Subject: [Records Center] Public Records Request :: P208033-102924
Date: Thursday, January 9, 2025 at 2:19:32 PM Eastern Standard Time
From: Lee County Sheriff's Office
To: AO Records

EXTERNAL SENDER

--- Please respond above this line ---

RE: Public Records Request of October 29, 2024. Reference# P208033-102924
Dear Danny Martinez:

The Lee County Sheriff's Office has identified records that appear to be responsive to your records request dated October 29, 2024.

Any information that is confidential and exempt from public disclosure was redacted according to Florida law. The records have been released to our online Public Records Center. You can log into the system and download your responsive records.

Due to the nature of the record type, this case may be updated with additional information after the release of this document(s).

Should you have any additional questions or concerns, please respond to this email.

Thank you.

Sincerely,

Public Information Office
Public Affairs

To monitor the progress or update this request please log into the Public Records Center

AMERICAN★HUMANE
FIRST TO SERVE®

Dear Carmine,

Our American Humane Rescue Team remains on the ground in Georgia, working tirelessly to assist animals affected by Hurricane Helene. Despite communication challenges and power outages, we are making progress in providing essential care to animals impacted by the storm.

Here's an update on our efforts so far:

- We've delivered critical water supplies to Adel Animal Control and are conducting field assessments across South Georgia. Our

AMERICAN OVERSIGHT

team is coordinating with local agencies to identify and address the needs of animal shelters throughout the region.

- We're working closely with our partners to support additional counties, including those still facing severe impacts from the storm, and are preparing for potential future needs in North Carolina and beyond.

Thanks to a generous match, your donation will go twice as far. **Every dollar you contribute will be matched, up to $50,000, allowing us to provide even more lifesaving care to animals wherever and whenever they are in need.**

Your support will help:

- Deliver food, water, and medical supplies to shelters and animals impacted by the hurricane.
- Provide safe shelter and care for displaced animals.
- Sustain our ongoing mission to protect animals, whether during natural disasters or through everyday rescue and care.

With your matched gift, we can continue to meet the needs of animals affected by Hurricane Helene and remain prepared for future crises. We're also monitoring a new storm system developing in the Caribbean, and your generosity ensures we are ready to respond wherever animals need us most.

Thank you for your continued support. Your generosity is making a difference for animals in crisis, and we're incredibly grateful for your partnership in these lifesaving efforts.

With gratitude,
Josh Cary

AMERICAN OVERSIGHT

National Director, Rescue

American Humane

P.S. Your donation will be matched dollar-for-dollar, doubling your impact and helping animals receive the care they urgently need.

**Campaign contributions will be matched up to $50,000. Limited to U.S. residents only.*

Please note: Any gift received surpassing the $50,000 matching gift will not be doubled but will continue to support all of American Humane's life-changing and impactful programs.

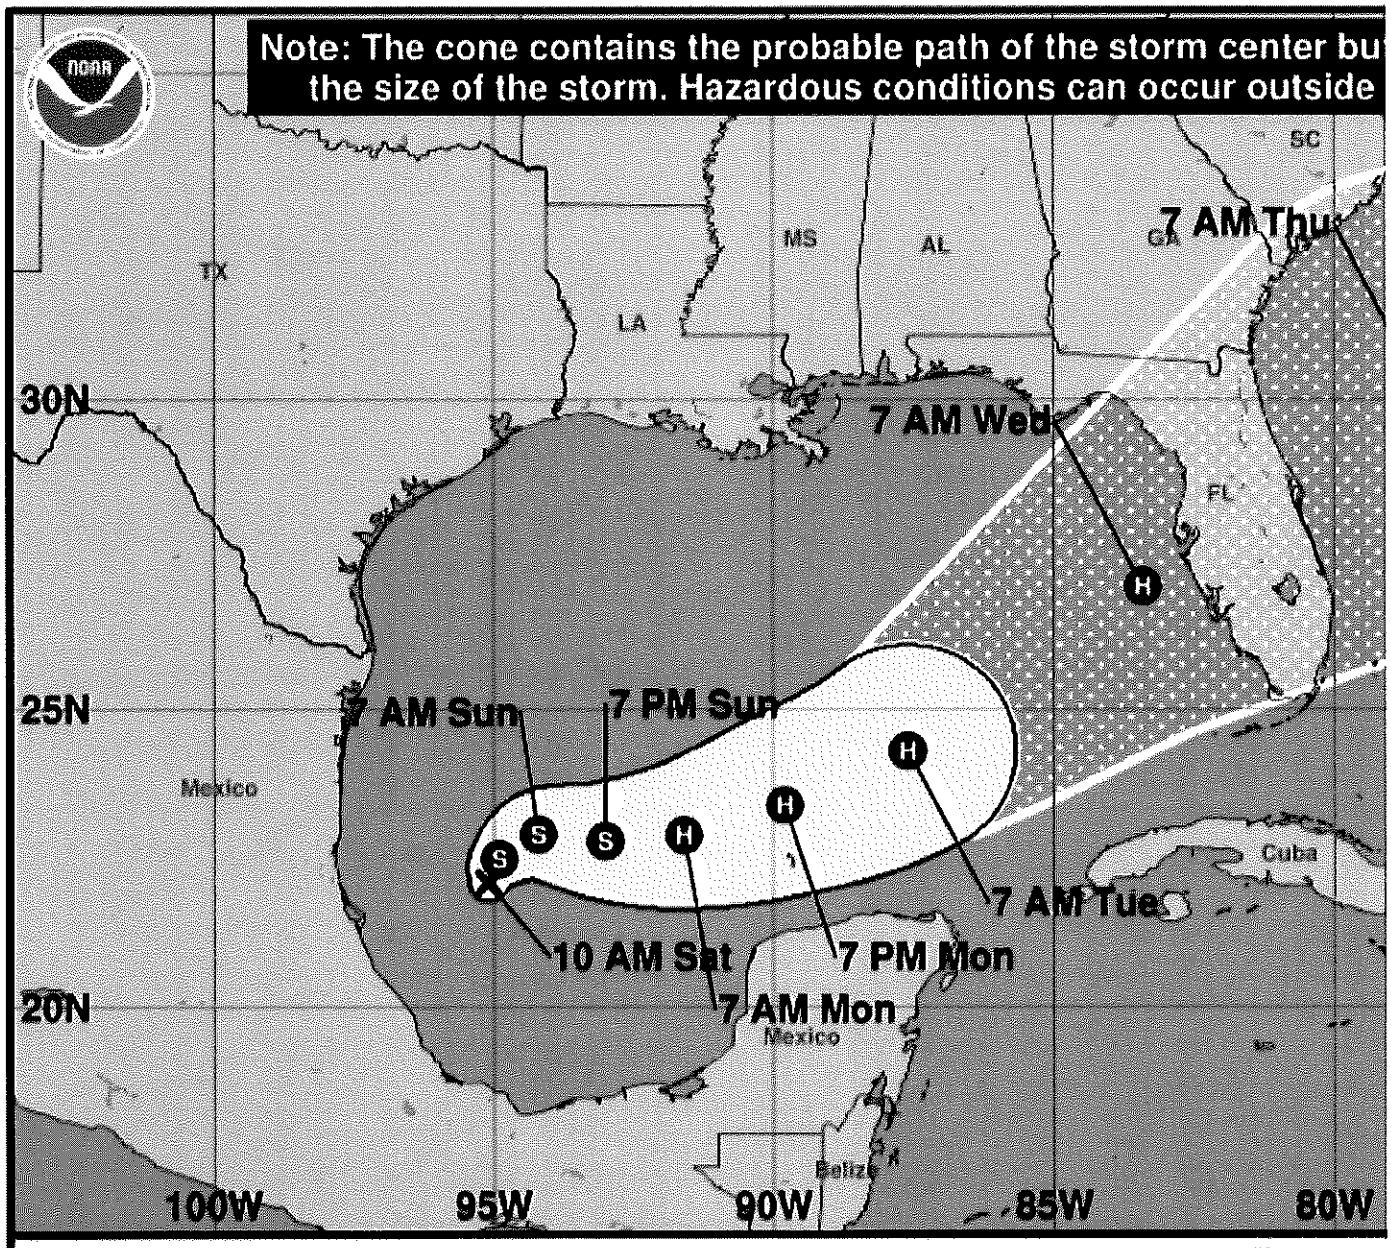
Subject: Important Update on a possible impending hurricane impacting our area

Team,



IMT has been working on preparation for a potential Hurricane impacting our area early next week. IMT will continue to send out updates regularly so please monitor your email closely. All agency units need to begin preparations of securing their assigned assets and communicate all movement to IMT. Also, update the major asset application on the intranet. We have secured Jet Blue Park as an asset staging area for Marine and other assets. Agency asset storage facilities to include the gun range are preparing to house assets as well. IMT is securing high water vehicles that will be pre-staged at strategic locations i.e., the barrier islands. IMT members will be in the RTIC today coordinating efforts. Agency extension 239-258-3150 is being setup to communicate to IMT staff. Additional updates to follow.

Be prepared and be safe!

Subject:	Tropical Storm Milton - Update #6

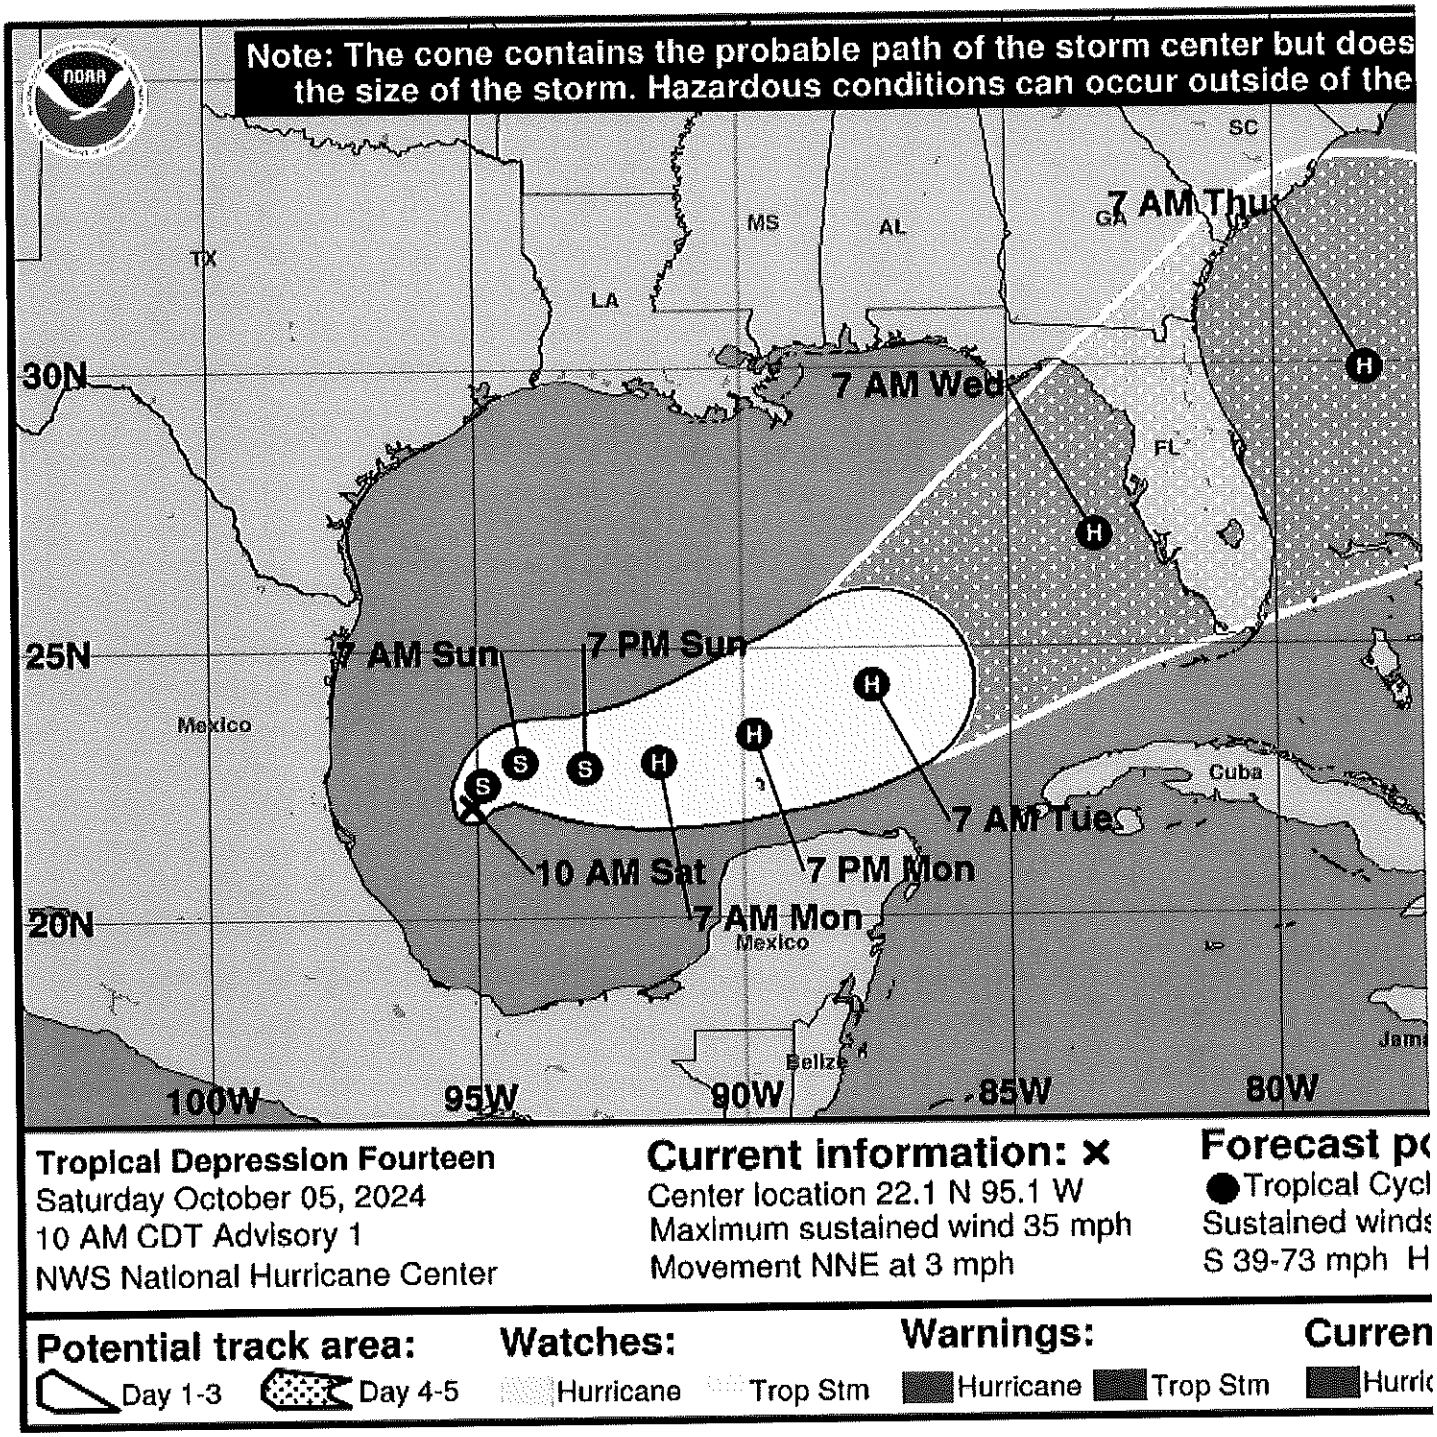
As of a 12:25 PM National Hurricane Center update, Tropical Storm Milton has formed. This storm is forecast to strengthen and bring the risk of life-threatening impacts to portions of the West Coast of Florida next week. The maximum winds are currently estimated at 40 mph with higher gusts. Models range in intensity from a Tropical Storm to a Major Hurricane, so there is tremendous unpredictability in the strength upon arrival.

At this time, the Incident Management Team is preparing for the possibility of a major hurricane affecting our area with impacts beginning on Tuesday and a full impact on Wednesday.

All agency personnel are encouraged to prepare as follows:

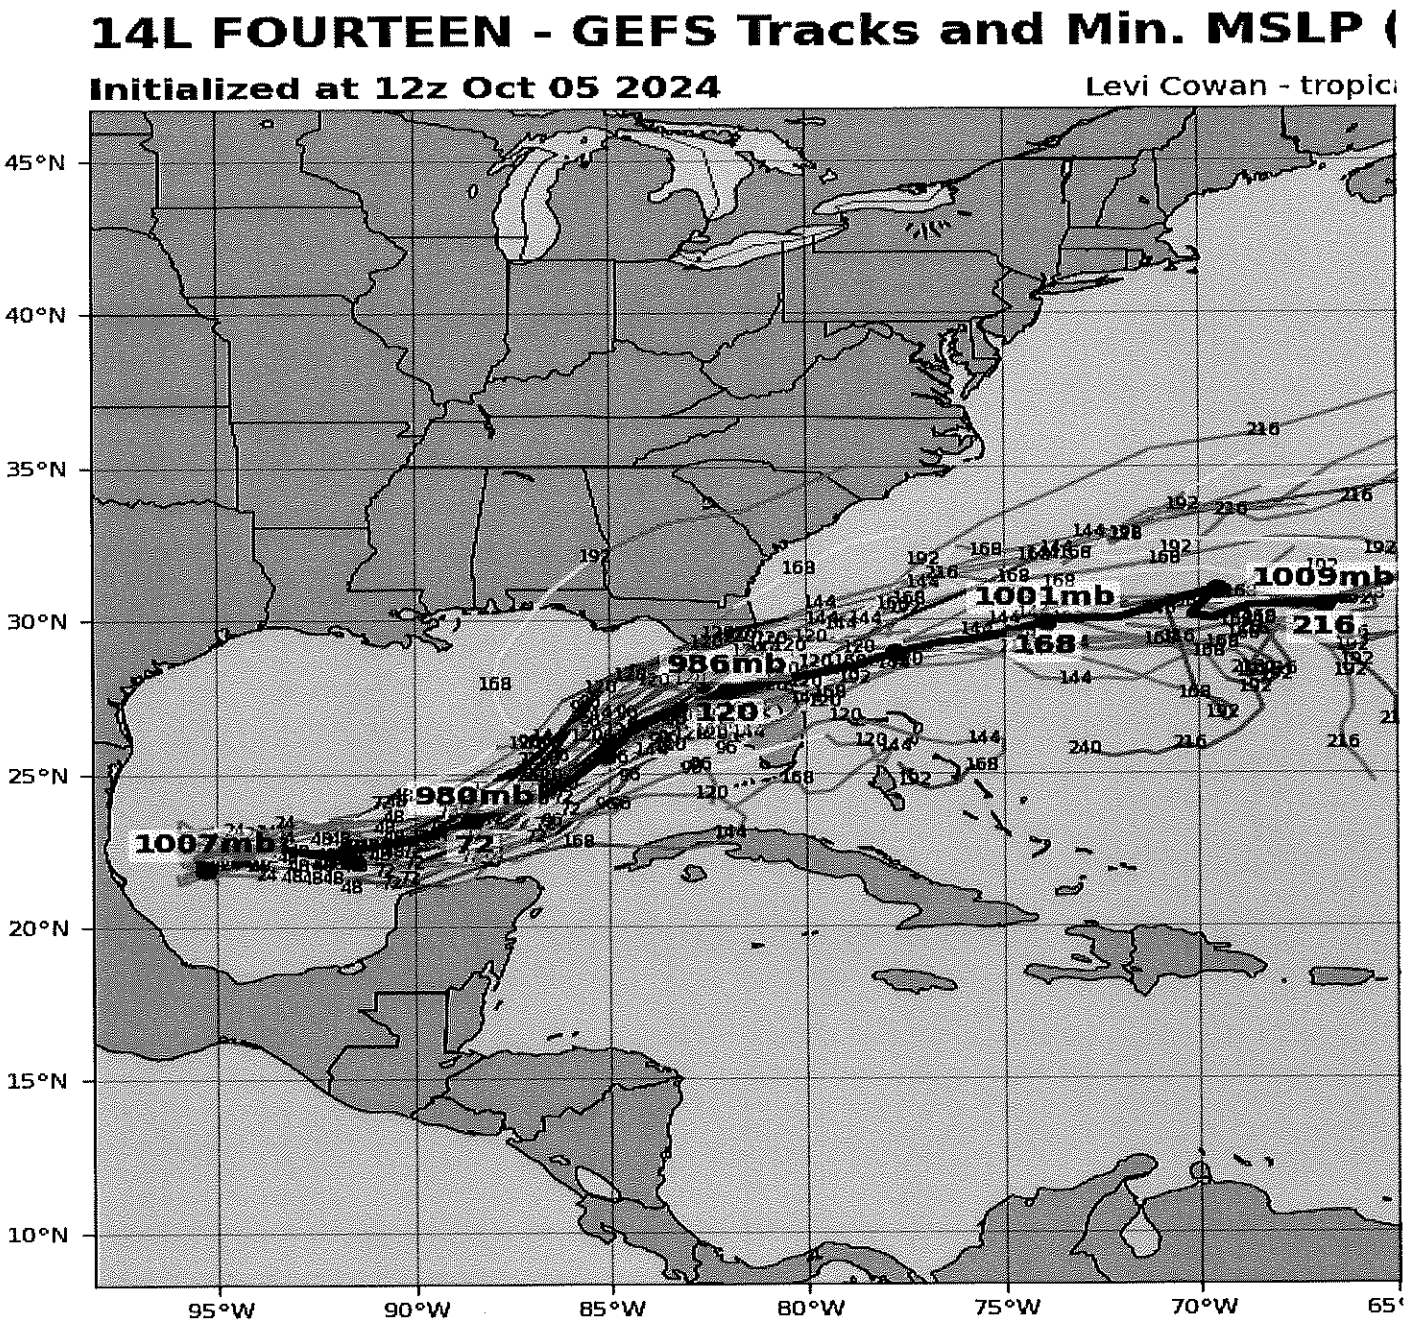
- All personnel should review their hurricane plans, and prepare their homes and families for the possibility of a hurricane impact in the middle of next week.
- All precincts should secure their mobile assets (decoy vehicles, arrow boards, trailers, ATVs, etc.) beginning on immediately to be completed by 2:00 PM on Monday.
- All trailers should be brought to storage beginning immediately to be completed by 2:00 PM on Monday.
- All personnel should use the remainder of this weekend to prepare for a possible activation. This plan should include three days worth of food, uniforms, and supplies.
- All personnel should use the remainder of this weekend to prepare their uniforms and equipment (including sufficient batteries for equipment) for a possible activation.
- All specialty units should begin bringing their assets back to their storage areas and secure locations. This should be completed by 2:00 PM on Monday.
- All precincts should secure any items that can be moved by the wind to a secure location starting immediately to be completed by 2:00 PM on Monday.
- All Corrections facilities (including Nan's Ranch) should prepare their facilities for a possible hurricane impact next week.

This is new information as of this update:



- The Waterborne Strike Team is on standby for deployment for water rescues.
- JetBlue Stadium, CenturyLink Stadium, the Lee County Gun Range, and the Andrea Lane and Sivan Road storage buildings are prepared to receive assets if needed.
- The Marine Unit is in contact with the IMT to secure the marine assets.
- Known sandbag locations are as follows:
    - Punta Gorda—Free sandbags will be available at 3130 Cooper St., the last entrance on the left by flag poles.
    - Fort Myers Beach—Sand is located off of Gulf Beach Road, and bags are available at Town Hall, 2731 Oak St. (The location will provide service until 4:30 p.m. on Friday and begin Monday at 8:30 a.m.)

AMERICAN OVERSIGHT



- Fort Myers— South Trail Fire & Rescue will have sand and sandbags available at station 63, 5531 Halifax Ave., Fort Myers—a maximum of 20 bags per household. UPDATE: South Trail Fire & Rescue is currently out of sand. Empty sandbags only are available.
- Naples— Sandbags will be available at three public park locations: Big Corkscrew Island Regional Park, 810 39th Ave., North Collier Regional Park, 15000 Livingston Road, in the Sun-N-Fun Lagoon parking lot, and at Donna Fiala Eagle Lakes Community Park, 11565 Tamiami Trail East, in the grassy area between the parking lots. The Naples sandbag locations will begin service at 8 a.m. through dusk on Saturday and Sunday.
- San Carlos Park—Sand and sandbags are available at San Carlos Park Fire District Station 54, located at 16900 Oriole Road. There is a limit of 10 bags per household. Bags can be picked up at the lobby. Bring your own shovel. Be prepared to fill and load your own sandbags. Make sure your vehicle can transport the weight of the sandbags.
- North Fort Myers—Sandbags will be located at North Fort Myers Parks and Recreation, 2000 N. Recreation Parkway. Sand will be located in the back of the park, next to the county mulch pile. Please bring your own shovel to fill the bags.
- Matlacha—Sandbags are available for pickup at Station 1, located at 5700 Pine Island Rd, Bokeelia, FL 33922

- IMT personnel are visiting the precincts, and the storage locations to inventory assets to prepare for both securement and post-storm deployment.
- No schedule changes are expected between now and Monday afternoon; however, all personnel should be prepared for schedule adjustments.
- The Agriculture assets are secured on the Olga site.

Subject: Important Update on a possible impending hurricane impacting our area (Update #5)

Team,

AMERICAN OVERSIGHT

IMT has been working on preparation for a potential Hurricane impacting our area early next week. IMT will continue to send out updates regularly so please monitor your email closely. All agency units need to begin preparations of securing their assigned assets and communicate all movement to IMT. Also, update the major asset application on the intranet. We have secured Jet Blue Park as an asset staging area for Marine and other assets. Agency asset storage facilities to include the gun range are preparing to house assets as well. IMT is securing high water vehicles that will be pre-staged at strategic locations i.e., the barrier islands. IMT members will be in the RTIC today coordinating efforts. Agency extension 239-258-3150 is being setup to communicate to IMT staff. Additional updates to follow.

Be prepared and be safe!

Subject: New Caribbean Disturbance - Update #4

The National Hurricane Center 2:00 PM update shows the possibility of development as the low pressure area in the Gulf of Mexico moves slowly eastward or northeastward. A tropical or subtropical depression or storm could form during the early to middle part of next week if the low remains separate from a frontal boundary that is forecast to extend across the Gulf of Mexico. Regardless of development, locally heavy rains could occur over portions of the Florida Peninsula late this weekend into next week. As of this update, the formation chance in the next 48 hours is low at 10 %, and the formation chance through 7 days has increased to 50%.

Current model runs show an arrival time of any potential storm around Wednesday of next week. This represents a slower forward storm speed and later storm arrival than previous model runs, so the timing and impacts are still largely unknown. Regardless of any potential storm, significant rainfall is still expected, and the Incident Management Team will continue to monitor and update all personnel.

From: IMT <IMT@sheriffleefl.org>
Sent: Thursday, October 3, 2024 9:56 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance - Update #3

The National Hurricane Center has reduced the chance of tropical cyclone development within seven days to 30%. While the system is likely to develop over the Gulf of Mexico late this weekend or early next week, subsequent tropical or subtropical development could be limited by the system's potential interaction with a frontal boundary. Regardless of development, locally heavy rains could occur over portions of the Florida Peninsula next week.

Subject: New Caribbean Disturbance - Update #2

AMERICAN OVERSIGHT

The forecast for the area of disorganized showers remains the same; it is still too early to tell if the system will develop further. Regardless of development, heavy rain is expected in our area into the weekend and next week. The Incident Management Team will continue to monitor.

From: IMT <IMT@sheriffleefl.org>
Sent: Tuesday, October 1, 2024 10:35 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance - Update #1

The area of disorganized showers remains at a 40% chance of development. The National Hurricane Center indicates that environmental conditions could support some gradual development of this system, and a tropical depression could form towards the end of this week or this weekend while it moves generally northwestward over the northwestern Caribbean Sea and into the Gulf of Mexico. As of this time, there are no changes, but some long range models show an increased chance of this disturbance affecting our area.

From: IMT <IMT@sheriffleefl.org>
Sent: Monday, September 30, 2024 8:11 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance

The Incident Management Team is monitoring a new area of disorganized showers and thunderstorms over the western Caribbean Sea. The National Weather Center states that the system has a medium chance (40%) of developing towards the middle to latter part of the week as it moves northwestward into the Gulf of Mexico. As this disturbance moves into the gulf, increasing moisture is expected over the Florida Peninsula and elevated rain chances are anticipated from Friday through the weekend, and possibly into early next week.

Unfortunately, long range models show the possibility of direct impacts for Southwest Florida; however, It is too early to determine what, if any, tropical specific impacts can be expected.

The Incident Management Team will continue to monitor the storm, and will continue to provide updates through this very active part of the hurricane season.

Situational Awareness:

- The FOT is monitoring the system in the Gulf of Mexico and are communicating with the deployment teams.
- From NWS Tallahassee
  - Tropical Depression 14 has developed in the western Gulf of Mexico and is forecast to head east-northeast to northeast and impact Florida by midweek.
    - The potential for coastal and marine impacts will increase on Monday, with rip currents and high seas likely, and high surf possible.
    - Locally heavy rain cannot be ruled out across the southeast Florida Big Bend.
    - Areas impacted by Major Hurricane Helene may be more susceptible to elevated winds midweek
    - This outlook continues to imply the primary threats will be to the FL Peninsula and Keys.
    - We will be keeping a close eye on TD14 due to any peripheral impacts approaching the FL Big Bend areas impacted by Hurricane Helene.

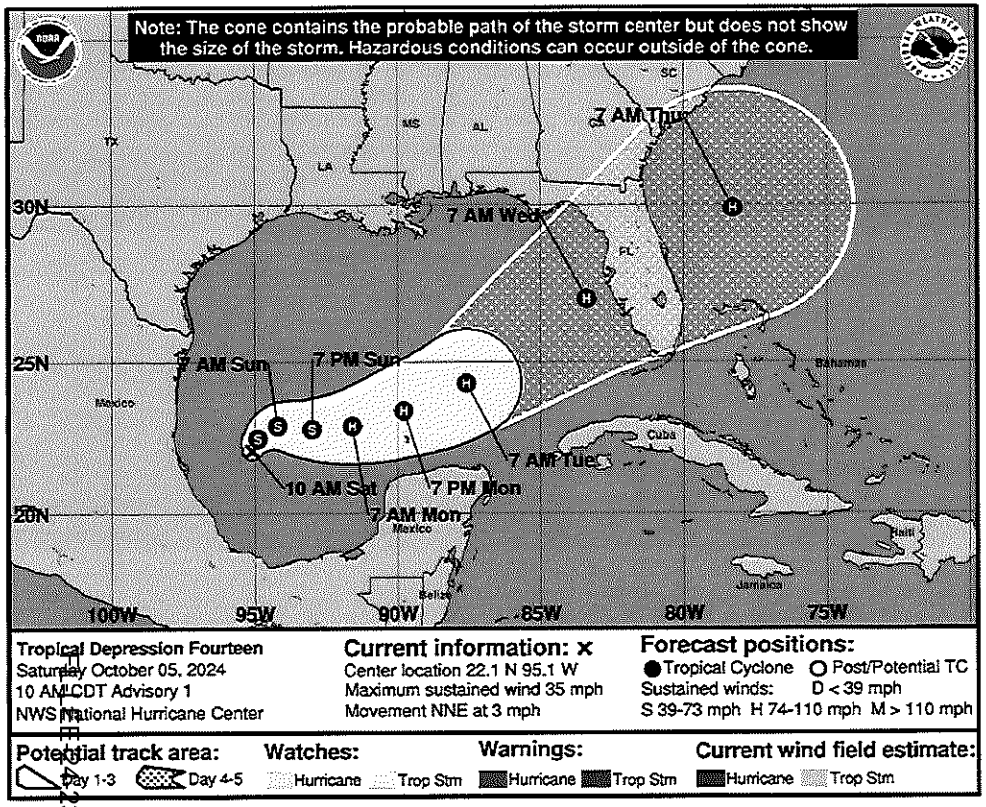
Tropical Update

1:30 PM EDT

Saturday, October 5, 2024

Tropical Depression Fourteen Forms In the Southwestern Gulf of Mexico

Forecast to Strengthen and Bring The Risk of Life-Threatening Impacts to Portions of The West Coast of Florida Next Week

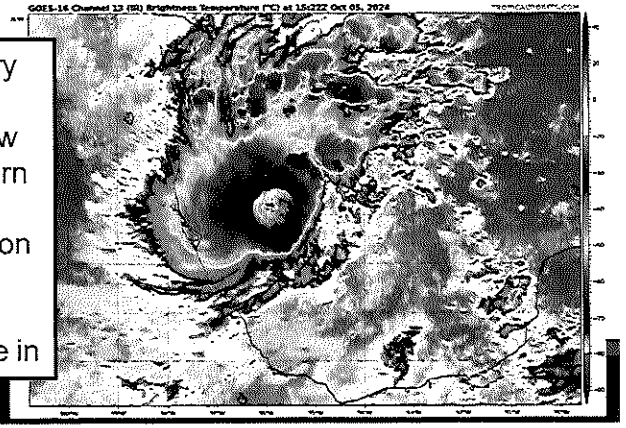


This update is intended for government and emergency response officials, and is provided for informational and situational awareness purposes only. Forecast conditions are subject to change based on a variety of environmental factors. For additional information, or for any life safety concerns with an active weather event please contact your County Emergency Management or Public Safety Office, local National Weather Service forecast office, or visit the National Hurricane Center website at www.hurricanes.gov.

FL-LEE-24-400A-00120

AMERICAN OVERSIGHT

Tropical Depression Fourteen



From the National Hurricane Center (NHC)

- **Location:** 210 miles NNE of the Veracruz, Mexico; 350 miles W of Progreso, Mexico
- **Maximum Sustained Winds:** 35 mph
- **Current Movement:** NNE at 3 mph

A slow northeastward or east-northeastward motion is expected during the next day or so. A faster east-northeastward to northeastward motion is forecast by Monday and Tuesday. On the forecast track, the depression is forecast to remain over the southwestern Gulf of Mexico through Sunday night, then move across the south-central Gulf of Mexico on Monday and Tuesday and approach the west coast of the Florida Peninsula by midweek. The tropical depression is forecast to become a tropical storm later today and a hurricane by early Monday. The system could become a major hurricane while it moves across the central and eastern Gulf of Mexico.

Regardless of development, multiple rounds of heavy rainfall are expected across portions of the Peninsula and Keys Sunday into next week. There is a risk of life-threatening impacts to portions of the west coast of Florida next week

Early morning satellite imagery shows that the circulation associated with the area of low pressure over the southwestern Gulf of Mexico has become better defined. Deep convection has been persistent over the northwestern portion of the circulation with some increase in

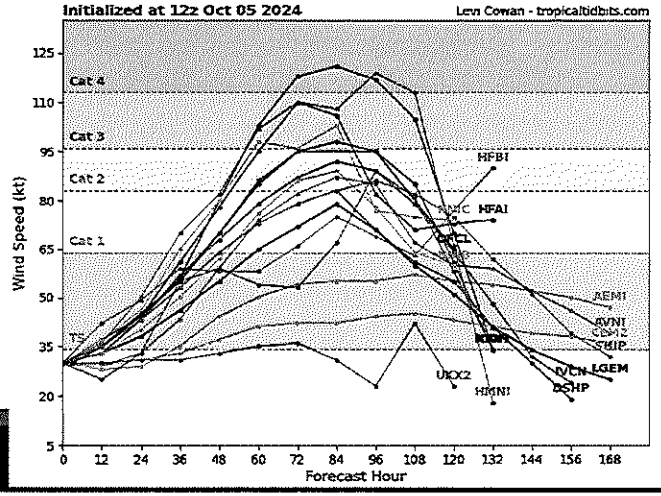
AMERICAN OVERSIGHT

Forecast Computer Models – Next 5 Days

Tropical Depression Fourteen



Tropical Depression 14L Model Track Guidance

Computer forecast models are in decent agreement that Tropical Depression Fourteen (TD14) will drift northeastward or east-northeastward during the next 12-24 hours before an upper-level disturbance moving southward over the Gulf of Mexico causes the system to turn east-northeastward or northeastward at a slightly faster forward speed after 24-48 hours. Beyond the next 48 hours, disagreement between computer models begins to greatly increase as the forward speed and amount of latitude the system is able to gain will be highly dependent on the placement of a frontal boundary dropping southward into Florida and the Gulf of Mexico. An increasingly faster northeastward motion is generally expected by Tuesday, bringing the system across the west coast of the Florida Peninsula by midweek.

Tropical Depression Fourteen is within a favorable environment of weaker upper-level winds and warm sea surface temperatures. These conditions are expected to allow for steady to rapid strengthening over the next few days. The intensification is likely to be slower during the next 12-24 hours until a defined center of the system becomes more established, but after that time a faster rate of strengthening is anticipated. The system is forecast to be at or near major hurricane strength over the central or eastern Gulf of Mexico.

Tropical Depression 14L Model Intensity Guidance

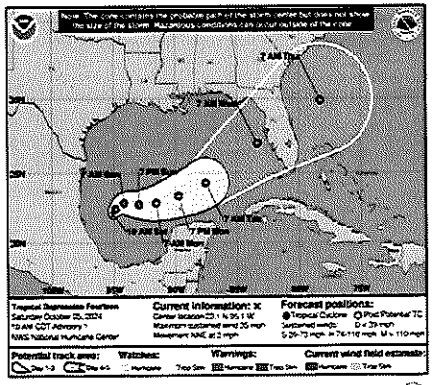
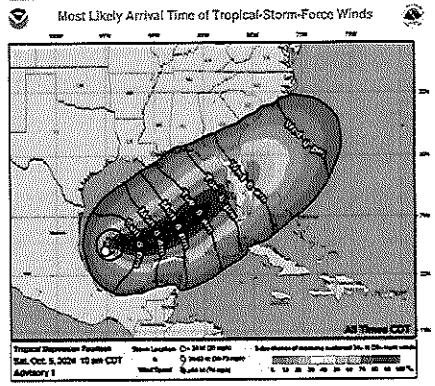
AMERICAN OVERSIGHT



Key Messages
From the National Hurricane Center (NHC)

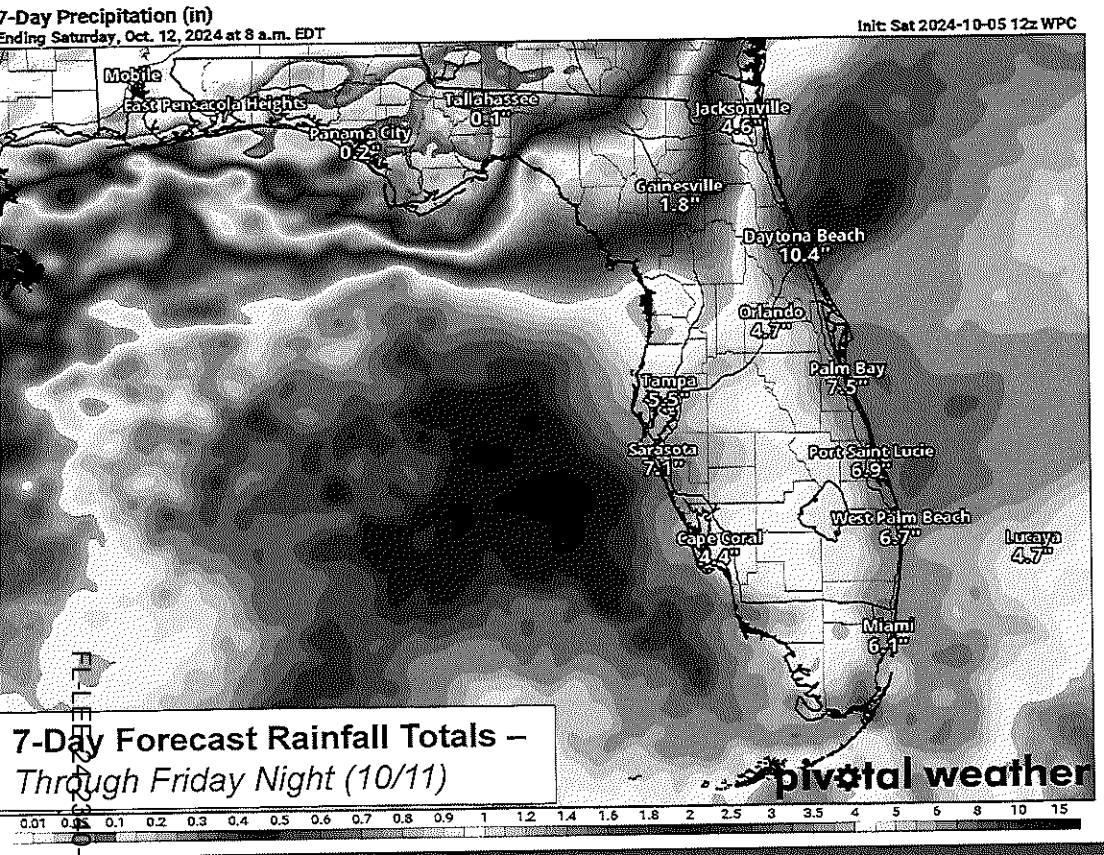


Key Messages for Tropical Depression Fourteen
Advisory 1: 10:00 AM CDT Sat Oct 05, 2024

1. The depression is forecast to quickly intensify while it moves eastward to northeastward across the Gulf of Mexico and be at or near major hurricane strength when it reaches the west coast of the Florida Peninsula mid week.

2. There is an increasing risk of life-threatening storm surge and wind impacts for portions of the west coast of the Florida Peninsula beginning late Tuesday or Wednesday. Residents in these areas should ensure they have their hurricane plan in place, follow any advice given by local officials, and check back for updates to the forecast.

3. Areas of heavy rainfall will impact portions of Florida Sunday and Monday well ahead of the tropical system, with heavy rainfall more directly related to the system expected by later Tuesday through Wednesday. This rainfall brings the risk of flash, urban, and areal flooding, along with minor to isolated moderate river flooding.



For more information go to hurricanes.gov

FOUO – For Government Official Use Only

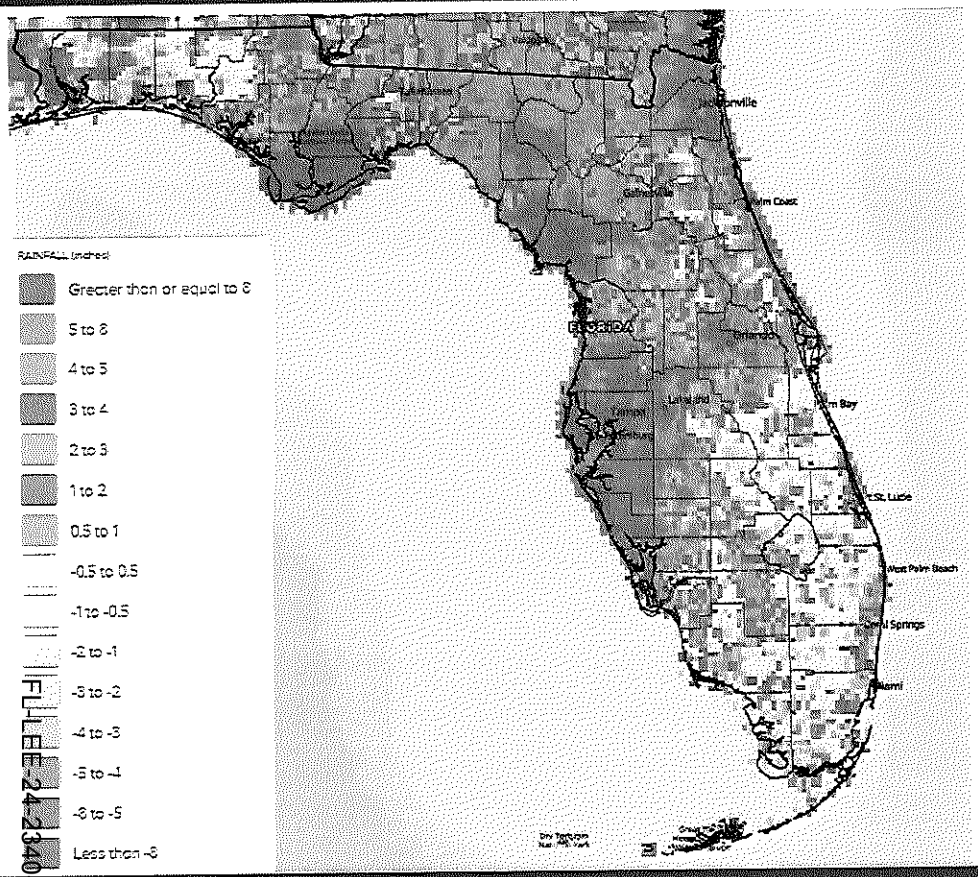
AMERICAN OVERSIGHT

Rainfall Totals – Next 7 Days

From the Weather Prediction Center (WPC)

7-Day Forecast Rainfall Totals – *Through Friday Night (10/11)*

- A frontal boundary is expected to push into the state this weekend kicking off a wet and active weather pattern across the Peninsula.
- The depression is forecast to remain over the southwestern Gulf of Mexico through Sunday night, then move across the south-central Gulf of Mexico on Monday and Tuesday and approach the west coast of the Florida Peninsula by midweek as another frontal boundary sinks southward into Florida and the Gulf of Mexico.
- *Rainfall totals heavily tied to the eventual track and forward speed of the system. With computer model guidance uncertainty regarding the exact track, there remains uncertainty as to where the heaviest rainfall can be expected.*
- Widespread rainfall totals near 5-8" with **locally higher totals in excess of 8-12"** are possible across portions of the Peninsula.
  - Computer models are indicating the heaviest rainfall totals may occur along and near the I-4 corridor through Central and South Florida; however, the exact placement of these more significant totals will continue to be modified depending on the tropical disturbance's organization and track.
  - **Please continue to stay tuned for the latest computer forecast model guidance and trends in the subsequent days.**



FL-LEE-24-23401-24

FOUO – For Government Official Use Only

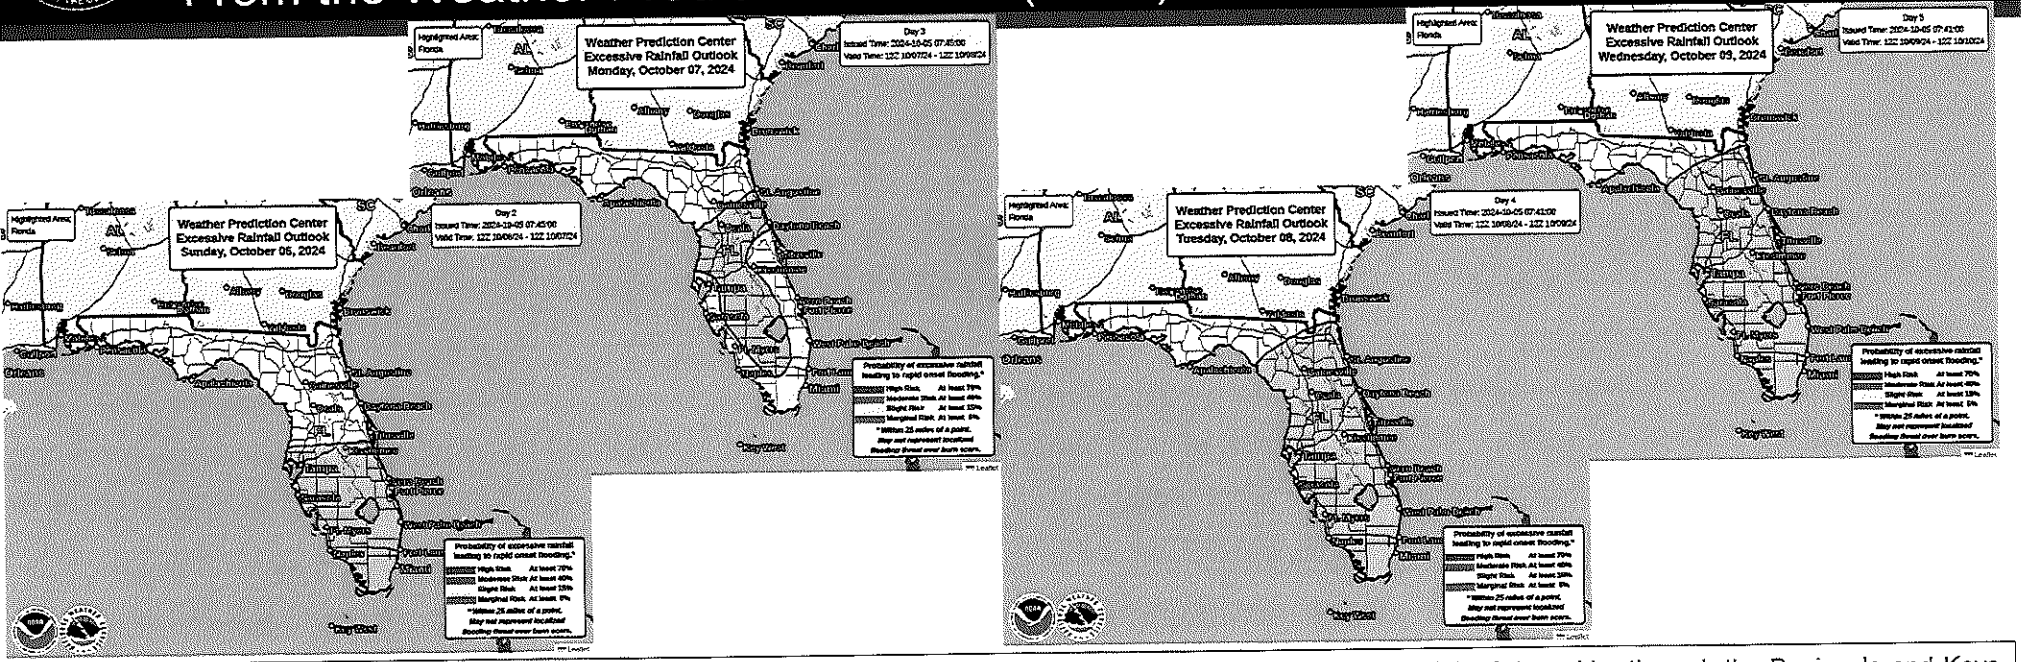
AMERICAN OVERSIGHT

60-Day Rainfall Departure From Normal

From the National Weather Service

Much of the Big Bend and Northern Peninsula southward through the I-4 corridor and into West-Central and Southwest Florida have experienced rainfall totals greater than 5-10" above normal over the past 60-days. More localized areas have seen rainfall totals near 10-15" above normal over the past 60-days across with isolated higher totals near 15-20" over the past 60 days across portions of Apalachicola, the Suwannee Valley, Northeast Florida, and West-Central Florida.

Numerous North, West-Central, and Southwest Florida rivers are already running high and/or within flood stage at this time.



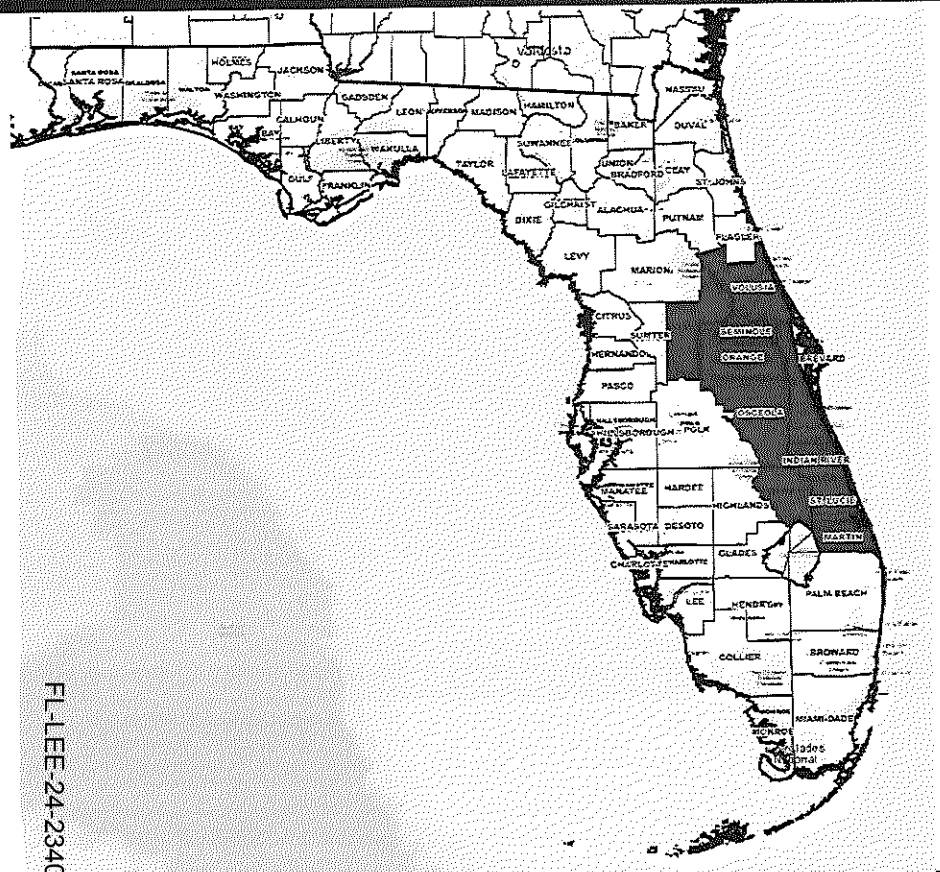
Saturated areas will be more vulnerable to heavy rainfall and a faster onset of flooding.

FL-LEE-24-2340

AMERICAN OVERSIGHT

Flash Flood Outlooks – Next 5 Days

From the Weather Prediction Center (WPC)



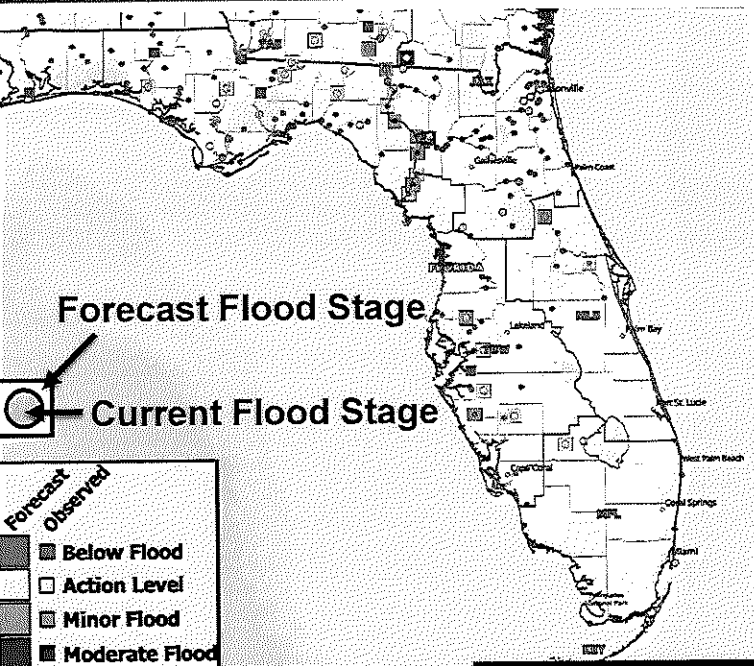
The Weather Prediction Center (WPC) is outlooking a **Marginal Risk (level 1 of 4) for Flash Flooding** along and south of the I-4 corridor through the Peninsula and Keys Sunday as rain chances and the potential for locally heavy rainfall begins to increase. A Slight Risk (level 2 of 4) for Flash Flooding is outlooking along coastal portions of South and Central Florida and the Keys Monday with a **Marginal Risk** maintained through the rest of the Peninsula northward to Gainesville and St. Augustine as abundant tropical moisture streaming in will allow heavy rainfall to become more widespread. Coastal locations along the West Coast experienced flooding (both tidal and rainfall) due to Major Hurricane Helene, and any coastal or low-lying areas will remain vulnerable to additional rounds of rainfall. Heavy rainfall rates will also be a concern over already saturated and vulnerable soils; ponding water and instances of flooding will be possible, especially throughout the urban and poor drainage/low-lying areas in the Florida Peninsula. There remains uncertainty as to where the heaviest rainfall will fall Tropical Depression Fourteen approaches and crosses the Florida Peninsula around mid-week. The heaviest rainfall totals will be closely tied to the future track of the system. WPC is currently outlooking a **Marginal Risk for Flash Flooding** across the Peninsula and Keys Tuesday and Wednesday; however, upgrades and updates to the level and extent of these flash flood outlooks can be expected as the future path of the system become clearer. A **Flood Watch** has been issued for portions of the Peninsula and additional **Flood Watches** will likely be issued as details become clearer.

FL-EM-2024-000126

AMERICAN OVERSIGHT

Flood Watches

From the National Weather Service (NWS)



A **Flood Watch** has been issued for portions of the East-Central Florida Peninsula and will go into effect at 11:00 AM EDT Sunday morning (10/6) ahead of multiple rounds of heavy rainfall anticipated Sunday and into next week. Additional **Flood Watches** will likely be issued as details on the extent and location of the heaviest rainfall totals become clearer. This watch currently includes the following counties:

- Lake
- Volusia
- Seminole
- Orange
- Brevard
- Osceola
- Indian River
- Okeechobee
- St. Lucie
- Martin

AMERICAN OVERSIGHT

Current & Forecast River Conditions

From the National Weather Service

River Flood Warnings remain in effect along the St. Johns River at Astor as water levels very slowly decline but remain within minor flood stage.

The lower Withlacoochee and the middle Suwannee Rivers will continue to rise over the next several days into minor flood stage.

The Withlacochee River near Pinetta (CR-150) will crest later today with the flood wave progressing down the Suwannee River well into next week.

Flood waters continue to travel down the Suwannee, with backwater flooding possible up the Santa Fe River including at Three Rivers Estates by late weekend; minor to **moderate riverine flooding** will be possible.

River Flood Warnings are also in effect for the Manatee River near Myakka Head at SR-64, Myakka River at Myakka River State Park, and Cypress Creek at SR-54 as minor flooding is occurring or forecast due to recent locally heavy rainfall and additional heavy rainfall anticipated late this weekend into next week.

For more details, please visit the River Forecast Center.

River Gauge	County(ies) Affecte	Current Level	Crest Level	Record Leve	Status	Crest Da	Warning Expire
Cypress Creek at SR-54	Pasco	Action: 7.98 ft	Minor: 8.90 ft	13.80 ft	Rising	8-Oct	Until Further Notice
Little Manatee River near Wimauma at US-301	Hillsborough	Action: 10.00 ft	Minor: 11.60 ft	20.10 ft	Falling	5-Oct	0342 EDT 5-Oct
Manatee River near Myakka Head at SR-64	Manatee	Action: 10.63 ft	Minor: 13.80 ft	20.90 ft	Falling	Crested	1435 EDT 5-Oct
Myakka River at Myakka River State Park	Sarasota	Below: 6.44 ft	Minor: 7.30 ft	12.80 ft	Rising	9-Oct	Until Further Notice
Withlacoochee River near Pinetta	Hamilton, Madison	Minor: 77.10 ft	Minor: 78.40 ft	87.80 ft	Cresting	5-Oct	1830 EDT 8-Oct

AMERICAN OVERSIGHT

Riverine Flooding

Chance of River Flooding Based on Range of Forecast Rainfall

Based on rainfall modelling, POSSIBLE river crest levels

Chance of Exceedance		
30%	Level	70%
○	Action	□
○	Minor Flood	■
●	Moderate Flood	■
●	Major Flood	■

● = less than 30% chance of reaching Action level

Significant River Flooding impacts include road hazards and damage to residential, commercial, and/or agricultural areas. Evacuation may be required. Flash flooding or Minor river flooding are NOT included in this outlook. Check your local weather forecast frequently for the most up-to-date information for your area.

Shaded areas are the forecast region of the Southeast River Forecast Center

- **Significant River Flooding Not Expected**
- **Significant River Flooding Possible** — Weather conditions indicate, without certainty that significant river flooding could occur
- **Significant River Flooding Likely** — Weather conditions indicate that significant river flood conditions can be expected
- **Significant River Flooding Occurring** — Significant river flooding is occurring at this time

Rivers, creeks/streams, and waterways across North and West-Central Florida are already running above normal for this time of year due to widespread heavy rainfall from Hurricane Debby. **River Flood Warnings** remain in effect along portions of the Withlacoochee, St. Johns, and several West-Central Florida rivers, creeks, and waterways for ongoing minor flooding.

Water will continue to filter through the river basins and further downstream from heavy rainfall across the Southeast U.S. from Hurricane Helene over the next few weeks. Computer models are suggesting the potential for minor flooding along portions of the Suwannee River as excess heavy rainfall discharge through the basin from the Georgia headwaters with minor to **moderate backwater flooding** possible along the Santa Fe River. The Alapaha River near Jennings may also see water levels rise above flood stage in the next week or so as the Alapaha River at Statenville, Georgia is forecast to crest in major flood stage early next week before the crest wave moves further downstream into Florida.

Heavy rainfall is anticipated Sunday and next week due frontal boundary and Tropical Depression Fourteen, likely leading to water level rises in the Peninsula. Computer models are currently suggesting there is potential for locally **moderate flooding** along a few rivers, creeks, and waterways in West-Central Florida with more widespread minor flooding along the Peninsula.

Summary

FOUO – For Government Official Use Only

Tropical Depression Fourteen:

- As of 11:00 AM EDT, Tropical Depression Fourteen is located about 210 miles north-northeast of Veracruz, Mexico and 350 miles west of Progreso, Mexico and moving north-northeastward at 3 mph.
- A slow northeastward or east-northeastward motion is expected during the next day or so.
- A faster east-northeastward to northeastward motion is forecast by Monday and Tuesday.
- On the forecast track, the depression is forecast to remain over the southwestern Gulf of Mexico through Sunday night, then move across the south-central Gulf of Mexico on Monday and Tuesday and approach the west coast of the Florida Peninsula by midweek.
- Maximum sustained winds are near 35 mph.
- The tropical depression is forecast to become a tropical storm later today and a hurricane by early Monday.
- The system could become a major hurricane while it moves across the central and eastern Gulf of Mexico.
- *Regardless of development, multiple rounds of heavy rainfall are expected across portions of the Peninsula and Keys Sunday into next week. There is a risk of life-threatening impacts to portions of the west coast of Florida next week.*

Major Hurricane Kirk:

- As of 11:00 AM EDT, Kirk is located about 1040 miles northeast of the Northern Leeward Islands or 1525 miles west-southwest of the Azores and moving northward at 16 mph.
- This motion is expected to continue through tonight.
- A faster northeastward motion is expected on Sunday and Monday.
- Maximum sustained winds are near 120 mph with higher gusts, making Kirk a Category 3 hurricane on the Saffir-Simpson scale.
- Weakening is forecast through early next week, but Kirk will remain a large hurricane for the next couple of days.
- *Kirk poses no direct threat to Florida at this time.*

Tropical Storm Leslie:

- As of 11:00 AM EDT, Leslie is located about 785 miles west-southwest of the southernmost Cabo Verde Islands and moving west-northwestward at 7 mph.
- This general motion is expected to continue today.
- A northwestward motion with an increase in forward speed is forecast to begin by tonight and continue through Tuesday.
- Maximum sustained winds have increased to near 80 mph with higher gusts, and some additional strengthening is possible through tonight.
- A gradual weakening trend is forecast to begin on Sunday.
- *This system poses no direct threat to Florida over the next 10 days, at least.*

Far Eastern Tropical Atlantic:

- A tropical wave is expected to move off the west coast of Africa on Monday or Tuesday.
- Some development of this system is possible thereafter while it moves westward or west-northwestward across the eastern tropical Atlantic. The system is expected to move near or over the Cabo Verde Islands on Wednesday and Thursday.
- *This system poses no direct threat to Florida over the next 10 days, at least.*
- The NHC is outlooking a **low (near 0%) chance of development** over the next 48 hours, and a **low (30%) chance of development** over the next 7 days.

The next briefing packet will be issued on Saturday evening. For the latest information, please visit the National Hurricane Center website.

FL-EE24-33[illegible]0134

AMERICAN OVERSIGHT

Summary

FOUO – For Government Official Use Only

Florida Outlook:

- Regardless of development of Tropical Depression Fourteen, multiple rounds of heavy rainfall are expected across portions of the Peninsula and Keys Sunday into next week.
  - Widespread rainfall totals near 5-8" with **locally higher totals in excess of 8-12"** are possible across portions of the Peninsula.
  - *Rainfall totals heavily tied to the eventual track and forward speed of the system. With computer model guidance uncertainty regarding the exact track, there remains uncertainty as to where the heaviest rainfall can be expected.*
  - The Weather Prediction Center (WPC) is outlooking a **Marginal Risk (level 1 of 4) for Flash Flooding** along and south of the I-4 corridor through the Peninsula and Keys Sunday as rain chances and the potential for locally heavy rainfall begins, increasing Monday to a **Slight Risk (level 2 of 4)** along coastal portions of South and Central Florida and the Keys with a **Marginal Risk** maintained through the rest of the Peninsula northward to Gainesville and St. Augustine.
  - WPC is currently outlooking a **Marginal Risk for Flash Flooding** across the Peninsula and Keys Tuesday and Wednesday; however, upgrades and updates to the level and extent of these flash flood outlooks can be expected as the future path of the system become clearer.
  - A **Flood Watch** has been issued for portions the East-Central Peninsula as **flash, urban, and areal flooding** will be possible, and additional **Flood Watches** will likely be issued as details become clearer.
- Rivers, creeks/streams, and waterways across North and West-Central Florida are already running above normal for this time of year due to widespread heavy rainfall from Hurricane Debby. **River Flood Warnings** remain in effect along portions of the Withlacoochee, St. Johns, and several West-Central Florida rivers, creeks, and waterways for ongoing **minor flooding**.
  - Water will continue to filter through the river basins and further downstream from heavy rainfall across the Southeast U.S. from Hurricane Helene over the next few weeks, likely leading to minor to moderate flooding along portions of the Suwannee, Alapaha, and Santa Fe Rivers.
  - Heavy rainfall is anticipated Sunday and next week due frontal boundary and Tropical Depression Fourteen, likely leading to water level rises in the Peninsula. Computer models are currently suggesting there is potential for locally **moderate flooding** along a few rivers, creeks, and waterways in West-Central Florida with more widespread **minor flooding** along the Peninsula.
- There is an increasing risk of life-threatening impacts for portions of the west coast of Florida Peninsula beginning late Tuesday or Wednesday; *however, the extent and locations of these impacts remain uncertain as it will be heavily tied to the eventual track and forward speed of the system.*
- The next name on the list is Milton *(MIL-ton)*.

The next briefing packet will be issued on Saturday evening. For the latest information, please visit the National Hurricane Center website.

Subject: Tropical Storm Milton - Update #7

With the 5:00 PM update, Tropical Storm Milton is now expected to arrive as a major hurricane. The track has shifted some to the north; however, some model tracks still show direct hits our our area, and we are still in the cone of uncertainty. Please recall from prior storms that although we are not in the direct path, the effects of the hurricane will still affect us heavily, especially in the areas prone to storm surge. Additionally, the peak storm surge from Helene arrived almost 10 hours after the peak winds, so all personnel should be aware of and consider the effects before, during, and after the storm.

The below preparations remain in effect. The only change for this period is:

- Four (4) additional shallow water vessels have been obtained for water rescues.
- Additional High-Water Vehicles have been obtained and will be deployed to the islands for potential high-water rescues.
- The San Carlos Park Fire Department is out of sand and sandbags.

Subject: Tropical Storm Milton - Update #6

As of a 12:25 PM National Hurricane Center update, Tropical Storm Milton has formed. This storm is forecast to strengthen and bring the risk of life-threatening impacts to portions of the West Coast of Florida next week. The maximum winds are currently estimated at 40 mph with higher gusts. Models range in intensity from a Tropical Storm to a Major Hurricane, so there is tremendous unpredictability in the strength upon arrival.

AMERICAN OVERSIGHT

At this time, the Incident Management Team is preparing for the possibility of a major hurricane affecting our area with impacts beginning on Tuesday and a full impact on Wednesday.

All agency personnel are encouraged to prepare as follows:

- All personnel should review their hurricane plans, and prepare their homes and families for the possibility of a hurricane impact in the middle of next week.
- All precincts should secure their mobile assets (decoy vehicles, arrow boards, trailers, ATVs, etc.) beginning on immediately to be completed by 2:00 PM on Monday.
- All trailers should be brought to storage beginning immediately to be completed by 2:00 PM on Monday.
- All personnel should use the remainder of this weekend to prepare for a possible activation. This plan should include three days worth of food, uniforms, and supplies.
- All personnel should use the remainder of this weekend to prepare their uniforms and equipment (including sufficient batteries for equipment) for a possible activation.
- All specialty units should begin bringing their assets back to their storage areas and secure locations. This should be completed by 2:00 PM on Monday.
- All precincts should secure any items that can be moved by the wind to a secure location starting immediately to be completed by 2:00 PM on Monday.
- All Corrections facilities (including Nan's Ranch) should prepare their facilities for a possible hurricane impact next week.

This is new information as of this update:

- The Waterborne Strike Team is on standby for deployment for water rescues.
- JetBlue Stadium, CenturyLink Stadium, the Lee County Gun Range, and the Andrea Lane and Sivan Road storage buildings are prepared to receive assets if needed.
- The Marine Unit is in contact with the IMT to secure the marine assets.
- Known sandbag locations are as follows:
    - Punta Gorda—Free sandbags will be available at 3130 Cooper St., the last entrance on the left by flag poles.
    - Fort Myers Beach—Sand is located off of Gulf Beach Road, and bags are available at Town Hall, 2731 Oak St. (The location will provide service until 4:30 p.m. on Friday and begin Monday at 8:30 a.m.)
    - Fort Myers— South Trail Fire & Rescue will have sand and sandbags available at station 63, 5531 Halifax Ave., Fort Myers—a maximum of 20 bags per household. UPDATE: South Trail Fire & Rescue is currently out of sand. Empty sandbags only are available.
    - Naples— Sandbags will be available at three public park locations: Big Corkscrew Island Regional Park, 810 39th Ave., North Collier Regional Park, 15000 Livingston Road, in the Sun-N-Fun Lagoon parking lot, and at Donna Fiala Eagle Lakes Community Park, 11565 Tamiami Trail East, in the grassy area between the parking lots. The Naples sandbag locations will begin service at 8 a.m. through dusk on Saturday and Sunday.
    - San Carlos Park—Sand and sandbags are available at San Carlos Park Fire District Station 54, located at 16900 Oriole Road. There is a limit of 10 bags per household. Bags can be picked up at the lobby. Bring your own shovel. Be prepared to fill and load your own sandbags. Make sure your vehicle can transport the weight of the sandbags.
    - North Fort Myers—Sandbags will be located at North Fort Myers Parks and Recreation, 2000 N. Recreation Parkway. Sand will be located in the back of the park, next to the county mulch pile. Please bring your own shovel to fill the bags.

AMERICAN OVERSIGHT

- Matlacha—Sandbags are available for pickup at Station 1, located at 5700 Pine Island Rd, Bokeelia, FL 33922
- IMT personnel are visiting the precincts, and the storage locations to inventory assets to prepare for both securement and post-storm deployment.
- No schedule changes are expected between now and Monday afternoon; however, all personnel should be prepared for schedule adjustments.
- The Agriculture assets are secured on the Olga site.

Subject: Important Update on a possible impending hurricane impacting our area (Update #5)

Team,

IMT has been working on preparation for a potential Hurricane impacting our area early next week. IMT will continue to send out updates regularly so please monitor your email closely. All agency units need to begin preparations of securing their assigned assets and communicate all movement to IMT. Also, update the major asset application on the intranet. We have secured Jet Blue Park as an asset staging area for Marine and other assets. Agency asset storage facilities to include the gun range are preparing to house assets as well. IMT is securing high water vehicles that will be pre-staged at strategic locations i.e., the barrier islands. IMT members will be in the RTIC today coordinating efforts. Agency extension 239-258-3150 is being setup to communicate to IMT staff. Additional updates to follow.

Be prepared and be safe!

Subject: New Caribbean Disturbance - Update #4

The National Hurricane Center 2:00 PM update shows the possibility of development as the low pressure area in the Gulf of Mexico moves slowly eastward or northeastward. A tropical or subtropical depression or storm could form during the early to middle part of next week if the low remains separate from a frontal boundary that is forecast to extend across the Gulf of Mexico. Regardless of development, locally heavy rains could occur over portions of the Florida Peninsula late this weekend into next week. As of this update, the formation chance in the next 48 hours is low at 10 %, and the formation chance through 7 days has increased to 50%.

Current model runs show an arrival time of any potential storm around Wednesday of next week. This represents a slower forward storm speed and later storm arrival than previous model runs, so the timing and impacts are still largely unknown. Regardless of any potential storm, significant rainfall is still expected, and the Incident Management Team will continue to monitor and update all personnel.

From: IMT <IMT@sheriffleefl.org>
Sent: Thursday, October 3, 2024 9:56 AM

Subject: New Caribbean Disturbance - Update #3

AM OVERSIGHT

The National Hurricane Center has reduced the chance of tropical cyclone development within seven days to 30%. While the system is likely to develop over the Gulf of Mexico late this weekend or early next week, subsequent tropical or subtropical development could be limited by the system's potential interaction with a frontal boundary. Regardless of development, locally heavy rains could occur over portions of the Florida Peninsula next week.

Sent: Wednesday, October 2, 2024 12:08 PM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance - Update #2

The forecast for the area of disorganized showers remains the same; it is still too early to tell if the system will develop further. Regardless of development, heavy rain is expected in our area into the weekend and next week. The Incident Management Team will continue to monitor.

From: IMT <IMT@sheriffleefl.org>
Sent: Tuesday, October 1, 2024 10:35 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance - Update #1

The area of disorganized showers remains at a 40% chance of development. The National Hurricane Center indicates that environmental conditions could support some gradual development of this system, and a tropical depression could form towards the end of this week or this weekend while it moves generally northwestward over the northwestern Caribbean Sea and into the Gulf of Mexico. As of this time, there are no changes, but some long range models show an increased chance of this disturbance affecting our area.

From: IMT <IMT@sheriffleefl.org>
Sent: Monday, September 30, 2024 8:11 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance

The Incident Management Team is monitoring a new area of disorganized showers and thunderstorms over the western Caribbean Sea. The National Weather Center states that the system has a medium chance (40%) of developing towards the middle to latter part of the week as it moves northwestward into the Gulf of Mexico. As this disturbance moves into the gulf, increasing moisture is expected over the Florida Peninsula and elevated rain chances are anticipated from Friday through the weekend, and possibly into early next week.

Unfortunately, long range models show the possibility of direct impacts for Southwest Florida; however, It is too early to determine what, if any, tropical specific impacts can be expected.

The Incident Management Team will continue to monitor the storm, and will continue to provide updates through this very active part of the hurricane season.

CHAMBER OF COMMERCE OF

CAPE CORAL

EMERGENCY OPERATIONS CENTER FLASH REPORT #2

Dear Members and Chamber Friends,

AMERICA OVERSIGHT

Please read the report below as well as the document links below from our Cape Coral Emergency Operations Center.

The Chamber holds a seat at the Emergency Operations Center and will be communicating with you regularly as the storm progresses. Please take the proper precautions to prepare your employees, businesses and homes as we continue to monitor the storm.

TROPICAL WEATHER BRIEFING OCTOBER 5, 2024 - 4:52 PM

Milton is forecast to quickly intensify while it moves eastward to northeastward across the Gulf of Mexico and be at or near major hurricane strength when it reaches the west coast of the Florida Peninsula mid-week.

There is an increasing risk of life-threatening storm surge and wind impacts for portions of the west coast of the Florida Peninsula beginning late Tuesday or Wednesday.

Areas of heavy rainfall will impact portions of Florida Sunday and Monday well ahead of Milton, with heavy rainfall more directly related to the system expected later on Tuesday through Wednesday night. This rainfall brings the risk of flash, urban, and areal flooding, along with minor to moderate river flooding.

Good Evening,

I wanted to the a moment to clarify a few things regarding your pool cleaning service and how severe weather affects both our schedule and the maintenance of your pool.

Storm Cleanup Charges:

As you know, tropical storms and hurricanes can cause significant debris and contamination to pools. While your regular monthly service covers standard cleanings and chemical treatments, it does not include additional work required for storm related cleanup. This includes tasks such as adding extra chemicals, salt, or performing additional vacuuming and cleaning.

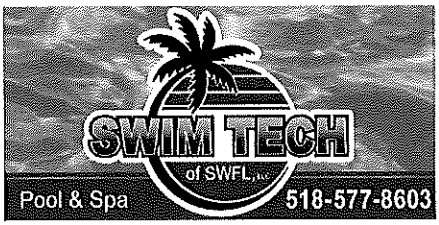
In the past, I've absorbed these extra costs, but moving forward, due to the expense of supplies and the additional time required for this work, I will need to charge for storm related cleanup based on the severity of the damage. I appreciate your understanding, as this allows me to continue providing you with the best service possible.

AMERICAN OVERSIGHT

Schedule Changes Due to Potential Hurricane:

In preparation for the potential hurricane next week, I will be adjusting my pool service schedule to ensure your pool is as ready as possible before the storm arrives. Starting this Monday. I will be providing chem stops only, as full cleaning will not be practical given the forecast.

~ Regardless of your day of service, chem stops will be done Monday and Tuesday, so please expect me on one of those days.



Please make sure that your lanai cage is unlocked so I can access your pool and properly treat it ahead of the storm.

If you have any questions or concerns, feel free to reach out to me. Thank you for your cooperation and trusting me with your pool care.

Stay Safe,

John

Beach Brief Volume 15
FOR IMMEDIATE RELEASE 10/5/2024

Hurricane Helene Update

In response to the storm, CEPD enacted the emergency response plan and in the week since Hurricane Helene made landfall, the CEPD has performed several key steps toward island recovery.

On September 27th, CEPD staff conducted a visual survey of the island and noted the tremendous damage caused by Hurricane Helene's storm surge. The island has suffered significant erosion to its beaches and dune system. Immediately following, an emergency meeting of the CEPD was held on September 30th to provide an overview of the hurricane's aftermath and provide a clear action plan to restore the island.

On October 2nd, a field observation of the damage was performed by the district's engineer and the post storm survey commenced to quantify the losses to the beach and dune system.

The CEPD has contracted with Pitchford Excavation for the remediation and repurposing of overwash sand. This beach quality sand will be screened and placed along the dune system to fortify areas of increased vulnerability.

In coordination with the Fire District, the CEPD will be prioritizing providing emergency beach access at Turner Beach, Andy Rosse Ln, and the Alison Hagerup beach parking lot and providing reinforcement to the evacuation route along Jensen's curve. This work is scheduled to begin on Monday, October 7th.

The CEPD will continue to assess the need for further emergency dune restoration following the completion of this initial phase of work. The district will host its monthly board meeting on Monday, October 7th at 1:00 p.m.

As of October 5th, Hurricane Milton has been forecast to make landfall in Florida on Wednesday October 9th. All Captiva property owners and residents should be prepared. The evacuation route is exposed and at risk. **If Captiva Island is given evacuation orders, all civilians should do so.**

Below are some important resources for the property owners of Captiva Island. Please, continue to stay safe and follow the guidance provided:

Good evening all,

Due to the impending threat of the hurricane that is projected to impact Florida mid-week, Governor DeSantis has issued a state of emergency for 37 counties—including Miami-Dade—and as a result, we have decided that it is in the best interest of all involved to cancel this year's 2024 Executive Leadership Conference and Fleet Exposition. We apologize for the short notice and inconvenience that this may cause.

Sincerely,

Abby Andersen, CMP
Florida Sheriffs Association

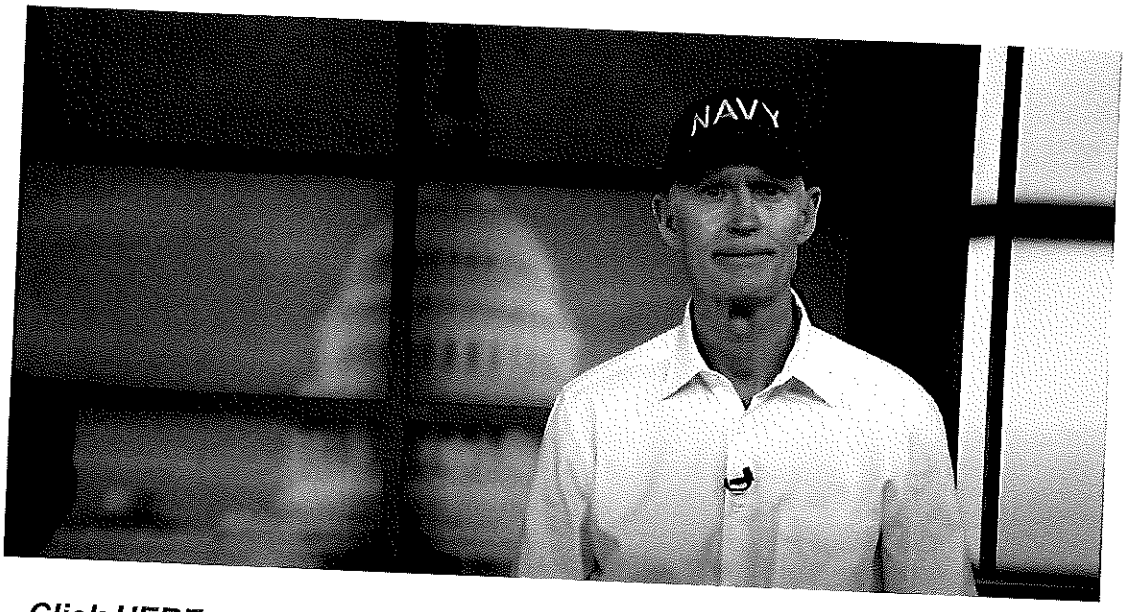
Hurricane Season Continues: Get Prepared TODAY

Dear Fellow Floridian,



As we continue to recover from Hurricane Helene, the idea of another hurricane hitting our Gulf Coast is unimaginable, but as Floridians know, hurricanes can develop quickly and hit us hard.

I urge all Floridians to take the time to **make a plan** in case of emergency TODAY. Stock up on **supplies** and stay alert to weather threats to make sure that our families and businesses are prepared for a storm.

Over the past years, I have seen firsthand the destruction left behind by storm surge and multiple devastating hurricanes – Michael, Irma, Hermine, Matthew and

AMERICAN OVERSIGHT

most recently, Ian, Fiona, Idalia, Debby and Helene. Florida is resilient because we prepare for storms. I cannot stress this enough: **preparedness saves lives**. We can always rebuild a home, but we can't rebuild a life.

Click HERE or above to see my message on hurricane preparedness.

Sincerely,

Rick Scott

United States Senator

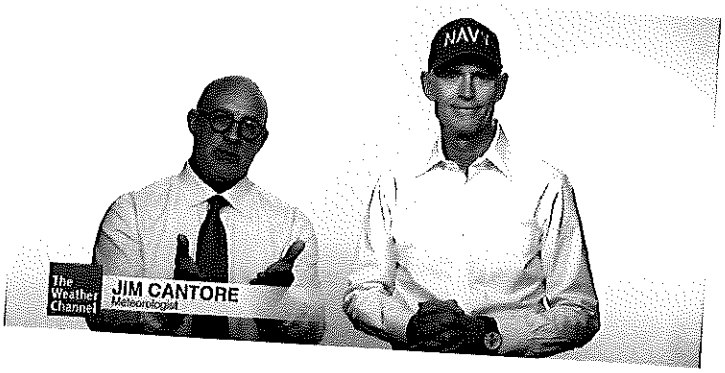
HELPFUL RESOURCES



Hurricane Preparedness

As Floridians, we know that preparedness saves lives. As the 2024 hurricane season continues until November 30th, the time for Florida families and businesses to make a plan is TODAY.

AMERICAN OVERSIGHT

Now is a great opportunity for your family to stock your disaster supply kits with vital supplies like a first aid kit, a radio, flashlights, batteries and other necessities. Your kit should also include 7 days worth of food and water, prescription medications and any important documents.

*Watch Sen. Scott and Weather Channel meteorologist Jim Cantore's Hurricane Season PSA **HERE** or below.*

You can find resources and information on creating a personalized emergency plan **HERE**.

Here are a few tips to help you prepare your family and business for this upcoming season:

Before a Storm

- Prepare an evacuation plan & make sure everyone in your home knows the plan.
- Stock up on emergency supplies, including:
  - **Water** – You will need water for drinking, cooking and sanitation purposes. Pack a minimum of 1 gallon daily per person for 7 days
  - **Food** – You will need enough food for a minimum of 7 days:
    - Non-perishable packaged or canned food and juices
      - Manual can opener
    - Foods for individuals with dietary restrictions (i.e. infants, elderly, etc.)
    - Snack foods
    - Cooking tools and fuel
    - Paper plates and plastic utensils
  - **Flashlight and Extra Batteries**
  - **Pillows, Blankets and/or Sleeping Bags**
  - **Clothing** – Include a complete change of clothes suitable for your area's climate. Be sure to include sturdy shoes to protect you from debris or other sharp objects you may encounter outdoors post-storm
  - **First Aid Kit, Prescription Medication and Other Medicines**

AMERICAN OVERSIGHT

- **Radio** – Battery operated and NOAA weather radio
- **Toiletries**
- **Cleaning Supplies** – Include garbage bags, moisture wipes and other items you may need to sanitize your home or surroundings post-disaster
- **Special Items** – Assess all family members needs. Consider other items needed for infants, elderly and individuals with access and functional needs (i.e. medical items, baby bottles, etc.)
- **Cash** – Banks and ATMs may not be open or available for extended periods following a disaster
- **Toys, Books and Games**
- **Important Documents** – Consider storing all critical documents in a waterproof container, as well as saving them electronically. These items can include, but are not limited to, insurance, medical records, bank account numbers, Social Security card, etc.
- **Tools**
- **Pet Care Items**
  - Proper identification/ immunization records
  - Ample supply of food and water
  - Carrier or cage
  - Medications
  - Muzzle and leash
  - Photo of you and your pet(s) – in the event that you are separated from your pet, having an updated photo with your pet will help validate pet ownership

- If you have been told to evacuate, EVACUATE. Don't stay behind. We can rebuild a home, but we can't rebuild a life.

During a Storm

- Follow instructions from local law enforcement and emergency management officials.
- Stay away from windows and seek shelter.

After a Storm

- If you were advised to evacuate, do not return home until it is safe to do so.
- Be mindful of debris and down power lines.
- Do not drive or walk around outside if you do not have to.

> 10AM CDT Oct 5: Tropical Depression Fourteen forms in the southwestern Gulf of Mexico. Forecast to strengthen and bring the risk of Life-Threatening Impacts to portions of the west coast of Florida next week. Make sure to check back with updates through the weekend and into next
> Show more

Key Messages for Tropical Depression Fourteen
Advisory 1: 10:00 AM CDT Sat Oct 05, 2024

1. The depression is forecast to quickly intensify while it moves eastward to northeastward across the Gulf of Mexico and be at or near major hurricane strength when it reaches the west coast of the Florida Peninsula mid week.

2. There is an increasing risk of life-threatening storm surge and wind impacts for portions of the west coast of the Florida Peninsula beginning late Tuesday or Wednesday. Residents in these areas should ensure they have their hurricane plan in place, follow any advice given by local officials, and check back for updates to the forecast.

3. Areas of heavy rainfall will impact portions of Florida Sunday and Monday well ahead of the tropical system, with heavy rainfall more directly related to the system expected by later Tuesday through Wednesday. This rainfall brings the risk of flash, urban, and areal flooding, along with minor to isolated moderate river flooding.

Your Week in Fort Myers

Sun Oct 6 2024

Wendy Fullerton Powell | VP, Florida Region and Executive Editor
@wendyfullerton

Hurricane Helene may have spared Southwest Florida a direct hit, but the storm still left its mark with some flooding and damage in Lee County.

And like Hurricane Ian two years ago, some of the worst hit areas were along the coast, with Fort Myers Beach, Matlacha and Sanibel experiencing significant impacts.

AMERICAN OVERSIGHT

Unlike Ian, officials have not confirmed any loss of life from Helene in Lee or Collier counties. But that doesn't mean there weren't some scary moments.

Tomas Rodriguez reports that hundreds of 911 calls poured in as the storm passed Southwest Florida, keeping law enforcement and first responders.

So, how is the Sanibel Lighthouse?

Hurricane Helene's surge soaked Sanibelalmost two years to the day after Hurricane Ian walloped the island's historic lighthouse. Back then, Ian's force broke one of the 140-year-old structure's leg, washed away its two vintage buildings and eroded the nearby beach.

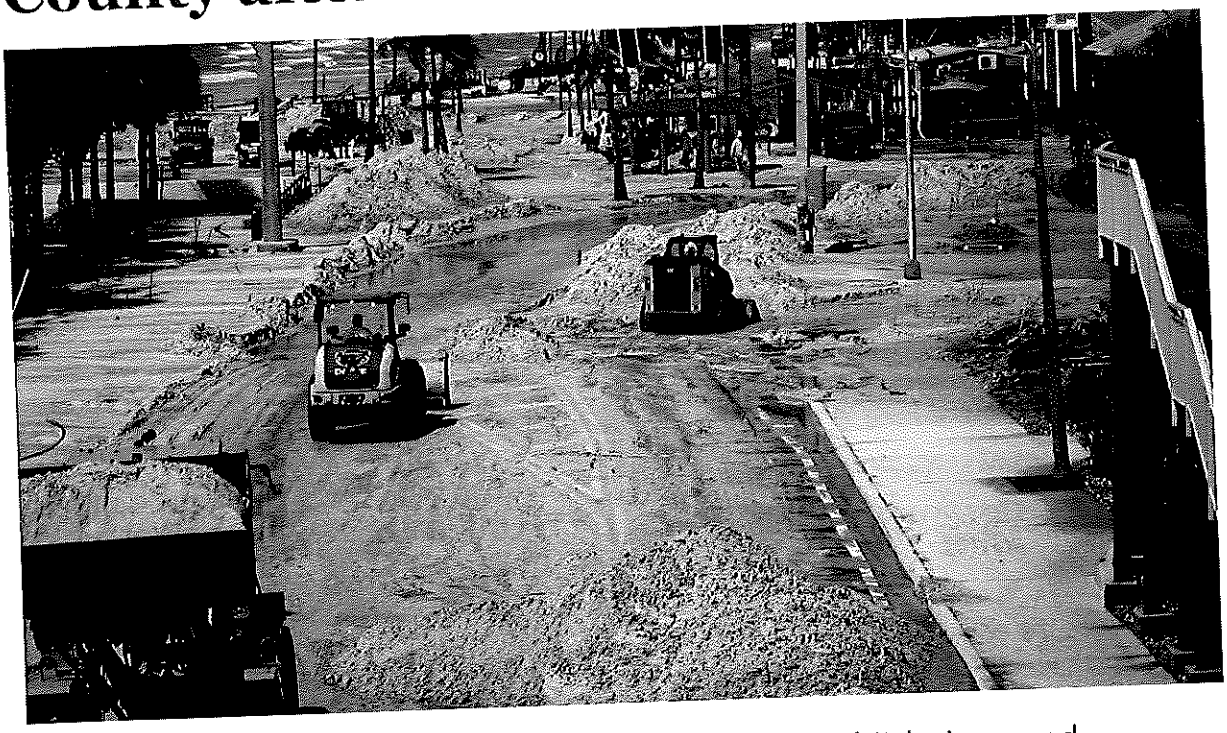
But did Helene finish what Ian started? Not at all, island officials tell Amy Williams.

Helene was definitely not a welcome guest for a few restaurants on the islands. For some it was worse than Ian, and for some it wasn't, Robyn George reports.

Robyn also reports on the Fort Myers Beach restaurants who are still drying out.

Plus, she's got a look at seven restaurants she says she misses the most after Ian and an update on when or even if they will return.

I'll end this week with a thank you as always for subscribing and supporting local journalism. And a hope that you stay dry amid what sounds like will be a wet week. You can reach me at wfullert@gannett.com



AMERICAN OVERSIGHT

All the best,

Wendy Fullerton Powell

CHAMBER OF COMMERCE OF

CAPE CORAL

EMERGENCY OPERATIONS CENTER FLASH REPORT

EOC FLASH REPORT #3 - 10/6/2024

AMERICAN OVERSIGHT

Dear Members and Chamber Friends,

Please read the report below as well as the document links below from our Cape Coral Emergency Operations Center.

The Chamber holds a seat at the Emergency Operations Center and will be communicating with you regularly as the storm progresses. Please take the proper precautions to prepare your employees, businesses and homes as we continue to monitor the storm.

Tropical Storm Milton Briefing - 7 AM, 10/6/24
Milton Forecast to become a Major Hurricane before making landfall.Flood Watch out for the entire area through Thursday.

Milton is forecast to rapidly strengthen as it moves eastward to northeastward across the Gulf of Mexico and become a major hurricane before making landfall. Hurricane/Storm Surge Watches likely later today.

?Flood Watch out for the entire area. Rainfall amounts of 5 to 8 inches, with localized totals up to 12 inches.

Timing of impacts to the area looks to be anywhere from late Tuesday to early Thursday morning. A good deal of uncertainty remains with where the storm will make landfall. It should be noted that the average NHC track error at day 4 is around 150 miles.

TROPICAL WEATHER BRIEFING OCTOBER 6, 2024 - 8AM

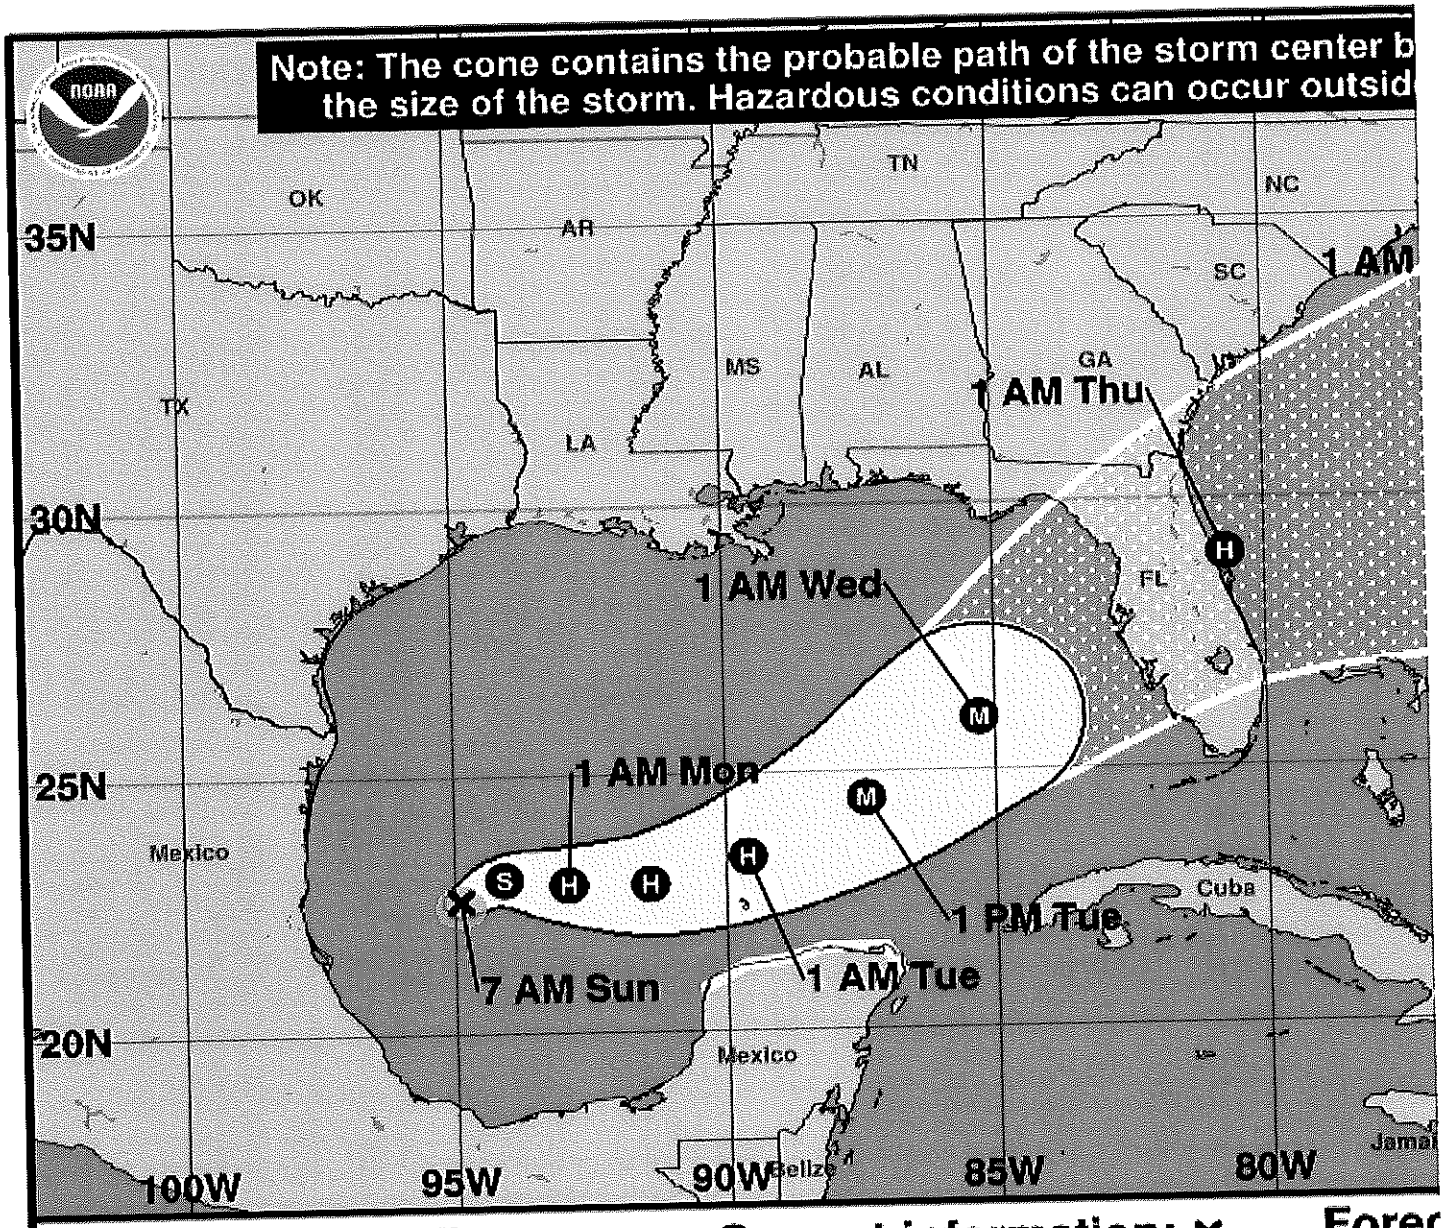
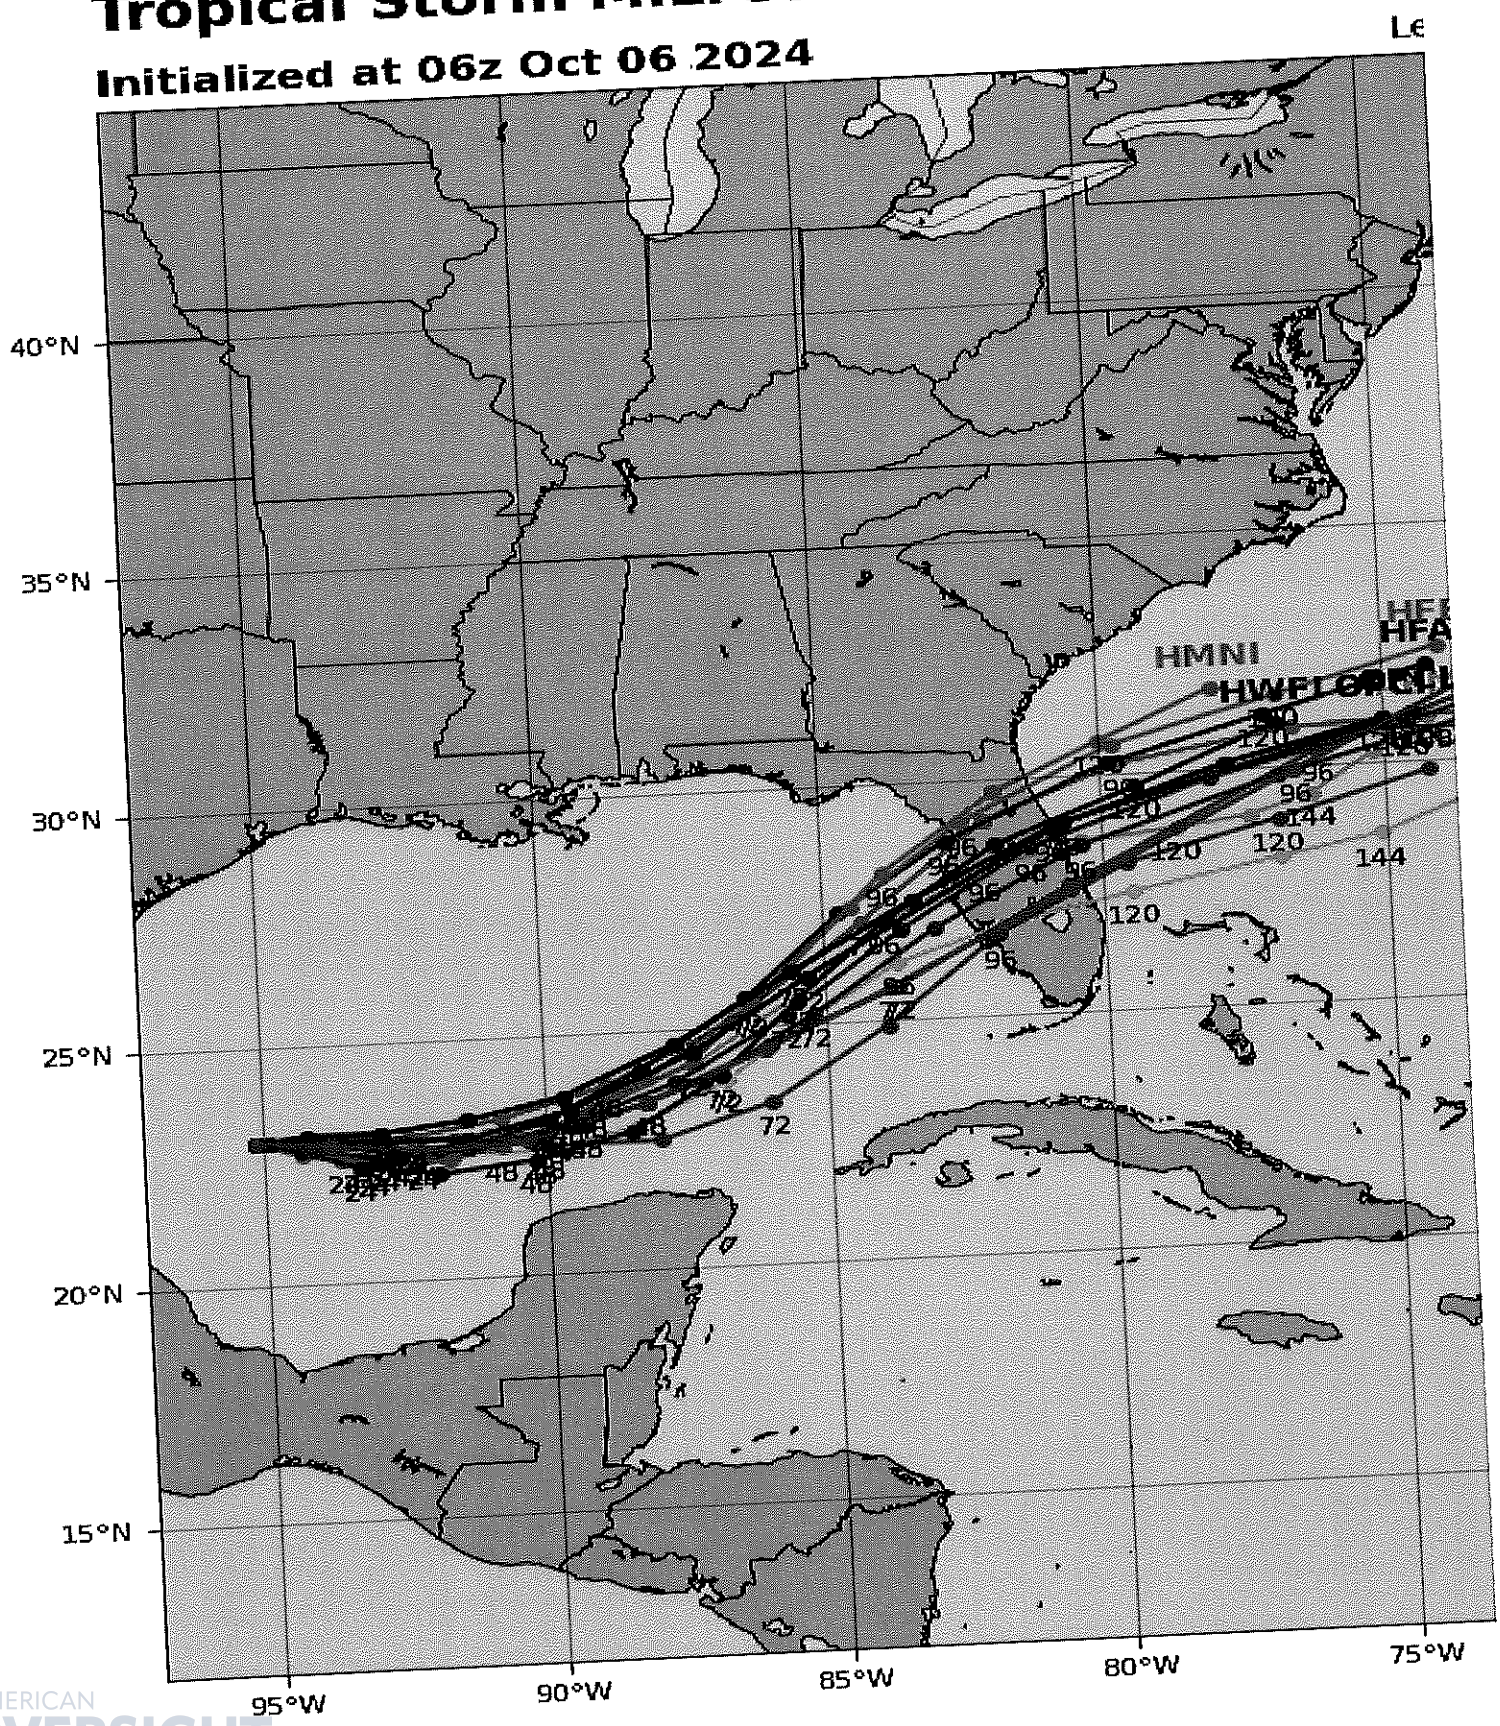
Subject:	Tropical Storm Milton - Update #8

The 8:00 AM update shows that Milton is forecast to become a Major Category 3 Hurricane before making landfall. Timing, tracks, and intensity are still unpredictable; however, the National Hurricane Center still shows the track toward the Tampa area.



The current forecast is as follows:

- There is a Flood Watch for the entire area through Thursday.
- Rainfall in the amount of 5" to 8", with localized totals up to 12".
- The timing of the impacts is from late Tuesday through early Thursday morning, but it is expected to make landfall on the West Coast on Wednesday.
- There is great uncertainty about where the storm will make landfall. The average Day 4 track error is around 150 miles, so we are still well within a possible landfall range.
- The current earliest wind time arrival is 4 PM on Tuesday, and the most likely arrival time is 2 AM on Wednesday.



Additional notifications for this update include:

- Personnel should maintain at least ½ tank at all times. Due to current fuel runs, please use any opportunity to make sure your agency vehicle stays full at all times.
- Personnel who must fuel and have no other options may use 89 or 93 Octane fuel.
- Select IMT members have been activated. Please send requests to IMT@sheriffleefl.org.
- The select CRU members who were notified individually will report at 10:00 AM to the Headquarters Training Room (1202).
- The asset movement members who were notified individually will report at 10:00 AM to the Headquarters Training Room (1202).
- All units, components, precincts, corrections facilities, and all affected agency departments should fill up all available gas cans and gas tanks.
- Pine Island Fire Department is out of sand. They still have sandbags. They expect to get more sand on Monday.

Subject: Tropical Storm Milton - Update #7

With the 5:00 PM update, Tropical Storm Milton is now expected to arrive as a major hurricane. The track has shifted some to the north; however, some model tracks still show direct hits our our area, and we are still in the cone of uncertainty. Please recall from prior storms that although we are not in the direct path, the effects of the hurricane will still affect us heavily, especially in the areas prone to storm surge. Additionally, the peak storm

AMERICAN OVERSIGHT

surge from Helene arrived almost 10 hours after the peak winds, so all personnel should be aware of and consider the effects before, during, and after the storm.

The below preparations remain in effect. The only change for this period is:

- Four (4) additional shallow water vessels have been obtained for water rescues.
- Additional High-Water Vehicles have been obtained and will be deployed to the islands for potential high-water rescues.
- The San Carlos Park Fire Department is out of sand and sandbags.

From: IMT <IMT@sheriffleefl.org>
Sent: Saturday, October 5, 2024 3:50 PM
To: All Users <AllUsers@sheriffleefl.org>
Subject: Tropical Storm Milton - Update #6

As of a 12:25 PM National Hurricane Center update, Tropical Storm Milton has formed. This storm is forecast to strengthen and bring the risk of life-threatening impacts to portions of the West Coast of Florida next week. The maximum winds are currently estimated at 40 mph with higher gusts. Models range in intensity from a Tropical Storm to a Major Hurricane, so there is tremendous unpredictability in the strength upon arrival.

At this time, the Incident Management Team is preparing for the possibility of a major hurricane affecting our area with impacts beginning on Tuesday and a full impact on Wednesday.

All agency personnel are encouraged to prepare as follows:

- All personnel should review their hurricane plans, and prepare their homes and families for the possibility of a hurricane impact in the middle of next week.
- All precincts should secure their mobile assets (decoy vehicles, arrow boards, trailers, ATVs, etc.) beginning on immediately to be completed by 2:00 PM on Monday.
- All trailers should be brought to storage beginning immediately to be completed by 2:00 PM on Monday.
- All personnel should use the remainder of this weekend to prepare for a possible activation. This plan should include three days worth of food, uniforms, and supplies.
- All personnel should use the remainder of this weekend to prepare their uniforms and equipment (including sufficient batteries for equipment) for a possible activation.
- All specialty units should begin bringing their assets back to their storage areas and secure locations. This should be completed by 2:00 PM on Monday.
- All precincts should secure any items that can be moved by the wind to a secure location starting immediately to be completed by 2:00 PM on Monday.
- All Corrections facilities (including Nan's Ranch) should prepare their facilities for a possible hurricane impact next week.

This is new information as of this update:

- The Waterborne Strike Team is on standby for deployment for water rescues.
- JetBlue Stadium, CenturyLink Stadium, the Lee County Gun Range, and the Andrea Lane and Sivan Road storage buildings are prepared to receive assets if needed.
- The Marine Unit is in contact with the IMT to secure the marine assets.

AMERICAN OVERSIGHT

- Known sandbag locations are as follows:
  - Punta Gorda—Free sandbags will be available at 3130 Cooper St., the last entrance on the left by flag poles.
  - Fort Myers Beach—Sand is located off of Gulf Beach Road, and bags are available at Town Hall, 2731 Oak St. (The location will provide service until 4:30 p.m. on Friday and begin Monday at 8:30 a.m.)
  - Fort Myers— South Trail Fire & Rescue will have sand and sandbags available at station 63, 5531 Halifax Ave., Fort Myers—a maximum of 20 bags per household. UPDATE: South Trail Fire & Rescue is currently out of sand. Empty sandbags only are available.
  - Naples— Sandbags will be available at three public park locations: Big Corkscrew Island Regional Park, 810 39th Ave., North Collier Regional Park, 15000 Livingston Road, in the Sun-N-Fun Lagoon parking lot, and at Donna Fiala Eagle Lakes Community Park, 11565 Tamiami Trail East, in the grassy area between the parking lots. The Naples sandbag locations will begin service at 8 a.m. through dusk on Saturday and Sunday.
  - San Carlos Park—Sand and sandbags are available at San Carlos Park Fire District Station 54, located at 16900 Oriole Road. There is a limit of 10 bags per household. Bags can be picked up at the lobby. Bring your own shovel. Be prepared to fill and load your own sandbags. Make sure your vehicle can transport the weight of the sandbags.
  - North Fort Myers—Sandbags will be located at North Fort Myers Parks and Recreation, 2000 N. Recreation Parkway. Sand will be located in the back of the park, next to the county mulch pile. Please bring your own shovel to fill the bags.
  - Matlacha—Sandbags are available for pickup at Station 1, located at 5700 Pine Island Rd, Bokeelia, FL 33922
- IMT personnel are visiting the precincts, and the storage locations to inventory assets to prepare for both securement and post-storm deployment.
- No schedule changes are expected between now and Monday afternoon; however, all personnel should be prepared for schedule adjustments.
- The Agriculture assets are secured on the Olga site.

Subject: Important Update on a possible impending hurricane impacting our area (Update #5)

Team,

IMT has been working on preparation for a potential Hurricane impacting our area early next week. IMT will continue to send out updates regularly so please monitor your email closely. All agency units need to begin preparations of securing their assigned assets and communicate all movement to IMT. Also, update the major asset application on the intranet. We have secured Jet Blue Park as an asset staging area for Marine and other assets. Agency asset storage facilities to include the gun range are preparing to house assets as well. IMT is securing high water vehicles that will be pre-staged at strategic locations i.e., the barrier islands. IMT members will be in the RTIC today coordinating efforts. Agency extension 239-258-3150 is being setup to communicate to IMT staff. Additional updates to follow.

Be prepared and be safe!

To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance - Update #4

The National Hurricane Center 2:00 PM update shows the possibility of development as the low pressure area in the Gulf of Mexico moves slowly eastward or northeastward. A tropical or subtropical depression or storm could form during the early to middle part of next week if the low remains separate from a frontal boundary that is forecast to extend across the Gulf of Mexico. Regardless of development, locally heavy rains could occur over portions of the Florida Peninsula late this weekend into next week. As of this update, the formation chance in the next 48 hours is low at 10 %, and the formation chance through 7 days has increased to 50%.

Current model runs show an arrival time of any potential storm around Wednesday of next week. This represents a slower forward storm speed and later storm arrival than previous model runs, so the timing and impacts are still largely unknown. Regardless of any potential storm, significant rainfall is still expected, and the Incident Management Team will continue to monitor and update all personnel.

From: IMT <IMT@sheriffleefl.org>
Sent: Thursday, October 3, 2024 9:56 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance - Update #3

The National Hurricane Center has reduced the chance of tropical cyclone development within seven days to 30%. While the system is likely to develop over the Gulf of Mexico late this weekend or early next week, subsequent tropical or subtropical development could be limited by the system's potential interaction with a frontal boundary. Regardless of development, locally heavy rains could occur over portions of the Florida Peninsula next week.

From: IMT <IMT@sheriffleefl.org>
Sent: Wednesday, October 2, 2024 12:08 PM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance - Update #2

The forecast for the area of disorganized showers remains the same; it is still too early to tell if the system will develop further. Regardless of development, heavy rain is expected in our area into the weekend and next week. The Incident Management Team will continue to monitor.

From: IMT <IMT@sheriffleefl.org>
Sent: Tuesday, October 1, 2024 10:35 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance - Update #1

The area of disorganized showers remains at a 40% chance of development. The National Hurricane Center indicates that environmental conditions could support some gradual development of this system, and a tropical depression could form towards the end of this week or this weekend while it moves generally northwestward over the northwestern Caribbean Sea and into the Gulf of Mexico. As of this time, there are no changes, but some long range models show an increased chance of this disturbance affecting our area.

AMERICAN OVERSIGHT

From: IMT <IMT@sheriffleefl.org>
Sent: Monday, September 30, 2024 8:11 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance

The Incident Management Team is monitoring a new area of disorganized showers and thunderstorms over the western Caribbean Sea. The National Weather Center states that the system has a medium chance (40%) of developing towards the middle to latter part of the week as it moves northwestward into the Gulf of Mexico. As this disturbance moves into the gulf, increasing moisture is expected over the Florida Peninsula and elevated rain chances are anticipated from Friday through the weekend, and possibly into early next week.

Unfortunately, long range models show the possibility of direct impacts for Southwest Florida; however, It is too early to determine what, if any, tropical specific impacts can be expected.

The Incident Management Team will continue to monitor the storm, and will continue to provide updates through this very active part of the hurricane season.

Subject: Tropical Storm Milton - Update #9

Employee assistance team members are on standby for employees who may need assistance with boarding windows, minor (quick) repairs for securing homes, and other needs in order to prepare for activation. If you need assistance, please e-mail the Incident Management Team at IMT@sheriffleefl.org with your address, specific need, and any exigent circumstances that would require a priority response (elderly family members, light duty employees who need help, etc.). If you do not have access to e-mail, you may call 239-258-3150. They will relay the message to the Incident Management Team.

Please note that employee assistance members **do not** have plywood/shutters, etc. They can only assist you with the items that you already have.

Supervisors, please relay this information to your employees who may not have access to e-mail.

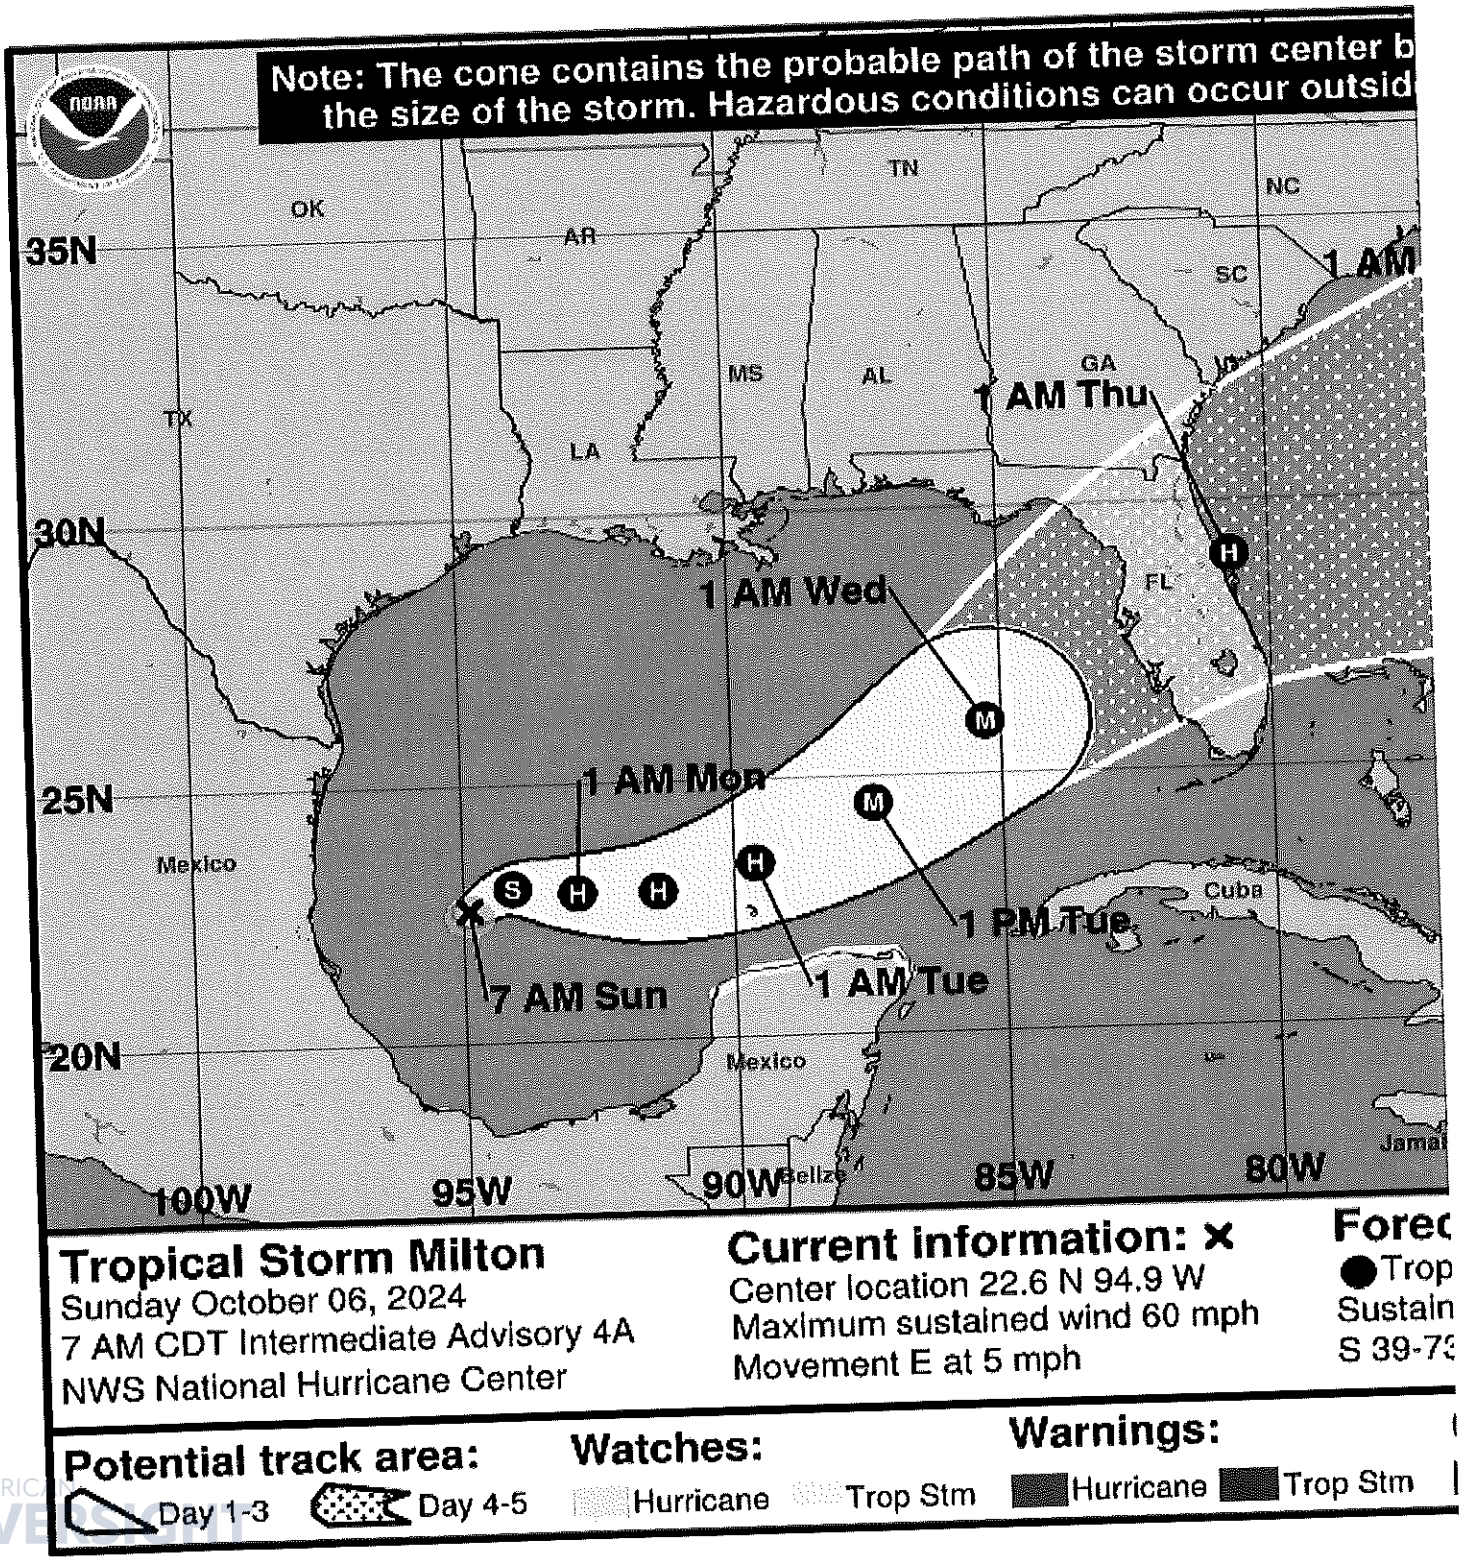
Subject: Tropical Storm Milton - Update #8

The 8:00 AM update shows that Milton is forecast to become a Major Category 3 Hurricane before making landfall. Timing, tracks, and intensity are still unpredictable; however, the National Hurricane Center still shows the track toward the Tampa area.

The current forecast is as follows:

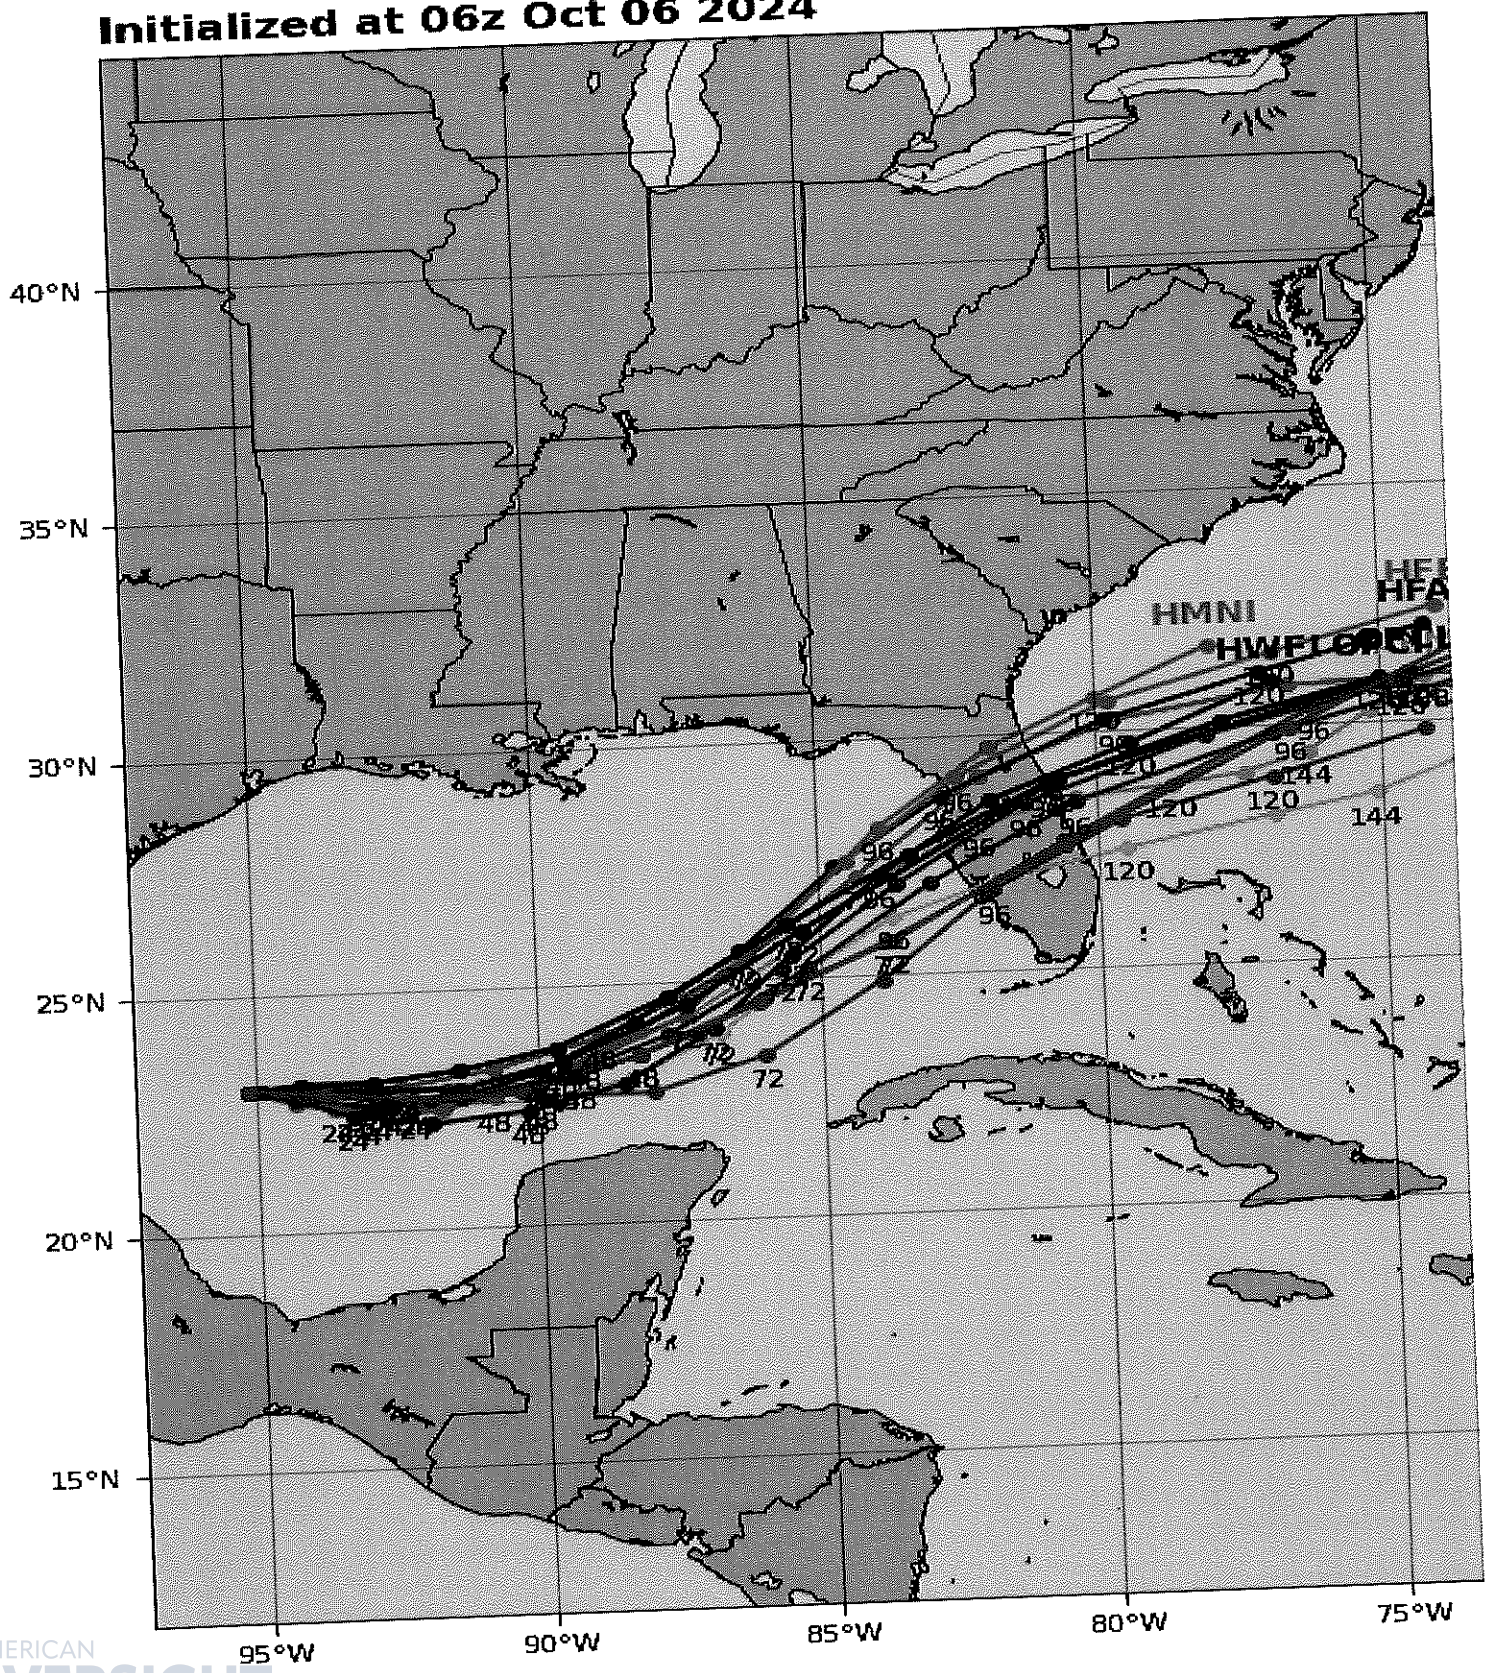


- There is a Flood Watch for the entire area through Thursday.
- Rainfall in the amount of 5" to 8", with localized totals up to 12".
- The timing of the impacts is from late Tuesday through early Thursday morning, but it is expected to make landfall on the West Coast on Wednesday.
- There is great uncertainty about where the storm will make landfall. The average Day 4 track error is around 150 miles, so we are still well within a possible landfall range.
- The current earliest wind time arrival is 4 PM on Tuesday, and the most likely arrival time is 2 AM on Wednesday.

Additional notifications for this update include:

- Personnel should maintain at least ½ tank at all times. Due to current fuel runs, please use any opportunity to make sure your agency vehicle stays full at all times.
- Personnel who must fuel and have no other options may use 89 or 93 Octane fuel.
- Select IMT members have been activated. Please send requests to IMT@sheriffleefl.org.
- The select CRU members who were notified individually will report at 10:00 AM to the Headquarters Training Room (1202).

AMERICAN OVERSIGHT



- The asset movement members who were notified individually will report at 10:00 AM to the Headquarters Training Room (1202).
- All units, components, precincts, corrections facilities, and all affected agency departments should fill up all available gas cans and gas tanks.
- Pine Island Fire Department is out of sand. They still have sandbags. They expect to get more sand on Monday.

Subject: Tropical Storm Milton - Update #7

With the 5:00 PM update, Tropical Storm Milton is now expected to arrive as a major hurricane. The track has shifted some to the north; however, some model tracks still show direct hits our our area, and we are still in the cone of uncertainty. Please recall from prior storms that although we are not in the direct path, the effects of the hurricane will still affect us heavily, especially in the areas prone to storm surge. Additionally, the peak storm

AMERICAN OVERSIGHT

surge from Helene arrived almost 10 hours after the peak winds, so all personnel should be aware of and consider the effects before, during, and after the storm.

The below preparations remain in effect. The only change for this period is:

- Four (4) additional shallow water vessels have been obtained for water rescues.
- Additional High-Water Vehicles have been obtained and will be deployed to the islands for potential high-water rescues.
- The San Carlos Park Fire Department is out of sand and sandbags.

Subject: Tropical Storm Milton - Update #6

As of a 12:25 PM National Hurricane Center update, Tropical Storm Milton has formed. This storm is forecast to strengthen and bring the risk of life-threatening impacts to portions of the West Coast of Florida next week. The maximum winds are currently estimated at 40 mph with higher gusts. Models range in intensity from a Tropical Storm to a Major Hurricane, so there is tremendous unpredictability in the strength upon arrival.

At this time, the Incident Management Team is preparing for the possibility of a major hurricane affecting our area with impacts beginning on Tuesday and a full impact on Wednesday.

All agency personnel are encouraged to prepare as follows:

- All personnel should review their hurricane plans, and prepare their homes and families for the possibility of a hurricane impact in the middle of next week.
- All precincts should secure their mobile assets (decoy vehicles, arrow boards, trailers, ATVs, etc.) beginning on immediately to be completed by 2:00 PM on Monday.
- All trailers should be brought to storage beginning immediately to be completed by 2:00 PM on Monday.
- All personnel should use the remainder of this weekend to prepare for a possible activation. This plan should include three days worth of food, uniforms, and supplies.
- All personnel should use the remainder of this weekend to prepare their uniforms and equipment (including sufficient batteries for equipment) for a possible activation.
- All specialty units should begin bringing their assets back to their storage areas and secure locations. This should be completed by 2:00 PM on Monday.
- All precincts should secure any items that can be moved by the wind to a secure location starting immediately to be completed by 2:00 PM on Monday.
- All Corrections facilities (including Nan's Ranch) should prepare their facilities for a possible hurricane impact next week.

This is new information as of this update:

- The Waterborne Strike Team is on standby for deployment for water rescues.
- JetBlue Stadium, CenturyLink Stadium, the Lee County Gun Range, and the Andrea Lane and Sivan Road storage buildings are prepared to receive assets if needed.
- The Marine Unit is in contact with the IMT to secure the marine asset

AMERICAN OVERSIGHT

- Known sandbag locations are as follows:
  - Punta Gorda—Free sandbags will be available at 3130 Cooper St., the last entrance on the left by flag poles.
  - Fort Myers Beach—Sand is located off of Gulf Beach Road, and bags are available at Town Hall, 2731 Oak St. (The location will provide service until 4:30 p.m. on Friday and begin Monday at 8:30 a.m.)
  - Fort Myers— South Trail Fire & Rescue will have sand and sandbags available at station 63, 5531 Halifax Ave., Fort Myers—a maximum of 20 bags per household. UPDATE: South Trail Fire & Rescue is currently out of sand. Empty sandbags only are available.
  - Naples— Sandbags will be available at three public park locations: Big Corkscrew Island Regional Park, 810 39th Ave., North Collier Regional Park, 15000 Livingston Road, in the Sun-N-Fun Lagoon parking lot, and at Donna Fiala Eagle Lakes Community Park, 11565 Tamiami Trail East, in the grassy area between the parking lots. The Naples sandbag locations will begin service at 8 a.m. through dusk on Saturday and Sunday.
  - San Carlos Park—Sand and sandbags are available at San Carlos Park Fire District Station 54, located at 16900 Oriole Road. There is a limit of 10 bags per household. Bags can be picked up at the lobby. Bring your own shovel. Be prepared to fill and load your own sandbags. Make sure your vehicle can transport the weight of the sandbags.
  - North Fort Myers—Sandbags will be located at North Fort Myers Parks and Recreation, 2000 N. Recreation Parkway. Sand will be located in the back of the park, next to the county mulch pile. Please bring your own shovel to fill the bags.
  - Matlacha—Sandbags are available for pickup at Station 1, located at 5700 Pine Island Rd, Bokeelia, FL 33922
- IMT personnel are visiting the precincts, and the storage locations to inventory assets to prepare for both securement and post-storm deployment.
- No schedule changes are expected between now and Monday afternoon; however, all personnel should be prepared for schedule adjustments.
- The Agriculture assets are secured on the Olga site.

Subject: Important Update on a possible impending hurricane impacting our area (Update #5)

Team,

IMT has been working on preparation for a potential Hurricane impacting our area early next week. IMT will continue to send out updates regularly so please monitor your email closely. All agency units need to begin preparations of securing their assigned assets and communicate all movement to IMT. Also, update the major asset application on the intranet. We have secured Jet Blue Park as an asset staging area for Marine and other assets. Agency asset storage facilities to include the gun range are preparing to house assets as well. IMT is securing high water vehicles that will be pre-staged at strategic locations i.e., the barrier islands. IMT members will be in the RTIC today coordinating efforts. Agency extension 239-258-3150 is being setup to communicate to IMT staff. Additional updates to follow.

Be prepared and be safe!

Subject: New Caribbean Disturbance - Update #4

The National Hurricane Center 2:00 PM update shows the possibility of development as the low pressure area in the Gulf of Mexico moves slowly eastward or northeastward. A tropical or subtropical depression or storm could form during the early to middle part of next week if the low remains separate from a frontal boundary that is forecast to extend across the Gulf of Mexico. Regardless of development, locally heavy rains could occur over portions of the Florida Peninsula late this weekend into next week. As of this update, the formation chance in the next 48 hours is low at 10 %, and the formation chance through 7 days has increased to 50%.

Current model runs show an arrival time of any potential storm around Wednesday of next week. This represents a slower forward storm speed and later storm arrival than previous model runs, so the timing and impacts are still largely unknown. Regardless of any potential storm, significant rainfall is still expected, and the Incident Management Team will continue to monitor and update all personnel.

Subject: New Caribbean Disturbance - Update #3

The National Hurricane Center has reduced the chance of tropical cyclone development within seven days to 30%. While the system is likely to develop over the Gulf of Mexico late this weekend or early next week, subsequent tropical or subtropical development could be limited by the system's potential interaction with a frontal boundary. Regardless of development, locally heavy rains could occur over portions of the Florida Peninsula next week.

Subject: New Caribbean Disturbance - Update #2

The forecast for the area of disorganized showers remains the same; it is still too early to tell if the system will develop further. Regardless of development, heavy rain is expected in our area into the weekend and next week. The Incident Management Team will continue to monitor.

From: IMT <IMT@sheriffleefl.org>
Sent: Tuesday, October 1, 2024 10:35 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance - Update #1

The area of disorganized showers remains at a 40% chance of development. The National Hurricane Center indicates that environmental conditions could support some gradual development of this system, and a tropical depression could form towards the end of this week or this weekend while it moves generally northwestward over the northwestern Caribbean Sea and into the Gulf of Mexico. As of this time, there are no changes, but some long range models show an increased chance of this disturbance affecting our area.

AMERICAN OVERSIGHT

Sent: Monday, September 30, 2024 8:11 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance

The Incident Management Team is monitoring a new area of disorganized showers and thunderstorms over the western Caribbean Sea. The National Weather Center states that the system has a medium chance (40%) of developing towards the middle to latter part of the week as it moves northwestward into the Gulf of Mexico. As this disturbance moves into the gulf, increasing moisture is expected over the Florida Peninsula and elevated rain chances are anticipated from Friday through the weekend, and possibly into early next week.

Unfortunately, long range models show the possibility of direct impacts for Southwest Florida; however, It is too early to determine what, if any, tropical specific impacts can be expected.

The Incident Management Team will continue to monitor the storm, and will continue to provide updates through this very active part of the hurricane season.

The City of Bonita Springs asks residents to take action to prepare as tropical activity increases

AMERICAN OVERSIGHT

Governor DeSantis has declared a State of Local Emergency for Lee County. The City is working closely with our partner agencies, Lee County Government, Lee County Emergency Management,

Florida Division of Emergency Management, the National Weather Service, and the National Hurricane Center as the storm moves toward Florida. With heightened tropical activity, we encourage residents to take steps to prepare for Tropical Storm Milton.

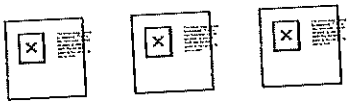
Preparedness Tips

1. Create a Hurricane Preparedness Plan: Make sure your family knows what to do before, during, and after a storm.

2. Sign Up for Alerts: Stay informed with emergency notifications through AlertLee, an emergency notification system that keeps you informed through phone, text, and/or email.

3. Review your Evacuation Zone and Flood Zone. Review the AllHazards Guide.

4. Stay Updated:
   - Visit The City of Bonita Springs Website for Strom Preparedness Information
   - Visit www.leegov.com and check out our updated storm newsletter for detailed information.
   - Monitor local media outlets, the National Weather Service-Tampa, and the National Hurricane Center.
   - Download the LeePrepares app from Google Play or the App Store.



5. Have a plan:
   - Double check your Family Emergency Plan and an Emergency Supply Kit.
     - Find tips at www.leegov.com/hurricane.
     - Your Family Emergency Plan should include where you would evacuate – like a family member's or friend's home or a community outside the area.
     - Your Family Emergency Plan should include a list of steps, such as securing loose items in your yard and ensuring your shutters are up. Review this list now and ensure you have what you need on hand as you continue to monitor the tropics.
     - If you or your family member is in need use of a Special Needs Shelter during a severe weather event visit the Special Needs Shelter website to learn more about the program and to register: www.leegov.com/publicsafety/emergencymanagement/shelters/specialneedsprogram

AMERICAN OVERSIGHT

In the event of heavy rain, it will take the infrastructure time to drain. Please use caution and don't drive through flooded roads. If the roadway is covered with water, take another route. Stay safe and be prepared! For more information, visit www.cityofbonitasprings.org.Follow the City of Bonita Springs on Facebook.

Tune in to Bonita TV by streaming live on the city website or the following cable distribution systems:

- Comcast, channel 98.
- Hotwire, channel 398.
- Summit broadband, channel 96.

Good morning,

My name is Alyssa Adler and I am a Booking Producer at FOX Weather.

I am reaching out in anticipation of Milton, which is expected to reach major hurricane status before impacting parts of Florida this week.

We are looking to see if Lee County Sheriff Carmine Marceno would be available for a LIVE **video virtual** interview on **Monday, October 7th or Tuesday, October 8th** to discuss this. The interview would only take approximately 4-6 minutes. **Please let me know what day/time work best, as we are flexible.**

I can provide more details, if interested.

Fox Weather interview with Stephen Morgan https://www.foxweather.com/person/m/stephen-morgan

Rtic clear by 10am Monday. Sheriff Marceno in place by 1015. Tech aware. Zoom equipment will remain in Rtic for the duration of the storm.

Updated: 10/7/24 @ 0820

Hurricane Milton

-The Lee County Sheriff's Office Incident Management Team is actively monitoring Hurricane Milton and is FULLY activated.

-Milton is expected to continue intensify and will make landfall on the west coast of the Florida's peninsula.

-At this time, exact landfall is uncertain but Lee County is expected to experience storm impacts to include SURGE.

-Just as you would all prepare for a storm at home, LCSO has done the same. We have secured all mobile assets to include our Marine Unit vessels due to the anticipated impacts from Milton.

AMERICAN OVERSIGHT

-LCSO is READY! Our Waterbourne Strike Team and Marine Unit, Special Ops are standing by should the need arise to rescue people.

-That being said, know your Evacuation Zone and be prepared to leave if your zone is called.

-Four (4) additional shallow water vessels have been obtained for water rescues.

-our academy cadets are utilizing an excavator to place sand at local fire stations for residents in need.

-Additional High-Water Vehicles have been obtained and will be deployed to the islands for potential high-water rescues.

-We urge everyone to prepare for this storm! Prepare for the worst, but hope for the best!

-We know what Mother Nature can do! She is unpredictable, which is why we urge everyone NOT to wait until the last minute to have everything that you need.

-Make sure you have necessary hurricane supplies: enough food, water, and medicine for several days.

-Have a hurricane plan with your family and be up to date with it. Topics should include an evacuation plan, sheltering in place, pets, miscellaneous family needs.

-Milton is now a MAJOR HURRICANE

-LCSO administrative services at precinct offices will be halted unit after the storm so we can focus on preparation and possible recovery efforts.

-Once we get sustained winds of 45 MPH, emergency response is stopped until it's safe to respond to calls.

-It could take several hours or more for the winds to subside before a deputy is able to respond, once the impacts begin. SHELTER IN PLACE.

AMERICAN OVERSIGHT

-Don't try to drive anywhere in inclement conditions as the roadways are not safe.

-Do NOT go outside during the storm as wind and standing water create hazard that can be fatal.

-Remember the three phases of the storm: BEFORE, DURING, and AFTER. Have you plan for all three.

-Continue to monitor your local media for weather updates, as well as the Lee County Sheriff's Office and Lee County Government on social media for the latest updates.

-WE ARE SWFL STRONG and are IN THIS TOGETHER

Good morning,

My name is Alyssa Adler and I am a Booking Producer at FOX Weather.

I am reaching out in anticipation of Milton, which is expected to reach major hurricane status before impacting parts of Florida this week.

We are looking to see if Lee County Sheriff Carmine Marceno would be available for a LIVE **video virtual** interview on **Monday, October 7th or Tuesday, October 8th** to discuss this. The interview would only take approximately 4-6 minutes. **Please let me know what day/time work best, as we are flexible.**

I can provide more details, if interested.

AMERICAN OVERSIGHT

Subject:	Fox Weather Natl Interview
Location:	RTIC - HQ
Start:	Mon 10/7/2024 10:30 AM
End:	Mon 10/7/2024 10:45 AM
Recurrence:	(none)
Meeting Status:	Accepted
Organizer:	Anita Iriarte
Required Attendees:	Christopher Fine; Todd Olmer; Sarah Rodriguez; Christopher Lalor; Anita Iriarte; Katie Walter; Jessie Santero; Autumn King; James Heuglin; Tara Thrower; John Holloway; Robert DeAngelo; Herbert Ellis; Julie Martin; Carmine Marceno; Daniel Greenup; Kevin Ferry; Mark Shelly; Jonathan Taylor; Joshua Hanchey
Optional Attendees:	Joshua Quaintance; Kevin Ellis

Fox Weather interview with Stephen Morgan https://www.foxweather.com/person/m/stephen-morgan

Rtic clear by 10am Monday. Sheriff Marceno in place by 1015. Tech aware. Zoom equipment will remain in Rtic for the duration of the storm.

Updated: 10/7/24 @ 0820

Hurricane Milton

-The Lee County Sheriff's Office Incident Management Team is actively monitoring Hurricane Milton and is FULLY activated.

-Milton is expected to continue intensify and will make landfall on the west coast of the Florida's peninsula.

-At this time, exact landfall is uncertain but Lee County is expected to experience storm impacts to include SURGE.

-Just as you would all prepare for a storm at home, LCSO has done the same. We have secured all mobile assets to include our Marine Unit vessels due to the anticipated impacts from Milton.

AMERICAN OVERSIGHT

-LCSO is READY! Our Waterbourne Strike Team and Marine Unit, Special Ops are standing by should the need arise to rescue people.

-That being said, know your Evacuation Zone and be prepared to leave if your zone is called.

-Four (4) additional shallow water vessels have been obtained for water rescues.

-our academy cadets are utilizing an excavator to place sand at local fire stations for residents in need.

-Additional High-Water Vehicles have been obtained and will be deployed to the islands for potential high-water rescues.

-We urge everyone to prepare for this storm! Prepare for the worst, but hope for the best!

-We know what Mother Nature can do! She is unpredictable, which is why we urge everyone NOT to wait until the last minute to have everything that you need.

-Make sure you have necessary hurricane supplies: enough food, water, and medicine for several days.

-Have a hurricane plan with your family and be up to date with it. Topics should include an evacuation plan, sheltering in place, pets, miscellaneous family needs.

-Milton is now a MAJOR HURRICANE

-LCSO administrative services at precinct offices will be halted unit after the storm so we can focus on preparation and possible recovery efforts.

-Once we get sustained winds of 45 MPH, emergency response is stopped until it's safe to respond to calls.

AMERICAN OVERSIGHT

-It could take several hours or more for the winds to subside before a deputy is able to respond, once the impacts begin. SHELTER IN PLACE.

FL-LEE-24-2340-A-000227

-Don't try to drive anywhere in inclement conditions as the roadways are not safe.

-Do NOT go outside during the storm as wind and standing water create hazard that can be fatal.

-Remember the three phases of the storm: BEFORE, DURING, and AFTER. Have you plan for all three.

-Continue to monitor your local media for weather updates, as well as the Lee County Sheriff's Office and Lee County Government on social media for the latest updates.

-WE ARE SWFL STRONG and are IN THIS TOGETHER

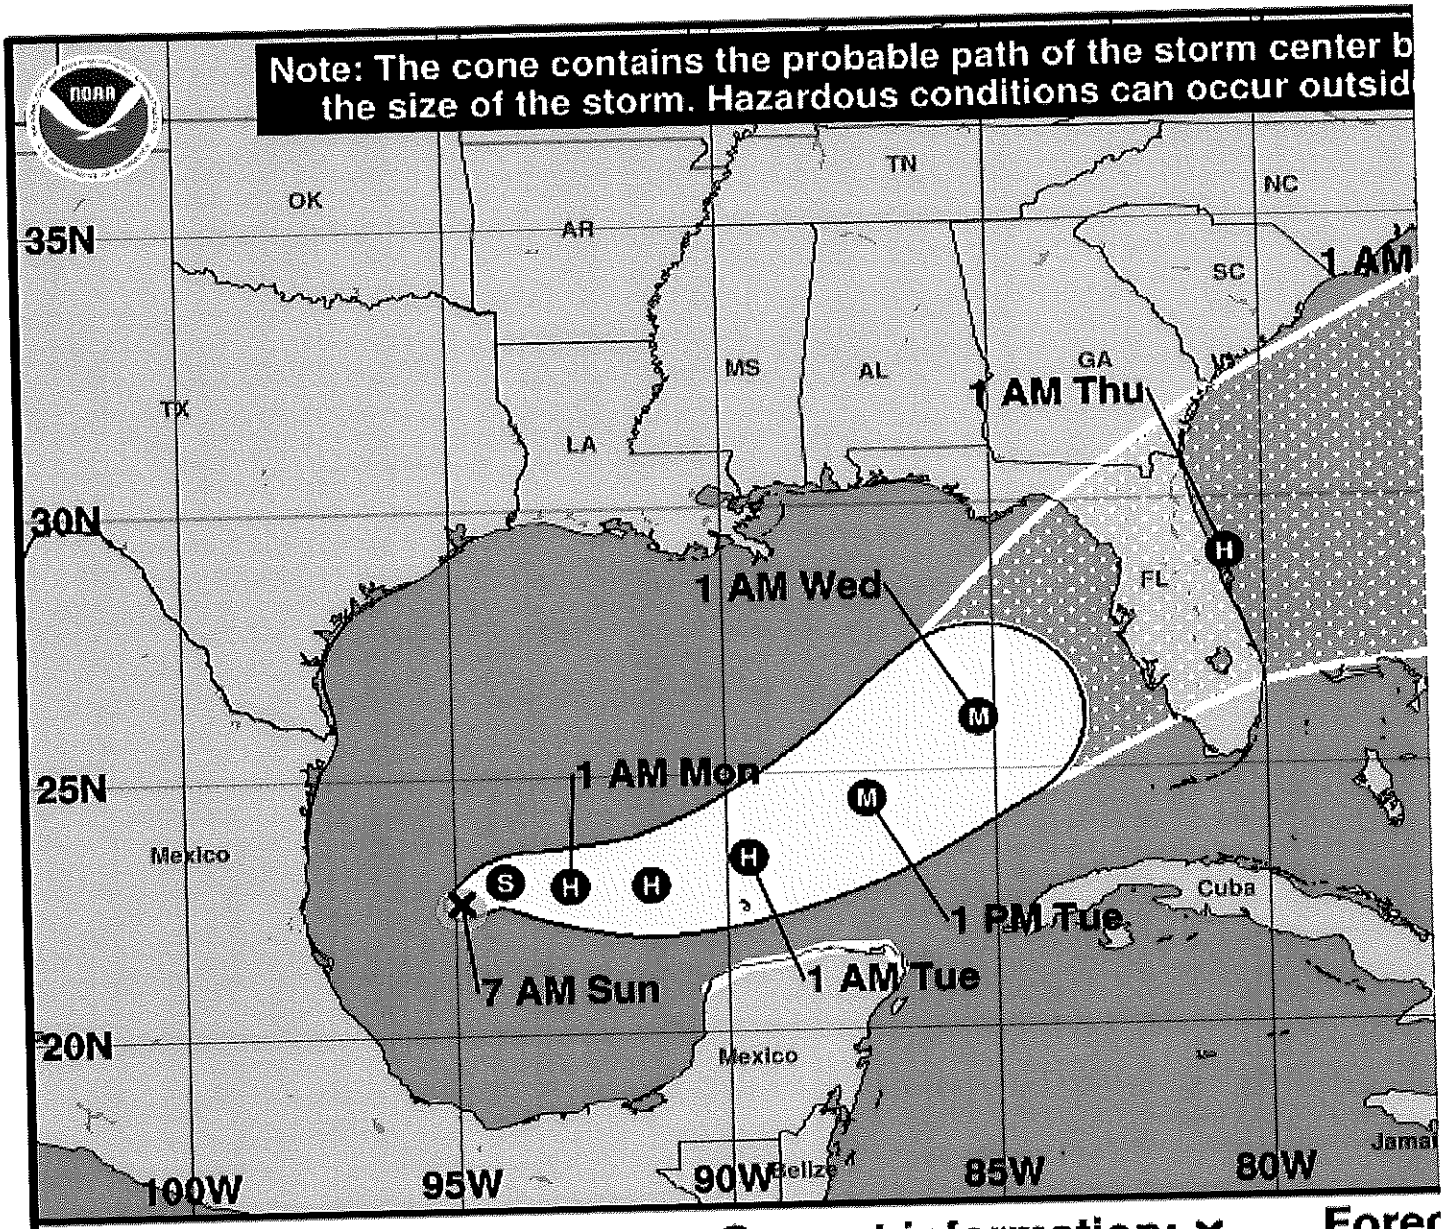
Subject: Tropical Storm Milton - Update #8

The 8:00 AM update shows that Milton is forecast to become a Major Category 3 Hurricane before making landfall. Timing, tracks, and intensity are still unpredictable; however, the National Hurricane Center still shows the track toward the Tampa area.

The current forecast is as follows:

- There is a Flood Watch for the entire area through Thursday.
- Rainfall in the amount of 5" to 8", with localized totals up to 12".
- The timing of the impacts is from late Tuesday through early Thursday morning, but it is expected to make landfall on the West Coast on Wednesday.
- There is great uncertainty about where the storm will make landfall. The average Day 4 track error is around 150 miles, so we are still well within a possible landfall range.



AMERICAN OVERSIGHT

- The current earliest wind time arrival is 4 PM on Tuesday, and the most likely arrival time is 2 AM on Wednesday.

Additional notifications for this update include:

- Personnel should maintain at least ½ tank at all times. Due to current fuel runs, please use any opportunity to make sure your agency vehicle stays full at all times.
- Personnel who must fuel and have no other options may use 89 or 93 Octane fuel.
- Select IMT members have been activated. Please send requests to IMT@sheriffleefl.org.
- The select CRU members who were notified individually will report at 10:00 AM to the Headquarters Training Room (1202).
- The asset movement members who were notified individually will report at 10:00 AM to the Headquarters Training Room (1202).
- All units, components, precincts, corrections facilities, and all affected agency departments should fill up all available gas cans and gas tanks.
- Pine Island Fire Department is out of sand. They still have sandbags. They expect to get more sand on Monday.

Subject: Tropical Storm Milton - Update #7

With the 5:00 PM update, Tropical Storm Milton is now expected to arrive as a major hurricane. The track has shifted some to the north; however, some model tracks still show direct hits our our area, and we are still in the cone of uncertainty. Please recall from prior storms that although we are not in the direct path, the effects of the hurricane will still affect us heavily, especially in the areas prone to storm surge. Additionally, the peak storm

AMERICAN OVERSIGHT

surge from Helene arrived almost 10 hours after the peak winds, so all personnel should be aware of and consider the effects before, during, and after the storm.

The below preparations remain in effect. The only change for this period is:

- Four (4) additional shallow water vessels have been obtained for water rescues.
- Additional High-Water Vehicles have been obtained and will be deployed to the islands for potential high-water rescues.
- The San Carlos Park Fire Department is out of sand and sandbags.

Subject: Tropical Storm Milton - Update #6

As of a 12:25 PM National Hurricane Center update, Tropical Storm Milton has formed. This storm is forecast to strengthen and bring the risk of life-threatening impacts to portions of the West Coast of Florida next week. The maximum winds are currently estimated at 40 mph with higher gusts. Models range in intensity from a Tropical Storm to a Major Hurricane, so there is tremendous unpredictability in the strength upon arrival.

At this time, the Incident Management Team is preparing for the possibility of a major hurricane affecting our area with impacts beginning on Tuesday and a full impact on Wednesday.

All agency personnel are encouraged to prepare as follows:

- All personnel should review their hurricane plans, and prepare their homes and families for the possibility of a hurricane impact in the middle of next week.
- All precincts should secure their mobile assets (decoy vehicles, arrow boards, trailers, ATVs, etc.) beginning on immediately to be completed by 2:00 PM on Monday.
- All trailers should be brought to storage beginning immediately to be completed by 2:00 PM on Monday.
- All personnel should use the remainder of this weekend to prepare for a possible activation. This plan should include three days worth of food, uniforms, and supplies.
- All personnel should use the remainder of this weekend to prepare their uniforms and equipment (including sufficient batteries for equipment) for a possible activation.
- All specialty units should begin bringing their assets back to their storage areas and secure locations. This should be completed by 2:00 PM on Monday.
- All precincts should secure any items that can be moved by the wind to a secure location starting immediately to be completed by 2:00 PM on Monday.
- All Corrections facilities (including Nan's Ranch) should prepare their facilities for a possible hurricane impact next week.

This is new information as of this update:

- The Waterborne Strike Team is on standby for deployment for water rescues.
- JetBlue Stadium, CenturyLink Stadium, the Lee County Gun Range, and the Andrea Lane and Sivan Road storage buildings are prepared to receive assets if needed.
- The Marine Unit is in contact with the IMT to secure the marine assets.

AMERICAN OVERSIGHT

- Known sandbag locations are as follows:
  - Punta Gorda—Free sandbags will be available at 3130 Cooper St., the last entrance on the left by flag poles.
  - Fort Myers Beach—Sand is located off of Gulf Beach Road, and bags are available at Town Hall, 2731 Oak St. (The location will provide service until 4:30 p.m. on Friday and begin Monday at 8:30 a.m.)
  - Fort Myers— South Trail Fire & Rescue will have sand and sandbags available at station 63, 5531 Halifax Ave., Fort Myers—a maximum of 20 bags per household. UPDATE: South Trail Fire & Rescue is currently out of sand. Empty sandbags only are available.
  - Naples— Sandbags will be available at three public park locations: Big Corkscrew Island Regional Park, 810 39th Ave., North Collier Regional Park, 15000 Livingston Road, in the Sun-N-Fun Lagoon parking lot, and at Donna Fiala Eagle Lakes Community Park, 11565 Tamiami Trail East, in the grassy area between the parking lots. The Naples sandbag locations will begin service at 8 a.m. through dusk on Saturday and Sunday.
  - San Carlos Park—Sand and sandbags are available at San Carlos Park Fire District Station 54, located at 16900 Oriole Road. There is a limit of 10 bags per household. Bags can be picked up at the lobby. Bring your own shovel. Be prepared to fill and load your own sandbags. Make sure your vehicle can transport the weight of the sandbags.
  - North Fort Myers—Sandbags will be located at North Fort Myers Parks and Recreation, 2000 N. Recreation Parkway. Sand will be located in the back of the park, next to the county mulch pile. Please bring your own shovel to fill the bags.
  - Matlacha—Sandbags are available for pickup at Station 1, located at 5700 Pine Island Rd, Bokeelia, FL 33922
- IMT personnel are visiting the precincts, and the storage locations to inventory assets to prepare for both securement and post-storm deployment.
- No schedule changes are expected between now and Monday afternoon; however, all personnel should be prepared for schedule adjustments.
- The Agriculture assets are secured on the Olga site.

Subject: Important Update on a possible impending hurricane impacting our area (Update #5)

Team,

IMT has been working on preparation for a potential Hurricane impacting our area early next week. IMT will continue to send out updates regularly so please monitor your email closely. All agency units need to begin preparations of securing their assigned assets and communicate all movement to IMT. Also, update the major asset application on the intranet. We have secured Jet Blue Park as an asset staging area for Marine and other assets. Agency asset storage facilities to include the gun range are preparing to house assets as well. IMT is securing high water vehicles that will be pre-staged at strategic locations i.e., the barrier islands. IMT members will be in the RTIC today coordinating efforts. Agency extension 239-258-3150 is being setup to communicate to IMT staff. Additional updates to follow.

Be prepared and be safe!

Subject: New Caribbean Disturbance - Update #4

The National Hurricane Center 2:00 PM update shows the possibility of development as the low pressure area in the Gulf of Mexico moves slowly eastward or northeastward. A tropical or subtropical depression or storm could form during the early to middle part of next week if the low remains separate from a frontal boundary that is forecast to extend across the Gulf of Mexico. Regardless of development, locally heavy rains could occur over portions of the Florida Peninsula late this weekend into next week. As of this update, the formation chance in the next 48 hours is low at 10 %, and the formation chance through 7 days has increased to 50%.

Current model runs show an arrival time of any potential storm around Wednesday of next week. This represents a slower forward storm speed and later storm arrival than previous model runs, so the timing and impacts are still largely unknown. Regardless of any potential storm, significant rainfall is still expected, and the Incident Management Team will continue to monitor and update all personnel.

Subject: New Caribbean Disturbance - Update #3

The National Hurricane Center has reduced the chance of tropical cyclone development within seven days to 30%. While the system is likely to develop over the Gulf of Mexico late this weekend or early next week, subsequent tropical or subtropical development could be limited by the system's potential interaction with a frontal boundary. Regardless of development, locally heavy rains could occur over portions of the Florida Peninsula next week.

Subject: New Caribbean Disturbance - Update #2

The forecast for the area of disorganized showers remains the same; it is still too early to tell if the system will develop further. Regardless of development, heavy rain is expected in our area into the weekend and next week. The Incident Management Team will continue to monitor.

From: IMT <IMT@sheriffleefl.org>
Sent: Tuesday, October 1, 2024 10:35 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance - Update #1

The area of disorganized showers remains at a 40% chance of development. The National Hurricane Center indicates that environmental conditions could support some gradual development of this system, and a tropical depression could form towards the end of this week or this weekend while it moves generally northwestward over the northwestern Caribbean Sea and into the Gulf of Mexico. As of this time, there are no changes, but some long range models show an increased chance of this disturbance affecting our area.

AMERICAN OVERSIGHT

From: IMT <IMT@sheriffleefl.org>
Sent: Monday, September 30, 2024 8:11 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance

The Incident Management Team is monitoring a new area of disorganized showers and thunderstorms over the western Caribbean Sea. The National Weather Center states that the system has a medium chance (40%) of developing towards the middle to latter part of the week as it moves northwestward into the Gulf of Mexico. As this disturbance moves into the gulf, increasing moisture is expected over the Florida Peninsula and elevated rain chances are anticipated from Friday through the weekend, and possibly into early next week.

Unfortunately, long range models show the possibility of direct impacts for Southwest Florida; however, It is too early to determine what, if any, tropical specific impacts can be expected.

The Incident Management Team will continue to monitor the storm, and will continue to provide updates through this very active part of the hurricane season.

- All precincts should secure their mobile assets (decoy vehicles, arrow boards, trailers, ATVs, etc.) beginning on immediately to be completed by 2:00 PM on Monday.
- All trailers should be brought to storage beginning immediately to be completed by 2:00 PM on Monday.
- All personnel should use the remainder of this weekend to prepare for a possible activation. This plan should include three days worth of food, uniforms, and supplies.
- All personnel should use the remainder of this weekend to prepare their uniforms and equipment (including sufficient batteries for equipment) for a possible activation.
- All specialty units should begin bringing their assets back to their storage areas and secure locations. This should be completed by 2:00 PM on Monday.
- All precincts should secure any items that can be moved by the wind to a secure location starting immediately to be completed by 2:00 PM on Monday.
- All Corrections facilities (including Nan's Ranch) should prepare their facilities for a possible hurricane impact next week.

This is new information as of this update:

- The Waterborne Strike Team is on standby for deployment for water rescues.
- JetBlue Stadium, CenturyLink Stadium, the Lee County Gun Range, and the Andrea Lane and Sivan Road storage buildings are prepared to receive assets if needed.
- The Marine Unit is in contact with the IMT to secure the marine assets.

AMERICAN OVERSIGHT

- Known sandbag locations are as follows:
  - Punta Gorda—Free sandbags will be available at 3130 Cooper St., the last entrance on the left by flag poles.
  - Fort Myers Beach—Sand is located off of Gulf Beach Road, and bags are available at Town Hall, 2731 Oak St. (The location will provide service until 4:30 p.m. on Friday and begin Monday at 8:30 a.m.)
  - Fort Myers— South Trail Fire & Rescue will have sand and sandbags available at station 63, 5531 Halifax Ave., Fort Myers—a maximum of 20 bags per household. UPDATE: South Trail Fire & Rescue is currently out of sand. Empty sandbags only are available.
  - Naples— Sandbags will be available at three public park locations: Big Corkscrew Island Regional Park, 810 39th Ave., North Collier Regional Park, 15000 Livingston Road, in the Sun-N-Fun Lagoon parking lot, and at Donna Fiala Eagle Lakes Community Park, 11565 Tamiami Trail East, in the grassy area between the parking lots. The Naples sandbag locations will begin service at 8 a.m. through dusk on Saturday and Sunday.
  - San Carlos Park—Sand and sandbags are available at San Carlos Park Fire District Station 54, located at 16900 Oriole Road. There is a limit of 10 bags per household. Bags can be picked up at the lobby. Bring your own shovel. Be prepared to fill and load your own sandbags. Make sure your vehicle can transport the weight of the sandbags.
  - North Fort Myers—Sandbags will be located at North Fort Myers Parks and Recreation, 2000 N. Recreation Parkway. Sand will be located in the back of the park, next to the county mulch pile. Please bring your own shovel to fill the bags.
  - Matlacha—Sandbags are available for pickup at Station 1, located at 5700 Pine Island Rd, Bokeelia, FL 33922
- IMT personnel are visiting the precincts, and the storage locations to inventory assets to prepare for both securement and post-storm deployment.
- No schedule changes are expected between now and Monday afternoon; however, all personnel should be prepared for schedule adjustments.
- The Agriculture assets are secured on the Olga site.

Subject: Important Update on a possible impending hurricane impacting our area (Update #5)

Team,

IMT has been working on preparation for a potential Hurricane impacting our area early next week. IMT will continue to send out updates regularly so please monitor your email closely. All agency units need to begin preparations of securing their assigned assets and communicate all movement to IMT. Also, update the major asset application on the intranet. We have secured Jet Blue Park as an asset staging area for Marine and other assets. Agency asset storage facilities to include the gun range are preparing to house assets as well. IMT is securing high water vehicles that will be pre-staged at strategic locations i.e., the barrier islands. IMT members will be in the RTIC today coordinating efforts. Agency extension 239-258-3150 is being setup to communicate to IMT staff. Additional updates to follow.

Be prepared and be safe!

Subject: New Caribbean Disturbance - Update #4

The National Hurricane Center 2:00 PM update shows the possibility of development as the low pressure area in the Gulf of Mexico moves slowly eastward or northeastward. A tropical or subtropical depression or storm could form during the early to middle part of next week if the low remains separate from a frontal boundary that is forecast to extend across the Gulf of Mexico. Regardless of development, locally heavy rains could occur over portions of the Florida Peninsula late this weekend into next week. As of this update, the formation chance in the next 48 hours is low at 10 %, and the formation chance through 7 days has increased to 50%.

Current model runs show an arrival time of any potential storm around Wednesday of next week. This represents a slower forward storm speed and later storm arrival than previous model runs, so the timing and impacts are still largely unknown. Regardless of any potential storm, significant rainfall is still expected, and the Incident Management Team will continue to monitor and update all personnel.

Subject: New Caribbean Disturbance - Update #3

The National Hurricane Center has reduced the chance of tropical cyclone development within seven days to 30%. While the system is likely to develop over the Gulf of Mexico late this weekend or early next week, subsequent tropical or subtropical development could be limited by the system's potential interaction with a frontal boundary. Regardless of development, locally heavy rains could occur over portions of the Florida Peninsula next week.

Subject: New Caribbean Disturbance - Update #2

The forecast for the area of disorganized showers remains the same; it is still too early to tell if the system will develop further. Regardless of development, heavy rain is expected in our area into the weekend and next week. The Incident Management Team will continue to monitor.

From: IMT <IMT@sheriffleefl.org>
Sent: Tuesday, October 1, 2024 10:35 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance - Update #1

The area of disorganized showers remains at a 40% chance of development. The National Hurricane Center indicates that environmental conditions could support some gradual development of this system, and a tropical depression could form towards the end of this week or this weekend while it moves generally northwestward over the northwestern Caribbean Sea and into the Gulf of Mexico. As of this time, there are no changes, but some long range models show an increased chance of this disturbance affecting our area.

AMERICAN OVERSIGHT

Sent: Monday, September 30, 2024 8:11 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance

The Incident Management Team is monitoring a new area of disorganized showers and thunderstorms over the western Caribbean Sea. The National Weather Center states that the system has a medium chance (40%) of developing towards the middle to latter part of the week as it moves northwestward into the Gulf of Mexico. As this disturbance moves into the gulf, increasing moisture is expected over the Florida Peninsula and elevated rain chances are anticipated from Friday through the weekend, and possibly into early next week.

Unfortunately, long range models show the possibility of direct impacts for Southwest Florida; however, It is too early to determine what, if any, tropical specific impacts can be expected.

The Incident Management Team will continue to monitor the storm, and will continue to provide updates through this very active part of the hurricane season.

Subject: Tropical Storm Milton - Social Media

Good morning,

The Public Information Office is looking to highlight the great work being done by LCSO in the midst of Tropical Storm Milton. Our office encourages agency members to send us any photos or video of your enforcement, calls for service, proactivity, citizen encounters, etc. so this may be accomplished.

Should you arrive to an incident location that is deemed safe, a PIO will be available to respond to capture footage of our members while working in the field.

Supervisors: If a roadway is blocked or impassible, please send a photo in real-time so an advisory may be completed.

Please email your content to:
piosocialmedia@sheriffleefl.org

Thank you all for your hard work and stay safe.

Anita

Good morning Constitutional partners,

The Emergency Operations Center (EOC) is planning to move to a Level 2, partial activation, at noon today, Sunday, Oct. 6. At this time, the plan is to move to a Level 1 activation on Monday, Oct. 7.

Please take time today to prepare your homes and families and encourage your teams to do the same.

We will be holding a Facebook Live (www.facebook.com/leecountyflbocc) event at noon today. During this Live we will announce that the county will close at noon on Monday. Announcements about reopening will be made later in the week based on the severity of the storm.

The county will sign a State of Local Emergency (SOLE) later today.

If you need anything, please let us know.

Thank you for your partnership.

Thank you,
Dave Harner

Subject:	Tropical Storm Milton - Update #12

The 11:00 AM update shows a small track shift to the south. Although it is still predicted to directly hit the Tampa Bay Area, the move slightly south may bring higher wind speeds and higher storm surge. The storm is expected to quickly intensify and will likely be a major hurricane upon arrival.

All personnel are encouraged to complete preparations for their homes and their families today.

There is still a high degree of uncertainty in both the tracks and the wind speed upon arrival, so the possibility of a direct strike to our area remains. The cone of uncertainty currently covers most of the Florida peninsula. The Incident Management Team (IMT) will keep you informed, and is making preparations to include schedule planning.

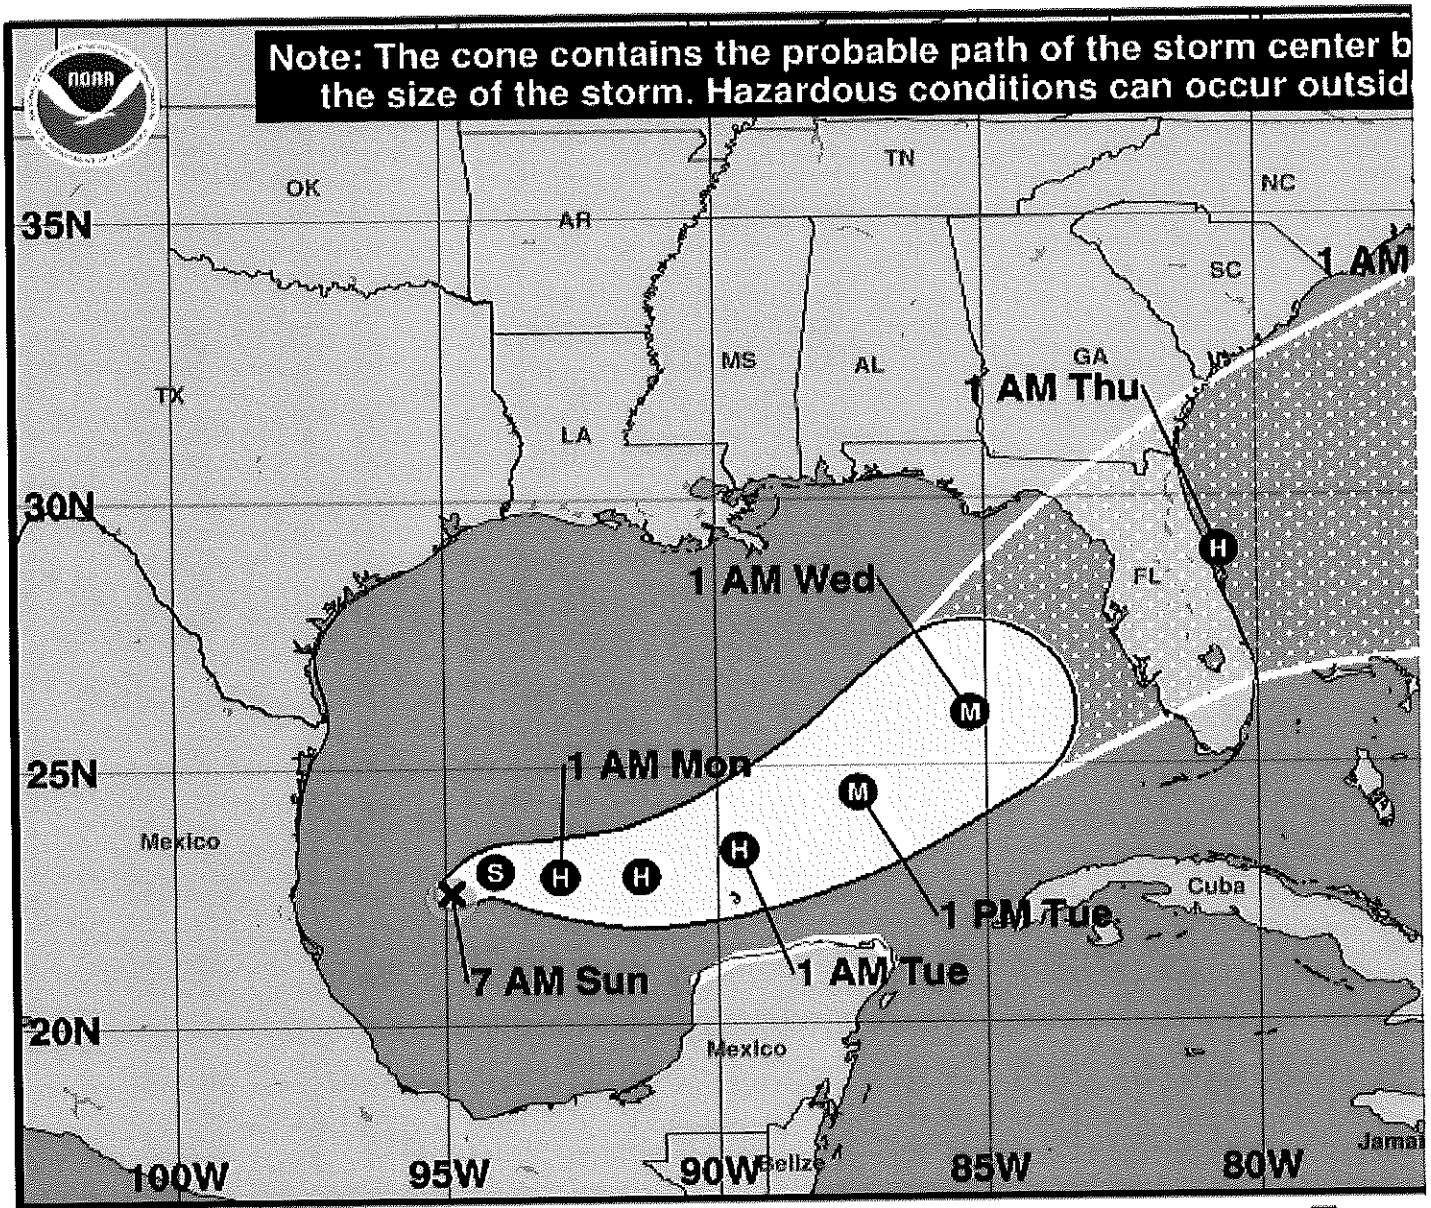
Subject: Tropical Storm Milton - Update #8

The 8:00 AM update shows that Milton is forecast to become a Major Category 3 Hurricane before making landfall. Timing, tracks, and intensity are still unpredictable; however, the National Hurricane Center still shows the track toward the Tampa area.

The current forecast is as follows:



- There is a Flood Watch for the entire area through Thursday.
- Rainfall in the amount of 5" to 8", with localized totals up to 12".
- The timing of the impacts is from late Tuesday through early Thursday morning, but it is expected to make landfall on the West Coast on Wednesday.
- There is great uncertainty about where the storm will make landfall. The average Day 4 track error is around 150 miles, so we are still well within a possible landfall range.
- The current earliest wind time arrival is 4 PM on Tuesday, and the most likely arrival time is 2 AM on Wednesday.

AMERICAN OVERSIGHT

Additional notifications for this update include:

- Personnel should maintain at least ½ tank at all times. Due to current fuel runs, please use any opportunity to make sure your agency vehicle stays full at all times.
- Personnel who must fuel and have no other options may use 89 or 93 Octane fuel.
- Select IMT members have been activated. Please send requests to IMT@sheriffleefl.org.
- The select CRU members who were notified individually will report at 10:00 AM to the Headquarters Training Room (1202).
- The asset movement members who were notified individually will report at 10:00 AM to the Headquarters Training Room (1202).
- All units, components, precincts, corrections facilities, and all affected agency departments should fill up all available gas cans and gas tanks.
- Pine Island Fire Department is out of sand. They still have sandbags. They expect to get more sand on Monday.

Subject: Tropical Storm Milton - Update #7

With the 5:00 PM update, Tropical Storm Milton is now expected to arrive as a major hurricane. The track has shifted some to the north; however, some model tracks still show direct hits our our area, and we are still in the cone of uncertainty. Please recall from prior storms that although we are not in the direct path, the effects of the hurricane will still affect us heavily, especially in the areas prone to storm surge. Additionally, the peak storm

AMERICAN OVERSIGHT

surge from Helene arrived almost 10 hours after the peak winds, so all personnel should be aware of and consider the effects before, during, and after the storm.

The below preparations remain in effect. The only change for this period is:

- Four (4) additional shallow water vessels have been obtained for water rescues.
- Additional High-Water Vehicles have been obtained and will be deployed to the islands for potential high-water rescues.
- The San Carlos Park Fire Department is out of sand and sandbags.

Sent: Saturday, October 5, 2024 3:50 PM
To: All Users <AllUsers@sheriffleefl.org>
Subject: Tropical Storm Milton - Update #6

As of a 12:25 PM National Hurricane Center update, Tropical Storm Milton has formed. This storm is forecast to strengthen and bring the risk of life-threatening impacts to portions of the West Coast of Florida next week. The maximum winds are currently estimated at 40 mph with higher gusts. Models range in intensity from a Tropical Storm to a Major Hurricane, so there is tremendous unpredictability in the strength upon arrival.

At this time, the Incident Management Team is preparing for the possibility of a major hurricane affecting our area with impacts beginning on Tuesday and a full impact on Wednesday.

All agency personnel are encouraged to prepare as follows:

- All personnel should review their hurricane plans, and prepare their homes and families for the possibility of a hurricane impact in the middle of next week.
- All precincts should secure their mobile assets (decoy vehicles, arrow boards, trailers, ATVs, etc.) beginning on immediately to be completed by 2:00 PM on Monday.
- All trailers should be brought to storage beginning immediately to be completed by 2:00 PM on Monday.
- All personnel should use the remainder of this weekend to prepare for a possible activation. This plan should include three days worth of food, uniforms, and supplies.
- All personnel should use the remainder of this weekend to prepare their uniforms and equipment (including sufficient batteries for equipment) for a possible activation.
- All specialty units should begin bringing their assets back to their storage areas and secure locations. This should be completed by 2:00 PM on Monday.
- All precincts should secure any items that can be moved by the wind to a secure location starting immediately to be completed by 2:00 PM on Monday.
- All Corrections facilities (including Nan's Ranch) should prepare their facilities for a possible hurricane impact next week.

This is new information as of this update:

- The Waterborne Strike Team is on standby for deployment for water rescues.
- JetBlue Stadium, CenturyLink Stadium, the Lee County Gun Range, and the Andrea Lane and Sivan Road storage buildings are prepared to receive assets if needed.
- The Marine Unit is in contact with the IMT to secure the marine assets.

AMERICAN OVERSIGHT

- Known sandbag locations are as follows:
    - Punta Gorda—Free sandbags will be available at 3130 Cooper St., the last entrance on the left by flag poles.
    - Fort Myers Beach—Sand is located off of Gulf Beach Road, and bags are available at Town Hall, 2731 Oak St. (The location will provide service until 4:30 p.m. on Friday and begin Monday at 8:30 a.m.)
    - Fort Myers— South Trail Fire & Rescue will have sand and sandbags available at station 63, 5531 Halifax Ave., Fort Myers—a maximum of 20 bags per household. UPDATE: South Trail Fire & Rescue is currently out of sand. Empty sandbags only are available.
    - Naples— Sandbags will be available at three public park locations: Big Corkscrew Island Regional Park, 810 39th Ave., North Collier Regional Park, 15000 Livingston Road, in the Sun-N-Fun Lagoon parking lot, and at Donna Fiala Eagle Lakes Community Park, 11565 Tamiami Trail East, in the grassy area between the parking lots. The Naples sandbag locations will begin service at 8 a.m. through dusk on Saturday and Sunday.
    - San Carlos Park—Sand and sandbags are available at San Carlos Park Fire District Station 54, located at 16900 Oriole Road. There is a limit of 10 bags per household. Bags can be picked up at the lobby. Bring your own shovel. Be prepared to fill and load your own sandbags. Make sure your vehicle can transport the weight of the sandbags.
    - North Fort Myers—Sandbags will be located at North Fort Myers Parks and Recreation, 2000 N. Recreation Parkway. Sand will be located in the back of the park, next to the county mulch pile. Please bring your own shovel to fill the bags.
    - Matlacha—Sandbags are available for pickup at Station 1, located at 5700 Pine Island Rd, Bokeelia, FL 33922
- IMT personnel are visiting the precincts, and the storage locations to inventory assets to prepare for both securement and post-storm deployment.
- No schedule changes are expected between now and Monday afternoon; however, all personnel should be prepared for schedule adjustments.
- The Agriculture assets are secured on the Olga site.

Subject: Important Update on a possible impending hurricane impacting our area (Update #5)

Team,

IMT has been working on preparation for a potential Hurricane impacting our area early next week. IMT will continue to send out updates regularly so please monitor your email closely. All agency units need to begin preparations of securing their assigned assets and communicate all movement to IMT. Also, update the major asset application on the intranet. We have secured Jet Blue Park as an asset staging area for Marine and other assets. Agency asset storage facilities to include the gun range are preparing to house assets as well. IMT is securing high water vehicles that will be pre-staged at strategic locations i.e., the barrier islands. IMT members will be in the RTIC today coordinating efforts. Agency extension 239-258-3150 is being setup to communicate to IMT staff. Additional updates to follow.

Be prepared and be safe!

Sent: Friday, October 4, 2024 4:15 PM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance - Update #4

The National Hurricane Center 2:00 PM update shows the possibility of development as the low pressure area in the Gulf of Mexico moves slowly eastward or northeastward. A tropical or subtropical depression or storm could form during the early to middle part of next week if the low remains separate from a frontal boundary that is forecast to extend across the Gulf of Mexico. Regardless of development, locally heavy rains could occur over portions of the Florida Peninsula late this weekend into next week. As of this update, the formation chance in the next 48 hours is low at 10 %, and the formation chance through 7 days has increased to 50%.

Current model runs show an arrival time of any potential storm around Wednesday of next week. This represents a slower forward storm speed and later storm arrival than previous model runs, so the timing and impacts are still largely unknown. Regardless of any potential storm, significant rainfall is still expected, and the Incident Management Team will continue to monitor and update all personnel.

Sent: Thursday, October 3, 2024 9:56 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance - Update #3

The National Hurricane Center has reduced the chance of tropical cyclone development within seven days to 30%. While the system is likely to develop over the Gulf of Mexico late this weekend or early next week, subsequent tropical or subtropical development could be limited by the system's potential interaction with a frontal boundary. Regardless of development, locally heavy rains could occur over portions of the Florida Peninsula next week.

Subject: New Caribbean Disturbance - Update #2

The forecast for the area of disorganized showers remains the same; it is still too early to tell if the system will develop further. Regardless of development, heavy rain is expected in our area into the weekend and next week. The Incident Management Team will continue to monitor.

From: IMT <IMT@sheriffleefl.org>
Sent: Tuesday, October 1, 2024 10:35 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance - Update #1

The area of disorganized showers remains at a 40% chance of development. The National Hurricane Center indicates that environmental conditions could support some gradual development of this system, and a tropical depression could form towards the end of this week or this weekend while it moves generally northwestward over the northwestern Caribbean Sea and into the Gulf of Mexico. As of this time, there are no changes, but some long range models show an increased chance of this disturbance affecting our area.

AMERICAN OVERSIGHT

From: IMT <IMT@sheriffleefl.org>
Sent: Monday, September 30, 2024 8:11 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance

The Incident Management Team is monitoring a new area of disorganized showers and thunderstorms over the western Caribbean Sea. The National Weather Center states that the system has a medium chance (40%) of developing towards the middle to latter part of the week as it moves northwestward into the Gulf of Mexico. As this disturbance moves into the gulf, increasing moisture is expected over the Florida Peninsula and elevated rain chances are anticipated from Friday through the weekend, and possibly into early next week.

Unfortunately, long range models show the possibility of direct impacts for Southwest Florida; however, It is too early to determine what, if any, tropical specific impacts can be expected.

The Incident Management Team will continue to monitor the storm, and will continue to provide updates through this very active part of the hurricane season.

Lee County Government update on Tropical Storm Milton

Fort Myers, FL, Oct. 6, 2024 – Lee County's update on Tropical Storm Milton is available for viewing on the county's YouTube channel, www.youtube.com/@LeeCountyFLBOC. You can view it by clicking here.

Some highlights from the briefing, which included Lee County Commissioners and Lee County Public Safety Director Benjamin Abes, are:

- No evacuation orders are in place at this time. The county anticipates issuing evacuation orders as soon as Monday and no later than Tuesday morning.

- Some general population shelters will open Monday afternoon, especially for those who are still recovering from Hurricane Helene and Hurricane Ian. Additional shelters will open Tuesday. LeeTran will provide transportation to the shelters for those who need it. Remember to check www.leegov.com/storm to see which shelters open and when. The county is coordinating with the Florida Department of Health for its special needs sheltering operation.

- Emergency Operations Center is activated at a Level 2. That's a partial activation. The EOC will go to a Level 1 full activation at 7 a.m. Monday, Oct. 7.

- Lee County has executed a State of Local Emergency for T.S. Milton.

- Public Safety is monitoring and preparing with partners, including
  - National Weather Service
  - National Hurricane Center
  - Federal Emergency Management Agency

AMERICAN OVERSIGHT

- Florida Division of Emergency Management
- Local partners such as the Lee County Sheriff's Office and School District of Lee County.

- T.S. Milton is expected to become a hurricane later today. Even if the forecasted cone shifts north or south, impacts including life-threatening storm surge will be felt here in Lee County.

- County offices will open as scheduled at 8 a.m. Monday, but will close at noon. The county will be closed from Monday afternoon through Thursday. The county will announce information about Friday operations on Thursday, depending on the storm's impact.

- The Lee Board of County Commissioners meeting scheduled for Tuesday, Oct. 8, has been canceled. It has not been rescheduled at this time.

- The county asks residents to take time today to:
  - Revisit your family emergency plan.
  - Know where you will go if you plan to leave.
  - Check your emergency supply kit.
  - Secure objects around your home.
  - Be where you plan to be for the storm by Tuesday evening.
  - Monitor local meteorologists' reports.
  - Sign up for AlertLee.
  - Monitor www.leegov.com/storm and Lee County social media channels.
  - You have time to prepare today but the window to prepare is closing. The time for action is today.
  - Call the United Way's Emergency Information Hotline with questions. Dial 2-1-1 or 239-433-3900.

- Sand and sand bags
  - Consult your local fire department for availability of sand and sand bags.
  - Each site may have varying levels of inventory.
  - Emergency Operations is working with vendors to replenish sand at fire departments.

- Solid Waste / debris
  - Helene debris collection continues to happen today. Debris will be collected Monday and will continue Tuesday as weather allows.
  - Do not put out additional Hurricane Helene debris or bulky waste.
    - This precaution will help minimize the dangers of debris becoming projectiles during T.S. Milton.
    - It also allows the haulers to pick up what's out there now
- Solid Waste / regular pickup
  - Regular trash, recycling, yard waste that is scheduled for Monday will happen Monday.
  - Do not place out trash, recycling or yard waste on Tuesday or Wednesday.
    - All normal waste collection services are suspended for those days.
  - Announcements will be forthcoming on when regular collections will resume.

- DOT and Natural Resources:
  - Crews are out today clearing storm drains, adjusting weirs, monitoring creeks and streams.
  - These activities have been ongoing since Hurricane Helene.

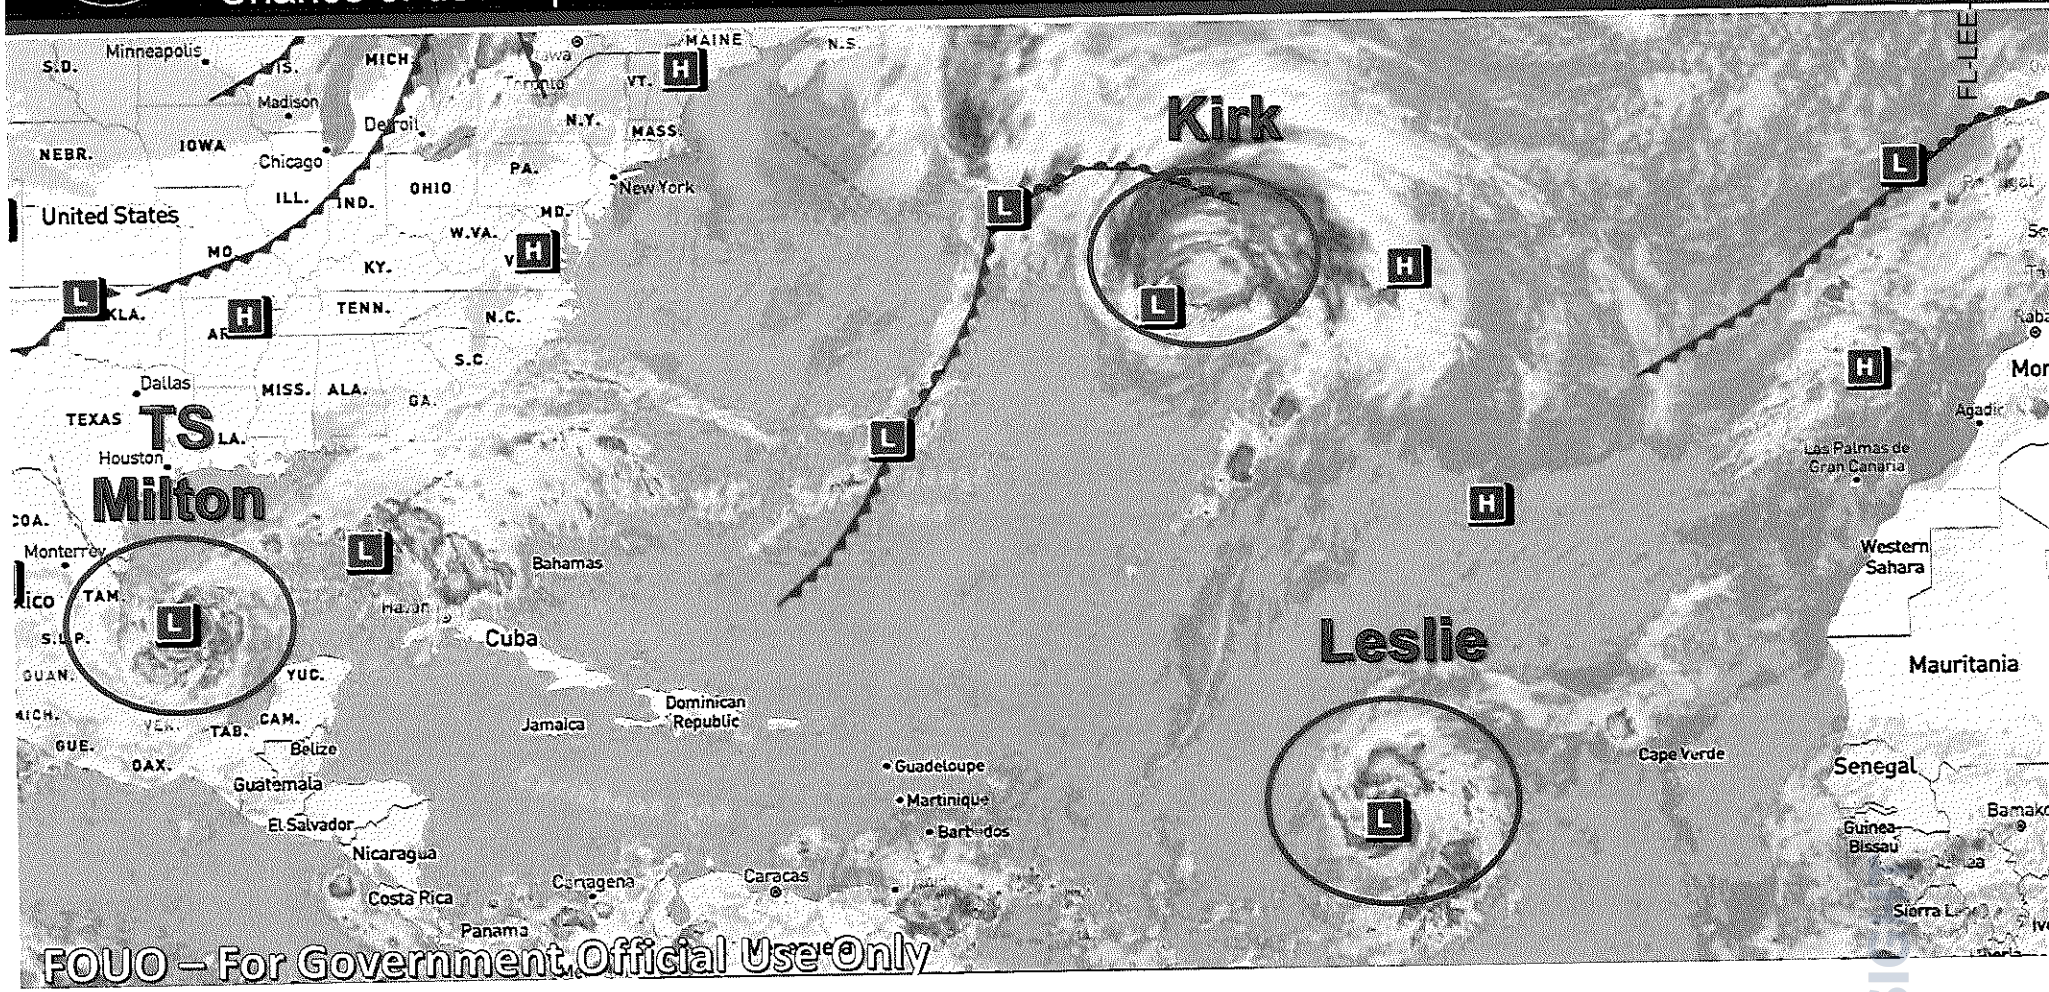
Tropical Storm Milton

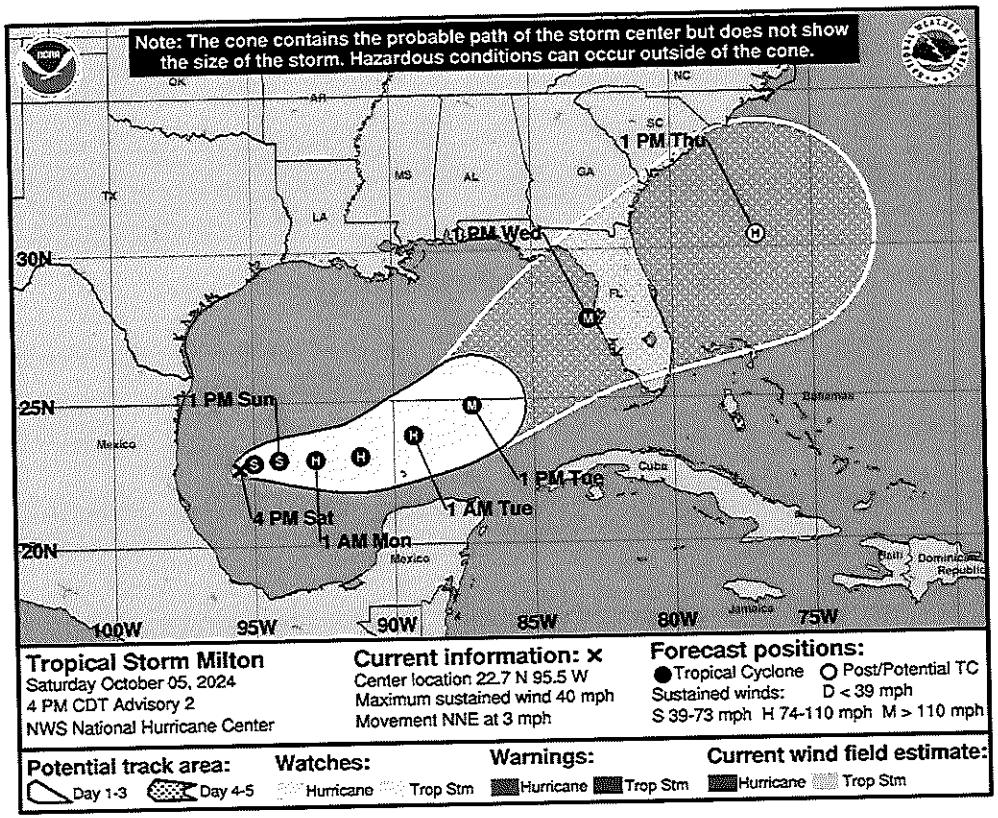


Increasing Risk for Life-Threating Impacts Along Florida West Coast; Milton Forecast to Become a Hurricane Later Today

This update is intended for government and emergency response officials, and is provided for informational and situational awareness purposes only. Forecast conditions are subject to change based on a variety of environmental factors. For additional information, or for any life safety concerns with an active weather event please contact your County Emergency Management or Public Safety Office, local National Weather Service forecast office, or visit the National Hurricane Center website at www.hurricanes.gov.

AMERICAN OVERSIGHT

Atlantic Basin Satellite Image

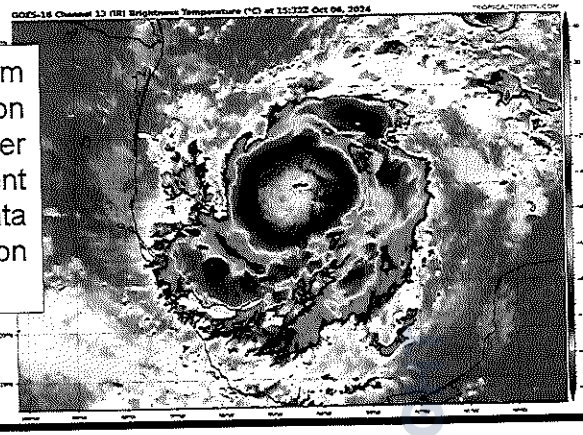


Chance of development: None — Low — Medium — High

FOUO – For Government Official Use Only

Tropical Storm Milton

From the National Hurricane Center (NHC)



- **Location:** 310 miles WNW of the Progreso, Mexico; 835 miles WSW of Tampa, Florida
- **Maximum Sustained Winds:** 65 mph
- **Current Movement:** ESE at 6 mph

This general east-southeastward motion near 6 mph can be expected today. An eastward to east-northeastward motion is forecast on Monday, followed by a faster northeastward motion on Tuesday and Wednesday. On the forecast track, Milton is forecast to move north of the Yucatan Peninsula and to move across the Gulf of Mexico and approach the west coast of the Florida Peninsula by midweek. Milton is forecast to rapidly intensify during the next couple of days and become a hurricane later today and a major hurricane late Monday.

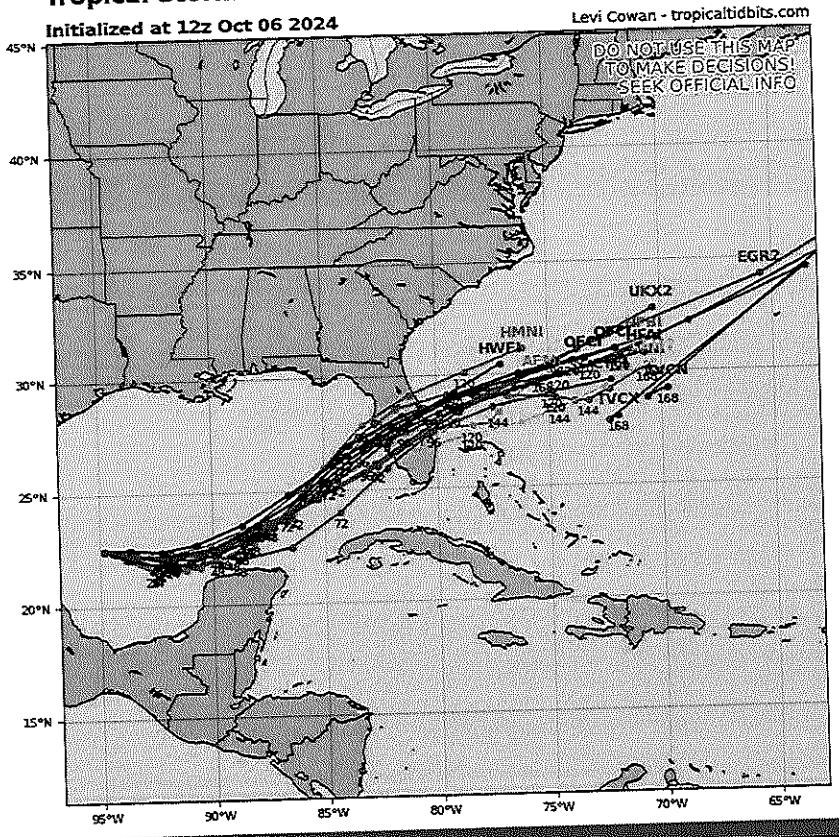
Milton is forecast to quickly intensify while it moves eastward to northeastward across the Gulf of Mexico and be at or near major hurricane strength when it reaches West Florida midweek. There is an increasing risk of life-threatening storm surge and wind impacts for the Florida West Coast beginning late Tuesday or Wednesday.

Shower and thunderstorm activity associated with Milton continue to become better defined and organized. Recent Hurricane Hunter Aircraft data shows an eyewall within Milton has formed.

FL-EEE-006

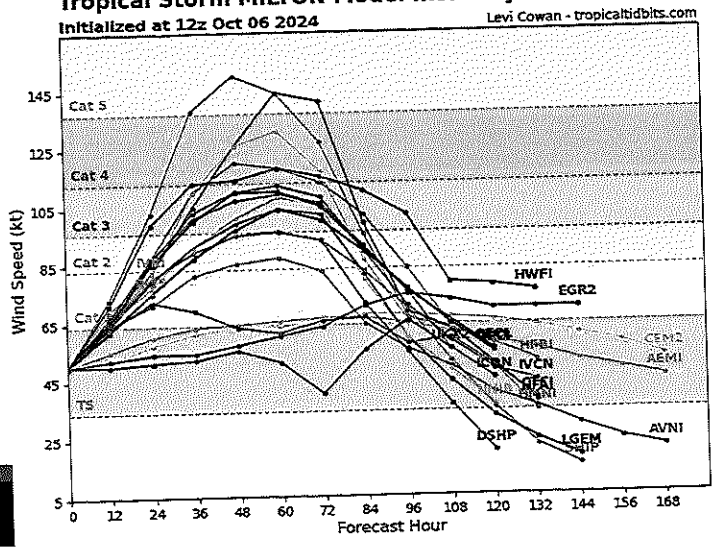
FOUO – For Government Official Use Only

AMERICAN OVERSIGHT



Forecast Computer Models – Next 5 Days

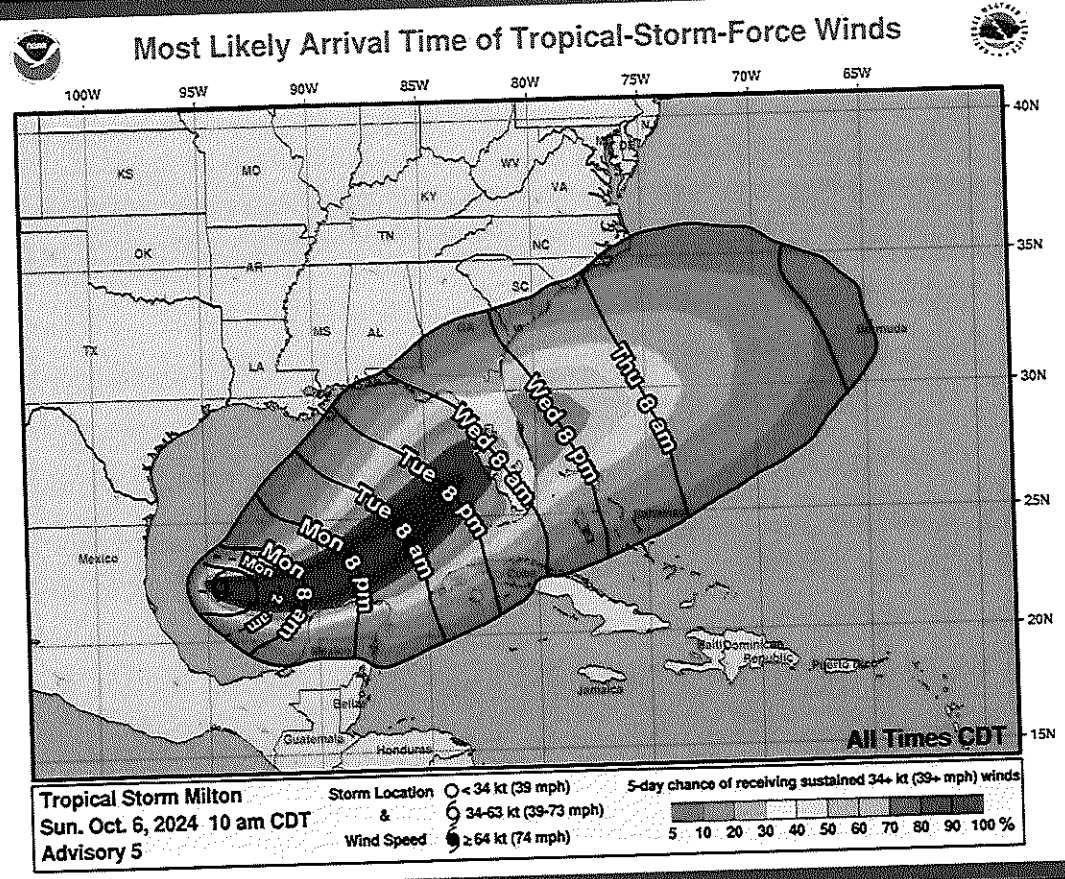
Tropical Storm Milton



Recent observations and Hurricane Hunter aircraft data indicate that Milton is slightly further south than previously. Computer forecast model guidance shows Milton is forecast to move slightly more south due to an upper-level disturbance over the northern Gulf of Mexico but continue to move slowly through the next 24 hours. The system should begin turn toward the northeast and begin accelerating Tuesday and Wednesday towards the Florida Peninsula. While timeline disparity across computer models persist, a little faster motion is forecast early next week. Overall guidance this morning has nudged Milton's eventual path south with a little slower forward motion. Changes to the eventual track can be expected, it is important not to focus on single model runs or solutions!

Computer forecast models continue to support favorable atmospheric and oceanic conditions across the Gulf of Mexico, allowing for Milton to steadily and rapidly strengthen. There remains uncertainty regarding the intensity of Milton as it approaches the Florida West Coast due to an increase in upper-level winds developing midweek. There also remains quite a bit of uncertainty regarding the intensity of Milton; however, trends have shown that the system could become a hurricane in about 12-24 hours and a major hurricane in about 36-60 hours. Upward adjustments in the intensity cold be required if computer forecast models continue their trend. Regardless, there is increasing confidence that a powerful hurricane with life-threatening hazards will be affect portions of the Florida west coast around the middle of the week.

Tropical Storm MILTON Model Track Guidance



Tropical Storm MILTON Model Intensity Guidance

FOUO – For Government Official Use Only

Timing of Arrival
From the National Hurricane Center (NHC)

- Tropical storm-force conditions will most likely arrive along the West Florida coastline early Wednesday morning, and spreading eastward across the Florida Peninsula through the Wednesday daytime hours.
- Tropical storm-force winds could arrive as early as Tuesday evening along the western Florida Peninsula.
- Probabilities (*shaded*) will continue to increase as Milton's landfall is closer in the forecast period.
- There remains quite a bit of uncertainty regarding the forward speed and progression of Milton, and thus the arrival time of tropical hazards; changes to the eventual track and timeline can be expected, it is important not to focus on single model runs or solutions!

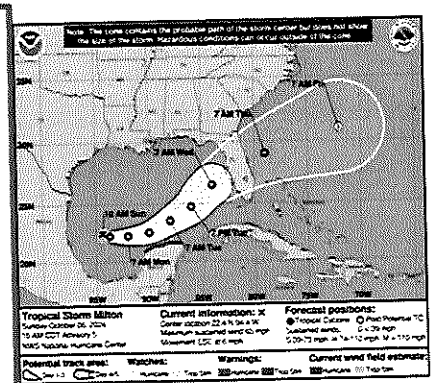
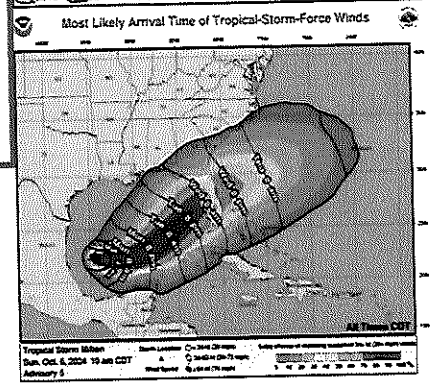
Key Messages
From the National Hurricane Center (NHC)



Key Messages for Tropical Storm Milton
Advisory 5: 10:00 AM CDT Sun Oct 06, 2024



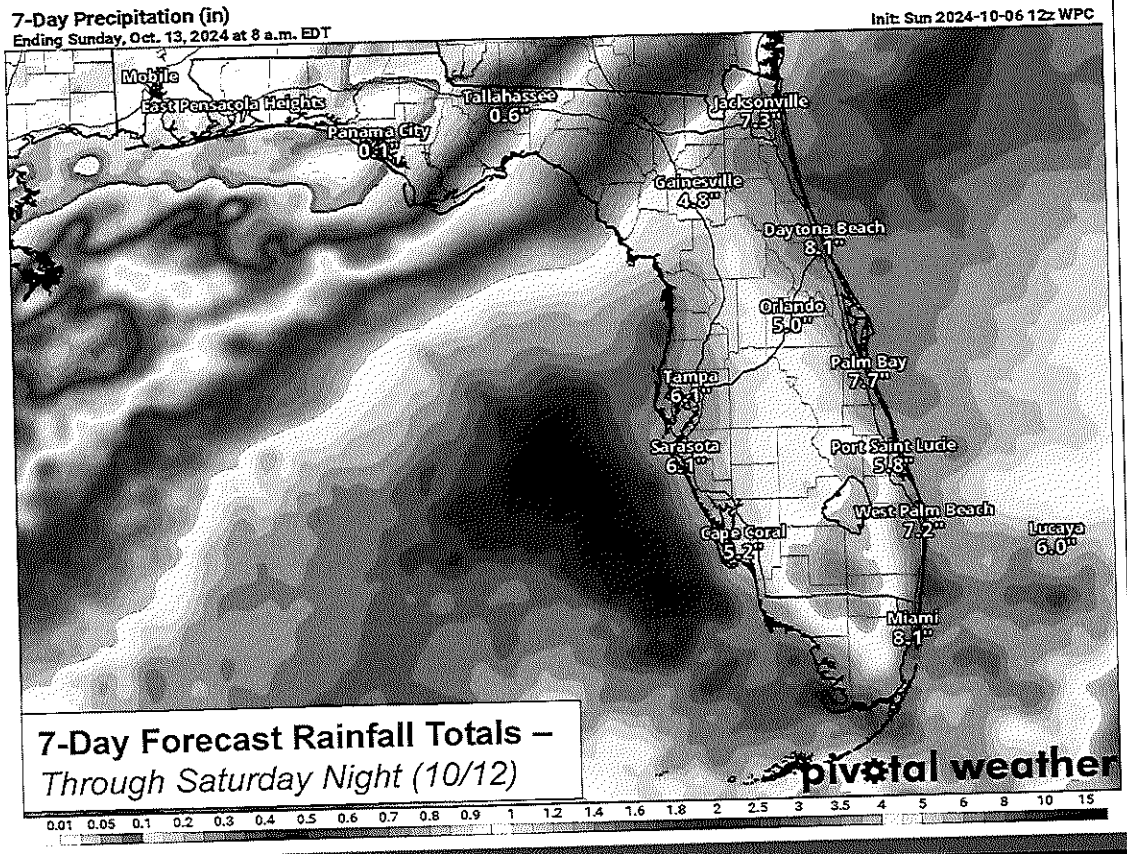
1. Milton is forecast to quickly intensify while it moves eastward to northeastward across the Gulf of Mexico and be a major hurricane when it reaches the west coast of the Florida Peninsula mid week. Users are reminded to not focus on the details of the forecast as there remains significant uncertainty in the eventual track and intensity of Milton.

2. While it is too soon to specify the exact magnitude and location of the greatest impacts, there is an increasing risk of life-threatening storm surge and damaging winds for portions of the west coast of the Florida Peninsula beginning Tuesday night or early Wednesday. Storm Surge and Hurricane Watches could be issued later today or tonight. Residents in the Florida Peninsula should follow any advice given by local officials and check back for updates to the forecast.

3. Areas of heavy rainfall will impact portions of Florida today and Monday well ahead of Milton, with heavy rainfall more directly related to the system expected later on Tuesday through Wednesday night. This rainfall will bring the risk of flash, urban, and areal flooding, along with the potential of moderate to major river flooding.

4. Tropical storm conditions are expected beginning Monday across portions of the northern Yucatan Peninsula of Mexico where a Tropical Storm Warning is in effect.

For more information go to hurricanes.gov



FOUO – For Government Official Use Only

FL-LEE-2024-09

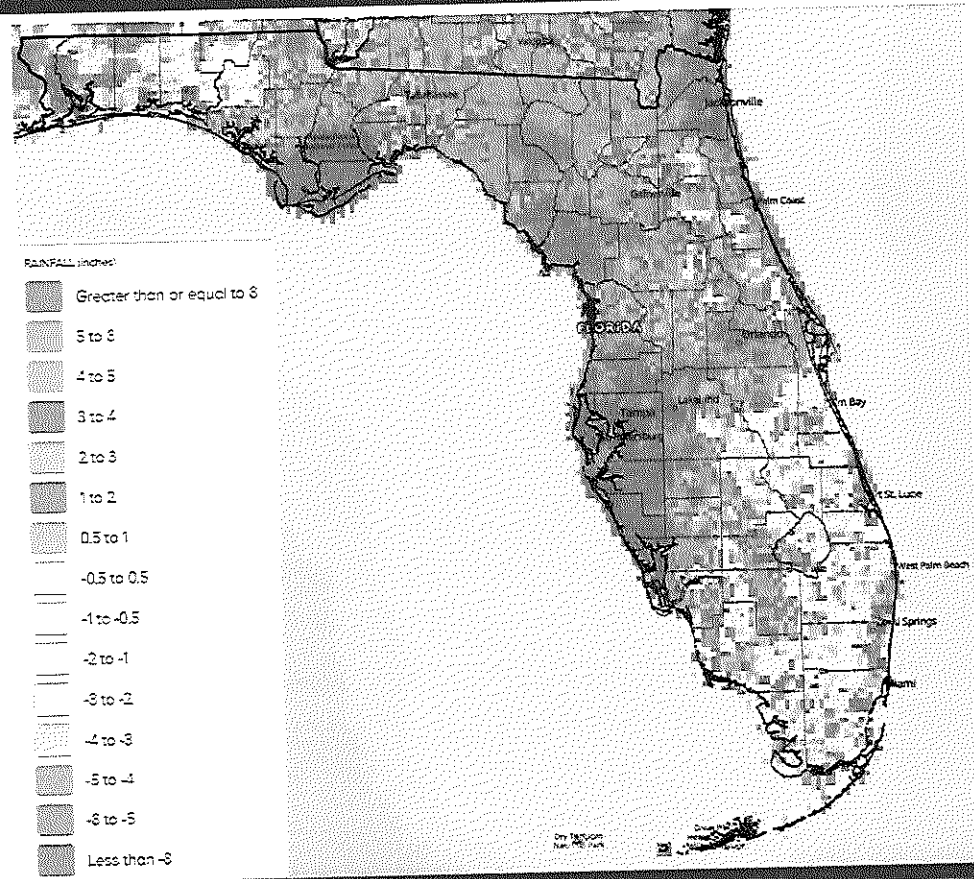
AMERICAN OVERSIGHT

Rainfall Totals – Next 7 Days

From the Weather Prediction Center (WPC)

- A frontal boundary is expected to push into the state this weekend kicking off a wet and active weather pattern across the Peninsula, even prior to tropical impacts.

- *Rainfall totals heavily tied to the eventual track and forward speed of the system. With computer model guidance uncertainty regarding the exact track, there remains uncertainty as to where the heaviest rainfall can be expected.*



- Widespread rainfall totals near 5-8" with **locally higher totals in excess of 8-12"** are possible across portions of the Peninsula.
  - Computer models are indicating the heaviest rainfall totals may occur along and near the I-4 corridor through Central and South Florida; however, the exact placement of these more significant totals will continue to be modified depending on the tropical disturbance's organization and track.
  - Drier air circulating along the southern side of the system as it moves across the Peninsula will keep heavy rainfall along the northern side of the system, allowing for widespread rainfall to extend into Northeast Florida.
  - **Please continue to stay tuned for the latest computer forecast model guidance and trends in the subsequent days.**

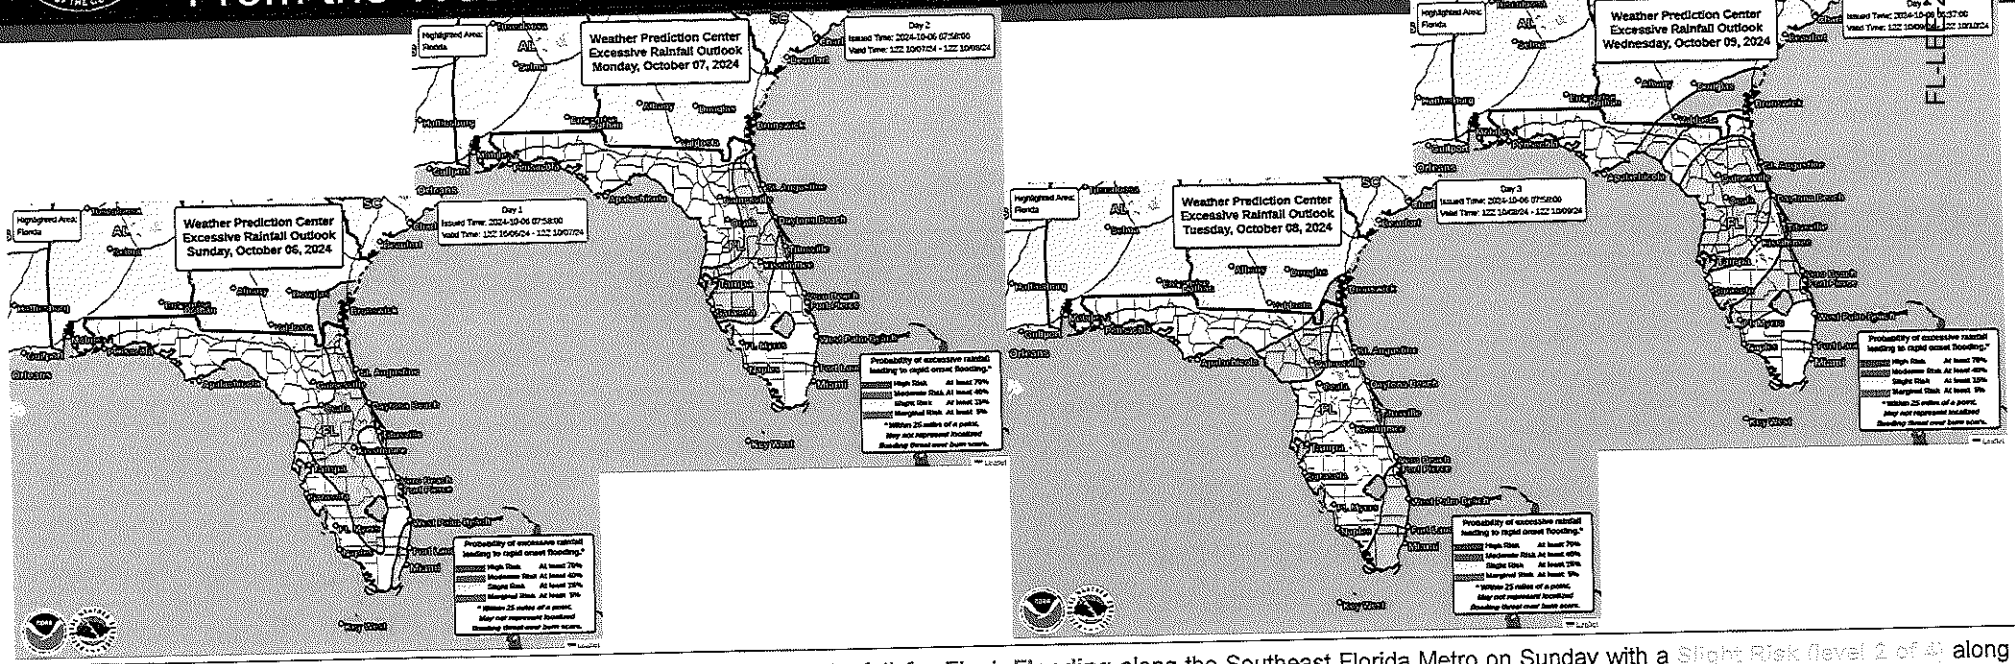
FOUO – For Government Official Use Only

AMERICAN OVERSIGHT

60-Day Rainfall Departure From Normal

From the National Weather Service

Much of the Big Bend and Northern Peninsula southward through the I-4 corridor and into West-Central and Southwest Florida have experienced rainfall totals greater than 5-10" above normal over the past 60-days. More localized areas have seen rainfall totals near 10-15" above normal over the past 60-days across with isolated higher totals near 15-20" over the past 60 days across portions of Apalachicola, the Suwannee Valley, Northeast Florida, and West-Central Florida.



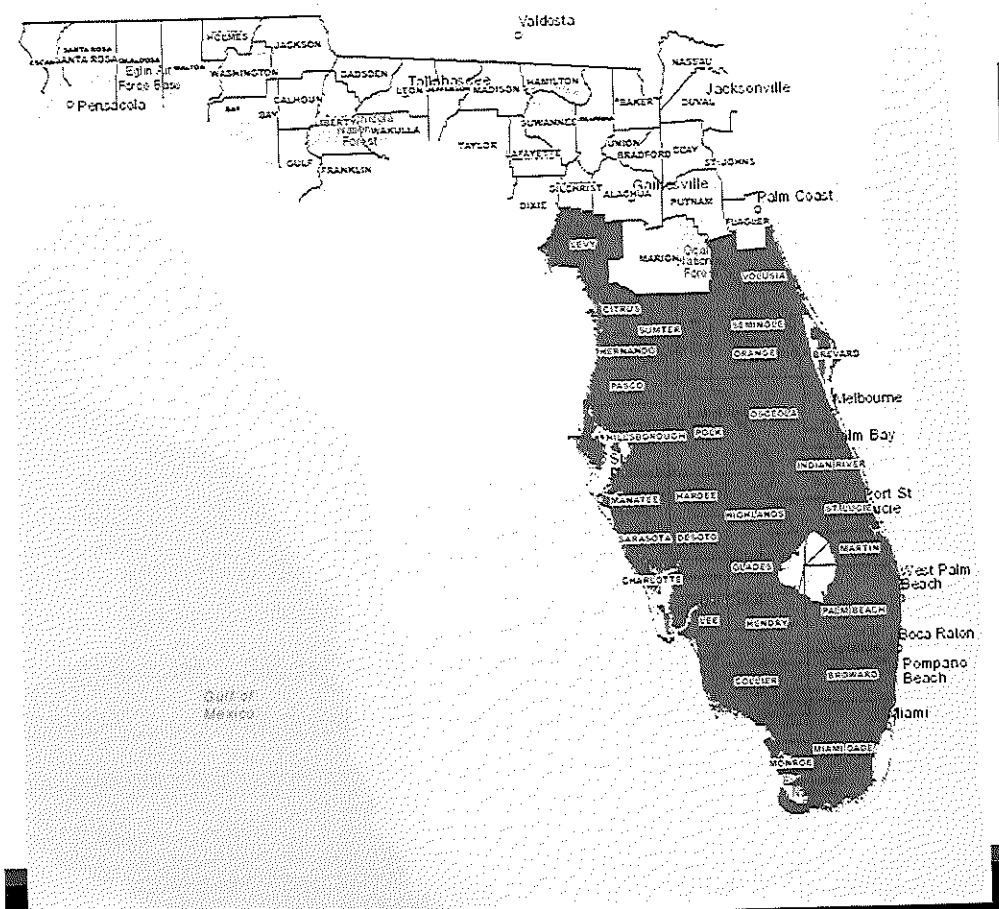
Numerous North, West-Central, and Southwest Florida rivers are already running high and/or within flood stage at this time.

Saturated areas will be more vulnerable to heavy rainfall and a faster onset of flooding.

FL-LEE-2
1
AMERICAN OVERSIGHT

Flash Flood Outlooks – Next 5 Days

From the Weather Prediction Center (WPC)

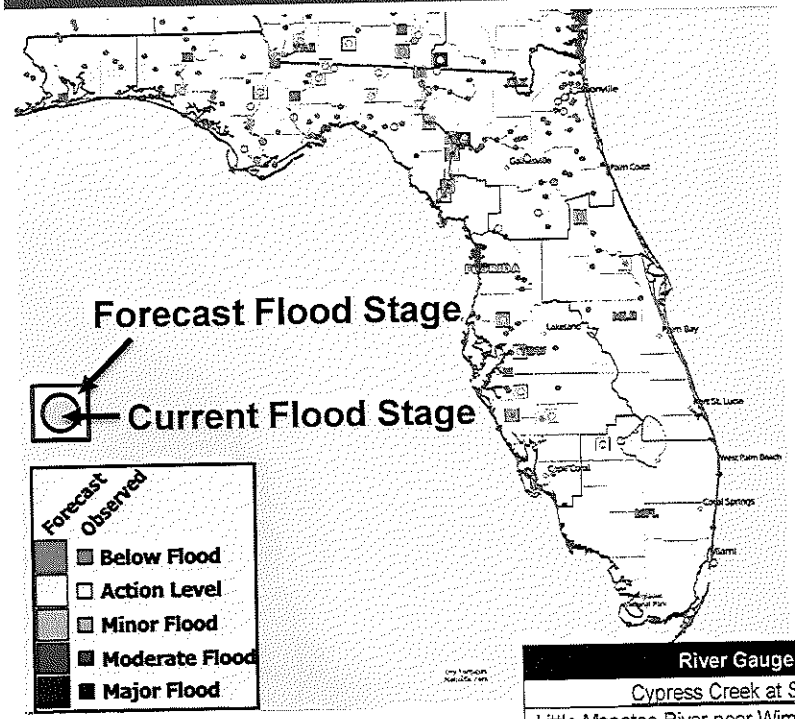


The Weather Prediction Center (WPC) is outlooking a **Moderate Risk (level 3 of 4)** for **Flash Flooding** along the Southeast Florida Metro on Sunday with a **Slight Risk (level 2 of 4)** along the coastal Peninsula and a **Marginal Risk (level 1 of 4)** extending for Sunday due to tropical moisture associated with an upper-level disturbance separate from Tropical Storm Milton. Widespread rainfall can be expected on Sunday and continue into next week before Tropical Storm Milton approaches the Florida West Coast midweek. Widespread heavy rainfall can be expected to continue on Monday and into Tuesday ahead of the outer bands of Milton, and the Weather Prediction Center (WPC) is outlooking a **Slight Risk (level 2 of 4)** south of the I-4 corridor on Monday and throughout most of the Peninsula and towards Northeast Florida on Tuesday. Coastal locations along the West Coast experienced flooding (both tidal and rainfall) due to Major Hurricane Helene, and any coastal or low-lying areas will remain vulnerable to additional rounds of rainfall. Heavy rainfall rates will also be a concern over already saturated and vulnerable soils; ponding water and instances of flooding will be possible, especially throughout the urban and poor drainage/low-lying areas in the Florida Peninsula. There remains uncertainty as to where the heaviest rainfall will fall as Tropical Storm Milton approaches and crosses the Florida Peninsula around mid-week. The Weather Prediction Center (WPC) is outlooking a **Moderate Risk (level 3 of 4)** for **Flash Flooding** across Nature Coast and inland towards Northeast Florida, including both the northern I-75 corridor and the entire I-4 corridor, with a **Slight Risk (level 2 of 4)** extending into portions of the Big Bend and Southwest Florida. Additional **Flood Watches** will likely be issued as details become clearer.

AMERICAN OVERSIGHT

Flood Watches

From the National Weather Service (NWS)



Flood Watches have been issued for the Florida Peninsula, spanning from the Nature Coast to along and south of the I-4 corridor beginning today until Thursday morning. This impacts the following counties:

Levy	**Volusia**	**Citrus**	**Hernando**
Pasco	**Pinellas**	**Hillsborough**	**Manatee**
Sarasota	**Charlotte**	**Lee**	**Collier**
Monroe	**Hendry**	**Glades**	**Highlands**

Lake	**Seminole**	**Orange**	**Osceola**
Brevard	**Okeechobee**	**Indian River**	**St. Lucie**
Martin	**Palm Beach**	**Broward**	

AMERICAN OVERSIGHT

Current & Forecast River Conditions

From the National Weather Service

River Flood Warnings remain in effect along the St. Johns River at Astor as water levels will remain within minor flood stage over the next several days as heavy rainfall occurs over trapped water levels within the basin.

The Aucilla River at Lamont is forecast to gradually rise near or just above minor flood stage over the next couple of days with widespread rainfall anticipated. The lower Withlacoochee and the middle Suwannee Rivers will continue to rise over the next several days into minor flood stage. The Withlacochee River near Pinetta (CR-150) has crested with the flood wave progressing down the Suwannee River well into next week and water levels will slowly decline. Flood waters continue to travel down the Suwannee, with backwater flooding possible up the Santa Fe River including at Three Rivers Estates by late weekend; additional minor to **moderate riverine flooding** will be possible.

River Flood Warnings are also in effect for the Manatee River near Myakka Head at SR-64, Myakka River at Myakka River State Park, Little Manatee at Wimauma, and Cypress Creek at SR-54 as minor flooding is occurring or forecast due to recent locally heavy rainfall and additional heavy rainfall anticipated this weekend and into next weekend ahead of Milton, then Milton could also bring additional heavy rainfall.

For more details, please visit the River Forecast Center.

River Gauge	County(ies) Affecte	Current Level	Crest Level	Record Leve	Status	Crest Da	Warning Expire

Riverine Flooding

Chance of River Flooding Based on Range of Forecast Rainfall

Based on rainfall modelling, POSSIBLE river crest levels

Chance of Exceedance		
30%	Level	70%
○	Action	□
◔	Minor Flood	▨
◑	Moderate Flood	▩
●	Major Flood	■

● = less than 30% chance of reaching Action level

Significant River Flooding impacts include road hazards and damage to residential, commercial, and/or agricultural areas. Evacuation may be required. Flash flooding or Minor river flooding are NOT included in this outlook. Check your local weather forecast frequently for the most up-to-date information for your area.

Shaded areas are the forecast region of the Southeast River Forecast Center

Significant River Flooding Not Expected

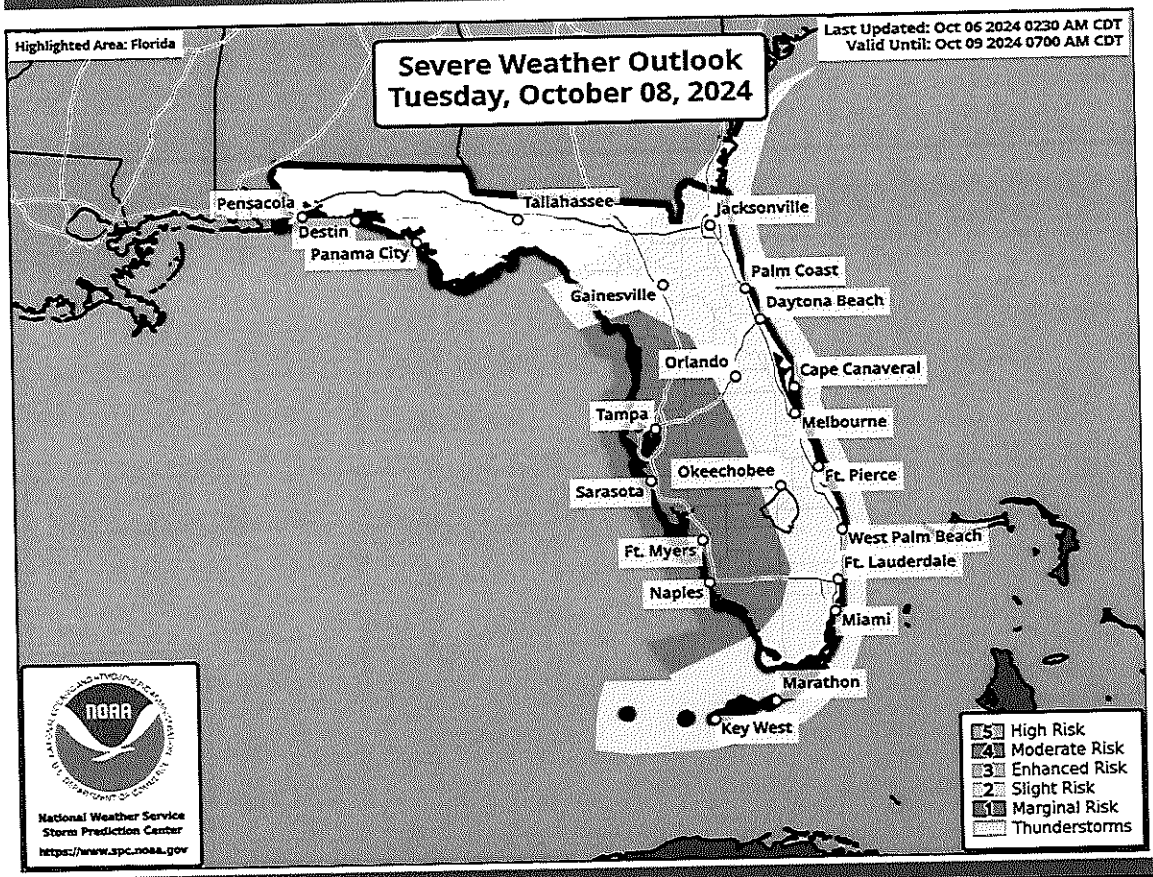
Significant River Flooding Possible
Weather conditions indicate, without certainty that significant river flooding could occur

Significant River Flooding Likely
Weather conditions indicate that significant river flood conditions can be expected

Significant River Flooding Occurring
Significant river flooding is occurring at this time

Rivers, creeks/streams, and waterways across North and West-Central Florida are already running above normal for this time of year due to widespread heavy rainfall from Hurricane Debby. **River Flood Warnings** remain in effect along portions of the Withlacoochee, St. Johns, and several West-Central Florida rivers, creeks, and waterways for ongoing minor flooding.

Water will continue to filter through the river basins and further downstream from heavy rainfall across the Southeast U.S. from Hurricane Helene over the next few weeks. Computer models are suggesting the potential for minor flooding along portions of the Suwannee River as excess heavy rainfall discharge through the basin from the Georgia headwaters with minor to **moderate backwater flooding** possible along the Santa Fe River. The Alapaha River near Jennings may also see water levels rise above flood stage in the next week or so as the Alapaha River at Statenville, Georgia is forecast to crest in major flood stage early next week before the crest wave moves further downstream into Florida.



Heavy rainfall is anticipated today and next week due frontal boundary and Tropical Storm Milton, likely leading to water level rises in the Peninsula. Computer models are currently suggesting there is potential for locally **moderate flooding** along a few rivers, creeks, and waterways in West-Central Florida with more widespread minor flooding along the Peninsula.

Summary

FOUO – For Government Official Use Only

FL-LEE-320

Tropical Storm Milton:

- As of 11:00 AM EDT, Tropical Storm Milton is located about 310 miles west-northwest of Progreso, Mexico and about 835 miles west-southwest of Tampa, Florida and moving east-southeast at 16 mph and this general motion is expected today.
- An eastward to east-northeastward motion is forecast on Monday, followed by a faster northeastward motion on Tuesday and Wednesday.
- On the forecast track, Milton is forecast to move north of the Yucatan Peninsula and to move across the Gulf of Mexico and approach the west coast of the Florida Peninsula by midweek.
- Maximum sustained winds have increased to near 65 mph with higher gusts.
- Milton is forecast to rapidly intensify during the next couple of days and become a hurricane later today and a major hurricane late Monday.
- *Milton is forecast to quickly intensify while it moves eastward to northeastward across the Gulf of Mexico and be at or near major hurricane strength when it reaches West Florida midweek. There is an increasing risk of life-threatening storm surge and wind impacts for the Florida West Coast beginning late Tuesday or Wednesday.*

Hurricane Kirk:

- As of 11:00 AM EDT, Kirk is located about 1155 miles west of the Azores and moving northeastward at 25 mph.
- An accelerations toward the northeast and east-northeast is expected over the next few days while Kirk moves across the northeastern Atlantic.
- Maximum sustained winds are near 100 mph with higher gusts making Kirk a Category 1 hurricane.
- Although weakening is expected through midweek, Kirk will remain a large hurricane for the next day ro so before transitions to an extratropical cyclone by Monday night.
- *Kirk poses no threat to Florida.*

Hurricane Leslie:

- As of 11:00 AM EDT, Leslie is located about 910 miles west of the southernmost Cabo Verde Islands and moving northwestward at 9 mph and this general motion is expected to continue over the next few days.
- Maximum sustained winds have increased to near 90 mph with higher gusts making Leslie a Category 1 hurricane.
- Some intensity fluctuations are possible today, but weakening is forecast to begin on Monday and continue through midweek.
- *Leslie poses no direct threat to Florida through the next 10 days at least.*

Far Eastern Tropical Atlantic:

- A tropical wave is expected to move off the west coast of Africa in a few days.
- Some development of this system is possible thereafter as it moves westward or west-northwestward across the eastern tropical Atlantic.
- The system is expected to move near or over the Cabo Verde Islands on Wednesday and Thursday, and interests there should monitor its progress.
- The National Hurricane Center (NHC) is outlooking a **low (near 0%) chance** for development through 48 hours and a **low (30%) chance** through the next 7 days.
- *This system poses no direct threat to Florida over the next 7-10 days at least.*

The next briefing packet will be issued on Sunday evening. For the latest information, please visit the National Hurricane Center website.

FL-LEE-[illegible]321

Florida Outlook:

- Regardless of intensity of Tropical Storm Milton, multiple rounds of heavy rainfall are expected across portions of the Peninsula and Keys today into next week.
  - Widespread rainfall totals near 5-8" with **locally higher totals in excess of 8-12"** are possible across portions of the Peninsula.
  - *Rainfall totals heavily tied to the eventual track and forward speed of the system. With computer model guidance uncertainty regarding the exact track, there remains uncertainty as to where the heaviest rainfall can be expected.*
  - The Weather Prediction Center (WPC) is outlooking a **Moderate Risk (level 3 of 4) for Flash Flooding** across the Southeast Florida Metro and I-95 corridor on Sunday with a **Slight Risk (level 2 of 4)** extending along the Peninsula coastlines due to tropical moisture and an upper-level disturbance will bring widespread and heavy rainfall that could bring localized flash and areal flooding at times over already saturated grounds and soils.
  - The Weather Prediction Center (WPC) is outlooking a **Slight Risk (level 2 of 4) for Flash Flooding** throughout East-Central and South Florida, including Lake Okeechobee, on Monday then expanding northward across Northeast Florida and through Southwest Florida on Tuesday as additional heavy rainfall before Tropical Storm Milton is possible.
  - A **Moderate Risk (level 3 of 4) for Flash Flooding** has been introduced on Wednesday across the Nature Coast and extending toward the northern I-95 corridor including lower portions of the Suwannee Valley, the northern I-75 corridor and the I-4 corridor on Wednesday. The **Slight Risk (level 2 of 4) for Flash Flooding** extends from the Suwannee Valley and through Central Florida.
  - A **Flood Watches** will go into effect today throughout the Peninsula as **flash, urban, and areal flooding** will be possible, and additional **Flood Watches** will likely be issued as details become clearer.
- Rivers, creeks/streams, and waterways across North and West-Central Florida are already running above normal for this time of year due to widespread heavy rainfall from Hurricane Debby. **River Flood Warnings** remain in effect along portions of the Withlacoochee, St. Johns, and several West-Central Florida rivers, creeks, and waterways for ongoing **minor flooding.**
  - Water will continue to filter through the river basins and further downstream from heavy rainfall across the Southeast U.S. from Hurricane Helene over the next few weeks, likely leading to **minor to moderate flooding** along portions of the Suwannee, Alapaha, and Santa Fe Rivers.
  - Heavy rainfall is anticipated Sunday and next week due frontal boundary and an upper-level disturbance not associated with Tropical Storm Milton, likely leading to water level rises in the Peninsula. Computer models are currently suggesting there is potential for locally **moderate flooding** along a few rivers, creeks, and waterways in West-Central Florida with more widespread **minor flooding** along the Peninsula.
- There is an increasing risk of life-threatening impacts for portions of the west coast of Florida Peninsula beginning late Tuesday or Wednesday*; however, the extent and locations of these impacts remain uncertain as it will be heavily tied to the eventual track and forward speed of the system.*
- Outer bands moving onshore along the Florida West Coast on Tuesday may bring **isolated tropical tornadoes** throughout the day, and the Storm Prediction Center (SPC) is outlooking a **Marginal Risk (level 1 of 5) for Severe Weather.**
  - Additional expansions or upgrades to the Severe Weather Outlook can be anticipated as details become clearer. Additional watches and warnings can be expected closer to the outer bands moving onshore.
- The next name on the list is Nadine (*nay-DEEN*).

The next briefing packet will be issued on Sunday evening. For the latest information, please visit the National Hurricane Center website.

Good Morning Residents,

Tropical Storm Milton has officially formed over the southwestern Gulf of Mexico and is expected to intensify into a hurricane in the coming days. According to the National Hurricane Center (NHC), it is predicted to make landfall along Florida's west coast by midweek.

As we continue to monitor the storm, we want to provide you with important preparation tips to ensure your safety:

- **Stay updated by monitoring local news and weather channels.**
- **Sign up for emergency alerts from local authorities to receive timely updates.**
- **Know your evacuation routes and have a plan in place for your family and pets.**
- **If evacuation becomes necessary, make arrangements for where you will stay in advance.**
- **Review your home and flood insurance policies to ensure they are current and provide adequate coverage.**

We are committed to supporting you throughout this time and will provide updates as the situation evolves. Our managers and staff will remain on standby, ready to take action as needed.
Please stay weather-aware, prepare, and most importantly, stay safe!
Best regards,
[Your Name]
Alliant Property Management

Sincerely,

Zoe Printz

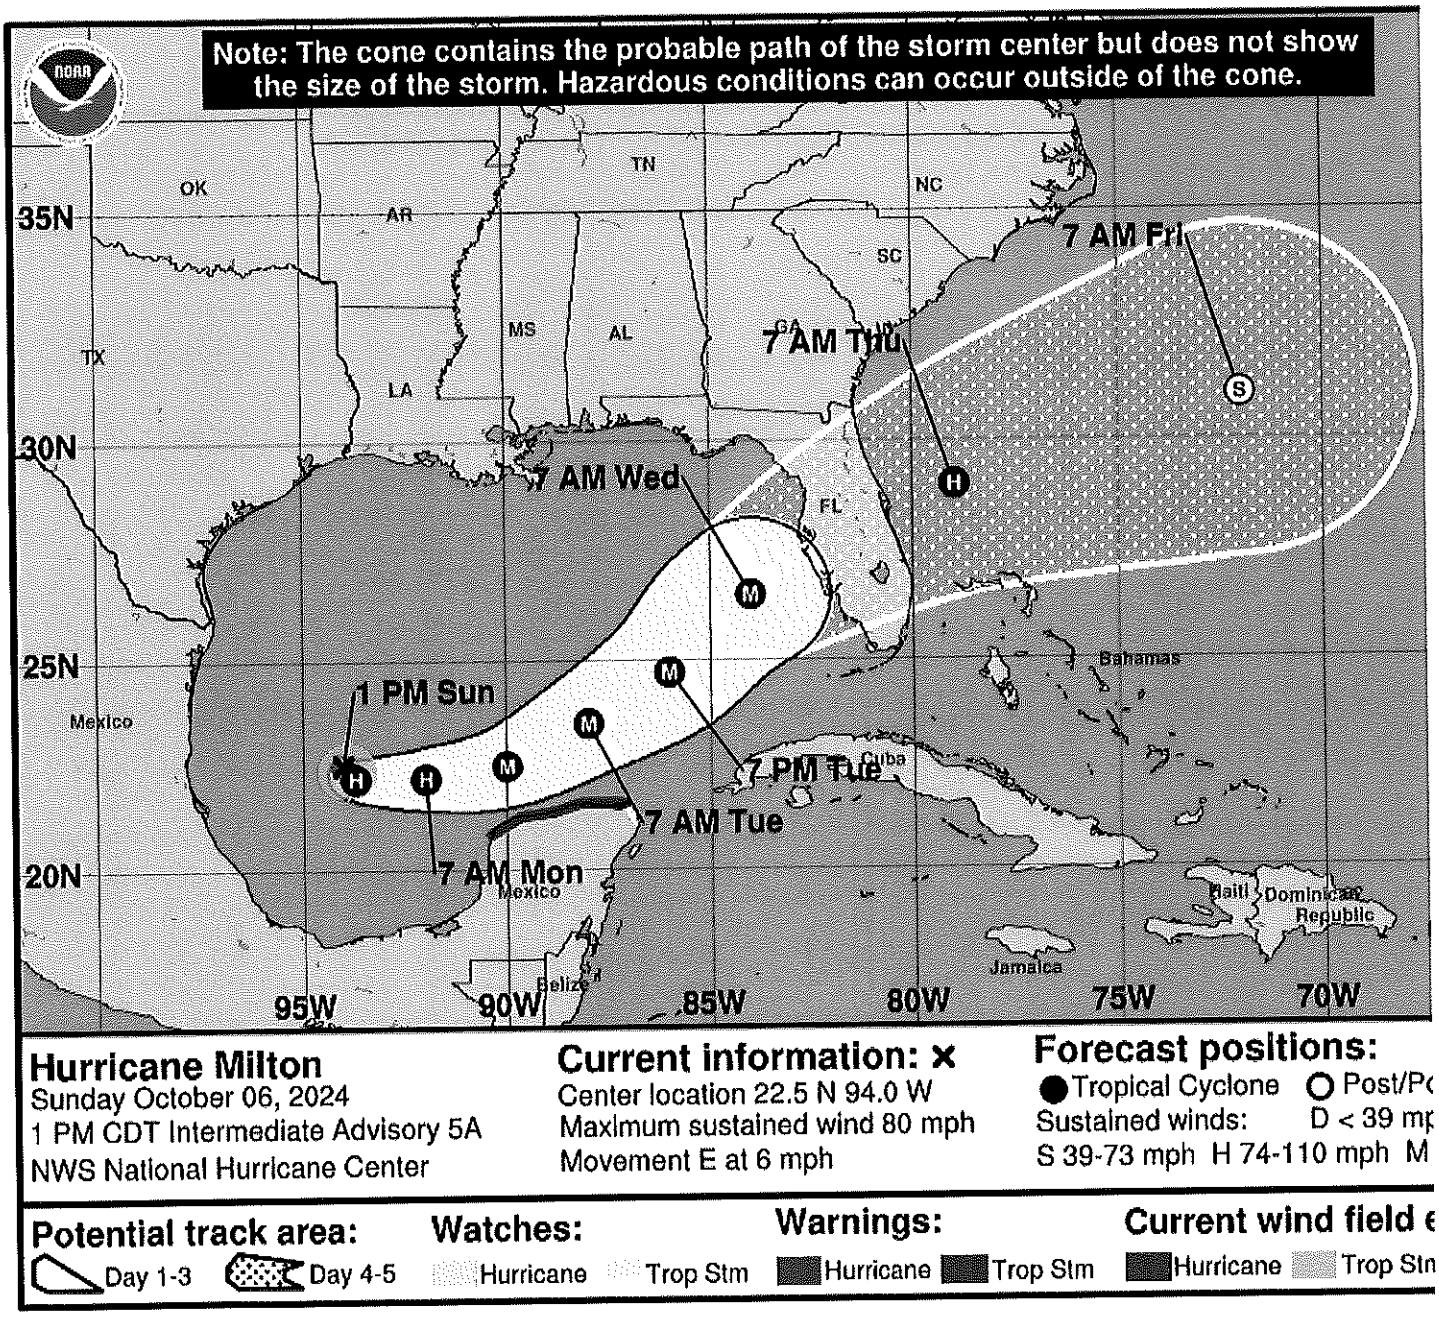
Subject:	Tropical Storm Milton - Update #13

The 2:00 PM Intermediate Update shows that there are no significant changes in the track. The earliest arrival of tropical storm force winds is projected to be 8:00 PM on Tuesday.

These are the stations that are reported to still have gasoline:

- Veronica Shoemaker/Winkler
- Shell station at Hancock and US 41
- BJ's Cape Coral
- 711 Burnt Store and Pine Island has DIESEL only
- Racetrac at South Pointe and College has 93 Only
- Walmart / Murphy's USA in Lehigh
- Santa Barbara and Veterans 7/11

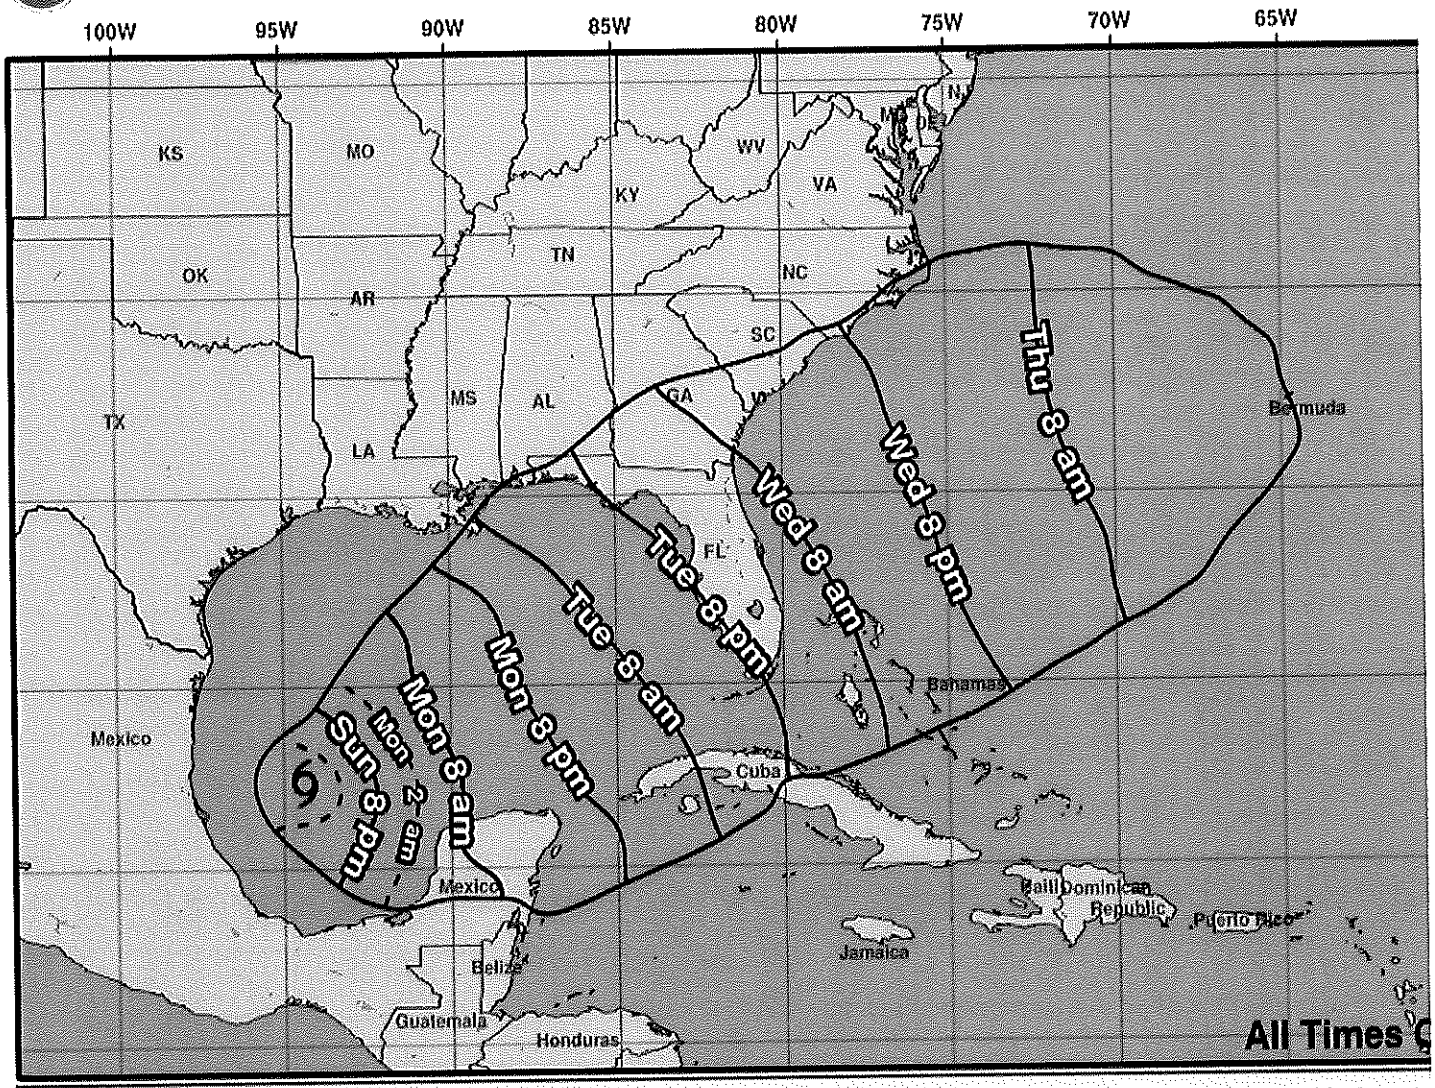
These are the stations that are reported to be currently **out** of gasoline:



- Country Club and Veterans Circle K
- Del Prado Speedway
- Trafalgar and Skyline 7/11
- Rebel US 41 and Del Prado
- 76 at Chiquita and Pine Island
- Walmart/Murphy's Del Prado
- Walmart on Pine Island Road
- Pine Ridge and San Carlos 7/11
- Santa Barbara and Gleason 7/11
- Palm Tree and Cape Coral Pkwy 7/11
- Lee and Gunnery 7/11
- Del Prado Racetrac
- Terry St Circle K
- Lee and Alvin Racetrac
- Joel Citgo
- N Cleveland and Littleton 7/11

Below are the current updated tasks that IMT has been working on since that last updates:

- Logistics members have scheduled pre-storm deliveries for food and beverages - the arrival time is Tuesday morning.
- Logistics members have scheduled post-storm deliveries from vendors.
- Logistics members have scheduled water deliveries.
- Logistics members have created plans for replenishment of supplies for long-term activations.
- Logistics members have arranged for ice deliveries for the event power is lost.
- Purchasing members have made plans for the procurement of potable water.



AMERICAN OVERSIGHT

- Purchasing and Logistics members have scheduled the delivery of portable bathrooms should they be needed.
- HQ will be the central location for cooking needs post-storm for employees at HQ/IMT, Forensics, MCU, Command Staff, Spec Ops, and Staging personnel.
- Precincts and Corrections facilities will be responsible for their meal preparations.

Subject: Tropical Storm Milton - Update #12

The 11:00 AM update shows a small track shift to the south. Although it is still predicted to directly hit the Tampa Bay Area, the move slightly south may bring higher wind speeds and higher storm surge. The storm is expected to quickly intensify and will likely be a major hurricane upon arrival.

All personnel are encouraged to complete preparations for their homes and their families today.

There is still a high degree of uncertainty in both the tracks and the wind speed upon arrival, so the possibility of a direct strike to our area remains. The cone of uncertainty currently covers most of the Florida peninsula. The Incident Management Team (IMT) will keep you informed, and is making preparations to include schedule planning.

Subject: Tropical Storm Milton - Update #8

The 8:00 AM update shows that Milton is forecast to become a Major Category 3 Hurricane before making landfall. Timing, tracks, and intensity are still unpredictable; however, the National Hurricane Center still shows the track toward the Tampa area.

The current forecast is as follows:

- There is a Flood Watch for the entire area through Thursday.
- Rainfall in the amount of 5" to 8", with localized totals up to 12".
- The timing of the impacts is from late Tuesday through early Thursday morning, but it is expected to make landfall on the West Coast on Wednesday.
- There is great uncertainty about where the storm will make landfall. The average Day 4 track error is around 150 miles, so we are still well within a possible landfall range.
- The current earliest wind time arrival is 4 PM on Tuesday, and the most likely arrival time is 2 AM on Wednesday.

Additional notifications for this update include:

- Personnel should maintain at least ½ tank at all times. Due to current fuel runs, please use any opportunity to make sure your agency vehicle stays full at all times.
- Personnel who must fuel and have no other options may use 89 or 93 Octane fuel.
- Select IMT members have been activated. Please send requests to IMT@sheriffleefl.org.
- The select CRU members who were notified individually will report at 10:00 AM to the Headquarters Training Room (1202).
- The asset movement members who were notified individually will report at 10:00 AM to the Headquarters Training Room (1202).
- All units, components, precincts, corrections facilities, and all affected agency departments should fill up all available gas cans and gas tanks.
- Pine Island Fire Department is out of sand. They still have sandbags. They expect to get more sand on Monday.

Sent: Saturday, October 5, 2024 6:19 PM
To: All Users <AllUsers@sheriffleefl.org>
Subject: Tropical Storm Milton - Update #7

With the 5:00 PM update, Tropical Storm Milton is now expected to arrive as a major hurricane. The track has shifted some to the north; however, some model tracks still show direct hits our our area, and we are still in the cone of uncertainty. Please recall from prior storms that although we are not in the direct path, the effects of the hurricane will still affect us heavily, especially in the areas prone to storm surge. Additionally, the peak storm surge from Helene arrived almost 10 hours after the peak winds, so all personnel should be aware of and consider the effects before, during, and after the storm.

AMERICAN OVERSIGHT

The below preparations remain in effect. The only change for this period is:

- Four (4) additional shallow water vessels have been obtained for water rescues.
- Additional High-Water Vehicles have been obtained and will be deployed to the islands for potential high-water rescues.
- The San Carlos Park Fire Department is out of sand and sandbags.

Subject: Tropical Storm Milton - Update #6

As of a 12:25 PM National Hurricane Center update, Tropical Storm Milton has formed. This storm is forecast to strengthen and bring the risk of life-threatening impacts to portions of the West Coast of Florida next week. The maximum winds are currently estimated at 40 mph with higher gusts. Models range in intensity from a Tropical Storm to a Major Hurricane, so there is tremendous unpredictability in the strength upon arrival.

At this time, the Incident Management Team is preparing for the possibility of a major hurricane affecting our area with impacts beginning on Tuesday and a full impact on Wednesday.

All agency personnel are encouraged to prepare as follows:

- All personnel should review their hurricane plans, and prepare their homes and families for the possibility of a hurricane impact in the middle of next week.
- All precincts should secure their mobile assets (decoy vehicles, arrow boards, trailers, ATVs, etc.) beginning on immediately to be completed by 2:00 PM on Monday.
- All trailers should be brought to storage beginning immediately to be completed by 2:00 PM on Monday.
- All personnel should use the remainder of this weekend to prepare for a possible activation. This plan should include three days worth of food, uniforms, and supplies.
- All personnel should use the remainder of this weekend to prepare their uniforms and equipment (including sufficient batteries for equipment) for a possible activation.
- All specialty units should begin bringing their assets back to their storage areas and secure locations. This should be completed by 2:00 PM on Monday.
- All precincts should secure any items that can be moved by the wind to a secure location starting immediately to be completed by 2:00 PM on Monday.
- All Corrections facilities (including Nan's Ranch) should prepare their facilities for a possible hurricane impact next week.

This is new information as of this update:

- The Waterborne Strike Team is on standby for deployment for water rescues.
- JetBlue Stadium, CenturyLink Stadium, the Lee County Gun Range, and the Andrea Lane and Sivan Road storage buildings are prepared to receive assets if needed.
- The Marine Unit is in contact with the IMT to secure the marine assets.
- Known sandbag locations are as follows:
    - Punta Gorda—Free sandbags will be available at 3130 Cooper St., the last entrance on the left by flag poles.
    - Fort Myers Beach—Sand is located off of Gulf Beach Road, and bags are available at Town Hall, 2731 Oak St. (The location will provide service until 4:30 p.m. on Friday and begin Monday at 8:30 a.m.)

AMERICAN OVERSIGHT

- Fort Myers— South Trail Fire & Rescue will have sand and sandbags available at station 63, 5531 Halifax Ave., Fort Myers—a maximum of 20 bags per household. UPDATE: South Trail Fire & Rescue is currently out of sand. Empty sandbags only are available.
- Naples— Sandbags will be available at three public park locations: Big Corkscrew Island Regional Park, 810 39th Ave., North Collier Regional Park, 15000 Livingston Road, in the Sun-N-Fun Lagoon parking lot, and at Donna Fiala Eagle Lakes Community Park, 11565 Tamiami Trail East, in the grassy area between the parking lots. The Naples sandbag locations will begin service at 8 a.m. through dusk on Saturday and Sunday.
- San Carlos Park—Sand and sandbags are available at San Carlos Park Fire District Station 54, located at 16900 Oriole Road. There is a limit of 10 bags per household. Bags can be picked up at the lobby. Bring your own shovel. Be prepared to fill and load your own sandbags. Make sure your vehicle can transport the weight of the sandbags.
- North Fort Myers—Sandbags will be located at North Fort Myers Parks and Recreation, 2000 N. Recreation Parkway. Sand will be located in the back of the park, next to the county mulch pile. Please bring your own shovel to fill the bags.
- Matlacha—Sandbags are available for pickup at Station 1, located at 5700 Pine Island Rd, Bokeelia, FL 33922

- IMT personnel are visiting the precincts, and the storage locations to inventory assets to prepare for both securement and post-storm deployment.
- No schedule changes are expected between now and Monday afternoon; however, all personnel should be prepared for schedule adjustments.
- The Agriculture assets are secured on the Olga site.

Subject: Important Update on a possible impending hurricane impacting our area (Update #5)

Team,

IMT has been working on preparation for a potential Hurricane impacting our area early next week. IMT will continue to send out updates regularly so please monitor your email closely. All agency units need to begin preparations of securing their assigned assets and communicate all movement to IMT. Also, update the major asset application on the intranet. We have secured Jet Blue Park as an asset staging area for Marine and other assets. Agency asset storage facilities to include the gun range are preparing to house assets as well. IMT is securing high water vehicles that will be pre-staged at strategic locations i.e., the barrier islands. IMT members will be in the RTIC today coordinating efforts. Agency extension 239-258-3150 is being setup to communicate to IMT staff. Additional updates to follow.

Be prepared and be safe!

Subject: New Caribbean Disturbance - Update #4

AMERICAN OVERSIGHT

The National Hurricane Center 2:00 PM update shows the possibility of development as the low pressure area in the Gulf of Mexico moves slowly eastward or northeastward. A tropical or subtropical depression or storm

could form during the early to middle part of next week if the low remains separate from a frontal boundary that is forecast to extend across the Gulf of Mexico. Regardless of development, locally heavy rains could occur over portions of the Florida Peninsula late this weekend into next week. As of this update, the formation chance in the next 48 hours is low at 10 %, and the formation chance through 7 days has increased to 50%.

Current model runs show an arrival time of any potential storm around Wednesday of next week. This represents a slower forward storm speed and later storm arrival than previous model runs, so the timing and impacts are still largely unknown. Regardless of any potential storm, significant rainfall is still expected, and the Incident Management Team will continue to monitor and update all personnel.

From: IMT <IMT@sheriffleefl.org>
Sent: Thursday, October 3, 2024 9:56 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance - Update #3

The National Hurricane Center has reduced the chance of tropical cyclone development within seven days to 30%. While the system is likely to develop over the Gulf of Mexico late this weekend or early next week, subsequent tropical or subtropical development could be limited by the system's potential interaction with a frontal boundary. Regardless of development, locally heavy rains could occur over portions of the Florida Peninsula next week.

From: IMT <IMT@sheriffleefl.org>
Sent: Wednesday, October 2, 2024 12:08 PM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance - Update #2

The forecast for the area of disorganized showers remains the same; it is still too early to tell if the system will develop further. Regardless of development, heavy rain is expected in our area into the weekend and next week. The Incident Management Team will continue to monitor.

From: IMT <IMT@sheriffleefl.org>
Sent: Tuesday, October 1, 2024 10:35 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance - Update #1

The area of disorganized showers remains at a 40% chance of development. The National Hurricane Center indicates that environmental conditions could support some gradual development of this system, and a tropical depression could form towards the end of this week or this weekend while it moves generally northwestward over the northwestern Caribbean Sea and into the Gulf of Mexico. As of this time, there are no changes, but some long range models show an increased chance of this disturbance affecting our area.

From: IMT <IMT@sheriffleefl.org>
Sent: Monday, September 30, 2024 8:11 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance

AMERICAN OVERSIGHT

The Incident Management Team is monitoring a new area of disorganized showers and thunderstorms over the western Caribbean Sea. The National Weather Center states that the system has a medium chance (40%) of developing towards the middle to latter part of the week as it moves northwestward into the Gulf of Mexico. As this disturbance moves into the gulf, increasing moisture is expected over the Florida Peninsula and elevated rain chances are anticipated from Friday through the weekend, and possibly into early next week.

Unfortunately, long range models show the possibility of direct impacts for Southwest Florida; however, It is too early to determine what, if any, tropical specific impacts can be expected.

The Incident Management Team will continue to monitor the storm, and will continue to provide updates through this very active part of the hurricane season.

Sheriff to participate in county presser at EOC with local leaders. PIO will run this live on Facebook. Capt Iriarte, Lt Fine, Robert, Autumn, and Herb to attend with tech.

Sheriff Talking Points: Hurricane Milton

-The Lee County Sheriff's Office Incident Management Team is actively monitoring Hurricane Milton and is activated.

-Milton is expected to intensify and will make landfall on Florida's peninsula.

-At this time, exact landfall is uncertain but Lee County is expected to experience storm impacts.

-Just as you would all prepare for a storm at home, LCSO has done the same. We have secured all mobile assets to include our Marine Unit vessels due to the anticipated impacts from Milton.

-LCSO is READY! Our Waterbourne Strike Team and Marine Unit, Special Ops are standing by should the need arise to rescue people.

-That being said, know your Evacuation Zone and be prepared to leave if your zone is called.

-Four (4) additional shallow water vessels have been obtained for water rescues.

-Additional High-Water Vehicles have been obtained and will be deployed to the islands for potential high-water rescues.

-We urge everyone to prepare for this storm! Prepare for the worst, but hope for the best!

AMERICAN OVERSIGHT

-We know what Mother Nature can do! She is unpredictable, which is why we urge everyone NOT to wait until the last minute to have everything that you need.

-Make sure you have necessary hurricane supplies: enough food, water, medicine for several days.

-Have a hurricane plan with your family and be up to date with it. Topics should include an evacuation plan, sheltering in place, pets, miscellaneous family needs.

-Continue to monitor your local media for weather updates, as well as the Lee County Sheriff's Office and Lee County Government on social media for the latest updates.

Sheriff Marceno will be there. Thank you .

Updated: 10/7/24 @ 0820

Hurricane Milton

-The Lee County Sheriff's Office Incident Management Team is actively monitoring Hurricane Milton and is FULLY activated.

-Milton is expected to continue intensify and will make landfall on the west coast of the Florida's peninsula.

-At this time, exact landfall is uncertain but Lee County is expected to experience storm impacts to include SURGE.

-Just as you would all prepare for a storm at home, LCSO has done the same. We have secured all mobile assets to include our Marine Unit vessels due to the anticipated impacts from Milton.

-LCSO is READY! Our Waterbourne Strike Team and Marine Unit, Special Ops are standing by should the need arise to rescue people.

AMERICAN OVERSIGHT

-That being said, know your Evacuation Zone and be prepared to leave if your zone is called.

-Four (4) additional shallow water vessels have been obtained for water rescues.

-Additional High-Water Vehicles have been obtained and will be deployed to the islands for potential high-water rescues.

-We urge everyone to prepare for this storm! Prepare for the worst, but hope for the best!

-our academy cadets are utilizing an excavator to place sand at local fire stations for residents in need.

-We know what Mother Nature can do! She is unpredictable, which is why we urge everyone NOT to wait until the last minute to have everything that you need.

-Make sure you have necessary hurricane supplies: enough food, water, and medicine for several days.

-Have a hurricane plan with your family and be up to date with it. Topics should include an evacuation plan, sheltering in place, pets, miscellaneous family needs.

-Milton is now a MAJOR HURRICANE

-LCSO administrative services at precinct offices will be halted unit after the storm so we can focus on preparation and possible recovery efforts.

-Once we get sustained winds of 45 MPH, emergency response is stopped until it's safe to respond to calls.

-It could take several hours or more for the winds to subside before a deputy is able to respond, once the impacts begin. SHELTER IN PLACE.

AMERICAN OVERSIGHT

-Don't try to drive anywhere in inclement conditions as the roadways are not safe.

-Do NOT go outside during the storm as wind and standing water create hazard that can be fatal.

-Remember the three phases of the storm: BEFORE, DURING, and AFTER. Have you plan for all three.

-Continue to monitor your local media for weather updates, as well as the Lee County Sheriff's Office and Lee County Government on social media for the latest updates.

-WE ARE SWFL STRONG and are IN THIS TOGETHER

Sheriff Marceno will be there. Thank you .

Hello LCSO and School District PIOs,

We are going to announce tomorrow morning that we are having a noon presser here at EOC. Please ensure that the sheriff and superintendent are invited to participate here with us if they want to. We'd like to have them both here and have them both say some words. Please let me know by 10 a.m. tomorrow if they will be attending.

Thanks.

Betsy

Subject:	Fox Weather Natl Interview
Location:	RTIC - HQ
Start:	Mon 10/7/2024 10:30 AM
End:	Mon 10/7/2024 10:45 AM
Recurrence:	(none)
Meeting Status:	Accepted
Organizer:	Anita Iriarte
Required Attendees:	Christopher Fine; Todd Olmer; Sarah Rodriguez; Christopher Lalor; Anita Iriarte; Katie Walter; Jessie Santero; Autumn King; James Heuglin; Tara Thrower; John Holloway; Robert DeAngelo; Herbert Ellis; Julie Martin; Carmine Marceno; Daniel Greenup; Kevin Ferry; Mark Shelly; Jonathan Taylor; Joshua Hanchey
Optional Attendees:	Joshua Quaintance; Kevin Ellis

Fox Weather interview with Stephen Morgan https://www.foxweather.com/person/m/stephen-morgan

Rtic clear by 10am Monday. Sheriff Marceno in place by 1015. Tech aware. Zoom equipment will remain in Rtic for the duration of the storm.

Updated: 10/7/24 @ 0820

Hurricane Milton

-The Lee County Sheriff's Office Incident Management Team is actively monitoring Hurricane Milton and is FULLY activated.

-Milton is expected to continue intensify and will make landfall on the west coast of the Florida's peninsula.

-At this time, exact landfall is uncertain but Lee County is expected to experience storm impacts to include SURGE.

-Just as you would all prepare for a storm at home, LCSO has done the same. We have secured all mobile assets to include our Marine Unit vessels due to the anticipated impacts from Milton.

AMERICAN OVERSIGHT

-LCSO is READY! Our Waterbourne Strike Team and Marine Unit, Special Ops are standing by should the need arise to rescue people.

-That being said, know your Evacuation Zone and be prepared to leave if your zone is called.

-Four (4) additional shallow water vessels have been obtained for water rescues.

-our academy cadets are utilizing an excavator to place sand at local fire stations for residents in need.

-Additional High-Water Vehicles have been obtained and will be deployed to the islands for potential high-water rescues.

-We urge everyone to prepare for this storm! Prepare for the worst, but hope for the best!

-We know what Mother Nature can do! She is unpredictable, which is why we urge everyone NOT to wait until the last minute to have everything that you need.

-Make sure you have necessary hurricane supplies: enough food, water, and medicine for several days.

-Have a hurricane plan with your family and be up to date with it. Topics should include an evacuation plan, sheltering in place, pets, miscellaneous family needs.

-Milton is now a MAJOR HURRICANE

-LCSO administrative services at precinct offices will be halted unit after the storm so we can focus on preparation and possible recovery efforts.

-Once we get sustained winds of 45 MPH, emergency response is stopped until it's safe to respond to calls.

AMERICAN OVERSIGHT

-It could take several hours or more for the winds to subside before a deputy is able to respond, once the impacts begin. SHELTER IN PLACE.

FL-LEE-24-2340-A-000342

-Don't try to drive anywhere in inclement conditions as the roadways are not safe.

-Do NOT go outside during the storm as wind and standing water create hazard that can be fatal.

-Remember the three phases of the storm: BEFORE, DURING, and AFTER. Have you plan for all three.

-Continue to monitor your local media for weather updates, as well as the Lee County Sheriff's Office and Lee County Government on social media for the latest updates.

-WE ARE SWFL STRONG and are IN THIS TOGETHER

Good morning,

My name is Alyssa Adler and I am a Booking Producer at FOX Weather.

I am reaching out in anticipation of Milton, which is expected to reach major hurricane status before impacting parts of Florida this week.

We are looking to see if Lee County Sheriff Carmine Marceno would be available for a LIVE **video virtual** interview on **Monday, October 7th or Tuesday, October 8th** to discuss this. The interview would only take approximately 4-6 minutes. **Please let me know what day/time work best, as we are flexible.**

I can provide more details, if interested.

Lee County Government evening update on Hurricane Milton

Fort Myers, FL, Oct. 6, 2024 – Lee County Emergency Management urges residents to finalize their hurricane plans.

Hurricane Milton is forecast to bring wind, life-threatening storm surge and localized flooding to Lee County later this week. Residents need to:

- Revisit their family emergency plan.
- Check their emergency supply kits.
- Secure objects around homes.
- Monitor local meteorologists' reports.
- Sign up for AlertLee.
- Monitor www.leegov.com/storm and Lee County social media channels.

Lee County anticipates announcing at noon Monday, Oct. 7, information about evacuation orders and shelter openings, as well as LeeTran service to those shelters.

Residents who live in coastal areas or flood-prone inland areas do not need to wait for evacuation orders to mobilize. Go to friend or family members' homes or make arrangements to relocate inland.

Residents can view the announcements on local media as well as via Facebook Live, available at www.facebook.com/leecountyflbocc. It can also be viewed on LeeTV and on the Lee County Government YouTube channel.

Residents can also call the United Way's Emergency Information Hotline with questions. Dial 2-1-1 or 239-433-3900.

Residents are reminded to check www.leegov.com/storm to see which shelters open and when. The EOC is activated at a Level 2 and will move to a full activation at 7 a.m. Monday, Oct. 7.

To receive updates from Lee County Government, sign up for the newsletter here: www.leegov.com/resources/newsletters. Follow Lee County Government on Facebook, www.facebook.com/leecountyflbocc.

AMERICAN OVERSIGHT

-30-

Note to media: At the conclusion of today's Facebook Live event, we indicated we would have another update by 6 p.m. This news release serves as that update.

Monday's noon Facebook Live will also be a press conference at the EOC. We will issue a media advisory Monday morning as well.

Receive updates from Lee County Government by subscribing to our newsletter

Please note: Florida has a very broad public records law. Most written communications to or from County Employees and officials regarding County business are public records available to the public and media upon request. Your email communication may be subject to public disclosure.

Under Florida law, email addresses are public records. If you do not want your email address released in response to a public records request, do not send electronic mail to this entity. Instead, contact this office by phone or in writing.

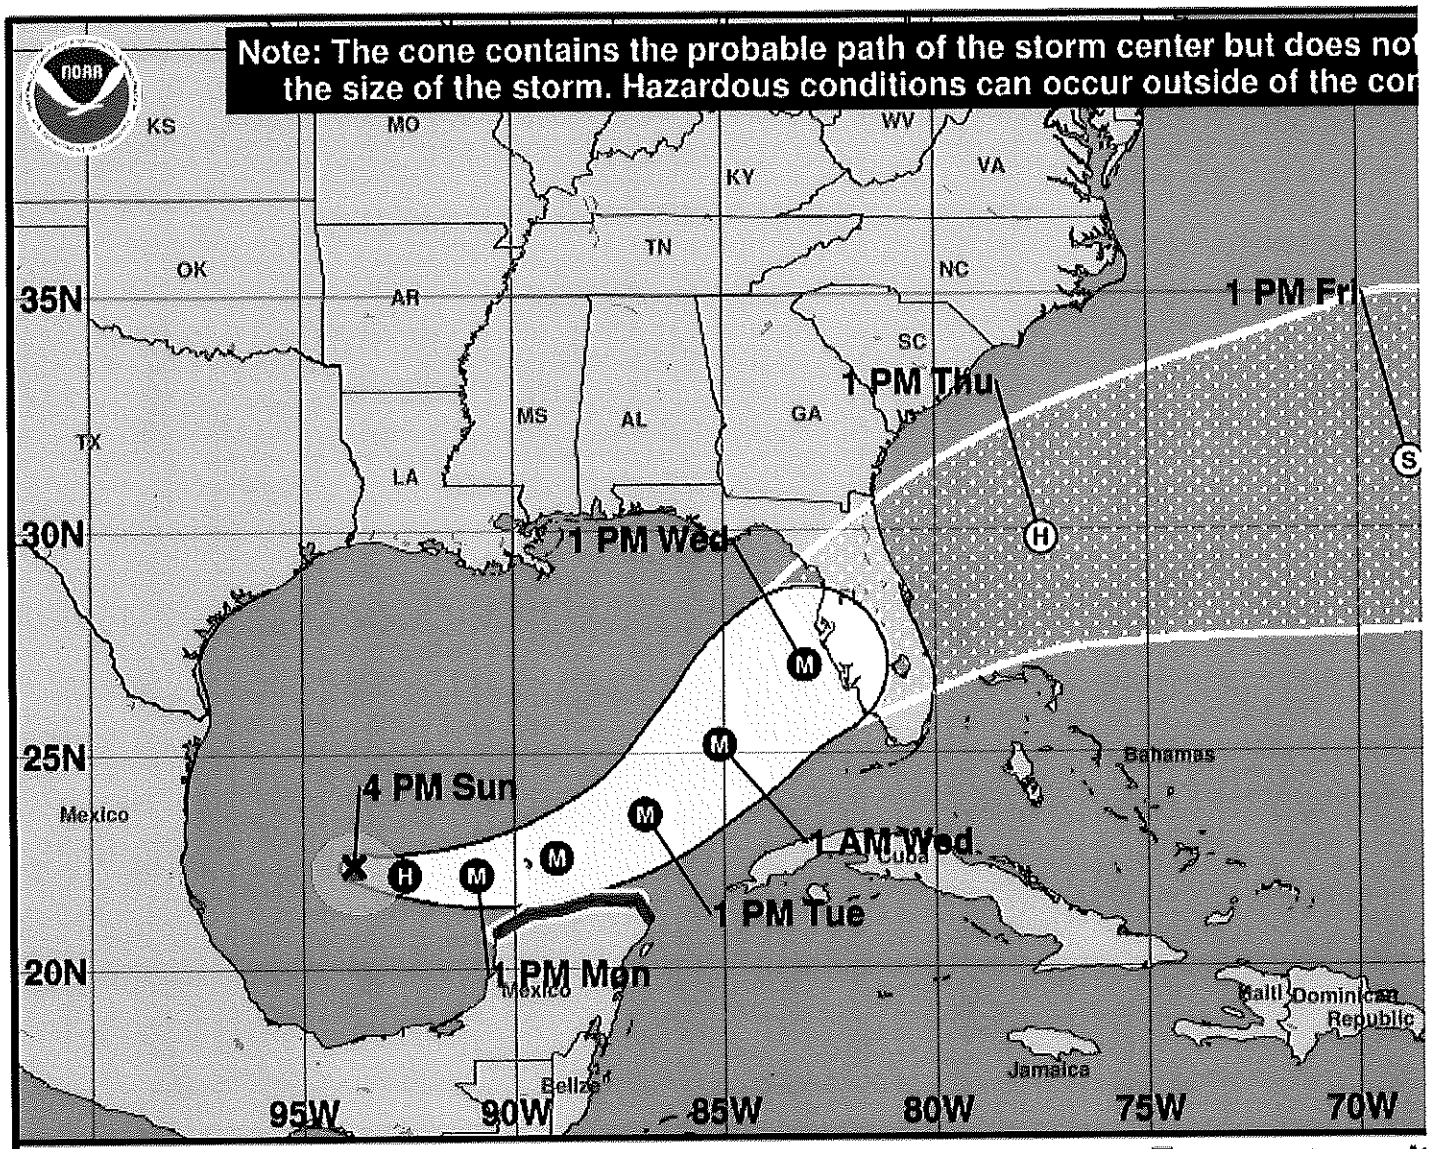
To:	All Users
Cc:	Christopher Lalor;James Heuglin
Subject:	Hurricane Milton - Update #14



As of the 5:00 PM update, Milton is now a hurricane. Hurricane Milton has maximum sustained winds of 85 mph. The track has shifted slightly, and there is a more northeastern path across our area. Even if we do not receive a direct hit, we will receive tropical storm and hurricane strength winds, significant storm surge, and dangerous flooding from rainfall, likely much greater that what we received from Hurricane Helene. By tonight, all personnel should have their homes and families secured for the storm, and be prepared for a full activation.

Notifications for this update:

- All agency members deemed non essential during an emergency response will be dismissed tomorrow, October 7th, 2024 starting at **noon**. In order to stay home you will need to advise your immediate supervisor and use your accrued time. You may report for regular duty if you chose to do so. As always, use caution when driving in inclement weather and do not attempt to traverse standing water. IMT will continue to send out updates on our response to TS Milton.

- The Emergency Operations Center (EOC) will transition to a Level 1 at 7:00 AM tomorrow. This means that shelters and countywide operations will be run out of the EOC. The Incident Management Team is your contact for agency needs; do not contact the EOC directly.

Subject: Tropical Storm Milton - Update #13

The 2:00 PM Intermediate Update shows that there are no significant changes in the track. The earliest arrival of tropical storm force winds is projected to be 8:00 PM on Tuesday.

These are the stations that are reported to still have gasoline:

- Veronica Shoemaker/Winkler
- Shell station at Hancock and US 41
- BJ's Cape Coral
- 711 Burnt Store and Pine Island has DIESEL only
- Racetrac at South Pointe and College has 93 Only
- Walmart / Murphy's USA in Lehigh
- Santa Barbara and Veterans 7/11

These are the stations that are reported to be currently **out** of gasoline:

- Country Club and Veterans Circle K
- Del Prado Speedway
- Trafalgar and Skyline 7/11
- Rebel US 41 and Del Prado
- 76 at Chiquita and Pine Island
- Walmart/Murphy's Del Prado
- Walmart on Pine Island Road
- Pine Ridge and San Carlos 7/11
- Santa Barbara and Gleason 7/11
- Palm Tree and Cape Coral Pkwy 7/11
- Lee and Gunnery 7/11
- Del Prado Racetrac
- Terry St Circle K
- Lee and Alvin Racetrac
- Joel Citgo
- N Cleveland and Littleton 7/11

Below are the current updated tasks that IMT has been working on since that last updates:

- Logistics members have scheduled pre-storm deliveries for food and beverages - the arrival time is Tuesday morning.
- Logistics members have scheduled post-storm deliveries from vendors.
- Logistics members have scheduled water deliveries.
- Logistics members have created plans for replenishment of supplies for long-term activations.
- Logistics members have arranged for ice deliveries for the event power is lost.
- Purchasing members have made plans for the procurement of potable water.
- Purchasing and Logistics members have scheduled the delivery of portable bathrooms should they be needed.
- HQ will be the central location for cooking needs post-storm for employees at HQ/IMT, Forensics, MCU, Command Staff, Spec Ops, and Staging personnel.

AMERICAN OVERSIGHT

Subject: Tropical Storm Milton - Update #12

The 11:00 AM update shows a small track shift to the south. Although it is still predicted to directly hit the Tampa Bay Area, the move slightly south may bring higher wind speeds and higher storm surge. The storm is expected to quickly intensify and will likely be a major hurricane upon arrival.

All personnel are encouraged to complete preparations for their homes and their families today.

There is still a high degree of uncertainty in both the tracks and the wind speed upon arrival, so the possibility of a direct strike to our area remains. The cone of uncertainty currently covers most of the Florida peninsula. The Incident Management Team (IMT) will keep you informed, and is making preparations to include schedule planning.

Subject: Tropical Storm Milton - Update #8

The 8:00 AM update shows that Milton is forecast to become a Major Category 3 Hurricane before making landfall. Timing, tracks, and intensity are still unpredictable; however, the National Hurricane Center still shows the track toward the Tampa area.

The current forecast is as follows:

- There is a Flood Watch for the entire area through Thursday.
- Rainfall in the amount of 5" to 8", with localized totals up to 12".
- The timing of the impacts is from late Tuesday through early Thursday morning, but it is expected to make landfall on the West Coast on Wednesday.
- There is great uncertainty about where the storm will make landfall. The average Day 4 track error is around 150 miles, so we are still well within a possible landfall range.
- The current earliest wind time arrival is 4 PM on Tuesday, and the most likely arrival time is 2 AM on Wednesday.

Additional notifications for this update include:

- Personnel should maintain at least ½ tank at all times. Due to current fuel runs, please use any opportunity to make sure your agency vehicle stays full at all times.
- Personnel who must fuel and have no other options may use 89 or 93 Octane fuel.
- Select IMT members have been activated. Please send requests to IMT@sheriffleefl.org.
- The select CRU members who were notified individually will report at 10:00 AM to the Headquarters Training Room (1202).
- The asset movement members who were notified individually will report at 10:00 AM to the Headquarters Training Room (1202).
- All units, components, precincts, corrections facilities, and all affected agency departments should fill up all available gas cans and gas tanks.
- Pine Island Fire Department is out of sand. They still have sandbags. They expect to get more sand on Monday.

Sent: Saturday, October 5, 2024 6:19 PM
To: All Users <AllUsers@sheriffleefl.org>
Subject: Tropical Storm Milton - Update #7

AMERICAN OVERSIGHT

With the 5:00 PM update, Tropical Storm Milton is now expected to arrive as a major hurricane. The track has shifted some to the north; however, some model tracks still show direct hits our our area, and we are still in the cone of uncertainty. Please recall from prior storms that although we are not in the direct path, the effects of the

hurricane will still affect us heavily, especially in the areas prone to storm surge. Additionally, the peak storm surge from Helene arrived almost 10 hours after the peak winds, so all personnel should be aware of and consider the effects before, during, and after the storm.

The below preparations remain in effect. The only change for this period is:

- Four (4) additional shallow water vessels have been obtained for water rescues.
- Additional High-Water Vehicles have been obtained and will be deployed to the islands for potential high-water rescues.
- The San Carlos Park Fire Department is out of sand and sandbags.

From: IMT <IMT@sheriffleefl.org>
Sent: Saturday, October 5, 2024 3:50 PM
To: All Users <AllUsers@sheriffleefl.org>
Subject: Tropical Storm Milton - Update #6

As of a 12:25 PM National Hurricane Center update, Tropical Storm Milton has formed. This storm is forecast to strengthen and bring the risk of life-threatening impacts to portions of the West Coast of Florida next week. The maximum winds are currently estimated at 40 mph with higher gusts. Models range in intensity from a Tropical Storm to a Major Hurricane, so there is tremendous unpredictability in the strength upon arrival.

At this time, the Incident Management Team is preparing for the possibility of a major hurricane affecting our area with impacts beginning on Tuesday and a full impact on Wednesday.

All agency personnel are encouraged to prepare as follows:

- All personnel should review their hurricane plans, and prepare their homes and families for the possibility of a hurricane impact in the middle of next week.
- All precincts should secure their mobile assets (decoy vehicles, arrow boards, trailers, ATVs, etc.) beginning on immediately to be completed by 2:00 PM on Monday.
- All trailers should be brought to storage beginning immediately to be completed by 2:00 PM on Monday.
- All personnel should use the remainder of this weekend to prepare for a possible activation. This plan should include three days worth of food, uniforms, and supplies.
- All personnel should use the remainder of this weekend to prepare their uniforms and equipment (including sufficient batteries for equipment) for a possible activation.
- All specialty units should begin bringing their assets back to their storage areas and secure locations. This should be completed by 2:00 PM on Monday.
- All precincts should secure any items that can be moved by the wind to a secure location starting immediately to be completed by 2:00 PM on Monday.
- All Corrections facilities (including Nan's Ranch) should prepare their facilities for a possible hurricane impact next week.

This is new information as of this update:

- The Waterborne Strike Team is on standby for deployment for water rescues.
- JetBlue Stadium, CenturyLink Stadium, the Lee County Gun Range, and the Andrea Lane and Sivan Road storage buildings are prepared to receive assets if needed.
- The Marine Unit is in contact with the IMT to secure the marine assets.

AMERICAN OVERSIGHT

- Known sandbag locations are as follows:
  - Punta Gorda—Free sandbags will be available at 3130 Cooper St., the last entrance on the left by flag poles.
  - Fort Myers Beach—Sand is located off of Gulf Beach Road, and bags are available at Town Hall, 2731 Oak St. (The location will provide service until 4:30 p.m. on Friday and begin Monday at 8:30 a.m.)
  - Fort Myers— South Trail Fire & Rescue will have sand and sandbags available at station 63, 5531 Halifax Ave., Fort Myers—a maximum of 20 bags per household. UPDATE: South Trail Fire & Rescue is currently out of sand. Empty sandbags only are available.
  - Naples— Sandbags will be available at three public park locations: Big Corkscrew Island Regional Park, 810 39th Ave., North Collier Regional Park, 15000 Livingston Road, in the Sun-N-Fun Lagoon parking lot, and at Donna Fiala Eagle Lakes Community Park, 11565 Tamiami Trail East, in the grassy area between the parking lots. The Naples sandbag locations will begin service at 8 a.m. through dusk on Saturday and Sunday.
  - San Carlos Park—Sand and sandbags are available at San Carlos Park Fire District Station 54, located at 16900 Oriole Road. There is a limit of 10 bags per household. Bags can be picked up at the lobby. Bring your own shovel. Be prepared to fill and load your own sandbags. Make sure your vehicle can transport the weight of the sandbags.
  - North Fort Myers—Sandbags will be located at North Fort Myers Parks and Recreation, 2000 N. Recreation Parkway. Sand will be located in the back of the park, next to the county mulch pile. Please bring your own shovel to fill the bags.
  - Matlacha—Sandbags are available for pickup at Station 1, located at 5700 Pine Island Rd, Bokeelia, FL 33922
- IMT personnel are visiting the precincts, and the storage locations to inventory assets to prepare for both securement and post-storm deployment.
- No schedule changes are expected between now and Monday afternoon; however, all personnel should be prepared for schedule adjustments.
- The Agriculture assets are secured on the Olga site.

Subject: Important Update on a possible impending hurricane impacting our area (Update #5)

Team,

IMT has been working on preparation for a potential Hurricane impacting our area early next week. IMT will continue to send out updates regularly so please monitor your email closely. All agency units need to begin preparations of securing their assigned assets and communicate all movement to IMT. Also, update the major asset application on the intranet. We have secured Jet Blue Park as an asset staging area for Marine and other assets. Agency asset storage facilities to include the gun range are preparing to house assets as well. IMT is securing high water vehicles that will be pre-staged at strategic locations i.e., the barrier islands. IMT members will be in the RTIC today coordinating efforts. Agency extension 239-258-3150 is being setup to communicate to IMT staff. Additional updates to follow.

Be prepared and be safe!

Subject: New Caribbean Disturbance - Update #4

The National Hurricane Center 2:00 PM update shows the possibility of development as the low pressure area in the Gulf of Mexico moves slowly eastward or northeastward. A tropical or subtropical depression or storm could form during the early to middle part of next week if the low remains separate from a frontal boundary that is forecast to extend across the Gulf of Mexico. Regardless of development, locally heavy rains could occur over portions of the Florida Peninsula late this weekend into next week. As of this update, the formation chance in the next 48 hours is low at 10 %, and the formation chance through 7 days has increased to 50%.

Current model runs show an arrival time of any potential storm around Wednesday of next week. This represents a slower forward storm speed and later storm arrival than previous model runs, so the timing and impacts are still largely unknown. Regardless of any potential storm, significant rainfall is still expected, and the Incident Management Team will continue to monitor and update all personnel.

Sent: Thursday, October 3, 2024 9:56 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance - Update #3

The National Hurricane Center has reduced the chance of tropical cyclone development within seven days to 30%. While the system is likely to develop over the Gulf of Mexico late this weekend or early next week, subsequent tropical or subtropical development could be limited by the system's potential interaction with a frontal boundary. Regardless of development, locally heavy rains could occur over portions of the Florida Peninsula next week.

Subject: New Caribbean Disturbance - Update #2

The forecast for the area of disorganized showers remains the same; it is still too early to tell if the system will develop further. Regardless of development, heavy rain is expected in our area into the weekend and next week. The Incident Management Team will continue to monitor.

From: IMT <IMT@sheriffleefl.org>
Sent: Tuesday, October 1, 2024 10:35 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance - Update #1

The area of disorganized showers remains at a 40% chance of development. The National Hurricane Center indicates that environmental conditions could support some gradual development of this system, and a tropical depression could form towards the end of this week or this weekend while it moves generally northwestward over the northwestern Caribbean Sea and into the Gulf of Mexico. As of this time, there are no changes, but some long range models show an increased chance of this disturbance affecting our area.

AMERICAN OVERSIGHT

From: IMT <IMT@sheriffleefl.org>
Sent: Monday, September 30, 2024 8:11 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance

The Incident Management Team is monitoring a new area of disorganized showers and thunderstorms over the western Caribbean Sea. The National Weather Center states that the system has a medium chance (40%) of developing towards the middle to latter part of the week as it moves northwestward into the Gulf of Mexico. As this disturbance moves into the gulf, increasing moisture is expected over the Florida Peninsula and elevated rain chances are anticipated from Friday through the weekend, and possibly into early next week.

Unfortunately, long range models show the possibility of direct impacts for Southwest Florida; however, It is too early to determine what, if any, tropical specific impacts can be expected.

The Incident Management Team will continue to monitor the storm, and will continue to provide updates through this very active part of the hurricane season.

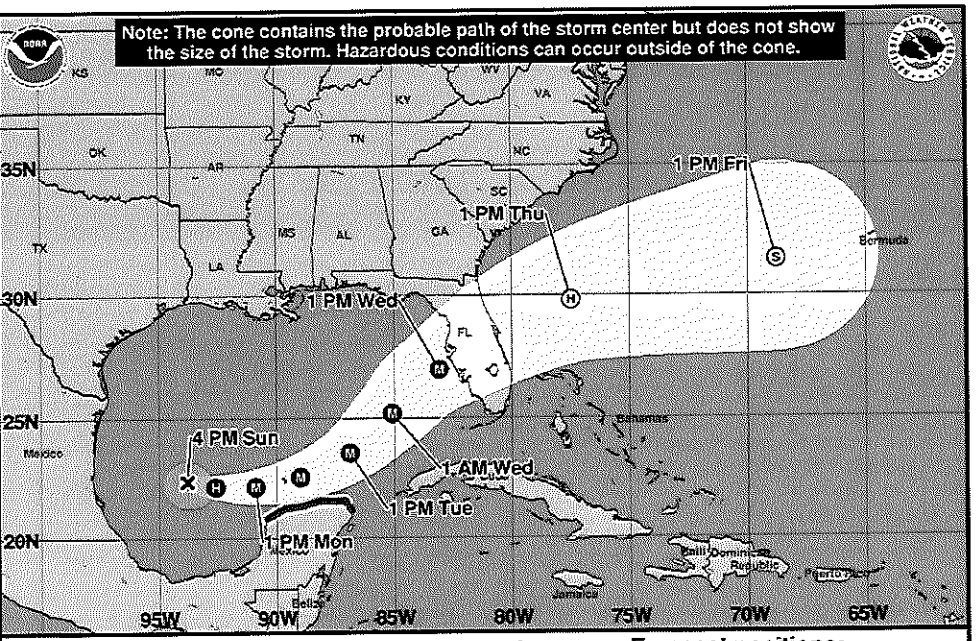
Hurricane Milton Continuing to Rapidly Intensify Over the Southwestern Gulf of Mexico This Evening



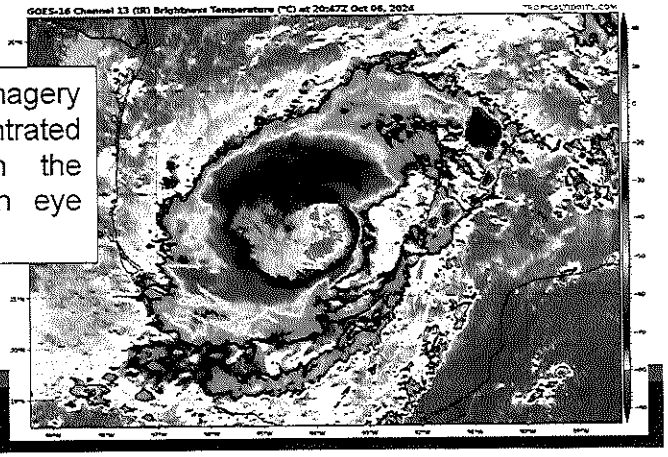
This update is intended for government and emergency response officials, and is provided for informational and situational awareness purposes only. Forecast conditions are subject to change based on a variety of environmental factors. For additional information, or for any life safety concerns with an active weather event please contact your County Emergency Management or Public Safety Office, local National Weather Service forecast office, or visit the National Hurricane Center website at www.hurricanes.gov.

FL-LEE-24-000380

AMERICAN OVERSIGHT

Hurricane Milton

From the National Hurricane Center (NHC)



- **Location:** 805 miles WSW of Tampa, Florida
- **Maximum Sustained Winds:** 85 mph, Category 1 hurricane
- **Current Movement:** E at 7 mph

This general motion is expected today, with an east-northeastward motion expected on Monday followed by a faster northeastward motion on Tuesday and Wednesday. On the forecast track, Milton is forecast to move just north of the Yucatan Peninsula and across the southern Gulf of Mexico Monday and Tuesday and approach the west coast of Florida by Wednesday. Milton is forecast to rapidly intensify during the next couple of days and become a major hurricane on Monday.

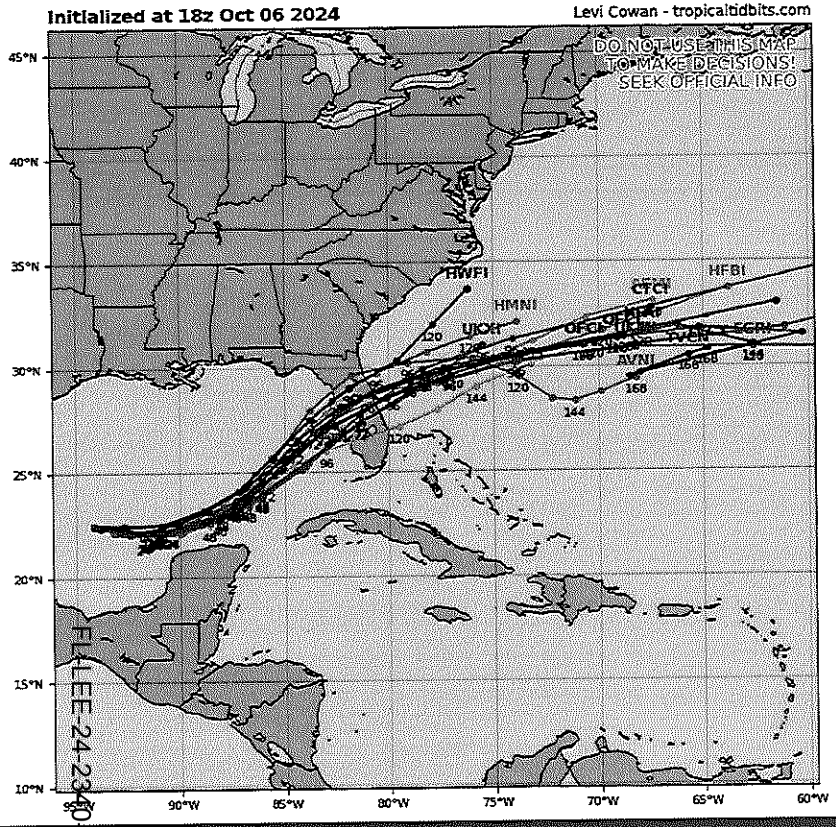
Milton is forecast to be a major hurricane when it reaches the west coast of Florida midweek. There is an increasing risk of life-threatening storm surge and damaging winds for portions of the western Florida Peninsula beginning early Wednesday and expanding eastward through the daytime hours. Storm Surge and Hurricane Watches will likely be issued by early Monday.

Current satellite imagery indicated very concentrated thunderstorm activity in the eyewall and hints of an eye starting to appear.

FOUO – For Government Official Use Only

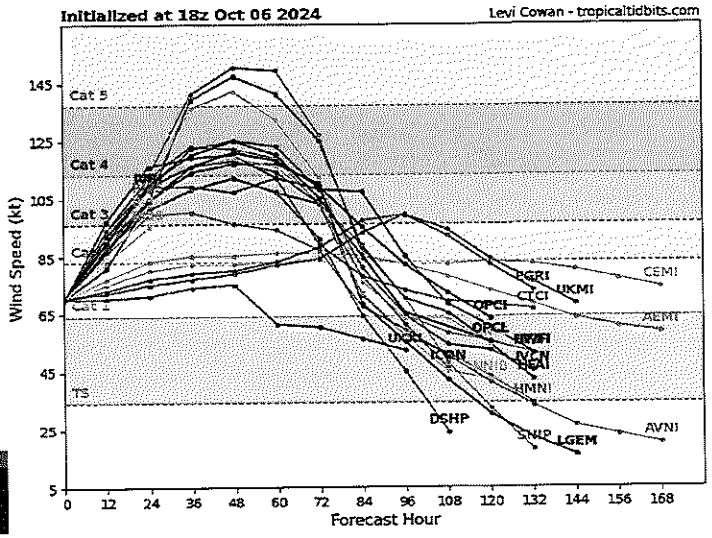
DHS-24-2340-381

AMERICAN OVERSIGHT



Forecast Computer Models – Next 5 Days

Hurricane Milton



Computer forecast models remain in decent agreement that Milton will gradually turn eastward on Monday and then accelerate to the northeast on Tuesday and Wednesday toward the Florida Peninsula ahead of an upper-level disturbance offshore of Texas. It is important to note that the average National Hurricane Center track error at Day 3 is around 100 miles, and we urge all of you to not focus on the exact track.

Computer forecast models remain in good agreement regarding Milton's rapid intensification during the near-term forecast as the tropical cyclone remains small, within light upper-level winds, and deep warm waters. The peak intensity over the southern-central Gulf of Mexico may still be conservative at this time. The forecast becomes a bit trickier as it nears landfall as upper-level winds sharply increase; however, computer forecast models are showing the system growing in areal extent if it weakens, and computer forecast models show Milton being a large hurricane at landfall, with dangerous impacts able to spread over a big area.

Hurricane MILTON Model Track Guidance

Hurricane MILTON Model Intensity Guidance

AMERICAN OVERSIGHT

Timing of Arrival

From the National Hurricane Center (NHC)

- Tropical storm-force conditions will most likely arrive along the West Florida coastline early Wednesday morning, and spread eastward across the Florida Peninsula through the Wednesday daytime hours.
- Tropical storm-force winds could arrive as early as Tuesday evening along the western Florida Peninsula.
- Probabilities (*shaded*) will continue to increase as Milton's landfall is closer in the forecast period.
- There remains quite a bit of uncertainty regarding the forward speed and progression of Milton, and thus the arrival time of tropical hazards; changes to the eventual track and timeline can be expected, it is important not to focus on single model runs or solutions!

Location	Probability
Key West	48%
Naples	72%
Fort Myers	60%
Miami	26%
West Palm	56%
Venice	84%
Tampa	80%
Orlando	59%
Cocoa Beach	72%
Cedar Key	58%
Daytona Beach	51%
Gainesville	38%
Jacksonville	28%

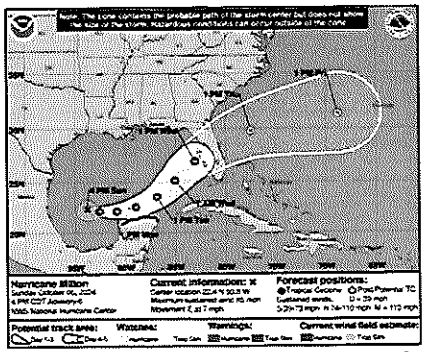
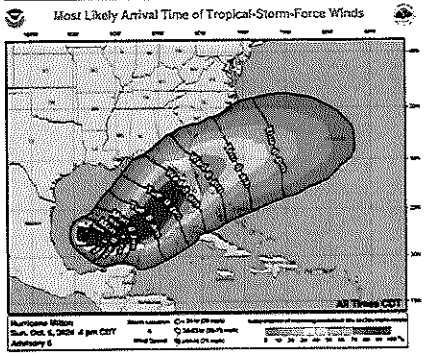
Key Messages
From the National Hurricane Center (NHC)



Key Messages for Hurricane Milton
Advisory 6: 4:00 PM CDT Sun Oct 06, 2024



1. Milton is forecast to be a major hurricane when it reaches the west coast of the Florida Peninsula midweek. Users are reminded to not focus on the details of the forecast as there remains significant uncertainty in the eventual track and intensity of Milton.

2. While it is too soon to specify the exact magnitude and location of the greatest impacts, there is an increasing risk of life- threatening storm surge and damaging winds for portions of the west coast of the Florida Peninsula beginning early Wednesday and Storm Surge and Hurricane Watches will likely be issued tonight or early Monday. Residents in the Florida Peninsula should follow any advice given by local officials and monitor updates to the forecast.

3. Areas of heavy rainfall will impact portions of Florida through Monday well ahead of Milton, with heavy rainfall more directly related to Milton expected on Tuesday through Wednesday night. This rainfall will bring the risk of considerable flash, urban, and areal flooding, along with the potential for moderate to major river flooding.

4. Tropical storm conditions are expected with hurricane conditions possible beginning Monday across portions of the northern Yucatan Peninsula of Mexico where a Tropical Storm Warning and Hurricane Watch are in effect.

For more information go to hurricanes.gov

AMERICAN OVERSIGHT

Rainfall Totals – Next 7 Days

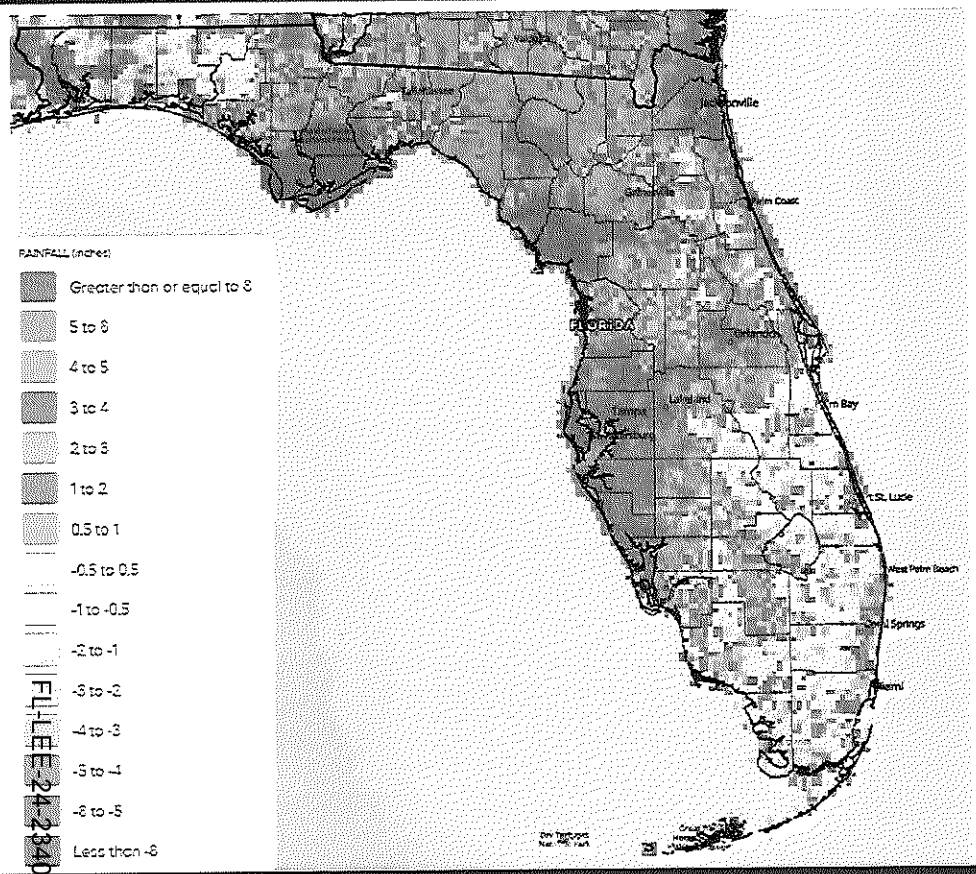
From the Weather Prediction Center (WPC)

7-Day Forecast Rainfall Totals –
Through Saturday Night (10/12)

- A frontal boundary is expected to push into the state this weekend kicking off a wet and active weather pattern across the Peninsula, even prior to tropical impacts.

- *Rainfall totals heavily tied to the eventual track and forward speed of the system. With computer model guidance uncertainty regarding the exact track, there remains uncertainty as to where the heaviest rainfall can be expected.*

- Widespread rainfall totals near 5-8" with **locally higher totals in excess of 8-12"** are possible across portions of the Peninsula.
  - Computer models are indicating the heaviest rainfall totals may occur along and near the I-4 corridor through Central and South Florida; however, the exact placement of these more significant totals will continue to be modified depending on the tropical disturbance's organization and track.
  - Drier air circulating along the southern side of the system as it moves across the Peninsula will keep heavy rainfall along the northern side of the system, allowing for widespread rainfall to extend into Northeast Florida.
  - **Please continue to stay tuned for the latest computer forecast model guidance and trends in the subsequent days.**



FL-LEE-24-22-00385

FOUO – For Government Official Use Only

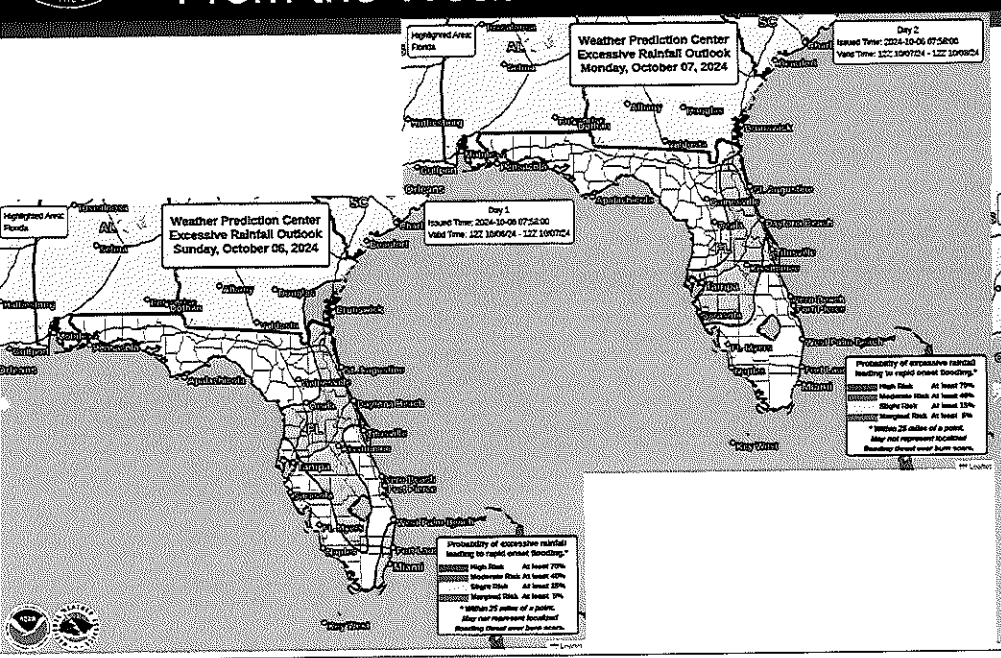
AMERICAN OVERSIGHT

60-Day Rainfall Departure From Normal

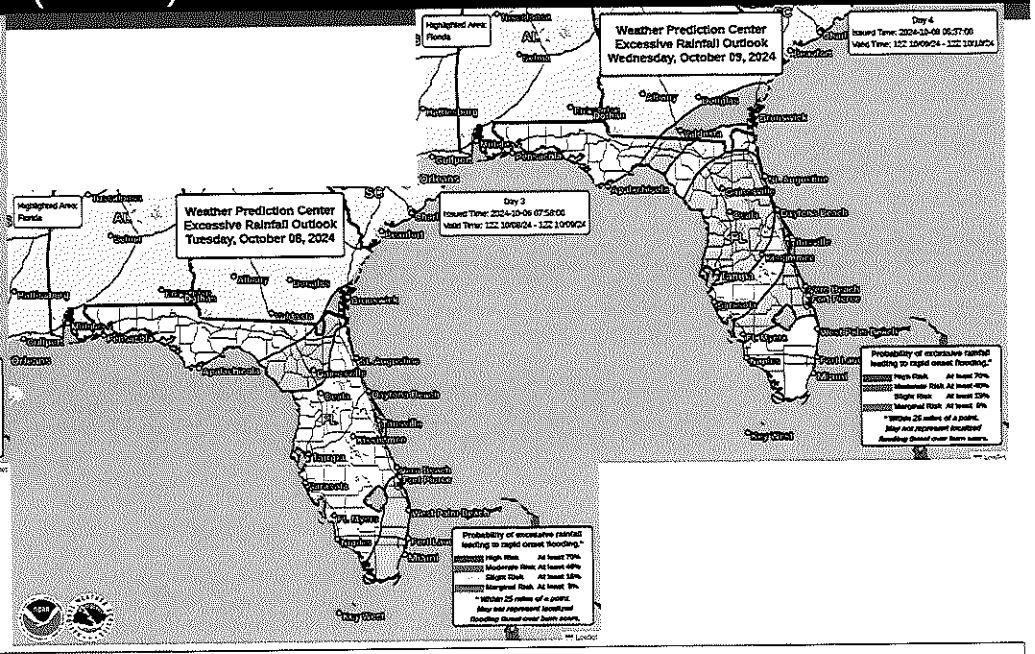
From the National Weather Service

Much of the Big Bend and Northern Peninsula southward through the I-4 corridor and into West-Central and Southwest Florida have experienced rainfall totals greater than 5-10" above normal over the past 60-days. More localized areas have seen rainfall totals near 10-15" above normal over the past 60-days across with isolated higher totals near 15-20" over the past 60 days across portions of Apalachicola, the Suwannee Valley, Northeast Florida, and West-Central Florida.

Numerous North, West-Central, and Southwest Florida rivers are already running high and/or within flood stage at this time.



Saturated areas will be more vulnerable to heavy rainfall and a faster onset of flooding.

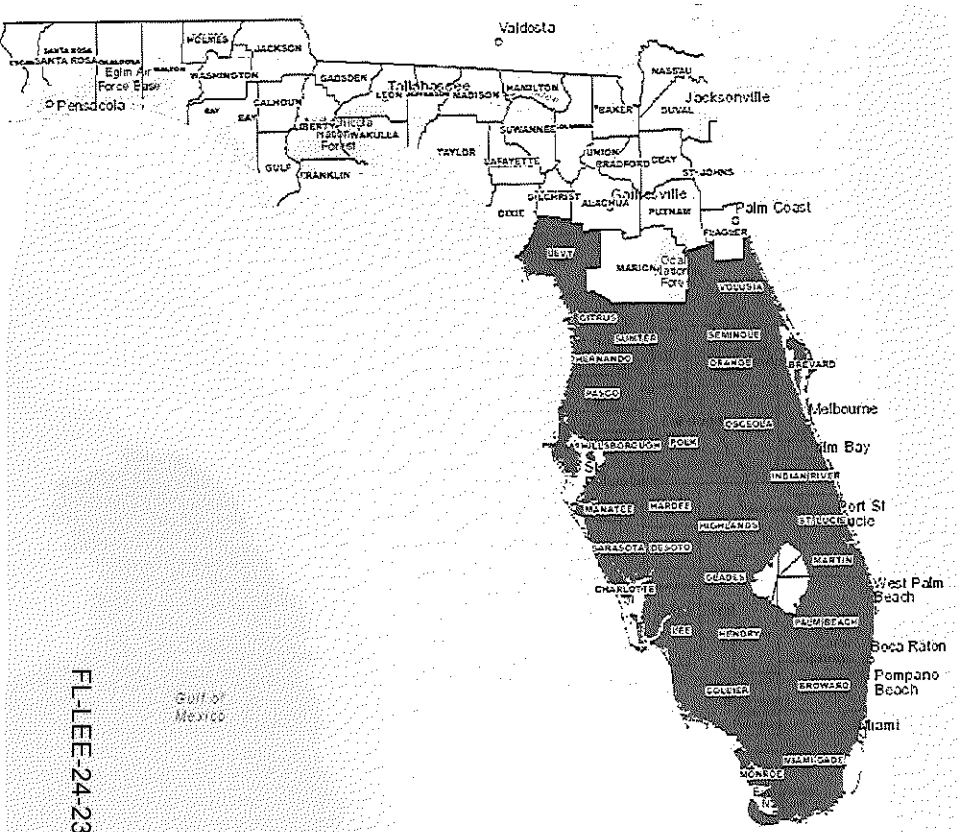


FL-LEE-24-2340-386

AMERICAN OVERSIGHT

Flash Flood Outlooks – Next 5 Days

From the Weather Prediction Center (WPC)



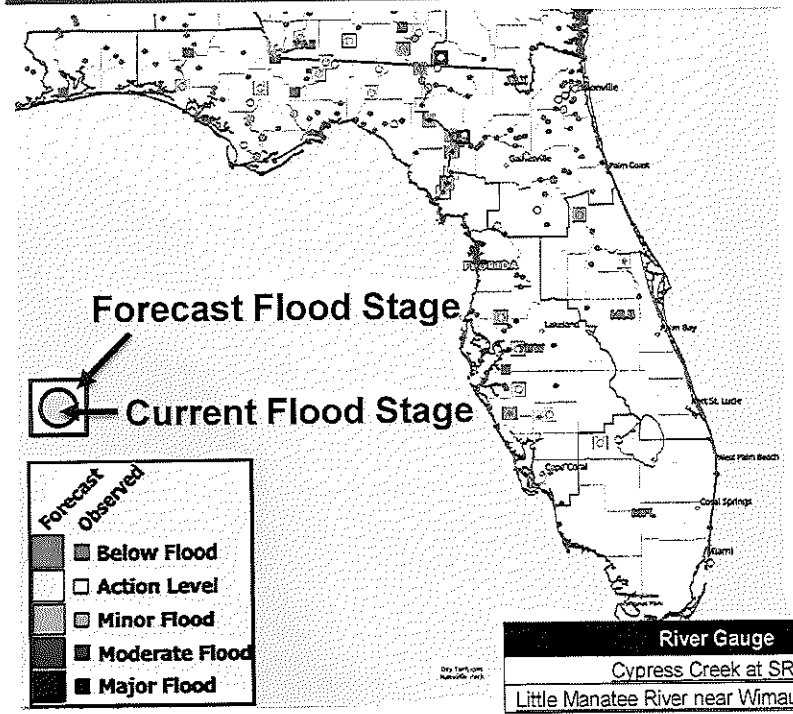
The Weather Prediction Center (WPC) is outlooking a **Moderate Risk (level 3 of 4)** for **Flash Flooding** along the Southeast Florida Metro on Sunday with a Slight Risk (level 2 of 4) along the coastal Peninsula and a **Marginal Risk (level 1 of 4)** extending for Sunday due to tropical moisture associated with an upper-level disturbance separate from Tropical Storm Milton. Widespread rainfall can be expected on Sunday and continue into next week before Tropical Storm Milton approaches the Florida West Coast midweek. Widespread heavy rainfall can be expected to continue on Monday and into Tuesday ahead of the outer bands of Milton, and the Weather Prediction Center (WPC) is outlooking a Slight Risk (level 2 of 4) south of the I-4 corridor on Monday and throughout most of the Peninsula and towards Northeast Florida on Tuesday. Coastal locations along the West Coast experienced flooding (both tidal and rainfall) due to Major Hurricane Helene, and any coastal or low-lying areas will remain vulnerable to additional rounds of rainfall. Heavy rainfall rates will also be a concern over already saturated and vulnerable soils; ponding water and instances of flooding will be possible, especially throughout the urban and poor drainage/low-lying areas in the Florida Peninsula. There remains uncertainty as to where the heaviest rainfall will fall as Tropical Storm Milton approaches and crosses the Florida Peninsula around mid-week. The Weather Prediction Center (WPC) is outlooking a **Moderate Risk (level 3 of 4)** for **Flash Flooding** across Nature Coast and inland towards Northeast Florida, including both the northern I-75 corridor and the entire I-4 corridor, with a Slight Risk (level 2 of 4) extending into portions of the Big Bend and Southwest Florida. Additional **Flood Watches** will likely be issued as details become clearer.

LLE-24-3330A-00387

AMERICAN OVERSIGHT

Flood Watches

From the National Weather Service (NWS)



Flood Watches have been issued for the Florida Peninsula, spanning from the Nature Coast to along and south of the I-4 corridor beginning today until Thursday morning. This impacts the following counties:

Levy	**Volusia**	**Citrus**	**Hernando**
Pasco	**Pinellas**	**Hillsborough**	**Manatee**
Sarasota	**Charlotte**	**Lee**	**Collier**
Monroe	**Hendry**	**Glades**	**Highlands**
Hardee	**DeSoto**	**Polk**	**Sumter**
Lake	**Seminole**	**Orange**	**Osceola**
Brevard	**Okeechobee**	**Indian River**	**St. Lucie**
Martin	**Palm Beach**	**Broward**	

FL-LEE-24-2340-A-00388

Current & Forecast River Conditions

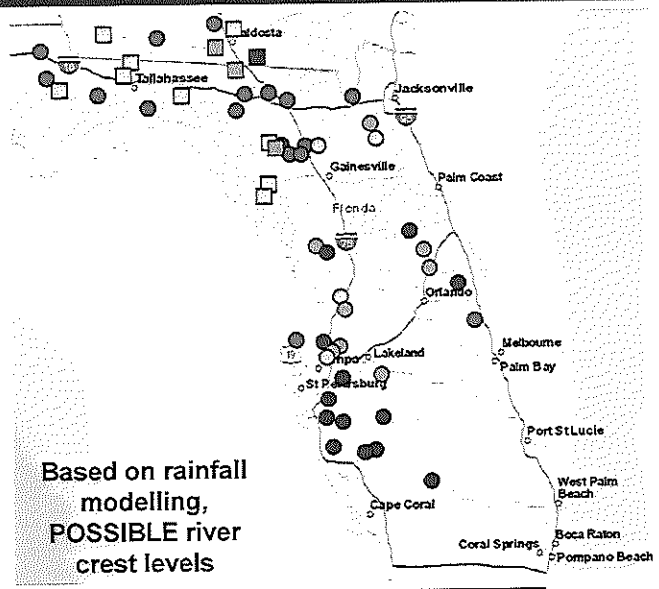
From the National Weather Service

River Flood Warnings remain in effect along the St. Johns River at Astor as water levels will remain within minor flood stage over the next several days as heavy rainfall occurs over trapped water levels within the basin.

The Aucilla River at Lamont is forecast to gradually rise near or just above minor flood stage over the next couple of days with widespread rainfall anticipated. The lower Withlacoochee and the middle Suwannee Rivers will continue to rise over the next several days into minor flood stage. The Withlacochee River near Pinetta (CR-150) has crested with the flood wave progressing down the Suwannee River well into next week and water levels will slowly decline. Flood waters continue to travel down the Suwannee, with backwater flooding possible up the Santa Fe River including at Three Rivers Estates by late weekend; additional minor to **moderate riverine flooding** will be possible.

River Flood Warnings are also in effect for the Manatee River near Myakka Head at SR-64, Myakka River at Myakka River State Park, Little Manatee at Wimauma, and Cypress Creek at SR-54 as minor flooding is occurring or forecast due to recent locally heavy rainfall and additional heavy rainfall anticipated this weekend and into next weekend ahead of Milton, then Milton could also bring additional heavy rainfall.

For more details, please visit the River Forecast Center.



River Gauge	County(ies) Affected	Current Level	Crest Level	Record Level	Status	Crest Day	Warning Expires
Cypress Creek at SR-54	Pasco	Action: 7.98 ft	Minor: 8.90 ft	13.80 ft	Rising	8-Oct	Until Further Notice
Little Manatee River near Wimauma at US-301	Hillsborough	Action: 10.00 ft	Minor: 11.60 ft	20.10 ft	Falling	5-Oct	0342 EDT 5-Oct
Manatee River near Myakka Head at SR-64	Manatee	Action: 10.63 ft	Minor: 13.80 ft	20.90 ft	Falling	Crested	1435 EDT 5-Oct
Myakka River at Myakka River State Park	Sarasota	Below: 6.44 ft	Minor: 7.30 ft	12.80 ft	Rising	9-Oct	Until Further Notice
Withlacoochee River near Pinetta	Hamilton, Madison	Minor: 77.10 ft	Minor: 76.40 ft	87.80 ft	Cresting	5-Oct	1830 EDT 8-Oct
St. Johns River at Astor	Volusia, Lake	Minor: 2.62 ft	Minor: 2.60 ft	4.70 ft	Rising	5-Oct	Until Further Notice
Santa Fe River at Three Rivers Estates	Columbia, Gilchrist, Suwannee	Minor: 17.07 ft	Moderate: 21.90 ft	33.40 ft	Rising	13-Oct	Until Further Notice
Aucilla River at Lamont	Jefferson, Madison, Taylor	Action: 52.96 ft	Minor: 53.00 ft	58.8 ft	Rising	6-Oct	2230 EDT 6-Oct

AMERICAN OVERSIGHT

Riverine Flooding

Chance of River Flooding Based on Range of Forecast Rainfall

Chance of Exceedance		
30%	Level	70%
○	Action	□
●	Minor Flood	■
●	Moderate Flood	■
●	Major Flood	■

● = less than 30% chance of reaching Action level

Significant River Flooding impacts include road hazards and damage to residential, commercial, and/or agricultural areas. Evacuation may be required. Flash flooding or Minor river flooding are NOT included in this outlook. Check your local weather forecast frequently for the most up-to-date information for your area.

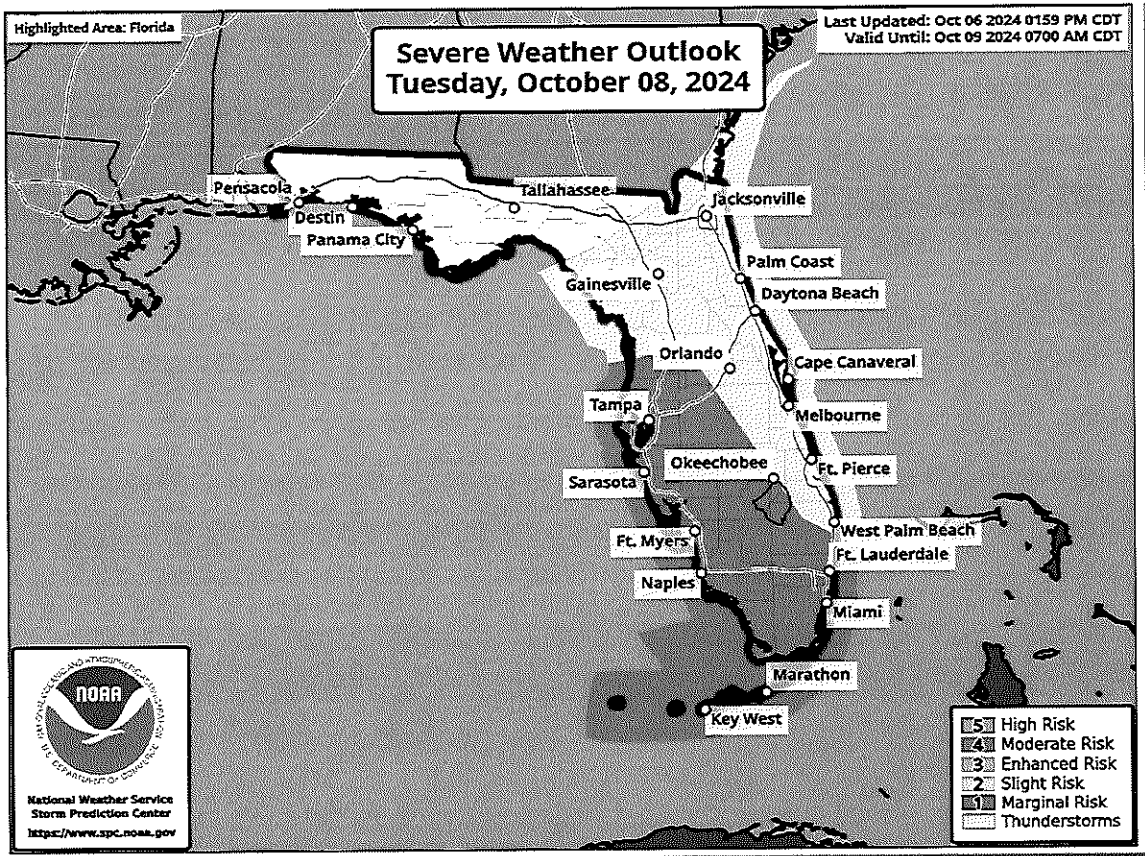
Shaded areas are the forecast region of the Southeast River Forecast Center

- **Significant River Flooding Not Expected**
- **Significant River Flooding Possible** — Weather conditions indicate, without certainty that significant river flooding could occur
- **Significant River Flooding Likely** — Weather conditions indicate that significant river flood conditions can be expected
- **Significant River Flooding Occurring** — Significant river flooding is occurring at this time

Rivers, creeks/streams, and waterways across North and West-Central Florida are already running above normal for this time of year due to widespread heavy rainfall from Hurricane Debby & Helene. **River Flood Warnings** remain in effect along portions of the Withlacoochee, St. Johns, and several West-Central Florida rivers, creeks, and waterways for ongoing minor flooding.

Water will continue to filter through the river basins and further downstream from heavy rainfall across the Southeast U.S. from Hurricane Helene over the next few weeks. Computer models are suggesting the potential for minor flooding along portions of the Suwannee River as excess heavy rainfall discharge through the basin from the Georgia headwaters with minor to **moderate backwater flooding** possible along the Santa Fe River. The Alapaha River near Jennings may also see water levels rise above flood stage in the next week or so as the Alapaha River at Statenville, Georgia is forecast to crest in major flood stage early next week before the crest wave moves further downstream into Florida.

Additional heavy rainfall near-term and in association with Hurricane Milton will likely lead to instances of potential rapid onset flooding across Northeast and West Florida waterways, with higher probabilities located in the southern Peninsula. Widespread minor to **moderate flooding** is likely, with **major flooding** possible near maximum rainfall totals.



FOUO – For Government Official Use Only

AMERICAN OVERSIGHT

FL-LEE 391

Isolated Tropical Tornadoes

From the Storm Prediction Center (SPC)

The Storm Prediction Center (SPC) has introduced a **Marginal Risk (level 1 of 5) for Severe Weather** along much of the western Florida Peninsula and across South Florida Tuesday night into Wednesday as isolated tropical tornadoes will be possible within Hurricane Milton's outer rainbands. The severe weather risk will likely be extended into Wednesday, with additional upgrades or forecast refinements possible in subsequent outlooks.

Tornado Watches and Warnings will be issued as conditions warrant.

THUNDERSTORMS (no label)	1 - MARGINAL (MRGL)	2 - SLIGHT (SLGT)	3 - ENHANCED (ENH)	4 - MODERATE (MDT)	5 - HIGH (HIGH)
No severe* thunderstorms expected	Isolated severe thunderstorms possible	Scattered severe storms possible	Numerous severe storms possible	Widespread severe storms likely	Widespread severe storms expected
Lightning/flooding threats exist with all thunderstorms	Limited in duration and/or coverage and/or intensity	Short-lived and/or not widespread, isolated intense storms possible	More persistent and/or widespread, a few intense	Long-lived, widespread and intense	Long-lived, very widespread and particularly intense

AMERICAN OVERSIGHT

Summary

FOUO – For Government Official Use Only

FL-LE 392

Hurricane Milton:

- Milton was upgraded to a hurricane at 2:00 PM EDT this afternoon (10/6).
- As of 5:00 PM EDT, Milton is located about 805 miles west-southwest of Tampa, Florida, and is moving eastward at 7 mph.
- An eastward to east-northeastward motion is forecast on Monday, followed by a faster northeastward motion on Tuesday and Wednesday.
- On the forecast track, Milton is forecast to move just north of the Yucatan Peninsula and across the southern Gulf of Mexico Monday and Tuesday, and approach the west coast of the Florida Peninsula by Wednesday.
- Maximum sustained winds are near 85 mph, making Milton a stronger Category 1 hurricane.
- Milton is forecast to rapidly intensify during the next couple of days and become a major hurricane on Monday.
- There is an increasing risk of life-threatening storm surge and damaging winds for portions of the western Florida Peninsula beginning early Wednesday and expanding eastward through the daytime hours. Storm Surge and Hurricane Watches will likely be issued by early Monday.
- Changes to the eventual track and timeline can be expected, it is important not to focus on single model runs or solutions!

Florida Outlook:

- Areas of heavy rainfall will impact portions of Florida through Monday, well ahead of Milton, with rainfall more directly tied to Milton expected on Tuesday through Wednesday night.
  - Widespread rainfall totals near 5-10" with **locally higher totals in excess of 10-15"** are possible across portions of the Peninsula.
  - *Rainfall totals heavily tied to the eventual track and forward speed of the system. With computer model guidance uncertainty regarding the exact track, there remains uncertainty as to where the heaviest rainfall can be expected.*
  - The Weather Prediction Center (WPC) is outlooking a **Moderate Risk (level 3 of 4) for Flash Flooding** across the Southeast Florida Metro and I-95 corridor on Sunday with a **Slight Risk (level 2 of 4)** extending along the Peninsula coastlines due to tropical moisture and an upper-level disturbance will bring widespread and heavy rainfall that could bring localized flash and areal flooding at times over already saturated grounds and soils.
  - A **Moderate Risk (level 3 of 4) for Flash Flooding** has been introduced on Wednesday across the Nature Coast and extending toward the northern I-95 corridor including lower portions of the Suwannee Valley, the northern I-75 corridor and the I-4 corridor on Wednesday. The **Slight Risk (level 2 of 4) for Flash Flooding** extends from the Suwannee Valley and through Central Florida.
  - A **Flood Watches** will remain in effect through Thursday across the Peninsula as **flash, urban, and areal flooding** will be possible, and additional **Flood Watches** will likely be issued further north as warranted.
- Rivers, creeks/streams, and waterways across North and West-Central Florida are already running above normal for this time of year due to widespread heavy rainfall from Hurricane Debby. **River Flood Warnings** remain in effect along portions of the Withlacoochee, St. Johns, and several West-Central Florida rivers, creeks, and waterways for ongoing **minor flooding.**
  - Heavy rainfall is anticipated next week likely leading to water level rises in the Florida Peninsula. Computer models are currently suggesting there is potential for widespread **minor to moderate flooding** will be possible across West Florida waterways, with instances of **major flooding** possible near the maximum rainfall totals.
- There is an increasing risk of life-threatening impacts for portions of the west coast of Florida Peninsula beginning late Tuesday or Wednesday; *however, the extent and locations of these impacts remain uncertain as it will be heavily tied to the eventual track and forward speed of the system.*
- Outer bands moving onshore along the Florida West Coast on Tuesday may bring **isolated tropical tornadoes** later Tuesday into Wednesday, and the Storm Prediction Center (SPC) is outlooking a **Marginal Risk (level 1 of 5) for Severe Weather.**
  - Additional expansions or upgrades to the Severe Weather Outlook can be anticipated as details become clearer. Additional watches and warnings can be expected closer to the outer bands moving onshore.
- The next name on the list is Nadine (*nay-DEEN*).

The next briefing packet will be issued on Monday morning. For the latest information, please visit the National Hurricane Center website.

Sheriffs:
The 10/06 Watch Log is below. It contains information on the inbound Hurricane Milton.

10/05	5:00pm D. Brand Executive Order 24-214, regarding Milton, was sent out to all sheriffs. We are recalling all currently deployed teams Monday to prepare for the next one. Leon SO will commute to Taylor w 10 alpha/10 bravo for next 5 days to continue our assistance to Taylor. NHC has entire western peninsula in cone with Cat 3 or higher expected on Wednesday. Pls prep your forward operating teams and response teams for redeployment. 6:45pm Three rooms are being reserved at the Drury hotel Tuesday – Sunday for FSA desk staff from Bay and Clay Counties. 7:00am Mission # 3764, for Leon Helene deployment was sent to Undersheriff Ron Cave. Via Capt. Kevin Kirkpatrick at 4:08pm yesterday. Okaloosa is starting prep now, I am would bring 20 total people if you call. **FSA task force:** 3 people **Okaloosa Strike force:** -2 Civilians -15 Deputies Capabilities: Command trailer, self sufficient with sleeping quarters, bath house, fuel etc. Boats (shallow and deep), ATVs, side-by-side, cut and toss with skid steer.

AMERICAN OVERSIGHT

Mission #00259
Pinellas, Sheriff Gualtieri, is requesting a pre-deployment of:
8 flat bottom boats and operators.
5 LMTVs (High-Water vehicles)
Capt. Scot Matthews will be the POC. Cell # to follow.
Sheriff Ford has identified the following so far:
Washington S O with 1 boat.
Jackson S O with 1 boat.
Bay has 3 boats with operators and two high water vehicles with drivers preparing to deploy. For Mission # 00259. Mission #00259 is listed in WebEOC as cancelled by the State Guard. We'll work it out later.

Broward S O was contacted; Major Greg Lees in reference to providing 4 flat bottom boats and 3 high-water vehicles.
5:20pm Broward advised that they could not deploy to Pinellas Co until they could determine if the hurricane would come their way.

Hillsborough S O put in a mission for 160 correctional officers; put on hold.
Hillsborough S O put in a mission for 300 LEOs; this is being held by the FDLE desk for assessment.
Hillsborough S O put in a mission for 60 9-1-1 dispatchers. This was referred to the Comms desk at the SEOC. They usually handle all communications issues and staffing.

Mission #00396
Hillsborough S O requesting 12 search & rescue K-9s with handlers. POC: Major Stephen Hoopes shoopes@teamhcso.com 813-215-2476. Report to 2224 Falkenburg Rd. Tampa. **Holding this mission until more information about the storm comes in.

Sheriff Prummell, Charlotte, is asking for 1 high-water vehicle. * On hold

3:15pm The first Leon S O Strike Team to Taylor County will deploy on 10/07 arriving around 7:00am. POC: James Pittman 850-556-4658
Mission # 00259 (Helene mission)

4:40pm FSA FOT 10/06 evening update sent out.

7:00pm
Sent out the Tropical update for 10/06 evenings.
Sent out the FDLE Milton SitRep #1.

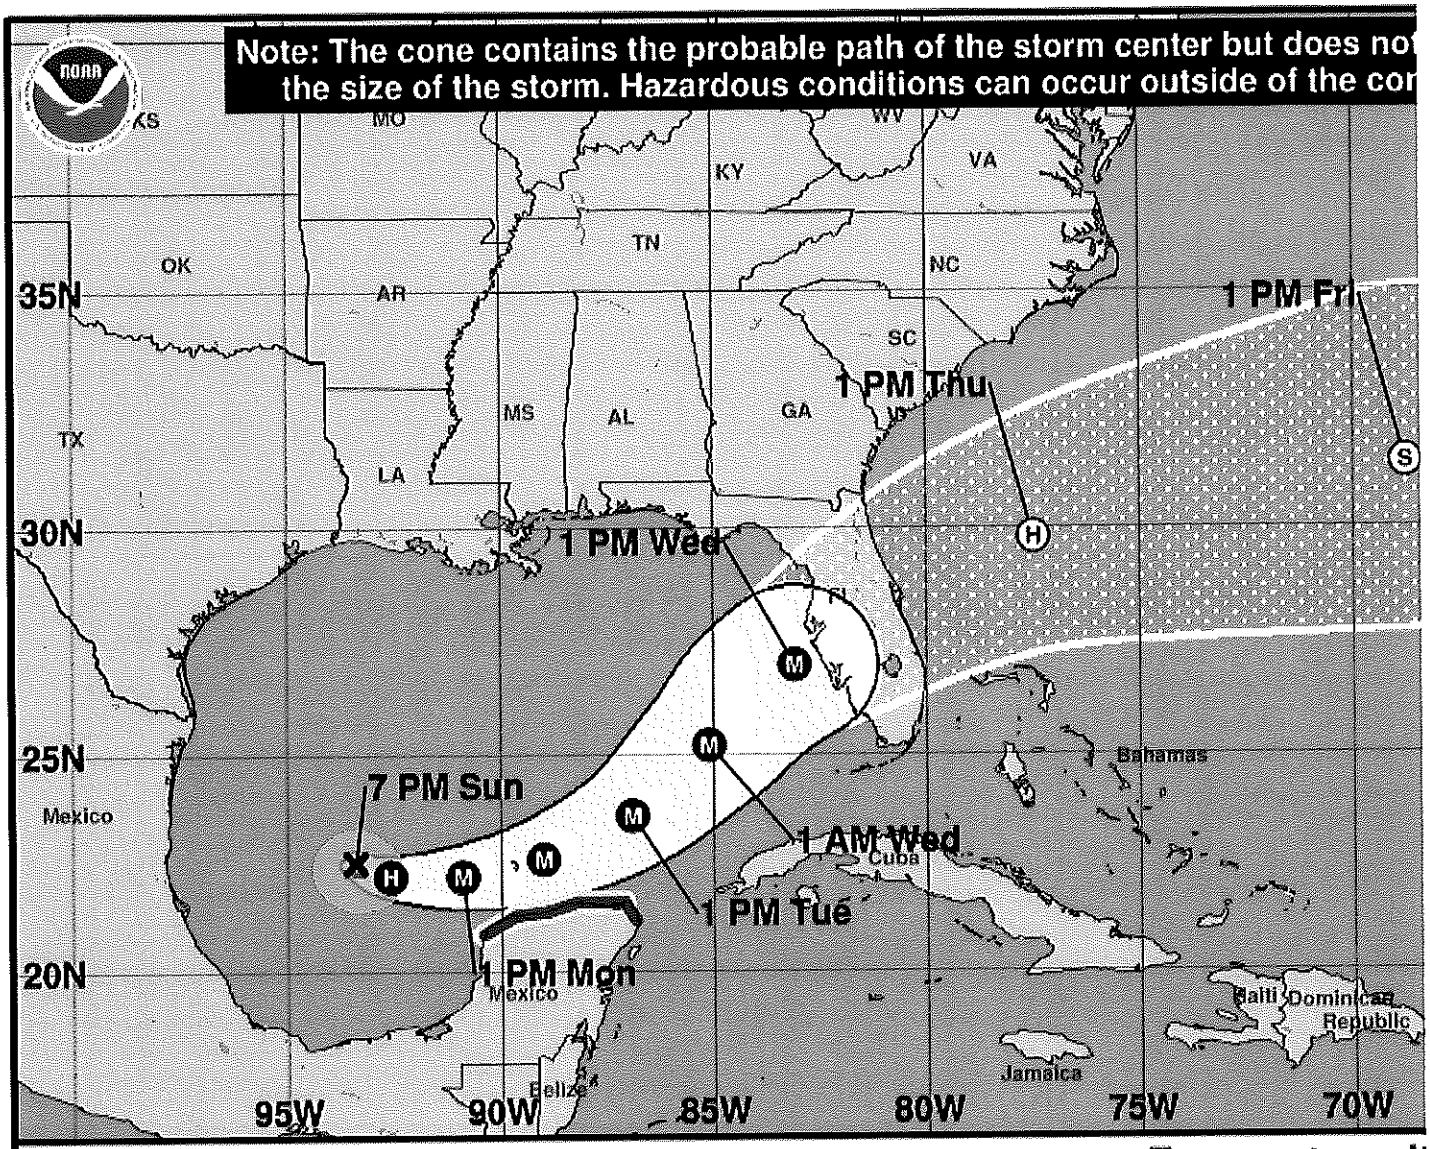
Subject:	Hurricane Milton - Update #15

As of the 8:00 PM National Hurricane Center update, Hurricane Milton is still forecast to rapidly intensify into a major hurricane. The center of the track has shifted further south, and is currently near the Bradenton/Sarasota area at landfall.

There is a Flood Watch for the entire area. Rainfall amounts of 5 to 10 inches, with localized totals of up to 15 inches are expected. The timing of the impacts is as early as late Tuesday and continuing into Thursday morning.



A good deal of uncertainty remains with where the storm will make landfall. It should be noted that the average NHC track error at day 3 is around 100 miles.

As of this update, new notifications are as follows:

- Youth Services and Training personnel have received their assignments and will report according to their schedule tomorrow.
- Court Operations and Civil personnel will receive their schedule tomorrow.
- Employee Assistance personnel are done for the evening. They will resume in the morning.
- IMT will be fully activated beginning at 7:00 AM on Monday, with all personnel reporting or receiving their assignments by then.
- For personnel working overtime, please use *Hurricane Milton* as the reason for the overtime.
- The 7-11 Gas station at 103 Leeland Heights Blvd W in Lehigh Acres is open for LEO. If you need gas, use pumps 3,4,5, or 6 only. Jessica is the contact person there.
- The 7-11 at 100 Delaware Rd. in Lehigh Acres is reserving gas for First Responders. use Pump 3 and 4. Sharon is the contact person there.
    - The 7-11 at 18971 Babcock Ranch Rd is holding gas for first responders but deputies must go inside to request pump to be turned on.
    - The 7-11 at Del Prado and N Tamiami (17930 N Tamiami Trl.) is also holding gas for first responders but deputies must go inside to request the pump be turned on.

All personnel should be ready for a full activation at any time. This is a serious, dangerous storm and all personnel should complete preparations as soon as possible. Models vary in intensity, but most predict *at least* a Category 3, so even if we do not receive a direct hit, we can expect hurricane strength winds or wind gusts and a severe storm surge.

Subject: Hurricane Milton - Update #14

As of the 5:00 PM update, Milton is now a hurricane. Hurricane Milton has maximum sustained winds of 85 mph. The track has shifted slightly, and there is a more northeastern path across our area. Even if we do not receive a direct hit, we will receive tropical storm and hurricane strength winds, significant storm surge, and dangerous flooding from rainfall, likely much greater that what we received from Hurricane Helene. By tonight, all personnel should have their homes and families secured for the storm, and be prepared for a full activation.

Notifications for this update:

AMERICAN OVERSIGHT

- All agency members deemed non essential during an emergency response will be dismissed tomorrow, October 7th, 2024 starting at **noon**. In order to stay home you will need to advise your immediate supervisor and use your accrued time. You may report for regular duty if you chose to do so. As always, use caution when driving in inclement weather and do not attempt to traverse standing water. IMT will continue to send out updates on our response to TS Milton.

- The Emergency Operations Center (EOC) will transition to a Level 1 at 7:00 AM tomorrow. This means that shelters and countywide operations will be run out of the EOC. The Incident Management Team is your contact for agency needs; do not contact the EOC directly.

Subject: Tropical Storm Milton - Update #13

The 2:00 PM Intermediate Update shows that there are no significant changes in the track. The earliest arrival of tropical storm force winds is projected to be 8:00 PM on Tuesday.

These are the stations that are reported to still have gasoline:

- Veronica Shoemaker/Winkler
- Shell station at Hancock and US 41
- BJ's Cape Coral
- 711 Burnt Store and Pine Island has DIESEL only
- Racetrac at South Pointe and College has 93 Only
- Walmart / Murphy's USA in Lehigh
- Santa Barbara and Veterans 7/11

These are the stations that are reported to be currently **out** of gasoline:

- Country Club and Veterans Circle K
- Del Prado Speedway
- Trafalgar and Skyline 7/11
- Rebel US 41 and Del Prado
- 76 at Chiquita and Pine Island
- Walmart/Murphy's Del Prado
- Walmart on Pine Island Road
- Pine Ridge and San Carlos 7/11
- Santa Barbara and Gleason 7/11
- Palm Tree and Cape Coral Pkwy 7/11
- Lee and Gunnery 7/11
- Del Prado Racetrac
- Terry St Circle K
- Lee and Alvin Racetrac
- Joel Citgo
- N Cleveland and Littleton 7/11

AMERICAN OVERSIGHT

Below are the current updated tasks that IMT has been working on since that last updates:

- Logistics members have scheduled pre-storm deliveries for food and beverages - the arrival time is Tuesday morning.
- Logistics members have scheduled post-storm deliveries from vendors.
- Logistics members have scheduled water deliveries.
- Logistics members have created plans for replenishment of supplies for long-term activations.
- Logistics members have arranged for ice deliveries for the event power is lost.
- Purchasing members have made plans for the procurement of potable water.
- Purchasing and Logistics members have scheduled the delivery of portable bathrooms should they be needed.
- HQ will be the central location for cooking needs post-storm for employees at HQ/IMT, Forensics, MCU, Command Staff, Spec Ops, and Staging personnel.
- Precincts and Corrections facilities will be responsible for their meal preparations.

Subject: Tropical Storm Milton - Update #12

The 11:00 AM update shows a small track shift to the south. Although it is still predicted to directly hit the Tampa Bay Area, the move slightly south may bring higher wind speeds and higher storm surge. The storm is expected to quickly intensify and will likely be a major hurricane upon arrival.

All personnel are encouraged to complete preparations for their homes and their families today.

There is still a high degree of uncertainty in both the tracks and the wind speed upon arrival, so the possibility of a direct strike to our area remains. The cone of uncertainty currently covers most of the Florida peninsula. The Incident Management Team (IMT) will keep you informed, and is making preparations to include schedule planning.

Subject: Tropical Storm Milton - Update #8

The 8:00 AM update shows that Milton is forecast to become a Major Category 3 Hurricane before making landfall. Timing, tracks, and intensity are still unpredictable; however, the National Hurricane Center still shows the track toward the Tampa area.

The current forecast is as follows:

- There is a Flood Watch for the entire area through Thursday.
- Rainfall in the amount of 5" to 8", with localized totals up to 12".
- The timing of the impacts is from late Tuesday through early Thursday morning, but it is expected to make landfall on the West Coast on Wednesday.
- There is great uncertainty about where the storm will make landfall. The average Day 4 track error is around 150 miles, so we are still well within a possible landfall range.
- The current earliest wind time arrival is 4 PM on Tuesday, and the most likely arrival time is 2 AM on Wednesday.

Additional notifications for this update include:

- Personnel should maintain at least ½ tank at all times. Due to current fuel runs, please use any opportunity to make sure your agency vehicle stays full at all times.
- Personnel who must fuel and have no other options may use 89 or 93 Octane fuel.
- Select IMT members have been activated. Please send requests to IMT@sheriffleefl.org.
- The select CRU members who were notified individually will report at 10:00 AM to the Headquarters Training Room (1202).
- The asset movement members who were notified individually will report at 10:00 AM to the Headquarters Training Room (1202).

AMERICAN OVERSIGHT

- All units, components, precincts, corrections facilities, and all affected agency departments should fill up all available gas cans and gas tanks.
- Pine Island Fire Department is out of sand. They still have sandbags. They expect to get more sand on Monday.

Sent: Saturday, October 5, 2024 6:19 PM
To: All Users <AllUsers@sheriffleefl.org>
Subject: Tropical Storm Milton - Update #7

With the 5:00 PM update, Tropical Storm Milton is now expected to arrive as a major hurricane. The track has shifted some to the north; however, some model tracks still show direct hits our our area, and we are still in the cone of uncertainty. Please recall from prior storms that although we are not in the direct path, the effects of the hurricane will still affect us heavily, especially in the areas prone to storm surge. Additionally, the peak storm surge from Helene arrived almost 10 hours after the peak winds, so all personnel should be aware of and consider the effects before, during, and after the storm.

The below preparations remain in effect. The only change for this period is:

- Four (4) additional shallow water vessels have been obtained for water rescues.
- Additional High-Water Vehicles have been obtained and will be deployed to the islands for potential high-water rescues.
- The San Carlos Park Fire Department is out of sand and sandbags.

From: IMT <IMT@sheriffleefl.org>
Sent: Saturday, October 5, 2024 3:50 PM
To: All Users <AllUsers@sheriffleefl.org>
Subject: Tropical Storm Milton - Update #6

As of a 12:25 PM National Hurricane Center update, Tropical Storm Milton has formed. This storm is forecast to strengthen and bring the risk of life-threatening impacts to portions of the West Coast of Florida next week. The maximum winds are currently estimated at 40 mph with higher gusts. Models range in intensity from a Tropical Storm to a Major Hurricane, so there is tremendous unpredictability in the strength upon arrival.

At this time, the Incident Management Team is preparing for the possibility of a major hurricane affecting our area with impacts beginning on Tuesday and a full impact on Wednesday.

All agency personnel are encouraged to prepare as follows:

- All personnel should review their hurricane plans, and prepare their homes and families for the possibility of a hurricane impact in the middle of next week.
- All precincts should secure their mobile assets (decoy vehicles, arrow boards, trailers, ATVs, etc.) beginning on immediately to be completed by 2:00 PM on Monday.
- All trailers should be brought to storage beginning immediately to be completed by 2:00 PM on Monday.
- All personnel should use the remainder of this weekend to prepare for a possible activation. This plan should include three days worth of food, uniforms, and supplies.

AMERICAN OVERSIGHT

- All personnel should use the remainder of this weekend to prepare their uniforms and equipment (including sufficient batteries for equipment) for a possible activation.
- All specialty units should begin bringing their assets back to their storage areas and secure locations. This should be completed by 2:00 PM on Monday.
- All precincts should secure any items that can be moved by the wind to a secure location starting immediately to be completed by 2:00 PM on Monday.
- All Corrections facilities (including Nan's Ranch) should prepare their facilities for a possible hurricane impact next week.

This is new information as of this update:

- The Waterborne Strike Team is on standby for deployment for water rescues.
- JetBlue Stadium, CenturyLink Stadium, the Lee County Gun Range, and the Andrea Lane and Sivan Road storage buildings are prepared to receive assets if needed.
- The Marine Unit is in contact with the IMT to secure the marine assets.
- Known sandbag locations are as follows:
    - Punta Gorda—Free sandbags will be available at 3130 Cooper St., the last entrance on the left by flag poles.
    - Fort Myers Beach—Sand is located off of Gulf Beach Road, and bags are available at Town Hall, 2731 Oak St. (The location will provide service until 4:30 p.m. on Friday and begin Monday at 8:30 a.m.)
    - Fort Myers— South Trail Fire & Rescue will have sand and sandbags available at station 63, 5531 Halifax Ave., Fort Myers—a maximum of 20 bags per household. UPDATE: South Trail Fire & Rescue is currently out of sand. Empty sandbags only are available.
    - Naples— Sandbags will be available at three public park locations: Big Corkscrew Island Regional Park, 810 39th Ave., North Collier Regional Park, 15000 Livingston Road, in the Sun-N-Fun Lagoon parking lot, and at Donna Fiala Eagle Lakes Community Park, 11565 Tamiami Trail East, in the grassy area between the parking lots. The Naples sandbag locations will begin service at 8 a.m. through dusk on Saturday and Sunday.
    - San Carlos Park—Sand and sandbags are available at San Carlos Park Fire District Station 54, located at 16900 Oriole Road. There is a limit of 10 bags per household. Bags can be picked up at the lobby. Bring your own shovel. Be prepared to fill and load your own sandbags. Make sure your vehicle can transport the weight of the sandbags.
    - North Fort Myers—Sandbags will be located at North Fort Myers Parks and Recreation, 2000 N. Recreation Parkway. Sand will be located in the back of the park, next to the county mulch pile. Please bring your own shovel to fill the bags.
    - Matlacha—Sandbags are available for pickup at Station 1, located at 5700 Pine Island Rd, Bokeelia, FL 33922
- IMT personnel are visiting the precincts, and the storage locations to inventory assets to prepare for both securement and post-storm deployment.
- No schedule changes are expected between now and Monday afternoon; however, all personnel should be prepared for schedule adjustments.
- The Agriculture assets are secured on the Olga site.

Subject: Important Update on a possible impending hurricane impacting our area (Update #5)

AMERICAN OVERSIGHT

Team,

IMT has been working on preparation for a potential Hurricane impacting our area early next week. IMT will continue to send out updates regularly so please monitor your email closely. All agency units need to begin preparations of securing their assigned assets and communicate all movement to IMT. Also, update the major asset application on the intranet. We have secured Jet Blue Park as an asset staging area for Marine and other assets. Agency asset storage facilities to include the gun range are preparing to house assets as well. IMT is securing high water vehicles that will be pre-staged at strategic locations i.e., the barrier islands. IMT members will be in the RTIC today coordinating efforts. Agency extension 239-258-3150 is being setup to communicate to IMT staff. Additional updates to follow.

Be prepared and be safe!

Subject: New Caribbean Disturbance - Update #4

The National Hurricane Center 2:00 PM update shows the possibility of development as the low pressure area in the Gulf of Mexico moves slowly eastward or northeastward. A tropical or subtropical depression or storm could form during the early to middle part of next week if the low remains separate from a frontal boundary that is forecast to extend across the Gulf of Mexico. Regardless of development, locally heavy rains could occur over portions of the Florida Peninsula late this weekend into next week. As of this update, the formation chance in the next 48 hours is low at 10 %, and the formation chance through 7 days has increased to 50%.

Current model runs show an arrival time of any potential storm around Wednesday of next week. This represents a slower forward storm speed and later storm arrival than previous model runs, so the timing and impacts are still largely unknown. Regardless of any potential storm, significant rainfall is still expected, and the Incident Management Team will continue to monitor and update all personnel.

From: IMT <IMT@sheriffleefl.org>
Sent: Thursday, October 3, 2024 9:56 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance - Update #3

The National Hurricane Center has reduced the chance of tropical cyclone development within seven days to 30%. While the system is likely to develop over the Gulf of Mexico late this weekend or early next week, subsequent tropical or subtropical development could be limited by the system's potential interaction with a frontal boundary. Regardless of development, locally heavy rains could occur over portions of the Florida Peninsula next week.

Subject: New Caribbean Disturbance - Update #2

AMERICAN OVERSIGHT

The forecast for the area of disorganized showers remains the same; it is still too early to tell if the system will develop further. Regardless of development, heavy rain is expected in our area into the weekend and next week. The Incident Management Team will continue to monitor.

From: IMT <IMT@sheriffleefl.org>
Sent: Tuesday, October 1, 2024 10:35 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance - Update #1

The area of disorganized showers remains at a 40% chance of development. The National Hurricane Center indicates that environmental conditions could support some gradual development of this system, and a tropical depression could form towards the end of this week or this weekend while it moves generally northwestward over the northwestern Caribbean Sea and into the Gulf of Mexico. As of this time, there are no changes, but some long range models show an increased chance of this disturbance affecting our area.

From: IMT <IMT@sheriffleefl.org>
Sent: Monday, September 30, 2024 8:11 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance

The Incident Management Team is monitoring a new area of disorganized showers and thunderstorms over the western Caribbean Sea. The National Weather Center states that the system has a medium chance (40%) of developing towards the middle to latter part of the week as it moves northwestward into the Gulf of Mexico. As this disturbance moves into the gulf, increasing moisture is expected over the Florida Peninsula and elevated rain chances are anticipated from Friday through the weekend, and possibly into early next week.

Unfortunately, long range models show the possibility of direct impacts for Southwest Florida; however, It is too early to determine what, if any, tropical specific impacts can be expected.

The Incident Management Team will continue to monitor the storm, and will continue to provide updates through this very active part of the hurricane season.

The City of Bonita Springs urges residents to finalize hurricane plans

AMERICAN OVERSIGHT

The City of Bonita Springs encourages residents to finalize hurricane plans. Residents can expect Hurricane/Tropical Storm/Storm Surge Watches early on October 7th.

Residents should be preparing for the possibility of hurricane force winds. Residents who live in coastal areas and in flood prone areas should be considering evacuation plans. No need to wait, if you have plans to evacuate, please do so.

The city encourages residents living near the Imperial River and canals, to continue to monitor water levels. Please continue to be vigilant as sheet flow may impact water levels of rivers and canals. The level of the Imperial River is currently at 10.11ft. To check water levels, click here.

For more information regarding flood protection, please visit the City of Bonita Springs webpage.

Residents can stay up to date with City information on the City's Facebook page and website City of Bonita Springs.

Hurricane Milton is forecast to bring wind, life-threatening storm surge and localized flooding to Lee County later this week. Residents need to:

- Revisit their family emergency plan.
- Check their emergency supply kits.
- Secure objects around homes.
- Monitor local meteorologist reports.
- Sign up for AlertLee.
- Monitor www.leegov.com/storm and Lee County social media channels.

Lee County anticipates announcing at noon Monday, Oct. 7,information about evacuation orders and shelter openings, as well as LeeTran service to those shelters.

AMERICAN OVERSIGHT

Residents who live in coastal areas or flood-prone inland areas do not need to wait for evacuation orders to mobilize. Go to friend or family members' homes or make arrangements to relocate inland.

Residents can view the announcements on local media as well as via Facebook Live, available at www.facebook.com/leecountyflbocc.It can also be viewed on LeeTV and on the Lee County Government YouTube channel.

Residents can also call the United Way's Emergency Information Hotline with questions. Dial 2-1-1 or 239-433-3900.

Residents are reminded to check www.leegov.com/storm to see which shelters open and when. The EOC is activated at a Level 2 and will move to a full activation at 7 a.m. Monday, Oct. 7.

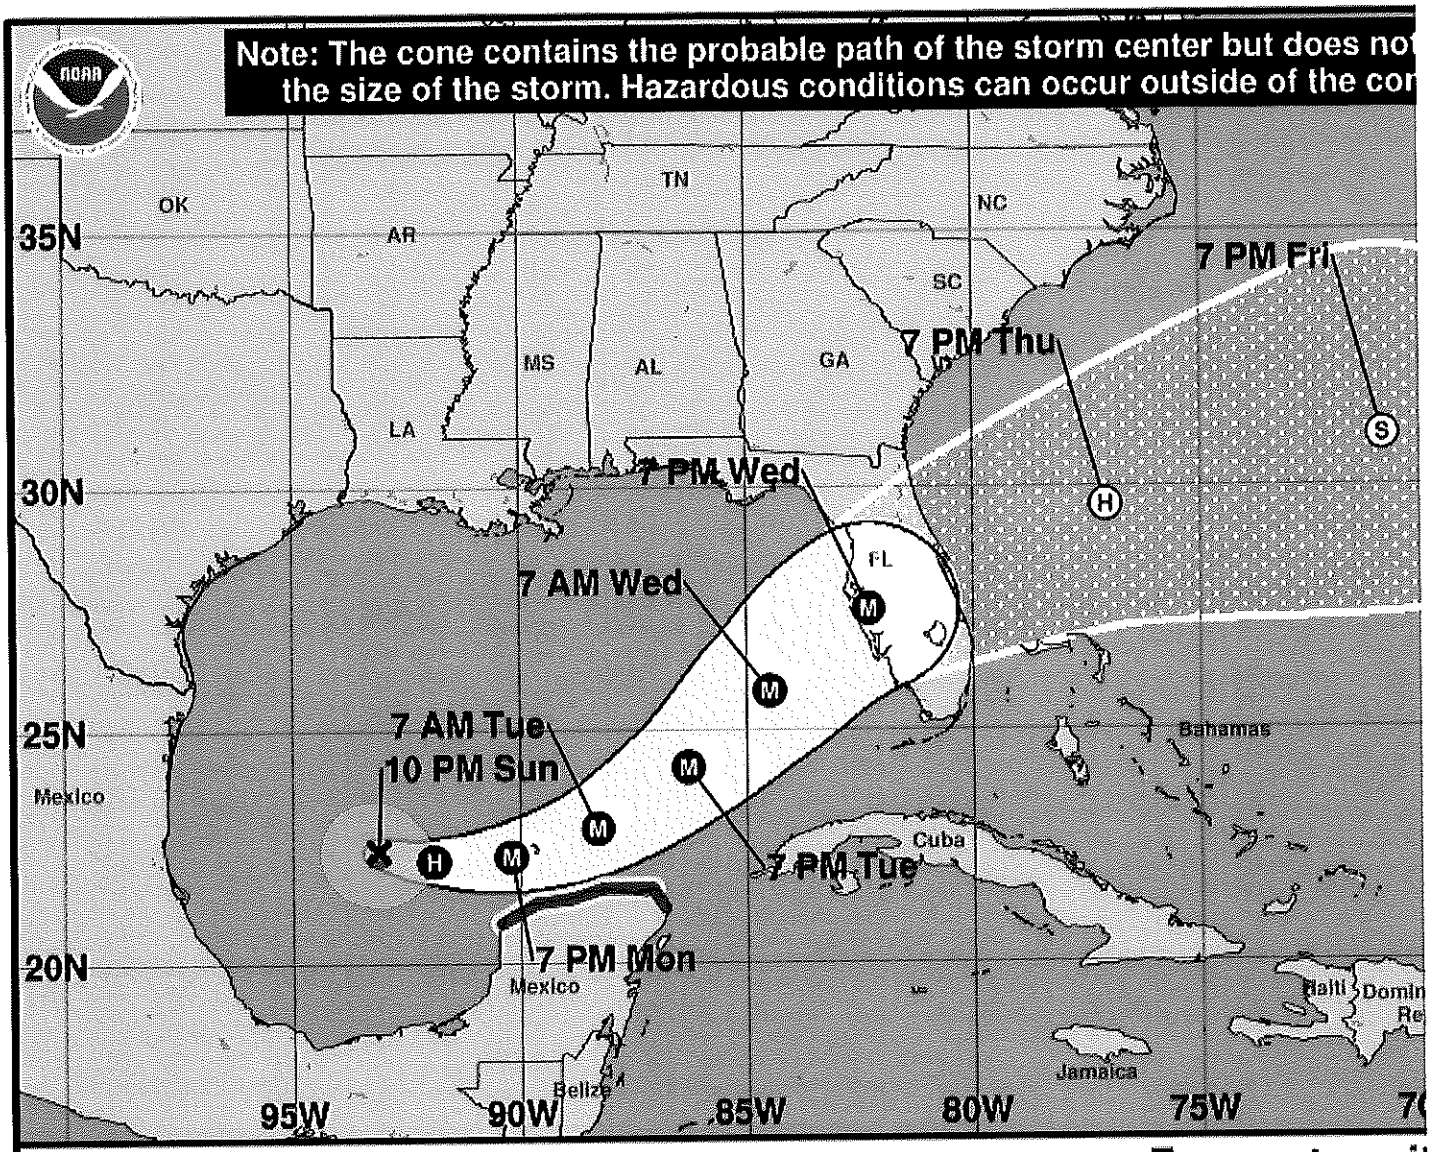
Subject:	Hurricane Milton - Update #16



The 11:00 PM update shows little movement in Hurricane Milton's track. Maximum sustained wind speeds are at 90 mph. Model tracks vary widely on the landfall location along Florida's West Coast. The Incident Management Team will continue to monitor and provide timely updates.

As of this update, new notifications are as follows:

Gas Availability:

- RaceTrac - 15820 Winkler Rd. - Pump 15 & 16 for First Responders - Contact is Tracy
- 7-11 - 12750 Cleveland Ave. - Pump 10 & 12 for First Responders - Contact is Vanilla
- RaceTrac - 5991 South Pointe Blvd. - Pump 19 & 20 for First Responders - Contact is Vince
- Mobil/7-11 - 20391 Summerlin Rd. - Pump 6 for First Responders - Contact is Susan
- Circle K - 20021 Summerlin Rd. - Pump 1 for First Responders - Contact is Kyle
- 7-11 - 15021 McGregor Blvd. - Pump 1 for First Responders - Contact is Jessica
- Mobil/7-11 - 17930 N. Tamiami Trl. - Pump 9 & 10 for First Responders - Contact is Joseph
- Circle K - 6381 Bayshore Rd. - Pump 10 for First Responders - Contact is Elizabeth
- Circle K - 19101 N. Tamiami Trl. - Pump 1 & 2 for First Responders - Contact is Christy
- 7-11 - 100 Delaware in Lehigh Acres - Pump 1 & 2 for First Responders.

Subject: Hurricane Milton - Update #15

As of the 8:00 PM National Hurricane Center update, Hurricane Milton is still forecast to rapidly intensify into a major hurricane. The center of the track has shifted further south, and is currently near the Bradenton/Sarasota area at landfall.

There is a Flood Watch for the entire area. Rainfall amounts of 5 to 10 inches, with localized totals of up to 15 inches are expected. The timing of the impacts is as early as late Tuesday and continuing into Thursday morning.

A good deal of uncertainty remains with where the storm will make landfall. It should be noted that the average NHC track error at day 3 is around 100 miles.

As of this update, new notifications are as follows:

- Youth Services and Training personnel have received their assignments and will report according to their schedule tomorrow.
- Court Operations and Civil personnel will receive their schedule tomorrow.

AMERICAN OVERSIGHT

- Employee Assistance personnel are done for the evening. They will resume in the morning.
- IMT will be fully activated beginning at 7:00 AM on Monday, with all personnel reporting or receiving their assignments by then.
- For personnel working overtime, please use *Hurricane Milton* as the reason for the overtime.
- The 7-11 Gas station at 103 Leeland Heights Blvd W in Lehigh Acres is open for LEO. If you need gas, use pumps 3,4,5, or 6 only. Jessica is the contact person there.
- The 7-11 at 100 Delaware Rd. in Lehigh Acres is reserving gas for First Responders. use Pump 3 and 4. Sharon is the contact person there.
    - The 7-11 at 18971 Babcock Ranch Rd is holding gas for first responders but deputies must go inside to request pump to be turned on.
    - The 7-11 at Del Prado and N Tamiami (17930 N Tamiami Trl.) is also holding gas for first responders but deputies must go inside to request the pump be turned on.

All personnel should be ready for a full activation at any time. This is a serious, dangerous storm and all personnel should complete preparations as soon as possible. Models vary in intensity, but most predict *at least* a Category 3, so even if we do not receive a direct hit, we can expect hurricane strength winds or wind gusts and a severe storm surge.

Subject: Hurricane Milton - Update #14

As of the 5:00 PM update, Milton is now a hurricane. Hurricane Milton has maximum sustained winds of 85 mph. The track has shifted slightly, and there is a more northeastern path across our area. Even if we do not receive a direct hit, we will receive tropical storm and hurricane strength winds, significant storm surge, and dangerous flooding from rainfall, likely much greater that what we received from Hurricane Helene. By tonight, all personnel should have their homes and families secured for the storm, and be prepared for a full activation.

Notifications for this update:

- All agency members deemed non essential during an emergency response will be dismissed tomorrow, October 7th, 2024 starting at **noon**. In order to stay home you will need to advise your immediate supervisor and use your accrued time. You may report for regular duty if you chose to do so. As always, use caution when driving in inclement weather and do not attempt to traverse standing water. IMT will continue to send out updates on our response to TS Milton.

- The Emergency Operations Center (EOC) will transition to a Level 1 at 7:00 AM tomorrow. This means that shelters and countywide operations will be run out of the EOC. The Incident Management Team is your contact for agency needs; do not contact the EOC directly.

Subject: Tropical Storm Milton - Update #13

The 2:00 PM Intermediate Update shows that there are no significant changes in the track. The earliest arrival of tropical storm force winds is projected to be 8:00 PM on Tuesday.

These are the stations that are reported to still have gasoline:

- Veronica Shoemaker/Winkler
- Shell station at Hancock and US 41
- BJ's Cape Coral
- 711 Burnt Store and Pine Island has DIESEL only
- Racetrac at South Pointe and College has 93 Only
- Walmart / Murphy's USA in Lehigh
- Santa Barbara and Veterans 7/11

These are the stations that are reported to be currently **out** of gasoline:

- Country Club and Veterans Circle K
- Del Prado Speedway
- Trafalgar and Skyline 7/11
- Rebel US 41 and Del Prado
- 76 at Chiquita and Pine Island
- Walmart/Murphy's Del Prado
- Walmart on Pine Island Road
- Pine Ridge and San Carlos 7/11
- Santa Barbara and Gleason 7/11
- Palm Tree and Cape Coral Pkwy 7/11
- Lee and Gunnery 7/11
- Del Prado Racetrac
- Terry St Circle K
- Lee and Alvin Racetrac
- Joel Citgo
- N Cleveland and Littleton 7/11

Below are the current updated tasks that IMT has been working on since that last updates:

- Logistics members have scheduled pre-storm deliveries for food and beverages - the arrival time is Tuesday morning.
- Logistics members have scheduled post-storm deliveries from vendors.
- Logistics members have scheduled water deliveries.
- Logistics members have created plans for replenishment of supplies for long-term activations.
- Logistics members have arranged for ice deliveries for the event power is lost.
- Purchasing members have made plans for the procurement of potable water.
- Purchasing and Logistics members have scheduled the delivery of portable bathrooms should they be needed.
- HQ will be the central location for cooking needs post-storm for employees at HQ/IMT, Forensics, MCU, Command Staff, Spec Ops, and Staging personnel.
- Precincts and Corrections facilities will be responsible for their meal preparations.

Subject: Tropical Storm Milton - Update #12

The 11:00 AM update shows a small track shift to the south. Although it is still predicted to directly hit the Tampa Bay Area, the move slightly south may bring higher wind speeds and higher storm surge. The storm is expected to quickly intensify and will likely be a major hurricane upon arrival.

All personnel are encouraged to complete preparations for their homes and their families today.

There is still a high degree of uncertainty in both the tracks and the wind speed upon arrival, so the possibility of a direct strike to our area remains. The cone of uncertainty currently covers most of the Florida peninsula. The Incident Management Team (IMT) will keep you informed, and is making preparations to include schedule planning.

Subject: Tropical Storm Milton - Update #8

The 8:00 AM update shows that Milton is forecast to become a Major Category 3 Hurricane before making landfall. Timing, tracks, and intensity are still unpredictable; however, the National Hurricane Center still shows the track toward the Tampa area.

The current forecast is as follows:

- There is a Flood Watch for the entire area through Thursday.
- Rainfall in the amount of 5" to 8", with localized totals up to 12".
- The timing of the impacts is from late Tuesday through early Thursday morning, but it is expected to make landfall on the West Coast on Wednesday.
- There is great uncertainty about where the storm will make landfall. The average Day 4 track error is around 150 miles, so we are still well within a possible landfall range.
- The current earliest wind time arrival is 4 PM on Tuesday, and the most likely arrival time is 2 AM on Wednesday.

Additional notifications for this update include:

- Personnel should maintain at least ½ tank at all times. Due to current fuel runs, please use any opportunity to make sure your agency vehicle stays full at all times.
- Personnel who must fuel and have no other options may use 89 or 93 Octane fuel.
- Select IMT members have been activated. Please send requests to IMT@sheriffleefl.org.
- The select CRU members who were notified individually will report at 10:00 AM to the Headquarters Training Room (1202).
- The asset movement members who were notified individually will report at 10:00 AM to the Headquarters Training Room (1202).
- All units, components, precincts, corrections facilities, and all affected agency departments should fill up all available gas cans and gas tanks.
- Pine Island Fire Department is out of sand. They still have sandbags. They expect to get more sand on Monday.

To: All Users <AllUsers@sheriffleefl.org>
Subject: Tropical Storm Milton - Update #7

With the 5:00 PM update, Tropical Storm Milton is now expected to arrive as a major hurricane. The track has shifted some to the north; however, some model tracks still show direct hits our our area, and we are still in the cone of uncertainty. Please recall from prior storms that although we are not in the direct path, the effects of the hurricane will still affect us heavily, especially in the areas prone to storm surge. Additionally, the peak storm surge from Helene arrived almost 10 hours after the peak winds, so all personnel should be aware of and consider the effects before, during, and after the storm.

AMERICAN OVERSIGHT

The below preparations remain in effect. The only change for this period is:

- Four (4) additional shallow water vessels have been obtained for water rescues.
- Additional High-Water Vehicles have been obtained and will be deployed to the islands for potential high-water rescues.
- The San Carlos Park Fire Department is out of sand and sandbags.

Subject: Tropical Storm Milton - Update #6

As of a 12:25 PM National Hurricane Center update, Tropical Storm Milton has formed. This storm is forecast to strengthen and bring the risk of life-threatening impacts to portions of the West Coast of Florida next week. The maximum winds are currently estimated at 40 mph with higher gusts. Models range in intensity from a Tropical Storm to a Major Hurricane, so there is tremendous unpredictability in the strength upon arrival.

At this time, the Incident Management Team is preparing for the possibility of a major hurricane affecting our area with impacts beginning on Tuesday and a full impact on Wednesday.

All agency personnel are encouraged to prepare as follows:

- All personnel should review their hurricane plans, and prepare their homes and families for the possibility of a hurricane impact in the middle of next week.
- All precincts should secure their mobile assets (decoy vehicles, arrow boards, trailers, ATVs, etc.) beginning on immediately to be completed by 2:00 PM on Monday.
- All trailers should be brought to storage beginning immediately to be completed by 2:00 PM on Monday.
- All personnel should use the remainder of this weekend to prepare for a possible activation. This plan should include three days worth of food, uniforms, and supplies.
- All personnel should use the remainder of this weekend to prepare their uniforms and equipment (including sufficient batteries for equipment) for a possible activation.
- All specialty units should begin bringing their assets back to their storage areas and secure locations. This should be completed by 2:00 PM on Monday.
- All precincts should secure any items that can be moved by the wind to a secure location starting immediately to be completed by 2:00 PM on Monday.
- All Corrections facilities (including Nan's Ranch) should prepare their facilities for a possible hurricane impact next week.

This is new information as of this update:

- The Waterborne Strike Team is on standby for deployment for water rescues.
- JetBlue Stadium, CenturyLink Stadium, the Lee County Gun Range, and the Andrea Lane and Sivan Road storage buildings are prepared to receive assets if needed.
- The Marine Unit is in contact with the IMT to secure the marine assets.
- Known sandbag locations are as follows:
    - Punta Gorda—Free sandbags will be available at 3130 Cooper St., the last entrance on the left by flag poles.
    - Fort Myers Beach—Sand is located off of Gulf Beach Road, and bags are available at Town Hall, 2731 Oak St. (The location will provide service until 4:30 p.m. on Friday and begin Monday at 8:30 a.m.)

AMERICAN OVERSIGHT

- Fort Myers— South Trail Fire & Rescue will have sand and sandbags available at station 63, 5531 Halifax Ave., Fort Myers—a maximum of 20 bags per household. UPDATE: South Trail Fire & Rescue is currently out of sand. Empty sandbags only are available.
- Naples— Sandbags will be available at three public park locations: Big Corkscrew Island Regional Park, 810 39th Ave., North Collier Regional Park, 15000 Livingston Road, in the Sun-N-Fun Lagoon parking lot, and at Donna Fiala Eagle Lakes Community Park, 11565 Tamiami Trail East, in the grassy area between the parking lots. The Naples sandbag locations will begin service at 8 a.m. through dusk on Saturday and Sunday.
- San Carlos Park—Sand and sandbags are available at San Carlos Park Fire District Station 54, located at 16900 Oriole Road. There is a limit of 10 bags per household. Bags can be picked up at the lobby. Bring your own shovel. Be prepared to fill and load your own sandbags. Make sure your vehicle can transport the weight of the sandbags.
- North Fort Myers—Sandbags will be located at North Fort Myers Parks and Recreation, 2000 N. Recreation Parkway. Sand will be located in the back of the park, next to the county mulch pile. Please bring your own shovel to fill the bags.
- Matlacha—Sandbags are available for pickup at Station 1, located at 5700 Pine Island Rd, Bokeelia, FL 33922

- IMT personnel are visiting the precincts, and the storage locations to inventory assets to prepare for both securement and post-storm deployment.
- No schedule changes are expected between now and Monday afternoon; however, all personnel should be prepared for schedule adjustments.
- The Agriculture assets are secured on the Olga site.

Subject: Important Update on a possible impending hurricane impacting our area (Update #5)

Team,

IMT has been working on preparation for a potential Hurricane impacting our area early next week. IMT will continue to send out updates regularly so please monitor your email closely. All agency units need to begin preparations of securing their assigned assets and communicate all movement to IMT. Also, update the major asset application on the intranet. We have secured Jet Blue Park as an asset staging area for Marine and other assets. Agency asset storage facilities to include the gun range are preparing to house assets as well. IMT is securing high water vehicles that will be pre-staged at strategic locations i.e., the barrier islands. IMT members will be in the RTIC today coordinating efforts. Agency extension 239-258-3150 is being setup to communicate to IMT staff. Additional updates to follow.

Be prepared and be safe!

Subject: New Caribbean Disturbance - Update #4

AMERICAN OVERSIGHT

The National Hurricane Center 2:00 PM update shows the possibility of development as the low pressure area in the Gulf of Mexico moves slowly eastward or northeastward. A tropical or subtropical depression or storm

could form during the early to middle part of next week if the low remains separate from a frontal boundary that is forecast to extend across the Gulf of Mexico. Regardless of development, locally heavy rains could occur over portions of the Florida Peninsula late this weekend into next week. As of this update, the formation chance in the next 48 hours is low at 10 %, and the formation chance through 7 days has increased to 50%.

Current model runs show an arrival time of any potential storm around Wednesday of next week. This represents a slower forward storm speed and later storm arrival than previous model runs, so the timing and impacts are still largely unknown. Regardless of any potential storm, significant rainfall is still expected, and the Incident Management Team will continue to monitor and update all personnel.

From: IMT <IMT@sheriffleefl.org>
Sent: Thursday, October 3, 2024 9:56 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance - Update #3

The National Hurricane Center has reduced the chance of tropical cyclone development within seven days to 30%. While the system is likely to develop over the Gulf of Mexico late this weekend or early next week, subsequent tropical or subtropical development could be limited by the system's potential interaction with a frontal boundary. Regardless of development, locally heavy rains could occur over portions of the Florida Peninsula next week.

Subject: New Caribbean Disturbance - Update #2

The forecast for the area of disorganized showers remains the same; it is still too early to tell if the system will develop further. Regardless of development, heavy rain is expected in our area into the weekend and next week. The Incident Management Team will continue to monitor.

From: IMT <IMT@sheriffleefl.org>
Sent: Tuesday, October 1, 2024 10:35 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance - Update #1

The area of disorganized showers remains at a 40% chance of development. The National Hurricane Center indicates that environmental conditions could support some gradual development of this system, and a tropical depression could form towards the end of this week or this weekend while it moves generally northwestward over the northwestern Caribbean Sea and into the Gulf of Mexico. As of this time, there are no changes, but some long range models show an increased chance of this disturbance affecting our area.

From: IMT <IMT@sheriffleefl.org>
Sent: Monday, September 30, 2024 8:11 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance

AMERICAN OVERSIGHT

The Incident Management Team is monitoring a new area of disorganized showers and thunderstorms over the western Caribbean Sea. The National Weather Center states that the system has a medium chance (40%) of developing towards the middle to latter part of the week as it moves northwestward into the Gulf of Mexico. As this disturbance moves into the gulf, increasing moisture is expected over the Florida Peninsula and elevated rain chances are anticipated from Friday through the weekend, and possibly into early next week.

Unfortunately, long range models show the possibility of direct impacts for Southwest Florida; however, It is too early to determine what, if any, tropical specific impacts can be expected.

The Incident Management Team will continue to monitor the storm, and will continue to provide updates through this very active part of the hurricane season.

Sheriff to participate in county presser at EOC with local leaders. PIO will run this live on Facebook. Capt Iriarte, Lt Fine, Robert, Julie, and Herb to attend with tech.

Updated: 10/7/24 @ 0820

Hurricane Milton

-The Lee County Sheriff's Office Incident Management Team is actively monitoring Hurricane Milton and is FULLY activated.

-Milton is expected to continue intensify and will make landfall on the west coast of the Florida's peninsula.

-At this time, exact landfall is uncertain but Lee County is expected to experience storm impacts to include SURGE.

-Just as you would all prepare for a storm at home, LCSO has done the same. We have secured all mobile assets to include our Marine Unit vessels due to the anticipated impacts from Milton.

-LCSO is READY! Our Waterbourne Strike Team and Marine Unit, Special Ops are standing by should the need arise to rescue people.

AMERICAN OVERSIGHT

-That being said, know your Evacuation Zone and be prepared to leave if your zone is called.

-Four (4) additional shallow water vessels have been obtained for water rescues.

-Additional High-Water Vehicles have been obtained and will be deployed to the islands for potential high-water rescues.

-We urge everyone to prepare for this storm! Prepare for the worst, but hope for the best!

-our academy cadets are utilizing an excavator to place sand at local fire stations for residents in need.

-We know what Mother Nature can do! She is unpredictable, which is why we urge everyone NOT to wait until the last minute to have everything that you need.

-Make sure you have necessary hurricane supplies: enough food, water, and medicine for several days.

-Have a hurricane plan with your family and be up to date with it. Topics should include an evacuation plan, sheltering in place, pets, miscellaneous family needs.

-Milton is now a MAJOR HURRICANE

-LCSO administrative services at precinct offices will be halted unit after the storm so we can focus on preparation and possible recovery efforts.

-Once we get sustained winds of 45 MPH, emergency response is stopped until it's safe to respond to calls.

-It could take several hours or more for the winds to subside before a deputy is able to respond, once the impacts begin. SHELTER IN PLACE.

AMERICAN OVERSIGHT

-Don't try to drive anywhere in inclement conditions as the roadways are not safe.

-Do NOT go outside during the storm as wind and standing water create hazard that can be fatal.

-Remember the three phases of the storm: BEFORE, DURING, and AFTER. Have you plan for all three.

-Continue to monitor your local media for weather updates, as well as the Lee County Sheriff's Office and Lee County Government on social media for the latest updates.

-WE ARE SWFL STRONG and are IN THIS TOGETHER

Sheriff Marceno will be there. Thank you .

-LCSO administrative services at precinct offices will be halted unit after the storm so we can focus on preparation and possible recovery efforts.

-Once we get sustained winds of 45 MPH, emergency response is stopped until it's safe to respond to calls.

-It could take several hours or more for the winds to subside before a deputy is able to respond, once the impacts begin. SHELTER IN PLACE.

AMERICAN OVERSIGHT

-Don't try to drive anywhere in inclement conditions as the roadways are not safe.

-Do NOT go outside during the storm as wind and standing water create hazard that can be fatal.

-Remember the three phases of the storm: BEFORE, DURING, and AFTER. Have you plan for all three.

-Continue to monitor your local media for weather updates, as well as the Lee County Sheriff's Office and Lee County Government on social media for the latest updates.

-WE ARE SWFL STRONG and are IN THIS TOGETHER

Good morning,

My name is Alyssa Adler and I am a Booking Producer at FOX Weather.

I am reaching out in anticipation of Milton, which is expected to reach major hurricane status before impacting parts of Florida this week.

We are looking to see if Lee County Sheriff Carmine Marceno would be available for a LIVE **video virtual** interview on **Monday, October 7th or Tuesday, October 8th** to discuss this. The interview would only take approximately 4-6 minutes. **Please let me know what day/time work best, as we are flexible.**

I can provide more details, if interested.

Subject:	Hurricane Milton - Update #17

The 5:00 AM update shows that the track is largely unchanged; however, models still vary from Naples to North of Tampa, and the intensity is forecast to be stronger, well into the Category 4 range.

As of this update, new notifications are as follows:

- The storm has current maximum winds of 100 mph.
- The current forecast for our coast is an 8' - 12' storm surge.
- The storm has slowed somewhat, so the earliest arrival of Tropical Storm force winds is now in the early Wednesday morning hours.

Subject: Hurricane Milton - Update #15

As of the 8:00 PM National Hurricane Center update, Hurricane Milton is still forecast to rapidly intensify into a major hurricane. The center of the track has shifted further south, and is currently near the Bradenton/Sarasota area at landfall.

There is a Flood Watch for the entire area. Rainfall amounts of 5 to 10 inches, with localized totals of up to 15 inches are expected. The timing of the impacts is as early as late Tuesday and continuing into Thursday morning.

A good deal of uncertainty remains with where the storm will make landfall. It should be noted that the average NHC track error at day 3 is around 100 miles.

As of this update, new notifications are as follows:

- Youth Services and Training personnel have received their assignments and will report according to their schedule tomorrow.
- Court Operations and Civil personnel will receive their schedule tomorrow.
- Employee Assistance personnel are done for the evening. They will resume in the morning.
- IMT will be fully activated beginning at 7:00 AM on Monday, with all personnel reporting or receiving their assignments by then.
- For personnel working overtime, please use *Hurricane Milton* as the reason for the overtime.
- The 7-11 Gas station at 103 Leeland Heights Blvd W in Lehigh Acres is open for LEO. If you need gas, use pumps 3,4,5, or 6 only. Jessica is the contact person there.
- The 7-11 at 100 Delaware Rd. in Lehigh Acres is reserving gas for First Responders. use Pump 3 and 4. Sharon is the contact person there.
    - The 7-11 at 18971 Babcock Ranch Rd is holding gas for first responders but deputies must go inside to request pump to be turned on.
    - The 7-11 at Del Prado and N Tamiami (17930 N Tamiami Trl.) is also holding gas for first responders but deputies must go inside to request the pump be turned on.

All personnel should be ready for a full activation at any time. This is a serious, dangerous storm and all personnel should complete preparations as soon as possible. Models vary in intensity, but most predict *at least* a Category 3, so even if we do not receive a direct hit, we can expect hurricane strength winds or wind gusts and a severe storm surge.

AMERICAN OVERSIGHT

To: All Users <AllUsers@sheriffleefl.org>
Subject: Hurricane Milton - Update #14

As of the 5:00 PM update, Milton is now a hurricane. Hurricane Milton has maximum sustained winds of 85 mph. The track has shifted slightly, and there is a more northeastern path across our area. Even if we do not receive a direct hit, we will receive tropical storm and hurricane strength winds, significant storm surge, and dangerous flooding from rainfall, likely much greater that what we received from Hurricane Helene. By tonight, all personnel should have their homes and families secured for the storm, and be prepared for a full activation.

Notifications for this update:

- All agency members deemed non essential during an emergency response will be dismissed tomorrow, October 7th, 2024 starting at **noon**. In order to stay home you will need to advise your immediate supervisor and use your accrued time. You may report for regular duty if you chose to do so. As always, use caution when driving in inclement weather and do not attempt to traverse standing water. IMT will continue to send out updates on our response to TS Milton.

- The Emergency Operations Center (EOC) will transition to a Level 1 at 7:00 AM tomorrow. This means that shelters and countywide operations will be run out of the EOC. The Incident Management Team is your contact for agency needs; do not contact the EOC directly.

Subject: Tropical Storm Milton - Update #12

The 11:00 AM update shows a small track shift to the south. Although it is still predicted to directly hit the Tampa Bay Area, the move slightly south may bring higher wind speeds and higher storm surge. The storm is expected to quickly intensify and will likely be a major hurricane upon arrival.

All personnel are encouraged to complete preparations for their homes and their families today.

There is still a high degree of uncertainty in both the tracks and the wind speed upon arrival, so the possibility of a direct strike to our area remains. The cone of uncertainty currently covers most of the Florida peninsula. The Incident Management Team (IMT) will keep you informed, and is making preparations to include schedule planning.

Subject: Tropical Storm Milton - Update #8

The 8:00 AM update shows that Milton is forecast to become a Major Category 3 Hurricane before making landfall. Timing, tracks, and intensity are still unpredictable; however, the National Hurricane Center still shows the track toward the Tampa area.

The current forecast is as follows:

- There is a Flood Watch for the entire area through Thursday.
- Rainfall in the amount of 5" to 8", with localized totals up to 12".
- The timing of the impacts is from late Tuesday through early Thursday morning, but it is expected to make landfall on the West Coast on Wednesday.
- There is great uncertainty about where the storm will make landfall. The average Day 4 track error is around 150 miles, so we are still well within a possible landfall range.

AMERICAN OVERSIGHT

- The current earliest wind time arrival is 4 PM on Tuesday, and the most likely arrival time is 2 AM on Wednesday.

Additional notifications for this update include:

- Personnel should maintain at least ½ tank at all times. Due to current fuel runs, please use any opportunity to make sure your agency vehicle stays full at all times.
- Personnel who must fuel and have no other options may use 89 or 93 Octane fuel.
- Select IMT members have been activated. Please send requests to IMT@sheriffleefl.org.
- The select CRU members who were notified individually will report at 10:00 AM to the Headquarters Training Room (1202).
- The asset movement members who were notified individually will report at 10:00 AM to the Headquarters Training Room (1202).
- All units, components, precincts, corrections facilities, and all affected agency departments should fill up all available gas cans and gas tanks.
- Pine Island Fire Department is out of sand. They still have sandbags. They expect to get more sand on Monday.

From: IMT <IMT@sheriffleefl.org>
Sent: Saturday, October 5, 2024 6:19 PM
To: All Users <AllUsers@sheriffleefl.org>
Subject: Tropical Storm Milton - Update #7

With the 5:00 PM update, Tropical Storm Milton is now expected to arrive as a major hurricane. The track has shifted some to the north; however, some model tracks still show direct hits our our area, and we are still in the cone of uncertainty. Please recall from prior storms that although we are not in the direct path, the effects of the hurricane will still affect us heavily, especially in the areas prone to storm surge. Additionally, the peak storm surge from Helene arrived almost 10 hours after the peak winds, so all personnel should be aware of and consider the effects before, during, and after the storm.

The below preparations remain in effect. The only change for this period is:

- Four (4) additional shallow water vessels have been obtained for water rescues.
- Additional High-Water Vehicles have been obtained and will be deployed to the islands for potential high-water rescues.
- The San Carlos Park Fire Department is out of sand and sandbags.

Subject: Tropical Storm Milton - Update #6

As of a 12:25 PM National Hurricane Center update, Tropical Storm Milton has formed. This storm is forecast to strengthen and bring the risk of life-threatening impacts to portions of the West Coast of Florida next week. The maximum winds are currently estimated at 40 mph with higher gusts. Models range in intensity from a Tropical Storm to a Major Hurricane, so there is tremendous unpredictability in the strength upon arrival.

AM OVERSIGHT

At this time, the Incident Management Team is preparing for the possibility of a major hurricane affecting our area with impacts beginning on Tuesday and a full impact on Wednesday.

All agency personnel are encouraged to prepare as follows:

- All personnel should review their hurricane plans, and prepare their homes and families for the possibility of a hurricane impact in the middle of next week.
- All precincts should secure their mobile assets (decoy vehicles, arrow boards, trailers, ATVs, etc.) beginning on immediately to be completed by 2:00 PM on Monday.
- All trailers should be brought to storage beginning immediately to be completed by 2:00 PM on Monday.
- All personnel should use the remainder of this weekend to prepare for a possible activation. This plan should include three days worth of food, uniforms, and supplies.
- All personnel should use the remainder of this weekend to prepare their uniforms and equipment (including sufficient batteries for equipment) for a possible activation.
- All specialty units should begin bringing their assets back to their storage areas and secure locations. This should be completed by 2:00 PM on Monday.
- All precincts should secure any items that can be moved by the wind to a secure location starting immediately to be completed by 2:00 PM on Monday.
- All Corrections facilities (including Nan's Ranch) should prepare their facilities for a possible hurricane impact next week.

This is new information as of this update:

- The Waterborne Strike Team is on standby for deployment for water rescues.
- JetBlue Stadium, CenturyLink Stadium, the Lee County Gun Range, and the Andrea Lane and Sivan Road storage buildings are prepared to receive assets if needed.
- The Marine Unit is in contact with the IMT to secure the marine assets.
- Known sandbag locations are as follows:
    - Punta Gorda—Free sandbags will be available at 3130 Cooper St., the last entrance on the left by flag poles.
    - Fort Myers Beach—Sand is located off of Gulf Beach Road, and bags are available at Town Hall, 2731 Oak St. (The location will provide service until 4:30 p.m. on Friday and begin Monday at 8:30 a.m.)
    - Fort Myers— South Trail Fire & Rescue will have sand and sandbags available at station 63, 5531 Halifax Ave., Fort Myers—a maximum of 20 bags per household. UPDATE: South Trail Fire & Rescue is currently out of sand. Empty sandbags only are available.
    - Naples— Sandbags will be available at three public park locations: Big Corkscrew Island Regional Park, 810 39th Ave., North Collier Regional Park, 15000 Livingston Road, in the Sun-N-Fun Lagoon parking lot, and at Donna Fiala Eagle Lakes Community Park, 11565 Tamiami Trail East, in the grassy area between the parking lots. The Naples sandbag locations will begin service at 8 a.m. through dusk on Saturday and Sunday.
    - San Carlos Park—Sand and sandbags are available at San Carlos Park Fire District Station 54, located at 16900 Oriole Road. There is a limit of 10 bags per household. Bags can be picked up at the lobby. Bring your own shovel. Be prepared to fill and load your own sandbags. Make sure your vehicle can transport the weight of the sandbags.
    - North Fort Myers—Sandbags will be located at North Fort Myers Parks and Recreation, 2000 N. Recreation Parkway. Sand will be located in the back of the park, next to the county mulch pile. Please bring your own shovel to fill the bags.
    - Matlacha—Sandbags are available for pickup at Station 1, located at 5700 Pine Island Rd, Bokeelia, FL 33922

AMERICAN OVERSIGHT

- IMT personnel are visiting the precincts, and the storage locations to inventory assets to prepare for both securement and post-storm deployment.
- No schedule changes are expected between now and Monday afternoon; however, all personnel should be prepared for schedule adjustments.
- The Agriculture assets are secured on the Olga site.

Subject: Important Update on a possible impending hurricane impacting our area (Update #5)

Team,

IMT has been working on preparation for a potential Hurricane impacting our area early next week. IMT will continue to send out updates regularly so please monitor your email closely. All agency units need to begin preparations of securing their assigned assets and communicate all movement to IMT. Also, update the major asset application on the intranet. We have secured Jet Blue Park as an asset staging area for Marine and other assets. Agency asset storage facilities to include the gun range are preparing to house assets as well. IMT is securing high water vehicles that will be pre-staged at strategic locations i.e., the barrier islands. IMT members will be in the RTIC today coordinating efforts. Agency extension 239-258-3150 is being setup to communicate to IMT staff. Additional updates to follow.

Be prepared and be safe!

Subject: New Caribbean Disturbance - Update #4

The National Hurricane Center 2:00 PM update shows the possibility of development as the low pressure area in the Gulf of Mexico moves slowly eastward or northeastward. A tropical or subtropical depression or storm could form during the early to middle part of next week if the low remains separate from a frontal boundary that is forecast to extend across the Gulf of Mexico. Regardless of development, locally heavy rains could occur over portions of the Florida Peninsula late this weekend into next week. As of this update, the formation chance in the next 48 hours is low at 10 %, and the formation chance through 7 days has increased to 50%.

Current model runs show an arrival time of any potential storm around Wednesday of next week. This represents a slower forward storm speed and later storm arrival than previous model runs, so the timing and impacts are still largely unknown. Regardless of any potential storm, significant rainfall is still expected, and the Incident Management Team will continue to monitor and update all personnel.

From: IMT <IMT@sheriffleefl.org>
Sent: Thursday, October 3, 2024 9:56 AM

Subject: New Caribbean Disturbance - Update #2

The forecast for the area of disorganized showers remains the same; it is still too early to tell if the system will develop further. Regardless of development, heavy rain is expected in our area into the weekend and next week. The Incident Management Team will continue to monitor.

From: IMT <IMT@sheriffleefl.org>
Sent: Tuesday, October 1, 2024 10:35 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance - Update #1

The area of disorganized showers remains at a 40% chance of development. The National Hurricane Center indicates that environmental conditions could support some gradual development of this system, and a tropical depression could form towards the end of this week or this weekend while it moves generally northwestward over the northwestern Caribbean Sea and into the Gulf of Mexico. As of this time, there are no changes, but some long range models show an increased chance of this disturbance affecting our area.

From: IMT <IMT@sheriffleefl.org>
Sent: Monday, September 30, 2024 8:11 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance

The Incident Management Team is monitoring a new area of disorganized showers and thunderstorms over the western Caribbean Sea. The National Weather Center states that the system has a medium chance (40%) of developing towards the middle to latter part of the week as it moves northwestward into the Gulf of Mexico. As this disturbance moves into the gulf, increasing moisture is expected over the Florida Peninsula and elevated rain chances are anticipated from Friday through the weekend, and possibly into early next week.

Unfortunately, long range models show the possibility of direct impacts for Southwest Florida; however, It is too early to determine what, if any, tropical specific impacts can be expected.

The Incident Management Team will continue to monitor the storm, and will continue to provide updates through this very active part of the hurricane season.

After several postponements, the federal Corporate Transparency Act (CTA) becomes effective in 2024 and applies to many SW Tax Clients. The CTA's extensive rules are intended to curtail money laundering, terrorism financing and other illegal activity. Over 30 million small business LLCs, partnerships, S corporations and other entities registered with a state Secretary of State or equivalent will be required to report specific identification information about the entities themselves and the individuals who directly and indirectly control them. The disclosure about individuals is called "Beneficial Owner Information" (BOI). The CTA is administered by the Treasury Department's Financial Crimes Enforcement Network (FinCEN), which has already issued over 100 pages of CTA compliance regulations, with more to come. The CTA imposes $500/day penalties and potential criminal prosecution for non-compliance.

Sent: Monday, October 7, 2024 5:29 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: Hurricane Milton - Update #17

The 5:00 AM update shows that the track is largely unchanged; however, models still vary from Naples to North of Tampa, and the intensity is forecast to be stronger, well into the Category 4 range.

As of this update, new notifications are as follows:

- The storm has current maximum winds of 100 mph.
- The current forecast for our coast is an 8' - 12' storm surge.
- The storm has slowed somewhat, so the earliest arrival of Tropical Storm force winds is now in the early Wednesday morning hours.

Sent: Sunday, October 6, 2024 8:57 PM
To: All Users <AllUsers@sheriffleefl.org>
Subject: Hurricane Milton - Update #15

As of the 8:00 PM National Hurricane Center update, Hurricane Milton is still forecast to rapidly intensify into a major hurricane. The center of the track has shifted further south, and is currently near the Bradenton/Sarasota area at landfall.

There is a Flood Watch for the entire area. Rainfall amounts of 5 to 10 inches, with localized totals of up to 15 inches are expected. The timing of the impacts is as early as late Tuesday and continuing into Thursday morning.

A good deal of uncertainty remains with where the storm will make landfall. It should be noted that the average NHC track error at day 3 is around 100 miles.

As of this update, new notifications are as follows:

- Youth Services and Training personnel have received their assignments and will report according to their schedule tomorrow.
- Court Operations and Civil personnel will receive their schedule tomorrow.
- Employee Assistance personnel are done for the evening. They will resume in the morning.
- IMT will be fully activated beginning at 7:00 AM on Monday, with all personnel reporting or receiving their assignments by then.
- For personnel working overtime, please use *Hurricane Milton* as the reason for the overtime.
- The 7-11 Gas station at 103 Leeland Heights Blvd W in Lehigh Acres is open for LEO. If you need gas, use pumps 3,4,5, or 6 only. Jessica is the contact person there.
- The 7-11 at 100 Delaware Rd. in Lehigh Acres is reserving gas for First Responders. use Pump 3 and 4. Sharon is the contact person there.
    - The 7-11 at 18971 Babcock Ranch Rd is holding gas for first responders but deputies must go inside to request pump to be turned on.
    - The 7-11 at Del Prado and N Tamiami (17930 N Tamiami Trl.) is also holding gas for first responders but deputies must go inside to request the pump be turned on.

All personnel should be ready for a full activation at any time. This is a serious, dangerous storm and all personnel should complete preparations as soon as possible. Models vary in intensity, but most predict *at least* a Category 3, so even if we do not receive a direct hit, we can expect hurricane strength winds or wind gusts and a severe storm surge.

AMERICAN OVERSIGHT

From: IMT <IMT@sheriffleefl.org>
Sent: Sunday, October 6, 2024 5:41 PM

To: All Users <AllUsers@sheriffleefl.org>
Subject: Hurricane Milton - Update #14

As of the 5:00 PM update, Milton is now a hurricane. Hurricane Milton has maximum sustained winds of 85 mph. The track has shifted slightly, and there is a more northeastern path across our area. Even if we do not receive a direct hit, we will receive tropical storm and hurricane strength winds, significant storm surge, and dangerous flooding from rainfall, likely much greater that what we received from Hurricane Helene. By tonight, all personnel should have their homes and families secured for the storm, and be prepared for a full activation.

Notifications for this update:

- All agency members deemed non essential during an emergency response will be dismissed tomorrow, October 7th, 2024 starting at **noon**. In order to stay home you will need to advise your immediate supervisor and use your accrued time. You may report for regular duty if you chose to do so. As always, use caution when driving in inclement weather and do not attempt to traverse standing water. IMT will continue to send out updates on our response to TS Milton.

- The Emergency Operations Center (EOC) will transition to a Level 1 at 7:00 AM tomorrow. This means that shelters and countywide operations will be run out of the EOC. The Incident Management Team is your contact for agency needs; do not contact the EOC directly.

Sent: Sunday, October 6, 2024 12:08 PM
To: All Users <AllUsers@sheriffleefl.org>
Subject: Tropical Storm Milton - Update #12

The 11:00 AM update shows a small track shift to the south. Although it is still predicted to directly hit the Tampa Bay Area, the move slightly south may bring higher wind speeds and higher storm surge. The storm is expected to quickly intensify and will likely be a major hurricane upon arrival.

All personnel are encouraged to complete preparations for their homes and their families today.

There is still a high degree of uncertainty in both the tracks and the wind speed upon arrival, so the possibility of a direct strike to our area remains. The cone of uncertainty currently covers most of the Florida peninsula. The Incident Management Team (IMT) will keep you informed, and is making preparations to include schedule planning.

Sent: Sunday, October 6, 2024 8:51 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: Tropical Storm Milton - Update #8

The 8:00 AM update shows that Milton is forecast to become a Major Category 3 Hurricane before making landfall. Timing, tracks, and intensity are still unpredictable; however, the National Hurricane Center still shows the track toward the Tampa area.

The current forecast is as follows:

- There is a Flood Watch for the entire area through Thursday.
- Rainfall in the amount of 5" to 8", with localized totals up to 12".
- The timing of the impacts is from late Tuesday through early Thursday morning, but it is expected to make landfall on the West Coast on Wednesday.
- There is great uncertainty about where the storm will make landfall. The average Day 4 track error is around 150 miles, so we are still well within a possible landfall range.

AMERICAN OVERSIGHT

- The current earliest wind time arrival is 4 PM on Tuesday, and the most likely arrival time is 2 AM on Wednesday.

Additional notifications for this update include:

- Personnel should maintain at least ½ tank at all times. Due to current fuel runs, please use any opportunity to make sure your agency vehicle stays full at all times.
- Personnel who must fuel and have no other options may use 89 or 93 Octane fuel.
- Select IMT members have been activated. Please send requests to IMT@sheriffleefl.org.
- The select CRU members who were notified individually will report at 10:00 AM to the Headquarters Training Room (1202).
- The asset movement members who were notified individually will report at 10:00 AM to the Headquarters Training Room (1202).
- All units, components, precincts, corrections facilities, and all affected agency departments should fill up all available gas cans and gas tanks.
- Pine Island Fire Department is out of sand. They still have sandbags. They expect to get more sand on Monday.

From: IMT <IMT@sheriffleefl.org>
Sent: Saturday, October 5, 2024 6:19 PM
To: All Users <AllUsers@sheriffleefl.org>
Subject: Tropical Storm Milton - Update #7

With the 5:00 PM update, Tropical Storm Milton is now expected to arrive as a major hurricane. The track has shifted some to the north; however, some model tracks still show direct hits our our area, and we are still in the cone of uncertainty. Please recall from prior storms that although we are not in the direct path, the effects of the hurricane will still affect us heavily, especially in the areas prone to storm surge. Additionally, the peak storm surge from Helene arrived almost 10 hours after the peak winds, so all personnel should be aware of and consider the effects before, during, and after the storm.

The below preparations remain in effect. The only change for this period is:

- Four (4) additional shallow water vessels have been obtained for water rescues.
- Additional High-Water Vehicles have been obtained and will be deployed to the islands for potential high-water rescues.
- The San Carlos Park Fire Department is out of sand and sandbags.

From: IMT <IMT@sheriffleefl.org>
Sent: Saturday, October 5, 2024 3:50 PM
To: All Users <AllUsers@sheriffleefl.org>
Subject: Tropical Storm Milton - Update #6

As of a 12:25 PM National Hurricane Center update, Tropical Storm Milton has formed. This storm is forecast to strengthen and bring the risk of life-threatening impacts to portions of the West Coast of Florida next week. The maximum winds are currently estimated at 40 mph with higher gusts. Models range in intensity from a Tropical Storm to a Major Hurricane, so there is tremendous unpredictability in the strength upon arrival.

AMERICAN OVERSIGHT

At this time, the Incident Management Team is preparing for the possibility of a major hurricane affecting our area with impacts beginning on Tuesday and a full impact on Wednesday.

All agency personnel are encouraged to prepare as follows:

- All personnel should review their hurricane plans, and prepare their homes and families for the possibility of a hurricane impact in the middle of next week.
- All precincts should secure their mobile assets (decoy vehicles, arrow boards, trailers, ATVs, etc.) beginning on immediately to be completed by 2:00 PM on Monday.
- All trailers should be brought to storage beginning immediately to be completed by 2:00 PM on Monday.
- All personnel should use the remainder of this weekend to prepare for a possible activation. This plan should include three days worth of food, uniforms, and supplies.
- All personnel should use the remainder of this weekend to prepare their uniforms and equipment (including sufficient batteries for equipment) for a possible activation.
- All specialty units should begin bringing their assets back to their storage areas and secure locations. This should be completed by 2:00 PM on Monday.
- All precincts should secure any items that can be moved by the wind to a secure location starting immediately to be completed by 2:00 PM on Monday.
- All Corrections facilities (including Nan's Ranch) should prepare their facilities for a possible hurricane impact next week.

This is new information as of this update:

- The Waterborne Strike Team is on standby for deployment for water rescues.
- JetBlue Stadium, CenturyLink Stadium, the Lee County Gun Range, and the Andrea Lane and Sivan Road storage buildings are prepared to receive assets if needed.
- The Marine Unit is in contact with the IMT to secure the marine assets.
- Known sandbag locations are as follows:
    - Punta Gorda—Free sandbags will be available at 3130 Cooper St., the last entrance on the left by flag poles.
    - Fort Myers Beach—Sand is located off of Gulf Beach Road, and bags are available at Town Hall, 2731 Oak St. (The location will provide service until 4:30 p.m. on Friday and begin Monday at 8:30 a.m.)
    - Fort Myers— South Trail Fire & Rescue will have sand and sandbags available at station 63, 5531 Halifax Ave., Fort Myers—a maximum of 20 bags per household. UPDATE: South Trail Fire & Rescue is currently out of sand. Empty sandbags only are available.
    - Naples— Sandbags will be available at three public park locations: Big Corkscrew Island Regional Park, 810 39th Ave., North Collier Regional Park, 15000 Livingston Road, in the Sun-N-Fun Lagoon parking lot, and at Donna Fiala Eagle Lakes Community Park, 11565 Tamiami Trail East, in the grassy area between the parking lots. The Naples sandbag locations will begin service at 8 a.m. through dusk on Saturday and Sunday.
    - San Carlos Park—Sand and sandbags are available at San Carlos Park Fire District Station 54, located at 16900 Oriole Road. There is a limit of 10 bags per household. Bags can be picked up at the lobby. Bring your own shovel. Be prepared to fill and load your own sandbags. Make sure your vehicle can transport the weight of the sandbags.
    - North Fort Myers—Sandbags will be located at North Fort Myers Parks and Recreation, 2000 N. Recreation Parkway. Sand will be located in the back of the park, next to the county mulch pile. Please bring your own shovel to fill the bags.
    - Matlacha—Sandbags are available for pickup at Station 1, located at 5700 Pine Island Rd, Bokeelia, FL 33922

AMERICAN OVERSIGHT

- IMT personnel are visiting the precincts, and the storage locations to inventory assets to prepare for both securement and post-storm deployment.
- No schedule changes are expected between now and Monday afternoon; however, all personnel should be prepared for schedule adjustments.
- The Agriculture assets are secured on the Olga site.

Subject: Important Update on a possible impending hurricane impacting our area (Update #5)

Team,

IMT has been working on preparation for a potential Hurricane impacting our area early next week. IMT will continue to send out updates regularly so please monitor your email closely. All agency units need to begin preparations of securing their assigned assets and communicate all movement to IMT. Also, update the major asset application on the intranet. We have secured Jet Blue Park as an asset staging area for Marine and other assets. Agency asset storage facilities to include the gun range are preparing to house assets as well. IMT is securing high water vehicles that will be pre-staged at strategic locations i.e., the barrier islands. IMT members will be in the RTIC today coordinating efforts. Agency extension 239-258-3150 is being setup to communicate to IMT staff. Additional updates to follow.

Be prepared and be safe!

Subject: New Caribbean Disturbance - Update #4

The National Hurricane Center 2:00 PM update shows the possibility of development as the low pressure area in the Gulf of Mexico moves slowly eastward or northeastward. A tropical or subtropical depression or storm could form during the early to middle part of next week if the low remains separate from a frontal boundary that is forecast to extend across the Gulf of Mexico. Regardless of development, locally heavy rains could occur over portions of the Florida Peninsula late this weekend into next week. As of this update, the formation chance in the next 48 hours is low at 10 %, and the formation chance through 7 days has increased to 50%.

Current model runs show an arrival time of any potential storm around Wednesday of next week. This represents a slower forward storm speed and later storm arrival than previous model runs, so the timing and impacts are still largely unknown. Regardless of any potential storm, significant rainfall is still expected, and the Incident Management Team will continue to monitor and update all personnel.

Subject: New Caribbean Disturbance - Update #3

AMERICAN OVERSIGHT

The National Hurricane Center has reduced the chance of tropical cyclone development within seven days to 30%. While the system is likely to develop over the Gulf of Mexico late this weekend or early next week, subsequent tropical or subtropical development could be limited by the system's potential interaction with a frontal boundary. Regardless of development, locally heavy rains could occur over portions of the Florida Peninsula next week.

Sent: Tuesday, October 1, 2024 10:35 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance - Update #1

The area of disorganized showers remains at a 40% chance of development. The National Hurricane Center indicates that environmental conditions could support some gradual development of this system, and a tropical depression could form towards the end of this week or this weekend while it moves generally northwestward over the northwestern Caribbean Sea and into the Gulf of Mexico. As of this time, there are no changes, but some long range models show an increased chance of this disturbance affecting our area.

From: IMT <IMT@sheriffleefl.org>
Sent: Monday, September 30, 2024 8:11 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance

The Incident Management Team is monitoring a new area of disorganized showers and thunderstorms over the western Caribbean Sea. The National Weather Center states that the system has a medium chance (40%) of developing towards the middle to latter part of the week as it moves northwestward into the Gulf of Mexico. As this disturbance moves into the gulf, increasing moisture is expected over the Florida Peninsula and elevated rain chances are anticipated from Friday through the weekend, and possibly into early next week.

Unfortunately, long range models show the possibility of direct impacts for Southwest Florida; however, It is too early to determine what, if any, tropical specific impacts can be expected.

The Incident Management Team will continue to monitor the storm, and will continue to provide updates through this very active part of the hurricane season.

After several postponements, the federal Corporate Transparency Act (CTA) becomes effective in 2024 and applies to many SW Tax Clients. The CTA's extensive rules are intended to curtail money laundering, terrorism financing and other illegal activity. Over 30 million small business LLCs, partnerships, S corporations and other entities registered with a state Secretary of State or equivalent will be required to report specific identification information about the entities themselves and the individuals who directly and indirectly control them. The disclosure about individuals is called "Beneficial Owner Information" (BOI). The CTA is administered by the Treasury Department's Financial Crimes Enforcement Network (FinCEN), which has already issued over 100 pages of CTA compliance regulations, with more to come. The CTA imposes $500/day penalties and potential criminal prosecution for non-compliance.

The 5:00 AM update shows that the track is largely unchanged; however, models still vary from Naples to North of Tampa, and the intensity is forecast to be stronger, well into the Category 4 range.

As of this update, new notifications are as follows:

- The storm has current maximum winds of 100 mph.
- The current forecast for our coast is an 8' - 12' storm surge.
- The storm has slowed somewhat, so the earliest arrival of Tropical Storm force winds is now in the early Wednesday morning hours.

To: All Users <AllUsers@sheriffleefl.org>
Subject: Hurricane Milton - Update #15

As of the 8:00 PM National Hurricane Center update, Hurricane Milton is still forecast to rapidly intensify into a major hurricane. The center of the track has shifted further south, and is currently near the Bradenton/Sarasota area at landfall.

There is a Flood Watch for the entire area. Rainfall amounts of 5 to 10 inches, with localized totals of up to 15 inches are expected. The timing of the impacts is as early as late Tuesday and continuing into Thursday morning.

A good deal of uncertainty remains with where the storm will make landfall. It should be noted that the average NHC track error at day 3 is around 100 miles.

As of this update, new notifications are as follows:

- Youth Services and Training personnel have received their assignments and will report according to their schedule tomorrow.
- Court Operations and Civil personnel will receive their schedule tomorrow.
- Employee Assistance personnel are done for the evening. They will resume in the morning.
- IMT will be fully activated beginning at 7:00 AM on Monday, with all personnel reporting or receiving their assignments by then.
- For personnel working overtime, please use *Hurricane Milton* as the reason for the overtime.
- The 7-11 Gas station at 103 Leeland Heights Blvd W in Lehigh Acres is open for LEO. If you need gas, use pumps 3,4,5, or 6 only. Jessica is the contact person there.
- The 7-11 at 100 Delaware Rd. in Lehigh Acres is reserving gas for First Responders. use Pump 3 and 4. Sharon is the contact person there.
    - The 7-11 at 18971 Babcock Ranch Rd is holding gas for first responders but deputies must go inside to request pump to be turned on.
    - The 7-11 at Del Prado and N Tamiami (17930 N Tamiami Trl.) is also holding gas for first responders but deputies must go inside to request the pump be turned on.

All personnel should be ready for a full activation at any time. This is a serious, dangerous storm and all personnel should complete preparations as soon as possible. Models vary in intensity, but most predict *at least* a Category 3, so even if we do not receive a direct hit, we can expect hurricane strength winds or wind gusts and a severe storm surge.

From: IMT <IMT@sheriffleefl.org>
Sent: Sunday, October 6, 2024 5:41 PM

AMERICAN OVERSIGHT

To: All Users <AllUsers@sheriffleefl.org>
Subject: Hurricane Milton - Update #14

As of the 5:00 PM update, Milton is now a hurricane. Hurricane Milton has maximum sustained winds of 85 mph. The track has shifted slightly, and there is a more northeastern path across our area. Even if we do not receive a direct hit, we will receive tropical storm and hurricane strength winds, significant storm surge, and dangerous flooding from rainfall, likely much greater that what we received from Hurricane Helene. By tonight, all personnel should have their homes and families secured for the storm, and be prepared for a full activation.

Notifications for this update:

- All agency members deemed non essential during an emergency response will be dismissed tomorrow, October 7th, 2024 starting at **noon**. In order to stay home you will need to advise your immediate supervisor and use your accrued time. You may report for regular duty if you chose to do so. As always, use caution when driving in inclement weather and do not attempt to traverse standing water. IMT will continue to send out updates on our response to TS Milton.

- The Emergency Operations Center (EOC) will transition to a Level 1 at 7:00 AM tomorrow. This means that shelters and countywide operations will be run out of the EOC. The Incident Management Team is your contact for agency needs; do not contact the EOC directly.

Sent: Sunday, October 6, 2024 12:08 PM
To: All Users <AllUsers@sheriffleefl.org>
Subject: Tropical Storm Milton - Update #12

The 11:00 AM update shows a small track shift to the south. Although it is still predicted to directly hit the Tampa Bay Area, the move slightly south may bring higher wind speeds and higher storm surge. The storm is expected to quickly intensify and will likely be a major hurricane upon arrival.

All personnel are encouraged to complete preparations for their homes and their families today.

There is still a high degree of uncertainty in both the tracks and the wind speed upon arrival, so the possibility of a direct strike to our area remains. The cone of uncertainty currently covers most of the Florida peninsula. The Incident Management Team (IMT) will keep you informed, and is making preparations to include schedule planning.

Sent: Sunday, October 6, 2024 9:15 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: Tropical Storm Milton - Update #9

Employee assistance team members are on standby for employees who may need assistance with boarding windows, minor (quick) repairs for securing homes, and other needs in order to prepare for activation. If you need assistance, please e-mail the Incident Management Team at IMT@sheriffleefl.org with your address, specific need, and any exigent circumstances that would require a priority response (elderly family members, light duty employees who need help, etc.). If you do not have access to e-mail, you may call 239-258-3150. They will relay the message to the Incident Management Team.

Please note that employee assistance members **do not** have plywood/shutters, etc. They can only assist you with the items that you already have.

Supervisors, please relay this information to your employees who may not have access to e-mail.

Subject: Tropical Storm Milton - Update #8

The 8:00 AM update shows that Milton is forecast to become a Major Category 3 Hurricane before making landfall. Timing, tracks, and intensity are still unpredictable; however, the National Hurricane Center still shows the track toward the Tampa area.

The current forecast is as follows:

- There is a Flood Watch for the entire area through Thursday.
- Rainfall in the amount of 5" to 8", with localized totals up to 12".
- The timing of the impacts is from late Tuesday through early Thursday morning, but it is expected to make landfall on the West Coast on Wednesday.
- There is great uncertainty about where the storm will make landfall. The average Day 4 track error is around 150 miles, so we are still well within a possible landfall range.

AMERICAN OVERSIGHT

- The current earliest wind time arrival is 4 PM on Tuesday, and the most likely arrival time is 2 AM on Wednesday.

Additional notifications for this update include:

- Personnel should maintain at least ½ tank at all times. Due to current fuel runs, please use any opportunity to make sure your agency vehicle stays full at all times.
- Personnel who must fuel and have no other options may use 89 or 93 Octane fuel.
- Select IMT members have been activated. Please send requests to IMT@sheriffleefl.org.
- The select CRU members who were notified individually will report at 10:00 AM to the Headquarters Training Room (1202).
- The asset movement members who were notified individually will report at 10:00 AM to the Headquarters Training Room (1202).
- All units, components, precincts, corrections facilities, and all affected agency departments should fill up all available gas cans and gas tanks.
- Pine Island Fire Department is out of sand. They still have sandbags. They expect to get more sand on Monday.

Sent: Saturday, October 5, 2024 6:19 PM
To: All Users <AllUsers@sheriffleefl.org>
Subject: Tropical Storm Milton - Update #7

With the 5:00 PM update, Tropical Storm Milton is now expected to arrive as a major hurricane. The track has shifted some to the north; however, some model tracks still show direct hits our our area, and we are still in the cone of uncertainty. Please recall from prior storms that although we are not in the direct path, the effects of the hurricane will still affect us heavily, especially in the areas prone to storm surge. Additionally, the peak storm surge from Helene arrived almost 10 hours after the peak winds, so all personnel should be aware of and consider the effects before, during, and after the storm.

The below preparations remain in effect. The only change for this period is:

- Four (4) additional shallow water vessels have been obtained for water rescues.
- Additional High-Water Vehicles have been obtained and will be deployed to the islands for potential high-water rescues.
- The San Carlos Park Fire Department is out of sand and sandbags.

Subject: Tropical Storm Milton - Update #6

As of a 12:25 PM National Hurricane Center update, Tropical Storm Milton has formed. This storm is forecast to strengthen and bring the risk of life-threatening impacts to portions of the West Coast of Florida next week. The maximum winds are currently estimated at 40 mph with higher gusts. Models range in intensity from a Tropical Storm to a Major Hurricane, so there is tremendous unpredictability in the strength upon arrival.

AMERICAN OVERSIGHT

At this time, the Incident Management Team is preparing for the possibility of a major hurricane affecting our area with impacts beginning on Tuesday and a full impact on Wednesday.

All agency personnel are encouraged to prepare as follows:

- All personnel should review their hurricane plans, and prepare their homes and families for the possibility of a hurricane impact in the middle of next week.
- All precincts should secure their mobile assets (decoy vehicles, arrow boards, trailers, ATVs, etc.) beginning on immediately to be completed by 2:00 PM on Monday.
- All trailers should be brought to storage beginning immediately to be completed by 2:00 PM on Monday.
- All personnel should use the remainder of this weekend to prepare for a possible activation. This plan should include three days worth of food, uniforms, and supplies.
- All personnel should use the remainder of this weekend to prepare their uniforms and equipment (including sufficient batteries for equipment) for a possible activation.
- All specialty units should begin bringing their assets back to their storage areas and secure locations. This should be completed by 2:00 PM on Monday.
- All precincts should secure any items that can be moved by the wind to a secure location starting immediately to be completed by 2:00 PM on Monday.
- All Corrections facilities (including Nan's Ranch) should prepare their facilities for a possible hurricane impact next week.

This is new information as of this update:

- The Waterborne Strike Team is on standby for deployment for water rescues.
- JetBlue Stadium, CenturyLink Stadium, the Lee County Gun Range, and the Andrea Lane and Sivan Road storage buildings are prepared to receive assets if needed.
- The Marine Unit is in contact with the IMT to secure the marine assets.
- Known sandbag locations are as follows:
    - Punta Gorda—Free sandbags will be available at 3130 Cooper St., the last entrance on the left by flag poles.
    - Fort Myers Beach—Sand is located off of Gulf Beach Road, and bags are available at Town Hall, 2731 Oak St. (The location will provide service until 4:30 p.m. on Friday and begin Monday at 8:30 a.m.)
    - Fort Myers— South Trail Fire & Rescue will have sand and sandbags available at station 63, 5531 Halifax Ave., Fort Myers—a maximum of 20 bags per household. UPDATE: South Trail Fire & Rescue is currently out of sand. Empty sandbags only are available.
    - Naples— Sandbags will be available at three public park locations: Big Corkscrew Island Regional Park, 810 39th Ave., North Collier Regional Park, 15000 Livingston Road, in the Sun-N-Fun Lagoon parking lot, and at Donna Fiala Eagle Lakes Community Park, 11565 Tamiami Trail East, in the grassy area between the parking lots. The Naples sandbag locations will begin service at 8 a.m. through dusk on Saturday and Sunday.
    - San Carlos Park—Sand and sandbags are available at San Carlos Park Fire District Station 54, located at 16900 Oriole Road. There is a limit of 10 bags per household. Bags can be picked up at the lobby. Bring your own shovel. Be prepared to fill and load your own sandbags. Make sure your vehicle can transport the weight of the sandbags.
    - North Fort Myers—Sandbags will be located at North Fort Myers Parks and Recreation, 2000 N. Recreation Parkway. Sand will be located in the back of the park, next to the county mulch pile. Please bring your own shovel to fill the bags.
    - Matlacha—Sandbags are available for pickup at Station 1, located at 5700 Pine Island Rd, Bokeelia, FL 33922

AMERICAN OVERSIGHT

- IMT personnel are visiting the precincts, and the storage locations to inventory assets to prepare for both securement and post-storm deployment.
- No schedule changes are expected between now and Monday afternoon; however, all personnel should be prepared for schedule adjustments.
- The Agriculture assets are secured on the Olga site.

Subject: Important Update on a possible impending hurricane impacting our area (Update #5)

Team,

IMT has been working on preparation for a potential Hurricane impacting our area early next week. IMT will continue to send out updates regularly so please monitor your email closely. All agency units need to begin preparations of securing their assigned assets and communicate all movement to IMT. Also, update the major asset application on the intranet. We have secured Jet Blue Park as an asset staging area for Marine and other assets. Agency asset storage facilities to include the gun range are preparing to house assets as well. IMT is securing high water vehicles that will be pre-staged at strategic locations i.e., the barrier islands. IMT members will be in the RTIC today coordinating efforts. Agency extension 239-258-3150 is being setup to communicate to IMT staff. Additional updates to follow.

Be prepared and be safe!

Subject: New Caribbean Disturbance - Update #4

The National Hurricane Center 2:00 PM update shows the possibility of development as the low pressure area in the Gulf of Mexico moves slowly eastward or northeastward. A tropical or subtropical depression or storm could form during the early to middle part of next week if the low remains separate from a frontal boundary that is forecast to extend across the Gulf of Mexico. Regardless of development, locally heavy rains could occur over portions of the Florida Peninsula late this weekend into next week. As of this update, the formation chance in the next 48 hours is low at 10 %, and the formation chance through 7 days has increased to 50%.

Current model runs show an arrival time of any potential storm around Wednesday of next week. This represents a slower forward storm speed and later storm arrival than previous model runs, so the timing and impacts are still largely unknown. Regardless of any potential storm, significant rainfall is still expected, and the Incident Management Team will continue to monitor and update all personnel.

Subject: New Caribbean Disturbance - Update #3

AMERICAN OVERSIGHT

The National Hurricane Center has reduced the chance of tropical cyclone development within seven days to 30%. While the system is likely to develop over the Gulf of Mexico late this weekend or early next week, subsequent tropical or subtropical development could be limited by the system's potential interaction with a frontal boundary. Regardless of development, locally heavy rains could occur over portions of the Florida Peninsula next week.

Subject: New Caribbean Disturbance - Update #2

The forecast for the area of disorganized showers remains the same; it is still too early to tell if the system will develop further. Regardless of development, heavy rain is expected in our area into the weekend and next week. The Incident Management Team will continue to monitor.

From: IMT <IMT@sheriffleefl.org>
Sent: Tuesday, October 1, 2024 10:35 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance - Update #1

The area of disorganized showers remains at a 40% chance of development. The National Hurricane Center indicates that environmental conditions could support some gradual development of this system, and a tropical depression could form towards the end of this week or this weekend while it moves generally northwestward over the northwestern Caribbean Sea and into the Gulf of Mexico. As of this time, there are no changes, but some long range models show an increased chance of this disturbance affecting our area.

From: IMT <IMT@sheriffleefl.org>
Sent: Monday, September 30, 2024 8:11 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance

The Incident Management Team is monitoring a new area of disorganized showers and thunderstorms over the western Caribbean Sea. The National Weather Center states that the system has a medium chance (40%) of developing towards the middle to latter part of the week as it moves northwestward into the Gulf of Mexico. As this disturbance moves into the gulf, increasing moisture is expected over the Florida Peninsula and elevated rain chances are anticipated from Friday through the weekend, and possibly into early next week.

Unfortunately, long range models show the possibility of direct impacts for Southwest Florida; however, It is too early to determine what, if any, tropical specific impacts can be expected.

The Incident Management Team will continue to monitor the storm, and will continue to provide updates through this very active part of the hurricane season.

From Lee County Government

Some general population shelters will open Monday afternoon, especially for those who are still recovering from Hurricane Helene and Hurricane Ian. Additional shelters will open Tuesday. LeeTran will provide transportation to the shelters for those who need it. Remember to check www.leegov.com/storm to see which shelters open and when. The county is coordinating with the Florida Department of Health for its special needs sheltering operation.

Emergency Operations Center is activated at a Level 2. That's a partial activation. The EOC will go to a Level 1 full activation at 7 a.m. Monday, Oct. 7.

County offices will open as scheduled at 8 a.m. Monday, but will close at noon. The county will be closed from Monday afternoon through Thursday. The county will announce information about Friday operations on Thursday, depending on the storm's impact.

Helene debris collection continues to happen today. Debris will be collected Monday and will continue Tuesday as weather allows.

Regular trash, recycling, yard waste that is scheduled for Monday will happen Monday. Do not place out trash, recycling or yard waste on Tuesday or Wednesday. All normal waste collection services are suspended for those days. Announcements will be forthcoming on when regular collections will resume.

FORT MYERS BEACH CHAMBER OF COMMERCE

Island Life: It's our Business!

HURRICANE MILTON UPDATE 10-7-24

From The Town Of Fort Myers Beach

The Town of Fort Myers Beach has issued a Mandatory Evacuation for the entire Island. We encourage residents and business owners to make a plan and be evacuated by 3:00pm, on Monday, October 7, 2024.

The Town of Fort Myers Beach Town Hall will be closing at noon, on Monday, October 7, 2024, and will be closed Tuesday, Wednesday, and Thursday, plan to reopen on Friday, October 11, 2024. Sandbags and sand will be available tomorrow, Monday, October 7, 2024, from 7:00am – 3:00pm.

From The Florida Department Of Health - Lee County

All Florida Department of Health in Lee County (DOH-Lee) offices will be closed on Monday, October 7, 2024, in response to severe weather impacts. Offices will remain closed until Friday, October 11, 2024.

FL-LEE-24-2340-A-000538

From Lee County Government

Some general population shelters will open Monday afternoon, especially for those who are still recovering from Hurricane Helene and Hurricane Ian. Additional shelters will open Tuesday. LeeTran will provide transportation to the shelters for those who need it. Remember to check www.leegov.com/storm to see which shelters open and when. The county is coordinating with the Florida Department of Health for its special needs sheltering operation.

Emergency Operations Center is activated at a Level 2. That's a partial activation. The EOC will go to a Level 1 full activation at 7 a.m. Monday, Oct. 7.

County offices will open as scheduled at 8 a.m. Monday, but will close at noon. The county will be closed from Monday afternoon through Thursday. The county will announce information about Friday operations on Thursday, depending on the storm's impact.

Helene debris collection continues to happen today. Debris will be collected Monday and will continue Tuesday as weather allows.

Regular trash, recycling, yard waste that is scheduled for Monday will happen Monday. Do not place out trash, recycling or yard waste on Tuesday or Wednesday. All normal waste collection services are suspended for those days. Announcements will be forthcoming on when regular collections will resume.

Optional Attendees:	Joshua Quaintance; Kevin Ellis

Fox Weather interview with Stephen Morgan https://www.foxweather.com/person/m/stephen-morgan

Rtic clear by 10am Monday. Sheriff Marceno in place by 1015. Tech aware. Zoom equipment will remain in Rtic for the duration of the storm.

Updated: 10/7/24 @ 0820

Hurricane Milton

-The Lee County Sheriff's Office Incident Management Team is actively monitoring Hurricane Milton and is FULLY activated.

-Milton is expected to continue intensify and will make landfall on the west coast of the Florida's peninsula.

-At this time, exact landfall is uncertain but Lee County is expected to experience storm impacts to include SURGE.

-Just as you would all prepare for a storm at home, LCSO has done the same. We have secured all mobile assets to include our Marine Unit vessels due to the anticipated impacts from Milton.

AMERICAN OVERSIGHT

-LCSO is READY! Our Waterbourne Strike Team and Marine Unit, Special Ops are standing by should the need arise to rescue people.

-That being said, know your Evacuation Zone and be prepared to leave if your zone is called.

-Four (4) additional shallow water vessels have been obtained for water rescues.

-our academy cadets are utilizing an excavator to place sand at local fire stations for residents in need.

-Additional High-Water Vehicles have been obtained and will be deployed to the islands for potential high-water rescues.

-We urge everyone to prepare for this storm! Prepare for the worst, but hope for the best!

-We know what Mother Nature can do! She is unpredictable, which is why we urge everyone NOT to wait until the last minute to have everything that you need.

-Make sure you have necessary hurricane supplies: enough food, water, and medicine for several days.

-Have a hurricane plan with your family and be up to date with it. Topics should include an evacuation plan, sheltering in place, pets, miscellaneous family needs.

-Milton is now a MAJOR HURRICANE

-LCSO administrative services at precinct offices will be halted unit after the storm so we can focus on preparation and possible recovery efforts.

-Once we get sustained winds of 45 MPH, emergency response is stopped until it's safe to respond to calls.

-It could take several hours or more for the winds to subside before a deputy is able to respond, once the impacts begin. SHELTER IN PLACE.

AMERICAN OVERSIGHT

-Don't try to drive anywhere in inclement conditions as the roadways are not safe.

-Do NOT go outside during the storm as wind and standing water create hazard that can be fatal.

-Remember the three phases of the storm: BEFORE, DURING, and AFTER. Have you plan for all three.

-Continue to monitor your local media for weather updates, as well as the Lee County Sheriff's Office and Lee County Government on social media for the latest updates.

-WE ARE SWFL STRONG and are IN THIS TOGETHER

Good morning,

My name is Alyssa Adler and I am a Booking Producer at FOX Weather.

I am reaching out in anticipation of Milton, which is expected to reach major hurricane status before impacting parts of Florida this week.

We are looking to see if Lee County Sheriff Carmine Marceno would be available for a LIVE **video virtual** interview on **Monday, October 7th or Tuesday, October 8th** to discuss this. The interview would only take approximately 4-6 minutes. **Please let me know what day/time work best, as we are flexible.**

I can provide more details, if interested.

Hello LCSO and School District PIOs,

We are going to announce tomorrow morning that we are having a noon presser here at EOC. Please ensure that the sheriff and superintendent are invited to participate here with us if they want to. We'd like to have them both here and have them both say some words. Please let me know by 10 a.m. tomorrow if they will be attending.

Thanks.

AMERICA OVERSIGHT

BACKGROUND FROM SUNDAY NIGHT

Lee County Government evening update on Hurricane Milton

Fort Myers, FL, Oct. 6, 2024 – Lee County Emergency Management urges residents to finalize their hurricane plans.

Hurricane Milton is forecast to bring wind, life-threatening storm surge and localized flooding to Lee County later this week. Residents need to:

- Revisit their family emergency plan.
- Check their emergency supply kits.
- Secure objects around homes.
- Monitor local meteorologists' reports.
- Sign up for AlertLee.
- Monitor www.leegov.com/storm and Lee County social media channels.

Lee County anticipates announcing at noon Monday, Oct. 7, information about evacuation orders and shelter openings, as well as LeeTran service to those shelters.

Residents who live in coastal areas or flood-prone inland areas do not need to wait for evacuation orders to mobilize. Go to friend or family members' homes or make arrangements to relocate inland.

Residents can view the announcements on local media as well as via Facebook Live, available at www.facebook.com/leecountyflbocc. It can also be viewed on LeeTV and on the Lee County Government YouTube channel.

Residents can also call the United Way's Emergency Information Hotline with questions. Dial 2-1-1 or 239-433-3900.

Residents are reminded to check www.leegov.com/storm to see which shelters open and when. The EOC is activated at a Level 2 and will move to a full activation at 7 a.m. Monday, Oct. 7.

Lee County Government Hurricane Milton update for Fort Myers Beach

Fort Myers, FL, Oct. 7, 2024 – Lee County Government has two important announcements for Fort Myers Beach residents:

Public transit: LeeTran at noon today, Monday, Oct. 7, will stop running routes onto Fort Myers Beach. All LeeTran services will convert to off-island transit only. This is to assist with the Town of Fort Myers Beach's request for residents to leave the island.

Water: Lee County Utilities will shut off water to Fort Myers Beach at noon Wednesday, Oct. 8. This is a precautionary measure to protect infrastructure. It was also implemented during 2022's Hurricane Ian.

The county encourages Fort Myers Beach residents to continue to monitor the Town of Fort Myers Beach's storm updates. Visit www.fortmyersbeachfl.gov and follow the Town's social media channels.

Residents also should monitor www.leegov.com/storm and follow Lee County social media. Residents can watch today's Hurricane Milton briefing from the Emergency Operations Center. It will be at noon on Facebook Live at www.facebook.com/leecountyflbocc. It can also be viewed on LeeTV and on the Lee County Government YouTube channel.

To receive updates from Lee County Government, sign up for the newsletter here: www.leegov.com/resources/newsletters. Follow Lee County Government on Facebook, www.facebook.com/leecountyflbocc.

Subject: Hurricane Milton - Update #18

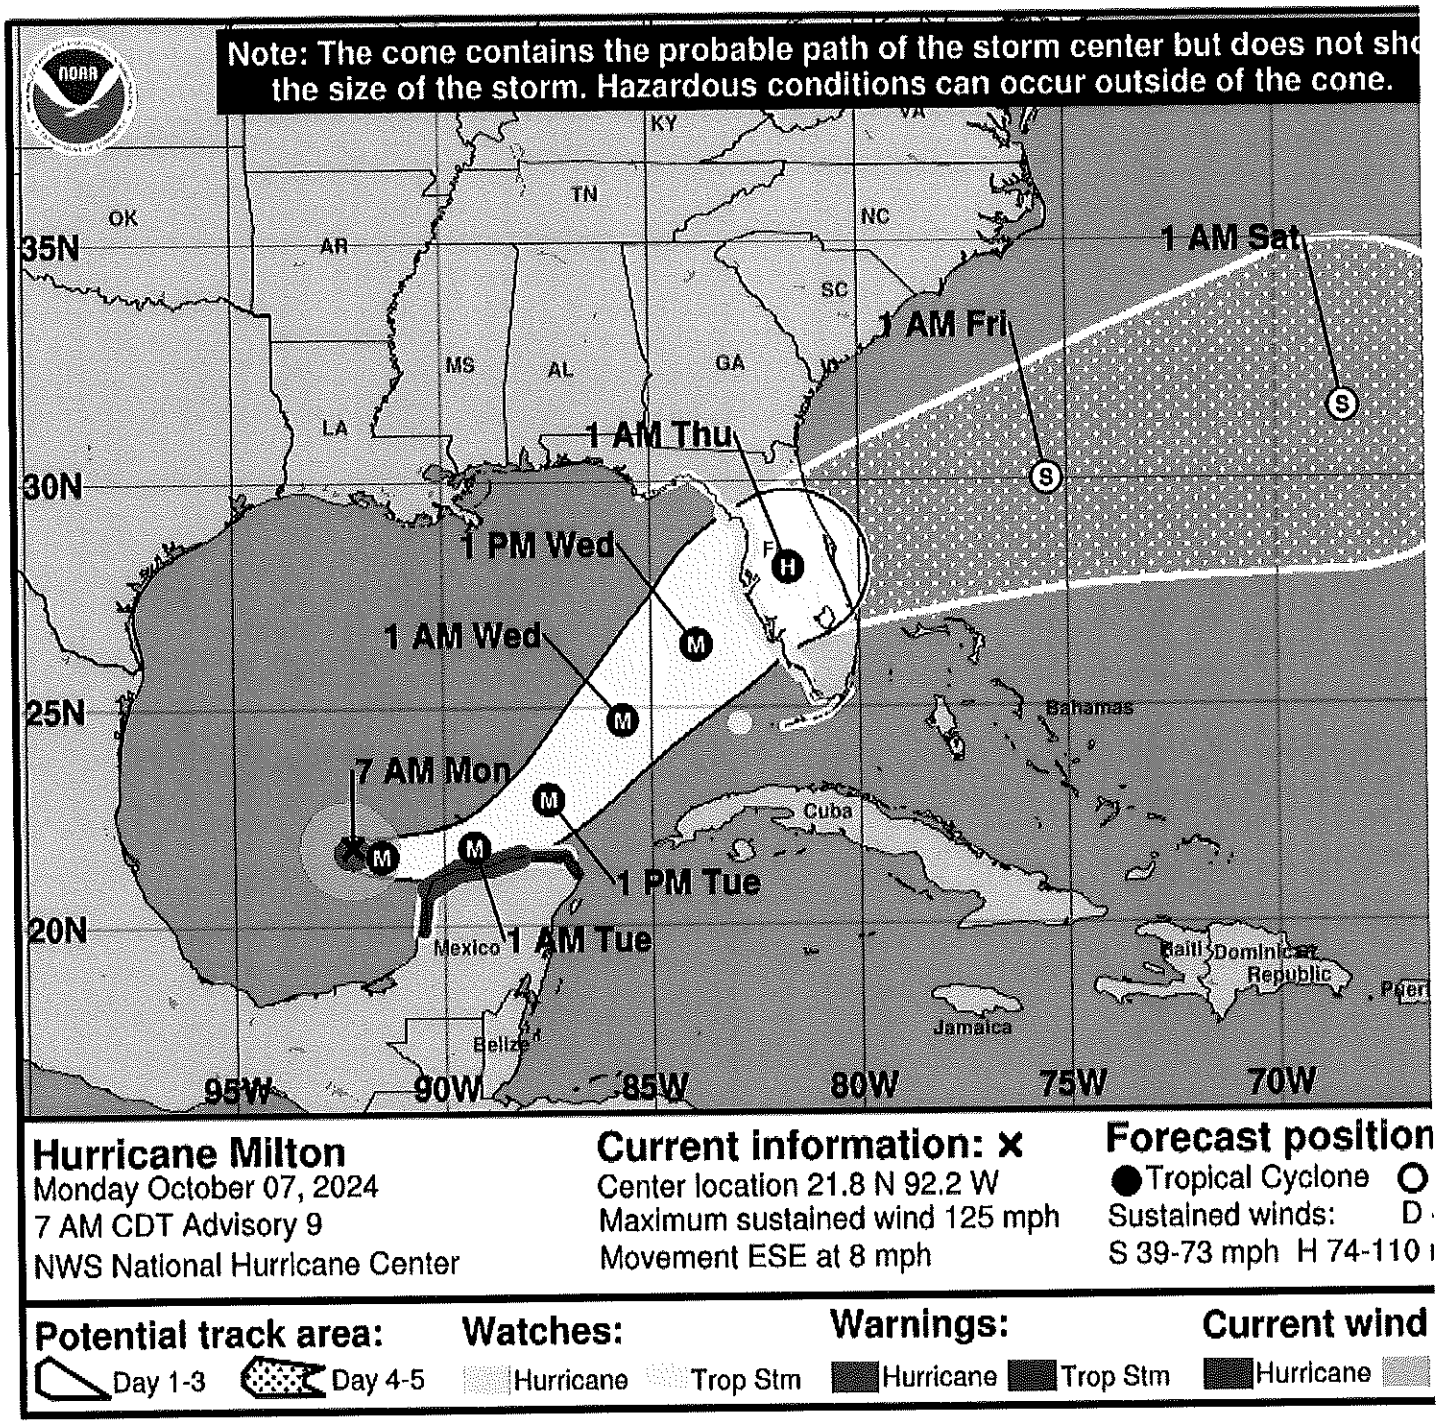
As of the 8:00 AM update, a Hurricane Watch remains in effect for our area.

The IMT Main Number is 239-258-3150 or e-mail at IMT@sheriffleefl.org.

As of this update, the latest storm information is as follows:

- Hurricane Milton is now a major hurricane, with sustained wind speeds of 125 mph.
- Hurricane Milton is expected to have winds of 145 mph at landfall, with some expansion of hurricane-strength winds.
- The model spread in the forecast track remains high, with the entire area within the cone.
- Movement is ESE at 8 mph.
- The current earliest arrival of tropical-storm-strength winds is 1:00 AM on Wednesday, with a likely arrival time at 8:00 AM. This is the arrival of tropical-storm-force winds, not the arrival of the actual storm.
- The storm surge estimate is 5' to 10' for Lee County. It is expected to increase throughout the day on Wednesday and peak early Thursday.
- We are still in a Hurricane Watch, a Storm Surge Watch, and a Flood Watch.
- Many rivers are already in or forecast to go into flood stage.
- The main threat for tornadoes is late Tuesday into Wednesday night.
- Confidence is low on the exact track of the system, with the entire area within the cone. It should be noted that that 72 hour average track error is 100 miles.

As of this updates, new notifications are as follows:



- All personnel must notify IMT of all asset movements and personnel changes.
- Estero Fire Station #54 at Oriole and Alico just got sand delivered.
- Pine Island Fire has sand, but no sandbags.
- North Fort Myers Recreations Center has sand but no sandbags.
- Corrections Transport vehicles have received their staging location and should be in place by 12:00 PM.
- Academy recruits and Youth Services deputies have been deployed to the field.

National Hurricane Center Definitions:

- **Hurricane Watch**: Hurricane conditions (sustained winds of 74 mph or greater) are possible within your area. Because it may not be safe to prepare for a hurricane once winds reach tropical storm force, The NHC issues hurricane watches 48 hours before it anticipates tropical storm-force winds.
- **Hurricane Warning**: Hurricane conditions (sustained winds of 74 mph or greater) are expected somewhere within the specified area. NHC issues a hurricane warning 36 hours in advance of tropical storm-force winds to give you time to complete your preparations. All preparations should be complete. Evacuate immediately if so ordered.

AMERICAN OVERSIGHT

- **Storm Surge Watch**: There is a possibility of life-threatening inundation from rising water moving inland from the shoreline somewhere within the specified area, generally within 48 hours.
- **Extreme Wind Warning**: Extreme sustained winds of a major hurricane (115 mph or greater), usually associated with the eyewall, are expected to begin within an hour. Take immediate shelter in the interior portion of a well-built structure.

Subject: Hurricane Milton - Update #17

The 5:00 AM update shows that the track is largely unchanged; however, models still vary from Naples to North of Tampa, and the intensity is forecast to be stronger, well into the Category 4 range.

As of this update, new notifications are as follows:

- The storm has current maximum winds of 100 mph.
- The current forecast for our coast is an 8' - 12' storm surge.
- The storm has slowed somewhat, so the earliest arrival of Tropical Storm force winds is now in the early Wednesday morning hours.

Subject: Hurricane Milton - Update #15

As of the 8:00 PM National Hurricane Center update, Hurricane Milton is still forecast to rapidly intensify into a major hurricane. The center of the track has shifted further south, and is currently near the Bradenton/Sarasota area at landfall.

There is a Flood Watch for the entire area. Rainfall amounts of 5 to 10 inches, with localized totals of up to 15 inches are expected. The timing of the impacts is as early as late Tuesday and continuing into Thursday morning.

A good deal of uncertainty remains with where the storm will make landfall. It should be noted that the average NHC track error at day 3 is around 100 miles.

As of this update, new notifications are as follows:

- Youth Services and Training personnel have received their assignments and will report according to their schedule tomorrow.
- Court Operations and Civil personnel will receive their schedule tomorrow.
- Employee Assistance personnel are done for the evening. They will resume in the morning.
- IMT will be fully activated beginning at 7:00 AM on Monday, with all personnel reporting or receiving their assignments by then.
- For personnel working overtime, please use *Hurricane Milton* as the reason for the overtime.
- The 7-11 Gas station at 103 Leeland Heights Blvd W in Lehigh Acres is open for LEO. If you need gas, use pumps 3,4,5, or 6 only. Jessica is the contact person there.
- The 7-11 at 100 Delaware Rd. in Lehigh Acres is reserving gas for First Responders. use Pump 3 and 4. Sharon is the contact person there.
    - The 7-11 at 18971 Babcock Ranch Rd is holding gas for first responders but deputies must go inside to request pump to be turned on.
    - The 7-11 at Del Prado and N Tamiami (17930 N Tamiami Trl.) is also holding gas for first responders but deputies must go inside to request the pump be turned on.

All personnel should be ready for a full activation at any time. This is a serious, dangerous storm and all personnel should complete preparations as soon as possible. Models vary in intensity, but most predict *at least* a Category 3, so even if we do not receive a direct hit, we can expect hurricane strength winds or wind gusts and a severe storm surge.

Subject: Hurricane Milton - Update #14

As of the 5:00 PM update, Milton is now a hurricane. Hurricane Milton has maximum sustained winds of 85 mph. The track has shifted slightly, and there is a more northeastern path across our area. Even if we do not receive a direct hit, we will receive tropical storm and hurricane strength winds, significant storm surge, and dangerous flooding from rainfall, likely much greater that what we received from Hurricane Helene. By tonight, all personnel should have their homes and families secured for the storm, and be prepared for a full activation.

AMERICAN OVERSIGHT

Notifications for this update:

- All agency members deemed non essential during an emergency response will be dismissed tomorrow, October 7th, 2024 starting at **noon**. In order to stay home you will need to advise your immediate supervisor and use your accrued time. You may report for regular duty if you chose to do so. As always, use caution when driving in inclement weather and do not attempt to traverse standing water. IMT will continue to send out updates on our response to TS Milton.

- The Emergency Operations Center (EOC) will transition to a Level 1 at 7:00 AM tomorrow. This means that shelters and countywide operations will be run out of the EOC. The Incident Management Team is your contact for agency needs; do not contact the EOC directly.

AMERICAN OVERSIGHT

Below are the current updated tasks that IMT has been working on since that last updates:

- Logistics members have scheduled pre-storm deliveries for food and beverages - the arrival time is Tuesday morning.
- Logistics members have scheduled post-storm deliveries from vendors.
- Logistics members have scheduled water deliveries.
- Logistics members have created plans for replenishment of supplies for long-term activations.
- Logistics members have arranged for ice deliveries for the event power is lost.
- Purchasing members have made plans for the procurement of potable water.
- Purchasing and Logistics members have scheduled the delivery of portable bathrooms should they be needed.
- HQ will be the central location for cooking needs post-storm for employees at HQ/IMT, Forensics, MCU, Command Staff, Spec Ops, and Staging personnel.
- Precincts and Corrections facilities will be responsible for their meal preparations.

Subject: Tropical Storm Milton - Update #12

The 11:00 AM update shows a small track shift to the south. Although it is still predicted to directly hit the Tampa Bay Area, the move slightly south may bring higher wind speeds and higher storm surge. The storm is expected to quickly intensify and will likely be a major hurricane upon arrival.

All personnel are encouraged to complete preparations for their homes and their families today.

There is still a high degree of uncertainty in both the tracks and the wind speed upon arrival, so the possibility of a direct strike to our area remains. The cone of uncertainty currently covers most of the Florida peninsula. The Incident Management Team (IMT) will keep you informed, and is making preparations to include schedule planning.

Subject: Tropical Storm Milton - Update #8

The 8:00 AM update shows that Milton is forecast to become a Major Category 3 Hurricane before making landfall. Timing, tracks, and intensity are still unpredictable; however, the National Hurricane Center still shows the track toward the Tampa area.

The current forecast is as follows:

- There is a Flood Watch for the entire area through Thursday.
- Rainfall in the amount of 5" to 8", with localized totals up to 12".
- The timing of the impacts is from late Tuesday through early Thursday morning, but it is expected to make landfall on the West Coast on Wednesday.
- There is great uncertainty about where the storm will make landfall. The average Day 4 track error is around 150 miles, so we are still well within a possible landfall range.
- The current earliest wind time arrival is 4 PM on Tuesday, and the most likely arrival time is 2 AM on Wednesday.

Additional notifications for this update include:

- Personnel should maintain at least ½ tank at all times. Due to current fuel runs, please use any opportunity to make sure your agency vehicle stays full at all times.
- Personnel who must fuel and have no other options may use 89 or 93 Octane fuel.
- Select IMT members have been activated. Please send requests to IMT@sheriffleefl.org.
- The select CRU members who were notified individually will report at 10:00 AM to the Headquarters Training Room (1202).
- The asset movement members who were notified individually will report at 10:00 AM to the Headquarters Training Room (1202).

AMERICAN OVERSIGHT

- All units, components, precincts, corrections facilities, and all affected agency departments should fill up all available gas cans and gas tanks.
- Pine Island Fire Department is out of sand. They still have sandbags. They expect to get more sand on Monday.

From: IMT <IMT@sheriffleefl.org>

To: All Users <AllUsers@sheriffleefl.org>
Subject: Tropical Storm Milton - Update #7

With the 5:00 PM update, Tropical Storm Milton is now expected to arrive as a major hurricane. The track has shifted some to the north; however, some model tracks still show direct hits our our area, and we are still in the cone of uncertainty. Please recall from prior storms that although we are not in the direct path, the effects of the hurricane will still affect us heavily, especially in the areas prone to storm surge. Additionally, the peak storm surge from Helene arrived almost 10 hours after the peak winds, so all personnel should be aware of and consider the effects before, during, and after the storm.

The below preparations remain in effect. The only change for this period is:

- Four (4) additional shallow water vessels have been obtained for water rescues.
- Additional High-Water Vehicles have been obtained and will be deployed to the islands for potential high-water rescues.
- The San Carlos Park Fire Department is out of sand and sandbags.

Sent: Saturday, October 5, 2024 3:50 PM
To: All Users <AllUsers@sheriffleefl.org>
Subject: Tropical Storm Milton - Update #6

As of a 12:25 PM National Hurricane Center update, Tropical Storm Milton has formed. This storm is forecast to strengthen and bring the risk of life-threatening impacts to portions of the West Coast of Florida next week. The maximum winds are currently estimated at 40 mph with higher gusts. Models range in intensity from a Tropical Storm to a Major Hurricane, so there is tremendous unpredictability in the strength upon arrival.

At this time, the Incident Management Team is preparing for the possibility of a major hurricane affecting our area with impacts beginning on Tuesday and a full impact on Wednesday.

All agency personnel are encouraged to prepare as follows:

- All personnel should review their hurricane plans, and prepare their homes and families for the possibility of a hurricane impact in the middle of next week.
- All precincts should secure their mobile assets (decoy vehicles, arrow boards, trailers, ATVs, etc.) beginning on immediately to be completed by 2:00 PM on Monday.
- All trailers should be brought to storage beginning immediately to be completed by 2:00 PM on Monday.
- All personnel should use the remainder of this weekend to prepare for a possible activation. This plan should include three days worth of food, uniforms, and supplies.

AMERICAN OVERSIGHT

- All personnel should use the remainder of this weekend to prepare their uniforms and equipment (including sufficient batteries for equipment) for a possible activation.
- All specialty units should begin bringing their assets back to their storage areas and secure locations. This should be completed by 2:00 PM on Monday.
- All precincts should secure any items that can be moved by the wind to a secure location starting immediately to be completed by 2:00 PM on Monday.
- All Corrections facilities (including Nan's Ranch) should prepare their facilities for a possible hurricane impact next week.

This is new information as of this update:

- The Waterborne Strike Team is on standby for deployment for water rescues.
- JetBlue Stadium, CenturyLink Stadium, the Lee County Gun Range, and the Andrea Lane and Sivan Road storage buildings are prepared to receive assets if needed.
- The Marine Unit is in contact with the IMT to secure the marine assets.
- Known sandbag locations are as follows:
    - Punta Gorda—Free sandbags will be available at 3130 Cooper St., the last entrance on the left by flag poles.
    - Fort Myers Beach—Sand is located off of Gulf Beach Road, and bags are available at Town Hall, 2731 Oak St. (The location will provide service until 4:30 p.m. on Friday and begin Monday at 8:30 a.m.)
    - Fort Myers— South Trail Fire & Rescue will have sand and sandbags available at station 63, 5531 Halifax Ave., Fort Myers—a maximum of 20 bags per household. UPDATE: South Trail Fire & Rescue is currently out of sand. Empty sandbags only are available.
    - Naples— Sandbags will be available at three public park locations: Big Corkscrew Island Regional Park, 810 39th Ave., North Collier Regional Park, 15000 Livingston Road, in the Sun-N-Fun Lagoon parking lot, and at Donna Fiala Eagle Lakes Community Park, 11565 Tamiami Trail East, in the grassy area between the parking lots. The Naples sandbag locations will begin service at 8 a.m. through dusk on Saturday and Sunday.
    - San Carlos Park—Sand and sandbags are available at San Carlos Park Fire District Station 54, located at 16900 Oriole Road. There is a limit of 10 bags per household. Bags can be picked up at the lobby. Bring your own shovel. Be prepared to fill and load your own sandbags. Make sure your vehicle can transport the weight of the sandbags.
    - North Fort Myers—Sandbags will be located at North Fort Myers Parks and Recreation, 2000 N. Recreation Parkway. Sand will be located in the back of the park, next to the county mulch pile. Please bring your own shovel to fill the bags.
    - Matlacha—Sandbags are available for pickup at Station 1, located at 5700 Pine Island Rd, Bokeelia, FL 33922
- IMT personnel are visiting the precincts, and the storage locations to inventory assets to prepare for both securement and post-storm deployment.
- No schedule changes are expected between now and Monday afternoon; however, all personnel should be prepared for schedule adjustments.
- The Agriculture assets are secured on the Olga site.

Subject: Important Update on a possible impending hurricane impacting our area (Update #5)

AMERICAN OVERSIGHT

Team,

IMT has been working on preparation for a potential Hurricane impacting our area early next week. IMT will continue to send out updates regularly so please monitor your email closely. All agency units need to begin preparations of securing their assigned assets and communicate all movement to IMT. Also, update the major asset application on the intranet. We have secured Jet Blue Park as an asset staging area for Marine and other assets. Agency asset storage facilities to include the gun range are preparing to house assets as well. IMT is securing high water vehicles that will be pre-staged at strategic locations i.e., the barrier islands. IMT members will be in the RTIC today coordinating efforts. Agency extension 239-258-3150 is being setup to communicate to IMT staff. Additional updates to follow.

Be prepared and be safe!

Subject: New Caribbean Disturbance - Update #4

The National Hurricane Center 2:00 PM update shows the possibility of development as the low pressure area in the Gulf of Mexico moves slowly eastward or northeastward. A tropical or subtropical depression or storm could form during the early to middle part of next week if the low remains separate from a frontal boundary that is forecast to extend across the Gulf of Mexico. Regardless of development, locally heavy rains could occur over portions of the Florida Peninsula late this weekend into next week. As of this update, the formation chance in the next 48 hours is low at 10 %, and the formation chance through 7 days has increased to 50%.

Current model runs show an arrival time of any potential storm around Wednesday of next week. This represents a slower forward storm speed and later storm arrival than previous model runs, so the timing and impacts are still largely unknown. Regardless of any potential storm, significant rainfall is still expected, and the Incident Management Team will continue to monitor and update all personnel.

Sent: Thursday, October 3, 2024 9:56 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance - Update #3

The National Hurricane Center has reduced the chance of tropical cyclone development within seven days to 30%. While the system is likely to develop over the Gulf of Mexico late this weekend or early next week, subsequent tropical or subtropical development could be limited by the system's potential interaction with a frontal boundary. Regardless of development, locally heavy rains could occur over portions of the Florida Peninsula next week.

Subject: New Caribbean Disturbance - Update #2

AMERICAN OVERSIGHT

The forecast for the area of disorganized showers remains the same; it is still too early to tell if the system will develop further. Regardless of development, heavy rain is expected in our area into the weekend and next week. The Incident Management Team will continue to monitor.

From: IMT <IMT@sheriffleefl.org>
Sent: Tuesday, October 1, 2024 10:35 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance - Update #1

The area of disorganized showers remains at a 40% chance of development. The National Hurricane Center indicates that environmental conditions could support some gradual development of this system, and a tropical depression could form towards the end of this week or this weekend while it moves generally northwestward over the northwestern Caribbean Sea and into the Gulf of Mexico. As of this time, there are no changes, but some long range models show an increased chance of this disturbance affecting our area.

From: IMT <IMT@sheriffleefl.org>
Sent: Monday, September 30, 2024 8:11 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance

The Incident Management Team is monitoring a new area of disorganized showers and thunderstorms over the western Caribbean Sea. The National Weather Center states that the system has a medium chance (40%) of developing towards the middle to latter part of the week as it moves northwestward into the Gulf of Mexico. As this disturbance moves into the gulf, increasing moisture is expected over the Florida Peninsula and elevated rain chances are anticipated from Friday through the weekend, and possibly into early next week.

Unfortunately, long range models show the possibility of direct impacts for Southwest Florida; however, It is too early to determine what, if any, tropical specific impacts can be expected.

The Incident Management Team will continue to monitor the storm, and will continue to provide updates through this very active part of the hurricane season.

A Hurricane Watch has been issued for Bonita Springs

A hurricane watch has been issued for Bonita Springs. The National Weather Service is anticipating that we will receive hurricane force winds and storm surge in our area from five-ten feet. The city urges you to complete your hurricane preparedness plan. A

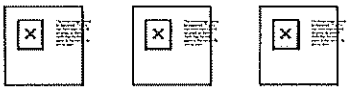
AMERICAN OVERSIGHT

Hurricane Watch means hurricane-force winds are possible somewhere within this area within the next 48 hours. A Storm Surge Watch means life-threatening inundation, from rising water moving inland from the coastline, is possible somewhere within this area within the next 48 hours. Please secure all building materials onsite. Please continue to monitor local news stations for updates on the storm. The City is working with the Lee County Emergency Operations Center, Lee County Sheriff's Office, Bonita Springs Fire Control and Rescue District and other partners to prepare. City staff has been clearing storm drains and securing facilities in preparation of Hurricane Milton.

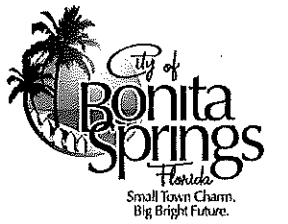
Residents who live in coastal areas or flood-prone inland areas do not need to wait for evacuation orders to mobilize. Go to friend or family members' homes or make arrangements to relocate inland. Please click here to find out your evacuation zone. Lee County anticipates announcing at noon Monday, Oct. 7, information about evacuation orders and shelter openings, as well as LeeTran service to those shelters. Residents can view the announcements on local media as well as via Facebook Live, available at www.facebook.com/leecountyflbocc.It can also be viewed on LeeTV and on the Lee County Government YouTube channel.

The city encourages residents living near the Imperial River and canals, to continue to monitor water levels. Please continue to be vigilant as sheet flow may impact water levels of rivers and canals. The level of the Imperial River is currently at 10.31ft. To check water levels, click here. For more information regarding flood protection please visit the City of Bonita Springs webpage.

The City will provide a live update today. Residents can watch live on the city's Facebook page at 1:00pm.



Bonita Springs Community Development asks that any Bonita Springs residents with water intrusion in their homes post-storm send an email to floodinfo@cityofbonitaspringscd.org or call 239-444-6150 for assistance with permit requirements and resources. For additional information regarding flooding, please visit



AMERICAN OVERSIGHT

the community development website. To find out flood zone information please click here.

In the event of heavy rain, it will take time for the infrastructure to drain. Please use caution and don't drive through flooded roads. Residents can stay up to date with City information on the City's Facebook page and website City of Bonita Springs.

Residents can also call the United Way's Emergency Information Hotline with questions. Dial2-1-1 or 239-433-3900.

Optional Attendees:	Joshua Quaintance; Kevin Ellis

Fox Weather interview with Stephen Morgan https://www.foxweather.com/person/m/stephen-morgan

Rtic clear by 10am Monday. Sheriff Marceno in place by 1015. Tech aware. Zoom equipment will remain in Rtic for the duration of the storm.

Updated: 10/7/24 @ 0820

Hurricane Milton

-The Lee County Sheriff's Office Incident Management Team is actively monitoring Hurricane Milton and is FULLY activated.

-Milton is expected to continue intensify and will make landfall on the west coast of the Florida's peninsula.

-At this time, exact landfall is uncertain but Lee County is expected to experience storm impacts to include SURGE.

-Just as you would all prepare for a storm at home, LCSO has done the same. We have secured all mobile assets to include our Marine Unit vessels due to the anticipated impacts from Milton.

AMERICAN OVERSIGHT

-LCSO is READY! Our Waterbourne Strike Team and Marine Unit, Special Ops are standing by should the need arise to rescue people.

-That being said, know your Evacuation Zone and be prepared to leave if your zone is called.

-Four (4) additional shallow water vessels have been obtained for water rescues.

-our academy cadets are utilizing an excavator to place sand at local fire stations for residents in need.

-Additional High-Water Vehicles have been obtained and will be deployed to the islands for potential high-water rescues.

-We urge everyone to prepare for this storm! Prepare for the worst, but hope for the best!

-We know what Mother Nature can do! She is unpredictable, which is why we urge everyone NOT to wait until the last minute to have everything that you need.

-Make sure you have necessary hurricane supplies: enough food, water, and medicine for several days.

-Have a hurricane plan with your family and be up to date with it. Topics should include an evacuation plan, sheltering in place, pets, miscellaneous family needs.

-Milton is now a MAJOR HURRICANE

-LCSO administrative services at precinct offices will be halted unit after the storm so we can focus on preparation and possible recovery efforts.

-Once we get sustained winds of 45 MPH, emergency response is stopped until it's safe to respond to calls.

AMERICAN OVERSIGHT

-It could take several hours or more for the winds to subside before a deputy is able to respond, once the impacts begin. SHELTER IN PLACE.

-Don't try to drive anywhere in inclement conditions as the roadways are not safe.

-Do NOT go outside during the storm as wind and standing water create hazard that can be fatal.

-Remember the three phases of the storm: BEFORE, DURING, and AFTER. Have you plan for all three.

-Continue to monitor your local media for weather updates, as well as the Lee County Sheriff's Office and Lee County Government on social media for the latest updates.

-WE ARE SWFL STRONG and are IN THIS TOGETHER

Good morning,

My name is Alyssa Adler and I am a Booking Producer at FOX Weather.

I am reaching out in anticipation of Milton, which is expected to reach major hurricane status before impacting parts of Florida this week.

We are looking to see if Lee County Sheriff Carmine Marceno would be available for a LIVE **video virtual** interview on **Monday, October 7th or Tuesday, October 8th** to discuss this. The interview would only take approximately 4-6 minutes. **Please let me know what day/time work best, as we are flexible.**

I can provide more details, if interested.

Hello LCSO and School District PIOs,

We are going to announce tomorrow morning that we are having a noon presser here at EOC. Please ensure that the sheriff and superintendent are invited to participate here with us if they want to. We'd like to have them both here and have them both say some words. Please let me know by 10 a.m. tomorrow if they will be attending.

Thanks.

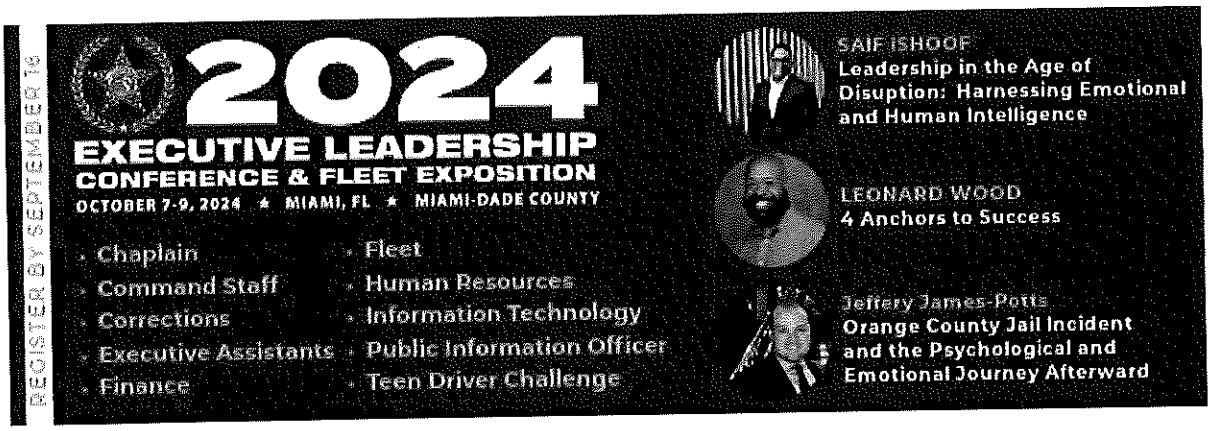
Sheriffs,



Understandably most of your agencies are preparing for the inbound impacts of Hurricane Milton. It is unknown what your post storm needs will be and if your agency will be capable of responding elsewhere with personal and or equipment/resources.

We are requesting that a representative from your agency complete the below survey to assist your FSA Task Force in identifying personnel numbers, resources, and available equipment we may be able to call on assuming there is no need locally in your county. Completing this will assist your Task Force with the response.

Hurricane Milton Resource Survey

Be safe and know that your team is preparing to meet your needs!

CHAMBER OF COMMERCE OF

CAPE CORAL

EMERGENCY OPERATIONS CENTER FLASH REPORT

EOC FLASH REPORT #4 - 10/7/2024

AMERICAN OVERSIGHT

VISIT OUR HURRICANE RESOURCE PAGE

Dear Members and Chamber Friends,

Please read the report below as well as the document links below from our Cape Coral Emergency Operations Center.

The Chamber holds a seat at the Emergency Operations Center and will be communicating with you regularly as the storm progresses. Please take the proper precautions to prepare your employees, businesses and homes as we continue to monitor the storm.

Hurricane Milton Briefing - 7 AM, 10/7/24

Hurricane and Storm Surge Watches now in effect. Milton will be a historic storm for the west coast of Florida. Hurricane Watch in effect for the entire area. Storm surge watch for the entire coast. Flood watch for the entire area.

? Life-threatening storm surge forecast:
? 8-12 ft for Pinellas, Hillsborough, Manatee, and Sarasota counties.
? 5-10 ft for Charlotte, Lee, Pasco, Hernando, Citrus
? 5-7 ft MSL for Levy
? Flood Watch out for the entire area. Rainfall amounts of 5 to 10 inches, with localized totals up to 15 inches.
? Timing of impacts to the area looks to be as early as early Wednesday morning and continuing into early Thursday morning.

Subject: 214 Forms

All personnel who participate in storm-related activities **must** fill out a Hurricane 214 Form. These forms are for a 24 hour period and must be done electronically. The form is available on the intranet under Hurricane Logs/Create Hurricane Log.

A 214 form will **NOT** need to be completed by members conducting their normal job functions, or regular patrol operations.

Examples of personnel who must fill out a form are personnel who are working overtime, School Resource Officers and Corrections personnel who were reassigned.

Personnel should add the activity that is closest to the work being completed and the information for their vehicle usage, then submit the form to their immediate supervisor in the area they are assigned, who will review it and approve it for accuracy. A second level supervisor in the area assigned will also need to be added for approval.

For each 24 hour period a new 214 must be completed. For example, if your shift falls in between a 24 hour period (overnight), you will need to complete (2) two 214 forms.

Dear Capt. Iriarte,

As we cover the latest on the hurricane on NewsNation, our 7pm host Leland Vittert would love to offer **Sheriff Marceno** time to share with our viewers the latest on the storm and how Floridians can keep safe. The interview would be **LIVE tonight at 7:40pm ET** via zoom for 4-6 minutes. He has been on our program "On Balance" once before and hopefully remembers having an informative interview with Leland.

AMERICAN OVERSIGHT

As you may know, NewsNation is the fastest growing cable news outlet in primetime, reaching nearly **70 million television households** across the United States, which means we broadcast to **92% of all cable TV**

homes. Plus, each interview has the potential to run across **200 local news stations** within the Nexstar family, **including stations in Florida,** so our *potential reach* is incredibly powerful.

Let me know ASAP if you are interested in exploring this.

Best,
Alicia Hesse
NewsNation Booking Producer

Dear Carmine,

As Hurricane Milton approaches, I urge each of you to take every precaution to ensure your safety and the safety of your loved ones. This storm has the potential to be very dangerous, and it is critical that we are all well-prepared. Please follow all local evacuation orders and guidelines. Do not take any risks—if you are advised to evacuate, do so as soon as possible. Your safety is the highest priority.

Once the storm has passed, we ask that you communicate your safety status and any needs you may have with your club presidents and club boards. This will help us quickly determine where assistance is needed and how we can best support one another. If you or anyone in your community has been affected, please register any needs you have at RotaryFL.org. This site will also allow you to volunteer to help with relief efforts or make donations when you are able. Your participation is invaluable as we work together to recover and rebuild whatever Hurricane Milton brings.

As Rotarians, we are people of action, not only for our communities but also for our families, friends, and neighbors. In times like these, let us lead by example—by extending a hand to those who might need help securing their homes, providing information to others about safe shelter locations, or simply being a source of support and calm. Remember, our service starts at home, and by protecting those closest to us, we ensure that we're ready to help others in need.

We have taken all necessary precautions on the district level to move our relief assets to safer locations so that way, when the storm passes, we can get back to work helping our communities. Rotarians are known for stepping up when our communities need us the most, and I know we will come through this storm stronger and more united than ever. Following the storm, I will get further communications out to let everyone know where there are opportunities to serve.

Out of the chaos of a storm, a stronger community emerges. Together, we are the foundation upon which hope and renewal stand. Remember that no matter the challenges ahead, we are never alone. We have each other and the strength of Rotary to get through whatever comes our way.

Stay safe, have a plan, and we will be here for you every step of the way.

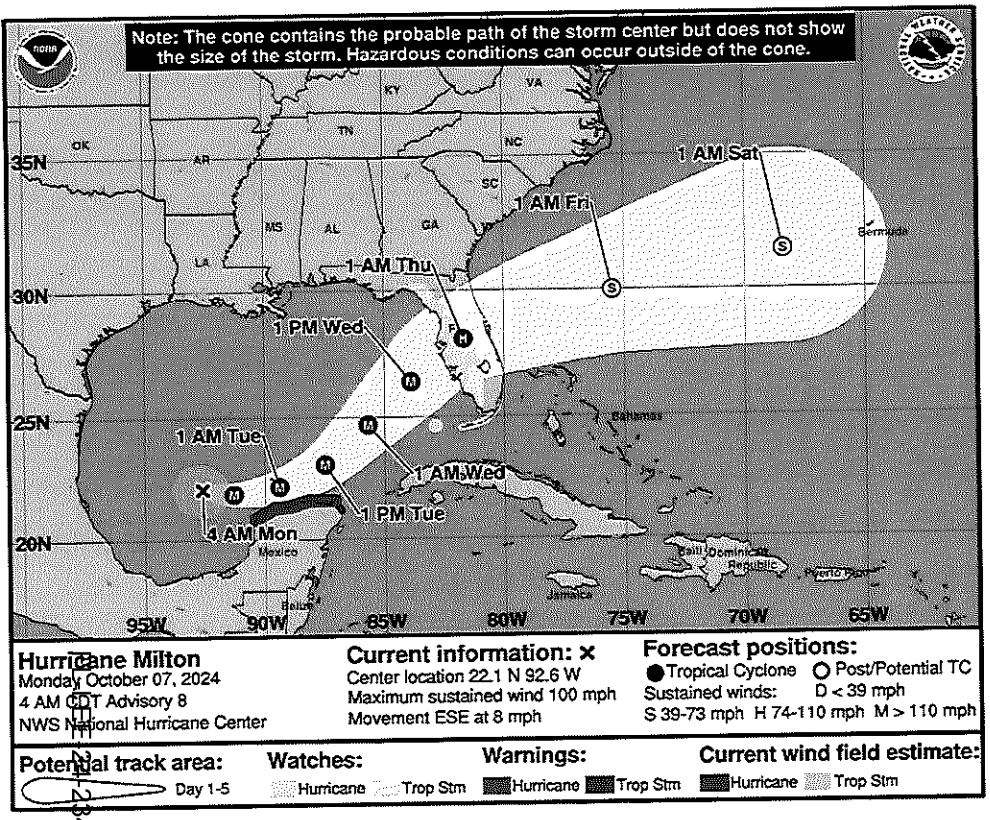
Tropical Storm Helene

5:00 AM EDT Tuesday: Florida Threats & Changes Since Last Packet

FOUO – For Government Official Use Only

	Minimal	Low	Moderate	High	Extreme
Winds					
Storm Surge					
Flash Flooding					
Tornadoes					

	Low	Moderate	High
Rip Currents			

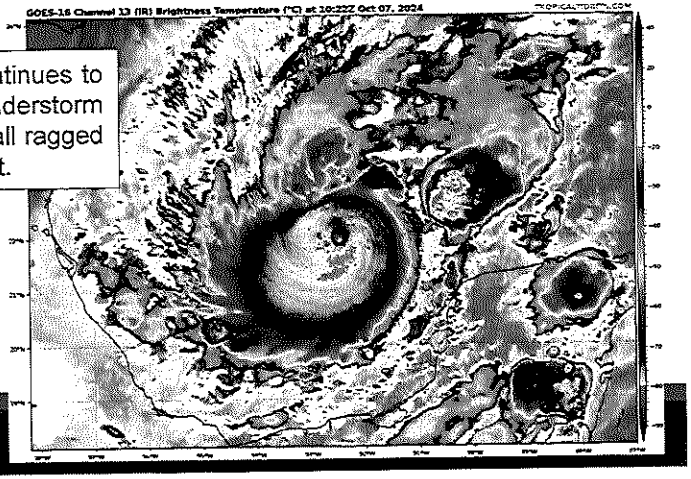


Overview/Recent Changes: As of 6:00 AM EDT, Milton is located about 750 miles west-southwest of Tampa, Florida, and is moving east-southeastward at 8 mph. An eastward to east-southeastward motion is forecast through tonight, followed by a turn toward the east and northeast on Tuesday and Wednesday. On the forecast track Milton is forecast to move near or just north of the Yucatan Peninsula today and Tuesday, then cross the eastern Gulf of Mexico and approach the west coast of the Florida Peninsula by Wednesday. Maximum sustained winds are near 120 mph, making Milton a major Category 3 hurricane. Milton is forecast to intensify rapidly and become a major hurricane later today. There is an increasing risk of life-threatening storm surge and damaging winds for portions of the western Florida Peninsula beginning late Tuesday to early Wednesday and expanding eastward through the daytime hours. Tropical Storm and Hurricane Watches have been issued for portions of the Western Peninsula, Forgotten Coast, and Keys ahead of Hurricane Milton with Storm Surge Watches issued along the Florida West Coast from Flamingo northward to the Suwannee River.

AMERICAN OVERSIGHT

Major Hurricane Milton

From the National Hurricane Center (NHC)



- **Location:** 750 miles WSW of Tampa, Florida
- **Maximum Sustained Winds:** 120 mph, Category 3
- **Current Movement:** ESE at 8 mph

An eastward to east-southeastward motion is forecast through tonight, followed by a turn toward the east and northeast on Tuesday and Wednesday. On the forecast track Milton is forecast to move near or just north of the Yucatan Peninsula today and Tuesday, then cross the eastern Gulf of Mexico and approach the west coast of the Florida Peninsula by Wednesday. Milton is forecast to intensify rapidly and become a major hurricane later today.

Milton is forecast to be a major hurricane when it reaches the west coast of Florida midweek. There is an increasing risk of life-threatening storm surge and damaging winds for portions of the western Florida Peninsula beginning late Tuesday to early Wednesday and expanding eastward through the daytime hours. Tropical Storm and Hurricane Watches have been issued for portions of the Western Peninsula, Forgotten Coast, and Keys ahead of Hurricane Milton with Storm Surge Watches issued along the Florida West Coast.

Current satellite imagery continues to show very concentrated thunderstorm activity in the eyewall. A small ragged eye is now also been present.

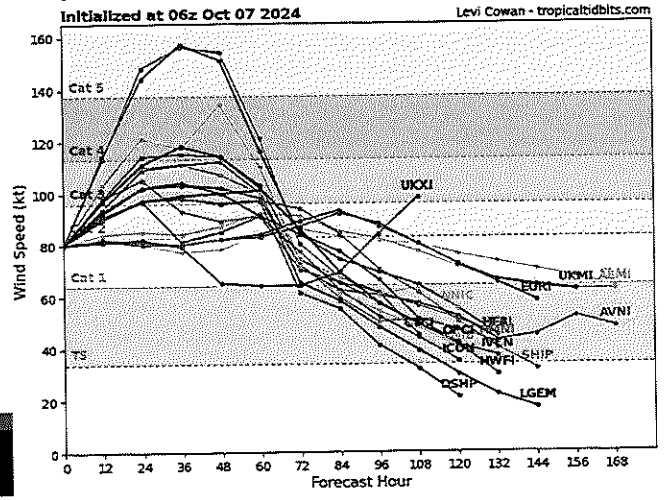
DHS-FEMA-2340-2022-000627

AMERICAN OVERSIGHT

Forecast Computer Models – Next 5 Days

Major Hurricane Milton



Hurricane MILTON Model Track Guidance

Computer forecast models remain in decent agreement that a mid to upper-level disturbance and surface area of low pressure moving eastward into the Atlantic and another mid to upper-level trough digging into the Gulf of Mexico should cause Milton to move east-southeastward to eastward for the next 36 hours or so, followed by a turn to the northeast at a faster forward speed. There remains significant disagreements as to the location and timing of landfall as the forward speed and amount of latitude the system is able to gain will be highly dependent on the placement of a frontal boundary dropping southward into Florida and the Gulf of Mexico.

Computer forecast models remain in good agreement regarding Milton's rapid intensification during the near-term forecast as the tropical cyclone remains small, within light upper-level winds, and deep warm waters. The peak intensity over the southern-central Gulf of Mexico may still be conservative at this time. The forecast becomes a bit trickier as it nears landfall as upper-level winds sharply increase; however, computer forecast models are showing the system growing in areal extent if it weakens, and computer forecast models show Milton being a large hurricane at landfall, with dangerous impacts able to spread over a big area.

Hurricane MILTON Model Intensity Guidance

Timing of Arrival

From the National Hurricane Center (NHC)

Earliest Reasonable Arrival Time of Tropical-Storm-Force Winds

- Tropical storm-force conditions will most likely arrive along the West Florida coastline early Wednesday morning and spread eastward across the Florida Peninsula through the Wednesday daytime hours.
- Tropical storm-force winds could arrive as early as Tuesday night along the western Florida Peninsula.
- Probabilities (*shaded*) will continue to increase as Milton's landfall is closer in the forecast period.
- There remains quite a bit of uncertainty regarding the forward speed and progression of Milton, and thus the arrival time of tropical hazards; changes to the eventual track and timeline can be expected, it is important not to focus on single model runs or solutions!

Location	Probability
Key West	46% (-2%)
Naples	74% (+2%)
Fort Myers	62% (+2%)
Miami	23% (-3%)
West Palm	53% (-3%)
Venice	87% (+3%)
Tampa	81% (+1%)
Orlando	57% (-2%)
Cocoa Beach	71% (-1%)
Cedar Key	58% (±0%)
Daytona Beach	46% (-5%)
Gainesville	35% (-3%)
Jacksonville	23% (-5%)

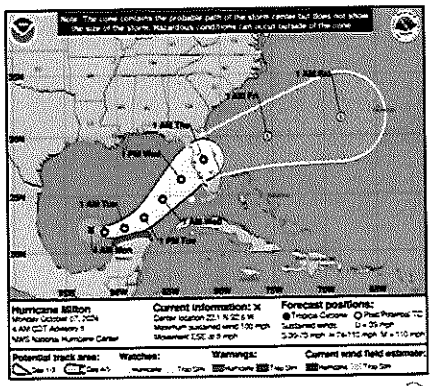
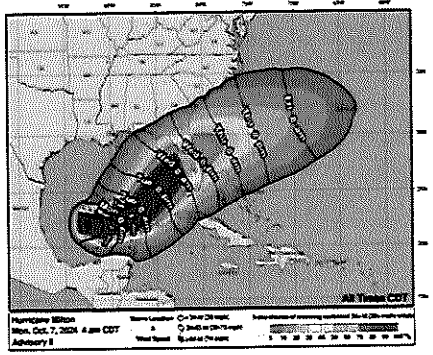
AMERICAN OVERSIGHT



Key Messages
From the National Hurricane Center (NHC)

Key Messages for Hurricane Milton
Advisory 8: 4:00 AM CDT Mon Oct 07, 2024



1. Hurricane conditions are expected across portions of the northern coast of the Yucatan Peninsula. A dangerous storm surge with damaging waves is also likely along portions of the northern coast of the Yucatan Peninsula.

2. There is an increasing risk of life-threatening storm surge and damaging winds for portions of the west coast of the Florida Peninsula beginning Tuesday night or early Wednesday. Storm Surge and Hurricane Watches are now in effect for portions of the west coast of the Florida Peninsula and residents in that area should follow any advice given by local officials and evacuate if told to do so.

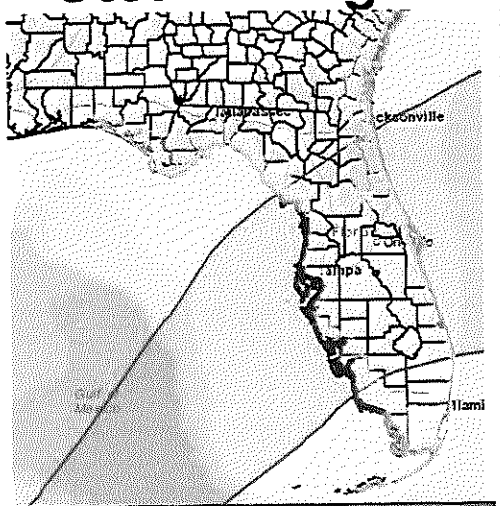
3. Areas of heavy rainfall will impact portions of Florida today well ahead of Milton, with heavy rainfall more directly related to the system expected later on Tuesday through Wednesday night. This rainfall will bring the risk of considerable flash, urban, and areal flooding, along with the potential for moderate to major river flooding.

Most Likely Arrival Time of Tropical-Storm-Force Winds

For more information go to hurricanes.gov

FOUO – For Government Official Use Only

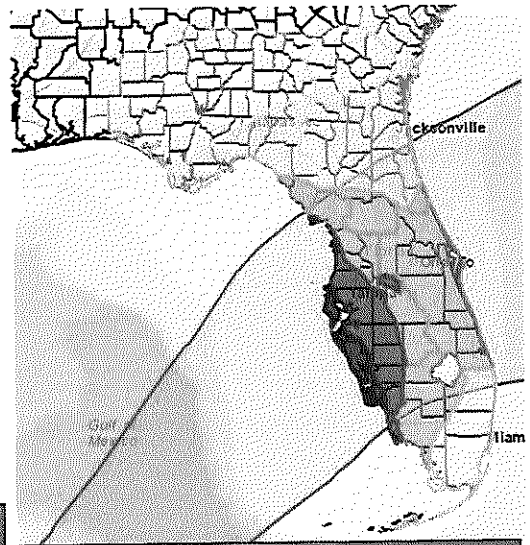
FL-LEE-24-2340-531



AMERICAN OVERSIGHT

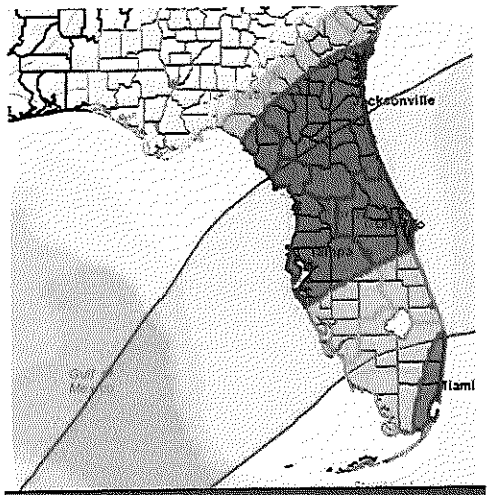
Threats & Impacts

From the National Weather Service



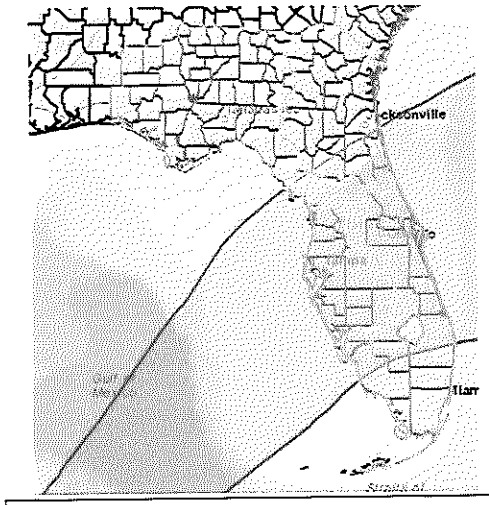
FOUO – For Government Official Use Only

Storm Surge



- Widespread deep inundation, with storm surge flooding greatly accentuated by powerful battering waves. Structural damage to buildings, with many washing away. Damage greatly compounded from considerable floating debris. Locations may be uninhabitable for an extended period.
- Near-shore escape routes and secondary roads washed out or severely flooded. Flood control systems and barriers may become stressed.
- Extreme beach erosion. New shoreline cuts possible.
- Massive damage to marinas, docks, boardwalks, and piers. Numerous small craft broken away from moorings with many lifted onshore and stranded.

Wind

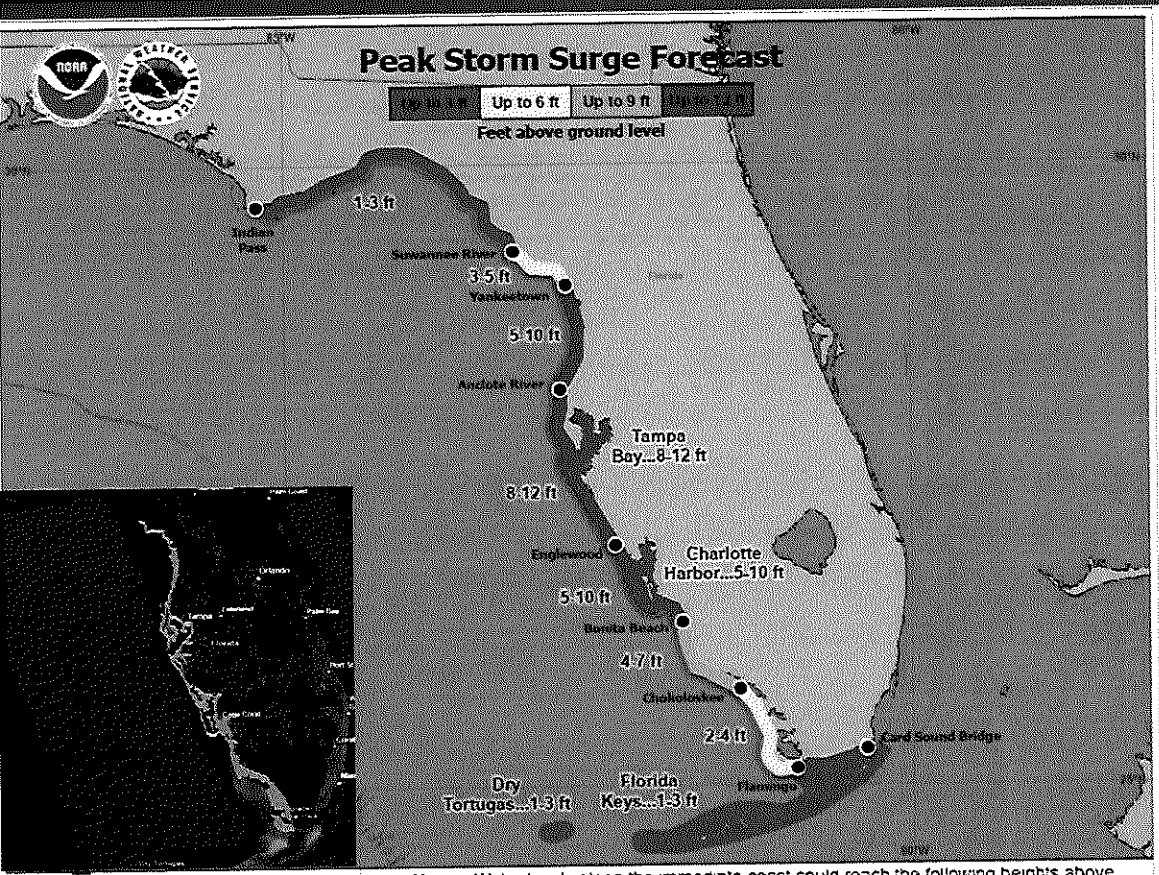


- Structural damage to sturdy buildings, some with complete roof and wall failures. Complete destruction of mobile homes. Damage greatly accentuated by large airborne projectiles. Locations may be uninhabitable for weeks or months.
- Numerous large trees snapped or uprooted along with fences and roadway signs blown over.
- Many roads impassable from large debris, and more within urban or heavily wooded places. Many bridges, causeways, and access routes impassable.
- Widespread power and communications outages.

Flooding

- Major rainfall flooding may prompt many evacuations and rescues.
- Rivers and tributaries may rapidly overflow their banks in multiple places. Small streams, creeks, canals, and ditches may become dangerous rivers. Flood control systems and barriers may become stressed.
- Flood waters can enter many structures within multiple communities, some structures becoming uninhabitable or washed away. Many places where flood waters may cover escape routes. Streets and parking lots become rivers of moving water with underpasses submerged. Driving conditions become dangerous. Many road and bridge closures with some weakened or washed out.

Tornadoes



- The occurrence of isolated tornadoes can hinder the execution of emergency plans during tropical events.
- A few places may experience tornado damage, along with power and communications disruptions.
- Locations could realize roofs peeled off buildings, chimneys toppled, mobile homes pushed off foundations or overturned, large tree tops and branches snapped off, shallow-rooted trees knocked over, moving vehicles blown off roads, and boats pulled from moorings.

Hurricane Milton
Monday, October 07, 2024
04 AM EDT Advisory 8
NWS National Hurricane Center

User Notes: Water levels along the immediate coast could reach the following heights above ground level within the indicated areas. Elevated water levels will likely be accompanied by large and destructive waves. Colors are determined by the highest values in the associated forecast peak surge range. Values shown on this graphic are inclusive of tide.

Storm Surge Watches have been issued from Flamingo (Mainland Monroe County) northward to the Suwannee River (Dixie/Levy County Line), including Charlotte Harbor and Tampa Bay.

- **8-12' peak storm surge** is forecast from the Anclote River (Pasco/Pinellas County line) southward to Englewood (Sarasota/Charlotte County line), including Tampa Bay.
- **5-10' peak storm surge** is forecast from Yankeetown (Levy/Citrus County) southward to the Anclote River and from Englewood southward to Bonita Beach (Lee/Collier County line), including Charlotte Harbor.
- 4-7' of storm surge is anticipated from Bonita Beach southward to Chokoloskee (Collier/Monroe County line).
- 2-5' of storm surge is anticipated from the Suwannee River (Dixie/Levy County Line) southward to Yankeetown and from Chokoloskee southward to Flamingo (Mainland Monroe County)

Surge values will be dependent on the future path of Milton, and updates to the forecast can be expected.

DOJ-OGR-00020633

AMERICAN OVERSIGHT

Rainfall Totals – Next 7 Days

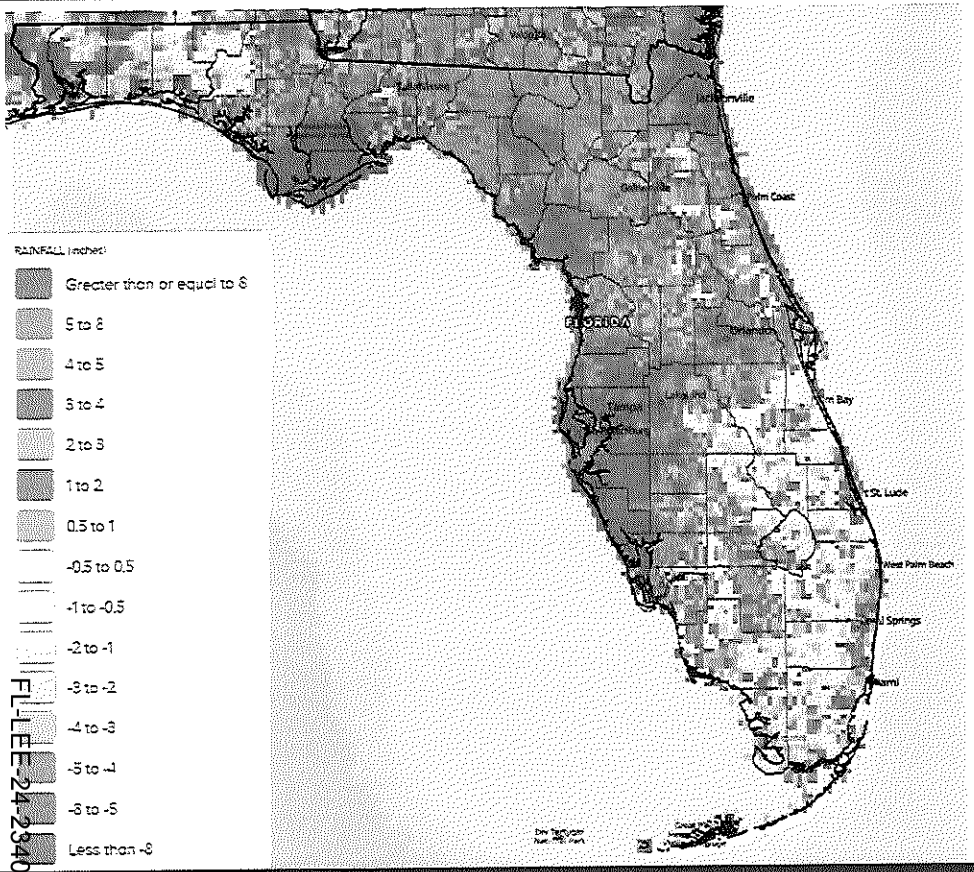
From the Weather Prediction Center (WPC)

7-Day Forecast Rainfall Totals –
Through Sunday Evening (10/13)

- Abundant tropical moisture streaming across the state and an incoming frontal boundary will maintain a wet and active weather pattern across the Peninsula to start the week, even prior to tropical impacts.

- *Rainfall totals heavily tied to the eventual track and forward speed of the system. With computer model guidance uncertainty regarding the exact track, there remains uncertainty as to where the heaviest rainfall can be expected.*

- Widespread rainfall totals near 5-10" with **locally higher totals in excess of 15"** are possible across portions of the Peninsula.
  - Drier air circulating along the southern side of the system as it moves across the Peninsula will keep heavy rainfall along the northern side of the system, allowing for widespread rainfall to extend into Northeast Florida.
  - Computer models are indicating the heaviest rainfall totals may occur along and north of the I-4 corridor across Central Florida and into Northeast Florida and along South Florida coastlines; however, the exact placement of these more significant totals will continue to be modified depending on the tropical disturbance's organization and track.
  - **Please continue to stay tuned for the latest computer forecast model guidance and trends in the subsequent days.**



FL-EM-2024-00001-534

FOUO – For Government Official Use Only

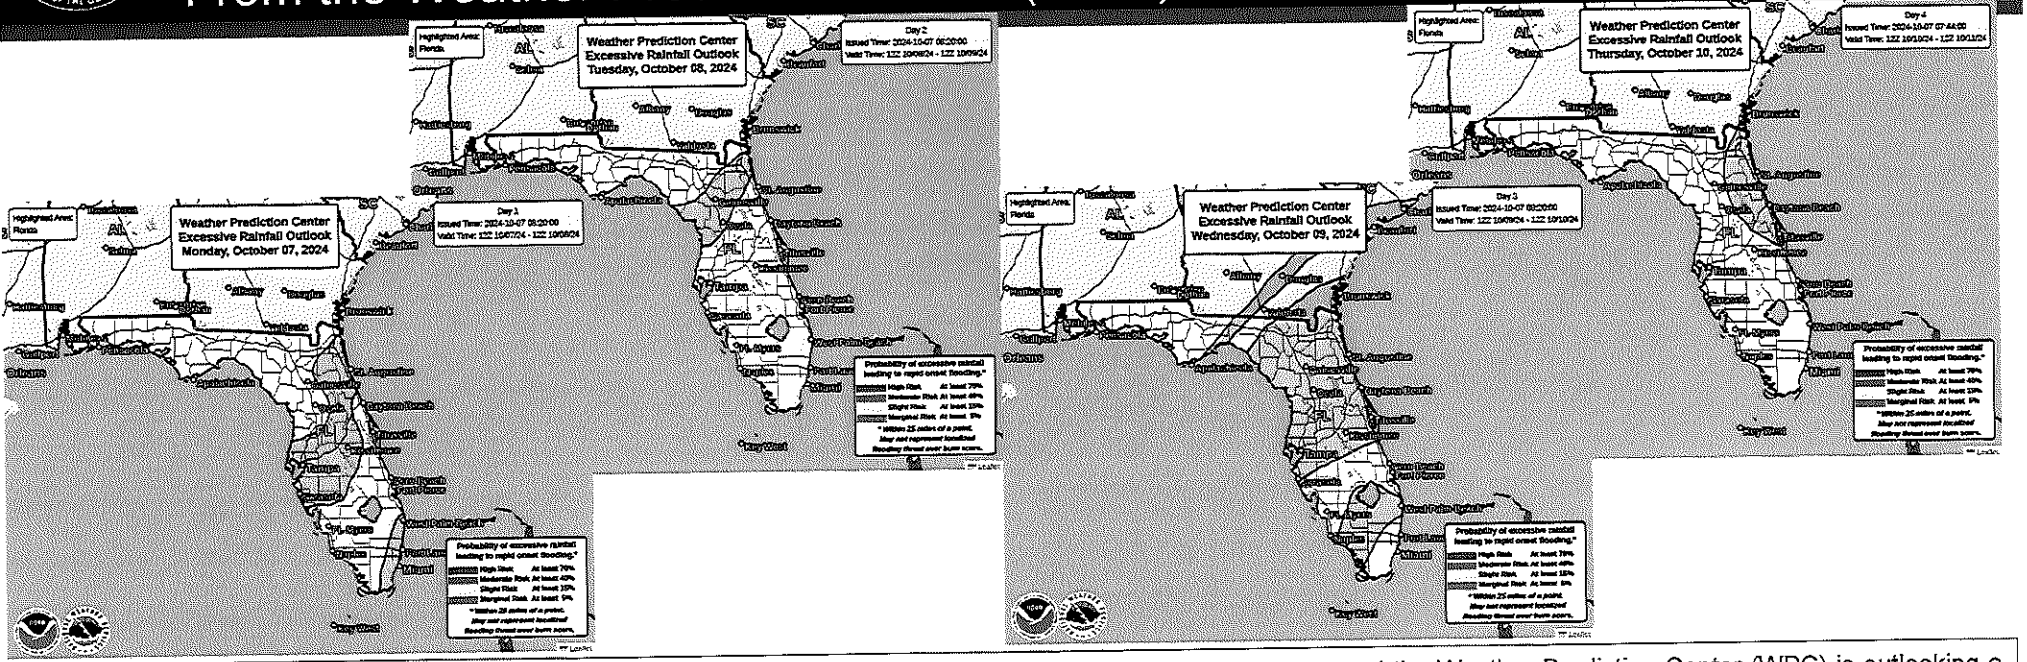
AMERICAN OVERSIGHT

60-Day Rainfall Departure From Normal

From the National Weather Service

Much of the Big Bend and Northern Peninsula southward through the I-4 corridor and into West-Central and Southwest Florida have experienced rainfall totals greater than 5-10" above normal over the past 60-days. More localized areas have seen rainfall totals near 10-15" above normal over the past 60-days across with isolated higher totals near 15-20" over the past 60 days across portions of Apalachicola, the Suwannee Valley, Northeast Florida, and West-Central Florida.

Numerous North, West-Central, and Southwest Florida rivers are already running high and/or within flood stage at this time.



Saturated areas will be more vulnerable to heavy rainfall and a faster onset of flooding.

FL-LEE-24-2340

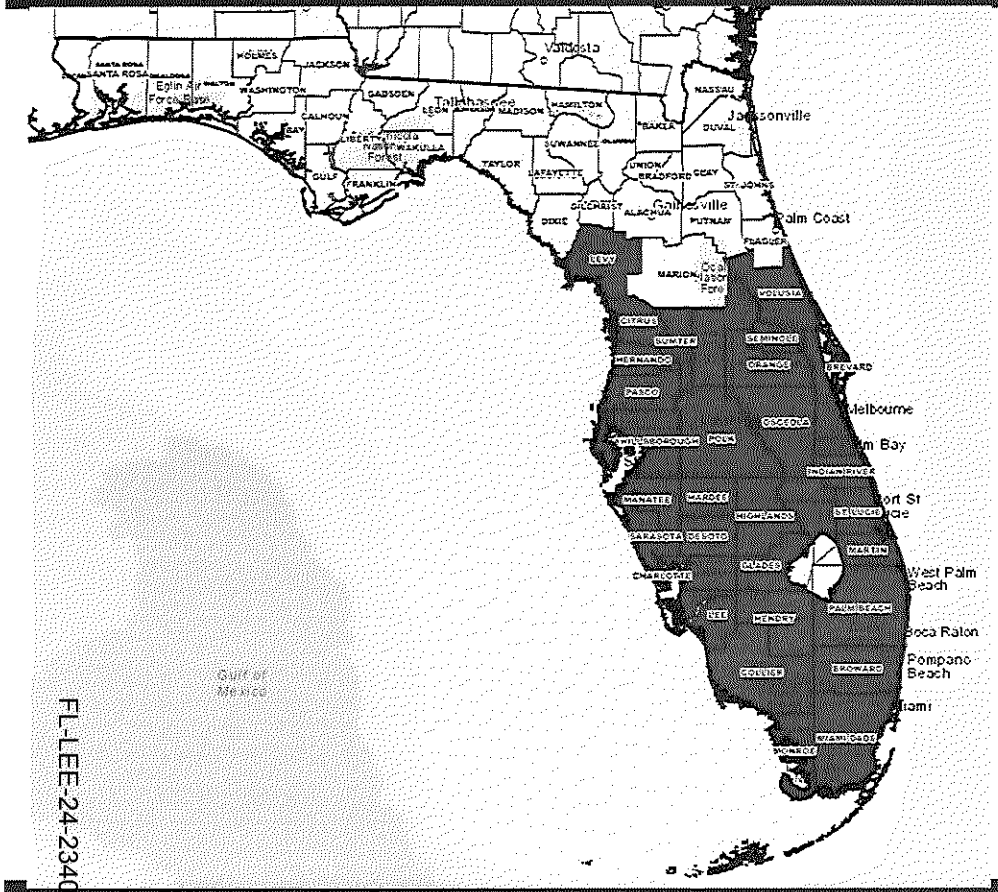
AMERICAN OVERSIGHT

Flash Flood Outlooks – Next 5 Days

From the Weather Prediction Center (WPC)



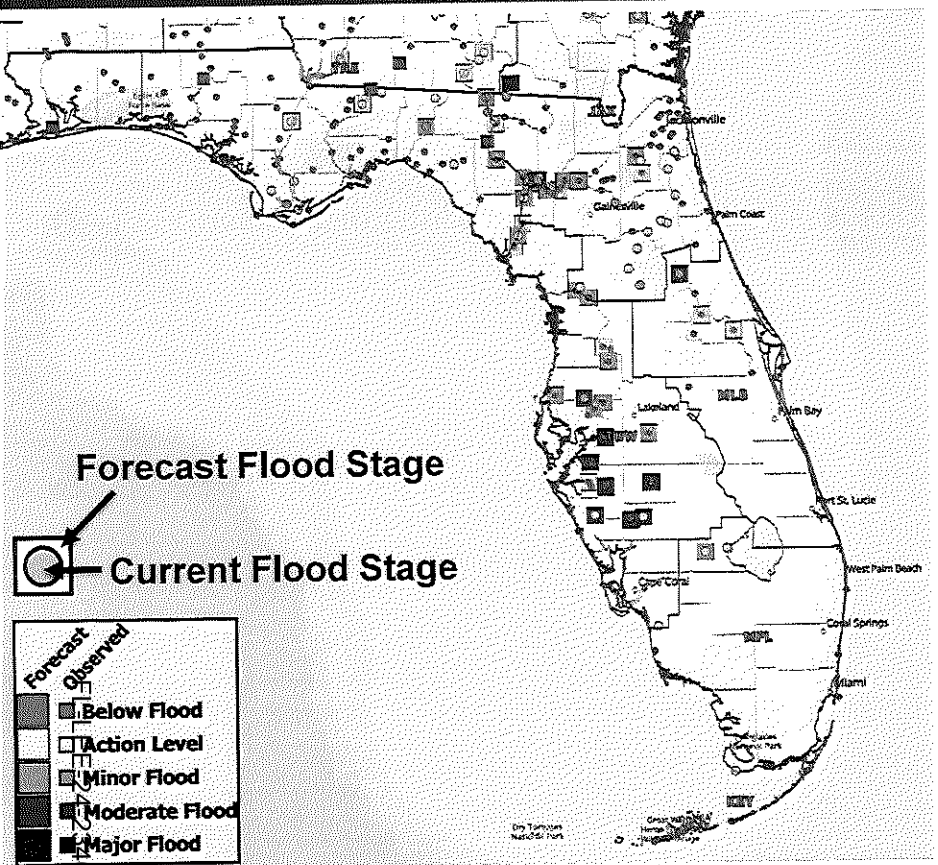
Widespread heavy rainfall can be expected to continue today and into Tuesday ahead of the outer bands of Milton, and the Weather Prediction Center (WPC) is outlooking a **Moderate Risk (level 3 of 4) for Flash Flooding** across the Southeast Metro, including the southern I-95 corridor, with a **Slight Risk (level 2 of 4)** extending from the Space Coast and through Southwest Florida and a **Marginal Risk (level 1 of 4)** from Northeast Florida through the I-4 corridor Monday. A **Slight Risk (level 2 of 4)** is maintained throughout most of the Peninsula and towards Northeast Florida on Tuesday with a **Marginal Risk (level 1 of 4)** extending into southern portions of the Suwannee Valley. Coastal locations along the West Coast experienced flooding (both tidal and rainfall) due to Major Hurricane Helene, and any coastal or low-lying areas will remain vulnerable to additional rounds of rainfall. Heavy rainfall rates will also be a concern over already saturated and vulnerable soils; ponding water and instances of flooding will be possible, especially throughout the urban and poor drainage/low-lying areas in the Florida Peninsula. There remains uncertainty as to where the heaviest rainfall will fall as Tropical Storm Milton approaches and crosses the Florida Peninsula around mid-week. The Weather Prediction Center (WPC) is outlooking a **Moderate Risk (level 3 of 4) for Flash Flooding** across much of North and Central Florida, including the entire I-4 corridor, Wednesday with a **Slight Risk (level 2 of 4)** extending into portions of the Big Bend to Lake Okeechobee into Southwest Florida. Additional **Flood Watches** will likely be issued as details become clearer.

FDEM-EM-2024-000636

Flood Watches

From the National Weather Service (NWS)

Flood Watches remain in effect for the Florida Peninsula, spanning from the Nature Coast to along and south of the I-4 corridor and remain in effect until Thursday morning. This impacts the following counties:



Levy	**Volusia**	**Citrus**	**Hernando**
Pasco	**Pinellas**	**Hillsborough**	**Manatee**
Sarasota	**Charlotte**	**Lee**	**Collier**
Monroe	**Hendry**	**Glades**	**Highlands**
Hardee	**DeSoto**	**Polk**	**Sumter**
Lake	**Seminole**	**Orange**	**Osceola**
Brevard	**Okeechobee**	**Indian River**	**St. Lucie**
Martin	**Palm Beach**	**Broward**	

FL-LEE-24-2340-0637

AMERICAN OVERSIGHT

Current & Forecast River Conditions

From the National Weather Service

A **River Flood Warning** remains in effect along the St. Johns River at Astor as water levels will remain within Minor Flood Stage over the next several days, rising into **Moderate Flood Stage** later this week as heavy rainfall occurs over trapped water levels within the basin.

The Withlacochee River near Pinetta (CR-150) has crested and water levels continue to gradually decline through Minor Flood Stage. The flood wave will progress down the Suwannee River well into next week and water levels will slowly decline. As flood waters from the Georgie headwaters continue to travel down the basins, additional minor riverine flooding will be possible along lower portions of the Suwannee River by late this week or this weekend. Backwater flooding is forecast along lower portions of the Santa Fe with the Santa Fe River at Three Rivers Estates already experiencing minor flooding and expected to reach **Moderate Flood Stage** by next weekend.

The Aucilla River at Lamont has risen into minor flood stage over the next couple of days with widespread rainfall; however, water levels are forecast to fall back below flood stage in the next day or so.

River Flood Warnings have been issued for minor to **moderate flooding** along numerous West-Central Florida rivers, creeks, and waterways (including portions of the Manatee River, Myakka River, Peace River at Zolfo Springs and at SR-70 Arcadia, Horse Creek, and Cypress Creek) with widespread rainfall anticipated over the next few days. The Little Manatee River near Wimauma at US-301 is forecast to reach **Major Flood Stage** by mid-to-late this week.

For more details, please visit the River Forecast Center.

AMERICAN OVERSIGHT

Riverine Flooding

Chance of River Flooding Based on Range of Forecast Rainfall

Based on rainfall modelling, POSSIBLE river crest levels

Chance of Exceedance		
30%	Level	70%
○	Action	□
●	Minor Flood	■
●	Moderate Flood	■
●	Major Flood	■

● = less than 30% chance of reaching Action level

Significant River Flooding impacts include road hazards and damage to residential, commercial, and/or agricultural areas. Evacuation may be required. Flash flooding or Minor river flooding are NOT included in this outlook. Check your local weather forecast frequently for the most up-to-date information for your area.

Shaded areas are the forecast region of the Southeast River Forecast Center

- **Significant River Flooding Not Expected**
- **Significant River Flooding Possible** — Weather conditions indicate, without certainty that significant river flooding could occur
- **Significant River Flooding Likely** — Weather conditions indicate that significant river flood conditions can be expected
- **Significant River Flooding Occurring** — Significant river flooding is occurring at this time

Rivers, creeks/streams, and waterways across North and West-Central Florida are already running above normal for this time of year due to widespread heavy rainfall from Hurricane Debby & Helene. **River Flood Warnings** remain in effect along portions of the Withlacoochee, Aucilla, St. Johns, and several West-Central Florida rivers, creeks, and waterways for ongoing minor flooding.

Water will continue to filter through the river basins and further downstream from heavy rainfall across the Southeast U.S. from Hurricane Helene over the next few weeks. Computer models are suggesting the potential for minor flooding along portions of the Suwannee River as excess heavy rainfall discharges through the basin from the Georgia headwaters with minor to **moderate backwater flooding** possible along the Santa Fe River. The Alapaha River near Jennings has risen into Minor Flood Stage and may continue to rise over the next week or so as the Alapaha River at Statenville, Georgia is cresting in major flood stage and the crest wave will move further downstream into Florida in the coming days.

Additional heavy rainfall near-term and in association with Hurricane Milton will likely lead to instances of potential rapid onset flooding across North and Central Florida waterways. Widespread minor to **moderate flooding** is likely, with **major flooding** possible near maximum rainfall totals.

AMERICAN OVERSIGHT

Summary

FOUO – For Government Official Use Only

Major Hurricane Milton:

As of 7:00 AM EDT, Milton is located about 750 miles west-southwest of Tampa, Florida, and is moving east-southeastward at 8 mph.
An eastward to east-southeastward motion is forecast through tonight, followed by a turn toward the east and northeast on Tuesday and Wednesday.
On the forecast track Milton is forecast to move near or just north of the Yucatan Peninsula today and Tuesday, then cross the eastern Gulf of Mexico and approach the west coast of the Florida Peninsula by Wednesday.
Maximum sustained winds are near 120 mph, making Milton a major Category 3 hurricane.
Milton is forecast to intensify rapidly.
There is an increasing risk of life-threatening storm surge and damaging winds for portions of the western Florida Peninsula beginning late Tuesday to early Wednesday and expanding eastward through the daytime hours.
Changes to the eventual track and timeline can be expected, it is important not to focus on single model runs or solutions!

- **Hurricane Watches** have been issued for the following counties: *Levy, Citrus, Hernando, Sumter, Pasco, Pinellas, Hillsborough, Polk, Manatee, Hardee, Highlands, Sarasota, DeSoto, Charlotte, Lee, Coastal Collier, and the Dry Tortugas.*
- **Tropical Storm Watches** have been issued for the following counties: *Coastal Franklin, Coastal Wakulla, Coastal Jefferson, Taylor, Dixie, Lafayette, Glades, Hendry, Inland Collier, Mainland Monroe, Florida Keys.*

- There is a danger of life-threatening storm surge along portions of the West Coast of Florida.
  - **Storm Surge Warnings** have been issued from Flamingo (Mainland Monroe County) northward to the Suwannee River (Dixie/Levy County Line), including Charlotte Harbor and Tampa Bay.
  - **8-12' peak storm surge** is forecast from the Anclote River (Pasco/Pinellas County line) southward to Englewood (Sarasota/Charlotte County line), including Tampa Bay.
  - **5-10' peak storm surge** is forecast from Yankeetown (Levy/Citrus County) southward to the Anclote River and from Englewood southward to Bonita Beach (Lee/Collier County line), including Charlotte Harbor.
  - **4-7' of storm surge** is anticipated from Bonita Beach southward to Chokoloskee (Collier/Monroe County line).
  - **2-5' of storm surge** is anticipated from the Suwannee River (Dixie/Levy County Line) southward to Yankeetown and from Chokoloskee southward to Flamingo (Mainland Monroe County)
  - *Surge values will be dependent on the future path of Milton, and updates to the forecast can be expected.*

The next briefing packet will be issued on Monday afternoon. For the latest information, please visit the National Hurricane Center website.

FL-LEE-24-2340-642

AMERICAN OVERSIGHT

Summary

FOUO – For Government Official Use Only

Florida Outlook:

- Areas of heavy rainfall will impact portions of Florida today and Tuesday, well ahead of Milton, with rainfall more directly tied to Milton expected late Tuesday and Wednesday.
  - Widespread rainfall totals near 5-10" with **locally higher totals in excess of 10-15"** are possible across portions of the Peninsula.
  - *Rainfall totals heavily tied to the eventual track and forward speed of the system. With computer model guidance uncertainty regarding the exact track, there remains uncertainty as to where the heaviest rainfall can be expected.*
  - Widespread heavy rainfall can be expected to continue today and into Tuesday ahead of the outer bands of Milton, and the Weather Prediction Center (WPC) is outlooking a **Moderate Risk (level 3 of 4) for Flash Flooding** across the Southeast Metro, including the southern I-95 corridor, with a **Slight Risk (level 2 of 4)** extending from the Space Coast and through Southwest Florida and a **Marginal Risk (level 1 of 4)** from Northeast Florida through the I-4 corridor Monday.
  - A **Slight Risk (level 2 of 4)** is maintained throughout most of the Peninsula and towards Northeast Florida on Tuesday with a **Marginal Risk (level 1 of 4)** extending into southern portions of the Suwannee Valley.
  - The Weather Prediction Center (WPC) is outlooking a **Moderate Risk (level 3 of 4) for Flash Flooding** across much of North and Central Florida, including the entire I-4 corridor, Wednesday with a **Slight Risk (level 2 of 4)** extending into portions of the Big Bend to Lake Okeechobee into Southwest Florida.
  - A **Flood Watches** are in effect across much of the Peninsula as **flash, urban, and areal flooding** will be possible. Additional **Flood Watches** may be issued further northward as warranted.
- Rivers, creeks/streams, and waterways across North and Central Florida are already running above normal for this time of year due to widespread heavy rainfall from Hurricane Debby. **River Flood Warnings** remain in effect along portions of the Withlacoochee, Aucilla, St. Johns, and several West-Central Florida rivers, creeks, and waterways for ongoing **minor flooding**.
  - Heavy rainfall is anticipated this week, likely leading to water level rises in the Florida Peninsula. Computer models are currently suggesting there is potential for widespread **minor to moderate flooding** across West-Central Florida waterways, with instances of **major flooding** possible near the maximum rainfall totals.
- Outer bands moving onshore may bring **isolated tropical tornadoes** along the Florida West Coast late Tuesday into early Wednesday morning **(Marginal Risk for Severe Weather – level 1 of 5)** and along much of the Peninsula throughout the day Wednesday **(Marginal to Slight Risk for Severe Weather – level 1-2 of 5).**
  - Tornado Watches and Warnings will be issued as conditions warrant.
- There is an increasing risk of life-threatening impacts for portions of the west coast of Florida Peninsula beginning late Tuesday or Wednesday; *however, the extent and locations of these impacts remain uncertain as it will be heavily tied to the eventual track and forward speed of the system.*
- The next name on the list is Nadine (*nay-DEEN*).

The next briefing packet will be issued on Monday afternoon. For the latest information, please visit the National Hurricane Center website.

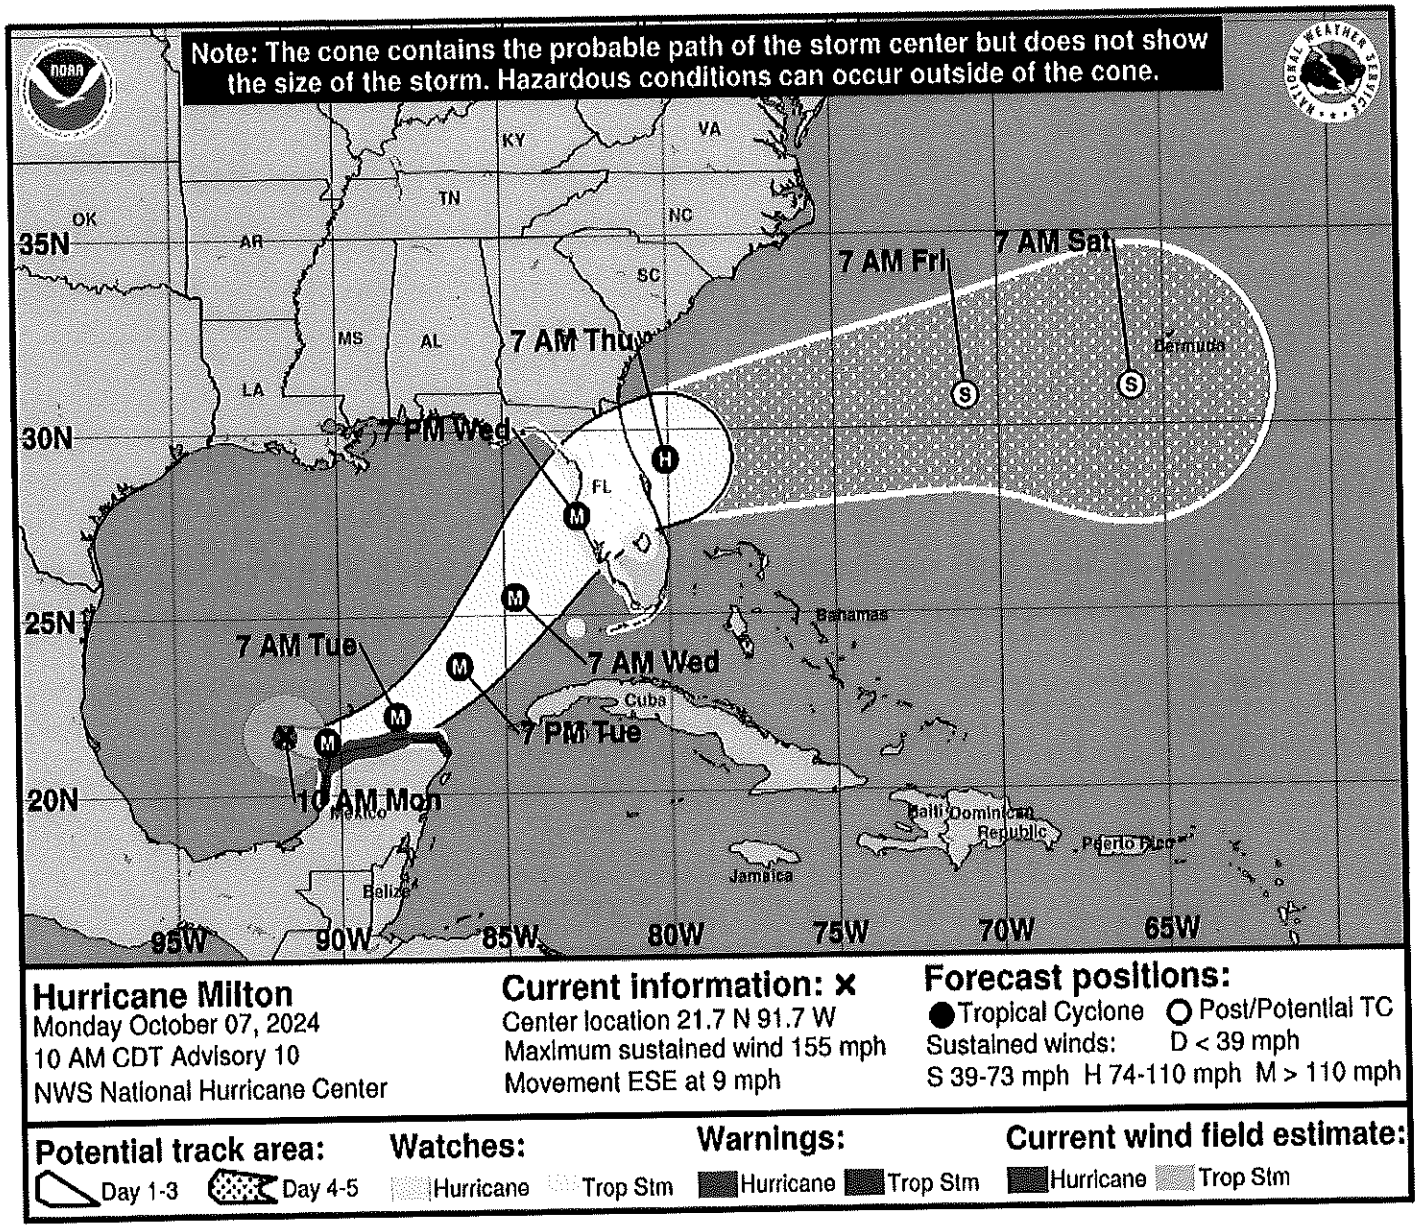
Subject: Hurricane Milton - Update #19

As of this update, the latest storm information is as follows:

- The storm track has shifted north slightly. The movement is not far enough to make a difference in our impacts.
- The earliest reasonable arrival time of tropical-storm-force winds is early Wednesday morning.

As of this update, new notifications are as follows:



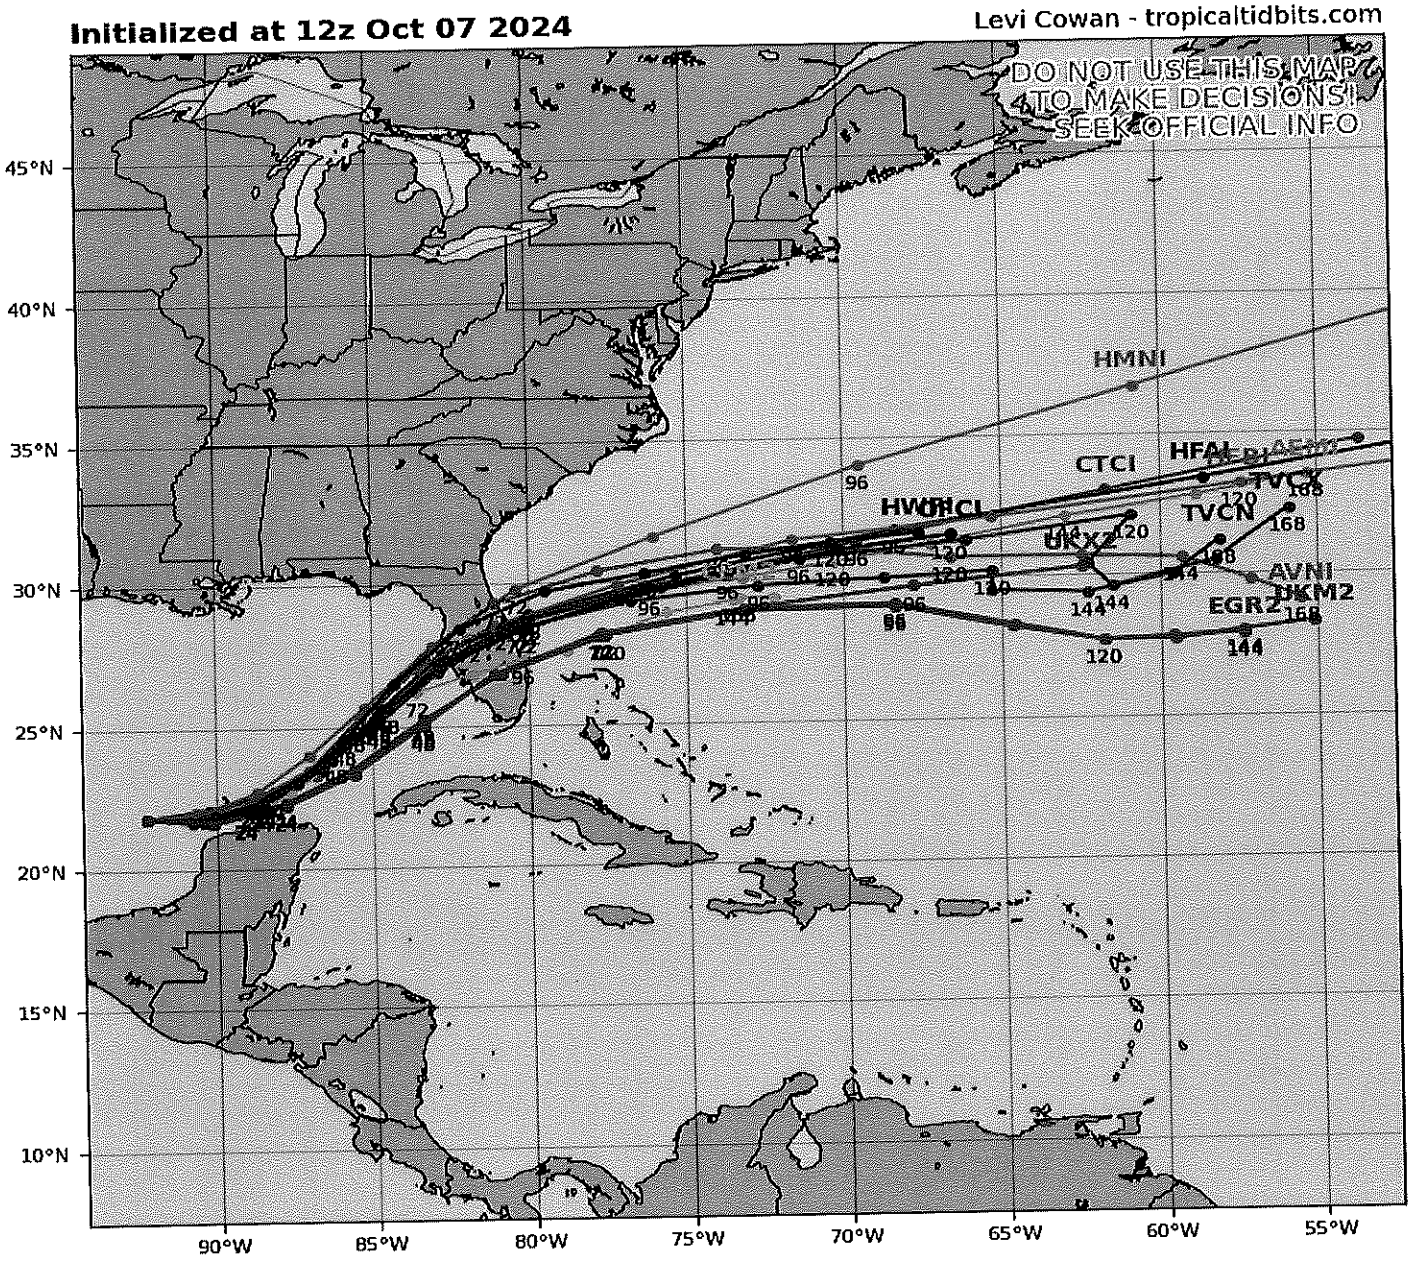
- The Hurricane Hotline is now active. Corrections personnel should call 239-477-1258, Law Enforcement personnel should call 239-477-1259, and Communications personnel should call 239-477-1260. Please save these numbers now in your phone. This hotline provides updates for personnel without access to e-mail. For now, all supervisors should relay all pertinent information to their personnel who do not have access to e-mail.
- Mandatory evacuations have been issued for the Town of Fort Myers Beach. Residents are encouraged to evacuate before 3:00 PM today.
- LeeTran at noon today, Monday, Oct. 7, will stop running routes onto Fort Myers Beach. All LeeTran services will convert to off-island transit only. This is to assist with the Town of Fort Myers Beach's request for residents to leave the island.
- Lee County Utilities will shut off water to Fort Myers Beach at noon Tuesday, Oct. 8. This is a precautionary measure to protect infrastructure. It was also implemented during 2022's Hurricane Ian.
- Lee County Sheriff's Office employees are currently in the field distributing sand and sand bags to locations throughout the county.

Gas Station Updates:

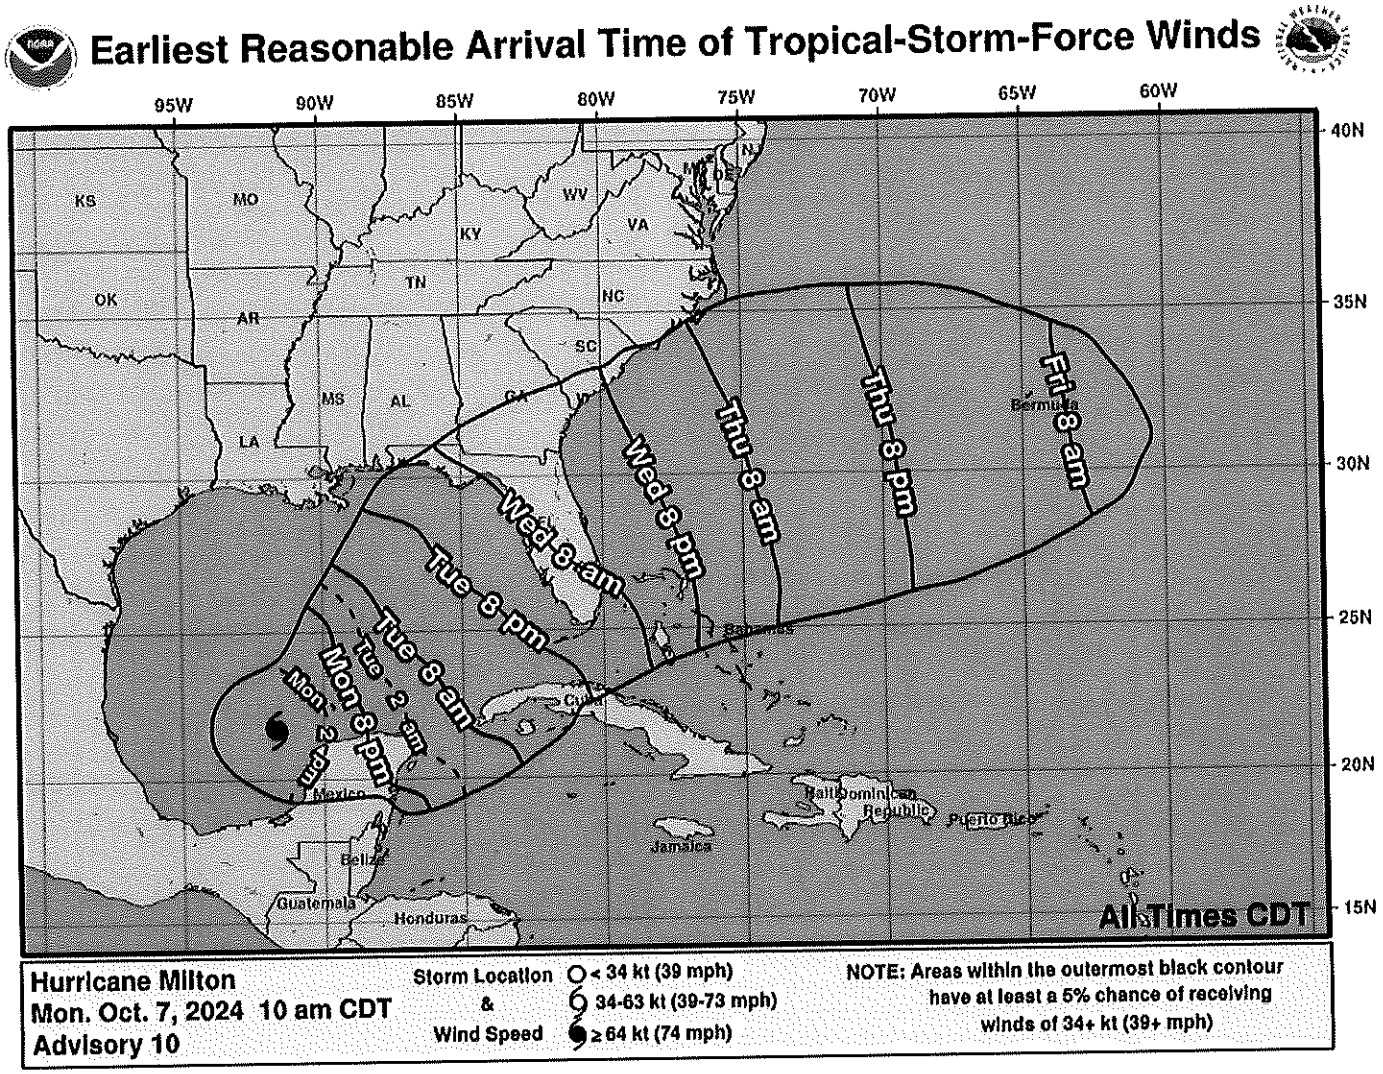
- 7-11 at SR 31/SR 80 received a fuel shipment this morning. Pumps 11 and 12 are for LEO. Make contact inside for pumps to be turned on.
- 7-11 at Billy's Creek is out of gas. Expecting shipment today. Will set aside fuel for LEO at Pump #1. Make contact with employee to have pump turned on.
- RaceTrac SR 31/ SR 80 has gas but expect to be out by noon and closed. Next shipment not expected until after the storm. They do not have a pump set aside for LEO.
- Circle K at SR 80/ Old Olga has fixed the pump and have a full tank for LEO. Make contact with employee for which pump to use.
- Sunoco at SR 80 and Buckingham is out of gas but requested shipment. Will pump remaining for LEO. Make contact with employee inside for pump to be turned on.
- Rebel at 6 Mile/Metro currently has 8,000 gallons and will stop pumping at 800 gallons. They do not set aside gas for us. Unknown next shipment.
- RaceTrac at 6 Mile/Michael G Rippe is out of gas but requested shipment. They will set up a Pump #3 for LEO use when they get gas. Make contact with employee for pump to be turned on.

AMERICAN OVERSIGHT

- Race Trac at Daniels/Powers Ct is out of gas. Shipment has been requested. Will set up pump for LEO use. In the past it has been Pump 18.
- 7-11 Daniels/Palomino is out of gas. Expecting shipment today and will contact me when they receive it. Pump 10 will be set aside for LEO.
- Rebel at 9281 Daniels Pkwy is out of gas. Requested shipment for today. Pump 1 will be set aside for LEO. Go inside to have pump turned on.
- Chevron at 13031 Metro is out of gas. Not expecting shipment. Will set a pump aside for LEO if they get gas.
- Circle K at Metro and Crystal is close to running out of gas and starting to shut pumps down. They are setting aside pumps 5-8 for LEO. Meet with employee for which pump to use.



AMERICAN OVERSIGHT



Hurricane MILTON Model Track Guidance

Initialized at 12z Oct 07 2024

Levi Cowan - tropicaltidbits.com

AMERICAN OVERSIGHT

From: IMT <IMT@sheriffleefl.org>
Sent: Monday, October 7, 2024 9:01 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: Hurricane Milton - Update #18

As of the 8:00 AM update, a Hurricane Watch remains in effect for our area.

The IMT Main Number is 239-258-3150 or e-mail at IMT@sheriffleefl.org.

As of this update, the latest storm information is as follows:

- Hurricane Milton is now a major hurricane, with sustained wind speeds of 125 mph.
- Hurricane Milton is expected to have winds of 145 mph at landfall, with some expansion of hurricane-strength winds.
- The model spread in the forecast track remains high, with the entire area within the cone.
- Movement is ESE at 8 mph.
- The current earliest arrival of tropical-storm-strength winds is 1:00 AM on Wednesday, with a likely arrival time at 8:00 AM. This is the arrival of tropical-storm-force winds, not the arrival of the actual storm.

AMERICAN OVERSIGHT

- The storm surge estimate is 5' to 10' for Lee County. It is expected to increase throughout the day on Wednesday and peak early Thursday.
- We are still in a Hurricane Watch, a Storm Surge Watch, and a Flood Watch.
- Many rivers are already in or forecast to go into flood stage.
- The main threat for tornadoes is late Tuesday into Wednesday night.
- Confidence is low on the exact track of the system, with the entire area within the cone. It should be noted that that 72 hour average track error is 100 miles.

As of this updates, new notifications are as follows:

- All personnel must notify IMT of all asset movements and personnel changes.
- Estero Fire Station #54 at Oriole and Alico just got sand delivered.
- Pine Island Fire has sand, but no sandbags.
- North Fort Myers Recreations Center has sand but no sandbags.
- Corrections Transport vehicles have received their staging location and should be in place by 12:00 PM.
- Academy recruits and Youth Services deputies have been deployed to the field.

National Hurricane Center Definitions:

- **Hurricane Watch**: Hurricane conditions (sustained winds of 74 mph or greater) are possible within your area. Because it may not be safe to prepare for a hurricane once winds reach tropical storm force, The NHC issues hurricane watches 48 hours before it anticipates tropical storm-force winds.
- **Hurricane Warning**: Hurricane conditions (sustained winds of 74 mph or greater) are expected somewhere within the specified area. NHC issues a hurricane warning 36 hours in advance of tropical storm-force winds to give you time to complete your preparations. All preparations should be complete. Evacuate immediately if so ordered.
- **Storm Surge Watch**: There is a possibility of life-threatening inundation from rising water moving inland from the shoreline somewhere within the specified area, generally within 48 hours.
- **Extreme Wind Warning**: Extreme sustained winds of a major hurricane (115 mph or greater), usually associated with the eyewall, are expected to begin within an hour. Take immediate shelter in the interior portion of a well-built structure.

Subject: Fw: Hurricane Milton - Update #17A

Additionally, a Hurricane Watch is now in effect (as of the 5:00 update) for the Gulf Coast of Florida from Chokoloskee northward to the mouth of the Suwanee River, including Tampa Bay, and the Dry Tortugas. A Storm Surge watch has also been issued for our area.

From: IMT <IMT@sheriffleefl.org>
Sent: Monday, October 7, 2024 5:29 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: Hurricane Milton - Update #17

The 5:00 AM update shows that the track is largely unchanged; however, models still vary from Naples to North of Tampa, and the intensity is forecast to be stronger, well into the Category 4 range.

AMERICAN OVERSIGHT

As of this update, new notifications are as follows:

- The storm has current maximum winds of 100 mph.
- The current forecast for our coast is an 8' - 12' storm surge.
- The storm has slowed somewhat, so the earliest arrival of Tropical Storm force winds is now in the early Wednesday morning hours.

From: IMT <IMT@sheriffleefl.org>
Sent: Sunday, October 6, 2024 11:00 PM
To: All Users <AllUsers@sheriffleefl.org>
Subject: Hurricane Milton - Update #16

The 11:00 PM update shows little movement in Hurricane Milton's track. Maximum sustained wind speeds are at 90 mph. Model tracks vary widely on the landfall location along Florida's West Coast. The Incident Management Team will continue to monitor and provide timely updates.

As of this update, new notifications are as follows:

Gas Availability:

- RaceTrac - 15820 Winkler Rd. - Pump 15 & 16 for First Responders - Contact is Tracy
- 7-11 - 12750 Cleveland Ave. - Pump 10 & 12 for First Responders - Contact is Vanilla
- RaceTrac - 5991 South Pointe Blvd. - Pump 19 & 20 for First Responders - Contact is Vince
- Mobil/7-11 - 20391 Summerlin Rd. - Pump 6 for First Responders - Contact is Susan
- Circle K - 20021 Summerlin Rd. - Pump 1 for First Responders - Contact is Kyle
- 7-11 - 15021 McGregor Blvd. - Pump 1 for First Responders - Contact is Jessica
- Mobil/7-11 - 17930 N. Tamiami Trl. - Pump 9 & 10 for First Responders - Contact is Joseph
- Circle K - 6381 Bayshore Rd. - Pump 10 for First Responders - Contact is Elizabeth
- Circle K - 19101 N. Tamiami Trl. - Pump 1 & 2 for First Responders - Contact is Christy
- 7-11 - 100 Delaware in Lehigh Acres - Pump 1 & 2 for First Responders.

From: IMT <IMT@sheriffleefl.org>
Sent: Sunday, October 6, 2024 8:57 PM
To: All Users <AllUsers@sheriffleefl.org>
Subject: Hurricane Milton - Update #15

As of the 8:00 PM National Hurricane Center update, Hurricane Milton is still forecast to rapidly intensify into a major hurricane. The center of the track has shifted further south, and is currently near the Bradenton/Sarasota area at landfall.

There is a Flood Watch for the entire area. Rainfall amounts of 5 to 10 inches, with localized totals of up to 15 inches are expected. The timing of the impacts is as early as late Tuesday and continuing into Thursday morning.

A good deal of uncertainty remains with where the storm will make landfall. It should be noted that the average NHC track error at day 3 is around 100 miles.

AMERICAN OVERSIGHT

As of this update, new notifications are as follows:

- Youth Services and Training personnel have received their assignments and will report according to their schedule tomorrow.
- Court Operations and Civil personnel will receive their schedule tomorrow.
- Employee Assistance personnel are done for the evening. They will resume in the morning.
- IMT will be fully activated beginning at 7:00 AM on Monday, with all personnel reporting or receiving their assignments by then.
- For personnel working overtime, please use *Hurricane Milton* as the reason for the overtime.
- The 7-11 Gas station at 103 Leeland Heights Blvd W in Lehigh Acres is open for LEO. If you need gas, use pumps 3,4,5, or 6 only. Jessica is the contact person there.
- The 7-11 at 100 Delaware Rd. in Lehigh Acres is reserving gas for First Responders. use Pump 3 and 4. Sharon is the contact person there.
    - The 7-11 at 18971 Babcock Ranch Rd is holding gas for first responders but deputies must go inside to request pump to be turned on.
    - The 7-11 at Del Prado and N Tamiami (17930 N Tamiami Trl.) is also holding gas for first responders but deputies must go inside to request the pump be turned on.

All personnel should be ready for a full activation at any time. This is a serious, dangerous storm and all personnel should complete preparations as soon as possible. Models vary in intensity, but most predict *at least* a Category 3, so even if we do not receive a direct hit, we can expect hurricane strength winds or wind gusts and a severe storm surge.

Subject: Hurricane Milton - Update #14

As of the 5:00 PM update, Milton is now a hurricane. Hurricane Milton has maximum sustained winds of 85 mph. The track has shifted slightly, and there is a more northeastern path across our area. Even if we do not receive a direct hit, we will receive tropical storm and hurricane strength winds, significant storm surge, and dangerous flooding from rainfall, likely much greater that what we received from Hurricane Helene. By tonight, all personnel should have their homes and families secured for the storm, and be prepared for a full activation.

Notifications for this update:

- All agency members deemed non essential during an emergency response will be dismissed tomorrow, October 7th, 2024 starting at **noon.** In order to stay home you will need to advise your immediate supervisor and use your accrued time. You may report for regular duty if you chose to do so. As always, use caution when driving in inclement weather and do not attempt to traverse standing water. IMT will continue to send out updates on our response to TS Milton.

- The Emergency Operations Center (EOC) will transition to a Level 1 at 7:00 AM tomorrow. This means that shelters and countywide operations will be run out of the EOC. The Incident Management Team is your contact for agency needs; do not contact the EOC directly.

Subject: Tropical Storm Milton - Update #13

The 2:00 PM Intermediate Update shows that there are no significant changes in the track. The earliest arrival of tropical storm force winds is projected to be 8:00 PM on Tuesday.

These are the stations that are reported to still have gasoline:

- Veronica Shoemaker/Winkler
- Shell station at Hancock and US 41
- BJ's Cape Coral
- 711 Burnt Store and Pine Island has DIESEL only
- Racetrac at South Pointe and College has 93 Only
- Walmart / Murphy's USA in Lehigh
- Santa Barbara and Veterans 7/11

These are the stations that are reported to be currently **out** of gasoline:

- Country Club and Veterans Circle K
- Del Prado Speedway
- Trafalgar and Skyline 7/11
- Rebel US 41 and Del Prado
- 76 at Chiquita and Pine Island
- Walmart/Murphy's Del Prado
- Walmart on Pine Island Road
- Pine Ridge and San Carlos 7/11
- Santa Barbara and Gleason 7/11
- Palm Tree and Cape Coral Pkwy 7/11
- Lee and Gunnery 7/11
- Del Prado Racetrac
- Terry St Circle K
- Lee and Alvin Racetrac
- Joel Citgo
- N Cleveland and Littleton 7/11

Below are the current updated tasks that IMT has been working on since that last updates:

- Logistics members have scheduled pre-storm deliveries for food and beverages - the arrival time is Tuesday morning.
- Logistics members have scheduled post-storm deliveries from vendors.
- Logistics members have scheduled water deliveries.
- Logistics members have created plans for replenishment of supplies for long-term activations.
- Logistics members have arranged for ice deliveries for the event power is lost.
- Purchasing members have made plans for the procurement of potable water.
- Purchasing and Logistics members have scheduled the delivery of portable bathrooms should they be needed.
- HQ will be the central location for cooking needs post-storm for employees at HQ/IMT, Forensics, MCU, Command Staff, Spec Ops, and Staging personnel.
- Precincts and Corrections facilities will be responsible for their meal preparations.

Subject: Tropical Storm Milton - Update #12

The 11:00 AM update shows a small track shift to the south. Although it is still predicted to directly hit the Tampa Bay Area, the move slightly south may bring higher wind speeds and higher storm surge. The storm is expected to quickly intensify and will likely be a major hurricane upon arrival.

All personnel are encouraged to complete preparations for their homes and their families today.

There is still a high degree of uncertainty in both the tracks and the wind speed upon arrival, so the possibility of a direct strike to our area remains. The cone of uncertainty currently covers most of the Florida peninsula. The Incident Management Team (IMT) will keep you informed, and is making preparations to include schedule planning.

Subject: Tropical Storm Milton - Update #8

The 8:00 AM update shows that Milton is forecast to become a Major Category 3 Hurricane before making landfall. Timing, tracks, and intensity are still unpredictable; however, the National Hurricane Center still shows the track toward the Tampa area.

The current forecast is as follows:

- There is a Flood Watch for the entire area through Thursday.
- Rainfall in the amount of 5" to 8", with localized totals up to 12".
- The timing of the impacts is from late Tuesday through early Thursday morning, but it is expected to make landfall on the West Coast on Wednesday.
- There is great uncertainty about where the storm will make landfall. The average Day 4 track error is around 150 miles, so we are still well within a possible landfall range.
- The current earliest wind time arrival is 4 PM on Tuesday, and the most likely arrival time is 2 AM on Wednesday.

Additional notifications for this update include:

- Personnel should maintain at least ½ tank at all times. Due to current fuel runs, please use any opportunity to make sure your agency vehicle stays full at all times.
- Personnel who must fuel and have no other options may use 89 or 93 Octane fuel.
- Select IMT members have been activated. Please send requests to IMT@sheriffleefl.org.
- The select CRU members who were notified individually will report at 10:00 AM to the Headquarters Training Room (1202).
- The asset movement members who were notified individually will report at 10:00 AM to the Headquarters Training Room (1202).
- All units, components, precincts, corrections facilities, and all affected agency departments should fill up all available gas cans and gas tanks.
- Pine Island Fire Department is out of sand. They still have sandbags. They expect to get more sand on Monday.

Subject: Tropical Storm Milton - Update #7

With the 5:00 PM update, Tropical Storm Milton is now expected to arrive as a major hurricane. The track has shifted some to the north; however, some model tracks still show direct hits our our area, and we are still in the cone of uncertainty. Please recall from prior storms that although we are not in the direct path, the effects of the hurricane will still affect us heavily, especially in the areas prone to storm surge. Additionally, the peak storm

AMERICAN OVERSIGHT

surge from Helene arrived almost 10 hours after the peak winds, so all personnel should be aware of and consider the effects before, during, and after the storm.

The below preparations remain in effect. The only change for this period is:

- Four (4) additional shallow water vessels have been obtained for water rescues.
- Additional High-Water Vehicles have been obtained and will be deployed to the islands for potential high-water rescues.
- The San Carlos Park Fire Department is out of sand and sandbags.

Subject: Tropical Storm Milton - Update #6

As of a 12:25 PM National Hurricane Center update, Tropical Storm Milton has formed. This storm is forecast to strengthen and bring the risk of life-threatening impacts to portions of the West Coast of Florida next week. The maximum winds are currently estimated at 40 mph with higher gusts. Models range in intensity from a Tropical Storm to a Major Hurricane, so there is tremendous unpredictability in the strength upon arrival.

At this time, the Incident Management Team is preparing for the possibility of a major hurricane affecting our area with impacts beginning on Tuesday and a full impact on Wednesday.

All agency personnel are encouraged to prepare as follows:

- All personnel should review their hurricane plans, and prepare their homes and families for the possibility of a hurricane impact in the middle of next week.
- All precincts should secure their mobile assets (decoy vehicles, arrow boards, trailers, ATVs, etc.) beginning on immediately to be completed by 2:00 PM on Monday.
- All trailers should be brought to storage beginning immediately to be completed by 2:00 PM on Monday.
- All personnel should use the remainder of this weekend to prepare for a possible activation. This plan should include three days worth of food, uniforms, and supplies.
- All personnel should use the remainder of this weekend to prepare their uniforms and equipment (including sufficient batteries for equipment) for a possible activation.
- All specialty units should begin bringing their assets back to their storage areas and secure locations. This should be completed by 2:00 PM on Monday.
- All precincts should secure any items that can be moved by the wind to a secure location starting immediately to be completed by 2:00 PM on Monday.
- All Corrections facilities (including Nan's Ranch) should prepare their facilities for a possible hurricane impact next week.

This is new information as of this update:

- The Waterborne Strike Team is on standby for deployment for water rescues.
- JetBlue Stadium, CenturyLink Stadium, the Lee County Gun Range, and the Andrea Lane and Sivan Road storage buildings are prepared to receive assets if needed.
- The Marine Unit is in contact with the IMT to secure the marine assets.
- Known sandbag locations are as follows:

AMERICAN OVERSIGHT

- Punta Gorda—Free sandbags will be available at 3130 Cooper St., the last entrance on the left by flag poles.
- Fort Myers Beach—Sand is located off of Gulf Beach Road, and bags are available at Town Hall, 2731 Oak St. (The location will provide service until 4:30 p.m. on Friday and begin Monday at 8:30 a.m.)
- Fort Myers— South Trail Fire & Rescue will have sand and sandbags available at station 63, 5531 Halifax Ave., Fort Myers—a maximum of 20 bags per household. UPDATE: South Trail Fire & Rescue is currently out of sand. Empty sandbags only are available.
- Naples— Sandbags will be available at three public park locations: Big Corkscrew Island Regional Park, 810 39th Ave., North Collier Regional Park, 15000 Livingston Road, in the Sun-N-Fun Lagoon parking lot, and at Donna Fiala Eagle Lakes Community Park, 11565 Tamiami Trail East, in the grassy area between the parking lots. The Naples sandbag locations will begin service at 8 a.m. through dusk on Saturday and Sunday.
- San Carlos Park—Sand and sandbags are available at San Carlos Park Fire District Station 54, located at 16900 Oriole Road. There is a limit of 10 bags per household. Bags can be picked up at the lobby. Bring your own shovel. Be prepared to fill and load your own sandbags. Make sure your vehicle can transport the weight of the sandbags.
- North Fort Myers—Sandbags will be located at North Fort Myers Parks and Recreation, 2000 N. Recreation Parkway. Sand will be located in the back of the park, next to the county mulch pile. Please bring your own shovel to fill the bags.
- Matlacha—Sandbags are available for pickup at Station 1, located at 5700 Pine Island Rd, Bokeelia, FL 33922

- IMT personnel are visiting the precincts, and the storage locations to inventory assets to prepare for both securement and post-storm deployment.
- No schedule changes are expected between now and Monday afternoon; however, all personnel should be prepared for schedule adjustments.
- The Agriculture assets are secured on the Olga site.

Subject: Important Update on a possible impending hurricane impacting our area (Update #5)

Team,

IMT has been working on preparation for a potential Hurricane impacting our area early next week. IMT will continue to send out updates regularly so please monitor your email closely. All agency units need to begin preparations of securing their assigned assets and communicate all movement to IMT. Also, update the major asset application on the intranet. We have secured Jet Blue Park as an asset staging area for Marine and other assets. Agency asset storage facilities to include the gun range are preparing to house assets as well. IMT is securing high water vehicles that will be pre-staged at strategic locations i.e., the barrier islands. IMT members will be in the RTIC today coordinating efforts. Agency extension 239-258-3150 is being setup to communicate to IMT staff. Additional updates to follow.

Be prepared and be safe!

Subject: New Caribbean Disturbance - Update #4

The National Hurricane Center 2:00 PM update shows the possibility of development as the low pressure area in the Gulf of Mexico moves slowly eastward or northeastward. A tropical or subtropical depression or storm could form during the early to middle part of next week if the low remains separate from a frontal boundary that is forecast to extend across the Gulf of Mexico. Regardless of development, locally heavy rains could occur over portions of the Florida Peninsula late this weekend into next week. As of this update, the formation chance in the next 48 hours is low at 10 %, and the formation chance through 7 days has increased to 50%.

Current model runs show an arrival time of any potential storm around Wednesday of next week. This represents a slower forward storm speed and later storm arrival than previous model runs, so the timing and impacts are still largely unknown. Regardless of any potential storm, significant rainfall is still expected, and the Incident Management Team will continue to monitor and update all personnel.

Subject: New Caribbean Disturbance - Update #3

The National Hurricane Center has reduced the chance of tropical cyclone development within seven days to 30%. While the system is likely to develop over the Gulf of Mexico late this weekend or early next week, subsequent tropical or subtropical development could be limited by the system's potential interaction with a frontal boundary. Regardless of development, locally heavy rains could occur over portions of the Florida Peninsula next week.

Sent: Tuesday, October 1, 2024 10:35 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance - Update #1

The area of disorganized showers remains at a 40% chance of development. The National Hurricane Center indicates that environmental conditions could support some gradual development of this system, and a tropical depression could form towards the end of this week or this weekend while it moves generally northwestward over the northwestern Caribbean Sea and into the Gulf of Mexico. As of this time, there are no changes, but some long range models show an increased chance of this disturbance affecting our area.

AMERICAN OVERSIGHT

From: IMT <IMT@sheriffleefl.org>
Sent: Monday, September 30, 2024 8:11 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance

The Incident Management Team is monitoring a new area of disorganized showers and thunderstorms over the western Caribbean Sea. The National Weather Center states that the system has a medium chance (40%) of developing towards the middle to latter part of the week as it moves northwestward into the Gulf of Mexico. As this disturbance moves into the gulf, increasing moisture is expected over the Florida Peninsula and elevated rain chances are anticipated from Friday through the weekend, and possibly into early next week.

Unfortunately, long range models show the possibility of direct impacts for Southwest Florida; however, It is too early to determine what, if any, tropical specific impacts can be expected.

The Incident Management Team will continue to monitor the storm, and will continue to provide updates through this very active part of the hurricane season.

1500 State Street Condo Resident Notification 10/7/2024

Dear 1500 State Street residents,

We are closely watching Hurricane Milton. If Sarasota moves into a Hurricane Warning, Red Property Management will then begin the process of securing the building. The elevator will be called up to a higher floor and it will be shut down. All common area doors will be locked. Owner entry Fobs will remain working as long as the building has power. If the building loses power, there is a battery backup for the building doors. If the battery backup runs out then the building doors will default to being unlocked, for resident safety. Individual units should be locked by residents.

As a reminder, all residents are required to remove all items from their balcony as noted in our governing documents.

C&S Property Management (*Condos*)

For afterhours emergencies, call 941-758-9454 and follow the prompts...Do not input an extension for the property Manager (Kasia) for afterhours emergencies. Below is the link our hurricane Plan on the C&S website.

Subject:	NewsNation LIVE w/Leeland Vittert
Location:	RTIC HQ
Start:	Mon 10/7/2024 7:30 PM
End:	Mon 10/7/2024 8:00 PM
Recurrence:	(none)
Meeting Status:	Accepted
Organizer:	Anita Iriarte
Required Attendees:	Christopher Fine; Todd Olmer; Sarah Rodriguez; Anita Iriarte; Christopher Lalor; Katie Walter; Autumn King; Jessie Santero; James Heuglin; Tara Thrower; John Holloway; Robert DeAngelo; Nestor Montoya; Herbert Ellis; Julie Martin; Carmine Marceno; Jonathan Taylor; Joshua Hanchey; Mark Shelly
Optional Attendees:	Kevin Ellis; Logan Ragen

Live with Leeland Vittert on NewsNation https://www.newsnationnow.com/author/leland-vittert/

In place at 730pm via Zoom. Hit time 740pm. Zoom link will be emailed.

TP's forthcoming. Rtic clear at 7pm.

Dear Capt. Iriarte,

As we cover the latest on the hurricane on NewsNation, our 7pm host Leland Vittert would love to offer **Sheriff Marceno** time to share with our viewers the latest on the storm and how Floridians can keep safe. The interview would be **LIVE tonight at 7:40pm ET** via zoom for 4-6 minutes. He has been on our program "On Balance" once before and hopefully remembers having an informative interview with Leland.

As you may know, NewsNation is the fastest growing cable news outlet in primetime, reaching nearly **70 million television households** across the United States, which means we broadcast to **92% of all cable TV homes**. Plus, each interview has the potential to run across **200 local news stations** within the Nexstar family, **including stations in Florida,** so our *potential reach* is incredibly powerful.

Let me know ASAP if you are interested in exploring this.

Sheriff to interview with CBS National- Nicole Valdez

Updated talking points-

CBS National/ NewsNation Hurricane Milton- Talking Points

Anticipated Questions (provided by CBS):

-Does LCSO force people from homes during mandatory evacuation? LCSO does not remove people from their homes. We have Deputies and sign boards at the entrance and exit of every barrier island letting residents know the evacuation orders sent be the EOC, and informing them of the dangers.

-If people do not evacuate, what concerns does Sheriff have for their safety? When winds reach 45 miles per hour, and flooding closes roadways, we will be unable to come and help you until after the storm. Residents need to leave now, and understand the dangers mother nature has with these unpredictable storms.

Updates from IMT (10/7 @1:30):

-The County has opened three shelters, more are planned.

-Message boards and deputies are located at each entrance and exit to barrier islands informing residents of the Counties evacuation orders, and informing them of dangers if staying.

-All Student Resource Officers (SROs) are assisting with preparing residents on the barrier islands, and assisting Patrol.

AMERICAN OVERSIGHT

-LCSO personnel and heavy equipment are loading four dump trucks to deliver sand for sandbags throughout the county at fire stations to assist county with more locations.
-Marine Unit has moved most of their boats farther inland. Last remaining boats are for heavy weather rescue and will remove when conditions worsen.

Hurricane Milton

-The Lee County Sheriff's Office Incident Management Team is actively monitoring Hurricane Milton and is FULLY activated.

-Milton is expected to continue intensify and will make landfall on the west coast of the Florida's peninsula.

-At this time, exact landfall is uncertain but Lee County is expected to experience storm impacts to include SURGE.

-Just as you would all prepare for a storm at home, LCSO has done the same. We have secured all mobile assets to include our Marine Unit vessels due to the anticipated impacts from Milton.

-LCSO is READY! Our Waterbourne Strike Team and Marine Unit, Special Ops are standing by should the need arise to rescue people.

-That being said, know your Evacuation Zone and be prepared to leave if your zone is called.

-Four (4) additional shallow water vessels have been obtained for water rescues.

-Additional High-Water Vehicles have been obtained and will be deployed to the islands for potential high-water rescues.

-We urge everyone to prepare for this storm! Prepare for the worst, but hope for the best!

AMERICAN OVERSIGHT

-We know what Mother Nature can do! She is unpredictable, which is why we urge everyone NOT to wait until the last minute to have everything that you need.

-Make sure you have necessary hurricane supplies: enough food, water, and medicine for several days.

-Have a hurricane plan with your family and be up to date with it. Topics should include an evacuation plan, sheltering in place, pets, miscellaneous family needs.

-Milton is now a MAJOR HURRICANE

-LCSO administrative services at precinct offices will be halted unit after the storm so we can focus on preparation and possible recovery efforts.

-Once we get sustained winds of 45 MPH, emergency response is stopped until it's safe to respond to calls.

-It could take several hours or more for the winds to subside before a deputy is able to respond, once the impacts begin. SHELTER IN PLACE.

-Don't try to drive anywhere in inclement conditions as the roadways are not safe.

-Do NOT go outside during the storm as wind and standing water create hazard that can be fatal.

-Remember the three phases of the storm: BEFORE, DURING, and AFTER. Have your plan for all three.

-Continue to monitor your local media for weather updates, as well as the Lee County Sheriff's Office and Lee County Government on social media for the latest updates.

-WE ARE SWFL STRONG and are IN THIS TOGETHER

Good afternoon,

Due to the anticipated impact of Hurricane Milton later this week, the Captiva Erosion Prevention District (CEPD) has decided **to postpone the hybrid Captiva Bayside Adaptation Plan Public Outreach Meeting** that was scheduled for this Thursday, October 10th.

The meeting is being rescheduled for November and we will confirm the new date as soon as it is finalized.

Thank you for your understanding, and we will keep you informed with any updates.

In the meantime, please stay safe as the storm approaches.

Thank you,

LEE COUNTY
ECONOMIC DEVELOPMENT
SOUTHWEST FLORIDA

ACTION ALERT

Lee County Government Update on Hurricane Milton

Milton is a Category 5 hurricane as of 11:55 a.m. today, Oct. 7. Mandatory evacuation orders have been issued for Zones A and B. To find what evacuation zone you are located in, visit https://www.leegov.com/publicsafety/emergencymanagement/knowyourzone.

AMERICAN OVERSIGHT

Fort Myers, FL, Oct. 7, 2024 – Lee County Government's noon update on Hurricane Milton is available for viewing on the county's YouTube channel, https://www.youtube.com/@LeeCountyFLBOCC. You can view it by clicking here. Please see the following highlights from the briefing:

- Three shelters will be open to the public as of 3 p.m.:
    - Island Coast High School - 2125 DeNavarra Pkwy, Cape Coral
    - Estero Recreation Center - 9200 Corkscrew Palms Blvd, Estero
    - Dunbar High School - 30 Edison Ave, Fort Myers
        - Additional shelter openings will be announced tomorrow, Oct. 8.

- Lee County offices will close at noon today, Oct. 7 and will remain closed through Thurs., Oct. 10.

- Important information for the Town of Fort Myers Beach:
    - A mandatory evacuation has been issued for the entire Town of Fort Myers Beach. Residents and business owners are are encouraged to be evacuated by today, Monday, Oct. 7 by 3 p.m.
    - Lee County Utilities will shut off water to Fort Myers Beach at noon Wednesday, Oct. 9. This is a precautionary measure to protect the infrastructure.
    - LeeTran will stop running routes onto Fort Nyers Beach at noon today, Monday, Oct. 7.All LeeTran services will convert to off-island transit only.

- The county asks residents to take time today to:

AMERICAN OVERSIGHT

- Revisit your family emergency plan.
- Know where you will go if you plan to leave.
- Check your emergency supply kit.
- Secure objects around your home.
- Be where you plan to be for the storm by Tuesday evening, Oct. 8.
- Monitor local meteorologists' reports.
- Sign up for AlertLee.
- Monitor www.leegov.com/storm and Lee County social media channels.
- Call the United Way's Emergency Information Hotline with questions. Dial 2-1-1 or 239-433-3900.

We hope you and your families stay safe, and please visit www.leegov.com/storm for updates.

Sincerely,

AMERICAN OVERSIGHT

Looking your best on zoom ***(*Reminders for even the most seasoned of guests!*)*****:**
- Ensure you have strong internet connection. *NOT in a car.
- The background shouldn't be too distracting. Ideally the interview would be done in an office or living room setting.
- Make sure the device you use to film the interview (phone, laptop, etc) is stabilized and raised to be eye level.
- What to wear: Business attire encouraged / dress for the context of the interview or as it relates to your expertise. If you are wearing glasses make sure there is no glare.

Where to watch:
- Find your NewsNation channel here: https://www.newsnationnow.com/channel-finder/
- Upon request, I can send a link to the segment after the show.
- You can also keep up with "The Balance" guests on X! https://twitter.com/OnBalanceGuests
- NewsNation reaches nearly 70 million television households across the US. NewsNation is available on every major cable and satellite providers, streaming platforms including YouTubeTV, Hulu, DirecTV Stream, FuboTV and Sling, online at www.newsnationnow.com, and on the NewsNationNow app.

Dear Capt. Iriarte,

As we cover the latest on the hurricane on NewsNation, our 7pm host Leland Vittert would love to offer **Sheriff Marceno** time to share with our viewers the latest on the storm and how Floridians can keep safe. The interview would be **LIVE tonight at 7:40pm ET** via zoom for 4-6 minutes. He has been on our program "On Balance" once before and hopefully remembers having an informative interview with Leland.

As you may know, NewsNation is the fastest growing cable news outlet in primetime, reaching nearly **70 million television households** across the United States, which means we broadcast to **92% of all cable TV homes**. Plus, each interview has the potential to run across **200 local news stations** within the Nexstar family, **including stations in Florida,** so our *potential reach* is incredibly powerful.

Let me know ASAP if you are interested in exploring this.

Sheriff to interview with CBS National- Nicole Valdez

Updated talking points-

CBS National/ NewsNation Hurricane Milton- Talking Points

Anticipated Questions (provided by CBS):

-Does LCSO force people from homes during mandatory evacuation? LCSO does not remove people from their homes. We have Deputies and sign boards at the entrance and exit of every barrier island letting residents know the evacuation orders sent be the EOC, and informing them of the dangers.

-If people do not evacuate, what concerns does Sheriff have for their safety? When winds reach 45 miles per hour, and flooding closes roadways, we will be unable to come and help you until after the storm. Residents need to leave now, and understand the dangers mother nature has with these unpredictable storms.

Updates from IMT (10/7 @1:30):

-The County has opened three shelters, more are planned.

-Message boards and deputies are located at each entrance and exit to barrier islands informing residents of the Counties evacuation orders, and informing them of dangers if staying.

-All Student Resource Officers (SROs) are assisting with preparing residents on the barrier islands, and assisting Patrol.

AMERICAL OVERSIGHT

-LCSO personnel and heavy equipment are loading four dump trucks to deliver sand for sandbags throughout the county at fire stations to assist county with more locations.
-Marine Unit has moved most of their boats farther inland. Last remaining boats are for heavy weather rescue and will remove when conditions worsen.

Hurricane Milton

-The Lee County Sheriff's Office Incident Management Team is actively monitoring Hurricane Milton and is FULLY activated.

-Milton is expected to continue intensify and will make landfall on the west coast of the Florida's peninsula.

-At this time, exact landfall is uncertain but Lee County is expected to experience storm impacts to include SURGE.

-Just as you would all prepare for a storm at home, LCSO has done the same. We have secured all mobile assets to include our Marine Unit vessels due to the anticipated impacts from Milton.

-LCSO is READY! Our Waterbourne Strike Team and Marine Unit, Special Ops are standing by should the need arise to rescue people.

-That being said, know your Evacuation Zone and be prepared to leave if your zone is called.

-Four (4) additional shallow water vessels have been obtained for water rescues.

-Additional High-Water Vehicles have been obtained and will be deployed to the islands for potential high-water rescues.

-We urge everyone to prepare for this storm! Prepare for the worst, but hope for the best!

AMERICAN OVERSIGHT

-We know what Mother Nature can do! She is unpredictable, which is why we urge everyone NOT to wait until the last minute to have everything that you need.

-Make sure you have necessary hurricane supplies: enough food, water, and medicine for several days.

-Have a hurricane plan with your family and be up to date with it. Topics should include an evacuation plan, sheltering in place, pets, miscellaneous family needs.

-Milton is now a MAJOR HURRICANE

-LCSO administrative services at precinct offices will be halted unit after the storm so we can focus on preparation and possible recovery efforts.

-Once we get sustained winds of 45 MPH, emergency response is stopped until it's safe to respond to calls.

-It could take several hours or more for the winds to subside before a deputy is able to respond, once the impacts begin. SHELTER IN PLACE.

-Don't try to drive anywhere in inclement conditions as the roadways are not safe.

-Do NOT go outside during the storm as wind and standing water create hazard that can be fatal.

-Remember the three phases of the storm: BEFORE, DURING, and AFTER. Have your plan for all three.

-Continue to monitor your local media for weather updates, as well as the Lee County Sheriff's Office and Lee County Government on social media for the latest updates.

-WE ARE SWFL STRONG and are IN THIS TOGETHER

The National Weather Service has issued a Hurricane Watch for the City of Bonita Springs

AMERICAN OVERSIGHT

The National Weather Service has issued a Hurricane Watch for the City of Bonita Springs. The City issued a State of Local Emergency over the weekend. The National Weather Service is anticipating that we will receive hurricane force winds and storm surge in our area from five-ten feet. The Lee County Emergency Operations Center has issued mandatory evacuations for Zone A and Zone B. Please visit the Lee County Emergency Operations webpage to find your evacuation zone. Lee County has announced evacuation orders and shelter openings, as well as LeeTran service to those shelters.

SHELTERS:
As of 3 p.m. today, Monday, 10/7, three shelters will be open to the public.

- Island Coast High School - 2125 DeNavarra Pkwy, Cape Coral
- Estero Recreation Center - 9200 Corkscrew Palms Blvd, Estero
- Dunbar High School - 30 Edison Ave, Fort Myers

Residents can view the announcements on local media as well as on the county's Facebook page. The city will also be sharing the information to all city media channels.

We urge all residents to finalize preparedness plans. Please secure all building materials onsite. Please continue to monitor local news stations for updates on the storm. City staff has been clearing storm drains and securing facilities in preparation of Hurricane Milton. Debris pickup will continue today and tomorrow morning. Solid Waste will continue normal operations today.

Normal city operations ceased today at noon. City emergency preparedness personnel will continue to work pre, during and post storm. City communications for hurricane preparedness updates and city-specific news will continue for the duration of the storm. Residents can stay up to date with City information on the City's Facebook page and website City of Bonita Springs

The city encourages residents living near the Imperial River and canals, to continue to monitor water levels. Please continue to be vigilant as sheet flow may impact water

AMERICAN OVERSIGHT

levels of rivers and canals. The level of the Imperial River is currently at 10.31ft. City staff will be going door to door this afternoon to notify residents along the Imperial River to be aware of evacuation orders and to continue to monitor water levels.

Bonita Springs Community Development asks that any Bonita Springs residents with water intrusion in their homes post-storm send an email to floodinfo@cityofbonitaspringscd.orgor call 239-444-6150 for assistance with permit requirements and resources.

In the event of heavy rain, it will take time for the infrastructure to drain. Please use caution and don't drive through flooded roads.

Residents can also call the United Way's Emergency Information Hotline with questions. Dial 2-1-1 or 239-433-3900.

Please be safe and continue to monitor local news stations for updates about Hurricane Milton.

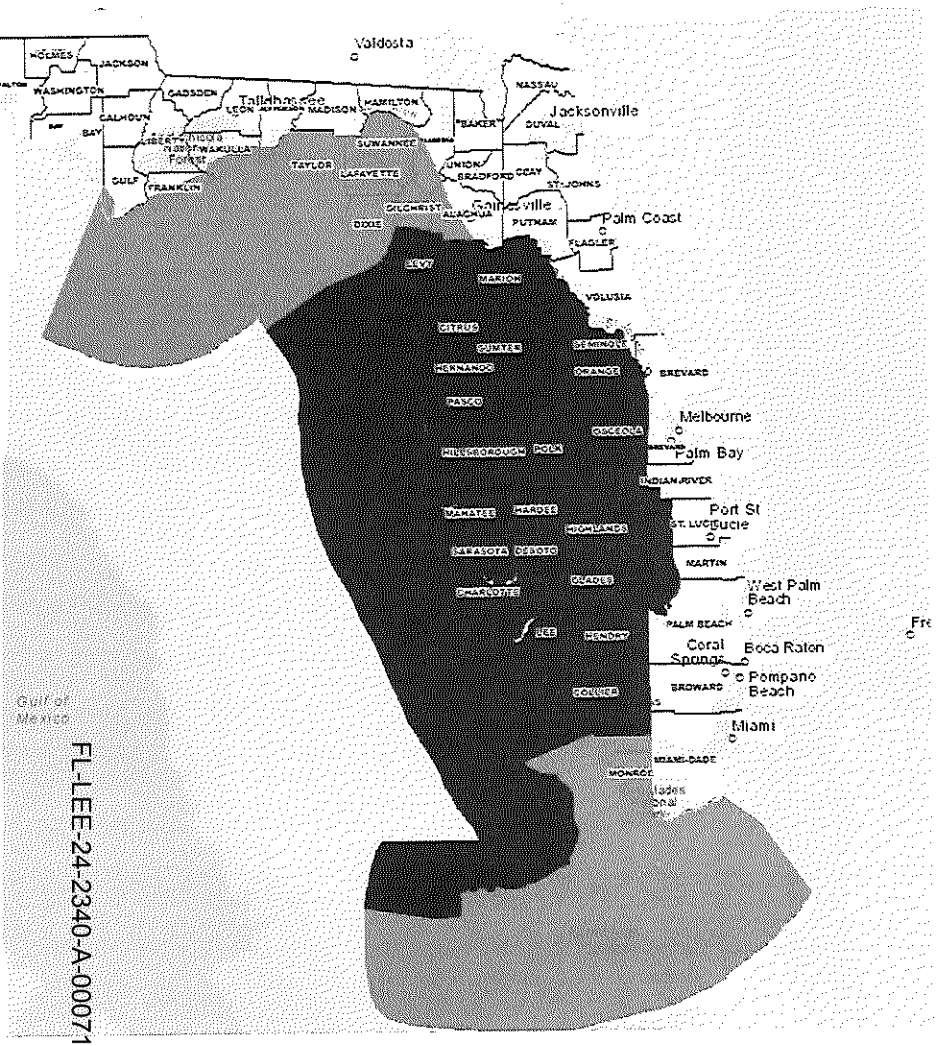
Forecast Computer Models – Next 5 Days

Major Hurricane Milton

Computer model guidance continues to come into better agreement regarding Milton; ho still a few discrepancies. A new upper-level disturbance is forecast to dip into the nort Mexico which will allow for Milton to move east-northeastward to northeastward at a faste With this, the official NHC track has shifted just slightly northward and this forecast rem consensus of the computer model guidance. There remains significant disagreements a and timing of landfall as the forward speed and amount of latitude the system is able to g dependent on the placement of a frontal boundary dropping southward into Florida and the



Milton remains within favorable oceanic and atmospheric conditions. By tomorrow, M changes will be dictated by any eyewall replacement cycles the system undergoes. While Milton to gradually weaken, it will allow for the system to grow larger. After 36 hours, Milt interact with a much less favorable environment with stronger upper-level winds and dry system. Therefore, some weakening is anticipated before Milton reaches the Florida West computer forecast models show Milton being a large and powerful hurricane at la threatening hazards extending inland and beyond the center of the storm. After landfa weaken and start to transition to an extratropical cyclone by 96 hours.

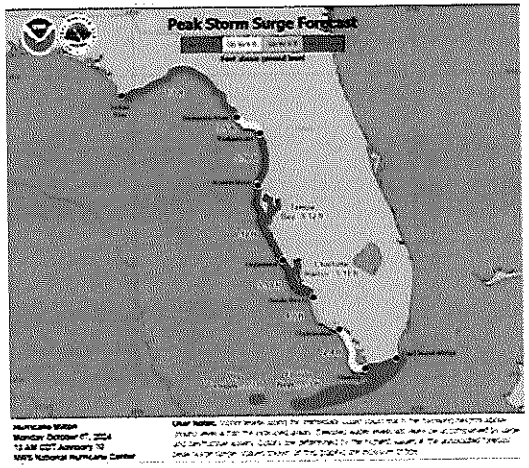
Key Messages
From the National Hurricane Center (NHC)



Key Messages for Hurricane Milton
Advisory 10: 10:00 AM CDT Mon Oct 07, 2024

1. Damaging hurricane-force winds are expected across portions of the northern coast of the Yucatan Peninsula. A life-threatening storm surge with damaging waves is also likely along portions of the northern coast of the Yucatan Peninsula.

2. There is an increasing risk of life-threatening storm surge and damaging winds for portions of the west coast of the Florida Peninsula beginning Tuesday night or early Wednesday. Storm Surge and Hurricane Watches are now in effect for portions of the west coast of the Florida Peninsula and residents in that area should follow any advice given by local officials and evacuate if told to do so.

3. Areas of heavy rainfall will impact portions of Florida today well ahead of Milton, with heavy rainfall more directly related to the system expected later on Tuesday through Wednesday night. This rainfall will bring the risk of considerable flash, urban, and areal flooding, along with the potential for moderate to major river flooding.

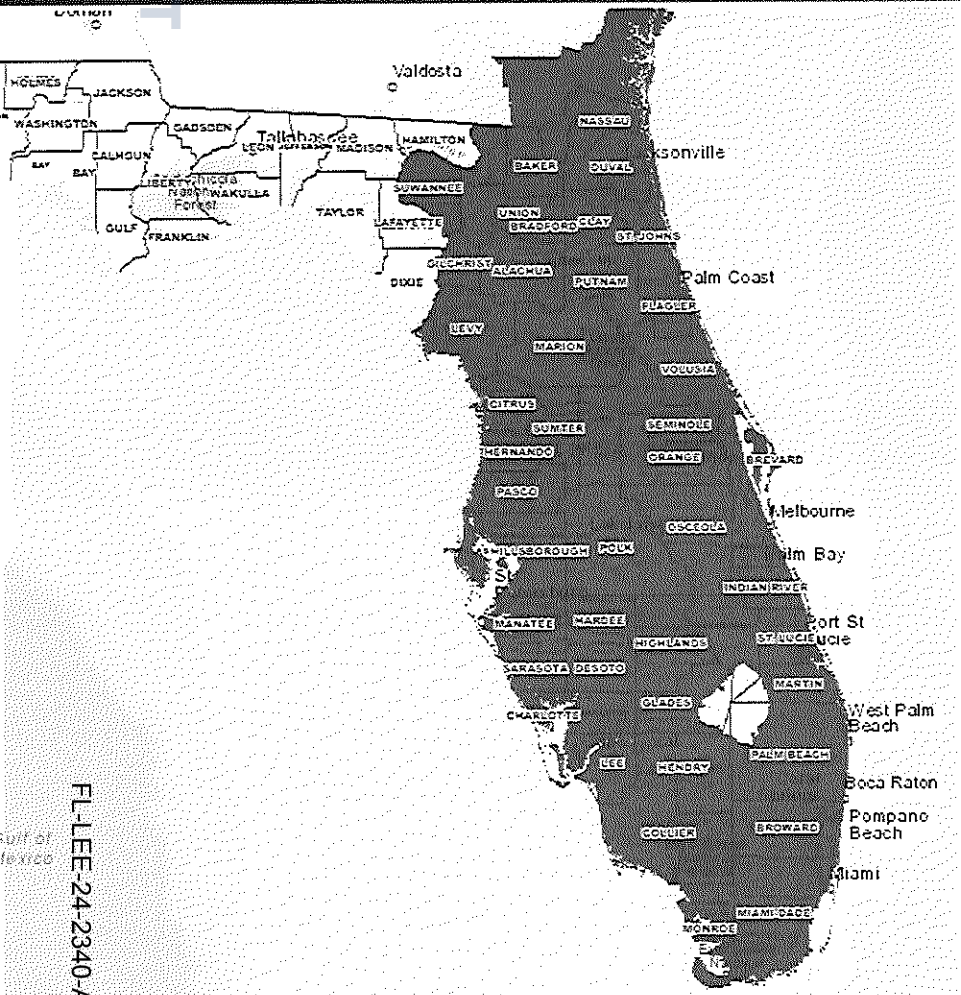
Flash Flood Outlooks – Next 5 Days

From the Weather Prediction Center (WPC)



vy rainfall can be expected to continue today and into Tuesday ahead of the outer bands of Milton, and the Weather Prediction Center (WPC) **(level 3 of 4) for Flash Flooding** across the Southeast Metro, including the southern I-95 corridor, with a Slight Risk (level 2 of 4) extending gh Southwest Florida and a **Marginal Risk (level 1 of 4)** from Northeast Florida through the I-4 corridor Monday. A Slight Risk (level 2 of 4 of the Peninsula and towards Northeast Florida on Tuesday with a **Marginal Risk (level 1 of 4)** extending into southern portions of the Su s along the West Coast experienced flooding (both tidal and rainfall) due to Major Hurricane Helene, and any coastal or low-lying areas will rema s of rainfall. Heavy rainfall rates will also be a concern over already saturated and vulnerable soils; ponding water and instances of flooding v ghout the urban and poor drainage/low-lying areas in the Florida Peninsula. There remains uncertainty as to where the heaviest rainfall will fall as es and crosses the Florida Peninsula around mid-week. The Weather Prediction Center (WPC) is outlooking a **Moderate Risk (level 3 of 4) for F** North and Central Florida, including the entire I-4 corridor, Wednesday with a Slight Risk (level 2 of 4) extending into portions of the Big o Southwest Florida. Additional **Flood Watches** will likely be issued as details become clearer.

Summary

FOUO – For Government Official

lton:

e Hurricane Hunter aircraft data indicated Milton has strengthened into a category 5 hurricane with maximum sustained winds of 160 mph with higher gusts.
about 715 miles southwest of Tampa, Florida and moving east-southeastward at 9 mph.
ast-southeastward motion is forecast through tonight, followed by a turn toward the east and northeast on Tuesday and Wednesday.
rack, Milton is forecast to move near or just north of the Yucatan Peninsula today and Tuesday, then cross the eastern Gulf of Mexico and approach the west coast of the F

to become a category 5 hurricane alter today and become a large hurricane over the eastern Gulf of Mexico.
asing risk of life-threatening storm surge and damaging winds for portions of the western Florida Peninsula beginning late Tuesday night to early Wednesday and expanding e

ventual track and timeline can be expected, it is important not to focus on single model runs or solutions!

one Kirk:

EDT, Hurricane Kirk is located about 655 miles west-northwest of the Azores and moving northeastward at 29 mph.
ast-northeastward motion is expected during the next couple of days.
ned winds have decreased to near 75 mph with higher gusts.
weakening is expected, Kirk is forecast to remain a large and strong extratropical low during the next couple of days.
ect threat to Florida.

EDT, Hurricane Leslie is located about 1120 west of the southernmost Cabo Verde Islands and moving northwestward at 13 mph.
ion is expected to continue over the next few days followed by a turn toward the north-northwest on Friday.
ned winds are near 85 mph with higher gusts.
ng is forecast through the week, and Leslie is expected to weaken to a tropical storm in a day or so.

al Atlantic:

s expected to move off the west coast of Africa in a few days.
nmental conditions appear marginally favorable for some slow development of this system while it moves westward or west-northwestward across the eastern tropical Atlantic.
pected to move near or over the Cabo Verde Islands on Thursday and Friday, and interests there should monitor.
ricane Center (NHC) is outlooking a low (near 0%) chance for development through the next 48 hours and a low (30%) chance through the next 7 days.
es no direct threat to Florida over the next 7-10 days at least.
n the list is Nadine (*nay-DEEN).*

AMERICAN OVERSIGHT
EE-21-21-33004-000729

ng packet will be issued on Monday evening. For the latest information, please visit the National Hurricane Center website.

AMERICAN OVERSIGHT

Summary

s have been issued for the following counties: *Levy, Marion, Citrus, Sumter, Lake, Seminole, Orange, Hernando, Pasco, Polk, Orange, Osceola, Hillsborough, Pinellas, Manatee es, DeSoto, Sarasota, Charlotte, Lee, Hendry, Collier, Dry Tortugas*

atches have been issued for the following counties: *Coastal Franklin, Coastal Wakulla, Coastal Jefferson, Taylor, Suwannee, Lafayette, western Columbia, Gilchrist, Dixie, western Ala*

f life-threatening storm surge along portions of the West Coast of Florida.

rge Warnings have been issued from Flamingo (Mainland Monroe County) northward to the Suwannee River (Dixie/Levy County Line), including Charlotte Harbor and Tampa Bay.

storm surge is forecast from the Anclote River (Pasco/Pinellas County line) southward to Englewood (Sarasota/Charlotte County line), including Tampa Bay.

storm surge is forecast from Yankeetown (Levy/Citrus County) southward to the Anclote River and from Englewood southward to Bonita Beach (Lee/Collier County line), including C

rm surge is anticipated from Bonita Beach southward to Chokoloskee (Collier/Monroe County line).

rm surge is anticipated from the Suwannee River (Dixie/Levy County Line) southward to Yankeetown and from Chokoloskee southward to Flamingo (Mainland Monroe County)

es will be dependent on the future path of Milton, and updates to the forecast can be expected.

nfall will impact portions of Florida today and Tuesday, well ahead of Milton, with rainfall more directly tied to Milton expected late Tuesday and Wednesday.

ad rainfall totals near 5-10" with **locally higher totals in excess of 10-15"** are possible across portions of the Peninsula.

otals heavily tied to the eventual track and forward speed of the system. With computer model guidance uncertainty regarding the exact track, there remains uncertainty as to where the ted.

ad heavy rainfall can be expected to continue today and into Tuesday ahead of the outer bands of Milton, and the Weather Prediction Center (WPC) is outlooking a **Moderate Risk (le** across the Southeast Metro, including the southern I-95 corridor, with a **Slight Risk (level 2 of 4)** extending from the Space Coast and through Southwest Florida and a **Marginal Ris** t Florida through the I-4 corridor Monday.

Risk (level 2 of 4) is maintained throughout most of the Peninsula and towards Northeast Florida on Tuesday with a **Marginal Risk (level 1 of 4)** extending into southern portions of th ther Prediction Center (WPC) is outlooking a **Moderate Risk (level 3 of 4) for Flash Flooding** across much of North and Central Florida, including the entire I-4 corridor, Wednesday v **f 4)** extending into portions of the Big Bend to Lake Okeechobee into Southwest Florida.

Watches are in effect across much of the Peninsula as **flash, urban, and areal flooding** will be possible. Additional **Flood Watches** may be issued further northward as warranted.

eams, and waterways across North and Central Florida are already running above normal for this time of year due to widespread heavy rainfall from Hurricane Debby. **River Flood Wa** ns of the Withlacoochee, Aucilla, St. Johns, and several West-Central Florida rivers, creeks, and waterways for ongoing **minor flooding**.

infall is anticipated this week, likely leading to water level rises in the Florida Peninsula. Computer models are currently suggesting there is potential for widespread **minor to moderate** ntral Florida waterways, with instances of **major flooding** possible near the maximum rainfall totals.

ng onshore may bring **isolated tropical tornadoes** along the Florida West Coast late Tuesday into early Wednesday morning **(Marginal Risk for Severe Weather – level 1 of 5)** and hout the day Wednesday **(Marginal to Slight Risk for Severe Weather – level 1-2 of 5).**

Watches and Warnings will be issued as conditions warrant.

asing risk of life-threatening impacts for portions of the west coast of Florida Peninsula beginning late Tuesday or Wednesday; *however, the extent and locations of these impacts remai the eventual track and forward speed of the system.*

Katie Walter

Subject:	Sheriff Interview with CBS Nation
Location:	Outside HQ- Purchasing Loading Dock
Start:	Mon 10/7/2024 2:00 PM
End:	Mon 10/7/2024 2:30 PM
Show Time As:	Tentative
Recurrence:	(none)
Meeting Status:	Not yet responded
Organizer:	Todd Olmer
Required Attendees:	Carmine Marceno; John Holloway; Christopher Lalor; James Heuglin; Anita Iriarte; Christopher Fine; Sarah Rodriguez; Nestor Montoya; Jessie Santero; Julie Martin; Autumn King; Herbert Ellis; Katie Walter

Sheriff to interview with CBS National- Nicole Valdez

Updated talking points-

CBS National/ NewsNation Hurricane Milton- Talking Points

Anticipated Questions (provided by CBS):

-Does LCSO force people from homes during mandatory evacuation? LCSO does not remove people from their homes. We have Deputies and sign boards at the entrance and exit of every barrier island letting residents know the evacuation orders sent be the EOC, and informing them of the dangers.

-If people do not evacuate, what concerns does Sheriff have for their safety? When winds reach 45 miles per hour, and flooding closes roadways, we will be unable to come and help you until after the storm. Residents need to leave now, and understand the dangers mother nature has with these unpredictable storms.

Updates from IMT (10/7 @1:30):

-The County has opened three shelters, more are planned.

-Message boards and deputies are located at each entrance and exit to barrier islands informing residents of the Counties evacuation orders, and informing them of dangers if staying.

-All Student Resource Officers (SROs) are assisting with preparing residents on the barrier islands, and assisting Patrol.

AMERICAN OVERSIGHT

-LCSO personnel and heavy equipment are loading four dump trucks to deliver sand for sandbags throughout the county at fire stations to assist county with more locations.
-Marine Unit has moved most of their boats farther inland. Last remaining boats are for heavy weather rescue and will remove when conditions worsen.

Hurricane Milton

-The Lee County Sheriff's Office Incident Management Team is actively monitoring Hurricane Milton and is FULLY activated.

-Milton is expected to continue intensify and will make landfall on the west coast of the Florida's peninsula.

-At this time, exact landfall is uncertain but Lee County is expected to experience storm impacts to include SURGE.

-Just as you would all prepare for a storm at home, LCSO has done the same. We have secured all mobile assets to include our Marine Unit vessels due to the anticipated impacts from Milton.

-LCSO is READY! Our Waterbourne Strike Team and Marine Unit, Special Ops are standing by should the need arise to rescue people.

-That being said, know your Evacuation Zone and be prepared to leave if your zone is called.

-Four (4) additional shallow water vessels have been obtained for water rescues.

-Additional High-Water Vehicles have been obtained and will be deployed to the islands for potential high-water rescues.

-We urge everyone to prepare for this storm! Prepare for the worst, but hope for the best!

AMERICAN OVERSIGHT

-We know what Mother Nature can do! She is unpredictable, which is why we urge everyone NOT to wait until the last minute to have everything that you need.

-Make sure you have necessary hurricane supplies: enough food, water, and medicine for several days.

-Have a hurricane plan with your family and be up to date with it. Topics should include an evacuation plan, sheltering in place, pets, miscellaneous family needs.

-Milton is now a MAJOR HURRICANE

-LCSO administrative services at precinct offices will be halted unit after the storm so we can focus on preparation and possible recovery efforts.

-Once we get sustained winds of 45 MPH, emergency response is stopped until it's safe to respond to calls.

-It could take several hours or more for the winds to subside before a deputy is able to respond, once the impacts begin. SHELTER IN PLACE.

-Don't try to drive anywhere in inclement conditions as the roadways are not safe.

-Do NOT go outside during the storm as wind and standing water create hazard that can be fatal.

-Remember the three phases of the storm: BEFORE, DURING, and AFTER. Have your plan for all three.

-Continue to monitor your local media for weather updates, as well as the Lee County Sheriff's Office and Lee County Government on social media for the latest updates.

-WE ARE SWFL STRONG and are IN THIS TOGETHER

AMERICAN OVERSIGHT

Looking your best on zoom ***(*Reminders for even the most seasoned of guests!*)*****:**
- Ensure you have strong internet connection. *NOT in a car.
- The background shouldn't be too distracting. Ideally the interview would be done in an office or living room setting.
- Make sure the device you use to film the interview (phone, laptop, etc) is stabilized and raised to be eye level.
- What to wear: Business attire encouraged / dress for the context of the interview or as it relates to your expertise. If you are wearing glasses make sure there is no glare.

Where to watch:
- Find your NewsNation channel here: https://www.newsnationnow.com/channel-finder/
- Upon request, I can send a link to the segment after the show.
- You can also keep up with "The Balance" guests on X! https://twitter.com/OnBalanceGuests
- NewsNation reaches nearly 70 million television households across the US. NewsNation is available on every major cable and satellite providers, streaming platforms including YouTubeTV, Hulu, DirecTV Stream, FuboTV and Sling, online at www.newsnationnow.com, and on the NewsNationNow app.

Dear Capt. Iriarte,

As we cover the latest on the hurricane on NewsNation, our 7pm host Leland Vittert would love to offer **Sheriff Marceno** time to share with our viewers the latest on the storm and how Floridians can keep safe. The interview would be **LIVE tonight at 7:40pm ET** via zoom for 4-6 minutes. He has been on our program "On Balance" once before and hopefully remembers having an informative interview with Leland.

As you may know, NewsNation is the fastest growing cable news outlet in primetime, reaching nearly **70 million television households** across the United States, which means we broadcast to **92% of all cable TV homes**. Plus, each interview has the potential to run across **200 local news stations** within the Nexstar family, **including stations in Florida,** so our *potential reach* is incredibly powerful.

Let me know ASAP if you are interested in exploring this.

-We urge everyone to prepare for this storm! Prepare for the worst, but hope for the best!

AMERICAN OVERSIGHT

-We know what Mother Nature can do! She is unpredictable, which is why we urge everyone NOT to wait until the last minute to have everything that you need.

-Make sure you have necessary hurricane supplies: enough food, water, and medicine for several days.

-Have a hurricane plan with your family and be up to date with it. Topics should include an evacuation plan, sheltering in place, pets, miscellaneous family needs.

-Milton is now a MAJOR HURRICANE

-LCSO administrative services at precinct offices will be halted unit after the storm so we can focus on preparation and possible recovery efforts.

-Once we get sustained winds of 45 MPH, emergency response is stopped until it's safe to respond to calls.

-It could take several hours or more for the winds to subside before a deputy is able to respond, once the impacts begin. SHELTER IN PLACE.

-Don't try to drive anywhere in inclement conditions as the roadways are not safe.

-Do NOT go outside during the storm as wind and standing water create hazard that can be fatal.

-Remember the three phases of the storm: BEFORE, DURING, and AFTER. Have your plan for all three.

AMERICAN OVERSIGHT

-Continue to monitor your local media for weather updates, as well as the Lee County Sheriff's Office and Lee County Government on social media for the latest updates.

-WE ARE SWFL STRONG and are IN THIS TOGETHER

AMERICAN OVERSIGHT

Looking your best on zoom ***(*Reminders for even the most seasoned of guests!*)*****:**
- Ensure you have strong internet connection. *NOT in a car.
- The background shouldn't be too distracting. Ideally the interview would be done in an office or living room setting.
- Make sure the device you use to film the interview (phone, laptop, etc) is stabilized and raised to be eye level.
- What to wear: Business attire encouraged / dress for the context of the interview or as it relates to your expertise. If you are wearing glasses make sure there is no glare.

Where to watch:
- Find your NewsNation channel here: https://www.newsnationnow.com/channel-finder/
- Upon request, I can send a link to the segment after the show.
- You can also keep up with "The Balance" guests on X! https://twitter.com/OnBalanceGuests
- NewsNation reaches nearly 70 million television households across the US. NewsNation is available on every major cable and satellite providers, streaming platforms including YouTubeTV, Hulu, DirecTV Stream, FuboTV and Sling, online at www.newsnationnow.com, and on the NewsNationNow app.

Dear Capt. Iriarte,

As we cover the latest on the hurricane on NewsNation, our 7pm host Leland Vittert would love to offer **Sheriff Marceno** time to share with our viewers the latest on the storm and how Floridians can keep safe. The interview would be **LIVE tonight at 7:40pm ET** via zoom for 4-6 minutes. He has been on our program "On Balance" once before and hopefully remembers having an informative interview with Leland.

As you may know, NewsNation is the fastest growing cable news outlet in primetime, reaching nearly **70 million television households** across the United States, which means we broadcast to **92% of all cable TV homes**. Plus, each interview has the potential to run across **200 local news stations** within the Nexstar family, **including stations in Florida,** so our *potential reach* is incredibly powerful.

Let me know ASAP if you are interested in exploring this.

AMERICAN OVERSIGHT

FL-LEE-24-2340-A-000747

CBS National/ NewsNation Hurricane Milton- Talking Points

Anticipated Questions (provided by CBS):

-Does LCSO force people from homes during mandatory evacuation? LCSO does not remove people from their homes. We have Deputies and sign boards at the entrance and exit of every barrier island letting residents know the evacuation orders sent be the EOC, and informing them of the dangers.

-If people do not evacuate, what concerns does Sheriff have for their safety? When winds reach 45 miles per hour, and flooding closes roadways, we will be unable to come and help you until after the storm. Residents need to leave now, and understand the dangers mother nature has with these unpredictable storms.

Updates from IMT (10/7 @1:30):

-The County has opened three shelters, more are planned.

-Message boards and deputies are located at each entrance and exit to barrier islands informing residents of the Counties evacuation orders, and informing them of dangers if staying.

-All Student Resource Officers (SROs) are assisting with preparing residents on the barrier islands, and assisting Patrol.

-LCSO personnel and heavy equipment are loading four dump trucks to deliver sand for sandbags throughout the county at fire stations to assist county with more locations.

-Marine Unit has moved most of their boats farther inland. Last remaining boats are for heavy weather rescue and will remove when conditions worsen.

AMERICAN OVERSIGHT

Hurricane Milton

-The Lee County Sheriff's Office Incident Management Team is actively monitoring Hurricane Milton and is FULLY activated.

-Milton is expected to continue intensify and will make landfall on the west coast of the Florida's peninsula.

-At this time, exact landfall is uncertain but Lee County is expected to experience storm impacts to include SURGE.

-Just as you would all prepare for a storm at home, LCSO has done the same. We have secured all mobile assets to include our Marine Unit vessels due to the anticipated impacts from Milton.

-LCSO is READY! Our Waterbourne Strike Team and Marine Unit, Special Ops are standing by should the need arise to rescue people.

-That being said, know your Evacuation Zone and be prepared to leave if your zone is called.

-Four (4) additional shallow water vessels have been obtained for water rescues.

-Additional High-Water Vehicles have been obtained and will be deployed to the islands for potential high-water rescues.

-We urge everyone to prepare for this storm! Prepare for the worst, but hope for the best!

AMERICAN OVERSIGHT

-We know what Mother Nature can do! She is unpredictable, which is why we urge everyone NOT to wait until the last minute to have everything that you need.

Hurricane Milton Update: Prepare Now for SWFL Impact

Hurricane Threat:
• Category 5 Hurricane Milton is approaching the Florida Gulf Coast. While the landfall location has not been determined and tracks continue to waiver, SWFL is still in the cone.
• SWFL will experience storm surge, heavy rain, damaging winds, and potential flooding (including inland areas).

What You Need to Do:
• Complete your hurricane preparations: restock supplies and secure outdoor items (furniture, plants, etc.).
• Stay informed: follow local weather/news and sign up for government alerts.
• Evacuation Orders: Follow local guidance for evacuation zones. Don't delay - supplies, accommodations, and traffic disruptions are likely.
• Evacuation Zone Lookup: https://floridadisaster.maps.arcgis.com/apps/instant/lookup/index.html?appid=aa18a2d8737c4d66bb6434a09e17203a

Alliant Operations:
• We're actively monitoring the storm and working to meet pre-storm needs as well as plan for post-storm needs.
• Our offices will shift to remote work starting Tuesday, October 8th and continue through Wednesday, October 9th. We plan to re-open our office on Thursday, October 10th, weather and damage dependent.
• If you have an emergency with your common areas, please call 239-454-1101.

Stay safe!

Sincerely,

AMERICAN OVERSIGHT

LeeCountyPIO@leegov.com

Lee County orders mandatory evacuations for Evacuation Zones A and B, opens some shelters in advance of Hurricane Milton

Fort Myers, FL, Oct. 7, 2024 – Lee County is issuing mandatory evacuation orders for Evacuation Zones A and B in advance of Hurricane Milton's approach, and the county will open some of its shelters for evacuees who do not have other locations to stay.

A map is available at www.leegov.com/storm.

People who live in mobile homes and manufactured homes are also part of the evacuation order. Shelters will open at 3 p.m. today, Monday, Oct. 7, at the following locations. Only the listed shelters are opening at this time. All shelters are pet-friendly; pets must be on leashes or in kennels:

- Dunbar High School
  3800 Edison Ave.,
  Fort Myers, FL 33916

- Estero Recreation Center
  9200 Corkscrew Palms Blvd,
  Estero, FL 33928

- Island Coast High School
  2125 DeNavarra Parkway
  Cape Coral, FL 33909

People who live in the Evacuation Zones A and B need to be in a safe place by Tuesday evening, Oct. 8. About 416,000 residents live in those evacuation zones.
Lee County officials provided evacuation and shelter updates at noon from the Emergency Operations Center. Residents are encouraged to watch the entire update. Go to: www.youtube.com/watch?v=l9OfdODDFvY

AMERICAN OVERSIGHT

Additional shelters available to the community will be announced soon. Residents are encouraged to make more comfortable arrangements by staying with a friend or family member outside of the evacuation zones.
Transportation is available to shelters. People can go to any LeeTran stop and advise the driver that they need to go to an open shelter. They will be taken to a transfer center and then to a shelter. LeeTran suspended fares at noon today.
Residents with questions can call the Emergency Information Hotline at 2-1-1, or 239-433-3900.
Tolls on Lee County bridges – Cape Coral Parkway, Midpoint Bridge and the Sanibel Causeway – have been suspended.
Lee County asks that residents:

- Obey evacuation notices.
- Pack a go-bag with family and pet needs.
- Bring their own personal items and supplies if going to a shelter.
- Report blocked ditches, swales and canals.
- Know that where it rains, it can flood. Even if you are not in a flood zone, you could still be prone to flooding due to local drainage issues and existing saturated areas.
- Understand that even if you are not evacuated or in an evacuation zone, flooding can still occur. Be prepared for flood inundation.
- Be sure you are signed up for AlertLee. The link is at www.leegov.com/storm.

Residents throughout Lee County are to not place any additional garbage, recycling or yard waste to the curb. Tuesday through Thursday, Solid Waste collection services will be suspended countywide. Announcements about Friday collections will be made Thursday.

Non-emergency Lee County operations closed at noon Monday. Also Monday, the Lee County Emergency Operations Center moved to a full activation.

Residents are asked to monitor local media and meteorologists' reports and to check www.leegov.com/storm for Hurricane Milton updates. Follow @Lee County Government on Facebook, www.facebook.com/leecountyflbocc.

Additional information:
If you're heading to one of Lee County's shelters, you need to bring a Go Kit. Include a three-day supply of food, water and snacks. You'll also need a pillow and sleeping bag; folding chair; medications and eyeglasses; disinfectant wipes; toilet paper; a three-day supply of clothing; a sleep mask and earplugs; hygiene items; games or books; a phone charger or battery bank; and instant coffee or teabags.

Pets are allowed in all Lee County shelters, but you're responsible for bringing what they need. Pack your pet a Go Kit. Make sure there's a collar, leash and ID tags. Have a photo of you with your pet in case you become separated. Bring a crate or pet carrier. Include a week's worth of water; food and treats; clean-up supplies including waste bags for dogs and litter box with litter for cats; remember any medicine your pet needs. You can find out more about preparation at leegov.com/storm.

Subject:	EOC Hurricane Presser
Location:	EOC - 2675 Ortiz Avenue, Fort Myers, FL 33905
Start:	Tue 10/8/2024 12:00 PM
End:	Tue 10/8/2024 12:30 PM
Recurrence:	(none)
Meeting Status:	Accepted
Organizer:	Christopher Fine
Required Attendees:	Carmine Marceno; John Holloway; Christopher Lalor; James Heuglin; Anita Iriarte; Todd Olmer; Sarah Rodriguez; Nestor Montoya; Jessie Santero; Julie Martin; Autumn King; Robert DeAngelo; Herbert Ellis; Katie Walter

Sheriff to speak at EOC press conference with other County Officials.

All of PIO to attend.

Lineup TBD.

Talking points:

Hurricane Milton

-The Lee County Sheriff's Office Incident Management Team is working 24/7 to monitor the storm and deploy assets anywhere they need to be.

-At this time, exact landfall is uncertain but Lee County is expected to experience hurricane-level impacts to include SURGE up to 12 feet.

-Just as you would all prepare for a storm at home, LCSO has done the same. We have secured all mobile assets to include our Marine Unit vessels due to the anticipated impacts from Milton.

- Our Waterbourne Strike Team and Marine Unit, Special Ops are standing by should the need arise to rescue people.

-That being said, know your Evacuation Zone and be prepared to leave if your zone is called.

AMERICAN OVERSIGHT

-A and B have been called to evacuate

-Four (4) additional shallow water vessels have been obtained for water rescues.

-Additional High-Water Vehicles have been obtained and will be deployed to the islands for potential high-water rescues.

-We urge everyone to prepare for this storm! Prepare for the worst, but hope for the best!

-We know what Mother Nature can do! She is unpredictable, which is why we urge everyone NOT to wait until the last minute to have everything that you need.

-Make sure you have necessary hurricane supplies: enough food, water, and medicine for several days.

-Milton is now a CATEGORY 5 STORM.

-Don't get too caugh up in the category. The STORM SURGE is the most lethal part of any hurricane.

-LCSO administrative services at precinct offices will be halted unit after the storm so we can focus on preparation and possible recovery efforts.

-Once we get sustained winds of 45 MPH, emergency response is stopped until it's safe to respond to calls.

-It could take several hours or more for the winds to subside before a deputy is able to respond, once the impacts begin. SHELTER IN PLACE.

-Don't try to drive anywhere in inclement conditions as the roadways are not safe.

-Do NOT go outside during the storm as wind and standing water create hazard that can be fatal.

AMERICAN OVERSIGHT

-Remember the three phases of the storm: BEFORE, DURING, and AFTER. Have your plan for all three.

Mandatory evacuations for Evacuation Zones A and B, some shelters open
Lee County is issuing mandatory evacuation orders for Evacuation Zones A and B in advance of Hurricane Milton's approach, and the county will open some of its shelters for evacuees who do not have other locations to stay.
A map is available at www.leegov.com/storm.
People who live in mobile homes and manufactured homes are also part of the evacuation order. Shelters will open at 3 p.m. today, Monday, Oct. 7, at the following locations. Only the listed shelters are opening at this time. All shelters are pet-friendly; pets must be on leashes or in kennels:

AMERICAN OVERSIGHT

- **Dunbar High School**
  3800 Edison Ave.,
  Fort Myers, FL 33916

- **Estero Recreation Center**
  9200 Corkscrew Palms Blvd,
  Estero, FL 33928

- **Island Coast High School**
  2125 DeNavarra Parkway
  Cape Coral, FL 33909

People who live in the Evacuation Zones A and B need to be in a safe place by Tuesday evening, Oct. 8. About 416,000 residents live in those evacuation zones.
Lee County officials provided evacuation and shelter updates at noon from the Emergency Operations Center. Residents are encouraged to watch the entire update. Go to: www.youtube.com/watch?v=I9OfdODDFvY
Additional shelters available to the community will be announced soon. Residents are encouraged to make more comfortable arrangements by staying with a friend or family member outside of the evacuation zones.
Transportation is available to shelters. People can go to any LeeTran stop and advise the driver that they need to go to an open shelter. They will be taken to a transfer center and then to a shelter. LeeTran suspended fares at noon today.
Residents with questions can call the Emergency Information Hotline at 2-1-1, or 239-433-3900.
Tolls on Lee County bridges – Cape Coral Parkway, Midpoint Bridge and the Sanibel Causeway – have been suspended.
Lee County asks that residents:

- Obey evacuation notices.
- Pack a go-bag with family and pet needs.
- Bring their own personal items and supplies if going to a shelter.
- Report blocked ditches, swales and canals.
- Know that where it rains, it can flood. Even if you are not in a flood zone, you could still be prone to flooding due to local drainage issues and existing saturated areas.
- Understand that even if you are not evacuated or in an evacuation zone, flooding can still occur. Be prepared for flood inundation.
- Be sure you are signed up for AlertLee. The link is at www.leegov.com/storm.

Residents throughout Lee County are to not place any additional garbage, recycling or yard waste to the curb. Tuesday through Thursday, Solid Waste collection services will be suspended countywide. Announcements about Friday collections will be made Thursday.
Non-emergency Lee County operations closed at noon Monday. Also Monday, the Lee County Emergency Operations Center moved to a full activation.
Residents are asked to monitor local media and meteorologists' reports and to check www.leegov.com/storm for Hurricane Milton updates. Follow @Lee County Government on Facebook, www.facebook.com/leecountyflbocc.

Subject: Hurricane Milton - Update #20

As of this update, the latest storm information is as follows:

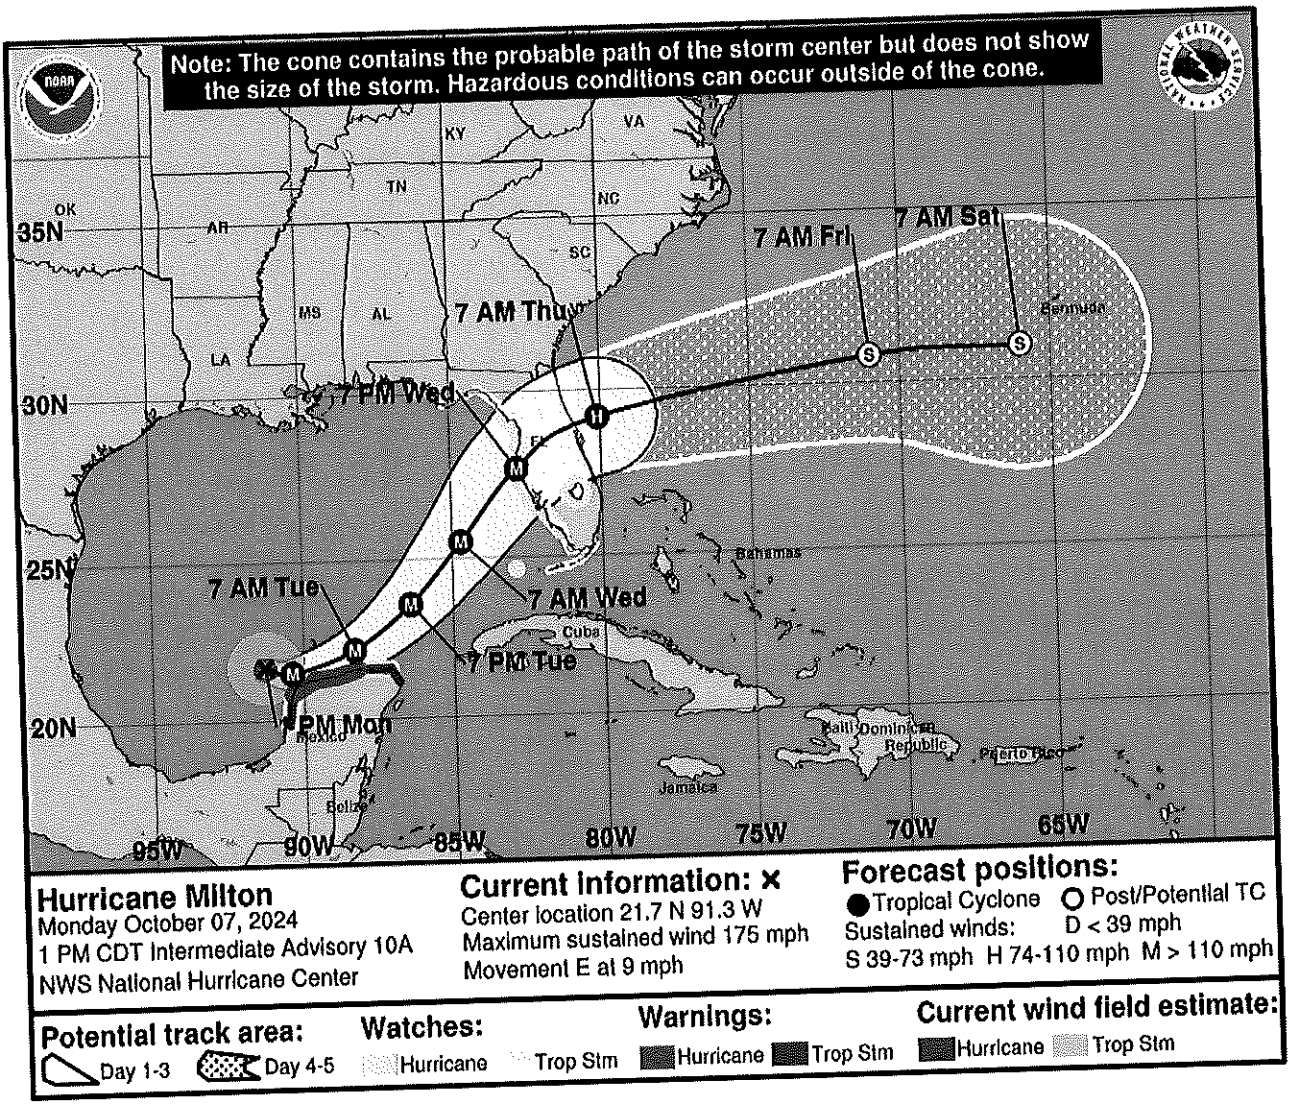
- The maximum sustained wind speeds are now at 175 mph (Category 5 is when sustained winds are 157+ mph).
- The timing of impacts to the area looks to be as early as early Wednesday morning and continuing into midday Thursday.
- The model spread in the forecast track remains high, but is beginning to tighten around a Tampa Bay region landfall.
- Hurricane force winds extend out 30 miles.
- Tropical Storm force winds extend out 80 miles.
- Regardless of the path, the wind field will be sufficient that Lee County will at least receive strong Tropical Storm strength winds.
- The tornado threat will be mainly late Tuesday into Wednesday night.

As of this update, new notifications are as follows:

- Effective at 12:00 PM, a Mandatory Evacuation Order has been issued for Evacuation Zones A & B.

Gas Station Updates:

- 7-11 at SR 31/SR 80 received a fuel shipment this morning. Pumps 11 and 12 are for LEO. Make contact inside for pumps to be turned on.
- 7-11 at Billy's Creek is out of gas. Expecting shipment today. Will set aside fuel for LEO at Pump #1. Make contact with employee to have pump turned on.
- Race Trac at Daniels/Powers Ct is out of gas. Shipment has been requested. Will set up pump for LEO use. In the past it has been Pump 18.
- 7-11 Daniels/Palomino is out of gas. Expecting shipment today and will contact me when they receive it. Pump 10 will be set aside for LEO.
- Rebel at 9281 Daniels Pkwy is out of gas. Requested shipment for today. Pump 1 will be set aside for LEO. Go inside to have pump turned on.
- 7-11 at 100 Delaware has 6800 gallons of gas for LEO.
- Circle K at SR 80/ Old Olga has fixed the pump and have a full tank for LEO. Make contact with employee for which pump to use.
- 7-11 at 12011 Gateway Blvd. has gas for LEO on Pump 2.
- 7-11 at Corkscrew and Three Oaks has gas for LEO on Pumps 13 - 16.
- RaceTrac at 6 Mile/Michael G Rippe is out of gas but requested shipment. They will set up a Pump #3 for LEO use when they get gas. Make contact with employee for pump to be turned on.
- 7-11 at 10875 Terminal Access Road has fuel and will reserve Pumps 9 and 10 for First Responders. The clerk can turn on the pump.
- Shell at 13621 N. Cleveland Ave. has LEO gas on Pump 1 & 2.
- Marathon at 14010 North Cleveland Ave. has gas.



AMERICAN OVERSIGHT

- Mobile/7-11 at 17930 North Tamiami Tr. has LEO gas on Pump 11 & 12.
- Murphy Express at 520 Pine Island Rd. has about 3500 gallons of gas.
- Circle K at 4600 Bayline Dr. has 300 gallons for LEO.
- Rocket Gas at 5760 Bayshore Rd. has 3000 regular gas.
- Circle K at 6381 Bayshore Rd. has 500 gallons of gas for LEO.
- Loves at 17308 Park 78 Dr. has gas.
- 7-11 at 18971 Babcock Ranch Rd. has gas and expects another delivery tonight.
- Shell at 402 Del Prado in Cape Coral has gas.
- Shell at 7135 Maida Ln. has gas.
- Speedway at 1365 N. Tamiami Trl. has Premium only.

Sand Updates:

- Sand and sandbags are being distributed by Lee County Sheriff's Office members to bulk distribution sites throughout the county. Individuals will have to go to a bulk distribution site to get sandbags.
    - Current stations with available sand and/or sandbags:
        - Station 102 at 44 Homestead Rd. S. in Lehigh Acres
        - Station 104 at Sunshine and 16th St. SW in Lehigh Acres
        - Tice Fire Buckingham Station at 5850 Buckingham Road
        - San Carlos Park Fire Station 54 at 16900 Oriole Rd.
        - Bayshore Fire at 17350 Nalle Rd.
        - Bonita Springs Fire at 27701 Bonita Grande Dr.
        - Bonita Springs Fire at 8850 W. Terry St. (Truck currently enroute)

Subject: Hurricane Milton - Update #19

As of this update, the latest storm information is as follows:

- The storm track has shifted north slightly. The movement is not far enough to make a difference in our impacts.
- The earliest reasonable arrival time of tropical-storm-force winds is early Wednesday morning.

As of this update, new notifications are as follows:

- The Hurricane Hotline is now active. Corrections personnel should call 239-477-1258, Law Enforcement personnel should call 239-477-1259, and Communications personnel should call 239-477-1260. Please save these numbers now in your phone. This hotline provides updates for personnel without access to e-mail. For now, all supervisors should relay all pertinent information to their personnel who do not have access to e-mail.
- Mandatory evacuations have been issued for the Town of Fort Myers Beach. Residents are encouraged to evacuate before 3:00 PM today.

AMERICAN OVERSIGHT

- LeeTran at noon today, Monday, Oct. 7, will stop running routes onto Fort Myers Beach. All LeeTran services will convert to off-island transit only. This is to assist with the Town of Fort Myers Beach's request for residents to leave the island.
- Lee County Utilities will shut off water to Fort Myers Beach at noon Tuesday, Oct. 8. This is a precautionary measure to protect infrastructure. It was also implemented during 2022's Hurricane Ian.
- Lee County Sheriff's Office employees are currently in the field distributing sand and sand bags to locations throughout the county.

Gas Station Updates:

- 7-11 at SR 31/SR 80 received a fuel shipment this morning. Pumps 11 and 12 are for LEO. Make contact inside for pumps to be turned on.
- 7-11 at Billy's Creek is out of gas. Expecting shipment today. Will set aside fuel for LEO at Pump #1. Make contact with employee to have pump turned on.
- RaceTrac SR 31/ SR 80 has gas but expect to be out by noon and closed. Next shipment not expected until after the storm. They do not have a pump set aside for LEO.
- Circle K at SR 80/ Old Olga has fixed the pump and have a full tank for LEO. Make contact with employee for which pump to use.
- Sunoco at SR 80 and Buckingham is out of gas but requested shipment. Will pump remaining for LEO. Make contact with employee inside for pump to be turned on.
- Rebel at 6 Mile/Metro currently has 8,000 gallons and will stop pumping at 800 gallons. They do not set aside gas for us. Unknown next shipment.
- RaceTrac at 6 Mile/Michael G Rippe is out of gas but requested shipment. They will set up a Pump #3 for LEO use when they get gas. Make contact with employee for pump to be turned on.
- Race Trac at Daniels/Powers Ct is out of gas. Shipment has been requested. Will set up pump for LEO use. In the past it has been Pump 18.
- 7-11 Daniels/Palomino is out of gas. Expecting shipment today and will contact me when they receive it. Pump 10 will be set aside for LEO.
- Rebel at 9281 Daniels Pkwy is out of gas. Requested shipment for today. Pump 1 will be set aside for LEO. Go inside to have pump turned on.
- Chevron at 13031 Metro is out of gas. Not expecting shipment. Will set a pump aside for LEO if they get gas.
- Circle K at Metro and Crystal is close to running out of gas and starting to shut pumps down. They are setting aside pumps 5-8 for LEO. Meet with employee for which pump to use.

Subject: Hurricane Milton - Update #18

As of the 8:00 AM update, a Hurricane Watch remains in effect for our area.

The IMT Main Number is 239-258-3150 or e-mail at IMT@sheriffleefl.org.

As of this update, the latest storm information is as follows:

AMERICAN OVERSIGHT

- Hurricane Milton is now a major hurricane, with sustained wind speeds of 125 mph.
- Hurricane Milton is expected to have winds of 145 mph at landfall, with some expansion of hurricane-strength winds.

- The model spread in the forecast track remains high, with the entire area within the cone.
- Movement is ESE at 8 mph.
- The current earliest arrival of tropical-storm-strength winds is 1:00 AM on Wednesday, with a likely arrival time at 8:00 AM. This is the arrival of tropical-storm-force winds, not the arrival of the actual storm.
- The storm surge estimate is 5' to 10' for Lee County. It is expected to increase throughout the day on Wednesday and peak early Thursday.
- We are still in a Hurricane Watch, a Storm Surge Watch, and a Flood Watch.
- Many rivers are already in or forecast to go into flood stage.
- The main threat for tornadoes is late Tuesday into Wednesday night.
- Confidence is low on the exact track of the system, with the entire area within the cone. It should be noted that that 72 hour average track error is 100 miles.

As of this updates, new notifications are as follows:

- All personnel must notify IMT of all asset movements and personnel changes.
- Estero Fire Station #54 at Oriole and Alico just got sand delivered.
- Pine Island Fire has sand, but no sandbags.
- North Fort Myers Recreations Center has sand but no sandbags.
- Corrections Transport vehicles have received their staging location and should be in place by 12:00 PM.
- Academy recruits and Youth Services deputies have been deployed to the field.

National Hurricane Center Definitions:

- **Hurricane Watch**: Hurricane conditions (sustained winds of 74 mph or greater) are possible within your area. Because it may not be safe to prepare for a hurricane once winds reach tropical storm force, The NHC issues hurricane watches 48 hours before it anticipates tropical storm-force winds.
- **Hurricane Warning**: Hurricane conditions (sustained winds of 74 mph or greater) are expected somewhere within the specified area. NHC issues a hurricane warning 36 hours in advance of tropical storm-force winds to give you time to complete your preparations. All preparations should be complete. Evacuate immediately if so ordered.
- **Storm Surge Watch**: There is a possibility of life-threatening inundation from rising water moving inland from the shoreline somewhere within the specified area, generally within 48 hours.
- **Extreme Wind Warning**: Extreme sustained winds of a major hurricane (115 mph or greater), usually associated with the eyewall, are expected to begin within an hour. Take immediate shelter in the interior portion of a well-built structure.

AMERICAN OVERSIGHT

To: All Users <AllUsers@sheriffleefl.org>
Subject: Hurricane Milton - Update #17

The 5:00 AM update shows that the track is largely unchanged; however, models still vary from Naples to North of Tampa, and the intensity is forecast to be stronger, well into the Category 4 range.

As of this update, new notifications are as follows:

- The storm has current maximum winds of 100 mph.
- The current forecast for our coast is an 8' - 12' storm surge.
- The storm has slowed somewhat, so the earliest arrival of Tropical Storm force winds is now in the early Wednesday morning hours.

Sent: Sunday, October 6, 2024 11:00 PM
To: All Users <AllUsers@sheriffleefl.org>
Subject: Hurricane Milton - Update #16

The 11:00 PM update shows little movement in Hurricane Milton's track. Maximum sustained wind speeds are at 90 mph. Model tracks vary widely on the landfall location along Florida's West Coast. The Incident Management Team will continue to monitor and provide timely updates.

As of this update, new notifications are as follows:

Gas Availability:

- RaceTrac - 15820 Winkler Rd. - Pump 15 & 16 for First Responders - Contact is Tracy
- 7-11 - 12750 Cleveland Ave. - Pump 10 & 12 for First Responders - Contact is Vanilla
- RaceTrac - 5991 South Pointe Blvd. - Pump 19 & 20 for First Responders - Contact is Vince
- Mobil/7-11 - 20391 Summerlin Rd. - Pump 6 for First Responders - Contact is Susan
- Circle K - 20021 Summerlin Rd. - Pump 1 for First Responders - Contact is Kyle
- 7-11 - 15021 McGregor Blvd. - Pump 1 for First Responders - Contact is Jessica
- Mobil/7-11 - 17930 N. Tamiami Trl. - Pump 9 & 10 for First Responders - Contact is Joseph
- Circle K - 6381 Bayshore Rd. - Pump 10 for First Responders - Contact is Elizabeth
- Circle K - 19101 N. Tamiami Trl. - Pump 1 & 2 for First Responders - Contact is Christy
- 7-11 - 100 Delaware in Lehigh Acres - Pump 1 & 2 for First Responders.

Sent: Sunday, October 6, 2024 8:57 PM
To: All Users <AllUsers@sheriffleefl.org>
Subject: Hurricane Milton - Update #15

As of the 8:00 PM National Hurricane Center update, Hurricane Milton is still forecast to rapidly intensify into a major hurricane. The center of the track has shifted further south, and is currently near the Bradenton/Sarasota area at landfall.

AMERICAN OVERSIGHT

There is a Flood Watch for the entire area. Rainfall amounts of 5 to 10 inches, with localized totals of up to 15 inches are expected. The timing of the impacts is as early as late Tuesday and continuing into Thursday morning.

A good deal of uncertainty remains with where the storm will make landfall. It should be noted that the average NHC track error at day 3 is around 100 miles.

As of this update, new notifications are as follows:

- Youth Services and Training personnel have received their assignments and will report according to their schedule tomorrow.
- Court Operations and Civil personnel will receive their schedule tomorrow.
- Employee Assistance personnel are done for the evening. They will resume in the morning.
- IMT will be fully activated beginning at 7:00 AM on Monday, with all personnel reporting or receiving their assignments by then.
- For personnel working overtime, please use *Hurricane Milton* as the reason for the overtime.
- The 7-11 Gas station at 103 Leeland Heights Blvd W in Lehigh Acres is open for LEO. If you need gas, use pumps 3,4,5, or 6 only. Jessica is the contact person there.
- The 7-11 at 100 Delaware Rd. in Lehigh Acres is reserving gas for First Responders. use Pump 3 and 4. Sharon is the contact person there.
    - The 7-11 at 18971 Babcock Ranch Rd is holding gas for first responders but deputies must go inside to request pump to be turned on.
    - The 7-11 at Del Prado and N Tamiami (17930 N Tamiami Trl.) is also holding gas for first responders but deputies must go inside to request the pump be turned on.

All personnel should be ready for a full activation at any time. This is a serious, dangerous storm and all personnel should complete preparations as soon as possible. Models vary in intensity, but most predict *at least* a Category 3, so even if we do not receive a direct hit, we can expect hurricane strength winds or wind gusts and a severe storm surge.

Subject: Hurricane Milton - Update #14

As of the 5:00 PM update, Milton is now a hurricane. Hurricane Milton has maximum sustained winds of 85 mph. The track has shifted slightly, and there is a more northeastern path across our area. Even if we do not receive a direct hit, we will receive tropical storm and hurricane strength winds, significant storm surge, and dangerous flooding from rainfall, likely much greater that what we received from Hurricane Helene. By tonight, all personnel should have their homes and families secured for the storm, and be prepared for a full activation.

Notifications for this update:

- All agency members deemed <u>non essential during an emergency response</u> will be dismissed tomorrow, October 7th, 2024 starting at **noon**. In order to stay home you will need to advise your immediate supervisor and use your accrued time. You may report for regular duty if you chose to do so. As always, use caution when driving in inclement weather and do not attempt to traverse standing water. IMT will continue to send out updates on our response to TS Milton.

AMERICAN OVERSIGHT

- The Emergency Operations Center (EOC) will transition to a Level 1 at 7:00 AM tomorrow. This means that shelters and countywide operations will be run out of the EOC. The Incident Management Team is your contact for agency needs; do not contact the EOC directly.

Subject: Tropical Storm Milton - Update #13

The 2:00 PM Intermediate Update shows that there are no significant changes in the track. The earliest arrival of tropical storm force winds is projected to be 8:00 PM on Tuesday.

These are the stations that are reported to still have gasoline:

- Veronica Shoemaker/Winkler
- Shell station at Hancock and US 41
- BJ's Cape Coral
- 711 Burnt Store and Pine Island has DIESEL only
- Racetrac at South Pointe and College has 93 Only
- Walmart / Murphy's USA in Lehigh
- Santa Barbara and Veterans 7/11

These are the stations that are reported to be currently **out** of gasoline:

- Country Club and Veterans Circle K
- Del Prado Speedway
- Trafalgar and Skyline 7/11
- Rebel US 41 and Del Prado
- 76 at Chiquita and Pine Island
- Walmart/Murphy's Del Prado
- Walmart on Pine Island Road
- Pine Ridge and San Carlos 7/11
- Santa Barbara and Gleason 7/11
- Palm Tree and Cape Coral Pkwy 7/11
- Lee and Gunnery 7/11
- Del Prado Racetrac
- Terry St Circle K
- Lee and Alvin Racetrac
- Joel Citgo
- N Cleveland and Littleton 7/11

Below are the current updated tasks that IMT has been working on since that last updates:

- Logistics members have scheduled pre-storm deliveries for food and beverages - the arrival time is Tuesday morning.
- Logistics members have scheduled post-storm deliveries from vendors.
- Logistics members have scheduled water deliveries.
- Logistics members have created plans for replenishment of supplies for long-term activations.
- Logistics members have arranged for ice deliveries for the event power is lost.

AMERICAN OVERSIGHT

- Purchasing members have made plans for the procurement of potable water.
- Purchasing and Logistics members have scheduled the delivery of portable bathrooms should they be needed.
- HQ will be the central location for cooking needs post-storm for employees at HQ/IMT, Forensics, MCU, Command Staff, Spec Ops, and Staging personnel.
- Precincts and Corrections facilities will be responsible for their meal preparations.

Subject: Tropical Storm Milton - Update #12

The 11:00 AM update shows a small track shift to the south. Although it is still predicted to directly hit the Tampa Bay Area, the move slightly south may bring higher wind speeds and higher storm surge. The storm is expected to quickly intensify and will likely be a major hurricane upon arrival.

All personnel are encouraged to complete preparations for their homes and their families today.

There is still a high degree of uncertainty in both the tracks and the wind speed upon arrival, so the possibility of a direct strike to our area remains. The cone of uncertainty currently covers most of the Florida peninsula. The Incident Management Team (IMT) will keep you informed, and is making preparations to include schedule planning.

Subject: Tropical Storm Milton - Update #8

The 8:00 AM update shows that Milton is forecast to become a Major Category 3 Hurricane before making landfall. Timing, tracks, and intensity are still unpredictable; however, the National Hurricane Center still shows the track toward the Tampa area.

The current forecast is as follows:

- There is a Flood Watch for the entire area through Thursday.
- Rainfall in the amount of 5" to 8", with localized totals up to 12".
- The timing of the impacts is from late Tuesday through early Thursday morning, but it is expected to make landfall on the West Coast on Wednesday.
- There is great uncertainty about where the storm will make landfall. The average Day 4 track error is around 150 miles, so we are still well within a possible landfall range.
- The current earliest wind time arrival is 4 PM on Tuesday, and the most likely arrival time is 2 AM on Wednesday.

Additional notifications for this update include:

- Personnel should maintain at least ½ tank at all times. Due to current fuel runs, please use any opportunity to make sure your agency vehicle stays full at all times.
- Personnel who must fuel and have no other options may use 89 or 93 Octane fuel.
- Select IMT members have been activated. Please send requests to IMT@sheriffleefl.org.
- The select CRU members who were notified individually will report at 10:00 AM to the Headquarters Training Room (1202).
- The asset movement members who were notified individually will report at 10:00 AM to the Headquarters Training Room (1202).
- All units, components, precincts, corrections facilities, and all affected agency departments should fill up all available gas cans and gas tanks.
- Pine Island Fire Department is out of sand. They still have sandbags. They expect to get more sand on Monday.

Subject: Tropical Storm Milton - Update #7

With the 5:00 PM update, Tropical Storm Milton is now expected to arrive as a major hurricane. The track has shifted some to the north; however, some model tracks still show direct hits our our area, and we are still in the cone of uncertainty. Please recall from prior storms that although we are not in the direct path, the effects of the hurricane will still affect us heavily, especially in the areas prone to storm surge. Additionally, the peak storm surge from Helene arrived almost 10 hours after the peak winds, so all personnel should be aware of and consider the effects before, during, and after the storm.

The below preparations remain in effect. The only change for this period is:

- Four (4) additional shallow water vessels have been obtained for water rescues.
- Additional High-Water Vehicles have been obtained and will be deployed to the islands for potential high-water rescues.
- The San Carlos Park Fire Department is out of sand and sandbags.

Subject: Tropical Storm Milton - Update #6

As of a 12:25 PM National Hurricane Center update, Tropical Storm Milton has formed. This storm is forecast to strengthen and bring the risk of life-threatening impacts to portions of the West Coast of Florida next week. The maximum winds are currently estimated at 40 mph with higher gusts. Models range in intensity from a Tropical Storm to a Major Hurricane, so there is tremendous unpredictability in the strength upon arrival.

At this time, the Incident Management Team is preparing for the possibility of a major hurricane affecting our area with impacts beginning on Tuesday and a full impact on Wednesday.

All agency personnel are encouraged to prepare as follows:

- All personnel should review their hurricane plans, and prepare their homes and families for the possibility of a hurricane impact in the middle of next week.
- All precincts should secure their mobile assets (decoy vehicles, arrow boards, trailers, ATVs, etc.) beginning on immediately to be completed by 2:00 PM on Monday.
- All trailers should be brought to storage beginning immediately to be completed by 2:00 PM on Monday.
- All personnel should use the remainder of this weekend to prepare for a possible activation. This plan should include three days worth of food, uniforms, and supplies.
- All personnel should use the remainder of this weekend to prepare their uniforms and equipment (including sufficient batteries for equipment) for a possible activation.
- All specialty units should begin bringing their assets back to their storage areas and secure locations. This should be completed by 2:00 PM on Monday.
- All precincts should secure any items that can be moved by the wind to a secure location starting immediately to be completed by 2:00 PM on Monday.
- All Corrections facilities (including Nan's Ranch) should prepare their facilities for a possible hurricane impact next week.

AMERICAN OVERSIGHT

This is new information as of this update:

- The Waterborne Strike Team is on standby for deployment for water rescues.
- JetBlue Stadium, CenturyLink Stadium, the Lee County Gun Range, and the Andrea Lane and Sivan Road storage buildings are prepared to receive assets if needed.
- The Marine Unit is in contact with the IMT to secure the marine assets.
- Known sandbag locations are as follows:
    - Punta Gorda—Free sandbags will be available at 3130 Cooper St., the last entrance on the left by flag poles.
    - Fort Myers Beach—Sand is located off of Gulf Beach Road, and bags are available at Town Hall, 2731 Oak St. (The location will provide service until 4:30 p.m. on Friday and begin Monday at 8:30 a.m.)
    - Fort Myers— South Trail Fire & Rescue will have sand and sandbags available at station 63, 5531 Halifax Ave., Fort Myers—a maximum of 20 bags per household. UPDATE: South Trail Fire & Rescue is currently out of sand. Empty sandbags only are available.
    - Naples— Sandbags will be available at three public park locations: Big Corkscrew Island Regional Park, 810 39th Ave., North Collier Regional Park, 15000 Livingston Road, in the Sun-N-Fun Lagoon parking lot, and at Donna Fiala Eagle Lakes Community Park, 11565 Tamiami Trail East, in the grassy area between the parking lots. The Naples sandbag locations will begin service at 8 a.m. through dusk on Saturday and Sunday.
    - San Carlos Park—Sand and sandbags are available at San Carlos Park Fire District Station 54, located at 16900 Oriole Road. There is a limit of 10 bags per household. Bags can be picked up at the lobby. Bring your own shovel. Be prepared to fill and load your own sandbags. Make sure your vehicle can transport the weight of the sandbags.
    - North Fort Myers—Sandbags will be located at North Fort Myers Parks and Recreation, 2000 N. Recreation Parkway. Sand will be located in the back of the park, next to the county mulch pile. Please bring your own shovel to fill the bags.
    - Matlacha—Sandbags are available for pickup at Station 1, located at 5700 Pine Island Rd, Bokeelia, FL 33922
- IMT personnel are visiting the precincts, and the storage locations to inventory assets to prepare for both securement and post-storm deployment.
- No schedule changes are expected between now and Monday afternoon; however, all personnel should be prepared for schedule adjustments.
- The Agriculture assets are secured on the Olga site.

Subject: Important Update on a possible impending hurricane impacting our area (Update #5)

Team,

IMT has been working on preparation for a potential Hurricane impacting our area early next week. IMT will continue to send out updates regularly so please monitor your email closely. All agency units need to begin preparations of securing their assigned assets and communicate all movement to IMT. Also, update the major asset application on the intranet. We have secured Jet Blue Park as an asset staging area for Marine and other assets. Agency asset storage facilities to include the gun range are preparing to house assets as well. IMT is securing high water vehicles that will be pre-staged at strategic locations i.e., the barrier islands. IMT members will be in the RTIC today coordinating efforts. Agency extension 239-258-3150 is being setup to communicate to IMT staff. Additional updates to follow.

Subject: New Caribbean Disturbance - Update #4

The National Hurricane Center 2:00 PM update shows the possibility of development as the low pressure area in the Gulf of Mexico moves slowly eastward or northeastward. A tropical or subtropical depression or storm could form during the early to middle part of next week if the low remains separate from a frontal boundary that is forecast to extend across the Gulf of Mexico. Regardless of development, locally heavy rains could occur over portions of the Florida Peninsula late this weekend into next week. As of this update, the formation chance in the next 48 hours is low at 10 %, and the formation chance through 7 days has increased to 50%.

Current model runs show an arrival time of any potential storm around Wednesday of next week. This represents a slower forward storm speed and later storm arrival than previous model runs, so the timing and impacts are still largely unknown. Regardless of any potential storm, significant rainfall is still expected, and the Incident Management Team will continue to monitor and update all personnel.

Subject: New Caribbean Disturbance - Update #3

The National Hurricane Center has reduced the chance of tropical cyclone development within seven days to 30%. While the system is likely to develop over the Gulf of Mexico late this weekend or early next week, subsequent tropical or subtropical development could be limited by the system's potential interaction with a frontal boundary. Regardless of development, locally heavy rains could occur over portions of the Florida Peninsula next week.

Subject: New Caribbean Disturbance - Update #2

The forecast for the area of disorganized showers remains the same; it is still too early to tell if the system will develop further. Regardless of development, heavy rain is expected in our area into the weekend and next week. The Incident Management Team will continue to monitor.

Subject: New Caribbean Disturbance - Update #1

AMERICAN OVERSIGHT

The area of disorganized showers remains at a 40% chance of development. The National Hurricane Center indicates that environmental conditions could support some gradual development of this system, and a tropical depression could form towards the end of this week or this weekend while it moves generally northwestward over the northwestern Caribbean Sea and into the Gulf of Mexico. As of this time, there are no changes, but some long range models show an increased chance of this disturbance affecting our area.

From: IMT <IMT@sheriffleefl.org>
Sent: Monday, September 30, 2024 8:11 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance

The Incident Management Team is monitoring a new area of disorganized showers and thunderstorms over the western Caribbean Sea. The National Weather Center states that the system has a medium chance (40%) of developing towards the middle to latter part of the week as it moves northwestward into the Gulf of Mexico. As this disturbance moves into the gulf, increasing moisture is expected over the Florida Peninsula and elevated rain chances are anticipated from Friday through the weekend, and possibly into early next week.

Unfortunately, long range models show the possibility of direct impacts for Southwest Florida; however, It is too early to determine what, if any, tropical specific impacts can be expected.

The Incident Management Team will continue to monitor the storm, and will continue to provide updates through this very active part of the hurricane season.

Attachments: 10-07-2024.pdf

Good Afternoon,

Please see the attached past and future schedule for the team.

Today the team worked at Nan's Ranch and the Core for Hurricane Milton preparations. These preparations will continue tomorrow, Tuesday, 10/8/24.

The team remains ready for deployment for any urgent needs the agency may have with storm preparations and/or storm cleanup.

I hope you all have a great night and STAY SAFE!!!

FPL.

A message from Pam Rauch
View in Browser

We're mobilized and ready to respond

- We're closely monitoring Milton and preparing for it to make landfall as a major hurricane on the West Coast and maintain its hurricane strength as it exits along the East Coast.
- Heavy rain across the state over the last few weeks has saturated the ground ahead of Milton's projected landfall. This makes trees and other vegetation susceptible to falling over and potentially damaging power lines, even in areas forecast to get little to no wind from the storm.
- We're ready to respond, with our teams, equipment and supplies being pre-positioned now – and we're coordinating our response with county and state emergency operations centers.
- While thousands of resources are responding to the dire situation in the Southeast following Helene, we're bringing in resources from as far away as the Western U.S. to support restoration efforts.

AMERICAN OVERSIGHT

- As we make our preparations, we urge customers to do the same and plan for prolonged outages – and to prioritize safety, before, during and after the storm.

Our current news release has the most up-to-date information. Following the storm, our Government Portal will be updated several times a day with the most detailed information about your area.

Sincerely,

Pamela Rauch

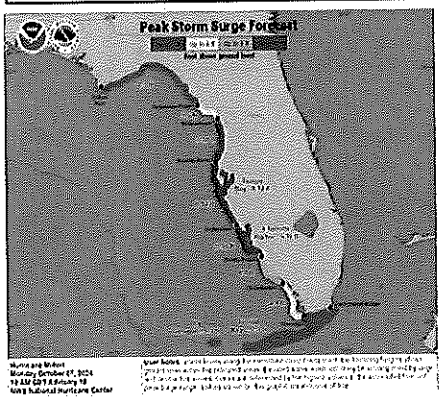
Key Messages for Hurricane Milton



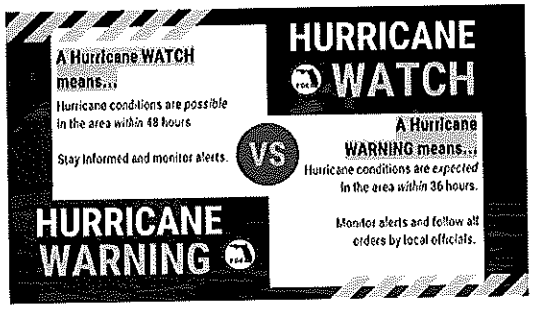
Advisory 10: 10:00 AM CDT Mon Oct 07, 2024

1. Damaging hurricane-force winds are expected across portions of the northern coast of the Yucatan Peninsula. A life-threatening storm surge with damaging waves is also likely along portions of the northern coast of the Yucatan Peninsula.

2. There is an increasing risk of life-threatening storm surge and damaging winds for portions of the west coast of the Florida Peninsula beginning Tuesday night or early Wednesday. Storm Surge and Hurricane Watches are now in effect for portions of the west coast of the Florida Peninsula and residents in that area should follow any advice given by local officials and evacuate if told to do so.

3. Areas of heavy rainfall will impact portions of Florida today well ahead of Milton, with heavy rainfall more directly related to the system expected later on Tuesday through Wednesday night. This rainfall will bring the risk of considerable flash, urban, and areal flooding, along with the potential for moderate to major river flooding.

For more information go to hurricanes.gov



AMERICAN OVERSIGHT

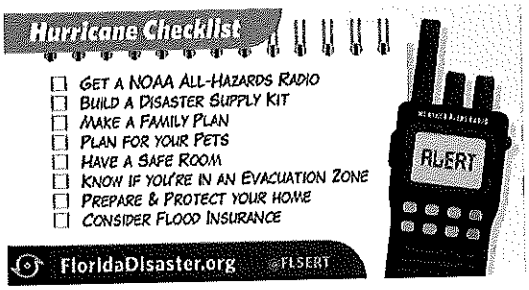
The NOAA National Hurricane Center (NHC) has forecasted that Hurricane Milton will bring dangerous winds, rains and flooding to the SWFL area later this week. Hurricane Milton is currently forecasted to be a Category 5 Storm with winds upwards of 150 mph.

I am watching National Hurricane Center updates, receiving updates from our state and local emergency management officials and working with constituents to ensure they have the resources they need.

Our Southwest Florida region knows all too well the devastating impacts of dangerous hurricanes. Please, prepare your families and your homes and take every essential precaution. Know your zone, know your home and be prepared with an evacuation route if necessary.

As a reminder, the resources below are key in preparing for the storm. Please do not hesitate to reach out to my office if there is anything we can do to help connect you with resources available.

Florida's Division of Emergency Management



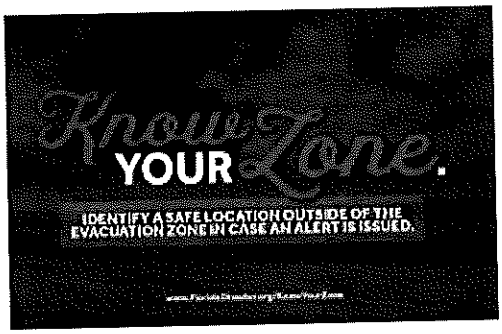
The Florida Division of Emergency Management (FDEM) activated the State Emergency Operations Center and is leading coordination efforts for the State Emergency Response Team.

FDEM is hosting twice-daily calls with all 67 counties to identify needs and to ensure the state is prepared to respond quickly and efficiently.

Additionally, FDEM is coordinating with state agencies, non-governmental organizations, and private sector partners to facilitate ongoing resource requests for counties, including requests for water, generators and support personnel.

Nearly 500 missions are being facilitated by the State Emergency Response Team to assist counties in their preparation efforts. These missions accomplish vital tasks like pre-staging response resources, protecting critical infrastructure facilities like hospitals and utility stations, and coordinating personnel statewide.

AMERICAN OVERSIGHT



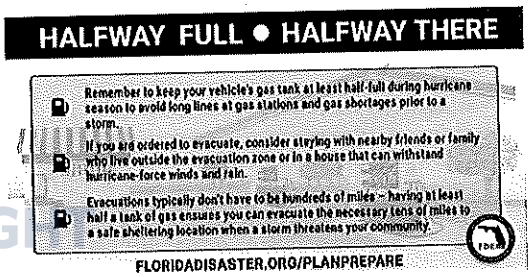
Get A Plan!

The Florida Division of Emergency Management is a valuable resource to help you, your family and your business prepare for hurricane season.

Every household should have a disaster plan specific to the needs of their household. Every individual in the household should assist in developing the emergency plan and understand the plan.

Visit **flgetaplan.com** to learn more or click on the plan below that best suits your needs.

- **Family Plan**
- **Business Plan**
- **Special Needs Plan**
- **Pet Plan**

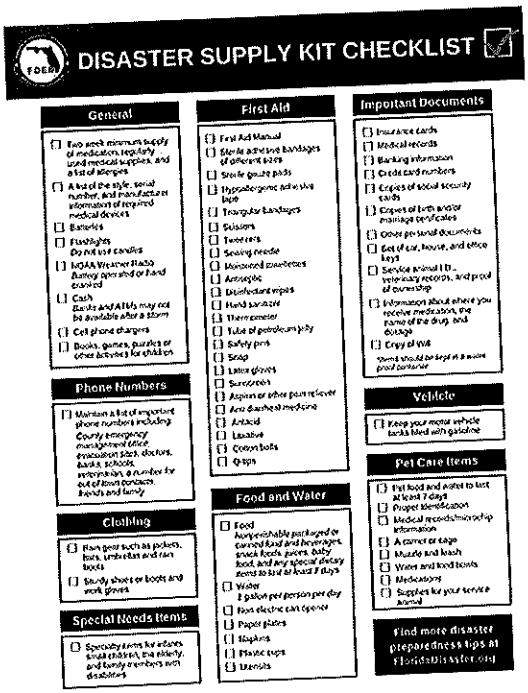


Know Your Evacuation Zone

Find out know if you live in an evacuation zone, a low-lying, flood-prone area, a mobile home or an unsafe structure during hurricane season.

It is also very important for residents to know their home and its ability to withstand strong winds and heavy rain.

Visit FloridaDisaster.org/Know for more information.



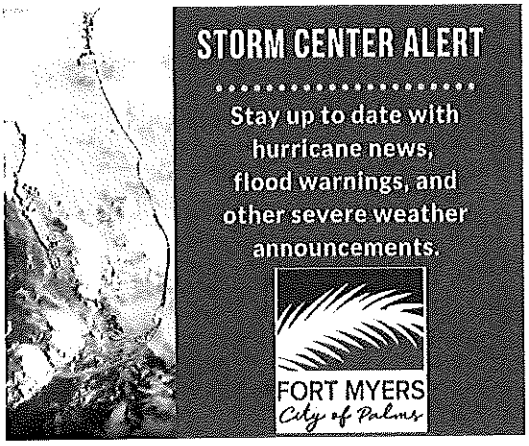
Keep Gas Tanks Filled or Cars Charged

Residents should keep their vehicle's gas tanks at least half full to ensure they have enough fuel to evacuate as soon as possible without worrying about long lines at gas stations and to avoid gas shortages prior to a storm.

AMERICAN OVERSIGHT

For Floridians with electric vehicles, it's recommended that the battery be maintained between 50% - 80% capacity at all times, depending on the type of vehicle and what the vehicle's manual recommends.

Visit FloridaDisaster.org/HalfwayFull for more information.



Be Prepared: Build a Disaster Supply Kit

Below are some items to purchase that may be needed during and after Hurricane Milton.

- Water (at least 1 gallon daily per person for 3 to 7 days)
- Food (at least enough for 3 to 7 days)
- Blankets and pillows, etc.
- Clothing
- First aid kit, including medicines and prescriptions
- Toiletries and hygiene items
- Flashlight and batteries
- Radio
- Cash (Banks and ATMs may not be open or available for extended periods)
- Important documents (store in a waterproof container), such as insurance, medical records, bank account numbers, Social Security card, etc.
- Vehicle fuel tanks, filled
- Pet care items

AMERICAN OVERSIGHT

Sign Up for Local Alerts

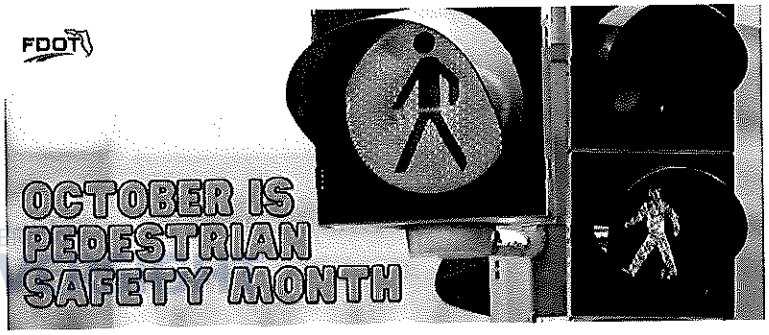
Good afternoon,

The contractor is taking extra precautions to reinforce the improvements that have been made on the Sanibel Causeway before Hurricane Milton arrives. Throughout the day today, and again tomorrow crews are adding additional armor stone near the toll plaza. FDOT wants to take all possible steps to ensure that the causeway is operational once the storm passes.



- **Motorists should expect flaggers to stop traffic intermittently west of the toll plaza to allow equipment to transfer the armor stone from the staging area again on Tuesday, October 8**.

Flaggers are working hard to make sure delays are minimal as they are aware that many residents are evacuating. The contractor is also in the process of securing the barges and other staging other equipment so that it is readily available if needed after the storm passes.

After the storm passes, please expect that the contractor will need time to inspect and clear debris from the roadway before allowing the public to access and cross the Causeway. Once FDOT determines that McGregor Boulevard and the Causeway are safe, the bridge will open to traffic as soon as the Sanibel Police Department and Sanibel Fire Department provide the "all clear" that travel on the island is safe.

**** Some text updates may arrive late or more than once. We will continue to provide a date/time stamp on all causeway updates throughtout the storm for tracking****

Members,

As we monitor Hurricane Milton please continue preparing your construction sites to minimize potential damage. The CCCIA is a member of the Emergency Operations Center for the City of Cape Coral. We receive regular updates and participate in ongoing meetings as the storm approaches to ensure we have the latest information available. Please stay safe and reach out to us at any time for assistance.

Site Clean-Up and Preparation Instructions:

- **Secure Loose Materials: Ensure all loose materials, tools, and equipment are secured or stored in a safe location. This includes scaffolding, ladders, and other items that could become airborne.**
- **Protect Machinery: Move machinery and vehicles to higher ground if possible, and secure them to prevent movement during high winds.**
- **Inspect and Secure Structures: Check that temporary structures, such as tents or trailers, are securely fastened and will not pose a risk during the storm.**
- **Drainage and Flood Prevention: Clear drains, gutters, and any other drainage systems to prevent flooding on the site. Sandbags should be used in areas prone to water accumulation.**
- **Electrical Safety: Disconnect and safely cover all electrical equipment to prevent water damage. Ensure that power is turned off at the main switch if the site will be unattended.**
- **Remove Hazardous Materials: Properly store or dispose of any hazardous materials to prevent spills or leaks.**
- **Site Closure: If the decision is made to close the site, ensure that all access points are locked and secured, and signage is posted to inform staff and visitors of the closure.**
- **Post-Storm Inspection: Once it is safe, conduct a thorough inspection of the site to assess any damage and identify any safety concerns before resuming work.**

FloridaCoalition TO END HOMELESSNESS

2024 FLORIDA CONFERENCE ON ENDING HOMELESSNESS

Event Postponed:

New Dates Announced | November 12 - 14, 2024

Due to the impending impact of Hurricane Milton, we have made the difficult decision to postpone the upcoming **Florida Conference On Ending Homelessness** to prioritize the safety and well-being of our attendees, staff, and partners.

Originally scheduled for October 15-17, the event will now take place from **November 12-14** at the Hilton Lake Buena Vista. We sincerely apologize for any inconvenience this may cause and appreciate your understanding as we make adjustments to ensure a safe and successful conference.

Hotel Updates:

AMERICAN OVERSIGHT

If you booked within our official hotel block, your reservation has been automatically

canceled. You will need to rebook your hotel room for the new conference dates, a link will be emailed to you as soon as it is available.

If you booked outside of the hotel block or at another hotel, you are responsible for canceling and rebooking your reservations.

We understand that changes like this can be challenging and that recent events have brought tremendous stress and hardship to many in Florida. We invite you to take a reprieve and join us at our upcoming conference. Together, we can focus on addressing the critical issue of homelessness, an ongoing challenge that has only been magnified in times of disaster. Your presence and participation will be vital in creating a stronger, more resilient Florida.

Thank you for your flexibility and patience during this time. We look forward to welcoming you in November for a successful event, and our team is here to assist you with any questions or concerns regarding your registration, travel, or hotel accommodations.

WEBSITE AGENDA PROSPECTUS

Please continue to watch your inboxes for addition information and updates in the coming days and weeks.

THANK YOU TO OUR SPONSORS

AMERICAN OVERSIGHT

The mission of the Florida Coalition to End Homelessness is to work collaboratively to prevent and end homelessness in Florida through advocacy and education.

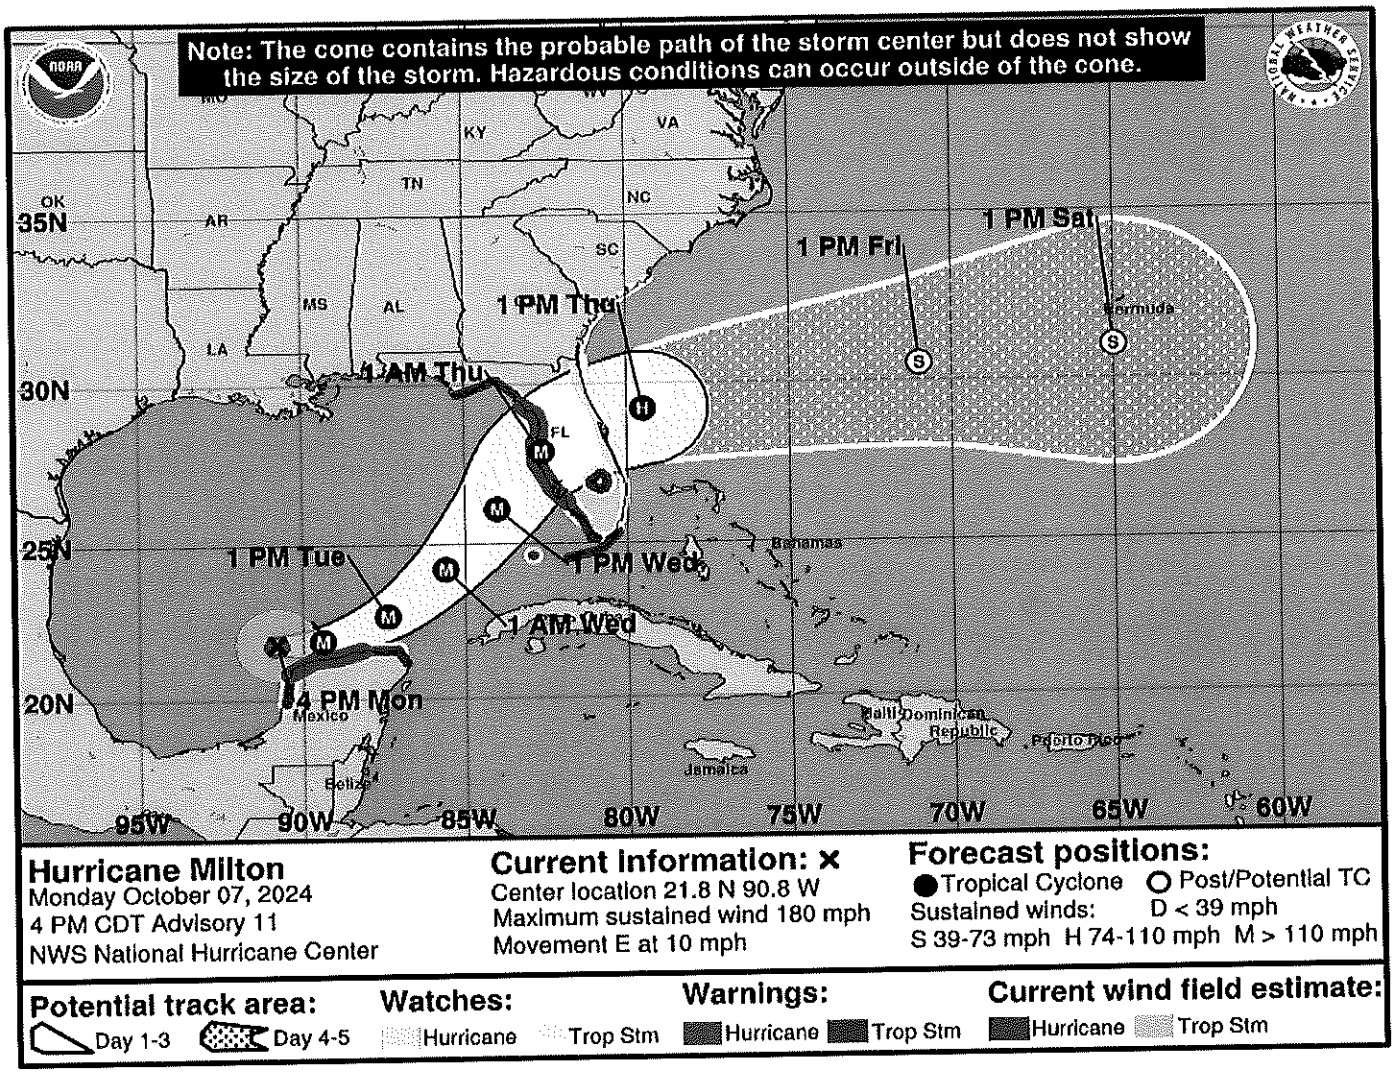
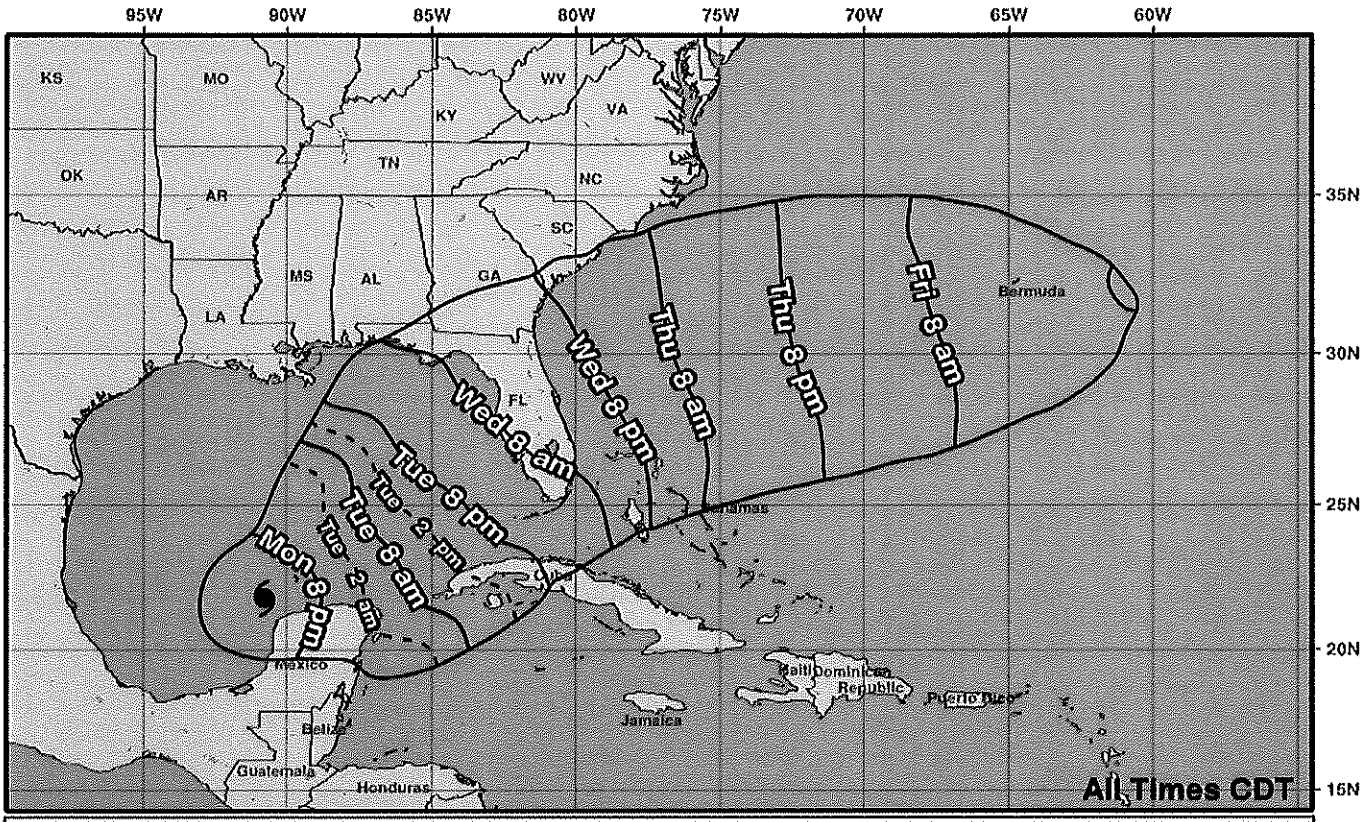
Subject:	Hurricane Milton - Update #21



As of this update, the latest storm information is as follows:

- The maximum sustained winds are currently 180 mph, with a Minimum Central Pressure of 905 mb.
- A Storm Surge Warning has been issued for Lee County.
- A Hurricane Warning has been issued for Lee County.
- Hurricane conditions are expected in the next 36 hours.
- The earliest arrival time for tropical-storm-strength winds is now Wednesday around 8:00 AM.

As of this update, new notifications are as follows:



- As the weather deteriorates, please update the GXP app with the locations of flooding and community dangers (closed roads, downed power lines, etc.) with a flag or polygon. It is imperative that you remove the flag when the danger no longer exists. If you are unable to remove a flag, send an e-mail to IMT@sheriffleefl.org to request removal of the flag.
- The special needs shelter is open and at about at 10% capacity.
- LeeTran will be available as needed as long as the wind is under 45 MPH.
- LCEC/FPL has resources staged at the EOC.
- Several nursing homes have closed and have evacuated their residents.
- Charlotte County has closed some hospitals and have transferred their patients to Collier County.

Subject: Hurricane Milton - Update #20

AMERICAN OVERSIGHT

As of this update, the latest storm information is as follows:

- The maximum sustained wind speeds are now at 175 mph (Category 5 is when sustained winds are 157+ mph).

FL-LEE-24-2340-A-000843

- The timing of impacts to the area looks to be as early as early Wednesday morning and continuing into midday Thursday.
- The model spread in the forecast track remains high, but is beginning to tighten around a Tampa Bay region landfall.
- Hurricane force winds extend out 30 miles.
- Tropical Storm force winds extend out 80 miles.
- Regardless of the path, the wind field will be sufficient that Lee County will at least receive strong Tropical Storm strength winds.
- The tornado threat will be mainly late Tuesday into Wednesday night.

As of this update, new notifications are as follows:

- Effective at 12:00 PM, a Mandatory Evacuation Order has been issued for Evacuation Zones A & B.

Gas Station Updates:

- 7-11 at SR 31/SR 80 received a fuel shipment this morning. Pumps 11 and 12 are for LEO. Make contact inside for pumps to be turned on.
- 7-11 at Billy's Creek is out of gas. Expecting shipment today. Will set aside fuel for LEO at Pump #1. Make contact with employee to have pump turned on.
- Race Trac at Daniels/Powers Ct is out of gas. Shipment has been requested. Will set up pump for LEO use. In the past it has been Pump 18.
- 7-11 Daniels/Palomino is out of gas. Expecting shipment today and will contact me when they receive it. Pump 10 will be set aside for LEO.
- Rebel at 9281 Daniels Pkwy is out of gas. Requested shipment for today. Pump 1 will be set aside for LEO. Go inside to have pump turned on.
- 7-11 at 100 Delaware has 6800 gallons of gas for LEO.
- Circle K at SR 80/ Old Olga has fixed the pump and have a full tank for LEO. Make contact with employee for which pump to use.
- 7-11 at 12011 Gateway Blvd. has gas for LEO on Pump 2.
- 7-11 at Corkscrew and Three Oaks has gas for LEO on Pumps 13 - 16.
- RaceTrac at 6 Mile/Michael G Rippe is out of gas but requested shipment. They will set up a Pump #3 for LEO use when they get gas. Make contact with employee for pump to be turned on.
- 7-11 at 10875 Terminal Access Road has fuel and will reserve Pumps 9 and 10 for First Responders. The clerk can turn on the pump.
- Shell at 13621 N. Cleveland Ave. has LEO gas on Pump 1 & 2.
- Marathon at 14010 North Cleveland Ave. has gas.
- Mobile/7-11 at 17930 North Tamiami Tr. has LEO gas on Pump 11 & 12.
- Murphy Express at 520 Pine Island Rd. has about 3500 gallons of gas.
- Circle K at 4600 Bayline Dr. has 300 gallons for LEO.
- Rocket Gas at 5760 Bayshore Rd. has 3000 regular gas.
- Circle K at 6381 Bayshore Rd. has 500 gallons of gas for LEO.
- Loves at 17308 Park 78 Dr. has gas.
- 7-11 at 18971 Babcock Ranch Rd. has gas and expects another delivery tonight.
- Shell at 402 Del Prado in Cape Coral has gas.
- Shell at 7135 Maida Ln. has gas.
- Speedway at 1365 N. Tamiami Trl. has Premium only.

Sand Updates:

AMERICAN OVERSIGHT

- Sand and sandbags are being distributed by Lee County Sheriff's Office members to bulk distribution sites throughout the county. Individuals will have to go to a bulk distribution site to get sandbags.
    - Current stations with available sand and/or sandbags:
        - Station 102 at 44 Homestead Rd. S. in Lehigh Acres
        - Station 104 at Sunshine and 16th St. SW in Lehigh Acres
        - Tice Fire Buckingham Station at 5850 Buckingham Road
        - San Carlos Park Fire Station 54 at 16900 Oriole Rd.
        - Bayshore Fire at 17350 Nalle Rd.
        - Bonita Springs Fire at 27701 Bonita Grande Dr.
        - Bonita Springs Fire at 8850 W. Terry St. (Truck currently enroute)

Subject: Hurricane Milton - Update #19

As of this update, the latest storm information is as follows:

- The storm track has shifted north slightly. The movement is not far enough to make a difference in our impacts.
- The earliest reasonable arrival time of tropical-storm-force winds is early Wednesday morning.

As of this update, new notifications are as follows:

- The Hurricane Hotline is now active. Corrections personnel should call 239-477-1258, Law Enforcement personnel should call 239-477-1259, and Communications personnel should call 239-477-1260. Please save these numbers now in your phone. This hotline provides updates for personnel without access to e-mail. For now, all supervisors should relay all pertinent information to their personnel who do not have access to e-mail.
- Mandatory evacuations have been issued for the Town of Fort Myers Beach. Residents are encouraged to evacuate before 3:00 PM today.
- LeeTran at noon today, Monday, Oct. 7, will stop running routes onto Fort Myers Beach. All LeeTran services will convert to off-island transit only. This is to assist with the Town of Fort Myers Beach's request for residents to leave the island.
- Lee County Utilities will shut off water to Fort Myers Beach at noon Tuesday, Oct. 8. This is a precautionary measure to protect infrastructure. It was also implemented during 2022's Hurricane Ian.
- Lee County Sheriff's Office employees are currently in the field distributing sand and sand bags to locations throughout the county.

Gas Station Updates:

- 7-11 at SR 31/SR 80 received a fuel shipment this morning. Pumps 11 and 12 are for LEO. Make contact inside for pumps to be turned on.
- 7-11 at Billy's Creek is out of gas. Expecting shipment today. Will set aside fuel for LEO at Pump #1. Make contact with employee to have pump turned on.
- RaceTrac SR 31/ SR 80 has gas but expect to be out by noon and closed. Next shipment not expected until after the storm. They do not have a pump set aside for LEO.
- Circle K at SR 80/ Old Olga has fixed the pump and have a full tank for LEO. Make contact with employee for which pump to use.

AMERICAN OVERSIGHT

- Sunoco at SR 80 and Buckingham is out of gas but requested shipment. Will pump remaining for LEO. Make contact with employee inside for pump to be turned on.
- Rebel at 6 Mile/Metro currently has 8,000 gallons and will stop pumping at 800 gallons. They do not set aside gas for us. Unknown next shipment.
- RaceTrac at 6 Mile/Michael G Rippe is out of gas but requested shipment. They will set up a Pump #3 for LEO use when they get gas. Make contact with employee for pump to be turned on.
- Race Trac at Daniels/Powers Ct is out of gas. Shipment has been requested. Will set up pump for LEO use. In the past it has been Pump 18.
- 7-11 Daniels/Palomino is out of gas. Expecting shipment today and will contact me when they receive it. Pump 10 will be set aside for LEO.
- Rebel at 9281 Daniels Pkwy is out of gas. Requested shipment for today. Pump 1 will be set aside for LEO. Go inside to have pump turned on.
- Chevron at 13031 Metro is out of gas. Not expecting shipment. Will set a pump aside for LEO if they get gas.
- Circle K at Metro and Crystal is close to running out of gas and starting to shut pumps down. They are setting aside pumps 5-8 for LEO. Meet with employee for which pump to use.

Subject: Hurricane Milton - Update #18

As of the 8:00 AM update, a Hurricane Watch remains in effect for our area.

The IMT Main Number is 239-258-3150 or e-mail at IMT@sheriffleefl.org.

As of this update, the latest storm information is as follows:

- Hurricane Milton is now a major hurricane, with sustained wind speeds of 125 mph.
- Hurricane Milton is expected to have winds of 145 mph at landfall, with some expansion of hurricane-strength winds.
- The model spread in the forecast track remains high, with the entire area within the cone.
- Movement is ESE at 8 mph.
- The current earliest arrival of tropical-storm-strength winds is 1:00 AM on Wednesday, with a likely arrival time at 8:00 AM. This is the arrival of tropical-storm-force winds, not the arrival of the actual storm.
- The storm surge estimate is 5' to 10' for Lee County. It is expected to increase throughout the day on Wednesday and peak early Thursday.
- We are still in a Hurricane Watch, a Storm Surge Watch, and a Flood Watch.
- Many rivers are already in or forecast to go into flood stage.
- The main threat for tornadoes is late Tuesday into Wednesday night.
- Confidence is low on the exact track of the system, with the entire area within the cone. It should be noted that that 72 hour average track error is 100 miles.

As of this updates, new notifications are as follows:

- All personnel must notify IMT of all asset movements and personnel changes.
- Estero Fire Station #54 at Oriole and Alico just got sand delivered.
- Pine Island Fire has sand, but no sandbags.
- North Fort Myers Recreations Center has sand but no sandbags.

AMERICAN OVERSIGHT

- Corrections Transport vehicles have received their staging location and should be in place by 12:00 PM.
- Academy recruits and Youth Services deputies have been deployed to the field.

National Hurricane Center Definitions:

- **Hurricane Watch**: Hurricane conditions (sustained winds of 74 mph or greater) are possible within your area. Because it may not be safe to prepare for a hurricane once winds reach tropical storm force, The NHC issues hurricane watches 48 hours before it anticipates tropical storm-force winds.
- **Hurricane Warning**: Hurricane conditions (sustained winds of 74 mph or greater) are expected somewhere within the specified area. NHC issues a hurricane warning 36 hours in advance of tropical storm-force winds to give you time to complete your preparations. All preparations should be complete. Evacuate immediately if so ordered.
- **Storm Surge Watch**: There is a possibility of life-threatening inundation from rising water moving inland from the shoreline somewhere within the specified area, generally within 48 hours.
- **Extreme Wind Warning**: Extreme sustained winds of a major hurricane (115 mph or greater), usually associated with the eyewall, are expected to begin within an hour. Take immediate shelter in the interior portion of a well-built structure.

Sent: Monday, October 7, 2024 5:29 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: Hurricane Milton - Update #17

The 5:00 AM update shows that the track is largely unchanged; however, models still vary from Naples to North of Tampa, and the intensity is forecast to be stronger, well into the Category 4 range.

As of this update, new notifications are as follows:

- The storm has current maximum winds of 100 mph.
- The current forecast for our coast is an 8' - 12' storm surge.
- The storm has slowed somewhat, so the earliest arrival of Tropical Storm force winds is now in the early Wednesday morning hours.

Subject: Hurricane Milton - Update #16

AMERICAN OVERSIGHT

The 11:00 PM update shows little movement in Hurricane Milton's track. Maximum sustained wind speeds are at 90 mph. Model tracks vary widely on the landfall location along Florida's West Coast. The Incident Management Team will continue to monitor and provide timely updates.

As of this update, new notifications are as follows:

Gas Availability:

- RaceTrac - 15820 Winkler Rd. - Pump 15 & 16 for First Responders - Contact is Tracy
- 7-11 - 12750 Cleveland Ave. - Pump 10 & 12 for First Responders - Contact is Vanilla
- RaceTrac - 5991 South Pointe Blvd. - Pump 19 & 20 for First Responders - Contact is Vince
- Mobil/7-11 - 20391 Summerlin Rd. - Pump 6 for First Responders - Contact is Susan
- Circle K - 20021 Summerlin Rd. - Pump 1 for First Responders - Contact is Kyle
- 7-11 - 15021 McGregor Blvd. - Pump 1 for First Responders - Contact is Jessica
- Mobil/7-11 - 17930 N. Tamiami Trl. - Pump 9 & 10 for First Responders - Contact is Joseph
- Circle K - 6381 Bayshore Rd. - Pump 10 for First Responders - Contact is Elizabeth
- Circle K - 19101 N. Tamiami Trl. - Pump 1 & 2 for First Responders - Contact is Christy
- 7-11 - 100 Delaware in Lehigh Acres - Pump 1 & 2 for First Responders.

From: IMT <IMT@sheriffleefl.org>
Sent: Sunday, October 6, 2024 8:57 PM
To: All Users <AllUsers@sheriffleefl.org>
Subject: Hurricane Milton - Update #15

As of the 8:00 PM National Hurricane Center update, Hurricane Milton is still forecast to rapidly intensify into a major hurricane. The center of the track has shifted further south, and is currently near the Bradenton/Sarasota area at landfall.

There is a Flood Watch for the entire area. Rainfall amounts of 5 to 10 inches, with localized totals of up to 15 inches are expected. The timing of the impacts is as early as late Tuesday and continuing into Thursday morning.

A good deal of uncertainty remains with where the storm will make landfall. It should be noted that the average NHC track error at day 3 is around 100 miles.

As of this update, new notifications are as follows:

- Youth Services and Training personnel have received their assignments and will report according to their schedule tomorrow.
- Court Operations and Civil personnel will receive their schedule tomorrow.
- Employee Assistance personnel are done for the evening. They will resume in the morning.
- IMT will be fully activated beginning at 7:00 AM on Monday, with all personnel reporting or receiving their assignments by then.
- For personnel working overtime, please use *Hurricane Milton* as the reason for the overtime.
- The 7-11 Gas station at 103 Leeland Heights Blvd W in Lehigh Acres is open for LEO. If you need gas, use pumps 3,4,5, or 6 only. Jessica is the contact person there.
- The 7-11 at 100 Delaware Rd. in Lehigh Acres is reserving gas for First Responders. use Pump 3 and 4. Sharon is the contact person there.
- The 7-11 at 18971 Babcock Ranch Rd is holding gas for first responders but deputies must go inside to request pump to be turned on.

AMERICAN OVERSIGHT

- The 7-11 at Del Prado and N Tamiami (17930 N Tamiami Trl.) is also holding gas for first responders but deputies must go inside to request the pump be turned on.

All personnel should be ready for a full activation at any time. This is a serious, dangerous storm and all personnel should complete preparations as soon as possible. Models vary in intensity, but most predict *at least* a Category 3, so even if we do not receive a direct hit, we can expect hurricane strength winds or wind gusts and a severe storm surge.

From: IMT <IMT@sheriffleefl.org>
Sent: Sunday, October 6, 2024 5:41 PM
To: All Users <AllUsers@sheriffleefl.org>
Subject: Hurricane Milton - Update #14

As of the 5:00 PM update, Milton is now a hurricane. Hurricane Milton has maximum sustained winds of 85 mph. The track has shifted slightly, and there is a more northeastern path across our area. Even if we do not receive a direct hit, we will receive tropical storm and hurricane strength winds, significant storm surge, and dangerous flooding from rainfall, likely much greater that what we received from Hurricane Helene. By tonight, all personnel should have their homes and families secured for the storm, and be prepared for a full activation.

Notifications for this update:

- All agency members deemed non essential during an emergency response will be dismissed tomorrow, October 7th, 2024 starting at **noon**. In order to stay home you will need to advise your immediate supervisor and use your accrued time. You may report for regular duty if you chose to do so. As always, use caution when driving in inclement weather and do not attempt to traverse standing water. IMT will continue to send out updates on our response to TS Milton.

- The Emergency Operations Center (EOC) will transition to a Level 1 at 7:00 AM tomorrow. This means that shelters and countywide operations will be run out of the EOC. The Incident Management Team is your contact for agency needs; do not contact the EOC directly.

- N Cleveland and Littleton 7/11

Below are the current updated tasks that IMT has been working on since that last updates:

- Logistics members have scheduled pre-storm deliveries for food and beverages - the arrival time is Tuesday morning.
- Logistics members have scheduled post-storm deliveries from vendors.
- Logistics members have scheduled water deliveries.
- Logistics members have created plans for replenishment of supplies for long-term activations.
- Logistics members have arranged for ice deliveries for the event power is lost.
- Purchasing members have made plans for the procurement of potable water.
- Purchasing and Logistics members have scheduled the delivery of portable bathrooms should they be needed.
- HQ will be the central location for cooking needs post-storm for employees at HQ/IMT, Forensics, MCU, Command Staff, Spec Ops, and Staging personnel.
- Precincts and Corrections facilities will be responsible for their meal preparations.

Subject: Tropical Storm Milton - Update #12

The 11:00 AM update shows a small track shift to the south. Although it is still predicted to directly hit the Tampa Bay Area, the move slightly south may bring higher wind speeds and higher storm surge. The storm is expected to quickly intensify and will likely be a major hurricane upon arrival.

All personnel are encouraged to complete preparations for their homes and their families today.

AMERICAN OVERSIGHT

There is still a high degree of uncertainty in both the tracks and the wind speed upon arrival, so the possibility of a direct strike to our area remains. The cone of uncertainty currently covers most of the Florida peninsula. The Incident Management Team (IMT) will keep you informed, and is making preparations to include schedule planning.

Subject: Tropical Storm Milton - Update #8

AMERICAN OVERSIGHT

The 8:00 AM update shows that Milton is forecast to become a Major Category 3 Hurricane before making landfall. Timing, tracks, and intensity are still unpredictable; however, the National Hurricane Center still shows the track toward the Tampa area.

The current forecast is as follows:

- There is a Flood Watch for the entire area through Thursday.
- Rainfall in the amount of 5" to 8", with localized totals up to 12".
- The timing of the impacts is from late Tuesday through early Thursday morning, but it is expected to make landfall on the West Coast on Wednesday.
- There is great uncertainty about where the storm will make landfall. The average Day 4 track error is around 150 miles, so we are still well within a possible landfall range.
- The current earliest wind time arrival is 4 PM on Tuesday, and the most likely arrival time is 2 AM on Wednesday.

Additional notifications for this update include:

- Personnel should maintain at least ½ tank at all times. Due to current fuel runs, please use any opportunity to make sure your agency vehicle stays full at all times.
- Personnel who must fuel and have no other options may use 89 or 93 Octane fuel.
- Select IMT members have been activated. Please send requests to IMT@sheriffleefl.org.
- The select CRU members who were notified individually will report at 10:00 AM to the Headquarters Training Room (1202).
- The asset movement members who were notified individually will report at 10:00 AM to the Headquarters Training Room (1202).
- All units, components, precincts, corrections facilities, and all affected agency departments should fill up all available gas cans and gas tanks.
- Pine Island Fire Department is out of sand. They still have sandbags. They expect to get more sand on Monday.

Sent: Saturday, October 5, 2024 6:19 PM
To: All Users <AllUsers@sheriffleefl.org>
Subject: Tropical Storm Milton - Update #7

With the 5:00 PM update, Tropical Storm Milton is now expected to arrive as a major hurricane. The track has shifted some to the north; however, some model tracks still show direct hits our our area, and we are still in the cone of uncertainty. Please recall from prior storms that although we are not in the direct path, the effects of the hurricane will still affect us heavily, especially in the areas prone to storm surge. Additionally, the peak storm surge from Helene arrived almost 10 hours after the peak winds, so all personnel should be aware of and consider the effects before, during, and after the storm.

The below preparations remain in effect. The only change for this period is:

- Four (4) additional shallow water vessels have been obtained for water rescues.
- Additional High-Water Vehicles have been obtained and will be deployed to the islands for potential high-water rescues.
- The San Carlos Park Fire Department is out of sand and sandbags.

Subject: Tropical Storm Milton - Update #6

As of a 12:25 PM National Hurricane Center update, Tropical Storm Milton has formed. This storm is forecast to strengthen and bring the risk of life-threatening impacts to portions of the West Coast of Florida next week. The maximum winds are currently estimated at 40 mph with higher gusts. Models range in intensity from a Tropical Storm to a Major Hurricane, so there is tremendous unpredictability in the strength upon arrival.

At this time, the Incident Management Team is preparing for the possibility of a major hurricane affecting our area with impacts beginning on Tuesday and a full impact on Wednesday.

All agency personnel are encouraged to prepare as follows:

- All personnel should review their hurricane plans, and prepare their homes and families for the possibility of a hurricane impact in the middle of next week.
- All precincts should secure their mobile assets (decoy vehicles, arrow boards, trailers, ATVs, etc.) beginning on immediately to be completed by 2:00 PM on Monday.
- All trailers should be brought to storage beginning immediately to be completed by 2:00 PM on Monday.
- All personnel should use the remainder of this weekend to prepare for a possible activation. This plan should include three days worth of food, uniforms, and supplies.
- All personnel should use the remainder of this weekend to prepare their uniforms and equipment (including sufficient batteries for equipment) for a possible activation.
- All specialty units should begin bringing their assets back to their storage areas and secure locations. This should be completed by 2:00 PM on Monday.
- All precincts should secure any items that can be moved by the wind to a secure location starting immediately to be completed by 2:00 PM on Monday.
- All Corrections facilities (including Nan's Ranch) should prepare their facilities for a possible hurricane impact next week.

This is new information as of this update:

- The Waterborne Strike Team is on standby for deployment for water rescues.
- JetBlue Stadium, CenturyLink Stadium, the Lee County Gun Range, and the Andrea Lane and Sivan Road storage buildings are prepared to receive assets if needed.
- The Marine Unit is in contact with the IMT to secure the marine assets.
- Known sandbag locations are as follows:
    - Punta Gorda—Free sandbags will be available at 3130 Cooper St., the last entrance on the left by flag poles.
    - Fort Myers Beach—Sand is located off of Gulf Beach Road, and bags are available at Town Hall, 2731 Oak St. (The location will provide service until 4:30 p.m. on Friday and begin Monday at 8:30 a.m.)
    - Fort Myers— South Trail Fire & Rescue will have sand and sandbags available at station 63, 5531 Halifax Ave., Fort Myers—a maximum of 20 bags per household. UPDATE: South Trail Fire & Rescue is currently out of sand. Empty sandbags only are available.
    - Naples— Sandbags will be available at three public park locations: Big Corkscrew Island Regional Park, 810 39th Ave., North Collier Regional Park, 15000 Livingston Road, in the Sun-N-Fun Lagoon parking lot, and at Donna Fiala Eagle Lakes Community Park, 11565 Tamiami

AMERICAN OVERSIGHT

Trail East, in the grassy area between the parking lots. The Naples sandbag locations will begin service at 8 a.m. through dusk on Saturday and Sunday.
    - San Carlos Park—Sand and sandbags are available at San Carlos Park Fire District Station 54, located at 16900 Oriole Road. There is a limit of 10 bags per household. Bags can be picked up at the lobby. Bring your own shovel. Be prepared to fill and load your own sandbags. Make sure your vehicle can transport the weight of the sandbags.
    - North Fort Myers—Sandbags will be located at North Fort Myers Parks and Recreation, 2000 N. Recreation Parkway. Sand will be located in the back of the park, next to the county mulch pile. Please bring your own shovel to fill the bags.
    - Matlacha—Sandbags are available for pickup at Station 1, located at 5700 Pine Island Rd, Bokeelia, FL 33922
- IMT personnel are visiting the precincts, and the storage locations to inventory assets to prepare for both securement and post-storm deployment.
- No schedule changes are expected between now and Monday afternoon; however, all personnel should be prepared for schedule adjustments.
- The Agriculture assets are secured on the Olga site.

Subject: Important Update on a possible impending hurricane impacting our area (Update #5)

Team,

IMT has been working on preparation for a potential Hurricane impacting our area early next week. IMT will continue to send out updates regularly so please monitor your email closely. All agency units need to begin preparations of securing their assigned assets and communicate all movement to IMT. Also, update the major asset application on the intranet. We have secured Jet Blue Park as an asset staging area for Marine and other assets. Agency asset storage facilities to include the gun range are preparing to house assets as well. IMT is securing high water vehicles that will be pre-staged at strategic locations i.e., the barrier islands. IMT members will be in the RTIC today coordinating efforts. Agency extension 239-258-3150 is being setup to communicate to IMT staff. Additional updates to follow.

Be prepared and be safe!

Subject: New Caribbean Disturbance - Update #4

The National Hurricane Center 2:00 PM update shows the possibility of development as the low pressure area in the Gulf of Mexico moves slowly eastward or northeastward. A tropical or subtropical depression or storm could form during the early to middle part of next week if the low remains separate from a frontal boundary that is forecast to extend across the Gulf of Mexico. Regardless of development, locally heavy rains could occur over portions of the Florida Peninsula late this weekend into next week. As of this update, the formation chance in the next 48 hours is low at 10 %, and the formation chance through 7 days has increased to 50%.

AMERICAN OVERSIGHT

Current model runs show an arrival time of any potential storm around Wednesday of next week. This represents a slower forward storm speed and later storm arrival than previous model runs, so the timing and impacts are still largely unknown. Regardless of any potential storm, significant rainfall is still expected, and the Incident Management Team will continue to monitor and update all personnel.

From: IMT <IMT@sheriffleefl.org>
Sent: Thursday, October 3, 2024 9:56 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance - Update #3

The National Hurricane Center has reduced the chance of tropical cyclone development within seven days to 30%. While the system is likely to develop over the Gulf of Mexico late this weekend or early next week, subsequent tropical or subtropical development could be limited by the system's potential interaction with a frontal boundary. Regardless of development, locally heavy rains could occur over portions of the Florida Peninsula next week.

From: IMT <IMT@sheriffleefl.org>
Sent: Wednesday, October 2, 2024 12:08 PM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance - Update #2

The forecast for the area of disorganized showers remains the same; it is still too early to tell if the system will develop further. Regardless of development, heavy rain is expected in our area into the weekend and next week. The Incident Management Team will continue to monitor.

From: IMT <IMT@sheriffleefl.org>
Sent: Tuesday, October 1, 2024 10:35 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance - Update #1

The area of disorganized showers remains at a 40% chance of development. The National Hurricane Center indicates that environmental conditions could support some gradual development of this system, and a tropical depression could form towards the end of this week or this weekend while it moves generally northwestward over the northwestern Caribbean Sea and into the Gulf of Mexico. As of this time, there are no changes, but some long range models show an increased chance of this disturbance affecting our area.

From: IMT <IMT@sheriffleefl.org>
Sent: Monday, September 30, 2024 8:11 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance

The Incident Management Team is monitoring a new area of disorganized showers and thunderstorms over the western Caribbean Sea. The National Weather Center states that the system has a medium chance (40%) of developing towards the middle to latter part of the week as it moves northwestward into the Gulf of Mexico. As this disturbance moves into the gulf, increasing moisture is expected over the Florida Peninsula and elevated rain chances are anticipated from Friday through the weekend, and possibly into early next week.

AMERICAN OVERSIGHT

Unfortunately, long range models show the possibility of direct impacts for Southwest Florida; however, It is too early to determine what, if any, tropical specific impacts can be expected.

The Incident Management Team will continue to monitor the storm, and will continue to provide updates through this very active part of the hurricane season.

Dear Valued Hotwire Communications Customer,

As Florida prepares for the impact of Hurricane Milton, we want to assure you that Hotwire Communications is ready to keep you connected.

We understand the importance of our services to you. Our team at the Hotwire Technology Center – a secure Category 5-proof facility in South Florida – will continuously monitor the storm and our network. We expect minimal to no signal disruption during the storm.

Due to the widespread impact of Hurricane Milton across Florida, you may experience longer hold times as our employees work to assist as many customers as possible while also attending to their own homes and families. We apologize for

AMERICAN OVERSIGHT

the inconvenience and appreciate your patience during this time.

We encourage you to visit the Hotwire Communications Storm Hub for helpful tutorials on what to do if you experience a service interruption due to power outages.

In preparation for the storm, please note the following:

- Check the Fision app to see if we've declared an outage in your area. Rest assured, we will work to restore service as quickly and safely as possible.
- Download the Fision app for Android or Apple.
- Our Fision Response team will respond to outages and begin restoring services once it is deemed safe to do so.
- We are following advisories from local government and emergency responders to keep you informed and updated.
- Our Customer Care agents are available for 24/7 assistance at 1-800-355-5668.

For official weather advisories, please visit the National Hurricane Center website at www.nhc.noaa.gov.

Thank you for your continued trust in Hotwire Communications.

Sincerely,
Hotwire's Fision Response Team

Looking your best on zoom ***(*Reminders for even the most seasoned of guests!*)*****:**
- Ensure you have strong internet connection. *NOT in a car.
- The background shouldn't be too distracting. Ideally the interview would be done in an office or living room setting.
- Make sure the device you use to film the interview (phone, laptop, etc) is stabilized and raised to be eye level.
- What to wear: Business attire encouraged / dress for the context of the interview or as it relates to your expertise. If you are wearing glasses make sure there is no glare.

Where to watch:
- Find your NewsNation channel here: https://www.newsnationnow.com/channel-finder/
- Upon request, I can send a link to the segment after the show.
- You can also keep up with "The Balance" guests on X! https://twitter.com/OnBalanceGuests
- NewsNation reaches nearly 70 million television households across the US. NewsNation is available on every major cable and satellite providers, streaming platforms including YouTubeTV, Hulu, DirecTV Stream, FuboTV and Sling, online at www.newsnationnow.com, and on the NewsNationNow app.

Dear Capt. Iriarte,

As we cover the latest on the hurricane on NewsNation, our 7pm host Leland Vittert would love to offer **Sheriff Marceno** time to share with our viewers the latest on the storm and how Floridians can keep safe. The interview would be **LIVE tonight at 7:40pm ET** via zoom for 4-6 minutes. He has been on our program "On Balance" once before and hopefully remembers having an informative interview with Leland.

As you may know, NewsNation is the fastest growing cable news outlet in primetime, reaching nearly **70 million television households** across the United States, which means we broadcast to **92% of all cable TV homes**. Plus, each interview has the potential to run across **200 local news stations** within the Nexstar family, **including stations in Florida,** so our *potential reach* is incredibly powerful.

Let me know ASAP if you are interested in exploring this.

AMERICAN OVERSIGHT

CBS National/ NewsNation Hurricane Milton- Talking Points

Anticipated Questions (provided by CBS):

-Does LCSO force people from homes during mandatory evacuation? LCSO does not remove people from their homes. We have Deputies and sign boards at the entrance and exit of every barrier island letting residents know the evacuation orders sent be the EOC, and informing them of the dangers.

-If people do not evacuate, what concerns does Sheriff have for their safety? When winds reach 45 miles per hour, and flooding closes roadways, we will be unable to come and help you until after the storm. Residents need to leave now, and understand the dangers mother nature has with these unpredictable storms.

Updates from IMT (10/7 @1:30):

-The County has opened three shelters, more are planned.

-Message boards and deputies are located at each entrance and exit to barrier islands informing residents of the Counties evacuation orders, and informing them of dangers if staying.

-All Student Resource Officers (SROs) are assisting with preparing residents on the barrier islands, and assisting Patrol.

-LCSO personnel and heavy equipment are loading four dump trucks to deliver sand for sandbags throughout the county at fire stations to assist county with more locations.

-Marine Unit has moved most of their boats farther inland. Last remaining boats are for heavy weather rescue and will remove when conditions worsen.

AMERICAN OVERSIGHT

Hurricane Milton

-The Lee County Sheriff's Office Incident Management Team is actively monitoring Hurricane Milton and is FULLY activated.

-Milton is expected to continue intensify and will make landfall on the west coast of the Florida's peninsula.

-At this time, exact landfall is uncertain but Lee County is expected to experience storm impacts to include SURGE.

-Just as you would all prepare for a storm at home, LCSO has done the same. We have secured all mobile assets to include our Marine Unit vessels due to the anticipated impacts from Milton.

-LCSO is READY! Our Waterbourne Strike Team and Marine Unit, Special Ops are standing by should the need arise to rescue people.

-That being said, know your Evacuation Zone and be prepared to leave if your zone is called.

-Four (4) additional shallow water vessels have been obtained for water rescues.

-Additional High-Water Vehicles have been obtained and will be deployed to the islands for potential high-water rescues.

-We urge everyone to prepare for this storm! Prepare for the worst, but hope for the best!

AMERICAN OVERSIGHT

-We know what Mother Nature can do! She is unpredictable, which is why we urge everyone NOT to wait until the last minute to have everything that you need.

-Make sure you have necessary hurricane supplies: enough food, water, and medicine for several days.

-Have a hurricane plan with your family and be up to date with it. Topics should include an evacuation plan, sheltering in place, pets, miscellaneous family needs.

-Milton is now a MAJOR HURRICANE

-LCSO administrative services at precinct offices will be halted unit after the storm so we can focus on preparation and possible recovery efforts.

-Once we get sustained winds of 45 MPH, emergency response is stopped until it's safe to respond to calls.

-It could take several hours or more for the winds to subside before a deputy is able to respond, once the impacts begin. SHELTER IN PLACE.

-Don't try to drive anywhere in inclement conditions as the roadways are not safe.

-Do NOT go outside during the storm as wind and standing water create hazard that can be fatal.

-Remember the three phases of the storm: BEFORE, DURING, and AFTER. Have your plan for all three.

AMERICAN OVERSIGHT

-Continue to monitor your local media for weather updates, as well as the Lee County Sheriff's Office and Lee County Government on social media for the latest updates.

-WE ARE SWFL STRONG and are IN THIS TOGETHER

AMERICAN OVERSIGHT

Sheriff to interview with Nichole Berlie from News Nation in regards to Hurricane Milton.

Will be via Zoom in LCSO assigned room at EOC

IT will transport and set up Zoom gear in room.

Zoom info forthcoming

Lt. Fine and Julie to attend.

Talking Points:

Hurricane Milton

-The Lee County Sheriff's Office Incident Management Team is working 24/7 to monitor the storm and deploy assets anywhere they need to be.

-At this time, exact landfall is uncertain but Lee County is expected to experience hurricane-level impacts to include SURGE up to 12 feet.

-Just as you would all prepare for a storm at home, LCSO has done the same. We have secured all mobile assets to include our Marine Unit vessels due to the anticipated impacts from Milton.

-Our Waterbourne Strike Team and Marine Unit, Special Ops are standing by should the need arise to rescue people.

AMERICAN OVERSIGHT

-That being said, know your Evacuation Zone and be prepared to leave if your zone is called.

-A and B have been called to evacuate

-Four (4) additional shallow water vessels have been obtained for water rescues.

-Additional High-Water Vehicles have been obtained and will be deployed to the islands for potential high-water rescues.

-We urge everyone to prepare for this storm! Prepare for the worst, but hope for the best!

-We know what Mother Nature can do! She is unpredictable, which is why we urge everyone NOT to wait until the last minute to have everything that you need.

-Make sure you have necessary hurricane supplies: enough food, water, and medicine for several days.

-Milton is now a CATEGORY 5 STORM.

-Don't get too caugh up in the category. The STORM SURGE is the most lethal part of any hurricane.

-LCSO administrative services at precinct offices will be halted unit after the storm so we can focus on preparation and possible recovery efforts.

-Once we get sustained winds of 45 MPH, emergency response is stopped until it's safe to respond to calls.

-It could take several hours or more for the winds to subside before a deputy is able to respond, once the impacts begin. SHELTER IN PLACE.

-Don't try to drive anywhere in inclement conditions as the roadways are not safe.

AMERICAN OVERSIGHT

-Do NOT go outside during the storm as wind and standing water create hazard that can be fatal.

-Remember the three phases of the storm: BEFORE, DURING, and AFTER. Have your plan for all three.

-Continue to monitor your local media for weather updates, as well as the Lee County Sheriff's Office and Lee County Government on social media for the latest updates.

Subject:	News Nation Interview
Location:	EOC - 2675 Otriz Avenue
Start:	Tue 10/8/2024 1:00 PM
End:	Tue 10/8/2024 1:30 PM
Recurrence:	(none)
Meeting Status:	Accepted
Organizer:	Christopher Fine
Required Attendees:	Carmine Marceno; John Holloway; Christopher Lalor; James Heuglin; Anita Iriarte; Todd Olmer; Sarah Rodriguez; Nestor Montoya; Jessie Santero; Julie Martin; Autumn King; Robert DeAngelo; Herbert Ellis; Katie Walter; Tara Thrower; Joshua Hanchey; Mark Shelly
Optional Attendees:	Kevin Ellis; Jonathan Taylor

Sheriff to interview with Nichole Berlie from News Nation in regards to Hurricane Milton.

Will be via Zoom in LCSO assigned room at EOC

IT will transport and set up Zoom gear in room.

Logon time/hit time:
Log on time: 1:00est
Hit time: 1:09 est
The interview is about five minutes. Our control room will conduct a quick tech check with you and frame your shot
Zoom link:
https://nexstar.zoom.us/j/91695641844

Lt. Fine and Julie to attend.

Talking Points:

Hurricane Milton

Jail Updates:

-The Jail and CORE facilities are 100% staffed.

-All inmates are in hardened structures.

-Water tanks are on standby if needed for drinking and sanitation.

-Kitchen is staffed and has two-weeks of food for inmates and staff.

AMERICAN OVERSIGHT

-Medical staff will maintain 24/7 care.

-Inmates will be evacuated to top floors in case of flooding.

-Both facilities have room and contingency plans if one needs to evacuate to the other. Vehicles and personnel are staged.

LCSO Updates:

-(Anticipated Sanibel question) To assisted the City of Sanibel, we conducted a brief assessment of travel on and off the island to more effectively deploy resources.

-The Lee County Sheriff's Office Incident Management Team is actively monitoring Hurricane Milton and is FULLY activated.

-Message boards and deputies are located at each entrance and exit to barrier islands informing residents of the Counties evacuation orders, and informing them of dangers if staying.

-All Student Resource Officers (SROs) are assisting with preparing residents on the barrier islands, and assisting Patrol.
-LCSO personnel and heavy equipment are loading four dump trucks to deliver sand for sandbags throughout the county at fire stations to assist county with more locations.
-Marine Unit has moved most of their boats farther inland. Last remaining boats are for heavy weather rescue and will remove when conditions worsen.
-We've ensured there is enough manpower staged and in place right up to, and immediately after the storm.

-Post storm we have multiple layers of communication so at the PUSH OF THE BUTTON we will deploy.

-LCSO is READY! Our Waterbourne Strike Team and Marine Unit, Special Ops are standing by should the need arise to rescue people.

AMERICAN OVERSIGHT

-Four (4) additional shallow water vessels have been obtained for water rescues.

-Additional High-Water Vehicles have been obtained and will be deployed for potential high-water rescues.

-LCSO administrative services at precinct offices will be halted unit after the storm so we can focus on preparation and possible recovery efforts.

-Once we get sustained winds of 45 MPH, emergency response is stopped until it's safe to respond to calls.

-It could take several hours or more for the winds to subside before a deputy is able to respond, once the impacts begin. SHELTER IN PLACE.

-Don't try to drive anywhere in inclement conditions as the roadways are not safe.
-We urge everyone to prepare for this storm! Prepare for the worst, but hope for the best!

-We know what Mother Nature can do! She is unpredictable, which is why we urge everyone NOT to wait until the last minute to have everything that you need.

-Do NOT go outside during the storm as wind and standing water create hazard that can be fatal.

-Remember the three phases of the storm: BEFORE, DURING, and AFTER. Have you plan for all three.

-Continue to monitor your local media for weather updates, as well as the Lee County Sheriff's Office and Lee County Government on social media for the latest updates.

-WE ARE SWFL STRONG and are IN THIS TOGETHER

AMERICAN OVERSIGHT

Thank you for your time today. See you soon!
The time moved up 15 minutes. I hope that's ok. Let me know.

Please confirm you received this.

Good afternoon,

I was wondering if we can schedule an interview tomorrow with the Sheriff or someone to give updates on Hurricane Milton. We were looking to interview around 12:15 est.

Let me know and stay safe.

Best regards,

FL-LEE-24-2340-A-000881

Looking your best on zoom ***(*Reminders for even the most seasoned of guests!*)*****:**
- Ensure you have strong internet connection. *NOT in a car.
- The background shouldn't be too distracting. Ideally the interview would be done in an office or living room setting.
- Make sure the device you use to film the interview (phone, laptop, etc) is stabilized and raised to be eye level.
- What to wear: Business attire encouraged / dress for the context of the interview or as it relates to your expertise. If you are wearing glasses make sure there is no glare.

Where to watch:
- Find your NewsNation channel here: https://www.newsnationnow.com/channel-finder/
- Upon request, I can send a link to the segment after the show.
- You can also keep up with "The Balance" guests on X! https://twitter.com/OnBalanceGuests
- NewsNation reaches nearly 70 million television households across the US. NewsNation is available on every major cable and satellite providers, streaming platforms including YouTubeTV, Hulu, DirecTV Stream, FuboTV and Sling, online at www.newsnationnow.com, and on the NewsNationNow app.

Dear Capt. Iriarte,

As we cover the latest on the hurricane on NewsNation, our 7pm host Leland Vittert would love to offer **Sheriff Marceno** time to share with our viewers the latest on the storm and how Floridians can keep safe. The interview would be **LIVE tonight at 7:40pm ET** via zoom for 4-6 minutes. He has been on our program "On Balance" once before and hopefully remembers having an informative interview with Leland.

As you may know, NewsNation is the fastest growing cable news outlet in primetime, reaching nearly **70 million television households** across the United States, which means we broadcast to **92% of all cable TV homes**. Plus, each interview has the potential to run across **200 local news stations** within the Nexstar family, **including stations in Florida,** so our *potential reach* is incredibly powerful.

Let me know ASAP if you are interested in exploring this.

AMERICAN OVERSIGHT

CBS National/ NewsNation Hurricane Milton- Talking Points

Anticipated Questions (provided by CBS):

-Does LCSO force people from homes during mandatory evacuation? LCSO does not remove people from their homes. We have Deputies and sign boards at the entrance and exit of every barrier island letting residents know the evacuation orders sent be the EOC, and informing them of the dangers.

-If people do not evacuate, what concerns does Sheriff have for their safety? When winds reach 45 miles per hour, and flooding closes roadways, we will be unable to come and help you until after the storm. Residents need to leave now, and understand the dangers mother nature has with these unpredictable storms.

Updates from IMT (10/7 @1:30):

-The County has opened three shelters, more are planned.

-Message boards and deputies are located at each entrance and exit to barrier islands informing residents of the Counties evacuation orders, and informing them of dangers if staying.

-All Student Resource Officers (SROs) are assisting with preparing residents on the barrier islands, and assisting Patrol.

-LCSO personnel and heavy equipment are loading four dump trucks to deliver sand for sandbags throughout the county at fire stations to assist county with more locations.

-Marine Unit has moved most of their boats farther inland. Last remaining boats are for heavy weather rescue and will remove when conditions worsen.

AMERICAN OVERSIGHT

Hurricane Milton

-The Lee County Sheriff's Office Incident Management Team is actively monitoring Hurricane Milton and is FULLY activated.

-Milton is expected to continue intensify and will make landfall on the west coast of the Florida's peninsula.

-At this time, exact landfall is uncertain but Lee County is expected to experience storm impacts to include SURGE.

-Just as you would all prepare for a storm at home, LCSO has done the same. We have secured all mobile assets to include our Marine Unit vessels due to the anticipated impacts from Milton.

-LCSO is READY! Our Waterbourne Strike Team and Marine Unit, Special Ops are standing by should the need arise to rescue people.

-That being said, know your Evacuation Zone and be prepared to leave if your zone is called.

-Four (4) additional shallow water vessels have been obtained for water rescues.

-Additional High-Water Vehicles have been obtained and will be deployed to the islands for potential high-water rescues.

-We urge everyone to prepare for this storm! Prepare for the worst, but hope for the best!

AMERICAN OVERSIGHT

-We know what Mother Nature can do! She is unpredictable, which is why we urge everyone NOT to wait until the last minute to have everything that you need.

-Make sure you have necessary hurricane supplies: enough food, water, and medicine for several days.

-Have a hurricane plan with your family and be up to date with it. Topics should include an evacuation plan, sheltering in place, pets, miscellaneous family needs.

-Milton is now a MAJOR HURRICANE

-LCSO administrative services at precinct offices will be halted unit after the storm so we can focus on preparation and possible recovery efforts.

-Once we get sustained winds of 45 MPH, emergency response is stopped until it's safe to respond to calls.

-It could take several hours or more for the winds to subside before a deputy is able to respond, once the impacts begin. SHELTER IN PLACE.

-Don't try to drive anywhere in inclement conditions as the roadways are not safe.

-Do NOT go outside during the storm as wind and standing water create hazard that can be fatal.

-Remember the three phases of the storm: BEFORE, DURING, and AFTER. Have your plan for all three.

AMERICAN OVERSIGHT

-Continue to monitor your local media for weather updates, as well as the Lee County Sheriff's Office and Lee County Government on social media for the latest updates.

-WE ARE SWFL STRONG and are IN THIS TOGETHER

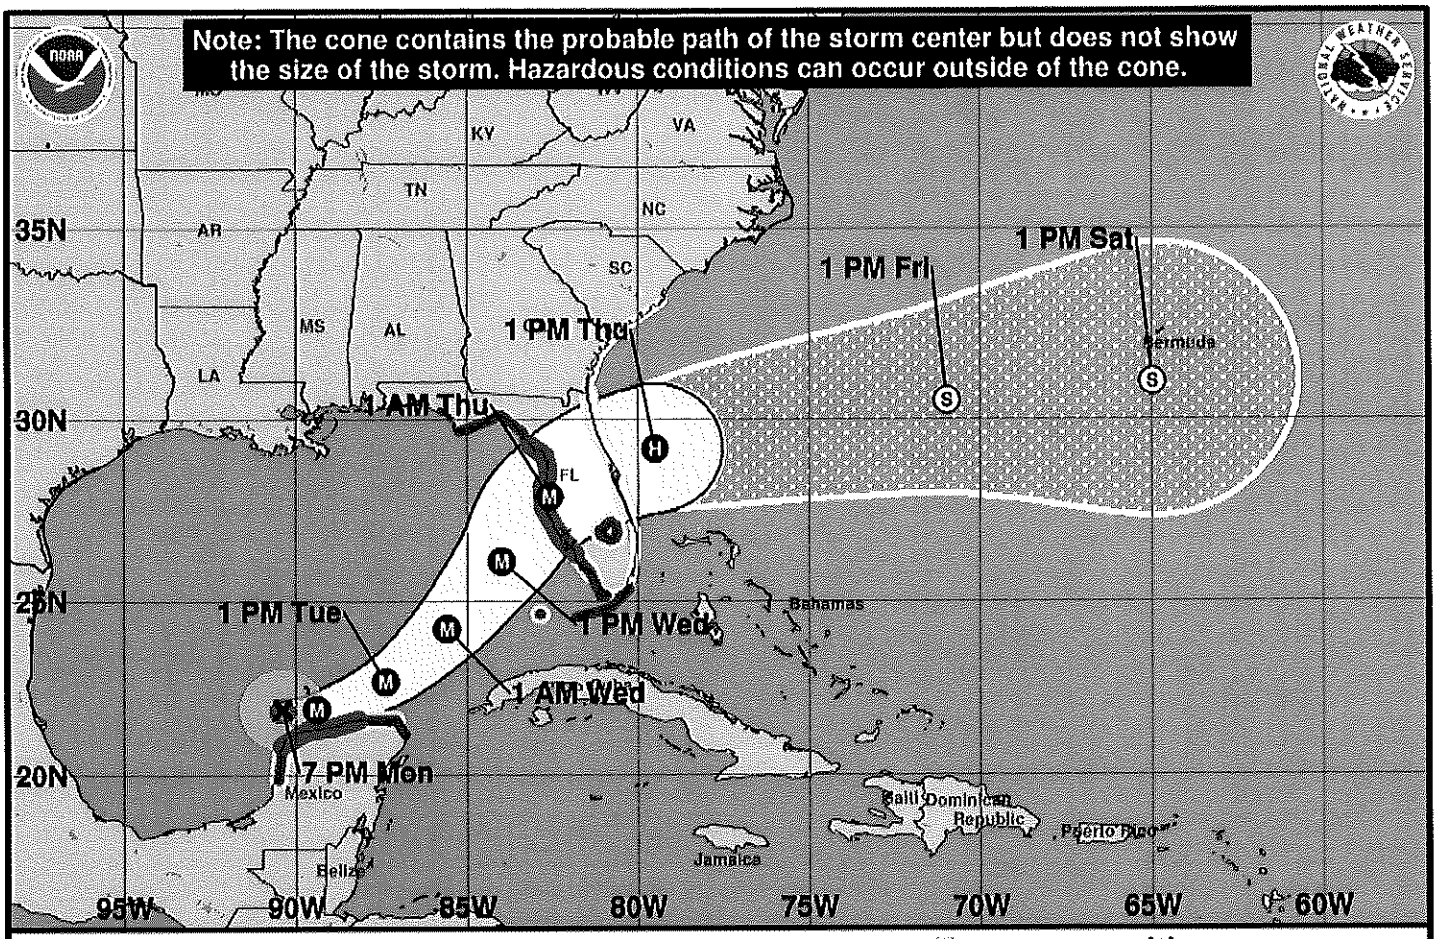
Subject: Hurricane Milton - Update #22

As of this update, the latest storm information is as follows:

- The maximum sustained winds are currently 180 mph at a speed of 10 mph, with a Minimum Central Pressure of 897 mb.
- A Storm Surge Warning has been issued for Lee County, with an estimated 6-10 ft of surge expected.
- Lee County is also facing a potential for moderate flooding from rain over the next 48 hours.
- The earliest arrival time for tropical-storm-strength winds is still showing as Wednesday around 8:00 AM.



As of this update, new notifications are as follows:

- Island Coast HS Shelter is a designated shelter currently open with approximately 93 present.
- Estero Rec Center is a designated shelter currently open with approximately 75 present.
- Other shelters will be opening tomorrow morning and will be staffed starting at 7am.
- The EOC is currently at a Level 1 Full Activation.
- As of 12pm today, all Lee County Government facilities are closed.
- All LCSO non-essential will remain off duty until notified.
- Employee Assistance teams are finished for the day and will resume again at 0700hrs tomorrow morning.

Gas Station Updates:

- 7-11 at SR 31/SR 80 is currently out of gas. There is no information of when they will be refueled.
    - RaceTrac at Six Mile / Michael G. Rippe has fuel on Pump #3 for first responders.

Subject: Hurricane Milton - Update #20

As of this update, the latest storm information is as follows:

- The maximum sustained wind speeds are now at 175 mph (Category 5 is when sustained winds are 157+ mph).

AMERICAN OVERSIGHT

- The timing of impacts to the area looks to be as early as early Wednesday morning and continuing into midday Thursday.
- The model spread in the forecast track remains high, but is beginning to tighten around a Tampa Bay region landfall.
- Hurricane force winds extend out 30 miles.
- Tropical Storm force winds extend out 80 miles.
- Regardless of the path, the wind field will be sufficient that Lee County will at least receive strong Tropical Storm strength winds.
- The tornado threat will be mainly late Tuesday into Wednesday night.

As of this update, new notifications are as follows:

- Effective at 12:00 PM, a Mandatory Evacuation Order has been issued for Evacuation Zones A & B.

Gas Station Updates:

- 7-11 at SR 31/SR 80 received a fuel shipment this morning. Pumps 11 and 12 are for LEO. Make contact inside for pumps to be turned on.
- 7-11 at Billy's Creek is out of gas. Expecting shipment today. Will set aside fuel for LEO at Pump #1. Make contact with employee to have pump turned on.
- Race Trac at Daniels/Powers Ct is out of gas. Shipment has been requested. Will set up pump for LEO use. In the past it has been Pump 18.
- 7-11 Daniels/Palomino is out of gas. Expecting shipment today and will contact me when they receive it. Pump 10 will be set aside for LEO.
- Rebel at 9281 Daniels Pkwy is out of gas. Requested shipment for today. Pump 1 will be set aside for LEO. Go inside to have pump turned on.
- 7-11 at 100 Delaware has 6800 gallons of gas for LEO.
- Circle K at SR 80/ Old Olga has fixed the pump and have a full tank for LEO. Make contact with employee for which pump to use.
- 7-11 at 12011 Gateway Blvd. has gas for LEO on Pump 2.
- 7-11 at Corkscrew and Three Oaks has gas for LEO on Pumps 13 - 16.
- RaceTrac at 6 Mile/Michael G Rippe is out of gas but requested shipment. They will set up a Pump #3 for LEO use when they get gas. Make contact with employee for pump to be turned on.
- 7-11 at 10875 Terminal Access Road has fuel and will reserve Pumps 9 and 10 for First Responders. The clerk can turn on the pump.
- Shell at 13621 N. Cleveland Ave. has LEO gas on Pump 1 & 2.
- Marathon at 14010 North Cleveland Ave. has gas.
- Mobile/7-11 at 17930 North Tamiami Tr. has LEO gas on Pump 11 & 12.
- Murphy Express at 520 Pine Island Rd. has about 3500 gallons of gas.
- Circle K at 4600 Bayline Dr. has 300 gallons for LEO.
- Rocket Gas at 5760 Bayshore Rd. has 3000 regular gas.
- Circle K at 6381 Bayshore Rd. has 500 gallons of gas for LEO.
- Loves at 17308 Park 78 Dr. has gas.
- 7-11 at 18971 Babcock Ranch Rd. has gas and expects another delivery tonight.
- Shell at 402 Del Prado in Cape Coral has gas.
- Shell at 7135 Maida Ln. has gas.
- Speedway at 1365 N. Tamiami Trl. has Premium only.

Sand Updates:

AMERICAN OVERSIGHT

- Sand and sandbags are being distributed by Lee County Sheriff's Office members to bulk distribution sites throughout the county. Individuals will have to go to a bulk distribution site to get sandbags.
    - Current stations with available sand and/or sandbags:
        - Station 102 at 44 Homestead Rd. S. in Lehigh Acres
        - Station 104 at Sunshine and 16th St. SW in Lehigh Acres
        - Tice Fire Buckingham Station at 5850 Buckingham Road
        - San Carlos Park Fire Station 54 at 16900 Oriole Rd.
        - Bayshore Fire at 17350 Nalle Rd.
        - Bonita Springs Fire at 27701 Bonita Grande Dr.
        - Bonita Springs Fire at 8850 W. Terry St. (Truck currently enroute)

Subject: Hurricane Milton - Update #19

As of this update, the latest storm information is as follows:

- The storm track has shifted north slightly. The movement is not far enough to make a difference in our impacts.
- The earliest reasonable arrival time of tropical-storm-force winds is early Wednesday morning.

As of this update, new notifications are as follows:

- The Hurricane Hotline is now active. Corrections personnel should call 239-477-1258, Law Enforcement personnel should call 239-477-1259, and Communications personnel should call 239-477-1260. Please save these numbers now in your phone. This hotline provides updates for personnel without access to e-mail. For now, all supervisors should relay all pertinent information to their personnel who do not have access to e-mail.
- Mandatory evacuations have been issued for the Town of Fort Myers Beach. Residents are encouraged to evacuate before 3:00 PM today.
- LeeTran at noon today, Monday, Oct. 7, will stop running routes onto Fort Myers Beach. All LeeTran services will convert to off-island transit only. This is to assist with the Town of Fort Myers Beach's request for residents to leave the island.
- Lee County Utilities will shut off water to Fort Myers Beach at noon Tuesday, Oct. 8. This is a precautionary measure to protect infrastructure. It was also implemented during 2022's Hurricane Ian.
- Lee County Sheriff's Office employees are currently in the field distributing sand and sand bags to locations throughout the county.

Gas Station Updates:

- 7-11 at SR 31/SR 80 received a fuel shipment this morning. Pumps 11 and 12 are for LEO. Make contact inside for pumps to be turned on.
- 7-11 at Billy's Creek is out of gas. Expecting shipment today. Will set aside fuel for LEO at Pump #1. Make contact with employee to have pump turned on.
- RaceTrac SR 31/ SR 80 has gas but expect to be out by noon and closed. Next shipment not expected until after the storm. They do not have a pump set aside for LEO.
- Circle K at SR 80/ Old Olga has fixed the pump and have a full tank for LEO. Make contact with employee for which pump to use.

AMERICAN OVERSIGHT

- Sunoco at SR 80 and Buckingham is out of gas but requested shipment. Will pump remaining for LEO. Make contact with employee inside for pump to be turned on.
- Rebel at 6 Mile/Metro currently has 8,000 gallons and will stop pumping at 800 gallons. They do not set aside gas for us. Unknown next shipment.
- RaceTrac at 6 Mile/Michael G Rippe is out of gas but requested shipment. They will set up a Pump #3 for LEO use when they get gas. Make contact with employee for pump to be turned on.
- Race Trac at Daniels/Powers Ct is out of gas. Shipment has been requested. Will set up pump for LEO use. In the past it has been Pump 18.
- 7-11 Daniels/Palomino is out of gas. Expecting shipment today and will contact me when they receive it. Pump 10 will be set aside for LEO.
- Rebel at 9281 Daniels Pkwy is out of gas. Requested shipment for today. Pump 1 will be set aside for LEO. Go inside to have pump turned on.
- Chevron at 13031 Metro is out of gas. Not expecting shipment. Will set a pump aside for LEO if they get gas.
- Circle K at Metro and Crystal is close to running out of gas and starting to shut pumps down. They are setting aside pumps 5-8 for LEO. Meet with employee for which pump to use.

Subject: Hurricane Milton - Update #18

As of the 8:00 AM update, a Hurricane Watch remains in effect for our area.

The IMT Main Number is 239-258-3150 or e-mail at IMT@sheriffleefl.org.

As of this update, the latest storm information is as follows:

- Hurricane Milton is now a major hurricane, with sustained wind speeds of 125 mph.
- Hurricane Milton is expected to have winds of 145 mph at landfall, with some expansion of hurricane-strength winds.
- The model spread in the forecast track remains high, with the entire area within the cone.
- Movement is ESE at 8 mph.
- The current earliest arrival of tropical-storm-strength winds is 1:00 AM on Wednesday, with a likely arrival time at 8:00 AM. This is the arrival of tropical-storm-force winds, not the arrival of the actual storm.
- The storm surge estimate is 5' to 10' for Lee County. It is expected to increase throughout the day on Wednesday and peak early Thursday.
- We are still in a Hurricane Watch, a Storm Surge Watch, and a Flood Watch.
- Many rivers are already in or forecast to go into flood stage.
- The main threat for tornadoes is late Tuesday into Wednesday night.
- Confidence is low on the exact track of the system, with the entire area within the cone. It should be noted that that 72 hour average track error is 100 miles.

As of this updates, new notifications are as follows:

- All personnel must notify IMT of all asset movements and personnel changes.
- Estero Fire Station #54 at Oriole and Alico just got sand delivered.
- Pine Island Fire has sand, but no sandbags.
- North Fort Myers Recreations Center has sand but no sandbags.

AMERICAN OVERSIGHT

- Corrections Transport vehicles have received their staging location and should be in place by 12:00 PM.
- Academy recruits and Youth Services deputies have been deployed to the field.

National Hurricane Center Definitions:

- **Hurricane Watch**: Hurricane conditions (sustained winds of 74 mph or greater) are possible within your area. Because it may not be safe to prepare for a hurricane once winds reach tropical storm force, The NHC issues hurricane watches 48 hours before it anticipates tropical storm-force winds.
- **Hurricane Warning**: Hurricane conditions (sustained winds of 74 mph or greater) are expected somewhere within the specified area. NHC issues a hurricane warning 36 hours in advance of tropical storm-force winds to give you time to complete your preparations. All preparations should be complete. Evacuate immediately if so ordered.
- **Storm Surge Watch**: There is a possibility of life-threatening inundation from rising water moving inland from the shoreline somewhere within the specified area, generally within 48 hours.
- **Extreme Wind Warning**: Extreme sustained winds of a major hurricane (115 mph or greater), usually associated with the eyewall, are expected to begin within an hour. Take immediate shelter in the interior portion of a well-built structure.

Subject: Hurricane Milton - Update #17

The 5:00 AM update shows that the track is largely unchanged; however, models still vary from Naples to North of Tampa, and the intensity is forecast to be stronger, well into the Category 4 range.

As of this update, new notifications are as follows:

- The storm has current maximum winds of 100 mph.
- The current forecast for our coast is an 8' - 12' storm surge.
- The storm has slowed somewhat, so the earliest arrival of Tropical Storm force winds is now in the early Wednesday morning hours.

Subject: Hurricane Milton - Update #16

AMERICAN OVERSIGHT

The 11:00 PM update shows little movement in Hurricane Milton's track. Maximum sustained wind speeds are at 90 mph. Model tracks vary widely on the landfall location along Florida's West Coast. The Incident Management Team will continue to monitor and provide timely updates.

As of this update, new notifications are as follows:

Gas Availability:

- RaceTrac - 15820 Winkler Rd. - Pump 15 & 16 for First Responders - Contact is Tracy
- 7-11 - 12750 Cleveland Ave. - Pump 10 & 12 for First Responders - Contact is Vanilla
- RaceTrac - 5991 South Pointe Blvd. - Pump 19 & 20 for First Responders - Contact is Vince
- Mobil/7-11 - 20391 Summerlin Rd. - Pump 6 for First Responders - Contact is Susan
- Circle K - 20021 Summerlin Rd. - Pump 1 for First Responders - Contact is Kyle
- 7-11 - 15021 McGregor Blvd. - Pump 1 for First Responders - Contact is Jessica
- Mobil/7-11 - 17930 N. Tamiami Trl. - Pump 9 & 10 for First Responders - Contact is Joseph
- Circle K - 6381 Bayshore Rd. - Pump 10 for First Responders - Contact is Elizabeth
- Circle K - 19101 N. Tamiami Trl. - Pump 1 & 2 for First Responders - Contact is Christy
- 7-11 - 100 Delaware in Lehigh Acres - Pump 1 & 2 for First Responders.

Sent: Sunday, October 6, 2024 8:57 PM
To: All Users <AllUsers@sheriffleefl.org>
Subject: Hurricane Milton - Update #15

As of the 8:00 PM National Hurricane Center update, Hurricane Milton is still forecast to rapidly intensify into a major hurricane. The center of the track has shifted further south, and is currently near the Bradenton/Sarasota area at landfall.

There is a Flood Watch for the entire area. Rainfall amounts of 5 to 10 inches, with localized totals of up to 15 inches are expected. The timing of the impacts is as early as late Tuesday and continuing into Thursday morning.

A good deal of uncertainty remains with where the storm will make landfall. It should be noted that the average NHC track error at day 3 is around 100 miles.

As of this update, new notifications are as follows:

- Youth Services and Training personnel have received their assignments and will report according to their schedule tomorrow.
- Court Operations and Civil personnel will receive their schedule tomorrow.
- Employee Assistance personnel are done for the evening. They will resume in the morning.
- IMT will be fully activated beginning at 7:00 AM on Monday, with all personnel reporting or receiving their assignments by then.
- For personnel working overtime, please use *Hurricane Milton* as the reason for the overtime.
- The 7-11 Gas station at 103 Leeland Heights Blvd W in Lehigh Acres is open for LEO. If you need gas, use pumps 3,4,5, or 6 only. Jessica is the contact person there.
- The 7-11 at 100 Delaware Rd. in Lehigh Acres is reserving gas for First Responders. use Pump 3 and 4. Sharon is the contact person there.
- The 7-11 at 18971 Babcock Ranch Rd is holding gas for first responders but deputies must go inside to request pump to be turned on.

AMERICAN OVERSIGHT

- The 7-11 at Del Prado and N Tamiami (17930 N Tamiami Trl.) is also holding gas for first responders but deputies must go inside to request the pump be turned on.

All personnel should be ready for a full activation at any time. This is a serious, dangerous storm and all personnel should complete preparations as soon as possible. Models vary in intensity, but most predict *at least* a Category 3, so even if we do not receive a direct hit, we can expect hurricane strength winds or wind gusts and a severe storm surge.

Subject: Hurricane Milton - Update #14

As of the 5:00 PM update, Milton is now a hurricane. Hurricane Milton has maximum sustained winds of 85 mph. The track has shifted slightly, and there is a more northeastern path across our area. Even if we do not receive a direct hit, we will receive tropical storm and hurricane strength winds, significant storm surge, and dangerous flooding from rainfall, likely much greater that what we received from Hurricane Helene. By tonight, all personnel should have their homes and families secured for the storm, and be prepared for a full activation.

Notifications for this update:

- All agency members deemed <u>non essential during an emergency response</u> will be dismissed tomorrow, October 7th, 2024 starting at **noon**. In order to stay home you will need to advise your immediate supervisor and use your accrued time. You may report for regular duty if you chose to do so. As always, use caution when driving in inclement weather and do not attempt to traverse standing water. IMT will continue to send out updates on our response to TS Milton.

- The Emergency Operations Center (EOC) will transition to a Level 1 at 7:00 AM tomorrow. This means that shelters and countywide operations will be run out of the EOC. The Incident Management Team is your contact for agency needs; do not contact the EOC directly.

Subject: Tropical Storm Milton - Update #13

The 2:00 PM Intermediate Update shows that there are no significant changes in the track. The earliest arrival of tropical storm force winds is projected to be 8:00 PM on Tuesday.

These are the stations that are reported to still have gasoline:

- Veronica Shoemaker/Winkler
- Shell station at Hancock and US 41
- BJ's Cape Coral
- 711 Burnt Store and Pine Island has DIESEL only

AMERICAN OVERSIGHT

- Racetrac at South Pointe and College has 93 Only
- Walmart / Murphy's USA in Lehigh
- Santa Barbara and Veterans 7/11

These are the stations that are reported to be currently **out** of gasoline:

- Country Club and Veterans Circle K
- Del Prado Speedway
- Trafalgar and Skyline 7/11
- Rebel US 41 and Del Prado
- 76 at Chiquita and Pine Island
- Walmart/Murphy's Del Prado
- Walmart on Pine Island Road
- Pine Ridge and San Carlos 7/11
- Santa Barbara and Gleason 7/11
- Palm Tree and Cape Coral Pkwy 7/11
- Lee and Gunnery 7/11
- Del Prado Racetrac
- Terry St Circle K
- Lee and Alvin Racetrac
- Joel Citgo
- N Cleveland and Littleton 7/11

Below are the current updated tasks that IMT has been working on since that last updates:

- Logistics members have scheduled pre-storm deliveries for food and beverages - the arrival time is Tuesday morning.
- Logistics members have scheduled post-storm deliveries from vendors.
- Logistics members have scheduled water deliveries.
- Logistics members have created plans for replenishment of supplies for long-term activations.
- Logistics members have arranged for ice deliveries for the event power is lost.
- Purchasing members have made plans for the procurement of potable water.
- Purchasing and Logistics members have scheduled the delivery of portable bathrooms should they be needed.
- HQ will be the central location for cooking needs post-storm for employees at HQ/IMT, Forensics, MCU, Command Staff, Spec Ops, and Staging personnel.
- Precincts and Corrections facilities will be responsible for their meal preparations.

Subject: Tropical Storm Milton - Update #12

The 11:00 AM update shows a small track shift to the south. Although it is still predicted to directly hit the Tampa Bay Area, the move slightly south may bring higher wind speeds and higher storm surge. The storm is expected to quickly intensify and will likely be a major hurricane upon arrival.

All personnel are encouraged to complete preparations for their homes and their families today.

AMERICAN OVERSIGHT

There is still a high degree of uncertainty in both the tracks and the wind speed upon arrival, so the possibility of a direct strike to our area remains. The cone of uncertainty currently covers most of the Florida peninsula. The Incident Management Team (IMT) will keep you informed, and is making preparations to include schedule planning.

Subject: Tropical Storm Milton - Update #8

AMERICAN OVERSIGHT

The 8:00 AM update shows that Milton is forecast to become a Major Category 3 Hurricane before making landfall. Timing, tracks, and intensity are still unpredictable; however, the National Hurricane Center still shows the track toward the Tampa area.

The current forecast is as follows:

- There is a Flood Watch for the entire area through Thursday.
- Rainfall in the amount of 5" to 8", with localized totals up to 12".
- The timing of the impacts is from late Tuesday through early Thursday morning, but it is expected to make landfall on the West Coast on Wednesday.
- There is great uncertainty about where the storm will make landfall. The average Day 4 track error is around 150 miles, so we are still well within a possible landfall range.
- The current earliest wind time arrival is 4 PM on Tuesday, and the most likely arrival time is 2 AM on Wednesday.

Additional notifications for this update include:

- Personnel should maintain at least ½ tank at all times. Due to current fuel runs, please use any opportunity to make sure your agency vehicle stays full at all times.
- Personnel who must fuel and have no other options may use 89 or 93 Octane fuel.
- Select IMT members have been activated. Please send requests to IMT@sheriffleefl.org.
- The select CRU members who were notified individually will report at 10:00 AM to the Headquarters Training Room (1202).
- The asset movement members who were notified individually will report at 10:00 AM to the Headquarters Training Room (1202).
- All units, components, precincts, corrections facilities, and all affected agency departments should fill up all available gas cans and gas tanks.
- Pine Island Fire Department is out of sand. They still have sandbags. They expect to get more sand on Monday.

Sent: Saturday, October 5, 2024 6:19 PM
To: All Users <AllUsers@sheriffleefl.org>
Subject: Tropical Storm Milton - Update #7

With the 5:00 PM update, Tropical Storm Milton is now expected to arrive as a major hurricane. The track has shifted some to the north; however, some model tracks still show direct hits our our area, and we are still in the cone of uncertainty. Please recall from prior storms that although we are not in the direct path, the effects of the hurricane will still affect us heavily, especially in the areas prone to storm surge. Additionally, the peak storm surge from Helene arrived almost 10 hours after the peak winds, so all personnel should be aware of and consider the effects before, during, and after the storm.

The below preparations remain in effect. The only change for this period is:

- Four (4) additional shallow water vessels have been obtained for water rescues.
- Additional High-Water Vehicles have been obtained and will be deployed to the islands for potential high-water rescues.
- The San Carlos Park Fire Department is out of sand and sandbags.

AMERICAN OVERSIGHT

Subject: Tropical Storm Milton - Update #6

As of a 12:25 PM National Hurricane Center update, Tropical Storm Milton has formed. This storm is forecast to strengthen and bring the risk of life-threatening impacts to portions of the West Coast of Florida next week. The maximum winds are currently estimated at 40 mph with higher gusts. Models range in intensity from a Tropical Storm to a Major Hurricane, so there is tremendous unpredictability in the strength upon arrival.

At this time, the Incident Management Team is preparing for the possibility of a major hurricane affecting our area with impacts beginning on Tuesday and a full impact on Wednesday.

All agency personnel are encouraged to prepare as follows:

- All personnel should review their hurricane plans, and prepare their homes and families for the possibility of a hurricane impact in the middle of next week.
- All precincts should secure their mobile assets (decoy vehicles, arrow boards, trailers, ATVs, etc.) beginning on immediately to be completed by 2:00 PM on Monday.
- All trailers should be brought to storage beginning immediately to be completed by 2:00 PM on Monday.
- All personnel should use the remainder of this weekend to prepare for a possible activation. This plan should include three days worth of food, uniforms, and supplies.
- All personnel should use the remainder of this weekend to prepare their uniforms and equipment (including sufficient batteries for equipment) for a possible activation.
- All specialty units should begin bringing their assets back to their storage areas and secure locations. This should be completed by 2:00 PM on Monday.
- All precincts should secure any items that can be moved by the wind to a secure location starting immediately to be completed by 2:00 PM on Monday.
- All Corrections facilities (including Nan's Ranch) should prepare their facilities for a possible hurricane impact next week.

This is new information as of this update:

- The Waterborne Strike Team is on standby for deployment for water rescues.
- JetBlue Stadium, CenturyLink Stadium, the Lee County Gun Range, and the Andrea Lane and Sivan Road storage buildings are prepared to receive assets if needed.
- The Marine Unit is in contact with the IMT to secure the marine assets.
- Known sandbag locations are as follows:
    - Punta Gorda—Free sandbags will be available at 3130 Cooper St., the last entrance on the left by flag poles.
    - Fort Myers Beach—Sand is located off of Gulf Beach Road, and bags are available at Town Hall, 2731 Oak St. (The location will provide service until 4:30 p.m. on Friday and begin Monday at 8:30 a.m.)
    - Fort Myers— South Trail Fire & Rescue will have sand and sandbags available at station 63, 5531 Halifax Ave., Fort Myers—a maximum of 20 bags per household. UPDATE: South Trail Fire & Rescue is currently out of sand. Empty sandbags only are available.
    - Naples— Sandbags will be available at three public park locations: Big Corkscrew Island Regional Park, 810 39th Ave., North Collier Regional Park, 15000 Livingston Road, in the Sun-N-Fun Lagoon parking lot, and at Donna Fiala Eagle Lakes Community Park, 11565 Tamiami

AMERICAN OVERSIGHT

Trail East, in the grassy area between the parking lots. The Naples sandbag locations will begin service at 8 a.m. through dusk on Saturday and Sunday.
    - San Carlos Park—Sand and sandbags are available at San Carlos Park Fire District Station 54, located at 16900 Oriole Road. There is a limit of 10 bags per household. Bags can be picked up at the lobby. Bring your own shovel. Be prepared to fill and load your own sandbags. Make sure your vehicle can transport the weight of the sandbags.
    - North Fort Myers—Sandbags will be located at North Fort Myers Parks and Recreation, 2000 N. Recreation Parkway. Sand will be located in the back of the park, next to the county mulch pile. Please bring your own shovel to fill the bags.
    - Matlacha—Sandbags are available for pickup at Station 1, located at 5700 Pine Island Rd, Bokeelia, FL 33922
- IMT personnel are visiting the precincts, and the storage locations to inventory assets to prepare for both securement and post-storm deployment.
- No schedule changes are expected between now and Monday afternoon; however, all personnel should be prepared for schedule adjustments.
- The Agriculture assets are secured on the Olga site.

Subject: Important Update on a possible impending hurricane impacting our area (Update #5)

Team,

IMT has been working on preparation for a potential Hurricane impacting our area early next week. IMT will continue to send out updates regularly so please monitor your email closely. All agency units need to begin preparations of securing their assigned assets and communicate all movement to IMT. Also, update the major asset application on the intranet. We have secured Jet Blue Park as an asset staging area for Marine and other assets. Agency asset storage facilities to include the gun range are preparing to house assets as well. IMT is securing high water vehicles that will be pre-staged at strategic locations i.e., the barrier islands. IMT members will be in the RTIC today coordinating efforts. Agency extension 239-258-3150 is being setup to communicate to IMT staff. Additional updates to follow.

Be prepared and be safe!

Subject: New Caribbean Disturbance - Update #4

The National Hurricane Center 2:00 PM update shows the possibility of development as the low pressure area in the Gulf of Mexico moves slowly eastward or northeastward. A tropical or subtropical depression or storm could form during the early to middle part of next week if the low remains separate from a frontal boundary that is forecast to extend across the Gulf of Mexico. Regardless of development, locally heavy rains could occur over portions of the Florida Peninsula late this weekend into next week. As of this update, the formation chance in the next 48 hours is low at 10 %, and the formation chance through 7 days has increased to 50%.

AMERICAN OVERSIGHT

Current model runs show an arrival time of any potential storm around Wednesday of next week. This represents a slower forward storm speed and later storm arrival than previous model runs, so the timing and impacts are still largely unknown. Regardless of any potential storm, significant rainfall is still expected, and the Incident Management Team will continue to monitor and update all personnel.

Subject: New Caribbean Disturbance - Update #3

The National Hurricane Center has reduced the chance of tropical cyclone development within seven days to 30%. While the system is likely to develop over the Gulf of Mexico late this weekend or early next week, subsequent tropical or subtropical development could be limited by the system's potential interaction with a frontal boundary. Regardless of development, locally heavy rains could occur over portions of the Florida Peninsula next week.

Subject: New Caribbean Disturbance - Update #2

The forecast for the area of disorganized showers remains the same; it is still too early to tell if the system will develop further. Regardless of development, heavy rain is expected in our area into the weekend and next week. The Incident Management Team will continue to monitor.

To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance - Update #1

The area of disorganized showers remains at a 40% chance of development. The National Hurricane Center indicates that environmental conditions could support some gradual development of this system, and a tropical depression could form towards the end of this week or this weekend while it moves generally northwestward over the northwestern Caribbean Sea and into the Gulf of Mexico. As of this time, there are no changes, but some long range models show an increased chance of this disturbance affecting our area.

To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance

The Incident Management Team is monitoring a new area of disorganized showers and thunderstorms over the western Caribbean Sea. The National Weather Center states that the system has a medium chance (40%) of developing towards the middle to latter part of the week as it moves northwestward into the Gulf of Mexico. As this disturbance moves into the gulf, increasing moisture is expected over the Florida Peninsula and elevated rain chances are anticipated from Friday through the weekend, and possibly into early next week.

AMERICAN OVERSIGHT

Unfortunately, long range models show the possibility of direct impacts for Southwest Florida; however, It is too early to determine what, if any, tropical specific impacts can be expected.

The Incident Management Team will continue to monitor the storm, and will continue to provide updates through this very active part of the hurricane season.

As of this update, the latest storm information is as follows:

- The maximum sustained wind speeds are now at 175 mph (Category 5 is when sustained winds are 157+ mph).

AMERICAN OVERSIGHT

- The timing of impacts to the area looks to be as early as early Wednesday morning and continuing into midday Thursday.
- The model spread in the forecast track remains high, but is beginning to tighten around a Tampa Bay region landfall.
- Hurricane force winds extend out 30 miles.
- Tropical Storm force winds extend out 80 miles.
- Regardless of the path, the wind field will be sufficient that Lee County will at least receive strong Tropical Storm strength winds.
- The tornado threat will be mainly late Tuesday into Wednesday night.

As of this update, new notifications are as follows:

- Effective at 12:00 PM, a Mandatory Evacuation Order has been issued for Evacuation Zones A & B.

Gas Station Updates:

- 7-11 at SR 31/SR 80 received a fuel shipment this morning. Pumps 11 and 12 are for LEO. Make contact inside for pumps to be turned on.
- 7-11 at Billy's Creek is out of gas. Expecting shipment today. Will set aside fuel for LEO at Pump #1. Make contact with employee to have pump turned on.
- Race Trac at Daniels/Powers Ct is out of gas. Shipment has been requested. Will set up pump for LEO use. In the past it has been Pump 18.
- 7-11 Daniels/Palomino is out of gas. Expecting shipment today and will contact me when they receive it. Pump 10 will be set aside for LEO.
- Rebel at 9281 Daniels Pkwy is out of gas. Requested shipment for today. Pump 1 will be set aside for LEO. Go inside to have pump turned on.
- 7-11 at 100 Delaware has 6800 gallons of gas for LEO.
- Circle K at SR 80/ Old Olga has fixed the pump and have a full tank for LEO. Make contact with employee for which pump to use.
- 7-11 at 12011 Gateway Blvd. has gas for LEO on Pump 2.
- 7-11 at Corkscrew and Three Oaks has gas for LEO on Pumps 13 - 16.
- RaceTrac at 6 Mile/Michael G Rippe is out of gas but requested shipment. They will set up a Pump #3 for LEO use when they get gas. Make contact with employee for pump to be turned on.
- 7-11 at 10875 Terminal Access Road has fuel and will reserve Pumps 9 and 10 for First Responders. The clerk can turn on the pump.
- Shell at 13621 N. Cleveland Ave. has LEO gas on Pump 1 & 2.
- Marathon at 14010 North Cleveland Ave. has gas.
- Mobile/7-11 at 17930 North Tamiami Tr. has LEO gas on Pump 11 & 12.
- Murphy Express at 520 Pine Island Rd. has about 3500 gallons of gas.
- Circle K at 4600 Bayline Dr. has 300 gallons for LEO.
- Rocket Gas at 5760 Bayshore Rd. has 3000 regular gas.
- Circle K at 6381 Bayshore Rd. has 500 gallons of gas for LEO.
- Loves at 17308 Park 78 Dr. has gas.
- 7-11 at 18971 Babcock Ranch Rd. has gas and expects another delivery tonight.
- Shell at 402 Del Prado in Cape Coral has gas.
- Shell at 7135 Maida Ln. has gas.
- Speedway at 1365 N. Tamiami Trl. has Premium only.

Sand Updates:

AMERICAN OVERSIGHT

- Sand and sandbags are being distributed by Lee County Sheriff's Office members to bulk distribution sites throughout the county. Individuals will have to go to a bulk distribution site to get sandbags.
    - Current stations with available sand and/or sandbags:
        - Station 102 at 44 Homestead Rd. S. in Lehigh Acres
        - Station 104 at Sunshine and 16th St. SW in Lehigh Acres
        - Tice Fire Buckingham Station at 5850 Buckingham Road
        - San Carlos Park Fire Station 54 at 16900 Oriole Rd.
        - Bayshore Fire at 17350 Nalle Rd.
        - Bonita Springs Fire at 27701 Bonita Grande Dr.
        - Bonita Springs Fire at 8850 W. Terry St. (Truck currently enroute)

Subject: Hurricane Milton - Update #19

As of this update, the latest storm information is as follows:

- The storm track has shifted north slightly. The movement is not far enough to make a difference in our impacts.
- The earliest reasonable arrival time of tropical-storm-force winds is early Wednesday morning.

As of this update, new notifications are as follows:

- The Hurricane Hotline is now active. Corrections personnel should call 239-477-1258, Law Enforcement personnel should call 239-477-1259, and Communications personnel should call 239-477-1260. Please save these numbers now in your phone. This hotline provides updates for personnel without access to e-mail. For now, all supervisors should relay all pertinent information to their personnel who do not have access to e-mail.
- Mandatory evacuations have been issued for the Town of Fort Myers Beach. Residents are encouraged to evacuate before 3:00 PM today.
- LeeTran at noon today, Monday, Oct. 7, will stop running routes onto Fort Myers Beach. All LeeTran services will convert to off-island transit only. This is to assist with the Town of Fort Myers Beach's request for residents to leave the island.
- Lee County Utilities will shut off water to Fort Myers Beach at noon Tuesday, Oct. 8. This is a precautionary measure to protect infrastructure. It was also implemented during 2022's Hurricane Ian.
- Lee County Sheriff's Office employees are currently in the field distributing sand and sand bags to locations throughout the county.

Gas Station Updates:

- 7-11 at SR 31/SR 80 received a fuel shipment this morning. Pumps 11 and 12 are for LEO. Make contact inside for pumps to be turned on.
- 7-11 at Billy's Creek is out of gas. Expecting shipment today. Will set aside fuel for LEO at Pump #1. Make contact with employee to have pump turned on.
- RaceTrac SR 31/ SR 80 has gas but expect to be out by noon and closed. Next shipment not expected until after the storm. They do not have a pump set aside for LEO.
- Circle K at SR 80/ Old Olga has fixed the pump and have a full tank for LEO. Make contact with employee for which pump to use.

AMERICAN OVERSIGHT

- Sunoco at SR 80 and Buckingham is out of gas but requested shipment. Will pump remaining for LEO. Make contact with employee inside for pump to be turned on.
- Rebel at 6 Mile/Metro currently has 8,000 gallons and will stop pumping at 800 gallons. They do not set aside gas for us. Unknown next shipment.
- RaceTrac at 6 Mile/Michael G Rippe is out of gas but requested shipment. They will set up a Pump #3 for LEO use when they get gas. Make contact with employee for pump to be turned on.
- Race Trac at Daniels/Powers Ct is out of gas. Shipment has been requested. Will set up pump for LEO use. In the past it has been Pump 18.
- 7-11 Daniels/Palomino is out of gas. Expecting shipment today and will contact me when they receive it. Pump 10 will be set aside for LEO.
- Rebel at 9281 Daniels Pkwy is out of gas. Requested shipment for today. Pump 1 will be set aside for LEO. Go inside to have pump turned on.
- Chevron at 13031 Metro is out of gas. Not expecting shipment. Will set a pump aside for LEO if they get gas.
- Circle K at Metro and Crystal is close to running out of gas and starting to shut pumps down. They are setting aside pumps 5-8 for LEO. Meet with employee for which pump to use.

Subject: Hurricane Milton - Update #18

As of the 8:00 AM update, a Hurricane Watch remains in effect for our area.

The IMT Main Number is 239-258-3150 or e-mail at IMT@sheriffleefl.org.

As of this update, the latest storm information is as follows:

- Hurricane Milton is now a major hurricane, with sustained wind speeds of 125 mph.
- Hurricane Milton is expected to have winds of 145 mph at landfall, with some expansion of hurricane-strength winds.
- The model spread in the forecast track remains high, with the entire area within the cone.
- Movement is ESE at 8 mph.
- The current earliest arrival of tropical-storm-strength winds is 1:00 AM on Wednesday, with a likely arrival time at 8:00 AM. This is the arrival of tropical-storm-force winds, not the arrival of the actual storm.
- The storm surge estimate is 5' to 10' for Lee County. It is expected to increase throughout the day on Wednesday and peak early Thursday.
- We are still in a Hurricane Watch, a Storm Surge Watch, and a Flood Watch.
- Many rivers are already in or forecast to go into flood stage.
- The main threat for tornadoes is late Tuesday into Wednesday night.
- Confidence is low on the exact track of the system, with the entire area within the cone. It should be noted that that 72 hour average track error is 100 miles.

As of this updates, new notifications are as follows:

- All personnel must notify IMT of all asset movements and personnel changes.
- Estero Fire Station #54 at Oriole and Alico just got sand delivered.
- Pine Island Fire has sand, but no sandbags.
- North Fort Myers Recreations Center has sand but no sandbags.

AMERICAN OVERSIGHT

- Corrections Transport vehicles have received their staging location and should be in place by 12:00 PM.
- Academy recruits and Youth Services deputies have been deployed to the field.

National Hurricane Center Definitions:

- **Hurricane Watch**: Hurricane conditions (sustained winds of 74 mph or greater) are possible within your area. Because it may not be safe to prepare for a hurricane once winds reach tropical storm force, The NHC issues hurricane watches 48 hours before it anticipates tropical storm-force winds.
- **Hurricane Warning**: Hurricane conditions (sustained winds of 74 mph or greater) are expected somewhere within the specified area. NHC issues a hurricane warning 36 hours in advance of tropical storm-force winds to give you time to complete your preparations. All preparations should be complete. Evacuate immediately if so ordered.
- **Storm Surge Watch**: There is a possibility of life-threatening inundation from rising water moving inland from the shoreline somewhere within the specified area, generally within 48 hours.
- **Extreme Wind Warning**: Extreme sustained winds of a major hurricane (115 mph or greater), usually associated with the eyewall, are expected to begin within an hour. Take immediate shelter in the interior portion of a well-built structure.

Sent: Monday, October 7, 2024 5:29 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: Hurricane Milton - Update #17

The 5:00 AM update shows that the track is largely unchanged; however, models still vary from Naples to North of Tampa, and the intensity is forecast to be stronger, well into the Category 4 range.

As of this update, new notifications are as follows:

- The storm has current maximum winds of 100 mph.
- The current forecast for our coast is an 8' - 12' storm surge.
- The storm has slowed somewhat, so the earliest arrival of Tropical Storm force winds is now in the early Wednesday morning hours.

Sent: Sunday, October 6, 2024 11:00 PM
To: All Users <AllUsers@sheriffleefl.org>
Subject: Hurricane Milton - Update #16

AMERICAN OVERSIGHT

The 11:00 PM update shows little movement in Hurricane Milton's track. Maximum sustained wind speeds are at 90 mph. Model tracks vary widely on the landfall location along Florida's West Coast. The Incident Management Team will continue to monitor and provide timely updates.

As of this update, new notifications are as follows:

Gas Availability:

- RaceTrac - 15820 Winkler Rd. - Pump 15 & 16 for First Responders - Contact is Tracy
- 7-11 - 12750 Cleveland Ave. - Pump 10 & 12 for First Responders - Contact is Vanilla
- RaceTrac - 5991 South Pointe Blvd. - Pump 19 & 20 for First Responders - Contact is Vince
- Mobil/7-11 - 20391 Summerlin Rd. - Pump 6 for First Responders - Contact is Susan
- Circle K - 20021 Summerlin Rd. - Pump 1 for First Responders - Contact is Kyle
- 7-11 - 15021 McGregor Blvd. - Pump 1 for First Responders - Contact is Jessica
- Mobil/7-11 - 17930 N. Tamiami Trl. - Pump 9 & 10 for First Responders - Contact is Joseph
- Circle K - 6381 Bayshore Rd. - Pump 10 for First Responders - Contact is Elizabeth
- Circle K - 19101 N. Tamiami Trl. - Pump 1 & 2 for First Responders - Contact is Christy
- 7-11 - 100 Delaware in Lehigh Acres - Pump 1 & 2 for First Responders.

Sent: Sunday, October 6, 2024 8:57 PM
To: All Users <AllUsers@sheriffleefl.org>
Subject: Hurricane Milton - Update #15

As of the 8:00 PM National Hurricane Center update, Hurricane Milton is still forecast to rapidly intensify into a major hurricane. The center of the track has shifted further south, and is currently near the Bradenton/Sarasota area at landfall.

There is a Flood Watch for the entire area. Rainfall amounts of 5 to 10 inches, with localized totals of up to 15 inches are expected. The timing of the impacts is as early as late Tuesday and continuing into Thursday morning.

A good deal of uncertainty remains with where the storm will make landfall. It should be noted that the average NHC track error at day 3 is around 100 miles.

As of this update, new notifications are as follows:

- Youth Services and Training personnel have received their assignments and will report according to their schedule tomorrow.
- Court Operations and Civil personnel will receive their schedule tomorrow.
- Employee Assistance personnel are done for the evening. They will resume in the morning.
- IMT will be fully activated beginning at 7:00 AM on Monday, with all personnel reporting or receiving their assignments by then.
- For personnel working overtime, please use *Hurricane Milton* as the reason for the overtime.
- The 7-11 Gas station at 103 Leeland Heights Blvd W in Lehigh Acres is open for LEO. If you need gas, use pumps 3,4,5, or 6 only. Jessica is the contact person there.
- The 7-11 at 100 Delaware Rd. in Lehigh Acres is reserving gas for First Responders. use Pump 3 and 4. Sharon is the contact person there.
- The 7-11 at 18971 Babcock Ranch Rd is holding gas for first responders but deputies must go inside to request pump to be turned on.

AMERICAN OVERSIGHT

- The 7-11 at Del Prado and N Tamiami (17930 N Tamiami Trl.) is also holding gas for first responders but deputies must go inside to request the pump be turned on.

All personnel should be ready for a full activation at any time. This is a serious, dangerous storm and all personnel should complete preparations as soon as possible. Models vary in intensity, but most predict *at least* a Category 3, so even if we do not receive a direct hit, we can expect hurricane strength winds or wind gusts and a severe storm surge.

Subject: Hurricane Milton - Update #14

As of the 5:00 PM update, Milton is now a hurricane. Hurricane Milton has maximum sustained winds of 85 mph. The track has shifted slightly, and there is a more northeastern path across our area. Even if we do not receive a direct hit, we will receive tropical storm and hurricane strength winds, significant storm surge, and dangerous flooding from rainfall, likely much greater that what we received from Hurricane Helene. By tonight, all personnel should have their homes and families secured for the storm, and be prepared for a full activation.

Notifications for this update:

- All agency members deemed non essential during an emergency response will be dismissed tomorrow, October 7th, 2024 starting at **noon**. In order to stay home you will need to advise your immediate supervisor and use your accrued time. You may report for regular duty if you chose to do so. As always, use caution when driving in inclement weather and do not attempt to traverse standing water. IMT will continue to send out updates on our response to TS Milton.

- The Emergency Operations Center (EOC) will transition to a Level 1 at 7:00 AM tomorrow. This means that shelters and countywide operations will be run out of the EOC. The Incident Management Team is your contact for agency needs; do not contact the EOC directly.

Subject: Tropical Storm Milton - Update #13

The 2:00 PM Intermediate Update shows that there are no significant changes in the track. The earliest arrival of tropical storm force winds is projected to be 8:00 PM on Tuesday.

These are the stations that are reported to still have gasoline:

- Veronica Shoemaker/Winkler
- Shell station at Hancock and US 41
- BJ's Cape Coral
- 711 Burnt Store and Pine Island has DIESEL only

AMERICAN OVERSIGHT

- Racetrac at South Pointe and College has 93 Only
- Walmart / Murphy's USA in Lehigh
- Santa Barbara and Veterans 7/11

These are the stations that are reported to be currently **out** of gasoline:

- Country Club and Veterans Circle K
- Del Prado Speedway
- Trafalgar and Skyline 7/11
- Rebel US 41 and Del Prado
- 76 at Chiquita and Pine Island
- Walmart/Murphy's Del Prado
- Walmart on Pine Island Road
- Pine Ridge and San Carlos 7/11
- Santa Barbara and Gleason 7/11
- Palm Tree and Cape Coral Pkwy 7/11
- Lee and Gunnery 7/11
- Del Prado Racetrac
- Terry St Circle K
- Lee and Alvin Racetrac
- Joel Citgo
- N Cleveland and Littleton 7/11

Below are the current updated tasks that IMT has been working on since that last updates:

- Logistics members have scheduled pre-storm deliveries for food and beverages - the arrival time is Tuesday morning.
- Logistics members have scheduled post-storm deliveries from vendors.
- Logistics members have scheduled water deliveries.
- Logistics members have created plans for replenishment of supplies for long-term activations.
- Logistics members have arranged for ice deliveries for the event power is lost.
- Purchasing members have made plans for the procurement of potable water.
- Purchasing and Logistics members have scheduled the delivery of portable bathrooms should they be needed.
- HQ will be the central location for cooking needs post-storm for employees at HQ/IMT, Forensics, MCU, Command Staff, Spec Ops, and Staging personnel.
- Precincts and Corrections facilities will be responsible for their meal preparations.

Subject: Tropical Storm Milton - Update #12

The 11:00 AM update shows a small track shift to the south. Although it is still predicted to directly hit the Tampa Bay Area, the move slightly south may bring higher wind speeds and higher storm surge. The storm is expected to quickly intensify and will likely be a major hurricane upon arrival.

All personnel are encouraged to complete preparations for their homes and their families today.

AMERICAN OVERSIGHT

There is still a high degree of uncertainty in both the tracks and the wind speed upon arrival, so the possibility of a direct strike to our area remains. The cone of uncertainty currently covers most of the Florida peninsula. The Incident Management Team (IMT) will keep you informed, and is making preparations to include schedule planning.

Subject: Tropical Storm Milton - Update #9

Employee assistance team members are on standby for employees who may need assistance with boarding windows, minor (quick) repairs for securing homes, and other needs in order to prepare for activation. If you need assistance, please e-mail the Incident Management Team at IMT@sheriffleefl.org with your address, specific need, and any exigent circumstances that would require a priority response (elderly family members, light duty employees who need help, etc.). If you do not have access to e-mail, you may call 239-258-3150. They will relay the message to the Incident Management Team.

Please note that employee assistance members **do not** have plywood/shutters, etc. They can only assist you with the items that you already have.

Supervisors, please relay this information to your employees who may not have access to e-mail.

Subject: Tropical Storm Milton - Update #8

AMS OVERSIGHT

The 8:00 AM update shows that Milton is forecast to become a Major Category 3 Hurricane before making landfall. Timing, tracks, and intensity are still unpredictable; however, the National Hurricane Center still shows the track toward the Tampa area.

The current forecast is as follows:

- There is a Flood Watch for the entire area through Thursday.
- Rainfall in the amount of 5" to 8", with localized totals up to 12".
- The timing of the impacts is from late Tuesday through early Thursday morning, but it is expected to make landfall on the West Coast on Wednesday.
- There is great uncertainty about where the storm will make landfall. The average Day 4 track error is around 150 miles, so we are still well within a possible landfall range.
- The current earliest wind time arrival is 4 PM on Tuesday, and the most likely arrival time is 2 AM on Wednesday.

Additional notifications for this update include:

- Personnel should maintain at least ½ tank at all times. Due to current fuel runs, please use any opportunity to make sure your agency vehicle stays full at all times.
- Personnel who must fuel and have no other options may use 89 or 93 Octane fuel.
- Select IMT members have been activated. Please send requests to IMT@sheriffleefl.org.
- The select CRU members who were notified individually will report at 10:00 AM to the Headquarters Training Room (1202).
- The asset movement members who were notified individually will report at 10:00 AM to the Headquarters Training Room (1202).
- All units, components, precincts, corrections facilities, and all affected agency departments should fill up all available gas cans and gas tanks.
- Pine Island Fire Department is out of sand. They still have sandbags. They expect to get more sand on Monday.

To: All Users <AllUsers@sheriffleefl.org>
Subject: Tropical Storm Milton - Update #7

With the 5:00 PM update, Tropical Storm Milton is now expected to arrive as a major hurricane. The track has shifted some to the north; however, some model tracks still show direct hits our our area, and we are still in the cone of uncertainty. Please recall from prior storms that although we are not in the direct path, the effects of the hurricane will still affect us heavily, especially in the areas prone to storm surge. Additionally, the peak storm surge from Helene arrived almost 10 hours after the peak winds, so all personnel should be aware of and consider the effects before, during, and after the storm.

The below preparations remain in effect. The only change for this period is:

- Four (4) additional shallow water vessels have been obtained for water rescues.
- Additional High-Water Vehicles have been obtained and will be deployed to the islands for potential high-water rescues.
- The San Carlos Park Fire Department is out of sand and sandbags.

Subject: Tropical Storm Milton - Update #6

As of a 12:25 PM National Hurricane Center update, Tropical Storm Milton has formed. This storm is forecast to strengthen and bring the risk of life-threatening impacts to portions of the West Coast of Florida next week. The maximum winds are currently estimated at 40 mph with higher gusts. Models range in intensity from a Tropical Storm to a Major Hurricane, so there is tremendous unpredictability in the strength upon arrival.

At this time, the Incident Management Team is preparing for the possibility of a major hurricane affecting our area with impacts beginning on Tuesday and a full impact on Wednesday.

All agency personnel are encouraged to prepare as follows:

- All personnel should review their hurricane plans, and prepare their homes and families for the possibility of a hurricane impact in the middle of next week.
- All precincts should secure their mobile assets (decoy vehicles, arrow boards, trailers, ATVs, etc.) beginning on immediately to be completed by 2:00 PM on Monday.
- All trailers should be brought to storage beginning immediately to be completed by 2:00 PM on Monday.
- All personnel should use the remainder of this weekend to prepare for a possible activation. This plan should include three days worth of food, uniforms, and supplies.
- All personnel should use the remainder of this weekend to prepare their uniforms and equipment (including sufficient batteries for equipment) for a possible activation.
- All specialty units should begin bringing their assets back to their storage areas and secure locations. This should be completed by 2:00 PM on Monday.
- All precincts should secure any items that can be moved by the wind to a secure location starting immediately to be completed by 2:00 PM on Monday.
- All Corrections facilities (including Nan's Ranch) should prepare their facilities for a possible hurricane impact next week.

This is new information as of this update:

- The Waterborne Strike Team is on standby for deployment for water rescues.
- JetBlue Stadium, CenturyLink Stadium, the Lee County Gun Range, and the Andrea Lane and Sivan Road storage buildings are prepared to receive assets if needed.
- The Marine Unit is in contact with the IMT to secure the marine assets.
- Known sandbag locations are as follows:
    - Punta Gorda—Free sandbags will be available at 3130 Cooper St., the last entrance on the left by flag poles.
    - Fort Myers Beach—Sand is located off of Gulf Beach Road, and bags are available at Town Hall, 2731 Oak St. (The location will provide service until 4:30 p.m. on Friday and begin Monday at 8:30 a.m.)
    - Fort Myers— South Trail Fire & Rescue will have sand and sandbags available at station 63, 5531 Halifax Ave., Fort Myers—a maximum of 20 bags per household. UPDATE: South Trail Fire & Rescue is currently out of sand. Empty sandbags only are available.
    - Naples— Sandbags will be available at three public park locations: Big Corkscrew Island Regional Park, 810 39th Ave., North Collier Regional Park, 15000 Livingston Road, in the Sun-N-Fun Lagoon parking lot, and at Donna Fiala Eagle Lakes Community Park, 11565 Tamiami

AMERICAN OVERSIGHT

Trail East, in the grassy area between the parking lots. The Naples sandbag locations will begin service at 8 a.m. through dusk on Saturday and Sunday.
    - San Carlos Park—Sand and sandbags are available at San Carlos Park Fire District Station 54, located at 16900 Oriole Road. There is a limit of 10 bags per household. Bags can be picked up at the lobby. Bring your own shovel. Be prepared to fill and load your own sandbags. Make sure your vehicle can transport the weight of the sandbags.
    - North Fort Myers—Sandbags will be located at North Fort Myers Parks and Recreation, 2000 N. Recreation Parkway. Sand will be located in the back of the park, next to the county mulch pile. Please bring your own shovel to fill the bags.
    - Matlacha—Sandbags are available for pickup at Station 1, located at 5700 Pine Island Rd, Bokeelia, FL 33922
- IMT personnel are visiting the precincts, and the storage locations to inventory assets to prepare for both securement and post-storm deployment.
- No schedule changes are expected between now and Monday afternoon; however, all personnel should be prepared for schedule adjustments.
- The Agriculture assets are secured on the Olga site.

Subject: Important Update on a possible impending hurricane impacting our area (Update #5)

Team,

IMT has been working on preparation for a potential Hurricane impacting our area early next week. IMT will continue to send out updates regularly so please monitor your email closely. All agency units need to begin preparations of securing their assigned assets and communicate all movement to IMT. Also, update the major asset application on the intranet. We have secured Jet Blue Park as an asset staging area for Marine and other assets. Agency asset storage facilities to include the gun range are preparing to house assets as well. IMT is securing high water vehicles that will be pre-staged at strategic locations i.e., the barrier islands. IMT members will be in the RTIC today coordinating efforts. Agency extension 239-258-3150 is being setup to communicate to IMT staff. Additional updates to follow.

Be prepared and be safe!

Subject: New Caribbean Disturbance - Update #4

The National Hurricane Center 2:00 PM update shows the possibility of development as the low pressure area in the Gulf of Mexico moves slowly eastward or northeastward. A tropical or subtropical depression or storm could form during the early to middle part of next week if the low remains separate from a frontal boundary that is forecast to extend across the Gulf of Mexico. Regardless of development, locally heavy rains could occur over portions of the Florida Peninsula late this weekend into next week. As of this update, the formation chance in the next 48 hours is low at 10 %, and the formation chance through 7 days has increased to 50%.

AMERICAN OVERSIGHT

Current model runs show an arrival time of any potential storm around Wednesday of next week. This represents a slower forward storm speed and later storm arrival than previous model runs, so the timing and impacts are still largely unknown. Regardless of any potential storm, significant rainfall is still expected, and the Incident Management Team will continue to monitor and update all personnel.

From: IMT <IMT@sheriffleefl.org>
Sent: Thursday, October 3, 2024 9:56 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance - Update #3

The National Hurricane Center has reduced the chance of tropical cyclone development within seven days to 30%. While the system is likely to develop over the Gulf of Mexico late this weekend or early next week, subsequent tropical or subtropical development could be limited by the system's potential interaction with a frontal boundary. Regardless of development, locally heavy rains could occur over portions of the Florida Peninsula next week.

Subject: New Caribbean Disturbance - Update #2

The forecast for the area of disorganized showers remains the same; it is still too early to tell if the system will develop further. Regardless of development, heavy rain is expected in our area into the weekend and next week. The Incident Management Team will continue to monitor.

From: IMT <IMT@sheriffleefl.org>
Sent: Tuesday, October 1, 2024 10:35 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance - Update #1

The area of disorganized showers remains at a 40% chance of development. The National Hurricane Center indicates that environmental conditions could support some gradual development of this system, and a tropical depression could form towards the end of this week or this weekend while it moves generally northwestward over the northwestern Caribbean Sea and into the Gulf of Mexico. As of this time, there are no changes, but some long range models show an increased chance of this disturbance affecting our area.

From: IMT <IMT@sheriffleefl.org>
Sent: Monday, September 30, 2024 8:11 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance

The Incident Management Team is monitoring a new area of disorganized showers and thunderstorms over the western Caribbean Sea. The National Weather Center states that the system has a medium chance (40%) of developing towards the middle to latter part of the week as it moves northwestward into the Gulf of Mexico. As this disturbance moves into the gulf, increasing moisture is expected over the Florida Peninsula and elevated rain chances are anticipated from Friday through the weekend, and possibly into early next week.

AMERICAN OVERSIGHT

Unfortunately, long range models show the possibility of direct impacts for Southwest Florida; however, It is too early to determine what, if any, tropical specific impacts can be expected.

The Incident Management Team will continue to monitor the storm, and will continue to provide updates through this very active part of the hurricane season.

Incident Command Kits for Law Enforcement

COMMAND GOBAG products are designed through law enforcement advisement to provide the essential tools to quickly set up a highly visible and efficient Command Post, organize Staging Areas, and manage traffic flow during critical incidents.

AMERICAN OVERSIGHT

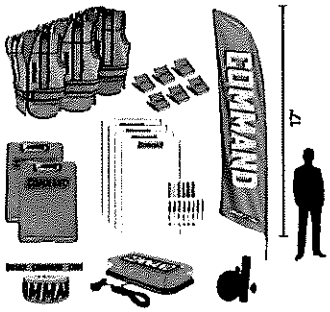
Our mission is to reduce confusion and chaos during emergencies by enabling rapid deployment of a single Incident Command Post, securing clear evacuation corridors via STAGING, and directing traffic to designated locations with our Flag Banner Kits.

Are You Equipped?

During life threatening incidents, time is of utmost importance. Officers rely on efficient operations to ensure public safety, especially during evacuations, large-scale or multi-agency emergencies. The COMMAND GOBAG products equip your team with the tools needed to quickly restore order, manage personnel, and ensure rapid medical attention to those in need

SHOP NOW

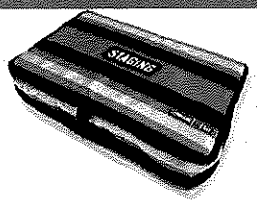
AMERICAN OVERSIGHT



COMMAND GOBAG®

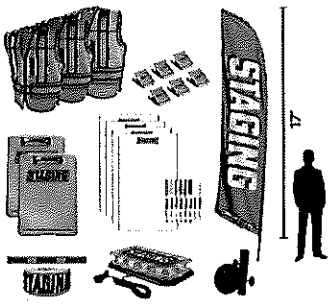
Quickly establish a highly-visible Incident Command Post.

Assists all responders to quickly identify the Incident Command Post location.



Value-priced to encourage every law enforcement vehicle, school building and public venue to have at least one Incident Command Kit on site and ready.

$425 *Shipping Included **

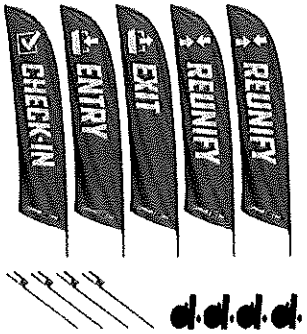


Each COMMAND GoBag comes with everything you see below, and includes an orange STAGING vest.

STAGING GOBAG

Maintain Evacuation Corridor immediately during a multi-jurisdictional incident.

Provide clarity and direction for all responding agencies through a STAGING post to manage vehicle and personnel resources.



$425 *Shipping Included **

Each STAGING GoBag contains everything in the Command GoBag yet orange, and also includes a COMMAND vest.

REUNIFICATION KIT

Designate and initiate orderly traffic control for the REUNIFICATION check-in process. Efficiently and effectively direct parents, support personnel, and others to the REUNIFICATION location, away from the incident with five (5) 17 foot, highly-visible flags and included ground stakes.

$650 *Shipping Included **

Each set comes complete with five (5) 17' blue REUNIFICATION flags, suction cup bases, and ground stakes.

Subject: Hurricane Milton - Update #19

As of this update, the latest storm information is as follows:

- The storm track has shifted north slightly. The movement is not far enough to make a difference in our impacts.
- The earliest reasonable arrival time of tropical-storm-force winds is early Wednesday morning.

As of this update, new notifications are as follows:

- The Hurricane Hotline is now active. Corrections personnel should call 239-477-1258, Law Enforcement personnel should call 239-477-1259, and Communications personnel should call 239-477-1260. Please save these numbers now in your phone. This hotline provides updates for personnel without access to e-mail. For now, all supervisors should relay all pertinent information to their personnel who do not have access to e-mail.
- Mandatory evacuations have been issued for the Town of Fort Myers Beach. Residents are encouraged to evacuate before 3:00 PM today.
- LeeTran at noon today, Monday, Oct. 7, will stop running routes onto Fort Myers Beach. All LeeTran services will convert to off-island transit only. This is to assist with the Town of Fort Myers Beach's request for residents to leave the island.
- Lee County Utilities will shut off water to Fort Myers Beach at noon Tuesday, Oct. 8. This is a precautionary measure to protect infrastructure. It was also implemented during 2022's Hurricane Ian.
- Lee County Sheriff's Office employees are currently in the field distributing sand and sand bags to locations throughout the county.

Gas Station Updates:

- 7-11 at SR 31/SR 80 received a fuel shipment this morning. Pumps 11 and 12 are for LEO. Make contact inside for pumps to be turned on.
- 7-11 at Billy's Creek is out of gas. Expecting shipment today. Will set aside fuel for LEO at Pump #1. Make contact with employee to have pump turned on.
- RaceTrac SR 31/ SR 80 has gas but expect to be out by noon and closed. Next shipment not expected until after the storm. They do not have a pump set aside for LEO.
- Circle K at SR 80/ Old Olga has fixed the pump and have a full tank for LEO. Make contact with employee for which pump to use.

AMERICAN OVERSIGHT

- Sunoco at SR 80 and Buckingham is out of gas but requested shipment. Will pump remaining for LEO. Make contact with employee inside for pump to be turned on.
- Rebel at 6 Mile/Metro currently has 8,000 gallons and will stop pumping at 800 gallons. They do not set aside gas for us. Unknown next shipment.
- RaceTrac at 6 Mile/Michael G Rippe is out of gas but requested shipment. They will set up a Pump #3 for LEO use when they get gas. Make contact with employee for pump to be turned on.
- Race Trac at Daniels/Powers Ct is out of gas. Shipment has been requested. Will set up pump for LEO use. In the past it has been Pump 18.
- 7-11 Daniels/Palomino is out of gas. Expecting shipment today and will contact me when they receive it. Pump 10 will be set aside for LEO.
- Rebel at 9281 Daniels Pkwy is out of gas. Requested shipment for today. Pump 1 will be set aside for LEO. Go inside to have pump turned on.
- Chevron at 13031 Metro is out of gas. Not expecting shipment. Will set a pump aside for LEO if they get gas.
- Circle K at Metro and Crystal is close to running out of gas and starting to shut pumps down. They are setting aside pumps 5-8 for LEO. Meet with employee for which pump to use.

Subject: Hurricane Milton - Update #18

As of the 8:00 AM update, a Hurricane Watch remains in effect for our area.

The IMT Main Number is 239-258-3150 or e-mail at IMT@sheriffleefl.org.

As of this update, the latest storm information is as follows:

- Hurricane Milton is now a major hurricane, with sustained wind speeds of 125 mph.
- Hurricane Milton is expected to have winds of 145 mph at landfall, with some expansion of hurricane-strength winds.
- The model spread in the forecast track remains high, with the entire area within the cone.
- Movement is ESE at 8 mph.
- The current earliest arrival of tropical-storm-strength winds is 1:00 AM on Wednesday, with a likely arrival time at 8:00 AM. This is the arrival of tropical-storm-force winds, not the arrival of the actual storm.
- The storm surge estimate is 5' to 10' for Lee County. It is expected to increase throughout the day on Wednesday and peak early Thursday.
- We are still in a Hurricane Watch, a Storm Surge Watch, and a Flood Watch.
- Many rivers are already in or forecast to go into flood stage.
- The main threat for tornadoes is late Tuesday into Wednesday night.
- Confidence is low on the exact track of the system, with the entire area within the cone. It should be noted that that 72 hour average track error is 100 miles.

As of this updates, new notifications are as follows:

- All personnel must notify IMT of all asset movements and personnel changes.
- Estero Fire Station #54 at Oriole and Alico just got sand delivered.
- Pine Island Fire has sand, but no sandbags.
- North Fort Myers Recreations Center has sand but no sandbags.

AMERICAN OVERSIGHT

- Corrections Transport vehicles have received their staging location and should be in place by 12:00 PM.
- Academy recruits and Youth Services deputies have been deployed to the field.

National Hurricane Center Definitions:

- **Hurricane Watch**: Hurricane conditions (sustained winds of 74 mph or greater) are possible within your area. Because it may not be safe to prepare for a hurricane once winds reach tropical storm force, The NHC issues hurricane watches 48 hours before it anticipates tropical storm-force winds.
- **Hurricane Warning**: Hurricane conditions (sustained winds of 74 mph or greater) are expected somewhere within the specified area. NHC issues a hurricane warning 36 hours in advance of tropical storm-force winds to give you time to complete your preparations. All preparations should be complete. Evacuate immediately if so ordered.
- **Storm Surge Watch**: There is a possibility of life-threatening inundation from rising water moving inland from the shoreline somewhere within the specified area, generally within 48 hours.
- **Extreme Wind Warning**: Extreme sustained winds of a major hurricane (115 mph or greater), usually associated with the eyewall, are expected to begin within an hour. Take immediate shelter in the interior portion of a well-built structure.

Subject: Hurricane Milton - Update #17

The 5:00 AM update shows that the track is largely unchanged; however, models still vary from Naples to North of Tampa, and the intensity is forecast to be stronger, well into the Category 4 range.

As of this update, new notifications are as follows:

- The storm has current maximum winds of 100 mph.
- The current forecast for our coast is an 8' - 12' storm surge.
- The storm has slowed somewhat, so the earliest arrival of Tropical Storm force winds is now in the early Wednesday morning hours.

Subject: Hurricane Milton - Update #16

AM OVERSIGHT

The 11:00 PM update shows little movement in Hurricane Milton's track. Maximum sustained wind speeds are at 90 mph. Model tracks vary widely on the landfall location along Florida's West Coast. The Incident Management Team will continue to monitor and provide timely updates.

As of this update, new notifications are as follows:

Gas Availability:

- RaceTrac - 15820 Winkler Rd. - Pump 15 & 16 for First Responders - Contact is Tracy
- 7-11 - 12750 Cleveland Ave. - Pump 10 & 12 for First Responders - Contact is Vanilla
- RaceTrac - 5991 South Pointe Blvd. - Pump 19 & 20 for First Responders - Contact is Vince
- Mobil/7-11 - 20391 Summerlin Rd. - Pump 6 for First Responders - Contact is Susan
- Circle K - 20021 Summerlin Rd. - Pump 1 for First Responders - Contact is Kyle
- 7-11 - 15021 McGregor Blvd. - Pump 1 for First Responders - Contact is Jessica
- Mobil/7-11 - 17930 N. Tamiami Trl. - Pump 9 & 10 for First Responders - Contact is Joseph
- Circle K - 6381 Bayshore Rd. - Pump 10 for First Responders - Contact is Elizabeth
- Circle K - 19101 N. Tamiami Trl. - Pump 1 & 2 for First Responders - Contact is Christy
- 7-11 - 100 Delaware in Lehigh Acres - Pump 1 & 2 for First Responders.

To: All Users <AllUsers@sheriffleefl.org>
Subject: Hurricane Milton - Update #15

As of the 8:00 PM National Hurricane Center update, Hurricane Milton is still forecast to rapidly intensify into a major hurricane. The center of the track has shifted further south, and is currently near the Bradenton/Sarasota area at landfall.

There is a Flood Watch for the entire area. Rainfall amounts of 5 to 10 inches, with localized totals of up to 15 inches are expected. The timing of the impacts is as early as late Tuesday and continuing into Thursday morning.

A good deal of uncertainty remains with where the storm will make landfall. It should be noted that the average NHC track error at day 3 is around 100 miles.

As of this update, new notifications are as follows:

- Youth Services and Training personnel have received their assignments and will report according to their schedule tomorrow.
- Court Operations and Civil personnel will receive their schedule tomorrow.
- Employee Assistance personnel are done for the evening. They will resume in the morning.
- IMT will be fully activated beginning at 7:00 AM on Monday, with all personnel reporting or receiving their assignments by then.
- For personnel working overtime, please use *Hurricane Milton* as the reason for the overtime.
- The 7-11 Gas station at 103 Leeland Heights Blvd W in Lehigh Acres is open for LEO. If you need gas, use pumps 3,4,5, or 6 only. Jessica is the contact person there.
- The 7-11 at 100 Delaware Rd. in Lehigh Acres is reserving gas for First Responders. use Pump 3 and 4. Sharon is the contact person there.
- The 7-11 at 18971 Babcock Ranch Rd is holding gas for first responders but deputies must go inside to request pump to be turned on.

AMERICAN OVERSIGHT

- The 7-11 at Del Prado and N Tamiami (17930 N Tamiami Trl.) is also holding gas for first responders but deputies must go inside to request the pump be turned on.

All personnel should be ready for a full activation at any time. This is a serious, dangerous storm and all personnel should complete preparations as soon as possible. Models vary in intensity, but most predict *at least* a Category 3, so even if we do not receive a direct hit, we can expect hurricane strength winds or wind gusts and a severe storm surge.

Subject: Hurricane Milton - Update #14

As of the 5:00 PM update, Milton is now a hurricane. Hurricane Milton has maximum sustained winds of 85 mph. The track has shifted slightly, and there is a more northeastern path across our area. Even if we do not receive a direct hit, we will receive tropical storm and hurricane strength winds, significant storm surge, and dangerous flooding from rainfall, likely much greater that what we received from Hurricane Helene. By tonight, all personnel should have their homes and families secured for the storm, and be prepared for a full activation.

Notifications for this update:

- All agency members deemed non essential during an emergency response will be dismissed tomorrow, October 7th, 2024 starting at **noon**. In order to stay home you will need to advise your immediate supervisor and use your accrued time. You may report for regular duty if you chose to do so. As always, use caution when driving in inclement weather and do not attempt to traverse standing water. IMT will continue to send out updates on our response to TS Milton.

- The Emergency Operations Center (EOC) will transition to a Level 1 at 7:00 AM tomorrow. This means that shelters and countywide operations will be run out of the EOC. The Incident Management Team is your contact for agency needs; do not contact the EOC directly.

Subject: Tropical Storm Milton - Update #13

The 2:00 PM Intermediate Update shows that there are no significant changes in the track. The earliest arrival of tropical storm force winds is projected to be 8:00 PM on Tuesday.

These are the stations that are reported to still have gasoline:

- Veronica Shoemaker/Winkler
- Shell station at Hancock and US 41
- BJ's Cape Coral
- 711 Burnt Store and Pine Island has DIESEL only

AMERICAN OVERSIGHT

- Racetrac at South Pointe and College has 93 Only
- Walmart / Murphy's USA in Lehigh
- Santa Barbara and Veterans 7/11

These are the stations that are reported to be currently **out** of gasoline:

- Country Club and Veterans Circle K
- Del Prado Speedway
- Trafalgar and Skyline 7/11
- Rebel US 41 and Del Prado
- 76 at Chiquita and Pine Island
- Walmart/Murphy's Del Prado
- Walmart on Pine Island Road
- Pine Ridge and San Carlos 7/11
- Santa Barbara and Gleason 7/11
- Palm Tree and Cape Coral Pkwy 7/11
- Lee and Gunnery 7/11
- Del Prado Racetrac
- Terry St Circle K
- Lee and Alvin Racetrac
- Joel Citgo
- N Cleveland and Littleton 7/11

Below are the current updated tasks that IMT has been working on since that last updates:

- Logistics members have scheduled pre-storm deliveries for food and beverages - the arrival time is Tuesday morning.
- Logistics members have scheduled post-storm deliveries from vendors.
- Logistics members have scheduled water deliveries.
- Logistics members have created plans for replenishment of supplies for long-term activations.
- Logistics members have arranged for ice deliveries for the event power is lost.
- Purchasing members have made plans for the procurement of potable water.
- Purchasing and Logistics members have scheduled the delivery of portable bathrooms should they be needed.
- HQ will be the central location for cooking needs post-storm for employees at HQ/IMT, Forensics, MCU, Command Staff, Spec Ops, and Staging personnel.
- Precincts and Corrections facilities will be responsible for their meal preparations.

Subject: Tropical Storm Milton - Update #12

The 11:00 AM update shows a small track shift to the south. Although it is still predicted to directly hit the Tampa Bay Area, the move slightly south may bring higher wind speeds and higher storm surge. The storm is expected to quickly intensify and will likely be a major hurricane upon arrival.

All personnel are encouraged to complete preparations for their homes and their families today.

AMERICAN OVERSIGHT

There is still a high degree of uncertainty in both the tracks and the wind speed upon arrival, so the possibility of a direct strike to our area remains. The cone of uncertainty currently covers most of the Florida peninsula. The Incident Management Team (IMT) will keep you informed, and is making preparations to include schedule planning.

Subject: Tropical Storm Milton - Update #8

AMERICAN OVERSIGHT

The 8:00 AM update shows that Milton is forecast to become a Major Category 3 Hurricane before making landfall. Timing, tracks, and intensity are still unpredictable; however, the National Hurricane Center still shows the track toward the Tampa area.

The current forecast is as follows:

- There is a Flood Watch for the entire area through Thursday.
- Rainfall in the amount of 5" to 8", with localized totals up to 12".
- The timing of the impacts is from late Tuesday through early Thursday morning, but it is expected to make landfall on the West Coast on Wednesday.
- There is great uncertainty about where the storm will make landfall. The average Day 4 track error is around 150 miles, so we are still well within a possible landfall range.
- The current earliest wind time arrival is 4 PM on Tuesday, and the most likely arrival time is 2 AM on Wednesday.

Additional notifications for this update include:

- Personnel should maintain at least ½ tank at all times. Due to current fuel runs, please use any opportunity to make sure your agency vehicle stays full at all times.
- Personnel who must fuel and have no other options may use 89 or 93 Octane fuel.
- Select IMT members have been activated. Please send requests to IMT@sheriffleefl.org.
- The select CRU members who were notified individually will report at 10:00 AM to the Headquarters Training Room (1202).
- The asset movement members who were notified individually will report at 10:00 AM to the Headquarters Training Room (1202).
- All units, components, precincts, corrections facilities, and all affected agency departments should fill up all available gas cans and gas tanks.
- Pine Island Fire Department is out of sand. They still have sandbags. They expect to get more sand on Monday.

Sent: Saturday, October 5, 2024 6:19 PM
To: All Users <AllUsers@sheriffleefl.org>
Subject: Tropical Storm Milton - Update #7

With the 5:00 PM update, Tropical Storm Milton is now expected to arrive as a major hurricane. The track has shifted some to the north; however, some model tracks still show direct hits our our area, and we are still in the cone of uncertainty. Please recall from prior storms that although we are not in the direct path, the effects of the hurricane will still affect us heavily, especially in the areas prone to storm surge. Additionally, the peak storm surge from Helene arrived almost 10 hours after the peak winds, so all personnel should be aware of and consider the effects before, during, and after the storm.

The below preparations remain in effect. The only change for this period is:

- Four (4) additional shallow water vessels have been obtained for water rescues.
- Additional High-Water Vehicles have been obtained and will be deployed to the islands for potential high-water rescues.
- The San Carlos Park Fire Department is out of sand and sandbags.

AMERICAN OVERSIGHT

Subject: Tropical Storm Milton - Update #6

As of a 12:25 PM National Hurricane Center update, Tropical Storm Milton has formed. This storm is forecast to strengthen and bring the risk of life-threatening impacts to portions of the West Coast of Florida next week. The maximum winds are currently estimated at 40 mph with higher gusts. Models range in intensity from a Tropical Storm to a Major Hurricane, so there is tremendous unpredictability in the strength upon arrival.

At this time, the Incident Management Team is preparing for the possibility of a major hurricane affecting our area with impacts beginning on Tuesday and a full impact on Wednesday.

All agency personnel are encouraged to prepare as follows:

- All personnel should review their hurricane plans, and prepare their homes and families for the possibility of a hurricane impact in the middle of next week.
- All precincts should secure their mobile assets (decoy vehicles, arrow boards, trailers, ATVs, etc.) beginning on immediately to be completed by 2:00 PM on Monday.
- All trailers should be brought to storage beginning immediately to be completed by 2:00 PM on Monday.
- All personnel should use the remainder of this weekend to prepare for a possible activation. This plan should include three days worth of food, uniforms, and supplies.
- All personnel should use the remainder of this weekend to prepare their uniforms and equipment (including sufficient batteries for equipment) for a possible activation.
- All specialty units should begin bringing their assets back to their storage areas and secure locations. This should be completed by 2:00 PM on Monday.
- All precincts should secure any items that can be moved by the wind to a secure location starting immediately to be completed by 2:00 PM on Monday.
- All Corrections facilities (including Nan's Ranch) should prepare their facilities for a possible hurricane impact next week.

This is new information as of this update:

- The Waterborne Strike Team is on standby for deployment for water rescues.
- JetBlue Stadium, CenturyLink Stadium, the Lee County Gun Range, and the Andrea Lane and Sivan Road storage buildings are prepared to receive assets if needed.
- The Marine Unit is in contact with the IMT to secure the marine assets.
- Known sandbag locations are as follows:
    - Punta Gorda—Free sandbags will be available at 3130 Cooper St., the last entrance on the left by flag poles.
    - Fort Myers Beach—Sand is located off of Gulf Beach Road, and bags are available at Town Hall, 2731 Oak St. (The location will provide service until 4:30 p.m. on Friday and begin Monday at 8:30 a.m.)
    - Fort Myers— South Trail Fire & Rescue will have sand and sandbags available at station 63, 5531 Halifax Ave., Fort Myers—a maximum of 20 bags per household. UPDATE: South Trail Fire & Rescue is currently out of sand. Empty sandbags only are available.
    - Naples— Sandbags will be available at three public park locations: Big Corkscrew Island Regional Park, 810 39th Ave., North Collier Regional Park, 15000 Livingston Road, in the Sun-N-Fun Lagoon parking lot, and at Donna Fiala Eagle Lakes Community Park, 11565 Tamiami

AMERICAN OVERSIGHT

Trail East, in the grassy area between the parking lots. The Naples sandbag locations will begin service at 8 a.m. through dusk on Saturday and Sunday.
    - San Carlos Park—Sand and sandbags are available at San Carlos Park Fire District Station 54, located at 16900 Oriole Road. There is a limit of 10 bags per household. Bags can be picked up at the lobby. Bring your own shovel. Be prepared to fill and load your own sandbags. Make sure your vehicle can transport the weight of the sandbags.
    - North Fort Myers—Sandbags will be located at North Fort Myers Parks and Recreation, 2000 N. Recreation Parkway. Sand will be located in the back of the park, next to the county mulch pile. Please bring your own shovel to fill the bags.
    - Matlacha—Sandbags are available for pickup at Station 1, located at 5700 Pine Island Rd, Bokeelia, FL 33922
- IMT personnel are visiting the precincts, and the storage locations to inventory assets to prepare for both securement and post-storm deployment.
- No schedule changes are expected between now and Monday afternoon; however, all personnel should be prepared for schedule adjustments.
- The Agriculture assets are secured on the Olga site.

Subject: Important Update on a possible impending hurricane impacting our area (Update #5)

Team,

IMT has been working on preparation for a potential Hurricane impacting our area early next week. IMT will continue to send out updates regularly so please monitor your email closely. All agency units need to begin preparations of securing their assigned assets and communicate all movement to IMT. Also, update the major asset application on the intranet. We have secured Jet Blue Park as an asset staging area for Marine and other assets. Agency asset storage facilities to include the gun range are preparing to house assets as well. IMT is securing high water vehicles that will be pre-staged at strategic locations i.e., the barrier islands. IMT members will be in the RTIC today coordinating efforts. Agency extension 239-258-3150 is being setup to communicate to IMT staff. Additional updates to follow.

Be prepared and be safe!

Subject: New Caribbean Disturbance - Update #4

The National Hurricane Center 2:00 PM update shows the possibility of development as the low pressure area in the Gulf of Mexico moves slowly eastward or northeastward. A tropical or subtropical depression or storm could form during the early to middle part of next week if the low remains separate from a frontal boundary that is forecast to extend across the Gulf of Mexico. Regardless of development, locally heavy rains could occur over portions of the Florida Peninsula late this weekend into next week. As of this update, the formation chance in the next 48 hours is low at 10 %, and the formation chance through 7 days has increased to 50%.

AMERICAN OVERSIGHT

Current model runs show an arrival time of any potential storm around Wednesday of next week. This represents a slower forward storm speed and later storm arrival than previous model runs, so the timing and impacts are still largely unknown. Regardless of any potential storm, significant rainfall is still expected, and the Incident Management Team will continue to monitor and update all personnel.

Subject: New Caribbean Disturbance - Update #2

The forecast for the area of disorganized showers remains the same; it is still too early to tell if the system will develop further. Regardless of development, heavy rain is expected in our area into the weekend and next week. The Incident Management Team will continue to monitor.

From: IMT <IMT@sheriffleefl.org>
Sent: Tuesday, October 1, 2024 10:35 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance - Update #1

The area of disorganized showers remains at a 40% chance of development. The National Hurricane Center indicates that environmental conditions could support some gradual development of this system, and a tropical depression could form towards the end of this week or this weekend while it moves generally northwestward over the northwestern Caribbean Sea and into the Gulf of Mexico. As of this time, there are no changes, but some long range models show an increased chance of this disturbance affecting our area.

From: IMT <IMT@sheriffleefl.org>
Sent: Monday, September 30, 2024 8:11 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance

The Incident Management Team is monitoring a new area of disorganized showers and thunderstorms over the western Caribbean Sea. The National Weather Center states that the system has a medium chance (40%) of developing towards the middle to latter part of the week as it moves northwestward into the Gulf of Mexico. As this disturbance moves into the gulf, increasing moisture is expected over the Florida Peninsula and elevated rain chances are anticipated from Friday through the weekend, and possibly into early next week.

AMERICAN OVERSIGHT

Unfortunately, long range models show the possibility of direct impacts for Southwest Florida; however, It is too early to determine what, if any, tropical specific impacts can be expected.

The Incident Management Team will continue to monitor the storm, and will continue to provide updates through this very active part of the hurricane season.

Subject: Hurricane Milton - Update #19

As of this update, the latest storm information is as follows:

- The storm track has shifted north slightly. The movement is not far enough to make a difference in our impacts.
- The earliest reasonable arrival time of tropical-storm-force winds is early Wednesday morning.

As of this update, new notifications are as follows:

- The Hurricane Hotline is now active. Corrections personnel should call 239-477-1258, Law Enforcement personnel should call 239-477-1259, and Communications personnel should call 239-477-1260. Please save these numbers now in your phone. This hotline provides updates for personnel without access to e-mail. For now, all supervisors should relay all pertinent information to their personnel who do not have access to e-mail.
- Mandatory evacuations have been issued for the Town of Fort Myers Beach. Residents are encouraged to evacuate before 3:00 PM today.
- LeeTran at noon today, Monday, Oct. 7, will stop running routes onto Fort Myers Beach. All LeeTran services will convert to off-island transit only. This is to assist with the Town of Fort Myers Beach's request for residents to leave the island.
- Lee County Utilities will shut off water to Fort Myers Beach at noon Tuesday, Oct. 8. This is a precautionary measure to protect infrastructure. It was also implemented during 2022's Hurricane Ian.
- Lee County Sheriff's Office employees are currently in the field distributing sand and sand bags to locations throughout the county.

Gas Station Updates:

- 7-11 at SR 31/SR 80 received a fuel shipment this morning. Pumps 11 and 12 are for LEO. Make contact inside for pumps to be turned on.
- 7-11 at Billy's Creek is out of gas. Expecting shipment today. Will set aside fuel for LEO at Pump #1. Make contact with employee to have pump turned on.
- RaceTrac SR 31/ SR 80 has gas but expect to be out by noon and closed. Next shipment not expected until after the storm. They do not have a pump set aside for LEO.
- Circle K at SR 80/ Old Olga has fixed the pump and have a full tank for LEO. Make contact with employee for which pump to use.

AMERICAN OVERSIGHT

- Sunoco at SR 80 and Buckingham is out of gas but requested shipment. Will pump remaining for LEO. Make contact with employee inside for pump to be turned on.
- Rebel at 6 Mile/Metro currently has 8,000 gallons and will stop pumping at 800 gallons. They do not set aside gas for us. Unknown next shipment.
- RaceTrac at 6 Mile/Michael G Rippe is out of gas but requested shipment. They will set up a Pump #3 for LEO use when they get gas. Make contact with employee for pump to be turned on.
- Race Trac at Daniels/Powers Ct is out of gas. Shipment has been requested. Will set up pump for LEO use. In the past it has been Pump 18.
- 7-11 Daniels/Palomino is out of gas. Expecting shipment today and will contact me when they receive it. Pump 10 will be set aside for LEO.
- Rebel at 9281 Daniels Pkwy is out of gas. Requested shipment for today. Pump 1 will be set aside for LEO. Go inside to have pump turned on.
- Chevron at 13031 Metro is out of gas. Not expecting shipment. Will set a pump aside for LEO if they get gas.
- Circle K at Metro and Crystal is close to running out of gas and starting to shut pumps down. They are setting aside pumps 5-8 for LEO. Meet with employee for which pump to use.

Subject: Hurricane Milton - Update #18

As of the 8:00 AM update, a Hurricane Watch remains in effect for our area.

The IMT Main Number is 239-258-3150 or e-mail at IMT@sheriffleefl.org.

As of this update, the latest storm information is as follows:

- Hurricane Milton is now a major hurricane, with sustained wind speeds of 125 mph.
- Hurricane Milton is expected to have winds of 145 mph at landfall, with some expansion of hurricane-strength winds.
- The model spread in the forecast track remains high, with the entire area within the cone.
- Movement is ESE at 8 mph.
- The current earliest arrival of tropical-storm-strength winds is 1:00 AM on Wednesday, with a likely arrival time at 8:00 AM. This is the arrival of tropical-storm-force winds, not the arrival of the actual storm.
- The storm surge estimate is 5' to 10' for Lee County. It is expected to increase throughout the day on Wednesday and peak early Thursday.
- We are still in a Hurricane Watch, a Storm Surge Watch, and a Flood Watch.
- Many rivers are already in or forecast to go into flood stage.
- The main threat for tornadoes is late Tuesday into Wednesday night.
- Confidence is low on the exact track of the system, with the entire area within the cone. It should be noted that that 72 hour average track error is 100 miles.

As of this updates, new notifications are as follows:

- All personnel must notify IMT of all asset movements and personnel changes.
- Estero Fire Station #54 at Oriole and Alico just got sand delivered.
- Pine Island Fire has sand, but no sandbags.
- North Fort Myers Recreations Center has sand but no sandbags.

AMERICAN OVERSIGHT

- Corrections Transport vehicles have received their staging location and should be in place by 12:00 PM.
- Academy recruits and Youth Services deputies have been deployed to the field.

National Hurricane Center Definitions:

- **Hurricane Watch**: Hurricane conditions (sustained winds of 74 mph or greater) are possible within your area. Because it may not be safe to prepare for a hurricane once winds reach tropical storm force, The NHC issues hurricane watches 48 hours before it anticipates tropical storm-force winds.
- **Hurricane Warning**: Hurricane conditions (sustained winds of 74 mph or greater) are expected somewhere within the specified area. NHC issues a hurricane warning 36 hours in advance of tropical storm-force winds to give you time to complete your preparations. All preparations should be complete. Evacuate immediately if so ordered.
- **Storm Surge Watch**: There is a possibility of life-threatening inundation from rising water moving inland from the shoreline somewhere within the specified area, generally within 48 hours.
- **Extreme Wind Warning**: Extreme sustained winds of a major hurricane (115 mph or greater), usually associated with the eyewall, are expected to begin within an hour. Take immediate shelter in the interior portion of a well-built structure.

Sent: Monday, October 7, 2024 5:29 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: Hurricane Milton - Update #17

The 5:00 AM update shows that the track is largely unchanged; however, models still vary from Naples to North of Tampa, and the intensity is forecast to be stronger, well into the Category 4 range.

As of this update, new notifications are as follows:

- The storm has current maximum winds of 100 mph.
- The current forecast for our coast is an 8' - 12' storm surge.
- The storm has slowed somewhat, so the earliest arrival of Tropical Storm force winds is now in the early Wednesday morning hours.

Subject: Hurricane Milton - Update #16

AM OVERSIGHT

The 11:00 PM update shows little movement in Hurricane Milton's track. Maximum sustained wind speeds are at 90 mph. Model tracks vary widely on the landfall location along Florida's West Coast. The Incident Management Team will continue to monitor and provide timely updates.

As of this update, new notifications are as follows:

Gas Availability:

- RaceTrac - 15820 Winkler Rd. - Pump 15 & 16 for First Responders - Contact is Tracy
- 7-11 - 12750 Cleveland Ave. - Pump 10 & 12 for First Responders - Contact is Vanilla
- RaceTrac - 5991 South Pointe Blvd. - Pump 19 & 20 for First Responders - Contact is Vince
- Mobil/7-11 - 20391 Summerlin Rd. - Pump 6 for First Responders - Contact is Susan
- Circle K - 20021 Summerlin Rd. - Pump 1 for First Responders - Contact is Kyle
- 7-11 - 15021 McGregor Blvd. - Pump 1 for First Responders - Contact is Jessica
- Mobil/7-11 - 17930 N. Tamiami Trl. - Pump 9 & 10 for First Responders - Contact is Joseph
- Circle K - 6381 Bayshore Rd. - Pump 10 for First Responders - Contact is Elizabeth
- Circle K - 19101 N. Tamiami Trl. - Pump 1 & 2 for First Responders - Contact is Christy
- 7-11 - 100 Delaware in Lehigh Acres - Pump 1 & 2 for First Responders.

Sent: Sunday, October 6, 2024 8:57 PM
To: All Users <AllUsers@sheriffleefl.org>
Subject: Hurricane Milton - Update #15

As of the 8:00 PM National Hurricane Center update, Hurricane Milton is still forecast to rapidly intensify into a major hurricane. The center of the track has shifted further south, and is currently near the Bradenton/Sarasota area at landfall.

There is a Flood Watch for the entire area. Rainfall amounts of 5 to 10 inches, with localized totals of up to 15 inches are expected. The timing of the impacts is as early as late Tuesday and continuing into Thursday morning.

A good deal of uncertainty remains with where the storm will make landfall. It should be noted that the average NHC track error at day 3 is around 100 miles.

As of this update, new notifications are as follows:

- Youth Services and Training personnel have received their assignments and will report according to their schedule tomorrow.
- Court Operations and Civil personnel will receive their schedule tomorrow.
- Employee Assistance personnel are done for the evening. They will resume in the morning.
- IMT will be fully activated beginning at 7:00 AM on Monday, with all personnel reporting or receiving their assignments by then.
- For personnel working overtime, please use *Hurricane Milton* as the reason for the overtime.
- The 7-11 Gas station at 103 Leeland Heights Blvd W in Lehigh Acres is open for LEO. If you need gas, use pumps 3,4,5, or 6 only. Jessica is the contact person there.
- The 7-11 at 100 Delaware Rd. in Lehigh Acres is reserving gas for First Responders. use Pump 3 and 4. Sharon is the contact person there.
- The 7-11 at 18971 Babcock Ranch Rd is holding gas for first responders but deputies must go inside to request pump to be turned on.

AMERICAN OVERSIGHT

- The 7-11 at Del Prado and N Tamiami (17930 N Tamiami Trl.) is also holding gas for first responders but deputies must go inside to request the pump be turned on.

All personnel should be ready for a full activation at any time. This is a serious, dangerous storm and all personnel should complete preparations as soon as possible. Models vary in intensity, but most predict *at least* a Category 3, so even if we do not receive a direct hit, we can expect hurricane strength winds or wind gusts and a severe storm surge.

Subject: Hurricane Milton - Update #14

As of the 5:00 PM update, Milton is now a hurricane. Hurricane Milton has maximum sustained winds of 85 mph. The track has shifted slightly, and there is a more northeastern path across our area. Even if we do not receive a direct hit, we will receive tropical storm and hurricane strength winds, significant storm surge, and dangerous flooding from rainfall, likely much greater that what we received from Hurricane Helene. By tonight, all personnel should have their homes and families secured for the storm, and be prepared for a full activation.

Notifications for this update:

- All agency members deemed non essential during an emergency response will be dismissed tomorrow, October 7th, 2024 starting at **noon**. In order to stay home you will need to advise your immediate supervisor and use your accrued time. You may report for regular duty if you chose to do so. As always, use caution when driving in inclement weather and do not attempt to traverse standing water. IMT will continue to send out updates on our response to TS Milton.

- The Emergency Operations Center (EOC) will transition to a Level 1 at 7:00 AM tomorrow. This means that shelters and countywide operations will be run out of the EOC. The Incident Management Team is your contact for agency needs; do not contact the EOC directly.

Subject: Tropical Storm Milton - Update #12

The 11:00 AM update shows a small track shift to the south. Although it is still predicted to directly hit the Tampa Bay Area, the move slightly south may bring higher wind speeds and higher storm surge. The storm is expected to quickly intensify and will likely be a major hurricane upon arrival.

All personnel are encouraged to complete preparations for their homes and their families today.

AMERICAN OVERSIGHT

There is still a high degree of uncertainty in both the tracks and the wind speed upon arrival, so the possibility of a direct strike to our area remains. The cone of uncertainty currently covers most of the Florida peninsula. The Incident Management Team (IMT) will keep you informed, and is making preparations to include schedule planning.

Subject: Tropical Storm Milton - Update #8

AMERICAN OVERSIGHT

The 8:00 AM update shows that Milton is forecast to become a Major Category 3 Hurricane before making landfall. Timing, tracks, and intensity are still unpredictable; however, the National Hurricane Center still shows the track toward the Tampa area.

The current forecast is as follows:

- There is a Flood Watch for the entire area through Thursday.
- Rainfall in the amount of 5" to 8", with localized totals up to 12".
- The timing of the impacts is from late Tuesday through early Thursday morning, but it is expected to make landfall on the West Coast on Wednesday.
- There is great uncertainty about where the storm will make landfall. The average Day 4 track error is around 150 miles, so we are still well within a possible landfall range.
- The current earliest wind time arrival is 4 PM on Tuesday, and the most likely arrival time is 2 AM on Wednesday.

Additional notifications for this update include:

- Personnel should maintain at least ½ tank at all times. Due to current fuel runs, please use any opportunity to make sure your agency vehicle stays full at all times.
- Personnel who must fuel and have no other options may use 89 or 93 Octane fuel.
- Select IMT members have been activated. Please send requests to IMT@sheriffleefl.org.
- The select CRU members who were notified individually will report at 10:00 AM to the Headquarters Training Room (1202).
- The asset movement members who were notified individually will report at 10:00 AM to the Headquarters Training Room (1202).
- All units, components, precincts, corrections facilities, and all affected agency departments should fill up all available gas cans and gas tanks.
- Pine Island Fire Department is out of sand. They still have sandbags. They expect to get more sand on Monday.

Sent: Saturday, October 5, 2024 6:19 PM
To: All Users <AllUsers@sheriffleefl.org>
Subject: Tropical Storm Milton - Update #7

With the 5:00 PM update, Tropical Storm Milton is now expected to arrive as a major hurricane. The track has shifted some to the north; however, some model tracks still show direct hits our our area, and we are still in the cone of uncertainty. Please recall from prior storms that although we are not in the direct path, the effects of the hurricane will still affect us heavily, especially in the areas prone to storm surge. Additionally, the peak storm surge from Helene arrived almost 10 hours after the peak winds, so all personnel should be aware of and consider the effects before, during, and after the storm.

The below preparations remain in effect. The only change for this period is:

- Four (4) additional shallow water vessels have been obtained for water rescues.
- Additional High-Water Vehicles have been obtained and will be deployed to the islands for potential high-water rescues.
- The San Carlos Park Fire Department is out of sand and sandbags.

Subject: Tropical Storm Milton - Update #6

As of a 12:25 PM National Hurricane Center update, Tropical Storm Milton has formed. This storm is forecast to strengthen and bring the risk of life-threatening impacts to portions of the West Coast of Florida next week. The maximum winds are currently estimated at 40 mph with higher gusts. Models range in intensity from a Tropical Storm to a Major Hurricane, so there is tremendous unpredictability in the strength upon arrival.

At this time, the Incident Management Team is preparing for the possibility of a major hurricane affecting our area with impacts beginning on Tuesday and a full impact on Wednesday.

All agency personnel are encouraged to prepare as follows:

- All personnel should review their hurricane plans, and prepare their homes and families for the possibility of a hurricane impact in the middle of next week.
- All precincts should secure their mobile assets (decoy vehicles, arrow boards, trailers, ATVs, etc.) beginning on immediately to be completed by 2:00 PM on Monday.
- All trailers should be brought to storage beginning immediately to be completed by 2:00 PM on Monday.
- All personnel should use the remainder of this weekend to prepare for a possible activation. This plan should include three days worth of food, uniforms, and supplies.
- All personnel should use the remainder of this weekend to prepare their uniforms and equipment (including sufficient batteries for equipment) for a possible activation.
- All specialty units should begin bringing their assets back to their storage areas and secure locations. This should be completed by 2:00 PM on Monday.
- All precincts should secure any items that can be moved by the wind to a secure location starting immediately to be completed by 2:00 PM on Monday.
- All Corrections facilities (including Nan's Ranch) should prepare their facilities for a possible hurricane impact next week.

This is new information as of this update:

- The Waterborne Strike Team is on standby for deployment for water rescues.
- JetBlue Stadium, CenturyLink Stadium, the Lee County Gun Range, and the Andrea Lane and Sivan Road storage buildings are prepared to receive assets if needed.
- The Marine Unit is in contact with the IMT to secure the marine assets.
- Known sandbag locations are as follows:
    - Punta Gorda—Free sandbags will be available at 3130 Cooper St., the last entrance on the left by flag poles.
    - Fort Myers Beach—Sand is located off of Gulf Beach Road, and bags are available at Town Hall, 2731 Oak St. (The location will provide service until 4:30 p.m. on Friday and begin Monday at 8:30 a.m.)
    - Fort Myers— South Trail Fire & Rescue will have sand and sandbags available at station 63, 5531 Halifax Ave., Fort Myers—a maximum of 20 bags per household. UPDATE: South Trail Fire & Rescue is currently out of sand. Empty sandbags only are available.
    - Naples— Sandbags will be available at three public park locations: Big Corkscrew Island Regional Park, 810 39th Ave., North Collier Regional Park, 15000 Livingston Road, in the Sun-N-Fun Lagoon parking lot, and at Donna Fiala Eagle Lakes Community Park, 11565 Tamiami

AMERICAN OVERSIGHT

Trail East, in the grassy area between the parking lots. The Naples sandbag locations will begin service at 8 a.m. through dusk on Saturday and Sunday.
    - San Carlos Park—Sand and sandbags are available at San Carlos Park Fire District Station 54, located at 16900 Oriole Road. There is a limit of 10 bags per household. Bags can be picked up at the lobby. Bring your own shovel. Be prepared to fill and load your own sandbags. Make sure your vehicle can transport the weight of the sandbags.
    - North Fort Myers—Sandbags will be located at North Fort Myers Parks and Recreation, 2000 N. Recreation Parkway. Sand will be located in the back of the park, next to the county mulch pile. Please bring your own shovel to fill the bags.
    - Matlacha—Sandbags are available for pickup at Station 1, located at 5700 Pine Island Rd, Bokeelia, FL 33922
- IMT personnel are visiting the precincts, and the storage locations to inventory assets to prepare for both securement and post-storm deployment.
- No schedule changes are expected between now and Monday afternoon; however, all personnel should be prepared for schedule adjustments.
- The Agriculture assets are secured on the Olga site.

Subject: Important Update on a possible impending hurricane impacting our area (Update #5)

Team,

IMT has been working on preparation for a potential Hurricane impacting our area early next week. IMT will continue to send out updates regularly so please monitor your email closely. All agency units need to begin preparations of securing their assigned assets and communicate all movement to IMT. Also, update the major asset application on the intranet. We have secured Jet Blue Park as an asset staging area for Marine and other assets. Agency asset storage facilities to include the gun range are preparing to house assets as well. IMT is securing high water vehicles that will be pre-staged at strategic locations i.e., the barrier islands. IMT members will be in the RTIC today coordinating efforts. Agency extension 239-258-3150 is being setup to communicate to IMT staff. Additional updates to follow.

Be prepared and be safe!

Subject: New Caribbean Disturbance - Update #4

The National Hurricane Center 2:00 PM update shows the possibility of development as the low pressure area in the Gulf of Mexico moves slowly eastward or northeastward. A tropical or subtropical depression or storm could form during the early to middle part of next week if the low remains separate from a frontal boundary that is forecast to extend across the Gulf of Mexico. Regardless of development, locally heavy rains could occur over portions of the Florida Peninsula late this weekend into next week. As of this update, the formation chance in the next 48 hours is low at 10 %, and the formation chance through 7 days has increased to 50%.

AMERICAN OVERSIGHT

Current model runs show an arrival time of any potential storm around Wednesday of next week. This represents a slower forward storm speed and later storm arrival than previous model runs, so the timing and impacts are still largely unknown. Regardless of any potential storm, significant rainfall is still expected, and the Incident Management Team will continue to monitor and update all personnel.

From: IMT <IMT@sheriffleefl.org>
Sent: Thursday, October 3, 2024 9:56 AM

Subject: New Caribbean Disturbance - Update #3

The National Hurricane Center has reduced the chance of tropical cyclone development within seven days to 30%. While the system is likely to develop over the Gulf of Mexico late this weekend or early next week, subsequent tropical or subtropical development could be limited by the system's potential interaction with a frontal boundary. Regardless of development, locally heavy rains could occur over portions of the Florida Peninsula next week.

Subject: New Caribbean Disturbance - Update #2

The forecast for the area of disorganized showers remains the same; it is still too early to tell if the system will develop further. Regardless of development, heavy rain is expected in our area into the weekend and next week. The Incident Management Team will continue to monitor.

From: IMT <IMT@sheriffleefl.org>
Sent: Tuesday, October 1, 2024 10:35 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance - Update #1

The area of disorganized showers remains at a 40% chance of development. The National Hurricane Center indicates that environmental conditions could support some gradual development of this system, and a tropical depression could form towards the end of this week or this weekend while it moves generally northwestward over the northwestern Caribbean Sea and into the Gulf of Mexico. As of this time, there are no changes, but some long range models show an increased chance of this disturbance affecting our area.

From: IMT <IMT@sheriffleefl.org>
Sent: Monday, September 30, 2024 8:11 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance

The Incident Management Team is monitoring a new area of disorganized showers and thunderstorms over the western Caribbean Sea. The National Weather Center states that the system has a medium chance (40%) of developing towards the middle to latter part of the week as it moves northwestward into the Gulf of Mexico. As this disturbance moves into the gulf, increasing moisture is expected over the Florida Peninsula and elevated rain chances are anticipated from Friday through the weekend, and possibly into early next week.

AMERICAN OVERSIGHT

Unfortunately, long range models show the possibility of direct impacts for Southwest Florida; however, It is too early to determine what, if any, tropical specific impacts can be expected.

The Incident Management Team will continue to monitor the storm, and will continue to provide updates through this very active part of the hurricane season.

Members,

The police department is reporting increased inquires of loose building materials in the area. Please take time today to finish securing properties and material. Please call/text my cell 239-770-8658 if you see any properties that need securing and I will reach out to the contractor. Send property address.

Site Clean-Up and Preparation Instructions:

- **Secure Loose Materials: Ensure all loose materials, tools, and equipment are secured or stored in a safe location. This includes scaffolding, ladders, and other items that could become airborne.**
- **Protect Machinery: Move machinery and vehicles to higher ground if possible, and secure them to prevent movement during high winds.**
- **Inspect and Secure Structures: Check that temporary structures, such as tents or trailers, are securely fastened and will not pose a risk during the storm.**
- **Drainage and Flood Prevention: Clear drains, gutters, and any other drainage systems to prevent flooding on the site. Sandbags should be used in areas prone to water accumulation.**
- **Electrical Safety: Disconnect and safely cover all electrical equipment to prevent water damage. Ensure that power is turned off at the main switch if the site will be unattended.**
- **Remove Hazardous Materials: Properly store or dispose of any hazardous materials to prevent spills or leaks.**
- **Site Closure: If the decision is made to close the site, ensure that all access points are locked and secured, and signage is posted to inform staff and visitors of the closure.**
- **Post-Storm Inspection: Once it is safe, conduct a thorough inspection of the site to assess any damage and identify any safety concerns before resuming work.**

Oct. 8, 2024

MEDIA ADVISORY

Lee County Commissioners and officials to offer updates regarding Hurricane Milton in media conference and Facebook Live event a noon today.

WHAT: In-person media briefing with the availability for the public and media who cannot attend in person to watch online and on LeeTV. Participants include County Commissioners, the Sheriff and other public officials. The briefing will be on Facebook Live, available at www.facebook.com/leecountyflbocc. It can also be viewed on LeeTV and on the Lee County Government YouTube channel.

WHO:
Media may attend in person and the public may view online.

WHEN:
Noon today, Oct. 8. Media should arrive by 11:40 a.m.

WHERE:
Lee County Emergency Operations Center, 2675 Ortiz Ave, Fort Myers, FL 33905. The EOC is located on the east side of Ortiz Avenue, about 0.6 miles south of State Road 82. Parking at the EOC is limited due to an ongoing renovation and expansion. Follow directional signs for parking onsite.

The briefing is also available at www.facebook.com/leecountyflbocc. It also can be viewed on LeeTV and on the Lee County Government YouTube channel.

Subject:	News Nation Interview
Location:	EOC - 2675 Otriz Avenue
Start:	Tue 10/8/2024 1:00 PM
End:	Tue 10/8/2024 1:30 PM
Recurrence:	(none)
Meeting Status:	Accepted
Organizer:	Christopher Fine
Required Attendees:	Carmine Marceno; John Holloway; Christopher Lalor; James Heuglin; Anita Iriarte; Todd Olmer; Sarah Rodriguez; Nestor Montoya; Jessie Santero; Julie Martin; Autumn King; Robert DeAngelo; Herbert Ellis; Katie Walter; Tara Thrower; Joshua Hanchey; Mark Shelly
Optional Attendees:	Kevin Ellis; Jonathan Taylor

Sheriff to interview with Nichole Berlie from News Nation in regards to Hurricane Milton.

Will be via Zoom in LCSO assigned room at EOC

IT will transport and set up Zoom gear in room.

Logon time/hit time:
Log on time: 1:00est
Hit time: 1:09 est
The interview is about five minutes. Our control room will conduct a quick tech check with you and frame your shot
Zoom link:
https://nexstar.zoom.us/j/91695641844

Lt. Fine and Julie to attend.

Talking Points:

Hurricane Milton

Jail Updates:

-The Jail and CORE facilities are 100% staffed.

-All inmates are in hardened structures.

-Water tanks are on standby if needed for drinking and sanitation.

-Kitchen is staffed and has two-weeks of food for inmates and staff.

AMERICAN OVERSIGHT

-Medical staff will maintain 24/7 care.

-Inmates will be evacuated to top floors in case of flooding.

-Both facilities have room and contingency plans if one needs to evacuate to the other. Vehicles and personnel are staged.

LCSO Updates:

-(Anticipated Sanibel question) To assisted the City of Sanibel, we conducted a brief assessment of travel on and off the island to more effectively deploy resources.

-The Lee County Sheriff's Office Incident Management Team is actively monitoring Hurricane Milton and is FULLY activated.

-Message boards and deputies are located at each entrance and exit to barrier islands informing residents of the Counties evacuation orders, and informing them of dangers if staying.

-All Student Resource Officers (SROs) are assisting with preparing residents on the barrier islands, and assisting Patrol.
-LCSO personnel and heavy equipment are loading four dump trucks to deliver sand for sandbags throughout the county at fire stations to assist county with more locations.
-Marine Unit has moved most of their boats farther inland. Last remaining boats are for heavy weather rescue and will remove when conditions worsen.
-We've ensured there is enough manpower staged and in place right up to, and immediately after the storm.

-Post storm we have multiple layers of communication so at the PUSH OF THE BUTTON we will deploy.

-LCSO is READY! Our Waterbourne Strike Team and Marine Unit, Special Ops are standing by should the need arise to rescue people.

AMERICAN OVERSIGHT

-Four (4) additional shallow water vessels have been obtained for water rescues.

-Additional High-Water Vehicles have been obtained and will be deployed for potential high-water rescues.

-LCSO administrative services at precinct offices will be halted unit after the storm so we can focus on preparation and possible recovery efforts.

-Once we get sustained winds of 45 MPH, emergency response is stopped until it's safe to respond to calls.

-It could take several hours or more for the winds to subside before a deputy is able to respond, once the impacts begin. SHELTER IN PLACE.

-Don't try to drive anywhere in inclement conditions as the roadways are not safe.
-We urge everyone to prepare for this storm! Prepare for the worst, but hope for the best!

-We know what Mother Nature can do! She is unpredictable, which is why we urge everyone NOT to wait until the last minute to have everything that you need.

-Do NOT go outside during the storm as wind and standing water create hazard that can be fatal.

-Remember the three phases of the storm: BEFORE, DURING, and AFTER. Have you plan for all three.

-Continue to monitor your local media for weather updates, as well as the Lee County Sheriff's Office and Lee County Government on social media for the latest updates.

-WE ARE SWFL STRONG and are IN THIS TOGETHER

AMERICAN OVERSIGHT

Thank you for your time today. See you soon!
The time moved up 15 minutes. I hope that's ok. Let me know.

Please confirm you received this.

Good afternoon,

I was wondering if we can schedule an interview tomorrow with the Sheriff or someone to give updates on Hurricane Milton. We were looking to interview around 12:15 est.

Let me know and stay safe.

Lee County announces additional shelter openings this morning in advance of Hurricane Milton

Fort Myers, FL, Oct. 8, 2024 – Lee County has announced additional shelters opened at 8 a.m. today in advance of the approach of Hurricane Milton.

Additional shelters are:

- Gateway High School
  13820 Griffin Drive
  Fort Myers, FL 33913

- Hertz Arena
  11000 Everblades Parkway
  Estero, FL 33928

- Oak Hammock Middle School
  5321 Tice St.
  Fort Myers, FL 33905

- Tortuga Preserve Elementary School
  1711 Gunnery Road N.
  Lehigh Acres, FL 33971

- Treeline Elementary School
  10900 Treeline Ave.
  Fort Myers, FL 33913

- Varsity Lakes Middle School
  801 Gunnery Road N.
  Lehigh Acres, FL 33971

AMERICAN OVERSIGHT

To view a video of Public Safety Director Ben Abes discussing the shelters, go to https://youtu.be/Dm9l3J1oVQE

On Monday, Lee County issued mandatory evacuation orders for Evacuation Zones A and B. People who live in mobile homes and manufactured homes are also part of the evacuation order. All shelters are pet-friendly; pets must be on leashes or in kennels.

Residents are encouraged to make more comfortable arrangements by staying with a friend or family member outside of the evacuation zones. Residents should plan to be in a safe location outside of the evacuation zones by tonight.

Shelters open since 3 p.m. Monday include:

- Dunbar High School
  3800 Edison Ave.
  Fort Myers, FL 33916

- Estero Recreation Center
  9200 Corkscrew Palms Blvd.
  Estero, FL 33928

- Island Coast High School
  2125 DeNavarra Parkway
  Cape Coral, FL 33909

Only these shelters listed are open.

Transportation is available to shelters. People can go to any LeeTran stop and advise the driver that they need to go to an open shelter. They will be taken to a transfer center and then to a shelter. LeeTran has suspended fares.

Residents with questions can call the Emergency Information Hotline at 2-1-1, or 239-433-3900.

Tolls on Lee County bridges – Cape Coral Parkway, Midpoint Bridge and the Sanibel Causeway – have been suspended.

Lee County asks that residents:

- Obey evacuation notices.
- Pack a go-bag with family and pet needs.
- Bring their own personal items and supplies if going to a shelter.
- Report blocked ditches, swales and canals.
- Know that where it rains, it can flood. Even if you are not in a flood zone, you could still be prone to flooding due to local drainage issues and existing saturated areas.
- Understand that even if you are not evacuated or in an evacuation zone, flooding can still occur. Be prepared for flood inundation.
- Be sure you are signed up for AlertLee. The link is at www.leegov.com/storm.

To receive updates from Lee County Government, sign up for the newsletter here: www.leegov.com/resources/newsletters. Follow Lee County Government on Facebook, www.facebook.com/leecountyflbocc.

Additional information:
If you're heading to one of Lee County's shelters, you need to bring a Go Kit. Include a three-day supply of food, water and snacks. You'll also need a pillow and sleeping bag; folding chair; medications and eyeglasses; disinfectant wipes; toilet paper; a three-day supply of clothing; a sleep mask and earplugs; hygiene items; games or books; a phone charger or battery bank; and instant coffee or teabags.

Pets are allowed in all Lee County shelters, but you're responsible for bringing what they need. Pack your pet a Go Kit. Make sure there's a collar, leash and ID tags. Have a photo of you with your pet in case you become separated. Bring a crate or pet carrier. Include a week's worth of water; food and treats; clean-up supplies including waste bags for dogs and litter box with litter for cats; remember any medicine your pet needs. You can find out more about preparation at leegov.com/storm.

Subject: 10 Tips for Mental Wellbeing During a Storm

No images? Click here

PARK ROYAL
BEHAVIORAL HEALTH SERVICES

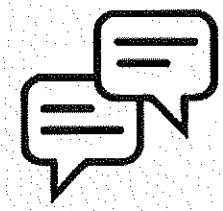
OPEN 24/7
WALK-INS WELCOME | NO REFERRAL NEEDED

We're here for you!

Park Royal Hospital will remain open during the storm.

AMERICAN OVERSIGHT

Experiencing a hurricane can be a traumatic event, and it's important to prioritize mental wellbeing during and after such a crisis.



Here are **ten tips for mental wellbeing** specifically tailored for previous storm survivors:

AMERICAN OVERSIGHT

PARK ROYAL
BEHAVIORAL HEALTH SERVICES

Taking Care of Your Mental Health During a Storm

LIMIT EXPOSURE

Stay informed but limit exposure:
Stay updated on the hurricane's progress and necessary safety measures, but avoid excessive exposure to news or social media coverage that may trigger anxiety or distress.

SAFETY PLAN

Create a safety plan: Develop a comprehensive emergency plan that includes evacuation routes, emergency contacts, and necessary supplies. Feeling prepared can help alleviate anxiety.

SEEK SUPPORT

Seek support: Reach out to friends, family, or support groups who have also experienced hurricanes. Sharing experiences and emotions with others who understand can provide comfort and validation.

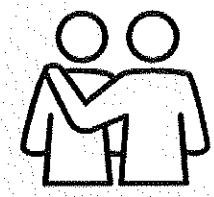
AMERICAN OVERSIGHT

SELF-CARE

CONNECT

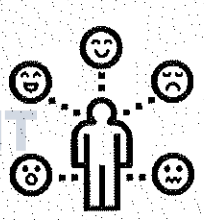
Connect with loved ones: Stay connected with family and friends, even if it's through phone calls, video chats, or social media. Isolation can worsen feelings of anxiety or depression, so maintaining social connections is crucial.

MINDFULNESS



Focus on the present moment: Practice mindfulness techniques to stay grounded in the present moment. Engage your senses, notice your surroundings, and focus on what you can control in the present.

DISTRACTION



Engage in positive distractions: Find activities that bring you joy and help distract from stress or negative thoughts. This could include reading, listening to music, watching movies, or engaging in hobbies.

SEEK HELP

Seek professional help if needed: If you find that your mental health is significantly impacted by the hurricane or if you're struggling to cope, consider reaching out to a mental health professional for support and guidance.

BE PATIENT

Be patient with yourself: Remember that recovering from a hurricane takes time, and it's normal to experience a range of emotions. Be patient with yourself and allow yourself to grieve, heal, and rebuild at your own pace.

AMERICAN OVERSIGHT

FI-LEE-24-2340-A-001046

Remember, everyone's experience is unique, so it's important to find strategies that work best for you.

If you or someone you know is experiencing a mental health crisis, please refer them to our 24/7 admissions team for a free, confidential assessment.

Send a Referral

Park Royal Hospital provides comprehensive treatment for adolescents, adults and senior adults who are suffering from mental health and substance use disorders.

Subject: Hurricane Milton - Update #26

As of this update, the latest storm information is as follows:

- The current track for Hurricane Milton continues to be a worst-case scenario for the Tampa Bay region southward to Sarasota. It is forecast to make landfall in Florida Wednesday night.
- The current maximum sustained winds are 145 mph. The movement is ENE at 12 mph.
- There is a Hurricane Warning in effect for the entire area. A Category 3 is forecast at landfall, with the expanding wind field still expected.
- The Storm Surge estimate is expected to be 6' - 10'. By comparison, the surge during Hurricane Helene was measured at 5.12 feet above MHHW and was measured at 11:36 PM, *almost 10 hours after* a peak wind gust of 63 mph taken at Tarpon Point at 1:51 PM. The peak water levels estimated elsewhere along coastal Lee County ranged from 2' to 5' above MHHW.
- There is a 97% chance that the earliest arrival time of tropical-storm-strength winds is 8:00 AM on Wednesday. The likely arrival time for those winds is 12:00 PM on Wednesday. The likely departure time with this update is 7:00 AM on Thursday, with the latest departure time being 12:00 PM on Thursday.
- There is a Flood Watch for the entire area.
- We are still under a Hurricane Warning.
- Hurricane-force winds extend out to 30 miles from the center, and tropical-storm-force winds extend outward up to 105 miles.
- The minimum central pressure based on aircraft dropsonde data is 929 mb.

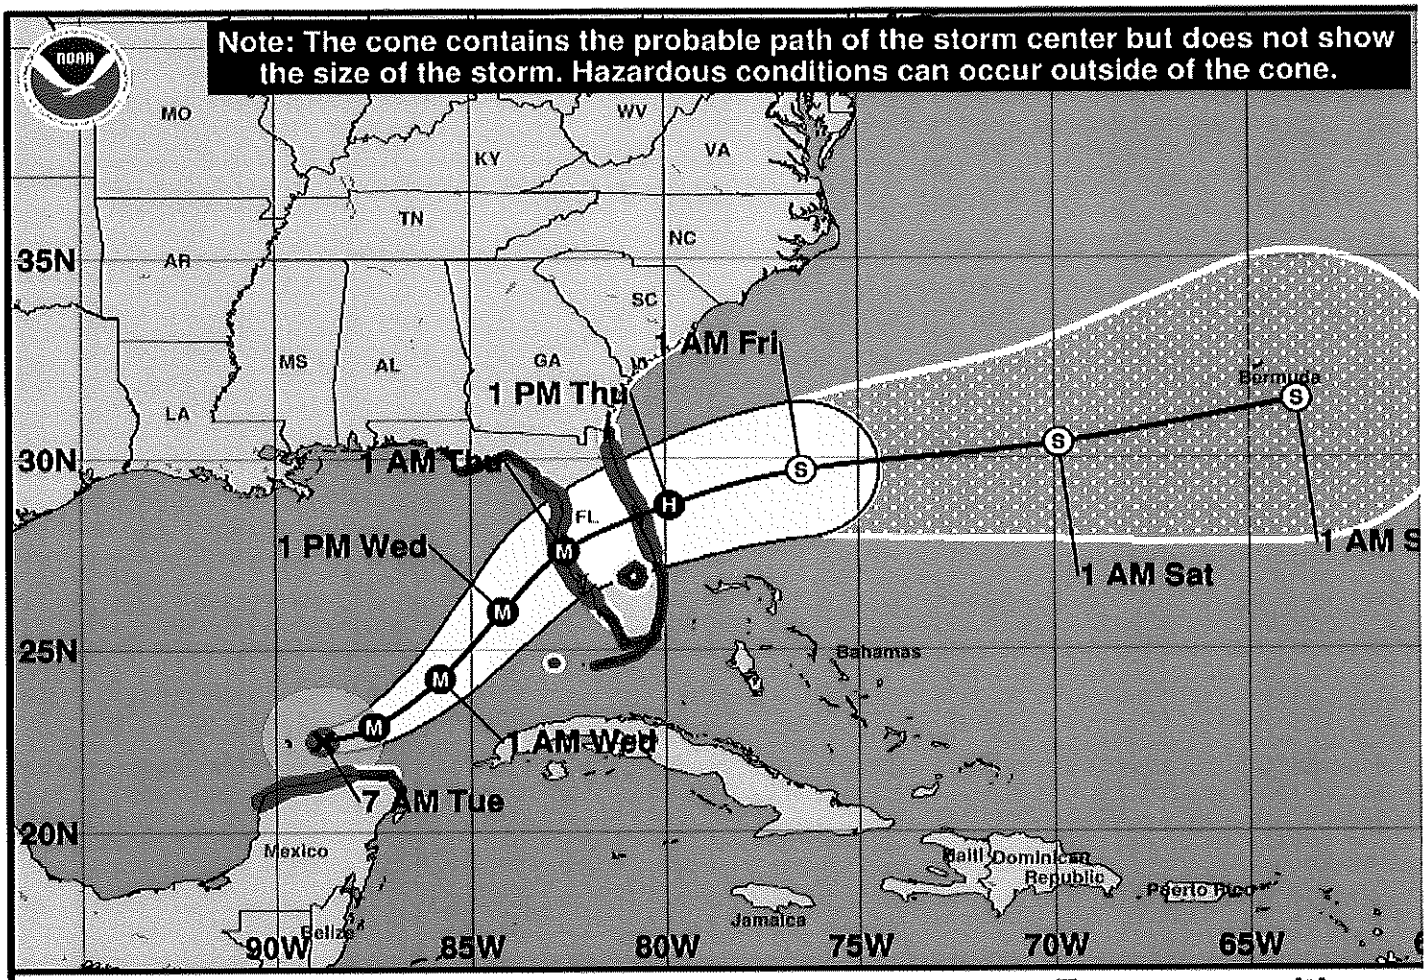
As of this update, new notifications are as follows:

- Precinct supervisors are finalizing employee shelter arrangements should the need arise.
- VERT (Volunteer Emergency Response Team) members from the Civilian Support Unit (CSU) are on standby to assist with post-storm deployments.
- Florida DOT is reinforcing the Sanibel Causeway with armor stone near the toll plaza and securing the barges and other equipment. Intermittent road closures for equipment movement are being performed by FLDOT.
- Seventeen (17) nursing facilities are closed in Lee County.
- EOC passed out nearly 100,000 sand bags and is out of bags.
- Sand deliveries have stopped and no more sand deliveries are planned by EOC.
- Three county shelters are open and operating:
    - Island Coast HS Shelter has approximately 71 present and 446 registered.
    - Estero Rec Center has approximately 114 present and 132 registered.
    - Dunbar High School is being staffed by Fort Myers Police Department personnel.

Gas Station Updates:

AMERICAN OVERSIGHT

- Loves Travel Station in North Fort Myers is open for First Responders only at this time.
- 7-11 at 24530 S Tamiami Trl has fuel. Pump 2 is for LEO.



FL-LEE-24-2340-A-001048

- 7-11 at 26975 Old 41 Road has fuel and will reserve ALL pumps for LEO.
- Circle K at 10460 Bonita Beach Rd (Old 41 & Bonita Beach Road) has fuel. Pump 1 & 3 for LEO.
- Racetrack at 13050 Bonita Beach Rd (Bonita Beach Road & Bonita Grande) has fuel. Pumps 17 & 18 for LEO.
- RaceTrac at 22350 S Tamiami Trl has other grades of fuel, but is out of regular. Pump 18 for LEO.
- 7-11 at 21850 S Tamiami Trl has fuel. Pump 1 for LEO.
- Rebel at 12030 Bonita Beach Rd SE, will reserve fuel for LEO.
- 7-11 at Terminal Access has fuel. Pumps 9 & 10 for LEO. (must go inside and let the clerk know to turn on the pump)
- 7-11 at 12011 Gateway Blvd has fuel. Pump 2 for LEO. (must go inside and let the clerk know to turn on the pump)
- 7-11 at 100 Delaware Rd. in Lehigh Acres has two pumps reserved for LEO and EMS.

Definitions:

- MHHW - Mean Higher High Water (MHHW) is the average level of the highest tide for each day computed over a 19-year period.
- Dropsonde - GPS dropsondes measure vertical profiles of atmospheric temperature, pressure, humidity, and wind speed as they fall from the aircraft to the surface. They are equipped with a small parachute that slows their descent and maintains vertical orientation. The dropsonde transmits data by radio four times a second to the aircraft until it reaches the surface of the ocean.

Subject: Hurricane Milton - Update #19

As of this update, the latest storm information is as follows:

- The storm track has shifted north slightly. The movement is not far enough to make a difference in our impacts.
- The earliest reasonable arrival time of tropical-storm-force winds is early Wednesday morning.

As of this update, new notifications are as follows:

- The Hurricane Hotline is now active. Corrections personnel should call 239-477-1258, Law Enforcement personnel should call 239-477-1259, and Communications personnel should call 239-477-1260. Please save these numbers now in your phone. This hotline provides updates for personnel without access to e-mail. For now, all supervisors should relay all pertinent information to their personnel who do not have access to e-mail.
- Mandatory evacuations have been issued for the Town of Fort Myers Beach. Residents are encouraged to evacuate before 3:00 PM today.
- LeeTran at noon today, Monday, Oct. 7, will stop running routes onto Fort Myers Beach. All LeeTran services will convert to off-island transit only. This is to assist with the Town of Fort Myers Beach's request for residents to leave the island.
- Lee County Utilities will shut off water to Fort Myers Beach at noon Tuesday, Oct. 8. This is a precautionary measure to protect infrastructure. It was also implemented during 2022's Hurricane Ian.

AMERICAN OVERSIGHT

- Lee County Sheriff's Office employees are currently in the field distributing sand and sand bags to locations throughout the county.

Gas Station Updates:

- 7-11 at SR 31/SR 80 received a fuel shipment this morning. Pumps 11 and 12 are for LEO. Make contact inside for pumps to be turned on.
- 7-11 at Billy's Creek is out of gas. Expecting shipment today. Will set aside fuel for LEO at Pump #1. Make contact with employee to have pump turned on.
- RaceTrac SR 31/ SR 80 has gas but expect to be out by noon and closed. Next shipment not expected until after the storm. They do not have a pump set aside for LEO.
- Circle K at SR 80/ Old Olga has fixed the pump and have a full tank for LEO. Make contact with employee for which pump to use.
- Sunoco at SR 80 and Buckingham is out of gas but requested shipment. Will pump remaining for LEO. Make contact with employee inside for pump to be turned on.
- Rebel at 6 Mile/Metro currently has 8,000 gallons and will stop pumping at 800 gallons. They do not set aside gas for us. Unknown next shipment.
- RaceTrac at 6 Mile/Michael G Rippe is out of gas but requested shipment. They will set up a Pump #3 for LEO use when they get gas. Make contact with employee for pump to be turned on.
- Race Trac at Daniels/Powers Ct is out of gas. Shipment has been requested. Will set up pump for LEO use. In the past it has been Pump 18.
- 7-11 Daniels/Palomino is out of gas. Expecting shipment today and will contact me when they receive it. Pump 10 will be set aside for LEO.
- Rebel at 9281 Daniels Pkwy is out of gas. Requested shipment for today. Pump 1 will be set aside for LEO. Go inside to have pump turned on.
- Chevron at 13031 Metro is out of gas. Not expecting shipment. Will set a pump aside for LEO if they get gas.
- Circle K at Metro and Crystal is close to running out of gas and starting to shut pumps down. They are setting aside pumps 5-8 for LEO. Meet with employee for which pump to use.

Subject: Hurricane Milton - Update #18

As of the 8:00 AM update, a Hurricane Watch remains in effect for our area.

The IMT Main Number is 239-258-3150 or e-mail at IMT@sheriffleefl.org.

As of this update, the latest storm information is as follows:

- Hurricane Milton is now a major hurricane, with sustained wind speeds of 125 mph.
- Hurricane Milton is expected to have winds of 145 mph at landfall, with some expansion of hurricane-strength winds.
- The model spread in the forecast track remains high, with the entire area within the cone.
- Movement is ESE at 8 mph.
- The current earliest arrival of tropical-storm-strength winds is 1:00 AM on Wednesday, with a likely arrival time at 8:00 AM. This is the arrival of tropical-storm-force winds, not the arrival of the actual storm.

AMERICAN OVERSIGHT

- The storm surge estimate is 5' to 10' for Lee County. It is expected to increase throughout the day on Wednesday and peak early Thursday.
- We are still in a Hurricane Watch, a Storm Surge Watch, and a Flood Watch.
- Many rivers are already in or forecast to go into flood stage.
- The main threat for tornadoes is late Tuesday into Wednesday night.
- Confidence is low on the exact track of the system, with the entire area within the cone. It should be noted that that 72 hour average track error is 100 miles.

As of this updates, new notifications are as follows:

- All personnel must notify IMT of all asset movements and personnel changes.
- Estero Fire Station #54 at Oriole and Alico just got sand delivered.
- Pine Island Fire has sand, but no sandbags.
- North Fort Myers Recreations Center has sand but no sandbags.
- Corrections Transport vehicles have received their staging location and should be in place by 12:00 PM.
- Academy recruits and Youth Services deputies have been deployed to the field.

National Hurricane Center Definitions:

- **Hurricane Watch**: Hurricane conditions (sustained winds of 74 mph or greater) are possible within your area. Because it may not be safe to prepare for a hurricane once winds reach tropical storm force, The NHC issues hurricane watches 48 hours before it anticipates tropical storm-force winds.
- **Hurricane Warning**: Hurricane conditions (sustained winds of 74 mph or greater) are expected somewhere within the specified area. NHC issues a hurricane warning 36 hours in advance of tropical storm-force winds to give you time to complete your preparations. All preparations should be complete. Evacuate immediately if so ordered.
- **Storm Surge Watch**: There is a possibility of life-threatening inundation from rising water moving inland from the shoreline somewhere within the specified area, generally within 48 hours.
- **Extreme Wind Warning**: Extreme sustained winds of a major hurricane (115 mph or greater), usually associated with the eyewall, are expected to begin within an hour. Take immediate shelter in the interior portion of a well-built structure.

Subject: Hurricane Milton - Update #17

The 5:00 AM update shows that the track is largely unchanged; however, models still vary from Naples to North of Tampa, and the intensity is forecast to be stronger, well into the Category 4 range.

AMERICAN OVERSIGHT

As of this update, new notifications are as follows:

- The storm has current maximum winds of 100 mph.
- The current forecast for our coast is an 8' - 12' storm surge.
- The storm has slowed somewhat, so the earliest arrival of Tropical Storm force winds is now in the early Wednesday morning hours.

Subject: Hurricane Milton - Update #16

The 11:00 PM update shows little movement in Hurricane Milton's track. Maximum sustained wind speeds are at 90 mph. Model tracks vary widely on the landfall location along Florida's West Coast. The Incident Management Team will continue to monitor and provide timely updates.

As of this update, new notifications are as follows:

Gas Availability:

- RaceTrac - 15820 Winkler Rd. - Pump 15 & 16 for First Responders - Contact is Tracy
- 7-11 - 12750 Cleveland Ave. - Pump 10 & 12 for First Responders - Contact is Vanilla
- RaceTrac - 5991 South Pointe Blvd. - Pump 19 & 20 for First Responders - Contact is Vince
- Mobil/7-11 - 20391 Summerlin Rd. - Pump 6 for First Responders - Contact is Susan
- Circle K - 20021 Summerlin Rd. - Pump 1 for First Responders - Contact is Kyle
- 7-11 - 15021 McGregor Blvd. - Pump 1 for First Responders - Contact is Jessica
- Mobil/7-11 - 17930 N. Tamiami Trl. - Pump 9 & 10 for First Responders - Contact is Joseph
- Circle K - 6381 Bayshore Rd. - Pump 10 for First Responders - Contact is Elizabeth
- Circle K - 19101 N. Tamiami Trl. - Pump 1 & 2 for First Responders - Contact is Christy
- 7-11 - 100 Delaware in Lehigh Acres - Pump 1 & 2 for First Responders.

To: All Users <AllUsers@sheriffleefl.org>
Subject: Hurricane Milton - Update #15

As of the 8:00 PM National Hurricane Center update, Hurricane Milton is still forecast to rapidly intensify into a major hurricane. The center of the track has shifted further south, and is currently near the Bradenton/Sarasota area at landfall.

There is a Flood Watch for the entire area. Rainfall amounts of 5 to 10 inches, with localized totals of up to 15 inches are expected. The timing of the impacts is as early as late Tuesday and continuing into Thursday morning.

A good deal of uncertainty remains with where the storm will make landfall. It should be noted that the average NHC track error at day 3 is around 100 miles.

AMERICAN OVERSIGHT

As of this update, new notifications are as follows:

- Youth Services and Training personnel have received their assignments and will report according to their schedule tomorrow.
- Court Operations and Civil personnel will receive their schedule tomorrow.
- Employee Assistance personnel are done for the evening. They will resume in the morning.
- IMT will be fully activated beginning at 7:00 AM on Monday, with all personnel reporting or receiving their assignments by then.
- For personnel working overtime, please use *Hurricane Milton* as the reason for the overtime.
- The 7-11 Gas station at 103 Leeland Heights Blvd W in Lehigh Acres is open for LEO. If you need gas, use pumps 3,4,5, or 6 only. Jessica is the contact person there.
- The 7-11 at 100 Delaware Rd. in Lehigh Acres is reserving gas for First Responders. use Pump 3 and 4. Sharon is the contact person there.
    - The 7-11 at 18971 Babcock Ranch Rd is holding gas for first responders but deputies must go inside to request pump to be turned on.
    - The 7-11 at Del Prado and N Tamiami (17930 N Tamiami Trl.) is also holding gas for first responders but deputies must go inside to request the pump be turned on.

All personnel should be ready for a full activation at any time. This is a serious, dangerous storm and all personnel should complete preparations as soon as possible. Models vary in intensity, but most predict *at least* a Category 3, so even if we do not receive a direct hit, we can expect hurricane strength winds or wind gusts and a severe storm surge.

Subject: Hurricane Milton - Update #14

As of the 5:00 PM update, Milton is now a hurricane. Hurricane Milton has maximum sustained winds of 85 mph. The track has shifted slightly, and there is a more northeastern path across our area. Even if we do not receive a direct hit, we will receive tropical storm and hurricane strength winds, significant storm surge, and dangerous flooding from rainfall, likely much greater that what we received from Hurricane Helene. By tonight, all personnel should have their homes and families secured for the storm, and be prepared for a full activation.

Notifications for this update:

- All agency members deemed non essential during an emergency response will be dismissed tomorrow, October 7th, 2024 starting at **noon**. In order to stay home you will need to advise your immediate supervisor and use your accrued time. You may report for regular duty if you chose to do so. As always, use caution when driving in inclement weather and do not attempt to traverse standing water. IMT will continue to send out updates on our response to TS Milton.

- The Emergency Operations Center (EOC) will transition to a Level 1 at 7:00 AM tomorrow. This means that shelters and countywide operations will be run out of the EOC. The Incident Management Team is your contact for agency needs; do not contact the EOC directly.

Subject: Tropical Storm Milton - Update #13

The 2:00 PM Intermediate Update shows that there are no significant changes in the track. The earliest arrival of tropical storm force winds is projected to be 8:00 PM on Tuesday.

These are the stations that are reported to still have gasoline:

- Veronica Shoemaker/Winkler
- Shell station at Hancock and US 41
- BJ's Cape Coral
- 711 Burnt Store and Pine Island has DIESEL only
- Racetrac at South Pointe and College has 93 Only
- Walmart / Murphy's USA in Lehigh
- Santa Barbara and Veterans 7/11

These are the stations that are reported to be currently **out** of gasoline:

- Country Club and Veterans Circle K
- Del Prado Speedway
- Trafalgar and Skyline 7/11
- Rebel US 41 and Del Prado
- 76 at Chiquita and Pine Island
- Walmart/Murphy's Del Prado
- Walmart on Pine Island Road
- Pine Ridge and San Carlos 7/11
- Santa Barbara and Gleason 7/11
- Palm Tree and Cape Coral Pkwy 7/11
- Lee and Gunnery 7/11
- Del Prado Racetrac
- Terry St Circle K
- Lee and Alvin Racetrac
- Joel Citgo
- N Cleveland and Littleton 7/11

Below are the current updated tasks that IMT has been working on since that last updates:

- Logistics members have scheduled pre-storm deliveries for food and beverages - the arrival time is Tuesday morning.
- Logistics members have scheduled post-storm deliveries from vendors.
- Logistics members have scheduled water deliveries.
- Logistics members have created plans for replenishment of supplies for long-term activations.
- Logistics members have arranged for ice deliveries for the event power is lost.
- Purchasing members have made plans for the procurement of potable water.
- Purchasing and Logistics members have scheduled the delivery of portable bathrooms should they be needed.
- HQ will be the central location for cooking needs post-storm for employees at HQ/IMT, Forensics, MCU, Command Staff, Spec Ops, and Staging personnel.
- Precincts and Corrections facilities will be responsible for their meal preparations.

Subject: Tropical Storm Milton - Update #12

The 11:00 AM update shows a small track shift to the south. Although it is still predicted to directly hit the Tampa Bay Area, the move slightly south may bring higher wind speeds and higher storm surge. The storm is expected to quickly intensify and will likely be a major hurricane upon arrival.

All personnel are encouraged to complete preparations for their homes and their families today.

There is still a high degree of uncertainty in both the tracks and the wind speed upon arrival, so the possibility of a direct strike to our area remains. The cone of uncertainty currently covers most of the Florida peninsula. The Incident Management Team (IMT) will keep you informed, and is making preparations to include schedule planning.

Subject: Tropical Storm Milton - Update #8

The 8:00 AM update shows that Milton is forecast to become a Major Category 3 Hurricane before making landfall. Timing, tracks, and intensity are still unpredictable; however, the National Hurricane Center still shows the track toward the Tampa area.

The current forecast is as follows:

- There is a Flood Watch for the entire area through Thursday.
- Rainfall in the amount of 5" to 8", with localized totals up to 12".
- The timing of the impacts is from late Tuesday through early Thursday morning, but it is expected to make landfall on the West Coast on Wednesday.
- There is great uncertainty about where the storm will make landfall. The average Day 4 track error is around 150 miles, so we are still well within a possible landfall range.
- The current earliest wind time arrival is 4 PM on Tuesday, and the most likely arrival time is 2 AM on Wednesday.

Additional notifications for this update include:

- Personnel should maintain at least ½ tank at all times. Due to current fuel runs, please use any opportunity to make sure your agency vehicle stays full at all times.
- Personnel who must fuel and have no other options may use 89 or 93 Octane fuel.
- Select IMT members have been activated. Please send requests to IMT@sheriffleefl.org.
- The select CRU members who were notified individually will report at 10:00 AM to the Headquarters Training Room (1202).
- The asset movement members who were notified individually will report at 10:00 AM to the Headquarters Training Room (1202).
- All units, components, precincts, corrections facilities, and all affected agency departments should fill up all available gas cans and gas tanks.
- Pine Island Fire Department is out of sand. They still have sandbags. They expect to get more sand on Monday.

Subject: Tropical Storm Milton - Update #7

With the 5:00 PM update, Tropical Storm Milton is now expected to arrive as a major hurricane. The track has shifted some to the north; however, some model tracks still show direct hits our our area, and we are still in the cone of uncertainty. Please recall from prior storms that although we are not in the direct path, the effects of the hurricane will still affect us heavily, especially in the areas prone to storm surge. Additionally, the peak storm

AMERICAN OVERSIGHT

surge from Helene arrived almost 10 hours after the peak winds, so all personnel should be aware of and consider the effects before, during, and after the storm.

The below preparations remain in effect. The only change for this period is:

- Four (4) additional shallow water vessels have been obtained for water rescues.
- Additional High-Water Vehicles have been obtained and will be deployed to the islands for potential high-water rescues.
- The San Carlos Park Fire Department is out of sand and sandbags.

Subject: Tropical Storm Milton - Update #6

As of a 12:25 PM National Hurricane Center update, Tropical Storm Milton has formed. This storm is forecast to strengthen and bring the risk of life-threatening impacts to portions of the West Coast of Florida next week. The maximum winds are currently estimated at 40 mph with higher gusts. Models range in intensity from a Tropical Storm to a Major Hurricane, so there is tremendous unpredictability in the strength upon arrival.

At this time, the Incident Management Team is preparing for the possibility of a major hurricane affecting our area with impacts beginning on Tuesday and a full impact on Wednesday.

All agency personnel are encouraged to prepare as follows:

- All personnel should review their hurricane plans, and prepare their homes and families for the possibility of a hurricane impact in the middle of next week.
- All precincts should secure their mobile assets (decoy vehicles, arrow boards, trailers, ATVs, etc.) beginning on immediately to be completed by 2:00 PM on Monday.
- All trailers should be brought to storage beginning immediately to be completed by 2:00 PM on Monday.
- All personnel should use the remainder of this weekend to prepare for a possible activation. This plan should include three days worth of food, uniforms, and supplies.
- All personnel should use the remainder of this weekend to prepare their uniforms and equipment (including sufficient batteries for equipment) for a possible activation.
- All specialty units should begin bringing their assets back to their storage areas and secure locations. This should be completed by 2:00 PM on Monday.
- All precincts should secure any items that can be moved by the wind to a secure location starting immediately to be completed by 2:00 PM on Monday.
- All Corrections facilities (including Nan's Ranch) should prepare their facilities for a possible hurricane impact next week.

This is new information as of this update:

- The Waterborne Strike Team is on standby for deployment for water rescues.
- JetBlue Stadium, CenturyLink Stadium, the Lee County Gun Range, and the Andrea Lane and Sivan Road storage buildings are prepared to receive assets if needed.
- The Marine Unit is in contact with the IMT to secure the marine assets.
- Known sandbag locations are as follows:

AMERICAN OVERSIGHT

- Punta Gorda—Free sandbags will be available at 3130 Cooper St., the last entrance on the left by flag poles.
- Fort Myers Beach—Sand is located off of Gulf Beach Road, and bags are available at Town Hall, 2731 Oak St. (The location will provide service until 4:30 p.m. on Friday and begin Monday at 8:30 a.m.)
- Fort Myers— South Trail Fire & Rescue will have sand and sandbags available at station 63, 5531 Halifax Ave., Fort Myers—a maximum of 20 bags per household. UPDATE: South Trail Fire & Rescue is currently out of sand. Empty sandbags only are available.
- Naples— Sandbags will be available at three public park locations: Big Corkscrew Island Regional Park, 810 39th Ave., North Collier Regional Park, 15000 Livingston Road, in the Sun-N-Fun Lagoon parking lot, and at Donna Fiala Eagle Lakes Community Park, 11565 Tamiami Trail East, in the grassy area between the parking lots. The Naples sandbag locations will begin service at 8 a.m. through dusk on Saturday and Sunday.
- San Carlos Park—Sand and sandbags are available at San Carlos Park Fire District Station 54, located at 16900 Oriole Road. There is a limit of 10 bags per household. Bags can be picked up at the lobby. Bring your own shovel. Be prepared to fill and load your own sandbags. Make sure your vehicle can transport the weight of the sandbags.
- North Fort Myers—Sandbags will be located at North Fort Myers Parks and Recreation, 2000 N. Recreation Parkway. Sand will be located in the back of the park, next to the county mulch pile. Please bring your own shovel to fill the bags.
- Matlacha—Sandbags are available for pickup at Station 1, located at 5700 Pine Island Rd, Bokeelia, FL 33922

- IMT personnel are visiting the precincts, and the storage locations to inventory assets to prepare for both securement and post-storm deployment.
- No schedule changes are expected between now and Monday afternoon; however, all personnel should be prepared for schedule adjustments.
- The Agriculture assets are secured on the Olga site.

Subject: Important Update on a possible impending hurricane impacting our area (Update #5)

Team,

IMT has been working on preparation for a potential Hurricane impacting our area early next week. IMT will continue to send out updates regularly so please monitor your email closely. All agency units need to begin preparations of securing their assigned assets and communicate all movement to IMT. Also, update the major asset application on the intranet. We have secured Jet Blue Park as an asset staging area for Marine and other assets. Agency asset storage facilities to include the gun range are preparing to house assets as well. IMT is securing high water vehicles that will be pre-staged at strategic locations i.e., the barrier islands. IMT members will be in the RTIC today coordinating efforts. Agency extension 239-258-3150 is being setup to communicate to IMT staff. Additional updates to follow.

Be prepared and be safe!

Subject: New Caribbean Disturbance - Update #4

The National Hurricane Center 2:00 PM update shows the possibility of development as the low pressure area in the Gulf of Mexico moves slowly eastward or northeastward. A tropical or subtropical depression or storm could form during the early to middle part of next week if the low remains separate from a frontal boundary that is forecast to extend across the Gulf of Mexico. Regardless of development, locally heavy rains could occur over portions of the Florida Peninsula late this weekend into next week. As of this update, the formation chance in the next 48 hours is low at 10 %, and the formation chance through 7 days has increased to 50%.

Current model runs show an arrival time of any potential storm around Wednesday of next week. This represents a slower forward storm speed and later storm arrival than previous model runs, so the timing and impacts are still largely unknown. Regardless of any potential storm, significant rainfall is still expected, and the Incident Management Team will continue to monitor and update all personnel.

Subject: New Caribbean Disturbance - Update #2

The forecast for the area of disorganized showers remains the same; it is still too early to tell if the system will develop further. Regardless of development, heavy rain is expected in our area into the weekend and next week. The Incident Management Team will continue to monitor.

From: IMT <IMT@sheriffleefl.org>
Sent: Tuesday, October 1, 2024 10:35 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance - Update #1

The area of disorganized showers remains at a 40% chance of development. The National Hurricane Center indicates that environmental conditions could support some gradual development of this system, and a tropical depression could form towards the end of this week or this weekend while it moves generally northwestward over the northwestern Caribbean Sea and into the Gulf of Mexico. As of this time, there are no changes, but some long range models show an increased chance of this disturbance affecting our area.

AMERICAN OVERSIGHT

From: IMT <IMT@sheriffleefl.org>
Sent: Monday, September 30, 2024 8:11 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance

The Incident Management Team is monitoring a new area of disorganized showers and thunderstorms over the western Caribbean Sea. The National Weather Center states that the system has a medium chance (40%) of developing towards the middle to latter part of the week as it moves northwestward into the Gulf of Mexico. As this disturbance moves into the gulf, increasing moisture is expected over the Florida Peninsula and elevated rain chances are anticipated from Friday through the weekend, and possibly into early next week.

Unfortunately, long range models show the possibility of direct impacts for Southwest Florida; however, It is too early to determine what, if any, tropical specific impacts can be expected.

The Incident Management Team will continue to monitor the storm, and will continue to provide updates through this very active part of the hurricane season.

Dear Members and Chamber Friends,

Please read the report below as well as the document links below from our Cape Coral Emergency Operations Center.

The Chamber holds a seat at the Emergency Operations Center and will be communicating with you regularly as the storm progresses. Please take the proper precautions to prepare your employees, businesses and homes as we continue to monitor the storm.

Hurricane Milton Briefing - 7 AM, 10/8/24
Current track continues to be a worst case scenario situation for the Tampa Bay region southward to Sarasota.
? Hurricane Warning in effect for the entire area. Cat 3 forecast at landfall, with the expanding wind field still
expected.
? Storm surge warning for the entire coast. Life-threatening storm surge forecast:
? 10-15 ft AGL for Pinellas, Hillsborough, Manatee, and Sarasota counties.
? 6-10 ft AGL for Charlotte, Lee
? 5-10 ft AGL for Pasco, Hernando, Citrus
? 3-5 ft AGL (5-7 ft MSL) for Levy
? Flood Watch out for the entire area. Rainfall amounts of 5 to 12 inches, with localized totals up to 18 inches.
? Timing of impacts to the area looks to be as Wednesday morning and continuing into Thursday afternoon.

EOC FLASH REPORT - CAPE CORAL 10/8/24 HURRICANE MILTON 7AM REPORT
ACTIVE STORM ADVISORY

Please today and tomorrow to prepare your homes and businesses. We will continue to send these reports as we receive them.

AMERICAN OVERSIGHT

Katie Walter

Subject:	News Max Interview
Location:	RTIC
Start:	Wed 10/9/2024 2:00 PM
End:	Wed 10/9/2024 2:15 PM
Recurrence:	(none)
Meeting Status:	Accepted
Organizer:	Christopher Fine
Required Attendees:	Carmine Marceno; John Holloway; Christopher Lalor; James Heuglin; Anita Iriarte; Todd Olmer; Sarah Rodriguez; Nestor Montoya; Jessie Santero; Julie Martin; Autumn King; Robert DeAngelo; Herbert Ellis; Katie Walter; Mark Shelly; Tara Thrower; Joshua Hanchey

Sheriff to interview LIVE with News Max at 2PM via Zoom in RTIC

Lt. Fine, Robert and Julie to attend.

Talking Points will be updated as new information becomes available

-The Lee County Sheriff's Office Incident Management Team is working 24/7 to monitor the storm and deploy assets anywhere they need to be.

-At this time, exact landfall is uncertain but Lee County is expected to experience hurricane-level impacts to include SURGE up to 12 feet.

-Just as you would all prepare for a storm at home, LCSO has done the same. We have secured all mobile assets to include our Marine Unit vessels due to the anticipated impacts from Milton.

- Our Waterbourne Strike Team and Marine Unit, Special Ops are standing by should the need arise to rescue people.

-That being said, know your Evacuation Zone and be prepared to leave if your zone is called.

-A and B have been called to evacuate

AMERICAN OVERSIGHT

-Four (4) additional shallow water vessels have been obtained for water rescues.

-Additional High-Water Vehicles have been obtained and will be deployed to the islands for potential high-water rescues.

-We urge everyone to prepare for this storm! Prepare for the worst, but hope for the best!

-We know what Mother Nature can do! She is unpredictable, which is why we urge everyone NOT to wait until the last minute to have everything that you need.

-Make sure you have necessary hurricane supplies: enough food, water, and medicine for several days.

-Milton is now a CATEGORY 5 STORM.

-Don't get too caugh up in the category. The STORM SURGE is the most lethal part of any hurricane.

-LCSO administrative services at precinct offices will be halted unit after the storm so we can focus on preparation and possible recovery efforts.

-Once we get sustained winds of 45 MPH, emergency response is stopped until it's safe to respond to calls.

-It could take several hours or more for the winds to subside before a deputy is able to respond, once the impacts begin. SHELTER IN PLACE.

-Don't try to drive anywhere in inclement conditions as the roadways are not safe.

-Do NOT go outside during the storm as wind and standing water create hazard that can be fatal.

-Remember the three phases of the storm: BEFORE, DURING, and AFTER. Have your plan for all three.

AMERICAN OVERSIGHT

-Continue to monitor your local media for weather updates, as well as the Lee County Sheriff's Office and Lee County Government on social media for the latest updates.

Could we possibly do 3pm EST?

Lt. Fine and Julie to attend.

Talking Points:

Hurricane Milton

Jail Updates:

-The Jail and CORE facilities are 100% staffed.

-All inmates are in hardened structures.

-Water tanks are on standby if needed for drinking and sanitation.

-Kitchen is staffed and has two-weeks of food for inmates and staff.

AM OVERSIGHT

-Medical staff will maintain 24/7 care.

-Inmates will be evacuated to top floors in case of flooding.

-Both facilities have room and contingency plans if one needs to evacuate to the other. Vehicles and personnel are staged.

LCSO Updates:

-(Anticipated Sanibel question) To assisted the City of Sanibel, we conducted a brief assessment of travel on and off the island to more effectively deploy resources.

-The Lee County Sheriff's Office Incident Management Team is actively monitoring Hurricane Milton and is FULLY activated.

-Message boards and deputies are located at each entrance and exit to barrier islands informing residents of the Counties evacuation orders, and informing them of dangers if staying.

-All Student Resource Officers (SROs) are assisting with preparing residents on the barrier islands, and assisting Patrol.
-LCSO personnel and heavy equipment are loading four dump trucks to deliver sand for sandbags throughout the county at fire stations to assist county with more locations.
-Marine Unit has moved most of their boats farther inland. Last remaining boats are for heavy weather rescue and will remove when conditions worsen.
-We've ensured there is enough manpower staged and in place right up to, and immediately after the storm.

-Post storm we have multiple layers of communication so at the PUSH OF THE BUTTON we will deploy.

-LCSO is READY! Our Waterbourne Strike Team and Marine Unit, Special Ops are standing by should the need arise to rescue people.

AMERICAN OVERSIGHT

-Four (4) additional shallow water vessels have been obtained for water rescues.

-Additional High-Water Vehicles have been obtained and will be deployed for potential high-water rescues.

-LCSO administrative services at precinct offices will be halted unit after the storm so we can focus on preparation and possible recovery efforts.

-Once we get sustained winds of 45 MPH, emergency response is stopped until it's safe to respond to calls.

Lt. Fine and Julie to attend.

Talking Points:

Hurricane Milton

Jail Updates:

-The Jail and CORE facilities are 100% staffed.

-All inmates are in hardened structures.

-Water tanks are on standby if needed for drinking and sanitation.

-Kitchen is staffed and has two-weeks of food for inmates and staff.

AMERICAN OVERSIGHT

-Medical staff will maintain 24/7 care.

-Inmates will be evacuated to top floors in case of flooding.

-Both facilities have room and contingency plans if one needs to evacuate to the other. Vehicles and personnel are staged.

LCSO Updates:

-(Anticipated Sanibel question) To assisted the City of Sanibel, we conducted a brief assessment of travel on and off the island to more effectively deploy resources.

-The Lee County Sheriff's Office Incident Management Team is actively monitoring Hurricane Milton and is FULLY activated.

-Message boards and deputies are located at each entrance and exit to barrier islands informing residents of the Counties evacuation orders, and informing them of dangers if staying.

-All Student Resource Officers (SROs) are assisting with preparing residents on the barrier islands, and assisting Patrol.
-LCSO personnel and heavy equipment are loading four dump trucks to deliver sand for sandbags throughout the county at fire stations to assist county with more locations.
-Marine Unit has moved most of their boats farther inland. Last remaining boats are for heavy weather rescue and will remove when conditions worsen.
-We've ensured there is enough manpower staged and in place right up to, and immediately after the storm.

-Post storm we have multiple layers of communication so at the PUSH OF THE BUTTON we will deploy.

-LCSO is READY! Our Waterbourne Strike Team and Marine Unit, Special Ops are standing by should the need arise to rescue people.

AMERICAN OVERSIGHT

-Four (4) additional shallow water vessels have been obtained for water rescues.

-Additional High-Water Vehicles have been obtained and will be deployed for potential high-water rescues.

-LCSO administrative services at precinct offices will be halted unit after the storm so we can focus on preparation and possible recovery efforts.

-Once we get sustained winds of 45 MPH, emergency response is stopped until it's safe to respond to calls.

-It could take several hours or more for the winds to subside before a deputy is able to respond, once the impacts begin. SHELTER IN PLACE.

-Don't try to drive anywhere in inclement conditions as the roadways are not safe.
-We urge everyone to prepare for this storm! Prepare for the worst, but hope for the best!

-We know what Mother Nature can do! She is unpredictable, which is why we urge everyone NOT to wait until the last minute to have everything that you need.

-Do NOT go outside during the storm as wind and standing water create hazard that can be fatal.

-Remember the three phases of the storm: BEFORE, DURING, and AFTER. Have you plan for all three.

-Continue to monitor your local media for weather updates, as well as the Lee County Sheriff's Office and Lee County Government on social media for the latest updates.

-WE ARE SWFL STRONG and are IN THIS TOGETHER

AMERICAN OVERSIGHT

The City of Bonita Springs urges residents to finalize hurricane and evacuation plans.

The National Weather Service has issued a Hurricane Warning for the City of Bonita Springs. The City issued a State of Local Emergency over the weekend. The National

AMERICAN OVERSIGHT

Weather Service is anticipating that we will receive hurricane force winds and storm surge in our area from five-ten feet.

The Lee County Emergency Operations Center issued mandatory evacuations for Zone A and Zone B on Monday. Please visit the Lee County Emergency Operations webpage to find your evacuation zone. People who live in mobile homes and manufactured homes are also part of the evacuation order. All shelters are pet-friendly; pets must be on leashes or in kennels. Residents are encouraged to make more comfortable arrangements by staying with a friend or family member outside of the evacuation zones. Residents should plan to be in a safe location outside of the evacuation zones by tonight. Lee County has announced additional shelters opened at 8 a.m. today in advance of the approach of Hurricane Milton.

A complete list of shelters is:

- Gateway High School

13820 Griffin Drive
Fort Myers, FL 33913

- Hertz Arena

11000 Everblades Parkway
Estero, FL 33928

- Oak Hammock Middle School

5321 Tice St
Fort Myers, FL 33905

- Tortuga Preserve Elementary School

1711 Gunnery Road N.
Lehigh Acres, FL 33971

- Treeline Elementary School

10900 Treeline Ave.
Fort Myers, FL 33913

- Varsity Lakes Middle School

801 Gunnery Road N.
Lehigh Acres, FL 33971

- Dunbar High School

AMERICAN OVERSIGHT

3800 Edison Ave.
Fort Myers, FL 33916

- Estero Recreation Center

9200 Corkscrew Palms Blvd.
Estero, FL 33928

- Island Coast High School

2125 DeNavarra Parkway
Cape Coral, FL 33909

Transportation is available to shelters. People can go to any LeeTran stop and advise the driver that they need to go to an open shelter. They will be taken to a transfer center and then to a shelter. LeeTran has suspended fares.

Residents can view the announcements on local media as well as on the county's Facebook page. The city will also be sharing the information to all city media channels.

We urge all residents to finalize preparedness plans. Please secure all building materials onsite. Please continue to monitor local news stations for updates on the storm. City staff has been clearing storm drains and securing facilities in preparation of Hurricane Milton. Debris pick up will continue this morning

Normal city operations have ceased, and city emergency preparedness personnel will continue to work pre, during and post storm.

Residents can stay up to date with City information on the City's Facebook page and website City of Bonita Springs

The city encourages residents living near the Imperial River and canals, to continue to monitor water levels. Please continue to be vigilant as sheet flow may impact water levels of rivers and canals. The level of the Imperial River is currently at 10.73ft. To check water levels, click here.

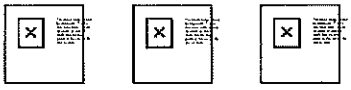
AMERICAN OVERSIGHT

Bonita Springs Utilities Staff has been working hard to prepare our water supply system for Hurricane Milton's effects. The supply system is performing well, and we are prepared to weather storm conditions while continuing to provide water to residents. Residents are reminded to limit water use to ease stress on sewer operations and help prevent backups or spills.

•Keep toilet flushing to a minimum

•Abstain from running dishwashers and clothes washers

•Limit the amount of water used during a shower or the amount to fill your bathtub



Boil water notices will be posted on the following web page: https://bsu.us/service-alerts/. Visit BSUs website at www.bsu.us or our Facebook page for timely and pertinent updates on your water supply, wastewater services, and hours of operation.

Bonita Springs Community Development asks that any Bonita Springs residents with water intrusion in their homes post-storm send an email to floodinfo@cityofbonitaspringscd.org or call 239-444-6150 for assistance with permit requirements and resources.

In the event of heavy rain, it will take time for the infrastructure to drain. Please use caution and don't drive through flooded roads.

Residents can also call the United Way's Emergency Information Hotline with questions. Dial 2-1-1 or 239-433-3900.

Please be safe and continue to monitor local news stations for updates about Hurricane Milton.

Lee County announces four additional shelter openings in advance of Hurricane Milton

Fort Myers, FL, Oct. 8, 2024 – Lee County has announced additional shelters opening at noon today in advance of the approach of Hurricane Milton.

Additional shelters are:

- Alico Arena
  12181 FGCU Lake Parkway East
  Fort Myers, FL 33913

- East Lee County High School
  715 Thomas Sherwin Ave.
  Lehigh Acres, FL 33974

- Harns Marsh Elementary School
  1800 Unice Ave. N.
  Lehigh Acres, FL 33971

- Harns Marsh Middle School
  1820 Unice Ave. N.
  Lehigh Acres, FL 33971

On Monday, Lee County issued mandatory evacuation orders for Evacuation Zones A and B. People who live in mobile homes and manufactured homes are also part of the evacuation order. All shelters are pet-friendly; pets must be on leashes or in kennels.

Residents are encouraged to make more comfortable arrangements by staying with a friend or family member outside of the evacuation zones. Residents should plan to be in a safe location outside of the evacuation zones by 10 p.m. today.

AMERICAN OVERSIGHT

Shelters already open include:

- Dunbar High School
  3800 Edison Ave.
  Fort Myers, FL 33916

- Estero Recreation Center
  9200 Corkscrew Palms Blvd.
  Estero, FL 33928

- Gateway High School
  13820 Griffin Drive
  Fort Myers, FL 33913

- Hertz Arena
  11000 Everblades Parkway
  Estero, FL 33928

- Island Coast High School
  2125 DeNavarra Parkway
  Cape Coral, FL 33909

- Oak Hammock Middle School
  5321 Tice St.
  Fort Myers, FL 33905

- Tortuga Preserve Elementary School
  1711 Gunnery Road N.
  Lehigh Acres, FL 33971

- Treeline Elementary School
  10900 Treeline Ave.
  Fort Myers, FL 33913

- Varsity Lakes Middle School
  801 Gunnery Road N.
  Lehigh Acres, FL 33971

Only these shelters listed are open. The list is available online at www.leegov.com/storm

Transportation is available to shelters. People can go to any LeeTran stop and advise the driver that they need to go to an open shelter. They will be taken to a transfer center and then to a shelter. LeeTran has suspended fares.

Residents with questions can call the Emergency Information Hotline at 2-1-1, or 239-433-3900.

Tolls on Lee County bridges – Cape Coral Parkway, Midpoint Bridge and the Sanibel Causeway – have been suspended.

Lee County asks that residents:

- Obey evacuation notices.
- Pack a Go Kit with family and pet needs.
- Bring their own personal items and supplies if going to a shelter.
- Report blocked ditches, swales and canals.
- Know that where it rains, it can flood. Even if you are not in a flood zone, you could still be prone to flooding due to local drainage issues and existing saturated areas.
- Understand that even if you are not evacuated or in an evacuation zone, flooding can still occur. Be prepared for flood inundation.
- Be sure you are signed up for AlertLee. The link is at www.leegov.com/storm.

AMERICAN OVERSIGHT

Additional information:

If you're heading to one of Lee County's shelters, you need to bring a Go Kit. Include a three-day supply of shelf-stable food, water and snacks. You'll also need a pillow and sleeping bag; folding chair; medications and eyeglasses; disinfectant wipes; toilet paper; a three-day supply of clothing; a sleep mask and earplugs; hygiene items; games or books; a phone charger or battery bank; and instant coffee or teabags. Tents are not allowed and no cots or bedding items are provided.

Pets are allowed in all Lee County shelters, but you're responsible for bringing what they need. Pack your pet a Go Kit. Make sure there's a collar, leash and ID tags. Have a photo of you with your pet in case you become separated. Bring a crate or pet carrier. Include a week's worth of water; food and treats; clean-up supplies including waste bags for dogs and litter box with litter for cats; remember any medicine your pet needs. You can find out more about preparation at leegov.com/storm.

Subject: Hurricane Milton - Update #27

As of this update, the latest storm information is as follows:

- The track for Hurricane Milton is still toward the lower Tampa Bay/Bradenton/Sarasota area.
- Movement is ENE at 9 mph.
- The maximum sustained wind speed has increased to 150 mph (Category 4).
- Milton is forecast to expand in size as it approaches the West Coast of Florida.
- The minimum central pressure based on dropsonde data is 929 mb.
- We are still under a Storm Surge Warning.
- We are still under a Hurricane Warning.
- Hurricane-force winds extend outward up to 30 miles.
- Tropical-storm-force winds extend outward up to 105 miles.
- A 6' to 10' storm surge is still expected along the Lee County coast.
- Surf swells generated by Milton are expected to continue to affect much of the Gulf Coast over the next day or two, and are likely to cause life-threatening surf and rip current conditions.

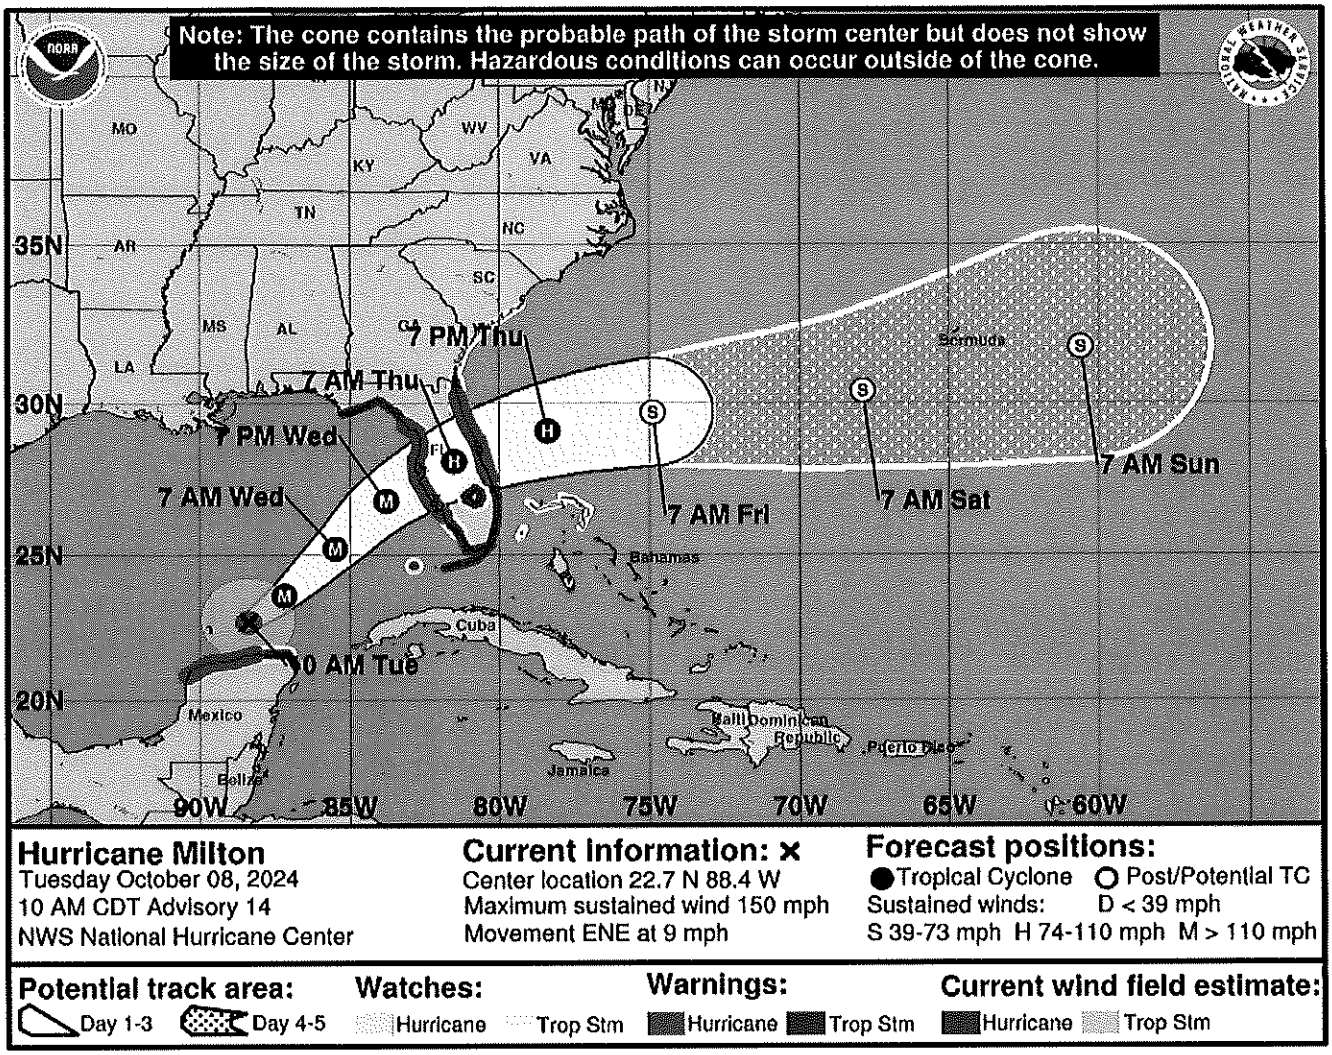
As of this update, new notifications are as follows:

- Corrections B-Side Days and Nights is being activated at 0400 on Wednesday, 10/9/24.
- The Trianon Hotel has advised that LEO is welcome to park in the parking lot and use their facilities if needed.
- Communications is accepting E-Agent responses on behalf of the Sanibel Police Department due to the shutdown of their servers.
- The Town of Fort Myers Beach is currently under evacuation orders
- Water will be shut off to the Town of Fort Myers Beach (Barrier Island) today (10/08) at 12:00 PM.
- Sanibel Island will have an evacuation order as of tonight (10/08) at 10:00 PM.
- Sanibel Island will have a curfew beginning tonight (10/08) at 10:00 PM
- FPL, LCEC, and WastePro are completing staging efforts. WastePro will be closed until Friday, 10/11/24.
- Shelters:
    - Phase 1 shelters opened 10/7/24 at 3:00 PM.
    - Phase 2 shelters opened this morning at 8:00 AM.
    - Phase 3 shelters are opening at 12:00 PM today.
        - Shelter Status
            - Dunbar High School: Occupancy 174, FMPD Covering Shelter
            - Estero Recreation Center: Registered - 495, At Shelter - 117
            - Hertz Arena: At Shelter - 62
            - Island Coast High School: At Shelter - 173
            - Oak Hammock Middle: At Shelter - 150
            - Ray Pottorf Elementary: Occupancy is 62
            - Tortuga Elementary: At Shelter - 37 + 21 School Staff and 13 County Employees
            - Varsity Lakes Middle: At Shelter - 0

AMERICAN OVERSIGHT

    - Gateway High School: At Shelter - 2
    - Harns Marsh Elementary: Opens at 1:00 PM
    - Harns Marsh Middle: Opens at 1:00 PM
    - East Lee County High School: Opens at 12:00 PM
    - SOPU Shelter: At Shelter - 1
- The Fire Department has two (2) swiftwater teams on standby.
- Charlotte County has closed all of their hospitals, so there may be a potential influx of patients to Lee County.
- Lee Health Urgent Care is closing tonight at 7:00 PM.
- Parks and Rec is responding to the Volleyball Court on Three Oaks Parkway to deter citizens from taking sand.

Gas Station Updates:



- WaWa on Santa Barbara and Veterans in Cape Coral just received a gas delivery. Pump #1 is reserved for First Responders.
- RaceTrac at Six Mile and Michael G. Rippe Parkway has fuel for First Responders on Pump #3 (there is an out of order tag on it).

Subject: Hurricane Milton - Update #26

As of this update, the latest storm information is as follows:

- The current track for Hurricane Milton continues to be a worst-case scenario for the Tampa Bay region southward to Sarasota. It is forecast to make landfall in Florida Wednesday night.
- The current maximum sustained winds are 145 mph. The movement is ENE at 12 mph.
- There is a Hurricane Warning in effect for the entire area. A Category 3 is forecast at landfall, with the expanding wind field still expected.
- The Storm Surge estimate is expected to be 6' - 10'. By comparison, the surge during Hurricane Helene was measured at 5.12 feet above MHHW and was measured at 11:36 PM, *almost 10 hours <u>after</u>* a peak wind gust of 63 mph taken at Tarpon Point at 1:51 PM. The peak water levels estimated elsewhere along coastal Lee County ranged from 2' to 5' above MHHW.
- There is a 97% chance that the earliest arrival time of tropical-storm-strength winds is 8:00 AM on Wednesday. The likely arrival time for those winds is 12:00 PM on Wednesday. The likely departure

AMERICAN OVERSIGHT

time with this update is 7:00 AM on Thursday, with the latest departure time being 12:00 PM on Thursday.
- There is a Flood Watch for the entire area.
- We are still under a Hurricane Warning.
- Hurricane-force winds extend out to 30 miles from the center, and tropical-storm-force winds extend outward up to 105 miles.
- The minimum central pressure based on aircraft dropsonde data is 929 mb.

As of this update, new notifications are as follows:

- Precinct supervisors are finalizing employee shelter arrangements should the need arise.
- VERT (Volunteer Emergency Response Team) members from the Civilian Support Unit (CSU) are on standby to assist with post-storm deployments.
- Florida DOT is reinforcing the Sanibel Causeway with armor stone near the toll plaza and securing the barges and other equipment. Intermittent road closures for equipment movement are being performed by FLDOT.
- Seventeen (17) nursing facilities are closed in Lee County.
- EOC passed out nearly 100,000 sand bags and is out of bags.
- Sand deliveries have stopped and no more sand deliveries are planned by EOC.
- Three county shelters are open and operating:
    - Island Coast HS Shelter has approximately 71 present and 446 registered.
    - Estero Rec Center has approximately 114 present and 132 registered.
    - Dunbar High School is being staffed by Fort Myers Police Department personnel.

Gas Station Updates:

- Loves Travel Station in North Fort Myers is open for First Responders only at this time.
- 7-11 at 24530 S Tamiami Trl has fuel. Pump 2 is for LEO.
- 7-11 at 24651 S Tamiami Trl has fuel. Pump 4 for LEO.
- 7-11/Sunoco at 27990 is out of fuel.

- Racetrack at 13050 Bonita Beach Rd (Bonita Beach Road & Bonita Grande) has fuel. Pumps 17 & 18 for LEO.
- RaceTrac at 22350 S Tamiami Trl has other grades of fuel, but is out of regular. Pump 18 for LEO.
- 7-11 at 21850 S Tamiami Trl has fuel. Pump 1 for LEO.
- Rebel at 12030 Bonita Beach Rd SE, will reserve fuel for LEO.
- 7-11 at Terminal Access has fuel. Pumps 9 & 10 for LEO. (must go inside and let the clerk know to turn on the pump)
- 7-11 at 12011 Gateway Blvd has fuel. Pump 2 for LEO. (must go inside and let the clerk know to turn on the pump)
- 7-11 at 100 Delaware Rd. in Lehigh Acres has two pumps reserved for LEO and EMS.

Definitions:

- MHHW - Mean Higher High Water (MHHW) is the average level of the highest tide for each day computed over a 19-year period.

AMERICAN OVERSIGHT

- Dropsonde - GPS dropsondes measure vertical profiles of atmospheric temperature, pressure, humidity, and wind speed as they fall from the aircraft to the surface. They are equipped with a small parachute that slows their descent and maintains vertical orientation. The dropsonde transmits data by radio four times a second to the aircraft until it reaches the surface of the ocean.

Subject: Hurricane Milton - Update #22

As of this update, the latest storm information is as follows:

- The maximum sustained winds are currently 180 mph at a speed of 10 mph, with a Minimum Central Pressure of 897 mb.
- A Storm Surge Warning has been issued for Lee County, with an estimated 6-10 ft of surge expected.
- Lee County is also facing a potential for moderate flooding from rain over the next 48 hours.
- The earliest arrival time for tropical-storm-strength winds is still showing as Wednesday around 8:00 AM.

As of this update, new notifications are as follows:

- Island Coast HS Shelter is a designated shelter currently open with approximately 93 present.
- Estero Rec Center is a designated shelter currently open with approximately 75 present.
- Other shelters will be opening tomorrow morning and will be staffed starting at 7am.
- The EOC is currently at a Level 1 Full Activation.
- As of 12pm today, all Lee County Government facilities are closed.
- All LCSO non-essential will remain off duty until notified.
- Employee Assistance teams are finished for the day and will resume again at 0700hrs tomorrow morning.

Gas Station Updates:

- 7-11 at SR 31/SR 80 is currently out of gas. There is no information of when they will be refueled.
    - RaceTrac at Six Mile / Michael G. Rippe has fuel on Pump #3 for first responders.

Subject: Hurricane Milton - Update #20

As of this update, the latest storm information is as follows:

- The maximum sustained wind speeds are now at 175 mph (Category 5 is when sustained winds are 157+ mph).
- The timing of impacts to the area looks to be as early as early Wednesday morning and continuing into midday Thursday.
- The model spread in the forecast track remains high, but is beginning to tighten around a Tampa Bay region landfall.
- Hurricane force winds extend out 30 miles.
- Tropical Storm force winds extend out 80 miles.
- Regardless of the path, the wind field will be sufficient that Lee County will at least receive strong Tropical Storm strength winds.
- The tornado threat will be mainly late Tuesday into Wednesday night.

As of this update, new notifications are as follows:

- Effective at 12:00 PM, a Mandatory Evacuation Order has been issued for Evacuation Zones A & B.

Gas Station Updates:

AMERICAN OVERSIGHT

- 7-11 at SR 31/SR 80 received a fuel shipment this morning. Pumps 11 and 12 are for LEO. Make contact inside for pumps to be turned on.

- 7-11 at Billy's Creek is out of gas. Expecting shipment today. Will set aside fuel for LEO at Pump #1. Make contact with employee to have pump turned on.
- Race Trac at Daniels/Powers Ct is out of gas. Shipment has been requested. Will set up pump for LEO use. In the past it has been Pump 18.
- 7-11 Daniels/Palomino is out of gas. Expecting shipment today and will contact me when they receive it. Pump 10 will be set aside for LEO.
- Rebel at 9281 Daniels Pkwy is out of gas. Requested shipment for today. Pump 1 will be set aside for LEO. Go inside to have pump turned on.
- 7-11 at 100 Delaware has 6800 gallons of gas for LEO.
- Circle K at SR 80/ Old Olga has fixed the pump and have a full tank for LEO. Make contact with employee for which pump to use.
- 7-11 at 12011 Gateway Blvd. has gas for LEO on Pump 2.
- 7-11 at Corkscrew and Three Oaks has gas for LEO on Pumps 13 - 16.
- RaceTrac at 6 Mile/Michael G Rippe is out of gas but requested shipment. They will set up a Pump #3 for LEO use when they get gas. Make contact with employee for pump to be turned on.
- 7-11 at 10875 Terminal Access Road has fuel and will reserve Pumps 9 and 10 for First Responders. The clerk can turn on the pump.
- Shell at 13621 N. Cleveland Ave. has LEO gas on Pump 1 & 2.
- Marathon at 14010 North Cleveland Ave. has gas.
- Mobile/7-11 at 17930 North Tamiami Tr. has LEO gas on Pump 11 & 12.
- Murphy Express at 520 Pine Island Rd. has about 3500 gallons of gas.
- Circle K at 4600 Bayline Dr. has 300 gallons for LEO.
- Rocket Gas at 5760 Bayshore Rd. has 3000 regular gas.
- Circle K at 6381 Bayshore Rd. has 500 gallons of gas for LEO.

Subject: Hurricane Milton - Update #19

AMERICAN OVERSIGHT

As of this update, the latest storm information is as follows:

- The storm track has shifted north slightly. The movement is not far enough to make a difference in our impacts.
- The earliest reasonable arrival time of tropical-storm-force winds is early Wednesday morning.

As of this update, new notifications are as follows:

- The Hurricane Hotline is now active. Corrections personnel should call 239-477-1258, Law Enforcement personnel should call 239-477-1259, and Communications personnel should call 239-477-1260. Please save these numbers now in your phone. This hotline provides updates for personnel without access to e-mail. For now, all supervisors should relay all pertinent information to their personnel who do not have access to e-mail.
- Mandatory evacuations have been issued for the Town of Fort Myers Beach. Residents are encouraged to evacuate before 3:00 PM today.
- LeeTran at noon today, Monday, Oct. 7, will stop running routes onto Fort Myers Beach. All LeeTran services will convert to off-island transit only. This is to assist with the Town of Fort Myers Beach's request for residents to leave the island.
- Lee County Utilities will shut off water to Fort Myers Beach at noon Tuesday, Oct. 8. This is a precautionary measure to protect infrastructure. It was also implemented during 2022's Hurricane Ian.
- Lee County Sheriff's Office employees are currently in the field distributing sand and sand bags to locations throughout the county.

Gas Station Updates:

- 7-11 at SR 31/SR 80 received a fuel shipment this morning. Pumps 11 and 12 are for LEO. Make contact inside for pumps to be turned on.
- 7-11 at Billy's Creek is out of gas. Expecting shipment today. Will set aside fuel for LEO at Pump #1. Make contact with employee to have pump turned on.
- RaceTrac SR 31/ SR 80 has gas but expect to be out by noon and closed. Next shipment not expected until after the storm. They do not have a pump set aside for LEO.
- Circle K at SR 80/ Old Olga has fixed the pump and have a full tank for LEO. Make contact with employee for which pump to use.
- Sunoco at SR 80 and Buckingham is out of gas but requested shipment. Will pump remaining for LEO. Make contact with employee inside for pump to be turned on.
- Rebel at 6 Mile/Metro currently has 8,000 gallons and will stop pumping at 800 gallons. They do not set aside gas for us. Unknown next shipment.
- RaceTrac at 6 Mile/Michael G Rippe is out of gas but requested shipment. They will set up a Pump #3 for LEO use when they get gas. Make contact with employee for pump to be turned on.
- Race Trac at Daniels/Powers Ct is out of gas. Shipment has been requested. Will set up pump for LEO use. In the past it has been Pump 18.
- 7-11 Daniels/Palomino is out of gas. Expecting shipment today and will contact me when they receive it. Pump 10 will be set aside for LEO.
- Rebel at 9281 Daniels Pkwy is out of gas. Requested shipment for today. Pump 1 will be set aside for LEO. Go inside to have pump turned on.
- Chevron at 13031 Metro is out of gas. Not expecting shipment. Will set a pump aside for LEO if they get gas.
- Circle K at Metro and Crystal is close to running out of gas and starting to shut pumps down. They are setting aside pumps 5-8 for LEO. Meet with employee for which pump to use.

Subject: Hurricane Milton - Update #18

As of the 8:00 AM update, a Hurricane Watch remains in effect for our area.

The IMT Main Number is 239-258-3150 or e-mail at IMT@sheriffleefl.org.

As of this update, the latest storm information is as follows:

- Hurricane Milton is now a major hurricane, with sustained wind speeds of 125 mph.
- Hurricane Milton is expected to have winds of 145 mph at landfall, with some expansion of hurricane-strength winds.
- The model spread in the forecast track remains high, with the entire area within the cone.
- Movement is ESE at 8 mph.
- The current earliest arrival of tropical-storm-strength winds is 1:00 AM on Wednesday, with a likely arrival time at 8:00 AM. This is the arrival of tropical-storm-force winds, not the arrival of the actual storm.
- The storm surge estimate is 5' to 10' for Lee County. It is expected to increase throughout the day on Wednesday and peak early Thursday.
- We are still in a Hurricane Watch, a Storm Surge Watch, and a Flood Watch.
- Many rivers are already in or forecast to go into flood stage.
- The main threat for tornadoes is late Tuesday into Wednesday night.
- Confidence is low on the exact track of the system, with the entire area within the cone. It should be noted that that 72 hour average track error is 100 miles.

As of this updates, new notifications are as follows:

- All personnel must notify IMT of all asset movements and personnel changes.
- Estero Fire Station #54 at Oriole and Alico just got sand delivered.
- Pine Island Fire has sand, but no sandbags.
- North Fort Myers Recreations Center has sand but no sandbags.
- Corrections Transport vehicles have received their staging location and should be in place by 12:00 PM.
- Academy recruits and Youth Services deputies have been deployed to the field.

National Hurricane Center Definitions:

- **Hurricane Watch**: Hurricane conditions (sustained winds of 74 mph or greater) are possible within your area. Because it may not be safe to prepare for a hurricane once winds reach tropical storm force, The NHC issues hurricane watches 48 hours before it anticipates tropical storm-force winds.
- **Hurricane Warning**: Hurricane conditions (sustained winds of 74 mph or greater) are expected somewhere within the specified area. NHC issues a hurricane warning 36 hours in advance of tropical storm-force winds to give you time to complete your preparations. All preparations should be complete. Evacuate immediately if so ordered.
- **Storm Surge Watch**: There is a possibility of life-threatening inundation from rising water moving inland from the shoreline somewhere within the specified area, generally within 48 hours.
- **Extreme Wind Warning**: Extreme sustained winds of a major hurricane (115 mph or greater), usually associated with the eyewall, are expected to begin within an hour. Take immediate shelter in the interior portion of a well-built structure.

Subject: Hurricane Milton - Update #17

The 5:00 AM update shows that the track is largely unchanged; however, models still vary from Naples to North of Tampa, and the intensity is forecast to be stronger, well into the Category 4 range.

As of this update, new notifications are as follows:

- The storm has current maximum winds of 100 mph.
- The current forecast for our coast is an 8' - 12' storm surge.
- The storm has slowed somewhat, so the earliest arrival of Tropical Storm force winds is now in the early Wednesday morning hours.

To: All Users <AllUsers@sheriffleefl.org>
Subject: Hurricane Milton - Update #15

As of the 8:00 PM National Hurricane Center update, Hurricane Milton is still forecast to rapidly intensify into a major hurricane. The center of the track has shifted further south, and is currently near the Bradenton/Sarasota area at landfall.

There is a Flood Watch for the entire area. Rainfall amounts of 5 to 10 inches, with localized totals of up to 15 inches are expected. The timing of the impacts is as early as late Tuesday and continuing into Thursday morning.

A good deal of uncertainty remains with where the storm will make landfall. It should be noted that the average NHC track error at day 3 is around 100 miles.

As of this update, new notifications are as follows:

- Youth Services and Training personnel have received their assignments and will report according to their schedule tomorrow.
- Court Operations and Civil personnel will receive their schedule tomorrow.
- Employee Assistance personnel are done for the evening. They will resume in the morning.
- IMT will be fully activated beginning at 7:00 AM on Monday, with all personnel reporting or receiving their assignments by then.
- For personnel working overtime, please use *Hurricane Milton* as the reason for the overtime.
- The 7-11 Gas station at 103 Leeland Heights Blvd W in Lehigh Acres is open for LEO. If you need gas, use pumps 3,4,5, or 6 only. Jessica is the contact person there.
- The 7-11 at 100 Delaware Rd. in Lehigh Acres is reserving gas for First Responders. use Pump 3 and 4. Sharon is the contact person there.
    - The 7-11 at 18971 Babcock Ranch Rd is holding gas for first responders but deputies must go inside to request pump to be turned on.
    - The 7-11 at Del Prado and N Tamiami (17930 N Tamiami Trl.) is also holding gas for first responders but deputies must go inside to request the pump be turned on.

All personnel should be ready for a full activation at any time. This is a serious, dangerous storm and all personnel should complete preparations as soon as possible. Models vary in intensity, but most predict *at least* a Category 3, so even if we do not receive a direct hit, we can expect hurricane strength winds or wind gusts and a severe storm surge.

Subject: Hurricane Milton - Update #14

As of the 5:00 PM update, Milton is now a hurricane. Hurricane Milton has maximum sustained winds of 85 mph. The track has shifted slightly, and there is a more northeastern path across our area. Even if we do not receive a direct hit, we will receive tropical storm and hurricane strength winds, significant storm surge, and dangerous flooding from rainfall, likely much greater that what we received from Hurricane Helene. By tonight, all personnel should have their homes and families secured for the storm, and be prepared for a full activation.

AMERICAN OVERSIGHT

Notifications for this update:

- All agency members deemed non essential during an emergency response will be dismissed tomorrow, October 7th, 2024 starting at **noon**. In order to stay home you will need to advise your immediate supervisor and use your accrued time. You may report for regular duty if you chose to do so. As always, use caution when driving in inclement weather and do not attempt to traverse standing water. IMT will continue to send out updates on our response to TS Milton.

- The Emergency Operations Center (EOC) will transition to a Level 1 at 7:00 AM tomorrow. This means that shelters and countywide operations will be run out of the EOC. The Incident Management Team is your contact for agency needs; do not contact the EOC directly.

Subject: Tropical Storm Milton - Update #12

The 11:00 AM update shows a small track shift to the south. Although it is still predicted to directly hit the Tampa Bay Area, the move slightly south may bring higher wind speeds and higher storm surge. The storm is expected to quickly intensify and will likely be a major hurricane upon arrival.

All personnel are encouraged to complete preparations for their homes and their families today.

There is still a high degree of uncertainty in both the tracks and the wind speed upon arrival, so the possibility of a direct strike to our area remains. The cone of uncertainty currently covers most of the Florida peninsula. The Incident Management Team (IMT) will keep you informed, and is making preparations to include schedule planning.

Subject: Tropical Storm Milton - Update #8

The 8:00 AM update shows that Milton is forecast to become a Major Category 3 Hurricane before making landfall. Timing, tracks, and intensity are still unpredictable; however, the National Hurricane Center still shows the track toward the Tampa area.

The current forecast is as follows:

- There is a Flood Watch for the entire area through Thursday.
- Rainfall in the amount of 5" to 8", with localized totals up to 12".
- The timing of the impacts is from late Tuesday through early Thursday morning, but it is expected to make landfall on the West Coast on Wednesday.
- There is great uncertainty about where the storm will make landfall. The average Day 4 track error is around 150 miles, so we are still well within a possible landfall range.
- The current earliest wind time arrival is 4 PM on Tuesday, and the most likely arrival time is 2 AM on Wednesday.

Additional notifications for this update include:

- Personnel should maintain at least ½ tank at all times. Due to current fuel runs, please use any opportunity to make sure your agency vehicle stays full at all times.
- Personnel who must fuel and have no other options may use 89 or 93 Octane fuel.
- Select IMT members have been activated. Please send requests to IMT@sheriffleefl.org.

AMERICAN OVERSIGHT

- The select CRU members who were notified individually will report at 10:00 AM to the Headquarters Training Room (1202).
- The asset movement members who were notified individually will report at 10:00 AM to the Headquarters Training Room (1202).
- All units, components, precincts, corrections facilities, and all affected agency departments should fill up all available gas cans and gas tanks.
- Pine Island Fire Department is out of sand. They still have sandbags. They expect to get more sand on Monday.

Subject: Tropical Storm Milton - Update #7

With the 5:00 PM update, Tropical Storm Milton is now expected to arrive as a major hurricane. The track has shifted some to the north; however, some model tracks still show direct hits our our area, and we are still in the cone of uncertainty. Please recall from prior storms that although we are not in the direct path, the effects of the hurricane will still affect us heavily, especially in the areas prone to storm surge. Additionally, the peak storm surge from Helene arrived almost 10 hours after the peak winds, so all personnel should be aware of and consider the effects before, during, and after the storm.

The below preparations remain in effect. The only change for this period is:

- Four (4) additional shallow water vessels have been obtained for water rescues.
- Additional High-Water Vehicles have been obtained and will be deployed to the islands for potential high-water rescues.
- The San Carlos Park Fire Department is out of sand and sandbags.

Subject: Tropical Storm Milton - Update #6

As of a 12:25 PM National Hurricane Center update, Tropical Storm Milton has formed. This storm is forecast to strengthen and bring the risk of life-threatening impacts to portions of the West Coast of Florida next week. The maximum winds are currently estimated at 40 mph with higher gusts. Models range in intensity from a Tropical Storm to a Major Hurricane, so there is tremendous unpredictability in the strength upon arrival.

At this time, the Incident Management Team is preparing for the possibility of a major hurricane affecting our area with impacts beginning on Tuesday and a full impact on Wednesday.

All agency personnel are encouraged to prepare as follows:

- All personnel should review their hurricane plans, and prepare their homes and families for the possibility of a hurricane impact in the middle of next week.
- All precincts should secure their mobile assets (decoy vehicles, arrow boards, trailers, ATVs, etc.) beginning on immediately to be completed by 2:00 PM on Monday.

AMERICAN OVERSIGHT

- All trailers should be brought to storage beginning immediately to be completed by 2:00 PM on Monday.
- All personnel should use the remainder of this weekend to prepare for a possible activation. This plan should include three days worth of food, uniforms, and supplies.
- All personnel should use the remainder of this weekend to prepare their uniforms and equipment (including sufficient batteries for equipment) for a possible activation.
- All specialty units should begin bringing their assets back to their storage areas and secure locations. This should be completed by 2:00 PM on Monday.
- All precincts should secure any items that can be moved by the wind to a secure location starting immediately to be completed by 2:00 PM on Monday.
- All Corrections facilities (including Nan's Ranch) should prepare their facilities for a possible hurricane impact next week.

This is new information as of this update:

- The Waterborne Strike Team is on standby for deployment for water rescues.
- JetBlue Stadium, CenturyLink Stadium, the Lee County Gun Range, and the Andrea Lane and Sivan Road storage buildings are prepared to receive assets if needed.
- The Marine Unit is in contact with the IMT to secure the marine assets.
- Known sandbag locations are as follows:
    - Punta Gorda—Free sandbags will be available at 3130 Cooper St., the last entrance on the left by flag poles.
    - Fort Myers Beach—Sand is located off of Gulf Beach Road, and bags are available at Town Hall, 2731 Oak St. (The location will provide service until 4:30 p.m. on Friday and begin Monday at 8:30 a.m.)
    - Fort Myers— South Trail Fire & Rescue will have sand and sandbags available at station 63, 5531 Halifax Ave., Fort Myers—a maximum of 20 bags per household. UPDATE: South Trail Fire & Rescue is currently out of sand. Empty sandbags only are available.
    - Naples— Sandbags will be available at three public park locations: Big Corkscrew Island Regional Park, 810 39th Ave., North Collier Regional Park, 15000 Livingston Road, in the Sun-N-Fun Lagoon parking lot, and at Donna Fiala Eagle Lakes Community Park, 11565 Tamiami Trail East, in the grassy area between the parking lots. The Naples sandbag locations will begin service at 8 a.m. through dusk on Saturday and Sunday.
    - San Carlos Park—Sand and sandbags are available at San Carlos Park Fire District Station 54, located at 16900 Oriole Road. There is a limit of 10 bags per household. Bags can be picked up at the lobby. Bring your own shovel. Be prepared to fill and load your own sandbags. Make sure your vehicle can transport the weight of the sandbags.
    - North Fort Myers—Sandbags will be located at North Fort Myers Parks and Recreation, 2000 N. Recreation Parkway. Sand will be located in the back of the park, next to the county mulch pile. Please bring your own shovel to fill the bags.
    - Matlacha—Sandbags are available for pickup at Station 1, located at 5700 Pine Island Rd, Bokeelia, FL 33922
- IMT personnel are visiting the precincts, and the storage locations to inventory assets to prepare for both securement and post-storm deployment.
- No schedule changes are expected between now and Monday afternoon; however, all personnel should be prepared for schedule adjustments.
- The Agriculture assets are secured on the Olga site.

Subject: Important Update on a possible impending hurricane impacting our area (Update #5)

Team,

IMT has been working on preparation for a potential Hurricane impacting our area early next week. IMT will continue to send out updates regularly so please monitor your email closely. All agency units need to begin preparations of securing their assigned assets and communicate all movement to IMT. Also, update the major asset application on the intranet. We have secured Jet Blue Park as an asset staging area for Marine and other assets. Agency asset storage facilities to include the gun range are preparing to house assets as well. IMT is securing high water vehicles that will be pre-staged at strategic locations i.e., the barrier islands. IMT members will be in the RTIC today coordinating efforts. Agency extension 239-258-3150 is being setup to communicate to IMT staff. Additional updates to follow.

Be prepared and be safe!

Subject: New Caribbean Disturbance - Update #4

The National Hurricane Center 2:00 PM update shows the possibility of development as the low pressure area in the Gulf of Mexico moves slowly eastward or northeastward. A tropical or subtropical depression or storm could form during the early to middle part of next week if the low remains separate from a frontal boundary that is forecast to extend across the Gulf of Mexico. Regardless of development, locally heavy rains could occur over portions of the Florida Peninsula late this weekend into next week. As of this update, the formation chance in the next 48 hours is low at 10 %, and the formation chance through 7 days has increased to 50%.

Current model runs show an arrival time of any potential storm around Wednesday of next week. This represents a slower forward storm speed and later storm arrival than previous model runs, so the timing and impacts are still largely unknown. Regardless of any potential storm, significant rainfall is still expected, and the Incident Management Team will continue to monitor and update all personnel.

From: IMT <IMT@sheriffleefl.org>
Sent: Thursday, October 3, 2024 9:56 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance - Update #3

The National Hurricane Center has reduced the chance of tropical cyclone development within seven days to 30%. While the system is likely to develop over the Gulf of Mexico late this weekend or early next week, subsequent tropical or subtropical development could be limited by the system's potential interaction with a frontal boundary. Regardless of development, locally heavy rains could occur over portions of the Florida Peninsula next week.

Subject: New Caribbean Disturbance - Update #2

The forecast for the area of disorganized showers remains the same; it is still too early to tell if the system will develop further. Regardless of development, heavy rain is expected in our area into the weekend and next week. The Incident Management Team will continue to monitor.

From: IMT <IMT@sheriffleefl.org>
Sent: Tuesday, October 1, 2024 10:35 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance - Update #1

The area of disorganized showers remains at a 40% chance of development. The National Hurricane Center indicates that environmental conditions could support some gradual development of this system, and a tropical depression could form towards the end of this week or this weekend while it moves generally northwestward over the northwestern Caribbean Sea and into the Gulf of Mexico. As of this time, there are no changes, but some long range models show an increased chance of this disturbance affecting our area.

From: IMT <IMT@sheriffleefl.org>
Sent: Monday, September 30, 2024 8:11 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance

The Incident Management Team is monitoring a new area of disorganized showers and thunderstorms over the western Caribbean Sea. The National Weather Center states that the system has a medium chance (40%) of developing towards the middle to latter part of the week as it moves northwestward into the Gulf of Mexico. As this disturbance moves into the gulf, increasing moisture is expected over the Florida Peninsula and elevated rain chances are anticipated from Friday through the weekend, and possibly into early next week.

Unfortunately, long range models show the possibility of direct impacts for Southwest Florida; however, It is too early to determine what, if any, tropical specific impacts can be expected.

The Incident Management Team will continue to monitor the storm, and will continue to provide updates through this very active part of the hurricane season.

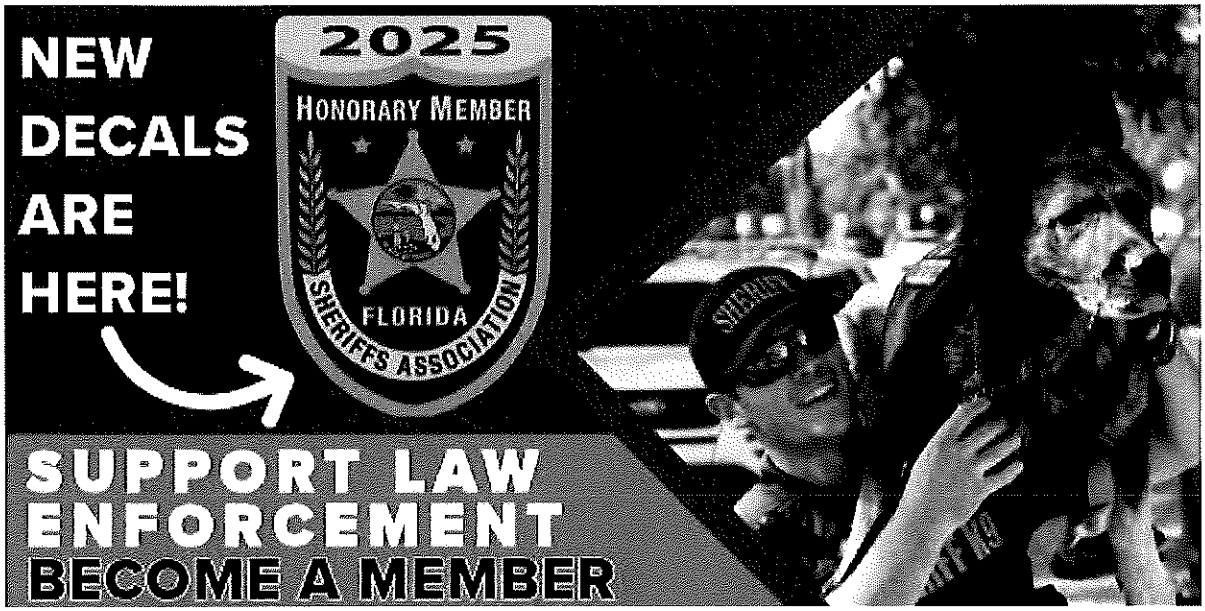
Good morning gentlemen,

AMERICAN OVERSIGHT



Thank you so much for all the work you continue to do during these hurricanes, it means so much to everyone. Verizon reached out this morning regarding infrastructure restoration and staging post landfall. During Melene they had a bit of

trouble in some locations being permitted access to the areas due to not having Verizon credentials. Any contractor or consultant that will be acting on behalf of Verizon will have the attached letter that should be presented.

How would you like to present and share this information with the sheriff's office?

Thank you again and let me know how if you need any help.

You don't often get email from courtney.barnard@verizon.com. Learn why this is important

CAUTION: This email originated from outside of FSA. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Casey,

It was so nice to catch up with you today, thank you for your assistance with the Verizon access messaging. As I mentioned on the phone, we have Verizon vendors and contractors who will be supporting our efforts to restore critical infrastructure after Hurricane Milton. It is vitally important that the vendors and contractors be allowed to access the sites in need. As I mentioned, the vendors, and contractors will have copies of the attached Verizon branded letter.

We ask that your deputies be made aware of these branded emergency access letters and that they honor those with the letters and allow them access to restore connectivity. As I mentioned, it is possible that the vendors will not have Verizon branded vehicles or IDs; however, they will have the letter.

AMERICAN OVERSIGHT

Thank you for sharing this with the various sheriffs departments and please reach out if you have any questions. I have also cc'ed Julie Smith, Director of Government Affairs for the Southeast, in case I lose connectivity during the storm.

Thank you and stay safe,

Courtney

Date: 10/6/2024

The attached Verizon Emergency Access Letter is for use by Verizon employees and contractors supporting critical functions in preparation of, or response to, Hurricane Milton.

These Access Letters are intended to provide Verizon staff with formal company communication that can be presented on request to any law enforcement or public sector agency.

It is the responsibility of Verizon business unit leaders to determine who needs to utilize this letter and to distribute it accordingly.

The Global Event Management Center (GEMC) is responsible for assisting Verizon personnel and contractors supporting critical functions should they be unsuccessful in reaching their destination.

Verizon personnel or contractors that are directed by their supervisor or management to travel during such as event should take the following items with them:

- Verizon Access Letter;
- Government issued driver's license or government issued identification; and
- Verizon issued or contractor issued identification

As a critical infrastructure provider/utility, Verizon is typically exempt from executive orders pertaining to travel bans or travel restrictions. However, law enforcement may still detain or prevent Verizon employees or contractors from proceeding to their destination. This may be more likely when private vehicles are being used and personnel should be prepared to present their documentation and justification for travel.

If a Verizon employee or contractor traveling under the direction of their management is prevented by law enforcement from proceeding to their destination, they should obtain law enforcement agency information (local, state, other), their location, the officer's name, and then immediately contact their supervisor. The supervisor should then call into the GEMC which will work with the appropriate public sector agencies to resolve the issue as quickly as possible.

Press Release

Pine Island Causeway and Bridge Reconstruction Project

MATLACHA, Fla. – The contractor is taking extra precautions to reinforce the improvements that have been made on the Little Pine Island Bridge and Causeway before Hurricane Milton arrives. Throughout the day today, crews are installing additional protective measures to prevent additional scour at the abutments of the bridge.

AMERICAN OVERSIGHT

Best management practices (BMP) are being used to secure the barge and additional material onsite. FDOT wants to take all possible steps to ensure that the causeway and bridge are operational once the storm passes.

- **Temporary signals are still operational. Motorists should follow directions from Lee County Sheriff's Office and flaggers if present.**

The project team, FDOT and LCDOT are working hard to make sure delays are minimal as they are aware that many residents are evacuating. The contractor is also in the process of securing the barges and other staging equipment so that it is readily available if needed after the storm passes.

After the storm passes, please expect that the contractor will need time to inspect and clear debris from the roadway before allowing the public to access and cross the causeway and bridge. Once FDOT determines that the causeway and bridge are safe, the bridge will open to traffic as soon as the Lee County Sheriff's Office and Fire Department provide the "all clear" that travel on the island is safe.

Lee County Government update on Hurricane Milton

Fort Myers, FL, Oct. 8, 2024 – Lee County's daily noon update on Hurricane Milton is available for viewing on the county's YouTube channel, www.youtube.com/@LeeCountyFLBOC. You can view it by clicking here.

Some highlights from the briefing, which included Lee County Commissioners, Lee County Public Safety Director Benjamin Abes and Lee County Sherriff Carmine Marceno are:

- Milton is a powerful Category 4 Major Hurricane. Residents need to be aware that the forecast includes:
  - Sustained tropical storm force winds, and sustained hurricane force winds at the peak of our impacts
  - Winds will start to impact our area overnight, including gusts to tropical storm force
  - Storm surge of 6 to 10 feet.
  - Everyone needs to be to their shelter-in-place location today.
  - Do not plan on driving on Wednesday.

- The Emergency Operations Center is fully activated, there is a State of Local Emergency in effect and mandatory evacuation orders are in effect.
  - The county on Monday ordered a mandatory evacuation of Zone A and B, which includes more than 416,000 residents.
  - Zone C is not being evacuated currently.
  - Everyone in Zones A and B should move to a safe place by 10 p.m. today and shelter in place all of Wednesday.

- As of 11 a.m., there were more than 1,650 people in our shelters. Lee County has 13 shelters open. There is plenty of room for evacuees. The shelters are:

  - Alico Arena
    12181 FGCU Lake Parkway East
    Fort Myers, FL 33913

  - Dunbar High School
    3800 Edison Ave.
    Fort Myers, FL 33916

AMERICAN OVERSIGHT

- East Lee County High School
  715 Thomas Sherwin Ave.
  Lehigh Acres, FL 33974

- Estero Recreation Center
  9200 Corkscrew Palms Blvd.
  Estero, FL 33928

- Gateway High School
  13820 Griffin Drive
  Fort Myers, FL 33913

- Harns Marsh Elementary School
  1800 Unice Ave. N.
  Lehigh Acres, FL 33971

- Harns Marsh Middle School
  1820 Unice Ave. N.
  Lehigh Acres, FL 33971

- Hertz Arena
  11000 Everblades Parkway
  Estero, FL 33928

- Island Coast High School
  2125 DeNavarra Parkway
  Cape Coral, FL 33909

- Oak Hammock Middle School
  5321 Tice St.
  Fort Myers, FL 33905

- Tortuga Preserve Elementary School
  1711 Gunnery Road N.
  Lehigh Acres, FL 33971

- Treeline Elementary School
  10900 Treeline Ave.
  Fort Myers, FL 33913

- Varsity Lakes Middle School
  801 Gunnery Road N.
  Lehigh Acres, FL 33971

- Transportation is available to shelters:
  - LeeTran - go to any LeeTran stop and advise the driver that you are going to an open shelter. They will take you to a transfer center, and another bus can get you to a shelter. LeeTran staff is there to direct passengers.
  - LeeTran is only transporting off-island on Fort Myers Beach.
  - Uber - Florida Division of Emergency Management has partnered with Uber to provide Floridians free rides to and from shelters in counties evacuating for Hurricane Milton. To get a ride, use promo code MILTONRELIEF in the Uber app.
  - If you require additional assistance, you can call the Emergency Information Hotline at 211, or 239 433-3900.

- If you're heading to one of Lee County's shelters, you need to bring your Emergency Supply Kit. Include a three-day supply of food, water and any medications you need. Food should be shelf stable. No access to electricity or refrigeration will be available. You might consider items to make yourself more comfortable as well.

AMERICAN OVERSIGHT

- Pets are allowed in all Lee County shelters, but you're responsible for bringing anything your pets will need:
  - Collar, leash and ID tags.
  - Photo of your pet in case you become separated.
  - Bring a crate or pet carrier.
  - Water, food and clean-up supplies, including waste bags for dogs and litter box with litter for cats.
- Curfew
  - The Town of Fort Myers Beach and City of Sanibel have announced curfews beginning at 10 p.m. today.
  - Lee County has not yet announced a curfew. The county is communicating and coordinating with municipalities and law enforcement partners and will make a decision when appropriate in the near future.

Free Transportation to Shelters

LeeTran has free transportation to shelters from any bus stop.
Uber is offering free rides to shetlers for residents. Use promo code **MILTONRELIEF**

Lee County has announced additional shelters opening at noon today in advance of the approach of Hurricane Milton. The open shelters include:

- **Alico Arena** - 12181 FGCU Lake Parkway East, Fort Myers

AMERICAN OVERSIGHT

- **Island Coast High School** - 2125 DeNavarra Pkwy., Cape Coral
- **East Lee County High School** - 715 Thomas Sherwin Ave., Lehigh Acres
- **Estero Recreation Center** - 9200 Corkscrew Palms Blvd., Estero
- **Dunbar High School** - 30 Edison Ave., Fort Myers
- **Harns Marsh Elementary School** - 1800 Unice Ave. N, Lehigh Acres
- **Harns Marsh Middle School** - 1820 Unice Ave. N, Lehigh Acres
- **Hertz Arena** - 11000 Everblades Pkwy., Estero
- **Gateway High School** - 13820 Griffin Drive, Fort Myers
- **Oak Hammock Middle School** - 5321 Tice St., Fort Myers
- **Tortuga Elementary** - 1711 Gunnery Road N, Lehigh Acres
- **Treeline Elementary** - 10900 Treeline Ave., Fort Myers
- **Varsity Lakes Middle School** - 801 Gunnery Road N, Lehigh Acres

Please bring your own shelf-stable food and enough for up to three days to support you and your family. Refrigeration will not be provided.
All shelters are pet-friendly. Pet owners are responsible for pet food and medications and should have all animals on a leash or in a crate.
To view a video of Public Safety Director Ben Abes discussing the shelters, go to https://youtu.be/Dm9I3J1oVQE.
Additional information: If you're heading to one of Lee County's shelters, you need to bring a Go Kit. Include a three-day supply of food, water and snacks. You'll also need a pillow and sleeping bag; folding chair; medications and eyeglasses; disinfectant wipes; toilet paper; a three-day supply of clothing; a sleep mask and earplugs; hygiene items; games or books; a phone charger or battery bank; and instant coffee or teabags.
Pets are allowed in all Lee County shelters, but you're responsible for bringing what they need. Pack your pet a Go Kit. Make sure there's a collar, leash and ID tags. Have a photo of you with your pet in case you become separated. Bring a crate or pet carrier. Include a week's worth of water; food and treats; clean-up supplies including waste bags for dogs and litter box with litter for cats; remember any medicine your pet needs. You can find out more about preparation at leegov.com/storm.

CLICK HERE FOR PUBLIC SHELTER INFORMATION

Evacuation Zones A and B
On Monday, Oct. 7., Lee County issued mandatory evacuation orders for Evacuation Zones A and B. People who live in mobile homes and manufactured homes are also part of the evacuation order. All shelters are pet-friendly; pets must be on leashes or in kennels. Residents are encouraged to make more comfortable arrangements by staying with a friend or family member outside of the evacuation zones. Residents should plan to be in a safe location outside of the evacuation zones by tonight.
Reentry Passes & Curfews
The Sanibel Police Department is issuing Hurricane Re-Entry Permits to residents and business owners until 4 p.m. today, Oct. 8.
The Town of Fort Myers Beach and City of Sanibel have both issued a 10 p.m. curfew that will take effect tonight, Oct. 8.
LeeTran and Lee County bridges suspend fares & tolls
Transportation is available to shelters. People can go to any LeeTran stop and advise the driver that they need to go to an open shelter. They will be taken to a transfer center and then to a shelter. LeeTran has suspended fares.

AMERICAN OVERSIGHT

Tolls on Lee County bridges – Cape Coral Parkway, Midpoint Bridge and the Sanibel Causeway – have been suspended.

Solid Waste services suspended

Residents throughout Lee County are not to place any additional garbage, recycling or yard waste to the curb. Solid Waste collection services will be suspended countywide, Tuesday through Thursday. Announcements about Friday collections will be made Thursday.

Lee County asks that residents:

- Obey evacuation notices.
- Pack a go-kit with family and pet needs.
- Bring their own personal items and supplies if going to a shelter.
- Report blocked ditches, swales and canals.
- Know that where it rains, it can flood. Even if you are not in a flood zone, you could still be prone to flooding due to local drainage issues and existing saturated areas.
- Understand that even if you are not evacuated or in an evacuation zone, flooding can still occur. Be prepared for flood inundation.
- Be sure you are signed up for AlertLee. The link is at www.leegov.com/storm.

Accommodation Availability Survey

We encourage inland hoteliers to share current availability to help first responders, pre- & post-storm.

CLICK HERE TO COMPLETE SURVEY

Lee County Port Authority

Southwest Florida International Airport (RSW) airlines are planning to operate today but look for delays and cancellations. No flights will be operating on Wednesday, Oct. 9, and Thursday, Oct. 10.

Subject: Important FSA Task Force Information Ahead of Hurricane Milton

External Email Alert

This email has been sent from an account outside of the LCSO Systems network.

Please treat the email with caution, especially if you are requested to click on a link, decrypt/open an attachment, or enable macros. For further information on how to spot phishing, Please contact the Help Desk.

Sheriffs,

Please read the following message from FSA Task Force Chair Sheriff Tommy Ford.

Sheriffs,

On behalf of the Florida Sheriff's Task Force, thank you for your willingness to help our fellow Sheriff's in need. Hurricane Milton is forecast to hit the western peninsula around the Tampa Bay Region as a strong Category 3 or 4 hurricane on Wednesday night into Thursday morning. Storm surge in this area is expected to be catastrophic. Many Sheriff's Offices are in the path of the storm, which will delay response from some of our larger agencies as they deal with issues in their own counties. We will need all available counties to be available for this one, and as soon as your county stabilizes, we would appreciate your availability to respond.

I want to remind you all about the FSA Task Force and DEM process so that we can accomplish an orderly and effective response. FSA staff members Steve Cole(Alpha) and Billy Walls(Bravo) are working the ESF 16 desk at the State EOC and will be coordinating mission requests with FDLE and filling those missions with available sheriff's office response teams. If you have a team that is available, please make sure that you complete the survey that Steve Cole sent yesterday at https://form.jotform.com/242803216771959, email esf16fsa@flsheriffs.org or call our ESF-16 desk at (850) 815-4961 so that the FSA staff will know the resources we have to work with.

Please do not self-deploy and do not deploy without a mission number. Mission numbers are obtained by the affected Sheriff requesting response assets from their EOC. Also, please work with and cooperate with the FSA desk on the county that you are needed in and the requested mission as we are working to ensure that each Sheriff has the specific resources that they have asked for and need. It is also very difficult to effectively allocate resources when Sheriffs contact the affected Sheriff requesting to respond. The affected Sheriff can certainly request a partner agency, but we must look at the big picture to make sure that each Sheriff gets the resources that they need. Please work through the FSA Task Force on these missions.

FSA Task Force Co-Chairs will be responding to the field with a small team to create a **Forward Operating Team** to serve as the point of coordination between the affected Sheriff and the responding Sheriffs teams.

AMERICAN OVERSIGHT

Please ensure that after FDLE check-in, that your commanders coordinate with the FSA Forward Operating Team in your assigned county for mission specifics, assignments and direction. This will ensure that the

affected Sheriff is getting the appropriate help that they have requested as the FSA Task Force Co-Chair is communicating directly with the Sheriff on what is needed. The following is a list of our Forward Operating Teams:

- Hillsborough: Sheriff Tommy Ford (850) 258-7999/ Major David Baldwin (850) 527-5633
- Pinellas: Sheriff Michelle Cook (904) 497-2445
- Polk: Sheriff Eric Flowers (772) 240-0249
- Manatee/Sarasota: Sheriff Eric Aden (850) 259-0049/ Major Kevin Kirkpatrick (850) 259-0081
- Charlotte/Lee: Sheriff Ric Bradshaw/Colonel Robert Allen (561) 662-1801
- Hernando/Pasco: Sheriff Mike Prendergast (352) 423-0000
- Hardee/DeSoto: Sheriff Paul Blackman (863) 381-1863/ Major Daren Hood (863) 381-2082
- Marion/Sumter: Sheriff Mark Hunter (386) 623-9041

Counties not listed will be coordinated by the Sheriff's staff in the affected county.

Thank you for your cooperation and willingness to help. This will ensure an effective response that meets the needs of our Sheriffs that will no doubt need our help. Please ensure that your Response Team commanders have this email.

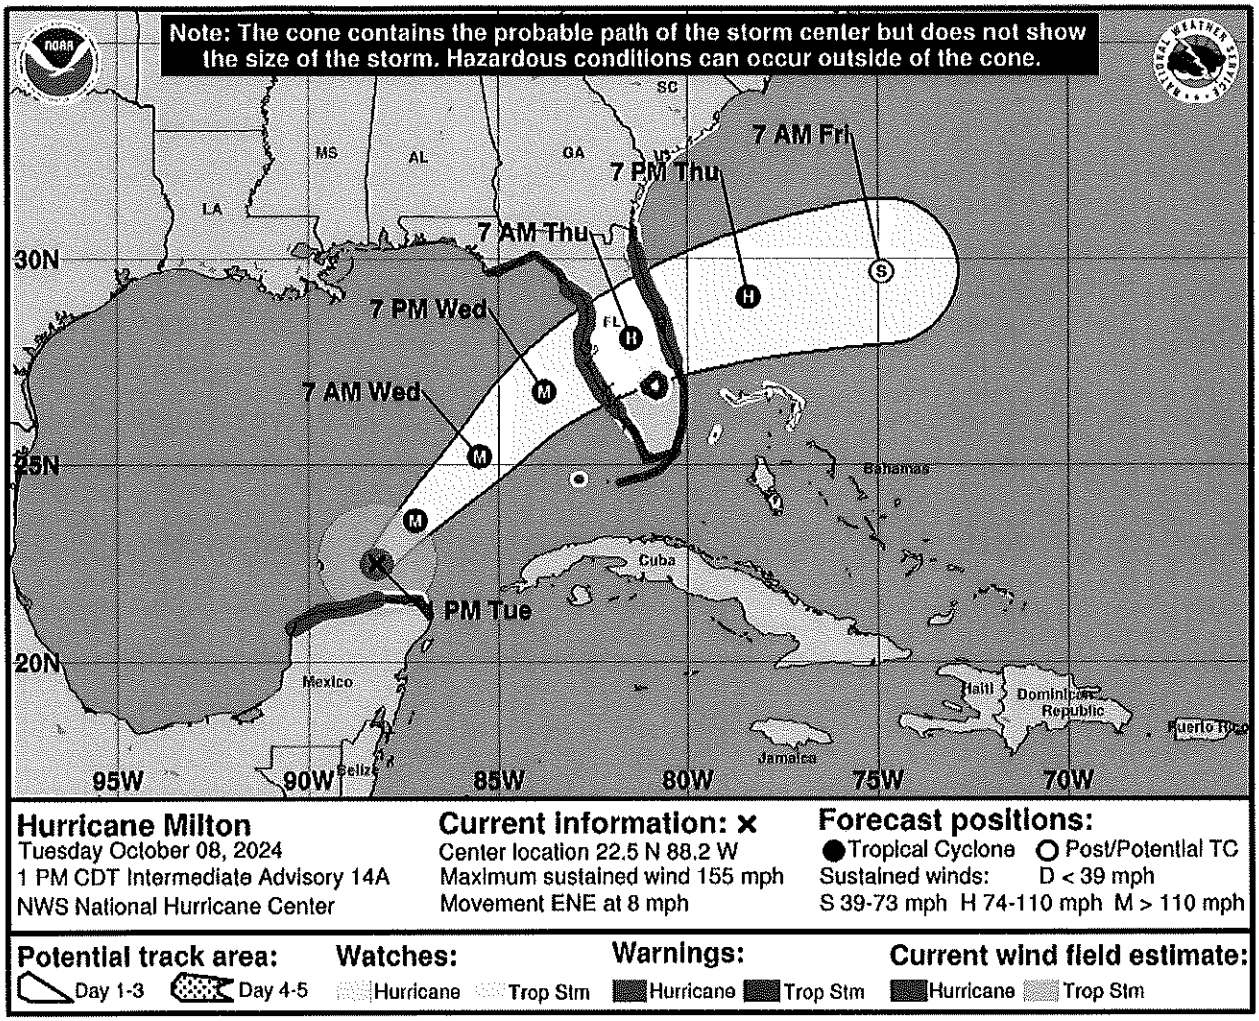
Subject:	Hurricane Milton - Update #28

As of this update, the latest storm information is as follows:

- The current track continues to be a worst case scenario situation for the Tampa Bay region southward to Sarasota.
- The track for Hurricane Milton is still toward the lower Tampa Bay/Bradenton/Sarasota area.
- Rainfall amounts of 5 to 12 inches, with localized totals up to 18 inches are expected. Many rivers are now forecast to go into moderate to major flood stage with a few possibly reaching record levels.
- The current earliest reasonable arrival time in Lee County for tropical-storm-force winds is 10:00 AM on Wednesday, with a most likely departure time of 3:00 PM on Wednesday.
- Movement is ENE at 8 mph.
- The maximum sustained wind speed has increased to 155 mph (Category 4; Category 5 starts at 157 mph).
- The minimum central pressure based on dropsonde data is 923 mb.
- We are still under a Storm Surge Warning.
- We are still under a Hurricane Warning.
- Hurricane-force winds extend outward up to 30 miles.
- Tropical-storm-force winds extend outward up to 105 miles.
- A 6' to 10' storm surge is still expected along the Lee County coast.
- Surf swells generated by Milton are expected to continue to affect much of the Gulf Coast over the next day or two, and are likely to cause life-threatening surf and rip current conditions.

As of this update, new notifications are as follows:



- Additional documentation for welfare checks (17w) will be required. Supervisors will be disseminating the information to the affected personnel.
- All Marine assets are secured at JetBlue and the 4th Precinct, and the vessel assets that will be deployed with the Marine Unit will be secured at LeeTran.
- Shelters:
    - Alico Arena - 54
    - Dunbar High School: Occupancy 174, FMPD Covering Shelter
    - Estero Recreation Center: Registered - 662, At Shelter - 217
    - Hertz Arena: At Shelter - 212
    - Island Coast High School: At Shelter - 311
    - Oak Hammock Middle: At Shelter - 273
    - Ray Pottorf Elementary: Occupancy is 62
    - Tortuga Elementary: At Shelter - 60

Subject: Hurricane Milton - Update #26

As of this update, the latest storm information is as follows:

- The current track for Hurricane Milton continues to be a worst-case scenario for the Tampa Bay region southward to Sarasota. It is forecast to make landfall in Florida Wednesday night.
- The current maximum sustained winds are 145 mph. The movement is ENE at 12 mph.
- There is a Hurricane Warning in effect for the entire area. A Category 3 is forecast at landfall, with the expanding wind field still expected.
- The Storm Surge estimate is expected to be 6' - 10'. By comparison, the surge during Hurricane Helene was measured at 5.12 feet above MHHW and was measured at 11:36 PM, *almost 10 hours <u>after</u>* a peak

AMERICAN OVERSIGHT

wind gust of 63 mph taken at Tarpon Point at 1:51 PM. The peak water levels estimated elsewhere along coastal Lee County ranged from 2' to 5' above MHHW.

- There is a 97% chance that the earliest arrival time of tropical-storm-strength winds is 8:00 AM on Wednesday. The likely arrival time for those winds is 12:00 PM on Wednesday. The likely departure time with this update is 7:00 AM on Thursday, with the latest departure time being 12:00 PM on Thursday.
- There is a Flood Watch for the entire area.
- We are still under a Hurricane Warning.
- Hurricane-force winds extend out to 30 miles from the center, and tropical-storm-force winds extend outward up to 105 miles.
- The minimum central pressure based on aircraft dropsonde data is 929 mb.

As of this update, new notifications are as follows:

- Precinct supervisors are finalizing employee shelter arrangements should the need arise.
- VERT (Volunteer Emergency Response Team) members from the Civilian Support Unit (CSU) are on standby to assist with post-storm deployments.
- Florida DOT is reinforcing the Sanibel Causeway with armor stone near the toll plaza and securing the barges and other equipment. Intermittent road closures for equipment movement are being performed by FLDOT.
- Seventeen (17) nursing facilities are closed in Lee County.
- EOC passed out nearly 100,000 sand bags and is out of bags.
- Sand deliveries have stopped and no more sand deliveries are planned by EOC.
- Three county shelters are open and operating:
    - Island Coast HS Shelter has approximately 71 present and 446 registered.
    - Estero Rec Center has approximately 114 present and 132 registered.
    - Dunbar High School is being staffed by Fort Myers Police Department personnel.

Gas Station Updates:

- Loves Travel Station in North Fort Myers is open for First Responders only at this time.
- 7-11 at 24530 S Tamiami Trl has fuel. Pump 2 is for LEO.
- 7-11 at 24651 S Tamiami Trl has fuel. Pump 4 for LEO.
- 7-11/Sunoco at 27990 is out of fuel.
- 7-11/Mobile at 28175 S Tamiami Trl has fuel. Pumps 1 & 2 for LEO.
- 7-11 at 26975 Old 41 Road has fuel and will reserve ALL pumps for LEO.
- Circle K at 10460 Bonita Beach Rd (Old 41 & Bonita Beach Road) has fuel. Pump 1 & 3 for LEO.
- Racetrack at 13050 Bonita Beach Rd (Bonita Beach Road & Bonita Grande) has fuel. Pumps 17 & 18 for LEO.
- RaceTrac at 22350 S Tamiami Trl has other grades of fuel, but is out of regular. Pump 18 for LEO.
- 7-11 at 21850 S Tamiami Trl has fuel. Pump 1 for LEO.
- Rebel at 12030 Bonita Beach Rd SE, will reserve fuel for LEO.
- 7-11 at Terminal Access has fuel. Pumps 9 & 10 for LEO. (must go inside and let the clerk know to turn on the pump)
- 7-11 at 12011 Gateway Blvd has fuel. Pump 2 for LEO. (must go inside and let the clerk know to turn on the pump)
- 7-11 at 100 Delaware Rd. in Lehigh Acres has two pumps reserved for LEO and EMS.

AMERICAN OVERSIGHT

Definitions:

- MHHW - Mean Higher High Water (MHHW) is the average level of the highest tide for each day computed over a 19-year period.
- Dropsonde - GPS dropsondes measure vertical profiles of atmospheric temperature, pressure, humidity, and wind speed as they fall from the aircraft to the surface. They are equipped with a small parachute that slows their descent and maintains vertical orientation. The dropsonde transmits data by radio four times a second to the aircraft until it reaches the surface of the ocean.

AMERICAN OVERSIGHT

As of this update, the latest storm information is as follows:

- The storm track has shifted north slightly. The movement is not far enough to make a difference in our impacts.
- The earliest reasonable arrival time of tropical-storm-force winds is early Wednesday morning.

As of this update, new notifications are as follows:

- The Hurricane Hotline is now active. Corrections personnel should call 239-477-1258, Law Enforcement personnel should call 239-477-1259, and Communications personnel should call 239-477-1260. Please save these numbers now in your phone. This hotline provides updates for personnel without access to e-mail. For now, all supervisors should relay all pertinent information to their personnel who do not have access to e-mail.
- Mandatory evacuations have been issued for the Town of Fort Myers Beach. Residents are encouraged to evacuate before 3:00 PM today.
- LeeTran at noon today, Monday, Oct. 7, will stop running routes onto Fort Myers Beach. All LeeTran services will convert to off-island transit only. This is to assist with the Town of Fort Myers Beach's request for residents to leave the island.
- Lee County Utilities will shut off water to Fort Myers Beach at noon Tuesday, Oct. 8. This is a precautionary measure to protect infrastructure. It was also implemented during 2022's Hurricane Ian.
- Lee County Sheriff's Office employees are currently in the field distributing sand and sand bags to locations throughout the county.

Gas Station Updates:

- 7-11 at SR 31/SR 80 received a fuel shipment this morning. Pumps 11 and 12 are for LEO. Make contact inside for pumps to be turned on.
- 7-11 at Billy's Creek is out of gas. Expecting shipment today. Will set aside fuel for LEO at Pump #1. Make contact with employee to have pump turned on.
- RaceTrac SR 31/ SR 80 has gas but expect to be out by noon and closed. Next shipment not expected until after the storm. They do not have a pump set aside for LEO.
- Circle K at SR 80/ Old Olga has fixed the pump and have a full tank for LEO. Make contact with employee for which pump to use.
- Sunoco at SR 80 and Buckingham is out of gas but requested shipment. Will pump remaining for LEO. Make contact with employee inside for pump to be turned on.
- Rebel at 6 Mile/Metro currently has 8,000 gallons and will stop pumping at 800 gallons. They do not set aside gas for us. Unknown next shipment.
- RaceTrac at 6 Mile/Michael G Rippe is out of gas but requested shipment. They will set up a Pump #3 for LEO use when they get gas. Make contact with employee for pump to be turned on.
- Race Trac at Daniels/Powers Ct is out of gas. Shipment has been requested. Will set up pump for LEO use. In the past it has been Pump 18.
- 7-11 Daniels/Palomino is out of gas. Expecting shipment today and will contact me when they receive it. Pump 10 will be set aside for LEO.
- Rebel at 9281 Daniels Pkwy is out of gas. Requested shipment for today. Pump 1 will be set aside for LEO. Go inside to have pump turned on.
- Chevron at 13031 Metro is out of gas. Not expecting shipment. Will set a pump aside for LEO if they get gas.
- Circle K at Metro and Crystal is close to running out of gas and starting to shut pumps down. They are setting aside pumps 5-8 for LEO. Meet with employee for which pump to use.

Subject: Hurricane Milton - Update #18

As of the 8:00 AM update, a Hurricane Watch remains in effect for our area.

The IMT Main Number is 239-258-3150 or e-mail at IMT@sheriffleefl.org.

As of this update, the latest storm information is as follows:

- Hurricane Milton is now a major hurricane, with sustained wind speeds of 125 mph.
- Hurricane Milton is expected to have winds of 145 mph at landfall, with some expansion of hurricane-strength winds.
- The model spread in the forecast track remains high, with the entire area within the cone.
- Movement is ESE at 8 mph.
- The current earliest arrival of tropical-storm-strength winds is 1:00 AM on Wednesday, with a likely arrival time at 8:00 AM. This is the arrival of tropical-storm-force winds, not the arrival of the actual storm.
- The storm surge estimate is 5' to 10' for Lee County. It is expected to increase throughout the day on Wednesday and peak early Thursday.
- We are still in a Hurricane Watch, a Storm Surge Watch, and a Flood Watch.
- Many rivers are already in or forecast to go into flood stage.
- The main threat for tornadoes is late Tuesday into Wednesday night.
- Confidence is low on the exact track of the system, with the entire area within the cone. It should be noted that that 72 hour average track error is 100 miles.

As of this updates, new notifications are as follows:

- All personnel must notify IMT of all asset movements and personnel changes.
- Estero Fire Station #54 at Oriole and Alico just got sand delivered.
- Pine Island Fire has sand, but no sandbags.
- North Fort Myers Recreations Center has sand but no sandbags.
- Corrections Transport vehicles have received their staging location and should be in place by 12:00 PM.
- Academy recruits and Youth Services deputies have been deployed to the field.

National Hurricane Center Definitions:

- **Hurricane Watch**: Hurricane conditions (sustained winds of 74 mph or greater) are possible within your area. Because it may not be safe to prepare for a hurricane once winds reach tropical storm force, The NHC issues hurricane watches 48 hours before it anticipates tropical storm-force winds.
- **Hurricane Warning**: Hurricane conditions (sustained winds of 74 mph or greater) are expected somewhere within the specified area. NHC issues a hurricane warning 36 hours in advance of tropical storm-force winds to give you time to complete your preparations. All preparations should be complete. Evacuate immediately if so ordered.
- **Storm Surge Watch**: There is a possibility of life-threatening inundation from rising water moving inland from the shoreline somewhere within the specified area, generally within 48 hours.

AMERICAN OVERSIGHT

- **Extreme Wind Warning**: Extreme sustained winds of a major hurricane (115 mph or greater), usually associated with the eyewall, are expected to begin within an hour. Take immediate shelter in the interior portion of a well-built structure.

To: All Users <AllUsers@sheriffleefl.org>
Subject: Hurricane Milton - Update #17

The 5:00 AM update shows that the track is largely unchanged; however, models still vary from Naples to North of Tampa, and the intensity is forecast to be stronger, well into the Category 4 range.

As of this update, new notifications are as follows:

- The storm has current maximum winds of 100 mph.
- The current forecast for our coast is an 8' - 12' storm surge.
- The storm has slowed somewhat, so the earliest arrival of Tropical Storm force winds is now in the early Wednesday morning hours.

Subject: Hurricane Milton - Update #16

The 11:00 PM update shows little movement in Hurricane Milton's track. Maximum sustained wind speeds are at 90 mph. Model tracks vary widely on the landfall location along Florida's West Coast. The Incident Management Team will continue to monitor and provide timely updates.

As of this update, new notifications are as follows:

Gas Availability:

- RaceTrac - 15820 Winkler Rd. - Pump 15 & 16 for First Responders - Contact is Tracy
- 7-11 - 12750 Cleveland Ave. - Pump 10 & 12 for First Responders - Contact is Vanilla
- RaceTrac - 5991 South Pointe Blvd. - Pump 19 & 20 for First Responders - Contact is Vince
- Mobil/7-11 - 20391 Summerlin Rd. - Pump 6 for First Responders - Contact is Susan
- Circle K - 20021 Summerlin Rd. - Pump 1 for First Responders - Contact is Kyle
- 7-11 - 15021 McGregor Blvd. - Pump 1 for First Responders - Contact is Jessica
- Mobil/7-11 - 17930 N. Tamiami Trl. - Pump 9 & 10 for First Responders - Contact is Joseph
- Circle K - 6381 Bayshore Rd. - Pump 10 for First Responders - Contact is Elizabeth

AMERICAN OVERSIGHT

- Circle K - 19101 N. Tamiami Trl. - Pump 1 & 2 for First Responders - Contact is Christy
- 7-11 - 100 Delaware in Lehigh Acres - Pump 1 & 2 for First Responders.

From: IMT <IMT@sheriffleefl.org>
Sent: Sunday, October 6, 2024 8:57 PM
To: All Users <AllUsers@sheriffleefl.org>
Subject: Hurricane Milton - Update #15

As of the 8:00 PM National Hurricane Center update, Hurricane Milton is still forecast to rapidly intensify into a major hurricane. The center of the track has shifted further south, and is currently near the Bradenton/Sarasota area at landfall.

There is a Flood Watch for the entire area. Rainfall amounts of 5 to 10 inches, with localized totals of up to 15 inches are expected. The timing of the impacts is as early as late Tuesday and continuing into Thursday morning.

A good deal of uncertainty remains with where the storm will make landfall. It should be noted that the average NHC track error at day 3 is around 100 miles.

As of this update, new notifications are as follows:

- Youth Services and Training personnel have received their assignments and will report according to their schedule tomorrow.
- Court Operations and Civil personnel will receive their schedule tomorrow.
- Employee Assistance personnel are done for the evening. They will resume in the morning.
- IMT will be fully activated beginning at 7:00 AM on Monday, with all personnel reporting or receiving their assignments by then.
- For personnel working overtime, please use *Hurricane Milton* as the reason for the overtime.
- The 7-11 Gas station at 103 Leeland Heights Blvd W in Lehigh Acres is open for LEO. If you need gas, use pumps 3,4,5, or 6 only. Jessica is the contact person there.
- The 7-11 at 100 Delaware Rd. in Lehigh Acres is reserving gas for First Responders. use Pump 3 and 4. Sharon is the contact person there.
    - The 7-11 at 18971 Babcock Ranch Rd is holding gas for first responders but deputies must go inside to request pump to be turned on.
    - The 7-11 at Del Prado and N Tamiami (17930 N Tamiami Trl.) is also holding gas for first responders but deputies must go inside to request the pump be turned on.

All personnel should be ready for a full activation at any time. This is a serious, dangerous storm and all personnel should complete preparations as soon as possible. Models vary in intensity, but most predict *at least* a Category 3, so even if we do not receive a direct hit, we can expect hurricane strength winds or wind gusts and a severe storm surge.

Subject: Hurricane Milton - Update #14

AMERICAN OVERSIGHT

As of the 5:00 PM update, Milton is now a hurricane. Hurricane Milton has maximum sustained winds of 85 mph. The track has shifted slightly, and there is a more northeastern path across our area. Even if we do not

receive a direct hit, we will receive tropical storm and hurricane strength winds, significant storm surge, and dangerous flooding from rainfall, likely much greater that what we received from Hurricane Helene. By tonight, all personnel should have their homes and families secured for the storm, and be prepared for a full activation.

Notifications for this update:

- All agency members deemed non essential during an emergency response will be dismissed tomorrow, October 7th, 2024 starting at **noon**. In order to stay home you will need to advise your immediate supervisor and use your accrued time. You may report for regular duty if you chose to do so. As always, use caution when driving in inclement weather and do not attempt to traverse standing water. IMT will continue to send out updates on our response to TS Milton.

- The Emergency Operations Center (EOC) will transition to a Level 1 at 7:00 AM tomorrow. This means that shelters and countywide operations will be run out of the EOC. The Incident Management Team is your contact for agency needs; do not contact the EOC directly.

Subject: Tropical Storm Milton - Update #13

The 2:00 PM Intermediate Update shows that there are no significant changes in the track. The earliest arrival of tropical storm force winds is projected to be 8:00 PM on Tuesday.

These are the stations that are reported to still have gasoline:

- Veronica Shoemaker/Winkler
- Shell station at Hancock and US 41
- BJ's Cape Coral
- 711 Burnt Store and Pine Island has DIESEL only
- Racetrac at South Pointe and College has 93 Only
- Walmart / Murphy's USA in Lehigh
- Santa Barbara and Veterans 7/11

These are the stations that are reported to be currently **out** of gasoline:

- Country Club and Veterans Circle K
- Del Prado Speedway
- Trafalgar and Skyline 7/11
- Rebel US 41 and Del Prado
- 76 at Chiquita and Pine Island
- Walmart/Murphy's Del Prado
- Walmart on Pine Island Road
- Pine Ridge and San Carlos 7/11
- Santa Barbara and Gleason 7/11
- Palm Tree and Cape Coral Pkwy 7/11

AMERICAN OVERSIGHT

- Lee and Gunnery 7/11
- Del Prado Racetrac
- Terry St Circle K
- Lee and Alvin Racetrac
- Joel Citgo
- N Cleveland and Littleton 7/11

Below are the current updated tasks that IMT has been working on since that last updates:

- Logistics members have scheduled pre-storm deliveries for food and beverages - the arrival time is Tuesday morning.
- Logistics members have scheduled post-storm deliveries from vendors.
- Logistics members have scheduled water deliveries.
- Logistics members have created plans for replenishment of supplies for long-term activations.
- Logistics members have arranged for ice deliveries for the event power is lost.
- Purchasing members have made plans for the procurement of potable water.
- Purchasing and Logistics members have scheduled the delivery of portable bathrooms should they be needed.
- HQ will be the central location for cooking needs post-storm for employees at HQ/IMT, Forensics, MCU, Command Staff, Spec Ops, and Staging personnel.
- Precincts and Corrections facilities will be responsible for their meal preparations.

Subject: Tropical Storm Milton - Update #12

The 11:00 AM update shows a small track shift to the south. Although it is still predicted to directly hit the Tampa Bay Area, the move slightly south may bring higher wind speeds and higher storm surge. The storm is expected to quickly intensify and will likely be a major hurricane upon arrival.

All personnel are encouraged to complete preparations for their homes and their families today.

There is still a high degree of uncertainty in both the tracks and the wind speed upon arrival, so the possibility of a direct strike to our area remains. The cone of uncertainty currently covers most of the Florida peninsula. The Incident Management Team (IMT) will keep you informed, and is making preparations to include schedule planning.

Subject: Tropical Storm Milton - Update #8

The 8:00 AM update shows that Milton is forecast to become a Major Category 3 Hurricane before making landfall. Timing, tracks, and intensity are still unpredictable; however, the National Hurricane Center still shows the track toward the Tampa area.

The current forecast is as follows:

- There is a Flood Watch for the entire area through Thursday.
- Rainfall in the amount of 5" to 8", with localized totals up to 12".
- The timing of the impacts is from late Tuesday through early Thursday morning, but it is expected to make landfall on the West Coast on Wednesday.
- There is great uncertainty about where the storm will make landfall. The average Day 4 track error is around 150 miles, so we are still well within a possible landfall range.
- The current earliest wind time arrival is 4 PM on Tuesday, and the most likely arrival time is 2 AM on Wednesday.

Additional notifications for this update include:

- Personnel should maintain at least ½ tank at all times. Due to current fuel runs, please use any opportunity to make sure your agency vehicle stays full at all times.

AMERICAN OVERSIGHT

- Personnel who must fuel and have no other options may use 89 or 93 Octane fuel.
- Select IMT members have been activated. Please send requests to IMT@sheriffleefl.org.
- The select CRU members who were notified individually will report at 10:00 AM to the Headquarters Training Room (1202).
- The asset movement members who were notified individually will report at 10:00 AM to the Headquarters Training Room (1202).
- All units, components, precincts, corrections facilities, and all affected agency departments should fill up all available gas cans and gas tanks.
- Pine Island Fire Department is out of sand. They still have sandbags. They expect to get more sand on Monday.

Sent: Saturday, October 5, 2024 6:19 PM
To: All Users <AllUsers@sheriffleefl.org>
Subject: Tropical Storm Milton - Update #7

With the 5:00 PM update, Tropical Storm Milton is now expected to arrive as a major hurricane. The track has shifted some to the north; however, some model tracks still show direct hits our our area, and we are still in the cone of uncertainty. Please recall from prior storms that although we are not in the direct path, the effects of the hurricane will still affect us heavily, especially in the areas prone to storm surge. Additionally, the peak storm surge from Helene arrived almost 10 hours after the peak winds, so all personnel should be aware of and consider the effects before, during, and after the storm.

The below preparations remain in effect. The only change for this period is:

- Four (4) additional shallow water vessels have been obtained for water rescues.
- Additional High-Water Vehicles have been obtained and will be deployed to the islands for potential high-water rescues.
- The San Carlos Park Fire Department is out of sand and sandbags.

Subject: Tropical Storm Milton - Update #6

As of a 12:25 PM National Hurricane Center update, Tropical Storm Milton has formed. This storm is forecast to strengthen and bring the risk of life-threatening impacts to portions of the West Coast of Florida next week. The maximum winds are currently estimated at 40 mph with higher gusts. Models range in intensity from a Tropical Storm to a Major Hurricane, so there is tremendous unpredictability in the strength upon arrival.

At this time, the Incident Management Team is preparing for the possibility of a major hurricane affecting our area with impacts beginning on Tuesday and a full impact on Wednesday.

All agency personnel are encouraged to prepare as follows:

- All personnel should review their hurricane plans, and prepare their homes and families for the possibility of a hurricane impact in the middle of next week.

AMERICAN OVERSIGHT

- All precincts should secure their mobile assets (decoy vehicles, arrow boards, trailers, ATVs, etc.) beginning on immediately to be completed by 2:00 PM on Monday.
- All trailers should be brought to storage beginning immediately to be completed by 2:00 PM on Monday.
- All personnel should use the remainder of this weekend to prepare for a possible activation. This plan should include three days worth of food, uniforms, and supplies.
- All personnel should use the remainder of this weekend to prepare their uniforms and equipment (including sufficient batteries for equipment) for a possible activation.
- All specialty units should begin bringing their assets back to their storage areas and secure locations. This should be completed by 2:00 PM on Monday.
- All precincts should secure any items that can be moved by the wind to a secure location starting immediately to be completed by 2:00 PM on Monday.
- All Corrections facilities (including Nan's Ranch) should prepare their facilities for a possible hurricane impact next week.

This is new information as of this update:

- The Waterborne Strike Team is on standby for deployment for water rescues.
- JetBlue Stadium, CenturyLink Stadium, the Lee County Gun Range, and the Andrea Lane and Sivan Road storage buildings are prepared to receive assets if needed.
- The Marine Unit is in contact with the IMT to secure the marine assets.
- Known sandbag locations are as follows:
    - Punta Gorda—Free sandbags will be available at 3130 Cooper St., the last entrance on the left by flag poles.
    - Fort Myers Beach—Sand is located off of Gulf Beach Road, and bags are available at Town Hall, 2731 Oak St. (The location will provide service until 4:30 p.m. on Friday and begin Monday at 8:30 a.m.)
    - Fort Myers— South Trail Fire & Rescue will have sand and sandbags available at station 63, 5531 Halifax Ave., Fort Myers—a maximum of 20 bags per household. UPDATE: South Trail Fire & Rescue is currently out of sand. Empty sandbags only are available.
    - Naples— Sandbags will be available at three public park locations: Big Corkscrew Island Regional Park, 810 39th Ave., North Collier Regional Park, 15000 Livingston Road, in the Sun-N-Fun Lagoon parking lot, and at Donna Fiala Eagle Lakes Community Park, 11565 Tamiami Trail East, in the grassy area between the parking lots. The Naples sandbag locations will begin service at 8 a.m. through dusk on Saturday and Sunday.
    - San Carlos Park—Sand and sandbags are available at San Carlos Park Fire District Station 54, located at 16900 Oriole Road. There is a limit of 10 bags per household. Bags can be picked up at the lobby. Bring your own shovel. Be prepared to fill and load your own sandbags. Make sure your vehicle can transport the weight of the sandbags.
    - North Fort Myers—Sandbags will be located at North Fort Myers Parks and Recreation, 2000 N. Recreation Parkway. Sand will be located in the back of the park, next to the county mulch pile. Please bring your own shovel to fill the bags.
    - Matlacha—Sandbags are available for pickup at Station 1, located at 5700 Pine Island Rd, Bokeelia, FL 33922
- IMT personnel are visiting the precincts, and the storage locations to inventory assets to prepare for both securement and post-storm deployment.
- No schedule changes are expected between now and Monday afternoon; however, all personnel should be prepared for schedule adjustments.
- The Agriculture assets are secured on the Olga site.

Subject: Important Update on a possible impending hurricane impacting our area (Update #5)

Team,

IMT has been working on preparation for a potential Hurricane impacting our area early next week. IMT will continue to send out updates regularly so please monitor your email closely. All agency units need to begin preparations of securing their assigned assets and communicate all movement to IMT. Also, update the major asset application on the intranet. We have secured Jet Blue Park as an asset staging area for Marine and other assets. Agency asset storage facilities to include the gun range are preparing to house assets as well. IMT is securing high water vehicles that will be pre-staged at strategic locations i.e., the barrier islands. IMT members will be in the RTIC today coordinating efforts. Agency extension 239-258-3150 is being setup to communicate to IMT staff. Additional updates to follow.

Be prepared and be safe!

Subject: New Caribbean Disturbance - Update #4

The National Hurricane Center 2:00 PM update shows the possibility of development as the low pressure area in the Gulf of Mexico moves slowly eastward or northeastward. A tropical or subtropical depression or storm could form during the early to middle part of next week if the low remains separate from a frontal boundary that is forecast to extend across the Gulf of Mexico. Regardless of development, locally heavy rains could occur over portions of the Florida Peninsula late this weekend into next week. As of this update, the formation chance in the next 48 hours is low at 10 %, and the formation chance through 7 days has increased to 50%.

Current model runs show an arrival time of any potential storm around Wednesday of next week. This represents a slower forward storm speed and later storm arrival than previous model runs, so the timing and impacts are still largely unknown. Regardless of any potential storm, significant rainfall is still expected, and the Incident Management Team will continue to monitor and update all personnel.

Subject: New Caribbean Disturbance - Update #3

The National Hurricane Center has reduced the chance of tropical cyclone development within seven days to 30%. While the system is likely to develop over the Gulf of Mexico late this weekend or early next week, subsequent tropical or subtropical development could be limited by the system's potential interaction with a frontal boundary. Regardless of development, locally heavy rains could occur over portions of the Florida Peninsula next week.

Sent: Tuesday, October 1, 2024 10:35 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance - Update #1

The area of disorganized showers remains at a 40% chance of development. The National Hurricane Center indicates that environmental conditions could support some gradual development of this system, and a tropical depression could form towards the end of this week or this weekend while it moves generally northwestward over the northwestern Caribbean Sea and into the Gulf of Mexico. As of this time, there are no changes, but some long range models show an increased chance of this disturbance affecting our area.

From: IMT <IMT@sheriffleefl.org>
Sent: Monday, September 30, 2024 8:11 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance

The Incident Management Team is monitoring a new area of disorganized showers and thunderstorms over the western Caribbean Sea. The National Weather Center states that the system has a medium chance (40%) of developing towards the middle to latter part of the week as it moves northwestward into the Gulf of Mexico. As this disturbance moves into the gulf, increasing moisture is expected over the Florida Peninsula and elevated rain chances are anticipated from Friday through the weekend, and possibly into early next week.

Unfortunately, long range models show the possibility of direct impacts for Southwest Florida; however, It is too early to determine what, if any, tropical specific impacts can be expected.

The Incident Management Team will continue to monitor the storm, and will continue to provide updates through this very active part of the hurricane season.

Finalize Your Plan for Hurricane Milton

Lee County Government is actively monitoring Hurricane Milton and preparing for severe weather impacts. A live noon update was provided by Lee County Commissioners, Lee County Public Safety Director Benjamin Abes and other county officials. Watch the ***live update here***.

AMERICAN OVERSIGHT

Milton is a powerful Category 4 Major Hurricane. Residents need to be aware that the forecast includes:

- Sustained tropical storm-force winds, and sustained hurricane-force winds at the peak of our impacts
- Winds will start to impact our area overnight, including gusts to tropical storm force
- Storm surge of 6 to 10 feet.
- Everyone needs to be to their shelter-in-place location today.
- Do not plan on driving on Wednesday.

The Emergency Operations Center is fully activated, there is a State of Local Emergency in effect and mandatory evacuation orders are in effect.

- The county on Monday ordered a mandatory evacuation of Zone A and B, which includes more than 416,000 residents.
- Zone C is not being evacuated currently.
- Everyone in Zones A and B should move to a safe place by 10 p.m. today and shelter in place all of Wednesday.

Lee County has 13 emergency shelters open. Residents are encouraged to make more comfortable arrangements by staying with a friend or family member outside of the evacuation zones. Residents should plan to be in a safe location outside of the evacuation zones by 10 p.m. today (Tuesday, Oct. 8). For a list of open shelters and information, visit ***leegov.com/storm***.

Transportation is available to shelters:

- LeeTran - go to any LeeTran stop and advise the driver that you are going to an open shelter. They will take you to a transfer center, and another bus can get you to a shelter. LeeTran staff is there to direct passengers.
- LeeTran is only transporting off-island on Fort Myers Beach.
- Uber - Florida Division of Emergency Management has partnered with Uber to provide Floridians free rides to and from shelters in counties evacuating for Hurricane Milton. To get a ride, use promo code MILTONRELIEF in the Uber app.
- If you require additional assistance, you can call the Emergency Information Hotline at 211, or 239 433-3900.

If you're heading to one of Lee County's shelters, you need to bring your Emergency Supply Kit.
Include a three-day supply of food, water and any medications you need. Food should be shelf stable. No access to electricity or refrigeration will be available. You might consider items to make yourself more comfortable as well.

Pets are allowed in all Lee County shelters, but you're responsible for bringing anything your pets will need:

- Collar, leash and ID tags.
- Photo of your pet in case you become separated.
- Bring a crate or pet carrier.
- Water, food and clean-up supplies, including waste bags for dogs and litter box with litter for cats.

Curfew

- The Town of Fort Myers Beach and City of Sanibel have announced curfews beginning at 10 p.m. today.
- Lee County has not yet announced a curfew. The county is communicating and coordinating with municipalities and law enforcement partners and will make a decision when appropriate in the near future.

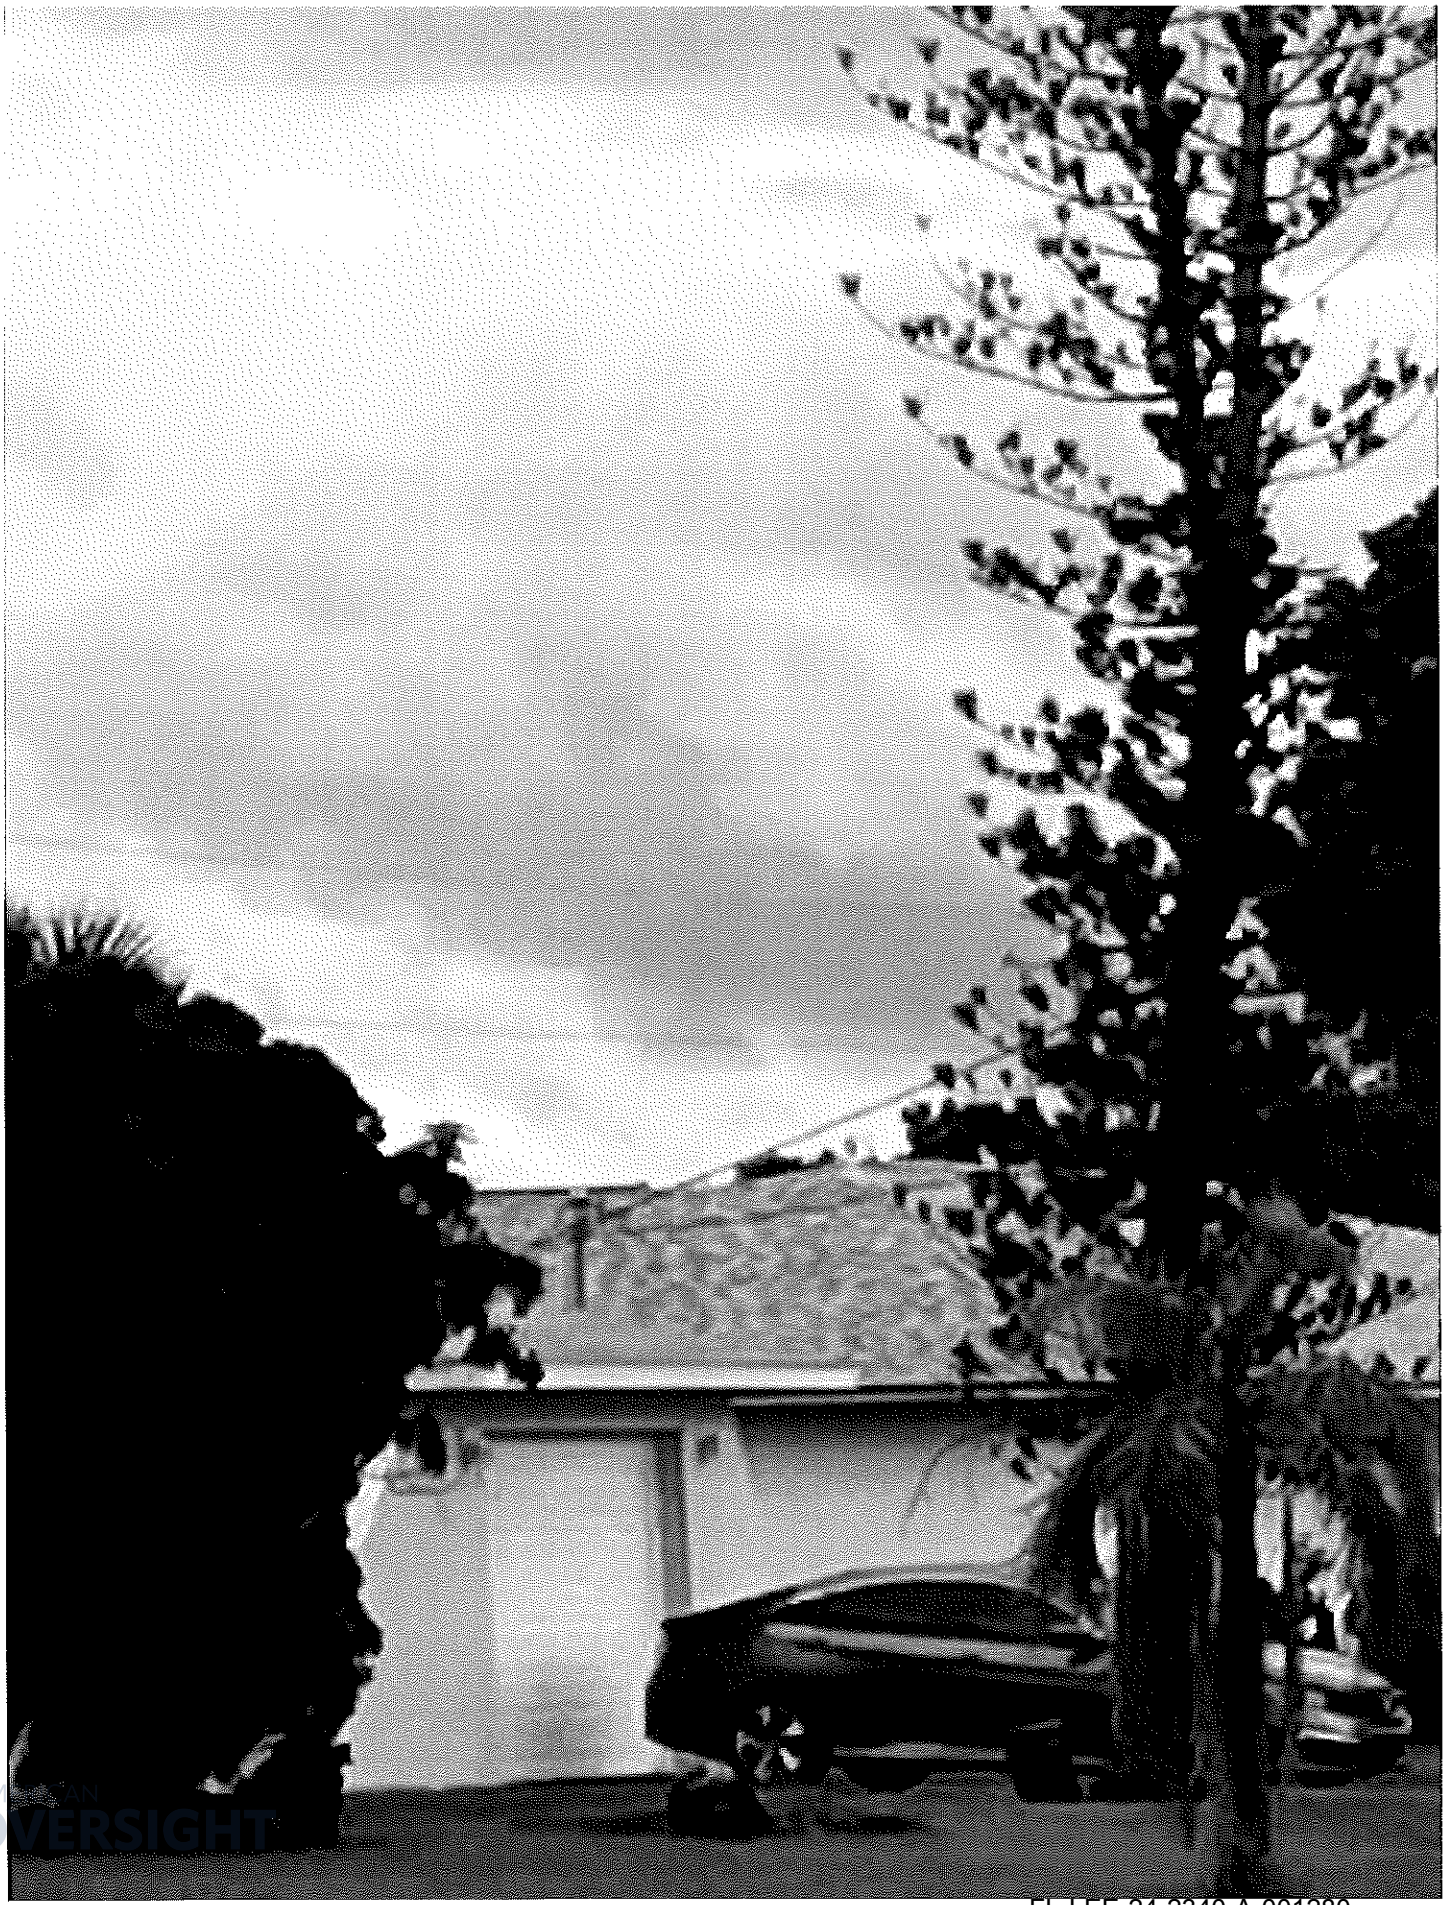
Good Afternoon,

Please see the attached past and future schedule for the team.

Today, 10/08/2024, the team completed the following:

Worked at Nan's Ranch and the Core for Hurricane Milton preparations.
Worked with Marine unit for asset movement and staging.
Responded to a request for assistance by a citizen for debris removal.



The team remains ready for deployment for any urgent needs the agency may have with storm preparations and/or storm cleanup.

I hope you all have a wonderful night and STAY SAFE!!!

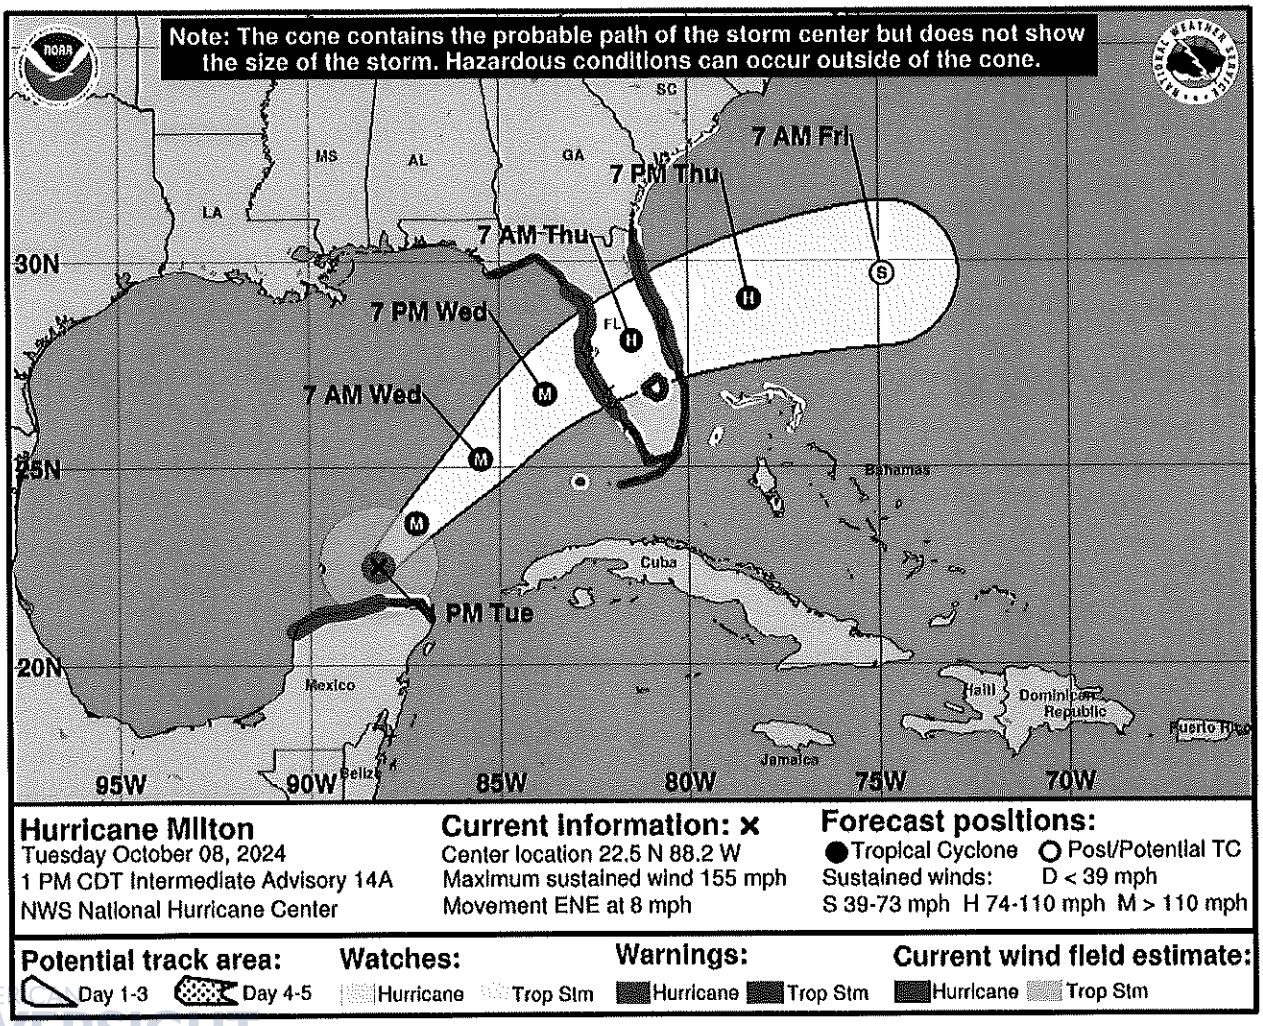
Subject: Hurricane Milton - Update #28

As of this update, the latest storm information is as follows:

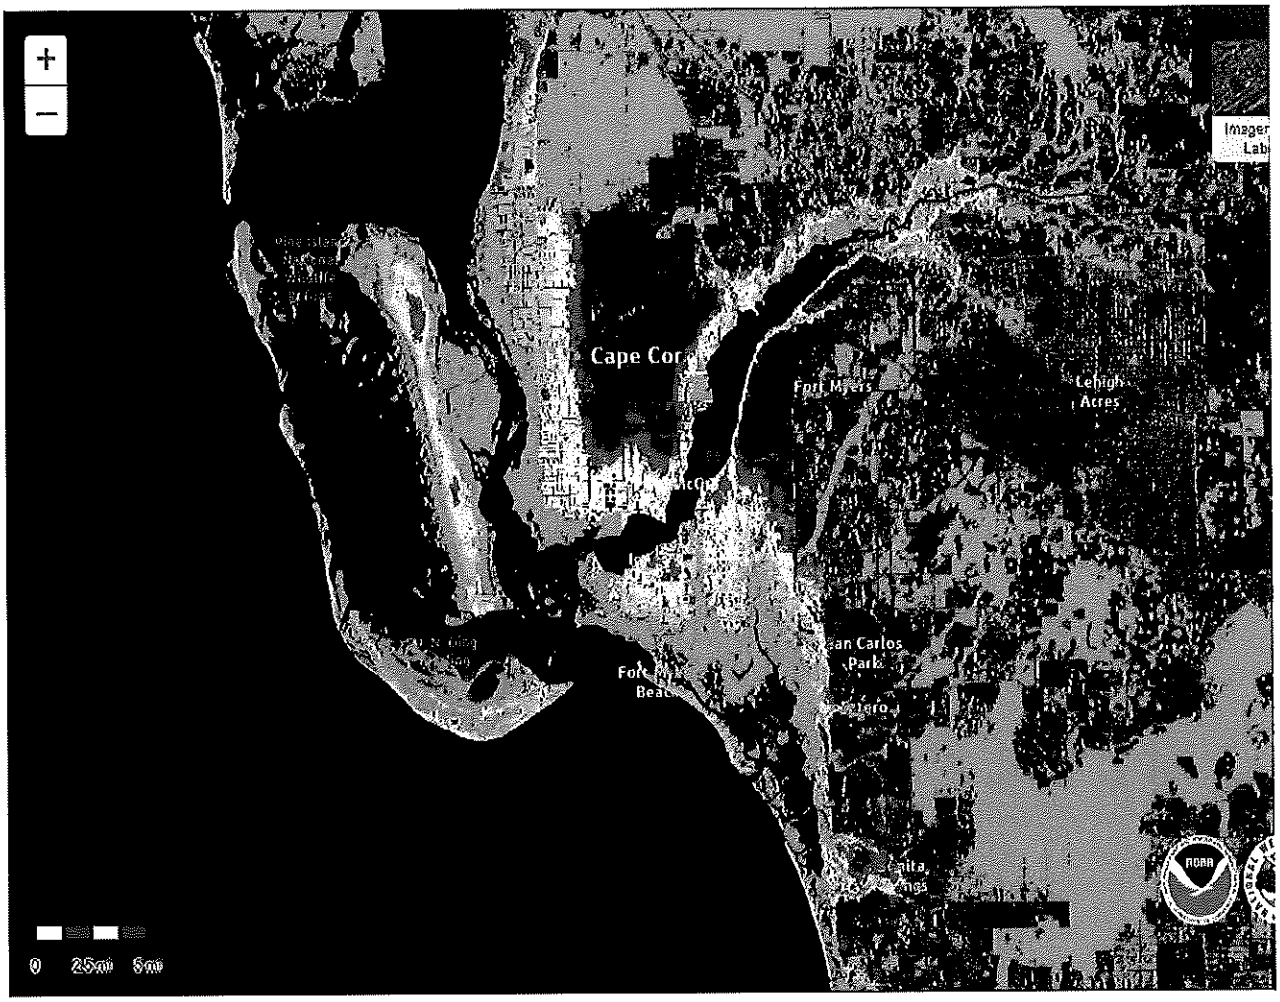
- The current track continues to be a worst case scenario situation for the Tampa Bay region southward to Sarasota.
- The track for Hurricane Milton is still toward the lower Tampa Bay/Bradenton/Sarasota area.
- Rainfall amounts of 5 to 12 inches, with localized totals up to 18 inches are expected. Many rivers are now forecast to go into moderate to major flood stage with a few possibly reaching record levels.
- The current most likely arrival time in Lee County for tropical-storm-force winds is 3:00 PM on Wednesday, with a most likely departure time of 9:00 AM on Thursday.
- Movement is ENE at 8 mph.
- The maximum sustained wind speed has increased to 155 mph (Category 4; Category 5 starts at 157 mph).
- The minimum central pressure based on dropsonde data is 923 mb.
- We are still under a Storm Surge Warning.
- We are still under a Hurricane Warning.
- Hurricane-force winds extend outward up to 30 miles.
- Tropical-storm-force winds extend outward up to 105 miles.
- A 6' to 10' storm surge is still expected along the Lee County coast.
- Surf swells generated by Milton are expected to continue to affect much of the Gulf Coast over the next day or two, and are likely to cause life-threatening surf and rip current conditions.

As of this update, new notifications are as follows:



- Additional documentation for welfare checks (17w) will be required. Supervisors will be disseminating the information to the affected personnel.
- All Marine assets are secured at JetBlue and the 4th Precinct, and the vessel assets that will be deployed with the Marine Unit will be secured at LeeTran.
- Shelters:
    - Alico Arena - 54
    - Dunbar High School: Occupancy 174, FMPD Covering Shelter
    - Estero Recreation Center: Registered - 662, At Shelter - 217
    - Hertz Arena: At Shelter - 212
    - Island Coast High School: At Shelter - 311

AMERICAN OVERSIGHT



- Oak Hammock Middle: At Shelter - 273
- Ray Pottorf Elementary: Occupancy is 62
- Tortuga Elementary: At Shelter - 60
- Varsity Lakes Middle: At Shelter - 0
- Gateway High School: At Shelter - 17
- Harns Marsh Elementary: At Shelter - 2
- Harns Marsh Middle: At Shelter - 53
- East Lee County High School: At Shelter - 53
- SOPU Shelter: At Shelter - 2

Gas Station Updates:

- Circle K at Buckingham and Old Olga has gas for LEO at Pumps 1 and 2. Will be open until at least 10pm.
- RaceTrac at SR 80/ SR 31 is out of gas. Unknown if getting shipment today.
- RaceTrac at Six Mile and Michael G Rippe is out of fuel.
- RaceTrac at Daniels/Powers Ct has gas.
- 7-11 at Metro/Daniels is out of gas.
- Rebel at Metro/Six Mile is out of gas.
- WaWa at College and 41 just received gas.

Subject: Hurricane Milton - Update #26

As of this update, the latest storm information is as follows:

- The current track for Hurricane Milton continues to be a worst-case scenario for the Tampa Bay region southward to Sarasota. It is forecast to make landfall in Florida Wednesday night.
- The current maximum sustained winds are 145 mph. The movement is ENE at 12 mph.
- There is a Hurricane Warning in effect for the entire area. A Category 3 is forecast at landfall, with the expanding wind field still expected.
- The Storm Surge estimate is expected to be 6' - 10'. By comparison, the surge during Hurricane Helene was measured at 5.12 feet above MHHW and was measured at 11:36 PM, *almost 10 hours after* a peak

AMERICAN OVERSIGHT

wind gust of 63 mph taken at Tarpon Point at 1:51 PM. The peak water levels estimated elsewhere along coastal Lee County ranged from 2' to 5' above MHHW.

- There is a 97% chance that the earliest arrival time of tropical-storm-strength winds is 8:00 AM on Wednesday. The likely arrival time for those winds is 12:00 PM on Wednesday. The likely departure time with this update is 7:00 AM on Thursday, with the latest departure time being 12:00 PM on Thursday.
- There is a Flood Watch for the entire area.
- We are still under a Hurricane Warning.
- Hurricane-force winds extend out to 30 miles from the center, and tropical-storm-force winds extend outward up to 105 miles.
- The minimum central pressure based on aircraft dropsonde data is 929 mb.

As of this update, new notifications are as follows:

- Precinct supervisors are finalizing employee shelter arrangements should the need arise.
- VERT (Volunteer Emergency Response Team) members from the Civilian Support Unit (CSU) are on standby to assist with post-storm deployments.
- Florida DOT is reinforcing the Sanibel Causeway with armor stone near the toll plaza and securing the barges and other equipment. Intermittent road closures for equipment movement are being performed by FLDOT.
- Seventeen (17) nursing facilities are closed in Lee County.
- EOC passed out nearly 100,000 sand bags and is out of bags.
- Sand deliveries have stopped and no more sand deliveries are planned by EOC.
- Three county shelters are open and operating:
    - Island Coast HS Shelter has approximately 71 present and 446 registered.
    - Estero Rec Center has approximately 114 present and 132 registered.
    - Dunbar High School is being staffed by Fort Myers Police Department personnel.

Gas Station Updates:

- Loves Travel Station in North Fort Myers is open for First Responders only at this time.
- 7-11 at 24530 S Tamiami Trl has fuel. Pump 2 is for LEO.
- 7-11 at 24651 S Tamiami Trl has fuel. Pump 4 for LEO.
- 7-11/Sunoco at 27990 is out of fuel.
- 7-11/Mobile at 28175 S Tamiami Trl has fuel. Pumps 1 & 2 for LEO.
- 7-11 at 26975 Old 41 Road has fuel and will reserve ALL pumps for LEO.
- Circle K at 10460 Bonita Beach Rd (Old 41 & Bonita Beach Road) has fuel. Pump 1 & 3 for LEO.
- Racetrack at 13050 Bonita Beach Rd (Bonita Beach Road & Bonita Grande) has fuel. Pumps 17 & 18 for LEO.
- RaceTrac at 22350 S Tamiami Trl has other grades of fuel, but is out of regular. Pump 18 for LEO.
- 7-11 at 21850 S Tamiami Trl has fuel. Pump 1 for LEO.
- Rebel at 12030 Bonita Beach Rd SE, will reserve fuel for LEO.
- 7-11 at Terminal Access has fuel. Pumps 9 & 10 for LEO. (must go inside and let the clerk know to turn on the pump)
- 7-11 at 12011 Gateway Blvd has fuel. Pump 2 for LEO. (must go inside and let the clerk know to turn on the pump)
- 7-11 at 100 Delaware Rd. in Lehigh Acres has two pumps reserved for LEO and EMS.

AMERICAN OVERSIGHT

Definitions:

- MHHW - Mean Higher High Water (MHHW) is the average level of the highest tide for each day computed over a 19-year period.
- Dropsonde - GPS dropsondes measure vertical profiles of atmospheric temperature, pressure, humidity, and wind speed as they fall from the aircraft to the surface. They are equipped with a small parachute that slows their descent and maintains vertical orientation. The dropsonde transmits data by radio four times a second to the aircraft until it reaches the surface of the ocean.

AMERICAN OVERSIGHT

As of this update, the latest storm information is as follows:

- The storm track has shifted north slightly. The movement is not far enough to make a difference in our impacts.
- The earliest reasonable arrival time of tropical-storm-force winds is early Wednesday morning.

As of this update, new notifications are as follows:

- The Hurricane Hotline is now active. Corrections personnel should call 239-477-1258, Law Enforcement personnel should call 239-477-1259, and Communications personnel should call 239-477-1260. Please save these numbers now in your phone. This hotline provides updates for personnel without access to e-mail. For now, all supervisors should relay all pertinent information to their personnel who do not have access to e-mail.
- Mandatory evacuations have been issued for the Town of Fort Myers Beach. Residents are encouraged to evacuate before 3:00 PM today.
- LeeTran at noon today, Monday, Oct. 7, will stop running routes onto Fort Myers Beach. All LeeTran services will convert to off-island transit only. This is to assist with the Town of Fort Myers Beach's request for residents to leave the island.
- Lee County Utilities will shut off water to Fort Myers Beach at noon Tuesday, Oct. 8. This is a precautionary measure to protect infrastructure. It was also implemented during 2022's Hurricane Ian.
- Lee County Sheriff's Office employees are currently in the field distributing sand and sand bags to locations throughout the county.

Gas Station Updates:

- 7-11 at SR 31/SR 80 received a fuel shipment this morning. Pumps 11 and 12 are for LEO. Make contact inside for pumps to be turned on.
- 7-11 at Billy's Creek is out of gas. Expecting shipment today. Will set aside fuel for LEO at Pump #1. Make contact with employee to have pump turned on.
- RaceTrac SR 31/ SR 80 has gas but expect to be out by noon and closed. Next shipment not expected until after the storm. They do not have a pump set aside for LEO.
- Circle K at SR 80/ Old Olga has fixed the pump and have a full tank for LEO. Make contact with employee for which pump to use.
- Sunoco at SR 80 and Buckingham is out of gas but requested shipment. Will pump remaining for LEO. Make contact with employee inside for pump to be turned on.
- Rebel at 6 Mile/Metro currently has 8,000 gallons and will stop pumping at 800 gallons. They do not set aside gas for us. Unknown next shipment.
- RaceTrac at 6 Mile/Michael G Rippe is out of gas but requested shipment. They will set up a Pump #3 for LEO use when they get gas. Make contact with employee for pump to be turned on.
- Race Trac at Daniels/Powers Ct is out of gas. Shipment has been requested. Will set up pump for LEO use. In the past it has been Pump 18.
- 7-11 Daniels/Palomino is out of gas. Expecting shipment today and will contact me when they receive it. Pump 10 will be set aside for LEO.
- Rebel at 9281 Daniels Pkwy is out of gas. Requested shipment for today. Pump 1 will be set aside for LEO. Go inside to have pump turned on.
- Chevron at 13031 Metro is out of gas. Not expecting shipment. Will set a pump aside for LEO if they get gas.
- Circle K at Metro and Crystal is close to running out of gas and starting to shut pumps down. They are setting aside pumps 5-8 for LEO. Meet with employee for which pump to use.

Subject: Hurricane Milton - Update #18

As of the 8:00 AM update, a Hurricane Watch remains in effect for our area.

The IMT Main Number is 239-258-3150 or e-mail at IMT@sheriffleefl.org.

As of this update, the latest storm information is as follows:

- Hurricane Milton is now a major hurricane, with sustained wind speeds of 125 mph.
- Hurricane Milton is expected to have winds of 145 mph at landfall, with some expansion of hurricane-strength winds.
- The model spread in the forecast track remains high, with the entire area within the cone.
- Movement is ESE at 8 mph.
- The current earliest arrival of tropical-storm-strength winds is 1:00 AM on Wednesday, with a likely arrival time at 8:00 AM. This is the arrival of tropical-storm-force winds, not the arrival of the actual storm.
- The storm surge estimate is 5' to 10' for Lee County. It is expected to increase throughout the day on Wednesday and peak early Thursday.
- We are still in a Hurricane Watch, a Storm Surge Watch, and a Flood Watch.
- Many rivers are already in or forecast to go into flood stage.
- The main threat for tornadoes is late Tuesday into Wednesday night.
- Confidence is low on the exact track of the system, with the entire area within the cone. It should be noted that that 72 hour average track error is 100 miles.

As of this updates, new notifications are as follows:

- All personnel must notify IMT of all asset movements and personnel changes.
- Estero Fire Station #54 at Oriole and Alico just got sand delivered.
- Pine Island Fire has sand, but no sandbags.
- North Fort Myers Recreations Center has sand but no sandbags.
- Corrections Transport vehicles have received their staging location and should be in place by 12:00 PM.
- Academy recruits and Youth Services deputies have been deployed to the field.

National Hurricane Center Definitions:

- **Hurricane Watch**: Hurricane conditions (sustained winds of 74 mph or greater) are possible within your area. Because it may not be safe to prepare for a hurricane once winds reach tropical storm force, The NHC issues hurricane watches 48 hours before it anticipates tropical storm-force winds.
- **Hurricane Warning**: Hurricane conditions (sustained winds of 74 mph or greater) are expected somewhere within the specified area. NHC issues a hurricane warning 36 hours in advance of tropical storm-force winds to give you time to complete your preparations. All preparations should be complete. Evacuate immediately if so ordered.
- **Storm Surge Watch**: There is a possibility of life-threatening inundation from rising water moving inland from the shoreline somewhere within the specified area, generally within 48 hours.

AMERICAN OVERSIGHT

- **Extreme Wind Warning**: Extreme sustained winds of a major hurricane (115 mph or greater), usually associated with the eyewall, are expected to begin within an hour. Take immediate shelter in the interior portion of a well-built structure.

To: All Users <AllUsers@sheriffleefl.org>
Subject: Hurricane Milton - Update #17

The 5:00 AM update shows that the track is largely unchanged; however, models still vary from Naples to North of Tampa, and the intensity is forecast to be stronger, well into the Category 4 range.

As of this update, new notifications are as follows:

- The storm has current maximum winds of 100 mph.
- The current forecast for our coast is an 8' - 12' storm surge.
- The storm has slowed somewhat, so the earliest arrival of Tropical Storm force winds is now in the early Wednesday morning hours.

Subject: Hurricane Milton - Update #15

As of the 8:00 PM National Hurricane Center update, Hurricane Milton is still forecast to rapidly intensify into a major hurricane. The center of the track has shifted further south, and is currently near the Bradenton/Sarasota area at landfall.

There is a Flood Watch for the entire area. Rainfall amounts of 5 to 10 inches, with localized totals of up to 15 inches are expected. The timing of the impacts is as early as late Tuesday and continuing into Thursday morning.

A good deal of uncertainty remains with where the storm will make landfall. It should be noted that the average NHC track error at day 3 is around 100 miles.

As of this update, new notifications are as follows:

- Youth Services and Training personnel have received their assignments and will report according to their schedule tomorrow.
- Court Operations and Civil personnel will receive their schedule tomorrow.
- Employee Assistance personnel are done for the evening. They will resume in the morning.
- IMT will be fully activated beginning at 7:00 AM on Monday, with all personnel reporting or receiving their assignments by then.
- For personnel working overtime, please use *Hurricane Milton* as the reason for the overtime.
- The 7-11 Gas station at 103 Leeland Heights Blvd W in Lehigh Acres is open for LEO. If you need gas, use pumps 3,4,5, or 6 only. Jessica is the contact person there.
- The 7-11 at 100 Delaware Rd. in Lehigh Acres is reserving gas for First Responders. use Pump 3 and 4. Sharon is the contact person there.
    - The 7-11 at 18971 Babcock Ranch Rd is holding gas for first responders but deputies must go inside to request pump to be turned on.
    - The 7-11 at Del Prado and N Tamiami (17930 N Tamiami Trl.) is also holding gas for first responders but deputies must go inside to request the pump be turned on.

All personnel should be ready for a full activation at any time. This is a serious, dangerous storm and all personnel should complete preparations as soon as possible. Models vary in intensity, but most predict *at least* a Category 3, so even if we do not receive a direct hit, we can expect hurricane strength winds or wind gusts and a severe storm surge.

Subject: Hurricane Milton - Update #14

AMERICAN OVERSIGHT

As of the 5:00 PM update, Milton is now a hurricane. Hurricane Milton has maximum sustained winds of 85 mph. The track has shifted slightly, and there is a more northeastern path across our area. Even if we do not

receive a direct hit, we will receive tropical storm and hurricane strength winds, significant storm surge, and dangerous flooding from rainfall, likely much greater that what we received from Hurricane Helene. By tonight, all personnel should have their homes and families secured for the storm, and be prepared for a full activation.

Notifications for this update:

- All agency members deemed non essential during an emergency response will be dismissed tomorrow, October 7th, 2024 starting at **noon**. In order to stay home you will need to advise your immediate supervisor and use your accrued time. You may report for regular duty if you chose to do so. As always, use caution when driving in inclement weather and do not attempt to traverse standing water. IMT will continue to send out updates on our response to TS Milton.

- The Emergency Operations Center (EOC) will transition to a Level 1 at 7:00 AM tomorrow. This means that shelters and countywide operations will be run out of the EOC. The Incident Management Team is your contact for agency needs; do not contact the EOC directly.

Subject: Tropical Storm Milton - Update #13

The 2:00 PM Intermediate Update shows that there are no significant changes in the track. The earliest arrival of tropical storm force winds is projected to be 8:00 PM on Tuesday.

These are the stations that are reported to still have gasoline:

- Veronica Shoemaker/Winkler
- Shell station at Hancock and US 41
- BJ's Cape Coral
- 711 Burnt Store and Pine Island has DIESEL only
- Racetrac at South Pointe and College has 93 Only
- Walmart / Murphy's USA in Lehigh
- Santa Barbara and Veterans 7/11

These are the stations that are reported to be currently **out** of gasoline:

- Country Club and Veterans Circle K
- Del Prado Speedway
- Trafalgar and Skyline 7/11
- Rebel US 41 and Del Prado
- 76 at Chiquita and Pine Island
- Walmart/Murphy's Del Prado
- Walmart on Pine Island Road
- Pine Ridge and San Carlos 7/11
- Santa Barbara and Gleason 7/11
- Palm Tree and Cape Coral Pkwy 7/11

AMERICAN OVERSIGHT

- Lee and Gunnery 7/11
- Del Prado Racetrac
- Terry St Circle K
- Lee and Alvin Racetrac
- Joel Citgo
- N Cleveland and Littleton 7/11

Below are the current updated tasks that IMT has been working on since that last updates:

- Logistics members have scheduled pre-storm deliveries for food and beverages - the arrival time is Tuesday morning.
- Logistics members have scheduled post-storm deliveries from vendors.
- Logistics members have scheduled water deliveries.
- Logistics members have created plans for replenishment of supplies for long-term activations.
- Logistics members have arranged for ice deliveries for the event power is lost.
- Purchasing members have made plans for the procurement of potable water.
- Purchasing and Logistics members have scheduled the delivery of portable bathrooms should they be needed.
- HQ will be the central location for cooking needs post-storm for employees at HQ/IMT, Forensics, MCU, Command Staff, Spec Ops, and Staging personnel.
- Precincts and Corrections facilities will be responsible for their meal preparations.

Subject: Tropical Storm Milton - Update #12

The 11:00 AM update shows a small track shift to the south. Although it is still predicted to directly hit the Tampa Bay Area, the move slightly south may bring higher wind speeds and higher storm surge. The storm is expected to quickly intensify and will likely be a major hurricane upon arrival.

All personnel are encouraged to complete preparations for their homes and their families today.

There is still a high degree of uncertainty in both the tracks and the wind speed upon arrival, so the possibility of a direct strike to our area remains. The cone of uncertainty currently covers most of the Florida peninsula. The Incident Management Team (IMT) will keep you informed, and is making preparations to include schedule planning.

Subject: Tropical Storm Milton - Update #8

The 8:00 AM update shows that Milton is forecast to become a Major Category 3 Hurricane before making landfall. Timing, tracks, and intensity are still unpredictable; however, the National Hurricane Center still shows the track toward the Tampa area.

The current forecast is as follows:

- There is a Flood Watch for the entire area through Thursday.
- Rainfall in the amount of 5" to 8", with localized totals up to 12".
- The timing of the impacts is from late Tuesday through early Thursday morning, but it is expected to make landfall on the West Coast on Wednesday.
- There is great uncertainty about where the storm will make landfall. The average Day 4 track error is around 150 miles, so we are still well within a possible landfall range.
- The current earliest wind time arrival is 4 PM on Tuesday, and the most likely arrival time is 2 AM on Wednesday.

Additional notifications for this update include:

- Personnel should maintain at least ½ tank at all times. Due to current fuel runs, please use any opportunity to make sure your agency vehicle stays full at all times.

AMERICAN OVERSIGHT

- Personnel who must fuel and have no other options may use 89 or 93 Octane fuel.
- Select IMT members have been activated. Please send requests to IMT@sheriffleefl.org.
- The select CRU members who were notified individually will report at 10:00 AM to the Headquarters Training Room (1202).
- The asset movement members who were notified individually will report at 10:00 AM to the Headquarters Training Room (1202).
- All units, components, precincts, corrections facilities, and all affected agency departments should fill up all available gas cans and gas tanks.
- Pine Island Fire Department is out of sand. They still have sandbags. They expect to get more sand on Monday.

Subject: Tropical Storm Milton - Update #7

With the 5:00 PM update, Tropical Storm Milton is now expected to arrive as a major hurricane. The track has shifted some to the north; however, some model tracks still show direct hits our our area, and we are still in the cone of uncertainty. Please recall from prior storms that although we are not in the direct path, the effects of the hurricane will still affect us heavily, especially in the areas prone to storm surge. Additionally, the peak storm surge from Helene arrived almost 10 hours after the peak winds, so all personnel should be aware of and consider the effects before, during, and after the storm.

The below preparations remain in effect. The only change for this period is:

- Four (4) additional shallow water vessels have been obtained for water rescues.
- Additional High-Water Vehicles have been obtained and will be deployed to the islands for potential high-water rescues.
- The San Carlos Park Fire Department is out of sand and sandbags.

Subject: Tropical Storm Milton - Update #6

As of a 12:25 PM National Hurricane Center update, Tropical Storm Milton has formed. This storm is forecast to strengthen and bring the risk of life-threatening impacts to portions of the West Coast of Florida next week. The maximum winds are currently estimated at 40 mph with higher gusts. Models range in intensity from a Tropical Storm to a Major Hurricane, so there is tremendous unpredictability in the strength upon arrival.

At this time, the Incident Management Team is preparing for the possibility of a major hurricane affecting our area with impacts beginning on Tuesday and a full impact on Wednesday.

All agency personnel are encouraged to prepare as follows:

- All personnel should review their hurricane plans, and prepare their homes and families for the possibility of a hurricane impact in the middle of next week.

AMERICAN OVERSIGHT

- All precincts should secure their mobile assets (decoy vehicles, arrow boards, trailers, ATVs, etc.) beginning on immediately to be completed by 2:00 PM on Monday.
- All trailers should be brought to storage beginning immediately to be completed by 2:00 PM on Monday.
- All personnel should use the remainder of this weekend to prepare for a possible activation. This plan should include three days worth of food, uniforms, and supplies.
- All personnel should use the remainder of this weekend to prepare their uniforms and equipment (including sufficient batteries for equipment) for a possible activation.
- All specialty units should begin bringing their assets back to their storage areas and secure locations. This should be completed by 2:00 PM on Monday.
- All precincts should secure any items that can be moved by the wind to a secure location starting immediately to be completed by 2:00 PM on Monday.
- All Corrections facilities (including Nan's Ranch) should prepare their facilities for a possible hurricane impact next week.

This is new information as of this update:

- The Waterborne Strike Team is on standby for deployment for water rescues.
- JetBlue Stadium, CenturyLink Stadium, the Lee County Gun Range, and the Andrea Lane and Sivan Road storage buildings are prepared to receive assets if needed.
- The Marine Unit is in contact with the IMT to secure the marine assets.
- Known sandbag locations are as follows:
    - Punta Gorda—Free sandbags will be available at 3130 Cooper St., the last entrance on the left by flag poles.
    - Fort Myers Beach—Sand is located off of Gulf Beach Road, and bags are available at Town Hall, 2731 Oak St. (The location will provide service until 4:30 p.m. on Friday and begin Monday at 8:30 a.m.)
    - Fort Myers— South Trail Fire & Rescue will have sand and sandbags available at station 63, 5531 Halifax Ave., Fort Myers—a maximum of 20 bags per household. UPDATE: South Trail Fire & Rescue is currently out of sand. Empty sandbags only are available.
    - Naples— Sandbags will be available at three public park locations: Big Corkscrew Island Regional Park, 810 39th Ave., North Collier Regional Park, 15000 Livingston Road, in the Sun-N-Fun Lagoon parking lot, and at Donna Fiala Eagle Lakes Community Park, 11565 Tamiami Trail East, in the grassy area between the parking lots. The Naples sandbag locations will begin service at 8 a.m. through dusk on Saturday and Sunday.
    - San Carlos Park—Sand and sandbags are available at San Carlos Park Fire District Station 54, located at 16900 Oriole Road. There is a limit of 10 bags per household. Bags can be picked up at the lobby. Bring your own shovel. Be prepared to fill and load your own sandbags. Make sure your vehicle can transport the weight of the sandbags.
    - North Fort Myers—Sandbags will be located at North Fort Myers Parks and Recreation, 2000 N. Recreation Parkway. Sand will be located in the back of the park, next to the county mulch pile. Please bring your own shovel to fill the bags.
    - Matlacha—Sandbags are available for pickup at Station 1, located at 5700 Pine Island Rd, Bokeelia, FL 33922
- IMT personnel are visiting the precincts, and the storage locations to inventory assets to prepare for both securement and post-storm deployment.
- No schedule changes are expected between now and Monday afternoon; however, all personnel should be prepared for schedule adjustments.
- The Agriculture assets are secured on the Olga site.

Subject: Important Update on a possible impending hurricane impacting our area (Update #5)

Team,

IMT has been working on preparation for a potential Hurricane impacting our area early next week. IMT will continue to send out updates regularly so please monitor your email closely. All agency units need to begin preparations of securing their assigned assets and communicate all movement to IMT. Also, update the major asset application on the intranet. We have secured Jet Blue Park as an asset staging area for Marine and other assets. Agency asset storage facilities to include the gun range are preparing to house assets as well. IMT is securing high water vehicles that will be pre-staged at strategic locations i.e., the barrier islands. IMT members will be in the RTIC today coordinating efforts. Agency extension 239-258-3150 is being setup to communicate to IMT staff. Additional updates to follow.

Be prepared and be safe!

Subject: New Caribbean Disturbance - Update #4

The National Hurricane Center 2:00 PM update shows the possibility of development as the low pressure area in the Gulf of Mexico moves slowly eastward or northeastward. A tropical or subtropical depression or storm could form during the early to middle part of next week if the low remains separate from a frontal boundary that is forecast to extend across the Gulf of Mexico. Regardless of development, locally heavy rains could occur over portions of the Florida Peninsula late this weekend into next week. As of this update, the formation chance in the next 48 hours is low at 10 %, and the formation chance through 7 days has increased to 50%.

Current model runs show an arrival time of any potential storm around Wednesday of next week. This represents a slower forward storm speed and later storm arrival than previous model runs, so the timing and impacts are still largely unknown. Regardless of any potential storm, significant rainfall is still expected, and the Incident Management Team will continue to monitor and update all personnel.

Sent: Thursday, October 3, 2024 9:56 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance - Update #3

The National Hurricane Center has reduced the chance of tropical cyclone development within seven days to 30%. While the system is likely to develop over the Gulf of Mexico late this weekend or early next week, subsequent tropical or subtropical development could be limited by the system's potential interaction with a frontal boundary. Regardless of development, locally heavy rains could occur over portions of the Florida Peninsula next week.

Subject: New Caribbean Disturbance - Update #1

The area of disorganized showers remains at a 40% chance of development. The National Hurricane Center indicates that environmental conditions could support some gradual development of this system, and a tropical depression could form towards the end of this week or this weekend while it moves generally northwestward over the northwestern Caribbean Sea and into the Gulf of Mexico. As of this time, there are no changes, but some long range models show an increased chance of this disturbance affecting our area.

From: IMT <IMT@sheriffleefl.org>
Sent: Monday, September 30, 2024 8:11 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance

The Incident Management Team is monitoring a new area of disorganized showers and thunderstorms over the western Caribbean Sea. The National Weather Center states that the system has a medium chance (40%) of developing towards the middle to latter part of the week as it moves northwestward into the Gulf of Mexico. As this disturbance moves into the gulf, increasing moisture is expected over the Florida Peninsula and elevated rain chances are anticipated from Friday through the weekend, and possibly into early next week.

Unfortunately, long range models show the possibility of direct impacts for Southwest Florida; however, It is too early to determine what, if any, tropical specific impacts can be expected.

The Incident Management Team will continue to monitor the storm, and will continue to provide updates through this very active part of the hurricane season.

Talking Points:

Hurricane Milton

Jail Updates:

-The Jail and CORE facilities are 100% staffed.
-All inmates are in hardened structures.
-Water tanks are on standby if needed for drinking and sanitation.
-Kitchen is staffed and has two-weeks of food for inmates and staff.
-Medical staff will maintain 24/7 care.
-Inmates will be evacuated to top floors in case of flooding.
-Both facilities have room and contingency plans if one needs to evacuate to the other. Vehicles and personnel are staged.

AMERICAN OVERSIGHT

LCSO Updates:

-Our new SHERP high-water rescue vehicle arrived today and we are already trained and ready for its immediate use after the storm.

-The Lee County Sheriff's Office Incident Management Team is actively monitoring Hurricane Milton and is FULLY activated.

-Message boards and deputies are located at each entrance and exit to barrier islands informing residents of the Counties evacuation orders, and informing them of dangers if staying.

-All Student Resource Officers (SROs) are assisting with preparing residents on the barrier islands, and assisting Patrol.
-LCSO personnel and heavy equipment are loading four dump trucks to deliver sand for sandbags throughout the county at fire stations to assist county with more locations.
-Marine Unit has moved most of their boats farther inland. Last remaining boats are for heavy weather rescue and will remove when conditions worsen.
-We've ensured there is enough manpower staged and in place right up to, and immediately after the storm.

-Post storm we have multiple layers of communication so at the PUSH OF THE BUTTON we will deploy.

-LCSO is READY! Our Waterbourne Strike Team and Marine Unit, Special Ops are standing by should the need arise to rescue people.

-Four (4) additional shallow water vessels have been obtained for water rescues.

-Additional High-Water Vehicles have been obtained and will be deployed for potential high-water rescues.

-LCSO administrative services at precinct offices will be halted unit after the storm so we can focus on preparation and possible recovery efforts.

-Once we get sustained winds of 45 MPH, emergency response is stopped until it's safe to respond to calls.

AMERICAN OVERSIGHT

-It could take several hours or more for the winds to subside before a deputy is able to respond, once the impacts begin. SHELTER IN PLACE.

-Don't try to drive anywhere in inclement conditions as the roadways are not safe.
-We urge everyone to prepare for this storm! Prepare for the worst, but hope for the best!

-We know what Mother Nature can do! She is unpredictable, which is why we urge everyone NOT to wait until the last minute to have everything that you need.

-Do NOT go outside during the storm as wind and standing water create hazard that can be fatal.

-Remember the three phases of the storm: BEFORE, DURING, and AFTER. Have you plan for all three.

-Continue to monitor your local media for weather updates, as well as the Lee County Sheriff's Office and Lee County Government on social media for the latest updates.

-WE ARE SWFL STRONG and are IN THIS TOGETHER

-The Lee County Sheriff's Office Incident Management Team is actively monitoring Hurricane Milton and is FULLY activated.

-Message boards and deputies are located at each entrance and exit to barrier islands informing residents of the Counties evacuation orders, and informing them of dangers if staying.

-All Student Resource Officers (SROs) are assisting with preparing residents on the barrier islands, and assisting Patrol.
-LCSO personnel and heavy equipment are loading four dump trucks to deliver sand for sandbags throughout the county at fire stations to assist county with more locations.
-Marine Unit has moved most of their boats farther inland. Last remaining boats are for heavy weather rescue and will remove when conditions worsen.
-We've ensured there is enough manpower staged and in place right up to, and immediately after the storm.

-Post storm we have multiple layers of communication so at the PUSH OF THE BUTTON we will deploy.

-LCSO is READY! Our Waterbourne Strike Team and Marine Unit, Special Ops are standing by should the need arise to rescue people.

-Four (4) additional shallow water vessels have been obtained for water rescues.

-Additional High-Water Vehicles have been obtained and will be deployed for potential high-water rescues.

-LCSO administrative services at precinct offices will be halted unit after the storm so we can focus on preparation and possible recovery efforts.

AMERICAN OVERSIGHT

-Once we get sustained winds of 45 MPH, emergency response is stopped until it's safe to respond to calls.

-It could take several hours or more for the winds to subside before a deputy is able to respond, once the impacts begin. SHELTER IN PLACE.

-Don't try to drive anywhere in inclement conditions as the roadways are not safe.
-We urge everyone to prepare for this storm! Prepare for the worst, but hope for the best!

-We know what Mother Nature can do! She is unpredictable, which is why we urge everyone NOT to wait until the last minute to have everything that you need.

-Do NOT go outside during the storm as wind and standing water create hazard that can be fatal.

-Remember the three phases of the storm: BEFORE, DURING, and AFTER. Have you plan for all three.

-Continue to monitor your local media for weather updates, as well as the Lee County Sheriff's Office and Lee County Government on social media for the latest updates.

-WE ARE SWFL STRONG and are IN THIS TOGETHER

Hurricane Milton Electric Vehicle Safety Tips

Recently, Chief Financial Officer (CFO) and State Fire Marshal Jimmy Patronis issued a consumer alert to warn Floridians about the dangers of electric vehicle fires caused by submersion in saltwater, which are associated with impacts from Hurricane Helene. The Florida Office of Insurance Regulation (OIR) provided the consumer alert for insurers to share with policyholders ahead of Hurricane Milton.

The consumer alert, which includes safety tips from the State Fire Marshal's Office, is available here.

Sincerely,

Your GEICO Customer Service Team

To:	Law Enforcement Certified Employees
Cc:	IMT;Christopher Lalor;James Heuglin
Subject:	Guidelines for Access to FMB / Sanibel

Please see below guidelines regarding access onto Fort Myers Beach and Sanibel at the checkpoints.

Fort Myers Beach:
There is currently a 10:00 p.m. curfew and mandatory evacuation in effect for Fort Myers Beach. The only persons that are to be given access to the island are those who are essential or emergency personnel, or residents with proper identification who may need to access their home for an emergency or family member. Use common sense and your best judgement.

If you encounter someone on Fort Myers Beach after the 10:00 p.m. curfew, please be courteous while you identify the reason for their presence and determine the best course of action.

Sanibel:
As of 10 p.m. today, a curfew and mandatory evacuation are in effect for Sanibel. The directive given to LCSO is that no one is permitted on the island, except for emergency personnel and the City Manager (Dana Souza).

Sanibel Police Department Lt. Towler, or a representative from Sanibel PD, will be present with LCSO Deputies assigned to the checkpoint to address any questions or concerns that may arise. Sanibel PD will make the final determination as to who will be authorized to access the island.

Hurricane Passes:
See below for re-entry permits that are required to access Sanibel and/or Fort Myers Beach.

Lee County Government update on Hurricane Milton

Fort Myers, FL, Oct. 8, 2024 – Lee County has announced that its offices will remain closed Friday, Oct. 11.

The county closed at noon Monday in advance of the storm. Today's announcement simply extends that closure for the entire week. Reopening announcements will be forthcoming. The county continues its preparation for – and planned response to – Hurricane Milton with key personnel.

Additional updates:

Shelters: The county's open hurricane evacuation shelters continue to have capacity for more evacuees. Some shelters are more crowded than others. For example, Estero Recreation Center is at 75% capacity, but nearby Hertz Arena has 4,800 spaces available. Get full shelter information at www.leegov.com/storm.

Public transportation: LeeTran fixed route and shuttle transportation assistance will be suspended by 6:30 p.m. today. Visit LeeTran's social media channels for specific route information. Announcements for resuming services will be forthcoming.

The county asks residents to:

- Get to where you are going to shelter by tonight and remain there Wednesday.
- Do not drive in flooded water. Do not drive Wednesday, if possible.
- Monitor local meteorologists' reports.
- Sign up for AlertLee.
- Monitor www.leegov.com/storm and Lee County social media channels.
- Call the United Way's Emergency Information Hotline with questions. Dial 2-1-1 or 239-433-3900.
- Watch today's update from the Emergency Operations Center on the county's YouTube channel, www.youtube.com/@LeeCountyFLBOC. You can view it by clicking here.

To:	Law Enforcement Certified Employees
Cc:	IMT;Christopher Lalor;James Heuglin
Subject:	Important: Hurricane Milton Shift Plan
Attachments:	Hurricane Milton Schedule.xlsx

Team,

These instructions are to be followed by **all members** assigned to Precincts for storm related patrol functions.

Based on current storm projections, our plan for Squads 3 and 4, beginning October 9th and ending October 10th is:

Wednesday, October 9th:
Squad 3 (Day Shift) will report to their assigned Precinct at 0500 hours and conclude at 1700 hours.
(Wind estimates at 1700 hours are currently 35 MPH)

Squad 4 (Night Shift) will report to their assigned Precinct at 1700 hours and conduct patrol assignments until winds exceed 45 MPH.
IMT will make the decision to stop all patrol functions based on wind speeds.
Once Patrol functions subside all units will shelter at their assigned Precinct shelter location until winds reduce to a safe speed.
(45 MPH winds are expected to begin between 2100 - 2300 hours)
Squad 4 should be prepared to shelter in place beyond the conclusion of their shift.
Once IMT determines wind speeds have reduced below 45 MPH Squad 4 will redeploy while Squad 3 is notified to report for duty.

Thursday, October 10th:
Squad 3 (Day Shift) will be contacted to report for duty.
(The decision when to report will be based on anticipated wind speeds.)

Once all members of Squad 3 are in place, Squad 4 personnel will be released upon Precinct assessments.

If a member is unable to return to their residence because of road conditions or damage to their home they may remain at their assigned Precinct shelter.

Regardless of assignment all members should bring a change of clothes, food/snacks/hydration, and other essentials needed to shelter in place.

All members need to have their agency phone on them for notification purposes.

If needed, agency members may be contacted using agency email and/or agency radios via the RTIC channel.

If you do not have phone service please contact IMT on the RTIC channel for instruction.

AMERICAN OVERSIGHT

As storm wind speeds and times are subject to change, agency members are expected to monitor IMT updates to remain current with changing circumstances.

Stay safe!

Subject: Hurricane Milton - Update #29

According to the National Hurricane Center, Milton wobbled earlier today, but the longer-term motion is toward the east-northeast near 9 mph. On the forecast track, the center of Milton will move across the eastern Gulf of Mexico through Wednesday, make landfall along the west-central coast of Florida Wednesday night, and move off the east coast of Florida over the Atlantic Ocean on Thursday.

As of this update, the latest storm information is as follows:

- The track for Hurricane Milton has moved south. The center of the track is near the Sarasota/Bradenton area.

AMERICAN OVERSIGHT

AMERICAN OVERSIGHT

Hurricane Milton
Tuesday October 08, 2024
04 PM CDT Advisory 15
NWS National Hurricane Center

User Notes: Water levels along the immediate coast could reach the following heights above ground level within the indicated areas. Elevated water levels will likely be accompanied by large and destructive waves. Colors are determined by the highest values in the associated forecast peak surge range. Values shown on this graphic are inclusive of tide.

Subject: Hurricane Milton - Update #28

As of this update, the latest storm information is as follows:

- The current track continues to be a worst case scenario situation for the Tampa Bay region southward to Sarasota.
- The track for Hurricane Milton is still toward the lower Tampa Bay/Bradenton/Sarasota area.
- Rainfall amounts of 5 to 12 inches, with localized totals up to 18 inches are expected. Many rivers are now forecast to go into moderate to major flood stage with a few possibly reaching record levels.
- The current most likely arrival time in Lee County for tropical-storm-force winds is 3:00 PM on Wednesday, with a most likely departure time of 9:00 AM on Thursday.
- Movement is ENE at 8 mph.
- The maximum sustained wind speed has increased to 155 mph (Category 4; Category 5 starts at 157 mph).
- The minimum central pressure based on dropsonde data is 923 mb.
- We are still under a Storm Surge Warning.
- We are still under a Hurricane Warning.
- Hurricane-force winds extend outward up to 30 miles.
- Tropical-storm-force winds extend outward up to 105 miles.
- A 6' to 10' storm surge is still expected along the Lee County coast.
- Surf swells generated by Milton are expected to continue to affect much of the Gulf Coast over the next day or two, and are likely to cause life-threatening surf and rip current conditions.

As of this update, new notifications are as follows:

- Additional documentation for welfare checks (17w) will be required. Supervisors will be disseminating the information to the affected personnel.
- All Marine assets are secured at JetBlue and the 4th Precinct, and the vessel assets that will be deployed with the Marine Unit will be secured at LeeTran.
- Shelters:
    - Alico Arena - 54

Subject: Hurricane Milton - Update #26

As of this update, the latest storm information is as follows:

- The current track for Hurricane Milton continues to be a worst-case scenario for the Tampa Bay region southward to Sarasota. It is forecast to make landfall in Florida Wednesday night.
- The current maximum sustained winds are 145 mph. The movement is ENE at 12 mph.
- There is a Hurricane Warning in effect for the entire area. A Category 3 is forecast at landfall, with the expanding wind field still expected.
- The Storm Surge estimate is expected to be 6' - 10'. By comparison, the surge during Hurricane Helene was measured at 5.12 feet above MHHW and was measured at 11:36 PM, *almost 10 hours after* a peak

AMERICAN OVERSIGHT

wind gust of 63 mph taken at Tarpon Point at 1:51 PM. The peak water levels estimated elsewhere along coastal Lee County ranged from 2' to 5' above MHHW.

- There is a 97% chance that the earliest arrival time of tropical-storm-strength winds is 8:00 AM on Wednesday. The likely arrival time for those winds is 12:00 PM on Wednesday. The likely departure time with this update is 7:00 AM on Thursday, with the latest departure time being 12:00 PM on Thursday.
- There is a Flood Watch for the entire area.
- We are still under a Hurricane Warning.
- Hurricane-force winds extend out to 30 miles from the center, and tropical-storm-force winds extend outward up to 105 miles.
- The minimum central pressure based on aircraft dropsonde data is 929 mb.

As of this update, new notifications are as follows:

- Precinct supervisors are finalizing employee shelter arrangements should the need arise.
- VERT (Volunteer Emergency Response Team) members from the Civilian Support Unit (CSU) are on standby to assist with post-storm deployments.
- Florida DOT is reinforcing the Sanibel Causeway with armor stone near the toll plaza and securing the barges and other equipment. Intermittent road closures for equipment movement are being performed by FLDOT.
- Seventeen (17) nursing facilities are closed in Lee County.
- EOC passed out nearly 100,000 sand bags and is out of bags.
- Sand deliveries have stopped and no more sand deliveries are planned by EOC.
- Three county shelters are open and operating:
    - Island Coast HS Shelter has approximately 71 present and 446 registered.
    - Estero Rec Center has approximately 114 present and 132 registered.
    - Dunbar High School is being staffed by Fort Myers Police Department personnel.

Gas Station Updates:

- Loves Travel Station in North Fort Myers is open for First Responders only at this time.
- 7-11 at 24530 S Tamiami Trl has fuel. Pump 2 is for LEO.
- 7-11 at 24651 S Tamiami Trl has fuel. Pump 4 for LEO.
- 7-11/Sunoco at 27990 is out of fuel.
- 7-11/Mobile at 28175 S Tamiami Trl has fuel. Pumps 1 & 2 for LEO.
- 7-11 at 26975 Old 41 Road has fuel and will reserve ALL pumps for LEO.
- Circle K at 10460 Bonita Beach Rd (Old 41 & Bonita Beach Road) has fuel. Pump 1 & 3 for LEO.
- Racetrack at 13050 Bonita Beach Rd (Bonita Beach Road & Bonita Grande) has fuel. Pumps 17 & 18 for LEO.
- RaceTrac at 22350 S Tamiami Trl has other grades of fuel, but is out of regular. Pump 18 for LEO.
- 7-11 at 21850 S Tamiami Trl has fuel. Pump 1 for LEO.
- Rebel at 12030 Bonita Beach Rd SE, will reserve fuel for LEO.
- 7-11 at Terminal Access has fuel. Pumps 9 & 10 for LEO. (must go inside and let the clerk know to turn on the pump)
- 7-11 at 12011 Gateway Blvd has fuel. Pump 2 for LEO. (must go inside and let the clerk know to turn on the pump)
- 7-11 at 100 Delaware Rd. in Lehigh Acres has two pumps reserved for LEO and EMS.

AMERICAN OVERSIGHT

Definitions:

- MHHW - Mean Higher High Water (MHHW) is the average level of the highest tide for each day computed over a 19-year period.
- Dropsonde - GPS dropsondes measure vertical profiles of atmospheric temperature, pressure, humidity, and wind speed as they fall from the aircraft to the surface. They are equipped with a small parachute that slows their descent and maintains vertical orientation. The dropsonde transmits data by radio four times a second to the aircraft until it reaches the surface of the ocean.

Subject: Hurricane Milton - Update #19

AMERICAN OVERSIGHT

As of this update, the latest storm information is as follows:

- The storm track has shifted north slightly. The movement is not far enough to make a difference in our impacts.
- The earliest reasonable arrival time of tropical-storm-force winds is early Wednesday morning.

As of this update, new notifications are as follows:

- The Hurricane Hotline is now active. Corrections personnel should call 239-477-1258, Law Enforcement personnel should call 239-477-1259, and Communications personnel should call 239-477-1260. Please save these numbers now in your phone. This hotline provides updates for personnel without access to e-mail. For now, all supervisors should relay all pertinent information to their personnel who do not have access to e-mail.
- Mandatory evacuations have been issued for the Town of Fort Myers Beach. Residents are encouraged to evacuate before 3:00 PM today.
- LeeTran at noon today, Monday, Oct. 7, will stop running routes onto Fort Myers Beach. All LeeTran services will convert to off-island transit only. This is to assist with the Town of Fort Myers Beach's request for residents to leave the island.
- Lee County Utilities will shut off water to Fort Myers Beach at noon Tuesday, Oct. 8. This is a precautionary measure to protect infrastructure. It was also implemented during 2022's Hurricane Ian.
- Lee County Sheriff's Office employees are currently in the field distributing sand and sand bags to locations throughout the county.

Gas Station Updates:

- 7-11 at SR 31/SR 80 received a fuel shipment this morning. Pumps 11 and 12 are for LEO. Make contact inside for pumps to be turned on.
- 7-11 at Billy's Creek is out of gas. Expecting shipment today. Will set aside fuel for LEO at Pump #1. Make contact with employee to have pump turned on.
- RaceTrac SR 31/ SR 80 has gas but expect to be out by noon and closed. Next shipment not expected until after the storm. They do not have a pump set aside for LEO.
- Circle K at SR 80/ Old Olga has fixed the pump and have a full tank for LEO. Make contact with employee for which pump to use.
- Sunoco at SR 80 and Buckingham is out of gas but requested shipment. Will pump remaining for LEO. Make contact with employee inside for pump to be turned on.
- Rebel at 6 Mile/Metro currently has 8,000 gallons and will stop pumping at 800 gallons. They do not set aside gas for us. Unknown next shipment.
- RaceTrac at 6 Mile/Michael G Rippe is out of gas but requested shipment. They will set up a Pump #3 for LEO use when they get gas. Make contact with employee for pump to be turned on.
- Race Trac at Daniels/Powers Ct is out of gas. Shipment has been requested. Will set up pump for LEO use. In the past it has been Pump 18.
- 7-11 Daniels/Palomino is out of gas. Expecting shipment today and will contact me when they receive it. Pump 10 will be set aside for LEO.
- Rebel at 9281 Daniels Pkwy is out of gas. Requested shipment for today. Pump 1 will be set aside for LEO. Go inside to have pump turned on.
- Chevron at 13031 Metro is out of gas. Not expecting shipment. Will set a pump aside for LEO if they get gas.
- Circle K at Metro and Crystal is close to running out of gas and starting to shut pumps down. They are setting aside pumps 5-8 for LEO. Meet with employee for which pump to use.

Subject: Hurricane Milton - Update #18

As of the 8:00 AM update, a Hurricane Watch remains in effect for our area.

The IMT Main Number is 239-258-3150 or e-mail at IMT@sheriffleefl.org.

As of this update, the latest storm information is as follows:

- Hurricane Milton is now a major hurricane, with sustained wind speeds of 125 mph.
- Hurricane Milton is expected to have winds of 145 mph at landfall, with some expansion of hurricane-strength winds.
- The model spread in the forecast track remains high, with the entire area within the cone.
- Movement is ESE at 8 mph.
- The current earliest arrival of tropical-storm-strength winds is 1:00 AM on Wednesday, with a likely arrival time at 8:00 AM. This is the arrival of tropical-storm-force winds, not the arrival of the actual storm.
- The storm surge estimate is 5' to 10' for Lee County. It is expected to increase throughout the day on Wednesday and peak early Thursday.
- We are still in a Hurricane Watch, a Storm Surge Watch, and a Flood Watch.
- Many rivers are already in or forecast to go into flood stage.
- The main threat for tornadoes is late Tuesday into Wednesday night.
- Confidence is low on the exact track of the system, with the entire area within the cone. It should be noted that that 72 hour average track error is 100 miles.

As of this updates, new notifications are as follows:

- All personnel must notify IMT of all asset movements and personnel changes.
- Estero Fire Station #54 at Oriole and Alico just got sand delivered.
- Pine Island Fire has sand, but no sandbags.
- North Fort Myers Recreations Center has sand but no sandbags.
- Corrections Transport vehicles have received their staging location and should be in place by 12:00 PM.
- Academy recruits and Youth Services deputies have been deployed to the field.

National Hurricane Center Definitions:

- **Hurricane Watch**: Hurricane conditions (sustained winds of 74 mph or greater) are possible within your area. Because it may not be safe to prepare for a hurricane once winds reach tropical storm force, The NHC issues hurricane watches 48 hours before it anticipates tropical storm-force winds.
- **Hurricane Warning**: Hurricane conditions (sustained winds of 74 mph or greater) are expected somewhere within the specified area. NHC issues a hurricane warning 36 hours in advance of tropical storm-force winds to give you time to complete your preparations. All preparations should be complete. Evacuate immediately if so ordered.
- **Storm Surge Watch**: There is a possibility of life-threatening inundation from rising water moving inland from the shoreline somewhere within the specified area, generally within 48 hours.

AMERICAN OVERSIGHT

- **Extreme Wind Warning**: Extreme sustained winds of a major hurricane (115 mph or greater), usually associated with the eyewall, are expected to begin within an hour. Take immediate shelter in the interior portion of a well-built structure.

Subject: Hurricane Milton - Update #17

The 5:00 AM update shows that the track is largely unchanged; however, models still vary from Naples to North of Tampa, and the intensity is forecast to be stronger, well into the Category 4 range.

As of this update, new notifications are as follows:

- The storm has current maximum winds of 100 mph.
- The current forecast for our coast is an 8' - 12' storm surge.
- The storm has slowed somewhat, so the earliest arrival of Tropical Storm force winds is now in the early Wednesday morning hours.

Subject: Hurricane Milton - Update #16

The 11:00 PM update shows little movement in Hurricane Milton's track. Maximum sustained wind speeds are at 90 mph. Model tracks vary widely on the landfall location along Florida's West Coast. The Incident Management Team will continue to monitor and provide timely updates.

As of this update, new notifications are as follows:

Gas Availability:

- RaceTrac - 15820 Winkler Rd. - Pump 15 & 16 for First Responders - Contact is Tracy
- 7-11 - 12750 Cleveland Ave. - Pump 10 & 12 for First Responders - Contact is Vanilla
- RaceTrac - 5991 South Pointe Blvd. - Pump 19 & 20 for First Responders - Contact is Vince
- Mobil/7-11 - 20391 Summerlin Rd. - Pump 6 for First Responders - Contact is Susan
- Circle K - 20021 Summerlin Rd. - Pump 1 for First Responders - Contact is Kyle
- 7-11 - 15021 McGregor Blvd. - Pump 1 for First Responders - Contact is Jessica
- Mobil/7-11 - 17930 N. Tamiami Trl. - Pump 9 & 10 for First Responders - Contact is Joseph
- Circle K - 6381 Bayshore Rd. - Pump 10 for First Responders - Contact is Elizabeth

AMERICAN OVERSIGHT

- Circle K - 19101 N. Tamiami Trl. - Pump 1 & 2 for First Responders - Contact is Christy

Subject: Hurricane Milton - Update #15

As of the 8:00 PM National Hurricane Center update, Hurricane Milton is still forecast to rapidly intensify into a major hurricane. The center of the track has shifted further south, and is currently near the Bradenton/Sarasota area at landfall.

There is a Flood Watch for the entire area. Rainfall amounts of 5 to 10 inches, with localized totals of up to 15 inches are expected. The timing of the impacts is as early as late Tuesday and continuing into Thursday morning.

A good deal of uncertainty remains with where the storm will make landfall. It should be noted that the average NHC track error at day 3 is around 100 miles.

As of this update, new notifications are as follows:

- Youth Services and Training personnel have received their assignments and will report according to their schedule tomorrow.
- Court Operations and Civil personnel will receive their schedule tomorrow.
- Employee Assistance personnel are done for the evening. They will resume in the morning.
- IMT will be fully activated beginning at 7:00 AM on Monday, with all personnel reporting or receiving their assignments by then.
- For personnel working overtime, please use *Hurricane Milton* as the reason for the overtime.
- The 7-11 Gas station at 103 Leeland Heights Blvd W in Lehigh Acres is open for LEO. If you need gas, use pumps 3,4,5, or 6 only. Jessica is the contact person there.
- The 7-11 at 100 Delaware Rd. in Lehigh Acres is reserving gas for First Responders. use Pump 3 and 4. Sharon is the contact person there.
    - The 7-11 at 18971 Babcock Ranch Rd is holding gas for first responders but deputies must go inside to request pump to be turned on.
    - The 7-11 at Del Prado and N Tamiami (17930 N Tamiami Trl.) is also holding gas for first responders but deputies must go inside to request the pump be turned on.

All personnel should be ready for a full activation at any time. This is a serious, dangerous storm and all personnel should complete preparations as soon as possible. Models vary in intensity, but most predict *at least* a Category 3, so even if we do not receive a direct hit, we can expect hurricane strength winds or wind gusts and a severe storm surge.

Subject: Hurricane Milton - Update #14

AMERICAN OVERSIGHT

As of the 5:00 PM update, Milton is now a hurricane. Hurricane Milton has maximum sustained winds of 85 mph. The track has shifted slightly, and there is a more northeastern path across our area. Even if we do not

receive a direct hit, we will receive tropical storm and hurricane strength winds, significant storm surge, and dangerous flooding from rainfall, likely much greater that what we received from Hurricane Helene. By tonight, all personnel should have their homes and families secured for the storm, and be prepared for a full activation.

Notifications for this update:

- All agency members deemed non essential during an emergency response will be dismissed tomorrow, October 7th, 2024 starting at **noon**. In order to stay home you will need to advise your immediate supervisor and use your accrued time. You may report for regular duty if you chose to do so. As always, use caution when driving in inclement weather and do not attempt to traverse standing water. IMT will continue to send out updates on our response to TS Milton.

- The Emergency Operations Center (EOC) will transition to a Level 1 at 7:00 AM tomorrow. This means that shelters and countywide operations will be run out of the EOC. The Incident Management Team is your contact for agency needs; do not contact the EOC directly.

Subject: Tropical Storm Milton - Update #13

The 2:00 PM Intermediate Update shows that there are no significant changes in the track. The earliest arrival of tropical storm force winds is projected to be 8:00 PM on Tuesday.

These are the stations that are reported to still have gasoline:

- Veronica Shoemaker/Winkler
- Shell station at Hancock and US 41
- BJ's Cape Coral
- 711 Burnt Store and Pine Island has DIESEL only
- Racetrac at South Pointe and College has 93 Only
- Walmart / Murphy's USA in Lehigh
- Santa Barbara and Veterans 7/11

These are the stations that are reported to be currently **out** of gasoline:

- Country Club and Veterans Circle K
- Del Prado Speedway
- Trafalgar and Skyline 7/11
- Rebel US 41 and Del Prado
- 76 at Chiquita and Pine Island
- Walmart/Murphy's Del Prado
- Walmart on Pine Island Road
- Pine Ridge and San Carlos 7/11
- Santa Barbara and Gleason 7/11
- Palm Tree and Cape Coral Pkwy 7/11

AMERICAN OVERSIGHT

- Lee and Gunnery 7/11
- Del Prado Racetrac
- Terry St Circle K
- Lee and Alvin Racetrac
- Joel Citgo
- N Cleveland and Littleton 7/11

Below are the current updated tasks that IMT has been working on since that last updates:

- Logistics members have scheduled pre-storm deliveries for food and beverages - the arrival time is Tuesday morning.
- Logistics members have scheduled post-storm deliveries from vendors.
- Logistics members have scheduled water deliveries.
- Logistics members have created plans for replenishment of supplies for long-term activations.
- Logistics members have arranged for ice deliveries for the event power is lost.
- Purchasing members have made plans for the procurement of potable water.
- Purchasing and Logistics members have scheduled the delivery of portable bathrooms should they be needed.
- HQ will be the central location for cooking needs post-storm for employees at HQ/IMT, Forensics, MCU, Command Staff, Spec Ops, and Staging personnel.
- Precincts and Corrections facilities will be responsible for their meal preparations.

Subject: Tropical Storm Milton - Update #12

The 11:00 AM update shows a small track shift to the south. Although it is still predicted to directly hit the Tampa Bay Area, the move slightly south may bring higher wind speeds and higher storm surge. The storm is expected to quickly intensify and will likely be a major hurricane upon arrival.

All personnel are encouraged to complete preparations for their homes and their families today.

There is still a high degree of uncertainty in both the tracks and the wind speed upon arrival, so the possibility of a direct strike to our area remains. The cone of uncertainty currently covers most of the Florida peninsula. The Incident Management Team (IMT) will keep you informed, and is making preparations to include schedule planning.

Subject: Tropical Storm Milton - Update #8

The 8:00 AM update shows that Milton is forecast to become a Major Category 3 Hurricane before making landfall. Timing, tracks, and intensity are still unpredictable; however, the National Hurricane Center still shows the track toward the Tampa area.

The current forecast is as follows:

- There is a Flood Watch for the entire area through Thursday.
- Rainfall in the amount of 5" to 8", with localized totals up to 12".
- The timing of the impacts is from late Tuesday through early Thursday morning, but it is expected to make landfall on the West Coast on Wednesday.
- There is great uncertainty about where the storm will make landfall. The average Day 4 track error is around 150 miles, so we are still well within a possible landfall range.
- The current earliest wind time arrival is 4 PM on Tuesday, and the most likely arrival time is 2 AM on Wednesday.

Additional notifications for this update include:

- Personnel should maintain at least ½ tank at all times. Due to current fuel runs, please use any opportunity to make sure your agency vehicle stays full at all times.

AMERICAN OVERSIGHT

- Personnel who must fuel and have no other options may use 89 or 93 Octane fuel.
- Select IMT members have been activated. Please send requests to IMT@sheriffleefl.org.
- The select CRU members who were notified individually will report at 10:00 AM to the Headquarters Training Room (1202).
- The asset movement members who were notified individually will report at 10:00 AM to the Headquarters Training Room (1202).
- All units, components, precincts, corrections facilities, and all affected agency departments should fill up all available gas cans and gas tanks.
- Pine Island Fire Department is out of sand. They still have sandbags. They expect to get more sand on Monday.

Sent: Saturday, October 5, 2024 6:19 PM
To: All Users <AllUsers@sheriffleefl.org>
Subject: Tropical Storm Milton - Update #7

With the 5:00 PM update, Tropical Storm Milton is now expected to arrive as a major hurricane. The track has shifted some to the north; however, some model tracks still show direct hits our our area, and we are still in the cone of uncertainty. Please recall from prior storms that although we are not in the direct path, the effects of the hurricane will still affect us heavily, especially in the areas prone to storm surge. Additionally, the peak storm surge from Helene arrived almost 10 hours after the peak winds, so all personnel should be aware of and consider the effects before, during, and after the storm.

The below preparations remain in effect. The only change for this period is:

- Four (4) additional shallow water vessels have been obtained for water rescues.
- Additional High-Water Vehicles have been obtained and will be deployed to the islands for potential high-water rescues.
- The San Carlos Park Fire Department is out of sand and sandbags.

Subject: Tropical Storm Milton - Update #6

As of a 12:25 PM National Hurricane Center update, Tropical Storm Milton has formed. This storm is forecast to strengthen and bring the risk of life-threatening impacts to portions of the West Coast of Florida next week. The maximum winds are currently estimated at 40 mph with higher gusts. Models range in intensity from a Tropical Storm to a Major Hurricane, so there is tremendous unpredictability in the strength upon arrival.

At this time, the Incident Management Team is preparing for the possibility of a major hurricane affecting our area with impacts beginning on Tuesday and a full impact on Wednesday.

All agency personnel are encouraged to prepare as follows:

- All personnel should review their hurricane plans, and prepare their homes and families for the possibility of a hurricane impact in the middle of next week.

AMERICAN OVERSIGHT

- All precincts should secure their mobile assets (decoy vehicles, arrow boards, trailers, ATVs, etc.) beginning on immediately to be completed by 2:00 PM on Monday.
- All trailers should be brought to storage beginning immediately to be completed by 2:00 PM on Monday.
- All personnel should use the remainder of this weekend to prepare for a possible activation. This plan should include three days worth of food, uniforms, and supplies.
- All personnel should use the remainder of this weekend to prepare their uniforms and equipment (including sufficient batteries for equipment) for a possible activation.
- All specialty units should begin bringing their assets back to their storage areas and secure locations. This should be completed by 2:00 PM on Monday.
- All precincts should secure any items that can be moved by the wind to a secure location starting immediately to be completed by 2:00 PM on Monday.
- All Corrections facilities (including Nan's Ranch) should prepare their facilities for a possible hurricane impact next week.

This is new information as of this update:

- The Waterborne Strike Team is on standby for deployment for water rescues.
- JetBlue Stadium, CenturyLink Stadium, the Lee County Gun Range, and the Andrea Lane and Sivan Road storage buildings are prepared to receive assets if needed.
- The Marine Unit is in contact with the IMT to secure the marine assets.
- Known sandbag locations are as follows:
    - Punta Gorda—Free sandbags will be available at 3130 Cooper St., the last entrance on the left by flag poles.
    - Fort Myers Beach—Sand is located off of Gulf Beach Road, and bags are available at Town Hall, 2731 Oak St. (The location will provide service until 4:30 p.m. on Friday and begin Monday at 8:30 a.m.)
    - Fort Myers— South Trail Fire & Rescue will have sand and sandbags available at station 63, 5531 Halifax Ave., Fort Myers—a maximum of 20 bags per household. UPDATE: South Trail Fire & Rescue is currently out of sand. Empty sandbags only are available.
    - Naples— Sandbags will be available at three public park locations: Big Corkscrew Island Regional Park, 810 39th Ave., North Collier Regional Park, 15000 Livingston Road, in the Sun-N-Fun Lagoon parking lot, and at Donna Fiala Eagle Lakes Community Park, 11565 Tamiami Trail East, in the grassy area between the parking lots. The Naples sandbag locations will begin service at 8 a.m. through dusk on Saturday and Sunday.
    - San Carlos Park—Sand and sandbags are available at San Carlos Park Fire District Station 54, located at 16900 Oriole Road. There is a limit of 10 bags per household. Bags can be picked up at the lobby. Bring your own shovel. Be prepared to fill and load your own sandbags. Make sure your vehicle can transport the weight of the sandbags.
    - North Fort Myers—Sandbags will be located at North Fort Myers Parks and Recreation, 2000 N. Recreation Parkway. Sand will be located in the back of the park, next to the county mulch pile. Please bring your own shovel to fill the bags.
    - Matlacha—Sandbags are available for pickup at Station 1, located at 5700 Pine Island Rd, Bokeelia, FL 33922
- IMT personnel are visiting the precincts, and the storage locations to inventory assets to prepare for both securement and post-storm deployment.
- No schedule changes are expected between now and Monday afternoon; however, all personnel should be prepared for schedule adjustments.
- The Agriculture assets are secured on the Olga site.

Subject: Important Update on a possible impending hurricane impacting our area (Update #5)

Team,

IMT has been working on preparation for a potential Hurricane impacting our area early next week. IMT will continue to send out updates regularly so please monitor your email closely. All agency units need to begin preparations of securing their assigned assets and communicate all movement to IMT. Also, update the major asset application on the intranet. We have secured Jet Blue Park as an asset staging area for Marine and other assets. Agency asset storage facilities to include the gun range are preparing to house assets as well. IMT is securing high water vehicles that will be pre-staged at strategic locations i.e., the barrier islands. IMT members will be in the RTIC today coordinating efforts. Agency extension 239-258-3150 is being setup to communicate to IMT staff. Additional updates to follow.

Be prepared and be safe!

Subject: New Caribbean Disturbance - Update #4

The National Hurricane Center 2:00 PM update shows the possibility of development as the low pressure area in the Gulf of Mexico moves slowly eastward or northeastward. A tropical or subtropical depression or storm could form during the early to middle part of next week if the low remains separate from a frontal boundary that is forecast to extend across the Gulf of Mexico. Regardless of development, locally heavy rains could occur over portions of the Florida Peninsula late this weekend into next week. As of this update, the formation chance in the next 48 hours is low at 10 %, and the formation chance through 7 days has increased to 50%.

Current model runs show an arrival time of any potential storm around Wednesday of next week. This represents a slower forward storm speed and later storm arrival than previous model runs, so the timing and impacts are still largely unknown. Regardless of any potential storm, significant rainfall is still expected, and the Incident Management Team will continue to monitor and update all personnel.

Subject: New Caribbean Disturbance - Update #3

The National Hurricane Center has reduced the chance of tropical cyclone development within seven days to 30%. While the system is likely to develop over the Gulf of Mexico late this weekend or early next week, subsequent tropical or subtropical development could be limited by the system's potential interaction with a frontal boundary. Regardless of development, locally heavy rains could occur over portions of the Florida Peninsula next week.

Sent: Tuesday, October 1, 2024 10:35 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance - Update #1

The area of disorganized showers remains at a 40% chance of development. The National Hurricane Center indicates that environmental conditions could support some gradual development of this system, and a tropical depression could form towards the end of this week or this weekend while it moves generally northwestward over the northwestern Caribbean Sea and into the Gulf of Mexico. As of this time, there are no changes, but some long range models show an increased chance of this disturbance affecting our area.

From: IMT <IMT@sheriffleefl.org>
Sent: Monday, September 30, 2024 8:11 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance

The Incident Management Team is monitoring a new area of disorganized showers and thunderstorms over the western Caribbean Sea. The National Weather Center states that the system has a medium chance (40%) of developing towards the middle to latter part of the week as it moves northwestward into the Gulf of Mexico. As this disturbance moves into the gulf, increasing moisture is expected over the Florida Peninsula and elevated rain chances are anticipated from Friday through the weekend, and possibly into early next week.

Unfortunately, long range models show the possibility of direct impacts for Southwest Florida; however, It is too early to determine what, if any, tropical specific impacts can be expected.

The Incident Management Team will continue to monitor the storm, and will continue to provide updates through this very active part of the hurricane season.

Good Afternoon, Sheriffs –

Thank you to all those who have already reached out willing to lend assistance to Florida ahead of Hurricane Milton's landfall. I have been in close communication with Florida Sheriffs' Association leadership as well as many of our member Sheriffs in FL.

While there has been an EMAC request for assistance, it is **still pending** at this time. Officials are continuing to reassess needs and will make the decision whether or not to make the request official. The storm's final track once it makes landfall will greatly impact the determination of the needs of our Sheriffs.

The recommendation of FSA, should you be interested in sending assets or personnel, is to consider getting your agency paperwork filled out and ready to go with your own state emergency management centers. Should an official request be made, this will speed up the process for your agency.

For now, they are asking that no one self-deploy. Please wait until the official word has been given and the request has been made official. I will continue to provide any updates or requests from any of our Florida sheriffs who may be in need of assistance.

Should you have any questions, please let me know.

Stay safe and continue to keep our FL and NC agencies in your thoughts,
Megan

Megan E. Noland
Executive Director
Major County Sheriffs of America

AMERICAN★HUMANE
FIRST TO SERVE®

Dear Carmine,

Thanks to the incredible generosity of people like *you*, American Humane's Rescue Team has made a profound impact on animals and communities affected by Hurricane Helene. **After completing our mission in Georgia, where we provided lifesaving support to more than 300 animals, our team has been urgently deployed to western North Carolina, where animals and shelters remain in critical need of rescue and supplies.**

Since arriving in North Carolina, we've been hard at work assessing impacted areas, distributing food, and providing vital resources. Over the last few days, we've reached 54 communities across three counties,

AMERICAN OVERSIGHT

distributing 3,000 pounds of dog food, 1,150 pounds of cat food, and over 220 other essential items. With communication challenges continuing to hamper efforts, our teams are using radios and satellite systems to ensure we can reach animals and shelters in need.

Your support is making all this possible. **And thanks to a generous matching gift, every dollar you donate will go twice as far to provide lifesaving care, shelter, and rescue for animals in need.**

Here's what your gift is helping us do:

- Deliver essential food, water, and supplies to shelters and animals in crisis across North Carolina.
- Support ongoing animal search and rescue operations in collaboration with local agencies and partners at the North Carolina Department of Agriculture and ASAR.
- Sustain our ongoing mission to protect animals, whether during natural disasters or through everyday rescue and care.

As we keep a close eye on Hurricane Milton, expected to make landfall in Florida later this week, your continued support allows us to stay ready for whatever comes next. **Your donation not only helps us provide immediate relief to animals affected by Hurricane Helene, but also ensures we can respond quickly to future crises.**

Thank you for making this critical work possible. Your generosity is making a real difference for animals in crisis, and we are deeply grateful for your partnership in these lifesaving efforts.

With gratitude,

Josh Cary

AMERICAN OVERSIGHT

National Director, Rescue
American Humane

P.S. Your gift will be matched dollar-for-dollar, doubling your impact and helping us provide lifesaving care for animals in North Carolina and beyond.

**Campaign contributions will be matched up to $50,000. Limited to U.S. residents only.*

Please note: Any gift received surpassing the $50,000 matching gift will not be doubled but will continue to support all of American Humane's life-changing and impactful programs.

Subject:	KPRC 2 News - Houston LIVE (ZOOM)
Location:	RTIC HQ
Start:	Wed 10/9/2024 10:30 AM
End:	Wed 10/9/2024 11:00 AM
Recurrence:	(none)
Meeting Status:	Accepted
Organizer:	Anita Iriarte
Required Attendees:	Christopher Fine; Sarah Rodriguez; Todd Olmer; Anita Iriarte; Katie Walter; Christopher Lalor; Autumn King; Jessie Santero; John Holloway; James Heuglin; Robert DeAngelo; Tara Thrower; Nestor Montoya; Herbert Ellis; Julie Martin; Carmine Marceno; Mark Shelly; Scott Lineberger; Daniel Greenup; Kevin Ferry

KPRC 2 News Houston reporter Gage Goulding reached out for a colleague and requested the sheriff live on Zoom. The interview is scheduled for 1030am Wednesday in Rtic. Clear out by 1015.

Updated talking points forthcoming after most recent IMT email is received in the morning. Topics are prep efforts, assets, and how we took on Ian and Helene.

Hurricane Milton

Jail Updates:

-The Jail and CORE facilities are 100% staffed.
-All inmates are in hardened structures.
-Water tanks are on standby if needed for drinking and sanitation.
-Kitchen is staffed and has two-weeks of food for inmates and staff.
-Medical staff will maintain 24/7 care.
-Inmates will be evacuated to top floors in case of flooding.
-Both facilities have room and contingency plans if one needs to evacuate to the other. Vehicles and personnel are staged.

LCSO Updates:

-Our new SHERP high-water rescue vehicle arrived today and we are already trained and ready for its immediate use after the storm.

AMERICAN OVERSIGHT

-The Lee County Sheriff's Office Incident Management Team is actively monitoring Hurricane Milton and is FULLY activated.

-Message boards and deputies are located at each entrance and exit to barrier islands informing residents of the Counties evacuation orders, and informing them of dangers if staying.

-All Student Resource Officers (SROs) are assisting with preparing residents on the barrier islands, and assisting Patrol.
-LCSO personnel and heavy equipment are loading four dump trucks to deliver sand for sandbags throughout the county at fire stations to assist county with more locations.
-Marine Unit has moved most of their boats farther inland. Last remaining boats are for heavy weather rescue and will remove when conditions worsen.
-We've ensured there is enough manpower staged and in place right up to, and immediately after the storm.

-Post storm we have multiple layers of communication so at the PUSH OF THE BUTTON we will deploy.

-LCSO is READY! Our Waterbourne Strike Team and Marine Unit, Special Ops are standing by should the need arise to rescue people.

-Four (4) additional shallow water vessels have been obtained for water rescues.

-Additional High-Water Vehicles have been obtained and will be deployed for potential high-water rescues.

-LCSO administrative services at precinct offices will be halted unit after the storm so we can focus on preparation and possible recovery efforts.

-Once we get sustained winds of 45 MPH, emergency response is stopped until it's safe to respond to calls.

-It could take several hours or more for the winds to subside before a deputy is able to respond, once the impacts begin. SHELTER IN PLACE.

AMERICAN OVERSIGHT

-Don't try to drive anywhere in inclement conditions as the roadways are not safe.
-We urge everyone to prepare for this storm! Prepare for the worst, but hope for the best!

-We know what Mother Nature can do! She is unpredictable, which is why we urge everyone NOT to wait until the last minute to have everything that you need.

-Do NOT go outside during the storm as wind and standing water create hazard that can be fatal.

-Remember the three phases of the storm: BEFORE, DURING, and AFTER. Have you plan for all three.

-Continue to monitor your local media for weather updates, as well as the Lee County Sheriff's Office and Lee County Government on social media for the latest updates.

-WE ARE SWFL STRONG and are IN THIS TOGETHER

KPRC 2 News Houston reporter Gage Goulding reached out for a colleague and requested the sheriff live on Zoom. The interview is scheduled for 1030am Wednesday in Rtic. Clear out by 1015.

Updated talking points forthcoming after most recent IMT email is received in the morning. Topics are prep efforts, assets, and how we took on Ian and Helene.

Wednesday update:

Good morning, Sheriff Marceno!

My name is Marcus Gutierrez, and I am the producer of the 9am show on KPRC 2+ Now this morning.

I just wanted to run by you the questions our anchor's Zach Lashway and Haley Hernandez are going to be asking during your interview at 9:30CT this morning:

((**QUESTION**))

WE WERE TALKING TO FORT MYERS BEACH VICE MAYOR -- Jim Atterholt -- ABOUT THE EVACUATION EFFORTS ON THE OFFICIALS SIDE..

HOW HAS IT BEEN FOR YOUR OFFICE MAKING SURE THE EVACUATIONS RUN SMOOTHLY?

WHAT HAS BEEN THE BIGGEST ISSUES?

(**QUESTION**)

AFTER THE STORM COMES THROUGH -- WHAT ARE SOME OF THE RESOURCES YOUR OFFICE HAS FOR SEARCH AND RECOVERY FOR PEOPLE IN NEED..

(**QUESTION**)

WITH ANY SITUATION -- CRIMINALS CAN STILL BE SOMETHING TO WORRY ABOUT.. WHAT ARE YOUR PLANS FOR ANY POTENTIAL LOOTINGS IF THEY HAPPEN..

AMERICAN OVERSIGHT

Let me know if we need to change anything or if you have any questions!

Hear from you soon!

Subject: Hurricane Milton - Update #29

AMERICAN OVERSIGHT

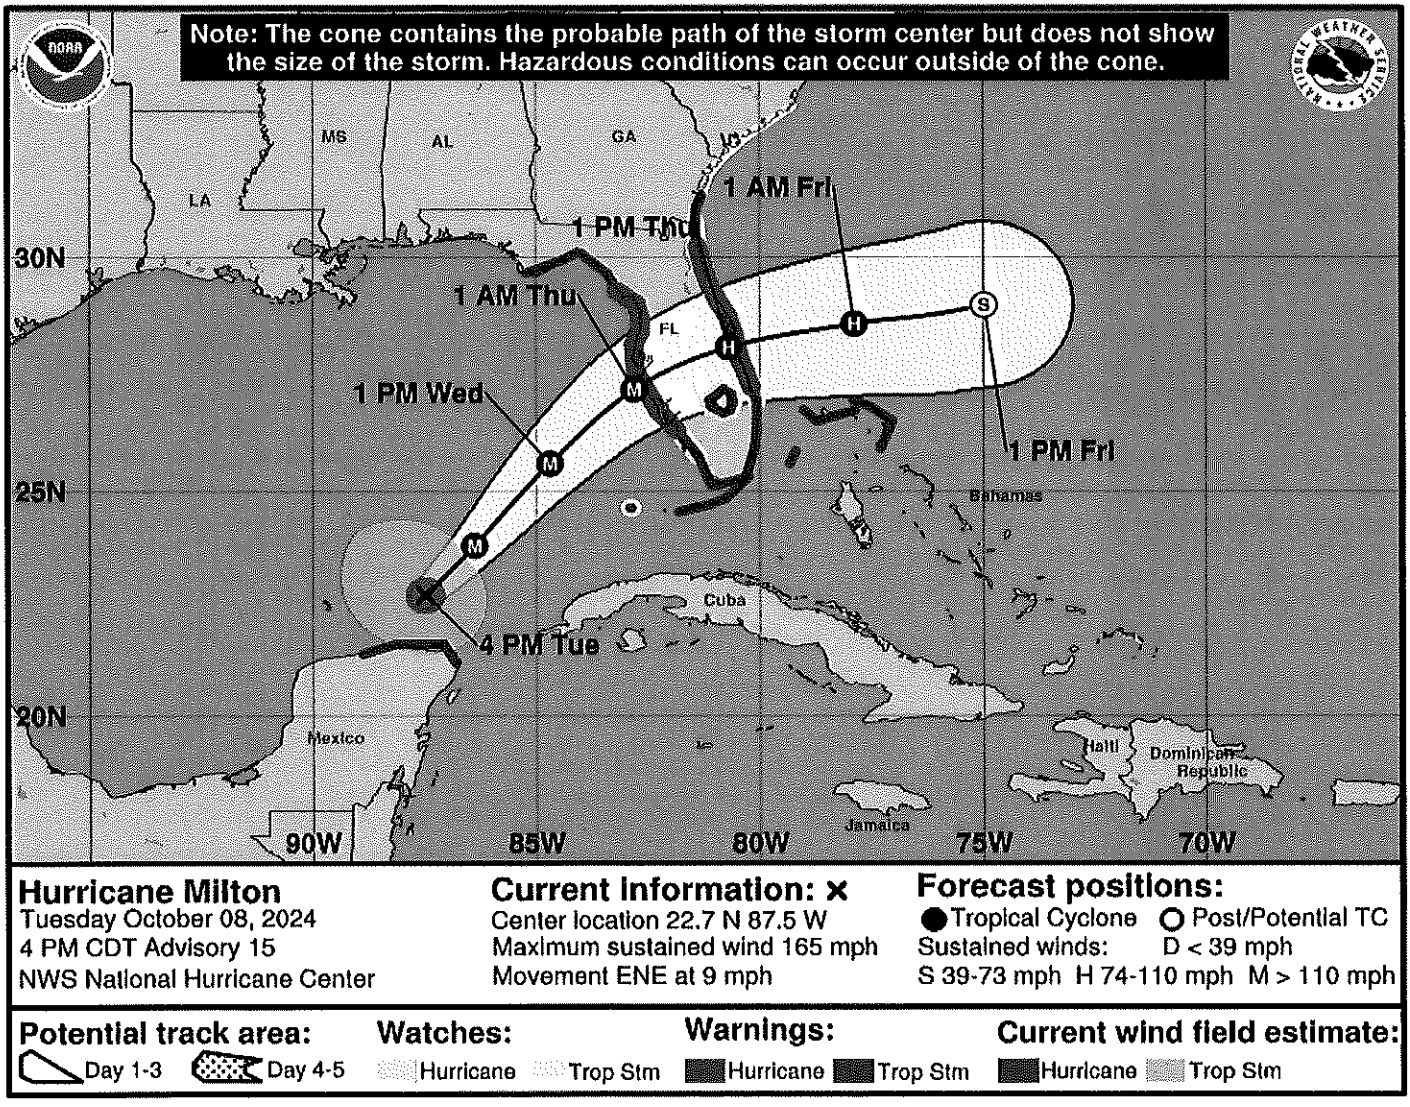
According to the National Hurricane Center, Milton wobbled earlier today, but the longer-term motion is toward the east-northeast near 9 mph. On the forecast track, the center of Milton will move across the eastern

Gulf of Mexico through Wednesday, make landfall along the west-central coast of Florida Wednesday night, and move off the east coast of Florida over the Atlantic Ocean on Thursday.

As of this update, the latest storm information is as follows:

- The track for Hurricane Milton has moved south. The center of the track is near the Sarasota/Bradenton area.
- The maximum sustained wind speed has increased to 165 mph (Category 5 starts at 157 mph).
- The minimum central pressure based on dropsonde data is 918 mb.
- Hurricane Milton is moving ENE at 9 mph.
- We are still under a Storm Surge Warning.
- We are still under a Hurricane Warning.
- Hurricane-force winds extend outward up to 30 miles.
- Tropical-storm-force winds extend outward up to 140 miles.
- Storm surge estimates have been raised to 8' - 12' along the Lee County coast.

As of this update, new notifications are as follows:



- Animal Control has closed operations due to the State of Emergency.
- Additional canopies are being distributed to the precincts.
- Communications will be receiving their schedules from their supervisors.
- The Incident Management Team will report to the EOC on Wednesday at 1700.
- The Medical Examiner's Office will be available on LCME1. If you cannot get in touch with the ME's Office via phone, ask the Communications Supervisor to patch a channel to LCME1.
- The Town of Fort Myers Beach has issued a Mandatory Evacuation by 10:00 PM on Tuesday, October 8, 2024.
- The Town of Fort Myers Beach has imposed a 24-hour daily curfew to begin at 10:00 PM on Tuesday, October 8, 2024.
- The City of Sanibel has a curfew and Mandatory Evacuation beginning at 10:00 PM.
- Agriculture Unit assets have been secured.
- Shelters:
    - Alico Arena - 54
    - Dunbar High School: Occupancy 174, FMPD Covering Shelter

Subject: Hurricane Milton - Update #28

As of this update, the latest storm information is as follows:

- The current track continues to be a worst case scenario situation for the Tampa Bay region southward to Sarasota.
- The track for Hurricane Milton is still toward the lower Tampa Bay/Bradenton/Sarasota area.
- Rainfall amounts of 5 to 12 inches, with localized totals up to 18 inches are expected. Many rivers are now forecast to go into moderate to major flood stage with a few possibly reaching record levels.
- The current most likely arrival time in Lee County for tropical-storm-force winds is 3:00 PM on Wednesday, with a most likely departure time of 9:00 AM on Thursday.
- Movement is ENE at 8 mph.
- The maximum sustained wind speed has increased to 155 mph (Category 4; Category 5 starts at 157 mph).
- The minimum central pressure based on dropsonde data is 923 mb.
- We are still under a Storm Surge Warning.
- We are still under a Hurricane Warning.
- Hurricane-force winds extend outward up to 30 miles.
- Tropical-storm-force winds extend outward up to 105 miles.
- A 6' to 10' storm surge is still expected along the Lee County coast.
- Surf swells generated by Milton are expected to continue to affect much of the Gulf Coast over the next day or two, and are likely to cause life-threatening surf and rip current conditions.

As of this update, new notifications are as follows:

- Additional documentation for welfare checks (17w) will be required. Supervisors will be disseminating the information to the affected personnel.
- All Marine assets are secured at JetBlue and the 4th Precinct, and the vessel assets that will be deployed with the Marine Unit will be secured at LeeTran.
- Shelters:
    - Alico Arena - 54
    - Dunbar High School: Occupancy 174, FMPD Covering Shelter
    - Estero Recreation Center: Registered - 662, At Shelter - 217
    - Hertz Arena: At Shelter - 212
    - Island Coast High School: At Shelter - 311
    - Oak Hammock Middle: At Shelter - 273
    - Ray Pottorf Elementary: Occupancy is 62
    - Tortuga Elementary: At Shelter - 60
    - Varsity Lakes Middle: At Shelter - 0
    - Gateway High School: At Shelter - 17
    - Harns Marsh Elementary: At Shelter - 2
    - Harns Marsh Middle: At Shelter - 53
    - East Lee County High School: At Shelter - 53
    - SOPU Shelter: At Shelter - 2

Gas Station Updates:

AMERICAN OVERSIGHT

- Circle K at Buckingham and Old Olga has gas for LEO at Pumps 1 and 2. Will be open until at least 10pm.

Subject: Hurricane Milton - Update #27

As of this update, the latest storm information is as follows:

- The track for Hurricane Milton is still toward the lower Tampa Bay/Bradenton/Sarasota area.
- Movement is ENE at 9 mph.
- The maximum sustained wind speed has increased to 150 mph (Category 4).
- Milton is forecast to expand in size as it approaches the West Coast of Florida.
- The minimum central pressure based on dropsonde data is 929 mb.
- We are still under a Storm Surge Warning.
- We are still under a Hurricane Warning.
- Hurricane-force winds extend outward up to 30 miles.
- Tropical-storm-force winds extend outward up to 105 miles.
- A 6' to 10' storm surge is still expected along the Lee County coast.
- Surf swells generated by Milton are expected to continue to affect much of the Gulf Coast over the next day or two, and are likely to cause life-threatening surf and rip current conditions.

As of this update, new notifications are as follows:

- Corrections B-Side Days and Nights is being activated at 0400 on Wednesday, 10/9/24.
- The Trianon Hotel has advised that LEO is welcome to park in the parking lot and use their facilities if needed.
- Communications is accepting E-Agent responses on behalf of the Sanibel Police Department due to the shutdown of their servers.
- The Town of Fort Myers Beach is currently under evacuation orders
- Water will be shut off to the Town of Fort Myers Beach (Barrier Island) today (10/08) at 12:00 PM.
- Sanibel Island will have an evacuation order as of tonight (10/08) at 10:00 PM.
- Sanibel Island will have a curfew beginning tonight (10/08) at 10:00 PM
- FPL, LCEC, and WastePro are completing staging efforts. WastePro will be closed until Friday, 10/11/24.
- Shelters:
    - Phase 1 shelters opened 10/7/24 at 3:00 PM.
    - Phase 2 shelters opened this morning at 8:00 AM.
    - Phase 3 shelters are opening at 12:00 PM today.
        - Shelter Status
            - Dunbar High School: Occupancy 174, FMPD Covering Shelter
            - Estero Recreation Center: Registered - 495, At Shelter - 117
            - Hertz Arena: At Shelter - 62

AMERICAN OVERSIGHT

    - Island Coast High School: At Shelter - 173
    - Oak Hammock Middle: At Shelter - 150
    - Ray Pottorf Elementary: Occupancy is 62
    - Tortuga Elementary: At Shelter - 37 + 21 School Staff and 13 County Employees
    - Varsity Lakes Middle: At Shelter - 0
    - Gateway High School: At Shelter - 2
    - Harns Marsh Elementary: Opens at 1:00 PM
    - Harns Marsh Middle: Opens at 1:00 PM
    - East Lee County High School: Opens at 12:00 PM
    - SOPU Shelter: At Shelter - 1
- The Fire Department has two (2) swiftwater teams on standby.
- Charlotte County has closed all of their hospitals, so there may be a potential influx of patients to Lee County.
- Lee Health Urgent Care is closing tonight at 7:00 PM.
- Parks and Rec is responding to the Volleyball Court on Three Oaks Parkway to deter citizens from taking sand.

Gas Station Updates:

- WaWa on Santa Barbara and Veterans in Cape Coral just received a gas delivery. Pump #1 is reserved for First Responders.
- RaceTrac at Six Mile and Michael G. Rippe Parkway has fuel for First Responders on Pump #3 (there is an out of order tag on it).

Hurricane Passes:

- Below are what the Hurricane Passes will look like for Fort Myers Beach and Sanibel:

Subject: Hurricane Milton - Update #26

As of this update, the latest storm information is as follows:

- The current track for Hurricane Milton continues to be a worst-case scenario for the Tampa Bay region southward to Sarasota. It is forecast to make landfall in Florida Wednesday night.
- The current maximum sustained winds are 145 mph. The movement is ENE at 12 mph.
- There is a Hurricane Warning in effect for the entire area. A Category 3 is forecast at landfall, with the expanding wind field still expected.
- The Storm Surge estimate is expected to be 6' - 10'. By comparison, the surge during Hurricane Helene was measured at 5.12 feet above MHHW and was measured at 11:36 PM, *almost 10 hours <u>after</u>* a peak

AMERICAN OVERSIGHT

wind gust of 63 mph taken at Tarpon Point at 1:51 PM. The peak water levels estimated elsewhere along coastal Lee County ranged from 2' to 5' above MHHW.

- There is a 97% chance that the earliest arrival time of tropical-storm-strength winds is 8:00 AM on Wednesday. The likely arrival time for those winds is 12:00 PM on Wednesday. The likely departure time with this update is 7:00 AM on Thursday, with the latest departure time being 12:00 PM on Thursday.
- There is a Flood Watch for the entire area.
- We are still under a Hurricane Warning.
- Hurricane-force winds extend out to 30 miles from the center, and tropical-storm-force winds extend outward up to 105 miles.
- The minimum central pressure based on aircraft dropsonde data is 929 mb.

As of this update, new notifications are as follows:

- Precinct supervisors are finalizing employee shelter arrangements should the need arise.
- VERT (Volunteer Emergency Response Team) members from the Civilian Support Unit (CSU) are on standby to assist with post-storm deployments.
- Florida DOT is reinforcing the Sanibel Causeway with armor stone near the toll plaza and securing the barges and other equipment. Intermittent road closures for equipment movement are being performed by FLDOT.
- Seventeen (17) nursing facilities are closed in Lee County.
- EOC passed out nearly 100,000 sand bags and is out of bags.
- Sand deliveries have stopped and no more sand deliveries are planned by EOC.
- Three county shelters are open and operating:
    - Island Coast HS Shelter has approximately 71 present and 446 registered.
    - Estero Rec Center has approximately 114 present and 132 registered.
    - Dunbar High School is being staffed by Fort Myers Police Department personnel.

Gas Station Updates:

- Loves Travel Station in North Fort Myers is open for First Responders only at this time.
- 7-11 at 24530 S Tamiami Trl has fuel. Pump 2 is for LEO.
- 7-11 at 24651 S Tamiami Trl has fuel. Pump 4 for LEO.
- 7-11/Sunoco at 27990 is out of fuel.
- 7-11/Mobile at 28175 S Tamiami Trl has fuel. Pumps 1 & 2 for LEO.
- 7-11 at 26975 Old 41 Road has fuel and will reserve ALL pumps for LEO.
- Circle K at 10460 Bonita Beach Rd (Old 41 & Bonita Beach Road) has fuel. Pump 1 & 3 for LEO.
- Racetrack at 13050 Bonita Beach Rd (Bonita Beach Road & Bonita Grande) has fuel. Pumps 17 & 18 for LEO.
- RaceTrac at 22350 S Tamiami Trl has other grades of fuel, but is out of regular. Pump 18 for LEO.
- 7-11 at 21850 S Tamiami Trl has fuel. Pump 1 for LEO.
- Rebel at 12030 Bonita Beach Rd SE, will reserve fuel for LEO.
- 7-11 at Terminal Access has fuel. Pumps 9 & 10 for LEO. (must go inside and let the clerk know to turn on the pump)
- 7-11 at 12011 Gateway Blvd has fuel. Pump 2 for LEO. (must go inside and let the clerk know to turn on the pump)
- 7-11 at 100 Delaware Rd. in Lehigh Acres has two pumps reserved for LEO and EMS.

AMERICAN OVERSIGHT

Definitions:

- MHHW - Mean Higher High Water (MHHW) is the average level of the highest tide for each day computed over a 19-year period.
- Dropsonde - GPS dropsondes measure vertical profiles of atmospheric temperature, pressure, humidity, and wind speed as they fall from the aircraft to the surface. They are equipped with a small parachute that slows their descent and maintains vertical orientation. The dropsonde transmits data by radio four times a second to the aircraft until it reaches the surface of the ocean.

Subject: Hurricane Milton - Update #19

AMERICAN OVERSIGHT

As of this update, the latest storm information is as follows:

- The storm track has shifted north slightly. The movement is not far enough to make a difference in our impacts.
- The earliest reasonable arrival time of tropical-storm-force winds is early Wednesday morning.

As of this update, new notifications are as follows:

- The Hurricane Hotline is now active. Corrections personnel should call 239-477-1258, Law Enforcement personnel should call 239-477-1259, and Communications personnel should call 239-477-1260. Please save these numbers now in your phone. This hotline provides updates for personnel without access to e-mail. For now, all supervisors should relay all pertinent information to their personnel who do not have access to e-mail.
- Mandatory evacuations have been issued for the Town of Fort Myers Beach. Residents are encouraged to evacuate before 3:00 PM today.
- LeeTran at noon today, Monday, Oct. 7, will stop running routes onto Fort Myers Beach. All LeeTran services will convert to off-island transit only. This is to assist with the Town of Fort Myers Beach's request for residents to leave the island.
- Lee County Utilities will shut off water to Fort Myers Beach at noon Tuesday, Oct. 8. This is a precautionary measure to protect infrastructure. It was also implemented during 2022's Hurricane Ian.
- Lee County Sheriff's Office employees are currently in the field distributing sand and sand bags to locations throughout the county.

Gas Station Updates:

- 7-11 at SR 31/SR 80 received a fuel shipment this morning. Pumps 11 and 12 are for LEO. Make contact inside for pumps to be turned on.
- 7-11 at Billy's Creek is out of gas. Expecting shipment today. Will set aside fuel for LEO at Pump #1. Make contact with employee to have pump turned on.
- RaceTrac SR 31/ SR 80 has gas but expect to be out by noon and closed. Next shipment not expected until after the storm. They do not have a pump set aside for LEO.
- Circle K at SR 80/ Old Olga has fixed the pump and have a full tank for LEO. Make contact with employee for which pump to use.
- Sunoco at SR 80 and Buckingham is out of gas but requested shipment. Will pump remaining for LEO. Make contact with employee inside for pump to be turned on.
- Rebel at 6 Mile/Metro currently has 8,000 gallons and will stop pumping at 800 gallons. They do not set aside gas for us. Unknown next shipment.
- RaceTrac at 6 Mile/Michael G Rippe is out of gas but requested shipment. They will set up a Pump #3 for LEO use when they get gas. Make contact with employee for pump to be turned on.
- Race Trac at Daniels/Powers Ct is out of gas. Shipment has been requested. Will set up pump for LEO use. In the past it has been Pump 18.
- 7-11 Daniels/Palomino is out of gas. Expecting shipment today and will contact me when they receive it. Pump 10 will be set aside for LEO.
- Rebel at 9281 Daniels Pkwy is out of gas. Requested shipment for today. Pump 1 will be set aside for LEO. Go inside to have pump turned on.
- Chevron at 13031 Metro is out of gas. Not expecting shipment. Will set a pump aside for LEO if they get gas.
- Circle K at Metro and Crystal is close to running out of gas and starting to shut pumps down. They are setting aside pumps 5-8 for LEO. Meet with employee for which pump to use.

Subject: Hurricane Milton - Update #18

As of the 8:00 AM update, a Hurricane Watch remains in effect for our area.

The IMT Main Number is 239-258-3150 or e-mail at IMT@sheriffleefl.org.

As of this update, the latest storm information is as follows:

- Hurricane Milton is now a major hurricane, with sustained wind speeds of 125 mph.
- Hurricane Milton is expected to have winds of 145 mph at landfall, with some expansion of hurricane-strength winds.
- The model spread in the forecast track remains high, with the entire area within the cone.
- Movement is ESE at 8 mph.
- The current earliest arrival of tropical-storm-strength winds is 1:00 AM on Wednesday, with a likely arrival time at 8:00 AM. This is the arrival of tropical-storm-force winds, not the arrival of the actual storm.
- The storm surge estimate is 5' to 10' for Lee County. It is expected to increase throughout the day on Wednesday and peak early Thursday.
- We are still in a Hurricane Watch, a Storm Surge Watch, and a Flood Watch.
- Many rivers are already in or forecast to go into flood stage.
- The main threat for tornadoes is late Tuesday into Wednesday night.
- Confidence is low on the exact track of the system, with the entire area within the cone. It should be noted that that 72 hour average track error is 100 miles.

As of this updates, new notifications are as follows:

- All personnel must notify IMT of all asset movements and personnel changes.
- Estero Fire Station #54 at Oriole and Alico just got sand delivered.
- Pine Island Fire has sand, but no sandbags.
- North Fort Myers Recreations Center has sand but no sandbags.
- Corrections Transport vehicles have received their staging location and should be in place by 12:00 PM.
- Academy recruits and Youth Services deputies have been deployed to the field.

National Hurricane Center Definitions:

- **Hurricane Watch**: Hurricane conditions (sustained winds of 74 mph or greater) are possible within your area. Because it may not be safe to prepare for a hurricane once winds reach tropical storm force, The NHC issues hurricane watches 48 hours before it anticipates tropical storm-force winds.
- **Hurricane Warning**: Hurricane conditions (sustained winds of 74 mph or greater) are expected somewhere within the specified area. NHC issues a hurricane warning 36 hours in advance of tropical storm-force winds to give you time to complete your preparations. All preparations should be complete. Evacuate immediately if so ordered.
- **Storm Surge Watch**: There is a possibility of life-threatening inundation from rising water moving inland from the shoreline somewhere within the specified area, generally within 48 hours.

AMERICAN OVERSIGHT

- **Extreme Wind Warning**: Extreme sustained winds of a major hurricane (115 mph or greater), usually associated with the eyewall, are expected to begin within an hour. Take immediate shelter in the interior portion of a well-built structure.

Subject: Hurricane Milton - Update #17

The 5:00 AM update shows that the track is largely unchanged; however, models still vary from Naples to North of Tampa, and the intensity is forecast to be stronger, well into the Category 4 range.

As of this update, new notifications are as follows:

- The storm has current maximum winds of 100 mph.
- The current forecast for our coast is an 8' - 12' storm surge.
- The storm has slowed somewhat, so the earliest arrival of Tropical Storm force winds is now in the early Wednesday morning hours.

Subject: Hurricane Milton - Update #15

As of the 8:00 PM National Hurricane Center update, Hurricane Milton is still forecast to rapidly intensify into a major hurricane. The center of the track has shifted further south, and is currently near the Bradenton/Sarasota area at landfall.

There is a Flood Watch for the entire area. Rainfall amounts of 5 to 10 inches, with localized totals of up to 15 inches are expected. The timing of the impacts is as early as late Tuesday and continuing into Thursday morning.

A good deal of uncertainty remains with where the storm will make landfall. It should be noted that the average NHC track error at day 3 is around 100 miles.

As of this update, new notifications are as follows:

- Youth Services and Training personnel have received their assignments and will report according to their schedule tomorrow.
- Court Operations and Civil personnel will receive their schedule tomorrow.
- Employee Assistance personnel are done for the evening. They will resume in the morning.
- IMT will be fully activated beginning at 7:00 AM on Monday, with all personnel reporting or receiving their assignments by then.
- For personnel working overtime, please use *Hurricane Milton* as the reason for the overtime.
- The 7-11 Gas station at 103 Leeland Heights Blvd W in Lehigh Acres is open for LEO. If you need gas, use pumps 3,4,5, or 6 only. Jessica is the contact person there.
- The 7-11 at 100 Delaware Rd. in Lehigh Acres is reserving gas for First Responders. use Pump 3 and 4. Sharon is the contact person there.
    - The 7-11 at 18971 Babcock Ranch Rd is holding gas for first responders but deputies must go inside to request pump to be turned on.
    - The 7-11 at Del Prado and N Tamiami (17930 N Tamiami Trl.) is also holding gas for first responders but deputies must go inside to request the pump be turned on.

All personnel should be ready for a full activation at any time. This is a serious, dangerous storm and all personnel should complete preparations as soon as possible. Models vary in intensity, but most predict *at least* a Category 3, so even if we do not receive a direct hit, we can expect hurricane strength winds or wind gusts and a severe storm surge.

Subject: Hurricane Milton - Update #14

AMERICAN OVERSIGHT

As of the 5:00 PM update, Milton is now a hurricane. Hurricane Milton has maximum sustained winds of 85 mph. The track has shifted slightly, and there is a more northeastern path across our area. Even if we do not

receive a direct hit, we will receive tropical storm and hurricane strength winds, significant storm surge, and dangerous flooding from rainfall, likely much greater that what we received from Hurricane Helene. By tonight, all personnel should have their homes and families secured for the storm, and be prepared for a full activation.

Notifications for this update:

- All agency members deemed non essential during an emergency response will be dismissed tomorrow, October 7th, 2024 starting at **noon**. In order to stay home you will need to advise your immediate supervisor and use your accrued time. You may report for regular duty if you chose to do so. As always, use caution when driving in inclement weather and do not attempt to traverse standing water. IMT will continue to send out updates on our response to TS Milton.

- The Emergency Operations Center (EOC) will transition to a Level 1 at 7:00 AM tomorrow. This means that shelters and countywide operations will be run out of the EOC. The Incident Management Team is your contact for agency needs; do not contact the EOC directly.

Subject: Tropical Storm Milton - Update #13

The 2:00 PM Intermediate Update shows that there are no significant changes in the track. The earliest arrival of tropical storm force winds is projected to be 8:00 PM on Tuesday.

These are the stations that are reported to still have gasoline:

- Veronica Shoemaker/Winkler
- Shell station at Hancock and US 41
- BJ's Cape Coral
- 711 Burnt Store and Pine Island has DIESEL only
- Racetrac at South Pointe and College has 93 Only
- Walmart / Murphy's USA in Lehigh
- Santa Barbara and Veterans 7/11

These are the stations that are reported to be currently **out** of gasoline:

- Country Club and Veterans Circle K
- Del Prado Speedway
- Trafalgar and Skyline 7/11
- Rebel US 41 and Del Prado
- 76 at Chiquita and Pine Island
- Walmart/Murphy's Del Prado
- Walmart on Pine Island Road
- Pine Ridge and San Carlos 7/11
- Santa Barbara and Gleason 7/11
- Palm Tree and Cape Coral Pkwy 7/11

AMERICAN OVERSIGHT

- Lee and Gunnery 7/11
- Del Prado Racetrac
- Terry St Circle K
- Lee and Alvin Racetrac
- Joel Citgo
- N Cleveland and Littleton 7/11

Below are the current updated tasks that IMT has been working on since that last updates:

- Logistics members have scheduled pre-storm deliveries for food and beverages - the arrival time is Tuesday morning.
- Logistics members have scheduled post-storm deliveries from vendors.
- Logistics members have scheduled water deliveries.
- Logistics members have created plans for replenishment of supplies for long-term activations.
- Logistics members have arranged for ice deliveries for the event power is lost.
- Purchasing members have made plans for the procurement of potable water.
- Purchasing and Logistics members have scheduled the delivery of portable bathrooms should they be needed.
- HQ will be the central location for cooking needs post-storm for employees at HQ/IMT, Forensics, MCU, Command Staff, Spec Ops, and Staging personnel.
- Precincts and Corrections facilities will be responsible for their meal preparations.

Subject: Tropical Storm Milton - Update #12

The 11:00 AM update shows a small track shift to the south. Although it is still predicted to directly hit the Tampa Bay Area, the move slightly south may bring higher wind speeds and higher storm surge. The storm is expected to quickly intensify and will likely be a major hurricane upon arrival.

All personnel are encouraged to complete preparations for their homes and their families today.

There is still a high degree of uncertainty in both the tracks and the wind speed upon arrival, so the possibility of a direct strike to our area remains. The cone of uncertainty currently covers most of the Florida peninsula. The Incident Management Team (IMT) will keep you informed, and is making preparations to include schedule planning.

Subject: Tropical Storm Milton - Update #8

The 8:00 AM update shows that Milton is forecast to become a Major Category 3 Hurricane before making landfall. Timing, tracks, and intensity are still unpredictable; however, the National Hurricane Center still shows the track toward the Tampa area.

The current forecast is as follows:

- There is a Flood Watch for the entire area through Thursday.
- Rainfall in the amount of 5" to 8", with localized totals up to 12".
- The timing of the impacts is from late Tuesday through early Thursday morning, but it is expected to make landfall on the West Coast on Wednesday.
- There is great uncertainty about where the storm will make landfall. The average Day 4 track error is around 150 miles, so we are still well within a possible landfall range.
- The current earliest wind time arrival is 4 PM on Tuesday, and the most likely arrival time is 2 AM on Wednesday.

Additional notifications for this update include:

- Personnel should maintain at least ½ tank at all times. Due to current fuel runs, please use any opportunity to make sure your agency vehicle stays full at all times.

AMERICAN OVERSIGHT

- Personnel who must fuel and have no other options may use 89 or 93 Octane fuel.
- Select IMT members have been activated. Please send requests to IMT@sheriffleefl.org.
- The select CRU members who were notified individually will report at 10:00 AM to the Headquarters Training Room (1202).
- The asset movement members who were notified individually will report at 10:00 AM to the Headquarters Training Room (1202).
- All units, components, precincts, corrections facilities, and all affected agency departments should fill up all available gas cans and gas tanks.
- Pine Island Fire Department is out of sand. They still have sandbags. They expect to get more sand on Monday.

Subject: Tropical Storm Milton - Update #7

With the 5:00 PM update, Tropical Storm Milton is now expected to arrive as a major hurricane. The track has shifted some to the north; however, some model tracks still show direct hits our our area, and we are still in the cone of uncertainty. Please recall from prior storms that although we are not in the direct path, the effects of the hurricane will still affect us heavily, especially in the areas prone to storm surge. Additionally, the peak storm surge from Helene arrived almost 10 hours after the peak winds, so all personnel should be aware of and consider the effects before, during, and after the storm.

The below preparations remain in effect. The only change for this period is:

- Four (4) additional shallow water vessels have been obtained for water rescues.
- Additional High-Water Vehicles have been obtained and will be deployed to the islands for potential high-water rescues.
- The San Carlos Park Fire Department is out of sand and sandbags.

Subject: Tropical Storm Milton - Update #6

As of a 12:25 PM National Hurricane Center update, Tropical Storm Milton has formed. This storm is forecast to strengthen and bring the risk of life-threatening impacts to portions of the West Coast of Florida next week. The maximum winds are currently estimated at 40 mph with higher gusts. Models range in intensity from a Tropical Storm to a Major Hurricane, so there is tremendous unpredictability in the strength upon arrival.

At this time, the Incident Management Team is preparing for the possibility of a major hurricane affecting our area with impacts beginning on Tuesday and a full impact on Wednesday.

All agency personnel are encouraged to prepare as follows:

- All personnel should review their hurricane plans, and prepare their homes and families for the possibility of a hurricane impact in the middle of next week.

AMERICAN OVERSIGHT

- All precincts should secure their mobile assets (decoy vehicles, arrow boards, trailers, ATVs, etc.) beginning on immediately to be completed by 2:00 PM on Monday.
- All trailers should be brought to storage beginning immediately to be completed by 2:00 PM on Monday.
- All personnel should use the remainder of this weekend to prepare for a possible activation. This plan should include three days worth of food, uniforms, and supplies.
- All personnel should use the remainder of this weekend to prepare their uniforms and equipment (including sufficient batteries for equipment) for a possible activation.
- All specialty units should begin bringing their assets back to their storage areas and secure locations. This should be completed by 2:00 PM on Monday.
- All precincts should secure any items that can be moved by the wind to a secure location starting immediately to be completed by 2:00 PM on Monday.
- All Corrections facilities (including Nan's Ranch) should prepare their facilities for a possible hurricane impact next week.

This is new information as of this update:

- The Waterborne Strike Team is on standby for deployment for water rescues.
- JetBlue Stadium, CenturyLink Stadium, the Lee County Gun Range, and the Andrea Lane and Sivan Road storage buildings are prepared to receive assets if needed.
- The Marine Unit is in contact with the IMT to secure the marine assets.
- Known sandbag locations are as follows:
    - Punta Gorda—Free sandbags will be available at 3130 Cooper St., the last entrance on the left by flag poles.
    - Fort Myers Beach—Sand is located off of Gulf Beach Road, and bags are available at Town Hall, 2731 Oak St. (The location will provide service until 4:30 p.m. on Friday and begin Monday at 8:30 a.m.)
    - Fort Myers— South Trail Fire & Rescue will have sand and sandbags available at station 63, 5531 Halifax Ave., Fort Myers—a maximum of 20 bags per household. UPDATE: South Trail Fire & Rescue is currently out of sand. Empty sandbags only are available.
    - Naples— Sandbags will be available at three public park locations: Big Corkscrew Island Regional Park, 810 39th Ave., North Collier Regional Park, 15000 Livingston Road, in the Sun-N-Fun Lagoon parking lot, and at Donna Fiala Eagle Lakes Community Park, 11565 Tamiami Trail East, in the grassy area between the parking lots. The Naples sandbag locations will begin service at 8 a.m. through dusk on Saturday and Sunday.
    - San Carlos Park—Sand and sandbags are available at San Carlos Park Fire District Station 54, located at 16900 Oriole Road. There is a limit of 10 bags per household. Bags can be picked up at the lobby. Bring your own shovel. Be prepared to fill and load your own sandbags. Make sure your vehicle can transport the weight of the sandbags.
    - North Fort Myers—Sandbags will be located at North Fort Myers Parks and Recreation, 2000 N. Recreation Parkway. Sand will be located in the back of the park, next to the county mulch pile. Please bring your own shovel to fill the bags.
    - Matlacha—Sandbags are available for pickup at Station 1, located at 5700 Pine Island Rd, Bokeelia, FL 33922
- IMT personnel are visiting the precincts, and the storage locations to inventory assets to prepare for both securement and post-storm deployment.
- No schedule changes are expected between now and Monday afternoon; however, all personnel should be prepared for schedule adjustments.
- The Agriculture assets are secured on the Olga site.

Subject: Important Update on a possible impending hurricane impacting our area (Update #5)

Team,

IMT has been working on preparation for a potential Hurricane impacting our area early next week. IMT will continue to send out updates regularly so please monitor your email closely. All agency units need to begin preparations of securing their assigned assets and communicate all movement to IMT. Also, update the major asset application on the intranet. We have secured Jet Blue Park as an asset staging area for Marine and other assets. Agency asset storage facilities to include the gun range are preparing to house assets as well. IMT is securing high water vehicles that will be pre-staged at strategic locations i.e., the barrier islands. IMT members will be in the RTIC today coordinating efforts. Agency extension 239-258-3150 is being setup to communicate to IMT staff. Additional updates to follow.

Be prepared and be safe!

Subject: New Caribbean Disturbance - Update #4

The National Hurricane Center 2:00 PM update shows the possibility of development as the low pressure area in the Gulf of Mexico moves slowly eastward or northeastward. A tropical or subtropical depression or storm could form during the early to middle part of next week if the low remains separate from a frontal boundary that is forecast to extend across the Gulf of Mexico. Regardless of development, locally heavy rains could occur over portions of the Florida Peninsula late this weekend into next week. As of this update, the formation chance in the next 48 hours is low at 10 %, and the formation chance through 7 days has increased to 50%.

Current model runs show an arrival time of any potential storm around Wednesday of next week. This represents a slower forward storm speed and later storm arrival than previous model runs, so the timing and impacts are still largely unknown. Regardless of any potential storm, significant rainfall is still expected, and the Incident Management Team will continue to monitor and update all personnel.

Sent: Thursday, October 3, 2024 9:56 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance - Update #3

The National Hurricane Center has reduced the chance of tropical cyclone development within seven days to 30%. While the system is likely to develop over the Gulf of Mexico late this weekend or early next week, subsequent tropical or subtropical development could be limited by the system's potential interaction with a frontal boundary. Regardless of development, locally heavy rains could occur over portions of the Florida Peninsula next week.

Subject: New Caribbean Disturbance - Update #2

The forecast for the area of disorganized showers remains the same; it is still too early to tell if the system will develop further. Regardless of development, heavy rain is expected in our area into the weekend and next week. The Incident Management Team will continue to monitor.

From: IMT <IMT@sheriffleefl.org>
Sent: Tuesday, October 1, 2024 10:35 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance - Update #1

The area of disorganized showers remains at a 40% chance of development. The National Hurricane Center indicates that environmental conditions could support some gradual development of this system, and a tropical depression could form towards the end of this week or this weekend while it moves generally northwestward over the northwestern Caribbean Sea and into the Gulf of Mexico. As of this time, there are no changes, but some long range models show an increased chance of this disturbance affecting our area.

From: IMT <IMT@sheriffleefl.org>
Sent: Monday, September 30, 2024 8:11 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance

The Incident Management Team is monitoring a new area of disorganized showers and thunderstorms over the western Caribbean Sea. The National Weather Center states that the system has a medium chance (40%) of developing towards the middle to latter part of the week as it moves northwestward into the Gulf of Mexico. As this disturbance moves into the gulf, increasing moisture is expected over the Florida Peninsula and elevated rain chances are anticipated from Friday through the weekend, and possibly into early next week.

Unfortunately, long range models show the possibility of direct impacts for Southwest Florida; however, It is too early to determine what, if any, tropical specific impacts can be expected.

The Incident Management Team will continue to monitor the storm, and will continue to provide updates through this very active part of the hurricane season.

Subject: Hurricane Milton - Update #31

According to the National Hurricane Center, Milton continues to move toward the east-northeast at 12 mph. On the forecast track, the center of Milton will move across the eastern Gulf of Mexico tonight and Wednesday, make landfall along the west-central coast of Florida Wednesday night, and move off the east coast of Florida over the Atlantic Ocean on Thursday. The forecast cone remains consistent with the past two forecasts.

As of this update, the latest storm information is as follows:

- The maximum sustained wind speed has increased to 160 mph (Category 5 starts at 157 mph).
- The minimum central pressure based on dropsonde data is 915 mb.
- Hurricane Milton is moving ENE at 12 mph.
- We are still under a Storm Surge Warning.
- We are still under a Hurricane Warning.
- Hurricane-force winds extend outward up to 30 miles.
- Tropical-storm-force winds extend outward up to 140 miles.
- Storm surge estimates have been raised to 8' - 12' along the Lee County coast.

As of this update, new notifications are as follows:

- Scheduling for CIB for October 9, 2024 is as follows: CIB members assigned to dayshift (0700-1730) will report to their normal CIB unit and be available for mission-specific assignments from IMT. CIB members assigned to night shift (1730-0400) will report to their assigned Precinct and then shelter with them once the order is given. Night shift may be held longer if the conditions are not safe to travel at 0400.
- Scheduling for Communications: Nightshift (Squad 4) tomorrow will report to the EOC 1700 hours.
- Scheduling for Warrants: Night shift will also report tomorrow to the EOC at 1700 hours.
- Fort Myers Beach has implemented a curfew that started at 10 pm.
- Sanibel Island has implemented a curfew that started at 10 pm. The island is currently only open to LEO and Sanibel government officials only.
- There have been reported issues with fuel cards due to increased use. If anyone is running into any issues with their fuel card, please reach out to IMT.

Subject: Hurricane Milton - Update #29

According to the National Hurricane Center, Milton wobbled earlier today, but the longer-term motion is toward the east-northeast near 9 mph. On the forecast track, the center of Milton will move across the eastern Gulf of Mexico through Wednesday, make landfall along the west-central coast of Florida Wednesday night, and move off the east coast of Florida over the Atlantic Ocean on Thursday.

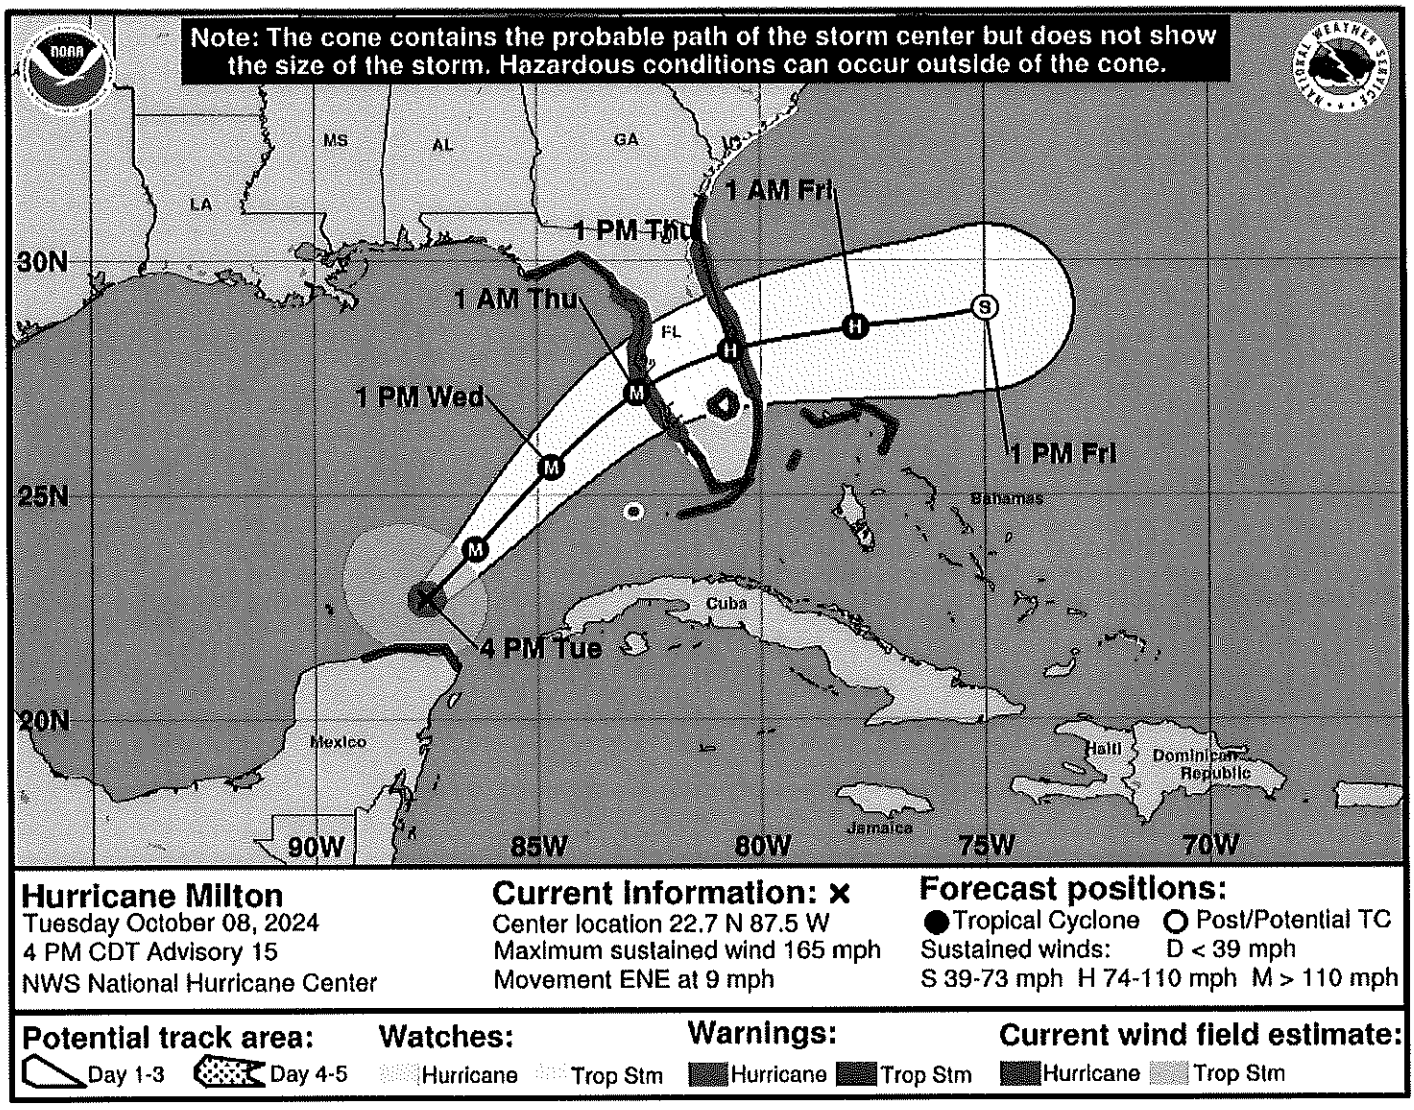
As of this update, the latest storm information is as follows:

- The track for Hurricane Milton has moved south. The center of the track is near the Sarasota/Bradenton area.
- The maximum sustained wind speed has increased to 165 mph (Category 5 starts at 157 mph).
- The minimum central pressure based on dropsonde data is 918 mb.

AMERICAN OVERSIGHT

- Hurricane Milton is moving ENE at 9 mph.
- We are still under a Storm Surge Warning.
- We are still under a Hurricane Warning.
- Hurricane-force winds extend outward up to 30 miles.
- Tropical-storm-force winds extend outward up to 140 miles.
- Storm surge estimates have been raised to 8' - 12' along the Lee County coast.

As of this update, new notifications are as follows:



- Animal Control has closed operations due to the State of Emergency.
- Additional canopies are being distributed to the precincts.
- Communications will be receiving their schedules from their supervisors.
- The Incident Management Team will report to the EOC on Wednesday at 1700.
- The Medical Examiner's Office will be available on LCME1. If you cannot get in touch with the ME's Office via phone, ask the Communications Supervisor to patch a channel to LCME1.
- The Town of Fort Myers Beach has issued a Mandatory Evacuation by 10:00 PM on Tuesday, October 8, 2024.
- The Town of Fort Myers Beach has imposed a 24-hour daily curfew to begin at 10:00 PM on Tuesday, October 8, 2024.
- The City of Sanibel has a curfew and Mandatory Evacuation beginning at 10:00 PM.
- Agriculture Unit assets have been secured.
- Shelters:
    - Alico Arena - 54
    - Dunbar High School: Occupancy 174, FMPD Covering Shelter
    - Estero Recreation Center: Registered - 716, At Shelter - 285

Subject: Hurricane Milton - Update #28

As of this update, the latest storm information is as follows:

- The current track continues to be a worst case scenario situation for the Tampa Bay region southward to Sarasota.
- The track for Hurricane Milton is still toward the lower Tampa Bay/Bradenton/Sarasota area.
- Rainfall amounts of 5 to 12 inches, with localized totals up to 18 inches are expected. Many rivers are now forecast to go into moderate to major flood stage with a few possibly reaching record levels.
- The current most likely arrival time in Lee County for tropical-storm-force winds is 3:00 PM on Wednesday, with a most likely departure time of 9:00 AM on Thursday.
- Movement is ENE at 8 mph.
- The maximum sustained wind speed has increased to 155 mph (Category 4; Category 5 starts at 157 mph).
- The minimum central pressure based on dropsonde data is 923 mb.
- We are still under a Storm Surge Warning.
- We are still under a Hurricane Warning.
- Hurricane-force winds extend outward up to 30 miles.
- Tropical-storm-force winds extend outward up to 105 miles.
- A 6' to 10' storm surge is still expected along the Lee County coast.
- Surf swells generated by Milton are expected to continue to affect much of the Gulf Coast over the next day or two, and are likely to cause life-threatening surf and rip current conditions.

As of this update, new notifications are as follows:

- Additional documentation for welfare checks (17w) will be required. Supervisors will be disseminating the information to the affected personnel.
- All Marine assets are secured at JetBlue and the 4th Precinct, and the vessel assets that will be deployed with the Marine Unit will be secured at LeeTran.
- Shelters:
    - Alico Arena - 54
    - Dunbar High School: Occupancy 174, FMPD Covering Shelter
    - Estero Recreation Center: Registered - 662, At Shelter - 217

Subject: Hurricane Milton - Update #26

As of this update, the latest storm information is as follows:

- The current track for Hurricane Milton continues to be a worst-case scenario for the Tampa Bay region southward to Sarasota. It is forecast to make landfall in Florida Wednesday night.
- The current maximum sustained winds are 145 mph. The movement is ENE at 12 mph.
- There is a Hurricane Warning in effect for the entire area. A Category 3 is forecast at landfall, with the expanding wind field still expected.
- The Storm Surge estimate is expected to be 6' - 10'. By comparison, the surge during Hurricane Helene was measured at 5.12 feet above MHHW and was measured at 11:36 PM, *almost 10 hours after* a peak

AMERICAN OVERSIGHT

wind gust of 63 mph taken at Tarpon Point at 1:51 PM. The peak water levels estimated elsewhere along coastal Lee County ranged from 2' to 5' above MHHW.

- There is a 97% chance that the earliest arrival time of tropical-storm-strength winds is 8:00 AM on Wednesday. The likely arrival time for those winds is 12:00 PM on Wednesday. The likely departure time with this update is 7:00 AM on Thursday, with the latest departure time being 12:00 PM on Thursday.
- There is a Flood Watch for the entire area.
- We are still under a Hurricane Warning.
- Hurricane-force winds extend out to 30 miles from the center, and tropical-storm-force winds extend outward up to 105 miles.
- The minimum central pressure based on aircraft dropsonde data is 929 mb.

As of this update, new notifications are as follows:

- Precinct supervisors are finalizing employee shelter arrangements should the need arise.
- VERT (Volunteer Emergency Response Team) members from the Civilian Support Unit (CSU) are on standby to assist with post-storm deployments.
- Florida DOT is reinforcing the Sanibel Causeway with armor stone near the toll plaza and securing the barges and other equipment. Intermittent road closures for equipment movement are being performed by FLDOT.
- Seventeen (17) nursing facilities are closed in Lee County.
- EOC passed out nearly 100,000 sand bags and is out of bags.
- Sand deliveries have stopped and no more sand deliveries are planned by EOC.
- Three county shelters are open and operating:
    - Island Coast HS Shelter has approximately 71 present and 446 registered.
    - Estero Rec Center has approximately 114 present and 132 registered.
    - Dunbar High School is being staffed by Fort Myers Police Department personnel.

Gas Station Updates:

- Loves Travel Station in North Fort Myers is open for First Responders only at this time.
- 7-11 at 24530 S Tamiami Trl has fuel. Pump 2 is for LEO.
- 7-11 at 24651 S Tamiami Trl has fuel. Pump 4 for LEO.
- 7-11/Sunoco at 27990 is out of fuel.
- 7-11/Mobile at 28175 S Tamiami Trl has fuel. Pumps 1 & 2 for LEO.
- 7-11 at 26975 Old 41 Road has fuel and will reserve ALL pumps for LEO.
- Circle K at 10460 Bonita Beach Rd (Old 41 & Bonita Beach Road) has fuel. Pump 1 & 3 for LEO.
- Racetrack at 13050 Bonita Beach Rd (Bonita Beach Road & Bonita Grande) has fuel. Pumps 17 & 18 for LEO.
- RaceTrac at 22350 S Tamiami Trl has other grades of fuel, but is out of regular. Pump 18 for LEO.
- 7-11 at 21850 S Tamiami Trl has fuel. Pump 1 for LEO.
- Rebel at 12030 Bonita Beach Rd SE, will reserve fuel for LEO.
- 7-11 at Terminal Access has fuel. Pumps 9 & 10 for LEO. (must go inside and let the clerk know to turn on the pump)
- 7-11 at 12011 Gateway Blvd has fuel. Pump 2 for LEO. (must go inside and let the clerk know to turn on the pump)
- 7-11 at 100 Delaware Rd. in Lehigh Acres has two pumps reserved for LEO and EMS.

AMERICAN OVERSIGHT

Definitions:

- MHHW - Mean Higher High Water (MHHW) is the average level of the highest tide for each day computed over a 19-year period.
- Dropsonde - GPS dropsondes measure vertical profiles of atmospheric temperature, pressure, humidity, and wind speed as they fall from the aircraft to the surface. They are equipped with a small parachute that slows their descent and maintains vertical orientation. The dropsonde transmits data by radio four times a second to the aircraft until it reaches the surface of the ocean.

- Circle K at SR 80/ Old Olga has fixed the pump and have a full tank for LEO. Make contact with employee for which pump to use.
- 7-11 at 12011 Gateway Blvd. has gas for LEO on Pump 2.
- 7-11 at Corkscrew and Three Oaks has gas for LEO on Pumps 13 - 16.
- RaceTrac at 6 Mile/Michael G Rippe is out of gas but requested shipment. They will set up a Pump #3 for LEO use when they get gas. Make contact with employee for pump to be turned on.
- 7-11 at 10875 Terminal Access Road has fuel and will reserve Pumps 9 and 10 for First Responders. The clerk can turn on the pump.
- Shell at 13621 N. Cleveland Ave. has LEO gas on Pump 1 & 2.
- Marathon at 14010 North Cleveland Ave. has gas.
- Mobile/7-11 at 17930 North Tamiami Tr. has LEO gas on Pump 11 & 12.
- Murphy Express at 520 Pine Island Rd. has about 3500 gallons of gas.
- Circle K at 4600 Bayline Dr. has 300 gallons for LEO.
- Rocket Gas at 5760 Bayshore Rd. has 3000 regular gas.
- Circle K at 6381 Bayshore Rd. has 500 gallons of gas for LEO.
- Loves at 17308 Park 78 Dr. has gas.
- 7-11 at 18971 Babcock Ranch Rd. has gas and expects another delivery tonight.
- Shell at 402 Del Prado in Cape Coral has gas.
- Shell at 7135 Maida Ln. has gas.
- Speedway at 1365 N. Tamiami Trl. has Premium only.

Sand Updates:

- Sand and sandbags are being distributed by Lee County Sheriff's Office members to bulk distribution sites throughout the county. Individuals will have to go to a bulk distribution site to get sandbags.
    - Current stations with available sand and/or sandbags:
        - Station 102 at 44 Homestead Rd. S. in Lehigh Acres
        - Station 104 at Sunshine and 16th St. SW in Lehigh Acres
        - Tice Fire Buckingham Station at 5850 Buckingham Road
        - San Carlos Park Fire Station 54 at 16900 Oriole Rd.
        - Bayshore Fire at 17350 Nalle Rd.
        - Bonita Springs Fire at 27701 Bonita Grande Dr.
        - Bonita Springs Fire at 8850 W. Terry St. (Truck currently enroute)

Subject: Hurricane Milton - Update #19

AMERICAN OVERSIGHT

As of this update, the latest storm information is as follows:

- The storm track has shifted north slightly. The movement is not far enough to make a difference in our impacts.
- The earliest reasonable arrival time of tropical-storm-force winds is early Wednesday morning.

As of this update, new notifications are as follows:

- The Hurricane Hotline is now active. Corrections personnel should call 239-477-1258, Law Enforcement personnel should call 239-477-1259, and Communications personnel should call 239-477-1260. Please save these numbers now in your phone. This hotline provides updates for personnel without access to e-mail. For now, all supervisors should relay all pertinent information to their personnel who do not have access to e-mail.
- Mandatory evacuations have been issued for the Town of Fort Myers Beach. Residents are encouraged to evacuate before 3:00 PM today.
- LeeTran at noon today, Monday, Oct. 7, will stop running routes onto Fort Myers Beach. All LeeTran services will convert to off-island transit only. This is to assist with the Town of Fort Myers Beach's request for residents to leave the island.
- Lee County Utilities will shut off water to Fort Myers Beach at noon Tuesday, Oct. 8. This is a precautionary measure to protect infrastructure. It was also implemented during 2022's Hurricane Ian.
- Lee County Sheriff's Office employees are currently in the field distributing sand and sand bags to locations throughout the county.

Gas Station Updates:

- 7-11 at SR 31/SR 80 received a fuel shipment this morning. Pumps 11 and 12 are for LEO. Make contact inside for pumps to be turned on.
- 7-11 at Billy's Creek is out of gas. Expecting shipment today. Will set aside fuel for LEO at Pump #1. Make contact with employee to have pump turned on.
- RaceTrac SR 31/ SR 80 has gas but expect to be out by noon and closed. Next shipment not expected until after the storm. They do not have a pump set aside for LEO.
- Circle K at SR 80/ Old Olga has fixed the pump and have a full tank for LEO. Make contact with employee for which pump to use.
- Sunoco at SR 80 and Buckingham is out of gas but requested shipment. Will pump remaining for LEO. Make contact with employee inside for pump to be turned on.
- Rebel at 6 Mile/Metro currently has 8,000 gallons and will stop pumping at 800 gallons. They do not set aside gas for us. Unknown next shipment.
- RaceTrac at 6 Mile/Michael G Rippe is out of gas but requested shipment. They will set up a Pump #3 for LEO use when they get gas. Make contact with employee for pump to be turned on.
- Race Trac at Daniels/Powers Ct is out of gas. Shipment has been requested. Will set up pump for LEO use. In the past it has been Pump 18.
- 7-11 Daniels/Palomino is out of gas. Expecting shipment today and will contact me when they receive it. Pump 10 will be set aside for LEO.
- Rebel at 9281 Daniels Pkwy is out of gas. Requested shipment for today. Pump 1 will be set aside for LEO. Go inside to have pump turned on.
- Chevron at 13031 Metro is out of gas. Not expecting shipment. Will set a pump aside for LEO if they get gas.
- Circle K at Metro and Crystal is close to running out of gas and starting to shut pumps down. They are setting aside pumps 5-8 for LEO. Meet with employee for which pump to use.

Subject: Hurricane Milton - Update #18

As of the 8:00 AM update, a Hurricane Watch remains in effect for our area.

The IMT Main Number is 239-258-3150 or e-mail at IMT@sheriffleefl.org.

As of this update, the latest storm information is as follows:

- Hurricane Milton is now a major hurricane, with sustained wind speeds of 125 mph.
- Hurricane Milton is expected to have winds of 145 mph at landfall, with some expansion of hurricane-strength winds.
- The model spread in the forecast track remains high, with the entire area within the cone.
- Movement is ESE at 8 mph.
- The current earliest arrival of tropical-storm-strength winds is 1:00 AM on Wednesday, with a likely arrival time at 8:00 AM. This is the arrival of tropical-storm-force winds, not the arrival of the actual storm.
- The storm surge estimate is 5' to 10' for Lee County. It is expected to increase throughout the day on Wednesday and peak early Thursday.
- We are still in a Hurricane Watch, a Storm Surge Watch, and a Flood Watch.
- Many rivers are already in or forecast to go into flood stage.
- The main threat for tornadoes is late Tuesday into Wednesday night.
- Confidence is low on the exact track of the system, with the entire area within the cone. It should be noted that that 72 hour average track error is 100 miles.

As of this updates, new notifications are as follows:

- All personnel must notify IMT of all asset movements and personnel changes.
- Estero Fire Station #54 at Oriole and Alico just got sand delivered.
- Pine Island Fire has sand, but no sandbags.
- North Fort Myers Recreations Center has sand but no sandbags.
- Corrections Transport vehicles have received their staging location and should be in place by 12:00 PM.
- Academy recruits and Youth Services deputies have been deployed to the field.

National Hurricane Center Definitions:

- **Hurricane Watch**: Hurricane conditions (sustained winds of 74 mph or greater) are possible within your area. Because it may not be safe to prepare for a hurricane once winds reach tropical storm force, The NHC issues hurricane watches 48 hours before it anticipates tropical storm-force winds.
- **Hurricane Warning**: Hurricane conditions (sustained winds of 74 mph or greater) are expected somewhere within the specified area. NHC issues a hurricane warning 36 hours in advance of tropical storm-force winds to give you time to complete your preparations. All preparations should be complete. Evacuate immediately if so ordered.
- **Storm Surge Watch**: There is a possibility of life-threatening inundation from rising water moving inland from the shoreline somewhere within the specified area, generally within 48 hours.

AMERICAN OVERSIGHT

- **Extreme Wind Warning**: Extreme sustained winds of a major hurricane (115 mph or greater), usually associated with the eyewall, are expected to begin within an hour. Take immediate shelter in the interior portion of a well-built structure.

Subject: Hurricane Milton - Update #17

The 5:00 AM update shows that the track is largely unchanged; however, models still vary from Naples to North of Tampa, and the intensity is forecast to be stronger, well into the Category 4 range.

As of this update, new notifications are as follows:

- The storm has current maximum winds of 100 mph.
- The current forecast for our coast is an 8' - 12' storm surge.
- The storm has slowed somewhat, so the earliest arrival of Tropical Storm force winds is now in the early Wednesday morning hours.

To: All Users <AllUsers@sheriffleefl.org>
Subject: Hurricane Milton - Update #16

The 11:00 PM update shows little movement in Hurricane Milton's track. Maximum sustained wind speeds are at 90 mph. Model tracks vary widely on the landfall location along Florida's West Coast. The Incident Management Team will continue to monitor and provide timely updates.

As of this update, new notifications are as follows:

Gas Availability:

- RaceTrac - 15820 Winkler Rd. - Pump 15 & 16 for First Responders - Contact is Tracy
- 7-11 - 12750 Cleveland Ave. - Pump 10 & 12 for First Responders - Contact is Vanilla
- RaceTrac - 5991 South Pointe Blvd. - Pump 19 & 20 for First Responders - Contact is Vince
- Mobil/7-11 - 20391 Summerlin Rd. - Pump 6 for First Responders - Contact is Susan
- Circle K - 20021 Summerlin Rd. - Pump 1 for First Responders - Contact is Kyle
- 7-11 - 15021 McGregor Blvd. - Pump 1 for First Responders - Contact is Jessica
- Mobil/7-11 - 17930 N. Tamiami Trl. - Pump 9 & 10 for First Responders - Contact is Joseph
- Circle K - 6381 Bayshore Rd. - Pump 10 for First Responders - Contact is Elizabeth

AMERICAN OVERSIGHT

- Circle K - 19101 N. Tamiami Trl. - Pump 1 & 2 for First Responders - Contact is Christy
- 7-11 - 100 Delaware in Lehigh Acres - Pump 1 & 2 for First Responders.

Sent: Sunday, October 6, 2024 8:57 PM
To: All Users <AllUsers@sheriffleefl.org>
Subject: Hurricane Milton - Update #15

As of the 8:00 PM National Hurricane Center update, Hurricane Milton is still forecast to rapidly intensify into a major hurricane. The center of the track has shifted further south, and is currently near the Bradenton/Sarasota area at landfall.

There is a Flood Watch for the entire area. Rainfall amounts of 5 to 10 inches, with localized totals of up to 15 inches are expected. The timing of the impacts is as early as late Tuesday and continuing into Thursday morning.

A good deal of uncertainty remains with where the storm will make landfall. It should be noted that the average NHC track error at day 3 is around 100 miles.

As of this update, new notifications are as follows:

- Youth Services and Training personnel have received their assignments and will report according to their schedule tomorrow.
- Court Operations and Civil personnel will receive their schedule tomorrow.
- Employee Assistance personnel are done for the evening. They will resume in the morning.
- IMT will be fully activated beginning at 7:00 AM on Monday, with all personnel reporting or receiving their assignments by then.
- For personnel working overtime, please use *Hurricane Milton* as the reason for the overtime.
- The 7-11 Gas station at 103 Leeland Heights Blvd W in Lehigh Acres is open for LEO. If you need gas, use pumps 3,4,5, or 6 only. Jessica is the contact person there.
- The 7-11 at 100 Delaware Rd. in Lehigh Acres is reserving gas for First Responders. use Pump 3 and 4. Sharon is the contact person there.
    - The 7-11 at 18971 Babcock Ranch Rd is holding gas for first responders but deputies must go inside to request pump to be turned on.
    - The 7-11 at Del Prado and N Tamiami (17930 N Tamiami Trl.) is also holding gas for first responders but deputies must go inside to request the pump be turned on.

All personnel should be ready for a full activation at any time. This is a serious, dangerous storm and all personnel should complete preparations as soon as possible. Models vary in intensity, but most predict *at least* a Category 3, so even if we do not receive a direct hit, we can expect hurricane strength winds or wind gusts and a severe storm surge.

Subject: Hurricane Milton - Update #14

AMERICAN OVERSIGHT

As of the 5:00 PM update, Milton is now a hurricane. Hurricane Milton has maximum sustained winds of 85 mph. The track has shifted slightly, and there is a more northeastern path across our area. Even if we do not

receive a direct hit, we will receive tropical storm and hurricane strength winds, significant storm surge, and dangerous flooding from rainfall, likely much greater that what we received from Hurricane Helene. By tonight, all personnel should have their homes and families secured for the storm, and be prepared for a full activation.

Notifications for this update:

- All agency members deemed non essential during an emergency response will be dismissed tomorrow, October 7th, 2024 starting at **noon**. In order to stay home you will need to advise your immediate supervisor and use your accrued time. You may report for regular duty if you chose to do so. As always, use caution when driving in inclement weather and do not attempt to traverse standing water. IMT will continue to send out updates on our response to TS Milton.

- The Emergency Operations Center (EOC) will transition to a Level 1 at 7:00 AM tomorrow. This means that shelters and countywide operations will be run out of the EOC. The Incident Management Team is your contact for agency needs; do not contact the EOC directly.

Subject: Tropical Storm Milton - Update #13

The 2:00 PM Intermediate Update shows that there are no significant changes in the track. The earliest arrival of tropical storm force winds is projected to be 8:00 PM on Tuesday.

These are the stations that are reported to still have gasoline:

- Veronica Shoemaker/Winkler
- Shell station at Hancock and US 41
- BJ's Cape Coral
- 711 Burnt Store and Pine Island has DIESEL only
- Racetrac at South Pointe and College has 93 Only
- Walmart / Murphy's USA in Lehigh
- Santa Barbara and Veterans 7/11

These are the stations that are reported to be currently **out** of gasoline:

- Country Club and Veterans Circle K
- Del Prado Speedway
- Trafalgar and Skyline 7/11
- Rebel US 41 and Del Prado
- 76 at Chiquita and Pine Island
- Walmart/Murphy's Del Prado
- Walmart on Pine Island Road
- Pine Ridge and San Carlos 7/11
- Santa Barbara and Gleason 7/11
- Palm Tree and Cape Coral Pkwy 7/11

AMERICAN OVERSIGHT

- Lee and Gunnery 7/11
- Del Prado Racetrac
- Terry St Circle K
- Lee and Alvin Racetrac
- Joel Citgo
- N Cleveland and Littleton 7/11

Below are the current updated tasks that IMT has been working on since that last updates:

- Logistics members have scheduled pre-storm deliveries for food and beverages - the arrival time is Tuesday morning.
- Logistics members have scheduled post-storm deliveries from vendors.
- Logistics members have scheduled water deliveries.
- Logistics members have created plans for replenishment of supplies for long-term activations.
- Logistics members have arranged for ice deliveries for the event power is lost.
- Purchasing members have made plans for the procurement of potable water.
- Purchasing and Logistics members have scheduled the delivery of portable bathrooms should they be needed.
- HQ will be the central location for cooking needs post-storm for employees at HQ/IMT, Forensics, MCU, Command Staff, Spec Ops, and Staging personnel.
- Precincts and Corrections facilities will be responsible for their meal preparations.

Subject: Tropical Storm Milton - Update #12

The 11:00 AM update shows a small track shift to the south. Although it is still predicted to directly hit the Tampa Bay Area, the move slightly south may bring higher wind speeds and higher storm surge. The storm is expected to quickly intensify and will likely be a major hurricane upon arrival.

All personnel are encouraged to complete preparations for their homes and their families today.

There is still a high degree of uncertainty in both the tracks and the wind speed upon arrival, so the possibility of a direct strike to our area remains. The cone of uncertainty currently covers most of the Florida peninsula. The Incident Management Team (IMT) will keep you informed, and is making preparations to include schedule planning.

Subject: Tropical Storm Milton - Update #8

The 8:00 AM update shows that Milton is forecast to become a Major Category 3 Hurricane before making landfall. Timing, tracks, and intensity are still unpredictable; however, the National Hurricane Center still shows the track toward the Tampa area.

The current forecast is as follows:

- There is a Flood Watch for the entire area through Thursday.
- Rainfall in the amount of 5" to 8", with localized totals up to 12".
- The timing of the impacts is from late Tuesday through early Thursday morning, but it is expected to make landfall on the West Coast on Wednesday.
- There is great uncertainty about where the storm will make landfall. The average Day 4 track error is around 150 miles, so we are still well within a possible landfall range.
- The current earliest wind time arrival is 4 PM on Tuesday, and the most likely arrival time is 2 AM on Wednesday.

Additional notifications for this update include:

- Personnel should maintain at least ½ tank at all times. Due to current fuel runs, please use any opportunity to make sure your agency vehicle stays full at all times.

AMERICAN OVERSIGHT

- Personnel who must fuel and have no other options may use 89 or 93 Octane fuel.
- Select IMT members have been activated. Please send requests to IMT@sheriffleefl.org.
- The select CRU members who were notified individually will report at 10:00 AM to the Headquarters Training Room (1202).
- The asset movement members who were notified individually will report at 10:00 AM to the Headquarters Training Room (1202).
- All units, components, precincts, corrections facilities, and all affected agency departments should fill up all available gas cans and gas tanks.
- Pine Island Fire Department is out of sand. They still have sandbags. They expect to get more sand on Monday.

Sent: Saturday, October 5, 2024 6:19 PM
To: All Users <AllUsers@sheriffleefl.org>
Subject: Tropical Storm Milton - Update #7

With the 5:00 PM update, Tropical Storm Milton is now expected to arrive as a major hurricane. The track has shifted some to the north; however, some model tracks still show direct hits our our area, and we are still in the cone of uncertainty. Please recall from prior storms that although we are not in the direct path, the effects of the hurricane will still affect us heavily, especially in the areas prone to storm surge. Additionally, the peak storm surge from Helene arrived almost 10 hours after the peak winds, so all personnel should be aware of and consider the effects before, during, and after the storm.

The below preparations remain in effect. The only change for this period is:

- Four (4) additional shallow water vessels have been obtained for water rescues.
- Additional High-Water Vehicles have been obtained and will be deployed to the islands for potential high-water rescues.
- The San Carlos Park Fire Department is out of sand and sandbags.

Subject: Tropical Storm Milton - Update #6

As of a 12:25 PM National Hurricane Center update, Tropical Storm Milton has formed. This storm is forecast to strengthen and bring the risk of life-threatening impacts to portions of the West Coast of Florida next week. The maximum winds are currently estimated at 40 mph with higher gusts. Models range in intensity from a Tropical Storm to a Major Hurricane, so there is tremendous unpredictability in the strength upon arrival.

At this time, the Incident Management Team is preparing for the possibility of a major hurricane affecting our area with impacts beginning on Tuesday and a full impact on Wednesday.

All agency personnel are encouraged to prepare as follows:

- All personnel should review their hurricane plans, and prepare their homes and families for the possibility of a hurricane impact in the middle of next week.

AMERICAN OVERSIGHT

- All precincts should secure their mobile assets (decoy vehicles, arrow boards, trailers, ATVs, etc.) beginning on immediately to be completed by 2:00 PM on Monday.
- All trailers should be brought to storage beginning immediately to be completed by 2:00 PM on Monday.
- All personnel should use the remainder of this weekend to prepare for a possible activation. This plan should include three days worth of food, uniforms, and supplies.
- All personnel should use the remainder of this weekend to prepare their uniforms and equipment (including sufficient batteries for equipment) for a possible activation.
- All specialty units should begin bringing their assets back to their storage areas and secure locations. This should be completed by 2:00 PM on Monday.
- All precincts should secure any items that can be moved by the wind to a secure location starting immediately to be completed by 2:00 PM on Monday.
- All Corrections facilities (including Nan's Ranch) should prepare their facilities for a possible hurricane impact next week.

This is new information as of this update:

- The Waterborne Strike Team is on standby for deployment for water rescues.
- JetBlue Stadium, CenturyLink Stadium, the Lee County Gun Range, and the Andrea Lane and Sivan Road storage buildings are prepared to receive assets if needed.
- The Marine Unit is in contact with the IMT to secure the marine assets.
- Known sandbag locations are as follows:
    - Punta Gorda—Free sandbags will be available at 3130 Cooper St., the last entrance on the left by flag poles.
    - Fort Myers Beach—Sand is located off of Gulf Beach Road, and bags are available at Town Hall, 2731 Oak St. (The location will provide service until 4:30 p.m. on Friday and begin Monday at 8:30 a.m.)
    - Fort Myers— South Trail Fire & Rescue will have sand and sandbags available at station 63, 5531 Halifax Ave., Fort Myers—a maximum of 20 bags per household. UPDATE: South Trail Fire & Rescue is currently out of sand. Empty sandbags only are available.
    - Naples— Sandbags will be available at three public park locations: Big Corkscrew Island Regional Park, 810 39th Ave., North Collier Regional Park, 15000 Livingston Road, in the Sun-N-Fun Lagoon parking lot, and at Donna Fiala Eagle Lakes Community Park, 11565 Tamiami Trail East, in the grassy area between the parking lots. The Naples sandbag locations will begin service at 8 a.m. through dusk on Saturday and Sunday.
    - San Carlos Park—Sand and sandbags are available at San Carlos Park Fire District Station 54, located at 16900 Oriole Road. There is a limit of 10 bags per household. Bags can be picked up at the lobby. Bring your own shovel. Be prepared to fill and load your own sandbags. Make sure your vehicle can transport the weight of the sandbags.
    - North Fort Myers—Sandbags will be located at North Fort Myers Parks and Recreation, 2000 N. Recreation Parkway. Sand will be located in the back of the park, next to the county mulch pile. Please bring your own shovel to fill the bags.
    - Matlacha—Sandbags are available for pickup at Station 1, located at 5700 Pine Island Rd, Bokeelia, FL 33922
- IMT personnel are visiting the precincts, and the storage locations to inventory assets to prepare for both securement and post-storm deployment.
- No schedule changes are expected between now and Monday afternoon; however, all personnel should be prepared for schedule adjustments.
- The Agriculture assets are secured on the Olga site.

Subject: Important Update on a possible impending hurricane impacting our area (Update #5)

Team,

IMT has been working on preparation for a potential Hurricane impacting our area early next week. IMT will continue to send out updates regularly so please monitor your email closely. All agency units need to begin preparations of securing their assigned assets and communicate all movement to IMT. Also, update the major asset application on the intranet. We have secured Jet Blue Park as an asset staging area for Marine and other assets. Agency asset storage facilities to include the gun range are preparing to house assets as well. IMT is securing high water vehicles that will be pre-staged at strategic locations i.e., the barrier islands. IMT members will be in the RTIC today coordinating efforts. Agency extension 239-258-3150 is being setup to communicate to IMT staff. Additional updates to follow.

Be prepared and be safe!

Subject: New Caribbean Disturbance - Update #4

The National Hurricane Center 2:00 PM update shows the possibility of development as the low pressure area in the Gulf of Mexico moves slowly eastward or northeastward. A tropical or subtropical depression or storm could form during the early to middle part of next week if the low remains separate from a frontal boundary that is forecast to extend across the Gulf of Mexico. Regardless of development, locally heavy rains could occur over portions of the Florida Peninsula late this weekend into next week. As of this update, the formation chance in the next 48 hours is low at 10 %, and the formation chance through 7 days has increased to 50%.

Current model runs show an arrival time of any potential storm around Wednesday of next week. This represents a slower forward storm speed and later storm arrival than previous model runs, so the timing and impacts are still largely unknown. Regardless of any potential storm, significant rainfall is still expected, and the Incident Management Team will continue to monitor and update all personnel.

Sent: Thursday, October 3, 2024 9:56 AM
To: All Users <AllUsers@sheriffleefl.org>
Subject: New Caribbean Disturbance - Update #3

The National Hurricane Center has reduced the chance of tropical cyclone development within seven days to 30%. While the system is likely to develop over the Gulf of Mexico late this weekend or early next week, subsequent tropical or subtropical development could be limited by the system's potential interaction with a frontal boundary. Regardless of development, locally heavy rains could occur over portions of the Florida Peninsula next week.

Subject: New Caribbean Disturbance - Update #2

The forecast for the area of disorganized showers remains the same; it is still too early to tell if the system will develop further. Regardless of development, heavy rain is expected in our area into the weekend and next week. The Incident Management Team will continue to monitor.

Subject: New Caribbean Disturbance - Update #1

The area of disorganized showers remains at a 40% chance of development. The National Hurricane Center indicates that environmental conditions could support some gradual development of this system, and a tropical depression could form towards the end of this week or this weekend while it moves generally northwestward over the northwestern Caribbean Sea and into the Gulf of Mexico. As of this time, there are no changes, but some long range models show an increased chance of this disturbance affecting our area.

Subject: New Caribbean Disturbance

The Incident Management Team is monitoring a new area of disorganized showers and thunderstorms over the western Caribbean Sea. The National Weather Center states that the system has a medium chance (40%) of developing towards the middle to latter part of the week as it moves northwestward into the Gulf of Mexico. As this disturbance moves into the gulf, increasing moisture is expected over the Florida Peninsula and elevated rain chances are anticipated from Friday through the weekend, and possibly into early next week.

Unfortunately, long range models show the possibility of direct impacts for Southwest Florida; however, It is too early to determine what, if any, tropical specific impacts can be expected.

The Incident Management Team will continue to monitor the storm, and will continue to provide updates through this very active part of the hurricane season.

Subject:	Hurricane Milton - Update #32

As of this update, the latest storm information is as follows:

- The maximum sustained wind speed has increased to 160 mph (Category 5 starts at 157 mph).
- The minimum central pressure based on dropsonde data is 914 mb.
- Hurricane Milton is moving NE at 12 mph.
- We are still under a Storm Surge Warning.
- We are still under a Hurricane Warning.
- Hurricane-force winds extend outward up to 30 miles.
- Tropical-storm-force winds extend outward up to 140 miles.
- Storm surge estimates have been raised to 8' - 12' along the Lee County coast.

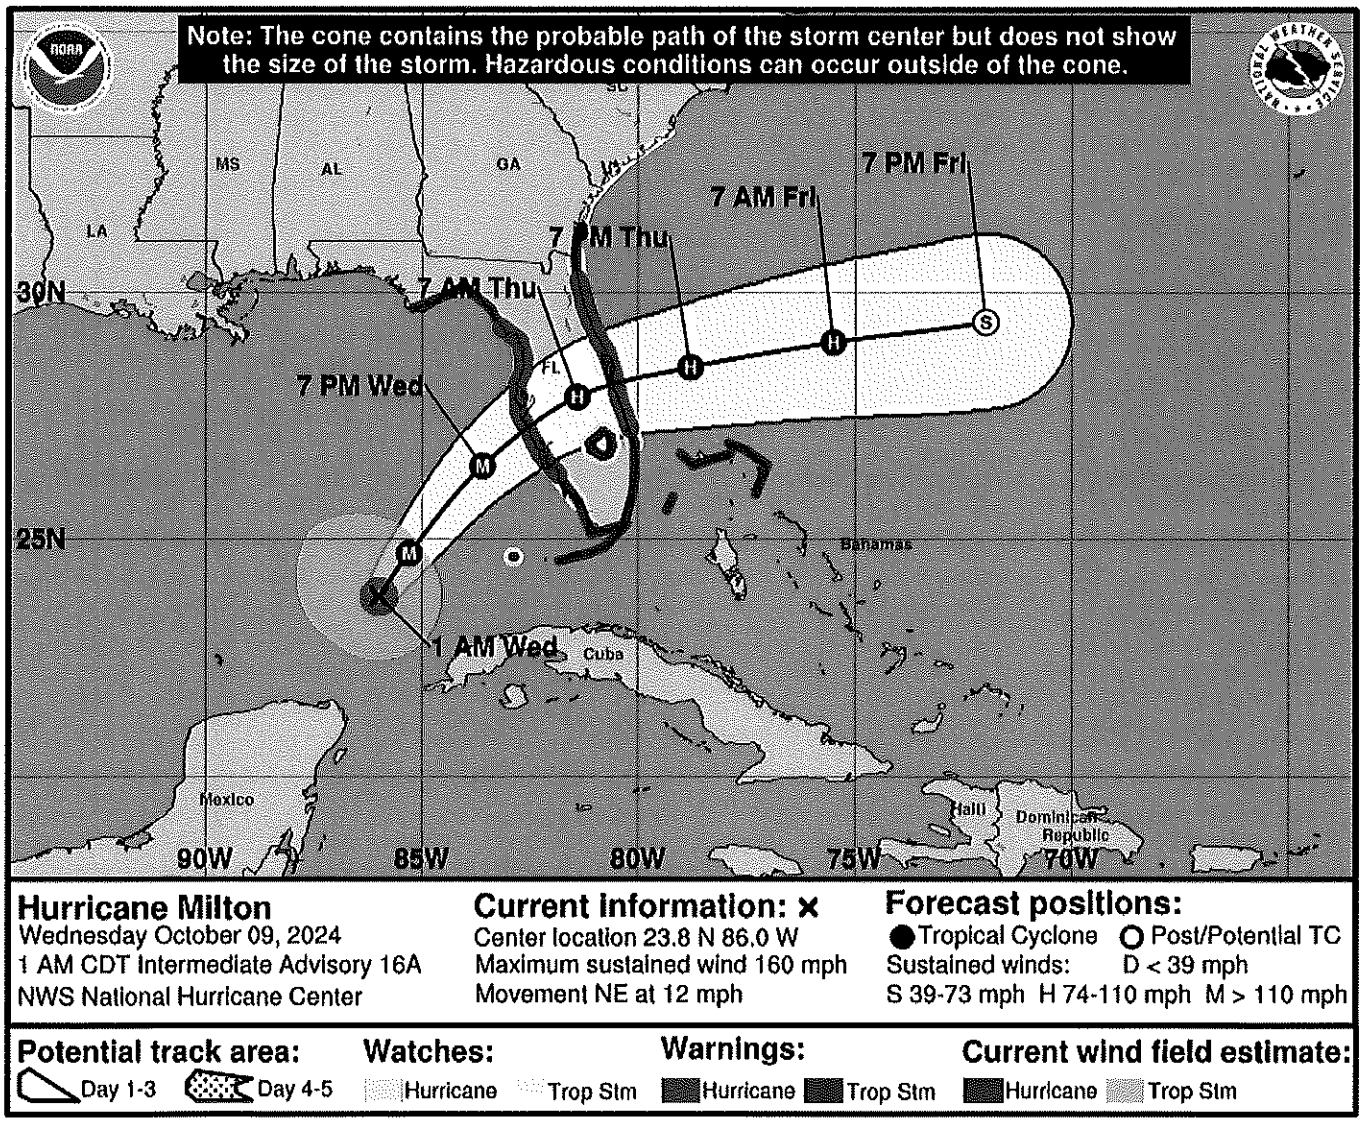
As of this update, new notifications are as follows:

- Fort Myers Beach has implemented a curfew that started at 10 pm.
- Sanibel Island has implemented a curfew that started at 10 pm. The island is currently only open to LEO and Sanibel government officials only.
- There are still some reported issues with fuel cards due to increased use. If anyone is running into any issues with their fuel card, please contact IMT.

Schedule Reminder:

- Scheduling for CIB for October 9, 2024, is as follows: CIB members assigned to dayshift (0700-1730) will report to their normal CIB unit and be available for mission-specific assignments from IMT. CIB members assigned to night shift (1730-0400) will report to their assigned Precinct and then shelter with them once the order is given. Night shift may be held longer if the conditions are not safe to travel at 0400.
- Scheduling for Communications: Nightshift (Squad 4) tomorrow will report to the EOC 1700 hours.
- Scheduling for Warrants: Night shift will also report tomorrow to the EOC at 1700 hours.

Shelters Updates:



- Alico Arena - 131

Subject: Hurricane Milton - Update #28

As of this update, the latest storm information is as follows:

- The current track continues to be a worst case scenario situation for the Tampa Bay region southward to Sarasota.
- The track for Hurricane Milton is still toward the lower Tampa Bay/Bradenton/Sarasota area.
- Rainfall amounts of 5 to 12 inches, with localized totals up to 18 inches are expected. Many rivers are now forecast to go into moderate to major flood stage with a few possibly reaching record levels.
- The current most likely arrival time in Lee County for tropical-storm-force winds is 3:00 PM on Wednesday, with a most likely departure time of 9:00 AM on Thursday.
- Movement is ENE at 8 mph.
- The maximum sustained wind speed has increased to 155 mph (Category 4; Category 5 starts at 157 mph).
- The minimum central pressure based on dropsonde data is 923 mb.
- We are still under a Storm Surge Warning.
- We are still under a Hurricane Warning.
- Hurricane-force winds extend outward up to 30 miles.
- Tropical-storm-force winds extend outward up to 105 miles.
- A 6' to 10' storm surge is still expected along the Lee County coast.
- Surf swells generated by Milton are expected to continue to affect much of the Gulf Coast over the next day or two, and are likely to cause life-threatening surf and rip current conditions.

As of this update, new notifications are as follows:

- Additional documentation for welfare checks (17w) will be required. Supervisors will be disseminating the information to the affected personnel.
- All Marine assets are secured at JetBlue and the 4th Precinct, and the vessel assets that will be deployed with the Marine Unit will be secured at LeeTran.
- Shelters:

Subject: Hurricane Milton - Update #26

As of this update, the latest storm information is as follows:

- The current track for Hurricane Milton continues to be a worst-case scenario for the Tampa Bay region southward to Sarasota. It is forecast to make landfall in Florida Wednesday night.
- The current maximum sustained winds are 145 mph. The movement is ENE at 12 mph.
- There is a Hurricane Warning in effect for the entire area. A Category 3 is forecast at landfall, with the expanding wind field still expected.
- The Storm Surge estimate is expected to be 6' - 10'. By comparison, the surge during Hurricane Helene was measured at 5.12 feet above MHHW and was measured at 11:36 PM, *almost 10 hours <u>after</u>* a peak

AMERICAN OVERSIGHT

wind gust of 63 mph taken at Tarpon Point at 1:51 PM. The peak water levels estimated elsewhere along coastal Lee County ranged from 2' to 5' above MHHW.

- There is a 97% chance that the earliest arrival time of tropical-storm-strength winds is 8:00 AM on Wednesday. The likely arrival time for those winds is 12:00 PM on Wednesday. The likely departure time with this update is 7:00 AM on Thursday, with the latest departure time being 12:00 PM on Thursday.
- There is a Flood Watch for the entire area.
- We are still under a Hurricane Warning.
- Hurricane-force winds extend out to 30 miles from the center, and tropical-storm-force winds extend outward up to 105 miles.
- The minimum central pressure based on aircraft dropsonde data is 929 mb.

As of this update, new notifications are as follows:

- Precinct supervisors are finalizing employee shelter arrangements should the need arise.
- VERT (Volunteer Emergency Response Team) members from the Civilian Support Unit (CSU) are on standby to assist with post-storm deployments.
- Florida DOT is reinforcing the Sanibel Causeway with armor stone near the toll plaza and securing the barges and other equipment. Intermittent road closures for equipment movement are being performed by FLDOT.
- Seventeen (17) nursing facilities are closed in Lee County.
- EOC passed out nearly 100,000 sand bags and is out of bags.
- Sand deliveries have stopped and no more sand deliveries are planned by EOC.
- Three county shelters are open and operating:
    - Island Coast HS Shelter has approximately 71 present and 446 registered.
    - Estero Rec Center has approximately 114 present and 132 registered.
    - Dunbar High School is being staffed by Fort Myers Police Department personnel.

Gas Station Updates:

- Loves Travel Station in North Fort Myers is open for First Responders only at this time.
- 7-11 at 24530 S Tamiami Trl has fuel. Pump 2 is for LEO.
- 7-11 at 24651 S Tamiami Trl has fuel. Pump 4 for LEO.
- 7-11/Sunoco at 27990 is out of fuel.
- 7-11/Mobile at 28175 S Tamiami Trl has fuel. Pumps 1 & 2 for LEO.
- 7-11 at 26975 Old 41 Road has fuel and will reserve ALL pumps for LEO.
- Circle K at 10460 Bonita Beach Rd (Old 41 & Bonita Beach Road) has fuel. Pump 1 & 3 for LEO.
- Racetrack at 13050 Bonita Beach Rd (Bonita Beach Road & Bonita Grande) has fuel. Pumps 17 & 18 for LEO.
- RaceTrac at 22350 S Tamiami Trl has other grades of fuel, but is out of regular. Pump 18 for LEO.
- 7-11 at 21850 S Tamiami Trl has fuel. Pump 1 for LEO.
- Rebel at 12030 Bonita Beach Rd SE, will reserve fuel for LEO.
- 7-11 at Terminal Access has fuel. Pumps 9 & 10 for LEO. (must go inside and let the clerk know to turn on the pump)
- 7-11 at 12011 Gateway Blvd has fuel. Pump 2 for LEO. (must go inside and let the clerk know to turn on the pump)
- 7-11 at 100 Delaware Rd. in Lehigh Acres has two pumps reserved for LEO and EMS.

AMERICAN OVERSIGHT

Definitions:

- MHHW - Mean Higher High Water (MHHW) is the average level of the highest tide for each day computed over a 19-year period.
- Dropsonde - GPS dropsondes measure vertical profiles of atmospheric temperature, pressure, humidity, and wind speed as they fall from the aircraft to the surface. They are equipped with a small parachute that slows their descent and maintains vertical orientation. The dropsonde transmits data by radio four times a second to the aircraft until it reaches the surface of the ocean.

Subject: Hurricane Milton - Update #19

AMENDED OVERSIGHT

As of this update, the latest storm information is as follows:

- The storm track has shifted north slightly. The movement is not far enough to make a difference in our impacts.
- The earliest reasonable arrival time of tropical-storm-force winds is early Wednesday morning.

As of this update, new notifications are as follows:

- The Hurricane Hotline is now active. Corrections personnel should call 239-477-1258, Law Enforcement personnel should call 239-477-1259, and Communications personnel should call 239-477-1260. Please save these numbers now in your phone. This hotline provides updates for personnel without access to e-mail. For now, all supervisors should relay all pertinent information to their personnel who do not have access to e-mail.
- Mandatory evacuations have been issued for the Town of Fort Myers Beach. Residents are encouraged to evacuate before 3:00 PM today.
- LeeTran at noon today, Monday, Oct. 7, will stop running routes onto Fort Myers Beach. All LeeTran services will convert to off-island transit only. This is to assist with the Town of Fort Myers Beach's request for residents to leave the island.
- Lee County Utilities will shut off water to Fort Myers Beach at noon Tuesday, Oct. 8. This is a precautionary measure to protect infrastructure. It was also implemented during 2022's Hurricane Ian.
- Lee County Sheriff's Office employees are currently in the field distributing sand and sand bags to locations throughout the county.

Gas Station Updates:

- 7-11 at SR 31/SR 80 received a fuel shipment this morning. Pumps 11 and 12 are for LEO. Make contact inside for pumps to be turned on.
- 7-11 at Billy's Creek is out of gas. Expecting shipment today. Will set aside fuel for LEO at Pump #1. Make contact with employee to have pump turned on.
- RaceTrac SR 31/ SR 80 has gas but expect to be out by noon and closed. Next shipment not expected until after the storm. They do not have a pump set aside for LEO.
- Circle K at SR 80/ Old Olga has fixed the pump and have a full tank for LEO. Make contact with employee for which pump to use.
- Sunoco at SR 80 and Buckingham is out of gas but requested shipment. Will pump remaining for LEO. Make contact with employee inside for pump to be turned on.
- Rebel at 6 Mile/Metro currently has 8,000 gallons and will stop pumping at 800 gallons. They do not set aside gas for us. Unknown next shipment.
- RaceTrac at 6 Mile/Michael G Rippe is out of gas but requested shipment. They will set up a Pump #3 for LEO use when they get gas. Make contact with employee for pump to be turned on.
- Race Trac at Daniels/Powers Ct is out of gas. Shipment has been requested. Will set up pump for LEO use. In the past it has been Pump 18.
- 7-11 Daniels/Palomino is out of gas. Expecting shipment today and will contact me when they receive it. Pump 10 will be set aside for LEO.
- Rebel at 9281 Daniels Pkwy is out of gas. Requested shipment for today. Pump 1 will be set aside for LEO. Go inside to have pump turned on.
- Chevron at 13031 Metro is out of gas. Not expecting shipment. Will set a pump aside for LEO if they get gas.
- Circle K at Metro and Crystal is close to running out of gas and starting to shut pumps down. They are setting aside pumps 5-8 for LEO. Meet with employee for which pump to use.

Subject: Hurricane Milton - Update #18

As of the 8:00 AM update, a Hurricane Watch remains in effect for our area.

The IMT Main Number is 239-258-3150 or e-mail at IMT@sheriffleefl.org.

As of this update, the latest storm information is as follows:

- Hurricane Milton is now a major hurricane, with sustained wind speeds of 125 mph.
- Hurricane Milton is expected to have winds of 145 mph at landfall, with some expansion of hurricane-strength winds.
- The model spread in the forecast track remains high, with the entire area within the cone.
- Movement is ESE at 8 mph.
- The current earliest arrival of tropical-storm-strength winds is 1:00 AM on Wednesday, with a likely arrival time at 8:00 AM. This is the arrival of tropical-storm-force winds, not the arrival of the actual storm.
- The storm surge estimate is 5' to 10' for Lee County. It is expected to increase throughout the day on Wednesday and peak early Thursday.
- We are still in a Hurricane Watch, a Storm Surge Watch, and a Flood Watch.
- Many rivers are already in or forecast to go into flood stage.
- The main threat for tornadoes is late Tuesday into Wednesday night.
- Confidence is low on the exact track of the system, with the entire area within the cone. It should be noted that that 72 hour average track error is 100 miles.

As of this updates, new notifications are as follows:

- All personnel must notify IMT of all asset movements and personnel changes.
- Estero Fire Station #54 at Oriole and Alico just got sand delivered.
- Pine Island Fire has sand, but no sandbags.
- North Fort Myers Recreations Center has sand but no sandbags.
- Corrections Transport vehicles have received their staging location and should be in place by 12:00 PM.
- Academy recruits and Youth Services deputies have been deployed to the field.

National Hurricane Center Definitions:

- **Hurricane Watch**: Hurricane conditions (sustained winds of 74 mph or greater) are possible within your area. Because it may not be safe to prepare for a hurricane once winds reach tropical storm force, The NHC issues hurricane watches 48 hours before it anticipates tropical storm-force winds.
- **Hurricane Warning**: Hurricane conditions (sustained winds of 74 mph or greater) are expected somewhere within the specified area. NHC issues a hurricane warning 36 hours in advance of tropical storm-force winds to give you time to complete your preparations. All preparations should be complete. Evacuate immediately if so ordered.
- **Storm Surge Watch**: There is a possibility of life-threatening inundation from rising water moving inland from the shoreline somewhere within the specified area, generally within 48 hours.

AMERICAN OVERSIGHT

- **Extreme Wind Warning**: Extreme sustained winds of a major hurricane (115 mph or greater), usually associated with the eyewall, are expected to begin within an hour. Take immediate shelter in the interior portion of a well-built structure.

To: All Users <AllUsers@sheriffleefl.org>
Subject: Hurricane Milton - Update #17

The 5:00 AM update shows that the track is largely unchanged; however, models still vary from Naples to North of Tampa, and the intensity is forecast to be stronger, well into the Category 4 range.

As of this update, new notifications are as follows:

- The storm has current maximum winds of 100 mph.
- The current forecast for our coast is an 8' - 12' storm surge.
- The storm has slowed somewhat, so the earliest arrival of Tropical Storm force winds is now in the early Wednesday morning hours.

Subject: Hurricane Milton - Update #16

The 11:00 PM update shows little movement in Hurricane Milton's track. Maximum sustained wind speeds are at 90 mph. Model tracks vary widely on the landfall location along Florida's West Coast. The Incident Management Team will continue to monitor and provide timely updates.

As of this update, new notifications are as follows:

Gas Availability:

- RaceTrac - 15820 Winkler Rd. - Pump 15 & 16 for First Responders - Contact is Tracy
- 7-11 - 12750 Cleveland Ave. - Pump 10 & 12 for First Responders - Contact is Vanilla
- RaceTrac - 5991 South Pointe Blvd. - Pump 19 & 20 for First Responders - Contact is Vince
- Mobil/7-11 - 20391 Summerlin Rd. - Pump 6 for First Responders - Contact is Susan
- Circle K - 20021 Summerlin Rd. - Pump 1 for First Responders - Contact is Kyle
- 7-11 - 15021 McGregor Blvd. - Pump 1 for First Responders - Contact is Jessica
- Mobil/7-11 - 17930 N. Tamiami Trl. - Pump 9 & 10 for First Responders - Contact is Joseph
- Circle K - 6381 Bayshore Rd. - Pump 10 for First Responders - Contact is Elizabeth

AMERICAN OVERSIGHT

- Circle K - 19101 N. Tamiami Trl. - Pump 1 & 2 for First Responders - Contact is Christy
- 7-11 - 100 Delaware in Lehigh Acres - Pump 1 & 2 for First Responders.

From: IMT <IMT@sheriffleefl.org>

To: All Users <AllUsers@sheriffleefl.org>
Subject: Hurricane Milton - Update #15

As of the 8:00 PM National Hurricane Center update, Hurricane Milton is still forecast to rapidly intensify into a major hurricane. The center of the track has shifted further south, and is currently near the Bradenton/Sarasota area at landfall.

There is a Flood Watch for the entire area. Rainfall amounts of 5 to 10 inches, with localized totals of up to 15 inches are expected. The timing of the impacts is as early as late Tuesday and continuing into Thursday morning.

A good deal of uncertainty remains with where the storm will make landfall. It should be noted that the average NHC track error at day 3 is around 100 miles.

As of this update, new notifications are as follows:

- Youth Services and Training personnel have received their assignments and will report according to their schedule tomorrow.
- Court Operations and Civil personnel will receive their schedule tomorrow.
- Employee Assistance personnel are done for the evening. They will resume in the morning.
- IMT will be fully activated beginning at 7:00 AM on Monday, with all personnel reporting or receiving their assignments by then.
- For personnel working overtime, please use *Hurricane Milton* as the reason for the overtime.
- The 7-11 Gas station at 103 Leeland Heights Blvd W in Lehigh Acres is open for LEO. If you need gas, use pumps 3,4,5, or 6 only. Jessica is the contact person there.
- The 7-11 at 100 Delaware Rd. in Lehigh Acres is reserving gas for First Responders. use Pump 3 and 4. Sharon is the contact person there.
    - The 7-11 at 18971 Babcock Ranch Rd is holding gas for first responders but deputies must go inside to request pump to be turned on.
    - The 7-11 at Del Prado and N Tamiami (17930 N Tamiami Trl.) is also holding gas for first responders but deputies must go inside to request the pump be turned on.

All personnel should be ready for a full activation at any time. This is a serious, dangerous storm and all personnel should complete preparations as soon as possible. Models vary in intensity, but most predict *at least* a Category 3, so even if we do not receive a direct hit, we can expect hurricane strength winds or wind gusts and a severe storm surge.

Subject: Hurricane Milton - Update #14

AMERICAN OVERSIGHT

As of the 5:00 PM update, Milton is now a hurricane. Hurricane Milton has maximum sustained winds of 85 mph. The track has shifted slightly, and there is a more northeastern path across our area. Even if we do not

receive a direct hit, we will receive tropical storm and hurricane strength winds, significant storm surge, and dangerous flooding from rainfall, likely much greater that what we received from Hurricane Helene. By tonight, all personnel should have their homes and families secured for the storm, and be prepared for a full activation.

Notifications for this update:

- All agency members deemed non essential during an emergency response will be dismissed tomorrow, October 7th, 2024 starting at **noon**. In order to stay home you will need to advise your immediate supervisor and use your accrued time. You may report for regular duty if you chose to do so. As always, use caution when driving in inclement weather and do not attempt to traverse standing water. IMT will continue to send out updates on our response to TS Milton.

- The Emergency Operations Center (EOC) will transition to a Level 1 at 7:00 AM tomorrow. This means that shelters and countywide operations will be run out of the EOC. The Incident Management Team is your contact for agency needs; do not contact the EOC directly.

Subject: Tropical Storm Milton - Update #13

The 2:00 PM Intermediate Update shows that there are no significant changes in the track. The earliest arrival of tropical storm force winds is projected to be 8:00 PM on Tuesday.

These are the stations that are reported to still have gasoline:

- Veronica Shoemaker/Winkler
- Shell station at Hancock and US 41
- BJ's Cape Coral
- 711 Burnt Store and Pine Island has DIESEL only
- Racetrac at South Pointe and College has 93 Only
- Walmart / Murphy's USA in Lehigh
- Santa Barbara and Veterans 7/11

These are the stations that are reported to be currently **out** of gasoline:

- Country Club and Veterans Circle K
- Del Prado Speedway
- Trafalgar and Skyline 7/11
- Rebel US 41 and Del Prado
- 76 at Chiquita and Pine Island
- Walmart/Murphy's Del Prado
- Walmart on Pine Island Road
- Pine Ridge and San Carlos 7/11
- Santa Barbara and Gleason 7/11
- Palm Tree and Cape Coral Pkwy 7/11

AMERICAN OVERSIGHT

- Lee and Gunnery 7/11
- Del Prado Racetrac
- Terry St Circle K
- Lee and Alvin Racetrac
- Joel Citgo
- N Cleveland and Littleton 7/11

Below are the current updated tasks that IMT has been working on since that last updates:

- Logistics members have scheduled pre-storm deliveries for food and beverages - the arrival time is Tuesday morning.
- Logistics members have scheduled post-storm deliveries from vendors.
- Logistics members have scheduled water deliveries.
- Logistics members have created plans for replenishment of supplies for long-term activations.
- Logistics members have arranged for ice deliveries for the event power is lost.
- Purchasing members have made plans for the procurement of potable water.
- Purchasing and Logistics members have scheduled the delivery of portable bathrooms should they be needed.
- HQ will be the central location for cooking needs post-storm for employees at HQ/IMT, Forensics, MCU, Command Staff, Spec Ops, and Staging personnel.
- Precincts and Corrections facilities will be responsible for their meal preparations.

Subject: Tropical Storm Milton - Update #12

The 11:00 AM update shows a small track shift to the south. Although it is still predicted to directly hit the Tampa Bay Area, the move slightly south may bring higher wind speeds and higher storm surge. The storm is expected to quickly intensify and will likely be a major hurricane upon arrival.

All personnel are encouraged to complete preparations for their homes and their families today.

There is still a high degree of uncertainty in both the tracks and the wind speed upon arrival, so the possibility of a direct strike to our area remains. The cone of uncertainty currently covers most of the Florida peninsula. The Incident Management Team (IMT) will keep you informed, and is making preparations to include schedule planning.

Subject: Tropical Storm Milton - Update #9

Employee assistance team members are on standby for employees who may need assistance with boarding windows, minor (quick) repairs for securing homes, and other needs in order to prepare for activation. If you need assistance, please e-mail the Incident Management Team at IMT@sheriffleefl.org with your address, specific need, and any exigent circumstances that would require a priority response (elderly family members, light duty employees who need help, etc.). If you do not have access to e-mail, you may call 239-258-3150. They will relay the message to the Incident Management Team.

Please note that employee assistance members **do not** have plywood/shutters, etc. They can only assist you with the items that you already have.

Supervisors, please relay this information to your employees who may not have access to e-mail.

Subject: Tropical Storm Milton - Update #8

The 8:00 AM update shows that Milton is forecast to become a Major Category 3 Hurricane before making landfall. Timing, tracks, and intensity are still unpredictable; however, the National Hurricane Center still shows the track toward the Tampa area.

The current forecast is as follows:

- There is a Flood Watch for the entire area through Thursday.
- Rainfall in the amount of 5" to 8", with localized totals up to 12".
- The timing of the impacts is from late Tuesday through early Thursday morning, but it is expected to make landfall on the West Coast on Wednesday.
- There is great uncertainty about where the storm will make landfall. The average Day 4 track error is around 150 miles, so we are still well within a possible landfall range.
- The current earliest wind time arrival is 4 PM on Tuesday, and the most likely arrival time is 2 AM on Wednesday.

Additional notifications for this update include:

- Personnel should maintain at least ½ tank at all times. Due to current fuel runs, please use any opportunity to make sure your agency vehicle stays full at all times.

AMERICAN OVERSIGHT

- Personnel who must fuel and have no other options may use 89 or 93 Octane fuel.
- Select IMT members have been activated. Please send requests to IMT@sheriffleefl.org.
- The select CRU members who were notified individually will report at 10:00 AM to the Headquarters Training Room (1202).
- The asset movement members who were notified individually will report at 10:00 AM to the Headquarters Training Room (1202).
- All units, components, precincts, corrections facilities, and all affected agency departments should fill up all available gas cans and gas tanks.
- Pine Island Fire Department is out of sand. They still have sandbags. They expect to get more sand on Monday.

Subject: Tropical Storm Milton - Update #7

With the 5:00 PM update, Tropical Storm Milton is now expected to arrive as a major hurricane. The track has shifted some to the north; however, some model tracks still show direct hits our our area, and we are still in the cone of uncertainty. Please recall from prior storms that although we are not in the direct path, the effects of the hurricane will still affect us heavily, especially in the areas prone to storm surge. Additionally, the peak storm surge from Helene arrived almost 10 hours after the peak winds, so all personnel should be aware of and consider the effects before, during, and after the storm.

The below preparations remain in effect. The only change for this period is:

- Four (4) additional shallow water vessels have been obtained for water rescues.
- Additional High-Water Vehicles have been obtained and will be deployed to the islands for potential high-water rescues.
- The San Carlos Park Fire Department is out of sand and sandbags.

Subject: Tropical Storm Milton - Update #6

As of a 12:25 PM National Hurricane Center update, Tropical Storm Milton has formed. This storm is forecast to strengthen and bring the risk of life-threatening impacts to portions of the West Coast of Florida next week. The maximum winds are currently estimated at 40 mph with higher gusts. Models range in intensity from a Tropical Storm to a Major Hurricane, so there is tremendous unpredictability in the strength upon arrival.

At this time, the Incident Management Team is preparing for the possibility of a major hurricane affecting our area with impacts beginning on Tuesday and a full impact on Wednesday.

All agency personnel are encouraged to prepare as follows:

- All personnel should review their hurricane plans, and prepare their homes and families for the possibility of a hurricane impact in the middle of next week.

AMERICAN OVERSIGHT

- All precincts should secure their mobile assets (decoy vehicles, arrow boards, trailers, ATVs, etc.) beginning on immediately to be completed by 2:00 PM on Monday.
- All trailers should be brought to storage beginning immediately to be completed by 2:00 PM on Monday.
- All personnel should use the remainder of this weekend to prepare for a possible activation. This plan should include three days worth of food, uniforms, and supplies.
- All personnel should use the remainder of this weekend to prepare their uniforms and equipment (including sufficient batteries for equipment) for a possible activation.
- All specialty units should begin bringing their assets back to their storage areas and secure locations. This should be completed by 2:00 PM on Monday.
- All precincts should secure any items that can be moved by the wind to a secure location starting immediately to be completed by 2:00 PM on Monday.
- All Corrections facilities (including Nan's Ranch) should prepare their facilities for a possible hurricane impact next week.

This is new information as of this update:

- The Waterborne Strike Team is on standby for deployment for water rescues.
- JetBlue Stadium, CenturyLink Stadium, the Lee County Gun Range, and the Andrea Lane and Sivan Road storage buildings are prepared to receive assets if needed.
- The Marine Unit is in contact with the IMT to secure the marine assets.
- Known sandbag locations are as follows:
    - Punta Gorda—Free sandbags will be available at 3130 Cooper St., the last entrance on the left by flag poles.
    - Fort Myers Beach—Sand is located off of Gulf Beach Road, and bags are available at Town Hall, 2731 Oak St. (The location will provide service until 4:30 p.m. on Friday and begin Monday at 8:30 a.m.)
    - Fort Myers— South Trail Fire & Rescue will have sand and sandbags available at station 63, 5531 Halifax Ave., Fort Myers—a maximum of 20 bags per household. UPDATE: South Trail Fire & Rescue is currently out of sand. Empty sandbags only are available.
    - Naples— Sandbags will be available at three public park locations: Big Corkscrew Island Regional Park, 810 39th Ave., North Collier Regional Park, 15000 Livingston Road, in the Sun-N-Fun Lagoon parking lot, and at Donna Fiala Eagle Lakes Community Park, 11565 Tamiami Trail East, in the grassy area between the parking lots. The Naples sandbag locations will begin service at 8 a.m. through dusk on Saturday and Sunday.
    - San Carlos Park—Sand and sandbags are available at San Carlos Park Fire District Station 54, located at 16900 Oriole Road. There is a limit of 10 bags per household. Bags can be picked up at the lobby. Bring your own shovel. Be prepared to fill and load your own sandbags. Make sure your vehicle can transport the weight of the sandbags.
    - North Fort Myers—Sandbags will be located at North Fort Myers Parks and Recreation, 2000 N. Recreation Parkway. Sand will be located in the back of the park, next to the county mulch pile. Please bring your own shovel to fill the bags.
    - Matlacha—Sandbags are available for pickup at Station 1, located at 5700 Pine Island Rd, Bokeelia, FL 33922
- IMT personnel are visiting the precincts, and the storage locations to inventory assets to prepare for both securement and post-storm deployment.
- No schedule changes are expected between now and Monday afternoon; however, all personnel should be prepared for schedule adjustments.
- The Agriculture assets are secured on the Olga site.
