RE: Removal of Appointed State Officers by Impeachment or Following Interpellation

DATE: November 5, 2021

You asked for information relating to impeachment procedures available to the Legislature for removing an appointed state officer from office. This memorandum sets forth the procedures, under the Wisconsin Constitution and statutes, for removing an appointed officer by impeachment or after being examined or investigated in an interpellation proceeding.

IMPEACHMENT

Impeachment is a process in which the Legislature may remove a civil officer of the state for corrupt conduct in office or for crimes and misdemeanors. Article VII, Section 1 of the Wisconsin Constitution provides:

Impeachment; trial. Section 1. The court for the trial of impeachments shall be composed of the senate. The assembly shall have the power of impeaching all civil officers of this state for corrupt conduct in office, or for crimes and misdemeanors; but a majority of all the members elected shall concur in an impeachment. On the trial of an impeachment against the governor, the lieutenant governor shall not act as a member of the court. No judicial officer shall exercise his office, after he shall have been impeached, until his acquittal. Before the trial of an impeachment the members of the court shall take an oath or affirmation truly and impartially to try the impeachment according to evidence; and no person shall be convicted without the concurrence of two-thirds of the members present. Judgment in cases of impeachment shall not extend further than to removal from office, or removal from office and disqualification to hold any office of honor, profit or trust under the state; but the party impeached shall be liable to indictment, trial and punishment according to law.

The process for removing an official through impeachment involves: (1) a vote to impeach the official; and (2) a trial of the impeachment.

The first step in the impeachment process requires a majority of the members of the Assembly to vote to impeach the official. A vote to impeach is a formal accusation that can only be issued for particular reasons. Under the Wisconsin Constitution, the Assembly may impeach, by a majority vote, a civil officer for corrupt conduct in office or for crimes and misdemeanors.

The second step in the impeachment process requires that the Senate conduct a trial of the impeachment. In the trial process, the Senate members act as a court and may convict the official by a two-thirds vote of the members present. However, unlike a criminal trial, conviction by the Senate in the impeachment process relates to removal of the official from office (and a possible bar from holding office), but does not impose criminal liability.

Sections [750.01](#) and [750.02](#), Stats., govern the administration of oaths and other processes and rules that apply to the trial of the impeachment that is conducted by the Senate:

750.01 Administration of oaths. The president and chief clerk of the senate are respectively authorized to administer to any member or officer of the senate any oath or affirmation as a member or officer of the court for the trial of impeachments, and to administer any oath or affirmation to any other person in any proceeding before such court.

750.02 Process and rules. The court for the trial of impeachments is authorized to issue, and enforce obedience to, any summons, subpoena or other process necessary to the exercise of its powers and authority; to provide in what form the same shall be issued, by whom and in what manner it shall be signed and attested, by whom it shall be executed and in what form return thereof shall be made; and make such further provisions and rules as may be necessary or convenient for the discharge of its functions or duties.

An official who is impeached by the Assembly and convicted in the Senate will be removed from office before the end of his or her term.

Impeachment is a rare occurrence; a publication from the Legislative Reference Bureau¹ indicates that there has only been one instance of impeachment and trial. In 1853, the Assembly voted to advance articles of impeachment against Judge Levi Hubbell to the Senate. Following a lengthy trial², Judge Hubbell was acquitted.

Current law provides limited procedural guidelines for an impeachment proceeding. Section 750.01, Stats., sets forth how to administer oaths in impeachment proceedings and s. 750.02, Stats., provides that the Senate may make rules as necessary or convenient for the discharge of its functions or duties in an impeachment trial.

Additionally, s. 17.16 (3), Stats., provides rules for removals for cause. It is not settled whether the procedures set forth in s. 17.16, Stats., apply to impeachment proceedings. If the statute is found to apply or if, pursuant to s. 750.02, Stats., the Senate opts to utilize the same procedure, the statute provides that:

- A removal for cause may be made only upon written verified charges brought by a resident taxpayer of the governmental unit of which the person against whom the charges are filed is an officer.
- The officer is entitled to a speedy public hearing at which he or she is given a full opportunity to be heard to present a defense against the charges, personally and by counsel.

¹ Legislative Reference Bureau, *The Removal of State Public Officials from Office*, Research Bulletin 80-RB-1 (1980).

² The trial in the Senate lasted five weeks and involved the testimony of over 50 witnesses. Ellen Langill, *Levi Hubbell and the Wisconsin Judiciary: A Dilemma in Legal Ethics and Non-Partisan Judicial Elections*, Marquette Law Review, Volume 81, Issue 4, Summer 1998.

- A copy of the charges and written notice of the time and place for the hearing must be given to the officer by the removing power³ by delivery to the officer in person or by mailing the same to the officer at the officer's last and usual post office address not less than 10 days prior to the hearing.
- The officer may, within 10 days from service of the charges, file with the removing power a verified answer thereto.
- No person may be excused from testifying or from producing evidence on the hearing for the reason that the testimony, documentary, or otherwise, required of him or her may tend to incriminate him or her. However, any person who does testify is entitled to immunity from the use of the compelled testimony or evidence in subsequent criminal or forfeiture proceedings, as well as immunity from the use of evidence derived from that compelled testimony or evidence. [s. 972.085. Stats.]

If a person is removed for cause under s. 17.16, Stats., all of the following must be filed by the removing power with the Secretary of State:

- An order of removal.
- A certified copy of the order.
- A complete transcript of the testimony and proceedings at the hearing.
- A statement of the cause or causes for which removal is made.

In the Hubbell proceedings,⁴ a petition for impeachment was introduced by a citizen to the Assembly Speaker; the Assembly then appointed a committee to investigate the allegations against Judge Hubbell and make recommendations as to whether Judge Hubbell should be removed from office. Ultimately, the Assembly voted to appoint five “managers” to prepare articles of impeachment. The articles were approved by the Assembly and a trial was held in the Senate. The Senate created, by resolution, a committee to establish rules for the impeachment trial. The articles of impeachment, Judge Hubbell's response, and the Senate rules may be [read here](#).

An unresolved question is the standard of proof applicable to a trial of impeachment. The highest standard, which requires proof “beyond a reasonable doubt” is generally used at criminal proceedings, while the lower standard requiring a “preponderance of evidence” of guilt is common in civil trials. An intermediate standard requires “clear and convincing” evidence.

REMOVAL OF APPOINTED OFFICERS FOLLOWING INTERPELLATION

Interpellation is a process by which a bipartisan group of legislators in either house may initiate an investigation, and if appropriate, removal of any appointive officer of the state. Section 13.28 (1), Stats., provides that a group of at least six members of the Senate, not more than four of whom belong to the same political party, or 17 members of the Assembly, not more than nine of whom belong to the same political party, may petition any appointive state officer to appear before the respective house of the Legislature. The petition must be in writing, accompanied by the written questions for which the

³ Section 17.16, Stats., refers to, but does not define, the term “removing power.” In the case of an impeachment, it could be interpreted to mean either the Senate or the Legislature as a whole. Because the Senate is the body whose judgment would remove a person from office, I conclude that the Senate is the “removing power” for purposes of impeachment proceedings.

⁴ Marilyn Grant, *Judge Levi Hubbell: A Man Impeached*, The Wisconsin Magazine of History, Vol. 64, No. 1, Autumn, 1980.

petitioning legislators seek responses, signed by the petitioning members, and filed with the presiding officer of the legislative house to which the petitioning members belong.⁵

During such an appearance, the state officer must answer written or oral interrogatories relative to any matter, function, or work of the officer relative to any act, omission, or other matter pertaining to the powers or privileges exercised or duties performed by the officer or the officer's subordinates. A state officer may also be expected to respond regarding the manner, conditions, or terms of the officer's appointment or any appointment made by the officer, or relative to any act, omission, or conduct unbecoming of the position of the officer.

Following the filing of the required petition, the presiding officer of the house with whom the petition was filed has 20 days from the date of filing to call a meeting of the house before which the interrogation or examination will be held. The Legislature may adopt rules to govern the examination and all proceedings must be recorded and transmitted to the Governor within 30 days of the close of the examination. [s. 13.29, Stats.]

Following the interpellation procedure, the appointive state officer who was the subject of the examination may be removed from his or her position by passing a joint resolution to that end, adopted by a majority of members in each house. [s. 13.30, Stats.]

Please let me know if I can provide any further assistance.

PH:ksm

⁵ Section 13.28 (2), Stats., prescribes the same procedure for a joint interpellation provided that the required numbers of members petition in both houses.

Elections Commission Officials Must Be Held Accountable for Ignoring the Law

Despite the Wisconsin Elections Commission's statutory duty to administer and ensure compliance with election laws, it has become clear that WEC has taken a number of actions in recent years that have clearly violated state statutes. That is why I recently introduced a resolution in the Legislature calling for the removal of the WEC officials responsible for the agency's unlawful activities.

Before going further, it is important for me to be clear about what is and is not at issue in this resolution. Most importantly, it is not about relitigating the specific outcomes of any particular election, including the 2020 fall election, because the appropriate time for addressing any such concerns was in the days and weeks immediately following the vote, and the results are settled. It is vital that we can avoid conflating debates about the outcomes of any given election with our ability to critically evaluate the processes and systems underpinning our government. At its core, this resolution is fundamentally about both holding accountable a state agency that has been egregious in its disregard for the laws written by the Legislature and signed by the Governor, and helping to restore proper constitutional balance between the branches of government.

The problem of state agencies choosing not to enforce the statutes that they are charged with administering is, unfortunately, becoming far too common in our government. This trend is also not unique to any given party or administration. As one example, the Wisconsin Department of Health Services under both the Walker and Evers administrations spent years dragging its feet on implementing several pilot programs aimed at reducing preventable emergency hospital visits for state Medicaid enrollees, despite [unanimous legislation](#) imposing a clear mandate and deadline on the Department. When agencies deliberately slow-walk or ignore their obligations under the law, they unconstitutionally undermine the Legislature's role in the government.

The actions of the Wisconsin Elections Commission, however, represent an unacceptable escalation of an agency intentionally disregarding state law. In its [recent report](#), the Wisconsin Legislative Audit Bureau identified multiple examples of WEC and its staff violating election laws by refusing to perform their statutorily prescribed duties, issuing election guidance that contradicted existing statutes, and failing to promulgate administrative rules to reflect recent legislative changes. By repeatedly taking actions directly inconsistent with state laws, WEC officials have effectively appropriated the Legislature's constitutional lawmaking authority by illegally substituting their own preferences and agendas in place of the clear directives of the democratically elected representatives of the public. These actions represent serious wrongdoing and cannot be tolerated, particularly among those specifically responsible for safeguarding the elections that are essential to our democratic values. This resolution reflects our obligation as legislators to be vigilant about the proper enforcement of the laws we write. A failure by any lawmaker to support such a resolution would be tantamount to an admission of their belief in the irrelevance of the Legislature.

While some may—incorrectly—choose to reflexively dismiss this resolution as a partisan exercise, doing so would fail to recognize that restoring respect for the law and faith in our governmental institutions is essential to uniting our increasingly fractionalized society. In a less politically charged climate, it would be clear that these

officials, who include both Republicans and Democrats, are unfit to remain in their positions. The resolution represents a call for those in government to do their jobs: for state agencies to faithfully fulfill their responsibilities under the law, for state and local law enforcement to enforce compliance with state statutes, and for members of the Legislature to ensure that the laws they write as representatives of the people are being properly implemented.

13485 W Old Oak Ln
New Berlin, WI 53151-2531**Contact Date:** 12/16/2021**Contact Type:** Email**Summary:** SUPPORT and VOTE YES on WI 2021 Senate Joint Resolution 32**Description:** I support, thank Assembly Rep's. Steineke, Wichgers, Kuglitsch for co-sponsoring, and ask you all to SUPPORT, CO-SPONSOR. and VOTE YES on Wisconsin 2021 Senate Joint Resolution 32 (SJR32).

SJR32 will insure that Wisconsin's State Constitution will clearly and concisely mandates that only a U.S. Citizen who is age 18 or older who is a resident of an election district in the State of Wisconsin is a qualified elector of that district who may vote in an election for national, state, or local office or at a statewide or local referendum.

It is inconceivable that a person who is NOT a U.S. Citizen with no loyalty to nor vested interest in the U.S. would be allowed to vote in any election in the U.S. Yet, unfortunately, that is happening, and being codified into law in communities and States around the U.S., such as New York City, NY, and San Francisco, CA, where non-U.S. Citizens may vote in local and State elections.

The right to vote in any election in the U.S., regardless of the level of government, should be limited only to those who hold U.S. Citizenship by any of the four legal means permitted in the U.S.: 1) by Birth in the U.S.; by 2) Acquisition or 3) Derivation, as a child of one or both parents who are U.S. Citizens; or 4) by the legal process of Naturalization which includes swearing an Oath of Allegiance to the U.S.

It is time that Wisconsin removes any ambiguity and assures that our State Constitution is absolutely clear that only U.S. Citizens may vote in elections in Wisconsin, regardless of the level of government, joining the States of Colorado, Florida, Alabama, North Dakota and Arizona who have already taken that step.

I welcome your replies.

Sincerely,

Thomas K. Mayer

Description: Start impeachment proceedings or get some Constitutional Law experts on board to see what other charges can be leveled at this tyrant !!!!!!!
Waiting and hoping the SCOTWI will save the day in not good enough. Comrad Evers must be stopped or removed from office by the people. This is just way too much to allow to continue until the 2022 election. Besides if he is allowed to be defeated he still gets to collect a huge pension that he does not deserve for 4 years of dereliction of duty, abuse of power and mismanagement. You must know that Eric Holder / Obama are involved in this issue.

Subject: Governor Draws New Maps in Secret

Bipartisan supermajorities rejected the governor's 'People's Maps,' so he tossed them out and drew new maps in secret.

View this email in your browser<<https://mailchi.mp/e725c032b771/upfront-wisconsin-8606033?e=edc886feb6>>

[<https://mcusercontent.com/f9f2a68ed00b0aa10dad26fcc/images/16e0dc02-b4e0-6c3d-9f64-a9ed37c6d7f6.png>]

Governor Draws New Maps in Secret

[<https://mcusercontent.com/f9f2a68ed00b0aa10dad26fcc/images/24725b73-18db-5134-0bc3-4de9f0538033.jpg>]
This week Governor Evers submitted new maps to the Wisconsin Supreme Court as part of the case involving the redistricting process in Wisconsin (Johnson v. Wisconsin Elections Commission).

Bipartisan supermajorities in both legislative chambers rejected maps drawn by the governor's People's Maps Commission. Now, Governor Evers has abandoned his campaign rhetoric promising independently-drawn maps to rapidly and secretly draw his own rigged maps without public input. The hypocrisy of the governor is impossible to ignore.

Abandoning the ACT/SAT?

[<https://mcusercontent.com/f9f2a68ed00b0aa10dad26fcc/images/74df1e9e-c59d-50c7-2815-34698ae52f8b.png>]
The University of Wisconsin System announced that high school students applying to colleges won't have to take the ACT or SAT college preparatory tests.

During the pandemic, students of every age have fallen woefully behind. Remedial class attendance numbers have been growing for years because high school students are unprepared for college as it is. Removing ACT/SAT requirements only exacerbates this.

Only one-third of Wisconsin students<<https://legis.us5.list-manage.com/track/click?u=f9f2a68ed00b0aa10dad26fcc&id=d0258cefe5&e=edc886feb6>> are proficient – operating at grade level – in math and English language arts, 64% of Wisconsin students<<https://legis.us5.list-manage.com/track/click?u=f9f2a68ed00b0aa10dad26fcc&id=2b3f70cdeb&e=edc886feb6>> are not proficient in reading, with 34% of Wisconsin students are not even meeting a basic reading level.

Educational institutions should be reinstating benchmarks, not removing them.

Leading the Way

[<https://mcusercontent.com/f9f2a68ed00b0aa10dad26fcc/images/e1e0f336-b411-7126-6353-ac6432aueb1c.png>]
I'm proud that Republicans once again led the way on reducing the tax burden on Wisconsinites. In the last several weeks, I've shared several great reports that taxpayers in our state are in a much better position thanks to over a decade of responsible Republican budgeting. The budget we passed in June included \$3.4 billion in tax cuts for Wisconsin.

Governor Evers is so happy with those tax cuts that he not only signed them into law, he's still trying to take credit! In reality, the governor wanted to increase taxes by more than \$1 billion. Republicans threw out his costly and unrealistic proposal filled with divisive policy items and instead crafted a budget that funds priorities like education, roads and long-term care.

We have worked very hard to make sure Wisconsin spends responsibly and our budgets have consistently

Contact Report

generated surpluses. When the state takes in more than it needs to spend, it's only fair to provide relief to the hard working taxpayer of our state.

Description: Hon. Joe Sanfelippo:

I urge you to support the National Popular Vote bill in the legislature. Every person's vote should be equal, and the presidential candidate who gets the most votes nationwide should win. Several states have already passed the National Popular Vote law, and we should join them in bringing fairness to our presidential elections. Thank you for your consideration.

Respectfully yours,

Paul Russell

Dear Representative Sanfelippo,

I oppose the National Popular Vote Interstate Compact (NPVIC) legislation for replacing the Electoral College with the national popular vote for the following reasons:

First, with the Electoral College the bad effects of voter fraud are minimized.

Second, the NPV movement should not be allowed to replace the Electoral College with the national popular vote without the necessity of a constitutional amendment.

If the NPVIC legislation has already passed in our state, please repeal it.

Sincerely,
Forbes Scott

21435 W Cleveland Ave
New Berlin, WI 53146-1926**Contact Date:** 01/15/2022**Contact Type:** Email**Summary:** Evers lack of ethics????**Description:** Sir,

The following is a quote from you yourself I found on Empower Wisconsin.

At multiple turns, the Republican-controlled Legislature has asked to be involved in the funding decisions. The Legislature is, after all, the branch that's supposed to control the power of the purse. Evers has ignored and rebuked the requests. In April, Evers vetoed <<https://www.usnews.com/news/best-states/wisconsin/articles/2021-04-22/evers-vetoes-gop-bills-directing-federal-covid-19-spending>> a package of Republican-authored measures that laid out how \$3.2 billion in federal pandemic relief funds would be spent. At the time, Senate Majority Leader Devin LeMahieu (R-Oostburg) said Evers' veto message sent a clear message to Wisconsin taxpayers that "they will have little to no say in how their federal dollars are spent."

"He has, once again, rejected the opportunity to work with legislators on even a basic spending plan. This is not good government," LeMahieu said,

What I don't understand at all is why a governor who has consistently abused his authority, consistently made very critical decisions that affect all citizens of the state, unlawfully given Carte Blanc power to an unelected bureaucrat, failed to perform the first responsibility of the job of governor, namely to PROTECT THE LIVES AND PROPERTY OF THE RESIDENTS OF THE STATE; I speak of the citizens of Kenosha, was responsible for making an incendiary speech just minutes before the Kenosha riot started, has not been brought up on charges to impeach him, or charges to remove him from office for blatant incompetence when there is MORE THAN ENOUGH EVIDENCE to prove all of them. Tell me just what line does a politician need to cross before they are held accountable for bad behavior? In the private sector anything that I have listed would suffice for termination of employment. Are we to understand that being elected makes a person immune to any type of ethics or decency on the job? When one man sits on top of a pile of \$3.2 billion dollars earmarked for the benefit of all state citizens and doles it out to friends and family and political supporters, something is terribly wrong. The citizens of Wisconsin should NOT be forced to sit back and wait for the next election and put up with all of the corruption now evident in the governors office. Maybe it's time to consult with a Constitutional Lawyer. The people of Wisconsin deserve better than what we are getting from this governor. This person is a walking disaster.

Summary: We must be able to trust our elections

Description: Re: We must be able to trust our elections

Dear Representative Sanfelippo,

Americans face a crisis of confidence in their elections.

Last year, in a unique emergency, many hasty changes were made in the way that our elections were held. In the rush to let people vote without risking their health, too little attention was paid to the ways in which these changes might open the door to fraud.

That must change. The mistakes of 2020 must not be repeated.

Mailing out ballots to people who have not requested them must stop.

Reliable voter ID is essential.

The citizenship of each person who registers must be confirmed.

The voting must end on election day. Ballots arriving later in the mail should not be counted.

The list of registered voters must be frequently and carefully updated to remove those who have died or moved.

The vote counting must be clearly visible to observers.

If we repeat the mistakes of 2020, Americans will continue to wonder whether they can trust the outcome. Election reform to guarantee the integrity of our elections is the only answer.

Please be sure that our state meets all of these necessary standards.

Sincerely,

Karen Miller

Contact Date: 01/21/2022**Contact Type:** Email**Summary:** Your action against Rep. Ranthum**Description:** Dear Rep Vos,

Your action against the staff of Rep. Ranthum is inexcusable and needs to be rescinded immediately. If you want to act honorably, then have an open debate on the use of illegal drop boxes (as cited by Judge Bradley just after the election and the recent ruling from a few days ago).

In addition, your apparent opposition to the prosecution of the WEC board is impeding the will of the people. Obviously, your involvement in the drop box fiasco facilitated massive ballot harvesting and is illegal on its face. We're all aware of what that means for those of you involved.

Those of us paying attention know that the entire mail-in vote fraud scam was part in parcel of the Great Reset / covid operation to overthrow our Republic. We don't have time for your kind of corporate-controlled agenda if we want to remain a free republic.

Below is a link from Mike Lindell's impromptu FB live chat from last night, which conveys the concerns we all have with what you are doing.

New Berlin, WI 53151-2531**Contact Date:** 01/28/2022**Contact Type:** Email**Summary:** BLOCK Evers' announced intent to spend \$1.7 billion of projected budget surplus**Description:** I am AGAINST, and ask you to please VOTE NO on and BLOCK, Governor Evers' announced intent on 01-27-2022 to spend \$1.7 billion of Wisconsin's PROJECTED budget surplus by sending checks of \$150 to Wisconsin residents, sending additional funds to schools, and increasing spending to defray childcare costs.

This proposed expenditure by Evers is nothing more than a very overt election year attempt to promote his candidacy for reelection. It has absolutely nothing to do with sound financial management of Wisconsin's tax dollars.

It must be noted that Evers proposes to spend a PROJECTED surplus, one that has not yet been realized and may be not realized if the national economy, teetering on the brink of recession, goes into decline.

Wisconsin's Legislature holds the "power of the purse" and should not relinquish it's financial responsibility to Evers or any other governor.

Wisconsin schools already are at record levels of State funding, yet schools, particularly Milwaukee Public Schools, are not improving their performance in terms of student learning and achievement. Throwing more money at schools is foolish.

Priority for any realized budget surplus should be:

- * paying off Wisconsin's debt, which currently stands at over \$22 billion, and
- * further building Wisconsin's Budget Stabilization "Rainy Day" Fund, which, while at a record level, still remains below the maximum 5% of General Fund expenditures allowed by Wisconsin statute, and
- * increasing funding for Wisconsin law enforcement specifically to increase law enforcement numbers on the streets, improve law enforcement training & equipment, and increase correction facility capacity, all of which provide long-term benefits to Wisconsin taxpayers, and only after those priorities are satisfied should consideration be given to returning funds to taxpayers.....and even then such a return of funds to residents should be in the form of further long-term property tax reduction rather than one-time checks to residents.

Subject: December 31 Deadline

Hi Joe,

From yesterday's Journal Sentinel:

". . . a group of Republican state lawmakers told the head of the Wisconsin Elections Commission on Wednesday to provide them with a raft of information about the state's voter database by the end of the month. A Democrat on the bipartisan commission called each of the six Republicans who sent the letter 'a partisan grinch' . . . the demand was made by GOP Reps Janel Brandjten, Joe Sanfelippo, Jeremy Thiesfieldt, Dave Murthy, Donna Rozar, and Ron Tusler . . . 'What kind of people make these kinds of extensive, even ridiculous, demands for documents and data on fellow human beings on the eve of Christmas and New Year's festivities?'"

I guess I had hoped you wished everyone a happy Christmas season, but it appears I was wrong. The more I learn about what you are doing, the more I become disappointed in you as an elected official.

Thanks for listening to my opinion.

Co-Sponsorship Memorandum

To: All Legislators

From: Rep. Joe Sanfelippo

Date: December 6, 2021

Re: Co-sponsorship of LRB-5380 – calling for the resignation of the administrator, assistant administrator, and several members of the Wisconsin Elections Commission.

Deadline: THURSDAY, December 9th at Noon

In recent years, despite its statutory duty to administer and ensure compliance with election laws, the Wisconsin Elections Commission has taken actions that have clearly contravened existing statutes. These have included the Wisconsin Elections Commission ordering local clerks to illegally suspend the use of special voting deputies, neglecting to properly maintain accurate voter registration records, and failing to promulgate administrative rules necessary to implement state statutes, among other issues. Consequently, the [Legislature directed](#) the Wisconsin Legislative Audit Bureau to conduct a review of the Wisconsin Elections Commission's actions and their compliance with current laws.

In its [recent report](#), the Wisconsin Legislative Audit Bureau identified multiple examples of the Wisconsin Elections Commission and its staff violating election laws by refusing to perform their statutorily prescribed duties, issuing election guidance that contradicted existing statutes, and failing to promulgate administrative rules to reflect recent changes to election statutes. These findings represent the latest examples of the Wisconsin Elections Commission's ongoing disinterest in adhering to the constraints or the obligations that our state's laws impose on the agency.

It has become increasingly clear that certain officials at the Wisconsin Elections Commission have repeatedly disregarded their duty to faithfully and impartially implement our election laws. Instead, by continually taking actions directly inconsistent with state laws, these Wisconsin Elections Commission officials have effectively appropriated the lawmaking authority of the Legislature by illegally substituting their own preferences and agendas in place of the clear directives of the democratically elected representatives of the public.

The Legislature cannot let stand such a brazen and intentional usurpation of its constitutional prerogative over creating the law by a few individuals abusing the authority of their official positions. This resolution seeks to hold these individuals accountable by formally demanding the immediate resignations of Wisconsin Elections Commission Administrator Meagan Wolfe, Assistant Administrator Richard Rydecki, and Commissioners Marge Bostelmann, Julie M. Glancey, Ann S. Jacobs, Dean Knudson, and Mark L. Thomsen, and expressing the Legislature's intent to pursue their removal should they refuse. The resolution further urges the Attorney General to conduct a thorough investigation into these individuals' actions and to make criminal referrals to local district attorneys as appropriate and supported by their findings.

If you would like to co-sponsor LRB-5380, please reply to this email, contact Rep. Sanfelippo's office 6-0620 no later than Thursday, December 9th at Noon.

Subject: Fwd: EXCLUSIVE: New Information Shows Wisconsin Speaker Robin Vos Was Intimately Behind the Insertion of Drop Boxes Across the Country

Wisconsin Legislators,

I am RESENDING the article about Rep. Vos' alleged political corruption act from the Gateway Pundit of Jan. 16, 2022. I expected a response from one or more of you about this. Now I am hearing from my daughter that this issue/incident was posted and is being discussed on Facebook and I am still waiting for a response from you people. THIS IS VERY SERIOUS STUFF WE ARE DEALING WITH HERE.

Is it possible that none of you five or six legislators have received my original email sent directly to your email mailboxes? If that is the case then we have an even more serious situation in Madison. If I do not hear from you shortly I will be calling each one of your offices to find out why.

Co-Sponsorship Memorandum

To: All Legislators

From: Rep. Joe Sanfelippo

Date: December 9, 2021

Re: Co-sponsorship of LRB-5380 – calling for the resignation of the administrator, assistant administrator, and several members of the Wisconsin Elections Commission.

Deadline: **TODAY, December 9th at Noon**

In recent years, despite its statutory duty to administer and ensure compliance with election laws, the Wisconsin Elections Commission has taken actions that have clearly contravened existing statutes. These have included the Wisconsin Elections Commission ordering local clerks to illegally suspend the use of special voting deputies, neglecting to properly maintain accurate voter registration records, and failing to promulgate administrative rules necessary to implement state statutes, among other issues. Consequently, the [Legislature directed](#) the Wisconsin Legislative Audit Bureau to conduct a review of the Wisconsin Elections Commission's actions and their compliance with current laws.

In its [recent report](#), the Wisconsin Legislative Audit Bureau identified multiple examples of the Wisconsin Elections Commission and its staff violating election laws by refusing to perform their statutorily prescribed duties, issuing election guidance that contradicted existing statutes, and failing to promulgate administrative rules to reflect recent changes to election statutes. These findings represent the latest examples of the Wisconsin Elections Commission's ongoing disinterest in adhering to the constraints or the obligations that our state's laws impose on the agency.

It has become increasingly clear that certain officials at the Wisconsin Elections Commission have repeatedly disregarded their duty to faithfully and impartially implement our election laws. Instead, by continually taking actions directly inconsistent with state laws, these Wisconsin Elections Commission officials have effectively appropriated the lawmaking authority of the Legislature by illegally substituting their own preferences and agendas in place of the clear directives of the democratically elected representatives of the public.

The Legislature cannot let stand such a brazen and intentional usurpation of its constitutional prerogative over creating the law by a few individuals abusing the authority of their official positions. This resolution seeks to hold these individuals accountable by formally demanding the immediate resignations of Wisconsin Elections Commission Administrator Meagan Wolfe, Assistant Administrator Richard Rydecki, and Commissioners Marge Bostelmann, Julie M. Glancey, Ann S. Jacobs, Dean Knudson,

and Mark L. Thomsen, and expressing the Legislature's intent to pursue their removal should they refuse. The resolution further urges the Attorney General to conduct a thorough investigation into these individuals' actions and to make criminal referrals to local district attorneys as appropriate and supported by their findings.

If you would like to co-sponsor LRB-5380, please reply to this email, contact Rep. Sanfelippo's office 6-0620 no later than Thursday, December 9th at Noon.

Subject: New models for increasing trust & integrity in election administration
Attachments: ERN Carter Center Webinar Flyer.pdf

Dear Rep. Sanfelippo,
As I have in the past, I'm reaching out with information I hope will be helpful to you in your role on the Assembly Committee on Campaigns and Elections.

This time, I want to share an invitation about a webinar that might be of interest to you or your staff, discussing new, practical, proven ideas for structuring state election positions to reduce the risk of partisan loyalists in these offices undermining voter confidence, or even threatening the integrity of results.

The webinar, co-hosted by The Carter Center and Election Reformers Network, will take place from **3–4 PM Eastern on Monday, January 31**. The panel will include a former secretary of state, former election officials, and leading election scholars.

[Here is a link to register.](#)

If the time is not convenient but you'd be interested in seeing a recording, email back and we'll be happy to send that to you.

Thank you very much for your time,

Kevin Johnson

Good morning, David.

Rep. Sanfelippo has written an opinion piece discussing the recent resolution that he introduced calling for the resignation of several officials at the Wisconsin Elections Commission that he hopes would help to further a productive dialogue on the issue. He would like to offer it to the Journal-Sentinel to run in an upcoming edition, perhaps this Sunday. At this time, it is not being offered to other publications. Would you please take a look at the attached submission and let us know if the Journal-Sentinel would be interested in running it? A copy of the resolution text is also attached for reference. Thank you.

Subject: Re: Let there be light - election integrity

Hi Carolyn,

I have been fighting for election integrity since prior to the fall 2020 election. Below is a partial list of actions I have taken for your review.

I do not support all of Rep. Ranthum's proposals as many of the actions he is advocating for are unconstitutional or would not hold up in a court of law. For example, his push to rescind our state's electoral votes is not something we can do based on the opinions of several constitutional lawyers.

The best thing we can do is to make sure that our elections laws are strictly enforced transparently and evenly throughout the state. When we find that they are not, as we have witnessed in the past, we must hold the people responsible accountable regardless of their part affiliation. That is why I am pushing for the removal of the WEC commissioners who voted to break or not enforce elections laws as well the employees of WEC who have done the same.

[3/31/20](#): Press release condemning WEC's failure to Milwaukee and Dane County Clerks' illegal public guidance regarding indefinitely confined voters ahead of 2020 Spring primary election

[11/9/20](#): Press release calling for comprehensive audit of 2020 general election and to delay certification of election results pending outcome of that audit

[12/11/20](#): Joint public hearing of Assembly and Senate Campaign and Elections Committees regarding issues with 2020 general election; press release renewing call for comprehensive audit of election

[3/10/21](#): Public hearing of Assembly Campaign and Elections Hearing regarding issues with 2020 general election, focusing on specific allegations in Green Bay; press release calling for committee to investigate recent elections

[3/16/21](#): Introduction of Senate Bill 212 / Assembly Bill 198 addressing numerous elections laws, including practices relating to election officials ignoring statutes, processing of absentee ballots, and imposing criminal penalties; bill subsequently passed, but vetoed by Governor Tony Evers

[3/17/21](#): Introduction of Assembly Resolution 15 directing the Assembly Committee on Campaigns and Elections to investigate the administration of elections in Wisconsin.

[3/23/21](#): Passage of Assembly Resolution 15 following floor debate, launching investigation into issues with recent elections; press release supporting passage of resolution

[10/28/21](#): Press release calling for dismissal of WEC Administrator Meagan Wolfe and other WEC personnel for misconduct through actions relating to recent elections

11/10/21: Letter to Attorney General Josh Kaul demanding investigation of electoral violations at nursing homes in 2020 relating to suspension of special voting deputy process and urging prosecution of official misconduct by WEC administrator, commissioners, and staff

Other election oversight activities include additional public hearings of [Assembly Campaigns and Elections Committee](#), numerous press [statements](#) and [interviews](#), and other legislative activities investigating election law.

Sanfelippo has written an opinion piece discussing the recent resolution that he introduced calling for the resignation of several officials at the Wisconsin Elections Commission that he hopes would help to further a productive dialogue on the issue. He would like to offer it to the State Journal to run in an upcoming edition, perhaps this Sunday. At this time, it has not been offered to other publications. Would you please take a look at the attached submission and let us know if the State Journal would be interested in running it? A copy of the resolution text is also attached for reference. Thank you.

Good morning. We did not find any records responsive to your request.

We now consider your request closed.

Happy New Year.

Best regards,

Subject: Re: Tim Ramthun call for decertification of Wisconsin's 10 electoral ballots

Hey Joe,

I hope you are doing well in the new year so far.

Has your position on Ramthun's resolution changed? I have briefly looked at his 2021 Assembly Joint Resolution 120 (LRB-5792/1), and listened to a few interviews, and in my opinion he makes a compelling case.

I would like to see that his resolution gains support with his colleagues.

Thank you,

Milan Jovanovich

<Joe.Sanfelippo@legis.wisconsin.gov> wrote:

Hi Milan,

According to our Legislative Council attorneys, Ramthum's resolution is not inaccordance with law. Furthermore, I am not supporting itbecause it is merely symbolic and has no real consequence.

I have been focusing my efforts on cleaning up the mess at the WI Election Commission and working to ensure anyone who willfully violated the law during the last election is removed from their position and prosecuted to the full extent of the law.

We need to make sure our elections are run transparently and the laws are followed evenly across the state. Meaningless resolutions will do little to correct the serious problems we witnessed last November.

Hope all is well with you,

Joe

Subject: Tim Ramthun call for decertification of Wisconsin's 10 electoral ballots

Hey Joe,

I hope you had a great Thanksgiving.

What is your position on Rep. Ramthun's motion to decertify Wisconsin's 10 electoral vote?

And do you have any insight as to almost lack of wanting to move this forward by both the Assembly and Senate? If I am correct there is a 22-month window to look in to this? Vos looks to be stonewalling this process on his end. What is the issue? Why are we waiting?

Regardless of outcome, voting needs to be 100% accurate and fair, and if it is, the results are what they are. I will tell you that I have 0% confidence in the current voting system in Wisconsin.

Again, many on the Republican side of the aisle appear to be doing nothing, it is actually disappointing.

Thank you,

Milan Jovanovich

Wisconsin Elections Commission

212 East Washington Avenue | Third Floor | P.O. Box 7984 | Madison, WI 53707-7984

December 30, 2021

SENT VIA EMAIL

Dear Representative Brandtjen and members of the Assembly Committee on Campaigns and Elections,

Thank you for your recent inquiry regarding the origin, structure, and security of WisVote, the state's voter registration system and voter database. Wisconsin Elections Commission staff have provided answers, explanations and background for each of your questions submitted on December 22, 2021. Below, please find a specific response to each question. The text of your questions is also included with each response for easy reference. Your original request, along with this reply, has also been provided to the six-member Wisconsin Elections Commission.

While we are always happy to provide requested information to the Committee on a timely basis, some of the requests you make will need to be considered by the full Commission. The Chair of the Commission has added this discussion to the January 11, 2021, meeting. Further, in that some of your requests involve statutory issues regarding release of confidential voter information under Wis. Stat. §§ 6.36(1)(b)1.a., 6.47, and Wis. Admin. Code EL § 3.50(8), the Commission will need to consider the options available to fulfill your request. We explain in detail below the quandaries in those cases where they occur and what the options for further follow-up include.

We look forward to working with the Committee on these and any other questions about elections administration in Wisconsin.

Sincerely,

Meagan Wolfe
Administrator
Wisconsin Election Commission

Question 1: State Control of Data. *Please confirm that all of the voter identification data (Voter Identification Database) contained within, used or accessed by the Wisconsin statewide voter roll system administered by your agency (Statewide System) is hosted, stored or otherwise resides on a server or servers owned and operated by the Wisconsin Department of Administration (DOA). If the Voter Identification Database is hosted elsewhere, please provide the identity of the host and any and all written or oral agreements between WEC and such host.*

Answer 1: All voter data is hosted, stored, or otherwise resides on servers and systems owned by the State of Wisconsin. The Wisconsin Elections Commission uses the same state-owned data center and services as other state agencies through the Department of Administration's Division of Enterprise Technology. There are no other entities to identify or with whom the WEC holds agreements for data or server hosting.

Question 2: Database Specifications. *Please provide the type, specifications and version of the database software used to contain and manage the data in the Voter Identification Database (such as MySQL, Oracle, etc.) on said servers. Upon receipt of your response, we will expect the ability to: identify the software used to create the Voter Identification Database program, identify who wrote the database program, determine whether the database program was actually built by WEC staff as you declared publicly in the September 8, 2021 Senate hearing ("we actually built it ourselves here in the State of Wisconsin") or whether the database program is actually vendor-supplied database software or components, and that the database software containing over 7 million records of Wisconsin voter data is hosted or otherwise resides securely on DOA servers.*

Answer 2: The State of Wisconsin voter registration program and database, containing all voter registration records and voter history, resides at the state data centers and is securely hosted on DOA servers. The current state-wide voter registration system, known as WisVote, is a system designed, developed, maintained, and secured by the State of Wisconsin. All program development, testing, and security is done by State of Wisconsin employees and employees hired through the state's required IT development services contract, currently with Knowledge Services. It is our understanding that the Committee Chair has made a separate public records request to the Department of Administration for WEC employee and service contract information which will verify this fact. State of Wisconsin agencies use the state IT services contract to hire and maintain IT developers to accomplish their IT needs. The WEC built the WisVote system, and DET hosts the system using the following specifications:

- **Platforms:**
 - Dynamics CRM 365 On Premise (User Interface)
 - SQL Server 2019 Enterprise (Database)
 - Windows Server
 - Red Hat Enterprise Linux 7
 - ASP.NET (Badger Voters)
- **Environments:**
 - PROD
 - UAT
 - DEV
 - MIRROR
- **# of Servers:**
 - Currently 2 production database servers
 - Additional database servers in other environments for testing and redundancy

- More than 50 total servers all types – all housed and secured through the Department of Administration
- **Server Application Types:**
 - Azure DevOps
 - Badger Voters
 - Canvass
 - Email Routing
 - Linux Database Servers
 - MyVote
 - PS Management
 - SQL Software Reporting Services
 - User interface
 - Windows Database Servers
 - WisVote Asynchronous Servers
 - WisVote Batch jobs

As it relates to the history of the “Database,” development history is a matter of public record and is extensively detailed in public meeting minutes of the SEB, GAB, and WEC. Over the past 20 years Wisconsin’s registration system evolved from nothing to the AESM, then to SVRS, and most recently WisVote. The current system, used by the WEC since the creation of the agency, was built by the State of Wisconsin and is not a vendor-based system. The WisVote system is maintained, tested, built, repaired, and secured using state employees and employees hired through the state’s Knowledge Services mandatory contract.

Voter Database Timeline

Before the state-wide system

- **2002** - The Federal Help America Vote Act mandates creation of state-wide voter registration systems and allocates funding for states to create them.
- **2003** – The State Elections Board (SEB) begins planning for a state-wide voter registration system.
 - At the time, 13 of 72 counties had legacy voter registration databases – most using Access, Excel, and Word. Some were DOS based and one (Fond du Lac) was Cobalt based.
 - 235 municipalities maintained local databases using 61 different types of software ranging from Microsoft Word to off-the-shelf products.
- **2004** – SEB contracts with Accenture to create a state-wide voter registration system. Development starts.
- **2005** – SEB hires Project and Limited-Term staff to support development of the state-wide voter registration system. SEB contracts with National Business Systems for data entry to import voter data.
 - State law did not require voter registration in municipalities with a population under 5,000 until 2005. Thus, many smaller jurisdictions did not maintain a database until state law changed and until some statewide functions were mandated under HAVA. Therefore, many voter registration records converted from county and municipal legacy systems into the state-wide system did not have a “registration date” associated with them. See our FAQ on this topic (<https://elections.wi.gov/node/7516>) for more details.

AESM Pilot System

- **2006** – SEB launches AESM (Accenture Election System Manager). This system was version 1.0 of the State-wide Voter Registration System (SVRS). System performance is evaluated as poor by the SEB and Wisconsin clerks.

- 2007 – SEB and Accenture terminate their contract. Accenture repays the State of Wisconsin \$4.0 million and releases all data to the State.

SVRS

- 2008 – GAB hires transitional IS professionals to redevelop and manage the state-wide system, SVRS. It consists of 59 servers in 3 environments.
- 2009 – GAB hires LTE contract software developers to continue development of SVRS and transition SVRS to .NET Framework 3.5.
- 2010 – GAB launches SVRS 7.0. It consists of 55 servers in 4 environments.
- 2011 – GAB hires IS contractors to support SVRS under the direction of the DOA Bureau of Application Support Director and the GAB Elections Division Governance Team.
- 2012 – GAB IT development team updates SVRS to comply with the Photo ID law and incorporate elements using Dynamics CRM platform elements.
- 2012-2013 – GAB upgrades SQL server, Windows Server, and .NET framework versions.
- 2014 – GAB begins developing an all-new state-wide system after positive feedback on the usability and stability of Dynamics CRM elements of SVRS. Dynamics CRM is a development platform which we used to create a custom, proprietary, user interface that interacts with the other components of WisVote. This is not a vendor-based system and no vendor has access to the system or the code base. If a change is made, a feature added, or a fix implemented to the system it is done by state employees or employees hired through Knowledge Services.
- 2015 – GAB approves the purchase of Dynamics CRM platform licenses to complete development and fielding of the new system, called WisVote.

WisVote

- 2016 – GAB launches WisVote. WisVote adds absentee ballot request and tracking tools, election worker training and tracking tools, and support for the MyVote Wisconsin and Badger Voters portals.
- 2017 – WEC upgrades WisVote to support Online Voter Registration after state law is passed allowing voters that option and to also support the statutorily authorized Badger Book electronic poll book system.
- 2018 – WEC upgrades WisVote with Election Day Registration postcard reporting and election reconciliation functions. SQL server and Windows Server versions are also updated. Multifactor authentication is added for all users – this is in addition to regular username and password credentialing. Mandatory device endpoint testing software and cyber security training is also required before clerks receive access.
- 2019 – WEC upgrades the WisVote user interface to the Dynamics CRM 365 On Premise operating platform, which provides security updates and adds endpoint monitoring for all devices accessing WisVote using a separate software application.
- 2020 – WEC upgrades WisVote with absentee ballot mail tracking for outgoing ballots.
- Development background:
 - the Wisconsin Elections Commission built WisVote, and it is a custom, in-house developed application that is not used by any other entity and is not available for use or sale by any other entity. It was built utilizing secure platforms and customized in-house to comply with Wisconsin election laws and meet the needs of system users.
 - All WisVote development was performed by:
 - full-time state employees
 - federally funded-project state employees
 - or individuals hired through the State of Wisconsin’s IT services contract and supervised by state employees
 - No vendors were involved in the development or maintenance of WisVote.

Question 3: WisVote Structure. *Please identify the name and all technical specifications (including coding language, version and platform) of the application software used to code and run the Statewide System and whether any contractors were used to design, build or operate any portion or component of the software. It is our understanding that the Statewide System consists of a main application or platform, and coordinates WisVote, MyVote, Badger Voters, and possibly other applications, which may not be public. Please identify ALL applications that have any connectivity to the Statewide System through any application programming interface (API) or other path of connectivity giving any and all parties real time access to any function of the Statewide System or the Voter Identification Database, including contractors, vendors, non-profit or political entities and any other parties.*

Answer 3: The current state-wide voter registration database, WisVote, was built using the following specification:

- **Platforms**

- Dynamics CRM 365 On Premise (User Interface)
- SQL Server 2019 Enterprise (Database)
- Windows Server
- Red Hat Enterprise Linux 7
- ASP.NET (Badger Voters)

- **Language**

- C#

- WEC and DOA/DET employ individuals for software development under the mandatory state Knowledge Services contract, and previously under the Tapfin contract, who are under the direct supervision of state employees.
- Other State of Wisconsin systems with connectivity to WisVote (direct or indirect).
 - MyVote.wi.gov (Public access website, built and maintained by WEC, hosted by DOA)
 - Badger Voters (Data request system, built and maintained by WEC, hosted by DOA)
 - Badger Book (indirect, no live connection. System built and maintained by WEC, hosted by DOA)
 - Canvass Reporting System (indirect connection. Official election results collection from counties and unofficial report generation for counties).
 - Access Elections (WEC database for ADA-compliance site review data)
 - Campaign Finance Information System (CFIS) (limited access to Ethics Commission for required statutory functions)
- External Services accessed by WisVote (one-way queries only)
 - WisDOT DMV Service
 - ArcGIS
 - Smarty Streets addressing service
 - Google Maps
- Internal Only APIs
 - Wisconsin DOT, statutorily required to support Online Voter Registration
 - Above mentioned statutorily required indirect access to Ethics CFIS
 - Elections Data Management
 - Department of Corrections, statutorily required felon notices
 - Address verification/validation USPS Service and ZP4 Service
- There are no APIs offering external contractors, vendors, non-profits, political entities, or other parties access to the system. Local election authorities do not have system development access and are therefore unable to offer APIs to any entity.

Question 4: Physical Location of Data. *Please reveal where the Statewide System is hosted. Is the Statewide System hosted at DOA with or separate from the Voter Identification Database or is it hosted elsewhere on another server system such as Amazon© Web Services (AWS) or hosted physically at WEC itself? If the Statewide System is hosted at any place or vendor other than DOA, please provide all written and oral agreements between WEC and said host. If the Statewide System is physically hosted at WEC, please disclose which room or office number it is located in and provide security logs of who has authorized physical access to that room or rooms.*

Answer 4: All voter data is hosted, stored, or otherwise resides on servers and systems owned by the State of Wisconsin under the supervision and management of the Department of Administration's Division of Enterprise Technology. DOA/DET primarily uses two major data centers: Femrite Data Center (Madison, WI) and Milwaukee Data Center (Milwaukee, WI).

Question 5: Procurements & Contracts. *Please provide a copy of any and all procurement agreements, requests for proposals, bid requests, bid invitations and all technology agreements, technology employment agreements and other agreements related to coding, designing, structuring, envisioning, updating, editing, writing or otherwise manipulating in any way, the Voter Identification Database or the Statewide System that WEC, or any of its predecessors, is or has been a party to over the past 20 years. This request requires you to produce copies of all procurement or other agreements entered into by WEC, or its predecessors, with any other parties under Wisconsin procurement procedures relying upon the technique known as "piggybacking" on other existing state procurement contracts.*

Answer 5: Regarding current personnel records, all information related to the WEC's employment of IT development staff is now being processed as part of a public records request through the Department of Administration. It is our understanding that the Committee has also asked for and received documents regarding any IT procurements related to the current state-wide system. Those requests are currently being processed in coordination between the WEC, DOA, and DET.

Regarding historical records of previous systems under predecessor agencies, WEC is not in physical possession of these records, but if requested can work to analyze and process this request as a public records request including working with the state archives and DOA to locate responsive historical records. This request asks for records that span 20 years, three separate state agencies, and involve technical applications no longer in use by the State of Wisconsin. Commission approval is needed before expending the vast volume of hours and resources required to comply with a request of this nature. If the Committee is not seeking records related to systems that no longer exist and are no longer in use, it is our belief that the current public records request filed with the Department of Administration will yield all responsive records related to the current WisVote system and related applications.

Question 6: All Logs & Registries. *Please provide all logs and registries (as commonly understood in database and application and internet usage), of ALL types, whether defined herein or not, including, but not limited to, registry logs, access logs, data change logs, login logs and all other logs recording all digital activities occurring within the Statewide System and the Voter Identification Database.*

Answer 6: The state-wide system is housed through the Department of Administration's Division of Enterprise Technology, all related technical logging information must also be requested through DOA, who would determine if there are responsive records. WEC would cooperate with DOA regarding any such request.

Question 7. All Audit History. *Please provide all logs, registries or records of any kind recording all changes to the status of every voter, active and inactive, contained in the 7 million record Voter Identification Database or the Statewide System. Such logs, registries and other records must specifically*

show the time and date a voter is registered in the Voter Identification Database and Statewide System, who registered the person to vote and each and every status change of every voter when turned inactive, reactivated and or turned back inactive.

Answer 7: This request also needs to be elevated to the full Commission for review and consideration. Our reading of this request is that the Legislature seeks data to understand the status of every voter record in the statewide system (both active and inactive) and to understand how/who established or changed voter records and statuses throughout history. This kind of data can be accessed and is provided routinely to parties who request it through Badger Voters. State law and the Commission's administrative code requires the agency to charge for such custom data (Wis. Stat. § 6.36(6), Wis. Admin. Code EL § 3.50). There are no exceptions to this requirement for legislative committees under state law or administrative code.

The request as described would include hundreds of millions of data points and would require coordination and congruent technical applications between the state and the Legislature to facilitate a meaningful and secure transfer. Also, the Wisconsin State Statutes and Administrative Code provisions, including but not limited to Wis. Stat. §§ 6.36(1)(b)1.a., 6.47, Wis. Admin. Code EL § 3.50(8), prohibit the release of personally identifiable information. Both state and federal law protect information such as dates of birth, social security numbers, and driver license and ID card numbers contained in voter records. There are no exceptions to this requirement for legislative committees under state law or administrative code.

Upon approval from the Commission, WEC staff would work with the Committee to provide data that is useful, timely, and compliant under state statutes.

Question 8: External APIs. *Please provide an exact copy of the API code or software that allowed any and all private, for-profit, non-governmental, non-profit, political party or any type of lobbying or advocacy group to directly access WisVote, MyVote or any other part of the Statewide System or the Voter Identification Database at any time during the years of 2020 and 2021. Please also provide logs, registries and any other records of the times and dates any or all of these parties accessed the Statewide System or the Voter Identification Database, or any other data system operated or controlled by the State of Wisconsin in 2020 and 2021.*

Answer 8: There are no private, for-profit, non-governmental, non-profit, political party, or any type of lobbying or advocacy group with direct access to WisVote, MyVote or any database or application related to the statewide database. Only the official government entities and systems described in our answer to question 3 above have any sort of direct or indirect access to the statewide voter registration system or related applications.

Question 9. ERIC Data. *Please provide a list of all voters referred by the Electronic Registration Information Center to WEC or to Wisconsin clerks in 2020 and 2021, including the specific communication, the name of each voter and their address, driver's license number, date of birth and the date referred to WEC or any Wisconsin Clerk.*

Answer 9: ERIC does not make "referrals" to the WEC or clerks. ERIC provides data in various categories as outlined in the ERIC membership agreement. Production of ERIC data reports about voters is expressly prohibited by the ERIC Membership Agreement, paragraph 4. Wisconsin law requires the chief election official to enter into a membership agreement with ERIC. Wis. Stat. §6.36(1)(ae). To maintain its membership with ERIC, the WEC may not violate the terms of the agreement. Additionally, as described above, state law and administrative code provisions do not allow the release of a voter's personally identifiable information, with limited exceptions.

There is some data that WEC can provide in compliance with the ERIC agreement and state statute. At this link (<https://elections.wi.gov/node/7461>) you can find the mailer design that was sent to voters who were flagged as having a different address in their voter record than DMV/USPS in 2021. In 2020 the Commission sent a mailer to voters who are not registered to vote but are eligible according to DMV records, which is also required by the ERIC membership agreement. Information about the most recent mailing is available at this link: <https://elections.wi.gov/node/6940>. The Commission will review and approve any changes to the mailers for 2022 at an upcoming meeting.
