5	Type of facility as indicated by the provider in the CDC COVID provider agreement form. For county health departments, the literal "CHD" will appear before the facility type.
6	County of the site receiving the vaccines
7	Name of the site enrolled in the COVID-19 vaccination program in Florida SHOTS
8	An unique identifier provided by Agency for Healthcare Administration (AHCA) to an hospital or nursing home.
9	Unique Identifier of the site enrolled in the COVID-19 vaccination program
10	Number of doses of vaccines that is reported by CDC as having been shipped to the provider (site). Hence total doses shipped to Florida will differ from doses ordered with CDC.
11	Number of doses received into inventory in Florida SHOTS by the site
12	Number of doses transferred into inventory from another provider in Florida SHOTS by the site
13	Number of doses transferred out of inventory to another provider in Florida SHOTS by the site
14	Number of doses recorded as wasted or spoiled in Florida SHOTS
15	Number of doses adjusted for inventory reconciliation purposes. Documenting vaccine inventory for a patient who has opted out of registry participation, correcting incorrect shipment information, correcting a human error in recording, and documenting imprecise measure of extraction from a multi-dose vial are examples of adjusting the inventory doses
16	Number of doses recorded as administered for the inventory record in Florida SHOTS. Doses administered will be attributed to an inventory record only if the inventory details sent by the provider such as, NDC, lot number, and expiration date match the information on the inventory record
17	Number of doses currently on hand for the site per the inventory records in Florida SHOTS. It is calculated as follows (dose received + doses transferred in) - (doses transferred out + doses wasted/spoiled + FLSHOTS inventory - doses administered) + doses adjusted
18	Percentage of doses remaining. It is calculated as (FLSHOTS inventory - quantity on hand)/(doses received + doses transferred in)
19	Number of doses reported as administered as the first dose by the site to Florida SHOTS. It will match FLSHOTS inventory - doses administered only when a provider reports a shot with all inventory details that are considered a match to the inventory record on that site.
20	Number of doses reported as administered as the second dose for a patient by the site to Florida SHOTS. It will match FLSHOTS inventory - doses administered only when a provider reports a shot with all inventory details that are considered a match to the inventory record on that site.
21	Number of doses reported as administered by the site to Florida SHOTS. It will match FLSHOTS inventory - doses administered only when a provider reports a shot with all inventory details that are considered a match to the inventory record on that site.
22	Number of doses currently on hand for the site based on the shots reported data in Florida SHOTS. It is calculated as follows (dose received + doses transferred in) - (doses transferred out + doses wasted/spoiled + FLSHOTS reporting - doses reported) + doses adjusted. It is considered an estimate as it will vary with the actual provider inventory level due to lag in reporting data to FLSHOTS.
23	Estimate on the percentage of doses remaining based on the shots reported information. It is calculated as (FLSHOTS reporting - quantity on hand)/(doses received + doses transferred in)
24	Estimate on the percentage of doses remaining based on the shots reported information. It is calculated as (FLSHOTS reporting - quantity on hand)/(doses received + doses transferred in)

9	Unique Identifier of the site enrolled in the COVID-19 vaccination program
10	Number of doses of vaccines that is reported by CDC as having been shipped to the provider (site). 16	Number of doses recorded as administered for the inventory record in Florida SHOTS. Doses administered will be attributed to an inventory record only if the inventory details sent by the provider such as, NDC, lot number, and expiration date match the information on the inventory record
17	Number of doses currently on hand for the site per the inventory records in Florida SHOTS. It is calculated as follows (dose received + doses transferred in) - (doses transferred out + doses wasted/spoiled + FLSHOTS inventory - doses administered) + doses adjusted
18	Percentage of doses remaining. It is calculated as (FLSHOTS inventory - quantity on hand)/(doses received + doses transferred in)
19	Number of doses reported as administered as the first dose by the site to Florida SHOTS. It will match FLSHOTS inventory - doses administered only when a provider reports a shot with all inventory details that are considered a match to the inventory record on that site.
20	Number of doses reported as administered as the second dose for a patient by the site to Florida SHOTS. It will match FLSHOTS inventory - doses administered only when a provider reports a shot with all inventory details that are considered a match to the inventory record on that site.
21	Number of doses reported as administered by the site to Florida SHOTS. It will match FLSHOTS inventory - doses administered only when a provider reports a shot with all inventory details that are considered a match to the inventory record on that site.
22	Number of doses currently on hand for the site based on the shots reported data in Florida SHOTS. It is calculated as follows (dose received + doses transferred in) - (doses transferred out + doses wasted/spoiled + FLSHOTS reporting - doses reported) + doses adjusted. It is considered an estimate as it will vary with the actual provider inventory level due to lag in reporting data to FLSHOTS.
23	Estimate on the percentage of doses remaining based on the shots reported information. It is calculated as (FLSHOTS reporting - quantity on hand)/(doses received + doses transferred in)
24	Estimate on the percentage of doses remaining based on the shots reported information. It is calculated as (FLSHOTS reporting - quantity on hand)/(doses received + doses transferred in)

	B
1	Definition
2	Name of the organization as enrolled in Florida SHOTS
3	Type of facility as indicated by the provider in the CDC COVID provider agreement form. For county health departments, the literal "CHD" will appear before the facility type.
4	County of the site receiving the vaccines
5	Name of the site enrolled in the COVID-19 vaccination program in Florida SHOTS
6	An unique identifier provided by Agency for Healthcare Administration (AHCA) to an hospital or nursing home.
7	Unique Identifier of the site enrolled in the COVID-19 vaccination program
8	Number of doses of vaccines that is reported by CDC as having been shipped to the provider (site). The site will appear on this table only if they have performed an inventory related transactions such as, acknowledging/accepting receipts, transfer in. Hence total doses shipped to Florida will differ from doses ordered with CDC.
9	Number of doses received into inventory in Florida SHOTS by the site
10	Number of doses transferred into inventory from another provider in Florida SHOTS by the site
11	Number of doses transferred out of inventory to another provider in Florida SHOTS by the site
12	Number of doses recorded as wasted or spoiled in Florida SHOTS
13	Number of doses adjusted for inventory reconciliation purposes. Documenting vaccine inventory for a patient who has opted out of registry participation, correcting incorrect shipment information, correcting a human error in recording, and documenting imprecise measure of extraction from a multi-dose vial are examples of adjusting the inventory doses
14	Number of doses recorded as administered for the inventory record in Florida SHOTS. Doses administered will be attributed to an inventory record only if the inventory details sent by the provider such as, NDC, lot number, and expiration date match the information on the inventory record
15	Number of doses currently on hand for the site per the inventory records in Florida SHOTS. It is calculated as follows (dose received + doses transferred in) - (doses transferred out + doses wasted/spoiled + FLSHOTS inventory - doses administered) + doses adjusted
16	Percentage of doses remaining. It is calculated as (FLSHOTS inventory - quantity on hand)/(doses received + doses transferred in)
17	Number of doses reported as administered as the first dose by the site to Florida SHOTS. It will match FLSHOTS inventory - doses administered only when a provider reports a shot with all inventory details that are considered a match to the inventory record on that site.
18	Number of doses reported as administered as the second dose for a patient by the site to Florida SHOTS. It will match FLSHOTS inventory - doses administered only when a provider reports a shot with all inventory details that are considered a match to the inventory record on that site.
19	Number of doses reported as administered by the site to Florida SHOTS. It will match FLSHOTS inventory - doses administered only when a provider reports a shot with all inventory details that are considered a match to the inventory record on that site.
20	Number of doses currently on hand for the site based on the shots reported data in Florida SHOTS. It is calculated as follows (dose received + doses transferred in) - (doses transferred out + doses wasted/spoiled + FLSHOTS reporting - doses reported) + doses adjusted. It is considered an estimate as it will vary with the actual provider inventory level due to lag in reporting data to FLSHOTS.
21	Estimate on the percentage of doses remaining based on the shots reported information. It is calculated as (FLSHOTS reporting - quantity on hand)/(doses received + doses transferred in)
22	Estimate on the percentage of doses remaining based on the shots reported information. It is calculated as (FLSHOTS reporting - quantity on hand)/(doses received + doses transferred in)

1	Definition
2	Name of the organization as enrolled in Florida SHOTS
3	Type of facility as indicated by the provider in the CDC COVID provider agreement form. For county health departments, the literal "CHD" will appear before the facility type.
4	County of the site receiving the vaccines
5	Name of the site enrolled in the COVID-19 vaccination program in Florida SHOTS
6	An unique identifier provided by Agency for Healthcare Administration (AHCA) to an hospital or nursing home.
7	Unique Identifier of the site enrolled in the COVID-19 vaccination program
8	Number of doses of vaccines that is reported by CDC as having been shipped to the provider (site). The site will appear on this table only if they have performed an inventory related transactions such as, acknowledging/accepting receipts, transfer in. Hence total doses shipped to Florida will differ from doses ordered with CDC.
9	Number of doses received into inventory in Florida SHOTS by the site
10	Number of doses transferred into inventory from another provider in Florida SHOTS by the site
11	Number of doses transferred out of inventory to another provider in Florida SHOTS by the site
12	Number of doses recorded as wasted or spoiled in Florida SHOTS
13	Number of doses adjusted for inventory reconciliation purposes. Documenting vaccine inventory for a patient who has opted out of registry participation, correcting incorrect shipment information, correcting a human error in recording, and documenting imprecise measure of extraction from a multi-dose vial are examples of adjusting the inventory doses
14	Number of doses recorded as administered for the inventory record in Florida SHOTS. Doses administered will be attributed to an inventory record only if the inventory details sent by the provider such as, NDC, lot number, and expiration date match the information on the inventory record
15	Number of doses currently on hand for the site per the inventory records in Florida SHOTS. It is calculated as follows (dose received + doses transferred in) - (doses transferred out + doses wasted/spoiled + FLSHOTS inventory - doses administered) + doses adjusted
16	Percentage of doses remaining. It is calculated as (FLSHOTS inventory - quantity on hand)/(doses received + doses transferred in)
17	Number of doses reported as administered as the first dose by the site to Florida SHOTS. It will match FLSHOTS inventory - doses administered only when a provider reports a shot with all inventory details that are considered a match to the inventory record on that site.
18	Number of doses reported as administered as the second dose for a patient by the site to Florida SHOTS. It will match FLSHOTS inventory - doses administered only when a provider reports a shot with all inventory details that are considered a match to the inventory record on that site.
19	Number of doses reported as administered by the site to Florida SHOTS. It will match FLSHOTS inventory - doses administered only when a provider reports a shot with all inventory details that are considered a match to the inventory record on that site.
20	Number of doses currently on hand for the site based on the shots reported data in Florida SHOTS. It is calculated as follows (dose received + doses transferred in) - (doses transferred out + doses wasted/spoiled + FLSHOTS reporting - doses reported) + doses adjusted. It is considered an estimate as it will vary with the actual provider inventory level due to lag in reporting data to FLSHOTS.
21	Estimate on the percentage of doses remaining based on the shots reported information. It is calculated as (FLSHOTS reporting - quantity on hand)/(doses received + doses transferred in)
22	Estimate on the percentage of doses remaining based on the shots reported information. It is calculated as (FLSHOTS reporting - quantity on hand)/(doses received + doses transferred in)

Subject: Vaccine Reports - 1.8.2021

Good morning,

Please find attached three draft reports.

The Vaccine Facility Report and Vaccine Hospital Facility Report have been improved in the following ways:

- New column B to categorize facilities by:
  - CHD
  - FQHC/RHC (Rural Health Clinic)
  - Hospital
  - Other
- Moved the Florida SHOTS Inventory and Florida SHOTS Reporting columns to the left (now beginning at column F instead of the previous column M)

The Doses by Facility Types Report has been improved to reflect the following categorizations:

- FQHC/RHC
- CHD
- Hospitals
- Pharmacy – Partners (CVS/Walgreens-received federal allocations)
- Pharmacy – Others (receive Florida allocations)
- Other

Please note, the Pharmacy – Partners (CVS/Walgreens-received federal allocations) will not be in the Vaccine Facility Report since they have not received Florida-allocated doses.

Thank you,

Clayton

Good morning,

Please find attached three draft reports.

Please note, there is a small error in the *Vaccine doses – facility type summary* report. What should be listed as Dose 1 and Dose 2 under Pfizer vaccine is instead listed as Dose 12 and Dose 23. We will fix this error today.

Thank you,

Clayton

3	**Definition**
4	Name of the organization as enrolled in Florida SHOTS
5	Type of facility as indicated by the provider in the CDC COVID provider agreement form. For county health departments, the literal "CHD" will appear before the facility type.
6	County of the site receiving the vaccines
7	Name of the site enrolled in the COVID-19 vaccination program in Florida SHOTS
8	An unique identifier provided by Agency for Healthcare Administration (AHCA) to an hospital or nursing home.
9	Unique Identifier of the site enrolled in the COVID-19 vaccination program
10	Number of doses of vaccines that is reported by CDC as having been shipped to the provider (site). The site will appear on this table only if they have performed an inventory related transactions such as, acknowledging/accepting receipts, transfer in. Hence total doses shipped to Florida will differ from doses ordered with CDC.
11	Number of doses received into inventory in Florida SHOTS by the site
12	Number of doses transferred into inventory from another provider in Florida SHOTS by the site
13	Number of doses transferred out of inventory to another provider in Florida SHOTS by the site
14	Number of doses recorded as wasted or spoiled in Florida SHOTS
15	Number of doses adjusted for inventory reconciliation purposes. Documenting vaccine inventory for a patient who has opted out of registry participation, correcting incorrect shipment information, correcting a human error in recording, and documenting imprecise measure of extraction from a multi-dose vial are examples of adjusting the inventory doses
16	Number of doses recorded as administered for the inventory record in Florida SHOTS. Doses administered will be attributed to an inventory record only if the inventory details sent by the provider such as, NDC, lot number, and expiration date match the information on the inventory record
17	Number of doses currently on hand for the site per the inventory records in Florida SHOTS. It is calculated as follows (dose received + doses transferred in) - (doses transferred out + doses wasted/spoiled + FLSHOTS inventory - doses administered) + doses adjusted
18	Percentage of doses remaining. It is calculated as (FLSHOTS inventory - quantity on hand)/(doses received + doses transferred in)
19	Number of doses reported as administered as the first dose by the site to Florida SHOTS. It will match FLSHOTS inventory - doses administered only when a provider reports a shot with all inventory details that are considered a match to the inventory record on that site.
20	Number of doses reported as administered as the second dose for a patient by the site to Florida SHOTS. It will match FLSHOTS inventory - doses administered only when a provider reports a shot with all inventory details that are considered a match to the inventory record on that site.
21	Number of doses reported as administered by the site to Florida SHOTS. It will match FLSHOTS inventory - doses administered only when a provider reports a shot with all inventory details that are considered a match to the inventory record on that site.
22	Number of doses currently on hand for the site based on the shots reported data in Florida SHOTS. It is calculated as follows (dose received + doses transferred in) - (doses transferred out + doses wasted/spoiled + FLSHOTS reporting - doses reported) + doses adjusted. It is considered an estimate as it will vary with the actual provider inventory level due to lag in reporting data to FLSHOTS.
23	Estimate on the percentage of doses remaining based on the shots reported information. It is calculated as (FLSHOTS reporting - quantity on hand)/(doses received + doses transferred in)
24	Estimate on the percentage of doses remaining based on the shots reported information. It is calculated as (FLSHOTS reporting - quantity on hand)/(doses received + doses transferred in)

16	Number of doses recorded as administered for the inventory record in Florida SHOTS. Doses administered will be attributed to an inventory record only if the inventory details sent by the provider such as, NDC, lot number, and expiration date match the information on the inventory record
17	Number of doses currently on hand for the site per the inventory records in Florida SHOTS. It is calculated as follows (dose received + doses transferred in) - (doses transferred out + doses wasted/spoiled + FLSHOTS inventory - doses administered) + doses adjusted
18	Percentage of doses remaining. It is calculated as (FLSHOTS inventory - quantity on hand)/(doses received + doses transferred in)
19	Number of doses reported as administered as the first dose by the site to Florida SHOTS. It will match FLSHOTS inventory - doses administered only when a provider reports a shot with all inventory details that are considered a match to the inventory record on that site.
20	Number of doses reported as administered as the second dose for a patient by the site to Florida SHOTS. It will match FLSHOTS inventory - doses administered only when a provider reports a shot with all inventory details that are considered a match to the inventory record on that site.

It is calculated as follows (dose received + doses transferred in) - (doses transferred out + doses wasted/spoiled + FLSHOTS reporting - doses reported) + doses adjusted. It is considered an estimate as it will vary with the actual provider inventory level due to lag in reporting data to FLSHOTS.
23	Estimate on the percentage of doses remaining based on the shots reported information. It is calculated as (FLSHOTS reporting - quantity on hand)/(doses received + doses transferred in)
24	Estimate on the percentage of doses remaining based on the shots reported information. It is calculated as (FLSHOTS reporting - quantity on hand)/(doses received + doses transferred in)

These are the last reports I have. AO is working on a project for leadership and may not get us what we need today. May just have to make a note.

Good morning,

Please find attached three draft reports.

Please note, there is a small error in the *Vaccine doses – facility type summary* report. What should be listed as Dose 1 and Dose 2 under Pfizer vaccine is instead listed as Dose 12 and Dose 23. We will fix this error today.

Thank you,

Clayton

I wanted to make sure Dr. Greg Rosencrance gets notified of future vaccine distribution to Cleveland Clinic Indian River Medical center if possible. He is the CEO and President of Indian River and he is on the COVID section A application (attached). He has received emails before on distribution, but did not get the recent one with this latest 2nd dose of Moderna.

His email is rosencj@ccf.org

Thank you,

Bill

Last night was the first notification I have received about an incoming vaccine shipment. That email came from McKesson. I've attached the email here.

I don't have any contacts with AHCA and I don't know what process they use for notifications.

Can you please see why Dr. Rosencrance is not getting updates from AHCA with vaccine shipments? He needs to know when we are resupplied.

Agreement requirements

I understand this is an agreement between Organization and CDC. This program is part of a collaboration under the relevant state, local, or territorial immunization program's cooperative agreement with CDC.

To receive one or more of the publicly funded COVID-19 vaccines (COVID-19 vaccine), constituent products, and ancillary supplies at no cost, Organization agrees that it will adhere to the following requirements:

1. Organization must administer COVID-19 vaccine in accordance with all requirements and recommendations of CDC and CDC's Advisory Committee on Immunization Practices (ACIP).[1]

2. Within 24 hours of administering a dose of COVID-19 vaccine and adjuvant (if applicable), Organization must record in the vaccine recipient's record and report required information to the relevant state, local, or territorial public health authority. Details of required information (collectively, Vaccine Administration Data) for reporting can be found on CDC's website.[2]

   Organization must submit Vaccine Administration Data through either (1) the immunization information system (IIS) of the state and local or territorial jurisdiction or (2) another system designated by CDC according to CDC documentation and data requirements.[2]

   Organization must preserve the record for at least 3 years following vaccination, or longer if required by state, local, or territorial law. Such records must be made available to any federal, state, local, or territorial public health department to the extent authorized by law.

3. Organization must not sell or seek reimbursement for COVID-19 vaccine and any adjuvant, syringes, needles, or other constituent products and ancillary supplies that the federal government provides without cost to Organization.

4. Organization must administer COVID-19 vaccine regardless of the vaccine recipient's ability to pay COVID-19 vaccine administration fees.

5. Before administering COVID-19 vaccine, Organization must provide an approved Emergency Use Authorization (EUA) fact sheet or vaccine information statement (VIS), as required, to each vaccine recipient, the adult caregiver accompanying the recipient, or other legal representative.

6. Organization's COVID-19 vaccination services must be conducted in compliance with *CDC's Guidance for Immunization Services During the COVID-19 Pandemic* for safe delivery of vaccines.[3]

7. Organization must comply with CDC requirements for COVID-19 vaccine management. Those requirements include the following:

   a) Organization must store and handle COVID-19 vaccine under proper conditions, including maintaining cold chain conditions and chain of custody at all times in accordance with the manufacturer's package insert and CDC guidance in CDC's *Vaccine Storage and Handling Toolkit*, which will be updated to include specific information related to COVID-19 vaccine;

   b) Organization must monitor vaccine storage unit temperatures at all times using equipment and practices that comply with guidance in CDC's *Vaccine Storage and Handling Toolkit*[4];

   c) Organization must comply with each relevant jurisdiction's immunization program guidance for dealing with temperature excursions;

   d) Organization must monitor and comply with COVID-19 vaccine expiration dates; and

   e) Organization must preserve all records related to COVID-19 vaccine management for a minimum of 3 years, or longer if required by state, local, or territorial law.

8. Organization must report the number of doses of COVID-19 vaccine and adjuvants that were unused, spoiled, expired, or wasted as required by the relevant jurisdiction.

9. Organization must comply with all federal instructions and timelines for disposing of COVID-19 vaccine and adjuvant, including unused doses.[5]

10. Organization must report any adverse events following vaccination to the Vaccine Adverse Event Reporting System (VAERS) (1-800-822-7967 or http://vaers.hhs.gov/contact.html).

11. Organization must provide a completed COVID-19 vaccination record card to every COVID-19 vaccine recipient, the adult caregiver accompanying the recipient, or other legal representative. Each COVID-19 vaccine shipment will include COVID-19 vaccination record cards.

12. **a)** Organization must comply with all applicable requirements as set forth by the U.S. Food and Drug Administration, including but not limited to requirements in any EUA that covers COVID-19 vaccine.

    b) Organization must administer COVID-19 vaccine in compliance with all applicable state and territorial vaccination laws.

My name is Marcel C Gutierrez, and I had the first Pfizer shot on Jan.8, 2021 at the Ed Radice center in Tampa. My appointment was made on-line earlier that week. When the appointment was made, my email id was entered incorrectly and I have not received any followup notices that I should have received.
Now, my Vaccination Record Card says that my second shot is due on Jan, 29.

I need to try to reschedule that appointment as I will be out of town on that date.
It is practically impossible to get through to the Covid appointment line via telephone, to try and work this out. And I have no email communication because of the incorrect email id.

The incorrect id is *captianbuddy@gmail.com*. The correct id should be ***captainbuddy@gmail.com***.

Please advise me on how to get this corrected, or direct this email to someone who can assist me.

Sherry:
I left you a voice mail, if you could please call me. The State Cache received 2,400 Moderna doses. 2,000 went today so I only have 400 doses remaining and will be unable to fill the below request.
Additionally, I took the Bureau of Public Health Labs in Tampa off of FLSHOTS today for Freezer storage. We had hopes of using a piece of equipment, and I was too quick to add it into FLSHOTS, but it was not holding temperatures.
There is no storage facility at the Bureau of Public Health Labs for Moderna; only the ULT for Pfizer.

Weekly Reader: *Highlights from Data, Distribution, and Pharmacy*

January 19, 2021

Key highlights for this week include:

- COVID Data Tracker Updates
- Pfizer Ancillary Kits Upgraded to Support 6th Dose
- Wastage Reporting Guidance
- LTCF Release of NEW FAQs

Important Information:

- Critical program contact information including White List updated 1/11/21)

Data

COVID Data Tracker Updates

The COVID Data Tracker was updated this week to include new data on vaccination efforts. The Tracker now includes expanded information to include how many people nationwide have received one or more doses of the vaccine, the number of people who received a second dose, and a breakdown of overall vaccine administration by manufacturer.

Key points regarding the data:

- Total doses administered refers to the total number of vaccine doses administered that have been reported to CDC, regardless of whether the vaccine was someone's first or second dose.
- People with 1 or more doses refers to the number of people that have received at least one dose of a COVID-19 vaccine.
- People with 2 doses is a subset of the people who have received at least one dose of a COVID-19 vaccine.

You may notice a slight discrepancy between the 1st and 2nd dosage data and the "total administered" data. A small number of records could not be assigned a dosage based on the data submitted. For example, the dose number might have been missing or an error showed someone received multiple doses. **Please check your data prior to submission to ensure for quality and completeness.** Ongoing monitoring of data is critical to informing and implementing the national COVID-19 vaccination program and your efforts to help improve reporting are greatly appreciated.

AMERICAN OVERSIGHT

Distribution

Pfizer Ancillary Kits Upgraded to Support 6th Dose

Initial ancillary supply kits assembled and distributed by ASPR only contain supplies to administer 5 doses per vial. ASPR will begin shipment of enhanced kits on January 19 with enough supplies to administer a total of 6 doses per vial.

No action is required to receive the enhanced ancillary supply kits. There will be no difference in box size/shape for the enhanced kits, and there will be no change in the email alerts/tracking/shipping notifications.

We realize this leaves a gap in sufficient ancillary supplies for providers with existing kits. Many providers have been able to find additional supplies to vaccinate more people. However, this may not be possible in all locations. Until additional supplies are provided through enhanced ancillary supply kits, it is appropriate to withdraw 5 doses per vaccine vial. Do not delay vaccinations while waiting for additional supplies to withdraw 6 doses from each vial.

Wastage Reporting Guidance

Below is guidance on the disposal of wasted COVID-19 vaccines (e.g., unused, spoiled or expired).

Disposal of wasted COVID-19 vaccines

The COVID-19 vaccination provider agreement states that the provider must dispose of wasted COVID-19 vaccines according to the jurisdiction's procedures.

Sites should dispose of COVID-19 vaccine waste in accordance with local regulations and processes they are currently using to dispose of regulated medical waste.

In addition, COVID-19 vaccine program requirements include providers reporting wastage (e.g., unused, spoiled, or expired) information according to the jurisdiction's procedures. Below is information to help with reporting wastage in VTrckS.

Documentation of wasted COVID-19 vaccines

- Use the VTrckS ExIS Interface for Wastage* to report vaccine at administration sites that cannot be used for administration because it is spoiled/wasted or expired.
- Jurisdictions can follow their routine processes for submitting wastage information to VTrckS, by uploading a wastage file using the ExIS interface in VTrckS or by direct entry into VTrckS
- Federal agencies and pharmacies can use VPoP to generate wastage files to upload into VTrckS

Required fields for submitting wastage information to VTrckS include:

a. the provider PIN
b. NDC
c. number of doses wasted,
d. wastage reason (this is required; use one of the reason codes for wastage in VTrckS)

AMERICAN OVERSIGHT

**Details about reporting vaccine wastage are available in the VTrckS Training Library (jurisdictions) and the VTrckS Materials for Commercial and Federal Partners link in SAMS (federal agencies/pharmacy chains).*

Pharmacy

LTCF Program Implementation

On January 14th, awardees received a new set of FAQs from LTCF Program Implementation team. The document contains answers to several pressing questions currently being asked of CDC staff. Including:

Can my jurisdiction defer a weekly transfer to the pharmacy partners if they have unused vaccine allocation building up from previous weeks? If so, how?

Jurisdictions are encouraged to first talk directly with the pharmacy partners to determine if deferring their weekly LTCF vaccine allocation will slow implementation of clinics. If your jurisdiction feels confident that deferring for a week will not impact program implementation, you may submit a request to CDC. CDC will approve or deny the request based on a number of factors, including the amount of allocation the pharmacy partner has available, the number of clinics scheduled for the following 2 weeks, and uptake estimates based on past clinics.

To submit a deferral request, jurisdictions should send an e-mail to eocevent494@cdc.gov by midnight ET on Tuesday of the week the transfer is scheduled to occur. CDC will approve or deny the request by Wednesday at 12 PM ET. If the request is approved, jurisdictions will see their full weekly allocation reflected in their VTrckS (Vaccine Tracking System) ordering caps the following day (Thursday), unless they have elected to transfer allocation to a federal pharmacy partner as part of the retail pharmacy allocation transfer option. Jurisdictions can then use the extra vaccine supply to vaccinate other targeted populations. Requests to defer or change an allocation received after midnight ET on Tuesday will apply to the following week's allocation.

For jurisdictions that defer, transfers planned for the next week will be pushed to the following week; likewise, subsequent allocations will be pushed back by 1 week.

Also included:

- *Can we ask the pharmacy partners to vaccinate other populations if they have excess vaccine or vaccine that is close to its expiration date?*
- *Are the pharmacy partners moving forward with clinics in facilities that have active COVID-19 outbreaks?*
- *What should LTCFs in my jurisdiction do after the program ends to ensure new staff and residents continue to have access to COVID-19 vaccination?*

The full FAQ document can be found on the ISD Awardee Sharepoint site in the LTD Pharmacy Partnership Program folder with answers to these questions and more!

Hi Abe,

Thanks for following-up.

In lieu of formal after action reports, we've asked the county health departments to submit essential elements of information through a COVID-19 Vaccine Required Activities report weekly, to guide our vaccination campaign.

If this is what you're looking for, we're happy to provide that information to you through a public records request. Please provide a specific timeframe you're interested in so our records team can pull this information.

Thank you,

Hey, we're working on 20 days since I sent this request. Please advise when I can expect to get these reports, seeing how the vaccine is already being distributed across the state (so the after action reports must be in by now).

My name's Abe Aboraya, I'm a reporter with WMFE, the NPR station in Orlando. I was reading through the draft COVID-19 vaccination plan. In it, it mentions that every county health department is supposed to do a vaccine administration exercise by December 1, and then submit an after action report to the Florida Department of Health. I'm requesting a copy of the after action report for the following counties:

1) Orange
2) Osceola
3) Lake
4) Seminole
5) Brevard
6) Volusia
7) Sumter
8) Marion

I do not need all reports delivered at the same time. If certain county reports are available before others, they can be sent individually. If the reports are exempt from public release, please cite the statute exempting them. If you have any questions, reach me on my cell phone: 321-750-9336.

Subject: CDC Statement regarding Moderna lot

Region IV,
Please find the below statement from CDC leadership regarding the CA Moderna lot many of you have been asking about:

CDC is aware of a situation in California in which multiple potential adverse events were reported after vaccination with a specific lot of Moderna vaccine (Moderna Lot 041L20A) at one community vaccination clinic. We are working closely with the California Department of Public Health, the FDA, and Moderna to investigate these potential adverse events.

At this time CDC doesn't recommend health departments stop administering this lot or any lot of Moderna's COVID-19 vaccine.

COVID-19 vaccines are safe and effective. Many people don't have any side effects after COVID-19 vaccines, but some people will have pain or swelling at the injection site or fever, chills, or a headache. These typically don't last long and are signs that your body is building protection.

This is all we have to share at this point and will keep you updated as we learn more. Best,

Orange County Health Department's COVID-19 Vaccine Administration

January 18, 2021

The Florida Department of Health in Orange County (DOH-Orange) and its community partners are working together to administer the COVID-19 vaccine. In accordance with Executive Order 20-315 issued on December 23, 2020, providers shall only administer COVID-19 vaccine to the following populations: long-term care facility residents and staff, persons 65 years of age and older, and health care personnel with direct patient contact. Hospital providers, however, also may vaccinate persons who they deem to be extremely vulnerable to COVID-19.

COVID-19 Vaccine Status – As of January 16, 2021 11:08 pm

The number of COVID-19 vaccines received in the state varies from week to week. The information below reflects the status of COVID-19 vaccines received in this CHD.

Vaccines Received	Vaccines Administered	Vaccines Transferred	Vaccines Available
Moderna 32,000	15,269		16,731
Pfizer 28,750	11,045	1,000 (UCF)	16,750
Total 50,750	26,314	1,000	33,481

COVID-19 Vaccination Sites

Vaccination sites are serving specific populations as outlined in the Executive Order. Please monitor our website for updates.

Vaccination Sites	Location	Hours of Operation	Population Serving	Contact Information
Mobil POD	Multiple	Closed to the public, by appointment only.	Low SES Minorities living in congregating housing	407-912-0132 kent.donahue@flhealth.gov
Orange County Convention Center	5980 Destination Pkwy	By appointment only.	Persons 65 years of age and older and EMS	407-912-0132 kent.donahue@flhealth.gov

Successes

We continue to experience a high volume of appointments. We have increase appointments at the open POD by 300 a day up to 2300 appointments a day. We also started conducting mobile close POD to target low SES congregated housing. This week we will star conducting close POD at some houses of worship and our EMS municipalities will start conducting their own vaccination efforts. UCF has started to vaccinate their employees after we coordinate a close POD with them and transferred 1000 Pfizer doses to University.

Partnerships (e.g., faith-based organizations, FQHCs, hospitals, vaccine clinics/pods)

DOH-Orange continues to work with our community partners, including Orange County Government, UCF to offer vaccines to the 65 and older communities.

My name is Becky Allenbach and I am the Acting Director of the Mission Support Division in the Environmental Protection Agency Regional office in Atlanta. We cover the 8 southeastern states and have staff stationed in your state. I am writing to check on the status of vaccine distribution to the federal government's critical infrastructure workers. Your name was provided as the state's vaccine program coordinator.

Through the Government's coordinated effort, EPA identified 17 critical positions in your state to receive the vaccine. Is there any other information you need from EPA? Can you give me a sense of when and how the vaccines will be provided?

Please feel free to reach out to me by phone at 678-641-0032 (work cell), if that is more convenient for you.

Brooke,

CDC sent a request that we reach out to a list of providers to find out about the excursions recorded on the Controlant data logger inside the Covid vaccine shippers. All the below emails were rejected by CVS's email system and would not deliver them. Can you reach out to the sites and get the requested info?

Hi Florida team,

There is an ASAP request to query your jurisdiction at specific sites on temperature excursions; see attached excel spreadsheet for details.

Questions to be answered regarding each excursion:

1. Are you using your shipper for storing the product? If the answer is "No", please return immediately. If the answer is Yes:

2. Have you been contacted by Controlant about any type of excursion?

3. If no, identify device number and contact Pfizer.
