EXTERNAL SENDER

Good Afternoon Ms. Lewis,

Thank you for your clarification.

The IT department will use those clarifications to prepare the cost estimate statement.

Attached, please find the responsive documents that were in the possession of Laura Richard, County Clerk.

I will review and forward the documents provided by J. Oldham, FBC Election Administrator, by Tuesday, November 7, 2023.

Please let me know if you have any questions or if I can be of additional assistance.

Regards,

LaNetra S. Lary

Assistant County Attorney
Chief, General Counsel Division
County Attorney – Public Information Officer

Telephone: (281) 341-4555

Subject: Re: Public Information Request (TX-FORTBEND-23-0860)

Good morning Ms. Lary,

Thank you for reaching out regarding American Oversight's request. In response to your requests for clarification:

1. For the Fort Bend County officials listed, we would ask that any government email addresses be searched, and that the county officials search any private email accounts that may have responsive records, as required by Tex. Gov't Code 552.002(a)(3). For the external entities listed, we request that your office use any email address or domain name provided. If none were provided, then we request that the individual's name be used as a search term.
2. American Oversight can agree to limit the search to only platforms that support email communications.
3. American Oversight can agree to limit part 2 of the request to only emails sent by the Fort Bend County officials listed in part 1.
4. See American Oversight's response to clarification 1 above.
5. It is American Oversight's understanding that the "Hand Count Road Show" gave a presentation/training to Fort Bend officials in 2023, in the time frame of the search. We seek records related to that presentation.

Please let me know if you have any further questions regarding this request. In addition, we have not received any records from Administrator Oldham, who you have indicated has responsive records – do you have an estimated date by which those records will be produced?

Best,
Emma Lewis
Counsel
American Oversight

Subject: RE: Public Information Request (TX-FORTBEND-23-0860)

EXTERNAL SENDER

Good Afternoon,

Our office is in receipt of your Public Information Request.

Please be advised that given the volume of the information requested, and the various data points, your request has been forwarded to the Fort Bend County IT Department (“FBCIT”) for processing. FBCIT will provide you with a cost estimate statement. Upon receipt of the cost estimate statement, you will need to follow the instructions provided in the statement to continue with processing of your request.

In order to ensure that the FBCIT is searching for the correct information, from the appropriate individuals, please clarify the following:

1. Part 1 page 1 “Or anyone communicating on their behalf... but not limited to, at the listed email addresses and/or domains.” **Are you wanting all county employees within the fortbendcountytexas.com domain and all other domains listed to the external entities such as domain gmail.com, tamu.edu, etc. FBCIT isn’t sure whether or not anyone communicating on their behalf resides in their department only, or if FBCIT should also search everyone within the fortbendcountytexas.com domain.**
2. Page 3, “We seek records of any kind, including electronic records.” **Does this include all records from all platforms? FBCIT has over 100 applications and databases with records as well as building video surveillance, Webex Videos, Commissioners Court transcripts, etc.? You are asking for everything and that NOTHING should be omitted?**
3. Part 2 states “to emails sent by the specified individuals” but part 1 states anyone on their behalf etc. **Please clarify**
4. External Entities or Individuals: **Clint Curtis and Jarrett Woodward do not have email addresses listed to perform a search. The American Citizens & Candidates Forum for Election Integrity does not have an email contact listed**
5. Page 2 of the request “This request includes material distributed in the days before or after the training” **What training and materials are you referring to? Did this training occur during the timeframe given for the requested search?**

FBCIT has over 100 applications that the Information Technology department uses to gather this data. All of these applications would have to be searched. The time to search could be as much as 30 days, then the records have to be converted to a readable .pdf form, then reviewed by the departments and/or the County Attorney’s Office for any confidential information. With that said, the more data points that need to be searched and reviewed, the higher the costs. In addition, the time to provide the records cannot be ascertained until the search is complete and we know the extent of the data.

Please clarify your request as soon as possible, and feel free to also narrow your request should you wish to decrease the costs and time to provide the records. Your request will be on hold until clarification is received.

Please note that the Fort Bend County Tax Assessor, Carmen Turner, has reviewed your request and states that she does not have any records responsive to your request. Further, the Fort Bend County Elections Administrator, John Oldham, has also reviewed your request, and states that he only has a few responsive mails which he locate and release.

Should you have any questions, please let me know.

Regards,

LaNetra S. Lary
Assistant County Attorney
Chief, General Counsel Division
Fort Bend County
Telephone: (281) 341-4555

Overview of the Event Logistics

- Dates: June 26 and 27
- Timing:
 - Sign In 5:30 PM
 - Presentation starts promptly at 6:00 PM
 - Meet and Mix with Speakers 4:00 PM
 - Gathering of people to acknowledge our dependence on God for this endeavor 5:00 PM
- Location: Missouri City VFW
- Water and Soft Drinks for sale by VFW
- Food for purchase from vendor outside. Tables on inside to eat.
- The material will be different for each night. Some may choose to attend both nights.
- Attendance is limited to 200 each night (the first to RSVP for that night). If more than 200 people RSVP for a given night we will try to contact the later RSVPs.
- We plan to provide ZOOM. A link will be provided in a separate communication.
- We plan to record for future distribution.

Additional Background on Speakers

- Photo
- Biography
- Potential Presentation Topics
- Links to Informative References/Videos:

DR. DOUGLAS FRANK

BIOGRAPHY

- World renowned physicist with 60 peer-reviewed scientific publications. He discovered unnatural patterns in voter turnout in counties across the country.
- His work appears in “Scientific Proof” and many other videos.
- He has met with Secretaries of State, Attorney Generals, Legislators, Local Officials and Concerned Citizen Groups.

EXPERTISE/POTENTIAL TOPICS:

- Voter turnout patterns for county/states he has analyzed show evidence of control via a computer algorithm; rather than nature voting patterns.
- Analysis of county and state total registered voters versus time show evidence of voter roll manipulation and potential creation of identification numbers for illegal or non-existent voters. Voter rolls are seen to increase over time (more pronounced near elections) and are seen to drop shortly and sharply after elections. This has been referred to as “Heart Beat Charts”.
- Canvassing of precincts by concerned citizens show voters on the voter roll for a given address that:
 - do not live at the address
 - or who voted but were not shown to have voted
 - or did not vote but were shown to have voted.
 - Discussions with state and county politicians and election administrators. Common responses.
 - Experience with Pennsylvania and Louisiana etc
 - The answer to our current situation is:
 - Informed motivated citizens
 - Get rid of complex digital voting machines

- Vote Amish (go back to paper ballots, one day voting and hand counting at the precincts)
- Evidence of machine manipulation of election totals from the California primary election. Same pattern regardless for EMS vendor (ESS, HART, Dominion, LA).
- Evidence of electronic voting systems violating ballot secrecy

CLINT CURTIS

BIOGRAPHY

- Democrat/whistleblower exposes the truth after creating the first algorithm to switch election results.
- Head of the Law Office of Clint Curtis and Associates in Orlando, Florida. Clint provides assistance to veterans as well as concentrating on government corruption cases.
- Clint has been involved in politics, having been nominated for US Congress twice.
- In 2000 Clint, then a computer programmer, was asked by a leader in the Republican Party of Florida to write a program to switch votes to give a 51/49 victory to the selected candidate. Curtis assumed that this effort was aimed at detecting fraud, but later learned that it was intended for use in elections. Since 2004, after the Bush win in Florida, he has worked with both Democrats and Republicans to eliminate voting machines so that everyone can once again have faith in our elections.

EXPERTISE/POTENTIAL TOPICS

- Wrote original computer code for electronic voting machines to flip elections
- Vulnerabilities/Untrustworthiness of Complex Computer Voting Systems
- Why claims of "not connected to the internet" is not actually true.
- Why audits do not work
- Advice and results of consultation over the years
 - US
 - Other Countries
- Vulnerabilities/Untrustworthiness of Complex Computer Voting Systems
- A better way – simple, 100% accurate, and 100% transparent system that everyone will trust.

DR. WALTER DAUGHERITY

BIOGRAPHY

- Dr. Walter C. Daugherty is a computer consultant and also Senior Lecturer Emeritus in the Department of Computer Science and Engineering at Texas A&M University. He graduated from Oklahoma Christian University with a degree in mathematics, and then earned master's and doctor's degrees from Harvard University, which he attended on a Prize Fellowship from the National Science Foundation.
- As a computer expert he has consulted for major national and international firms, and for government agencies, including classified work.
- He helped develop the national computer keyboard standard and invented integrated user training within computer applications as well as various electronic computer interfaces.
- As a computer science and engineering teacher and researcher, he has published 26 research articles from over \$2.8 million in funded research projects, plus conference papers and other publications. He taught many areas of computer science and engineering for 37 years (32 years at Texas A&M University), including artificial intelligence, quantum computing, programming and software design, and cyberethics.
- At Harvard he received the Bowdoin Prize and medal for writing, and in 2015 was named a Distinguished Alumnus of Oklahoma Christian University. He is a life member of the Association for Computing Machinery and American MENSA.

EXPERTISE/POTENTIAL TOPICS:

- Analysis of forensic images of Colorado voting systems showing indisputable evidence of voting system manipulation.
- Analysis of Continuous Voter Records in many counties across the country (with voting machines from different vendors) showing similar patterns of vote manipulation.

- EMS vulnerabilities to external and internal attacks
- Trustworthiness of Logic and Accuracy Tests and Risk Limiting Audits

Subject: INVITATION TO THE ELECTION INTEGRITY EVENT AT MISSOURI CITY VFW JUNE 26 & 27 - Fort Bend County Elections Commission
Date: Wednesday, June 21, 2023 11:20:40 AM
Attachments: [Election Integrity Additional Information.6.16.2023.pdf](#)

TO:

Fort Bend County Election Commission

KP George County Judge

Carmen Turner Tax Assessor/Collector

Laura Richard County Clerk

Cynthia Ginyard Democratic Party Chair

Bobby Eberle Republican Party Chair

NOTE: I have not contact information for Cynthia Ginyard. Would one of the above please forward to her?

You are invited to the Election Integrity Event on the evenings of June 26 and 27 at the Missouri City VFW.

Event details and RSVP are provided below.

The event focuses on complex electronic voting systems vulnerabilities and evidence of abuses/failures.

The featured speakers are well known in their chosen vocations and have applied their talents to understanding electronic voting systems and election data.

Clint Curtis, an attorney and former computer programmer, is the undisputed first writer of software to guarantee a 51 to 49 % victory for the selected winner. He testified before Congress in 2004 and passed a lie detector test to prove that using computers in elections can easily alter the results and the flips are undetectable.

Dr. Frank, a PhD. Physicist, has analyzed voter turnout in counties across the country and discovered voting patterns that appear to be unnatural. He was also a party to the Pennsylvania's Legislature's investigation of election fraud in Pennsylvania following the Nov 2020 election.

Dr. Daugherty, Ed.D. Computer Scientist, has analyzed voting patterns and also discovered evidence of ballot and vote manipulation. He helped analyze the forensic image of the Mesa County, Colorado Election Management System. This analysis showed the existence of a second data base used to alter election results.

I apologize for the short notice, but hope to see you there.

Sincerely,

Michael N Treybig
281-901-2233

Laura Richard County Clerk
Cynthia Ginyard Democratic Party Chair
Bobby Eberle Republican Party Chair*

NOTE: I have not contact information for Cynthia Ginyard. Would one of the above please forward to her?

You are invited to the Election Integrity Event on the evenings of June 26 and 27 at the Missouri City VFW.

Event details and RSVP are provided below.

The event focuses on complex electronic voting systems vulnerabilities and evidence of abuses/failures.

The featured speakers are well known in their chosen vocations and have applied their talents to understanding electronic voting systems and election data.

Clint Curtis, an attorney and former computer programmer, is the undisputed first writer of software to guarantee a 51 to 49 % victory for the selected winner. He testified before Congress in 2004 and passed a lie detector test to prove that using computers in elections can easily alter the results and the flips are undetectable.

Dr. Frank, a PhD. Physicist, has analyzed voter turnout in counties across the country and discovered voting patterns that appear to be unnatural. He was also a party to the Pennsylvania's Legislature's investigation of election fraud in Pennsylvania following the Nov 2020 election.

Dr. Daugherty, Ed.D. Computer Scientist, has analyzed voting patterns and also discovered evidence of ballot and vote manipulation. He helped analyze the forensic image of the Mesa County, Colorado Election Management System. This analysis showed the existence of a second data base used to alter election results.

I apologize for the short notice, but hope to see you there.

Sincerely,

Michael N Treybig
281-901-2233

ELECTION INTEGRITY EVENT JUNE 26-27

TRUTH

ELECTRONIC VOTING MACHINES ARE UNTRUSTWORTHY

DR. DOUGLAS FRANK

Renowned physicist/scientist with 60 peer-reviewed publications. Consultant, inventor for DARPA and numerous manufacturing industries. Discovered unnatural patterns in voter turnout across the country. Presented proof of election manipulation in "Scientific Proof" and "Absolute Interference"

CLINT CURTIS

Lawyer, computer programmer. Democrat/whistleblower who exposed the truth after creating the first algorithm to switch election results.

DR. WALTER DAUGHERTY

Nationally recognized computer expert/consultant. Masters and doctorate degrees from Harvard University, Senior Lecturer Emeritus in Computer Science and Engineering at Texas A&M University. Co-author of "Mesa Report 3", and a native Texan.

DONATIONS ACCEPTED AT EVENT

JUNE 26, 27

6:00 PM to 9:00 PM

**MISSOURI CITY VFW
2200 STAFFORDSHIRE RD
MISSOURI CITY, TX 77489**
