Re: Response to County Explanation of Stamp “Behind” Envelope Triangle

Dear Randy,

Thank you for sharing with me the “County Explanation” concerning the anomaly EchoMail detected of the “VERIFIED & APPROVED MCTEC” stamp appearing “behind” the triangle. Their explanation stated:

“Since the scan is compressed the envelope only takes the outline of things like an arrow or large font. So the stamp was simply stamped over The Black arrow and in a scan it appears to be under it.”

This explanation is somewhat cryptic, and our follow up herein is, therefore, based on our interpretation of their explanation (see I). Moreover, their explanation raises many new questions, and provides an opportunity for further dialog with the County to understand the specific Standard Operating Procedure (SOP) of the image processing methods and what steps they follow in the systems for Early Voting Ballot (EVB) return envelope processing.

Figure 1 – Example of EVB Return Envelope.

I. EchoMail's Interpretation of County Explanation

EchoMail's interpretation of the County's explanation is: When a stamp is placed over a blackened region, on any of the triangles on the EVB return envelope (as shown in Figure 1), image compression replaces non-white pixels in those triangle areas with white pixels. And, this image compression process leads to the observed anomaly.

II. Questions and Concerns in Response to County's Explanation

- 1) What is most concerning is to find out now, for the first time since EchoMail was engaged for this audit, that the images EchoMail received are a compressed version of some original version. This means that modifications took place e.g. compression on the original images that were created from scanning of the voter's original EVB return envelopes.
- 2) Are the pre-compression EVB return envelope images available?
- 3) How many sets of EVB return envelope images with varying compression exist?
- 4) Is there an entire set of EVB return envelope images that are high resolution?
- 5) Are the original EVB return envelopes available for inspection?
- 6) Is a virtual i.e. digital "VERIFIED & APPROVED MCTEC" stamp being applied to the original high-resolution EVB return envelope images?
- 7) Are the EVB return envelope images encrypted when saved?
- 8) What other image processing and modifications takes place on the original EVB return envelope image?
- 9) Are the EVB return envelope images stored in one central repository?
- 10) Who has access to the EVB return envelope images?
- 11) What modifications can be applied to the EVB return envelope images besides the "VERIFIED & APPROVED MCTEC" stamp?

- 12) Can signatures be removed and altered in the Signature Region of the EVB return envelope images?
- 13) Can any region of the EVB return envelope image be altered?
- 14) What is the Chain of Custody on alterations to the EVB return envelope images?
- 15) Is there revision tracking enabled on EVB return envelope image modifications?
- 16) What other image processing occurred on the EVB return envelope images prior to EchoMail receiving them?
- 17) Why are not all the bona fide i.e. "Verified and Counted" EVB return envelope images stamped with "**VERIFIED & APPROVED MCTEC?**"
- 18) Given EchoMail has access to EVB return envelope images, where the stamp appears both behind and in front of a triangle, how does the County's explanation resolve such examples? Do different image compression settings exist?
- 19) What is the exact process and Standard Operating Procedure (SOP) from receipt of the original EVB return envelope from the voter, to scanning, to stamping, to storage, and compression of the EVB return envelope images?

EchoMail appreciates the response from the County. We look forward to next steps, once we receive answers to the above questions.

Warm regards,

Dr. Shiva Ayyadurai

1 MARICOPA COUNTY – ANALYSIS OF SENATE REVIEW – CYBER NINJAS RESPONSE

Maricopa County continues to purposely mislead Arizonans and the American public about the nature of audit findings, and the impact they had on the 2020 General Election. Their response renames and redefines audit findings so the claim can be made that the findings are false, includes logical sounding arguments that simply don't add up, and is completely devoid of any supporting evidence. The following response to their review continues to refute their baseless claims with evidence and citations.

1.1 Voted using Prior Address (Pg. 6, 14 & 16)

The County stated that the US Postal Services National Change of Address (NCOA) should have been used as a trusted source. Melissa utilizes the NCOA for their move data. Melissa is a trusted source. This is clearly documented within the report within the respective findings and ignored by the County's response. This validates the audit results.

The lack of precision from the County's response also leaves a lot in question. Our report provides in the appendixes a full list of every voter ID affected, as well as details as to when and where that individual moved. The County's response doesn't even confirm an exact number of records that were validated, nor the explanation for why the records they validated were not an issue. The County expects that simply asserting that our claim is false makes it false, rather than providing any documentation to validate their claims.

Furthermore, the County's claim that voters can legally change their addresses after the voter registration period and still legally vote is an extremely misleading statement. Our report was primarily¹ based on the November 7th VM34 voter roll file, and therefore any address changes should have been reflected in that version of the file. In addition, this is only possibly applicable for individuals who move within Maricopa County (15,035) and would not apply to individuals who moved outside of the County (12,772) and would therefore be required to re-register to vote. It would also be expected that the County would be able to state exactly how many of the 15,035 changed their address, rather than making a blanket statement and implying that it fully explains the finding. The fact the County chose not to do this raises more questions.

It is also unclear why the analysis in the County's response for this finding talks about double-voters. This finding has nothing to do with double voters.

1.1.1 MAIL-IN BALLOTS VOTED FROM PRIOR ADDRESS

On Twitter, the County suggested that the largest of our findings associated with a change in address was inaccurate because it didn't take into account college students, snowbirds, or military personnel. The County did not read the report very carefully if it believes that college students and snowbirds could significantly impact these numbers. The finding very clearly states that the address was checked after the documented move date and if anyone was still at the residence with the same last name the voter ID was removed from the list. This should account for almost all situations with college student and snowbirds.

¹ Please see page 20 of the Maricopa County Forensic Election Audit Volume III: Results Details report for additional details: https://c692f527-da75-4c86-b5d1-8b3d5d4d5b43.filesusr.com/ugd/2f3470_d36cb5eaca56435d84171b4fe7ee6919.pdf

The question of military personnel is potentially a legitimate partial answer. The voter rolls clearly delineate military personnel by specifying a military address, as well as frequently having eligibility for voting via the Uniformed and Overseas Citizens Absentee Voting Act (UOCAVA). While the former is less likely to impact the numbers for the same reasons as the college students and snowbirds; UOCAVA eligible voters can vote via email, fax, or a portal in addition to via mail and it shows up as a mail-in vote. As a result, they would not necessarily have to have access to their prior residence address to receive their ballot in order to cast a mail-in-ballot. Running the 23,344 voter IDs who voted via mail-in ballots even though they had moved against a list of UOCAVA eligible voters finds 1,344 UOCAVA voters. This means the proper count for the first finding in our report should be an even 22,000.

1.2 More Early Ballots Returned by Voters Than Received

The numbers simply do not support the County's claim that the curing of ballots would result in a second scanning of the envelope, and therefore a second EV33 entry for a received ballot. This is a soundbite, not an explanation.

The 9,041 voter IDs that had more EV33 returned ballot entries than EV32 sent ballots, and the individual voted via mail was provided to Dr. Shiva to see if there was any correlation between these voter IDs and the prevalence of more than one scanned envelop. Only 2,138 of these voter IDs had more than one scanned ballot. If the County's explanation properly accounted for this issue, then there should be a one-for-one match with multiple scanned ballots for all 9,041 voter IDs. This simply cannot explain the issue when only 24% of the 9,041 had multiple envelop image scans.

1.3 Voters That Potentially Voted in Multiple Counties

It does not appear the County read the report carefully. The finding is extremely clear that the list of identified individuals should be validated further as name and birthdate overlaps can occur and be shared by different people. The County has access to full social security numbers and driver's license numbers. The audit does not. It is not uncommon nor improper for an audit to find things that require additional investigation, and we look forward to the Attorney General's review of this finding rather than the County's cursory dismissal of this issue as a "Faulty Claim".

Had the County taken this finding seriously their reply could have shown a good faith effort to validate the finding and indicate the quantity validated and the reasons why they were not valid. Without any numbers or evidence, it can only be assumed that the County completely dismissed this, as stated, as a "Faulty Claim".

NOTE: The County renamed this finding in their response to take out the word "Potentially" so it could be listed as a faulty claim, rather than recognized the validity of the finding.

1.4 Official Results Does Not Match Who Voted

This finding is accurate as written. The Official Results from the Canvass do not match the list of voters in the VM55 file. The County attempted to conceal this flaw by renaming this finding in their response to "Official Results Don't Include All Voters" for the sole purpose of falsely discrediting the claim. Their explanation states that protected voters are not included in the VM55 file and therefore there is a discrepancy. This does not explain the issued raised by the audit team; the fact the County couldn't reply with a precise number of protected voters who voted in the election that matches the outlined discrepancy shows that their response is not accurate and willingness to address flaws in their system is non-existent.

Furthermore, several weeks before the hearing the Senate attorney reached out to the County to request an explanation for this so that it could be ensured that the audit report was as accurate as possible. The County ignored the request for weeks and then replied to the request the night before the hearing with the details about the protected voters list. To ensure the accuracy of our audit despite the County's willful lack of cooperation, we both discussed this possible explanation in the hearing and included disclaimers in the report for findings that would be invalid if this information was true.

1.5 More Duplicate Ballots than Original

The County's response is extremely misleading and does not respond to any of the specific details outlined within the audit report. In the case cited by the County, Ward vs. Jackson, only 1,626 ballots were reviewed, while the audit reviewed all of the duplicated ballots². The "spilled box of UOCAVA ballots" referenced in the County's response was not a box, but a stack of 20. That stack of 20 slide onto the ground in a manner that even maintained the order of the ballots; and was promptly picked up and put back in the box. This occurred within the contained space of the Senate's special ballot coral under the direct view of Ken Bennett and the Secretary of State observer, Ken. This doesn't account for anything close to the discrepancies detected by the audit.

Furthermore, the "detailed records" provided by the County for duplicate ballots were shown by the audit to be incorrect and full of mislabeling and other errors as documented in the report. Detailed records are only useful if they're correctly recorded.

1.6 EMS Database & Logs Purged, Files Deleted

The County's response to the purged and deleted data and files shows they do not know what is going on within their Election Management System (EMS), and that they didn't carefully read the subpoena. Not only are many of the items that were deleted specifically listed in the original subpoena, and therefore a request for an archive or backup wouldn't be needed; but the dates and timelines in their response to the audit report and on Twitter is not supported by the dates in the logs on the machines. Furthermore, what was done for the November 2020 general election does not match any past elections found on the EMS Server; countering any arguments that the purging and deletion of files is "standard procedure", and the over 2 terabytes of free storage on the device counters any arguments it had to be done for space. These arguments are handled in the following sections but show clear evidence that data that should have been protected by the subpoena was instead destroyed.

1.6.1 FALSE COUNTY CLAIM: THE SENATE NEEDED TO SUBPOENA BACKUPS OR ARCHIVES

The Senate did not need to subpoena backups or archives. All disputed items were clearly outlined within the Senate, this is nothing more than an attempt to misdirect and mislead. The original subpoena³ item #4 clearly requests the "November 2020 general election in Maricopa County, Arizona", "Election Log Files" and "any other election files and logs", and it goes on to list "any other election files or logs" associated with the "Tabulators", "Result Pair Resolution", "Result Files", and "SQL Database Files". DVD result files and SQL database files are among the list of items deleted.

2

[https://recorder.maricopa.gov/justthefacts/courtcases/7%20Ward%20v.%20Jackson%20\(AZ%20Supreme%20Court\)/Ward%20v.%20Jackson%20APPEAL%20-%202020.12.08%20DECISION%20ORDER%20\(Ward%20v.%20Jackson,%20Ariz.%20S.%20Ct.\).pdf](https://recorder.maricopa.gov/justthefacts/courtcases/7%20Ward%20v.%20Jackson%20(AZ%20Supreme%20Court)/Ward%20v.%20Jackson%20APPEAL%20-%202020.12.08%20DECISION%20ORDER%20(Ward%20v.%20Jackson,%20Ariz.%20S.%20Ct.).pdf) (pg. 4)

³ <https://www.scribd.com/document/531671852/SUBPOENA-January-12-2021-NEW-Senate-Sub-to-Maricopa-County>

In addition, at the point where the SQL Database was purged of all data associated with the results of the November 2020 general election and later filled with audit data from ProV&V, it no longer would be a file reflective of the “November 2020 general election”; but would be a file that represented the ProV&V “audit”. This would mean it would not meet the requirement from the subpoena for the SQL Database files associated with the election.

Furthermore, the original subpoena⁴ item #7 clearly requests the “November 2020 general election in Maricopa County, Arizona”, all “Windows Server & Desktop” “Windows event logs and Access logs”. The Security event logs were not provided separately for any of the systems; even though this is the definition of what an “Access Log” is for a “Windows Server & Desktop”. Since these logs were rolled over prior to us receiving the machine, they no longer covered the subpoenaed period of time.

1.6.2 FALSE COUNTY CLAIM: STANDARD ARCHIVAL STEPS WERE TAKEN ON FEBRUARY 2ND.

The Results Tallying and Reporting (RTR) logs clearly show that all database data as well as files in the NAS directory were purged and deleted on February 1st. The action was started at 5:14:47 pm and finished at 5:20:00 pm. If any backups or archives were conducted on February 2nd, the data was already deleted.

userRelatedInfo	executedCommand	operationTimestamp
RTRAdmin	User initiates the OnPurgeResults activity	2021-02-01 17:14:47.363
RTRAdmin	PurgeResultsCommand (execution duration: 76478ms):All result files from database were deleted.	2021-02-01 17:16:27.810
RTRAdmin	PurgeResultsCommand (execution duration: 288779ms):The result files database, result files and images from NAS were deleted. Purging of results has finished successfully.	2021-02-01 17:20:00.097

If it was normal to purge data as can be seen in the finding in the audit report, it would be expected that this would be true for every other election on the EMS Server. However, as can be seen in the screenshots below the data is still present for other past elections. Since the drive had more than 2 terabytes of free space available there was no technical reason to delete the data before the two audits hired by Maricopa County. In fact, it begs to question what the auditors had to audit if there were no election results when ProV&V arrived on Feb 2nd.

⁴ <https://www.scribd.com/document/531671852/SUBPOENA-January-12-2021-NEW-Senate-Sub-to-Maricopa-County>

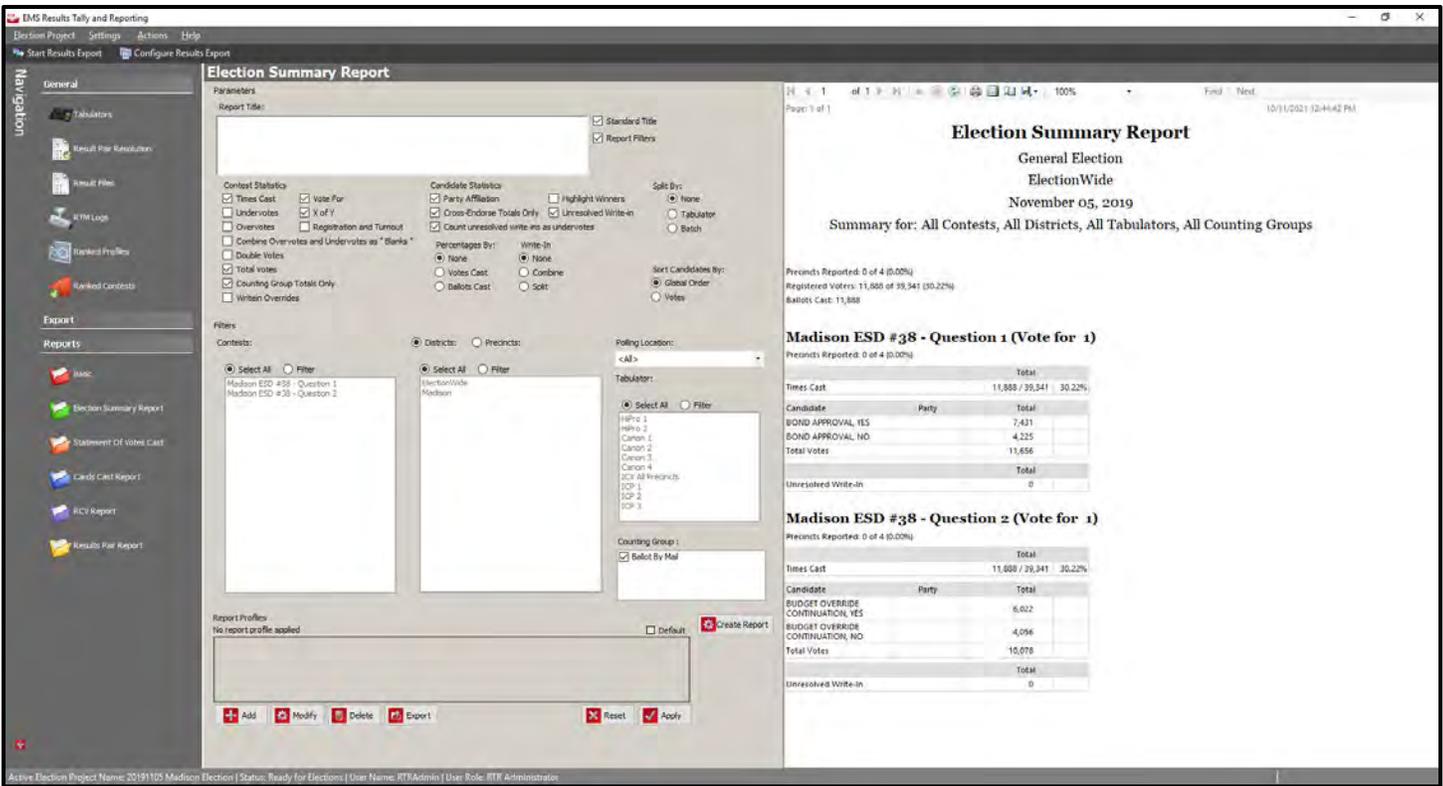

Figure 1 - Election Results and Undervotes for the 2019 Madison Election. These numbers match the Official Results on the Recorder's Site.

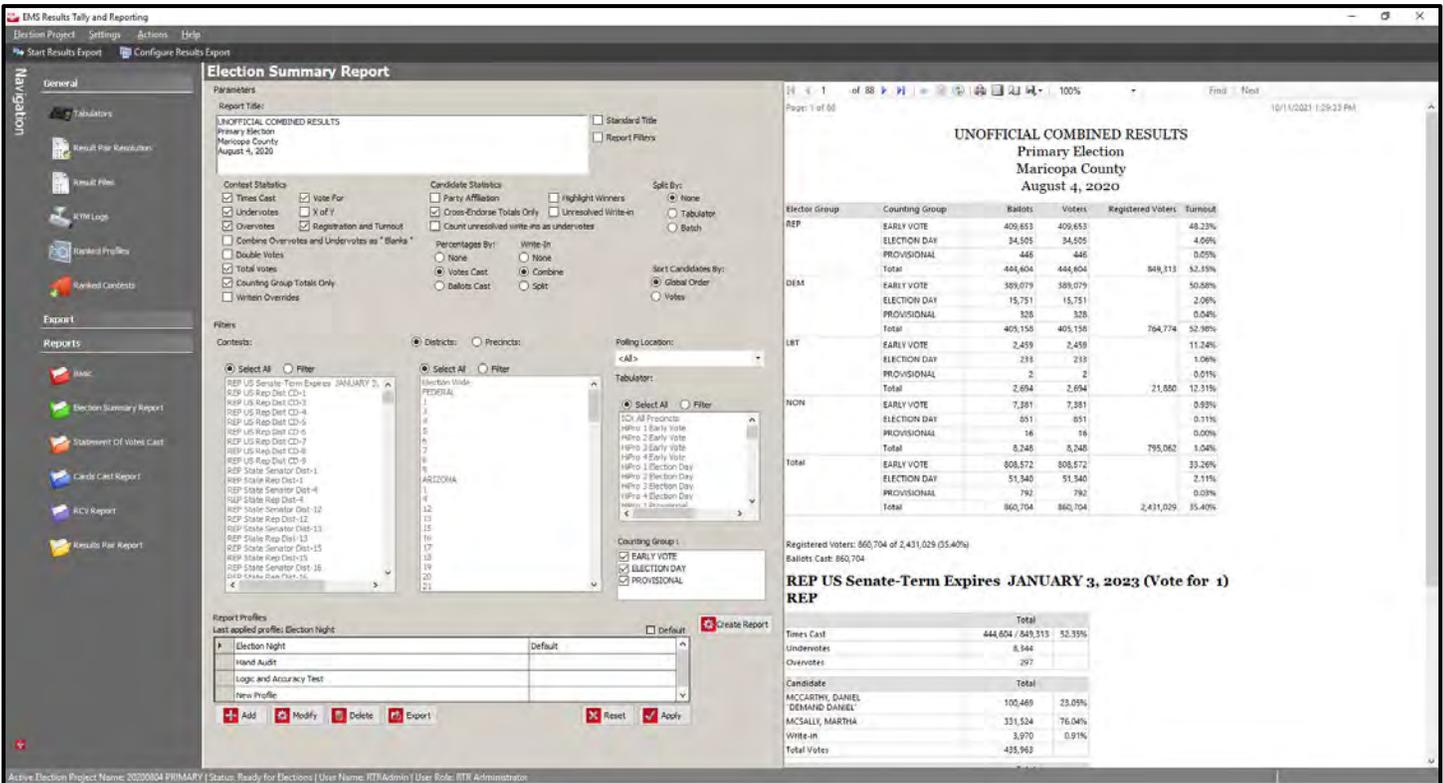

Figure 2 - All Results Still Exist for the 2020 Primary. These numbers match the Official Results.

Furthermore, the standard way to “archive” Dominion software is to run a backup from Election Event Designer. This method of backup is found with every past election, and it’s the only way to create a zip archive with all of the database details and all of the items within the NAS directory. This operation does NOT delete any data. The last time a package file was created was on November 13th as can be seen in the screenshot of the RTR logs. This is inconsistent with the County’s statement an archive was created on Feb 2nd.

1.6.3 FALSE COUNTY CLAIM: THE COUNTY RAN TWO FORENSIC AUDITS BY CERTIFIED COMPANIES

The procedures documented within the ProV&V report for the first Maricopa County audit did not follow any industry recognized standard digital forensic processes, and the SLI report clearly documents that they could not forensically image the EMS Server due to the RAID configuration. This is consistent with the fact that neither company is certified for forensic examination of digital equipment, and this is not work either company regularly does. Both companies are certified by the Election Assistance Commission for certifying election equipment, not for completing forensic audits.

Furthermore, since all election results were cleared from the Election Management System (EMS) Server before any of these two audits were performed; the only thing these companies could do was run test cases against the election equipment to see if it behaved properly. No results were audited by either of these two companies.

1.6.4 MISLEADING COUNTY CLAIM: THE COUNTY RAN A HAND COUNT

The hand count done by Maricopa County was such a small sample size that its margin of error was more than twice the amount of the margin of victory. It is extremely misleading to suggest this is equivalent or just as accurate as a full hand count. The hand count only counted 5,200 of the 2,089,563 ballots. This equates to roughly 1/4th of a percentage point of the total ballots. With this small sample size there would be a 1.357% margin of error to achieve a 95% confidence in the election results. This means that if the ballots were truly chosen randomly, then this hand count could be off by over 28,000 ballots. If the ballots were not chosen randomly then the counts could be off by even more.

1.7 Corrupt and Missing Ballot Images

The County claims that the fact that the ballot images are corrupt or missing from the Election Management System (EMS) Server is inconsequential, and that ballot images should have been viewed from one of the other drives provided. This defies normal audit principles where the official system of record, the EMS Server, would be utilized for the analysis. This also doesn't explain why or how the images got corrupt, or why images are missing from that system. The drive provided wasn't even in the same folder structure as the NAS directory or have any other resemblance of an official backup. For this drive to be considered as the official source of images would require that there is some documented procedure for the collection of these images.

Furthermore, a review of the drive provided doesn't include all pre-adjudicated images. The post-adjudicated images on the drive show the expected 2,089,563 images, but the pre-adjudicated images only show 1,923,719 images. The difference of 165,844 appears to be the number of ballots processed by the Election Day ImageCast Precinct 2 tabulators based on the CVR, but it's unclear why or how these images would be collected in a manner where these images were missing. As a result, it creates further questions on the reliability of these images.

At this time, the drive of pre- and post-adjudicated images has not been validated to confirm that corrupt images do not exist, but this aspect will be reviewed and be confirmed.

1.8 Subpoenaed Equipment Not Provided

The County can't both state that the matter of missing subpoena items was resolved in the settlement, and then proceed to argue that certain items were not in the subpoena. Furthermore, failing to comply with a subpoena is a criminal offense and not something that can be included in a civil settlement. It will be up to the Attorney General to determine if the missing subpoena items are a sufficient grievance to merit further investigation or prosecution. This is not something that is within the Senate's responsibilities.

The actual report has a more extensive list of items that were missing from the subpoena, not all of which are addressed within the County's reply. However, to address the specific items listed in the County's reply:

- **Poll Worker Laptops / Sitebook Voter Roll Check-In Devices**
 - Item #11 on the original subpoena⁵ states, "forensic image of computers/devices used to work with voter rolls". This was not provided.
- **Backup Dominion EMS Server**
 - The county states that the Backup Dominion EMS Server was not in use. Logs show regular backups conducted of the election database throughout the election. Normal practices would dictate that these would periodically be loaded onto a backup server to confirm the backups integrity. By definition, this is how a backup server is used and it was part of the election.
 - Item #3 on the original subpoena⁶ states, "For the November 2020 general election in Maricopa County, Arizona", "Hardware and Forensic Images of Election Servers...". The backup EMS Server was not provided.
- **Ballot-on-Demand Printers & Accessible Voting Devices (ICX)**

⁵ <https://www.scribd.com/document/531671852/SUBPOENA-January-12-2021-NEW-Senate-Sub-to-Maricopa-County>

⁶ <https://www.scribd.com/document/531671852/SUBPOENA-January-12-2021-NEW-Senate-Sub-to-Maricopa-County>

- Item #1 of the original subpoena⁷ states “The ballot tabulation and processing equipment from each polling place and tabulation center”.
 - Based on the sentence “processing equipment” that is different than “ballot tabulation”. It’s unclear what else this could be referring to besides Ballot-on-Demand Printers and accessibility Ballot Marking Devices since those are the only other devices that process ballots at a polling location.
- Item #10 of the original subpoena⁸ states “Election Systems and Software”, “Ballot on Demand – BOD printing system”:

1.9 Internet Connections & Cyber Security practices

The County continues to repeat the claims that there was no way any of the systems could access the internet, to abdicate all responsibility to other parties for the County’s failure to properly maintain the security of election systems, and to purposely misdirect on all other legitimate findings of the audit. As usual, the County fails to cite a single piece of evidence to support their opinion.

1.9.1 INTERNET CONNECTIVITY

The County’s response does not state that the systems were never connected to the internet; but always seems to address this issue in the present tense indicating that the election system is not currently connected to the internet; and then cite the two “forensic audits” conducted by the County that proved at the time of their “audits” there was no evidence of internet activity. CyFIR’s analysis never stated that the systems were always connected to the internet, but simply stated that there are distinct periods of time where internet connectivity can be validated. As a result, while on the surface it looks like the County is countering the claims in the audit report; in fact, their response appears to be a misdirection.

CyFIR utilized a tool called HstEx v4 from Digital Detective to review the hard drives of all the affected systems for artifacts of internet activity. This tool both looks at the allocated space, which is the normal file structure you see on a system, and the unallocated space, which is what shows up on your system as “free space”. When you delete a file on your file system the space that file occupied is shown in the computer as “free space”; but the file itself is still fully intact on the file system until the computer puts some other file in the space occupied prior by that file. In this way the tool looks at both normal files and deleted files.

HstEX v4 identified and extracted all internet history into a .hstx file that was analyzed using the Digital Detective NetAnalysis v2 tool. In addition to the URL that was navigated to, this data includes a visits column. Per the tool documentation⁹ and basic forensic analysis, the visits field is ONLY populated when a URL is actually visited and does not populate when a web page cannot be resolved. This visits column can be seen in all of the following screenshots of the tool output, and clearly refutes the claim that the machines never had a pathway to the internet.

Figure 6 - EMS Client 3 Connections

1.9.1.3 REWEB1601 AND REGIS1202 CONNECTIONS

The Maricopa County Board of Supervisors represented to the public and to the auditors that none of the election systems were connected to the internet. The Maricopa Board of Supervisors did not provide any qualifying statements to the auditors at the time of equipment delivery, nor did they provide a network diagram explaining that the REWEB1601 and the REGIS1202 servers were connected to the internet. The auditors subsequently took the Maricopa Board of Supervisors at their stated word and reported the internet connections to each of these servers to the Arizona Senate. The auditors appreciate the Maricopa County Board of Supervisors admission that these two servers were indeed connected to the internet. The Maricopa County Board of Supervisors stated that two federally certified Voting System Testing Laboratories independently reported that the systems were not connected to the internet. It is not uncommon for firms to miss internet artifacts that may exist in the unallocated and allocated space of a system.

1.9.2 SOFTWARE AND PATCH MANAGEMENT

The County's neglect of the software, patch management, and virus scan updates violates all solid principles of Cyber Security and demonstrates a negligence in protecting the integrity of voting system. Their attempts to blame the Election Assistance Commission (EAC) is disingenuous at best and simply demonstrates they're failure to take responsibility and control of their election systems, and instead attempting to delegate all responsibility to the voting machine vendor.

The EAC clearly has a process for "de minimis changes"¹⁰ to account for Operating System level patches and changes to trusted builds, and advocates those critical patches be applied¹¹. This advice is further enforced by the Cybersecurity & Infrastructure Security Agency¹² (CISA), and the Center for Internet Security¹³ (CIS). Nowhere in any documentation is there any indication that virus scans update would somehow negate the certification, yet those were also not applied.

The fact that the County failed to recognize the risk of having out-of-date software and never requested the voting machine vendor to go through the simple process to get patches approved, as is required by the "Warranty" section of the County's contract¹⁴, nor did they choose to move to a later version of the voting system software that has later approved patches; does not somehow make their system secure. The County failed to implement basic Cybersecurity hygiene. This should be acknowledged, and policies put in place to make sure this never happens again.

1.9.3 CREDENTIAL MANAGEMENT

The County's response related to credential management is beyond misleading and goes into the realm out outright lies. They state, "To access each tabulator, an operator needs a series of two passwords and a security token (key). Passwords used to access the election program and to tabulate ballots are changed prior to each election." This statement only applies to the ImageCast Precinct 2 (ICP2) tabulators which were ONLY used on election day and doesn't apply to ballots tabulated on the HiPro or the ImageCast Precinct devices. To give perspective, the ICP2 only accounted for 7.9% of the vote, while the other tabulators accounted for 92.1% of the vote. The devices that tabulated 92.1% of the vote, as well as the systems utilized to generate the output for the official certified results; were where the problems outlined within the audit report were found.

To be more specific, the credential management finding is specific to the username and passwords required to access the EMS server, the EMS workstations, the Adjudication workstations, the HiPro scanners and the ImageCast (ICC) Workstations. Accessing these systems did not require anything but a typical computer username and password combination. The usernames/accounts of these systems were not assigned to specific individuals, but rather were shared between various people. The passwords for these accounts were created during the installation of the Dominion software on 8/6/2019 and were never changed up to the point where these systems were delivered for the audit. Furthermore, in complete disregard to all standard security practices, the same password was used for ALL user accounts on ALL of the EMS, EMS Client, ICC, HiPro, and Adjudication systems. To be clear, if someone knew the password to a single user account on one of these systems that individual would know the password to the admin account on any of these systems.

¹⁴ <https://www.scribd.com/document/533751776/Maricopa-County-Elections-Tabulation-System-Contract> (Page 34)

1.9.4 LOG MANAGEMENT

The Maricopa County Board of Supervisors stated the following in response to the Audit report concerning the County's failure to preserve the operating logs on the EMS server "The system automatically logs all actions taken on the equipment. These logs are configured according to factory settings and have a storage limit of 20 megabytes." This statement ignores the crux of the finding.

1.9.4.1 FAILURE TO PROPERLY RETAIN LOGGED DATA

Maricopa county had full administrative authorities over the configuration and maintenance of the logging functions and the log retention duration operations. To claim that the reason the log data was not retained because the log size default setting was only 20MB is disingenuous at best when the county had the full control to properly modify this setting to ensure that the logged data was properly retained. The retention period for these log artifacts should have been for twenty-two (22) months but wasn't.

1.9.4.2 INTENTIONAL EXECUTION OF SCRIPTS TO DELIBERATELY ENSURE THAT LOG ENTRIES WERE NOT RETAINED

The response by Maricopa County does not address the fact that a user leveraging the emsadmin account deliberately and purposely executed a script that checked the accounts for duplicate passwords 38,478 times. This deliberate execution of the script occurred over three days, specifically on 2/11/2021 there were 462 log entries overwritten, on 3/3/2021 there were 37,686 log entries overwritten, and on 4/12/2021 there were 330 log entries overwritten. Given that the Maricopa County knew that the setting on the log retention was limited to 20MB, the act of executing these scripts had the effect of deliberately ensuring that the Windows security logs covering the dates of the general election would not be available for review.

Date: Tuesday, November 30, 2021 8:57:35 AM

Good Morning,

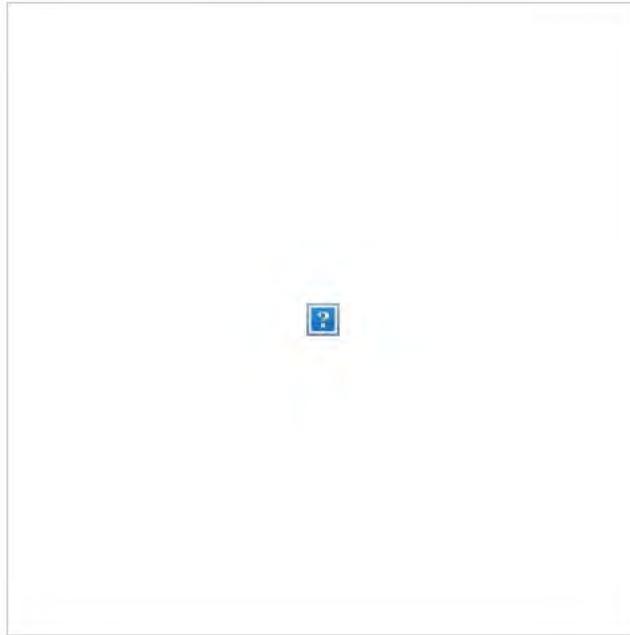

My name is Mike Easterly and I am a native Arizonan who worked with the senior leadership team on the 2020 election audit. There is significant information available that was not included in the official audit report. The information is available in the form of a supplemental report prepared by leadership that participated in the audit from start to finish. Ultimately, we would like to get this info to AG Brnovich as we believe it could save him valuable time with his investigation. I have emailed his office today as well. If you're interested in helping us get this information to the appropriate people to aid in the investigation, please let me know the most efficient way of getting the report to you. I can also be contacted by cell phone at 602-300-8041. Thanks.

[View this email in your browser](#)

Hi Patriot,

I've been a hard-charging legislator in Denver since 2020. Before that, I was an intelligence officer in the US Air Force for 32 years.

So very few things surprise me.

I've been labeled an insurrectionist for the "crime" of attending the peaceful rally in Washington DC on January 6th. That's no surprise, coming from socialist Dems on the Colorado House floor.

I've been labeled a "conspiracy theorist" for checking out the Arizona audit last summer. Also no surprise, coming from the left-wing mockingbird media.

Some have called me "Raging Ron" for heated battles in the Colorado General Assembly. I'm not surprised: I fight harder than others.

On the campaign trail for US Senate, I've not been surprised by the efforts of my Republican opponents to sound conservative.

After all, the GRASSROOTS of our party have power, and believe in traditional, conservative values.

But I'm the only US Senate candidate currently fighting for those values.

I'm in Denver, RIGHT NOW, pushing back on the socialist agenda of the current Democrats. And yes, it IS socialist: Dems voted for Bernie Sanders 36% to Joe Biden's 23% in the 2020 primary. Colorado Dems would rather be *further* left than we are right now.

My voting record in the Colorado House proves my mettle. The other Republicans in this U.S. Senate race simply don't have a record you can compare to mine.

We are all learning our party pretends to be more conservative than it truly is. I'm not surprised. But I am disappointed. Aren't you?

If so, please go to my website now and sign up to be a leader for me at your Republican Caucus in early March. Go to:
<https://www.hanksforcolorado.com/support>

The Colorado Republican Party doesn't want to talk about Election Integrity. You and I do.

But I've done more than talk:

I've put in legislation to fix corrupted voter rolls and voting processes.

I've put in legislation to ensure our ballots cannot be copied or counterfeited.

I was the first to sign on to a lawsuit against Colorado's Secretary of State, a Soros-funded partisan hack.

I have met with other states' representatives to find best practices we

can implement at the STATE level – because the states run our elections, not Nancy Pelosi in DC.

I'm not surprised this group of candidates have skirted the issue of Trump's reelection in 2020. The power-elite of the Republican Party and political operatives advise them not to talk about it.

The National Republican Party wants to forget about 2020. You and I will not.

Here's what I say: Trump won in 2020. Fraud was rampant. Our elections are not secure.

It's no surprise that makes me a political outsider. Excellent! I don't want the establishment's money, and I won't bend to their bad counsel or threats. The truth is, we don't need big money to win our GRASSROOTS Caucuses and Assemblies. Contributions will come from conservatives when we take on the big-money candidates in the primary, and when we take on leftist Michael Bennet in November 2022.

Meanwhile, I'm fighting, RIGHT NOW, for our 2nd Amendment. I introduced a bill to revoke permits to carry a concealed firearm. Open carry is legal in Colorado, so why should we have to pay the government for a permit to protect ourselves if we are wearing a jacket? It really is that simple.

I'm fighting, RIGHT NOW, to restore traditional education through education tax credits. And as a US Senator, I will fight to abolish the US Department of Education – so parents can decide their children's curriculum at the local level. We don't need a weaponized national government calling us terrorists or threatening to withhold money from school systems if we do not submit. Eliminate DOE. Bring parents' rights back to Colorado.

Maybe this will surprise you: I've been a fracker, and I've done some truck driving. I know what energy independence does for this nation, and I know what trucking men and women do for our way of life. We must Restore Energy Independence, and we must Restore American Manufacturing. Small businesses and truckers will Restore Supply Chains – as soon as we get the federal government back under citizen control.

The bottom line is simple: I am THE conservative in the race for US Senate. I am the ONLY one with a voting record you can check on the issues that matter to you. I am the ONLY one fighting to Restore Election Integrity. I am fighting the establishment, the Democrats, this co-opted, partisan Secretary of State, the media lies, and every political effort that threatens our great nation. We are in multiple crises, and I need your help to Re-Secure America.

I need you to go to your caucus the first week of March. I'm asking you to become a delegate at the county level, then at the state level. When the state assembly meets on April 9th in Colorado Springs, I'm asking you to vote for me. We can flood the assembly with conservative delegates, and change the party into a conservative bastion of traditional values.

Jump in! You will want to be a part of this battle. America needs you!

Join us here: <https://www.hanksforcolorado.com/support>

God Bless America!

Respectfully,

Ron

P.S.

Please ask yourself, if we can't trust establishment Republicans to fight for Election Integrity against the radical cheaters currently in charge, how can we trust them to fight for us on ANY of the conservative issues we care about?

America needs to fight for Election Integrity or nothing else we do will matter.

The choice is absolutely clear: I'm the ONLY candidate in this race who is fighting for fair elections.

Be it pro-life leadership, stopping illegal immigration, or fighting mask and vaccine mandates, I'm not afraid to tell it like it is to save our country.

As a 32-year military combat veteran, I've learned there is no need to sugar coat the truth. The survival of our country is at stake. We need to replace the entrenched politicians with citizen-legislators.

That's why I don't mind asking you directly to become a leader in early March at your neighborhood Republican Precinct Caucus.

If you've never gone before, this meeting is crucial to help me secure the Republican nomination for US Senate, then move forward to defeat Democrat Michael Bennet in November.

Caucus will take only an hour or so. It is the process that allows Republicans like you to become delegates, or to vote for delegates to the Republican State Assembly on April 9th. On April 9th, Republicans from across the state will come together to pick the Grassroots' nominee for the primary election in June, who then will go up against any candidates who decided to petition onto the ballot.

This is winnable. Joe Biden is an abject failure and disgrace, and Michael Bennet follows Joe's lead.

Colorado is ready for change. In fact, Donald Trump won deep-blue Pueblo County in 2016 (and probably in 2020). Blue-collar America realizes after years of government destruction of the American family that the Republican Party will be their best bet for a better future.

And I am a blue-collar fighter – first as an enlisted man who joined the service straight out of high school, then as a frack hand and a truck driver in the oilfields of North Dakota. I am NOT a monied political wannabe that seeks the prestige of higher office. Running for US Senate is a duty, an extension of my military service, not some career advancement.

Please, turn out for your precinct caucus in the first week of March, and bring a few friends.

Let me know you've signed up by contacting me at:

<https://www.hanksforcolorado.com/support>

Thank you for joining the fight.

Respectfully, Ron

Subject: Best System of Government in the World
Date: Tuesday, March 8, 2022 11:51:49 AM

Good Morning, Patriot

Did you see your **Biden Surprise** on the way to work?

Overnight, gas crossed \$4 a gallon and diesel is near \$5. Don't blame the fuel stations – this lands on Joe Biden's desk (and you can lump [Jared Polis](#) in there, too).

The solution to our energy problem is literally under our feet, but the demented **fraud** in the White House would rather beg for more oil from the Middle East. They've said NO. Just another day's Failed Foreign Policy for 'ole Joe – after his anemic apathy encouraged Russia to invade Ukraine and his disgraceful abandonment of Afghanistan emboldened terrorists and tyrants worldwide.

Breaking News: Biden has decided to stop importing Russian oil to “inflict further pain on Putin.” It does raise the question: If Biden understands impacting Russia's oil industry damages their economy, then why did Joe decide on the first day of his regime to damage **American** oil production?

And make no mistake: China is watching how their cash-influenced catatonic meat-puppet in the White House is responding to – or sleeping through – the situation in Ukraine. The Chinese Communist Party is looking very hard at any chance to invade Taiwan, and while Joe eats ice cream and wanders off in Delaware, our supply lines from Taiwan are at **GRAVE risk**. Most of our semi-conductors come from Taiwan.

If Communist China wants to become the world's economic super-power – and they do – they need only take over Taiwan or disrupt manufacturing or supply lines. They have been building their military to do exactly that. If Communist China succeeds, America will be in a box that we cannot climb out of for years.

America CAN Restore Energy Independence

For the record, I fracked in North Dakota. I hammered iron on the drill sites with Blue Collar America. I still

have my truck driving license. I tell you now, unequivocally, America can Restore Energy Independence in a matter of months. **Blue Collar America built this country**, and the hard-working men and women can rebuild it – as soon as we bring Biden’s regime to heel.

When we Restore Energy Independence, we MUST Restore Manufacturing in America. We must not be at risk of supply line disruption. (Did you know most of our pharmaceuticals come from China?) And we must Restore American Agriculture – farming and ranching. (Did you know we raise hogs in America, ship them to China for processing, and China ships them back to us? What idiot signed off on this plan that puts our food supply in the hands of Communist China?)

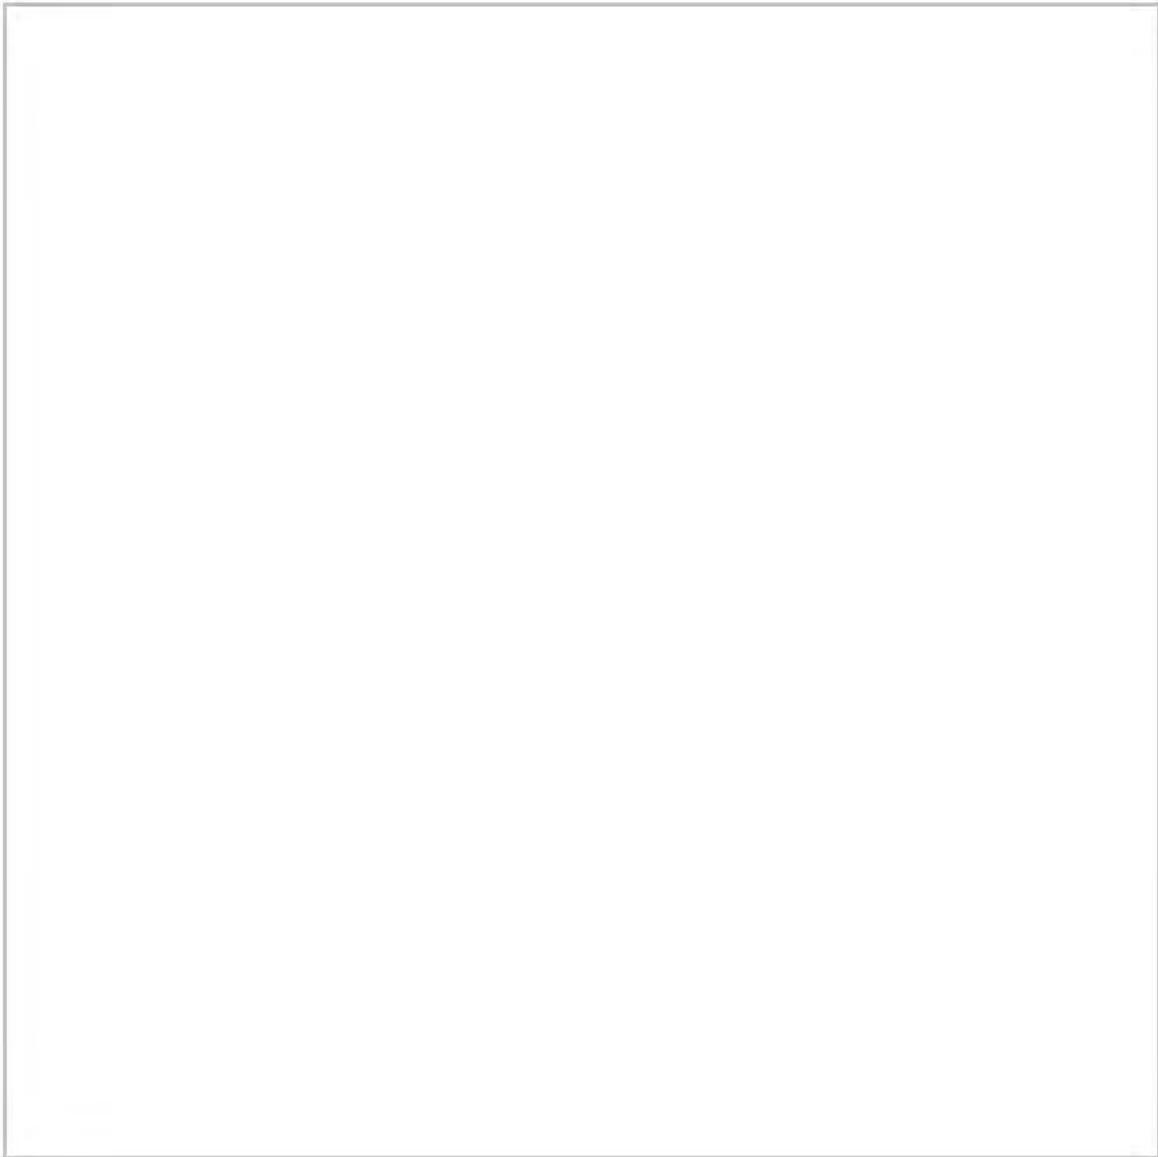

Meanwhile....

Colorado’s esteemed flunky senator, Michael Bennet ignores the destruction Biden brings down on America. While Bennet baselessly calls me and hundreds of thousands of January 6 attendees of the DC Rally “insurrectionists”, he has nothing to say to Joe Biden about the wanton destruction of our economy. (In the spirit of bipartisanship, I will note here that Mitch McConnell also baselessly called us “insurrectionists”, so I place him in the same category as Michael Bennet – a liar.) Liars, Frauds, and Idiots. Throw them ALL out. We are in a battle for our nation.

Join our fight, let us pray we can win it, and May God Bless Our Remarkable, Beloved America,
Ron

Subject: Election fraud in 2021?? Report it!!
Date: Wednesday, October 20, 2021 10:31:51 AM

[View this email in your browser](#)

Election Day is now less than two weeks away.

A majority of Americans believe there was

election fraud in 2020. I have no doubt there was. Even with Fake News pushing their false narratives, the truth about the fraud has broken through the veil of lies.

This 2021 election cycle is at risk for fraud as well, and any evidence we can capture from this election may provide significant intelligence on the intent and operations of the criminal fraud network. There are multiple scenarios that could be revealed, and any evidence we gather will tighten the noose.

Ballots have been mailed. If you receive ballots for anyone other than the registered voters at your household, secure the ballot – don't throw it away – and reach out to my team at 719 401 0486.

Discuss the situation with the volunteer responding to your report, then determine how to handle the ballot so it will not be misused.

This is an easy way for honest citizens concerned about election fraud to help America clean up the system and ensure

every valid vote is counted. No eligible voter should ever be disenfranchised by irregularities or fraud.

In Liberty & In God We Trust,

**Ron Hanks

Colorado and Virginia Election Results Show Michael Bennet in Trouble and the Need for Full Forensic Election Audits

Penrose, Colorado – Today, Colorado State Representative Ron Hanks, a Republican serving State House District 60 and candidate for U.S. Senate released a statement on last night's historic election results:

“Colorado’s across-the-board rejection of bigger government shows we do not trust our current elected officials to spend one more dime on their corrupt schemes. Michael Bennet’s reign of big government waste and abuse in the U.S. Senate is coming to an end as voters are clearly ready to hold him accountable in 2022.

Likewise, as the results from another swing state Virginia show, voters from all walks of life are rejecting the failed leadership of the corrupt Democrat Party in favor of authentic Republicans who will deliver on reforms that return government power into the hands of The People, where it belongs.

While the initial results from Colorado and Virginia are encouraging, they are not an indicator our elections are secure. The new governor of Virginia and Gov. Polis should conduct an immediate full forensic audit of the 2021 elections and compare them to a full forensic audit of the 2020 elections to further highlight any possible fraud in either election.

We cannot fix America – and we will not be America – without Election Integrity. We must conduct full forensic audits and voter roll canvassing. Nothing else will matter if the will of The People is nullified by fraud. Our number one goal must be to fix proven election fraud in Colorado and America and hold every election criminal accountable,” concluded Hanks.

Subject: Fwd: Meet Michelle Malkin?
Date: Sunday, March 27, 2022 12:44:09 PM

Join me to support Dave Williams and meet Michelle Malkin...

Hi Patriot,

Wanted to let you know about an exciting event happening March 30th at 6pm in Colorado Springs.

Michelle Malkin will be hosting a fundraiser for Rep. Dave Williams for US Congress.

I fully endorse Dave and ask that you join me at this event and support his campaign.

Lauren Boebert needs back up in Washington D.C. and, quite frankly, so will I after we defeat Michael Bennet in November.

Help me make sure that Rep. Dave Williams is elected so we can make certain there's a powerhouse team fighting for all of Colorado against the Washington insiders.

Event details are below. Please spread the word!

For Freedom,

Ron

P.S. If you just can't make it, please still support Dave's campaign and please donate to our campaign today. We need your help to keep fighting hard to save America.

Please give here: <https://secure.anedot.com/hanks-for-colorado/donate>

Subject: Is YOUR Caucus Today?
Date: Tuesday, March 1, 2022 2:10:10 PM

Good Afternoon Patriot!

Caucuses start today in many counties in Colorado. Other counties will hold theirs over the course of this week.

Caucus meetings last about an hour or two.

Going to caucus and becoming a delegate is the single most important thing you can do to impact the direction of the GOP and our nation.

When grassroots conservatives attend caucus, become delegates or vote for delegates who believe in:

Election Integrity

Securing our borders

Restoring American energy independence

Restoring manufacturing in America

Restoring traditional education

We Will Win!

Here's what you can do to find out WHEN and WHERE your caucus is:

Go To: <https://caucus.cologop.org>

[Colorado Republican Caucus Locator & Pre-Registration \(cologop.org\)](https://caucus.cologop.org)

Enter your address and zip code.

Verify your address

Select your name

Enter your info to PRE-REGISTER

The confirmation will provide the time and location.

Our nation is on the brink of disaster. This is YOUR day to turn the tide. Be an aggressive leader for conservative values.

I'll see you there.

Respectfully,

Ron Hanks

Join me to support Dave Williams, and meet Michelle Malkin...

Hi Patriot,

Wanted to let you know about an exciting event happening tomorrow, March 30th at 6pm, in Colorado Springs.

Michelle Malkin will be hosting a fundraiser for Rep. Dave Williams for US Congress.

I fully endorse Dave and ask that you join him at this event and support his campaign.

Lauren Boebert needs backup in Washington D.C. After working with Dave in the Colorado House, I know he will stand with her – just as he stood beside me, and just as he stood for the **unborn** in our record-breaking floor fight this session.

Help me ensure Rep. Dave Williams is elected – so we will know we have a powerhouse team fighting for ALL of Colorado against the Washington insiders.

Event details are below. Please spread the word!

For Freedom,

Ron

P.S. If you can't make it, please support Dave's campaign (see his email, below).
He needs your help, and I'd be grateful for your help as well.

Together, we can assemble a team of tireless fighters in Washington DC.

Please Donate here: <https://secure.anedot.com/hanks-for-colorado/donate>

Hello Patriot,

I hope you saw what happened Tuesday. You would have loved it.

The battle this week on the Colorado House floor was a great example why we need more grassroots, real Republicans like me fighting for our rights, limited government, and conservative values.

As you will see from the Gazette article below, we had radical Democrats enraged. And we had some weak Republicans leaving the floor to avoid standing up for fair elections and full transparency. It seems they would rather hide than fight establishment insiders who want to keep corrupted election processes in place.

It's a pattern: Weak Republicans will say anything to GET elected, then sell-out or fall prey to newfound friends who invite them inside the inner circle.

That's not me. I'm not there for power, ego or prestige. I'm there as an extension of my military service to this nation. We've got a nation to save. And as my proven record of conservative leadership shows, I won't back down or give an inch to the radical Dems, and I won't let soft Republicans get away with selling

us out.

It's not fun, but that's my mission as I see it. Now, my battle has moved to the US Senate. Joe Biden is a failure, and we need the US Senate back in the hands of middle-class America, not the power-elite, in order to defend against further disasters and embarrassments, record inflation and empty shelves.

I'm asking you to help me. Attend your precinct caucus on March 1st. Run to be a State Delegate as a supporter of this campaign, Ron Hanks for US Senate. The campaign has my name on it, but it is much more: It is a grassroots juggernaut that has awakened and mobilized.

Help me get on the Primary Ballot by being a Delegate for me at State Assembly on April 9th.

Please go [HERE](#) to sign up. Let me know you will attend your Republican Precinct caucus on March 1st. The link is: <https://www.hanksforcolorado.com/contact>

You will want to be a part of this battle. We can win it.

Thank you for doing all you can to help our campaign Restore Colorado and Re-Secure America.

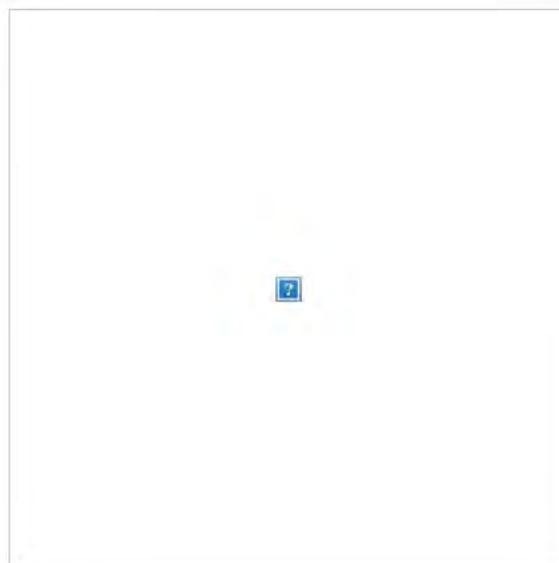

Thank You, and May God Bless America,

Ron

P.S. I have put my sweat and treasure into this campaign. In addition to signing up to attend your precinct caucus, I'd be grateful if you would donate a few dollars to the campaign. I will use the money wisely in this fight against the monied establishment.

The link is: <https://www.hanksforcolorado.com/support> Thank you again.

Colorado state Republicans say Jan. 6 protesters who didn't storm U.S. Capitol should be commended, not vilified

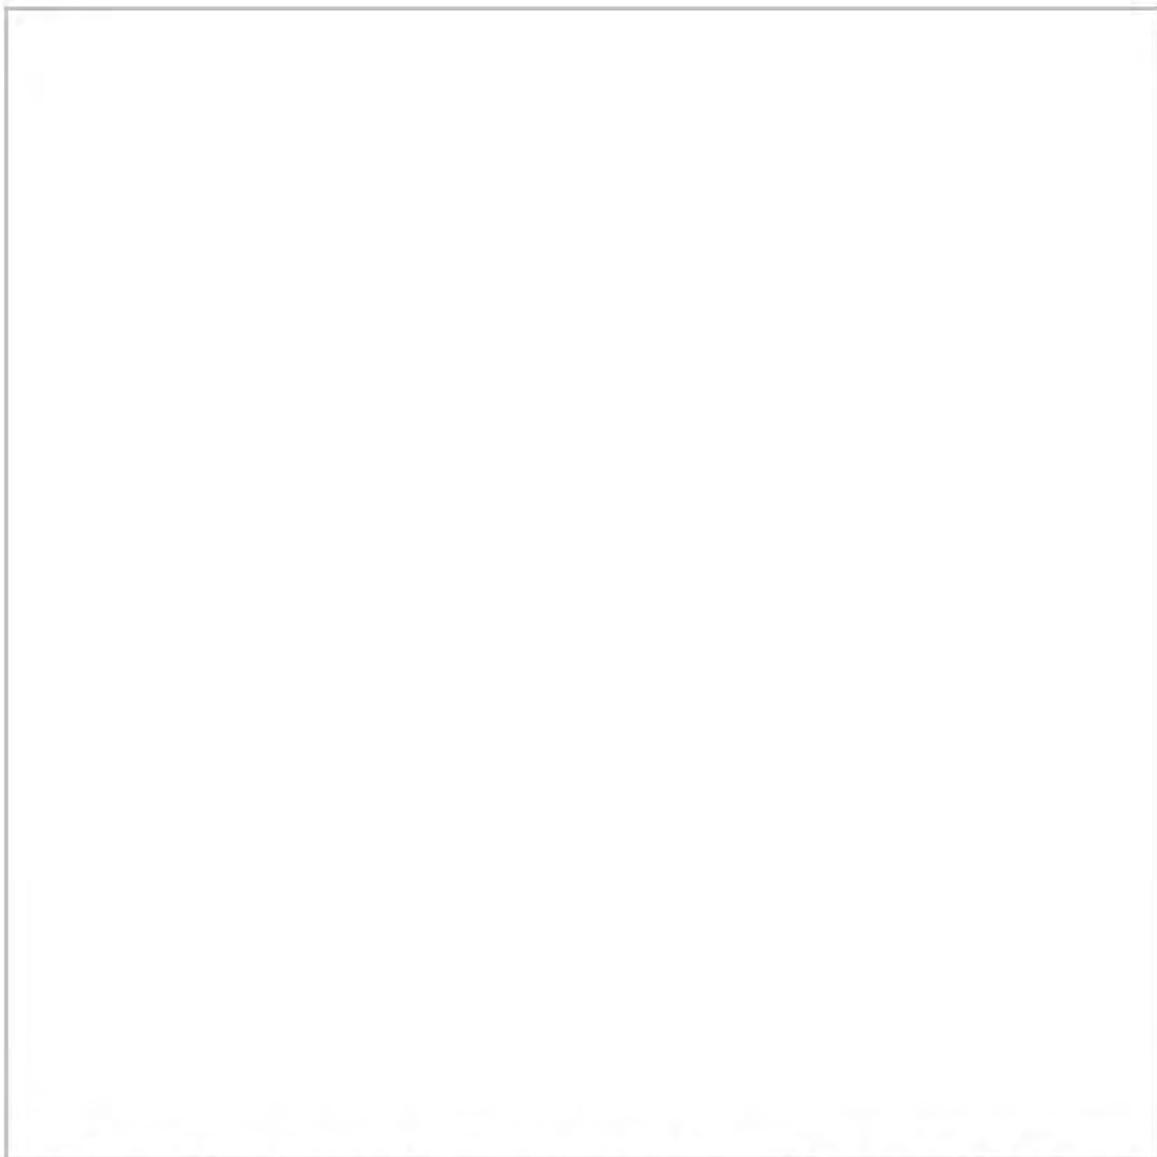

In a move that restoked the controversy over the the 2020 election results and the attack on the U.S. Capitol, Republicans on Tuesday pushed – and Democrats rejected - language thanking those who protested at the Capitol on Jan. 6 last year.

Rep. Dave Williams, who sponsored the language, sought to differentiate those who stormed the U.S. Capitol and those who didn't, saying the latter exercised their First Amendment rights and should be commended instead of vilified.

"I've heard many people disparage Americans and taxpayers who have very legitimate concerns about what happened in the 2020 election, and they're brushed aside. They're brushed off. They are called conspiracy theories or they are labeled tinfoil-hat conspiracy theories. That's unacceptable. We serve these people. We represent them. They're the boss,"

"It's only appropriate that we all could agree that those who didn't break the law, those who acted honorably, we should thank them even if we disagreed with them," he added.

Williams' amendment specifically identified Rep. Ron Hanks, R-Cañon City, thanking him and "the millions of other Americans who joined him on January 6, 2021, to exercise their unalienable rights, as enshrined in the First Amendment to the United States Constitution, to speak, peacefully assemble, and seek redress from their government in order to secure our elections and protect the sacred right of every lawful vote to be counted."

Rep. Ron Hanks of Canon City outlines the reasons for calling for a "no confidence" vote on GOP Minority Leader Hugh McKean on June 8, 2021.

Williams told his colleagues he has heard "terrible things" being said about Hanks and how "he's an insurrectionist."

"That's a bold-faced lie," he said.

Hanks has been at the center of controversy at the statehouse after he joined thousands of then-President Donald Trump's supporters at a rally the same day Congress met to certify Joe Biden's election. The lawmaker's presence at the rally sparked an unsuccessful attempt by a Democrat to expel him from the legislature.

He also joined dozens of state lawmakers from around the country last year in signing onto a letter calling to throw out the

results of the 2020 presidential election if enough states can't pass a review modeled on the audit ordered by the leaders of the Arizona state Senate.

That audit of Maricopa County's votes confirmed Biden's victory in that state. But those who conducted it raised objections, and supporters insisted enough of the votes they questioned could overcome Biden's lead.

Williams offered the language via an amendment during a debate over a Democrat-backed resolution urging Congress to pass comprehensive voting rights legislation to counteract actions by several states members of the majority party believe have made it more difficult for voters to cast a ballot.

The underlying resolution - Senate Memorial 1 and House Resolution 4 - argued for the passage of Freedom To Vote Act and the John Lewis Voting Rights Advancement Act, and also reasserts the "validity of the 2020 presidential election results as legitimate and verified."

In the Senate, Democrats evoking apartheid-era voting restrictions and warned of a dire end for America's democracy if, they said, Congress doesn't intervene to effectively undo laws they characterized as diminishing people's ability to exercise their right to vote.

In the House, Republicans countered with a series of amendments, which all failed. They included language aimed at preventing dead people and non-citizens from voting, provisions Democrats noted are already in state law.

Another amendment called into question "the legitimacy" of Biden's presidency; encouraged states to conduct their own audits; and, urged the "decertification of election results in states where election fraud is uncovered that would be sufficient to have changed the election outcome while standing with the 45th President of the United States, Donald J. Trump, in his righteous efforts to fight for election integrity."

The same amendment offered support to Mesa County Clerk and Recorder Tina Peters, who "upheld her oath of office by preserving election records and now faces unjust persecution and prosecution" from Democratic officials." Secretary of State Jena Griswold on Tuesday filed another lawsuit against Peters, this time in an effort to keep the embattled clerk from overseeing the 2022 elections.

While it highlighted divisions between Biden and Trump

supporters, Williams' amendment also demonstrated the sensitivity with which Republicans approach the 2020 elections, and it confirmed intra-party divisions over how to view the events of Jan. 6, 2021.

The amendment received the backing of 15 his party mates, but House Minority Leader Hugh McKean wasn't among them.

McKean, in fact, advocated for the amendment's defeat - albeit for technical reasons.

The amendment contained two parts - the talked about Jan. 6 and second point sought to ensure that dead people are removed from the voter rolls and that those who are unlawfully present in the U.S. cannot vote in Colorado's elections.

McKean tried to split the two points.

"I would suggest that this motion is flawed in the fact that we are trying to discuss two very different things in the same passage," he said.

The Democrats' resolution, which ultimately prevailed, took aim at restrictive voting laws adopted in Georgia and Texas, cited the Jan. 6 riot, and said "falsehoods and conspiracies regarding the integrity of the 2020 election have run rampant in our media and public discourse."

It concluded by calling "on the United States Congress, and specifically members of the United States Senate, to pass comprehensive voting rights legislation to protect the fundamental right to vote, which has been the cornerstone of our democracy since the founding of our republic."

Hanks' views on the 2020 elections, a centerpiece of his U.S. Senate campaign, were on full display on Tuesday.

After praising King and civil rights leaders from the 1960s, Hanks dove into "election integrity." That featured a defense of people who, like Hanks, were in Washington, D.C. for the Jan. 6 riot but did not participate in the violent attack on the U.S. Capitol.

"I am a little offended for some of the people I met in Washington, D.C.," Hanks said. "These people did nothing wrong. They were afraid for their country."

McKean, in his final comments, acknowledged that President Joe Biden won the election in 2020, just as President Donald Trump won in 2016.

The debate so vexed House Speaker Alec Garnett, who shouted, "In Colorado we cannot remain silent!" He added: "The choice is clear between the two groups of elected representatives in this building. You have a choice. Your ability to vote is under threat."

As he held up one of Republican amendments, the speaker said, "In these words ... America, listen up. Your ability to vote is under threat! Pull the records and look at who voted for those amendments!"

[View this email in your browser](#)

The Certification of Fraud – One Year Later

By Ron Hanks - January 5, 2022

As the first anniversary of January 6, 2021 arrives, there is a lot to reflect upon. Indeed, much has happened since Joe Biden's handlers led him into the White House and he began the assault on America according to their plan. Americans immediately endured rising gasoline prices, unaffordable home

energy costs, rampant inflation, and later, the national nightmare of a disgraceful exit from Afghanistan. Only an idiot and an agent of a foreign power could wreck a strong economy and the worldwide stature of the United States in such a short time.

Joe Biden was that idiot. His Chinese masters in the Chinese Communist Party were so pleased they paid more for Hunter Biden's color-by-number "art" than the market price for a newly-found Picasso.

Evidence of fraud – beyond what the entire world saw on election night in 2020 – has compounded. Court cases have been filed (see, Hanks, et al vs. Griswold, and others). Republicans and Democrats have evaluated the facts, and reputable pollsters report a majority of Americans believe there was serious fraud in 2020. That majority will be a super-majority by the summer of 2022.

A friend sent me the article I wrote for a local, conservative newspaper the day after the Trump Rally at the Ellipse. I will include it here. What I find remarkable is how much the lying media's account and the federal regime's story has had to change after revelation of facts extracted from an arrogant, infiltrated government.

My report and observations of that day have stood the test of time. A note to the fake journalists: It is an easy thing to achieve, if they report the truth – not the pre-built talking points of their media masters.

The federal government has had to concede it had informants and agitators at the events, and we have videos of them encouraging people to enter the Capitol, and those recording it questioning the motives of those instigators.

The weaponized federal government of the Biden Regime and the mockingbird media thought they could control the story and brand Patriots as rioters and cop killers. Turns out, the government has blood on its hands, while it continues to hold Americans in lockdown for entering a building that was not properly secured, and where people were waved into the building by "security" personnel. Fake media can't deny it: the evidence is on dozens of videos.

They thought We – the American People – would have quit by now. We are

only getting stronger. This year will be hard for the next few months – with the same old lies and many new ones from Biden and the trash media. The damage they wreak will be heartbreaking. But it will turn, and it will end quite differently. Have Faith.

In Liberty, and May God Bless America,
Ron Hanks

www.HanksForColorado.com

(Originally printed in the Fremont County Crusader, Friday Jan 8, 2021)

RON HANKS FOR HOUSE DISTRICT 60

THE TRUMP RALLY

Dateline: January 7th, 2021. Written in Harper's Ferry, West Virginia, where abolitionist John Brown made his assault on slavery in 1859 – which many consider the point of origin of our American Civil War, 1861-1864. Last week, I made the decision to head to Washington D.C. for the Trump Rally on January 6th. My motivation was to get a read of the nation's Trump supporters, to get in conversations with fellow Americans, to get a sense of what may happen next to combat this stolen election. Let me say, the two events of yesterday – the Trump Rally, and the assault on the Capitol, seem like they originated in two different hemispheres. The Trump Rally on the Ellipse, between the Washington Monument and the White House, was several hundred thousand friendly, polite Americans from all demographic groups and ages. I spoke at length with a young woman from Minnesota, originally from Somalia, raised in a refugee camp in Kenya. She came to America and was warned in the public school systems that Republicans and conservatives were racists and full of hate. She's learned otherwise, and she was a delightful example of the love of America we share among our fellow citizens. There was a group of Poles from Chicago who love this country,

support what Trump has done for it, and who lived under communism in their native country. They've seen once before the road we are now traveling – the distorted media, the limits on freedoms. They are afraid for our country, and know what they are talking about.

Obviously, I cannot know the mind of every member of a crowd so large. But those who attacked the US Capitol were different than those I saw at the Ellipse. Very few people at the Ellipse were wearing masks. Those at the Capitol were wearing bandanas, like the Antifa bandits of the summertime riots. There were many elderly folks and couples at the Ellipse. At the Capitol, the perpetrators were mostly young males, and many of those had helmets, some had gas masks. I saw no one at the Ellipse with any such equipment. When the Trump Rally at the Ellipse ended after 1 p.m., there was a slow movement of the crowd toward the US Capitol, with intent to stand outside it while election certification was on-going. President Trump indicated he was going to make the trip with us. My group walked up the Mall and got there ahead of about 90% of the group, but we were surprised to see people already on the scaffolding on the west side of the building, waving flags. It seemed uncharacteristic of the peaceful, polite orderly crowd I had just spent the last 7 hours with.

In addition, it was cold in DC. We had all been standing in one spot since 7 a.m. I was stiff, cold, in pain from standing on the hard ground. Those that were scaling the scaffolding and running up and down the steps seemed much fresher than those of us migrating up the Mall to the Capitol.

It seems unlikely to me President Trump would be part of a group that intended to assault the Capitol. It seems more likely that there were people who intended to blend in to the group, then create mayhem and blame it on Trump supporters.

The video I watched later that evening showed young men sparring with Capitol Police. There seems a dichotomy here: Pro-Trump citizens are generally law abiding, pro-police types, not antagonistic, Defund the Police agitators. The videos seemed to show the dancing, sparring types of rioters we saw all through the summer of 2020 in the BLM/Antifa riots. And there was an interesting note on the language used on the main stream media that evening. The media attributed this violence to Pro-Trump “rioters”. When it was BLM/Antifa over the summer, the media referred to them as “mostly-peaceful protestors.”

The media was quick to mention how these riots would forever sully the legacy of President Trump. To those that have seen a biased media tear down a popular president, it is easy to conclude that was the point of this entire assault. It was not to advance the efforts of Freedom and Liberty, it was to discredit a huge segment of society – in my estimation, a majority of our society.

We are down to the very final options to right a flawed election, and it is possible it will not happen. I had limited optimism the certification would go any differently than it did.

I would assess now the last element of hope to rectify the election fraud is an intelligence drop of irrefutable information, possibly supported by foreign intelligence agencies, such as Israel, possibly the UK and Australia, that proves the collusion of foreign and domestic entities to swing the election to Biden.

Patriots, and all Americans are in a perilous dilemma: This isn't just an economic system or policy priorities we are arguing about. There is a nuclear and national security aspect to this election that must not fall into the hands of foreign enemies or their domestic agents. These are dangerous times. Any entity that would commit this much fraud has dangerous intent, and I do not envision any election in the future that will overcome the power they will accumulate. The State of our Union is GRAVE.

Colorado State Rep. Ron Hanks Launches Campaign for U.S. Senate

Penrose, Colorado – Today, Colorado State Representative Ron Hanks, a Republican serving State House District 60, announced his campaign for U.S. Senate to unseat incumbent Democrat Michael Bennet, who was appointed in 2009.

A conservative stalwart in the Colorado General Assembly, Rep. Hanks is the only Republican legislator running for U.S. Senate and the only candidate with a proven conservative record on the issues.

“The best way to know what a candidate will do in office is by what they’ve already done. Never trust their words, trust their actions. Candidly, when it comes to defeating Bennet, the field of Republicans running in this race is too weak or inexperienced and some are even hostile to our America First values. Solving the crises exploding throughout America demands a leader who has demonstrated a clear pro-liberty record and the courage to stand in the line of fire of an unhinged leftist media and their masters in the Democrat party,” commented State Rep. Ron Hanks (R).

“With Bennet and Biden calling the shots, we’ve seen horrific and self-inflicted disasters hit our country and harm our citizens at home, in Afghanistan and around the world,” continued Hanks.

“We cannot fix America – we will not be America – without Election Integrity. We must conduct forensic audits and voter roll canvassing. Nothing else will matter if the will of The People is nullified by fraud. Our number one goal must be to fix proven election fraud in Colorado and America and hold every election

criminal accountable,” concluded Hanks.

Subject: Thank you
Date: Monday, April 11, 2022 12:16:21 PM

Thank you

Good Morning Patriot,

We enjoyed a restful Sunday to reflect, offer and receive. It was a welcome tempo change after running a grassroots campaign for US Senate throughout Colorado and simultaneously fighting for liberties at the capitol as a state representative.

All of us in this campaign are grateful for the outcome from the COGOP State Assembly on April 9th.

But I am not shocked: It has been obvious to most Americans something is dangerously amiss in our great nation. We saw it manifest on election night in November 2020, and felt it rising for many years before that.

Nor am I elated: The victory at State Assembly was decisive, but it is only the first victory in a series of battles that must be waged.

Yesterday we rested. Now we regroup, mount up and move forward. It is my highest honor to be at the front of this effort, but as I noted in my speech on the floor of the assembly, this campaign is not about me – I am merely the messenger. I am grateful to God and to this team that we could deliver a victory that leaves no doubt where this state and nation stands.

Thank you to all the delegates and alternates who attended the State Assembly. I mentioned before the event it would be a fight you would not want to miss. I trust you found that to be the case.

Thank you to the volunteers who built our network and moved our message forward - to those who have done 1000 things in support of our cause, without asking for recognition.

Finally, thank you to the candidates who ran honest races, went to the core and corners of the state to energize voters and offer vision, positions, and perhaps most importantly, a conduit to get involved in our Republican process.

We have the best system of government in the world. We have NO desire to undo it. But it is filled with bureaucrats who have overstayed their welcome, and with corrupt career political tyrants who believe they are the self-appointed CEOs of the largest economic force in the world – our government. They grow our government to further their own power and influence – NOT for the benefit of the people.

Those same tyrants believe they never have to leave – once inside, they are installed for life. Those tyrant incumbents have built an election system with insider advantages that proves they are largely correct – for now. As it stands, an incumbent has a 90%+ chance of re-election, and they can keep their campaign war chests from previous campaigns to frighten off challengers.

We don't scare so easily.

They believe they are unbeatable. But we will hold them accountable.

With regard to electronic voting at State Assembly, I have requested all records, including all electronic records, and the contract between the vendor and COGOP, so that we may conduct an audit and learn the system specifications and the terms of the agreement our party signed on to.

There was a massive grassroots effort to use paper ballots – and those that proposed it had everything in place necessary to conduct hand-count elections, including watermarked ballot paper. It is a shame they were not provided a

microphone to explain their effort – the microphones were swept from the floor, and the gavel came down before the argument was fully heard. The chair declared there would be no debate, then offered her opposition to the motion, took a vote, and declared the issue decided.

It was a disgraceful demonstration of power without discipline or discernment, but it has only fueled the fire of those who understand the fight is not merely with Democrats, but with those on our side of the aisle who believe they can run this party for the rest of us, without debate or discussion.

We The People believe differently.

In Liberty, and May God Bless America,

Ron

P.S. In the next few days, we will post the presentation we gave from the floor of State Assembly. It was a moving experience. Please go to our website, take a look and share it with others.

Thank you.

Subject: The RINO's are howling
Date: Tuesday, October 12, 2021 7:59:46 AM

[View this email in your browser](#)

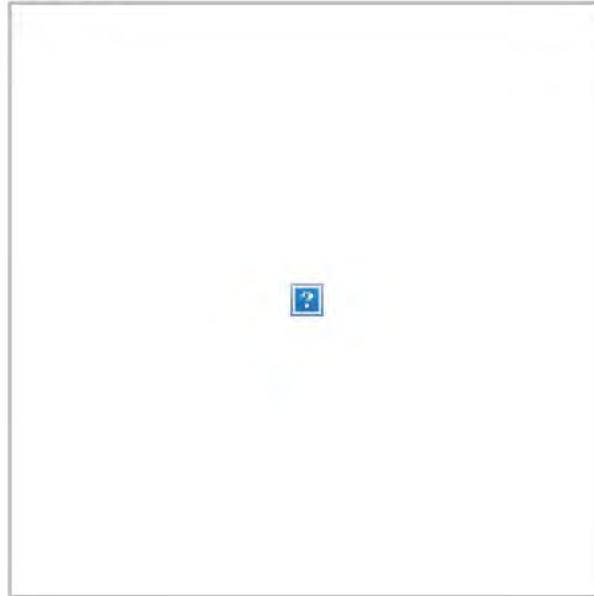

Dear Patriot,

Since I announced our campaign for US Senate in Colorado last week, the RINOs and their liberal masters in the media have been howling like wolves in sheep's clothing.

These are the same backstabbing turncoats who have been lying to Republicans – and America – trying to destroy President Trump by misreporting the facts and belittling our conservative values.

As my campaign video below shows, I never have and never will let these traitors dismantle our Constitution, so they howl when I insist we MUST have nationwide forensic election audits to guarantee The Big Steal cannot happen again.

Click my logo to see the video:

I will not relent. Let me say again: Election Fraud, in 2020 and in previous elections, is THE DEFINING ISSUE of America today.

How this issue resolves is going to determine whether we live in tyrannical, vengeful communism, or as free people with personal liberties, the rule of law, and peace among men.

If the left and their sycophants win, we lose.

This country matters. Help me fight for it.

Please join this fight today Patriot, and pitch in, [HERE](#).

When we defeat the corrupt establishment and arrive in the US Senate, we'll give them something to really howl about.

For freedom,

Ron Hanks (R)
Colorado State Representative
Republican for US Senate

Subject: This is what it will take
Date: Saturday, February 26, 2022 11:17:56 AM

[View this email in your browser](#)

Hello Patriot,

Americans must fight for Election Integrity – or nothing else we do will matter.

I **HAVE** fought as a military vet and a private citizen. I **AM** fighting RIGHT NOW as a conservative state legislator. As your next US Senator, I **WILL** fight for Election Integrity, our Conservative Values, and America's **National Security**.

Our nation is in **GRAVE** peril. As a military intelligence officer, I understand threats to our nation. **Joe Biden has sold out America**. Michael Bennet has enabled Joe's feeble "leadership". We must replace failed, entrenched politicians with citizen-legislators.

But we must also be wary of ambitious opportunists who see this as their moment to seize glory and power.

This isn't a career move for me. It is an extension of my military service – a deployment to Washington DC. It is as simple as that.

The fact is, **NO ONE** in this race can match what I've done to fight for our republic, for our liberties, for our values.

I'm a 32-year military combat veteran. I joined the Air Force right out of high school – to SERVE, not to get rich. This country matters to me, and our nation's survival is at stake.

If there is a threat, I am in front of it, fighting for our values: I introduced legislation to prevent fraudulent ballots from entering the voting system, and eliminate other ways to commit fraud. Honest elections are a National Security issue.

I was the first to join the lawsuit against a corrupt and partisan Secretary of State.

I am involved in an upcoming lawsuit that will fight efforts to weaken your voting powers.

I have held and hosted Election Integrity events in Colorado that clarify our issues here.

I attended the January 6, 2021 Stop the Steal rally in DC, to encourage Congress not to certify the flawed election of November 3, 2020.

I went to the Arizona audit – twice. The fraud found was indisputable – even if the mockingbird media never bothered to look.

It isn't just the LEFT I've had to fight: I've had to fight against weak Establishment Republican leadership. They won't talk about Election Integrity. I will. When they vote wrong in the legislature, I have called them out. When they misuse the powers of their positions, I stand against them.

If we can't trust Establishment Republicans to fight for Election Integrity against the radical cheaters currently in charge, how can we trust them to fight for us on

ANY of the conservative issues we care about? We can't.

Help me fight: Become a leader in early March at your neighborhood caucus.

At caucus, we select the delegates that vote for YOUR candidates at assembly.

At caucus, you can become a delegate and cast the votes yourself at our assembly.

If you can't become a delegate, interview those who want to become a delegate. Ask them if they believe the 2020 election was fraudulent. Ask them if they are going to support my effort to Re-Secure America.

Precinct caucus meetings only take an hour or so – and they are in your neighborhood.

Coloradans know Joe Biden is an abject failure. His exit from Afghanistan embarrassed America, and his weakness begot us the Russian invasion of Ukraine, rising energy prices and a porous border. Soon, we are likely to see China move against Taiwan under Joe Biden's watch. Meanwhile, Colorado's Michael Bennet, ever the loyal lap dog, watches Joe ruin everything.

We must turn this around. Please, turn out for your precinct caucus in the first week of March, bring friends, and help me on this mission.

Contact me at: <https://www.hanksforcolorado.com/support> and THANK YOU for joining the fight!

Respectfully,

Ron

We Are Seeing Something Remarkable **And we are winning the fight**

Hi Patriot,

What we have witnessed at the county assemblies in Colorado has been a groundswell of change.

Grassroots Americans have had enough of the Establishment's tired promises and the ducking-for-cover when tough issues surface.

Many in the Establishment were tossed as a result of new Grassroots delegates showing up – many of them for the first time – and voting for hard-charging fighters. **God bless those delegates for showing.**

- As a result, many counties will have tough new sheriffs fighting for the rights of the citizens – not adding to the confiscatory powers of a government run amok.
- There will be many new county commissioners with the courage to look at

Election Integrity – and the understanding they have the power to unplug unreliable voting machines –
permanently.

Even some incumbent state legislators were eliminated from the primary. Other incumbents now have a challenger that got more votes at assembly.
Remarkable!!

It is more than a mere groundswell. **And it isn't over.** There are more county assemblies in the days ahead. The opportunity to shift the direction of our great state and our nation is upon us, and Grassroots Americans have responded. I am honored to have witnessed it in so many locations.

We have another Golden Opportunity: State Assembly is right around the corner, and I'm asking for your help.

I promise, you will want to **be a part of this fight** in Colorado Springs on April 9th. Things are changing, and you can help shape them.

I am fighting **every day** – not for the power and prestige of a US Senate seat – but for the **ideals of our great nation.**

I have fought for 32 years as an enlisted man and commissioned officer in the US Air Force.

I am fighting now as a state legislator. I introduced two landmark bills for Election Integrity this session, for Constitutional Carry of firearms, and I was instrumental in the record-breaking debate on the house floor against the most radical abortion bill in the country.

I will fight in the US Senate for **Border Security**, for **Energy Independence**, for **American Manufacturing**, and for **Traditional Education.**

Running for US Senate is not a career move for me. I do not seek fame and glory, nor a grand opportunity to socialize among the power-elite. All I hope to achieve is to **Restore the Blessings of Liberty** for our nation, and then come home to Colorado.

This is a mission – akin to a military mission or deployment.

I am well-suited for the task. My kids are grown. I know the issues. I have legislative experience. I have a conservative record you can verify. Money and power do not motivate me – LIBERTY does.

I ask for your consideration, and your vote, at State Assembly on April 9th.

If you have questions or concerns, please reach out to me at this secure link:
<https://www.hanksforcolorado.com/support>

THANK YOU – for being a part of this amazing groundswell of American patriotism that is sweeping our great Republican Party.

In Liberty, and May God Bless America,

Ron

Subject: Will you please caucus for me?
Date: Friday, November 19, 2021 10:53:24 AM

Patriot,

The most important election day for real conservatives is Caucus Day.

That's when you and your Republican neighbors get together to select delegates to our Republican assemblies. Those conservative delegates will vote to decide the Republican nominee for US Senate to take on and defeat Democrat Michael Bennet -- and defeat the soft and inexperienced Republican sell-outs who are trying to trick you.

As the only proven conservative in our race for US Senate, I need your help: Please attend your local Republican precinct caucus in the coming months. It's easy and actually a lot of fun.

But to help organize the groundswell of conservative support from all over Colorado, we must begin organizing today to make sure we turn out as many real conservatives as possible. We can defeat the insider, untested, unproven sell-out Republicans who are running against me. They don't want the people to take back control -- they want the prestige of the position, and an inside-Washington career. Attending the caucus is our chance to stick it to The Swamp.

Patriot, as a personal favor to me and to help save our country, please, will you let me know TODAY if you will attend your caucus and vote for me in March 2022?? And while attending caucus is a big help, becoming a Caucus Captain for the Ron Hanks for US Senate campaign would help seal our victory.

Please reply to this email and give me a Yes or No.

Or, if you need more info, please let me know.

Thank you for having my back, and may God bless America,

Ron

Appendix A

Ballot Paper Issues -

A.R.S. § 16-468(2) and A.R.S. § 16-502(A).

1. It has come to my attention that there may have been multiple types of paper used that were not authorized. Please provide evidence of all of the various papers that were purchased and used from a company that provides such legally authorized paper.
2. Who were the suppliers of paper for both Runbeck printed ballots and the day of election ballots of an kind?
3. Did Dominion supply any paper for ballots? If so, please provide purchase orders to show where this paper came from and if it met the standards of our statutes.
4. At any time did any precinct need to buy paper that ran out on Election Day? If so, which precincts ran out of paper and where did Maricopa County procure additional paper? Who was responsible for supplying that paper and do we have explanation as to why it ran out?
5. Maricopa County said they used VoteSecure paper by Roland. Please provide purchase orders and which VoteSecure paper that were used and where.
6. If these processes regarding the use of ballot secure paper were not followed correctly and by state law, who would be held accountable for these violations?
7. As a member of the Arizona Senate, I received information regarding irregular ballots that were inserted among the other ballots. These ballots were being logged and tracked in an official log book. Please report back how many of these anomalies were found, and what do the logs say about them. Additionally, what were the vote tallies on those ballots?
8. In the preliminary report, we received information that the ballots had bled through and caused overvotes, despite the Legislature being told that these issues would not happen due to ballot secure paper that was impermeable from Sharpie ink. Please report back any information obtained regarding the county having ballots that had bleed through and what effect that had on adjudication rate.
9. If different types of ballot paper were used for different precincts and voters, and occasionally non ballot secure paper was used creating bleed through and overvote / artifact, leading to adjudication rates being high among some voters and not others, would that constitute an unequal application of policy / election security and a 14th Amendment violation of the voter's civil rights?

Signature / Envelope Issues

A.R.S.16-550(A)

1. Did Maricopa County fulfill statutory requirements for signature verification on all counted ballots included in the official canvass?
2. Signature issues were reported in the recent Audit conducted by the Senate. They included the following problems:

1. Completely blank signature
2. Nearly blank signature
3. Scribbled signature that did not match

If there are ballots included in the official canvass that were counted without complying with A.R.S.16-550(A), how many were included that did not meet this legal threshold?

3. Who would be responsible for allowing illegal ballots to be counted that did not meet the legal threshold of A.R.S.16-550(A)?
4. Ballot envelopes were reported in the audit with a "Verified and approved" stamp appearing BEHIND the envelope graphic of a triangle. How did these images of the verified and approved stamp print from behind the triangle image on the envelope?
5. How many of these envelopes with irregular printing of the "verified and approved" or other stamp behind the original graphics of the envelope have been uncovered, and were the ballots contained therein counted in the official canvass?

Duplicate ballots

1. In the Dr. Shiva presentation of the Arizona audit, it was reported that there were 17,322 duplicate voter envelopes submitted in the final canvass of the election.
 - a. What is the party affiliation of those voters? Can we contact them and ask them who they voted for?
 - b. Did they knowingly submit too many ballots and will they be held accountable if so?
 - c. Why were these voters allowed to keep their duplicate ballots / votes as part of the official canvass? Who was responsible for removing the duplicates and will they be held accountable?
2. There were 255,326 votes mismatched between the VM55 and EV33 files. Which file matched the hand count?
3. If it is 255k votes over the hand count, does that match with any of the wrong paper usage?
4. If the discrepancy cannot be accounted for, what is the proper and legal course of action?

Chain of Custody

ARS 16-621.E

1. Please provide evidence that all chain of custody documents required by law were adhered to and preserved for inspection and audit.
2. If these documents do not exist or are not available, who is responsible legally for that failure?

Data Security (Usernames & Passwords) -

2019 Elections Procedures Manual, p. 209 (Section 2, Subsection a., number 2)

1. The elections procedures manual requires that "The application shall provide distinct security roles, with separate usernames and secure passwords for each user or station." Please provide evidence that this requirement was followed in Maricopa County as it relates to all login and password requirements, systemwide.
2. Who is responsible for ensuring this is maintained, and what consequence/recourse does the state have for such a breach of protocol?
3. Is the master/administrative password that has not been released by Maricopa County or Dominion in compliance with State law?
4. Do anonymous logins of any kind violate the 2019 Elections Procedure Manual?

Internet History

1. Were the EMS Server, EMS Client workstations, REWEB 1601 & 1602 connected to the internet?
2. If they were connected to the internet, is this a violation of A.R.S.16 and the Elections procedure manual?
3. Do the Dominion voting tabulation machines have the capability to connect to the internet?
4. Was at any time the voting machines connected to the internet?
5. Who would be responsible and held accountable if any laws in this section were broken?

Calibration -

52 U.S.C. § 21081(b)(1)

1. In the initial audit report we received information that the machines in some locations were not calibrated and that the ballots were offset significantly. Please report back as to what information is available regarding the miscalibration of the machines that caused the offset reported to us regarding the work by Jovan Pulitzer.
2. Did the calibration problems come from specific voting machines or were they random?
3. If they were specific machines, what precincts had the machines that were grossly mis-calibrated?
4. Have those machines been identified and sent for repair, or will they be replaced by the newly purchased machines?
5. Who is responsible for the calibration of the machines?

6. In order to identify the machines that are grossly mis-calibrated, which ballot on Demand systems or printers were used to print ballots either for early votes, day of, and duplicate votes? Where were they located, and model/registration number and service number of the actual machine.

7. Is there a GPS tracker on each machine, and if so, what is the data on each of those machines?

Adjudicated Ballots

A.R.S.16-621(B)3(a)

1. In the audit, we learned that some of the adjudicated ballots were missing serial numbers, had wrong serial numbers, or had obstructed serial numbers. How many ballots did not meet the requirements of A.R.S.16-621(B)3(a)?

2. Who is responsible for ensuring that this law is abided by, and what is the recourse for voters when this law is not adhered to, yet the illegal ballots were counted in the official canvass?

Deleted files –

52 USC 20701

1. Please investigate all reports of deleted files at Maricopa County for the 2020 General election. The County has explained that these deleted files were regarding a different election and were being archived. Please verify the validity of this information.

2. Please provide proof these files exist in archive.

3. Did the auditors or subcontractors find that there was a program created to specifically remove and purge files of the 2020 election? If so, who implemented it?

4. If we are unable to show that these files were archived and indeed deleted and not related to a different election, does that show intent to tamper with evidence?

5. Is it normal procedure to create a special program to archive files at the Maricopa County Recorder's office?

6. Please provide a detailed report of this special program used to "archive" or delete files on 02/01/2021 at the Maricopa County Recorder's office referenced in the audit report, a copy of the program and an explanation of what it is designed to do.

7. Who designed the program?

Unsealed Boxes

A.R.S.16-564(C)

1. Why were the ballot boxes delivered to the Senate auditors unsealed?

2. Who removed the seals off and when? Please provide all documentation available that is required to be kept upon opening boxes.

3. Who is responsible for compliance with this state law, and is it possible to discover who opened the boxes based on video recording?

Ineligible Voters Allowed to Cast Votes -

A.R.S. 16 Articles 1, 1.1, and 2, Elections Procedures Manual

1. Were ineligible voters allowed to cast votes in the Maricopa County 2020 General election?

2. If there are votes included in the official canvass of the 2020 General election, it is to be concluded that the election performed was an illegal election and should be nullified and repeated? Please comment on how to proceed, based on any findings of yours that establish illegal completion of a secure election in Maricopa County.

Redacted Maricopa County Audit Details -

NOTE: This concerns information obtained regarding the actions of the Maricopa County Recorder's office discovered through the Senate Auditors. If not 100% of the information obtained was released, the public will not receive answers to what information was obtained via an audit that was paid for, in part, by public funds. Therefore, the subsequent questions asked are salient and appropriate for this 1487 complaint to ensure that all the forementioned laws were abided by.

1. Does there exist information about Maricopa County that was discovered via audit this year that has been omitted and not reported to the public and if so, what was that information?

2. Who requested that information to be omitted and why?

3. Were there any threats of cancelation of contract and removal of indemnity should any discovered information be reported to the public?

4. Was there an agreement to settle the debt of the audit expenses with a provision that certain information was omitted? If so who made that requirement?

Election Integrity & Technology

03/05/2021

Please mark your top five issues

- Mail-in ballots
- Voter registration issues
- Chain of Custody
- New technology vs. paper ballots (Blockchain, cloud, etc)
- Ballot adjudication security
- Tabulation machine security (i.e.. Dominion machines) (At Recorder's and in precinct)
- Federal only voters
- Audit procedures, risk-limiting audits, etc.
- Federal takeover of elections
- Voter ID card
- Clean up of voter rolls
- Ballot harvesting
- Centralized vs. decentralized voting procedures around the state
- Non-residents voting (new residents, students, etc)
- Deceased voters
- Precincts vs. voting centers
- Ballot visible to voter after submitting it
- Other _____
- Other _____
- Other _____

Stakeholders,

I wanted to make sure you received the update about this Presentation.

We are going to have you join the afternoon meeting with the Legislators since we could not hold a morning meeting due a conflict that arose on Senator Townsend schedule that day.

The meeting time is now **1:00-3:00 PM, same day, Tuesday, Dec. 7th**.
It will be in-person, but we will have a Zoom link in case you need it.

Please confirm if you are able to attend this new time so I can get a headcount.

I will send an updated invitation. If you can please reply on that, it would be helpful and appreciated.

Respectfully,

KayRee Kubat

When: Tuesday, December 7, 2021 1:00 PM-3:00 PM (UTC-07:00) Arizona.

Where: Senate Majority Caucus Room

UPDATE:

Good morning Stakeholders,

Due to a schedule conflict, Senator Townsend is going to merge the stakeholder and legislator meetings, which will be held from 1:00 - 3:00 PM.

I hope you're able to attend this new time.

Elections Stakeholders,

You're invited to attend a special presentation by Gregg Phillips of OPSEC Group and Catherine Engelbrecht of True the Vote <https://www.truethethevote.org/> where they will be presenting their findings from Ballot Trafficking research.

Please join us on Tuesday, December 7th from 1:00 PM – 3:00 PM in the Majority Caucus Room located in the State Senate Building (which is on the 1st floor). The first hour will be the presentation and second hour will be Q&A.

This will be in-person, but we can offer a Zoom option, if needed. **If you prefer to attend via Zoom, please mention "Zoom" in your RSVP reply.**

Please RSVP by accepting the invitation or emailing KayRee Kubat at kkubat@azleg.gov or call 602-926-4467. Remember to mention if you are planning to attend via Zoom or in-person.

Respectfully,

KayRee Kubat
