ELECTION SYSTEM CERTIFICATION LAPSE

The certification for New Mexico’s election system has been out of compliance since 2017. The certification process is defined and supported by the federal Election Assistance Commission (EAC). The EAC maintains a document called Voluntary Voter System Guidelines (VMSG) which defines the standards that election systems must meet. The VMSG’s are called “guidelines” and the EAC has no enforcement authority. However, in New Mexico the VMSG’s carry the force of law in because they have been incorporated into our Election Code per **NMSA 1-9-7-4(B)** which states: “A voting system that does not comply with all requirements in the Election Code and the most recent voluntary voting system guidelines adopted by the United States election assistance commission shall be decertified for use in this state.” (emphasis added) The timeline for the events described in the following paragraphs is shown as **Figure 1**. The numbers in brackets on the figure are the section of the **Appendix** to find the backup documentation.

Election System Certification Lapse in New Mexico

Figure 1. Election System Certification Lapse Timeline

On February 24, 2017 the EAC accreditation of a company called Pro V&V expired. On August 24, 2017 the SOS used this company to “certify” New Mexico’s tabulators and election software to VMSG 1.1 (the current standard at that time). Pro V&V’s accreditation remained defunct until March 10, 2020 when they re-applied to the EAC to have their accreditation renewed. Almost one year later, the EAC renewed Pro V&V’s accreditation and blamed COVID for the lapse, even

though the accreditation had expired over three years before the start of COVID. So, elections held in New Mexico in 2017, 2018, 2019, 2020, and 2021 were not properly certified.

In the meantime, the EAC wrote and adopted a major update to the VVSG's. The newest version is VVSG 2.0 and was adopted in February 2021, and the National Voluntary Lab Accreditation Program (NVLAP) handbook was published in October, 2021. The EAC "is prepared for VSTL accreditation for VVSG 2.0, however, it is up to the labs on when to apply for accreditation."¹ In other words, the processes to accredit labs to certify election systems to the latest EAC standards have been in place for eight months, however as of this writing neither of the two labs (Pro V&V or SLI Compliance) have even applied for accreditation. The period between the last application for accreditation and approval was approximately one year. Given the disinterest shown by the labs to even become accredited, it is unknown how many months or years may elapse before it is even possible for any election system to be properly certified to the latest VVSG's in accordance with state law.

The SOS acknowledges these issues with accreditation and certification of the election system in a letter her office wrote to Dominion on May 28, 2021: "The SOS is required to review for recertification each voting system already in use in the state in the year following a presidential election. All certified voting systems are required to be tested by an independent authority and comply with all requirements in the Election Code and the most recent voluntary voting system guidelines (VVSG) adopted by the United States Election Assistance Commission (EAC). While VVSG 2.0 was adopted by the EAC in February 2021, the EAC has not yet certified any independent voting system testing laboratories...Since this effort is likely to take some time, we plan to review our current voting system based upon the previously adopted standards." (Letter is included in the **Appendix**).

The auditors agree with the SOS that it is not possible to certify New Mexico's election system to the current standards as required by statute. However, we disagree that the SOS has the unilateral authority to bypass state statute and decide to certify the election system to an outdated standard. The EAC and the testing labs together let the entire certification and accreditation process lapse for over four years and the labs have shown no interest in becoming accredited to the current standards. New Mexicans cannot be held hostage to testing labs or a bureaucracy that has no interest in doing their jobs well enough that compliance is even possible.

¹ www.eac.gov/voting-equipment/voluntary-voting-system-guidelines

Similar problems exist with the accreditation and certification from the testing lab SLI Compliance which “certified” the AskED ePollbook and Ballot on Demand system that is used in New Mexico and provided by a company called ROBIS. However, the conversation about the ePollbooks and ballot printing can be simplified by pointing out that the date on the test report to show certification is December 1, 2011. The auditors confirmed with ROBIS that the software for the AskED ePollbook and ballot printing system **is updated multiple times per year**. Not only that, but the latest version of software is automatically distributed to all AskED customers when it becomes available like a web-based application used on smartphones. There is no possible way that the SOS can claim that the ePollbooks and ballot printing systems are actually certified if they have gone through dozens of iterations of software since 2011 when they were last tested. There is also no way to have confidence in certification if the software used is automatically updated across the United States without buy-in from the individual jurisdictions.

In addition to being uncertifiable, the ePollbooks are extremely vulnerable because they are internet connected. The list of people who have voted is even distributed regularly during the early voting period by county clerks. By monitoring this list or the ePollbooks themselves, it is possible to determine who has cast a ballot and which votes could be “borrowed” from those who haven’t yet voted.

It was also discovered by the auditors that the ePollbooks record the time that each voter checked in at the polling place. This time is also printed on the individual “voter permits” that prints out with ballots. Further, some tabulators are configured to record the time that ballots were scanned into the tabulators. Matching the timestamps from check-in to the time ballots were scanned can easily be done and would allow bad actors to determine exactly how individual voters cast their ballot. The ePollbooks are uncertified, vulnerable, and destroy the secrecy of the ballot.

1 Introduction

The purpose of this Test Report is to document the procedures that Pro V&V, Inc. followed to evaluate the Dominion Democracy Suite (D-Suite) 5.4 Voting System to the requirements set forth for voting systems in the U.S. Election Assistance Commission (EAC) 2005 Voluntary Voting System Guidelines (VVSG), Version 1.0.

1.2 Terms and Abbreviations

The terms and abbreviations applicable to the development of this Test Report are listed below:

- “ADA” – Americans with Disabilities Act 1990
- “ATI” – Audio Tactile Interface
- “BMD” – Ballot Marking Device
- “CM” – Configuration Management
- “COTS” – Commercial Off-The-Shelf
- “DRE” – Direct Record Electronic
- “EAC” – United States Election Assistance Commission
- “EMS” – Election Management System
- “FCA” – Functional Configuration Audit
- “HAVA” – Help America Vote Act
- “ICC” – ImageCast Central
- “ICE” – ImageCast Evolution
- “ICP” – ImageCast Precinct
- “ISO” – International Organization for Standardization
- “NOC” – Notice of Clarification
- “PCA” – Physical Configuration Audit
- “PCOS” – Precinct Count Optical Scan
- “QA” – Quality Assurance

- “RFI” – Request for Interpretation
- “RTR” – Results Tally & Reporting
- “TDP” – Technical Data Package
- “UPS” – Uninterruptible Power Supply
- “VSTL” – Voting System Test Laboratory
- “VVSG” – Voluntary Voting System Guidelines

1.3 Background

The D-Suite 5.0-A System (the predecessor of the D-Suite 5.4-NM System) was granted certification to the 2005 Voluntary Voting System Guidelines (VVSG) by the Election Assistance Commission (EAC) on August 14, 2017. The D-Suite 5.4-NM System is a modification of the D-Suite 5.0-A system; the ICE component, however, was baselined from the D-Suite 4.14-E System, which was granted EAC certification to the 2005 VVSG by the EAC on July 2, 2015.

The Democracy Suite 5.4-NM Voting System is a paper-based optical scan voting system consisting of the following major components: The Election Management System (EMS), the ImageCast Central (ICC) optical ballot scanner, the ImageCast Precinct (ICP) optical ballot scanner, and the ImageCast Evolution (ICE) optical ballot scanner and ballot marking device.

1.4 Scope

The scope of the test campaign included tests designed to verify that certain D-Suite 5.4-NM features and applications, which have been modified from the EAC certified 5.0-A and 4.14-E baselines, conform to the applicable EAC 2005 VVSG 1.0 requirements. The D-Suite 5.4-NM includes functional and usability enhancements to the baselined D-Suite 4.14-E and 5.0-A Systems, as summarized below (for a detailed list of modifications, refer to Dominion TDP Document *2.13 System Change Notes*):

Election Management System

General

1. EMS components to utilize Windows Authentication instead of SQL Server Authentication
2. Ability for system to utilize self-encrypting drives as an additional security feature

3. All components now running on combination of Windows 10, Windows Server 2012R2, with SQL Server 2016. Also included are scripts for security hardening procedures.

Election Event Designer

1. Ability to configure how common cards are consolidated
2. Ability to create a convention for the ballot ID, artwork file name and description
3. Ability to generate one or more ballots without generating all ballots in the election project
4. Modified the specification of available area for Write-in detection, which is passed through the election files to the optical scan tabulators.
5. Ability to generate distinct ballot ID's for Precinct Portions with Identical Ballot Content
6. Extending Paragraph Alignment Attributes to allow for more flexibility
7. Contest Headings now have a Global Order Field
8. Ability to indicate which District Types can appear on Print Tape

Results Tally & Reporting

1. Ability to break-down results per precinct for consolidated ballots
2. New report export providing information on what precincts each batch of results contains
3. Ability to select multiple precincts for the Summary Report
4. Ability to indicate in a project whether disabled contests and candidates should appear in the Election Summary and Statement of Votes Cast reports
5. Improvements in reporting
6. Ability to track precinct information for consolidated cards
7. Ability to bypass adjudication for early voting results
8. Refactoring of CVR Service to allow for improved performance and reliability during loading, adjudicating and publishing of results

9. Extended Service to allow Adjudication to retrieve list of Qualified Write-ins, and add new Qualified Write-ins to the master list
10. Refactoring of SQL Server Reporting Service based reports to allow for improved performance and more flexibility in extending reporting capabilities.
11. Ability to generate Statement of Votes Cast report by Ballot Type
12. The existing CVR export can now be generated in Excel format
13. A report indicating the date and time when each results batch was loaded into the EMS database
14. Ability to remove provisional votes into a separate results batch in order to allow for adjudication of standard results in a batch
15. Ability to export audit images sorted by Candidate
16. User is informed if there are pending provisional ballots before pushing results to Adjudication

Election Data Translator

1. Ability to import subsets of data using the application: New languages and translations, template assignment, and tabulators.

Adjudication

1. The resume function has been made more robust
2. Adjudication Administrator can now perform tasks on a remote client machine, rather than the server
3. Master list of qualified write-ins is now managed by Election Event Designer
4. Admin can add a new write-in "on the fly" after the project has been created. Write-ins will be added to master list and will be synchronized for all adjudicators
5. Ability to prevent a ballot from being completed until all write-ins are resolved
6. The Adjudicator can now see the AuditMark alongside the image of the ballot being adjudicated
7. Adjudicator can now skip a ballot and continue adjudicating remainder of batch

ICC

1. Added support for a TWAIN interface
2. Added option to force to ICC to overrun a preset number of ballots every time scanning stops mid-batch
3. Switching election projects in ICC has been simplified
4. Improvements to Write-in Area detection
5. Application now runs on Windows 10
6. Added support for processing RCV contests

ICP

1. Improvements to Write-in Area detection
2. ICP is no longer restricted to 10 pre-defined languages
3. Now able to print list of admin areas as part of the tape header
4. Added Tabulator name to footer section of the tape
5. Added support for processing RCV contests

ICE

1. Added support for Cast Vote Record format
2. Improved ink cartridge management of interval between print head servicing routines
3. Added support for printing test page from Pollworker menu
4. Added MBS options to Advance Administration node
5. Added support for printing write in image on the thermal tape
6. Improved instructions related to AVS write in session
7. Added MBS options to enable vote verification for standard and QR ballot types
8. Added support for processing RCV contest in Standard and AVS

9. Improved AuditMark synchronization between ICC and ICE (font and header content)
10. Improvements to Write-in Area detection
11. Support image splitting metadata so when using a single PNG image for ballots, heights of the ballot front, back, and AuditMark are now embedded as tags so that it can be easily split

2 Testing Overview

The evaluation of the D-Suite 5.4-NM System was designed to evaluate the voting system to the requirements set forth for voting systems in the EAC 2005 VVSG. The goals were constructed to verify that certain D-Suite 5.4-NM features and applications, which have been modified from the EAC certified 5.0-A and 4.14-E baselines, conform to the applicable EAC 2005 VVSG 1.0 requirements. The evaluation addressed each of the following test goals in the following manner:

Table 2-1: Testing Overview

Test Goal	Testing Response
Perform TDP Modification Review	A cursory review of the modified documents was performed to ensure that adequate system information exists.
Perform PCA & Receipt Inspection	A PCA and Receipt Inspection was performed to compare the voting system components and materials submitted for testing against the manufacturer’s technical documentation to ensure everything was in agreement and correct.
Perform Source Code Review, Compliance Builds, and Documentation Review	Trusted Builds were generated during the test campaign. The source code submitted by Dominion was reviewed by PRO V&V and was successfully built using the submitted COTS and third party software products. Additionally, build documentation was reviewed.

Table 2-1: Testing Overview *(continued)*

<p>Verified that the D-Suite 5.4-NM System meets the applicable requirements of the EAC 2005 VVSG 1.0.</p>	<p>This was tested by evaluating the D-Suite 5.4-NM System to specific election scenarios using a combination of different ballot programming approaches, ballot designs, ballot sizes, languages, and tabulators.</p>
<p>Perform System Setup, Loads, and Hardening</p>	<p>The system setup, loads, and hardening was tested by comparing the voting system submitted for certification testing to the manufacturer’s technical documentation.</p>
<p>Simulated pre-election, Election Day, absentee, recounts, and post-election activities on the D-Suite 5.4-NM System during Functional Configuration Audit (FCA).</p>	<p>The components of the D-Suite System were tested in pre-election, Election Day, post-election and recount situations and evaluated against documented behavior and expected results for all scenarios.</p>
<p>Perform Regression Security Testing</p>	<p>The security assessment performed by Pro V& V consisted of a physical security review on the ICE.</p>
<p>Perform Modification Usability & Accessibility Testing</p>	<p>A Usability and Accessibility evaluation was performed on the ICE modifications.</p>
<p>Perform FCA-Regression Testing</p>	<p>FCA functional regression testing was performed on all submitted modifications to the baselined systems.</p>
<p>Perform Accuracy Testing</p>	<p>Performed accuracy testing that included over 1,549,703 ballot positions on the ICE, ICP, & ICC each.</p>

Table 2-1: Testing Overview *(continued)*

<p>Perform Volume/Stress testing</p>	<p>Ran Max Contests, Max Candidate, and System Limits elections on ICE, ICP, & ICC each</p>
<p>Complete System Integration Testing</p>	<p>The components of the D-Suite System were tested to address the integration of hardware and software. This testing focused on the compatibility of the voting system software components and subsystems with one another and with other voting system components. Accuracy Testing was performed to verify that the voting system components could process ballot positions within the allowable target error rate by testing the ability of the system to “capture, record, store, consolidate, and report” specific voter selections and absences of a selection.</p>

2.1 Test Candidate

The Democracy Suite 5.4-NM Voting System is a paper-based optical scan voting system consisting of the following major components: The Election Management System (EMS), the ImageCast Central (ICC) optical ballot scanner, the ImageCast Precinct (ICP) optical ballot scanner, and the ImageCast Evolution (ICE) ballot marking device.

Election Management System (EMS)

The Democracy Suite 5.4-NM EMS consists of various components running as either a front-end/client application or as a back-end/server application. A listing of the applications and a brief description of each is presented below.

Front-end/Client applications:

- **EMS Adjudication:** Represents the client component responsible for adjudication, including reporting and generation of adjudicated result files from ImageCast Central tabulators and adjudication of write-in selections from ImageCast Precinct, ImageCast Evolution, and ImageCast Central tabulators. This client component is installed on both the server and the client machines. *(Note: The EMS Adjudication feature is optional)*

- EMS Audio Studio: A client application that represents an end-user helper application used to record audio files for a given election project. As such, it is utilized during the pre-voting phase of the election cycle.
- EMS Election Data Translator: End-user application used to export election data from election project and import election data into election project.
- EMS Election Event Designer: A client application that integrates election definition functionality together with ballot styling capabilities and represents a main pre-voting phase end-user application.
- EMS Results Tally and Reporting: A client application that integrates election results acquisition, validation, tabulation, reporting, and publishing capabilities and represents the main post-voting phase end-user application.

Back-end/Server applications:

- EMS Adjudication Service: Represents a server side application which provides ballot information such as contests, candidates and their coordinates from EMS to the Adjudication application.
- EMS Application Server: Represents a server side application responsible for executing long running processes, such as rendering ballots, generating audio files and election files, etc.
- EMS Database Server: Represents a server side RDBMS repository of the election project database which holds all the election project data, including pre-voting and post-voting data.
- EMS Data Center Manager: A server application that represents a system level configuration application used in EMS back-end data center configuration.
- EMS File System Service: A back-end application that acts as a stand-alone service that runs on client machines, enabling access to low level operating system API for partitioning CF cards, reading raw partition on ICP CF card, etc.
- EMS NAS Server: Represents a server side file repository of the election project file based artifacts, such as ballots, audio files, reports, log files, election files, etc.

ImageCast Central (ICC) Count Scanner

The ICC is a high-speed, central ballot scan tabulator based on Commercial off the Shelf (COTS) hardware, coupled with the custom-made ballot processing application software. It is used for high speed scanning and counting of paper ballots.

ImageCast Precinct (ICP) - BMD Audio

The ICP device is a hybrid precinct optical scan paper/DRE ballot counter designed to provide three major functionalities: ballot scanning and tabulation, ballot review and second chance voting, and accessible voting and ballot marking with one of the optional external HP printers.

The ICP also allows a voter to cast a ballot via an audio device. The audio voting capability of the tabulator allows the voter to listen to and vote for all names on the ballot. Using the audio assisting device (which is connected to the tabulator), the voter listens to an audio voting session. The audio assisting device allows the voter to adjust the volume of the audio, change the speed of the audio playback, jump to the next and go back to the previous name, and to cast a vote.

ImageCast Central (ICC) Count Scanner

The ICC is a high-speed, central ballot scan tabulator based on Commercial off the Shelf (COTS) hardware, coupled with the custom-made ballot processing application software. It is used for high speed scanning and counting of paper ballots.

ImageCast Evolution (ICE) Count Scanner

The ICE is a precinct-level, optical scan, ballot counter (tabulator) designed to perform three major functions: ballot scanning and tabulation, ballot review and second chance voting, accessible voting and ballot marking.

2.1.1 Configuration Components

Election Administration

Democracy Suite Election Management System (EMS)

- Dominion Voting Systems Democracy Suite EMS 5.4.17.5 containing:
 - Election Event Designer
 - Results Tally and Reporting
 - Audio Studio
 - Application Server
 - Data Center Manager
 - File System Service

- Adjudication Service
- Election Data Translator
- Adjudication
- DCF Version 50401
- MBS Version 5.2.17-New Mexico
- Optional Adjudication 5.4.17.3

COTS Hardware and Software

- EMS Standard Configuration
 - Microsoft Windows Server 2012 R2
 - Microsoft SQL Server 2016 Standard
 - Server computer system per *2.02 Democracy Suite System Configuration Overview*
- EMS Express Server Configuration
 - Microsoft Windows 10 Professional
 - Microsoft SQL Server 2016 Express with Advanced Services
 - Desktop computer system per *2.02 Democracy Suite System Configuration Overview*
- Client Workstation Configuration
 - Microsoft Windows 10 Professional
 - Desktop computer system per *2.02 Democracy Suite System Configuration Overview*
- EMS COTS Software common to Standard and Express configurations
 - Microsoft.Net Framework 4.5
 - Microsoft.Net Framework 3.5

- Microsoft IIS (part of the Windows installation, not a separate item)
- Microsoft Visual J# 2.0
- Microsoft Visual C++ 2015 Redistributable
- Java SE Runtime Environment 6.0 Update 20 or later
- Dallas 1-Wire Device Driver version 4.03 or newer
- RAID utility
- Adobe Reader DC
- Optional COTS Software for Standard and Express configurations
 - Microsoft Windows Defender (Express Server)
 - Avast! anti-virus software (Standard Server)
 - Cepstral Voices (English, Spanish, etc.) 6.2.3
 - Microsoft Excel 2010 or later
 - Additional Fonts (Arial narrow fonts, 2.37a)
 - UPS drivers
 - Printer drivers
- Auxiliary Equipment
 - iButton (SHA-1) with USB Reader/Writer: Maxim DS9490R#
 - Compact Flash Reader: Lexar Professional USB 3.0 Dual-Slot Card Reader or equivalent
 - LCD monitor, keyboard, mouse, headset, audio adapter, networking switch – COTS computing accessories
- Election media
 - iButton: Maxim DS1963S-F5+

- DVS Compact Flash Memory Cards: 4GB, 8GB, 16GB, or 32GB
- USB Memory Device: 4GB, 8GB, or 16GB
- Smart Cards: ACOS-6-64

Central Count

ImageCast Central Count (ICC)

- ICC software application: version 5.4.2.1

COTS Software:

- ICC COTS computer operating system: Windows 10 (64-bit) Professional edition
- Microsoft Windows Defender
- Microsoft Visual C++ 2015 Redistributable
- Dallas Maxim: 1-wire driver - version 4.03 or newer, 64 bit (32 bit as needed)
- Canon: DR-G1130 driver - version 1.3.6157

COTS Hardware:

- ICC Scanner: Canon DR-G1130
- Desktop or All-in-One computer
 - Microsoft Windows 10 Professional
 - Desktop computer system per *2.02 Democracy Suite System Configuration Overview*

Precinct Vote Capture

ImageCast Precinct (ICP)

- ICP Firmware: version 5.4.2.001
- Hardware version: PCOS-320A, PCOS-320C
 - HW Board Revision: 1072

- IR Sensor Board Firmware version: 1.0.003
- LCD Firmware version: 122
- LCD Bitmap version: 38
- CPLD version: 8
- PSU Hardware version: 4
- PSU Firmware version: 39
- w/ Ballot Box (stackable or foldable)
- Optional Accessible Tactile Interface (ATI) box, version 1.10

Optional Software

- Boot Loader (COLILO) 20040221

Optional COTS Software

- None

Optional COTS products

- HP-7110 Printer
- Headphone: Cyber Acoustics ACM-70 or equivalent
- Sip & puff enabling device #972
- Sip & puff straws #970K (Pkg of 10)
- Hand paddle switches (aka tactile buttons) enabling device #971

ImageCast Evolution (ICE)

- ICE Firmware: version 5.4.8.3
- Hardware version: PCOS 410A (includes IR Security Sensor) and PCOS 410A Rev 39
 - IR Sensor Board Firmware version: 1.0.003

- Motherboard FPGA version: 1.1.5
- Scanner Board FPGA version: 1.1.2
- Logger Controller version: 2.02
- Power Controller version: 3.0.4
- Integrated Printer Controller version: 4.1.6
- Bootloader version : 1.3.4.61
- w/ Ballot Box (stackable or foldable)
- Optional Light Pole for Ballot Boxes
- Optional Accessible Tactile Interface (ATI) box, version 1.10

COTS Software

- None

Optional COTS Software

- None

Optional COTS products

- Headphone: Cyber Acoustics ACM-70 or equivalent
- Sip & puff enabling device #972
- Sip & puff straws #970K (Pkg of 10)
- Hand paddle switches (aka tactile buttons) enabling device #971

2.1.2 Supported Languages

The following languages have been stated to be supported by the by D-Suite 5.4-NM System:

- Alaskan Native
- Bengali

- Chinese
- English
- Eskimo
- Filipino
- French
- Hindi
- Japanese
- Khmer
- Korean
- Spanish
- Thai
- Vietnamese
- Native American
 - Apache, Jicarilla, Keres, Navajo, Seminole, Towa, Ute, Yuman

Due to the limited scope of the testing, only English, Spanish, and Chinese ballots were cast during testing. The accuracy of the translations between languages was not verified.

2.1.3 Supported Functionality

The Democracy Suite 5.4-NM is designed to support the following voting variations:

- General Election
- Closed Primary
- Partisan/Non-Partisan Offices
- Write-In Voting
- Primary Presidential Delegation Nominations

- Ballot Rotation
- Straight Party Voting
- Cross-party Endorsement
- Split Precincts
- Vote for N of M
- Recall issues, with options
- Cumulative voting
- Ranked order voting
- Provisional or Challenged Ballots

2.2 Testing Configuration

The testing event utilized one setup of the D-Suite 5.4-NM System and its components as configured for normal use. The following is a breakdown of the D-Suite 5.4-NM System components and configurations for the test setup:

Standard Testing Platform:

The central count location utilized a Canon DR-G1130 scanner connected to an ICC workstation. Additionally, the central count location housed a standard and an EMS express server containing all of the D-Suite Express Server components listed above.

The polling locations utilized three ICP precinct scanners with one set up with the external HP printers to act as an accessibility station; and three ICE precinct scanners with accessibility equipment.

2.3 Test Support Equipment/Materials

All test support equipment and materials required to facilitate testing were supplied by Dominion.

2.4 Technical Data Package

This subsection lists all manufacturer provided documentation that is relevant to the system being tested.

3 Test Process and Results

The following sections outline the test process that was followed to evaluate the D-Suite 5.4-NM System under the scope defined in Section 1.4.

3.1 General Information

All testing was conducted under the guidance of Pro V&V by personnel verified by Pro V&V to be qualified to perform the testing. The examination was performed at the Pro V&V, Inc. test facility located in Huntsville, AL.

3.2 Test Cases/Procedures

To verify that the system met the applicable requirements, Pro V&V utilized baseline test cases augmented with supplemental test cases designed specifically for the system being evaluated in this test campaign.

Prior to execution of the required test cases/procedures, the system under test was subjected to testing initialization to establish the baseline for testing and ensure that the testing candidate matched the expected testing candidate and that all equipment and supplies were present.

The following tasks were completed during the testing initialization:

- Ensured proper system of equipment. Checked power cords, keys, etc.
- Checked version numbers of (system) software and firmware on all components.
- Verified the presence of the documented EUT.
- Ensured removable media is clean.
- Ensured batteries are fully charged.
- Inspected supplies and test decks.

- Checked protective counters on all tabulators.
- Reviewed physical security measures of modifications.
- Recorded basic observations of the testing setup and review.
- Recorded serial numbers of equipment.
- Retained proof of version numbers.

3.3 Test Results

The procedures that were utilized during the test engagement and the results obtained are summarized in the following paragraphs. During the evaluation, the test team made observations of general system behavior.

Source Code Review/Trusted Build – A source code review was performed in order to review the submitted source code to the specific requirements. Both manual and automated review techniques were used per EAC approved procedures. The Source Code Review included a Compliance Build and a Trusted Build of the submitted source code. To perform the Trusted Build, Dominion-submitted source code, COTS, and Third Party software products were inspected and combined to create the executable code. Additionally, during the performance of the Trusted Build, the build documentation was reviewed.

Summary Findings:

At the conclusion of the Source Code Review, compliant source code was available for performance of the Trusted Build process. During execution of the Trusted Build, the source code submitted by Dominion and reviewed by PRO V&V was successfully built using the submitted COTS and third party software products, and the reviewed build documentation.

Functional Configuration Audit (FCA) Regression Testing – During this area of testing, the specific functionality of the modified system under evaluation that is claimed by the manufacturer in their supplied Change Notes and Scope was targeted to ensure the product functions as documented. This testing used both positive and negative test data to test the robustness of the system.

Regression testing was performed on all system components to verify that all functional and/or firmware modifications made during the test campaign did not adversely affect the system and its operation.

Summary Findings:

The FCA was completed successfully with no anomalies or deficiencies noted. The modifications were against baseline test cases supplemented with specifically designed test cases. The FCA testing included verification of the submitted modifications detailed in the change notes.

All functional tests were successfully executed. During execution of the test procedure, it was verified that the D-Suite 5.4-NM System successfully completed the system level integration tests with all actual results obtained during test execution matching the expected results. Results were also verified back through the EMS.

Accuracy – An accuracy test was performed to ensure that the voting system components could process ballot positions within the allowable target error rate. This test was designed to test the ability of the system to “capture, record, store, consolidate, and report” specific voter selections and absences of a selection.

Summary Findings:

To perform the Accuracy Test, ballots were scanned by the ICC, ICP & ICE and a results report was generated. Sufficient ballots were scanned to ensure each component accurately scanned at least a total of 1,575,000 ballot positions. During execution of the test procedure, it was verified that the D-Suite 5.4-NM System successfully completed the accuracy test with all actual results obtained during test execution matching the expected results. Results were also verified back through the EMS.

System Integration – System level certification tests were performed to address the integration of the hardware and software. This testing focused on the compatibility of the voting system software components and subsystems with one another and with other components of the voting system. During test performance, the system was configured as would be for normal field use.

Summary Findings:

System Integration was performed on the entire Democracy Suite 5.4-NM system. To perform the System Integration test, three General Elections and three Primary Elections were designed in the EED application. The elections were then loaded onto ICE and ICP ballot marking devices. Ballots were marked using the ICE and ICP units and were read by the ICC. The results were sent to RTR for results reporting. The System Integration included the elections described below, which were run from end-to-end:

Three general elections with the following breakdowns:

- General Election held in three precincts (one of which was a split precinct resulting in four jurisdictional divides) with nineteen contests

— General Election held in three precincts. This election contained fifteen contests compiled into three ballot styles.

— General Election designed to functionally test the handling of multiple ballot styles, support for at least three languages including a character-based language, support for common voting variations, and audio support for at least three languages and an ADA binary input device.

Three primary elections with the following breakdowns:

— Open Primary Election in two precincts. This election contained thirty contests compiled into five ballot styles.

— Primary Election held in two precincts. This election contained thirteen contests compiled into three ballot styles. One contest is in all three ballot styles; all other contests are independent.

— Primary Election designed to functionally test the handling of multiple ballot styles, support for at least three languages including a character-based language, support for common voting variations, and audio support for at least three languages and an ADA binary input device.

Note: As part of the previous test campaign (Democracy Suite (D-Suite) System Version 5.2 VVSG 1.0 Gap Analysis Test Report), Ranked Choice Voting was successfully tested.

During execution of the test procedure, it was verified that the D-Suite 5.4-NM System successfully completed the system level integration tests with all actual results obtained during test execution matching the expected results.

Physical Configuration Audit (PCA) – A PCA was performed to compare the voting system components submitted for testing to the manufacturer’s technical documentation. The PCA was conducted in two phases: Initial and Final. The Initial PCA was conducted in order to baseline the system prior to test campaign commencement. The Final PCA was conducted in order to verify the final software and hardware configurations.

Summary Findings:

During execution of the test procedure, the components of the D-Suite 5.4-NM System were documented by component name, model, serial number, major component, and any other relevant information needed to identify the component. For COTS equipment, every effort was made to verify that the COTS equipment had not been modified for use. Additionally, each technical document submitted in the TDP was recorded by document name, description,

document number, revision number, and date of release. At the conclusion of the test campaign, test personnel verified that any changes made to the software, hardware, or documentation during the test process were fully and properly documented.

Usability & Accessibility – Usability and Accessibility Testing was performed per the applicable requirements of the EAC 2005 VVSG 1.0. For this portion of the test campaign, results from the previous state effort and the EAC certification effort were reused as applicable. The system was then subjected to testing as needed.

Summary Findings:

The D-Suite 5.4-NM System successfully completed the applied Usability and Accessibility testing.

Security – During the execution of a security penetration evaluation, the system modifications were inspected to verify that various controls and measures were in place in order to meet the objectives of the security standards which include: protection of the critical elements of the voting system; establishing and maintaining controls to minimize errors; protection from intentional manipulation, fraud and malicious mischief; identifying fraudulent or erroneous changes to the voting system; and protecting the secrecy in the voting process.

Summary Findings:

The D-Suite 5.4-NM System successfully completed the applied Physical Security testing.

4 Conclusions

Based on the results obtained during the test campaign and the re-use of testing from the previous D-Suite 5.0-A and 4.14-E EAC certification test campaigns, where applicable, Pro V&V determines the D-Suite 5.4-NM System, as presented for evaluation, meets the requirements set forth for voting systems in the U.S. Election Assistance Commission (EAC) 2005 Voluntary Voting System Guidelines (VVSG), Version 1.0. Throughout the test campaign, as tests were executed, resultant data was inspected and technical documentation reviews were performed to ensure that each applicable requirement was met; therefore, fulfilling the test goals.

Re: Letter of Agreement

Dear Mr. Lovato,

The undersigned representative of Pro V&V, Inc. (hereinafter "Laboratory"), being lawfully authorized to bind Laboratory and having read the EAC Voting System Test Laboratory Program Manual, accepts and agrees on behalf of Laboratory to follow the program requirements as laid out in Chapter 2 of the Manual. Laboratory shall meet all program requirements as they relate to NVLAP accreditation; conflict of interest and prohibited practices; personnel policies; notification of changes; resources; site visits, notice of law suits; testing, technical practices and reporting; laboratory independence; authority to do business in the United States; VSTL communications; financial stability; and recordkeeping. Laboratory further recognizes that meeting these program requirements is a continuing responsibility. Failure to meet each of the requirements may result in the denial of an application for accreditation, a suspension of accreditation or a revocation of accreditation.

Sincerely,

A handwritten signature in black ink that reads "Jack Cobb".

Jack Cobb, President
Pro V&V, Inc. Laboratory Director

SUBJECT: Pro V&V EAC VSTL Accreditation

DATE: 1/27/2021

Pro V&V has completed all requirements to remain in good standing with the EAC's Testing and Certification program per section 3.8 of the Voting System Test Laboratory Manual, version 2.0:

Expiration and Renewal of Accreditation. A grant of accreditation is valid for a period not to exceed two years. A VSTL's accreditation expires on the date annotated on the Certificate of Accreditation. VSTLs in good standing shall renew their accreditation by submitting an application package to the Program Director, consistent with the procedures of Section 3.4 of this Chapter, no earlier than 60 days before the accreditation expiration date and no later than 30 days before that date. Laboratories that timely file the renewal application package shall retain their accreditation while the review and processing of their application is pending. VSTLs in good standing shall also retain their accreditation should circumstances leave the EAC without a quorum to conduct the vote required under Section 3.5.5.

Due to the outstanding circumstances posed by COVID-19, the renewal process for EAC laboratories has been delayed for an extended period. While this process continues, Pro V&V retains its EAC VSTL accreditation.

United States Election Assistance Commission

Certificate of Accreditation

Pro V&V, Inc.
Huntsville, Alabama

is recognized by the U.S. Election Assistance Commission for the testing of voting systems to the 2005 and 2015 Voluntary Voting Systems Guidelines (VVSG 1.0 & 1.1) under the criteria set forth in the EAC Voting System Testing and Certification Program and Laboratory Accreditation Program. Pro V&V is also recognized as having successfully completed assessments by the National Voluntary Laboratory Accreditation Program for conformance to the requirements of ISO/IEC 17025 and the criteria set forth in NIST Handbooks 150 and 150-22.

Original Accreditation Issued on: 2/24/2015

*Accreditation remains effective until revoked
by a vote of the EAC pursuant to 52 U.S.C. §
20971(c)(2).*

Major Updates of the Voluntary Voting System Guidelines 2.0

On February 10, 2021 the U.S. Election Assistance Commission adopted the Voluntary Voting System Guidelines (VVSG) 2.0. The major updates included in the VVSG 2.0 are the following:

- **Improved cybersecurity requirements to secure voting and election management systems associated with the administration of elections.**
 - Software independence
 - Requires systems to be air-gapped from other networks and disallows the use of wireless technologies
 - Physical security
 - Multi-factor authentication
 - System integrity
 - Data protection
- **Interoperability**
 - Ensures devices are capable of importing and exporting data in common data formats
 - Requires manufacturers to provide complete specifications of how the format is implemented
 - Requires that encoded data uses a publicly available method
- **Improved accessibility requirements to enhance the voting experience for voters with disabilities:**
 - VVSG 2.0 allows for systems where all voters can vote privately and independently throughout the voting process:
 - Marking
 - Verifying
 - Casting
 - Language access throughout the process
 - Improved documentation requirements for accessibility testing
 - Voter privacy features
 - Accessibility requirements derived from federal laws
- **Other Changes**
 - Ballot secrecy
 - Improved auditability
 - User-centered design
 - Reorganized to simplify usage and focus on functional requirements
- **Manuals**
 - Penetration testing
 - Component testing pilot program

[Additional information and the full text of the VVSG 2.0 can be found on the EAC's website.](#)

STATE OF NEW MEXICO

Melissa Romero
Dominion Voting Systems
melissa.romero@dominionvoting.com

Re: Recertification of Voting Systems

Dear Ms. Romero:

Pursuant to Section 1-9-7.4(A) NMSA 1978, the SOS is required to review for recertification each voting system already in use in the state in the year following a presidential election. All certified voting systems are required to be tested by an independent authority and comply with all requirements in the Election Code and the most recent voluntary voting system guidelines (VVSG) adopted by the United States Election Assistance Commission (EAC).

While VVSG 2.0 was adopted by the EAC in February 2021, the EAC has not yet certified any independent voting system testing laboratories (VSTLs) to test and certify voting systems to these new standards. We understand that the National Institute of Standards and Technology (NIST) is in the process of developing the test processes and procedures for VSTLs. After these are adopted, the VSTLs will be required to earn accreditation with the EAC to test voting systems to the new VVSG 2.0 standards. Since this effort is likely to take some time, we plan to review our current voting systems based upon the previously adopted standards. Once the EAC has testing and certification procedures in place for VVSG 2.0, we will initiate a new voting system certification initiative.

According to the Election Code, a “voting system” includes the equipment and peripherals used for casting and counting votes as well as the equipment and peripherals used for printing or marking ballots. The full legal definition of voting system can be found in Section 1-9-1(B) NMSA 1978.

To begin the testing and certification process required for recertification, we request that you submit the following information to our office no later than June 14, 2021:

1. The voting system and version that is being submitted for recertification.
2. A description of any modification to a hardware or software component or configuration of the voting system since the last time the system was certified for use in New Mexico, if applicable.
3. A description of how the system meets all of the applicable voting system requirements included in the New Mexico Election Code (see enclosures).

4. A copy of the most recent VSTL report and proof of compliance on the system eligible for recertification. The report provided must come from an EAC accredited test laboratory.
5. Description of your transition plan to become certified to VVSG 2.0, if applicable.

If you intend to have multiple system models or firmware versions recertified, please submit a separate application for each system. Enclosed for your convenience is a copy of the requirements for voting systems outlined in Article 9 of the Election Code.

Upon completion of an examination of all recertification materials, the SOS may require additional information, testing, or inspection as deemed necessary to comply with the recertification requirements in statute. After the SOS has completed a full review of all required information, the SOS shall make a written report and post the report and recertification materials on the SOS website for a mandatory 21-day public comment period.

Following the period of public comment, the SOS shall submit the reports and any public comments to the Voting System Certification Committee (VSCC) for their consideration and to make a recommendation to the SOS for recertification of the voting systems.

If you have questions or require any further information regarding the re-certification process, please contact me at Mandy.Vigil@state.nm.us.

Sincerely,

Mandy Vigil
State Elections Director

Enclosures: As stated

New Mexico Election Code Voting System Requirements

Voting Systems used for casting and counting ballots in the state shall meet all outlined requirements in Article 9 of the election code as follows:

1-9-7.7. Voting systems; technical requirements.

Voting systems certified for use in state elections shall:

- A. have a unique embedded internal serial number for audit purposes;
- B. be supplied with a dust- and moisture-proof cover for transportation and storage purposes;
- C. if the net weight of the system, or aggregate of voting device parts, is over twenty pounds, have self-contained wheels so that the system can be easily rolled by one person on rough pavement and can roll through a standard thirty-inch door frame;
- D. be a stand-alone, non-networked election system such that all pre-election, election day and post-election events and activities can be recorded and retained in each device;
- E. employ scalable technology allowing easy enhancements that meet United States election assistance commission standards and state law;
- F. have ancillary equipment, such as printers, power sources, microprocessors and switch and indicator matrices, that is installed internally or is modular and transportable;
- G. display publicly the number of ballots processed;
- H. be able to print:
 - (1) an alphanumeric printout of the contests, candidates and vote totals when the polls are opened so that the poll workers can verify that the counters for each candidate are on zero;
 - (2) an alphanumeric printout of the contests, candidates and vote totals at the close of the polls, which printouts shall contain the system serial number and public counter total; and
 - (3) as many copies of the alphanumeric printouts as necessary to satisfy state law; and
- I. include a feature to allow reports to be sent to an electronic data file.

1-9-7.8. Voting systems; operational requirements.

Voting systems certified for use in state elections shall:

- A. have internal application software that is specifically designed and engineered for the election application;
- B. include comprehensive diagnostics designed to ensure that failures do not go undetected;

- C. have a real-time clock capable of recording and documenting the total time polls are opened; and
- D. have a self-contained, internal backup battery that powers all components of the system that are powered by alternating current power; and, in the event of a power outage in the polling place:
 - (1) the self-contained, internal backup battery power shall engage with no disruption of operation for at least two hours and with no loss of data; and
 - (2) the system shall maintain all vote totals, public counter totals and the internal clock time in the event that the main power and battery backup power fail.

1-9-7.9. Voting systems; memory; removable storage media device; requirements.

Voting systems certified for use in state elections shall:

- A. be programmable with removable storage media devices;
- B. contain ballot control information, summary vote totals, maintenance logs and operator logs on the removable storage media device;
- C. ensure that the votes stored on the removable storage media device accurately represent the actual votes cast;
- D. be designed so that no executable code can be launched from random access memory;
- E. have any operating system software stored in nonvolatile memory, which shall include internal quality checks such as parity or error detection and correction codes, and which software shall include comprehensive diagnostics to ensure that failures do not go undetected;
- F. allow for pre-election testing of the ballot control logic and accuracy, with results stored in the memory that is used on election day, and shall be capable of printing a zero-results printout prior to these tests and a results printout after the test;
- G. have internal audit trail capability such that all pre-election, election day and post-election events shall be stored, recorded and recovered in an easy-to-read printed form and be retained within memory that does not require external power for memory retention;
- H. possess the capability of remote transmission of election results to a central location only by reading the removable storage media devices once they have been removed from the tabulation device after the poll closing sequence has been completed; and
- I. prevent data from being altered or destroyed by report generation or by the transmission of results.

The EMS has wireless capability by statute

1-9-7.10. Voting systems; ballot handling and processing requirements.

Voting systems certified for use in state elections shall:

- A. accept a ballot that is a minimum of six inches wide and a maximum of twenty-four inches long, in dual columns and printed on both sides;
- B. accept a ballot in any orientation when inserted by a voter;
- C. have the capability to reject a ballot on which a voter has made more than the allowable number of selections in any contest;
- D. be designed to accommodate the maximum number of ballot styles or ballot variations encountered in the largest New Mexico election jurisdiction; and
- E. be able to read a single ballot with at least four hundred twenty voting positions.

1-9-7.11. Voting systems; source code; escrow.

As a condition of initial certification and continued certification, the source code that operates a voting system shall be placed in escrow and be accessible to the state of New Mexico in the event the manufacturer ceases to do business or ceases to support the voting system.

June 14, 2021

sent via electronic mail

Ms. Vigil:

Dominion Voting Systems, Inc. (Dominion) hereby requests re-certification by the New Mexico Secretary of State of the Democracy Suite 5.4 voting system. Specifically, we seek approval for:

- **Democracy Suite Election Management System v5.4.17.5** – application software used to manage the election workflow, from import of election definition information, ballot layout, voting machine programming and pre-election test, Election Night reporting, and post-election activities.
- **Democracy Suite Adjudication v5.4.17.3** – application software used to allow ballots with exceptions or out-stack conditions such as over-votes, blank ballots, write-ins and marginal marks to be resolved on-screen and sent to tally.
- **ImageCast Evolution v5.4.8.3** – an accessible voting machine that combines an optical scanner and a ballot marking device, suitable for use by all voters while complying with the accessibility requirements of the Help America Vote Act and the 2005 Voluntary Voting System Guidelines (VVSG).
- **ImageCast Central v5.4.2.1** – a high-speed absentee ballot central scanning solution that utilizes Canon brand scanners (DR-X10C and DR-G1130).

Dominion would also like to submit for re-certification:

- **ImageCast Central v5.4.2.2**, which the State previously approved for use in jurisdictions using the Rank Choice Voting method in Democracy Suite 5.4 voting system.

There have been no modifications to the hardware or software for this configuration except the removal of the ImageCast Precinct tabulator, which is no longer in use in the State.

This letter includes a point-by-point commentary on the items in the *2015 Election Handbook* that apply to voting systems to aid the examination committee in better understanding the Democracy Suite 5.4 system.

Enclosed with this letter is the Technical Data Package (TDP) for this system along with a list of other States' approvals of this or other versions of the Democracy Suite system. As there is considerable documentation to cover the system, I recommend that any reviewers start with 2.02 – System Configuration and Overview Guide. The Overview Guide provides introductory material for the system, with some degree of detail regarding its components and their specifications. From there, documents starting with 2.03, 2.04, 2.05, and 2.06 contain detailed specifications of system hardware, software, and security. Documents starting with 2.08, 2.09, and 2.10 as well as User Guides describe how the

system is set-up, operated, and maintained. Also included are the New Mexico User Guide documents.

This application also includes a copy of the Test Report from ProV&V, an EAC accredited voting system test laboratory (VSTL). A description of Dominion's VVSG 2.0 transition plan is also included.

The materials supporting this re-certification application will be provided through a download link that will be sent via email to you. To access the download link, a passphrase will be required, which will be sent via a separate email. Due to the proprietary nature of the materials, they will be compressed into encrypted ZIP files. Once you've received the download, please contact me and I will provide you with the passphrase for decrypting the contents of the ZIP files.

We look forward to working with you toward the re-certification of Democracy Suite 5.4 in the State of New Mexico.

Sincerely,

A handwritten signature in black ink, appearing to read 'Ian Piper', with a stylized flourish at the end.

Ian Piper
Certification Director
Dominion Voting Systems, Inc.

New Mexico requirements and Democracy Suite 5.4, Summary

1-9-7.1. Voting system; use of paper ballot.

A. All voting systems used in elections covered by the Election Code [Chapter 1 NMSA 1978] shall use a paper ballot on which the voter physically or electronically marks the voter's choices on the ballot itself.

Democracy Suite 5.4 is an optical scan voting system. Voters with accessibility needs mark their ballot using the ImageCast® Evolution, generating a paper ballot.

1-9-7.7. Voting systems; technical requirements.

Voting systems certified for use in state elections shall:

A. have a unique embedded internal serial number for audit purposes;

Each unit carries a serial number in non-volatile internal memory, given to the unit at the time of its manufacture.

B. be supplied with a dust- and moisture-proof cover for transportation and storage purposes;

Each ballot box has a top cover for this purpose; individual units can be transported in a dust and moisture proof case.

C. if the net weight of the system, or aggregate of voting device parts, is over twenty pounds, have self-contained wheels so that the system can be easily rolled by one person on rough pavement and can roll through a standard thirty-inch door frame;

All ballot boxes have casters, are designed to be moved by one person, and fit through a 30-inch door.

D. be a stand-alone, non-networked election system such that all pre-election, election day and post-election events and activities can be recorded and retained in each device;

Dominion recommends strongly that the election systems never be attached to the Internet or other network. Democracy Suite 5.4 is capable of operating in this manner.

E. employ scalable technology allowing easy enhancements that meet United States Election Assistance Commission standards and state law;

Democracy Suite 5.4 has a variety of scalable configurations and platform options. It has been certified by the U.S. Election Assistance Commission (EAC) to the VVSG 2005 requirements.

F. have ancillary equipment, such as printers, power sources, microprocessors and switch and indicator matrices, that is installed internally or is modular and transportable;

All necessary printers, power supplies, and similar ancillary devices required for precinct use are built into the voting machine or ballot box.

G. *display publicly the number of ballots processed;*

The ImageCast Evolution scanner continuously shows the number of ballots processed (Public Counter) when polls are open.

H. *be able to print:*

(1) *an alphanumeric printout of the contests, candidates and vote totals when the polls are opened so that the poll workers can verify that the counters for each candidate are on zero;*

(2) *an alphanumeric printout of the contests, candidates and vote totals at the close of the polls, which printouts shall contain the system serial number and public counter total; and*

(3) *as many copies of the alphanumeric printouts as necessary to satisfy state law; and*

All ImageCast equipment is capable of printing reports to these specifications. They also allow the jurisdiction to program a default number of report copies and allow the pollworker to print additional report copies as needed.

I. *include a feature to allow reports to be sent to an electronic data file.*

Reports can be exported to Excel, pdf, and other formats at the jurisdiction's discretion.

1-9-7.8. Voting systems; operational requirements.

Voting systems certified for use in state elections shall:

A. *have internal application software that is specifically designed and engineered for the election application;*

All internal application software is produced by Dominion Voting Systems, specifically for elections.

B. *include comprehensive diagnostics designed to ensure that failures do not go undetected;*

All scanners have a Power-On Self-Test (POST) as well as continuous monitoring of all critical functions so that malfunctions result in immediate warning to the pollworker and in unrecoverable situations, unit shutdown.

C. *have a real-time clock capable of recording and documenting the total time polls are opened; and*

All scanners have a real-time clock. Poll opening and closing events are recorded in the unit's audit log.

D. *have a self-contained, internal backup battery that powers all components of the system that are powered by alternating current power; and, in the event of a power outage in the polling place:*

(1) *the self-contained, internal backup battery power shall engage with no disruption of operation for at least two hours and with no loss of data; and*

(2) the system shall maintain all vote totals, public counter totals and the internal clock time in the event that the main power and battery backup power fail.

All precinct-based scanners contain an internal battery tested to maintain at least two hours of operation. In the event that battery power is exhausted, all vote totals, counters, clock time, and any votes cast and confirmed to a voter are saved.

1-9-7.9. Voting systems; memory; removable storage media device; requirements.

Voting systems certified for use in state elections shall:

A. be programmable with removable storage media devices;

Each ImageCast scanner, as well as Central Count scanners, are programmed through Compact Flash cards.

B. contain ballot control information, summary vote totals, maintenance logs and operator logs on the removable storage media device;

These items are carried on the Compact Flash cards for each scanner, and can be uploaded along with results from that scanner.

C. ensure that the votes stored on the removable storage media device accurately represent the actual votes cast;

ImageCast Evolution utilizes a pair of Compact Flash cards, writing results information to each one and checking that written information so that the accuracy of the information on each card is ensured. Mismatches in card content cause the unit to give a warning message then shut down.

D. be designed so that no executable code can be launched from random access memory;

ImageCast scanners are protected from code being launched from random access memory. The firmware for each unit is encrypted and signed when placed in the unit and only that code will execute on the scanner.

E. have any operating system software stored in nonvolatile memory, which shall include internal quality checks such as parity or error detection and correction codes, and which software shall include comprehensive diagnostics to ensure that failures do not go undetected;

The operating system for the scanners is stored in non-volatile memory on each unit. Each unit undergoes a Power-On Self-Test (POST) to ensure the integrity of its firmware prior to allowing polls to be opened.

F. allow for pre-election testing of the ballot control logic and accuracy, with results stored in the memory that is used on election day, and shall be capable of printing a zero-results printout prior to these tests and a results printout after the test;

Pre-election logic and accuracy testing is accomplished using the same compact flash cards in each unit that will be utilized on Election Day. Zero tapes are available at the start of pre-election logic and accuracy test as well as Election Day. Results tapes are also available after pre-election logic and accuracy testing and Election Day.

G. have internal audit trail capability such that all pre-election, election day and post-election events shall be stored, recorded and recovered in an easy-to-read printed form and be retained within memory that does not require external power for memory retention;

Each ImageCast scanner, as well as the central election management software maintain audit trails in accordance with VVSG 2005 requirements. These can be recovered in soft files and printed to hard copy as desired. The logs are stored on the Compact Flash cards in the scanners until uploaded to the election management software.

H. possess the capability of remote transmission of election results to a central location only by reading the removable storage media devices once they have been removed from the tabulation device after the poll closing sequence has been completed; and

The Democracy Suite 5.4 system accommodates remote transmission sites wherein, after a paper tape results report is printed, the Compact Flash cards containing results and logs are removed from the scanners and the contents transmitted subsequent to that removal.

I. prevent data from being altered or destroyed by report generation or by the transmission of results.

Report generation and transmission do not affect the raw results or logs. This applies to any of the scanners and the election management software.

1-9-7.10. Voting systems; ballot handling and processing requirements.

Voting systems certified for use in state elections shall:

A. accept a ballot that is a minimum of six inches wide and a maximum of twenty-four inches long, in dual columns and printed on both sides;

ImageCast scanners meet this requirement, being able to scan 8.5 inch by 11, 14-, 17-, 20-, and 22-inch ballots, two to four columns, double-sided.

B. accept a ballot in any orientation when inserted by a voter;

Any of the four possible orientations are read by ImageCast scanners.

C. have the capability to reject a ballot on which a voter has made more than the allowable number of selections in any contest;

Overvoted contests will cause a ballot to be rejected by the scanner.

D. be designed to accommodate the maximum number of ballot styles or ballot variations encountered in the largest New Mexico election jurisdiction; and

Democracy Suite is designed to accommodate the largest jurisdictions in the United States and can easily accommodate New Mexico jurisdiction geographic and ballot layout needs.

E. be able to read a single ballot with at least four hundred twenty voting positions.

Democracy Suite can prepare ballots with 462 ballot positions.

1-9-7.11. Voting systems; source code; escrow.

As a condition of initial certification and continued certification, the source code that operates a voting system shall be placed in escrow and be accessible to the state of New Mexico in the event the manufacturer ceases to do business or ceases to support the voting system.

Dominion utilizes the NCC Group as a third-party escrow agent. The State of New Mexico has been given beneficiary status for the escrowed products of this system configuration. The release conditions meet the state's requirements.

1-9-13. Voting system technicians.

A. Voting system technicians shall be trained and certified by the secretary of state as to their adequacy of training and expertise on voting systems certified for use in the state.

Dominion has a variety of training courses and materials to aid in compliance with this requirement.

May 25, 2021

Maggie Toulouse Oliver
New Mexico Secretary of State
325 Don Gasper, Suite 300
Santa Fe, New Mexico 87501

RE: Application for Recertification of AskED Ballot Printing System

Dear Secretary Toulouse-Oliver,

In response to your May 18, 2021 letter Robis Elections is requesting the recertification of the AskED Ballot Printing System.

The AskED Ballot Printing System (The System) was independently tested by SLI Global Solutions (SLI) in December of 2011. SLI Global Solutions is testing laboratory accredited by the National Institute of Standards and Technology (NIST) and has been given accredited voting system testing lab (VSTL) status by the Election Assistance Commission. Based on the results of the independent testing, the AskED System was certified by the Voting System Certification Committee (VSCC) in New Mexico in 2011, 2013 and 2017.

In addition to the testing provided by SLI in 2011, the printers used by the AskED System were submitted for testing by Dominion Voting in 2016. After testing, the printers were successfully qualified for use with Dominion ImageCast Tabulators currently in use throughout the State of New Mexico. A copy of the qualification letter is included with the application.

Enhancements continue to be made to the AskED Software, such as support of SERVIS APIs, Same Day Registration, and improvements do not impact areas of functionality required in the New Mexico State Election Code nor is there any specific test for these features. The specific State requirements were tested by SLI and the AskED system proved compliant. Therefore, the lab report provided by SLI is still relevant for determining if the AskED System meets code requirements. In addition to the 2011 report, we have included certification test results from the states of California, New York, and Virginia

Furthermore, the AskED System has been successfully implemented multiple times throughout the State of New Mexico, including:

- Bernalillo County: All statewide elections 2012-2021, non-statewide elections 2013-2021.
- San Juan County: All statewide elections 2014-2021, non-statewide elections 2013-2021.
- Sandoval County: Statewide elections 2016-2021.
- Dona Ana County: All statewide elections 2018-2021, non-statewide election 2017-2021
- Taos County: Statewide elections 2018 and 2020
- McKinley County: Statewide elections 2018
- City of Farmington: Municipal Election 2014 & 2016
- City of Las Cruces: Municipal Election 2017
- City of Rio Rancho: Municipal Election 2020

City of Aztec: Municipal Election 2020
City of Bloomfield: Municipal Election 2020
Town of Kirtland: Municipal Election 2020

In all of these elections the Asked Ballot Printing System has again been proven compliant with New Mexico State Election Code.

We submit this and request that our system once again be certified for use in the State.

Sincerely,

A handwritten signature in black ink, appearing to be "D Davoust", written over a white background.

David Davoust
President
Robis Elections, Inc.

1 Introduction

SLI Global Solutions is submitting this report as a summary of the testing efforts and requirements review for the State of New Mexico Ballot on Demand testing program.

Within the scope of this project, Robis was requested to provide an implementation of their system as declared to the State of New Mexico. SLI also requested Robis provide any available information with regard to the implemented system, SLI reviewed what documentation was provided.

As directed by the State of New Mexico, the primary focus of this project was the evaluation of the requirement set, as provided by the State, against the submitted Ballot on Demand systems. The review and testing was performed at SLI's Denver, Colorado facility.

SLI is a full service third party testing facility, founded in May 1996, from a software test-consulting firm. The specific system testing services offered include:

- Test Planning and Test Management
- eBusiness, Client-Server and Stand-alone Application Functional, Compatibility and Regression Testing
- eBusiness and Client-Server Load and Performance Testing
- Automated Regression Test Development, Consulting, Scripting and Execution
- Complex, Integrated Test Solutions and Automated Test Harnesses
- Independent Verification and Validation
- EAC approved and NIST NVLAP accredited Voting System Test Laboratory

1.1 References

1. Ballot on Demand Standards for State of New Mexico
2. SLI Quality System Manual, Revision Rev. 1.12, prepared by SLI, dated February 24, 2011.

2 Robis System Overview

2.1 Documentation Provided

The list below details the documentation set provided by Robis for review and use by SLI in setup of the system and creation of tests to be run.

- User Training packet

2.2 Declared System to be Reviewed

Robis provided the applications and hardware listed below, as the components of their Ballot on Demand system.

- AskED
- HP LaserJet 5200tn (Q7545A) printer

3 Testing Methodology Employed

3.1 Test Campaign

In a test campaign, SLI expects a production level system delivered for testing. This encompasses any and all hardware, consumables and applications; a declaration of the functionality supported by the system; and documentation of how the system is employed by a jurisdiction.

A certification test campaign is broken out into 5 main phases, each phase building upon the preceding phases.

The first phase deals with receipt of the system's components and applicable documentation. The manufacturer is requested to provide training on the various aspects of the system under test. Additionally, the first phase encompasses reviewing the documentation provided. At the end of the first phase, with a more in-depth understanding of the system based on the documentation review, as well as provided training, test creation is begun that details how the declared requirement set will be verified against with regard to the system under test.

The second phase deals with the creation of the individual test modules that will execute each piece of functionality within the system under test.

The third phase deals with the correctness of each module. This phase can be iterative until all modules are determined to be correct in implementation.

The fourth phase deals with the formal execution of each test.

The fifth phase deals with creation, submission and acceptance of the certification test report.

4 Test Background

4.1 Review

For section 3, "Hardware Requirements", analysis was conducted via a documentation review for each component within the system. Robis supplied third party documentation from each vendor, which contained the pertinent information to make determinations as to the components capability of meeting each requirement.

4.2 Functional Testing

SLI's tests were customized for the Robis ballot on demand system and conducted for the functional testing.

Simulations of General and Primary election cycles were conducted, utilizing elections and related ballot styles, as provided by the State of New Mexico. These simulations were conducted to demonstrate a beginning-to-end business use case process for the Robis ballot on demand system. Areas addressed by the requirements include appropriate printout representation of ballots, tracking of voter ballots in early and absentee voting scenarios, as well as appropriate auditing and reporting capabilities.

5 Requirements Analysis

5.1 Requirements Reviewed

This section reviews how the system under test performed in relation to the requirement set provided by the State of New Mexico.

1 Functional Capabilities

All on demand ballot generation systems shall provide the general capabilities for ballot preparation and shall be capable of:

- 1.1 enabling the automatic formatting of ballots in accordance with the requirements of the New Mexico Election Code, as amended from time to time, for offices, candidates and questions qualified to be placed on the ballot for each political subdivision and election district;

Review:

Using Primary election style and General election style ballots as supplied by the State of New Mexico, it was verified that the Robis ballot on demand system is capable of printing a ballot automatically formatted with the appropriate offices, candidates and questions qualified to be placed on the ballot for each political subdivision and election district, as well as with any pertinent overlays.

- 1.2 supporting the maximum number of potentially active voting positions;

Review:

Using a ballot style representative of a maximum active voting position layout, as supplied by the State of New Mexico, it was verified that the Robis ballot on demand system is capable of printing a ballot supporting the maximum active voting positions.

- 1.3 generating ballots for a primary election that segregate the choices in partisan contests by party affiliation;

Review:

Using a Primary election style ballot, as supplied by the State of New Mexico, it was verified that the Robis ballot on demand system is capable of printing ballots for a primary election that segregates the choices in party contests, by party affiliation.

- 1.4 generating ballots that contain identifying codes or marks uniquely associated with each format;

Review:

Printing of different ballot styles within a jurisdiction, for both primary and general elections, it was verified that the Robis ballot on demand system is capable of generating ballots that contain identifying codes or marks that are uniquely associated with each format.

- 1.5 ensuring that voting response fields properly align with the specific candidate names and/or questions printed on the ballot;

Review:

Printing single ballots and batches of ballots, of both primary and general elections, it was verified that the Robis ballot on demand system generates voting response fields properly aligned with the specific candidate names and/or questions printed on the ballot.

- 1.6 generating ballots which can be tabulated by all certified voting systems in the state;

Review:

Using ballots supplied by the State of New Mexico, of both primary and general elections, it was verified that the Robis ballot on demand system is able to produce ballots which are capable of being tabulated by the certified voting systems in the state.

- 1.7 generating a ballot for an individual voter based on voter registration data provided by state or county;

Review:

Using the voter registration data set provided by the State of New Mexico, it was verified that the Robis ballot on demand system is able to generate an individual voter's ballot, as needed.

1.8 functionality in both absentee and early voting environments;

Review:

Using primary and general election style ballots, as provided by the State of New Mexico, the functionality was verified that the Robis ballot on demand system is functional in both absentee and early voting environments. Elections configured included: an early voting primary, an absentee primary, an early voting general and an absentee general election. This allowed the system to produce ballots, as well as detailed reporting for each election.

1.9 providing absentee ballot tracking ability;

Review:

It was verified, that the Robis ballot on demand system, provides adequate absentee ballot tracking capabilities.

1.10 uniform allocation of space and fonts used for each office, candidate and question such that the voter perceives no active voting position to be preferred to any other;

Review:

Using ballots supplied by the State of New Mexico, it was verified that the Robis ballot on demand system is able to produce ballots, as created by voting systems certified by the State, with uniform allocation of space and fonts, such that no active voting position is perceived to be preferential to any other position.

1.11 rendering the ballot in any of the languages required by the Voting Rights Act of 1965, as amended;

Review:

Using ballots supplied by the State of New Mexico, it was verified that the Robis ballot on demand system is able to render the ballot in any language, as prescribed by the State (English and Spanish).

- 1.12 conformity with voting system vendor specifications for type of paper stock, weight, size, shape, size, font and location of voting positions used to record votes, folding, bleed through, and ink for printing.

Review:

Using ballots supplied by the State of New Mexico, it was verified that the Robis ballot on demand system is able to utilize paper and ink type that conforms to voting systems, certified by the State, prescribed requirements, such that ballots are appropriately produced.

- 1.13 interfacing with the statewide voter file for the exchange of data.

Review:

Using the voter registration data supplied by the State, the Robis ballot on demand system was verified to be capable of interfacing with the statewide voter file, for the exchange of data.

2 Security Capabilities

All on demand ballot generation systems shall provide the security capabilities for ballot preparation and shall be capable of:

- 2.1 providing a full audit trail of individual voter activity;

Review:

It was verified that the Robis ballot on demand system is capable of adequately providing full audit trails for individual voter activities.

- 2.2 providing full ballot production audit logs for all activity including, but not limited to, absentee by mail, in person absentee, early voting, provisional voting and spoiling ballots;

Review:

The Robis ballot on demand system is capable of producing this information. The audit log contains all of the required items. The system is not meant for the pollworker to be able to search through the logs. It is assumed, by Robis, that the log would be analyzed either using SQL

queries or by loading into excel or another program. At that point, the user can see any subset of the audit log data they so choose.

2.3 creation and preservation of an audit trail of every ballot issued during a period of interrupted communication in the event of loss of network connectivity;

Review:

It was verified that the Robis ballot on demand system is capable of creation and preservation of an audit trail of every ballot issued, from its system, during periods of interrupted communications due to the loss of network connectivity.

2.4 suitable security passwords at user, administrator and management levels;

Review:

The Robis ballot on demand system provides suitable password security policies such that the system is secure to each role level implemented, though there are only two roles provided, user and management. No Administration type role is provided through the system. Robis utilizes the Windows operating system Administrator role for the third role level.

2.5 preventing the modification of ballot formatting by polling place users.

Review:

It was verified that the Robis ballot on demand system provides suitable security, by implementation of appropriate password policy enforcement and role enforcement, that no polling place user is able to modify a ballots format.

2.6 retaining full functionality and capability of printing ballots during a period of interrupted communication in the event of a loss of network connectivity

Review:

It was verified that the Robis ballot on demand system does retain full functionality and capability of printing ballots during periods of interrupted communications, such as the event of a loss of network connectivity, by removing network connectivity to the system.

3 Hardware Requirements

All on demand ballot generation systems shall provide the hardware requirements, as follows:

3.1 must be networkable and scalable for multiuser environments;

Review:

The Robis ballot on demand hardware complies with this requirement.

The HP LaserJet 5200tn (Q7545A) printer has four possible network printer configurations:

1. Connect directly to the network (direct mode or peer-to-peer printing).
2. Connect directly to the network and a shared print queue is configured on a network file/print server (client-server printing).
3. Connect directly to a PC that acts as a print server, allowing the printer to be shared to PC clients on the network.
4. PC clients connect to a device that has already been set up on the network, or connect to a print queue that is shared from either another PC client or file/print server. Complies with this requirement.

- HP LaserJet 5200tn (Q7545A) printer
 - **Connectivity, standard:** 1 IEEE-1284 parallel; 1 USB; 1 Fast Ethernet 10/100; 1 EIO
 - **Connectivity, optional:** HP Jetdirect 175x Fast Ethernet Print Server (J6035G), HP Jetdirect en3700 Fast Ethernet Print Server (J7942G), HP Jetdirect 620n Fast Ethernet Print Server (J7934G), HP Jetdirect 625n Gigabit Ethernet Print Server (J7960G), HP Jetdirect 635n IPv6/IPsec Print Server (J7961G), HP Jetdirect ew2400 802.11g Wireless Print Server (J7951G)

3.2 function without degradation in capabilities after transit to and from the place of use;

Review:

The Robis ballot on demand hardware complies with this requirement.

- Storage temperature: 0 to 40° C. Storage humidity: 10 to 80%
H. Noise level per ISO 9296: Sound power: LwAd 6.84 B(A).
Sound pressure: LpAm 54 dB(A)

3.3 function without degradation in capabilities after storage between elections;

Review:

The Robis ballot on demand hardware complies with this requirement. Printing and paper storage environment should be at or near room temperature, and not too dry or too humid.

- HP LaserJet 5200tn (Q7545A) printer
 - Printer cartridge black: 12,000 pages ~6 months in accordance with ISO/IEC 19752
 - Environmental Conditions
 - Temperature (printer and print cartridge):
 - Printing: 15° to 32.5°C (59° to 89°F)
 - Storage/standby: -20° to 40°C (-4° to 104°F)
 - Relative humidity:
 - Printing: 10% to 80%
 - Storage/standby: 10% to 90%
 - Storage: The paper storage environment should be properly maintained to ensure optimum printer performance. The required condition is 20° to 24°C (68° to 75°F), with a relative humidity of 45% to 55%.
 - Storage Temperature: 32 to 104 degrees F (0 to 40 degrees C)

3.4 function in the natural environment, including variations in temperature, humidity and atmospheric pressure;

Review:

The Robis ballot on demand hardware complies with this requirement.

- HP LaserJet 5200tn (Q7545A) printer
 - Operating Temperature:
 - 50 to 90 degrees F (10 to 32 degrees C)
 - Storage Temperature:
 - 32 to 104 degrees F (0 to 40 degrees C)
 - Relative Humidity Conditions:
 - 20 to 80 %, non-condensing

3.5function in induced environment, including proper and improper operation and handling of the system and its components during the election process;

Review:

The Robis ballot on demand hardware complies with this requirement

- HP LaserJet 5200tn (Q7545A) printer
 - Operating Temperature:
 - 50 to 90 degrees F (10 to 32 degrees C)
 - Storage Temperature:
 - 32 to 104 degrees F (0 to 40 degrees C)
 - Relative Humidity Conditions:
 - 20 to 80 %, non-condensing

3.6contain prominent instructions as to any special requirements;

Review:

The Robis ballot on demand hardware complies with this requirement

LaserJet 5200tn (Q7545A) printer provides step-by-step instructions, troubleshooting the printer, etc.

3.7have no restrictions on space allowed for installation, except that the arrangement of the system shall not impede the performance of duties by election workers, the orderly flow of voters through the polling place or the ability of the voter to vote in private;

Review:

This requirement will be determined by the allowed space for installation per location and the physical dimensions of the HP LaserJet 5200tn (Q7545A) printer

- Dimensions:
 - Height 404 mm (15.9 in)
 - Depth 535 mm (21 in)
 - Width 490 mm (19.3 in)
 - Weight 30.2 kg (66.5 lb)

3.8 operate with the electrical supply ordinarily found in polling places (Nominal 120 Vac/60Hz/1 phase).

Review:

The Robis ballot on demand hardware complies with this requirement.

- HP LaserJet 5200tn (Q7545A) printer
 - Power Specifications: (AC110 – 127V, 50/60Hz (+/- 2 Hz).
 - Rated short-term current: 10.0 Amps

4 Software Requirements

All on demand ballot generation systems shall provide software requirements as follows:

4.1 must be capable of exporting voter data and voter activity status data to state/county voter registration systems;

Review:

It was verified that the Robis ballot on demand system is capable of exporting voter data, as required, to state/county voter registration systems.

4.2 must be capable of generating all required absentee and early voting signature rosters in state approved format;

Note that 4.2, was provided the additional clarification by the State:

NMSA 1-12-7.3: Signature rosters and checklists of voters; contents.

A. The signature roster and checklist of voters for any precinct shall contain for each voter, as

shown in the county register, the voter's:

- (1) name;
- (2) gender;
- (3) place of residence;
- (4) year of birth;
- (5) party affiliation, if any; and
- (6) precinct of residence.

B. In addition, the names on each signature roster and checklist of voters shall be numbered

consecutively beginning with the number "1".

C. On each page of each signature roster and each checklist of voters there shall be printed the page number and the date and name of the election for which they are to be used.

Review:

The Robis ballot on demand system does contain a capability to generate voting signature rosters, though it does not make the differentiation of absentee or early voting. The current signature roster refers to early voting. Robis has indicated that with guidance from the State on absentee specifications, that a specific absentee signature roster can be implemented.

4.3 must generate daily and to-date activity reports based on user defined criteria

Review:

Robis provides the user four reports that can be run as the daily or to-date reports. With the implementation of these reports Robis considers their system to meet the "user defined criteria" portion of the requirement. Within the reports themselves the user does not have a capability to define specific criteria other than to specify daily vs. to-date. Robis has indicated that it can add any additional criteria requested by the state; however, no other criteria were specified in the requirements..

4.4 must have both single transaction and batch transaction absentee production capability.

Review:

It was verified that the Robis ballot on demand system is capable of processing ballot requests in both single transaction and batch transaction modes.

5 Usability Requirements

All on demand ballot generation systems shall provide usability requirements as follows:

- 5.1 Capable of being operated by computer users familiar with a graphical user interface.

Review:

It was verified that a computer user with basic familiarity with graphical user interfaces are capable of operating the Robis ballot on demand system.

6 Test Results Summary

The Robis Elections system has shown the capabilities to fulfill ballot on demand functionality in creating single ballot transactions as well as batch transactions. The system is able to create reports and audit logs on activity as listed in the requirement set. The system has also shown the capability to interact with voter registration systems..

For requirement 4.2, the Robis ballot on demand system does contain a capability to generate voting signature rosters, though it does not make the differentiation of absentee or early voting. The current signature roster refers to early voting. Robis has indicated that with guidance from the State on absentee specifications, that a specific absentee signature roster can be implemented.

For requirement 4.3, Robis provides four reports that can be run as the daily or to-date reports. With the implementation of these reports Robis considers their system to meet the "user defined criteria" portion of the requirement. Within the reports themselves the user does not have a capability to define specific criteria other than to specify daily vs. to-date. Robis has indicated that it can add any additional criteria requested by the state; however, no other criteria were specified in the requirements..

Good morning, Commissioner Griffin,

I watched a recent video on the Otero election for 2020. There was a spreadsheet on a slide that showed data that I cannot read, for the counties I lost in 2020 for District 8.

It's extremely difficult for me to read what it said. Think you could pass my contact on to Dr. Clements? I have no interest in pursuing legal recourse in NM courts, as I am now a Texas resident again. Just want to see what others believe happened, because my instincts said it wasn't right.

Yes, of course. See attached and please let us know if you have any questions. I will forward you the backup documentation from the SOS and EAC regarding the lack of certification on the machines in a separate email since it is a large file.

Erin

LEGAL MEMORANDUM

**“Unequal weights and unequal measures
are both alike an abomination to the LORD.”**

- Proverbs 20:10

This memorandum follows an evidentiary presentation¹ concerning Dominion Voting Systems (Dominion) and ROBIS ePollbook vulnerability in Otero and Torrance Counties. The memorandum:

- (1) Provides legal authorities relevant to your County Commission and Clerk.
 - (2) Identifies violations of the Election Code by the Secretary of State (SOS) and her agents.
 - (3) Identifies existing vulnerabilities in Dominion and ROBIS ePollbooks, requiring immediate action.
 - (4) Provides immediate recommendations for the responsible administration of elections.
-

WHO HAS THE AUTHORITY TO ADMINISTER AND CERTIFY ELECTIONS?

Elections are administered both at the state and county level, with powers delegated by the legislature to the SOS, the Board of County Commissioners, and County Clerks, as established by the New Mexico State Constitution (**NM. Const. Art. VII Section 1(B)**) and the **Election Code (NMSA 1-1-1 through NMSA 1-26-6)**.

These elected officials possess concurrent jurisdiction to govern the overall conduct of elections. However, when each party is left to their own distinct legal role, the whole of elections cannot be performed. For example, while the Clerk counts votes and the Sheriff assists in safeguarding and delivering election records, the County Commissioners are exclusively responsible for certifying post-election results in their jurisdiction. To put it another way, even though the SOS is the chief “elections officer” in the state, the SOS cannot certify Otero County’s post-election results as a matter of law. The SOS cannot even certify a voting machine’s use at the county level before elections begin.² The SOS can merely receive results from Otero County after they are certified (in addition to the 32 other counties throughout New Mexico), and *then* record and report those results to the public at large.

¹ Audit findings from several New Mexico counties are provided in the memo, as deviations in one county necessarily affect all ballot races shared with Otero County. The full Torrance County presentation can be reviewed here: <https://rumble.com/v16cc09-torrance-county-commission-estancia-new-mexico-may-25-2022.html>. The full Otero presentation can be viewed here: <https://youtu.be/Fg6Gf6QjqGM>.

² See NMSA 1-11-5.

In other words, each elected body has exclusive jurisdiction to carry out legally prescribed responsibilities that cannot be delegated away or usurped by the other. Case in point, when the SOS sought to institute straight-ticket voting in the 2018 general election, her actions were struck down by the New Mexico Supreme Court as unconstitutional, because the legislature alone has plenary authority over elections. *Unite New Mexico v. Oliver*, 2019-NMSC-009. Secretary Oliver sought to take legislative power she did not possess. While the legislature certainly conferred authority to her to prescribe the “form of the ballot,” they never delegated her with power to determine the “question of straight-ticket voting.” *See Id.*

The question before this Commission is profoundly more dire than simply determining where the SOS’s power starts and stops. As demonstrated during the evidentiary presentation, the suite of Dominion voting machine products and ROBIS ePollbooks used in Otero County are massively vulnerable.

Those vulnerabilities, in addition to Mark Zuckerberg funded drop boxes, have been exploited to carry out systemic fraud throughout New Mexico. The result is an erosion of trust in Otero County elections. It’s one thing to identify the SOS’s gross negligence in procuring machines that are easily hacked, subverted, and not certified in accordance with the Election Assistance Commission’s (EAC) guidelines.³ It’s quite another matter to foist those same machines on counties, force their use in the administration of elections, and then *demand you certify the results.*

All elected officials, including County Commissioners, “shall treat their position as a public trust,” and “shall use the powers and resources of public office only to advance the public interest.” *See NMSA 10-16-3.* Likewise, County Commissioners “shall conduct themselves in a manner that justifies the confidence placed in them by the people, at all times maintaining the integrity and discharging ethically the high responsibilities of public service.” *See NMSA 10-16-3(B).*

When the SOS fails to protect the interests of the voter in Otero County, the remaining representatives of the body politic are duty-bound to act as checks and balances against that weaker or corrupted vessel, to ensure justice and the rule of law are observed and restored. Simply put, the County Commission can withhold certification until it is satisfied that all major vulnerabilities in the election process have been removed.

ELECTION CODE AUTHORITY OF COUNTY COMMISSIONERS

The purpose of the Election Code is to secure “the purity of elections and guard against the abuse of the elective franchise.” *NMSA 1-1-1.1.*

³ As explained below, adherence to EAC “guidelines” are not voluntary in New Mexico. That’s because the legislature adopted and prescribed compliance with the most recent version provided by the EAC. Dominion is not currently certified under the most recent EAC requirements. New Mexico law requires decertification.

RELEVANT POWERS OF THE BOARD OF COUNTY COMMISSIONERS

To further the ends of securing the purity of elections and to guard against the abuse of the elective franchise, County Commissioners, *not* the Secretary of State or even the County Clerk, are exclusively responsible for certifying post-election results as the official canvassing board.⁴ **See NMSA 1-13-13.** And before providing approval of those results, the Commission has the authority to make necessary corrections if there is a discrepancy with election returns, discrepancy with the number of votes, or if “it appears there is any omission, informality, ambiguity, error, or uncertainty on the face of the returns.” **See NMSA 1-13-5 ¶¶s (1) through (4).** Redressing these concerns speak to your highest responsibility under the law. Namely, upholding, preserving, and when needed, restoring the public trust.

The following are examples of how the SOS, Dominion, ROBIS and their agents have repeatedly violated the N.M. Election Code and EAC requirements, violated the public trust, or grossly misinformed the public. Penalties for violating the Election Code range from a petty misdemeanor⁵ to a fourth-degree felony.⁶

A. Violations of the Election Code by The Secretary of State, its Agents, and Dominion

1. **A commissioned audit in Otero County confirmed that Dominion wiped the entire project file of the November 2020 general election from the County’s Election Management System (EMS).** All election records kept on compact flash drives retrieved from tabulators were also erased. Election records **shall** be preserved for 22 months under state and federal law. **See NMSA 1-12-69 and 52 U.S.C. 20701.** Dominion unlawfully destroyed data recording media, and voter files, which constitute 4th degree felonies. **See NMSA 1-5-22 and 1-5-23.**

Additional investigation confirms that Dominion has wiped project files for the November 2020 general election in Mesa County, CO, Maricopa, AZ, and many other states under the false pretext of doing “preventative maintenance” or a “trusted build.” Moreover, the SOS has admitted election files in several NM counties have been deleted.

⁴ The Board of County Commissioners is ex-officio (by virtue of office or position) the county canvassing board for the county. **NMSA 1-13-1.**

⁵ NMSA 1-20-22. Violation of Election Code; general penalty. If the Election Code does not impose a specific penalty for the violation of a provision prohibiting a specific act, “whoever knowingly commits such violation is guilty of a petty misdemeanor.” If a willful violation of the Election code is carried out by election officers, they can be found “guilty of a fourth-degree felony and, in addition, violation is sufficient cause for removal from office in a proceeding instituted for that purpose as provided by law.”

⁶ NMSA 1-20-15. Conspiracy to violate Election Code. Conspiracy to violate the Election Code [Chapter 1 NMSA 1978] consists of knowingly combining, uniting or agreeing with any other person to omit any duty or commit any act, the omission of which duty, or combination of such act, would by the provisions of the Election Code constitute a fourth-degree felony. Whoever commits conspiracy to violate the Election Code is guilty of a fourth-degree felony.

Subject: RE: [External] Election Ballot Images

Hi Keith,

After reviewing the images Carrie sent and visiting with Melissa, I think you are fine to provide the ballot images with one caveat. The county clerk is required to protect voter secrecy when providing election results. The NMAC rule 1.10.33 describes that vote totals in precincts with fewer than 5 voters by voting method shall be compiled as a total result and not broken out by voting method. Therefore, I would advise that you identify any precincts that may have had fewer than 5 voters and make sure you are not providing the ballot images such that the requestor can identify voting method.

After talking with Mandy and Melissa it sounds like not all of the counties exported the ballot images from the media cards after the election but since you have them you can provide them under these conditions which are sensitive to voter secrecy.

Let me know if you have any question.

Take care,

Kari

Figure 1. “February 18th, 2021, Correspondence from SOS Office Acknowledging Ballot Images were Missing in Several Counties.”

Immediate course of action recommended: Demand the SOS provide correspondence of all steps undertaken to investigate destruction of election records in Otero County contrary to the law.

2. Failure of the SOS to report the above election code violations to the Attorney General or District Attorney for investigation is conduct that, in and of itself, violates the N.M. Election Code. *See NMSA 1-2-2 and NMSA 1-2-2.1.*
3. **Evidence of system log files from the November 2020 election in Chaves County showed that the Dominion software version installed on the tabulators did not match the software version installed on the County’s Election Management System (EMS).** The log files showed a system “warning” error, but the machine warning did not alert election workers to fix the problem before continuing with the election. The software mismatch went undetected by the Clerk, and the tabulators and EMS in “a state of error” continued to be used throughout the election.

Immediate course of action recommended: Otero County uses the same tabulators, EMS, and software, as Chaves County. Demand that all Otero system log files for the last election in Otero be produced to the County Commission for inspection of a software mismatch or other errors. Voting systems certified for use in state elections **shall** include comprehensive diagnostics designed to ensure that failures do not go undetected. **NMSA 1-9-7.8 (B).**

Figure 2. System Log Error Showing Software Version Mismatch

- Evidence of vote flipping occurred during a Risk Limiting Audit (RLA) in Chaves County.**⁷ The Chaves County Clerk alerted the SOS and FBI about Chaves County failing the RLA, but no action was taken. Again, Otero County uses the same tabulators, EMS, and software as Chaves County in the conducting of RLAs. Voting systems certified for use in state elections **shall** ensure that the votes stored on the removable storage media device accurately represent the actual votes cast. **NMSA 1-9-7.9 (C)**. The SOS failed to report this violation of the Election Code. **See NMSA 1-2-2 and NMSA 1-2-2.1.**

Immediate course of action recommended: Demand all SOS correspondence demonstrating their steps to address and resolve failure of the RLA in Chaves County, as Otero shares many ballot races with Chaves County.

- Dominion machines are not currently certified in compliance with the N.M. Election Code.** In a letter dated May 28th, 2021,⁸ the SOS office advises Dominion, that they are unable certify Dominion’s system under the most recent United States Election Assistance Commission Code (EAC). The EAC published and identified their most recent “Voluntary Voting System Guidelines,” as “VVSG 2.0.” However, the EAC has not certified any independent testing laboratories to perform the “VVSG 2.0” certification.

This is a major problem under New Mexico’s Election Code as written. “A voting system that does not comply with all requirements in the Election Code and the **most recent voluntary voting system guidelines adopted by the United States election assistance commission shall be decertified** for use in this state.” **NMSA 1-9-7.4(B)**.

The SOS has unilaterally decided that her office need only comply with the previously adopted standards. This is contrary to state statute, which mandates decertification of any system not in compliance with the most recent “VVSG.” Since the EAC guidelines are adopted and codified into statute, they are not voluntary. Her letter was dated May 28th, 2021, over 1 year ago.⁹ Otero County is currently running elections on voting systems that should have been decertified as a matter of law.

Immediate course of action recommended: An objection to use any or all Dominion voting machines in Otero County can be filed in the District Court by a political party, organization representatives, election observers and candidates pursuant to **NMSA 1-11-10**. Certification by the Commission should be withheld so long as Dominion voting

⁷ See Ex. 1 – Correspondence from Chaves County Clerk concerning failure of the RLA.

⁸ This letter was withheld from numerous public records’ request for over 8 months.

⁹ See Ex. 2 – SOS letter admitting Dominion is not certified per the requirements of the Election Code.

systems are being used in violation of the Election Code. A formal resolution should be voted on to prohibit use of Dominion machines and require the administration of elections through hand count tabulation of paper ballots in small, manageable precincts.

6. **ROBIS ePollbooks have never been properly certified.** The SOS posts all certification documentation for the election equipment used in this state on her website. The SOS claims the ePollbook system is certified based on a test report dated December 1, 2011.¹⁰ Aside from the issues with certification to VVSG 2.0, this certification document is completely invalid because it is 11 years out of date. The ROBIS ePollbook system used in New Mexico is an internet connected system which is updated multiple times per year according to the vendor. A system that is automatically updated by the vendor whenever changes are made to the software is not certifiable. The SOS is making no effort whatsoever to ensure a tested and certified system is being used for the most inherently vulnerable part of our election system.

Immediate course of action recommended: Check in voters at precinct locations using paper pollbooks.

7. **The ROBIS ePollbooks and Ballot on Demand ballot printing system violates the law.** The Election Codes requires that “[p]aper ballots shall be numbered consecutively.” **NMSA 1-10-12 (A).** Ballots in New Mexico are printed at the time the voter checks in at the polling place, or by a clerk’s office when an absentee ballot application is received. They are not sequentially numbered, and the only record of how many ballots have been printed at any given time are stored on internet connected ePollbooks, which are vulnerable to being changed without knowledge of election officials.

Immediate course of action: The Otero County clerk has authority to prepare and supply ballots under **NMSA 1-10-2** and could order ballots that have the proper sequential numbering to be used in Otero County elections.

8. The SOS and some county clerks violated **NMSA 1-10-2** by allowing the third-party vendor, Automated Election Services (AES), to print and mail absentee ballots on behalf of some counties. This is in direct violation of the state statute, which states: “The county clerk shall prepare and supply the ballots used in elections conducted under the Election Code [Chapter 1 NMSA 1978]. The secretary of state may assist in preparing and supplying ballots. Ballots other than those prepared by the county clerk or secretary of state shall not be used.”

Immediate course of action: Otero County does not use third parties to produce their ballots, however multiple other New Mexico counties did count absentee ballots created and mailed by a third party which should not have been used. The Otero County

¹⁰ www.sos.state.nm.us/voting-and-elections/data-and-maps/voting-system-certification-committee/

Commission can demand why the SOS led county clerks to believe it was legal to let a third party produce and mail absentee ballots outside the control of the county clerks.

9. **The ROBIS ePollbook System violates one of the most fundamental purposes of the election code, namely, “to secure the secrecy of the ballot.” NMSA 1-1-1.1.** The ePollbook system records the name, precinct, polling place, ballot type and time of check-in in digital records. The Dominion tabulators record the polling place, precinct, ballot type, and the time each ballot was scanned. It is very easy using these two records to match up names of voters with the image of their ballot and know exactly how they voted. The ballot images are public record according to statute. Even if the check-in information is protected by the clerk, the ePollbooks are internet connected. Thus, the information on them is always vulnerable to bad actors that can match voters to their ballots, profile voters, and stuff ballot boxes.

Name	lastname	firstname	middlename	Precinct	VotedAt/Poll/Precinct	ballotType	EnterDate
				14.1		Precinct	11/2/2021 7:03
				7.1		Precinct	11/2/2021 8:58
				19.1		Precinct	11/2/2021 9:23
				17.1		Precinct	11/2/2021 9:41
				2.1		Precinct	11/2/2021 9:57
				9.1		Precinct	11/2/2021 9:58
				8.1		Precinct	11/2/2021 10:09
				8.1		Precinct	11/2/2021 10:09

Figure 3. Screenshot of Information Collected by ROBIS ePollbook System

01485_00005_000001.tif scanned at: 16:09:03 on 11/02/21

Scanned on: ICC Tabulator: [redacted] Batch: 5

Poll ID: [redacted] Ballot ID: 1007

Figure 4. Screenshot of Information on Dominion Ballot Images

Immediate course of action recommended: Otero County must discontinue their use of electronic, internet-connected ePollbooks and go to paper poll books with in-precinct voting.

10. “Voting systems certified for use in state elections **shall** have an internal audit trail capability such that all pre-election, election day and post-election events shall be stored, recorded and recovered in an easy-to-read printed form and be retained within memory that does not require external power for memory retention.” **NMSA 1-9-7.9 (G).** Auditors demonstrated that system log files in Chaves County showed that election files were being removed while the elections were progressing. It is illegal to delete these files during an election.

```

Figure 5. System Log Files Show Files Being Deleted

Immediate course of action recommended: Otero County uses the same tabulators, EMS, and software, as Chaves County. Demand that all Otero system log files for the last election be produced to the County Commission for inspection of whether election files were being deleted during the election.

11. Voting systems certified for use in state elections **shall** be designed so that no executable code can be launched from random access memory. **NMSA 1-9-7.9 (D)**. Independent auditors are unable verify this requirement since Dominion’s source code has not been provided to, or examined by, the Otero County Clerk. There is no legal basis to withhold the source code for the Clerk’s independent review. The source code is to be held in escrow and be made accessible to the state of New Mexico as a matter of law. **See NMSA 1-9-7.11**. Clerks are the obvious representatives of the state when it comes to certifying use of the machines. **See NMSA 1-11-5**. Dominion’s claim that the source code cannot be produced for intellectual or proprietary reasons must yield to state law.

Immediate course of action: Upon objection filed with the District Court pursuant to **NMSA 1-11-10**, Dominion source code should be made available for review through an “in-camera” inspection before a District Court Judge with an independent expert selected by the SOS, and an independent expert selected by the County Commission, with both parties present. If it is found that the source code is reliable and not a source of vulnerability, the parties would be bound by the Court’s authority to maintain confidentiality concerning Dominion’s intellectual property. If the source code is proven to be vulnerable to fraudulent manipulation, no legal protection should be afforded. Regardless of the Court’s potential ruling on releasing the source code, the decision to certify post-election election results and use of Dominion resides exclusively with the County Commission.

12. Voting systems certified for use in state elections **shall** have operating system software which includes error detection and correction codes. More importantly, software shall include comprehensive diagnostics to ensure that failures do not go undetected. **See NMSA 1-9-7.9 (E)**. Again, auditors showed Dominion and the SOS let an entire election be processed with different versions of software on the tabulators and the election management system. “Error” was indicated in the system log files, but the error was not detected be election workers real-time, and the machines were allowed to proceed with ballot tabulation.
13. The SOS has misrepresented to the public and to Clerks that their Election Management System (EMS) does not have remote accessibility. In fact, state law requires it. **See NMSA**

- 1-9-7.9 (H).** “Voting systems certified for use in state elections shall possess the capability of remote transmission of election results to a central location only by reading the removable storage media devices once they have been removed from the tabulation device after the poll closing sequence has been completed.” This statement implies that the EMS shall have remote accessibility.
14. Nation-state vulnerability expert Jeff Lenberg (Lenberg) provided testimony before the Otero County commission that the Dominion machines being used in New Mexico have a feature where they can be "woken up" remotely. Even more concerning, the "wake up" can be done without the screen turning on to alert election workers that the machine is being accessed. Additionally, Lenberg's has produced 10 expert reports detailing the massive vulnerabilities of Dominion as part of pending litigation in Antrim County, Michigan, which uses the same machines as Otero County. All can be downloaded and retrieved at depernolaw.com.
 15. Lenberg provided testimony before the Otero County commission that Dominion machines in New Mexico have a socket design on their machines, strategically placed to easily add a wireless modem to their mother boards. Dominion CEO John Poulos committed perjury before the Michigan Senate that Dominion voting machines are not designed for remote access.
 16. Lenberg provided testimony before the Otero County commission that Dominion machines in New Mexico, through the proper credentials (keys) and cellular modem, can be accessed from anywhere in the world. It was discovered that the county clerks in Otero do not hold the credentials to their own machines. Otero is completely dependent on a third-party corporation that refuses to allow auditors to inspect for a cellular modem on their tabulators.
 17. Lenberg provided testimony before the Otero County commission that Dominion machines in New Mexico can change votes in an election through existing software on the machines. Moreover, bad actors can change the time and date on the printout tapes to make it appear that the altered votes were the actual votes on election night. In other words, even a full year after an election, Dominion can alter election results and make it appear that those results were from November 3, 2020.

This is not an exhaustive list of machine vulnerability in Otero County. More findings will be produced upon receipt. County Commissioners hold vast power over the conduct of elections in their jurisdiction. Not only do they alone possess the authority to certify post-election results, but they also designate polling places, consolidate precincts, designate any mail ballot precincts, and can create additional polling places. **NMSA 1-3-2.**

County Commissioners, also have the authority to permit voters in the county to cast ballots in voter convenience centers, or exempt certain precincts from operating voting convenience centers at all. **NMSA 1-3-4.** County Commissioners have the power to create, divide, or abolish precinct boundaries. **NMSA 1-3-5.**

Based on the aforementioned, it is our recommendation that action items be put on the next Otero County Commission meeting agenda for a vote on whether to (1) remove Dominion voting machines and ROBIS ePollbooks before they can be used in the general election, and (2) remove drop boxes that were never legislatively prescribed for use in Otero County. The public trust is irrevocably broken concerning use of Dominion, ROBIS ePollbooks, and the Zuckerberg drop boxes. County Commissioners, “shall treat their position as a public trust,” and “shall use the powers and resources of public office only to advance the public interest.” *See NMSA 10-16-3.*

RELEVANT POWERS OF THE COUNTY CLERK IN SUPPORT OF THE COUNTY COMMISSION

The legal responsibility to certify, and choose whether to use Dominion machines *before an election*, also rests with the County Clerk. “**Forty-two days before an election, the county clerk may begin to prepare, inspect, certify and seal electronic voting machines.**” **NMSA 1-11-5.** Please note there is no legal authority for a third-party vendor such as Dominion, SLI Compliance or Pro V & V, or AES to certify the machines for approval. The authority rests with exclusively with the County Clerk. Without access to the source code held in escrow or a physical examination of the motherboards and hardware for remote access, the Clerk is not making a meaningful inspection, and therefore cannot make an intelligent decision on whether the machines should be certified for use.

Immediate course of action: Objection to use any, or all of the voting machines, can be filed in the District Court by a party, organization representatives, election observers or candidates. **NMSA 1-11-10.** The Election Code is silent on whether a Clerk can simply withhold certification on the voting machines, or must file an objection with the District Court on behalf of the County.

Much like the County Commission, County Clerks, not the Secretary of State, administer the day-to-day work of elections in Otero County. They appoint precinct level election boards to administer elections (**NMSA 1-2-6**), assign board members to their precincts (**NMSA 1-2-11**), fill vacancies (**NMSA 1-2-15**) and select presiding judges and election judges to oversee elections (**NMSA 1-2-12**). County Clerks are charged with maintaining accurate vote tallies and certify the process at the precinct level. *See NMSA 1-1-8.* And challengers, watchers, and county canvass observers are subject to the authority of the county precinct election boards. *See NMSA 1-2-22 through 33.*

The County Commission and County Clerk possess the exclusive authority to certify elections in their county as being trustworthy and in keeping with the public trust. But final authority rests with the Otero County Commission. The power of certification at the local level does not vest in the Secretary of State. The Secretary of State merely furnishes counties with forms and certificates that they must fill out after they discharge their duties. **NMSA 1-2-3.** Power to discharge a particular duty, is only power if it can be withheld at the appropriate time.

The County Commission and Clerk have legal authority to *withhold* certification when public trust in elections is irrevocably broken due to massive election vulnerabilities, fraud, or illegality.

RE: Post-Election Voting System Check for the November 3, 2020 General Election

Dear Mr. Rivera,

Chaves County was selected to participate in the accuracy check of the tabulators used in the 2020 General Election. At this time, we have completed the accuracy check. We were able to locate all the ballots in precinct 22. We hand tallied these ballots for the U.S. Representative District 2 contest and Judge of the Court of Appeals, Position 3 contest and found the following discrepancies:

Tabulator AAFEBEM0046 – Absentee, Spare #2
39 ballots were hand tallied. The discrepancy appears in the Judge of the Court of Appeals, Position 3, contest.

The results from RTR - Dominion Server show to be:

Thomas C. Montoya - 16
Jane B. Yohalem - 23
Undervotes – 0
Overvotes – 0

The hand tally results show to be:

Thomas C. Montoya - 15
Jane B. Yohalem – 24
Undervotes – 0
Overvotes – 0

Attached please find our tally sheets as well as a report from the Dominion system for the tabulator with the discrepancy. Please let me know if you need any additional information.

Thank you,

A handwritten signature in cursive script that reads "Cindy Fuller".

Re: Recertification of Voting Systems

Dear Ms. Romero:

Pursuant to Section 1-9-7.4(A) NMSA 1978, the SOS is required to review for recertification each voting system already in use in the state in the year following a presidential election. All certified voting systems are required to be tested by an independent authority and comply with all requirements in the Election Code and the most recent voluntary voting system guidelines (VVSG) adopted by the United States Election Assistance Commission (EAC).

While VVSG 2.0 was adopted by the EAC in February 2021, the EAC has not yet certified any independent voting system testing laboratories (VSTLs) to test and certify voting systems to these new standards. We understand that the National Institute of Standards and Technology (NIST) is in the process of developing the test processes and procedures for VSTLs. After these are adopted, the VSTLs will be required to earn accreditation with the EAC to test voting systems to the new VVSG 2.0 standards. Since this effort is likely to take some time, we plan to review our current voting systems based upon the previously adopted standards. Once the EAC has testing and certification procedures in place for VVSG 2.0, we will initiate a new voting system certification initiative.

According to the Election Code, a “voting system” includes the equipment and peripherals used for casting and counting votes as well as the equipment and peripherals used for printing or marking ballots. The full legal definition of voting system can be found in Section 1-9-1(B) NMSA 1978.

To begin the testing and certification process required for recertification, we request that you submit the following information to our office no later than June 14, 2021:

1. The voting system and version that is being submitted for recertification.
2. A description of any modification to a hardware or software component or configuration of the voting system since the last time the system was certified for use in New Mexico, if applicable.
3. A description of how the system meets all of the applicable voting system requirements included in the New Mexico Election Code (see enclosures).

4. A copy of the most recent VSTL report and proof of compliance on the system eligible for recertification. The report provided must come from an EAC accredited test laboratory.
5. Description of your transition plan to become certified to VVSG 2.0, if applicable.

If you intend to have multiple system models or firmware versions recertified, please submit a separate application for each system. Enclosed for your convenience is a copy of the requirements for voting systems outlined in Article 9 of the Election Code.

Upon completion of an examination of all recertification materials, the SOS may require additional information, testing, or inspection as deemed necessary to comply with the recertification requirements in statute. After the SOS has completed a full review of all required information, the SOS shall make a written report and post the report and recertification materials on the SOS website for a mandatory 21-day public comment period.

Following the period of public comment, the SOS shall submit the reports and any public comments to the Voting System Certification Committee (VSCC) for their consideration and to make a recommendation to the SOS for recertification of the voting systems.

If you have questions or require any further information regarding the re-certification process, please contact me at Mandy.Vigil@state.nm.us.

Sincerely,

Mandy Vigil
State Elections Director

Enclosures: As stated

New Mexico Election Code Voting System Requirements

Voting Systems used for casting and counting ballots in the state shall meet all outlined requirements in Article 9 of the election code as follows:

1-9-7.7. Voting systems; technical requirements.

Voting systems certified for use in state elections shall:

- A. have a unique embedded internal serial number for audit purposes;
- B. be supplied with a dust- and moisture-proof cover for transportation and storage purposes;
- C. if the net weight of the system, or aggregate of voting device parts, is over twenty pounds, have self-contained wheels so that the system can be easily rolled by one person on rough pavement and can roll through a standard thirty-inch door frame;
- D. be a stand-alone, non-networked election system such that all pre-election, election day and post-election events and activities can be recorded and retained in each device;
- E. employ scalable technology allowing easy enhancements that meet United States election assistance commission standards and state law;
- F. have ancillary equipment, such as printers, power sources, microprocessors and switch and indicator matrices, that is installed internally or is modular and transportable;
- G. display publicly the number of ballots processed;
- H. be able to print:
 - (1) an alphanumeric printout of the contests, candidates and vote totals when the polls are opened so that the poll workers can verify that the counters for each candidate are on zero;
 - (2) an alphanumeric printout of the contests, candidates and vote totals at the close of the polls, which printouts shall contain the system serial number and public counter total; and
 - (3) as many copies of the alphanumeric printouts as necessary to satisfy state law; and
- I. include a feature to allow reports to be sent to an electronic data file.

1-9-7.8. Voting systems; operational requirements.

Voting systems certified for use in state elections shall:

- A. have internal application software that is specifically designed and engineered for the election application;
- B. include comprehensive diagnostics designed to ensure that failures do not go undetected;

- C. have a real-time clock capable of recording and documenting the total time polls are opened; and
- D. have a self-contained, internal backup battery that powers all components of the system that are powered by alternating current power; and, in the event of a power outage in the polling place:
 - (1) the self-contained, internal backup battery power shall engage with no disruption of operation for at least two hours and with no loss of data; and
 - (2) the system shall maintain all vote totals, public counter totals and the internal clock time in the event that the main power and battery backup power fail.

1-9-7.9. Voting systems; memory; removable storage media device; requirements.

Voting systems certified for use in state elections shall:

- A. be programmable with removable storage media devices;
- B. contain ballot control information, summary vote totals, maintenance logs and operator logs on the removable storage media device;
- C. ensure that the votes stored on the removable storage media device accurately represent the actual votes cast;
- D. be designed so that no executable code can be launched from random access memory;
- E. have any operating system software stored in nonvolatile memory, which shall include internal quality checks such as parity or error detection and correction codes, and which software shall include comprehensive diagnostics to ensure that failures do not go undetected;
- F. allow for pre-election testing of the ballot control logic and accuracy, with results stored in the memory that is used on election day, and shall be capable of printing a zero-results printout prior to these tests and a results printout after the test;
- G. have internal audit trail capability such that all pre-election, election day and post-election events shall be stored, recorded and recovered in an easy-to-read printed form and be retained within memory that does not require external power for memory retention;
- H. possess the capability of remote transmission of election results to a central location only by reading the removable storage media devices once they have been removed from the tabulation device after the poll closing sequence has been completed; and
- I. prevent data from being altered or destroyed by report generation or by the transmission of results.

1-9-7.10. Voting systems; ballot handling and processing requirements.

Voting systems certified for use in state elections shall:

- A. accept a ballot that is a minimum of six inches wide and a maximum of twenty-four inches long, in dual columns and printed on both sides;
- B. accept a ballot in any orientation when inserted by a voter;
- C. have the capability to reject a ballot on which a voter has made more than the allowable number of selections in any contest;
- D. be designed to accommodate the maximum number of ballot styles or ballot variations encountered in the largest New Mexico election jurisdiction; and
- E. be able to read a single ballot with at least four hundred twenty voting positions.

1-9-7.11. Voting systems; source code; escrow.

As a condition of initial certification and continued certification, the source code that operates a voting system shall be placed in escrow and be accessible to the state of New Mexico in the event the manufacturer ceases to do business or ceases to support the voting system.

Dear Mr. Griffin,

In response to your request dated May 9, 2022, our response is as follows:

1. The Original Registration Date, Registration Date, Source, and Party Affiliation from the Otero County's voter registration database. Remaining fields do not need to be provided to negate any possibility of release of personal information.

This is considered voter data. You will need to fill out an Affidavit of Authorization.

2. Digital record of the dates absentee ballots were requested and returned for the November 2020 election.

This is considered voter data. You will need to fill out an Affidavit of Authorization.

3. Results of hand tallied ballots by precinct. This information is required to reconcile the paper ballots to the official results. Precinct results can be combined as necessary so that results will not contain fewer than five ballots as required by NM statute to protect voter privacy.

I have emailed you twice on 5/12/22 and 5/20/22 with no response. I need more clarification on this request before I can process it.

Best Regards,

Selina Maes

Election Coordinator

LEGAL MEMORANDUM

**“Unequal weights and unequal measures
are both alike an abomination to the LORD.”**

- Proverbs 20:10

This memorandum follows an evidentiary presentation¹ concerning Dominion Voting Systems (Dominion) and ROBIS ePollbook vulnerability in Otero and Torrance Counties. The memorandum:

- (1) Provides legal authorities relevant to your County Commission and Clerk.
 - (2) Identifies violations of the Election Code by the Secretary of State (SOS) and her agents.
 - (3) Identifies existing vulnerabilities in Dominion and ROBIS ePollbooks, requiring immediate action.
 - (4) Provides immediate recommendations for the responsible administration of elections.
-

WHO HAS THE AUTHORITY TO ADMINISTER AND CERTIFY ELECTIONS?

Elections are administered both at the state and county level, with powers delegated by the legislature to the SOS, the Board of County Commissioners, and County Clerks, as established by the New Mexico State Constitution (**NM. Const. Art. VII Section 1(B)**) and the **Election Code (NMSA 1-1-1 through NMSA 1-26-6)**.

These elected officials possess concurrent jurisdiction to govern the overall conduct of elections. However, when each party is left to their own distinct legal role, the whole of elections cannot be performed. For example, while the Clerk counts votes and the Sheriff assists in safeguarding and delivering election records, the County Commissioners are exclusively responsible for certifying post-election results in their jurisdiction. To put it another way, even though the SOS is the chief “elections officer” in the state, the SOS cannot certify Otero County’s post-election results as a matter of law. The SOS cannot even certify a voting machine’s use at the county level before elections begin.² The SOS can merely receive results from Otero County after they are certified (in addition to the 32 other counties throughout New Mexico), and *then* record and report those results to the public at large.

¹ Audit findings from several New Mexico counties are provided in the memo, as deviations in one county necessarily affect all ballot races shared with Otero County. The full Torrance County presentation can be reviewed here: <https://rumble.com/v16cc09-torrance-county-commission-estancia-new-mexico-may-25-2022.html>. The full Otero presentation can be viewed here: <https://youtu.be/Fg6Gf6QjqGM>.

² See NMSA 1-11-5.

In other words, each elected body has exclusive jurisdiction to carry out legally prescribed responsibilities that cannot be delegated away or usurped by the other. Case in point, when the SOS sought to institute straight-ticket voting in the 2018 general election, her actions were struck down by the New Mexico Supreme Court as unconstitutional, because the legislature alone has plenary authority over elections. *Unite New Mexico v. Oliver*, 2019-NMSC-009. Secretary Oliver sought to take legislative power she did not possess. While the legislature certainly conferred authority to her to prescribe the “form of the ballot,” they never delegated her with power to determine the “question of straight-ticket voting.” *See Id.*

The question before this Commission is profoundly more dire than simply determining where the SOS’s power starts and stops. As demonstrated during the evidentiary presentation, the suite of Dominion voting machine products and ROBIS ePollbooks used in Otero County are massively vulnerable.

Those vulnerabilities, in addition to Mark Zuckerberg funded drop boxes, have been exploited to carry out systemic fraud throughout New Mexico. The result is an erosion of trust in Otero County elections. It’s one thing to identify the SOS’s gross negligence in procuring machines that are easily hacked, subverted, and not certified in accordance with the Election Assistance Commission’s (EAC) guidelines.³ It’s quite another matter to foist those same machines on counties, force their use in the administration of elections, and then *demand you certify the results.*

All elected officials, including County Commissioners, “shall treat their position as a public trust,” and “shall use the powers and resources of public office only to advance the public interest.” *See NMSA 10-16-3.* Likewise, County Commissioners “shall conduct themselves in a manner that justifies the confidence placed in them by the people, at all times maintaining the integrity and discharging ethically the high responsibilities of public service.” *See NMSA 10-16-3(B).*

When the SOS fails to protect the interests of the voter in Otero County, the remaining representatives of the body politic are duty-bound to act as checks and balances against that weaker or corrupted vessel, to ensure justice and the rule of law are observed and restored. Simply put, the County Commission can withhold certification until it is satisfied that all major vulnerabilities in the election process have been removed.

ELECTION CODE AUTHORITY OF COUNTY COMMISSIONERS

The purpose of the Election Code is to secure “the purity of elections and guard against the abuse of the elective franchise.” *NMSA 1-1-1.1.*

³ As explained below, adherence to EAC “guidelines” are not voluntary in New Mexico. That’s because the legislature adopted and prescribed compliance with the most recent version provided by the EAC. Dominion is not currently certified under the most recent EAC requirements. New Mexico law requires decertification.

RELEVANT POWERS OF THE BOARD OF COUNTY COMMISSIONERS

To further the ends of securing the purity of elections and to guard against the abuse of the elective franchise, County Commissioners, *not* the Secretary of State or even the County Clerk, are exclusively responsible for certifying post-election results as the official canvassing board.⁴ **See NMSA 1-13-13.** And before providing approval of those results, the Commission has the authority to make necessary corrections if there is a discrepancy with election returns, discrepancy with the number of votes, or if “it appears there is any omission, informality, ambiguity, error, or uncertainty on the face of the returns.” **See NMSA 1-13-5 ¶¶s (1) through (4).** Redressing these concerns speak to your highest responsibility under the law. Namely, upholding, preserving, and when needed, restoring the public trust.

The following are examples of how the SOS, Dominion, ROBIS and their agents have repeatedly violated the N.M. Election Code and EAC requirements, violated the public trust, or grossly misinformed the public. Penalties for violating the Election Code range from a petty misdemeanor⁵ to a fourth-degree felony.⁶

A. Violations of the Election Code by The Secretary of State, its Agents, and Dominion

1. **A commissioned audit in Otero County confirmed that Dominion wiped the entire project file of the November 2020 general election from the County’s Election Management System (EMS).** All election records kept on compact flash drives retrieved from tabulators were also erased. Election records **shall** be preserved for 22 months under state and federal law. **See NMSA 1-12-69 and 52 U.S.C. 20701.** Dominion unlawfully destroyed data recording media, and voter files, which constitute 4th degree felonies. **See NMSA 1-5-22 and 1-5-23.**

Additional investigation confirms that Dominion has wiped project files for the November 2020 general election in Mesa County, CO, Maricopa, AZ, and many other states under the false pretext of doing “preventative maintenance” or a “trusted build.” Moreover, the SOS has admitted election files in several NM counties have been deleted.

⁴ The Board of County Commissioners is ex-officio (by virtue of office or position) the county canvassing board for the county. **NMSA 1-13-1.**

⁵ NMSA 1-20-22. Violation of Election Code; general penalty. If the Election Code does not impose a specific penalty for the violation of a provision prohibiting a specific act, “whoever knowingly commits such violation is guilty of a petty misdemeanor.” If a willful violation of the Election code is carried out by election officers, they can be found “guilty of a fourth-degree felony and, in addition, violation is sufficient cause for removal from office in a proceeding instituted for that purpose as provided by law.”

⁶ NMSA 1-20-15. Conspiracy to violate Election Code. Conspiracy to violate the Election Code [Chapter 1 NMSA 1978] consists of knowingly combining, uniting or agreeing with any other person to omit any duty or commit any act, the omission of which duty, or combination of such act, would by the provisions of the Election Code constitute a fourth-degree felony. Whoever commits conspiracy to violate the Election Code is guilty of a fourth-degree felony.

Sent: Thursday, February 18, 2021 9:37 AM
To: Keith Manes <kmanes@leacounty.net>
Subject: RE: [External] Election Ballot Images

Hi Keith,

After reviewing the images Carrie sent and visiting with Melissa, I think you are fine to provide the ballot images with one caveat. The county clerk is required to protect voter secrecy when providing election results. The NMAC rule 1.10.33 describes that vote totals in precincts with fewer than 5 voters by voting method shall be compiled as a total result and not broken out by voting method. Therefore, I would advise that you identify any precincts that may have had fewer than 5 voters and make sure you are not providing the ballot images such that the requestor can identify voting method.

After talking with Mandy and Melissa it sounds like not all of the counties exported the ballot images from the media cards after the election but since you have them you can provide them under these conditions which are sensitive to voter secrecy.

Let me know if you have any question.

Take care,

Kari

Figure 1. “February 18th, 2021, Correspondence from SOS Office Acknowledging Ballot Images were Missing in Several Counties.”

Immediate course of action recommended: Demand the SOS provide correspondence of all steps undertaken to investigate destruction of election records in Otero County contrary to the law.

2. Failure of the SOS to report the above election code violations to the Attorney General or District Attorney for investigation is conduct that, in and of itself, violates the N.M. Election Code. *See NMSA 1-2-2 and NMSA 1-2-2.1.*
3. **Evidence of system log files from the November 2020 election in Chaves County showed that the Dominion software version installed on the tabulators did not match the software version installed on the County’s Election Management System (EMS).** The log files showed a system “warning” error, but the machine warning did not alert election workers to fix the problem before continuing with the election. The software mismatch went undetected by the Clerk, and the tabulators and EMS in “a state of error” continued to be used throughout the election.

Immediate course of action recommended: Otero County uses the same tabulators, EMS, and software, as Chaves County. Demand that all Otero system log files for the last election in Otero be produced to the County Commission for inspection of a software mismatch or other errors. Voting systems certified for use in state elections **shall** include comprehensive diagnostics designed to ensure that failures do not go undetected. **NMSA 1-9-7.8 (B).**

```

Figure 2. System Log Error Showing Software Version Mismatch

- Evidence of vote flipping occurred during a Risk Limiting Audit (RLA) in Chaves County.**⁷ The Chaves County Clerk alerted the SOS and FBI about Chaves County failing the RLA, but no action was taken. Again, Otero County uses the same tabulators, EMS, and software as Chaves County in the conducting of RLAs. Voting systems certified for use in state elections **shall** ensure that the votes stored on the removable storage media device accurately represent the actual votes cast. **NMSA 1-9-7.9 (C)**. The SOS failed to report this violation of the Election Code. **See NMSA 1-2-2 and NMSA 1-2-2.1.**

Immediate course of action recommended: Demand all SOS correspondence demonstrating their steps to address and resolve failure of the RLA in Chaves County, as Otero shares many ballot races with Chaves County.

- Dominion machines are not currently certified in compliance with the N.M. Election Code.** In a letter dated May 28th, 2021,⁸ the SOS office advises Dominion, that they are unable certify Dominion’s system under the most recent United States Election Assistance Commission Code (EAC). The EAC published and identified their most recent “Voluntary Voting System Guidelines,” as “VVSG 2.0.” However, the EAC has not certified any independent testing laboratories to perform the “VVSG 2.0” certification.

This is a major problem under New Mexico’s Election Code as written. “A voting system that does not comply with all requirements in the Election Code and the **most recent voluntary voting system guidelines adopted by the United States election assistance commission shall be decertified** for use in this state.” **NMSA 1-9-7.4(B)**.

The SOS has unilaterally decided that her office need only comply with the previously adopted standards. This is contrary to state statute, which mandates decertification of any system not in compliance with the most recent “VVSG.” Since the EAC guidelines are adopted and codified into statute, they are not voluntary. Her letter was dated May 28th, 2021, over 1 year ago.⁹ Otero County is currently running elections on voting systems that should have been decertified as a matter of law.

Immediate course of action recommended: An objection to use any or all Dominion voting machines in Otero County can be filed in the District Court by a political party, organization representatives, election observers and candidates pursuant to **NMSA 1-11-10**. Certification by the Commission should be withheld so long as Dominion voting

⁷ See Ex. 1 – Correspondence from Chaves County Clerk concerning failure of the RLA.

⁸ This letter was withheld from numerous public records’ request for over 8 months.

⁹ See Ex. 2 – SOS letter admitting Dominion is not certified per the requirements of the Election Code.

systems are being used in violation of the Election Code. A formal resolution should be voted on to prohibit use of Dominion machines and require the administration of elections through hand count tabulation of paper ballots in small, manageable precincts.

6. **ROBIS ePollbooks have never been properly certified.** The SOS posts all certification documentation for the election equipment used in this state on her website. The SOS claims the ePollbook system is certified based on a test report dated December 1, 2011.¹⁰ Aside from the issues with certification to VVSG 2.0, this certification document is completely invalid because it is 11 years out of date. The ROBIS ePollbook system used in New Mexico is an internet connected system which is updated multiple times per year according to the vendor. A system that is automatically updated by the vendor whenever changes are made to the software is not certifiable. The SOS is making no effort whatsoever to ensure a tested and certified system is being used for the most inherently vulnerable part of our election system.

Immediate course of action recommended: Check in voters at precinct locations using paper pollbooks.

7. **The ROBIS ePollbooks and Ballot on Demand ballot printing system violates the law.** The Election Codes requires that “[p]aper ballots shall be numbered consecutively.” **NMSA 1-10-12 (A).** Ballots in New Mexico are printed at the time the voter checks in at the polling place, or by a clerk’s office when an absentee ballot application is received. They are not sequentially numbered, and the only record of how many ballots have been printed at any given time are stored on internet connected ePollbooks, which are vulnerable to being changed without knowledge of election officials.

Immediate course of action: The Otero County clerk has authority to prepare and supply ballots under **NMSA 1-10-2** and could order ballots that have the proper sequential numbering to be used in Otero County elections.

8. The SOS and some county clerks violated **NMSA 1-10-2** by allowing the third-party vendor, Automated Election Services (AES), to print and mail absentee ballots on behalf of some counties. This is in direct violation of the state statute, which states: “The county clerk shall prepare and supply the ballots used in elections conducted under the Election Code [Chapter 1 NMSA 1978]. The secretary of state may assist in preparing and supplying ballots. Ballots other than those prepared by the county clerk or secretary of state shall not be used.”

Immediate course of action: Otero County does not use third parties to produce their ballots, however multiple other New Mexico counties did count absentee ballots created and mailed by a third party which should not have been used. The Otero County

¹⁰ www.sos.state.nm.us/voting-and-elections/data-and-maps/voting-system-certification-committee/

Commission can demand why the SOS led county clerks to believe it was legal to let a third party produce and mail absentee ballots outside the control of the county clerks.

9. **The ROBIS ePollbook System violates one of the most fundamental purposes of the election code, namely, “to secure the secrecy of the ballot.” NMSA 1-1-1.1.** The ePollbook system records the name, precinct, polling place, ballot type and time of check-in in digital records. The Dominion tabulators record the polling place, precinct, ballot type, and the time each ballot was scanned. It is very easy using these two records to match up names of voters with the image of their ballot and know exactly how they voted. The ballot images are public record according to statute. Even if the check-in information is protected by the clerk, the ePollbooks are internet connected. Thus, the information on them is always vulnerable to bad actors that can match voters to their ballots, profile voters, and stuff ballot boxes.

Name	lastname	firstname	middlename	Precinct	VotedAt/Poll/Precinct	ballotType	EnterDate
				14.1		Precinct	11/2/2021 7:03
				7.1		Precinct	11/2/2021 8:58
				19.1		Precinct	11/2/2021 9:23
				17.1		Precinct	11/2/2021 9:41
				2.1		Precinct	11/2/2021 9:57
				9.1		Precinct	11/2/2021 9:58
				8.1		Precinct	11/2/2021 10:09
				8.1		Precinct	11/2/2021 10:09

Figure 3. Screenshot of Information Collected by ROBIS ePollbook System

Scanned on: ICC Tabulator: [redacted] Batch: 5

Poll ID: [redacted] Ballot ID: 1007

Figure 4. Screenshot of Information on Dominion Ballot Images

Immediate course of action recommended: Otero County must discontinue their use of electronic, internet-connected ePollbooks and go to paper poll books with in-precinct voting.

10. “Voting systems certified for use in state elections **shall** have an internal audit trail capability such that all pre-election, election day and post-election events shall be stored, recorded and recovered in an easy-to-read printed form and be retained within memory that does not require external power for memory retention.” **NMSA 1-9-7.9 (G).** Auditors demonstrated that system log files in Chaves County showed that election files were being removed while the elections were progressing. It is illegal to delete these files during an election.

Figure 5. System Log Files Show Files Being Deleted

Immediate course of action recommended: Otero County uses the same tabulators, EMS, and software, as Chaves County. Demand that all Otero system log files for the last election be produced to the County Commission for inspection of whether election files were being deleted during the election.

11. Voting systems certified for use in state elections **shall** be designed so that no executable code can be launched from random access memory. **NMSA 1-9-7.9 (D)**. Independent auditors are unable verify this requirement since Dominion’s source code has not been provided to, or examined by, the Otero County Clerk. There is no legal basis to withhold the source code for the Clerk’s independent review. The source code is to be held in escrow and be made accessible to the state of New Mexico as a matter of law. **See NMSA 1-9-7.11**. Clerks are the obvious representatives of the state when it comes to certifying use of the machines. **See NMSA 1-11-5**. Dominion’s claim that the source code cannot be produced for intellectual or proprietary reasons must yield to state law.

Immediate course of action: Upon objection filed with the District Court pursuant to **NMSA 1-11-10**, Dominion source code should be made available for review through an “in-camera” inspection before a District Court Judge with an independent expert selected by the SOS, and an independent expert selected by the County Commission, with both parties present. If it is found that the source code is reliable and not a source of vulnerability, the parties would be bound by the Court’s authority to maintain confidentiality concerning Dominion’s intellectual property. If the source code is proven to be vulnerable to fraudulent manipulation, no legal protection should be afforded. Regardless of the Court’s potential ruling on releasing the source code, the decision to certify post-election election results and use of Dominion resides exclusively with the County Commission.

12. Voting systems certified for use in state elections **shall** have operating system software which includes error detection and correction codes. More importantly, software shall include comprehensive diagnostics to ensure that failures do not go undetected. **See NMSA 1-9-7.9 (E)**. Again, auditors showed Dominion and the SOS let an entire election be processed with different versions of software on the tabulators and the election management system. “Error” was indicated in the system log files, but the error was not detected be election workers real-time, and the machines were allowed to proceed with ballot tabulation.
13. The SOS has misrepresented to the public and to Clerks that their Election Management System (EMS) does not have remote accessibility. In fact, state law requires it. **See NMSA**

- 1-9-7.9 (H).** “Voting systems certified for use in state elections shall possess the capability of remote transmission of election results to a central location only by reading the removable storage media devices once they have been removed from the tabulation device after the poll closing sequence has been completed.” This statement implies that the EMS shall have remote accessibility.
14. Nation-state vulnerability expert Jeff Lenberg (Lenberg) provided testimony before the Otero County commission that the Dominion machines being used in New Mexico have a feature where they can be "woken up" remotely. Even more concerning, the "wake up" can be done without the screen turning on to alert election workers that the machine is being accessed. Additionally, Lenberg's has produced 10 expert reports detailing the massive vulnerabilities of Dominion as part of pending litigation in Antrim County, Michigan, which uses the same machines as Otero County. All can be downloaded and retrieved at depernolaw.com.
 15. Lenberg provided testimony before the Otero County commission that Dominion machines in New Mexico have a socket design on their machines, strategically placed to easily add a wireless modem to their mother boards. Dominion CEO John Poulos committed perjury before the Michigan Senate that Dominion voting machines are not designed for remote access.
 16. Lenberg provided testimony before the Otero County commission that Dominion machines in New Mexico, through the proper credentials (keys) and cellular modem, can be accessed from anywhere in the world. It was discovered that the county clerks in Otero do not hold the credentials to their own machines. Otero is completely dependent on a third-party corporation that refuses to allow auditors to inspect for a cellular modem on their tabulators.
 17. Lenberg provided testimony before the Otero County commission that Dominion machines in New Mexico can change votes in an election through existing software on the machines. Moreover, bad actors can change the time and date on the printout tapes to make it appear that the altered votes were the actual votes on election night. In other words, even a full year after an election, Dominion can alter election results and make it appear that those results were from November 3, 2020.

This is not an exhaustive list of machine vulnerability in Otero County. More findings will be produced upon receipt. County Commissioners hold vast power over the conduct of elections in their jurisdiction. Not only do they alone possess the authority to certify post-election results, but they also designate polling places, consolidate precincts, designate any mail ballot precincts, and can create additional polling places. **NMSA 1-3-2.**

County Commissioners, also have the authority to permit voters in the county to cast ballots in voter convenience centers, or exempt certain precincts from operating voting convenience centers at all. **NMSA 1-3-4.** County Commissioners have the power to create, divide, or abolish precinct boundaries. **NMSA 1-3-5.**

Based on the aforementioned, it is our recommendation that action items be put on the next Otero County Commission meeting agenda for a vote on whether to (1) remove Dominion voting machines and ROBIS ePollbooks before they can be used in the general election, and (2) remove drop boxes that were never legislatively prescribed for use in Otero County. The public trust is irrevocably broken concerning use of Dominion, ROBIS ePollbooks, and the Zuckerberg drop boxes. County Commissioners, “shall treat their position as a public trust,” and “shall use the powers and resources of public office only to advance the public interest.” *See NMSA 10-16-3.*

RELEVANT POWERS OF THE COUNTY CLERK IN SUPPORT OF THE COUNTY COMMISSION

The legal responsibility to certify, and choose whether to use Dominion machines *before an election*, also rests with the County Clerk. “**Forty-two days before an election, the county clerk may begin to prepare, inspect, certify and seal electronic voting machines.**” **NMSA 1-11-5.** Please note there is no legal authority for a third-party vendor such as Dominion, SLI Compliance or Pro V & V, or AES to certify the machines for approval. The authority rests with exclusively with the County Clerk. Without access to the source code held in escrow or a physical examination of the motherboards and hardware for remote access, the Clerk is not making a meaningful inspection, and therefore cannot make an intelligent decision on whether the machines should be certified for use.

Immediate course of action: Objection to use any, or all of the voting machines, can be filed in the District Court by a party, organization representatives, election observers or candidates. **NMSA 1-11-10.** The Election Code is silent on whether a Clerk can simply withhold certification on the voting machines, or must file an objection with the District Court on behalf of the County.

Much like the County Commission, County Clerks, not the Secretary of State, administer the day-to-day work of elections in Otero County. They appoint precinct level election boards to administer elections (**NMSA 1-2-6**), assign board members to their precincts (**NMSA 1-2-11**), fill vacancies (**NMSA 1-2-15**) and select presiding judges and election judges to oversee elections (**NMSA 1-2-12**). County Clerks are charged with maintaining accurate vote tallies and certify the process at the precinct level. *See NMSA 1-1-8.* And challengers, watchers, and county canvass observers are subject to the authority of the county precinct election boards. *See NMSA 1-2-22 through 33.*

The County Commission and County Clerk possess the exclusive authority to certify elections in their county as being trustworthy and in keeping with the public trust. But final authority rests with the Otero County Commission. The power of certification at the local level does not vest in the Secretary of State. The Secretary of State merely furnishes counties with forms and certificates that they must fill out after they discharge their duties. **NMSA 1-2-3.** Power to discharge a particular duty, is only power if it can be withheld at the appropriate time.

The County Commission and Clerk have legal authority to *withhold* certification when public trust in elections is irrevocably broken due to massive election vulnerabilities, fraud, or illegality.

RE: Post-Election Voting System Check for the November 3, 2020 General Election

Dear Mr. Rivera,

Chaves County was selected to participate in the accuracy check of the tabulators used in the 2020 General Election. At this time, we have completed the accuracy check. We were able to locate all the ballots in precinct 22. We hand tallied these ballots for the U.S. Representative District 2 contest and Judge of the Court of Appeals, Position 3 contest and found the following discrepancies:

Tabulator AAFEBEM0046 – Absentee, Spare #2
39 ballots were hand tallied. The discrepancy appears in the Judge of the Court of Appeals, Position 3, contest.

The results from RTR - Dominion Server show to be:

Thomas C. Montoya - 16
Jane B. Yohalem - 23
Undervotes – 0
Overvotes – 0

The hand tally results show to be:

Thomas C. Montoya - 15
Jane B. Yohalem – 24
Undervotes – 0
Overvotes – 0

Attached please find our tally sheets as well as a report from the Dominion system for the tabulator with the discrepancy. Please let me know if you need any additional information.

Thank you,

A handwritten signature in black ink that reads "Cindy Fuller". The signature is written in a cursive, flowing style.

Cindy Fuller
Chief Deputy Clerk
Chaves County

Melissa Romero
Dominion Voting Systems
melissa.romero@dominionvoting.com

Re: Recertification of Voting Systems

Dear Ms. Romero:

Pursuant to Section 1-9-7.4(A) NMSA 1978, the SOS is required to review for recertification each voting system already in use in the state in the year following a presidential election. All certified voting systems are required to be tested by an independent authority and comply with all requirements in the Election Code and the most recent voluntary voting system guidelines (VVSG) adopted by the United States Election Assistance Commission (EAC).

While VVSG 2.0 was adopted by the EAC in February 2021, the EAC has not yet certified any independent voting system testing laboratories (VSTLs) to test and certify voting systems to these new standards. We understand that the National Institute of Standards and Technology (NIST) is in the process of developing the test processes and procedures for VSTLs. After these are adopted, the VSTLs will be required to earn accreditation with the EAC to test voting systems to the new VVSG 2.0 standards. Since this effort is likely to take some time, we plan to review our current voting systems based upon the previously adopted standards. Once the EAC has testing and certification procedures in place for VVSG 2.0, we will initiate a new voting system certification initiative.

According to the Election Code, a “voting system” includes the equipment and peripherals used for casting and counting votes as well as the equipment and peripherals used for printing or marking ballots. The full legal definition of voting system can be found in Section 1-9-1(B) NMSA 1978.

To begin the testing and certification process required for recertification, we request that you submit the following information to our office no later than June 14, 2021:

1. The voting system and version that is being submitted for recertification.
2. A description of any modification to a hardware or software component or configuration of the voting system since the last time the system was certified for use in New Mexico, if applicable.
3. A description of how the system meets all of the applicable voting system requirements included in the New Mexico Election Code (see enclosures).

4. A copy of the most recent VSTL report and proof of compliance on the system eligible for recertification. The report provided must come from an EAC accredited test laboratory.
5. Description of your transition plan to become certified to VVSG 2.0, if applicable.

If you intend to have multiple system models or firmware versions recertified, please submit a separate application for each system. Enclosed for your convenience is a copy of the requirements for voting systems outlined in Article 9 of the Election Code.

Upon completion of an examination of all recertification materials, the SOS may require additional information, testing, or inspection as deemed necessary to comply with the recertification requirements in statute. After the SOS has completed a full review of all required information, the SOS shall make a written report and post the report and recertification materials on the SOS website for a mandatory 21-day public comment period.

Following the period of public comment, the SOS shall submit the reports and any public comments to the Voting System Certification Committee (VSCC) for their consideration and to make a recommendation to the SOS for recertification of the voting systems.

If you have questions or require any further information regarding the re-certification process, please contact me at Mandy.Vigil@state.nm.us.

Sincerely,

Mandy Vigil
State Elections Director

Enclosures: As stated

New Mexico Election Code Voting System Requirements

Voting Systems used for casting and counting ballots in the state shall meet all outlined requirements in Article 9 of the election code as follows:

1-9-7.7. Voting systems; technical requirements.

Voting systems certified for use in state elections shall:

- A. have a unique embedded internal serial number for audit purposes;
- B. be supplied with a dust- and moisture-proof cover for transportation and storage purposes;
- C. if the net weight of the system, or aggregate of voting device parts, is over twenty pounds, have self-contained wheels so that the system can be easily rolled by one person on rough pavement and can roll through a standard thirty-inch door frame;
- D. be a stand-alone, non-networked election system such that all pre-election, election day and post-election events and activities can be recorded and retained in each device;
- E. employ scalable technology allowing easy enhancements that meet United States election assistance commission standards and state law;
- F. have ancillary equipment, such as printers, power sources, microprocessors and switch and indicator matrices, that is installed internally or is modular and transportable;
- G. display publicly the number of ballots processed;
- H. be able to print:
 - (1) an alphanumeric printout of the contests, candidates and vote totals when the polls are opened so that the poll workers can verify that the counters for each candidate are on zero;
 - (2) an alphanumeric printout of the contests, candidates and vote totals at the close of the polls, which printouts shall contain the system serial number and public counter total; and
 - (3) as many copies of the alphanumeric printouts as necessary to satisfy state law; and
- I. include a feature to allow reports to be sent to an electronic data file.

1-9-7.8. Voting systems; operational requirements.

Voting systems certified for use in state elections shall:

- A. have internal application software that is specifically designed and engineered for the election application;
- B. include comprehensive diagnostics designed to ensure that failures do not go undetected;

- C. have a real-time clock capable of recording and documenting the total time polls are opened; and
- D. have a self-contained, internal backup battery that powers all components of the system that are powered by alternating current power; and, in the event of a power outage in the polling place:
 - (1) the self-contained, internal backup battery power shall engage with no disruption of operation for at least two hours and with no loss of data; and
 - (2) the system shall maintain all vote totals, public counter totals and the internal clock time in the event that the main power and battery backup power fail.

1-9-7.9. Voting systems; memory; removable storage media device; requirements.

Voting systems certified for use in state elections shall:

- A. be programmable with removable storage media devices;
- B. contain ballot control information, summary vote totals, maintenance logs and operator logs on the removable storage media device;
- C. ensure that the votes stored on the removable storage media device accurately represent the actual votes cast;
- D. be designed so that no executable code can be launched from random access memory;
- E. have any operating system software stored in nonvolatile memory, which shall include internal quality checks such as parity or error detection and correction codes, and which software shall include comprehensive diagnostics to ensure that failures do not go undetected;
- F. allow for pre-election testing of the ballot control logic and accuracy, with results stored in the memory that is used on election day, and shall be capable of printing a zero-results printout prior to these tests and a results printout after the test;
- G. have internal audit trail capability such that all pre-election, election day and post-election events shall be stored, recorded and recovered in an easy-to-read printed form and be retained within memory that does not require external power for memory retention;
- H. possess the capability of remote transmission of election results to a central location only by reading the removable storage media devices once they have been removed from the tabulation device after the poll closing sequence has been completed; and
- I. prevent data from being altered or destroyed by report generation or by the transmission of results.

1-9-7.10. Voting systems; ballot handling and processing requirements.

Voting systems certified for use in state elections shall:

- A. accept a ballot that is a minimum of six inches wide and a maximum of twenty-four inches long, in dual columns and printed on both sides;
- B. accept a ballot in any orientation when inserted by a voter;
- C. have the capability to reject a ballot on which a voter has made more than the allowable number of selections in any contest;
- D. be designed to accommodate the maximum number of ballot styles or ballot variations encountered in the largest New Mexico election jurisdiction; and
- E. be able to read a single ballot with at least four hundred twenty voting positions.

1-9-7.11. Voting systems; source code; escrow.

As a condition of initial certification and continued certification, the source code that operates a voting system shall be placed in escrow and be accessible to the state of New Mexico in the event the manufacturer ceases to do business or ceases to support the voting system.

Selina,

There are two more things I would like to request - (1) the number of ballots that were delivered each day from the USPS and (2) could I have three fields out of the voter rolls that you have - the original registration date, and the affiliated party. I wouldn't need names or birthdates or anything else. That would allow me to see if the original registration dates follow a random pattern the way they should - rather than the controlled pattern that is in the registration date field that I have.

Thank you,
Erin

Subject: Re: CVR Report

I attached the spreadsheet of the registrations that I'd really like to get the original registration date, the source of the registration in code. The first tab is a sample of 100 problem entries from the canvass. The second tab has about 200 registrations that show as having registered to vote after election day (many are first time voters), yet they still voted. And the last tab. are the 1,200 registrations that occurred during the early voting/election day period.

I know it's a lot. The first tabs and the first-time voters on the second tab are probably the highest priority if you have time to work through them. Maybe just a sampling from the last tab would be enough.

Thank you again for your time today.

Sincerely,

Erin Clements

Tim,

As discussed, attached is a letter detailing Otero County's position with respect to the contract with EchoMail. Please let me know if you have any questions or would like additional details on anything referenced in the letter.

Please let me know when you would like to discuss options for moving forward. Have a great weekend and a Happy Easter.

Very respectfully,

RB

RE: Delivery of Contracted Services for 2020 Election Audit

Dear Mr. Phelan:

This letter follows our recent conversations and is in response to your client, Dr. Shiva's letter dated March 17, 2022, where he asserts EchoMail completed its contracted tasks with Otero County and demands payment of the remaining contracted amount of \$24,875. Concerning the letter, Otero County disagrees that Echomail fulfilled all of its contractual obligations. Two days prior to Dr. Shiva's letter he sent an email with the subject of "Status Report as of March 15, 2022". In this email, Dr. Shivas clearly states there are remaining items and work to be completed. Further, Dr. Shiva suggested that we have a meeting to discuss the way forward. I responded to this email and we scheduled a meeting for 1:30 PM, Friday, March 18, 2022. In Dr. Shiva's last email correspondence, on March 16th, he confirmed the meeting and stated that his assistant John Medlar would send a Zoom meeting link. A link was never sent and all follow-up emails and phone calls attempting to schedule a meeting have been ignored.

We are aware that on March 16, 2022, the U.S. House of Representatives, Committee on Oversight and Reform sent Dr. Shiva a letter requesting "information regarding EchoMail's participation in an "audit" of the 2020 election in Otero County, New Mexico". We understand EchoMail may no longer wish to participate in the Otero County election audit due to Congressional interest and perceived political bickering. However, Otero County will not pay for services not rendered or subpar product hastily produced in an attempt to end EchoMail's relationship with the County. Consequently, Otero County demands either that EchoMail complete its obligated services to the satisfaction of the County or, alternatively, that EchoMail reimburse the County for the incomplete

services. As set forth below, the County considers the value of services completed to date to be \$9,750. Therefore, should Dr. Shiva wish to terminate the contract, the County requests a refund of \$15,125 of the previously paid \$24,875.

The following breakdown provides the County’s assessment of services rendered and those that are outstanding. Per the contract, Otero County is responsible for the payment of Schedule A. Included with Schedule A is the following pricing schedule:

Pricing Schedule

Part Number	Part Description	Units	Unit Cost	One-Time	Recurring
	Professional Services				
EM-PS-PROJ-PLAN	Project Planning	1	\$ 3,000.00	\$ 3,000.00	\$ 0.00
EM-DW-100EPU - SETUP	Integrated EchoMail® DataWarehouse	1	\$ 12,500.00	\$ 12,500.00	\$ 0.00
EXT-FORENSICS	Hardware Forensics	1	\$ 14,500.00	\$ 14,500.00	\$ 0.00
EM-ANALYTICS	Data Analytics and Reporting	1	\$ 7,500.00	\$ 7,500.00	\$ 0.00
			Sub-Total	\$ 37,500.00	\$ 0.00
	Licenses				
EM-DW-LICENSE	EchoMail® DataWarehouse	1	\$ 12,250.00	\$ 12,250.00	\$ 0.00
			Sub-Total	\$ 12,250.00	\$ 0.00
			NET-Total	\$ 49,750.00	\$ 0.00

EM-PS-PROJ-PLAN: Project planning (\$3,000) - This item is incomplete. Weekly progress meetings were supposed to be held with the County and New Mexico Audit Force (NMAF) for project updates. Only one initial kick-off meeting was held on February 9, 2022. A second project update meeting was scheduled for March 18, 2022 but not held. No notice of cancelation or explanation. At a minimum, the County will require a meeting to discuss the status of the project, and a final meeting with the Board of County Commissioners (BOCC) involving a presentation of EchoMail’s analysis and findings of the audit to consider this task complete. The County considers the value of this task completed to date to be \$1,500.

EM-DW-100EPU-SETUP: Integrated EchoMail Data Warehouse (\$12,500) - This item is incomplete. The Data Warehouse was to include the County Voter Rolls, Participating Voter List, Cast Vote Records, Images of the Return Ballot Envelopes, Ballot Images from the Election Management System (EMS), Paper Ballot Scans, and door-to-door canvass data. The images of the Ballot Envelopes, complete Ballot images from the EMS, and door-to-door canvass data appended to the voter roll are not included in the data warehouse. In the March 15, 2022, status update email EchoMail acknowledges that this data is not part of the data warehouse and pending submission. The EchoMail letter dated March 17, 2022 erroneously reports that all agreed upon data has been incorporated into the data warehouse. Further, without EchoMail’s continued participation the data warehouse is useless to the County. Otero County specifically contracted

with EchoMail for Dr. Shiva’s credentials and ability to provide expert data analysis. The County considers the value of this task completed to date to be \$6,250.

EXT-FORENSICS: Hardware Forensics (\$14,500) – This task has not been started due to delays caused by the New Mexico Secretary of State denying access to election equipment. EchoMail, in the contract cover letter agreed “the County will not be liable for payment or portions of payments of line items in Schedule A in the event certain items cannot be obtained.” The County considers the value of this task considered completed to date to be \$0.

EM-ANALYTICS: Data Analytics and Reporting (\$7,500) - this task is only partially complete. The data analysis provided by Echomail consisted of 13 relatively rudimentary charts with no accompanying report or explanation. At a minimum, the contracted analysis is missing a statistical evaluation of the relationship between registrations and votes cast to include trends and potential anomalies similar to the “fishtail” analysis that EchoMail completed in their audit of Maricopa County. A simple tabulation of the number of votes that were cast by precinct has already been done by NMAF. The contrast between services provided by EchoMail to Otero County and the Arizona Senate are stark despite both costing approximately the same amount of \$50,000¹. To the Arizona Senate, EchoMail provided a 99-page formal report that included an abstract, introduction, methodology, results, discussion, and a conclusion². In addition to the report, Dr. Shiva made a formal presentation to the Arizona Senate that consisted of 180 power point slides³. In comparison, the data provided to Otero County is woefully lacking. For the Otero County BOCC to consider this item complete far greater analysis is required along with a formal report and presentation of findings. The County considers the value of this task completed to date to be \$2,000.

EM-DW-LICENSE: EchoMail Data Warehouse License (\$12,250) - The County does not consider this task complete. Access to the EchoMail Data Warehouse was never provided to either the County or NMAF per the Master Agreement. As previously noted, agreed upon data is missing from the data warehouse. Without EchoMail’s continued participation in the audit the license has no value. Without access to the data warehouse the County cannot input additional data or conduct additional analysis. Further, the County contracted with EchoMail in order for Dr. Shiva to use his expertise to provide analysis of data incorporated into the data warehouse. As noted above, only limited analysis has been provided thus far. The County considers the value of this task completed to date to be \$0.

Per EchoMail’s January 25, 2022 cover letter to the County, Schedules A through E were to be completed as a whole to complete the entire audit. Per the cover letter, funding for Schedules B through E would be provided by EchoMail’s partners. The contract voted on and approved by the BOCC contained all Schedules. The signed contract sent by EchoMail on January 25, 2022 did not include Schedules B through E but the cover letter still references them and their funding. The

¹ <https://www.documentcloud.org/documents/21060123-arizona-senate-contract-records-regarding-maricopa-county-election-audit>

² https://www.azsenaterepublicans.com/files/ugd/2f3470_05deb65815ab4d4b83938d71bc53459b.pdf

³ https://www.azsenaterepublicans.com/files/ugd/2f3470_5fafb43e9f36464ebe8ff1f912baab26.pdf

County considers the audit, which includes Schedule A, to be complete when all schedules are complete, with the caveat that the County and EchoMail are not be responsible for tasks that could not be completed in the event that certain data or hardware could not be obtained. However, the County provided or is capable of providing all data listed in the schedules per the agreement with the sole exception of the forensic imaging of the election equipment/hardware.

In summary, Otero County's position is that EchoMail has not performed its contractually obligated services. Otero County had a reasonable expectation to receive the same or similar products and services as those provided to the Arizona Senate by EchoMail for the Maricopa County audit. The products and services provided by EchoMail to Otero County are severely lacking in professional quality and substance. Otero County is willing to accept one of two options: 1) EchoMail continues to work on the audit and complete its obligated services to the satisfaction of the County, or 2) EchoMail reimburses the County for the services that remain uncompleted. At this juncture, the County has only received \$9,750 in value from EchoMail's services. If EchoMail intends to terminate the contract, it must refund the County \$15,125 of the previously paid \$24,875. to consider the contract terminated. Should EchoMail desire to move forward and receive the final payment contemplated in the Master Agreement and Schedule A, it must complete services and provide the agreed upon deliverables.

If you have any questions on these matters, please do not hesitate to contact me.

Sincerely,

R.B. Nichols

Commissioners for Otero County
101 New York Avenue
Alamogordo, NM 88310

RE: Delivery of Contracted Services for 2020 Election Audit

Dear Honorable Commissioners:

Per the Master Agreement and the sole Schedule signed on January 26, 2022 between Otero County and EchoMail, EchoMail is contracted to perform two (2) specific tasks: 1) Creation of an integrated data warehouse; and, 2) Data analysis of the registrations and votes cast at the precinct level and by vote type.

EchoMail has completed both of these tasks.

Concerning the first task - creation of the integrated data warehouse - attached on the USB stick is the integrated data warehouse that is approximately 17GB containing the Cast Vote Records in MySQL database format, Cast Vote Records in an import-friendly format, Voter Rolls, Ballot Images, Paper Ballot Scans, and County Canvass data. We have received payment of \$24,875 for this task per the Schedule.

Concerning the second task - data analysis of the registrations and votes (ballots) cast at the precinct level and by vote type - on the same USB is a PDF containing the data analysis. As of March 1, 2022, we were to be paid the remainder \$24,875 for the completion of the data analysis, for which we have yet to receive payment. The delivery of this USB concludes our contracted services with the County. It has been a pleasure working with you. Kindly make arrangements for the outstanding payment.

Sincerely,

A handwritten signature in black ink, appearing to read "Shiva Ayyadurai".

Dr. Shiva Ayyadurai

Date: Tuesday, March 15, 2022 7:10:19 AM

Dear All:

I hope this email finds you well. I wanted to provide this Status Report to update you on the current state of Schedule A tasks. To review, per our Agreement, EchoMail is to provide two (2) items for the Audit:

- (1) Setup of the Integrated Datawarehouse incorporating data from various sources i.e. cvr, ballot images, etc.; and ,
- (2) Data Analytics

Status of Project:

Concerning (1), the following has been achieved since February 21, 2022 and to as of today:

- a. Receipt of the CVR data from the County
- b. Receipt of the Ballot Image data from the County
- c. Incorporation of the CVR data into the datawarehouse by EchoMail
- d. Incorporation of the ballot image data into the datawarehouse by EchoMail

Concerning (1), relative to outstanding data items

1. Paper Ballot scans have still not been received
2. Envelope Images have still not been received

Concerning (2), I suggest we have a meeting so we can itemize the kinds of analytics the County will want performed.

Administrative Items:

1. EchoMail received first payment from the County pursuant to the Agreement.
2. The press is erroneously reporting that EchoMail has been contracted to perform door-to-door canvassing and is directing NMAF. This is not true. As of now, EchoMail's obligations are pursuant to Schedule A.
3. Setup a follow up project meeting

Next Steps:

1. Set date/time for Zoom meeting for project

Thank you.

Sincerely,
Dr. Shiva Ayyadurai

Status Report as of February 21, 2022

RE: EchoMail® Project Update Memo As of February 21, 2022

This memorandum provides an update on the current status of the project pursuant to Schedule A executed between EchoMail, Inc. (“EchoMail”) and Otero County, (“County”).

February 2, 2022 – EchoMail Setup of EchoMail Data Warehouse

EchoMail has setup the EchoMail® Data Warehouse (DW) that includes hardware and software to receive and store data that may include: County’s Voter Rolls, Participating Voter List, Cast Vote Records (CVRs), Images of the Return Ballot Envelopes, Ballot Images (from the Election Management System – EMS), Paper Ballot Scans, Door-to- Door Canvass data. Ref. Schedule A.

February 5, 2022 – Importing of Voter Rolls into EchoMail®/DWTM

EchoMail imported Voter Rolls received from the County via EH into the EchoMail®/DW.

February 9, 2022 – Project Kickoff Meeting Held

EchoMail and the County held a Project Kickoff meeting pursuant to Schedule A,

Attendees:

Dr. Shiva Ayyadurai, EchoMail (SA)

Robyn Holmes, County Clerk (RH)

Pamela Heltner, County Manager (PH)

Erin Hughes, County Commissioned Volunteer (EH)

John Medlar, EchoMail (JM)

R.B. Nichols, County Attorney (RBN)

The meeting involved: a. Introductions, b. Review of the EchoMail Project Plan, c. Review of the EchoMail process,

d. Review of the outstanding data elements needed for EchoMail to perform the Audit, and e. Next Steps.

February 9 – 18, 2022 – EchoMail Awaiting Additional Data

EchoMail and EH have had various follow up meetings to get the additional data required for Audit.

SETTLEMENT AGREEMENT AND RELEASE OF ALL CLAIMS

This Settlement Agreement and Release of All Claims is entered into between Otero County, New Mexico (“County”), and EchoMail all of whom may also be referred to collectively as “the Parties.”

RECITALS

WHEREAS, the County entered into a Master License and Services Agreement (hereinafter “Contract”) with EchoMail as its contractor, executed on or about January 25th, 2022 for integrated data warehousing and analytics of the 2020 General Election (“Project”); and

WHEREAS, on February 24, 2022, the County paid \$24,875 to EchoMail pursuant to the Contract;

WHEREAS, the County believes the value of the services received from EchoMail is \$9,750.00 and EchoMail disputes this claim.

WHEREAS, on March 17, 2022, EchoMail demanded the balance of \$24,875 be paid;

WHEREAS EchoMail believes the unpaid balance is due and payable; and

WHEREAS, the County disputes whether payment is due and owing; and

WHEREAS, on April 15, 2022 the County requested the return of \$15,125.00

WHEREAS, it is the position of EchoMail they fulfilled their obligations under the Contract and found No Election Fraud as a result of their services.

WHEREAS, the Parties have agreed to settle claims against one another prior to litigation without admitting or conceding liability as to any matter at issue;

NOW THEREFORE, IN CONSIDERATION OF THE FOREGOING AND IN CONSIDERATION OF THE COVENANTS CONTAINED HEREIN, THE PARTIES AGREE TO THE FOLLOWING:

UNDERLYING SETTLEMENT TERMS

1. In consideration for payment described herein in paragraph 5, EchoMail dismisses, waives, releases, and discharges Otero County, its current and former commissioners, directors, departments, attorneys, legal representatives, predecessors, insurers, successors, assigns, employees and agents from all manners of liabilities, claims, demands, and causes of action, known or unknown, fixed or contingent, arising in the past, present, or future which EchoMail or anyone claiming through EchoMail may personally have or claim to have against Otero County as a result of the dispute over the January 25, 2022 Contract with prejudice. This Agreement includes all demands, obligations, actions, claims, damages, costs, or rights EchoMail, its agents, successors, and assigns now have or may have against Otero County that could be related to the Contract between the Parties. This shall be a fully binding and complete settlement between the Parties, and each party's agents, successors and assigns.

2. In consideration for payment described herein, the County dismisses, waives, releases, and discharges EchoMail, its directors, attorneys, legal representatives, predecessors, insurers, successors, assigns, employees and agents from all manners of liabilities, claims, demands, and causes of action, known or unknown, fixed or contingent, arising in the past, present, or future which the County or anyone claiming through the County may personally have or claim to have against EchoMail as a result of the dispute over the January 25, 2022 Contract with prejudice. This Agreement includes all demands, obligations, actions, claims, damages, costs, or rights the County, its agents, successors, and assigns now have or may have against EchoMail that could be related to the Contract. This shall be a fully binding and complete settlement between the Parties, and each party's agents, successors and assigns.

3. The Parties understand that this is a general release encompassing all claims against one another arising under federal, state, or local law, including but not limited to claims arising

under state and federal statutes, as well as any claims arising under any theory of common law concerning the Contract. Claims released are those of which the Parties are presently aware, and those of which it may be unaware, for breach of contract or otherwise. This general release is binding upon the current and former directors, departments, attorneys, legal representatives, predecessors, insurers, successors, assigns, and employees of the Parties.

4. It is expressly understood and agreed that the payment of the sum described in the below paragraphs, is not and shall not be construed as an admission of liability by either Party. The Parties are settling and compromising disputed claims as to which they expressly deny any liability.

CONSIDERATION

5. Pursuant to this Settlement Agreement and Release of All Claims, EchoMail agrees to pay the County in settlement of the above dispute, the sum of \$15,125.00. The aforementioned amount will be made payable to the County within 30-days of execution.

SUPPLEMENTAL DOCUMENTS

6. EchoMail and the County agree to cooperate fully to execute any and all supplementary documents, and take all additional actions that may be necessary to give full force and effect to this Settlement Agreement and Release of All Claims.

FEES

7. Each Party shall bear its own costs and fees, including attorneys' fees associated with the underlying contract and/or settlement agreement.

ADVICE OF COUNSEL

8. The Parties acknowledge they are represented by counsel and have read and understood the effects of this Settlement Agreement and Release of All Claims. The Parties further

state they execute this Settlement Agreement and Release of All Claims of their own free will and accord, for the purpose and consideration set forth in this Agreement.

INTEGRATION

9. This Settlement Agreement and Release of All Claims contains the entire understanding between the Parties hereto concerning the subject matter contained herein.

10. EchoMail and the County agree that each paragraph and component of this Settlement Agreement and Release of All Claims is a material term and that failure to comply with any of the provisions contained herein constitutes a material breach of this Agreement.

11. The Parties represent and warrant that there have been no representations or promises made by either Party on which they relied in connection with the Settlement Agreement and Release of All Claims, other than what is set forth herein in writing.

12. The Parties further represent and warrant that it is not being induced to enter into this Agreement by anything other than the written words contained in this Agreement.

13. This Settlement Agreement and Release of All Claims constitutes the entire agreement and understanding between EchoMail and the County and shall not be modified or altered, except in writing, and signed by the Parties to this Settlement Agreement and Release of All Claims.

14. This Settlement and Release of All Claims shall be effective following execution by the Parties. Facsimile signatures shall be acceptable as original for all purposes.

15. The Parties acknowledge that the signatories to this Settlement and Release of All Claims have the necessary authority to bind their respective entities to its terms.

16. The parties further agree “electronic signatures” are sufficient to legally execute and bind this agreement and shall be deemed valid and binding, as if original.

51	No record of this person			
52				
53				
54	Moved out two years ago, note registration date, would have had to register right before moving			
55	no one by this name ever lived here - note the registration date!!!			
56				
57	Address doesn't exist			
58	Vacant business building			
59				
60	THIS IS A VACANT LOT, USED TO BE A TRAILER PARK			
61				
62				
63				
64				
65				
66				
67				
68	Has not lived at this address for 20 years			
69	Also a dropped vote, Joe does not live at the address, but Emma Sue Williams is registered and voted from here			
70	Resident has lived here since 1960's, this registrant has never lived here, BLATANT GHOST			
71				
72	Note the registration date			
73				
74				
75	Brittany Lamp has never lived at this address			
76				
77	Has been an airbnb rental since 2017, Owner's name is Donald			
78	Has been an airbnb rental since 2017, Owner's name is Donald			
79				
80				
81				
82				
83				
84				
85	Moved out 10 years ago, look at registration date!!!			
86				
87	Moved to Alaska in Jan 2020			
88	Moved to Alaska in Jan 2020			
89	Moved to Alaska in Jan 2020			
90				
91				
92	Moved away in 2019			
93	Moved away in 2019			
94				
95	Note the registration date			
96	Very likely fake registration, apt number #239 is a house number, these aren't apartments, duplicated name and changed birth year

SETTLEMENT AGREEMENT AND RELEASE OF ALL CLAIMS

This Settlement Agreement and Release of All Claims is entered into between Otero County, New Mexico (“County”), and EchoMail all of whom may also be referred to collectively as “the Parties.”

RECITALS

WHEREAS, the County entered into a Master License and Services Agreement (hereinafter “Contract”) with EchoMail as its contractor, executed on or about January 25th, 2022 for integrated data warehousing and analytics of the 2020 General Election (“Project”); and

WHEREAS, on February 24, 2022, the County paid \$24,875 to EchoMail pursuant to the Contract;

WHEREAS, the County believes the value of the services received from EchoMail is \$9,750.00 and EchoMail disputes this claim.

WHEREAS, on March 17, 2022, EchoMail demanded the balance of \$24,875 be paid;

WHEREAS EchoMail believes the unpaid balance is due and payable; and

WHEREAS, the County disputes whether payment is due and owing; and

WHEREAS, on April 15, 2022 the County requested the return of \$15,125.00

WHEREAS, it is the position of EchoMail they fulfilled their obligations under the Contract and found No Election Fraud as a result of their services.

WHEREAS, the Parties have agreed to settle claims against one another prior to litigation without admitting or conceding liability as to any matter at issue;

NOW THEREFORE, IN CONSIDERATION OF THE FOREGOING AND IN CONSIDERATION OF THE COVENANTS CONTAINED HEREIN, THE PARTIES AGREE TO THE FOLLOWING:

UNDERLYING SETTLEMENT TERMS

1. In consideration for payment described herein in paragraph 5, EchoMail dismisses, waives, releases, and discharges Otero County, its current and former commissioners, directors, departments, attorneys, legal representatives, predecessors, insurers, successors, assigns, employees and agents from all manners of liabilities, claims, demands, and causes of action, known or unknown, fixed or contingent, arising in the past, present, or future which EchoMail or anyone claiming through EchoMail may personally have or claim to have against Otero County as a result of the dispute over the January 25, 2022 Contract with prejudice. This Agreement includes all demands, obligations, actions, claims, damages, costs, or rights EchoMail, its agents, successors, and assigns now have or may have against Otero County that could be related to the Contract between the Parties. This shall be a fully binding and complete settlement between the Parties, and each party's agents, successors and assigns.

2. In consideration for payment described herein, the County dismisses, waives, releases, and discharges EchoMail, its directors, attorneys, legal representatives, predecessors, insurers, successors, assigns, employees and agents from all manners of liabilities, claims, demands, and causes of action, known or unknown, fixed or contingent, arising in the past, present, or future which the County or anyone claiming through the County may personally have or claim to have against EchoMail as a result of the dispute over the January 25, 2022 Contract with prejudice. This Agreement includes all demands, obligations, actions, claims, damages, costs, or rights the County, its agents, successors, and assigns now have or may have against EchoMail that could be related to the Contract. This shall be a fully binding and complete settlement between the Parties, and each party's agents, successors and assigns.

3. The Parties understand that this is a general release encompassing all claims against one another arising under federal, state, or local law, including but not limited to claims arising

under state and federal statutes, as well as any claims arising under any theory of common law concerning the Contract. Claims released are those of which the Parties are presently aware, and those of which it may be unaware, for breach of contract or otherwise. This general release is binding upon the current and former directors, departments, attorneys, legal representatives, predecessors, insurers, successors, assigns, and employees of the Parties.

4. It is expressly understood and agreed that the payment of the sum described in the below paragraphs, is not and shall not be construed as an admission of liability by either Party. The Parties are settling and compromising disputed claims as to which they expressly deny any liability.

CONSIDERATION

5. Pursuant to this Settlement Agreement and Release of All Claims, EchoMail agrees to pay the County in settlement of the above dispute, the sum of \$15,125.00. The aforementioned amount will be made payable to the County within 30-days of execution.

SUPPLEMENTAL DOCUMENTS

6. EchoMail and the County agree to cooperate fully to execute any and all supplementary documents, and take all additional actions that may be necessary to give full force and effect to this Settlement Agreement and Release of All Claims.

FEES

7. Each Party shall bear its own costs and fees, including attorneys' fees associated with the underlying contract and/or settlement agreement.

ADVICE OF COUNSEL

8. The Parties acknowledge they are represented by counsel and have read and understood the effects of this Settlement Agreement and Release of All Claims. The Parties further

state they execute this Settlement Agreement and Release of All Claims of their own free will and accord, for the purpose and consideration set forth in this Agreement.

INTEGRATION

9. This Settlement Agreement and Release of All Claims contains the entire understanding between the Parties hereto concerning the subject matter contained herein.

10. EchoMail and the County agree that each paragraph and component of this Settlement Agreement and Release of All Claims is a material term and that failure to comply with any of the provisions contained herein constitutes a material breach of this Agreement.

11. The Parties represent and warrant that there have been no representations or promises made by either Party on which they relied in connection with the Settlement Agreement and Release of All Claims, other than what is set forth herein in writing.

12. The Parties further represent and warrant that it is not being induced to enter into this Agreement by anything other than the written words contained in this Agreement.

13. This Settlement Agreement and Release of All Claims constitutes the entire agreement and understanding between EchoMail and the County and shall not be modified or altered, except in writing, and signed by the Parties to this Settlement Agreement and Release of All Claims.

14. This Settlement and Release of All Claims shall be effective following execution by the Parties. Facsimile signatures shall be acceptable as original for all purposes.

15. The Parties acknowledge that the signatories to this Settlement and Release of All Claims have the necessary authority to bind their respective entities to its terms.

16. The parties further agree “electronic signatures” are sufficient to legally execute and bind this agreement and shall be deemed valid and binding, as if original.

RE: EchoMail, Inc. and Otero County

Dear Attorney Nichols:

Without getting into a multitude of detail, please note we respectfully disagree with the vast majority of the content of your 4-15-22 letter.

As you know, EchoMail was contracted to provide certain specific services to Otero County. Our intent was to objectively provide these services, however we seem to have been dragged into, what appears to be, a local and ongoing political embroilment, including but not limited to the confusing, inconsistent and contradictory roles and actions of multiple entities, individuals and third parties. Regardless, it is the opinion of EchoMail, their contracted services were completed resulting in a showing on No Election Fraud.

In light of the aforementioned and recognizing our differing positions, we have executed the attached Agreement to conclude this matter. Please forward the fully executed document via e-mail at your earliest convenience.

Thank you for your attention to this matter.

Very truly yours,

Timothy Phelan
