you for your consideration.

## Troy Libby Chapter

Laura,

Thank you for the follow up on our submission. We don't have links to the maps we created at the following website, <https://districtr.org/plan/44308> [districtr.org]. However, we can provide additional information.

Our priority is to keep each county intact, therefore the details are simply using the current county lines as the boundary lines for each Congressional District.

Map 1. Blue Area consist of the following counties: Lincoln, Sanders, Mineral, Flathead, Lake, Missoula, Ravalli, Glacier, Pondera, Teton, Powell, Lewis and Clark, Granite, Deer Lodge, Silver Bow, Beaverhead, Madison, Jefferson, Broadwater, Toole, Liberty, and Hill.

Map 2. Blue Area consist of the following counties: Lincoln, Sanders, Mineral, Flathead, Lake, Missoula, Ravalli, Glacier, Pondera, Teton, Powell, Lewis and Clark, Toole, Liberty, and Cascade.

Thank you again for your consideration of our submitted maps,

Mitchell Walters

Troy Libby Chapter

Commission Chair Maylinn Smith, and Commissioners Jeff Essmann, Joe Lamson, Dan Stusek, and Kendra Miller:

Thank you for taking public input on the very critical redistricting process in Montana. We submitted maps to this Commission in June and appreciate the opportunity to resubmit maps for your consideration using the 2020 census data.

We have watched and reviewed the commissions actions for the past few months and we are pleased to hear that the Commission plans to keep this process non-partisan and that you will complete your proposals without political favoritism. We are, however, disappointed that you chose not to apply the same 1% deviation to the Congressional map as you outlined for the State Legislative map, as required by the Montana Code Annotated. We believe that the end goal of equal Congressional Districts can still be achieved.

Attached are two maps for the Congressional districts that we would like the Commission to consider. Each is within the 1% deviation and divides the State into two equal parts, by population and meets the Commission's other criteria.

Finally, we look forward to seeing your Commission's proposal when it is available for public comment, which follows Montana State Law and does not divide counties within Montana.

Thank you for your consideration,

Mitchell Walters

Dear Chair Smith and Members of the Committee;

Attached is a proposed map creating an East-West split and follows historical precedent. It minimizes splits of cities and counties. It is based on population, not political data.

Thank you for following the law and constitutional requirements in this redistricting process.

Sincerely,

Sonya Quackenbush

Thank you. Here is the link and information for the East West Continental Divide map. I also didn't complete my last comment sentence. It should have read, "It minimizes cities and counties being split." I grew up in Eastern Montana and spent 50 years in Western Montana. The Continental Divide is the most natural and fair dividing point there could be.

**Subject:** [EXTERNAL] Congressional Redistricting Map

Commissioners and Chair Smith,

Please consider the following when selecting Congressional maps:

1. Do not create “competitive” districts – based on politics! The Congressional district lines should be drawn based upon Montana law, NOT gerrymandered based on political data.
2. The Congressional Districts should comply with Montana law and constitutional requirements. The Congressional District should be within 1% with rare exceptions of up to 3%. The map should minimize splits of cities and counties. The Districts should be compact and contiguous.
3. Precedent is an important concept that should guide the Commission. Historically, Montana Congressional Districts have been drawn to divide Montana into an East and West District, with the line going from North to South.

Thank you for your consideration.

**Subject:** [EXTERNAL] Districting and Apportionment Map and Comment Submission

Districting and Apportionment Committee,

I am submitting this proposed map for the Congressional redistricting as an attachment. I have reviewed this map and while not perfect, I have tried to make it the most sensible east/west split for the voters and citizens of Montana. The mountainous west and mostly agricultural east have different issues to deal with, but also can work together for our state. This map also keeps the Blackfeet and CSKT reservations in one district. This map achieves a .02% population deviation within the restrictions required as well as in compliance with Montana Constitutional requirements and also agrees with the precedent established when there were two representing our state in the U.S. House. The commission should comply with HR506, the Montana Constitution, and all laws that apply to this issue.

Thank you for your work for Montana and your consideration in this matter of such great importance.

Good morning Mr. Ellinghouse,

Thank you for your congressional district map submission! If possible, would you be able to send a link to your map on the program you used to produce it? It is easier for the commission to analyze if they are able to zoom in with greater detail on your recommended lines.

Thank you,

Laura Sherley

**Subject:** [EXTERNAL] Congressional Redistricting Map

Commissioners and Chair Smith,

This proposed map is based upon population, not political data, and complies with Montana statutes and constitutional requirements. It creates East and West districts which follows historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties.

Hello Laura,

I had difficulty with the original map site that I used, so I rebuilt the districts with a different program. Hope this helps!

To Chair Smith and Commissioners,

I have attached a proposed redistricting map which is based upon population, NOT political data, and complies with Montana statutes and constitution requirements. It creates East and West districts, which follows historical precedent. The districts are compact and contiguous and the boundaries minimize the splits in cities and counties.

Please consider these points when mapping Montana's Congressional Districts.

Thank you for your consideration,

**Subject:** [EXTERNAL] MAP proposal

Hello,

I request that Montana districts be drawn similar to the attached map where districts are in an east-west division. This is to have each district dealing with issues common to their geography and location. The mountains create a natural divider.

Thank you,

Jim Gomolka

Please draw the district boundaries like the one attached. The east and west sides of Montana deal with different issues.

Thank you.

FOR IMMEDIATE RELEASE  
JUNE 8, 2021

## COMMISSIONERS PROPOSE FAIR CRITERIA FOR CONGRESSIONAL AND LEGISLATIVE DISTRICTS

Today, the two Republicans appointed to the Montana Districting and Apportionment Commission released Proposed Mandatory and Discretionary Criteria that will be posted for review and comment by the public over the next month. After adopting criteria for both the Congressional Districting and State Legislative District Redistricting at the meeting to be held July 8th and 9th, 2021, the Commission will draw one line to create two congressional districts within 90 days of receiving the final official census data in August or September. In 2022, the Commission will turn to drawing 100 new legislative districts and assigning holdover state senators to newly drawn state senate districts.

The Mandatory Criteria for Congressional Districting proposed by Republicans Jeff Essmann and Dan Stusek differ from the provisions of HB 506 passed by the recent Montana Legislature. The proposed mandatory criteria provide that political subdivision lines of Montana towns, cities, counties, and Indian Reservations be respected "to the greatest extent possible" and provide definition for the terms "compact and contiguous."

"Our feeling is that most Montanans want two Congressional Districts that make sense and that these objective criteria will reduce the temptation for partisan gamesmanship," stated Stusek. Essmann remarked that "our criteria are the first that recognize the legal and political reality of Indian reservations as communities that deserve recognition on the same level as Montana cities and counties."

The Republican Commissioners proposed a visual measure, a circle, for judging district compactness, and proposed a transportation by maintained road standard to add definition to the term "contiguous." "Even though a district might look contiguous, if you have to be a mountain goat to scale a divide or a rainbow trout to swim across a river stream or lake to get from one part of the district to another, we don't think that is truly contiguous in this massive state of ours" Stusek commented. "The ability to drive from point to point to campaign without having to leave the district seems to be a better test." The Republicans proposed that holdover state senators be assigned to the state senate district that contains the greatest number of residents from their previous district.

Discretionary criteria proposed by the Republican Commissioners called for observing school district boundaries as requested at an early meeting of the Commission by Montana Election Officials. The Census bureau data sets observed those school district boundaries for the first time this census.

| 2  | Please consider my humble submission. It follows a single contiguous line, maintains current county boundaries, and tribal boundaries, and it reasonably splits along party lines, when considering the MT electorate as a whole. Thank you for your consideration.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |   |   |   |
| 3  | Here is a map that fairly creates 2 congressional districts for the State of Montana. Please consider this when you create our new districts.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |   |   |   |
| 4  | I am providing you a fair redistricting map. Please consider using this when making your decision for the new congressional districts.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |   |   |   |
| 5  | Here is my map that describes my proposal for Montana's two Congressional districts. I have attempted to create "east" and "west" districts. It would require splitting Broadwater County in a north-south direction to maintain equality. I'm not sure how this can be done, but it must be possible to maintain equality this way.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |   |   |   |
| 6  | This Congressional map of Montana of my creation on DRA focuses on keeping the southeastern portion of the state within one district, while keeping population deviation low a difference of just under 700 people, with the only county splitting being 5 precincts within Missoula County being apart of the new 2nd Congressional district while the rest of the county is in the 1st district. This map only splits Frenchtown from the previously mentioned splitting of Missoula County. This map focuses on keeping a compact and competitive 1st district.                                                                                                                                                                                                                                                                |   |   |   |
| 7  | None                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |   |   |   |
| 8  | None                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |   |   |   |
| 9  | See explanation in PM 133                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |   |   |   |
| 10 | The plan that I have submitted has 2 fully contiguous districts that are compact, follow county lines, have extremely low population deviations, and keep communities of interest intact. District 1 includes the three most populated counties in Montana (Yellowstone, Missoula, and Gallatin) as well as the counties along that urban corridor. Urban interests in Montana have received short shrift under the representation of our at-large congressperson. This district is also potentially competitive although it has a definite Republican lean. DistrictBuilder rates the configuration with a PVI of R +13. District 2 includes the most rural parts of the state, representing an important agricultural community of interest as well as the reservations and tribal interests. Thank you for your consideration! |   |   |   |
| 11 | None                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |   |   |   |
| 12 | I created this congressional map to follow the flathead reservation border. That one district has a lot of our urban areas and the other district as our agricultural areas. Both districts have one reservation so congress will have to listen to those.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |   |   |   |
| 13 | John Dyas: I would like to submit a proposed map for the Federal Congressional Districts in Montana. This proposed map is based upon population, not political data. It complies with Montana statutes and constitutional requirements. It creates East and West districts which follows historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties. The population of the Eastern district is 541921 (-192) and the Western district is 542304 (+191) No counties are divided except for Cascade County.                                                                                                                                                                                                                                                                         |   |   |   |

| 15 | MT GOP "East West reservations Splitting Cascade only." See above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |   |   |   |
| 16 | I have deep concerns about the fairness of this committee. I've been a Montana voter in Montana for 58 years. When we get two congressional districts the lines should be done by fairness and not political gain. I encourage you to use the map that shows Bozeman and Gallatin county in the east and follow the lines of equal representation.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |   |   |   |
| 17 | This proposed map is based upon population, not political data, and complies with Montana statutes and constitutional requirements. It creates East and West districts which follows historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |   |   |   |
| 18 | The map submitted for redistricting consideration is based upon population and is in compliance with Montana statutes and constitutional requirements. Historically, it follows precedent creating east and west districts. The districts are compact, contiguous, and minimize splits of cities and counties. Thank you for your consideration.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |   |   |   |
| 19 | This proposed map is based upon population, not political data, and complies with Montana statutes and constitutional requirements. It creates East and West districts which follows historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties. The Congressional Districts should comply with Montana law and constitutional requirements. The Congressional District should be within 1% with rare exceptions of up to 3%. The map should minimize splits of cities and counties. The Districts should be compact and contiguous. Thank you for your consideration.                                                                                                                                                                                                            |   |   |   |

The map should minimize splits of cities and counties. The Districts should be compact and contiguous. Thank you for your consideration. |   |   |   |
| 21 | This proposed map is based upon population, not political data, and complies with Montana statutes and constitutional requirements. It creates East and West districts which follows historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties. Thank you for your consideration.                                                                                                                                                                                                                                                                                     |   |   |   |
| 22 | See above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |   |   |   |
| 23 | The map is a proposed model for redistricting. This map is based upon population, not political data, and complies with Montana statutes and constitutional requirements. It creates East and West Districts which follow historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties.                                                                                                                                                                                                                                                                                  |   |   |   |
| 24 | This proposed map is based upon population, not political data, and complies with Montana statutes and constitutional requirements. It creates East and West districts which follows historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties. Please do not introduce "competitive" meaning "politically motivated" changes. Montana deserves better.                                                                                                                                                                                                               |   |   |   |
| 25 | This proposed map is based upon population, not political data, and complies with Montana statutes and constitutional requirements. It creates East and West districts which follows historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties.                                                                                                                                                                                                                                                                                                                       |   |   |   |
| 26 | This proposed map is based on population, not political data, and complies with Montana statutes and constitutional requirements. It creates an East and West Districts which follows historical precedent. The districts are compact and contiguous. They minimize splits between cities and counties.                                                                                                                                                                                                                                                                                                                |   |   |   |
| 27 | This proposed map is based upon population, not political data, and complies with Montana statutes and constitutional requirements. It creates East and West districts which follows historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties. It also similar to how Montana was districted in the past when we had two congressional districts.                                                                                                                                                                                                                    |   |   |   |
| 28 | This proposed map is based upon population, not political data, and complies with Montana statutes and constitutional requirements. It creates East and West districts which follows historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties. It also similar to how Montana was districted in the past when we had two congressional districts.                                                                                                                                                                                                                    |   |   |   |
| 29 | I have a proposed redistricting map which is based upon population, NOT political data, and complies with Montana statutes and constitution requirements. It creates East and West districts, which follows historical precedent. The districts are compact and contiguous and the boundaries minimize the splits in cities and counties. Please consider these points when mapping Montana's Congressional Districts.                                                                                                                                                                                                 |   |   |   |
| 30 | This proposed map is based upon population, not political data, and complies with Montana statutes and constitutional requirements. It creates East and West districts which follows historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties.                                                                                                                                                                                                                                                                                                                       |   |   |   |
| 31 | The attached proposed map is based upon population, not political data, and complies with Montana statutes and constitutional requirements. It creates East and West districts which follows historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties. It is also similar to how Montana was districted in the past when we had two congressional districts.                                                                                                                                                                                                         |   |   |   |
| 32 | See above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |   |   |   |

| 33 | This proposed map is based upon population, not political data, and complies with Montana statutes and constitutional requirements. It creates East and West districts which follows historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |   |   |   |
| 34 | Here is a map creating an East-West split and follows historical precedent. It minimizes splits of cities and counties. It is based on population, not political data                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |   |   |   |
| 35 | This proposed map is based upon population, not political data, and complies with Montana statutes and constitutional requirements. It creates East and West districts which follows historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties. Please consider the following when selecting Congressional maps: Do not create "competitive" districts – based on politics! The Congressional district lines should be drawn based upon Montana law, NOT gerrymandered based on political data. The Congressional Districts should comply with Montana law and constitutional requirements. The Congressional District should be within 1% with rare exceptions of up to 3%. The map should minimize splits of cities and counties. The Districts should be compact and contiguous. Precedent is an important concept that should guide the Commission. Historically, Montana Congressional Districts have been drawn to divide Montana into an East and West District, with the line going from North to South. |   |   |   |
| 36 | This proposed map is based upon population, not political data, and complies with Montana statutes and constitutional requirements. It creates East and West districts which follows historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |   |   |   |
| 37 | This proposed map is based upon population, not political data, and complies with Montana statutes and constitutional requirements. It creates East and West districts which follows historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |   |   |   |
| 38 | This map is submitted as a proposed model for redistricting. This map is based upon population, not political data, and complies with Montana statutes and constitutional requirements. It creates East and West Districts which follow historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |   |   |   |
| 39 | I am in favor of a map that splits both Cascade County and Gallatin County. To me it is the most fair and follows the Montana Laws. I feel that the precedent that we have shown in the past is that districts should be drawn so we have an East District and a West District with the division going from north to south. This map also will comply with Montana law and constitutional requirements. The districts should be compact and contiguous. I have attached a map to show these lines.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |   |   |   |
| 40 | I am an Independent. I am greatly concerned about ideas for drawing the districts along a north/south line. That is not right for Montana, as it would create heavy potential for unfair outcomes based on our populations. This redistricting project needs to meet Montana statutes and constitutional requirements. We must keep Montana districts and elections fair and transparent. The map I have posted below is based upon population, not political data. Historical precedent sets East and West districts. This is extremely important because with Montana's state make up, it guards against the unintentional creation of gerrymandered districts in favor of one political party over the other. The districts on this map are compact and contiguous. This map minimizes splits of cities and counties within as close to 1% as possible, just as the guidelines recommend.                                                                                                                                                                      |   |   |   |
| 41 | This proposed map is based upon population, not political data, and complies with Montana statues and constitutional requirements. It creates East and West districts follows historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |   |   |   |

| 44 | This proposed map is based upon population, not political data, and complies with Montana statutes and constitutional requirements. It creates East and West districts which follows historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |   |   |   |
| 45 | Here is a Congressional Redistricting map we Republicans support because it is fair and complies with MT law. This map depicts a traditional East and West split of our state. Democrats have submitted hundreds of maps showing a Southwest district to combine Bozeman and Missoula together. This is the only way they can gerrymander a district to have any chance of winning a congressional seat in Montana. To stop Democrats attempt to win a seat by gerrymandering, we need your help by forwarding this email with attached map. Please note it is important to CC the Commissioners and to provide your name, address, phone number and email address. Thank you for your assistance to keep Montana Red! Our country needs Montana to stop the Marxist Democrats radical agenda!       |   |   |   |
| 46 | This proposed map is based upon population, not political data, and complies with Montana statutes and constitutional requirements. It creates East and West districts which follows historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |   |   |   |
| 47 | This proposed map is based upon population, not political data, and complies with Montana statutes and constitutional requirements. It creates East and West districts which follows historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |   |   |   |
| 48 | I am submitting my proposed map, compliant with all lawful and reasonable criteria for establishing Congressional District lines. The map follows the long history of considering East/West and North/South delineation as well as lessening splits of counties and towns. Most importantly this map is based on population as it should be, not partisan political calculations.                                                                                                                                                                                                                                                                                                                                                                                                                    |   |   |   |
| 49 | This proposed map is based upon population, not political data, and complies with Montana statutes and constitutional requirements. It creates East and West districts which follows historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |   |   |   |
| 50 | As active Montana taxpaying voters, we are writing to seek your APPROVAL of the attached "East/West Split of Gallatin & Cascade Counties" proposed redistricting map. This proposed map is effectively based upon population and not specific political data. This proposed map complies with Montana statutes and constitutional requirements which is of utmost importance. Not only does this proposed map create East and West districts that follow historical precedent, but these districts are both compact and contiguous. The goal of minimizing splits of cities and counties is achieved with the use of this recommended map.<br>Thank you for your consideration. We trust the five-member Commission will adequately represent Montanans and choose an extremely amicable resolution. |   |   |   |
| 51 | See above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |   |   |   |
| 52 | This proposed map is based upon population, not political data, and complies with Montana statutes and constitutional requirements. It creates East and West districts which follows historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |   |   |   |
| 53 | The only way to make redistricting fair to all is to divide the state evenly roughly along the continental divide creating an east and west district. The population with this map, including political leanings, is the same on both sides. Neither major political party should gain an advantage when the state single district is split in two and this map supports this requirements of redistricting guidelines. If gerrymandering of any kind is attempted, this will open the committee and state up to lawsuits. Parties need to win districts based on their platform and ideas not because a district has a majority of voters registered for a particular party.                                                                                                                        |   |   |   |
| 54 | This proposed map is based upon population, not political data, and complies with Montana statutes and constitutional requirements. It creates East and West districts which follows historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |   |   |   |
| 55 | Please consider the proposed map, in your consideration for redistricting. It is based upon population, not political data, and complies with Montana statutes and constitutional requirements. It creates East and West districts which follows historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties.                                                                                                                                                                                                                                                                                                                                                                                                                                         |   |   |   |

|    | A      | B                                                           | C      | D    | E            | F                  | G               |

| 56 | This map is a North-South map which is interesting as it was the only one I was able to create which does not split any counties and still comes within slightly over 100 person variance (114-115). While this meets the compact, contiguous and minimizes splitting of counties, it does not make great sense putting Eureka and Plentywood together nor does it make sense having my hometown, Hamilton in with Broadus.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |   |   |   |
| 57 | This potential redistricting map is split very cleanly along county lines with both districts representing east and west with very equal population numbers, representing both conservative and liberal, as well as white and native, with the Missouri River making an intuitive break for the eastern half of the state.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |   |   |   |
| 58 | Here is my proposed map submission for the Congressional redistricting. It is not quite perfect, but supports an east/west split that I believe is the most sensible for Montanans. Clearly the issues of the east, which is largely open plains and agricultural, are significantly different than those of the mountainous, touristy, logging west. Therefore, an east/west split keeps similar issues of concern bound together. My map is based on the raw census numbers and achieves a .03% population deviation--well within the required restrictions and in compliance with Montana constitutional requirements. This map follows the precedent established when we previously had two House representatives. As a citizen, I expect the commission to comply with HR506, the Montana Constitution, and other applicable and binding laws. Using the tools provided made it relatively easy to keep the districts compact and minimized the division of cities and counties. Some tweaking may be required, but if the general east/west split is followed, two major reservations will be kept in the west in their entirety, and the cities and their populations will be spread evenly across the state. I hope you find this helpful and it informs the development of the final product. |   |   |   |
| 59 | Overall district lines suggested to comply with MT laws.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |   |   |   |
| 60 | Here is my map proposal for the Congressional redistricting. This division between East and West is not dissimilar to the previous division of the two districts; the agrarian East and the mountainous West. This map shows a 0.02% population difference which is within the requirements in HR506 and the Constitution of Montana. Thank you for your kind consideration.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |   |   |   |
| 61 | Here is my proposed map submission for the Congressional redistricting. I have reviewed this map and, while not perfect, it best supports the concept of an east/west split that I believe is the most sensible for Montanans. The issues of the largely agricultural east are different from those of the mountainous west, so this keeps issues of like concern bound together. This map also keeps the two large reservations, Browning and CSKT, in one district. This map achieves a .02% population deviation--well within the required restrictions and in compliance with Montana constitutional requirements, and it also agrees with the precedent established when we previously had two House representatives. Naturally, I expect the commission to comply with HR506, the Montana Constitution, and other applicable and binding laws.                                                                                                                                                                                                                                                                                                                                                                                                                                                   |   |   |   |

| 63 | I have looked at various maps for redistricting Mt. State Legislature. I believe it is best to keep the east & west separate because of the differences in the two area- agriculture & mountains. I know you will follow HR506 & the Montana Constitution.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |   |   |   |
| 64 | This map meets the requirements to fairly redistrict Montana for our new congressional district.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |   |   |   |
| 65 | I feel that this map strongly supports the concept of the east/west split that is the most sensible for Montana and Montana's future. The issues that the Agricultural East faces are different than those that the Mountainous West side of Montana faces. By using this map, we are able to keep the common issues of both sides of Montana bound together by the districts. The map also allows the two largest reservations in Montana (CSKT and Browning) to be in one district. The map achieves the .02% population deviation, well within the required redistricting restriction and keeps us compliant with the Montana Constitutional requirements. This is also consistent with the precedent that was established when we had two House Representatives in the past. I do expect that the decisions for redistricting that are made are in compliance to HR506 ,                                                                                                                                                                                                                                                                                                                                                                                                                           |   |   |   |
| 66 | Here is my proposed map submission for the Congressional redistricting. This map achieves a .02% population deviation--well within the required restrictions and in compliance with Montana constitutional requirements, and it also agrees with the precedent established when we previously had two House representatives. Naturally, I expect the commission to comply with HR506, the Montana Constitution, and other applicable and binding laws.                                                                                                                                                                                                                                                                                                                                                                                                                                                   |   |   |   |
| 67 | Please consider this proposed map submission for the Congressional redistricting. This map seems to be the most sensible for Montanans, addressing agricultural differences between east and west and keeping our two large reservations in one district.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |   |   |   |
| 68 | Attached is the map that I wish to submit for Montana redistricting. It meets the qualifications of the Montana constitution, which I know you are following. It also places our Flathead Reservation and the Blackfoot Reservation in the same western half of the state. It achieves a .02% population deviation which makes a lot of sense to me. Hopefully, you will agree. Thank you for all the work you are putting into this very important matter for Montana's future.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |   |   |   |

| 69 | <p>Here is my proposed map submission for the Congressional redistricting for Montana to create two Districts for the House of Representatives in the US Congress. I have reviewed this map and, while not perfect, it best supports the concept of an east/west split that I believe is the most sensible for all Montanans. The issues of the largely agricultural east are different from those of the mountainous west, so this keeps issues of like concern bound together. This map also keeps the two larger Tribal Reservations - Blackfoot Tribe and Confederated Salish Kootenai Tribes, in one district. This map achieves a .02% population deviation, which is well within the required restrictions and in compliance with Montana constitutional requirements, and it also agrees with the precedent established when we previously had two House of Representatives Districts. I would anticipate and expect the commission to comply with HR506, the Montana Constitution, and other applicable and binding laws. There are some who want to create the new Congressional Districts in such a manner as to have a " guaranteed " District for the Republican Party interests and a " guaranteed " District for the interests of the Democratic Party. As if somehow this concept would be judged as " fair " to all concerned. That is not a " fair " solution, but a " political " solution. We have enough Political solutions in our lives without adding another one that would be considered by a majority of Montanans as less " fair " than the map I am recommending. Montana has seen a growth spurt in population from people moving here from other US States, and all trends show in the next 5 to 10 years this will increase vs level off or decrease. It will be difficult to draw a map that factors in potential growth areas, but that said - this Map does an excellent job of doing so. Potential population growth will be the highest in Bozeman, Missoula, Kalispell, Billings and Helena in all likelihood - with Bozeman and Missoula areas growing the fastest. Therefore these two areas should not be placed in the same District or the representation will become lopsided quickly within a few Congressional election cycles.</p> |   |   |   |

| 72 | <p>Here is a map I recommend as the House Representative from District 12, Polson Montana. As you can see from the map the population is evenly split between East and West and is in keep with the law. I recommend this map.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |   |   |   |
| 73 | <p>This proposed map is based upon population, not political data, and complies with Montana statues and constitutional requirements. It creates East and West districts which follows historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties. Please do not create "competitive " districts - based on politics! The Congressional district lines should be drawn based on Montana law, NOT gerrymandering based on political data.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |   |   |   |
| 74 | <p>This map is being submitted by me for consideration as I am a voter who resides in Montana I see this as a straight forward fair non gerrymandering bi partisan equitable split. For integrity and ethical reasons it should be adopted into districting.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |   |   |   |
| 75 | <p>I have reviewed this map and believe it best supports the concept of an east/west split that I believe is the most sensible for Montanans. The issues of the largely agricultural east are different from those of the mountainous west, so this keeps issues of like concern bound together. This map also keeps the two large reservations, Browning and CSKT, in one district. This map achieves a .02% population deviation--well within the required restrictions and in compliance with Montana constitutional requirements, and it also agrees with the precedent established when we previously had two House representatives. Naturally, I expect the commission to comply with HR506, the Montana Constitution, and other applicable and binding laws. Thank you for your attention to my submission.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |   |   |   |

| 77 | I have reviewed this map and believe it best supports the concept of an east/west split that I believe is the most sensible for Montanans. The issues of the largely agricultural east are different from those of the mountainous west, so this keeps issues of like concern bound together. This map achieves a .02% population deviation--well within the required restrictions and in compliance with Montana constitutional requirements, and it also agrees with the precedent established when we previously had two House representatives. Naturally, I support the commission's compliance with HR506, the Montana Constitution, and other applicable and binding laws. Thank you for your attention.                                                                                                                                                                                                                                                             |   |   |   |
| 78 | Here is my proposed map submission for the Congressional redistricting. I have reviewed this map and, while not perfect, it best supports the concept of an east/west split that I believe is the most sensible for Montanans. The issues of the largely agricultural east are different from those of the mountainous west, so this keeps issues of like concern bound together. This map also keeps the two large reservations, Browning and CSKT, in one district. This map achieves a .02% population deviation--well within the required restrictions and in compliance with Montana constitutional requirements, and it also agrees with the precedent established when we previously had two House representatives. Naturally, I expect the commission to comply with HR506, the Montana Constitution, and other applicable and binding laws. Thank you for your efforts and consideration.                                                                         |   |   |   |
| 79 | I am submitting a proposed map for Congressional redistricting. My proposal supports an east/west split which seems to me to be the most reasonable for Montana. The issues east of the mountains and the issues west of the mountains are vastly different and that must be taken into account when redistricting. This map achieves a .02% population deviation, in compliance with Montana's constitution, and it maintains precedent established previously when Montana had two representatives.                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |   |   |   |
| 80 | I am submitting a proposed map for Congressional redistricting. My proposal supports an east/west split which seems to me to be the most reasonable for Montana. The issues east of the mountains and the issues west of the mountains are vastly different and that must be taken into account when redistricting. This map achieves a .02% population deviation, in compliance with Montana's constitution, and it maintains precedent established previously when Montana had two representatives.                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |   |   |   |
| 81 | I drew this map for consideration of our new redistricting following the 2020 census results. This map follows county lines, making it simple to know which district you are in, it is very close to population neutral, and includes rural and agricultural counties in one district and more urban counties in the other. This map is a perfect candidate to ensure that all Montanans have a representative voice in congress and I hope the committee considers it. Attached is a csv file with the block assignment data and below I have a link to the map as well.                                                                                                                                                                                                                                                                                                                                                                                                  |   |   |   |
| 82 | My goal with these maps was to create a pair of districts using county lines that had strong community interests (one focused on farming and agriculture, so that representative would really have to care about our rural areas and the needs of farmers and ranchers and one focused on the two Universities, so that representative has to care about the needs of the populations the grow around and depend on the academic communities). That way, the representatives will have to care about what their constituents really need. Both maps also follow county lines and have a low population deviation, especially the map which includes Sweet Grass County.                                                                                                                                                                                                                                                                                                    |   |   |   |
| 83 | I've tried to follow developments on the creation of Montana's new Congressional district map. Some proposals I've seen are concerning to me because they fail to heed current physical, cultural and political boundaries and even, in some cases, leave some counties straddling the two districts. I feel strongly that Park County, where I live, should remain in the same district as Gallatin County. There are literally thousands of Montanans who live in one of these counties and work in the other. Hundreds of businesses operate across the county line. Many of us frequently shop and recreate in both counties. It would be harmful to us to live under separate representation when our interests are so aligned. I've used the district.org [district.org] website to create a map that keeps all counties intact, minimizes opportunities for unfair political advantage, and ensures a compact boundary with nearly equal population representation. |   |   |   |
| 84 | Montana has always honored a even-as-possible East-West split for it's representation. There is NO REASON to dishonor that history now. This link will provide my submission to uphold that tradition and provide AS-EVEN-AS-POSSIBLE split.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |   |   |   |
| 85 | I would like to submit a proposed map for the Federal Congressional Districts in Montana. This proposed map is based upon population, not political data. It complies with Montana statutes and constitutional requirements. It creates East and West districts which follows historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |   |   |   |
| 86 | This map plan meets all the criteria necessary for re-districting purposes and, thus, seems fair and uncomplicated.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |   |   |   |
| 87 | I feel that this map strongly supports the concept of the east/west split that is the most sensible for Montana and Montana's future. The issues that the Agricultural East faces are different than those that the Mountainous West side of Montana faces. By using this map, we are able to keep the common issues of both sides of Montana bound together by the districts. The map also allows the two largest reservations in Montana (CSKT and Browning) to be in one district. The map that I have attached achieves the .02% population deviation, well within the required redistricting restriction and keeps us compliant with the Montana Constitutional requirements. This is also consistent with the precedent that was established when we had two House Representatives in the past. I do expect that the decisions for redistricting that are made are in compliance to HR506 , the Montana State Constitution and all other binding laws.               |   |   |   |
| 88 | "No Split Counties by Tonia Dias." I am in opposition to any redistricting that would favor any one political party. I support a district map that is fair to all voters with no consideration to the political affiliation or the typical voter for that particular geographical area. The map that appears to be most fair minded to me is linked.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |   |   |   |

| 89  | I don't think a more perfect map could be drawn. This proposed map is based strictly upon population & contiguous counties. Absolutely no gerrymandering was involved. No counties are divided and none of the Tribal groups are divided. Best yet, the population difference between District 1 & 2 is only +/- 50 people for a population deviation of 0%.<br>It complies with all the Montana statutes and constitutional requirements.<br>The population of the green district is 542,062 (-50) and the orange district is 542,163 (+51) for a net difference of 101. The big thing is that NOT ONE COUNTY IS SPLIT! |   |   |   |
| 90  | Let's not make this process more difficult and confusing than it has to be. Clear, easy to understand boundaries are a must. I've seen several potential maps that could work well. Here's one that does not divide a county or Reservation and is easy to understand.                                                                                                                                                                                                                                                                                                                                                   |   |   |   |
| 91  | I support this redistricting map – it makes complete sense. It does not divide counties or tribal lands. And the two territories are equally represented by number of people.                                                                                                                                                                                                                                                                                                                                                                                                                                            |   |   |   |
| 92  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |   |   |   |
| 93  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |   |   |   |
| 94  | I don't think more perfect maps could be drawn. This proposed map is based strictly upon population & contiguous counties. Absolutely no gerrymandering was involved. No counties are divided and none of the Tribal groups are divided. Best yet, the population difference between District 1 & 2 is only +/- 50 people for a population deviation of 0% . It complies with all the Montana statutes and constitutional requirements. The population of the green district is 542,062 (-50) and the orange district is 542,163 (+51) for a net difference of 101. The big thing is that NOT ONE COUNTY IS SPLIT !      |   |   |   |
| 95  | Here is amap that I feel divides MT equally by population without dividing communities, counties or reservations. What a great way to greet representation in Montana.                                                                                                                                                                                                                                                                                                                                                                                                                                                   |   |   |   |
| 96  | I think this map is a fair way to have representation in DC for the state of Montana.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |   |   |   |
| 97  | Title: "East West Continental Splitting Gallatin Only." This proposed map is based upon population, not political data, and complies with Montana statutes and constitutional requirements. It creates East and West districts which follow historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties. Thank you for your consideration.                                                                                                                                                                                                                                |   |   |   |

| 104 | Please find my map for submission that has perfect population equality, while accounting for competitiveness in the 2020 presidential election. In addition, it keeps all Native American reservations intact entirely, with 4 in one district and 3 in the other.                                                                                                                                                                                                                                                                                                                                                       |   |   |   |
| 105 | This map provides competitiveness that matches the state as a whole. It also provides, for each district, the best commonality of communication and transportation networks, social, cultural, historic, and economic interests and connections, and occupations and lifestyles.                                                                                                                                                                                                                                                                                                                                         |   |   |   |
| 106 | Thank you for your service to Montana and willingness to consider my input on a map of Congressional districts. The attached map creates equal-sized districts along broadly a east-west meridian with some deviations to preserve the integrity of the Blackfeet and CSKT reservations.                                                                                                                                                                                                                                                                                                                                 |   |   |   |
| 107 | "Urban/Tribal and Rural Split." After reading several articles about the redistricting of Montana, doing my own research on Dave's website, and hearing some of the discussion before and from the commission, I felt this map was worthy of consideration by your group for the new Congressional lines. If someone already suggested this please forgive my duplication and let me know if you need anything else. Best to you all in the redistricting process!                                                                                                                                                       |   |   |   |

|     | A      | B                                                         | C      | D   | E                                                       | F                                                     | G               |

| 108 | I drew this congressional plan that creates perfect population equality between the two districts. It keeps the Flathead Reservation whole, keeps most of our big cities and universities in one district, and ensures that rural Montana will have a strong voice in Washington.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |   |   |   |
| 109 | This is my second East-West Map (East-West Map II) that breaks up the counties of Flathead and Powell to create a perfect 0% deviation (one person total!) and still closely follows the traditional East-West boundary from the 1980-90 Congressional Map.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |   |   |   |
| 110 | Here is my proposed map based on the 2020 census data. The districts are compact and only one county is split in order to maintain equal population. Additionally, the map is drawn to keep the vast majority of the Native American population united in a single district. Finally, district 2 would be somewhat competitive. I think this is a fair map that does a good job of adhering to the criteria laid out by the commission.                                                                                                                                                                                                                                                                                                                                                                                                                                                       |   |   |   |
| 111 | Follow-up email asked us to disregard: The map was drawn based strictly on population, and contiguous counties and districts. Only Cascade county is divided.<br>NO tribal groups are divided. It complies with all Montana statutes and constitutional requirements.<br>And the population deviation is 0% with a net difference of 47:<br>District 1 542,136<br>District 2 542,089<br>Now that Montana has two Congressional seats, it is critical that the division of the state into two congressional districts be done to ensure fair representation of ALL Montanans.                                                                                                                                                                                                                                                                                                                  |   |   |   |
| 112 | Not in public comment package: This second map (see above) is another East-West divide and splits only Silverbow County with a population deviation of 27. Our estimates show this split would result in a 51.79% to 45.53% advantage for the Democrats in the Western region and a 48.82% to 48.10% advantage for the Democrats in the Eastern district, making the Eastern district slightly more competitive than the last one.                                                                                                                                                                                                                                                                                                                                                                                                                                                            |   |   |   |
| 113 | Not in public comment package: I looked at using the criteria of "competitive" While I still don't see how looking at political data in anyway doesn't somehow begin to have the commission draw plans that unduly favor a political party. I made an equally competitive map which has nearly equal number of Republicans in each side and nearly equal number of Democrats on each side. As you can see, there needed to be gerrymandering involved to get that, but to make the most competitive map without unduly favoring one political party in either district, this is the map.                                                                                                                                                                                                                                                                                                      |   |   |   |
| 114 | This proposed map is based upon population, not political data, and complies with Montana statutes and constitutional requirements. The districts are compact and contiguous. It minimizes splits of cities and counties, not splitting a single one. Counties run elections so they should not be divided.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |   |   |   |
| 115 | Please find my submission for Montana's congressional map. This map accomplishes many of the goals of the commission: 1) It keeps every county but one (Sanders) together, and the one deviation is made to keep the Flathead Reservation in one District 3) It is very even in population, providing 542,203 individuals in one district, and 542,022 individuals in the other. 5) It keeps Missoula and Bozeman, the two "college towns" of Montana, in one district. 6) Additionally, in that same district, it has Great Falls, Helena, and Butte, keeping as many of Montana's main population centers together as possible without splitting any cities. 7) I did not run a partisanship test of this map, however I presume it does not favor any one political party (if it does it is by happenstance, and is a result of attempting to achieve the commission's other stated goals) |   |   |   |
| 116 | The North-South Map allows the representatives to care about a diverse set of voters from the ranchers/farmers in the east to the timber industry in the west. The South District has Billings, Bozeman and Butte/Anaconda which makes it competitive and diverse in its needs and values. The North District has Missoula, Great Falls, and Havre which also allows for a competitive and diverse district.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |   |   |   |
| 117 | MT GOP 9/9/21 "East West splitting Cascade only": This proposed map is based upon population, not political data, and complies with Montana statutes and constitutional requirements. It creates East and West districts which follows historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties. Thank you for your consideration.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |   |   |   |
| 118 | This proposed map (attached to this e-mail) is based upon population, not political data, and complies with Montana statutes and constitutional requirements. It creates East and West districts which follows historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |   |   |   |
| 119 | I advocate for the proposed redistricting map, with is based upon population, not political data, and complies with Montana statutes and constitutional requirements. It creates east and west districts, which follows historical precedent. The districts are compact and contiguous, and the map minimizes splits of counties and cities. Thank you for your consideration.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |   |   |   |
| 120 | This proposed map is based upon population, not political data, and complies with Montana statutes and constitutional requirements. It creates East and West districts which follows historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |   |   |   |
| 121 | This proposed map attached is based upon population, not political data, and complies with Montana statutes and constitutional requirements. It creates East and West districts which follows historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties. Thanks for your time and consideration.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |   |   |   |

| 122 | Here is one East West option for creating two even Congressional Districts in Montana. This proposed map is based upon population, not political data, and complies with Montana statutes and constitutional requirements. It creates East and West districts that follow the historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties.                                                                                                                                                                                                                                                                                                                                                                                                                                  |   |   |   |
| 123 | See above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |   |   |   |
| 124 | The map is based upon population rather than any political data, and complies with Montana statutes and constitutional requirements. It creates East and West districts which follow historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties and maintains regional economic and geographic issues, as well as population influx.                                                                                                                                                                                                                                                                                                                                                                                                                                       |   |   |   |
| 125 | This proposed map is based on population, not political data, and complies with Montana statutes and constitutional requirements. It creates an East and West Districts which follows historical precedent. The districts are compact and contiguous. They minimize splits between cities and counties.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |   |   |   |
| 126 | None                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |   |   |   |
| 127 | This proposed map is based upon population, not political data, and complies with Montana statutes and constitutional requirements. It creates East and West districts which follows historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |   |   |   |
| 128 | The proposed map should be based upon population, not political data, and comply with Montana statutes and constitutional requirements. It should create East and West districts which follows historical precedent. The districts should be compact and contiguous. It should minimizes splits of cities and counties.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |   |   |   |
| 129 | These proposed maps are based upon population, not political data, and comply with Montana statutes and constitutional requirements. They create East and West districts which follows historical precedent. The districts are compact and contiguous and minimizes splits of cities and counties.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |   |   |   |
| 130 | I am submitting this proposed map for the Congressional redistricting as an attachment. I have reviewed this map and while not perfect, I have tried to make it the most sensible east/west split for the voters and citizens of Montana. The mountainous west and mostly agricultural east have different issues to deal with, but also can work together for our state. This map also keeps the Blackfeet and CSKT reservations in one district. This map achieves a .02% population deviation within the restrictions required as well as in compliance with Montana Constitutional requirements and also agrees with the precedent established when there were two representing our state in the U.S. House. The commission should comply with HR506, the Montana Constitution, and all laws that apply to this issue. |   |   |   |
| 131 | Here is one East and West option for creating two even Congressional Districts in Montana. This proposed map is based upon population, not political data, and complies with Montana statutes and constitutional requirements. It creates East and West districts that follow the historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties.                                                                                                                                                                                                                                                                                                                                                                                                                              |   |   |   |
| 132 | This proposed map is based upon population, not political data, and to the best of my knowledge complies with Montana statutes and constitutional requirements. It creates East and West districts which follows historical precedent. The districts are compact and contiguous. Additionally, it minimizes splits of cities and counties.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |   |   |   |
| 133 | Here is one East and West option for creating two even Congressional Districts in Montana. This proposed map is based upon population, not political data, and complies with Montana statutes and constitutional requirements. It creates East and West districts that follow the historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties.                                                                                                                                                                                                                                                                                                                                                                                                                              |   |   |   |
| 134 | None                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |   |   |   |
| 135 | Please find the attached map showing Montana Congressional Districts drawn to divide Montana into an East and West District with the line going from North to South which follows historical precedent. This map complies with Montana laws and constitutional requirements. The map minimizes splits of cities and counties and the Districts are compact and contiguous. This map is based on population,,,, not political data with districts that are compact and contiguous.                                                                                                                                                                                                                                                                                                                                          |   |   |   |
| 136 | The proposed map, which I have attached, is based upon population, not political data, and complies with Montana statutes and constitutional requirements. The map creates East and West districts which follows precedent used in the past. The districts are compact and contiguous, and it minimizes the splits of cities and counties.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |   |   |   |
| 137 | The Congressional Districts should comply with Montana law and Constitutional requirements. The Congressional District should be within 1 % with rare exceptions of up to 3 %. The map should minimize splits of cities and counties. The Districts should be compact and contiguous. This proposed map is based upon population, not political data, and complies with Montana statutes and constitutional requirements. It creates East and West districts, which follows historical precedent.                                                                                                                                                                                                                                                                                                                          |   |   |   |

|     | A      | B                                                       | C      | D   | E       | F                                                           | G               |

| 140 | I urge you to select the East-West (Cascade County split) district solution (see attached), as it most closely satisfies the Montana Constitutional requirements. It also appears to better satisfy the 'political parity' and 'community of interest' quests desired by democrats, even though those criteria are not constitutionally germane to this process.                                                                                                                                          |   |   |   |
| 141 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |   |   |   |
| 142 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |   |   |   |
| 143 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |   |   |   |
| 144 | We need to have an east, west division. These areas have many differences, this would give the best representation to each area. Please follow the constitution by creating population equal districts and not political districts. Minimize splitting cities and counties. Districts should be within 1%.                                                                                                                                                                                                |   |   |   |
| 145 | With the new district added to the state, I believe it would be wise to go east to west with it. We have 2 different lifestyles in Montana, the west is mountainous with vast forests. The east is high plains desert. I believe that they both have a good amount of Republicans and Democrats, making it a fair election, which will help making everyones vote count. Please do what is right for the state and its people. Here is a map that i saw that would help be a template of what I envision. |   |   |   |
| 146 | I looked at the logical and historic split of East-West. I found that based on populations, you either needed to split up Cascade County or Gallatin County if you wanted to minimize splitting counties, The most logical map follows the Continental Divide from the North keeping Lewis and Clark together and only splits Gallatin and gets within a couple of hundred people.                                                                                                                        |   |   |   |
| 147 | Here is a map I favor. It is an East West division with only Cascade County being split. This looks to me like the best solution to the rules that are in place. Please carefully consider this map.                                                                                                                                                                                                                                                                                                      |   |   |   |
| 148 | This proposed map is based upon population, not political data, and complies with Montana statutes and constitutional requirements It creates East and West districts which follow historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties. Thank you for your consideration                                                                                                                                                                           |   |   |   |
| 149 | Here are my 3 proposed maps based upon population, not political data, in compliance with Montana statutes and constitutional requirements. Each map creates East and West districts which follows historical precedent. The districts are compact and contiguous, and minimize splits of cities and counties. Thank you for your consideration of the attached redistricting maps.                                                                                                                       |   |   |   |
| 150 | The map is based upon population, not political data, and complies with Montana statutes and constitutional requirements. It creates East and West districts which follows historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties.                                                                                                                                                                                                                    |   |   |   |
| 151 | This proposed map is based upon population, not political data, and complies with Montana statutes and constitutional requirements. It creates East and West districts which follows historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties. Thank you for your consideration.                                                                                                                                                                        |   |   |   |
| 152 | The map is based upon population, not political data, and complies with Montana statutes and constitutional requirements. It creates East and West districts which follows historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties. Thank you for your consideration.                                                                                                                                                                                  |   |   |   |
| 153 | This proposed map is based upon population, not political data, and complies with Montana statutes and constitutional requirements. It creates East and West districts which follows historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties.                                                                                                                                                                                                          |   |   |   |
| 154 | Please be informed that I oppose any redistricting plan that does not divide Montana into two roughly equal districts, either in size, or population, or if possible, both. However, the dividing line must run essentially north - south in some fashion so as to divide the state so there is clearly an eastern district and a western district !                                                                                                                                                      |   |   |   |

|     | A      | B                                 | C      | D   | E        | F                                                                      | G               |

| 155 | This map is based on population, not politics, thereby complying with MT Constitution. The East/West districts follow the precedents set historically and they are compact and contiguous. The dividing of cities and counties is minimized.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |   |   |   |
| 156 | This proposed map is based upon population, not political data, and complies with Montana statutes and constitutional requirements. It creates East and West districts which follows historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties. Thank you for your consideration.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |   |   |   |
| 157 | This proposed map is based upon population, not political data, and complies with Montana statutes and constitutional requirements. It creates East and West districts which follows historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |   |   |   |
| 158 | This proposed map is based upon population, not political data, and complies with Montana statutes and constitutional requirements. It creates East and West districts which follows historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties. Thank you for your consideration.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |   |   |   |
| 159 | My choice of a District map for Montana is attached dividing Cascade County only and by a small fraction leaving all other counties intact. This proposed map is based upon population, not political data, and complies with Montana statutes and constitutional requirements. It creates East and West districts which follows historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties. Thank you for considering my option.                                                                                                                                                                                                                                                                                                                                                                        |   |   |   |
| 160 | This proposed map is based upon population, not political data, and complies with Montana statutes and constitutional requirements. It creates East and West districts which follows historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |   |   |   |
| 161 | This proposed map is based upon population, Not political info and complies with Montana statutes and our constitutional requirements. It creates East and West districts and that follows our historical precedent. The districts are compact and contiguous. This map minimized splits of cities and counties.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |   |   |   |
| 162 | I've investigated the geographic composition of Montana and come to one conclusion. The redistricting for the second US House seat needs to be accomplished using East/West guidelines. Western Montana has a cultural and geography that is very similar. Regarding its political composition, there are both Left and Right portions of the area that balance. For this reason I believe that the map that follows is a fair way to achieve the goals of the Re-Districting Committee while at the same time complying with State of Montana statutes that require balanced distribution along party lines and population. Thank you for your time.                                                                                                                                                                                                    |   |   |   |
| 163 | This proposed map is based upon population, not political data, and complies with Montana statutes and constitutional requirements. It creates East and West districts which follows historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |   |   |   |
| 164 | This proposed map is based upon population, not political data, and complies with Montana statutes and constitutional requirements. It creates East and West districts which follows historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |   |   |   |
| 165 | The proposed map is based upon population, not political data, and complies with Montana statutes and constitutional requirements. It creates East and West districts which follows historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties. This seems to be the most logical and fairest way to create two districts in Montana.                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |   |   |   |
| 166 | This proposed map is based upon population, not political data, and complies with Montana statutes and constitutional requirements. It creates East and West districts which follows historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |   |   |   |
| 167 | The redistricting for the second US House seat should be drawn with Eastern and Western guidelines. The western part of the state is very similar in culture and geography. The political composition have both Left and Right portions of the area that balance. For this reason we believe that this map is a fair way to achieve the goals of the Re-Districting Committee while at the same time complying with State of Montana statutes that require balanced distribution along both party lines and population.                                                                                                                                                                                                                                                                                                                                  |   |   |   |
| 168 | This proposed map is based upon population. Please note that the attached map has 16 complete counties from northwestern and southwestern Montana with a 2020 population per the Census Bureau Quick Facts website of 496,834. One half of Montana's 2020 population of 1,084,225 is 542,112. Therefore an additional approximate number of 45,000 people from Gallatin County would need to be added to the western district to have districts of the same population. In the event that it is found that this division would divide Gallatin County's major population areas too onerously, then I would propose that Glacier County could be added to the western district, as an alternative, which would mean only approximately 32,000 people of Gallatin County's total population of 118,960 would need to be split off to the western district. |   |   |   |

| 169 | The attached proposed map is based upon population, not political data, and complies with Montana statutes and constitutional requirements. It creates East & West districts. The districts are compact and contiguous. It minimizes splits of cities and counties.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |   |   |   |
| 170 | This proposed map is based upon population, not political data, and complies with Montana statutes and constitutional requirements. It creates East and West districts which follows historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties. Thank you for your consideration.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |   |   |   |
| 171 | This proposed map is based upon population, not political data, and complies with Montana statutes and constitutional requirements. It creates East and West districts which follows historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |   |   |   |
| 172 | I have 3 maps for your reference that complies with Montana Law & Constitutional Requirements. Please remember Congressional Districts should be within 1% with very rare exceptions of up to 3%.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |   |   |   |
| 173 | As an interested citizen, I have followed the deliberations and decision making of the prior three redistricting commissions and your meetings to date. I write to provide my input as you reach your critical decision making. It is important to minimize splits in cities, counties and federal reservations. Drawing districts as close to a 1% population deviation as practicable is the goal. I favor retaining our historic East/West divide for congressional districts because it provides the greatest cohesion of issues and best reflects the work of Congressional committees. A North/South divide creates greater difficulty for both representatives in responding to their constituents reflecting scope of the issues and coping with the increased travel distances. I have attached an East/West divide map depicting in general terms the towns and counties that relate to each other for commerce, entertainment and governance districts and regions. The fine point details for boundaries of our two congressional districts are best left to your decision making. |   |   |   |
| 174 | This is a proposed map based on population and complies with Montana statutes and constitutional requirements. It creates East/West districts using historical precedent that are compact and contiguous, also minimizing city/county splits.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |   |   |   |
| 175 | The proposed map is based upon population, the only fair method of dividing our state into two congressional districts. It creates East and West districts which follows historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |   |   |   |
| 176 | Please consider the proposed map. It is based upon population, not political data, and complies with Montana statutes and constitutional requirements. It creates East and West districts which follow historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |   |   |   |

| 179 | Redistricting should be drawn with Eastern and Western guidelines. We live in the western part of the state which north and south is similar in culture and geography to one another. As seems to be the case with Eastern Mt, north and south. That creates a good balance politically. I believe that this map is an appropriate way to achieve the goals of the Re-Districting Committee while at the same equal distribution along both party lines and population.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |   |   |   |

It creates East and West districts which follows historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |   |   |   |
| 182 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |   |   |   |
| 183 | MT GOP "East West Continental Splitting Gallatin." See above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |   |   |   |
| 184 | Please consider the following when selecting Congressional maps:<br>1. Do not create "competitive" districts – based on politics! The Congressional district lines should be drawn based upon Montana law, NOT gerrymandered based on political data.<br>2. The Congressional Districts should comply with Montana law and constitutional requirements. The Congressional District should be within 1% with rare exceptions of up to 3%. The map should minimize splits of cities and counties. The Districts should be compact and contiguous.<br>3. Precedent is an important concept that should guide the Commission. Historically, Montana Congressional Districts have been drawn to divide Montana into an East and West District, with the line going from North to South.<br>Thank you for your consideration.   |   |   |   |
| 185 | I would like to speak in favor of dividing the State into congressional districts similar to the map I have attached to this e-mail. The division should be North to South and not pay attention to any supposed political advantages to either party. The new districts should not divide counties or towns and should allow for equally populated districts as much as is practical. I am excited that we will have a new representative regardless of his/her political affiliation that will actually be able to represent friends, neighbors and myself who have our own unique issues in our respective geographical area. Thank you for creating districts that will be fair and balanced representation according to the people living and working in the districts with no regard made to political differences. |   |   |   |
| 186 | I am proposing that Montana be split along the Continental Divide. This will divide the state by population according to the state constitution. This proposed map is based upon population, not political data, and complies with Montana statutes and constitutional requirements. It creates East and West districts which follows historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties.                                                                                                                                                                                                                                                                                                                                                                         |   |   |   |
| 187 | I am proposing that Montana be split along the Continental Divide. This will divide the state by population according to the state constitution. This proposed map is based upon population, not political data, and complies with Montana statutes and constitutional requirements. It creates East and West districts which follows historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties.                                                                                                                                                                                                                                                                                                                                                                         |   |   |   |
| 188 | This proposed map is based upon population, not political data and complies with Montana statutes and U.S. constitutional requirements. It creates East and West districts which follows historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |   |   |   |
| 189 | I request that Montana districts be drawn similar to the attached map where districts are in an east-west division. This is to have each district dealing with issues common to their geography and location. The mountains create a natural divider.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |   |   |   |
| 190 | Please draw the district boundaries like this map. The east and west sides of Montana deal with different issues.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |   |   |   |
| 191 | This proposed map is based upon population, not political data, and complies with Montana statutes and constitutional requirements. It creates East and West districts which follows historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |   |   |   |
| 192 | This proposed map is based upon population, not political data, and complies with Montana statutes and constitutional requirements. It creates East and West districts which follows historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties.<br>Thank you for your consideration.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |   |   |   |

| 193 | I have been a Montana voter for the past fifty-eight years and served several years as an election judge. My concern is that when Montana again gets two Congressional Districts, the division in the State should be fair and equitable In that no district line should be drawn that shows political bias. Therefore, I encourage you to divide Montana similar to the attached map. The important thing here is that the city of Bozeman would be in the eastern district. This division is based on population, not political parties. Thank you for your consideration.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |   |   |   |
| 194 | I'd like to propose this map. It is not based on political data, but on historical contiguous districts. I believe it meets Montana statutes and constitutional requirements. It mostly follows cities and counties. Thanks for working on this project for the people of the state of Montana.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |   |   |   |
| 195 | Here is my map proposal for your consideration. It evenly splits the population into compact and contiguous districts and complies with the Voting Rights Act while near-perfectly maintaining county lines and city limits and reservation boundaries. Additionally, it has the ancillary benefit of putting all of Montana's Indian country in a single district, thus ensuring that Indian country has a say in Montana's politics. Finally, it recognizes that rapidly-developing urbanizing Montana has a different set of political interests than much of the rest of the state — and thus ensures that these communities of interest are appropriately represented in Congress.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |   |   |   |
| 196 | Wherever possible, it seems appropriate that Congressional Districts should be drawn using county boundaries, and be generally shaped in a uniform block so they are easy to understand and accommodate easy access between representatives and those they represent. They should NOT include long skinny (gerry-mandered) protrusions or donut-holes. I think it would probably be best if the western residents of the state are formed into 1 district and the central and eastern residents are formed into the other district. This would balance the population in each district and probably better facilitate access between constituents and their representatives than any other design I can think of. See my draft map that achieves these goals and results in equal population balance.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |   |   |   |
| 197 | None                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |   |   |   |
| 198 | Kathryn Johnson: I prefer the East/West divided map, which was similar to what was used in the past.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |   |   |   |
| 199 | I believe this map will give an accurate representation of the population rather than the politics of an area.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |   |   |   |
| 200 | Please keep the proposed map based upon population, not political data, and complies with Montana statutes and constitutional requirements. It creates East and West districts which follows historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |   |   |   |
| 201 | Tony Rausch: This is a map that with only two changes, that would be the improve your redistricting map. Remember; Counties run elections, so they should not be divided. This map removes Gallatin county (80,882) and inserts Cascade county (80722), equalizing the population balance with no county divisions. The west is then +52 (542,164) and the east is -51 (542,061). This is as close to equal population balance as you can get and it does not split any county. If this is not satisfactory, then draw a strait line from north to south to divide the population.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |   |   |   |
| 202 | This proposed map is based upon population, not political data, and complies with Montana statutes and constitutional requirements. It creates East And West districts which follows historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |   |   |   |
| 203 | This is my second North-South Map (North-South Map II) that breaks up the counties of Ravalli, Meager, Lewis and Clark, and Powell to maintain communities of interest, make the two districts more compact with the population deviation at a very low 0.1%. The Reservations remain intact. The voters and economic interests are diverse in both districts ensuring representation that cares about the various interests in Montana. The North district has Missoula, Kalispell, Helena, Great Falls, and Havre. The South district has Hamilton, Deer Lodge, Anaconda, Butte, Bozeman, and Billings. The one of the advantages of this map is it evenly divides the major cities in Montana so not one city would dominate the district.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |   |   |   |
| 204 | Historical precedent in congressional lines seems an excellent place to start in any redistricting, and the map I've offered is only different by ~1.5 counties from the 1980 map. With shifting population sizes since Montana has had two districts, adjusting the borders of these two districts in the Flathead-Glacier region allows for quite close population sizes between districts while only splitting one county, and keeps the western district quite competitive. Additionally, I think this map reflects some of the social characteristics of Montana quite well, keeping all the major universities together in the western district and large swaths of agricultural communities together in the eastern district.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |   |   |   |
| 205 | I have my submission for the Montana Districting & Appointment Commision for the proposed new congressional districts after the state gains an extra seat in the US House of Representatives. I have followed the guidelines and regulations while creating what I see as a fair and representative split of Montana. In Montana's 1st district (chosen as first only because it has the capital), I've balanced closely county lines, transportation, town limits and geographical boundaries while still creating a very competitive district that balances the many beautiful places of Montana like the rapidly growing and cultural center of Billings with hard-working cattle farmers of Beaverhead county. The winner of this district would truly have to appeal to a broad-tent of Montanan voters. I don't want to diminish from Montana's 2nd district, which would contain the green prairie lands of the east, the many great reservations of Montana, like the Crow and Fort Belknap, and the stunning Rockies. While this district would admittedly be less competitive (unfortunately to have one competitive district, one cannot be competitive) the representative would still have to cater to a diverse range of Montanans from north, south, east and west Montana. |   |   |   |

| 206 | See above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |   |   |   |
| 207 | I served in the Montana Senate from 1978-1998, including three terms as Majority Leader and one term as President of the Senate. In addition, I was the elected Missoula County Attorney from 1998-2002.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |   |   |   |
| 208 | The East-West Map puts Helena (Lewis and Clark County) in the East because it is more difficult to travel west from that area because of the mountain passes (Rogers and McDonald) and it allows Helena to be in the same district as Jefferson County who has close ties with it economically.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |   |   |   |
| 209 | Not in public comment package: My goal for the submitted plan is to provide Congressional Districts for the voters of Montana as close as possible to the pre-1990 districts. Considering the partisan divide between Commission members, the Montana Legislature, and the Montana Supreme Court, my plan shall offer statistical simplicity, in case the final decision goes to the U.S. Supreme Court.<br>My plan is based upon the historical boundary for Montana's previous Congressional districts (District 1 in the west, District 2 in the East). The plan consists of removing four Counties and adding three new Counties to the old District 1, which results in the most compact, and equal population statistically possible using whole counties. The plan also meets the requirements of the Federal Voting Rights Act by distributing the Native American population as best as statistically possible between the two Congressional districts.<br>I look forward to my plan becoming part of the public record, and anticipate a great amount of support from the public during the upcoming comment period.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |   |   |   |
| 210 | A map where the eastern boundary states are Blaine, Chouteau, Cascade, Meagher, and Gallatin has the advantages of being within 1% (0.71%, the smallest deviation that I could find without splitting counties), has zero splitting of counties and cities, is contiguous, and maintains the historic division of Montana into East and West Districts divided by a North/South line. It is slightly less compact than proposals that split counties, however, I feel that county identity is important in Montana and a slightly less straight line that keeps counties intact is preferable.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |   |   |   |
| 211 | SOUTHERN DISTRICT These cities and counties share alot in common with one another in terms of economy, industry, education, medicine and lifestyle. And giving them a shared representative, I believe would be beneficial.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |   |   |   |
| 212 | None                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |   |   |   |
| 213 | This proposed map is based upon population, not political data, and complies with Montana statutes and constitutional requirements. It creates East and West districts which follows historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |   |   |   |
| 214 | In a hyper partisan era of politics, I'm relieved to know that Montana has an independent group tasked with dividing the state. As key components to creating new districts, your group must divide the population evenly, be compact, and comply with national voting laws. Additional consideration must be cast to ensure indian reservations are contiguous within the new districts, and that partisan lean is minimized. I think the cleanest way to do this is split at the county level, along an East/West divide. This proposal equally divides the metro areas, parses population evenly, minimizes legislative districts input to retain congressional autonomy, ensures tribal boundaries are respected, and aligns with regional economies/sentiments.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |   |   |   |
| 215 | I respectfully submit this map as a proposed redistricting option. With a nearly 50-50 divide of population and only 1 county being split evenly, this is a very fair and equitable proposal. Thank you for your consideration.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |   |   |   |
| 216 | None                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |   |   |   |
| 217 | Split the state in 4 sections to include low populations and high population counties. This plan incorporates a low population section with a high population section for added diversification of population and both business and political thought.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |   |   |   |
| 218 | In the past, Montana's two congressional districts were of course divided along a primarily North/South line. However, the commission should not rigorously adhere to this concept. Given the state's population changes, no primarily North/South line can achieve the redistricting criteria listed by the Montana Legislature, especially the goal of keeping communities of interest together. For example, a North/South line would likely require splitting Gallatin and Park counties, two counties which cooperate closely economically and socially and should be included in the same district. A future MT-01 or "eastern" district should naturally be centered in Billings and include eastern Montana. Eastern Montana is a natural fit for a district with Billings both geographically and economically, given Billings's status as a premier petroleum hub and agricultural center. Native Americans are Montana's largest minority and a critical community of interest. Montana's Indian Reservations should be kept in the same district so as to comply with the VRA and allow for greater representation of native peoples in Congress. As such, Flathead, Lake, and Glacier counties as well as their surroundings should be included in MT-01 with Eastern Montana. This would create a district close to the population target. MT-02 should be centered in Bozeman, Missoula, Helena, and Anaconda/Butte. These four population centers share a Western Montana heritage and all feature large universities, a tourism/timber/ranching/mining economy, and similar social characteristics. Creating districts of equal population will require splitting at least one county. Given this unfortunate necessity, Cascade should be the choice to be split. Montana law states that large counties should be split first, and Cascade is one of the largest in the state. It's also a county that shares economic and social characteristics with both Eastern and Western Montana and has historically "bridged the gap" between the two. By keeping the city of Great Falls itself in MT-02 while adding parts of its outskirts to MT-01, a map with equal populations and minimal splitting of political subdivisions can be achieved. These suggestions would result in a map that looks something like the one I have attached |   |   |   |

|     | A          | B                                                                                                                                               | C      | D     | E                                                        | F              | G               |

| 219 | The new congressional district for Montana should allow all Montanans the opportunity to be represented by making the district competitive. Recently I visited my hometown of Conrad where I learned that increasingly people in north central Montana are being referred to Kalispell and Polson for health care. It is important for people in north central Montana to have political influence in the area that provides essential services for them. Of course, historically and today, many residents of North Central Montana own or visit vacation homes in the Kalispell region. The ties between these areas is growing stronger because of health care.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |   |   |   |

| 221 | Pinpoint in Al Olszewski's Home: I am submitted this map for consideration in your analysis. Historically the State has been a east/west divide and I encourage you to keep that in mind. I also encourage you to make the districts with as close as possible. "Equal" population regardless of political leaning.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |   |   |   |
| 222 | My two maps describe two similar schemes for new Montana congressional districts based on 2020 census numbers. I began with the eastern and western districts that older Montanans will remember and made adjustments to reflect current population numbers. The districts are drawn to be contiguous and relatively compact, while keeping individual counties whole. District populations are balanced within <1% of the total number for the state. I believe that an east/west partition best represents the shared interests within each district.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |   |   |   |
| 223 | See above.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |   |   |   |
| 224 | None                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |   |   |   |
| 225 | Not in public comment package: This map takes the most historic and geographic split which follows the Continental Divide. The population deviation is +/-200 and only splits Gallatin County. We feel this map is the closest to the historical division of the State we had for the 80 years we had two seats. The maps were drawn with the established criteria of the commission for political competitiveness, for both parties and both seats. We felt using the 2018 US Senate race would best represent the most recent competitive race outside of the unusual election formats from 2020. Our estimates show this split would result in a 51.66% to 45.64% advantage for the Democrats in the Western region and a 48.86% to 48.06% advantage for the Democrats in the Eastern district, making the Eastern district extremely competitive. According to the Census numbers, the West is growing more rapidly than the East and Bozeman is growing faster than anywhere. This configuration would probably keep similar populations in each district in the more distant future as we would approach the 2030 census.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |   |   |   |
| 226 | Please see my proposal for districting in Montana based on the new Census data and reflecting a fair and equal population based on a north/south delineation. east/west alignments make no more sense in Montana if the population is to be truly balanced given the dramatic shift in growth in the western counties, hence the more favorable North and South Districts.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |   |   |   |
| 227 | Not in public comment package: The last map (see above) is based upon the controversial inclusion of competitiveness in the criteria. While this splits a few more counties and results in a population variance of just over 100, it uses political data to create the MOST equally competitive districts for both districts. Again our calculations on this would have the Western district from the 2018 Senate Race be 50.52% to 46.43% democrat favor while the East would be a very similar 50.16% to 47.10% democrat favor, making both districts as competitive as possible.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |   |   |   |
| 228 | This proposed map is based upon population, not political data, and complies with Montana statutes and constitutional requirements. It creates East and West districts, following historical precedent. The districts are compact and contiguous, and the map minimizes splits of cities and counties.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |   |   |   |
| 229 | Provided are two maps for the Congressional districts that we would like the Commission to consider. Each is within the 1% deviation and divides the State into two equal parts, by population and meets the Commission's other criteria.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |   |   |   |
| 230 | None                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |   |   |   |
| 231 | Sherwin Leep Map 1: Option 1 maintains a percentage of votes reflective of the overall population.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |   |   |   |
| 232 | Sherwin Leep Map 2: Option 2 would advantage the Democrats and would not reflect our demographics.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |   |   |   |
| 233 | Please find attached my proposed map for two North-South Congressional Districts. If you have already determined an East-West split, then what's the point? I have also attached a spreadsheet summarizing the populations of each split. My split is almost 50/50 in population. I cannot see where race or minorities will be a problem. Each district is compact. Each district is contiguous. 1. Both districts are a mix of large and small towns as well as political leanings. 2. The dividing line is a natural east-west line for many of the counties at 46 degrees, 30 minutes, North Latitude. This presents a problem for Lewis & Clark county and Powell counties. Both are north-south trending and bisected by the natural east-west line. Helena is at located at the southern extremity of Lewis & Clark County. The population of Powell County roughly a tenth of Lewis & Clark County because of Helena. We could split both counties, as depicted, or assign Lewis and Clark County to North or South District, and Powell County to the other District. 3. Trying to balance all the communities of interests will become an exercise in frustration. Let the cards fall where they may. Hopefully our two representatives will work in concert to further the interests of Montana, not one district or the other. That is why I prefer a north-south split. Both districts are a mix of mountain and prairie, and both representatives can focus on the production of natural resources which Montana is famous for and speak with a united front on any Federal hampering of this goal. 4. The introduction of "competitiveness" into this process is nonsense in my view. We're supposed to be working united against a common foe, the ever-growing Federal Government interceding into Montana's business at every opportunity, not caterwauling about one party gaining a possible edge over the other. That's silly. |   |   |   |
| 234 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |   |   |   |

## HOW TO SUBMIT A MAP AND COMMENTS

STOP THE STEAL of elections in Montana by making your voice heard!

### Ways you can help:

1. Submit a proposed map and written comments by **Wednesday, September 15<sup>th</sup> no later than 5 pm:**
    - a. **Draw your own map and submit it (see Page 2)**
    - b. **Send an email with attached map to the Chair and Commissioners**
      - i. Email to [districting@mt.gov](mailto:districting@mt.gov)
      - ii. Be sure to copy the Commission members on your email:  
[Maylinn.Smith@mtleg.gov](mailto:Maylinn.Smith@mtleg.gov), [Jeff.Essmann@mtleg.gov](mailto:Jeff.Essmann@mtleg.gov),  
[Joe.Lamson@mtleg.gov](mailto:Joe.Lamson@mtleg.gov), [Dan.Stusek@mtleg.gov](mailto:Dan.Stusek@mtleg.gov), [Kendra.Miller@mtleg.gov](mailto:Kendra.Miller@mtleg.gov)
      - iii. Subject: Congressional Redistricting Map
      - iv. **Suggested Comments:**  
Commissioners and Chair Smith,  
This proposed map is based upon population, not political data, and complies with Montana statutes and constitutional requirements. It creates East and West districts which follows historical precedent. The districts are compact and contiguous. It minimizes splits of cities and counties.  
Name, Address, Phone Number and Email Address (this is required information)  
Thank you for your consideration.
      - v. Attach one of the maps already drawn
    - c. **Submit your comments with the online submission form at**  
<https://mtredistricting.gov/contact/>
      - i. Fill in your information
      - ii. Copy and paste Comments below
      - iii. Submit (this won't allow you to attach a map but your comments need to be heard)
      - iv. **Suggested Comments (feel free to use your own words):**  
Commissioners and Chair Smith,  
Please consider the following when selecting Congressional maps:  
1. Do not create "competitive" districts – based on politics! The Congressional district lines should be drawn based upon Montana law, NOT gerrymandered based on political data.  
2. The Congressional Districts should comply with Montana law and constitutional requirements. The Congressional District should be within 1% with rare exceptions of up to 3%. The map should minimize splits of cities and counties. The Districts should be compact and contiguous.  
3. Precedent is an important concept that should guide the Commission.  
Historically, Montana Congressional Districts have been drawn to divide Montana into an East and West District, with the line going from North to South.  
Thank you for your consideration.
2. Attend the next Districting and Apportionment Commission meeting happening next **Friday, September 17<sup>th</sup> at 9:00 am in State Capitol Room 172.** (Allow for the entire day.)
3. If you can't be there in person, you can attend virtually! You MUST request remote participation information online by **5 pm on Thursday, September 16<sup>th</sup>** at  
<https://leg.mt.gov/content/Districting/2020/Meetings/September-17-2021/public-participation-information-dac-september-2021.pdf>

## HOW TO SUBMIT A MAP

**There are two ways to submit a map. You can create a map or attach one of the maps already created.**

## **1. Create a map**

Below are links to two maps that have been created with East/West Districts on mapping software which you can play with and then submit your own maps to the link or email on the previous page.

<https://districtr.org/plan/44308>

<https://davesredistricting.org/join/3efbca84-4f62-4b5c-96a3-c67d43e7fc23>

The [districtr.org](https://districtr.org) site does not require registration and is easy to use.

The [davesredistricting.org](https://davesredistricting.org) site requires you to create a free account to be able to play with maps. It is easy to do though and both are fairly easy to use.

Here is a link to Commission's link to the mapping tools and more information.

<https://redistrictingdatahub.org/tools/choose-your-own-mapping-tool/>

**Maps you create can either be submitted as a link at: <https://mtredistricting.gov/contact/> or they can be emailed to [districting@mt.gov](mailto:districting@mt.gov)**

## **2. Attach a Map**

If you do not have time to play with the mapping tools, but want to submit a map, there are three maps already created with East and West Districts attached to the email. See the previous page for instructions on how to do that.

July 16, 2021

Montana Districting and Apportionment Commission  
PO Box 201706  
Helena, MT 59620-1706

Members of the Montana Districting and Apportionment Commission:

The apportionment of a second seat in the U.S. House of Representatives to our state for the first time in thirty years is an historic opportunity. Recently, the national political discourse has ignored or been outright hostile toward rural states like Montana. An additional congressional representative is a good start toward righting those wrongs. This makes your duty to properly draw new political boundaries as important for our state as it has ever been.

During the July 8, 2021 hearing on Mandatory and Discretionary Criteria for Redistricting, many who gave public comment testified in support of a guaranteed number of seats and/or a guaranteed number of “competitive seats.” The commission should not go down this path. The boundaries of congressional and legislative districts must not be based on predetermined political outcomes. Forcing these criteria into redistricting would inappropriately politicize and undermine Montanans’ faith in what should be a nonpartisan process.

The districts you draw should be contiguous and compact, with the division of towns, cities, counties, and reservations minimized to the greatest extent possible. Geographic boundaries such as mountain ridges or other barriers that prevent transportation by maintained roads should also be respected.

Likewise, communities of interest should remain intact. For example, Montanans who live in rural areas of Gallatin, Missoula, or Yellowstone counties often have different interests than those in the cores of Bozeman, Missoula, and Billings. Allowing each of these communities of interest to elect their own state representatives and senators will better ensure each has adequate representation in the legislature.

AUSTIN KNUDSEN

STATE OF MONTANA

The results of November's elections were described by the media as a "red wave" and "political realignment." The Republican victories statewide – many of which were well into the double digits – led MTN News Chief Political Reporter Mike Dennison to note, "Democrats may have a long road back to competitiveness in Montana politics." The criteria pushed during the July 8 hearing appears to be nothing more than a political Hail Mary to speed down this "long road back to competitiveness."

Sincerely,

Austin Knudsen  
Montana Attorney General
