Your email indicated this well was plugged in 1948. I have no record of that. I attached the transfer from Columbia to Chesapeake. Please review. Any additional information we can discuss.

I am still looking at the other wells.

This well appears to have been transferred to Elahs and later transferred to Chesapeake. I see no rejected stamp on the transfer. I am not sure why this is the way it is.

Scott,

Just checking in to see where we are with this. Is the well list final now? Just want to make sure we are working from the correct list.

Also, we have submitted a bunch of paperwork for the Triad Hunter wells. We are transferring them all to Eclipse Resources I, LP and have changed the name of that entity to SWN Production (Ohio), LLC. I assume that means we will need to re-do the consent order such that it is with VIRCO and SWN Production (Ohio), LLC?

> Scott,

My turn to apologize for the delay…… it's been a bit crazy around here lately. Admittedly, I'm a bit confused…….

Understand about leaving the plugged wells and wells returned to production on the list – I'm good with this.

When I look at the signed Consent Order, I see 073-02072 on the original well list – I've highlighted it in the attached.

I have looked for 073-02070 on the original list attached, but I can't find it at all. Can you help me with that?

The well that we want to add is the C.B. Tice 143 with API No. 47-073-00776.

The team contacted me again today and would also like to add the Heck #30 well with API No. 47-085-08022 – this is a VIRCO well. Can we add this one to the list as well?

Thanks Scott!!

Sorry for the delay, but I looked in our system at the Triad Hunter well list. 073-02072 is not on the original list. Is this the one to add? Also both 073-02071 and 02070 are on the original list.

Leave the plugged or wells returned to production on the list so we can track your progress and successes.

Scott,

You seem to be missing API 47-073-02072, the Hughes 7 well.

Previously the Spindletop Farms #28-2071 had API 47-073-02071, but in this version of the well list you have API 47-073-02070. I'm thinking maybe that's a typo.

Also, question, do you want to remove the wells that we put back into production or plugged in 2019 and 2020 that are still on your list? Or just leave them on here since they were originally on here? If you want to remove them, I can send you the list – just let me know.

My files pull “Well type” data from the DEP well search and just looking at the first few wells listed in this email the well types show “Not Available” (See screenshot below). Without the well type I’m not able to determine if these should be filed annually or quarterly. If you can help me by providing the well type information, I can have these wells filed by early next week.

Sandra,

I got an email from WV DEP that they received 2020 production except for the wells listed below. He then found a filter on his spreadsheet and sent this list below over. Can you look into why we didn't report these wells? I'm guessing it's just an issue with knowing what wells we even got from Montage. Please let me know what you find so that I can get back to Scott and Jason. Thanks!!

Subject: [External] Triad Hunter to Eclipse

Brittany,

The bond rider for Eclipse was approved and I entered all the transfers with the exception of 5 that are in Permit Issued status. The APIs and information needed to process these is listed below.

47-085-10150, 47-085-01051, and 47-085-10152 – H6A permits issued 11/25/2014

47-095-02485 – H6A deep well permit issued 11/16/2018

47-095-02549 – H6A deep well permit issued 5/15/2019

No WR-34s or WR-35s have been submitted. – was any work done on any of these wells? (site construction, any drilling, etc.?) If yes, will need the WR-34s, WR-35s and reclamation releases. If no work was done I will need to have the county inspector cancel the permits as they are expired.

Additionally there are two other wells in Permit Issued status for which OP-77s were not received.

47-095-02496 – H6A permit issued 10/19/2018

47-095-02634 – H6A permit issued 9/27/2019

The 47-095-02496 will need the same information as the wells above, and an OP-77 if the wells were drilled.

Well 47-095-02634 will either need the same as the rest or a H6A permit transfer application to transfer the permit as it is still valid until 9/26/2021.

If you have any questions please let me know.

Thank you,

Melanie S. Hankins

1 message

Rodeheaver, J Scott <j.scott.rodeheaver@wv.gov> Tue, Jan 25, 2022 at 7:54 AM
To: Beau Fry <dfry@eqt.com>

The land owner needs to write a letter to EQT or the Office of Oil and Gas requesting the pad be left unreclaimed or however he wants it--partially reclaimed or whatever. If they are not willing to do that, it needs to be fully reclaimed.

In regards to leaving one for a water well. That we cannot do. That would be like leaving a permitted oil and gas well to be a water well.

I would like to get the consent order signed and finalized this week. Is that an issue?

Scott,

We have a buyer for our conventional wells that are registered in the name of VIRCO and SWN Production (Ohio), LLC – or maybe these ones are still in Eclipse and have not yet been transferred to SWN. Would like to set up a call with you early this week so that we can understand what needs to be done to get the wells transferred. Please let me know when you may have some availability. Thanks!!

Consent order

1 message

Rodeheaver, J Scott <j.scott.rodeheaver@wv.gov> Wed, Sep 29, 2021 at 9:29 AM
To: Beau Fry <dfry@eqt.com>
Cc: James A Martin <james.a.martin@wv.gov>, Henry J Harmon <henry.j.harmon@wv.gov>

I have whittled down the multicolored list that EQT provided to 35. I removed the Ross and Wharton well that they claim. I still would like an email and/or letter to document in our system. The 47-103-01235 and the 47-097-00185 well still need to be resolved. I left both of them on the consent order list attached.

THe 4 OXF43 wells show that EQT says TIL'd last DEV run. My oil and gas days lead me to think TIL means turned in line. No production recorded yet. These are on the list. If EQT confirms they are producing, those 4 can be removed.

Others are said to be plugged or are being plugged, but I do not have WR-38s These include: 47-017-02045; 47-033-01636; 47-033-01674; 47-095-00003; 47-103-00671; 47-103-00812; 47-103-02525; 47-103-02534; Send WR-38s for all the ones plugged and they can be removed.

47-103-02537 and 103-02795 are said to be in production. Confirm that and these can be removed.

So as many as 14 have been or will be dealt with by the end of 2021. That takes the number to 21.

I am proposing three years to complete the consent order starting in 2022. So now that is 12, 12 and 11 and could realistically be 7, 7 and 7 with one or two of the wells in red (from the EQT provided list) found not to be EQT's responsibility.

In light of approximately 40 wells per year dealt with previously, OOG thinks this is a fair offer. We appreciate EQT's willingness and actions to address abandoned wells.

I will draft a version of the consent order and send it once it is ready. Please review the well list for finalization. I am in the field most of tomorrow and am taking Friday off. I will be back in the office Monday and monitoring emails.

Thank you again. Have a good day.

consent order well list

1 message

Rodeheaver, J Scott <j.scott.rodeheaver@wv.gov> Fri, Dec 17, 2021 at 1:22 PM
To: Beau Fry <dfry@eqt.com>

The 42 wells were derived from the list of 41 Marcellus wells supplied by EQT (attached) plus a possible additional well, API number 47-103-01235 that was still being researched to determine whether it belongs to EQT or someone else.

I was overruled on the company selected wells since this order represents the entire set of EQT abandoned wells. I corrected the spelling of violations and added the "any subsequent calendar year" to point 7, replacing "the following" under Order for Compliance.

This is the final offer ready to execute.

EQT WV COA Discussion

1 message

Fry, Doug <DFry@eqt.com> Tue, Jul 27, 2021 at 8:36 AM
To: "Martin, James A" <james.a.martin@wv.gov>, "Rodeheaver, J. Scott" <j.scott.rodeheaver@wv.gov>, "Conklin, Douglas" <DConklin@eqt.com>, "Toplovich, Mark" <Mark.Toplovich@eqt.com>, "Cindric, Eric" <Eric.Cindric@eqt.com>, "Klaner, Todd" <TKlaner@eqt.com>

Marty and Scott, thanks for taking the time to meet with the EQT Team to discuss the current status of the WV COA and moving forward with discussions of a new Plugging COA

after transferring almost all conventional wells to DGO on the list.

This invite is a place holder to be followed up with a Webex meeting invite with the EQT 2021 non-producing list.

Thank you.

Cc: "Cindric, Eric" <Eric.Cindric@eqt.com>, "Toplovich, Mark" <Mark.Toplovich@eqt.com>

Hello Scott, would it be possible to have a face to face meeting at the DEP's office to discuss the WV COA? There would only be 2 or 3 of us attending in person. We would like to try to meet the first week of November if possible.

Thank you Scott.

Expired Permits

1 message

John W. Brand <jbrand@rangeresources.com> Mon, Oct 11, 2021 at 1:59 PM
To: "depoogep@wv.gov" <depoogep@wv.gov>

Hello,

Would you please look into the status of these wells?

47-095-02272

47-095-02384

47-103-03108

47-103-03121

47-103-03136

47-103-03137

They are still listed as having active permits but I believe the permits may have expired.

Thank you,

John Brand

Good morning, Mr. Rodeheaver. The bonds that you note below – Bond #019075980 for EQT CHAP LLC and Bond #019039479 for EQT Production Company – are continuous until released. I am attaching a copy of the verification certificates for each of these bonds from Liberty Mutual (our surety company). I will send you the originals as well, but if you have any questions or need anything additional in the meantime, please do not hesitate to contact me directly. Have a good afternoon.

Best regards,

Jill

Hi guys, when I try downloading the 2020 Q4 Production Data For Horizontal H6A Wells from your page here:

https://dep.wv.gov/oil-and-gas/databaseinfo/Pages/default.aspx

I get the 2018 Q4 Results

My guess is that this link is pointing to the wrong .zip file.

Any way you could fix this?

Thanks

-Cassidy

Beau,

Here is the modified document from legal that will need sent back over to the DEP for review and approval (modifications are in red). I am attaching the well list that was sent back to us (approved) from the DEP highlighting the (42) wells to be targeted over the next (5) years. Please let me know if there are any immediate questions / comments / concerns regarding this matter. Thanks in advance.

.::This email is from an external source. Please use caution when clicking links or opening attachments::.

I took a quick look at all the plugged or producing wells from the list sent yesterday (all the ones that are green.) We need production or WR-38s for most.

Do you have a call in number? We have just transitioned to Google and the whole meeting thing eludes me as to how it works by and large.

There is a Google number and pin, but I did not know if that was correct.

Good morning Scott,

Mr. Mastellar, the landowner of the Masetllar Coal wells (47-057-00016 & 47-057-00022) had let someone from Chesapeake's land staff that they may be looking to sell gas from this well, or potentially sell the well itself, and may be reaching out to the Department.

I am not sure of exactly what the intentions are but thought I would give you a heads up.

Let me know if you have any questions if he does reach out to you.

Thank you,

Eric

Subject: [EXTERNAL] Re: Pipeline

The short answer is no. The Office of Oil and Gas only has oversight of gathering lines from a well to a first point of sale. The Division of Water and Waste has oversight of other gas lines and the Public Service Commission has oversight of high volume transmission lines.

Scott,

Thanks for the time this morning – certainly appreciate both you and Marty sitting down for a quick conversation. I think I've identified a few ways that we can reduce he number of days that we were out of compliance on that pad. I've got time Monday afternoon, Tuesday morning and Wednesday morning if you guys have time in any of those slots. I will also put my thoughts in an email as soon as I get a chance so that you can start thinking through what I am proposing.

Just let me know when you guys are available and I will get it on the calendar.

Thanks again!!

WR-38 for 47-051-01725. What confuses me is it doesn't show the plugs above 5300--the third cement plug, but it indicates a surface monument. It shows as an abandoned well in our system, but it may be plugged. There is one other one or possibly two like that.

All,

Thank you again for the time today – we all appreciate it immensely. I believe that all from Pin Oak that were on the call and from the DEP that were on the call are on this email.

Have a great afternoon!

Carla L. Suszkowski, P.E.

J A & M wells

1 message

Rodeheaver, J Scott <j.scott.rodeheaver@wv.gov> Tue, Sep 7, 2021 at 12:39 PM
To: Beau Fry <dfry@eqt.com>

Attached is a list of 23 wells that are owned by J A & M in our database. Back in July I spoke with Billy Arnold who previously worked for the owner, Martin Lydle. Mr. Lydle passed away a couple of years ago. I was told that Mr. Lydle sold these wells to Trnas Energy before he passed. Apparently Trans Energy sold them to EQT who in turn sold them to Diversified.

I have asked Diversified earlier today if they have any information on these wells. I would like to know if EQT does as well.

Thank you for your assistance.

phone call I received

1 message

Rodeheaver, J Scott <j.scott.rodeheaver@wv.gov> Fri, Oct 22, 2021 at 2:02 PM
To: Carla Suszkowski <Carla_Suszkowski@swn.com>

I hope you are doing well.

I got a call from Meg Werner, 407-739-8650, email cbg4musicmeggie@yahoo.com. She is the power of attorney for Thomas Michael Cordell, who is the grandson and only heir to Alphonzo Stanley.

During a long conversation I managed to gather that Southwestern Energy Company had contacted the heir and informed him that if he completed the paperwork (recording it in the Kanawha County, West Virginia courthouse) he was entitled to royalties from a 250 acre tract. She kept mentioning Point Lick Run (a tributary of Campbell's Creek near Charleston). I told her SWN and two companies they purchased do not have any wells in Kanawha County. I asked about the forms and she said they did not ask for bank accounts or things that would immediately scream scam. The PO box address matches what we have in our system. I gave her the SWN phone number in our database to call.

She says he (the heir) was contacted a month ago from someone named Bob. The documents were supposed to be faxed to 832-796-4757 or mailed to Division Orders PO Box 12359 Springs TX 77391-2359.

If you could pass this on to whoever might know if this is an ongoing issue, I would appreciate it.

I thought the well list was solid. One of the wells shows up under another operator. I will have to dig into it more. Right now I have to get some other things done.

Scott,

When I reviewed the Consent Order, I found 2 typos in it.

1. On page 1, the LLC was left off the company name.
2. On the last page, item 6, the word “and” was left out.

I’ve attached a marked up version for your review. If you are good with this, I will accept those 2 changes, sign and print this and send it back with the check – which has already been cut here.

Do I need to send 2 originals to your office?

Just let me know your thoughts. Thanks Scott!!

I was overruled on the company selected wells since this order represents the entire set of EQT abandoned wells. I corrected the spelling of violations and added the "any subsequent calendar year" to point 7, replacing "the following" under Order for Compliance.

This is the final offer ready to execute.

Hi Beau,

There has been a lot of back and forth about reclamation timeframes for plugging permits, and maybe we can advance this toward a solution.

Perhaps I'm not understanding the nuances here that may affect the final answer, but pad final reclamation timeframes are fixed at 5 years post pad construction date. That should answer all the questions.

That said, I would be happy to dive into this further (nuances and all), but we need pad construction completion dates for each pad in question to give you a definitive answer.

Thank you,

Jason

Carla Suszkowski <Carla_Suszkowski@swn.com> Fri, Oct 22, 2021 at 2:10 PM
To: "Rodeheaver, J Scott" <j.scott.rodeheaver@wv.gov>

Thanks Scott!! I will pass it on to our Land department. Hope all is well with you!!

On another note, I was just looking at the spreadsheets you sent for the plugging order. I need to get back in there and see what is going on. I 'm confused by the well count jumping that much. I know in 2019 Triad took care of 37 wells associated with the consent order and in 2020 they took care of the required 30. So I'm not sure what is going on. I'm also confused by the fact that 18 of the additional abandoned wells are horizontal. I need to dig into that a bit. I'm wondering if some of those wells are actually supposed to have a Beneficial Future Use filed…….. stay tuned……

I believe all of them have been acquired my SWN accept the last one on the attachment. Not sure about that one.

After they are transferred to Triad, we will need to transfer them to SWN Production (Ohio), LLC. Please advise on how you would like us to move forward.

Subject: [External] Postrock Eastern Production Wells

Brittany,

While cleaning an unused office I came across 6 OP-77s from 2012 that appear to have never been processed. These are for wells being transferred from Postrock Eastern Production, LLC to Triad Hunter, LLC. I've attached copies of the OP-77s. Can you advise if these were acquired by SWN Production (Ohio), LLC? If so, I will get these processed asap. If you have any questions please let me know.

Thank you,

Melanie S. Hankins

Scott,

Just checking in to see where we are with this. Is the well list final now? Just want to make sure we are working from the correct list.

Also, we have submitted a bunch of paperwork for the Triad Hunter wells. We are transferring them all to Eclipse Resources I, LP and have changed the name of that entity to SWN Production (Ohio), LLC. I assume that means we will need to re-do the consent order such that it is with VIRCO and SWN Production (Ohio), LLC?

Scott,

My turn to apologize for the delay…… it's been a bit crazy around here lately. Admittedly, I'm a bit confused…….

Understand about leaving the plugged wells and wells returned to production on the list – I'm good with this.

When I look at the signed Consent Order, I see 073-02072 on the original well list – I've highlighted it in the attached.

I have looked for 073-02070 on the original list attached, but I can't find it at all. Can you help me with that?

The well that we want to add is the C.B. Tice 143 with API No. 47-073-00776.

The team contacted me again today and would also like to add the Heck #30 well with API No. 47-085-08022 – this is a VIRCO well. Can we add this one to the list as well?

Thanks Scott!!

Sorry for the delay, but I looked in our system at the Triad Hunter well list. 073-02072 is not on the original list. Is this the one to add? Also both 073-02071 and 02070 are on the original list.

Leave the plugged or wells returned to production on the list so we can track your progress and successes.

Scott,

You seem to be missing API 47-073-02072, the Hughes 7 well.

Previously the Spindletop Farms #28-2071 had API 47-073-02071, but in this version of the well list you have API 47-073-02070. I'm thinking maybe that's a typo.

Also, question, do you want to remove the wells that we put back into production or plugged in 2019 and 2020 that are still on your list? Or just leave them on here since they were originally on here? If you want to remove them, I can send you the list – just let me know.

Subject: [External] Re: Call on the Plug or Produce Consent Order

We can have a phone meeting if you would prefer. The bottom line is the company acquiring the wells needs to have a consent order in place to plug or return to production all wells classified as abandoned. I had updated the well list that was sent a few weeks back. Review that list to be sure it includes all the abandoned wells being sold. In addition the Triad Hunter and VIRCO wells will need to be transferred to the new SWN Production (Ohio) company assuming that entity is the transferor of the wells in question. Melanie is the best to answer those kinds of questions relating to the specific details involved in the process.

Melanie Hankins, cced on this email, works with/processes transfers. She typically does not work Mondays. I am open Tuesday and Wednesday as of right now. Melanie will get back with her schedule, probably tomorrow morning.

Have a good day.

All,

I am attaching two documents for tomorrow. Here are the descriptions:

- WV COA 2022 – DEP List Updated: This was the list given to us by the DEP that was composed of wells that they wanted us to scrub through to see if we needed to add to the COA we originally proposed. We ended up adding (3) wells from this list to our COA.
- WV COA – Plugging 2022 P&C Final: This is the final list EQT is proposing for the COA. The list consists of (42) wells that will require plugging.

Please let me know if there are any immediate questions or concerns. Thanks in advance.

It could be this week. Get the well lsit finalized and the number of wells to abate each year and I think we can make it happen this week or next.

The one well, Braxton 2168, that is on your list is a Ross and Wharton well. I can make that one go away if someone from EQT sends me an email that this was never an EQT well.

Thank you there will be 6 conductors total and if they were Trans Energy conductors does that change the timelines? Thank you.

On Jan 14, 2022, at 1:03 PM, Brewer, Charles T <Charles.T.Brewer@wv.gov> wrote:

Hey Beau,

Scott mentioned you had four conductors that you intend to plug sometime soon, and that you then were wondering about reclamation timeframes. Were these wells permitted as H6A permits? I am assuming these were Chevron or Stone Energy wells? If so, the reclamation keys off of pad construction completion dates. In short, you are required to reclaim the location 5 years post pad construction completion date.

As long as these were permitted as H6A wells, the timeframes will be the same.

We can meet in person, but I am thinking we have basically two potential issues and could save a lot of time with a phone discussion.

The first issue would be looking at the well list that I sent and determining if the wells in question needed to be on that list. If memory serves, the list will be between 33 and 21. Once that is done, the number of wells per year is the other issue. We are looking at three years starting in 2022. The final number ranges from 7 to 11 wells per year. That is the best offer. Three wells per year will not work for us.

Let me know. Have a good day.

.

Marty has hearings and meetings next Thursday, but has a window from 9 to 9:30. If we can work out any issues before then, let's do that.

Our database shows 1088 wells active and 27 abandoned. I looked at one of the abandoned and it had 0s reported for 2020. As far as I know there are no problems.

I have a well question. There are two wells in Wood county—API numbers 783 and 786. One or both of these wells are tied into your system—see picture. In our records they are owned by what appears to be a defunct company, Santa Fe #1, Limited. One or both of these well has issues that requires the owner to address and I have not been able to track them down. Could you refer to the appropriate person in your company that could provide me with the person or company contact information paid for the gas on one or both of these? Thank you.

The short answer is no. The Office of Oil and Gas only has oversight of gathering lines from a well to a first point of sale. The Division of Water and Waste has oversight of other gas lines and the Public Service Commission has oversight of high volume transmission lines.

Good morning Scott,

Mr. Mastellar, the landowner of the Masetllar Coal wells (47-057-00016 & 47-057-00022) had let someone from Chesapeake's land staff that they may be looking to sell gas from this well, or potentially sell the well itself, and may be reaching out to the Department.

I am not sure of exactly what the intentions are but thought I would give you a heads up.

Let me know if you have any questions if he does reach out to you.

Thank you,

Eric

All:

Attached are the well lists for VIRCO, Eclipse, and pending transfers to Eclipse (from Triad). The pending transfers will be approved 12/21/21. Once these are approved all wells under Eclipse will be transferred to SWN Production (Ohio).

For the transfers to Pin Oak, please submit OP-77s for VIRCO to Pin Oak, and SWN Production (Ohio) to Pin Oak. These can be mailed to my attention at the address below.

The bond for Pin Oak arrived from the Attorney General today and has been approved. Pin Oak's operator ID number is 494527626.

Also, here is a link to our contacts, both office staff and inspectors: WVDEP Office of Oil and Gas Contact List.

If you have any questions or need anything else please let me know.

.::This email is from an external source. Please use caution when clicking links or opening attachments::.

Doug Newlon went out there today to see what API numbers were on the wells. He just called with the info. There are 9 wells and 4 cellars on that pad. The well API numbers, all Tyler County: 2507, 2508, 2510, 2511--these address 4 of the 7 pairs of wells from the list I sent earlier today.

Other producing wells without a probable two API # scenario: 2278, 2279, 2280, 2281 and 2316.

There are four cellars: one between well 2508 and 2510; two cellars beyond well 2511--am guessing these could be 2512 and 2513. We have a WR-35 for 2512 (WEU 4 H 14 and 516600)in our well file. I did not retain the location of the fourth cellar.

There are a number of issues to get resolved with the wells on this pad.

I took a quick look at all the plugged or producing wells from the list sent yesterday (all the ones that are green.) We need production or WR-38s for most.

Hello Scott, just wondering if you have a timeline in mind we might be able to wrap up the COA?

Thank you sir.

Cc: Beau Fry <dfry@eqt.com>, Henry J Harmon <henry.j.harmon@wv.gov>

Hey Beau,

Scott mentioned you had four conductors that you intend to plug sometime soon, and that you then were wondering about reclamation timeframes. Were these wells permitted as H6A permits? I am assuming these were Chevron or Stone Energy wells? If so, the reclamation keys off of pad construction completion dates. In short, you are required to reclaim the location 5 years post pad construction completion date.

We can meet in person, but I am thinking we have basically two potential issues and could save a lot of time with a phone discussion.

The first issue would be looking at the well list that I sent and determining if the wells in question needed to be on that list. If memory serves, the list will be between 33 and 21. Once that is done, the number of wells per year is the other issue. We are looking at three years starting in 2022. The final number ranges from 7 to 11 wells per year. That is the best offer. Three wells per year will not work for us.

Let me know. Have a good day.
.

To: Mallory Stanton <mstanton@anteroresources.com>
Subject: got a call about taxes

This email came from outside of Antero. Do not click any link or open any attachment unless you know it is not malicious. Forward it to the helpdesk if you are not sure.

Connie Gatrell called me. The tax Dept in RItchie County (WV) told her I could solve her tax issues. Apparently her property is in Tyler County: 47-095-02517, 2518, 2519 and 2531 is now being said to be on the Ritchie County line, so they want their cut. She says that is not the case. She lives in Ohio. Her telephone number is 419-348-3128. Could someone reach out to her or let me know who the appropriate person would be and I can let her know who to call? Thank you.

Subject: GO-WV 2022 Winter Meeting - Reclamation Awards

Hello Marty,

I hope you had a happy Thanksgiving. Still eating turkey over here.

The Winter Meeting is scheduled for January 19-20, 2022 at the Charleston Marriott Town Center. Can you email me the reclamation award winners so we can order the plaques. Also, I am hoping you will be available at Noon on Thursday to help present the awards. Also, you and your staff are all invited to attend both days of the meeting. As in the past, if you could email me a list of your staff who are planning to attend, I will add them to the registration list and prepare their name tags.

Thank you for your help!

Subject: J A & M wells

Attached is a list of 23 wells that are owned by J A & M in our database. Back in July I spoke with Billy Arnold who previously worked for the owner, Martin Lydle. Mr. Lydle passed away a couple of years ago. I was told that Mr. Lydle sold these wells to Trnas Energy before he passed. Apparently Trans Energy sold them to EQT who in turn sold them to Diversified.

I have asked Diversified earlier today if they have any information on these wells. I would like to know if EQT does as well.

Thank you for your assistance.

Hello Scott,

Just following up on anything we need to do on our end to move the COA agreement forward and getting it finalized sir?

Thank you.

Subject: WEU 4 well pad

See attachments, one is an Excel well list, one is a snip. There appears to be duplicate API numbers issued to EQT well name and well numbers. I need to look further. For instance EQT says WEU4 10H and well number 516537 are the same well under API 95-02508. We have WEU4 10H as the 095-02508 and the 516537 as the 095-02317.

That's "Not Available". Previous versions of our database didn't allow for entry of well types, so the NAVL is a placeholder. Hope this helps.

CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

All:

Attached are the well lists for VIRCO, Eclipse, and pending transfers to Eclipse (from Triad). The pending transfers will be approved 12/21/21. Once these are approved all wells under Eclipse will be transferred to SWN Production (Ohio).

For the transfers to Pin Oak, please submit OP-77s for VIRCO to Pin Oak, and SWN Production (Ohio) to Pin Oak. These can be mailed to my attention at the address below.

The bond for Pin Oak arrived from the Attorney General today and has been approved. Pin Oak's operator ID number is 494527626.

Also, here is a link to our contacts, both office staff and inspectors: WVDEP Office of Oil and Gas Contact List.

If you have any questions or need anything else please let me know.

Yes, lets move forward with the five years. I will finalize the consent order and send to you. Marty wants a detailed analysis of the wells--the top hole or conductor wells. I will work on that and share my findings. I will try to get that done this week. I am taking Friday off. I have use or lose and it will be good weather.

Reinbeau Consent Order - Second Discussion

1 message

Carla Suszkowski <Carla_Suszkowski@swn.com> Thu, Mar 10, 2022 at 2:29 PM
To: "Rodeheaver, J Scott" <j.scott.rodeheaver@wv.gov>

Scott,

Thanks for the time this morning – certainly appreciate both you and Marty sitting down for a quick conversation. I think I've identified a few ways that we can reduce he number of days that we were out of compliance on that pad. I've got time Monday afternoon, Tuesday morning and Wednesday morning if you guys have time in any of those slots. I will also put my thoughts in an email as soon as I get a chance so that you can start thinking through what I am proposing.

Just let me know when you guys are available and I will get it on the calendar.

Thanks again!!

Rodeheaver, J Scott <j.scott.rodeheaver@wv.gov>

the WEU 4 pad

1 message

Rodeheaver, J Scott <j.scott.rodeheaver@wv.gov> Wed, Sep 1, 2021 at 12:35 PM
To: Beau Fry <dfry@eqt.com>, "Newlon, Douglas C" <douglas.c.newlon@wv.gov>, James A Martin <james.a.martin@wv.gov>, Henry J Harmon <henry.j.harmon@wv.gov>, "Haught, Derek M" <derek.m.haught@wv.gov>

Doug Newlon went out there today to see what API numbers were on the wells. He just called with the info. There are 9 wells and 4 cellars on that pad. The well API numbers, all Tyler County: 2507, 2508, 2510, 2511--these address 4 of the 7 pairs of wells from the list I sent earlier today.

Other producing wells without a probable two API # scenario: 2278, 2279, 2280, 2281 and 2316.

There are four cellars: one between well 2508 and 2510; two cellars beyond well 2511--am guessing these could be 2512 and 2513. We have a WR-35 for 2512 (WEU 4 H 14 and 516600)in our well file. I did not retain the location of the fourth cellar.

There are a number of issues to get resolved with the wells on this pad.

well list for consent order

1 message

Rodeheaver, J Scott <j.scott.rodeheaver@wv.gov> Thu, Sep 23, 2021 at 12:33 PM
To: Carla Suszkowski <Carla_Suszkowski@swn.com>
Cc: Henry J Harmon <henry.j.harmon@wv.gov>, Melanie S Hankins <melanie.s.hankins@wv.gov>, James A Martin <james.a.martin@wv.gov>

I took the list from our meeting that basically was the Triad Hunter LLC list form the Triad Hunter/ VIRCO 2019 consent order. That list has 211 plus adding one or possibly two wells to it.

I then discovered that all the Triad Hunter wells have been moved to Eclipse Resources I, LP company name. They have 271 abandoned wells including the 085-08022 Heck #30 (I could not find the Tie 143 listed using the same API as the Heck # 30). Eighteen of the additional abandoned wells are horizontal. I am not sure where the other additional wells came from unless the are newly abandoned wells based on 2020 production. I have attached that list to this email.

I checked VIRCO but they are still under VIRCO and not Eclipse Resources I, LP name. There are 11 wells that are still classified as abandoned. That list is attached.

I researched the Triad Hunter/VIRCO 2019 consent order and found 336 wells combined and 30 wells per year to plug or return to production--the last year on the order had the six extra wells.

What I am thinking of is a new order that combines the 271 plus the 111 VIRCO wells to make a list of 382 wells--addressing 50 wells per year and starting that in calendar year 2022. The eighth year would only have 32 wells to address.

well list questions

1 message

Rodeheaver, J Scott <j.scott.rodeheaver@wv.gov> Wed, Dec 1, 2021 at 4:18 PM
To: Beau Fry <dfry@eqt.com>
Cc: James A Martin <james.a.martin@wv.gov>

The ones color coded green in the surface comments column I looked to see what information we found. Please confirm those findings or add to them to see if they were conductor only.

The eight color coded blue were blank in the well Identifier column. Please verify if these were drilled to total depth (TD), basically the Marcellus.

Thank you.

well list

1 message

Rodeheaver, J Scott <j.scott.rodeheaver@wv.gov> Wed, Jul 21, 2021 at 3:50 PM
To: Carla_Suszkowski@swn.com

I meant to get back sooner, but I may need a refresher on the situation. You do not need to add wells not on the list to plug them.

I think there is still one that is being researched. It has gotten reburied on my desk and in spite of my best efforts, I cannot seem to get it unearthed and examined.

If a phone discussion would be helpful, let me know and I will do my best to get prepared and be able to answer questions.

See attachments, one is an Excel well list, one is a snip. There appears to be duplicate API numbers issued to EQT well name and well numbers. I need to look further. For instance EQT says WEU4 10H and well number 516537 are the same well under API 95-02508. We have WEU4 10H as the 095-02508 and the 516537 as the 095-02317.

EQT Longworth Well Pressure Test and Stimulation

1 message

Mukhalu, Alvin <Alvin.Mukhalu@eqt.com> Thu, Jun 9, 2022 at 9:03 AM
To: "strader.c.gower@wv.gov" <strader.c.gower@wv.gov>

Good morning Strader,

I hope all is well today. Following up on my voicemail earlier today, I am emailing to pass on some information about our intention to pressure test and stimulate the wells on the Longworth pad in Marshall county. I initially submitted these to Barry Stollings' email (using the https://apps.dep.wv.gov/oog/contact_new.cfm contact information page) but after contacting Gayne Knitowski, it looks like Barry has since retired. I have attached this information below as well as the contact information for the onsite representative and my contact information as well. Please let me know if you have any questions and suggestions at this time and we'll be happy to discuss further.

Ops Dept: Completions

Notification Type: Pressure Test, Toe Sub Activation and Stimulation Notification

Pad: Longworth A

Well – 5H

API #: 4705101914

Operations scheduled to commence: 6/10/2022 @ 18:00

Contact name: Gregory Bailey

Please find the attached draft matrix. I went through the soil results and they were below chloride soil levels on April 8, 2022. I used that as the number of days instead of April 28. I think with the rate changes I was very fair. Please review and let me know your thoughts.

Scott,

Under II B. Negligence I would add,
Pad drain did not closed correctly and the brine water leaked continued for an extended amount of time.
Something to that effect Ithink shows negligence for not verifying the drain valve was shut in

Also typo on the API should be 09

Everything else looks good and I think you were very fair.

Mr. Martin, thank you for speaking with me today concerning the plugging of a well on our property in Terra Alta Preston County.
Per our conversation I have attached our comments concerning the plugging of well 7398.

I will be sending this document as well as photos. I will send them to the address provided in the documents from TC Energy/Columbia Gas Transmission.

Gentlemen, I believe Gayne and has been in the email thread for the ongoing conversation with TC Energy for the well in front of our home and the inability of TC Energy to identify the issue with gas loss downhole.

We would like to know if the state of WV has a timeline for this type of work. Is it 12 months? And after that time can TC Energy be forced to plug the well?

Joann

Charles Jamison MSH 810 - Production Casing Cement Details:

Fill cement lines and pressure test 1,000 psi low - 7000 psi high, all tests held for 5 min.. Pump 150 bbls MPE @ 14.0 ppg 0.900 lb/bbl B389 + 1.0 gal/bbl B553 + 0.1 gal/bbl D047 + 314.658 lb/bbl D031 , Drop bottom plug. Mix and pump tail cement 4624 sks 1,065 bbls Class "A" 100 BWOB D901 cement slurry @ 15.0 ppg 1.29 yld 6.00 gal/sk 0.40% BWOB D255 + 0.02 BWOB D047 + 0.04% BWOB D208 + 0.71% BWOB D800. Drop top plug, Displace with 604 bbls fresh water (20 bbls sugar water to start 50 lbs/per 10 bbls) w/0.02 gal/bbl L064 + 0.08 gal/bbl M300 + 5 gal/bbl TP110. Bumped plug w/3,850 psi (500 psi over) @ 20:03 hrs 06/01/2022, Held pressure for 5 mins, released pressure to check floats, floats held. Bled back 9 bbls to truck. Returned 0 bbls mud flush spacer to surface. Estimated TOC @ 3,730' using mud volume returned from well for calculation. Full returns throughout the whole job, with full rotation, max torque of 32k.

Regards,

SDC 41

Charles Jamison Pad Inspections

3 messages

Gary Kerans <domeaz@me.com> Tue, Apr 26, 2022 at 1:28 PM
To: Gayne.J.Knitowski@wv.gov

Hello, I have noticed your inspection reports regarding the new wells on the Charles Jamison Pad in Marshall Co and the fact that drilling was commenced on the 51-2425 & 2426 wells. On 51-2427 & 2434 the 20" conductor casing was reported on your 2/22/22 inspections. No inspections are listed on the 51-2436 well. Since Southwestern Energy normally drills all wells on a site when equipment is in place I wondered if you could confirm if in fact the drilling process has commenced on all 5 new wells. My wife and I are royalty owners on the new 2434 & 2436 wells and 3 of the producing wells on the pad.

Any information is appreciated and I will continue to monitor your reports as the best way to track progress on the Jamison site.

Thank you,

Gary Kerans

Knitowski, Gayne J <gayne.j.knitowski@wv.gov> Tue, Apr 26, 2022 at 3:27 PM
To: Gary Kerans <domeaz@me.com>

Gary,

All 5 conductors for the five wells were set. The reason why the fifth one was not drilled until a later is because SWN was waiting on the permit to be issued. Hope that answers your question.

Regards,

Gayne Knitowski
[Quoted text hidden]

Gary Kerans <domeaz@me.com> Tue, Apr 26, 2022 at 4:49 PM
To: "Knitowski, Gayne J" <gayne.j.knitowski@wv.gov>

Thank you Gayne for your quick reply. I figured the conductor on the 2436 well was delayed due to the permit. We will await your future inspection reports as the drilling and fracking process continues on the Charles Jamison pad.

Regards

Gary Kerans

Lorrie work began on February 15 2022 and with Monday February 21 2022 being a holiday the project has been ongoing for 8 days. Steve had said he could have the project complete and be out in 7 days. And we were told Steve would be complete and moving offsite yesterday February 24 2022.

There is now a pipe segment removed from the well head arm and lying on the ground.

Please update us on the findings and the future plans as this is worrisome.

Joann

No it does not as we are unaware of what "Phase 2" entails. Please clarify as to what is it and the duration.

Joann & Ralph:

Steve did finish his work yesterday. We'll continue to monitor. The pipe lying on the ground is where they disconnected the well from the pipeline. For clarification, the matting and safety fencing will remain until phase 2 of the work is completed. I hope this answers your questions, but if not, please let me know.

I'll have more information coming once the team has reviewed the findings from Phase 1.

Thanks,

Ralph & Joann:

In a previous email (dated Jan. 12th) we outlined Phase 1 and 2 as follows:

PHASE 1 - Investigate and Diagnose
>
> Concise Scope of Work
> 1. Disconnect pipeline from wellhead.
> 2. Prepare access road and well site to accommodate scope of work.
> 3. Obtain wireline logs and install mechanical bridge plug.
> 4. Manipulate and monitor well pressures for diagnostic purposes.
>
> Estimated Start/Duration
> . Work to begin mid-February when 45-day landowner
> notification period expires.
> . It is estimated Phase 1 will take 2-4 weeks.
>
> PHASE 2 - Mitigate/Repair/Resolve
>
> Concise Scope of Work

> 1. Scope of work TBD, based on results in Phase 1.
>
> Estimated Start/Duration
> . Start date TBD based on scope of work, clearances, permits,
> material, resources, etc.
> . Duration TBD based on scope of work.

Phase 1 is complete and I'm waiting to learn when Phase 2 will begin.

Lorrie is there any more information as to when the project will be complete at SW7417 and the mats-fence-and silt socks removed?

If it will be more than 14 days I need the mats between the entrance gate and spring gates moved. I need to mow that area and cannot with the mats in place because they will cause damage to my equipment.

Ralph & Joann:

We are unable to move off location due to phased diagnostic plan requiring to test multiple zones of the well for integrity. This length of diagnostic period at each zone will depend on well condition, waiting on a distinctive pressure trend result. We will again have to monitor the well every other day for a period of ~2 weeks, maybe more, from the new depth of the bridge plug. We may have a result right away or may have to go deeper in the well to diagnose the other potential leak zones.

After 3 months still no diagnostics? Will the rig be back to move or lower the plug? This plans seems rather loose.

Any plans on perhaps plugging if this diagnostic phase goes into a period 6 months or a year and TC Energy cannot resolve the issue of the well losing pressure? A well that has an operating pressure of 3500 PSI and has issues is more than concerning.

Ralph & Joann:

Here's an update from the team:

- To date we verified surface equipment integrity, diagnosed and ruled out a shallow casing leak and a shallow charged pressure zone leak path. As part of the maintenance investigation we need to continue diagnosing casing string components and other potential leak paths deeper in the wellbore.
- At this time there is nothing that recommends the abandonment of the well.
- We will continue to keep you aware of our activities and respond as necessary to your concerns. The bottom line is that the well is isolated and controlled and does not present a safety or environmental risk to anyone.

In addition, we did get the gas sample results back recently. We'll be coming back soon to reset the bridge plug deeper in the well to continue with the investigation.

Surely this cannot be an indefinite process. It is stressful to have this ongoing.

I need to cut these fields for hay in the next 2 weeks.

Lorrie is there a reason we had no notice that they were showing up today with a rig?

Hey Gayne-

Disregard the documents I sent you last week and please sign the attached. We are wanting to extend the laterals.

Thanks!

Brittany Woody

Attached are the signed mods. Did the SSP plan change with the lateral length? It usually has to change in there also.

Hey There-

Attached for your signature is a modification for the above mentioned well. The team would like to extend the lateral again. Please let me know if you have any questions.

Thanks!

EQT Longworth Well Pressure Test and Stimulation

1 message

Mukhalu, Alvin <Alvin.Mukhalu@eqt.com> Thu, Jun 9, 2022 at 9:03 AM
To: "strader.c.gower@wv.gov" <strader.c.gower@wv.gov>

Good morning Strader,

I hope all is well today. Following up on my voicemail earlier today, I am emailing to pass on some information about our intention to pressure test and stimulate the wells on the Longworth pad in Marshall county. I initially submitted these to Barry Stollings' email (using the https://apps.dep.wv.gov/oog/contact_new.cfm contact information page) but after contacting Gayne Knitowski, it looks like Barry has since retired. I have attached this information below as well as the contact information for the onsite representative and my contact information as well. Please let me know if you have any questions and suggestions at this time and we'll be happy to discuss further.

Ops Dept: Completions

nearby which are downhill from the release area, the caller was only able to confirm the potential for contamination. **Exact Location:** 375 Realtree Road, Valley Grove, WV. **Spill - Additional Information:** The specified address is the caller's residence and is a reference point for the spill rather than its actual location, which is either before or past it on the roadside. Additionally, while this could not be confirmed as related to oil and gas production, the caller stated there was a wellpad nearby. **Material Spilled:** Unspecified Black/Brown Sludge **Quantity Spilled:** Unknown **Is Material Hazardous or Toxic:** Unknown **Has spill caused Fishkill:** No **Stream Affected:** Little Wheeling Creek (Unconfirmed)		douglas.c.newlon@wv.gov

Gayne I sent notification that we do not want any herbicides sprayed on our property. What is the stance of the DEP concerning our rights for no herbicides?
Is there someone I can call - Travis Hayes?

TC Energy is notifying us of three locations including the well that is being plugged SW 7398, the well 7417 that still has mats over a 40FT X 150FT area and no resolution to the gas loss issue in the near future.
And SW 7380 which is a part of our pasture.

I don't know if a regulation we have. Going to get with Marty. The company should work with the landowner in my opinion

Joann,

I talked with TC Energy and they said it is form letter that gets sent out. Some landowners do not want any application and they will not spray their property. You should be hearing back from Lori regarding your request.

Regards,

Gayne

I talked to Marty and his position is that the landowner has the right to decline herbicides and/or pesticides from being sprayed on their property. Putting out a sign to that effect is highly recommended as well as notifying the company. Once that occurs, the company (operator) needs to mow, cut brush etc. the old fashion way.

If the company sprays anyway, we do not have an enforcement mechanism that I know of, but it would be a civil issue between them and the company.

Joanne,

I talked with the engineer who is over seeing the project on well #7417. She said the meeting tomorrow is not about the process/fix of well 7417. She is not attending the meeting. From what I understand the meeting is about reclamation on your property but that sounded vague to me. I will stop out tomorrow and see what is going on.

Thanks,

Gayne

joann@lewisfarmwv.com <joann@lewisfarmwv.com> Sun, Jun 5, 2022 at 11:35 AM
To: Gayne.J.Knitowski@wv.gov, CHARLES.T.BREWER@wv.gov, JAMES.A.MARTIN@wv.gov

Gayne August 30 2021 was the first notification of the well having pressure issues and almost a year later TC Energy has no idea what the issues are and are not any closer to a resolution. Plugging that well would be in everyone's best interest.

Joanne,

This week TC energy is suppose to set a bridge plug down hole to try to isolate the zone that is leaking. If the do not get any results from this attempt our office will talk with them to see the best solution moving forward.

Regards,

Gayne

Strader/Gayne,

Looks like we are about 12 hours ahead of the below schedule. We could be ready Spud earlier tomorrow and cementing late tomorrow night.

Thanks, Jack

Strader / Gayne,

Just an update we are about 24 hours behind the below schedule, so hopefully we will be spudding the Timmy Minch OHI 8H sometime late tonight and cementing tomorrow, If you have any questions please let me know.

Thank you, Jack

Strader / Gayne,

Just an update we are just now starting to drill surface, had trouble getting moved, so hopefully we will cementing sometime late tonight. I just sent the 9 5/8" notice also. Sorry for my poor planning skills. If you have any questions please let me know.

Thank you for the update.
Also I noticed that while still on location Baker Hughes employees were not wearing hard hats/PPE. (can send photos).
Not sure if that is a policy change.

Lorrie I needed to mow today. The gas has been blowing for at least 4.5 hours and I could not wait any longer due to expected rain and height of the grass. I stayed further away from the location than is route 51 Saltlick Road (approximately 30 feet) and well away from the fenced area. Steve was recording me mowing so I assume that someone will try to make an issue of this situation and there is no situation. If needed I will provide a photo.

SWN Production Company Reuse AST Modification

1 message

Casey Bartkus <Casey_Bartkus@swn.com> Mon, Jul 11, 2022 at 2:46 PM
To: Strader C Gower <strader.c.gower@wv.gov>

Good afternoon Strader,

As shown on the attached exhibit, we are planning to place a 17,000bbl reuse AST on our Bonnette pad in Marshall County for our upcoming completions on our nearby Blatt pad. The pad LOD does not need modified as the AST can fit on the existing pad. Let me know if you would like to review on location, or if you have any questions.

Thank you

Strader / Gayne,

The job report for the Timmy Minch OHI 10, Surface cement job is attached. The 2nd stage was pumped as designed with 32 barrels of cement circulated to surface. On the first stage job pumped as plan but had trouble getting bottom plug to land so there is a possibility of having a wet shoe, If that's the case the plan forward was to drill out the shoe track and pump a balanced plug. If that is the route we have to go will we need to run a CBL?

If you have any questions, please let us know.

Thank you

Strader / Gayne,

Strader,

per our earlier conversation that no CBL would be required for this dual stage cement job with cement returns to surface. Attached is the job report for the Timmy Minch OHI 8H, Surface cement job

The job was pumped as designed with 41 barrels of cement circulated to surface. If you have any questions, please let us know.

Thank you

Strader / Gayne,

I have a question. Is there anything else that needs to be done when drilling thru a coal void and pumping a dual stage cement job with cement returns to surface. I will send the job report shortly.

We just completed dual stage cement operations on the Timmy Minch OHI 8H, The job was pumped as planned with 41 bbls. of cement circulated to surface.

Jack

Hi Strader and Kelly,

SWN plans to dewater the Worthley Freshwater Impoundment in Brooke County according to the approved dewatering plan to maintain freeboard. The earliest anticipated date to begin dewatering is 5/13/2022, weather permitting. I have attached recent water sampling results for your review.

Please let me know if you have any questions or concerns.

Thanks!

WVDEP WR-38 Sign-off (TC Energy Wells Victory B 2604 and Majorsville Shallow 4437)

3 messages

Brad Nelson <brad_nelson@tcenergy.com> Fri, May 20, 2022 at 8:24 AM
To: "Knitowski, Gayne J" <gayne.j.knitowski@wv.gov>, "strader.c.gower@wv.gov" <strader.c.gower@wv.gov>

Hello Gayne / Strader,

I hope you are both doing well. TC Energy (Columbia Gas Transmission, LLC) recently completed the plugging and abandonment of two storage wells in Marshall County, WV. They are Victory B 2604 (API # 47-051-00777-00-00) and Majorsville Shallow 4437 (API # 47-051-00312-00-00). Would you be able to sign the attached documents and return them to me so that I can submit to the WVDEP? I thought it easiest to reach out via email. If you have any questions, please let me know.

Thank you,

Brad

FW: Reinbeau Road Work

2 messages

Josh Boyda <Josh_Boyda@swn.com> Wed, May 25, 2022 at 9:43 AM
To: "Strader.C.Gower@wv.gov" <Strader.C.Gower@wv.gov>

Good morning Strader,

I am going to call you in a few minutes to discuss the email below. The landowner (Mr. Reinbeau) is requesting us to do a favor and upgrade his tractor road to assist him with getting hay, since our pad expansion now limits his access. Was hoping to discuss with you, to see if you are OK with us just doing this work outside the scope of our pad work, and just as a favor for the landowner. We would obviously install E&S controls around anything needed them.

Thank you,

Joshua Boyda

Senior Environmental Specialist – West Virginia Division

Cc: Bob Laine <Bob_Laine@SWN.COM>; John Dubowski <John_Dubowski@swn.com>
Subject: Reinbeau Road Work

Josh/Chad,

I met with Mr. Reinbeau yesterday onsite to address the finish work of the expansion. Once issue he brough up was getting around the well pad with a pick up truck and trailer to access the remainder of his farm for hay removal.

Trying to come up with a solution we looked at connecting two of his existing roads. It is outside of our LOD but wanted to see what we needed to do from your all's end to make this happen for Mr. Reinbeau? On the below picture is a red line showing what we need to connect. It would be a pretty quick and simple job.

Thanks,

Justin Booth

Hi Strader and Kelly,

SWN plans to dewater the Margaret Corbin Freshwater Impoundment in Brooke County according to the approved dewatering plan to maintain freeboard. The earliest anticipated date to begin dewatering is 5/25/2022, weather permitting. I have attached recent water sampling results for your review.

Please let me know if you have any questions or concerns.

Thanks

Strader / Gayne,

Just an update we are about 24 hours behind the below schedule, so hopefully we will be spudding the Timmy Minch OHI 8H sometime late tonight and cementing tomorrow, If you have any questions please let me know.

Thank you, Jack

Roth Farms and Reinbeau

1 message

Dawn Keller <Dawn_Keller@swn.com> Fri, May 13, 2022 at 10:04 AM
To: "strader.c.gower@wv.gov" <strader.c.gower@wv.gov>
Cc: Josh Boyda <Josh_Boyda@swn.com>, John Dubowski <John_Dubowski@swn.com>

Hi Strader,

As discussed, here is where all the extra E&S will be installed at the Roth Farms.

Also as discussed, at the David Reinbeau, we had to take more material from the front cut slope to build the pad expansion than expected. This is all within LOD. We will annotate this on the A-built, as requested. We will also be repairing the small slip above the lease road and adding some rock and filter fabric below the landowner's cattle trough, both of these per his request.

Please let me know if you have any questions.

Thanks!

Dawn Keller

SWN AST Modification Reviews

2 messages

Casey Bartkus <Casey_Bartkus@swn.com> Thu, Jun 23, 2022 at 11:17 AM
To: Strader C Gower <strader.c.gower@wv.gov>

Strader, if it works for you, can we meet at the Timmy Minch pad to review the placement of a 15,000bbl freshwater Harpoon tank for modification. Afterward, we can go review the OCC A pad for the modification of LOD and placement of a 17,000bbl double-walled reuse AST. If this date/time does not work for you, please let me know.

Thank you

Casey Bartkus

Good afternoon Strader,

In addition to the Bonnette Pad modification I sent yesterday, we are planning to put a reuse AST on the David Reinbeau pad in Marshall County for completions/flowback activities on that pad as well. I have attached the exhibit for your review. Please let me know.

Thank you!

Good afternoon Kelly,

It was a pleasure running into you and catching up a few weeks ago!

We are requesting to modify the Timmy Minch to add a temporary, freshwater Harpoon tank for completions on the pad. I have attached the exhibit, the landowner's signoff, as well as Strader's signoff of the requested modification. This request is very time sensitive, unfortunately, as we have shifted our development schedule moving this frac up quite a bit. With that being said, please let me know how to pay the modification fee via credit card, and I will do so immediately. We very much appreciate your assistance with this. As always, please let me know if you have any questions or concerns.

Thank you!

Hello,

Please use this email as our notification to begin withdrawing/purchasing water at the following location, as outlined in our approved water management plan:

- Buffalo Creek @ Labelle Farms

Water used from these sources will be supporting completions activities at our Carl Rotter OHI Well Pad under WMP02514.

Thank you

Strader / Gayne,

I have a question. Is there anything else that needs to be done when drilling thru a coal void and pumping a dual stage cement job with cement returns to surface. I will send the job report shortly.

We just completed dual stage cement operations on the Timmy Minch OHI 8H, The job was pumped as planned with 41 bbls. of cement circulated to surface.

Jack

There was a FOIA from someone asking if the well has a valid permit to deepen the well. There was such a permit issued to Perkins OIl and Gas on June 21. 2011. I see no record it was. Please review and if that is the case, cancel the permit.

Thank you.--

Scott, I went out to check this out today. I was able to talk to the landowner, who is also the well tender for the well. Perkins still owns the well and the individual said they redrilled the well deeper about five years ago. While I was there I completed an IR6 and will be logging it shortly.

When convenient, please inspect this well. It was drilled in the 1980s and apparently never fracked or produced. I am in the process of pulling the bond of the defunct operator and the bond holding entity is squirming a bit.

Thank you sir!

Scott, here is an attached IR6 for the pad. It appears that someone has recently been in there, the road and the pad has been reworked and graveled. There's also newer fittings on the wellhead, the tubing slips (union on wellhead) is leaking gas pretty decent, the well also has 1300PSI on it.

Please inspect this well. I am interested to know if it is producing, and by whom if so. According to our records it belongs to Mutschelknaus. They say it was never theirs and it belongs to Hale Langford, the surface owner. If it is being used for domestic use, please try to talk to the person using it, get their address and tell them they need to be a registered operator (complete and OP-1 form) and have a single well bond in the amount of $5,000.
Thank you.

Scott, I checked that well out. There are no tags indicating ownership on the well. About 100 yards away is a separator with a tank and a meter. The meter is showing differential, but again no labeling on the chart to indicate whose or what wells it belongs to. There was a tag with a different API number laying in the bottom of the meter house with the company name of Stalnaker Energy Corporation. There was a house down the road a ways I saw but looked like no one was home.

Mr. McCoy,

Good morning, please find the intermediate cement summary for the Clutter Unit 1H well (02776) all went according to plan.

We are currently skidding the rig to spud the surface section of the Clutter Unit 2H well (02782) with casing and cement to follow. We will then move on and drill the intermediate section of this well followed by casing and cement. All cement summaries to follow. Please reach out with questions or concerns.

Thanks,

Fwd: Heintzman LOD Modification

10 messages

Matthew Dudley <mdudley@anteroresources.com> Wed, Jun 1, 2022 at 9:43 PM
To: "Stephen.e.McCoy@wv.gov" <Stephen.e.McCoy@wv.gov>

Hello Steve,

I was provided with your email address and informed that you are the WVDEP Inspector for Tyler County. First of all, congratulations on the new position.

I have attached an exhibit that identifies an unstable area (green space) within the Heintzman LOD that has moved slightly downslope. We have as-built the area and are wanting to progress with getting the area stabilized, in the near future, upon approval. Our Land department is contacting the property owner, Mr. Heintzman to make his aware and acquire signature of approval. I will provide the signed copy upon receipt.

At your convenience, please review the attachment. You may give me a call anytime to discuss this in more detail, or if you need to review this in the field, we can set a date and time to meet. The best number to reach me is at 304.844.8030.

Thank you, Steve. I look forward to working with you.

To: "McCoy, Stephen E" <stephen.e.mccoy@wv.gov>

Thank you! That's completely fine. Upon receiving landowner's approval and since there are no environmental features, may we proceed with the repair as the modification is being processed with the Charleston office? We will have the landowner's signature Monday or Tuesday. I'll send you that signed copy and we will have our permitting group get the modification processed with Charleston.

You have a great weekend as well!

public website to get the Excel file i showed you (no passwords required- this information can be provided to the public from this website)

https://apps.dep.wv.gov/tanks/public/Reports.aspx

here is a link to Tagis new Water Resources Management Plan map which is available through Arcgis Portal. Your username is your E/A number@executive (example – E123456@executive) and the password should be the same as your window's login. Click here to sign into Portal.
If you can't access it with the above info, you may have to talk to TAGIS. Remember the information in this website is **CONFIDENTIAL**

When you're logged in, click on the "Groups" category at the top of the page. Scroll down until you see "West Virginia Water Resources Management Plan". Click on that and you should be able to see the WRMP web app on the group's main page. (see red boxes in image below).

Pleasants Ritchie Tyler County Updates

1 message

McCoy, Stephen E <stephen.e.mccoy@wv.gov> Fri, Jul 1, 2022 at 10:45 AM
To: J Scott Rodeheaver <j.scott.rodeheaver@wv.gov>

Good morning Scott, here is what I had going on this week. I was at the Ritchie County Ritchie Petroleum Plugging project almost three full days this week.
Pleasants
1 Drilling Rig running
3 IR6s
2 IR8s
Ritchie
1 Plugging rig finishing up
1 Plugging rig set up, not started
1 IR11 (3 days)
2 IR6s
Tyler
1 Drilling Rig running
1 Plugging Rig that should be moving in today
2 IR6s
1 C1
Wetzel
1 C1
Have a great holiday weekend!

McCoy, Stephen E <stephen.e.mccoy@wv.gov>

pleasants ritchie tyler weekly reprot

Patchwork is moving in to plug the 85-6853 well--Paul Griffith well--sometime this week. We want to sample the brine and include all the parameters including the gross alpha and radium (radiologicals). The sample needs to be collected once they get in there and stir up or purge the well so we get a true representative sample of the brine and not something stratified.

Stephen,
I will take these samples. It is never something we ask the inspectors to do. I wasn't sure what you meant on the phone the other day about the gas leak but now I get it that I see the whole email. The Spill report attached is also something you do not need to worry about. Just an accident. lol

Scott/Marty,
I am going to order today 2 sets of sample bottles for this well and the Haught well. If my brain is not failing I think we missed the DRO sample on the ALliance well and also Marty said something about it being stratified. One, how could you tell? And two do you want Doug and I to try and purge that well a bit and then resample it as well?

Spud notice Antero/Clutter Unit 1H (02776)

1 message

Rig H&P 519 <righandp519@anteroresources.com> Fri, Jun 17, 2022 at 12:41 AM
To: "Stephen.E.McCoy@wv.gov" <Stephen.E.McCoy@wv.gov>
Cc: Eric May <emay@anteroresources.com>

Good evening Mr. McCoy,

We are currently working on finishing rigging up. We anticipate spudding the surface section of the Clutter Unit 1H well (02776) later today, followed by running 13 3/8" casing and pumping surface casing cement. We will then Nipple up the BOPE and test (after waiting on cement) followed by drilling the intermediate section or 12 ¼" hole, followed by running 9 5/8" casing and pumping cement. We will send all cement summaries following each job as outlined above. Please feel free to reach out with questions or concerns.

Thanks,

Antero Resources Company Representatives

To: "terry.w.urban@wv.gov" <terry.w.urban@wv.gov>

Terry,

I have a question regarding WV requirements for well signage. With respect the lease name posted for a well, should the original lease name be presented or should a current lease name be used in the event a lease for a well has been renewed and the lease name has since changed from the original lease name? Can you provide me some guidance under DEP requirements?

Luke Stull

Hey Terry

We'll be moving CSI double pole in today 6/7 and get everything rigged up to start pulling tubing out of Coco A 12114 (47-039-03212)

Schedule as follows:

6/7 – move in and rig up CSI double pole rig and BOP Equipment

6/8 – pull tubing

6/9 – Move in rig up Baker Atlas to set retrievable bridge plug, log with HiRes/Vrt log

6/10 – change out wellhead leaving original casing head

Will update accordingly.

Thanks!

Coco A 12114

Hi Terry,

Attached are some pictures from the spill cleanup at Coco yesterday. Our response time was as quick as humanly possible and the guys did a great job at cleanup. If you have any additional questions please call my cell at the number below.

Thanks!

Today Thurs 6-9-2022 Baker WL RIH w/ RAL & found no apparent cement, found TD@ 2945', shot squeeze perfs 6 spf 2' interval 12 shits Ttl from 2935'-2937'. Then set 7" cement retainer @ 2920'. RDMO Baker then TIH w/ 47 stds of Tbg and stung into retainer, established circulation and pumped 6.9 Bbls (33sx) of Class A neet 15.6 ppg cement, stung out of retainer and pumped 20 Bbls of 15.6 ppg class A neet cement (95sx) and pulled 8 stds of Tbg to calculated TOC and pumped additional 14.2 Bbls of 15.6 ppg class A neet cement,(67.5sx) then pulled 6 stds of Tbg to 2065' and reversed circulated w/ 40 Bbls of FW, we then TOOH standing back Tbg. ETOC 2065' Ttl slurry pumped 41.2 Bbls (196sx). Plan FWD MIRU Baker WL in the AM, RIH tag TOC and proceed according to findings.
Thanks Bill C, (304) 543-6404

Coco B 7075 (01258) Fri 6/10/22. Today we RIH w/ perf gun and found TOC inside 7" Csg @ 2020' (ETOC was 2065') we shot squeeze holes 6 spf 2' interval from 2012'-2014'. We then set 7" cement retainer @ 2005'. RDMO Baker WL. TIH w/ work string and retainer stinger w/ 32 1/2 stds and stung into retainer. Attempted circ to surface via 8X10 annulas. No circ but could inject at 0.2 bpm w/ 500-700 psi. Stung out of retainer and pumped 15.6 ppg class A neet cement slurry to EOT and stung back into retainer, was able to squeeze 0.75 Bbls away before locking up w/ 700+ psi stung out of retainer and pumped additional 15.8 Bbls of 15.6 ppg class A neet cement for Ttl of 16.5 Bbls (78.75 sx). Then pulled 6 1/2 stds of Tbg to 1602' and Rev Circ w/ 15 Bbls FW. Leaving ETOC 1610'. TOOH SB work string. Plan Fwd Mon 6/13/22 is swap out 7" BOP to 11' BOP. Thanks, Bill Conley (304) 543-6404

6/14/22

Coco B 7075 (01258)

PJSM. MIRU Baker wireline. RIH tagged top of cement @ 1565'. ETOC was 1610'. Shot perfs @ 1557-1555'. POOH. RIH w/ 7" retainer. Made it down to 1534' Pulled back up to double check collars from previous run and tagged up while pulling up @ 1470' made several attempts to get free. Decision was made to set retainer at 1470' Pulled out of hole. RDMO Baker. RIH w/ 24 stands of work string. Stung into retainer. Failed attempt to circulate betweeen 8 x10. was able to inject @ .25 bbl/min @ 600 psig. Un sting out . Spotted cement to end of tubing. Stung back in and was able to pump 7 bbls inside stinger (1.5 bbl of class a cement went into perfs) sting out and spotted 200' of 8 bbls of Class A cement. Pulled up 3 1/2 stands to 1237' . Reverse circulated and cleared tubulars. POOH. Secure wellhead and SDFN

Plan for tomorrow. Run in hole and tag top of cement @ 1237’ perf, set retainer and squeeze so we make an attempt to squeeze or circulate

6/16/22

MIRU Baker wireline. RIH tagged TOC @ 964'. Perfed @ 955-953'. Set cement retainer @ 933'. RDMO Baker. Trip in hole with workstring. Sting into retainer. Established injection. Was able to get circulation after 2 bbls thru 8x10. switch to cement. Pumped 70.8 bbls (337 sks) Class A cement around behind 8x10. sting out of retainer. Pumped 20 bbl (98 sks) to set a 500' plug above retainer. ETOC @ 433'. Pulled 8 stands. Reverse circulate. POOH.

Plan for today 6/17 RIH and tag TOC. Plug out.

6/20/22
Grouted 40' of 7'' with 1 inch pipe. Grouted 30' of 10x13 with Class A. Well is complete and Plugged. Monument will be welded on top of 7'' once rig is moved. But actual plug completion date will be 6/20/22. Plan moving forward will be move rig out and start reclaim.

Next well to plug will be Coco B 7078 (01306) McKnabb Heights in 2 weeks.

Coco B 7075 P&A plan forward

1 message

Maria Medvedeva <maria_medvedeva@tcenergy.com> Wed, May 18, 2022 at 4:50 PM
To: "terry.w.urban@wv.gov" <terry.w.urban@wv.gov>
Cc: Nathan Salyers <nathan_salyers@tcenergy.com>

Terry, good afternoon,

I left you a voicemail just a little bit ago. I wanted to update you on the status of the Coco B 7075 P&A, as well as to ask for permission for a change of scope in well abandonment. We ran a CBL today on the 7" casing and confirmed that it was cemented from surface. The bottom depth of the cement between the 7" and 8-5/8" casing is at 2350'. I've updated the Coco B 7075 schematic with up-to-date operations and in blue the proposed plan forward steps per your approval -

1. Set a 225' cement plug on top of the 4.5" casing stub.
2. Perf and squeeze the 7" casing annulus in 3 stages of ~550' intervals starting from ~4000' to ~2350'
3. Plug out inside the 7" casing to slightly above the 8-5/8" casing shoe, ~2050'.
4. Attempt to pull 10-3/4" casing, and if present, the 13-3/8" casing from surface.
5. Perforate through the 7" and 8-5/8" casings at ~2050' and cement to surface.
6. If the 10-3/4" casing was not successfully pulled, grout the 10-3/4" annulus as deep as possible.
7. Top off all annuli at surface.

Terry, good morning,
I hope you are well!

Thank you for taking our call with Jim yesterday. We really appreciate any feedback you can provide and assistance on spotting the offset production wells in the Coco B field for our 2022 new drill projects. We have identified 29 offset wells within 1000 ft buffer to the new drill trajectories. Our geologist used IHS for well data information. Unfortunately, it does not have a comprehensive list of well details and the listed well coordinates are unverified. I've spotted these wells in google earth – some wells show up in middle of a parking lot or a house, and cannot be correct.

As discussed, could you please help us verify as many of these well locations / details as you can? Nathan and I can meet you any day(s) next week to site visit the wells. What would be convenient for your schedule?

Terry

We'll be moving Baker wireline in on Coco C 12050 (Blue Creek) (02839) on Aug. 30th to set a composite drillable bridge plug and perforate. Will try to perform injection test to determine next steps in process.

I will update you accordingly during the whole job.

Thanks

Update 8/30/21

On 8/30/21 - Baker wireline set composite drillable composite plug @ 5008’ pressure tested 4.5’’ flowstring to 2160 psig. Good test. Baker perforated the 4.5 and 7’’ @ 4980-4985’ w/ 4 SPF phased 60 degrees - charge to penetrate both 4-1/2" and 7" casings. Attempted injection test. Injection test was unsuccessful. Notified WET engineer(Jim) and determined the next phase of this will be done in spring time with the rock pressure is below 1200 psig. Will continue to check pressures on well every week.

Terry

We'll be moving in a snubbing unit tomorrow 12/16 on Coco C 7353 (01970). After we are rigged up we'll be pulling tubing on 12/17. Afterwards Baker will log the well and set 2 retrievable bridge plugs and we'll change out the wellhead do to failed seals. I'll keep you updated daily on progress.

Terry Urban,

Here is an update on Coco C 7353 47-039-01970

12/17- began moving snubbing unit it to get rigged up to well

12/18 – continue rigging up snubbing unit. Tested BOP's

12/19 - snubbed 164 joints of 2 3/8" out of well

12/20 – rig down snubbing unit and move off location

12/21 – move baker wireline to set 2 retrievable bridge plugs in well. Change out wellhead

Bill Conley will keep you updated daily after Monday the 20th

Thanks
