I agree. Please schedule a working session with me and James O'Neil so that we can go through the spreadsheet together and discuss the categories and why they were assigned.

In the meantime, the high level categories we're using are:

- **Access -** ***Account related and typically: Pswd Rst, Acct Unlock, Permissions, New Acct, Revocation or Restoration of Privileges, Vendor Access***
- **Data -** ***Generally relating to 'integrity'***
- **Enhancement -** ***New work based on need or want. This is generally a 'request'.***
- **Functionality -** ***'This did not work as intended'***
- **Training -** ***'I don't know how'***
- **Performance -** ***Degradation of service.***

We did combine some categories. For example, the Enforcer data issues were categorized as Data & Functionality (DF); and Functionality & Training (FT) for Action Queue item deletions, etc.. He and I have time on Monday from 3-4pm.

Respectfully,

Holly Greene

Subject: ADCRR IT - B&D Leadership meeting minutes 7/10/2020
Date: Friday, July 10, 2020 11:33:33 AM
Attachments: image001.png
image004.png

Good afternoon,

Thank you for the meeting today and please provide any feedback or updates from below.

1. Billable Time Tracking
    a. ADCRR To review the email from Charles sent to Spencer and Holly
2. Governance
    a. Meeting scheduled for 7/10/2020 with High Level Overview
        i. What are we going through from B&D Perspective
        ii. Charles to deliver PPT from Governance
            1. Discussion Based not reading from script
            2. Scheduled for each month for the next 3 months
2. Change Management
    a. CAB Meeting to be scheduled between ADCRR IT and B&D
    b. Charles to provide B&D's schedule, philosophy
        i. Emergency Changes
        ii. Backout plans
        iii. Determination between bugs and EUIL items
        iv. Charles to deliver for next weeks meeting
4. Release Management
    a. See above
5. B&D Volume of incidents
    a. Breakdown needed for the types of service desk tickets (access, training, etc)
6. Status of the EUILs/Parking Items
    a. Note the buckets of the 21 EUIL Items and keep them separate from the Appendix 2 items
    b. Strategy for "Press Releases" about the EUIL Items making it to Production and how we can communicate with the End Users
    c. Numbers don't match up for total
7. Report 1210 - Passed UAT and failed in Production (Release 24)
    a. Why does this pass in UAT and fail in PROD?
    b. QA demonstration for what the testing process looks like
    c. What is the environment migration strategy
8. Status of outstanding action items
    a. Protective Custody Root Cause Analysis
    b. Environment Diagram

ACTION ITEMS:

1. Enforcer Migration Discussion w/Raj (Charles)

AMERICAN OVERSIGHT

2. Protective Custody – email from Steve to be resent (Charles)
3. Environment Diagram (Charles)
4. Change Management Philosophy (Charles)

Subject: RE: Agenda for the 10:30 Leadership meeting

Thank you Sandy. I will run the meeting and take notes. The only item on my side was to bring up the signing of the SLA Agreement. Here are my responses to the items I can immediately speak to.

Billable Time Tracking (per my email to Spencer and Holly from B&D Leadership)

> ***Our system is not set up to dive down into the detail as requested by ADCRR IT Leadership. We can do this manually but we would need to estimate this for ADCRR IT Leadership and if approved it would come out of the 10,000 M&O Remediation Hours.***
>
> ***1: M&O Support Hours (Bug Fixes) – we continue to flex our resources to meet the defect needs, we don't report these specific hours but focus on the completion by priority of defects.***
>
> ***2: M&O EUIL Hours (10,000 hours – for the first year following the signing of the amendment) - We provide fixed price estimates based on the agreed scope and report of the percentage of complete per EUIL item. As we discussed yesterday, if the scope changes (hopefully not) we will provide an update asap.***
>
> ***3: M&O Remediation Hours (10,000 hours for every year on support contract) - AD Hoc can be reported based on the activities identified by the task (BA, DEV, QA, PM).***

AMERICAN OVERSIGHT

We are OK with cancelling the meeting. However, please provide the reports so we can review. It's informational only and informal. This is to allow us to obtain some optics on the matter.

Respectfully,

Holly Greene

Hello Charles-

Per our discussion today, I approve the use of the additional 40 hours to perform. However, as mentioned on Monday, we ask the B&D be more thoughtful with their estimations going forward.

Respectfully,

Holly Greene

6. Search workflows for any calls to get the initial classification.

Once the discovery is done we will need to re-engage ADCRR in a discussion to go over the results before any kind of new estimate may be given. If you have any questions please let me know.

Thank you.

Subject: M&O Hours Reporting

Spencer,

Our system is not set up to dive down into the detail as requested by ADCRR IT Leadership. We can do this manually but we would need to estimate this for ADCRR IT Leadership and if approved it would come out of the 10,000 M&O Remediation Hours.

1: M&O Support Hours (Bug Fixes) – we continue to flex our resources to meet the defect needs, we don't report these specific hours but focus on the completion by priority of defects.

2: M&O EUIL Hours (10,000 hours – for the first year following the signing of the amendment) - We provide fixed price estimates based on the agreed scope and report of the percentage of complete per EUIL item. As we discussed yesterday, if the scope changes (hopefully not) we will provide an update asap.

3: M&O Remediation Hours (10,000 hours for every year on support contract) - AD Hoc can be reported based on the activities identified by the task (BA, DEV, QA, PM).

Please let me know what questions you have as I am working on the report for this Friday's meeting.

Holly,

We have a little problem with our SLA Governance Meeting tomorrow. The SLA agreement is not signed by ADCRR. My suggestion is I will have something similar to this PPT prepared that you and I will review today and we review it with your team tomorrow. It will obviously have some significant gaps because of the work hours, burn, breakdown, still being outstanding. However, I think we can still have a positive meeting. Talk to you in 30.

Good afternoon.

Per our discussion on Monday, Phil was able to look put an estimate together for the additional discover work needed on CR 40940 which is 40 hours of work. Phil has outlined his strategy below.

The plan is the following:

1. Search all the C# code in the solution for any calls to get the initial classification.
2. Search all of the database packages and procedures for any calls to get the initial classification.
3. Search all background services for any calls to get the initial classification.
4. Search all report procedures for any calls to get the initial classification.
5. Search all database scheduled jobs for any calls to get the initial classification.
6. Search workflows for any calls to get the initial classification.

Once the discovery is done we will need to re-engage ADCRR in a discussion to go over the results before any kind of new estimate may be given. If you have any questions please let me know.

Thank you.

Go ahead and run it. Reviewed 2131 with Michele and Richard and it seems to be in the ballpark of what we would expect. If there are additional inmates that don't get paid I am sure they will let their COIII know.

Sincerely,
Jacob "Jey" Whitson

Subject: Re: KeepTrak Interface Error

So to summarize the pay engine sees that we are in 2021 and thus keeps kicking it back to 2021. So to solve for this, you are going to temporarily modify what is sent over and suspend the pay engine that would normally run at midnight so interface doesn't get reset in the middle of transactions being sent over.

Assuming my understanding is correct, please proceed and advise when I can schedule 2131 for confirmation.

On Tue, Jul 7, 2020 at 3:52 PM Aaron Pratt <aaron.pratt@bndna.com> wrote:

> Jey,
>
> Great point. This comment has helped us realize that pay engine will revert the pay summary records back to 2021 (which looks like it happened when it ran at 2pm). So here is a slightly updated plan:
>
> - We need to wait until after the Pay Engine runs at 4pm today (in about 10 minutes).
> - This will put the pay summary records back to 2021 again but will be the last time it will run today. When it runs tomorrow it should be correct since we are past the post date.
> - We will need to then run the SQL update again to move pay summary records back to 2020.
> - We will temporarily suspend the Pay Engine to keep it from running at midnight tonight just to make sure it does not interfere with the payroll export.
> - Then we will run the Payroll export to KeepTrak (scheduled normally to happen at 11:50 but we will probably kick off ahead of schedule around 4:30 pm).
> - Then tomorrow the Pay Engine will run again at 10am and should post to 2021 cycle 1 since we are past the post date.

Thank you Aaron. But I think we should have a discussion nonetheless. I fully accept my ignorance of programming complexities and I am not sure how different what ITA is wanting will be from what you are suggesting. Ultimately I would hate for your staff to waste any time that may have to be undone in the future for an issue we won't face again for another 12 months that could be solved in a different fashion.

Sincerely,
Jacob "Jey" Whitson

Thanks Jey,

Let us know when to start the payroll. We will manually start it once we receive the ok instead of waiting for the 11:50 time tonight. Attached is what will be sent.

Thanks,
Aaron

AMERICAN OVERSIGHT

- We will temporarily suspend the Pay Engine to keep it from running at midnight tonight just to make sure it does not interfere with the payroll export.
- Then we will run the Payroll export to KeepTrak (scheduled normally to happen at 11:50 but we will probably kick off ahead of schedule around 4:30 pm).
- Then tomorrow the Pay Engine will run again at 10am and should post to 2021 cycle 1 since we are past the post date.

Let us know if you see any issues with this.

Thanks!
Aaron

Copy that.

Charles/Aaron - Just to confirm that setting the post date to today won't cause any issues since the engine starts around 10pm, correct?

Same to you all! We only have a year before we have to worry about it again. Hopefully we'll have the fix in and tested LONG before then.

Aaron

Charles - Before any additional programming (not the SQL fix, please deploy that as approved below) is done, we need to have a discussion regarding how ITA wants to handle the bifurcation of pay cycles in the following years to come. I don't want you to develop a solution that may end up needing to be backed out in a year's time.

Sincerely,
Jacob "Jey" Whitson

AMERICAN OVERSIGHT

- Run the following SQL in PROD to correct the data for cycle 27: UPDATE doc_pr_pay_summary SET pay_cycle_year = 2020 WHERE pay_cycle_number = 27 and pay_cycle_year = 2021; ***We are requesting permission to run this SQL.***
- ADC looks at the pay summary reports to validate the data fix. Or any other reports.
- ADC will change the post date in the system from 7/6/2020 to 7/7/2020 on the fiscal year maintenance screen. https://aims2.us/Administration/System/ManageFiscalYearPayPeriodSchedule.aspx
- We will run the Payroll interface again before midnight and the records will see the new post date of today and post the Payroll to KeepTrak.

We will update you as soon as we can. Thank you.

Evitch <revitch1@azadc.gov>
Subject: Re: KeepTrak Interface Error

Thank you Aaron. But I think we should have a discussion nonetheless. I fully accept my ignorance of programming complexities and I am not sure how different what ITA is wanting will be from what you are suggesting. Ultimately I would hate for your staff to waste any time that may have to be undone in the future for an issue we won't face again for another 12 months that could be solved in a different fashion.

Sincerely,
Jacob "Jey" Whitson
Time Computation Quality Assurance Administrator
Offender Information Unit Liaison
ADCRR CIRT Team Leader & Equal Opportunity Liaison

Sandy,

Please find the link below. Spencer and I have been reviewing and I am in the process of updating the % complete. I also wanted to let you know we are adding the following additional milestones and will have a working meeting tomorrow.

1. ADC approval to begin Development
2. Development finishes
3. QA finishes
4. Submitted to UAT – FEATURE
5. Submitted to UAT
6. Migrated to PROD
7. ADCRR official acceptance and hours billed

https://aims2.bndna.com/_layouts/15/start.aspx#/ADC%20AIMS2%20Project%20Documentation/Forms/AllItems.aspx?RootFolder=%2FADC%20AIMS2%20Project%20Documentation%2FMaintenance%20and%20Operation&FolderCTID=0x0120009DE98BF1AAA36243B6A51FAA23DA2E58&View=%7B643ACB7D%2DFA9F%2D4BA1%2D9863%2D04688E3B17EB%7D

Charles - Before any additional programming (not the SQL fix, please deploy that as approved below) is done, we need to have a discussion regarding how ITA wants to handle the bifurcation of pay cycles in the following years to come. I don't want you to develop a solution that may end up needing to be backed out in a year's time.

Sincerely,

AMERICAN OVERSIGHT

- We are correcting the problem so that it will not occur again next year.
- High bug 43006 exists because of the same issue. There may be more.

Here is what we are requesting to resolve the issue:

- Run the following SQL in PROD to correct the data for cycle 27: UPDATE doc_pr_pay_summary SET pay_cycle_year = 2020 WHERE pay_cycle_number = 27 and pay_cycle_year = 2021; ***We are requesting permission to run this SQL.***
- ADC looks at the pay summary reports to validate the data fix. Or any other reports.
- ADC will change the post date in the system from 7/6/2020 to 7/7/2020 on the fiscal year maintenance screen. https://aims2.us/Administration/System/ManageFiscalYearPayPeriodSchedule.aspx
- We will run the Payroll interface again before midnight and the records will see the new post date of today and post the Payroll to KeepTrak.

We will update you as soon as we can. Thank you.

George,

Aaron, Wissem, Trevor and myself are available from 11am-2pm on Monday or Tuesday. I believe ADCRR has to schedule the meeting so it can be recorded. Thank you.

Thank you Aaron. But I think we should have a discussion nonetheless. I fully accept my ignorance of programming complexities and I am not sure how different what ITA is wanting will be from what you are suggesting. Ultimately I would hate for your staff to waste any time that may have to be undone in the future for an issue we won't face again for another 12 months that could be solved in a different fashion.

Charles - Before any additional programming (not the SQL fix, please deploy that as approved below) is done, we need to have a discussion regarding how ITA wants to handle the bifurcation of pay cycles in the following years to come. I don't want you to develop a solution that may end up needing to be backed out in a year's time.

Sincerely,

AMERICAN OVERSIGHT

the strange overlap period.

- The issue will only occur on the overlap week at the end of the fiscal year.
- We are correcting the problem so that it will not occur again next year.
- High bug 43006 exists because of the same issue. There may be more.

Here is what we are requesting to resolve the issue:

- Run the following SQL in PROD to correct the data for cycle 27: UPDATE doc_pr_pay_summary SET pay_cycle_year = 2020 WHERE pay_cycle_number = 27 and pay_cycle_year = 2021; ***We are requesting permission to run this SQL.***
- ADC looks at the pay summary reports to validate the data fix. Or any other reports.
- ADC will change the post date in the system from 7/6/2020 to 7/7/2020 on the fiscal year maintenance screen. https://aims2.us/Administration/System/ManageFiscalYearPayPeriodSchedule.aspx
- We will run the Payroll interface again before midnight and the records will see the new post date of today and post the Payroll to KeepTrak.

We will update you as soon as we can. Thank you.

Good morning ADC,

We discovered an issue this morning that we are currently working.

Here is a summary of the issue:

- When payroll was generated for cycle 27 all the pay summary records were generated for fiscal year 2021 instead of 2020 because of code that did not account for the strange overlap period.
- The issue will only occur on the overlap week at the end of the fiscal year.
- We are correcting the problem so that it will not occur again next year.
- High bug 43006 exists because of the same issue. There may be more.

Here is what we are requesting to resolve the issue:

- Run the following SQL in PROD to correct the data for cycle 27: UPDATE doc_pr_pay_summary SET pay_cycle_year = 2020 WHERE pay_cycle_number = 27 and pay_cycle_year = 2021; ***We are requesting permission to run this SQL.***
- ADC looks at the pay summary reports to validate the data fix. Or any other reports.
- ADC will change the post date in the system from 7/6/2020 to 7/7/2020 on the fiscal year maintenance screen. https://aims2.us/Administration/System/ManageFiscalYearPayPeriodSchedule.aspx
- We will run the Payroll interface again before midnight and the records will see the new post date of today and post the Payroll to KeepTrak.

We will update you as soon as we can. Thank you.

I have insert the spreadsheet into this version of the file. A couple of points to consider:

- The embedded excel spreadsheet is scrollable but not printer friendly. If we want a printer-friendly version, I recommend we add an appendix
- The list was originally 115. However the list is down to 105. The reason for the discrepancy is that some bugs have been closed since the list was originally pulled.
    - I created the list by searching TFS for "all bugs, not closed" with a creation date of 2018, 2019, and 2020; January-April.
- A few of the items address an issue only in a certain module, but the problem is system wide. I'd like to ask that we address the whole problem and not in just one screen. This would have been done had the tickets been worked (during analysis).

AMERICAN OVERSIGHT

JUNE 2020

DRAFT M&O GOVERNANCE PROCESS

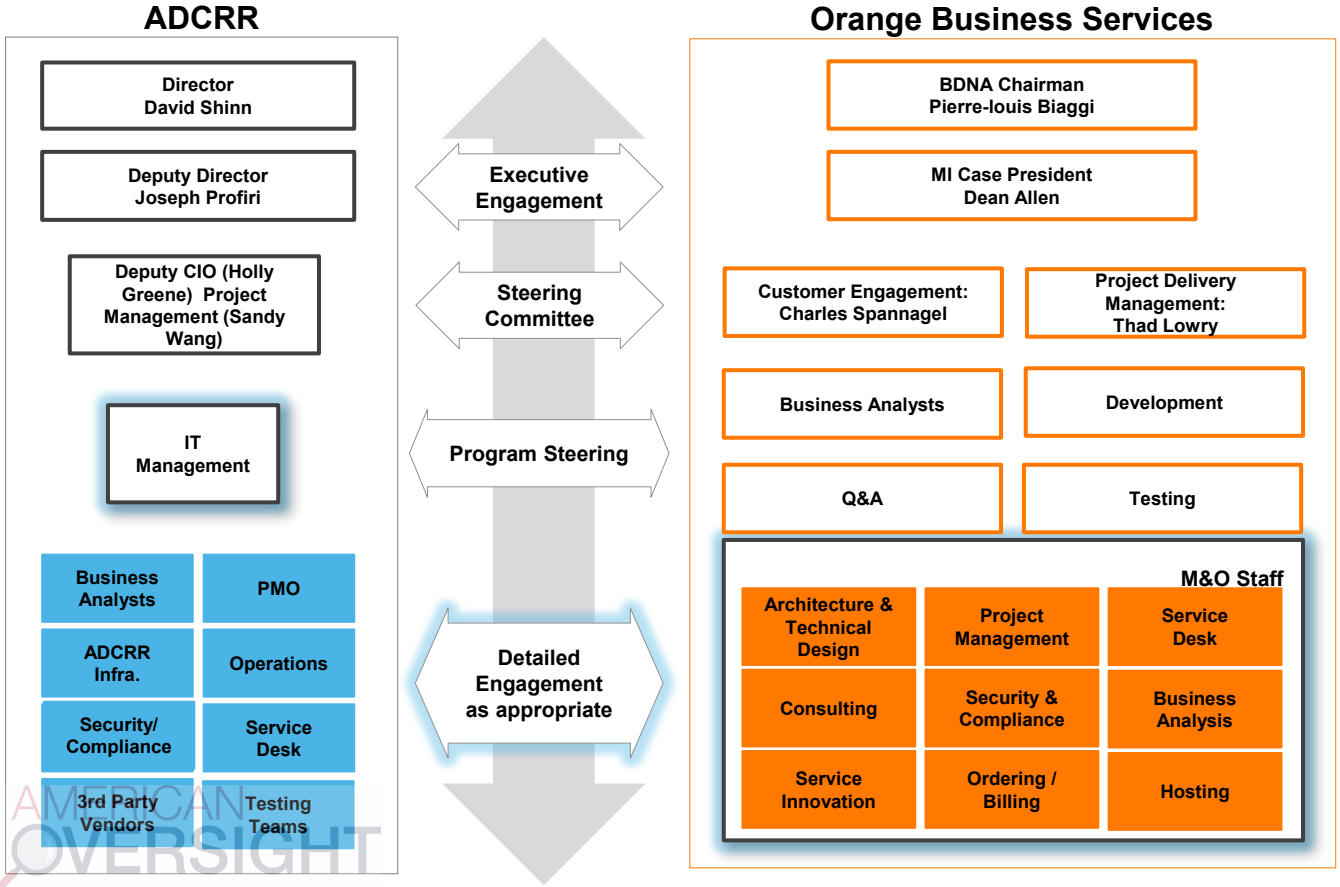
ADCRR & BUSINESS AND DECISION

Arizona Department of Corrections Rehabilitation & Reentry

Business & Decision
Empowering Digital Business

AMERICAN OVERSIGHT

BDNA engagement method



Partnership principles:

- **High touch executive engagement** – Strategic decisions & arbitrations in coordination with ADCRR executives
- **Customer engagement**– throughout the life cycle of M&O, the BDNA customer engagement manager will own the commercial relationship and support customer business and IT strategy
- **Project management** – The project management organization will deliver maintenance as well as new developments of the solution

The engagement is driven by a customer centric philosophy, guided by the customer's business needs.

AMERICAN OVERSIGHT

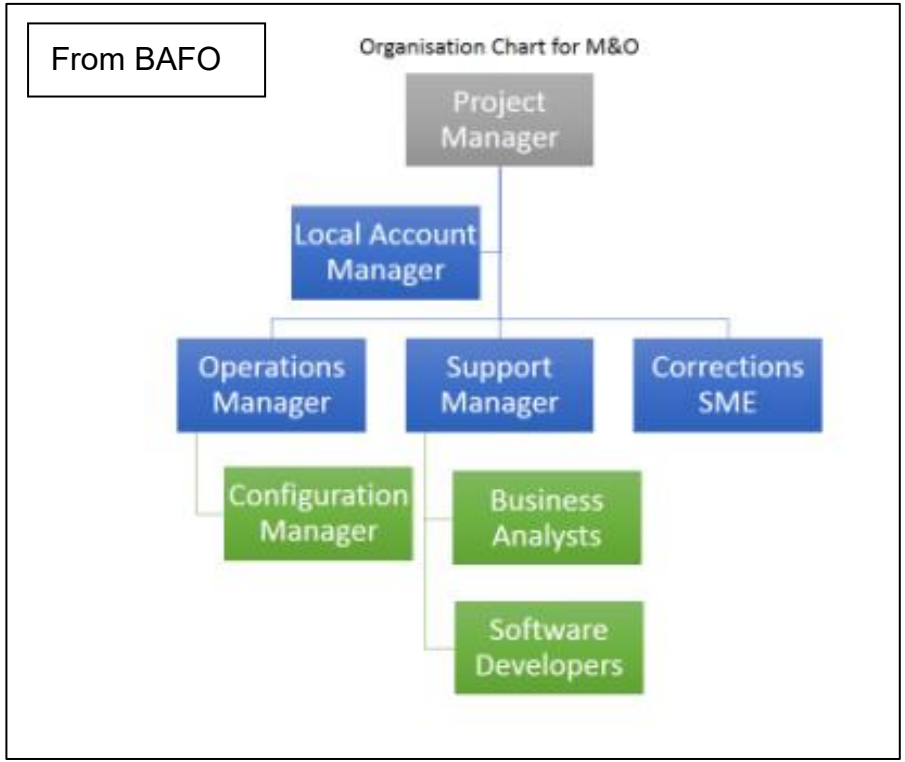
BDNA Client Business Unit

The Client Business Unit is organized to deliver:

- Maintenance of the solution (Bugs fixing), through a dedicated staff and capacity
- Development of new functionalities as part of the 10k hours envelope dedicated to it

From 05/01/2020 to 05/01/2021, This team will be supplemented by additional staff in order to deliver the additional remediation hours (10k hours) agreed in the last Amendment to the contract

From BAFO



AMERICAN OVERSIGHT

Customer Engagement Manager – Local Account Manager

CEM

The Customer Engagement Manager ensures accountability of the execution of the contract and steers a proactive partnership with ADCRR

- Coordinate a cross functional team in order to develop a partnership with the ADCRR with full accountability to achieve commitments in contractual agreement and delivering satisfaction and value to the ADCRR.
- Implement full contract customer facing governance incl. appropriate governance boards, steerco's, escalation path and contractual change management.
- Bring BDNA delivery team together into a coherent entity fine-tuned to interact with the ADCRR organization in an optimal and minimum impacting way.
- Significantly reduce the level of effort which ADCRR has to invest to ensure the desired contractual benefits are achieved.

AMERICAN OVERSIGHT

Project Delivery Manager – Charles Spannagel

PDM

The Project Delivery Manager is accountable to provide day-to-day coordinated delivery of agreed contractual solutions and services for ADCRR; has overall responsibility for the quality of service and customer satisfaction for all implemented BDNA services; with a view to optimizing workforce utilization

- Proactively identify and scope opportunities for service enhancement providing ADCRR's experience improvement and greater value generation; spread innovation for optimization and leverage of new or improved processes.
- Prepare and publish Program Plan (including Program Structure / Roadmap / Governance Matrix) of customer Service Strategy; ensure all stakeholders agree and understand roles and responsibilities
- Identify and mitigate risks (failure or delay); ensure appropriate levels of business contingency / continuity are in place.
- Implement full contract customer facing governance, incl. appropriate governance boards and steerco's, for escalation path and contractual change management
- Ensure full compliance of agreed solutions and services to meet customer needs; proactive monitoring of agreed SLAs in order to deliver exceptional service and acknowledged customer value.

Governance

Quarterly business review

Members	**ADCRR**	*Initially a small group (JP & HG)*
	BDNA	*Initially a small group (DA & CS)*
Agenda	- ADCRR Business objectives & roadmaps - BDNA business performance (Implementation, Operations, etc.) - INNOVATION: Market trends, technology roadmaps - Relationship health, customer survey results - Dashboard performance - Development Hours spend reviews - New business review	
Inputs	- Status of actions from previous meetings - Monthly performance for both build and run - Headline News - Survey feedback	
Outputs / Objectives	- Minutes and updated actions list - Program performance	
Frequency	Once per quarter ; maximum of two hours	

AMERICAN OVERSIGHT

Governance

Program review session

Members	**ADCRR**	*TBD*
	BDNA	Charles Spanagel, Thad Lowry, Aaron Pratt, Chris Masson & Dean Allen
Agenda	- Update on actions from previous session - Review of SLA dashboard performance - Review of exception logs - Process and/or procedure challenges; opportunities for improved way of working - Account relationship, End-user satisfaction survey programs, user group feedback or other avenues/methods to measure satisfaction with the ACIS system - Schedule reporting compliance - Continuous improvement initiatives and achievements	
Inputs	- Actions from previous meetings - Exceptions from billing, build and/or run - Governance dashboard - Headline News	
Outputs / Objectives	- Minutes and updated actions list - Maintain Governance for effective and continuous improvement program - Executive summary	
Frequency	Scheduled as calendars permit	

AMERICAN OVERSIGHT

Governance

Weekly Change Management Release Schedule

Members	**ADCRR**	George Martinez, Sandy Wang
	BDNA	Charles Spannagel, Thad Lowry, Chris Masson
Agenda	- Release roadmap - Separate meetings to discuss EUIL items and Bug statuses - Outstanding defects/bugs in the system - CAP completion - Any issue requiring escalation - Roundtable discussion with ADCRR	
Inputs	- Actions list from previous meetings - Minutes from weekly design review	
Outputs / Objectives	- Minutes and updated actions list	
Frequency	Bi-weekly	

AMERICAN OVERSIGHT

Governance

Monthly Maintenance and Operations Report

Members	**ADCRR**	Holly Greene, Joe Nicoletti, Rusty Johnson, Sandy Wang, Keith Barrier
	BDNA	Charles Spanagel, Thad Lowry, Aaron Pratt, Chris Masson (optional Dean Allen)
Agenda	- Update on actions from previous session - Steering committee (executive invited) review - SLA performance - End user satisfaction report - Continuous improvement initiatives and achievements	
Inputs	Actions list from previous meetings - Service management monthly report - SLA report - M&O Hours and EUIL delivery completion report	
Outputs / Objectives	- Minutes and updated actions list - Mutual agreement on monthly performance	
Frequency	Monthly – Held last Thursday of each month	

AMERICAN OVERSIGHT

Governance

Weekly Status Meeting with ADCRR IT PMO and Operational Leaders

Members	**ADCRR**	TBD
	BDNA	Charles Spannagel
Agenda	- Input from ADCRR operations on new items requests - End user satisfaction measurement	
Inputs	- Action list from previous meeting - New list of items - Satisfaction measurement	
Outputs / Objectives	- Minutes and updated actions list - New list of items	
Frequency	Weekly – Held every Friday or Monday am (TBD)	

AMERICAN OVERSIGHT

Governance

M&O Manager and ADCRR IT Leadership Weekly Status Meeting (DRAFT)

Members	**ADCRR**	Holly Greene, Joe Nicoletti, Rusty Johnson, Sandy Wang, Joe Profiri (optional)
	BDNA	Charles Spannagel
Agenda	- Review previous week items progression - Identify new items - Review service desk performance - Roundtable discussion	
Inputs	- Action list from previous meeting - Service Desk SLA review	
Outputs / Objectives	- Minutes and updated actions list - New items list	
Frequency	Weekly – Held every Friday	

AMERICAN OVERSIGHT

Initial Governance Timeline

- **July 2020**
  - 7/3/2020 – ADCRR IT and M&O Manager Weekly Status Report Meeting
  - **7/8/2020 – ADCRR and B&D Monthly Status Meeting**
  - 7/17/2020 – ADCRR IT and M&O Manager Weekly Status Meeting
  - 7/24/2020 – ADCRR IT and M&O Manager Weekly Status Meeting
  - 7/31/2020 – ADCRR IT and M&O Manager Weekly Status Meeting
- **August 2020**
  - **8/7/2020 – ADCRR and B&D Monthly Status Meeting**
  - 8/14/2020 – ADCRR IT and M&O Manager Weekly Status Meeting
  - 8/21/2020 – ADCRR IT and M&O Manager Weekly Status Meeting
  - 8/28/2020 – ADCRR IT and M&O Manager Weekly Status Meeting

AZ-DOC-21-0315-A-001740

List of workstreams

- Parking lot – Exhibit 2 items – Capped at 1000 hours
- EUIL – capped at 9000 hours: Focused on Improved End-user experience
- M&O (10,000) Development hours: Focused on new Functionalities implementation
- Maintenance: Bugs fixing, following prioritization by ADCRR
  - CAP: All of the remaining bugs (115) at the time of M&O 4/30/2020 (Bug list provided by ADCRR IT)
  - SLAs: As per agreed SLA setup
  - Service desk: Effective as of June 5th , 2020
- Measurement of Success: To be agreed with ADCRR

AMERICAN OVERSIGHT

Principles of Effort Estimate, Validation & Approval

- M&O development hours:
  - As per ADCRR requests for development – list of items to be submitted by ADCRR
  - BDNA evaluation of Level of Efforts (LoEs)
  - ADCRR sign off on LoEs
  - BDNA commits on LoEs cap for delivery
  - Validation of Delivery as per amendment process terms (Testing ok / 30 days)
- EUIL:
  - Parking lot Exhibit 2 items to be delivered consuming no more than 1000 hours
  - BDNA evaluation of Level of Efforts (LoEs)
  - ACRR sign off on LoEs (9,000)
  - BDNA commits on LoEs cap for delivery
  - Validation of Delivery as per amendment process terms (Testing ok / 30 days)
  - **Measurement of success to evaluate positive impact of EUIL items onto end user satisfaction**

** For M&O development hours prior to May 18th: Validation requested by B&D to ADCRR IT management*

Amendment process

- 1st Business Day – M&O Monthly Report submitted by B&D
- 5th Business Day - Monthly M&O Status Meeting
- 10th Business Day (or prior) – ADCRR and B&D present a list of proposed EUIL items
- 15th Business Day (or prior) – B&D to provide estimate for proposed EUIL items, B&D to provide forecast of available FTE's
- 20th Business Day (or prior) – ADCRR selects items for the upcoming month

AMERICAN OVERSIGHT

SLAs

- **Service Level Agreement (SLA)**
  - Agreed to terms on May 15th , 2020
  - Utilizing multiple technologies and metrics to ensure SLA compliance
    - 3rd Party Systems that monitor System Response, System Availability, User Response
    - ServiceDesk Reports that monitor
      - Incident Response and Resolution Times
    - Additional Monthly Reports to be included in the M&O Monthly Status Meeting
      - Maintenance/Updates/Upgrades, Data Integrity and Destruction, Security, User Support and Contractor Staffing
  - B&D Weekly SLA Compliance and Risk Assessment Meeting to review all metrics
  - **Sign Off Needed**

AMERICAN OVERSIGHT

AZ-DOC-21-0315-A-001743

CAP

- The Corrective Action Plan consist of all medium and low bugs still active as of M&O start (4/30/2020)

- Bug list created

AMERICAN OVERSIGHT

Service desk

- **B&D Service Desk Implementation**
  - Soft Go Live Scheduled for 6/5/2020
  - Go Live Scheduled for 6/12/2020
  - B&D Internal Training on 5/21/2020
  - ADCRR Training the week of 6/1/2020
  - B&D Service Desk staffed Monday through Sunday 6am – 6pm
    - On call after hours support as negotiated with ADCRR
    - After hour technical support will be provided under a Time and Material basis

AMERICAN OVERSIGHT

AZ-DOC-21-0315-A-001745

Measurement of Satisfaction

- **Measure Current Sentiment**
  - Workstream with key ADCRR IT Staff and ADCRR Operational Users
  - Brainstorm different methodologies for End User satisfaction analysis
    - Online Surveys
    - Site Visits - Quarterly Site Visits to gauge user satisfaction (Initially every other month) possible August, most likely September
    - Focus Groups
    - Training Evaluation
    - Identified System Enhancements/Initiatives
- **Setup Ongoing Satisfaction Measurement**
  - Provided by monthly/quarterly survey scales measuring trends in adoption, ease of system use and overall feeling of the system
- **Set Targets and Expectations**
  - To be determined by initial survey findings with a work group consisting of ADCRR IT Leadership, ADCRR Operational Leadership and B&D Leadership setting future targets and expectations

I have insert the spreadsheet into this version of the file. A couple of points to consider:

- The embedded excel spreadsheet is scrollable but not printer friendly. If we want a printer-friendly version, I recommend we add an appendix
- The list was originally 115. However the list is down to 105. The reason for the discrepancy is that some bugs have been closed since the list was originally pulled.
    - I created the list by searching TFS for "all bugs, not closed" with a creation date of 2018, 2019, and 2020; January-April.
- A few of the items address an issue only in a certain module, but the problem is system wide. I'd like to ask that we address the whole problem and not in just one screen. This would have been done had the tickets been worked (during analysis).

AMERICAN OVERSIGHT

Questions/suggestions I have are:

1: Formalized Subject Line - this way we brand the message and everyone knows to respond

2: Should the message go out initially to everyone on this email + IT PMO + OPS Leadership + associated TA and/or SME?

3: I need to act on this so please let me know and I will push forward.

I'd also like to re-review the items we had from June 12th to ensure we close the loop.:

1. M&O Hours need to be signed off by Joe P.

- ***HOLLY** to follow up on M&O Hours*
- *Joe to take M&O Agreement to Procurement review*

2. Root cause analysis of the phone number bug introduced last weekend

- *Request from ADC with future RCAs into incidents that BND look's into what may be preventable in the future (Please see Steven Williams write up below)*
- *During the maturation of the support model, we should continue to look at ways to document and put in place prevention tools or efforts around the system-modules*

3. Meetings Expectations – Google Meet vs. Team, Agenda, Meeting Notes, Recordings

- *Holly's expectation – agenda's should always be sent out prior to the meeting "fully loaded", expectation is that the organizer should either take notes and/or delegate the responsibility to another team member*
- *Appropriate teams should schedule the meetings (B&D and ADCRR) based off of the purpose and type of meeting*
- *Request is to use Google Meet for all meetings with ADCRR **CHARLES** to follow up with BND*

4. Governance Review - proposed recurring meetings

- *Meeting schedule with details needed (**Sandy and Charles to meet**)*
- *Methodology for promotional efforts around EUIL releases into PROD*
    - *Ability to work with OCI?*

5. Health of ACIS - start off with what Dean has proposed as the bases of the portfolio - speediness, timeout, Change management procedure, bi-weekly frequency in the beginning. (from 5/8 meeting)

- ***Charles** to provide reports by Wednesday 6/17/2020 with examples of the reports that are part of the Monthly SLA*
- *Holly would like to see the health of the reporting server as well as the health of production (**Charles** to follow up) S3 initiative (Report Database expansion)*
    - *ADC Operational Training to not run batch reports during the day*

6. Max value review of other fields (the count issue encountered in May)

- *From the write up in May on the count issues (6 digit limit converted to a 15 digit limit) what other fields has BND adjusted based off of this issue/incident/bug. **Charles** to follow up.*

7. Charles requested 3 month projection of EUIL items to plan ahead with resources, tasks, project plans.

8. Charles request to work with ADCRR on promotional write ups for each EUIL item prior to deployment to PROD.

9. Holly has requested Spencer to work on the controls in place for hours of work consumption by BND and the reporting mechanisms needed to monitor

- *Charles to follow up with Spencer*

Date: Thursday, June 25, 2020 5:47:14 PM

If Charles isn't in charge, who is? :) Will it be the same crew as before?

QA/Bugs/ServiceDesk: Justin Baker

Development: Aaron Pratt

Escalations: Thad Lowry

As for the agenda, we have a large one this go-around. So in addition to Sandy's, I'd like to go over:

- Hours in arrears: What I was informed of
- Customer satisfaction survey Tuesday meeting: Brief touch on what the meeting is about
- Status update from B&D for: Tracking billable time; Release management and Change Advisory Board (CAB)
- SLAs: Follow-up on what I missed. When is the next meeting/next steps?
- Build out of workflow for the following:

  Stemming from our conversations yesterday this is a great example of how we need to build a workflow around this action item.

  Previously we had worked through the PMO and OPS simultaneously in order to expedite this fix, have it tested and pushed into production. Here are the outlying factors:

  1: Bug fix = maintenance (not mediation hours)
  2: Manual Fix = approval needed (this has been a courtesy request for approval in the past, but we always inform ADCRR of what we are doing)
  3: Request for testing = we need to escalate this to OPS since we are dealing with a short window in order to get this pushed to production tomorrow.
  4: High Priority 1 = BND is moving as fast as we can to fix and deploy the fix.

  Questions/suggestions I have are:

  1: Formalized Subject Line - this way we brand the message and everyone knows to respond
  2: Should the message go out initially to everyone on this email + IT PMO + OPS Leadership + associated TA and/or SME?
  3: I need to act on this so please let me know and I will push forward.

Subject: Action Item from Bug Call today - 3 July ACIS Deployment to Production.

Hello All,

I was asked to confirm on 3 July 20 (Holiday), if we would be charging ADCRR holiday pay for our staff to work/deploy on that day?

If so, and we are charging holiday rates, can we deploy on Thursday instead.

Let me know if we are going to adjust the deployment schedule based on the question posed by ADCRR.

Thank you.

Hello Steven-

I approve of this change in timing.

Charles-

I look to you to work with Sandy and Spencer to help formulate a holiday release schedule for future deployments.

Thank you all for your cooperation and coordination of this deployment.

> Hello Holly,

AMERICAN OVERSIGHT

I discovered the inmate search screen was crashing in our QA environment and duplicated it also in UAT.

The inmate search in the current version in PROD is working correctly.

We fixed out environment in QA, but, I do not want the issue currently in UAT to be migrated to PROD in our next deployment.
The fix was a PL/SQL fix and did not cause any outage and tested successfully.

Do we have permission to deploy the changeset for bug 42857 so it can be tested by ADCRR prior to Friday?

Please review the bug, also check the screen, it crashes on any search criteria.

I appreciate your consideration on this. I do not want this issue deployed to Production.

Thank you.

Hi

We are adding 2 Tunisian .NET developers to the mi-case team that will need to be background checked.

They will work from Tunisia.
They will not be onsite
They will be fixing bugs and working on EUIL & M&O remediation items
They will be using ACIS data for testing

Khouloud Chebbi Start date: 6/22 – end date: indefinite

Lobna Ben Abdallah Start date: 7/1 – end date: indefinite

I have attached their resumes

Subject: M&O Hours Request for Approval

Holly,

The purpose of this email is to review both the M&O hours that are backdated to February 21st per the signed amendment and the EUIL – Amendment 2 items with a start date of May 1st that we are required to deliver with a ceiling of 1000 hours. Moving forward and beginning in June ADC will dictate all work for B&D based off of the EUIL list additions as decided by ADC.

Holly please acknowledge receipt of this email and please approve with your team as quickly as possible. Thank you.

M&O Hours

There are three initiatives that B&D undertook from our site visits in the field. We realize that these should have gone through the approval process that is currently being put in place but we felt in order to get the biggest "bang for our buck" and win over End Users adoption of the system we needed to implement these tasks. These tasks are ready for UAT upon your approval.

1. **64 Bit**: Based on feedback from the users of system slowness, waiting for screens to populate and waiting for spinning wheels B&D has converted the application to a 64 bit implementation which will allow the application to make better use of memory and increase the bandwidth

AMERICAN OVERSIGHT

of the connection between the application and the databases resulting in reduction of time waiting on spinning wheels and faster screen loading. This should decrease the amount of time that it takes the users to their tasks and should improve the overall attitude when it comes to speed of the system.

2. **Data Storage**: For the Data Storage of PDF Documents we initially intended to store all PDF documents in the database. We were surprised as we got close to go live that the number of documents skyrocketed. Being so close to go live we were locked into storing the PDF's in the DB but the heavy amount of PDF documents has caused the DB gain in size at an unsustainable rate. Storing huge amounts of data in the database is very expensive and has implications on the amount of time that it takes to back up the data / replicate the data and ultimately impact the amount of time it will take to do disaster recovery. We have taken steps to store the PDF files on a secure file system called S3 and remove the documents from the database, which will reduce the amount of time it takes to do backups, copy the data from Prod to the other environments and decrease the amount of time it takes to do disaster recovery.

3. **Excessive Post Backs**: Based on feedback from the users waiting for post backs (excessive spinning wheels) we have rewritten the count module to avoid incurring that overhead and reduce the amount of time that it takes for the field to do a count. Based on studies the users were waiting on average 20 to 30 seconds before the rewrite. After the rewrite the wait time has been reduced to almost nothing. This should decrease the amount of time that it takes the users to do a count and should improve the overall attitude when it comes to speed of the system.

<image005.jpg>

EUIL – Amendment 2 Items

B&D has used 50% of the allotted 1000 hours on the Amendment 2 items. We are delivering this week the following to UAT 31493, 37369, 40631. The

AMERICAN OVERSIGHT

following items in progress are 16465, 16466, 16474, 16475. The remaining items are 28774 and 28915. We underestimated our bid of the 9 items for 1000 hours. The work may go over the 1000 hours but this will be at no additional charge to ADC. I will continue to report on the status of these items as they make their way to UAT.

AMERICAN OVERSIGHT

Wissem looked into this and found that.
The logic is built so that the fiscal year starts on July 1st.
The last pay cycle in fiscal year 2020 has to end on June 30th.
When Pay cycle 1 of 2021 fiscal year starts in fiscal year 2020, it will not work as expected.

What is the reasoning behind paying inmates in fiscal year 2021 before the fiscal year starts?

Steve, what's the impact of pushing this fix to the UAT environment in terms of the bug fixes that have passed UAT, any re-testing is called for?

AMERICAN OVERSIGHT

The fix was a PL/SQL fix and did not cause any outage and tested successfully.

Do we have permission to deploy the changeset for bug 42857 so it can be tested by ADCRR prior to Friday?

Please review the bug, also check the screen, it crashes on any search criteria.

I appreciate your consideration on this. I do not want this issue deployed to Production.

Thank you.

Hello Jey,
Thank you for following up. You may close the bug if it tested successfully.
Also, I really appreciate you filling in and testing this.

Bravo!

Hello Holly,
We have deployed the fix to UAT. I have confirmed the fix's are in place and working.

I have assigned the inmate search bug to Eli Charif and the Visitation bug to Alexandria Bailey to validate.
I hope that is acceptable.

Thank you for your assistance.

Steve, what's the impact of pushing this fix to the UAT environment in terms of the bug fixes that have passed UAT, any re-testing is called for?

AMERICAN OVERSIGHT

The fix was a PL/SQL fix and did not cause any outage and tested successfully.

Do we have permission to deploy the changeset for bug 42857 so it can be tested by ADCRR prior to Friday?

Please review the bug, also check the screen, it crashes on any search criteria.

I appreciate your consideration on this. I do not want this issue deployed to Production.

Thank you.

Hello Holly,

I discovered the inmate search screen was crashing in our QA environment and duplicated it also in UAT.
The inmate search in the current version in PROD is working correctly.

We fixed out environment in QA, but, I do not want the issue currently in UAT to be migrated to PROD in our next deployment.
The fix was a PL/SQL fix and did not cause any outage and tested successfully.

Do we have permission to deploy the changeset for bug 42857 so it can be tested by ADCRR prior to Friday?

Please review the bug, also check the screen, it crashes on any search criteria.

From: Charles Spannagel on behalf of Charles Spannagel <Charles.Spannagel@bndna.com>
To: Holly Greene; Joseph Nicoletti; Rusty Johnson; Sandy Wang
Subject: ADCRR IT Leadership - Action Required Bug 41462 - Severity High Priority 1.
Date: Thursday, June 18, 2020 9:15:00 AM
Attachments: image001.png

Holly,

Stemming from our conversations yesterday this is a great example of how we need to build a workflow around this action item.

Previously we had worked through the PMO and OPS simultaneously in order to expedite this fix, have it tested and pushed into production. Here are the outlying factors:

1: Bug fix = maintenance (not mediation hours)
2: Manual Fix = approval needed (this has been a courtesy request for approval in the past, but we always inform ADCRR of what we are doing)
3: Request for testing = we need to escalate this to OPS since we are dealing with a short window in order to get this pushed to production tomorrow.
4: High Priority 1 = BND is moving as fast as we can to fix and deploy the fix.

Questions/suggestions I have are:

1: Formalized Subject Line - this way we brand the message and everyone knows to respond
2: Should the message go out initially to everyone on this email + IT PMO + OPS Leadership + associated TA and/or SME?
3: I need to act on this so please let me know and I will push forward.

Holly,

I understand your message but to be honest, we have always worked through the PMO and they have triaged the issue accordingly. We have the workflow documented for incidents from ADCRR to BND but not the other way around. I/we will follow whatever workflow your team has in place.
Thank you.

Hey Charles,

We are getting a lot of email failures. We use ADC's email servers to send mail. Can you ask them to check with their Network people to see if they're having any outages?

Thanks, Aaron

Attachments:	image002.png

Charles-

This was not authorized by leadership. We will be discussing this in our meeting later today, but from now on, pushes to UAT and Production need to be authorized by me or Rusty Johnson with Joe Nicoletti as a backup. Authorization will not be done via email request or text message. As stated previously, approvals cannot be given by non-leadership team members. So we will also be discussing B&D's communications with my ADCRR IT team members and my expectations.

Respectfully,

Holly Greene

AMERICAN OVERSIGHT

From: Dean Allen on behalf of Dean Allen <dean.allen@bndna.com>
To: Joseph Profiri
Subject: M&O hours
Date: Tuesday, June 16, 2020 5:32:29 PM
Attachments: image006.png
image009.png

Afternoon Joe,

I hope you are still doing good!

Following on from your text message, I just wanted to respond to your concerns. Initially I want to apologize if there has been any mix up or miscommunication. As you can imagine both teams are trying to get to grips with the new arrangements and there is likely teething pains! There has been no intention to cause harm, in fact the B&D team were instructed to make sure the lack of an M&O agreement did not cause issues to ADCRR, I hope that does not penalize us.

In any event, as you can see from the chart that is below, which I understand from reviewing the emails has been sent to ADCRR on previous occasions, provides that breakdown of effort.

TASKS	3/8	3/15	3/22	3/29	4/5	4/12	4/19	4/26	5/3	5/10	5/17	Grand Total
AP0357 - AZ DOC - M&O Development Hours	33.0	46.0	31.0	51.5	45.0	26.0	29.0	22.8	18.0	261.5	157.8	721.5
100-Performance Imp										37.0	22.0	59.0
101-Doc Storage										92.0	75.3	167.3
102-Perfomance ReworkFixing Defects										97.5	60.5	158.0
2 - AD HOC Support	29.0	34.0	29.0	21.5	42.0	23.5	25.5	19.3	13.0	33.0		269.8
3 - Arbitration	4.0	10.0		28.0	2.0	2.5	3.5	3.5	3.0			56.5
4 - Parking Lot		2.0	2.0	2.0	1.0				2.0	2.0		11.0

With regards to your criticism of me not bringing this to your attention during our negotiations: Firstly, As you can see over half the hours occurred after we had signed the amendment. Secondly, the remaining hours relate to tasks for Ad Hoc Report work(arbitration and parking lot). I understand from reading the status reports, that were produced at the time, that this had been brought to the attention of the team and they understood that hours of the M&O bucket were being used to provide this level of support and assistance for them. I have asked Charles to provide a breakdown of the chronology of events so we can better understand the background. In addition to the written material below, Charles informs me that he had a number of informal discussions with the ADCRR team on the matter.

Charles's Report:

1. On April 8th, 2020 in an email exchange between Sandy and myself I clearly outlined the resources and estimated hours spent for Ad-Hoc support. Here is that email.

> **From: Charles Spannagel**
> **Sent: Wednesday, April 8, 2020 3:43 PM**
> **To: Sandy Wang <swang@azadc.gov>**
> **Subject: RE: Time for a quick call? re: Release Schedule**
>
> **Sandy,**
>
> **I think maybe it would be better to talk live about all of this? I am on calls the rest of the day but I am sure we could find time tomorrow. I do want to answer your questions/statements though.**
>
> **1: The 20hrs/week comes from the 5 resources (not including myself) who support the Ad Hoc team (Aaron and Jeff).**
>
> **2: ADCRR stipulated the list of reports, tested the reports in UAT and passed/accepted them all. This is the first that I am hearing the reports were not adequate. All reports required for Go Live were deemed absolutely necessary by ADCRR Operations and were delivered on time and accepted. The reports that were removed from the Go Live list were removed by ADCRR not BND.**
>
> **3: The RFP requirement was that BND provide or build a tool for ADCRR to do Ad Hoc reporting. This mechanism is in place.**
>
> **4: The change in frequency was always going to happen, it was never going to remain a weekly process. The hours/support for Ad Hoc don't truthfully have a bearing on the schedule. We are working with ADCRR Operations in order to build a new more productive release schedule and work load. Honestly, I was expecting us to have moved to a**

AMERICAN OVERSIGHT

monthly release by now but that hasn't happened. I was hoping that Ad-Hoc could fall in line with the bi-weekly Prod Release. It sounds like we need some more discussion around this.

Sandy, I want to reiterate I am 100% on board with working through these processes with you and coming to a mutually agreed upon solution.

2. On 4-20-2020 in the ACIS Status meeting I reported that the team had spent 19 hours in support of Ad-Hoc Reports**. ADCRR Leadership were in attendance.**

3. On 5-21-2020 Holly had asked for an outlined list of what is billable and non-billable. Below is that email chain:

From: Charles Spannagel
Sent: Thursday, May 21, 2020 11:39 AM
To: Holly Greene <hgreene@azadc.gov>
Cc: Sandy Wang <swang@azadc.gov>; Rusty Johnson <sjohnson@azadc.gov>; Joseph Nicoletti <jnicole@azadc.gov>; Spencer Scott <sscott3@azadc.gov>
Subject: RE: Quick Note

Good afternoon Holly,

Here is what I have been told and am able to deliver to you. Thank you for also putting it on the list for Mr. Profiri.

Any work we do on EUIL – Amendment 2 items, monthly lists (additions to the EUIL), M&O Remediation items (Ad Hoc, Data, outside of general support) – would be what they call "billable"
This does include internal meetings that need to occur in order for the B&D team to work together on the items/initiatives
However, this is covered at a fixed price for the 10,000 EUIL and the 10,000 Remediation hours
so 1st 20,000 hours are already paid for

Any work we do on bug fixing, issue determination, weekly status meetings (including PM meetings with ADC, daily Bug Triage with Charles and Steven), bug root cause analysis would be what they call not billable
covered under M&O support

I hope this helps but I need to make sure B&D is transparent with you and there may be more items you have questions about.

Subject: Re: Quick Note

We will bring the itemization request to Profiri.

On the same note, were you able to create an outline of what would be considered billable and not billable so that my team can help determine when it would be appropriate to reach out to B&D if they need support?

Respectfully,
Holly Greene
Deputy CIO

AMERICAN OVERSIGHT

Arizona Department of Corrections, Rehabilitation & Reentry

IT Service Desk: 602.542.AZDC | ITTECHSUPPORT@azcorrections.gov

As I mentioned above, I believe both teams were working with the best intentions in moving items forward and were working under a common understanding. I am not sure how we move forward from here, perhaps one suggestion could be that the B&D team roll back the changes that were associated with the hours spent and ADCRR can then preserve their pool of M&O hours? I am not sure that this is in everyone's best interests, but I can understand your point of view. Please let me know what you would like to do, so that we can continue to focus on the good work that has already been done by the team.

Thanks – give me a call if you want to have a chat…

Subject: Charles Updates

Good morning ADCRR Leadership,

I just wanted to give you all a couple of updates.

1: Justin is the representative for all things ServiceDesk and I am his escalation point. I will make sure ahead of any meeting I may miss that I have identified a representative from BND.

2: Steve is our QA lead which also puts him in charge of the Bug process. We are having internal meetings in order to determine how we will meet ADCRR's Change Management needs and will work with Sandy and George within the next two weeks.

3: I will be out of the office this Friday 6/19/2020. I will work with Sandy to move the leadership meeting or we can do it via email if that works better for the group.

If you have any questions please let me know.

Thank you.

From: Holly Greene on behalf of Holly Greene <hgreene@azadc.gov>
To: Charles Spannagel
Cc: Gergana Kovatcheva
Subject: Inquiry: ACIS interface with KeepTrak
Date: Monday, June 15, 2020 1:57:44 PM

Hi Charles-

I met with Gergana today and she stated that she will soon have to produce a 1099 report of the inmates. In this report, she will need to correlate the inmate Social Security number to the KeepTrak information.

Today, KeepTrak does not receive/call on SSN info of the inmates. John Vitale with KeepTrak stated that they can create a field in KeepTra which can populate the SSN. This will assist with the report which Gergana needs to run.

Will we be able to pop the SSN from ACIS in KeepTrak? Are there legal issues behind why KeepTrak cannot receive the SSN?

Respectfully,

Holly Greene

Attachments: image003.png

ADCRR,

Thank you for the meeting today. I will take my actions items below and have them ready for next week. I have **bolded** your name if you have an action item. Have a great weekend.

1. M&O Hours need to be signed off by Joe P.

- **HOLLY** to follow up on M&O Hours
- Joe to take M&O Agreement to Procurement review

2. Root cause analysis of the phone number bug introduced last weekend

- Request from ADC with future RCAs into incidents that BND look's into what may be preventable in the future (Please see Steven Williams write up below)
- During the maturation of the support model, we should continue to look at ways to document and put in place prevention tools or efforts around the system-modules

3. Meetings Expectations – Google Meet vs. Team, Agenda, Meeting Notes, Recordings

- Holly's expectation – agenda's should always be sent out prior to the meeting "fully loaded", expectation is that the organizer should either take notes and/or delegate the responsibility to another team member
- Appropriate teams should schedule the meetings (B&D and ADCRR) based off of the purpose and type of meeting
- Request is to use Google Meet for all meetings with ADCRR **CHARLES** to follow up with BND

4. Governance Review - proposed recurring meetings

- Meeting schedule with details needed (**Sandy and Charles to meet**)
- Methodology for promotional efforts around EUIL releases into PROD
    - Ability to work with OCI?

5. Health of ACIS - start off with what Dean has proposed as the bases of the portfolio - speediness, timeout, Change management procedure, bi-weekly frequency in the beginning. (from 5/8 meeting)

- **Charles** to provide reports by Wednesday 6/17/2020 with examples of the reports that are part of the Monthly SLA
- Holly would like to see the health of the reporting server as well as the health of production (**Charles** to follow up) S3 initiative (Report Database expansion)
    - ADC Operational Training to not run batch reports during the day

AMERICAN OVERSIGHT

6. Max value review of other fields (the count issue encountered in May)

- From the write up in May on the count issues (6 digit limit converted to a 15 digit limit) what other fields has BND adjusted based off of this issue/incident/bug. **Charles** to follow up.

7. Charles requested 3 month projection of EUIL items to plan ahead with resources, tasks, project plans.

8. Charles request to work with ADCRR on promotional write ups for each EUIL item prior to deployment to PROD.

9. Holly has requested Spencer to work on the controls in place for hours of work consumption by BND and the reporting mechanisms needed to monitor

- Charles to follow up with Spencer

image002.png
image003.png

Hi Josh,

Again, sorry for the mix-up on my part with the call this afternoon thinking it was at 4:30. I don't mean to waste anyone's time. I do want to clarify regarding the discussion of the role of beneficiary. Personally, I've only been on the depositor side and am not very familiar with the beneficiary side. Hopefully IronMoutain can answer any questions you might have.

Action Items from the meeting
Matt: Account #: Deposit Account [redacted]
Matt: Server specs

IronMountain contacts:
Tracy Daniels (770) 225-8143 or by email at Tracy.Daniels@ironmountain.com

FRANK KIRAGU | IPM CLIENT SERVICES
IRON MOUNTAIN

770-225-8138 – office
770-239-9201 fax
www.IronMountain.com
Iron Mountain, 6111 Live Oak Pkwy, Norcross, GA 30093

Infrastructure Specs
In production these are highly available load balanced. Below are the specs for each node.
App Servers: 2 core, 16GB RAM, 240GB
Background Servers: 2 core, 16GB RAM, 240GB
Database: 16 core, 64GB RAM, 8TB online storage

Here is a bit about the IronMoutain code escrow process.

Overview
https://www.ironmountain.com/information-management/software-escrow

Details, Agreements & FAQs
https://www.ironmountain.com/support/how-it-works/records-management/software-escrow

As for credentials, each party will have their own credentials ie: Depositor and Beneficiary.

Subject: Re: Code Escrow Deposit

Hi, Matt - Thanks again for being available for the quick call there.

Coming out of that meeting, first, we're hoping that we can be put directly in touch with the account representative at Iron Mountain who can help us speed up the log-in side of the process for beneficiaries/licensees of the Mi-Case code.

Then second, and this might be one for Charles, we'd like to be re-sent the code escrow portion of the original contract so that we can see the original account number and the specific language.

In the very near future, we'll possibly be reaching out with any further questions about the technical aspects, but I'm sure we can keep that very concise to make sure the cumulative amount of time devoted to this task does not add up on your side.

Again, your insight is very much appreciated as we gain familiarity with the codebase we have licensed.

Speak with you all again soon,
- josh C.

Subject:	RE: Regression for Hot Fix (Service Desk Ticket #326 / Bug 42775) is completed in QA - Request PROD deployment
Date:	Wednesday, June 10, 2020 10:36:43 AM
Attachments:	image001.png

With Charles out sick I am following up

The fix for Critical Bug 42775:Visitor's Registration Screen is having an issue displaying phone #'s for visitors.
And Medium Bug 42778:UC-IN-Personal Characteristics - Service Desk Ticket # 326 - Inmate's Emergency Contacts are showing (0000000000) and not their original Phone number

Have passed UAT testing

With your permission we can put these into production tonight starting at 6:00

- It will not require an outage
- It should take approximately 1 hour to finish the installation
- Users in the system at that time will not be impacted
- After the installation the phone #'s will show correctly

Thad

Hi All,

ADCRR commented on the tickets saying they've passed testing in UAT this morning:

AMERICAN OVERSIGHT

Bug 42775:Visitor's Registration Screen is having an issue displaying phone #'s for visitors.

Bug 42778:UC-IN-Personal Characteristics - Service Desk Ticket # 326 - Inmate's Emergency Contacts are showing (0000000000) and not their original Phone number

Should we deploy these changes to Production tonight?

Thank you,

--Justin

Hello Charles-

Per our conversation yesterday, I have reviewed, but my Deputy Director is still in process of consuming this information. Once he is through, either myself or Deputy Director Profiri will sign-off.

I will keep you posted on the progress. However, as always, please nudge me if my response is lacking.

Respectfully,

Holly Greene

AMERICAN OVERSIGHT

Business & Decision JAR Session Agenda

Attendance

BND – Charles, Cindy, Trevor

ADCRR – Holly, PMO, SME, TA's, BA's, Operational Leadership

JAR Session Agenda (Proposed)

1. Review ADCRR provided requirements
2. Review Use Cases to be modified or created
3. Review Screens to be modified or created
4. Review Roles or Permissions related to the change
5. Review any Reports that may be affected by the change
6. Review if any Reports may need new development
7. Review Interfaces
8. Review interdependencies
9. B & D to prepare specification updates and provide a summary of the changes or;
10. B & D to prepare separate specification for the change only
11. ADCRR to review and sign off on said specification changes

Notes

- ADCRR will schedule JAR session per B&D Request (Charles to communicate with Sandy that B&D is ready)
    - CR part of the invitation
    - 1 workday between the invitation going out and the actual JAR session (this may not be possible based on the duration of the change and shouldn't be the "rule")

- Jey or Marlene need to be cc'd on all invites (SME List)

- ADCRR needs time for the SME to schedule a meeting for review

Monthly Cadence for EUIL Selection

- 10th Business Day (or prior) – ADCRR and B&D present a list of proposed EUIL items
- 15th Business Day (or prior) – B&D to provide estimate for proposed EUIL items, B&D to provide forecast of available FTE's
- 20th Business Day (or prior) – ADCRR selects items for the upcoming month

Subject: QlikView License and Account/Registration Information

Hello Charles-

ADCRR is in the process of upgrading our hardware OS. That said, we need support from B&D concerning the QlikView application licensing and account information/registration. We have it loaded on a machine which is running Windows 7. We will lose the information during the upgrade, so we need B&D's assistance.

Hema Chennojwala is the person to work with on the ADCRR side, but who can we speak to on the B&D side who can assist?

Respectfully,

Holly Greene

Subject: Non Production Downtime Request for 6/13/2020
Date: Monday, June 8, 2020 4:01:57 PM
Attachments: image003.png

Good afternoon,

B&D would like to formally request a Non Production Environment downtime this Saturday 6/13/2020 from 12pm-8pm. Along with the UAT and RPT_DEV refresh for this weekend, we will be taking down the Training environment.

Please acknowledge and accept this request.

Thank you very much.

MAINTENANCE AND OPERATION AGREEMENT

Overview

This document represents the Service Level Agreement ("SLA") for the maintenance and operation of the Mi-Case offender case management software (the "Software") for the Arizona Department of Corrections, Rehabilitation & Reentry ("ADCRR") and Business & Decision, North America (PA), Inc. ("B&D").

Under the terms of this SLA, maintenance and operation services shall be available on-call 12-hours per day, 7-days per week, with an agreed response time from the receipt of each request.

ADCRR Information Technology (IT) is responsible for first-line and second-line support. ADCRR IT support will attempt to resolve any non-product related issue prior to raising a third-line support ticket to B&D. ADCRR shall be responsible for specific problem determination and resolution for those items and issues that are not included within the Mi-Case Application. The Mi-Case Application consists of all modules, code, the Mi-Case Interface Server, Mi-Case AWS Environment and the Mi-Case Telerik Server.

The role of **first-line support** incident management is to attempt to collect as much information and diagnostics about the incident as possible. First-line may even resolve the issue when possible. This will reduce resolution time for all minor incidents (e.g. 'My computer doesn't work'; OR, 'My password needs to be reset').

The role of **second-line support** of incident management is comprised of staff to rule out end user training needs and end user errors (e.g. 'How do I upload a document'; OR, 'I cannot locate a specific report').

If first and/or second-line support cannot resolve the issue, ADCRR IT support personnel will raise a **third-line** support ticket with B&D. See Appendix 3 for reference to B&D key resources.

If a third-line support ticket is determined to be a software defect, B&D agrees to provide a resolution within the time-period set forth in Exhibit G In the event that a software defect results in general service interruption of the Software or in essential elements of the Software, B&D agrees to provide resolution within the soonest possible time frame.

The third-line support ticket procedure defined below shall be followed.

1 Third-line Support Ticket Procedure

1.1. In the event ADCRR IT support is unable to resolve the problem with the Software, the representative will submit a third-line support ticket with the B&D Customer Service Helpdesk ("B&D-CSH"). To raise a support ticket with B&D-CSH, ADCRR IT support shall follow the following procedure:

1.2. Contact the B&D-CSH by telephone, mail or entering a support ticket within the B&D-CSH online Service Desk (SD) (as set forth in Section 2), and provide the following information:

AMERICAN OVERSIGHT

1.2.1. Contact details (contact name, location, telephone number)

1.2.2. The name of the module in which the problem or failure arose or occurred in the software

1.2.3. Any unique reference number used by ADCRR's internal IT Service Desk (if applicable)

1.2.4. All problem details including: date/time of problem, content of any error message (if applicable), its opinion of the support ticket priority, the nature of problem, any precursors to problem, whether the problem may be easily replicated, and any other associated and/or relevant information such as screen dumps (screen shots), reports and data files.

1.3 ADCRR shall be responsible for ensuring that support tickets are raised only by those individuals designated to do so.

1.4 Upon receipt of the support ticket, it will be categorized according to the priority levels set forth in Appendix 7. B&D will at, all times, use its best efforts to respond to support tickets as quickly as possible in accordance with the target response and resolution times set out in Exhibit G.

1.5 The process flow of a support ticket will follow the agreed process flow as detailed in Appendix 5.

1.6 As part of the B&D-CSH, the B&D Issue Response Team ("IRT") will inform ADCRR IT if a site visit is required to resolve a support ticket.

1.7 When a support ticket is passed to the B&D IRT, the IRT member appointed to resolve the support ticket shall determine whether the resolution of the problem requires application software or data to be repaired. If repairs are required, then the IRT member may require and request further information from ADCRR to resolve the problem. Any time that is associated with the collection, definition or confirmation of further information will be excluded from the target response times set out in Exhibit G. Once the IRT member has determined what is likely to be required to resolve the problem, they will inform the ADCRR IT Service Desk of the current state of the support ticket. Once a resolution path has been determined then the IRT member will inform the ADCRR IT Service Desk personnel and close the support ticket in line with the support ticket closure flow Appendix 5. In the event that a response cannot be provided within the target response times set out in Exhibit G the support ticket shall be escalated in accordance with the Escalation Procedure defined in section 4.

1.8 If a resolution of a support ticket is likely to result in a material impact on the Software or its related products, the IRT member will seek authorization from the ADCRR IT prior to carrying out any action that is likely to have such impact. If the support ticket is a change request (as defined in section 3) the IRT member will carry out an impact analysis detailing the nature and cost of the change. No changes will be made without prior written authorization from ADCRR. The IRT member will inform the ADCRR IT Service Desk personnel and close the support ticket in line with the support ticket closure flow Appendix 5

1.9 Should the investigation of a support ticket by the IRT indicate that the problem resulted from an addition to or modification of the Software or its related products by ADCRR, the IRT member will inform ADCRR at the earliest opportunity indicating that any work to be carried out can be conducted on a chargeable basis in line with the time and materials rate card as Appendix 6 for the implementation of the change. In order to progress on any such works thereafter, B&D would require a written agreement and authorization from ADCRR IT

AMERICAN OVERSIGHT

leadership to correct problems not covered by this SLA. The IRT member will inform ADCRR IT personnel and close the support ticket in line with the support ticket closure flow Appendix 5.

1.10 If ADCRR disagrees with the IRT's findings, a report of the findings from both the IRT staff and the ADCRR IT Service Desk will be provided to the named Support Delivery Manager for B&D for assessment and resolution. If after 5 business days (or a time period mutually agreed upon) there is no resolution on the IRT's disagreement, the executive representatives for both the ADCRR and B&D will negotiate the same findings for ultimate resolution.

1.11 Support tickets will be closed by mutual agreement between ADCRR IT Service Desk and the IRT member on the occurrence of any of the following:

1.11.1. ADCRR and the IRT members agree that the perceived problem was due to the operator's misunderstanding of the Software specification, or equivalent documentation, and as such, no fix is required.

1.11.2. ADCRR agrees that the Software is operating in line with the specifications.

1.11.3. Non-recurrence of an incident, or intermittent fault, which cannot be reproduced, despite repeated efforts to do so, within a set period of 5 days. This period of non-recurrence can be mutually adjusted if conditions warrant a longer or shorter time range. In the above case, the support ticket will not be included in any resolution targets.

1.11.4. The IRT member has concluded that the issue is related to system defect and a system defect has been created within the defect management tool.

1.11.5. The IRT member has concluded that the issue is related to data defect and a data defect has been created within the defect management tool.

1.11.6. The IRT member has notified the ADCRR IT Service Desk that there is a previously known defect that is already entered in the defect tracking system.

1.11.7. The IRT member has requested further clarification or information relating to the support ticket and ADCRR has failed to provide further clarification or information within 5 business days of the support ticket being opened and following at least 1 email reminder after the support ticket being opened.

1.11.8. Following the IRT member deploying an immediate 'hot' fix to the UAT environment and ADCRR failing to test the appropriate target resolution time detailed in Exhibit G.

1.12 A standardized monthly '**support ticket report**' of all support tickets will be provided by the B&D-CSH to the ADCRR IT leadership team.

The monthly support ticket report will:

1.12.1. Show all active support tickets (for the entire time-period of the report).

1.12.2. Show all support tickets opened and closed during the entire time-period of the report including each target response and target resolution times.

1.12.3. The support ticket report will show the status (such as "in development", "under investigation" or "under review by the Customer") for each support ticket and any other comments or pertinent information about that support ticket for all reported support tickets.

1.13 The date for future monthly meetings (or other mutually agreed upon timeframe) between the ADCRR IT leadership and the B&D will be set at the conclusion of the current months standing meeting.

AMERICAN OVERSIGHT

2 Methods of Contacting B&D

ADCRR may contact B&D-CSH by using any of the following means:

2.1 By entering a support ticket in the online B&D-CSH Service Desk at: http://servicedesk.bndna.com and following the ADCRR IT Service Desk Guide detailed in Appendix 2.

2.2 By telephoning the B&D-CSH on *1(833) 564 2273* or such other telephone number provided by B&D to the ADCRR with two-week notification (or other mutually agreed upon timeframe). Phone calls may be backed up by e-mails. The B&D-CSH will log the call and pass this information on to an appropriate IRT member. The ADCRR IT Service Desk personnel making the call should have available to them as much information about the problem as possible, and as a minimum, the information requirements set out in section 1.2.

2.3 By sending an email to ServiceDesk@bndna.com, or such other email address provided by B&D to ADCRR with two-week notification (or other mutually agreed upon timeframe). The email will give as much detail as possible with, as a minimum, the information requirements set out in section 1.2. Email contact is suitable for any requirement; however the target response times will commence the time of receipt of the communication.

2.4 All support tickets for priority 1 (critical) and 2 (high) items should be immediately followed by a telephone call to B&D-CSH.

3 Change Requests / Variations to Service

3.1 ADCRR IT leadership or other designated personnel shall be entitled at any time during the term of this agreement to request in writing to B&D a change request or variation to the services already provided. ADCRR shall provide B&D with full particulars of any requested change or variation and such additional information as B&D shall reasonably require.

3.2 All change requests shall be requested formally by ADCRR IT leadership or other designated personnel.

3.3 Following receipt of a change request or variation to the services pursuant to section 3.1 above, B&D will respond within five (5) business days and shall inform ADCRR IT leadership or other designated personnel in writing whether it considers such change request or variation to the services to be technically feasible. If so, any amendment or variation to the changes and /or services that it would make as a result of such request, a formal estimate of effort (EOE) will be provided by B&D to ADCRR IT leadership or other designated personnel.

3.4 As part of the EOE, B&D will notify ADCRR IT leadership or other designated personnel of the number of hours required to implement the change request.

3.5 ADCRR shall notify B&D within five (5) business days of receipt of the EOE referred to in section 3.3 above if it wishes to proceed with the change request or variation to the services as provided by B&D. ADCRR IT leadership will, as part of this notification to proceed (NTP), identify whether the pre-arranged 10,000 hours of change effort is to be utilized as part of the implementation of the change. In the event that the 10,000 hours of change effort is not to be used for the implementation of the change, ADCRR will provide B&D with an appropriate purchase order for the effort, in line with the time and materials rate card as noted in Appendix 6 for the implementation of the change.

AMERICAN OVERSIGHT

3.6 If ADCRR identifies further changes to the original change request discussed in 3.1 then the process will revert back to section 3.1 above. Failure by ADCRR to notify B&D within the five (5) business day period shall be deemed to constitute the ADCRRs non-acceptance of the proposal.

3.7 Upon receipt of the NTP by ADCRR IT, B&D will plan the development and identify a projected start date and estimated completion date.

3.8 Upon approval of the development plan by ADCRR IT, B&D will commence work on the change request in line with the development plan.

3.9 During working on the change request B&D will track actual hours against the estimate and report progress weekly to ADCRR IT leadership with an appropriate email. B&D can never bill ADCRR for unapproved hours or other undocumented work.

3.10 The IRT shall be responsible for carrying out any Software change requests agreed between B&D and ADCRR under the terms of this Agreement, and for reporting to ADCRR.

3.11 If the change request appears that it will not complete on the planned EOE completion date or if the amount of effort required to finish the change request will exceed 10% over the EOE, B&D will notify ADCRR IT leadership and stop working on the change.

3.11.1 ADCRR will need to then take one of the following actions:

3.11.1.1 Formally ask B&D to proceed to completion of the change request – setting new target thresholds (end date or increase to EOE)

3.11.1.2 Formally ask B&D to re-estimate the change request (step 3.1)

3.11.1.3 Formally ask B&D to drop the change request, perhaps identifying a new change request with altered requirements. The expectation is that all effort expended up to this point will be deducted from the 10,000 hours of change effort.

3.11.2 Upon an updated NTP B&D will commence work on the change request (delays between stopping work and restarting will be reflected in a revised plan for the change request)

3.12 A change request from ADCRR to B&D should include the information detailed in the most current approved change request form.

3.13 Upon the completion of the software development lifecycle of the change request, B&D will formally request the approval to promote the change request to the User Acceptance Testing (UAT) environment.

3.13.3 ADCRR will then test the change request

3.13.3.1 Any support that B&D provides during UAT testing will be billed against the change request while working within the parameters defined in section 3.11.

3.13.3.2 Any bugs identified (during UAT) and subsequently worked on by B&D (during UAT) will be billed against the change request while working within the parameters defined in section 3.11.

3.13.3.3 Any changes made by ADCRR to the requirements or expectations of the change request will need to be done formally in writing and will trigger the process detailed in 3.1

3.14 Following approval to promote the change request to the UAT environment, B&D will formally notify ADCRR IT that the change has been successfully deployed and is ready for the ADCRR UAT process.

AMERICAN OVERSIGHT

3.15 Upon the completion and formal approval provided by ADCRR IT that the change has passed their UAT process, a formal request to B&D will be made to promote the change to production.

3.16 Formal acceptance of the change and all deductions of the 10,000 hours of change effort consumed for the change will be final and any outstanding monies due for the change shall be invoiced and paid for by ADCRR when the change is either promoted to production or 30 business days after the change has been delivered to the UAT environment and accepted by ADCRR.

3.17 A standardized weekly report by email of all change requests will be provided by the B&D-CSH to the ADCRR IT leadership team. This report will show no less than:

3.17.4 All open change requests (for the entire time-period of the report).

3.17.5 All change requests closed during the entire time-period of the report.

3.17.6 The status (such as “in development”, “under investigation” or “waiting for CMRB”) for all open Change Requests.

4 Escalation Procedures

Any matter escalated under the Agreement shall have two stages:

4.1 Stage 1

If the support ticket has not been resolved within the appropriate Target Resolution Time or the support ticket does not meet an exception as shown in Appendix 3, the IRT member(s) tasked with the issue will inform the B&D-CSH of the reason for failure to reach resolution and his/her best analysis of the resources and time-scales required to resolve the problem. The B&D-CSH will then refer the matter to B&D's Customer Service Manager, who will determine any additional or alternate resources necessary and ensure they are applied to the issue and inform ADCRR IT leadership of the escalation. The B&D-CSH will inform ADCRR IT leadership of the issue's escalation, and the appropriate Manager of B&D shall be informed of the Stage 1 escalation.

4.2 Stage 2

4.2.1 If the support ticket has not been resolved within a time period equal to double that specified as the Target Resolution Time for the relevant priority level, or the support ticket does not meet an exception as shown in Appendix 3, the B&D Manager shall inform the relevant Director of B&D if the issue is not likely to be resolved by the next escalation time limit.

4.2.2 The Director of B&D and ADCRR IT leadership will mutually determine an appropriate course of action and whether to allocate additional or alternate resources, including outside agencies if appropriate. ADCRR will be kept informed of the status of the escalated issue, and the B&D Customer Service Manager will inform the originating ADCRR IT leadership or other designated personnel of the Stage 2 escalation.

4.3 B&D Management

A list of the B&D Directors, Managers will be provided to the ADCRR IT leadership upon initiation of this contract as Appendix 3 and this list will be updated whenever a change is made to the B&D Management.

AMERICAN OVERSIGHT

5 SLA Key Performance Indicators and % Holdback

The key metrics shall be used in accordance with the M&O Agreement to measure B&D's performance of the M&O service. These key metrics are detailed in Appendix 4 – Exhibit G.

6. Acceptance and Signatures

IN WITNESS WHEREOF the parties hereto have executed this Maintenance and operation Agreement to be effective for the term stated herein and do hereby attest to their acceptance of the terms and conditions of this Agreement by having caused this Agreement to be executed, sealed, and delivered the day and year first written below.

Arizona Department of Corrections, Rehabilitation and Reentry	**BUSINESS & DECISION, NORTH AMERICA (PA) INC.**

Appendix 1 - THE SERVICES

The Software is used agency wide (ADCRR only). This is an ADCRR agency wide solution which is utilized in all complexes and facilities.

The Services: The Services shall include the following:

1. Support in event of notification of system problems as specified in this contract
2. Evaluation of support tickets
3. Determining the extent of any change required to deal with a support ticket
4. Progression, documentation and resolution of all support tickets
5. Impact analysis of requests for changes to the product
6. Progression of approved change requests
7. Provision, upon request, of timely reports both written (as described in Section 1.13), and verbal (as requested by ADCRR) detailing the progress of support tickets
8. Remote installation of application software upgrades
9. On-site installation of application software upgrades as mutually agreed upon by B&D and ADCRR
10. Agreement of acceptance criteria testing for software upgrades
11. Holding master development copies (by B&D and in escrow) of any software included in the products and all associated documentation as produced by B&D
12. Assuring ADCRR has latest copies of all software included in the project and associated documentation
13. Maintenance of relevant documentation where applicable

Appendix 7 – PRIORITY LEVELS

Category	System Status	Priority
Critical	Indicates the entire Solution is unavailable for use resulting in a critical impact on operations.	1
High	Indicates a Module is unavailable for use where the Solution is usable but is severely limited, and no workaround for that Module exists.	2
Medium	The operation of a function in the application is restricted but use of other functions is not impacted or where a requirement is not being met, but the application is otherwise usable.	3
Low	Minimal business impact. Indicates that the problem results in little impact on operations or there is reasonable circumvention of the problem. For example, misspelled words, graphical designs.	4

MAINTENANCE AND OPERATION AGREEMENT

Overview

This document represents the Service Level Agreement ("SLA") for the maintenance and operation of the Mi-Case offender case management software (the "Software") for the Arizona Department of Corrections, Rehabilitation & Reentry ("ADCRR") and Business & Decision, North America (PA), Inc. ("B&D").

Under the terms of this SLA, maintenance and operation services shall be available on-call 12-hours per day, 7-days per week, with an agreed response time from the receipt of each request.

ADCRR Information Technology (IT) is responsible for first-line and second-line support. ADCRR IT support will attempt to resolve any non-product related issue prior to raising a third-line support ticket to B&D. ADCRR shall be responsible for specific problem determination and resolution for those items and issues that are not included within the Mi-Case Application. The Mi-Case Application consists of all modules, code, the Mi-Case Interface Server, Mi-Case AWS Environment and the Mi-Case Telerik Server.

The role of **first-line support** incident management is to attempt to collect as much information and diagnostics about the incident as possible. First-line may even resolve the issue when possible. This will reduce resolution time for all minor incidents (e.g. 'My computer doesn't work'; OR, 'My password needs to be reset').

The role of **second-line support** of incident management is comprised of staff to rule out end user training needs and end user errors (e.g. 'How do I upload a document'; OR, 'I cannot locate a specific report').

If first and/or second-line support cannot resolve the issue, ADCRR IT support personnel will raise a **third-line** support ticket with B&D. See Appendix 3 for reference to B&D key resources.

If a third-line support ticket is determined to be a software defect, B&D agrees to provide a resolution within the time-period set forth in Exhibit G In the event that a software defect results in general service interruption of the Software or in essential elements of the Software, B&D agrees to provide resolution within the soonest possible time frame.

The third-line support ticket procedure defined below shall be followed.

1 Third-line Support Ticket Procedure

1.1. In the event ADCRR IT support is unable to resolve the problem with the Software, the representative will submit a third-line support ticket with the B&D Customer Service Helpdesk ("B&D-CSH"). To raise a support ticket with B&D-CSH, ADCRR IT support shall follow the following procedure:

1.2. Contact the B&D-CSH by telephone, mail or entering a support ticket within the B&D-CSH online Service Desk (SD) (as set forth in Section 2), and provide the following information:

AMERICAN OVERSIGHT

1.2.1. Contact details (contact name, location, telephone number)

1.2.2. The name of the module in which the problem or failure arose or occurred in the software

1.2.3. Any unique reference number used by ADCRR's internal IT Service Desk (if applicable)

1.2.4. All problem details including: date/time of problem, content of any error message (if applicable), its opinion of the support ticket priority, the nature of problem, any precursors to problem, whether the problem may be easily replicated, and any other associated and/or relevant information such as screen dumps (screen shots), reports and data files.

1.3 ADCRR shall be responsible for ensuring that support tickets are raised only by those individuals designated to do so.

1.4 Upon receipt of the support ticket, it will be categorized according to the priority levels set forth in Appendix 7. B&D will at, all times, use its best efforts to respond to support tickets as quickly as possible in accordance with the target response and resolution times set out in Exhibit G.

1.5 The process flow of a support ticket will follow the agreed process flow as detailed in Appendix 5.

1.6 As part of the B&D-CSH, the B&D Issue Response Team ("IRT") will inform ADCRR IT if a site visit is required to resolve a support ticket.

1.7 When a support ticket is passed to the B&D IRT, the IRT member appointed to resolve the support ticket shall determine whether the resolution of the problem requires application software or data to be repaired. If repairs are required, then the IRT member may require and request further information from ADCRR to resolve the problem. Any time that is associated with the collection, definition or confirmation of further information will be excluded from the target response times set out in Exhibit G. Once the IRT member has determined what is likely to be required to resolve the problem, they will inform the ADCRR IT Service Desk of the current state of the support ticket. Once a resolution path has been determined then the IRT member will inform the ADCRR IT Service Desk personnel and close the support ticket in line with the support ticket closure flow Appendix 5. In the event that a response cannot be provided within the target response times set out in Exhibit G the support ticket shall be escalated in accordance with the Escalation Procedure defined in section 4.

1.8 If a resolution of a support ticket is likely to result in a material impact on the Software or its related products, the IRT member will seek authorization from the ADCRR IT prior to carrying out any action that is likely to have such impact. If the support ticket is a change request (as defined in section 3) the IRT member will carry out an impact analysis detailing the nature and cost of the change. No changes will be made without prior written authorization from ADCRR. The IRT member will inform the ADCRR IT Service Desk personnel and close the support ticket in line with the support ticket closure flow Appendix 5

1.9 Should the investigation of a support ticket by the IRT indicate that the problem resulted from an addition to or modification of the Software or its related products by ADCRR, the IRT member will inform ADCRR at the earliest opportunity indicating that any work to be carried out can be conducted on a chargeable basis in line with the time and materials rate card as Appendix 6 for the implementation of the change. In order to progress on any such works

AMERICAN OVERSIGHT

thereafter, B&D would require a written agreement and authorization from ADCRR IT leadership to correct problems not covered by this SLA. The IRT member will inform ADCRR IT personnel and close the support ticket in line with the support ticket closure flow Appendix 5.

1.10 If ADCRR disagrees with the IRT's findings, a report of the findings from both the IRT staff and the ADCRR IT Service Desk will be provided to the named Support Delivery Manager for B&D for assessment and resolution. If after 5 business days (or a time period mutually agreed upon) there is no resolution on the IRT's disagreement, the executive representatives for both the ADCRR and B&D will negotiate the same findings for ultimate resolution.

1.11 Support tickets will be closed by mutual agreement between ADCRR IT Service Desk and the IRT member on the occurrence of any of the following:

1.11.1. ADCRR and the IRT members agree that the perceived problem was due to the operator's misunderstanding of the Software specification, or equivalent documentation, and as such, no fix is required.

1.11.2. ADCRR agrees that the Software is operating in line with the specifications.

1.11.3. Non-recurrence of an incident, or intermittent fault, which cannot be reproduced, despite repeated efforts to do so, within a set period of 5 days. This period of non-recurrence can be mutually adjusted if conditions warrant a longer or shorter time range. In the above case, the support ticket will not be included in any resolution targets.

1.11.4. The IRT member has concluded that the issue is related to system defect and a system defect has been created within the defect management tool.

1.11.5. The IRT member has concluded that the issue is related to data defect and a data defect has been created within the defect management tool.

1.11.6. The IRT member has notified the ADCRR IT Service Desk that there is a previously known defect that is already entered in the defect tracking system.

1.11.7. The IRT member has requested further clarification or information relating to the support ticket and ADCRR has failed to provide further clarification or information within 5 business days of the support ticket being opened and following at least 1 email reminder after the support ticket being opened.

1.11.8. Following the IRT member deploying an immediate 'hot' fix to the UAT environment and ADCRR failing to test the appropriate target resolution time detailed in Exhibit G.

1.12 A standardized monthly '**support ticket report**' of all support tickets will be provided by the B&D-CSH to the ADCRR IT leadership team.

The monthly support ticket report will:

1.12.1. Show all active support tickets (for the entire time-period of the report).

1.12.2. Show all support tickets opened and closed during the entire time-period of the report including each target response and target resolution times.

1.12.3. The support ticket report will show the status (such as "in development", "under investigation" or "under review by the Customer") for each support ticket and any other comments or pertinent information about that support ticket for all reported support tickets.

AMERICAN OVERSIGHT

1.13 The date for future monthly meetings (or other mutually agreed upon timeframe) between the ADCRR IT leadership and the B&D will be set at the conclusion of the current months standing meeting.

2 Methods of Contacting B&D

ADCRR may contact B&D-CSH by using any of the following means:

2.1 By entering a support ticket in the online B&D-CSH Service Desk at: http://servicedesk.bndna.com and following the ADCRR IT Service Desk Guide detailed in Appendix 2.

2.2 By telephoning the B&D-CSH on *1(833) 564 2273* or such other telephone number provided by B&D to the ADCRR with two-week notification (or other mutually agreed upon timeframe). Phone calls may be backed up by e-mails. The B&D-CSH will log the call and pass this information on to an appropriate IRT member. The ADCRR IT Service Desk personnel making the call should have available to them as much information about the problem as possible, and as a minimum, the information requirements set out in section 1.2.

2.3 By sending an email to ServiceDesk@bndna.com, or such other email address provided by B&D to ADCRR with two-week notification (or other mutually agreed upon timeframe). The email will give as much detail as possible with, as a minimum, the information requirements set out in section 1.2. Email contact is suitable for any requirement; however the target response times will commence the time of receipt of the communication.

2.4 All support tickets for priority 1 (critical) and 2 (high) items should be immediately followed by a telephone call to B&D-CSH.

3 Change Requests / Variations to Service

3.1 ADCRR IT leadership or other designated personnel shall be entitled at any time during the term of this agreement to request in writing to B&D a change request or variation to the services already provided. ADCRR shall provide B&D with full particulars of any requested change or variation and such additional information as B&D shall reasonably require.

3.2 All change requests shall be requested formally by ADCRR IT leadership or other designated personnel.

3.3 Following receipt of a change request or variation to the services pursuant to section 3.1 above, B&D will respond within five (5) business days and shall inform ADCRR IT leadership or other designated personnel in writing whether it considers such change request or variation to the services to be technically feasible. If so, any amendment or variation to the changes and /or services that it would make as a result of such request, a formal estimate of effort (EOE) will be provided by B&D to ADCRR IT leadership or other designated personnel.

3.4 As part of the EOE, B&D will notify ADCRR IT leadership or other designated personnel of the number of hours required to implement the change request.

3.5 ADCRR shall notify B&D within five (5) business days of receipt of the EOE referred to in section 3.3 above if it wishes to proceed with the change request or variation to the services as provided by B&D. ADCRR IT leadership will, as part of this notification to proceed (NTP), identify whether the pre-arranged 10,000 hours of change effort is to be utilized as part of the implementation of the change. In the event that the 10,000 hours of change effort is not to be used for the implementation of the change, ADCRR will provide B&D with an

AMERICAN OVERSIGHT

appropriate purchase order for the effort, in line with the time and materials rate card as noted in Appendix 6 for the implementation of the change.

3.6 If ADCRR identifies further changes to the original change request discussed in 3.1 then the process will revert back to section 3.1 above. Failure by ADCRR to notify B&D within the five (5) business day period shall be deemed to constitute the ADCRRs non-acceptance of the proposal.

3.7 Upon receipt of the NTP by ADCRR IT, B&D will plan the development and identify a projected start date and estimated completion date.

3.8 Upon approval of the development plan by ADCRR IT, B&D will commence work on the change request in line with the development plan.

3.9 During working on the change request B&D will track actual hours against the estimate and report progress weekly to ADCRR IT leadership with an appropriate email. B&D can never bill ADCRR for unapproved hours or other undocumented work.

3.10 The IRT shall be responsible for carrying out any Software change requests agreed between B&D and ADCRR under the terms of this Agreement, and for reporting to ADCRR.

3.11 If the change request appears that it will not complete on the planned EOE completion date or if the amount of effort required to finish the change request will exceed 10% over the EOE, B&D will notify ADCRR IT leadership and stop working on the change.

3.11.1 ADCRR will need to then take one of the following actions:

3.11.1.1 Formally ask B&D to proceed to completion of the change request – setting new target thresholds (end date or increase to EOE)

3.11.1.2 Formally ask B&D to re-estimate the change request (step 3.1)

3.11.1.3 Formally ask B&D to drop the change request, perhaps identifying a new change request with altered requirements. The expectation is that all effort expended up to this point will be deducted from the 10,000 hours of change effort.

3.11.2 Upon an updated NTP B&D will commence work on the change request (delays between stopping work and restarting will be reflected in a revised plan for the change request)

3.12 A change request from ADCRR to B&D should include the information detailed in the most current approved change request form.

3.13 Upon the completion of the software development lifecycle of the change request, B&D will formally request the approval to promote the change request to the User Acceptance Testing (UAT) environment.

3.13.3 ADCRR will then test the change request

3.13.3.1 Any support that B&D provides during UAT testing will be billed against the change request while working within the parameters defined in section 3.11.

3.13.3.2 Any bugs identified (during UAT) and subsequently worked on by B&D (during UAT) will be billed against the change request while working within the parameters defined in section 3.11.

3.13.3.3 Any changes made by ADCRR to the requirements or expectations of the change request will need to be done formally in writing and will trigger the process detailed in 3.1

AMERICAN OVERSIGHT

3.14 Following approval to promote the change request to the UAT environment, B&D will formally notify ADCRR IT that the change has been successfully deployed and is ready for the ADCRR UAT process.

3.15 Upon the completion and formal approval provided by ADCRR IT that the change has passed their UAT process, a formal request to B&D will be made to promote the change to production.

3.16 Formal acceptance of the change and all deductions of the 10,000 hours of change effort consumed for the change will be final and any outstanding monies due for the change shall be invoiced and paid for by ADCRR when the change is either promoted to production or 30 business days after the change has been delivered to the UAT environment and accepted by ADCRR.

3.17 A standardized weekly report by email of all change requests will be provided by the B&D-CSH to the ADCRR IT leadership team. This report will show no less than:

3.17.4 All open change requests (for the entire time-period of the report).

3.17.5 All change requests closed during the entire time-period of the report.

3.17.6 The status (such as “in development”, “under investigation” or “waiting for CMRB”) for all open Change Requests.

4 Escalation Procedures

Any matter escalated under the Agreement shall have two stages:

4.1 Stage 1

If the support ticket has not been resolved within the appropriate Target Resolution Time or the support ticket does not meet an exception as shown in Appendix 3, the IRT member(s) tasked with the issue will inform the B&D-CSH of the reason for failure to reach resolution and his/her best analysis of the resources and time-scales required to resolve the problem. The B&D-CSH will then refer the matter to B&D's Customer Service Manager, who will determine any additional or alternate resources necessary and ensure they are applied to the issue and inform ADCRR IT leadership of the escalation. The B&D-CSH will inform ADCRR IT leadership of the issue's escalation, and the appropriate Manager of B&D shall be informed of the Stage 1 escalation.

4.2 Stage 2

4.2.1 If the support ticket has not been resolved within a time period equal to double that specified as the Target Resolution Time for the relevant priority level, or the support ticket does not meet an exception as shown in Appendix 3, the B&D Manager shall inform the relevant Director of B&D if the issue is not likely to be resolved by the next escalation time limit.

4.2.2 The Director of B&D and ADCRR IT leadership will mutually determine an appropriate course of action and whether to allocate additional or alternate resources, including outside agencies if appropriate. ADCRR will be kept informed of the status of the escalated issue, and the B&D Customer Service Manager will inform the originating ADCRR IT leadership or other designated personnel of the Stage 2 escalation.

4.3 B&D Management

AMERICAN OVERSIGHT

A list of the B&D Directors, Managers will be provided to the ADCRR IT leadership upon initiation of this contract as Appendix 3 and this list will be updated whenever a change is made to the B&D Management.

AMERICAN OVERSIGHT

5 SLA Key Performance Indicators and % Holdback

The key metrics shall be used in accordance with the M&O Agreement to measure B&D's performance of the M&O service. These key metrics are detailed in Appendix 4 – Exhibit G.

6. Acceptance and Signatures

IN WITNESS WHEREOF the parties hereto have executed this Maintenance and operation Agreement to be effective for the term stated herein and do hereby attest to their acceptance of the terms and conditions of this Agreement by having caused this Agreement to be executed, sealed, and delivered the day and year first written below.

Appendix 1 - THE SERVICES

The Software is used agency wide (ADCRR only). This is an ADCRR agency wide solution which is utilized in all complexes and facilities.

The Services: The Services shall include the following:

1. Support in event of notification of system problems as specified in this contract
2. Evaluation of support tickets
3. Determining the extent of any change required to deal with a support ticket
4. Progression, documentation and resolution of all support tickets
5. Impact analysis of requests for changes to the product
6. Progression of approved change requests
7. Provision, upon request, of timely reports both written (as described in Section 1.13), and verbal (as requested by ADCRR) detailing the progress of support tickets
8. Remote installation of application software upgrades
9. On-site installation of application software upgrades as mutually agreed upon by B&D and ADCRR
10. Agreement of acceptance criteria testing for software upgrades
11. Holding master development copies (by B&D and in escrow) of any software included in the products and all associated documentation as produced by B&D
12. Assuring ADCRR has latest copies of all software included in the project and associated documentation
13. Maintenance of relevant documentation where applicable

Appendix 7 – PRIORITY LEVELS

Category	System Status	Priority
Critical	Indicates the entire Solution is unavailable for use resulting in a critical impact on operations.	1
High	Indicates a Module is unavailable for use where the Solution is usable but is severely limited, and no workaround for that Module exists.	2
Medium	The operation of a function in the application is restricted but use of other functions is not impacted or where a requirement is not being met, but the application is otherwise usable.	3
Low	Minimal business impact. Indicates that the problem results in little impact on operations or there is reasonable circumvention of the problem. For example, misspelled words, graphical designs.	4

AMERICAN OVERSIGHT

JUNE 2020

DRAFT M&O GOVERNANCE PROCESS

ADCRR & BUSINESS AND DECISION

Arizona Department of Corrections Rehabilitation & Reentry

Business & Decision
Empowering Digital Business

AMERICAN OVERSIGHT

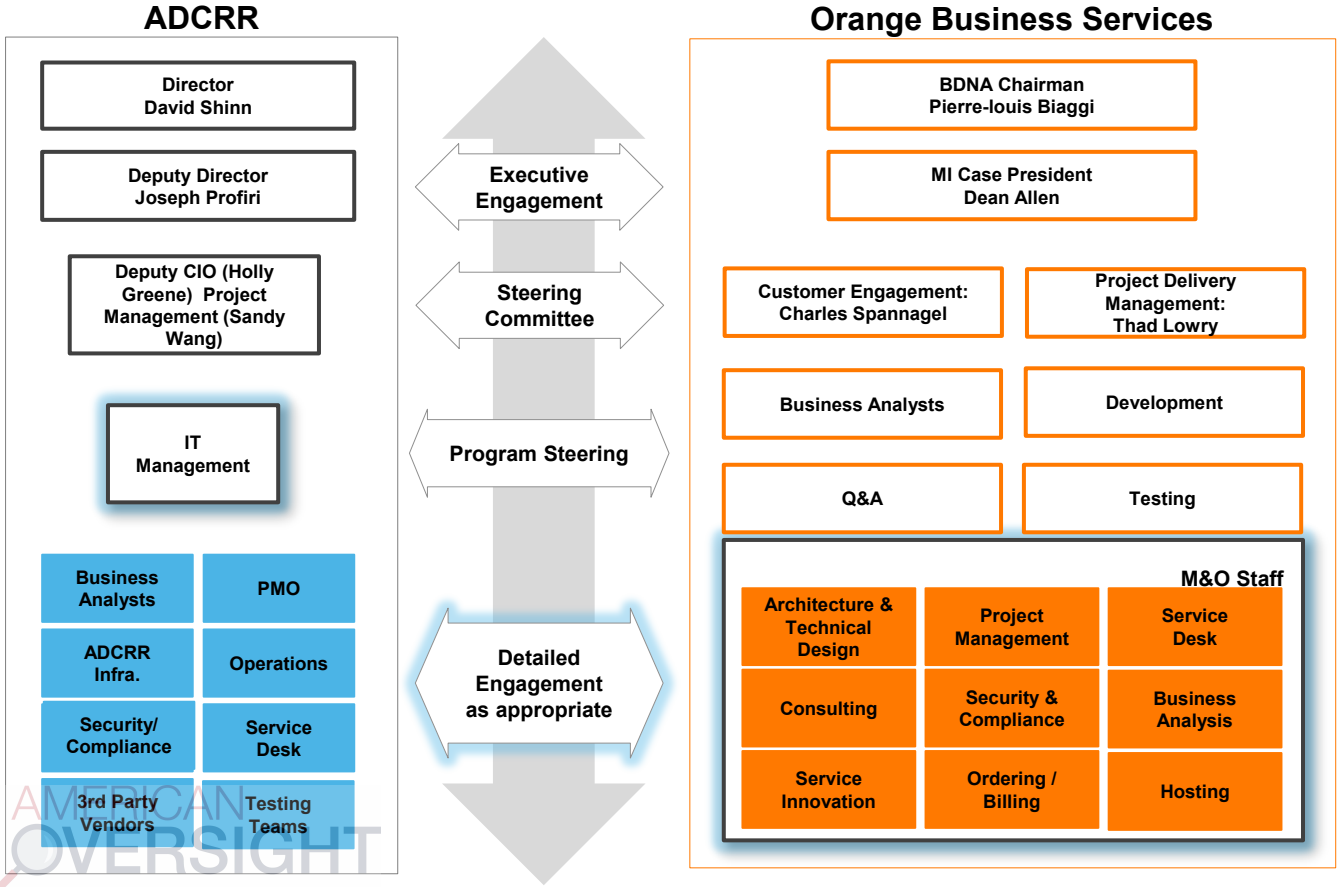
BDNA engagement method



Partnership principles:

- **High touch executive engagement** – Strategic decisions & arbitrations in coordination with ADCRR executives
- **Customer engagement**– throughout the life cycle of M&O, the BDNA customer engagement manager will own the commercial relationship and support customer business and IT strategy
- **Project management** – The project management organization will deliver maintenance as well as new developments of the solution

The engagement is driven by a customer centric philosophy, guided by the customer's business needs.

AMERICAN OVERSIGHT

BDNA Client Business Unit

The Client Business Unit is organized to deliver:

- Maintenance of the solution (Bugs fixing), through a dedicated staff and capacity
- Development of new functionalities as part of the 10k hours envelope dedicated to it

From 05/01/2020 to 05/01/2021, This team will be supplemented by additional staff in order to deliver the additional remediation hours (10k hours) agreed in the last Amendment to the contract

From BAFO

AMERICAN OVERSIGHT

Customer Engagement Manager – Local Account Manager

CEM

The Customer Engagement Manager ensures accountability of the execution of the contract and steers a proactive partnership with ADCRR

- Coordinate a cross functional team in order to develop a partnership with the ADCRR with full accountability to achieve commitments in contractual agreement and delivering satisfaction and value to the ADCRR.
- Implement full contract customer facing governance incl. appropriate governance boards, steerco's, escalation path and contractual change management.
- Bring BDNA delivery team together into a coherent entity fine-tuned to interact with the ADCRR organization in an optimal and minimum impacting way.
- Significantly reduce the level of effort which ADCRR has to invest to ensure the desired contractual benefits are achieved.

AMERICAN OVERSIGHT

Project Delivery Manager – Charles Spannagel

PDM

The Project Delivery Manager is accountable to provide day-to-day coordinated delivery of agreed contractual solutions and services for ADCRR; has overall responsibility for the quality of service and customer satisfaction for all implemented BDNA services; with a view to optimizing workforce utilization

- Proactively identify and scope opportunities for service enhancement providing ADCRR's experience improvement and greater value generation; spread innovation for optimization and leverage of new or improved processes.
- Prepare and publish Program Plan (including Program Structure / Roadmap / Governance Matrix) of customer Service Strategy; ensure all stakeholders agree and understand roles and responsibilities
- Identify and mitigate risks (failure or delay); ensure appropriate levels of business contingency / continuity are in place.
- Implement full contract customer facing governance, incl. appropriate governance boards and steerco's, for escalation path and contractual change management
- Ensure full compliance of agreed solutions and services to meet customer needs; proactive monitoring of agreed SLAs in order to deliver exceptional service and acknowledged customer value.

Governance

Quarterly business review

Members	**ADCRR**	*Initially a small group (JP & HG)*
	BDNA	*Initially a small group (DA & CS)*
Agenda	- ADCRR Business objectives & roadmaps - BDNA business performance (Implementation, Operations, etc.) - INNOVATION: Market trends, technology roadmaps - Relationship health, customer survey results - Dashboard performance - Development Hours spend reviews - New business review	
Inputs	- Status of actions from previous meetings - Monthly performance for both build and run - Headline News - Survey feedback	
Outputs / Objectives	- Minutes and updated actions list - Program performance	
Frequency	Once per quarter ; maximum of two hours	

AMERICAN OVERSIGHT

Governance

Program review session

Members	**ADCRR**	*TBD*
	BDNA	Charles Spanagel, Thad Lowry, Aaron Pratt, Chris Masson & Dean Allen
Agenda	- Update on actions from previous session - Review of SLA dashboard performance - Review of exception logs - Process and/or procedure challenges; opportunities for improved way of working - Account relationship, End-user satisfaction survey programs, user group feedback or other avenues/methods to measure satisfaction with the ACIS system - Schedule reporting compliance - Continuous improvement initiatives and achievements	
Inputs	- Actions from previous meetings - Exceptions from billing, build and/or run - Governance dashboard - Headline News	
Outputs / Objectives	- Minutes and updated actions list - Maintain Governance for effective and continuous improvement program - Executive summary	
Frequency	Scheduled as calendars permit	

AMERICAN OVERSIGHT

Governance

Weekly Change Management Release Schedule

Members	**ADCRR**	George Martinez, Sandy Wang
	BDNA	Charles Spannagel, Thad Lowry, Chris Masson
Agenda	- Release roadmap - Separate meetings to discuss EUIL items and Bug statuses - Outstanding defects/bugs in the system - CAP completion - Any issue requiring escalation - Roundtable discussion with ADCRR	
Inputs	- Actions list from previous meetings - Minutes from weekly design review	
Outputs / Objectives	- Minutes and updated actions list	
Frequency	Bi-weekly	

AMERICAN OVERSIGHT

Governance

Monthly Maintenance and Operations Report

Members	**ADCRR**	Holly Greene, Joe Nicoletti, Rusty Johnson, Sandy Wang, Keith Barrier
	BDNA	Charles Spanagel, Thad Lowry, Aaron Pratt, Chris Masson (optional Dean Allen)
Agenda	- Update on actions from previous session - Steering committee (executive invited) review - SLA performance - End user satisfaction report - Continuous improvement initiatives and achievements	
Inputs	Actions list from previous meetings - Service management monthly report - SLA report - M&O Hours and EUIL delivery completion report	
Outputs / Objectives	- Minutes and updated actions list - Mutual agreement on monthly performance	
Frequency	Monthly – Held last Thursday of each month	

AMERICAN OVERSIGHT

Governance

Weekly Status Meeting with ADCRR IT PMO and Operational Leaders

Members	**ADCRR**	TBD
	BDNA	Charles Spannagel
Agenda	- Input from ADCRR operations on new items requests - End user satisfaction measurement	
Inputs	- Action list from previous meeting - New list of items - Satisfaction measurement	
Outputs / Objectives	- Minutes and updated actions list - New list of items	
Frequency	Weekly – Held every Friday or Monday am (TBD)	

AMERICAN OVERSIGHT

Governance

M&O Manager and ADCRR IT Leadership Weekly Status Meeting (DRAFT)

Members	**ADCRR**	Holly Greene, Joe Nicoletti, Rusty Johnson, Sandy Wang, Joe Profiri (optional)
	BDNA	Charles Spannagel
Agenda	- Review previous week items progression - Identify new items - Review service desk performance - Roundtable discussion	
Inputs	- Action list from previous meeting - Service Desk SLA review	
Outputs / Objectives	- Minutes and updated actions list - New items list	
Frequency	Weekly – Held every Friday	

AMERICAN OVERSIGHT

Initial Governance Timeline

- **July 2020**
  - 7/3/2020 – ADCRR IT and M&O Manager Weekly Status Report Meeting
  - **7/8/2020 – ADCRR and B&D Monthly Status Meeting**
  - 7/17/2020 – ADCRR IT and M&O Manager Weekly Status Meeting
  - 7/24/2020 – ADCRR IT and M&O Manager Weekly Status Meeting
  - 7/31/2020 – ADCRR IT and M&O Manager Weekly Status Meeting
- **August 2020**
  - **8/7/2020 – ADCRR and B&D Monthly Status Meeting**
  - 8/14/2020 – ADCRR IT and M&O Manager Weekly Status Meeting
  - 8/21/2020 – ADCRR IT and M&O Manager Weekly Status Meeting
  - 8/28/2020 – ADCRR IT and M&O Manager Weekly Status Meeting

AZ-DOC-21-0315-A-001950

List of workstreams

- Parking lot – Exhibit 2 items – Capped at 1000 hours
- EUIL – capped at 9000 hours: Focused on Improved End-user experience
- M&O (10,000) Development hours: Focused on new Functionalities implementation
- Maintenance: Bugs fixing, following prioritization by ADCRR
  - CAP: All of the remaining bugs (115) at the time of M&O 4/30/2020 (Bug list provided by ADCRR IT)
  - SLAs: As per agreed SLA setup
  - Service desk: Effective as of June 5th , 2020
- Measurement of Success: To be agreed with ADCRR

AMERICAN OVERSIGHT

Principles of Effort Estimate, Validation & Approval

- M&O development hours:
  - As per ADCRR requests for development – list of items to be submitted by ADCRR
  - BDNA evaluation of Level of Efforts (LoEs)
  - ADCRR sign off on LoEs
  - BDNA commits on LoEs cap for delivery
  - Validation of Delivery as per amendment process terms (Testing ok / 30 days)
- EUIL:
  - Parking lot Exhibit 2 items to be delivered consuming no more than 1000 hours
  - BDNA evaluation of Level of Efforts (LoEs)
  - ACRR sign off on LoEs (9,000)
  - BDNA commits on LoEs cap for delivery
  - Validation of Delivery as per amendment process terms (Testing ok / 30 days)
  - **Measurement of success to evaluate positive impact of EUIL items onto end user satisfaction**

** For M&O development hours prior to May 18th: Validation requested by B&D to ADCRR IT management*

Amendment process

- 1st Business Day – M&O Monthly Report submitted by B&D
- 5th Business Day - Monthly M&O Status Meeting
- 10th Business Day (or prior) – ADCRR and B&D present a list of proposed EUIL items
- 15th Business Day (or prior) – B&D to provide estimate for proposed EUIL items, B&D to provide forecast of available FTE's
- 20th Business Day (or prior) – ADCRR selects items for the upcoming month

AMERICAN OVERSIGHT

SLAs

- **Service Level Agreement (SLA)**
  - Agreed to terms on May 15th , 2020
  - Utilizing multiple technologies and metrics to ensure SLA compliance
    - 3rd Party Systems that monitor System Response, System Availability, User Response
    - ServiceDesk Reports that monitor
      - Incident Response and Resolution Times
    - Additional Monthly Reports to be included in the M&O Monthly Status Meeting
      - Maintenance/Updates/Upgrades, Data Integrity and Destruction, Security, User Support and Contractor Staffing
  - B&D Weekly SLA Compliance and Risk Assessment Meeting to review all metrics
  - **Sign Off Needed**

AMERICAN OVERSIGHT

CAP

- The Corrective Action Plan consist of all medium and low bugs still active as of M&O start (4/30/2020)
- Bug list created

AMERICAN OVERSIGHT

Service desk

- **B&D Service Desk Implementation**
  - Soft Go Live Scheduled for 6/5/2020
  - Go Live Scheduled for 6/12/2020
  - B&D Internal Training on 5/21/2020
  - ADCRR Training the week of 6/1/2020
  - B&D Service Desk staffed Monday through Sunday 6am – 6pm
    - On call after hours support as negotiated with ADCRR
    - After hour technical support will be provided under a Time and Material basis

AMERICAN OVERSIGHT

Measurement of Satisfaction

- **Measure Current Sentiment**
  - Workstream with key ADCRR IT Staff and ADCRR Operational Users
  - Brainstorm different methodologies for End User satisfaction analysis
    - Online Surveys
    - Site Visits - Quarterly Site Visits to gauge user satisfaction (Initially every other month) possible August, most likely September
    - Focus Groups
    - Training Evaluation
    - Identified System Enhancements/Initiatives
- **Setup Ongoing Satisfaction Measurement**
  - Provided by monthly/quarterly survey scales measuring trends in adoption, ease of system use and overall feeling of the system
- **Set Targets and Expectations**
  - To be determined by initial survey findings with a work group consisting of ADCRR IT Leadership, ADCRR Operational Leadership and B&D Leadership setting future targets and expectations

AMERICAN OVERSIGHT

MAINTENANCE AND OPERATION AGREEMENT

Overview

This document represents the Service Level Agreement ("SLA") for the maintenance and operation of the Mi-Case offender case management software (the "Software") for the Arizona Department of Corrections, Rehabilitation & Reentry ("ADCRR") and Business & Decision, North America (PA), Inc. ("B&D").

Under the terms of this SLA, maintenance and operation services shall be available on-call 12-hours per day, 7-days per week, with an agreed response time from the receipt of each request.

ADCRR Information Technology (IT) is responsible for first-line and second-line support. ADCRR IT support will attempt to resolve any non-product related issue prior to raising a third-line support ticket to B&D. ADCRR shall be responsible for specific problem determination and resolution for those items and issues that are not included within the Mi-Case Application. The Mi-Case Application consists of all modules, code, the Mi-Case Interface Server, Mi-Case AWS Environment and the Mi-Case Telerik Server.

The role of **first-line support** incident management is to attempt to collect as much information and diagnostics about the incident as possible. First-line may even resolve the issue when possible. This will reduce resolution time for all minor incidents (e.g. 'My computer doesn't work'; OR, 'My password needs to be reset').

The role of **second-line support** of incident management is comprised of staff to rule out end user training needs and end user errors (e.g. 'How do I upload a document'; OR, 'I cannot locate a specific report').

If first and/or second-line support cannot resolve the issue, ADCRR IT support personnel will raise a **third-line** support ticket with B&D. See Appendix 3 for reference to B&D key resources.

If a third-line support ticket is determined to be a software defect, B&D agrees to provide a resolution within the time-period set forth in Exhibit G. In the event that a software defect results in general service interruption of the Software or in essential elements of the Software, B&D agrees to provide resolution within the soonest possible time frame.

The third-line support ticket procedure defined below shall be followed.

1 Third-line Support Ticket Procedure

1.1. In the event ADCRR IT support is unable to resolve the problem with the Software, the representative will submit a third-line support ticket with the B&D Customer Service Helpdesk ("B&D-CSH"). To raise a support ticket with B&D-CSH, ADCRR IT support shall follow the following procedure:

1.2. Contact the B&D-CSH by telephone, mail or entering a support ticket within the B&D-CSH online Service Desk (SD) (as set forth in Section 2), and provide the following information:

AMERICAN OVERSIGHT

1.2.1. Contact details (contact name, location, telephone number)

1.2.2. The name of the module in which the problem or failure arose or occurred in the software

1.2.3. Any unique reference number used by ADCRR's internal IT Service Desk (if applicable)

1.2.4. All problem details including: date/time of problem, content of any error message (if applicable), its opinion of the support ticket priority, the nature of problem, any precursors to problem, whether the problem may be easily replicated, and any other associated and/or relevant information such as screen dumps (screen shots), reports and data files.

1.3 ADCRR shall be responsible for ensuring that support tickets are raised only by those individuals designated to do so.

1.4 Upon receipt of the support ticket, it will be categorized according to the priority levels set forth in Appendix 7. B&D will at, all times, use its best efforts to respond to support tickets as quickly as possible in accordance with the target response and resolution times set out in Exhibit G.

1.5 The process flow of a support ticket will follow the agreed process flow as detailed in Appendix 5.

1.6 As part of the B&D-CSH, the B&D Issue Response Team ("IRT") will inform ADCRR IT if a site visit is required to resolve a support ticket.

1.7 When a support ticket is passed to the B&D IRT, the IRT member appointed to resolve the support ticket shall determine whether the resolution of the problem requires application software or data to be repaired. If repairs are required, then the IRT member may require and request further information from ADCRR to resolve the problem. Any time that is associated with the collection, definition or confirmation of further information will be excluded from the target response times set out in Exhibit G. Once the IRT member has determined what is likely to be required to resolve the problem, they will inform the ADCRR IT Service Desk of the current state of the support ticket. Once a resolution path has been determined then the IRT member will inform the ADCRR IT Service Desk personnel and close the support ticket in line with the support ticket closure flow Appendix 5. In the event that a response cannot be provided within the target response times set out in Exhibit G the support ticket shall be escalated in accordance with the Escalation Procedure defined in section 4.

1.8 If a resolution of a support ticket is likely to result in a material impact on the Software or its related products, the IRT member will seek authorization from the ADCRR IT prior to carrying out any action that is likely to have such impact. If the support ticket is a change request (as defined in section 3) the IRT member will carry out an impact analysis detailing the nature and cost of the change. No changes will be made without prior written authorization from ADCRR. The IRT member will inform the ADCRR IT Service Desk personnel and close the support ticket in line with the support ticket closure flow Appendix 5

1.9 Should the investigation of a support ticket by the IRT indicate that the problem resulted from an addition to or modification of the Software or its related products by ADCRR, the IRT member will inform ADCRR at the earliest opportunity indicating that any work to be carried out can be conducted on a chargeable basis in line with the time and materials rate card as Appendix 6 for the implementation of the change. In order to progress on any such works

AMERICAN OVERSIGHT

thereafter, B&D would require a written agreement and authorization from ADCRR IT leadership to correct problems not covered by this SLA. The IRT member will inform ADCRR IT personnel and close the support ticket in line with the support ticket closure flow Appendix 5.

1.10 If ADCRR disagrees with the IRT's findings, a report of the findings from both the IRT staff and the ADCRR IT Service Desk will be provided to the named Support Delivery Manager for B&D for assessment and resolution. If after 5 business days (or a time period mutually agreed upon) there is no resolution on the IRT's disagreement, the executive representatives for both the ADCRR and B&D will negotiate the same findings for ultimate resolution.

1.11 Support tickets will be closed by mutual agreement between ADCRR IT Service Desk and the IRT member on the occurrence of any of the following:

1.11.1. ADCRR and the IRT members agree that the perceived problem was due to the operator's misunderstanding of the Software specification, or equivalent documentation, and as such, no fix is required.

1.11.2. ADCRR agrees that the Software is operating in line with the specifications.

1.11.3. Non-recurrence of an incident, or intermittent fault, which cannot be reproduced, despite repeated efforts to do so, within a set period of 5 days. This period of non-recurrence can be mutually adjusted if conditions warrant a longer or shorter time range. In the above case, the support ticket will not be included in any resolution targets.

1.11.4. The IRT member has concluded that the issue is related to system defect and a system defect has been created within the defect management tool.

1.11.5. The IRT member has concluded that the issue is related to data defect and a data defect has been created within the defect management tool.

1.11.6. The IRT member has notified the ADCRR IT Service Desk that there is a previously known defect that is already entered in the defect tracking system.

1.11.7. The IRT member has requested further clarification or information relating to the support ticket and ADCRR has failed to provide further clarification or information within 5 business days of the support ticket being opened and following at least 1 email reminder after the support ticket being opened.

1.11.8. Following the IRT member deploying an immediate 'hot' fix to the UAT environment and ADCRR failing to test the appropriate target resolution time detailed in Exhibit G.

1.12 A standardized monthly '**support ticket report**' of all support tickets will be provided by the B&D-CSH to the ADCRR IT leadership team.

The monthly support ticket report will:

1.12.1. Show all active support tickets (for the entire time-period of the report).

1.12.2. Show all support tickets opened and closed during the entire time-period of the report including each target response and target resolution times.

1.12.3. The support ticket report will show the status (such as "in development", "under investigation" or "under review by the Customer") for each support ticket and any other comments or pertinent information about that support ticket for all reported support tickets.

AMERICAN OVERSIGHT

1.13 The date for future monthly meetings (or other mutually agreed upon timeframe) between the ADCRR IT leadership and the B&D will be set at the conclusion of the current months standing meeting.

2 Methods of Contacting B&D

ADCRR may contact B&D-CSH by using any of the following means:

2.1 By entering a support ticket in the online B&D-CSH Service Desk at: http://servicedesk.bndna.com and following the ADCRR IT Service Desk Guide detailed in Appendix 2.

2.2 By telephoning the B&D-CSH on *1(833) 564 2273* or such other telephone number provided by B&D to the ADCRR with two-week notification (or other mutually agreed upon timeframe). Phone calls may be backed up by e-mails. The B&D-CSH will log the call and pass this information on to an appropriate IRT member. The ADCRR IT Service Desk personnel making the call should have available to them as much information about the problem as possible, and as a minimum, the information requirements set out in section 1.2.

2.3 By sending an email to ServiceDesk@bndna.com, or such other email address provided by B&D to ADCRR with two-week notification (or other mutually agreed upon timeframe). The email will give as much detail as possible with, as a minimum, the information requirements set out in section 1.2. Email contact is suitable for any requirement; however the target response times will commence the time of receipt of the communication.

2.4 All support tickets for priority 1 (critical) and 2 (high) items should be immediately followed by a telephone call to B&D-CSH.

3 Change Requests / Variations to Service

3.1 ADCRR IT leadership or other designated personnel shall be entitled at any time during the term of this agreement to request in writing to B&D a change request or variation to the services already provided. ADCRR shall provide B&D with full particulars of any requested change or variation and such additional information as B&D shall reasonably require.

3.2 All change requests shall be requested formally by ADCRR IT leadership or other designated personnel.

3.3 Following receipt of a change request or variation to the services pursuant to section 3.1 above, B&D will respond within five (5) business days and shall inform ADCRR IT leadership or other designated personnel in writing whether it considers such change request or variation to the services to be technically feasible. If so, any amendment or variation to the changes and /or services that it would make as a result of such request, a formal estimate of effort (EOE) will be provided by B&D to ADCRR IT leadership or other designated personnel.

3.4 As part of the EOE, B&D will notify ADCRR IT leadership or other designated personnel of the number of hours required to implement the change request.

3.5 ADCRR shall notify B&D within five (5) business days of receipt of the EOE referred to in section 3.3 above if it wishes to proceed with the change request or variation to the services as provided by B&D. ADCRR IT leadership will, as part of this notification to proceed (NTP), identify whether the pre-arranged 10,000 hours of change effort is to be utilized as part of the implementation of the change. In the event that the 10,000 hours of change effort is not to be used for the implementation of the change, ADCRR will provide B&D with an

AMERICAN OVERSIGHT

appropriate purchase order for the effort, in line with the time and materials rate card as noted in Appendix 6 for the implementation of the change.

3.6 If ADCRR identifies further changes to the original change request discussed in 3.1 then the process will revert back to section 3.1 above. Failure by ADCRR to notify B&D within the five (5) business day period shall be deemed to constitute the ADCRRs non-acceptance of the proposal.

3.7 Upon receipt of the NTP by ADCRR IT, B&D will plan the development and identify a projected start date and estimated completion date.

3.8 Upon approval of the development plan by ADCRR IT, B&D will commence work on the change request in line with the development plan.

3.9 During working on the change request B&D will track actual hours against the estimate and report progress weekly to ADCRR IT leadership with an appropriate email. B&D can never bill ADCRR for unapproved hours or other undocumented work.

3.10 The IRT shall be responsible for carrying out any Software change requests agreed between B&D and ADCRR under the terms of this Agreement, and for reporting to ADCRR.

3.11 If the change request appears that it will not complete on the planned EOE completion date or if the amount of effort required to finish the change request will exceed 10% over the EOE, B&D will notify ADCRR IT leadership and stop working on the change.

3.11.1 ADCRR will need to then take one of the following actions:

3.11.1.1 Formally ask B&D to proceed to completion of the change request – setting new target thresholds (end date or increase to EOE)

3.11.1.2 Formally ask B&D to re-estimate the change request (step 3.1)

3.11.1.3 Formally ask B&D to drop the change request, perhaps identifying a new change request with altered requirements. The expectation is that all effort expended up to this point will be deducted from the 10,000 hours of change effort.

3.11.2 Upon an updated NTP B&D will commence work on the change request (delays between stopping work and restarting will be reflected in a revised plan for the change request)

3.12 A change request from ADCRR to B&D should include the information detailed in the most current approved change request form.

3.13 Upon the completion of the software development lifecycle of the change request, B&D will formally request the approval to promote the change request to the User Acceptance Testing (UAT) environment.

3.13.3 ADCRR will then test the change request

3.13.3.1 Any support that B&D provides during UAT testing will be billed against the change request while working within the parameters defined in section 3.11.

3.13.3.2 Any bugs identified (during UAT) and subsequently worked on by B&D (during UAT) will be billed against the change request while working within the parameters defined in section 3.11.

3.13.3.3 Any changes made by ADCRR to the requirements or expectations of the change request will need to be done formally in writing and will trigger the process detailed in 3.1

AMERICAN OVERSIGHT

3.14 Following approval to promote the change request to the UAT environment, B&D will formally notify ADCRR IT that the change has been successfully deployed and is ready for the ADCRR UAT process.

3.15 Upon the completion and formal approval provided by ADCRR IT that the change has passed their UAT process, a formal request to B&D will be made to promote the change to production.

3.16 Formal acceptance of the change and all deductions of the 10,000 hours of change effort consumed for the change will be final and any outstanding monies due for the change shall be invoiced and paid for by ADCRR when the change is either promoted to production or 30 business days after the change has been delivered to the UAT environment and accepted by ADCRR.

3.17 A standardized weekly report by email of all change requests will be provided by the B&D-CSH to the ADCRR IT leadership team. This report will show no less than:

3.17.4 All open change requests (for the entire time-period of the report).

3.17.5 All change requests closed during the entire time-period of the report.

3.17.6 The status (such as “in development”, “under investigation” or “waiting for CMRB”) for all open Change Requests.

4 Escalation Procedures

Any matter escalated under the Agreement shall have two stages:

4.1 Stage 1

If the support ticket has not been resolved within the appropriate Target Resolution Time or the support ticket does not meet an exception as shown in Appendix 3, the IRT member(s) tasked with the issue will inform the B&D-CSH of the reason for failure to reach resolution and his/her best analysis of the resources and time-scales required to resolve the problem. The B&D-CSH will then refer the matter to B&D's Customer Service Manager, who will determine any additional or alternate resources necessary and ensure they are applied to the issue and inform ADCRR IT leadership of the escalation. The B&D-CSH will inform ADCRR IT leadership of the issue's escalation, and the appropriate Manager of B&D shall be informed of the Stage 1 escalation.

4.2 Stage 2

4.2.1 If the support ticket has not been resolved within a time period equal to double that specified as the Target Resolution Time for the relevant priority level, or the support ticket does not meet an exception as shown in Appendix 3, the B&D Manager shall inform the relevant Director of B&D if the issue is not likely to be resolved by the next escalation time limit.

4.2.2 The Director of B&D and ADCRR IT leadership will mutually determine an appropriate course of action and whether to allocate additional or alternate resources, including outside agencies if appropriate. ADCRR will be kept informed of the status of the escalated issue, and the B&D Customer Service Manager will inform the originating ADCRR IT leadership or other designated personnel of the Stage 2 escalation.

4.3 B&D Management

AMERICAN OVERSIGHT

A list of the B&D Directors, Managers will be provided to the ADCRR IT leadership upon initiation of this contract as Appendix 3 and this list will be updated whenever a change is made to the B&D Management.

AMERICAN OVERSIGHT

5 SLA Key Performance Indicators and % Holdback

The key metrics shall be used in accordance with the M&O Agreement to measure B&D's performance of the M&O service. These key metrics are detailed in Appendix 4 – Exhibit G.

6. Acceptance and Signatures

IN WITNESS WHEREOF the parties hereto have executed this Maintenance and operation Agreement to be effective for the term stated herein and do hereby attest to their acceptance of the terms and conditions of this Agreement by having caused this Agreement to be executed, sealed, and delivered the day and year first written below.

Appendix 1 - THE SERVICES

The Software is used agency wide (ADCRR only). This is an ADCRR agency wide solution which is utilized in all complexes and facilities.

The Services: The Services shall include the following:

1. Support in event of notification of system problems as specified in this contract
2. Evaluation of support tickets
3. Determining the extent of any change required to deal with a support ticket
4. Progression, documentation and resolution of all support tickets
5. Impact analysis of requests for changes to the product
6. Progression of approved change requests
7. Provision, upon request, of timely reports both written (as described in Section 1.13), and verbal (as requested by ADCRR) detailing the progress of support tickets
8. Remote installation of application software upgrades
9. On-site installation of application software upgrades as mutually agreed upon by B&D and ADCRR
10. Agreement of acceptance criteria testing for software upgrades
11. Holding master development copies (by B&D and in escrow) of any software included in the products and all associated documentation as produced by B&D
12. Assuring ADCRR has latest copies of all software included in the project and associated documentation
13. Maintenance of relevant documentation where applicable

Appendix 7 – PRIORITY LEVELS

Category	System Status	Priority
Critical	Indicates the entire Solution is unavailable for use resulting in a critical impact on operations.	1
High	Indicates a Module is unavailable for use where the Solution is usable but is severely limited, and no workaround for that Module exists.	2
Medium	The operation of a function in the application is restricted but use of other functions is not impacted or where a requirement is not being met, but the application is otherwise usable.	3

AMERICAN OVERSIGHT

Low	Minimal business impact. Indicates that the problem results in little impact on operations or there is reasonable circumvention of the problem. For example, misspelled words, graphical designs.	4

Appendix 2 - PRIORITY LEVELS[HG1]

Category	System Status	Priority
Critical	Indicates the entire Solution is unavailable for use resulting in a critical impact on operations.	1
High	Indicates a Module is unavailable for use where the Solution is usable but is severely limited, and no workaround for that Module exists.	2
Medium	The operation of a function in the application is restricted but use of other functions is not impacted or where a requirement is not being met, but the application is otherwise usable.	3
Low	Minimal business impact. Indicates that the problem results in little impact on operations or there is reasonable circumvention of the problem. For example, misspelled words, graphical designs.	4

Appendix 3 - TARGET RESPONSE AND RESOLUTION TIMES [HG2]

Priority	Target Response Time	Target Resolution Time
1	1 Clock Hour	5 Clock Hours
2	24 Clock Hours	48 Clock Hours
3	48 Business Hours	72 Business Hours
4	48 Business Hours	72 Business Hours

Target Response Time: is defined as the time, from the moment when ADCRR IT Service Desk or other designated support personnel notifies B&D of a support ticket (as defined in Section 1.1, Section 1.2, and Section 2), for B&D to begin working on the reported support ticket and to inform

AMERICAN OVERSIGHT

the Customer of this phase of the support ticket process.

Target Resolution Time: is defined as the targeted time, 24 clock hours, to resolve and initially close a support ticket as set out in Section 1.10. The targeted time to resolve a support ticket does not represent the reporting of the final closure as defined in Section 1.11.

There may be instances where a resolution cannot be achieved in the specified target time period. These situations are described in the paragraph below. When a resolution cannot be achieved in the specified target time period for any of the reasons described below, and it is mutually agreed that the circumstances do not constitute the need for escalation (as defined in Section 4), then no target resolution time will be entered in the standardized monthly **support ticket report** (as described in Section 1.12), and a comment that states "Target Resolution Time is on hold pending [*reason*]" will be added. The support ticket status of the *Target Resolution Time* for these instances will be revised once the issue preventing its resolution is settled.

Target Response and Resolution Exceptions:

Situations that may prevent a support ticket from meeting the *Target Response & Resolution Time*

1 Support tickets that require approval from ADCRR IT
2 Support tickets that represent a non-recurrence of an incident, or intermittent fault (as defined in Section 1.11.3)
3 Support tickets that require information and additional requested support from ADCRR (as defined in Sections 1.5 through 1.12).
4 ADCRR IT disagrees with the IRT's finding, and the support ticket cannot be closed (as defined in Section 1.10).
5 Any mutually agreed upon situation where ADCRR and B&D determine that the support ticket cannot be resolved in the specified Target Resolution Time.

Under the above circumstances, the Target Resolution Time may be recalculated by subtracting the time required by ADCRR to meet the requirements, requests or procedures that prevent the B&D IRT staff from resolving the support ticket as described in Sections 1.5 through 1.12. When these circumstances arise, B&D will not be liable for any failure to meet these targets.

[HG1]Remove from document as this should reference the SLA and/or Exhibit G document.

Recommend that B&D specify that this is for Service Desk tickets (not TFS).

[HG2]Recommend removal from document as this should reference SLA and/or Exhibit G document.

Respectfully,

Holly Greene

Please find the below notes and update accordingly.

ServiceDesk:

- Soft Go Live
- ADCRR has been added to ServiceDesk
- ADCRR IT will test their logins
- Charles, Joe Nicoletti and team to discuss early afternoon the parameters around the Soft Go Live
- Charles to provide phone numbers for ServiceDesk business hours and after hours

Downtime Notification

- ADCRR IT to send communication to the organization to indicate downtime
- Charles to notify ADCRR IT when the system is back up?
    - Who should Charles notify?
- Joe Nicoletti is escalation for ADCRR
- Charles is escalation for B&D

Exhibit G

- Meeting scheduled for this afternoon
- Exhibit G and MNO word document

JAR Sessions

- Need to get everyone in the room and committed to finishing the session to move forward
- Once in development, continued updates during the development
- Daily standups as part of this process?

Charles,

The following people will need accounts in your service desk ticketing system:

Chris Nelson
cnelson1@azadc.gov
602.542.4850

Brian Makris
bmakris@azadc.gov
602.542.4852

Michael Saltmarsh
msaltmarsh@azadc.gov
602.542.4889

German Rios
grios@azadc.gov
602.542.8999

Charles Grant

AMERICAN OVERSIGHT

cgrant@azadc.gov
602.542.0210

If you need additional details to create the accounts, please let me know.

Previously we had discussed "some" people from OPS having access as well. Is this still the case?

Holly, what would you prefer for the week long soft go live? I agree, no more than a week.

Hi Aaron-

Regardless of agreement, the software and licenses were purchased and therefore we should be able to, at minimum, obtain basic account, licensing and install support. We're not looking to have B&D support the software and this is certainly not part of other contract agreements.

Please be thoughtful to our need to meet the end of month deadline for the retirement of our system.

Subject: QlikView License and Account/Registration Information

Hello Charles-

ADCRR is in the process of upgrading our hardware OS. That said, we need support from B&D concerning the QlikView application licensing and account information/registration. We have it loaded on a machine which is running Windows 7. We will lose the information during the upgrade, so we need B&D's assistance.

Hema Chennojwala is the person to work with on the ADCRR side, but who can we speak to on the B&D side who can assist?

Holly,

We completely understand at B&D and we are scheduling a meeting for tomorrow with your team to go over the process and do a QA to make sure everyone is on the same page and has the chance to ask questions and set forth a new methodology moving forward.

I am always open to your feedback and value your input. I am glad we are taking the time to put a system in place that will be a "win-win" for both sides.

Subject: Re: ACIS JAR/FSD/lessons-learned

Hi Spencer and Sandy-

Thank you for including me on this communication. I will be bringing this to our Deputy Director's attention for awareness.

Hi Charles-

I support our customers in that the JAR sessions should not be a rushed process. If folks in the agency are getting that sense, I look to B&D to help calm that and provide a solution to ensure our customers are getting what they need out of their interactions and that what is delivered meets the needs they're trying desperately to articulate.

At this point, I feel daily standup calls are necessary with the techs to review what is being developed based on the outcome of the JARS and the forms. This will ensure

AMERICAN OVERSIGHT

that it's working as it should before it gets to UAT/QA for testing by Operations. Our teams would not be hands on in the development environment, but rather what is being targeted would be demoed out by the B&D developer to the 'lead Ops person' for that item (not a group). This agile action will provide assurance that what ADCRR is trying to articulate is interpreted correctly by B&D to produce the correct outcome.

Open communication is critical and the level of interaction noted above will solve many misunderstandings and build trust. What would the billing look like for an interactive concept like what I noted?

Respectfully,

Holly Greene

>
> This is the same "stuff" (I am using the word stuff to be PC but there is another word I would rather use) B&D pulled 5 years ago about making us rush signing off on the FSD's.
>
> 1. ADC did not hire any BA's in the beginning.
> 2. Chuck and I knew nothing about how this whole process worked and were going in blind.
> 3. We were told that B&D would work with us down the road and be flexible about any issues.

AMERICAN OVERSIGHT

4. Hurry, hurry, hurry, sign off on this 1200 page FSD within 3 days of receiving it. This happened continuously with all of the FSDs

Lessons learned

1. BA's are very crucial in this process and thankfully now we have them.
2. Now we know that B&D will hold us ABSOLUTELY to the letter of the FSD and if it does not explicitly say XYZ, even if it is common sense, we will not win.
3. See above. Also make sure EVERYTHING is explicitly talked about in the document, no matter how obvious, minute or mundane.
4. DO NOT ALLOW THEM TO RUSH US EVER. The FSD is good when we say it is good and not a minute before. Unless the contract says we have to deliver a signed FSD by X then we need to control the tempo.

If I have to meet with someone, brief someone, stand on someone's desk, I do not care how high in the chain they are, I will be happy to tell them about my experiences with this process when it was in its infancy. My supervisor and I are the only two left that have been here from the beginning and I feel our lessons can be a valuable teaching tool for those going forward.

Warm Regards,
Spencer Scott, PMP

AMERICAN OVERSIGHT

1: The M&O Word document sent Friday @ 6:35pm I have re-attached above

2: CAP Agreement to the 115 Bugs proposed by Spencer with a start date of 4/30/2020 and an end date of 4/30/2021. Spencer's list of bugs attached.

3: Governance Methodology. I realize this is still being finalized but I think both sides are good with the foundation and can proceed forward with the scheduling of meetings.

I don't meant to be a pain in the neck. I just have to report back to leadership on my side. Thank you.

Aaron,

I apologize for the delay. I assure you, BND is committed to getting you what you need from the environment in order to create and test your reports. I think we should start with a session and go from there. Harika and Phil are now the two AdHoc Developers you will be working directly with. Please send the time slot and I will make sure our team is available. Thank you.

Subject:

The reports Jeff and I develop from ACIS have issues in our development environments

rpt.aims2 and rptdev.aims2

This email thread is on the way for B&D to schedule a screenshare to understand a problem Jeff reported. This problem is about our development environments and is also blocking parts of my work. We all have increased awareness of the value of everyone's ACIS time and the need to use it efficiently. I think both parties have committed sustained resources to keep our report development environments at a service level required for report development. These kinds of issues with the environment will continue as long as report development continues; Jeff and I push performance boundaries in development and we need communication with the people who can access our development environment's administration. Are there hours that this group (Jeff, Harika, Phil, me, others?) can have unscheduled real-time conversations or screen shares? Do we all agree this is foundational work that needs to be planned for and done?

Date: Wednesday, June 3, 2020 4:00:59 PM
Attachments: image002.png

Good afternoon,

B&D needs to formally request a Production Downtime from 9am – 10am this Saturday 6/6/2020.

The downtime request has to do with the fact that this release has changed a significant number of stored procedures that need to be compiled manually after the deploy. B&D will need an hour to recompile these procedures and check to make sure that everything is running properly.

Please acknowledge receipt and approval for this request.

Thank you.

Subject: B&D Service Desk Training @ Wed, Jun 3, 2020 9:00am – 11:00am (GMT-07)

Hi All,

Here's the notes I took during the training this morning:

Service Desk Training

Wednesday, June 3, 2020
8:37 AM

Attendees: B&D: Justin Baker and Charles Spannagel
ADC: Holly Greene, Joe Nicoletti, Scott Schnyer, Sandy Wang, George Martinez, Spencer Scott, Elizabeth Charif, Al Dubrowa, Chris Nelson, Brian Makris

Account Setup

- You will receive an email to join the service desk
- https://servicedesk.bndna.com
- Home page - Just click the Business & Decisions box
- We're only going to be dealing with creating NEW requests (the green box).
- Click Request a new service
- There's only 3 required fields to enter
- Issue Severities:
  - Critical incident - Call B&D support line 6am - 6pm. Call B&D's after hours number from 6pm - 6am.
- Service desk is used for low, medium, and high issues. Critical issues need a phone call to B&D.
- A tip sheet will be provided after B&D gets some feedback on it.
- Even though something is technically a medium severity bug because of the legal definition category it falls into, it can still be moved up to the top of the queue to be worked on right away if it's escalated by management.
- Question: Is there a size limitation for the video attachments? Answer: Not sure, but Justin will look into it.

AMERICAN OVERSIGHT

Requests Tab:

- This is where you can view your requests (open, closed, resolved, etc.)
- There are search features that allow you to search with a key word

In Context of a Service Desk Ticket:

- Conversations tab - You can see the description of the issue and then conversations between the requestor and the technician
- Resolution tab - Mainly used by B&D technician to describe what was done to resolve the ticket
- History tab - Records every change to the ticket

No Service Ticket Needed when:

- Password changes
- Updating user roles
- Creating new accounts
- Training issues

Questions:

- Alerts - Question: Can we set up alerts? Answer: Justin to look into alerts. Charles believes each time an incident is updated an email is sent out. However, Justin will confirm.
- Excel - Question: Are you able to link the query to Excel? Answer: Not sure. The capabilities of Service Desk have not been fully explored.
- Automatically closing tickets - Question: Do tickets automatically close after the issue has been resolved? Answer: No, it doesn't do that. However, Scott would like the tickets to be automatically closed after a certain time period after the service desk has been notified of it working. However, the resolved tickets don't
- TFS will still be used for change requests and bugs. So once the service desk ticket is logged, if B&D determines it's a bug or a change request then a TFS ticket is logged. The TA's and BA's will still work on the issue in TFS to validate that it's working correctly.
- Queries - Question: Can you create queries? Answer: Not sure, Justin to look into it. However, the bugs will still be in TFS so we can search for the bugs in TFS and it's not really needed in Service Desk.
- Functionality Requests - Question: What can be changed? Answer: ADC needs to get a list together of what changes they would like to see in Service Desk. Which fields should be required? Which fields should be included so that B&D has enough information?
- TFS - Any TFS specific TFS questions we should keep for a separate call.
- Ticket number - Question: Will a ticket number be automatically assigned? Answer: Yes
- Follow up needed on the TFS and Service Desk cycle.

User Accounts:

- Charles needs to the list of users that need accounts from Spencer.

Thanks,

Elizabeth Charif

Hello Charles-

For a more formal response, I agree that we have achieved our goal and met the deadline. This was communicated by me to Deputy Director Profiri.

As for the reporting piece, I did see that the verbiage was updated in the PDF itself. I approve the updated verbiage for the second bullet and appreciate the reference to the M&O Reports Appendix.

Respectfully,

Holly Greene

> Good morning,
>
> There is one outstanding question that popped in regards to the Reports Section that we have added back into the SLA. On the second bullet we need to clarify that the Ad Hoc team will support any bugs that are reported from the operational staff in the field. It can be interpreted that we are supporting development and maintenance of the Ad Hoc reports once they are in production which is not how we are operating today. Please respond and I will convert the document into PDF for final review.

AMERICAN OVERSIGHT

Holly, I think since the M&O Word Document is being updated we (you and I) need to indicate to Mr. Profiri and Dean that the SLA's have been agreed to and signed off on by the deadline and that the M&O word document will be finished and signed by early next week. Does that seem reasonable? Thank you.

HEADING	DESCRIPTION	SLA Non-Compliance Withholding %
Reporting SLA:	• For new reports, changes to existing reports or ad hoc reporting that requires a push to production, once approved by the Change Control Board (CAB), the report and associated database code will be moved to the production environment within the Release cycle. • Issues with required reports as they are delivered by the system, will be managed under the incident response and resolution SLA.	1% The SLA is defined by the aggregate compliance of Reporting SLA Metrics/ Components. If one metric in this category is not met than the category is deemed by ADCRR as not compliant. The full 1% Withholding percentage will be incurred by the Offeror

Charles,

Thank you for your kind words. I appreciate everyone's hard work on this project. Mrs. Greene will communicate with you directly regarding EUIL.

As a side, I am extremely troubled by Project Management hours identified by BNDNA in the estimate provided. At this point in this project I'm uncertain as to what BNDNA believes there is to manage that will require such excessive hours.

Additionally, some PM hours are in excess of the actual total development and testing time.

This makes zero sense to me; a conversation for Dean and I, but I want the position of ADCRR regarding these excessive hours memorialized herein.

Joe

DOUGLAS A. DUCEY
GOVERNOR

DAVID SHINN
DIRECTOR

Dear Dean Allen,

I have met with my IT and Operations staff to review the estimates that your team provided. We are approving five of the estimates to begin work this month.

Please see the table below for details:

TFS ID#	PM	BA	DEV	QA	Total	What Specific Goal is Being Requested?
ACIS-28992	40	160	960	160	1,320	Request to correct the calculation of the Community Supervision End Date (CSED) for violators. Correction of this calculation will minimize errors and eliminate the need to 'manually lock' violators with the correct date. Currently it takes 30 min to 1-hr to manually lock a violator. There is a monthly average of 300 violators which need to be managed.
ACIS-40167	10	24	18	108	160	We are requesting to remove the Priority Ranking Report (PRR) section restriction rules, which are preventing lower priority inmates from being assigned to a cycle. Currently, staff have to select every inmate from the higher priority sections and save the screen, before they are able to assign an inmate from a lower section; doing this is very time-consuming. If this change is implemented, it will eliminate those tedious steps. As a reference, the Priority Ranking Report will still exist on the Priority Ranking Report Dashboard screen, when assigning inmates. This change will allow staff to assign inmates who are currently awaiting a major program in order to be released for SB1310.
ACIS-40629	10	1.5	9	7.5	28	Request to modify two label names in the Mental Health screen to more accurately reflect the true meaning of the IDs. This has no impact on reports, workflow or current procedures.
ACIS-33168	10	18	44	60	132	Request to have the Inmate Banner display the last release date and type of an inmate who is past the last release date. Currently it displays 'N/A'. This adjustment will provide accuracy when managing an inmate.
ACIS-42233	10	16	60	40	126	Request to display the earliest eligible release date in the RMS Home Plan Action queue. By adding this release date it would give staff the ability to prioritize their workload based on the earliest eligible release date. Benefits would result in: 1) Additional bed day savings and 2) More timely release of inmates. This action would eliminate each staff member having to open individual actions to determine the priority of their workflow.
	80	**219.5**	**1,091**	**375.5**	**1,766**	

If you have any questions about this list or its details, please let us know.

Sincerely,

Joseph Profiri
ADCRR Deputy Director

Severity Definitions

Category	System Status	Priority
Critical	Indicates the entire Solution is unavailable for use resulting in a critical impact on operations.	1
High	Indicates a Module is unavailable for use where the Solution is usable but is severely limited, and no workaround for that Module exists.	2
Medium	The operation of a function in the application is restricted but use of other functions is not impacted or where a requirement is not being met, but the application is otherwise usable.	3
Low	Minimal business impact. Indicates that the problem results in little impact on operations or there is reasonable circumvention of the problem. For example, misspelled words, graphical designs.	4

From: Dean Allen on behalf of Dean Allen <dean.allen@bndna.com>
To: Joseph Profiri; Rick Davis
Subject: Introduction - Rick Davis
Date: Tuesday, June 2, 2020 1:11:51 PM
Attachments: image002.png

Hi Joe,

I just wanted to make a quick introduction to Rick Davis. Rick joined B&D last year after a long and successful career as the Virginia DOC Chief Information Officer. Rick is hugely respected, by not just me, but the whole Corrections Technology field. He sits on a number of technology council boards and is one of the most knowledgeable technologists I have met. Rick can give you a more complete account of his achievements!

Rick and I wanted to make the connection to you, to offer support and guidance, there is not much in Corrections technology that Rick has not seen or done, and we feel that he could be a great help to you and ADCRR. No agenda, or cost involved here, just part of the value that we want to bring to you under the spirit of our working relationship. Think of him as a sounding board for you…

If you have time it would be good for you and Rick to connect on a call, it would be better in person, but this upside down world at the moment wont allow that!

I can join the call to, but will lean on Rick for his experience.

Just let me know if you would welcome this help…

Thanks

Dean

Charles,

I am writing to let you know that the three EUIL Bug fixes that were promoted into the UAT environment have all passed in that environment. This means we are now ready to schedule the push from UAT to PROD for Release 22. I will work with ADCRR Operations staff to determine when would be acceptable, but I plan to propose 6/2 or 6/5. If either of those dates won't work for B&D, please let me know.

To be clear, this is not a formal acceptance of the three EUIL items as indicated in Amendment 9.

Date:	Tuesday, June 2, 2020 9:38:24 AM
Attachments:	image003.png image004.png

I sent a meeting invite for right now which I realize may not work.

I was emailing you as you sent your email.

The reason we had the emergency Dev meeting was as they looked into pulling the items it became very apparent this would cause more damage and delay than good, so to speak. I was asked to get back with you all and see if we could push forward.

When I reviewed the TFS items it showed that 2 have passed.

Again, I feel this is an isolated incident. But, could really use some help here.

Subject: Re: Request to Delay Push to Prod

Charles, I feel like I must have missed a couple of emails in-between. I was going by your email you sent on Fri, May 29, 2020 at 12:19 PM, not aware of any challenges or change of direction until I learned that one of the business users was still doing UAT this morning during our PMO daily call. Situation like this definitely warrants a direct communication with ADCRR IT leadership as soon as possible.
Please set up a quick call for us to discuss this.

On Tue, Jun 2, 2020 at 9:22 AM Charles Spannagel <Charles.Spannagel@bndna.com> wrote:

> Sandy,
>
> The more we have been able to look into it the more it's going to too hard we feel to pull out and

AMERICAN OVERSIGHT

re-build the package. I really could use some help on this from ADCRR's side. Again, I accept the responsibility for how we got into this "mess".

From TFS, I can see that two of the items have passed testing and the third item is in testing with the TA. As of now, pulling the items would cause more damage than good.

We pulled together an emergency meeting yesterday to discuss our environment strategy in order to ensure this does not happen in the future.

I really think if we can handle this as a one time error it would be greatly appreciated. I know we need some give and take during this process and moving forward and I could really use some grace on this issue.

Subject: Re: Request to Delay Push to Prod

Charles, has B&D rebuilt the new package (without the three EUILs) and ready to deploy to production? Can you provide an update?

My understanding is that the new production push will not include the three EUILs, therefore, ADCRR is not performing UAT on these three. Please confirm my understanding.

On Fri, May 29, 2020 at 12:19 PM Charles Spannagel <Charles.Spannagel@bndna.com> wrote:

>
> The three items have three change sets for new code and the package was tested in its entirety. I would feel more comfortable for the new package to be put together and retested prior to the push.

AMERICAN OVERSIGHT

In the past we have delayed the push to PROD and received approval from Stacey Crabtree. Spencer can speak further to that.

Again, I apologize for the error and lack of communication.

Good morning Holly,

I am just following back up on the action items I need "sign off" or "acceptance" on.

1: The M&O Word document sent Friday @ 6:35pm I have re-attached above

2: CAP Agreement to the 115 Bugs proposed by Spencer with a start date of 4/30/2020 and an end date of 4/30/2021. Spencer's list of bugs attached.

3: Governance Methodology. I realize this is still being finalized but I think both sides are good with the foundation and can proceed forward with the scheduling of meetings.

I don't meant to be a pain in the neck. I just have to report back to leadership on my side. Thank you.

MAINTENANCE AND OPERATION AGREEMENT

Overview

This document represents the Service Level Agreement ("SLA") for the maintenance and operation of the Mi-Case offender case management software (the "Software") for the Arizona Department of Corrections, Rehabilitation & Reentry ("ADCRR") and Business & Decision, North America (PA), Inc. ("B&D").

Under the terms of this SLA, maintenance and operation services shall be available on-call 12-hours per day, 7-days per week, with an agreed response time from the receipt of each request.

ADCRR Information Technology (IT) is responsible for first-line and second-line support. ADCRR IT support will attempt to resolve any non-product related issue prior to raising a third-line support ticket to B&D. ADCRR shall be responsible for specific problem determination and resolution for those items and issues that are not included within the Mi-Case Application. The Mi-Case Application consists of the Mi-Case Interface Server, Mi-Case AWS Environment and the Mi-Case Telerik Server.

The role of **first-line support** incident management is to attempt to collect as much information and diagnostics about the incident as possible. First-line may even resolve the issue when possible. This will reduce resolution time for all minor incidents (e.g. 'My computer doesn't work'; OR, 'My password needs to be reset').

The role of **second-line support** of incident management is comprised of staff to rule out end user training needs and end user errors (e.g. 'How do I upload a document'; OR, 'I cannot locate a specific report').

If first and/or second-line support cannot resolve the issue, ADCRR IT support personnel will raise a **third-line** support ticket with B&D. See Appendix 3 for reference to B&D key resources.

If a third-line support ticket is determined to be a software defect, B&D agrees to provide a resolution within the time-period set forth in Exhibit G In the event that a software defect results in general service interruption of the Software or in essential elements of the Software, B&D agrees to provide resolution within the soonest possible time frame.

The third-line support ticket procedure defined below shall be followed.

1 Third-line Support Ticket Procedure

1.1. In the event ADCRR IT support is unable to resolve the problem with the Software, the representative will submit a third-line support ticket with the B&D Customer Service Helpdesk ("B&D-CSH"). To raise a support ticket with B&D-CSH, ADCRR IT support shall follow the following procedure:

1.2. Contact the B&D-CSH by telephone, mail or entering a support ticket within the B&D-CSH online Service Desk (SD) (as set forth in Section 2), and provide the following information:

AMERICAN OVERSIGHT

1.2.1. Contact details (contact name, location, telephone number)

1.2.2. The name of the module in which the problem or failure arose or occurred in the software

1.2.3. Any unique reference number used by ADCRR's internal IT Service Desk (if applicable)

1.2.4. All problem details including: date/time of problem, content of any error message (if applicable), its opinion of the support ticket priority, the nature of problem, any precursors to problem, whether the problem may be easily replicated, and any other associated and/or relevant information such as screen dumps (screen shots), reports and data files.

1.3 ADCRR shall be responsible for ensuring that support tickets are raised only by those individuals designated to do so.

1.4 Upon receipt of the support ticket, it will be categorized according to the priority levels set forth in Exhibit G. B&D will at, all times, use its best efforts to respond to support tickets as quickly as possible in accordance with the target response and resolution times set out in Exhibit G.

1.5 The process flow of a support ticket will follow the agreed process flow as detailed in Appendix 5.

1.6 As part of the B&D-CSH, the B&D Issue Response Team ("IRT") will inform ADCRR IT if a site visit is required to resolve a support ticket.

1.7 When a support ticket is passed to the B&D IRT, the IRT member appointed to resolve the support ticket shall determine whether the resolution of the problem requires application software or data to be repaired. If repairs are required, then the IRT member may require and request further information from ADCRR to resolve the problem. Any time that is associated with the collection, definition or confirmation of further information will be excluded from the target response times set out in Exhibit G. Once the IRT member has determined what is likely to be required to resolve the problem, they will inform the ADCRR IT Service Desk of the current state of the support ticket. Once a resolution path has been determined then the IRT member will inform the ADCRR IT Service Desk personnel and close the support ticket in line with the support ticket closure flow Appendix 5. In the event that a response cannot be provided within the target response times set out in Exhibit G the support ticket shall be escalated in accordance with the Escalation Procedure defined in section 4.

1.8 If a resolution of a support ticket is likely to result in a material impact on the Software or its related products, the IRT member will seek authorization from the ADCRR IT prior to carrying out any action that is likely to have such impact. If the support ticket is a change request (as defined in section 3) the IRT member will carry out an impact analysis detailing the nature and cost of the change. No changes will be made without prior written authorization from ADCRR. The IRT member will inform the ADCRR IT Service Desk personnel and close the support ticket in line with the support ticket closure flow Appendix 5

1.9 Should the investigation of a support ticket by the IRT indicate that the problem resulted from an addition to or modification of the Software or its related products by ADCRR, the IRT member will inform ADCRR at the earliest opportunity indicating that any work to be carried out can be conducted on a chargeable basis in line with the time and materials rate card as Appendix 6 for the implementation of the change. In order to progress on any such works

AMERICAN OVERSIGHT

thereafter, B&D would require a written agreement and authorization from ADCRR IT leadership to correct problems not covered by this SLA. The IRT member will inform ADCRR IT personnel and close the support ticket in line with the support ticket closure flow Appendix 5.

1.10 If ADCRR disagrees with the IRT's findings, a report of the findings from both the IRT staff and the ADCRR IT Service Desk will be provided to the named Support Delivery Manager for B&D for assessment and resolution. If after 5 business days (or a time period mutually agreed upon) there is no resolution on the IRT's disagreement, the executive representatives for both the ADCRR and B&D will negotiate the same findings for ultimate resolution.

1.11 Support tickets will be closed by mutual agreement between ADCRR IT Service Desk and the IRT member on the occurrence of any of the following:

1.11.1. ADCRR and the IRT members agree that the perceived problem was due to the operator's misunderstanding of the Software specification, or equivalent documentation, and as such, no fix is required.

1.11.2. ADCRR agrees that the Software is operating in line with the specifications.

1.11.3. Non-recurrence of an incident, or intermittent fault, which cannot be reproduced, despite repeated efforts to do so, within a set period of 5 days. This period of non-recurrence can be mutually adjusted if conditions warrant a longer or shorter time range. In the above case, the support ticket will not be included in any resolution targets.

1.11.4. The IRT member has concluded that the issue is related to system defect and a system defect has been created within the defect management tool.

1.11.5. The IRT member has concluded that the issue is related to data defect and a data defect has been created within the defect management tool.

1.11.6. The IRT member has notified the ADCRR IT Service Desk that there is a previously known defect that is already entered in the defect tracking system.

1.11.7. The IRT member has requested further clarification or information relating to the support ticket and ADCRR has failed to provide further clarification or information within 5 business days of the support ticket being opened and following at least 1 email reminder after the support ticket being opened.

1.11.8. Following the IRT member deploying an immediate 'hot' fix to the UAT environment and ADCRR failing to test the appropriate target resolution time detailed in Exhibit G.

1.12 A standardized monthly '**support ticket report**' of all support tickets will be provided by the B&D-CSH to the ADCRR IT leadership team.

The monthly support ticket report will:

1.12.1. Show all active support tickets (for the entire time-period of the report).

1.12.2. Show all support tickets opened and closed during the entire time-period of the report including each target response and target resolution times.

1.12.3. The support ticket report will show the status (such as "in development", "under investigation" or "under review by the Customer") for each support ticket and any other comments or pertinent information about that support ticket for all reported support tickets.

AMERICAN OVERSIGHT

1.13 The date for future monthly meetings (or other mutually agreed upon timeframe) between the ADCRR IT leadership and the B&D will be set at the conclusion of the current months standing meeting.

2 Methods of Contacting B&D

ADCRR may contact B&D-CSH by using any of the following means:

2.1 By entering a support ticket in the online B&D-CSH Service Desk at: http://servicedesk.bndna.com and following the ADCRR IT Service Desk Guide detailed in Appendix 2.

2.2 By telephoning the B&D-CSH on *1(833) 564 2273* or such other telephone number provided by B&D to the ADCRR with two-week notification (or other mutually agreed upon timeframe). Phone calls may be backed up by e-mails. The B&D-CSH will log the call and pass this information on to an appropriate IRT member. The ADCRR IT Service Desk personnel making the call should have available to them as much information about the problem as possible, and as a minimum, the information requirements set out in section 1.2.

2.3 By sending an email to ServiceDesk@bndna.com, or such other email address provided by B&D to ADCRR with two-week notification (or other mutually agreed upon timeframe). The email will give as much detail as possible with, as a minimum, the information requirements set out in section 1.2. Email contact is suitable for any requirement; however the target response times will commence the time of receipt of the communication. All emails for priority 1 (critical) and 2 (high) items should be immediately followed by a telephone call to B&D-CSH.

3 Change Requests / Variations to Service

3.1 ADCRR IT leadership or other designated personnel shall be entitled at any time during the term of this agreement to request in writing to B&D a change request or variation to the services already provided. ADCRR shall provide B&D with full particulars of any requested change or variation and such additional information as B&D shall reasonably require.

3.2 All change requests shall be requested formally by ADCRR IT leadership or other designated personnel.

3.3 Following receipt of a change request or variation to the services pursuant to section 3.1 above, B&D will respond within five (5) business days and shall inform ADCRR IT leadership or other designated personnel in writing whether it considers such change request or variation to the services to be technically feasible. If so, any amendment or variation to the changes and /or services that it would make as a result of such request, a formal estimate of effort (EOE) will be provided by B&D to ADCRR IT leadership or other designated personnel.

3.4 As part of the EOE, B&D will notify ADCRR IT leadership or other designated personnel of the number of hours required to implement the change request.

3.5 ADCRR shall notify B&D within five (5) business days of receipt of the EOE referred to in section 3.3 above if it wishes to proceed with the change request or variation to the services as provided by B&D. ADCRR IT leadership will, as part of this notification to proceed (NTP), identify whether the pre-arranged 10,000 hours of change effort is to be utilized as part of the implementation of the change. In the event that the 10,000 hours of change effort is not to be used for the implementation of the change, ADCRR will provide B&D with an

AMERICAN OVERSIGHT

appropriate purchase order for the effort, in line with the time and materials rate card as noted in Appendix 6 for the implementation of the change.

3.6 If ADCRR identifies further changes to the original change request discussed in 3.1 then the process will revert back to section 3.1 above. Failure by ADCRR to notify B&D within the five (5) business day period shall be deemed to constitute the ADCRRs non-acceptance of the proposal.

3.7 Upon receipt of the NTP by ADCRR IT, B&D will plan the development and identify a projected start date and estimated completion date.

3.8 Upon approval of the development plan by ADCRR IT, B&D will commence work on the change request in line with the development plan.

3.9 During working on the change request B&D will track actual hours against the estimate and report progress weekly to ADCRR IT leadership with an appropriate email. B&D can never bill ADCRR for unapproved hours or other undocumented work.

3.10 The IRT shall be responsible for carrying out any Software change requests agreed between B&D and ADCRR under the terms of this Agreement, and for reporting to ADCRR.

3.11 If the change request appears that it will not complete on the planned EOE completion date or if the amount of effort required to finish the change request will exceed 10% over the EOE, B&D will notify ADCRR IT leadership and stop working on the change.

3.11.1 ADCRR will need to then take one of the following actions:

3.11.1.1 Formally ask B&D to proceed to completion of the change request – setting new target thresholds (end date or increase to EOE)

3.11.1.2 Formally ask B&D to re-estimate the change request (step 3.1)

3.11.1.3 Formally ask B&D to drop the change request, perhaps identifying a new change request with altered requirements. The expectation is that all effort expended up to this point will be deducted from the 10,000 hours of change effort.

3.11.2 Upon an updated NTP B&D will commence work on the change request (delays between stopping work and restarting will be reflected in a revised plan for the change request)

3.12 A change request from ADCRR to B&D should include the information detailed in the most current approved change request form.

3.13 Upon the completion of the software development lifecycle of the change request, B&D will formally request the approval to promote the change request to the User Acceptance Testing (UAT) environment.

3.13.3 ADCRR will then test the change request

3.13.3.1 Any support that B&D provides during UAT testing will be billed against the change request while working within the parameters defined in section 3.11.

3.13.3.2 Any bugs identified (during UAT) and subsequently worked on by B&D (during UAT) will be billed against the change request while working within the parameters defined in section 3.11.

3.13.3.3 Any changes made by ADCRR to the requirements or expectations of the change request will need to be done formally in writing and will trigger the process detailed in 3.1

AMERICAN OVERSIGHT

3.14 Following approval to promote the change request to the UAT environment, B&D will formally notify ADCRR IT that the change has been successfully deployed and is ready for the ADCRR UAT process.

3.15 Upon the completion and formal approval provided by ADCRR IT that the change has passed their UAT process, a formal request to B&D will be made to promote the change to production.

3.16 Formal acceptance of the change and all deductions of the 10,000 hours of change effort consumed for the change will be final and any outstanding monies due for the change shall be invoiced and paid for by ADCRR when the change is either promoted to production or 30 business days after the change has been delivered to the UAT environment and accepted by ADCRR.

3.17 A standardized weekly report by email of all change requests will be provided by the B&D-CSH to the ADCRR IT leadership team. This report will show no less than:

3.17.4 All open change requests (for the entire time-period of the report).

3.17.5 All change requests closed during the entire time-period of the report.

3.17.6 The status (such as “in development”, “under investigation” or “waiting for CMRB”) for all open Change Requests.

4 Escalation Procedures

Any matter escalated under the Agreement shall have two stages:

4.1 Stage 1

If the support ticket has not been resolved within the appropriate Target Resolution Time or the support ticket does not meet an exception as shown in Appendix 3, the IRT member(s) tasked with the issue will inform the B&D-CSH of the reason for failure to reach resolution and his/her best analysis of the resources and time-scales required to resolve the problem. The B&D-CSH will then refer the matter to B&D's Customer Service Manager, who will determine any additional or alternate resources necessary and ensure they are applied to the issue and inform ADCRR IT leadership of the escalation. The B&D-CSH will inform ADCRR IT leadership of the issue's escalation, and the appropriate Manager of B&D shall be informed of the Stage 1 escalation.

4.2 Stage 2

4.2.1 If the support ticket has not been resolved within a time period equal to double that specified as the Target Resolution Time for the relevant priority level, or the support ticket does not meet an exception as shown in Appendix 3, the B&D Manager shall inform the relevant Director of B&D if the issue is not likely to be resolved by the next escalation time limit.

4.2.2 The Director of B&D and ADCRR IT leadership will mutually determine an appropriate course of action and whether to allocate additional or alternate resources, including outside agencies if appropriate. ADCRR will be kept informed of the status of the escalated issue, and the B&D Customer Service Manager will inform the originating ADCRR IT leadership or other designated personnel of the Stage 2 escalation.

4.3 B&D Management

AMERICAN OVERSIGHT

A list of the B&D Directors, Managers will be provided to the ADCRR IT leadership upon initiation of this contract as Appendix 3 and this list will be updated whenever a change is made to the B&D Management.

Appendix 1 - THE SERVICES

The Software is used agency wide (ADCRR only). This is an ADCRR agency wide solution which is utilized in all complexes and facilities.

The Services: The Services shall include the following:

1. Support in event of notification of system problems as specified in this contract
2. Evaluation of support tickets
3. Determining the extent of any change required to deal with a support ticket
4. Progression, documentation and resolution of all support tickets
5. Impact analysis of requests for changes to the product
6. Progression of approved change requests
7. Provision, upon request, of timely reports both written (as described in Section 1.13), and verbal (as requested by ADCRR) detailing the progress of support tickets
8. Remote installation of application software upgrades
9. On-site installation of application software upgrades as mutually agreed upon by B&D and ADCRR
10. Agreement of acceptance criteria testing for software upgrades
11. Holding master development copies (by B&D and in escrow) of any software included in the products and all associated documentation as produced by B&D
12. Assuring ADCRR has latest copies of all software included in the project and associated documentation
13. Maintenance of relevant documentation where applicable

Good afternoon,

I made the appropriate updates and left a couple of comments for the ADCRR team to look at and address. Please let me know if there are any questions. Thank you for a great and collaborative meeting today.

Charles Spannagel

AMERICAN OVERSIGHT

MAY 2020

DRAFT M&O GOVERNANCE PROCESS

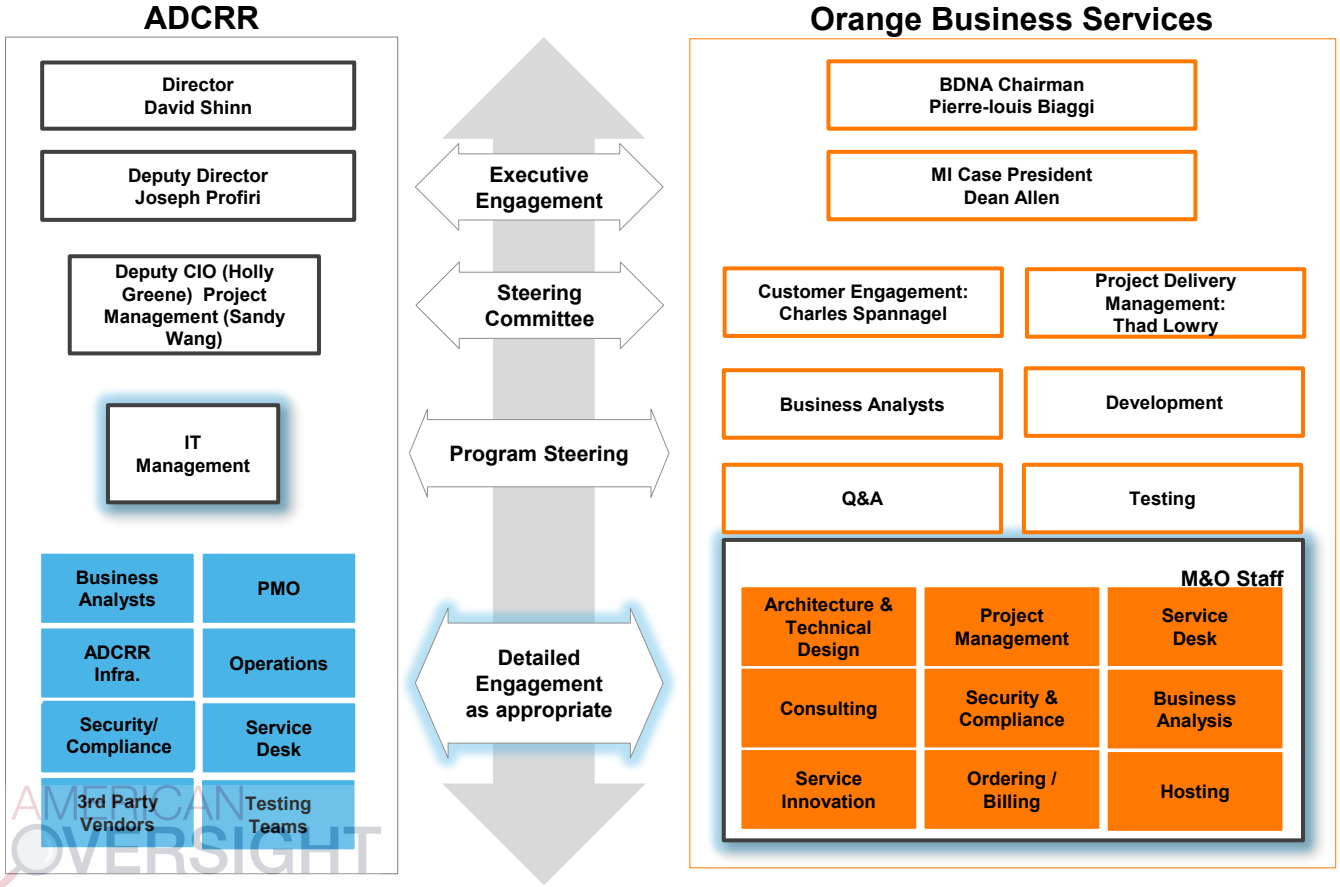
ADCRR & BUSINESS AND DECISION

Arizona Department of Corrections Rehabilitation & Reentry

Business & Decision
Empowering Digital Business

AMERICAN OVERSIGHT

BDNA engagement method



Partnership principles:

- **High touch executive engagement** – Strategic decisions & arbitrations in coordination with ADCRR executives
- **Customer engagement**– throughout the life cycle of M&O, the BDNA customer engagement manager will own the commercial relationship and support customer business and IT strategy
- **Project management** – The project management organization will deliver maintenance as well as new developments of the solution

The engagement is driven by a customer centric philosophy, guided by the customer's business needs.

AMERICAN OVERSIGHT

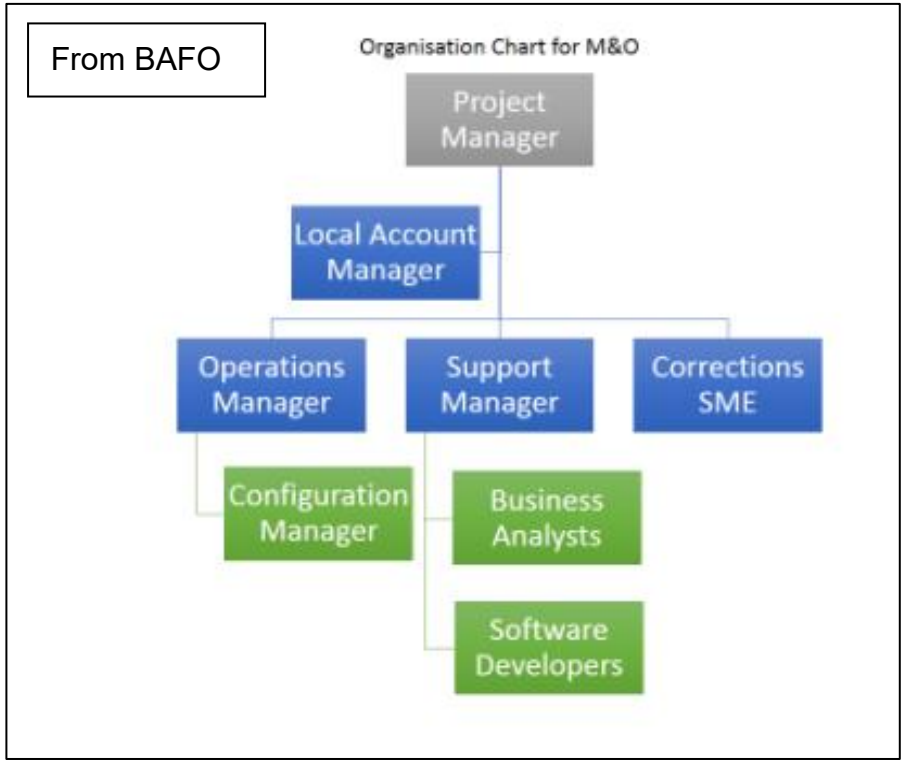
BDNA Client Business Unit

The Client Business Unit is organized to deliver:

- Maintenance of the solution (Bugs fixing), through a dedicated staff and capacity
- Development of new functionalities as part of the 10k hours envelope dedicated to it

From 05/01/2020 to 05/01/2021, This team will be supplemented by additional staff in order to deliver the additional remediation hours (10k hours) agreed in the last Amendment to the contract

From BAFO



AMERICAN OVERSIGHT

Customer Engagement Manager – Local Account Manager

CEM

The Customer Engagement Manager ensures accountability of the execution of the contract and steers a proactive partnership with ADCRR

- Coordinate a cross functional team in order to develop a partnership with the ADCRR with full accountability to achieve commitments in contractual agreement and delivering satisfaction and value to the ADCRR.
- Implement full contract customer facing governance incl. appropriate governance boards, steerco's, escalation path and contractual change management.
- Bring BDNA delivery team together into a coherent entity fine-tuned to interact with the ADCRR organization in an optimal and minimum impacting way.
- Significantly reduce the level of effort which ADCRR has to invest to ensure the desired contractual benefits are achieved.

AMERICAN OVERSIGHT

Project Delivery Manager – Charles Spannagel

PDM

The Project Delivery Manager is accountable to provide day-to-day coordinated delivery of agreed contractual solutions and services for ADCRR; has overall responsibility for the quality of service and customer satisfaction for all implemented BDNA services; with a view to optimizing workforce utilization

- Proactively identify and scope opportunities for service enhancement providing ADCRR's experience improvement and greater value generation; spread innovation for optimization and leverage of new or improved processes.
- Prepare and publish Program Plan (including Program Structure / Roadmap / Governance Matrix) of customer Service Strategy; ensure all stakeholders agree and understand roles and responsibilities
- Identify and mitigate risks (failure or delay); ensure appropriate levels of business contingency / continuity are in place.
- Implement full contract customer facing governance, incl. appropriate governance boards and steerco's, for escalation path and contractual change management
- Ensure full compliance of agreed solutions and services to meet customer needs; proactive monitoring of agreed SLAs in order to deliver exceptional service and acknowledged customer value.

Outputs / Objectives	- Minutes and updated actions list - Maintain Governance for effective and continuous improvement program - Executive summary	
Frequency	Scheduled as calendars permit	

AMERICAN OVERSIGHT

Governance

Weekly Change Management Release Schedule (DRAFT)

Members	**ADCRR**	
	BDNA	Charles Spannagel, Thad Lowry, Chris Masson
Agenda	- Release roadmap - Separate meetings to discuss EUIL items and Bug statuses - Outstanding defects/bugs in the system - CAP completion - Any issue requiring escalation - Roundtable discussion with ADCRR	
Inputs	- Actions list from previous meetings - Minutes from weekly design review	
Outputs / Objectives	- Minutes and updated actions list	
Frequency	Bi-weekly	

AMERICAN OVERSIGHT

Governance

Monthly operational and implementation review session (DRAFT)

Members	**ADCRR**	
	BDNA	Charles Spanagel, Thad Lowry, Aaron Pratt, Chris Masson (optional Dean Allen)
Agenda	- Update on actions from previous session - Steering committee (executive invited) review - SLA performance - End user satisfaction report - Continuous improvement initiatives and achievements	
Inputs	Actions list from previous meetings - Service management monthly report - SLA report - M&O Hours and EUIL delivery completion report	
Outputs / Objectives	- Minutes and updated actions list - Mutual agreement on monthly performance	
Frequency	Monthly – Held last Thursday of each month	

AMERICAN OVERSIGHT

Governance

Weekly Status Meeting with ADCRR IT PMO and Operational Leaders (DRAFT)

Members	**ADCRR**	
	BDNA	Charles Spannagel
Agenda	- Input from ADCRR operations on new items requests - End user satisfaction measurement	
Inputs	- Action list from previous meeting - New list of items - Satisfaction measurement	
Outputs / Objectives	- Minutes and updated actions list - New list of items	
Frequency	Weekly – Held every Friday or Monday am (TBD)	

AMERICAN OVERSIGHT

Governance

M&O Manager and ADCRR IT Leadership Weekly Status Meeting (DRAFT)

Members	**ADCRR**	
	BDNA	Charles Spannagel
Agenda	- Review previous week items progression - Identify new items - Review service desk performance - Roundtable discussion	
Inputs	- Action list from previous meeting - Service Desk SLA review	
Outputs / Objectives	- Minutes and updated actions list - New items list	
Frequency	Weekly – Held every Friday	

AMERICAN OVERSIGHT

Initial Governance Timeline

- **July 2020**
  - 7/3/2020 – ADCRR IT and M&O Manager Weekly Status Report Meeting
  - **7/8/2020 – ADCRR and B&D Monthly Status Meeting**
  - 7/17/2020 – ADCRR IT and M&O Manager Weekly Status Meeting
  - 7/24/2020 – ADCRR IT and M&O Manager Weekly Status Meeting
  - 7/31/2020 – ADCRR IT and M&O Manager Weekly Status Meeting
- **August 2020**
  - **8/7/2020 – ADCRR and B&D Monthly Status Meeting**
  - 8/14/2020 – ADCRR IT and M&O Manager Weekly Status Meeting
  - 8/21/2020 – ADCRR IT and M&O Manager Weekly Status Meeting
  - 8/28/2020 – ADCRR IT and M&O Manager Weekly Status Meeting

List of workstreams

- Parking lot – Exhibit 2 items – Capped at 1000 hours
- EUIL – capped at 9000 hours: Focused on Improved End-user experience
- M&O (10,000) Development hours: Focused on new Functionalities implementation
- Maintenance: Bugs fixing, following prioritization by ADCRR
  - CAP: All of the remaining bugs (115) at the time of M&O 4/30/2020
  - SLAs: As per agreed SLA setup
  - Service desk: Effective as of June 5th , 2020
- Measurement of Success: To be agreed with ADCRR

AMERICAN OVERSIGHT

Principles of Effort Estimate, Validation & Approval

- For M&O development hours prior to May 18th: Validation requested by ADCRR management
- M&O development hours:
  - As per ADCRR requests for development – list of items to be submitted by ADCRR
  - BDNA evaluation of Level of Efforts (LoEs)
  - ADCRR sign off on LoEs
  - BDNA commits on LoEs cap for delivery
  - Validation of Delivery as per amendment process terms (Testing ok / 30 days)
- EUIL:
  - Parking lot Exhibit 2 items to be delivered consuming no more than 1000 hours
  - BDNA evaluation of Level of Efforts (LoEs)
  - ACRR sign off on LoEs (9,000)
  - BDNA commits on LoEs cap for delivery
  - Validation of Delivery as per amendment process terms (Testing ok / 30 days)
  - **Measurement of success to evaluate positive impact of EUIL items onto end user satisfaction**

Amendment process

- 1st Business Day – M&O Monthly Report submitted by B&D
- 5th Business Day - Monthly M&O Status Meeting
- 10th Business Day (or prior) – ADCRR and B&D present a list of proposed EUIL items
- 15th Business Day (or prior) – B&D to provide estimate for proposed EUIL items, B&D to provide forecast of available FTE's
- 20th Business Day (or prior) – ADCRR selects items for the upcoming month

AMERICAN OVERSIGHT

SLAs

- **Service Level Agreement (SLA)**
  - Agreed to terms on May 15th , 2020
  - Utilizing multiple technologies and metrics to ensure SLA compliance
    - 3rd Party Systems that monitor System Response, System Availability, User Response
    - ServiceDesk Reports that monitor
      - Incident Response and Resolution Times
    - Additional Monthly Reports to be included in the M&O Monthly Status Meeting
      - Maintenance/Updates/Upgrades, Data Integrity and Destruction, Security, User Support and Contractor Staffing
  - B&D Weekly SLA Compliance and Risk Assessment Meeting to review all metrics
  - **Sign Off Needed**

AMERICAN OVERSIGHT

CAP

- The Corrective Action Plan consist of all medium and low bugs still active as of M&O start (4/30/2020)

- Bug list attached from ADCRR IT

AMERICAN OVERSIGHT

Service desk

- **B&D Service Desk Implementation**
  - Scheduled to Go Live on 6/5/2020
  - B&D Internal Training on 5/21/2020
  - ADCRR Training the week of 6/1/2020
  - B&D Service Desk staffed Monday through Sunday 6am – 6pm
    - On call after hours support as negotiated with ADCRR
    - After hour technical support will be provided under a Time and Material basis

AMERICAN OVERSIGHT

Measurement of Satisfaction

- **Measure Current Sentiment**
  - Workstream with key ADCRR IT Staff and ADCRR Operational Users
  - Brainstorm different methodologies for End User satisfaction analysis
    - Online Surveys
    - Site Visits - Quarterly Site Visits to gauge user satisfaction (Initially every other month) possible August, most likely September
    - Focus Groups
    - Training Evaluation
    - Identified System Enhancements/Initiatives
- **Setup Ongoing Satisfaction Measurement**
  - Provided by monthly/quarterly survey scales measuring trends in adoption, ease of system use and overall feeling of the system
- **Set Targets and Expectations**
  - To be determined by initial survey findings with a work group consisting of ADCRR IT Leadership, ADCRR Operational Leadership and B&D Leadership setting future targets and expectations

Subject: CR 42463 Estimate

Charles,

Can you please mention to ADC that what is shown below is not included in the estimate and find out if we are supposed to be making changes to the other modules listed. There were no requirements or expected results for these items. If they are expecting these to be updated the estimate will increase significantly.

1. **Please identify any additional ACIS modules which may be potentially affected by this change request:**

   Classification, Do Not House With, Intake, Protective Custody, Transportation, and Cell Screening.

Thank you,

Cindy Hyser-Crauwels

Governance

Bi-Weekly Change Management Release Schedule (DRAFT)

Members	**ADCRR**	
	BDNA	Charles Spannagel, Thad Lowry, Chris Masson
Agenda	- Release roadmap - Outstanding defects/bugs in the system - CAP completion - Any issue requiring escalation - Roundtable discussion with ADCRR	
Inputs	- Actions list from previous meetings - Minutes from weekly design review	
Outputs / Objectives	- Minutes and updated actions list	
Frequency	Bi-weekly	

AMERICAN OVERSIGHT

Governance

Monthly operational and implementation review session (DRAFT)

Members	**ADCRR**	
	BDNA	Charles Spanagel, Thad Lowry, Aaron Pratt, Chris Masson (optional Dean Allen)
Agenda	- Update on actions from previous session - Steering committee (executive invited) review - SLA performance - End user satisfaction report - Continuous improvement initiatives and achievements	
Inputs	Actions list from previous meetings - Service management monthly report - SLA report - M&O Hours and EUIL delivery completion report	
Outputs / Objectives	- Minutes and updated actions list - Mutual agreement on monthly performance	
Frequency	Monthly – Held last Thursday of each month	

AMERICAN OVERSIGHT

Governance

Weekly Status Meeting with ADCRR IT PMO and Operational Leaders (DRAFT)

Members	**ADCRR**	
	BDNA	Charles Spannagel
Agenda	- Input from ADCRR operations on new items requests - End user satisfaction measurement	
Inputs	- Action list from previous meeting - New list of items - Satisfaction measurement	
Outputs / Objectives	- Minutes and updated actions list - New list of items	
Frequency	Weekly – Held every Friday or Monday am (TBD)	

AMERICAN OVERSIGHT

Governance

M&O Manager and ADCRR IT Leadership Weekly Status Meeting (DRAFT)

Members	**ADCRR**	
	BDNA	Charles Spannagel
Agenda	- Review previous week items progression - Identify new items - Review service desk performance - Roundtable discussion	
Inputs	- Action list from previous meeting - Serviced desk SLA view	
Outputs / Objectives	- Minutes and updated actions list - New items list	
Frequency	Weekly – Held every Thursday	

AMERICAN OVERSIGHT

AZ-DOC-21-0315-A-002124

Initial Governance Timeline

- **June 2020**
  - **6/5/2020 – ADCRR and B&D Monthly Status Meeting**
    - 6/11/2020 – ADCRR IT and M&O Manager Weekly Status Meeting
    - 6/18/2020 – ADCRR IT and M&O Manager Weekly Status Meeting
    - 6/25/2020 – ADCRR IT and M&O Manager Weekly Status Meeting
- **July 2020**
  - 7/2/2020 – ADCRR IT and M&O Manager Weekly Status Report Meeting
  - **7/7/2020 – ADCRR and B&D Monthly Status Meeting**
    - 7/16/2020 – ADCRR IT and M&O Manager Weekly Status Meeting
    - 7/23/2020 – ADCRR IT and M&O Manager Weekly Status Meeting
    - Meeting
    - 7/30/2020 – ADCRR IT and M&O Manager Weekly Status Meeting

AMERICAN OVERSIGHT

Business & Decision

List of workstreams

- Parking lot – Exhibit 2 items – Capped at 1000 hours
- EUIL – capped at 9000 hours: Focused on Improved End-user experience
- M&O (10,000) Development hours: Focused on new Functionalities implementation
- Maintenance: Bugs fixing, following prioritization by ADCRR
  - CAP: All remaining Medium & Low Bugs at the time of M&O start
  - SLAs: As per agreed SLA setup
  - Service desk: Effective as of June 5th , 2020
- Measurement of Success: To be agreed with ADCRR

AMERICAN OVERSIGHT

Principles of Effort Estimate, Validation & Approval

- For M&O development hours prior to May 18th: Validation requested by ADCRR management
- M&O development hours:
  - As per ADCRR requests for development – list of items to be submitted by ADCRR
  - BDNA evaluation of Level of Efforts (LoEs)
  - ADCRR sign off on LoEs
  - BDNA commits on LoEs cap for delivery
  - Validation of Delivery as per amendment process terms (Testing ok / 30 days)
- EUIL:
  - Parking lot Exhibit 2 items to be delivered consuming no more than 1000 hours
  - BDNA evaluation of Level of Efforts (LoEs)
  - ACRR sign off on LoEs (9,000)
  - BDNA commits on LoEs cap for delivery
  - Validation of Delivery as per amendment process terms (Testing ok / 30 days)
  - **Measurement of success to evaluate positive impact of EUIL items onto end user satisfaction**

Amendment process

- 1st Business Day – M&O Monthly Report submitted by B&D
- 5th Business Day - Monthly M&O Status Meeting
- 10th Business Day (or prior) – ADCRR and B&D present a list of proposed EUIL items
- 15th Business Day (or prior) – B&D to provide estimate for proposed EUIL items, B&D to provide forecast of available FTE's
- 20th Business Day (or prior) – ADCRR selects items for the upcoming month

AMERICAN OVERSIGHT

SLAs

- **Service Level Agreement (SLA)**
  - Agreed to terms on May 15th , 2020
  - Utilizing multiple technologies and metrics to ensure SLA compliance
    - 3rd Party Systems that monitor System Response, System Availability, User Response
    - ServiceDesk Reports that monitor
      - Incident Response and Resolution Times
    - Additional Monthly Reports to be included in the M&O Monthly Status Meeting
      - Maintenance/Updates/Upgrades, Data Integrity and Destruction, Security, User Support and Contractor Staffing
  - B&D Weekly SLA Compliance and Risk Assessment Meeting to review all metrics
  - **Sign Off Needed**

AMERICAN OVERSIGHT

CAP

- The Corrective Action Plan consist of all medium and low bugs still active as of M&O start (Feb. 21st)

- Listed in attached document.

AMERICAN OVERSIGHT

Service desk

- **B&D Service Desk Implementation**
  - Scheduled to Go Live on 6/5/2020
  - B&D Internal Training on 5/21/2020
  - ADCRR Training the week of 6/1/2020
  - B&D Service Desk staffed Monday through Sunday 6am – 6pm
    - On call after hours support as negotiated with ADCRR
    - After hour technical support will be provided under a Time and Material basis

AMERICAN OVERSIGHT

Measurement of Satisfaction

- **Measure Current Sentiment**
  - Workstream with key ADCRR IT Staff and ADCRR Operational Users
  - Brainstorm different methodologies for End User satisfaction analysis
    - Online Surveys
    - Site Visits - Quarterly Site Visits to gauge user satisfaction?
    - Super User Panel
    - Training Evaluation
    - Product Board…
- **Setup Ongoing Satisfaction Measurement**
- **Set Targets and Expectations**

Charles,

Holly approves, so please let me know when we can schedule this call. Just FYI, I've been testing RPTDEV this morning and still experiencing the same intermittent issues.

Thanks.

>
> I assume you're referring to RPT 3520? As I mentioned previously, these issues are happening with multiple reports, so I can't see changing a formatting setting in one report fixing issues with other, unrelated reports.
>
> If you'd like me to do a screen sharing session and reproduce these problems for you, we can definitely do that. You may be right that it's not a system/resource issue, but the solution you've provided doesn't seem related to what's happening and further investigation is needed, as this is greatly hindering ad hoc report development at the moment.

Cc:	Rusty Johnson; Joseph Nicoletti; Sandy Wang
Subject:	RE: Estimates - Specifically PM
Date:	Sunday, May 31, 2020 9:36:13 PM
Attachments:	image003.png image004.png

Holly,

I think this is a very important question to ask and I appreciate you asking it. As it pertains to B&D's SDLC best practice approach, the role of the PM, mainly me, is to:

- Provide consistency of success with regard to Time, Cost, and Quality objectives
- Ensure ADCRR expectations are met
- Provide a Governance methodology ensuring a decision framework is instituted that meets the needs of ADCRR IT and ADCRR Operations.
- Reduce Risks associated with the EUIL lifecycle
- Treat each EUIL item as an individual project

I am taking responsibility for each individual EUIL item that has been authorized by ADCRR. Project Management is critical to the success of the EUIL process. In order for us to maintain our best practice approach we need the PM directly involved and taking responsibility for B&D's output.

I hope this provides some clarity.

Thank you,

Charles Spannagel

Charles-

Just a quick question....why a PM? We're not performing project management any longer. I can understand the use of a BA, but not a PM at this stage.

Respectfully,

Holly Greene
Deputy CIO | ADCRR IT Bureau
1645 W. Jefferson St, Suite 2112 | Phoenix AZ 85007

AMERICAN OVERSIGHT

relationship with you and your team. In regards to the PM hours in the estimate we discussed (40629). Please find the explanation below.

1: 10 hours is the standard allotment for estimates unless it is a much bigger and more complex item

a. Project Plan maintenance for entire EUIL effort
b. Time tracking for team
c. Managing resources
d. Status meetings internally and externally
e. Managing issues and escalations if they arise

This methodology has been used during the duration of B&D's engagement with ADCRR.

I hope this helps in regards to this specific estimate and hopefully provides some insight into the overall estimation process. B&D accounts for every situation that may arise during the SDLC process.

I welcome any further discussion on this matter.

Thank you again.

Hi Holly,

I was able to work through the agreement with Dean and all changes and requests have been made to both Exhibit G and the M&O Word Document. There is one outstanding item for completion which is the insertion of the workflow diagram that Sandy was finishing. Dean and myself are available all weekend if there are any questions. Dean considers this finalized and is ready to sign.

Thank you again for this week. We have really come together as two teams working on the same goal. Have a nice weekend.

MAINTENANCE AND OPERATION AGREEMENT

Overview

This document represents the Service Level Agreement ("SLA") for the maintenance and operation of the Mi-Case offender case management software (the "Software") for the Arizona Department of Corrections, Rehabilitation & Reentry ("ADCRR") and Business & Decision, North America (PA), Inc. ("B&D").

Under the terms of this SLA, maintenance and operation services shall be available on-call 12-hours per day, 7-days per week, with an agreed response time from the receipt of each request.

ADCRR Information Technology (IT) is responsible for first-line and second-line support. ADCRR IT support will attempt to resolve any non-product related issue prior to raising a third-line support ticket to B&D. ADCRR shall be responsible for specific problem determination and resolution for those items and issues that are not included within the Mi-Case Application. The Mi-Case Application consists of the Mi-Case Interface Server, Mi-Case AWS Environment and the Mi-Case Telerik Server.

The role of **first-line support** incident management is to attempt to collect as much information and diagnostics about the incident as possible. First-line may even resolve the issue when possible. This will reduce resolution time for all minor incidents (e.g. 'My computer doesn't work'; OR, 'My password needs to be reset').

The role of **second-line support** of incident management is comprised of staff to rule out end user training needs and end user errors (e.g. 'How do I upload a document'; OR, 'I cannot locate a specific report').

If first and/or second-line support cannot resolve the issue, ADCRR IT support personnel will raise a **third-line** support ticket with B&D. See Appendix 3 for reference to B&D key resources.

If a third-line support ticket is determined to be a software defect, B&D agrees to provide a resolution within the time-period set forth in Exhibit G In the event that a software defect results in general service interruption of the Software or in essential elements of the Software, B&D agrees to provide resolution within the soonest possible time frame.

The third-line support ticket procedure defined below shall be followed.

1 Third-line Support Ticket Procedure

1.1. In the event ADCRR IT support is unable to resolve the problem with the Software, the representative will submit a third-line support ticket with the B&D Customer Service Helpdesk ("B&D-CSH"). To raise a support ticket with B&D-CSH, ADCRR IT support shall follow the following procedure:

1.2. Contact the B&D-CSH by telephone, mail or entering a support ticket within the B&D-CSH online Service Desk (SD) (as set forth in Section 2), and provide the following information:

AMERICAN OVERSIGHT

1.2.1. Contact details (contact name, location, telephone number)

1.2.2. The name of the module in which the problem or failure arose or occurred in the software

1.2.3. Any unique reference number used by ADCRR's internal IT Service Desk (if applicable)

1.2.4. All problem details including: date/time of problem, content of any error message (if applicable), its opinion of the support ticket priority, the nature of problem, any precursors to problem, whether the problem may be easily replicated, and any other associated and/or relevant information such as screen dumps (screen shots), reports and data files.

1.3 ADCRR shall be responsible for ensuring that support tickets are raised only by those individuals designated to do so.

1.4 Upon receipt of the support ticket, it will be categorized according to the priority levels set forth in Exhibit G. B&D will at, all times, use its best efforts to respond to support tickets as quickly as possible in accordance with the target response and resolution times set out in Exhibit G.

1.5 The process flow of a support ticket will follow the agreed process flow as detailed in Appendix 5.

1.6 As part of the B&D-CSH, the B&D Issue Response Team ("IRT") will inform ADCRR IT if a site visit is required to resolve a support ticket.

1.7 When a support ticket is passed to the B&D IRT, the IRT member appointed to resolve the support ticket shall determine whether the resolution of the problem requires application software or data to be repaired. If repairs are required, then the IRT member may require and request further information from ADCRR to resolve the problem. Any time that is associated with the collection, definition or confirmation of further information will be excluded from the target response times set out in Exhibit G. Once the IRT member has determined what is likely to be required to resolve the problem, they will inform the ADCRR IT Service Desk of the current state of the support ticket. Once a resolution path has been determined then the IRT member will inform the ADCRR IT Service Desk personnel and close the support ticket in line with the support ticket closure flow Appendix 5. In the event that a response cannot be provided within the target response times set out in Exhibit G the support ticket shall be escalated in accordance with the Escalation Procedure defined in section 4.

1.8 If a resolution of a support ticket is likely to result in a material impact on the Software or its related products, the IRT member will seek authorization from the ADCRR IT prior to carrying out any action that is likely to have such impact. If the support ticket is a change request (as defined in section 3) the IRT member will carry out an impact analysis detailing the nature and cost of the change. No changes will be made without prior written authorization from ADCRR. The IRT member will inform the ADCRR IT Service Desk personnel and close the support ticket in line with the support ticket closure flow Appendix 5

1.9 Should the investigation of a support ticket by the IRT indicate that the problem resulted from an addition to or modification of the Software or its related products by ADCRR, the IRT member will inform ADCRR at the earliest opportunity indicating that any work to be carried out can be conducted on a chargeable basis in line with the time and materials rate card as Appendix 6 for the implementation of the change. In order to progress on any such works

AMERICAN OVERSIGHT

thereafter, B&D would require a written agreement and authorization from ADCRR IT leadership to correct problems not covered by this SLA. The IRT member will inform ADCRR IT personnel and close the support ticket in line with the support ticket closure flow Appendix 5.

1.10 If ADCRR disagrees with the IRT's findings, a report of the findings from both the IRT staff and the ADCRR IT Service Desk will be provided to the named Support Delivery Manager for B&D for assessment and resolution. If after 5 business days (or a time period mutually agreed upon) there is no resolution on the IRT's disagreement, the executive representatives for both the ADCRR and B&D will negotiate the same findings for ultimate resolution.

1.11 Support tickets will be closed by mutual agreement between ADCRR IT Service Desk and the IRT member on the occurrence of any of the following:

1.11.1. ADCRR and the IRT members agree that the perceived problem was due to the operator's misunderstanding of the Software specification, or equivalent documentation, and as such, no fix is required.

1.11.2. ADCRR agrees that the Software is operating in line with the specifications.

1.11.3. Non-recurrence of an incident, or intermittent fault, which cannot be reproduced, despite repeated efforts to do so, within a set period of 5 days. This period of non-recurrence can be mutually adjusted if conditions warrant a longer or shorter time range. In the above case, the support ticket will not be included in any resolution targets.

1.11.4. The IRT member has concluded that the issue is related to system defect and a system defect has been created within the defect management tool.

1.11.5. The IRT member has concluded that the issue is related to data defect and a data defect has been created within the defect management tool.

1.11.6. The IRT member has notified the ADCRR IT Service Desk that there is a previously known defect that is already entered in the defect tracking system.

1.11.7. The IRT member has requested further clarification or information relating to the support ticket and ADCRR has failed to provide further clarification or information within 5 business days of the support ticket being opened and following at least 1 email reminder after the support ticket being opened.

1.11.8. Following the IRT member deploying an immediate 'hot' fix to the UAT environment and ADCRR failing to test the appropriate target resolution time detailed in Exhibit G.

1.12 A standardized monthly '**support ticket report**' of all support tickets will be provided by the B&D-CSH to the ADCRR IT leadership team.

The monthly support ticket report will:

1.12.1. Show all active support tickets (for the entire time-period of the report).

1.12.2. Show all support tickets opened and closed during the entire time-period of the report including each target response and target resolution times.

1.12.3. The support ticket report will show the status (such as "in development", "under investigation" or "under review by the Customer") for each support ticket and any other comments or pertinent information about that support ticket for all reported support tickets.

AMERICAN OVERSIGHT

1.13 The date for future monthly meetings (or other mutually agreed upon timeframe) between the ADCRR IT leadership and the B&D will be set at the conclusion of the current months standing meeting.

2 Methods of Contacting B&D

ADCRR may contact B&D-CSH by using any of the following means:

2.1 By entering a support ticket in the online B&D-CSH Service Desk at: http://servicedesk.bndna.com and following the ADCRR IT Service Desk Guide detailed in Appendix 2.

2.2 By telephoning the B&D-CSH on *1(833) 564 2273* or such other telephone number provided by B&D to the ADCRR with two-week notification (or other mutually agreed upon timeframe). Phone calls may be backed up by e-mails. The B&D-CSH will log the call and pass this information on to an appropriate IRT member. The ADCRR IT Service Desk personnel making the call should have available to them as much information about the problem as possible, and as a minimum, the information requirements set out in section 1.2.

2.3 By sending an email to ServiceDesk@bndna.com, or such other email address provided by B&D to ADCRR with two-week notification (or other mutually agreed upon timeframe). The email will give as much detail as possible with, as a minimum, the information requirements set out in section 1.2. Email contact is suitable for any requirement; however the target response times will commence the time of receipt of the communication. All emails for priority 1 (critical) and 2 (high) items should be immediately followed by a telephone call to B&D-CSH.

3 Change Requests / Variations to Service

3.1 ADCRR IT leadership or other designated personnel shall be entitled at any time during the term of this agreement to request in writing to B&D a change request or variation to the services already provided. ADCRR shall provide B&D with full particulars of any requested change or variation and such additional information as B&D shall reasonably require.

3.2 All change requests shall be requested formally by ADCRR IT leadership or other designated personnel.

3.3 Following receipt of a change request or variation to the services pursuant to section 3.1 above, B&D will respond within five (5) business days and shall inform ADCRR IT leadership or other designated personnel in writing whether it considers such change request or variation to the services to be technically feasible. If so, any amendment or variation to the changes and /or services that it would make as a result of such request, a formal estimate of effort (EOE) will be provided by B&D to ADCRR IT leadership or other designated personnel.

3.4 As part of the EOE, B&D will notify ADCRR IT leadership or other designated personnel of the number of hours required to implement the change request.

3.5 ADCRR shall notify B&D within five (5) business days of receipt of the EOE referred to in section 3.3 above if it wishes to proceed with the change request or variation to the services as provided by B&D. ADCRR IT leadership will, as part of this notification to proceed (NTP), identify whether the pre-arranged 10,000 hours of change effort is to be utilized as part of the implementation of the change. In the event that the 10,000 hours of change effort is not to be used for the implementation of the change, ADCRR will provide B&D with an

AMERICAN OVERSIGHT

appropriate purchase order for the effort, in line with the time and materials rate card as noted in Appendix 6 for the implementation of the change.

3.6 If ADCRR identifies further changes to the original change request discussed in 3.1 then the process will revert back to section 3.1 above. Failure by ADCRR to notify B&D within the five (5) business day period shall be deemed to constitute the ADCRRs non-acceptance of the proposal.

3.7 Upon receipt of the NTP by ADCRR IT, B&D will plan the development and identify a projected start date and estimated completion date.

3.8 Upon approval of the development plan by ADCRR IT, B&D will commence work on the change request in line with the development plan.

3.9 During working on the change request B&D will track actual hours against the estimate and report progress weekly to ADCRR IT leadership with an appropriate email. B&D can never bill ADCRR for unapproved hours or other undocumented work.

3.10 The IRT shall be responsible for carrying out any Software change requests agreed between B&D and ADCRR under the terms of this Agreement, and for reporting to ADCRR.

3.11 If the change request appears that it will not complete on the planned EOE completion date or if the amount of effort required to finish the change request will exceed 10% over the EOE, B&D will notify ADCRR IT leadership and stop working on the change.

3.11.1 ADCRR will need to then take one of the following actions:

3.11.1.1 Formally ask B&D to proceed to completion of the change request – setting new target thresholds (end date or increase to EOE)

3.11.1.2 Formally ask B&D to re-estimate the change request (step 3.1)

3.11.1.3 Formally ask B&D to drop the change request, perhaps identifying a new change request with altered requirements. The expectation is that all effort expended up to this point will be deducted from the 10,000 hours of change effort.

3.11.2 Upon an updated NTP B&D will commence work on the change request (delays between stopping work and restarting will be reflected in a revised plan for the change request)

3.12 A change request from ADCRR to B&D should include the information detailed in the most current approved change request form.

3.13 Upon the completion of the software development lifecycle of the change request, B&D will formally request the approval to promote the change request to the User Acceptance Testing (UAT) environment.

3.13.3 ADCRR will then test the change request

3.13.3.1 Any support that B&D provides during UAT testing will be billed against the change request while working within the parameters defined in section 3.11.

3.13.3.2 Any bugs identified (during UAT) and subsequently worked on by B&D (during UAT) will be billed against the change request while working within the parameters defined in section 3.11.

3.13.3.3 Any changes made by ADCRR to the requirements or expectations of the change request will need to be done formally in writing and will trigger the process detailed in 3.1

AMERICAN OVERSIGHT

3.14 Following approval to promote the change request to the UAT environment, B&D will formally notify ADCRR IT that the change has been successfully deployed and is ready for the ADCRR UAT process.

3.15 Upon the completion and formal approval provided by ADCRR IT that the change has passed their UAT process, a formal request to B&D will be made to promote the change to production.

3.16 Formal acceptance of the change and all deductions of the 10,000 hours of change effort consumed for the change will be final and any outstanding monies due for the change shall be invoiced and paid for by ADCRR when the change is either promoted to production or 30 business days after the change has been delivered to the UAT environment and accepted by ADCRR.

3.17 A standardized weekly report by email of all change requests will be provided by the B&D-CSH to the ADCRR IT leadership team. This report will show no less than:

3.17.4 All open change requests (for the entire time-period of the report).

3.17.5 All change requests closed during the entire time-period of the report.

3.17.6 The status (such as “in development”, “under investigation” or “waiting for CMRB”) for all open Change Requests.

4 Escalation Procedures

Any matter escalated under the Agreement shall have two stages:

4.1 Stage 1

If the support ticket has not been resolved within the appropriate Target Resolution Time or the support ticket does not meet an exception as shown in Appendix 3, the IRT member(s) tasked with the issue will inform the B&D-CSH of the reason for failure to reach resolution and his/her best analysis of the resources and time-scales required to resolve the problem. The B&D-CSH will then refer the matter to B&D's Customer Service Manager, who will determine any additional or alternate resources necessary and ensure they are applied to the issue and inform ADCRR IT leadership of the escalation. The B&D-CSH will inform ADCRR IT leadership of the issue's escalation, and the appropriate Manager of B&D shall be informed of the Stage 1 escalation.

4.2 Stage 2

4.2.1 If the support ticket has not been resolved within a time period equal to double that specified as the Target Resolution Time for the relevant priority level, or the support ticket does not meet an exception as shown in Appendix 3, the B&D Manager shall inform the relevant Director of B&D if the issue is not likely to be resolved by the next escalation time limit.

4.2.2 The Director of B&D and ADCRR IT leadership will mutually determine an appropriate course of action and whether to allocate additional or alternate resources, including outside agencies if appropriate. ADCRR will be kept informed of the status of the escalated issue, and the B&D Customer Service Manager will inform the originating ADCRR IT leadership or other designated personnel of the Stage 2 escalation.

4.3 B&D Management

AMERICAN OVERSIGHT

A list of the B&D Directors, Managers will be provided to the ADCRR IT leadership upon initiation of this contract as Appendix 3 and this list will be updated whenever a change is made to the B&D Management.

AMERICAN OVERSIGHT

5 SLA Key Performance Indicators and % Holdback

The key metrics shall be used in accordance with the M&O Agreement to measure B&D's performance of the M&O service. These key metrics are detailed in Appendix 4 – Exhibit G.

6. Acceptance and Signatures

IN WITNESS WHEREOF the parties hereto have executed this Maintenance and operation Agreement to be effective for the term stated herein and do hereby attest to their acceptance of the terms and conditions of this Agreement by having caused this Agreement to be executed, sealed, and delivered the day and year first written below.

Appendix 1 - THE SERVICES

The Software is used agency wide (ADCRR only). This is an ADCRR agency wide solution which is utilized in all complexes and facilities.

The Services: The Services shall include the following:

1. Support in event of notification of system problems as specified in this contract
2. Evaluation of support tickets
3. Determining the extent of any change required to deal with a support ticket
4. Progression, documentation and resolution of all support tickets
5. Impact analysis of requests for changes to the product
6. Progression of approved change requests
7. Provision, upon request, of timely reports both written (as described in Section 1.13), and verbal (as requested by ADCRR) detailing the progress of support tickets
8. Remote installation of application software upgrades
9. On-site installation of application software upgrades as mutually agreed upon by B&D and ADCRR
10. Agreement of acceptance criteria testing for software upgrades
11. Holding master development copies (by B&D and in escrow) of any software included in the products and all associated documentation as produced by B&D
12. Assuring ADCRR has latest copies of all software included in the project and associated documentation
13. Maintenance of relevant documentation where applicable

Hi Sandy,

I've replaced the screen capture in the Word document for the ticket confirmation screen after successfully entering a completed ticket. I replaced the screen capture for ticket details in both the PowerPoint and the Word document.

Let us know if you have any more feedback or suggestions.

Thank you,

--Justin

Severity Definitions

Category	System Status	Priority
Critical	Indicates the entire Solution is unavailable for use resulting in a critical impact on operations.	1
High	Indicates a Module is unavailable for use where the Solution is usable but is severely limited, and no workaround for that Module exists.	2
Medium	The operation of a function in the application is restricted but use of other functions is not impacted or where a requirement is not being met, but the application is otherwise usable.	3
Low	Minimal business impact. Indicates that the problem results in little impact on operations or there is reasonable circumvention of the problem. For example, misspelled words, graphical designs.	4

Subject: Re: Telerik RPTDEV Issues

Charles,

The link you provided there seems to be unrelated to the issues that I reported. That specifically mentions blank pages being rendered in "print preview" mode. I'm not in print preview mode, and I am not getting blank pages rendered.

I assume you're referring to RPT 3520? As I mentioned previously, these issues are happening with multiple reports, so I can't see changing a formatting setting in one report fixing issues with other, unrelated reports.

If you'd like me to do a screen sharing session and reproduce these problems for you, we can definitely do that. You may be right that it's not a system/resource issue, but the solution you've provided doesn't seem related to what's happening and further investigation is needed, as this is greatly hindering ad hoc report development at the moment.

AMERICAN OVERSIGHT

Thanks!

AMERICAN OVERSIGHT

Telerik RPTDEV seems to have having intermittent issues again, very similar to the issues from 2-3 weeks ago. I'm trying multiple reports, and sometimes they will finish in a normal timeframe, sometimes they will never load and just sit at "0 pages loaded...", or sometimes I'm getting the same "thread was being aborted" error message.

Just like before, you may not see the issue if you just go in, run one report and it looks fine. If you re-run the same report with the same parameters 2-4 times in a row you'll likely experience it.

An example you can use for testing, though it's happening with several different reports on our end, is ADC RPT 3520, with 5/1/20 and 5/31/20 as the start and end date parameters.

Thanks.

Subject: Estimates - Specifically PM
Date: Friday, May 29, 2020 11:43:13 AM
Attachments: image003.png

Holly,

First, I really want to thank you and the team for being so collaborative and understanding during these early days of M&O. I am committed to ensuring a positive and transparent relationship with you and your team. In regards to the PM hours in the estimate we discussed (40629). Please find the explanation below.

1: 10 hours is the standard allotment for estimates unless it is a much bigger and more complex item

a. Project Plan maintenance for entire EUIL effort
b. Time tracking for team
c. Managing resources
d. Status meetings internally and externally
e. Managing issues and escalations if they arise

This methodology has been used during the duration of B&D's engagement with ADCRR.

I hope this helps in regards to this specific estimate and hopefully provides some insight into the overall estimation process. B&D accounts for every situation that may arise during the SDLC process.

I welcome any further discussion on this matter.

Thank you again.

Subject: SLA Reports Clarification
Date: Friday, May 29, 2020 9:21:43 AM
Attachments: image003.png

Good morning,

There is one outstanding question that popped in regards to the Reports Section that we have added back into the SLA. On the second bullet we need to clarify that the Ad Hoc team will support any bugs that are reported from the operational staff in the field. It can be interpreted that we are supporting development and maintenance of the Ad Hoc reports once they are in production which is not how we are operating today. Please respond and I will convert the document into PDF for final review.

Holly, I think since the M&O Word Document is being updated we (you and I) need to indicate to Mr. Profiri and Dean that the SLA's have been agreed to and signed off on by the deadline and that the M&O word document will be finished and signed by early next week. Does that seem reasonable? Thank you.

HEADING	DESCRIPTION	SLA Non-Compliance Withholding %
Reporting SLA:	• For new reports, changes to existing reports or ad hoc reporting that requires a push to production, once approved by the Change Control Board (CAB), the report and associated database code will be moved to the production environment within the Release cycle. • Issues with required reports as they are delivered by the system, will be managed under the incident response and resolution SLA.	1% The SLA is defined by the aggregate compliance of Reporting SLA Metrics/ Components. If one metric in this category is not met than the category is deemed by ADCRR as not compliant. The full 1% Withholding percentage will be incurred by the Offeror

---

ADCRR,

Good morning and happy Friday!!! Please find the initial training materials for your review, feedback and suggestions. The power point will be used for training purposes and the user guide for reference. We are requesting your feedback and suggestions on these two documents. We want to ensure you that we are delivering materials that are adequate and meet your needs.

I would also like to introduce you to Justin Baker who prepared these documents and will serve as your point of contact for Service Desk related queries and suggestions. Justin is an expert with the ACIS solution and will serve as a fantastic trainer and support to your team.

I will always remain involved in all discussions and serve as an escalation point as well.

Thank you.

Severity Definitions

Category	System Status	Priority
Critical	Indicates the entire Solution is unavailable for use resulting in a critical impact on operations.	1
High	Indicates a Module is unavailable for use where the Solution is usable but is severely limited, and no workaround for that Module exists.	2
Medium	The operation of a function in the application is restricted but use of other functions is not impacted or where a requirement is not being met, but the application is otherwise usable.	3
Low	Minimal business impact. Indicates that the problem results in little impact on operations or there is reasonable circumvention of the problem. For example, misspelled words, graphical designs.	4

- For Critical Issues please submit a ticket and call the service desk number

Empowering Digital Business

AMERICAN OVERSIGHT

MAY 2020

DRAFT M&O GOVERNANCE PROCESS

ADCRR & BUSINESS AND DECISION

Arizona Department of Corrections Rehabilitation & Reentry

Business & Decision
Empowering Digital Business

AMERICAN OVERSIGHT

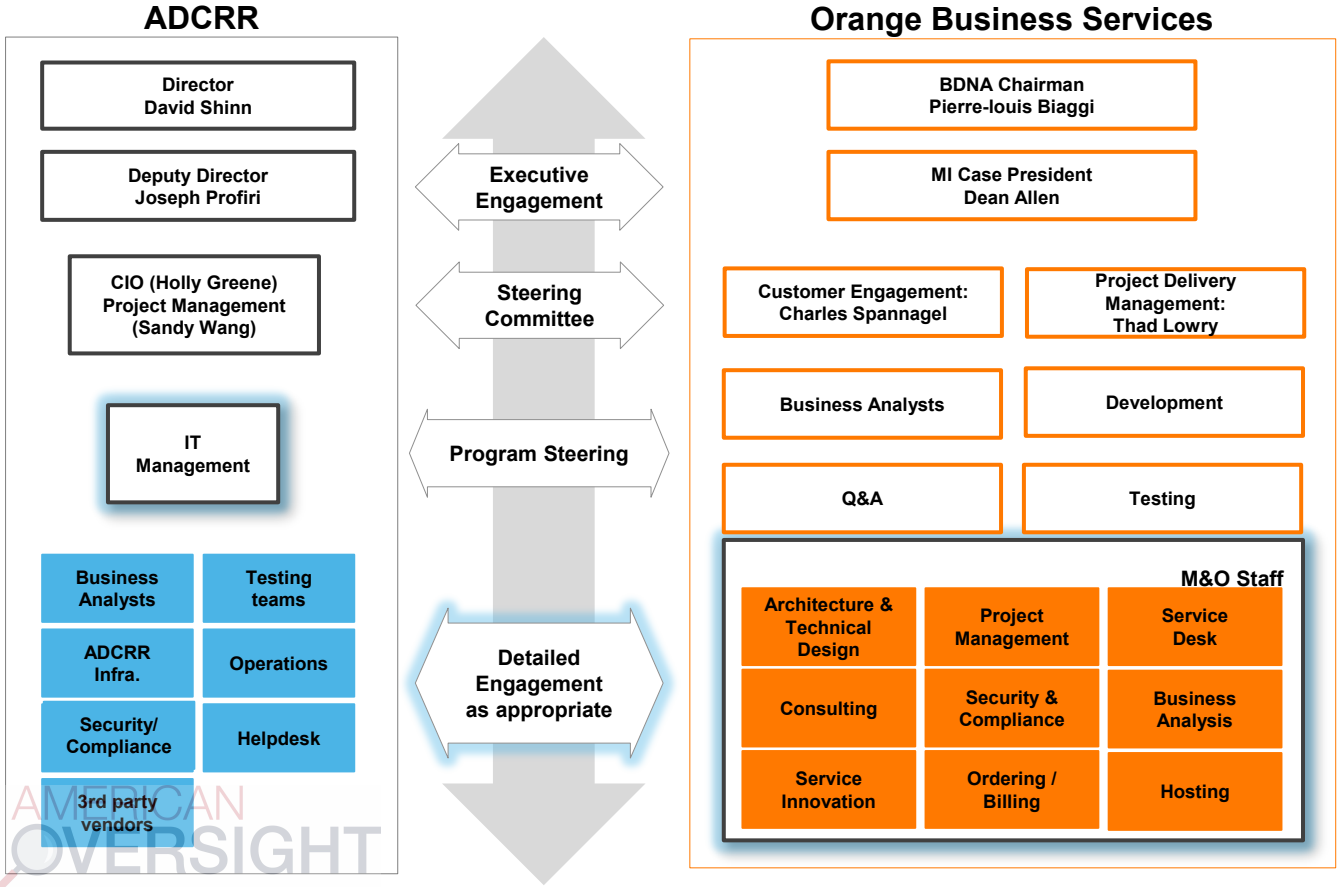
BDNA engagement method



Partnership principles:

- **High touch executive engagement** – Strategic decisions & arbitrations in coordination with ADCRR executives
- **Customer engagement**– throughout the life cycle of M&O, the BDNA customer engagement manager will own the commercial relationship and support customer business and IT strategy
- **Project management** – The project management organization will deliver maintenance as well as new developments of the solution

The engagement is driven by a customer centric philosophy, guided by the customer's business needs.

AMERICAN OVERSIGHT

BDNA Client Business Unit

The Client Business Unit is organized to deliver:

- Maintenance of the solution (Bugs fixing), through a dedicated staff and capacity
- Development of new functionalities as part of the 10k hours envelope dedicated to it

From 05/01/2020 to 05/01/201, This team will be supplemented by additional staff in order to deliver the additional remediation hours (10k hours) agreed in the last Amendment to the contract

From BAFO

AMERICAN OVERSIGHT

Customer Engagement Manager

CEM

The Customer Engagement Manager ensures accountability of the execution of the contract and steers a proactive partnership with ADCRR

- Coordinate a cross functional team in order to develop a partnership with the ADCRR with full accountability to achieve commitments in contractual agreement and delivering satisfaction and value to the ADCRR.
- Implement full contract customer facing governance incl. appropriate governance boards, steerco's, escalation path and contractual change management.
- Bring BDNA delivery team together into a coherent entity fine-tuned to interact with the ADCRR organization in an optimal and minimum impacting way.
- Significantly reduce the level of effort which ADCRR has to invest to ensure the desired contractual benefits are achieved.

AMERICAN OVERSIGHT

Project Delivery Manager

PDM

The Project Delivery Manager is accountable to provide day-to-day coordinated delivery of agreed contractual solutions and services for ADCRR; has overall responsibility for the quality of service and customer satisfaction for all implemented BDNA services; with a view to optimizing workforce utilization

- Proactively identify and scope opportunities for service enhancement providing ADCRR's experience improvement and greater value generation; spread innovation for optimization and leverage of new or improved processes.
- Prepare and publish Program Plan (including Program Structure / Roadmap / Governance Matrix) of customer Service Strategy; ensure all stakeholders agree and understand roles and responsibilities
- Identify and mitigate risks (failure or delay); ensure appropriate levels of business contingency / continuity are in place.
- Implement full contract customer facing governance, incl. appropriate governance boards and steerco's, for escalation path and contractual change management
- Ensure full compliance of agreed solutions and services to meet customer needs; proactive monitoring of agreed SLAs in order to deliver exceptional service and acknowledged customer value.

    - 7/30/2020 – ADCRR IT and M&O Manager Weekly Status Meeting

AMERICAN OVERSIGHT

Business & Decision

List of workstreams

- Parking lot – Exhibit 2 items – Capped at 1000 hours
- EUIL – capped at 9000 hours: Focused on Improved End-user experience
- M&O (10,000) Development hours: Focused on new Functionalities implementation
- Maintenance: Bugs fixing, following prioritization by ADCRR
  - CAP: All remaining Medium & Low Bugs at the time of M&O start
  - SLAs: As per agreed SLA setup
  - Service desk: Effective as of June 5th , 2020
- Measurement of Success: To be agreed with ADCRR

AMERICAN OVERSIGHT

AZ-DOC-21-0315-A-002253

Principles of Effort Estimate, Validation & Approval

- For M&O development hours prior to May 18th: Validation requested by ADCRR management
- M&O development hours:
  - As per ADCRR requests for development – list of items to be submitted by ADCRR
  - BDNA evaluation of Level of Efforts (LoEs)
  - ADCRR sign off on LoEs
  - BDNA commits on LoEs cap for delivery
  - Validation of Delivery as per amendment process terms (Testing ok / 30 days)
- EUIL:
  - Parking lot Exhibit 2 items to be delivered consuming no more than 1000 hours
  - BDNA evaluation of Level of Efforts (LoEs)
  - ACRR sign off on LoEs (9,000)
  - BDNA commits on LoEs cap for delivery
  - Validation of Delivery as per amendment process terms (Testing ok / 30 days)
  - **Measurement of success to evaluate positive impact of EUIL items onto end user satisfaction**

Amendment process

- 1st Business Day – M&O Monthly Report submitted by B&D
- 5th Business Day - Monthly M&O Status Meeting
- 10th Business Day (or prior) – ADCRR and B&D present a list of proposed EUIL items
- 15th Business Day (or prior) – B&D to provide estimate for proposed EUIL items, B&D to provide forecast of available FTE's
- 20th Business Day (or prior) – ADCRR selects items for the upcoming month

AMERICAN OVERSIGHT

SLAs

- **Service Level Agreement (SLA)**
  - Agreed to terms on May 15th , 2020
  - Utilizing multiple technologies and metrics to ensure SLA compliance
    - 3rd Party Systems that monitor System Response, System Availability, User Response
    - ServiceDesk Reports that monitor
      - Incident Response and Resolution Times
    - Additional Monthly Reports to be included in the M&O Monthly Status Meeting
      - Maintenance/Updates/Upgrades, Data Integrity and Destruction, Security, User Support and Contractor Staffing
  - B&D Weekly SLA Compliance and Risk Assessment Meeting to review all metrics
  - **Sign Off Needed**

AMERICAN OVERSIGHT

CAP

- The Corrective Action Plan consist of all medium and low bugs still active as of M&O start (Feb. 21st)

- Listed in attached document.

AMERICAN OVERSIGHT

Service desk

- **B&D Service Desk Implementation**
  - Scheduled to Go Live on 6/5/2020
  - B&D Internal Training on 5/21/2020
  - ADCRR Training the week of 6/1/2020
  - B&D Service Desk staffed Monday through Sunday 6am – 6pm
    - On call after hours support as negotiated with ADCRR
    - After hour technical support will be provided under a Time and Material basis

AMERICAN OVERSIGHT

Measurement of Satisfaction

- **Measure Current Sentiment**
  - Workstream with key ADCRR IT Staff and ADCRR Operational Users
  - Brainstorm different methodologies for End User satisfaction analysis
    - Online Surveys
    - Site Visits - Quarterly Site Visits to gauge user satisfaction?
    - Super User Panel
    - Training Evaluation
    - Product Board…
- **Setup Ongoing Satisfaction Measurement**
- **Set Targets and Expectations**

Thank you, Charles.

Hi Spencer and Sandy-

Please put this information in a softer, more consumable format for the leadership team **before the 3pm** meeting today.

I'd like to see the hours attached to their corresponding items in the Power Point list we provided to leadership.(Spencer)

I'd also like to see them in the Excel format Sandy created with the breakout of Dev, QA, Prod, etc.. (Sandy)

Lastly, I'd like to see them attached to their corresponding item in the Excel Parking Lot/EUIL tracking sheet on the Google Drive. (Spencer)

Thank you!

Respectfully,

Holly Greene

Attachments:	image001.png image003.png

Holly,

I think we can do this for Ad-Hoc but I don't think it's possible to monitor all other activities by all of the other team members this way. Once we have our initial list of EUIL items that we will begin to work on, we can track a weekly percentage complete based off of the accepted estimate.

Example:

EUIL Item 12345 – Creating a new unit with beds – 300 Hours of work (accepted estimate)

Week 1 – 100 Hours Development (33% complete)
Week 2 – 100 Hours Development (66% complete)
Week 3 – 50 Hours Development (83% complete)
Week 4 – 50 Hours QA & Delivered to UAT (100% complete)

Please let me know your thoughts on this.

Thank you.

Charles Spannagel

Subject: Re: Ad-Hoc Support Estimate for the week

Hi Charles-

I'd like B&D to nail down a format for capturing and communicating this time. Excel

AMERICAN OVERSIGHT

format is a'ok by me just so long as it captures the breakdown of what those hours were used for by date. Please consider and get back to me.

Shifting focus to the information provided, the hours below look reasonable to me, but what is the timeframe span? i.e. Monday - Sunday; Mon - Mon; 5/17/20 to 05/26/20 with the exclusion of the holiday?

Hi Aaron-

Do the hours below seem to jive with how you (and Jeff) have used the B&D resources to ad hoc support?

Respectfully,

Holly Greene

Aaron, I spoke with John Vitale. KeepTrak will unauthorized the Utility Fees event to make sure the inmates won't be charged the monthly fee. Don't send any pending/retroactive Utility Fees. We'll keep a watch on what happens in the coming months.

> George and I spoke about this today. He wanted to know if we do turn this off and then back on later if it would process all records retroactively. The answer to that is no. When it runs in the middle of the month each month, it only sends the prior month's utility fees. I'm not sure we need to turn it off on our end if John has done something to keep something from processing on his end but I can't speak for what's configured on the KeepTrak side.
>
> Also as it stands we still have not send the April Fees that would have sent on May 16th. Let us know if we should send them. We will need to do this before June 1st if we do. Also let us know if we need to disable the utility fees on our side.

Attachments: image002.png

Good afternoon,

Leadership at B&D does not have any recollection of any conversations or documentation in reference to the document that Holly and team found yesterday. We are in agreement with the CAP that was proposed yesterday by Spencer and team which was:

- ADCRR planned to include any bugs created up to 04/30/2020 that are still open. Qty. 115
- The bugs must be completed 1 year from the signed M&O date (4/30/2020)

We would like to officially accept these terms if this works for ADCRR.

Thank you.

Hi Lisa (and Ken)-

I realize that you've been tasked with other project matters and removed from all things ACIS now that we've reached M&O. However, we need your assistance with a corrective action plan document that we located which was created during your time assisting ADCRR with ACIS.

I've asked Spencer to reach out to you (and Ken) in hopes to gather more information and clarity on the intent of this document.

Hello Ken-

Just a heads up that Charles Spannagel (B&D) or a leader from B&D may be reaching out tp you regarding some questions concerning time and material rates as it relates to the M&O Agreement (attached draft with notes).

This agreement is linked to Amendment 9 and we (IT) were asked by our partner (B&D) to review and ensure it meets support needs.

However, there are a few line items that point to Procurement. Specifically: section 3.16 and Amendment 9 Time and Materials Rate Card. This appears to fall in your arena of expertise.

Respectfully,

Holly Greene

AMERICAN OVERSIGHT

MAINTENANCE AND OPERATION AGREEMENT

Overview

This document represents the Service Level Agreement ("SLA") for the maintenance and operation of the Mi-Case offender case management software (the "Software") for the Arizona Department of Corrections, Rehabilitation & Reentry ("ADCRR") and Business & Decision, North America (PA), Inc. ("B&D").

Under the terms of this SLA, maintenance and operation services shall be available on-call 12-hours per day, 7-days per week, with an agreed response time from the receipt of each request.

ADCRR Information Technology (IT) is responsible for first-line and second-line support. ADCRR IT support will attempt to resolve any non-product related issue prior to raising a third-line support ticket to B&D. ADCRR shall be responsible for specific problem determination and resolution for those items and issues that are not within the Mi-Case application.

The role of **first-line support** incident management is to attempt to collect as much information and diagnostics about the incident as possible. First-line may even resolve the issue when possible. This will reduce resolution time for all minor incidents (e.g. 'My computer doesn't work'; OR, 'My password needs to be reset').

The role of **second-line support** of incident management is comprised of staff to rule out end user training needs and end user errors (e.g. 'How do I upload a document'; OR, 'I cannot locate a specific report').

If first and/or second-line support cannot resolve the issue, ADCRR IT support personnel will raise a **third-line** support ticket with B&D. See Appendix 6 for reference to B&D key resources.

If a third-line support ticket is determined to be a software defect, B&D agrees to provide a resolution within the time-period set forth in Appendix 3. In the event that a software defect results in general service interruption of the Software or in essential elements of the Software, B&D agrees to provide resolution within the soonest possible time frame.

The third-line support ticket procedure defined below shall be followed.

1 Third-line Support Ticket Procedure

1.1. In the event ADCRR IT support is unable to resolve the problem with the Software, the representative will submit a third-line support ticket with the B&D Customer Service Helpdesk ("B&D-CSH"). To raise a support ticket with B&D-CSH, ADCRR IT support shall follow the following procedure:

1.2. Contact the B&D-CSH by telephone, fax, email or entering a support ticket within the B&D-CSH online Service Desk (SD) (as set forth in Section 2), and provide the following information:

AMERICAN OVERSIGHT

1.2.1. Contact details (contact name, location, telephone number)

1.2.2. The name of the module in which the problem or failure arose or occurred in the software

1.2.3. Any unique reference number used by ADCRR's internal IT Service Desk (if applicable)

1.2.4. All problem details including: date/time of problem, content of any error message (if applicable), its opinion of the support ticket priority, the nature of problem, any precursors to problem, whether the problem may be easily replicated, and any other associated and/or relevant information such as screen dumps (screen shots), reports and data files.

1.3 ADCRR shall be responsible for ensuring that support tickets are raised only by those individuals designated to do so.

1.4 Upon receipt of the support ticket, it will be categorized according to the priority levels set forth in Appendix 2. B&D will at, all times, use its best efforts to respond to support tickets as quickly as possible in accordance with the target response and resolution times set out in Appendix 3.

1.5 The process flow of a support ticket will follow the agreed process flow as detailed in Appendix 8.

1.6 As part of the B&D-CSH, the B&D Issue Response Team ("IRT") will inform ADCRR IT if a site visit is required to resolve a support ticket.

1.7 When a support ticket is passed to the B&D IRT, the IRT member appointed to resolve the support ticket shall determine whether the resolution of the problem requires application software or data to be repaired. If repairs are required, then the IRT member may require and request further information from ADCRR to resolve the problem. Any time that is associated with the collection, definition or confirmation of further information will be excluded from the target response times set out in Appendix 3. Once the IRT member has determined what is likely to be required to resolve the problem, they will inform the ADCRR IT Service Desk of the current state of the support ticket. Once a resolution path has been determined then the IRT member will inform the ADCRR IT Service Desk personnel and close the support ticket in line with the support ticket closure flow Appendix 8. In the event that a response cannot be provided within the target response times set out in Appendix 3, the support ticket shall be escalated in accordance with the Escalation Procedure defined in section 4.

1.8 If a resolution of a support ticket is likely to result in a material impact on the Software or its related products, the IRT member will seek authorization from the ADCRR IT prior to carrying out any action that is likely to have such impact. If the support ticket is a change request (as defined in section 3) the IRT member will carry out an impact analysis detailing the nature and cost of the change. No changes will be made without prior written authorization from ADCRR. The IRT member will inform the ADCRR IT Service Desk personnel and close the support ticket in line with the support ticket closure flow Appendix 8.

1.9 Should the investigation of a support ticket by the IRT indicate that the problem resulted from an addition to or modification of the Software or its related products by ADCRR, the IRT member will inform ADCRR at the earliest opportunity indicating that any work to be carried out can be conducted on a chargeable basis in line with the time and materials rate card as Appendix 9 for the implementation of the change. In order to progress on any such works thereafter, B&D would require a written agreement and authorization from ADCRR IT

AMERICAN OVERSIGHT

leadership to correct problems not covered by this SLA. The IRT member will inform ADCRR IT personnel and close the support ticket in line with the support ticket closure flow Appendix 8.

1.10 If ADCRR disagrees with the IRT's findings, a report of the findings from both the IRT staff and the ADCRR IT Service Desk will be provided to the named Support Delivery Manager for B&D for assessment and resolution. If after 5 business days (or a time period mutually agreed upon) there is no resolution on the IRT's disagreement, the executive representatives for both the ADCRR and B&D will negotiate the same findings for ultimate resolution.

1.11 Support tickets will be closed by mutual agreement between ADCRR IT Service Desk and the IRT member on the occurrence of any of the following:

1.11.1. ADCRR and the IRT members agree that the perceived problem was due to the operator's misunderstanding of the Software specification, or equivalent documentation, and as such, no fix is required.

1.11.2. ADCRR agrees that the Software is operating in line with the specifications.

1.11.3. Non-recurrence of an incident, or intermittent fault, which cannot be reproduced, despite repeated efforts to do so, within a set period of 5 days. This period of non-recurrence can be mutually adjusted if conditions warrant a longer or shorter time range. In the above case, the support ticket will not be included in any resolution targets.

1.11.4. The IRT member has concluded that the issue is related to system defect and a system defect has been created within the defect management tool.

1.11.5. The IRT member has concluded that the issue is related to data defect and a data defect has been created within the defect management tool.

1.11.6. The IRT member has notified the ADCRR IT Service Desk that there is a previously known defect that is already entered in the defect tracking system.

1.11.7. The IRT member has requested further clarification or information relating to the support ticket and ADCRR has failed to provide further clarification or information within 5 business days of the support ticket being opened and following at least 1 email reminder after the support ticket being opened.

1.11.8. Following the IRT member deploying an immediate 'hot' fix to the UAT environment and ADCRR failing to test the appropriate target resolution time detailed in Appendix 3.

1.12 A standardized monthly '**support ticket report**' of all support tickets will be provided by the B&D-CSH to the ADCRR IT leadership team.

The monthly support ticket report will:

1.12.1. Show all active support tickets (for the entire time-period of the report).

1.12.2. Show all support tickets opened and closed during the entire time-period of the report including each target response and target resolution times.

1.12.3. The support ticket report will show the status (such as "in development", "under investigation" or "under review by the Customer") for each support ticket and any other comments or pertinent information about that support ticket for all reported support tickets.

AMERICAN OVERSIGHT

1.13 The date for future monthly meetings (or other mutually agreed upon timeframe) between the ADCRR IT leadership and the B&D will be set at the conclusion of the current months standing meeting.

2 Methods of Contacting B&D

ADCRR may contact B&D-CSH by using any of the following means:

2.1 By entering a support ticket in the online B&D-CSH Service Desk at: http://servicedesk.bndna.com and following the ADCRR IT Service Desk Requester User Guide detailed in Appendix 5.

2.2 By telephoning the B&D-CSH on *1(833) 564 2273* or such other telephone number provided by B&D to the ADCRR with two-week notification (or other mutually agreed upon timeframe). Phone calls may be backed up by e-mails. The B&D-CSH will log the call and pass this information on to an appropriate IRT member. The ADCRR IT Service Desk personnel making the call should have available to them as much information about the problem as possible, and as a minimum, the information requirements set out in section 1.2.

2.3 By sending an email to ServiceDesk@bndna.com, or such other email address provided by B&D to ADCRR with two-week notification (or other mutually agreed upon timeframe). The email will give as much detail as possible with, as a minimum, the information requirements set out in section 1.2. Email contact is suitable for any requirement; however the target response times will commence the time of receipt of the communication. All emails for priority 1 (critical) and 2 (high) items should be immediately followed by a telephone call to B&D-CSH.

3 Change Requests / Variations to Service

3.1 ADCRR IT leadership or other designated personnel shall be entitled at any time during the term of this agreement to request in writing to B&D a change request or variation to the services already provided. ADCRR shall provide B&D with full particulars of any requested change or variation and such additional information as B&D shall reasonably require.

3.2 All change requests shall be requested formally by ADCRR IT leadership or other designated personnel.

3.3 Following receipt of a change request or variation to the services pursuant to section 3.1 above, B&D will respond within five (5) business days and shall inform ADCRR IT leadership or other designated personnel in writing whether it considers such change request or variation to the services to be technically feasible. If so, any amendment or variation to the changes and /or services that it would make as a result of such request, a formal estimate of effort (EOE) will be provided by B&D to ADCRR IT leadership or other designated personnel.

3.4 As part of the EOE, B&D will notify ADCRR IT leadership or other designated personnel of the number of hours required to implement the change request.

3.5 ADCRR shall notify B&D within five (5) business days of receipt of the EOE referred to in section 3.3 above if it wishes to proceed with the change request or variation to the services as provided by B&D. ADCRR IT leadership will, as part of this notification to proceed (NTP), identify whether the pre-arranged 10,000 hours of change effort is to be utilized as part of the implementation of the change. In the event that the 10,000 hours of change effort is not to be used for the implementation of the change, ADCRR will provide B&D with an

AMERICAN OVERSIGHT

appropriate purchase order for the effort, in line with the time and materials rate card as noted in Appendix 9 for the implementation of the change.

3.6 If ADCRR identifies further changes to the original change request discussed in 3.1 then the process will revert back to section 3.1 above. Failure by ADCRR to notify B&D within the ten (10) business day period shall be deemed to constitute the ADCRRs non-acceptance of the proposal.

3.7 Upon receipt of the NTP by ADCRR IT, B&D will plan the development and identify a projected start date and estimated completion date.

3.8 Upon approval of the development plan by ADCRR IT, B&D will commence work on the change request in line with the development plan.

3.9 During working on the change request B&D will track actual hours against the estimate and report progress weekly to ADCRR IT leadership with an appropriate email. B&D can never bill ADCRR for unapproved hours or other undocumented work.

3.10 The IRT shall be responsible for carrying out any Software change requests agreed between B&D and ADCRR under the terms of this Agreement, and for reporting to ADCRR.

3.11 If the change request appears that it will not complete on the planned EOE completion date or if the amount of effort required to finish the change request will exceed 10% over the EOE, B&D will notify ADCRR IT leadership and stop working on the change.

3.11.1 ADCRR will need to then take one of the following actions:

3.11.1.1 Formally ask B&D to proceed to completion of the change request – setting new target thresholds (end date or increase to EOE)

3.11.1.2 Formally ask B&D to re-estimate the change request (step 3.1)

3.11.1.3 Formally ask B&D to drop the change request, perhaps identifying a new change request with altered requirements. The expectation is that all effort expended up to this point will be deducted from the 10,000 hours of change effort.

3.11.2 Upon an updated NTP B&D will commence work on the change request (delays between stopping work and restarting will be reflected in a revised plan for the change request)

3.12 A change request from ADCRR to B&D should include the information detailed in the most current approved change request form.

3.13 Upon the completion of the software development lifecycle of the change request, B&D will formally request the approval to promote the change request to the User Acceptance Testing (UAT) environment.

3.13.3 ADCRR will then test the change request

3.13.3.1 Any support that B&D provides during UAT testing will be billed against the change request while working within the parameters defined in section 3.11.

3.13.3.2 Any bugs identified (during UAT) and subsequently worked on by B&D (during UAT) will be billed against the change request while working within the parameters defined in section 3.11.

3.13.3.3 Any changes made by ADCRR to the requirements or expectations of the change request will need to be done formally in writing and will trigger the process detailed in 3.1

AMERICAN OVERSIGHT

3.14 Following approval to promote the change request to the UAT environment, B&D will formally notify ADCRR IT that the change has been successfully deployed and is ready for the ADCRR UAT process.

3.15 Upon the completion and formal approval provided by ADCRR IT that the change has passed their UAT process, a formal request to B&D will be made to promote the change to production.

3.16 Formal acceptance of the change and all deductions of the 10,000 hours of change effort consumed for the change will be final and any outstanding monies due for the change shall be invoiced and paid for by ADCRR when the change is either promoted to production or 30 business days after the change has been delivered to the UAT environment and accepted by ADCRR.

3.17 A standardized weekly report by email of all change requests will be provided by the B&D-CSH to the ADCRR IT leadership team. This report will show no less than:

3.17.4 All open change requests (for the entire time-period of the report).

3.17.5 All change requests closed during the entire time-period of the report.

3.17.6 The status (such as “in development”, “under investigation” or “waiting for CMRB”) for all open Change Requests.

4 Escalation Procedures

Any matter escalated under the Agreement shall have two stages:

4.1 Stage 1

If the support ticket has not been resolved within the appropriate Target Resolution Time or the support ticket does not meet an exception as shown in Appendix 3, the IRT member(s) tasked with the issue will inform the B&D-CSH of the reason for failure to reach resolution and his/her best analysis of the resources and time-scales required to resolve the problem. The B&D-CSH will then refer the matter to B&D's Customer Service Manager, who will determine any additional or alternate resources necessary and ensure they are applied to the issue and inform ADCRR IT leadership of the escalation. The B&D-CSH will inform ADCRR IT leadership of the issue's escalation, and the appropriate Manager of B&D shall be informed of the Stage 1 escalation.

4.2 Stage 2

4.2.1 If the support ticket has not been resolved within a time period equal to double that specified as the Target Resolution Time for the relevant priority level, or the support ticket does not meet an exception as shown in Appendix 3, the B&D Manager shall inform the relevant Director of B&D if the issue is not likely to be resolved by the next escalation time limit.

4.2.2 The Director of B&D and ADCRR IT leadership will mutually determine an appropriate course of action and whether to allocate additional or alternate resources, including outside agencies if appropriate. ADCRR will be kept informed of the status of the escalated issue, and the B&D Customer Service Manager will inform the originating ADCRR IT leadership or other designated personnel of the Stage 2 escalation.

4.3 B&D Management

AMERICAN OVERSIGHT

A list of the B&D Directors, Managers will be provided to the ADCRR IT leadership upon initiation of this contract as Appendix 6 and this list will be updated whenever a change is made to the B&D Management.

AMERICAN OVERSIGHT

5 SLA Key Performance Indicators and % Holdback

The key metrics shall be used in accordance with the M&O Agreement to measure B&D's performance of the M&O service. These key metrics are detailed in Appendix 7 - Exhibit G

Appendix 1 - THE SITE AND THE SERVICES

The Sites: List of all ADCRR Locations where the application is operated.

The Services: The Services shall include the following:

1. Support in event of notification of system problems as specified in this contract
2. Evaluation of support tickets
3. Determining the extent of any change required to deal with a support ticket
4. Progression, documentation and resolution of all support tickets
5. Impact analysis of requests for changes to the product
6. Progression of approved change requests
7. Provision, upon request, of timely reports both written (as described in Section 1.13), and verbal (as requested by ADCRR) detailing the progress of support tickets
8. Remote installation of application software upgrades
9. On-site installation of application software upgrades as mutually agreed upon by B&D and ADCRR
10. Agreement of acceptance criteria testing for software upgrades
11. Holding master development copies (by B&D and in escrow) of any software included in the products and all associated documentation as produced by B&D
12. Assuring ADCRR has latest copies of all software included in the project and associated documentation
13. Maintenance of relevant documentation where applicable

Appendix 2 - PRIORITY LEVELS

Category	System Status	Priority
Critical	Indicates the entire Solution is unavailable for use resulting in a critical impact on operations.	1
High	Indicates a Module is unavailable for use where the Solution is usable but is severely limited, and no workaround for that Module exists.	2
Medium	The operation of a function in the application is restricted but use of other functions is not impacted or where a	3

AMERICAN OVERSIGHT

	requirement is not being met, but the application is otherwise usable.	
Low	Minimal business impact. Indicates that the problem results in little impact on operations or there is reasonable circumvention of the problem. For example, misspelled words, graphical designs.	4

Appendix 3 - TARGET RESPONSE AND RESOLUTION TIMES

Priority	Target Response Time	Target Resolution Time
1	1 Clock Hour	5 Clock Hours
2	24 Clock Hours	48 Clock Hours
3	48 Business Hours	72 Business Hours
4	48 Business Hours	72 Business Hours

Target Response Time: is defined as the time, from the moment when ADCRR IT Service Desk or other designated support personnel notifies B&D of a support ticket (as defined in Section 1.1, Section 1.2, and Section 2), for B&D to begin working on the reported support ticket and to inform ADCRR IT Service Desk of this phase of the support ticket process.

Target Resolution Time: is defined as the targeted time, 24 clock hours, to resolve and initially close a support ticket as set out in Section 1.10. The targeted time to resolve a support ticket does not represent the reporting of the final closure as defined in Section 1.11.

There may be instances where a resolution cannot be achieved in the specified target time period. These situations are described in the paragraph below. When a resolution cannot be achieved in the specified target time period for any of the reasons described below, and it is mutually agreed that the circumstances do not constitute the need for escalation (as defined in Section 4), then no target resolution time will be entered in the standardized monthly **support ticket report** (as described in Section 1.12), and a comment that states "Target Resolution Time is on hold pending [*reason*]" will be added. The support ticket status of the *Target Resolution Time* for these instances will be revised once the issue preventing its resolution is settled.

Target Response and Resolution Exceptions:

AMERICAN OVERSIGHT

Situations that may prevent a support ticket from meeting the *Target Response & Resolution Time*

1 Support tickets that require approval from ADCRR IT
2 Support tickets that represent a non-recurrence of an incident, or intermittent fault (as defined in Section 1.11.3)
3 Support tickets that require information and additional requested support from ADCRR (as defined in Sections 1.5 through 1.12).
4 ADCRR IT disagrees with the IRT's finding, and the support ticket cannot be closed (as defined in Section 1.10).
5 Any mutually agreed upon situation where ADCRR and B&D determine that the support ticket cannot be resolved in the specified Target Resolution Time.

Under the above circumstances, the Target Resolution Time may be recalculated by subtracting the time required by ADCRR to meet the requirements, requests or procedures that prevent the B&D IRT staff from resolving the support ticket as described in Sections 1.5 through 1.12. When these circumstances arise, B&D will not be liable for any failure to meet these targets.

Hello Charles-

Please see the attached updated M&O agreement document we covered today. We will need you to work with members of the B&D team to shore some things up from Procurement, down to clarification of some items and update of any appendixes and their associated documents. See my comments in the document. Those highlighted in yellow are actionable.

Respectfully,

Holly Greene

IT Service Desk: 602.542.AZDC | ITTECHSUPPORT@azcorrections.gov

AMERICAN OVERSIGHT

MAINTENANCE AND OPERATION AGREEMENT

Overview

This document represents the Service Level Agreement ("SLA") for the maintenance and operation of the Mi-Case offender case management software (the "Software") for the Arizona Department of Corrections, Rehabilitation & Reentry ("ADCRR") and Business & Decision, North America (PA), Inc. ("B&D").

Under the terms of this SLA, maintenance and operation services shall be available on-call 12-hours per day, 7-days per week, with an agreed response time from the receipt of each request.

ADCRR Information Technology (IT) is responsible for first-line and second-line support. ADCRR IT support will attempt to resolve any non-product related issue prior to raising a third-line support ticket to B&D. ADCRR shall be responsible for specific problem determination and resolution for those items and issues that are not within the Mi-Case application.

The role of **first-line support** incident management is to attempt to collect as much information and diagnostics about the incident as possible. First-line may even resolve the issue when possible. This will reduce resolution time for all minor incidents (e.g. 'My computer doesn't work'; OR, 'My password needs to be reset').

The role of **second-line support** of incident management is comprised of staff to rule out end user training needs and end user errors (e.g. 'How do I upload a document'; OR, 'I cannot locate a specific report').

If first and/or second-line support cannot resolve the issue, ADCRR IT support personnel will raise a **third-line** support ticket with B&D. See Appendix 6 for reference to B&D key resources.

If a third-line support ticket is determined to be a software defect, B&D agrees to provide a resolution within the time-period set forth in Appendix 3. In the event that a software defect results in general service interruption of the Software or in essential elements of the Software, B&D agrees to provide resolution within the soonest possible time frame.

The third-line support ticket procedure defined below shall be followed.

1 Third-line Support Ticket Procedure

1.1. In the event ADCRR IT support is unable to resolve the problem with the Software, the representative will submit a third-line support ticket with the B&D Customer Service Helpdesk ("B&D-CSH"). To raise a support ticket with B&D-CSH, ADCRR IT support shall follow the following procedure:

1.2. Contact the B&D-CSH by telephone, fax, email or entering a support ticket within the B&D-CSH online Service Desk (SD) (as set forth in Section 2), and provide the following information:

AMERICAN OVERSIGHT

1.2.1. Contact details (contact name, location, telephone number)

1.2.2. The name of the module in which the problem or failure arose or occurred in the software

1.2.3. Any unique reference number used by ADCRR's internal IT Service Desk (if applicable)

1.2.4. All problem details including: date/time of problem, content of any error message (if applicable), its opinion of the support ticket priority, the nature of problem, any precursors to problem, whether the problem may be easily replicated, and any other associated and/or relevant information such as screen dumps (screen shots), reports and data files.

1.3 ADCRR shall be responsible for ensuring that support tickets are raised only by those individuals designated to do so.

1.4 Upon receipt of the support ticket, it will be categorized according to the priority levels set forth in Appendix 2. B&D will at, all times, use its best efforts to respond to support tickets as quickly as possible in accordance with the target response and resolution times set out in Appendix 3.

1.5 The process flow of a support ticket will follow the agreed process flow as detailed in Appendix 8.

1.6 As part of the B&D-CSH, the B&D Issue Response Team ("IRT") will inform ADCRR IT if a site visit is required to resolve a support ticket.

1.7 When a support ticket is passed to the B&D IRT, the IRT member appointed to resolve the support ticket shall determine whether the resolution of the problem requires application software or data to be repaired. If repairs are required, then the IRT member may require and request further information from ADCRR to resolve the problem. Any time that is associated with the collection, definition or confirmation of further information will be excluded from the target response times set out in Appendix 3. Once the IRT member has determined what is likely to be required to resolve the problem, they will inform the ADCRR IT Service Desk of the current state of the support ticket. Once a resolution path has been determined then the IRT member will inform the ADCRR IT Service Desk personnel and close the support ticket in line with the support ticket closure flow Appendix 8. In the event that a response cannot be provided within the target response times set out in Appendix 3, the support ticket shall be escalated in accordance with the Escalation Procedure defined in section 4.

1.8 If a resolution of a support ticket is likely to result in a material impact on the Software or its related products, the IRT member will seek authorization from the ADCRR IT prior to carrying out any action that is likely to have such impact. If the support ticket is a change request (as defined in section 3) the IRT member will carry out an impact analysis detailing the nature and cost of the change. No changes will be made without prior written authorization from ADCRR. The IRT member will inform the ADCRR IT Service Desk personnel and close the support ticket in line with the support ticket closure flow Appendix 8.

1.9 Should the investigation of a support ticket by the IRT indicate that the problem resulted from an addition to or modification of the Software or its related products by ADCRR, the IRT member will inform ADCRR at the earliest opportunity indicating that any work to be carried out can be conducted on a chargeable basis in line with the time and materials rate card as Appendix 9 for the implementation of the change. In order to progress on any such works thereafter, B&D would require a written agreement and authorization from ADCRR IT

AMERICAN OVERSIGHT

leadership to correct problems not covered by this SLA. The IRT member will inform ADCRR IT personnel and close the support ticket in line with the support ticket closure flow Appendix 8.

1.10 If ADCRR disagrees with the IRT's findings, a report of the findings from both the IRT staff and the ADCRR IT Service Desk will be provided to the named Support Delivery Manager for B&D for assessment and resolution. If after 5 business days (or a time period mutually agreed upon) there is no resolution on the IRT's disagreement, the executive representatives for both the ADCRR and B&D will negotiate the same findings for ultimate resolution.

1.11 Support tickets will be closed by mutual agreement between ADCRR IT Service Desk and the IRT member on the occurrence of any of the following:

1.11.1. ADCRR and the IRT members agree that the perceived problem was due to the operator's misunderstanding of the Software specification, or equivalent documentation, and as such, no fix is required.

1.11.2. ADCRR agrees that the Software is operating in line with the specifications.

1.11.3. Non-recurrence of an incident, or intermittent fault, which cannot be reproduced, despite repeated efforts to do so, within a set period of 5 days. This period of non-recurrence can be mutually adjusted if conditions warrant a longer or shorter time range. In the above case, the support ticket will not be included in any resolution targets.

1.11.4. The IRT member has concluded that the issue is related to system defect and a system defect has been created within the defect management tool.

1.11.5. The IRT member has concluded that the issue is related to data defect and a data defect has been created within the defect management tool.

1.11.6. The IRT member has notified the ADCRR IT Service Desk that there is a previously known defect that is already entered in the defect tracking system.

1.11.7. The IRT member has requested further clarification or information relating to the support ticket and ADCRR has failed to provide further clarification or information within 5 business days of the support ticket being opened and following at least 1 email reminder after the support ticket being opened.

1.11.8. Following the IRT member deploying an immediate 'hot' fix to the UAT environment and ADCRR failing to test the appropriate target resolution time detailed in Appendix 3.

1.12 A standardized monthly '**support ticket report**' of all support tickets will be provided by the B&D-CSH to the ADCRR IT leadership team.

The monthly support ticket report will:

1.12.1. Show all active support tickets (for the entire time-period of the report).

1.12.2. Show all support tickets opened and closed during the entire time-period of the report including each target response and target resolution times.

1.12.3. The support ticket report will show the status (such as "in development", "under investigation" or "under review by the Customer") for each support ticket and any other comments or pertinent information about that support ticket for all reported support tickets.

AMERICAN OVERSIGHT

1.13 The date for future monthly meetings (or other mutually agreed upon timeframe) between the ADCRR IT leadership and the B&D will be set at the conclusion of the current months standing meeting.

2 Methods of Contacting B&D

ADCRR may contact B&D-CSH by using any of the following means:

2.1 By entering a support ticket in the online B&D-CSH Service Desk at: http://servicedesk.bndna.com and following the ADCRR IT Service Desk Requester User Guide detailed in Appendix 5.

2.2 By telephoning the B&D-CSH on *1(833) 564 2273* or such other telephone number provided by B&D to the ADCRR with two-week notification (or other mutually agreed upon timeframe). Phone calls may be backed up by e-mails. The B&D-CSH will log the call and pass this information on to an appropriate IRT member. The ADCRR IT Service Desk personnel making the call should have available to them as much information about the problem as possible, and as a minimum, the information requirements set out in section 1.2.

2.3 By sending an email to ServiceDesk@bndna.com, or such other email address provided by B&D to ADCRR with two-week notification (or other mutually agreed upon timeframe). The email will give as much detail as possible with, as a minimum, the information requirements set out in section 1.2. Email contact is suitable for any requirement; however the target response times will commence the time of receipt of the communication. All emails for priority 1 (critical) and 2 (high) items should be immediately followed by a telephone call to B&D-CSH.

3 Change Requests / Variations to Service

3.1 ADCRR IT leadership or other designated personnel shall be entitled at any time during the term of this agreement to request in writing to B&D a change request or variation to the services already provided. ADCRR shall provide B&D with full particulars of any requested change or variation and such additional information as B&D shall reasonably require.

3.2 All change requests shall be requested formally by ADCRR IT leadership or other designated personnel.

3.3 Following receipt of a change request or variation to the services pursuant to section 3.1 above, B&D will respond within five (5) business days and shall inform ADCRR IT leadership or other designated personnel in writing whether it considers such change request or variation to the services to be technically feasible. If so, any amendment or variation to the changes and /or services that it would make as a result of such request, a formal estimate of effort (EOE) will be provided by B&D to ADCRR IT leadership or other designated personnel.

3.4 As part of the EOE, B&D will notify ADCRR IT leadership or other designated personnel of the number of hours required to implement the change request.

3.5 ADCRR shall notify B&D within five (5) business days of receipt of the EOE referred to in section 3.3 above if it wishes to proceed with the change request or variation to the services as provided by B&D. ADCRR IT leadership will, as part of this notification to proceed (NTP), identify whether the pre-arranged 10,000 hours of change effort is to be utilized as part of the implementation of the change. In the event that the 10,000 hours of change effort is not to be used for the implementation of the change, ADCRR will provide B&D with an

AMERICAN OVERSIGHT

appropriate purchase order for the effort, in line with the time and materials rate card as noted in Appendix 9 for the implementation of the change.

3.6 If ADCRR identifies further changes to the original change request discussed in 3.1 then the process will revert back to section 3.1 above. Failure by ADCRR to notify B&D within the ten (10) business day period shall be deemed to constitute the ADCRRs non-acceptance of the proposal.

3.7 Upon receipt of the NTP by ADCRR IT, B&D will plan the development and identify a projected start date and estimated completion date.

3.8 Upon approval of the development plan by ADCRR IT, B&D will commence work on the change request in line with the development plan.

3.9 During working on the change request B&D will track actual hours against the estimate and report progress weekly to ADCRR IT leadership with an appropriate email. B&D can never bill ADCRR for unapproved hours or other undocumented work.

3.10 The IRT shall be responsible for carrying out any Software change requests agreed between B&D and ADCRR under the terms of this Agreement, and for reporting to ADCRR.

3.11 If the change request appears that it will not complete on the planned EOE completion date or if the amount of effort required to finish the change request will exceed 10% over the EOE, B&D will notify ADCRR IT leadership and stop working on the change.

3.11.1 ADCRR will need to then take one of the following actions:

3.11.1.1 Formally ask B&D to proceed to completion of the change request – setting new target thresholds (end date or increase to EOE)

3.11.1.2 Formally ask B&D to re-estimate the change request (step 3.1)

3.11.1.3 Formally ask B&D to drop the change request, perhaps identifying a new change request with altered requirements. The expectation is that all effort expended up to this point will be deducted from the 10,000 hours of change effort.

3.11.2 Upon an updated NTP B&D will commence work on the change request (delays between stopping work and restarting will be reflected in a revised plan for the change request)

3.12 A change request from ADCRR to B&D should include the information detailed in the most current approved change request form.

3.13 Upon the completion of the software development lifecycle of the change request, B&D will formally request the approval to promote the change request to the User Acceptance Testing (UAT) environment.

3.13.3 ADCRR will then test the change request

3.13.3.1 Any support that B&D provides during UAT testing will be billed against the change request while working within the parameters defined in section 3.11.

3.13.3.2 Any bugs identified (during UAT) and subsequently worked on by B&D (during UAT) will be billed against the change request while working within the parameters defined in section 3.11.

3.13.3.3 Any changes made by ADCRR to the requirements or expectations of the change request will need to be done formally in writing and will trigger the process detailed in 3.1

AMERICAN OVERSIGHT

3.14 Following approval to promote the change request to the UAT environment, B&D will formally notify ADCRR IT that the change has been successfully deployed and is ready for the ADCRR UAT process.

3.15 Upon the completion and formal approval provided by ADCRR IT that the change has passed their UAT process, a formal request to B&D will be made to promote the change to production.

3.16 Formal acceptance of the change and all deductions of the 10,000 hours of change effort consumed for the change will be final and any outstanding monies due for the change shall be invoiced and paid for by ADCRR when the change is either promoted to production or 30 business days after the change has been delivered to the UAT environment and accepted by ADCRR.

3.17 A standardized weekly report by email of all change requests will be provided by the B&D-CSH to the ADCRR IT leadership team. This report will show no less than:

3.17.4 All open change requests (for the entire time-period of the report).

3.17.5 All change requests closed during the entire time-period of the report.

3.17.6 The status (such as “in development”, “under investigation” or “waiting for CMRB”) for all open Change Requests.

4 Escalation Procedures

Any matter escalated under the Agreement shall have two stages:

4.1 Stage 1

If the support ticket has not been resolved within the appropriate Target Resolution Time or the support ticket does not meet an exception as shown in Appendix 3, the IRT member(s) tasked with the issue will inform the B&D-CSH of the reason for failure to reach resolution and his/her best analysis of the resources and time-scales required to resolve the problem. The B&D-CSH will then refer the matter to B&D's Customer Service Manager, who will determine any additional or alternate resources necessary and ensure they are applied to the issue and inform ADCRR IT leadership of the escalation. The B&D-CSH will inform ADCRR IT leadership of the issue's escalation, and the appropriate Manager of B&D shall be informed of the Stage 1 escalation.

4.2 Stage 2

4.2.1 If the support ticket has not been resolved within a time period equal to double that specified as the Target Resolution Time for the relevant priority level, or the support ticket does not meet an exception as shown in Appendix 3, the B&D Manager shall inform the relevant Director of B&D if the issue is not likely to be resolved by the next escalation time limit.

4.2.2 The Director of B&D and ADCRR IT leadership will mutually determine an appropriate course of action and whether to allocate additional or alternate resources, including outside agencies if appropriate. ADCRR will be kept informed of the status of the escalated issue, and the B&D Customer Service Manager will inform the originating ADCRR IT leadership or other designated personnel of the Stage 2 escalation.

4.3 B&D Management

AMERICAN OVERSIGHT

A list of the B&D Directors, Managers will be provided to the ADCRR IT leadership upon initiation of this contract as Appendix 6 and this list will be updated whenever a change is made to the B&D Management.

AMERICAN OVERSIGHT

5 SLA Key Performance Indicators and % Holdback

The key metrics shall be used in accordance with the M&O Agreement to measure B&D's performance of the M&O service. These key metrics are detailed in Appendix 7 - Exhibit G

Appendix 1 - THE SITE AND THE SERVICES

The Sites: List of all ADCRR Locations where the application is operated.

The Services: The Services shall include the following:

1. Support in event of notification of system problems as specified in this contract
2. Evaluation of support tickets
3. Determining the extent of any change required to deal with a support ticket
4. Progression, documentation and resolution of all support tickets
5. Impact analysis of requests for changes to the product
6. Progression of approved change requests
7. Provision, upon request, of timely reports both written (as described in Section 1.13), and verbal (as requested by ADCRR) detailing the progress of support tickets
8. Remote installation of application software upgrades
9. On-site installation of application software upgrades as mutually agreed upon by B&D and ADCRR
10. Agreement of acceptance criteria testing for software upgrades
11. Holding master development copies (by B&D and in escrow) of any software included in the products and all associated documentation as produced by B&D
12. Assuring ADCRR has latest copies of all software included in the project and associated documentation
13. Maintenance of relevant documentation where applicable

Appendix 2 - PRIORITY LEVELS

Category	System Status	Priority
Critical	Indicates the entire Solution is unavailable for use resulting in a critical impact on operations.	1
High	Indicates a Module is unavailable for use where the Solution is usable but is severely limited, and no workaround for that Module exists.	2
Medium	The operation of a function in the application is restricted but use of other functions is not impacted or where a	3

AMERICAN OVERSIGHT

	requirement is not being met, but the application is otherwise usable.	
Low	Minimal business impact. Indicates that the problem results in little impact on operations or there is reasonable circumvention of the problem. For example, misspelled words, graphical designs.	4

Appendix 3 - TARGET RESPONSE AND RESOLUTION TIMES

Priority	Target Response Time	Target Resolution Time
1	1 Clock Hour	5 Clock Hours
2	24 Clock Hours	48 Clock Hours
3	48 Business Hours	72 Business Hours
4	48 Business Hours	72 Business Hours

Target Response Time: is defined as the time, from the moment when ADCRR IT Service Desk or other designated support personnel notifies B&D of a support ticket (as defined in Section 1.1, Section 1.2, and Section 2), for B&D to begin working on the reported support ticket and to inform ADCRR IT Service Desk of this phase of the support ticket process.

Target Resolution Time: is defined as the targeted time, 24 clock hours, to resolve and initially close a support ticket as set out in Section 1.10. The targeted time to resolve a support ticket does not represent the reporting of the final closure as defined in Section 1.11.

There may be instances where a resolution cannot be achieved in the specified target time period. These situations are described in the paragraph below. When a resolution cannot be achieved in the specified target time period for any of the reasons described below, and it is mutually agreed that the circumstances do not constitute the need for escalation (as defined in Section 4), then no target resolution time will be entered in the standardized monthly **support ticket report** (as described in Section 1.12), and a comment that states "Target Resolution Time is on hold pending [*reason*]" will be added. The support ticket status of the *Target Resolution Time* for these instances will be revised once the issue preventing its resolution is settled.

Target Response and Resolution Exceptions:

AMERICAN OVERSIGHT

Situations that may prevent a support ticket from meeting the *Target Response & Resolution Time*

1. Support tickets that require approval from ADCRR IT
2. Support tickets that represent a non-recurrence of an incident, or intermittent fault (as defined in Section 1.11.3)
3. Support tickets that require information and additional requested support from ADCRR (as defined in Sections 1.5 through 1.12).
4. ADCRR IT disagrees with the IRT's finding, and the support ticket cannot be closed (as defined in Section 1.10).
5. Any mutually agreed upon situation where ADCRR and B&D determine that the support ticket cannot be resolved in the specified Target Resolution Time.

Under the above circumstances, the Target Resolution Time may be recalculated by subtracting the time required by ADCRR to meet the requirements, requests or procedures that prevent the B&D IRT staff from resolving the support ticket as described in Sections 1.5 through 1.12. When these circumstances arise, B&D will not be liable for any failure to meet these targets.

AMERICAN OVERSIGHT

MAINTENANCE AND OPERATION AGREEMENT

Overview

This document represents the Service Level Agreement ("SLA") for the maintenance and operation of the Mi-Case offender case management software (the "Software") for the Arizona Department of Corrections, Rehabilitation & Reentry ("ADCRR") and Business & Decision, North America (PA), Inc. ("B&D").

Under the terms of this SLA, maintenance and operation services shall be available on-call 12-hours per day, 7-days per week, with an agreed response time from the receipt of each request.

ADCRR Information Technology (IT) is responsible for first-line and second-line support. ADCRR IT support will attempt to resolve any non-product related issue prior to raising a third-line support ticket to B&D. ADCRR shall be responsible for specific problem determination and resolution for those items and issues that are not within the Mi-Case application.

The role of **first-line support** incident management is to attempt to collect as much information and diagnostics about the incident as possible. First-line may even resolve the issue when possible. This will reduce resolution time for all minor incidents (e.g. 'My computer doesn't work'; OR, 'My password needs to be reset').

The role of **second-line support** of incident management is comprised of staff to rule out end user training need and end user errors (e.g. 'How do I upload a document'; OR, 'I cannot locate a specific report').

If first and/or second-line support cannot resolve the issue, ADCRR IT support personnel will raise a ticket with B&D **third-line support**. See Appendix 6 for reference to B&D key resources.

If a third-line support ticket is determined to be a software defect, B&D agrees to provide a resolution within the time-period set forth in Appendix 3. In the event that a software defect results in general service interruption of the Software or in essential elements of the Software, B&D agrees to provide resolution within the soonest possible time frame.

The third-line support ticket procedure defined below shall be followed.

1 Third-line Support Ticket Procedure

1.1. In the event ADCRR IT support is unable to resolve the problem with the Software, the representative will submit a third-line support ticket with the B&D Customer Service Helpdesk ("B&D-CSH"). To raise a support ticket with B&D-CSH, ADCRR IT support shall follow the following procedure:

1.2. Contact the B&D-CSH by telephone, fax, email or entering a support ticket within the B&D-CSH online Service Desk (SD) (as set forth in Section 2), and provide the following information:

AMERICAN OVERSIGHT

1.2.1. Contact details (contact name, location, telephone number)

1.2.2. The name of the module in which the problem or failure arose or occurred in the software

1.2.3. Any unique reference number used by ADCRR's internal IT Service Desk (if applicable)

1.2.4. All problem details including: date/time of problem, content of any error message (if applicable), its opinion of the support ticket priority, the nature of problem, any precursors to problem, whether the problem may be easily replicated, and any other associated and/or relevant information such as screen dumps (screen shots), reports and data files.

1.3 ADCRR shall be responsible for ensuring that support tickets are raised only by those individuals designated to do so.

1.4 Upon receipt of the support ticket, it will be categorized according to the priority levels set forth in Appendix 2. B&D will at, all times, use its best efforts to respond to support tickets as quickly as possible in accordance with the target response and resolution times set out in Appendix 3.

1.5 The process flow of a support ticket will follow the agreed process flow as detailed in Appendix 8.

1.6 As part of the B&D-CSH, the B&D Issue Response Team ("IRT") will inform ADCRR IT if a site visit is required to resolve a support ticket.

1.7 When a support ticket is passed to the B&D IRT, the IRT member appointed to resolve the support ticket shall determine whether the resolution of the problem requires application software or data to be repaired. If repairs are required, then the IRT member may require and request further information from ADCRR to resolve the problem. Any time that is associated with the collection, definition or confirmation of further information will be excluded from the target response times set out in Appendix 3. Once the IRT member has determined what is likely to be required to resolve the problem, they will inform the ADCRR IT support staff of the current state of the support ticket. Once a resolution path has been determined then the IRT member will inform the customer and close the support ticket in line with the support ticket closure flow Appendix 8. In the event that a response cannot be provided within the target response times set out in Appendix 3, the support ticket shall be escalated in accordance with the Escalation Procedure defined in section 4.

1.8 If a resolution of a support ticket is likely to result in a material impact on the Software or its related products, the IRT member will seek authorization from the ADCRR IT prior to carrying out any action that is likely to have such impact. If the support ticket is a change request (as defined in section 3) the IRT member will carry out an impact analysis detailing the nature and cost of the change. No changes will be made without prior written authorization from ADCRR. The IRT member will inform the customer and close the support ticket in line with the support ticket closure flow Appendix 8.

1.9 Should the investigation of a support ticket by the IRT indicate that the problem resulted from an addition to or modification of the Software or its related products by ADCRR, the IRT member will inform ADCRR at the earliest opportunity indicating that any work to be carried out can be conducted on a chargeable basis in line with the time and materials rate card as Appendix 9 for the implementation of the change. In order to progress on any such works thereafter, B&D would require a written agreement and authorization from the Customer to

AMERICAN OVERSIGHT

correct problems not covered by this SLA. The IRT member will inform the customer and close the support ticket in line with the support ticket closure flow Appendix 8.

1.10 If the Customer disagrees with the IRT's findings, a report of the findings from both the IRT staff and the Customer's Helpdesk Staff will be provided to the named Support Delivery Manager for B&D and the Customer's Support Delivery Manager for assessment and resolution. If after 5 business days (or a time period mutually agreed upon) there is no resolution on the IRT's disagreement, the executive representatives for both the Customer and B&D will negotiate the same findings for ultimate resolution.

1.11 Support tickets will be closed by mutual agreement between the Customer and the IRT member on the occurrence of any of the following:

1.11.1. The Customer and the IRT members agree that the perceived problem was due to the operator's misunderstanding of the Software specification, or equivalent documentation, and as such, no fix is required.

1.11.2. The Customer agrees that the software is operating in line with the specifications.

1.11.3. Non-recurrence of an incident, or intermittent fault, which cannot be reproduced, despite repeated efforts to do so, within a set period of 5 days. This period of non-recurrence can be mutually adjusted if conditions warrant a longer or shorter time range. In the above case, the support ticket will not be included in any resolution targets.

1.11.4. The IRT member has concluded that the issue is related to system defect and a system defect has been created within the defect management tool.

1.11.5. The IRT member has concluded that the issue is related to data defect and a data defect has been created within the defect management tool.

1.11.6. The IRT member has notified the customer that there is a previously known defect that is already entered in the defect tracking system.

1.11.7. The IRT member has requested further clarification or information relating to the support ticket and the customer has failed to provide further clarification or information within 5 business days of the support ticket being opened and following at least 1 email reminder after the support ticket being opened.

1.11.8. Following the IRT member deploying an immediate 'hot' fix to the UAT environment and the customer failing to test the appropriate target resolution time detailed in Appendix 3.

1.12 A standardized monthly '**support ticket report**' of all support tickets will be provided by the B&D-CSH to ADCRR's IT leadership team.

The monthly support ticket report will:

1.12.1. Show all active support tickets (for the entire time-period of the report).

1.12.2. Show all support tickets opened and closed during the entire time-period of the report including each target response and target resolution times.

1.12.3. The support ticket report will show the status (such as "in development", "under investigation", or "under review by the Customer") for each support ticket and any other comments or pertinent information about that support ticket for all reported support tickets.

AMERICAN OVERSIGHT

1.13 The date for future monthly meetings (or other mutually agreed upon timeframe) between the Customer's Helpdesk Staff and the B&D will be set at the conclusion of the current months standing meeting.

2 Methods of Contacting B&D

The Customer may contact B&D-CSH by using any of the following means:

2.1 By entering a support ticket in the online B&D-CSH Service Desk at: http://servicedesk.bndna.com and following the ACIS Service Desk Requester User Guide detailed in Appendix 5.

2.2 By telephoning the B&D-CSH on *1(833) 564 2273* or such other telephone number provided by B&D to the ADCRR with two-week notification (or other mutually agreed upon timeframe). Phone calls may be backed up by e-mails. The B&D-CSH will log the call and pass this information on to an appropriate IRT member. The Customer Representative making the call should have available to them as much information about the problem as possible, and as a minimum, the information requirements set out in section 1.2.

2.3 By sending an email to ServiceDesk@bndna.com , or such other email address provided by B&D to the Customer with two-week notification (or other mutually agreed upon timeframe). The email will give as much detail as possible with, as a minimum, the information requirements set out in section 1.2. Email contact is suitable for any requirement; however the target response times will commence the time of receipt of the communication. All emails should be immediately followed by a telephone call to B&D-CSH.

3 Change Requests / Variations To Service

3.1 The Customer shall be entitled at any time during the Term of this Agreement to request in writing to B&D a Change Request or Variation to the Services already provided. The Customer shall provide B&D with full particulars of any requested change or variation and such additional information as B&D shall reasonably require.

3.2 All change requests shall be requested formally by the customer

3.3 Following receipt of a Change Request or Variation to the Services pursuant to section 3.1 above, B&D will respond within ten (10) business days and shall inform the Customer in writing whether it considers such Change Request or Variation to the Services to be technically feasible; and if so, any amendment or variation to the Charges and /or Services that it would make as a result of such request, as such a formal estimate of effort (EOE) will be provided by B&D to the customer.

3.4 As part of the EOE, B&D will notify the customer of the number of hours required to implement the Change Request.

3.5 The Customer shall notify B&D within ten (10) business days of receipt of the EOE referred to in section 3.3 above if it wishes to proceed with the Change Request or Variation to the Services as provided by B&D. The customer will, as part of this notification to proceed (NTP), identify whether the pre-arranged 10,000 hours of change effort is to be utilized as part of the implementation of the change. In the event that the 10,000 hours of change effort is not to be used for the implementation of the change, the customer will provide B&D with an appropriate purchase order for the effort, in line with the time and materials rate card as Appendix 9 for the implementation of the change.

AMERICAN OVERSIGHT

3.6 If the customer identifies further changes to the original change request discussed in 3.1 then the process will revert back to section 3.1 above. Failure of the Customer to notify B&D within the ten (10) business day period shall be deemed to constitute the Customer's non-acceptance of the proposal.

3.7 Upon receipt of the NTP by the customer, B&D will plan the development and identify a projected start date and estimated completion date.

3.8 Upon approval of the development plan by the customer, B&D will commence work on the change request in line with the development plan.

3.9 During working on the change request B&D will track actual hours against the estimate and report progress weekly to the customer with an appropriate email.

3.10 The IRT shall be responsible for carrying out any Software change requests agreed between B&D and the Customer under the terms of this Agreement, and for reporting to the Customer.

3.11 If the change request appears that it will not complete on the planned EOE completion date or if the amount of effort required to finish the change request will exceed 10% over the EOE, B&D will notify the customer and stop working on the Change.

3.11.1 The customer will need to then take one of the following actions:

3.11.1.1 Formally ask B&D to proceed to completion of the change request – setting new target thresholds (end date or increase to EOE)

3.11.1.2 Formally ask B&D to re-estimate the change request (step 3.1)

3.11.1.3 Formally ask B&D to drop the change request / perhaps identifying a new change request with altered requirements / expectations all effort expended up to this point will be deducted from the 10,000 hours of change effort.

3.11.2 Upon an updated NTP B&D will commence work on the Change request (delays between stopping work and restarting will be reflected in a revised plan for the project)

3.12 A Change Request from the Customer to B&D should include not less than the information detailed in Appendix 4.

3.13 Upon the completion of the development of the change request B&D will formally request the approval to promote the change request to the User Acceptance Testing (UAT) environment.

3.13.3 The customer will then test the Change Request

3.13.3.1 Any support that B&D provides during UAT testing will be billed against the Change request.

3.13.3.2 Any bugs identified (during UAT) and subsequently worked on by B&D (during UAT) will be billed against the Change request.

3.13.3.3 Any changes made by the customer to the requirements or expectations of the change request will need to be done formally in writing and will trigger the process detailed in 3.1

3.14 Following approval to promote the change request to the UAT environment B&D will formally notify the customer that the change has been successfully deployed and is ready for the customer UAT process.

3.15 Upon the completion and formal approval of the customer that the change has passed their UAT process a formal request to B&D will be made to promote the change to production.

AMERICAN OVERSIGHT

3.16 Formal acceptance of the change and all deductions of the 10,000 hours of change effort consumed for the change will be final and any outstanding monies due for the change shall be invoiced and paid for by the customer when the change is either promoted to production or 30 business days after the change has been delivered to the UAT environment.

3.17 A standardized weekly report by email of all Change Requests will be provided by the B&D-CSH to the Customer's Helpdesk Staff. This report will show no less than:

3.17.4 All open Change Requests (for the entire time period of the report).

3.17.5 All Change Requests closed during the entire time period of the report.

3.17.6 The status (such as "in development", "under investigation", or "waiting for CMRB") for all open Change Requests.

4 Escalation Procedures

Any matter escalated under the Agreement shall have two stages:

4.1 Stage 1

If the support ticket has not been resolved within the appropriate Target Resolution Time, or the support ticket does not meet an exception as shown in Appendix 3, the IRT member(s) tasked with the issue will inform the B&D-CSH of the reason for failure to reach resolution and his/her best analysis of the resources and time-scales required to resolve the problem. The B&D-CSH will then refer the matter to B&D's Customer Service Manager, who will determine any additional or alternate resources necessary and ensure they are applied to the issue and inform the Customer of the escalation. The B&D-CSH will inform the originating Customer Point of Contact of the issue's escalation, and the appropriate Manager of B&D shall be informed of the Stage 1 escalation.

4.2 Stage 2

4.2.1 If the support ticket has not been resolved within a time period equal to double that specified as the Target Resolution Time for the relevant priority level, or the support ticket does not meet an exception as shown in Appendix 3, the B&D Manager shall inform the relevant Director of B&D if the issue is not likely to be resolved by the next escalation time limit.

4.2.2 The Director of B&D and the Customer Point of Contact will mutually determine an appropriate course of action and whether to allocate additional or alternate resources, including outside agencies if appropriate. The Customer will be kept informed of the status of the escalated issue, and the B&D Customer Service Manager will inform the originating Customer Point of Contact of the Stage 2 escalation.

4.3 B&D Management

A list of the B&D Directors, Managers will be provided to the ADCRR Service Desk staff upon initiation of this contract as Appendix 6 and this list will be updated whenever a change is made to the B&D Management.

Appendix 1 - THE SITE AND THE SERVICES

The Sites: List of all ADCRR Locations where the application is operated.

The Services: The Services shall include the following:

1. Support in event of notification of system problems as specified in this contract
2. Evaluation of support tickets
3. Determining the extent of any change required to deal with a support ticket
4. Progression, documentation and resolution of all support tickets
5. Impact analysis of requests for changes to the product
6. Progression of approved change requests
7. Provision, upon request, of timely reports both written (as described in Section 1.13), and verbal (as requested by the client) detailing the progress of support tickets.
8. Remote installation of application software upgrades
9. On-site installation of application software upgrades as mutually agreed upon by B&D and the Customer.
10. Agreement of acceptance criteria testing for Software upgrades
11. Holding master development copies (by B&D and in escrow) of any software included in the Products and all associated documentation; as produced by B&D
12. Assuring the Customer has latest copies of all software included in the Project and associated documentation
13. Maintenance of relevant documentation where applicable

Appendix 2 - PRIORITY LEVELS

Category	System Status	Priority
Critical	Indicates the entire Solution is unavailable for use resulting in a critical impact on operations.	1
High	Indicates a Module is unavailable for use where the Solution is usable but is severely limited, and no workaround for that Module exists.	2
Medium	The operation of a function in the application is restricted but use of other functions is not impacted or where a	3

AMERICAN OVERSIGHT

	requirement is not being met, but the application is otherwise usable.	
Low	Minimal business impact. Indicates that the problem results in little impact on operations or there is reasonable circumvention of the problem. For example, misspelled words, graphical designs.	4

Appendix 3 - TARGET RESPONSE AND RESOLUTION TIMES

Priority	Target Response Time	Target Resolution Time
1	1 Clock Hour	5 Clock Hours
2	24 Clock Hours	48 Clock Hours
3	48 Business Hours	72 Business Hours
4	48 Business Hours	72 Business Hours

Target Response Time: is defined as the time, from the moment when the Customer notifies B&D of a support ticket (as defined in Section 1.1, Section 1.2, and Section 2), for B&D to begin working on the reported support ticket and to inform the Customer of this phase of the support ticket process.

Target Resolution Time: is defined as the targeted time, in 24-hour days, to resolve and initially close a support ticket as set out in Section 1.10. The targeted time to resolve a support ticket does not represent the reporting of the final closure as defined in Section 1.11.

There may be instances where a resolution cannot be achieved in the specified target time period. These situations are described in the paragraph below. When a resolution cannot be achieved in the specified target time period for any of the reasons described below, and it is mutually agreed that the circumstances do not constitute the need for escalation (as defined in Section 4), then no target resolution time will be entered in the standardized monthly **support ticket report** (as described in Section 1.12), and a comment that states "Target Resolution Time is on hold pending [*reason*]" will be added. The support ticket status of the *Target Resolution Time* for these instances will be revised once the issue preventing its resolution is settled.

Target Response and Resolution Exceptions:

Situations that may prevent a support ticket from meeting the *Target Response & Resolution Time*

AMERICAN OVERSIGHT

1. Support tickets that require approval from the Customer
2. Support tickets that represent a non-recurrence of an incident, or intermittent fault (as defined in Section 1.11.3)
3. Support tickets that require information and additional requested support from the Customer (as defined in Sections 1.5 through 1.12).
4. The Customer disagrees with the IRT's finding, and the support ticket cannot be closed (as defined in Section 1.10).
5. Any mutually agreed upon situation where the Customer and B&D determine that the support ticket cannot be resolved in the specified Target Resolution Time.

Under the above circumstances, the Target Resolution Time may be recalculated by subtracting the time required by the Customer to meet the requirements, requests or procedures that prevent the B&D IRT staff from resolving the support ticket as described in Sections 1.5 through 1.12. When these circumstances arise, B&D will not be liable for any failure to meet these targets.

E: charles.spannagel@bndna.com

On May 27, 2020, at 5:09 PM, Spencer Scott <sscott3@azadc.gov> wrote:

During our CAP discussion today, there was a difference identified between both sides' understanding of the CAP contents.

* B&D planned to include any bugs created up to 02/21/2020 that are still open. Qty. 63
* ADCRR planned to include any bugs created up to 04/30/2020 that are still open. Qty. 115

The difference between these two positions is (52) open bugs created between 02/22/2020 and 04/30/2020. The attachment shows the specific bugs and highlights the (52) in question in blue.

I created these figures by pulling a list of active bugs in TFS (State=all, except Closed) and sorting by Created Date.

If there are any concerns with this assessment of the situation, please advise.

Warm Regards,

Spencer Scott, PMP

Hi Charles-

Thank you for sending. I adjusted your update for the '**User Response Time**'.

Previous:

ADCRR and B&D are committed to a continued discussion surround the SLA metrics and how they may be adjusted in the future. To that end, B&D and ADCRR IT will meet in 6 months and will adjust accordingly if needed. B&D will research and determine the best method and techniques for monitoring the response times for calculations, formulas and workflows; and what a logical and reasonable response time should be.

Updated:

B&D will research and determine the best method and techniques for monitoring the response times for calculations, formulas and workflows; and what a logical and reasonable response time should be.

As for the **reports**, the decision to remove was under the old regime. Myself and my teams feel that should never have happened and asked that it be reintroduced as it was there to begin with. We reworded it to what we feel is applicable with respect to support. According to the notes, B&D had no comments or updates. I took that as B&D was okay with this. Please let us know B&D's position and their recommendations for compromise so that if something breaks, we receive support (e.g. like the report server is down; existing reports stop functioning without any changes made by ADCRR; etc.).

Service Level Agreement – User Response Time

HEADING	DESCRIPTION	SLA Non-Compliance Withholding %
User Response SLA:	All response times are affected whenever a request by the user invokes a remote interface with other systems. ADCRR and B&D are committed to a continued discussion surround the SLA metrics and how they may be adjusted in the future. To that end, B&D and ADCRR IT will meet in 6 months and will adjust accordingly if needed. B&D will research and determine the best method and techniques for monitoring the response times for calculations, formulas and workflows; and what a logical and reasonable response time should be. Average page load time <= 5 seconds for the " https://aims2.us/ProtectiveCustody/ PCInterviewAssessment.aspx Screen "	2% The SLA is defined by the aggregate compliance of User Response SLA Metrics/Components. If one metric in this category is not met than the category is deemed by ADCRR as not compliant. The full 2% Withholding percentage will be incurred by the Offeror

Subject: RE: Utility Fees Follow Up
Date: Wednesday, May 27, 2020 10:37:21 AM

George and I spoke about this today. He wanted to know if we do turn this off and then back on later if it would process all records retroactively. The answer to that is no. When it runs in the middle of the month each month, it only sends the prior month's utility fees. I'm not sure we need to turn it off on our end if John has done something to keep something from processing on his end but I can't speak for what's configured on the KeepTrak side.

Also as it stands we still have not send the April Fees that would have sent on May 16th. Let us know if we should send them. We will need to do this before June 1st if we do. Also let us know if we need to disable the utility fees on our side.

Thanks!
Aaron

Subject: Re: Utility Fees Follow Up

Hello,

Please see the attached Inmate notification.

1. **We still have not sent the April utility fees to Keefe.**
2. **Do we need to? No , until further notice.**
3. **Also should we disable this interface on our side for now or should we continue to send and just let John/KeepTrak determine whether or not to process the records we send? I cannot answer this question, it is not my expertise. We will notify you when the deduction will take place again. What is the appropriate technical solution for the temporary hold, I cannot advise.**

AMERICAN OVERSIGHT

1. **We still have not sent the April utility fees to Keefe.**
2. **Do we need to?**
3. **Also should we disable this interface on our side for now or should we continue to send and just let John/KeepTrak determine whether or not to process the records we send?**

John mentioned he will be meeting with ADC tomorrow and could also discuss then as well.

Thanks,

Subject: RE: Quick Note

Good afternoon Holly,

Here is what I have been told and am able to deliver to you. Thank you for also putting it on the list for Mr. Profiri.

- Any work we do on EUIL – Amendment 2 items, monthly lists (additions to the EUIL), M&O Remediation items ***(Ad Hoc, Data, outside of general support***) – would be what they call "***billable***"
  - ***This does include internal meetings that need to occur in order for the B&D team to work together on the items/initiatives***
  - However, this is covered at a fixed price for the 10,000 EUIL and the 10,000 Remediation hours
  - so 1st 20,000 hours are already paid for

- Any work we do on bug fixing, issue determination, weekly status meetings (including PM meetings with ADC, daily Bug Triage with Charles and Steven), bug root cause analysis would be what they call not billable
  - covered under M&O support

I hope this helps but I need to make sure B&D is transparent with you and there may be more items

AMERICAN OVERSIGHT

you have questions about.

Holly,

Again, I apologize for the confusion this has caused. We will get it sorted immediately for Mr. Profiri and Dean's signoff. I went straight through the draft and pulled appendices as they appeared which is why they are out of order.

Appendix 6: Is correct for B&D, except for Local Account Manager (Will Carbajal). I will update with the B&D name once provided by Dean.

Needed from: ADC Customer Key Resources and approved ST Raisers (individuals who can log a ticket):
ADC To Provide

Appendix 3: Is correct per SLA agreement

Appendix 2: Is correct per contract language

Appendix 8: **Needs to be updated with Sandy's diagram**

Appendix 4: Charles to ensure most recent form is inserted for a "Change Request" or we need to update the document with EUIL language

Appendix 9: Is correct per Dean

Appendix 5: Charles to update and deliver Service Desk Requester User Guide, Charles also to replace "AIMS2" with ACIS though out document

Appendix 7: Charles to insert signed off on Exhibit G

Appendix 1: **Appendix 1 - THE SITE AND THE SERVICES** Need a list of all sites and services that use ACIS

Subject:	QlikView License and Account/Registration Information
Date:	Tuesday, May 26, 2020 9:04:39 AM

Hello Charles-

ADCRR is in the process of upgrading our hardware OS. That said, we need support from B&D concerning the QlikView application licensing and account information/registration. We have it loaded on a machine which is running Windows 7. We will lose the information during the upgrade, so we need B&D's assistance.

Hema Chennojwala is the person to work with on the ADCRR side, but who can we speak to on the B&D side who can assist?

AMERICAN OVERSIGHT

		Descriptions						
	SLA	Proposed by B&D	ADC Requested Changes to Descriptions	5/11/2020 Discussion	B&D Response	5/15/2020 - ADCRR and B&D	5/18/2020 - ADCRR
1	System Response	Average page load time <= 7 seconds site wide as recorded using Google Analytics Avg. Page Load Time (sec)	Change to less than or equal to 3 seconds.	Average page load time <= 3 seconds site wide	7 seconds was agreed upon during the meeting in February with all parties present. This was a reduction from 10 seconds. 3 seconds is unachievable in part because of the ADC Network	ADCRR agrees with B&D that this should remain as <=7. We'll revisit this SLA as a team in 6 months and then annually. Average page load time <= 7 seconds site wide as recorded using Google Analytics Avg. Page Load Time (sec).	Average page load time <= 7 seconds site wide as recorded using Google Analytics Avg. Page Load Time (sec). **ADCRR expects continuous improvement both internally to the agency and externally from B&D to achieve industry standards.**
2	User Response Time	All response times are affected whenever a request by the user invokes a remote interface with other systems. Average page load time <= 5 seconds for the "http://aims2.us/ProtectiveCustody/PCInterviewAssessment.aspx Screen"	User needs to be defined; ADOA requests feedback from ADC operations on whether this is the relevant sample page?	What in C4 needs to be removed per ADCRR since the link is for the Protective Custody screen which has only one field calling out to Keeptrack for inmate balance that does not cause a delay. Need to consider screen pops response time separate from the page . Recommend that this SLA reflects the user's interactions with a page such as the logic & therefore refresh/response rate to actions taken on a page such as drop down menu selections, **etc. Recommend <=2 second response times for calculations, formula and workflow response rates.**	How are we supposed to monitor this when we do not have a technique for it?	Per conversation between ADCRR and B&D, we agreed we will keep the SLA description in Column C for now. We will revisit this SLA metric as a team (B&D and ADCRR IT) in 6 months and will adjust accordingly. B&D will research and determine the best method and techniques for monitoring the response times for calculations, formulas and workflows; and what a logical and reasonable response time should be. All response times are affected whenever a request by the user invokes a remote interface with other systems. Average page load time <= 5 seconds for the "http://aims2.us/ProtectiveCustody/PCInterviewAssessment.aspx Screen"	
3	System Availability/Reliability	• 24/7/365 99.95% up time; measured weekly. Gergana... Can you answer Charles questions below regarding Utility Fee Charges?

- **This leaves a few questions to be answered.**
    1. **We still have not sent the April utility fees to Keefe.**
    2. **Do we need to?**
    3. **Also should we disable this interface on our side for now or should we continue to send and just let John/KeepTrak determine whether or not to process the records**

Thank you, Charles.

Per our conversation on 5/19, all hours need to be approved by the ADCRR prior to use/consumption from B&D.

We'd like to know:

- Who performed the work
- What the 7.5 hrs for week 5/17 is for
- If we can get a more comprehensive break down (e.g. AD HOC Support - Email; AD HOC Support - Meeting; AD HOC Support - Promotion to Prod; etc.)

We also need a breakdown of what would be considered a system issue and a defect in the module; the ticket details needed to act on this.

And regarding the training of ADCRR folks on the use of the B&D ticketing system, training will be provided by B&D, but ADCRR needs to know if we will be charged.

Respectfully,

Holly Greene

Hope you are hanging in there?

I am never sure which email address is the right one, so I just send it to both

As discussed, Charles has been working on the slide deck attached for M&O Governance. I think most of the things in this are sensible. Let me know your thoughts? I am free tomorrow (Thursday) if you have time for a call to walk through and adjust it, if needs be!

Have a great night…

Dean

AMERICAN OVERSIGHT

MAY 2020

DRAFT M&O GOVERNANCE PROCESS

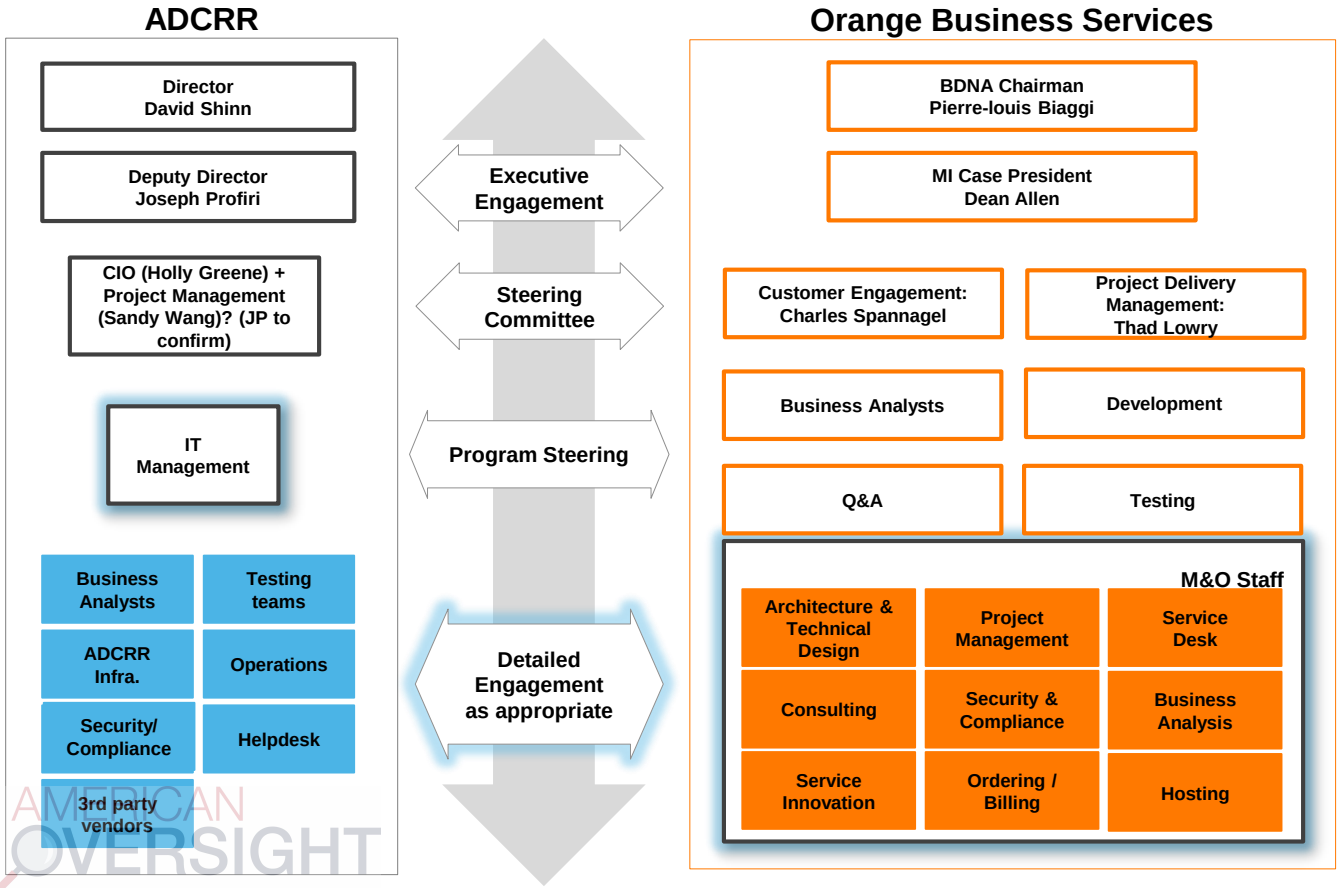
ADCRR & BUSINESS AND DECISION

Arizona Department of Corrections Rehabilitation & Reentry

Business & Decision
Empowering Digital Business

AMERICAN OVERSIGHT

BDNA engagement method



Partnership principles:

- **High touch executive engagement** – Strategic decisions & arbitrations in coordination with ADCRR executives
- **Customer engagement**– throughout the life cycle of M&O, the BDNA customer engagement manager will own the commercial relationship and support customer business and IT strategy
- **Project management** – The project management organization will deliver maintenance as well as new developments of the solution

The engagement is driven by a customer centric philosophy, guided by the customer's business needs.

AMERICAN OVERSIGHT

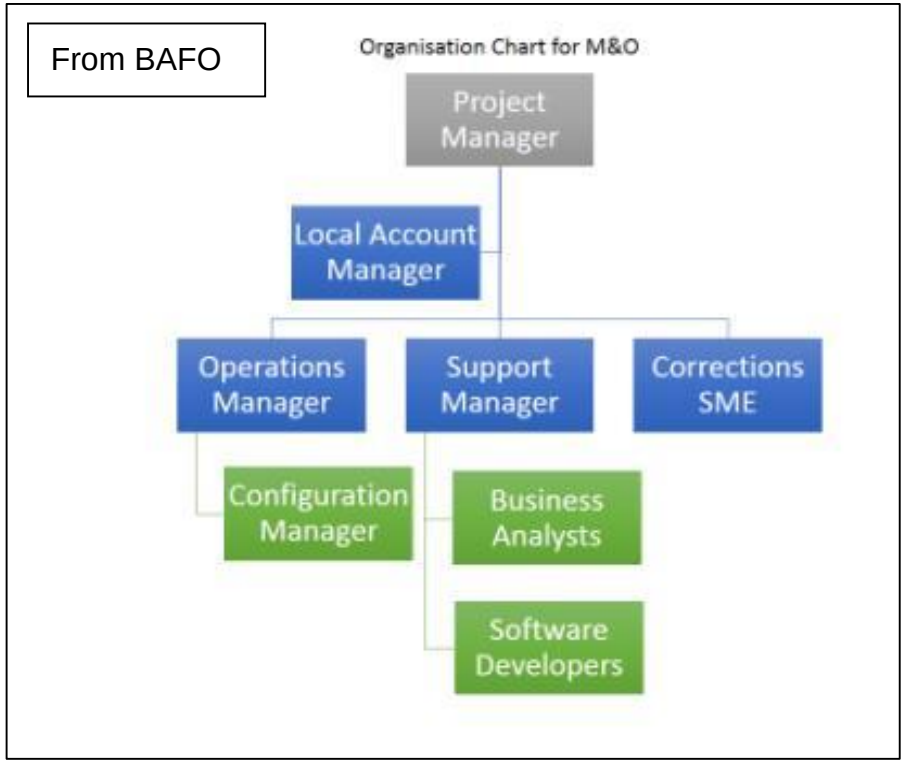
BDNA Client Business Unit

The Client Business Unit is organized to deliver:

- Maintenance of the solution (Bugs fixing), through a dedicated staff and capacity
- Development of new functionalities as part of the 10k hours envelope dedicated to it

From 05/01/2020 to 05/01/201, This team will be supplemented by additional staff in order to deliver the additional remediation hours (10k hours) agreed in the last Amendment to the contract

From BAFO



AMERICAN OVERSIGHT

Customer Engagement Manager

CEM

The Customer Engagement Manager ensures accountability of the execution of the contract and steers a proactive partnership with ADCRR

- Coordinate a cross functional team in order to develop a partnership with the ADCRR with full accountability to achieve commitments in contractual agreement and delivering satisfaction and value to the ADCRR.
- Implement full contract customer facing governance incl. appropriate governance boards, steerco's, escalation path and contractual change management.
- Bring BDNA delivery team together into a coherent entity fine-tuned to interact with the ADCRR organization in an optimal and minimum impacting way.
- Significantly reduce the level of effort which ADCRR has to invest to ensure the desired contractual benefits are achieved.

AMERICAN OVERSIGHT

Project Delivery Manager

PDM

The Project Delivery Manager is accountable to provide day-to-day coordinated delivery of agreed contractual solutions and services for ADCRR; has overall responsibility for the quality of service and customer satisfaction for all implemented BDNA services; with a view to optimizing workforce utilization

- Proactively identify and scope opportunities for service enhancement providing ADCRR's experience improvement and greater value generation; spread innovation for optimization and leverage of new or improved processes.
- Prepare and publish Program Plan (including Program Structure / Roadmap / Governance Matrix) of customer Service Strategy; ensure all stakeholders agree and understand roles and responsibilities
- Identify and mitigate risks (failure or delay); ensure appropriate levels of business contingency / continuity are in place.
- Implement full contract customer facing governance, incl. appropriate governance boards and steerco's, for escalation path and contractual change management
- Ensure full compliance of agreed solutions and services to meet customer needs; proactive monitoring of agreed SLAs in order to deliver exceptional service and acknowledged customer value.

AMERICAN OVERSIGHT

Governance
Quarterly business review (DRAFT)

Members	**ADCRR**	*Initially a small group (JP & HG)*
	BDNA	*Initially a small group (DA & CS)*
Agenda	- ADCRR Business objectives & roadmaps - BDNA business performance (Implementation, Operations, etc.) - INNOVATION: Market trends, technology roadmaps - Relationship health, customer survey results - Dashboard performance - Development Hours spend reviews - New business review	
Inputs	- Status of actions from previous meetings - Monthly performance for both build and run - Headline News - Survey feedback	
Outputs / Objectives	- Minutes and updated actions list - Program performance	
Frequency	Once per quarter ; maximum of two hours	

AMERICAN OVERSIGHT

Governance

Program review session (DRAFT)

Members	**ADCRR**	*TBD*
	BDNA	Charles Spanagel, Thad Lowry, Aaron Pratt, Chris Masson & Dean Allen
Agenda	- Update on actions from previous session - Review of SLA dashboard performance - Review of exception logs - Process and/or procedure challenges; opportunities for improved way of working - Account relationship, End-user satisfaction survey programs - Schedule reporting compliance - Continuous improvement initiatives and achievements	
Inputs	- Actions from previous meetings - Exceptions from billing, build and/or run - Governance dashboard - Headline News	
Outputs / Objectives	- Minutes and updated actions list - Maintain Governance for effective and continuous improvement program - Executive summary	
Frequency	Scheduled as calendars permit	

AMERICAN OVERSIGHT

Governance

Bi-Weekly Change Management Release Schedule (DRAFT)

Members	**ADCRR**	
	BDNA	Charles Spannagel, Thad Lowry, Chris Masson
Agenda	- Release roadmap - Outstanding defects/bugs in the system - CAP completion - Any issue requiring escalation - Roundtable discussion with ADCRR	
Inputs	- Actions list from previous meetings - Minutes from weekly design review	
Outputs / Objectives	- Minutes and updated actions list	
Frequency	Bi-weekly	

AMERICAN OVERSIGHT

Governance

Monthly operational and implementation review session (DRAFT)

Members	**ADCRR**	
	BDNA	Charles Spanagel, Thad Lowry, Aaron Pratt, Chris Masson (optional Dean Allen)
Agenda	- Update on actions from previous session - Steering committee (executive invited) review - SLA performance - End user satisfaction report - Continuous improvement initiatives and achievements	
Inputs	Actions list from previous meetings - Service management monthly report - SLA report - M&O Hours and EUIL delivery completion report	
Outputs / Objectives	- Minutes and updated actions list - Mutual agreement on monthly performance	
Frequency	Monthly – Held last Thursday of each month	

AMERICAN OVERSIGHT

Governance

Weekly Status Meeting with ADCRR IT PMO and Operational Leaders (DRAFT)

Members	**ADCRR**	
	BDNA	Charles Spannagel
Agenda	- Input from ADCRR operations on new items requests - End user satisfaction measurement	
Inputs	- Action list from previous meeting - New list of items - Satisfaction measurement	
Outputs / Objectives	- Minutes and updated actions list - New list of items	
Frequency	Weekly – Held every Friday or Monday am (TBD)	

AMERICAN OVERSIGHT

Governance

M&O Manager and ADCRR IT Leadership Weekly Status Meeting (DRAFT)

Members	**ADCRR**	
	BDNA	Charles Spannagel
Agenda	- Review previous week items progression - Identify new items - Review service desk performance - Roundtable discussion	
Inputs	- Action list from previous meeting - Serviced desk SLA view	
Outputs / Objectives	- Minutes and updated actions list - New items list	
Frequency	Weekly – Held every Thursday	

AMERICAN OVERSIGHT

Initial Governance Timeline

- **June 2020**
  - **6/5/2020 – ADCRR and B&D Monthly Status Meeting**
    - 6/11/2020 – ADCRR IT and M&O Manager Weekly Status Meeting
    - 6/18/2020 – ADCRR IT and M&O Manager Weekly Status Meeting
    - 6/25/2020 – ADCRR IT and M&O Manager Weekly Status Meeting
- **July 2020**
  - 7/2/2020 – ADCRR IT and M&O Manager Weekly Status Report Meeting
  - **7/7/2020 – ADCRR and B&D Monthly Status Meeting**
    - 7/16/2020 – ADCRR IT and M&O Manager Weekly Status Meeting
    - 7/23/2020 – ADCRR IT and M&O Manager Weekly Status Meeting
    - Meeting
    - 7/30/2020 – ADCRR IT and M&O Manager Weekly Status Meeting

AMERICAN OVERSIGHT

List of workstreams

- Parking lot – Exhibit 2 items – Capped at 1000 hours
- EUIL – capped at 9000 hours: Focused on Improved End-user experience
- M&O (10,000) Development hours: Focused on new Functionalities implementation
- Maintenance: Bugs fixing, following prioritization by ADCRR
  - CAP: All remaining Medium & Low Bugs at the time of M&O start
  - SLAs: As per agreed SLA setup
  - Service desk: Effective as of June 5th , 2020
- Measurement of Success: To be agreed with ADCRR

AMERICAN OVERSIGHT

Principles of Effort Estimate, Validation & Approval

- For M&O development hours prior to May 18th: Validation requested by ADCRR management
- M&O development hours:
  - As per ADCRR requests for development – list of items to be submitted by ADCRR
  - BDNA evaluation of Level of Efforts (LoEs)
  - ADCRR sign off on LoEs
  - BDNA commits on LoEs cap for delivery
  - Validation of Delivery as per amendment process terms (Testing ok / 30 days)
- EUIL:
  - Parking lot Exhibit 2 items to be delivered consuming no more than 1000 hours (580h to date)
  - BDNA evaluation of Level of Efforts (LoEs)
  - ACRR sign off on LoEs (9,000)
  - BDNA commits on LoEs cap for delivery
  - Validation of Delivery as per amendment process terms (Testing ok / 30 days)
  - **Measurement of success to evaluate positive impact of EUIL items onto end user satisfaction**

Amendment process

- 1st Business Day – M&O Monthly Report submitted by B&D
- 5th Business Day - Monthly M&O Status Meeting
- 10th Business Day (or prior) – ADCRR and B&D present a list of proposed EUIL items
- 15th Business Day (or prior) – B&D to provide estimate for proposed EUIL items, B&D to provide forecast of available FTE's
- 20th Business Day (or prior) – ADCRR selects items for the upcoming month

AMERICAN OVERSIGHT

SLAs

- **Service Level Agreement (SLA)**
  - Agreed to terms on May 15th , 2020
  - Utilizing multiple technologies and metrics to ensure SLA compliance
    - 3rd Party Systems that monitor System Response, System Availability, User Response
    - ServiceDesk Reports that monitor
      - Incident Response and Resolution Times
    - Additional Monthly Reports to be included in the M&O Monthly Status Meeting
      - Maintenance/Updates/Upgrades, Data Integrity and Destruction, Security, User Support and Contractor Staffing
  - B&D Weekly SLA Compliance and Risk Assessment Meeting to review all metrics
  - **Sign Off Needed**

AMERICAN OVERSIGHT

CAP

- The Corrective Action Plan consist of all medium and low bugs still active as of M&O start (Feb. 21st)

- Listed in attached document.

AMERICAN OVERSIGHT

Service desk

- **B&D Service Desk Implementation**
  - Scheduled to Go Live on 6/5/2020
  - B&D Internal Training on 5/21/2020
  - ADCRR Training the week of 5/25/2020
  - B&D Service Desk staffed Monday through Sunday 6am – 6pm
    - On call after hours support as negotiated with ADCRR
    - After hour technical support will be provided under a Time and Material basis

AMERICAN OVERSIGHT

Measurement of Satisfaction

- **Measure Current Sentiment**
  - Workstream with key ADCRR IT Staff and ADCRR Operational Users
  - Brainstorm different methodologies for End User satisfaction analysis
    - Online Surveys
    - Site Visits - Quarterly Site Visits to gauge user satisfaction?
    - Super User Panel
    - Training Evaluation
    - Product Board…
- **Setup Ongoing Satisfaction Measurement**
- **Set Targets and Expectations**

Date:	Wednesday, May 20, 2020 3:46:35 PM
Attachments:	image001.png image003.png

Good afternoon ADC Team,

Sandy, I will be making the edits for the agreed upon SLAs. The M&O agreement covers the totality of all of the items within incident management, resolution times, severities, staffing, and additional exhibits that supplement the agreement. This was sent by Dean previously and the sticking point at that time was the SLAs (exhibit G). Now, that we have come to an agreement on the SLAs, I want to review this document in its' entirety before it is sent to Dean and Mr. Profiri to sign.

I believe this document was initially reviewed by Dwight and team in February? There is nothing drastic at all in the document and if we can find time tomorrow to go over it together I will gladly do that. I can also find a time on Friday that would work. I will be on PTO but absolutely happy to jump on a call.

Whatever you guys need to feel comfortable.

Thank you.

Charles, I was under the impression that B&D will be making the necessary edits to reflect our agree-upon SLAs. Am I correct?

Also, you sent over another word document called "M&O Agreement" (attached) for sign-off discussion. This document contains more than just the SLAs and Incident Management process we

AMERICAN OVERSIGHT

have been working on. I don't really recall any requirement on Amendment #9 for signing off such a document. Can you please clarify?

Holly,

I believe Joe P and Dean are going to review the hours of work and what's chargeable versus what is not chargeable. Would you please ask Joe to bring up the level of detail you all would like on the "bills". I have sent a message to my team for the request but I do think it will be a good idea for those two to review it and provide all of us a consensus.

Thank you.

Subject: REVIEW: ACIS Functional Enhancements

Hello Joe and Dean-

Please see the attached ADCRR ACIS functional enhancements list. This is the high level overview for your review and dissemination as appropriate.

Hi Charles and Sandy-

Please work together to obtain the documentation from the IT PMO team which contains the details of each of the items of the attached presentation. The additional documents are to be used by B&D as a means of understanding the body of work which will assist their time estimation efforts. Please coordinate any conversations between B&D and ADCRR as necessary.

Subject: M&O Hours Request for Approval
Date: Tuesday, May 19, 2020 1:32:27 PM
Attachments: image005.png

Holly,

The purpose of this email is to review both the M&O hours that are backdated to February 21st per the signed amendment and the EUIL – Amendment 2 items with a start date of May 1st that we are required to deliver with a ceiling of 1000 hours. Moving forward and beginning in June ADC will dictate all work for B&D based off of the EUIL list additions as decided by ADC.

Holly please acknowledge receipt of this email and please approve with your team as quickly as possible. Thank you.

M&O Hours

There are three initiatives that B&D undertook from our site visits in the field. We realize that these should have gone through the approval process that is currently being put in place but we felt in order to get the biggest "bang for our buck" and win over End Users adoption of the system we needed to implement these tasks. These tasks are ready for UAT upon your approval.

1. **64 Bit**: Based on feedback from the users of system slowness, waiting for screens to populate and waiting for spinning wheels B&D has converted the application to a 64 bit implementation which will allow the application to make better use of memory and increase the bandwidth of the connection between the application and the databases resulting in reduction of time waiting on spinning wheels and faster screen loading. This should decrease the amount of time that it takes the users to their tasks and should improve the overall attitude when it comes to speed of the system.

2. **Data Storage**: For the Data Storage of PDF Documents we initially intended to store all PDF documents in the database. We were surprised as we got close to go live that the number of documents skyrocketed. Being so close to go live we were locked into storing the PDF's in the DB but the heavy amount of PDF documents has caused the DB gain in size at an unsustainable rate. Storing huge amounts of data in the database is very expensive and has implications on the amount of time that it takes to back up the data / replicate the data and ultimately impact the amount of time it will take to do disaster recovery. We have taken steps to store the PDF files on a secure file system called S3 and remove the documents from the database, which will reduce the amount of time it takes to do backups, copy the data from Prod to the other environments and decrease the amount of time it takes to do disaster recovery.

3. **Excessive Post Backs**: Based on feedback from the users waiting for post backs (excessive spinning wheels) we have rewritten the count module to avoid incurring that overhead and reduce the amount of time that it takes for the field to do a count. Based on studies the users were waiting on average 20 to 30 seconds before the rewrite. After the rewrite the wait time has been reduced to almost nothing. This should decrease the amount of time that it takes the users to do a count and should improve the overall attitude when it comes to speed of the system.

TASKS	3/8	3/15	3/22	3/29	4/5	4/12	4/19	4/26	5/3	5/10	5/17	Grand Total
AP0357 - AZ DOC - M&O Development Hours	33.0	46.0	31.0	51.5	45.0	26.0	29.0	22.8	18.0	261.5	157.8	721.5

4 - Parking Lot		2.0	2.0	2.0	1.0				2.0	2.0		11.0

EUIL – Amendment 2 Items

B&D has used 50% of the allotted 1000 hours on the Amendment 2 items. We are delivering this week the following to UAT 31493, 37369, 40631. The following items in progress are 16465, 16466, 16474, 16475. The remaining items are 28774 and 28915. We underestimated our bid of the 9 items for 1000 hours. The work may go over the 1000 hours but this will be at no additional charge to ADC. I will continue to report on the status of these items as they make their way to UAT.

Subject: Re: EUIL List Items

Hi Charles-

It was received and distributed to Deputy Director Profiri last week. After my conversation with him yesterday, I am (coincidentally enough) about ready to send an email to Dean and Joe with you and Sandy on copy which contains the list.

Respectfully,

Holly Greene

th

AMERICAN OVERSIGHT

I wanted to confirm that the list of EUIL items will come over prior to the 25 so that we may provide feedback and quotes. After which ADC will decide which items to "green light" for development? I believe the contract calls for 400 hours atleast per month and this month is included. I may have this wrong and I know this is the first month so we are figuring out this process together. Please let me know.

Hello Joe and Dean-

Please see the attached ADCRR ACIS functional enhancements list. This is the high level overview for your review and dissemination as appropriate.

Hi Charles and Sandy-

Please work together to obtain the documentation from the IT PMO team which contains the details of each of the items of the attached presentation. The additional documents are to be used by B&D as a means of understanding the body of work which will assist their time estimation efforts. Please coordinate any conversations between B&D and ADCRR as necessary.

ACIS Functional Enhancements Proposal

May 14, 2020

AMERICAN OVERSIGHT

ACIS Functional Enhancements: **Parking Lot**

TFS ID#	Module Name	Area of Concentration (Related Process)	Functional Impact	What specific goal is being requested?
39609*	**Cell Screening**	Years to Release	Calculation Correction	The 'Years to Release' rules are reversed in ACIS for non-violent and violent offenses, and should match policy 704. Currently staff is having to complete the years to release components of cell screening, manually. Resolution would eliminate the current workaround, where staff has to complete the 'Years to Release' components of cell screening, manually.
40940	**Classification**	Trigger new initial classification	Work Flow Improvement	When an offender on supervision comes back with a new felony conviction, the system needs to trigger a new initial classification (per policy), rather than a reclassification. By doing so, this will eliminate the need for manual classification of parole violators returning with new charges.
41361	**Classification**	IR Reduction for Manslaughter DUI	Calculation Correction	Change the system so that a Classification pending review for Manslaughter DUI status should not allow for an IR reduction below 3. By correcting this process, this would eliminate the need for a manual IR override to be done. This would prevent mis-classifying an inmate, which could allow an inmate to be inappropriately assigned to off-site work, ultimately creating a potential public safety risk.
40386	**Classification**	Trigger for classification	Work Flow Improvement	Inmates should trigger for classification once they drop below the 5-year non-discretionary mark. Staff are having to manually re-trigger classification to remove the obsolete nondiscretionary, causing a delay in a reduction of their custody, and unnecessarily extending their stay at a higher custody unit.
40392	**Classification**	Classification (CL) Action Queue	Work Flow Improvement	CL Action Queue Classification items should be generated for changes in Custody (CU) or Internal Risk (IR) due to aging-out or if initial 180 days review indicates a reduction per policy. Staff are having to manually re-trigger classification in order to verify if a CU and IR change would occur, causing a delay in a reduction of their custody, and unnecessarily extending their stay at a higher custody unit.
40167	**Programs**	Priority Ranking Report (PRR)	Work Flow Improvement	We are requesting to remove the Priority Ranking Report (PRR) section restriction rules, which are preventing lower priority inmates from being assigned to a cycle. Currently, staff have to select every inmate from the higher priority sections and save the screen, before they are able to assign an inmate from a lower section; doing this is very time-consuming. If this change is implemented, it will eliminate those tedious steps. As a reference, the Priority Ranking Report will still exist on the Priority Ranking Report Dashboard screen, when assigning inmates. This change will allow staff to assign inmates who are currently awaiting a major program in order to be released for SB1310.

* *This module's SME was not available at time of submission. This information is current as of 05/12/2020.*

AMERICAN OVERSIGHT

ACIS Functional Enhancements: **Parking Lot**

TFS ID#	Module Name	Area of Concentration (Related Process)	Functional Impact	What specific goal is being requested?
40631	**Security Threat Group (STG)**	Criminal Street Gangs (CSG)	Identification correction	Validation criteria for Inmate's CSG should not create points toward validation (this is currently occurring in the system). Notes or comments, this can cause an inmate to be validated incorrectly. Which would result in increased classification, improper movement, increase in custody and negatively impact release dates.
42463	**Security Threat Group (STG)**	Gang Intelligence Search	Identification enhancement	When a CSG is converted to an STG, any inmates identified loses the identification and is unable to be tracked. Request is to ensure proper identification of CSG and STG (through assignment or conversion). This results in unclassification and eligibility for early releases (inappropriately).
39463	**Sentence Calc.**	Sentence Begin Date (SBD)	Calculation enhancement	Request the ability to enter in jail credits that occurred prior to the date of offense to assist the calculation of the sentence begin date of the inmate. When there is an excessive number of jail credits, Time Computation has to erroneously change the SBD or Jail Credits in order to save the information so that they can lock the system to then manually calculate and correct the dates. Manual lock of the system is very time-intensive.
28992	**Sentence Calc.**	Community Supervision End Date (CSED)	Calculation correction	Request to correct the calculation of the Community Supervision End Date (CSED) for violators. Correction of this calculation will minimize errors and eliminate the need to 'manually lock' violators with the correct date. Currently it takes 30 min to 1 hr to manually lock a violator. There is a monthly average of 300 violators which need to be managed.
29221	**Sentence Calc.**	Truth-In-Sentencing Life Sentence	Calculation enhancement	Request for Parole Eligibility Date (PED) sentence calculation for inmates with a Truth-In-Sentencing (TIS) offense. This will allow for adherence to ARS 13-718 and the Chaparro Decision which allows eligibility of parole consideration for life inmates. This will impact a specific set of inmates. Today, Time Comp cannot identify these inmates.
30307	**Sentence Calc.**	Adjust Past Community Supervision Begin Date (CSBD)	Calculation correction	Request to correct calculations for inmates have passed their CSBD/TR/TR to Absolute Discharge release dates. This would also require the adjustment to the CSED and/or Probation Extended Days calculations. This will improve accuracy of the release dates and create efficiency for the Time Computation staff as they currently have to 'manually lock' the system to make these adjustments. The manual lock can take anywhere from 30min to 1hr.
31598	**Sentence Calc.**	Provisional Release (PR) Eligibility Criteria	Calculation enhancement	Request to add Provisional Release (PR) type criteria to ACIS for inmates sentenced under the 'New Code'. To provide requirements for eligibility for PR. Currently new code inmates are not being denied. This is requiring manual calculation and locking. This will create efficiency and enhance accuracy.

AMERICAN OVERSIGHT

ACIS Functional Enhancements: **EUIL**

TFS ID#	Module Name	Area of Concentration (Related Process)	Functional Need	What specific goal is being requested?
42235	**Community Corrections**	Home Plan (Detail Page)	**Audit stamp**	Request to add audit trail stamp on home plan form at time of submission. Currently it does not display time/date and who submitted the information in the home plan. This will enhance tracking and accountability.
42233	**Community Corrections**	Home Plan (RMS - Action Queue)	**Information accessibility**	Request to display the *earliest* eligible release date in the RMS Home Plan Action queue. By adding this release date it would give staff the ability to prioritize their workload based on earliest eligible release date. Benefits would result in: 1) Additional bed day savings and 2) More timely release of inmates. This action would eliminate each staff member having to open individual actions to determine the priority of their workflow.
42335	**Community Corrections**	Home Plan (RMS Module)	**Workflow improvement**	Request to remove the ability to submit multiple home plans for approval for a specific inmate following a CCO Supervisor approved home plan. This will prevent duplication of home plan submissions. Officers should maintain the ability to enter and save home plans, but cannot submit multiple for approval. **unless the original Home Plan is cancelled by a CCO Supervisor.*
28917	**Community Corrections**	Banner (OMS Module)	**Information accessibility**	Request for hyperlinks to be listed in the Community Corrections Banner. The hyperlinks are shortcuts allowing easy access to reference information displayed in the banner in a new browser tab. This will eliminate the need to navigate away from the active window. Implementation will help prevent the loss of information.
40629	**eOMIS Interface**	Medical Mental Health Screen	**Information display**	Request to modify of two label names in the Mental Health screen to more accurately reflect the true meaning of the IDs. This has no impact on reports, workflow or current procedures.
42241	**Global**	Banner (Inmate)	**Information accessibility**	Request to add COIII name attached to their assigned inmate(s) in the global inmate banner. The COIII information is 'living' and is subject to change based on the assigned inmates to the COIII. The team is also requesting the addition of a hyperlink attached to the COIII information which would navigate the person to the User Details screen in a separate browser window.
25275	**Programs**	Banner (Education)	**Information accessibility**	Request for the Inmate Banner (static) to reflect whether or not an inmate is exempt for Mandatory Literacy & GED/HSD. *Real estate exists for this information.* This will provide identification of program eligibility/placement and accurately reflect what the exemption is.
33168	**Sentence Calc.**	Banner (Inmate)	**Information display**	Request to have the Inmate Banner display the last release date and type of an inmate who is past the last release date. Currently it displays 'N/A'. This adjustment will provide accuracy when managing an inmate.
42364	**Sentence Calc.**	Flat/earning sentence calculation	**Calculation enhancement**	Request for the ability to adjust sentence calculation to reflect both flat or earning sentence. This will minimize release errors, improve efficiency for Time Computation staff and accurately reflect the judgement from the court.
25143	**STG**	Banner (CSG and STG)	**Information accessibility**	Request to display Criminal Street Gangs (CSG) in the Inmate banner. This is in addition to the existing Security Threat Group (STG) displayed information. By resolving this, users will no longer have to navigate to the Initial Gang Interview screen to view this information.

Ug, sorry. I have meeting through 11am which is why I scheduled the MNO meeting for 11am. If we want to do the incident meeting at 11am and then the MNO meeting after that would be fine with me or vice versa.

Sorry for the confusion and thank you for the understanding about today.

Subject:	RE: KeepTrak Interface Issue
Date:	Monday, May 18, 2020 2:40:47 PM
Attachments:	image003.png image005.png

Hello Team,

Here is an update as to what we found. There was a production deploy on Friday around 6pm that contained some erroneous code to the KeepTrak interface. The KeepTrak interface consists of 7 interfaces actually (Utilities fees, Deposit providers, Discipline Restitutions, Inmate Updates, Offender Updates, OMS Fees, Payroll). The code that was deployed caused the OMS Fees interface to run every time any of the 7 were scheduled to run. So essentially the OMS fees ran too many times in the past 3 days and the other 6 did not run if that makes sense.

We will do an critical hotfix deploy today to repair the erroneous code before the interfaces runs again tonight. After that we will need to perform tasks for each interface to make sure each one is back to normal. Here is a breakdown of each of these 7 and what we think needs to happen going forward:

Utilities Fees – This interface runs monthly and gathers fees to be charges for utilities for inmates owning electrical appliances. It so happened to be a run day on Saturday the 16th and the interface did not run because of the defect. With approval we will run this again tonight using the date of May16th as the run date.

Discipline Restitutions – This interface runs nightly at 1:15 am. It notifies of discipline restitutions. It did not run on 5/16, 5/17, 5/18 because of the defect. With approval we can run it today and it will collect all the missing data from the last 3 days and post to KeepTrak. @John Vitale the only question for this one is that it will post all of these to a batch with today's date. Is this a problem for any reason? It will then run at 1:15am tomorrow morning going forward as usual.

Inmate Updates – This interface runs every night at 12:00 am. With approval we can run this interface today and it should update all the inmate updates in the queue that have not been sent in the past 3 days.

Offender Updates – This interface runs every night at 12:00 am. With approval we can run this interface today and it should update all the inmate updates in the queue that have not been sent in the past 3 days.

Deposit Providers – This interface runs every night at 1:15am. The interface creates a file with a list of active inmates and offenders. With approval, we can run it today and complete the file with the current status of the inmates / offenders. However some inmate and offenders statuses may have changed in the past 3 days. We will likely need to generate a query for the past 3 days to check what changes in the status of inmates have occurred since the last Friday, and evaluate those for actions

AMERICAN OVERSIGHT

to take going forward.

OMS Fees - This interface runs at 3:30am every night. In this case it ran more frequently because it ran ever time one of the other 6 interfaces was supposed to run. To compound the problem it ran using incorrect dates. We will need to discuss with @John Vitale how to proceed. We are working on 2 lists of data for this interface. One will contain a list of the transactions that were sent in error and one will contain a list of transactions that should have been sent. We will likely need guidance from Keefe as to how to proceed.

Payroll – There should be nothing to do here since payroll was not scheduled to post over the weekend.

Please let us know if you see any problems with our analysis. @John Vitale, we appreciate your feedback.

Thanks,

Aaron Pratt

AMERICAN OVERSIGHT

From: Charles Spannagel on behalf of Charles Spannagel <Charles.Spannagel@bndna.com>
To: Holly Greene
Subject: ACIS System Performance Improvements
Date: Monday, May 18, 2020 12:52:45 PM
Attachments: image002.png

Holly,

I wanted to give you an overview on the system performance initiatives we have undertaken. These have not been pushed to PROD yet but we feel these initiatives will absolutely help improve the user experience.

64 Bit

Based on feedback from the users of system slowness, waiting for screens to populate and waiting for spinning wheels B&D has converted the application to a 64 bit implementation which will allow the application to make better use of memory and increase the bandwidth of the connection between the application and the databases resulting in reduction of time waiting on spinning wheels and faster screen loading. This should decrease the amount of time that it takes the users to their tasks and should improve the overall attitude when it comes to speed of the system.

Excessive Post Backs

Based on feedback from the users waiting for post backs (excessive spinning wheels) we have rewritten the count module to avoid incurring that overhead and reduce the amount of time that it takes for the field to do a count. Based on studies the users were waiting on average 20 to 30 seconds before the rewrite. After the rewrite the wait time has been reduced to almost nothing. This should decrease the amount of time that it takes the users to do a count and should improve the overall attitude when it comes to speed of the system.

Reporting System Performance

The reporting system is receiving a heavier than anticipated load in development due to the AD Hoc reporting efforts resulting in occasional slowness and system instability. Deploying the production reporting architecture into the Dev environment will provide for a fail over server (avoiding the outages) and larger systems to improve performance. This should increase the productivity of the AD Hoc developers, less time from B&D supporting AD Hoc issues and should improve the overall acceptance by the AD Hoc developers of the development environment.

Please let me know your thoughts and I will keep you updated on the progress and the estimated delivery. Thank you.

Subject: M&O Hours Review
Date: Monday, May 18, 2020 9:22:47 AM

Hi Charles-

I scheduled the Google Meet for this discussion.

-Holly

M&O Hours Review

When Mon May 18, 2020 4pm – 5pm Mountain Standard Time - Phoenix

Who
- Charles Spannagel - organizer
- hgreene@azadc.gov - creator
- Aaron Bailey
- Joseph Nicoletti
- Jeff Woodward
- Sandy Wang

Sandy, could you please send a google meet for this meeting. I want to review the hours prior to Joe and Dean having their initial conversation. My team is currently compiling the report for you.

This email contains information that is intended only for the person(s) to whom it is addressed. If you received this communication in error, please do not retain it or distribute it and notify the sender immediately.

Yes, we will get you some examples for proper documentation. I think a conversation about FAQ's between the BA's and IT staff would be helpful.

Thank you, Charles. And remember, we're looking for some troubleshooting or frequently asked questions. What would we transfer to B&D and how would we know when it's appropriate to do so.

Respectfully,

Holly Greene

> Holly and team,
>
> There was a misunderstanding on my part when I thought we had created "user guides". I thought we had created them from a paper product standpoint but in actuality we created online videos per the contract. That being said, this may work better for the IT Help Desk team because they can log into the user's station and access the videos live to review with the user. I am working on identifying an individual trainer to work directly with the ADC Staff to conduct the training. Please sit tight and I will get to you as quickly as possible. Thank you.
>
> If you click on the ?Help icon in the upper right corner you will see all of the user guides listed by module. Within each module there are sub-sets that contain the module specific user guides.

1-yes the issue explained in your email is correct. 2-I have tried signing in on IE again, screen shot of the message is above.

I received the message after I entered an inmate number, received error that inmate number did not exist. I logged out of ACIS, tried to sign back in on IE, got same message. I signed out of my computer completely, restarted, tried to log into ACIS again, same message. I logged off my computer completely, signed back in, tried to sign into ACIS, received same message. ME

> Hello Mary,
>
> I work in IT @ Central Office. The Service Desk advised me that you had an issue logging into ACIS Production in Internet Explorer today, and received an error stating *"Error has occurred, please contact the system administrator"*. They also mentioned that you were able to successfully login via Chrome.
>
> Could you please 1) verify if I understand the issue as stated above, and 2) retry in IE and advise if you're still encountering the same error, and if so, please forward a screenshot to me? This error occurs occasionally, and often goes away if the user logs out of ACIS, completely closes the browser tab, reopens a new tab, then attempts to login again. Also, did you have any other IE tabs open at the time you received the error in ACIS?

Subject: Re: M&O Hours Validation

Yes, the review process flow is correct. I'd like those hours broken down by day. If you can also provide the type of interaction and support provided (response to inquiry, implementation, correction/fix, meetings, etc.). This information will be helpful in targeting how we may be able to scale down (or up) hours of work.

I intend to use this information to support my request for an annual allotment of M&O hours dedicated to the ADCRR report team to use towards the fulfillment of their work requests.

Please include Sandy, Aaron Bailey, Jeff Woodward and Joe Nicoletti.

AMERICAN OVERSIGHT

		Descriptions				
	SLA	Proposed by B&D	ADC Requested Changes to Descriptions	5/11/2020 Discussion	B&D Response	
1	System Response	Average page load time <= 7 seconds site wide as recorded using Google Analytics Avg. Page Load Time (sec) (BND) How will response time be measure now? How realistic is this? What is the current number we have? Is 3 sec < what we are right now?	Change to less than or equal to 3 seconds.	Average page load time <= 3 seconds site wide	7 seconds was agreed upon during the meeting in February with all parties present. This was a reduction from 10 seconds. 3 seconds is unachievable in part because of the ADC Network	
2	User Response Time	All response times are affected whenever a request by the user invokes a remote interface with other systems. Average page load time <= 5 seconds for the "http://aims2.us/ProtectiveCustody/PCInterviewAssessment.aspx Screen"	User needs to be defined; ADOA requests feedback from ADC operations on whether this is the relevant sample page?	What in C4 needs to be removed per ADCRR since the link is for the Protective Custody screen which has only one field calling out to Keeptrack for inmate balance that does not cause a delay. Need to consider screen pops response time separate from the page . Recommend that this SLA reflects the user's interactions with a page such as the logic & therefore refresh/response rate to actions taken on a page such as drop down menu selections, etc. Recommend <=2 second response times for calculations, formula and workflow response rates.	How are we supposed to monitor this when we do not have a technique for it?	
3	System Availability/Reliability	• 24/7/365 99.95% up time; measured weekly. ADC strikes this statement for unplanned outages (with no more than 2 hours down time within any business day)(6 a.m. to 6 p.m. Arizona time, 7 days a week) • No more than ten (10) consecutive outages in any week. • 95.0 % of all failover events are concluded in less than 4 hours. • 99.9 % of failover events must be concluded in less than 8 hours. • 95.0% availability of the reporting system (24 hours, 7 days a week except for maintenance and upgrades as agreed upon by parties). • 95.0% availability of the test regions during scheduled times.	• 24/7/365 99.95% up time; measured weekly. ADC pre-approved maintenance windows to be excluded from this metric. did we decide this was OK? - bullet 2 - change to 2 occurrences (rather than 10) - bullet 3 - add "must" - bullet 4 - ok - bullet 5 - ok - bullet 6 - change to - • 95.0% availability of the test regions. Test regions includes application, database and reporting. (24 hours, 7 days a week expect for maintenance and upgrades as agreed upon by parties).	• 24/7/365 99.95% up time; measured weekly. ~~ADC strikes this statement for unplanned outages (with no more than 2 hours down time within any business day)(6 a.m. to 6 p.m. Arizona time, 7 days a week)~~ • No more than 2 ~~ten (10)~~ consecutive outages in any week. • 95.0 % of all failover events ~~are~~ must be concluded in less than 4 hours. • 99.9 % of failover events must be concluded in less than 8 hours. • 95.0% availability of the reporting system (24 hours, 7 days a week except for maintenance and upgrades as agreed upon by parties). • 95.0% availability of the test regions during scheduled times. Test regions include application, database and reporting. (24 hours, 7 days a week expect for maintenance and upgrades as agreed upon by parties).	System Availability needs to specify Production (other changes to this section are ok)	
4	System Accuracy	• 100% of data must be delivered accurately. • 100% of actions must be accurately. • 100% of actions must be accurately. • 100% of sentence calculations* must be completed accurately. • 100% of on-line update transactions are accurate. • 100% of cases and related data must be converted accurately. • 100% of case records must be compiled, returned, and displayed accurately. Verification and Validation to be provided by Offeror via system reports, Ad Hoc audits by ADC SMEs and system reports. Additional verification/audits are at the discretion of ADC. *(based on the calculation rules that ADC have provided to B&D which are documented within the latest and agreed Functional Specifications)	- delete bullet 3 as repetitive of bullet 2 - in the last bullet - change "Functional Specifications" to "functional requirements specifications"	• 100% of data must be delivered accurately. • 100% of actions must be accurately. ~~• 100% of actions must be accurately.~~ • 100% of sentence calculations* must be completed accurately. • 100% of on-line update transactions are accurate. • 100% of cases and related data must be converted accurately. • 100% of case records must be compiled, returned, and displayed accurately. Verification and Validation to be provided by Offeror via system reports, Ad Hoc audits by ADC SMEs and system reports. Additional verification/audits are at the discretion of ADC. *(based on the calculation rules that ADC have provided to B&D which are documented within the latest and agreed functional requirements specifications)	No update or comments	
5	Maitenance Updates Upgrades	• Maintenance to be performed outside business availability and requirements • Updates/upgrades should be implemented to improve/provide needed functionality as dictated by business/technical needs. - ADC Requires prior approval and schedule notification for any Maintenance, Updates and/or Upgrades. - If any Offeror Maintenance Updates and/or Upgrades cause an outage, Severity 1, 2, 3 failure impacting ADC end Users than the Offeror will be held accountable to current System Availability and Reliability SLA metrics. Furthermore, Offeror shall be responsible for uninstalling, backing out or deleting implemented changes to prior working state. If ADC requires or mandates a Change Control process approved change; than Offeror shall work with ADC to restore service to prior working state at no SLA impact to Offeror.	Change Bullet one to: Maintenance to be performed inside scheduled windows. Bullet 2 - OK Bullet 3 - OK Change first sentence of Bullet 4 as follows (keep 2nd and 3rd sentence): If any Offeror maintenance updates and/or upgrades cause an outage or failure impacting ADC end users, then the Offeror will be held accountable to current System Availability and Reliability SLA metrics.	• Maintenance to be performed inside scheduled windows. ~~outside business availability and requirements~~ • Updates/upgrades should be implemented to improve/provide needed functionality as dictated by business/technical needs. - ADC Requires prior approval and schedule notification for any Maintenance, Updates and/or Upgrades. - If any Offeror Maintenance Updates and/or Upgrades cause an outage~~,~~ ~~Severity 1, 2, 3~~ or failure impacting ADC end Users ~~than~~ then the Offeror will be held accountable to current System Availability and Reliability SLA metrics. Furthermore, Offeror shall be responsible for uninstalling, backing out or deleting implemented changes to prior working state. If ADC requires or mandates a Change Control process approved change; than Offeror shall work with ADC to restore service to prior working state at no SLA impact to Offeror.	No update or comments	
6	Data Integrity Destruction	• All data files shall be backed up on a regular schedule. Non-critical files, i.e., files without which users can still support the business, shall be recoverable to the end of the prior business day at a minimum. • All system maintained files shall be backed up where required to permit recovery to the end of the prior business day. These files shall include, but are not limited to, user definition files, operating system files, and software setup files. • The backup and recovery procedures shall include all data stored within the enterprise environment including, but not limited to, print and report files generated by the application. Data stored on user workstations is not the responsibility of the Contractor. • The procedures shall be updated to be current for each recovery test. • In cases where files are not backed up, e.g. operating system files or application executables, the recovery procedures shall define how these files are reinstated to the system. • Data storage will meet State, federal, and industry standards and requirement. • Data destruction will meet State, federal, and industry standards and requirements	Change bullet 1 to • All data shall be backed up on a regular schedule to meet state, federal and industry standards and requirements. Change item in bullet 3 - Change "Contractor" to "Offeror" Last 2 bullets - Change "requirement" to "requirements"	• All data ~~files~~ shall be backed up on a regular schedule~~. Non-critical files, i.e., files without which users can still support the business, shall be recoverable to the end of the prior business day at a minimum.~~ to meet state, federal and industry standards and requirements. • All system maintained files shall be backed up where required to permit recovery to the end of the prior business day. These files shall include, but are not limited to, user definition files, operating system files, and software setup files. • The backup and recovery procedures shall include all data stored within the enterprise environment including, but not limited to, print and report files generated by the application. Data stored on user workstations is not the responsibility of the ~~Contractor~~. Offeror. • The procedures shall be updated to be current for each recovery test. • In cases where files are not backed up, e.g. operating system files or application executables, the recovery procedures shall define how these files are reinstated to the system. • Data storage will meet State, federal, and industry standards and requirements. • Data destruction will meet State, federal, and industry standards and requirements	No update or comments	

AMERICAN OVERSIGHT

7	Security	Internal and external security to meet State, federal and industry standards and regulations. o Password security o Data encryption o Firewall o Identity management o Anti-virus/spyware o Web content monitoring/filtering o Weekly/monthly/quarterly/annual security reports and updates review. o 100% of all security breaches must be reported to ADC in writing and by telephone immediately at the time of the incident. o 100% of all security breaches must be mitigated within the time frames approved by ADC at the time of the incident. Cooperate with ADC vulnerability management - as measured with a state mandated penetration testing and remediation requirements.	Change entirely based on advice from statewide IT office (ADOA): Password security will comply with State (ADOA-ASET and ADCRR) Standards and Policies. Additional Standards and Policies: after three unsuccessful login attempts the account will become locked. Offeror will comply with 45 CFR Part 160 and 164, Subparts A and C, due to the presence of protected health information within the system. Offeror must provide notice to ADCRR of any use or disclosure of PHI/ePHI that is not authorized by the Contract, by law, or in writing by ADCRR, without delay, and in no case later than 5 days after the Business Associate learns of such unauthorized use or disclosure. 100% of the time the system will be protected by a Web Application Firewall, unless written approval is provided by ADCRR to perform vulnerability assessments and penetration tests. Offeror will perform auditing of all user actions which includes, but is not limited to; password resets, role changes, information modification/addition/removal, user login and logout activity. These audit logs must have a full record of the last 60 days minimum. Offeror will run Anti-virus/spyware software on all devices capable of having the software installed. Offeror will perform logging of all network traffic to the system and retain a minimum of 60 days of logs. Offeror will apply security updates in compliance with State (ADOA-ASET and ADCRR) Standards and Policies and follow proper testing and change control prior to implementation. All security incidents must be reported to ADCRR in writing and by telephone within 5 business days of discovery. Offeror shall take immediate action to prevent further security incidents and remediate vulnerabilities, implement approved compensating controls, and address additional system weaknesses within 10 business days of discovery. Offeror will cooperate with ADCRR vulnerability management and comply with all State (ADOA-ASET and ADCRR) Standards and Procedures. Offeror must host the system on an FedRAMP moderate impact level authorized, government-related, single tenant compliant platform. Offeror must provide logs and access to security controls within 2 business days of an ADCRR	Change entirely based on advice from statewide IT office (ADOA): Password security will comply with State (ADOA-ASET and ADCRR) Standards and Policies. Additional Standards and Policies: after three unsuccessful login attempts the account will become locked. Subject: ADCRR - B&D Weekly Leadership Meeting

Good morning, Charles:

Can you please provide us the status of the following items before or during our 10:30 meeting:

1. Charles to have visual (job aid) of the support hours and classification.by Monday. I am meeting with my team at 2pm today to finalize.
2. Charles to supply the breakdown of the ad hoc reports release hours In light of Holly's email yesterday I think it would be more appropriate to have an entire break down since the beginning of the start of Ad Hoc reports. I realize this will be a much bigger conversation. The hours have averaged between 10-20 per week.
3. Health of ACIS - start off with what Dean has proposed as the bases of the portfolio - speediness, timeout, Change management procedure, bi-weekly frequency in the beginning. (Charles)
4. Charles mentioned that B&D is working on the following initiatives: Rebuild the report repository, switch to chrome 64-bit I will have a communication ready to share with ADC once we are complete but can get you the overview.
5. Holly - requests Data dictionary made available to ADCRR , and reliable production data available for data analysis. There is a report that can be generated from the system by ADC staff and the goal is to train a super user to perform this function for ADC.
6. Estimate for the B&D list of recommended enhancements (Charles to send an internal email) WIP

Subject: Re: M&O Hours

Hi Charles-

I'm going based on your outline..so, yes...(?)

My concern with what you outlined below is that IF we don't put a pin in this straight away and blindly continue to work with your space as described below, we may unintentionally dip into and therefore be held responsible for the use of billable time which wasn't approved by Deputy Director Profiri and Dean.

So, I say we err on the side of caution and stop such work as described below until ADCRR and B&D can determine if what's in the hopper right now will be honored along with that work completed between 4/30 and 5/14 OR if it ate into the remediation/M&O hours. And we need to work together on a plan to capture this work and how it will be quantified (I imagine the flow will be very similar to the EUIL/Parking Lot items we recently put together).

+Janet Duvall and Josh Connolly for awareness

Subject: Re: ADCRR User Guides

Hi Charles:

I had all the guides wrapped up for summertime training; the last time I was in my curriculum tracker was in October. That being said, many guides were updated September, 2019 and were directly correlated with our training blitz state-wide. Some SME's went in after training and modified guides, then then returned THAT version back to me for file-off; so it would be safe to say that MOST changes made after September, 2019 to the ACIS (then AIMS2) system, were **not** reflected in any of the guides; mostly because training had been performed already and any 'workarounds' in place, have been communicated outwards to the appropriate parties.

Bottom line - September, 2019 - that was really for the most part, the last 'snapshot' of ACIS which was reflected in all courseware.

Does that make sense?

Janet

Subject: Re: ADCRR User Guides

I created two types of manuals: Instructor and User. **Instructor Guides** had scripted verbiage for 'instructors' (or SMEs) to use when out in the field training, along with hand-on/classroom exercises. Once I finished each Instructor manual, I extrapolated necessary information into '**User Guides**', stripping out any quoted verbiage a trainer would have stated during a class (hands-on exercises). This User guide provided the most basic information needed to help an end user.

There are approximately 78 - 80 total guides which I managed (including Instructor and User); with over 40 learning tracts.

There were a few which were never provided to me and the SME never wrote anything, or they took it upon themselves and went out and did their own training. I have accessibility as to which modules these are if you need to know them.

Please let me know how I can help and what is needed.

Hi Charles-

Just following up on this item because it was very confusing to me. It sounds like ADCRR has access to update administration information, but there's a learning curve as to what should be updated appropriately so that we don't run into an undesired result (such as the one discussed in this email).

Will B&D be able to work with our teams to help educate them? Whether that's through conversation, a WIKI, a reference document...etc. This would be similar to the data dictionary (and schema outline) we've chatted about in the past.

To: Charles Spannagel <Charles.Spannagel@bndna.com>, CRABTREE, STACEY <scrabtre@azadc.gov>
Cc: ABAILEY <ABAILEY@azadc.gov>, Jey Whitson1 <jwhitson@azadc.gov>, Spencer Scott <sscott3@azadc.gov>, George Martinez <gmartinez1@azcorrections.gov>, Sandy Wang <swang@azadc.gov>, Holly Greene <hgreene@azadc.gov>, Chris Masson <chris.masson@bndna.com>, Cindy Hyser-Crauwels <cindy.hyser-crauwels@bndna.com>, Rajkumar Gopal <rajkumar.gopal@bndna.com>, Aaron Pratt <aaron.pratt@bndna.com>, Steven Williams <Steven.Williams@bndna.com>, Thad Lowry <thad.lowry@bndna.com>

This is why ADCRR needs to know what tables feed the fields. Right now, ADCRR staff are either having to use the "take a shot in the dark" approach, or ask B&D staff who may not provide accurate information based on their limited knowledge.

Cindy was under the impression that the drop downs for telephone types were fed from three different tables, and the one that directly fed the Community Corrections area was TELEPHONE_TYPE. What do the two other tables, Pr Phone Type and Telephone Number Type, feed?

> ADC,
>
> B&D was able to look into the outstanding issues in regards to the TELEPHONE_TYPE Admin Screen, please see below. We have also put our recommendation at the bottom
>
> The TELEPHONE_TYPE lookups used to look like this, up until 4/27:

AMERICAN OVERSIGHT

LOOKUP_CATEGORY	DESCRIPTION	CODE	PRIORITY
TELEPHONE_TYPE	Fax	4	0
TELEPHONE_TYPE	WORK	3	0
TELEPHONE_TYPE	HOME	2	0
TELEPHONE_TYPE	CELL	1	0

On 4/27, the following user updated these lookups – changing the description of the existing 4, and adding 2 new values.

MICHAEL S NEWSOM - NMS3

LOOKUP_CATEGORY	DESCRIPTION	CODE	PRIORITY
TELEPHONE_TYPE	Sponsor Cell	7	
TELEPHONE_TYPE	Sponsor Home	6	
TELEPHONE_TYPE	Supervisor Number	4	
TELEPHONE_TYPE	Office Number	3	
TELEPHONE_TYPE	Offender Home	2	
TELEPHONE_TYPE	Offender Cell	1	

Because this is a shared lookup category on a common system control, it updates everywhere.

There are presently 46 ADC staff that have roles assigned that can update the System Data screen. Given the sensitive nature of the data on this screen, **B&D would suggest that a specific role that is allowed to make changes to this data is created and it is assigned to a subset of these individuals and if changes are made by the individuals they are tracked and tested in UAT prior to making changes in PROD.**

In order to revert back to how the system was previously working you would need an admin to make the changes back. Please let us know if any further discussion is needed.

Date: Wednesday, May 13, 2020 1:54:43 PM
Attachments: image002.png

Good morning,

I wanted to give an outline of a proposed schedule I have come up with and get your feedback. I will be presenting this on Friday to B&D Leadership.

Weekly Activities

Monday: Charles on site

1. 10:30AM – Daily Bug Review with Spencer and Steve

Tuesday: Charles at B&D

1. 10:30AM – Daily Bug Review with Spencer and Steve
2. 3:30PM – ACIS Bi-Weekly Meeting

Wednesday: Charles on site

1. 10:30AM - Daily Bug Review with Spencer and Steve

Thursday: Charles at B&D

1. 10:30AM – Daily Bug Review with Spencer and Steve
2. 3:30PM – ACIS Bi-Weekly Meeting

Friday: Charles on site

1. 10:30AM – ADCRR & BND Leadership Meeting

Monthly Activities

1st Business Day – M&O Monthly Report submitted by B&D

5th Business Day - Monthly M&O Status Meeting

10th Business Day (or prior) – ADCRR and B&D present a list of proposed EUIL items

15th Business Day (or prior) – B&D to provide estimate for proposed EUIL items, B&D to provide forecast of available FTE's

20th Business Day (or prior) – ADCRR selects items for the upcoming month

Date:	Wednesday, May 13, 2020 6:49:51 AM
Attachments:	image001.png image002.png image004.png

Hello All,

Here is the latest on the 805-5 screen: (Light summary of progress)

1. Bug 42372 is linked as the parent bug to all 805-5 screen issues. This bug is under going stringent testing and development and revision for a few days now. I hope to have this testing wrapped up and push this code to UAT on Friday, 05/22/20.
2. The original save issue Marlene was having and she subsequently demo'd appeared to be working on a previous bug deployed to UAT under bug 42137 that would perform a check to ensure the save was successful and not refresh the screen if not successful. This code is currently in Production.

My commitment:

I am fully committed to making sure this screen works. Each daily deployment to QA INT environment has new changesets submitted to fix issues I am finding on this screen. It has been a big challenge to code the proper growl message if the user exceeds 4000 characters and make sure the subsequent save is successful.

We are making progress. I will not push any code to the next UAT is this screen is not working as I expect. I am testing aggressively and doing extensive negative and boundary testing.

I was grateful to learn the process of how the customer enters data into this screen and the sample document provided to complete this entry for the 1st and 2nd interview. This insight allowed me to triage and properly test the changes to the screen.

Scope of effort involved:

I intend to wrap up this testing and development as soon as possible. Again, this screen has to pass my personal testing in order to be pushed into UAT.

Our current testing includes and is ongoing:

1. Negative and Boundary of comment fields for <= 4000 characters and proper messages and warnings to the user if >= 4000 characters are entered.
2. Required fields indicated properly if user selects 'Yes' on questions.
3. Is user selects 'Yes', does the required field indicator turn on, if user toggles back to 'No' the required fields indicator should not display.
4. Proper Save and message response if:
    a. Required fields are not completed.
    b. Character limits are exceeded.
    c. Warnings indicators for fields if limit is exceeded so user will have indication prior to

AMERICAN OVERSIGHT

save.

d. If screen conditions are met, can save be successful.

5. Finally, we have implemented the submit button is disabled until a successful save for 1st or 2nd interview save is successful.

This work is ongoing and I hope to complete all of this with the help of 2 developers assisting me on this issue.

Please let me know if you have any questions.

Quick question- How did this one shape up after this email?

> 1. Protective Custody issue - what's B&D's game plan to resolve this once and for all?
>
>   a. We have triaged this screen thanks to a document I received from Marlene used to enter in the PC 805-5 COIV and SSU Interview. I have realized that due to the lengthy interview process, the person conducting the interview would enter the answers to the interview questions into a word document during the interview and then transcribe or copy/paste the answers into the 805-5 screen.
>   b. Once I understood the process and using the sample word document provided by Marlene, I reproduced the screen not saving the answers.
>   c. The bug used for extensive testing is 42137 & 42181. B&D developers, Samy, Hassen and Youssef performed extensive Triage on the screen after I was able to reproduce the error. My previous attempts to duplicate the bug was to enter data manually (I thought that was the actual process until I found out otherwise).
>   d. Here is the development notes from Sami in an email regarding the fix:
>
>   i. When I looked into this couple weeks ago I noticed that the data was not getting saved but at the same time the database didn't throw any kind of exception, (even though an error happened in the back end) that was misleading to the app developers who carried on with a happy path and data was lost upon a screen refresh (supposedly happening after a successful command which was actually a failed command) because data was not persisted to begin with, and there shouldn't have been a refresh but a validation error (this didn't happen because the DB didn't throw any exception upon failing to persist).
>
>   ii. The issue was later fixed by Hassen.
>
>   e. After the fix was deployed, I perform extensive testing of bugs 42137 and 42181 with copious test notes. The fix was deployed to UAT and requires testing in UAT. The fix will be pushed to PROD on 05/01/2020.
>   f. I am asking Marlene to Test in UAT and validate if it is working in UAT now only.

Hi Charles-

Please see below. Will you help with the facilitation if this discussion? Or perhaps you can provide us with the details as to what this means to ADCRR..?

I would imagine you may want to be present regardless. :)

Thank you,

Holly

AMERICAN OVERSIGHT

early to look at staffing. Please correct me if I am wrong but I believe the amount of bugs/bugs fixes has not underwhelmed ADC's staff, meaning they have been sitting around with nothing to do. The commitment for M&O remains the same, full support and full enhancement efforts. I also feel that with an uptick in RCA's, JAR's, everyone's days will fully be packed with meaningful work. As it pertains to bugs from March or later, we continue to deal with shifting priorities which is absolutely fine with B&D. ADCRR dictates what we work on. The result of that is aged items that have fallen down the priority list for ADCRR.

I would like to get going with the EUIL list and priority CR's to better gage our work effort before we discuss the staffing model.

Thank you.

Subject: Plans for Release 22

Now that we are into full production mode, we need to start planning out which bugs we want to include in upcoming releases. This means we need to more rigorously map out our goals ahead of time.

AMERICAN OVERSIGHT

About half of the 210+/- bugs were created prior to March. While we understand the priority of newer bugs can take precedence, the overall number of bugs have not come down and we are not making any meaningful impact on the stale pile. We are eager to discuss additional steps that can be taken to address this issue.

Charles, I believe we need to consider asking for temporary additional resources to get ahead of this problem. The reason is that if we don't reduce the overall bug count, our testers will never have adequate time to be fully dedicated to testing new change requests.

Warm Regards,
Spencer Scott, PMP

On Thu, Apr 30, 2020 at 5:16 PM George Martinez <gmartinez1@azadc.gov> wrote:

> Holly, here is a recap of the meeting:
>
> There was confusion as to the purpose of the meeting. It was labelled as Fingerprinting, but ended up covering DCQI from DPS. There was cross-traffic in the email thread and I mistakenly scheduled it incorrectly. We continued the meeting and discussed the discrepancies that DPS is having with the OBSCIS file we send on a weekly basis. It feeds their database and they process it through their DCQI system. DPS has updated the database with the new movement codes of C2, QU and AI. There are blank movements codes that need to be researched. They seem to be for old inactive inmates/offenders that came across from migration. Melody is checking the error logs.
>
> As far as fingerprinting, I spoke with Jennifer Abbott and she wants to have a discussion with Jey. He was not available today and she is not available tomorrow. There is a meeting scheduled for Monday to go over the process and workflow.

Hi Melody and Jennifer,

George and I talked, I think he just wanted to ensure everyone is talking about the same file. I think the next question (unless George wants to correct me on this) is, are we actually missing some fields within the file that need to be there? Neither of us are familiar with the DCQI data that was being referenced below. I'm really not familiar with the contents at all, I just transfer the files, but I want to make sure everyone is on the same page so we can work to resolve the issue.

George,

I don't know the name of the file nor do I have a copy of it. It is done on the IT side of the house. The information is somehow pulled from ACIS and then sent via file/feed over to DPS in order to be uploaded to ACJIS.

Mirisue,

Maybe some over there in your IT can advise George.

Charles-

This is a GREAT write-up. I truly appreciate the quality and thoughtful articulation.

I do apologize for my tardy response to this message.

Most sincerely,

Holly

> The Count Module tracks every single movement for every single inmate. Since Go-Live there have been 1,000,000 movements within the system. The Developers accidently only coded for six digits and once we hit 1,000,000 the count failed. In order to ensure this doesn't happen in the future we have extended the field from six digits to 15 digits. It was a development error on B&D. In order to be proactive we are now looking at other fields to see if they need to be adjusted.

Subject:	TrackTech Project: Meeting with B&D
Date:	Monday, May 11, 2020 9:13:00 AM

Hello Paul, Sandra, Karen (et al)-

Last we spoke with TrackTech, the Proof of Value/Concept effort will require a connection to the ACIS database. Sandy Wang and I have spoken with our B&D contact, Charles Spannagel about this and he is working with his teams to help support this endeavor.

We will need a meeting with TrackTech where B&D can see a demo and ask their questions concerning the tap into their database.

Is this something that Rocky, Paul or Sandra can help put together?

Hi Charles-

Please cancel your weekly Leadership meeting invite with me and Sandy as I have extended the weekly leadership meeting to include Joe Profiri as an optional attendee.

To support this, I created a new invite to accommodate our new attendee as well as provide a method of connecting remotely using Google Meet. A purpose and agenda (fluid) is in the body of the invite. The timeslot and duration remains unchanged.

QUESTIONS: Please provide a response to each of the questions listed below regarding the vendor listed above.

1. If you decline to provide a reference, please indicate that below and provide any comments you would be willing to share regarding the reason.

2. Does the vendor currently provide your company with IT system design, development, and implementation services? Please describe the scope of work provided by the vendor to your company.

AMERICAN OVERSIGHT

3. How long did you/have you and/or members of your team worked with the vendor? Please provide the specific dates of service.

4. What was the vendor's turnover rate? If high or medium, what were the causes?

5. With what type of internal and external stakeholders did the vendor have to communicate with?

6. Has the vendor been cited for any financial audit issues? If you are able to, please describe the issue briefly, and any corrective actions required. Did the vendor ultimately address the issue(s) in a satisfactory manner?

7. Has the vendor been subject to any requests for corrective action to cure performance issues? If you are able to, please describe the issue briefly, and any corrective actions required. Did the vendor ultimately address the issue(s) in a satisfactory manner?

8. Would you rate your experience with the quality of services/work provided by vendor as poor, satisfactory, or superior? Please elaborate on why you are giving the vendor this rating.

9. Would you rate the vendor's knowledge of your business as poor, satisfactory, or superior? Please elaborate on why you are giving the vendor this rating.

10. Would you rate the overall quality of the vendor's staff as poor, satisfactory, or superior? Please elaborate on why you are giving the vendor this rating.

11. Would you describe the quality of the vendor's engagement and communication with stakeholders (internal and external) throughout the project as poor, satisfactory, or superior? Please elaborate on why you are giving the vendor this rating.

12. Would you rate the vendor's ability to provide appropriate staff and resources for the project, as needed, at all times as poor, satisfactory, or superior? Please elaborate on why you are giving the vendor this rating.

13. Would you rate the vendor's performance regarding cost and/or schedule overruns on the project as poor, satisfactory, or superior? Please elaborate on why you are giving the vendor this rating.

14. Are there any other topics you believe Indiana should consider during its reference evaluation or comments you would like to share?

AMERICAN OVERSIGHT

15. Would your overall rating of the vendor be poor, satisfactory, or superior?

Jeff,

I wanted to circle back regarding Telerik. Dean thinks we can do it but there are some logistics on our side we need to figure out. I will push him this week and see what I can come up with for you. I apologize for the delay. Thank you.

Charles,

No worries...next week is more than fine. Thanks -- have a good weekend!

Hi Charles,

I wasn't sure who to include in this one on the B&D side, so just sending this to you first.

I was looking around for Telerik training and found that Telerik has a Virtual Classroom on their site with a training course for their Report Builder. Near the bottom of this page there's a link to the agenda of the course I'm referring to.

https://www.telerik.com/support/virtual-classroom

<image.png>

Unfortunately it looks like you need to have a licensed Telerik login to access it. Is there any way ADC can get access to this course? I think it would be very helpful for us.

Thanks!

AMERICAN OVERSIGHT

Interface Overview

The eOMIS EHR to Custody Interface (EOIR848) is a vehicle for linking the eOMIS Healthcare Administration software package to any Offender Management Information System (OMIS). The interface provides Custody with relevant EHR information.

The EOIR848 Extract eOMIS EHR to OMS HL7 Interface is compatible with HL7 Version 2.5.

AMERICAN OVERSIGHT

Interface conventions

Required/Optional Indicator

Indicator	Meaning
C	Conditional – May be required in some circumstances (remove if not used)
N	Not to be populated
O	Optional – May be populated
R	Required – Must always be populated

Delimiter Values

Delimiter	Value	Notes
Segment Terminator	<cr>	Terminates a segment record. This value cannot be changed by implementers
Field Separator	|	Separates two adjacent data fields within a segment. It also separates the segment ID from the first data field in each segment.
Component Separator	^	Separates adjacent components of data fields where allowed.
Subcomponent Separator	&	Separates adjacent subcomponents of data fields where allowed. If there are no subcomponents, this character may be omitted.
Repetition Separator	~	Separates multiple occurrences of a field where allowed.
Escape Character	\	Escape character for use with any field represented by an ST, TX or FT data type, or for use with the data (fourth) component of the ED data type. If no escape characters are used in a message, this character may be omitted. However, it must be present if subcomponents are used in the message.

AMERICAN OVERSIGHT

Data Types

The following data types are supported by the eOMIS Jail Interface:

Data Type	Name	Max. Length	Notes
CE	String containing code value and description	97	Code Value^Code Description^eOMIS
DT	Date	8	YYYYMMDD. 01/01/1000 is used as a default when the date is not available.
EI	Entity Identifier	22	
MSG	Message Type	15	Message Code^Trigger Event^MessageStructure
NM	Numeric	16	
SI	Set ID	10	A sequence number
ST	String	199	
TS	Timestamp	14	YYYYMMDDHHMMSS (Hours in 24-hour format)
XAD	Extended Address	106	Street Address(49)^OtherDesignation(14)^City(30)^State or Province Code(2)(eOMIS)^Zip or Postal Code(9)^Country Code(2)(eOMIS)^^^^^^^^^
XPN	Patient Name	74 (30,20,20,4)	Last^First^Middle^Suffix

Message

The outbound interface makes use of the HL7 Version 2.5 ORM General Order message to transmit MSH, PID, OBR and OBX segments.

Message Segments

The outbound interface makes use of the following HL7 Version 2.5 Message Segments:

Code	Title	Notes	R/O
MSH	Message Header		R
PID	Patient Identification		R
OBR	**Observation Request**	Observation Request should be used when an Observation/Result (OBX) segment exists	O
OBX	Observation/Result		O
Z01	Custody Data (Local)		R

AMERICAN OVERSIGHT

Z02	Mental Health (Local)		O
Z03	Medical Restriction		O
Z04	Dietary Restriction		O
Z05	Medical Device		O
Z06	PULHES Scores	Physical, Upper Extremities, Lower Extremities, Hearing, Eyes, Dental, Mental Health	O
Z07	Pill Call		O
Z08	Work Release Clearance		O
Z09	Special Needs Orders		O
Z10	ADA		O
Z11	Medical Supplies		O
Z12	Medical Holds (Transfer)		O
Z13			
Z14	Offender Appointments		O
Z15	Active Medications	Flag to indicate an inmate has active medications.	O
Z16	Offender Precautions		O

AMERICAN OVERSIGHT

Outbound (eOMIS to Jail) Messages

Message Population

MSH – Message Header

Seq.	Name	Type	Length	R/O	Notes
0	Segment Identifier	ST	3	R	Set to “MSH”
1	Field Separator	ST	1	R	Set to “|”
2	Encoding Characters	ST	4	R	Values are: ^~\& (ASCII 94, 126, 92, and 38, respectively)
3	Sending Application	ST	50	R	Set to “eOMIS”

Module	**Interfaces – eOMIS EHR**
Topic	Marquis has provided new data points in their requirements document 4/16/2020
Date	4/30/2020
TFS ID (if applicable)	42276

---

1. Provide an overview of the Change Request:

The eOMIS Electronic Health Record vendor, Marquis Software, provided B&D with new documentation on 04/16/2020 that included two new data points for each of the following message types:

- Z06
- Z08
- Z14
- Z16

In Addition, Z11 has no reference in the signed off and approved Corizon eOMIS FSD.

For B&D to successfully process and update the medical screens these two fields are required and were not specified in the original specification. B&D contends that change request is required to include the fields and complete changes to the ACIS application code.

2. Is the desired functionality defined as an explicit requirement in the <u>most recent</u> revision of the FSD? *No*

i. **FSD Revision#** 018_MQ_AIMS2_Interface_Specification_I-1_Corizon_eOMIS
ii. **FSD Date** 4/9/2016
iii. **Business Rules Revision#** N/A
iv. **Business Rules Date** N/A

3. Is the desired functionality defined as an explicit requirement in a <u>previous</u> revision of the FSD? *No*

AMERICAN OVERSIGHT

a. If '**Yes'**, what Revision and Date of the FSD was this rule present:
   i. **Revision#** N/A
   ii. **Date** N/A

AMERICAN OVERSIGHT

4. **Provide justification for why B&D do not feel this is a bug/defect with the AIMS2 application, including, but not limited to, conversation and documents from the TFS Tracking Item and/or documentation from the <u>most recent revision</u> of the FSD:**

The two new data points for each message type did not exist until March/April 2020. The FSD was signed off in 2016. The new fields are described below: **Action**: This field contains either an I for "Insert", U for "Update", or D for "Delete". B&D currently does not have a method to identify if an inbound message is an Insert, update, or delete action. **Key Identifier**: This field is a unique identifier to differentiate the inbound messages. Currently there is not a unique way to identify inbound messages. With the addition of these two new fields, B&D could successfully interpret the messages and insert, update, or delete messages. B&D would be able to identify previously received messages using the **Key Identifier** (currently inbound messages are not unique) and in the example of an "**Update**" Action, successfully update the existing record in the ACIS medical screens. Without these two fields B&D can only perform inserts as we cannot interpret a difference between an insert, update, and delete inbound message without the "**Action**" data field, and nor was there a specific requirement to even look at whether to perform an update in ACIS. B&D contends this is a change request because the two new fields provided by eOMIS/Marquis were not originally specified in the FSD and without these two fields the inbound messages can only be Inserted into ACIS tables.

5. **Supporting Documents:**

AIMS2 to/from eOMIS messages

List of message types, the highlighted ones are in context of this arbitration.

Subject: Protective Custody Write Up
Date: Friday, May 1, 2020 10:30:19 AM
Attachments: image003.png

I know we are meeting shortly but I wanted to send this to you to review after, from Steve Williams.

1. Protective Custody issue - what's B&D's game plan to resolve this once and for all?
    a. We have triaged this screen thanks to a document I received from Marlene used to enter in the PC 805-5 COIV and SSU Interview. I have realized that due to the lengthy interview process, the person conducting the interview would enter the answers to the interview questions into a word document during the interview and then transcribe or copy/paste the answers into the 805-5 screen.
    b. Once I understood the process and using the sample word document provided by Marlene, I reproduced the screen not saving the answers.
    c. The bug used for extensive testing is 42137 & 42181. B&D developers, Samy, Hassen and Youssef performed extensive Triage on the screen after I was able to reproduce the error. My previous attempts to duplicate the bug was to enter data manually (I thought that was the actual process until I found out otherwise).
    d. Here is the development notes from Sami in an email regarding the fix:
        i. When I looked into this couple weeks ago I noticed that the data was not getting saved but at the same time the database didn't throw any kind of exception, (even though an error happened in the back end) that was misleading to the app developers who carried on with a happy path and data was lost upon a screen refresh (supposedly happening after a successful command which was actually a failed command) because data was not persisted to begin with, and there shouldn't have been a refresh but a validation error (this didn't happen because the DB didn't throw any exception upon failing to persist).
        ii. The issue was later fixed by Hassen.
    e. After the fix was deployed, I perform extensive testing of bugs 42137 and 42181 with copious test notes. The fix was deployed to UAT and requires testing in UAT. The fix will be pushed to PROD on 05/01/2020.
    f. I am asking Marlene to Test in UAT and validate if it is working in UAT now only.

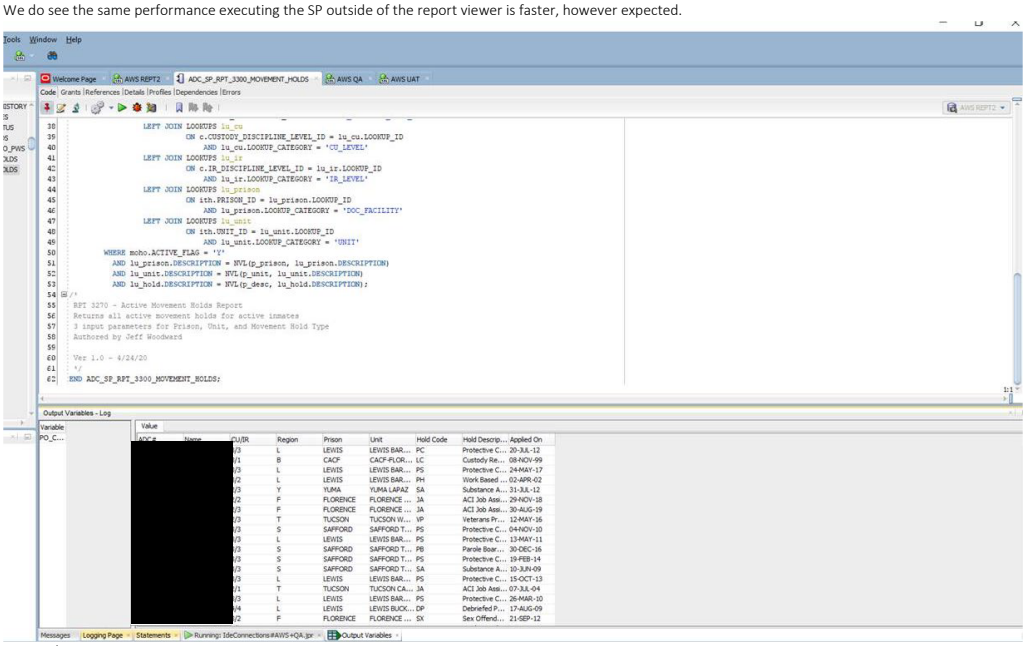
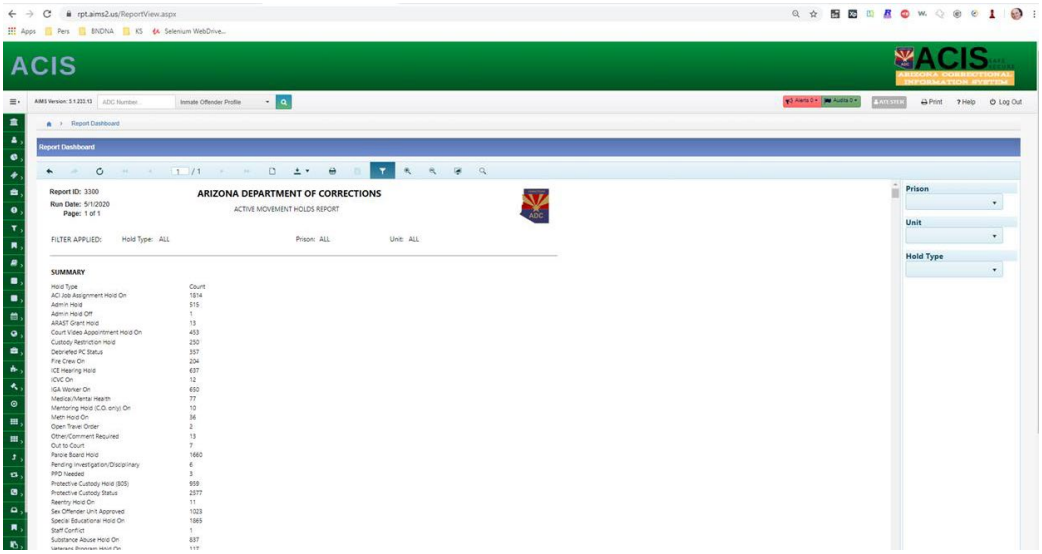
I don't see the same behavior with any other reports but this particular one, so it might be worth it to re-visit the process.
We do see the same performance executing the SP outside of the report viewer is faster, however expected.



Here is the report in RPT_DEV



Sincerely,

Hagay Hazan

Subject: Re: UAT environment restart reporting services

Hagay,

About how long did it take to load? I left one of my browser windows open and it did finally load after more than 20 minutes. At this point, we're not even able to load any of the report category menus... sometimes they will load after 5-10 mins, sometimes not. This is happening to both me and Aaron.

I went back and tested RPT 3300 in RPTDEV again right now... It was working yesterday and was loading in about 30 seconds, but now it's also extremely slow there too. I'm not sure what's going on. The underlying stored procedure is still running in under 30 seconds... but the Telerik side of things is taking forever.

Thanks.

Charles,

It does look to be back up. Unfortunately RPT 3300 still doesn't seem to be working, so that report must have another issue. Other reports seem to be loading normally.

Thanks!

Marlene, I may have spoke too soon. That was my first impression from just having looked at the lookup values in the Administration tables. It took a deeper dive into the code to identify what the actual issue was which is what Charles included in his email. I apologize for jumping the gun.

This is why ADCRR needs to know what tables feed the fields. Right now, ADCRR staff are either having to use the "take a shot in the dark" approach, or ask B&D staff who may not provide accurate information based on their limited knowledge.

Cindy was under the impression that the drop downs for telephone types were fed from three different tables, and the one that directly fed the Community Corrections area was TELEPHONE_TYPE. What do the two other tables, Pr Phone Type and Telephone Number Type, feed?

AMERICAN OVERSIGHT

AMENDMENT NO. 9 TO ADOC14-00003350/14-25-23

Pursuant to Section V.B of the September 25, 2013 Request for Proposal Number ADOC14-00003350/14-25-23 ("RFP"), the October 23, 2013 Proposal for Replacement of the Adult Inmate Management System, the May 13, 2014 Final Proposal Revision for Replacement of the Adult Inmate Management System, and the documents incorporated thereto (collectively, and with all other written amendments, the "Contract"), the Arizona Department of Corrections, Rehabilitation and Reentry ("ADCRR") and Business & Decision, North America PA, Inc. ("B&D") (together, the "Parties") hereby enter into this ninth official Contract amendment (the "Amendment"). This Amendment is intended to amend, supplement, and modify the Contract. To the extent any terms in this Amendment conflict with any term in the Contract as it previously existed, it is the intent of the Parties that the terms of this Amendment shall control. However, the Parties reaffirm their respective responsibilities pursuant to the Contract to the extent they are not modified by this Amendment. The Parties further agree that this Amendment may be executed in counterparts, effective immediately, upon both Parties signing. Undefined capitalized terms are as defined in this Amendment or the Contract.

1. Definitions

a. "ADCRR" refers to the Arizona Department of Corrections Rehabilitation and Reentry, and includes, for purposes of this Amendment, any third party it appoints at its sole discretion to assist ADCRR with regard to this Amendment and the Contract. ADCRR acknowledges that the contractual relationship remains between ADCRR and B&D, notwithstanding the involvement of any third party so appointed by ADCRR.

b. "Additional Remediation Hours" means a cap of 10,000 hours provided to ADCRR by B&D without charge for usage against any Parking Lot items, EUIL items, or changes requested by ADCRR. B&D agrees that it shall provide these Additional Remediation Hours, separate from, and concurrently with, the 10,000 man-hours per year that B&D is required to provide as part of Maintenance and Operations.

c. "Parking Lot" means the list of desired system functionality gathered by ADCRR throughout system development. Parking Lot items that were defined in the implementation scope for the Go-Live solution are listed on Exhibit 2. B&D shall deliver Parking Lots items listed in Exhibit 2. All other Parking Lot items may be implemented as part of the End User Improvement List (EUIL).

d. An End-User Improvement List ("EUIL") shall be created by mutual agreement between ADCRR and B&D. The goal of the EUIL is to ensure a meaningful positive impact on the aggregate ADCRR end-user experience. At the outset, the Parking Lot items listed in **Exhibit 2** shall be delivered as part of the Additional Remediation Hours and shall consume no more than 1,000 hours of the Additional Remediation Hours, leaving a balance of 9,000 Additional Remediation Hours for the remaining Parking Lot and EUIL items

AMERICAN OVERSIGHT

e. "Effective Date" means the date of last signature of this Amendment

2. Commencement of the M&O Phase

In accordance with Section III.D.10 of the Contract and Amendment No. 8, the Parties agree that the Maintenance and Operations Phase (the "M&O Phase") shall be deemed to have commenced on February 21, 2020. ADCRR agrees to wire to B&D the first M&O Phase monthly payment in the amount of $157,898.50 on or before three business days after the Effective Date and in the future pay the invoices for the M&O Phase according to the contractual terms.

3. Final Acceptance of the Solution

The Parties acknowledge and agree that ADCRR's final acceptance of the Solution shall be deemed to have been on January 15, 2020. The Parties agree to further memorialize the acceptance by signing the Certificate of Acceptance attached as **Exhibit 1**. ADCRR further agrees that it shall pay to B&D the following amounts on or before three business days after the Effective Date (a) the remaining invoice for the Implementation Phase, which totals $318,081.40; and (b) $948,973.20, representing the ten percent (10%) retainers collected pursuant to Section VI.C.1 of the Contract. No late fees have been assessed, paid, or shall be paid on these amounts. By paying the amounts specified in this paragraph, ADCRR has fulfilled its contractual payment responsibilities for the Implementation Phase as well as the release of retained amounts pursuant to Section VI.C.1. of the Contract.

4. Mutual Release

The Parties acknowledge that there have been certain disputes relating to testing, change requests, project delays, the conclusion of the Implementation Phase, the commencement of the M&O Phase, the "Parking Lot" issues, the claims raised in B&D's March 4, 2020 Notice of Claim, and any and all disputes or potential disputes related to the Solution through and including the Effective Date (the "Disputes").

The Parties agree that in consideration of the provisions of this Amendment and any compensation under this Amendment, each Party forever and unconditionally releases the other from any and all claims relating to the Disputes, known or unknown, from project inception (July 29, 2014) to the Effective Date. B&D agrees that with this Amendment, its March 4, 2020 Notice of Claim is moot and immediately withdrawn upon the Effective Date. The Parties further agree that, by entering into this Amendment, neither party is admitting fault or liability in any way relating to the Disputes.

The Parties further agree that the EUIL, as defined in Section 6 below, is not part of the Implementation Phase, and any disputes related to the EUIL cannot therefore serve as predicates for claims, pursuant to Section V.M. of the Contract, against the Performance Bond pursuant to Section V.R. of the Contract. Subject to the clarifications in this Paragraph, the Parties confirm their commitment to the contractual obligations and rights related to the Performance Bond as specified in Section V.R. of the Contract.

AMERICAN OVERSIGHT

5. Dispute Resolution of Discrete Items

In the event that ADCRR leadership (Joe Profiri) and B&D leadership (Dean Allen) cannot resolve any dispute through a normal issue escalation process with respect to any disputes arising after the Effective Date arising out of the definition of System Defects (also known as Bugs) and System Changes (also known as Change Requests), ADCRR and B&D agree to resolve such disputes through an arbitration process. The Parties agree to mutually agree to an 'Independent Expert' to fully and finally resolve such disputes. The Independent Expert may be selected from either the existing ADCRR IV&V vendor or a mutually agreed upon professional industry expert organization that is different from the 'Third Party' identified in the Definitions section 1.a. of this Amendment.

6. End-User Improvements & Remediation Hours

The Parties agree that B&D's delivery of items from **Exhibit 2** and the EUIL shall be free of charge, subject to a total cap of 10,000 Additional Remediation Hours. Items may be added to the EUIL up to the last working day of the 12th month following the Effective Date ("12th Month") if ADCRR has sufficient Additional Remediation Hours available for use. Any items added to the EUIL during the 12th Month, may be delivered in subsequent months consistent with the effort estimated by B&D and to maximum balance of 4200 Additional Remediation Hours or the balance of the Additional Remediation Hours available for use.

In the event that ADCRR does not have sufficient Additional Remediation Hours available for use for any items added to the EUIL, ADCRR may supplement the effort for the aforementioned items by any means at its disposal, which may include using any available M&O Hours or a separate Purchase Order.

The Parties shall iteratively develop the EUIL with monthly additions to the EUIL. The goal shall be to identify and resolve ADCRR authorized items on the approved EUIL as quickly as reasonably possible (e.g., utilization of the full 10,000 Additional Remediation Hours as quickly as reasonably possible against the prioritized EUIL). The Parties agree that B&D shall provide a target of the equivalent of 10 FTEs, or more, (in addition to the FTEs that B&D shall utilize to satisfy its M&O Hours) to provide the Additional Remediation Hours and as may be needed to exhaust the remaining 10,000 M&O Hours.

In each of the 12 months following the Effective Date, ADCRR commits to authorizing B&D to perform at least 400 hours of work on EUIL items to count against the Additional Remediation Hours.

ADCRR and B&D have provided and shall continue to provide Business Analysts, at no cost to the other Party, to gather ADCRR user feedback and identify the primary issues that users are facing in utilization of the system. This information shall be validated with ADCRR Business Owners.

AMERICAN OVERSIGHT

The following monthly procedure shall be implemented (clock starting every 30 calendar days after signature of the contract amendment) to assure the right items are being prioritized and resolved to impact user satisfaction:

- By or before the 10th Business Day: ADCRR and B&D, shall present a list of proposed items for the EUIL for estimation.
- By or before the 15th Business Day: B&D shall define and provide to ADCRR the effort and man-hours associated with each proposed item for the EUIL. B&D shall also provide a forecast of the available FTEs for the following month.
- By or before the 20th Business Day: ADCRR, with support from B&D, shall choose from the proposed and estimated items, which items shall be added to the EUIL (with the acceptance criteria for each item defined) and shall exercise its best good faith effort to ensure that the number of selected items utilizes the B&D FTEs at full capacity.
- ADCRR shall submit an initial prioritized list of EUIL items by no later than May 25, 2020.

This process shall repeat monthly. During some months more items shall be selected than other months. The Parties acknowledge that some of the items on the finalized EUIL shall take more than one month to develop. The Parties agree that B&D shall deliver each item from the EUIL into User Acceptance Testing and notify ADCRR of each delivery. If ADCRR fails to accept, reject, note pending other bugs, or test an item within thirty (30) days of notification of delivery, then that item shall be deemed accepted.

It is the intent of the Parties that the development of and delivery of the EUIL shall fully resolve ADCRR's concerns and disputes of the product's functionality. However, any items remaining on the EUIL, once the Additional Remediation Hours are exhausted, may or may not be prioritized by ADCRR and resolved utilizing available M&O hours at ADCRR's sole discretion.

In the first year commencing on the Effective date and following the initial EUIL agreed between the Parties, the Parties shall simultaneously work on the following (with priorities determined by ADCRR): the CAP Plan, the EUIL and other system changes.

The Parties recommit to the bug/change qualification as detailed in Section 5 of this Amendment.

7. CAPs and SLAs

The Parties reaffirm that Corrective Action Plans ("CAPs") are a component of the M&O Phase requiring remediation at no additional charge to ADCRR. The Parties reaffirm that future software defects that require remediation shall be repaired at no additional cost and separate from the M&O or Additional Remediation Hours. The Parties further agree to work collaboratively, to agree to a methodology for setting bug resolution priorities, including, but not limited to, considering the severity of a bug. With regards to any dispute the ADCRR appointed leadership (Joe Profiri) and the B&D appointed leadership (Dean Allen) shall endeavor to resolve any dispute. The Parties further agree to work collaboratively, to develop a set of achievable targets for the closure of items on the CAP lists as soon as practical within the first year of M&O.

AMERICAN OVERSIGHT

With respect to SLAs, the Parties agree that final acceptance of agreed SLAs shall be achieved 30 days after the effective date of this Amendment.

8. Commercial Reference

ADCRR acknowledges that B&D has served as a vendor under the Contract and shall confirm such in commercial references, orally and in writing, for upcoming Offender Management System opportunities on which B&D may bid. Offender Management System opportunities shall include any project or bid relating to any software system used in connection with the management of an inmate's incarceration, probation, or parole, or any component thereof, whether public, private, federal, state, local, or municipal, located within the United States of America. ADCRR's obligation set out in this clause shall survive the termination of the Contract for any reason.

8. Point of Contact

B&D shall make the Mi-Case President of B&D (Dean Allen) the main point of contact relating to this Contract, as amended, and any major escalations shall be directed, but not limited to, to the chairman of B&D (Pierre Louis Biaggi) as next level decision-maker.

AMENDMENT NO. 9 TO ADOC14-00003350/14-25-23

Pursuant to Section V.B of the September 25, 2013 Request for Proposal Number ADOC14-00003350/14-25-23 ("RFP"), the October 23, 2013 Proposal for Replacement of the Adult Inmate Management System, the May 13, 2014 Final Proposal Revision for Replacement of the Adult Inmate Management System, and the documents incorporated thereto (collectively, and with all other written amendments, the "Contract"), the Arizona Department of Corrections, Rehabilitation and Reentry ("ADCRR") and Business & Decision, North America PA, Inc. ("B&D") (together, the "Parties") hereby enter into this ninth official Contract amendment (the "Amendment"). This Amendment is intended to amend, supplement, and modify the Contract. To the extent any terms in this Amendment conflict with any term in the Contract as it previously existed, it is the intent of the Parties that the terms of this Amendment shall control. However, the Parties reaffirm their respective responsibilities pursuant to the Contract to the extent they are not modified by this Amendment. The Parties further agree that this Amendment may be executed in counterparts, effective immediately, upon both Parties signing. Undefined capitalized terms are as defined in this Amendment or the Contract.

1. Definitions

   a. "ADCRR" refers to the Arizona Department of Corrections Rehabilitation and Reentry, and includes, for purposes of this Amendment, any third party it appoints at its sole discretion to assist ADCRR with regard to this Amendment and the Contract. ADCRR acknowledges that the contractual relationship remains between ADCRR and B&D, notwithstanding the involvement of any third party so appointed by ADCRR.

   b. "Additional Remediation Hours" means a cap of 10,000 hours provided to ADCRR by B&D without charge for usage against any Parking Lot items, EUIL items, or changes requested by ADCRR. B&D agrees that it will provide these Additional Remediation Hours, separate from, and concurrently with, the 10,000 man-hours per year that B&D is required to provide as part of Maintenance and Operations.

   c. "Parking Lot" means the list of desired system functionality gathered by ADCRR throughout system development. Parking Lot items that were defined in the implementation scope for the Go-Live solution are listed on Exhibit 2. B&D shall deliver Parking Lots items listed in Exhibit 2. All other Parking Lot items may be implemented as part of the End User Improvement List (EUIL).

   d. An End-User Improvement List ("EUIL") will be created by mutual agreement between ADCRR and B&D. The goal of the EUIL is to ensure a meaningful positive impact on the aggregate ADCRR end-user experience. At the outset, the Parking Lot items listed in **Exhibit 2** will be delivered as part of the Additional Remediation Hours and will consume no more than 1,000 hours of the Additional Remediation Hours, leaving a balance of 9,000 Additional Remediation Hours for the remaining Parking Lot and EUIL items

AMERICAN OVERSIGHT

e. "Effective Date" means the date of last signature of this Amendment

2. Commencement of the M&O Phase

In accordance with Section III.D.10 of the Contract and Amendment No. 8, the Parties agree that the Maintenance and Operations Phase (the "M&O Phase") shall be deemed to have commenced on February 21, 2020. ADCRR agrees to wire to B&D the first M&O Phase monthly payment in the amount of $157,898.50 on or before three business days after the Effective Date and in the future pay the invoices for the M&O Phase according to the contractual terms.

3. Final Acceptance of the Solution

The Parties acknowledge and agree that ADCRR's final acceptance of the Solution shall be deemed to have been on January 15, 2020. The Parties agree to further memorialize the acceptance by signing the Certificate of Acceptance attached as **Exhibit 1**. ADCRR further agrees that it will pay to B&D the following amounts on or before three business days after the Effective Date (a) the remaining invoice for the Implementation Phase, which totals $318,081.40; and (b) $948,973.20, representing the ten percent (10%) retainers collected pursuant to Section VI.C.1 of the Contract. No late fees have been assessed, paid, or will be paid on these amounts. By paying the amounts specified in this paragraph, ADCRR has fulfilled its contractual payment responsibilities for the Implementation Phase as well as the release of retained amounts pursuant to Section VI.C.1. of the Contract.

4. Mutual Release

The Parties acknowledge that there have been certain disputes relating to testing, change requests, project delays, the conclusion of the Implementation Phase, the commencement of the M&O Phase, the "Parking Lot" issues, the claims raised in B&D's March 4, 2020 Notice of Claim, and any and all disputes or potential disputes related to the Solution through and including the Effective Date (the "Disputes").

The Parties agree that in consideration of the provisions of this Amendment and any compensation under this Amendment, each Party forever and unconditionally releases the other from any and all claims relating to the Disputes, known or unknown, from project inception (July 29, 2014) to the Effective Date. B&D agrees that with this Amendment, its March 4, 2020 Notice of Claim is moot and immediately withdrawn upon the Effective Date. The Parties further agree that, by entering into this Amendment, neither party is admitting fault or liability in any way relating to the Disputes.

The Parties further agree that the EUIL, as defined in Section 6 below, is not part of the Implementation Phase, and any disputes related to the EUIL cannot therefore serve as predicates for claims, pursuant to Section V.M. of the Contract, against the Performance Bond pursuant to Section V.R. of the Contract. Subject to the clarifications in this Paragraph, the Parties confirm their commitment to the contractual obligations and rights related to the Performance Bond as specified in Section V.R. of the Contract.

AMERICAN OVERSIGHT

5. Dispute Resolution of Discrete Items

In the event that ADCRR leadership (Joe Profiri) and B&D leadership (Dean Allen) cannot resolve any dispute through a normal issue escalation process with respect to any disputes arising after the Effective Date arising out of the definition of System Defects (also known as Bugs) and System Changes (also known as Change Requests), ADCRR and B&D agree to resolve such disputes through an arbitration process. The Parties agree to mutually agree to an 'Independent Expert' to fully and finally resolve such disputes. The Independent Expert may be selected from either the existing ADCRR IV&V vendor or a mutually agreed upon professional industry expert organization that is different from the 'Third Party' identified in the Definitions section 1.a. of this Amendment.

6. End-User Improvements & Remediation Hours

The Parties agree that B&D's delivery of items from **Exhibit 2** and the EUIL will be free of charge, subject to a total cap of 10,000 Additional Remediation Hours. Items may be added to the EUIL up to the last working day of the 12th month following the Effective Date ("12th Month") if ADCRR has sufficient Additional Remediation Hours available for use. Any items added to the EUIL during the 12th Month, may be delivered in subsequent months consistent with the effort estimated by B&D and to maximum balance of 4200 Additional Remediation Hours or the balance of the Additional Remediation Hours available for use.

In the event that ADCRR does not have sufficient Additional Remediation Hours available for use for any items added to the EUIL, ADCRR may supplement the effort for the aforementioned items by any means at its disposal, which may include using any available M&O Hours or a separate Purchase Order.

The Parties will iteratively develop the EUIL with monthly additions to the EUIL. The goal will be to identify and resolve ADCRR authorized items on the approved EUIL as quickly as reasonably possible (e.g., utilization of the full 10,000 Additional Remediation Hours as quickly as reasonably possible against the prioritized EUIL). The Parties agree that B&D will provide a target of the equivalent of 10 FTEs, or more, (in addition to the FTEs that B&D will utilize to satisfy its M&O Hours) to provide the Additional Remediation Hours and as may be needed to exhaust the remaining 10,000 M&O Hours.

In each of the 12 months following the Effective Date, ADCRR commits to authorizing B&D to perform at least 400 hours of work on EUIL items to count against the Additional Remediation Hours.

ADCRR and B&D have provided and will continue to provide Business Analysts, at no cost to the other Party, to gather ADCRR user feedback and identify the primary issues that users are facing in utilization of the system. This information shall be validated with ADCRR Business Owners.

AMERICAN OVERSIGHT

The following monthly procedure shall be implemented (clock starting every 30 calendar days after signature of the contract amendment) to assure the right items are being prioritized and resolved to impact user satisfaction:

- By or before the 10th Business Day: ADCRR and B&D, shall present a list of proposed items for the EUIL for estimation.
- By or before the 15th Business Day: B&D shall define and provide to ADCRR the effort and man-hours associated with each proposed item for the EUIL. B&D shall also provide a forecast of the available FTEs for the following month.
- By or before the 20th Business Day: ADCRR, with support from B&D, shall choose from the proposed and estimated items, which items shall be added to the EUIL (with the acceptance criteria for each item defined) and shall exercise its best good faith effort to ensure that the number of selected items utilizes the B&D FTEs at full capacity.
- ADCRR shall submit an initial prioritized list of EUIL items by no later than May 25, 2020.

This process shall repeat monthly. During some months more items shall be selected than other months. The Parties acknowledge that some of the items on the finalized EUIL shall take more than one month to develop. The Parties agree that B&D shall deliver each item from the EUIL into User Acceptance Testing and notify ADCRR of each delivery. If ADCRR fails to accept, reject, note pending other bugs, or test an item within thirty (30) days of notification of delivery, then that item shall be deemed accepted.

It is the intent of the Parties that the development of and delivery of the EUIL shall fully resolve ADCRR's concerns and disputes of the product's functionality. However, any items remaining on the EUIL, once the Additional Remediation Hours are exhausted, may or may not be prioritized by ADCRR and resolved utilizing available M&O hours at ADCRR's sole discretion.

In the first year commencing on the Effective date and following the initial EUIL agreed between the Parties, the Parties shall simultaneously work on the following (with priorities determined by ADCRR): the CAP Plan, the EUIL and other system changes.

The Parties recommit to the bug/change qualification as detailed in Section 5 of this Amendment.

7. CAPs and SLAs

The Parties reaffirm that Corrective Action Plans ("CAPs") are a component of the M&O Phase requiring remediation at no additional charge to ADCRR. The Parties reaffirm that future software defects that require remediation shall be repaired at no additional cost and separate from the M&O or Additional Remediation Hours. The Parties further agree to work collaboratively, to agree to a methodology for setting bug resolution priorities, including, but not limited to, considering the severity of a bug. With regards to any dispute the ADCRR appointed leadership (Joe Profiri) and the B&D appointed leadership (Dean Allen) shall endeavor to resolve any dispute. The Parties further agree to work collaboratively, to develop a set of achievable targets for the closure of items on the CAP lists as soon as practical within the first year of M&O.

AMERICAN OVERSIGHT

With respect to SLAs, the Parties agree that final acceptance of agreed SLAs shall be achieved 30 days after the effective date of this Amendment.

8. Commercial Reference

ADCRR acknowledges that B&D has served as a vendor under the Contract and shall confirm such in commercial references, orally and in writing, for upcoming Offender Management System opportunities on which B&D may bid. Offender Management System opportunities shall include any project or bid relating to any software system used in connection with the management of an inmate's incarceration, probation, or parole, or any component thereof, whether public, private, federal, state, local, or municipal, located within the United States of America. ADCRR's obligation set out in this clause shall survive the termination of the Contract for any reason.

8. Point of Contact

B&D shall make the Mi-Case President of B&D (Dean Allen) the main point of contact relating to this Contract, as amended, and any major escalations shall be directed, but not limited to, to the chairman of B&D (Pierre Louis Biaggi) as next level decision-maker.

CERTIFICATE OF FINAL ACCEPTANCE

The Arizona Department of Corrections ("ADCRR") and Business & Decision, North America PA, Inc. ("B&D") hereby agree, certify, and acknowledge that ADCRR formally accepted from B&D the "Solution" required by Contract No. ADOC14-00003350/14-25-23 on January 15, 2020.

The Parties further agree that, pursuant to Section V.R of the September 25, 2013 Request for Proposal Number ADOC14-00003350/14-25-23, the Performance Bonds submitted by B&D shall not remain in effect later than January 14, 2021.

AMENDMENT NO. 9 TO ADOC14-00003350/14-25-23

Pursuant to Section V.B of the September 25, 2013 Request for Proposal Number ADOC14-00003350/14-25-23 ("RFP"), the October 23, 2013 Proposal for Replacement of the Adult Inmate Management System, the May 13, 2014 Final Proposal Revision for Replacement of the Adult Inmate Management System, and the documents incorporated thereto (collectively, and with all other written amendments, the "Contract"), the Arizona Department of Corrections, Rehabilitation and Reentry ("ADCRR") and Business & Decision, North America PA, Inc. ("B&D") (together, the "Parties") hereby enter into this ninth official Contract amendment (the "Amendment"). This Amendment is intended to amend, supplement, and modify the Contract. To the extent any terms in this Amendment conflict with any term in the Contract as it previously existed, it is the intent of the Parties that the terms of this Amendment shall control. However, the Parties reaffirm their respective responsibilities pursuant to the Contract to the extent they are not modified by this Amendment. The Parties further agree that this Amendment may be executed in counterparts, effective immediately, upon both Parties signing. Undefined capitalized terms are as defined in this Amendment or the Contract.

1. Definitions

   a. "ADCRR" refers to the Arizona Department of Corrections Rehabilitation and Reentry, and includes, for purposes of this Amendment, any third party it appoints at its sole discretion to assist ADCRR with regard to this Amendment and the Contract. ADCRR acknowledges that the contractual relationship remains between ADCRR and B&D, notwithstanding the involvement of any third party so appointed by ADCRR.

   b. "Additional Remediation Hours" means a cap of 10,000 hours provided to ADCRR by B&D without charge for usage against any Parking Lot items, EUIL items, or changes requested by ADCRR. B&D agrees that it will provide these Additional Remediation Hours, separate from, and concurrently with, the 10,000 man-hours per year that B&D is required to provide as part of Maintenance and Operations.

   c. "Parking Lot" means the list of desired system functionality gathered by ADCRR throughout system development. Parking Lot items that were defined in the implementation scope for the Go-Live solution are listed on Exhibit 2. B&D shall deliver Parking Lots items listed in Exhibit 2. All other Parking Lot items may be implemented as part of the End User Improvement List (EUIL).

   d. An End-User Improvement List ("EUIL") will be created by mutual agreement between ADCRR and B&D. The goal of the EUIL is to ensure a meaningful positive impact on the aggregate ADCRR end-user experience. At the outset, the Parking Lot items listed in **Exhibit 2** will be delivered as part of the Additional Remediation Hours and will consume no more than 1,000 hours of the Additional Remediation Hours, leaving a balance of 9,000 Additional Remediation Hours for the remaining Parking Lot and EUIL items

AMERICAN OVERSIGHT

e. "Effective Date" means the date of last signature of this Amendment

2. Commencement of the M&O Phase

In accordance with Section III.D.10 of the Contract and Amendment No. 8, the Parties agree that the Maintenance and Operations Phase (the "M&O Phase") shall be deemed to have commenced on February 21, 2020. ADCRR agrees to wire to B&D the first M&O Phase monthly payment in the amount of $157,898.50 on or before three business days after the Effective Date and in the future pay the invoices for the M&O Phase according to the contractual terms.

3. Final Acceptance of the Solution

The Parties acknowledge and agree that ADCRR's final acceptance of the Solution shall be deemed to have been on January 15, 2020. The Parties agree to further memorialize the acceptance by signing the Certificate of Acceptance attached as **Exhibit 1**. ADCRR further agrees that it will pay to B&D the following amounts on or before three business days after the Effective Date (a) the remaining invoice for the Implementation Phase, which totals $318,081.40; and (b) $948,973.20, representing the ten percent (10%) retainers collected pursuant to Section VI.C.1 of the Contract. No late fees have been assessed, paid, or will be paid on these amounts. By paying the amounts specified in this paragraph, ADCRR has fulfilled its contractual payment responsibilities for the Implementation Phase as well as the release of retained amounts pursuant to Section VI.C.1. of the Contract.

4. Mutual Release

The Parties acknowledge that there have been certain disputes relating to testing, change requests, project delays, the conclusion of the Implementation Phase, the commencement of the M&O Phase, the "Parking Lot" issues, the claims raised in B&D's March 4, 2020 Notice of Claim, and any and all disputes or potential disputes related to the Solution through and including the Effective Date (the "Disputes").

The Parties agree that in consideration of the provisions of this Amendment and any compensation under this Amendment, each Party forever and unconditionally releases the other from any and all claims relating to the Disputes, known or unknown, from project inception (July 29, 2014) to the Effective Date. B&D agrees that with this Amendment, its March 4, 2020 Notice of Claim is moot and immediately withdrawn upon the Effective Date. The Parties further agree that, by entering into this Amendment, neither party is admitting fault or liability in any way relating to the Disputes.

The Parties further agree that the EUIL, as defined in Section 6 below, is not part of the Implementation Phase, and any disputes related to the EUIL cannot therefore serve as predicates for claims, pursuant to Section V.M. of the Contract, against the Performance Bond pursuant to Section V.R. of the Contract. Subject to the clarifications in this Paragraph, the Parties confirm their commitment to the contractual obligations and rights related to the Performance Bond as specified in Section V.R. of the Contract.

AMERICAN OVERSIGHT

5. Dispute Resolution of Discrete Items

In the event that ADCRR leadership (Joe Profiri) and B&D leadership (Dean Allen) cannot resolve any dispute through a normal issue escalation process with respect to any disputes arising after the Effective Date arising out of the definition of System Defects (also known as Bugs) and System Changes (also known as Change Requests), ADCRR and B&D agree to resolve such disputes through an arbitration process. The Parties agree to mutually agree to an 'Independent Expert' to fully and finally resolve such disputes. The Independent Expert may be selected from either the existing ADCRR IV&V vendor or a mutually agreed upon professional industry expert organization that is different from the 'Third Party' identified in the Definitions section 1.a. of this Amendment.

6. End-User Improvements & Remediation Hours

The Parties agree that B&D's delivery of items from **Exhibit 2** and the EUIL will be free of charge, subject to a total cap of 10,000 Additional Remediation Hours. Items may be added to the EUIL up to the last working day of the 12th month following the Effective Date ("12th Month") if ADCRR has sufficient Additional Remediation Hours available for use. Any items added to the EUIL during the 12th Month, may be delivered in subsequent months consistent with the effort estimated by B&D and to maximum balance of 4200 Additional Remediation Hours or the balance of the Additional Remediation Hours available for use.

In the event that ADCRR does not have sufficient Additional Remediation Hours available for use for any items added to the EUIL, ADCRR may supplement the effort for the aforementioned items by any means at its disposal, which may include using any available M&O Hours or a separate Purchase Order.

The Parties will iteratively develop the EUIL with monthly additions to the EUIL. The goal will be to identify and resolve ADCRR authorized items on the approved EUIL as quickly as reasonably possible (e.g., utilization of the full 10,000 Additional Remediation Hours as quickly as reasonably possible against the prioritized EUIL). The Parties agree that B&D will provide a target of the equivalent of 10 FTEs, or more, (in addition to the FTEs that B&D will utilize to satisfy its M&O Hours) to provide the Additional Remediation Hours and as may be needed to exhaust the remaining 10,000 M&O Hours.

In each of the 12 months following the Effective Date, ADCRR commits to authorizing B&D to perform at least 400 hours of work on EUIL items to count against the Additional Remediation Hours.

ADCRR and B&D have provided and will continue to provide Business Analysts, at no cost to the other Party, to gather ADCRR user feedback and identify the primary issues that users are facing in utilization of the system. This information shall be validated with ADCRR Business Owners.

AMERICAN OVERSIGHT

The following monthly procedure shall be implemented (clock starting every 30 calendar days after signature of the contract amendment) to assure the right items are being prioritized and resolved to impact user satisfaction:

- By or before the 10th Business Day: ADCRR and B&D, shall present a list of proposed items for the EUIL for estimation.
- By or before the 15th Business Day: B&D shall define and provide to ADCRR the effort and man-hours associated with each proposed item for the EUIL. B&D shall also provide a forecast of the available FTEs for the following month.
- By or before the 20th Business Day: ADCRR, with support from B&D, shall choose from the proposed and estimated items, which items shall be added to the EUIL (with the acceptance criteria for each item defined) and shall exercise its best good faith effort to ensure that the number of selected items utilizes the B&D FTEs at full capacity.
- ADCRR shall submit an initial prioritized list of EUIL items by no later than May 25, 2020.

This process shall repeat monthly. During some months more items shall be selected than other months. The Parties acknowledge that some of the items on the finalized EUIL shall take more than one month to develop. The Parties agree that B&D shall deliver each item from the EUIL into User Acceptance Testing and notify ADCRR of each delivery. If ADCRR fails to accept, reject, note pending other bugs, or test an item within thirty (30) days of notification of delivery, then that item shall be deemed accepted.

It is the intent of the Parties that the development of and delivery of the EUIL shall fully resolve ADCRR's concerns and disputes of the product's functionality. However, any items remaining on the EUIL, once the Additional Remediation Hours are exhausted, may or may not be prioritized by ADCRR and resolved utilizing available M&O hours at ADCRR's sole discretion.

In the first year commencing on the Effective date and following the initial EUIL agreed between the Parties, the Parties shall simultaneously work on the following (with priorities determined by ADCRR): the CAP Plan, the EUIL and other system changes.

The Parties recommit to the bug/change qualification as detailed in Section 5 of this Amendment.

7. CAPs and SLAs

The Parties reaffirm that Corrective Action Plans ("CAPs") are a component of the M&O Phase requiring remediation at no additional charge to ADCRR. The Parties reaffirm that future software defects that require remediation shall be repaired at no additional cost and separate from the M&O or Additional Remediation Hours. The Parties further agree to work collaboratively, to agree to a methodology for setting bug resolution priorities, including, but not limited to, considering the severity of a bug. With regards to any dispute the ADCRR appointed leadership (Joe Profiri) and the B&D appointed leadership (Dean Allen) shall endeavor to resolve any dispute. The Parties further agree to work collaboratively, to develop a set of achievable targets for the closure of items on the CAP lists as soon as practical within the first year of M&O.

AMERICAN OVERSIGHT

With respect to SLAs, the Parties agree that final acceptance of agreed SLAs shall be achieved 30 days after the effective date of this Amendment.

8. Commercial Reference

ADCRR acknowledges that B&D has served as a vendor under the Contract and shall confirm such in commercial references, orally and in writing, for upcoming Offender Management System opportunities on which B&D may bid. Offender Management System opportunities shall include any project or bid relating to any software system used in connection with the management of an inmate's incarceration, probation, or parole, or any component thereof, whether public, private, federal, state, local, or municipal, located within the United States of America. ADCRR's obligation set out in this clause shall survive the termination of the Contract for any reason.

8. Point of Contact

B&D shall make the Mi-Case President of B&D (Dean Allen) the main point of contact relating to this Contract, as amended, and any major escalations shall be directed, but not limited to, to the chairman of B&D (Pierre Louis Biaggi) as next level decision-maker.

AMERICAN OVERSIGHT

AMENDMENT NO. 9 TO ADOC14-00003350/14-25-23

Pursuant to Section V.B of the September 25, 2013 Request for Proposal Number ADOC14-00003350/14-25-23 ("RFP"), the October 23, 2013 Proposal for Replacement of the Adult Inmate Management System, the May 13, 2014 Final Proposal Revision for Replacement of the Adult Inmate Management System, and the documents incorporated thereto (collectively, and with all other written amendments, the "Contract"), the Arizona Department of Corrections, Rehabilitation and Reentry ("ADCRR") and Business & Decision, North America PA, Inc. ("B&D") (together, the "Parties") hereby enter into this ninth official Contract amendment (the "Amendment"). This Amendment is intended to amend, supplement, and modify the Contract. To the extent any terms in this Amendment conflict with any term in the Contract as it previously existed, it is the intent of the Parties that the terms of this Amendment shall control. However, the Parties reaffirm their respective responsibilities pursuant to the Contract to the extent they are not modified by this Amendment. The Parties further agree that this Amendment may be executed in counterparts, effective immediately, upon both Parties signing. Undefined capitalized terms are as defined in this Amendment or the Contract.

1. Definitions

a. "ADCRR" refers to the Arizona Department of Corrections Rehabilitation and Reentry, and includes, for purposes of this Amendment, any third party it appoints at its sole discretion to assist ADCRR with regard to this Amendment and the Contract. ADCRR acknowledges that the contractual relationship remains between ADCRR and B&D, notwithstanding the involvement of any third party so appointed by ADCRR.

b. "Additional Remediation Hours" means a cap of 10,000 hours provided to ADCRR by B&D without charge for usage against any Parking Lot items, EUIL items, or changes requested by ADCRR. B&D agrees that it will provide these Additional Remediation Hours, separate from, and concurrently with, the 10,000 man-hours per year that B&D is required to provide as part of Maintenance and Operations. "Parking Lot" means the list of desired system functionality gathered by ADCRR throughout system development that B&D will deliver. Parking Lot items that were defined in the implementation scope for the Go-Live solution are listed on **Exhibit 2**. All other Parking Lot items may be implemented as part of the End User Improvement List (EUIL).

c. An End-User Improvement List ("EUIL") will be created by mutual agreement between ADCRR and B&D. The goal of the EUIL is to ensure a meaningful positive impact on the aggregate ADCRR end-user experience. At the outset, the Parking Lot items listed in **Exhibit 2** will be delivered as part of the Additional Remediation Hours and will consume no more than 1,000 hours of the Additional Remediation Hours, leaving a balance of 9,000 Additional Remediation Hours for the remaining Parking Lot and EUIL items

d. "Effective Date" means the date of last signature of this Amendment

AMERICAN OVERSIGHT

2. Commencement of the M&O Phase

In accordance with Section III.D.10 of the Contract and Amendment No. 8, the Parties agree that the Maintenance and Operations Phase (the "M&O Phase") shall be deemed to have commenced on February 21, 2020. ADCRR agrees to wire to B&D the first M&O Phase monthly payment in the amount of $157,898.50 on or before three business days after the Effective Date and in the future pay the invoices for the M&O Phase according to the contractual terms.

3. Final Acceptance of the Solution

The Parties acknowledge and agree that ADCRR's final acceptance of the Solution shall be deemed to have been on January 15, 2020. The Parties agree to further memorialize the acceptance by signing the Certificate of Acceptance attached as **Exhibit 1**. ADCRR further agrees that it will pay to B&D the following amounts on or before three business days after the Effective Date (a) the remaining invoice for the Implementation Phase, which totals $318,081.40; and (b) $948,973.20, representing the ten percent (10%) retainers collected pursuant to Section VI.C.1 of the Contract. No late fees have been assessed, paid, or will be paid on these amounts. By paying the amounts specified in this paragraph, ADCRR has fulfilled its contractual payment responsibilities for the Implementation Phase as well as the release of retained amounts pursuant to Section VI.C.1. of the Contract.

4. Mutual Release

The Parties acknowledge that there have been certain disputes relating to testing, change requests, project delays, the conclusion of the Implementation Phase, the commencement of the M&O Phase, the "Parking Lot" issues, the claims raised in B&D's March 4, 2020 Notice of Claim, and any and all disputes or potential disputes related to the Solution through and including the Effective Date (the "Disputes").

The Parties agree that in consideration of the provisions of this Amendment and any compensation under this Amendment, each Party forever and unconditionally releases the other from any and all claims relating to the Disputes, known or unknown, from project inception (July 29, 2014) to the Effective Date. B&D agrees that with this Amendment, its March 4, 2020 Notice of Claim is moot and immediately withdrawn upon the Effective Date. The Parties further agree that, by entering into this Amendment, neither party is admitting fault or liability in any way relating to the Disputes.

The Parties further agree that the EUIL, as defined in Section 6 below, is not part of the Implementation Phase, and any disputes related to the EUIL cannot therefore serve as predicates for claims, pursuant to Section V.M. of the Contract, against the Performance Bond pursuant to Section V.R. of the Contract. Subject to the clarifications in this Paragraph, the Parties confirm their commitment to the contractual obligations and rights related to the Performance Bond as specified in Section V.R. of the Contract.

AMERICAN OVERSIGHT
AZ-DOC-21-0315-A-002725

5. Dispute Resolution of Discrete Items

In the event that ADCRR leadership (Joe Profiri) and B&D leadership (Dean Allen) cannot resolve any dispute through a normal issue escalation process with respect to any disputes arising after the Effective Date arising out of the definition of System Defects (also known as Bugs) and System Changes (also known as Change Requests), ADCRR and B&D agree to resolve such disputes through an arbitration process. The Parties agree to mutually agree to an 'Independent Expert' to fully and finally resolve such disputes. The Independent Expert may be selected from either the existing ADCRR IV&V vendor or a mutually agreed upon professional industry expert organization that is different from the 'Third Party' identified in the Definitions section 1.a. of this Amendment.

6. End-User Improvements & Remediation Hours

The Parties agree that B&D's delivery of items from **Exhibit 2** and the EUIL will be free of charge, subject to a total cap of 10,000 Additional Remediation Hours. Items may be added to the EUIL up to the last working day of the 12th month following the Effective Date ("12th Month") if ADCRR has sufficient Additional Remediation Hours available for use. Any items added to the EUIL during the 12th Month, may be delivered in subsequent months consistent with the effort estimated by B&D and to maximum balance of 4200 Additional Remediation Hours or the balance of the Additional Remediation Hours available for use.

In the event that ADCRR does not have sufficient Additional Remediation Hours available for use for any items added to the EUIL, ADCRR may supplement the effort for the aforementioned items by any means at its disposal, which may include using any available M&O Hours or a separate Purchase Order.

The Parties will iteratively develop the EUIL with monthly additions to the EUIL. The goal will be to identify and resolve ADCRR authorized items on the approved EUIL as quickly as reasonably possible (e.g., utilization of the full 10,000 Additional Remediation Hours as quickly as reasonably possible against the prioritized EUIL). The Parties agree that B&D will provide a target of the equivalent of 10 FTEs, or more, (in addition to the FTEs that B&D will utilize to satisfy its M&O Hours) to provide the Additional Remediation Hours and as may be needed to exhaust the remaining 10,000 M&O Hours.

In each of the 12 months following the Effective Date, ADCRR commits to authorizing B&D to perform at least 400 hours of work on EUIL items to count against the Additional Remediation Hours.

ADCRR and B&D have provided and will continue to provide Business Analysts, at no cost to the other Party, to gather ADCRR user feedback and identify the primary issues that users are facing in utilization of the system. This information shall be validated with ADCRR Business Owners.

AMERICAN OVERSIGHT

The following monthly procedure shall be implemented (clock starting every 30 calendar days after signature of the contract amendment) to assure the right items are being prioritized and resolved to impact user satisfaction:

- By or before the 10th Business Day: ADCRR and B&D, shall present a list of proposed items for the EUIL for estimation.
- By or before the 15th Business Day: B&D shall define and provide to ADCRR the effort and man-hours associated with each proposed item for the EUIL. B&D shall also provide a forecast of the available FTEs for the following month.
- By or before the 20th Business Day: ADCRR, with support from B&D, shall choose from the proposed and estimated items, which items shall be added to the EUIL (with the acceptance criteria for each item defined) and shall exercise its best good faith effort to ensure that the number of selected items utilizes the B&D FTEs at full capacity.
- ADCRR shall submit an initial prioritized list of EUIL items by no later than May 25, 2020.

This process shall repeat monthly. During some months more items shall be selected than other months. The Parties acknowledge that some of the items on the finalized EUIL shall take more than one month to develop. The Parties agree that B&D shall deliver each item from the EUIL into User Acceptance Testing and notify ADCRR of each delivery. If ADCRR fails to accept, reject, note pending other bugs, or test an item within thirty (30) days of notification of delivery, then that item shall be deemed accepted.

It is the intent of the Parties that the development of and delivery of the EUIL shall fully resolve ADCRR's concerns and disputes of the product's functionality. However, any items remaining on the EUIL, once the Additional Remediation Hours are exhausted, may or may not be prioritized by ADCRR and resolved utilizing available M&O hours at ADCRR's sole discretion.

In the first year commencing on the Effective date and following the initial EUIL agreed between the Parties, the Parties shall simultaneously work on the following (with priorities determined by ADCRR): the CAP Plan, the EUIL and other system changes.

The Parties recommit to the bug/change qualification as detailed in Section 5 of this Amendment.

7. CAPs and SLAs

The Parties reaffirm that Corrective Action Plans ("CAPs") are a component of the M&O Phase requiring remediation at no additional charge to ADCRR. The Parties reaffirm that future software defects that require remediation shall be repaired at no additional cost and separate from the M&O or Additional Remediation Hours. The Parties further agree to work collaboratively, to agree to a methodology for setting bug resolution priorities, including, but not limited to, considering the severity of a bug. With regards to any dispute the ADCRR appointed leadership (Joe Profiri) and the B&D appointed leadership (Dean Allen) shall endeavor to resolve any dispute. The Parties further agree to work collaboratively, to develop a set of achievable targets for the closure of items on the CAP lists as soon as practical within the first year of M&O.

AMERICAN OVERSIGHT

With respect to SLAs, the Parties agree that final acceptance of agreed SLAs shall be achieved 30 days after the effective date of this Amendment.

8. Commercial Reference

ADCRR acknowledges that B&D has served as a vendor under the Contract and shall confirm such in commercial references, orally and in writing, for upcoming Offender Management System opportunities on which B&D may bid. Offender Management System opportunities shall include any project or bid relating to any software system used in connection with the management of an inmate's incarceration, probation, or parole, or any component thereof, whether public, private, federal, state, local, or municipal, located within the United States of America. ADCRR's obligation set out in this clause shall survive the termination of the Contract for any reason.

8. Point of Contact

B&D shall make the Mi-Case President of B&D (Dean Allen) the main point of contact relating to this Contract, as amended, and any major escalations shall be directed, but not limited to, to the chairman of B&D (Pierre Louis Biaggi) as next level decision-maker.

Stacey and Herb,

We are actively working through the one inmate [redacted]) that failed on this re-test, the other 6 inmates passed. I request that this Bug be re-classified as a Medium P1. We are already working it and it doesn't meet the criteria of a "High" at this point. Please let me know if you would like to talk live about this. Thank you so much.

Hi Melody and Jennifer,

George and I talked, I think he just wanted to ensure everyone is talking about the same file. I think the next question (unless George wants to correct me on this) is, are we actually missing some fields within the file that need to be there? Neither of us are familiar with the DCQI data that was being referenced below. I'm really not familiar with the contents at all, I just transfer the files, but I want to make sure everyone is on the same page so we can work to resolve the issue.

AMERICAN OVERSIGHT

AMENDMENT NO. 9 TO ADOC14-00003350/14-25-23

Pursuant to Section V.B of the September 25, 2013 Request for Proposal Number ADOC14-00003350/14-25-23 ("RFP"), the October 23, 2013 Proposal for Replacement of the Adult Inmate Management System, the May 13, 2014 Final Proposal Revision for Replacement of the Adult Inmate Management System, and the documents incorporated thereto (collectively, and with all other written amendments, the "Contract"), the Arizona Department of Corrections, Rehabilitation and Reentry ("ADCRR") and Business & Decision, North America PA, Inc. ("B&D") (together, the "Parties") hereby enter into this ninth official Contract amendment (the "Amendment"). This Amendment is intended to amend, supplement, and modify the Contract. To the extent any terms in this Amendment conflict with any term in the Contract as it previously existed, it is the intent of the Parties that the terms of this Amendment shall control. However, the Parties reaffirm their respective responsibilities pursuant to the Contract to the extent they are not modified by this Amendment. The Parties further agree that this Amendment may be executed in counterparts, effective immediately, upon both Parties signing. Undefined capitalized terms are as defined in this Amendment or the Contract.

1. Definitions

   a. "ADCRR" refers to the Arizona Department of Corrections Rehabilitation and Reentry, and includes, for purposes of this Amendment, any third party it appoints at its sole discretion to assist ADCRR with regard to this Amendment and the Contract. ADCRR acknowledges that the contractual relationship remains between ADCRR and B&D, notwithstanding the involvement of any third party so appointed by ADCRR.

   b. "Additional Remediation Hours" means a cap of 10,000 hours provided to ADCRR by B&D without charge for usage against any Parking Lot items, EUIL items, or changes requested by ADCRR.

   c. "Parking Lot" means the list of desired system functionality gathered by ADCRR throughout system development that B&D will exercise its best efforts to deliver. Parking Lot items that were defined in the implementation scope for the Go-Live solution are listed on Exhibit 2. All other Parking Lot items may be implemented as part of the End User Improvement List (EUIL).

   d. An End-User Improvement List ("EUIL") will be created by mutual agreement between ADCRR and B&D. The goal of the EUIL is to ensure a meaningful positive impact on the aggregate ADCRR end-user experience. At the outset, the Parking Lot items listed in Exhibit 2 will be delivered as part of the Additional Remediation Hours and will consume no more than 1000 hours of the Additional Remediation Hours, leaving a balance of 9,000 'Additional Remediation Hours' for the remaining Parking Lot and EUIL items

   e. "Effective Date" means the date of last signature of this Amendment

AMERICAN OVERSIGHT

2. Commencement of the M&O Phase

In accordance with Section III.D.10 of the RFP and Amendment No. 8, the Parties agree that the Maintenance and Operations Phase (the "M&O Phase") shall be deemed to have commenced on February 21, 2020. ADCRR agrees to wire to B&D the first M&O Phase monthly payment in the amount of $157,898.50 on or before three business days after the Effective Date and in the future pay the invoices for the M&O Phase according to the contractual terms.

3. Final Acceptance of the Solution

The Parties acknowledge and agree that ADCRR's final acceptance of the Solution shall be deemed to have been on January 15, 2020. The Parties agree to further memorialize the acceptance by signing the Certificate of Acceptance attached as **Exhibit 1**. ADCRR further agrees that it will pay to B&D the following amounts on or before three business days after the Effective Date (a) the remaining invoice for the Implementation Phase, which totals $318,081.40; and (b) $948,973.20, representing the ten percent (10%) retainers collected pursuant to Section VI.C.1 of the RFP. No late fees have been assessed, paid, or will be paid on these amounts. By paying the amounts specified in this paragraph, ADCRR has fulfilled its contractual payment responsibilities for the Implementation Phase as well as the release of retained amounts pursuant to VI.C.1. of the Contract.

4. Mutual Release

The Parties acknowledge that there have been certain disputes relating to testing, change requests, project delays, the conclusion of the Implementation Phase, the commencement of the M&O Phase, the "Parking Lot" issues, the claims raised in B&D's March 4, 2020 Notice of Claim, and any and all disputes or potential disputes related to the Solution through and including the Effective Date (the "Disputes").

The Parties agree that in consideration of the provisions of this Amendment and any compensation under this Amendment, each Party forever and unconditionally releases the other from any and all claims relating to the Disputes, known or unknown, from project inception (July 29, 2014) to the Effective Date. B&D agrees that with this Amendment, its March 4, 2020 Notice of Claim is moot and immediately withdrawn upon the Effective Date. The Parties further agree that, by entering into this Amendment, neither party is admitting fault or liability in any way relating to the Disputes.

The Parties further agree that EUIL, as defined in Section 6 below, is not part of the Implementation Phase, and any disputes related to the EUIL cannot therefore serve as predicates for claims, pursuant to V.M., against the Performance Bond pursuant to Section V.R. of the RFP. Subject to the clarifications in this Paragraph, the Parties confirm their commitment to the contractual obligations and rights related to the Performance Bond as specified in Section V.R.

AMERICAN OVERSIGHT
AZ-DOC-21-0315-A-002746

5. Dispute Resolution of Discrete Items

In the event that ADCRR leadership (Joe Profiri) and B&D leadership (Dean Allen) cannot resolve any dispute through a normal issue escalation process with respect to any disputes arising after the Effective Date arising out of the definition of System Defects (also known as Bugs) and System Changes (also known as Change Requests), ADCRR and B&D agree to resolve such disputes through an arbitration process. The Parties agree to mutually agree to an 'Independent Expert' to fully and finally resolve such disputes. The Independent Expert may be selected from either the existing ADCRR IV&V vendor or a mutually agreed upon professional industry expert organization that is different from the 'Third Party' identified in the Definitions section 1.a. of this amendment.

6. End-User Improvements & Remediation Hours

The Parties agree that B&D's delivery of items from Exhibit 2 and the EUIL will be free of charge, subject to a total cap of 10,000 "Additional Remediation Hours". Items may be added to the EUIL up to the last working day of the 12th month following the Effective Date ("12th Month") if ADCRR has sufficient "Additional Remediation Hours" available for use. Any items added to the EUIL during the 12th Month, may be delivered in subsequent months consistent with the effort estimated by B&D and to maximum balance of 4200 "Additional Remediation Hours" or the balance of the "Additional Remediation Hours" available for use. B&D agrees that it will provide these Additional Remediation Hours, separate from, and concurrently with, the 10,000 man-hours per year that B&D is required to provide as part of the M&O Hours.

In the event that ADCRR does not have sufficient "Additional Remediation Hours" available for use for any items added to the EUIL, ADCRR may supplement the effort for the aforementioned items by any means at its disposal, which may include using any available "M&O Hours" or a separate Purchase Order.

The Parties will iteratively develop the EUIL with monthly additions to the EUIL. The goal will be to identify and resolve ADCRR authorized items on the approved EUIL as quickly as reasonably possible (e.g., utilization of the full 10,000 Additional Remediation Hours as quickly as reasonably possible against the prioritized EUIL). The Parties agree that B&D will provide a target of the equivalent of 10 FTEs, or more, (in addition to the FTEs that B&D will utilize to satisfy its M&O Hours) to provide the Additional Remediation Hours and as may be needed to exhaust the remaining 10,000 M&O Hours.

In each of the 12 months following the Effective Date, ADCRR commits to authorizing B&D to perform at least 400 hours of work on EUIL items to count against the Additional Remediation Hours. Any Additional Remediation Hours not used in the 12 months following the Effective Date will roll over to the following year.

ADCRR and B&D have provided and will continue to provide Business Analysts to gather ADCRR user feedback and identify the primary issues that users are facing in utilization of the system. This information will be validated with ADCRR Business Owners.

AMERICAN OVERSIGHT

The following monthly procedure will be implemented (clock starting every 30 calendar days after signature of the contract amendment) to assure the right items are being prioritized and resolved to impact user satisfaction:

- By or before the 10th Business Day: ADCRR and B&D, will present a list of proposed items for the EUIL for estimation.
- By or before the 15th Business Day: B&D will define and provide to ADCRR the effort and man-hours associated with each proposed item for the EUIL. B&D will also provide a forecast of the available FTEs for the following month.
- By or before the 20th Business Day: ADCRR, with support from B&D, will choose from the proposed and estimated items, which items will be added to the EUIL (with the acceptance criteria for each item defined) and will exercise its best good faith effort to ensure that the number of selected items utilizes the B&D FTEs at full capacity.
- ADCRR shall submit an initial prioritized (Low Hanging Fruit") EUIL of items by no later than May 25, 2020.

This process will repeat monthly. During some months more items will be selected than other months. The Parties acknowledge that some of the items on the finalized EUIL will take more than one month to develop. The Parties agree that B&D shall deliver each item from the EUIL into User Acceptance Testing and notify ADCRR of each delivery. If ADCRR fails to accept, reject, note pending other bugs, or test an item within thirty (30) days of notification of delivery, then that item shall be deemed accepted.

It is the intent of the Parties that the development of and delivery of the EUIL will fully resolve ADCRR's concerns and disputes of the product's functionality. However, any items remaining on the EUIL, once the Additional Remediation Hours are exhausted, may or may not be prioritized by ADCRR and resolved utilizing available M&O hours at ADCRR's sole discretion.

In the first year commencing on the Effective date and following the initial EUIL agreed between the Parties, the Parties will simultaneously work on the following (with priorities determined by ADCRR): the CAP Plan, the EUIL and other system changes.

The Parties recommit to the bug/change qualification as detailed in Section 5 of this Amendment.

7. CAPs and SLAs

The Parties reaffirm that Corrective Action Plans ("CAPs") are a component of the M&O Phase requiring remediation at no additional charge to ADCRR. The Parties reaffirm that future software defects that require remediation will be repaired at no additional cost and separate from the M&O or Additional Remediation Hours. The Parties further agree to work collaboratively, to agree to a methodology for setting bug resolution priorities, including, but not limited to, considering the severity of a bug, With regards to any dispute the ADCRR appointed leadership (Joe Profiri) and the B&D appointed leadership (Dean Allen) shall agree to the resolution of any dispute. The Parties further agree to work collaboratively, to develop a set of achievable targets for the closure of items on the CAP lists as soon as practical within the first year of M&O.

AMERICAN OVERSIGHT
AZ-DOC-21-0315-A-002748

With respect to SLAs, the Parties agree that final acceptance of agreed SLAs will be achieved 30 days after the effective date of this Amendment.

8. Commercial Reference

ADCRR acknowledges that B&D has served as a vendor under the Contract and will confirm such in commercial references, orally and in writing, to B&D for upcoming Offender Management System opportunities on which B&D may bid. Offender Management System opportunities shall include any project or bid relating to any software system used in connection with the management of an inmate's incarceration, probation, or parole, or any component thereof, whether public, private, federal, state, local, or municipal, located within the United States of America. ADCRR's obligation set out in this clause will survive the termination of the Contract for any reason.

8. Point of Contact

B&D will make the Mi-Case President of B&D (Dean Allen) the main point of contact relating to this Contract, as amended, and any major escalations will be directed, but not limited to, to the chairman of B&D (Pierre Louis Biaggi) as next level decision-maker.

9. COVID-19

The Parties agree that disruptions caused by the COVID-19 virus and its associated events, including but not limited to business or government shut-downs, may constitute a force majeure event, governed by Section 6.4-6.4.4 of the Contract's Uniform Terms and Conditions.

AMENDMENT NO. 9 TO ADOC14-00003350/14-25-23

Pursuant to Section V.B of the September 25, 2013 Request for Proposal Number ADOC14-00003350/14-25-23 ("RFP"), the October 23, 2013 Proposal for Replacement of the Adult Inmate Management System, the May 13, 2014 Final Proposal Revision for Replacement of the Adult Inmate Management System, and the documents incorporated thereto (collectively, and with all other written amendments, the "Contract"), the Arizona Department of Corrections, Rehabilitation and Reentry ("ADCRR") and Business & Decision, North America PA, Inc. ("B&D") (together, the "Parties") hereby enter into this ninth official Contract amendment (the "Amendment"). This Amendment is intended to amend, supplement, and modify the Contract. To the extent any terms in this Amendment conflict with any term in the Contract as it previously existed, it is the intent of the Parties that the terms of this Amendment shall control. However, the Parties reaffirm their respective responsibilities pursuant to the Contract to the extent they are not modified by this Amendment. The Parties further agree that this Amendment may be executed in counterparts, effective immediately, upon both Parties signing. Undefined capitalized terms are as defined in this Amendment or the Contract.

1. Definitions

   a. "ADCRR" refers to the Arizona Department of Corrections Rehabilitation and Reentry, and includes, for purposes of this Amendment, any third party it appoints at its sole discretion to assist ADCRR with regard to this Amendment and the Contract. ADCRR acknowledges that the contractual relationship remains between ADCRR and B&D, notwithstanding the involvement of any third party so appointed by ADCRR.

   b. "Additional Remediation Hours" means a cap of 10,000 hours provided to ADCRR by B&D without charge for usage against any Parking Lot items, EUIL items, or changes requested by ADCRR.

   c. "Parking Lot" means the list of desired system functionality gathered by ADCRR throughout system development that B&D will exercise its best efforts to deliver. Parking Lot items that were defined in the implementation scope for the Go-Live solution are listed on Exhibit 2. All other Parking Lot items may be implemented as part of the End User Improvement List (EUIL).

   d. An End-User Improvement List ("EUIL") will be created by mutual agreement between ADCRR and B&D. The goal of the EUIL is to ensure a meaningful positive impact on the aggregate ADCRR end-user experience. At the outset, the Parking Lot items listed in Exhibit 2 will be delivered as part of the Additional Remediation Hours and will consume no more than 1000 hours of the Additional Remediation Hours, leaving a balance of 9,000 'Additional Remediation Hours' for the remaining Parking Lot and EUIL items

   e. "Effective Date" means the date of last signature of this Amendment

AMERICAN OVERSIGHT

2. Commencement of the M&O Phase

In accordance with Section III.D.10 of the RFP and Amendment No. 8, the Parties agree that the Maintenance and Operations Phase (the "M&O Phase") shall be deemed to have commenced on February 21, 2020. ADCRR agrees to wire to B&D the first M&O Phase monthly payment in the amount of $157,898.50 on or before three business days after the Effective Date and in the future pay the invoices for the M&O Phase according to the contractual terms.

3. Final Acceptance of the Solution

The Parties acknowledge and agree that ADCRR's final acceptance of the Solution shall be deemed to have been on January 15, 2020. The Parties agree to further memorialize the acceptance by signing the Certificate of Acceptance attached as **Exhibit 1**. ADCRR further agrees that it will pay to B&D the following amounts on or before three business days after the Effective Date (a) the remaining invoice for the Implementation Phase, which totals $318,081.40; and (b) $948,973.20, representing the ten percent (10%) retainers collected pursuant to Section VI.C.1 of the RFP. No late fees have been assessed, paid, or will be paid on these amounts. By paying the amounts specified in this paragraph, ADCRR has fulfilled its contractual payment responsibilities for the Implementation Phase as well as the release of retained amounts pursuant to VI.C.1. of the Contract.

4. Mutual Release

The Parties acknowledge that there have been certain disputes relating to testing, change requests, project delays, the conclusion of the Implementation Phase, the commencement of the M&O Phase, the "Parking Lot" issues, the claims raised in B&D's March 4, 2020 Notice of Claim, and any and all disputes or potential disputes related to the Solution through and including the Effective Date (the "Disputes").

The Parties agree that in consideration of the provisions of this Amendment and any compensation under this Amendment, each Party forever and unconditionally releases the other from any and all claims relating to the Disputes, known or unknown, from project inception (July 29, 2014) to the Effective Date. B&D agrees that with this Amendment, its March 4, 2020 Notice of Claim is moot and immediately withdrawn upon the Effective Date. The Parties further agree that, by entering into this Amendment, neither party is admitting fault or liability in any way relating to the Disputes.

The Parties further agree that EUIL, as defined in Section 6 below, is not part of the Implementation Phase, and any disputes related to the EUIL cannot therefore serve as predicates for claims, pursuant to V.M., against the Performance Bond pursuant to Section V.R. of the RFP. Subject to the clarifications in this Paragraph, the Parties confirm their commitment to the contractual obligations and rights related to the Performance Bond as specified in Section V.R.

AMERICAN OVERSIGHT
AZ-DOC-21-0315-A-002756

5. Dispute Resolution of Discrete Items

In the event that ADCRR leadership (Joe Profiri) and B&D leadership (Dean Allen) cannot resolve any dispute through a normal issue escalation process with respect to any disputes arising after the Effective Date arising out of the definition of System Defects (also known as Bugs) and System Changes (also known as Change Requests), ADCRR and B&D agree to resolve such disputes through an arbitration process. The Parties agree to mutually agree to an 'Independent Expert' to fully and finally resolve such disputes. The Independent Expert may be selected from either the existing ADCRR IV&V vendor or a mutually agreed upon professional industry expert organization that is different from the 'Third Party' identified in the Definitions section 1.a. of this amendment.

6. End-User Improvements & Remediation Hours

The Parties agree that B&D's delivery of items from Exhibit 2 and the EUIL will be free of charge, subject to a total cap of 10,000 "Additional Remediation Hours". Items may be added to the EUIL up to the last working day of the 12th month following the Effective Date ("12th Month") if ADCRR has sufficient "Additional Remediation Hours" available for use. Any items added to the EUIL during the 12th Month, may be delivered in subsequent months consistent with the effort estimated by B&D and to maximum balance of 4200 "Additional Remediation Hours" or the balance of the "Additional Remediation Hours" available for use. B&D agrees that it will provide these Additional Remediation Hours, separate from, and concurrently with, the 10,000 man-hours per year that B&D is required to provide as part of the M&O Hours.

In the event that ADCRR does not have sufficient "Additional Remediation Hours" available for use for any items added to the EUIL, ADCRR may supplement the effort for the aforementioned items by any means at its disposal, which may include using any available "M&O Hours" or a separate Purchase Order.

The Parties will iteratively develop the EUIL with monthly additions to the EUIL. The goal will be to identify and resolve ADCRR authorized items on the approved EUIL as quickly as reasonably possible (e.g., utilization of the full 10,000 Additional Remediation Hours as quickly as reasonably possible against the prioritized EUIL). The Parties agree that B&D will provide a target of the equivalent of 10 FTEs, or more, (in addition to the FTEs that B&D will utilize to satisfy its M&O Hours) to provide the Additional Remediation Hours and as may be needed to exhaust the remaining 10,000 M&O Hours.

In each of the 12 months following the Effective Date, ADCRR commits to authorizing B&D to perform at least 400 hours of work on EUIL items to count against the Additional Remediation Hours. Any Additional Remediation Hours not used in the 12 months following the Effective Date will roll over to the following year.

ADCRR and B&D have provided and will continue to provide Business Analysts to gather ADCRR user feedback and identify the primary issues that users are facing in utilization of the system. This information will be validated with ADCRR Business Owners.

AMERICAN OVERSIGHT

The following monthly procedure will be implemented (clock starting every 30 calendar days after signature of the contract amendment) to assure the right items are being prioritized and resolved to impact user satisfaction:

- By or before the 10th Business Day: ADCRR and B&D, will present a list of proposed items for the EUIL for estimation.
- By or before the 15th Business Day: B&D will define and provide to ADCRR the effort and man-hours associated with each proposed item for the EUIL. B&D will also provide a forecast of the available FTEs for the following month.
- By or before the 20th Business Day: ADCRR, with support from B&D, will choose from the proposed and estimated items, which items will be added to the EUIL (with the acceptance criteria for each item defined) and will exercise its best good faith effort to ensure that the number of selected items utilizes the B&D FTEs at full capacity.
- ADCRR shall submit an initial prioritized (Low Hanging Fruit") EUIL of items by no later than May 25, 2020.

This process will repeat monthly. During some months more items will be selected than other months. The Parties acknowledge that some of the items on the finalized EUIL will take more than one month to develop. The Parties agree that B&D shall deliver each item from the EUIL into User Acceptance Testing and notify ADCRR of each delivery. If ADCRR fails to accept, reject, note pending other bugs, or test an item within thirty (30) days of notification of delivery, then that item shall be deemed accepted.

It is the intent of the Parties that the development of and delivery of the EUIL will fully resolve ADCRR's concerns and disputes of the product's functionality. However, any items remaining on the EUIL, once the Additional Remediation Hours are exhausted, may or may not be prioritized by ADCRR and resolved utilizing available M&O hours at ADCRR's sole discretion.

In the first year commencing on the Effective date and following the initial EUIL agreed between the Parties, the Parties will simultaneously work on the following (with priorities determined by ADCRR): the CAP Plan, the EUIL and other system changes.

The Parties recommit to the bug/change qualification as detailed in Section 5 of this Amendment.

7. CAPs and SLAs

The Parties reaffirm that Corrective Action Plans ("CAPs") are a component of the M&O Phase requiring remediation at no additional charge to ADCRR. The Parties reaffirm that future software defects that require remediation will be repaired at no additional cost and separate from the M&O or Additional Remediation Hours. The Parties further agree to work collaboratively, to agree to a methodology for setting bug resolution priorities, including, but not limited to, considering the severity of a bug, With regards to any dispute the ADCRR appointed leadership (Joe Profiri) and the B&D appointed leadership (Dean Allen) shall agree to the resolution of any dispute. The Parties further agree to work collaboratively, to develop a set of achievable targets for the closure of items on the CAP lists as soon as practical within the first year of M&O.

AMERICAN OVERSIGHT

With respect to SLAs, the Parties agree that final acceptance of agreed SLAs will be achieved 30 days after the effective date of this Amendment.

8. Commercial Reference

ADCRR acknowledges that B&D has served as a vendor under the Contract and will confirm such in commercial references, orally and in writing, to B&D for upcoming Offender Management System opportunities on which B&D may bid. Offender Management System opportunities shall include any project or bid relating to any software system used in connection with the management of an inmate's incarceration, probation, or parole, or any component thereof, whether public, private, federal, state, local, or municipal, located within the United States of America. ADCRR's obligation set out in this clause will survive the termination of the Contract for any reason.

8. Point of Contact

B&D will make the Mi-Case President of B&D (Dean Allen) the main point of contact relating to this Contract, as amended, and any major escalations will be directed, but not limited to, to the chairman of B&D (Pierre Louis Biaggi) as next level decision-maker.

9. COVID-19

The Parties agree that disruptions caused by the COVID-19 virus and its associated events, including but not limited to business or government shut-downs, may constitute a force majeure event, governed by Section 6.4-6.4.4 of the Contract's Uniform Terms and Conditions.

AMERICAN OVERSIGHT

AMENDMENT NO. 9 TO ADOC14-00003350/14-25-23

Pursuant to Section V.B of the September 25, 2013 Request for Proposal Number ADOC14-00003350/14-25-23 ("RFP"), the October 23, 2013 Proposal for Replacement of the Adult Inmate Management System, the May 13, 2014 Final Proposal Revision for Replacement of the Adult Inmate Management System, and the documents incorporated thereto (collectively, and with all other written amendments, the "Contract"), the Arizona Department of Corrections, Rehabilitation and Reentry ("ADCRR") and Business & Decision, North America PA, Inc. ("B&D") (together, the "Parties") hereby enter into this ninth official Contract amendment (the "Amendment"). This Amendment is intended to amend, supplement, and modify the Contract. To the extent any terms in this Amendment conflict with any term in the Contract as it previously existed, it is the intent of the Parties that the terms of this Amendment shall control. However, the Parties reaffirm their respective responsibilities pursuant to the Contract to the extent they are not modified by this Amendment. The Parties further agree that this Amendment may be executed in counterparts, effective immediately, upon both Parties signing. Undefined capitalized terms are as defined in this Amendment or the Contract.

1. Definitions

a. "ADCRR" refers to the Arizona Department of Corrections Rehabilitation and Reentry, and includes, for purposes of this Amendment, any third party it appoints at its sole discretion to assist ADCRR with regard to this Amendment and the Contract. ADCRR acknowledges that the contractual relationship remains between ADCRR and B&D, notwithstanding the involvement of any third party so appointed by ADCRR.

b. "Additional Remediation Hours" means a cap of 10,000 hours provided to ADCRR by B&D without charge for usage against any Parking Lot items, EUIL items, or changes requested by ADCRR.

c. "Parking Lot" means the list of desired system functionality gathered by ADCRR throughout system development that B&D agrees to deliver. Parking Lot items that were defined in the implementation scope for the Go-Live solution are listed on Exhibit 2. All other Parking Lot items may be implemented as part of the End User Improvement List (EUIL).

d. An End-User Improvement List ("EUIL") will be created by mutual agreement between ADCRR and B&D. The goal of the EUIL is to ensure a meaningful positive impact on the aggregate ADCRR end-user experience. At the outset, the Parking Lot items listed in Exhibit 2 will be delivered as part of the Additional Remediation Hours and will consume no more than 1000 hours of the Additional Remediation Hours, leaving a balance of 9,000 'Additional Remediation Hours' for the remaining Parking Lot and EUIL items"Effective Date" means the date of last signature of this Amendment

2. Commencement of the M&O Phase

In accordance with Section III.D.10 of the RFP and Amendment No. 8, the Parties agree that the Maintenance and Operations Phase (the "M&O Phase") shall be deemed to have

AMERICAN OVERSIGHT

commenced on February 21, 2020. ADCRR agrees to wire to B&D the first M&O Phase monthly payment in the amount of $157,898.50 on or before three business days after the Effective Date and in the future pay the invoices for the M&O Phase according to the contractual terms.

3. Final Acceptance of the Solution

The Parties acknowledge and agree that ADCRR's final acceptance of the Solution shall be deemed to have been on January 15, 2020. The Parties agree to further memorialize the acceptance by signing the Certificate of Acceptance attached as **Exhibit 1**. ADCRR further agrees that it will pay to B&D the following amounts on or before three business days after the Effective Date (a) the remaining invoice for the Implementation Phase, which totals $318,081.40; and (b) $948,973.20, representing the ten percent (10%) retainers collected pursuant to Section VI.C.1 of the RFP. No late fees have been assessed, paid, or will be paid on these amounts. By paying the amounts specified in this paragraph, ADCRR has fulfilled its contractual payment responsibilities for the Implementation Phase as well as the release of retained amounts pursuant to VI.C.1. of the Contract.

4. Mutual Release

The Parties acknowledge that there have been certain disputes relating to testing, change requests, project delays, the conclusion of the Implementation Phase, the commencement of the M&O Phase, the "Parking Lot" issues, the claims raised in B&D's March 4, 2020 Notice of Claim, and any and all disputes or potential disputes related to the Solution through and including the Effective Date (the "Disputes").

The Parties agree that in consideration of the provisions of this Amendment and any compensation under this Amendment, each Party forever and unconditionally releases the other from any and all claims relating to the Disputes, known or unknown, from project inception (July 29, 2014) to the Effective Date. B&D agrees that with this Amendment, its March 4, 2020 Notice of Claim is moot and immediately withdrawn upon the Effective Date. The Parties further agree that, by entering into this Amendment, neither party is admitting fault or liability in any way relating to the Disputes.

The Parties further agree that except for B&D's completion of the Parking Lot items identified on Exhibit 2, EUIL, as defined in Section 6 below, is not part of the Implementation Phase, and any disputes related to the EUIL cannot therefore serve as predicates for claims, pursuant to V.M., against the Performance Bond pursuant to Section V.R. of the RFP. Subject to the clarifications in this Paragraph, the Parties confirm their commitment to the contractual obligations and rights related to the Performance Bond as specified in Section V.R..

5. Dispute Resolution of Discrete Items

In the event that ADCRR leadership (Joe Profiri) and B&D leadership (Dean Allen) cannot resolve any dispute through a normal issue escalation process with respect to any disputes arising after the Effective Date arising out of the definition of System Defects (also known as Bugs) and System Changes (also known as Change Requests), ADCRR and B&D agree to resolve such disputes through an arbitration process. The Parties agree to mutually agree to an

AMERICAN OVERSIGHT

'Independent Expert' to fully and finally resolve such disputes. The Independent Expert may be selected from either the existing ADCRR IV&V vendor or a mutually agreed upon professional industry expert organization that is different from the 'Third Party' identified in the Definitions section 1.a. of this amendment.

AMERICAN OVERSIGHT

6. End-User Improvements & Remediation Hours

The Parties agree that B&D's delivery of items from Exhibit 2 and the EUIL will be free of charge, subject to a total cap of 10,000 "Additional Remediation Hours". Items may be added to the EUIL up to the last working day of the 12th month following the Effective Date ("12th Month") if ADCRR has sufficient "Additional Remediation Hours" available for use. Any items added to the EUIL during the 12th Month, may be delivered in subsequent months consistent with the effort estimated by B&D and to maximum balance of 4200"Additional Remediation Hours" or the balance of the "Additional Remediation Hours" available for use. B&D agrees that it will provide these Additional Remediation Hours, separate from, and concurrently with, the 10,000 man-hours per year that B&D is required to provide as part of the M&O Hours.

In the event that ADCRR does not have sufficient "Additional Remediation Hours" available for use for any items added to the EUIL, ADCRR may supplement the effort for the aforementioned items by any means at it's disposal, which may include using any available "M&O Hours" or a separate Purchase Order.

The Parties will iteratively develop the EUIL with monthly additions to the EUIL. The goal will be to identify and resolve ADCRR authorized items on the approved EUIL as quickly as reasonably possible (e.g., utilization of the full 10,000 Additional Remediation Hours as quickly as reasonably possible against the prioritized EUIL). The Parties agree that B&D will provide a target of the equivalent of 10 FTEs, or more, (in addition to the FTEs that B&D will utilize to satisfy its M&O Hours) to provide the Additional Remediation Hours and as may be needed to exhaust the remaining 10,000 M&O Hours.

In each of the 12 months following the Effective Date, ADCRR commits to authorizing B&D to perform at least 400 hours of work on EUIL items to count against the Additional Remediation Hours. Any Additional Remediation Hours not used in the 12 months following the Effective Date will roll over to the following year.

ADCRR and B&D have provided and will continue to provide Business Analysts to gather ADCRR user feedback and identify the primary issues that users are facing in utilization of the system. This information will be validated with ADCRR Business Owners.

The following monthly procedure will be implemented (clock starting every 30 calendar days after signature of the contract amendment) to assure the right items are being prioritized and resolved to impact user satisfaction:

- By or before the 10th Business Day: ADCRR and B&D, will present a list of proposed items for the EUIL for estimation.
- By or before the 15th Business Day: B&D will define and provide to ADCRR the effort and man-hours associated with each proposed item for the EUIL. B&D will also provide a forecast of the available FTEs for the following month.

AMERICAN OVERSIGHT

- By or before the 20th Business Day: ADCRR, with support from B&D, will choose from the proposed and estimated items, which items will be added to the EUIL (with the acceptance criteria for each item defined) and will exercise its best good faith effort to ensure that the number of selected items utilizes the B&D FTEs at full capacity.
- ADCRR shall submit an initial prioritized (Low Hanging Fruit") EUIL of items by no later than May 25, 2020.

This process will repeat monthly. During some months more items will be selected than other months. The Parties acknowledge that some of the items on the finalized EUIL will take more than one month to develop. The Parties agree that B&D shall deliver each item from the EUIL into User Acceptance Testing and notify ADCRR of each delivery. If ADCRR fails to accept, reject, note pending other bugs, or test an item within thirty (30) days of notification of delivery, then that item shall be deemed accepted.

It is the intent of the Parties that the development of and delivery of the EUIL will fully resolve ADCRR's concerns and disputes of the product's functionality. However, any items remaining on the EUIL, once the Additional Remediation Hours are exhausted, may or may not be prioritized by ADCRR and resolved utilizing available M&O hours at ADCRR's sole discretion.

In the first year commencing on the Effective date and following the initial EUIL agreed between the Parties, the Parties will simultaneously work on the following (with priorities determined by ADCRR): the CAP Plan, the EUIL and other system changes.

The Parties recommit to the bug/change qualification as detailed in Section 5 of this Amendment.

7. CAPs and SLAs

The Parties reaffirm that Corrective Action Plans ("CAPs") are a component of the M&O Phase requiring remediation at no additional charge to ADCRR. The Parties reaffirm that future software defects that require remediation will be repaired at no additional cost and separate from the M&O or Additional Remediation Hours. The Parties further agree to work collaboratively, to agree to a methodology for setting bug resolution priorities, including, but not limited to, considering the severity of a bug, With regards to any dispute the ADCRR appointed leadership (Joe Profiri) and the B&D appointed leadership (Dean Allen) shall agree to the resolution of any dispute. The Parties further agree to work collaboratively, to develop a set of achievable targets for the closure of items on the CAP lists as soon as practical within the first year of M&O.

With respect to SLAs, the Parties agree that final acceptance of agreed SLAs will be achieved 30 days after the effective date of this Amendment.

8. Commercial Reference

ADCRR acknowledges that B&D has served as a vendor under the Contract and will confirm such in commercial references, orally and in writing, to B&D for upcoming Offender Management System opportunities on which B&D may bid. Offender Management System

AMERICAN OVERSIGHT

opportunities shall include any project or bid relating to any software system used in connection with the management of an inmate's incarceration, probation, or parole, or any component thereof, whether public, private, federal, state, local, or municipal, located within the United States of America. ADCRR's obligation set out in this clause will survive the termination of the Contract for any reason.

8. Point of Contact

B&D will make the Mi-Case President of B&D (Dean Allen) the main point of contact relating to this Contract, as amended, and any major escalations will be directed, but not limited to, to the chairman of B&D (Pierre Louis Biaggi) as next level decision-maker.

9. COVID-19

The Parties agree that disruptions caused by the COVID-19 virus and its associated events, including but not limited to business or government shut-downs, may constitute a force majeure event, governed by Section 6.4-6.4.4 of the Contract's Uniform Terms and Conditions.

CERTIFICATE OF FINAL ACCEPTANCE

The Arizona Department of Corrections ("ADCRR") and Business & Decision, North America PA, Inc. ("B&D") hereby agree, certify, and acknowledge that ADCRR formally accepted from B&D the "Solution" required by Contract No. ADOC14-00003350/14-25-23 on January 15, 2020.

The Parties further agree that, pursuant to Section V.R of the September 25, 2013 Request for Proposal Number ADOC14-00003350/14-25-23, the Performance Bonds submitted by B&D shall not remain in effect later than January 14, 2021.

AMERICAN OVERSIGHT

AMENDMENT NO. 9 TO ADOC14-00003350/14-25-23

Pursuant to Section V.B of the September 25, 2013 Request for Proposal Number ADOC14-00003350/14-25-23 ("RFP"), the October 23, 2013 Proposal for Replacement of the Adult Inmate Management System, the May 13, 2014 Final Proposal Revision for Replacement of the Adult Inmate Management System, and the documents incorporated thereto (collectively, and with all other written amendments, the "Contract"), the Arizona Department of Corrections, Rehabilitation and Reentry ("ADCRR") and Business & Decision, North America PA, Inc. ("B&D") (together, the "Parties") hereby enter into this ninth official Contract amendment (the "Amendment"). This Amendment is intended to amend, supplement, and modify the Contract. To the extent any terms in this Amendment conflict with any term in the Contract as it previously existed, it is the intent of the Parties that the terms of this Amendment shall control. However, the Parties reaffirm their respective responsibilities pursuant to the Contract to the extent they are not modified by this Amendment. The Parties further agree that this Amendment may be executed in counterparts, effective immediately, upon both Parties signing. Undefined capitalized terms are as defined in this Amendment or the Contract.

1. Definitions

   a. "ADCRR" refers to the Arizona Department of Corrections Rehabilitation and Reentry, and includes, for purposes of this Amendment, any third party it appoints at its sole discretion to assist ADCRR with regard to this Amendment and the Contract. ADCRR acknowledges that the contractual relationship remains between ADCRR and B&D, notwithstanding the involvement of any third party so appointed by ADCRR.

   b. "Additional Remediation Hours" means a cap of 10,000 hours provided to ADCRR by B&D without charge for usage against any Parking Lot items, EUIL items, or changes requested by ADCRR.

   c. "Parking Lot" means the list of desired system functionality gathered by ADCRR throughout system development that B&D agrees to deliver. Parking Lot items that were defined in the implementation scope for the Go-Live solution are listed on Exhibit 2. All other Parking Lot items may be implemented as part of the End User Improvement List (EUIL).

   d. An End-User Improvement List ("EUIL") will be created by mutual agreement between ADCRR and B&D. The goal of the EUIL is to ensure a meaningful positive impact on the aggregate ADCRR end-user experience. At the outset, the Parking Lot items listed in Exhibit 2 will be delivered as part of the Additional Remediation Hours and will consume no more than 1000 hours of the Additional Remediation Hours, leaving a balance of 9,000 'Additional Remediation Hours' for the remaining Parking Lot and EUIL items"Effective Date" means the date of last signature of this Amendment

2. Commencement of the M&O Phase

In accordance with Section III.D.10 of the RFP and Amendment No. 8, the Parties agree that the Maintenance and Operations Phase (the "M&O Phase") shall be deemed to have

AMERICAN OVERSIGHT

commenced on February 21, 2020. ADCRR agrees to wire to B&D the first M&O Phase monthly payment in the amount of $157,898.50 on or before three business days after the Effective Date and in the future pay the invoices for the M&O Phase according to the contractual terms.

3. Final Acceptance of the Solution

The Parties acknowledge and agree that ADCRR's final acceptance of the Solution shall be deemed to have been on January 15, 2020. The Parties agree to further memorialize the acceptance by signing the Certificate of Acceptance attached as **Exhibit 1**. ADCRR further agrees that it will pay to B&D the following amounts on or before three business days after the Effective Date (a) the remaining invoice for the Implementation Phase, which totals $318,081.40; and (b) $948,973.20, representing the ten percent (10%) retainers collected pursuant to Section VI.C.1 of the RFP. No late fees have been assessed, paid, or will be paid on these amounts. By paying the amounts specified in this paragraph, ADCRR has fulfilled its contractual payment responsibilities for the Implementation Phase as well as the release of retained amounts pursuant to VI.C.1. of the Contract.

4. Mutual Release

The Parties acknowledge that there have been certain disputes relating to testing, change requests, project delays, the conclusion of the Implementation Phase, the commencement of the M&O Phase, the "Parking Lot" issues, the claims raised in B&D's March 4, 2020 Notice of Claim, and any and all disputes or potential disputes related to the Solution through and including the Effective Date (the "Disputes").

The Parties agree that in consideration of the provisions of this Amendment and any compensation under this Amendment, each Party forever and unconditionally releases the other from any and all claims relating to the Disputes, known or unknown, from project inception (July 29, 2014) to the Effective Date. B&D agrees that with this Amendment, its March 4, 2020 Notice of Claim is moot and immediately withdrawn upon the Effective Date. The Parties further agree that, by entering into this Amendment, neither party is admitting fault or liability in any way relating to the Disputes.

The Parties further agree that except for B&D's completion of the Parking Lot items identified on Exhibit 2, EUIL, as defined in Section 6 below, is not part of the Implementation Phase, and any disputes related to the EUIL cannot therefore serve as predicates for claims, pursuant to V.M., against the Performance Bond pursuant to Section V.R. of the RFP. Subject to the clarifications in this Paragraph, the Parties confirm their commitment to the contractual obligations and rights related to the Performance Bond as specified in Section V.R..

5. Dispute Resolution of Discrete Items

In the event that ADCRR leadership (Joe Profiri) and B&D leadership (Dean Allen) cannot resolve any dispute through a normal issue escalation process with respect to any disputes arising after the Effective Date arising out of the definition of System Defects (also known as Bugs) and System Changes (also known as Change Requests), ADCRR and B&D agree to resolve such disputes through an arbitration process. The Parties agree to mutually agree to an

AMERICAN OVERSIGHT
AZ-DOC-21-0315-A-002784

'Independent Expert' to fully and finally resolve such disputes. The Independent Expert may be selected from either the existing ADCRR IV&V vendor or a mutually agreed upon professional industry expert organization that is different from the 'Third Party' identified in the Definitions section 1.a. of this amendment.

AMERICAN OVERSIGHT
AZ-DOC-21-0315-A-002785

6. End-User Improvements & Remediation Hours

The Parties agree that B&D's delivery of items from Exhibit 2 and the EUIL will be free of charge, subject to a total cap of 10,000 "Additional Remediation Hours". Items may be added to the EUIL up to the last working day of the 12th month following the Effective Date ("12th Month") if ADCRR has sufficient "Additional Remediation Hours" available for use. Any items added to the EUIL during the 12th Month, may be delivered in subsequent months consistent with the effort estimated by B&D and to maximum balance of 4200"Additional Remediation Hours" or the balance of the "Additional Remediation Hours" available for use. B&D agrees that it will provide these Additional Remediation Hours, separate from, and concurrently with, the 10,000 man-hours per year that B&D is required to provide as part of the M&O Hours.

In the event that ADCRR does not have sufficient "Additional Remediation Hours" available for use for any items added to the EUIL, ADCRR may supplement the effort for the aforementioned items by any means at it's disposal, which may include using any available "M&O Hours" or a separate Purchase Order.

The Parties will iteratively develop the EUIL with monthly additions to the EUIL. The goal will be to identify and resolve ADCRR authorized items on the approved EUIL as quickly as reasonably possible (e.g., utilization of the full 10,000 Additional Remediation Hours as quickly as reasonably possible against the prioritized EUIL). The Parties agree that B&D will provide a target of the equivalent of 10 FTEs, or more, (in addition to the FTEs that B&D will utilize to satisfy its M&O Hours) to provide the Additional Remediation Hours and as may be needed to exhaust the remaining 10,000 M&O Hours.

In each of the 12 months following the Effective Date, ADCRR commits to authorizing B&D to perform at least 400 hours of work on EUIL items to count against the Additional Remediation Hours. Any Additional Remediation Hours not used in the 12 months following the Effective Date will roll over to the following year.

ADCRR and B&D have provided and will continue to provide Business Analysts to gather ADCRR user feedback and identify the primary issues that users are facing in utilization of the system. This information will be validated with ADCRR Business Owners.

The following monthly procedure will be implemented (clock starting every 30 calendar days after signature of the contract amendment) to assure the right items are being prioritized and resolved to impact user satisfaction:

- By or before the 10th Business Day: ADCRR and B&D, will present a list of proposed items for the EUIL for estimation.
- By or before the 15th Business Day: B&D will define and provide to ADCRR the effort and man-hours associated with each proposed item for the EUIL. B&D will also provide a forecast of the available FTEs for the following month.

AMERICAN OVERSIGHT

- By or before the 20th Business Day: ADCRR, with support from B&D, will choose from the proposed and estimated items, which items will be added to the EUIL (with the acceptance criteria for each item defined) and will exercise its best good faith effort to ensure that the number of selected items utilizes the B&D FTEs at full capacity.
- ADCRR shall submit an initial prioritized (Low Hanging Fruit") EUIL of items by no later than May 25, 2020.

This process will repeat monthly. During some months more items will be selected than other months. The Parties acknowledge that some of the items on the finalized EUIL will take more than one month to develop. The Parties agree that B&D shall deliver each item from the EUIL into User Acceptance Testing and notify ADCRR of each delivery. If ADCRR fails to accept, reject, note pending other bugs, or test an item within thirty (30) days of notification of delivery, then that item shall be deemed accepted.

It is the intent of the Parties that the development of and delivery of the EUIL will fully resolve ADCRR's concerns and disputes of the product's functionality. However, any items remaining on the EUIL, once the Additional Remediation Hours are exhausted, may or may not be prioritized by ADCRR and resolved utilizing available M&O hours at ADCRR's sole discretion.

In the first year commencing on the Effective date and following the initial EUIL agreed between the Parties, the Parties will simultaneously work on the following (with priorities determined by ADCRR): the CAP Plan, the EUIL and other system changes.

The Parties recommit to the bug/change qualification as detailed in Section 5 of this Amendment.

7. CAPs and SLAs

The Parties reaffirm that Corrective Action Plans ("CAPs") are a component of the M&O Phase requiring remediation at no additional charge to ADCRR. The Parties reaffirm that future software defects that require remediation will be repaired at no additional cost and separate from the M&O or Additional Remediation Hours. The Parties further agree to work collaboratively, to agree to a methodology for setting bug resolution priorities, including, but not limited to, considering the severity of a bug, With regards to any dispute the ADCRR appointed leadership (Joe Profiri) and the B&D appointed leadership (Dean Allen) shall agree to the resolution of any dispute. The Parties further agree to work collaboratively, to develop a set of achievable targets for the closure of items on the CAP lists as soon as practical within the first year of M&O.

With respect to SLAs, the Parties agree that final acceptance of agreed SLAs will be achieved 30 days after the effective date of this Amendment.

8. Commercial Reference

ADCRR acknowledges that B&D has served as a vendor under the Contract and will confirm such in commercial references, orally and in writing, to B&D for upcoming Offender Management System opportunities on which B&D may bid. Offender Management System

AMERICAN OVERSIGHT

opportunities shall include any project or bid relating to any software system used in connection with the management of an inmate's incarceration, probation, or parole, or any component thereof, whether public, private, federal, state, local, or municipal, located within the United States of America. ADCRR's obligation set out in this clause will survive the termination of the Contract for any reason.

8. Point of Contact

B&D will make the Mi-Case President of B&D (Dean Allen) the main point of contact relating to this Contract, as amended, and any major escalations will be directed, but not limited to, to the chairman of B&D (Pierre Louis Biaggi) as next level decision-maker.

9. COVID-19

The Parties agree that disruptions caused by the COVID-19 virus and its associated events, including but not limited to business or government shut-downs, may constitute a force majeure event, governed by Section 6.4-6.4.4 of the Contract's Uniform Terms and Conditions.

AMERICAN OVERSIGHT

AMENDMENT NO. 9 TO ADOC14-00003350/14-25-23

Pursuant to Section V.B of the September 25, 2013 Request for Proposal Number ADOC14-00003350/14-25-23 ("RFP"), the October 23, 2013 Proposal for Replacement of the Adult Inmate Management System, the May 13, 2014 Final Proposal Revision for Replacement of the Adult Inmate Management System, and the documents incorporated thereto (collectively, and with all other written amendments, the "Contract"), the Arizona Department of Corrections, Rehabilitation and Reentry ("ADCRR") and Business & Decision, North America PA, Inc. ("B&D") (together, the "Parties") hereby enter into this ninth official Contract amendment (the "Amendment"). This Amendment is intended to amend, supplement, and modify the Contract. To the extent any terms in this Amendment conflict with any term in the Contract as it previously existed, it is the intent of the Parties that the terms of this Amendment shall control. However, the Parties reaffirm their respective responsibilities pursuant to the Contract to the extent they are not modified by this Amendment. The Parties further agree that this Amendment may be executed in counterparts, effective immediately, upon both Parties signing. Undefined capitalized terms are as defined in this Amendment or the Contract.

1. Definitions

   a. "ADCRR" refers to the Arizona Department of Corrections Rehabilitation and Reentry, and includes, for purposes of this Amendment, any third party it appoints at its sole discretion to assist ADCRR with regard to this Amendment and the Contract. ADCRR acknowledges that the contractual relationship remains between ADCRR and B&D, notwithstanding the involvement of any third party so appointed by ADCRR.

   b. "Additional Remediation Hours" means a cap of 10,000 hours provided to ADCRR by B&D for usage against any change requested by ADCRR without charge.

   c. "M&O Hours" means a cap of 10,000 hours per year provided to ADCRR by B&D for usage against any change requested by ADCRR during the M&O Phase of the contract.
   d. "Parking Lot" means the list of desired system functionality gathered by ADCRR throughout system development that was not defined in the implementation scope for Go-Live solution and which may still be implemented as part of the End User Improvement List (EUIL).
   e. An End-User Improvement List ("EUIL") will be created by mutual agreement between ADCRR and B&D. The goal of the EUIL is to ensure a meaningful positive impact on the aggregate ADCRR end-user experience. At the outset the EUIL will include the items listed in Exhibit 2 that were placed in the Parking Lot prior to Go-Live. These items will be delivered as part of the Additional Remediation Hours and will consume no more than 1000 hours of the Additional Remediation Hours, leaving a balance of 9,000 'Additional Remediation Hours'.
   f. "Effective Date" means the date of last signature of this Amendment

2. Commencement of the M&O Phase

AMERICAN OVERSIGHT

In accordance with Section III.D.10 of the RFP and Amendment No. 8, the Parties agree that the Maintenance and Operations Phase (the "M&O Phase") shall be deemed to have commenced on February 21, 2020. ADCRR agrees to wire to B&D the first M&O Phase monthly payment in the amount of $157,898.50 on or before three business days after the Effective Date and in the future pay the invoices for the M&O Phase according to the contractual terms.

3. Final Acceptance of the Solution

The Parties acknowledge and agree that ADCRR's final acceptance of the Solution shall be deemed to have been on January 15, 2020. The Parties agree to further memorialize the acceptance by signing the Certificate of Acceptance attached as **Exhibit 1**. ADCRR further agrees that it will pay to B&D the following amounts on or before three business days after the Effective Date (a) the remaining invoice for the Implementation Phase, which totals $318,081.40; and (b) $948,973.20, representing the ten percent (10%) retainers collected pursuant to Section VI.C.1 of the RFP. No late fees have been assessed, paid, or will be paid on these amounts. By paying the amounts specified in this paragraph, ADCRR has fulfilled its contractual payment responsibilities for the Implementation Phase as well as the release of retained amounts pursuant to VI.C.1. of the Contract.

4. Mutual Release

The Parties acknowledge that there have been certain disputes relating to testing, change requests, project delays, the conclusion of the Implementation Phase, the commencement of the M&O Phase, the "Parking Lot" issues, the claims raised in B&D's March 4, 2020 Notice of Claim, and any and all disputes or potential disputes related to the Solution through and including the Effective Date (the "Disputes").

The Parties agree that in consideration of the provisions of this Amendment and any compensation under this Amendment, each Party forever and unconditionally releases the other from any and all claims relating to the Disputes, known or unknown, from project inception (July 29, 2014) to the Effective Date. B&D agrees that with this Amendment, its March 4, 2020 Notice of Claim is moot and immediately withdrawn upon the Effective Date. The Parties further agree that, by entering into this Amendment, neither party is admitting fault or liability in any way relating to the Disputes.

The Parties agree that any claims or Disputes released as part of this Mutual Release, or previously released, shall not serve as predicates for claims, if any, against the Performance Bond pursuant to Section V.R.17 of the RFP. The Parties further agree that the End-User Improvement List ("EUIL"), as defined in Section 7 below, is not part of the Implementation Phase, and any disputes related to the EUIL cannot therefore serve as predicates for claims against the Performance Bond pursuant to Section V.R.17 of the RFP. Subject to the clarifications in this Paragraph, the Parties confirm their commitment to the contractual obligations and rights related to the Performance Bond as specified in Section V.R.17.

In the event that ADCRR leadership (Joe Profiri) and B&D leadership (Dean Allen) cannot resolve any dispute through a normal issue escalation process with respect to any disputes arising after the Effective Date arising out of the definition of System Defects (also

AMERICAN OVERSIGHT
AZ-DOC-21-0315-A-002816

known as Bugs) and System Changes (also known as Change Requests), ADCRR and B&D agree to resolve such disputes through an arbitration process. The Parties agree to mutually agree to an 'Independent Expert' to fully and finally resolve such disputes. The Independent Expert may be selected from either the existing ADCRR IV&V vendor or a mutually agreed upon professional industry expert organization that is different from the 'Third Party' identified in the Definitions section 1.a. of this amendment.

AMERICAN OVERSIGHT

5. End-User Improvements & Remediation Hours

The Parties agree that B&D will deliver items from the EUIL free of charge, subject to a total cap of 10,000 "Additional Remediation Hours". Items may be added to the EUIL up to the last working day of the 12th month following the signature of this Amendment, if ADCRR has sufficient "Additional Remediation Hours" available for use. Any items added to the EUIL during the 12th month, may be delivered in subsequent months consistent with the effort estimated by B&D and to maximum balance of 4200"Additional Remediation Hours" or the balance of the "Additional Remediation Hours" available for use. B&D agrees that it will provide these Additional Remediation Hours, separate from, and concurrently with, the 10,000 man-hours per year that B&D is required to provide as part of the M&O Hours.

In the event that ADCRR does not have sufficient "Additional Remediation Hours" available for use for any items added to the EUIL, ADCRR may supplement the effort for the aforementioned items by any means at it's disposal, which may include any available "M&O Hours" or a separate Purchase Order.

The Parties will iteratively develop the EUIL with monthly additions to the EUIL. The goal will be to identify and resolve ADCRR authorized items on the approved EUIL as quickly as reasonably as possible (e.g., utilization of the full 10,000 Additional Remediation Hours as quickly as reasonably possible against the prioritized EUIL). The Parties agree that B&D will provide a target of the equivalent of 10 FTEs, or more, (in addition to the FTEs that B&D will utilize to satisfy its M&O Hours) to provide the Additional Remediation Hours and as may be needed to exhaust the remaining 10,000 M&O Hours.

ADCRR commits to provide B&D with sufficient items off the EUIL per month to a minimum of 400 hours per month of Additional Remediation Hours for 12 months following the effective date of this amendment.

ADCRR and B&D have provided and will continue to provide Business Analysts to gather ADCRR user feedback and identify the primary issues that users are facing in utilization of the system. This information will be validated with ADCRR Business Owners.

The following monthly procedure will be implemented (clock starting every 30 calendar days after signature of the contract amendment) to assure the right items are being prioritized and resolved to impact user satisfaction:

- By or before the 10th Business Day: ADCRR and B&D, will present a list of proposed items for the EUIL for estimation.
- By or before the 15th Business Day: B&D will define and provide to ADCRR the effort and man-hours associated with each proposed item for the EUIL. B&D will also provide a forecast of the available FTEs for the following month.
- By or before the 20th Business Day: ADCRR, with support from B&D, will choose from the proposed and estimated items, which items will be added to the EUIL (with the

AMERICAN OVERSIGHT

acceptance criteria for each item defined) and will exercise its best good faith effort to ensure that the number of selected items utilizes the B&D FTEs at full capacity.

- ADCRR shall submit an initial prioritized (Low Hanging Fruit") EUIL of items by no later than May 25, 2020.

This process will repeat monthly. During some months more items will be selected than other months. The Parties acknowledge that some of the items on the finalized EUIL will take more than one month to develop. The Parties agree that B&D shall deliver each item from the EUIL into User Acceptance Testing and notify ADCRR of each delivery. If ADCRR fails to accept, reject, note pending other bugs, or test an item within thirty (30) days of notification of delivery, then that item shall be deemed accepted.

It is the intent of the Parties that the EUIL will fully resolve ADCRR's concerns and disputes of the product's functionality. However, any items remaining on the EUIL, once the Additional Remediation Hours are exhausted, may or may not be prioritized by ADCRR and resolved utilizing available M&O hours at ADCRR's sole discretion.

In the first year commencing on the Effective date and following the initial EUIL agreed between the Parties, the Parties will simultaneously work on the following (with priorities determined by ADCRR): the CAP Plan, the EUIL and other system changes. If any hours remain at the end of the first year from the M&O Hours, these hours shall carry over for use in the second year of M&O, and so on, year after year, throughout the entire M&O phase.

The Parties recommit to the bug/change qualification as detailed in Section 4 of this Amendment.

6. CAPs and SLAs

The Parties reaffirm that Corrective Action Plans ("CAPs") are a component of the M&O Phase requiring remediation at no additional charge to ADCRR. The Parties reaffirm that future software defects that require remediation will be repaired at no additional cost and separate from the M&O hours. The Parties further agree to work collaboratively, to agree to a methodology for setting bug resolution priorities, including, but not limited to, considering the severity of a bug, With regards to any dispute the ADCRR appointed leadership (Joe Profiri) and the B&D appointed leadership (Dean Allen) shall agree to the resolution of any dispute. The Parties further agree to work collaboratively, to develop a set of achievable targets for the closure of items on the CAP lists as soon as practical within the first year of M&O.

With respect to SLAs, the Parties agree that final acceptance of agreed SLAs will be achieved 30 days after the effective date of this Amendment.

7. Commercial Reference

ADCRR acknowledges that B&D has served as a vendor under the Contract and will confirm such in commercial references, orally and in writing, to B&D for upcoming Offender Management System opportunities on which B&D may bid. Offender Management System opportunities shall include any project or bid relating to any software system used in connection

AMERICAN OVERSIGHT

with the management of an inmate's incarceration, probation, or parole, or any component thereof, whether public, private, federal, state, local, or municipal, located within the United States of America. ADCRR's obligation set out in this clause will survive the termination of the Contract for any reason.

8. Point of Contact

B&D will make the Mi-Case President of B&D (Dean Allen) the main point of contact relating to this Contract, as amended, and any major escalations will be directed, but not limited to, to the chairman of B&D (Pierre Louis Biaggi) as next level decision-maker.

9. COVID-19

The Parties agree that disruptions caused by the COVID-19 virus and its associated events, including but not limited to business or government shut-downs, may constitute a force majeure event, governed by Section 6.4-6.4.4 of the Contract's Uniform Terms and Conditions.

Hello Charles and Steven-

With all due respect, if no monitoring and alerting is established by B&D for ACIS; and there is no issue intake process outside of the ADC ACIS email box, then you would not have received anything other than the below.

Please investigate the issue and provide an update to this group. The shift for those who reported the issue has likely ended. So if you need someone to work with on the ADC side, I recommend reaching out to Marlene Coffey and Jey Whitson. I'd like to know if this is still occurring, what exactly is happening, is this widespread and the root cause (along with solution).

Hi Joe,

Good morning, I trust you are well!

Please see attached the document we reviewed, I edited it and left track changes on as we agreed, I look forward to hearing from you in-line with the timeline that that we discussed!

Stay safe and keep fighting the good fight over there!

D

Dean Allen

AMERICAN OVERSIGHT

AMENDMENT NO. 9 TO ADOC14-00003350/14-25-23

Pursuant to Section V.B of the September 25, 2013 Request for Proposal Number ADOC14-00003350/14-25-23 ("RFP"), the October 23, 2013 Proposal for Replacement of the Adult Inmate Management System, the May 13, 2014 Final Proposal Revision for Replacement of the Adult Inmate Management System, and the documents incorporated thereto (collectively, and with all other written amendments, the "Contract"), the Arizona Department of Corrections, Rehabilitation and Reentry ("ADCRR") and Business & Decision, North America PA, Inc. ("B&D") (together, the "Parties") hereby enter into this ninth official Contract amendment (the "Amendment"). This Amendment is intended to amend, supplement, and modify the Contract. To the extent any terms in this Amendment conflict with any term in the Contract as it previously existed, it is the intent of the Parties that the terms of this Amendment shall control. However, the Parties reaffirm their respective responsibilities pursuant to the Contract to the extent they are not modified by this Amendment. The Parties further agree that this Amendment may be executed in counterparts, effective immediately, upon both Parties signing. Undefined capitalized terms are as defined in this Amendment or the Contract.

1. Definitions

   a. "ADCRR" refers to the Arizona Department of Corrections Rehabilitation and Reentry, and includes, for purposes of this Amendment, any third party it appoints at its sole discretion to assist ADCRR with regard to this Amendment and the Contract. ADCRR acknowledges that the contractual relationship remains between ADCRR and B&D, notwithstanding the involvement of any third party so appointed by ADCRR.

   b. "Additional Remediation Hours" means a cap of 10,000 hours provided to ADCRR by B&D for usage against any change requested by ADCRR without charge.

   c. "M&O Hours" means a cap of 10,000 hours per year provided to ADCRR by B&D for usage against any change requested by ADCRR during the M&O Phase of the contract.

   d. "Parking Lot" means the list of desired system functionality gathered by ADCRR throughout system development that was not defined in the implementation scope for Go-Live solution and which may still be implemented as part of the End User Improvement List (EUIL).

   e. An End-User Improvement List ("EUIL") will be created by mutual agreement between ADCRR and B&D. The goal of the EUIL is to ensure a meaningful positive impact on the aggregate ADCRR end-user experience. At the outset the EUIL will include the items listed in Exhibit 2 that were placed in the Parking Lot prior to Go-Live. These items will be delivered as part of the Additional Remediation Hours and will consume no more than 1000 hours of the Additional Remediation Hours.

   f. "Effective Date" means the date of last signature of this Amendment

2. Commencement of the M&O Phase

AMERICAN OVERSIGHT

In accordance with Section III.D.10 of the RFP and Amendment No. 8, the Parties agree that the Maintenance and Operations Phase (the "M&O Phase") shall be deemed to have commenced on February 21, 2020. ADCRR agrees to wire to B&D the first M&O Phase monthly payment in the amount of $157,898.50 on or before three business days after the Effective Date and in the future pay the invoices for the M&O Phase according to the contractual terms.

3. Final Acceptance of the Solution

The Parties acknowledge and agree that ADCRR's final acceptance of the Solution shall be deemed to have been on January 15, 2020. The Parties agree to further memorialize the acceptance by signing the Certificate of Acceptance attached as **Exhibit 1**. ADCRR further agrees that it will pay to B&D the following amounts on or before three business days after the Effective Date (a) the remaining invoice for the Implementation Phase, which totals $318,081.40; and (b) $948,973.20, representing the ten percent (10%) retainers collected pursuant to Section VI.C.1 of the RFP. No late fees have been assessed, paid, or will be paid on these amounts. By paying the amounts specified in this paragraph, ADCRR has fulfilled its contractual payment responsibilities for the Implementation Phase as well as the release of retained amounts pursuant to VI.C.1. of the Contract.

4. Mutual Release

The Parties acknowledge that there have been certain disputes relating to testing, change requests, project delays, the conclusion of the Implementation Phase, the commencement of the M&O Phase, the "Parking Lot" issues, the claims raised in B&D's March 4, 2020 Notice of Claim, and any and all disputes or potential disputes related to the Solution through and including the Effective Date (the "Disputes").

The Parties agree that in consideration of the provisions of this Amendment and any compensation under this Amendment, each Party forever and unconditionally releases the other from any and all claims relating to the Disputes, known or unknown, from project inception (July 29, 2014) to the Effective Date. B&D agrees that with this Amendment, its March 4, 2020 Notice of Claim is moot and immediately withdrawn upon the Effective Date. The Parties further agree that, by entering into this Amendment, neither party is admitting fault or liability in any way relating to the Disputes.

The Parties agree that any claims or Disputes released as part of this Mutual Release, or previously released, shall not serve as predicates for claims, if any, against the Performance Bond pursuant to Section V.R.17 of the RFP. The Parties further agree that the End-User Improvement List ("EUIL"), as defined in Section 7 below, is not part of the Implementation Phase, and any disputes related to the EUIL cannot therefore serve as predicates for claims against the Performance Bond pursuant to Section V.R.17 of the RFP. Subject to the clarifications in this Paragraph, the Parties confirm their commitment to the contractual obligations and rights related to the Performance Bond as specified in Section V.R.17.

In the event that ADCRR leadership and B&D leadership cannot resolve any dispute through a normal issue escalation process with respect to any disputes arising after the Effective Date arising out of the definition of System Defects (also known as Bugs) and System Changes

AMERICAN OVERSIGHT
AZ-DOC-21-0315-A-002850

(also known as Change Requests), ADCRR and B&D agree to resolve such disputes through an arbitration process. The Parties agree to mutually agree to an 'Independent Expert' to fully and finally resolve such disputes. The Independent Expert may be selected from either the existing ADCRR IV&V vendor or a mutually agreed upon professional industry expert organization that is different from the 'Third Party' identified in the Definitions section 1.a. of this amendment.

AMERICAN OVERSIGHT

5. End-User Improvements & Remediation Hours

The Parties agree that B&D will deliver items from the EUIL free of charge, subject to a total cap of 10,000 "Additional Remediation Hours". Items may be added to the EUIL up to the last working day of the 12th month following the signature of this Amendment, if ADCRR has sufficient "Additional Remediation Hours" available for use. Any items added to the EUIL during the 12th month, may be delivered in subsequent months consistent with the effort estimated by B&D and the "Additional Remediation Hours" available for use. B&D agrees that it will provide these Additional Remediation Hours, separate from, and concurrently with, the 10,000 man-hours per year that B&D is required to provide as part of the M&O Hours.

In the event that ADCRR does not have sufficient "Additional Remediation Hours" available for use for any items added to the EUIL, ADCRR may supplement the effort for the aforementioned items by any means at it's disposal, which may include any available "M&O Hours" or a separate Purchase Order.

The Parties will iteratively develop the EUIL with monthly additions to the EUIL. The goal will be to identify and resolve ADCRR authorized items on the approved EUIL as quickly reasonably possible (e.g., utilization of the full 10,000 Additional Remediation Hours as quickly as reasonably possible against the prioritized EUIL). The Parties agree that B&D will provide a target of the equivalent of 10 FTEs, or more, (in addition to the FTEs that B&D will utilize to satisfy its M&O Hours) to provide the Additional Remediation Hours and as may be needed to exhaust the remaining 10,000 M&O Hours.

ADCRR commits to provide B&D with sufficient items off the EUIL per month to a minimum of 400 hours per month of Additional Remediation Hours for 12 months following the effective date of this amendment.

ADCRR and B&D have provided and will continue to provide Business Analysts to gather ADCRR user feedback and identify the primary issues that users are facing in utilization of the system. This information will be validated with ADCRR Business Owners.

The following monthly procedure will be implemented (clock starting every 30 calendar days after signature of the contract amendment) to assure the right items are being prioritized and resolved to impact user satisfaction:

- By or before the 10th Business Day: ADCRR and B&D, will present a list of proposed items for the EUIL for estimation.
- By or before the 15th Business Day: B&D will define and provide to ADCRR the effort and man-hours associated with each proposed item for the EUIL. B&D will also provide a forecast of the available FTEs for the following month.
- By or before the 20th Business Day: ADCRR, with support from B&D, will choose from the proposed and estimated items, which items will be added to the EUIL (with the

AMERICAN OVERSIGHT

acceptance criteria for each item defined) and will exercise its best good faith effort to ensure that the number of selected items utilizes the B&D FTEs at full capacity.

- ADCRR shall submit an initial "Low Hanging Fruit" EUIL of items by no later than May 20, 2020.

This process will repeat monthly. During some months more items will be selected than other months. The Parties acknowledge that some of the items on the finalized EUIL will take more than one month to develop. The Parties agree that B&D shall deliver each item from the EUIL into User Acceptance Testing and notify ADCRR of each delivery. If ADCRR fails to accept, reject, note pending other bugs, or test an item within thirty (30) days of notification of delivery, then that item shall be deemed accepted.

It is the intent of the Parties that the EUIL will fully resolve ADCRR's concerns and disputes of the product's functionality. However, any items remaining on the EUIL, once the Additional Remediation Hours are exhausted, may or may not be prioritized by ADCRR and resolved utilizing the Annual Hours or the future M&O hours at ADCRR's sole discretion.

In the first year commencing on the Effective date and following the initial EUIL agreed between the Parties, the Parties will simultaneously work on the following (with priorities determined by ADCRR): the CAP Plan, the EUIL and other system changes utilizing the M&O Hours. If any hours remain at the end of the first year from the M&O Hours, these hours shall carry over for use in the second year of M&O, and so on, year after year, throughout the entire M&O phase.

The Parties recommit to the bug/change qualification as detailed in Section 4 of this Amendment.

6. CAPs and SLAs

The Parties reaffirm that Corrective Action Plans ("CAPs") are a component of the M&O Phase requiring remediation at no additional charge to ADCRR. The Parties further agree to work collaboratively, to agree to a methodology for setting bug resolution priorities, including, but not limited to, considering the severity of a bug. The Parties further agree to work collaboratively, to develop a set of achievable targets for the closure of items on the CAP lists as soon as practical within the first year of M&O.

With respect to SLAs, the Parties agree that final acceptance of agreed SLAs will be achieved 30 days after the effective date of this Amendment.

7. Commercial Reference

ADCRR acknowledges that B&D has served as a vendor under the Contract and will confirm such in commercial references, orally and in writing, to B&D for upcoming Offender Management System opportunities on which B&D may bid. Offender Management System opportunities shall include any project or bid relating to any software system used in connection with the management of an inmate's incarceration, probation, or parole, or any component thereof, whether public, private, federal, state, local, or municipal, located within the United

AMERICAN OVERSIGHT

States of America. ADCRR's obligation set out in this clause will survive the termination of the Contract for any reason.

8. Point of Contact

B&D will make the Mi-Case President of B&D (Dean Allen) the main point of contact relating to this Contract, as amended, and any major escalations will be directed, but not limited to, to the chairman of B&D (Pierre Louis Biaggi) as next level decision-maker.

9. COVID-19

The Parties agree that disruptions caused by the COVID-19 virus and its associated events, including but not limited to business or government shut-downs, may constitute a force majeure event, governed by Section 6.4-6.4.4 of the Contract's Uniform Terms and Conditions.

CERTIFICATE OF FINAL ACCEPTANCE

The Arizona Department of Corrections ("ADCRR") and Business & Decision, North America PA, Inc. ("B&D") hereby agree, certify, and acknowledge that ADCRR formally accepted from B&D the "Solution" required by Contract No. ADOC14-00003350/14-25-23 on January 15, 2020.

The Parties further agree that, pursuant to Section V.R of the September 25, 2013 Request for Proposal Number ADOC14-00003350/14-25-23, the Performance Bonds submitted by B&D shall not remain in effect later than January 14, 2021.

Sandy,

I have one quick question. What happens with Bug 41655 ADCRR withdrew? Does it move to the Parking Lot? Bug 41771 was closed.

Thank you.

Subject: Arbitration Update

Hi, Charles, just wanted to give you an update on the arbitration requests. ADCRR has responded to two and decided to withdraw the other two. They are as follows:
#41655 Classification for new ICC Inmates - Withdrew
#41771 Pay Override in Programs - Withdrew
#41838 - responded with revised request, see attachment
#41868 - responded with revised request, see attachment.

Thanks Hagay, this is looking really good. Placing all of the reports in ADC Playground in DEV as you suggest would be fine; it's not a high priority but it would be an improvement. When you have time, could you also please update ADC RPT 3220 by moving "Inmates not assigned to a bed" from the Name field and into the description so it matches the others? Thank you.

Subject: Ad Hoc Report name standardization/update

Hi Charles,

We discussed removing duplicate SB1310 reports and standardizing the names of ad hoc reports to be more consistent with the B&D report naming convention. Attached is a breakdown of our requested naming changes. We do not request an update to stored procedure names; just the report names and descriptions as they appear to our ACIS users. Thank you.

From: Dean Allen on behalf of Dean Allen <dean.allen@bndna.com>
To: Joseph Profiri
Subject: amendment revision
Date: Monday, April 20, 2020 5:41:33 PM
Attachments: 40049409_3FinalFlattenedToBeSent.docx
40049409_3FinalTrackChangesToBeSent.docx
image002.png

Hi Joe,

I have tried to make this as easy as possible! I have attached two documents, which are the same. 1 has track changes on and the other is flattened. I have done this so we can work through the track changes version, but we also have a clean version to review if needed. I want to be as transparent and collaborative as I can be.

I have endeavored to incorporate all the changes that we had discussed during our calls. I still have the document that we were walking through while I was screen sharing. So we can compare and ensure that the salient points have been met as part of our review. I still need your words around the third party, you will see I have left a comment in the document to that effect.

Let me know a good time for us to go through this, I think we can get this wrapped up in one call as I think we are pretty close now.

Thanks
Dean

AMERICAN OVERSIGHT

AMENDMENT NO. 9 TO ADOC14-00003350/14-25-23

Pursuant to Section V.B of the September 25, 2013 Request for Proposal Number ADOC14-00003350/14-25-23 ("RFP"), the October 23, 2013 Proposal for Replacement of the Adult Inmate Management System, the May 13, 2014 Final Proposal Revision for Replacement of the Adult Inmate Management System, and the documents incorporated thereto (collectively, and with all other written amendments, the "Contract"), the Arizona Department of Corrections, Rehabilitation and Reentry ("ADCRR") and Business & Decision, North America PA, Inc. ("B&D") (together, the "Parties") hereby enter into this ninth official Contract amendment (the "Amendment"). This Amendment is intended to amend, supplement, and modify the Contract. To the extent any terms in this Amendment conflict with any term in the Contract as it previously existed, it is the intent of the Parties that the terms of this Amendment shall control. However, the Parties reaffirm their respective responsibilities pursuant to the Contract to the extent they are not modified by this Amendment. The Parties further agree that this Amendment may be executed in counterparts, effective immediately, upon both Parties signing. Undefined capitalized terms are as defined in this Amendment or the Contract.

1. Definitions

   a. "ADCRR" refers to the Arizona Department of Corrections Rehabilitation and Reentry, and includes, for purposes of this Amendment, any third party it appoints in relation to fulfilling its obligations under this Amendment., subject that ADCRR remains fully responsible to B&D for that third party,

   b. "Additional Remediation Hours" means a cap of 10,000 hours provided to ADCRR by B&D for usage against any change requested by ADCRR without charge.

   c. "M&O Hours" means a cap of 10,000 hours provided to ADCRR by B&D for usage against any change requested by ADCRR as included in the M&O Phase of the contract.
   d. "Parking Lot" means the list of desired system functionality gathered by ADCRR throughout system development that was not defined in the implementation scope for Go-Live solution and which may still be implemented as part of the End User Improvement List (EUIL).
   e. An End-User Improvement List ("EUIL") will be drawn up by mutual agreement between ADCRR and B&D. The goal of the EUIL is to ensure a meaningful impact on the aggregate ADCRR end-user experience. At the outset the EUIL will include the items listed in Exhibit 2 that were placed in the Parking Lot prior to Go-Live. These items will be delivered as part of the Additional Remediation Hours and will consume no more than 1000 hours of the Additional Remediation Hours.
   f. "Effective Date" means the date of last signature of this Amendment

2. Commencement of the M&O Phase

In accordance with Section III.D.10 of the RFP and Amendment No. 8, the Parties agree that the Maintenance and Operations Phase (the "M&O Phase") shall be deemed to have commenced on February 21, 2020. ADCRR agrees to wire to B&D the first M&O Phase

AMERICAN OVERSIGHT

monthly payment in the amount of $157,898.50 on or before three business days after the Effective Date and in the future pay the invoices for the M&O Phase according to the contractual terms.

3. Final Acceptance of the Solution

The Parties acknowledge and agree that ADCRR's final acceptance of the Solution shall be deemed to have been on January 15, 2020. The Parties agree to further memorialize the acceptance by signing the Certificate of Acceptance attached as **Exhibit 1**. ADCRR further agrees that it will pay to B&D the following amounts on or before three business days after the Effective Date (a) the remaining invoice for the Implementation Phase, which totals $318,081.40; and (b) $948,973.20, representing the ten percent (10%) retainers collected pursuant to Section VI.C.1 of the RFP. No late fees have been assessed, paid, or will be paid on these amounts. By paying the amounts specified in this paragraph, ADCRR has fulfilled its contractual payment responsibilities for the Implementation Phase as well as the release of retained amounts pursuant to VI.C.1. of the Contract.

4. Mutual Release

The Parties acknowledge that there have been certain disputes relating to testing, change requests, project delays, the conclusion of the Implementation Phase, the commencement of the M&O Phase, the "Parking Lot" issues, the claims raised in B&D's March 4, 2020 Notice of Claim, and any and all disputes or potential disputes related to the Solution through and including the Effective Date (the "Disputes").

The Parties agree that in consideration of the provisions of this Amendment and any compensation under this Amendment, each Party forever and unconditionally releases the other from any and all claims relating to the Disputes, known or unknown, from project inception (July 29, 2014) to the Effective Date. B&D agrees that with this Amendment, its March 4, 2020 Notice of Claim is moot and immediately withdrawn upon the Effective Date. The Parties further agree that, by entering into this Amendment, neither party is admitting fault or liability in any way relating to the Disputes.

The Parties agree that any claims or Disputes released as part of this Mutual Release, or previously released, shall not serve as predicates for claims, if any, against the Performance Bond pursuant to Section V.R.17 of the RFP. The Parties further agree that the End-User Improvement List ("EUIL"), as defined in Section 7 below, is not part of the Implementation Phase, and any disputes related to the EUIL cannot therefore serve as predicates for claims against the Performance Bond pursuant to Section V.R.17 of the RFP. Subject to the clarifications in this Paragraph, the Parties confirm their commitment to the contractual obligations and rights related to the Performance Bond as specified in Section V.R.17.

With respect to any disputes arising after the Effective Date that relate to the definition of System Defects (also known as Bugs) versus System Changes (also known as Change Requests), ADCRR and B&D agree to resolve such disputes through an arbitration process. The Parties agree to mutually agree to an 'Independent Expert' to fully and finally resolve such disputes. The Independent Expert may be selected from either the existing ADCRR IV&V vendor or a

AMERICAN OVERSIGHT

mutually agreed professional industry expert organization that is different to the 'Third Party' identified in the Definitions section 1.a. of this amendment.

AMERICAN OVERSIGHT

5. End-User Improvements & Remediation Hours

The Parties agree that B&D will deliver items off the EUIL free of charge, subject to a total cap of 10,000 "Additional Remediation Hours". Items can be added to the EUIL up to the last working day of the 12th month following the signature of this amendment, assuming ADCRR has enough "Additional Remediation Hours" available for use. Any items added to the EUIL during the 12th Month, can be delivered in subsequent months, in line with the effort estimated by B&D and the "Additional Remediation Hours" available for use. B&D agrees that it will provide these Additional Remediation Hours, separate from, and concurrently with, the 10,000 man-hours B&D is required to provide yearly as part of the M&O Hours.

In the event that ADCRR does not have sufficient "Additional Remediation Hours" available for use for any items added to the EUIL, ADCRR can supplement the effort for the aforementioned items, by any means at their disposal, which can include any available "M&O Hours" or a separate purchase order.

The Parties will iteratively develop the EUIL with monthly additions to the EUIL. The goal will be to identify and resolve ADCRR authorized items on the approved EUIL as quickly as possible (e.g., utilization of the full 10,000 Additional Remediation Hours as quickly as possible against the prioritized EUIL). The Parties agree that B&D will provide a target of the equivalent of 10 FTEs, or more, (in addition to the FTEs B&D will utilize to satisfy its M&O Hours) to provide the Additional Remediation Hours and as may be needed to exhaust the remaining 10,000 M&O Hours.

ADCRR commits to provide B&D with sufficient items off the EUIL per month to a minimum of 400 hours per month of Additional Remediation Hours for 12 months following the effective date of this amendment.

ADCRR and B&D have provided and will continue to provide Business Analysts to gather ADCRR user feedback and identify the primary issues users are facing in utilization of the system. This information will be validated with ADCRR Business Owners.

The following monthly procedure will be implemented (clock starting every 30 calendar days after signature of the contract amendment) to assure the right items are being prioritized and resolved to impact user satisfaction:

- By or before the 10th Business Day: ADCRR and B&D, will present a list of proposed items for the EUIL for estimation.
- By or before the 15th Business Day: B&D will define and provide to ADCRR the effort and man-hours associated with each proposed item for the EUIL. B&D will also provide a forecast of the available FTEs for the following month.
- By or before the 20th Business Day: ADCRR, with support from B&D, will choose from the proposed and estimated items, which items will be added to the EUIL (with the acceptance criteria for each item defined) and will make sure that the number of selected items utilizes the B&D FTEs at full capacity.

AMERICAN OVERSIGHT

- ADCRR shall submit an initial "Low Hanging Fruit" EUIL of items by no later than May 20, 2020.

This process will repeat monthly. During some months more items will be selected than others. The parties acknowledge that some of the items on the finalized EUIL will take more than one month to develop. The Parties agree that B&D shall deliver each item off of the EUIL into User Acceptance Testing and notify ADCRR of each delivery. Should ADCRR fail to accept, reject, note pending other bugs, or test an item within thirty (30) days of notification of delivery, that item shall be deemed accepted.

It is the intent of the Parties that the EUIL will fully resolve ADCRR's concerns and disputes of the product's functionality. However, any items remaining on the EUIL, once the Additional Remediation Hours are exhausted, may or may not be prioritized by ADCRR and resolved utilizing the Annual Hours or in the future at ADCRR's sole discretion.

In the first year commencing on the effective date and following the initial EUIL agreed between the Parties, the Parties will simultaneously work on the following (with priorities determined by ADCRR): the CAP Plan, the EUIL and other system changes utilizing the M&O Hours. If any hours remain at the end of the first year from the M&O Hours, these hours shall carry over for use in the second year of M&O.

The parties recommit to the bug/change qualification as detailed in section 4 of this amendment.

6. CAPs and SLAs

The Parties reaffirm that Corrective Action Plans ("CAPs") are a component of the M&O Phase requiring remediation at no additional charge to ADCRR. The Parties further agree to work collaboratively, to agree to a methodology for setting bug resolution priorities, including, but not limited to, considering the severity of a bug. The Parties further agree to work collaboratively, to develop a set of achievable targets for the closure of items on the CAP lists as soon as practical within the first year of M&O.

With respect to SLAs, the Parties agree that final acceptance of agreed SLAs will be achieved 30 days after the effective date of this amendment.

7. Commercial Reference

ADCRR acknowledges that B&D has served as a vendor under the Contract and will confirm such in commercial references, orally and in writing, to B&D for upcoming Offender Management System opportunities on which B&D may bid. Offender Management System opportunities shall include any project or bid relating to any software system used in connection with the management of an inmate's incarceration, probation, or parole, or any component thereof, whether public, private, federal, state, local, or municipal, located within the United States of America. ADCRR's obligation set out in this clause will survive the termination of the Contract for any reason.

AMERICAN OVERSIGHT

8. Point of Contact

B&D will make the Mi-Case President of B&D (Dean Allen) the main point of contact relating to this Contract, as amended, and any major escalations will be directed, but not limited to, to the chairman of B&D (Pierre Louis Biaggi) as next level decision maker.

9. COVID-19

The Parties agree that disruptions caused by the COVID-19 virus and its associated events, including but not limited to business or government shut-downs, may constitute a force majeure event, governed by Section 6.4-6.4.4 of the Contract's Uniform Terms and Conditions.

AMENDMENT NO. 9 TO ADOC14-00003350/14-25-23

Pursuant to Section V.B of the September 25, 2013 Request for Proposal Number ADOC14-00003350/14-25-23 ("RFP"), the October 23, 2013 Proposal for Replacement of the Adult Inmate Management System, the May 13, 2014 Final Proposal Revision for Replacement of the Adult Inmate Management System, and the documents incorporated thereto (collectively, and with all other written amendments, the "Contract"), the Arizona Department of Corrections, Rehabilitation and Reentry ("ADCRR") and Business & Decision, North America PA, Inc. ("B&D") (together, the "Parties") hereby enter into this ninth official Contract amendment (the "Amendment"). This Amendment is intended to amend, supplement, and modify the Contract. To the extent any terms in this Amendment conflict with any term in the Contract as it previously existed, it is the intent of the Parties that the terms of this Amendment shall control. However, the Parties reaffirm their respective responsibilities pursuant to the Contract to the extent they are not modified by this Amendment. The Parties further agree that this Amendment may be executed in counterparts, effective immediately, upon both Parties signing. Undefined capitalized terms are as defined in this Amendment or the Contract.

1. Definitions

   a. "ADCRR" refers to the Arizona Department of Corrections Rehabilitation and Reentry, and includes, for purposes of this Amendment, any third party it appoints in relation to fulfilling its obligations under this Amendment., subject that ADCRR remains fully responsible to B&D for that third party,

   b. "Additional Remediation Hours" means a cap of 10,000 hours provided to ADCRR by B&D for usage against any change requested by ADCRR without charge.

   c. "M&O Hours" means a cap of 10,000 hours provided to ADCRR by B&D for usage against any change requested by ADCRR as included in the M&O Phase of the contract.
   d. "Parking Lot" means the list of desired system functionality gathered by ADCRR throughout system development that was not defined in the implementation scope for Go-Live solution and which may still be implemented as part of the End User Improvement List (EUIL).
   e. An End-User Improvement List ("EUIL") will be drawn up by mutual agreement between ADCRR and B&D. The goal of the EUIL is to ensure a meaningful impact on the aggregate ADCRR end-user experience. At the outset the EUIL will include the items listed in Exhibit 2 that were placed in the Parking Lot prior to Go-Live. These items will be delivered as part of the Additional Remediation Hours and will consume no more than 1000 hours of the Additional Remediation Hours.
   f. "Effective Date" means the date of last signature of this Amendment
2. Commencement of the M&O Phase

In accordance with Section III.D.10 of the RFP and Amendment No. 8, the Parties agree that the Maintenance and Operations Phase (the "M&O Phase") shall be deemed to have commenced on February 21, 2020. ADCRR agrees to wire to B&D the first M&O Phase

AMERICAN OVERSIGHT

monthly payment in the amount of $157,898.50 on or before three business days after the Effective Date and in the future pay the invoices for the M&O Phase according to the contractual terms.

3. Final Acceptance of the Solution

The Parties acknowledge and agree that ADCRR's final acceptance of the Solution shall be deemed to have been on January 15, 2020. The Parties agree to further memorialize the acceptance by signing the Certificate of Acceptance attached as **Exhibit 1**. ADCRR further agrees that it will pay to B&D the following amounts on or before three business days after the Effective Date (a) the remaining invoice for the Implementation Phase, which totals $318,081.40; and (b) $948,973.20, representing the ten percent (10%) retainers collected pursuant to Section VI.C.1 of the RFP. No late fees have been assessed, paid, or will be paid on these amounts. By paying the amounts specified in this paragraph, ADCRR has fulfilled its contractual payment responsibilities for the Implementation Phase as well as the release of retained amounts pursuant to VI.C.1. of the Contract.

4. Mutual Release

The Parties acknowledge that there have been certain disputes relating to testing, change requests, project delays, the conclusion of the Implementation Phase, the commencement of the M&O Phase, the "Parking Lot" issues, the claims raised in B&D's March 4, 2020 Notice of Claim, and any and all disputes or potential disputes related to the Solution through and including the Effective Date (the "Disputes").

The Parties agree that in consideration of the provisions of this Amendment and any compensation under this Amendment, each Party forever and unconditionally releases the other from any and all claims relating to the Disputes, known or unknown, from project inception (July 29, 2014) to the Effective Date. B&D agrees that with this Amendment, its March 4, 2020 Notice of Claim is moot and immediately withdrawn upon the Effective Date. The Parties further agree that, by entering into this Amendment, neither party is admitting fault or liability in any way relating to the Disputes.

The Parties agree that any claims or Disputes released as part of this Mutual Release, or previously released, shall not serve as predicates for claims, if any, against the Performance Bond pursuant to Section V.R.17 of the RFP. The Parties further agree that the End-User Improvement List ("EUIL"), as defined in Section 7 below, is not part of the Implementation Phase, and any disputes related to the EUIL cannot therefore serve as predicates for claims against the Performance Bond pursuant to Section V.R.17 of the RFP. Subject to the clarifications in this Paragraph, the Parties confirm their commitment to the contractual obligations and rights related to the Performance Bond as specified in Section V.R.17.

With respect to any disputes arising after the Effective Date that relate to the definition of System Defects (also known as Bugs) versus System Changes (also known as Change Requests), ADCRR and B&D agree to resolve such disputes through an arbitration process. The Parties agree to mutually agree to an 'Independent Expert' to fully and finally resolve such disputes. The Independent Expert may be selected from either the existing ADCRR IV&V vendor or a

AMERICAN OVERSIGHT
AZ-DOC-21-0315-A-002883

mutually agreed professional industry expert organization that is different to the 'Third Party' identified in the Definitions section 1.a. of this amendment.

AMERICAN OVERSIGHT

5. End-User Improvements & Remediation Hours

The Parties agree that B&D will deliver items off the EUIL free of charge, subject to a total cap of 10,000 "Additional Remediation Hours". Items can be added to the EUIL up to the last working day of the 12th month following the signature of this amendment, assuming ADCRR has enough "Additional Remediation Hours" available for use. Any items added to the EUIL during the 12th Month, can be delivered in subsequent months, in line with the effort estimated by B&D and the "Additional Remediation Hours" available for use. B&D agrees that it will provide these Additional Remediation Hours, separate from, and concurrently with, the 10,000 man-hours B&D is required to provide yearly as part of the M&O Hours.

In the event that ADCRR does not have sufficient "Additional Remediation Hours" available for use for any items added to the EUIL, ADCRR can supplement the effort for the aforementioned items, by any means at their disposal, which can include any available "M&O Hours" or a separate purchase order.

The Parties will iteratively develop the EUIL with monthly additions to the EUIL. The goal will be to identify and resolve ADCRR authorized items on the approved EUIL as quickly as possible (e.g., utilization of the full 10,000 Additional Remediation Hours as quickly as possible against the prioritized EUIL). The Parties agree that B&D will provide a target of the equivalent of 10 FTEs, or more, (in addition to the FTEs B&D will utilize to satisfy its M&O Hours) to provide the Additional Remediation Hours and as may be needed to exhaust the remaining 10,000 M&O Hours.

ADCRR commits to provide B&D with sufficient items off the EUIL per month to a minimum of 400 hours per month of Additional Remediation Hours for 12 months following the effective date of this amendment.

ADCRR and B&D have provided and will continue to provide Business Analysts to gather ADCRR user feedback and identify the primary issues users are facing in utilization of the system. This information will be validated with ADCRR Business Owners.

The following monthly procedure will be implemented (clock starting every 30 calendar days after signature of the contract amendment) to assure the right items are being prioritized and resolved to impact user satisfaction:

- By or before the 10th Business Day: ADCRR and B&D, will present a list of proposed items for the EUIL for estimation.
- By or before the 15th Business Day: B&D will define and provide to ADCRR the effort and man-hours associated with each proposed item for the EUIL. B&D will also provide a forecast of the available FTEs for the following month.
- By or before the 20th Business Day: ADCRR, with support from B&D, will choose from the proposed and estimated items, which items will be added to the EUIL (with the acceptance criteria for each item defined) and will make sure that the number of selected items utilizes the B&D FTEs at full capacity.

AMERICAN OVERSIGHT

- ADCRR shall submit an initial "Low Hanging Fruit" EUIL of items by no later than May 20, 2020.

This process will repeat monthly. During some months more items will be selected than others. The parties acknowledge that some of the items on the finalized EUIL will take more than one month to develop. The Parties agree that B&D shall deliver each item off of the EUIL into User Acceptance Testing and notify ADCRR of each delivery. Should ADCRR fail to accept, reject, note pending other bugs, or test an item within thirty (30) days of notification of delivery, that item shall be deemed accepted.

It is the intent of the Parties that the EUIL will fully resolve ADCRR's concerns and disputes of the product's functionality. However, any items remaining on the EUIL, once the Additional Remediation Hours are exhausted, may or may not be prioritized by ADCRR and resolved utilizing the Annual Hours or in the future at ADCRR's sole discretion.

In the first year commencing on the effective date and following the initial EUIL agreed between the Parties, the Parties will simultaneously work on the following (with priorities determined by ADCRR): the CAP Plan, the EUIL and other system changes utilizing the M&O Hours. If any hours remain at the end of the first year from the M&O Hours, these hours shall carry over for use in the second year of M&O.

The parties recommit to the bug/change qualification as detailed in section 4 of this amendment.

6. CAPs and SLAs

The Parties reaffirm that Corrective Action Plans ("CAPs") are a component of the M&O Phase requiring remediation at no additional charge to ADCRR. The Parties further agree to work collaboratively, to agree to a methodology for setting bug resolution priorities, including, but not limited to, considering the severity of a bug. The Parties further agree to work collaboratively, to develop a set of achievable targets for the closure of items on the CAP lists as soon as practical within the first year of M&O.

With respect to SLAs, the Parties agree that final acceptance of agreed SLAs will be achieved 30 days after the effective date of this amendment.

7. Commercial Reference

ADCRR acknowledges that B&D has served as a vendor under the Contract and will confirm such in commercial references, orally and in writing, to B&D for upcoming Offender Management System opportunities on which B&D may bid. Offender Management System opportunities shall include any project or bid relating to any software system used in connection with the management of an inmate's incarceration, probation, or parole, or any component thereof, whether public, private, federal, state, local, or municipal, located within the United States of America. Subject: Leadership Meeting Schedule
Date: Monday, April 20, 2020 11:29:51 AM
Attachments: image003.png

Good afternoon,

I wanted to follow up on the schedule for our weekly meetings. Will Friday's @10:30 work moving forward? I will set a re-occurring schedule and send out an invite. Do we also want to leave the meeting as a call in where I call Holly's office line?

Thank you.

Subject: Ad Hoc Report name standardization/update

Hi Charles,

We discussed removing duplicate SB1310 reports and standardizing the names of ad hoc reports to be more consistent with the B&D report naming convention. Attached is a breakdown of our requested naming changes. We do not request an update to stored procedure names; just the report names and descriptions as they appear to our ACIS users. Thank you.

Gentlemen-

This level of debate should never include the broader audience. In the future, scale the audience back to yourselves and include me and Sandy.

For this, please get a meeting scheduled so the proper individuals can talk through the issue. This discussion should include me and Sandy. Once we get through the debate, then we can rope other in if needed.

Subject: ACIS High Severity Bug submitted (#42162)

I wanted to keep everyone in the loop on this one. This past weekend it was discovered that Community Violence Risk Level is being calculated incorrectly. It is important to note this score was being calculated correctly prior to this. This is having a significant impact on Time Comp and OIU's.

During a discussion with Charles and Hagay, it was first thought this was a data migration issue and we would lower the severity to medium. Given the more detailed explanation I recieved, it is ADCRR's position that this is still a High severity bug.

As indicated, Hagay knows the priority that ADCRR places on this bug and B&D is working it appropriately.

Definition of High Severity:

AMERICAN OVERSIGHT

Is a major function in the app severely restricted with no workaround
but other functions operate correctly and users can continue using the system?

My recent TFS comments:

I am being told from the SME that this is more than a data migration issue and is impacting many inmates all of a sudden. I believe they are saying that the scores were correct before but now are no longer. This errant change occurred sometime over this past weekend. Here is what I was told:

"This Bug is affecting a lot of inmates. I thought it was only incorrectly making inmates ineligible for Transition due to not assessing the Community Violence Risk Level accurately, but it is also making inmates Eligible for Transition Program when they shouldn't be. Time Comp is receiving many emails and calls from OIU's asking why the inmate was eligible at one point and now ineligible when the inmate meets all criteria. I don't see how this is a migration issue when to me it's more like an issue with the eligibility workflow process"

If there is additional information to consider, we can continue to discuss changing the severity of this bug.

Warm Regards,
Spencer Scott, PMP

Hi Charles-

I have some questions regarding the below message. When you schedule the recurring meeting with Sandy and I, I would like this topic and specifically item #3 to be part of the agenda for discussion. In addition to the below, I'd like to gain a better understanding regarding B&D's role in supporting ad-hoc reports.

Many thanks,

Holly

Aaron and Jeff,

I want to confirm the following items with your team.

1: Ad-Hoc Reports will continue on its weekly release schedule with all guidelines and deadlines remaining the same.

2: RPT-DEV Environment is refreshed bi-weekly with a current copy of Production. Please note the data is refreshed. The schedule is as follows:
4/25/2020
5/9/2020
5/23/2020
6/6/2020
6/20/2020
ETC

3: Please note the following concerns with non-standardized Production Releases.
releasing outside of the standard release schedule:
- is prone to errors
- requires extra work
  - requires someone to keep track of where items are in the release cycle
  - Requires lists to be provided when it's time to do a release of:
    - Changeset #'s that need to go to UAT
    - Changeset #'s that need to go to PROD
    - Report Names that need to be deployed to UAT
    - Report Names that need to be deployed to PROD

Requests for ADC
1: Standardize Naming Convention
2: Email messages sent to entire team (minus Keith)
3: Request for PROD Sign off by 5pm Thursday

From: Holly Greene on behalf of Holly Greene <hgreene@azadc.gov>
To: Charles Spannagel; Sandy Wang
Subject: ACIS Support
Date: Monday, April 13, 2020 12:34:23 PM

Hi Charles-

At some point, we need to move away from use of the BA's for ACIS support. We need folks from B&D or other vendors to begin standing on their own and really only using our teams as a touchstone for reference to process and policy.

Once you and Sandy have had your 1:1, I'd like for you to schedule a meeting for the three of us ot meet (let's do weekly every Tu and Th) to talk through open issues, plans for support and plans for future sustained support (this is not related to M&O).

Respectfully,

Holly Greene

Sandy,

In reading the comments below can George verify this was a report that was moved to ACIS? Thank you.

Charles, this ticket came in last week and seems that PIMA county stopped receiving this report since 11112019. Please investigate and let us know what we should reply to PIMA county.

AMERICAN OVERSIGHT

Hello,

We noticed that we have not received this report since 11/11/2019. I know there was an issue where my name was dropped off email threads, rcarolan@sc.pima.gov , from AOC and NICS. Could the same happened here?

Please let me know so that I start receiving these again. While we are at it, can you add our generic address for our DBAs as well. This will work better, and there will be no need to contact you in the future when we have staff changes. That email address is:

dg_ITSDDBA@sc.pima.gov plus add rcarolan@sc.pima.gov as well.

Thank you

There is no backfill for Jim as the mainframe is retired from an AIMS user, input and reporting perspective. I do have a person who may be able to help with understanding the legacy fields from the report of they are mainframe, but I don't believe that will help solve the issue because the data should be coming from ACIS or another source.

Subject: RE: ACJIS error report from DPS
Date: Friday, April 10, 2020 4:53:43 PM

I am not sure what the problem is from just reading this thread. I am aware that we get fingerprinting data from DPS via emails that get sent and an interface picks up and loads data into ACIS. Does this relate to that interface?

Thanks,
Aaron

Aaron,

Would you please read through the string below. I'm not familiar with this interface and how we can work towards a resolution. Is this interface something that works with AIMS?

Holly, I have included our Interface Manager-Lead Developer.

Thank you.

Charles Spannagel

Subject: PC review issue

Charles and Hagay,

Bug#42137 was submitted today by Marlene Coffee. While this is a TFS Medium, Priority 1, per our agreement, it is also a very important issue to prioritize. This has been escalated with our management team as an ongoing concern.

Marlene's message:
"We have ANOTHER corrupted PC review. There have been approximately 20 corrupted files now that we have to complete via paper process, then upload and enter at the PCU level once it is fixed. This invalidates the audit trail and may cause issues if we have to later defend the review in court. "

There is a trail of Linked bugs in TFS showing some of the history of this problem. Unfortunately, each time this has happened, the particular error was fixed but the underlying cause has not been remediated. We'd like to discuss this on Monday, sometime after the 11AM ACIS/ASET meeting.

Warm Regards,
Spencer Scott, PMP

Hi Joe,

Thanks again for the time this morning and I totally understand you being pulled into other things. I standby to pick up where we left off.

As requested I have attached the amendment 6 document and I draw your attention to section 2 which is the section that details the scope, I hope this helps.

Thanks

Dean

AMERICAN OVERSIGHT

AMENDMENT TO ADOC14-00003350/14-25-23

Pursuant to Section V.B of the September 25, 2013 Request for Proposal Number ADOC14-00003350/14-25-23 ("RFP"), the October 23, 2013 Proposal for Replacement of the Adult Inmate Management System, the May 13, 2014 Final Proposal Revision for Replacement of the Adult Inmate Management System, and the documents incorporated thereto (collectively, the "Contract"), the Arizona Department of Corrections ("ADC") and Business & Decision, North America, Inc. ("B&D") (together, the "Parties") hereby enter into this official Contract amendment (the "Amendment").

This Amendment is intended to amend, supplement, and modify the Contract. To the extent any terms in this Amendment conflict with any term in the Contract as it previously existed, it is the intent of the Parties that the terms of this Amendment shall control. However, the Parties reaffirm their respective responsibilities pursuant to the original Contract to the extent they are not modified by this Amendment. The Parties further agree that this Amendment may be executed in counterparts, effective immediately, upon both Parties signing.

1. Project Schedule

The Parties hereby agree that the remainder of the project shall be completed in accordance with the extended Gantt chart attached to this Amendment as Exhibit A.

B&D shall complete all reports and make them available and accessible in both the PROD and UAT environment for validation. B&D shall perform the preliminary Q&A of reports prior to releasing them in the designated testing environment. B&D shall promptly fix all High and Critical bugs identified and rerun the reports for ADC's verification. Certain B&D report writer staff shall co-locate with ADC staff during validation to expedite the process when appropriate and necessary for the project as mutually agreed by the parties. B&D shall assist ADC with End-to-End Testing, Interface Testing, UAT Testing, Sentence Calculation Testing, Data Migration Validation, and Report Validation, including, to the extent it is beneficial to the project and does not delay progress, by having certain of B&D's developers or business analyst(s) physically sit with the testers at a mutually agreed location on a mutually agreed schedule.

B&D and ADC shall report weekly on the progress of each other's activities. Both ADC and B&D shall use supplemental and summary reports to note progress on tasks that are to be completed for the Bug Fixes and associated QA Testing, System Interface development, CR-063 development, Data Migration development, and the Report development items. The detailed documentation of progress by each party on all bugs shall be recorded in TFS. TFS remains the system of record to which both ADC and B&D shall have full access.

2. Future Change Requests

The Parties agree that the current set of specifications as set forth in the functional specification documents ("FSDs"), including Change Request 63 ("CR-63"), form the "agreed upon scope of work" that will be delivered according to the mutually developed extended Gantt chart attached as Exhibit A. Any modification, including additions, to these specifications will be considered a change. To the extent that ADC reasonably believes it is necessary to request a

AMERICAN OVERSIGHT

change request, ADC agrees that it will provide reasonable compensation to B&D for such change request. To the extent there is any disagreement over whether a request constitutes a change request during the implementation phase, such dispute shall be resolved by Arizona Department of Administration – Arizona Strategic Enterprise Technology ("ADOA-ASET"), whose decision shall be final and binding on the Parties and not subject to any further administrative, judicial, quasi-judicial, or other review. ADOA-ASET shall act in good faith and exert its best efforts to expeditiously resolve the dispute so as to minimize any delay to the project implementation.

All future requests for change or modification of the agreed upon scope of work will be required to meet strict standards of quality and any misunderstanding will be worked through according to the contract. A change request must be evaluated under the quality of the specification requirements contained in the FSDs. All requirements should be clear and unambiguous. This will require a collaborative effort by both ADC and B&D, especially with Sentence Calculation that requires a superior subject matter understanding. Requirements should be complete, in that it should align with the needs of the stakeholders and not conflict with other requirements. To allow requirements to be adequately interpreted and used to build quality code, requirements should be concise. A requirement should also be testable, so that it can be verified that the requirement meets the needs of the business by way of multiple tiers of testing. Requirements which lack the key components defined above allow for some form of misinterpretation or assumptions, often resulting in solutions which do not meet the needs of the business. Functional Specifications requirements should be verified to validate that they not only meet the primary components of a quality requirement, but also that they truly meet the needs of the business, and are in alignment with departmental policies or regulatory requirements. Modelled requirements which insufficiently detail specific flows or paths through a process are typically missing one or more of these quality components and this should be identified during review of the requirements to ensure they align with operational needs. Thus, requirements which lack these key quality aspects should be viewed as potential change requests, as any modification required to them to ensure their quality will result in a modification of scope, whether this is to improve the atomicity, completeness, conciseness or testability of the requirements.

The reasonableness of compensation shall depend on the size, scope, complexity, risk assessment, and timing of the change request. Change requests and bug identification may be found at the end of projects, during the QA Testing, System Integration Testing, User Acceptance Testing, and Piloting phases, therefore it is incumbent upon both Parties to collaboratively and expeditiously resolve issues. ADC acknowledges that change orders made closer to the go-live date will necessitate reasonable compensation to maintain the go-live team until the new implementation date because such orders will require B&D to expend more resources to maintain the go live team. To the extent there is any disagreement over the reasonableness of compensation during the implementation phase, such dispute shall be resolved in writing by ADOA-ASET, whose decision shall be final and binding and not subject to any further administrative, judicial, quasi-judicial, or other review. ADOA-ASET shall act in good faith in reaching its decision.

DA KC

AMERICAN OVERSIGHT

AZ-DOC-21-0315-A-002973

The Parties further agree that change requests that result from relevant changes in the law, whether statutory or otherwise, constitute change requests for which B&D is entitled to reasonable compensation.

The Parties agree that change requests shall not alter, modify, or shorten the Maintenance and Operations Phase as amended in Section 4 below.

3. Sentence Calculation and Other Modules ("The System")

The Parties agree that ADC shall be responsible for reviewing the remaining FSDs in relation to the functionality of all Test Scripts that have not yet been tested, with collaboration from B&D. ADC is responsible for the final approval of all content of the FSD documents. ADC shall define how this is to be accomplished and reported quantified no later than December 14, 2018. B&D further agrees to review with ADC the correlation of FSDs and specifications between modules that may impact each other. B&D shall promptly provide ADC with all SIT (System Integration Testing) Results and a full Test Report, Test Cases, and a final Defect Report as defined in the Contract. Upon completion of review, the Parties will determine if current documentation is sufficient and whether there is any resultant impact on the agreed upon scope of work as defined in the Contract and Section 2 of this Amendment. To the extent there is an impact on the agreed upon scope of work, it shall constitute a change request.

In addition, Sentence Calculation Test Scripts run by ADC shall not result in any calculation errors, regardless of Bug Category. Modules will be elevated into Phase II status for preparation for End-to-End Testing. This is contingent upon the testing scripts achieving and consistently maintaining throughout the remainder of the project, including Go-Live, an 85% or higher passing rate. Acceptance criteria is based on no critical or high bugs.

4. Maintenance and Operation Phase

The Parties agree that the Maintenance and Operations Phase ("M&O Phase") shall last for seven (7) years commencing upon the start of operations, commencing in accordance with the terms of the Contract.

The Parties agree to hereby reaffirm their respective responsibilities pursuant to the original Contract.

5. Compensatory Payments

The Parties agree that, as compensation for work performed to date and to be performed in the future ADC will pay B&D: (i) $500,000.00, payable by no later than November 26, 2018; and (ii) an additional $2.8 million for the M&O Phase, which brings the total amount of the M&O Phase to $13,825,294.31, to be paid in annual installments at the beginning of each year of the M&O Phase (initial installment schedule plus $400,000.00 per year for the seven years).

The compensation addressed in this Section 5 shall include work to be performed pursuant to the general concept agreed to by the Parties for CR-63, provided, however, that B&D reserves the right to seek resolution and/or relief from ADOA under Section 2 should any disputes arise after ADC provides B&D with the specific requirements of CR-63. If B&D seeks

DA KS

AMERICAN OVERSIGHT
AZ-DOC-21-0315-A-002974

resolution, it will provide ADOA with evidence of any difference between the general concept that was used to cost CR-63, compared to the final signed-off version of the CR-63 specification.

The Parties agree to hereby reaffirm their respective responsibilities pursuant to the original Contract.

The Parties acknowledge that there have been certain disputes relating to testing, change requests, and project delays (the "Disputes"). The Parties agree that in consideration of the provisions of this Amendment and any compensation under this Section, each Party forever and unconditionally releases the other from any and all claims relating to the Disputes, known or unknown, from project inception (July 29, 2014) to the date of signing this Amendment. The Parties further agree that, by entering into this Amendment, neither party is admitting fault or liability in any way relating to the Disputes.

6. Collaboration and Governance

The Parties agree to exchange weekly status reports documenting their progress on their respective tasks, including, but not limited to, ADC's development of an interface testing plan, a data migration validation plan, a UAT testing plan, and an end-to-end test plan; ADC's progress of UAT testing; and B&D's progress of bug fixing.

With regard to the pre-requisite conditions for formal acceptance of a module, the Parties agree that there shall be no "critical and/or "high" bugs. In determining whether these pre-requisite conditions have been met, the Parties shall consider the functional impact of any bugs on both testing progress and application readiness on a scale of 1-Critical, 2-High, 3-Medium and 4-Low, as follows:

- 1-Critical is defined as: The entire system is not operational or the use of system is severely impacted by non-operational functions and there is no workaround available.

- 2-High is defined as: The operation of a major function in the application is severely restricted with no workaround for that function, but other functions operate correctly and users can continue using the system. In the case of the sentence calculation module, any defect that could result in a release error shall be considered high.

- 3-Medium is defined as: The operation of a function in the application is restricted but use of other functions is not impacted or where a requirement is not being met, but the application is otherwise usable. For example, a missing field or missing sections, which do not prevent additional functionality from being used.

- 4-Low is defined as: There is a minor problem, which does not impact the use and operation of the function(s). For example, misspelled words, graphical designs, etc.

For items that ADC identifies as a bug, B&D will review the current FSDs (that have superseded all previous copies) and determine if it agrees with ADC's determination. In conducting this review, B&D agrees to confer in good faith with ADC staff to have them replicate their observation. If B&D disagrees, it will document its bug explanation in TFS and send the bug back to ADC to reconsider with the tag: "Not in FSD". ADC will review B&D's

DX KS

AMERICAN OVERSIGHT

documentation and if it disagrees with B&D's determination, ADC will review the current FSDs (that have superseded all previous copies) and highlight the pieces of the FSD that substantiate that it is a bug by documenting this in TFS and sending it back to B&D. Upon review if B&D still believes it is not a bug, it will be sent to ADOA-ASET for resolution, whose decision shall be final and binding on the Parties and not subject to any further administrative, judicial, quasi-judicial, or other review. ADOA-ASET shall act in good faith in reaching its decision.

The Parties agree to strict project management governance in relation to the tasks assigned to their respective resources. Both Parties further commit in good faith to providing the necessary and appropriate resources to the overall project, including assigning co-located staff at a single agreed-upon site.

7. User Acceptance Testing

The Parties agree to hereby reaffirm their respective responsibilities pursuant to the original Contract. ADC and B&D agree to collaborate in good faith to manage the UAT process.

The Parties further agree that ADC will assign a primary Test Manager to coordinate and report the progress of the overall UAT activities to the project management team, including the B&D project manager. ADC shall provide B&D a copy of the test scenarios upon request. To the extent there is any disagreement over UAT activities, such dispute shall be resolved by ADOA-ASET, whose decision shall be final and binding on the Parties and not subject to any further administrative, judicial, quasi-judicial, or other review. ADOA-ASET shall act in good faith in reaching its decision.

8. Go-Live Decision

The Parties agree that for End-to-End Testing, Perryville Pilot, and Statewide Go-Live to proceed, there must be an achieved and consistently maintained 85% pass rate and no high or critical bugs. All Reports and Data migration shall also be 100% complete before End-to-End testing, Pilot, and Go-Live.

The parties agree that the Final Data Migration payment, pursuant to the original Contract, will not be paid until final Data Migration sign-off by ADC.

Subject: Re: Low Hanging Fruit

Thank you Dean.

What medium work for you to meet?

Joe

> As discussed on the phone today; here is a list of items that we feel, from our BA's spending time on site, are the 'low hanging fruit' items that would massively improve the end user experience. In a bid to get started on the improvements, we feel that these items could be delivered in about 2000hrs or less. Clearly, a more formal definition of the effort shall be derived, much in the same way change notes have been estimated in the past, and we will only consume those hours actually needed. I have also added the recent arbitration item, that has just been ruled upon, to the list. All in all this is a list of items that we could commence immediately once we have a signed amendment.

Item	Additional Note
Allowing the manage participating hours database field to accept one decimal	Resolves a financial issue regarding partial hours payments which could be a significant saving for ADCRR.
Enable role based configurable screens to enable one user to complete the full review	Classification and Discipline reviews – This enables staff to complete multiple reviews without switching screens.
Visual indicator of the user viewing data in an inmates previous incarceration episode	Adding an indicator so user can see if they are viewing historical data.
Visual indicator for the user to see if the inmate has any victims associated with their case	Suggested approach is to add this to the application banner.
Easy way to quickly identify the assigned COIII case manager	Suggested approach is to add this to the application banner.
Architecture change to adjust the number of application post backs	Post Back is the number of times the web page needs to communicate with the server.
Design and create an "Inmate History Report" that shows pertinent inmate information they need	Created in the Reporting Solution and will show all discipline violations, STG and Current classification scoring data related to the inmate. A once stop report for the inmate.
Redesign of the 'Prior and current offenses list' on the Classification, Arrest	Proposed solution may include replacing pagination with scroll or expand\collapse

AMERICAN OVERSIGHT

and Escape History screens	panels.
Post backs in the Visitation module	Reduce the number of post backs in the visitation module.
Redesign Rule Violation Summary to be none episodic	Display the entire inmates history as opposed to the current incarceration.
Redesign of the Arrest & Escape History screen	Proposed solution may include replacing pagination with scroll or expand\collapse panels.
Arbitration item 41574	Recently ruling on this item concluded that it should be a change.

Thanks

Dean

Dean,

I believe I can do 10. Let me see if I can move some things around. As I do, please send me the information you spoke of regarding those low hanging fruits that have been identified as problematic which solution and outcomes have been mapped out. This will aid in my understanding of perspective, problems and solutions in anticipate of our conversation.

Thank you,

Joe

Subject: Reports ready to deploy; follow up regarding 3160

Good morning, I hope everyone on the email is well. I've done UAT testing for the week and I'm looking forward to our 11AM call. I've updated the SharePoint list to reflect the results.

Reports to re-promote from RPTDEV at the first opportunity:

- 3040 BOEC Agenda (trdp file only)

Reports/stored procedures passing UAT and ready to promote to PROD:

- ADC RPT 3130 Tier 4 Huddle Board Measure SCC Recidivism
- RPT 3190 Veterans
- RPT 3060 Release Audit
- ADC RPT 3110 Absolute Discharge

Updated stored procedures passed UAT and ready to promote to PROD:

- ADC_FETCH_SB1310_PART_B

AMERICAN OVERSIGHT

- ADC_SB1310_PART_A_V2

Follow up requested: did ADC RPT 3160 not make it to UAT as planned?

I didn't get an answer either, and we didn't have a B&D rep on the call.

Charles-

I would like a status update on this. We're talking about thousands of records that Eli needs to sort through, This is not an action item which ADCRR should be responsible in performing nor correcting.

Hi Sandy-

Please take point to ensure proper assignment of this review task and see this one to resolution. Recruit members of your team to help drive this one.

Respectfully,

Holly Greene

Subject: Re: eOMIS Data Review

Perhaps I need more education on this because I'm still not sure why ADCRR IT is still the middle person. Why are B&D and Marquis not talking to each other and then bringing an ADCRR SME into the conversation when needed? In this scenario, what is the value add of ADCRR troubleshooting first before engaging our support entity for ACIS? I don't want work to stop, but I'd like to revisit the ownership of this work to ensure that it's being appropriately managed.

Charles - I'd like B&D's input on the support of this specific piece.

> Hi Holly,
>
> I've been involved as sort of the middle person between B&D and Marquis. I have been doing the troubleshooting to figure out if the issue is on B&D's side, Marquis side, or if it's a training issue on Centurion's side. The data isn't always correct coming from Marquis and so the problems sometimes need to be fixed with eOMIS rather than ACIS. In those cases I do not even get B&D involved unless it's a change that needs to be coordinated on both sides. I've was back and forth with Dwight regarding the issue of whose responsibility it is to troubleshoot the failures so I've just been continuing to work with both B&D and Marquis on issues that come in for now. I get a daily report from B&D that has the failures but it's in a PDF and it also includes all of the messages that have successfully processed (which is thousands of messages) so it's hard to filter out just the fails. The report that Aaron created for me will provide just the failures and nothing else. B&D receives the failures in an email but it's not just specific to eOMIS, it's for any failure in ACIS and so I do not want that email because then I'll have the same problem of sorting out which ones I need to look at. We are down to just a handful of issues now with the eOMIS interface so the report will help to narrow those down so that I can see what's left out there.

Hi Holly,

I trust your are safe and well?

The only real change on the B&D side is that Charles is, as we had always planned, taking on the day to day management of support as a transition from Thad on the implementation project. All day to day communication and management should be channeled through Charles.

Chris Little left us a few weeks back on the QA front, and we are working on our replacement for his role as QA manager, we will keep you updated.

Thanks

Dean

Holly, we have incorporated George's information into the ITAC presentation.

The only issue remains is who can and who should update the production data, in this case, Enforcer data (because the interfaces are not working properly).

AMERICAN OVERSIGHT

As you know, with Dwight's departure, I'm becoming more immersed in what the teams are working on together.

That said, I'd like to understand why data is being changed in the ACIS production environment (still).

I need to understand what the issue is; who should be supporting the resolution of this; and why folks are changing data in production as this should never happen outside of normal input into the system by the COs or other uses...(?).

Please provide a joint response to me before COB today (4/6).

40049409_3.docx
Exhibit 2 to Amendment 9.pdf

Hello Ken,

Thank you for this draft. I have, as promised, consulted with Orange and our legal counsel and they have edited the proposed amendment with our comments. I provide for your review the following documents:

1. PHX-#8644617-v1-BD__Amendment_9 Final - 40049409_3.pdf – which is a redlined version for your ease of review.
2. 40049409_3.docx – which is a 'flattened' version of the amendment with all changes incorporated.
3. Exhibit 2 to Amendment 9.pdf – which is an updated copy of the SLA document Exhibit G

As you can see these are not 'wholesale' changes to your version, but there are a number of notable items that we have edited. I remain available, and encourage, the opportunity to walk you through these items, so that we can understand each parties point of view.

Please let me know if you have time this afternoon?

Thanks

Dean

EXCEPTIONS TO EXHIBIT G – SERVICE LEVEL AGREEMENTS

1) A portion of the Description of the System Availability / Reliability SLA will change from:

• No more than ten (10) consecutive outages in any week.

to:

• No more than two (2) consecutive outages in any week.

The remainder of this SLA will remain as stated in Exhibit G.

2) Replace the Description of the Security SLA in its entirety with the following (while leaving the remainder of this SLA as stated in Exhibit G):

- Password security will comply with State (and ADCRR) Standards and Policies.
- Additional Standards and Policies: after three unsuccessful login attempts the account will become locked.
- Offeror will comply with 45 CFR Part 160 and 164, Subparts A and C, due to the presence of protected health information within the system.
- Offeror must provide notice to ADCRR of any use or disclosure of PHI/ePHI that is not authorized by the Contract, by law, or in writing by ADCRR, without delay, and in no case later than 5 days after the Business Associate learns of such unauthorized use or disclosure.
- 100% of the time the system will be protected by a Web Application Firewall, unless written approval is provided by ADCRR to perform vulnerability assessments and penetration tests.
- Offeror will perform auditing of all user actions which includes, but is not limited to; password resets, role changes, information modification/addition/removal, user login and logout activity.
- These audit logs must have a full record of the last 60 days minimum.
- Offeror will run Anti-virus/spyware software on all devices capable of having the software installed.
- Offeror will perform logging of all network traffic to the system and retain a minimum of 60 days of logs.
- Offeror will apply security updates in compliance with State (and ADCRR) Standards and Policies and follow proper testing and change control prior to implementation.
- All security incidents must be reported to ADCRR in writing and by telephone within 5 business days of discovery.
- Offeror shall take immediate action to prevent further security incidents and remediate vulnerabilities, implement approved compensating controls, and address additional system weaknesses within 10 business days of discovery.
- Offeror will cooperate with ADCRR vulnerability management and comply with all State (and ADCRR) Standards and Procedures.
- Offeror must host the system on an FedRAMP moderate impact level authorized, government-related, single tenant compliant platform.
- Offeror must provide logs and access to security controls within 2 business days of an ADCRR request.

AMERICAN OVERSIGHT

AMENDMENT NO. 9 TO ADOC14-00003350/14-25-23

Pursuant to Section V.B of the September 25, 2013 Request for Proposal Number ADOC14-00003350/14-25-23 ("RFP"), the October 23, 2013 Proposal for Replacement of the Adult Inmate Management System, the May 13, 2014 Final Proposal Revision for Replacement of the Adult Inmate Management System, and the documents incorporated thereto (collectively, and with all other written amendments, the "Contract"), the Arizona Department of Corrections, Rehabilitation and Reentry ("ADCRR") and Business & Decision, North America PA, Inc. ("B&D") (together, the "Parties") hereby enter into this ninth official Contract amendment (the "Amendment"). This Amendment is intended to amend, supplement, and modify the Contract. To the extent any terms in this Amendment conflict with any term in the Contract as it previously existed, it is the intent of the Parties that the terms of this Amendment shall control. However, the Parties reaffirm their respective responsibilities pursuant to the Contract to the extent they are not modified by this Amendment. The Parties further agree that this Amendment may be executed in counterparts, effective immediately, upon both Parties signing. Undefined capitalized terms are as defined in this Amendment or the Contract.

1. Definitions

   a. "Parking Lot" means the list of system functionality gathered by ADCRR throughout system development and that were not part of the Go-Live Solution scope.

   b. "Business Analyst" means an individual trained to analyze an organization or business function and document its processes or systems to help guide improvements in processes, products, services and technology.

   c. "Effective Date" means the date on which the Amendment has been signed by both parties.

   d. "ADCRR" refers to the Arizona Department of Corrections Rehabilitation and Reentry, and includes, for purposes of this Amendment, any third party it appoints in relation to fulfilling its obligations under this Amendment.

2. Commencement of the M&O Phase

In accordance with Section III.D.10 of the RFP and Amendment No. 8, the Parties agree that the Maintenance and Operations Phase (the "M&O Phase") shall be deemed to have commenced on February 21, 2020. ADCRR agrees to wire to B&D the first M&O Phase monthly payment in the amount of $157,898.50 on or before three business days after the Effective Date and in the future pay the invoices for the M&O Phase according to the contractual terms.

3. Final Acceptance of the Solution

The Parties acknowledge and agree that ADCRR's final acceptance of the Solution shall be deemed to have been on January 15, 2020. The Parties agree to further memorialize the acceptance by signing the Certificate of Acceptance attached as **Exhibit 1**. ADCRR further

AMERICAN OVERSIGHT

agrees that it will pay to B&D the following amounts on or before three business days after the Effective Date (a) the remaining invoice for the Implementation Phase, which totals $318,081.40; and (b) $948,973.20, representing the ten percent (10%) retainers collected pursuant to Section VI.C.1 of the RFP. No late fees have been assessed, paid, or will be paid. By paying the amounts specified in this paragraph, ADCRR has fulfilled its contractual payment responsibilities for the Implementation Phase as well as the release of retained amounts pursuant to VI.C.1. of the Contract.

4. Mutual Release

The Parties acknowledge that there have been certain disputes relating to testing, change requests, project delays, the conclusion of the Implementation Phase, the commencement of the M&O Phase, the "Parking Lot" issues, the claims raised in B&D's March 4, 2020 Notice of Claim, and any and all disputes or potential disputes related to the Solution through and including the Effective Date (the "Disputes").

The Parties agree that in consideration of the provisions of this Amendment and any compensation under this Amendment, each Party forever and unconditionally releases the other from any and all claims relating to the Disputes, known or unknown, from project inception (July 29, 2014) to the Effective Date. B&D agrees that with this Amendment, its March 4, 2020 Notice of Claim is moot and immediately withdrawn upon the Effective Date. The Parties further agree that, by entering into this Amendment, neither party is admitting fault or liability in any way relating to the Disputes.

The Parties agree that any claims or Disputes released as part of this Mutual Release, or previously released, shall not serve as predicates for claims, if any, against the Performance Bond pursuant to Section V.R.17 of the RFP. The Parties further agree that the End-User Improvement List ("EUIL"), as defined in Section 7 below, is not part of the Implementation Phase, and any disputes related to the EUIL cannot therefore serve as predicates for claims against the Performance Bond pursuant to Section V.R.17 of the RFP. Subject to the clarifications in this Paragraph, the Parties confirm their commitment to the contractual obligations and rights related to the Performance Bond as specified in Section V.R.17.

5. Quarterly Executive Reviews

The Parties agree to conduct quarterly executive reviews throughout the M&O Phase to monitor the status of the M&O services and the Service Level Agreements ("SLAs"). The Parties agree that ADC and B&D shall be in attendance at these reviews.

6. End-User Improvements & Remediation Hours

An End-User Improvement List ("EUIL") will be drawn up by mutual agreement between ADCRR and B&D. The goal of the EUIL is to ensure a meaningful impact on the aggregate ADCRR end-user experience.

The Parties agree that B&D will deliver items off the EUIL free of charge, subject to a total cap of 10,000 man-hours ("Additional Remediation Hours") in the 12 month period from the Amendment's Effective Date. B&D agrees that it will provide these Additional Remediation

AMERICAN OVERSIGHT
AZ-DOC-21-0315-A-003154

Hours, separate from, and concurrently with, the 10,000 man-hours B&D is required to provide yearly as part of the M&O Phase under the Contract (the "Annual Hours").

The Parties will iteratively develop the EUIL with monthly additions to the EUIL in the first 4 to 6 months after the Amendment's Effective Date. The goal will be to identify and resolve ADCRR authorized items on the approved EUIL as quickly as possible (e.g., utilization of the full 10,000 Additional Remediation Hours within 6 months against the prioritized EUIL). The Parties agree that B&D will provide a target of the equivalent of 10 FTEs, or more, (in addition to the FTEs B&D will utilize to satisfy its M&O responsibilities) to provide the Additional Remediation Hours and as may be needed to exhaust the remaining 10,000 Annual Hours provided for in the initial M&O Phase.

ADCRR and B&D have provided and will continue to provide Business Analysts to gather ADCRR user feedback and identify the primary issues users are facing in utilization of the system. This information will be validated with ADCRR Business Owners.

The following monthly procedure will be implemented (clock starting every 30 calendar days after signature of the contract amendment) to assure the right items are being prioritized and resolved to impact user satisfaction:

- By or before the 10th Business Day: ADCRR and B&D, will present a list of proposed items for the EUIL for estimation.
- By or before the 15th Business Day: B&D will define and provide to ADCRR the effort and man-hours associated with each proposed item for the EUIL. B&D will also provide a forecast of the available FTEs for the following month.
- By or before the 20th Business Day: ADCRR, with support from B&D, will choose from the proposed and estimated items, which items will be added to the EUIL (with the acceptance criteria for each item defined) and will make sure that the number of selected items utilizes the B&D FTEs at full capacity.
- ADCRR shall submit the first month's EUIL items by no later than May 10, 2020.

This process will repeat monthly. During some months more items will be selected than others. The parties acknowledge that some of the items on the finalized EUIL will take more than one month to develop. The Parties agree that B&D shall deliver each item off of the EUIL into User Acceptance Testing and notify ADCRR of each delivery. Should ADCRR fail to accept, reject, note pending other bugs, or test an item within thirty (30) days of notification of delivery, that item shall be deemed accepted.

It is the intent of the Parties that the EUIL will fully resolve ADCRR's concerns and disputes of the product's functionality. However, any items remaining on the EUIL, once the Additional Remediation Hours are exhausted, may or may not be prioritized by ADCRR and resolved utilizing the Annual Hours or in the future at ADCRR's sole discretion.

In the first year following the development of the EUIL, the Parties will simultaneously work on the following (with priorities determined by ADCRR): the CAP Plan, the EUIL and other system changes utilizing the Annual Hours. If any hours remain at the end of the first year from the Annual Hours, these hours shall carry over for use in the second year of M&O.

AMERICAN OVERSIGHT

The parties recommit to the bug/change qualification process set forth in Amendment No. 6 during the M&O Phase.

7. CAPs and SLAs

The Parties reaffirm that Corrective Action Plans ("CAPs") are a component of the M&O Phase requiring remediation at no additional charge to ADCRR. The Parties further agree to work collaboratively, to agree to a methodology for setting bug resolution priorities, including, but not limited to, considering the severity of a bug. The Parties further agree to work collaboratively, to develop a set of achievable targets for the closure of items on the CAP lists as soon as practical within the first year of M&O.

With respect to SLAs, the Parties agree that the SLAs set forth in **Exhibit 2** govern.

8. Commercial Reference

ADCRR acknowledges that B&D has served as a vendor under the Contract and will confirm such in commercial references, orally and in writing, to B&D for upcoming Offender Management System opportunities on which B&D may bid. Offender Management System opportunities shall include any project or bid relating to any software system used in connection with the management of an inmate's incarceration, probation, or parole, or any component thereof, whether public, private, federal, state, local, or municipal, located within the United States of America.

8. Point of Contact

B&D will make the Mi-Case President of B&D (Dean Allen) the main point of contact relating to this Contract, as amended, and any major escalations will be directed, but not limited to, to the chairman of B&D (Pierre Louis Biaggi) as next level decision maker.

9. COVID-19

The Parties agree that disruptions caused by the COVID-19 virus and its associated events, including but not limited to business or government shut-downs, may constitute a force majeure event, governed by Section 6.4-6.4.4 of the Contract's Uniform Terms and Conditions.

CERTIFICATE OF FINAL ACCEPTANCE

The Arizona Department of Corrections ("ADCRR") and Business & Decision, North America PA, Inc. ("B&D") hereby agree, certify, and acknowledge that ADCRR formally accepted from B&D the "Solution" required by Contract No. ADOC14-00003350/14-25-23 on January 15, 2020.

The Parties further agree that, pursuant to Section V.R of the September 25, 2013 Request for Proposal Number ADOC14-00003350/14-25-23, the Performance Bonds submitted by B&D shall not remain in effect later than January 14, 2021.

Dated: _____, 2020

AMERICAN OVERSIGHT

AMENDMENT NO. 9 TO ADOC14-00003350/14-25-23

Pursuant to Section V.B of the September 25, 2013 Request for Proposal Number ADOC14-00003350/14-25-23 ("RFP"), the October 23, 2013 Proposal for Replacement of the Adult Inmate Management System, the May 13, 2014 Final Proposal Revision for Replacement of the Adult Inmate Management System, and the documents incorporated thereto (collectively, and with all other written amendments, the "Contract"), the Arizona Department of Corrections, Rehabilitation and Reentry ("ADCRR") and Business & Decision, North America PA, Inc. ("B&D") (together, the "Parties") hereby enter into this ninth official Contract amendment (the "Amendment"). This Amendment is intended to amend, supplement, and modify the Contract. To the extent any terms in this Amendment conflict with any term in the Contract as it previously existed, it is the intent of the Parties that the terms of this Amendment shall control. However, the Parties reaffirm their respective responsibilities pursuant to the Contract to the extent they are not modified by this Amendment. The Parties further agree that this Amendment may be executed in counterparts, effective immediately, upon both Parties signing. Undefined capitalized terms are as defined in this Amendment or the Contract.

~~After exhausting all other reasonably available efforts, ADCRR believes that this Amendment is necessary given the troubled history of this contractual relationship. In May 2014, in consideration of, among other things, ADCRR's payment of approximately $16 Million, B&D represented that it would build and provide to ADCRR by December 2016 a fully functional replacement of ADCRR's Adult Inmate Management System. B&D failed to do so. It was not until November 2019 that the replacement system hobbled to a go-live status, but it was riddled with a multitude of major functional deficiencies which required ADCRR to create an equal multitude of work-arounds just to render the system relatively workable. Under B&D's threat of abandoning the project, ADCRR paid B&D an additional $4 Million. This Amendment therefore is necessary to address all the still existing and future functional deficiencies on this project which has come in three years late and at least $4 Million over budget.~~

1. Definitions

   a. "Parking Lot" means the list of ~~desired~~ system functionality gathered by ADCRR throughout system development and ~~which may still be implemented~~that were not part of the Go-Live Solution scope.

   b. "Business Analyst" means an individual trained to analyze an organization or business function and document its processes or systems to help guide improvements in processes, products, services and technology.

   c. "Effective Date" means the date on which the Amendment has been signed by both parties.

   d. "ADCRR" refers to the Arizona Department of Corrections Rehabilitation and Reentry, and includes, for purposes of this Amendment, any third party it appoints in relation to fulfilling its obligations under this Amendment.

2. Commencement of the M&O Phase

AMERICAN OVERSIGHT

In accordance with Section III.D.10 of the RFP and Amendment No. 8, the Parties agree that the Maintenance and Operations Phase (the "M&O Phase") shall be deemed to have commenced on February 21, 2020. ADCRR agrees to wire to B&D the first M&O Phase monthly payment in the amount of $157,898.50 on or before three business days after the Effective Date and in the future pay the invoices for the M&O Phase according to the contractual terms.

3. Final Acceptance of the Solution

The Parties acknowledge and agree that ADCRR's final acceptance of the Solution shall be deemed to have been on January 15, 2020. The Parties agree to further memorialize the acceptance by signing the Certificate of Acceptance attached as **Exhibit 1**. ADCRR further agrees that it will pay to B&D the following amounts on or before three business days after the Effective Date (a) the remaining invoice for the Implementation Phase, which totals $318,081.40; and (b) $948,973.20, representing the ten percent (10%) retainers collected pursuant to Section VI.C.1 of the RFP. No late fees have been assessed, paid, or will be paid. By paying the amounts specified in this paragraph, ADCRR has fulfilled its contractual payment responsibilities for the Implementation Phase as well as the release of retained amounts pursuant to VI.C.1. of the Contract.

4. Mutual Release

The Parties acknowledge that there have been certain disputes relating to testing, change requests, project delays, the conclusion of the Implementation Phase, the commencement of the M&O Phase, the "Parking Lot" issues, the claims raised in B&D's March 4, 2020 Notice of Claim, and any and all disputes or potential disputes related to the Solution through and including the Effective Date (the "Disputes"). ~~This Mutual Release does not release B&D from fulfilling its contractual obligations related to the Performance Bond, pursuant to Section V.R of the Contract.~~

The Parties agree that in consideration of the provisions of this Amendment and any compensation under this Amendment, each Party forever and unconditionally releases the other from any and all claims relating to the Disputes, known or unknown, from project inception (July 29, 2014) to the Effective Date. B&D agrees that with this Amendment, its March 4, 2020 Notice of Claim is moot and immediately withdrawn upon the Effective Date. The Parties further agree that, by entering into this Amendment, neither party is admitting fault or liability in any way relating to the Disputes.

The Parties agree that any claims or Disputes released as part of this Mutual Release, or previously released, shall not serve as predicates for claims, if any, against the Performance Bond pursuant to Section V.R.17 of the RFP. The Parties further agree that the End-User Improvement List ("EUIL"), as defined in Section 7 below, is not part of the Implementation Phase, and any disputes related to the EUIL cannot therefore serve as predicates for claims against the Performance Bond pursuant to Section V.R.17 of the RFP. Subject to the clarifications in this Paragraph, the Parties confirm their commitment to the contractual obligations and rights related to the Performance Bond as specified in Section V.R.17.

5. Quarterly Executive Reviews

AMERICAN OVERSIGHT
AZ-DOC-21-0315-A-003161

The Parties agree to conduct quarterly executive reviews throughout the M&O Phase to monitor the status of the M&O services and the Service Level Agreements ("SLAs"). The Parties agree that ADC and B&D shall be in attendance at these reviews.

6. ~~5.~~ End-User Improvements & Remediation Hours

An End-User Improvement List ("EUIL") will be ~~developed~~drawn up by mutual agreement between ADCRR ~~(with support from B&D) and a third party selected by ADCRR ("Third Party").~~ and B&D. The goal of the EUIL is to ensure a meaningful impact on the aggregate ADCRR end-user experience ~~and to ensure the delivered Solution is fully functional and meets the needs of this mission-critical, public safety Solution procured by ADCRR~~.

The Parties agree that B&D will deliver items off the EUIL free of charge, subject to a total cap of 10,000 man-hours ("Additional Remediation Hours") in the 12 month period ~~following the development of the EUIL~~from the Amendment's Effective Date. B&D agrees that it will provide these Additional Remediation Hours, separate from, and concurrently with, the 10,000 man-hours B&D is required to provide yearly as part of the M&O Phase under the Contract (the "Annual Hours").

~~After the EUIL is developed, the~~The Parties ~~and Third Party will engage in~~will iteratively develop the EUIL with monthly ~~meetings to make~~ additions to the EUIL~~.~~ in the first 4 to 6 months after the Amendment's Effective Date. The goal will be to identify and resolve ADCRR authorized items on the approved EUIL as quickly as possible (e.g., utilization of the full 10,000 Additional Remediation Hours within 6 months against the prioritized EUIL). The Parties agree that B&D will provide a target of the equivalent of 10 FTEs, or more, (in addition to the FTEs B&D will utilize to satisfy its M&O responsibilities) to provide the Additional Remediation Hours and as may be needed to exhaust the remaining 10,000 ~~M&O hours~~Annual Hours provided for in the initial M&O Phase.

ADCRR and B&D ~~has~~have provided and will continue to provide Business Analysts ~~to work with ADCRR and the Third Party~~ to gather ADCRR user feedback and identify the primary issues users are facing in utilization of the system. This information will be validated with ADCRR Business Owners.

~~Following the development of the EUIL, the~~The following monthly procedure will be implemented ~~to ensure~~(clock starting every 30 calendar days after signature of the contract amendment) to assure the right items are being prioritized and resolved to impact user satisfaction:

- By or before the 10th Business Day: ADCRR~~, the Third Party,~~ and B&D, will present a list of proposed items for the EUIL for estimation.
- By or before the 15th Business Day: B&D will define and provide to ADCRR ~~and the Third Party~~ the effort and man-hours associated with each proposed item for the EUIL. B&D will also provide a forecast of the available FTEs for the following month.
- By or before the 20th Business Day: ADCRR, ~~the Third Party, and~~with support from B&D, will choose from the proposed and estimated items, which items will be added to the EUIL (with the acceptance criteria for each item defined)~~.~~ and will make sure that the number of selected items utilizes the B&D FTEs at full capacity.

AMERICAN OVERSIGHT

- ADCRR shall submit the first month's EUIL items by no later than May 10, 2020.

This process will repeat monthly~~, following development of the EUIL~~. During some months more items will be selected than others. The parties acknowledge that some of the items on the finalized EUIL will take more than one month to develop. The Parties agree that B&D shall deliver each item off of the EUIL into User Acceptance Testing and notify ADCRR of each delivery. Should ADCRR fail to accept, reject, note pending other bugs, or test an item within thirty (30) days of notification of delivery, that item shall be deemed accepted.

It is the intent of the Parties that the EUIL will fully resolve ADCRR's concerns and disputes of the product's functionality. However, any items remaining on the EUIL, once the Additional Remediation Hours are exhausted, may or may not be prioritized by ADCRR and resolved utilizing the ~~annual 10,000 hours~~Annual Hours or in the future at ADCRR's sole discretion.

In the first year following the development of the EUIL, the Parties~~, with the assistance of the Third Party, will begin to~~ will simultaneously work on the following (with priorities determined by ADCRR): the CAP Plan, the EUIL and other system changes utilizing the ~~annual 10,000 hours~~Annual Hours. If any hours remain at the end of the first year from the ~~annual 10,000 hours~~Annual Hours, these hours shall carry over for use in the second year of M&O.

The parties recommit to the bug/change qualification process set forth in Amendment No. 6 during the M&O Phase.

7. ~~6.~~ CAPs and SLAs

The Parties reaffirm that Corrective Action Plans ("CAPs") are a component of the M&O Phase requiring remediation at no additional charge to ADCRR. The Parties further agree to work collaboratively, ~~with the assistance of the Third Party,~~ to agree to a methodology for setting bug resolution priorities, including, but not limited to, considering the severity of a bug. The Parties further agree to work collaboratively~~, with the assistance of the Third Party~~, to develop a set of achievable targets for the closure of items on the CAP lists as soon as practical within the first year of M&O.

With respect to SLAs, the Parties agree~~,~~ that the SLAs set forth in **Exhibit** ~~G to the Contract~~**2** govern~~, except as specified in **Exhibit 2**~~.

8. ~~7.~~ Commercial Reference

ADCRR acknowledges that B&D has served as a vendor under the Contract and will confirm such in commercial references, orally and in writing, to B&D for upcoming Offender Management System opportunities on which B&D may bid. Offender Management System opportunities shall include any project or bid relating to any software system used in connection with the management of an inmate's incarceration, probation, or parole, or any component thereof, whether public, private, federal, state, local, or municipal, located within the United States of America.

8. Point of Contact

AMERICAN OVERSIGHT

B&D will make the Mi-Case President of B&D (Dean Allen) the main point of contact relating to this Contract, as amended, and any major escalations will be directed ~~to~~, but not limited to, to the chairman of B&D (Pierre Louis Biaggi) as next level decision maker.

9. COVID-19

The Parties agree that disruptions caused by the COVID-19 virus and its associated events, including but not limited to business or government shut-downs, may constitute a force majeure event, governed by Section 6.4-6.4.4 of the Contract's Uniform Terms and Conditions.

CERTIFICATE OF FINAL ACCEPTANCE

The Arizona Department of Corrections ("ADCRR") and Business & Decision, North America PA, Inc. ("B&D") hereby agree, certify, and acknowledge that ADCRR formally accepted from B&D the "Solution" required by Contract No. ADOC14-00003350/14-25-23 on January 15, 2020. ~~By accepting the Solution, ADCRR does not agree that the Solution's functionality meets ADCRR's operational needs. ADCRR's acceptance of the Solution is predicated exclusively upon its good faith reliance upon B&D's representations that the EUIL procedure identified in Paragraph 5 of Amendment No. 9 will resolve all of the functionality deficiencies of the Solution that currently exist and that may subsequently arise during the M&O Phase and EUIL Phase identified in Paragraph 2 and Paragraph 5 of Amendment No. 9.~~

The Parties further agree that, pursuant to Section V.R of the September 25, 2013 Request for Proposal Number ADOC14-00003350/14-25-23, the Performance Bonds submitted by B&D shall not remain in effect later than January 14, 2021.

AMERICAN OVERSIGHT

~~**EXHIBIT 2**~~

AMERICAN OVERSIGHT

EXCEPTIONS TO EXHIBIT G – SERVICE LEVEL AGREEMENTS

1) A portion of the Description of the System Availability / Reliability SLA will change from:

• No more than ten (10) consecutive outages in any week.

to:

• No more than two (2) consecutive outages in any week.

The remainder of this SLA will remain as stated in Exhibit G.

2) Replace the Description of the Security SLA in its entirety with the following (while leaving the remainder of this SLA as stated in Exhibit G):

- Password security will comply with State (and ADCRR) Standards and Policies.
- Additional Standards and Policies: after three unsuccessful login attempts the account will become locked.
- Offeror will comply with 45 CFR Part 160 and 164, Subparts A and C, due to the presence of protected health information within the system.
- Offeror must provide notice to ADCRR of any use or disclosure of PHI/ePHI that is not authorized by the Contract, by law, or in writing by ADCRR, without delay, and in no case later than 5 days after the Business Associate learns of such unauthorized use or disclosure.
- 100% of the time the system will be protected by a Web Application Firewall, unless written approval is provided by ADCRR to perform vulnerability assessments and penetration tests.
- Offeror will perform auditing of all user actions which includes, but is not limited to; password resets, role changes, information modification/addition/removal, user login and logout activity.
- These audit logs must have a full record of the last 60 days minimum.
- Offeror will run Anti-virus/spyware software on all devices capable of having the software installed.
- Offeror will perform logging of all network traffic to the system and retain a minimum of 60 days of logs.
- Offeror will apply security updates in compliance with State (and ADCRR) Standards and Policies and follow proper testing and change control prior to implementation.

AMERICAN OVERSIGHT

- ~~All security incidents must be reported to ADCRR in writing and by telephone within 5 business days of discovery.~~

- ~~Offeror shall take immediate action to prevent further security incidents and remediate vulnerabilities, implement approved compensating controls, and address additional system weaknesses within 10 business days of discovery.~~

- ~~Offeror will cooperate with ADCRR vulnerability management and comply with all State (and ADCRR) Standards and Procedures.~~

- ~~Offeror must host the system on an FedRAMP moderate impact level authorized, government-related, single tenant compliant platform.~~

- ~~Offeror must provide logs and access to security controls within 2 business days of an ADCRR request.~~

AMERICAN OVERSIGHT

- ADC RPT 3110 Absolute Discharge

Updated stored procedures passed UAT and ready to promote to PROD:

- ADC_FETCH_SB1310_PART_B
- ADC_SB1310_PART_A_V2

Follow up requested: did ADC RPT 3160 not make it to UAT as planned?

Promote ADC RPT 3160 Failed eOMIS Message	•••	Promote the following report file: ADC RPT 3160 Failed eOMIS messages.trdp Promote the following stored procedure: ADC_FETCH_FAILED_EOMIS_MESSAGES	Approved by B&D; being worked	-3/26/2020 David Wrbelis Procedure ADC_FETCH_FAILED_EOMIS_MESSAGES has been checked into TFS and will be available to test in UAT on April 2nd. ADC RPT 3160 Failed eOMIS messages.trdp has been copied from RPT_DEV to UAT and will be available to test on April 2nd.

Subject: eOMIS Data Review
Date: Monday, April 6, 2020 12:27:05 PM

Hi Charles and Eli-

As you know I'm becoming more immersed in some things to do with ACIS now that Dwight is gone.

That said, I'd like to understand why the ADCRR IT BA is reviewing eOMIS date to determine corruption when it's received from Marquis. My understanding is that Marquis' data is correct, but it's possible that it's not translating correctly in ACIS. That there are errors encountered which causing the population of data to fail in ACIS.

I need to understand the roles of support in this and I'd also like to understand why is ADCRR IT creating a report and reviewing so that B&D can resolve? Isn't there a way for B&D to run an error report internally so that they can uncover the issue?

Please respond to me before COB today (4/6).

Respectfully,

Holly Greene

Subject: Re: Query Performance

Keith,

The query ran in ~5 mins and returned exactly the data I expected, so I'd call this a success! I'll get this modified query worked into my report to be redeployed this week.

Again I really appreciate the time and effort you put into this. I'll keep your advice regarding the analytic columns in mind for future queries.

Thanks!

On Thu, Apr 2, 2020 at 9:18 AM Keith Francen <keith.francen@bndna.com> wrote:

See if the below works for you. The problem is the analytic columns was trying to process on each row before the distinct. So it was trying to process the operations on 77,264,652 rows instead of 25,716 rows. So I just got the raw data and then returned the final result from the raw data. This eliminated the errors and reduced the processing time.

All-

I ask that folks on this thread step up their communication and coordination with one another. In this case, if there are other meetings or tasks which require a higher level of attention, please ensure that you communicate such with those ahead of time -- especially if someone cannot cover for you. I also expect the host of any meeting to reach out to those critical attendees to understand their absence and capture/provide updates at that time and/or reschedule the meeting.

Respectfully,

Holly Greene

Subject: Progress to brag about

I want to take a moment to brag on our hardworking B&D development staff and our ADCRR Operations team.

Each week since go-live, we've maintained 200-240 bugs. This week we made a real breakthrough in those figures thanks to the efforts of the aforementioned teams, we are currently at 179 bugs total.

But if you look a little deeper, you see that 5 are in Arbitration, 6 are in the ADC backlog (each with its own ongoing collaborative effort), and 30 bugs to be tested still this week. Note we pushed Releases 17 and 18 this week due to some technical issues last week. Assuming we continue with an

AMERICAN OVERSIGHT

80% success rate, I believe we will be at 160 by EOD Monday.

B&D has been extremely active in repairs and very responsive to our needs. Additionally, the daily project calls have been remarkably productive in addressing concerns and providing clarity, as we normalize production procedures.

Thanks to all for the great effort these past few weeks.

Subject: Database Connection From ADC VPN

Thad,

A lot of us in IT are now telecommuting, and I didn't know that we weren't able to connect to the ACIS database(s) through our VPN connection.

I spoke with our network team (I've cc'd Andrew Dorre here) and was advised that B&D has likely only allowed connections from a specific IP range, our in-office IP range, and our VPN connection uses a different subnet.

Would it be possible for you guys to allow database connections from our VPN IP range as well, assuming that is the issue? Requesting access to both:

dbnonprod.aims2.us

dbprodrr.aims2.us

Our VPN IP range is: from 10.230.104.1 to 10.230.107.254

Subject: Re: Query Performance

Keith,

The version in RPTDEV is my original query from several weeks ago before any changes were made (unless you made edits that I'm not catching?). That one always ran in around 5 minutes.

Once you remove the 2 subqueries that I needed to remove (lines 146 - 154, checking for active detention -- and lines 183 - 188, checking for protective custody status), the query slows down to at least 30+ mins.

Thanks!

AMERICAN OVERSIGHT

Keith,

Yes, active inmates only, which I do have in my query. I've attached the original query... keep in mind that this thing slowed down only when I removed tables that I no longer needed, lol. It ran in about 5 minutes before doing that.

This report is only ran once a week... I believe one of our users has it scheduled for every Sunday evening, or very early every Monday morning.

I appreciate your ongoing work -- Thanks!

AMERICAN OVERSIGHT

this query last week. I was able to eliminate all of my subqueries but one. The query does finish now, but it still took around 15 minutes the last time I ran it last week. I've attached the newest version of the query. If you have any suggestions that would be great!

Thanks!

Subject: FW: Query Performance

1. The subqueries need to be move to a "WITH" so they are only executed once.
2. The "NOT IN" need to be rewritten where possible
3. Don't use the lookup status as a comparison. Use code/category
4. Limit the main query and try to eliminate the distinct
5. No indexes should be need if #1,#2, #4 are done. The high cost is due to the nested loops caused by the subqueries

```
SELECT DISTINCT p.ADC_NUMBER
              , p.SURNAME || ', ' || p.FIRST_NAME                              AS "NAME"
              , FIRST_VALUE(lc.LOCATOR_NAME)
                     OVER (PARTITION BY p.ADC_NUMBER ORDER BY ith.MOVEMENT_DATE DESC) AS
"LOCATION"    --gets current complex & unit
              , vbcb.BED_NUMBER_DESIGNATION || ' ' || vbcb.BUILDING_CODE          AS BED_CELL_BLDG -
-gets current bed-cell-bldg assignment
              , CASE
                  WHEN sce.MANUAL_LOCK_FLAG = 'Y'
                    THEN TO_CHAR(sce.RELEASE_DTM_ML, 'mm/dd/yyyy') --uses manual lock release date if
manual lock present
                  WHEN sce.ADJ_RLS_DTS_FLAG = 'Y'
                    THEN TO_CHAR(sce.RELEASE_DTM_ARD, 'mm/dd/yyyy') --uses adjusted release date if

Try running it now in rpt_dev. I can consistently get it to run in under 5 minutes

Keith,

Yes, active inmates only, which I do have in my query. I've attached the original query... keep in mind that this thing slowed down only when I removed tables that I no longer needed, lol. It ran in about 5 minutes before doing that.

This report is only ran once a week... I believe one of our users has it scheduled for every Sunday evening, or very early every Monday morning.

I appreciate your ongoing work -- Thanks!

AMERICAN OVERSIGHT

Subject: RE: Query Performance

Good morning Jeff.

I am hitting an roadblock. Due to the amount of data and tables in the query, every thing I have been trying that will speed up the query causes an error.

1. Can you see if there are any tables or data that can be eliminated from the query.
2. Can you send me the requirements of the query and intent and maybe I can track down alternatives and reduce the number of tables.
3. Can you send me the original query. It might be best just to restart from that point.
4. How often is this ran and can it be batched to lessen the system resource requirements?

>
> Thanks for following up on this. I started working on another report this week, but I did continue trying to optimize this query last week. I was able to eliminate all of my subqueries but one. The query does finish now, but it still took around 15 minutes the last time I ran it last week. I've attached the newest version of the query. If you have any suggestions that would be great!

AMERICAN OVERSIGHT

Keith,

Thanks for the feedback. I'm sure you can tell from looking at it that the requirements for this report kept growing, and that's the main reason for all the subqueries. It became a beast that I didn't want to have to rewrite,

I'll work on improving this today.

Thanks!

AMERICAN OVERSIGHT

1. The subqueries need to be move to a “WITH” so they are only executed once.
2. The “NOT IN” need to be rewritten where possible
3. Don’t use the lookup status as a comparison. Use code/category
4. Limit the main query and try to eliminate the distinct
5. No indexes should be need if #1,#2, #4 are done. The high cost is due to the nested loops caused by the subqueries

```
SELECT DISTINCT p.ADC_NUMBER
                , p.SURNAME || ', ' || p.FIRST_NAME                              AS "NAME"
                , FIRST_VALUE(lc.LOCATOR_NAME)
                        OVER (PARTITION BY p.ADC_NUMBER ORDER BY ith.MOVEMENT_DATE DESC) AS
"LOCATION"    --gets current complex & unit
                , vbcb.BED_NUMBER_DESIGNATION || ' ' || vbcb.BUILDING_CODE                AS BED_CELL_BLDG -
-gets current bed-cell-bldg assignment
                , CASE
