Subject: FW: Query Performance

1. The subqueries need to be move to a "WITH" so they are only executed once.
2. The "NOT IN" need to be rewritten where possible
3. Don't use the lookup status as a comparison. Use code/category
4. Limit the main query and try to eliminate the distinct

AMERICAN OVERSIGHT

5. No indexes should be need if #1,#2, #4 are done. The high cost is due to the nested loops caused by the subqueries

```
SELECT DISTINCT p.ADC_NUMBER
                , p.SURNAME || ', ' || p.FIRST_NAME                              AS "NAME"
                , FIRST_VALUE(lc.LOCATOR_NAME)
                        OVER (PARTITION BY p.ADC_NUMBER ORDER BY ith.MOVEMENT_DATE DESC) AS
"LOCATION"    --gets current complex & unit

Subject:	RE: Release 16 : Bug 40696 - Fix to be pulled from production release
Date:	Friday, March 27, 2020 11:22:43 AM

We were not able to replicate that in our environment this morning.
Trevor and Wissem can chime in.

A productive solution could be to call a meeting with Dan, Michele, Wissem, Trevor to present their finding.

Please advise

Sincerely,

Hagay Hazan

Subject: Re: Release 16 : Bug 40696 - Fix to be pulled from production release

Dan and Michele explained that while you can enter the time, it doesn't stay visible in the system. To me, that means it wasn't really "fixed". But the fact that there is any regression (introduction of new problems that don't currently exist in production) is disconcerting and we cannot deploy as-is.

Warm Regards,
Spencer Scott, PMP

Subject: Training Environment
Date: Friday, March 27, 2020 11:10:48 AM

Hi

Before we went live all of the prisons were training and we had to scale up the training environment to accommodate the load

Now the training system is used very lightly most of the time

We want to scale it down so we're not wasting resources. It will still be completely functional (same functionality it has today) just not so big

If Operations is going to schedule a large training effort with a little notice we can scale up TRAINING appropriately very quickly

Thad

Subject: Re: Query Performance

Keith,

Thanks for following up on this. I started working on another report this week, but I did continue trying to optimize this query last week. I was able to eliminate all of my subqueries but one. The query does finish now, but it still took around 15 minutes the last time I ran it last week. I've attached the newest version of the query. If you have any suggestions that would be great!

Thanks!

#3 is Description not status.

I will continue my analysis on the SQL. This was just the preliminary findings.

Subject: FW: Query Performance

1. The subqueries need to be move to a “WITH” so they are only executed once.
2. The “NOT IN” need to be rewritten where possible
3. Don’t use the lookup status as a comparison. Use code/category
4. Limit the main query and try to eliminate the distinct
5. No indexes should be need if #1,#2, #4 are done. The high cost is due to the nested loops caused by the subqueries

```
SELECT DISTINCT p.ADC_NUMBER
                , p.SURNAME || ', ' || p.FIRST_NAME                    AS "NAME"
               , FIRST_VALUE(lc.LOCATOR_NAME)
                        OVER (PARTITION BY p.ADC_NUMBER ORDER BY ith.MOVEMENT_DATE DESC) AS
"LOCATION"    --gets current complex & unit
                , vbcb.BED_NUMBER_DESIGNATION || ' ' || vbcb.BUILDING_CODE          AS BED_CELL_BLDG -
-gets current bed-cell-bldg assignment
```

Jeff, I have a couple of days available now. Do you want me to start looking at this or have you already finished?

Subject: Re: Query Performance

Keith,

Thanks for the feedback. I'm sure you can tell from looking at it that the requirements for this report kept growing, and that's the main reason for all the subqueries. It became a beast that I didn't want to have to rewrite,

I'll work on improving this today.

Thanks!

AMERICAN OVERSIGHT

#3 is Description not status.

I will continue my analysis on the SQL. This was just the preliminary findings.

Subject: FW: Query Performance

1. The subqueries need to be move to a “WITH” so they are only executed once.
2. The “NOT IN” need to be rewritten where possible
3. Don’t use the lookup status as a comparison. Use code/category
4. Limit the main query and try to eliminate the distinct
5. No indexes should be need if #1,#2, #4 are done. The high cost is due to the nested loops caused by the subqueries

```
SELECT DISTINCT p.ADC_NUMBER
              , p.SURNAME || ', ' || p.FIRST_NAME                          AS "NAME"
              , FIRST_VALUE(lc.LOCATOR_NAME)
                     OVER (PARTITION BY p.ADC_NUMBER ORDER BY ith.MOVEMENT_DATE DESC) AS
"LOCATION"    --gets current complex & unit
              , vbcb.BED_NUMBER_DESIGNATION || ' ' || vbcb.BUILDING_CODE          AS BED_CELL_BLDG -

Subject: Query Performance

Hey guys,

I need to make a couple changes to my query in my ADC_SP_SCC_ELIGIBILITY_RPT stored procedure. There are 2 subqueries that I need to remove due to a change in business requirements.

However, once I remove either of the subqueries, the query becomes so slow that I'm not sure if it will ever finish (I've let it run for up to 30 mins). It doesn't really seem to make sense to me...I would normally expect that to actually speed up the query. It's a fairly heavy query as it is (takes about 90 seconds to run).

I wanted to reach out to you guys to see if maybe there was an index or something created on my stored procedure, and that once I change my query that index isn't used anymore, causing the slowdown? Just trying to figure out why this query is so slow and had that thought that maybe there was an index.

Can you guys confirm if there is an index on my procedure or not, or provide any other assistance to speed this thing up?

These are the 2 sections of SQL that I need to remove from the query, so there are 3 tables that would no longer be needed.

Subject: Re: Google Meet with External Guest

Good News! We (Al specifically) finally figured out what was going on with external guests seeing the shared presentation.
There is a google extension that Charles had to install on his end for him to be able to join the Google Meet from his computer.
Al will follow up with more specific information. Please relay this information to your external guests.

On Thu, Mar 19, 2020 at 1:50 PM Sandy Wang <swang@azadc.gov> wrote:

> Charles, I am providing a followup to the Google Meet issue experienced earlier this week. The problem is that you were able to join us via voice, but not via the Meet invitation link, thus you were not able to see the shared screens.
>
> I asked Al to investigate further. I understand that Al did try a Google Meet session with you without success. On you end, you were asked to make a request to join, but Al did not see the request from his desktop at all, not to mention granting it. This morning, Al tested with Eli's hotmail account and she went through just fine without having to request to join.

AMERICAN OVERSIGHT

(1) Were you connecting to our GoogleMeet from your laptop?
(2) Is there another B&D email account we can test with to see if there is a pattern?

All, can you help with this? Any suggestions are most welcome.

Every time there is a deploy to production we export a copy of the source code then upload it to IronMountain for code escrow.

A link to IronMountain's description of software escrow.

Hello all-

We will keep the meetings going for the remainder of the week and those which follow. We still need to use this time to work through bug prioritization, communications and anything else that may be outstanding or urgent.

Spencer and Sandy-

Please ensure that the WebEx is adjusted to a Google Meet for the remainder of the series. Adjust the time to 30 min (3:30 to 4). Add Eli, Al and Janet to the series.

Respectfully,

Holly Greene

Subject: Query Performance

Hey guys,

I need to make a couple changes to my query in my ADC_SP_SCC_ELIGIBILITY_RPT stored procedure. There are 2 subqueries that I need to remove due to a change in business requirements.

However, once I remove either of the subqueries, the query becomes so slow that I'm not sure if it will ever finish (I've let it run for up to 30 mins). It doesn't really seem to make sense to me...I would normally expect that to actually speed up the query. It's a fairly heavy query as it is (takes about 90 seconds to run).

I wanted to reach out to you guys to see if maybe there was an index or something created on my stored procedure, and that once I change my query that index isn't used anymore, causing the slowdown? Just trying to figure out why this query is so slow and had that thought that maybe there was an index.

Can you guys confirm if there is an index on my procedure or not, or provide any other assistance to speed this thing up?

These are the 2 sections of SQL that I need to remove from the query, so there are 3 tables that would no longer be needed.

Subject: Re: B&D Site Visit

Thad, I was not aware of the change of plan until yesterday. Will we have the same B&D staff coming for the Alhambra visit? It is best that we have the same people for this visit as a lot of the issues tie directly into the items that were discussed at the Central office last week. Please confirm that they are available for this week and Jey will make the arrangement.

Thanks!

Thad, I was not aware of the change of plan until yesterday. Will we have the same B&D staff coming for the Alhambra visit? It is best that we have the same people for this visit as a lot of the issues tie directly into the items that were discussed at the Central office last week. Please confirm that they are available for this week and Jey will make the arrangement.

Thanks!

Hello Dwight

I hope you are well!

Could you share an update on the below email, please? As you know we all wanted to get this wrapped up as soon as possible, ideally yesterday.

Thanks in advance.

Dean

To answer question 1: Anything agreed in the agreement shall be folded back into the manual and the manual updated.

I see you have already answered question 2, in a separate email.

Thanks

Dean

Subject: Re: SLA Review Wrap up Meeting

Dean,

We received and have begun our review. A couple of quick questions that I have are as follows:

- What does this M&O Agreement document do to the M&O Manual that we already have agreed upon back in November? It looks like this supplants that document.
- What happened to the Supplemental G - SLAs document/content (that we were close to finalizing) or are you intending that that is represented in this M&O Agreement?

Your response to these questions should add clarity that will allow us to get right to the point quickly.

We'll get back to you soon.

Best Regards,

Dwight Cloud

AMERICAN OVERSIGHT

On Tue, Mar 3, 2020 at 5:14 PM Dean Allen <dean.allen@bndna.com> wrote:

Hello Dwight,

I am requesting a further meeting tomorrow to conclude this topic and finally agree the terms, when are you and your team available?

In the meantime, and respectfully, I clearly recall the discussion around the Incident Response and Resolution sections being agreed that we could commence M&O and work on these specifics as it progresses. As you are aware I asked Chris Masson to take notes so that I could capture the agreements. Additionally I sent my excel note immediately after the meeting, which I received no comments. Reviewing Chris' notes alongside my excel they are both in line with my recollection, they correspond. At the end of tomorrow's I would like us to review the conclusions and make sure that all that is agreed is clear.

Incident Response
Dean - note that this is contentious before we start
Difference between Incident and Problem.
Holly agrees that P1 and P2 should be taken away from Operations. Any P1 and P2 should funnel via IT.
P1 = System Down
P2 = Module Down with no ability to work around it
Holly agrees that 3rd party non B&D factors can be worked with providing we communicate with ADC
Dean - need to find metrics to track. Responding to and working on incidents. (Phone Call, Definition of categorizations)
Holly says typical response time is 15 mins, not an hour.
Review response times monthly for first 6 months, adjusting as necessary, then annually
★ Dean is ok with the response times that are there - same for other clients.

Incident Resolution
Dean - what even is a resolution to the incident?
Sandy - once root cause is established, resolution
Holly recommends putting problem management into this because it will save us, because it allows for timelines to be added for things out of our control such as people availability or AWS etc.
Dwight - depending on type of incident, it could move to problem. Then you have solved the incident.
Holly & Dwight - if incident moved to a problem, it should be moved out of SLA - moves to a state/area that allows SLA
Everyone on board
Thad - Everything apart from critical should be business hours
Discussion on 6am - 6pm and after hours billing
Dwight - may want to move lows and mediums out of this SLA because it makes no sense to have us work after 6pm on issues
Dean - we will be billing after 6pm based on SLA right now
Dwight - happy to create language to adjust frequently to get it moving.
Review resolution times monthly for first 6 months, adjusting as necessary, then annually
★ May need working session to get this setup

7		minimum.	and software setup files	contractor	standards and requirement.	standards and requirement.
8	Security	Internal and External security to meet State, Federal and industry standards.	100% of all security breaches must be reported to ADC in writing and by telephone immediately at the time of the incident	100% of all security breaches must be mitigated within a time frame approved by ADC, at the time of the incident.	Cooperate with ADC vulnerability management - as measured with a state mandated penetration testing and remediation requirements	
9	Incident Response Time & Target	Agreed during the meeting to review and refine KPI's during M&O				
10	Incident Resolution Time & Target	Agreed during the meeting to review and refine KPI's during M&O				
11	User Support	Monday - Sunday 6 am - 6 pm - Technical (except holidays)	Monday - Sunday 6am - 6 pm - Help Desk (except holidays)	On call after hours support as negotiated with ADC	It will be agreed without exceptions or conditions that after-hours technical support will be provided under a time and materials basis at a rate card approved by ADC	The offeror further agrees that in no case will an after hour service request by ADC be refused by the offeror and any escalation paths will be followed.
12	Reporting	Removed				
						During the monthly status

With regards to the second item. This was included in the original documentation that ADC provided B&D(scanned version), we have not made any changes here, this is original language, are you now wanting this removed? If so, we have no issue. For your awareness I have included the section from the contract document that details this below:

ARIZONA DEPARTMENT OF CORRECTIONS
Adult Inmate Management System (AIMS) Replacement Project
EXHIBIT G Service Level Agreement (SLA)

Service Level Agreement – Incident Response Time & Target

HEADING	DESCRIPTION	SLA Non-Compliance Withholding %
Incident Response Time & Target SLA:	**Critical** – 120 clock minutes / 99.5 % **Incident Response Time shall be less than or equal to One clock hour(s)** **High** – 24 clock hour(s) / 99.5 % **Incident Response Time shall be less than or equal to 24 clock hour(s)** **Medium** – 48 business hour(s) / 99.5 % **Incident Response Time shall be less than or equal to 48 clock hour(s)** **Low** – As agreed with ADC	2% The SLA is defined by the aggregate compliance of Incident Response Time & Target SLA Metrics/Components. If one metric in this category is not met than the category is deemed by ADC as not compliant. The full 2% Withholding percentage will be incurred by the Offeror
Data Collection Process	ARIZONA DEPARTMENT OF CORRECTIONS will perform analysis each month on the Vendors record for date and time the problem ticket is opened and the date and time the service is restored The Offeror shall provide the specific data collection process including specific systems, Offeror resources and/or hardware/software elements leveraged to facilitate completion of this task. ADC and the Offeror will mutually approve the specific data collection process to ensure fair and accountable treatment of the SLA metric	
Calculation Formula	The Offeror shall provide to ADC the specific calculation formula utilized for compiling the SLA metric and obtain initial approval of stated calculation. Future calculation or formula changes will follow the current contracted Change Control process and receive joint approval from ADC and Offeror if modified..	

AMERICAN OVERSIGHT

Thanks

Dean

Subject: Re: SLA Review Wrap up Meeting

Dean,

There are a few things that we need to straighten out in this document. In the Incident Response and Resolution sections, it states that we agreed to review and refine during M&O. My problem is that what we agreed to and need to do is to get the framework up and agree to that before we can move to M&O. We all agreed that we should get some language together that satisfies the contractual timelines, as well as protects both of our rights. Chrarles and Spencer spent the following morning (2/27) working on that framework, but nothing has been provided that finalizes this portion (that would allow ADC to approve).

The second part that is concerning to us is on the Incident Response and Resolution sections in the Data Collection Process section it states that ADC would be doing the analysis of the problem tickets each month and we have not heard of or agreed to this.

With these unresolved issues, I would propose that we get back together to get this wrapped up. Once that is done, then Ken Sanchez will be the one that provides ADC approval

Best Regards,

Dwight Cloud

Hello Dwight,

As promised, please see attached the complete package relating to Maintenance & Operations.

As you will be able to see an extensive amount of effort has been applied to the preparation of this document, and of course, with any work there may be areas we have missed. We welcome the input from ADC, and respectfully ask that the attached document, including the embedded documents, be carefully reviewed with any comments or changes added as red line and returned to us.

We shall be available to walk through the ADC red lines as soon as ADC are ready, we shall keep Friday afternoon and Monday open for that. Please advise as soon as possible.

In the meantime please do not hesitate to call me if you have any comments on the document.

Thanks
Dean

Subject: RE: SLA Review Wrap up Meeting

Dwight,

Upon reflection, I want our next meeting to arrive at a conclusion regarding the SLA's. In preparation of this, B&D will issue a complete package which details all aspects of the M&O approach to ADC by close of business Thursday 5th March. We will then respectfully ask that ADC review the documents and provide a red line version to B&D on Friday 6th March. With a view to meet either late on Friday 6th March to conclude the process or Monday 9th March whichever is most achievable.

I want to avoid the opportunity for items that have been agreed during the meeting not making its way into the final documentation and I feel this is the most effective way forward to achieve this.

For the avoidance of doubt, we will not meet today.

Thanks

Dean

AMERICAN OVERSIGHT

7		minimum.	and software setup files	contractor	standards and requirement.	standards and requirement.
8	Security	Internal and External security to meet State, Federal and industry standards.	100% of all security breaches must be reported to ADC in writing and by telephone immediately at the time of the incident	100% of all security breaches must be mitigated within a time frame approved by ADC, at the time of the incident.	Cooperate with ADC vulnerability management - as measured with a state mandated penetration testing and remediation requirements	
9	Incident Response Time & Target	Agreed during the meeting to review and refine KPI's during M&O				
10	Incident Resolution Time & Target	Agreed during the meeting to review and refine KPI's during M&O				
11	User Support	Monday - Sunday 6 am - 6 pm - Technical (except holidays)	Monday - Sunday 6am - 6 pm - Help Desk (except holidays)	On call after hours support as negotiated with ADC	It will be agreed without exceptions or conditions that after-hours technical support will be provided under a time and materials basis at a rate card approved by ADC	The offeror further agrees that in no case will an after hour service request by ADC be refused by the offeror and any escalation paths will be followed.
12	Reporting	Removed				
						During the monthly status

With regards to the second item. This was included in the original documentation that ADC provided B&D(scanned version), we have not made any changes here, this is original language, are you now wanting this removed? If so, we have no issue. For your awareness I have included the section from the contract document that details this below:

ARIZONA DEPARTMENT OF CORRECTIONS
Adult Inmate Management System (AIMS) Replacement Project
EXHIBIT G Service Level Agreement (SLA)

Service Level Agreement – Incident Response Time & Target

HEADING	DESCRIPTION	SLA Non-Compliance Withholding %
Incident Response Time & Target SLA:	**Critical** – 120 clock minutes / 99.5 % **Incident Response Time shall be less than or equal to One clock hour(s)** **High** – 24 clock hour(s) / 99.5 % **Incident Response Time shall be less than or equal to 24 clock hour(s)** **Medium** – 48 business hour(s) / 99.5 % **Incident Response Time shall be less than or equal to 48 clock hour(s)** **Low** – As agreed with ADC	2% The SLA is defined by the aggregate compliance of Incident Response Time & Target SLA Metrics/Components. If one metric in this category is not met than the category is deemed by ADC as not compliant. The full 2% Withholding percentage will be incurred by the Offeror
Data Collection Process	ARIZONA DEPARTMENT OF CORRECTIONS will perform analysis each month on the Vendors record for date and time the problem ticket is opened and the date and time the service is restored The Offeror shall provide the specific data collection process including specific systems, Offeror resources and/or hardware/software elements leveraged to facilitate completion of this task. ADC and the Offeror will mutually approve the specific data collection process to ensure fair and accountable treatment of the SLA metric	
Calculation Formula	The Offeror shall provide to ADC the specific calculation formula utilized for compiling the SLA metric and obtain initial approval of stated calculation. Future calculation or formula changes will follow the current contracted Change Control process and receive joint approval from ADC and Offeror if modified..	

Thanks

Dean

Subject: Re: SLA Review Wrap up Meeting

Dean,

There are a few things that we need to straighten out in this document. In the Incident Response and Resolution sections, it states that we agreed to review and refine during M&O. My problem is that what we agreed to and need to do is to get the framework up and agree to that before we can move to M&O. We all agreed that we should get some language together that satisfies the contractual timelines, as well as protects both of our rights. Chrarles and Spencer spent the following morning (2/27) working on that framework, but nothing has been provided that finalizes this portion (that would allow ADC to approve).

The second part that is concerning to us is on the Incident Response and Resolution sections in the Data Collection Process section it states that ADC would be doing the analysis of the problem tickets each month and we have not heard of or agreed to this.

With these unresolved issues, I would propose that we get back together to get this wrapped up. Once that is done, then Ken Sanchez will be the one that provides ADC approval

Best Regards,

Dwight Cloud

AMERICAN OVERSIGHT

- The version sent to B&D from Sandy Wang is an out of date version. Attached is an email from May 8th 2014 with the final contract version.
- I have amended the version attached(editableVersionofExhibitG.pdf) with the May 8th 2014 changes highlighted in green font.
- I have transferred all that we agreed during the meeting on the Feb 26th 2020 into the aforementioned version.

Please review the document; editableVersionofExhibitG.pdf and provide your feedback as soon as possible. I would appreciate a response by the end of March 3rd 2020, there should be nothing contentious in this document, it is what we agreed during our meeting.

Thanks

Dean

Subject: SLA Review Wrap up Meeting
When: Wednesday, February 26, 2020 1:30 PM-2:20 PM (UTC-07:00) Arizona.
Where: ADC offices

Hello All,

Following on from our previous meeting, please attend with a view to close out the discussions on the items relating to the M&O Phase of the project.

Thanks

Dean

AMERICAN OVERSIGHT

MAINTENANCE AND OPERATION AGREEMENT

Overview

This document represents the Service Level Agreement ("SLA") for the maintenance and operation of the Mi-Case offender case management software (the "Software") for the Arizona Department of Corrections, Rehabilitation & Reentry (the "Customer"). Business & Decision, North America (PA), Inc. ("B&D").

Under the terms of this SLA, maintenance and operation services shall be available on-call 12-hours per day, 7-days per week, with an agreed response time from the receipt of each request.

The Customer is responsible for, First-Line and Second-Line help desk support. The Customer will attempt to resolve any non-product related issue prior to raising a Third Line Support Ticket (ST) to B&D. The customer's staff shall be responsible for specific problem determination and resolution for those items and issues that are not within the Mi-Case application.

The role of First-Line Support is for end users to contact the customer Service Desk, which attempts to collect as much information and diagnostics about the incident as possible, and even resolves the issue on the spot, if possible. This will reduce resolution time for all minor incidents (examples would be; my computer doesn't work. Did you try to turn it on? Or My password needs resetting).

Second Line Support of Incident Management is a role generally composed of the staff with greater functional knowledge of the software. They should have enough time on their hands to devote themselves to incident diagnosis and resolution. (examples would; how do I upload a document, I can't find a specific report, or my role is not allowing access to a specific screen)

If the issue the user is experiencing cannot be resolved by first or second-line support, then an ST shall be raised only by those individuals who are named within Appendix 6, and work in the Customer's Helpdesk area or are designated as a Point of Contact (Customer Representative).

If an ST is determined to be a software defect, B&D agrees to provide a resolution within the time period set forth in Appendix 3. In the event that a software defect results in general service interruption of the Software or in essential elements of the Software, B&D agrees to provide resolution within the soonest possible time frame.

The ST Procedure defined below shall be followed.

1 ST Procedure

1.1. In the event the Customer Representative, having first attempted to resolve the problem with internal resources (the Customer Help Desk), is unable to resolve a problem with the Software, it may raise an ST with the B&D Customer Service Helpdesk ("B&D-CSH"). To raise an ST with B&D-CSH, the Customer Representative shall follow the following procedure:

1.2. Contact the B&D-CSH by telephone, fax, email or entering a ST within the B&D-CSH online Service Desk (SD) (as set forth in Section 2), and provide the following information:

AMERICAN OVERSIGHT

1.2.1. Contact details (contact name, location, telephone number);

1.2.2. The name of the module in which the problem or failure arose or occurred in the software

1.2.3. Any unique reference number, used by the Customer's internal support desk (if applicable)

1.2.4. All problem details including: date/time of problem, content of any error message (if applicable), its opinion of the ST priority, the nature of problem, any precursors to problem, whether the problem may be easily replicated, and any other associated and/or relevant information such as screen dumps (screen shots), reports and data files.

1.3 The Customer shall be responsible for ensuring that STs shall be raised only by those individuals who are named within appendix X, and work in the Customer's Helpdesk area or are designated as a Point of Contact (Customer Representative).

1.4 Upon receipt of the ST, it will be categorized according to the priority levels set forth in Appendix 2. B&D will at all times use its best efforts to respond to STs as quickly as possible in accordance with the target response and resolution times set out in Appendix 3.

1.5 The process flow of a ST will follow the agreed process flow as detailed in Appendix 8.

1.6 As part of the B&D-CSH, the B&D Issue Response Team ("IRT") will inform the Customer Representative if a Site Visit is required to resolve an ST.

1.7 When an ST is passed to the B&D IRT, the IRT member appointed to resolve the ST shall determine whether the resolution of the problem requires application software or data to be repaired. If repairs are required, then the IRT member may require and request further information from the Customer to resolve the problem. Any time that is associated with the collection, definition or confirmation of further information will be excluded from the target response times set out in Appendix 3. Once the IRT member has determined what is likely to be required to resolve the problem, he will inform the Customer's Helpdesk Staff of the current state of the ST. Once a resolution path has been determined then the IRT member will inform the customer and close the ST in line with the ST closure flow Appendix 8. In the event that a response cannot be provided within the target response times set out in Appendix 3 the ST shall be escalated in accordance with the defined Escalation Procedure defined in section 4.

1.8 If a resolution of an ST is likely to result in a material impact on the Software or its related Products the IRT member will seek authorization from the Customer prior to carrying out any action that is likely to have such impact. If the ST is a change request (as defined in section 3) the IRT member will carry out an impact analysis detailing the nature and cost of the change. No changes will be made without prior written authorization from the Customer. The IRT member will inform the customer and close the ST in line with the ST closure flow Appendix 8.

1.9 Should the investigation of an ST by the IRT indicate that the problem resulted from an addition to or modification of the Software or its related Products by the Customer or their representative, the IRT member will inform the Customer at the earliest opportunity, indicating that any works to be carried out can be conducted on a chargeable basis in line with the time and materials rate card as Appendix 9 for the implementation of the change. In order to progress on any such works thereafter, B&D would require a written agreement

AMERICAN OVERSIGHT

and authorization from the Customer to correct problems not covered by this SLA. The IRT member will inform the customer and close the ST in line with the ST closure flow Appendix 8.

1.10 If the Customer disagrees with the IRT's findings, a report of the findings from both the IRT staff and the Customer's Helpdesk Staff will be provided to the named Support Delivery Manager for B&D and the Customer's Support Delivery Manager for assessment and resolution. If after 5 business days (or a time period mutually agreed upon) there is no resolution on the IRT's disagreement, the executive representatives for both the Customer and B&D will negotiate the same findings for ultimate resolution.

1.11 STs will be closed by mutual agreement between the Customer and the IRT member on the occurrence of any of the following:

1.11.1. The Customer and the IRT members agree that the perceived problem was due to the operator's misunderstanding of the Software specification, or equivalent documentation, and as such, no fix is required.

1.11.2. The Customer agrees that the software is operating in line with the specifications.

1.11.3. Non-recurrence of an incident, or intermittent fault, which cannot be reproduced, despite repeated efforts to do so, within a set period of 5 days. This period of non-recurrence can be mutually adjusted if conditions warrant a longer or shorter time range. In the above case the ST will not be included in any resolution targets.

1.11.4. The IRT member has concluded that the issue is related to system defect and a system defect has been created within the defect management tool.

1.11.5. The IRT member has concluded that the issue is related to data defect and a data defect has been created within the defect management tool.

1.11.6. The IRT member has notified the customer that there is a previously known defect that is already entered in the defect tracking system.

1.11.7. The IRT member has requested further clarification or information relating to the ST and the customer has failed to provide further clarification or information within 5 business days of the ST being opened and following at least 1 email reminder after the ST being opened.

1.11.8. Following the IRT member deploying an immediate 'hot' fix to the UAT environment and the customer failing to test the appropriate target resolution time detailed in Appendix 3.

1.12 A standardized monthly ST Report of all ST's will be provided by the B&D-CSH to the Customer's Helpdesk Staff.

The monthly ST Report will:

1.12.1. Show all active STs (for the entire time period of the report).

1.12.2. Show all STs opened and closed during the entire time period of the report including each target response and target resolution times.

1.12.3. The ST Report will show the status (such as "in development", "under investigation", or "under review by the Customer") for each ST and any other comments or pertinent information about that ST for all reported STs.

1.13 The date for future monthly meetings (or other mutually agreed upon timeframe) between the Customer's Helpdesk Staff and the B&D will be set at the conclusion of the current months standing meeting.

AMERICAN OVERSIGHT

2 Methods of Contacting B&D

The Customer may contact B&D-CSH by using any of the following means:

2.1 By entering a ST in the online B&D-CSH ServiceDesk at: http://servicedesk.bndna.com and following the AIMS2 Service Desk Requester User Guide. Detailed in Appendix 5.

2.2 By telephoning the B&D-CSH on *1(833) 564 2273* or such other telephone number provided by B&D to the Customer with two-week notification (or other mutually agreed upon timeframe). Phone calls may be backed up by e-mails. The B&D-CSH will log the call and pass this information on to an appropriate IRT member. The Customer Representative making the call should have available to them as much information about the problem as possible, and as a minimum, the information requirements set out in section 1.2.

2.3 By sending an email to ServiceDesk@bndna.com , or such other email address provided by B&D to the Customer with two-week notification (or other mutually agreed upon timeframe). The email will give as much detail as possible with, as a minimum, the information requirements set out in section 1.2. Email contact is suitable for any requirement; however the target response times will commence the time of receipt of the communication. All emails should be immediately followed by a telephone call to B&D-CSH.

3 Change Requests / Variations To Service

3.1 The Customer shall be entitled at any time during the Term of this Agreement to request in writing to B&D a Change Request or Variation to the Services already provided. The Customer shall provide B&D with full particulars of any requested change or variation and such additional information as B&D shall reasonably require.

3.2 All change requests shall be requested formally by the customer

3.3 Following receipt of a Change Request or Variation to the Services pursuant to section 3.1 above, B&D will respond within ten (10) business days and shall inform the Customer in writing whether it considers such Change Request or Variation to the Services to be technically feasible; and if so, any amendment or variation to the Charges and /or Services that it would make as a result of such request, as such a formal estimate of effort (EOE) will be provided by B&D to the customer.

3.4 As part of the EOE, B&D will notify the customer of the number of hours required to implement the Change Request.

3.5 The Customer shall notify B&D within ten (10) business days of receipt of the EOE referred to in section 3.3 above if it wishes to proceed with the Change Request or Variation to the Services as provided by B&D. The customer will, as part of this notification to proceed (NTP), identify whether the pre-arranged 10,000 hours of change effort is to be utilized as part of the implementation of the change. In the event that the 10,000 hours of change effort is not to be used for the implementation of the change, the customer will provide B&D with an appropriate purchase order for the effort, in line with the time and materials rate card as Appendix 9 for the implementation of the change.

3.6 If the customer identifies further changes to the original change request discussed in 3.1 then the process will revert back to section 3.1 above. Failure of the Customer to notify B&D within the ten (10) business day period shall be deemed to constitute the Customer's non-acceptance of the proposal.

AMERICAN OVERSIGHT

3.7 Upon receipt of the NTP by the customer, B&D will plan the development and identify a projected start date and estimated completion date.

3.8 Upon approval of the development plan by the customer, B&D will commence work on the change request in line with the development plan.

3.9 During working on the change request B&D will track actual hours against the estimate and report progress weekly to the customer with an appropriate email.

3.10 The IRT shall be responsible for carrying out any Software change requests agreed between B&D and the Customer under the terms of this Agreement, and for reporting to the Customer.

3.11 If the change request appears that it will not complete on the planned EOE completion date or if the amount of effort required to finish the change request will exceed 10% over the EOE, B&D will notify the customer and stop working on the Change.

3.11.1 The customer will need to then take one of the following actions:

3.11.1.1 Formally ask B&D to proceed to completion of the change request – setting new target thresholds (end date or increase to EOE)

3.11.1.2 Formally ask B&D to re-estimate the change request (step 3.1)

3.11.1.3 Formally ask B&D to drop the change request / perhaps identifying a new change request with altered requirements / expectations all effort expended up to this point will be deducted from the 10,000 hours of change effort.

3.11.2 Upon an updated NTP B&D will commence work on the Change request (delays between stopping work and restarting will be reflected in a revised plan for the project)

3.12 A Change Request from the Customer to B&D should include not less than the information detailed in Appendix 4.

3.13 Upon the completion of the development of the change request B&D will formally request the approval to promote the change request to the User Acceptance Testing (UAT) environment.

3.13.3 The customer will then test the Change Request

3.13.3.1 Any support that B&D provides during UAT testing will be billed against the Change request.

3.13.3.2 Any bugs identified (during UAT) and subsequently worked on by B&D (during UAT) will be billed against the Change request.

3.13.3.3 Any changes made by the customer to the requirements or expectations of the change request will need to be done formally in writing and will trigger the process detailed in 3.1

3.14 Following approval to promote the change request to the UAT environment B&D will formally notify the customer that the change has been successfully deployed and is ready for the customer UAT process.

3.15 Upon the completion and formal approval of the customer that the change has passed their UAT process a formal request to B&D will be made to promote the change to production.

3.16 Formal acceptance of the change and all deductions of the 10,000 hours of change effort consumed for the change will be final and any outstanding monies due for the change shall be invoiced and paid for by the customer when the change is either promoted to production or 30 business days after the change has been delivered to the UAT environment.

AMERICAN OVERSIGHT

3.17 A standardized weekly report by email of all Change Requests will be provided by the B&D-CSH to the Customer's Helpdesk Staff. This report will show no less than:

3.17.4 All open Change Requests (for the entire time period of the report).

3.17.5 All Change Requests closed during the entire time period of the report.

3.17.6 The status (such as "in development", "under investigation", or "waiting for CMRB") for all open Change Requests.

4 Escalation Procedures

Any matter escalated under the Agreement shall have two stages:

4.1 Stage 1

If the ST has not been resolved within the appropriate Target Resolution Time, or the ST does not meet an exception as shown in Appendix 3, the IRT member(s) tasked with the issue will inform the B&D-CSH of the reason for failure to reach resolution and his/her best analysis of the resources and time-scales required to resolve the problem. The B&D-CSH will then refer the matter to B&D's Customer Service Manager, who will determine any additional or alternate resources necessary and ensure they are applied to the issue and inform the Customer of the escalation. The B&D-CSH will inform the originating Customer Point of Contact of the issue's escalation, and the appropriate Manager of B&D shall be informed of the Stage 1 escalation.

4.2 Stage 2

4.2.1 If the ST has not been resolved within a time period equal to double that specified as the Target Resolution Time for the relevant priority level, or the ST does not meet an exception as shown in Appendix 3, the B&D Manager shall inform the relevant Director of B&D if the issue is not likely to be resolved by the next escalation time limit.

4.2.2 The Director of B&D and the Customer Point of Contact will mutually determine an appropriate course of action and whether to allocate additional or alternate resources, including outside agencies if appropriate. The Customer will be kept informed of the status of the escalated issue, and the B&D Customer Service Manager will inform the originating Customer Point of Contact of the Stage 2 escalation.

4.3 B&D Management

A list of the B&D Directors, Managers will be provided to the Customer's Helpdesk Staff upon initiation of this contract as Appendix 6 and this list will be updated whenever a change is made to the B&D Management.

AMERICAN OVERSIGHT

5 SLA Key Performance Indicators and % Holdback

The key metrics shall be used in accordance with the M&O Agreement to measure B&D's performance of the M&O service, these key metrics are detailed in Appendix 7 - Exhibit G

Appendix 1 - THE SITE AND THE SERVICES

The Sites: List of all ADC Locations where the application is operated.

The Services: The Services shall include the following:

1. Support in event of notification of system problems as specified in this contract
2. Evaluation of STs
3. Determining the extent of any change required to deal with an ST
4. Progression, documentation and resolution of all support STs
5. Impact analysis of requests for changes to the Product
6. Progression of approved change requests
7. Provision, upon request, of timely reports both written (as described in Section 1.13), and verbal (as requested by the client) detailing the progress of STs.
8. Remote installation of application software upgrades
9. On-site installation of application software upgrades as mutually agreed upon by B&D and the Customer.
10. Agreement of acceptance criteria testing for Software upgrades
11. Holding master development copies (by B&D and in escrow) of any software included in the Products and all associated documentation; as produced by B&D
12. Assuring the Customer has latest copies of all software included in the Project and associated documentation
13. Maintenance of relevant documentation where applicable

AMERICAN OVERSIGHT

Appendix 2 - PRIORITY LEVELS

Category	System Status	Priority
Critical	Indicates the entire Solution is unavailable for use resulting in a critical impact on operations.	1
High	Indicates a Module is unavailable for use where the Solution is usable but is severely limited, and no workaround for that Module exists.	2
Medium	The operation of a function in the application is restricted but use of other functions is not impacted or where a requirement is not being met, but the application is otherwise usable.	3
Low	Minimal business impact. Indicates that the problem results in little impact on operations or there is reasonable circumvention of the problem. For example, misspelled words, graphical designs.	4

Appendix 3 - TARGET RESPONSE AND RESOLUTION TIMES

Priority	Target Response Time	Target Resolution Time
1	1 Clock Hour	5 Clock Hours
2	24 Clock Hours	48 Clock Hours
3	48 Business Hours	72 Business Hours
4	48 Business Hours	72 Business Hours

AMERICAN OVERSIGHT

Target Response Time: is defined as the time, from the moment when the Customer notifies B&D of an ST (as defined in Section 1.1, Section 1.2, and Section 2), for B&D to begin working on the reported ST and to inform the Customer of this phase of the ST process.

Target Resolution Time: is defined as the targeted time, in 24-hour days, to resolve and initially close an ST as set out in Section 1.10. The targeted time to resolve an ST does not represent the reporting of the final closure as defined in Section 1.11.

There may be instances where a resolution cannot be achieved in the specified target time period. These situations are described in the paragraph below. When a resolution cannot be achieved in the specified target time period for any of the reasons described below, and it is mutually agreed that the circumstances do not constitute the need for escalation (as defined in Section 4), then no target resolution time will be entered in the standardized monthly ST Report (as described in Section 1.12), and a comment that states "Target Resolution Time is on hold pending [*reason*]" will be added. The ST status of the *Target Resolution Time* for these instances will be revised once the issue preventing its resolution is settled.

Target Response and Resolution Exceptions:

Situations that may prevent an ST from meeting the *Target Response & Resolution Time*

1. STs that require approval from the Customer
2. STs that represent a Non-recurrence of an incident, or intermittent fault (as defined in Section 1.11.3)
3. STs that require information and additional requested support from the Customer (as defined in Sections 1.5 through 1.12).
4. The Customer disagrees with the IRT's finding, and the ST cannot be closed (as defined in Section 1.10).
5. Any mutually agreed upon situation where the Customer and B&D determine that the ST cannot be resolved in the specified Target Resolution Time.

Under the above circumstances the Target Resolution Time may be re-calculated by subtracting the time required by the Customer to meet the requirements, requests or procedures that prevent the B&D IRT staff from resolving the ST as described in Sections 1.5 through 1.12. When these circumstances arise, B&D will not be liable for any failure to meet these targets.

Subject: Visit to Florence Complex Tomorrow

The Assistant Director over Operations just approved the use of B&D laptops within the complex tomorrow. He denied the request for cell phones. He said these phones can remain in the car and can be used there, if necessary. He also is allowing the use of office phones for direct calls. Janet will have her state cell phone and we can use her to relay messages to the team. Sandy can provide that number.

AMERICAN OVERSIGHT

With regards to the second item. This was included in the original documentation that ADC provided B&D(scanned version), we have not made any changes here, this is original language, are you now wanting this removed? If so, we have no issue. For your awareness I have included the section from the contract document that details this below:

<image002.png>

Thanks

Dean

Subject: Re: SLA Review Wrap up Meeting

Dean,

There are a few things that we need to straighten out in this document. In the Incident Response and Resolution sections, it states that we agreed to review and refine during M&O. My problem is that what we agreed to and need to do is to get the framework up and agree to that before we can move to M&O. We all agreed that we should get some language together that satisfies the contractual timelines, as well as protects both of our rights. Chrarles and Spencer spent the following morning (2/27) working on that framework, but nothing has been provided that finalizes this portion (that would allow ADC to approve).

The second part that is concerning to us is on the Incident Response and Resolution sections in the Data Collection Process section it states that ADC would be doing the analysis of the problem tickets each month

AMERICAN OVERSIGHT

and we have not heard of or agreed to this.

With these unresolved issues, I would propose that we get back together to get this wrapped up. Once that is done, then Ken Sanchez will be the one that provides ADC approval

AMERICAN OVERSIGHT

Attached is an email from May 8th 2014 with the final contract version.

- I have amended the version attached(editableVersionofExhibitG.pdf) with the May 8th 2014 changes highlighted in green font.
- I have transferred all that we agreed during the meeting on the Feb 26th 2020 into the aforementioned version.

Please review the document; editableVersionofExhibitG.pdf and provide your feedback as soon as possible. I would appreciate a response by the end of March 3rd 2020, there should be nothing contentious in this document, it is what we agreed during our meeting.

Thanks

Dean

SLA Overview

1: Definitions, workflows required and agreed upon before SLA Document can be built

1. Identification
    a. Bug/Problem Tickets
    b. Incident Requests
    c. Service Requests
2. Bug Definition
    a. Severity Levels
        i. Critical
        ii. High
        iii. Medium
        iv. Low
    b. Priority Levels
        i. 1
        ii. 2
        iii. 3
        iv. 4
    c. Change Requests
        i. Prioritization
        ii. BND Estimated Effort
        iii. Sign Off Procedure
3. Incident Definition
    a. Severity Levels?
    b. Priority Levels?
4. Service Requests
    a. Change Requests/Workflow
        i. Prioritization
        ii. BND Estimated Effort
        iii. Sign Off Procedure
5. Incident/Bug workflow
    a. IT Support Levels
    b. Escalation Paths
    c. KPI Metrics
6. Staffing Expectations
    a. ADC IT hours of operation
        i. ADC Escalation Process
    b. BND hours of operation
        i. Weekend support plan
        ii. Escalation Plan
7. Downtime Continuity and Business Recovery Overview (just a review so everyone is on the same page and if there are any updates needed with resources in place and new KPI agreement)

AMERICAN OVERSIGHT

2: Portfolio Management

1. Outstanding Items from previous meeting

2. System Overview
    a. Module(s) Health
        i. Green, Yellow, Red
        ii. Definitions for what constitutes the health of the module
        iii. Action Plan for Module(s) in a Red Status

3. Bug Review
    a. Bug status overview (like the one we used for project status meetings)
    b. Module Breakdown
    c. Bug statistics and metrics (SLA Requirement)

4. KPI Review
    a. System Response
        i. KPI 1
        ii. KPI 2
        iii. ETC
    b. User Response Time
        i. KPI 1
        ii. KPI 2
        iii. ETC
    c. System Availability and Reliability
        i. KPI 1
        ii. KPI 2
        iii. ETC
    d. System Accuracy
        i. KPI 1
        ii. KPI 2
        iii. ETC
    e. Maintenance/Upgrades
        i. KPI 1
        ii. KPI 2
        iii. ETC
    f. Data Integrity and Destruction
        i. KPI 1
        ii. KPI 2
        iii. ETC
    g. Security
        i. KPI 1
        ii. KPI 2

AMERICAN OVERSIGHT

        iii. ETC
    h. Incident Response Time & Target
        i. KPI 1
        ii. KPI 2
        iii. ETC
    i. Incident Resolution Time & Target
        i. KPI 1
        ii. KPI 2
        iii. ETC
    j. User Support
        i. KPI 1
        ii. KPI 2
        iii. ETC
    k. Contractor Staffing
        i. KPI 1
        ii. KPI 2
        iii. ETC

5. ADC Operational Feedback
    a. System wide
        i. Individual Prisons
        ii. Individual departments/areas

6. Support Review
    a. Hours used

7. Parking Lot Review
    a. Prioritization
    b. Hours used
    c. Hours left

8. Planning for next meeting
    a. Action items
    b. Outstanding items

Importance:	High

Hello Dwight,

Following on from our meeting last week and the conversation we had this morning regarding the SLA and the SLA Non-Compliance Withholding %. I wanted to make sure we all very clear that the excel file that was sent was simply detailing the SLA Metrics and not changes with the withholding.

This being said, using the pdf version of the original exhibit G, I have taken the opportunity to convert the metrics we discussed in the meeting and edited the old version of Exhibit G.

I have a couple of points of disclosure about this document:

- The version sent to B&D from Sandy Wang is an out of date version. Attached is an email from May 8th 2014 with the final contract version.
- I have amended the version attached(editableVersionofExhibitG.pdf) with the May 8th 2014 changes highlighted in green font.
- I have transferred all that we agreed during the meeting on the Feb 26th 2020 into the aforementioned version.

Please review the document; editableVersionofExhibitG.pdf and provide your feedback as soon as possible. I would appreciate a response by the end of March 3rd 2020, there should be nothing contentious in this document, it is what we agreed during our meeting.

Subject:	UAT deploy - should be correct now
Date:	Thursday, February 27, 2020 4:15:28 PM

The UAT deploy should be working now

The deploy last night did not go well – my understanding is it deployed to 1 server but had problems with the other 2 servers

The backup deployer did not notice that there was problems with the other servers

We have redeployed to UAT

Let me know if this affects your intention to have us deploy to production tomorrow night

Sorry we didn't catch this – I don't think we really spend a lot of time in UAT unless we are researching something that can't be reproduced in our dev environments

To: Joshua Connolly
Cc: Aaron Pratt; Thad Lowry; Holly Greene
Subject: RE: TFS Bug #37732
Date: Thursday, February 27, 2020 1:43:45 PM

Hi Josh,

The code that retrieves the current location in 04AA will also need to be updated to ignore the internal movements.
Can you please create a new issue for this and we should be able to fix it for PROD push on March 06th.

The current push changes have already been evaluated and we cannot add additional changes for this week push, unless we need to push a critical change.

Sorry about that.

Thanks.

Best Regards,
Wissem ben Aissa.

Subject: Re: TFS Bug #37732

Thank you, Wissem - On 04AA, the previously incorrect location values are back to correct but I do still have a couple of outliers on location involving the ones that were duplicates previously.

These two are a particular DOC_INMATE_TYPE (ICC) and their current location in our 04AA file shows the code from their last internal movement instead of the "Continue Special Services" movement reason that comes just before:

- [redacted] - The SP-zipped 04AA file shows A69 - ACIS banner shows "CENTRAL OFFICE" - Last non-Internal move shows E02 for Location at time of Entry
- [redacted] - The SP-zipped 04AA file shows A51 - ACIS banner shows "CENTRAL OFFICE" - Last non-Internal move shows E02 for Location at time of Entry

In the 04AA CurrentLocationCode, I want to show location at time of entry for their most recent non-Internal move (30-Received From) in order to get the E02 location.
Can that be done in the query and if not, how is ACIS showing "CENTRAL OFFICE"?

These are the only two so I'd rather deal with the incorrect locations over the duplication of rows so if this looks too difficult or the cause is input error, please let me know and we can just carry on with this query as it stands now.

The 04BC file looks good, thank you for trying to sort out the internal move issue.

Talk with you again soon,
- josh C.

Good morning, everyone - I'm just checking in on this fix. We do still have errors in the 04AA locations to be corrected this weekend and I'll be here on Saturday to verify that status and close out the bug. The only difference is that I do not want Internal locations if they cause 04BC the file to be split.

Much appreciated!
Take care,
- josh C.

Hi All

Please use this version, I corrected a number of spelling error and fixed the Incident Response and Resolution to show we will work on their metrics during M&O.

Thanks for your time today, it was very productive.

Dean

Hello Joe and Mike,

I added Ken as well to the message.

I will send the amendment proposal overnight, we are finalizing it as we speak.

You will therefore have it in your mailbox first thing in the morning.

I would propose to have a conversation on it after you had a chance to review it.

I will be available all day for that. You'll let me know.

Benjamin

Hello Joe and Mike,

Following our discussion yesterday, we got the prioritized list of parking lot items and we are working on it as we speak.

As discussed, I will be able to send a proposal to you tomorrow COB. This proposal will be embedded into an amendment draft for your review/approval.

I expect to be able to agree an amendment for Friday, which is the expected date of M&O start.

I hope this proposed course of action is fine with you. Let me know if not.

Cheers,

Benjamin

Subject:	NOTES: ACIS Violent & Non-Violent Records
Date:	Tuesday, February 25, 2020 4:05:54 PM

All -

Thank you for meeting today. The go-forward is:

- Research team will work with the project team to create a change ticket for a future enhancement which will be placed into the parking lot.
    - The change is to add a function / selection within ACIS to capture 'violence' for the inmate profile.
    - This will only be modified by Jet Whitson who will work with the Research team to ensure that the accuracy of the selection

In the meantime, the Research team will continue to pull, calculate and report on the data as it exists today using previous methods and adjusting to new as applicable.

We will revisit this topic once the teams are on the path of addressing enhancements in the parking lot.

Respectfully,

Holly Greene

Subject: FW: Bugs list from my proposal

Hello Joe and Mike,

Thanks for the conversation today.
As agreed, I will work on the list of prioritized parking lot items once I get it from you.

As a follow up from Joe's question, this is the status below on the 32 items that were listed in my proposal back late January.
2 are still active and expected to be fixed for Wednesday's release
1 is in reconsider with ADC
2 are resolved, ready for testing
The others 27 are all closed

Hi Marlene

We are looking into this. But the following image is on the ADC external website for inmate tracking. Note that this image **matches** that which ACIS is using.

AMERICAN OVERSIGHT

Inmate Datasearch

Inmate Access to Information from ADC's Inmate Datasearch:
Pursuant to A.R.S. section 31-221(E), an inmate "shall not have access to any prisoner records other than viewing the prisoner's own automated summary record file." This means that, other than the AIMS report that inmates are allowed to receive once a year, they may not have any other information about their own or any other inmate's prison record. This includes information regarding inmates downloaded and copied from the Arizona Department of Corrections, Rehabilitation & Reentry website. If this information is sent to an inmate, it shall be treated as contraband. The sender will be liable to prosecution under A.R.S. section 13-2505 "Promoting Prison Contraband." This is a Class 5 felony subject to two and a half years in the Department of Corrections.

C01	4 Y/ 0 M/ 0 D	MARICOPA	2017117342002	04/14/2017	03/01/2018	IMPOSED	AGGRAVATED ASSAULT

Disciplinary Infractions *6 record(s)*

Violation Date	Infraction	Verdict Date	Verdict
09/17/2019	DISOBEY VERBAL/WRITTEN ORDER	09/18/2019	GUILTY - Minor
07/23/2019	POSITIVE OR REFUSAL OF U/A		REFER COMM./DHO - Major
05/15/2019	TATTOO BRANDS PIERCINGS ETC		REFER COMM./DHO - Major

It uses the same interface connection that we use in ACIS (https://apps.azcorrections.gov/mugshots/325524.jpg). Could there be an issue with the mugshot database (ImageWare)? Has something changed on how that system works? I have copied Mike Gomez as I understand he is the custodian of the mugshot DB. A possible, uneducated guess could be; has the underlying database been changed to point to a test system?

Adding to this mystery, we have also been provided with an IP based interface connection for the Sonoran

AMERICAN OVERSIGHT

Repot(http://10.6.0.213/inmatephotos/mugshots[redacted].jpg) which shows the other image in your email.

Next steps:

- Could ADC confirm the correct connection string that ACIS should be using for mugshots?
- Could ADC confirm which image is the correct one for this inmate?

Thanks

Dean

Good Afternoon,

I am about to enter a bug for the inmate below. The picture in ACIS does not match the inmate. I have confirmed the photo in ACIS does not match the photo for the inmate that is in either MUG Photo or LE Web. LE Web and MUG Photo match the inmate photo that is on the inmate's ID card and the inmate. At this time, we don't know how many inmate records may be impacted.

Respectfully,

Marlene Coffey, ADW

Ma'am
The attachment shows we have a different inmate on ACIS then the escape flyer. This inmates picture does not match what is in ACIS, The inmate was brought down to Count movement where we verified information against his escape flyer and the flyer has the correct pictures, I'm not sure how this happened. Can you fix this or does this need to go to someone else?

From: Benjamin Bussenault on behalf of Benjamin Bussenault <benjamin.bussenault@bndna.com>
To: Joseph Profiri; Michael Kearns
Subject: FW: Bugs list from my proposal
Date: Monday, February 24, 2020 2:35:21 PM

Hello Joe and Mike,

Thanks for the conversation today.
As agreed, I will work on the list of prioritized parking lot items once I get it from you.

As a follow up from Joe's question, this is the status below on the 32 items that were listed in my proposal back late January.
2 are still active and expected to be fixed for Wednesday's release
1 is in reconsider with ADC
2 are resolved, ready for testing
The others 27 are all closed

Benjamin

Thad,

Following the feedbacks from the team, I need the complete list of bugs that were listed in my proposal and have for each one of them the status.
Can you send that to me quickly?

It is for Joe Profiri.

Thanks

Hi Dwight,

I would like to keep this process moving, we made great progress last week and the slide decks have been amended following that meeting.

Could we please get some formal feedback and agreement on the items that we changed. Could we get that by COB Tuesday? I will set a meeting up on Wednesday to add any of the outstanding items and finalize the M&O setup.

Thanks and have a great weekend.

Dean

Thad, to be clear, we understand the TODAY+n is different.

Our focus is on TODAY+1 that does not work, and the inability to bring inmates back into the gate. They continue to show as OUT.

Warm Regards,
Spencer Scott, PMP

> >
> > This arbitration request is narrowly focused on the Today+1 issue. ADCRR cannot update ACIS to show an inmate has been brought back into the gate the next day. The workaround B&D has suggested is to enter false data into the inmate's records and bring them back into the gate on the date they left. The false data associated with this ACIS workaround would cause major practical, legal, and policy issues, which would impose liabilities to staff and the department, so we cannot perform this workaround.
> >
> > ADCRR requests the code be fixed to allow Today+1 to function as defined in the FSD's and for all of the inmate records affected by this problem (i.e. inmates stuck outside of the gate) to be corrected. This second part is a data cleanup request. The department has not fully cleared count since go-live because of this issue.

AMERICAN OVERSIGHT

fixed yet. video attachment as proof that we cannot bring in an inmate back in even if inmate's job assignment was not altered while out the gate.

- Item 2: It is ADC's position that your summary of Item 2 is correct, except that this is not a change. ADC elaborates on this point in a question below.
- Item 3: It is ADC's position that your summary of Item 3 is correct, except that this is not a change. ADC elaborates on this point in a question below.

Is item 1 the only item that should be associated with TFS ID 40696?

- Correct.

Are there any additional use cases that I missed?

- No, however it is ADC's opinion that B&D is misrepresenting the FSD verbiage in their argument. One use case says, "the system shall allow the end time to be in the next calendar day". Another use case allows for the creation of linked cycles. The FSD does not state that fulfilling the requirements of the first use case shall be accomplished through the completion of the second use case.

Has item 1 been resolved or is there a workaround?

- Item 1 : Bug 40696 : Today+1 : B&D states there is a workaround, but ADC believes the workaround doesn't work. B&D's proposed workaround involves ADC to falsify records by checking the inmate back in "before" midnight, and then falsely checking them back out for "after" midnight.

Has item 2 been resolved or is there a workaround?

- Today+n(n>1): It is ADC's position that there should be a separate bug created for this issue. This has not been resolved and the workaround still involves falsifying documentation.

Is item 3 the same as TFS ID 41145?

- Yes item 3 is the same as TFS ID 41145 and should be treated separately. ADC's preferred workaround would be to have the ability to change the effective date to a future date, without the system removing the inmate from v-gate today. Video of this glitch is attached in this response.

Warm Regards,
Spencer Scott, PMP

M&O SLA's

B&D Proposal

AMERICAN OVERSIGHT

RFP Section VI. - C. Payment – 3 Service Level Agreement

3. Service Level Agreements

The Department shall monitor the Contractor's performance during Maintenance and Operations using a performance reporting system to be implemented by the Contractor. Each SLA established in the Contract establishes the performance level expected by the Department in a particular area. Key Performance Indicators (KPIs) are identified within each SLA and are to be measured and reported each month by the Contractor. The SLAs are:

- System Response
- User Response Time
- System Availability and Reliability
- System Accuracy
- Maintenance/ Updates/ Upgrades
- Data Integrity / Destruction
- Security
- Incidence Response Time/ Target
- User Support
- Training
- Contractor Staffing
- Reporting

The KPIs used to define the service levels are an adjunct to the performance standards established in Section III. The Department has identified the KPIs to be key indicators of the Contractor's operational performance. Failure to achieve a KPI may, at the discretion of the Department, result in financial retainage at the amounts proposed in Table 8 in Section V of this RFP and finalized in the Contract.

The Department and the Contractor agree that failure by the Contractor to perform in accordance with established KPIs results in a loss to the Department. If the Contractor fails to meet the KPIs identified in the SLAs listed in the Contract, the Department may retain a percentage of the billed amount, as identified in the Contract, and deduct the specified amounts from the fees due to the Contractor for the total of Solution Maintenance and Operations Price billed that month.

Amended by "Solicitation Amendment 5.2"

	these additional proposed Key Project Personnel?	
107	Page 154, Failure to achieve a KPI may, at the discretion of the Department, result in financial retainage at the amounts proposed in Table 8 in Section V of this RFP and finalized in the Contract. The Offeror cannot find Table 8 in the RFP, can the State please clarify?	This statement is amended to read "… at the amounts proposed in Exhibit G of this RFP and finalized in the Contract." ALL REFERENCES TO TABLE 8 SHOULD BE IDENTIFIED AS EXHIBIT G

- Original RFP – Version page 92

(5) Problem Management

The Contractor shall manage Solution problems during M&O. The Contractor shall provide software tools to track each defect from identification through correction and testing. The Contractor shall make the initial categorization of errors and resolve errors as follows:

- **Priority 1 Errors.** *Critical business impact.* Indicates Solution is unavailable for use resulting in a critical impact on operations. Requires notification of ADC within one (1) hour of problem discovery and resolution within two (2) hours.
- **Priority 2 Errors.** *Serious business impact.* Indicates serious production issues where the Solution is usable but is severely limited, and no workaround exists. Requires notification of ADC within one (1) hour of problem discovery and resolution within twenty-four (24) hours.
- **Priority 3 Errors.** *Significant business impact.* Indicates moderate production issue where the Solution is usable and a workaround is available (not critical to operations). Requires notification of ADC within one (l) hour of problem discovery and resolution within five (5) business days.
- **Priority 4 Errors.** *Minimal business impact.* Indicates the problem results in little impact on operations or there is reasonable circumvention of the problem Requires notification of ADC within one (1) hour of problem discovery and resolution within an agreed-upon schedule between the Contractor and ADC.

ADC shall have final approval over categorization of errors.

Suggested Severity Definitions

- Critical - Indicates the entire Solution is unavailable for use resulting in a critical impact on operations.
- High - Indicates a Module[1] is unavailable for use where the Solution is usable but is severely limited, and no workaround for that Module exists.
- Medium – The operation of a function in the application is restricted but use of other functions is not impacted or where a requirement is not being met, but the application is otherwise usable.
- Low - Minimal business impact. Indicates the problem results in little impact on operations or there is reasonable circumvention of the problem. For example misspelled words, graphical designs.

AMERICAN OVERSIGHT

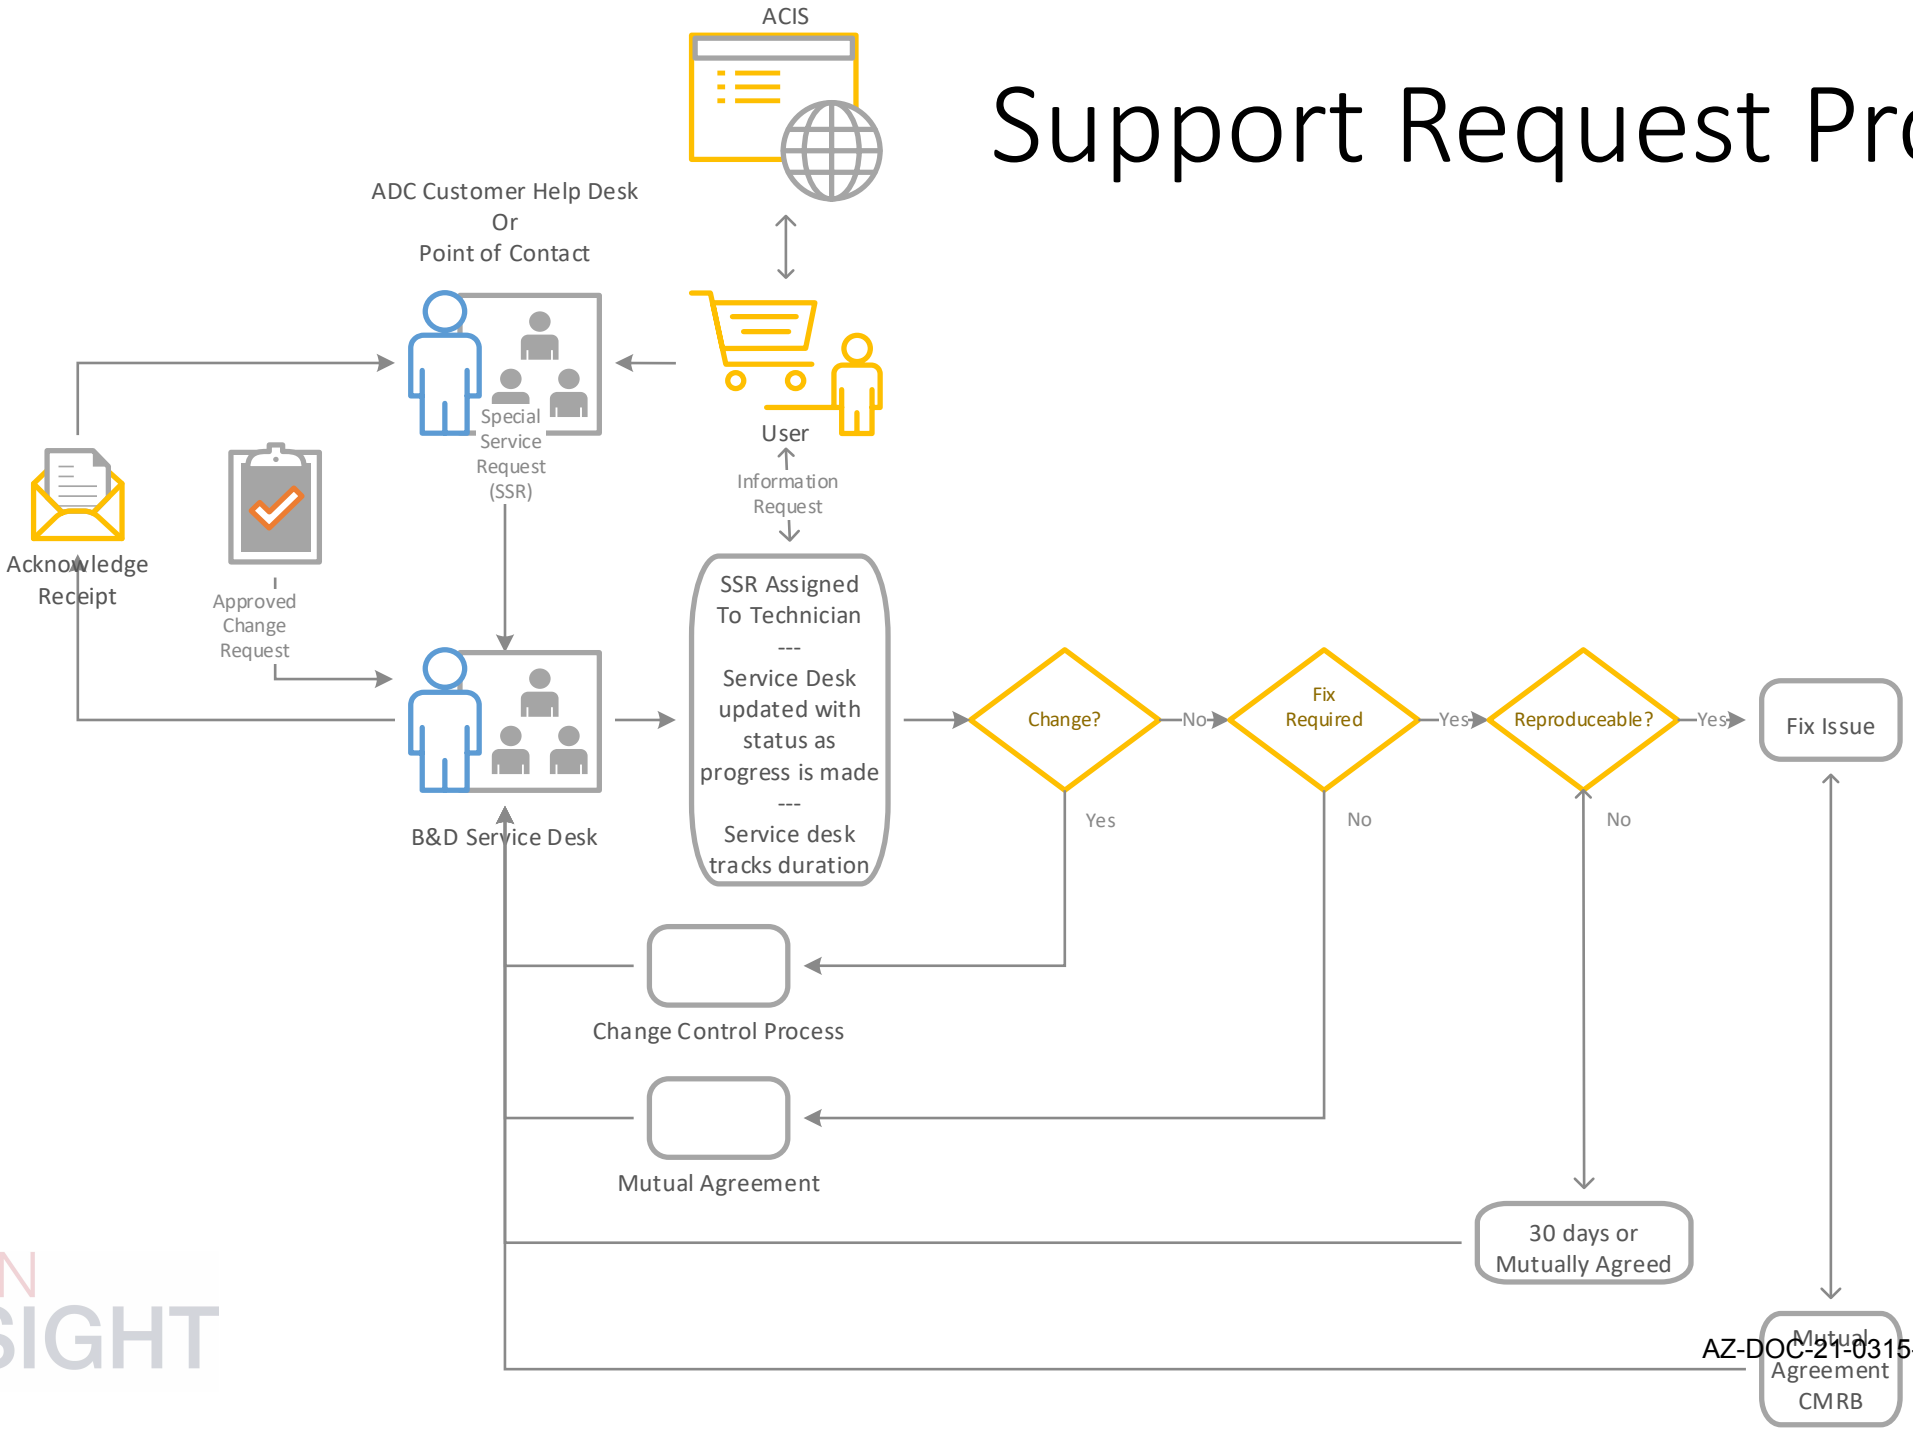
Support Request Process



AMERICAN OVERSIGHT

Change Request Approval Process

- All change requests shall be requested formally by ADC – outlining the requirements of the change and the desired results
- B&D shall formally respond to all change requests with an estimate
- ADC shall formally approve all change request estimates and prioritize their importance
- Upon approval of the estimate by ADC, B&D will plan the development and identify a projected start date and estimated completion date
- Upon approval of the plan by ADC, B&D will work on the change request based the plan
- During working on the change request B&D will track actual hours against the estimate and report progress weekly
- If the change request appears that it will not complete on the planned estimated completion date or if the amount of effort required to finish the change request will exceed 10% over the estimate, B&D will notify ADC and stop working on the Change.
    - ADC will need to then take one of the following actions:
        - Formally ask B&D to proceed to completion of the change request –setting new target thresholds (end date or cost overages)
        - Formally ask B&D to re-estimate the change request (step 2)
        - Formally ask B&D to drop the change request / perhaps identifying a new change request with altered requirements / expectations
    - Upon approval to proceed B&D will commence work on the Change request (delays between stopping work and restarting will be reflected in a revised plan for the project)
- Upon completion of the change request, B&D will deliver the change request to UAT
- ADC will then test the Change Request
    - Any support that B&D provides during UAT testing will be billed against the Change request
    - Any bugs identified (during UAT) and subsequently worked on by B&D (during UAT) will be billed against the Change request
    - Any changes made by ADC to the requirements or expectations of the change request will need to be done formally in writing by ADC
        - B&D will estimate the effort and the impact to the due date if any
        - B&D will not work on the changes to the Change Control until ADC approves the estimate and plan

All,

I received a call at 12:20 AM from COCC. The Sargent stated that ACIS was down across the agency. Tucson, Lewis, and Eyman reported that the site was not available. From the time it took me to get out of bed and get to my computer, I was able to log into ACIS from my home computer. The Sargent said he still couldn't get into ACIS. I logged into my machine in my office and was able to connect and login. They tried again and ACIS came up.

AMERICAN OVERSIGHT

I have no idea how long it was down, nor was I aware of any updates or planned outages from the B&D side. Just a heads up for the day.

Respectfully,

Joseph Nicoletti

Subject: Fwd: examples where ACIS records somebody as non-violent

Hello Charles-

Please see the email thread below. Research has located records where ACIS data reflects a person as non-violent when in reality, they should be classified as violent.

Below are some examples records:

- ADC# [redacted] 13-3601 Domestic Violence (note: no enhancement codes)
- ADC# [redacted]: 13-1209 Drive By Shooting
- ADC# [redacted] 13-1410 Molestation of Child

Jey looked into these records, but was unable to locate a common thread. He noted the following:

- [redacted] and [redacted] both have non-dangerous on their new DT02
- [redacted] is marked as dangerous
- [redacted] sentence has expired
- the other two are still serving the offenses (which research was looking for)
- All three of them have the sentence in the current episode (so this isn't a factor)

AMERICAN OVERSIGHT

It's speculated that there may be something off with the query or the data extract. So we're looking to B&D to assist with researching the issue.

I understand you are out of the office this week, so please let us know what your availability is next week (Tue or Wed) to talk through this item.

Respectfully,

Holly Greene

Hi Sandy,

It seems there was some confusion. Someone mentioned it was done. I'll double check.

Matt

Subject: Re: Report Promotion

Hi Thad,

Thank you for getting the ad hoc report ADC Alerts by Unit into UAT for testing. It has now passed UAT testing and should be promoted to PROD at the next opportunity. I've updated our reporting requests SharePoint list with this request. As noted there, this report depends on the stored procedure "ADC_CASE_NOTE_INMATE_ALERTS".

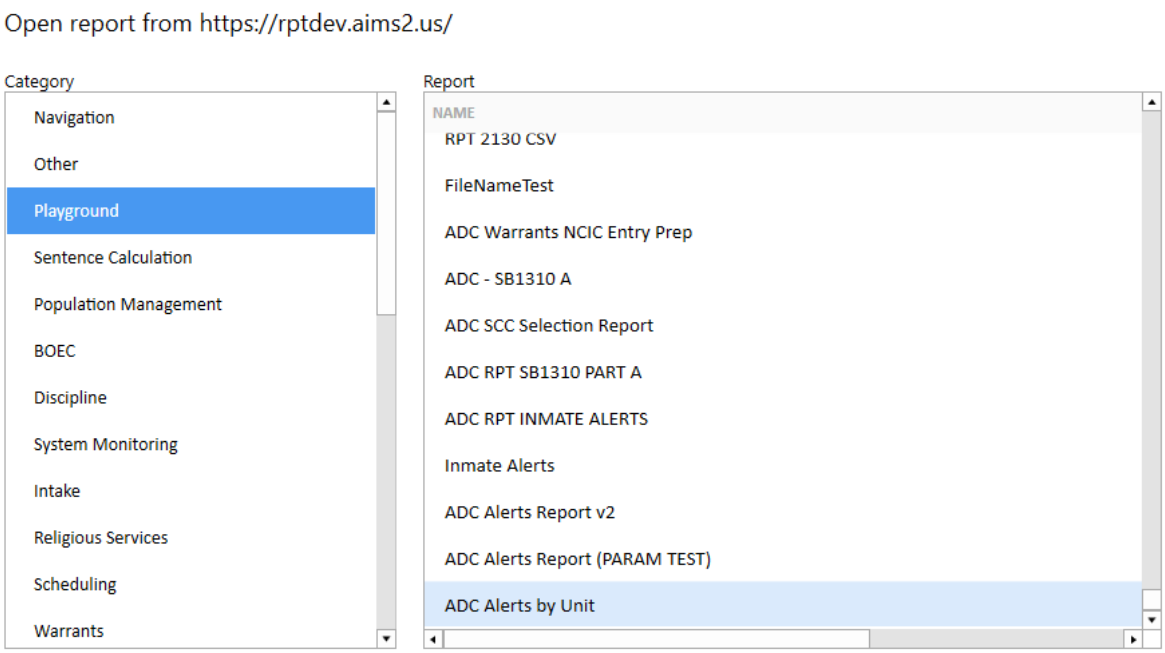
Subject: Re: Report Promotion

Hi Thad,

May I please have the RPTDEV report "ADC Alerts by Unit" promoted to QA?



It requires a stored procedure called "RPT_DEV.ADC_CASE_NOTE_INMATE_ALERTS" that needs to be promoted with it.

Yes- this was before I had more in-depth conversations with my supervisors to ensure what the RCA covered was sufficient. It wasn't, hence my additional questions.

- We offered an idea of a role with the ability to change the statuses. The reality is- it'll most likely be Visitation Officers.
- There are issues between the two. We still need to put them in any status, to include Pending.
- We agree that it's ideal, but clearly doesn't work in many instances and manual interventions need to happen.

Respectfully,

Alexandria Bailey

We need to be able to put them in ANY status. We have visitors being inactivated for reasons that isn't "Visitor Requested Removal" and should be able to apply immediately and we get the "you have to wait 90 days" message. EX: An inmate was released. We inactivated his visitors (since the system doesn't do that upon release). 10 days later, the inmate comes back into custody and the visitor submits an application. We cannot enter it because of the 90 day hold error. Per policy, the only Inactivation reason that should hold them for 90 days is if the visitor requests removal via notarized letter.

AMERICAN OVERSIGHT

1. For the denial letter, can it be a free text box? Chances are these denials would be on a special circumstance situation. No this process is already functioning correctly, we could add another reason of Special Circumstance to inserted when it is created via the Admin buttons. Is this letter editable? Some open in a word document to be printed and we can do free text in the body. If "Special Circumstance" is the reason, the letter literally only says "you were denied for special circumstances" and doesn't specify anything.

Denial letter from the DW Dash:

Date: 2/5/2020

[redacted]

Dear [redacted]

Pursuant to Department Order 911, Inmate Visitation, your application has been denied because

Other |

You may appeal my decision with a written explanation and any official documentation within 10 workdays of receipt of this denial to:

JEFFREY NMI VAN WINKLE, Warden

1305 E Butte Avenue, Florence, AZ 85132

Sincerely,

SANDRA NMI WALKER

Arizona State Prison Complex – FLORENCE

2. For the roles, it would be Visitation Officer, Deputy Warden and Wardens. I thought we agreed that this would not be available to all Visitation Officers. I suggest we create a Visitation Admin. Role for this. We did, however, after further discussion, this is more likely a function the Visitation Officer needs. It's how they did their job in AIMS. Their physical paper documentation will backup any entries made in ACIS.

3. Yes, that would work. Okay

4. We think it would need the ability to be appealed. Okay, we will set to dash step 4 to allow the current appeal process to continue.

Respectfully,

Alexandria Bailey

Cindy,

A few questions:

In regard to the mockup, Can we also add an "Admin Pending" button? What purpose would this serve, I thought the issue was with the Denied and Approved statuses being incorrect.

Responses to your questions:

1. For the denial letter, can it be a free text box? Chances are these denials would be on a special circumstance situation. No this process is already functioning correctly, we could add another reason of Special Circumstance to inserted when it is created via the Admin buttons.

2. For the roles, it would be Visitation Officer, Deputy Warden and Wardens. I thought we agreed that this would not be available to all Visitation Officers. I suggest we create a Visitation Admin. Role for this.

3. Yes, that would work. Okay

4. We think it would need the ability to be appealed. Okay, we will set to dash step 4 to allow the current appeal process to continue.

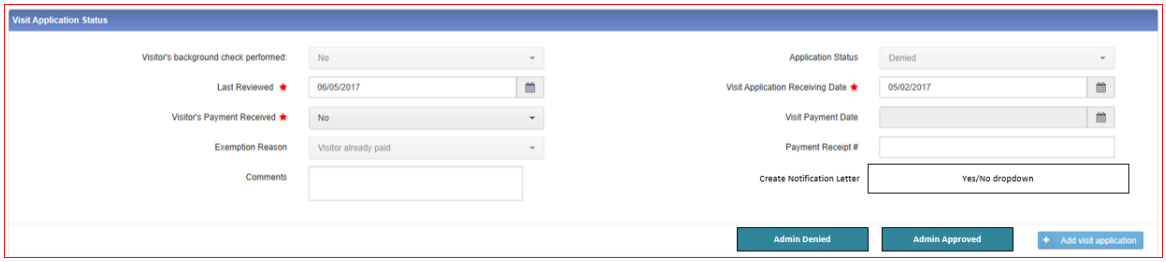
AMERICAN OVERSIGHT



That being said we do have some questions:

1. If the user selects to create the notification letter, what reason should we populate for the denial? Please confirm if we only create the letters for the denials. If created, the action queue template that we already have in place with the reason being Visitor Status Change will suffice.
2. What role would have access to these buttons?
3. Is it okay that whether approved or denied using the new buttons, ACIS will set the dash step to 6 for Approved to indicate the workflow process is complete. Basically the new buttons will act as an override to the Application status field.
4. If the Admin Denied is selected do we also set to dash step 6 or can they still appeal in which case ACIS would need o set the dash step to 4 (Warden's Admin dashboard).

By making this addition it should allow you to clean up some of the other bugs as well.

Please confirm if you agree with this addition and if so I will make the updates to the FSD and Aladin can begin on the new development.

Thank you,

Hello Matt-

Just following up on this item. There were a number of emails which were passed back in November, but since the rollout of ACIS, this has taken a lower priority.

We're trying to wrap up some items on our end to ensure folks have what they need with respect to reports and accessibility to data for reporting purposes. This is one product which has been used by Community Corrections (see Hema's email below for more details).

Any assistance you can provide is most appreciated.

Respectfully,

Holly Greene

I would like assistance with putting QlikView packages together. I can open up the individual files, but I don't see how each of the packages are defined. As an example, with Visual Studio projects, each project can be accessed either through the solution or project file, and all the necessary files that are included in the project are gathered accordingly. I don't see how the QlikView files are put together. If someone could put together a couple of examples for us to review I can pick it up from there.

AMERICAN OVERSIGHT

From:	Thad Lowry on behalf of Thad Lowry <thad.lowry@bndna.com>
To:	J.R. Sloan; Spencer Scott
Cc:	Michael Kearns; Dwight Cloud; Lisa Dee Meyerson Marshall; Stacey Crabtree; Jey Whitson1; Marlene Coffee; dford1; Holly Greene; Chris Masson; Dean Allen
Subject:	RE: Arbitration Request 40696
Date:	Wednesday, February 5, 2020 11:52:07 AM

Hi JR,

Here is our response to your inquiry (in blue):

I reviewed the narrative and TFS Bug History included in ADCRR's submission and I see multiple issues being discussed:

1. **End Time = Next Calendar Day (aka Today+1)** - I see BDNA saying that (a) there is a workaround and (b) that this issue has been fixed. I see ADCRR stating "provided workaround doesn't work" but it's not clear to me which of the three issues this statement relates to.
2. **End Time = Today+n (where n>1)** - I see BDNA state that this is a separate use case from "next calendar day" that needs to be entered as a new TFS item. BDNA view this as a change.
3. **Inmate removed from program while checked out.** - I see BDNA identify this as another use case and request a separate TFS item. BDNA view this as a change.

My questions:

- Are my description of items 1 thru 3 above correct?
    - B&D see items 1 & 2 as the same issue, with exactly the same workaround. The work around described by B&D works under the assumption that Item 3 has not happened. The work around is the user navigates to the day the inmate was checked out of the v-gate & record the check in. The entire issue at hand is caused by Item 3 occurring.
- Is item 1 the only item that should be associated with TFS ID 40696?
    - B&D believes 40696 is no longer a valid bug. The reason users could not check in the 9 inmates described was because they were removed while checked out as a result of item 3.
- Are there any additional use cases that I missed?
    - There are additional Use Cases directly written regarding the functions of the Vehicle Gate screen within the Scheduling modules FSD. There are 10 total V-Gate use cases, but none of them address the case or actions on when an inmate is removed from their assignment whilst they are presently checked out.
- Has item 1 been resolved or is there a workaround?
    - B&D contends there is a work around and should be closed as not a bug.
- Has item 2 been resolved or is there a workaround?
    - The same work around for Item 1 applies, B&D contends it should be closed as not a bug, and a new change request opened.
- Is item 3 the same as TFS ID 41145?
    - Correct, Item 3 is TFS ID 41145.

We hope this provides some clarity to your questions. Please let us know if there is something else that would help move this forward

AMERICAN OVERSIGHT

Thanks,

Thad

Subject: Re: Arbitration Request 40696

Spencer / Thad,

After reviewing both writeups, I have the following question / request for clarification:

ADCRR's submission references TFS IDs 40696 and 41145 as issues which both end up with inmates checked out but unable to check them back in.

BDNA's submission indicates that TFS ID 40696 was fixed and that only 41145 remains as the item to be addressed in this arbitration.

I reviewed the narrative and TFS Bug History included in ADCRR's submission and I see multiple issues being discussed:

1. **End Time = Next Calendar Day (aka Today+1)** - I see BDNA saying that (a) there is a workaround and (b) that this issue has been fixed. I see ADCRR stating "provided workaround doesn't work" but it's not clear to me which of the three issues this statement relates to.
2. **End Time = Today+n (where n>1)** - I see BDNA state that this is a separate use case from "next calendar day" that needs to be entered as a new TFS item. BDNA view this as a change.
3. **Inmate removed from program while checked out.** - I see BDNA identify this as another use case and request a separate TFS item. BDNA view this as a change.

My questions:

- Are my description of items 1 thru 3 above correct?
- Is item 1 the only item that should be associated with TFS ID 40696?

AMERICAN OVERSIGHT

Are there any additional use cases that I missed?

- Has item 1 been resolved or is there a workaround?
- Has item 2 been resolved or is there a workaround?
- Is item 3 the same as TFS ID 41145?

I need answers to these items in order to understand what I am being asked to arbitrate. If there is significant information that I haven't covered here and you feel a phone call is needed, please let me know.

Ok understood.

I will come back in 2 weeks. So maybe by then we will be able to sit together and get to a resolution
Alternatively, we can have a discussion over the phone later this week or next week.
You will let me know what will work for you.

In any case, can we expect a formal response from ADC/ADOA on our proposal?

Thanks to let us know as this has an immediate impact on our working schedule. We offered indeed to dispatch Business Analysts to sit with AZ operations teams and better understand the nature of the issues they report. Should we proceed? We will need ADC authorization for that.

Thanks in advance for your response,

Benjamin Bussenault

> I let you determine whether Director Shinn's presence is needed. I think he made his view pretty clear yesterday. Unless he is willing to understand the specifics of the situation, I don't think he absolutely needs to attend. He will have to give his agreement to any compromise we may reach though of course. So you would have to get his formal stance (or counter proposal) on the proposal I will make.

Chris Masson, had to go home today for a family emergency

I'm working from home with a very sore throat and congestion

I'm happy to do this on the phone today – or would you want to postpone this

Subject:	Non-Prod DB Refresh
Date:	Friday, January 17, 2020 9:32:53 AM

Hi everyone (please forward to anyone not on this email if appropriate),

- We intend to do a DB refresh this weekend from PROD to: UAT, RPT_DEV, QA_INT

This has some serious implications for you or anyone else that was doing AD-HOC report development in RPT_DEV

The refresh will wipe out any work you have in progress and write the procedures and views that are currently in PROD

You will need to save all of your work locally (views, queries, procedures, reports) and then rerun them after the refresh is completed

There is no backup, no oops, no "can you restore"… once it's gone it's gone

Our developers are used to this process but since this is potentially your first refresh, I just wanted to make sure you are aware

The Ops team is working on issues with the report server

It's not clear to me whether what was being reported was

- the same issue as yesterday
- All Reports are down
- Having trouble with specific reports

It doesn't appear to be the same problem as yesterday

I'll keep you posted as we get closer to a diagnosis and a resolution

---

We have looked into 41192 and the description says "Using the cancel button within a classification action should generate a new AQ item for the COIII. Used inmate [redacted] Had to retrigger the classification in order to proceed. ". We have addressed that issue with the fix we implemented. The new issue included in this bug is referring to Max Custody Placement which was not indicated as the bug to be fixed. This issue may already exist in PROD and we would like someone to test if it currently occurs in the PROD environment. If the Max Custody Placement works in PROD today, then we will continue to explore the possibility of reverting the code, but if the issue exists in PROD today then we need a new bug to address this specific issue and we can work to resolve that for the next UAT build next week. Please let us know your findings after checking PROD for the Max Custody Placement issue.

AMERICAN OVERSIGHT

Bug#41192 has been determined to have a detrimental impact to the performance in production. We need this bug fix pulled and not re-introduced into future releases.

If this bug can be pulled from the bundle, we can authorize the rest of the Release 6 bundle to go into production tonight as planned.

If this bug cannot be pulled from the bundle, we will need to have a new bundle prepared and pushed to UAT when it is ready. We understand this will likely be next week.

This plan has been approved by Dwight Cloud and Stacey Crabtree.

Warm Regards,
Spencer Scott, PMP

Attachments: image002.png
image003.png
image004.png
image005.png

Here is the current rule for migration for the 2 statuses of a visitor: Visitor level status (05AA segment) and Inmate level status (05BB segment)

1. Migrate Visitor level status to ACIS Visitor Information screen
2. Migrate Inmate level status to ACIS Visitor Registration and Application status

This rule #1 above is causing discrepancies between Visitation screens in ACIS, which expects the status to be matching / congruent, and may need to be modified as follows (please make any corrections needed):

If any of inmate level status for the visitor is **Suspended**, then the Visitor level status should be **Suspended**,
Else if any of inmate level status for the visitor is **Approved**, then the Visitor level status should be **Approved**,
Else if any of inmate level status for the visitor is **Pending**, then the Visitor level status should be **Pending**,
Else if any of inmate level status for the visitor is **Denied**, then the Visitor level status should be **Denied**,
Else Visitor level status should be **Inactive**

Thanks.

Subject: RE: Updating Visitor Payment Reasons

ACIS screens with conflicting status are Visitor Registration and Visitor Admin screens.

In UAT and PROD both screens show Denied, which we are trying to fix. When I apply the fix, the status would then match AIMS status in DV01 screen, however QA says migrated statuses are conflicting.

Thanks.

Subject: RE: Updating Visitor Payment Reasons

Spencer,

Sorry if I gave you the impression it will be resolved yesterday. As I mentioned in the meeting, there are 2 parts to the resolution

1. data errors that can be fixed with a script. This part is pretty complex due to the scenarios involved and data volume. This will be pushed as soon as it passes QA.
2. Application fix that will prevent this happening in the future. This will be pushed during the next release.

Thanks.

Date:	Wednesday, January 8, 2020 12:21:03 PM
Attachments:	image003.png

Good afternoon,

Spencer and I were able to sit down with Lynda Wade and discuss her concerns over the 2130 - PAY WIPP Detail Report. The BND team will research what changes could be made to the report in order to meet Lynda's needs. The report was developed per questionnaire and passed UAT testing accordingly. In the meantime, Lynda and her team in the field are able to use the 2040 - Missing Hours Report in order to perform their daily job function. This is a functioning work around at this time. If there are any further questions, please let me know.

Thank you,

Charles Spannagel

Subject: RE: Updating Visitor Payment Reasons

ACIS screens with conflicting status are Visitor Registration and Visitor Admin screens.

In UAT and PROD both screens show Denied, which we are trying to fix. When I apply the fix, the status would then match AIMS status in DV01 screen, however QA says migrated statuses are conflicting.

Thanks.

Subject: Updating Visitor Payment Reasons

Hello All (sorry if I missed anyone!),
Per our RCA, we discussed changing the Exemption Reason from "Migration" to "Visitor Already Paid" for the following:
-Visitors who migrated with payment
-Regular Visitors who were approved prior to the implementation of payment on July 20, 2011.
<image006.png>

Attachments:	image001.png image002.png image003.png image004.png image005.png

Spencer,

I can do a UAT code push tomorrow. Will Wednesday's become the new standard UAT deployment day rather than Thursday's?

The PROD data synch cannot be done until we can we can have a database outage to make a change to the server that will allow us to capture the PROD data without the current temp table issues that we run into today. The outage needs to be scheduled for the weekend when I can have my Operations and DB people ready to make the server update and bounce the server for the changes to become permanent.

Thank you,

Subject: TFS Bug/Issue follow-up questions for B&D

1. eOMIS
Eli asked about messages that have errored out and need to be reprocessed. Aaron Pratt was working on planning an interface for ADC to use that would allow us to reprocess the errant messages. Per the current arrangement, B&D is refusing to work on enhancements. In the meantime, ADC does not have the capability to reprocess the errant messages, so we need B&D to provide a timeline of when they will

AMERICAN OVERSIGHT

reprocess these inmates medical messages.

2. COPLAN8/MINI
2a. B&D and ADC discovered the report has different information that is showing on the ACIS screens (Issue36044). 2b. B&D is asking ADC to find these discrepancies. While we are happy to support B&D's efforts, we need B&D to own the effort of searching and correcting these discrepancies.
MOST_SERIOUS_CURRENT_OFFENSE (issue39520). This was just assigned back to WissemB today. I've been asked for you to get an ETA on when this will be returned to ADC for validation?

3. B&D Ticket Assignments
It was brought to our attention that the B&D ticket assignment list needs to be updated. Please confirm when it will be reviewed and updates published. As part of our daily bug review meeting, we will now need to verify B&D assignments for bugs with a 48-hour+ lag in status.

4. WARRANTS
There are 12-13 tickets assigned to a B&D staff member who is no longer assigned to the ADC account. His tickets have gone unworked for 2+ weeks. Several of these tickets are severity=HIGH. Please reassign these tickets and work to get an ETA on the HIGH bugs.

Warm Regards,
Spencer Scott, PMP

Subject: RE: TFS Bug/Issue follow-up questions for B&D
Date: Tuesday, January 7, 2020 1:42:52 PM
Attachments: image001.png

Good afternoon Dwight and Holly,

For issues 3 and 4, we have addressed this internally today.

Issue 1: From my discussions with Aaron, this will be a change. We will need to discuss with Dean and Thad.

Issue 2: If I am reading this correctly, then as soon as ADC finds the discrepancies we will look into them? Am I missing something?

Cc: Dwight Cloud <dcloud@azadc.gov>; Holly Greene <hgreene@azadc.gov>
Subject: TFS Bug/Issue follow-up questions for B&D

1. eOMIS

Eli asked about messages that have errored out and need to be reprocessed. Aaron Pratt was working on planning an interface for ADC to use that would allow us to reprocess the errant messages. Per the current arrangement, B&D is refusing to work on enhancements. In the meantime, ADC does not have the capability to reprocess the errant messages, so we need B&D to provide a timeline of when they will reprocess these inmates medical messages.

AMERICAN OVERSIGHT

2. COPLAN8/MINI
2a. B&D and ADC discovered the report has different information that is showing on the ACIS screens (Issue36044). 2b. B&D is asking ADC to find these discrepancies. While we are happy to support B&D's efforts, we need B&D to own the effort of

.

MOST_SERIOUS_CURRENT_OFFENSE (issue39520). This was just assigned back to WissemB today. I've been asked for you to get an ETA on when this will be returned to ADC for validation?

3. B&D Ticket Assignments
It was brought to our attention that the B&D ticket assignment list needs to be updated. Please confirm when it will be reviewed and updates published. As part of our daily bug review meeting, we will now need to verify B&D assignments for bugs with a 48-hour+ lag in status.

4. WARRANTS

Subject: RE: Updating Visitor Payment Reasons

ACIS screens with conflicting status are Visitor Registration and Visitor Admin screens.

In UAT and PROD both screens show Denied, which we are trying to fix. When I apply the fix, the status would then match AIMS status in DV01 screen, however QA says migrated statuses are conflicting.

Thanks.

Subject: Updating Visitor Payment Reasons

Hello All (sorry if I missed anyone!),
Per our RCA, we discussed changing the Exemption Reason from "Migration" to "Visitor Already Paid" for the following:
-Visitors who migrated with payment
-Regular Visitors who were approved prior to the implementation of payment on July 20, 2011.

EN is an inmate status code that indicates the inmate is 'En-Route', i.e. in transit from one facility to another.

Effectively I imagine it should be treat the same as the existing 'Active' status.

Hi John, Mike

I just sent you an email containing the latest MINI COPLAN (zipped 8MO) file attached.

Can you please confirm you have received the email, or should I upload it to SharePoint site ?

Best Regards,
Wissem ben Aissa.

George

As we discussed yesterday, Jey was going to use this to identify incorrect locator code / facility combinations.

Jey if you need any excel help on this please reach out.

Thanks

Dean

Now that ACI is paying inmates in ACIS, they need the ability to run a report BEFORE they forward pay to Keeptrak to ensure they entered the correct pay for all of the inmates.

The filters of the report should include:

- What type of ACI Category is it?
    - Labor Contract
    - Owned and Operated
- Depending on the selection above the next menu should display those jobs under that:
    - Labor Contract
        - System should pull all of the actives Labor Contract assignments
    - Owned and Operated
        - System should pull all of the actives Owned and Operated assignments
- Enter FY
- Enter PP
- Press Preview

The system using the Manage Participation Screen should go in and find all of the:

- Total Hours
- ACI Gross Pay
- ACI Adjusted Amount
- ACI PIE Net Pay (If Applicable)

Total the Data for each area and display the results.

Hello John-

I've included B&D contacts: Chris Little, Dean Allen, Charles Spannagel and Chris Masson on this communication.

Hello B&D -
Please review the messages below. Keefe needs to look at log files on last week's payroll processing for a specific ADC number. KeepTrak has an active account for a particular person, but they have no record of payroll being sent through. I don't see the information for the inmate (maybe I'm overlooking). So please work with John to obtain.

Ok, this pull of classification data from Oracle appears to be working as intended today.
Thank you Raj and Keith for the quick responses.
Take care,

AMERICAN OVERSIGHT

Can you check into any possible causes of this? It runs at 6 a.m. every morning.

I'll work on getting the error as seen from a SQL*Plus command prompt tomorrow as that may be more useful on the Oracle side.

Thank you kindly,

- josh C.

> Hi Aaron,
>
> The issue with location codes in Enforcer doesn't have a solution planned yet or an ETA, but it certainly needs one. The issue, as I understand it, is that inmates who changed location between go-live and 2019-12-20 had their locations updated in ACIS but not Enforcer. When those locations don't match, inmates may not be able to place calls. George and I don't have a list of affected inmates. We've put bug 41119 in, but this is another that may require special collaboration. I see two tasks and six possible options, but I could really use some recommendations from you and Steve and Jey:
>
> 1. Identify the affected inmates (three options):
>
> (a) collect and contrast inmate locations in ACIS and Enforcer OR
>
> (b) get an ACIS query listing inmates whose locations changed in ACIS between 2019-11-29 and 2019-12-20 OR
>
> (c) gather the list of problem inmates from ACIS users

AMERICAN OVERSIGHT

2. Update Enforcer locations for affected inmates (three options):

(a) write and run an Enforcer script OR

(b) trigger a location update through the ACIS/Enforcer interface OR

(c) manually update locations in Enforcer through the Enforcer GUI

We created bug 41119 as the bug for this issue. Bug 40834 "Visitors on verified “PENDING" status are able to receive phone calls from the inmate(s) they are applying to visit." is not the same issue. We used a separate bug for the root issue where ACIS was not triggering Enforcer location code updates, which is resolved and closed (40750). 41119 applies only to the remaining data clean up.

On Sat, Dec 28, 2019 at 9:24 AM Aaron Pratt <aaron.pratt@bndna.com> wrote:

> Hey guys. Regarding the locator code issue with enforcer. See this email from George to Steve on the 20th. Was this not to correct the issue? I'm not sure if this data is correct or not but it seems to indicate that George and Steve had a plan back on the 20th to correct the data. However when I bring this up to George (ie comments in bug 40834) he doesn't seem to know what I'm referring to. Also I think 41119 is a duplicate. I don't think both of these bugs need to remain open.

AMERICAN OVERSIGHT

Greetings,

I have not heard anything from anyone … what is the current state.

#1) should I update the inmate sites based on mapping the locations to the external site codes and sites ?

#2) is the API being updated to have the location data put in the ext_site_cd in the json block ?

Kind Regards,

Steve Shieldes

Director IT

Subject: RE: API - Rest Detail for adding PAN

Greetings,

George M., based on the location values and using that mapped for the site_id .. here is the list of inmates currently listed in the wrong site on the enforcer. I would like to correct these, so the inmates are able to make calls.

NOTE: these inmates are unable to make calls is there enforcer site is not what the real site is.

Kind Regards,

Steve Shieldes

Subject: RE: API - Rest Detail for adding PAN

Greetings,

Aaron, "You want the same value BOTH "location" AND "ext_site_cd"? " --- YES that would be the best but most important to have the value in the "ext_site_cd".

George M, I am going to look at the "location" column for the inmate and map to the ext_site_cd column update the correct site_id that the inmate should have if they do not match correctly. I will send the list before I do it.

So it's hard to explain the difference between location and ext_site_cd .. but let me try.

ext_site_cd = A value that we use to map a relation to what ICS uses as a site_id, and this is what we call a "site or facility"

EXAMPE

ext_site_cd | site_id | name

----------+---------+----------

M51 | 4115 | ASP-Marana CCTF, AZ

AMERICAN OVERSIGHT

M52 | 4115 | ASP-Marana CCTF, AZ

M58 | 4120 | ASP-Kingman, AZ

M59 | 4120 | ASP-Kingman, AZ

M61 | 4120 | ASP-Kingman, AZ

M62 | 4120 | ASP-Kingman, AZ

M63 | 4120 | ASP-Kingman, AZ

S04 | 4114 | ASPC-Ft Grant, AZ

S05 | 4114 | ASPC-Ft Grant, AZ

Location = can have the same value as ext_site_cd but normally the location is related to the Building and Pod and Bed location of the inmate.

Kind Regards,

Steve Shieldes

Director IT

Subject: RE: API - Rest Detail for adding PAN

I have checked in changes to match what Steve is requesting the JSON to look like. As stated this doesn't match the FSD but I assume that Steve knows best and no one has made any argument to the contrary. So since this is a .Net code change and SQL code change it will require a new build. I suggest we proceed with this path tomorrow so that it can still be part of version 5.1.216.x for deployment Friday evening:

1. Merge changesets 26830 and 26834 to QA branch.
2. Redeploy to QA the same code as Thursday except for the newly merged 2 sets.
3. B&D internal test (the more cases the better).
4. If looks good merge changesets 26830 and 26834 to UAT branch.
5. Redeploy to UAT the same code as Thursday except for these 2 changesets.
6. ADC acceptance test.
7. >From here just merge the 2 changesets to PROD branch along with all the other 5.1.216.x changes sent to UAT Thursday to be deployed to PROD for scheduled Friday deploy.

Thanks,

Aaron

Subject: Locator Code issues
Date: Saturday, December 28, 2019 1:17:43 PM

There are multiple email threads going around about the same issue – but people are not changing the subject of the email to match the content of the email and everyone is not being copied on all email chains

This email chain was sent out this morning under the subject of PAN but it is actually about Location

From this email chain it is not clear that we still have a Loction issue – Steve and George ran a script that updated Locator Codes on Dec 20th

So it looks like we first thing we need to do is track down if there is still a Locator issue.

Reported issue from the past were:

- empty Locator codes in enforcer
  - We need Century Link to provide this list
- Locator Codes in enforcer that don't match ACIS
  - When Chris M gets back on Monday we can provide a list of the ACIS inmate Locator Codes (ADC #, Locator Code)
  - If Century Link can provide a similar list from enforcer (ADC #, Locator Code)

Armed with that information we can determine what to do

Thad

Subject: Re: Fw: API - Rest Detail for adding PAN

Hi Aaron,

The issue with location codes in Enforcer doesn't have a solution planned yet or an ETA, but it certainly needs one. The issue, as I understand it, is that inmates who changed location between go-live and 2019-12-20 had their locations updated in ACIS but not Enforcer. When those locations don't match, inmates may not be able to place calls. George and I don't have a list of affected inmates. We've put bug 41119 in, but this is another that may require special collaboration. I see two tasks and six possible options, but I could really use some recommendations from you and Steve and Jey:

1. Identify the affected inmates (three options):
(a) collect and contrast inmate locations in ACIS and Enforcer OR
(b) get an ACIS query listing inmates whose locations changed in ACIS between 2019-11-29 and 2019-12-20 OR
(c) gather the list of problem inmates from ACIS users

2. Update Enforcer locations for affected inmates (three options):
(a) write and run an Enforcer script OR
(b) trigger a location update through the ACIS/Enforcer interface OR
(c) manually update locations in Enforcer through the Enforcer GUI

We created bug 41119 as the bug for this issue. Bug 40834 "Visitors on verified "PENDING" status are able to receive phone calls from the inmate(s) they are applying to visit." is not the same issue. We used a separate bug for the root issue where ACIS was not triggering Enforcer location code updates, which is resolved and closed (40750). 41119 applies only to the remaining data clean up.

On Sat, Dec 28, 2019 at 9:24 AM Aaron Pratt <aaron.pratt@bndna.com> wrote:

> Hey guys. Regarding the locator code issue with enforcer. See this email from George to Steve on the 20th. Was this not to correct the issue? I'm not sure if this data is correct or not but it seems to indicate that George and Steve had a plan back on the 20th to correct the data. However when I bring this up to George (ie comments in bug 40834) he doesn't seem to know what I'm referring to. Also I think 41119 is a duplicate. I don't think both of these bugs need to remain open.

Subject: RE: API - Rest Detail for adding PAN

Greetings,

I have not heard anything from anyone … what is the current state.

#1) should I update the inmate sites based on mapping the locations to the external site codes and sites ?

#2) is the API being updated to have the location data put in the ext_site_cd in the json block ?

Kind Regards,

Steve Shieldes

Subject: RE: API - Rest Detail for adding PAN

Greetings,

George M., based on the location values and using that mapped for the site_id .. here is the list of inmates currently listed in the wrong site on the enforcer. I would like to correct these, so the inmates are able to make calls.

NOTE: these inmates are unable to make calls is there enforcer site is not what the real site is.

Kind Regards,

Steve Shieldes

Subject: RE: API - Rest Detail for adding PAN

Greetings,

Aaron, "You want the same value BOTH "location" AND "ext_site_cd"? " --- YES that would be the best but most important to have the value in the "ext_site_cd".

George M, I am going to look at the "location" column for the inmate and map to the ext_site_cd column update the correct site_id that the inmate should have if they do not match correctly. I will send the list before I do it.

So it's hard to explain the difference between location and ext_site_cd .. but let me try.

ext_site_cd = A value that we use to map a relation to what ICS uses as a site_id, and this is what we call a "site or facility"

EXAMPE

ext_site_cd | site_id | name

----------+---------+----------------------

M51 | 4115 | ASP-Marana CCTF, AZ

M52 | 4115 | ASP-Marana CCTF, AZ

M58 | 4120 | ASP-Kingman, AZ

M59 | 4120 | ASP-Kingman, AZ

M61 | 4120 | ASP-Kingman, AZ

M62 | 4120 | ASP-Kingman, AZ

M63 | 4120 | ASP-Kingman, AZ

S04 | 4114 | ASPC-Ft Grant, AZ

S05 | 4114 | ASPC-Ft Grant, AZ

Location = can have the same value as ext_site_cd but normally the location is related to the Building and Pod and Bed location of the inmate.

Kind Regards,

Steve Shieldes

Subject: RE: API - Rest Detail for adding PAN

I have checked in changes to match what Steve is requesting the JSON to look like. As stated this doesn't match the FSD but I assume that Steve knows best and no one has made any argument to the contrary. So since this is a .Net code change and SQL code change it will require a new build. I suggest we proceed with this path tomorrow so that it can still be part of version 5.1.216.x for deployment Friday evening:

1. Merge changesets 26830 and 26834 to QA branch.
2. Redeploy to QA the same code as Thursday except for the newly merged 2 sets.
3. B&D internal test (the more cases the better).
4. If looks good merge changesets 26830 and 26834 to UAT branch.
5. Redeploy to UAT the same code as Thursday except for these 2 changesets.
6. ADC acceptance test.
7. From here just merge the 2 changesets to PROD branch along with all the other 5.1.216.x changes sent to UAT Thursday to be deployed to PROD for scheduled Friday deploy.

AMERICAN OVERSIGHT

Thanks,

Aaron

Do we have any ETA on pushing a fix for the location updates?

On Sat, Dec 28, 2019 at 8:59 AM Aaron Bailey <abailey1@azadc.gov> wrote:

> Steve,
>
> Thanks for talking with me and George today.
>
> I understand you ran a script that changed the inmates in a "DENY" status today to a "NOCALL" status, allowing those ~1250 inmates to check balances but not place phone calls. Enforcer interprets "DENY" status differently than we expected. For a permanent fix, we agreed to an RCA on 2020-01-02, which I'll schedule. You suggested we consider using inmate classification codes rather than DENY to implement phone loss of privileges. I expect we'll talk about that and other options at our RCA.
>
> From this point on, the issue with no access to check phone balances should only recur for inmates who move to a "DENY" status (e.g. loss of privileges) between now and when we get a permanent fix in. We may need to run this script again to solve this problem for those inmates. Now that the script is run, I think we can resume work on this issue when you are available again on Jan 2.

AMERICAN OVERSIGHT

In the enforcer an inmates are assigned classes and that class has a set of rules. If you want to effect all the inmates assigned a class without giving them a new class .. you can just change the set of rules.

On Dec 28, 2019, at 08:07, Aaron Bailey <abailey1@azadc.gov> wrote:

I think we need an off-hours process to carefully make a configuration change to phone rules in Enforcer. Steve Shields is out of the office, I understand, into mid next-week. I have incomplete information about the impact of this issue, but because it denies some needed types of phone access like confirming their phone balance to whole classes of inmates, I think it is urgent. I also suspect Aaron Pratt is right that this is not something that is set in ACIS. I think it is a configuration change that needs to be made on the Enforcer side.

I would like a conversation with someone on the Enforcer team before any change is made.

On Sat, Dec 28, 2019 at 6:47 AM George Martinez <gmartinez1@azadc.gov> wrote:

> Steve, this is a follow up to the phone message left by Aaron Bailey this morning. Bottomline is that we want all Deny or LOCK status changed to NOCALL. This will allow the inmates to check their balances, but not make calls to personal numbers. Please run a report that provides that list of inmates that fall into that category.

> I am not quite sure what it all means either. In the specification that everyone signed off on it says to send class “LOCK” and “UNLOCK” for when an inmate has been denied privileges or had them reinstated. This is what we do. Steve at ICS has noted that “LOCK” prevents them from calling even their attorney and that perhaps “NOCALL” should be used instead of “LOCK”. However we are not sure what the cases for this are what should be send to “remove” the “NOCALL” when phone privileges are given back.
>
> We can change the “statuses” or “classes” to be whatever they need to be but let’s make sure we know what we are talking about first. This list that came from George and Steve does not appear to match that. These appear to be relating the three digit code that represents an inmates custody level and phase:
>
> Example:
>
> ```
> 301          | { "max_call_freq_count" : 1,
> "max_call_freq_period" : "day" }
> ```
>
> In this example 3 in 301 means custody level 3. 1 in 301 means phase 1.

AMERICAN OVERSIGHT

I will connect to the call today. Looking forward to speaking with you.

Thanks for the partial payment. Can you tell me during the call the exact amount that you will wire to us today?

My treasury department is asking for it.

I copy my CFO Rob. Let him know whom from in the State organization he can get the wire confirmation.

Thanks very much,

Benjamin

As requested – here is a write up of the issues we were having with eOmis this morning which I reported as back up in out last call earlier this morning

From: Aaron Pratt
Sent: Friday, December 27, 2019 11:12 AM
To: Thad Lowry <thad.lowry@bndna.com>
Cc: Charles Spannagel <charles.spannagel@bndna.com>; Dean Allen <dean.allen@bndna.com>; Phil Wussow <phil.wussow@bndna.com>; Matt DeClue <matt.declue@bndna.com>; Amal Houass <amal.houass@bndna.com>
Subject: RE: eOMIS down

Here is an update on this issue. The outbound message generator failed to generate messages for a period of time this morning. Those messages were sent successfully once the service was restarted this morning at 10am. This allowed the messages to flow through.

You can see triggers stopped processing outbound messages at 5 am and started again at 10am.

MQ_STATUS_ID	MESSAGE_SUB_TYPE	SCAN_STATUS	SCAN_DATETIME	DOC_ID	PERSON_ID	CREATED_DATE	CREATED_BY	RECIPIENT

856813	OBX_MED	C	27-DEC-19 04:49:45			27-DEC-19 04:49:33	4	EOMIS

So what caused the glitch and what do we do going forward? Here are some details:

We did a deploy to PROD yesterday. The background server failed to launch. Phil noticed the issue and asked for a deploy around 5am this morning. Something happened in that deploy that caused the service to glitch for outbound messages only. I think it has to do with the service starting up before the server is fully ready.

We have noticed that when AWS is building a new bg server it starts the services too soon before the instance is really ready. We have discussed different strategies with Matt's team and he mentioned that the sequencing should be modified to not start the service until a later period. The instance comes online once during build. Then comes on again when the server is actually brought online. Then it gets rebooted one time. All this should happen before services start running.

So what are the action items? Here are my suggestions:

- Find out why we have BG servers fail to deploy and fix it.
- Manually check for BG servers being successfully deployed until we are confident they are happening properly.
- Change to the services on the BG server to manual start and do a manual start of them until we can work out the sequencing so that the plug doesn't get pulled on the service when it's just coming on line.

Thanks,

Aaron Pratt

Thad,

We contacted B&D through multiple channels this morning to alert you about the eOMIS interface being down. I know it's only been 15 minutes since we talked but I wanted to ask you to provide every half-hour updates. I'll call you directly at 9:45 to touch base this first time.

Warm Regards,
Spencer Scott, PMP

I would suggest looking at line 110 of the procedure to see what it is doing and please send that to me. Also, Google the error which looks to be coming from your OLE layer.

Is this a procedure on your SQL Server database?

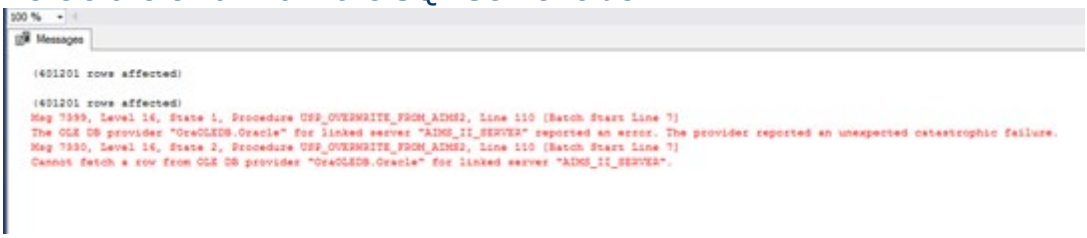
Subject: Failed query from SQL Server to 'dbprodrr'

Hello, Keith & Raj - I have a query that pulls 2M CU/IR classification rows over from Oracle and it has been running successfully for this whole month up until yesterday. I'm running against 'dbprodrr' and these codes are used in our public-facing Inmate Data Search tool on the web.

Here's the error from the SQL Server side:



Can you check into any possible causes of this? It runs at 6 a.m. every morning.

I'll work on getting the error as seen from a SQL*Plus command prompt tomorrow as that may be more useful on the Oracle side.

Thank you kindly,
- josh C.

Hello Mr Sanchez,

Thank you for your response.

Again your message is addressed to Mr Reisinger who is not familiar with the details of this issue.

As I pointed last time already, please involve Pierre-louis Biaggi & Jerome De Lattre (respectively CEO and CFO of Business & Decision Group – in copy of my mail) if you wish to escalate any issue. This will be more effective.

We will consult with our legal counsels and revert back to you on the various statements you make in your letter.

As for the payment you mention, can you tell us how much exactly will be wired to us tomorrow?

Thanks very much,

Benjamin Bussenault

Hello everyone-

Just a friendly reminder that Al and Eli are out of the office tomorrow (12/27). Janet will be assisting with bug entries into the system. So please work with her. She will be remote as she too had time off, but we asked that she cancel to support the team <thank you Janet>.

Let me know if you have any concerns.

Respectfully,

Holly Greene

Subject: RE: ADC prioritized list of bugs
Date: Wednesday, December 25, 2019 8:34:18 AM
Importance: High

Hello Mike, Ken & JR,

I want to wish everyone a merry Christmas. I hope you are all spending some quality time with your family and friends.

Following on our conversation on Monday, and in anticipation of your decision on the sign-off, here are a few elements to take into consideration.

First, we acknowledge the list of Bugs to be resolved as priority from Aaron. We understand these are the most important ones from ADC.
Within that list, which differ a bit from the one we shared on Monday, we see the following:

- Some bugs we believe qualify as change. Namely:
  - 40707
  - 40078
  - 40846
  - 40822
  - 40929
  - 40748
- Some bugs have been added to our list by Aaron (a few coming from the parking lot actually):
  - 41055
  - 40707
  - 40748
  - 40674

In that respect, here is what BDNA can commit on, based on a sign off confirmation from ADC & M&O Kick Off (and related payments) before year end:

- BDNA commit to address and fix all bugs within Aaron's list. The only provision being that the bugs that would qualify as changes have to be reviewed and estimated properly as we don't know yet how long they would take. BDNA would offer graciously the first 2 weeks of DEV on them. But beyond that effort, it would have to be taken from the 10k hours of M&O DEV envelope.
- BDNA won't charge ADC for any change related work since Go Live.

I hope this proposition sounds fair and reasonable to ADC & ADOA.

Let us know tomorrow what you decision is,

Thanks very much for your consideration,

Benjamin Bussenault

Subject: ADC prioritized list of bugs

Dear Dean:

Here is the stack-ranked prioritized list of ACIS bugs I made with Spencer Scott, Jey Whitson, and Marlene Coffey. It was made with feedback from our TAs in the command center. Priority 1 is the most urgent, Priority 27 is the least urgent on this list.

Priority	ID	Title
1	40696	*CRITICAL ~ Scheduling/vehicle gate count inmates can not be brought back in from previous day.
2	41055	Inmate search not functioning
3	35268	*CRITICAL ~ GO-LIVE Data Migration 11/29/19 - (Previous build: 1/4/19) - INTAKE: Personal Characteristics -- Missing SID#s
4	40876	Protective Custody files corrupted and unable to proceed
5	40960	Mandatory forfeiture duplicated the amount of OSB Admin approval
6	41037	Some minors do not show on the Queue after being permitted to visit.
7	40834	Visitors on verified "PENDING" status are able to receive phone calls from the inmate(s) they are applying to visit.
8	41039	Warrants- All Time Stop Date cannot be changed/deleted when saved/submitted
9	40707	Homeless Change Request

AMERICAN OVERSIGHT

10	40078	ARBITRATION!!!**UC-VI-8 Add New Visitor: Cannot submit a new application to another inmate for a visitor who is currently pending
11	40663	Protective Custody notifications: The notification emails are being sent to incorrect staff
12	40744	*CRITICAL ~ OMS: Cannot Transfer Cases from a CCO who is no longer active
13	40896	Warden cannot UPHOLD or OVERTURN a visitor after a Visitor's Appeal is received
14	40499	Deputy Warden cannot Approve or Deny a visitor after ACJIS completes an Annual Review
15	41040	Count- Tucson Rincon units count SID's for staff and supervisors are missing and or corrupt.
16	40886	Transportation Queue System Error when Scheduling an inmate for movement
17	41014	PROGRAMS: Unable to save/update Emergency Contact, therefore unable to finalize Corrections Plan
18	40846	PROGRAMS: “Assign Inmate” screen does not contain all of the inmates like the PRR does for Academic Education
19	40943	Detention entry with future date
20	40822	CC/CS inmate has new episode that needs to be deleted due to incorrect inmate traffic history
21	39239	UC-VI-9 Visitation Dashboard- Annual Reviews should not be listed on the Visitation Dashboard
22	40954	DNHW approved action still showing as pending
23	40739	Visitation: Cannot save application for an inmate incorrectly id'd as "in reception"
24	40929	Messages that failed due to the codes in the Z03, Z04, Z08, Z09, or Z11 need to be reprocessed
25	40965	Change Assigned PO Change Request
26	40748	Count Change Request
27	40674	Home plans not routing to correct office

Subject: Bug Prioritization

We're noticing that the bug prioritization that is being reported in TFS is not adhering to the guidelines that were presented in the contract

Here are the definitions from the contract:

- **1 – Critical**. Critical business impact.
  - Indicates **Solution is unavailable for use** resulting in a critical impact on operations.
- **2 - High**. Serious business impact.
  - Indicates serious production issues where the Solution is usable but is severely limited, and **no workaround exists**.
- **3 - Medium**. Significant business impact.
  - Indicates moderate production issue where the Solution is usable and a **workaround is available** (not critical to operations).
- **4 - Low**. Minimal business impact.
  - Indicates the problem results in little impact on operations or there is reasonable circumvention of the problem

AMERICAN OVERSIGHT

We are going to review the entire list since go-live and identify those that don't adhere– we will then send the reclassification list based on these definitions

Subject: Fwd: Fw: Kingman Phone Time Issue

Hello Keefe and B&D-

Please review the chain below. It appears that many inmates are not able to make phone calls in Kingman (Over 200). Keefe had indicated they fixed the issue, but the inmates still cannot call out. Attached is the list of inmates who reported an issue with the phones.

AMERICAN OVERSIGHT

Who is the appropriate person(s) to review, investigate and provide a status update for this issue? I would like to know when we can expect resolution as well.

Please respond to all on this message.

Kingman/Cerbat Unit

AMERICAN OVERSIGHT

Please see the below information on the phone issues that started earlier today. Many inmates are not able to make phone calls in Kingman. (Over 200) Keefe said they fixed the issue but they still can't call out.

DW Hart had staff collect names of each inmate reporting issues with the phones. (The list is attached.) Supervisors walked and talked with inmates and right now there is no tension, just concern.

It appears that inmates funds for calls were stuck in "fulfillment" and when then hit "send," they said the issue should be resolved. But inmates still can't make calls (so far).

Keefe will continue working on the issue. We will follow up.

DW S. Arredondo

AMERICAN OVERSIGHT

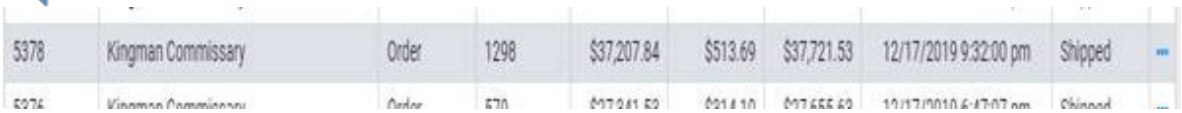
Laurie,
We have our developers working on it.
With the information you provided early we were able to identify the problem and get it resolved.
When we first looked at this morning the orders were in fulling status verse shipped.
The developers were able to resolve this and the orders have been moved to shipped status.
Please let me know in the morning if the inmates are still not able to utilize their phone time purchased on the 17th.



5378	Kingman Commissary	Order	1298	$37,207.84	$513.69	$37,721.53	12/17/2019 9:32:00 pm	Shipped

Subject: Kingman Phone Time Issue

Good afternoon,

I know that you are aware of the phone time issue we have been having here at Kingman. Almost every inmate that has purchased phone time in the past 2-3 weeks has not received their time. This is becoming a huge issue and is causing the inmates to become restless. It is my understanding that our facility is the only facility that is having this issue. We need to resolve this ASAP.

Please let us know if there is anything we are doing (or not doing) on our end that is either causing or contributing to this issue.

DW Hart from Cerbat is compiling a list of inmate names who have ordered phone time but have not received it. Once I receive that list, I will forward it to you for your review.

We appreciate your help getting this resolved as soon as possible.

Thank you,

Laurie

Hello Bill and Steve-

I failed to include you in the distro, but in all fairness, I'm not sure if this is a CenturyLink issue. Please take a moment to reach through the chain below. Essentially, inmates are raising issues regarding their ability to place phone calls (see the attached list).

Respectfully,

Holly Greene

Kingman/Cerbat Unit

Please see the below information on the phone issues that started earlier today. Many

AMERICAN OVERSIGHT

inmates are not able to make phone calls in Kingman. (Over 200) Keefe said they fixed the issue but they still can't call out.

DW Hart had staff collect names of each inmate reporting issues with the phones. (The list is attached.) Supervisors walked and talked with inmates and right now there is no tension, just concern.

It appears that inmates funds for calls were stuck in "fulfillment" and when then hit "send," they said the issue should be resolved. But inmates still can't make calls (so far).

Keefe will continue working on the issue. We will follow up.

Subject: RE: ADC prioritized list of bugs
Date: Monday, December 23, 2019 5:33:17 PM

Hello Aaron,

Thanks for your feedback and the prioritization effort.

I see that 4 bugs have been added to the list we shared over the week-end, some belonging to the parking lot actually.

Let me review with the team. I am willing to accommodate this list, whatever the qualification of the bugs could be. But I need to make sure we can address them quickly enough.

I'll come back to you tomorrow on this,

Benjamin

Subject: ADC prioritized list of bugs

Dear Dean:

Here is the stack-ranked prioritized list of ACIS bugs I made with Spencer Scott, Jey Whitson, and Marlene Coffey. It was made with feedback from our TAs in the command center. Priority 1 is the most urgent, Priority 27 is the least urgent on this list.

Priority	ID	Title
1	40696	*CRITICAL ~ Scheduling/vehicle gate count inmates can not be brought back in from previous day.
2	41055	Inmate search not functioning
3	35268	*CRITICAL ~ GO-LIVE Data Migration 11/29/19 - (Previous build: 1/4/19) - INTAKE: Personal Characteristics -- Missing SID#s
4	40876	Protective Custody files corrupted and unable to proceed
5	40960	Mandatory forfeiture duplicated the amount of OSB Admin approval
6	41037	Some minors do not show on the Queue after being permitted to visit.
7	40834	Visitors on verified "PENDING" status are able to receive phone calls from the inmate(s) they are applying to visit.
8	41039	Warrants- All Time Stop Date cannot be changed/deleted when saved/submitted
9	40707	Homeless Change Request
10	40078	ARBITRATION!!!**UC-VI-8 Add New Visitor: Cannot submit a new application to another inmate for a visitor who is currently pending
11	40663	Protective Custody notifications: The notification emails are being sent to incorrect staff
12	40744	*CRITICAL ~ OMS: Cannot Transfer Cases from a CCO who is no longer active
13	40896	Warden cannot UPHOLD or OVERTURN a visitor after a Visitor's Appeal is received
14	40499	Deputy Warden cannot Approve or Deny a visitor after ACJIS completes an Annual Review
15	41040	Count- Tucson Rincon units count SID's for staff and supervisors are missing and or corrupt.
16	40886	Transportation Queue System Error when Scheduling an inmate for movement
17	41014	PROGRAMS: Unable to save/update Emergency Contact, therefore unable to finalize Corrections Plan
18	40846	PROGRAMS: "Assign Inmate" screen does not contain all of the inmates like the PRR does for Academic Education
19	40943	Detention entry with future date
20	40822	CC/CS inmate has new episode that needs to be deleted due to incorrect inmate traffic history
21	39239	UC-VI-9 Visitation Dashboard- Annual Reviews should not be listed on the Visitation Dashboard
22	40954	DNHW approved action still showing as pending
23	40739	Visitation: Cannot save application for an inmate incorrectly id'd as "in reception"
24	40929	Messages that failed due to the codes in the Z03, Z04, Z08, Z09, or Z11 need to be reprocessed
25	40965	Change Assigned PO Change Request
26	40748	Count Change Request
27	40674	Home plans not routing to correct office

All,

Here is the material for our meeting on Monday.

As explained in my mail yesterday, the focus will be on the bugs that are in active, reconsider or proposed status.

The objective is to set clearly the scope of work of BDNA on bugs in order to get a formal solution sign off confirmation.

Have a nice week-end everyone,

Benjamin

The Ad Hoc team will need to create them.

Holly - Could you see that these get added to the list please?

>
> In order to reach an agreement on what BDNA is really accountable to fix for a sign-off confirmation, I am scheduling a call with ADC and ADOA on Monday.

AMERICAN OVERSIGHT

We will focus only on the High/Critical bugs that are either "active", "proposed" and "re-consider". That will considerably narrow down the work. The purpose will be to arbitrate on their criticality level (as per Nov. 18th amendment definitions) and on their nature (Defect or Change). We will send you some preparatory work tomorrow COB.

In the meantime, BDNA team is 7days/7 on deck to resolve bugs. We need ADC's team to be equally available on testing. We will do 2 release in UATs next week (one Monday, one Thursday) so as to maximize the testing on the resolved bugs and make it to the finish line.

Thanks very much,

Benjamin Bussenault

Re: Contract No. ADOC14-00003350/ADC14-025-23

Dear Ken:

I write in response to your December 19, 2019 letter. While ADC and B&D appear to disagree on various issues, at this juncture, I want to focus on the areas that I believe will be most productive in promptly advancing a mutually acceptable Solution.

As a preliminary matter, the Solution is stable, live, being used by several users, and functioning properly. The Solution has had nearly 6,000 unique users, averaging over 430,000 system transactions or requests per business day, with over 3 million page loads. And, aside from one 30 minute outage on December 2, 2019, there have not been any system outages and the Solution is responding continually to requests.

While there are certain bugs, we believe many of them should be properly classified as change requests rather than true defects. As stated in the Best and Final Offer (the "BAFO"), the post-go live support period is "to ensure that the end users are fully supported during the rollout, to help triage issues and reinforce the training provided by the training program previously given"—it is not an opportunity to suggest changes that could have been requested at prior phases. For example, it appears that erroneous legacy data has existed in The Enforcer system for months if not years. While B&D defined, designed, and tested the new Enforcer API for technical bugs, ADC had the responsibility during UAT to test for this type of industry-specific issue. Further, after ADC overwrote Solution data in an effort to correct these legacy data related problems, B&D had to expend considerable resources correcting scripts to get The Enforcer back into a synchronized state with the Solution. B&D believes that this type of delayed request is properly classified as a change request.

In any event, disputes as to whether a change constitutes a bug or a change request requiring compensation must be resolved by ADOA-ASET. In light of our mutual obligation in Amendment 6 to resolve such issues "collaboratively and expeditiously," we are submitting

AMERICAN OVERSIGHT

the dispute to ADOA-ASET on Monday December 23rd so that we can proceed with contractual schedule, including the December 30, 2019 Go-Live acceptance.

With respect to your proposal, we cannot agree as stated. However, we are willing to agree to the following:

1. In accordance with the acceptance criteria in Amendments 6, 7, and 8, B&D will fix all valid high and critical bugs, with compensation being owed for any bugs that are determined to be change requests by the parties or ADOA-ASET;

2. Separate from the fixing of bugs and implementing change requests, B&D will maintain a post Go-Live team comprised of individuals that fulfill the requirements on pages 63 and 64 of the BAFO, and this team will ensure that the end users are fully supported during the rollout, help triage issues, and reinforce the training provided by the training program previously given[1];

3. ADC will pay B&D the full amounts owed for Perryville, Go-Live, and other Implementation Phase deliverables upon the acceptance of the Solution or the date on which the deliverable is submitted; and

4. ADC has always had full access to the TFS, but B&D will provide additional access to the list of items previously completed and moved to a different area path for efficiency purposes.

B&D will also work collaboratively with ADC to start the M&O Phase earlier than contemplated in Exhibit B to Amendment 8, including by submitting all Implementation Phase deliverables ahead of schedule.

We look forward to speaking on Monday.

Sincerely,

Benjamin Bussenault

[1] B&D believes that the Parking Lot items are change requests and intends to submit them to ADOA-ASET on December 23, 2019.

AMERICAN OVERSIGHT

I would like B&D to take the necessary steps in order to ensure that this is pushed to production the proper way - whatever that may be internally. What I would like to see is a more expedited process in doing so rather than allowing a full week to pass. Is there something that can be done on the B&D side to move this forward more quickly?

Respectfully,

Holly Greene

Notes

Action Item 1:
Issue: Update Agency Inmate Release Notification email address from azvictims@azadc.gov to vicservices@azadc.gov.

- **Status:** Pending Victim Services validation
- **Owner:** B&D
- **Action:**
  - **Victim Services** to validate by receipt of message. Has the team received an email?

AMERICAN OVERSIGHT

Monday, August 30, 2021

Meeting Minutes

Notes

Action Item 2:

Issue: Review Release Notification email addresses

- **Status:** In Progress
- **Owners:** Jan Upchurch
- **Updates:**
  - Team reported that of 234 emails from the original list, 170 are duplicates. Of all 64 Agencies, 39 email addresses checked out, but 27 are no longer valid.
- **Actions:**
  - **Edwin** will determine if the 39 addresses will suffice for the Agencies.

UPDATED - Action Item 3:

- **Issue:** Temporarily suspend Agency Inmate Release Letter notifications from sending to county attorneys and judges until a solution is provided. ***NOTE: Arresting Agencies also need to be included in this list.***
- **Status:** Updated – In Progress
- **Owners:** Cindy Hyser (B&D) and Eli Charif (BA)
- **Updates:**
  - **Eli Charif** confirmed that email address for the judges and county attorneys was created (acisvicservices@azadc.gov) so the notifications will now start going to this email address.
- **Actions:**
  - **Jaquel Moody** will send Eli examples of the Arresting Agency email addresses. Eli will then check this information against those existing in the system.
  - **Eli** will have Christine, Linda and Jaquel added as owners of the email box
  - **Eli** will work with Victim Services to show them how to access the mailbox

Action Item 4:

Issue: Agency Inmate Release Letters are being delivered to incorrect addresses. The inmate profiles are no longer linked to their assigned judge/attorney; they are now assigned to the county only. Need to provide Victim Services a solution which continues to provide the proper automation for notification and to the correct email addresses vs. creating manual work.

- **Status:** In Progress
- **Owners:** B&D, Michael Gomez (DBA), Eli Charif (BA), Herb Haley and Marlene Coffey (Ops)
- **Updates:**
  - Meeting was held on 12/18 where we received updates concerning the email box creation; email address validation; and the request to add Arresting Agency addresses.

AMERICAN OVERSIGHT

Monday, August 30, 2021

Meeting Minutes

Notes

- **Actions:**
  - Next meeting scheduled for Friday, 12/20 at 9:00am to continue the discussion of technical next steps.

Action Item 5:

Issue: Compile the email address data in one location so teams can compare what existed previously in Victim Services application; what existed in ACIS prior to 11/29 Data Migration; and what was provided to Marlene Coffey for update in Reference Data for the 11/29 Data Migration.

- **Status:** In progress
- **Owners:** Aaron Bailey (IT Proj)
- **Update:**
  - Support teams need to determine next steps with this information.
- **Action:**
  - Aaron Bailey tasked with:
    - Pulling the mailing list data from Marlene Coffey's Ref Data sheet
    - Working with Michael Gomez to obtain the previous mailing information stored in PCAIMS (or another source)
    - Working with Marlene Coffey or B&D to pull the mailing information from ACIS prior to Go-Live
- **Additional Notes:**
  - All of this data is to be used as a means of comparing what existed yesterday vs. today; if any updated information was provided to Marlene; and of that information, did it maintain, expand or narrow the universe of recipients

Our understanding about this issue right now – is that the code is working as expected

Per developer (Luis):

Josh didn't understand why some offenses were missing the years, months and days and I explained it to him. He requested the results for a dozen of ADC# And I added those for him to check.

He should close it once he is satisfied checking those values.

AMERICAN OVERSIGHT

From:	Holly Greene on behalf of Holly Greene <hgreene@azadc.gov>
To:	Aaron Bailey; Jan Upchurch; Edwin Gonzalez; Cindy Hyser-Crauwels; Michael Gomez; Linda Stanley; Chris Masson; Elizabeth Charif; Herbert Haley; Marlene Coffey
Subject:	Meeting Reschedule
Date:	Wednesday, December 18, 2019 12:23:04 PM

Hi everyone-

The 12/19 meeting titled *Agency Inmate Release Letters ACIS Technical Meeting* has been rescheduled to Friday, 12/20 at 9am. I personally apologize for the inconvenience as I am out of the office on 12/19 and would like to be part of this discussion.

The meeting today at 2:30 titled *ACIS Notification Emails Tech Meeting* will still be held at that time.

Thank you all so very much for your patience and flexibility. :)

Respectfully,

Holly Greene

AMERICAN OVERSIGHT

From:	Thad Lowry on behalf of Thad Lowry <thad.lowry@bndna.com>
To:	Holly Greene
Cc:	Rusty Johnson; Dwight Cloud; Meador, William; Vitale, John; Dean Allen; Chris Masson; Aaron Pratt
Subject:	RE: PAN List and Locator Code Issues
Date:	Wednesday, December 18, 2019 10:12:13 AM

PAN List

- Century Link
  - Bug 40750:ACIS and CenturyLlink doesn't show matching info. Inmate is unable to call approved visitors
    - Century Link was updated by a file that Jim T sent on Dec 3rd – causing CenturyLink and ACIS to be out of sync
    - Truing up the 2 systems is not part of the interface FSD – would require a change for B&D to develop a true up script

Locator Code

- Century Link
  - Working on Bug 40953:Interfaces - Inmate returned from court cannot make calls - API is not updating location
    - We have a resolution and it is in QA to fix the interface to send notice when assign new location through Cell Screening
    - We need to run a data fix to true up Locator Codes for inmates that moved between Dec 2 and when the fix is installed in PROD
- Keefe
  - Working on Bug 40981:Initial migrated data provided several ADC#s with "none" as its locator code in KeepTrak

Chris-

I would like B&D to take the necessary steps in order to ensure that this is pushed to production the proper way - whatever that may be internally. What I would like to see is a more expedited process in doing so rather than allowing a full week to pass. Is there something that can be done on the B&D side to move this forward more quickly?

Respectfully,

Subject: Re: Error when clicking the edit button to inactivate VS emails

Good afternoon Cindy-

Do you have an update for us on the below item? *I've included Chris Masson on this communication.

Recap of the note:

I see each email can be made active or inactive but I'm not sure that this will inactivate the automated notices.

These are able to be modified by an Administrator or ACIS Coordinator. The current limitation is that each county can only contain 1 email address.

I will address this with Chris M. when he is back on Monday.

Any update is most helpful. :)

Respectfully,

Holly Greene

Subject: Re: Error when clicking the edit button to inactivate VS emails

This is the email template that Cindy was referring to that gets emailed out to the judges, county attorneys, and arresting agencies. Here's the bug number and how to access the templates in ACIS:

40925 Unable to inactive VS emails due to error received

Steps to Reproduce:

1. In the left hand navigation click Administration > Data Management > Victim Services > Victim Letters

2. Navigate to the 4th page of results.

3. For the "Agency Notification - Email" row click the Edit button. Then you will receive the error.

Subject:	FOLLOW-UP: Action Items: Inmate Release Notifications Follow-up Meeting 1
Date:	Tuesday, December 17, 2019 2:32:42 PM

Hello Aaron, Jan and B&D-

I'm seeking a status update for the highlighted items below (1, 2, 4 & 5). Please respond directly to me with your update.

Action Item 1:
Issue: Update Agency Inmate Release Notification email address from **azvictims@azadc.gov** to **vicservices@azadc.gov**.

- **Status:** Pending push to production
- **Owner:** B&D
- **Action:**
  - **B&D** will push this adjustment to the production environment on the evening of Friday, 12/13.
- ***Additional Notes:***
  - ***Eli Charif*** *has checked the system and sees the adjusted email address*
  - *Victim Services will not notice the change until an email is received (approx. Monday, 12/16)*
  -

Action Item 2:
Issue: Review Release Notification email addresses

- **Status:** In Progress
- **Owners:** Jan Upchurch
- **Action:**
  - **Michael Gomez** provided Jan Upchurch and Edwin Gonzalez the email address list which was used previously. (Provided on 12/13 at 15:30)
  - **Victim Services** team has begun review and validation of the email addresses.

Action Item 3:
Issue: Temporarily suspend Agency Inmate Release Letter notifications until a solution is provided.

- **Status:** *Update as of 12/17:* Cindy met with Chris Masson on Monday, 12/16. Chris recommended that a generic email box would be the easiest route as a temporary solution. Eli has submitted a Cherwell ticket requesting the creation of a generic email account. Once created, Eli will update ACIS accordingly.
- **Owners:** Cindy Hyser (B&D) and Eli Charif (BA)
- **Actions:**
  - **Eli Charif** to send a notification to all on this list when the automated emails are suspended.

Action Item 4:
Issue: Agency Inmate Release Letters are being delivered to incorrect addresses. The inmate profiles are no longer linked to their assigned judge/attorney; they are now assigned to the county only. Need to provide Victim Services a solution which continues to provide the proper automation for notification and to the correct email addresses vs. creating manual work.

- **Status:** Pending scheduling of IT discussion with B&D and Operations (should be on 12/16 or

AMERICAN OVERSIGHT

12/17)
- **Owners:** B&D, Michael Gomez (DBA), Eli Charif (BA), Herb Haley and Marlene Coffey (Ops)
- **Action:**
    - **Aaron Bailey** will schedule an internal technical discussion next week (Mon 12/16 or Tue 12/17)

Action Item 5:
Issue: Compile the email address data in one location so teams can compare what existed previously in Victim Services application; what existed in ACIS prior to 11/29 Data Migration; and what was provided to Marlene Coffey for update in Reference Data for the 11/29 Data Migration.

- **Status:** In progress
- **Owners:** Aaron Bailey (IT Proj)
- **Action:**
    - Aaron Bailey tasked with:
        - Pulling the mailing list data from Marlene Coffey's Ref Data sheet
        - Work with Michael Gomez to obtain the previous mailing information stored in PCAIMS (or another source)
        - Work with Marlene Coffey or B&D to pull the mailing information from ACIS prior to Go-Live
- **Additional Notes:** All of this data is to be used as a means of comparing what existed yesterday vs. today; if any updated information was provided to Marlene; and of that information, did it maintain, expand or narrow the universe of recipients

Subject: Re: Error when clicking the edit button to inactivate VS emails

Good afternoon Cindy-

Do you have an update for us on the below item? *I've included Chris Masson on this communication.

Recap of the note:

I see each email can be made active or inactive but I'm not sure that this will inactivate the automated notices.

These are able to be modified by an Administrator or ACIS Coordinator. The current limitation is that each county can only contain 1 email address.

I will address this with Chris M. when he is back on Monday.

Any update is most helpful. :)

Respectfully,

Holly Greene

Subject: Re: Error when clicking the edit button to inactivate VS emails

This is the email template that Cindy was referring to that gets emailed out to the judges, county attorneys, and arresting agencies. Here's the bug number and how to access the templates in ACIS:

40925 Unable to inactive VS emails due to error received

AMERICAN OVERSIGHT

Steps to Reproduce:

1. In the left hand navigation click Administration > Data Management > Victim Services > Victim Letters

2. Navigate to the 4th page of results.

3. For the "Agency Notification - Email" row click the Edit button. Then you will receive the error.

Subject: RE: PAN numbers are missing for inmate [redacted]

George,

Correct all the PAN data needs to be pulled from the ACIS database to get current PAN lists for each inmate. We would then shut down the API and B&D would send us a file to run from the ACIS database with all current PAN numbers. Once this file is run in the Enforcer to correct the inmate PAN lists, the API would be turned back on to receive any inmate data that has changed going forward. This is just like the process we ran on 12/8/2019. Please let me know if you are having B&D send all PAN numbers using the API.

Subject: Re: PAN numbers are missing for inmate [redacted]

Bill, I thought the process had to go through ACIS and not directly through Enforcer. We are trying to work with B&D to trigger the API to update the PANs.

AMERICAN OVERSIGHT

To: George Martinez <gmartinez1@azadc.gov>
Subject: RE: ACIS and Enforcer

Here is the File format that we used to receive daily:

INMATE_ID,?,COUNTRY_CODE,PHONE_NUMBER,CONTACT_LASTNAM,CONTACT_FIRSTNAME,RERLATIONSHIP,DISPOSITION(Y=ACTIVE,N=IGNORE)

[redacted]

I would suggest to just SEND ACTIVE / VALID phone numbers, that last file we received had 274187 rows including ACTIVE and IGNORE

IF you send a complete file in that format, we will be able to perform a TRUE up on the PANS.

Subject: RE: PAN numbers are missing for inmate [redacted]

George,

I just got off the phone with Steve Shieldes and he said he discussed this with you on Friday. The last true up of PAN numbers was run on 12/3. The true up we did on 12/8 did not include PANS. Steve said he agreed that a true up run of PAN numbers would help synch up all the inmate data. His recommendation is pull the information from the ACIS database like we did on 12/8 , strictly for the Inmate PAN list . He has given you the format he needs the file to be sent to him, so he can run it and correct any PAN issues we are having. Let me know if we need to get on a phone call to discuss this.

Subject:	Action Items: Inmate Release Notifications Follow-up Meeting 1
Date:	Friday, December 13, 2019 4:15:01 PM

Hello everyone-

Thank you for attending today's meeting.

Please take time to review the below summary of 5 action items / next steps as you may have an item assigned to you.

Action Item 1:
Issue: Update Agency Inmate Release Notification email address from **azvictims@azadc.gov** to **vicservices@azadc.gov**.

- **Status:** Pending push to production
- **Owner:** B&D
- **Action:**
  - **B&D** will push this adjustment to the production environment on the evening of Friday, 12/13.
- ***Additional Notes:***
  - ***Eli Charif*** *has checked the system and sees the adjusted email address*
  - *Victim Services will not notice the change until an email is received (approx. Monday, 12/16)*
  -

Action Item 2:
Issue: Review Release Notification email addresses

- **Status:** In Progress
- **Owners:** Jan Upchurch
- **Action:**
  - **Michael Gomez** provided Jan Upchurch and Edwin Gonzalez the email address list which was used previously. (Provided on 12/13 at 15:30)
  - **Victim Services** team has begun review and validation of the email addresses.

Action Item 3:
Issue: Temporarily suspend Agency Inmate Release Letter notifications until a solution is provided.

- **Status:** Pending Cindy's discussion with Chris Masson which is to take place on Monday, 12/16.
- **Owners:** Cindy Hyser (B&D) and Eli Charif (BA)
- **Actions:**
  - **Cindy Hyser** stated that she located the proper screens which house the incorrect email addresses in ACIS.
  - **Eli Charif and Cindy Hyser (and Chris Masson)** will be working together to disable the Agency Inmate Release Letter notifications which are automatically sent to the Judges and Attorneys (and others) upon an inmate's release.
  - **Eli Charif** to send a notification to all on this list when the automated emails are suspended.

Action Item 4:
Issue: Agency Inmate Release Letters are being delivered to incorrect addresses. The inmate profiles are no longer linked to their assigned judge/attorney; they are now assigned to the county only. Need to provide Victim Services a solution which continues to provide the proper automation for notification and to the correct email addresses vs.

AMERICAN OVERSIGHT

creating manual work.

- **Status:** Pending scheduling of IT discussion with B&D and Operations (should be on 12/16 or 12/17)
- **Owners:** B&D, Michael Gomez (DBA), Eli Charif (BA), Herb Haley and Marlene Coffey (Ops)
- **Action:**
    - **Aaron Bailey** will schedule an internal technical discussion next week (Mon 12/16 or Tue 12/17)

Action Item 5:
Issue: Compile the email address data in one location so teams can compare what existed previously in Victim Services application; what existed in ACIS prior to 11/29 Data Migration; and what was provided to Marlene Coffey for update in Reference Data for the 11/29 Data Migration.

- **Status:** In progress
- **Owners:** Aaron Bailey (IT Proj)
- **Action:**
    - Aaron Bailey tasked with:
        - Pulling the mailing list data from Marlene Coffey's Ref Data sheet
        - Work with Michael Gomez to obtain the previous mailing information stored in PCAIMS (or another source)
        - Work with Marlene Coffey or B&D to pull the mailing information from ACIS prior to Go-Live
- **Additional Notes:** All of this data is to be used as a means of comparing what existed yesterday vs. today; if any updated information was provided to Marlene; and of that information, did it maintain, expand or narrow the universe of recipients

Please let me, Dwight and Aaron know if there are any questions.

Respectfully,

Holly Greene

Subject: Re: Error when clicking the edit button to inactivate VS emails

This is the email template that Cindy was referring to that gets emailed out to the judges, county attorneys, and arresting agencies. Here's the bug number and how to access the templates in ACIS:

40925 Unable to inactive VS emails due to error received

Steps to Reproduce:

1. In the left hand navigation click Administration > Data Management > Victim Services > Victim Letters

2. Navigate to the 4th page of results.

3. For the "Agency Notification - Email" row click the Edit button. Then you will receive the error.

So the quickest solution is to just put a dummy email address in there for now, since the email address is required. Is that okay? If so, which email can I use?

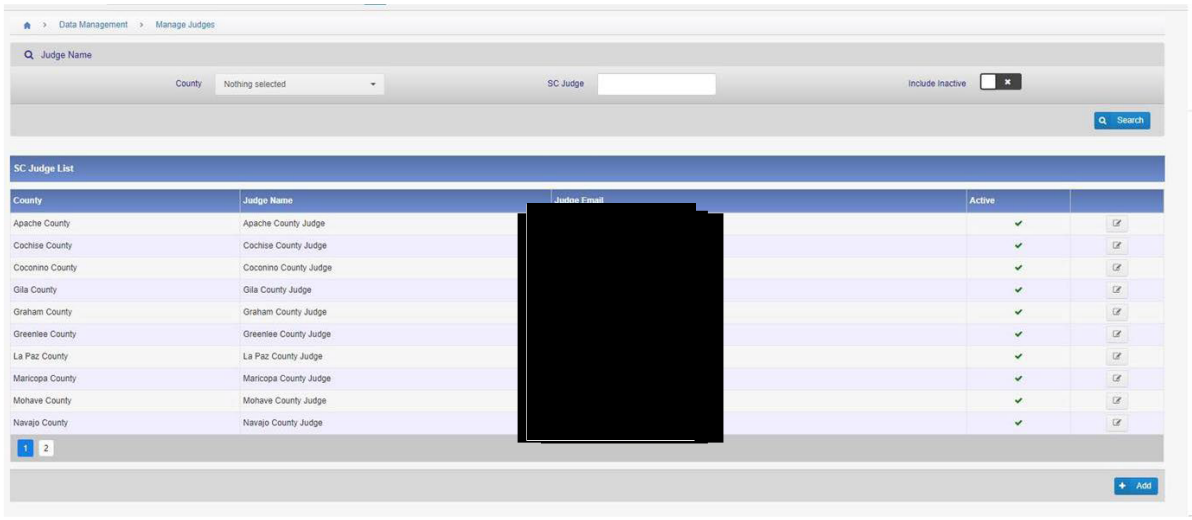
AMERICAN OVERSIGHT



I see each email can be made active or inactive but I'm not sure that this will inactivate the automated notices.
These are able to be modified by an Administrator or ACIS Coordinator. The current limitation is that each county can only contain 1 email address.
I will address this with Chris M. when he is back on Monday.

Hello

I received a call from Captain Brewer of Eyman Complex about 30 minutes ago. She reported that a visitor contacted the Rynning Visitation staff to find out when they would be telling her she was approved.
Visitor advised that the inmate placed a call to her and

AMERICAN OVERSIGHT

told her she was approved because he could make calls.

Staff researched the application and found that it was a pending application. Staff also verified the phone call through Centurylink.

Jay Whitson advised and requested the bug and notifications to be made.

Attached: (1) Bug and supporting information.

Subject: RE: Inmate [redacted]

Hi all

Here's our understanding

- We did not migrate any property items into ACIS
- We only imported a list of inmates that needed to be charged an appliance utility fee
- All property needs to be hand entered by the staff using the manual records as the source

We believe that the Central Office Command staff know this which points out that this item was incorrectly escalated

- It should have gone from the prison facility to the Central Office command center or the IT service desk and not the Public Information Officer/Legislative Liaison

In the property module for this inmate all that is there is the migrated appliance for utility fee

AMERICAN OVERSIGHT

- Staff will need to use the add property functionality to update this inmates property

For the Religious Diet Card
If you navigate to Religious Services > Religious Summary in context of the inmate you can see the current diet.

- This person is on a Kosher Diet

Can someone go to AIMS 1 and see what was recorded there for the Religious Diet for this inmate? If they are not the same then please enter a bug and we will investigate what happened in the migration
If they are the same – staff will need To update the Kosher Diet in the Religious Services Module to whatever the inmate requests

Let us know if my understanding is incorrect or if you need us to do anything more

Thanks,

Thad

Subject: Inmate [redacted]
To: Joshua Cutler <jcutler@azcjc.gov>

Good Afternoon,
I was wondering if you would help me out with an issue. Inmate Lowery approached me today in regards to his store. He is missing approximately $100 worth of store items. 3 years ago he was got off of a religious kosher diet and now believes that ACIS still reflects that he is possible still under the kosher diet not allowing him to purchase non kosher items. Can you please look into this matter and respond with an answer for him. If it is true, can you fix the ACIS entries that he is no longer a kosher diet.

Please and thank you

> Hi Lynda:
>
> We have reviewed this issue in detail, and this is not an issue and from what reviewing the records in KeepTrak I believe it was reported to you inaccurately. You reported below "Here is a list of inmates from Perryville who are complaining they have had money taken from their accounts but are not able to make calls" which at 5pm when we were reviewing this the Inmate we looked at KeepTrak together and they did not have any charges on their account. The good news is that the phone time charges and commissary purchases were debited from the Inmate's accounts at around 5:30pm as Keefe was processing Commissary as per the process. Phone time charges are treated like any other commissary item and they don't process any quicker than the physical items. My understanding is once Keefe Commissary indicates the approval and charges in KeepTrak for the phone time charge then the money should be loaded into the Century Link database tomorrow as that process runs overnight. Going forward if you could please review the KeepTrak account in detail with who reported it to confirm the issue it would help decrease confusion and streamline the process for identifying if this is an issue or not.
>
> @George: can you please check the Century Link accounts in the morning and report back if the charges were loaded?
>
> Per the screenshots from KeepTrak did not have any debits for Store Purchase taken from their accounts until 5:30pm this evening, but this was reported today at 1pm.

Subject:	Re: ACIS and century link dont show matching info. Inmate is unable to call approved visitor.Having issues with century link showing approved and ACIS showing no one approved.
Date:	Friday, December 6, 2019 4:09:02 PM

Hi Holly,

B&D worked with Steve Shieldes at IC Solutions earlier today to understand the issue with Inmate Locations being out of sync due to the file being ran into the Centurylink Enforcer system on Tuesday 12/3. We compared numerous inmates and confirmed that the updates that ACIS had sent out on 12/2 and 12/3 had been overwritten by the flat file sent on 12/3.

We have since worked on producing an export of data from ACIS for all Active inmates that we have worked with Steve to get imported into the Enforcer system. We believe this has now corrected any erroneous locations.

What we cannot isolate is issues with any PAN's that were added/updated during that time frame. There is a solution via ACIS that if staff notice that an approved phone visitor is not being allowed calls to a number, staff in ACIS can update the visitors phone number and update, then update back to the correct number. This will trigger updates to the Enforcer application that will get both systems in sync. As we are unable to identify the exact discrepancies between systems for this issue, we do not want to add any risk and perform a wholesale update of these visitor PAN records.

Hope that provides a good update for everyone - thanks to Steve for help on his side.

Thanks
Chris

> Holly,

AMERICAN OVERSIGHT

This is an issue we discussed on our conference call yesterday. The Personal Approved Numbers (PAN telephone numbers) are part of the information that is not being updated properly. My concern is did we have accurate information between the cutover from the old system to the new system. My understanding is instead of all the inmate files that we received from the old FTP files everyday which included all information for an inmate; this included all old information plus any changes that occurred for each inmate. In the new API model we are only receiving changes that have occurred for an inmate. Did we have all accurate data sent in the last FTP file, so all the information for an inmate was populated prior to the cutover to the new system; which only sends us data that needs to be changed.

In all future emails please include the following individuals from IC Solutions that are our key members to resolve any Centurylink issues and need to be part of the resolution process.

NAME	TITLE	EMAIL ADDRESS	OFFICE NUMBER	CELL NUMBER
Steve Shields	Director IT	sshieldes@icsolutions.com	(210) 477-7333	[redacted]
Geoffrey Larkin	Project Manager	glarkin@icsolutions.com	210-477-7355	

Steve has been responsible for all test models and the transition to the new ACIS system. He is the one that can assist you in investigating any issues we are having. Please add these 2 individuals and myself to any emails pertaining to the new ACIS system and any issues you need Centurylinks help in resolving. I have included these 2 individuals in my email response.

John:

Is this the active inmate file we send to JPAY and GTL everyday? If so the easiest way to get this file is have Andrew Dorre possibly build a service to grab it off the FTP before it is processed and FTP it to you. Then you can have time to determine a more permanent solution while the need is fulfilled.

Thank you.

Subject:	RE: ACIS and century link dont show matching info. Inmate is unable to call approved visitor.Having issues with century link showing approved and ACIS showing no one approved.
Date:	Thursday, December 5, 2019 9:04:49 PM

Hi Holly:

I wanted to provide an update on the following bugs:

Bug 40750:ACIS and CenturyLink doesn't show matching info. Inmate is unable to call approved visitors- we are actively working this bug.
Bug 40752:Interfaces - Inmate location codes are not updating in CenturyLink- we are actively working this bug.
Bug 40746:Interfaces - KeepTrak and CenturyLink are not synched - Banking phone time not being recognized by CenturyLink – This is not a bug nor is there any issue. The issue was reported by Lynda Wade today from someone if the field that Inmates purchased phone time, their accounts records were reported as debited, but we found they were not debited until 5:30pm tonight when Keefe Commissary was processing orders. I put this bug back to George with this note and request to close.

Thank you.

Holly, here are the bugs created:

Bug 40746:Interfaces - KeepTrak and CenturyLink are not synched - Banking phone time not being recognized by CenturyLink
Bug 40750:ACIS and CenturyLLink doesn't show matching info. Inmate is unable to call approved visitors
Bug 40752:Interfaces - Inmate location codes are not updating in CenturyLink

All three are assigned to B&D and being actively worked on.

AMERICAN OVERSIGHT

Holly,

This is an issue we discussed on our conference call yesterday. The Personal Approved Numbers (PAN telephone numbers) are part of the information that is not being updated properly. My concern is did we have accurate information between the cutover from the old system to the new system. My understanding is instead of all the inmate files that we received from the old FTP files everyday which included all information for an inmate; this included all old information plus any changes that occurred for each inmate. In the new API model we are only receiving changes that have occurred for an inmate. Did we have all accurate data sent in the last FTP file, so all the information for an inmate was populated prior to the cutover to the new system; which only sends us data that needs to be changed.

In all future emails please include the following individuals from IC Solutions that are our key members to resolve any Centurylink issues and need to be part of the resolution process.

NAME	TITLE	EMAIL ADDRESS	OFFICE NUMBER	CELL NUMBER
Steve Shields	Director IT	sshieldes@icsolutions.com	(210) 477-7333	[redacted]
Geoffrey Larkin	Project Manager	glarkin@icsolutions.com	210-477-7355	

Steve has been responsible for all test models and the transition to the new ACIS system. He is the one that can assist you in investigating any issues we are having. Please add these 2 individuals and myself to any emails pertaining to the new ACIS system and any issues you need Centurylinks help in resolving. I have included these 2 individuals in my email response.

Subject: Commissary Purchase & Refund files

Good evening! Have any Commissary files been pushed into Keep Trak this week? I didn't see any. Today is my 1st day back.

Also...we noticed that there is no

20 Commissary Purchase accounting event or
19 Commissary Refund accounting event
In Keep Trak

Since the inmates were not charged for Commissary this week... I'm worried that many will have NSF when the files do come into Keep Trak.

Rules for Commissary purchases: (Debit)
* Deduct from Spendable
* Must have sufficient funds

Like I said... I don't know what balance file was used for Commissary this week... Bankers have been in Keep Trak moving funds for 4 days... NSF might be an issue

Rules for Commissary Refunds: (Credit)

AMERICAN OVERSIGHT

*Credit to Spendable
*No deductions can be taken
*Holds/Debt can be taken

Please advise as soon as possible..

Thanks,
Lynda Wade
ITA Manager

Hello Joseph-

It was so great to speak with you today. Thank you so very much for your patience as ACIS is being stood up.

One of the issues you brought to my attention with visitation is that it does not show the full history of the inmates visitors for both inactive and denied status (and possibly others).

Can you provide some screenshots of what you're seeing (or not seeing)?

Respectfully,

Holly Greene

Hello Marissa-

I chatted with Dwight, Aaron and others yesterday concerning this issue. My team will no longer resend/retransmit past data unless approved through the project which would include B&D's review and approval.

Aaron and others will be working to draft a change process for ADC IT support to use. In the meantime, if we receive any requests, we will provide this direction and await instruction from ADC and B&D on how to proceed.

As a side note, please include me on any data related emails and phone calls.

I do hope that B&D and CenturyLink were able to work together to resolve this issue.

Respectfully,

Holly Greene

AMERICAN OVERSIGHT

data has been flowing ever since. The new ACIS to CenturyLink interface is a webservice interface that operates off of real time triggers (new inmate, released inmate, phase change, etc). When Jim loaded the file directly into Century Link yesterday he wiped out all the changes ACIS had sent over for the past 2 days essentially putting ACIS and CenturyLink 2 days out of sync and subsequently KeepTrak Inmate Trust as well, and we can't see in CenturyLink DB anymore what data was missing because the AIMS data overrode it so it makes it harder for us to pinpoint the issue. This is about respect of the new system and I understand Jim had the best of intentions, but we need to ensure people are going through the proper channels and reporting this information to B&D through TFS so that B&D can manage the new systems and quickly and efficiently get to the root cause of the issue. There should no longer be any AIMS interface processes.

CenturyLinkEngine	**53 hrs**	**Wed 11/27/19 5:00 PM**	**Mon 12/2/19 6:00 PM**	
Keefe to send credentials to CL for access to KeepTrak for spendable and indigent info	1 hr	Wed 11/27/19 5:00 PM	Wed 11/27/19 6:00 PM	John Vitale
CL to turn off DLL file	1 hr	Sun 12/1/19 5:00 PM	Sun 12/1/19 6:00 PM	Steve Shields
CL to turn off current Phone Time refund process (anytime prior to 12/5/19)	1 hr	Mon 12/2/19 5:00 PM	Mon 12/2/19 6:00 PM	Steve Shields
AIMS will send the All Inmate and All Approved Visitor files to CL on Fri, Sat, and Sunday and then turn off files	48 hrs	Fri 11/29/19 5:00 PM	Sun 12/1/19 5:00 PM	Jim Tarantino
B&D to connect ACIS Enforcer API to production CenturyLink	1 hr	Sun 12/1/19 5:00 PM	Sun 12/1/19 6:00 PM	Aaron Pratt

Hi Marissa-

The understanding was we were to close month end reports. These are reports to be used with the data through the month of November (we have nothing new for December). This was discussed and announced many times.

Can you provide more details as to what type of conflicts occurred?

-Holly

On Tue, Dec 3, 2019 at 10:11 PM Marissa Boice <marissa.boice@bndna.com> wrote:

> Hi Jim:
>
> I understand that you re-ran the AIMS Century Link file today into the API enforcer to fix an issue that was reported by the users. I ask that you please do not run AIMS files into any of the interfaces anymore as the new interfaces need to run using the data from ACIS not AIMS. The result of this fix temporarily put a Band-Aid on the issue, but it further masked our ability to determine the root cause of this issue because we can't see the ACIS generated records in Century Link anymore and it puts Century Link out of sync with ACIS as you loaded a file from 11/29/19. Century Link interface is now run off of webservices and real-time triggers and not daily files anymore.

Hi Holly,

The missing sentences should be available after next production push V5.1.214.
I checked also the missing movement codes and they should also be there now.
With regards to the movement reason, this is not a required field so it may be empty.

Best Regards,
Wissem ben Aissa.

Good afternoon,
Please see attached both (in-state) and (out of state) packets that we generated on the new system. One has some blank fields in the movement portion and the out of state packet is still missing sentence calculation information.....3

> > >
> > > B&D seems to be requesting information about how to correctly map AIMS1 BOEC hearing location data into ACIS. I'm thinking an RCA with appropriate SMEs is our next move. I suppose we'll need an SME for BOEC (Anthony?), AIMS1 data migration (Jim?), and B&D (David). Does that sound right to you? Once I know who to invite, I'll get this scheduled.

---

Hi Jim:

I understand that you re-ran the AIMS Century Link file today into the API enforcer to fix an issue that was reported by the users. I ask that you please do not run AIMS files into any of the interfaces anymore as the new interfaces need to run using the data from ACIS not AIMS. The result of this fix temporarily put a Band-Aid on the issue, but it further masked our ability to determine the root cause of this issue because we can't see the ACIS generated records in Century Link anymore and it puts Century Link out of sync with ACIS as you loaded a file from 11/29/19. Century Link interface is now run off of webservices and real-time triggers and not daily files anymore.

I appreciate your cooperation in this matter.

Thank you.

Hello Wissem-

Please see below. Appears movement is displaying blank fields and the out of state packet is missing sent calculation info..

Respectfully,

Holly Greene

Good afternoon,
Please see attached both (in-state) and (out of state) packets that we generated on the new system. One has some blank fields in the movement portion and the out of state packet is still missing sentence calculation information.....3

AMERICAN OVERSIGHT

Please have Colleen do so. Josh is out of the office today, but he did indicate that a sentence fix is on its way from B&D.

Hello all-

Here are the codes which are in RMS. Please note that they do not match those from AIMS1. The AIMS1 codes are the codes that should be used.

```
<asp:ListItem Value="0">31-233 Early Parole</asp:ListItem>
  <asp:ListItem Value="1">31-412A Parole Regular</asp:ListItem>
  <asp:ListItem Value="2">31-412B Parole To Detainer</asp:ListItem>
  <asp:ListItem Value="3">31-236 Home Arrest</asp:ListItem>
  <asp:ListItem Value="4">Work Furlough</asp:ListItem>
  <asp:ListItem Value="5">31-414 Absolute Discharge</asp:ListItem>
  <asp:ListItem Value="6">Discretionary Release</asp:ListItem>
  <asp:ListItem Value="7">Provisional Release</asp:ListItem>
  <asp:ListItem Value="8">Earned Release Credit(NEW CODE -IRE Required)</asp:ListItem>
  <asp:ListItem Value="9">1/2 To Deport</asp:ListItem>
  <asp:ListItem Value="10">1053-Absolute Discharge To Probation</asp:ListItem>
  <asp:ListItem Value ="11">Transition</asp:ListItem>
  <asp:ListItem Value ="12">Transition/1053</asp:ListItem>
  <asp:ListItem Value="13">Expiration of Sentence(new code)</asp:ListItem>
  <asp:ListItem Value="14">Earned Release Credit(TIS)</asp:ListItem>
  <asp:ListItem Value="15">Sentence Expiration(TIS)</asp:ListItem>
  <asp:ListItem Value="16">Comm Superv. Begin Date(TIS)</asp:ListItem>
  <asp:ListItem Value="17">Comm. Superv. End Date(TIS)</asp:ListItem>
  <asp:ListItem Value="18">Absolute Discharge(13-603K)</asp:ListItem>
  <asp:ListItem Value="19">Mandatory Release</asp:ListItem>

Hi Dave,

Do you have any kind of AIMS1 description with those highlighted code #s?

Bug has been reassigned to Samantha Hernandez so we can get the releasetype's mapped.

Trevor will also be taking a look at the release type code from our side.

Subject: Bug 40593:*CRITICAL ~ GO-LIVE Data Migration 11/29/19 - RMS: Transition Program is showing "Pending Approval" for inmates that have transition

Thad,

I need a contact at ADC to get the blue highlighted codes mapped before I can resolve this bug. Is there someone available at ADC tonight that can help me with this?

Bug 40593:*CRITICAL ~ GO-LIVE Data Migration 11/29/19 - RMS: Transition Program is showing "Pending Approval" for inmates that have transition

There are legacy RMS records that weren't brought into ACIS for AZ_DOC_TRANSITION_ELIGIBILITY and AZ_DOC_TRANSITION_PRG_REVIEW as they didn't have a mapped RMS_RELEASEINFO.releasetype value

The Scheduled Job did insert a record into AZ_DOC_TRANSITION_PRG_ELIG at 9:24:21PM Saturday night

ADC_NUMBER	DOC_ID	ELIG_STATUS	Need Mapping RELEASE_TYPE_ID	REVIEW_STATUS
[redacted]	[redacted]	Eligible	12	Approved

AMERICAN OVERSIGHT

with the status of ELIGIBLE *but there isn't a record for az_doc_transition_prg_review as I assume in ACIS the next action would be to get the approval.*

To fix this issue I would need to get RMS_RELEASEINFO.RELEASETYPE's mapping from ADC for
the list of values that aren't in lookup RELEASE_TYPE
RMS_RELEASEINFO.RELEASE_TYPE
IN(0,1,3,9,10,11,12,13,15,16,19,22,23,24,25,26,27,28,30,99)

Then I would need to insert the missing records into AZ_DOC_TRANSITION_PRG_ELIG making sure not to
insert duplicate records that were created by the nightly scheduled job.

After that I would need to insert a record into AZ_DOC_TRANSITION_PRG_REVIEW for all records that have
an approved/denied flag in RMS_TRANSITION.PROGRAMAPPROVED

```
select      d.adc_number          as adc_number,
            d.doc_id              as doc_id,
            tran_elig.description  as elig_status,

            r.releasetype         as release_type_id,
            tc_review.description  as review_status

 from rms_releaseinfo r
inner join tmp_doc_episode_all d

  on d.adc_number = r.adcno
 and date_conv(r.dateofentry, 'Mon DD YYYY HH:MIAM')
 between trunc(d.admission_date)  and d.next_admission_date - 1

inner join rms_transition t
  on t.releaseid = r.id
inner join lookups tran_elig
  on tran_elig.code = decode(r.transitionprogram, '1', '1', '0', '2', null)
 and lookup_category = 'TRANSITION_PRG_ELIGIBILITY'
inner join lookups tc_review
  on tc_review.lookup_category = 'TRANSITION_PRG_TC_REVIEW'
 and tc_review.code =  decode(t.PROGRAMAPPROVED, '1', 'APPR',
                              '0', 'DEN')
where d.adc_number = [redacted]
```

Subject: GO-LIVE Bug status - start of Shift 2

Happy Sunday everyone,

We have 22 open bugs.

7 Critical

12 High

3 Medium

I will be reaching out around 6pm for a status on where you are on each of these bugs. Please let me know if you are hitting any roadblocks or need some assistance in any way.

I will again reach out around 9:30p for an end of shift status on each of your bugs and for those bugs that are still being worked on, please advise on who in Shift 3 can take it over for you so we do not lose any momentum in getting them resolved.

Here is the breakdown of those bugs and who they are assigned to.

Amira:

40595	\11-Community Corrections\RMS	RMS: RMS Home plan unable to return to COIII	Amira belhajyahiya	Proposed	2 - High
40594	\11-Community Corrections\RMS	RMS: RMS Home Plan Migration not assigned to correct CCO	Amira belhajyahiya	Proposed	3 - Medium

Chris Campion:

Benjamin
We need to clarify what this means. Yes, we want M&O, but, as Joe and I discussed with you, we are not to be charged for fixing defects as part of the 10k hours. We also promised to get JR part of this clarification and he is prepared to do so. We will set a meeting.
Mike

AMERICAN OVERSIGHT

There's a robust list of issues requiring B&D's attention which I find no reason to delay action toward resolution.

For a quick clarification….Tim is looking for confirmation from accounting and Offender management groups at the conclusion of their verification testing today so that he can put some final production systems in place. KeepTrak Inmate and KeepTrak Offender Fee systems are available for ADC verification testing.

Thank you.

B&D update - data migration has completed loading transactional data.

Next steps is to execute the workflow runner for sentence calculation.

So far we continue to be on track and making great progress.

Thanks

Dean

Hello, All;

It's been a while since my last update, and I was hoping to send out more news than "we're still importing data", but we're still importing data. Everything has gone very well. AZ31855P is nearly finished; there are about 3000 obligations are still crunching. Once that's done, AZ31855P will be completed. ADCCOPS is also nearly finished. It has a few thousand balances to import, but that's also just a number-crunching waiting game.

Once these numbers are sufficiently crunched, and we check the results for errors, AZ31855P and ADCCOPS will be complete. This will probably take an hour or so. I'll send another status update when this is finished.

I've successfully converted all the AIMS data into files that KeepTrak can use. I need to do some hand-pruning in the files, but everything is going well so far.

Good morning, everyone! It's stormy and raining here in St. Louis, MO! Just letting you all know that I'm kicking off the Keefe portion of the migration now. At various milestones throughout the migration, I'll check in and report my progress. This process expected to take between 6 and 8 hours. If you have any questions, certainly don't hesitate to ask.

Hello Everyone:

All files have been transferred from the ADC to B&D and Keefe as of 1:56am AZ.

AMERICAN OVERSIGHT

Keefe has acknowledged receipt of the files at 2:20am

Reference Data has been loaded, checked and now validated.

AIMS1 to ACIS Data Migration process has started. The current phase will take approximately 13hrs.

Next update will be at the completion of the current milestone, unless issues are encountered.

Thank you.

AMERICAN OVERSIGHT

well. AZ31855P is nearly finished; there are about 3000 obligations are still crunching. Once that's done, AZ31855P will be completed. ADCCOPS is also nearly finished. It has a few thousand balances to import, but that's also just a number-crunching waiting game.

Once these numbers are sufficiently crunched, and we check the results for errors, AZ31855P and ADCCOPS will be complete. This will probably take an hour or so. I'll send another status update when this is finished.

Hello Everyone:

All files have been transferred from the ADC to B&D and Keefe as of 1:56am AZ.

Keefe has acknowledged receipt of the files at 2:20am

Reference Data has been loaded, checked and now validated.

AIMS1 to ACIS Data Migration process has started. The current phase will take approximately 13hrs.

Next update will be at the completion of the current milestone, unless issues are encountered.

Thank you.

This is the official handover of ACIS to ADC from B&D. It marks the conclusion of the data migration activities for this weekend.

I would like to thank all ADC, Keefe and B&D team members involved in this extremely complex migration process, a seamless weekend of activities. Congratulations to all for making it this far, now go get some sleep!

ADC testing on ACIS will continue during today.

Good luck to everyone involved with the next phase of the ACIS Go Live!

Thanks

Dean

B&D update - data migration has completed loading transactional data.

Next steps is to execute the workflow runner for sentence calculation.

So far we continue to be on track and making great progress.

Thanks

Dean

AMERICAN OVERSIGHT

Hello, All;

It's been not nearly enough time since my last update, but I have good news. AZ31855P has completed its import. There were 2 errors in the obligations that need to be addressed, and I will be doing that a little later today. ADCCOPS is still churning. I'll be stepping away from the computer for a little while, but I'll be re-engaged a little later today. I'll send another update when I return.

Hello, All;

It's been a while since my last update, and I was hoping to send out more news than "we're still importing data", but we're still importing data. Everything has gone very well. AZ31855P is nearly finished; there are about 3000 obligations are still crunching. Once that's done, AZ31855P will be completed. ADCCOPS is also nearly finished. It has a few thousand balances to import, but that's also just a number-crunching waiting game.

Once these numbers are sufficiently crunched, and we check the results for errors, AZ31855P and ADCCOPS will be complete. This will probably take an hour or so. I'll send another status update when this is finished.

KeepTrak Banking is still importing inmate data into AZ31855P on schedule. I've gotten all the offenders loaded into ADCCOPS, and I'm gonna start working on their balances now.

I've successfully converted all the AIMS data into files that KeepTrak can use. I need to do some hand-pruning in the files, but everything is going well so far.

Hello Everyone:

All files have been transferred from the ADC to B&D and Keefe as of 1:56am AZ.

Keefe has acknowledged receipt of the files at 2:20am

Reference Data has been loaded, checked and now validated.

AIMS1 to ACIS Data Migration process has started. The current phase will take approximately 13hrs.

AMERICAN OVERSIGHT

Next update will be at the completion of the current milestone, unless issues are encountered.

Thank you.

Subject: ACIS State Wide Go Live Weekend Data Migration

Hello All:

At 5:00pm we will be kicking off the ACIS State Wide Go Live Weekend Data Migration activities. This is the official email chain that will provide updates throughout the weekend. If you are responsible for providing an update please reply all to the email group so that everyone stays informed.

Overview of Activities:

- The schedule of the weekend activities and contact information for everyone on this distro list is below.
- ADC will kick off the migration activities at 5:00pm today Friday 11/29/19 with a handover to B&D at the completion of their activities.
- Holly Greene (or a designated person from her team) will provide the communication from kickoff to completion and handover of ADC migration activities to B&D.
- B&D will then commence their portion of the migration and members of the team will provide updates as milestone tasks are completed (updates will come from the individual task owners). If there is an issue B&D will provide hourly updates until the issue is resolved.
- This email chain is to be used for milestone migration updates only. If sidebar more technical conversations are needed please send out a different email (ADC requests Holly Green, Jim Tarantino, and Dwight Cloud be your ADC technical escalates).

Good Morning:

B&D update - all post migration database tasks are complete. Moving to QA smoke test of the application.

We remain on target for a 10am handover to ADC.

Thank you.

B&D update - data migration has completed loading transactional data.

Next steps is to execute the workflow runner for sentence calculation.

So far we continue to be on track and making great progress.

Thanks

Dean

> It's been a while since my last update, and I was hoping to send out more news than "we're still importing data", but we're still importing data. Everything has gone very well. AZ31855P is nearly finished; there are about 3000 obligations are still crunching. Once that's done, AZ31855P will be completed. ADCCOPS is also nearly finished. It has a few thousand balances to import, but that's also just a number-crunching waiting game.
>
> Once these numbers are sufficiently crunched, and we check the results for errors, AZ31855P and ADCCOPS will be complete. This will probably take an hour or so. I'll send another status update when this is finished.

KeepTrak Banking is still importing inmate data into AZ31855P on schedule. I've gotten all the offenders loaded into ADCCOPS, and I'm gonna start working on their balances now.

I've successfully converted all the AIMS data into files that KeepTrak can use. I need to do some hand-pruning in the files, but everything is going well so far.

Subject: ACIS State Wide Go Live Weekend Data Migration - Keefe KeepTrak

Good morning, everyone! It's stormy and raining here in St. Louis, MO! Just letting you all know that I'm kicking off the Keefe portion of the migration now. At various milestones throughout the migration, I'll check in and report my progress. This process expected to take between 6 and 8 hours. If you have any questions, certainly don't hesitate to ask.

Timothy Gravier, Jr. | Implementation Analyst | Direct: 314-963-8764 | 1-800-864-5986 | tgravier@keefegroup.com | 10880 Lin Page Place Saint Louis, MO 63132

Subject: RE: ACIS State Wide Go Live Weekend Data Migration

Hello Everyone:

All files have been transferred from the ADC to B&D and Keefe as of 1:56am AZ.

Keefe has acknowledged receipt of the files at 2:20am

Reference Data has been loaded, checked and now validated.

AIMS1 to ACIS Data Migration process has started. The current phase will take approximately 13hrs.

Next update will be at the completion of the current milestone, unless issues are encountered.

Thank you.

Subject: ACIS State Wide Go Live Weekend Data Migration

Hello All:

At 5:00pm we will be kicking off the ACIS State Wide Go Live Weekend Data Migration activities. This is the official email chain that will provide updates throughout the weekend. If you are responsible for providing an update please reply all to the email group so that everyone stays informed.

Overview of Activities:

- The schedule of the weekend activities and contact information for everyone on this distro list is below.
- ADC will kick off the migration activities at 5:00pm today Friday 11/29/19 with a handover to B&D at the completion of their activities.
- Holly Greene (or a designated person from her team) will provide the communication from kickoff to completion and handover of ADC migration activities to B&D.
- B&D will then commence their portion of the migration and members of the team will provide updates as milestone tasks are completed (updates will come from the individual task owners). If there is an issue B&D will provide hourly updates until the issue is resolved.
- This email chain is to be used for milestone migration updates only. If sidebar more technical conversations are needed please send out a different email (ADC requests Holly Green, Jim Tarantino, and Dwight Cloud be your ADC technical escalates).

Additional Note:

Upon completion of the database cleanup and export PROD the following items will be completed tomorrow morning in preparation for the 10:00am handover. We will provide updates upon their completion:

QA Smoke Verification Test/Jmeter Activity
Turn on Services and Interfaces in PROD
Reenable Access Web Application for ADC Users
Official Handover to ADC

Thank you.

B&D update - data migration has completed loading transactional data.

Next steps is to execute the workflow runner for sentence calculation.

So far we continue to be on track and making great progress.

Thanks

Dean

> Hello, All;

AMERICAN OVERSIGHT

It's been a while since my last update, and I was hoping to send out more news than "we're still importing data", but we're still importing data. Everything has gone very well. AZ31855P is nearly finished; there are about 3000 obligations are still crunching. Once that's done, AZ31855P will be completed. ADCCOPS is also nearly finished. It has a few thousand balances to import, but that's also just a number-crunching waiting game.

Once these numbers are sufficiently crunched, and we check the results for errors, AZ31855P and ADCCOPS will be complete. This will probably take an hour or so. I'll send another status update when this is finished.

KeepTrak Banking is still importing inmate data into AZ31855P on schedule. I've gotten all the offenders loaded into ADCCOPS, and I'm gonna start working on their balances now.

I've successfully converted all the AIMS data into files that KeepTrak can use. I need to do some hand-pruning in the files, but everything is going well so far.

AMERICAN OVERSIGHT

Good morning, everyone! It's stormy and raining here in St. Louis, MO! Just letting you all know that I'm kicking off the Keefe portion of the migration now. At various milestones throughout the migration, I'll check in and report my progress. This process expected to take between 6 and 8 hours. If you have any questions, certainly don't hesitate to ask.

Hello Everyone:

All files have been transferred from the ADC to B&D and Keefe as of 1:56am AZ.

Keefe has acknowledged receipt of the files at 2:20am

Reference Data has been loaded, checked and now validated.

AIMS1 to ACIS Data Migration process has started. The current phase will take approximately 13hrs.

Next update will be at the completion of the current milestone, unless issues are encountered.

Thank you.

Subject: ACIS State Wide Go Live Weekend Data Migration

AMERICAN OVERSIGHT

Hello All:

At 5:00pm we will be kicking off the ACIS State Wide Go Live Weekend Data Migration activities. This is the official email chain that will provide updates throughout the weekend. If you are responsible for providing an update please reply all to the email group so that everyone stays informed.

Overview of Activities:

- The schedule of the weekend activities and contact information for everyone on this distro list is below.
- ADC will kick off the migration activities at 5:00pm today Friday 11/29/19 with a handover to B&D at the completion of their activities.
- Holly Greene (or a designated person from her team) will provide the communication from kickoff to completion and handover of ADC migration activities to B&D.
- B&D will then commence their portion of the migration and members of the team will provide updates as milestone tasks are completed (updates will come from the individual task owners). If there is an issue B&D will provide hourly updates until the issue is resolved.
- This email chain is to be used for milestone migration updates only. If sidebar more technical conversations are needed please send out a different email (ADC requests Holly Green, Jim Tarantino, and Dwight Cloud be your ADC technical escalates).

Subject: 0200 Completed: ACIS ADC Data Migration (11/30)

Hello-

All files have been transferred from the ADC to B&D and KEEFE as of 0156 AZ MT. No further updates will be sent to this mailing list by the ADC IT group.

Mainframe

- All 112 mainframe files were received by the ADC database team.

AMERICAN OVERSIGHT

- The only issue experienced was at 2000 when the 12BD segment abended. This issue was promptly resolved. All other jobs ran smoothly.

Database

The team transmitted:

- 112 mainframe files to B&D
- 67 PCAIMS text files to B&D
- 27 PCAIMS attachments to B&D
- 9 (fullset) KeepTrak files to Keefe
-
    - John or Tim - Please validate receipt.

KEEFE Files
1_Active_Inmates.CSV
2_iBank.csv
3_One_Day_of_AIMs_Transactions.csv
4_COS_Account_Status_Detailed.csv
5_Transaction_Detail.csv
6_Outstanding_Checks.csv
7_41_Discipline_Restitution
8_33_Escapee_Apprehension
9_34_Tax_Risk_Management

AMERICAN OVERSIGHT

image.png

B&D

- At 2230, B&D confirmed receipt of all ADC files and began their piece of the migration process.

Please contact Holly Greene with any questions or issues regarding the data transmitted.

Thank you for all of your hard work! Have an amazing weekend everyone!

Respectfully,

Holly Greene

Hi Holly,
I have the results for the top 2 files (Please see the attached file). I'll keep working for few more.....

Regards,
HT

Holly,

Here is the update on the Attachment File migration:

- 1,263,284 attachments files are migrated.

- There are 127 files (see attached list) that are referenced in inmate OMS/RMS records, but are not found in any of the 27 folders received (Full or Delta).

Can you please check if these are available and if yes, send them as soon as possible?

Thanks.

AMERICAN OVERSIGHT

Hello-

All files have been transferred from the ADC to B&D and KEEFE as of 0156 AZ MT. No further updates will be sent to this mailing list by the ADC IT group.

Mainframe

- All 112 mainframe files were received by the ADC database team.
- The only issue experienced was at 2000 when the 12BD segment abended. This issue was promptly resolved. All other jobs ran smoothly.

Database

The team transmitted:

- 112 mainframe files to B&D
- 67 PCAIMS text files to B&D
- 27 PCAIMS attachments to B&D
- 9 (fullset) KeepTrak files to Keefe
    - John or Tim - Please validate receipt.

KEEFE Files
1_Active_Inmates.CSV
2_iBank.csv
3_One_Day_of_AIMs_Transactions.csv
4_COS_Account_Status_Detailed.csv
5_Transaction_Detail.csv
6_Outstanding_Checks.csv
7_41_Discipline_Restitution
8_33_Escapee_Apprehension
9_34_Tax_Risk_Management

AMERICAN OVERSIGHT

B&D

- At 2230, B&D confirmed receipt of all ADC files and began their piece of the migration process.

Please contact Holly Greene with any questions or issues regarding the data transmitted.

Thank you for all of your hard work! Have an amazing weekend everyone!

Respectfully,

Holly Greene

Hello, All;

It's been not nearly enough time since my last update, but I have good news. AZ31855P has completed its import. There were 2 errors in the obligations that need to be addressed, and I will be doing that a little later today. ADCCOPS is still churning. I'll be stepping away from the computer for a little while, but I'll be re-engaged a little later today. I'll send another update when I return.

Hello, All;

It's been a while since my last update, and I was hoping to send out more news than "we're still importing data", but we're still importing data. Everything has gone very well. AZ31855P is nearly finished; there are about 3000 obligations are still crunching. Once that's done, AZ31855P will be completed. ADCCOPS is also nearly finished. It has a few thousand balances to import, but that's also just a number-crunching waiting game.

AMERICAN OVERSIGHT

Once these numbers are sufficiently crunched, and we check the results for errors, AZ31855P and ADCCOPS will be complete. This will probably take an hour or so. I'll send another status update when this is finished.

KeepTrak Banking is still importing inmate data into AZ31855P on schedule. I've gotten all the offenders loaded into ADCCOPS, and I'm gonna start working on their balances now.

I've successfully converted all the AIMS data into files that KeepTrak can use. I need to do some hand-pruning in the files, but everything is going well so far.

Subject: ACIS State Wide Go Live Weekend Data Migration - Keefe KeepTrak

Good morning, everyone! It's stormy and raining here in St. Louis, MO! Just letting you all know that I'm kicking off the Keefe portion of the migration now. At various milestones throughout the migration, I'll check in and report my progress. This process expected to take between 6 and 8 hours. If you have any questions, certainly don't hesitate to ask.

Subject: RE: ACIS State Wide Go Live Weekend Data Migration

Hello Everyone:

All files have been transferred from the ADC to B&D and Keefe as of 1:56am AZ.

Keefe has acknowledged receipt of the files at 2:20am

Reference Data has been loaded, checked and now validated.

AIMS1 to ACIS Data Migration process has started. The current phase will take approximately 13hrs.

Next update will be at the completion of the current milestone, unless issues are encountered.

Thank you.

Subject: ACIS State Wide Go Live Weekend Data Migration

Hello All:

AMERICAN OVERSIGHT

At 5:00pm we will be kicking off the ACIS State Wide Go Live Weekend Data Migration activities. This is the official email chain that will provide updates throughout the weekend. If you are responsible for providing an update please reply all to the email group so that everyone stays informed.

Overview of Activities:

- The schedule of the weekend activities and contact information for everyone on this distro list is below.
- ADC will kick off the migration activities at 5:00pm today Friday 11/29/19 with a handover to B&D at the completion of their activities.
- Holly Greene (or a designated person from her team) will provide the communication from kickoff to completion and handover of ADC migration activities to B&D.
- B&D will then commence their portion of the migration and members of the team will provide updates as milestone tasks are completed (updates will come from the individual task owners). If there is an issue B&D will provide hourly updates until the issue is resolved.
- This email chain is to be used for milestone migration updates only. If sidebar more technical conversations are needed please send out a different email (ADC requests Holly Green, Jim Tarantino, and Dwight Cloud be your ADC technical escalates).

Subject: 0100 Update: ACIS Go-Live Data Migration (11/30)

Hello-

The 0100 update is as follows:

Database
The team is now in the process of creating the 9 (fullset) KeepTrak files to send to Keefe.

If there are any questions or concerns, please do not hesitate to contact Holly Greene and Jim Tarantino.

Next update will be sent at 0200 hours.

NOTE: *Hourly technical updates can be reviewed at: https://azdema.webeocasp.com/azdema/*

Respectfully,

AMERICAN OVERSIGHT

Good Evening!

B&D have received all files from ADC and have begun the B&D element of the migration process.

The files are being compared against the reference data. Any issues found B&D will communicate with ADC immediately.

Thanks

Dean

Subject:	2200 Update: ACIS Go-Live Data Migration (11/29)
Date:	Friday, November 29, 2019 10:05:08 PM

Good evening-

The 2200 update is as follows:

Mainframe
The team completed all jobs which cleaned and reformatted the mainframe IMS databases. They have all been sent to the ADC Database group for transmittal to B&D. This completes data transmission task for the mainframe team.

Database
The team continues the transmission of the remaining mainframe files to the B&D directory.

If there are any questions or concerns, please do not hesitate to contact Holly Greene and Jim Tarantino.

Next update will be sent at 2300 hours.

Subject:	1900 Update: ACIS Go-Live Data Migration (11/29)
Date:	Friday, November 29, 2019 7:06:41 PM

Good evening-

The 1900 update is as follows:

Mainframe
The 03 & 04 IMS database segments have completed. The jobs are running well and proceeding smoothly.

Database
The 27 attachment folders are being compressed and the PC text files are currently transmitting to B&D.

If there are any questions or concerns, please do not hesitate to contact Holly Greene and Jim Tarantino.

Next update will be sent at 2000 hours.

Subject:	1800 Update: ACIS Go-Live Data Migration (11/29)
Date:	Friday, November 29, 2019 6:04:22 PM

Good evening B&D Team-

The 1800 update is as follows:

Mainframe
1748: AIMS1 is back online (Teams: IBM / ADC Mainframe)
1752: The clean and reformat process of the IMS Data has commenced.

Database
1800: A total of 67 TXT files and 27 folders of PDF files (total 14944 files) are ready to be packaged and transmitted via SFTP to B&D. This is the Delta version of the information. NOTE: There are 3 empty folders as expected (RMSATS.txt, RMSAttach1002_34Data.txt, and Attach1002_34 folder are empty as expected). The process of extracting files took around one hour to complete.

If there are any questions or concerns, please do not hesitate to contact Holly Greene and Jim Tarantino.

Next update will be sent at 1900 hours.

Subject:	1700 Commencement: Go-Live Data Migration (11/29)
Date:	Friday, November 29, 2019 5:06:06 PM

Good evening B&D-

This email message is intended for technical hourly updates to B&D. Please let me know if the audience needs to be expanded.

As noted in the previous communication, the ADC IT support team commenced the Go-Live Data Migration effort at 17:00 AZ MT.

1632: Banking month end completed
1644: AIMS1 received final information from eOMIS. eOMIS connection now severed.
1700: PC AIMS jobs began running
1703: AIMS1 has been brought down and the team is prepping the back-ups

If there are any questions or concerns, please do not hesitate to contact Holly Greene and Jim Tarantino.

From: Holly Greene on behalf of Holly Greene <hgreene@azadc.gov>
To: Marissa Boice; Dwight Cloud
Subject: Re: ACIS State Wide Go Live Weekend Data Migration
Date: Friday, November 29, 2019 4:50:55 PM

I will be sending a commencement and closure email to the Warden's for my team's piece. I believe the remaining comms throughout the weekend will be sent by the ACIS email account.

Dwight-

Can you help clarify how the wardens will be communicated to and by whom?

Respectfully,

Holly Greene

Hello All:

At 5:00pm we will be kicking off the ACIS State Wide Go Live Weekend Data Migration activities. This is the official email chain that will provide updates throughout the weekend. If you are responsible for providing an update please reply all to the email group so that everyone stays informed.

Overview of Activities:

- The schedule of the weekend activities and contact information for everyone on this distro list is below.
- ADC will kick off the migration activities at 5:00pm today Friday 11/29/19 with a handover to B&D at the completion of their activities.
- Holly Greene (or a designated person from her team) will provide the communication from kickoff to completion and handover of ADC migration activities to B&D.
- B&D will then commence their portion of the migration and members of the team will provide updates as milestone tasks are completed (updates will come from the individual task owners). If there is an issue B&D will provide hourly updates until the issue is resolved.
- This email chain is to be used for milestone migration updates only. If sidebar more technical conversations are needed please send out a different email (ADC requests Holly Green, Jim Tarantino, and Dwight Cloud be your ADC technical escalates).

Josh:

We have stopped all the services in PROD to get everything ready for Go Live weekend. PC AIMS will be re-enabled on Sunday evening after the go-no go decision when we have finished migration and we start connecting everything to be ready for Monday morning.

Thank you.

Good morning, Wissem - No new files have generated since Wednesday.
Can you please let me know when to expect new delivery of overnight data, even if that's after the migration?
Thank you very much,
- josh C.

Hi Josh (et al)-

Per Thad, they are re-running the 04AA batch job now. It just started about 08:45 and it'll run between 2-4hrs (689k records to process).

Has the issue with 03AA been resolved?

Respectfully,

Holly Greene

AMERICAN OVERSIGHT

Hi Thad,

1. Issue 1 : Locator code value discrepancies :

   This is now fixed and is awaiting deployment to PROD.

   This is a DB script update to a function used only in PC AIMS interface and not ACIS application.

   If we can get the approval we can deploy it out of schedule and trigger the PCAIM interface again.

   TFS change set number is 26303.

2. Issue 2 : Locator code null for ADC numbers starting [redacted] Can we please test this with today's PCAIM file ? I can see that the data is there in the DB but seems the file did not include them on Friday release. (Josh to confirm ?)

Thanks,

Best Regards,

Wissem ben Aissa.

Hello, Wissem - I reopened TFS Issue #38585 as the Current Location Code from last night's file is still inaccurate when checked against the application, as well as null for all rows especially toward the recent end of the sorted ADC Numbers (I've included some example ADC Numbers to check in the ticket).

Let's see if we can get this diagnosed and repaired as quickly as possible tomorrow and Monday.

Talk with you more soon,

- josh C.

Yes – we're all good

I have talked to Phil and Wissem

Phil will deploy to production tonight and make sure the PCAIMS interface is run (or scheduled to run)

Wissem will check the logs and make sure the PCAIMS interface has run or is running

We then anticipate that the PCAIMS files will be available for Josh tomorrow morning (Saturday) after 6:00 AM

Hi Thad-

Please see the email below per the debrief meeting. These two TFS tickets need to be addressed prior to Monday load. Believe these could or will impact Visitation in some capacity...

- #38585 - 03AA Showing duplicate ADC Numbers
- #40444 - 04AA-CurrentLocationCode NULL and inaccurate

Respectfully,

Holly Greene

Hello, Holly - Here's the two tickets that are high priority for PC-AIMS2:

- #38585 - 03AA Showing duplicate ADC Numbers
- #40444 - 04AA-CurrentLocationCode NULL and inaccurate

If they were not in good order on Monday, we'd be in trouble with all of our connected applications as these are the two most important tables in PC-AIMS so checking them earlier would be a definite positive development.

Talk with you again soon,

- josh C.

If old warrants need to be changed or amended, that would be done in ACIS in which case the user can use the signature pad.

Thanks.

Is using the historical warrant application as a work around a temporary fix until the signature problem can be figured out? Logistically, I can see this being a problem years from now especially if old warrants need to be changed or amended.

Subject: Follow-up on Historical Warrants Migration RCA session 2019-11-26

Charles,

I spoke with Dwight about continuing user access to the legacy Warrants application after ACIS go-live. This is a workaround for not being able to migrate historical warrant signatures into ACIS. He indicated continuing read-access to the old system would work from an IT perspective. I spoke with Hema, who also confirmed mass-producing PDFs for all ~40k historical warrants for attachment in ACIS is not possible with the existing warrants application.

I think we are confirming the RCA group's plan to (1) use the historical warrants application to generate and print historical warrants, and (2) give up the attempt to recreate or attach historical warrants in ACIS. This decision is certainly still open to discussion--if someone can see better options, please let me know.

In the meantime, I'm closing bug 37581 "Warrant Detail not migrating properly". Other warrant data that is not associated with precisely reproducing a historical warrant must still be migrated and appear in the ACIS user interface correctly. However, any issues related to that will be handled in other bugs, not 37581.

AMERICAN OVERSIGHT

This is the email I'm thinking of sending to Mr. Richard Pratt and Dr. Taylor and Stacey Crabtree. It might also become part of a larger communication out to the complexes. Any suggestions for this message?

Dear Mr. Pratt, Dr. Taylor, and Ms. Crabtree

At 1700 on Friday (2019-11-29), AIMS1 will no longer be ADC's system of record for new transactions as we transition to ACIS. The eOMIS interface will not be disrupted by this transition, but AIMS1 use will be disrupted as ADC migrates data from the old system to the new system. Medical staff will need to be ready on Monday, 12-02 to update the new ACIS system with anything that would have required an AIMS1 transaction during the transition period. The transition period starts at 1700 on Friday, 11-29 and ends when we make ACIS available to users system-wide at 0600 on Monday, 12-02. Medical staff may need to keep written notes over the weekend so they can update ACIS on Monday. Don't hesitate to reach out to me if you have any questions or suggestions.

AMERICAN OVERSIGHT

Attached is the file we got last weekend. It shows Active Inmates – [redacted] is not in the file. Prior to this we were getting all inmate balances whether active or inactive. Not sure why we got the Active Only file this weekend.

Michael, John and Tim-

Please work with each other to determine what files are needed today.

Also, my team needs comprehensive list of the files which are required for the data migration this weekend.

Respectfully,

Holly Greene

AMERICAN OVERSIGHT

3. a separate file with balances that are not in the 1_Active_Inmates file.

We will do whatever works for ADC, but we do need all Accounts with a positive balance regardless of their custody status. Please tell us what the name of this file is (these files are) and the acceptable protocol for requesting it.

We are also taking changes for the treatment of non-standard debt in the debt file. Perhaps ADC can send the remainder of the balance (for inactive accounts) and we can import these to meet expectations in the thorough review that the bankers are conducting.

Thx!

John

Hi Holly:

This request is a change. ADC needs to determine if this is a showstopper for Go Live or not, and if it is then it needs to be escalated to upper management. If this can be implemented after Go live then it needs to be added to the Parking Lot so that it can be prioritized among the other work items including having ADC provide requirements to both B&D and Keefe. Due to our very tight time constraints we are only focusing on in-scope items this week.

Hello John,

Currently, we send KEEFE an ACTIVE_INMATES.csv file. Since there is no Banking Content kept within the ORACLE AIMs 2 Database, we are going to need that exact same banking file sent back to us from KEEFE. We will need the content for a Banking File we presently send to JPAY. The file consists of the 12 fields below. I have attached an example of the file. This is the exact same file we send every time we deliver files to KEEFE. They probably already have the Data Schema set up, as this is the file we send them. We are needing to have this file sent to us on a Nightly basis starting as soon as they have it available.

1) ADC_Number
2) Effective_Date
3) Active/InActive
4) Inmate_Name
5) Beginning_Balance
6) Current_Balance
7) Spendable_Balance
8) Retention_Balance
9) DDA_Balance

> Mike:
>
> Can you please provide more detailed background for the basis of this request? We are not sure where this is coming from. The active inmate file being provided to GTL and JPAY from AIMS2/ACIS has been completed with the development and testing for months. Both GTL and JPAY have confirmed the format and contents. I don't have anything else on the interface list that meets the criteria that is being asked for below. If ADC feels this is necessary for go live then it needs to go through the change control process. JPAY and GTL have setup their webservices to communicate directly with KeepTrak in order to deposit the ACH funds, but there wasn't a requirement or interface to have a mechanism to transfer the balance information that you listed below back to ADC from KeepTrak.

Since there is no Banking Content kept within the ORACLE AIMs 2 Database, we are going to need that exact same banking file sent back to us from KEEFE. We will need the content for a Banking File we presently send to JPAY. The file consists of the 12 fields below. I have attached an example of the file. This is the exact same file we send every time we deliver files to KEEFE. They probably already have the Data Schema set up, as this is the file we send them. We are needing to have this file sent to us on a Nightly basis starting as soon as they have it available.

AMERICAN OVERSIGHT

Phase 2 is completed. I'm still working on the files so that I can begin Phase 3 (importing all the Suspense balances, Obligations, etc.) I'll let you all know when I'm able to get that started. Still working on ADCCOPS as well.

Subject: RE: KEEFE File Transfer

Took a little while to tinker with the files, but Phase 2 is now starting. The lion's share of the data is being loaded into KeepTrak Banking. Offender data is also being loaded into ADCCOPS.

Yes – we're all good

I have talked to Phil and Wissem

AMERICAN OVERSIGHT

Phil will deploy to production tonight and make sure the PCAIMS interface is run (or scheduled to run)

Wissem will check the logs and make sure the PCAIMS interface has run or is running

We then anticipate that the PCAIMS files will be available for Josh tomorrow morning (Saturday) after 6:00 AM

Hello, Holly - Here's the two tickets that are high priority for PC-AIMS2:

- #38585 - 03AA Showing duplicate ADC Numbers
- #40444 - 04AA-CurrentLocationCode NULL and inaccurate

If they were not in good order on Monday, we'd be in trouble with all of our connected applications as these are the two most important tables in PC-AIMS so checking them earlier would be a definite positive development.

Talk with you again soon,

- josh C.

Hi Thad-

Please see the email below per the debrief meeting. These two TFS tickets need to be addressed prior to Monday load. Believe these could or will impact Visitation in some capacity...

- #38585 - 03AA Showing duplicate ADC Numbers
- #40444 - 04AA-CurrentLocationCode NULL and inaccurate

Respectfully,

Holly Greene

Hello, Holly - Here's the two tickets that are high priority for PC-AIMS2:

- #38585 - 03AA Showing duplicate ADC Numbers
- #40444 - 04AA-CurrentLocationCode NULL and inaccurate

If they were not in good order on Monday, we'd be in trouble with all of our connected applications as these are the two most important tables in PC-AIMS so checking them earlier would be a definite positive development.

Talk with you again soon,
- josh C.

Job $CO798PR (H310I798) runs every Saturday.

I can pull off the H310I798 Report for the generation data set (occurrence) for '$COS.H310I798.RPT.FILE.G0295V00' this is the one that ran on 11-2-2019 and ran for the period of 10-25-2019 to 11-02-209.

I believe that should give you want you want.

It is attached in data format below:

Let me know if you need something else:

Scott, the text format of the report is attached. Check it out and see if it is okay for your needs.
If not I might have to run the job again and use IBM Debug to stop it and force in the dates
for the Period (as shown in the report header 11/12/2019 to 11/20/2019 and change it to 11-2-2019 to 11-9-2019)

Let me know.

Russell, please be careful if you are using my jcl.
The job you submitted locked up the IMS and CICS Region because of the debug statements.
That job can not be cancelled it has to have two other jobs run to delete it from the IMS and CICS lock.

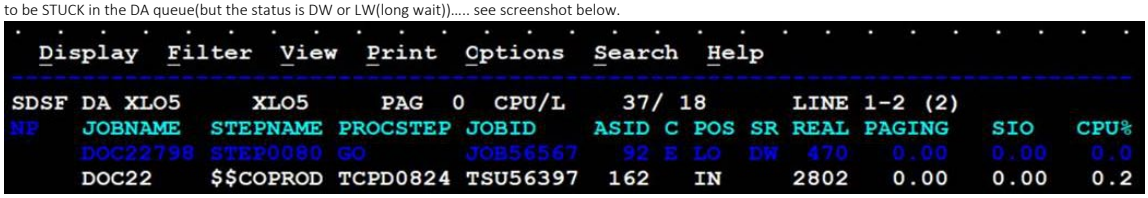
Importance: High

Hi. Can you run this for Scott?

I tried to run it using a COPY of the JCL I found in your library. I moved the IBM debugger statements to the end & updated the GDG(s)… but after I submitted it it appears to be STUCK in the DA queue(but the status is DW or LW(long wait))….. see screenshot below.



```
  Display  Filter  View  Print  Options  Search  Help
------------------------------------------------------------------------------
SDSF DA XLO5     XLO5     PAG  0  CPU/L    37/ 18      LINE 1-2 (2)
NP    JOBNAME  STEPNAME PROCSTEP JOBID    ASID C POS SR REAL PAGING   SIO    CPU%
      DOC22798 STEP0080 GO       JOB56567   92 E LO  DW  470    0.00   0.00    0.0
      DOC22    $$COPROD TCPD0824 TSU56397  162    IN     2802    0.00   0.00    0.2
```

I think we(meaning you or JIM), might need to cancel my job….. and then could you run the report for Scott?
SPECIAL note…. He wants the date range to fall OFF SCHEDULE(e.g. G295V00 for the input files were created 11/2… G296 were created 11/9… so to get 10-31 thru 11-6 I think you'll have to do MIGHT need to run it under DEBUGGER).

Sorry for the delay Scott…. And EXTRA work for you, Robert. Robert, IF?!? You want to look at MY JCL(it already has the GDG's setup) please see DOC22.JCL.CNTL(H310I798)

You can call or text me at [redacted] if you need any further info…. Or I need to do something to end that job. DOC22798

Subject: Please run RPT 1720 - H310I798

Russell,

Please run a PDF=N (if possible) version of the H310I798.
Does not look like there are any parameters for you to enter, it uses the current date and runs for the prior week.
I hope this generates a report. We may need to intervene and set the report dates to something like 31-Oct-2019 thru 06-Nov-2019.

AMERICAN OVERSIGHT

1. In the Operational Readiness Document

- under the section 2.6 User Acceptance Testing
    - and the section End-to-End testing
        - it states that ADC will supply test results

2. I have also added a section for the Pilot:
   Pilot Testing
   Pilot testing was a 4-week exercise conducted from Oct 21 – Nov17, at the Perryville location and was designed to simulate the real world use of the system by means of dual entry into AIMS1 and ACIS the results of which have been incorporated into existing project control documents.

Let me know if you want to say anything differently

3. Under the section 2.7 Application Readiness Statement

   It is asking if the follow on Security Penetration Testing has been scheduled

   - have we scheduled the follow on test?

4. Under section 4 Network Readiness

- It says:

All Prison Locations are existing locations with known network capabilities that have been deemed adequate for Go Live.

- Are you ok with that statement?

5. Section 5.1.2 Bandwidth sayd:

Pop, DMARK, MDF, IDF

I don't know what that means – are you ok with that statement?

Thad

Subject: Final Operational Readiness Plan deliverable

Hi Thad,

As we go through our final preparations for go-live, I want to follow up with B&D about an updated Operational Readiness plan for state-wide go-live, per our contract. We had a signed version for the Perryville Pilot. I'm thinking we just need to update that for state-wide deployment and add back in the M&O Readiness section with Deliverables and an M&O Readiness Statement that appeared as section 9 in the pre-pilot draft. It should include all the deliverables for operational readiness outlined in the contract. I've attached some material I think might support the update, including ADC's recent network infrastructure assessments. If there is anything else I can do to assist in completing this, please let me know. I'll be available this week and over the weekend to support this. Will B&D provide an updated operational readiness plan? I think we're hoping to get a final signed version early next week.

Subject: Final Operational Readiness Plan deliverable

Hi Thad,

As we go through our final preparations for go-live, I want to follow up with B&D about an updated Operational Readiness plan for state-wide go-live, per our contract. We had a signed version for the Perryville Pilot. I'm thinking we just need to update that for state-wide deployment and add back in the M&O Readiness section with Deliverables and an M&O Readiness Statement that appeared as section 9 in the pre-pilot draft. It should include all the deliverables for operational readiness outlined in the contract. I've attached some material I think might support the update, including ADC's recent network infrastructure assessments. If there is anything else I can do to assist in completing this, please let me know. I'll be available this week and over the weekend to support this. Will B&D provide an updated operational readiness plan? I think we're hoping to get a final signed version early next week.

--
Sincerely,
Aaron Bailey

The plan for the AIMS production weekend and 0600 access was decided the other day. Dean should have those details to give to you as I'm awaiting more formal communications to be sent to the Warden's before announcing any prematurely from my side as to what that decision is.

Marissa:

As per discussion yesterday with Central Office staff, would you be requesting an additional load of AIMS 1 financial data for another test prior to go live, or do you want to use this request:

Please provide the following files to the FTP site at your earliest convenience after close of business. Keefe would like to conduct another data conversion for review by Central Office prior to Nov 26.

<image001.png>

Thanks!

John

AMERICAN OVERSIGHT

Meeting Minutes

Meeting Name:	Current Project Status		
Date:	2019-11-19	**Time:**	10:00 – 11:30
Host:	Benjamin Bussenault	**Location:**	1645 bldg – 4th flr

Objective / Scope:
Leadership review of current ACIS project status.

Attendees		
Name	**Title/Functional Area**	**Present**
Benjamin Bussenault	B&D	Y
Dean Allen	B&D	Y
Thad Lowry	B&D	Y
Michael Kearns	ADC	Y
Holly Greene (acting on behalf of Dwight Cloud)	ADC	Y

Notes

Per Mike Kearns:

- Whatever is finalized today, it will need to be captured in writing to avoid miscommunication and disagreements.

We're at the end, so what do both of us (B&D / ADC) need to know

KeepTrak:

- Having great conversations today and yesterday.
- Close to solving a nagging issue.
- Need to try to confirm tomorrow that this is ALL working. Our bankers need to test a fix that John Vitalle (Keefe) is working on or has worked on. This is not just Lynda Wade (ADC – banking), this is John Vitalle as well.
- Checks are a GOTTA HAVE. This is a show stopper for go-live. *(Holly validated that is correct)*

M&O manual:

- Things we need to get in place, this will be done by B&D by the end of the week.

AMERICAN OVERSIGHT

Meeting Minutes

- Per Mike: Another ask (general): With so few days to go, there were 4 reconsiders which showed up early this morning. If something changes from an active B&D bug, we want to hurry up the communication. We ask that B&D pick up the phone and call someone directly (ADC) to work with.
    - This will shorten the window of response by ADC.
    - Yesterday was 2 reconsiders and 4 were pushed back this morning
    - B&D needs to understand how old the bug(s) are
        - Per Benjamin, they need to be qualified today

Go-live support:

- Support of the complexes, we fished over to B&D because we don't always have the right answers
    - Example for Phoenix: We bring all of our new male inmates in, the first major big test of the new system is a bus of 100 new inmates. When? This could be first thing in the morning. This would be our first major test.
    - Would like to have Chris Masson close to this issue (on site or the like). This will help position ourselves by being able to support the new system and investment; and first initial challenges will have support (people present).
        - This will help answer to the fears.
        - May not have 5 people to every complex, but B&D may not have enough staff.
        - Where does B&D value of support land? Would be intake?
            - Benjamin and Dean will speak further.
        - This is where we would need boots on the ground for B&D
        - Most important initial would be Phoenix complex down the road
        - Had discussion on this and it's important to have people on call
        - In office in ADC, in office at 1645.
        - It is important that they respond immediately and are well positioned throughout the state.
        - Understand the complex at Phoenix for intake entries and their criticality.
            - Mike is not trying to pressure for an answer, but this can really help us
        - We are working with last minute concerns (ADC) and we need to emphasize the Support of B&D; that they're right next to us.

Friday (11/15) meetings – Health of ACIS:

- A good, solid opinion is that ACIS is in good shape
- Wanted to have Chris Masson sit with Dwight because they are best to explain the health of ACIS as it stands today.
- Chris Masson was not in the room with Dwight, so when we talked about Classification and Visitation, we wanted Masson to talk through and support the shape / health of these modules
- What are the last areas where we can get some input on this product and it's quality
    - Masson to work with Dwight
- Count may have last min concerns
- Sent Calc may have concerns as well
    - Sammy and Louise help Herb and others on Monday through those Sent Calc issues (these

AMERICAN OVERSIGHT

Meeting Minutes

won't stop tomorrow, the next day, etc. past go-live).

Bugs:

- Per Benjamin: How many bugs do we have now (5 in ADC court and 2 in B&D court)
- Per Benjamin: We have one run at the end of the week and that's the last run before go-live? - Yes.
- Per Mike: Expectation, can these bugs be produced (fixes) be resolved (14 in UAT)?
    - Per Thad, that's not out of the realm of possibility
    - Per Dean: The target is high and critical bugs to be resolved before the end of the week
    - Per Mike: If something isn't going to make it, we need to know
    - Per Benjamin: As of today, for me, we have to make a decision on if we would go-live. If we say we go-live and we have those tests performed and there are a couple of bugs active, do we still go-live and have them fixed along the way or not?
    - In amendment it was clear that we both agreed to ***(all high and critical*** bugs resolved, but need to keep in mind that next week, would still need to fix certain bugs and they are not problematic for go-live.
    - Per Mike: Tell me which ones can or cannot be fixed. Would need to analyze which bug has impact or not.
    - Per Dean: Point well taken, we equally have to analyze if it's a showstopper or not. As we narrow this down, will it prevent us from going live?
    - Per Mike: Cannot answer this minute.
    - Bugs will be tested on Thursday, we test on Friday and go to prod by Friday. We should know by Friday what remains and of what remains, whether we can or cannot go-live with.
    - On Friday, we will review the bug test results on both sides and assess any remaining (priority) and decide if it prevents go-live.
    - Per Thad: Will still push things in Thursday afternoon.
    - Per Benjamin: When will we do so? When we have our weekly call? Or should we do it later?
    - Per Dean: To give more time, we should do so later in the day.
    - Per Mike: Dwight and Stacey are on the lead for finishing and tying up remaining bugs and testing before 17:00 on Friday for report out
    - Per Dean: We can do a quick appraisal today and provide info if it's a showstopper.
        - Thad will send an email to Mike, Holly, Aaron and Dwight on Copy.
    - Per Mike: Not withstanding that, we want to go. Joe, Director and others have said so. Tomorrow is the ITAC testimonial and the ADC's position will be that we plan to go.
    - Per Benjamin: On my side, we had a discussion on what has been done so far and there is this point around the bugs and decision about priority (critical for go-live and showstoppers).
    - Per Dean: Keefe update will be sent today
    -

Reports:

- Per Benjamin: On the reports, impressed by the spike.
- That was what was needed.
- It was the only path (and the right path)
- Per Mike: Both sides crushed this

AMERICAN OVERSIGHT

- *Per Benjamin: Think Lisa was wondering if we were to connect on a bridge. (group opened bridge)*

Bugs, dual entry and impact to go-live

- Per Benjamin: Bugs that we see today are not critical to a point that a solution couldn't be provided per B&D. Chris Masson is confident that this can be used by Operations. Keefe interface will be discussed and there will be a discussion on Friday regarding the last release.
- Per Mike: When Benjamin and Thad have talked to Chris and hear things about visitation, count, classification and when they look at this, regardless, it is usable? Is there something missing from B&D's view?
- Per Dean: Regarding Visitation, even at the beginning of pilot with so many bumpy parts, there was a lot of "Visitation is not working and issues occurred", which took over sound byes of the functionality during the week because it was broken on the weekend. It has been corrected.
- The fixes for those were not primarily code. EIP, rough data changes…so all that had to happen.
- Told EIP that they get a certain number of hours on visitation. A lot of these things that are happening, like count, which is one of those problems and they are not able to move people out of the gate.
- Per Dean: Chris Masson corrected this through correcting Reference Data
- Per Mike: Issue on Friday through review with Dwight, Chris Little, etc., one high bug in Sent Calc was declared fixed (Dean corrected issue). This wasn't even a high bug. It's important, but it wasn't high.
- We're in really good shape.
- Per Mike: Classification, we cannot rely on paper. We can live by backing ourselves up with paper. There's survival vs. a new system that requires so much back-up. Don't think we're in a position of the latter. This may be OK for the first few days. Classification, it gets complicated
- Per Thad: Had to do with bug that went to arbitration and all of these things that age out and not anything to do with FSD. Class 4 in AIMS2, but he's a Class 3. Need to be aware that ACIS is NOT doing that. Yesterday, there were three under Resolve (Classification is a Resolve). So literally from last week, there is 1 left for classification.
- Per Dean: We're talking about small bugs and fixes now. Not huge amounts of development work that need to be done, these are small fixes which need to be done.
- Per Mike: Predominantly, this system is OK
- Per Thad: On Visitation, we went in and checked. They checked in 1,000 visitors. Yet there was no mention of 1,000 on the call.
- Per Dean: As far as end users are concerned, they think it's broken. Tempering of tone needs to occur because they have to been asked to report problems, not really asked to report successes. The bad stuff will generate more noise than the good stuff
- *Per Benjamin: Will follow-up with Lisa regarding meeting (with Dean and Thad)*
- Per Benjamin: Field of activity, I know we have a number of conditions set for the go-live. Based on experience and anytime managing project with custom solutions, whenever we went live, there were a couple of bugs along the way. Small ones. The proportion needs to be understood and qualified in advance. To me, it's completely normal. That's what <he> would like to express.
- Identify systemic problems which would leave us to asking if we can or cannot go.
- Showstopper? I don't anticipate any system problem.

AMERICAN OVERSIGHT

Meeting Minutes

- Will see what comes out of last release and what is left, but it is normal to go live with some issues to custom build.
- Discussed about maintaining AIMS1. It is the ADC's right to do so. It's ADC property, but concern is statewide new solution which does everything for ADC and requires full attention to expedite reporting of any issues and therefore the fixes that need to take place (response times).
- Duplication puts stress on the team which will duplicate validating the integrity and there will be discrepancies. This is a big concern. Understand that they want to be prudent, but it will make AIMS2 implementation for go-live a lot harder than it should be. That is worrying.
- Per Mike: DOA and B&D have been very expressive of trepidation. The plan is that at 14:30, we're going to meet to discuss. Afterwards, Lisa and B&D will receive a full briefing. Mike talked with Joe to discuss and get that decision today. Need to hear all sides and make the decision. For ITAC, need to have a solid answer for the meeting. We will get this all done today.
- Per Dean: Two things - have a feeling <he> knows which side of the fence we're (ADC) on. At some time ago, we debated on whether it would be OK to go live with a subset of modules and Operations put us in our place that this could not be done. The concept on Friday sounded eerily the same. If the outcome of today is that we are going to have dual entry in both systems (for however long that is), would like to request a clear definition of what constitutes the rollback to AIMS1 (define what a disaster is and that definition needs to be agreed upon and run through ADC, B&D and DOA). Don't want to be in a position where we are talking through opinions, but really facts and what constitutes the fact of rollback. Second, we're in contract and we have SLA's and maintenance.
- It includes that if under any circumstances, it goes down, B&D are under contract to bring back up. Is this a disaster conversation or a 'it isn't good enough'? The latter is troubling because that would be a contractual problem. In many ways the use of an old system, liking better or in any other way, there are contractual issues. Practical conversations need to be had.
- Per Benjamin: If this decision is to maintain AIMS1, we need to be very clear on the conditions on WHAT would justify the rollback.

Invoices / Payment:

Per Benjamin: There are 3 things:

- Invoice on Data migration
  - 85k - pending/outstanding (no history on this)
  - For final data migration (which is go-live)
  - On 12/2, would like to receive the payment.
    - Per Mike; if all goes well, we will
- Invoice for Performance Bond
  - One little thing raised, CFO is awaiting 1 clarification on this
  - Once clarified, the expectation is that it will be paid
    - Per Mike: What Ken and I were hoping is proration
      - Per Benjamin, it's doable, so we just need to know the exact period from 2017 onward. There may be a gap and need to clarify. This would be resolved and expect to be paid

AMERICAN OVERSIGHT

Meeting Minutes

- There are 3 financial elements that are important
    - Final invoice, <Benjamin> familiar with GANTT chart that dates back to 2017 or thereabout. Appreciate this, but still would like to know when they can expect to be paid.
    - Would like to be paid before the end of the calendar year.
    - Understand that acceptance of solution generally happens on day of go live, but ADC has 30 days to decide.
    - Go-live of 29 of November and they get paid by end of December.
        - What is the calendar year for financials from B&D?
            - Per Mike: Do not care to have ADC sign anything that reads that it's perfect on 12/2. If we're <ADC> invoiced, and by the end of December <all is well>, we'll pay pretty fast. *Benjamin knows ADC can pay quickly.* Once all documents are prepared to go through state accounting system, we would be able to process payment by end of 12/31/19.
- M&O
    - For B&D, expecting a minimum to start right after go-live.
    - It's not like this in the GANTT chart.
    - There is an interest to start right away
        - Per Mike: we have a parking lot of items which need to be addressed. Do not conceptually have a problem starting M&O right away
        - These two items need to be sent in email to Mike by Benjamin. *financial information needs to be documented and sent.
    - There are two options for M&O 10,000 hours
        - They can spread 10k over the year. (Dedicated team that will deliver annual the 10k hrs over 12 mths)
        - Design to accelerate which would be consumed at a quicker pace. BUT if consumed too quickly, we will have to pay for change requests.
            - B&D needs to understand the preferred option before the start of M&O
            - After 12/2, there is NO change control process out of the gate with M&O, modification and maintenance are the same.
            - There's no FSD debates per B&D
                - Sentence Reform is an elephant in the room
    - 10 person retainer
        - Would imagine that it would be paid together with the last invoice
            - Yes, that will be paid with that (will be issued at time of go-live and ADC will fulfill by 12/31/19)
            - Benjamin will email this info to Mike
- B&D will wait for feedback from meeting this afternoon; work with Lisa; run point on Keefe (needs to be fixed).
- Documentation needs to be submitted by end of week (B&D)
- Friday: Qualify the go for production.

Hi Marissa-

The pilot and umami were our simulations. Is there something more that this data would contribute to?

Let's chat tomorrow if you have time.

On Tue, Nov 19, 2019 at 4:40 PM Marissa Boice <marissa.boice@bndna.com> wrote:

AMERICAN OVERSIGHT

Hello Marissa,

I was able to locate the issue of why there was a descrepancy between the Transaction files you were trying to match. Our PC_AIMs load from the MainFrame normally completes between 6:00 and 8:00am. I started to create the KEEFE files @9:00am but as shown below, the Main Banking Table didn't load until after 11:20am meaning that it missed the update and the file was still using the data from 11/13 and didn't load 11/14. The PC_AIMs load doesn't normally take 12 hours to perform but might if there is a heavy load on the MainFrame. The days surrounding the load on 11/15 show them finishing by @9:00 which is normal.

We can send you another batch if you would like the files from 11/14, but as it stands the cutoff for the File you received was 11/13. Historically I've always created the KEEFE files in the afternoon, but I'll make certain to check the Load process when you need the files again.

Subject: RE: Disaster Recovery Test

It doesn't look like there have been any communications to ADC for quite a while

To be clear the disaster recovery system has been up and running since around 11:00

Right now there is an issue where the ADC email servers are not forwarding email coming from the disaster recovery system which means that password resets (or any other emails coming from the ACIS system) will not get sent.

I would recommend that ADC could go to the DR system and verify that the other aspects are working while we work with the ADC Network / email group to fix the email relay problem

Subject: Disaster Recovery Test

Hello Everyone:

This will be the official communication chain for our DR test being conducted on 11/18 and 11/19. ADC and B&D will reply all too this email chain to provide updates based on where we are in the task list. The DR test has begun. I will provide an update on progress shortly, and then be providing periodic updates throughout the day as we meet the major milestones.

Please find the schedule below:

Scenario:

1. 9:00 AM - Natural Disaster occurs in the current AWS datacenter region

AMERICAN OVERSIGHT

(Yellowstone volcanic eruption)

- (B&D shuts down access to PROD)

2. 9:00 AM – 9:30 AM - B&D becomes aware of the natural disaster
   - B&D investigates the extent of the disaster in the current AWS facility
   - B&D investigates the state of DR site
   - ADC investigates the state of the AZ facilities, network, power

3. 9:30 AM - ADC and B&D meet to discuss situation
   - B&D advises that
     - current AWS location is a disaster and will not recover for the foreseeable future
     - the DR site has a database backup from 9:00 that can be used
   - ADC advises that:
     - AZ facilities are unharmed
     - Network is intact
     - All facilities have power
   - ADC formally requests to move to DR site

4. 9:45 am - B&D begins process of bringing up the DR site
   - Hardware, software, database, network

5. 2- 8 hours later (11:45 thru 5:45) - B&D verifies that the DR site is fully functional and notifies ADC to resume operations

6. 1-2 hours - ADC verifies DR site is fully functional
   - Application, interfaces, Reports
   - Database has transactions up to the time of the disaster (9:00 am)

7. Turn back point - ADC and B&D meet
   - ADC advises that:

AMERICAN OVERSIGHT

- The DR site is fully functional
- The failover was a success

- ADC formally requests to move back to original site
- B&D begins process of moving DR to PROD

8. 2- 8 hours later - B&D verifies that the original site is fully functional

and notifies ADC to resume operations

9. 1-2 hours - ADC verifies original site is fully functional
   - Application, interfaces, Reports
   - Database has transactions entered on the DR site

10. Completion Point - ADC and B&D meet to discuss completion of test

Thank you.

AMERICAN OVERSIGHT

Tuesday, August 31, 2021

Meeting Minutes

Meeting Name:	Current Project Status		
Date:	2021-08-31	**Time:**	10:00 – 11:30
Host:	Benjamin Bussenault	**Location:**	1645 bldg – 4th flr

Objective / Scope:
Leadership review of current ACIS project status.

Attendees		
Name	**Title/Functional Area**	**Present**
Benjamin Bussenault	B&D	Y
Dean Allen	B&D	Y
Thad Lowry	B&D	Y
Michael Kearns	ADC	Y
Holly Greene (acting on behalf of Dwight Cloud)	ADC	Y

Notes

Per Mike Kearns:

- Whatever is finalized today, it will need to be captured in writing to avoid miscommunication and disagreements.

We're at the end, so what do both of us (B&D / ADC) need to know

KeepTrak:

- Having great conversations today and yesterday.
- Close to solving a nagging issue.
- Need to try to confirm tomorrow that this is ALL working. Our bankers need to test a fix that John Vitalle (Keefe) is working on or has worked on. This is not just Lynda Wade (ADC – banking), this is John Vitalle as well.
- Checks are a GOTTA HAVE. This is a show stopper for go-live. *(Holly validated that is correct)*

M&O manual:

- Things we need to get in place, this will be done by B&D by the end of the week.

AMERICAN OVERSIGHT

- Per Mike: Another ask (general): With so few days to go, there were 4 reconsiders which showed up early this morning. If something changes from an active B&D bug, we want to hurry up the communication. We ask that B&D pick up the phone and call someone directly (ADC) to work with.
    - This will shorten the window of response by ADC.
    - Yesterday was 2 reconsiders and 4 were pushed back this morning
    - B&D needs to understand how old the bug(s) are
        - Per Benjamin, they need to be qualified today

Go-live support:

- Support of the complexes, we fished over to B&D because we don't always have the right answers
    - Example for Phoenix: We bring all of our new male inmates in, the first major big test of the new system is a bus of 100 new inmates. When? This could be first thing in the morning. This would be our first major test.
    - Would like to have Chris Masson close to this issue (on site or the like). This will help position ourselves by being able to support the new system and investment; and first initial challenges will have support (people present).
        - This will help answer to the fears.
        - May not have 5 people to every complex, but need to compromise logistics.
        - Where does B&D value of support land? Would be intake?
            - Benjamin and Dean will speak further.
        - This is where we would need boots on the ground for B&D
        - Most important initial would be Phoenix complex down the road
        - Had discussion on this and it's important to have people on call
        - In office in ADC, in office at 1645.
        - It is important that they respond immediately and are well positioned throughout the state.
        - Understand the complex at Phoenix for intake entries and their criticality.
            - Mike is not trying to pressure for an answer, but this can really help us
        - We are working with last minute concerns (ADC) and we need to emphasize the Support of B&D; that they're right next to us.

Friday (11/15) meetings – Health of ACIS:

- A good, solid opinion is that ACIS is in good shape
- Wanted to have Chris Masson sit with Dwight because they are best to explain the health of ACIS as it stands today.
- Chris Masson was not in the room with Dwight, so when we talked about Classification and Visitation, we wanted Masson to talk through and support the shape / health of these modules
- What are the last areas where we can get some input on this product and it's quality
    - Masson to work with Dwight
- Count may have last min concerns
- Sent Calc may have concerns as well
    - Sammy and Louise help Herb and others on Monday through those Sent Calc issues (these

AMERICAN OVERSIGHT

won't stop tomorrow, the next day, etc. past go-live).

Bugs:

- Per Benjamin: How many bugs do we have now (5 in ADC court and 2 in B&D court)
- Per Benjamin: We have one run at the end of the week and that's the last run before go-live? - Yes.
- Per Mike: Expectation, can these bugs be produced (fixes) be resolved (14 in UAT)?
    - Per Thad, that's not out of the realm of possibility
    - Per Dean: The target is high and critical bugs to be resolved before the end of the week
    - Per Mike: If something isn't going to make it, we need to know
    - Per Benjamin: As of today, for me, we have to make a decision on if we would go-live. If we say we go-live and we have those tests performed and there are a couple of bugs active, do we still go-live and have them fixed along the way or not?
    - In amendment it was clear that we wanted ***(all or old???)*** bugs resolved, but need to keep in mind that next week, would still need to fix certain bugs and they are not problematic for go-live.
    - Per Mike: Tell me which ones can or cannot be fixed. Would need to analyze which bug has impact or not.
    - Per Dean: Point well taken, we equally have to analyze if it's a showstopper or not. As we narrow this down, will it prevent us from going live?
    - Per Mike: Cannot answer this minute.
    - Bugs will be tested on Thursday, we test on Friday and go to prod by Friday. We should know by Friday what remains and of what remains, whether we can or cannot go-live with.
    - On Friday, we will review the bug test results on both sides and assess any remaining (priority) and decide if it prevents go-live.
    - Per Thad: Will still push things in Thursday afternoon.
    - Per Benjamin: When will we do so? When we have our weekly call? Or should we do it later?
    - Per Dean: To give more time, we should do so later in the day.
    - Per Mike: Dwight and Stacey are on the lead for finishing and tying up remaining bugs and testing before 17:00 on Friday for report out
    - Per Dean: We can do a quick appraisal today and provide info if it's a showstopper.
        - Thad will send an email to Mike, Holly, Aaron and Dwight on Copy.
    - Per Mike: Not withstanding that, we want to go. Joe, Director and others have said so. Tomorrow is the ITAC testimonial and the ADC's position will be that we plan to go.
    - Per Benjamin: On my side, we had a discussion on what has been done so far and there is this point around the bugs and decision about priority (critical for go-live and showstoppers).
    - Per Dean: Keefe update will be sent today
    -

Reports:

- Per Benjamin: On the reports, impressed by the spike.
- That was what was needed.
- It was the only path (and the right path)
- Per Mike: Both sides crushed this

AMERICAN OVERSIGHT

- *Per Benjamin: Think Lisa was wondering if we were to connect on a bridge. (group opened bridge)*

Bugs, dual entry and impact to go-live

- Per Benjamin: Bugs that we see today are not critical to a point that a solution couldn't be provided per B&D. Chris Masson is confident that this can be used by Operations. Keefe interface will be discussed and there will be a discussion on Friday regarding the last release.
- Per Mike: When Benjamin and Thad has talked to Chris and hear things about visitation, count, classification and when they look at this, regardless, it is usable? Is there something missing from B&D's view?
- Per Dean: Regarding Visitation, even at the beginning of pilot with so many bumpy parts, there was a lot of "Visitation is not working and issues occurred", which took over sound byes of the functionality during the week because it was broken on the weekend. It has been corrected.
- The fixes for those were not primarily code. EIP, rough data changes…so all that had to happen.
- Told EIP that they get a certain number of hours on visitation. A lot of these things that are happening, like count, which is one of those problems and they are not able to move people out of the gate.
- Per Dean: Chris Masson corrected this through correcting Reference Data
- Per Mike: Issue on Friday through review with Dwight, Chris Little, etc., one high bug in Sent Calc was declared fixed (Dean corrected issue). This wasn't even a high bug. It's important, but it wasn't high.
- We're in really good shape.
- Per Mike: Classification, we cannot rely on paper. We can live by backing ourselves up with paper. There's survival vs. a new system that requires so much back-up. Don't think we're in a position of the latter. This may be OK for the first few days. Classification, it gets complicated
- Per Thad: Had to do with bug that went to arbitration and all of these things that age out and not anything to do with FSD. Class 4 in AIMS2, but he's a Class 3. Need to be aware that ACIS is NOT doing that. Yesterday, there were three under Resolve (Classification is a Resolve). So literally from last week, there is 1 left for classification.
- Per Dean: We're talking about small bugs and fixes now. Not huge amounts of development work that need to be done, these are small fixes which need to be done.
- Per Mike: Predominantly, this system is OK
- Per Thad: On Visitation, we went in and checked. They checked in 1,000 visitors. Yet there was no mention of 1,000 on the call.
- Per Dean: As far as end users are concerned, they think it's broken. Tempering of tone needs to occur because they have to been asked to report problems, not really asked to report successes. The bad stuff will generate more noise than the good stuff
- *Per Benjamin: Will follow-up with Lisa regarding meeting (with Dean and Thad)*
- Per Benjamin: Field of activity, I know we have a number of conditions set for the go-live. Based on experience and anytime managing project with custom solutions, whenever we went live, there were a couple of bugs along the way. Small ones. The proportion needs to be understood and qualified in advance. To me, it's completely normal. That's what <he> would like to express.
- Identify systemic problems which would leave us to asking if we can or cannot go.
- Showstopper? I don't anticipate any system problem.

AMERICAN OVERSIGHT

- Will see what comes out of last release and what is left, but it is normal to go live with some issues to custom build.
- Discussed about maintaining AIMS1. It is the ADC's right to do so. It's ADC property, but concern is statewide new solution which does everything for ADC and requires full attention to expedite reporting of any issues and therefore the fixes that need to take place (response times).
- Duplication puts stress on the team which will duplicate validating the integrity and there will be discrepancies. This is a big concern. Understand that they want to be prudent, but it will make AIMS2 implementation for go-live a lot harder than it should be. That is worrying.
- Per Mike: DOA and B&D have been very expressive of trepidation. The plan is that at 14:30, we're going to meet to discuss. Afterwards, Lisa and B&D will receive a full briefing. Mike talked with Joe to discuss and get that decision today. Need to hear all sides and make the decision. For ITAC, need to have a solid answer for the meeting. We will get this all done today.
- Per Dean: Two things - have a feeling <he> knows which side of the fence we're (ADC) on. At some time ago, we debated on whether it would be OK to go live with a subset of modules and Operations put us in our place that this could not be done. The concept on Friday sounded eerily the same. If the outcome of today is that we are going to have a dual room (for however long that is), would like to request a clear definition of what constitutes the rollback to AIMS1 (define what a disaster is and that definition needs to be agreed upon and run through ADC, B&D and DOA). Don't want to be in a position where we are talking through opinions, but really facts and what constitutes the fact of rollback. Second, we're in contract and we have SLA's and maintenance.
- It includes that if under any circumstances, it goes down, B&D are under contract to bring back up. Is this a disaster conversation or a 'it isn't good enough'? The latter is troubling because that would be a contractual problem. In many ways the use of an old system, liking better or in any other way, there are contractual issues. Practical conversations need to be had.
- Per Benjamin: If this decision is to maintain AIMS1, we need to be very clear on the conditions on WHAT would justify the rollback.

Invoices / Payment:

Per Benjamin: There are 3 things:

- Invoice on Data migration
  - 85k - pending/outstanding (no history on this)
  - For final data migration (which is go-live)
  - On 12/2, would like to receive the payment.
    - Per Mike; if all goes well, we will
- Invoice for ***<???>***
  - One little thing raised, CFO is awaiting 1 clarification on this
  - Once clarified, the expectation is that it will be paid
    - Per Mike: What Ken and I were hoping is proration
      - Per Benjamin, it's doable, so we just need to know the exact period from 2017 onward. There may be a gap and need to clarify. This would be resolved and expect to be paid

AMERICAN OVERSIGHT

- There are 3 financial elements that are important
    - Final invoice, <Benjamin> familiar with GANTT chart that dates back to 2017 or thereabout. Appreciate this, but still would like to know when they can expect to be paid.
    - Would like to be paid before the end of the calendar year.
    - Understand that acceptance of solution generally happens on day of go live, but ADC has 30 days to decide.
    - Go-live of 29 of November and they get paid by end of December.
        - What is the calendar year for financials from B&D?
            - Per Mike: Do not care to have ADC sign anything that reads that it's perfect. If we're <ADC> invoiced, and by the end of December <all is well>, we'll pay pretty fast. *Benjamin knows ADC can pay quickly.* Once all documents are prepared to go through state accounting system, we would be able to process payment by end of 12/31/19.
- M&O
    - For B&D, expecting a minimum to start right after go-live.
    - It's not like this in the GANTT chart.
    - There is an interest to start right away
        - Per Mike: we have a parking lot of items which need to be addressed. Do not conceptually have a problem that there would be no problem
        - These two items need to be sent in email to Mike by Benjamin. *financial information needs to be documented and sent.
    - There are two options for M&O 10,000 hours
        - They can spread 10k over the year. (Dedicated team that will deliver annual the 10k hrs over 12 mths)
        - Design to accelerate which would be consumed at a quicker pace. BUT if consumed too quickly, we will have to pay for change requests.
            - B&D needs to understand the preferred option before the start of M&O
            - After 12/2, there is NO change control process out of the gate with M&O, modification and maintenance are the same.
            - There's no FSD debates per B&D
                - Sentence Reform is an elephant in the room
    - 10 person retainer
        - Would imagine that it would be paid together with the last invoice
            - Yes, that will be paid with that (will be issued at time of go-live and ADC will fulfill by 12/31/19)
            - Benjamin will email this info to Mike
- B&D will wait for feedback from meeting this afternoon; work with Lisa; run point on Keefe (needs to be fixed).
- Documentation needs to be submitted by end of week (B&D)
- Friday: Qualify the go for production.

Thanks Matt. I'm checking with DOA also, to see if they are blocking anything. But from those screenshots, it looks like they are starting from APIPA addresses. That seems weird. I don't think that's normal. Do you have more than one adapter, or possibly IPv6 set up for these?

Subject: Disaster Recovery Test

Hello Everyone:

This will be the official communication chain for our DR test being conducted on 11/18 and 11/19. ADC and B&D will reply all too this email chain to provide updates based on where we are in the task list. The DR test has begun. I will provide an update on progress shortly, and then be providing periodic updates throughout the day as we meet the major milestones.

Please find the schedule below:

Scenario:

1. 9:00 AM - Natural Disaster occurs in the current AWS datacenter region

(Yellowstone volcanic eruption)

- (B&D shuts down access to PROD)

2. 9:00 AM – 9:30 AM - B&D becomes aware of the natural disaster
   - B&D investigates the extent of the disaster in the current AWS facility
   - B&D investigates the state of DR site
   - ADC investigates the state of the AZ facilities, network, power

3. 9:30 AM - ADC and B&D meet to discuss situation
   - B&D advises that
     - current AWS location is a disaster and will not recover for the foreseeable future
     - the DR site has a database backup from 9:00 that can be used
   - ADC advises that:
     - AZ facilities are unharmed
     - Network is intact
     - All facilities have power
   - ADC formally requests to move to DR site

AMERICAN OVERSIGHT

4. 9:45 am - B&D begins process of bringing up the DR site
   - Hardware, software, database, network

5. 2- 8 hours later (11:45 thru 5:45) - B&D verifies that the DR site is fully functional and notifies ADC to resume operations

6. 1-2 hours - ADC verifies DR site is fully functional
   - Application, interfaces, Reports
   - Database has transactions up to the time of the disaster (9:00 am)

7. Turn back point - ADC and B&D meet
   - ADC advises that:
     - The DR site is fully functional
     - The failover was a success
   - ADC formally requests to move back to original site
   - B&D begins process of moving DR to PROD

8. 2- 8 hours later - B&D verifies that the original site is fully functional and notifies ADC to resume operations

9. 1-2 hours - ADC verifies original site is fully functional
   - Application, interfaces, Reports
   - Database has transactions entered on the DR site

10. Completion Point - ADC and B&D meet to discuss completion of test

Thank you.

It appears that Matt working with the ADC network team has identified a configuration issue with the policy based forwarding for the DR site in the ADC network

ADC is working on resolving this issue.

AMERICAN OVERSIGHT

You will be able to continue testing PROD but will experience issues (like email and mug photos) until this item is resolved

Thanks,

Thad

E: thad.lowry@bndna.com

Business & Decision

Scenario:

1. 9:00 AM - Natural Disaster occurs in the current AWS datacenter region

   (Yellowstone volcanic eruption)

   - (B&D shuts down access to PROD)

2. 9:00 AM – 9:30 AM - B&D becomes aware of the natural disaster

   - B&D investigates the extent of the disaster in the current AWS facility
   - B&D investigates the state of DR site
   - ADC investigates the state of the AZ facilities, network, power

AMERICAN OVERSIGHT

3. 9:30 AM - ADC and B&D meet to discuss situation
    - B&D advises that
        - current AWS location is a disaster and will not recover for the foreseeable future
        - the DR site has a database backup from 9:00 that can be used
    - ADC advises that:
        - AZ facilities are unharmed
        - Network is intact
        - All facilities have power
    - ADC formally requests to move to DR site

4. 9:45 am - B&D begins process of bringing up the DR site
    - Hardware, software, database, network

5. 2- 8 hours later - B&D verifies that the DR site is fully functional
   (11:45 thru 5:45) and notifies ADC to resume operations

6. 1-2 hours - ADC verifies DR site is fully functional
    - Application, interfaces, Reports
    - Database has transactions up to the time of the disaster (9:00 am)

7. Turn back point - ADC and B&D meet
    - ADC advises that:
        - The DR site is fully functional
        - The failover was a success
    - ADC formally requests to move back to original site
    - B&D begins process of moving DR to PROD

AMERICAN OVERSIGHT

8. 2- 8 hours later - B&D verifies that the original site is fully functional and notifies ADC to resume operations

9. 1-2 hours - ADC verifies original site is fully functional
    - Application, interfaces, Reports
    - Database has transactions entered on the DR site

10. Completion Point - ADC and B&D meet to discuss completion of test

Hello, Keith - We're good on that MICASE_MIG connection issue, thanks very much. Is the 'dbprodrr' environment about to come back on line?

Another question on a tangentially related topic, does the "rr" in 'dbprodrr' stand for "Real-time Replication"? And if so, will we be seeing credentials to the actual production environment?

Much appreciated,
- josh C.

Subject: Re: MiCase Production Database

Good morning, Keith & Matt - All of our Apps team is now connected to 'dbnonprod' with MICASE_MIG tables appearing however no one on the ADC side has been able to connect to the 'prodrr' instance of Oracle as of now. Please do keep us in the loop on any change in that status.

In the very near term, we'd like to have our database, apps and reporting teams be able to connect to the production Oracle database environments for both the live system as well as the replicated reporting database.

Thanks very much,
- josh C.

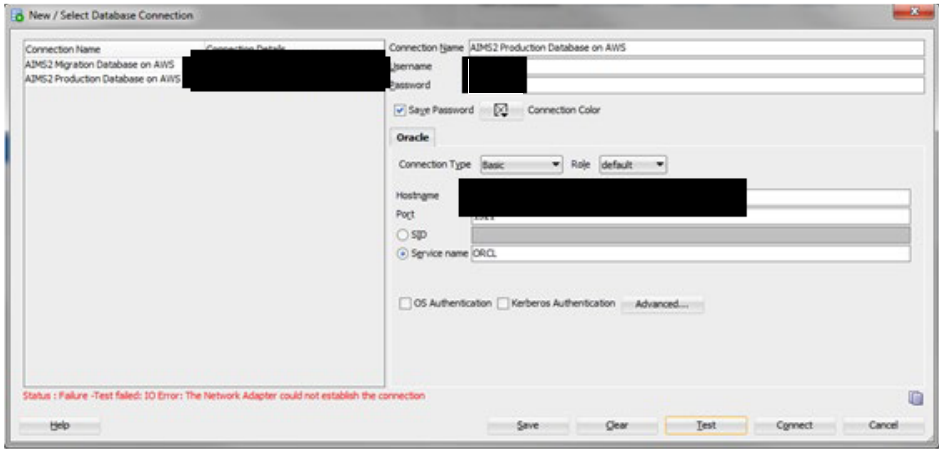
AMERICAN OVERSIGHT



My network, machine and other specs have not changed and I can still get into the 'dbnonprod' instance fine right now.
Once I get in, I'll assist the other users on my team and the folks from our Reporting group (PBR). Since the queries most of us will be hitting the system with could be resource-intensive, can we also get access to the reporting database schema? I'm assuming it's the same instance, just the user name of "TELERIK" versus "MICASE" -- is that an accurate assumption?

There are a few names on that list you sent that can definitely be removed (adean, jtaranti, hgreene) and then four more on which I will check with the user to find out whether their direct access is necessary (bcassiano, abailey, jwhitson, hhaley) but I assume now that they will come back to me saying they do not require it.

Your help is very much appreciated.
Take care,
- josh C.

Subject: RE: Disaster Recovery Test

It doesn't look like there have been any communications to ADC for quite a while

To be clear the disaster recovery system has been up and running since around 11:00

Right now there is an issue where the ADC email servers are not forwarding email coming from the disaster recovery system which means that password resets (or any other emails coming from the ACIS system) will not get sent.

I would recommend that ADC could go to the DR system and verify that the other aspects are working while we work with the ADC Network / email group to fix the email relay problem

Thad

Subject: Disaster Recovery Test

Hello Everyone:

This will be the official communication chain for our DR test being conducted on 11/18 and 11/19. ADC and B&D will reply all too this email chain to provide updates based on where we are in the task list. The DR test has begun. I will provide an update on progress shortly, and then be providing periodic updates throughout the day as we meet the major milestones.

Please find the schedule below:

Scenario:

1. 9:00 AM - Natural Disaster occurs in the current AWS datacenter region

(Yellowstone volcanic eruption)

- (B&D shuts down access to PROD)

AMERICAN OVERSIGHT

2. 9:00 AM – 9:30 AM - B&D becomes aware of the natural disaster

- B&D investigates the extent of the disaster in the current AWS facility
- B&D investigates the state of DR site
- ADC investigates the state of the AZ facilities, network, power

3. 9:30 AM - ADC and B&D meet to discuss situation

    - B&D advises that
        - current AWS location is a disaster and will not recover for the foreseeable future
        - the DR site has a database backup from 9:00 that can be used
    - ADC advises that:
        - AZ facilities are unharmed
        - Network is intact
        - All facilities have power
- ADC formally requests to move to DR site

4. 9:45 am - B&D begins process of bringing up the DR site

    - Hardware, software, database, network

5. 2- 8 hours later (11:45 thru 5:45) - B&D verifies that the DR site is fully functional and notifies ADC to resume operations

6. 1-2 hours - ADC verifies DR site is fully functional

    - Application, interfaces, Reports

AMERICAN OVERSIGHT

- Database has transactions up to the time of the disaster (9:00 am)

7. Turn back point - ADC and B&D meet
   - ADC advises that:
     - The DR site is fully functional
     - The failover was a success
   - ADC formally requests to move back to original site
   - B&D begins process of moving DR to PROD

8. 2- 8 hours later - B&D verifies that the original site is fully functional and notifies ADC to resume operations

9. 1-2 hours - ADC verifies original site is fully functional
   - Application, interfaces, Reports
   - Database has transactions entered on the DR site

10. Completion Point - ADC and B&D meet to discuss completion of test

Thank you.

Subject: RE: Disaster Recovery Test

It doesn't look like there have been any communications to ADC for quite a while

To be clear the disaster recovery system has been up and running since around 11:00

Right now there is an issue where the ADC email servers are not forwarding email coming from the disaster recovery system which means that password resets (or any other emails coming from the ACIS system) will not get sent.

I would recommend that ADC could go to the DR system and verify that the other aspects are working while we work with the ADC Network / email group to fix the email relay problem

Subject: Disaster Recovery Test

Hello Everyone:

This will be the official communication chain for our DR test being conducted on 11/18 and 11/19. ADC and B&D will reply all too this email chain to provide updates based on where we are in the task list. The DR test has begun. I will provide an update on progress shortly, and then be providing periodic updates throughout the day as we meet the major milestones.

Please find the schedule below:

Scenario:

AMERICAN OVERSIGHT

1. 9:00 AM - Natural Disaster occurs in the current AWS datacenter region

   (Yellowstone volcanic eruption)

   - (B&D shuts down access to PROD)

2. 9:00 AM – 9:30 AM - B&D becomes aware of the natural disaster

   - B&D investigates the extent of the disaster in the current AWS facility
   - B&D investigates the state of DR site
   - ADC investigates the state of the AZ facilities, network, power

3. 9:30 AM - ADC and B&D meet to discuss situation

   - B&D advises that
     - current AWS location is a disaster and will not recover for the foreseeable future
     - the DR site has a database backup from 9:00 that can be used
   - ADC advises that:
     - AZ facilities are unharmed
     - Network is intact
     - All facilities have power
   - ADC formally requests to move to DR site

4. 9:45 am - B&D begins process of bringing up the DR site

   - Hardware, software, database, network

5. 2- 8 hours later (11:45 thru 5:45) - B&D verifies that the DR site is fully functional and notifies ADC to resume operations

AMERICAN OVERSIGHT

6. 1-2 hours - ADC verifies DR site is fully functional

- Application, interfaces, Reports
- Database has transactions up to the time of the disaster (9:00 am)

7. Turn back point - ADC and B&D meet

- ADC advises that:
  - The DR site is fully functional
  - The failover was a success
- ADC formally requests to move back to original site
- B&D begins process of moving DR to PROD

8. 2- 8 hours later - B&D verifies that the original site is fully functional

and notifies ADC to resume operations

9. 1-2 hours - ADC verifies original site is fully functional

- Application, interfaces, Reports
- Database has transactions entered on the DR site

10. Completion Point - ADC and B&D meet to discuss completion of test

Thank you.

AMERICAN OVERSIGHT

To be clear the disaster recovery system has been up and running since around 11:00

Right now there is an issue where the ADC email servers are not forwarding email coming from the disaster recovery system which means that password resets (or any other emails coming from the ACIS system) will not get sent.

I would recommend that ADC could go to the DR system and verify that the other aspects are working while we work with the ADC Network / email group to fix the email relay problem

Subject: Disaster Recovery Test

Hello Everyone:

AMERICAN OVERSIGHT

This will be the official communication chain for our DR test being conducted on 11/18 and 11/19. ADC and B&D will reply all too this email chain to provide updates based on where we are in the task list. The DR test has begun. I will provide an update on progress shortly, and then be providing periodic updates throughout the day as we meet the major milestones.

Please find the schedule below:

Scenario:

1. 9:00 AM - Natural Disaster occurs in the current AWS datacenter region

   (Yellowstone volcanic eruption)

   - (B&D shuts down access to PROD)

2. 9:00 AM – 9:30 AM - B&D becomes aware of the natural disaster

   - B&D investigates the extent of the disaster in the current AWS facility
   - B&D investigates the state of DR site
   - ADC investigates the state of the AZ facilities, network, power

3. 9:30 AM - ADC and B&D meet to discuss situation

   - B&D advises that
     - current AWS location is a disaster and will not recover for the foreseeable future
     - the DR site has a database backup from 9:00 that can be used
   - ADC advises that:
     - AZ facilities are unharmed
     - Network is intact

AMERICAN OVERSIGHT

- All facilities have power

- ADC formally requests to move to DR site

4. 9:45 am - B&D begins process of bringing up the DR site
    - Hardware, software, database, network

5. 2- 8 hours later - B&D verifies that the DR site is fully functional (11:45 thru 5:45) and notifies ADC to resume operations

6. 1-2 hours - ADC verifies DR site is fully functional
    - Application, interfaces, Reports
    - Database has transactions up to the time of the disaster (9:00 am)

7. Turn back point - ADC and B&D meet
    - ADC advises that:
        - The DR site is fully functional
        - The failover was a success
    - ADC formally requests to move back to original site
    - B&D begins process of moving DR to PROD

8. 2- 8 hours later - B&D verifies that the original site is fully functional and notifies ADC to resume operations

9. 1-2 hours - ADC verifies original site is fully functional
    - Application, interfaces, Reports

AMERICAN OVERSIGHT

- Database has transactions entered on the DR site

10. Completion Point - ADC and B&D meet to discuss completion of test

Thank you.

Hello All:

Current Update:
We are on the task item below. We are in the process of verifying the DR site.

We are 2- 8 hours later - B&D verifies that the DR site is fully functional
(9:00am thru 5:00pm) and notifies ADC to resume operations

Thank you.

Hello, Keith - Is there anything our team should be made aware of regarding our connection to the Oracle production environment?
We are all receiving "Unknown host specified" errors (Vendor code 17002).

Thank you for your assistance,
- josh C.

> Good morning, Keith & Matt - All of our Apps team is now connected to 'dbnonprod' with MICASE_MIG tables appearing however no one on the ADC side has been able to connect to the 'prodrr' instance of Oracle as of now. Please do keep us in the loop on any change in that status.

AMERICAN OVERSIGHT

In the very near term, we'd like to have our database, apps and reporting teams be able to connect to the production Oracle database environments for both the live system as well as the replicated reporting database.

Thanks very much,
- josh C.

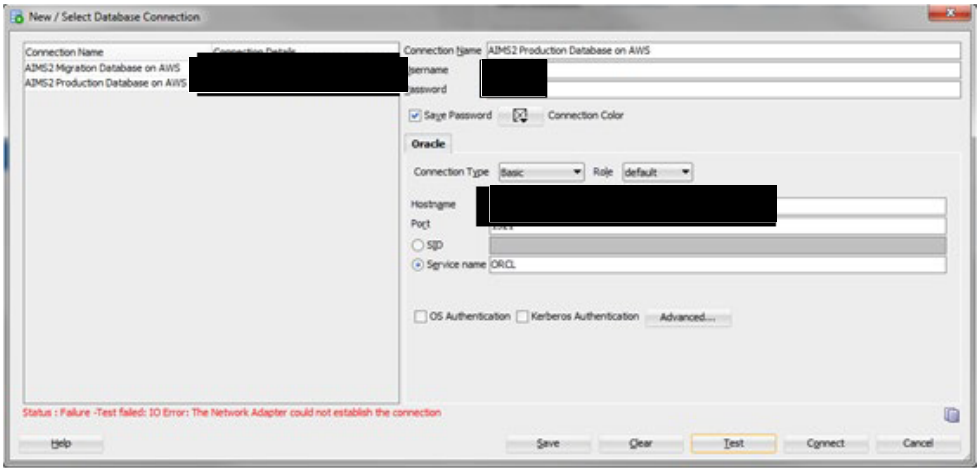
> > Hello, Keith - Thanks for sending out the details. I'm still getting held up by a network IO error:

AMERICAN OVERSIGHT



My network, machine and other specs have not changed and I can still get into the 'dbnonprod' instance fine right now.
Once I get in, I'll assist the other users on my team and the folks from our Reporting group (PBR). Since the queries most of us will be hitting the system with could be resource-intensive, can we also get access to the reporting database schema? I'm assuming it's the same instance, just the user name of "TELERIK" versus "MICASE" -- is that an accurate assumption?

There are a few names on that list you sent that can definitely be removed (adean, jtaranti, hgreene) and then four more on which I will check with the user to find out whether their direct access is necessary (bcassiano, abailey, jwhitson, hhaley) but I assume now that they will come back to me saying they do not require it.

Your help is very much appreciated.
Take care,
- josh C.

Subject: Re: MiCase Production Database

Hello, Keith - Is there anything our team should be made aware of regarding our connection to the Oracle production environment?
We are all receiving "Unknown host specified" errors (Vendor code 17002).

Thank you for your assistance,
- josh C.

Subject: Re: MiCase Production Database

Looking good now, Matt. Michael Gomez and I are connected to prodrr with MICASE_MIG schema tables appearing. Nothing showing for TELERIK but I'll just assume that can be sorted out later.

Many thanks good sir,
- josh C.

AMERICAN OVERSIGHT

'dbnonprod' with MICASE_MIG tables appearing however no one on the ADC side has been able to connect to the 'prodrr' instance of Oracle as of now. Please do keep us in the loop on any change in that status.

In the very near term, we'd like to have our database, apps and reporting teams be able to connect to the production Oracle database environments for both the live system as well as the replicated reporting database.

Thanks very much,
- josh C.

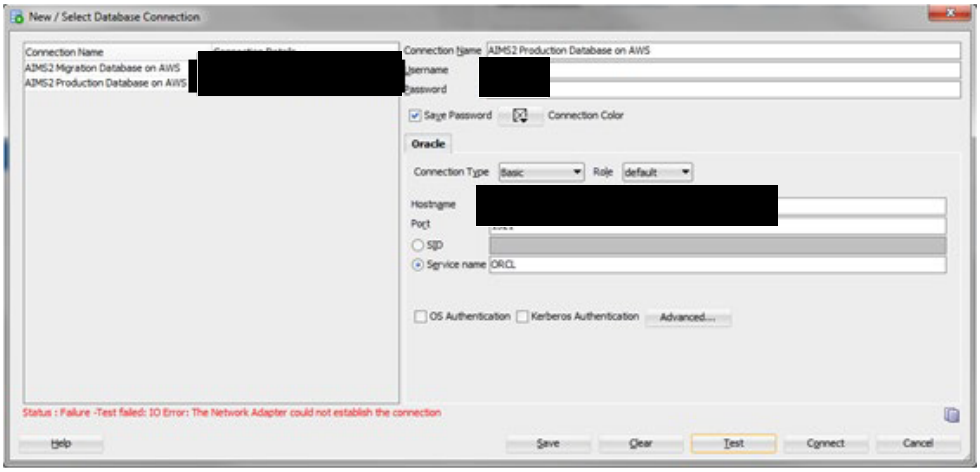
> Hello, Keith - Thanks for sending out the details. I'm still getting held up by a network IO error:

AMERICAN OVERSIGHT



My network, machine and other specs have not changed and I can still get into the 'dbnonprod' instance fine right now.
Once I get in, I'll assist the other users on my team and the folks from our Reporting group (PBR). Since the queries most of us will be hitting the system with could be resource-intensive, can we also get access to the reporting database schema? I'm assuming it's the same instance, just the user name of "TELERIK" versus "MICASE" -- is that an accurate assumption?

There are a few names on that list you sent that can definitely be removed (adean, jtaranti, hgreene) and then four more on which I will check with the user to find out whether their direct access is necessary (bcassiano, abailey, jwhitson, hhaley) but I assume now that they will come back to me saying they do not require it.

Your help is very much appreciated.
Take care,
- josh C.

> Hi Marissa and Raj-
>
> OMSFORM1002_25 and OMSFORM1002_3 are two different directories. My team has been including the attachment directory OMSFORM1002_3 since we began the Data Migraitons. The OMSFORM1002_25 attachment directory is a more recent addition which has been included in the last couple of file transfers as shown below.
>
> 10/15/2019

AMERICAN OVERSIGHT

OMSForm1002_25 - 4872 Files
OMSFORM1002_3 - 9073 Files

10/18/2019
OMSForm1002_25 - 3 Files
OMSFORM1002_3 - 21 Files

11/07/2019
OMSForm1002_25 - 3 Files
OMSFORM1002_3 - 50 Files

Our thought is to continue to provide 25 & 3 and allow B&D to remove as necessary. Please let us know how the B&D team would like us to proceed beased on the above...

Respectfully,

Holly Greene

> We were reviewing the files this afternoon in preparation for Umami and found file names and directory names that have been changed. Our scripts are developed to read the exact name (Case sensitive) so if any name changes or if any of the letter cases changes (even if the name stays the same) it causes us delays because we have to then make updates. We ask that ADC please do not make any changes to file names or directories going forward to ensure we have as smooth Go Live migration as possible. If there is something that requires changes please communicate that well in advance of Go Live weekend so that we can make the update and be prepared.
>
> Also, The Keefe file 07AA is not needed by Keefe. This was requested by George, but it is not a file that is used by Keefe and does not need to be supplied at go Live. If it is being provided to B&D that process needs to remain in place.

AMERICAN OVERSIGHT

From: Thad Lowry on behalf of Thad Lowry <thad.lowry@bndna.com>
To: Marissa Boice; Amal Houass; Matt DeClue
Cc: Aaron Bailey; Dwight Cloud; Michael Kearns; Lisa Dee Meyerson Marshall; Holly Greene; Dean Allen; Chris Masson; Christopher Little
Subject: RE: DR Testing Strategy
Date: Friday, November 15, 2019 4:17:59 PM
Attachments: image003.png

We have worked out with ADC that the DR test will officially begin at 9:00 am on Monday Morning Nov 18 (see the rough timeline below)

We will not have to have any formal meetings as described below but ADC would appreciate timely periodic updates of progress

- For instance: ADC has given us permission to move to the DR site we don't need to have a meeting to assess the situation and get permission

As a side note, we need to document the exact steps that were taken, along with the time and duration of each process

This documentation will then be posted to the SharePoint site in the DR folder

Thanks,

Thad

Subject: RE: DR Testing Strategy

Here is a synopsis of the Disaster Recovery strategy that was discussed earlier this week (with the exception of optional date for the test which is a new offering that wasn't discussed)

Date: TBD

AMERICAN OVERSIGHT

Originally: Thursday Nov 14
Discussed: Monday Nov 18
Thursday Nov 21
Optionally: Monday Nov 25

Best case scenario - round trip occurs in 7 hours
Worst case - test done over course of 2 days

Scenario:

1. 9:00 AM - Natural Disaster occurs in the current AWS datacenter region (Yellowstone volcanic eruption)
   - (B&D shuts down access to PROD)

2. 9:00 AM – 9:30 AM - B&D becomes aware of the natural disaster
   - B&D investigates the extent of the disaster in the current AWS facility
   - B&D investigates the state of DR site
   - ADC investigates the state of the AZ facilities, network, power

3. 9:30 AM - ADC and B&D meet to dicuss situation
   - B&D advises that
     - current AWS location is a disaster and will not recover for the foreseeable future
     - the DR site has a database backup from 9:00 that can be used
   - ADC advises that:
     - AZ facilities are unharmed
     - Network is intact
     - All facilities have power
   - ADC formally requests to move to DR site

4. 9:45 am - B&D begins process of bringing up the DR site
   - Hardware, software, database, network

5. 2- 8 hours later (11:45 thru 5:45) - B&D verifies that the DR site is fully functional and notifies ADC to resume operations

6. 1-2 hours - ADC verifies DR site is fully functional
   - Application, interfaces, Reports
   - Database has transactions up to the time of the disaster

AMERICAN OVERSIGHT

(9:00 am)

7. Turn back point - ADC and B&D meet
    - ADC advises that:
        - The DR site is fully functional
        - The failover was a success
    - ADC formally requests to move back to original site
    - B&D begins process of moving DR to PROD

8. 2- 8 hours later - B&D verifies that the original site is fully functional and notifies ADC to resume operations

9. 1-2 hours - ADC verifies original site is fully functional
    - Application, interfaces, Reports
    - Database has transactions entered on the DR site

10. Completion Point - ADC and B&D meeet to discuss completion of test

To:	Marissa Boice
Subject:	Re: Tentative: Invitation: DM: AIMS1, Interfaces, PC AIMS @ Fri Nov 15, 2019 10:30am - 12pm (MST) (marissa.boice@bndna.com)
Date:	Friday, November 15, 2019 3:30:02 PM

It morphed into a forum where all sides (IT, Ops and B&D) could discuss the request for dual entry. .It was really just to talk through the why, how, when, risks, etc.. A higher level discussions still needs to take place. No decision was made

Respectfully,

Holly Greene

AMERICAN OVERSIGHT

Hi Michael and Hung-

The full set of KeepTrak files will need to be sent post 17:00 on Thursday, 11/14.

The full set of PC AIMS files (27 folders) are expected to be downloaded and delivered to Michael for transfer late Friday evening (COB). We will need to begin the process of transferring those files once received. I will look to the two of you to coordinate the transfer to B&D (Keefe) and circle back with me regarding the estimation of delivery.

Respectfully,

Holly Greene

Yes - cleared it all up. Thank you.

The full set of Keefe files can be sent at any time and will not impact the transfer of full set of PC AIMS files. That said, is there a particular reason we're waiting for 11/14? If so, what time do they need to be sent to B&D or Keefe on 11/14?

AMERICAN OVERSIGHT

below. I added my team to this communication to keep them informed and allow them to respond as appropriate.

1. The schedule below shows ADC pulling DOC O tomorrow (Thursday and delivering it to B&D by EOD 11/7/19). Is my understanding correct? **- Yes.**
2. ADC is only providing delta's for the files, correct? **- Yes.**
3. Is ADC prepared to provide Keefe will all 6 full files so that ADC can use them to execute a refresh? **- If the full for Keefe is requested, we can certainly do so, but I think this would need to be discussed. However, with the timing of transmission previously, I don't see this as an issue. I will defer to Michael.**
4. When would ADC be able to provide B&D with a full set of all files (preferably as soon as possible without impacting migration activities)? **- I've confirmed that we haven't really sent a full set in quite some time, so it's grown/changed since. Last time the packaging and transmission took 17hrs. We can begin the process on Tuesday (Monday is a holiday).**

Hi Jim:

A question came up today in the Operational Readiness meeting regarding the ACH transfer files. Lynda explained that there are no ACH deposits that occur on Saturday and Sundays, which means we don't have to worry about those feeds over Go Live Weekend. However, can you please let me know what time the ACH transfers come in on Fridays? Will the ACH's be applied to the AIMS accounts prior to the kick off of migration at 5pm on Friday?

Thank you.

Thanks, Marissa.

Hi Michael and Hung-

The full set of KeepTrak files will need to be sent post 17:00 on Thursday, 11/14.

The full set of PC AIMS files (27 folders) are expected to be downloaded and delivered to Michael for transfer late Friday evening (COB). We will need to begin the process of transferring those files once received. I will look to the two of you to coordinate the transfer to B&D (Keefe) and circle back with me regarding the estimation of delivery.

Subject: Re: Data Migration: Umami

Hi Marissa-

Regarding item 4 (request for full set): Hung began the process and anticipates the delivery to be no later than COB Friday (11/15).

Respectfully,

Holly Greene

AMERICAN OVERSIGHT

On Wed, Nov 6, 2019 at 4:39 PM Holly Greene <hgreene@azadc.gov> wrote:

Hi Marissa-

Sorry, I responded to your earlier email because this one took a bit to get through to me. Either way, my responses are in the previous email and below. I added my team to this communication to keep them informed and allow them to respond as appropriate.

1. The schedule below shows ADC pulling DOC O tomorrow (Thursday and delivering it to B&D by EOD 11/7/19). Is my understanding correct? **- Yes.**
2. ADC is only providing delta's for the files, correct? **- Yes.**
3. Is ADC prepared to provide Keefe will all 6 full files so that ADC can use them to execute a refresh? **- If the full for Keefe is requested, we can certainly do so, but I think this would need to be discussed. However, with the timing of transmission previously, I don't see this as an issue. I will defer to Michael.**
4. When would ADC be able to provide B&D with a full set of all files (preferably as soon as possible without impacting migration activities)? **- I've confirmed that we haven't really sent a full set in quite some time, so it's grown/changed since. Last time the packaging and transmission took 17hrs. We can begin the process on Tuesday (Monday is a holiday).**

Respectfully,

Holly Greene

Here is the documentation that we have on file for the QlikView product along with the 4 documents that you found (so everything is in one place)

It identifies all of the processes and contains source code for the SSIS

It looks like there are quite a few sources of data that may need to be adjusted

Please let Matt know if you need help and need an engagement to adjust this product to source from AIMS2 data

REVISION HISTORY

Version	Date	Name	Description

AMERICAN OVERSIGHT

INTRODUCTION

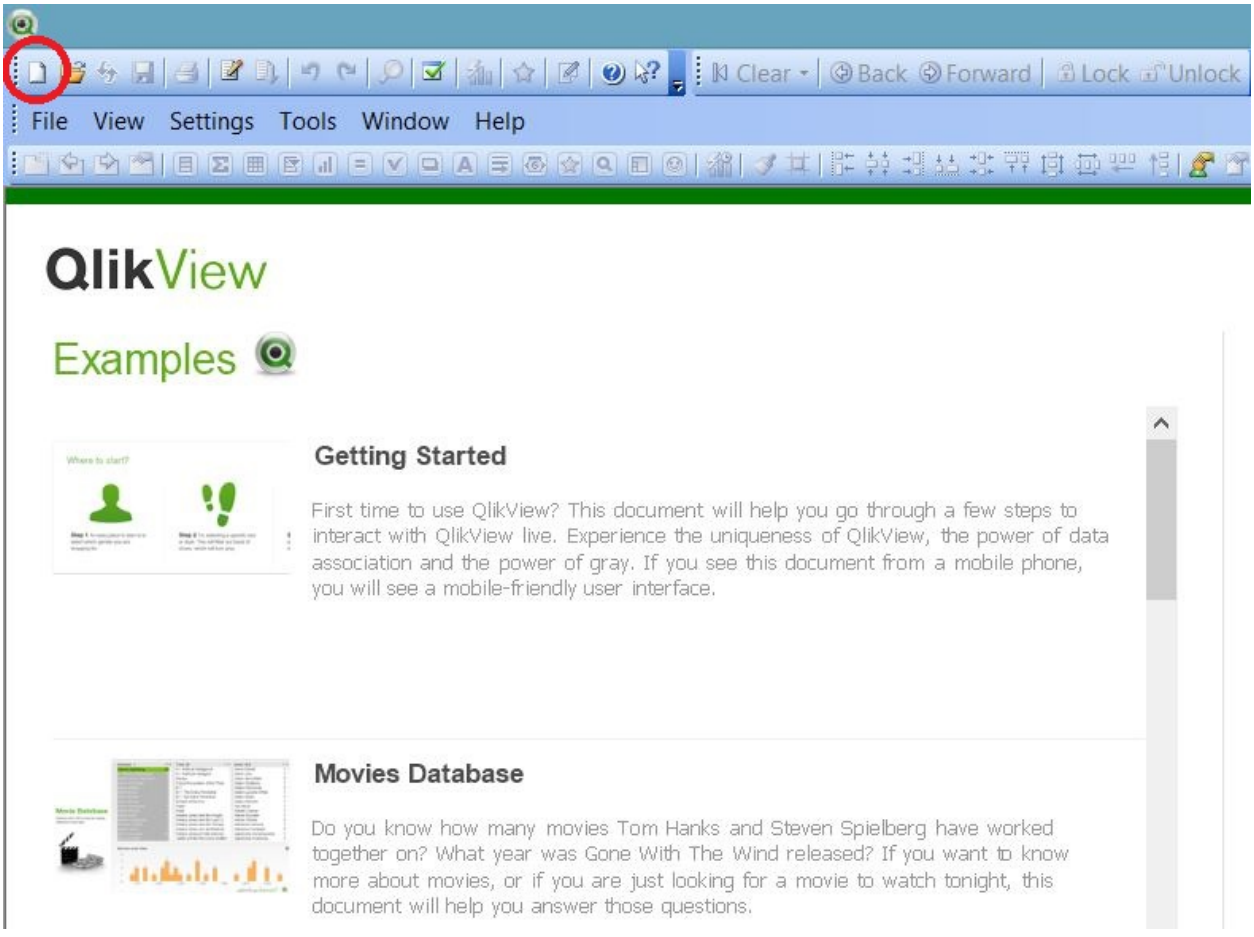
This document will detail through steps and examples how to create visualizations and connect to a database with Qlikview software.

1.0 CONNECTING QLIKVIEW TO A DATABASE

The following steps will detail connecting Qlikview to a database.

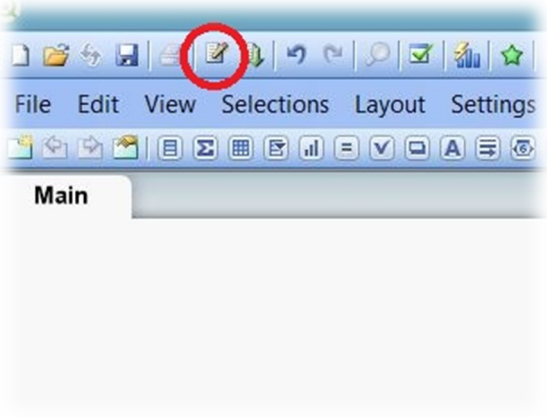
1.1 Accessing script editor

1.1.1 Select the new document icon.

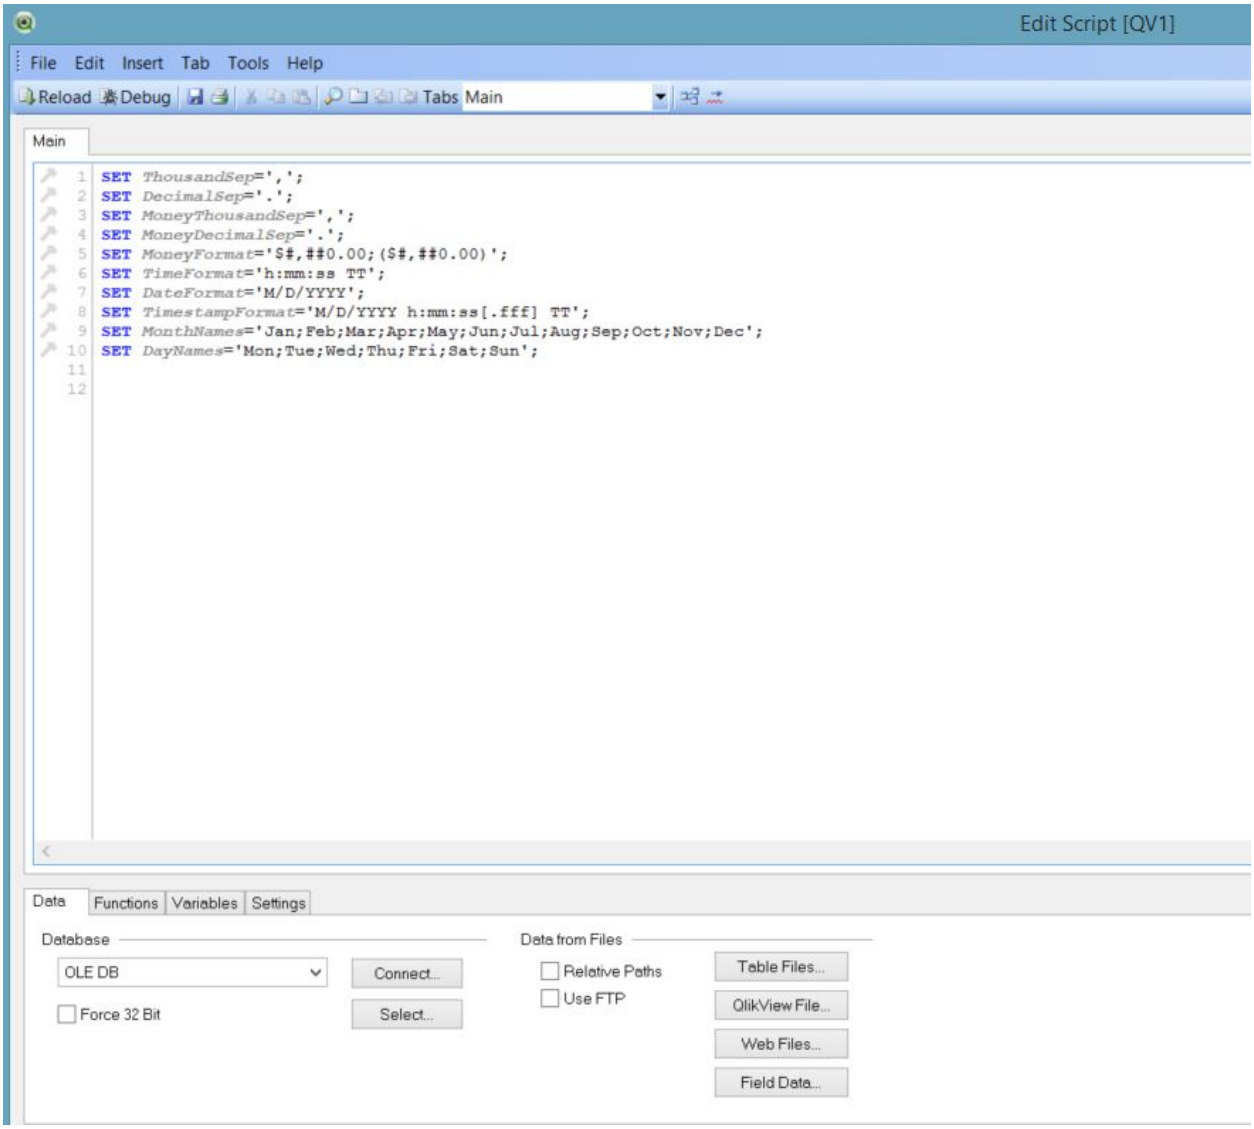


1.1.2 Open the script editor (you can also press “CTRL + E” to access)

AMERICAN OVERSIGHT



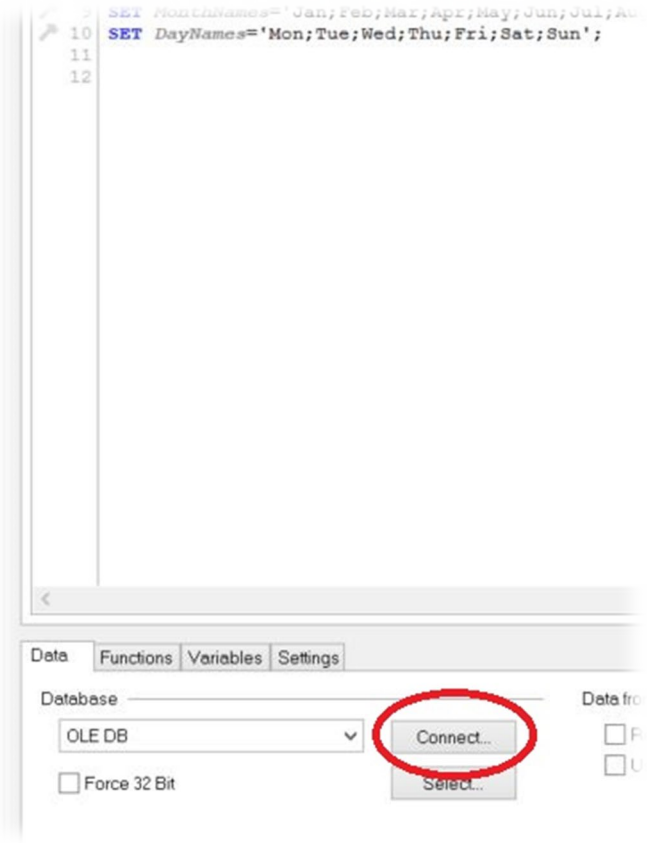
1.1.3 The script editor will open



AMERICAN OVERSIGHT

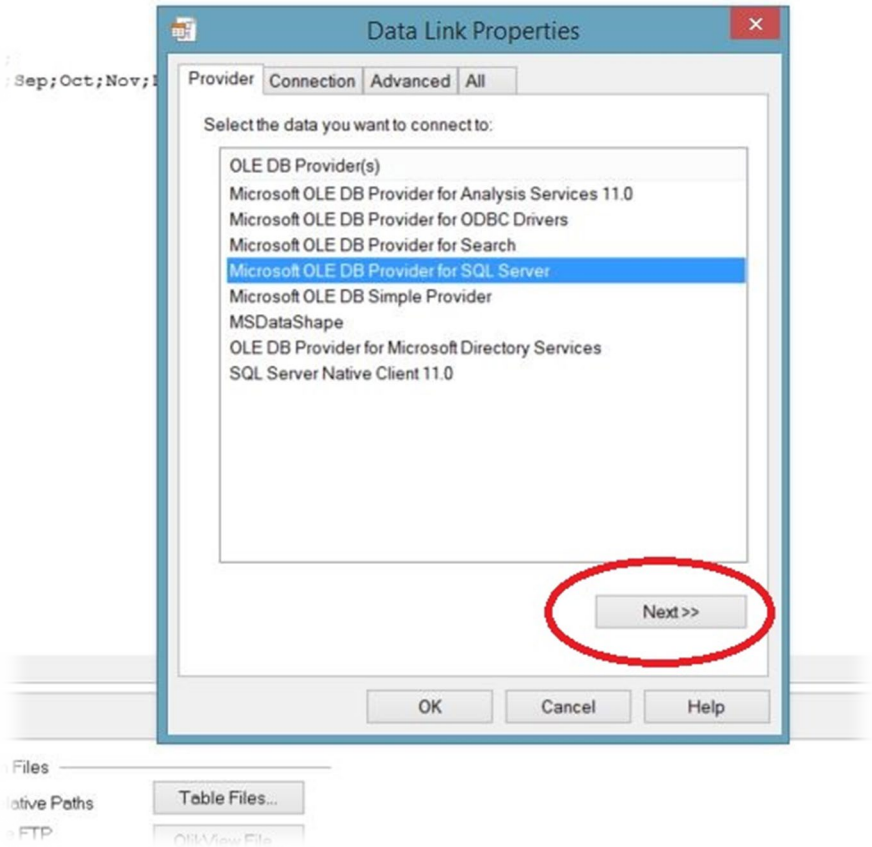
1.2 Using connection wizard

1.2.1 In the script editor ensure that “OLE DB” is selected, and then **press the “Connect” button.**



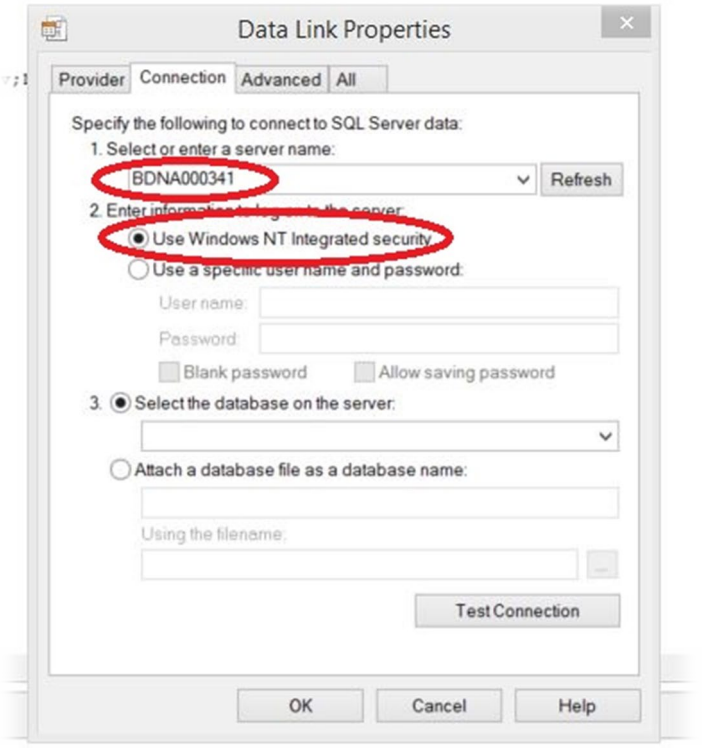
1.2.2 The Data Link Properties window will open. **Ensure “Microsoft OLE DB Provider for SQL Server” is selected and then press “Next.”**

AMERICAN OVERSIGHT

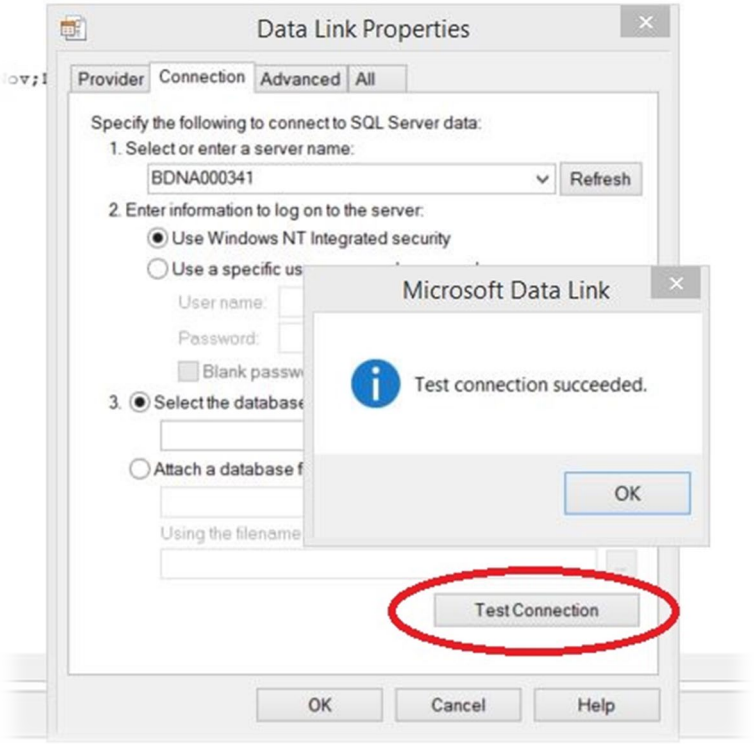


1.2.3 On line 1 specify which database you are connecting to, then select "Use Windows NT Integrated security" on line 2.

AMERICAN OVERSIGHT

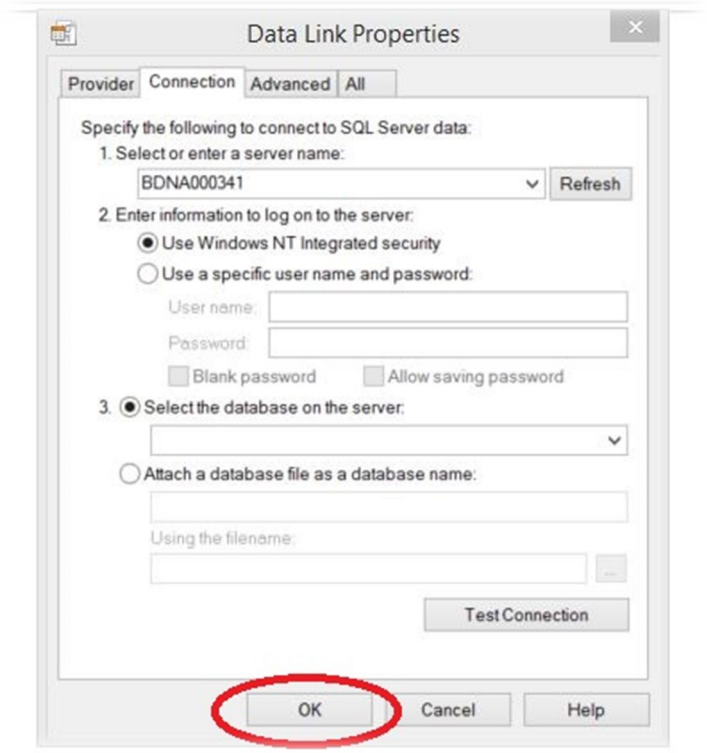


1.2.4 **Press the "Test Connection" button to ensure the connection to the database is functioning.** You should see a pop-up that indicates the connection to the database has succeeded.

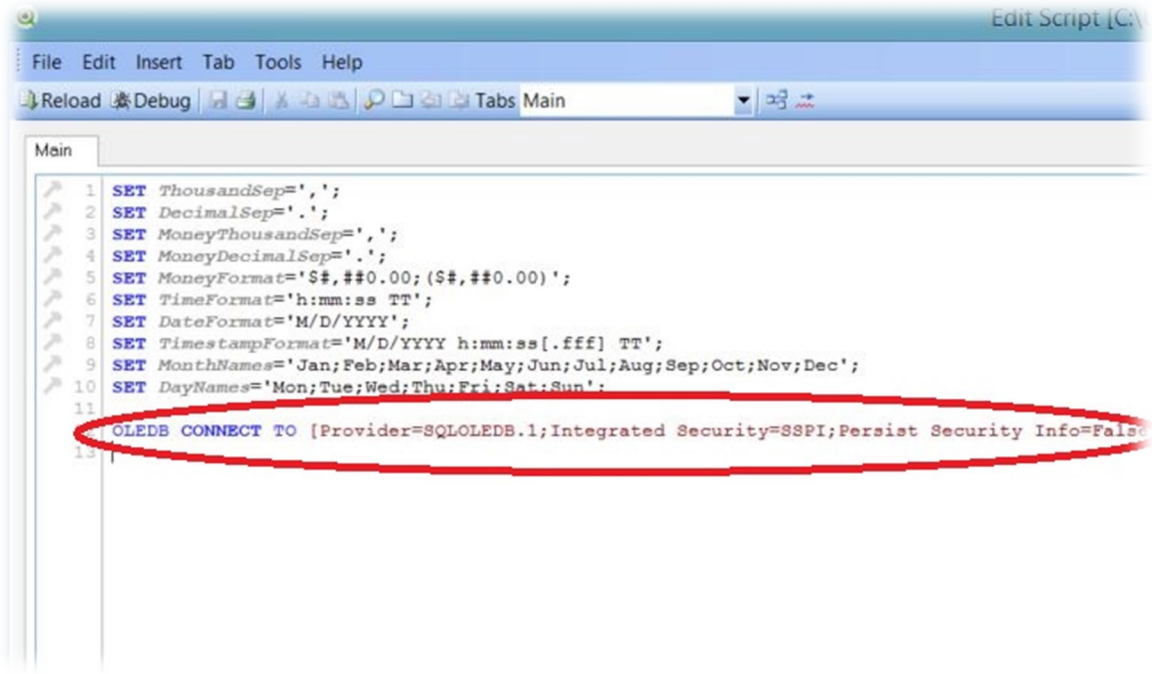


AMERICAN OVERSIGHT

1.2.5 Press “OK” to generate database connection string.



1.2.6 The connection string should display in the script editor. When the script is reloaded the connection to the specified database will be established.



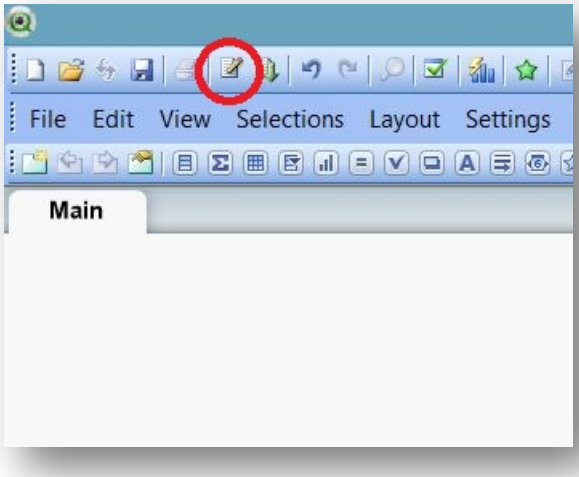
AMERICAN OVERSIGHT

2.0 CONNECTING TO TABLES IN QLIKVIEW

The following steps will demonstrate how to connect to specific database tables in Qlikview.

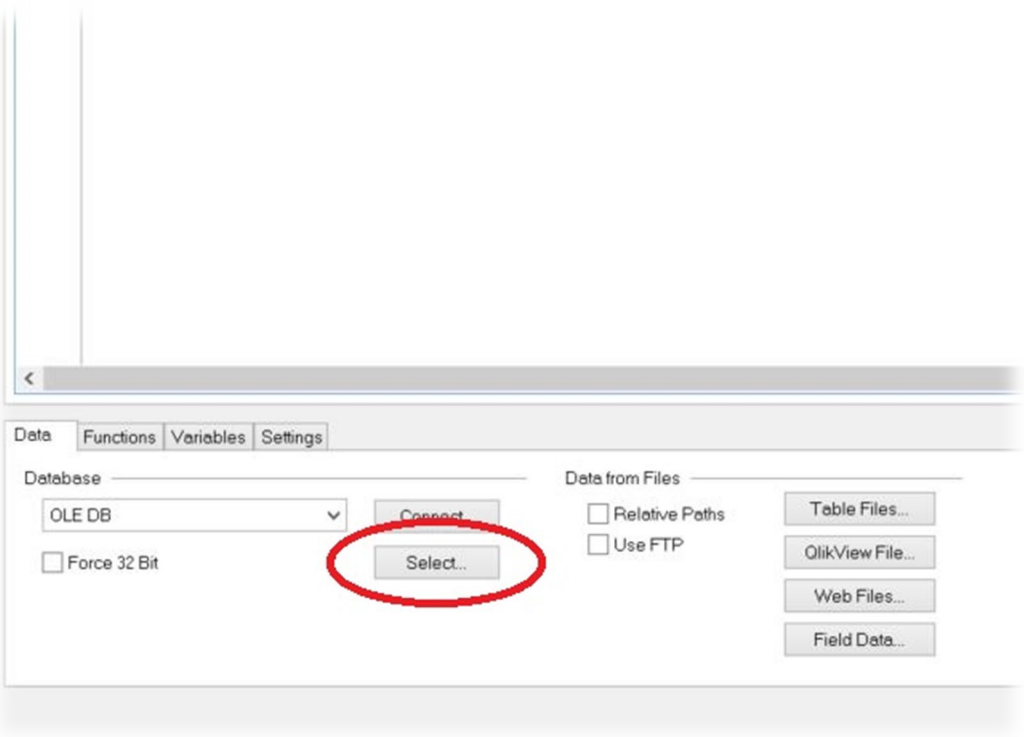
2.1 Opening the Table Wizard

2.1.1 Open the script editor.



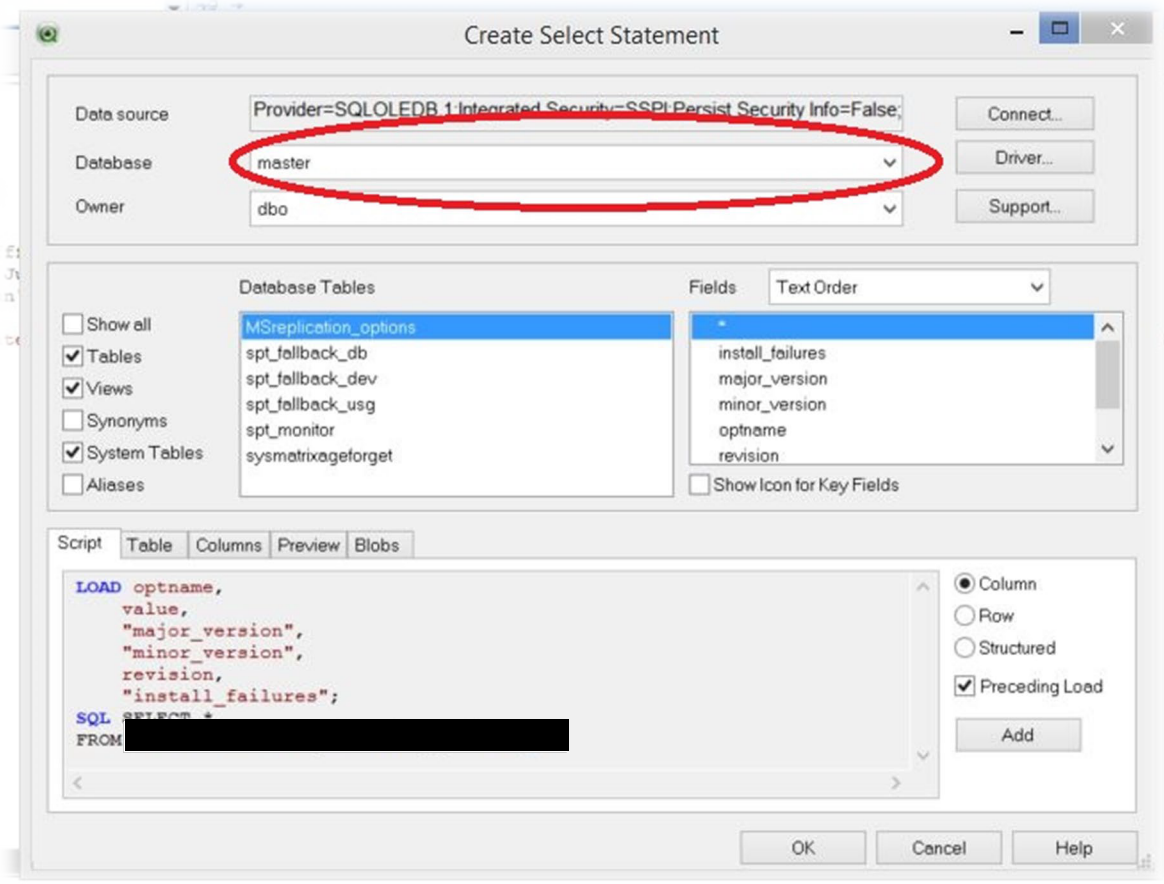
2.1.2 In the script editor choose the “Select” button to open the table wizard.

AMERICAN OVERSIGHT



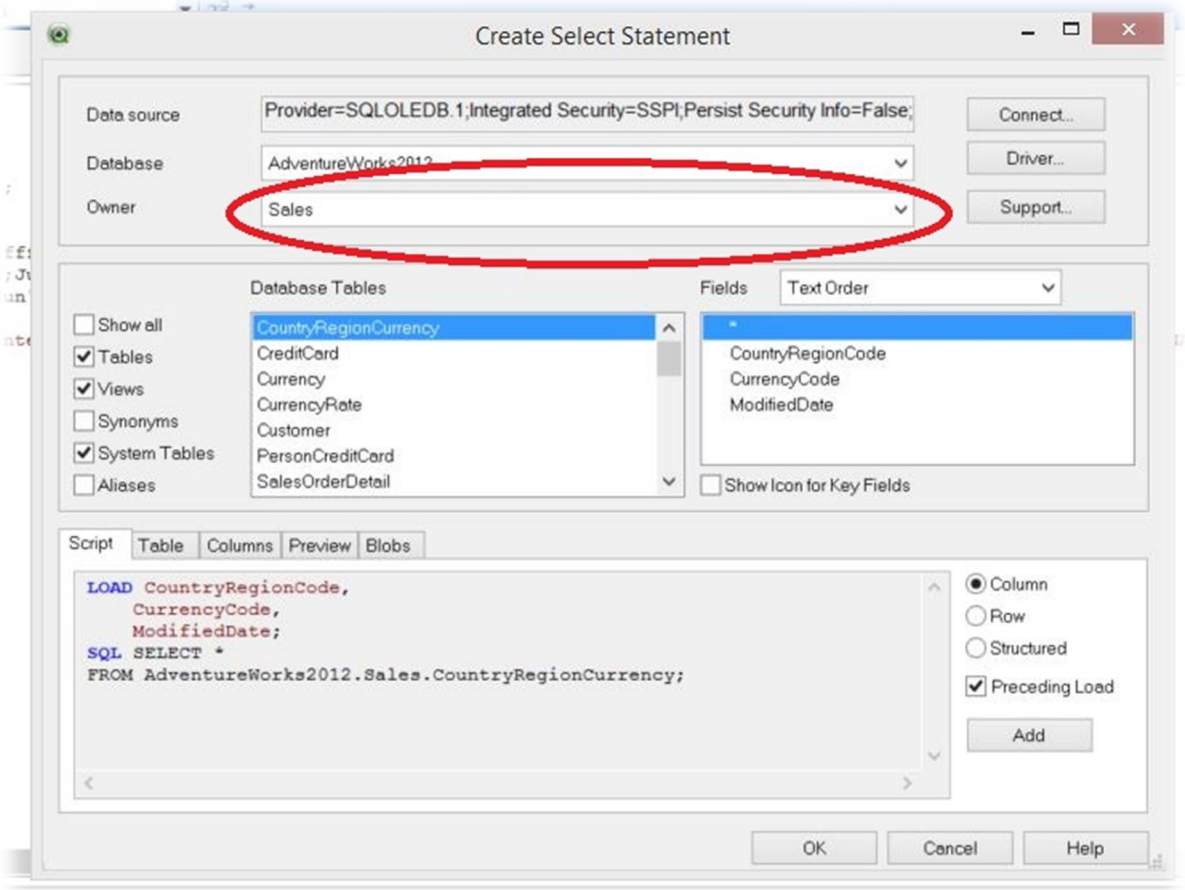
2.1.3 Select the needed database on the drop down column if not already selected.

AMERICAN OVERSIGHT



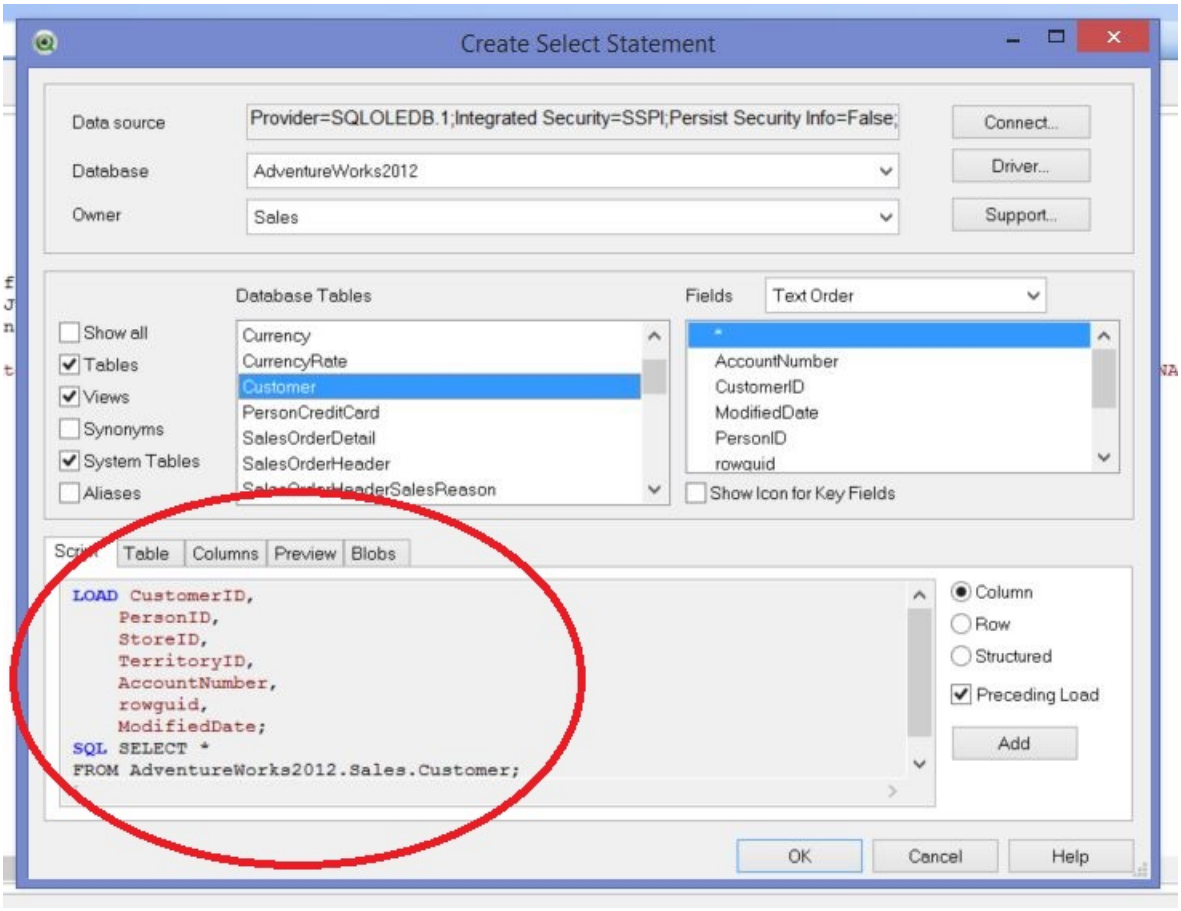
2.1.4 Select the schema owner of the database if required.

AMERICAN OVERSIGHT



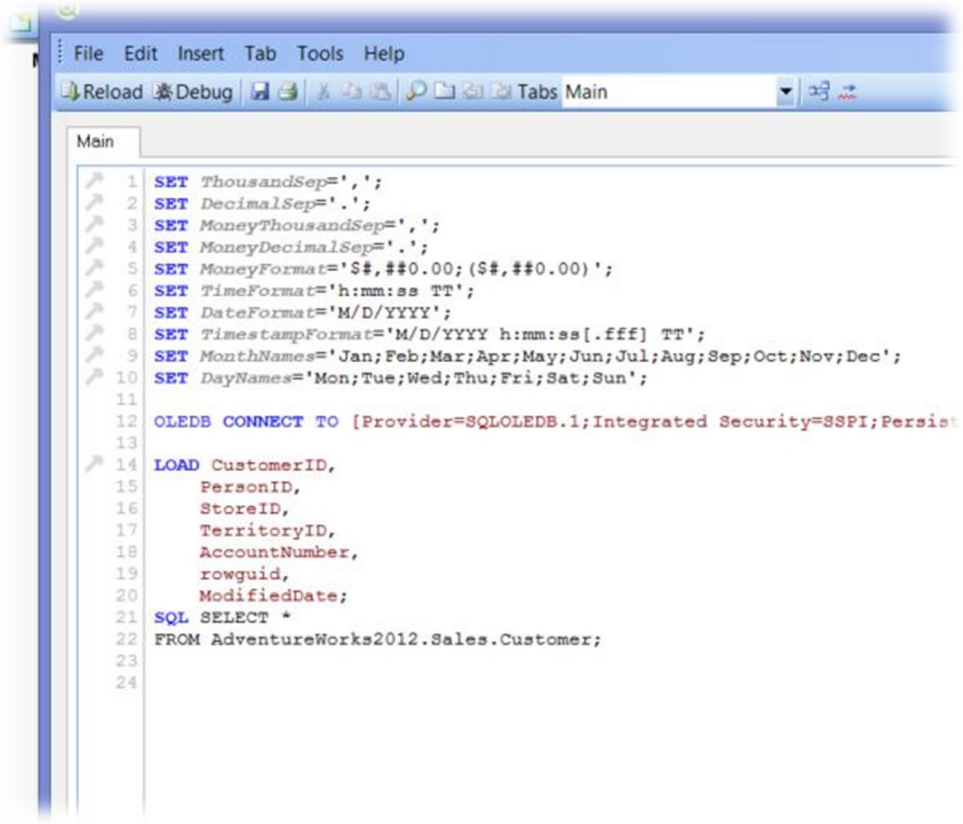
2.1.5 Select the needed table from the list of "Database Tables."

AMERICAN OVERSIGHT



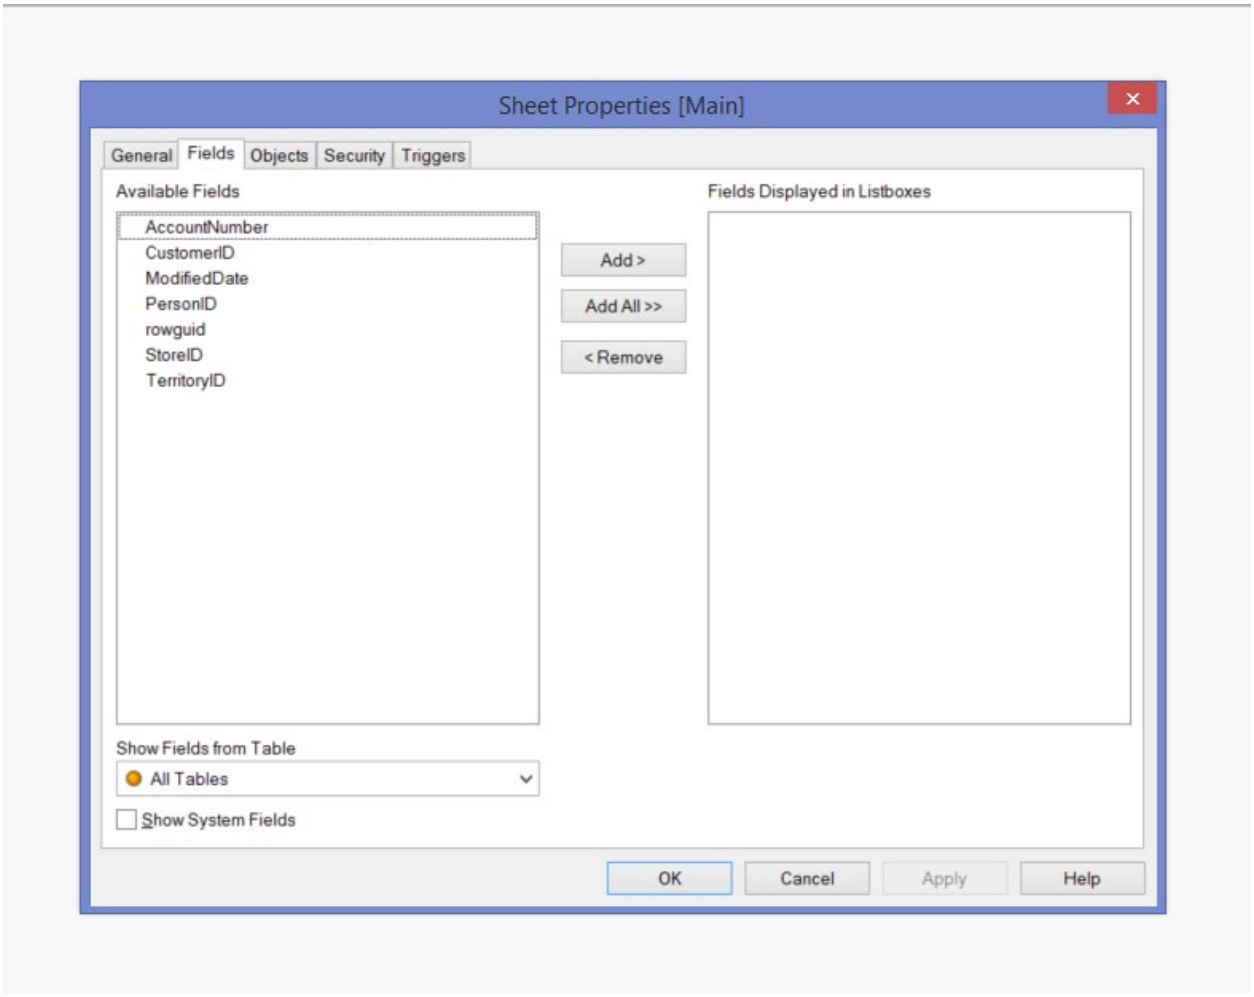
2.1.6 Select “OK” to generate the load table script in the script editor.

AMERICAN OVERSIGHT



2.1.7 **Select “Reload” or press “CTRL + R” to reload the Qlikview script.** You should see the database fields in the “Select Fields” box that appears after loading. These database fields are now useable in Qlikview.

AMERICAN OVERSIGHT



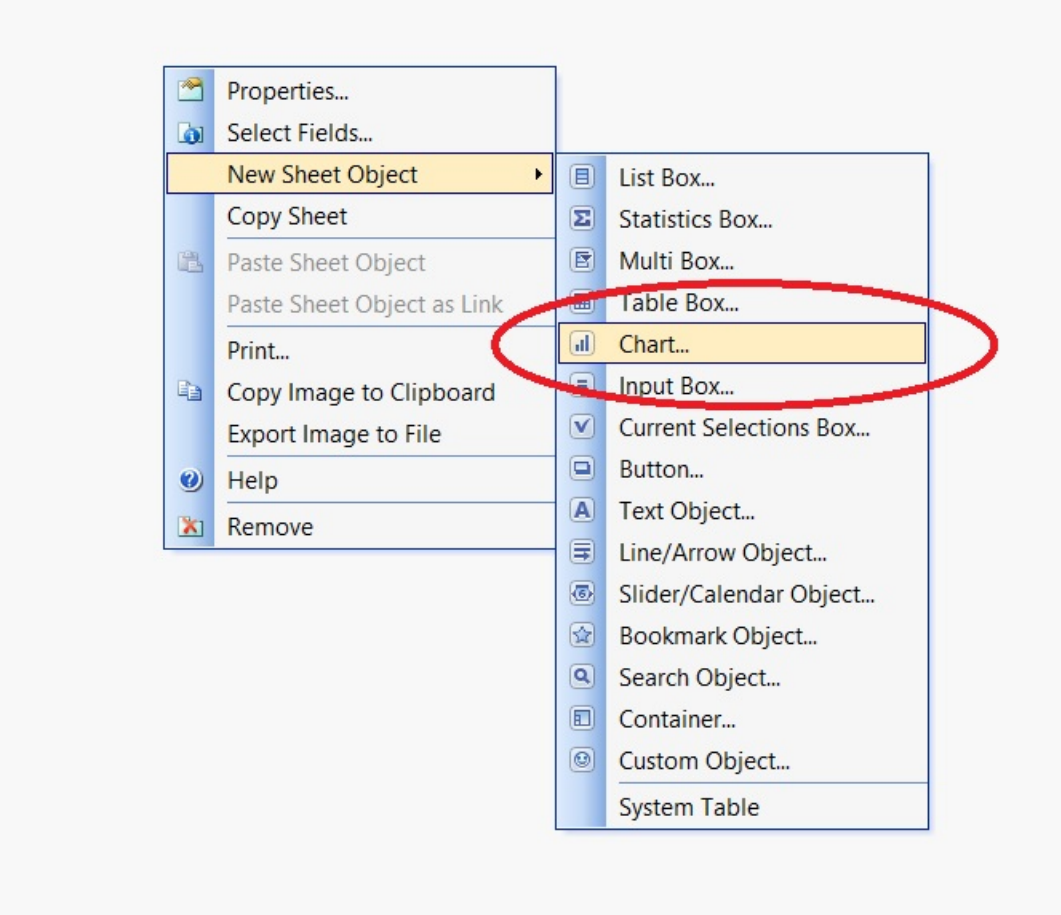
3.0 DISPLAYING DATA IN QLIKVIEW

The following steps will demonstrate how to create a basic chart in Qlikview.

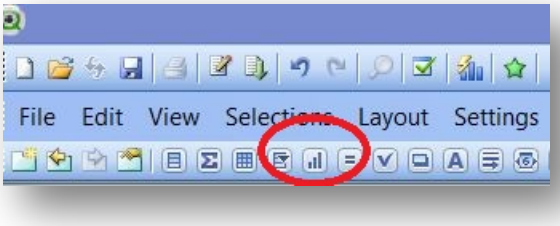
3.1 Opening the chart wizard

3.1.1 **Right-click any free space on the Qlikview sheet and select "Chart" from "New Sheet Object."**

AMERICAN OVERSIGHT



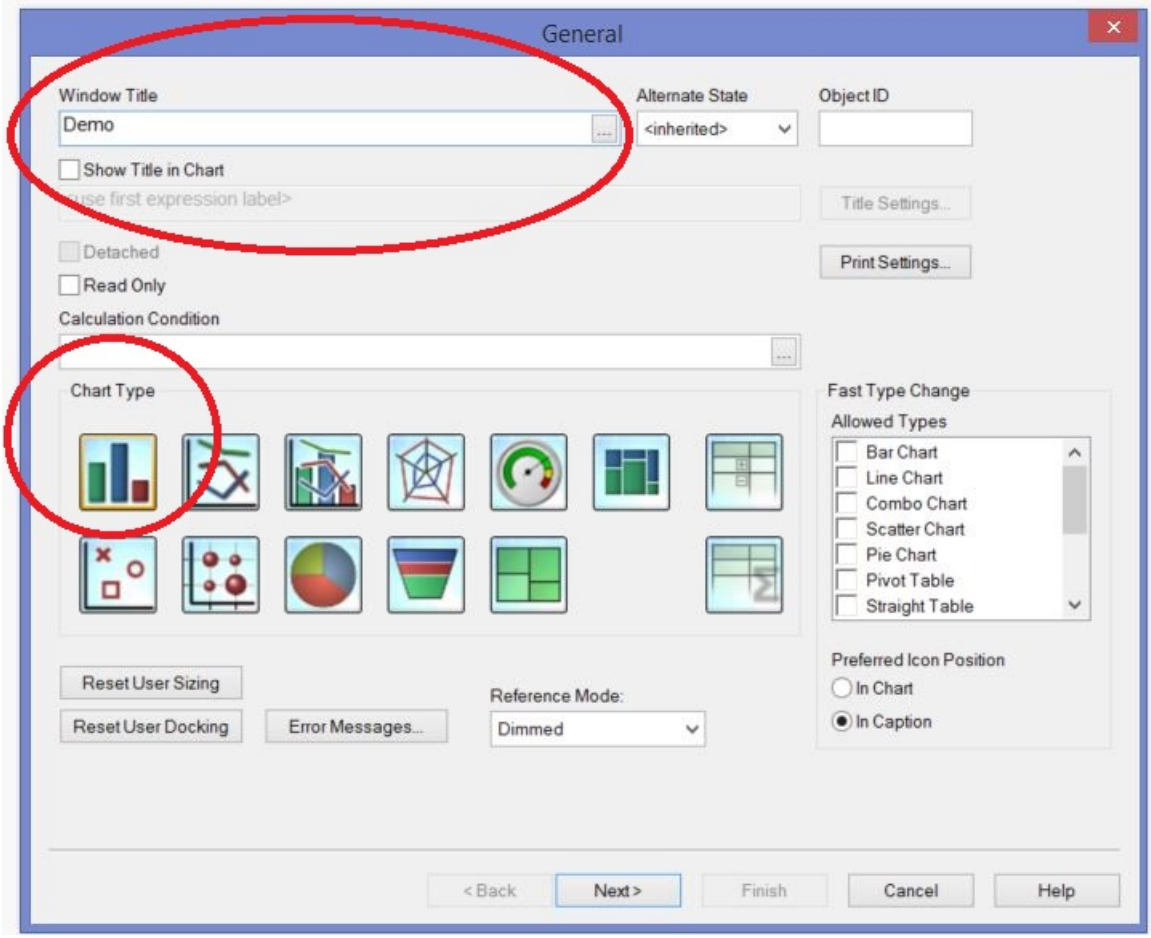
3.1.2 The chart button is also available on the developer toolbar.



3.2 Creating a new chart

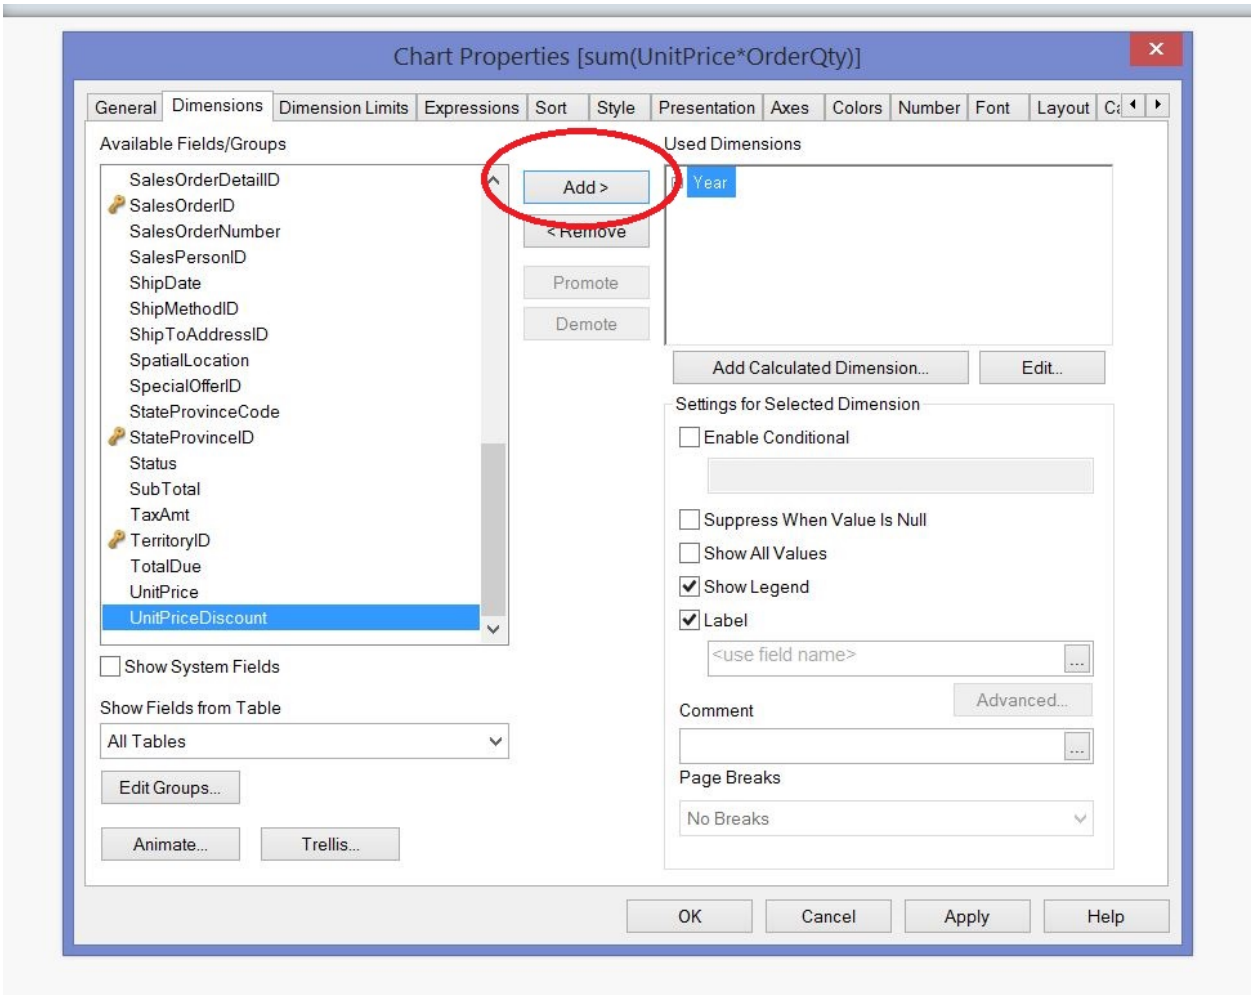
3.2.1 On the first page of the chart wizard you can specify the chart name. The type of chart is indicated below. Hovering over each chart selection will display the name of the chart type. **Enter a chart name and select a chart type. Uncheck the "Show Title in Chart" box and then select the "Next" button.**

AMERICAN OVERSIGHT



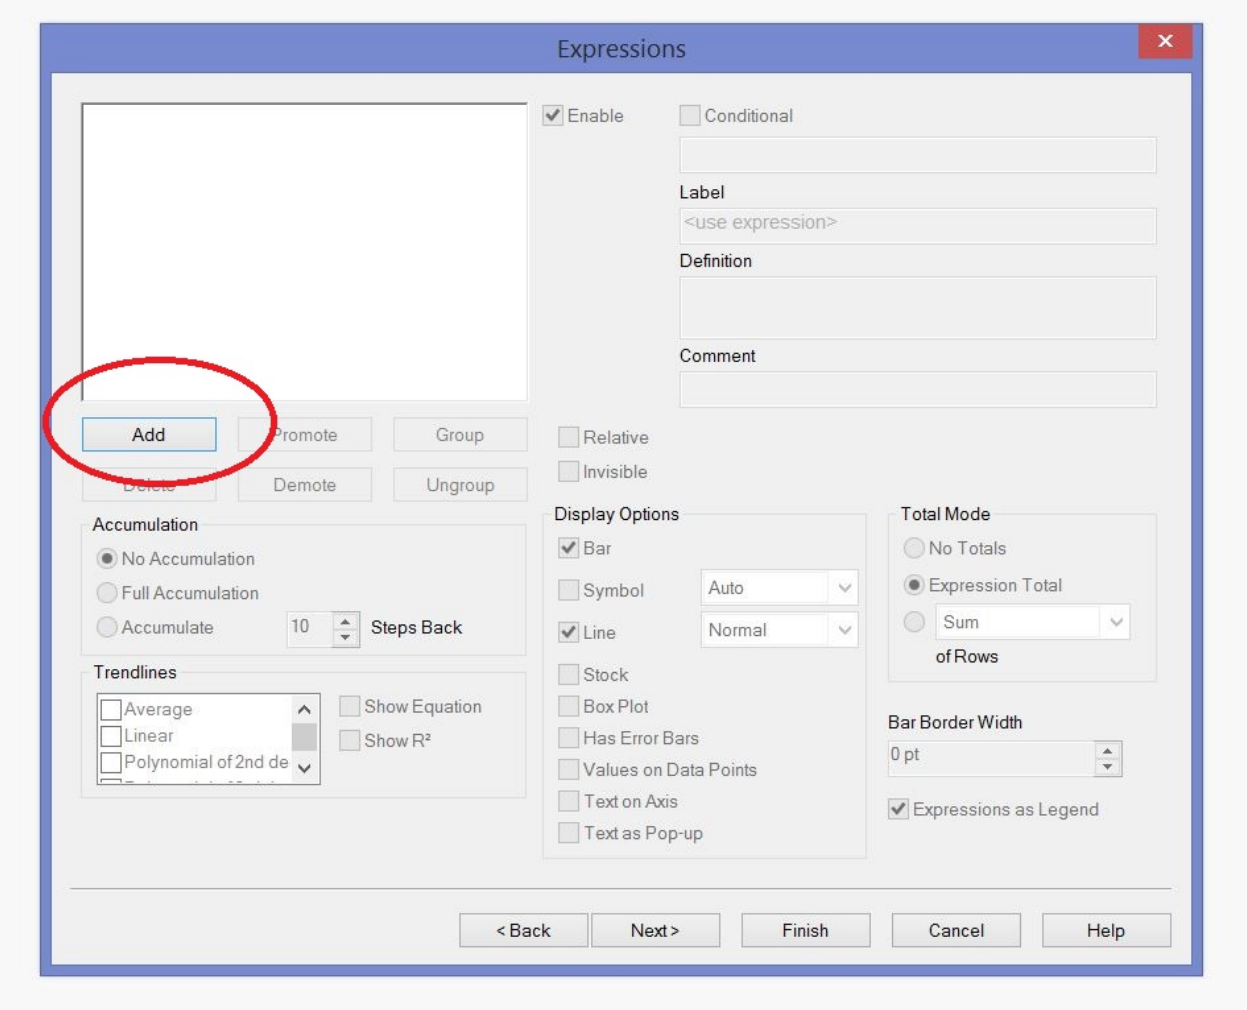
3.2.2 The next page controls the possible dimensions for the chart. Dimensions are fields that have a particular calculation/expression performed on them. For example, we need this chart to display total revenue for each year. We will select “Year” as our dimension in this chart because we need to display yearly data but we need to calculate revenue. **Select “Year” and then press the “Add” to add it to the dimensions of the chart. Then select the “Next” button.**

AMERICAN OVERSIGHT



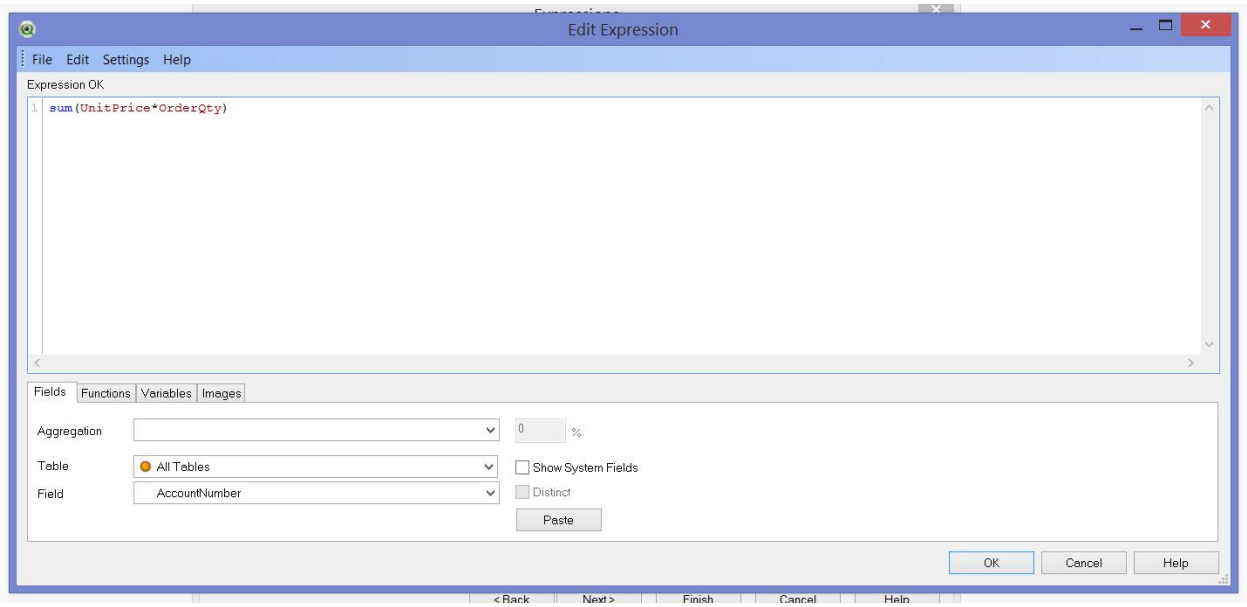
3.2.3 The next page is the expressions page, which will define the calculations being performed on the dimension. **The expression pane will automatically display when you enter this page, or you can select the "Add" button.**

AMERICAN OVERSIGHT



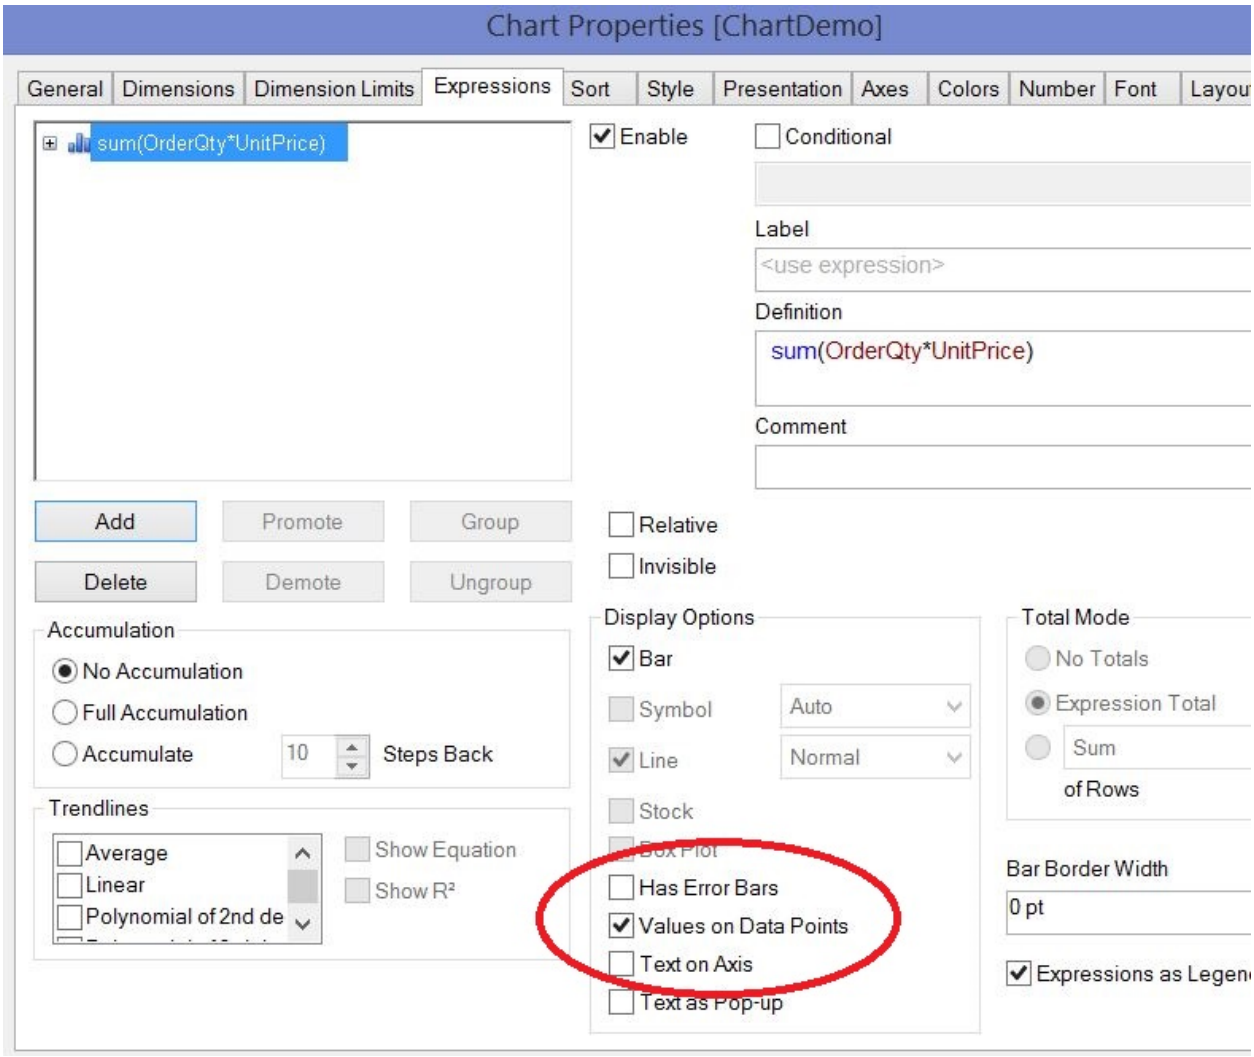
3.2.4 In this example, we are calculating total revenue for each year, which is the sum of the product of unit price and each order quantity. **Here we enter "sum(UnitPrice*OrderQty)" in the expression pane. Then select "Ok."**

AMERICAN OVERSIGHT



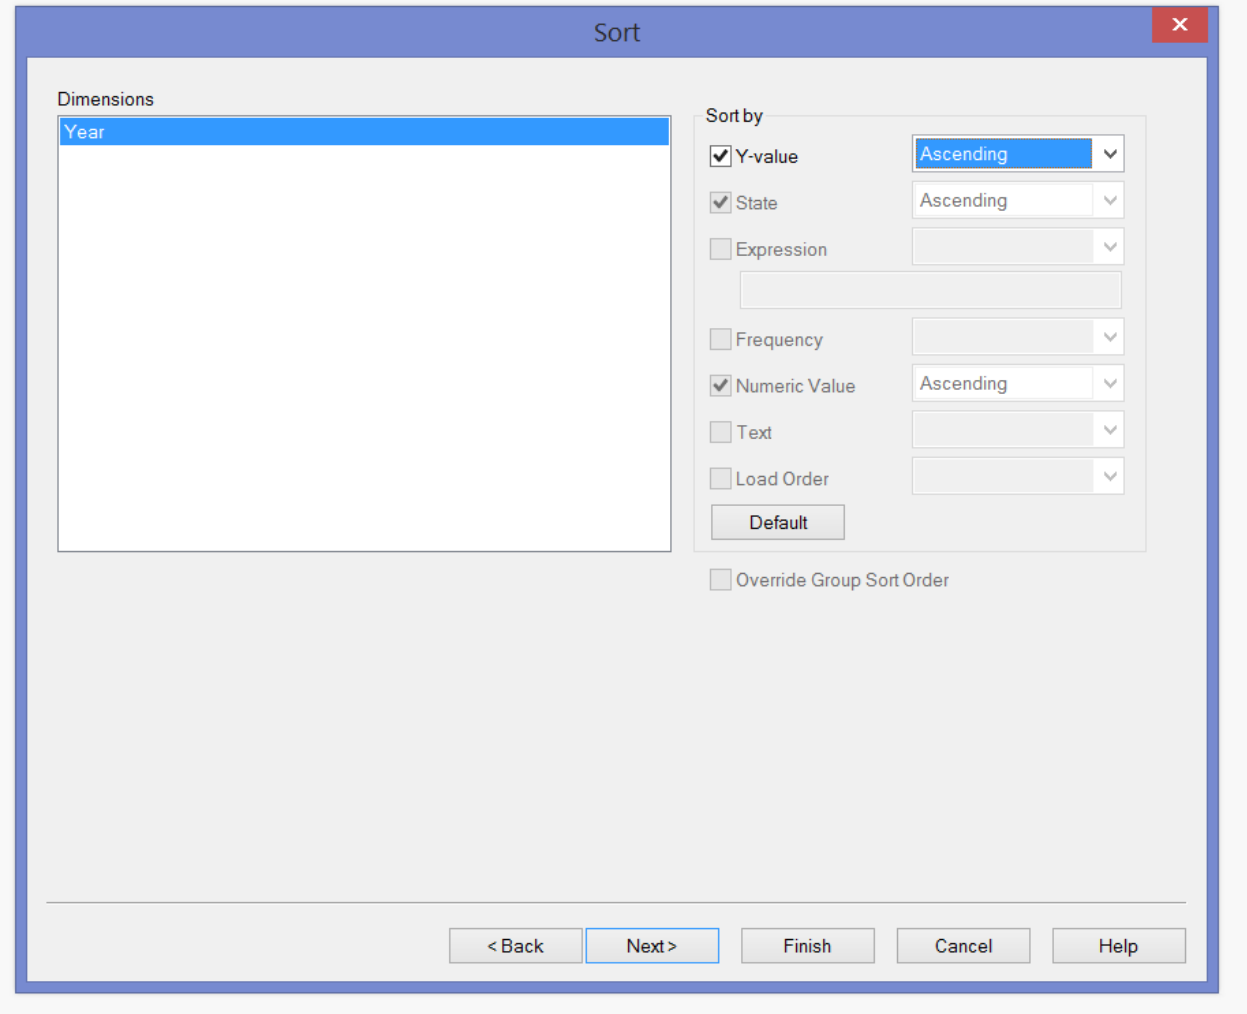
3.2.5 We also need to display the actual numeric value associated with bar in the chart. The “Values on Data Points” option allows for each dimension to indicate the actual calculated value from the expression. **Select the “Values on Data Points” box. Then select the “Next” button.**

AMERICAN OVERSIGHT



3.2.6 This page displays how the dimensions can be sorted in the chart. **Select "Y-value" and then select ascending. Then select the "Next" button.**

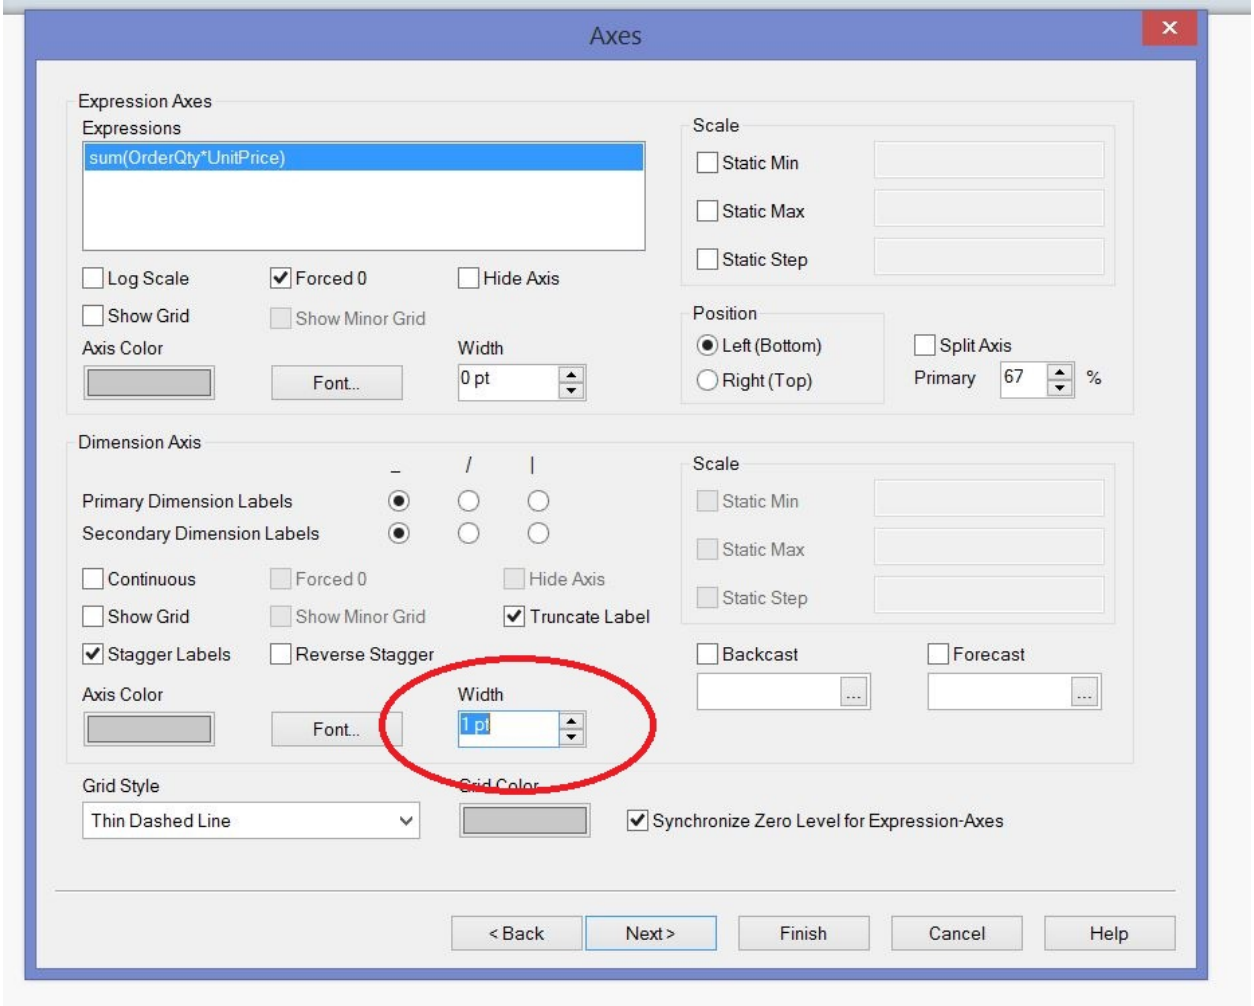
AMERICAN OVERSIGHT



3.2.6 The next style and presentation pages change the overall look and feel of the chart itself. For this demonstration we will leave these options unchanged. **Select the "Next" button until the "Axes" page.**

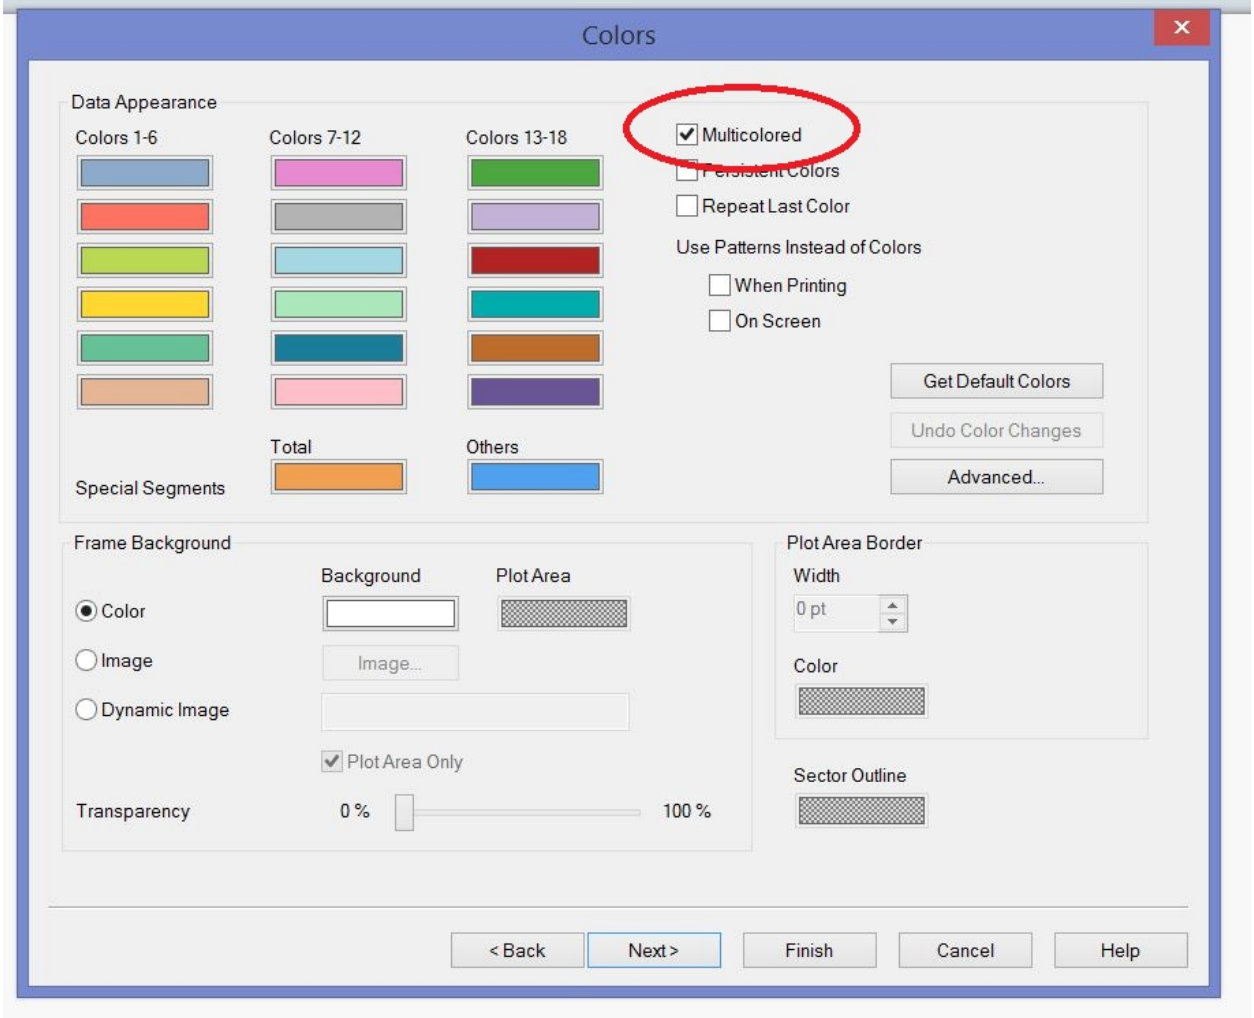
3.2.7 The axes page has options for both "Y" and "X" axes of the chart. We need the dimension axis visible on this chart. **On the dimension axis options increase the axis width to 1. Then select the "Next" button.**

AMERICAN OVERSIGHT



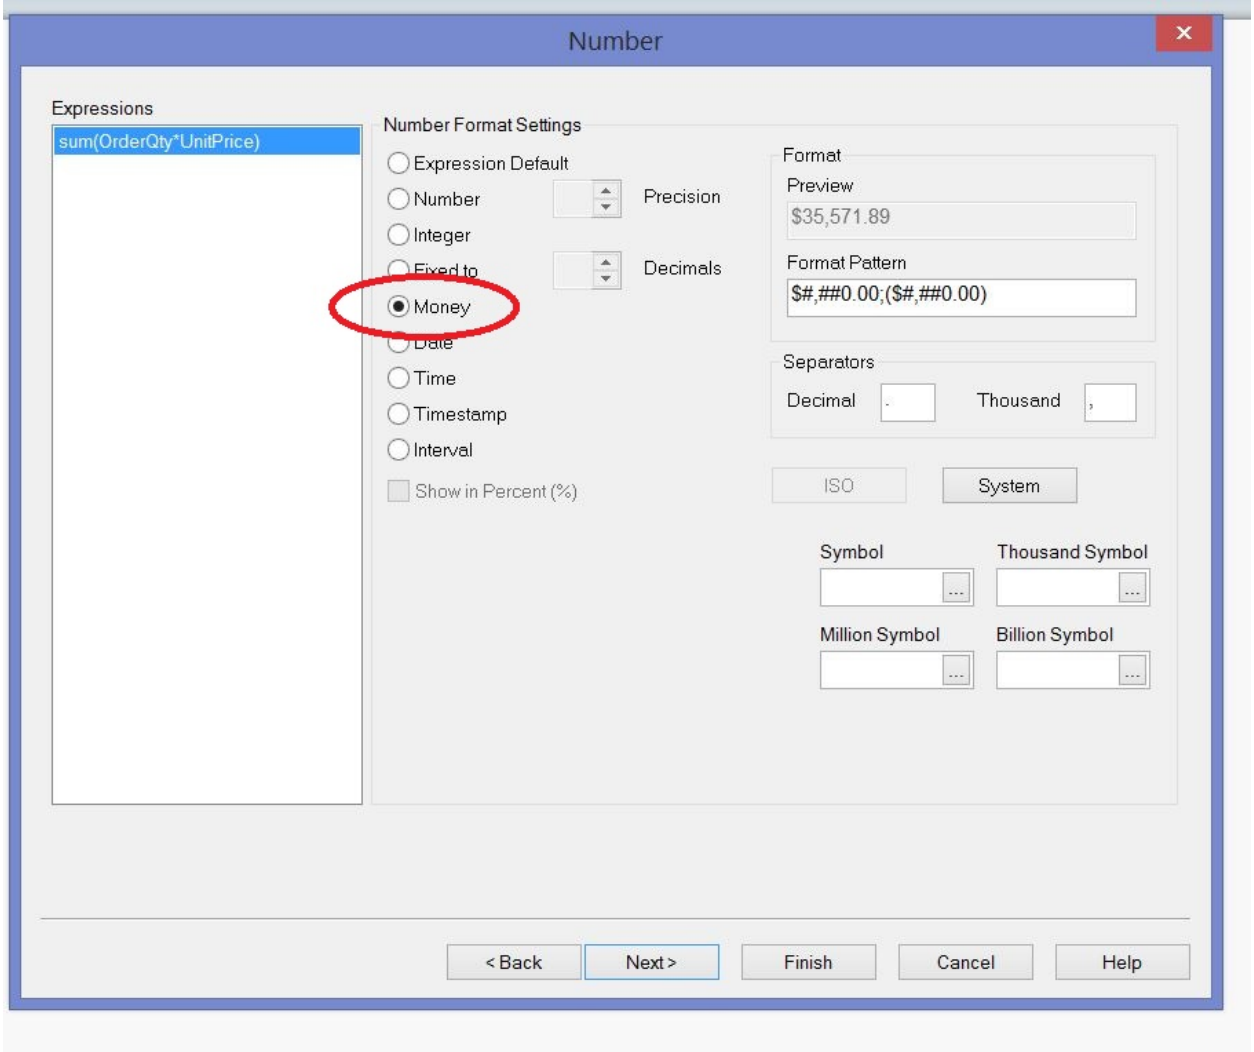
3.2.7 The colors page can change the color scheme of the chart. We need to have a different bar color for each year we display. The multicolored option will change each dimension color, otherwise all the chart colors will remain the same. **Check the "multicolored" box. Then select the "Next" button.**

AMERICAN OVERSIGHT



3.2.8 The next page changes the number format used in the chart. Since we are calculating revenue, we need to display our numbers as monetary values. **Choose "Money" from the bullet list. Then select the "Next" button.**

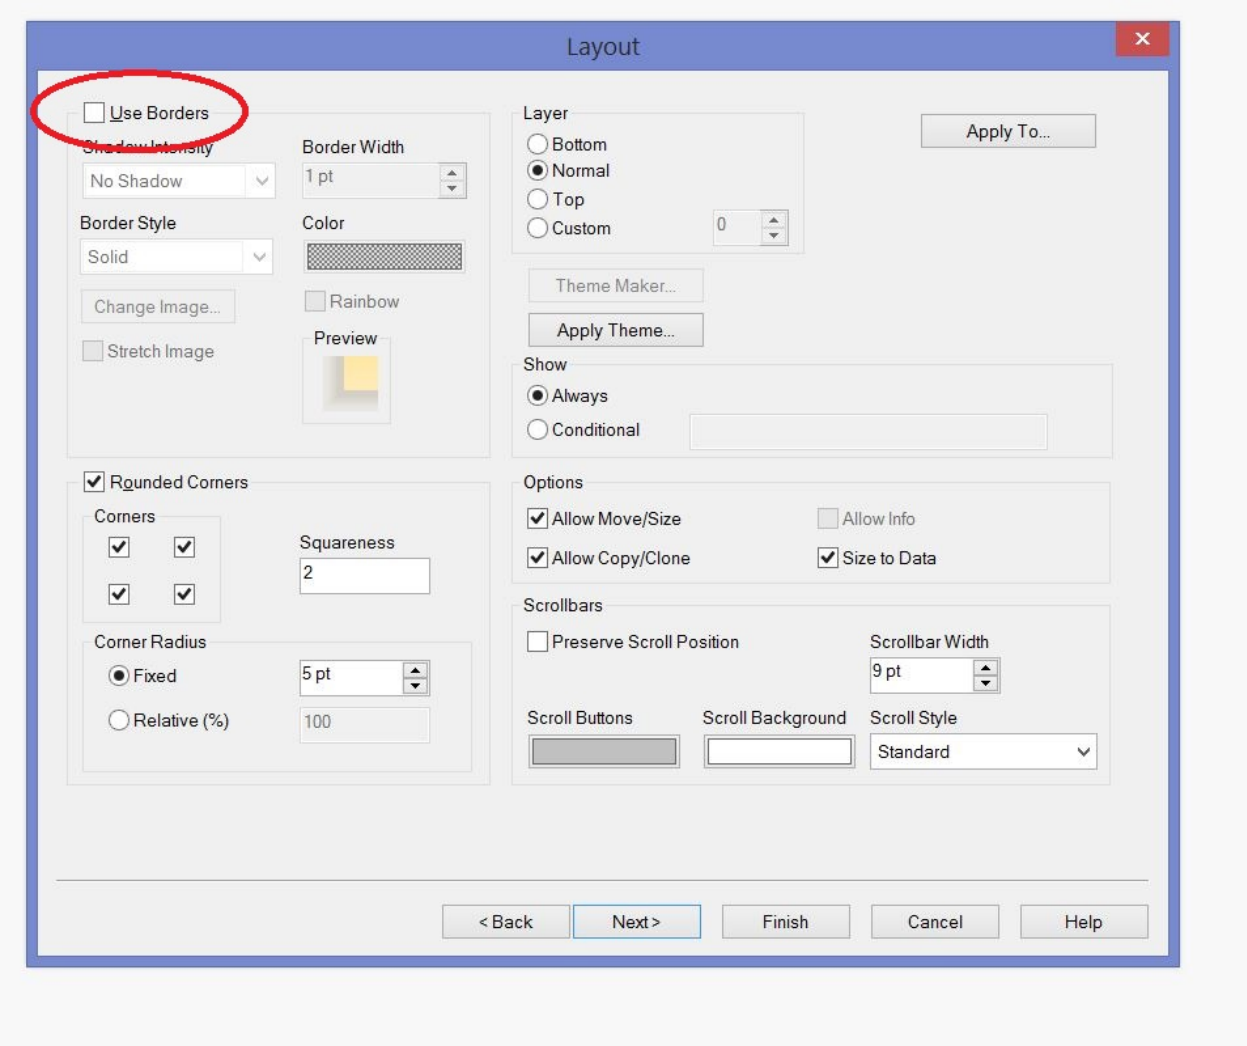
AMERICAN OVERSIGHT



3.2.9 The next page changes the font of the chart. For this demonstration we will leave these options unchanged. **Select the "Next" button.**

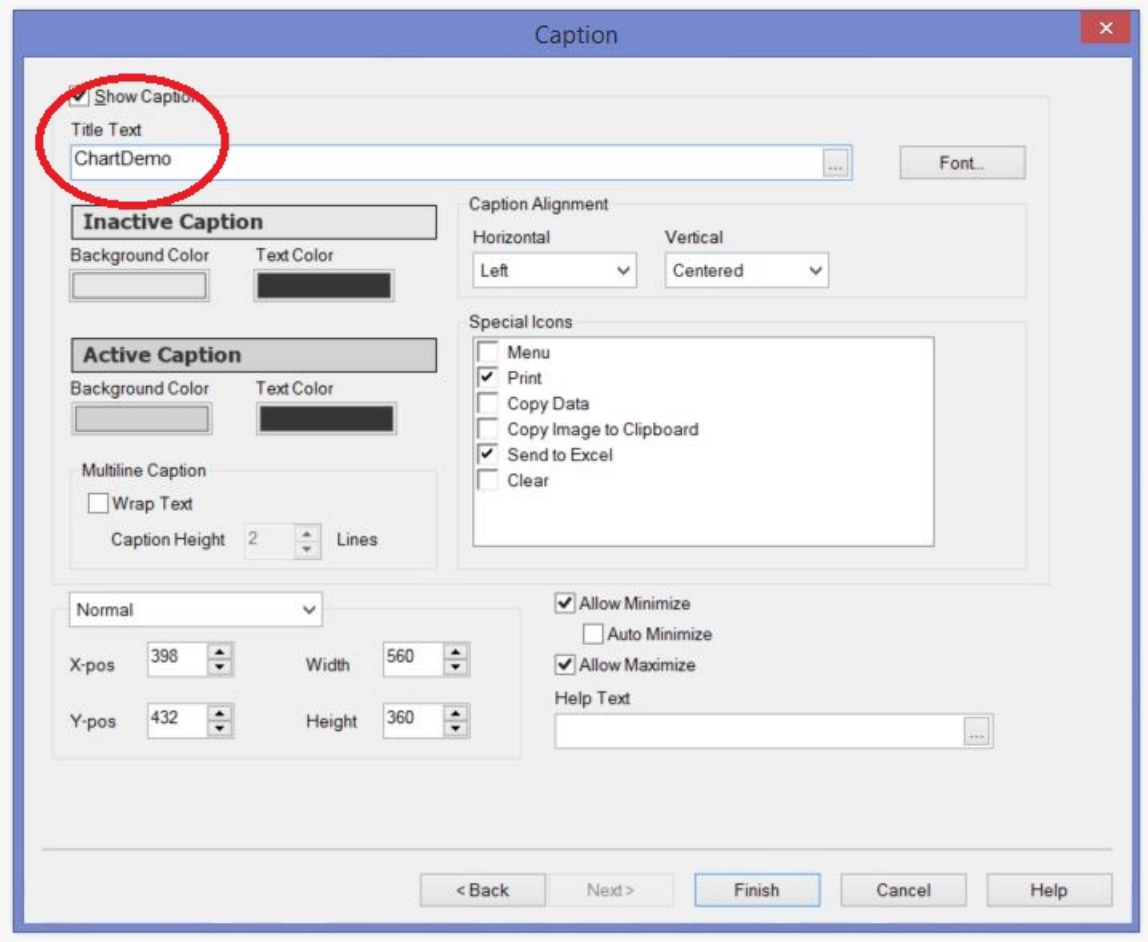
3.2.10 The layout page displays options for changing the object values of the chart (e.g. borders, layering). We do not want our chart to have borders. **Uncheck the "Use Borders" box on the top left of the chart. Select the "Next" button.**

AMERICAN OVERSIGHT



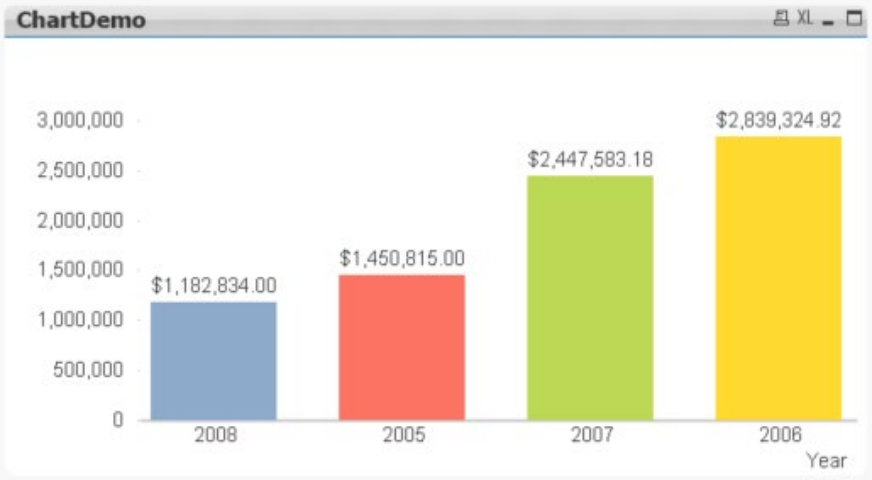
3.2.11 The last page controls the caption of the chart object. The caption will appear on the border of the chart and can display text. **Enter "ChartDemo" in the title text then select the "Finish" button.**

AMERICAN OVERSIGHT



3.2.12 The finished chart will display on the dashboard.

AMERICAN OVERSIGHT



AMERICAN OVERSIGHT

4.0 KEYBOARD SHORTCUTS

4.1 Qlikview Shortcuts

Shortcut	Result	Manual Button
CTRL + E	Qlikview Script Editor	CTRL + T	Qlikview Table Viewer/Data Model	CTRL + R	Reloads Qlikview Script	
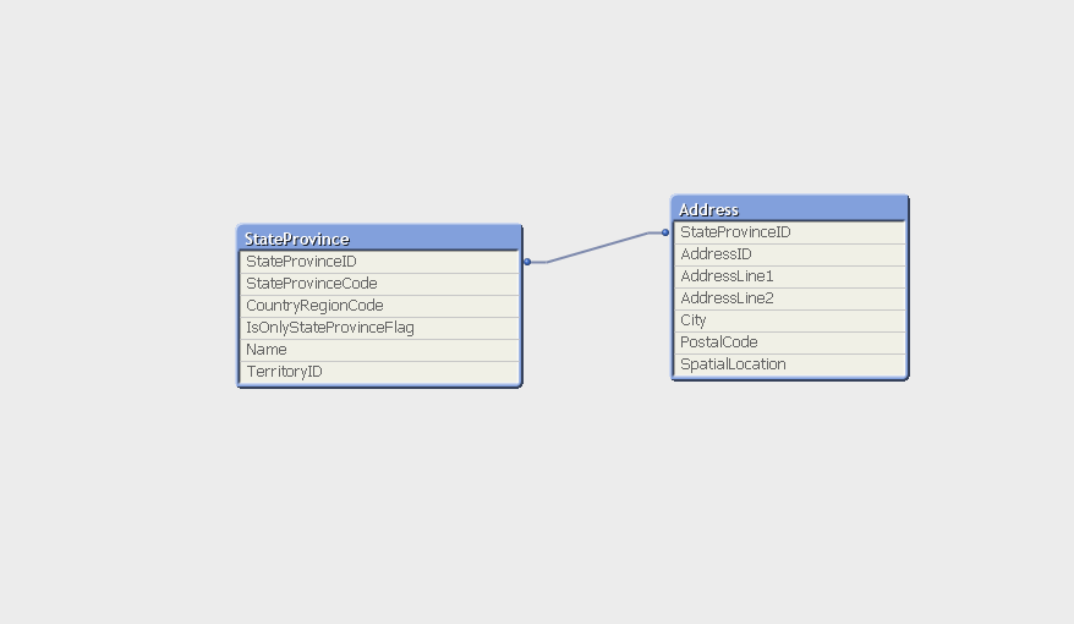
AMERICAN OVERSIGHT

5.0 APPENDIX

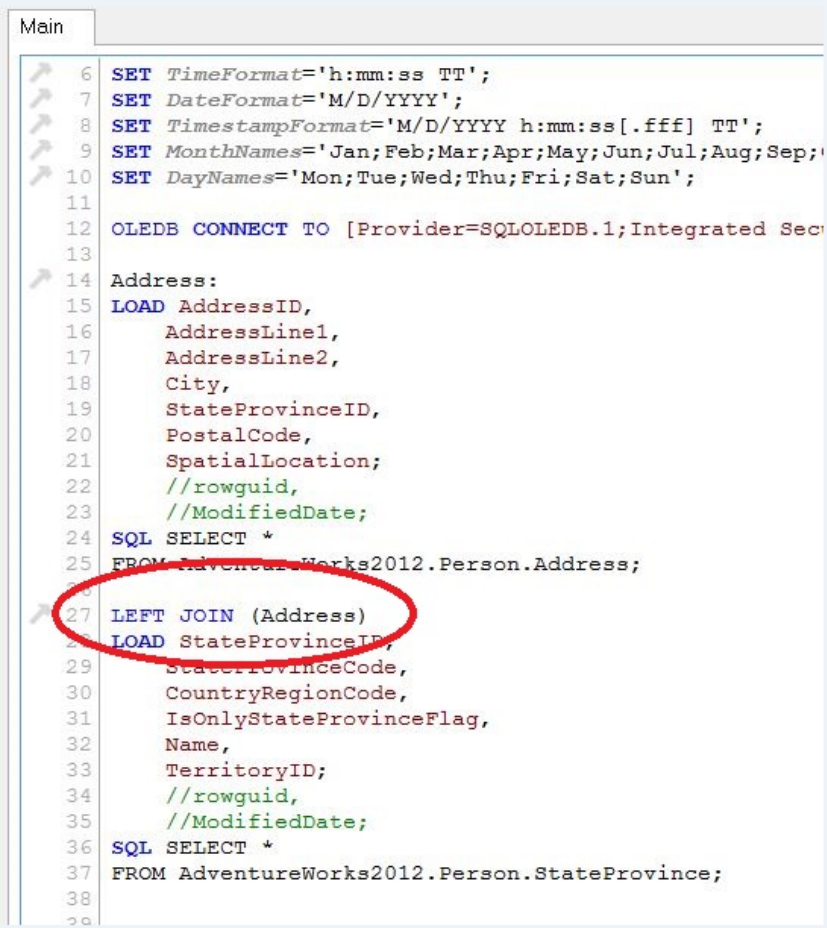
5.1 Qlikview Join Example

In a Qlikview document we have two location tables that are joined on “StateProvinceID”



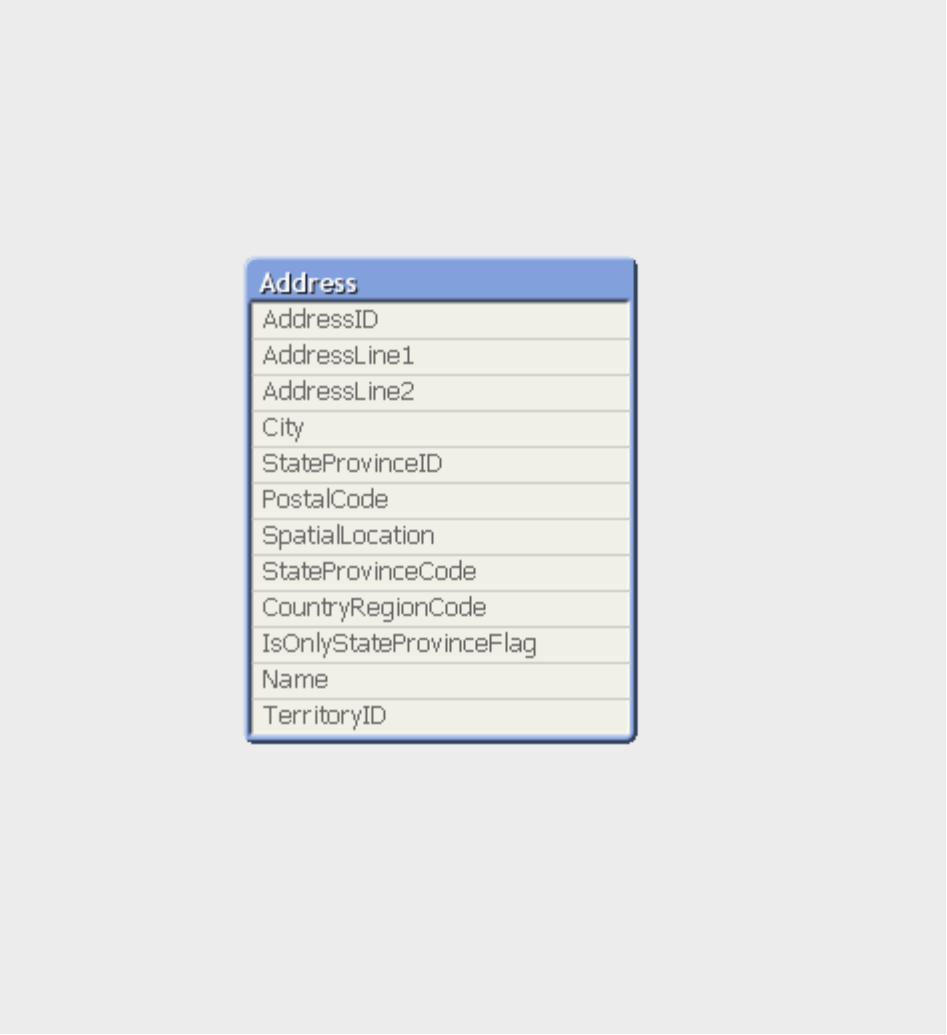
In the Qlikview script editor we write the following join statement. In the join statement we specify the table we are joining to. In this example, we are joining the StateProvince table to the Address table.

AMERICAN OVERSIGHT



Now back in the table viewer we see that the Address table has both the StateProvince and Address fields. Qlikview is reading this data as one table.

AMERICAN OVERSIGHT



5.2 Qlikview Accumulation

Accumulation is a calculation that involves other dimension totals.

Full accumulation: is a calculation that presents the current results plus all the prior results. For example, on the third dimension would be a combination of the 1^{st} + 2^{nd} + 3^{rd} dimension totals. It is a running total.

Step Back: Allows you to control how far back the running total should go. For example, step 3 back would be a combination of the 3^{rd} + 4^{th} + 5^{th} dimension totals.

AMERICAN OVERSIGHT

INTRODUCTION

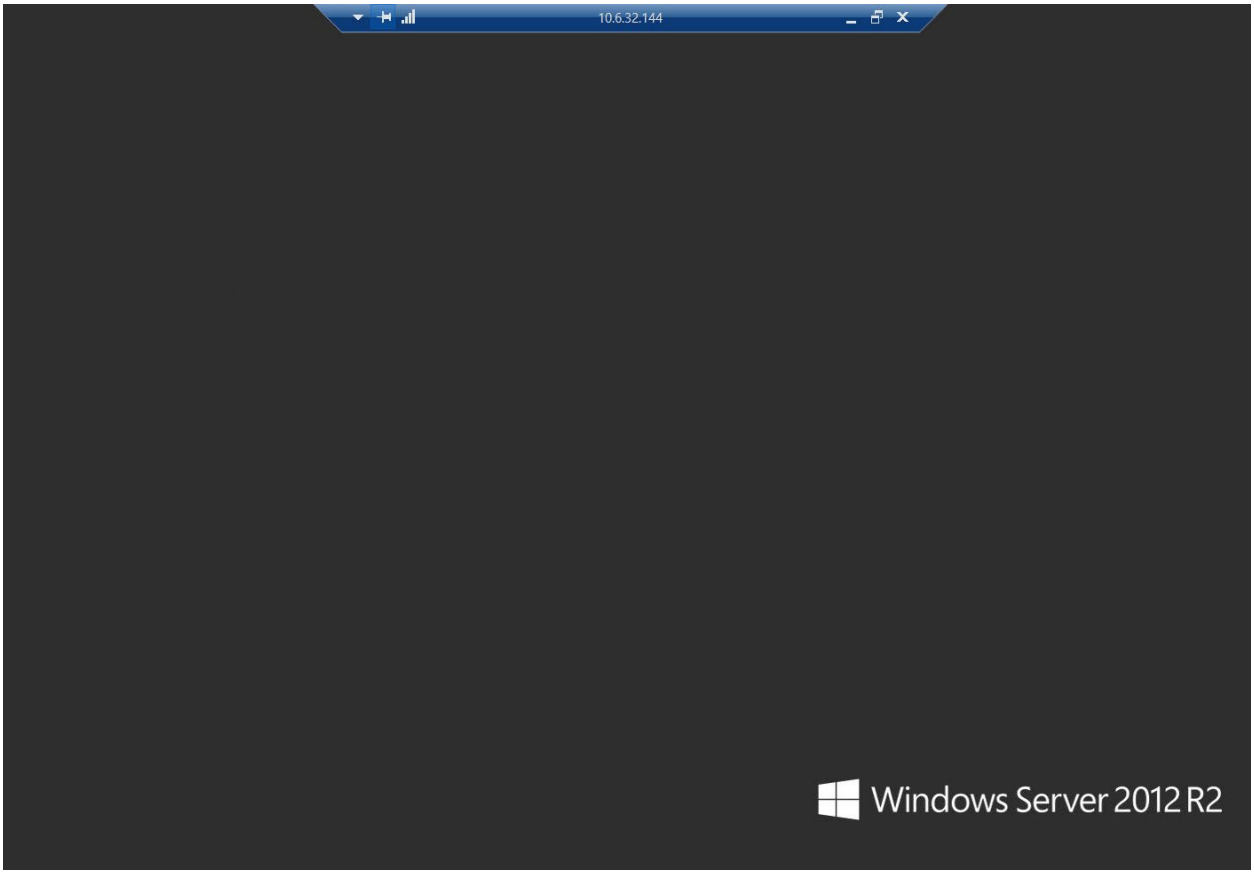
This document demonstrates how to use the Arizona Department of Corrections (ADC) Community Corrections Qlikview dashboard through steps and example user scenarios.

1.0 ASSIGNING QLIKVIEW NAMED CLIENT ACCESS LICENSES

The following steps will demonstrate how to access the Qlikview Management Console and the CAL license assignments page.

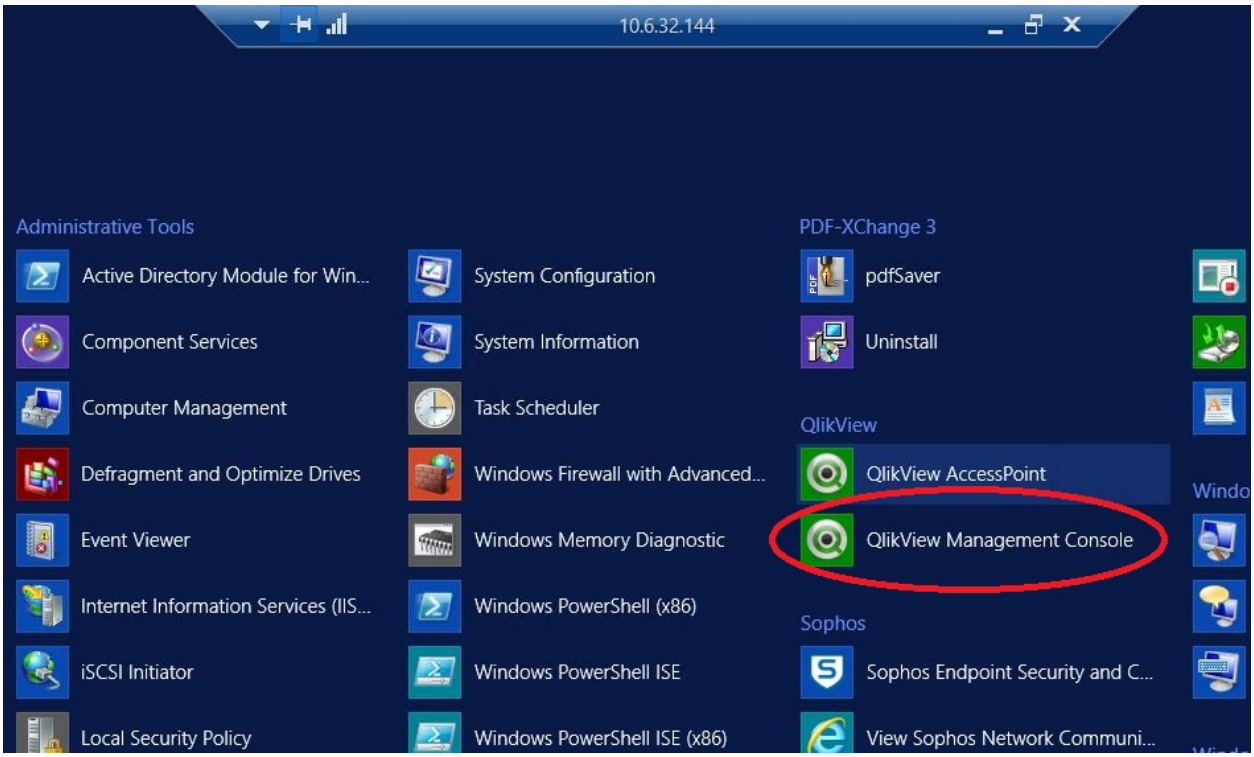
1.1 Opening the Qlikview Management Console

1.1.1 Log into the 10.6.32.144 Qlikview production server.



1.1.2 Navigate towards the applications menu and select “Qlikview Management Console”

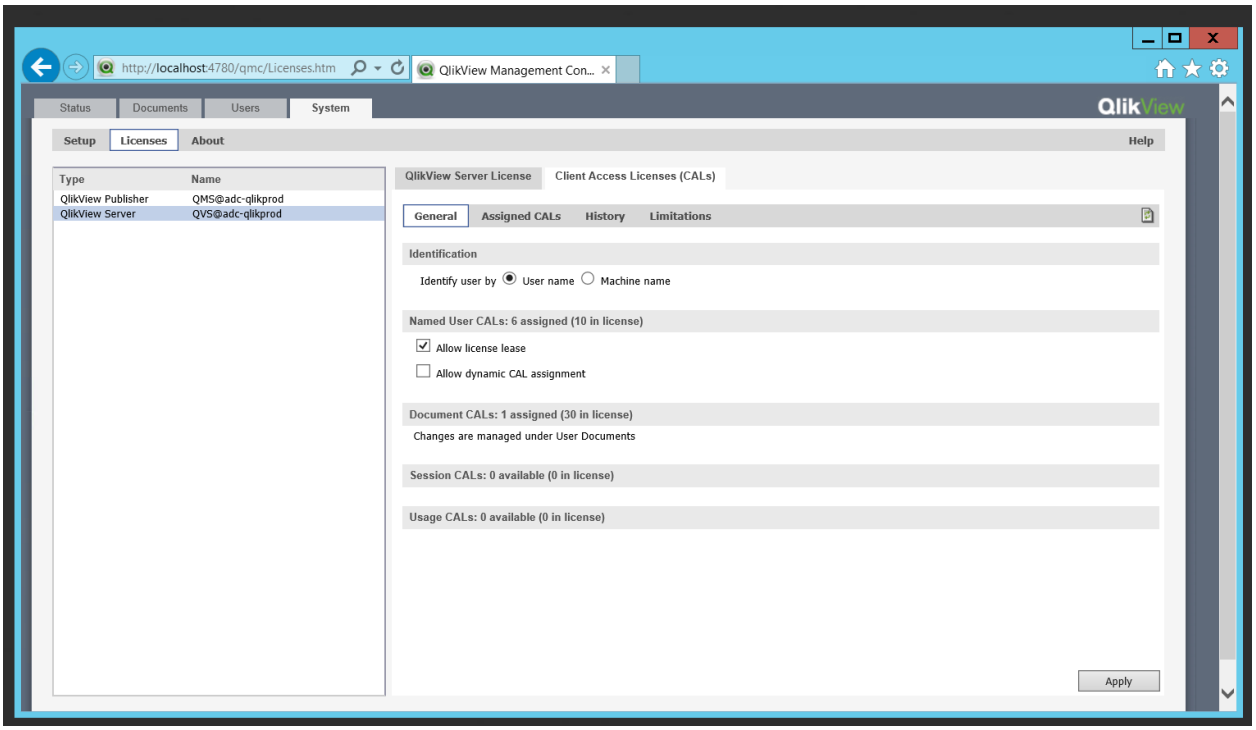
AMERICAN OVERSIGHT



1.2 Modifying the Qlikview named CAL access list

1.2.1 In the Qlikview Management Console, navigate to the System tab, then select “Licenses.” Select the “Qlikview Server” from the type list displayed. The license options will display on the right side of the screen.

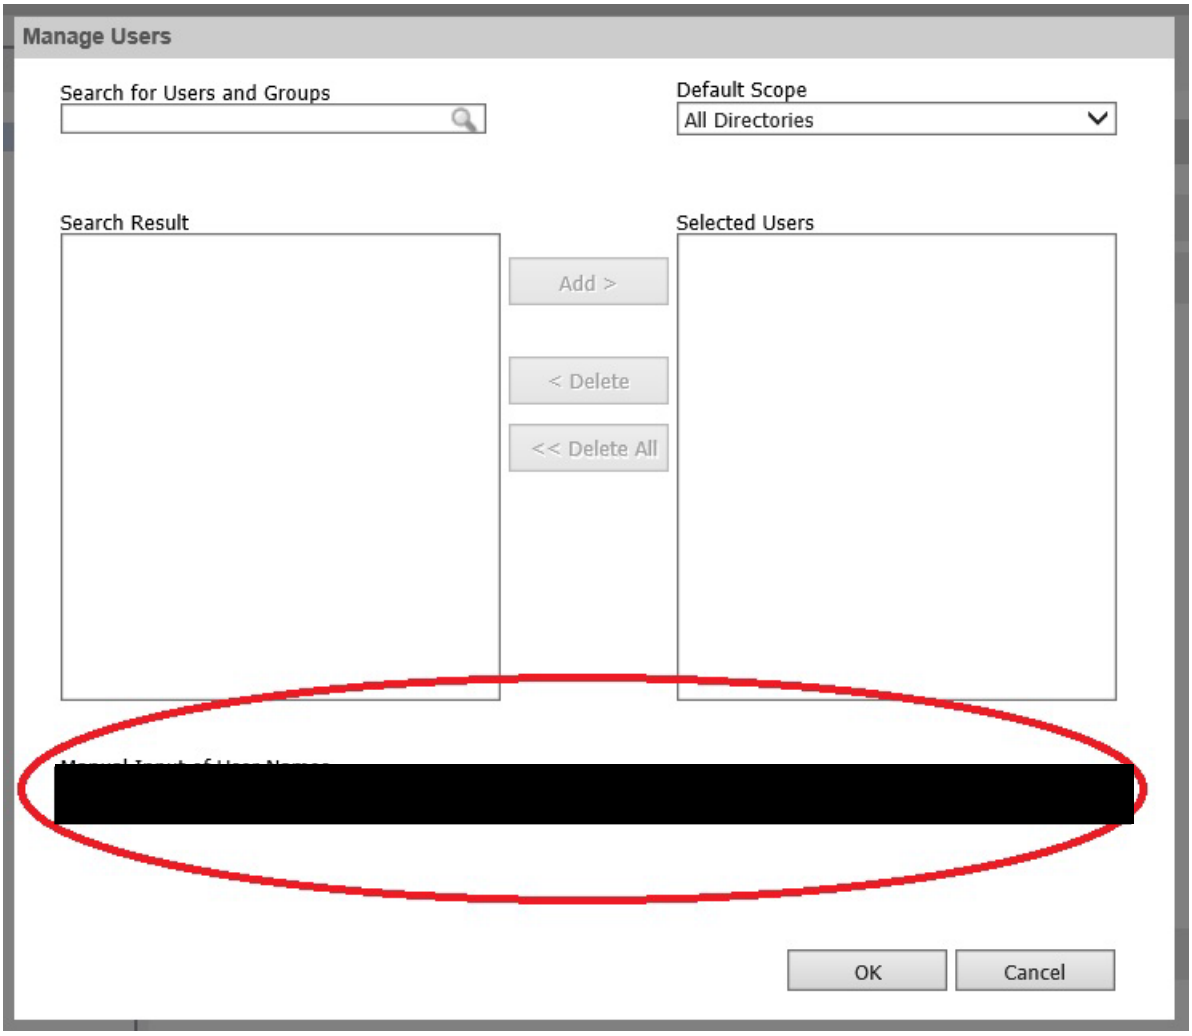
AMERICAN OVERSIGHT



1.2.2 Select “Assigned CALs” to display all the users assigned a named CAL in Qlikview. Then select the manage users icon on the right.

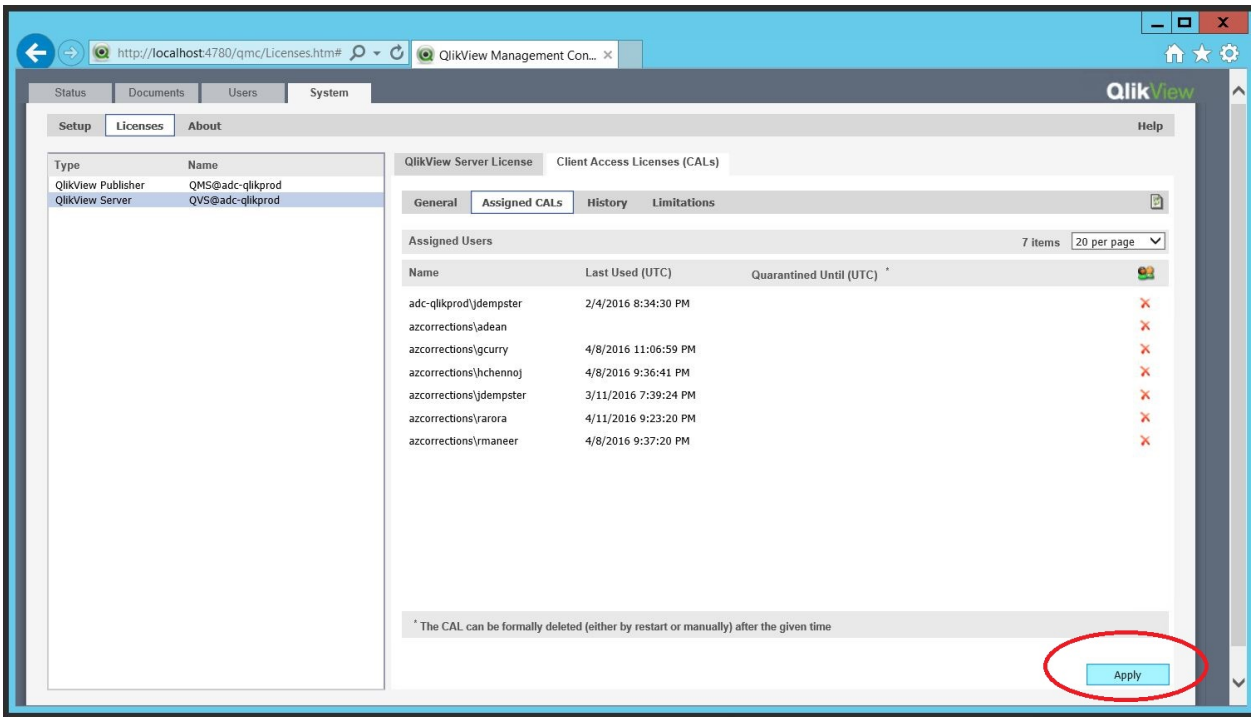
1.2.3 To add or remove a user from the named CAL list, delete or type out the username and domain of the user under the “Manual Input of User Names” box. The format should follow this example: “azcorrections\hchennoj” Each username is separated by “;” When finished select “Ok.”

AMERICAN OVERSIGHT



1.2.4 The updated list of named CAL user will now display. Select “Apply” to save the changes to the named CAL list.

AMERICAN OVERSIGHT

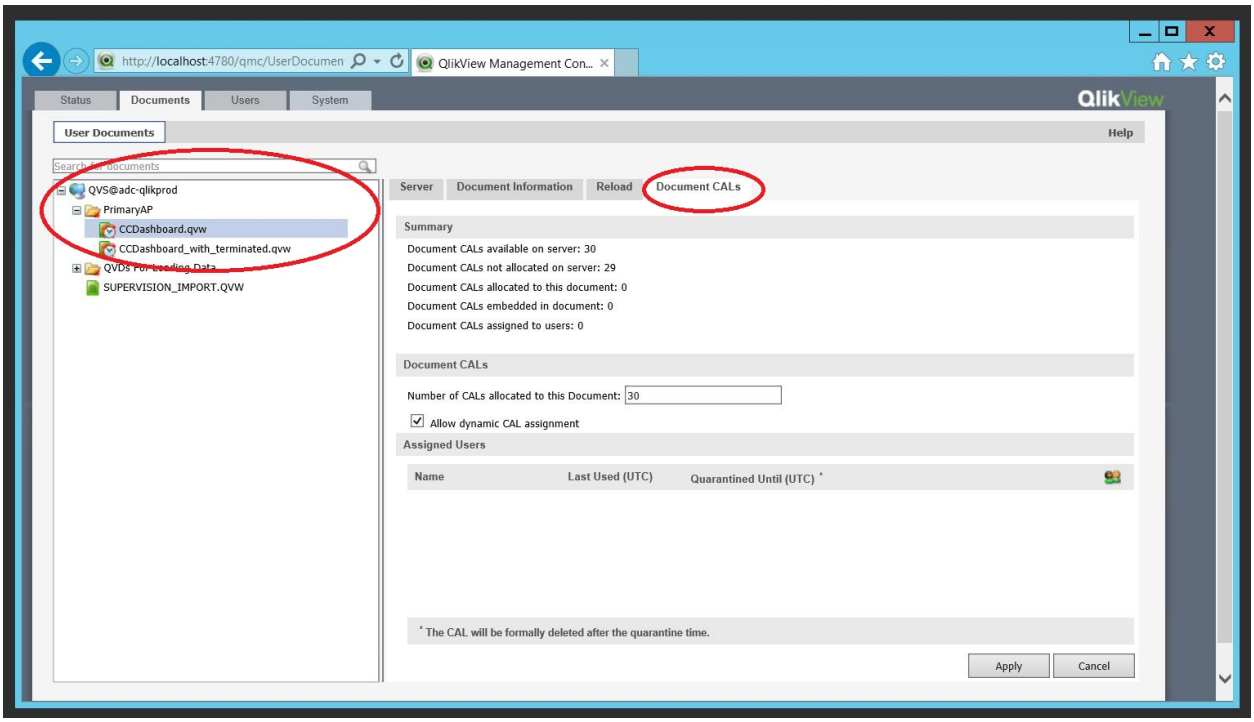


2.0 ASSIGNING QLIKVIEW DOCUMENT CLIENT ACCESS LICENSES

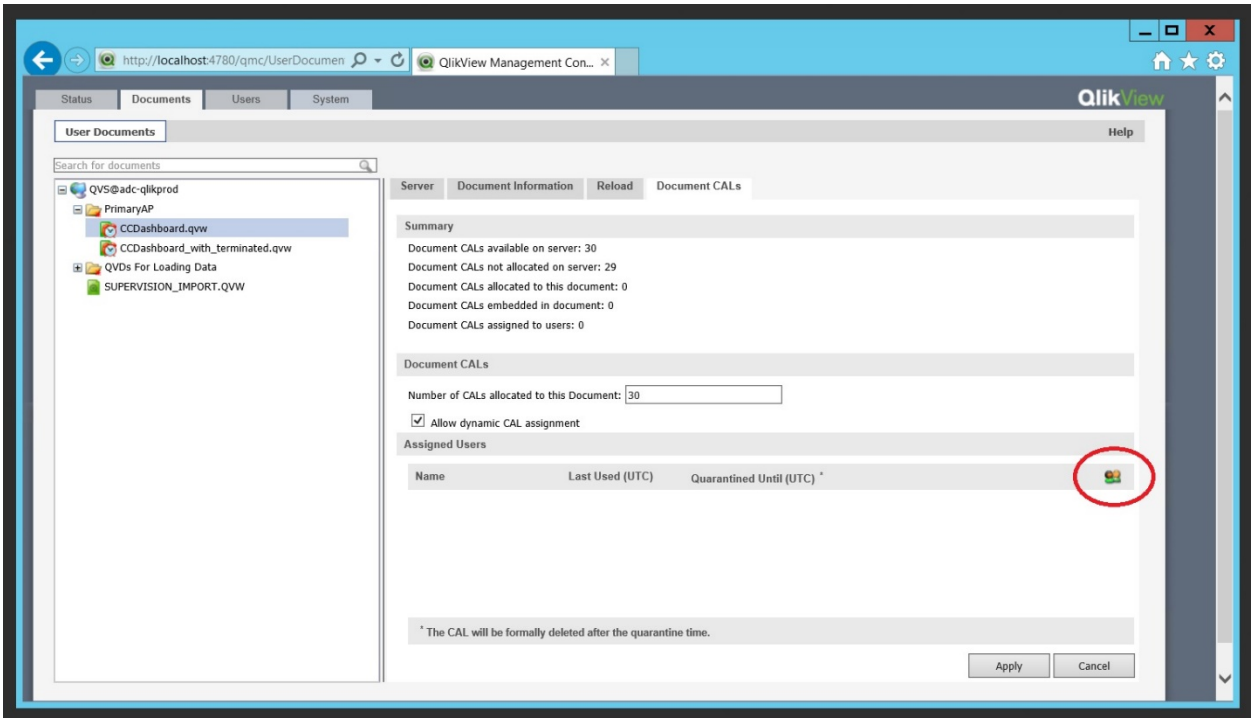
2.1 Modifying the Qlikview document CAL access list

2.1.1 In the Qlikview management console, first navigate to the documents tab. In the “PrimaryAP” folder select the Qlikview document you wish to grant access, and then select the “Document CALs” tab.

AMERICAN OVERSIGHT

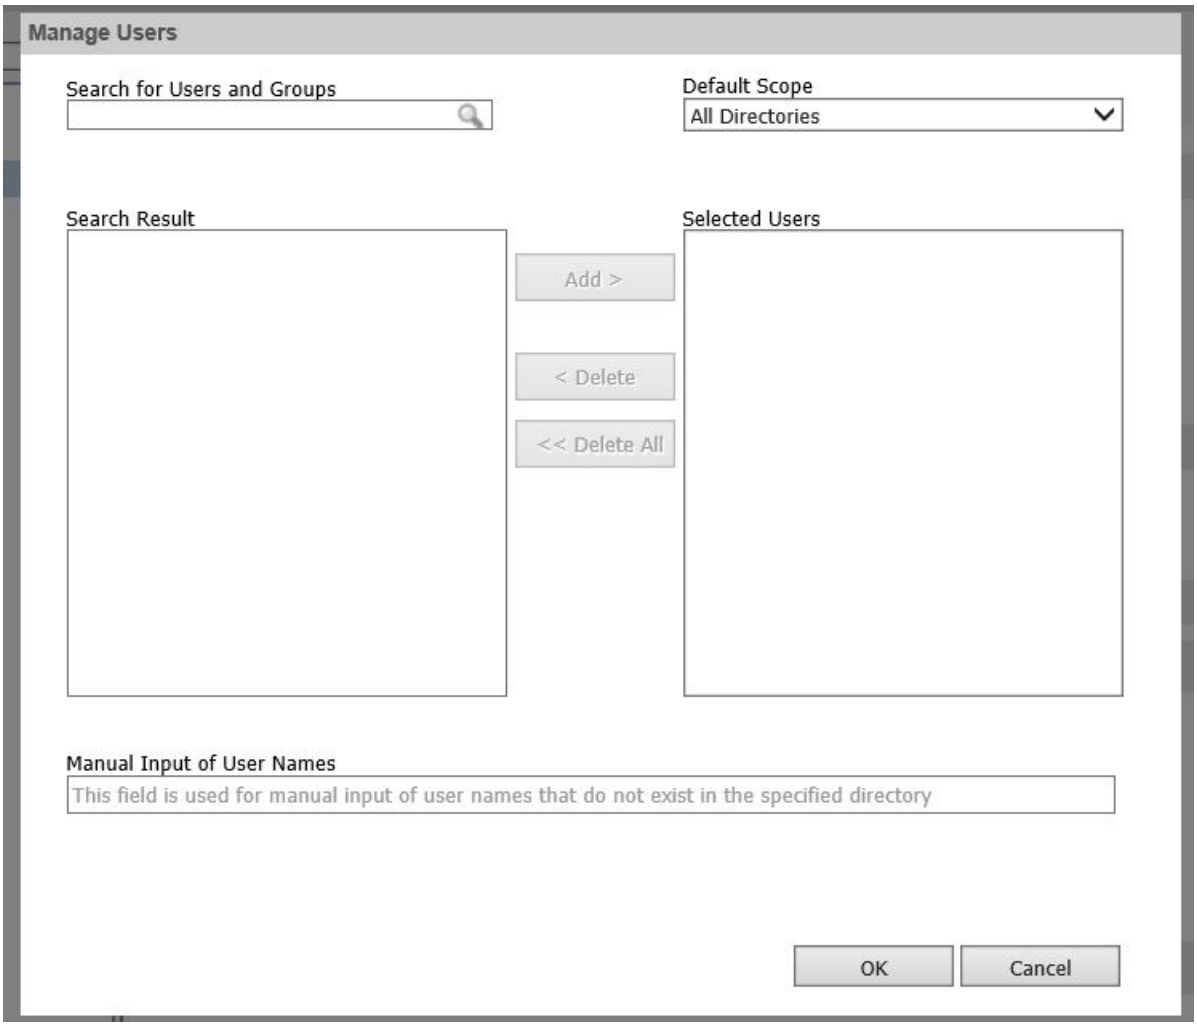


2.1.2 Ensure that the allocation document CAL box is populated with the appropriate number of users for this document. Then select the manage users icon on the right.



AMERICAN OVERSIGHT

2.1.3 To add or remove a user from the named CAL list, delete or type out the username and domain of the user under the “Manual Input of User Names” box. The format should follow this example: “azcorrections\hchennoj” Each username is separated by “;” When finished select “Ok.”



2.1.4 The updated list of document CAL user will now display. Select “Apply” to save the changes to the document CAL list.

AMERICAN OVERSIGHT

REFRESH PROCESS for ADC Community Corrections Dashboard

Rick Arora March 2016

Purpose of QlikView Management Console on [redacted]

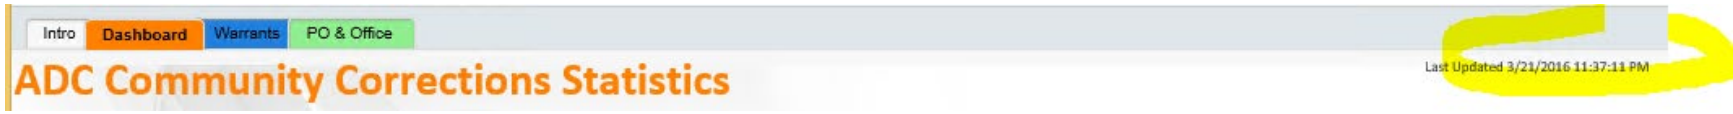
The purpose of the scheduler is to load data from the ADC Data Warehouse on a daily basis automatically so manual intervention is only needed when there are exceptions or changes required. The schedules is based on time and on prior job completion. The process starts at 8 am every day after the PCAIMS, Releases & Warrants data is copied from the mainframe to the client server for ADC. Selected data is then transformed and cleansed and imported into the ADC Data Warehouse. The QlikView application uses the clean data from the ADC Data Warehouse for display of statistics to the ADC Management team.

Flow of data from Source to Destination

PCAIMS, Releases, Warrants data from Mainframe → PCAIMS Client Server→ ADC Data Warehouse→ ADC QlikView Import → ADC Dashboard

Refresh of data in the Community Corrections Dashboard

The reload of the dashboard is displayed by the "Last Updated" date on the right top of the ADC Community Corrections Dashboard. If the date is more than one day old then analysis and investigation is needed to determine the root cause of why the data was not refreshed. This document details the steps to start the investigation process.

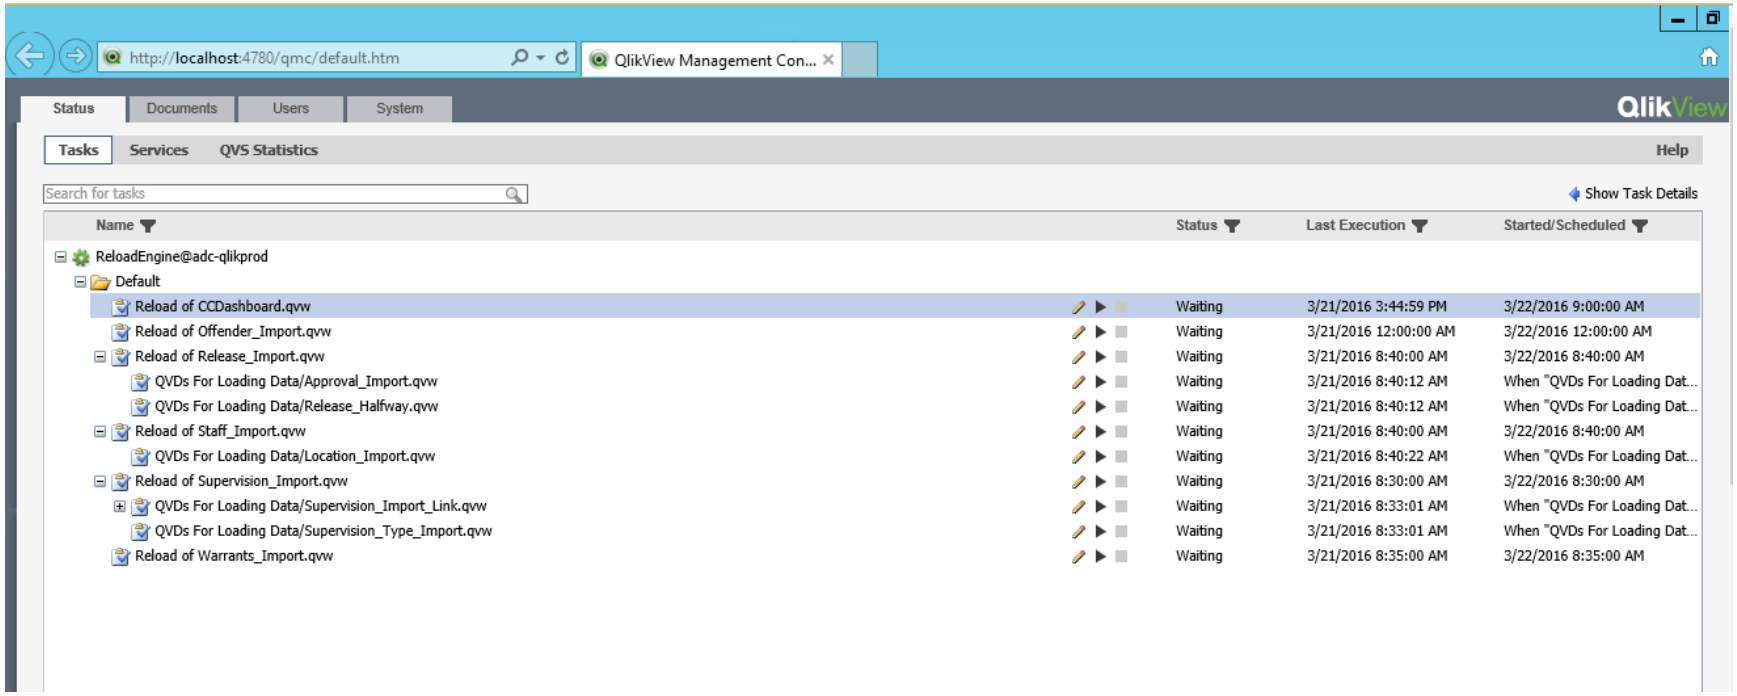


Overview of Job scheduling to reload data

- The reload process is setup on server [redacted] in the QlikView Management Console
- The reload or refresh of data in the QlikView dashboard is an automated process that is depended on several import jobs in QMC, QlikView Management Console & on the time of the day.
- There are a total of 12 jobs or qvw loads for the dashboard
- The separation provides easy debugging and keeps performance at its highest level
- The data is loaded into binary format and read by the QlikView dashboard to display more than 25 years of information

AMERICAN OVERSIGHT

- The main dashboard load is of the “CCDashboard.qvw” displayed on the top of the scheduled jobs.
- The jobs are scheduled based on time and on Dependency starting at 8:00 am every morning
- The offender, warrant, release, facility, staff, supervision& Gain Loss information needs to be imported BEFORE the main Dashboard job (CCDashboard.qvw) can be refreshed.
- If one of the preceding jobs fail then its best to rerun all the jobs again to be sure to load all data
- The scheduling starts at 8:00 am after the data is copied from the mainframe to the client server for ADC, client server to the Data Warehouse
- Failure of reload steps will be signified by a red **X**
- Success of reload steps will be displayed by a neutral color as displayed below and Status of “Waiting” for the next day of refresh
- Import qlikview documents are stored on the server in folder E:\Qlik\Production\3_Transformation\QVD
- The main dashboard CCDashboard.qvw is stored on the server in the folder E:\Qlik\Production\AccessPoint



AMERICAN OVERSIGHT

Schedule of Reload – Daily (Dependencies and Timing)

Supervision Import Link with new enddt NEWMETHODWITHJOIN– 8:30 am → Triggers Supervision Import ,Master calendar, Supervision Type

Master Calendar Import → Triggers CCDashboardRevised

Warrants Import -8:00 am

Staff Import – 8:00 am → Triggers Location Import

Release Import – 8:00 am → Triggers Release Halfway , Approval Import

Offender Import - 8:00 am

Description/Purpose of Import Job

Supervision Import- Imports Gain Loss data from the PCAIMS Database

Supervision Import Link – Imports Supervision population, begin and end dates for Supervision

Master Calendar – Creates a calendar so the user can select a date range or a calendar date or year or Quarter for analysis

Supervision Type – Imports the latest Supervision Level of Min, Max, Intense for the Offender from PCAIMS Database

Warrants Import- Imports the Warrants information for different warrant types and warrant dates for analysis from the Warrants Database

Staff Import- Imports the Staff information, SID Numbers and the Manager information for the ADC locations and facilities from PCAIMS Database

Location Import- Imports the address and type of facility from PCAIMS Database

Release Import- Imports release information from Releases Database, total releases & release category

Release Halfway – Imports releases related to offenders in Halfway houses from Release Database

Approval Import- Imports the Release Pre Release Investigation that have been approved before release of offender from Release Database

Offender Import – Imports information about offender, their demographics, offenses, education and background information from PCAIMS Database

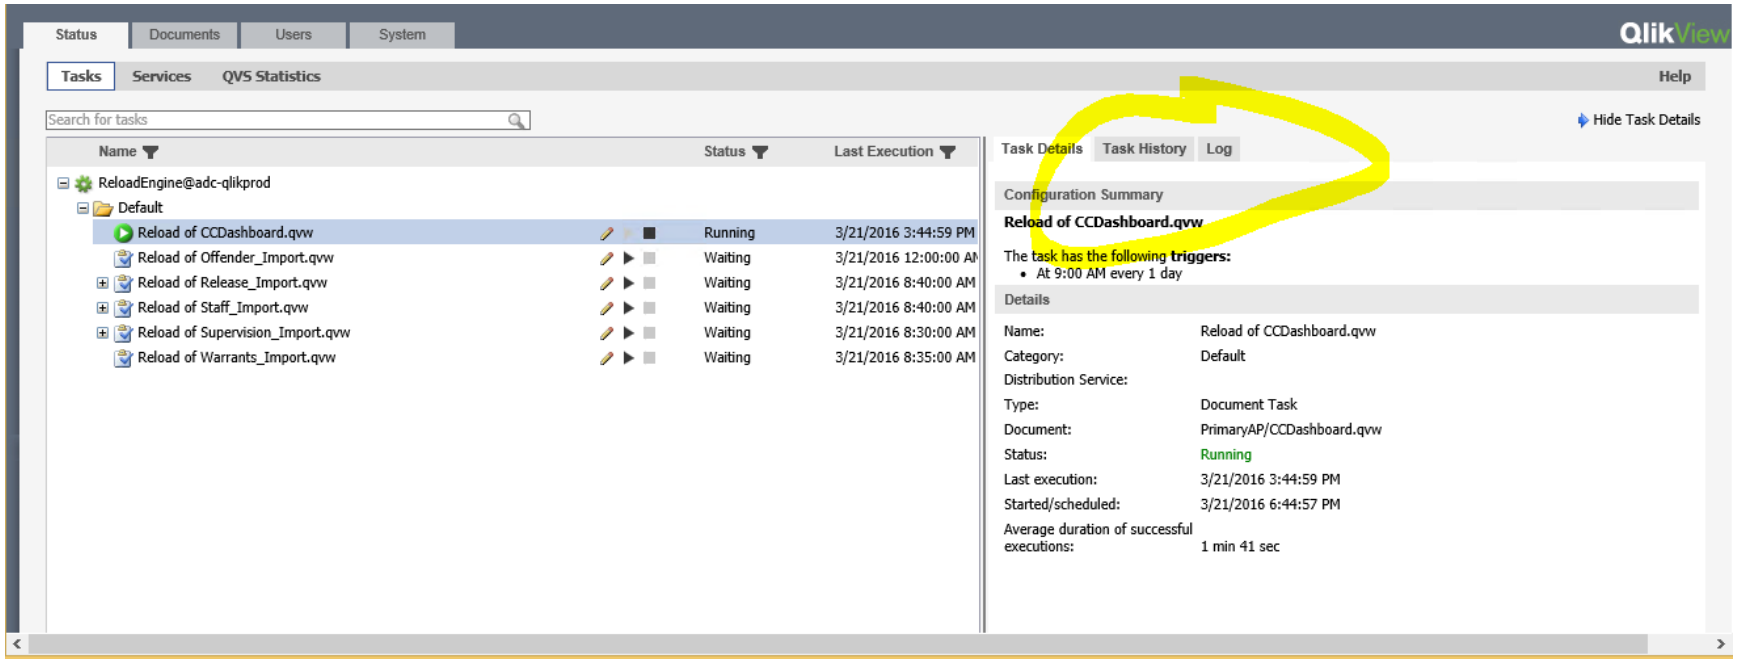
AMERICAN OVERSIGHT

Folder Location for QlikView Code

E:\Qlik\Production\3_Transformation\QVD – All the import code lives here and is not visible to the users – 11 Qvws

E:\Qlik\Production\AccessPoint- the main dashboard lives here and IS visible to the user → CCDashboard.qvw

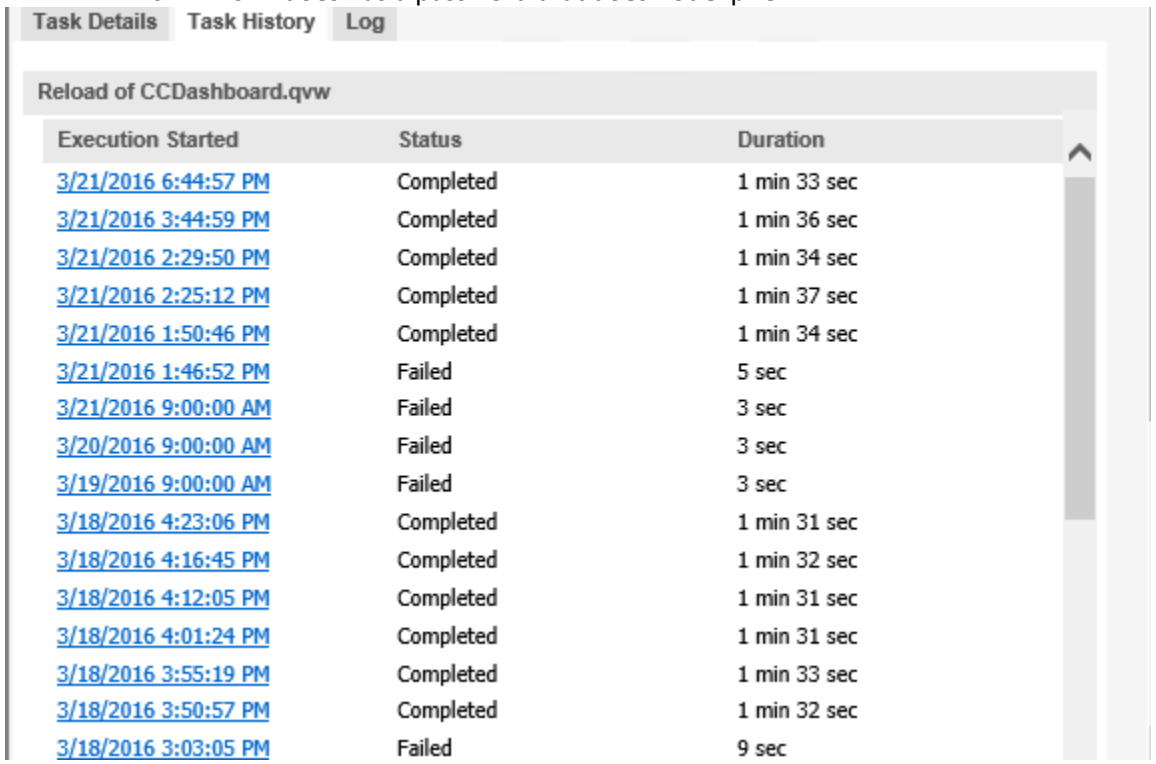
Operational steps and Troubleshooting Tips



- The task details, task history and Log can provide information about the failure or success of the job to reload data
- Its best to turn additional logging on for the qvw to find detailed errors
- If column names are removed from the tables then the jobs will fail with errors

AMERICAN OVERSIGHT

- If access is removed from the userid then the jobs will fail with the appropriate login errors
- If syntax errors are introduced in the code then the job will fail with errors
- The Userid "`Qlikview_User`" is used to connect to the database and load the data for the dashboard
    - This ID does has a password that does not expire



Task Details | Task History | Log

Reload of CCDashboard.qvw

DRUG Testing Information Update on QlikView Dashboard

The Drug Testing results are updated based on an excel spreadsheet located on the shared server folder adc-qlikprod\cc_po_manualstats\TASC_Drug_stats.xlsx

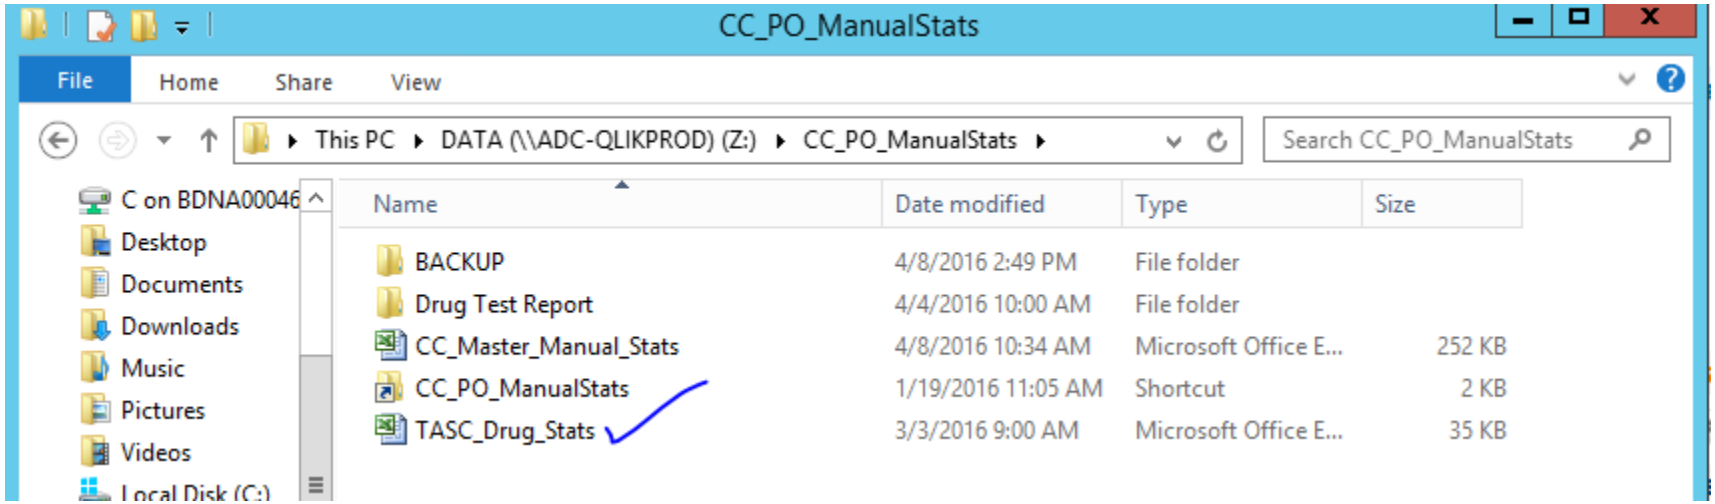
Steps to Update the information:

Archive the old spreadsheet as TASC_Drug_stats_old.xlsx

Load a new spreadsheet in the folder

The name of the spreadsheet should be the same as before with no changes TASC_Drug_stats.xlsx

Reload the CCDashboard.qvw via the management console or wait till the next day when the data is automatically refreshed



AMERICAN OVERSIGHT

SECURITY FOR QLIKVIEW USERS FOR ADC Community Corrections Dashboard

Rick Arora March 2016

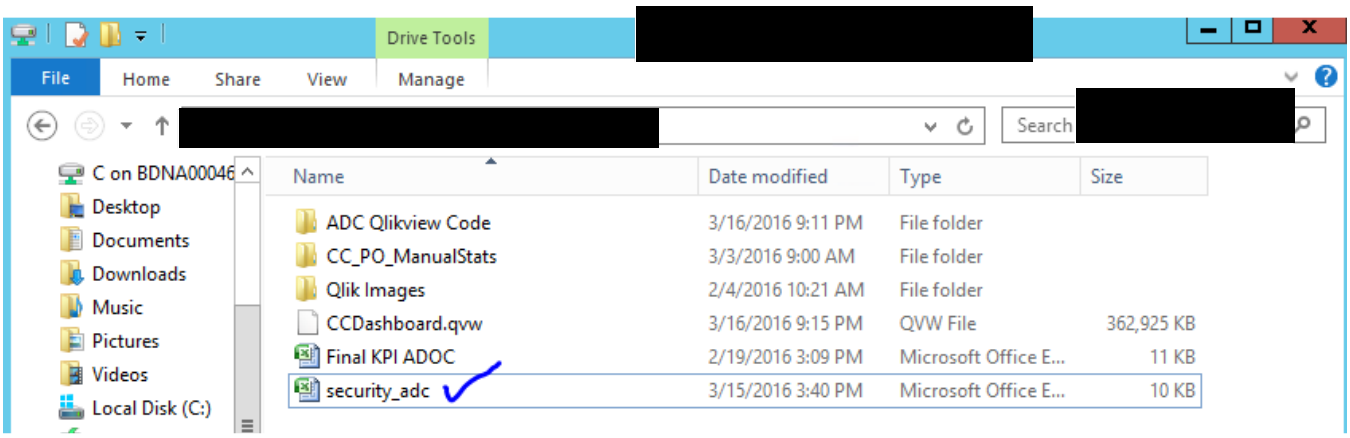
Overview

The security of the ADC Community Corrections dashboard can be maintained by a spreadsheet that is stored on the shared folder \[redacted]

PLEASE NOTE: The format of the spreadsheet should not be modified and the column names should not be modified. The content of the spreadsheet CAN be modified to maintain access.

Step 1

Open the spreadsheet "security_adc.xlsx"



Step 2

There are 3 columns that can be modified

1. User – this is access level – **User of Admin**
2. Userid – the userid it can be any id or the ADC id //e.g. rarora
3. Password – this can be any password that the admin or the user selects

	A	B	C
1	user	USERID	PASSWORD

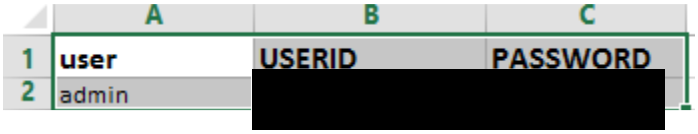
Access to QlikView documents can be authorized for specified users or groups of users. In the security table, users can be assigned to the access levels ADMIN or USER. If no access level is assigned, the user cannot open the QlikView document.
A person with ADMIN access can change everything in the document. Using the **Security** page in the **Document**

AMERICAN OVERSIGHT

Properties and **Sheet Properties** dialogs, a person with ADMIN access can limit the users' possibilities of modifying the document. A person with USER privileges cannot access the **Security** pages.

Step 3

46 users provided by Holly Dorman and Andrew Dean are already in the spreadsheet and are users with access to the QlikView Dashboard. **Please add or remove members carefully**!



Step 4

The spreadsheet maintains security for the ADC Community Corrections dashboard ONLY.

New dashboards will need separate security.

Step 5

Security Access will generally take 1 day to process. This can be expedited if the specific dashboard is refreshed manually. If not the change to the spreadsheet will take effect the next day at 8:30 am in the morning when the data automatically refreshes via the QlikView Management console on QlikView production server [redacted]

For manual update of the user – you can manually execute the main dashboard qvw CCDashboard.qvw and this reload will add the new user to the security group for the specific dashboard.

Thanks, Marissa.

Hi Michael and Hung-

The full set of KeepTrak files will need to be sent post 17:00 on Thursday, 11/14.

The full set of PC AIMS files (27 folders) are expected to be downloaded and delivered to Michael for transfer late Friday evening (COB). We will need to begin the process of transferring those files once received. I will look to the two of you to coordinate the transfer to B&D (Keefe) and circle back with me regarding the estimation of delivery.

Respectfully,

Holly Greene

> Hi Holly:

AMERICAN OVERSIGHT

Yes, Keefe is going to perform the refresh starting on Friday and if the files are pulled at 5pm on 11/14/19 then all transactions in AIMS are captured up until that point, which if Keefe performs a refresh it will allow KeepTrak and AIMS to stay pretty close in sync.

Thank you.

Yes - cleared it all up. Thank you.

The full set of Keefe files can be sent at any time and will not impact the transfer of full set of PC AIMS files. That said, is there a particular reason we're waiting for 11/14? If so, what time do they need to be sent to B&D or Keefe on 11/14?

Respectfully,

Holly Greene

Hi Marissa-

Sorry, I responded to your earlier email because this one took a bit to get through to me. Either way, my responses are in the previous email and below. I added my team to this communication to keep them informed and allow them to respond as appropriate.

1. The schedule below shows ADC pulling DOC O tomorrow (Thursday and delivering it to B&D by EOD 11/7/19). Is my understanding correct? **- Yes.**
2. ADC is only providing delta's for the files, correct? **- Yes.**
3. Is ADC prepared to provide Keefe will all 6 full files so that ADC can use them to execute a refresh? **- If the full for Keefe is requested, we can certainly do so, but I think this would need to be discussed. However, with the timing of transmission previously, I don't see this as an issue. I will defer to Michael.**
4. When would ADC be able to provide B&D with a full set of all files (preferably as soon as possible without impacting migration activities)? **- I've confirmed that we haven't really sent a full set in quite some time, so it's grown/changed since. Last time the packaging and transmission took 17hrs. We can begin the process on Tuesday (Monday is a holiday).**

Respectfully,

Holly Greene

Subject: RE: Reports plan for this week
Date: Monday, November 11, 2019 8:11:17 AM
Attachments: image002.png

Good Morning Mike,

Spencer and I worked on the email he sent Friday afternoon @ 3:52pm. I think it outlines a good strategy for the week working with Greg and Chuck. We will have Alan and Hagay onsite working with Greg as well as Sunil (lead developer for IPR Reports), Vaishnavi (lead developer for Front End Telerik), and Scott (Team Lead) working remotely on IPR.

The team is working today so we can hit the ground running tomorrow.

While I understand Greg's concerns and frustrations, I disagree with him. It is requiring lengthy discussions to ascertain the issues Greg sees in the reports and timely investigations on both sides before a solution can be found. The reports have passed QA in UAT on the BND side when they make it over to ADC. Greg had to re-write 4 questionnaire documents in order to fix reports that he deemed were built incorrectly. Numerous times we have heard from both Greg and Ops that the *AIMS* report was broken or not running correctly in the legacy system. That paired with the fact that we are being held to a higher standard of development than any other project I have been a part of (100% accuracy on a system that isn't 100% accurate itself *AIMS*) means we will continue to encounter frustration on both sides.

This past week, Hagay worked with Greg and Chuck throughout the day(s) and Greg reported out that he was frustrated by the lack of effort on our side?

None of the above are excuses. We will continue to work with Greg and Chuck daily in order to get the reports accepted for Go Live. I always welcome suggestions and will make sure we are doing everything we can to make this process as easy and straight forward as possible for Greg and Chuck here on out.

Thank you.

Charles Spannagel

Subject: Reports plan for this week

Charles,
Per our discussion on Friday, have you and Spencer who is available from B&D and what reports should be worked on with Greg Denning and Chuck? We had discussed a rough plan of getting the 9 that have been tested and have bugs cleared this week, and have Greg at least test the other 7. I don't know if you are working today but if you are, can you please let me know how that is going? I had in mind an email that you and Spencer author that goes to Karen, and copied to me and Dwight. You also had some thoughts on how to improve Greg's reviews that is to be included. Also, for your edification, Karen shared that Greg's frustration continues with reports being returned that have obvious flaws (e.g. significant differences to AIMS reports). While I understand there may be good reasons for the discrepancies, what I am hearing is that if your developers or you (or best in person) contacted Greg first, noted the significant differences in results, it would help the conversations.

I want to hit the ground running tomorrow.

I appreciate your efforts.

Mike

Hi Mr. Kearns:

The issue log is reviewed every Tuesday and Thursday with John Vitale and the Keefe group, ADC, and B&D. John is very aware of all items on this issue log and each of the items assigned to Keefe have an action item in place. The groups also communicate via email throughout the week. George Martinez has been assigned as the person responsible for the updating and management of the issue log.

Item #96 was reviewed during our call on Thursday and it was an issue with the parameter date being selected by the users. John Vitale clarified this point to both Lynda Wade and Linda Finchum during our call. The issue remained open to allow Lynda Wade and Linda Finchum to retest and confirm that addressed the issue with the report. I think it was an oversight that the comments didn't get updated during the call. George will review this item on Tuesday with Keefe and ADC can confirm it has been resolved and should be able to close the issue.

Thank you.

Subject: RE: KeepTrak Update

Marissa and Dean,
Has this been forwarded to John Vitale? If not, could you please do so? I would greatly appreciate if you both and John could discuss this on Monday, especially the spreadsheet attached, as it appears in my quick review that there are a number of items that need to be fixed, and some with no comment (See ID 96).

Mike

Subject: KeepTrak Update

Hello All:

Please find below the latest status update for KeepTrak. Please note there are 2 separate iterations of KeepTrak for Inmate's and Offenders so I have provided a separate update for each respective iteration.

KeepTrak Inmate Trust:

Active Inmate Bug 40050: Resolved and will be implemented in PROD upon next push to PROD (scheduled for evening of 11/8/19):

- B&D will coordinate testing with ADC. Testing will take a couple of days as the information needs to be updated in AIMS2 and confirm it is updated correctly in KeepTrak the next day.
- If testing scenarios pass successfully B&D will run the KeepTrak loader to update all statuses in KeepTrak for all Inmates so that Inmates with status "Temp Absent, Out to Court, etc." will show up as Active in KeepTrak.

Payroll:

- Payroll meeting occurred this week between B&D and ADC
  - Confirmed payroll post schedules were in alignment
  - 2130 WIPP Pay Detail Report is available for WIPP Officers and Banker's to test with. Full Summary version of report will be run on scheduled timeline the day before the post date, which is in line with current AIMS process for the report.
  - Lynda Wade and Michele Simmons are working together to input and confirm all Payroll Accounting Events are entered into AIMS2 either through Perryville dual entry or using another prison to ensure all Accounting Events have been tested and confirmed when they are sent to KeepTrak

Dual Entry/Testing:

- Keefe provided final set of test scripts ADC on 11/1/19. ADC has been testing with the scripts all week.
- Lead Bankers are continuing to either perform dual entry at Perryville or they are continuing to run through scenarios with their own prisons using the provided scripts.
- Keefe is coming out on 11/18 – 11/19 to perform training for all remaining bankers

Issue Log:

- Issue log is attached. B&D, ADC, and Keefe review this issue log every Tuesday and Thursday
- The new scripts should address majority if not all the testing issues currently logged on the issue log

AMERICAN OVERSIGHT

Data Migration:

- Disc. Restitution, Escape Apprehension, and Risk Management data was loaded, but the decimal was off. After further research with ADC Keefe was able to organize the data and is confirming with Lynda Wade all data is matching AIMS
- Data Refresh will take place on 11/14/19 that will include all migration including the additional data elements.

KeepTrak Offender Fee Application:

Prior COS/Current COS Migration:

- B&D, ADC, and Keefe met today and resolved issue with Prior COS amounts. ADC continuing to verify accuracy of data.
- Once verification is complete Keefe will refresh KeepTrak Offender Fee so that all Prior and Current COS amounts are loaded into KeepTrak
- All other functionality within KeepTrak Offender Fees is good.

Thank you.

Hi Mr. Kearns:

#97 is an issue with the checks. It was identified on Thursday, and John Vitale has since sent it to the Keefe developers to address. It is being addressed a quickly as possible. It is a critical component of checks, and it will be addressed, however, all other testing can proceed as checks is only a small component of the overall banking functionality. The color coding on the spreadsheet does not relate to the health or status of the items, but it relates to which group is assigned. (Red- Bankers, Green – Keefe, Turquoise-George). George is responsible for updating and the tracking of this Issue Log.

Thank you.

Marissa and Dean
Also note #97, color coded green, yet it says a Critical Bug is going to be entered. Not sure I understand that. Another top of the list for discussion between you and John V please.
Mike

Please find below the latest status update for KeepTrak. Please note there are 2 separate iterations of KeepTrak for Inmate's and Offenders so I have provided a separate update for each respective iteration.

KeepTrak Inmate Trust:

Active Inmate Bug 40050: Resolved and will be implemented in PROD upon next push to PROD (scheduled for evening of 11/8/19):

- B&D will coordinate testing with ADC. Testing will take a couple of days as the information needs to be updated in AIMS2 and confirm it is updated correctly in KeepTrak the next day.
- If testing scenarios pass successfully B&D will run the KeepTrak loader to update all statuses in KeepTrak for all Inmates so that Inmates with status "Temp Absent, Out to Court, etc." will show up as Active in KeepTrak.

Payroll:

- Payroll meeting occurred this week between B&D and ADC
  - Confirmed payroll post schedules were in alignment
  - 2130 WIPP Pay Detail Report is available for WIPP Officers and Banker's to test with. Full Summary version of report will be run on scheduled timeline the day before the post date, which is in line with current AIMS process for the report.
  - Lynda Wade and Michele Simmons are working together to input and confirm all Payroll Accounting Events are entered into AIMS2 either through Perryville dual entry or using another prison to ensure all Accounting Events have been tested and confirmed when they are sent to KeepTrak

Dual Entry/Testing:

- Keefe provided final set of test scripts ADC on 11/1/19. ADC has been testing with the scripts all week.
- Lead Bankers are continuing to either perform dual entry at Perryville or they are continuing to run through scenarios with their own prisons using the provided scripts.
- Keefe is coming out on 11/18 – 11/19 to perform training for all remaining bankers

Issue Log:

- Issue log is attached. B&D, ADC, and Keefe review this issue log every Tuesday and Thursday
- The new scripts should address majority if not all the testing issues currently logged on the issue log

Data Migration:

- Disc. Restitution, Escape Apprehension, and Risk Management data was loaded, but the decimal was off. After further research with ADC Keefe was able to organize the data and is confirming with Lynda Wade all data is matching AIMS
- Data Refresh will take place on 11/14/19 that will include all migration including the additional data elements.

AMERICAN OVERSIGHT

KeepTrak Offender Fee Application:

Prior COS/Current COS Migration:

- B&D, ADC, and Keefe met today and resolved issue with Prior COS amounts. ADC continuing to verify accuracy of data.
- Once verification is complete Keefe will refresh KeepTrak Offender Fee so that all Prior and Current COS amounts are loaded into KeepTrak
- All other functionality within KeepTrak Offender Fees is good.

Thank you.

Marissa, as far as the 07AA file was requested by me for Keefe, but it was too late for Michael to remove it from the migration yesterday. It will not go to Keefe in any future migrations.

Respectfully,

George Martinez, Jr, PMP®

> Hi Holly:

AMERICAN OVERSIGHT

We were reviewing the files this afternoon in preparation for Umami and found file names and directory names that have been changed. Our scripts are developed to read the exact name (Case sensitive) so if any name changes or if any of the letter cases changes (even if the name stays the same) it causes us delays because we have to then make updates. We ask that ADC please do not make any changes to file names or directories going forward to ensure we have as smooth Go Live migration as possible. If there is something that requires changes please communicate that well in advance of Go Live weekend so that we can make the update and be prepared.

Also, The Keefe file 07AA is not needed by Keefe. This was requested by George, but it is not a file that is used by Keefe and does not need to be supplied at go Live. If it is being provided to B&D that process needs to remain in place.

Thank you.

Cc: Dwight Cloud <dcloud@azadc.gov>; Holly Greene <hgreene@azadc.gov>; gmartinez1 <gmartinez1@azadc.gov>; Joseph Nicoletti <jnicole@azadc.gov>; Rusty Johnson <sjohnson@azadc.gov>; Keith Barrier <kbarrier@azadc.gov>
Subject: Fwd: DR Plan

Marissa,

- I expect I'll do ADC coordination and communication for most 11/14 DR activities
    - I'll need to work with you to understand impacts
    - I'll work with Dwight to communicate any announcements that need a wide distribution
    - Do you have any details about how DR activities will affect ADC users? – should not impact users. We are going to take the snapshot from PROD at a point in time on Thursday and then that will be the data we move to DR. We will leave PROD running to help decrease any impact to dual entry.
- George will be the point of contact on DR for interfaces. – George, can you please start researching in a DR type environment which interfaces are necessary and which interfaces should not be pulled over to DR?
- I'm not sure what action to take on Thursday with snapshoting AIMS2 areas
    - Can you please provide me further details on that? – we will need someone from OPS that can help identify what areas within AIMS2 will be used to verify the data and help navigate within AIMS2 and DR when we are ready for data verification
    - I'll schedule a time to talk with you on Tuesday

AMERICAN OVERSIGHT

---------- Forwarded message ---------
From: **Marissa Boice** <marissa.boice@bndna.com>
Date: Fri, Nov 8, 2019 at 1:24 PM
Subject: DR Plan
To: Aaron Bailey <abailey1@azadc.gov>

Aaron:

Who from ADC can I work with for the execution of the DR plan? The areas where I will need assistance is on Thursday we will need a snapshot of areas within AIMS2 that gives a snapshot in time of data (what areas will be targeted). I also need assistance from ADC of the plan for each interface during a DR type situation (has to be reconnected, can be reconnected, should not be connected, etc). I will also need a point of contact and someone to be responsible from ADC for the tracking of the DR activities and further communication out to ADC as the DR plan is tested. B&D will provide hourly updates throughout the day on the progression of the DR plan.

I am looking to starting working on these details on Tuesday so that the plan is ready and in place for execution on Thursday 11/14/19. Please let me know.

Thank you.

AMERICAN OVERSIGHT

From: Thad Lowry on behalf of Thad Lowry <thad.lowry@bndna.com>
To: John Hall; Aaron Bailey; Dwight Cloud
Cc: bcassiano; Herb Haley; Holly Greene; Chris Masson; Keith Francen; Dean Allen
Subject: AD Hoc Developers rights and processes
Date: Thursday, November 7, 2019 5:06:53 PM

I think we've had this conversation before – perhaps with different people which is why I've added Aaron and Dwight

My understanding for what we've agreed to do is:

- No one has direct write access to Prod Report Servers or Prod Databases
    - Certain individuals have Read Only access to production for other purposes (not for Ad Hoc report development)

- The prod database is copied down to our non prod databases on a periodic basis (roughly monthly to date) so the non Prod database is roughly up to date with live data

- We have granted access to a limited number of AD Hoc Report developers to:
    - the Non Prod database where they have read only access and the capability to create and edit their own views that they can then use in writing AD Hoc Reports

    - the Non Prod Telerik Report Server where they can create AD Hoc reports by writing SQL which can use the views they've created

- We still need to create a process for how these AD Hoc reports will be QA'd, tested in UAT and promoted into production where they can be stored in certain places that will allow them to be run or scheduled
    - For now we'll deal with them via email on request until we work out this process

Upon looking into this we may have given people access to the production Telerik Server which we will need to revoke and give them access to the Telerik Test Server

Right now the group of people that have the capability described here are:

1. <mgomez@azadc.gov>	Michael Gomez
2. <mdolny@azadc.gov>	Michael Dolny
3. <jconnolly@azadc.gov>	Joshua Connolly
4. <jsquires@azadc.gov>	John Squires
5. <pschroed@azadc.gov>	"SCHROEDER PHIL"
6. <jtaranti@azadc.gov>	James Tarantino
7. <jwhitson@azadc.gov>	Jacob Whitson
8.	Holly Greene

AMERICAN OVERSIGHT

<hgreene@azadc.gov>	
9. <hhaley@azadc.gov>	Herbert Haley
10. <gmartinez1@azadc.gov>	George Martinez
11. <bcassiano@azadc.gov>	Brittany Cassiano
12. <abailey1@azadc.gov>	Aaron Bailey
13. lvelamakanni@azadc.gov	Lalitha Velamakanni

And with this email John Hall is asking for inclusion into this group

Also to reduce confusion there should be a process developed to add others to this group

Please let me know if I have anything wrong or if you would like to discuss this further

Thanks,

Thad

Subject: UPDATE: Umami Data Migration - ADC Tasks (11/7/19)
Date: Thursday, November 7, 2019 1:09:42 PM

Hi Marissa and Thad-

Below is a timeline of events in Arizona MT from today concerning Umami:

- **02:31:** Bill James began submission of batch jobs
- **03:07:** Bill confirmed completion of the above.
- **06:50:** Jim confirmed completion of flat files and turn over to Robert Maneer
- **07:04:** Robert confirmed start of clean and delivery of IMS segments
- **10:41:** Hung confirmed download and packaging of 67 text files and 27 folders of pdf files (17254 files). This is the delta version of the data from 10/17/19 to 11/7/19. It began at 09:00 AZ MT and ended at 10:40 AZ MT.
- **10:50:** Michael noted that he had to create an entirely new file for Keefe. He confirmed that he started the transmission process at this time.
- **11:12:** Robert Maneer confirmed that all mainframe data was delivered to Michael at to transmit to B&D. The transmission of the files are currently in progress (Mainframe and PDF/TXT).
- **12:15:** Michael confirmed that the 10 files below have been successfully transferred to the KEEFE Directory.

  1_Active_Inmates.CSV
  2_iBank.csv
  3_One_Day_of_AIMs_Transactions.csv
  4_COS_Account_Status_Detailed.csv
  5_Transaction_Detail.csv
  6_Outstanding_Checks.csv
  6_Outstanding_Checks_COMPLETE.csv
  7_41_Discipline_Restitution
  8_33_Escapee_Apprehension
  9_34_Tax_Risk_Management

  10_Tbl_DORS07AA

Again, all remaining files are still in progress. At this point no issues / roadblocks have been reported.

Respectfully,

Holly Greene

Hi Marissa-

I look to Michael and Hung to help answer your questions, but my general responses are below:

1. How can we coordinate getting a new full set of PDF files? **- We can have a quick 15 min meeting with this group if you'd like to discuss. I will look to you to schedule**
2. Is this something that can be kicked off today prior to the DOC O pull tomorrow understanding the files will take several days to run? - **At this point, no. Let's discuss in the meeting. Side note, for Go-Live, we will need to perform this action as a trickle in starting the week prior on 11/19 and up to the day of DM on 11/29**
3. Would transferring the files interrupt any Umami activities for your team? **- The delta's will be sent for Umami. However, if you require the full set, this should be tackled separately (outside of Umami) with the understanding that it will take more time to deliver. We'd need to discuss and understand when B&D needs the full set as this is not a scheduled weekend for DM. That said, I'm looking to next week at the latest to wrap up the delivery**

Respectfully,

Holly Greene

Thank you Robert.
Sorry for all of the confusion, just having the snapshot and migration done in the middle of the month is giving us some weird issues.

I guess we should try to run against the 10/05/2019 GED file and see what we get.
@Russell Coryell, can you do that?

Subject: Re: FW: Please run H310I664 (RPT 1190)

Scott, what you want is not available:

Scott, I went back in and looked at the Production jobs for the job $CO664CP that runs ONLY on the 5th of the month and creates the Report from H310I664.

This job creates a report PDF with generations from prior job runs (all run on the 5th of the current month).

So there is not a job run for Program H310I664 closer to the beginning of the month.

I have created my own JCL to run the job pulling in the INPUT Data from the existing GED File but we are limited to the dates available on the GED File. (For October we do not have a GED File available other than 9-29-2019 and 10-5-2019.

So there is no way to create a report closer to the beginning of the month of October.

I emailed you the one with 10-5's input yesterday…

The 2 I emailed you today… the subject line tells you the input dataset's date. I'll copy H310I664 to SP, and we can verify why they ALL say "As of E.o.M". I'd bet Robert's paycheck that you're right, the program picks the month from the input file then puts the last day of the month in there.

Thank you.

Russell,
Something is not right with this report run.
I am getting some very different numbers.
I think the "forced" run did not set all of the date parameters correctly.
Can you see if we can get a copy of the one that ran this past week from their repository server?
PDF is ok.
Robert should be able to acquire this file for us.

John-

Jim Tarantino responded on 10/29 with the following:

The answers to 1 & 2 can be explained if I can see the data fields in question. They are probably signed fields that represent a numeric value:

{ = 0
F = 6
E = 5
B = 2
G =7
A = 1
H = 8
I = 9
D = 4
C = 3

I believe folks may be waiting for your thoughts on this.... I'll resend the email as well.

Respectfully,

Holly Greene

Hi Holly:

How can we coordinate getting a new full set of PDF files? Is this something that can be kicked off today prior to the DOC O pull tomorrow understanding the files will take several days to run? Would transferring the files interrupt any Umami activities for your team?

Thank you.

I've contacted the head of the Business Intelligence group Matt Stratton who both of the individuals you mentioned below used to work for.

Unfortunately neither one of them works for B&D any longer

He should be able to get back to you on what to do next for the issues you identified:

- unable to open qvd files which contain the connection information to the data source.
- redirect the Qlikview application to our new database we are building with AIMS2 data.

Just to be sure what steps are you taking to access the QVD files?

I found this article which does a step by step for using QVD files in QlikView application:
https://www.c-sharpcorner.com/UploadFile/35fef0/open-qvd-files-in-qlikview-application-and-import-data/

AMERICAN OVERSIGHT

They need to RDP to the server to grab the source document version. The version that is read only is the one that is published to the access point for end users to use.

I don't know how the system was setup so can't say exactly where the directory would be. The QMC (management console) can provide the mount location(s) in the system setup tab for the publisher service.

Let me know if that helps or if you need further assistance

Thanks,

Thad

Cc: Joseph Profiri; Dwight Cloud; JR Sloan; Ken Sanchez; Lisa Dee Meyerson Marshall; Dean Allen
Subject: RE: B&D Cost overflow
Date: Tuesday, November 5, 2019 1:43:31 PM

Hello Michael,

Thanks for your email.

Here is BDNA response:

1. We are fully committed to the current contract and its deliverables, as well as the financial agreement that was made in the most recent Amendment.
2. We will continue to put all required resources to deliver the project in due time regarding our part of the project.
3. We confirm that we both should be continuing to forge ahead, with all appropriate resources on both side, to reach an acceptable level of readiness for Go-Live on November 29, 2019. Each party paying the resources needed to deliver its part of the project.

I hope this clarifies your concern,

Benjamin Bussenault

Subject: Re: B&D Cost overflow

Benjamin

You recently requested that ADC share in $300,000 of additional "subcontractor" costs incurred by B&D, related to completing Reports. Further, and more troubling, you stated in a phone call on Friday, November 1, 2019, that unless ADC shared 50% of the cost, you may have to reduce the B&D resources dedicated to the Project. However, you followed that statement by saying B&D is committed to the project and the contract. Your statements appear contradictory and need clarification. I would ask that you reassure ADC that you are committed to the current contract and its deliverables, as well as the financial agreement that was made in the most recent Amendment.

I trust that you were earnest when you stated throughout this year that you want to deliver a product that satisfies the customer (ADC). We have not yet even completed a successful Pilot of the system. Therefore, ADC still expects the unfinished work and bugs to be completed by November 15, 2019. I also expect that you negotiated in good faith earlier this year when you not only emphasized that you were committing B&D's current level of resources and but you also expected ADC to do the same. ADC has in fact committed significant resources to the project this year at additional costs to

AMERICAN OVERSIGHT

the State. I also believe that your current level of resources must be maintained as the evidence provided to you regularly has shown that has been necessary to achieve significant progress. Without those B&D resources, I would seriously question whether B&D can meet its commitment for an acceptable system readiness at Go-Live.

We do not expect additional demands from B&D for more funding. Instead, we both should be continuing to forge ahead, with all appropriate resources, to reach an acceptable level of readiness for Go-Live on November 29, 2019.

I look forward to your clarification and assurance by no later than 5pm MT, November 5, 2019.

Sincerely,
Michael P. Kearns
Division Director, Administrative Services

AMERICAN OVERSIGHT

Subject: Re: B&D Cost overflow

Mr Profiri,

Let's have a discussion indeed on the subject tomorrow. I am available anytime, let me know what suits you.

First, I can assure you already that B&D required performance on the contract is fully guaranteed, no question on that.

Second, I didn't brought this point about additional money to our last meeting back in Scottsdale as this problem was not yet discussed internally within Orange with my hierarchy.

I see that you copied both Helmut Reisinger and Rob Willcock on the conversation. They are not familiar with all the details of the issue here. I therefore copy Pierre-louis Biaggi and Jerome de Lattre (respectively CEO and CFO of Business & Decision Group). They are the one I refer to on B&D US performance and business.

It is true that during the last Business Review (Wednesday last week) with them, we went through the financials of B&D US. Given the significant subcontracting cost overflow endured on the reporting module, we decided to bring the situation to ADC attention. As I told in a personal mail to Mr Kearns, I wish to discuss this point when I am back in Scottsdale on Oct 30th.
I expect to have a honest and level-headed discussion about it.
As you can see, it was not my intention to preclude this conversation with you. It only came up after our face to face meeting, and I was planning to touch on this with you during our call on Friday this week.

As I said, B&D US is fully committed to the remaining milestones of the solution implementation. So the present escalation doesn't affect in anyway B&D commitment to a successful delivery.

I understand money related issues can become very sensitive given the history of the contract. We have been through those impediments in the past and successfully overcame them together.

Let's talk tomorrow indeed and make sure it doesn't derail us from our common objective.

Thanks very much,

Benjamin Bussenault

>
> Mr. Bussenault,

AMERICAN OVERSIGHT

As the current Director of the Arizona Department of Corrections, I have grave concerns regarding your request for additional money which if I recall the most recent contract amendment correctly is against B&D's commitment therein and B&D's intent to perform services as contracted. Additionally, your unwillingness to bring this to my attention during our meeting just over a week ago, yet your willingness to delay conversation with client leadership, mainly me, regarding this B&D project performance issue is debilitating to our mutual success.

It does not endure the vendor/client relationship I have worked hard to cultivate with you and B&D/Orange.

It is my intent to raise this topic with you tomorrow and confirm your assurance of B&D's required performance in accordance with the contract.

Sincerely,

Joe Profiri
Acting Director
Arizona Department of Corrections

Hello Mike,

A quick email to you alone as we near the completion of the Phase 1.
BDNA has endured significant supplemental costs of subcontractors in order to get reports developed (that's on us) and accompany the testing (that's on ADC).

I intend to raise this topic with the new Director. We are talking about 300 k$ total. My wish is to get those supplemental costs co funded by ADC & us. 50/50.

I don't need an answer now, and I know already what you will say about it. But I wanted to make sure you were not caught off guard when I raise the request formally to ADC management.

Cheers,

Benjamin

Subject: Re: AZ DOC - Change to Banking Webservice

John, please provide Lisa with the credentials and URL for connecting to KeepTrak for Go Live.

@ Lisa: Yes, the date is correct. The migration of data will occur over the weekend prior with us going live on Monday 12/2.

Respectfully,

George Martinez, Jr, PMP®

On Thu, Aug 22, 2019 at 12:23 PM Lisa Winstead <lwinstead@gtl.net> wrote:

1. The JMS data being sent today to GTL server under TEST folder – is Test data..not real.
2. For the Perryville Pilot that happens on 10/21/2019 – GTL does not have to do anything. But during this time, the JMS Files in the TEST folder will have the Perryville inmates that we should check to make sure looks accurate, but GTL still will not be using this file yet in production.
3. For the Big Bang for all other sites that will occur on 12/2/2019, the following will be needed:

    a. The New JMS Inmate and new JMS Parolee files will need to move from the TEST Folder to the Production folder. GTL to start using new JMS files for all sites.
    b. GTL will still continue to send the Banking deposits in a file…in parallel with the webservices…for a few weeks, just in case this has to roll back for some reason.
    c. GTL will have to change from sending the Deposits to the Keefe Test QA Webservice, to a Production Webservice. Keefe owes us that login credentials and new URL for that. [So GTL and Keefe need to test this access to the production URL long before go live.]
    d. After a couple of weeks have passed and there are no issues, GTL to stop sending the banking deposit files.

AMERICAN OVERSIGHT

Subject: AZ DOC - Change to Banking Webservice
When: Thursday, August 22, 2019 3:00 PM-4:00 PM (UTC-05:00) Eastern Time (US & Canada).
Where: 1-713-481-5900 9009#

AZ DOC – we need to go over the details of how this change will occur. We will need someone from Keefe on as well.

1. For Trust and Parole Supervision, AZ DOC is converting from getting the banking files from GTL to GTL sending the banking data in a webservice to Keefe.
    a. JMS data will no longer come from the same system as today– GTL will have new JMS data files for Inmates and Parolees.
    b. Parolee's JMS data will change from a 3-digit id to a 3-char id location.
    c. AZ DOC is pushing ongoing files to the sFTP server under a TEST folder now.
    d. GTL has the banking webservice to Keefe running in parallel today along with the banking files.
    e. There seems to have some discrepancies on the Inmate JMS data (sending in inmates with blank locations, not sending in some site data (803, E01, E02, E03, E04, B45, B57, C29.) There may be other items but that is what I saw on first glance.

2. **First site – Perry – Oct 29, 2019.**

a. Need to understand how the JMS will work during this pilot period (are we just to use the one we get today? Or will you pass the new files for all sites starting during this pilot time.)
b. Since GTL is already sending Keefe the banking deposits for all sites to the webservice, is there anything that GTL has to do, or it is all on Keefe side?
c. Not sure how GTL will be able to stop sending Perry deposits in the banking file – maybe Keefe just ignores them in that file during this period?

3. **Rest of Sites – in Nov 2019.**

Hi George:

For the Keefe call tomorrow can we make the Disc. Rest, Escape Apprehension, and Risk Management data and files the first topic that we discuss tomorrow.

I also want to confirm what we need to load for Suspense of if that data element is good.

@Jim: I forwarded you the invite. It is very important to have you on this call to help with any possible data changes. Can you please make time to attend?

Thank you.

Subject: Re: Data Migration - Reconsiders

Hi Marissa,

Jim is gone for the day. Marlene is also gone, will be back Wednesday. Robert Maneer is working on 38728, but he may not have the results until tomorrow. I don't think we can easily find alternates for Jim and Marlene in the meantime.

Only the records where the amount owed is equal to or greater than the amount paid should be brought over.

> Looking for interpretation of attached. The files that we received for discipline restitution, escape apprehension, tax risk mgmt. have the ADC Number, the Type Code, and amount owed and an amount paid. When I subtract the amount paid from the amount owed I get some unexpected results. Can you take a look at the attached where I added two columns, one to subtract the amount paid from the amount owed, and the other to make the result a decimal number (I am also attaching the original versions of all three files received). Let me know if these assumptions are correct.

AMERICAN OVERSIGHT

1. Are the amounts shown without decimals, i.e., should 1075 be converted to 10.75?
2. Not sure what the signs mean – are they significant?

{
F
E
B
G
A
H
I
D
C

3. If the amount paid exceeds the amount owed, do we owe the inmate a refund?
4. If the amount owed is zero (0) do I ignore that record?

I am attaching a marked up spreadsheet where I subtract amount paid from amount owed to determine whether to import the Discipline Restitution. Can you confirm the handling of the data in this way?

Thx!

John
