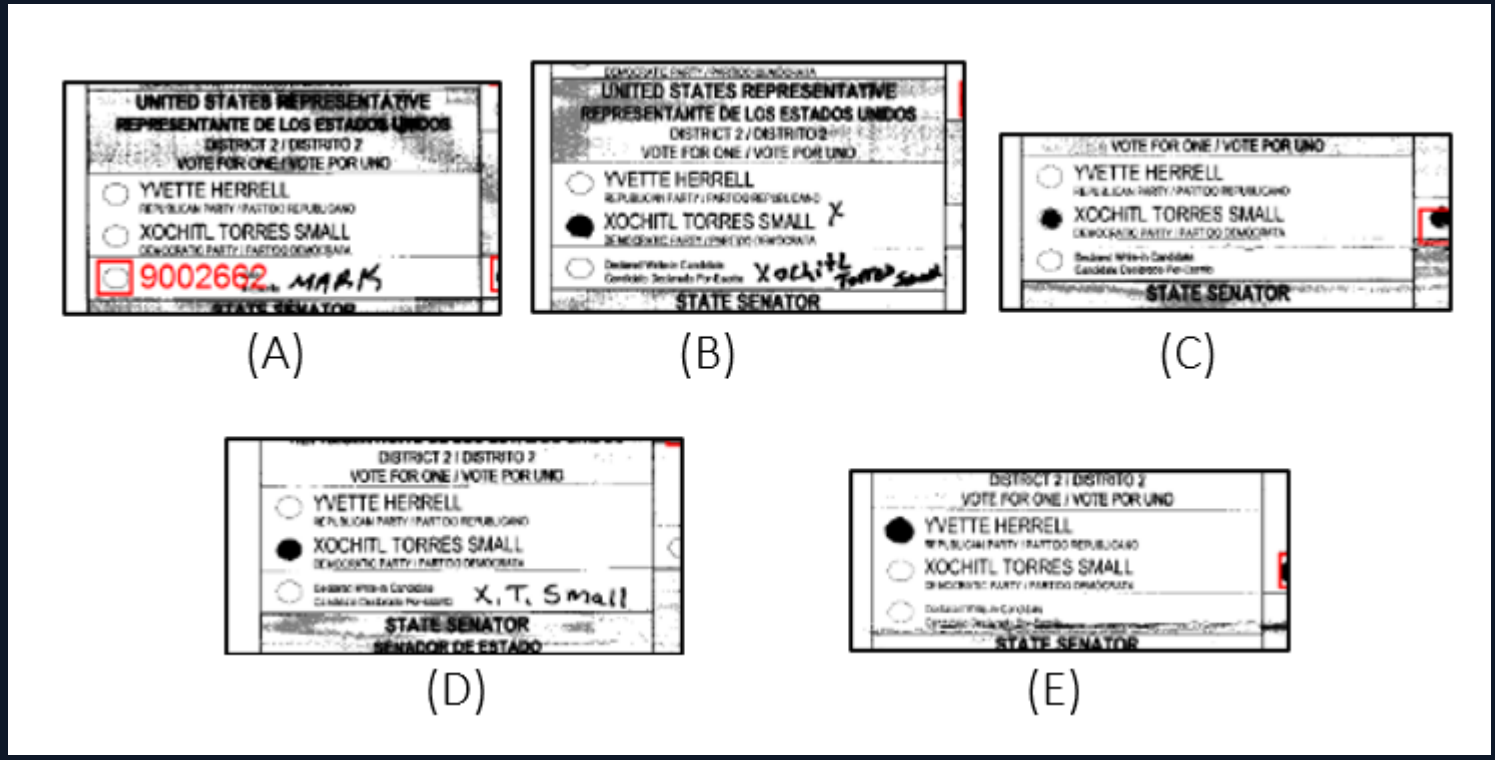
NM-OTERO-22-0605-A-001096

Record Accuracy – Cast Vote Record v Dominion Ballot Images



- By law tabulators can't have more than 1 error in every 125,000 vote opportunities. This translates to no more than 4 misadjudicated votes in Otero County.

- VVSG Section 4.1.5.2: "To ensure accuracy, paper-based systems shall: (d) Detect marks that conform to manufacturer specifications with an error rate that enables satisfaction of the system-level accuracy requirement indicated in Subsection 4.1.1. (e) Ignore, and not record, extraneous perforations, smudges, and folds."

- Tabulators misadjudicated 71 votes, 15 times higher than the allowable limit. These fell into 5 categories:
  - Unexplained misadjudication
  - Paper folds interpreted as votes
  - Voter missed oval
  - Stray marks counted as votes
  - Voter changed mind and clearly indicated intent

Tabulator Warning Messages	
Blank Ballot Warning	The tabulator does not detect any voter selections on the scanned ballot. Please ensure you used a proper marking pen.
Overvote Warning	One or more contests have too many votes. If you choose to cast the ballot as-is, contests with too many votes will not be counted.
Ambiguous Marks Warning	The tabulator detected marks on the ballot but the selections are not clear. The ballot will be returned automatically.
Ballot Misread Warning	The tabulator is unable to recognize the ballot. Check the ballot for damage or stray marks, particularly in the timing mark area. If damaged, spoil the ballot and issue another. If no damage is detected, re-insert the ballot in a different orientation.

AMERICAN OVERSIGHT

Record Accuracy – Voter Changed Mind and Clearly Indicated Intent

Record Accuracy –

- Optical Scanners are not capable of meeting VVSG error tolerances.
- There is no magic way for a machine to tell the difference between a stray mark, a fold, and a vote.
- Tabulator in NM adjudicated a stray ballot from the 2020 election in a logic and accuracy test for the 2021 Local Elections

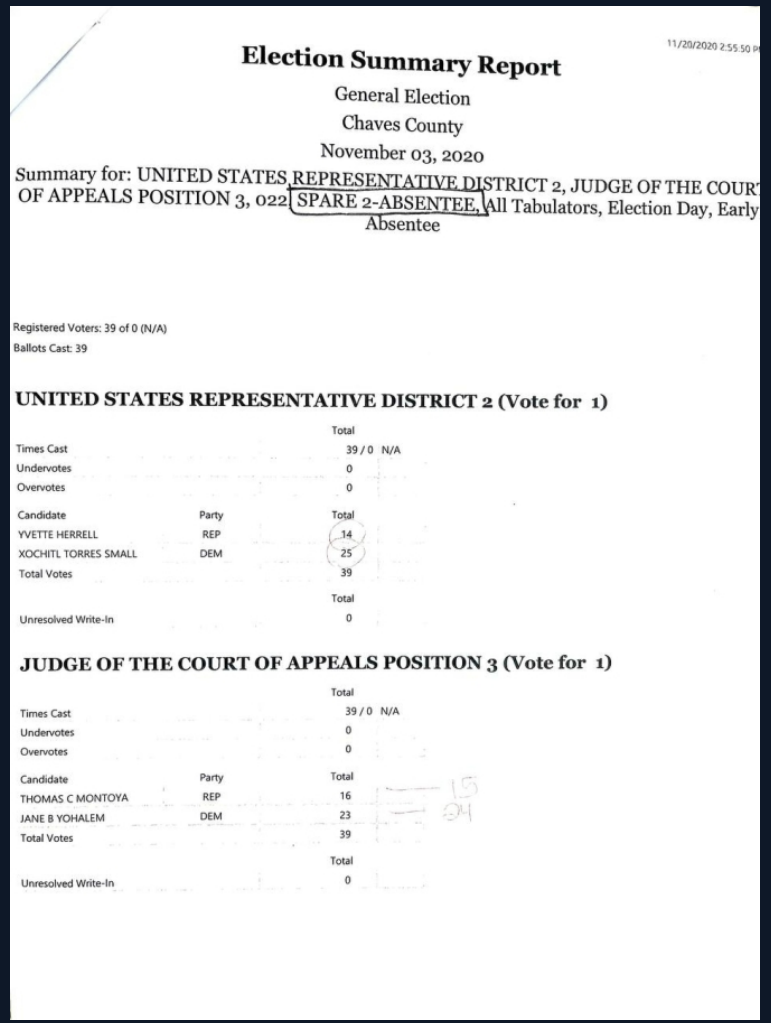
RE: Post-Election Voting System Check for the November 3, 2020 General Election

Dear Mr. Rivera,

Chaves County was selected to participate in the accuracy check of the tabulators used in the 2020 General Election. At this time, we have completed the accuracy check. We were able to locate all the ballots in precinct 22. We hand tallied these ballots for the U.S. Representative District 2 contest and Judge of the Court of Appeals, Position 3 contest and found the following discrepancies:



Tabulator AAFEBEM0046 – Absentee, Spare #2
39 ballots were hand tallied. The discrepancy appears in the Judge of the Court of Appeals, Position 3, contest.
The results from RTR - Dominion Server show to be:
Thomas C. Montoya - 16
Jane B. Yohalem - 23
Undervotes – 0
Overvotes – 0

The hand tally results show to be:
Thomas C. Montoya - 15
Jane B. Yohalem – 24
Undervotes – 0
Overvotes – 0

Attached please find our tally sheets as well as a report from the Dominion system for the tabulator with the discrepancy. Please let me know if you need any additional information.

Thank you,
Cindy Fuller

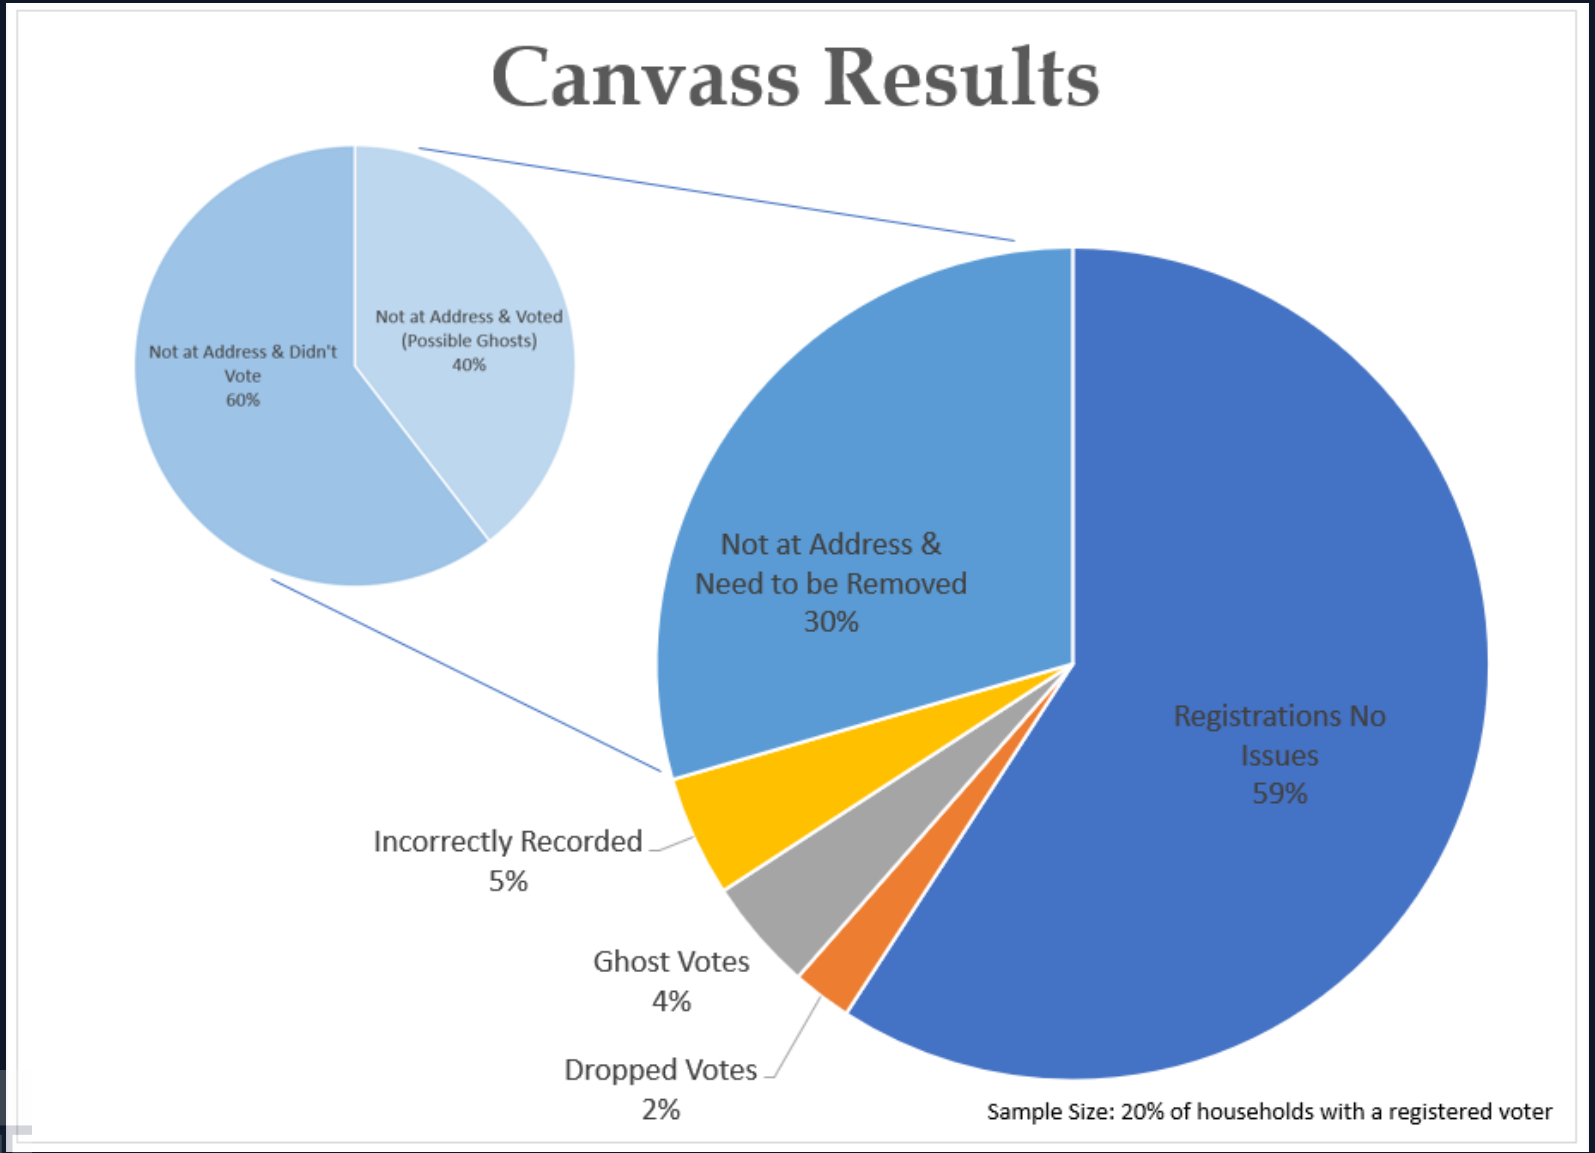
There is statistical evidence that is consistent with ballot-stuffing or manipulating the results from the Early Mail-in (Absentee) Counting Group

Other explanations may be possible since this is not a controlled experiment.

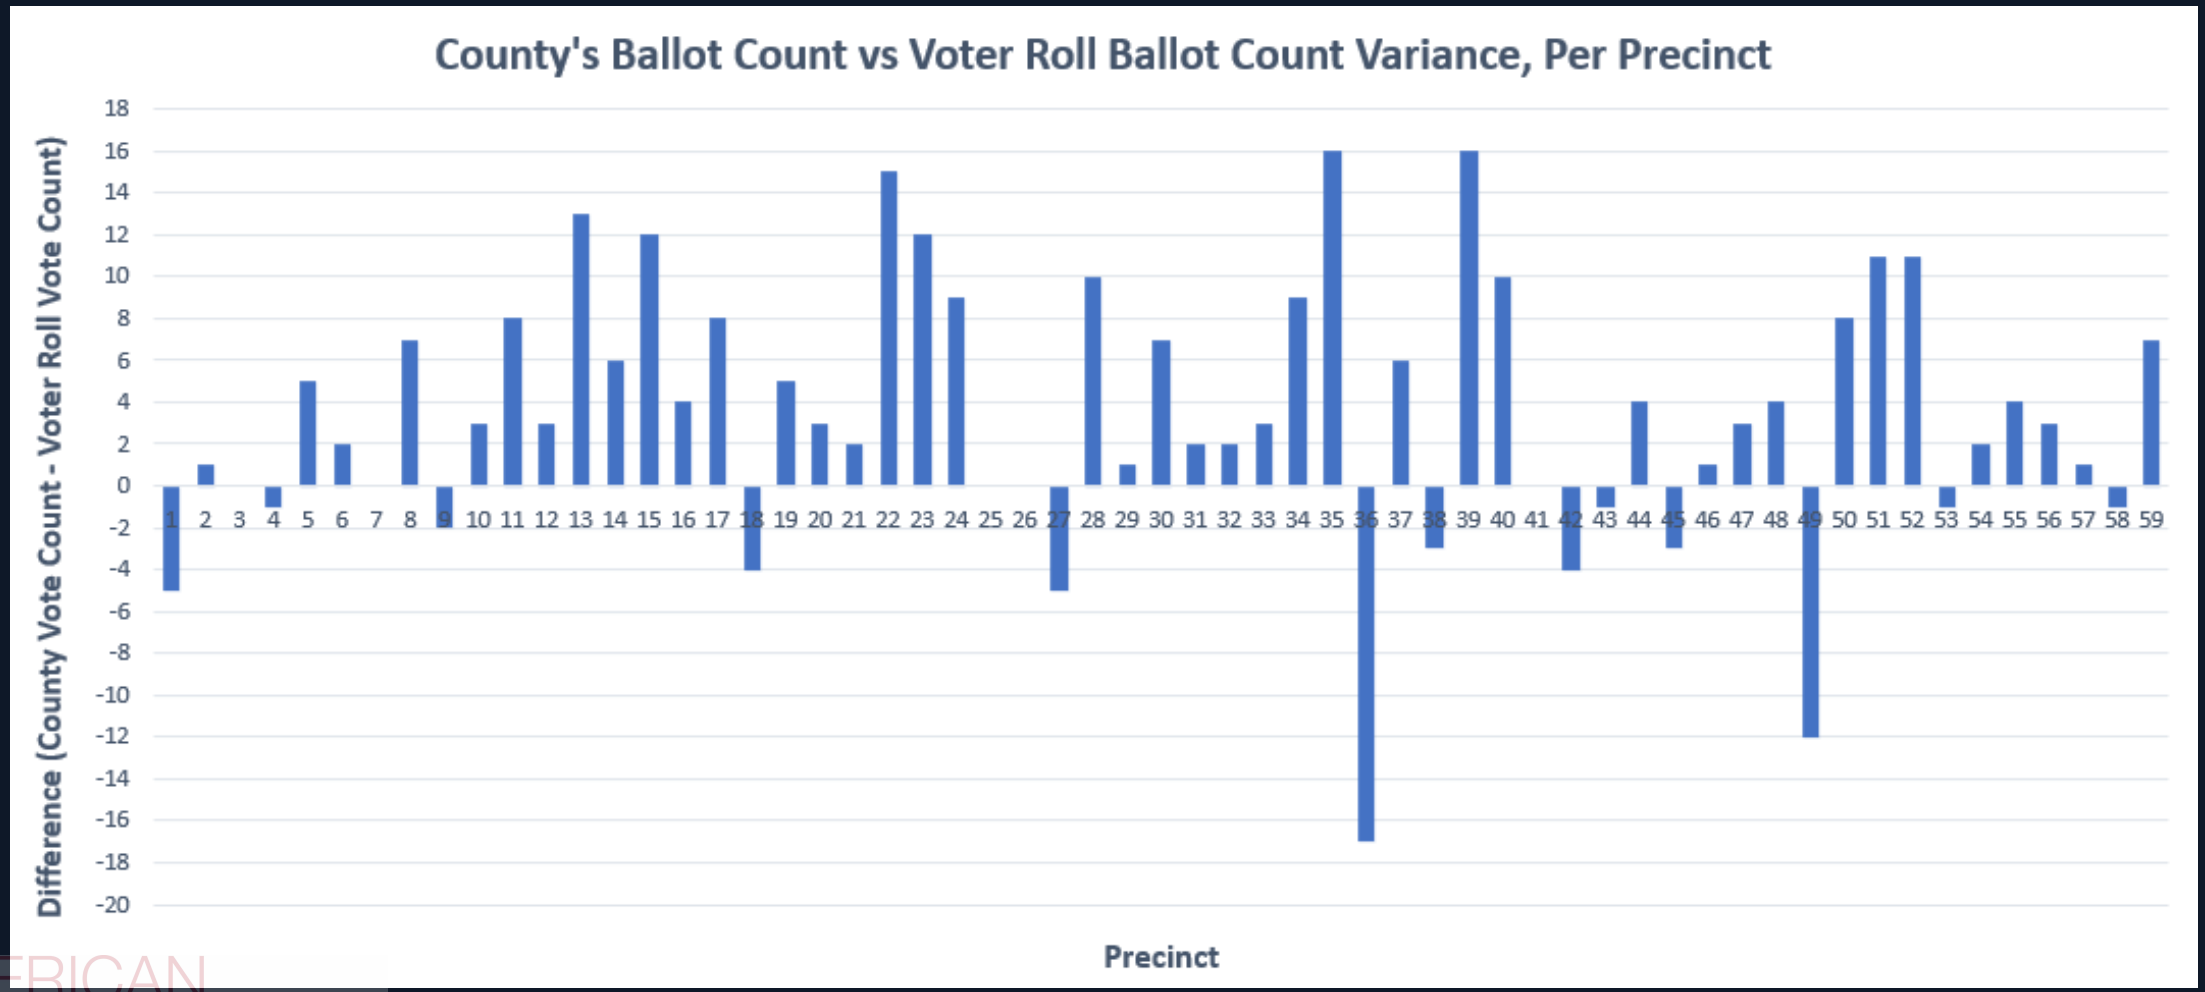
AMERICAN OVERSIGHT

Official Reports Admit Problems with Absentee Voting



- "We gave voters a list of possible illegal election activities and asked, "Which of the following situations did you personally observe in the 2020 general election?" Over three-quarters (77%) of NM voters indicated they did not personally witness any of these election fraud or irregular voting activities. 21% indicated they saw one or more election problems and 3% gave no response. •

- Of these illegal activities, the highest response was for unsolicited absentee ballots that 11 did not belong to anyone in the household arriving at the voter's residence. This occurred 7% of the time, a surprisingly high frequency. "



AMERICAN OVERSIGHT

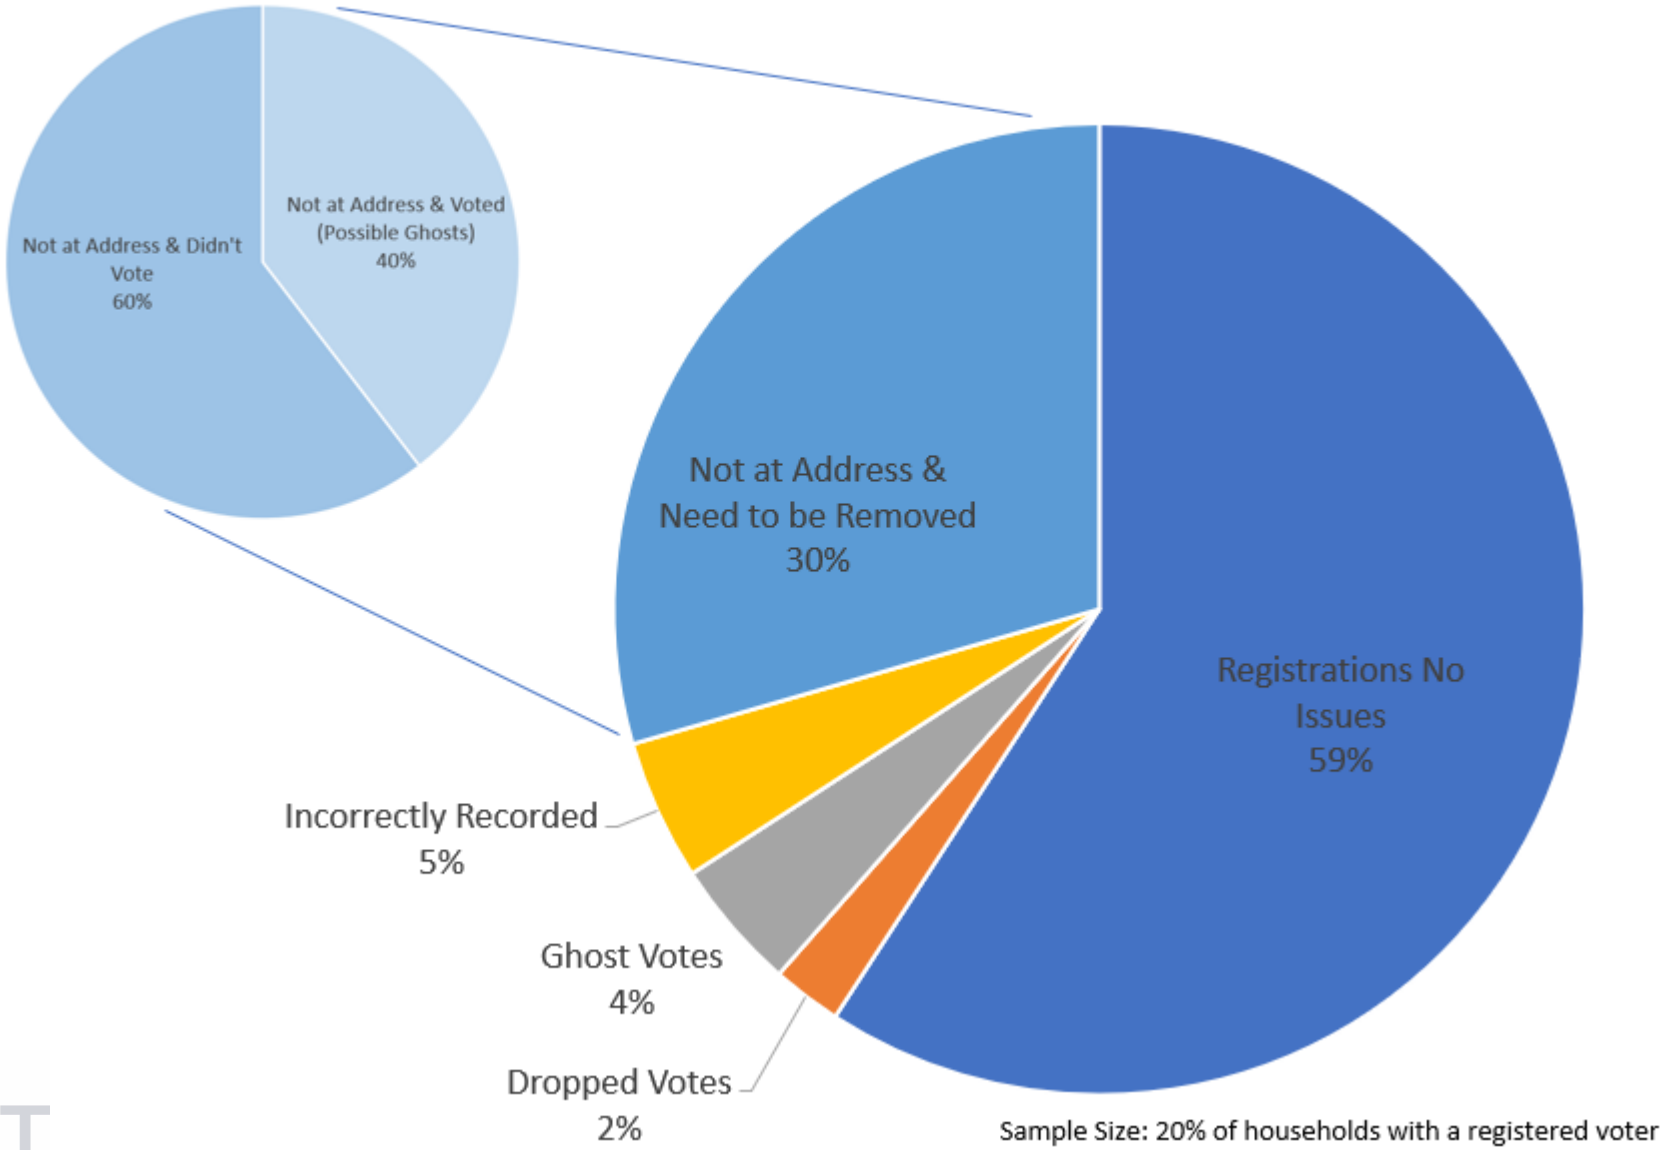
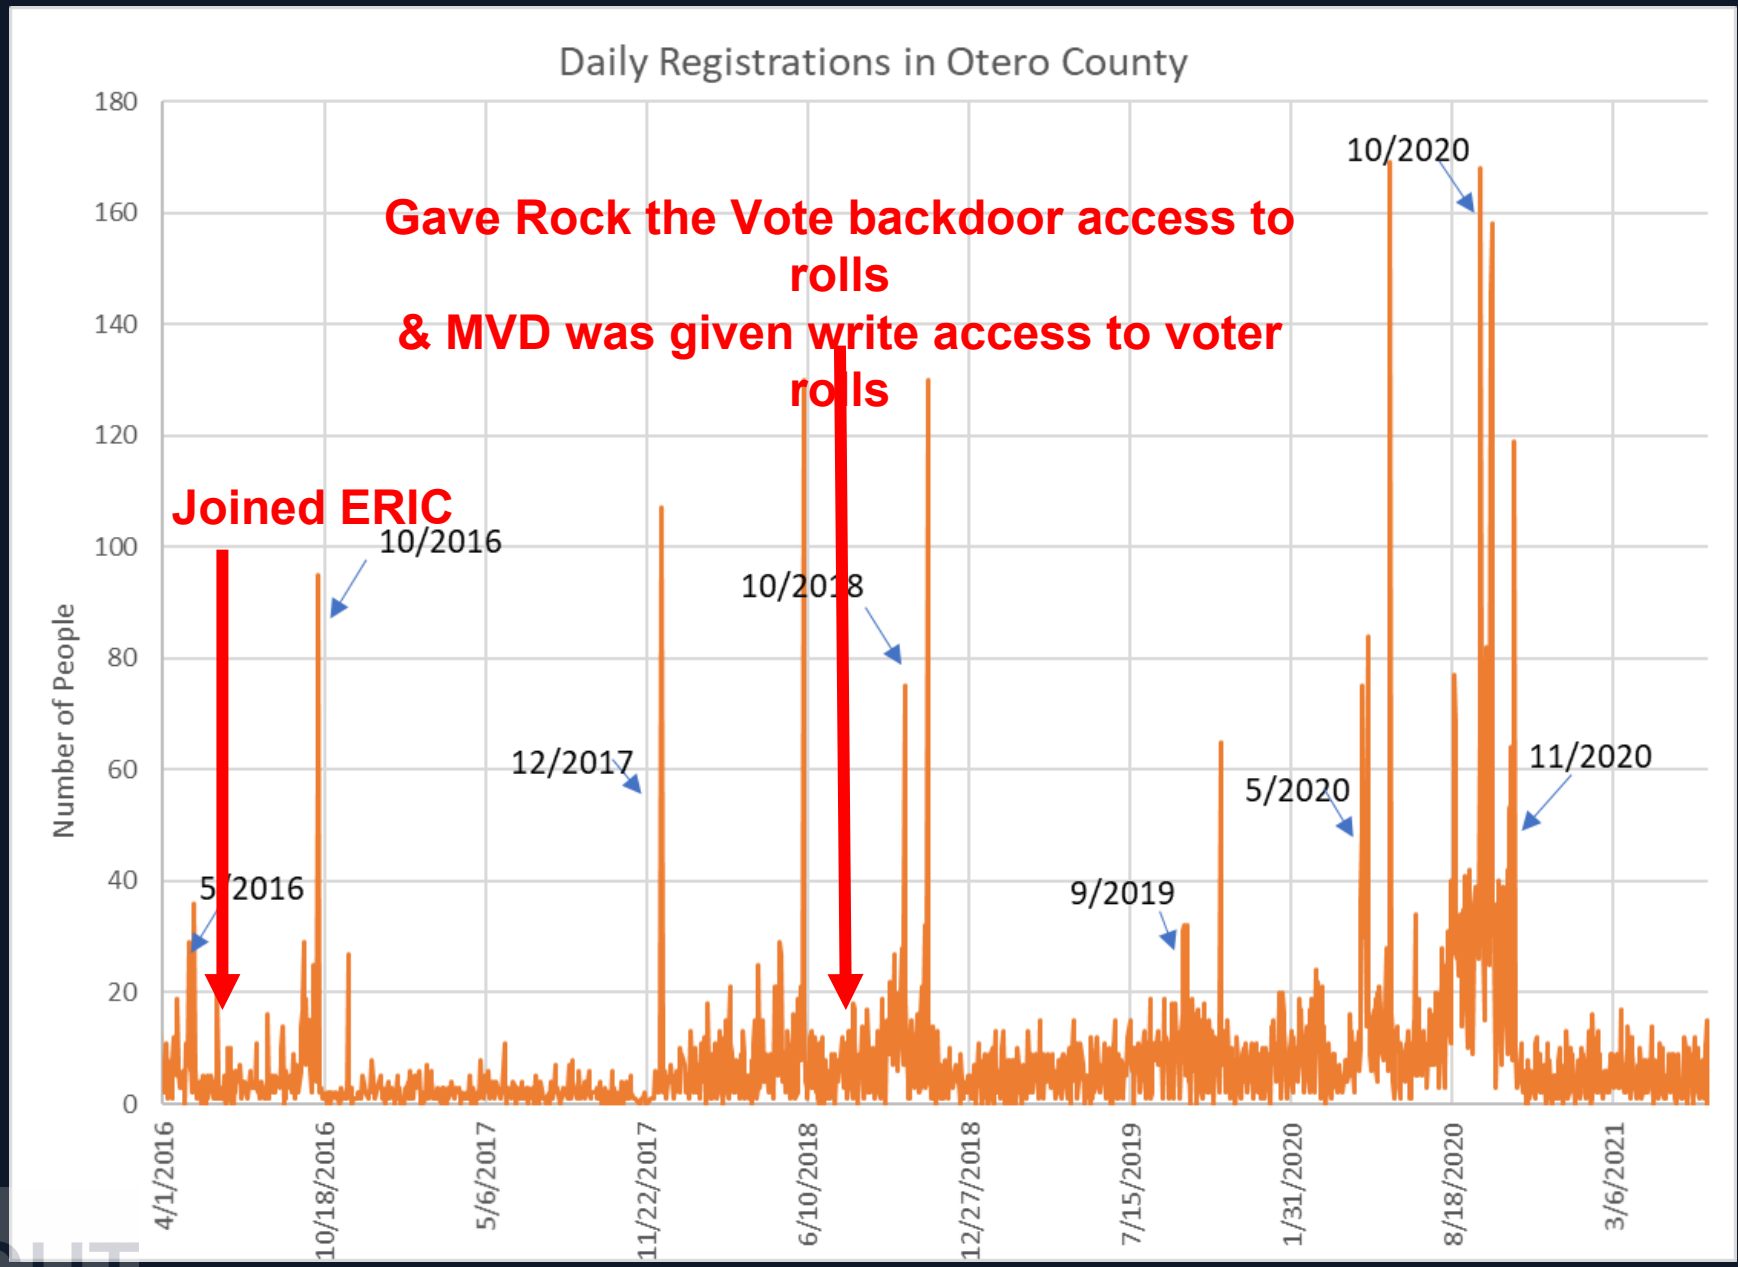
Update on the Otero County Audit



AMERICAN OVERSIGHT

Update on the Audit



- Team has been reorganized since the loss of prime contractor and data analysis work from qualified professionals continues.
- Some additional records are requested from the County Clerk.
- Enthusiasm for preserving and analyzing the election record in NM is growing. By the end of the month, we will have preserved the paper records in eight New Mexico counties.
- Additional groups all over the state have become active in urging their County Commissions to address the obvious problems that existing in our election system.
- The release of 2000 Mules supports our data analysis published in October 2021 which showed massive anomalies in the November 2020 election in the absentee ballots in EVERY COUNTY.
- This massive influx in fraudulent absentee ballots was made possible by the drop boxes funded by the Center for Tech and Civic Life – a non-government organization.

Subject: OVR updates in New Mexico

Hey all,

I wanted to circle back on our conversation regarding OVR and third-parties from last month. We're excited to utilize the updates the Sec. of State's office will be making available this year, so please send more details.

Additionally, I wanted to outline the updates we're hoping to eventually see in New Mexico to make voter registration in the field and via third-party web tools more seamless.

Essentially, we're asking for an update to how your OVR system accepts voter registration applications, removing the requirement that they are processed through your website. Instead, approved partners would be able to provide them directly to your system. I've attached a white paper on this approach to OVR, which we've termed "Connected OVR." Generally, this involves some technical enhancements such as building an API, or updating existing infrastructure to support third-parties. Ideally, in addition to increased flexibility to drop-off applications, we'd also be able to track the success of these applications with a feedback mechanism.

For the field, we'd no longer need a constant internet connection to register voters, and for the web, the user experience would be greatly improved -- right now they start on a partner page to ensure we get opt-ins and follow-up, and then continue onto the state website.

Both Pennsylvania and Virginia now offer this to approved third-parties and I'm sure they'd be happy to discuss the details with your office if you're interested. It's also worth noting that because the state is in control of the system, they are able to set the parameters for approving partners. There are a number of security and data checks we've completed to comply in both states that I'd recommend modeling.

Happy to discuss further, but I wanted to outline the request so we're all on the same page. Please keep us posted on developments for 2018 that we should make sure to use.

Best,
Jen

Thanks Maggie!

Kari, doing a quick check-in. Can we get an update on when the SOS website has been updated so that we can get it linked to the Rock the Vote website. We hope to get a program launched in the next few weeks.

Thanks, Melanie

Subject: Plan for voter integrity 3 step plan

I am writing to all 3 of you from Ohio, to ask if any of you or someone else could possibly give me a call or respond back via email on what was involved in the plan to adopt the 3 action items on the attached video. Couy, on the video you asked about where are the other counties to do the same thing, well I am out of state but would love to do the same and get it started in Ohio. I loved the outcome by removing the drop boxes and going to hand counts and getting rid of the machines. Wood Co is 100% Dominion. I just worked on the Blystone for Governor campaign (only constitutional conservative in the race,) and he ended up in 3rd place behind 2 establishment candidates. Something doesn't smell right.
I live in Bowling Green, Oh and am trying to accomplish what you guys already have voted on, so I am looking for more details so I can get the same information presented to our county commissioners here in Wood Co.
I appreciate any help you (or someone else) could give me.

Not sure how the petition came to you or who is involved with that and potentially what other resources you were presented to inform you 3 on your decision to vote on.

Dear Otero Commissioners,

Thank you for choosing to demand accuracy in our elections processes. Thank you for voting to not use electronic machines and to get rid of drop boxes!

Thank you for all you are doing to correct the massive cheating that has been occurring in New Mexico and across the nation.

Thank you for once again choosing to hear the people of your county. Don't give in to the unlawful attempts of the SOS and NM Supreme Court. I believe you have the right to demand accuracy and integrity in our election processes. These machines don't allow for that due to their ability to be programmed along with the voter rolls being inflated, which is another issue.

I am nearby in Dona Ana County, but I am praying for you all and cheering!

Thank you. Stay strong in standing against tyranny and for what is right. Our government should be of the people, by the people, and for the people. The rights not given specifically to the states or federal by the people are reserved for the people!

Gratefully,

Jody Stolp

Subject: Please Stop It!!

Here's what you said about your "no" vote to confirm the recent election results:

“My vote to remain a 'no' isn’t based on any evidence. It's not based on any facts,” Griffin said, nevertheless requesting a hand recount of ballots. “It’s only based on my gut feeling and my own intuition.”

That's just wrong. You're undermining democracy when - without any factual support - you assert that election results are tainted by fraud. Please stop it. It hurts the country, the state and the county you live in. It also hurts you, personally - it makes you seem like a person who should not be taken seriously. Please stop it.

Dear Mr. Griffin:

I have been following the presentations regarding election manipulation on a telegram channel called the daily dig who has called their followers to action to pray for and encourage you all. I am so very proud of you and want to thank you for your stand for truth.

We clearly live in crazy times like the Bible warned us about: good called bad, truth called lies, etc.

We know the truth. And thanks to you, and your courage and conviction for the truth, there will be a wave of truth across this country. WE THE PEOPLE will not stand for this any longer.

You, sir, are an American Hero.

I am eternally grateful and promise to be praying over you and your family during this time.

Sincerely,

Beth Megelsh

P.S. Also praying for your hearing today. Unbelievable! Angry about all this, but praying as well. God Bless you sir.

AMERICAN OVERSIGHT

FOR IMMEDIATE RELEASE -

JUNE 16, 2022

FROM VICKIE MARQUARDT, OTERO COUNTY COMMISSIONER

ALAMOGORDO, NM -

In a meeting on June 13, 2022, the Otero County Commission declined to certify the results of the June 7, 2022, primary election results. In response to this vote, New Mexico Secretary of State Maggie Toulouse-Oliver petitioned the New Mexico Supreme Court to force the commission to certify the results. Without a hearing, without obtaining the commission's reasons for denying to certify the results, and without any due process whatsoever, the New Mexico Supreme Court immediately sided with Toulouse-Oliver and granted the Writ. Without wasting any time, Toulouse-Oliver then went on local and national news to allege that what the commission did was criminal and stated that she would seek to jail any commissioner that refused to rubber stamp election results. Toulouse-Oliver never reached out to the commission to find out what our concerns were, to offer assistance, or to address any of the issues we might have with the election results. Instead, she chose to use the opportunity to further her political career by spending her time on television programs making baseless claims and threatening to jail political rivals.

Since neither Toulouse-Oliver nor the New Mexico Supreme Court, in a ruling issued by Justice Shannon Bacon, have given commissioners an opportunity to explain our concerns, I will outline my concerns briefly in this press release. As an initial matter, it is important to address the Court's conclusion that the commission's role in certifying election results is only "ministerial" in nature. The court has explained that a ministerial act or duty is a function performed without the use of judgment by the person performing the act or duty. Typically, this is a function that is clerical in nature, one that does not require any examination, discretion or judgment.

Yet according to NMSA, Section 1-13-4 (B) (2019), the county clerk shall "present the report of the canvass to the county canvassing board[1] for the board's **consideration** and approval." If the legislature intended the county commission's role to be only ministerial in nature, why then did it include the word "consideration" in the statute? Oxford defines "consider" as "to take (something) into account when making an assessment or judgment." Why has the New Mexico Supreme Court ignored the legislature's plain language which grants the commission the right consider the report of the county clerk?

In evaluating the results of the election, I intended to consider at least two important pieces of information:

[1] Note: the county commission is the canvassing board for Otero County.

AMERICAN OVERSIGHT

1. Maggie Toulouse-Oliver's May 28, 2021, letter (attached hereto) which states that New Mexico's voting systems are NOT certified in accordance with the United States Election Assistance Commission's most recent voting system guidelines. That is, New Mexico's voting systems were as of that date, not in compliance with the most current standards required by the Election Commission. Presumably, the standards were updated to address security vulnerabilities identified since the initial software release. I intended to consider whether the outdated and uncertified software at all compromised the election. Rather than provide the commission with this information, Toulouse-Oliver took the opportunity to accuse the commission of being part of a Trump conspiracy theory and threaten us with jail. In fact, my concerns have nothing at all to do with the 2020 presidential election, and are solely focused on whether any irregularities occurred during the 2022 primary elections in Otero County, New Mexico.

2. In the election contest for the District 2 County Commission seat, there appear to be only eleven (11) votes separating the two candidates. I was made aware of three (3) votes that were cast from an address where the individuals living there are deceased, and have been deceased, since before the primary election began. There is no possible way these are valid votes. I am also aware of several votes that were included in the results attributable to addresses where homes previously existed but are now just vacant lots. I wanted to consider whether these votes may have affected the outcome of any contested election. In a county where elections are often decided by only a handful of votes, it is especially true that each vote matters.

I am incredibly dismayed that the New Mexico Supreme Court took up this matter without giving me, any member of the commission, or our attorney the opportunity to respond before summarily issuing a one-sided decision. Their opinion fails to answer the question raised in this press release regarding the meaning of NMSA Section 1-13-4, which requires the commission to "consider" the report submitted to it by the county clerk. Rather, the court has ordered the commission to act as a rubber stamp and to approve anything that is submitted before it, no matter how erroneous it may be. I am at a loss as to how I am supposed to uphold my responsibility to my constituents to make sure the elections in Otero County are valid and reliable, when the court will not permit me to question whether elections should be held using uncertified software or whether votes coming from an address where there are no living persons should be included in the vote tally. More disturbing, however, is that our own Secretary of State would classify my actions as "criminal" and state that I should be sent to jail for making these inquiries.

I am left asking if you, the voters, are comfortable with this system. Are you comfortable with a court that orders the approval of whatever election report is submitted before your county commission even when the commission is aware of issues that may affect the outcome of the election? Are you comfortable with a Secretary of State who threatens to jail any commissioner who raises concerns about the way elections are run?

Re: Recertification of Voting Systems

Dear Ms. Romero:

Pursuant to Section 1-9-7.4(A) NMSA 1978, the SOS is required to review for recertification each voting system already in use in the state in the year following a presidential election. All certified voting systems are required to be tested by an independent authority and comply with all requirements in the Election Code and the most recent voluntary voting system guidelines (VVSG) adopted by the United States Election Assistance Commission (EAC).

While VVSG 2.0 was adopted by the EAC in February 2021, the EAC has not yet certified any independent voting system testing laboratories (VSTLs) to test and certify voting systems to these new standards. We understand that the National Institute of Standards and Technology (NIST) is in the process of developing the test processes and procedures for VSTLs. After these are adopted, the VSTLs will be required to earn accreditation with the EAC to test voting systems to the new VVSG 2.0 standards. Since this effort is likely to take some time, we plan to review our current voting systems based upon the previously adopted standards. Once the EAC has testing and certification procedures in place for VVSG 2.0, we will initiate a new voting system certification initiative.

According to the Election Code, a "voting system" includes the equipment and peripherals used for casting and counting votes as well as the equipment and peripherals used for printing or marking ballots. The full legal definition of voting system can be found in Section 1-9-1(B) NMSA 1978.

To begin the testing and certification process required for recertification, we request that you submit the following information to our office no later than June 14, 2021:

1. The voting system and version that is being submitted for recertification.
2. A description of any modification to a hardware or software component or configuration of the voting system since the last time the system was certified for use in New Mexico, if applicable.
3. A description of how the system meets all of the applicable voting system requirements included in the New Mexico Election Code (see enclosures).

AMERICAN OVERSIGHT

4. A copy of the most recent VSTL report and proof of compliance on the system eligible for recertification. The report provided must come from an EAC accredited test laboratory.
5. Description of your transition plan to become certified to VVSG 2.0, if applicable.

If you intend to have multiple system models or firmware versions recertified, please submit a separate application for each system. Enclosed for your convenience is a copy of the requirements for voting systems outlined in Article 9 of the Election Code.

Upon completion of an examination of all recertification materials, the SOS may require additional information, testing, or inspection as deemed necessary to comply with the recertification requirements in statute. After the SOS has completed a full review of all required information, the SOS shall make a written report and post the report and recertification materials on the SOS website for a mandatory 21-day public comment period.

Following the period of public comment, the SOS shall submit the reports and any public comments to the Voting System Certification Committee (VSCC) for their consideration and to make a recommendation to the SOS for recertification of the voting systems.

If you have questions or require any further information regarding the re-certification process, please contact me at Mandy.Vigil@state.nm.us.

Sincerely,

Mandy Vigil
State Elections Director

Enclosures: As stated

AMERICAN OVERSIGHT

New Mexico Election Code
Voting System Requirements

Voting Systems used for casting and counting ballots in the state shall meet all outlined requirements in Article 9 of the election code as follows:

1-9-7.7. Voting systems; technical requirements.

Voting systems certified for use in state elections shall:
A. have a unique embedded internal serial number for audit purposes;
B. be supplied with a dust- and moisture-proof cover for transportation and storage purposes;
C. if the net weight of the system, or aggregate of voting device parts, is over twenty pounds, have self-contained wheels so that the system can be easily rolled by one person on rough pavement and can roll through a standard thirty-inch door frame;
D. be a stand-alone, non-networked election system such that all pre-election, election day and post-election events and activities can be recorded and retained in each device;
E. employ scalable technology allowing easy enhancements that meet United States election assistance commission standards and state law;
F. have ancillary equipment, such as printers, power sources, microprocessors and switch and indicator matrices, that is installed internally or is modular and transportable;
G. display publicly the number of ballots processed;
H. be able to print:

(1) an alphanumeric printout of the contests, candidates and vote totals when the polls are opened so that the poll workers can verify that the counters for each candidate are on zero;

(2) an alphanumeric printout of the contests, candidates and vote totals at the close of the polls, which printouts shall contain the system serial number and public counter total; and

(3) as many copies of the alphanumeric printouts as necessary to satisfy state law; and

I. include a feature to allow reports to be sent to an electronic data file.

1-9-7.8. Voting systems; operational requirements.

Voting systems certified for use in state elections shall:
A. have internal application software that is specifically designed and engineered for the election application;
B. include comprehensive diagnostics designed to ensure that failures do not go undetected;

AMERICAN OVERSIGHT

C. have a real-time clock capable of recording and documenting the total time polls are opened; and
D. have a self-contained, internal backup battery that powers all components of the system that are powered by alternating current power; and, in the event of a power outage in the polling place:

(1) the self-contained, internal backup battery power shall engage with no disruption of operation for at least two hours and with no loss of data; and

(2) the system shall maintain all vote totals, public counter totals and the internal clock time in the event that the main power and battery backup power fail.

1-9-7.9. Voting systems; memory; removable storage media device; requirements.

Voting systems certified for use in state elections shall:
A. be programmable with removable storage media devices;
B. contain ballot control information, summary vote totals, maintenance logs and operator logs on the removable storage media device;
C. ensure that the votes stored on the removable storage media device accurately represent the actual votes cast;
D. be designed so that no executable code can be launched from random access memory;
E. have any operating system software stored in nonvolatile memory, which shall include internal quality checks such as parity or error detection and correction codes, and which software shall include comprehensive diagnostics to ensure that failures do not go undetected;
F. allow for pre-election testing of the ballot control logic and accuracy, with results stored in he memory that is used on election day, and shall be capable of printing a zero-results printout prior to these tests and a results printout after the test;
G. have internal audit trail capability such that all pre-election, election day and post-election events shall be stored, recorded and recovered in an easy-to-read printed form and be retained within memory that does not require external power for memory retention;
H. possess the capability of remote transmission of election results to a central location only by reading the removable storage media devices once they have been removed from the tabulation device after the poll closing sequence has been completed; and
I. prevent data from being altered or destroyed by report generation or by the transmission of results.

1-9-7.10. Voting systems; ballot handling and processing requirements.

Voting systems certified for use in state elections shall:

AMERICAN OVERSIGHT

A. accept a ballot that is a minimum of six inches wide and a maximum of twenty-four inches long, in dual columns and printed on both sides;
B. accept a ballot in any orientation when inserted by a voter;
C. have the capability to reject a ballot on which a voter has made more than the allowable number of selections in any contest;
D. be designed to accommodate the maximum number of ballot styles or ballot variations encountered in the largest New Mexico election jurisdiction; and
E. be able to read a single ballot with at least four hundred twenty voting positions.

1-9-7.11. Voting systems; source code; escrow.

As a condition of initial certification and continued certification, the source code that operates a voting system shall be placed in escrow and be accessible to the state of New Mexico in the event the manufacturer ceases to do business or ceases to support the voting system.
