(b-1) This subsection applies only to property that is located in one or more school districts that have a local revenue level in excess of entitlement as specified by Section 48.257, Education Code, and that, for the school year beginning in the current tax year, have taken measures to reduce the district's local revenue level in accordance with Section 49.002, Education Code. In addition to the information required by Subsection (b) of this section, the database must include, with respect to each property to which this subsection applies that is listed on the appraisal roll for the appraisal district, the following information, if applicable, for each school district in which the property is located:

(1) the percentage of the taxes for maintenance and operations imposed by the district for the current tax year that the district is required to pay under the agreement for the school year beginning in the current tax year to purchase average daily attendance credits;

"How do your property taxes fund public education? The Texas Legislature sets the level of funding per student that school districts are entitled to retain for the maintenance and operations of the district. This funding comes first from local property taxes and then from the state's general revenue. After (name of school district) collects the funds attributable to the district's local tax collections for maintenance and operations, the state makes up the difference to meet the funding level set by the Texas Legislature. Since the local tax collections in (name of school district) exceed its state entitlement, (name of school district) is required to reduce its local revenue level, which it has chosen to do by paying a portion of its local tax collections as recapture to the state. The recaptured funds contribute to the state's overall education funding pool and are used to help balance the funding each school district receives. By recapturing funds from school districts, the state reduces the amount of money it needs to allocate directly to districts not required to reduce their local revenue level, freeing up additional resources to fund other state priorities. This can create budgetary savings for the state.

"Where do your property taxes go? (name of school district) is required to pay (percentage described by Subdivision (1) for applicable school district) of local tax collections to the state. Recaptured local taxes sent to the state reduce the demand for other state revenue that would be required for the state to contribute to

In addition to the information required by Subsection (b) of this section, the database must include, with respect to each property to which this subsection applies that is listed on the appraisal roll for the appraisal district, the following information, if applicable, for each school district in which the property is located:

(1) the percentage of the taxes for maintenance and operations imposed by the district for the current tax year that the district is required to pay under the agreement for the school year beginning in the current tax year to purchase average daily attendance credits;

(2) the percentage of the taxes for maintenance and operations imposed by the district for the current tax year that the district is not required to pay under the agreement for the school year beginning in the current tax year to purchase average daily attendance credits; and

(3) the following statement:

"How do your property taxes fund public education? The Texas Legislature sets the level of funding per student that school districts are entitled to retain for the maintenance and operations of the district. This funding comes first from local property taxes and then from the state's general revenue. After (name of school district) collects the funds attributable to the district's local tax collections for maintenance and operations, the state makes up the difference to meet the funding level set by the Texas Legislature. Since the local tax collections in (name of school district) exceed its state entitlement, (name of school district) is required to reduce its local revenue level, which it has chosen to do by paying a portion of its local tax collections as recapture to the state. The recaptured funds contribute to the state's overall education funding pool and are used to help balance the funding each school district receives. By recapturing funds from school districts, the state reduces the amount of money it needs to allocate directly to districts not required to reduce their local

AMERICAN OVERSIGHT

revenue level, freeing up additional resources to fund other state priorities. This can create budgetary savings for the state.

"Where do your property taxes go? (name of **school** district) is required to pay (percentage described by Subdivision (1) for applicable **school** district) of local tax collections to the state. Recaptured local taxes sent to the state reduce the demand for other state revenue that would be required for the state to contribute to public **education** through the Foundation **School** Program."

Relating to the separation of federal elections from state and local elections, and to related practices and procedures.

Companions: SB 106 Hall, Bob (Identical)
2- 3-25 S Introduced and referred to committee on Senate State Affairs

Remarks:
SUMMARY: This bill segments federal elections from state elections to bypass the federal prohibition against checking citizenship of voters prior to registration.

BACKGROUND: It is unlawful for noncitizens to vote in Texas elections, but there is a federal law that prevents states from checking citizenship on the front end. Arizona is currently the only state that has a segmented election.

AGENCY IMPACT: This bill will require extensive work for our agency. We will have to essentially conduct 2 separate elections and manage 2 separate registration processes.

AGENCY FISCAL IMPACT: Significant. Will require additional staff and major technology adjustments.

ESTIMATED COST: TBD

LOCAL IMPACT: Here would describe impact to counties.

FOR/AGAINST: Here list groups (not members) that favor/oppose.

STAFF COMMENTS: Here provide information about what we are hearing about the bill's chances. What members support/oppose.

SB 707 King, Phil(R)

Relating to the authority of the legislature to determine that certain federal directives are unconstitutional and to prohibit certain government officers and employees from enforcing or assisting.

Remarks:

Summary: The proposed legislation seeks to empower the Texas legislature to recognize and act against specific federal directives deemed to infringe upon state rights and powers, as delineated by the Tenth Amendment of the United States Constitution.

Agency Impact: No expected impact

Fiscal Impact: TBD

Staff Comments: The bill allows the legislature to authorize actions against federal overreach, enabling it to formally declare a federal directive as unconstitutional through a concurrent resolution. This includes clear stipulations on how resolutions must be filed and what elements they must contain, thereby ensuring transparency and specificity in legislative actions.

Finally, the bill notes that inaction by the legislature does not imply compliance with any federal directive nor does it curtail the Texas attorney general's power to contest such directives' legality.

AMERICAN OVERSIGHT

Litigation relating to information requests is also addressed, as requestors who prevail in court are entitled to recover costs and attorney fees, thus creating an incentive for compliance. Furthermore, the bill allows requestors to lodge complaints with the attorney general for failure of governmental bodies to respond to requests, ensuring more stringent compliance and training for such bodies.
