FOIA Request Number: 2019-02979, 2019-02980 & 2019-02982

Dear Mr. Evers:

This is in response to the above referenced Freedom of Information Act (FOIA) requests.

In response to your request, staff located 403 pages of responsive records, which were forwarded to this office for a release determination. After careful review, we determined 81 pages are appropriate for release in full, 309 pages are appropriate for release in part and 13 pages must be withheld in their entirety. Copies of releasable records are attached.

Pursuant to the Freedom of Information Act, 5 U.S.C. § 552, records were redacted or withheld in full from disclosure to you under the following exemptions:

(b)(6)
(b)(7)(C)
(b)(7)(E)
(b)(7)(F).

An explanation of the FOIA exemptions is attached.

As you are aware, because of the complexity of your requests, the amount of time required to process your requests in their entirety has increased. In an effort to be as responsive to your requests as possible, we are processing the records currently available and will supplement the release as more records become available. Once the final set of records is provided to you, you will receive appeal rights that apply to the entire release, regardless of when the date you receive the records.

Sincerely,

Darrin Howard
Regional Counsel

Enclosure: 1 CD

AMERICAN OVERSIGHT

**Explanation of FOIA Exemptions Used by the Federal Bureau of Prisons**

**5 U.S.C. § 552(b)(1)** protects classified information.

**5 U.S.C. § 552(b)(2)** concerns matters related solely to internal agency personnel rules or practices.

**5 U.S.C. § 552(b)(3)** concerns matters specifically exempted from release by statute.

**5 U.S.C. § 552(b)(4)** concerns trade secrets and commercial or financial information obtained from a person that is privileged or confidential.

**5 U.S.C. § 552(b)(5)** concerns certain inter- and intra-agency communications protected by the deliberative process privilege, the attorney work-product privilege, and/or the attorney-client privilege.

**5 U.S.C. § 552(b)(6)** concerns material the release of which would constitute a clearly unwarranted invasion of the personal privacy of third parties.

**5 U.S.C. § 552(b)(7)(A)** concerns records or information compiled for law enforcement purposes the release of which could reasonably be expected to interfere with enforcement proceedings.

**5 U.S.C. § 552(b)(7)(B)** concerns records or information compiled for law enforcement purposes the release of which would deprive a person of a right to a fair trial or an impartial adjudication.

**5 U.S.C. § 552(b)(7)(C)** concerns records or information compiled for law enforcement purposes the release of which could reasonably be expected to constitute an unwarranted invasion of the personal privacy of third parties.

**5 U.S.C. § 552(b)(7)(D)** concerns records or information compiled for law enforcement purposes the release of which could reasonably be expected to disclose the identities of confidential sources and information furnished by such sources.

**5 U.S.C. § 552(b)(7)(E)** concerns records or information compiled for law enforcement purposes the release of which would disclose techniques and procedures for law enforcement investigations or prosecutions.

**5 U.S.C. § 552(b)(7)(F)** concerns records or information compiled for law enforcement purposes the release of which could reasonably be expected to endanger the life or personal safety of an individual.

**5 U.S.C. § 552(b)(8)** concerns matters that are "contained in or related to examination, operating, or condition reports prepared by, on behalf of, or for the use of an agency responsible for the regulation or supervision of financial institutions."

**5 U.S.C. § 552(b)(9)** concerns geological and geophysical information and data, including maps, concerning wells.

# MDC Brooklyn
# OIG Documentation Request

# 2

If not in the Technical Design Guidelines, a description of what major building systems operate on what electrical priority level in the West building.

AMERICAN OVERSIGHT

**U.S. Department of Justice**

Federal Bureau of Prisons

Metropolitan Detention Center

*80 29th Street*
*Brooklyn, NY 11232*

April 5, 2019

**MEMORANDUM TO H. QUAY, WARDEN**

FROM: (b)(6); (b)(7)(C) lity Manger

SUBJECT: OIG Request for Information #3

I am providing the following response to OIG request dated March 15, 2019 as it relates to the Facilities Department at MDC Brooklyn.

1) Technical Design Guidelines (T.D.G) for MDC Brooklyn (original and any modified)
***Response:*** Please let me know if there is a specific section you are looking for as the T.D.G covers a wide range of trades and is not specific to MDC Brooklyn, the latest version of TDG is 09/05/11

2) If not in the Technical Design Guidelines, a description of what major building systems operate on what electrical priority level in the west building.
***Response:*** Please see attached breakdown sheet of the electrical distribution system for all three priorities.

3) Any waivers or documentation that describes limitations of HVAC system (e.g. documentation that acknowledges how age or design of equipment may limit equipment's ability to control temperatures in certain parts of the building).
***Response:*** There is no waivers that I am aware of for MDC Brooklyn as it relates to limitations of the HVAC systems, The Bureau of Prisons uses Building Life Cycle to estimate replacement of equipment as well as various reports and inspections, such as Preventative Maintenance and Building and Grounds inspection.

AMERICAN OVERSIGHT

4) Findings of the roofing contractor that visited facility in early February 2019 to determine if leaks continued in west SHU following January roofing repairs

***Response:*** A copy of the findings Dated February 11, 2019 is attached. As of this report we have had no active leaks in the roof over West Special Housing.

5) Any maintenance records describing recent damage and repairs to front door of the west building.

**Response:** Maintenance of the locking devices falls under Correctional Services, Lock shop.

6) HVAC foreman (b)(6); (b)(7)(C) described taking temperature readings. We weren't sure if they were recorded or taken ad-hoc to address a specific situation. Can MDC Brooklyn check with him to make sure he doesn't have any additional recorded temperature data (from before 2/13/2019 in addition to what MDC Brooklyn has previously provided to us.

***Response:*** I meet with HVAC foreman Mr. (b)(6); (b)(7)(C) and asked him if he has any additional records of recorded temperature data from before 2/13/2019 and he stated he does not. Mr. (b)(6); (b)(7)(C) along with other Facilities staff were tasked to take temperature readings as needed none were recorded as it was just to address concerns brought to our attention.

7) It is our understanding that temperature in the facility is automatically programmed to meet BOP standards (in and around 68 degrees during heating season) and that there are no local thermostats that control heat/cooling in the facility. Additionally, there are currently no operational remote sensors that inform facilities management of the temperature in a specific parts of the facility. Is this correct?

*a.* Also, please briefly describe how Facilities Management adjusts heat in the facilities (adjust boilers in the powerhouse? Adjust air handlers? Both?

***Response:*** MDC Brooklyn has two different types of Air Handler Units (AHU) that provide heating and cooling to the institution. One unit supplies the open common area which temperatures are controlled by return air set points. The second AHU provides heat and cooling to the inmate cells that is controlled by the average discharge temperature. The hot water boilers which provide hot water for heat are controlled in two ways. The first is hot water temperature which is normally 170°F. The boiler is also controlled by outside air temperature set point which is 55°F.

Note: Priority 3 switchgear was damaged with service interrupted due to a fire on Sunday, January 27, 2019 at approximately 12:00 pm. Temporary power was restored to the priority 3 switchgear on Sunday, February 3, 2019 at approximately 6:00 pm, with exception of X-RAY-1 and Cogen System. Power to breaker X-Ray-1 was restored on Wednesday, March 6, 2019 at approximately 12:00 pm. The Cogen System remains inoperable due to excessive heat sustained to the main feed to the Cogen System, which needs to be inspected and tested.

**Federal Bureau Of Prisons**

**Metropolitan Detention Center**

**80 29th Street**

*Office of the Safety Manager* *Brooklyn, New York 11232*

February 10, 2019

**MEMORANDUM TO DEPARTMENT HEADS**

**FROM:** (b)(6); (b)(7)(C) Safety Manager //s//

**SUBJECT:** Fire Watch Procedures

Due to technical issues regarding the East 2nd and 3rd floors fire alarm systems, effective immediately, the following fire watch procedures shall apply:

(b)(7)(F); (b)(7)(E)

While conducting your rounds, the following should be inspected:

- Check the areas for any signs of smoke.
- Remove all unnecessary combustibles i.e. boxes, papers etc. from the area.
- Ensure exits are not blocked.
- Recreation deck doors should not be propped open.
- Ensure that your fire extinguishers are fully charged.
- Report any immediate concerns to your shift Operations Lieutenant.

If you have any questions, please call me at extension (b)(6); (b)(7)(C)

Narrative Description of Fire Incident:

**On Sunday, January 27, 2019, at approximately 12:55 P.M. Distribution System #3 (Switch Gear) located in the 2nd floor Mechanical Room of the West Building, caught fire and experienced unrepairable damage. The fire department was called immediately upon discovery of the fire incident, and arrived at approximately 1:08 P.M. The fire department utilized water to extinguish the fire. Several staff members donned self contained breathing apparatuses (SCBA's) to open doors giving the fire department access into the area of the fire location. Subsequently, the damaged sustained has resulted in the institution being partially without power. It appears the institution will remain with partial power for an extended period, until the necessary repairs are made. There were no serious staff injuries (mainly only reports of smoke inhalation), and no inmate injuries sustained as a result of the incident. Additionally, all fire suppressant and fire alarm systems remain fully operational. Property loss is in excess of $100,000.00.**

AMERICAN OVERSIGHT

## Valery Logan - Re: Info Request Needed ASAP

**From:** (b)(6); (b)(7)(C)
**To:** Logan, Valery
**Date:** 2/11/2019 4:17 PM
**Subject:** Re: Info Request Needed ASAP
**Attachments:** Fire Plan 2019.docx

The Federal Bureau of Prison's does not utilize a Fire Prevention Log Book. Instead, a resource referred to as an institution Fire Contingency Plan is utilized. A fire contingency plan provides fire prevention information similar to that which is contained within a Fire Prevention Log Book. Please review the attached MDC Brooklyn Fire Contingency Plan.

>>> Valery Logan 2/8/2019 8:55 AM >>>
Attached is information requested. We need to get this information to them as soon as possible. I will need an **electronic copy for each number on this list** as well as **a hard copy**.

AMERICAN OVERSIGHT

Good afternoon,
We completed the temperature rounds for the West side. The following area(s) need temperature checks:

Health Service ([redacted] Awd's offices) 73
Religious Service 73
Education Department 69
52 74 cells/ 72 common areas & 62 72 cells/ 73 common areas
8th Floor Unit Team area 75, K 81 - 76 cells /73 common area, K82- 72 cells/74 common, K 83- 74 cells/73 common , K 84- 78 cells/76 common
G-43 (common area) 72

Additionally, the hot water dispensers are not working Do to electric outage. 52 & 71 hot water in the showers need to be checked. Building 4 has no hot water or heat (MCC)..

Overall, the heat is good. Let me know if you have any questions. Thanks!

**MEMORANDUM TO H. QUAY, WARDEN**

FROM: (b)(6); (b)(7)(C) ity Manger

SUBJECT: OIG for Information #3

I am providing the following response to OIG request dated March 15, 2019 as it relates to the Facilities Department at MDC Brooklyn.

1) Technical Design Guidelines (T.D.G) for MDC Brooklyn (original and any modified)
***Response:*** Please let me know if there is a specific section you are looking for as the T.D.G covers a wide range of trades and is not specific to MDC Brooklyn, the latest version of TDG is 09/05/11

2) If not in the Technical Design Guidelines, a description of what major building systems operate on what electrical priority level in the west building.
***Response:*** Please see attached breakdown sheet of the electrical distribution system for all three priorities.

3) Any waivers or documentation that describes limitations of HVAC system (e.g. documentation that acknowledges how age or design of equipment may limit equipment's ability to control temperatures in certain parts of the building).
***Response:*** There is no waivers that I am aware of for MDC Brooklyn as it relates to limitations of the HVAC systems, The Bureau of Prisons uses Building Life Cycle to estimate replacement of equipment as well as various reports and inspections, such as Preventative Maintenance and Building and Grounds inspection.

AMERICAN OVERSIGHT

4) Findings of the roofing contractor that visited facility in early February 2019 to determine if leaks continued in west SHU following January roofing repairs

***Response:*** A copy of the findings Dated February 11, 2019 is attached. As of this report we have had no active leaks in the roof over West Special Housing.

5) Any maintenance records describing recent damage and repairs to front door of the west building.

**Response:** Maintenance of the locking devices falls under Correctional Services, Lock shop.

6) HVAC foreman (b)(6); (b)(7)(C) described taking temperature readings. We weren't sure if they were recorded or taken ad-hoc to address a specific situation. Can MDC Brooklyn check with him to make sure he doesn't have any additional recorded temperature data (from before 2/13/2019 in addition to what MDC Brooklyn has previously provided to us.

***Response:*** I meet with HVAC foreman Mr. (b)(6); (b)(7)(C) and asked him if he has any additional records of recorded temperature data from before 2/13/2019 and he stated he does not. Mr. (b)(6); (b)(7)(C) along with other Facilities staff were tasked to take temperature readings as needed none were recorded as it was just to address concerns brought to our attention.

7) It is our understanding that temperature in the facility is automatically programmed to meet BOP standards (in and around 68 degrees during heating season) and that there are no local thermostats that control heat/cooling in the facility. Additionally, there are currently no operational remote sensors that inform facilities management of the temperature in a specific parts of the facility. Is this correct?

*a.* Also, please briefly describe how Facilities Management adjusts heat in the facilities (adjust boilers in the powerhouse? Adjust air handlers? Both?

***Response:*** MDC Brooklyn has two different types of Air Handler Units (AHU) that provide heating and cooling to the institution. One unit supplies the open common area which temperatures are controlled by return air set points. The second AHU provides heat and cooling to the inmate cells that is controlled by the average discharge temperature. The hot water boilers which provide hot water for heat are controlled in two ways. The first is hot water temperature which is normally 170°F. The boiler is also controlled by outside air temperature set point which is 55°F.

March 22, 2019

**MEMORANDUM TO OFFICE INSPECTOR GENERAL**

FROM: [redacted] Utility Manger

SUBJECT: [redacted] (b)(6); (b)(7)(C) Request For Information

In respon[redacted] to OIG request for information as it pertains to any records or logs that detail corrective action taken following a low or high temperature reading in the facility between January 1, 2019 and February 15, 2019.

MDC Brooklyn started taking daily temperature readings starting January 30, 2019 till current date. Any areas that are below the Bureau of Prisons policy (4200.12) which is a target point of 68 degrees corrective action is taken. The corrective action can be a variety of things such as restating the Air Handler (AHU), resetting the fire alarm, adjusting the Outside Air Damper (O.A.D), tighten/replace a belt or resetting a sensor on the unit. We did not generate a Work Order for each time an adjustment is made on the unit. Staff make rounds to the housing units and mechanical rooms daily to check the equipment. MDC Brooklyn is currently updating the Building Management System (BMS) so the system is not fully 100% functional, this is a computer aided system that allows the Utility System Operators (powerhouse) staff see the status of the air handles.

AMERICAN OVERSIGHT

Good afternoon,
We completed the temperature rounds for the West side. The following area(s) need temperature checks:

Health Service (b)(6); (b)(7)(C) Awd's offices) 73
Religious Service 73
Education Department 69
52 74 cells/ 72 common areas & 62 72 cells/ 73 common areas
8th Floor Unit Team area 75, K 81 - 76 cells /73 common area, K82- 72 cells/74 common, K 83- 74 cells/73 common , K 84- 78 cells/76 common
G-43 (common area) 72

Additionally, the hot water dispensers are not working Do to electric outage. 52 & 71 hot water in the showers need to be checked. Building 4 has no hot water or heat (MCC)..

Overall, the heat is good. Let me know if you have any questions. Thanks!

# Valery Logan - OIG Document request- Item # 5

**From:** (b)(6); (b)(7)(C)
**To:** Logan, Valery
**Date:** 2/13/2019 2:53 PM
**Subject:** OIG Document request- Item # 5
**CC:** (b)(6); (b)(7)(C)

**MDC Brooklyn or relevant BOP cold weather protocols**

There is not a contingency plan, or any other policy that oversees cold weather. However, I have seen and managed the following preventative and corrective measures concerning cold weather.

- Distribution of inmate jackets.
- Distribution of additional linens and blankets.
- Planned snow removal and salt teams. (Both staff and inmate)
- Overtime paid to Facilities staff to address heating/water temp/snow removal.

RE: MDC BROOKLYN LEAK INVESTIGATION REPORT

Dear (b)(6); (b)(7)(C)

We were called in to perform an emergency leak investigation over Area 4, Cell #111. When we got into Facilities on February 8, 2019, I was told that there was a second leak over Area K-81 that we needed to investigate. I asked to look at both of the areas from inside first so we could determine where they were with a tape measure and do a thorough investigation. I was told that we could see the leak at K-81 but the other leak was in a very secure area. I saw a photo of moisture on the ceiling and was shown on the roof plan where the cell was.

We went to Area K-81 and saw a bucket catching dripping water along the wall at the expansion joint. We were told that in heavy rain, the water goes further out along the roof expansion joint. We then went on the roof to investigate. I suspected the water was getting in through the expansion joint somewhere along the vertical wall as well as the horizontal area on top. We purchased hoses to do a water test but were unable to find anywhere to hook them up so we decided to take a portion of the counterflashing off. The counterflashing was fully caulked and was completely sealed before we removed it. When we opened it up, the area was wet below the fully sealed caulking and the counterflashing (Photo #2703). Water is getting in behind the vertical and horizontal expansion joint that is above the roof and is entering the building behind the flashing membrane (Photo #2704). There was old caulk on the horizontal area so I suspect that this is an old problem.

Since we couldn't get inside to investigate Area 4, Cell #111, we started to investigate from above. The only thing that we found was the drain bowl clamping ring felt a little loose so we tightened it then moved gravel and pulled up insulation to further investigate (Photos #2708, 2709, and 2710). We found no deficiencies so I talked

AMERICAN OVERSIGHT

with (b)(6); (b)(7)(C) and told him that we could do nothing more without going inside. Somehow (b)(6); (b)(7)(C) got the approval from the Captain and we went inside.

When inside Area 4, Cell #111 we discovered that we had been directed to investigate the suspected leak on the wrong area. We also found that the ceiling was dry even though it had rained all night and all morning (Photo #2713). The paint on the ceiling was intact and there were no signs of blistering beneath the paint as you would find if the water was coming from above the paint. This small cell has a shower (Photo #2714), A sink, and a toilet (Photo #2716) in it with no ventilation. I believe that this is a classic case of condensation and it looks like it's been a problem for some time as the rusty light fixture suggests (Photo #2715).

In conclusion, we found no deficiencies in the roofing system during the investigation of either of the two suspected roof leaks. In Area K-81, I recommend further investigation of the wall expansion joint and ultimately a permanent repair or replacement of it. As for the moisture in Area 4, Cell 111, some form of ventilation would remediate the situation.

Sincerely,

(b)(6); (b)(7)(C)

Oso-Roofing Division
